The abundance of the natural resources in the State, the existence of numerous rivers and waterways providing easy means of communication and above all, the increasing efforts of Government to foster industrialisation have contributed in no small measure to the industrial development of the State. There are over 700 big and small industries throughout the State, which include the following:—Rubber goods 6; Ceramics and Potteries 4; Cotton textiles 14; Soap 5; Chemicals and Fertilizers 4; Sugar 2; Paper 1; Cement 1; Rayon 1; Glass 1; Matches 4; Cashewnut 163; Coir 157; Tea 92; Tiles 69; Oil 65; Saw Mills and Wood Works 29, etc.

Of these, Government own the Travancore Rubber Works, Trivandrum; the Ceramic Factory at Kundara, which manufactures porcelain goods, electric goods, crockery, fancy articles, and sanitary equipment like drainage pipes; the Travancore Mineral concerns, Chavara; and the Travancore Plywood Industries, Punaloor. The Government have also taken shares in many industrial concerns. A large number of these factories are run by cheap power made available from the Pallivasal Hydro-electric Works. The State also produces refined salt on a commercial scale, and is able to export salt after meeting its own requirements at home. The State has a magnificent harbour at Cochin which is expected to develop into one of the major ports of India.

The means of communication and transport are highly developed throughout the State.

The State occupies a front rank among States in the matter of education. The literacy figures of this region are the highest in India, both for men and women. The literacy figure is 45 per cent, 56 for men and 34 for women according to the census figures for 1941. There are 29 Colleges, about 500 High Schools with Middle Schools attached, about 700 Middle Schools without High Schools, about 4,000 Primary Schools and about 120 Special Schools. Nearly 15 lakhs of students get their education in the Schools and girls form more than 40 per cent of the number. Nearly one-quarter of a lakh of youth receive instruction in the Colleges. About 25 per cent of the total revenue of the State is spent on education.

THE COVENANT

With the inauguration of the new Constitution for India the State has the same kind of constitution as other States.

A provision in the old covenant and now a part of the constitution relates to the administration of Devaswom (Maintenance of Temples). It is an obligation on the part of the covenanting State of Travancore to contribute annually from its general revenue a sum of Rs. 50 lakhs towards the Devaswom Fund. Out of this fund Rs. 5 lakhs are to be contributed towards the expenditure of Sree Padmanabhaswami Temple at Trivandrum (the deity of the ruling dynasty in Travancore). The administration of the Devaswom is in the hands of a specially constituted board consisting of 3 Hindu members, one of whom is to be nominated by H.H. the Maharaja of Travancore, one by the Hindu Ministers of the Cabinet, and the third by the Hindu members of the Legislature. But the administration of the Padmanabhaswami Temple remains in the hands of the Maharaja of Travancore.

Similarly, the Cochin Dewaswom Board (also provided for in the covenant) administers the Devaswom and the Devaswom estates and property in Cochin.

As provided under the Constitution this State which is included among Part B States has a Legislative Assembly of 109 members of whom 108 are elected and one nominated to represent Anglo-Indian interests.

The Legislature has full powers to make laws for the State, within the framework of the Constitution of India. The Rajpramukh has the power to promulgate ordinances for the maintenance of peace and order. He and the Council of Ministers will in the exercise of these functions, comply with the directions that may be given from time to time by the Government of India.

The continuance in service of the permanent members of the public services in both the States are guaranteed on conditions that are not less advantageous to them. Similarly pensions, etc. sanctioned by competent authorities are also guaranteed by the covenant.

Unless sanction to that effect is previously obtained from the Rajpramukh, no proceedings, civil or criminal, can be instituted against any servant of the State in respect of any act done in the execution of his duty.

Though with the inauguration of the Indian Republic, the State is primarily governed by the new Constitution of India, the provisions of the covenant are still operative in so far as they are not repugnant to the provisions of the Constitution.

For the 1952-53 budget revenue receipts were estimated at Rs. 1,630 lakhs and the expenditure at Rs. 1,626 lakhs leaving a surplus of Rs. 4 lakhs. The allotment for education was Rs. 362·5 lakhs (25 per cent of the revenue) and the food subsidy was Rs. 200 lakhs. The capital budget provided for an expenditure of Rs. 504 lakhs mainly on the schemes under the Five-Year Plan.

COUNCIL OF MINISTERS

Chief Minister, A. J. John.

Minister for Home Affairs, T. M. Varghese.

Minister for Finance and Civil Supplies, Panampilly Govinda Menon.

Minister for Works and Transport, Kalathil Velayudhan Nair.

Minister for Medicine and Public Health, V. Madhavan.

Minister for Local Self-Government, K. Kochukuttan.

Minister for Revenue Administration, Forests, Chidambaranatha Nadar.

Chief Secretary to Government, V. N. Rajan, I.C.S.

LEGISLATIVE ASSEMBLY

(*For list of Members of the Assembly see under article General Elections.*)

Census of 1951

The population figures given below are based on the provisional totals received from the various Census Officers in the State. 9,264,943 persons have been enumerated at the Census of whom 4,615,406 are males and 4,649,537 are females. The respective figures for the 1941 Census were 7,492,893 (total), 3,741,991 (males) and 3,750,902 (females). The following results will help a comparative study of the two Censuses.

Percentage increase recorded	1941	1951
Males	18·61	23·34
Females	19·22	23·96
Total	18·92	23·65
Sex Ratio (No. of females per 1,000 males)	1,002	1,007
Density per square mile	818	1,012

The Tables that follow give the population figures for the four Districts classified under two categories—population in (*a*) cities and municipal towns and (*b*) the rest of the area.

Trivandrum District

PART C STATES

AJMER

AJMER enclosed by Rajasthan lies between North Latitude 25°36′ and 26°54′ and East Longitude 74° and 75°22′. It is bounded on the north by Jodhpur and Kishengarh, on the east by Kishengarh and Jaipur, on the south by Mewar and on the west by Jodhpur. The area of the State is 2,425 sq. miles and the population 692,506.

The estimated Expenditure and Receipts for 1952-53 were Rs. 1,67,18,000 and Rs. 1,73,56,000 respectively, leaving a surplus of Rs. 6,38,000. Rs. 2,25,000 were set apart for relief and rehabilitation. Other allotments were Rs. 18,00,000 for test works in scarcity areas, Rs. 71,500 for the distribution of improved seeds, Rs. 51,000 for better utilization of cattle waste, Rs. 2,22,500 for protection against pests, Rs. 3,19,000 for sinking wells, Rs. 51,700 for converting town waste into manure, Rs. 7,00,000 for Basic education, Rs. 1,25,000 for social education. Rs. 1,05,00,000 have come from Centre for balancing budget, Rs. 8,13,000 for agricultural schemes, Rs. 2,25,000 for displaced persons.

The distinguishing feature of the country is the Aravali range, the barrier which divides the plains of Marwar from the high tableland of Mewar. It is not one range but a series of parallel ranges. About ten miles from Ajmer the hills disappear but in the vicinity of Beawar they form a compact double range which finally meet at Kukra from which village a confused mass of hills and narrow valleys extend to the farthest extremity of the District. Ajmer Tahsil consists mostly of plain country while Beawar Tahsil is more hilly. The District may, generally be divided into seven main tracts separated by hills.

On the whole rainfall is very precarious and very large areas are under dry cultivation which is of the Catch Crop order. The main crops are maize, millet, barley, cotton, oilseeds, wheat, bajra, jeera, chillies and onions.

There are four cotton textile mills and nine hosiery factories including two well established ones and many ginning and pressing factories. Mills turn out coarse cloth. There is also some quarrying work in mica at some places in the district.

The main transport is by railway and road. The meter gauge line of the Western Railway passes through the district. Ajmer city forms a nucleus of roads which radiate from here in all directions.

Beawar and Kekri towns are big trading centres. The district is a deficit area in the matter of foodgrains and therefore there is not much export trade. The chief imports are wheat, rice, pulses, cotton and woollen piecegoods, kerosene oil, salt, utensils, spices, sugar and medicines.

With a view to intensifying the "Grow More Food Campaign" the following schemes have been launched to step up the production of food crops in the State :—

1. Scheme for sinking new wells and deepening the old ones.
2. Plant protection scheme including Phadka control measures.
3. Distribution of improved seeds.
4. Distribution of oilcakes and chemical fertilisers.
5. Composting town refuse into manure on Bangalore process.
6. Preparation of compost in villages.
7. Palmgur Development scheme.
8. Scheme for production of subsidiary food.

ADMINISTRATIVE PERSONNEL

Chief Commissioner, A. D. Pandit.
Chief Minister, Gen. Adm., Appointments, Agriculture, Animal Husbandry, Forests, Harijan Welfare, Medical, Public Information, Co-operation, Industries, Hari Bhau Upadhya.
Home, Finance, Planning, Development, Public Works, Excise, Registration, Stamps, Bal Krishna Kaul.
Law, Justice, Local Self-Govt., Transport, Relief, Rehabilitation, Civil Supplies, Revenue, Labour, Education, Brij Mohan Lal Sharma.
Chief Secretary, A. Sen, I.A.S.
Finance Secretary, P. C. Mukherji.
Judicial Secretary, N. Swaminathan.
Asstt. Secretary (Adm.), B. B. Shrivastava.
Asstt. Secretary (Legis.), B. N. Mathur.
Deputy Commissioner & District Magistrate, A. R. Siddiqi.
Assistant Commissioner & Additional District Magistrate, Durga Dutt Upadhyay.
Sub-Divisional Officer & Magistrate, 1st Class, Ajmer, A. P. Dewan.
Extra Assistant Commissioner, Beawar, P. D. Khanna.
Sub-Divisional Officer, Kekri, P. N. Seth.
City Magistrate, Ajmer, G. K. Bhagat.
Stipendiary Magistrate, 1st Class, Beawar, N. N. Bhatnagar.
Stipendiary Magistrate, 1st Class, Ajmer (1), H. G. Mehra.
Stipendiary Magistrate, 1st Class, Ajmer (2), Attarlal Jaisinghani.
Treasury Officer & Magistrate, 1st Class, M. R. Goyal.
Superintendent, Deputy Commissioner's Office, Shyam Behari Lal Bhargava.
Custodian of Evacuee Property, and Relief and Rehabilitation Commissioner, Dr. Tarachand.
Assistant Custodians, Madho Narain Mathur; M. G. Toshniwal.
Director, Animal Husbandry, Harjas Rai.
Gowshala Development Officer, R. N. Mukherjee.
Poultry Development Officer, S. P. Beri.
Agricultural Officer, M. C. Joshi.
Record and Rent Rate Officer, Hadi Hassan.
Extra Assistant Director, C. L. Nagar.
Agricultural Engineer, C. P. Quiterio.
Assistant Entomologist, G. N. Bhatia.
Director, Food and Civil Supplies, A. Rauf.
Dy. Directors of Food and Civil Supplies, Prem Dutt Vyas; J. P. Sharma.
Divisional Forest Officer, S. M. Sibtain.
Registrar, Co-operative Societies, B. L. Mathur.
Labour Officer, Onkar Nath Sharma.
Assistant National Savings Officer, S. Gurbachan-singh.
Admn. Durgah, A. R. Siddiqi.
D.I.G., Police, Sardar Singh, I.P.S.
S. P., Nag. K. Gupta, I.P.S.
Dy. S.Ps., Sardar Duleep Singh; Khaliluddin Ghori.
D.S.P., C.I.D., J. S. Narula.

LEGISLATIVE ASSEMBLY

(For list of members see under General Elections).

ANDAMAN AND NICOBAR ISLANDS

The Andamans are a group of islands of various sizes large and small lying in the Bay of Bengal about 780 and 740 miles from Calcutta and Madras respectively. The main part of the group is composed of five large islands, *viz.*, North Andamans, Middle Andamans, South Andamans, Baratang and Rutland Islands generally known as the Great Andamans. Included in the Great Andaman group are also 204 islets, the two principal groups being the Ritchie Archipelago and the Labyrinth Islands. To the south of the Great Andamans is the island of Little Andaman. The extreme length of the Great Andaman Islands is 219 miles and the extreme breadth 32 miles, the total land area being approximately 2,508 sq. miles. These Islands have several very good harbours—Port Blair, Port Cornwallis, Mayabander and Elphinstone Harbour. The headquarters are at Port Blair.

The Nicobar Islands, are situated to the south of Andamans 75 miles from Little Andaman. There are 19 islands, 7 of which are uninhabited. The total area is about 635 sq. miles. The islands are usually divided into three groups (Southern, Central and Northern) the chief island in each being Great Nicobar, Camotra with Nancowrie and Car Nicobar. There is a fine land locked harbour at Nancowrie between the islands of Camotra and Nancowrie.

POPULATION

The total area of Andaman and Nicobar Islands is 3,143 sq. miles and the total population according to 1951 census excluding the aborigines is 30,963.

Some of the islands are not populated at all, some only sparsely while Car Nicobar is densely populated. The total population of the islands of the Andaman Group excluding the aborigines was 18,939 (1941).

The population of the Nicobar group was 12,009. The original inhabitants of the islands are of a small Negrito type who live in the forests by hunting and fishing. They have no fixed habitation, and do no cultivation; their civilization is about that of the Stone Age. Their numbers are not known as they prefer to avoid all contact with civilization.

The climate can be said to be temperate as the heat during the dry months is bearable because of the cool breeze from the sea. The temperature generally varies from 65° to 95°. The average rainfall is about 130 inches, and rain falls from six to eight months in the year. The islands have no such season as winter. The one great disadvantage is the humidity which varies from 79 per cent to 87 per cent and has an enervating effect.

HISTORY

Very little is known about these islands earlier than the year 1789 when the first attempt to colonise these islands was made by Captain Archibald Blair, R.N. and a colony was established at Port Blair. This colony was later moved to what is now known as Port Cornwallis in North Andamans and after a chequered career covering only 7 years the colony was closed in 1796 due mostly to sickness and trouble from the native inhabitants. The present colony was actually opened in the year 1858 for the accommodation of a large number of prisoners following the uprising in India used to be called the "Great Mutiny."

From 1858 to 1942 the islands were used by the Government of India as a penal settlement for convicts serving life sentences and long terms.

The islands were occupied by the Japanese in March 1942 and re-occupied by the Government of India in October 1945. The Japanese built a small jetty at Malacca and roads in Car Nicobar which they developed as a supply base.

With the re-occupation of these islands the penal settlement was abolished.

AGRICULTURE, INDUSTRY

In the year 1950-51, 25,831 tons of timber and timber products and 49,107 bags match splints were shipped to India, and the revenue from the sale of these amounted to approximately Rs. 50,19,000 and Rs. 6,92,000 respectively. Coconut and rubber are other sources of income.

The Islands are slowly being made self-sufficient in paddy and rice, and now grow approximately half their annual requirements. No proper survey of the mineral resources of these Islands has yet been undertaken.

Coconuts are next to timber the most important among the produce of the islands and a major item in the diet of the inhabitants. In the Andamans coconuts are mostly confined to the South Andamans. Exports which go to Calcutta and Madras generally are in the form of nuts and copra.

There is plenty of scope for fruit growing. Such fruit as Papaya, Pineapple, Citrus, Bananas, Mangoes, etc. can be easily grown. The question of starting a canning industry has at times been discussed.

The Andaman Islands contain some of the biggest forest estates in the world and therefore as already mentioned the main industry of these Islands is the production of timber. The forests contain many valuable species whose commercial possibilities have yet to be thoroughly investigated. The better known species are Padauk, Andaman red wood and Gurjan. Gurjan is in great demand for the manufacture of plywood. Large quantities of soft wood are supplied to match factories.

ADMINISTRATION

There is a High School at the Headquarters and several primary classes at outlying villages.

There is a well-equipped hospital at the Headquarters with a separate branch for women and children. There are smaller hospitals and dispensaries at the outlying places. The incidence of malaria is moderate in areas under control and in other areas the disease is kept in check with regular administration of paludrine. Plague, cholera and small-pox are unknown.

The Andaman Islands are administered by the President acting through a Chief Commissioner and an Advisory Council of 5 Members. The seat of administration is at Port Blair, which is connected with Calcutta and Madras by a mail steamer which calls approximately once every 3 or 4 weeks at Port Blair. The islands are connected to India by wireless telegraphy. An Assistant Commissioner is stationed at Car Nicobar.

Chief Commissioner, A. K. Ghosh, I.C.S.

BHOPAL

Bhopal has an area of 6,921 sq. miles, a population of 838,107 and an annual revenue of a little less than a crore of rupees. It was formally proclaimed a Chief Commissioner's Province of the Indian Union on June 1, 1949, when Mr. N. B. Bonerjee, the first Chief Commissioner, announced the taking over on behalf of the Government of India. Since the general elections it has had a responsible ministry.

Bhopal is in central India. It is bounded on the north and west by Madhya Bharat; on the south by the Narbada river; and on the east by the Sagar District of Madhya Pradesh. Most of the State is situated on the Malwa plateau to the north of the Vindhyas. The climate of the region is generally speaking, temperate, and the average rainfall varies between 30 inches and 50 inches.

The State contains many remains of great archæological interest, including the famous Sanchi Topes, which date from the second century B.C., and which were later restored under the direction of Sir John Marshall. Adjoining the topes is the Sanchi station on the Central Railway main line from Bombay to Delhi.

More than two-thirds of the State is arable and the soil is generally very fertile. The principal agricultural product is wheat and the main cash crops are tobacco and sugarcane. The forests are very extensive and valuable. The land system in force is ryotwari by which the cultivator holds the land direct from the Government. There is absolute permanency of tenure so long as the assessment is regularly paid.

The Grow More Food campaign has during the couple of years ending 1951-52 been intensified with the introduction of the Tractorization Scheme by the Government of India. 1,20,000 acres of land having already been tractorised, the State expects to reclaim over five lakhs acres of land by the year 1956-57. The State's efforts at mechanical cultivation have begun to bear fruit in that the agricultural production during the last crop year touched the figures of 30 lakhs maunds as against 23 lakhs and less during the preceding years. A Tractor Operators' Training School was opened at Bairagarh by Mr. K. M. Munshi in November 1950 and the State looks forward to developing it into a first class mechanical agricultural training centre in the country.

Industrially, too, the State is not badly off. Among the more important manufacturing concerns in the State are: The New Bhopal Textile Mills, the Strawboard Factory, the Sehore Sugar Factory, the Nerbudda Refrigerated Products Co., the Central India Chemicals Ltd., the Hamidia Match Factory, an oil mill and several ginning and pressing factories. Bhopal is also rich in deposits such as iron, bauxite, mica and other valuable minerals. In general it is believed that the State is potentially very rich.

Bhopal is on the Central Railway main line between Bombay and Delhi. The chief means of communication within the State itself are the roads, of which a great many are new.

Since integration the State has made vast strides in education. All manner of educational institutions have almost been doubled with simultaneous increase in the number of the teachers and the taught effected. Liberal grants in respect of scholarships, specially to Harijan and Backward Classes, have been provided.

Facilities in respect of public health are also provided. There are travelling dispensaries in the countryside and a new hospital staffed and equipped on modern lines in the city.

Most of the laws and ordinances passed by the Central Legislature have now been enforced in the State. Services have been reorganised and new scales of pay introduced. The service personnel are wholly governed by the Central Government rules and regulations.

All the principal Acts and Ordinances of the Central Government are made applicable to the State along with such Acts framed by the State Governments as have been found to serve the interests of the State people. The State presently stands in the full-tide of responsible Government. The Congress has swept the polls during the recent general elections and gained a majority of 25 seats as against five of the opposition in a House of 30.

The 1952-53 budget estimates were receipts Rs. 2,19,04,000 and expenditure Rs. 2,13,04,000, thus leaving a surplus of Rs. 6 lakhs. The receipts include a grant-in-aid from the Central Government of Rs. 10,500,000. No new taxes were proposed. Under capital expenditure was included a provision of Rs. 5 lakhs for an electric plant and Rs. 2 lakhs for hospitals and dispensaries. For the Five Year Plan the State had to spend Rs. 3,73,00,000. The Central Government was allotting Rs. 3½ crores for tractorization of land.

Chief Commissioner, Bhagwan Sahay, I.C.S.
Chief Minister, Dr. Shankar Dayal Sharma.
Other Ministers, Kamta Prasad; Maulana Tarzi Mashriqui.

COORG

A State in South India bounded along its entire western frontier by the mountain chain of the Western Ghats which separates it from the Madras Districts of Malabar and South Kanara. The Western Ghats curve somewhat inland and thus also serve to some extent as the nothern and southern boundaries. In the north Coorg is partially separated from the forest highlands of Mysore State by the rivers of Kumaradhara and Hemavathi, and on the east the State merges into the general tableland of Mysore State, the boundaries being marked by the river Cavery which is known as the Ganges of South India and a famous place of pilgrimage. Coorg is a hilly country with a rainfall of on an average from 80 to 120 inches with evergreen, deciduous and semi-deciduous forests.

Coorg was annexed to the British Government in 1834 and since then it has remained as a separate entity, governed by the Government of India, through a Chief Commissioner. It was given a Legislative Council in 1924 consisting of 20 members (15 elected members and 5 nominated members of whom 4 were officials and one non-official to represent the communities known as Holeyas, Kurubas, Madigas and Yeravas) with the Chief Commissioner as its President. The number of elected seats was reduced to 13 in 1949 as a result of the abolition of two seats set apart for Europeans, thus bringing the total number of seats to 18.

Coorg continues to be a separate State under the new Constitution of India and is termed as a Part 'C' State. Under the Government of Part 'C' States Act, 1951 (Central Act XLIX of 1951), Coorg has been given a Legislative Assembly consisting of 24 members made up of 18 general seats, 3 seats for Scheduled Castes and 3 seats for Scheduled Tribes, with power to elect its own Speaker and Deputy Speaker. Under the same Act Coorg has also been allowed the privilege of being administered by a popular Council of Ministers with the Chief Minister at the head to aid and advise the Chief Commissioner. Coorg has also been allotted one seat in the House of the People of the Parliament of India and one combined seat in the Council of States combined with Ajmer.

The Assembly formed after the general elections consists of 15 Congressmen and 9 Independents belonging to the anti-merger front.

The State forms a single district covering an area of 1,593 square miles and has a population according to the 1951 census of 229,255. The population is made up of Coorgs, Gowdugals, Lingayats, Brahmins, Muslims, Christians and (Harijans) Scheduled Castes and Scheduled Tribes.

Budget estimate of revenue for 1952-53 was Rs. 90,11,000, expenditure for 1952-53 Rs. 89,83,000.

Paddy, coffee, orange, pepper and cardamom are the chief agricultural produce. There is no large scale industry. Transport consists mainly of buses, lorries and bullock carts. The chief items of trade are coffee, orange, pepper, cardamom and rice.

A college was opened in June 1949.

ADMINISTRATIVE PERSONNEL

Chief Commissioner, Lt.-Col. Kanwar Daya Singh Bedi, I.P.S.
Chief Minister, C. M. Poonacha.
Minister, K. Mallappa.
Secretary to the Chief Commissioner, K. B. Ponnappa, L.Ag.
Assistant Commissioner and District Magistrate, I. C. Subbayya, M.A., B.L.
District Superintendent of Police, M. P. Muthanna, B.A., B.L.
District and Sessions Judge, N. Muddappa, B.A., B.L.
Chief Forest Officer, N. Thirumurti, M.A., I.F.S.
Civil Surgeon, T. B. Medappa, M.B.B.S.
Agricultural Officer, B. S. Varadarajan, B.Ag.
Registrar of Co-operative Societies, P. M. Chengappa, Dip. Econ. C.H.D. (Manch.), F.R.E.S. (London).
Malaria and Health Officer, C. B. Cariappa, M.B.B.S.
Principal, Government College, K. P. Achutan Pillai, M.A.
District Educational Officer, J. Ganesh Rao, B.A., L.T.
Executive Engineer, K. Vudayachalam, B.E.
Treasury Officer, M. Srinivasa Rao.

Subordinate Judges, 1st Class, Jawala Das; Madan Mohan Singh; Sarjit Singh Raikhy; Chandra Gupt Suri; Harcharan Das Loomba; Banwari Lal; Rajinder Singh; Om Nath Vohra; A. N. Bhanot; Behal Singh; Prem Nath Thakarul.

LEGISLATIVE ASSEMBLY

(For list of Members of Assembly see under article General Elections.)

HIMACHAL PRADESH

The new State of Himachal Pradesh comprises 21 former Punjab Hill States and their 9 tributaries. The 21 States are Baghal, Baghat, Balsan, Bushahr, Bhajji, Bija, Chamba, Darkoti, Dhami, Jubbal, Keonthal, Kumarsain, Kunihar, Kuthar, Mahlog, Mandi, Mangal, Sangri, Sirmur, Suket and Tharoch.

The 9 tributaries are Delath, Dhadi, Ghund, Khaneti, Koti, Madhan, Ratesh, Rawingarh and Theog.

The State came into being on April 15, 1948; the consolidation has been achieved with the full agreement and support of the Rulers and the people.

Himachal Pradesh lies between North Latitude 30° 30′ and 33° 10′ and East Longitude 75° 55′ and 79° 50′. It is bounded on the north by the Jammu and Kashmir State, on the south by Tehri-Garhwal and Dehra Dun Districts of Uttar Pradesh and the Ambala District of Punjab; on the west by Ambala, Hoshiarpur and Kangra. On the east the boundaries are undefined.

The area of the State is 10,600 miles, the population 989,437.

The State is divided into four administrative districts, Mahasu, Sirmur, Mandi and Chamba.

Mahasu District has a population of about 306,800 and is divided into two sub-divisions, Rampur and Jubbal. The Rampur sub-division contains the Tehsils of Rampur, Rohru, Chini, and the Jubbal sub-division contains the Tehsils of Jubbal, Chaupal, Theog, Jinga, Arki and Solan and the sub-Tehsils of Kumarsain, Kasumpti Sunni and Kotkhai.

Sirmur District has a population of about 156,100 and is divided into four Tehsils, Nahan, Pachhad, Rainka and Paonta.

Mandi District has a population of about 303,700 and contains the Tehsils of Sadar (Mandi), Karsog, Sundernagar, Jogindernagar, Sarkaghat, Chachiot and the sub-Tehsil of Dehar. The Tehsils of Sundernagar and Karsog and the sub-Tehsil of Dehar form the Suket sub-division of the District.

Chamba District has a population of about 169,000 and is divided into the Tehsils of Chamba, Chura and Bhattiyat.

ECONOMY

The main agricultural wealth of the State consists in potatoes and fruits such as apple, peach, almond, nuts, pomegranate. Salt is another important item; while forests yield timber, fire-wood and charcoal. Handicrafts which include Pashmina shawls, wool of fine quality, resin, herbs, musk and skins are a third source of income.

Himachal Pradesh forests supply the largest quantities of coniferous timber in Northern India. They are the main source of revenue in the State, the estimated annual revenue being Rs. 55,00,000. The forests are also useful in ensuring the safety of the catchment areas of the Jumna, Sutlej, Beas, Ravi and Chenab Rivers. On the protection of these catchment areas depends the steady and equable flow of water in these rivers, and the success of irrigation and engineering works in the plains. For purposes of forests utilization the State has been divided into twelve territorial forest divisions, *viz.*, Chamba, Churaha, Mandi, Nauchan, Suket, Jubbal, Simla, Solan, Nahan, Rajgarh, Upper and Lower Bushahr.

Potato is the chief cash crop. The State has established itself as a vital source of potatoes, especially seed potatoes, for the plains of India. It exports nearly 5½ lakh maunds of potatoes annually out of which over 3½ lakh maunds are directly utilised as seed potatoes.

For 1952-53 budget receipts were 236.39 lakhs (inclusive of Rs. 90 lakhs of Central subvention) and expenditure Rs. 223.57 lakhs, thus leaving a surplus of Rs. 12.82 lakhs. Allotments were as follows: education and medical Rs. 9.26 lakhs; agriculture Rs. 10.14 lakhs; veterinary Rs. 5.23 lakhs; co-operation Rs. 6.02 lakhs. A sanatorium for T.B. would be opened near Solan, also 4 venereal diseases clinics, one leprosy clinic, two mobile dispensaries. For community projects Rs. 100 lakhs was expected to come from the American Point Four Programme.

For Grow More Food the Centre would give Rs. 388 lakhs.

GOVERNMENT

When the State was first formed it was administered from the Centre. It had an Advisory Council of 9 members constituted to advise the Chief Commissioner in the discharge of his functions. Of these 9 members, 3 were the representatives of the Rulers of the former States which have been integrated in the Himachal Pradesh and 6 were popular representatives.

After the general election the Advisory Council was abolished and a responsible ministry was set up to advise the Lieutenant-Governor.

In a legislature of 36 members the Congress has 24 seats, K.M.P. 3, Scheduled Castes Federation 1, Independents 8.

ADMINISTRATION

Lieutenant-Governor, Maj.-Gen. Himmat Sinhji.
Chief Minister, Gen. Adm., Finance, Revenue, Excise, Forest, Agriculture, Law, Information, Dr. Yaswant Singh Parmar.
Police, Planning, Development, Education, Co-operatives, Panchayats, Industries, Civil Supplies, Pandit Padmadev.
P.W.D., Medical, Public Health, Local Self-Govt., Transport, Gouri Prasad.
Judicial Commissioner, R. K. Choudhry.
Chief Secretary, K. L. Mehta.
Chief Conservator of Forests, N. P. Mohan.
Director of Health Services, Gwash Lal.
Dy. Director, Education, S. N. Sehgal.
Chief Engineer, G. R. Nangia.
Chief Electoral Officer, Indar Sen.
Asstt. Director of Health Services, Dr. (Mrs.) A. C. Parmar.
Deputy Commissioner, Mahasu, Shiv Pal.
Deputy Commissioner, Mandi, R. G. Abbhi.
Deputy Commissioner, Sirmur, Kehar Singh.
Deputy Commissioner, Chamba, Raghubir Singh.
Registrar of Co-operative Societies, Director, Industries, Director Civil Supplies, Ram Lal.
Registrar, Judicial Commissioner's Court, Ramji Das.
Dt. and Sessions Judge, Mahasu, Sirmoor, H. L. Soni.

KUTCH

Kutch was integrated with the Indian Republic as a Chief Commissioner's State on June 1, 1948.

The State has a land area of 17,000 sq. miles including the two Ranns (which have a surface area of 9,000 sq. miles). The population is 567,804 (1951 census).

The State is bounded on the north and the north-west by Pakistan; on the east by North Gujarat; on the south by Saurashtra; and on the west and south-west by the Indian Ocean.

The capital of the State is Bhuj, founded in 1549.

There is a fair proportion of good cultivable land in Kutch, the principal crops being bajra, wheat, barley and cotton. Irrigation is also well developed with 46 reservoirs. Work on 10 new tanks has started during the year.

The belief that the Kutch desert encroaches upon cultivable land in the neighbouring Gujarat districts was borne out by a recent investigation by the Government of Bombay. The extent of the encroachment varies from a few feet to anything upto a hundred every year on a front of a hundred miles. The Kutch desert is not a desert in the ordinary sense. It is dry only on the surface, it is wet underneath even in the summer as three Gujarat rivers Banas, Rupen, Saraswati lose themselves in the Kutch desert. The remedy suggested is afforestation of the border area.

The State is rich in gypsum, clays and limestone, and has fairly large deposits of lignite.

The main occupation of the people apart from agriculture and mining are embroidery and silver work, which are well-known for their beauty.

The State has fine cows of the Thari breeds which are used for a dual purpose, *i.e.* for milking and agriculture.

The currency of the State which in the past was reckoned in Kories was demonetised on April 26, 1949 when Indian currency was introduced.

New weights and measures under the Bombay Weights and Measures Act, 1932 were introduced in October 1950.

Efforts are being made for the expansion of education in the State. There are about 650 schools with about 30,500 students on the rolls. Primary and secondary education is free. The State has a programme for opening eight new schools every year. It is proposed to open an Arts College, a Technical School and a Bal Mandir during the next year.

Free medical relief is available in Kutch. There are six Government hospitals, fourteen Government dispensaries and one mobile dispensary. Two dispensaries, four maternity homes, three mobile dispensaries are planned. It is proposed to have a general surgical hospital, a mental hospital, one more eye hospital, two more village dispensaries and two more mobile dispensaries in the course of the next year. Steps are taken to check the epidemic of malaria. A B.C.G. vaccination campaign was also conducted early in 1952. It is proposed to develop the activities of the Public Health Department from 1953.

The chief means of communication is by sea. Goods are carried by country craft, the chief import and export centres being Mandvi, Tuna and Kandla. The State has a modern port at Kandla with a natural harbour, which the Government of India are developing into a major port. Construction of Kandla-Deesa Railway line is likely to be completed in August 1952.

There were 296 miles of pucca roads in Kutch to which 51 miles were added during 1951 making a total of 397 miles.

Estimated revenue for 1952-53 is Rs. 50·5 lakhs and expenditure Rs. 96·4 lakhs.

The Planning Commission have approved of a five-year development plan for Kutch at a cost of Rs. 2.73 crores.

ADVISORY COUNCIL

The administration is carried on by a Chief Commissioner. Steps are being taken to bring the administration of the State into line with that of other States. Most of the departments have already been reorganised.

The electoral college formed after the general election has a strength of 30. Out of this 28 members belong to the Congress, one to the Girasdar Sangh, and one is an Independent.

President, Chief Commissioner.
Vice-President, G. A. Dholakia.
Members, B. A. Khimji; Premji Bhavanji; K. C. Antani; Ranchod Natha; K. Panjwani.

ADMINISTRATIVE PERSONNEL

Chief Commissioner, S. A. Ghatge.
Judicial Commissioner, N. C. Vakil.
Collector and Dt. Magistrate, T. M. Seth.
Dt. and Sessions Judge, M. D. Manek.
Addl. Dt. and Sessions Judge, K. H. Desai.
Settlement Officer, B. M. Buch.
Irrigation Engineer, H. M. Antani.
State Engineer, P. K. Vora.
Dt. Supdt. of Police, B. D. Buch.
Chief Medical Officer, Dr. K. T. Taskar.
Education Officer, J. J. Nanavati.
Agricultural Officer, Dr. S. S. Varma.
Secretaries to the Chief Commissioner, K. V. Bhatt; B. G. Khabade.
Asstt. Secretary to Chief Commissioner, Secy. to Advisory Council, H. C. Jethi.

MANIPUR

Manipur bounded on the east and south by Burma and on the north and west by the Naga Hills and Cachar Districts of Assam, is a highly strategic State on the eastern frontier of India. Two land routes from Burma pass through its territory. It was formally proclaimed a Chief Commissioner's Province of the Indian Union on the 15th of October, 1949, when Major-General Rawal Amar Singh, last Dewan of the State, took over charge as the Acting Chief Commissioner. He was succeeded on the 19th November, 1949 by Himmat Singh K. Maheshwari who in his turn was succeeded by E. P. Moon, on the 7th April, 1951.

In the Electoral College formed after the General Elections there are 10 Congress members, All Manipur National Union 3, Praja Shanti Party 3, Kuki National Union 3, Achumba Pamba Congress 2, Communists 2, Mao Maram Union 2, Socialist Party one, Gandhi Sevak Sabha one, Manipur Zeliangrong Union one, Mizo Union one, Independents one. The total strength of the College is 30.

It was reported later that the strength of the Congress party had increased to 13.

The State has a population of 5,79,058 (1951 census) and an area of 8,620 square miles. The density of the population is 67. Seven hundred square miles of the area form a central valley, 2,600 feet above sea-level, which is shut in on all sides by extensive hill tracts covering the rest of the State with hill stations as high as 6,000 feet above sea-level. The climate varies from temperate in the valley to cold in the high stations in the hills. The rainfall on the average is 65 inches in the year.

The main population is "Meitels" inhabiting the valley with some 40 tribes and sub-tribes known by the generic names of Nagas and Kukis. Though a number of different dialects are spoken in the State, Manipuri and English are the official languages. The people are carefree and healthy, with a passion for religious festivals involving community dances in which both sexes join.

There are about 1,200 refugees.

Out of a total population of 579,058, the number of males is 284,747, and of females 294,311. The total population of Imphal Town is 133,606.

DELHI

Under the Constitution of India, Delhi is a Part 'C' State, responsibility for the administration of which, vests with the President. The President exercises control over the State through a Chief Commissioner appointed by him.

However, in accordance with the provisions of the Government of Part 'C' States Act, 1951, the State has a Legislative Assembly consisting of 48 members representing 36 single member constituencies and 6 double member constituencies. The Legislative Assembly has power to make laws in respect of the whole of the State or any part thereof with regard to all or any matter enumerated in the State List or Concurrent List in the VII Schedule to the Constitution, other than the following matters :—

(*a*) Public Order; (*b*) Police including railway police; (*c*) the Constitution and powers of municipal corporations and other local authorities, of improvement trusts and of water supply, drainage, electricity, transport and other public utility authorities in Delhi or New Delhi; (*d*) lands and buildings vested in or in the possession of the Union which are situated in Delhi or New Delhi including all rights on or over such lands and buildings, the collection of rents therefrom and the transfer and alienation thereof; (*e*) offences against laws with respect to any of the matters mentioned in the foregoing clauses; (*f*) jurisdiction and powers of all courts, with respect to any of the said matters; and (*g*) fees in respect of any of the said matters other than fees taken in any court.

Provided further that nothing shall derogate from the powers conferred on Parliament by the Constitution to make laws with respect to any matter for the State or any part thereof.

There is a Council of Ministers with the Chief Minister at the head to aid and advise the Chief Commissioner in the exercise of his functions in relation to matters with respect to which the Legislative Assembly has power to make law except in so far as he is required by any law to exercise any judicial or quasi-judicial functions.

The responsibility for the discharge of other functions of Government with respect to which the Legislative Assembly has no powers to make laws, vests in the Chief Commissioner, acting through the permanent Civil Services.

The Government of India formulated detailed rules which would govern its relations with the Chief Commissioner. According to present arrangement the Chief Commissioner is authorized to allot portfolios to Ministers. All orders will be issued in the name of the Chief Commissioner, and he or the Chief Secretary alone is competent to conduct official correspondence with the Government of India on behalf of the State Government. No official bill can be introduced in the Assembly without the prior consent of the Chief Commissioner. Even in respect of transferred subjects all important cases are liable to be scrutinized and sanctioned by the Chief Commissioner. He is competent to preside over the meetings of the Cabinet.

The State has one seat in the Council of States, and four seats in the House of the People. Of the latter, one seat is reserved for the Scheduled Castes.

In the Assembly of 48 members the Congress has 39 seats, Jan Sangh 4, Independents 2, Socialist 2, Hindu Mahasabha 1.

Delhi State is really the size of a district. The majority of its population lives in the urban areas of Delhi with its suburbs, New Delhi and Shahdara. The State is divided into a number of Municipal units (see below). The integration of the urban units into a Corporation was the subject of an enquiry in 1947. A Corporation Act is due to come before Parliament according to which all the existing local bodies except those of New Delhi are to be merged into a Corporation.

Estimated revenue for 1952-53 Rs. 351.2 lakhs and expenditure Rs. 350.2 lakhs.

The Government of India have made the following allotments among others for 1952-53 : Rs. 35,10,100 in all for construction of new buildings, extension of old buildings, and expansion of educational, medical and public health services. Construction of Basic school buildings Rs. 2,50,000; Rs. 66,000 for opening more refugee schools; Rs. 1,81,600 for X-ray laboratory at the silver Jubilee T.B. Hospital; Rs. 76,400 for expansion of Infectious Diseases Hospital; Rs. 1,30,000 for construction of health centres; Rs. 9,95,200 for quarters for police; Rs. 1,51,500 for implementation of State Employees Insurance Scheme; grant to Delhi University Rs. 15,00,000; Rs. 12,42,000 to Colleges in Delhi (inclusive of a grant of Rs. 3,00,000 to Jamia Milia Islamia for building more schools).

Greater Delhi

The Greater Delhi area comprises the following administrative units :—(1) New Delhi Municipal Committee, (2) Delhi Municipal Committee, (3) Civil Lines Notified Area, (4) Red Fort Notified Area, (5) Delhi Cantonment, (6) West Delhi Notified Area besides three other Notified Areas 7) District Board and (8) Shahdara Municipal Committee. These eleven units are responsible to the Chief Commissioner who is the head of the Delhi State.

The area is the same as before 574 miles. But the population has gone up to 1,743,992 according to the 1951 census.

New Delhi is an inflated officers' colony. The density of the population which is thin consists largely of Government officials. The density is only 45 persons per acre, as against 500 or more in Old Delhi. Apart from the lack of transport facilities, there are not enough post offices, schools or colleges, hospitals, libraries or recreation grounds. This is in striking contrast to Old Delhi which is amply provided with urban amenities though in a haphazard manner.

With the attainment of independence, there has been a phenomenal growth in the number of Government Departments under various Ministries, whose number has also increased as compared with the Government Departments under British rule. The strength of Parliament also exceeds that of any of the Central Legislatures during the pre-Independence days. With the greatly expanded Government activities and the stoppage of the exodus to Simla, provision for housing additional Government officials and ministerial staffs, as well as members of Parliament, had to be urgently taken in hand. Quite a number of new buildings have been commandeered by Government and allotted to officials, but these touch only the fringe of the problem. Urbanisation of several main thoroughfares has been under active consideration in conformity with the report of the New Delhi Development Committee. Urbanisation of Parliament Street and Minto Road is for instance considered quite urgent.

As for the staffs in the lower grade, the position is more acute. The following is a list of Government housing schemes in and around the Capital for the official classes :—Clerks' quarters, Vinay Nagar; Clerks' quarters, Timarpur; Peons' quarters, Sewa Nagar; Officers' flats, Man Nagar; Officers' flats, Cornwallis Road; Multi-storey flats near Purana Quila, Jorbaugh Nursery and Esaf Saral.

After the attainment of Independence in August 1947, various countries began to establish embassies in New Delhi, while the smaller nations either, enlarged their consular establishments to quasi-embassy level, or delegated extra powers to their representatives to act as envoys extraordinary or minister plenipotentiaries. In order to remove the congestion in various parts of New Delhi, the Government of India have thought it expedient to create neighbouring units and precincts to absorb the growing population. Among these units, one is to be entirely devoted to housing the foreign diplomatic missions and consular establishments—called the Diplomatic Enclave—and the locality chosen tentatively is an area covering about 385 acres in the south-west of New Delhi.

At present, the bigger Embassies and High Commissions, like those of U.K., U.S.A., France and Australia, occupy large bungalows and hutments, while a few others are housed in leading hotels. The tentative plan also provides for the organisation of an up-to-date shopping centre, besides modern roads and transport arrangements.

After partition Delhi became the focal point on which the refugees from Pakistan, especially from the N.-W.F.P., and the Punjab converged. This huge influx gave rise to stupendous problems of housing.

In order to accommodate this inflated population, the municipal authorities, with the help of the Central Government, embarked on the construction of numerous residential colonies in the immediate neighbourhood of Old and New Delhi. Most of these have their own shops, schools, hospitals and police stations. The following is a list of refugee housing schemes which have either been completed or are nearing completion :—

(1) Rajendar Nagar (N.D.N.E. Area); (2) Patel Nagar (Shadipur Extension); (3) Malkaganj; (4) Nizamuddin Village; (5) Nizamuddin Extension; (6) Jungpura Village Extension; (7) Kalkaji; (8) Kingsway (Camp Mud houses, Hudson Lines, Outram Lines, Reids Barracks); (9) Band-stand Area; (10) Lajpat Nagar; (11) Sheikh Sarai and (12) Azadpur.

The main railway station is the junction at Old Delhi, from where radiate the railway lines to the Punjab, U.P., Bombay, Calcutta and Madras. The headquarters of the Northern Railway are located here.

The main industries are: cotton mills (four); hand and powerloom weaving; hosiery; pottery; flour mills; vegetable oil mills and expellers; paints and varnishes; rubber goods; imitation jewellery; copper and brass utensils; wire netting; sola hats; leather goods, and tanning industry.

A note on the scale of rehabilitation work may be added here. By December 1950, 15,300 houses were constructed at a cost of Rs. 414·27 lakhs; 2,300 shops at a cost of Rs. 76·11 lakhs; and 1,700 acres of land was developed at a cost of Rs. 260·8 lakhs.

HISTORY

The transfer of the capital of India from Calcutta to Delhi took place at the Delhi Durbar on December 12, 1911. It had long been recognised as necessary, in the interests of the whole of India, to de-provincialise the Government of India, but this ideal was unattainable as long as the Government of India were located in one Province, and in the capital of that Province—the seat of the pre-partition Bengal Government—for several months in every year. It was also desirable to free the Bengal Government from the close proximity of the Government of India which had been to the constant disadvantage of that Province. To achieve these two objects the removal of the capital from Calcutta was essential. The man who first advocated this change was Sir Henry Maine.

Various places had been discussed as possible capitals, but Delhi was by common consent the best of them all. Its central position and situation as a railway junction, added to its historical associations, told in its favour.

The foundation stone of the new capital was laid by King George V on December 15, 1911, the finally selected site being on the eastern slopes of the hills to the south of Delhi on the fringe of the tract occupied by the Delhi of the past. The land chosen is free from liability to flood, has a natural drainage, and is not man worn. It is not cumbered with monuments and tombs needing reverent treatment, and the site is near the existing town of Old Delhi.

Plan and Architecture

A Town-Planning Committee, appointed to advise Government, submitted its report in March, 1913, with a plan of the lay-out and work was begun in accordance with that Report. The central point of interest in the lay-out, which gives the motif of the whole, is Government House (now Rashtrapati Bhuvan) and two large blocks of Secretariats. This Government centre was given a position at Raisina Hill near the centre of the new city. Sir Edwin Lutyens was the architect for the Bhuvan and Sir Herbert Baker for the Secretariats. The former building was estimated to cost approximately Rs. 140 lakhs and the latter groups were originally estimated at some Rs. 124 lakhs.

In October, 1912, by proclamation, there was constituted an administrative enclave of Delhi under a Chief Commissioner. This enclave was entirely taken from the Delhi district of the Punjab and its total area was 574 square miles.

The plans of the New Capital allowed for a population within it of 70,000. Sites were allotted for forty Ruling Princes and Chiefs to build houses for their own occupation during their visits to the capital and several of these habitations were erected.

There was, as regards architecture, a prolonged "battle of the styles". Finally, to use the language of the architect, they decided "to express within the limit of the medium and of the powers of its users, the ideal and the fact of British rule in India, of which New Delhi must ever be the monument." The inspiration of the designs is manifestly Western, as is that of British rule, but they combine with it distinctive Indian features without abandoning the architect's aim to avoid doing violence to the principles of structural fitness and artistic unity.

Cost of Scheme

It was at first tentatively estimated that the cost of the new capital would be four million sterling and that sum was given in the original despatch of the Government of India on the subject. Various factors afterwards increased the amount, the chief of these being the immense rise in prices after the First World War, and the Legislative Assembly was informed by Government that the revised estimates then amounted to 1,307 lakhs of rupees. This amount included allowances for building new Legislative Chambers and Hostels for Members of the Indian Legislature, which were not allowed for in the earlier estimates.

The New Capital Enquiry Committee, in its report estimated the total expenditure at Rs. 1,292 lakhs including Rs. 42 lakhs for loss by exchange.

The Project Estimate contained certain items such as land, residences, water-supply, electric light and power, and irrigation on which recoveries in the form of rate or taxes would in addition to meeting current expenditure, partially at any rate cover the interest on the capital outlay, whilst there were other items on which some return on account of the sale of leases, general taxes and indirect receipts was secured.

The project, after being completed and closed, was reopened in 1933-34. This became necessary owing to the need to increase residential accommodation for officers and staff and was facilitated by a period of cheap money. Government utilised the occasion for extending the residential accommodation for visiting members of the Indian Legislature. The expenditure on the construction of New Delhi was Rs. 21,91,15,501 upto the end of 1945-46.

So far as the occupation of New Delhi was concerned, the Secretariats were transferred from Calcutta in October 1924, the offices of the Accountant-General, Central Revenues, and the headquarters of the Royal Air Force in India in the winters of 1924-25 and 1925-26. The original programme of residential buildings for Government officers and staff of various grades were then nearly completed. The whole of the civil side of Government moved from Old Delhi into their quarters in the new Secretariats on coming down from Simla in 1926. The Viceroy took up his residence in the new Government House on December 23, 1929. The Viceroy until then had resided during the Delhi season at Viceregal Lodge in Old Delhi. The Government of India in 1927 devoted special consideration to the question whether their ordinary annual 5 months' residence in Delhi should be extended each year to 7 months; and early in 1928 decided in consultation with the India Office to endeavour to stay in Delhi for half of each year, the new order being introduced for trial in 1928 by keeping the Secretariat in New Delhi till mid-April and bringing it down from Simla again in mid-October. The experiment was not very successful and was not repeated till 1932-33, when Retrenchment Committees had strongly recommended a longer stay in Delhi in order to extract rent for a longer period from the seasonal official occupants of its residential buildings, the rents in Delhi being higher than those for residences in Simla. An early descent from Simla was postponed in the autumn of 1934 on account of a report by the Public Health Commissioner on the general unhealthiness of the Winter Capital in October.

Health Measure

There was sixteen years ago an increase in malaria bearing mosquitoes and consequential fever in New Delhi. This led to a special inquiry in 1936. The inquiry showed that both Old and New Delhi were ringed about with prolific mosquito breeding places, one of the worst being the area utilized for sewage outfall. The water borne sewage of both Old and New cities is dealt with in a farm which, when the new city was built, was placed immediately outside its southern boundary. The Government of India after the 1926 inquiry were forced to adopt a new scheme for the removal of the farm to a more distant site and chose one some four miles further away from the city. Anti-malaria operations on a large scale, scientifically directed, were simultaneously undertaken, the estimate of their cost being Rs. 14 lakhs. Improvements in the water-supply of the new Capital with a view to a larger population being retained in it during the summer was also effected.

The Improvement Trust was instituted in 1937, its duties being to provide for the expansion of the new capital, including both old and new cities and urgently to deal with the insanitary overcrowding of the old city, a problem arising from the rapid increase of population and influx of refugees.

An area of over 6,500 acres has already been brought under the various schemes of the Trust, such as slum clearing and housing, at a cost of over Rs. 200 lakhs. In 1943 a new municipal authority designated West Delhi Notified Area Committee was constituted to meet the expanded civic needs. There are nine members on it all of whom are officials.

When the residential buildings in New Delhi were about to be designed, the Government of India issued orders that they were to be "for cold weather occupation only." This rule was followed. The general principle embodied in the design of the houses was that of planning them to capture as much warmth from the sun as possible. Secretariat, residential bungalows and staff quarters are largely inappropriate for hot weather occupation.

The Government of India in 1927 approved a scheme for the encouragement of Indian artists by providing facilities for the decoration of certain buildings in New Delhi. The outlines of the scheme are briefly as follows. A certain number of domes and ceilings in the New Secretariat Buildings at Delhi suitable for decoration were selected. The various schools of art in India, as well as individual artists, were invited through local Governments, to send in small scale designs for approval by a Committee. After approval by the Committee both as regards the design and colour the pictures were to be drawn out and painted to full size on canvas, and if finally approved by the Committee, fixed according to the marouflage process *in situ*. Other techniques, such as fresco or tempera, were optional. Artists or schools of art, who sent in small scale drawings, had to bear the initial expense of preparing them. When these were approved by the Committee, the out-of-pocket expenses would be paid in addition to honorarium. Government undertook to pay for the finished pictures done from approved sketches but gave no guarantee that the finished paintings would permanently be preserved. Government intimated that historical or allegorical subjects would be given preference over religious ones and English artists living in India were barred from competition, the work being strictly reserved to Indian artists. Numerous artists submitted designs, especially those of Western India, and with such satisfactory results that the specially appointed Expert Committee approved of nearly all.

The Duke of Connaught laid the foundation stone of the All-India War Memorial in February 1921. The place is a fine position in the centre of the circular Princes' Park. The memorial was formally inaugurated by Lord Irwin in February, 1931, in the presence of representatives of every unit of the army in India, of the Royal Air Force and of a large concourse of official and other spectators.

The New City was the scene of notable and elaborate inauguration ceremonies in February, 1931. The first of these was the unveiling of four "Dominion Columns" suitably placed about the great place between the two Secretariat blocks. The columns are of red stone, surmounted each by a gilded merchantman of the old style in full sail. The columns are designed to resemble the historic ones erected in various parts of the land by Asoka and were presented by Canada, Australia, New Zealand and South Africa. The first two and fourth of these Dominions sent their own representatives to perform the ceremony of unveiling. New Zealand nominated a Member of the Government of India to act in her behalf for the same purpose.

ADMINISTRATIVE PERSONNEL

Chief Commissioner, Shanker Prasad, I.C.S.
Chief Minister, Brahm Perkash.
Education Minister, Shafiqur Rehman Kidwai.
Health Minister, Dr. Sushila Nayar.
Chief Secretary, L. J. Johnson, I.C.S.
Home Secretary, Y. N. Varma, P.C.S.
Secretary (Local Self-Government), K. K. Sharma, I.A.S.
Development Secretary, Govind H. Seth.
Finance Secretary, D. S. Nakra.
Secretary, Judicial-cum-Legislative, M L. Vijh, P.C.S.
Under-Secretary (Appointments), P.H. B. Wilkins.
Under-Secretary (Finance), M. L. Chopra.
Deputy Commissioner, Rameshwar Dayal, I.A.S.
Additional District Magistrates, H. S. Dhillon and J. B. Tandon.
Secretary, Notified Area Committee, G. L. Mittal.
Magistrates, 1st Class, Abhey Raj Singh; R. S. Dewan; M. L. Batra; J. D. Sharma; Aziz Shafi; Gopal Saran Das; Raja Lal Gupta.
Resident Magistrate, New Delhi, Atam Parkash Bagal.
Lady Magistrate, 1st Class, Mrs. K. Pahwa.
Revenue Officer, and Executive Officer and Secretary to the District Board, P. N. Bhanot.
Treasury Officer, Major P. C. Mukherjee.
Development Officer, Bhag Singh.

Judicial

District and Sessions Judge, S. S. Daulat, I.C.S.
First Additional Sessions Judge, Vacant.
Second Additional Sessions Judge, Des Raj Pahwa.
Senior Sub-Judge, Mohinder Singh Matharu.
Commercial Sub-Judge, Des Raj Pahwa.
Judge, Small Cause Court, Y. L. Taneja.
Additional Judge, Small Cause Court, Rameshwar Dial.
Administrative Sub-Judge, Chetan Das Jain.

The soil is fertile. Rice is the principal crop of which Manipur exports a fair quantity. Handloom weaving is a popular industry throughout the State and Manipuri cloth of various picturesque and indigenous designs, is in demand throughout India and even outside. Efforts are in progress to revitalize this cottage industry.

The administrative machinery under the former State Government was archaic and ineffective and has therefore been reorganised.

The Budget figures for Income and Expenditure for 1952-53 were Rs. 29,79,000 and Rs. 75,03,400 respectively.

The Planning Commission have tentatively accepted a ceiling of Rs. 1.5 crores for the following Development schemes in Manipur under the Five-Year Plan. They are Forest Development scheme, Medical Development scheme, Agricultural Development scheme, Veterinary and Animal Husbandry Development scheme, Education Development scheme and Communication Development scheme. Over and above the aforesaid schemes, the following schemes are also contemplated to be taken up under the Five-Year Plan, namely Hydro-Electric Supply scheme, Water Supply scheme for the town of Imphal and rural water supply scheme. Arrangements for the implementation of these schemes during 1952-53 are now in progress.

With a view to intensifying the " Grow More Food " Campaign improved seeds of Rabi, Boro and other high yielding seeds, Gram seeds, Potato seeds and Mustard seeds were distributed to the cultivators during the current year. Fruit grafts and seedlings also were distributed both in the hills and valley areas of the State. About 700 acres of waste land have been settled with cultivators and brought under cultivation during the current year. Another about 3,000 acres of waste land is now under survey and is expected to be settled with landless cultivators shortly.

ADMINISTRATIVE PERSONNEL

Chief Commissioner and District Magistrate, E. P. Moon, I.C.S.
Development and Revenue Commissioner, Shamsundar Lal Dhar.
Secretary to the Government, P. C. Deb.
Judicial Commissioner, Thakur Laxminarian.
District and Sessions Judge, L. Ibungohal Singh.
Deputy Commissioner and Additional District Magistrate, M. N. Phukon.
Superintendent of Police, S. Palit.
Chief Medical Officer, Dr. A. C. Kapur.
Registrar of Co-operative Societies and Director of Industries, H. Iboyaima Singh.
Principal, Dhanamanjuri College, S. N. Chatterji.

TRIPURA

Tripura is one of the oldest Hindu States in India. It is bounded on the north by the Sylhet and Cachar Districts, on the west by Sylhet, Tipperah and Noakhali Districts, on the south by the Chittagong and Noakhali Districts and on the east by Lushai and Chittagong Hill tracts. The major portion of the State is hilly and full of jungles.

The area of the State is 4,049 sq. miles, and the population according to the 1951 census 649,930. The increase over 1941 is 26·7 per cent. The number of refugees is 100,251. Hence the net increase is only 7·1 per cent. Today the density is 158 while in 1941 it was 124.

The agricultural wealth of the State consists of paddy, jute, cotton, tea and fruit such as pineapple, jackfruit, etc., while forests yield timber, firewood and charcoal. Paddy is the main source of revenue.

The State is divided into ten administrative Divisions—Sadar, Khowai, Kailashahar, Dharmanagar, Sonamura, Udaypur, Belonia, Sabroom, Kamalpur and Amarpur.

Sadar Division has a population of 225,035 (1941) and is divided into ten Tahsils—Sadar, Puranagartala, Banutia, Mohanpur, Simna, Ishenchandranagar, Kamalasagar, Takarjala, Bishalgar, Charilam.

Khowai Division has a population of 60,866 and is divided into three Tahsils—Khowai, Kalyanpur and Asharambari.

Kailashahar Division has a population of 74,004 and is divided into three Tahsils—Kailashahar, Fatickroy and Kanchanpur.

Dharmanagar Division has a population of 68,053 and is divided into four Tahsils—Dharmanagar, Brojendranagar, Kurti and Longai.

Sonamura Division has a population of 44,270 and is divided into five Tahsils—Sonamura, Kathalia, Bakshanagar, Dhanpur and Mantinagar.

Udaypur Division has a population of 54,446 and is divided into two Tahsils—Radhakishorepore and Salgarah.

Belonia Division has a population of 41,429 and is divided into seven Tahsils—Belonia, Rajnagar, Radhanagar, Puranrajbari, Sidhinagar, Hrishyamukh and Muhuripur.

Sabroom Division has a population of 22,839 and is divided into five Tahsils—Sabroom, Manu, Amlighat, Samarendraganj and Gorakapa.

Kamalpur Division has a population of 29,131 and is divided into two Tahsils—Kamalpur and Kulai.

Amarpur Division has a population of 29,858 and is divided into three Tahsils—Birganj, Omphi and Dumboornagar.

The Chief Commissioner who is the head of the State, is assisted by three Secretaries, each in charge of several Departments.

There is also a District Magistrate, and for each of the Divisions an S.D.O. On the judicial side there is a Judicial Commissioner's Court which is the highest court in the State. There is also a District Court, and in seven out of the ten Divisions a Munsif Court.

The Electoral College has a total strength of 30. Out of this the Congress won 9 seats, Communists 12, Ganatantrik Sangh 3 and Independents 6.

ADMINISTRATION

Chief Commissioner, V. Nanjappa, I.C.S.
District Magistrate, R. Ghosh, I.A.S.
Secretaries, R. K. Dev Varma ; N. L. Dev Varma ; S. C. Ghosh, B.L.
Dy. Secretaries, P. K. Dev Varma ; H. K. Dev Varma, B.A.
Assistant Secretary, C. R. Bhattacharjee, B.L.
Director of Health Services, H. P. Banerjee.
Director of Agriculture, Vacant.
Director, Relief & Rehabilitation, S. K. Roy.
Director of Civil Supply, Vacant.
Director of Procurement, A. K. Bhattacharjee.
Conservator of Forest, Vacant.
Executive Engineer, A. K. Sen, B.E.
Superintendent of Police, G. P. Ghosh.
Commandant, Armed Police Bn., Major H. K. Dev Varman.
Legal Remembrancer, C. Deb Choudhury.
Revenue Officer, N. N. Choudhury.
Registrar, Tripura Secretariat, B. K. Sen Gupta.
Superintendent of Press, B. C. De.
Inspector of Schools, K. B. Das Gupta, M.A., B.L.
Census & Statistical Officer, C. Paul, M.Com.
Labour Officer, B. C. Halder, B.L.

VINDHYA PRADESH

Vindhya Pradesh lies between 20° 30′ and 26° 15′ N. latitude and 78° 15′ and 82° 50′ E. longitude. It now includes 25 Baghelkhand and Bundelkhand States of which Rewa is the biggest. The States are besides Rewa : Ajaigarh, Baraundha, Bijawar, Chhatarpur, Charkhari, Datia, Maihar, Nagod, Orchha, Panna (Salute States) and Alipura, Bhaisunda, Garrauli, Gaurihar, Jaso, Kamta Rajaula, Khaniadhana, Kothi, Lugasi, Naigawan-Rebai, Pahra, Paldeo, Sohawal, Taraon (Non-salute States).

Originally Vindhya Pradesh was composed of 35 States of which the following 10 were transferred to Uttar Pradesh on 25th January 1950 : Samthar, Sarila, Jigni, Bihat, Banka Pahari, Baoni, Beri, Dhurwai, Tori Fatehpur and Bijna.

Vindhya Pradesh lies between Uttar Pradesh in the north and east and Madhya Pradesh in the south. On the west lies Madhya Bharat.

The population of the State is 3,577,431 according to the 1951 census, and the area 24,600 square miles. Hindus form an overwhelming majority of the population. The prevailing languages are Hindi and dialects called Baghelkhandi and Bundelkhandi. The main occupation of the people is agriculture. The capital of the State is Rewa.

There are 8 districts sub-divided into 31 Tehsils. Rewa, Satna, Shahdol and Sidhi districts form Baghelkhand Division, while Bundelkhand Division comprises the Districts of Datia, Tikamgarh, Chhatarpur and Panna, each Division being under a Commissioner.

The following table gives the population of each of the districts according to the 1951 census :

Name of District	Population according to 1951 census
Rewa	636,646
Satna	554,820
Sidhi	664,388
Shahdol	650,238
Panna	258,563
Chhatarpur	482,614
Tikamgarh	365,947
Datia	164,215

The soil is poor and bears only average crops. Wheat, Gram, Barley, Linseed, etc., are grown in the spring and Rice, Maize, Saman, Kodon, Cotton, Bajra, etc., in the autumn. Irrigation is mainly by bandhs and wells.

MINERALS

Vindhya Pradesh has large mineral resources. The State is richly endowed with coal and building stone, especially limestone. Large deposits of Corundum are found in the Sidhi District. The diamonds of Panna are well known. Other minerals and raw materials of economic importance, so far known to exist in this area, are iron ore, copper ore, lead ore, yellow ochre, felspar, fireclay, and bauxite.

Geologists believe that fresh minerals may be found in the State as many minerals not yet found here are known to occur in other parts of India in similar formation. There are good prospects for the manufacture of cement, glass, paper, aluminium, heavy chemicals and synthetic petrol.

The exploitation of the centuries-old diamond mines of Panna by scientific devices is soon to be taken in hand under the guidance of two foreign experts. The services of these two experts, Mr. Roydon Harrison, consulting engineer of the Anglo-American Corporation and Dr. A. E. Waters, a geologist attached to the De Beers Group of Africa mines, have been lent to the Panna Diamond Mining Syndicate. The machinery, which is of the latest type is installed at Panna. It is capable of handling 250 tons of ore in an eight-hour day. Extensive study of ore from Panna mines by the geologists of the Central Government has shown that its diamond content is one carat in four tons of rock, and they believe that the deposits are commercially workable.

FORESTS

There are extensive forests which produce excellent timber. Enough bamboos and bagal grass are also available for making paper pulp. Tender leaves used for making bidis are also found in abundance. There is a shellac factory at Umaria in Shahdol District.

The jungles in the south-east are famous for their big game. Tigers are met with in considerable numbers, as also bears, panthers and wild buffaloes while Sambhar, Chikara and Roj abound.

COMMUNICATIONS

The State is not well served by railways and communication is mostly by road. Satna (32 miles) is the railway station for Rewa, the capital of the State, and is situated on the Central Railway. Another section of the Central Railway between Manikpur and Jhansi passes through a few villages in the Bundelkhand Division. The Katni-Bilaspur section of the Eastern Railway passes through the southern District (Shahdol) of the State for a distance of 138 miles.

There are not many metalled roads, and parts in the interior are sometimes cut off from one another during the monsoon. All the district towns are connected by road.

ARCHÆOLOGY

There are a number of places of archæological interest in the State, chief among them being the Khajraho and Orchha temples, the Bandhogarh Fort, Chandreha and Manda, Bir Singh Palace, Datia, Jahangir Mahal with a flower garden at Orchha, the source of the Narbada River at Amarkantak, and the Jain temples at Sonagir. There are numerous waterfalls the most picturesque among them being the Chachai and Keoti in the old Rewa State.

EDUCATION

The percentage of literacy is only 6 because of vast unopened tracts and the existence of aboriginals like Gonds. The number of educational institutions is increasing every year. A feature of the education in Vindhya Pradesh is that not only primary education, but education upto and including the high school sections is free throughout.

There is one Post-Graduate College which also conducts Law Classes at Rewa, one Degree College at Chhatarpur, one Intermediate College at Tikamgarh, 14 High Schools, 31 A.V.M. Schools, 160 Hindi Middle Schools, about 1,450 Primary Schools, two Teachers' Training Schools and one Technical Institute. In addition there are 12 Night Schools and some special schools. 300 Primary Schools, two High Schools and one C.T. have just been opened and it is proposed to open one Model School and to introduce Basic Education in two institutions. The approximate number of students in the educational institutions in Vindhya Pradesh is 91,000.

For 1952-53 budget estimated receipts were Rs. 3,41,94,000 and expenditure Rs. 3,32,45,000 thus leaving a surplus of Rs. 9,49,000. There was no increase in the existing taxes and no proposal to levy new ones. The surplus was ascribed to the Central subsidy which amounted to Rs. 95 lakhs. Allotments are for forests Rs. 2,50,000 ; for building Rs. 2,00,000 ; electrification Rs. 8,00,000 ; purchase of food grains Rs. 50 lakhs ; for purchase and equipment of Gandhi Memorial Hospital Rs. 5,15,000.

POLITICAL SET-UP

Vindhya Pradesh became a Centrally administered area under a Chief Commissioner on January 1, 1950 and is now listed as a Part C State under the new Constitution.. The posts of Rajpramukh and Up-Rajpramukh were abolished on that date.

A Lieutenant Governor was appointed for this State and he took over from 1st of March 1952. In accordance with the provisions of Government Part C States Act, 1951, Vindhya Pradesh Legislature consisting of 60 members has been formed.

There is a Judicial Commissioner's Court presided over by a Judicial Commissioner assisted by two Additional Judicial Commissioners.

In the Legislative Assembly which has a total strength of 60, the Congress has 41 seats, Socialists 10, K.M.P. 3, Jan Sangh 2, Rama Rajya Parishad 2, and Independents 2.

ADMINISTRATIVE PERSONNEL

Lieutenant Governor, K. Santhanam.
Chief Minister, Shambhoo Nath Shukla.
Minister for Justice and Planning, Gopal Saran Singh.
Minister for Home, Lala Ram Bajpai.
Minister for Industries & Civil Supplies, Dan Bahadur Singh.
Minister for Social Services, Mahendra Kumar Manav.
Chief Secretary, M. K. Kher, I.A.S.
Secretary to Lt. Governor, P. K. Chakravarty.
Judicial Commissioner, H. R. Krishnan, I.C.S.
Additional Judicial Commissioner, Pancholi Chhatar Singh, B.A., LL.B.
Inspector-General of Police, Hiranand, I.P.
Finance Secretary, M. S. Venkatram.
Judicial Secretary, M. P. Shrivastava, M.A., LL.B.
Revenue Secretary, Syed Sifat Ali.
Deputy Secretary, Commerce and Industries, R. D. Singh, M.A.
Deputy Secretary, Revenue, M. P. Goswami, M.A. LL.B.
Deputy Secretary, Home, Raghavendra Prasad, B.A., LL.B.
Director of Food and Civil Supplies and Ex-officio Secretary to Government in Food and Civil Supplies Department, Ganga Prasad Jain, M.A., LL.B.
Commissioner, Baghelkhand, Kanhaiya Lal Pancholi, I.A.S.
Commissioner, Bundelkhand, Seth Badri Prasad.
Commissioner, Sales Tax and Excise, A. K. Tankha, B.Sc.
Director of Medical and Health Services, N. C. Kapoor, M.B.B.S.
Chief Engineer, T. C. Gue, B.Sc., B.E.

LEGISLATIVE ASSEMBLY

(*For members of Assembly see under General Election*).

SCHEDULED CASTES AND TRIBES

THE new Constitution provides for special safeguards for the Scheduled Castes, Scheduled Tribes and Backward Classes. The President has defined by means of an order who the Scheduled Castes and Tribes are. A similar list of Backward Classes has to wait the detailed findings of the Census Commission. For the Scheduled Castes the safeguards take the form, broadly speaking, of reservation of seats in the lower houses and of vacancies in Government services. For the Scheduled Tribes there is a sort of autonomy in parts of Assam, Tribal Councils to watch their interests in some States, while in other States Ministers have been appointed to take charge of Tribal affairs. There are also special grants to be used exclusively for uplift work. All these special provisions may come up for review by a Commission appointed by the President at any time within ten years after the commencement of the new Constitution. Meanwhile there is an official with the Central Government who is to report to the President from time to time on the working of these provisions. A commission may also be appointed to look into the case of backward classes.

The number of people coming under the definition Scheduled Castes is about 49.8 millions, and of Scheduled Tribes about 17.9 millions.

The following table gives the distribution of the Scheduled Tribes over the territory of the Union:—

Statement 1.

—	Estimated Population as on the 1st March, 1950 (In Lakhs)
Assam excluding Tribal Areas thereof	6·82
Autonomous Districts—	
United Khasi-Jaintia Hills ..	3·25
Garo Hills	2·07
Lushai Hills	1·63
Naga Hills	2·02
North Cachar Hills	0·36
Mikir Hills	0·99
Total	17·14

Statement 2.

Name of State	Estimated Population as on the 1st March, 1950 (In Lakhs)
Part A.	
Bihar	42·10
Bombay	30·37
Madhya Pradesh	24·59
Madras	5·96
Orissa	29·25
Punjab	0·15
West Bengal	11·77
Part B.	
Hyderabad	2·37
Madhya Bharat	9·49
Mysore	0·10
Rajasthan	4·47
Saurashtra	0·73
Travancore-Cochin	0·23
Total (Parts A and B)	161·58
Grand Total	178·72

The 49·8 million Scheduled Castes are distributed as follows (number in lakhs): Assam 4·18, Bihar 52·86, Bombay 27·97, Madhya Pradesh 29·29, Madras 89·14, Orissa 21·57, Punjab 20·79, Uttar Pradesh 119·17, West Bengal 41·25, Hyderabad 31·21, Madhya Bharat 13·62, Mysore 15·45, PEPSU 5·59, Rajasthan 15·00, Saurashtra 2·67, Travancore-Cochin 8·61.

ORIGIN

It was during the Round Table Conference held in London, before the 1935 Government of India Act was finally drafted, that Dr. Ambedkar suggested the term "Scheduled Caste" for all those depressed class people who were not only backward socially, economically and politically but who also suffered from the social disabilities derived from untouchability. The Government of India (Provincial Legislative Assembly) Orders 1936 give a list of officially recognized Scheduled Castes. Similarly, the aboriginal tribes which were termed Animists in the census of 1911, Forest and Hill Tribes in the census of 1921, Primitive Tribes in the census of 1931 and Backward Tribes in the 13th Schedule of Government of India (Provincial Legislative Assembly) Order 1936 and finally Tribals in the census of 1941 are now called Scheduled Tribes according to the new Constitution.

It is comparatively easy to define a Scheduled Caste as its distinguishing feature is untouchability but it is more difficult to lay down a uniform criterion for a Scheduled Tribe.

The main object of listing these Castes and Tribes separately in the Government of India Act of 1935 and the present Constitution was to give them special political representation and educational and other facilities.

Every State has a list of Scheduled Castes and Scheduled Tribes for the granting of educational and other facilities. But for political representation the list contained in the Schedule 13 of the Government of India Act (Provincial Legislative Assembly) Orders 1936 was followed by all the States so far as Provincial Assemblies and Councils were concerned. The Indian States, prior to the advent of Independence, however, had lists which were haphazardly compiled.

So, when the new Constitution was on the anvil, it was decided that a thorough going list for Scheduled Castes and Scheduled Tribes should be prepared.

SAFEGUARDS

The Constitution of India has laid down certain safeguards for Scheduled Castes, Scheduled Tribes and Backward Classes or the weaker sections of the people. In a chapter on Fundamental Rights, under Articles 15, 16 and 17, it has been stated that the State shall not discriminate between any citizens on grounds of religion, race, caste, sex or place of birth. This does not prevent the State, however, from framing rules for the reservation of seats in the legislature or of appointments in the public services in favour of any class which is not adequately represented. Similarly, under Article 19, the right to freedom is circumscribed by authorising the State to place reasonable restrictions for the protection of the interests of Scheduled Tribes. Under the directive principles of policy, under part 4, Article 46 of the Constitution, it is said that the State should promote the educational, economic and political interests of the weaker section of the people and in particular the Scheduled Castes and Scheduled Tribes and protect them from social injustice and all forms of exploitation.

Under Article 17 untouchability is abolished and its practice in any form forbidden. Article 25 empowers the State to throw open Hindu religious institutions of a public character. Article 29 provides that no citizen can be denied admission into any educational institution maintained by the State or aided by it on grounds of religion, race, caste or language.

Consequently, it has been laid down under Article 164, that in the States of Bihar, Madhya Pradesh and Orissa, there shall be a Minister in charge of Tribal Welfare who may, in addition, be in charge of the welfare of Scheduled Castes and Scheduled Tribes or any other work of allied nature while in the Part B State of Madhya Bharat there will similarly be a Minister in charge of Tribal Welfare who may, in addition, be in charge of the welfare of Scheduled Castes and Scheduled Tribes or any other work of allied interest. The VIth and VIIth Schedules of the Constitution under Article 244 also provide for the administration and control of Schedule areas and Scheduled Tribes and of the Tribal areas in Assam by providing Tribe Advisory Councils for Tribal areas. For the promotion of the welfare of Scheduled Tribes and Schedule areas, provision has been made under Article 275 for grants-in-aid to be paid out of the Consolidated Fund of India for such schemes of development as may be undertaken by the States with the approval of the Government of India for raising the administration of the Schedule areas of the State to the same level as that of the other areas of the State. Special provision for grants-in-aid has been made in the case of Assam.

Tribes Advisory Councils have been set up in Bihar, Madhya Pradesh, Madras and Orissa.

In the Tribal areas in Assam District or Regional Councils have to be set up for each autonomous region. Three-fourths of the members have to be elected on a basis of adult franchise.

REPRESENTATION IN LEGISLATURES

Seats are reserved in the House of the People under Article 330 and 332 for Scheduled Castes and for Scheduled Tribes including the Tribal areas and autonomous districts of Assam. The number of seats reserved in any State shall bear the same proportion to the total number of seats allotted to that State in the House of the People as the population of Scheduled Castes and Scheduled Tribes in the State or the part of the State bears to the total population of the State. Similarly in the Legislative Assembly of every State seats are reserved. The reservation of seats in the House of the People and Legislative Assemblies shall cease to have effect on the expiration of a period of ten years from the commencement of the Constitution. The representation of the Anglo-Indian community in the House of the People and in the Legislative Assemblies of the States by nomination shall also cease after ten years.

Under these provisions 72 seats in the House of the People and 477 in the States Legislatures have been reserved for the Scheduled Castes, and 26 seats in the House of the People and 192 in the State Legislatures for the Tribes.

The claims of members of Scheduled Castes and Scheduled Tribes shall be taken into consideration under Article 335 in the making of appointments to services and posts in connection with the affairs of the Union or of a State consistently with the maintenance of the efficiency of the administration.

In order to investigate all matters regarding these safeguards for Scheduled Castes, Scheduled Tribes, Backward Classes and Anglo-Indians, provision has been made in the Constitution under Article 338 for the appointment of a special officer for Scheduled Castes and Scheduled Tribes who is required to report to the President upon the working of these safeguards at such intervals as the President may direct and the President shall cause all such reports to be laid before each House of Parliament. Articles 339 and 340 provide for the appointment of a Commission by the President any time but within the expiration of ten years from the commencement of the Constitution to report on the administration of Schedule areas and the welfare of Scheduled Tribes in the States of Parts A and B. The same Articles also provide for the appointment of a Commission to investigate the conditions of socially and educationally backward classes and the difficulties under which they labour and to make recommendations as to the steps to be taken to remove such difficulties and to improve their conditions, and the grants that should be made for this purpose by the Union or any State.

Now for the purposes of preparing a list of Scheduled Castes and Scheduled Tribes it has been laid down under Articles 339, 341 and 342 that the President, in consultation with the Governor or Rajpramukh of the State, by public notification, specify the castes, races or tribes to be deemed as Scheduled Castes and specify the Scheduled Tribes to be deemed as Scheduled Tribes. Parliament alone may, by law, include or exclude from this list Scheduled Tribes and Scheduled Castes. The notification of such lists by the President cannot be varied by any subsequent notifications.

This was done through the following orders: The Constitution (Scheduled Castes) Order, 1950; the Constitution (Scheduled Castes) (Part C States) Order, 1951; the Constitution (Scheduled Tribes) Order, 1950; the Constitution (Scheduled Tribes) (Part C States) Order, 1951.

SCHEDULED CASTE DISABILITIES

The main problem of Scheduled Castes is the social disabilities based on untouchability which is deep-rooted in the structure of Hindu society. The Legislative measures making untouchability a cognizable offence and enjoining entry into common Hindu temples have been enacted in Part A States as the Removal of Social Disabilities Act and the Temple Entry Act; and they have been applied to some of the Part B States as well where the Scheduled Castes are badly treated. For instance, there are some Part B and Part C States where they are not allowed to put on shoes, ride on horseback or put on the more expensive type of clothes or silver and gold ornaments, while in many places the Scheduled Castes are not allowed to draw water from the well. Inter-caste dining or inter-caste marriages are out of question.

Propaganda by non-official agencies like the Harijan Sewak Sangh and the Congress has softened down the custom and the habit of untouchability to a considerable extent. Legislative measures helped in keeping up the tempo of the propaganda. Ultimately, it will be the propaganda and the public opinion created by it that will put an end to untouchability of every kind. As a result of scholarships and other privileges granted to them the Scheduled Castes are coming into their own and are supplying leadership for the community. There are, for instance, Ministers in Cabinets and Members of Parliament from Scheduled Castes. Similarly, in the Government services they are beginning to make headway and some have reached the upper ranks of services. The worst sufferers are those members of Scheduled Castes who are at the bottom of the social order and are considered as untouchables even among untouchables, castes like Bhangis, Mehtars, Valmikis and Mangs, and so on. That is to say those who are mainly engaged as scavengers or sweepers or in the so-called unclean work of removing dead animals, etc. It is very difficult to persuade these people to take to education or lead a decent life and also to provide them with decent houses. The period of ten years stipulated in the Constitution may not be long enough to educate them socially and raise them to the level of the other sections of society.

SCHEDULED TRIBES

Different Scheduled Tribes belong to different strata of culture and have different habits, customs and modes of life. The main characteristics which are common to all Scheduled Tribes are, isolation from other communities, primitive life, belief in sorcery and black magic, nomadic habits, and love of drink and dance. It is mostly on hill tops, or valleys or forest areas that the Scheduled Tribes have their habitation. They have been neglected both by Government and society in general who have, nevertheless, exploited them and, ultimately drove them into the forest regions of the country. The problem is, therefore, quite different from that of the Scheduled Castes. The foreign Christian Missionaries have tried to improve their lot by starting missions amongst them as a result of which some leaders like Mr. Jaipal Singh, M.P., have come forward and qualified themselves for membership of Parliament. There are very few educated or socially conscious people among the Scheduled Tribes who can take their due share in the work of State Assemblies, much less in Government services. It was very recently that non-official organisations have sprung up in the country for doing ameliorative work among them at the instance of the late Shri Thakkar Bapa who had organised Associations in some States with the help of grants from different State Governments. It is only the beginning, and there is enormous uphill work to be done before they can catch up with the rest of society. Without adequate support in men and money it is doubtful if this work can be accomplished within a period of ten years stipulated in the Constitution.

In this connection the Bharatiya Adamjati Sevak Sangh to which all other institutions doing tribal welfare work are affiliated is doing much useful work.

Backward classes can be classified and listed only after the findings of 1951 census are available. It will not be easy to list these people as the general condition of the majority of the people in India is also backward, educationally and economically. It will, therefore, be very difficult for the State to provide adequate funds for the improvement of these classes.

In view of the importance and urgency of the problem of tribal welfare, the Government of India was expected to convene towards the end of May a conference of representatives of States, members of Parliament and States Assemblies representing the tribal people, anthropologists and social workers, to formulate the right approach in tackling the problem and to discuss welfare schemes of the Centre and the States.

The Commissioner for Scheduled Castes and Tribes, Mr. L. M. Shrikant, has submitted to the President a 200-page report giving a comprehensive review of the position of the tribal people, measures of uplift undertaken since the inauguration of the new Constitution and the programme of work to be implemented in the coming years in conformity with the provisions of the Constitution.

This report would be placed on the table of the House of the People and debated during its first session.

In a circular sent to the States Governments and representatives of the tribal people, the Special Commissioner elicited from them information on what agencies and what schemes of tribal welfare should be chosen for utilising the grants-in-aid made by the Central Government under Article 275 of the Constitution.

Classification of tribes according to linguistic, cultural and racial affinities, tribal economy, social structure of the tribal people, the problem of education and dialects, health and hygiene and training in leadership are other important questions on which information was elicited by the Central Government.

In 1951-52 a sum of Rs. 1·75 crores was granted to Part A and B States for promoting the welfare of Scheduled Tribes; and for 1952-53 a provision of Rs. 1·80 crores has been made. For the welfare of Scheduled Tribes in Part C States a sum of Rs. 24 lakhs has been provided.

It may be added as a post-script, a five-year development plan for the tribal areas of Assam (8 lakhs of people living in an area of 40,000 sq. miles) estimated to cost Rs. 3 crores, has been approved by the Planning Commission.

A major portion of this expenditure, nearly Rs. 1·35 crores, would be spent on development of roads. The road development programme will be co-ordinated with the programme for strategic roads likely to be drawn up at the instance of the Ministry of Defence.

It is proposed to spend Rs. 65 lakhs on medical facilities and public health, Rs. 48 lakhs on education, Rs. 32 lakhs on agriculture and Rs. 20 lakhs on forests. Rs. 83·5 lakhs will be required to implement the first stage of the two-year programme.

From the point of view of the existing production the area can be divided into three distinct categories. These are: (1) an area of about 2,000 square miles with a population of 60,000 which is self-sufficient or has even surplus production; (2) an area of 3,700 square miles with a population of 100,000 which has average production and (3) the balance of about 34,000 square miles with a population of 5,38,000 which is a deficit area.

At present paddy forms the major crop of the area and it is also the staple food of the people so long as it is available. Millet and maize are next in importance and are grown extensively in the region. Wheat and barley are grown only in some localised areas where climatic conditions are favourable. Next to cereals, the tribal people are accustomed to root crops such as kachu, sweet potato and yams which are cultivated. They are also found in wild condition.

In the road development programme, it is contemplated to build nearly 1,400 miles of road in the Mishimi Hills, Abor Hills, Subansiri area, Sela Sub-Agency, Tirap Hills and Naga Hills.

Development of medical and public health services includes opening of 10 hospitals and 30 dispensaries, education and training of students, appointment of malaria and vaccination staff and supply of drugs and medical instruments. It also includes the establishment of a leper colony.

Expenditure on education includes opening of primary and secondary schools, both of the middle and high standard, and also vocational training schools. Emphasis is laid on the establishment of technical schools which are proposed to be opened in each of the six subdivisions in the area.

On agricultural development, the major programme covers the introduction of permanent cultivation in the form of both terrace and wet rice cultivation. Introduction of new and commercial cash crops, supply of improved varieties of seeds, training of agriculturists in improved manurial and cultural practices, supply of tools and implements form other important aspects of the programme. The existing sericultural activity in the area has to be promoted, and the plan makes a provision for setting up a fully equipped central farm at Pasighat. In view of the future possibilities of sericulture among the tribal people, it is also considered necessary to provide for demonstration and seed-supply centres in the area.

For 1951-52, the provision made in the plan for the development schemes of the tribal area was Rs. 14,73 lakhs. The revised budget estimates are Rs. 30 lakhs. A sum of Rs. 21 lakhs has also been provided in the budget for 1952-53 in respect of the development schemes of this area.

In view of the backwardness of the area, the Planning Commission has now allotted one Development Block to this area to be developed on the lines of the general pattern of Community Projects which will be implemented in various parts of the country.

A note may also be added on the results of the general elections. Of the 98 seats allotted to the Scheduled Castes and Tribes in the House of the People the Congress won 74 seats, the Scheduled Castes Federation 2, the Communists 2, the Akali Party 2, and the Socialist Party 3. Fifteen others were elected either through local parties or as independents.

In the States Assemblies of the 669 total seats for the Scheduled Castes and Tribes the Congress won 461 seats, the Socialists 19, K.M.P.P. 15, Communists 19, Scheduled Castes Federation 14, Akalis 8. The rest of the 133 seats were won by local parties and independents.

(For an analysis for each State see under General Elections).

GOVERNMENT OF INDIA PERSONNEL

PRESIDENT

Dr. Rajendra Prasad

PRESIDENT'S SECRETARIAT

Secretary, Shavax A. Lal
Private Secretary, Chakradhar Sharan.
Dy. Private Secretary, Balkrishna.
Asstt. Secretary. V. J. Moare.

MILITARY SECRETARY'S OFFICE

Mil. Secretary, Maj.-Gen. B. Chatterjee.
Dy. Mil. Secretary, Maj. S. M. Yunus Khan (Garhwal Rifles).
Comptroller of the Household, Vacant.
Dy. Surgeon, Dr. F. E. Buckler.
Personal Secretary, Valmiki Choudhary.
Asstt. Secretary, N. Banerjee.
Aides-de-Camp, Capt. P. M. Palamkote (Ty) (Rajput Regiment); Capt. S. D. Bhonsle (Ag) (1st Gurkha Rifles); Lieut. D. A. Kamath I.N.; Fl. Lt.-L. M. Katre, I.A.F.
J.C.O. as D.C., Ris Maj. & Hon. Lieut. Amir Singh Bahadur, M.B.E., O.B.I. (Central India Horse); Ris. Maj. Hakim Singh (Skinner's Horse).

PRESIDENT'S BODYGUARD

Chief Commandant, Maj Gen. B. Chatterjee.
Commandant, Maj. S. K. Bharat Singh (2nd Lancers).
Adjutant, Capt. S. G. Srinivasan (Mysore Lancers).

VICE-PRESIDENT

Vice-President, Dr. Sarvapalli Radhakrishnan.
Asstt. Private Secretary, S. Natesa Sastri.

CABINET MINISTERS

Prime Minister, External Affairs, Jawaharlal Nehru.
Education and Natural Resources and Scientific Research, Maulana Abul Kalam Azad.
Communications, Jagjivan Ram.
Health, Rajkumari Amrit Kaur.
Defence, N. Gopalaswami Ayyangar.

TRADE COMMISSIONER SERVICE

UNITED KINGDOM

THE United Kingdom Trade Commissioners are the representatives in India, of the Board of Trade. The department of the Board which is mainly concerned with external economic relations is the Commercial Relations and Exports Department which is responsible for general external commercial policy and for the promotion of export trade.

In foreign countries the counterpart of the work performed by Trade Commissioners is undertaken by Foreign Service Officers in Commercial, Diplomatic and Consular posts. The Board of Trade is associated with the Foreign Office in the staffing of commercial posts in foreign countries. But the trade policy of the United Kingdom is a matter for the President of the Board of Trade acting, as do all other Ministers, in consultation and agreement with those of his colleagues whose interests are also concerned.

The primary duty of the United Kingdom Trade Commissioners consists in the giving of assistance to governments, organisations, firms and individuals who wish to establish contact with sources of supply in the United Kingdom. The Trade Commissioner, in addition, himself collects information in regard to trade opportunities which may arise within his territory. He reports to the Board of Trade on all matters affecting the trade, industry and commerce of the area entrusted to him. He is responsible for maintaining close personal relations with ministers and officials of governments in his area, with chambers of commerce, trade associations and the principal importers and manufacturers. He aims at visiting the principal commercial centres, reporting upon foreign competition, on financial and trade conditions, and new legislation affecting trade. He is also expected to maintain a regular flow of commercial information of all kinds to the Board of Trade, to maintain active correspondence with firms in the United Kingdom who wish to extend their trade, and to give all possible assistance to representatives of United Kingdom firms who may visit this territory. The senior U.K. Trade Commissioner in India acts in addition as Economic Adviser to the U.K. High Commissioner.

The United Kingdom Trade Commissioners in India endeavour to maintain contact with United Kingdom representatives and agents in India. The offices are equipped with a wide range of directories and reference books of all kinds, including libraries of catalogues of the leading United Kingdom manufacturers. Firms desiring information with regard to specific manufacturers are invited either to call personally or to communicate their requirements in writing. It is hoped that local importers and buyers will not hesitate to make more extensive use of the information available in these offices, and to bring to the attention of the United Kingdom Trade Commissioners any cases where difficulties may have arisen over the harmonious development of trade between the United Kingdom and India.

Delhi :—Rowland Owen, C.M.G., Senior United Kingdom Trade Commissioner in India.

L. Harrison, Principal United Kingdom Trade Commissioner at Delhi.

E. A. Midgley, M.B.E., United Kingdom Trade Commissioner.

J. N. McKelvie, United Kingdom Trade Commissioner.

E. I. Oliver, D.S.O., T.D., United Kingdom Trade Commissioner.

Address :—Eastern House, Man Singh Road, New Delhi 2.

Telephone No. 44211.

Telegrams :—"TRADCOM".

Calcutta :—G. W. Brazendale, Principal United Kingdom Trade Commissioner at Calcutta.

G. B. W. Harrison, United Kingdom Trade Commissioner.

R. W. B. Carter, United Kingdom Trade Commissioner.

Address : 1, Harrington Street, Calcutta 16.

Telephone No. PK 4500-7.

Telegrams : "TRADCOM".

Bombay :—D. A. Bryan, O.B.E., Principal United Kingdom Trade Commissioner at Bombay.

G. J. Husted, United Kingdom Trade Commissioner.

Address : Mercantile Bank Building, Mahatma Gandhi Road, Fort, Bombay.

Telephone No. 31001-6.

Telegrams : "TRADCOM".

Madras :—D. G. Stewart-Smith, United Kingdom Trade Commissioner.

Address : 2, Armenian Street, Madras 1.

Telephone No. 85448.

Telegrams : "BRITRACOM".

AUSTRALIA

The territory covered by the Australian Government Trade Commissioner Service in India includes India, Burma, Nepal, Persian Gulf area and Aden and is divided into two areas with Australian Government Trade Commissioners stationed at Bombay and Calcutta.

The territory of the Trade Commissioner stationed at Bombay includes Bombay State, Madras, Mysore, Travancore-Cochin, Hyderabad, Madhya Pradesh, French and Portuguese territories in India, Persian Gulf Ports and Aden while the Trade Commissioner at Calcutta is responsible for West Bengal, Uttar Pradesh, Delhi, Punjab, Bihar, Orissa, Assam, Burma and Nepal.

The Australian Trade Commissioner Service is administered by the Assistant Secretary, Trade Promotion Section of the Commonwealth Department of Commerce and Agriculture in Canberra.

The Trade Commissioners deal with enquiries from all the above mentioned areas, their main function being concerned with putting Australian exporters and manufacturers in touch with organizations and merchants interested in importing Australian merchandise.

They maintain a flow of trade information to the Department of Commerce, Australia, for dissemination to Australian exporters and information on specific openings for trade, including Government contracts and tenders for which Australian products might be suitable. They watch the demand for specific goods and give information concerning competition to be met in their supply. An important function is to provide details of credit conditions and terms of payment. Market surveys on specific commodities are prepared and sent for the information of trade interests in Australia.

At the Bombay Office is stationed a Trade Information Officer who edits a monthly trade and economic newspaper known as *Austral News* and issues other special releases in the form of technical, economic and agricultural newsletters. Information and literature are available on all aspects of trade with Australia.

Bombay:—S. D. Shubart, Trade Commissioner; A. L. Paltridge, Assistant Trade Commissioner; G. B. Hardham, Trade Information Officer.

Address : Mercantile Bank Building, 52/66, Mahatma Gandhi Road, Bombay, P.O. Box 217.

Calcutta :—R. J. Dunlop, Trade Commissioner; G. W. S. Temby, Assistant Trade Commissioner.

Address : 2, Fairlie Place, Calcutta, P.O. Box 303.

CANADA

The Canadian Department of Trade and Commerce comprises, as one of its principal divisions, the Foreign Trade Service, formerly described as the Commercial Intelligence Service. This service had its beginnings prior to the establishment of the Department in 1892 and has undergone considerable expansion. Before the war it included a headquarters staff in Ottawa and thirty-four Trade Commissioner offices abroad. Several of these were closed during the war years but are being progressively reopened and at the beginning of 1949 the service comprised offices in the United Kingdom, the Dominions, Newfoundland, Eire, the West Indian Colonies, the United States, Cuba, Egypt, the principal countries of Central and South America, the Netherlands, Norway, Sweden, Portugal, France, Belgium, Italy, Turkey, Greece, India, China and other centres of the East. The service still continues to expand both in respect to offices and trained personnel in order to assist in the transition of Canada's extensive wartime trade to a normal commercial basis.

In those countries where Canada has established diplomatic representation the Trade Commissioner's office has been incorporated into the Canadian embassy or legation.

The office of the Canadian Trade Commissioner for India, Burma and Ceylon was established in Calcutta in 1922 and was transferred to Bombay on April 1st, 1940. In the summer of 1947, the office of the High Commissioner for Canada was established at New Delhi where a Commercial Section is also located. The services of Canadian Trade Commissioner offices are at the disposal of Canadian firms interested in the export of their goods to the Indian, Burma and Ceylon markets and to Canadian manufacturers and others who may be interested in the purchase of local products. These offices are also in regular touch with import houses in these countries and are prepared to co-operate as well with exporters interested in the Canadian market.

New Delhi :—Richard Grew, Commercial Counsellor.

Address : Office of the High Commissioner for Canada, 4, Aurangzeb Road, P.O. Box 11.

Cable Address : "CANADIAN." *Telephone No.* 40191/2.

Bombay :—Bruce I. Rankin, Commercial Secretary for Canada.

Address : Gresham Assurance House, Mint Road, P.O. Box 886.

Cable Address : "CANADIAN." *Telephone No.* 20672.

CEYLON

Commercial Secretary : Ceylon High Commission in India : G. A. Fernando.

Address : Ceylon House, Bruce Street, Hornby Road, Bombay.

JAMMU AND KASHMIR

The office of the Trade Agent to the Jammu and Kashmir Government, at Bombay, is a useful link between the State and exporters of the produce and manufactures of the people of Jammu and Kashmir. In addition to fostering foreign trade, the office of the Trade Agent looks after the Kashmir Information Bureau and the Kashmir Visitors' Bureau, the latter organisation propagating tourism and giving every assistance to those intending to holiday in the "Happy Valley".

Address : Advani Chambers, Sir Pherozeshah Mehta Road, Bombay.

NEW ZEALAND

Trade Commissioner in India : G. S. Cosgrave *(Acting)*.

Address : 2nd Floor, Mercantile Bank Bldg., Mahatma Gandhi Road, Bombay.

Telephone : 27350.

Telegraphic Address : "ZEALANDIA."

AUSTRIA

Austrian Trade Representative in India: Robert Schmidt.

Address: Queen's Mansions, Bastion Road, Bombay.

Telephone: 34483.

BELGIUM

Consul-General for Belgium with jurisdiction over commercial matters: Emile Lotz.

Vice-Consul: René Vanhenten.

Address: "Morena," 11, Carmichael Road, Cumballa Hill, Bombay 26.

Telephone: 41824.

CUBA

Consul for Cuba in Charge of Economic Affairs: Sergio Arcacha.

Address: "Sea Foam," Cuffe Parade, Bombay 5.

Telephone: 34787.

CZECHOSLOVAKIA

Commercial Counsellor: K. Wagstein.

Address: Himalaya House, Palton Road, Bombay 1.

DENMARK

Commercial Counsellor: Viggo Theis-Nielsen.

Asstt. Trade Commissioner: P. Steffen-Nielsen.

Address: Pallonji Mansion, New Cuffe Parade, Colaba, Bombay 5.

Telephone: 35854.

EGYPT

Commercial Attaché to the Government of Egypt in India.

Address: Royal Egyptian Embassy, Swiss Hotel, Delhi.

FRANCE

New Delhi:—The Commercial Counsellor to the French Embassy, 24, Theatre Communication Building, Connaught Circus.

Bombay:—The Commercial Attaché to the French Embassy, "Adelphi", 4th Floor, 3, Queen's Road.

Calcutta:—The Commercial Attaché to the French Embassy, 13, Park Mansions, Park Street.

W. GERMANY

German Trade Commissioner: Gerd Deyhle.

Assistants: Ernst Kunisch, Dr. Gerard Ritzel.

Address: Consulate-General of the Federal Republic of Germany, Airlines Hotel, 5th Floor, Churchgate Reclamation, Bombay.

Telephone Nos.: 26230 and 26239.

HUNGARY

Legation of the Hungarian People's Republic—Commercial Section: B. Szilagyi.

Address: West End Hotel, 45, Marine Lines, Bombay 1.

Telephone: 32096-9.

ISRAEL

Trade Commissioner of Israel for India and South East Asia and Consular Agent: F. W. Pollack.

Address: Marine Villa, 126, Wodehouse Road, Bombay 5.

Telephone: 35911.

ITALY

Consul for Italy with Jurisdiction over Commercial matters: Dr. Vincenzo Bolasco.

Address: Contractor Building, Nicol Road, Ballard Estate, Bombay.

Telephone: 23084.

JAPAN

Consul General: Kiichiro Kiriyama.

Dy. Chief Representative: Shigemi Hayashida.

Address: Patel House, 124, Wodehouse Road, Colaba, Bombay 5.

Telephone: 35478.

NETHERLANDS

Commercial Counsellor to the Embassy: J. A. Koks.

Asstt. Commercial Counsellor to the Embassy: A. C. H. Graatland.

Address: 298, Bazargate Street, Fort, Bombay.

NORWAY

Commercial Counsellor for Norway: Arne Bjorgung.

Address: Imperial Chambers, Wilson Road, Ballard Estate, Bombay.

SPAIN

Assistant Spanish Trade Commissioner: I. Ali Prados.

Address: Spanish Consulate, Commercial Attaché, "Oceana", 153 Marine Drive, Bombay.

Telephone: 23427.

SWEDEN

Commercial Secretary to the Royal Swedish Legation: Tage Moberg (*Acting*).

Address: Indian Mercantile Chambers, Nicol Road, Ballard Estate, Bombay.

Telephone: 26583.

SWITZERLAND

Trade Commissioner: Dr. E. W. Dutschler.

Secretary to the Swiss Trade Commissioner: Dr. M. Steiner.

Address: Gresham Assurance House, Sir Phirozeshah Mehta Road, Fort, Bombay. P. O. Box 102. *Tel.* 27084.

YUGOSLAVIA

Consul-General of Federal People's Republic of Yugoslavia: V. Mesaric.

Address: Taj Mahal Hotel, Room No. 228, Apollo Bunder, Bombay.

Telephone: 36374.

WEIGHTS AND MEASURES

THE maund is the denomination of weight common all over India, but we may find that in a given city there are nearly as many maunds as there are articles to weigh. The maund varies even from district to district. Thus in Uttar Pradesh a maund of sugar weighs 48½ seers in Kanpur, 40 in Muttra, 72½ in Gorakhpur, 40 in Agra, 50 in Moradabad, 43½ in Saharanpur, 50 in Bareilly, 46 in Fyzabad, 48½ in Shahjahanpur, 51 in Goshangunge. Thus the maund varies throughout India from the Bengal or railway maund of 82-2/7 lbs. to the Factory maund of 74 lbs. 10 oz. 11 drs., and the Madras maund, which some authorities estimate at 25 lbs. and others at 24 lbs.

Committees of Inquiry—As there are variations in the weights and measures from one place to another there is much confusion and sometimes heavy individual loss. And Municipal and commercial bodies are continually returning to the problem with a view to devising a practical scheme of reform. The Union and State Governments have made various attempts during the past to solve the problem of common units of weights and measures; commercial and trade interests have agitated about the question for a long time. The Indian Railways and Government departments adopted a standard tola (180 grains), seer (80 tolas) and maund (40 seers) and it was hoped that this would act as a successful "lead" which would gradually be followed by the whole trade throughout the country, but the expectation has not been realised.

STANDARDS OF WEIGHTS ACT, 1939

By 1939 opinion in favour of legislation by the Government of India for the standardisation of weights crystallised to the extent that the Indian Legislature passed the Standards of Weight Act (Act No. IX of 1939) applicable to the whole of the area known as British India. The Act received the assent of the Governor-General of India and was published in Part IV of the Gazette of India of the 1st April, 1939. The Act laid down the following standard weights:—

(*a*) the standard tola, being a weight of 180 standard grains;
(*b*) the standard seer, being a weight of 80 standard tolas or 14,400 standard grains;
(*c*) the standard maund, being a weight of 40 standard seers;
(*d*) the standard pound, being a weight of 7,000 standard grains;
(*e*) the standard ounce, being one-sixteenth part of the weight of a standard pound;
(*f*) the standard hundred-weight, being a weight of 112 standard pounds;
(*g*) the standard ton, being a weight of 2,240 standard pounds.

Under sub-Section (2) of Section 4 of the Act, the Union Government undertook to supply to each State Government a complete set of duly authenticated standard weights. (See below).

PRESENT SYSTEM

The various systems of weights used in India combine uniformity of scales with immense variations in the weights of units. The scales used generally throughout Northern India, less commonly in Madras and standardized in Bombay under the Bombay Weights and Measures Act, 1932, may be thus expressed as one maund = 40 seers, one seer = 80 tolas. The actual weight of a seer varies greatly from district to district and even from village to village except in Bombay State. In the standard system the tola is of 180 grains, and the seer thus weighs 2.057 lbs. and the maund 82.28 lbs. This standard is also used in official reports.

For calculating retail prices, the universal custom is to express them in terms of seers to the rupee. Thus, when prices change what varies is not the amount of money to be paid for the same quantity, but the quantity to be obtained for the same amount of money. In other words, prices in India are quantity prices, not money prices. When the figure of quantity goes up, this of course means that the price has gone down.

The name of the unit for square measurement in India generally is the *bigha*, which varies greatly in different parts of the country. So the areas have been expressed here either in square miles or in acres.

BOMBAY WEIGHTS

The following are the Standard Weights and Measures according to the Bombay Weights and Measures Act of 1932:—

Weights—

(i) The Bombay Tola of 180 grains.
The Bombay Seer of 80 tolas.
The Bombay Maund of 40 seers.
The sub-multiples ½, ¼, ⅛, 1/16 and 1/32 and the multiples 2, 4, 5, 10, 20 and 40 of a seer.

The pound avoirdupois equal to 7,000 grains and the sub-multiples ½, ¼, ⅛, 1, 2, 4 and 8 ounces, the multiples 1, 2, 4, 7, 14, 28 lbs. (a quarter), 56 lbs., 112 lbs. (1 cwt.) and 2,240 lbs. (1 ton).

In pursuance of their policy of standardising weights and measures throughout the State, the Government of Bombay have directed that, from September 1, 1951 the Bombay tola of 180 grains, the Bombay seer of 80 tolas and the Bombay maund of 40 seers and the sub-multiples of 1/2, 1/4, 1/8, 1/16, 1/32 and the multiples 2, 4, 5, 10, 20 and 40 of a seer should be used in the trades in grains, pulses, seeds, salt and flour (all these in quantities exceeding 1/2 seer and not exceeding 20 Mds. in respect of seeds and pulses), spices, nuts and dried fruits, gur, ghee, butter, vegetables, edible oils including hydrogenated oils (in quantities exceeding two seers and not exceeding 20 Mds. in respect of edible Hydrogenated oils only), sweetmeats, flesh, fish, charcoal and fuel wood, except in such of these articles as are packed and sold in packets or tins of containers indicating quantities in pounds, cwts. and tons.

(ii) The Bullion Tola of 180 grains. Multiples 2, 3, 4, 5, 10, 20, 30, 50, 100, 200, 300, 500, 1,000 and 2,000 and sub-multiples ½, ¼, ⅛ and 1/16 of a Tola.
The Val = 1/40 of Tola = 4.5 grains.
Sub-multiples ½ and ¼ of Val.

(iii) The Rati = 1/62 of Tola. Multiples 2, 3, 6, 12, 24, 48, 72, 120, 240 and sub-multiples ½, ¼, ⅛, 1/16, 1/32 and 1/64 of Rati.

(iv) The dram is equal to 1/16th part of an ounce or 1/256 part of a lb. Sub-multiples ½, ¼, ⅛ of dram and multiples 2, 4, 8 drams.
The grain and sub-multiples .01, .02, .03, .05, .06, .1, .2, .25, .3, .5, .6 and multiples 2, 3, 4, 5, 6, 8, 10, 12, 16, 20, 24, 30, 48, 50, 60, 72, 100, 120, 240.

(v) (APOTHECARIES)
Apothecaries ounce equal to 8 drachm or 480 grains.
Apothecaries drachm equal to 60 grains.
Sub-multiples 1/16, ⅛, ¼, ½ and multiples 2, 4, 6, 8 and 10 apothecaries oz. The Scruple equal to 1/3 drachm or 20 grains.
Sub-multiples ½ and multiples 2 of Scruple.

Note.—Apothecaries weights from 10 oz. to 1 oz. should be marked "Apoth".

Dry measures—

(i) The Bombay Seer.
The sub-multiples ½, ¼ and ⅛ seer.
The Bombay Chatak = 1/16 seer.
The Adpao = ¼ seer.
The Adholi = 2 seers.
The Bombay Payali of 4 seers.
The Bombay Maund of 16 payalis.
The Bombay Map of 2 maunds.

(ii) Sub-multiples 1/32 seer.
Sub-multiples ½, ¼, ⅛, ½ of Bombay Maund.

Liquid measures—

(i) The Bombay Seer.
The sub-multiples ½, ¼, ⅛ and 1/16 seer.
The multiples 2, 4 and 8 seers.
The Imperial Gallon.
The Pint = ⅛ gallon.

(ii) Sub-multiples 1/32 and 1/64 and multiples 10, 20, 30 and 40 seers.
The maund = 40 seers.
Sub-multiples ½, ¼, ⅛ and multiples 2, 4, 5, 8, 15, 16, 20, 25, 40, 50, 100 and 200 of Imperial Gallon.
The Gill = ¼ pint.
Sub-multiples ½, ¼, ⅛ and multiples 2, 4, 8, of Pint and Gill.

(iii) Liquid measures (For Road Tank Vehicles used as Measures)—
All multiples of Imperial Gallon.

(iv) APOTHECARIES—
Fluid oz. = 1/160 Imperial Gallon.
Fluid drachm ⅛ Fluid oz.
Minim = 1/60 Fluid drachm.
All measures of capacity from 40 fluid oz. down to a half-fluid oz.
All measures of capacity from 16 fluid drachm down to a half-fluid drachm.

(v) All the measures of capacity from 60 minims down to 1 minim.

(vi) The liquor dram = 1/48 of Imperial Gallon.
Sub-multiples ½, ¼ and multiples 2, 4, 8, drams.
The Peg = 2 fluid oz. or 1/80 Imperial Gallon.
Sub-multiples ½ Peg.

Length—

(i) The Yard.
The Inch = 1/36th yard, and
The Foot = ⅓rd yard,
The Furlong of 220 yards.
The Mile of 1,760 yards.

The yard is that unit of length which is exactly equal to the certified yard kept in the custody of the Mint Master, Bombay.

(ii) Sub-multiples ½ of the Yard.
Multiples 2, 3, 4, 5, 6, 7, 8, 9, 10, 20, 25, 33, 50, 66, 100 of the Foot.
Multiples 6, 18, 30, 42, 56, 66 and 100 all sub-multiples of the Inch.

Area and volume—

(i) The Square Yard, Square Foot and Square Inch.
The Cubic Yard, Cubic Foot and Cubic Inch and sub-multiples of a Cubic Inch.
The Anna of ½ of the guntha.
The Guntha of 121 square yards and the acre of 4,840 square yards for land measurement.
The Square of 100 square feet.
The Brass of 100 cubic feet.

(ii) Sub-multiples ½, ¼ and ⅛ of Brass.

HISTORICAL BACKGROUND

As mentioned above, weights and measures in India have never been standardised. As a consequence numerous systems exist resulting in a confusing state of diversity, significant variations occurring from village to village sometimes in the same district. Attempts at standardisation date as far back as 1801. Since then the Central and the Provincial Governments have appointed several committees, at different times; notable among these are the committees appointed by the Government of India in 1867-68 and in 1913-14. But the results achieved did not go beyond the Regulation VII of 1833 which fixed the weight of the Furrukhabad rupee at 180 grains English weight, the Government of India resolution of November 1854 which fixed the standard railway maund at 40 seers (82 2/7 lb.) and the Measure of Length Act of 1889 which fixed the imperial yard with its subdivisions in feet and inches as the primary unit of length.

The Committee of 1867-68 recommended the adoption of the English Standards of weights and measures with, however, a strong note of dissent from three of its members who recommended the metric system. The Government of India accepting the minority note of dissent, passed the Indian Weights and Measures Act of 1870 which defined the kilogramme as the

standard of weight. The Act was, however, refused sanction by the Secretary of State on the ground that it was too severe and extensive. The Government then modified the Act, still keeping the unit of weight, the seer, equal to the kilogramme, and reintroduced it in August 1871 (Act XXXI of 1871). But even this amended Act has remained a dead letter in the statute book, since no notification has ever been issued under it.

The Committee of 1913-14 made an extensive survey of all attempts at standardisation of weights and measures since 1801. In their deliberations, the Committee issued two questionnaires, ascertained the views of all Provincial Governments and examined witnesses from Chambers of Commerce, leading citizens, merchants and traders. They made definite recommendations for the adoption of a standard system which they based on a combination of the Indian and the English systems. One of the three members, Mr. A. Y. G. Campbell, however, submitted a strong note of dissent recommending that it was eminently desirable that the Government should take steps without further delay to constitute the metric system as the uniform system of weights and measures in India.

The report of the 1913-14 Committee met with the approval of the Central as well as the Provincial Governments. The Government of India, however, decided to adopt standards of weights only and not of length or area. They further felt that the enforcement should, for the time being, carried out under Provincial Legislations till such time as a strong opinion for central legislation was formed.

In the Government of India Act of 1935, though 'standards of weights' is a central subject, 'weights and measures' is in the Provincial List. Accordingly the Government of India had to request the Provincial Governments to undertake legislations for enforcement, following the lead given in the Act IX of 1939. In the present constitution this ambiguity has been set right by including '*establishment of standards of weights and measures*' in the Union List of subjects and '*weights and measures except establishment of Standards*' in the States List.

The Government of C.P. in 1928 and the Government of Bombay in 1932 had already enacted legislations on weights and measures. As a result of the request from the Government of India, other provinces, except Bengal and Assam, also passed similar Acts. The position of the Provincial Legislations, as it stands now, is as follows:

ASSAM	.. ..	No Act on weights and measures.
BIHAR	.. ..	Weights Act, 1947 (Act XVII of 1947).
BOMBAY	.. ..	Weights and Measures Act, 1932 (Act XV of 1932).
M. P.	.. ..	Weights and Measures Act, 1928 (Act II of 1928).
MADRAS	.. ..	Weights and Measures Act, 1948 (Act XXII of 1948).
ORISSA	.. ..	Weights and Measures Act, 1943 (Act VII of 1943).
PUNJAB	.. ..	Weights and Measures Act, 1941 (Act XII of 1941).
U. P.	.. ..	Weights and Measures Act, 1947 (Act XXIII of 1947).
WEST BENGAL	..	No Act on weights and measures.

The various Provincial Legislations generally conform to the Central Legislation with a few exceptions. The unit for the measure of length is usually the yard, defined as the length of the standard yard maintained by the Mint Master at Bombay. For longer measures, the furlong (220 yards) and the mile (1,760 yards) are provided; for measures of area and volume, square and cube of the standards of length; acre (4,840 sq. yd.) being additionally allowed for area. Local units for dry and wet measures of capacity, which vary from province to province, are also allowed in the provincial Acts, but they are usually made integral multiples or submultiples of the basic units.

By the time the Government of India passed the Act of 1939, unofficial opinion in the country grew more inclined to the adoption of the metric system on an all-India basis. In 1940 the Manufacturing Sub-committee of the National Planning Committee, in their interim report, made the following recommendation:

"Standardisation of weights and measures on All-India basis should be carried out at an early date so that a uniform system of weights and measures is applicable to the whole country. If other conditions permit, the metric system should be adopted for this purpose."

The Indian Science Congress Association at its Bangalore session in 1946 passed a resolution strongly advocating the decimalization of currency and weights and measures, simultaneously if possible. The matter was further considered at a meeting of the Executive Committee of the Indian Science Congress Association held on March 8, 1946 and presided over by Mr. Jawaharlal Nehru, and the following resolution was passed unanimously:

"Resolved that the Science Congress notes with satisfaction that a Bill for the decimalization of Indian Currency has been introduced in the Legislative Assembly. The Science Congress is, however, of opinion that decimalization of currency alone is not enough, and considers the decimalization of weights and measures on the basis of the metric system to be equally urgent."

By a resolution of February 1947, the Government of India requested the Provincial Governments to take up the question of adopting the metric system of weights and measures.

Meanwhile in 1946 the Government of India by a resolution dated 3rd September, had decided to establish the Indian Standards Institution, with the stated object, *inter alia*,

"to consider and recommend to Government of India, national standards for the measurement of length, weight, volume and energy."

I.S.I. REPORT

The Indian Standards Institution, inaugurated in February 1947, immediately undertook to make a study of the weights and measures, and a special Committee was soon appointed.

The Committee issued a questionnnaire, examined the problem at length, and published its recommendations in a report which, after being adopted by the General Council of the I.S.I. was submitted to the Government of India for necessary consideration and decision. No decision, however, has so far been taken on it.

The systems of weights and measures in use in India are as numerous as they are complicated. This diversity is the source of many fraudulent practices in trade. The need for standardisation has always been felt and attempts date as far back as 1801. The results achieved so far are, however, meagre.

The special committee on weights and measures set up by the Indian Standards Institution in 1950 to recommend ways and means for terminating this wasteful diversity, finds a solution in the adoption of the metric system. The report of the special committee, which is unanimous, was issued in 1951 by the Indian Standards Institution in a special publication.

Based on a country wide concensus of opinion of scientists, technologists, industrialists and Government departments, the Committee's recommendation for the adoption of the metric system envisages a change-over in three stages extended over a period of about 15 years. A preparatory stage of three to five years for intensive dissemination of information on the new system, would be followed by a change-over stage of about the same period and a final stage for over-all transition. After that period, the only system accorded legal recognition would be the metric system.

For the implementation of the Committee's recommendation, the report stresses the need for early Central legislation for the recognition of the metric system and the creation of an agency to co-ordinate all related measures for the change-over. The introduction of decimalised currency is also recommended in the early stage of the change-over.

In regard to the nomenclature of the new system, the report records the view that the international nomenclature should be used, unless Parliament decides to have an Indianised system. In the latter contingency, however, it has been advised to avoid the use of the existing names, such as seer and guz for kilogramme and metre.

The report traces the historical background of the movement for standardisation of weights and measures since 1801. A brief summary of the proceedings of the Committee at its three sessions and the views of various organisations elicited in reply to a questionnaire issued by the Committee are also included in an appendix.

(Copies of this Report could be had from the Secretary (Administration), Indian Standards Institution, 19, University Road, Civil Lines, Delhi.)

INDIAN STANDARD TIME

FOR many years Indian time was in a state of chaotic confusion. What was called Madras or Railway time was kept on all the railways; and each great centre of population kept its own local time, which was not based on any common scientific principle and was divorced from the standards of all other countries. It was with a view to remedying this confusion that the Government of India took the matter up in 1904, and addressed the Provincial Governments and through them all local bodies, a long letter which reviewed the situation and made suggestions for the future.

The Government pointed out that the Madras local time kept on all railway and telegraphic lines is not useful. So the timing arrangement was completely altered for international scientific purposes in India. This was done in such a manner as to bear a simple and easily remembered relation to Greenwich time.

It was proposed, therefore, by the Government of India, to put on all the railway and telegraph clocks in the country by 8m. 50s. This represented a time 5½ hours faster than that of Greenwich, which would be known as **Indian Standard Time;** and the difference between standard and local time at the places mentioned below were approximately as follows, the figures representing minutes, and F. and S. meaning that the standard time is in advance of or behind local time respectively.—Dibrugarh 51 S., Shillong 38 S., Calcutta 24 S., Allahabad 2 F., Madras 9 F., Bombay 39 F.

Sometime in 1905-1906 the railway and telegraph clocks in India were put at Indian Standard Time. What had come to be known as the "Battle of the Clocks" raged in the Bombay Municipal Corporation for many years, ending ultimately in the defeat of the "no-changers" in January 1950, when Municipal clocks were put forward by 39 minutes—the difference between Bombay time and Standard time. Standard time is now universal in Bombay, except in Hindu temples and Parsi Fire temples.

The Bengal Government decided from October 1, 1941, to move forward their clocks by 36 minutes. Bengal time therefore became an hour ahead of Indian Standard Time and 36 minutes ahead of Calcutta local time. This was followed by the Indian Standard Time also being advanced by one hour with effect from September 1, 1942, making it 6½ hours ahead of Greenwich Mean-Time. With the end of the Second World War the old Indian standard time was restored with effect from 2 a.m. on October 15, 1945.

METEOROLOGY

THE all-important fact in the meteorology of the sub-continent is the alternation of the seasons known as the summer and winter monsoons. During the winter monsoon the winds are of continental origin and hence, fine weather, clear skies, low humidity and little air movement are the characteristic features of this season. The summer rains cease in North-West India and Western Pakistan by about the middle of September after which cool westerly and northerly winds set in over that area and the weather becomes fresh and pleasant. These fine weather conditions extend slowly eastward and southward so that by the end of October, they embrace all parts of the sub-continent except the southern half of the Peninsula, and by the end of the year have extended to the whole land and sea area, the rains withdrawing to the Equatorial Belt. Thus the characteristics of the cold weather from October to March over the sub-continent are:—westerly winds of the temperate zone over the extreme north; to the south of these the north-east winds of the winter monsoon or, perhaps more properly, the North-east Trades and a gradually extending area of fine weather which, as the season progresses, finally embraces the whole land and sea area.

Two exceptions to these fine weather conditions exist during this period, *viz.*, the Madras State and North-West India and Western Pakistan. In the former region the north-east winds which set in over the Bay of Bengal in October coalesce with the damp winds of the retreating summer monsoon, which current curves round over the Bay of Bengal, and blowing directly on to the Madras coast gives to that region the wettest and most disturbed weather of the whole year, for while the total rainfall for the four months June to September, *i.e.*, the summer monsoon, at the Madras Observatory amounts to 14.72 inches the total rainfall for the three months October to December amounts to 31.45 inches. The other region in which the weather is unsettled, during this period of generally settled conditions, is the north-west. This region from December onwards is traversed by a succession of shallow storms from the west. In normal years in the north periods of fine weather alternate with periods of disturbed weather (occurring during the passage of these storms) and light to moderate and occasionally even heavy rain or snow occurs.

These two periods of subsidiary "rains" are of the greatest economic importance. The fall in Madras is, as shown above, of considerable actual amount, while that of the north-west though small in absolute amount is of the greatest consequence as on it largely depend the grain and wheat crops of the north.

THE SOUTH-WEST MONSOON

It is now necessary to trace the changes which occur and lead up to the establishment of the south-west monsoon. The sun at this time is progressing slowly northward towards the northern Tropic. The temperature increases rapidly and barometric pressure diminishes, owing to the air rising and being transferred to neighbouring cooler regions—more especially the sea areas. Thus we have the southern Trade circulation extending northward and the local land and sea circulation extending southward until about the beginning of June the light unsteady interfering circulation over the Arabian Sea finally breaks up, the immense circulation of the south-east Trades, with its cool, moisture laden winds rushes forward, becomes linked on to the local circulation proceeding between the land area and the adjacent seas and the sub-continent is invaded by oceanic conditions—the south-west monsoon proper. This is the most important season of the year as upon it depends the prosperity of at least five-sixths of the people.

When this current is fully established a continuous air movement extends over the Indian Ocean, the seas and the land area from Lat. 30° S. to Lat. 30° N. the southern half being the south-east Trades and the northern half the south-west monsoon. The most important fact about it is that it is a continuous horizontal air movement passing over an extensive oceanic area where steady evaporation is constantly in progress so that where the current enters the seas and flows over the land it is highly charged with aqueous vapour.

The current enters the Indian seas by the end of May and in the course of the succeeding two or three weeks spreads over the Arabian Sea and Bay of Bengal. It advances over the sub-continent from these two seas. The Arabian Sea current blows on to the west coast and sweeping over the Western Ghats prevails more or less exclusively over the Peninsula, Central India, Rajasthan and North Bombay. The Bay of Bengal current blows directly up the Bay. One portion is directed towards Eastern Pakistan and Assam while another portion after meeting the Himalayas gets deflected and blows as a south-easterly and easterly current right up the Ganga plain.

DISTRIBUTION

The south-west monsoon continues for three and a half to four months, *viz.*, from the beginning of June to the middle or end of September. During its prevalence more or less general though far from continuous rain falls throughout the sub-continent, the principal features of the rainfall distribution being as follows. The greater portion of the Arabian Sea current, the total volume of which is probably three times as great as that of the Bengal current, blows directly on to the west coast districts. Here it meets an almost continuous hill range, is forced into ascent and gives heavy rain alike to the coastal districts and to the hilly range, the total averaging about 100 inches, most of which falls in four months. The current after parting with most of its moisture advances across the Peninsula giving occasional uncertain rain to the Deccan and passes out into the Bay where it coalesces with the local current. The northern portion of the current blowing across the Gujarat, Kathiawar and Sind coasts gives a certain amount of rain to the coast districts and frequent showers to the Aravalli Hill range but very little to Western Rajasthan.

The part of the monsoon current over the southern half of the Bay of Bengal which advances sufficiently far northward to blow over Bengal and Assam gives very heavy rain to the low-lying districts of Eastern Pakistan and immediately thereafter coming under the influence of the Assam Hills is forced upwards and gives excessive rain (perhaps the heaviest in the world) to the southern face of these hills. The remaining portion of the Bay current advances from the southward over Bengal, is then directed westward by the barrier of the Himalayas and gives general rain over the Ganga plain and fairly frequent rain over the lower ranges of the Himalayas from Sikkim to Kashmir.

To the south of this easterly wind of the Bay current and to the north of the westerly wind of the Arabian Sea current there exists a debatable area running roughly from Hissar in East Punjab through Agra, Allahabad and part of Chota Nagpur to Orissa, where one or the other current of the monsoon prevails. In this area the rainfall is conditioned by the storms from the Bay of Bengal which exhibit a marked tendency to advance along this track and to give it heavy falls of occasional rain. The monsoon rains are carried into North-West India and Western Pakistan by storms which form at the head of the Bay of Bengal and move in a north-westerly direction right across the country.

The total rainfall of the monsoon period (June to September) is 100 inches over part of the west coast; the amount diminishes eastward, is below 20 inches over a large part of the centre and east of the Peninsula and is only 5 inches in South Madras; it is over 100 inches in the North Assam Valley and diminishes steadily westward and is only 5 inches in the Indus Valley.

Cyclonic storms are an almost invariable feature of the monsoon period. In the Arabian Sea they ordinarily form at the commencement and end of the season, *viz.*, May and November, but in the Bay they form a constantly recurring feature of the monsoon season.

METEOROLOGICAL DEPARTMENT

The Meteorological Department has its headquarters in Delhi. Its functions comprise a service side and a scientific side.

(1) (A) The various interests to which weather service is rendered by the Department may be summarised as follows:—

(*a*) Aviation, Civil and Military.

(*b*) Shipping (Navy and Mercantile), Ports and Administrative authorities.

(*c*) Agriculture.

(*d*) Irrigation, Public Works (including Railways), Engineering, Industries and Forestry.

(*e*) Medicine and Public Health.

(*f*) The general public, including Commercial Bodies.

(B) The various duties of the Department may be summarised as follows:—

(*a*) Issue of short-range weather reports and forecasts, including warnings of storms, floods, frost, etc. to all the interests mentioned under (A) above.

(*b*) Issue of medium-range forecasts covering a period of 3 to 10 days.

(*c*) Issue of long-range (seasonal) forecasts of rainfall.

(*d*) The custody of the public memory for weather, *i.e.*, the preparation of daily, weekly, monthly and annual summaries of the various met. elements. This includes vast statistics of rainfall, prepared with the co-operation of State Governments.

(*e*) Compilation and publication of climatological information in the form of Tables, Handbooks and Atlases.

(*f*) Organisation and issue of time signals (*i*) for the public throughout the country, over the land-line telegraph system, and (*ii*) for shipping, through naval and coastal radio stations.

(*g*) Other miscellaneous duties, like computation of times of rise and set of sun and moon for various authorities and public bodies.

(2) The scientific functions of the Department cover the following subjects:—

(*a*) Meteorology in all its branches, including agricultural meteorology and meteorology of public health.

(*b*) Allied subjects like radiation, atmospherics, etc.

(*c*) Geophysics, and in particular terrestrial magnetism, earth currents and atmospheric electricity.

(*d*) Seismology.

(*e*) Solar Physics and Astrophysics, and in particular the relationships between solar and terrestrial phenomena.

Monsoon Rainfall Summary (1951).—The Monsoon arrived over most of the Peninsula and north-east India by about the normal date. However, it extended into the central parts of the country, Uttar Pradesh and north-west India only towards the end of June. During June and July the activity of the Bay branch of the monsoon was mostly confined to Assam, West Bengal and Orissa with the result that rainfall over the rest of north India was in moderate to large defect. The Arabian Sea branch of the monsoon was comparatively more active during this period; rainfall being normal or in excess over the Peninsula outside Gujarat where it was in moderate to large defect. In August and September the activity of the Arabian Sea branch diminished considerably and drought conditions prevailed in Gujarat, Saurashtra and Kutch and North Deccan (Desh) from middle of August onwards. The central parts of the country outside Madhya Bharat alone got good rain during the first half of this period. A break in the monsoon set in the last week of August and the monsoon had completely withdrawn from the country by the 21st of September.

The rainfall as a whole was in moderate defect over north-west India, east Uttar Pradesh, Madhya Bharat and Gujarat and in slight defect over north-east India outside Orissa, in west (Desh), north Hyderabad, Rayalaseema and Tamilnad. It was normal over the rest of the country. Taking the average over the plains of India, the rainfall was 17 per cent in defect.

FOREIGN POSSESSIONS IN INDIA

FRANCE and Portugal are now the only remaining European powers with territorial interests in India after the withdrawal of the British. Of these, Portugal was the first to establish a maritime Empire in Indian waters. France was one of the powers that disputed among themselves the Indian market on the partial eclipse of Portugal following the merger of that nation with Spain under Philip II in 1580.

FRENCH SETTLEMENTS

The French establishments in India, as defined by the Anglo-French treaties of 1814 and 1815, comprise an aggregate area of 203 square miles, with a total population of 323,295 according to the census of 1941. The establishments are:

(1) On the Coromandel Coast: (*a*) Pondicherry, the capital, together with the adjoining territory, divided into 8 communes, (*b*) Karikal and the dependent districts divided into 6 communes;

(2) On the coast of Orissa: Yanam, with the dependent villages; the lodge of Masulipatam and the garden Francepeth;

(3) On the Malabar Coast: Mahé with the adjoining territory; and the lodge of Calicut;

(4) In Gujarat: The *factory* of Surat.

Chandernagore in Bengal is the first French India possession to become *de jure* a part of the Indian Union after the treaty for its cession, signed in Paris in 1951 by the representatives of the two Governments.

A mixed French-Indian Commission has already been set up to examine the financial and monetary issues arising out of the transfer.

The main provisions of the Treaty are:

France transfers to India in full sovereignty the Territory of the free town of Chandernagore. French subjects and citizens of the French Union domiciled in Chandernagore will, on the coming into force of the Treaty, automatically become Indian citizens.

The French Government will transfer all State and public-owned property lying in the territory of Chandernagore to the Government of India. The latter will succeed to all the rights and obligations resulting from acts undertaken by the French Government.

The French Government will be allowed to remove, in consultation with the Government of India, such archives as have a general historical interest.

The Chandernagore Treaty was ratified by the French Assembly on April 11, 1952.

Negotiations in regard to the transfer of other French Indian possessions in South India have not yet reached a conclusive stage despite repeated efforts of the Indian Government to expedite a settlement.

On a suggestion of the French Government, the International Court of Justice appointed three neutral observers, two European and one Asian, to study conditions in the French Settlements in India and report back to the Court on the question of the feasibility of holding a referendum. They arrived in Pondicherry in March and submitted a report after investigation.

The observers' mission was to report whether conditions existed for a fair and free plebiscite in the French settlements. According to the Indian Government, the team reported that these conditions did not yet exist. In the light of this, it was unfair for France to blame the Indian Government for the delay in holding the plebiscite.

HISTORY

Long before the days of Louis XIV, efforts were made by the French to establish direct trade relations with India. In 1601, a Company of the St. Malo merchants fitted out two ships in an attempt to reach the East Indies. In 1604-9 followed the attempts of Henry IV who, emulating the example of the Dutch and the English, set up a French East India Company. In 1616, a French fleet sailed from St. Malo for the Moluccas while in 1619 the two so-called "fleets of Montmorency" sailed for Malaya and Japan.

Though these early efforts met with scant success, interest in Eastern trade was kept up by the success of French merchants and travellers in exploring the sea route by the Cape as well as the much shorter land route *via* the Levant and Asia Minor. In 1642 Rigault obtained from Cardinal Richelieu the privilege of sailing to Madagascar and establishing colonies and trade there. The charter granted to him led to the foundation of the La Compagnie d'Orient which was granted the monopoly of Eastern trade for 20 years, and to whose endeavours was due the establishment at Fort Dauphin, the first port easily accessible to ships sailing to and from India. On the accession of Louis XIV, the great minister Colbert, convinced that French maritime trade could best be promoted by means of joint stock companies, proposed and carried out the establishment of a national institution uniting all the resources of the country. This was the famous Compagnie des Indes Orientales. The King contributed three million *livres* free of interest from which were to be deducted all losses incurred during the first ten years, and the royal example was expected to be emulated by the nobles. The new Company was an official body. The King undertook to protect it and to escort its ships with his own men-of-war and granted it extensive powers, including the powers to fly the royal flag, depute ambassadors, enter into treaties with and make war on Indian princes, and in order to signify the great hopes he and his minister reposed in the venture, he also granted it arms and a motto *Florebo quocumque ferat.*

Thus equipped, the Company's fleet succeeded in occupying Madagascar and making Fort Dauphin the base of operations. It was not till 1668, however, that the ferat Comptoir or factory was founded at Surat by the Company's Resident Caron. At about this time, the Dutch, whose power had reached its apogee in Indian waters, canvassed with the Indian princes against these newcomers, and Colbert, urged by the Company's factors to give the Indian princes a "sample of their master's power", despatched a squadron of 10 vessels under De La Haye with instructions to establish the French position firmly in India and also neutralise the propaganda of the Dutch by inspiring the Indian princes with a high opinion of the power as well as the justice of His Majesty. In the course of his expedition, De La Haye secured for the French the grant of Trincomalee from the King of Kandy, but failed to engage the Dutch fleet which had securely established itself in Trincomalee Bay. The result was that no sooner had the French squadron quitted the bay, than the Dutch seized the handful of men who had been left behind and took possession of Trincomalee, ejecting the French from Ceylon. De La Haye, however passed over to the Coromandel coast where he conquered St. Thome, a Portuguese position in the neighbourhood of Madras, which had ten years earlier been taken by the King of Golconda. At St. Thome the French expeditionary forces were besieged for two years. It was then that Bellanguer de Lespenay sent to Porto Novo to seek from the rival government of Bijapur provisions for the besieged, obtained from Sher Khan Lodi, the Governor, in addition to munitions and victuals, a site for a factory in a fishing village Pondicherry, which the Danes had previously occupied and abandoned.

The city of Pondicherry was founded by Francois Martin who devoted himself wholeheartedly to its fortification and embellishment. But the Dutch, who had sworn to drive the French out of India, attacked and took it in 1693. Convinced of the decided superiority of their arms, they, too, gave themselves to beautifying the city and improving its defences certain that it would never be restored to the French. But in 1697 by the treaty of Ryswick, the French obtained the rendition of the settlement, and the Dutch had to rest content with the compensation of 16,000 pagodas which they were paid in return for the improvements they had effected. In the time of Dumas, the next governor, Pondicherry was attacked by the Marathas under Raghoba, fresh from their victory over the Portuguese at Bassein, but was defended successfully.

In 1746 while France and England were ranged on opposite sides in the War of the Austrian Succession in Europe, the French forces captured Madras and in retaliation an English squadron tried to seize Pondicherry only to be repulsed with heavy losses by Dupleix, the Governor-General. Fortune however, was not so partial to French arms in India during the Seven Years' War when France and England were again fighting on opposite sides. In the course of hostilities again the French commander Lally took Madras which was given to pillage and rapine. He also took and demolished Fort St. David near-by. But it was not long before the tide turned and the French were forced to capitulate at Pondicherry in 1761. The English took the town and wreaked vengeance by razing it to the ground with its fortifications, walls, and buildings. Simultaneously too France lost to the English all her other possessions in India. She secured their restoration at the Peace of Paris, which settled the disputes of the Seven Years War.

During the American War of Independence, France having made common cause with the rebel colonies against England her possessions in India were, again, seized by the English and remained in their possession till they were restored a second time by the Peace of Versailles, in 1783.

For yet a third time the French Settlements were seized by the English in 1793 during the Revolutionary and Napoleonic wars. They were ordered to be restored after the Peace of Amiens in 1802. But with the renewal of the war in 1803 the restoration of the settlements which had been retained by Lord Wellesly was cancelled. They were finally restored to France for the last time in 1816-17.

Chandernagore was acquired by the French in 1688 from the Delhi Emperor; Mahé was seized in 1725-26; Karikal was secured in 1739 under a grant from Chanda Sahib and Yanam was seized in 1750 and formally taken possession two years later.

COMMERCE AND INDUSTRIES

Domestic commerce is insignificant as the area is too small. The chief crops are rice, groundnuts, peas, lentils, vetches, onions and other vegetables, betel, indigo, sugarcane bananas and other fruits, coconuts and oleaginous grams. The major portion of these products is consumed in the districts themselves the only markets being the towns of Pondicherry, Karikal Yanam, Mahé and Chandernagore.

The chief exports are oil-seeds which are sent from the ports of Pondicherry and Karikal The imports are mainly manufactured goods textiles and luxury articles from France and the countries on the Continent.

There are at Pondicherry 3 cotton mills and at Chandernagore 1 jute mill. The cotton mills have in all about 2,000 looms and 86,000 spindles giving employment to some 7,000 people Besides these there is one oil factory, several oil presses for goundnuts and one ice factory.

There is a Chamber of Commerce elected by the leading merchants at Pondicherry.

The only bank is La Banque D'Indochine, which caters for the needs of merchants and traders in the locality.

Pondicherry is served by the Messageria Maritimes whose ships sail monthly from France to Indo-China and by the steamers of the B.I.S.N. Co. plying fortnightly between the East Coast ports and the Straits Settlements. A railway line also connects Pondicherry with Villupuram, a junction on the Southern Railway.

The Customs Union which was established as a result of negotiations with the Government of India in 1941 expired in 1948 and has so far not been renewed.

At Pondicherry alone, there are at present, besides the Law School, and the Medical College, one undenominational college for secondary education, one secondary school, 5 public institutions for higher primary education, four schools preparing students for English examinations, fifteen public schools for boys, eighteen public schools for girls and twenty-nine co-educational, all imparting primary education.

PONDICHERRY

Pondicherry is the chief of the French settlements in India and its capital is the seat of the Government. The city is situated in the district of South Arcot in Madras State, about 89 miles from Madras. It is divided by a canal into two parts, the Ville Blanche (or white city) and the Ville Noire (the dark city). The Ville Blanche is towards the east, on the seashore, and has a European appearance, the streets being broad and spacious, laid at right angles to one another. Numerous public buildings and charming hotels, magnificently laid out with courtyards and embellished with gardens and venetians, all in the Louis XIV style give the city an original and pleasing architectural aspect.

There is no harbour, but only a roadstead which is the best on the entire coast. Ships lie at a distance from the shore and contact with and is maintained by means of the usual *masula* boats peculiar to this part of South India. There is a pier to facilitate the loading of ships. With a view to enhance its value in loading and unloading cargo, the pier has been extended for about 265 ft. giving it a total length of about 1,105 feet. Pondicherry is well placed as a centre of tourism, being but a few hours' motoring distance from the main beauty spots of South India, such as the famous fortress of Ginji, the Seven Pagodas of Mahabalipuram, the temples of Chidambaram, Tiruvannamalai, Vellore and the city of Madras.

KARIKAL

Karikal is situated in the Tanjore District, and consists of a single tract of territory stretching along the east coast between Tranquebar and Nagore. It is at a distance of 90 miles from Pondicherry. It covers an area of 53 sq. miles and is divided into 6 communes containing 110 villages. The soil is very fertile and is watered by eight tributaries of the River Cauveri, which by the periodical floods adds to the fertility of the land. The five canals with their ramifications complete the irrigation system. Karikal is the terminus of a line from Karaikal on the Tanjore District Railway. The establishment has a population of 60,555, according to the 1941 census.

YANAM

The town is situated in the delta of the Godavari covering an area of 5 miles and is an enclave of the District of Godavari in Madras State. It is bounded on the south by the Godavari river and on the north by the River Coringa. The Godavari falls into the sea 2 miles from Yanam. As the mouth of the river is blocked the approach to Yanam is made by the River Coringa. The soil is fertile, and supports a population of 5,711.

MAHÉ

The territory of Mahé on the west coast consists of the town of Mahé on the left bank of the river of the same name; and the isolated district of Nalutara on the right bank containing the 4 villages of Chambara, Chalakara, Palour and Pandaquel. It lies within the District of Malabar in Madras State, and covers an area of 26 sq. miles. The river is navigable by boats of 20 to 25 tons for a distance of one to two miles in the interior.

The entrance of the river of Mahé is blocked by rocks, and the bar is dangerous except in very smooth water. An estimate in 1941 gave the population as 14,092. Rice is grown where water is plentiful.

ADMINISTRATIVE PERSONNEL

Commissioner of Republic: M. A. Menard.
General Secretary: M. C. J. Cahouilly.
Chief Secretary: M. J. Bellat.
Chief Justice: M. Ch. Callier.
Chief of Education Department: M. Sivaradjam.
Chief of Political Affairs Office: K. Loganadin.
Chief of Economic Affairs: Pierre Kresser.
Administrator of Mahé: M. Pascal.
Administrator of Karikal: Rene Boucheny.

PORTUGUESE SETTLEMENTS

Goa, Daman and Diu are all that remains to-day of Portugal's once vast and glorious maritime empire in the east. In its heyday it extended over a coastlength of thousands of miles from Aden on the Red Sea to Macau and Timor in the Far East. But after the annexation of Portugal by Spain in 1580 Portugal lost, one by one, her bastions, Aden, Ormuz, Bassein, Chaul, Ceylon and Malacca; and, shorn of their splendour, these three remnants of her supremacy on the seas constitute desolate mementoes of an age that is past.

All the three settlements are situated within the State of Bombay. Goa is on the Konkan Coast; Daman, along with the small territory of Pragana-Nagar-Avely lies on the Gujarat coast at the entrance to the Gulf of Cambay; and Diu is a tiny islet and along with the isolated spots, Gogola and Simbor lies on the southern fringe of the Saurashtra peninsula. All together, they constitute what is styled under the new Portuguese Constitution the *Estado de India Portuguesa.* They cover an aggregate area of 4,240 square kilometres and comprise a population of 624,177 inhabitants, according to the last census held in 1941.

HISTORY

The genesis of Portugal's "adventure in the East" is to be found in the establishment by Prince Henry the Navigator of his school of navigation at Sagres in the middle of the 15th century. Following up the exploratory achievements of his predecessors who set out from here, Vasco da Gama landed at Calicut on the 20th May 1498. Within a decade the Portuguese, waging constant wars against the Arabs, Negroes, Ethiopians, Persians and Turks had succeeded in establishing themselves firmly at strategic points on either side of the Arabian Sea which they had converted into a home lake.

Alphonso de Albuquerque, who succeeded da Gama and other captains sought not merely to fix the broad limits of the Portuguese power but to lay and stabilize the foundations of an ambitious empire. Goa, which by reason of its ideal geographical position was at this time a flourishing and opulent trade centre, appeared to him indispensable for the realization of his dreams. This was to be the centre of all commercial and imperial activity, and along with Ormuz, the naval base at the head of the Persian Gulf commanding the approaches to the Red Sea and Malacca, another bastion in the East Indies, controlling the spice trade, would ensure the security of the vast maritime empire, opening up at the same time perspectives of fresh conquest in the Far East. Political conditions in India assisted these schemes and helped in the establishment of a regime of protectorates over the warring rajas who vied with one another to put themselves under the protection of the *feringhi* flag. Albuquerque easily annexed the city and island of Goa which was ruled by the Adil Shahis of Bijapur in 1510 with the aid of the Vijayanagara admiral Timoja, and gradually consolidated the Portuguese sway over the land.

In 1546, dissentions broke out in the Adil Shahi family still ruling at Bijapur. Prince Meale Khan, one of the contestants for the throne called in the assistance of the Portuguese, who at the close of hostilities remained with the territories of Salcete and Bardez. These, together with the city and island of Goa make up what is known as the *Velhas Conquistas* or old conquests. The *Novas Conquistas* or new conquests comprising the rest of the present day Goa territory were acquired at various times after 1745.

In 1521 a Portuguese sailing vessel was driven by storm on the shores of Daman. An expeditionary force was subsequently sent to conquer it under Nuno da Cunha. Taken from the Sultan of Cambay in 1529, it was reconquered by that potentate but was finally ceded to the Portuguese in 1556.

In 1535 Bahadur Shah, the Sultan of Gujarat, hard pressed by the forces of Humayun was compelled to come to terms with the Portuguese and ceded to them Salcette, Bassein, and the islands of Bombay, Karanja, Elephanta and Trombay along with rights to construct a fortress on the island of Diu.

The Portuguese power continued to prosper till the appearance of the Dutch and the English in Indian waters in the beginning of the 17th century. These powers contested the maritime supremacy of Portugal now weakened considerably by her union with Spain. In 1603 the Dutch blockaded Goa but were compelled to withdraw after a month. They returned to the blockade in 1610, this time assisted by the Muslim powers on land. In 1622 the English and the Shah of Persia joined forces to wrest the naval base of Ormuz. Then the Dutch seized one after another the other important possessions: Malacca in 1641, Ceylon in 1656, Quillon in 1661, Cranganore in 1662, Cochin and Cannanore in 1663.

RISE OF MARATHA POWER

With the rise of the Maratha power, Portugal suffered further losses in her domains. In 1683 Sambhaji invaded Bardez and Salcette and all but succeeded in taking the city of Goa itself, but was compelled to withdraw by an incursion of the Mughal forces into his own territories. It was on this occasion that the Portuguese Governor Count of Alvor, feeling that all was lost, placed himself under the protection of St. Francis Xavier and as a symbol thereof surrendered into the Saint's hands his staff of authority, so that when the Maratha armies withdrew it came to be believed that the Mughal armies had appeared on the scene at the right moment by the Saint's intercession. To this day, in grateful memory of this miraculous deliverance, every new Governor accepts the staff of office from the hands of the Saint where it is deposited by his retiring predecessor.

In 1739 the Maratha general Chimnaji Appa annexed the entire province of the north comprising Bassein and Salcette. Only Daman and the fortress of Diu were now left to them out of this vast stretch of territory.

During the Napoleonic Wars in Europe, the English under the pretext of protecting the Portuguese settlements from the French occupied them and their military forces continued there with brief interruptions till 1815 the year of Waterloo.

Since then the Portuguese have ruled undisturbed what was left of their empire in India, though there have been periodic revolts in Goa. The Ranes, a Rajput tribe who had manned the Maratha armies, rebelled repeatedly in Satari in 1852, 1871, 1895, 1901 and 1912 finally to be put down with great severity. In the 1871 and 1895 revolts, they were joined by the native garrisons. On the latter occasion the brother of King Carlos himself came to India to suppress the rebellion. The Ranes were defeated and broken up in 1912 and the pick of their youth deported to the African colonies where they perished. No further revolts have taken place in Satari.

The successes obtained by Indian nationalism have had their repercussions in Portuguese India. In 1946 a non-violent movement, with the object of securing civil liberties for the people was initiated in Goa under the leadership of the Indian Socialist leader Dr. Rammanohar Lohia. The *satyagraha*, however, proved ineffective and some of the political leaders were deported to the island of Peniche, near Lisbon, after being tried by a military Court at Panjim.

The Goan National Congress continued to agitate for the end of Portuguese rule in Indian Portuguese territory and pressed for the merger of that territory with India. The Goan representative in the National Assembly in Lisbon urged the grant of some sort of autonomy to the Portuguese possessions in India.

Early in 1950 the Government of India sent a note to the Portuguese Government in Lisbon, asking that the Portuguese possessions in India might be transferred to the Indian Union. It has also suggested a plebiscite under U. N. supervision if the Portuguese Government thought that the people were not for merger with the Indian Union. The Portuguese Government sent an official reply refusing to discuss the question of transfer of sovereignty at all.

Meanwhile the Portuguese Government issued a decree freeing all political prisoners by an amnesty. The Padroada system by which the Portuguese Government had rights of ecclesiastical patronage in India was also abolished. The Government have made a proposal to change the constitution by which the Portuguese colony is to be made a "Province of Portugal" granting it equal rights with other provinces.

GOVERNMENT

The advent of Dr. Oliveira Salazar to power and the establishment of his *Estado Novo* has led to increasing centralization in the administration of Portuguese India. All measures of importance must be initiated by and carry the sanction of the home government in Lisbon. The powers of the Governor-General are considerably reduced and his functions may now be said not to pass beyond supervisory and executive. The Governor's Council, *Conselho do Governo* which assists him, is shorn of what little legislative powers it formerly possessed and its functions are now purely advisory, the nominated majority being predominant in all deliberations. Local self-government has been all but abolished. There are no elected municipalities and local boards in the villages as in former days. Each municipality is in charge of an administrative committee nominated by the Governor-General, who also appoints the presidents of all charitable and cultural associations in the country. A stringent censorship controls the freedom of the press, and every article, book or pamphlet has to be submitted to the board of censors before it appears in print. Infringements of the press laws are severely dealt with and newspapers are required to keep security deposits with the Government before being licensed for publication. Freedom of association is likewise controlled. No public meeting or assembly, be its purpose ever so innocuous, may be convened without previous permission of the authoritics, and every intended talk and speech must bear the censor's visa.

The Governor-General is the head of the administration and is stationed in the capital Cidade de Goa formerly known as Nova-Goa and also Panjim. Secretariats for Home and Political Services, Finance, Customs, Education, Military Forces, Navy, Agriculture, Health Services and Public Works assist him. There are also three Departments for Posts and Telegraphs, Survey and Fiscal of the West of India Portuguese Guaranteed Railway. Associated in the task of government is the *Conselho do Governo* possessing restricted legislative and advisory powers. The Governor-General is its *ex-officio* president. Five members are elected by means of a very exclusive franchise, three to represent the *Velhas Conquistas*, one the *Novas Conquistas* and one the districts of Daman and Diu. Five others are nominated to represent the minorities, agriculture, commerce and the press. Besides these, four officials, the Attorney-General, the Director of Finances, the Director of Civil Administration and the Director of Public Works sit at the Council's deliberations in their own right. Daman and Diu have each a District Governor.

In each district there is a District Council for the supervision of the various municipalities and other local bodies in its jurisdiction. For administrative purposes the district is divided into *Concelhos*, each *Concelho* being in the charge of an official styled the *Administrador*, and for judicial purposes it is divided into circuits or *Comarcas* each having its own court of original jurisdiction. An appeal lies from the decisions of these courts to the *Tribunal de Relacao* or High Court sitting in the capital and side by side with the latter there is also a *Tribunal Administrativo* to dispense justice under *droit administratif*.

The maintenance of law and order in the province of the *Comandante-Geral da Policia* with headquarters in the Cidade de Goa and having under him a descending hierarchy of various *Comandantes* and *Chefes de Policia* in the administrative sub-divisions. Each village or parish which is the smallest unit has its *regedor* corresponding to the Indian patel.

A striking feature of the rural administration is the continuance of the ancient Indian institution of the village community which has disappeared elsewhere in India. In places where the resistance to Portuguese domination has continued almost to our own day, as in the southern communes of Goa, Assolna, Cuncolim and Velim, the village communities were suppressed and their estates confiscated by the Government. But on the whole they have continued in operation.

The village community is an autonomous institution, socialist in its organization under which land is held in common by the original settlers of the village here called the *Gaunkares*, thus preventing concentration of land in the hands of a few and promoting a rough equality, while preventing the domination by privileged few. The management is vested in a committee elected by the constituents. The community undertakes various duties in regard to the maintenance of schools, roads, dispensaries, etc. and of religious services without distinction of creed. It is responsible to Government for land revenue and compounds all the taxes by a lump sum paid into the exchequer. It is subject to supervision by the *Administracao das Comunidades* and cannot spend moneys without Government sanction.

COMMERCE AND INDUSTRIES

The towns of Portuguese India though few in number, serve as commercial centres for their districts; but with a restricted road mileage across the frontiers and in the absence of means of transport away from the only railway line and the rivers, commercial activity is confined normally to the local markets, except in isolated instances as in the case of the town of Margao in Goa which lies at the centre of rail and road traffic converging from the various points of the district.

The chief agricultural products of Goa are rice, coconuts, cashew-nuts, betel-nuts, mangoes, and sugar-cane. Of these only cashew-nuts, betel-nuts, coconuts and mangoes are exported in any considerable quantities, the rice grown not being sufficient for local consumption. Other exports include copra, bamboos, salt, salt-fish and manganese ore. The only industries worthy of note are soap manufacture, tile manufacture, sugar and tinned food products and jaggery. The imports consist of rice, textiles and other manufactured goods, an unrestricted supply of which is just now available owing to the uneven situation created by the currency export regulations in force in the Indian Union, there being no such regulations in Portuguese India.

The economic situation in the territory has become very acute in the last few years. During the war, an artificial panic created by the Portuguese Government's decision not to accept any longer Indian Rupee notes in their offices gave rise to a flourishing blackmarket where Indian currency was exchanged for the local rupee at a fabulous discount, varying from 10 to 25 per cent. The scarcity of the essential consumer goods drove thousands of people abroad into India to earn their living and the majority of these have not returned to their homes, thus maintaining the uneven situation created by the war exigencies. There is a chronic adverse trade balance which is partly made up from the remittances from emigrants, numbering over a lakh, who earn their living in India, Pakistan, Africa and other parts of the Commonwealth.

Most of the trade of Portuguese India is with the Indian Union, Pakistan, Portugal, Portuguese African colonies and the countries of the Continent. Just at present, owing to the world currency situation, there is a glut of American goods on the market.

There are no banks operating in Portuguese territory with the exception of the Banco Nacional Ultramarino which has offices in the major towns.

A railway line maintained and run by the West of India Portuguese Guaranteed Railway Company, once a subsidiary of the Madras and Southern Mahratta Railway, joins the port of Mormugao with the junction of Londa on the Southern Railway. It fulfils a very important role by providing an outlet to the sea for the products of this part of the Mahratta country.

Mormugao, which is the chief port, is also one of the major ports on the west coast of India and is open to ocean-going vessels of every size from all parts of the world. It is used by the ships of the B.I.S.N. Co. Ltd., going south to Colombo and the ports on the east coast as also by ships bound for the East African ports. Mormugao is a port of call for every coasting ship of India's merchant fleet.

EDUCATION AND CULTURE

Primary education is free and compulsory in schools maintained by the State of which there is at least one in every village. There are at present some 200 primary schools controlled and administered by a Board of Primary Education, *Conselho da Instrucacao Primaria* with offices in the capital. In the Cidade de Goa there is a Lyceum for the study of Portuguese secondary education, a Normal School, and a Medical School. A Theological Seminary trains young men for the priesthood at Rachol. Over and above these, there are a number of English teaching High Schools run by private enterprise and by religious orders preparing students for the S.S.C. examination of the Bombay Government and the Entrance Examination of the University of Bombay.

There is in the capital the *Instituto Vasco da Gama*, a research association with an exclusive membership and its own research journal. The *Bibliotheca Nacional* houses what is perhaps one of the best libraries of rare books and manuscripts on the west coast of India while the *Arquivo* contain an inexhaustible wealth of hitherto unexplored historical material.

GOA

The territory of Goa lies between the parallels of 15° 48′ and 14° 30′ latitude north by 73° 40′ and 74° 19′ longitude east. It has the island of Angediva, once an important watering station for sailing vessels but now deserted, as a dependency at its southern extremity opposite Karwar.

The temperature varies between the highest mean of 90° F. recorded in April-May and the lowest mean of 70°-71° F. recorded in December-February. The year divides itself easily into two well distinguishable seasons: a dry season from October to the end of April, and a wet season from May to the end of September. The former is marked by land breezes and the latter by the south-west monsoon with almost incessant heavy rains from June to the middle of August.

The population of Goa is 624,177 according to the census of 1941. Of these Christians form roughly one half, the rest being Hindus and Muslims. The latter, who were once the rulers, and were actually responsible for the foundation of the Old City of Goa now in ruins, have dwindled into insignificance both in number and influence. Racially, the people belong to the Aryo-Dravidian stock, speaking Konkani, a language having close affinities with Gujarati and Marathi, but entirely different as regards inflection of words, grammatical construction and syntax.

The old social structure native to the Hindu society has persisted in spite of the influence of Christianity. The Goan Christians preserve the old castes and are proud to be the descendants of the ruling or priestly castes, Kshatriyas (Charados) or Brahmans (Saraswats). For the rest, they are completely westernized in their habits and mode of life.

Under the Portuguese regime and with the advent of western civilization, increasing numbers of Goans have left their homeland in search of better opportunities of earning a livelihood. Goans are to be found occupying responsible posts in all departments in India, Pakistan, Africa, the Far East and even Europe and America.

The capital, Cidade de Goa (formerly known as Panjim or Nova-Goa), is situated on the left bank of the Mandovi, on the site of an outpost of the Adil Shahs, one of whose residences is still being used as the Government Secretariat. Cidade de Goa is a charming city, laid out amidst the luxuriant vegetation of the river valley, and has a cosmopolitan population of 20,300 inhabitants. It possesses some magnificent public buildings, and elegant villas rise above the water-front. Some very good hotels, with excellent cuisine, western and Indian, cater to the needs of the tourist and the casual visitor. The port is visited by sailing craft and during the dry season coastal steamers call there regularly from Bombay and the intervening ports. There is also a ferry-boat that maintains hourly runs across the river to Betim and Verem on the other side for the benefit of people wishing to travel to Bardez and beyond.

Margao is the capital of Salcette. It is a thriving business centre lying midway between the port of Mormugao and the frontier on the railway line. It is served with many excellent arterial roads joining the various points in the district. It is also a centre of educational activity and possesses several English teaching convents and schools.

Vasco da Gama, another town, lies within two miles of Mormugao on the railway line. It is altogether a new city planned on modern lines and fostered by the Government's desire to promote the economic and industrial progress of the harbour, for which a special Department has been created with headquarters here. The only airport is within easy reach from here.

Old Goa, the old capital and the metropolis of the Portuguese Empire in the east is now deserted and in ruins. The only standing edifices are the Cathedral of Goa, the Basilica of Bom Jesus where the body of St. Francis Xavier is enshrined, and a number of other churches and convents, all of them magnificent examples of well known styles of classical European architecture. Every ten years the body of the Saint is exposed for public veneration and thousands of pilgrims from the world over crowd here, reviving for a few days the past grandeur of the city. The Government have recently drained and cleansed the place of the malarial scourge which was primarily responsible for its depopulation, and after inspection by a committee of international experts, the city is now used to quarter troops.

Calangute is a popular sea resort with a splendid sandy beach. In the hot weather months of March to May, the place becomes the haven of thousands of holiday-makers from all parts of Goa and the neighbouring places in the Indian Union.

Dud-Sagar is a magnificent waterfall, a regular cascade with milky white waters rushing down hundreds of feet from the heights of the Ghats. It lies on the railway line between Castle Rock, the last station in the Indian Union, and Collem.

Arvalem is another beautiful waterfall in Bicholim.

There are four major hospitals, the Hospital Central in the capital attached to the Medical School, the Hospicio de Sagrado Coracao de Maria in Margao maintained by a charitable trust, the Hospital of Ribandar run by the Santa Casa de Misericordia, another non-official charitable trust and the Asylo de Nossa Senhora de Milagres at Mapuca.

DAMAN

This remnant of the old province of the north lies between 20° 25′ 26″ latitude north and 72° 55′ 12″ longitude east in Gujarat. It also includes the two isolated enclaves of Drasa and Pragana-Nagar-Avely, lying to the south-east and crossed by the Daman-Ganga river.

The climate does not differ from that of Goa, the country forming part of the same littoral of Konkan. But on the whole it is pleasanter and the temperatures are lower than those of Goa. During the south-west monsoon Pragana has a healthier climate than Daman. The entire territory has a total area of 62 square miles and a population of some 60,000 inhabitants, mostly of Gujarati extraction. It is easily reached from Bombay by the Western Railway, being at a distance of 4½ hours' journey.

There are some very interesting historical relics here such as the old fort and a few surviving churches reminiscent of the old times.

DIU

About 150 miles to the north-west of Daman lies the tiny islet of Diu off the southern coast of Saurashtra, between 20° 42′ 50″ latitude north and 70° 59′ longitude east. It is a small town separated from the mainland by a narrow arm of the sea. Dependent on it and surrounded by the territory of Junagadh is the enclave of Gogola and also the island and fort of Pani Cota in the bay of Simbor.

Diu is reached from Bombay by the Western Railway *via* Viramgam and Delwada. Access by sea is easier and more rapid but there is no harbour. There is an excellent roadstead where ships can safely anchor in two fathoms of water.

The mean temperature is round about 70° F. and in winter it is very cold. The population is estimated at 19,731.

The Portuguese Government, with the co-operation of ecclesiastic authorities, has decided to have the Exposition of St. Francis Xavier in December 1952 and for this purpose the Lisbon authorities have sanctioned an expenditure of Rs. 20 lakhs.

Pilgrims from Portugal, Spain, Brazil, Ceylon and France are expected to visit Goa at the end of the year and about 50 Bishops and Archbishops from all over the world will be in Goa during the Exposition.

ADMINISTRATIVE OFFICIALS

Governor-General, Comandante Fernando Quintanilha Mendonca Dias.

Commander-in-Chief (*Comandante Militar*), Colonel Alexandre dos Santos Mayer.

Chief of Military Staff (*Chefe do Estado Maior*), Major Francisco Rafael Alves.

Commissioner of Police (*Comandante Geral*), Capt. José Manuel Nobre de Carvalho.

Director of Civil Administration (*Administracao Civil*), Dr. Domingos Carneiro Allen.

Director of Health (*Director de Serricos de Saude*), Dr. Antonio de Souza Sobrinho.

Director of Posts & Telegraphs, José de Oliveira Chaves.

Judges of the High Court (*Tribunal de Relacao*), Dr. Renato Gonsalves Pereira (Chief Justice); Dr. Antonio da Graca Miranda; Dr. Ferreira de Almeida; Dr. Antonio de Abreu Lobo.

Director of Finances (*Fazenda*), Dr. Vasco de Ferreira Martins.

Director of Statistics & Information Department (*Reparticao Central de Estatistica e Informacao*), Dr. Antonio Jose Lopes.

Director of the Customs Department (*Reparticao Central dos Servicos Aduaneiros*), Joao Loureiro de Carvalho.

Advocate-General (*Procurador da Republica*), Dr. Abrantes Amaral.

Director, Agriculture, Eng. Antonio F. C. Madureira.

Director of Surveys (*Agrimensura*), Eng. Bernardino Camilo da Costa.

Elected Members of the Governor's Council (*Conselho do Governo*), Vitola Visnum Sinai Dempó; Dr. José Luis Marcos de Silva Pereira; Adv. Antonio Avelar Barreto; Vassudeva Atmarama Porobo Dessai Desporobo.

Presidents of the Municipal Administrative Committee, Goa-Cap., Luis Pinto dos Santos Cardoso; Salcete, Dr. Alvaro de Loyola Furtado; Bardez, Dr. Antonio Pinto do Rosário; Mormugao, Dr. Roldao Henriques.

H. E. the Patriarch of East Indies, D. Jose da Costa Nunes.

Governor of Daman, Capt. Paulino de Magalhaes Correia.

Governor of Diu, Capt. Paiva Couceiro.

Indian Consul-General in Cidade de Goa, Vincent H. Coelho.

AKHIL BHARAT HINDU MAHASABHA

President : Dr. N. B. Khare.
Vice-Presidents : N. C. Chatterjee ; L. B. Bhopatkar ; Dr. Gokul Chand Narang ; K. Shivanandi Thevar.
General Secretary : Mahant Digvijai Nath.
Organizing Secy. : V. G. Deshpande.
Office Secy. : R. A. Kanitkar.

AIMS AND OBJECTS

The aim of the Hindu Mahasabha as enunciated in its constitution which has been amended on the basis of the resolutions adopted by its unofficial parliament at the meetings held at New Delhi on April 2, 1950 and at Nagpur on May 7, 1950, is the protection and promotion of all that contributes to the advancement, strength and glory of Hindu Rashtra, Hindu culture and Hindu polity, and as a means to that end, to achieve Hindu Raj and re-establish the integrity of the State of Bharat by constitutional means.

Besides the establishment of 'Akhanda Hindustan' the aims and objects of the Hindu Mahasabha as first adopted at a meeting of the All-India Council held in New Delhi on December 27, 1948, are defined as follows :

(1) The establishment of a really democratic State in Hindustan, based on the culture and tradition of the land ;

(2) The organisation and consolidation of all sections of the people into one organised whole ;

(3) The creation of a new social order in which all nationals will enjoy equal rights and opportunities and share equal responsibilities ;

(4) The assurance to each national of the dignity of human values and full freedom of thought, expression, association and worship ;

(5) The revival and promotion of the ancient Indian motto of plain living and high thinking, and the glorious ideals of Aryan womanhood ;

(6) Adoption of (Sanskrit-Nishta) Hindi as the national language and Devanagri as the national script of India ;

(7) Making of Hindustan politically, economically and materially strong and self-reliant ;

(8) Removal of all forms of social inequalities and disabilities ;

(9) Reclamation of all those who have left the Hindu fold and welcoming of others into the community ;

(10) Ending of gross inequalities in the distribution of wealth, assurance of a decent standard of living to each national, and securing for workers and peasants their rightful share in the economy of the country ;

(11) Industrialisation of the country as rapidly as possible ;

(12) Promotion of cow protection and abolition of cow slaughter ;

(13) Cultivation of friendly relations with other nations with a view to maintaining international peace and progress.

THE YEAR IN REVIEW

For the first time in its history, the Hindu Mahasabha decided to throw open the doors of its membership to non-Hindus in 1951. On the basis of the recommendations of a sub-committee of seven members representing different points of view, the open session of the Mahasabha held at Jaipur on April 28, 1951, adopted the following resolutions unanimously:

"In view of the fact that Bharat has become an independent and sovereign State and that the communal electorates have been eliminated from her Constitution ; the Akhil Bharat Hindu Mahasabha has been aiming at promoting good feelings between Hindus and non-Hindus in Hindusthan ; the object of the Mahasabha is to establish Akhand Bharat and to establish a really democratic Hindu State in Bharat based on the culture and traditions of the land ; and to organise and consolidate all sections of people into one organic whole and to establish a social order in which all the nationals will enjoy equal rights and opportunities and share equal responsibilities, this special session of the Akhil Bharat Hindu Mahasabha feels that the achievement of these objectives will be greatly advanced by association of non-Hindu citizens in the parliamentary sphere of its activities and by accepting their helpful and constructive co-operation. The Mahasabha hereby authorises its Working Committee to enlist the suffrage and support of non-Hindu citizens and to set up candidates wherever possible from amongst them, subject to their acceptance of the election manifesto of the Hindu Mahasabha."

The session was presided over by Mr. N. B. Khare. He emphasized the need for the establishment of what he termed "homogeneous nationalism" to make India "a well-knit, mighty Hindu nation."

As a step in the process of assimilation of "foreign elements" in Hindu society, he observed that there should be "responsive co-operation" among the people professing different religions even before the elections were held.

Other points raised were : Justice demanded that the ex-ruler of Kashmir, who signed the Instrument of Accession with the consent of his Chief Minister should be restored as a constitutional Rajpramukh. The recent deposition of the Maharaja of Baroda was "most cruel and unjust," as it was he who first took the bold step of acceding to the Indian Union. In contrast the Nizam of Hyderabad, who Dr. Khare alleged was in league with the Muslim League and who had connived at the Razakar atrocities and actually fought with the Indian Union, had been exalted as a Rajpramukh. Why then should the Congress feel offended if its secularism was defined as pro-Muslim and anti-Hindu ?

After the Instrument of Accession was signed, Dr. Khare said, no plebiscite was held either in Baroda or Jaipur or in any other State. The small State of Sirohi in Rajasthan was partitioned without any consent from anybody, and the portion, Mount Abu, was attached to Bombay State " to provide the State of Maha Gujarat in the making, with a hill-station."

"In Rajasthan," he stated, "the affairs are most intriguing. The administration is at present carried on by officers appointed by the States Ministry and complete autocracy is functioning."

Referring to Kashmir Dr. Khare said that the weak-kneed and imbecile policy of India towards Pakistan was responsible for the adoption of the latest resolution on Kashmir by the U.N. to appoint an arbitrator in the teeth of India's opposition.

Mr. Nehru had accepted the challenge offered by this resolution, and " the Prime Minister of India should declare the accession of Kashmir as final and await and meet any attack from Pakistan."

On this question, Dr. Khare affirmed, the Hindu Mahasabha would solidly stand behind him in spite of its ideological differences.

It was high time that India realised that international affinities and hostilities do not come about by mere pious wishes, but are dependent upon our inner strength and needs of the countries concerned. A country like India which has not got a strong army and which is begging from door to door for food can never hope to be a force in international politics.

In regard to the constitution amendment to the Constitution he observed that the Constitution had hardly functioned for a year and it was "most inopportune and indecent" to amend it in such "hot haste to preclude any possibility of interference by courts."

The trade agreement, entered into despite the undertaking that there would be no such trade until Pakistan devalued her rupee, would "fleece India to the tune of Rs. 50 crores annually."

The food question had not yet been solved because there was no policy, no plan and no organised action. The grow-more-food campaign had been a costly failure. Food prices were soaring, cloth prices were being increased by Government and on the top of this there was increased taxation of Rs. 50 crores. "How can the people bear this burden and have confidence in Government," Dr. Khare asked. A change of Government was essential and people should rally round the banner of the Hindu Mahasabha before the next elections.

Resolutions

The resolutions passed at the Conference relate to Kashmir, the Cooch-Behar firing, proposed amendments to the Constitution, the food situation in the country and the Government of India's policy towards princes.

The Mahasabha called upon Government to declare Kashmir " an integral part of India within the framework of the Indian Republican Constitution." The resolutions said that the continuation of the " Kashmir tangle was the result of the weak and vacillating policy pursued by the Indian Government."

The special session " strongly condemned " the proposed amendments to the Indian Constitution, particularly relating to the fundamental rights.

By another resolution the session criticised Government for their policy of discrimination " towards Indian princes."

The resolution demanded that the Government of India should adopt a " fair, equitable and uniform policy " in dealing with the princes.

The session also expressed concern at the " steadily deteriorating " food situation in the country and " impending famine " in parts of Bihar, Bengal and South India and asked Government to treat the present food crisis as a " military problem " and tackle it properly.

Mr. N. C. Chatterjee, Vice-President of the Mahasabha, moving the resolution protesting against the proposed amendment to the Constitution, said that it would be undemocratic to tamper with the fundamental rights.

He said that it was deplorable that within a short period of the promulgation of the Constitution steps were being taken to alter the fundamental rights, specially property rights and freedom of speech and expression.

Mr. Mahant Digvijai Nath, General Secretary of the Mahasabha, moving the resolution on Kashmir said that the original mistake of sending the Kashmir issue to the U.N. was a sequel to the policy of appeasement which was still being pursued by Government.

He warned Government against " the steady loss" of India's prestige in the international sphere and asked Government to take a bold stand by declaring Kashmir a part of India.

Mr. N. N. Das, of Bengal, moving the resolution on the Cooch-Behar firing said that the food situation in Cooch-Behar had been " very serious" and the extreme privation of the people compelled them to stage a procession of hunger marches.

Later the All-India Committee redefined the aim of the Mahasabha in order to clarify its original objective of the establishment of a Hindu State. The Committee explained that it was intended " to establish a really democratic Hindu State in Bharat, based on the culture and traditions of Hindu *Rashtra* and to re-establish Akhand Bharat (undivided India) by all constitutional means."

WORKING COMMITTEE MEETING

After the general elections the Working Committee met at New Delhi on March 1, 2 and 3, 1952 when the following resolutions were passed among others :

162459

"The Working Committee of the Akhil Bharat Hindu Mahasabha after giving its earnest and careful consideration to the reports received from various States is definitely of the opinion that the last general elections to the Parliament as well as to the State Legislatures were neither fair nor impartial and were vitiated by widespread and varied mal-practices which prevented the results of the elections from being a proper index of popular opinion.

"The Working Committee is definitely of the opinion that the failure of the Mahasabha to capture a sufficiently large number of seats is primarily due to the campaign of vilification carried on by Mr. Jawaharlal Nehru particularly in charging the Hindu Mahasabha with complicity in the assassination of Mahatma Gandhi."

(The Working Committee appointed a Sub-Committee consisting of Messrs. N. C. Chatterjee, Srikrishna Sharma (Rajkot), Ram Singh (Delhi), Vishwanath Agarwal (Lucknow) and R. A. Kanitkar (as Convenor) with a view to collecting further facts about these allegations and prepare a report for the consideration of the Committee and also to suggest improvements in the existing laws and rules governing the general elections).

"The Working Committee of the Akhil Bharat Hindu Mahasabha notes with indignation that the Pakistan flag was displayed and pro-Pakistani slogans were raised during the course of the general election in certain parts of Madras State, West Bengal and Hyderabad and that in spite of concrete evidence being available, no action has been taken against these open enemies of the State . . ."

"The Working Committee views with great concern and alarm the campaign of repression started by the Congress Government in Saurashtra against its political opponents particularly against those who fought in the last election against Congress candidates and many of whom are leading members of the Hindu Mahasabha on the plausible ground that they had conspired with a gang of outlaws and is of the opinion that this campaign is a prelude to further acts of repression against its political rivals and constitute a flagrant abuse of autocratic powers conferred upon the Government under the provision of the Preventive Detention Act. The Working Committee demands that these persons be placed on trial before a Court of Law without further loss of time or be released forthwith."

"Different versions of the recent happenings in Jammu city which led to lathi-charges, firing, promulgation of curfew order for 79 hours, handing over of the city to military control, calling the Punjab Police, arrests, detentions, externments, suspension of Hindu officers and continuance of the hunger-strike by the students till this day have appeared in the Indian press. It is said that the events have taken a very serious turn and even the very life of many hunger-striking students is in danger. The situation in Jammu and Kashmir is causing grave concern in the minds of Hindus all over India.

"The Working Committee is definitely of the opinion that thrusting of party flag of the National Conference on Jammu and Kashmir State and having a separate flag for the State along with the Union flag is against democracy and militates against the essential unity of Hindusthan.

"This meeting of the Working Committee is further of the opinion that the persecution of political parties for conducting just agitation for the complete integration of Jammu and Kashmir is against all cannons of civil liberty."

"The Working Committee of the Hindu Mahasabha has received reports of the nefarious activities of Pakistani agents in Adilabad District of Hyderabad State. The Working Committee notes with grave concern the utter neglect of these dangerous activities both by the State and the Union Governments and is simply shocked to learn that the local officials are being harassed and even punished for taking steps against these agents . . .

"This Committee deputes Mr. S. R. Date to make inquiries regarding the actual state of affairs and report to the Working Committee."

ELECTION MANIFESTO

The Mahasabha election manifesto was finalised only at the meeting of the Working Committee held at New Delhi on June 23, 1951. A Horse with a Rider was adopted as the Mahasabha's election symbol. The Working Committee also elected an Election Committee consisting of Dr. N. B. Khare, Mr. N. C. Chatterjee and Dr. Gokal Chand Narang to look after the elections on behalf of the Working Committee.

The manifesto stated :

The present Constitution of India is borrowed from the Constitutions of America, England, France and other Western countries and is not suited to the genius of the people. The Hindu Mahasabha would undertake the task of amending the Constitution so that it may be in consonance with the tradition and culture of the land and make Bharat a truly democratic Hindu State.

The Hindu Mahasabha wants to discourage all separatist tendencies and hence would amend the Constitution so that Bharat may be a well-knit homogeneous State with a strong centre and not a loose combination of autonomous States. Bharat itself would be a State and the units would be provinces and not States.

The Hindu Mahasabha believes in the policy of formation of provinces on a linguistic basis and the readjustment of boundaries of the existing provinces wherever necessary, with due regard to the problems of defence and security, the area, population and economic stability of the province concerned and the rehabilitation of the refugees.

The distinction between States as Parts 'A', 'B' and 'C' would be removed and all parts of India would enjoy the fullest democratic rights without any distinction.

The Hindu Mahasabha proposes to come out of the Commonwealth in order to make Bharat a really free nation. It will enter into treaty relations with the United Kingdom and other countries for mutual help and co-operation.

India's foreign policy will be guided by the principle of enlightened self-interest and reciprocity. The Hindu Mahasabha will adopt the policy of reciprocity towards Pakistan.

The Hindu Mahasabha will endeavour to build up a strong defence in the present disturbed condition of the international situation and with this object in view, will develop the country as a first rate military power in order to make its voice felt in the United Nations Organisation.

The Hindu Mahasabha will make military education compulsory for all young men between the ages of 18 and 25, who are physically fit and special attention will be paid to develop industries connected with war machines and materials of all types.

The Hindu Mahasabha will relax the rigours of the Arms Act and issue licences liberally to the inhabitants in border areas

The Hindu Mahasabha recognises the sanctity of private property and guarantees its possession and inheritance to its owners.

All key industries such as electricity, railway, coal and steel mines and industries dealing with war materials and weapons will be owned and controlled by the State. The remaining industries will remain open for private enterprise. In running these industries the Mahasabha assures all investors full facilities to start new industries with State aid and partial exemption from taxation in the initial stages.

The Hindu Mahasabha will follow a policy of progressive decontrol as it is convinced that control without guaranteeing adequate supply of controlled commodities to the public, has only a nuisance value and often actually lead to blackmarketing and corruption. Definite schemes will be formulated for improving the supply of food, cloth and other necessities.

The Hindu Mahasabha will give priority to rehabilitation of refugees and would even levy a special tax, if necessary, for the purpose. The Hindu Mahasabha guarantees compensation to all evacuees who have lost their property in Pakistan and will settle the problem of evacuees' properties at Government level speedily. The Hindu Mahasabha also declares that the refugees will become full-fledged citizens of Bharat. The Hindu Mahasabha will take effective steps to recover abducted women from Pakistan.

ELECTION RESULTS

In Bengal, the Hindu Mahasabha contested 36 seats in the Assembly and won four. It also contested six Parliamentary seats and succeeded in sending the Vice-President of the party, Mr. N. C. Chatterjee, to the House.

The names of successful candidates to the Assembly are : Mr. Rakhahari Chatterjee, Mr. Probodh Chandra Dutt, Mr. Amulya Ratan Ghosh and Mr. Tarapada Banerjee.

The Hindu Mahasabha did not seriously contest the elections in Orissa or in Assam.

In the second zone, Uttar Pradesh, the Hindu Mahasabha got Mr. Jwalaprasad Sinha, Vice-President of Uttar Pradesh State Mahasabha, into the State Assembly. The Hindu Sabha also put up candidates for the House of the People and succeeded in getting one lady member, Shrimati Shakuntala Nayar, elected.

In the third zone, Bihar, the party put up four candidates for the State Assembly and one for Parliament, but did not win any seat.

In the fourth zone consisting of the Punjab, Delhi, Himachal Pradesh and PEPSU, the party obtained one seat in the Delhi Assembly (Prof. Ram Singh).

In the Punjab, it did not put up any candidates.

In the fifth zone (Rajasthan, Madhya Bharat, Bhopal and Vindhya Pradesh) the Mahasabha showed the best results. The Madhya Bharat Hindu Sabha contested 33 seats for the State Assembly and two for the House of the People. Mr. V. G. Deshpande, Organising Secretary of the party, was elected to the House of the People from both the parliamentary constituencies ; the Sabha also captured two seats in the State Assembly. The names of the successful candidates are : Mr. P. L. Inamdar, Dr. Har Kishore, Mr. Mahant Kailash Giri, Mr. Niranjan Varma, Mr. Dewan Brajour Singh, Mr. Dwarka Das Chobe and Mr. Lakshminarayan.

In Rajasthan, the party put up six candidates for the State Assembly and one for Parliament, but won only two seats in the Assembly. The names of the members are Mr. Shambhu Singh and Mr. Pyarelal Patel.

In Bhopal the Mahasabha put up a few candidates for the State Assembly and also for the House of the People and gained one seat in the Assembly.

In Madhya Pradesh, the President of the Hindu Mahasabha, Dr. N. B. Khare, who stood for the House of the People was defeated.

In Saurashtra, the party got only one seat in the State Assembly. In Bombay and Maharashtra it put up many candidates but did not win any seat. In Andhra and Tamil Nad also the Mahasabha failed to get any representative into the legislature.

(For history see previous editions of the book)

THE INDIAN NATIONAL CONGRESS

THE Indian National Congress is the biggest and best organised political party in India.

It was founded in 1885 by a retired official of the Indian Civil Service, Mr. Alan Octavian Hume, for ventilating popular grievances against the Government of the day. Later it became the most popular party under the unique leadership of Mahatma Gandhi in the fight for freedom from the British and the regeneration of Indian society as a whole on the basis of truth and non-violence. It now runs the administration throughout the country* under the inspiration and ultimate guidance of Mr. Jawaharlal Nehru, whom the Mahatma once named his spiritual heir.

In the first general elections held throughout India on the basis of adult franchise, the Congress has emerged victorious as the largest single party in all the States. Except in the States of Madras, Travancore-Cochin and PEPSU, the Congress returned a comfortable majority capable of undertaking ministerial responsibility independently. In the House of the people, it captured 362 seats out of 496. The following figures indicate its strength in relation to that of each State Assembly: Assam 76 (108), Bihar 241 (330), Bombay 269 (315), Madhya Pradesh 194 (232), Madras 152 (375), Orissa 68 (140), Punjab 98 (140), Uttar Pradesh 390 (430), West Bengal 150 (238), Hyderabad 93 (175), Madhya Bharat 75 (99), Mysore 72 (99), PEPSU 25 (60), Rajasthan 81 (160), Saurashtra 55 (60), Travancore-Cochin 45 (109), Ajmer 20 (30), Bhopal 25 (30), Coorg 15 (24), Delhi 39 (48), Himachal Pradesh 24 (36), Vindhya Pradesh 40 (60).

The organisation comprises a President, elected for a term of two years, two General Secretaries, a Working Committee nominated by the President, an elected All-India Congress Committee (A.-I.C.C.), a Central Parliamentary Board and gram or mohalla, intermediate, district and Pradesh (provincial) Congress committees. The country is divided into 25 Congress Pradeshes for this purpose as follows (the name in brackets is that of the headquarters): Ajmer (*Ajmer*); Assam (*Gauhati*); Andhra (*Vijayawada*); Bengal (*Calcutta*); Bihar (*Patna*); Bombay (*Bombay*); Delhi (*Delhi*); East Punjab (*Jullundur*); Gujarat (*Ahmedabad*); Himachal Pradesh (*Simla*); Hyderabad (*Hyderabad*); Karnatak (*Hubli*); Kerala (*Quilon*); Madhya Bharat (*Indore*); Mahakoshal (*Jabalpur*); Maharashtra (*Poona*); Nagpur (*Nagpur*); Patiala and East Punjab States (*Patiala*); Rajasthan (*Jaipur*); Uttar Pradesh (*Lucknow*); Tamil Nad (*Madras*); Vidarbha (*Akola*); Vindhya Pradesh (*Rewa*); Utkal (*Cuttack*); and Mysore (*Bangalore*). A secretariat of the A.-I.C.C. is also functioning at New Delhi.

Office-bearers (1951-52)

President of the Indian National Congress, Jawaharlal Nehru.

General Secretaries, Balwant Rai Mehta, U. Srinivasa Mallaya.

Treasurer, Morarji Desai.

Members of the Working Committee,† Jawaharlal Nehru, Purushottamdas Tandon, Govind Ballabh Pant, Lal Bahadur Shastri (*U.P.*), Morarji Desai (*Bombay*), Gulzarilal Nanda (*Gujarat*), B. S. Hirey, Shankerao Deo (*Maharashtra*), Abul Kalam Azad (*West Bengal*), Nabakrushna Chaudhuri (*Orissa*), Kamaraj Nadar, Muniswami Pillai (*Tamil Nad*), Neelam Sanjiva Reddy (*Andhra*), Sardar Pratap Singh Kairon (*Punjab*), Manikyalal Varma (*former Princely States*).

Central Election Committee, Jawaharlal Nehru, Purushottamdas Tandon, Maulana Abul Kalam Azad, Jagjivan Ram, N. Sanjiva Reddy, Satyanarain Sinha (also members of the permanent Parliamentary Board); Pandit Govind Ballabh Pant, Morarji Desai, S. Nijalingappa, Kamaraj Nadar, Dr. B. C. Roy.

Parliamentary Board, Jawaharlal Nehru, Purushottamdas Tandon, Maulana Abul Kalam Azad, Jagjivan Ram, N. Sanjiva Reddy, Satyanarain Sinha.

CONGRESS CONSTITUTION

At its meeting of February 2 and 3, 1952, the Congress Working Committee decided to amend the Congress constitution with a view to making the organisation more effective and disciplined for national service. A sub-committee consisting of the President, Mr. Nehru, the two Secretaries, Mr. Lal Bahadur Shastri and Mr. U. Srinivasa Malaya, Dr. Kailas Nath Katju, Mr. Harekrishna Mahtab, Mr. Gulzarilal Nanda and Mr. Khandubhai Desai was appointed to suggest amendments.

This is a summary of the main Articles of the existing Constitution as revised and amended by the A.-I.C.C. session at New Delhi on October 18, 1951.

OBJECT

ARTICLE I

The object of the Indian National Congress is the well-being and advancement of the people of India and the establishment in India by peaceful and legitimate means of a Co-operative Commonwealth based on equality of opportunity and of political, economic and social rights and aiming at world peace and fellowship.

CONSTITUENTS

ARTICLE II

The Indian National Congress will include the Annual Session of the Congress and (*i*) Gram and Mohalla Congress Committees: One such Committee shall be constituted for every village or mohalla or for a group of villages or mohallas, with a population of not less than 500; (*ii*) District Congress Committees and one class of Intermediate Congress Committees between the D.C.C.S. and the Gram or Mohalla Congress Committees to be determined by the Pradesh Congress Committee concerned; (*iii*) Pradesh Congress Committees; (*iv*) The All-India Congress Committee; (*v*) The Working Committee and (*vi*) Organizations or Associations created, affiliated or approved by the A.-I.C.C. or the Working Committee.

TERRITORIAL DIVISIONS

ARTICLE III

Pradesh Congress Committees shall ordinarily be constituted in the Pradeshes, named below, with the headquarters mentioned against each:

1. Ajmer (*Ajmer*); 2. Andhra (*Vijayawada*); 3. Assam (*Gauhati*); 4. Bihar (*Patna*); 5. Bombay (*Bombay*); 6. Delhi (*Delhi*); 7. Gujarat (*Ahmedabad*); 8. Himachal Pradesh (*Simla*); 9. Hyderabad (*Hyderabad*); 10. Karnatak (*Hubli*); 11. Kerala (*Quilon*); 12. Madhya Bharat (*Indore*); 13. Mahakoshal (*Jabalpur*); 14. Maharashtra (*Poona*); 15. Mysore (*Bangalore*); 16. Nagpur (*Nagpur*); 17. Patiala and East Punjab States Union (*Patiala*); 18. Punjab (*Jullundur*); 19. Rajasthan (*Jaipur*); 20. Tamilnad (*Madras*); 21. Utkal (Orissa) (*Cuttack*); 22. Uttar Pradesh (*Lucknow*); 23. Vidarbha (Berar) (*Akola*); 24. Vindhya Pradesh (*Rewa*); 25. West Bengal (*Calcutta*).

MEMBERSHIP

ARTICLE IV

Any person of the age of 18 years and over who accepts Article I, shall, on making a written declaration to that effect in Form (A) and on payment of an annual fee of a rupee, become a Primary Member of the Congress.

A Primary Member shall become an Active (*Kriyashil*) member if he fulfils the following conditions and signs a declaration in Form (B): (*i*) he is of the age of 21 or over; (*ii*) he is a habitual wearer of hand-spun and hand-woven Khadi; (*iii*) he is a teetotaller; (*iv*) he does not observe or recognise untouchability in any shape or form; (*v*) he believes in equality of opportunity and status for all, irrespective of race, caste, creed or sex; (*vi*) he is a believer in inter-communal unity and has respect for the faiths of others; and (*vii*) he devotes regularly a part of his time to some form of national community or social service otherwise than for personal profit or to some constructive activity, as laid down from time to time by the Congress; Provided that he is not a member of any political party, communal or other, which has a separate membership, constitution and programme and provided that he has been a Primary Member for two years consecutively.

TERM OF CONGRESS COMMITTEES

ARTICLE V

The term of every Congress Committee and of its office-bearers and Executive Committee shall ordinarily be two years.

VOTERS AND CANDIDATES

ARTICLE VII

A—*Voters*:

Every Primary Member, whose name has been on the Register of Primary Members for at least a period of two years and who was enrolled within the prescribed period, shall be entitled to vote at the election of delegates under Article VIII.

B—*Candidates*:

Only an Active Member shall be eligible for election as a delegate or as a member of any Congress Committee, above a Gram or Mohalla Congress Committee.

ELECTION OF DELEGATES

ARTICLE VIII

The Working Committee shall fix the date by which the election of delegates must be held.

Every Pradesh shall be entitled to return delegates to the Congress in the proportion of one to every lakh of population. Pradesh Congress Committees shall divide the Pradesh into single-member territorial constituencies, each of which shall have a population of, as far as possible, about a lakh. Each constituency shall have a primary membership of not less than five hundred.

Every delegate shall have to pay an annual fee of Rs. 10 at the office of the P.C.C. of his Pradesh.

The delegates shall be elected for a term of two years.

A.-I.C.C. ELECTIONS

ARTICLE IX

The delegates in every Pradesh shall assemble in a meeting to elect from among themselves one-eighth of their number, as representatives of the Pradesh on the A.-I.C.C.

The election, mentioned in the above clause shall be by Proportional Representation according to the system of the single transferable vote.

COMMITTEES SUBORDINATE TO THE P.C.C.

ARTICLE X

Every Gram or Mohalla Congress Committee shall consist of all the Primary Members enrolled within its jurisdiction.

Every Intermediate Congress Committee and every D.C.C. shall be constituted by election in the manner laid down by the Constitution of the Pradesh Congress Committee.

PRADESH CONGRESS COMMITTEE

ARTICLE XI

The Pradesh Congress Committee shall consist of all the delegates, elected and ex-officio, from the Pradesh provided they each pay Rs. 5 annually to the P.C.C.

Every member of the P.C.C. may ex-officio be a member of one D.C.C. and one Intermediate Congress Committee, comprising or comprised in the Congress constituency from which he has been elected as a delegate or, in case of an ex-officio member, where he is Primary Member.

Every Pradesh Congress Committee shall ordinarily function through District Congress Committee.

On failure of any Pradesh Congress Committee to function in terms of the Constitution or in accordance with the directions of the Working Committee, the latter may suspend the existing P.C.C. and form an *Ad hoc* Committee to carry on Congress work in the Pradesh.

ALL-INDIA CONGRESS COMMITTEE

ARTICLE XII

The President of the Congress, members of the A.-I.C.C. elected under Article IX, the ex-Presidents of the Congress, provided they are qualified under Article IV and representatives of organizations and associations, affiliated shall constitute the All-India Congress Committee.

The President of the Congress shall be the President of the All-India Congress Committee.

The A.-I.C.C. shall carry out the programme of work laid down by the Congress and shall have power to deal with matters and situations that may arise during its term of office.

The A.-I.C.C. shall have power to frame rules not inconsistent with this Constitution, for regulating all matters connected with the Congress, which shall be binding on all subordinate Congress Committees.

The A.-I.C.C. shall meet as often as required by the Working Committee, or on a joint requisition addressed to the Working Committee, by not less than 50 members. Such requisition shall specify the purpose for which the requisitionists desire a meeting of the A.-I.C.C. A requisitioned meeting shall be held within two months of the receipt of the requisition. At any requisitioned meeting, additional items of business may be brought up by the Working Committee for consideration.

Seventy or one-fifth of the total number of members, whichever is less, shall form the quorum for a meeting of the A.-I.C.C.

The A.-I.C.C. may from time to time affiliate to the Congress such organizations and associations and give them such representation as it may deem fit, provided that such representation shall not exceed 5 per cent of elected number of members to the A.-I.C.C.

SUBJECTS COMMITTEE

ARTICLE XIII

The A.-I.C.C. shall meet as the Subjects Committee under the Chairmanship of the President at least two days before the Congress Session. The Working Committee or in case a new President has been elected before the Session and there is no Working Committee appointed by him functioning, a Steering Committee to be nominated by him shall submit to the Subjects Committee the programme of work including draft resolutions, for the Congress Session. In preparing the draft resolutions it shall take into consideration the resolutions recommended by the Pradesh Congress Committees and resolutions given notice of by members of the A.-I.C.C.

The Subjects Committee shall proceed to discuss the programme and shall frame resolutions for being moved in the Open Session. As far as possible, four hours shall be allotted for the consideration of propositions of which due notice has been given by the Pradesh Congress Committees or members of the A.-I.C.C.

CONGRESS SESSION

ARTICLE XIV

The Session of the Congress shall be ordinarily held annually at the time and place decided upon by the A.-I.C.C. or the Working Committee.

The Congress Session shall consist of: (*i*) The President of the Congress. (*ii*) The ex-Presidents of the Congress, provided they are duly qualified under Article IV. (*iii*) The delegates elected under Article VIII and the representatives under clause (h), Article XII.

The Congress Session shall consider resolutions recommended for adoption by the Subjects Committee in the first instance.

Thereafter the Session shall take up any substantive motion not included in (*i*) but which 40 delegates have, before the commencement of the day's sitting, requested the President in writing to allow them to place before the Congress, provided however that no such motion shall be allowed unless it has been previously discussed at a meeting of the Subjects Committee, and has received the support of at least a third of the members then present in the Subjects Committee.

The Pradesh Congress Committee, in whose jurisdiction the Congress Session is held, shall form a Reception Committee.

ELECTION OF PRESIDENT

ARTICLE XVI

Any ten delegates may jointly send the name of any delegate for election as President.

The Returning Officer shall publish the names of all persons so proposed, and it shall be open to any person whose name has been so proposed to withdraw his candidature within ten days of the publication of the proposed name.

After eliminating the names of those who have withdrawn, the Returning Officer shall immediately publish the names of the remaining candidates and circulate them to the Pradesh Congress Committees.

On a date fixed by the Working Committee, which shall not ordinarily be less than seven days after the final publication of the names of contesting candidates, each delegate shall be entitled to record, for the selection of a president, his vote in the following manner:

On the voting paper, which shall exhibit the names of the candidates, the delegate shall, if there are only two candidates, record his vote for one of them. If there are more than two candidates, the delegate shall record at least two preferences by writing the figures 1, 2, *etc.* against the names of the candidates voted for. In such a case he may give more than two preferences if he wishes to do so but any voting paper showing less than two preferences will be regarded as invalid.

As soon as may be after the receipt of the ballot boxes, the Returning Officer shall count the votes or the first preferences recorded for each candidate. If a candidate secures more than 50 per cent of the votes or the first preferences, he shall be declared elected as President. If no candidate has secured more than 50 per cent of the first preferences, the candidate who has secured the smallest number of first preferences shall be eliminated and the second preferences, recorded by the voters who gave him the first preference, shall be taken into account in counting the votes of the remaining candidates. In this counting the candidate who secures the smallest number of votes shall be eliminated. By this process of eliminating the candidates who secure the smallest number of votes in subsequent countings after the transference of votes according to recorded preferences, the candidate who secures more than 50 per cent of the votes shall be declared elected as President.

In the event of any emergency arising by reason of any cause such as death or resignation of the President elected as above, the Working Committee shall forthwith fix a date for a fresh election by the delegates as prescribed above. In case such procedure is not found possible, the A.-I.C.C. shall elect the President.

WORKING COMMITTEE

ARTICLE XVII

The Working Committee shall consist of the President of the Congress and twenty members, including a Treasurer and one or more General Secretaries who shall be appointed by the President. Ordinarily members of the Working Committee will be appointed from amongst the members of the A.-I.C.C. but in special cases delegates, who are not members of the A.-I.C.C., may be appointed; provided, however, that a delegate so appointed shall cease to be a member of the Working Committee if he is not elected as a member of the A.-I.C.C. within six months of his appointment.

The number of Ministers of the Central and State Governments on the Working Committee shall not exceed one-third of the total membership of the Committee.

The quorum for a meeting of the Working Committee shall be five.

The Working Committee shall have the power (*i*) to frame Rules under the Constitution for its proper working subject to the approval of the A.-I.C.C.; (*ii*) to issue instructions not inconsistent with the Constitution and the Rules in all matters not otherwise provided for; (*iii*) to superintend, direct and control all Congress Committees except the A.-I.C.C.; and (*iv*) to take such disciplinary action as it may deem fit against a Committee other than the A.-I.C.C. or any individual.

To meet an emergent situation, the Working Committee shall have the power to take such action in the interest of the Congress as it may deem fit; provided, however, that if any action is taken, which is beyond the powers of the Working Committee as defined in this Constitution, it shall be submitted as early as possible to the A.-I.C.C. for ratification.

GENERAL SECRETARIES

ARTICLE XIX

The General Secretaries shall be in charge of the office of the A.-I.C.C.

The General Secretaries shall be responsible for the preparation of the report of the proceedings of the Congress session along with the audited accounts of the session.

FLAG

ARTICLE XXIV

The flag of the Indian National Congress shall consist of three horizontal colours, saffron, white and green, with the picture of a charkha in blue in the centre. It shall be made of hand-spun and hand-woven khadi.

ELECTION COMMITTEE

ARTICLE XXVII

(*a*) The Working Committee shall set up a Parliamentary Board consisting of the President and five other members with the Congress President as its Chairman for the purpose of regulating and co-ordinating parliamentary activities of the Congress Legislature Parties and shall frame rules in that behalf.

(*b*) A Central Election Committee shall be set up consisting of members of the Parliamentary Board and five other members elected by the A.-I.C.C. for the purpose of (1) conducting election campaigns and (2) making final selection of candidates for the Provincial and Central Legislatures.

(*c*) The Pradesh Election Committee shall consist of the President of the P.C.C. and not more than eight and not less than four other members who shall be elected by the general meeting of the P.C.C.

(*d*) The Pradesh Election Committee shall recommend candidates for Central and State Legislatures to the Central Election Committee.

(*e*) The Central Election Committee shall frame necessary rules to give guidance to the Pradesh Election Committees in regard to selection of candidates and other matters relating to the conduct of elections.

CHANGE IN THE CONSTITUTION

ARTICLE XXVIII

This Constitution can be amended, altered or added to only by a session of the Congress. The A.-I.C.C. shall, however, have authority, except in regard to Article I, to amend, alter or add to the Constitution, when the Congress is not in session, if so desired by the Working Committee, provided that no such addition, alteration or amendment shall be made by the A.-I.C.C. except by a majority of two-thirds of the members present and voting at a meeting held specially for this purpose after due notice of the proposed changes has been given to each member at least one month before the date of such meeting. The changes made by the A.-I.C.C. shall be placed before the next session of the Congress for ratification, but they may come into operation even before ratification from such date as may be prescribed by the A.-I.C.C.

* Everywhere in fact except PEPSU. † Later the following left: Nanda, Shastri, Hirey and Deo. And the following joined: N. V. Gadgil, Balwant Rai Mehta, Khandubhai Desai, S. Nijalingappa, Swami Ramanand Tirth.

A REVIEW OF 1951-52

The major part of the time and energy of the Congress during the latter half of 1951 and the first three months of 1952 was devoted to the selection of Congress candidates for contesting the general elections. After Mr. Nehru took over the Presidentship of the Congress, he issued a series of circulars to Pradesh Congress Committees giving them directions about proper selection of candidates. One of the circulars said that the candidates chosen should not only possess integrity but be known to do so. The major struggle in India was between the Congress as representing a non-communal and secular State and communal bodies which had an entirely different approach on this issue. Congress candidates should be chosen with particular care so that they might represent fully the non-communal character and outlook of the Congress. The Congress President also asked State Congress bodies to ensure adequate representation for minorities including Sikhs, Muslims, Christians, Parsis and Anglo-Indians.

On September 24, 1951, Mr. Nehru intimated to the Presidents of Pradesh Congress Committees the appointment of a committee under the chairmanship of Mr. Sri Prakasa to look after election work at the A.-I.C.C. office. This committee scrutinised the lists of candidates from various States and placed before the Central Election Committee all relevant material in order to enable it to make as good a selection as possible in conformity with Congress principles. The Central Election Committee held a series of meetings thereafter at which the lists were scrutinised State after State and final selections announced.

During this period when candidates were being selected there was much acrimonious controversy specially between groups into which the organization seems to have broken. In spite of declarations and directives from the Congress President, Congressmen in many States, particularly in Bihar, Uttar Pradesh and Madras fought the elections on the basis of group politics and casteism. In the event the successes scored by Congressmen came in the nature of a surprise. For instance, in the Punjab where public opinion was overwhelmingly anti-Congress, the party won a decisive majority. In Uttar Pradesh, where group politics were at their worst, the Congress won 390 out of 430 seats in the State Assembly. Even in West Bengal, the Congress secured a *safe majority*. Yet another surprise was the serious reverses that the Congress suffered in the south. In Madras and Travancore-Cochin, for instance, the Congress failed to get an absolute majority, although it still managed to remain the largest single party.

After the general elections were over the Congress Working Committee met on February 2 and 3, 1952 to consider the situation arising from the general elections. The circumstances under which the Congress failed to secure a majority in Madras, Travancore-Cochin and PEPSU were examined. Many reasons were given for the Congress debacle in the south. While the Congress President thought that the Congress reverses in Madras and Travancore-Cochin were due to lack of organisation and discipline, the Madras leaders themselves felt that differences in the Congress ranks and the difficult economic situation, particularly in respect of food, were responsible for the defeat of many Congressmen at the hands mostly of Communists.

1951 CONGRESS SESSION

The 57th session of the Indian National Congress held in New Delhi on October 18 and 19, 1951 marked an important turning point in the history of the national organisation as it involved the resignation in mid-term of the Congress President, Mr. Purshottamdas Tandon, who was elected to that office at Nasik on Sept. 20, 1950. It may be recalled that the Nasik Presidential contest was a very close one: Mr. Tandon scored 1,306 votes, while Mr. J. B. Kripalani polled as many as 1,092 votes. Although Mr. Tandon thus won the election on the strength of the poll a bitter controversy followed the announcement of the result. Mr. Kripalani demanded an enquiry into the elections. All efforts at *rapprochement* failed in spite of a protracted correspondence between Mr. Tandon and Mr. Kripalani and ultimately, Mr. Kripalani left the Congress to form the Kisan Mazdoor Praja Party to fight the elections on his own. The selection of candidates for the general elections gave rise to a crop of unseemly bickerings and squabbles. There was a general fear that the Congress would fare badly in the elections if things were allowed to drift and suggestions were put forward that Mr. Nehru should take over the leadership of the party in addition to his stewardship of the state. Mr. Purshottamdas Tandon and other members of the Working Committee resigned and without an election being held in the usual constitutional manner for which there was no time, Mr. Nehru was elected President by the A.-I.C.C., a meeting of which was convened for the purpose on September 8 and 9 at New Delhi.

At the meeting Mr. Tandon explained the circumstances under which he was compelled to resign his Presidentship. He said: "The reason for my resignation is that by a letter dated August 6, 1951, Mr. Jawaharlal Nehru tendered his resignation from the Congress Working Committee and in spite of my efforts and those of the Working Committee he has not agreed to withdraw the same. His demand has been that the whole Working Committee should be dissolved and a new Committee constituted. I have not been able to agree to this since to my mind this decision is neither constitutional nor proper.... The Working Committee, to my knowledge, had done nothing which might raise the question of its reconstitution." The Congress President added "Mr. Nehru seems to believe that by giving a shock to the Congress and bringing about a change in the Working Committee he will create a psychological effect in favour of the Congress. I am not able to accept this view. I believe that the work done by the Working Committee has helped in raising the moral standard of the Congress. The situation that has been created by the resignation of Mr. Nehru is, I think, definitely detrimental to the Congress. I cannot accept the resignation of Mr. Nehru because at present he is the symbol of our nation. At the same time from the point of view of the constitution and propriety, I cannot fulfil his desire. Out of this dilemma I see no other way but to place my resignation before you and I request you to relieve me of the responsibility of the Presidentship."

The Congress President thereafter read the letters which were exchanged between him and Mr. Nehru following the latter's resignation on August 6, 1951.

Pandit Govind Ballabh Pant thereafter moved the following resolution which was seconded by Mr. Atulya Ghosh:

"While regretfully accepting the resignation of Mr. Purshottamdas Tandon, the A.-I.C.C. places on record its deep appreciation of his great services to the Congress as its President".

The resolution was carried by a huge majority. Pandit Pant again moved another resolution requesting Mr. Nehru "to undertake the responsibility of Presidentship, and continue to guide the Congress in these critical days". Mr. S. K. Patil seconded the resolution which was also carried by an overwhelming majority. The next day, the A.-I.C.C. resolved to convene the annual session of the Congress at New Delhi from October 17 to 19, 1951. The Delhi Pradesh Congress Committee was asked to make the necessary arrangements for the session.

The open session was held at 5-30 p.m. at Satyavati Nagar which was specially constructed for the purpose in the diplomatic enclave of New Delhi. About 1,440 delegates were present. After Chaudhary Brahm Prakash, Chairman of the Reception Committee, read out his written address, the Congress President, Mr. Nehru, delivered his Presidential address.

PRESIDENTIAL ADDRESS

Mr. Nehru indicated the basis on which the Congress should fight the elections and the programme that it should follow in the event of being returned to power.

Explaining the reasons for his taking over the Congress Presidentship, Mr. Nehru observed: "It seemed to me that the Congress was slowly drifting in a wrong direction. That was not the fault of any particular individual but rather a weakening of the inner fibre of this great organisation, a gradual infiltration into it of ideas and persons which had been foreign to it in the past. I was deeply troubled by this process and I raised my voice against it. That voice was heard and echoed by many in the country and, as a result, some changes took place of which you are well aware."

Mr. Nehru emphasised that India's policies, domestic or foreign, flowed from each other and affected each other and had to be integrated to some extent. While it was not India's desire to play an important role in the world or even in Asia, India was interested in promoting international co-operation.

Remarking that the U.N.O. had somewhat drifted away from what it was meant to be, Mr. Nehru said that it was necessary to reorganise the U.N.O. on a new basis, keeping to the old moorings, reiterating the Charter, but giving it a wider appeal and bringing it more in touch with reality.

Turning to the home front, Mr. Nehru laid great stress on the evils of communalism and separatism and remarked: "It is this evil that brought about the division of India and it is this evil that culminated in the assassination of Mahatma Gandhi". While he realised that Pakistan's communalism had its own repercussions on a section of Indians, he reminded Congressmen that it was their age-old policy to build up a united India, united not only politically but in heart and mind so that the various religious and other groups should co-operate for their mutual advantage and have full opportunities of growth.

The Congress President went on to say that it was in this context that the issue in Kashmir must be viewed because Kashmir "has become the living symbol of that non-communal and secular State which will have no truck with the two-nation theory on which Pakistan has based itself." He added: "The fate of Kashmir will of course be decided by the people of Kashmir. If they wish to go anywhere that is not to our liking, we shall not come in their way. Fortunately, the mind and heart of Kashmir are firm about this basic issue and it is because of this that Kashmir has held out in spite of pressure from Pakistan or other foreign countries. We are quite content to have a plebiscite in Kashmir not only because we are committed to it but because we are quite sure of its result. But that plebiscite must be a fair one and must not be held under conditions which give encouragement to the aggressor and justify his aggression."

"If India had not rejected communalism, would Kashmir hold on to India and look up to her", Mr. Nehru asked and declared: "Therefore, it is a matter of vital importance today that we must curb and check and put an end to both conscious and unconscious communal thought in India."

Referring to Pakistan, the Congress President said that India had seen during the recent past an amazing exhibition of war hysteria in Pakistan and because of this, the Government of India were compelled to take adequate precautions. Those precautions, he added, were not only inevitable in the circumstances but they probably prevented a dreadful war between the two neighbouring countries which have had and must continue to have so much in common. "While we take all necessary precautions whenever necessity arises, we must always remember that the objective we aim at is not only a peaceful settlement of our problems with Pakistan but the growth of close and friendly relations with that country which, not long ago, was part of our own country."

ECONOMIC SITUATION

Regarding the economic situation, Mr. Nehru said: "Our fight against poverty and unemployment and our attempt at the economic betterment of the people have become major objectives. This is the next vital stage of our journey after political independence. This can only be achieved by social and economic planning so that our resources can be used to the best advantage and increased as rapidly as possible." Mr. Nehru referred to the Draft Five Year Plan of the Planning Commission and said that in essence it was a realistic survey of what it was possible to do with the resources likely to be available within the limitations of our Constitution and without a marked break from our existing social and economic framework.

Emphasising that the elections should be fought on Congress principles, Mr. Nehru concluded: "We have to pull ourselves up from narrow grooves of thought and action, from factions, from mutual recrimination, from tolerance of evil in public life and in our social structure, and become fighters for a cause and upholders of high principles."

The open session of the Congress adopted five resolutions. The resolution dealing with amendment to the Congress Constitution was moved from the Chair. (See Article XXVIII of the Congress Constitution.) The resolution on foreign policy was moved by Mr. Rajagopalachari and seconded by Pandit Pant, while the resolution on anti-social and disruptive tendencies was moved by Mr. Morarji Desai and seconded by Mr. Shankerrao Deo. The last resolution concerned economic policy and was moved by Mr. Gulzarilal Nanda and seconded by Mr. N. V. Gadgil, a former Minister for Works, Production and Supply.

RESOLUTIONS

The following are the main resolutions:—

"This Congress reaffirms the resolution of the Nasik Congress in regard to foreign policy.

"The great need of the world today is the avoidance of war, which will inevitably bring irretrievable disaster to mankind. This Congress earnestly hopes that the great nations of the world, on whom rests a heavy responsibility, will pursue policies which ease the present tensions and lead to peaceful solutions of present-day problems. The policy of interference with another country with a view to bringing about political or economic changes there, as well as the policy of controlling another country and depriving it of freedom to shape its own destiny, must lead to conflict.

"The United Nations Organisation was formed to provide a common platform for all countries, even though they differed from each other in many ways, and was based on each country having freedom to develop in its own way and not interfering with another. If that basic policy of the U.N.O. is followed, the fear that grips the world today will gradually lessen and a peaceful consideration of problems will become easier. This Congress approves of the policy pursued by the Government of India in seeking friendly relations with all countries and in avoiding any entanglement in military or other alliances which tend to divide the world into rival groups and thus endanger world peace.

"In particular, the Congress approves of the decision of the Government of India not to participate in the San Francisco conference, which was held for the purpose of signing the Japanese Peace Treaty and instead to have a separate treaty with Japan. Peace in the Far East, which has been gravely disturbed by hostilities in Korea and subsequent developments, has to be based on the co-operation of the countries of the Far East and the other countries chiefly concerned. Any partial arrangement which does not include all these countries is likely to increase the tension and lessen the chances of a peaceful settlement.

"The colossal programmes of rearmament, which present-day conditions have led many countries to adopt, add to international tension and cast a heavy burden on the people of those countries, which results in a lowering of their standards of living. The progress of the underdeveloped countries of the world is also impeded by these programmes of rearmament. If this vast expenditure on rearmament was diverted towards constructive purposes and to the advance of under-developed countries, that would be a surer guarantee of peace than preparations for war.

"The Congress deeply regrets the continuing tension between India and Pakistan, which injures both countries and poisons their relationship. India has and can have no aggressive designs on any country including Pakistan. But India has always to be prepared to meet any aggression that might be made on any part of her territories. The Congress would welcome a peaceful settlement of all Indo-Pakistan problems.

"In regard to Kashmir, it has been the declared policy of the Government of India, with which the Congress is in entire agreement, that the people of Kashmir themselves should mould and decide their own future. The Congress would welcome an early plebiscite in the Jammu and Kashmir State, under proper conditions which have been clearly stated by the Government of India. The Congress welcomes the constitution of a Constituent Assembly in the Kashmir State and hopes that through its labours the State will make even greater progress than it has done during the last two or three years."

Economic Programme

"This Congress approves of the Election Manifesto adopted by the All-India Congress Committee at its Bangalore meeting in July 1951.

"The Congress believes that the establishment of a planned economy is essential for the most effective utilisation of the country's resources, for increasing national wealth and distributing it equitably, and for harnessing the energies of the people in the tasks of national reconstruction. The Congress, therefore, welcomes the draft Five-Year Plan formulated by the Planning Commission and calls upon the nation and, in particular, upon all Congressmen to offer the fullest co-operation in the execution of the National Plan.

"The largest possible increase in production in every sphere of economic activity by all available means must figure in the forefront of our immediate economic programme. The production of food must be the first concern so as to put an end to dependence on foreign aid in this respect. It is also essential to make sure of an adequate supply of raw materials to keep the people employed and industries running to full capacity.

"The underlying defects in the economic and social organisation of the country, which have led to economic stagnation, have to be removed so as to lead to higher standards of productivity and welfare.

"Future progress depends on capital formation and the amount saved by the community every year for this purpose. In order to enlarge the savings of the community, consumption will have to be restricted. Traditional sources of investment should give place to corporate and collective savings as well as the small savings of a very large number of persons. Tax evasion and blackmarketing, which have grown during the war and post-war period, have become social evils which are a serious impediment to economic progress and which may interfere with any effective planning. It is essential that the Government should take effective steps and the whole community should co-operate in order to destroy this menace to our social stability and welfare.

"The administrative machinery of the State, both general and economic, has to be attuned to present-day needs in India and to the effective working of the National Plan. This necessitates the building up of an industrial and commercial cadre to plan for the country's economic life and reorganise the existing economic structure in terms of the Plan and in accordance with the needs of social justice.

"The building up of basic industries has to be given high priority. The Congress stands for the progressive extension of the public sector according to the resources and personnel available. For the present, however, the bulk of the resources available to the State have to be invested as a matter of priority in agriculture, irrigation and power, transport and cottage and small scale industries. The private sector should function in close accord with the public sector in the fulfilment of common national objectives. Labour should be able to participate in the day to day working of industrial undertakings and in the handling of the general problems of each industry.

"Land is the base of India's economy. The agrarian system should be so organised that the fruits of labour are enjoyed by those who toil and land is worked as a source of wealth for the community. Some measures of land reform, notably the abolition of the zamindari and jagirdari system, protection of tenant cultivators, regulation of rents, the imposition of a ceiling on future acquisition of land and the fixation of minimum wages for agricultural workers have already been given effect to in many States. These should be extended and completed, as speedily as possible, so that their full benefit reaches the masses.

"The first step in the reorganisation of rural economy is to strengthen the village as a social and economic entity as against the separate interests of individuals, and for the purpose of effective administration for development. Village production councils should be charged with the responsibility of developing and increasing production and should serve as the link between the people and the agencies of the State. They should mobilise voluntary labour for community works. Management of all land not cultivated by occupants should vest in village production councils. Uneconomic and inefficient units of cultivation stand in the way of economic as well as social progress. Large co-operative farms are therefore necessary and agricultural and agrarian economy should be reorganised on the lines of co-operative village management.

"Until co-operative village management is fully developed and organised, sub-stantial individual farms should, as an interim measure, be brought under State direction and control. They should be required to conform to standards of cultivation and management laid down by Government. Inequality should be reduced through measures such as enforcement of minimum wages, levy of betterment fees in kind, agricultural income-tax, and control of land values. In the event of failure, their management should be taken over by Government.

"Incentives should be provided for the organisation of small uneconomic holdings into co-operative farms, and a large scale programme should be undertaken for the organisation of multi-purpose co-operatives.

"The greatest asset of the country is its manpower. But if this is not used to proper advantage, it becomes a drag and a burden on the country. Apart from those who are wholly unemployed, there are a vast number of able-bodied persons who are only partially employed. Many of those who are employed or partially employed exhibit a low level of skill, thus leading to economic loss. Full employment and raising the level of efficiency are thus the most important objectives of national endeavour.

"The growth of basic industries envisaged in the Plan, as well as the improvement in agriculture, will provide additional employment. But the only way to provide useful employment on a large scale is by the development of cottage industries. Definite programmes of production through cottage and small scale industries should therefore be framed and such industries should

be given facilities for organisation, research, training, finance, materials, marketing, and an adequate measure of protection. It is necessary that such cottage industries should be worked on the highest technical level of efficiency. By this method unused human working capacity will be mobilised and harnessed for constructive activity.

"The whole system of production and distribution has to be reorganised with the deliberate object of achieving the ends of social justice. The existing disparities in respect of material well-being between the rural and urban areas, the backward and more advanced regions and communities and the different economic layers of the population must be progressively narrowed down, and a ceiling should be fixed for the higher incomes. Taxation and fiscal policies should be examined from this point of view."

A.-I.C.C. MEETING

The A.-I.C.C. had a meeting in Calcutta on March 22, 1952. It passed unanimously Mr. B. G. Kher's resolution re-dedicating the Party to the establishment of a "Co-operative Commonwealth" in India based on equality of opportunity and of political, economic and social rights and dedicated to world peace and fellowship.

The resolution seeks the introduction of social and economic equality without disturbing political stability and continuity.

Addressing the A.-I.C.C., Mr. Nehru said: "India had been free for the past four and a half years and this had imposed new and greater responsibilities on the Congress.

"There had been one success at the elections which must draw everybody's attention and that was that they had been able to defeat communalism to a great extent. There was also casteism which had of late created difficulties in their way."

As regards provincialism Mr. Nehru said: "While we cannot do away with it completely and it is often good to think of one's state or province, we must not forget that we ought to think of our country as a whole and as an indivisible unit."

The Congress President observed that in the last General Elections they had come out successful where they had worked among the masses but failed where they only held meetings.

Mr. Nehru said that agriculturists were the backbone of the country and the economic uplift of the kisans was essential for the general progress of the country. For this they had abolished the zamindari and jagirdari systems in certain parts of the country, but it had been held up by court decisions in others.

The Congress President declared that he did not think that any Party, other than the Congress, could shoulder the responsibility of administration and of leading the country to strength and plenty.

Referring to the question of strengthening the Congress Mr. Nehru suggested that "new blood" be infused and for this they should keep the door open to people who agreed on Congress ideals.

Mr. Nehru invited all, even if they were outside the Congress but believed in the basic principles of the Congress, to join hands with the Congress and work for national progress instead of frittering away their energies in strife over petty matters.

Moving the resolution on the general political situation in the country and the Congress, after the President's speech, Mr. B. G. Kher (Bombay) said that the time had now come for Congressmen to think more of their duty.

Every nation had to face a crisis in its history. Such a crisis was now developing in India. The country had enough resources and it was for the people to exploit these for its economic advancement.

Mr. Algural Shastri (U.P.) moving an amendment to the resolution suggested to the President to invite all political parties to a conference to discuss the problem of food and production now facing the country. He thought an attack on a common problem should be organised by the entire people.

Speaking on the resolution, Mr. Chaturbhuj Sharma (U. P.) complained that there was no provision in the resolution of an instrument for the distribution of land when zamindari was abolished.

Mr. Narendra Nath Sen (West Bengal) who supported the resolution warned that the leftist parties had taken advantage of the Congress failure to abolish zamindari and had inflamed a section of the masses.

The main resolution was put to vote and adopted unanimously.

Domestic Situation

The main resolution on the domestic situation said:

"For long years it was the destiny of the Congress to lead the struggle for freedom in India and that task was completed under the guidance of Mahatma Gandhi. The next historic step is, while maintaining political stability and continuity, to harness the country's resources for economic advancement, so as to raise the living and cultural standards of the masses and remove the inequalities that persist in the social structure. To this task of bringing about peacefully and co-operatively essential changes in the social and economic structure of the country, the Congress must now address itself with all its strength . . ."

"While the nation must advance on all fronts, the immediate task is to complete the abolition of zamindari, jagirdari and like systems of land tenure, and thus further the agrarian revolution in India," the resolution said. "The growth of productive industry must proceed side by side with this agrarian change and the realisation of the objective of full employment.

"The standards of public life and the purity of the administration must be given the highest place, because no effective progress can be made if these standards are allowed to be lowered.

"While the Congress must function in future as a well-knit and disciplined organisation, working for certain well-defined objectives and programmes, it should facilitate the entry into the organisation of all those who accept these objectives and programmes. It should welcome also the co-operation of others outside the Congress organisation in the realisation of these objectives or in any common task that might be undertaken.

"It is essential for all Congressmen, and more especially for Congress members of the Legislatures and other Congress workers, to keep in intimate touch with the people and to co-operate with them in constructive activities for their advancement. This work must be co-ordinated with national planning, as defined in the Five-Year Plan, so that the whole nation might march in step for the realisation of the great goal that it has set before it."

The second resolution on domestic policy related to communalism and other disruptive and separatist tendencies.

"As some misunderstandings have arisen on this subject, the A.-I.C.C. declares that there should be no alliance, co-operation or understanding, explicit or implicit, between the Congress and any organisation which is essentially communal in character, whatever its designation might be.

"While the menace of communalism has been effectively countered, another danger has come to the surface and has been very noticeable in some of the elections. This is casteism. The A.-I.C.C. considers this tendency to be very injurious and a danger to the community' . . ."

Mr. Purushottamdas Tandon, former Congress President, moving the resolution on "communalism and other disruptive and separatist tendencies," said that it was the desire of the Indian National Congress to build up a casteless and classless society.

Moving an amendment to the resolution Mr. Govind Dev Brahmachari (Bihar) suggested the addition of the word "provincialism."

The amendment was accepted by 41 votes to 30.

The A.-I.C.C. passed the resolution on constitutional amendments in three parts relating to (1) reduction of primary membership fee to four annas and fixing additional subscription of Re. 1 for active members, (2) (a) deletion of the provision of Article 4, (b) about active member being primary member for two years and (3) revision of the present system of Congress Election Tribunals.

Moving the resolution on the immediate programme of the Congress, Mr. Lal Bahadur Shastri, then General Secretary of the A.-I.C.C. referred to the formation of a cadre of national whole-time workers as envisaged in the resolution. These workers should be given special training in Congress policies and programmes.

Other resolutions passed relate to foreign enclaves in India, the use of hand-spinning and hand-weaving on a mass scale, and Acharya Vinoba Bhave's movement for the redistribution of land.

Foreign Affairs

The main resolution on the foreign situation expressed "anxiety about the continuation of conflicts in the international sphere, referred to as the 'cold war' which are not only accelerating the drift to the terrible catastrophe of another world war, but are also casting an unbearable burden of armaments on the people and leading to a continuous deterioration in the economic situation in the world . . ."

"The Committee trusts that the cease-fire negotiations in Korea will lead to a cessation of fighting and to the consideration of other problems with a view to arriving at a peaceful settlement in the Far East.

"The Committee considers it essential in the interests of peace and human progress for all remaining forms of colonial or foreign control over the countries of Asia and Africa to be removed so as to enable the peoples of those countries to develop in accordance with their own genius.

"The Committee expresses its full approval of the foreign policy pursued by the Government of India which, while avoiding alignment with any nation or group against another, seeks the friendship of all countries. It trusts that other countries will also follow a like policy and thus advance the cause of peace."

Satisfaction at the South African Supreme Court's invalidation of the Malan Government's "apartheid" voting law and a welcome to "the co-operation of Africans and Indians in not submitting to legislative and administrative measures which condemn them to servitude" were also expressed in another resolution placed before the A.-I.C.C. session.

(*For history see previous editions of the book*)

THE MUSLIMS

INDIAN Muslims who constitute 45 million out of a total population of 361 million, are slowly recovering from the psychological, political and social consequences of the partition of the sub-continent and the establishment of Pakistan for which a large number of them agitated for over a quarter of a century and which they achieved on August 14, 1947. While for the Congress Muslims and other Nationalist Muslims adjustment of life in the new political order in India has been easy, for those who owed allegiance to the Muslim League, the situation continued to be one of uncertainty and anxiety for a long time. Even among these a considerable section has adjusted itself to the changes and is taking an active part in the political and social life of new India.

This growing sense of security, however, received a rude shock in 1951 when Mr. Hussain Imam, a former member of the All-India Muslim League of undivided India and who became a member of Parliament after partition, suddenly and unexpectedly migrated to Pakistan. The episode caused much consternation among Muslim and Hindu leaders who believed that Indian Muslims had accepted India as their motherland.

Fortunately, however, the atmosphere did not deteriorate because Muslim leaders, most of whom belonged to the former Muslim League (barring a few exceptions in Madras and Bombay) asked the Muslim population to forget the Muslim League and rally round the Congress or any progressive party and to work and live as full citizens of India. The campaign against communalism, particularly of Hindu and Sikh communities, carried on zealously by the Prime Minister and Congress President, Mr. Nehru, gave an impetus to the awakening Muslim national consciousness.

The fact that the Constitution of the Indian Republic, which came into force on January 26, 1950, guarantees complete political freedom to Muslims was also responsible for the return of Muslims to active politics. Separate communal electorates for Hindus and Muslims which had done so much harm and led ultimately to the partition of the sub-continent and establishment of Pakistan, had been abolished. The Constituent Assembly, which drew up the present Constitution, had no less than 45 Muslims among its members, and one of them, Sir Mohammad Saadullah, was a member of the Drafting Committee of the Constitution even though, before partition, he was a prominent Muslim League leader. In the present Indian Parliament, there are 35 Muslim members. There are also many Muslim members in the States Legislatures.

The efforts made by Indian leaders and the Government to ensure for Muslims their share of power and position in the government of the country are clearly demonstrated in the number of responsible ministerial, diplomatic service and other posts held by Muslims today.

By the time elections were held, a large number of Muslim leaders in different States had joined the Congress. The Congress High Command took great pains to see that a good number of Muslims were returned to different State Legislatures and the Houses of Parliament. This was necessary because, under the new Constitution, the principle of separate electorates was erased from Indian politics and Muslims and Sikhs had to fight the elections in general constituencies along with Hindus. Thanks mainly to the efforts of the Congress, a large number of Muslim candidates came out successful in the elections.

The following list gives the number of Muslims who have been returned to the States Legislatures and the Houses of Parliament:

States Assemblies: Assam 15, Bihar 19, Bombay 14, Madhya Pradesh 6, Madras 5, Orissa 2, Punjab 3, Uttar Pradesh 33, West Bengal 22, Hyderabad 8, Madhya Bharat 2, Mysore 1, PEPSU 1, Rajasthan 2, Saurashtra 1, Travancore-Cochin 3, Ajmer 3, Bhopal 5, Coorg 1, Delhi 3, Manipur 1, Tripura 6 and Vindhya Pradesh 1.

House of People: Bihar 3, Bombay 1, Madhya Pradesh 1, Uttar Pradesh 7, West Bengal 2, Hyderabad 2 and Bhopal 1.

The total number of Muslims who have been elected to the Council of States from the different States is 19.

HISTORY

[For details see *Year Book* for 1949]

The awakening of political consciousness among Muslims in the sub-continent as a separate entity dates back to 1906 when the All-India Muslim League was formed. It worked up its influence steadily, so that when it was hardly ten years old it became sufficiently important to enter into an agreement—known since as the Lucknow Pact—with the powerful Indian National Congress. The League fell on evil days in the 'twenties and differences set in among its members. When enhanced powers were conferred on India by the Montford Reforms, Muslims became more and more politically minded and began to aspire to a greater share in the control of the administration of the country and in Government posts. This feeling gave rise to the formation of a new body whose promoters concentrated on an aggressive presentation of Muslim demands. With the prospect of still further constitutional reforms at the end of the first ten years of the working of the Montford Scheme these leaders strove to organise Muslims into an influential body which would safeguard their interests more effectively than the League. The result was the All-Parties Muslim Conference in 1928. The publication of the Communal Award and its inclusion in the White Paper Scheme of Reforms in 1933 helped this process of consolidation.

An attempt was made early in 1934 to consolidate the community by healing the split within the Muslim League and, if possible, bringing the League and the Conference together to work as a united body. The latter failed, but the former object was largely successful and the League marched from strength to strength until it emerged as one of the most powerful organisations of the Muslim community on the eve of the first elections to the provincial legislatures under the Government of India Act of 1935. For the first time in the political history of Muslims their representative institution functioned as a vigorous and active all-India organisation although the success of League nominees was not very striking.

Mr. Jinnah's influence among the Muslims increased rapidly in the years following the advent of the 1935 constitution. The Muslim League grew into a powerful organisation with branches all over the sub-continent. At Lucknow in 1937 its creed was tightened up; at Lahore three years later it adopted a resolution demanding the partition of the country into Hindu and Muslim India; and in 1941, the creed was again changed into what amounted to a demand for secession. The idea of Pakistan was beginning to take shape.

The Muslim League gathered strength as the years rolled by, especially during the war when the Congress was in jail and there was no effective opposition to the League. An attempt was made by Lord Wavell in the summer of 1945 to form a coalition government including the Congress and the League as a temporary measure without prejudice to the claims and aspirations of the two organizations. This move failed and elections were ordered throughout the country. The League came on top at the polls, and soon after the British Government sent a Cabinet Delegation to settle the Indian problem once and for all.

The Delegation, after elaborate investigation and personal discussion, came to the conclusion that Pakistan was impracticable and inadvisable. It decided to set up a Constituent Assembly to frame a three-tier constitution, comprising a limited union centre, three groups of contiguous provinces (one in the north-west, the second in the centre and the third in the east), and 11 provincial constitutions. It also decided to set up an interim government, pending the evolution of a future constitution. The League at first accepted the British Cabinet Mission's proposals, but later went back on its decision and resolved upon direct action. In the late autumn of 1946, the League again decided to co-operate and sent its nominees to the Interim Government at the centre formed earlier by the Congress.

Events then followed one another in quick succession. First came the British Prime Minister's declaration setting a time-limit to the withdrawal of British troops, and Lord Mountbatten's plan for a procedure to divide the country. On August 15, 1947 the country was formally divided and two Dominions came simultaneously into existence. In the wake of the division there came widespread disturbances in the north-west of the sub-continent, and the minorities in either country passed through a period of acute fear and anxiety.

AFTER PARTITION

The chief features of Muslim politics since the partition of the sub-continent have been 1. a decline in the strength and influence of the Indian Union Muslim League. 2. the rise in power of a number of non-League bodies like the Momins, Shias and more especially the Jamiat-ul-Ulema-e-Hind with which Maulana Azad is associated, 3. the dissolution of purely communal-political bodies, and a shift in their emphasis from political work to social, cultural, religious and educational work.

The first indication that Muslims intend to take an active part in politics was available early in May 1951 when an All-India Muslim Convention met at Calcutta under the chairmanship of Mr. Sultan Ahmad, a former member of the Viceroy's Executive Council. About 100 delegates from all parts of India including several members of Parliament attended the Convention.

In his presidential address, Mr. Sultan Ahmed said that the secular State of India afforded them the opportunity to enjoy the spiritual blessings of the Islamic faith without in any way conflicting with the material fulfilment of their needs. He warned the Muslims against any cross-country movement for the sake of their religious affiliations, but at the same time he requested Government to see that justice, equity and fair play were meted out so that, to quote his own picturesque phraseology, the light of the secular State might not be dim in the minds of the Muslim population.

Referring to Indo-Pakistan relations, Mr. Sultan Ahmed said that the people of the two countries had many historical ties that could not be severed simply because a political separation had been effected. If the Delhi Pact on the protection of minorities had given Indian Muslims all the political protection they required there was also a need for a programme to treat the Hindu-Muslim malady in its psychological aspect. Mr. T. M. Zariff, Chairman of the Reception Committee, in the course of his speech, said that the time had now come for Indian Muslims to take stock of their position in the light of the fast-developing situation in the country and abroad. The prime necessity today, he said was for the emergence of a new leadership among the Muslim masses which would deliver them from communalism, superstition, prejudice and ignorance. It was no longer necessary for their leadership to be predominantly political because in a free India and its Constitution Muslims will have the fullest scope for self-fulfilment and development.

One of the main objectives of the Convention, Mr. Zariff explained, was to protest against and to take organised action to undo the mischief done by Pakistan by claiming to speak for the Muslim population of the whole sub-continent. Such a claim, he said, was not only false and preposterous, but also dangerous to the security of Indian Muslims because it carried the imputation that they indirectly supported the two-nation theory on which Pakistan was founded. To patriotic Muslims such a position was not only intolerable but hateful. The Muslims of India, he declared, were loyal citizens and would shed every drop of their blood in war and every ounce of their energy in peace for the motherland of their choice.

The Convention devoted a large part of its time to a discussion of the future of Kashmir. In a 400-word resolution adopted unanimously, the Convention expressed the view that the future of Kashmir must be decided not on a religious basis but purely on political and economic grounds. The resolution declared that the appearance on the Kashmir scene of a foreign arbitrator—Dr. Frank Graham—" will complicate the issue further and lead to Kashmir becoming another Korea." The Convention, therefore, fully endorsed the stand taken by the Indian Government on the Kashmir question.

The Convention maintained that the proposed Constituent Assembly of Kashmir was the most suitable method of ascertaining the people's will in regard to the future of that State. Mr. Aizaz Hussain of Meerut, who moved the resolution, said that Pakistan had no right to Kashmir which belonged to India. He warned against making Kashmir a Korea through foreign intervention.

MUSLIMS AND CONGRESS

Thus a major preoccupation of Muslims during the years 1950 and 1951 was organization. They were realizing that the time had come for them to decide what organization they were going to work in the new India. It transpired that certain Muslim leaders had consulted Mahatma Gandhion this point and he told them to wait until the position became a little clearer. At that time none of the Indian parties including the Congress were prepared to receive Muslims as Muslims in the minority State had played a decisive part in the division of India and the formation of a new Muslim State. Now that the new constitution had come into force and the first general elections were not far off the time had arrived for the Muslims to take stock. It was apparent that the Congress with its long tradition of Hindu-Muslim collaboration was the obvious party to join. A lead was given by Begum Aizaz Rasul of Uttar Pradesh who joined the Congress with her husband. She also worked hard to bring other Muslims in. She opposed separate electorates and reservation of seats for minorities. Another Muslim leader who was very active in this movement was Mr. Latifur Rahman of Bihar, a member of the former Working Committee of the Muslim League.

The attitude of the Congress to this question was far from clear. There was no formal bar to the entry of Muslims into the Congress. But among the rank and file of the Congress a certain opposition was crystallizing. A vague desire was forming to keep out at least those Muslim leaders who had played a prominent part in the agitation for Pakistan. It was argued that this was necessary as they might once again play the part of a fifth column if an opportunity presented itself. One instance which was cited was that of Chowdhury Khaliquzzaman who after a few days of his declaration of loyalty to India suddenly left the country to become a citizen of Pakistan. In short there was doubt about the good faith of those Muslim leaders who had changed their outlook almost overnight. This suspicion was fully shared by Nationalist Muslims who had stood by the Congress when that body was regarded as an enemy of the Muslim community by vast numbers of Muslims. The Nationalist Muslims felt that ex-Leaguers could be admitted into the Congress only on the condition that they did not hold any office in the Congress for five succeeding years during which time, they were to give ample proof of genuine conversion to the new creed. Muslim Leaguers for their part put this last objection down to jealousy and fear lest the Nationalist Muslims should lose their old privileged position in the Congress. The case for free and unconditional admission was argued in the following manner by Muslim Leaguers who wanted to join the Congress: 1. The Congress ought not to display a spirit of revenge; with the establishment of Pakistan there was no major issue which divided the Muslims as Muslims from the Hindus as Hindus 2. The Muslims had freely agreed to the abolition of communal electorates and reservation of seats. There could be no greater proof of their good faith. 3. Muslims were a hard-headed practical people. And they realized that the best guarantee of safety was identification with the Congress. 4. If the R.S.S. could have free admission into the Congress why not the League? The League was already dissolved as a separate body. 5. The Congress for its part needed the Muslims. They would bring it a vast accession of strength when it was fighting to maintain its position against attack from Socialists, Communists and the Hindu Sabha. 6. India as a country would also benefit. Wholehearted acceptance of Muslim Leaguers as members of the Congress would be regarded as extra proof that India was really a secular state. It would also help to counteract anti-Indian propaganda conducted by Pakistan in the Muslim countries of the Middle East.

This was the manner in which the *pro* and the *con* were argued by the two sides to the controversy.

Independent of this controversy there were appeals from political leaders to the Muslims to join the Congress. Some of these appeals were successful and Muslims in certain areas did join the Congress in a body as in Dharwar, Sholapur and parts of Madhya Pradesh.

It may be mentioned incidentally that in this general controversy about the future of Muslims and their organisations in India the Jamiat-ul-Ulema also became involved particularly in Uttar Pradesh where there was some exchange of argument between the Ulema leaders and Government spokesmen. The feeling was apparently growing among sections of Muslims that the Jamiat was usurping functions which did not intrinsically belong to it.

The future of the League and of Muslims in particular also came up for consideration at a convention of Muslims in Madras. Some proposed the liquidation of the League while others warned against any hasty decisions. All, however, stressed the need for a spirit of friendliness and co-operation between Hindus and Muslims. Mr. Abdul Hamid Khan who presided over the convention stated that guarantees for minorities were secured in the Constitution and in the present set-up there was no room for communal political parties. Referring to the suggestion that Muslims should join the Congress he remarked 'After all the Congress is a leaky boat today, why should we get into it and sink?' The convention finally decided to consult public opinion on the question.

In Lucknow about 200 prominent Muslims from Uttar Pradesh gathered together to take counsel. The meeting declared, 'in order to shake off their present lethargy and play their due part in the administration of the country the Muslims of Uttar Pradesh should join some non-communal party.' The meeting appealed to all Muslim religious or cultural organizations to merge into one body so that they could work for the betterment of the community more effectively. One resolution asked for the setting up of a minority board for the protection of the rights of the minorities.

The President of the All India Shia Political Conference, Mr. Sultan Ahmed advised the Shias in particular and the Sunnis in general to join the Congress. The aim of the Muslims should be to do all that lies in their power to aid unity.

ATTEMPT TO REVIVE LEAGUE

Meanwhile the President of the All India Muslim League Mr. Mohammed Ismail sent an important circular to all provincial and primary Leagues, which caused some stir in Indian politics. 'Muslims are a community,' the circular said. 'And for their religious, cultural, educational, social and political purposes the League cannot remain inactive.' This need for an exclusive body was justified on the following ground. 'Recently we demanded religious training and recognition of Urdu as the medium of instruction for those whose mother-tongue is Urdu. But the majority community was against us. How could such of our demands reach the Government through the majority community organization?'

The circular also declared that the revivified League would protect the interests of other minorities too. It further argued that the League would be of help to the Government in securing the loyalty of the community and in keeping it contented.

This circular gave rise to much protest among Muslims in India. Mr. M. M. Moledina, the President of the Poona District branch of the Jamiat-ul-Ulema was among the first to question the wisdom of the decision. He said that the revival of the League would harm Muslim interests and that there was, in fact, no need for communal organizations.

The editor of a Urdu paper *Al Hafiz* wrote that the Muslims would never again follow the lead of the Muslim League. On political questions the Muslims would support the Congress and on religious issues they would consult the Jamiat-ul-Ulema.

The President of Bombay Provincial Muslim League also declared in a statement that the Provincial League stood by the latest resolution of its Working Committee in which it was categorically stated that the Provincial League had divested itself of politics.

Prominent Muslims of West Bengal State meeting in conference declared that in the altered political set-up of the country Muslims should not continue as a separate political entity. The meeting expressed the opinion that Muslims should go back to the fundamentals of their political faith—socialist economy and democratic polity. Another resolution demanded the formation of linguistic provinces and the inclusion of Bengalee-speaking areas of Bihar and Assam in West Bengal and the merger of Cooch-Behar and Tripura.

A point worth mentioning is the formation of a new Muslim organization called the Bharat Momin Panchayat. It pledges itself to work for the principles advocated by Mahatma Gandhi.

From time to time there were complaints, charges, protests from the Pakistan Government. Here are some of the charges made against India: 1. Mosques and other religious institutions were closed or desecrated. 2. Muslims were hampered in the celebration of their religious festivals. 3. Muslim property was being taken over as evacuee property. 4. Indian military units posted on the Sind-Rajasthan border were harassing the Muslim population of the border villages. 5. The Assam Government was pursuing a policy which might result in a mass exodus of Muslims. 6. Pakistan-Afghan relations were being systematically misrepresented in sections of the Indian press. 7. Indian Muslims who had returned to India on temporary permits and overstayed their time were physically deported after conviction and left on Indo-Pakistan border. Permanent permits were cancelled in certain cases. 8. Muslims in general were being driven out of India. 9. About 100,000 Muslims in the Punjab were forced to embrace Hinduism during the 1947 disturbances and most of the mosques there had been converted into temples. To all these charges the Government of India made suitable reply. In regard to (1) the Government of India described most of the allegations as baseless. There was one mosque in Amritsar which was occupied by evacuees but the latter were quickly evicted. Muslims were absolutely free to

celebrate their festivals like every other community. About evacuee property the Government of India pointed out that laws were more liberal in India than in Pakistan. In fact, Pakistan laws were such that it looked as though the Pakistan Government were bent on driving all non-Muslims from West Pakistan. The complaint that Muslims were being driven out of India was fantastic. The large number of permits said to have been granted by the Pakistan High Commissioner's Office related to temporary visitors to India who came for the purpose of collecting their belongings. The charge that over 100,000 Muslims were forcibly converted to Hinduism or Sikhism during the 1947 disturbances were exaggerated and mischievous.

BENGAL DISORDERS

Meanwhile reports were coming through of ill-treatment of the Hindu community in East Bengal as a consequence of which temper began to rise inside India. Outbreaks against minorities occurred on both sides of the Indo-Pakistan border in the east and after a time they assumed such proportion that even war did not seem impossible. In this critical situation Muslim leaders in India spoke up with one voice. On the one hand they asserted their resolution to stand solidly by their mother country, and on the other they warned Pakistan that if the Government did not stop the persecution of the minorities India would be forced to take such steps as would have grave consequences for the future of the sub-continent.

To give a few instances, at a meeting of Delhi Muslims held in the Jumma Masjid a resolution was passed condemning 'the sad happenings' in East and West Bengal. The meeting urged the Government of India to stop its 'policy of appeasement towards Pakistan, to take effective steps to resolve all points of dispute and put an end to the ever-growing tension between the peoples of the two countries.'

A number of prominent Muslim leaders of Bihar issued a joint statement in which they said that they 'felt thoroughly ashamed of all that has happened in East Pakistan and we, Muslims of India, must raise our unanimous voice in unequivocal condemnation of such atrocities committed on the minority community there'

Mr. Mahomedbhoy I. M. Rowjee, a former Mayor of Bombay declared 'If Pakistan brings the threat of Mr. Liaquat Ali Khan into action by declaring war on India they can expect nothing but contempt from us. Indian Muslims who are loyal to their motherland will do everything in their power to protect the freedom of India at the cost of their lives.'

Seven Muslim members of the Indian Parliament in a joint statement warned the Pakistan Government that 'if no solution to the tragic happenings in East Bengal were found speedily it might lead to grave consequences....If Pakistan has any genuine concern for Indian Muslims it should desist from its policy of terrorizing the minority community.... We hope Pakistan will read the writing on the wall and desist from actions which always involve destruction to the wrong-doer.'

A meeting of Bombay Muslims vehemently condemned the 'untold atrocities' perpetrated on Hindu minorities in East Bengal. It expressed grave concern over the situation and called upon the Government of Pakistan to accept the no-war proposals of Pandit Nehru.

The statements made by Pandit Nehru in the course of a tour of the Punjab also inspired four Indian Muslim leaders to make an appeal to the Prime Minister and Governor-General of Pakistan to get together with their Indian counterparts and conclude a definitive peace. These four Muslim leaders were the Nawab of Chhatari, Mohamed Ismail Khan of Meerut, the Nawab of Bhagpot and Mr. S. Rashid Ahmed of Meerut. In a joint statement they said, 'the speeches delivered by Pandit Nehru should dispel completely the apprehensions sometimes entertained of an armed conflict between India and Pakistan. Pandit Nehru categorically stated that there was no intention on the part of India to resort to war with its neighbour, and all the outstanding disputes could be solved by mutual negotiations. He further made it clear that recourse could be had to arbitration on specific points.' The statement mentioned the question of evacuee property as one of the main obstacles to understanding, and suggested the setting up of a Committee at Ministerial level to make suitable recommendations.

Tension finally subsided when India and Pakistan signed a minority pact, an event which was widely held to have ushered in an era of peace and trust between majority and minority in the two countries.

Until the future of Kashmir is satisfactorily solved Hindu-Muslim relations will tend to be in a state of disequilibrium.

THE SIKHS

ONE of the most colourful communities in India, the Sikhs are predominantly populated in the Punjab which for centuries has been known as the sword arm of the sub-continent. With the partition of the country and establishment of Pakistan, the Sikhs were squeezed out of the West Punjab which they had made a land of luxuriant fertility by their genius for cultivation aided by the perennial waters of the Indus tributaries. They had to huddle themselves into the Indian part of the Punjab and even overflow into the neighbouring areas. In fact, some of them spread themselves out far and wide in order to eke out a living.

The Sikhs enjoy a privileged position in the armed forces of India because of their martial qualities while in the Punjab itself, they share the power of administration with the Hindus who are in a slight majority.

Despite their admirable qualities of gallantry and valour and capacity for hard work, the Sikhs have continued to be the problem community in free India as they were throughout the British rule. Lack of unity in their ranks would appear to be the basic cause for this, although some Sikhs feel that since Hindus have India and Muslims Pakistan, there must be some part of the sub-continent which they could call their own. The Sikhs ask for the creation of a linguistic province of their own with the Sikh States forming the nucleus. Opposition to this demand is voiced not only by the Hindus of the Punjab but also the rest of India because it is feared that it would constitute another partition at a time when the wounds of the last partition have not been fully healed.

The population of the Sikhs is estimated at at about six million.

Broadly speaking there are three groups among the Sikhs. One group forming the main body of the Central Akali Dal is led by Master Tara Singh with Sardar Hukum Singh, a member of Parliament as President. It is in favour of maintaining the separate indentity of the Sikh community. The second group is represented by the Panthic Durbar led by the Maharaja of Patiala. This group favours discarding the separate identity of the Sikhs. In February 1949 the Working Committee of the Durbar held a meeting in Patiala at which it decided not to have a political programme and not to fight elections as a party. To find a workable programme for the advance of Sikh culture it appointed a sub-committee. In addition to the Panthic Durbar there is also a large body of Sikhs who follow the Congress or conform to the Congress outlook and think that the Sikhs should not have a separate organization. The strength of this section of Sikhs cannot be definitely stated as it fluctuates with the changing fortunes in the Punjab.

The Sikh point of view as such is underlined by two memoranda which are worth quoting. The first is a four-page memorandum presented by Sikh members of the Minorities Advisory Committee of the now defunct Constituent Assembly to the sub-committee which was specifically set up to consider the Sikh case. This memorandum can be regarded as the most authoritative statement of the demands made by the Sikhs from time to time since independence. The following demands were set out in the memorandum:

1. To avoid becoming a permanent minority equality of representation must be secured in the Punjab or the boundaries of the State must be so redrawn that the resulting province contains a majority of 'Punjabi-speaking people.'

2. There must be adequate weightage in the Indian Parliament. When the Anglo-Indians, for instance, are given six seats the Sikhs must have proportionate representation.

3. In U.P. and Delhi cognizance must be taken of recent migrations. For instance, in U.P. there would be about 500,000 Sikhs and in Delhi about 100,000.

4. In the Punjab and Central Cabinets there must be a convention which assigns a certain number of seats to Sikhs. One seat must be assured in the Central Cabinet, while in the Punjab Cabinet if the present boundaries are retained one half of the seats must be allotted to Sikhs.

5. In all committees, commissions and delegations there must be one Sikh.

The theory on which the claims are sought to be justified is that as in undivided Punjab the Sikhs are opposed to communal majority rule. In fact, the opposition is even stronger today because the proportion of Sikhs in the Indian Punjab has increased on account of the partition. Other grounds for justification are Sikh suffering in the cause of undivided India, Sikh contribution to the defence of the country and distribution of the community on the strategic borders of India. The creation of a Punjabi-speaking State is justified on the linguistic principle which is recognized by the Congress. The new State it is claimed can be formed by cutting off the Districts of Rohtak, Gurgaon and the Tehsils of Bhiwani and Hansi in the Hissar District. To make the area more compact the Punjab States could merge with the new province. The Sikhs finally, remind the Congress of its promise to them that the Congress will not be a party to any solution of the communal problem that does not satisfy the Sikhs.

About the same time as Sikh members of the Constituent Assembly handed in their memorandum four Sikh scholars issued a lengthy statement discussing the question of what the Sikhs really wanted. 'Only a little imaginative sympathy is needed,' the statement said, 'to realize the great and unprecedented sufferings of the Sikhs in

the recent terrible happenings in the Punjab.' After describing the sufferings the statement added, '.... Almost 40 per cent of the entire Sikh community can be described as refugees in some form or other.' The statement then goes on to say that being a self-reliant and sturdy people all that the Sikhs need is opportunity—opportunity to create, construct and thus carve out their prosperity as they did in the old Punjab. Among the most urgently-needed relief were the following. 1. An announcement that the question of the Gurudwaras left behind in Pakistan was being taken up by the Government of India with the Pakistan Government. The Nankana Sahib Gurudwara should be created a free city like the Vatican. The other Gurudwaras in Pakistan should be administered by the Nankana Sahib authorities. An equivalent of the land attached to the Nankana Sahib and other Sikh shrines in Pakistan should be allotted to the S.G.P.C. in the Punjab thus giving the Sikhs an opportunity to re-establish their educational and social life; 2. As the worst sufferers among land-holders they should be given a generous share in the new colony areas in Hissar and Karnal Districts to make up for their losses in the colony areas of Pakistan; 3. All Sikh refugees no matter where they come from West Punjab, N.W.F.P., Bahawalpur or Sind should be accommodated in the Punjab. This will provide a homeland for Sikhs in India; 4. In their rehabilitation policy Government should make no distinction between landlords and tenants; 5. To provide houses, work on new townships should be taken in hand immediately, and the site of the new capital of the Punjab should be announced without delay.

According to Sardar Hukum Singh, the Sikhs feel frustrated as none of their demands has been adequately met. As for the first demand about due recognition for Sikh Scheduled Castes, four castes have been included in the scheduled castes whether they profess Hindu or Sikh religion. But there are 30 other castes that would have the same privileges provided they profess the Hindu religion alone. The Sikhs feel that this is discrimination on account of religion and clearly against the spirit of the Constitution. There were about five lakhs of backward classes in the Aligarh district of U.P. that embraced Sikhism within the last fifteen years, but are now going back to their old faith on account of this discrimination. The Sardar further contends that 'Sikh' is included in the definition of 'Hindu' so far as the Hindu law is concerned; and under the proposed Hindu Code, his customs and usages are in danger of being wiped out on the pretext of bringing about uniformity in society. But the Sikh is carefully left out when any concessions to backward classes are involved. The Sikhs, the Sardar explains, feel very bitterly on this point. A similar fate has also overtaken the second concession. Some Sikhs complain that in spite of their heavy sufferings, they have not been treated even on a par with the Anglo-Indians in the matter of recruitment to public services. The Sikhs, it is stated, have gone to the farthest possible extent in their co-operation with the Congress. They almost liquidated themselves by allowing their representatives to join the Congress parliamentary parties in the legislatures. It was clearly understood that the Sikhs would work for the redistribution of boundaries in order to form a Punjabi-speaking unit, where the Punjabi culture and language might find scope or advance and development.

The Sikhs are also determined to secure to the Sikh backward classes the same status and privileges as had been extended to their opposite numbers in Hindu society. The Sikhs are agitated over this as the present order encourages conversion. They contemplate moving the Supreme Court on this point.

The Akali Dal also demands that Sikhs in Delhi and U.P. should be recognised as a minority entitled to the same privileges as are accorded to the Anglo-Indians in certain States under the Constitution.

RECENT EVENTS

A deputation of the Akali Dal went round Bombay, Ahmedabad, Poona and other places, at the beginning of 1951. Sardar Hukum Singh President of the Dal, also explained his party's case at a press conference at Bombay. In the course of a statement he laid great stress on the fact that the Sikh community was being misunderstood by some and misrepresented by others. As a matter of fact the Sikhs did not ask for any separate State. It was only the redrawing of boundaries on a linguistic basis that the Akali Dal was fighting for.

To demonstrate their strength the Akali Dal convened an All-India Akali Conference at Ludhiana for March 10 and 11, 1951. It was a big gathering and made a great impression. The demand for a Punjabi-speaking province was reiterated. The Sikh members of the Punjab legislature, who had refused to comply with the directive of the Akali Dal were denounced as traitors to the community.

Incidentally, Master Tara Singh attended the session of the All-India Hindu Mahasabha on December 24 and 25, 1950, at Poona. Consequently some improvement in the relations between the two communities, became evident.

Early in 1952 came the general elections. The setback suffered by the Akali Dal and the successes that crowned the Congress campaign in the elections even in the Sikh constituencies of the Punjab were a surprise. Ever since the announcement was made about the general elections in May 1951, the Akali Dal, led by Master Tara Singh, had been campaigning hard to capture an absolute majority in the PEPSU and the largest number of seats for any single party in the Punjab State Assembly. The main battle-cry of the Akali Dal was the demand for a Punjabi-speaking province. Master Tara Singh however found himself pitted against a veteran Congress Sikh leader, Sardar Pratap Singh Kairon. Sardar Pratap Singh warned the Sikhs against Master Tara Singh's leadership and said that the salvation of the Sikhs lay in the preservation of the secular character of the State.

The Akali Dal set up candidates in all the Sikh districts of the Punjab and PEPSU. However it secured only 14 out of 126 seats in the Punjab Assembly and 23 out of 60 seats in the PEPSU State Assembly. In the Punjab, the Akali Dal did not win any seats in Jullundur, Hoshiarpur and Gurdaspur districts where its hold was thought to be the strongest. In Amritsar also, the holy city of the Sikhs, the Akali Dal secured only one urban seat. All rural seats in Ludhiana and most of the rural seats in Ferozepur were however secured by the Akali Dal.

The Congress scored its successes almost everywhere, chiefly because of their exceptional organisation and equipment. Another decisive factor which made for Congress victory was the election tour of Mr. Nehru, in that State. The success can also be partly ascribed to the personality of the Sikh Congress leader Sardar Pratap Singh Kairon.

The Akali Dal itself accounted for its comparative failure in the following way: (1) The Sikh votes were divided among many candidates. In the Sikh districts, the Communists, the Forward Block and Independents were all Sikhs pitted against the Akali Sikh nominees. (2) Hindu propaganda which said that a vote for the Akali Dal meant further partition of the country or Sikh hegemony in the State. (3) The Congress won over the Sikh Scheduled Castes, who form about 20 to 25 per cent of the electorate in every constituency. Finally, the Akali Dal has also charged that the elections have not been fair and free

Today the Dal makes the following claims and charges: (1) Sikh Government servants have been discriminated against on account of their religion. A Commission should be appointed before which the Dal can place material regarding the justness of the charge. (2) The Punjabi language is not being given the status of a regional language. (3) The Scheduled Castes Order of 1950 of the President is a clear attempt at absorption into Hinduism of all Sikh Scheduled Castes who have embraced Sikhism.

The Akali Dal has now started a movement for the reorganisation of that body. A provisional committee has been set up to broadbase the Dal with a view to establishing closer contact with the masses.

THE LEFT WING IN INDIAN POLITICS

FOR many years after 1919 the Indian National Congress was the party of the Left Wing in Indian politics. And all the Left Wing parties of today (except the Communists) which are now separate from the Congress began as protestant groups within the Congress itself. Thus the Socialist Party, the Forward Bloc, the Revolutionary Communist Party, the Peasants' and Workers' Party which together with the Communist Party constitute the Left Wing today were all in the Congress some time or other.

Broadly speaking the parties of the Left in the Congress differed from the moderates on two points. First, the Left Wingers were opposed to all compromise with the British, and were in favour of complete independence outside the British Empire as the institution was then called. Second, they believed in some kind of economic equality and collectivism, and worked hard to bring the workers and the peasants into the national movement. The Left Wing groups generally worked together and were at their best whenever the Congress launched a movement against the authorities.

When the Congress decided round about 1934 to take office the Left Wing groups made a strong effort to get a Socialist programme accepted by that body; but the effort failed. It is from the failure of this attempt to convert the Congress that the gradual separation of the Left Wing groups from the main body of the Congress began. The Socialist Party, for instance, was formed soon after.

The Forward Bloc was started by Mr. Subbash Chandra Bose in 1938, because of a suspicion that the Congress might in the ultimate resort compromise with the British Power and agree to take less than complete independence. It had some vogue during the war on account of its affiliations with the I.N.A. But when the Congress took up the I.N.A. cause and made it part of its own history the Forward Bloc found the ground cut from under its feet. In 1948, it split into two groups, one led by Mr. R. S. Ruikar and the other by Mr. K. N. Joglekar. At a conference in Calcutta, Mr. Ruikar declared that the Party stood for Socialism which was to be achieved by co-ordination of parliamentary and extra-parliamentary methods. In this, Mr. Ruikar explained, the policy of the Forward Bloc differed from that of the Socialists.

Until lately the position of the Left Wingers was not easy. For the Congress under the dual leadership of Mahatma Gandhi and Mr. Nehru had a complete plan of action both for urban and rural conditions, a plan which could also be described as Socialistic—of the Gandhian type. Mr. Nehru, in fact, has the reputation of being a Socialist himself. Once he even went so far as to describe himself as half-Communist. In any case, the Congress had not only a plan but had the power to vitalize it by action. For a long time, therefore, the parties of the Left were unable to make much headway; they had nothing strikingly different from the Congress to offer. But with the cessation of war and the advent of freedom came a great deal of unrest among the peasants and industrial workers. Many baffling political problems also presented themselves. To make the situation worse there were incompetence, corruption, low morality among those who were running the Government machinery. All this inevitably resulted in dissatisfaction and discontent with the party in power and helped the growth of Left Wing opposition in the country. It must be pointed out however, that though conditions were favourable the Left Wing groups did not score any striking success against the party in power. Some of the reasons for this failure are fairly obvious. The parties of the Left had no coherent, workable plan. They did not possess the necessary strength which comes from a vast country-wide organization. And they were very much disunited among themselves. Thus though the Left Wing parties were strong enough to harass the Government at many points nowhere did they have the capacity to form an alternative Government.

The approach of independent India's first general elections gave further impetus to disgruntled persons within the Congress with vaguely radical leanings to form a separate group. Though at first both Mr. Rafi Ahmed Kidwai and Acharya J. B. Kripalani took a lead in organising dissidents into a separate party, the former soon returned to the Congress fold and the task of consolidating the newly formed Krishak Mazdoor Praja Party was left to Acharya Kripalani.

Even the pressure of the elections and the fear of dividing the radical vote failed to bring the Left groups together. The Socialists remained as averse as ever to joining hands with the Communists. At first it was thought that the K.M.P.P. and the Socialists might fight the elections together but no firm understanding was reached. The only electoral alliances that emerged were between the Socialists and the Scheduled Castes Federation on the one hand, and the Communists and the K.M.P.P. and small Left groups in individual States on the other.

The divisions in the Left ranks were thus partly responsible for the large disparity between Leftist vote and Leftist strength in the new legislatures. The elections revealed the Communist Party as the most powerful in Madras, Hyderabad, Travancore-Cochin, West Bengal and Tripura and the Socialists as the most influential in Bihar and Vindhya Pradesh, where they got over 18 per cent. of the total votes cast.

PEASANTS' AND WORKERS' PARTY

General Secretary: S. S. More.

Parliamentary Board:

Chairman: S. S. More.

Members: T. S. Jadhav, R. B. Raut, R. M. Nalavade. (All are members of the Bombay State Legislative Assembly.)

According to the constitution of the Party the General Secretary of the Party and the secretaries of the provincial and district branches are the only office-bearers.

The three Provincial Secretaries are Mr. G. D. Lad (Maharashtra), Mr. Narsingrao Deshmukh (Marathwada-Hyderabad State), and Mr. G. A. Deshmukh (Madhya Pradesh). Mrs. Malini Tulpule is the Secretary of the Central Office of the Party.

This is a Marxist-Leninist Party following the guidance of the 'Cominform.'

The Party at present functions only in the Marathi speaking areas of Bombay, Hyderabad and Madhya-Pradesh. As a Marxist Party, membership is strictly restricted. Those who devote almost all their time for the Party's work are entitled to full membership, the rest being sympathiser-members. Both classes of members together number about 5,000. Moreover, every district has about a thousand workers working on different mass fronts and in due course are expected to qualify for full membership.

The last conference of the Party held at Dabhadi in 1950 adopted an 18,000 word political thesis explaining its own ideological position.

The Party's programme as outlined in the thesis includes 'severance of all connection with British imperialism, abolition of landlordism without compensation, confiscation of foreign capital invested in banks and industries.' The programme also urges nationalization of big industries, banks and insurance companies and the reorganization of States on a linguistic basis.

Here are all the 18 points of the thesis in their order:

1. Establishment of complete independence after severance of all connections with British imperialism.

2. To establish a democratic State of workers, peasants and middle classes—the classes which are opposed to Anglo-American imperialists and which are inside the Peace Front.

3. To frame a Constitution giving full independence and democratic rights to the people and to protect their fundamental economic rights.

4. To accept the right of nations to self-determination and to reorganise India on a linguistic basis.

5. To provide constitutional protection to language, culture, etc., of the minorities.

6. To abolish vestiges of princely rule and feudalism.

7. To abolish all kinds of economic, political and cultural repression.

8. India and Pakistan to give mutual aid to each other in the interest of the progress of the toiling people in both States.

9. To abolish landlordism without compensation, to redistribute land, to abolish usury, to give a living wage to the agricultural labourers.

10. To confiscate foreign capital invested in big industries, banks, means of communications, plantations, mines and various other enterprises.

11. To nationalise big industries, banks, insurance companies. To secure workers' control over them. To give a living wage, seven-hour day, old age pensions, sickness benefits, etc., to workers.

12. Right to work to every one.

13. Control on profits of private enterprise.

14. To abolish all repressive laws.

15. To abolish bureaucracy and appoint officers elected by the people, the latter having the right to recall.

16. Right to every one to bear arms and the creation of a People's Army.

17. Free and compulsory primary and secondary education; less expensive higher education.

18. Equal rights to women. To put into practice the principle of equal pay for equal work.

Mr. More later explained the decision to adopt Marxism as a guide to a group of journalists in Poona. The metamorphosis was not a sudden one, he said. The Party's past leanings towards Marxism had now been expressed in precise and clear terms. The doors of the new Marxist party would be open not only to workers and peasants but also to middle classes and even to capitalist sympathisers. The Party had accepted Marx, Engels, Lenin, Stalin and the Cominform as the true exponents of Marxism. This does not mean that they would slavishly imitate everything done elsewhere without examining the peculiar conditions of this country. The aim was to create a united democratic front under the hegemony of a genuine workers' party which would include all classes sympathetic to the programme of the Party.

The Party set up candidates for the House of the People and Bombay, Hyderabad and Madhya Pradesh State Assemblies. For the House of the People 13 candidates were set up and two were returned, the Party securing 918,453 votes. For the Bombay State Assembly 86 candidates were set up in 12 districts of Maharashtra of whom 14 were returned and the Party secured 753,588 votes. For the Hyderabad State Assembly 10 candidates were set up in Marathwada, 10 were returned and the Party secured 212,934 votes. For Madhya Pradesh Assembly 32 candidates were set up in 8 districts and two were returned.

The Party has a firm basis in the rural areas of the Marathi speaking districts where it has provided the only effective opposition to the Congress Party so far.

The party emerged as the strongest group after the Congress in Madras, Hyderabad, Travancore-Cochin, and West Bengal. The seats secured by it and its allies in the United and People's Fronts in the various State Assemblies were as follows: Madras (61); Hyderabad (42); Travancore-Cochin (32); W. Bengal (28); Orissa (7); Punjab (6); PEPSU (3); Mysore, Bombay, Assam, 1 each.

In the elections to the electoral college in Tripura, a small Chief Commissioner's State, the Communists, with the Independents' support, secured an absolute majority gaining 16 of the 30 seats.

The Party failed to secure any seats in Bihar, Madhya Pradesh, Madhya Bharat, Rajasthan, Saurashtra, and Uttar Pradesh Assemblies, though it had put up a total of 110 candidates in these States.

CONSTITUTION

As regards the structure and organization of the Party anyone who is above eighteen years of age and is a citizen of India can become a member of the Party provided he wholeheartedly believes in Communist philosophy, is willing to do field-work and agrees to carry out the programme chalked out from time to time.

Application for membership has to be endorsed by at least two members of the Party and when a candidate is accepted he must take an oath of loyalty to the Party and agree to pay a monthly contribution to the Party funds. Discipline is very strict.

The nucleus round which the whole structure is built is the 'cell' consisting of two or three members. Their duty is to spread the faith among the people with whom they live. Such 'cells' may be established in a mill or factory, workers' quarters, civic ward and so on, whenever conditions are propitious.

The hierarchy consists of a series of village, town, district and provincial congresses with their respective executive committees. Each committee generally consists of five members with two in reserve and an elected secretary. The congresses may meet once a year while the day to day work between any two congresses is carried on by committees. Periodical reports are sent from one body to another which is immediately above it.

The supreme body of the Communist Party of India is the All-India Party Congress which generally meets once a year. The Congress elects the Secretary of the Party and also its Central Committee which is the executive body of the Congress. The Committee makes a report to the annual Congress which among other things has the right to change the Party's policy or constitution. Each member of the Committee is assigned the responsibility for some particular aspect of Party work. For instance, one member is in charge of Party newspapers, another directs work in allied organizations, a third looks after accounts, a fourth conducts Party schools and study circles and so on. Within the Central Committee itself there is a smaller body called the Politburo whose Secretary is identical with the Secretary of the Party. The Politburo is the most influential body in the whole organization being for all practical purposes the maker of the Party's policy.

AIMS AND OBJECTS

The basic aim of the Party as defined in the preamble to the Constitution is 'the organization of the toiling masses in the struggle for the victorious anti-imperialist and agrarian revolution for complete national independence, for the establishment of a people's democratic state led by the working class, for the realization of the dictatorship of the proletariat, and the building up of socialism according to the teachings of Marxism-Leninism'.

The aims are described in more concrete terms in the draft programme of the Communist Party issued in April under the name of the Politburo. The Politburo also decided "to radically reorientate its tactical line in view of recent discussions among its members."

It calls for the confiscation and nationalisation of all foreign capital, complete withdrawal from the British Commonwealth of Nations and a united front with "peace-loving countries and friendship with them", having first brought about a "cessation of flirtation between world Power *blocs* and leanings towards the United States of America". It also harks back to a programme of what was once called "100 per cent. Swadeshi".

The Party does not press for the immediate establishment of socialism "in view of the backwardness of the economic development of the country", but only a "coalition of all democratic anti-feudal anti-imperialist forces in the country".

On the question of India's *lingua franca* and national unity, the statement says: "In the name of a united country, the language of one province, namely Hindi, was declared an obligatory State language for all nationalities and States to the detriment of their own national language. Vast areas and millions of people of one nationality are compelled to live under the rule of bureaucrats and governments dominated by another nationality."

As for the practical tasks which would face the "new People's Democratic Government", the programme lists the following in the field of State structure:

"1. The sovereignty of the people, *i.e.*, the concentration of power in the country in the hands of the people. The supreme power in the State must be vested entirely in the people's representatives who will be elected by the people and be subject to recall at any time upon a demand by the majority of electors, and who shall constitute a single popular assembly, a single legislative chamber.

"2. The restriction of the rights of the President of the Republic, in virtue of which the President and persons authorised by him will be deprived of the right to promulgate laws, which have not been passed by the legislature. The President shall be elected by the legislature.

"3. Universal, equal and direct suffrage for all male and female citizens of India who have attained the age of eighteen years in all elections to the Legislative Assembly and to the various local government bodies, secret ballot, the right of every voter to be elected to any representative institution, payment to people's representatives, proportional representation of political parties in all elections.

"4. Local Government on a wide scale and with wide powers through People's Committees. The abolition of all local and provincial authorities appointed from above (*e.g.*, governors, magistrates, commissioners, etc.).

"5. Inviolability of person and domicile; unhampered freedom of conscience, speech, press, assembly, strike and combination; freedom of movement and occupation.

"6. Equal rights for all citizens irrespective of religion, caste, sex, race or nationality; equal pay for equal work, irrespective of sex.

"7. The right of all nationalities to self-determination. The Republic of India will unite the peoples of the various nationalities of India not by force but by their voluntary consent to the creation of a common State.

"8. Reconstitution of the present artificial provinces or States with the dissolution of princely States into national States according to the principle of common language. The tribal area or areas where the population is of specific composition and is distinguished by specific social conditions or constitutes a national minority will have complete regional autonomy and regional governments.

"9. Introduction of progressive income-tax in industry, agriculture and trade and maximum relief in taxation for workers, peasants and artisans.

"10. Right of the people to receive instruction in their own national language in schools; the use of the national language in all public and State institutions. The use of Hindi as an all-India State language will not be obligatory.

"11. The right of all persons to sue any official before a People's Court.

"12. Separation of the State from all religious institutions. The State to be a secular State.

"13. Free and compulsory primary education for the children of both sexes upto the age of fourteen.

"14. Replacement of the police by militia. Elimination of the mercenary army and other punitive forces and the establishment of a national army, navy and airforce for the defence of India, closely linked with the people.

"15. The establishment of a people's health service with a wide network of medical centres and hospitals all over the country, designed to liquidate centres of cholera, malaria, and other epidemic diseases in the country."

The programme next touches upon the rural problem which is "of primary importance to the life of the country". In order to remove the evils at the root of agricultural and cultural backwardness, it will be necessary, according to the draft programme:

1. To hand over landlords' land without compensation to the peasants and to legalise this reform in the form of a special land law.

2. To ensure long-term and cheap credit for the peasants to enable them to purchase agricultural implements and seeds. To ensure long-term and cheap credit to small artisans to enable them to purchase raw materials, etc.

3. To ensure Government assistance to the peasants in the improvement of old and the building of new irrigation systems.

4. To cancel debts of peasants and small artisans to money-lenders.

5. To ensure adequate wages and living condition to agricultural labourers.

In order to break through the vicious circle of the low purchasing power of the peasants and workers, who for that very reason provide a very poor market for the country's industrial output the programme suggests that it will be necessary:

1. To provide for the protection of the national industry against the competition of foreign goods in the country by promulgating appropriate laws;

2. To develop the national industry and to prepare conditions for the industrialisation of the country without sparing any efforts and resources of the State to achieve this end;

3. To improve radically the living and working conditions of workers by fixing a living wage, application of the eight-hour day and forty-four hour week in all industries and trades, introduction of a six-hour day in underground mines and other trades injurious to health, social insurance at the expense of the State and capitalist against every kind of disability and unemployment, by the establishment of labour exchanges working in association with the Trade Unions, by the establishment of industrial courts, by the recognition of the Trade Unions and the right to collective bargaining;

4. To introduce effective control of prices of goods of mass consumption.

ELECTION MANIFESTO

The Election Manifesto of the party denounced the Congress Government as "a Government of National Betrayal" for having kept India chained to the British Empire. It characterised the Congress Government as a Government of landlords and monopolists, in which "the imperialists, the princes and the landlords, the big monopolists and financiers, the speculators and blackmarketers are prospering" and people are kept in utter poverty. It also charged the Government with resorting to wide scale repressive measures to put down the just movements of the workers, the peasants and the middle-classes. It attacked the foreign policy of the Government as one of "tie-up with the British imperialists, and playing between peace and war" and not an honest and consistent policy for peace and freedom.

It condemned the Congress Government as having "forfeited every right to remain in power," and called upon the people "to replace the present Government by a Government of People's Democracy". It defined the Government of People's Democracy as "a Government of all democratic parties, groups and individuals representing workers, peasants, middle classes and the national bourgeoisie, the bourgeoisie that stands for genuine industrialisation of the country and for the freedom and independence of India."

Such a Government, it said, would break with the British Empire, expel British officers from armed forces, confiscate and nationalise all British capital; cancel all peasants' debts and transfer all lands of landlords and Princes, without payment, to the tillers; develop national industries with the aid of confiscated foreign capital and by enlisting co-operation of private industrialists; guarantee living wage to workers and recognise their right of collective bargaining; create a national army closely linked with the people, abolish the police force and form a people's militia; for national States by abolishing Princely States, reconstruct present States along linguistic frontiers and create a united India by the voluntary consent of nationalities and tribal peoples; protect the rights and interests of minorities; eliminate social and economic disabilities due to sex and caste; introduce free and compulsory primary education and a people's health service; rehabilitate refugees; establish trade and economic relations with all countries on the basis of equality; fight for a Pact of Peace between the Great Powers, for banning of atom bombs and withdrawal of all foreign troops from all countries and establish a pact of friendship between Pakistan, Ceylon and India. The new State will have all the organs from lowest to the highest on an elected basis and these elected organs will have the supreme power.

In October 1951, an All-India Conference of the Communist Party of India was convened with delegates elected from the Provincial Conferences of the Party. The Conference adopted unanimously the new Draft Programme and Policy Statement.

A meeting of the Central Committee held in March 1952 reviewed the result of the general elections, the political situation in the country after the elections and the tasks facing the Party. It noted the swing of the people towards the left and away from the Congress, which though securing a majority of seats, actually polled a minority of votes. It also noted as significant that taking the country as a whole, "the parties of vested interests and communal reaction had not won as much as they had hoped to do."

The meeting dealt with problems of political and organisational nature connected with the relation of the Communist Party with other parties in the building of a broad united front against the rule of the Congress; and also with problems pertaining to the relation between Parliamentary and extra-parliamentary activities of the Party itself. It called upon the Party units to carry forward efforts at unity on the trade union and peasant fronts. The meeting protested against continued detention of democrats in various States and expressed solidarity with Asian and African peoples in their struggle for peace and national liberation.

Mr. Ajoy Kumar Ghosh was elected General Secretary of the party and in October Mr. A. K. Gopalan announced the withdrawal of the Communist movement in the Telengana districts of Hyderabad. The election results further helped to rebuild the shattered morale of the party and by the beginning of 1952, it was functioning normally again.

Early in the year the party headquarters were shifted from Bombay to Madras to help in the consolidation of the party's influence in the South.

THE SOCIALIST PARTY OF INDIA

NATIONAL EXECUTIVE

Chairman, Acharya Narendra Deva.
General Secretary, Asoka Mehta.
Joint Secretaries, Prem Bhasin; Madhu Limaye; Pratap Shah.
Treasurer, M. Harris.

Hareshwar Goswami; Surendranath Dwivedi; jit Roy; Sibnath Banerji; Ramnandan Mishra; ukumar Pagare; Jayaprakash Narayan; Gan- asharan Sinha; Dr. Rammanohar Lohia; Swami hagwan; Damodar Swarup Seth; Tilakraj hadha; Jagdish Joshi; Maganlal Bagdi; B. S. lahadeosingh; Dr. K. B. Menon; S. R. Subra- maniam; A. Chakradhar; N. G. Goray.

PARLIAMENTARY BOARD

ayaprakash Narayan (*Chairman*); Purshottam Trikamdas; Rammanohar Lohia; M. Harris; Asoka Mehta; Ganga Saran Singh; Shakti Ranjan Bose; Acharya Narendra Deva; K. K. Menon (*Secretary*).

abour Secretary, G. G. Mehta.
isan Secretary, Ramnandan Mishra.

The total membership for the country as a hole is 295,554; Individual membership 71,817; Membership of affiliated Trade Unions, isan Panchayats, etc., 123,737. (These figures e as on April 1, 1951).

The Party is strongly entrenched in industrial eas, where the Socialist trade union, the Hind azdoor Sabha has a large membership In the orking-class, the Socialists are specially influen- al among coal-miners, railway workers, dock orkers, textile workers, and workers in the gar industry. Among peasants, the Socialists ve always had great influence. As early 1936, they set up a Kisan Sabha, and today nder a new name Hind Kisan Panchayat the rty has its largest following in Bihar and P. The Socialists have a youth organisation lled 'Samajwadi Yuvak Sabha'. The Rash- iya Seva Dal is not affiliated to any party, it a majority of the members of the organisation mpathize with the ideals of the Socialist rty. In fact, Socialists claim that their fluence in the country is much greater than any gures can indicate for a Socialist or a near- cialist ideology is now part of all national inking.

The Party publishes 22 weeklies in different nguages—the best known of them *Janata*, has w gone out of publication—while the Central lice issues a fortnightly letter. A foreign news lletin is also issued and is sent to Socialist rties, trade union offices and leading journals foreign countries.

The various branches of the Party conduct aining camps where members are instructed Party policy and where a knowledge is also ven of subjects of special interest such as rarian economics, trade union theory and actice, and so on. Local centres too, often nduct study circles. In big industrial areas e Bombay labour schools and colleges are ganized where workers can get instruction in bjects which are of importance in their day- -day work.

The Socialist Party observes all 'national ys' such as 30th January, 15th August, 2nd tober and the whole of the national week. In dition it celebrates special occasions like 1st ay, as indication of the international solidarity labour, 9th August, as the day on which the al struggle for national freedom was launched, d 14th November as Kisan day.

CONSTITUTION

The final object of the Party is the establish- nt of a democratic Socialist society in dia. The Party will also work with cialist forces in other countries for the eradication of imperialism, racialism, colo- nialism, and all other forms of national oppression and economic inequality among nations and create a democratic Socialist world.

There are two classes of members, individual members and affiliated members. As regards individual membership any person who is above 18 and who accepts the objects, policy, pro- gramme and the discipline of the Party is eligible provided he does not believe in or observe caste or communal distinctions. Affiliated members are not individuals but groups of persons like a trade union, a kisan sabha, organizations of professional men, of youth or just cultural organizations, provided as before they accept the objects, policy, programme, and the dis- cipline of the Party. An individual member pays a minimum membership fee of one rupee a year, an affiliated trade union an affiliation fee of five rupees and an additional fee of four annas a member, while a kisan sabha pays an affiliation fee of five rupees and an additional fee of two annas a member.

The smallest territorial organization is a ward or local unit comprising all the individual members resident in that area. Above a ward unit is a constituency branch. Above the constituency branch are district and city branches. Above these again are the provincial organizations, and finally at the very top is the national organization.

The organization at each of the different levels mentioned above consists in the main of a larger deliberative body called Council and a smaller executive body called Committee. The Council lays down the policy and programme, considers reports and statements of accounts and elects the office-bearers such as Chairman and Secretary. The Executive Committee carries out the policy and programme laid down by the Council, organizes branches, supervises their work and generally initiates such activity as may further the objects of the Party in the area which comes under its purview.

At the national level the organization consists of a National Conference, a National General Council and a National Executive. The National Conference which consists of delegates elected by individual and affiliated members is the highest constitutional organ of the Party. It lays down the policy and programme of the Party for the ensuing year. It elects the Chairman, the General Secretary and members of the Executive. It can amend the Constitution. Its decisions are binding on all the members of the Party, the various branches of the Party and the affiliated organizations. The National Council is a smaller body than the National Conference and consists of one-fifth of the number of delegates to the National Conference. It meets at least once between any two Conferences and takes such decisions on policy and organization as are not inconsistent with the decisions of the National Conference. The National Executive which is the highest executive organ of the Party consists of a Chairman, a General Secretary and 23 members all elected by the National Conference. The Chairman of the Executive Committee also presides over the General Council and the following meeting of the National Conference. During the year in which he is chairman he acts as the chief spokesman of the Party.

A unique feature of the National Conference is that at least 10 per cent of the delegates elected by individual members from each Provincial Branch should be women.

The National, Provincial, District and City Secretaries of the Party are all full-time workers.

ELECTION MANIFESTO

The National General Council of the Socialist Party adopted a 12,000-word programme on the basis of which the Party contested the election to the Union and State Legislatures. It was not a long-term programme; it set out what the Party would do in the next five years, if returned to power.

Food and Agriculture: (1) Abolition of zamindari without compensation. The maximum holding per farming family will be 30 acres of average productivity. All land above this maximum holding shall be taken over and distributed among poor peasants and agricultural labourers.

(2) The petty zamindars, however, will be given rehabilitation compensation and proprietors of land possessing more than 30 acres will receive an annuity for ten years on holdings up to 100 acres.

(3) Village panchayats elected by universal suffrage and the multi-purpose co-operative societies shall be the pivot of the reorganised agrarian economy. The panchayats will tabulate the resources and needs of their villages and prepare a crop-plan which will be sent to the higher organs of the Planning Commission.

(4) There will be a thorough overhaul of the State machinery and the present multiplicity of agricultural departments will give way to an integrated administrative machinery consisting of land commissions at regional, State and Union levels.

The commissions will consist of representatives of village panchayats, co-operatives and Government and agricultural experts. They will deal with rural credit, technical help, land revenue, irrigation, cottage industries, crop-planning, river training, flood control, export and import of agricultural produce and supply of agricultural implements.

(5) To improve the productivity of land, land volunteers will be organised who will undertake minor construction works such as digging of wells, compost pits, draining water-logged lands, building bunds and roads.

(6) A food army raised and equipped by the State will bring new and waste lands under cultivation.

(7) All forms of co-operation including joint farming will be encouraged; collective farms will be organised on lands reclaimed through the food army.

Industry: (1) In order to release the productive power of the community, certain industries will be taken over by the State. Nationalisation of banks and insurance companies will help capital formation; social ownership of key industries like iron and steel, power, mines, chemical fertilisers and plantations is essential for planned economic development; taking over of the derelict textile, sugar, and cement industries which have failed the consumers so utterly, will enable the State to satisfy the basic needs of the common man.

(2) The rest of the industries will be in private hands. State control will be so devised as to remove all restrictions on production and to give an opportunity to entrepreneurs, to explore, experiment and expand.

(3) The emphasis will be not on capital intensive but on labour intensive technique. Small machines will be fabricated for this purpose with the help of the world's best technical talent.

(4) In the nationalised sector there will be autonomous public corporations competing among themselves and municipal enterprise which will avoid dangers of monopoly, centralisation and bureaucratisation.

(5) Workers will be represented on these corporations through their works committees and production committees. In joint stock companies workers' participation in management will be compulsory. In proprietory concerns their interest will be safeguarded through a system of double audit. Management, however, will be the responsibility of the proprietors.

(6) Provision will be made for sickness insurance, maternity benefits and old-age pensions. The principle of union-shop—every worker a union member—will be introduced and internal democracy within the union will be safeguarded.

(7) Producers' co-operatives and handicrafts will be encouraged by reserving certain lines exclusively for them. State initiative will break the stalemate in industry.

(8) The planning machinery will be built from the bottom upwards. Village panchayats, public corporations, local bodies, co-operatives and associations of small manufacturers, workers and handicraftsmen will prepare inventories of their resources and their productive capacity and facilities required for increasing productivity.

These plans will be scrutinised and finalised by planning commissions at State and Union levels. On these planning commissions will be represented all interests including the consumers. The primary bodies mentioned above will be responsible for carrying out these plans.

Trade and Controls:—There will be State trading corporations which will import and procure all requirements of the nationalised sector and scarce capital goods and industrial raw materials. Village produce will be disposed of through multipurpose co-operatives which will also buy the requirements of the village on a wholesale basis. The rest of the trade will be in private hands. State control over it will ensure both traders' and consumers' interests. In order to avoid corruption and black-marketing, instead of the present partial and ineffective controls, rational and integrated controls right from raw materials and capital goods will be devised. Democratic check will be provided by associating consumers and workers at every stage of manufacture and distribution.

Public Finance:—Measures of economic equality such as capital levy and ceiling on income will change the character of public finance. Public revenue will be so distributed as to leave increasing resources to the organs of administration closest to the people. Public expenditure will seek to augment production and not merely maintain law and order.

Economic Equality:—To reduce disparities in wealth the State will abolish all the privileges of Princes. Taxation measures and graduated capital levy will be used (1) to curtail privilege and concentration of property and (2) to bring all incomes within the range of floor of Rs. 100 and ceiling Rs. 1,000. The floor and the ceiling will rise with increase in production.

Social Mobility:—All barriers of caste will be pulled down. The Scheduled Castes and Tribes will be settled on reclaimed lands. A vast sum of Rs. 100 crores will be spent over a period of 10 years to provide educational opportunities to Scheduled Castes and Tribes. In public services there will be reservation for them at least in proportion to their population.

Constitution:—Changes directed at (1) restricting the property rights enjoyed by a microscopic minority which stands in the way of the community's advance, and (2) expanding the sphere of people's freedom will be introduced. States will be rearranged on a linguistic basis, the boundaries of which will be determined by a boundary commission. All States thus brought into being will have equal status.

India must withdraw from the British Commonwealth and thus redeem the pledge of complete independence.

Administrative Reforms:—Administrative reforms will root out corruption, bribery, inefficiency and red tapism; (1) justice will be made cheap and fact-finding and punitive functions will be separated; (2) public opinion will be associated at each level of the executive; (3) there will be periodic departmental meetings of the staff to improve efficiency and cut out red tape; (4) talent discovered in the ranks will be offered opportunity of special training and exercise of initiative; (5) legislative standing committees will act as vigils; (6) promotion and demotion will be based on fulfilment of targets and efficiency audit; (7) an anti-corruption authority will deal with all cases of bribery and corruption. Major offences will be dealt with by special Courts.

Foreign Policy:—India's foreign policy will be based on (1) abstention from disputes between the Atlantic and Soviet camps; (2) collective security arrangements for the belt stretching from Indonesia to Egypt; (3) co-operation with such U.N. agencies as might help to increase living standards of retarded peoples and abolish hunger and war; (4) opposition to all charters and agreements that bolster up the international caste system of rich and powerful nations on the one hand and the weak and poor nations on the other. India will also support freedom movements in Africa and Socialist movements everywhere.

ELECTIONS

The Socialist Party, which contested the largest number of seats after the Congress, was generally unlucky with the electorate. Of its 1,793 candidates for the Assemblies only 126 were returned; they, however, polled over eleven million votes—9.62 per cent. of the votes cast.

The largest bloc of Socialists returned is in Bihar, home province of their leader, Mr. Jayaprakash Narayan, where they won 23 of the 264 seats they contested. The other States where they secured a fair number of returns are U.P. (18), Madras (13), Travancore-Cochin (12), Vindhya Pradesh and Hyderabad, 11 each; Orissa (10) and Bombay (9).

The worst defeats for the party came from West Bengal, Punjab and PEPSU, where they failed to secure any seat.

Of the 295 seats in the House of the People contested by the party, it secured only 12.

AFTER THE ELECTIONS

In February, 1952, The National Executive of the Socialist Party meeting at Madras adopted a 1,200-word review of the General Elections and pledged itself to redouble its efforts to bring together all parties "sharing a common vision" to further the process of political development of the country.

The Executive invited fraternal parties to come together and build up the vital leadership that the people needed to fight and end "the reactionary rule of the Congress".

Regarding the Socialist Party's attitude towards ministry formation, it said, "The newly-elected members of the Socialist Party in the Legislatures will form no alliance, much less coalition with the Congress or the Communist Party. At the same time, they will function as a democratic opposition to whatever Government is established, fighting for a clean administration, for a lower cost of living and a fair deal to the masses, including the middle classes, for policies of social change and for the liberties of the people. It will be the party's constant endeavour to work in co-operation with like-minded representatives in the Legislatures".

PARTY CONVENTION 1952

A five-day special convention of the Socialist Party held at Pachmarhi in the last week of May adopted an 8,000-word "political line" designed to achieve "a consolidated party of Radicalism and Socialism".

The six-point statement said: (1) The Socialist Party will not confuse its identity by coalitions or fronts with the Congress and the Communist parties and its features will be sharply distinguishable from both these parties.

(2) Comprehensive constructive work will be the continuing mode of the Party's action and every member would participate actively in the community life.

(3) Satyagraha or struggle should become the natural reaction of the Socialist to injustice when constitutional methods have exhausted themselves.

(4) The Party desires closer co-operation with the Sarvodaya movement which is actuated by an urge for a social change.

(5) The Party is anxious to draw closer in working co-operation with parties other than the Congress and Communist in the hope of creating opportunities for achieving a consolidated party of Radicalism and Socialism.

(6) The Socialist Party reaffirms its policy of uncompromising opposition to groups or parties that base themselves on communalism.

The General Secretary of the Party, Mr. Asoka Mehta, in a report submitted to the special convention, attributed the large-scale defeat of the party in the general elections to the multi-lateral contests in single-member constituencies, lack of adequate resources, the "limited propaganda" in certain areas, the absence of "pockets of strength" and "premature confidence" due to victories in earlier by-elections.

Mr. Mehta asked the Party to build up from "bottom upward" with the support of the people in the constituencies where it had won by intensifying the membership campaign with a broad-based approach, and in the constituencies where it had lost by a small margin by establishing maximum contact with the people and starting constructive work.

"The polarisation of the country between the Congress Party and Communist Party", he said, "would not only mean the end of democratic processes and of the freedom of the people to question and to change, but an invitation to internal strife". The necessity of socialism for internal consolidation was the same as that of a third camp in building world peace.

Mr. Jayaprakash Narayan, in his address to the convention, said that the Socialist movement should be broadened by the inclusion under an alliance of various smaller parties which had something in common with the Socialist Party. He mentioned the K.M.P.P., the Subhashite Forward Bloc, the Revolutionary Communist Party, besides the Scheduled Castes Federation and the Jarkhand Party with which the Socialists already had alliances.

The National Executive of the Party also appointed a committee under the chairmanship of Mr. Jayaprakash Narayan to launch a national peace movement to secure redistribution of land.

THE COMMUNIST PARTY OF INDIA

General Secretary: Ajoy Kumar Ghosh.

The supreme body of the Party exercising authority and leadership is the Politbureau, composed of the following seven members: Ajoy Ghosh, E. M. S. Namboodiripad, C. Rajeshwar Rao, S. A. Dange, P. Ramamurty, Muzaffar Ahmed, Jyoti Basu.

The party claims a total membership of about 60,000.

Before the election of Mr. Ajoy Ghosh, there was a short period in which Mr. Rajeshwar Rao, the Andhra leader acted as the General Secretary of the Party after the removal of Mr. B. T. Randive.

The Party conducts several dailies and weeklies in the major Indian languages, prominent among which are *Swadhinata* in Bengali, *Janashakti* in Tamil, *Deshabhimani* in Malayalam, *Prajashakti* in Telugu and *Cross Roads* in English.

The Party controls the All-India Trade Union Congress, the All-India Kisan Sabha and the All-India Students' Federation.

The general elections helped to revive the flagging morale of the party resulting from a series of schisms, rehabilitate its prestige with the public and make for smooth functioning as a result of wholesale release of detenus and lifting of bans.

Together with the other United Fronts and People's Front groups, the Communist party secured over 60 lakhs votes—6 per cent of the total in the general elections.

Out of 580 candidates put up for the State Assemblies, 189 were successful. In the elections to House of the People, 20 candidates out of 91 put up by the party were returned. Seven independent candidates sponsored by it were also returned to the House of the People. In the Council of State at the Centre, it secured 13 seats.

SOCIAL WORK IN INDIA

SOCIAL service institutions such as the *Annachatra* for the poor, the *Dharmashala* for the traveller and the temple for the homeless and destitute, have existed in India from the earliest times.

In the pre-British period, Indian social life was largely characterised by the caste system which had a socio-economic significance; the joint family provided social insurance and security and the panchayats in the villages ensured social justice and covered local indigence.

The period under foreign rule witnessed a destruction of the older social structure in India. In the newer structure that emerged a number of reforms and institutions were introduced by bodies like the *Bramho Samaj*, the Prarthana Samaj, the Ramkrishna Mission and the Arya Samaj. Though these organisations were in the nature of religious orders, they took it as a part of their faith to serve the needy and the suffering. The Arya Samaj and the Ramkrishna Mission sponsored social reforms, established orphanages, widows' homes, free dispensaries and relief centres in periods of emergency.

During this period pioneering work in many neglected fields of service, *e.g.* foundling homes, leper asylums and institutions for the maimed and the handicapped, was undertaken by Christian missionaries in the country.

By 1920 Mahatma Gandhi's contribution began to gain recognition throughout the country. Even though he considered the political solution of greatest importance he provided for a number of constructive social welfare programmes through organisations like the Harijan Sewak Sangh, All India Village Industries Association, Charkha Sangh, the Hindustani Talimi Sangh, Goseva Sangh, and the Kasturba Gandhi National Memorial Trust, etc.

The late '30s saw the formation of the first popular Ministries in eleven provinces in India. During the same period professional social work began to be recognised with the starting of the Sir Dorabji Tata Graduate School of Social Work in the year 1936. It was sought to develop specific techniques in social work based on the scientific understanding of personal and social problems. As such it required not only personal sacrifice of the worker and religious devotion, but specific skills based on an understanding of human personality and social processes.

The new profession generally covers the following fields of social work: Community Welfare Services; Family, Child and Youth Welfare Services; Public Welfare Administration; Services for the maladjusted and handicapped groups; Social Defence and Correctional Administration; Services for Emergency Relief and Rehabilitation; Social Legislation and Social Action; Social Research; Training in Social Work.

The attitude of the Indian Government towards State responsibility for social welfare is reflected in Part IV of the Constitution which lays down the "Directive Principles of State Policy", as follows:—

"The State shall strive to promote the welfare of the people by securing and protecting as effectively as it may, a social order in which justice, social, economic, and political, shall inform all the institutions of the national life."

The legal base for governmental action in social welfare matters rests on laws and ordinances enacted by the Central Government, the State governments and the municipalities and local bodies. The Union list, the State list and the concurrent list in the Constitution lay down those spheres of social legislation which are common and those which are different in regard to the Union and State powers.

SOCIAL LEGISLATION

Social legislation on an All India scale dates back to 1843 when the first law abolishing slavery was passed. The earlier laws sought to reform the evil social practices existing at the time, practices such as *Sati*, infanticide, and child marriage. Later, social legislation began to assume a more positive and constructive role. Laws for better working conditions in factories, laws providing maternity benefits, for the abolition of traffic in women and children, and laws for the protection and care of destitute and delinquent children have all received attention in the first half of this century.

The post-independence years have seen an unprecedented increase in social legislation. Among the laws framed by the Government have been laws stipulating the Employees' State Insurance, Provident Fund for Industrial workers, a more comprehensive and liberal Factories Act (1948), the Minimum Wages Act, the Hindu Code Bill, etc.

In India, the Central Government does not have a special ministry or department for social welfare. The Ministries of Health, Education, Labour and Agriculture undertake several important social services. A special Ministry for Relief and Rehabilitation was established in 1947 to cope with the emergency situation arising from the partition of the country and the consequent immigration of displaced persons. In addition, other departments like the Ministry of Defence and the Railways maintain separate sections for the welfare of the employees and their families.

Yet another special department is that of the Scheduled Castes and Tribes(under the direction of a Commissioner) which is attached to the Home Ministry and functions under the President.

A Planning Commission was set up in March 1950 by the Government of India and was entrusted with the over-all assessment of resources and planning for economic and social welfare. Chapter 18 of the Planning Commission Report outlines an approach to matters of social welfare in India.

The State governments likewise entrust welfare work to the Ministries for Education, Health, Labour, Home and Rehabilitation.

The need for State interest and social action in the following spheres is apparent: Sponsoring progressive social legislation; Presenting model programmes; Collecting and distributing resources; Supporting research work; and Creating a suitable machinery for co-ordination of social services on a country-wide basis.

There is no system of giving cash relief in India that corresponds to the programmes of Public Assistance of various countries.

The Employees' State Insurance Act when fully implemented will benefit the three million industrial workers in the country in the matter of injury, ill-health, etc.

Matters regarding Health Services have been covered in detail by the Bhore Committee Report, those concerning Labour are dealt with under a separate section in this book.

The question of traffic in women and children has received the attention of the Government but in the absence of adequate rehabilitation services, an abolitionist policy has not been followed on a country-wide basis. Some of the larger cities leave programmes dealing with prostitution to private agencies. Those co-operating with the Government in this work are given government grants-in-aid. The work of the Vigilance Association of Madras is an example of the co-operative effort of Government and voluntary agencies. This problem was highlighted by the plight of displaced persons following the riots in 1947. The Ministry of Relief and Rehabilitation initiated programmes for the rescue and rehabilitation of abducted women.

Minimum standards for conditions in prisons are not laid down for the country as a whole. Standards vary from State to State. A plea for a Uniform Manual for all the States has been made to the Planning Commission.

The Ministry of Education of the Central Government has recently sought to formulate a co-ordinated programme to tackle juvenile delinquency. The plan is to include Juvenile Courts, Remand Homes, Schools and a probation and parole system. The scheme envisages the passing of a Model Children's Act and a pilot project financed by the Centre for Delhi area which would eventually be followed by the States.

An All India Society for the Prevention and Treatment of Crime was established in 1950 with Lucknow as its headquarters.

A pilot scheme of Adult Education is already under way in Delhi. Special permanent staff has been recruited and trained for the purpose.

The Government of Madhya Pradesh is also implementing a special scheme of social education offering a State-wide programme. The Bombay Committee of Social Education has also done valuable work in the field.

Anti-beggary acts have been passed in Madras, Uttar Pradesh, Hyderabad, Cochin, West Bengal, Mysore, Madhya Pradesh, and the Punjab. Institutional care for beggars is provided in a few of the States to a very meagre extent.

The Government of India are keenly aware of the special difficulties and problems of the 25 million tribal people in India. In accordance with the Constitution, a Special Officer for Scheduled Castes and Tribes has been appointed by the President. The President is empowered to appoint a commission to report on the administration of Scheduled Areas and the welfare of Scheduled Tribes. For an interim period of ten years special reservations in the legislature and the services have been made for members of Scheduled Castes and Tribes. An expert committee of the Indian Conference of Social Work has published a memorandum recently making several recommendations on Tribal Welfare.

Rural reconstruction work has been entrusted to the State governments. Notable among these projects is the U.P. Government rural development programme in Etawah and another in Sholapur in Bombay State. A rural Firka Development project is under way in Madras. The Governments of Assam and Bombay have also implemented rural reconstruction schemes.

The Central Government Ministry of Education has recently opened a Rural Janata College near Delhi; this is an experiment in acquainting rural workers with newer techniques and methods of work in consonance with the particular local setting. The Kasturba Gandhi National Memorial Trust has set up a country-wide network of women and child welfare centres in the rural areas. They had in 1950, 18 training centres, 57 medical centres and 200 rural welfare centres.

In the absence of a central ministry or department of social welfare, there is no Central Government body which undertakes research or is in an authoritative position to furnish accurate and consolidated information on the extent of social services provided in the country. The body that seeks to fulfil this need is the Indian Conference of Social Work.

The following tables quoted from "An Essay on National Income and Expenditure in India" by Dr. B. Natarajan, Economic Adviser and Jt. Secretary to the Government of Madras illustrates the budgetary provisions in Part A States in regard to social services:

State	1938-39 Amount (000)	1938-39 Per cent to Total	1938-39 Per Capita	1949-50 Amount (000)	1949-50 Per cent to Total	1949-50 Per Capita	Increase in No. of times: Amount	Increase in No. of times: Per Capita
			Rs. a. p.			Rs. a. p.		
Madras	3,86,89	24·03	0 13 0	12,93.12	23·23	2 6 5	3·36	2·06
Bombay	2,63,51	20·59	1 4 7	12,96,36	24·74	5 9 4	4·92	4·34
Madhya Pradesh	76,82	16·31	0 7 6	3,79,90	20·21	2 1 5	4·95	4·46

VOLUNTARY SOCIAL WORK

The groups of voluntary social work in India largely fall under the following heads: State Administrators and officials; Trained or Professional social workers; Missionaries; The Gandhian social workers; and Voluntary social workers belonging to the various private agencies.

Of these the religious believe in the traditional form of charity, the Missionaries in institutionalised social work, the Gandhian in the 14-point constructive programme, and the other voluntary workers in secular service on humanitarian grounds.

The group of professionally trained social workers is small though more compact. This group consists of some 400 alumni and teachers of the four post-graduate schools of social work in India, *viz.*, The Tata Institute of Social Sciences in Bombay, Delhi University School of Social Work, the Faculty of Social Work of the M. S. University of Baroda and the section on Social Sciences in Shri Kashi Vidyapeeth, Banaras. In the last mentioned institute the medium of instruction is Hindi.

The establishment of the Indian Conference of Social Work at a meeting of over 450 social workers assembled in Bombay in November 1947 marks a significant development in the field of social work in India. The Conference undertakes and promotes the study of social problems and endeavours to bring about co-operation, collaboration and co-ordination amongst social service agencies in India and abroad.

Other social service bodies working on an All India level are mentioned below:—

CHILD WELFARE

Balkan-ji-Bari ('Gulistan', Khar, Bombay 21); Society for the Protection of Children in India (2-B, Camac Street, Calcutta).

YOUTH WELFARE

Y.M.C.A. (5, Russel Street, Calcutta); Y.W.C.A. (37, Cantonment Road, Lucknow, U. P.); Bharat Scouts and Guides Association (Regal Building, Parliament Street, New Delhi).

WOMEN'S AND FAMILY WELFARE

All India Women's Conference (41, Queen's Barracks, Foreshore Road, Fort, Bombay 1); Family Planning Association of India (Morarji Mansion, Darabsha Road, Bombay 26); National Council of Women in India (C/o Mrs. Sarladevi Sarabhai, 'Retreat', P.O. Shahibaug, Ahmedabad).

HEALTH

Tuberculosis Association of India (20, Talkatora Road, New Delhi); Indian Red Cross Society (20, Talkatora Road, New Delhi 2); All India Cancer Prevention Society Tata Memorial Hospital, Parel, Bombay).

REHABILITATION OF THE HANDICAPPED

Convention of the Teachers of the Deaf in India (50, Bondel Road, Ballygunj, Calcutta); All India Light House for the Blind (89, Elliot Road, Calcutta); National Association for the Blind (Victoria Memorial Blind School, Tardeo, Bombay 7).

RURAL WELFARE

Sarva Sewa Sangh (Maganwadi, Wardha M.P.); India Village Service (10, Mall Avenue, Lucknow, U.P.).

GENERAL SOCIAL WELFARE

Servants of India Society (Poona 4); Ramkrishna Missjon (Belur, Dist. Howrah); Gandhi Memorial Fund (C/o Govt. House, New Delhi); Salvation Army (Moreland Road, Bombay 8); Friends' Service Unit (1, Upperwood Street, Calcutta).

RURAL WOMEN'S WELFARE

Kasturba Gandhi National Memorial Trust (Kasturbagram, Indore, Madhya Bharat).

RELIEF AND REHABILITATION

United Council of Relief and Welfare (Govt. House, New Delhi).

SOCIAL EDUCATION

Indian Adult Education Society (7, Faiz Bazar, Delhi); Nai Talimi Sangh (Wardha, M.P.); Jamia Milia (Okhla, Delhi).

WELFARE OF UNDER-PRIVILEGED GROUPS

Harijan Sewak Sangh (Kingsway, Delhi); Bhartiya Adimjati Sevak Sangh (Kingsway, Delhi).

SOCIAL DEFENCE

All India Crime Prevention Society (Behari Niwas, Kanpur, U.P.): Association for Moral and Social Hygiene in India (Room No. 212, 'P' Block, Raisina Road, New Delhi).

The national organization for the co-ordination of welfare services is the Indian Conference of Social Work located at Dinshaw Wachha Road, Churchgate, Bombay 1.

LATEST DEVELOPMENTS

The Government of India have given evidence of their interest in social work by setting up in the Planning Commission a special section for social services. In 1950 the Ministry of Education, Government of India, appointed an All India Social Welfare Advisory Board to give advice on important matters pertaining to social welfare work in the country.

In this connection, the Indian Conference of Social Work, the All India Association for Social and Moral Hygiene and other social work bodies have been unanimously and repeatedly urging upon the Government the need to create a separate Ministry for Public Welfare. It is argued that such a ministry would consolidate the welfare services of the Government now scattered under several portfolios under one, and that it would be more economical and efficient. This demand was also supported by the State Conferences of Social Work held in Madras, Mysore and Bihar.

"National Planning for Social Welfare" was discussed at the Bihar and Madras Conferences. It was also the main theme of the Fifth Annual Session of the Indian Conference of Social Work held in Calcutta in December 1951. In Mysore discussion centred round "family planning".

The first All India Conference for the Blind met in Bombay in January 1952 and formed the National Association for the Blind.

In recent years several International bodies which were hitherto confined mostly to European and American countries have taken active steps to canvass membership in the Eastern countries and to highlight problems of vital interest to the underdeveloped regions.

At the instance of the Indian Conference of Social Work, the International Conference of Social Work is holding its Sixth session at Madras in December 1952. The theme for deliberation is "The Role of Social Service in Raising the Standard of Living". A South-East Asia Regional Office of the International Conference of Social Work has been established in conjunction with the Indian Conference of Social Work in Bombay.

A seminar on Youth Welfare was held in Simla in November 1951 under the joint auspices of the Government of India and the Far Eastern Office of the U.N. Technical Assistance Administration. The Family Planning Association of India organized a Conference on "Family Planning and Population Problems" in Bombay in November-December 1951. The International Organisation of Planned Parenthood is also holding its next session in India in December 1952. The International Union for Child Welfare is arranging a study conference in Bombay in December 1952.

In the field of training in social work, the Government of India set up a committee for standardisation of courses in social work at the post-graduate level. This was followed up by the Indian Conference of Social Work which appointed a Committee representative of the four post-graduate schools of social work mentioned above and a few prominent voluntary workers to recommend courses in social work to suit the needs of the country at different levels, and different settings. This work will be greatly helped by the deliberations of the International Committee of Schools of Social Work which is expected to meet in December 1952 under the presidentship of Dr. Rene Sand of Belgium. The main subject for consideration will be higher training in social work in Asia to suit the needs of the region.

The following institutions already afford training at the post-graduate level:—

1. The Tata Institute of Social Sciences (105-9, Ghodbunder Road, Andheri, Bombay).
2. The Delhi School of Social Work (3, University Road, Delhi 8).
3. The Faculty of Social Work (The M.S. University of Baroda, Baroda).
4. The Institute of Social Sciences (Shri Kashi Vidyapeeth, Banaras Cantt., U.P.).

THE WOMEN'S MOVEMENT

THE last 20 years have seen many changes in the position of Indian women in social, cultural and political spheres. They have come a long way since the early years of the Home Rule Agitation (1914-1917), when first they awakened to a consciousness of their rights. From that day onward there has been no looking back and the movement, gaining momentum with the years, has achieved remarkable results. The measure of success attending the endeavours of women in this country during the last two decades can best be gauged from a study of the rights, social and legal, no less than political, that they have acquired since the movement was launched.

Today the Indian woman is not only represented in almost every field of national activity but is also making her mark in international affairs. A woman—Rajkumari Amrit Kaur—holds the Health portfolio in the Central Cabinet. Another woman has been a provincial Governor and Minister, there are women members in the Indian Parliament and provincial legislatures; women have figured on delegations to U.N. and have represented India on the U.N.E.S.C.O. and the various subordinate organisations of the United Nations. There are women doctors, lawyers, engineers, architects, artists, journalists, business executives and nurses.

Although Indian women hold important posts in various Government Departments, the problem of employment is very acute. Apart from that, the prejudice against women working still persists to a great extent. It would, however, be worth while mentioning that the majority of Indian women work a full day on the land and in the factories. Wages of women working in factories are considerably lower than those of men.

WOMEN'S SUFFRAGE

It would not be wrong to say that Indian women have accomplished much more in much less time than the women of the West, and seemingly with much less effort and opposition; the last because of the sympathetic attitude of political leaders and elder statesmen as far back as 1917. It was in that year that the first claim for suffrage for Indian women was made in an address presented to Mr. Montague at the historic All-India Women's Deputation, which waited upon him in Madras on December 18, 1917. The section referring to enfranchisement merits full quotation:—

"Our interests, as one half of the people, are directly affected by the demand in the united (Hindu-Muslim Reform) scheme (I. 3) that 'the Members of the Council should be elected directly by the people on as broad a franchise as possible,' and in the Memorandum (3) that 'the franchise should be broadened and extended directly to the people.' We pray that, when such a franchise is being drawn up, women may be recognized as 'people,' and that it may be worded in such terms as will not disqualify our sex, but allow our women the same opportunities of representation as our men. In agreeing with the demand of the abovementioned Memorandum that a full measure of Local Self-Government should be immediately granted, we request that it shall include the representation of our women, a policy that has been admittedly successful for the past twenty years in Local Self-Government elsewhere in the British Empire. The precedent for including women in modern Indian political life has been a marked feature of the Indian National Congress, in which, since its inception, women have voted and been delegates and speakers, and which, this year finds its climax in the election of a woman as its President. Thus the voice of India approves of its women being considered responsible and acknowledged citizens; and we urgently claim that, in the drawing up of all provisions regarding representation, our sex shall not be made a disqualification for the exercise of the franchise or for service in public life."

The year 1918 was devoted to converting the Government forces to the justice and expediency of Indian Woman Suffrage, but this proved a more difficult matter. It was a disappointment first, that, though the Secretary of State had given a sympathetic reply to the All-India Women's Deputation, yet when the Scheme of Reforms, drawn up by him and Lord Chelmsford was published, no mention of women was made though the widening of the electorate was one of the reforms suggested. When the Southborough Franchise Committee was formed to investigate the suggestions regarding the franchise in this Scheme, the women suffragists took every means to bring to the notice of the Committee all the evidence which pointed to the need for, and the country's support of, the inclusion of women in the new franchise.

FRANCHISE GRANTED

After the introduction of the Government of India Bill into Parliament in July 1919, a number of Indian deputations proceeded to London to give evidence before the Joint Select Committee of Members of both Houses of Parliament which had been appointed to place the Reforms on a workable basis. Mrs. Annie Besant, Mrs. Sarojini Naidu and Miss Herabai Tata were heard by the Committee in support of the extension of the franchise to women in India.

The House of Commons decided that the question was one for Indians to answer for themselves and while retaining the sex disqualification in the Reform Bill they framed the Electoral Rules in such terms that if any Provincial Legislative Council should approve by a resolution in favour of women's franchise, women should be put on the electoral register of that Province. This was the only provision regarding franchise matters which might be changed before a 10 years' time limit. Until after that period women were ineligible for election to Legislative Councils.

Madras led the way in the matter of women's franchise and under the operative provision of the Government of India Act, women were enfranchised. Other provinces followed suit, and by the time of the inquiry by the Simon Commission seven out of the nine provinces had acquired the right. And the women justified the confidence placed in them by sponsoring and successfully carrying through many measures of uplift and reform in regard to the status and influence of women.

Though the Municipal franchise was granted to the women in the Bombay and Madras States over sixteen years ago it was so limited in numbers that it did not make any large impact on women's consciousness, and indeed no protest was made when it was suddenly withdrawn from Madras women some years later.

A unique step has been taken in Bombay city with the adoption of adult franchise. All women, above the age of 21, are qualified to vote for the Bombay Corporation. In other Municipalities in that State too, women exercise their vote intelligently. Since 1922 scores of women have become Municipal Councillors and members of Local Boards. Their appointment has chiefly been by nomination but there have been notable instances of seats won by election in open contest with men, such as the election of all the four women who first entered the contest for seats in the Bombay Corporation, or the one in which the single woman contestant in the Municipal elections in Lucknow secured the largest poll of any of the candidates. Many important local reforms have been secured by this large band of women councillors, and every year sees a greater number of women serving on these local Councils and Boards.

Both evidence and result of the awakening among Indian women are to be found in nearly half a dozen legislative measures sponsored by women legislators, notably in the Bombay Assembly, calculated to confer greater rights and freedom on women.

The right of divorce which was unknown to Hindu Law has been secured under certain conditions. In Bombay, antipolygamy and divorce laws have been placed on the Statute Book.

Now that the new Constitution has come into force women have the same voting rights for the various legislatures as men have. In the first general elections in 1952 women voters played a big part in settling the final issue in many contests in the urban areas.

ALL-INDIA WOMEN'S CONFERENCE

It was the Home Rule agitation in the years 1914-17 which first made women conscious of their own rights. The internment of one of their own sex, Dr. Besant, stimulated political activity and political self-consciousness amongst women to a very great extent. The moment for giving public expression to their feelings came when the Secretary of State for India arrived in India in 1917 to investigate and study Indian affairs at first-hand.

Indian women have in the past ventilated their grievances and demands through their many organisations. Even today these are the official organs of the voice of India's women. The All-India Women's Conference is still the principal body claiming a membership of about 27,000 with 40 branches and 164 constituent branches.

The All-India Women's Conference came into existence, as a result of the initiative taken by Mrs. Margaret Cousins, towards the end of 1926, the first session of the conference being held at Poona in the first week of January, 1927. In the beginning it was inclined to concentrate its attention on the basic question of women's education. The resolutions passed at the first conference were almost wholly devoted to the different aspects of women's education, the only exception being a resolution condemning child marriage and supporting Sir H. S. Gour's Age of Consent Bill. Even this subject was touched upon only because it was felt that early marriages were a very serious impediment in the progress of girls' education.

Such a narrow programme could not, however, be expected to satisfy the leaders of the women's movement for a long time and it was not surprising that at the third session the scope of the conference was definitely widened to include social reform. Education of women, raising the age of marriage, removal of untouchability and caste restrictions, rural uplift, and reform of the laws of inheritance as affecting women are some of the more important of the subjects in which the conference has today interested itself.

A satisfactory feature of the women's movement in India has been the spirit of unity and co-operation behind it. A mere glance at the list of presidents of the All-India Women's Conference—which includes the Maharani of Baroda, the Begum of Bhopal, Mrs. Sarojini Naidu, Lady R. Nilkanth, Lady Abdul Qadir, Mrs. Faridoonji, the Maharani of Travancore, Mrs. Cousins, Rajkumari Amrit Kaur, Mrs. Rameshwari Nehru, Shrimati Vijayalaxmi Pandit, Shrimati Kamaladevi, Lady Rama Rau and Shrimati Anasuyabai Kale—should suffice to show that the Conference has never been affected by differences of caste, community, race or class.

This organisation, it may be noted, has latterly shown a tendency to move beyond the requirements of sectional plea and strayed into wider

political activity. It is not, however, difficult to explain this development. The women's movement gained considerable impetus by the part played by and the status accorded to, women in the intensive political movement conducted by Mahatma Gandhi and the Congress since 1920.

1951 Session

The 1951 session was organised at Bangalore in January 1951, when many problems engaging public attention were touched upon by Mrs. Hannah Sen, in her presidential address. Thus, education, the food problem, the Hindu Code Bill, nationality rights, rehabilitation of refugees, equality of pay for men and women, and women's new political importance resulting from adult franchise were among the subjects discussed by her.

"Indeed, the conference fully realizes that the days of agitation are not over, and that women cannot rest on their oars, as long as any vestige of discrimination exists," Mrs. Sen observed commenting on the Hindu Code Bill now before Parliament. Outlining women's views on the measure, she said: "In so far as it enforces monogamy, recognises the inheritance rights of the daughter, gives the mother an effective say in the adoption of a child, and concedes her claim to be the natural guardian of her children, and replaces the woman's limited estate by one of absolute control over her property, the Hindu Code Bill has become a document of vital concern to modern India. Some surprise has been expressed at the support given by the conference to this rather defective piece of legislation. If the women are behind it, it is not because it meets all their demands, but because they believe that half a loaf is better than none, and that each new reform can serve as a stepping-stone to another."

Equally forthright was the observation she made on nationality rights of married women. She emphasised that the Government while drafting the India Citizenship Bill should see that there was no distinction based on sex, and that neither marriage nor dissolution affected the nationality of the parties concerned.

RESOLUTIONS

The session passed a number of resolutions. The more important ones are given below:—

"This Conference deplores the hardship caused to small and middle income group families by large retrenchment of lower-grade Government employees without making provision for their absorption in suitable alternative jobs. It therefore urges the Government that economy in the administration should be effected by retrenching or scaling down the salaries of high-grade jobs."

"This Conference urges on the Central Government the necessity for introducing a suitable and uniform standard of weights and measures throughout the country so as to facilitate trade and minimise malpractices."

"This Conference views with great anxiety the deterioration of the food position in India, which has caused the recent 25 per cent cut in cereal rations. It believes that the Government should reconsider the whole of the question from the following angles:—*a*) Procurement, *b*) Storage, *c*) Distribution, and *d*) Rationing, and should adopt a uniform central policy which will force surplus areas to deliver foodgrains to a central agency, and thus assure equal distribution of foodgrains to all parts of the country.

"It urges Government to take stronger measures in suppressing black-marketeers and hoarders of grain, and to punish more severely those guilty of such anti-social practices.

"This Conference, recognising the enormity of the tasks of educating millions of women newly enfranchised under the adult suffrage scheme calls upon its members to make a special effort to organise an effective campaign for this purpose before the general elections, so as to impress upon women voters the need to exercise their vote judiciously. The Conference directs its branches to initiate propaganda and frame comprehensive questionnaires, incorporating the principles for which it has stood, to be used by the electorate to determine which of the candidates is most deserving of support. It also urges its branches to encourage qualified women to stand for election and demand that political parties include a fair proportion of women as candidates in the list."

"This Conference has always stood for the principles of social justice, equal rights and opportunities for all without distinction of caste, creed or sex. It views with grave concern the growth of reaction in social matters, and requests the Government, in conformity with the principles accepted in the Constitution, to take steps to frame a national civil code. However, as an interim measure to ameliorate the hardship of women under the existing Hindu Law, it calls upon all women's organisations to support the principles underlying the Hindu Code Bill, and to resist any retrogressive amendment to it, which will perpetuate the existing inequalities in regard to the rights of women in marriage, inheritance, guardianship and the adoption of children under the Hindu Law."

"This Conference requests the Central Government to start:—(*a*) research centres for cancer and an anti-cancer campaign on the lines of Tuberculosis, Leprosy and Malaria, etc. campaigns, and calls upon all social welfare agencies and the Government to start education propaganda in regard to prevention and early diagnosis of cancer, (*b*) this Conference resolves to participate in the World Cancer Day on the 2nd Sunday in April 1951 and in succeeding years, sponsored by the World Health Organisation."

The conference also unanimously adopted resolutions relating to world peace and family planning.

In the resolution on world peace, the delegates reaffirmed their belief that war was no solution for a settlement of international disputes, and that world conflicts could be avoided by following the path of negotiation. The conference supported all such efforts made by India and Asian countries to avert war.

In order to achieve this end, the conference recommended (1) progressive reduction of arms leading to total disarmament; (2) total elimination of all social, political and racial factors which discriminate against individuals and nations; (3) banning of atomic weapons and the use of mass education to bring about international understanding.

The second resolution, which was also unanimously passed, referred to family planning.

The resolution *inter alia* stated that the conference was of the opinion that the Central and State Governments should accept the principle of family planning in the interests of national economy and the health of women and children, and encourage study and research in birth control.

The conference, therefore, urged Government and Municipal health services to provide clinics for this purpose. The study of family planning in towns and villages was also urged.

Amendments proposed to the constitution of the All-India Women's Conference with a view to making its work more effective were also discussed. No final decisions on this point were reached at the end of the session.

NATIONAL COUNCIL OF WOMEN

The National Council of Women in India was established in 1925. The idea of such an organisation was conceived by a kindly English friend—Lady Aberdeen—the President of the I.C.W. at that time who first suggested to Lady Dorab Tata who happened to be in London at the time. She felt the necessity of establishing an All India Organisation to promote the general welfare of women and children and undertake all humanitarian activities so Lady Tata called a meeting of Indian women living in London. Among those who attended this meeting was Miss Cornelia Sorabjee who was mainly responsible for drafting the first resolution for the formation of the N.C.W.I. This resolution was adopted in 1924 and it was proposed to affiliate the existing women's organisations in various provinces to the main body.

The main aims of this body were the strengthening and co-ordinating of women's activities by federating the various associations working for the improvement of the position of women, and for social progress and for the material and moral advancement of women.

It was recognised by the I.C.W at its meeting held in Washington in 1925 and a provisional Draft Constitution was ready by 1926 with Bombay as the head-quarters for the first biennial period.

Its main objects can be summarised as follows:—To associate women of all communities in India for the promotion of the social, civic, moral and educational welfare of women and children; To co-ordinate, both nationally and locally, organisations in harmony with these purposes; To work for the removal of all disabilities of women, whether legal, economic or social and to promote such conditions of life as will ensure to every child, an opportunity for full and free development; To form a link with National Councils of Women in other countries through the International Council of Women.

The past records of N.C.W.I. and its State Councils reveal the enormous sphere of its activities in social work. Free primary education, medical examination of children, child and adolescent delinquency, brothels, film censorship, condition of labouring women in factories and mines, maternity benefits, creches and nursery schools, women's franchise, age of consent, the many legal disabilities of women—these were only some of the problems which have been dealt with by our Council workers.

During the trouble at Noakhali, it called a meeting of all women's association in Bombay and formed the Bombay Women's distress rehabilitation committee. It collected Rs. 60,000 out of which certain sums of money were sent to Bihar, Bengal and Punjab for relief work. Warm clothing, protective foods and medicines were given to thousands of refugees in camps at Delhi and Kurukshetra.

President, Sarladevi Sarabhai; *Hony. Vice-Presidents*, H.H. Maharani Chimnabai Gaikwar of Baroda, H.H. Maharani Setu Parvati Bai of Travancore, Mrs. Maneklal Premchand (*Bombay*), Lady Rachel Ezra (*Calcutta*), Lady Profima Mitter (*Calcutta*); *Vice-Presidents*, Keron Bose (*Calcutta*), Leah Jhirad (*Bombay*), N. B. Shome (*Calcutta*), S. B. Dass (*Cuttack*), N. Nayak (*Cuttack*).

CENTRAL EXECUTIVE COMMITTEE

Chairman, Man Mohini Sahgal (*New Delhi*), *Vice-Chairmen*, Lady Elizabeth Russel (*New Delhi*), G. C. Chatterjee (*New Delhi*).

Hony. General Secretary, Tara Ali Baig (*New Delhi*); *Hony. Jt. Secretary*, Janak Nanda (*New Delhi*); *Hony. Regional Secretary*, Anima Bose (*Meerut*).

The following are the Standing Sectional Committees by means of which the work of the Council is being carried out: Child Welfare (*Leah Jhirad*), Education (*Urmila Johri*), Entertainments (*Om Lata Bahadur*), Food, Nutrition (*Samson*), Housing (*D. L. Mazumdar*), Press, Bulletin (*Leelabai Phatke*), Relief, Rehabilitation (*S. Nirula*), Trades and Professions (*S. Chopra*), Village Welfare (*V. Acharaya*), Health, Hygiene (*Krishna Sethi*), Cinema, Broadcasting (*Mary Mathai*), Legislation (*Avi J. Kama*).

A Conference of all affiliated societies and provincial Councils is held biennially.

The following societies are affiliated to the National Council: National Y.W.C.A., Trained Nurses Association of India, All India Girl Guides Association, Association of Moral and Social Hygiene.

The following are the affiliated State Councils and Branches: Bombay Presidency Council of Women, Bengal Presidency Council of Women, Delhi Provincial Council of Women, Bihar Provincial Council of Women, Orissa Council of Women, N.C.W.I., Jamshedpur, N.C.W.I., Nagpur, N.C.W.I., Allahabad (U.P.), N.C.W.I., Trivandrum (Travancore), N.C.W.I., Lucknow, Simla Council of Women, Assam Provincial Mahila Samity, Rajasthan Council of Women, Jaipur.

In 1951 November the N.C.W.I. celebrated its Silver Jubilee.

Part of the Jubilee celebrations was a remarkable photographic exhibition. It displayed the wide range of activities in which the women of India have been taking part in the 1st half of the 20th Century.

At the meeting of the Governing Body during the celebrations the following resolutions were passed among others: Resolved that the N.C.W.I. considers it is of primary importance to educate voters in the necessity of exercising their right of vote in order to protect Fundamental Rights guaranteed by the Constitution. The enormous voting strength should support only such candidates as will stand for progressive legislation.

Resolved that the N.C.W.I. must be vigilant in ensuring that the Electoral Rolls are properly made out and kept up-to-date.

The N.C.W.I. recognises the urgent necessity of Family Planning and urges the State Councils and affiliated bodies to educate men and women in the principles of family planning.

The N.C.W.I. regrets the fate the Hindu Code Bill met at the hands of the legislators, and feels that in one secular state it is imperative that a uniform civil code be adopted for all citizens.

Bengal Presidency Council of Women

The Calcutta League of Women Workers was renamed the Bengal Presidency Council of Women in 1925 at the instance of Miss Cornelia Sorabjee.

One of its first constructive works was the arrangement of ladies' seats in Calcutta tram cars in 1926. Members took an interest in subjects like labour conditions, women's legal status, comforts and needs of women, Haj Pilgrims in the steamers, homes of guilty pit boys, night schools, follow up of released juvenile offenders through play centres formed for them, appointment of women magistrates in children's courts, visits to reformatory schools, introduction of compulsory health examination of school children, visits to jails, investigation of living conditions of political women prisoners, appointment of a member of the Council of Film Censor Board.

Other activities have been the formation of all Bengal Women's Union to promote the Immoral Traffic Amendment Bill, formation of a Nurses' Hostel and Club, establishment of a leper home, infant welfare work, after care of Ranchi patients, mother craft among Purdah women.

By constant pressure the Council had a vagrants' home opened and creches started for the women workers of the jute mills and the local mines. It also persuaded the Government to start a women's police force.

The Council has raised funds from time to time for such causes as Dufferin Hospital, Safety First, Polish Relief, Kasturba Gandhi Fund, Sind Refugee Fund, etc.

Bombay Presidency Women's Council

In Bombay city there are at the moment over 80 organisations working for the betterment of women and children and the women of this city have been foremost in every movement social, political and cultural.

Bombay's oldest organisation is the Bombay Presidency Women's Council started in 1919 under the presidentship of Lady Willingdon. It is among the pioneer organisations in India possibly the very first, and has grown and expanded greatly since its inception. Its original aims and objects to centralise all social and philanthropic work throughout the province have not been forgotten and today the Council has 31 local bodies affiliated to it and branches at Ahmedabad, Poona, Sholapur and Belgaum.

Creche work in mills was the first problem which was tackled followed by infant and maternity welfare. The Council played a leading part in the revision of factory laws, maternity benefit, housing conditions of workers living in chawls, regulation of wage payments, better conditions for *bidi* workers. The Council also submitted a memorandum to the Royal Commission appointed to inquire into the conditions of working women.

Through its Parliamentary Sub-Committee the Council does propaganda for social legislation and in the past two years has been very active in the discussions on The Hindu Code Bill, the Bill to regulate and validate Marriages between various castes and sub-castes, the Bill to further amend the Child Restraint Act, 1929, the Bill to restrain the Custom of Offering and Taking of Dowry in Marriages, Bills to amend the Indian Penal Code and the Criminal Procedure Code, the Bill to abolish the matriculation examination, and the Bill to prohibit Excommunication in the Province of Bombay.

It was the B. P. W. C. which initiated the agitation for controlling beggary 21 years ago and propaganda from then to this day has resulted in the legislation which came into force in March 1946.

Rescue Home

One of the most important activities of the Council is the Rescue Home for Indian Women at Umerkhadi where hundreds of girls have found shelter. Provision is made in the Home for medical treatment, and facilities for education and vocational training are afforded. Government have recognised the importance of this work and have provided accommodation for the institution; a nominal grant for its upkeep is also being given.

Matunga Labour Camp

The Council's Labour Sub-Committee has been doing a considerable amount of social work in a labour camp in the north of Bombay. The Council runs a dispensary and conducts sewing and literacy classes for the women in the camp. The workers of the camp have been persuaded to form a co-operative society through the Committee's efforts.

Children's Holiday Library

Another important activity of the Council has been the running of a holiday library for children for the last four years. This effort has been very successful, the average daily attendance at the library being 800. The Council has approached the Government of Bombay with a request to put the holiday library on a permanent basis.

The Literacy Sub-Committee of the Council has for several years been conducting literacy classes, while the Health Sub-Committee has been helping the Municipality in maintaining sanitation in markets and other public places.

The Bombay Presidency Women's Council is affiliated to the National Council of Women in India which in turn is affiliated to the International Council of Women. It has five branches: Poona, Sholapur, Belgaum, Dharwar, Ahmedabad.

President, Lilavati Munshi.

Hon. Gen. Secy., Sehra Oomrigar.

Bombay Presidency Women Graduates' Union

This Union was formed in 1915, in order that women graduates might have facilities to express their concerted opinion on questions affecting them. During its 35 years' existence, the Union has been a useful link between the Government and other bodies like the University, Corporation, etc.

Besides academic activities, the Union has done useful social work. Thus, during the influenza epidemic which swept the country in 1918, members made house-to-house visits. It also played a prominent part in propaganda for the Child Marriages Prevention Act about 20 years ago. Agitation by the Union for improvement of conditions relating to women working in factories bore fruit in the appointment of a factory inspectress, for the first time about 30 years ago.

Similarly, the Union was partly responsible for securing for women the right to be members of the Corporation. Among the earliest women nominated to the Corporation were Mrs. John McKenzie and Dr. (Mrs.) Malinibai Sukthankar. Extension of the municipal franchise to women did not have to wait long thereafter.

The Union turned its attention to the problem of social vice as far back as 1918, when a sensation was caused by the murder of a woman by the keeper of a brothel for her refusal to obey him. The Union, along with other women's organisations studied the question of prostitution in Bombay and pressed for an official inquiry. A memorial was addressed to the Government, with the result that a Prostitution Commission was appointed. For the first time in the history of India two women were appointed to serve on the committee, both being members of the Union, *viz.*, Dr. Elizabeth Turner Watts, Medical Officer in charge of the Cama and Albless Hospitals and Dr. Jerbanoo Mistri.

The Union was active in the agitation for the expansion of medical facilities for poorer women. Much valuable work was performed by the Medical Sub-Committee whose work was largely responsible for the Infant Welfare Exhibition held in Bombay in 1920. This Exhibition was the seed from which germinated the Infant Welfare Society in Bombay, which has ever since its inception been playing an educative role, specially among women of the labouring classes.

The value attached to the Union on educational matters is shown by the fact that reference was made to it in the matter of the Poona, Karnatak and Gujarat University Bills. The Union's suggestion for grant of better facilities to women students, by provision of hostels, with a woman graduate as warden, has been accepted by Poona University. Similarly, the establishment of a Home Economics Department is under the consideration by these Universities.

A question which aroused widespread interest in 1950 among women medical practitioners was the proposal to convert the Lady Hardinge Medical College into a co-educational institution. The Union lent its support to the agitation conducted by the Association of Medical Women in India against the proposal as it violated the terms of the trust deed. The demand of the Bombay Branch of that Association for the appointment of a woman Director of Public Health was also supported by the Union.

Delhi Council of Women

This Council has been active since 1928-29 and has done very commendable work by activities such as Women Jail visiting, Hospital visiting, Visiting of Orphanages and Ashrams.

A Sub-Committee carried on the work of the Education Section of the All India Education Conference.

In 1948 village medical relief was started. The Council provided medicines, and an honorary lady doctor with voluntary workers visited villages.

Nagpur Council of Women

The Nagpur Council has been functioning since 1939. Problems in which it has been specially interested are orphanages, children and nutrition, social hygiene, mother craft, beggars. The members have a building for a village hospital.

Orissa Council of Women

The Council was started in Patna in 1925 by Miss Sorabji. Some of its main activities have been jail work, hospital work, work parties, child welfare. The branch raised substantial money in 1934 to help the victims of the Bihar earthquake.

University Women's Federation

The Federation of University Women in India was inaugurated on July 24, 1920, in Calcutta. Mrs. P. Chaudheri and Miss Cornelia Sorabji were the first Indians to be President and Secretary respectively. Seven years after its establishment, the first annual report was published. There were five affiliating branches, *viz.*, (1) Association of British University Women in India founded in 1913; (2) Bombay Presidency Women Graduates' Union, founded in 1915; (3) Kodaikanal Branch, founded in 1921, and composed chiefly of American women graduates doing missionary work in South India; (4) The Bengal Branch, founded in 1921 in Calcutta; (5) Madras Women Graduates' Union.

Membership of the Kodaikanal Branch was thrown open by Dr. Eleanor McDougall, its President from 1927 to 1930 to "women of any University from any land." The chief activity of the branch was to give scholarships to maintain a deserving Indian student in a foreign country.

The Bengal Branch of the Federation was fortunate in having Miss Cornelia Sorabji, B.C.L. (Oxon.), one of India's most brilliant women, and one who was responsible for the establishment of the Federation on a sound basis.

The Madras Women Graduates' Union had various activities, *viz.*, Literary Circle, Social Service Circle, slum clearance, collection of funds for the Seva Sadan and, last but not least, "A Loan Scholarship Fund." From this a sum of Rs. 150 was given to a deserving student.

For the period 1938-1948 there was an average of 75 members.

Bombay became the headquarters of the Federation in August 1929. In the following year, at the request of the High Commissioner for India in London, copies of Reports of the Federation were sent there for distribution and publicity. Official recognition was accorded to the Union in August 1949, when a delegation consisting of Mrs. Pilloo Jungalvala (née Nanavatty), Miss M. Chandy, Icthyologist, Central Government, Department of Agriculture and Fisheries, and Mrs. J. D. Fosqué, met Dr. Humayun Kabir, Joint Secretary, Ministry of Education. Recognition was made conditional on the Union reorganising itself on an all-India basis, and being truly representative of Indian university women. Shortly thereafter, the Executive of the Federation forwarded to the Ministry of External Affairs, through the Ministry of Education, applications from Indian university women for key posts in the United Nations Secretariat.

A campaign was started by the Executive of the F.U.W.I. for the formation of branches in the various States. At present, branches exist in Bombay, Calcutta, Delhi, Lucknow, Madras, Bangalore, Nagpur and Poona. The headquarters are at Bombay.

The first conference of the F.U.W.I. was held at Bangalore in January 1951, when the new constitution was accepted. Mrs. Rama Rau was appointed President of the Federation, and Dr. (Miss) K. G. Hewat, Vice-President. The Hindu Code Bill was discussed and the following resolutions and suggestions were passed at the conference.

"Resolved that this meeting of the F.U.W.I. deplores the conditions in which working girls in the cities live, and demand that employers be urged to provide decent living conditions and hostel arrangements for women employees."

"The conference suggests that studies be carried on to investigate what measures are needed to give social security to the middle classes."

"Resolved that realising the great need in India for women doctors, this meeting of the F.U.W.I. deplores the admission of men students to the Lady Hardinge Medical College, a college primarily designed to train women doctors. The need for better qualified women doctors is recognised and for this purpose it is suggested that the college should be staffed by competent men and women doctors."

Y.W.C.A.

Prominent among institutions catering for women's welfare, specially in large cities, is the Y.W.C.A., which has considerably enlarged its original scope of activities when it provided, under attractive conditions, shelter and accommodation for young working women of diverse faiths.

The Y.W.C.A. in Bombay is now seventy-six years old, having been founded in 1875 by Miss H. Butt, a missionary who came to the city a year before. The branch set up in Bombay was the fore-runner of many other branches, which were organized through the zeal and activity of the Hon. Miss Emily Kinnaird. In 1896 the National Association of the Y.W.C.A. in India, was put on a par with the world's Y.W.C.A. The headquarters were at Calcutta. The first National General Secretary an American named Miss Agnes Hill was appointed in 1897.

The Y.W.C.A. steadily grew in strength and popularity. It owes not a little of its phenomenal success to its international affiliations and its complete freedom from the faintest suspicion of communalism. To it belongs the credit for the formation of the first Girl Guide Company in India, under the leadership and guidance of Miss Iris Wingate. The movement expanded to such an extent that a national Girl Guide Association was established, when the Y.W.C.A. withdrew from direct control. Though the Association is no longer associated with the administration and organisation of the Girl Guide movement, it, nevertheless, maintains active contact with it.

In keeping with its policy of service to young girls and enlargement of the scope of its activities, the Association has been conducting a commercial school and an employment bureau. Besides, cooking, needlework, music, dancing and Hindi classes are held. Talks on various subjects of current interest are also given. There is also a well organised Games Club, where physical instruction is imparted. One of the Y.W.C.A.'s less well-known but extremely helpful spheres of work is the activity known as travellers' aid. There is no organised department as such to attend to this work, but the staff co-operates in the provision of help to women and girls travelling alone. Thus, girls are met and seen off.

Another very old organisation in Bombay is the National Indian Association which devotes its energies to promoting higher education among women. Other old organisations doing good work include the Seva Sadan, the Bhagini Samaj, the Gujarati Stree Mandal and the Bhatia Stree Mandal.

KASTURBA FUND

The work in connection with the emancipation of Indian womanhood and the improvement of the lot of Indian women, particularly in rural areas, obtained an enormous stimulus in 1944-45, thanks to the Kasturba Memorial Fund created for the commemoration of Mrs. Gandhi who died under detention in February 1944. At Mahatma Gandhi's request the trustees of the fund used the money for the establishment of a countrywide organisation to improve the lot of Indian women, especially in villages. Attempts have been made to provide opportunities for Indian women to secure education, acquire knowledge of basic sanitary and hygienic lines and to become alive to their social and political rights. An essential part of the plan is to equip rural areas with up-to-date maternity hospitals and clinics. In order to fulfil this ambitious project a large number of women were trained in special camps so that after adequate equipment they could scatter themselves throughout the length and breadth of the land to carry the message of women's uplift to every corner of rural India. At these training camps instruction was given in first-aid and home nursing, child welfare, village nursing, health visits, rural sanitation, balanced diet and cheap remedies. The object of these training camps was the raising of an army of experts called "Gram Sevikas" (servants of the village).

HINDU LAW REFORM

As the result of increasing consciousness on the part of Indian women of their social and political status, there has in recent years been a move to revise and codify the somewhat vague and contradictory law governing the Hindu home, especially as it affects marriage, divorce, succession to property, etc. In 1937 the Indian Legislature enacted the Hindu Women's Rights to Property Act. This Act, for the first time, gave to Hindu widows a right to claim a share in the husband's property and demand partition. Four years later, the Government of India set up a Committee to overhaul and codify the Hindu Law. This Committee, which is known as the Rau Committee, drafted two bills dealing with Hindu intestate succession and Hindu marriage. When the measures came up for consideration by the two Houses of the Central Legislature, a joint committee of the two Houses recommended the revival of the Rau Committee with a view to the codification of the entire Hindu Law. Consequently the Rau Committee was revived early in 1944. During 1944-45, the Committee made a tour of the country and elicited public opinion on the proposals embodied in the two measures and on the codification of the Hindu Law as a whole. They gathered evidence from leading lawyers and representative organisations of various shades of Hindu opinion on a draft Hindu Code prepared by them.

During the last four years, the Central and the Provincial Legislatures passed various Acts, which aimed at improving the condition of Hindu women. The Hindu Marriage Disabilities Removal Act of 1946, legalises marriages between Hindus belonging to the same Gotra or Pravara. The Hindu Married Women's Right to separate residence and maintenance Act of 1946 enables a married Hindu woman to claim from her husband separate residence and maintenance on certain grounds. The Hindu Marriage Validating Act, 1949 removes the caste-barriers from the sphere of marriage and validates even the Pratiloma marriages. The Child Marriage Restraint (Amendment) Act of 1949 raises the marriage age of girls from 14 to 15 years. In the State of Bombay, monogamy is made a rule by the Prevention of Hindu Bigamous Marriage Act of 1946, and dissolution of marriages by divorce is allowed under certain conditions by the Bombay Hindu Divorce Act of 1947. The Madras Legislature passed the Madras Devadasis (Prevention of Dedication) Act in 1947. This Act puts an end to the unhealthy practice of dedicating Hindu women as 'devadasis' to Hindu deities.

Bombay Hindu Women's Right to Property Act (Extension to Agricultural Land) extends the application of the Hindu Women's Right to Property Act, 1938 to agricultural land also. A similar law has been passed in Madras.

The Bombay High Court has laid down that the Prevention of Hindu Bigamous Marriage Act is consistent with the provisions of the Constitution of India.

CHURCH MISSIONS

Among the Church organizations in India are the following :

THE ROMAN CATHOLIC CHURCH : Archbishop's House, Woodhouse Road, Bombay 1.

CHURCH OF INDIA, PAKISTAN, BURMA AND CEYLON : The Metropolitan, Calcutta.

CHURCH OF SOUTH INDIA : The Diocesan Office, Cathedral P.O., Madras 6.

UNITED CHURCH OF NORTHERN INDIA : Inter-Mission Business Office, 364 Hornby Road, Fort, Bombay.

THE CHURCH OF SCOTLAND : Scots Kirk, Waudby Road, Bombay.

THE METHODIST CHURCH IN SOUTHERN ASIA : 9, Fyzabad Road, Lucknow.

THE APOSTOLIC CHURCH OF THE INDIES : Archdiocese of the Indies, Ambur, India.

BAPTIST SOCIETIES

The Baptist Missionary Society of Great Britain.—Formed in 1792, largely through the efforts of Dr. Wm. Carey, operates mainly in both Bengals, Bihar, Orissa, Uttar Pradesh, the Punjab (India). The Baptist Zenana Mission and the Bible Translation Society have been united with the Society. The staff of the united Mission in India and Pakistan numbers 192 Missionaries and 802 Indian workers. Connected with the Society are 493 Indian Churches, 297 Day and Boarding Schools and 3 Theological Training Colleges. The Church membership at the close of 1948 stood at 31,914 and the Christian community at 75,512. Amongst the non-caste people great progress has been made in recent years, and many of the Churches formed from amongst these peoples are self-supporting.

Special work amongst students is carried on in Calcutta, Dacca, Cuttack, Patna and Delhi where there are hostels for the prosecution of this form of work.

Educational Work ranges from Primary School to Colleges. Serampore College with its Royal Charter granted by His Danish Majesty in 1827, and confirmed by the British Government in the Treaty of Purchase of the Settlement of Serampore in 1845, was placed in 1856 by the College Council at the disposal of the Baptist Missionary Society to become a part of its Missionary educational operations, in Arts and Theology. It was affiliated in 1857 to the newly-formed Calcutta University; reorganised in 1910 on the lines of its original foundation with the appointment of a qualified Theological Staff on an Inter-denominational basis for the granting of Theological Degrees to qualified students of all Churches.

In Arts and Science the College prepares for the Calcutta Examinations.

There is a vernacular institute also at Cuttack for the training of Indian preachers and Bible schools in several centres.

There are 10 purely English Baptist Churches connected with the Society, but English services are carried on in many of the stations. Medical work connected with the Society is carried on in 7 Hospitals. Two large Printing Presses for both English and Vernacular work are conducted at Calcutta and Cuttack. The Secretary of the Mission is the Rev. D. Scott Wells, 44, Lower Circular Road, Calcutta, 16.

The Headquarters of the Mission are at 93-95 Gloucester Place, London, W. 1. The total expenditure of the Society for 1947 amounted to £3,37,185 of which £97,298 was expended in India, Pakistan and Ceylon.

The Canadian Baptist Mission.—Was commenced in 1873, and is located in the Telugu and Oriya Country to the north of Madras, in the Kistna, Godavari, Vizagapatam, Srikakulam and Ganjam Districts. There are 20 stations and 535 out-stations with a staff of 85 missionaries including 8 qualified physicians, and 1,250 Indian workers, with Gospel preaching in 1,659 villages. Organised Churches number 182, communicants 36,000 and adherents 45,000 for the past year. In the Educational department are 415 village day schools, with 19,000 children, 12 boarding schools, 2 High schools, 2 Normal Training schools, a Bible Training School for Women, a Theological Seminary providing in all for 5,850 pupils. There are 6 hospitals, two leper-asylums and an orphanage. Village Evangelisation is the central feature of the Mission, and stress is laid upon the work amongst women and children. *Field Secretary :* The Rev. E. J. Church, B.A., Yellamanchili, Vizag District.

The American Baptist Assam Mission.—Was opened in 1836, and has 11 main stations staffed by about 48 missionaries. There are about 850 native workers, 1,600 organized churches, about 112,700 baptized members, 500 schools of all grades including 4 High, 1 Normal Training, 5 Bible and 9 station schools. There are 4 hospitals and 7 dispensaries which treated about 4,500 in-patients and about 23,200 out-patients yearly. Mission work is carried in 16 languages.

Treasurer :—Miss M. G. Burnham.

Field Secretary :—Rev. A. F. Merrill, Gauhati.

American Baptist Bengal-Orissa Mission.—Commenced in 1836. Area of occupation : Midnapore district of W. Bengal, Balasore District in Orissa and Singhbhum District in Bihar. Work chiefly for Oriya and Santal peoples. *Address :* Kharagpur.

Secretary : Rev. C. C. Roadarmel, 435, Fourth Avenue, Kharagpur (W. Bengal).

The Australian Baptist Foreign Mission.—(Incorporated) Embracing the societies representing the Baptist Churches of the States of the Australian Commonwealth. The field of operations is in East Bengal and Assam. The staff numbers 36 Australian workers. There are 7,126 communicants and a Christian community of 12,874.

Secretary, Field Council : The Rev. F. D. Ison, Mission House, Brisiri, P.O. Hatshibganj, Dist. Mymensingh, E. Bengal, Pakistan.

The Strict Baptist Mission.—Has 19 European Missionaries, and 213 Indian workers in Madras, Chingleput, Salem, Ramnad and Tirunelveli Districts. Communicants number 2,053 ; organised churches 65, Day and Sunday schools 107 with 3,714 pupils.

Secretary : Rev. D. A. Thrower, Kilpauk, Madras. *Treasurer :* Rev. G. F. Champion, Kovilpatti, Southern Rly.

PRESBYTERIAN SOCIETIES

The Irish Presbyterian Church Mission.—Operates in Gujarat and Saurashtra with a staff of 38 Missionaries, of whom 18 are Clerical, 11 Educationalists, 5 Doctors and 4 Nurses. The Indian staff numbers 410, of whom 15 are Pastors, 85 Evangelists, 40 Biblewomen, and 270 Teachers. There are 25 Organised Churches, a communicant roll of 4,217, and a Christian Community of 11,527.

In Medical work there are 5 Hospitals including one at Dohad and several Dispensaries, with 4,969 in-patients, 22,846 new cases, and a total attendance of 70,994.

The Mission conducts 3 High Schools, 1 Anglo-Vernacular School, 1 Preparatory School at Parantij and 55 Vernacular schools affording tuition for 6,962 pupils ; also 1 creche, 4 Orphanages, an Industrial School at Borsad, a Teachers' Training College for Women at Borsad, co-operates in a United Divinity College at Baroda, and has a Mission Press at Surat. The Mission has made a speciality of Farm Colonies, of which there are about a score in connection with it, most of them thriving.

The Jungle Tribes Mission with 4 Missionaries is a part of the activities of the above, working in the Panch Mahals Dist. and the former Rewa-Kantha areas, with Farm Colonies attached.

Secretary Miss J. C. Watson, Mission House, Borsad, Kaira Dist.

The United Presbyterian Church of North America.—The Sialkot Mission of this Church was established at Sialkot in the Punjab in 1855. It is now carrying on work in one civil district in India and ten in Pakistan. Its missionaries number 88. Its educational work comprises one Theological Seminary, one Bible Women's Training School, one College, four High Schools, one Industrial school, 7 Middle schools and 70 Primary schools. The enrolment in all schools in 1949 was 10,807. Medical work is carried on through five Hospitals and 7 Dispensaries. The communicant membership of the Church established is 52,496 and the total Christian community 126,507.

General Secretary : Rev. Harris J. Stewart, D.D., American Mission, Gujranwala.

The American Presbyterian Mission.—Operates in four main sections, known as the Punjab (1834), North India (1836), Western India (1870) Missions, and Pakistan (1950) Missions. According to statistics up to date available, the American staff, including women and special-term Missionaries number 229, and the Indian staff about 1,200. There are 32 main stations and 197 out-stations. Organised churches number about 130 of which 40 are entirely self-supporting. There are 26,000 communicants and a total baptised community of about 105,000.

There are three men's colleges including a University College, and interest in Baring College, Batala and in the Isabella Thoburn and Kinnaird Colleges for Women,—students about 3,000. There is one Theological College at Saharanpur with about 35 students on its roll, and interest in Poona and Jabalpur Theological Colleges and Bareilly and Gujranwala (Pakistan) Seminaries ; there are two Training Schools for Village Workers ; fifteen High Schools ; one Industrial School ; six Teachers' Training Schools ; 109 Elementary Schools ; 142 Schools of all grades, —pupils about 17,000.

Medical Work :—Miraj Medical School, and interest in Ludhiana and Vellore Christian Medical Colleges ; nine Hospitals, twenty-one Dispensaries and four Specialty Hospitals.

Evangelistic Work :—270 Sunday Schools, with an average attendance of 6,500 pupils. Contributions for this work, on the part of the national church, amount to about Rs. 55,000.

The Hospital at Miraj, under the care of E. H. Evans, is well-known throughout the whole of South-West India, and the Forman Christian College of Lahore, under the principalship of the Rev. R. M. Ewing, is equally well-known and valued in Pakistan. The Ewing Christian College (S. S. Gideon, Ph.D., Principal) and Agricultural Institute (Dr. A. T. Mosher, Principal) and Baring Christian College at Batala, Punjab (R. M. Chetsingh, Principal), have grown rapidly in strength and influence.

Secretary of Council of A. P. Missions in India and Pakistan :—The Rev. H. J. Strickler, M.A., D.D., "Lowriston," Dehra Dun, U.P.

Secretary, North India Mission :—The Rev. C. H. Hazlett, Ed.D., A. P. Mission, Mainpuri, U.P.

Secretary, (Punjab Pakistan) Mission :—The Rev. W. A. Zoerner, 3, Empress Road, Lahore.

Secretary, Punjab (India) Mission :—The Rev. D. N. Dobson, A. P. Mission, Ludhiana.

Secretary, Western India Mission :—J. C. Kincaid, A. P. Mission, Nipani, Belgaum Dist., Bombay State.

Field Representative :—The Rev. John B. Weir, Ph.D., D.D., "Lowriston," Dehra Dun, U.P.

The New Zealand Presbyterian Mission.—Commenced as recently as 1910 at Jagadhri, Ambala Dist., Punjab. It also works in Kharar.

Secretary :—Miss V. Sutherland, Kharar, Dist. Ambala.

The United Church of Canada Mission.—Commenced in 1877, has 11 main stations in Madhya Bharat and Southern Rajasthan including Indore, Gwalior, Ratlam, Dhar, Sitamau and Banswara. The Mission staff numbers 72 ; 64 Canadians and 8 Indians ; and there are in addition about 200 Indian workers. The Evangelistic work of the Mission has been handed over to the Malwa Church Council of the United Church of Northern India, which administers the work through an Executive Board composed of both Indian and missionary members. There were formerly two Church Councils—Malwa and Ratlam. These have been amalgamated in an enlarged Malwa Church Council. There are 48 organised churches, Communicants 4,102 ; Baptised non-communicants 19,744 ; Unbaptised adherents 3,282 ; Total Christian Community 27,128.

Educational work comprises Elementary and Middle Schools for boys and girls ; High Schools for boys and girls, an Arts College for students of both sexes (The Indore Christian College) and a Vocational High School for boys where training is provided in printing, tailoring, carpentry and welding.

The medical work is extensive. There are three General Hospitals, where both men and women are treated, and five Women's Hospitals, and also a number of dispensaries in central and out-stations.

General Secretary of the Mission :—The Rev. R. M. Clark, M.A., B.D., S.T.D., Kharna, Madhya Bharat.

Associate Secretary :—Miss A. B. Munns, B.A., Kharna, Madhya Bharat.

Secretary of Malwa Church Council :—Rev. A. A. Jeremy, Neemuch, Madhya Bharat.

The Canadian Presbyterian Mission.—Operates in two sections, the Northern Section with headquarters at Jhansi in U.P., and the Central India Section, known as the Bhil Field.

In Central India the Mission comprises within its area Alirajpur, Barwani, Jobat and Kathiawar also parts of Jhabua, Chhota Udaipur (in Bombay State) and Dhar, Indore and Gwalior bordering on the Jobat-Barwani Road. The five central stations are Amkhut, Mendha and Alirajpur located in Alirajpur, Jobat and Barwani. The staff consists of 16 missionaries and 50 Indian workers. There are several elementary schools in the area and a central Anglo-Vernacular School at Amkhut in which upwards of 300 children are being educated. At Amkhut also there is a Children's Nursery Home. At Jobat there is a General 60 bed Hospital with a Canadian Medical man, Dr. W. R. Quinn in charge.

There are in the district 7 organized and 2 unorganized congregations with a Communicant membership of 430 and a baptised community of slightly over 1,500.

Secretary :—Miss Ellen Douglas, Amkhut, *via* Dohad, Madhya Bharat.

Secretary, Bhil Field Mission :—Miss M. Williamson, Amkhut, *via* Dohad, Madhya Bharat.

The Jhansi Section formerly known as the Gwalior Mission was founded by the late Dr. J. Wilkie in 1905. There is now a staff of 13 missionaries and 30 Indian workers who are engaged in Jhansi city, Esagarh, Babina, Chirgaon and Shivpuri Datia, Gwalior and the surrounding villages

Activities include one Junior Basic Co-educational School and the H. M. Memorial Higher Seconday School for Girls. The Mission conducts a Bible School and a small dispensary. There is an agricultural settlement at Esagarh.

There are two organised churches and one unorganised church at Babina, having a communicant membership of 225.

Secretary :—Miss H. V. Reaveley, C. P. Mission, Jhansi, U.P.

The Welsh Calvinistic Methodist (Presbyterian) Mission.—Established in 1840 occupies stations in Assam in the Khasi and Jaintia Hills, the Lushai Hills and at Sylhet (Pakistan) and Cachar. The Khasi language has been reduced to writing, the Bible translated, and many books published in that language by the Mission. A large amount of literature has also been produced in the Lushai language. Total in the Church 179,832. Well equipped hospitals at Shillong (Khasi Hills), Jowai (Jaintia Hills) and Durtlang (Lushai Hills) provide medical, surgical and nursing aid to large numbers annually.

Primary, Middle and High School education is carried on widely in Assam. A Theological College and a Department for Teachers' training are maintained at Cherrapunji, Khasi Hills.

Field Secretary :—Rev. G. H. Morgan, Maulvi Bazar, Dist. S. Sylhet, E. Pakistan.

CONGREGATIONAL SOCIETIES

The American Board of Commissioners for Foreign Missions.—The American Marathi Mission of this Board operates in Western India. Founded in 1813 it is the oldest American Mission in India. In 1950 it included 24 missionaries and 387 Indian workers operating in 9 stations and 140 out-stations. There were 54 churches with 6,329 communicants. Besides conducting a college with 521 students and 5 secondary and training schools with 1,176 pupils, the Mission has a large share in various union educational enterprises. There are 35 primary schools and 3 kindergartens with a total of 2,904 pupils. Its 3 hospitals and dispensaries treated a total of 21,160 patients. The Mission has a total of 6 major social service centres with 21 full time and 19 part-time workers. During 1949 these Centres had a total activity attendance of 276,983. At Ahmednagar is the pioneer non-profit making Sisal Fibre Industry employing an average of 56 women. *Secretary :* Rev. R. W. Fairbank, M.A., P.D, Hartland Bungalow, Sholapur.

American Mathurai Mission (of the American Board of Commissioners for Foreign Missions), Church of South India ; Mathurai Ramnad Diocese—*Bishop*—Rt. Rev. J. E. L. Newbigin, Mathurai. *Mission Representative*, Rev. A. A. Martin, Pasumalai. *Manager*, High and Training Schools—D. P. Michael, Pasumalai. *Manager*, Trade School—Rev. Chas Heineman, Pasumalai. *Principal*, Theological Seminary—Rev. A. Samuel, Pasumalai. *Medical Officer*, Pierce Hospital, Hospital for Women and Children—Dr. H. S. Thomas, Mathurai. *Manager*, Pierce High School—Miss D. Abraham, Tallakulam. *Manager*, Capron Hall Training School—Miss E. G. Nichols, Mathurai. *Manager*, Rachanyapuram.—Miss M. D. Brown, Tallakulam. *Manager and Correspondent*, A. C. High School, Tallakulam—Rev. Panhaj Thomas Tirumangalam. *Manager, Basic Training College, Bullogundu*—L. L. Lotbeer. *Principal*, American College—S. J. Savarirayan, Tallakulam. *Secretary*, Mission—L. L. Lotbeer, Pasumalai.

The Evangelical Alliance Mission (formerly known as THE SCANDINAVIAN ALLIANCE MISSION OF NORTH AMERICA).—The mission staff in Khandesh and Nasik is represented by 80 missionaries and 90 Indian workers. There are 1,403 Church members and 2,456 pupils in Sunday Schools. 40 elementary Schools provide for 1,198 pupils. There is one mission hospital located at Chinchpada, West Khandesh. This hospital and several dispensaries have treated and cared for over 65,396 yearly.

Western India Headquarters :—Amalner, East Khandesh.

Chairman :—Rev. O. E. Meberg, Amalner, East Khandesh.

Secretary :—Miss Gladys F. Henriksen, Dharangaon, East Khandesh.

The London Missionary Society.—Commenced work in India in 1798 and occupies 3 centres in N. India, 12 in S. India and 7 in the United State of Travancore and Cochin. The Mission engages in every form of Missionary activity.

The main centres of the Mission in N. India are at Calcutta and Murshidabad District, W. Bengal. The S. India district and Travancore are divided into Kanarese, Telugu, Tamil and Malayalam fields with 22 stations and 1,095 out-stations. At Nagercoil (Travancore) is the Scott Christian College with about 900 students, a church and congregation said to be the largest in India and a printing press.

The Society is also connected as a contributing body with a number of Union Institutions, including 6 High Schools and 8 Colleges.

India—Field Representative, L. M. S. :—Rev. H. C. Lefever, B.D., Ph.D., 18, Lavelle Road, Bangalore.

Bengal Secretary :—Rev. Vaughan Rees, London Mission, 16 Elgin Road, Calcutta.

The Office-bearers for the present triennium 1950-1953 :—

The Rt. Rev. S. K. Mondol, Hyderabad (*President*) ; His Grace The Most Rev. Juhanon Mar Thoma, Travancore, The Rt. Rev. Dr. A. J. Appasamy, Coimbatore, the Rt. Rev. J. Amritanand, Assam, Rev. J. Lakra, Ranchi and Dr. H. S. Hensman (*Chairman*, Executive Committee), Madras (*Vice-Presidents*) ; Gunanamani Solomon, Madras (*Hony. Treasurer*) ; and S. J. Duraisamy (*General Secretary*).

The Society is controlled and directed by an All India Council consisting of representatives from Branches, State Committees and Churches from all over the country. The Executive Committee which meets once a month in Madras is responsible for carrying on the administration of the Society subject to the approval of the Council.

Address :—N. M. S. House, Royapettah, Madras.

The Seventh-Day Adventist Mission.—The Seventh-day Adventists commenced mission work in India in 1893, and now employ a staff of 1,063 workers, European and Indian including 239 ordained and licensed ministers. Evangelistic and educational work is conducted in 39 vernaculars, besides work for English-speaking peoples in the larger cities. For administrative purposes, there are seven branch organisations located as follows :—

Seventh-day Adventist Mission—Burma. (Pastor C. B. Guild, Superintendent). *Office Address:* 68, U Wisara Road, Rangoon, Burma.

Seventh-day Adventist Mission—North-east India. (Pastor F. E. Spiess, Superintendent). *Office Address :* Karmatar, E.I.R.

Seventh-day Adventist Mission—North-western India. (Pastor D. W. Hunter, Superintendent). *Office Address :* 16, Club Road, Byculla, Bombay 8.

Seventh-day Adventist Mission—South India. (Pastor O. O. Mattison, Superintendent). *Office Address :* 9, Cunningham Road, Bangalore.

Seventh-day Adventist Mission—West Pakistan. (Pastor D. S. Johnson, Superintendent). *Office Address :* 104, Wazir Ali Road, Lahore.

Seventh-day Adventist Mission—Ceylon. (Pastor E. A. Crane, Superintendent). *Office Address :* 7, Alfred House Gardens, Colombo 3.

The general headquarters for India, Burma and Ceylon is located at Salisbury Park, Poona. R. H. Pierson, President ; J. F. Ashlock, Secretary. (Office Address: Post Box 15, Poona). On the same estate is an up-to-date publishing house devoted to the printing of health, temperance, evangelical and associated literature. (Address : Oriental Watchman Publishing House, Post Box 35, Poona).

A large number of day and boarding vernacular and Anglo-vernacular schools are conducted in different parts of the country ; and at Vincent Hill School, Mussoorie, European education is provided, a regular high school course. A senior college is maintained at Kirkee near Poona. In all the denominational boarding schools increasing emphasis is being laid on vocational work, the students being required to share in the domestic work of the institution, and in many cases, to engage in some trade or other work.

18 physicians, and a number of qualified nurses are employed, regular medical work being conducted at 29 stations.

The baptized membership (adult) is 11,836 organized into 241 churches ; and in addition a substantial community of enquirers is receiving systematic instruction. 642 Sabbath Schools are conducted with an enrolled membership of about 19,516. Also over 100,000 are enrolled in the Bible correspondence schools.

The Bombay Address is No. 15, Club Road, Byculla.

The American Mennonite Mission.—Established 1899, works in Madhya Pradesh, Mission staff numbers 26, Indian workers 91, Church members 1,476, Children (unbaptized) 1,034. Training Institutions : Academy including High School and Normal Training School ; Training School for Nurses ; Middle Schools 2 ; Primary Schools 8 ; Hostels 5 ; Hospital ; Dispensaries 5 ; Leper Clinics 5 ; Widows' Home ; Farm Village Project.

President of Mission :—Rev. S. M. King, Dhamtari, M.P.

Secretary :—Rev. Wilbur Hostetler, Dhamtari, M.P.

Central India Baptist Mission.—Taken over in 1944 by the Conservative Baptist Foreign Mission Society of the United States of America, from the Old Kurku Mission. Working in Madhya Pradesh ; has a Mission staff of 33 workers. Indian workers 13 ; Churches 3 ; Christian Community 600.

Chairman :—Rev. F. Shoen, Ellichpur, Berar, Madhya Pradesh.

The Ceylon and India General Mission.—Established 1892, occupies stations in Mysore State, in the Coimbatore and Anantapur Districts, also in Uttar Pradesh. Mission staff 74 ; Indian workers 94 ; Churches 53 ; Communicants 2,159 ; Christian Community 4,694 ; Orphanages 6 ; Schools 6 ; Pupils 528.

Headquarters.—"Mizpah," Richards Town, Bangalore.

Secretary-Treasurer :—Rev. J. L. T. Mac Carthy, 7, Pottery Road, Richards Town, Bangalore.

The Boys' Christian Home Mission.—The Boys' Christian Home Mission, better known as the B. C. H. Mission, was founded by Albert Norton in 1899, when a severe famine swept the land. The Headquarters of the Mission is Dhond, Poona District.

The main function of the Mission is the care of orphans and at present it is looking after 225 orphans or needy children.

It also runs a day school which has an attendance of 400 children. A little agricultural work is also being carried on.

There are 3 missionaries in the Mission at present and nearly 30 Indian workers. The Mission is evangelical and does evangelistic work in many villages around the main stations. Its object is to help the Indian people in any way it can, especially poor Indian Christians.

Director.—Rev. John E. Norton.

The Santal Mission of the Northern Churches (formerly known as the Indian Home Mission to the Santals).—Founded in 1867, works in the Santal Parganas, Birbhum, Murshidabad, Malda, Rajshahi, Dinajpur, Goalpara and Kamrup. Work is principally among the Santals but also among Bengalis Boros and other races. Mission staff numbers 90 of whom 5 medical missionaries. Indian pastors 66, other Indian workers 480, Christian community in organised congregations 28,066. 7 boarding schools with 1,030 pupils, 140 elementary schools with 4,039 pupils, 1 industrial school, 1 printing press, 1 orphanage, 3 hospitals, 4 dispensaries, 2 leper colonies and 1 tea estate. *Secretary :* Rev. O. S. Bierkestrand, Dumka, Santal Parganas.

The Free Methodist Mission of North America.—Established at Yeotmal, 1891, operates in Yeotmal and Amravati districts in Berar and in Wardha district in Madhya Pradesh with a staff of 14 Missionaries and 45 Indian workers. Organised churches 13, 1 Anglo-Vernacular Middle School, 1 Biblical Seminary, and 3 Primary Schools.

Chairman of the Executive Committee for 1951-52 :—Rev. Elmen S. Root, Yeotmal, Berar.

Secretary :—Mrs. Muriel A. Davis, Yeotmal, Berar.

THE SALVATION ARMY

The work of the Salvation Army in India and Ceylon was commenced in 1882 by the late Commissioner Booth-Tucker and was for many years under his control, with Headquarters in India. For some time now, the areas occupied have been divided for administrative purposes into 6 Territories, each under a Territorial Commander ; and one smaller Command. The headquarters for Pakistan are at Lahore.

Northern Territory, with Headquarters at New Delhi.

Western Territory, with Headquarters at Bombay.

Madras and Telugu Territory, with Headquarters at Madras.

Southern Territory, with Headquarters at Trivandrum, in The United State of Travancore and Cochin.

Ceylon Territory, with Headquarters at Colombo.

Eastern Territory, with Headquarters at Calcutta.

Burma Command, with Headquarters at Rangoon.

The Audit and Editorial office is at Poona.

The Commanders are directly responsible to the International Headquarters in London.

Northern Territory.—The area in this Territory is the Salvation Army work in the Punjab (India), Delhi and Uttar Pradesh. The Territory is controlled from Delhi.

Evangelistic work, especially among the "depressed classes," is extensively carried on, both in the Punjab (India), and U.P.

Medical work is carried on in two Hospitals, one of which is in Dariwal, Punjab and the other in Moradabad, Uttar Pradesh ; and also in several dispensaries.

Other institutions include day and boarding schools.

Village centres at which the S. A. works	1,555
Officers and Employees	475
Social Institutions	3

Territorial Headquarters :—83/84, New Rohtak Road, Karol Bagh, New Delhi.

Territorial Commander :—Lt.-Colonel Ivar Palmer.

Madras and Telugu Territory.—Embraces Madras City, the Central and Northern districts of the State also Hyderabad and Madhya Pradesh. 393 fully commissioned officers and 215 workers are fully occupied in evangelical, educational and village uplift work carried on in just over 400 villages, two central boarding schools, a Training Institute for men and women selected for officership ; a criminal tribes settlement of 2,500 men, women and children—many work at Chirala, the others on the land. A Leprosy Hospital, General Hospital for women and children, though men are also treated, a Social Services Department where wastepaper sorting, etc. is carried on, and a Women's Industrial Home in Madras complete the list of institutions where work is going forward.

Territorial Headquarters :—The Salvation Army, 1C, Ritherdon Road, P.O. Box 453, Vepery, Madras 7.

Territorial Commander :—Lieut. Commissioner E. Davies.

General Secretary :—Brigadier P. Bhushanam.

Southern India Territory.—The Territorial Headquarters is Trivandrum, the United State of Travancore and Cochin.

The work of The Army had its beginning among the Tamil-speaking people of the southern part of the United State nearly fifty years ago. The work developed and extended throughout the United State of Travancore and Cochin, and during the past twenty-five years eastward into the districts of the southern part of the Madras State.

In more than 490 corps the majority of officers labour amongst the village populations. The Army has a membership in South India of some 95,154. Hundreds of Salvation Army Halls have been erected in which gather Sunday after Sunday congregations of Christian men and women, converts from among those who have been the most depressed people in the country, now of the third, second and first generations.

This territory is divided for administrative purposes into 15 divisions and Districts 6 among the Tamil-speaking people and 9 among those who speak Malayalam.

Medical work, also the work of the Leper Hospitals take care of a vast amount of human suffering. The Catherine Booth Hospital at Nagercoil, which has grown out of a very small beginning, is now a fully equipped, modern institution of many departments, dealing with all manner of medical and surgical cases. The Hospital is equipped with X-Ray, radium, iron lung and splendid nursing facilities. Branches from this Institution carry the service of the Hospital to some of the most remote regions. 189,435 patients were treated during one year in the Catherine Booth Hospital and its several Branches and 1,664 major operations and 7,625 minor operations were performed. Two Leper colonies run one on behalf of the United State of Travancore and Cochin Government, and the other the Evangeline Booth Leper Hospital in North Travancore, have together 562 patients. These two institutions carry on the work ranking with the highest traditions of Christian service.

Workers in the Territory consist of 1,101 Officers, 422 employees. There are, 494 Officered Corps and 140 Societies, 54 primary day schools, 5 Boarding Schools, 1 Middle School, 1 High School, 1 Training Garrison, 762 Outposts, 1 Women's Industry and 2 Men's Industries.

Territorial Headquarters :—S. A. Kowdyar, Trivandrum, United State of Travancore and Cochin.

Territorial Commander :—Lt. Commissioner S. Manuel.

Chief Secretary :—Lieut.-Colonel William H. Smith.

Western India Territory.—The Western India Territory comprises Rajputana, Central India, Saurashtra, Bombay State, Goa, Macathas, and Mauritius.

This territory comprises Corps 323 ; Outposts 513 ; Societies 466 ; Social Institutions 21 ; Day Schools 128 ; Boarding Schools 4 ; Training Colleges 2.

Besides the Evangelical operations there are in this Territory, two large Hospitals ; the Emery Hospital at Anand, and the Evangeline Booth Hospital at Ahmednagar and a number of Dispensaries. Patients treated at both Hospitals during the year were—Out-patients 72,533, In-patients 8,218 ; Major Operations performed 1,829, Minor Operations performed 5,612. Both Hospitals are well-equipped and have a Nurses Training School attached.

Social work in Bombay includes the King George V Memorial Infirmary, and Lady Dhunbai Jehangir Home for Destitutes, Industrial and Rescue Home for Women at Matunga, King Edward Industrial Home for Men at Byculla, which incorporates the Loom Factory for the making of Weaving and Warping machines, a land Colony at Muktipur at which recently a new Engine and Pump was installed for the supply of water for the irrigation of the land. A well-equipped Red Shield Hostel is situated in the Merewether Road, Fort, Bombay. Accommodation for permanent boarders and for visitors to Bombay may be secured there.

Territorial Headquarters :—P.O. Box 4510, Morland Road, Byculla, Bombay 8.

Territorial Commander :—Commissioner Janet Allen.

Chief Secretary :—Lieut.-Colonel Joseph Dahya.

CHRISTIAN COUNCIL OF INDIA AND PAKISTAN

This Council (formerly known as the National Missionary Council, later as the National Christian Council) was organised in 1914 as the result of the first World Missionary Conference held in Edinburgh in 1910. Similar Councils have come into existence in China, Japan, Korea, the Near East, Siam, Philippine Islands, Indonesia, Congo and other Mission fields. The Missionary Societies of the 'sending countries' are also linked together by similar national organizations. All these National Christian Councils and Conferences of Missionary Societies head up in the International Missionary Council which has its offices in London (Edinburgh House, 2 Eaton Gate, London, S.W. 1) and in New York (156, Fifth Avenue, New York City).

Basis—The Council is established on the basis that the only bodies entitled to determine the policy of the Churches and Missions are the Churches and Missions themselves. Questions of doctrine and ecclesiastical policy lie outside the province of the Council.

Objects—1. To stimulate thinking and investigation on missionary questions, to enlist in the solution of those questions the best knowledge and experience to be found in India and other countries ; and to make the results available for all Churches and Missions in India.

2. To help to co-ordinate the activities of the State Councils and to assist them to co-operate with each other where such co-operation is desirable.

3. Through common consultation to help to form Christian public opinion and bring it to bear on the moral and social problems of the day.

4. To be in communication with the International Missionary Council regarding such matters as call for consideration or action from the point of view of the Indian mission field as a whole.

5. To make provision for the convening of a National Christian Conference when such is in the opinion of the Council desirable.

President :—The Rt. Rev. S. K. Mondol, Chapel Road, Hyderabad, Deccan.

Vice-Presidents :—The Rt. Rev. F. Whittaker, Bishop's House, Medak, Deccan ; R. M. Chetsingh, Baring Union Christian College, Batala, E. Punjab.

Treasurer :—Rev. J. W. Prentice, Intermission Business Office, 364, Hornby Road, P.O. Box 92, Fort, Bombay 1.

Secretaries :—The Rev. R. B. Manikam, M.A., Ph.D., D.D. (*Executive Secretary*) ; E. C. Bhatty, M.A., Ph.D. ; Mrs. L. W. Bryce, M.A., Ph.D. ; The Rev. J. W. Sadiq, M.A., B.D. ; The Rev. R. W. Scott, M.A., Ph.D. ; Miss Ruth Ure, B.A., S.T.B. ; Korula Jacob.

Address :—The National Christian Council, The Christian Council Lodge, Nagpur 1. (Madhya Pradesh).

The Evangelical National Missionary Society of Stockholm, Sweden.—A Church of Sweden Society, founded in 1856, occupies the Districts of Saugor, Betul and Chhindwara in Madhya Pradesh.

There are about 3,800 Church members constituted into an indigenous Church called the Evangelical Lutheran Church of Madhya Pradesh. The European and Indian staff numbers 25 and 196 respectively. There are two Training Schools for Indian workers and 26 Primary Hindi Middle and Indian English Middle schools; 35 Sunday schools with 633 Christian and 1,176 non-Christian attending; 3 Hospitals with 60 beds and 8,842 patients and 689 operations during 1951; 10 Dispensaries with 70,077 patients during 1951; 4 Workshops; one Women's Industrial School; one Widows' Home with 36 women; 2 orphanages, 2 Boys' Boarding Schools and 1 Girls' Boarding School with 171 boys and 227 girls and 3 farms where modern village uplift is attempted.

President :—Rev. E. Raman, Sagar, Madhya Pradesh.

The Basel Evangelical Mission.—(Incorporated in Switzerland), with its headquarters in Mangalore, South Kanara, was founded in 1834 and is at present carrying on the work in South Kanara, South Mahrashtra, Malabar and Coorg. It had at the beginning of 1949, 28 chief stations and 84 out-stations with a total missionary staff of 25 European and about 800 Indian workers. The membership of the churches is 30,000. Educational work embraces 100 schools, among which are a Theological Seminary, a second grade college and 9 high schools. The total number of scholars is 25,000. Medical work is done at Betgeri-Gadag, South Mahrashtra Country and at Udipi, South Kanara. At both places a hospital for men and women is maintained. The Mission maintains a Home Industrial Department for women's work. There is also connected with the Mission a large Publishing Department with a Book Shop and a Printing Press, with about 100 workers, at Mangalore, S. Kanara, which is doing work in English and in a number of Indian languages.

President and Secretary :—Rev. J. Rossel, Ph.D., Mangalore, South Kanara.

The Federation of Evangelical Lutheran Churches in India was established in 1926 as an outward expression of the spiritual unity of the Lutheran Churches in India. It consists of 10 constituent churches and 3 co-operating Missions in India with a total membership of over 550,000. The work of the Federation is carried on by the Triennial Conference of the Federation, by its Executive Council, by a number of standing and special Committees and by its office-bearers. It was registered under the Societies Registration Act (Act XXI of 1860) in Oct. 1942. Including the members of one Lutheran Mission in South India, considering affiliation the Lutheran baptised membership in India is 550,000.

The names of Officers for 1951-53 are as follows :—

President :—Rev. C. W. Oberdorfer, D.D., Gudur, Nellore Dist.

Vice-President :—Rev. Joel Lakra, M.A., B.D., G.E.L.C., Ranchi, Bihar.

Secretary :—S. Duraisamy, B.A., L.T., Tranquebar, Tanjore Dist.

Treasurer :—T. John Ratnam, A.E.L.C., Narsapur, W. Godavary Dist.

The Federation has appointed Dr. E. G. Wood, Guntur, as the Finance Secretary to receive subsidy mainly from America for the support of the orphaned missions and churches and to distribute among the concerned missions and churches according to the budget approved and conditions agreed upon. When necessary, the Officers of the Federation will serve as Advisor Committee to the Finance Secretary and in case of emergency they will have full powers to act.

At the Triennial Conference of the Federation held at Ranchi, Bihar, in December 1947, it was decided to take immediate steps to form an Evangelical Lutheran Church in India. Accordingly, a special committee was appointed to work out a Draft Constitution. The Draft Constitution prepared by the committee was placed before the Triennial Conference of the Federation held at Guntur in January 1951 and was referred to the constituent churches for opinion and suggestions for modification. Final action on the Draft Constitution is to be taken in the Triennial Conference of 1953.

The Federation has also worked out plans, estimates and a Draft Constitution for a United Theological College (B. D. College). This Draft Constitution has been referred to the constituent churches for opinion and final action is to be taken later.

The Church of Sweden Mission was founded in 1874, but already earlier, Swedish missionaries were working in the Leipzig Evangelical Lutheran Mission (L.E.L.M.). From 1915, the C.S.M. was responsible for the whole L.E.L.M. field, to which German missionaries were allowed to return only in 1927. From 1940, the German field was again managed by the C.S.M. through a special committee upto 1950, when the whole work was merged into the Tamil Evangelical Lutheran Church (T.E.L.C.). Through the T.E.L.C. the C.S.M. operates in the Tiruchirapalli, Coimbatore, Mathurai and Ramnad Districts. It maintains a general and eye hospital at Tirupattur, an eye hospital at Coimbatore, High schools for boys at Mathurai and Pudukkottai, High Schools for girls at Tanjore and Usilampatti, Higher Elementary and Secondary Training Schools at Tranquebar, the Theological College 'Gurukul' at Madras, and various Primary Schools. Missionary staff 44.

Field Secretary :—Rev. B. Fr. Filiander, M.A., B.D., Tranquebar House, Coimbatore.

Leipzig Evangelical Lutheran Mission.—The Lutheran Mission work in India was commenced in 1706 by German Missionaries under the Danish Tranquebar Mission. It was taken up by the L.E.L.M. (founded in 1836) in 1841. The L.E.L.M. re-entered the work after the Great War in 1927. It is located in the Madras, Chingleput, South Arcot and Tanjore Districts. The Mission co-operates with the Church of Sweden Mission and the Tamil Evangelical Lutheran Church. The L.E.L.M. maintains two High Schools for boys at Madras and Shiyali (Tanjore Dt.), one High School for girls at Madras, a number of Elementary Schools for boys and girls in different places, and various other institutions.

Recently all the Mission work has been merged into the Tamil Evangelical Lutheran Church, whose head is the Rt. Rev. Dr. J. Sandegren, Bishop of Tranquebar, Tranquebar House, Tiruchirapalli.

Tamil Evangelical Lutheran Church.—Organised Churches (Pastorates) 54; Ordained Indian Ministers 50; other Indian workers 137; Baptized membership 50,152; Schools 180; Teaching staff 891; Pupils: Boys 15,914; Girls 7 198.

President :—Rt. Rev. J. Sandegren, M.A., D.D., C.N.O., Bishop of Tranquebar, "Tranquebar House", Tiruchirapalli, S. India.

Missouri Evangelical Lutheran India Mission (M.E.L.I.M.).—Located in Madras State, Mysore, Travancore and Ceylon (1895).

In Madras State, Madras City, North Arcot (Ambur Vaniyambadi, Pernambut), Salem (Krishnagiri, Hosur, Bargur), Coimbatore (Kollegal), Tirunelveli (Vallioor, Vadakangulam), Tanjore, Tiruchirapalli, Mathurai, Ramnad, Malabar (Wynad, Wandoor) Districts.

In Mysore (Kolar Gold Fields and Bangalore).

In The United State of Travancore and Cochin (Nagercoil, Trivandrum, Parasala, Balaramapuram, Aryanad, Nilamel, Alleppey, Shertallay, and Cochin).

In Ceylon (Colombo).

There are 44 American Missionaries, of which 2 (1 male and 1 female) are teachers in charge of school and home for children of missionaries (Kodaikanal), 3 Zenana workers; 2 nurses; 1 American doctor.

There are 3 High Schools, 2 Teachers' Training Institutions, 1 Pastors' Training Institution, and 1 Hospital with 80 beds.

Statistics, Nov. 1, 1951: Christians 24,025; Indian Pastors 74; Evangelists 3; Catechists 141; M.E.L.I.M. Teachers 262; Non-Lutheran Teachers 31; Indian Doctors 2; Indian Nurses 10; Bible Women 18; Boarding Homes 12.

General Secretary :—The Rev. M. L. Kretzmann, M.A., Nagercoil, Travancore-Cochin.

The Arcot Lutheran Church (Formerly known as THE DANISH MISSIONARY SOCIETY).—Established 1864 in South Arcot, working there and in North Arcot, on the Shervaroi Hills, in Madras has a total staff of 486 Indians and 35 European Workers. Communicants 5,253, Christian Community 10,726, two High Schools, 3 Boarding Schools, one Hostel, 73 Elementary Schools and 2 Hospitals; total scholars 8,518.

President :—The Rev. P. Wandall, Fort St. David, Cuddalore, S.I.

Treasurer :—Miss H. Olesen, 14, Rundall's Road, Vepery, Madras.

Secretary :—The Rev. P. Lange, "Carmel", Tiruvannamalai.

INTER-DENOMINATIONAL MISSIONS

The Central Asian Mission.—Founded 1902. Head Office: 39, Victoria Street, London, S.W.1; Field Representative, Bandipur, Kashmir. Stations at Bandipur and Kargil. Protestant, Evangelical, Inter-denominational. 8 European and national workers.

The Friends' Service Council.—The Friends' Service Council works in four stations of the Hoshangabad District besides two organized congregations in Bhopal.

The Church, which is composed of 5 Monthly Meetings united in the Mid-India Yearly Meeting, is largely organised on the lines of the Society of Friends in England. There are 180 full members and 1,366 adherents.

There are 2 missionaries.

The principal activities are a general hospital with dispensary and nurses' training department, a Primary School and a High School at Itarsi; a boarding school for girls with Primary and Indian English Middle Departments at Sohagpur; a Home for older girls in Sohagpur where toys are made for sale; a Boys' Hostel at Itarsi for boys attending Middle and High school there. The Council's work also covers two villages in the Seoni Tahsil of the Hoshangabad district in one of which, Makoriya, there is a Mission Farm stretching 300 acres for demonstrating methods of intensive farming and anti-erosion work, and a Primary School.

A Settlement is maintained at Rasulia near Hoshangabad a Centre of a Rural Development Co-operative Society which is handling a large variety of goods; besides work of an educational and social nature is carried on. Wardens, D. G. and E. M. Groom.

There is also a Weavers' Co-operative Society at Khera, Itarsi, where cloth is made on handlooms.

A "Quaker Centre" at 24, Rajpur Road, Delhi, acts as a Christian Cultural Centre for the promotion of adult education and inter-communal harmony and as a meeting place for people interested in the international service of the Society of Friends *Warden* :—Horace G. Alexander.

Church Secretary : Harry Mirchulal, Itarsi, Madhya Pradesh.

The American Friends' Mission.—With Missionaries working in Chhatarpur District, Hospital at Chhatarpur, Orphanage and Boys' High School at Nowgong. Churches and Evangelistic work throughout the district.

Superintendent: Rev. Everett L. Cattell, Chhatarpur, Vindhya Pradesh.

The Old Church Hebrew Christian Mission was established in 1858, in Calcutta, and is the only Anglican Hebrew Christian Agency in India. *Hon. Secretary:* The Rev. J. L. Hansen, 11, Mission Row, Calcutta 1.

LADIES' SOCIETIES

Zenana Bible and Medical Mission.—This is an inter-denominational society, with headquarters, 39 Ladbroke Grove, London, W.11, working among women and girls in 5 stations in Bombay State, 6 in Uttar Pradesh, 3 in E. Punjab, 2 in Bihar, 1 in Hyderabad State and 3 in W. Pakistan. There are 60 European Missionaries, and about 400 national workers—teachers, nurses, evangelists, etc. The work includes the training of Indian and Pakistani women as evangelists, teachers, doctors, nurses, dispensers and midwives. There are three Main hospitals at Nasik, Lucknow and Patna, High Schools at Bombay, Lahore and Panchgani, a Blind School near Dehra Dun and City Schools of which those at Banaras are the largest. At Lahore there is a University College and a teachers' training centre. Evangelistic work is done in the villages and big city. Zenana visiting and literacy work are also stressed in rural areas.

Hon. Treasurer :—Major Mainwaing Burton.

President:—The Lady Kinnaird.

Secretary :—A. J. Dain.

Address in India :—I. M. B. O. Office, 364, Hornby Road, Bombay.

The Missionary Settlement for University Women was founded in Bombay in 1896. Its work is religious, social and educational. The Settlement supplies a hostel for University students of all nationalities. The Settlement takes part in many of the organised activities for women's work in the city.

Staff :—Miss E. Watts, B.A. (Wales); Miss D. Hunt, B.A. (London).

The Ramabai Mukti Mission (affiliated with the Christian and Missionary Alliance Mission in 1925), the well-known work of the late Pandita Ramabai shelters about 700 deserted wives, widows and orphans, educating and fitting them to earn their living. The Mission is worked on Indian lines and carried on by Indian and European workers. Evangelistic work is carried on in the surrounding villages of Kedgaon, Poona District.

Secretary and Treasurer.—Miss J. I. Craddock.

MISCELLANEOUS

The Christian and Missionary Alliance.—Dates from the year 1892 under the name of the International Missionary Alliance, but a number of its missionaries were at work in the district of Berar much earlier. Work is carried on in the areas of Berar, Khandesh and Gujarat. There is a staff of 60 missionaries and 150 Indian workers. The number of mission stations is 17, with additional out-stations. There is a Christian community of 6,750. There are 4 boarding schools, two for boys and two for girls, 3 training schools for Indian workers. There are 35 organized congregations, including one English at Bhusawal.

Executive Secretary.—The Rev. R. H. Smith, Akola, Berar, Madhya Pradesh.

The Church of the Brethren (American).—Established in 1894 by American Missionaries and is found in Broach, Surat, Thana and Dangs Districts. At present there are 34 American and 224 Indian personnel on the paid staff. There is a total membership of 9,156. The major activities are educational, medical, evangelistic, temperance, village uplift, co-operative societies, etc. There are 81 primary schools serving a total enrolment of 5,300 pupils. There are 5 co-educational boarding schools with separate hostel quarters. A vocational training college including teachers training, village trades, agriculture and carpentry and a school of practical arts for girls are located at Ankleswar. There are two hospitals and four dispensaries with total yearly treatment of about 60,000.

Secretaries :—E. M. Zigler, 364, Hornby Road, Bombay; P. G. Bhagat, Vocational Training College, Ankleswar, Broach District.

The Poona and Indian Village Mission.—Founded in 1893, Mission Stations :—Poona City, Khed Shivapur, Poona District; Nasrapur and Bhor, Poona District; Lonand, M. S. M. Rly., Satara District; Phaltan, Satara District; Pandharpur, Sholapur District; Madha, Sholapur District; Dapoli, Khed, Ratnagiri District; Shetphal, Anjangaon, Yavale and Nandeshwar, Sholapur District.

The Staff consists of 35 Europeans and 60 Indian workers, including hospital staff, with a community of about 600 Indian Christians and their families. The main work is evangelising in the villages, women's zenana work, and primary education and a baby boy's orphanage and Boys' and Girls' Boarding Schools. Medical work with Hospital at Pandharpur. Mission Headquarters, "Villa Memoire", Irwin Road, Poona 2.

Chairman :—Major R. P. D. Snow.

Secretary :—Rev. J. Woodward.

The American Churches of God Mission.—Has 2 missionaries at Bogra and 1 on furlough; 2 at Khanjanpur, *Via* Jayapurhat, Bogra District, East Bengal (Pakistan), and 1 on furlough; 3 at Ulubaria, Howrah District, West Bengal and 2 on furlough, Darjeeling.

President :—Miss E. M. Catlin, Mission House, Bogra, East Bengal (Pakistan).

Secretary :—Miss Evelyn C. Shuey, Mission House, Ulubaria, Howrah Dist., West Bengal (India).

Anglican Evangelical Missionary Society.—Established by the Government of India Act, XXI of 1860. The Society works in the villages of India and amongst the Indian Labour employed on Estates in Ceylon and Malaya. Work commenced in Malaya in 1935 and in Ceylon in 1938. *British Headquarters:* 15 Newburgh Road, Acton, London, W.3, England.

General Secretary :—The Right Rev. Charles Leslie Saul, D.D.

President :—The Most Rev. J. G. Peters, M.A., D.Litt., D.D., Archbishop of the Indies, Ambur, India. *Address* :—Archbishop's Residence, Ambur, India.

The Church of the Nazarene Mission.—Has its headquarters for India at Buldana, Berar, where it has a junior Bible School. In Chikhli 14 miles from Buldana, there is a Co-educational Boarding School with Secondary Departments and an enrolment of 325. At Basim, Berar, 70 miles from Chikhli there is a Senior Bible School and the Reynolds Memorial Hospital—a hospital for women and children. There is a primary boarding school at Dhad, 18 miles from Buldana and also a dispensary at Pusad 40 miles east of Basim. At present there are 19 missionaries in India. There is an organized Indian District Assembly with about 32 churches. The Indian Staff of preachers and teachers number 75.

Mission Chairman :—Rev. Leslie C. Fritzlan, Chikhli, Berar, Madhya Pradesh.

The Indian Missionary Society, Tinnevelly (DORNAKAL AND THE HILL TRIBE MISSION).—Opened in 1903, operates in the Warangal District of Hyderabad State as well as among the hill tribes called Pallars in the Travancore Hills. It is the missionary effort of the Christians living in India and overseas. There are now nearly 19,000 Telugu Christians in 180 villages and 250 Paliyar Christians in the hills. Annakkari in Travancore has become a well established colony of the hill tribes. The nomads have begun to do agricultural work. The Society publishes monthly *The Missionary Intelligencer* containing information about the Society's work in both the fields. Headquarters: Palamcottah.

Secretary :—Rev. Joseph Abraham, Palamcottah.

The Mission to Lepers.—Founded in 1874. An inter-denominational and international Society for the establishment and maintenance of Homes and Institutions for those suffering from leprosy and for their healthy children, working in 20 countries but largely in India, Burma, China and countries in Africa. Its work in India is carried on through co-operation with about 30 Missionary Societies. In India and Burma alone the Mission now has 31 Homes of its own with upwards of 7,600 inmates and is aiding or has some connection with work for leprosy patients at 24 other places in India. Altogether in India and Burma over 10,000 cases of leprosy are being helped.

The Mission also provides for the segregation from their parents of the healthy children of those suffering from leprosy. More than 800 children are thus being saved from becoming infected.

Most of the Mission's income is derived from voluntary contributions. Some funds are raised in India and Burma but the bulk of the money expended by the Mission in India and Burma is received through Britain, although the State Governments give regular maintenance grants.

There is an Indian Auxiliary of the Mission to Lepers of which the Hon. Treasurers are—J. W. N. Baldock, c/o Messrs. Macneill & Co., 2, Fairlie Place, Calcutta and. H. F. Milne, c/o Messrs. Killick Industries, Ltd., Bombay.

The General Secretary of the Mission is A. Donald Miller, 7, Bloomsbury Square, London, W.C.I. The Secretary for India is William Bailey, M.A., Purulia (B.N.R.), Bihar.

The Regions beyond Missionary Union.—An inter-denominational Mission commenced at Motihari, Bihar, in 1900. Works in the Champaran, Saran and Purnea Districts. It has 35 European missionaries working in 7 stations and 3 outstations, and runs a hospital and a combined Girls' Orphanage and Women's Home.

Field Superintendent :—Mr. E. W. Oliver, Mission House, Motihari, Champaran Dist., Bihar.

The National Missionary Society of India.—Established 1905, founded, financed and managed by Indian Christians; has a staff of 41 missionaries. 200 other workers including volunteers, operates in Firozabad, Dist. Agra; Benaras, Uttar Pradesh; Malunghat, Mymensingh Dist., E. Pakistan; Rewa, Korea and Surguja in M. P.; Karwar, Ankola, Kumta and Honavar, N. Kanara Dist.; Poona (Bombay State); Parkal, Nirmal (Hyderabad State); Puram, Chandrapuram, Katteri, Jalarpet and Tirupattur, North Arcot Dist.; Dasarpuram (Tinnanur), Chingleput Dist., Madras State; Kottayam in the United State of Travancore and Cochin; N.M.S. of Ceylon affiliated to the N.M.S. of India.

The Society carries on social, medical, educational, rural uplift, literacy and evangelistic work in 16 main centres in 10 language areas. It is the largest, inter-denominational All India Missionary Society, it has 36 Higher Elementary, Primary, Nursery and Night Schools, 1 High School, 1 Printing Press, 2 Hospitals, 2 Dispensaries and 2 Child Welfare Centres. Annual expenditure including self-supporting institutions Rs. 1,30,435. The expenditure of institutions which are autonomous is not included in the budget.

SPORTS

AFTER a lapse of eighteen years an official M.C.C. team visited India during the last season. At first there was a lot of criticism of this team, but even with the absence of Len Hutton, Eric Bedser, Denis Compton, Godfrey Evans and Reg Simpson, India had to fight bitterly to save the rubber.

Out of the five Tests played, those at Delhi, Bombay and Calcutta ended in a draw; the Kanpur Test resulted in a win for England by eight wickets and India levelled the series by defeating England at Madras by an innings and 8 runs. India thus achieved her ambition of registering her first victory in an official Test, in the twenty-fifth attempt and after twenty years.

Indian cricketers went to England in April on a return visit, and India has done well in giving a chance to a good many youngsters. The members of the touring team were: V. S. Hazare (Baroda—Captain), H. R. Adhikari (Services—Vice-Captain), D. G. Phadkar (Bombay), M. K. Mantri (Bombay), V. L. Manjrekar (Bombay), S. G. Shinde (Bombay), R. V. Divecha (Bombay), G. S. Ramchand (Bombay), N. Chaudhary (Bengal), P. Sen (Bengal), P. Roy (Bengal), C. T. Sarwate (Holkar), Hiralal Gaekwad (Holkar), C. D. Gopinath (Madras), P. R. Umrigar (Gujarat), Ghulam Ahmed (Hyderabad) and D. K. Gaekwad (Baroda).

India lost the first three Tests; the fourth was drawn.

Table Tennis: For the first time a world event was held in India—the 19th World Table Tennis Championships at Bombay in February.

Hiroji Satoh of Japan claimed the world singles championship by beating Joseph Koczian, of Hungary; his compatriots Narikazu Fujii and Tadaki Hayashi won the doubles championship by defeating Richard Bergmann and Johnny Leach, the reigning world champions. Shizuka Narahara and Tomie Nishimura also of Japan beat England's formidable combination of the Rowe twins.

Indian players did badly; the only consolation was that the national champion, Thangavelu Thiruvengadam got the measure of Johnny Leach in one of the Swaythling Cup matches against England. Sayeed Sultan made the best impression. She won the women's consolation prize.

Hockey: India is supreme in hockey. The Olympic team consisted of P. D. Singh, popularly known as "Babu"; Francis (Madras); Swaroop Singh (Services); R. S. Gentle (Bombay); L. Claudius (Bengal); Keshav Dutt (Bengal); Perumal (Bombay); Nand Singh (Services); Balbir Singh (Punjab); Udham Singh (Punjab); and Rajgopal (Mysore). Reserves: Deshmuthu (Mysore); Dharam Singh (Punjab); Da Luz and Jaswant Singh (Bengal); and C. S. Dubey (Bangalore).

India beat Holland in the final by six goals to one.

Punjab, Bombay, Bengal and Mysore are the strongholds of the game in this country, but the honour of winning this year's national tournament went to Bengal, who defeated East Punjab, the reigning champions for the last three years. Incidentally, Bengal claimed the title after a lapse of fourteen years. Bengal's women, however, went down fighting to those from Bombay in the All-India Tournament by one goal to nothing.

Tata Sports Club created history by winning the Aga Khan Tournament, the Blue Ribband of Western India for three years in succession.

For the first time a foreign team (from Japan) visited India to have "lessons" in international hockey. They played five Tests at Calcutta, Delhi, Allahabad, Amritsar and Bombay and lost all of them.

A courtesy visit was paid by an Indian hockey team as guests of the Afghan Government to play exhibition matches at Kabul, as part of Afghan Independence Day celebrations.

Football: 'Football remains the best patronised game in the country. Bengal is the home of the game and they again dominated all other States in the Inter-State Tournament to win the championship for the second year in succession, beating Bombay, by one goal to nothing. East Bengal annexed the I.F.A. Shield for the third time in succession, beating Mohun Bagan by two goals to one. They did not, however, participate in the Rovers Cup Tournament, Western India's most coveted prize, which was won by Hyderabad Police for the second time in a row, defeating Wimco Sports, from Madras, by two goals to nothing.

A football team accepted an invitation from the Kabul Government in connection with the celebration of their Independence Day to play exhibition matches there.

An Indian team participated in a quadrangular tournament sponsored by Ceylon, at Colombo. They shared the honours with Pakistan, the final ending in a goalless draw. The other two participating teams were Ceylon and Burma.

The following team represented India at the Helsinki Olympic Games:—B. Anthony Braganza (Bengal); K. Varadraj (Mysore); S. Manna (Bengal)—(Captain); B. Bose (Bengal); Aziz (Hyderabad); A. Latif (Bengal); Chandan Singh (Bengal); Noor (Hyderabad); S. Roy (Bengal); S. Sarbadhikari (Bengal); P. Venketesh (Bengal); R. Guha Thakurta (Bengal); S. Mewalal (Bengal); Sattar (Bengal); P. B. Saleh (Bengal); S. K. Moin (Hyderabad); Ahmed Khan (Bengal); and Anthony (Bengal).

Fifteenth Indian Games: Several records were established during the XV Indian Games at Madras.

The Services asserted their superiority by winning the championship comfortably by registering 108 points against PEPSU's 33.

Lavy Pinto proved again that he was the fastest runner in India.

Madras dominated in weight-lifting and won the Burdwan Challenge Shield for the best weight-lifting State, with 22 points. To East Bengal went a similar distinction in wrestling; they won six out of eight titles.

Parimal Roy, of Bengal won the Bharat Sree championship. He was also a winner at a London Show earlier.

In the women's events Bombay topped with 41 points, the runners-up being Mysore, with 22 points.

Dolly Nazir was head and shoulders above all competitors in swimming, capturing all the five titles for which she competed and helped the Bombay team to win the relay.

Mysore lost its position in basketball but her volleyball players made amends by capturing the championship by defeating Patiala in the final, and the Punjab in an earlier encounter. Madras annexed the basketball title. Madras scored another great triumph in Kabadi over Bengal, who had defeated Bombay, the holders earlier.

Eight athletes represented India in the Helsinki Olympic Games. They were: Lavy Pinto of Bombay for 100 and 200 metres; Ivan Jacobs of Madras for 400 metres; Mehanga Singh of PEPSU for high jump; Surat Singh of Delhi for marathon; Sohan Singh of Services for 800 metres; Gulzara Singh of PEPSU for 3,000 metres steeplechase; Mary D'Souza of Bombay for 100 and 200 metres: Nilima Ghose of Bengal for 80 metre hurdles and 100 metres.

Lavy Pinto qualified for the semi-finals in 100 and 200 metres, while Sohan Singh made that grade in the 800 metres. A bronze medal was won by K. D. Jadhav, bantamweight wrestler.

Lawn Tennis : Quite a number of lawn tennis players participated in tournaments in India during the season. World's leading amateur player, Frank Sedgman, played two exhibition matches in Madras and Bombay. Prominent among the others were the Swedes Lennart Bergelin and Sven Davidsson, Americans Straight Clark, Miss Doris Hart (the Wimbledon Champion) and Miss Shirley Fry and Japan's Miyagi.

India's standard in the game is very low at present as none of her players did well in the tournaments.

Billiards : Wilson Jones, the Indian champion, created history by winning both the national titles. In the final of billiards he beat C. Hirjee by 3,630 points to 2,705 points, while he overcame the same opponent in snooker, winning by seven frames to two.

Jones represented India at the World Amateur Billiards Championship in England, where, however, he finished near the bottom of the table.

Golf : Forty-seven competitors from India, Burmah and Ceylon participated in the year's All-India Tournament at Calcutta. In the final J. R. B. Kean beat I. S. Malik, the holder, two and one.

Kean and Malik scored a great victory over Dai Rees, the former British match champion of 1949 and 1950 and Harry Weetman, the present champion, in an exhibition match at Calcutta.

Max Faulkner, the British Open Golf Champion, gave a delightful exhibition of the game during his two days' stay in Bombay.

Chess : The honour of winning the two major Chess tournaments in the Bombay State namely, Bombay State Open Championship and the Ranade Memorial Chess Tournament, which was played at Poona, went to Ramchandra B. Sapre. The title in the Rutnam Memorial Tournament, at Madras was claimed by S. Venkatraman.

Polo : During the period under review there was nothing of note in polo in India apart from some small tournaments at Jaipur and New Delhi. The All-India Tournament for the President Peron Cup, presented by the President of the Argentine, was to be contested later in the year.

A notable event was the invitation extended to Maharaj Prem Singh, one of the outstanding exponents of polo in India, by Wahid Yousri Pasha, a polo-playing millionaire, of Egypt. Maharaj Prem Singh scored all the goals for the Egyptian Police Academy team which won the Cairo Cup in the Gezira Sporting Club's Polo Tournament in January.

Badminton : The reigning champions of the shuttle game, Devinder Mohan and Miss Betty Farias, did not take part in the All-India Championships at Calcutta this year.

In the first round of the Pacific Zone of the Thomas Cup India beat Thailand in Bombay by nine matches to nothing. And their campaign in Australia was equally triumphant, for they beat Australia by a similar wide margin at Melbourne.

In the next round India beat Denmark, winners of the European Zone, at Kuala Lumpur by six matches to three, but in the pre-challenge round they narrowly succumbed to the United States of America by four matches to five at Singapore.

India was represented by Devinder Mohan (Bombay), Henry Ferreira (Bombay), Trilok Nath Seth (Uttar Pradesh), Manoj Guha (Bengal) and Amritlal Dewan.

CRICKET

M.C.C. in India

First Test, played at Delhi, November 2, 3, 4, 6 and 7, 1951, resulted in a draw.

ENGLAND : (1st Innings) 203 (J. D. Robertson 50 ; S. G. Shinde 6 for 91, V. M. Mankad 3 for 53).

INDIA : (1st Innings) 418 for 6 wkts. decl. (V. M. Merchant 154, V. S. Hazare not out 164 ; R. Tattersall 2 for 95).

ENGLAND : (2nd Innings) : 368 for 6 wkts. (A. J. Watkins not out 138, F. A. Lowson 68, D. B. Carr 76 ; V. M. Mankad 4 for 58, S. G. Shinde 2 for 162).

BHANDARKAR ORIENTAL RESEARCH INSTITUTE, POONA

The Institute was inaugurated on the 6th of July 1917, the 80th birthday of late Dr. Sir R. G. Bhandarkar, at the hands of H. E. Lord Willingdon, who became its first President. Its objects are to publish critical editions of texts and original works bearing on Oriental antiquities, to provide an up-to-date Oriental library, to train students in the methods of research and to act as an information bureau on all points connected with Oriental Studies. The valuable library of Dr. Sir R. G. Bhandarkar, which he had bequeathed already to the Institute, was after his demise handed over by his executors to the Institute, and is now located in the Central Hall of the Institute. Since the 1st of April 1918 the Government of Bombay have transferred to the custody of the Institute the unique collection of nearly 20,000 manuscripts formerly accommodated in the Deccan College, together with a maintenance grant of Rs. 3,000 a year. Government have likewise entrusted to the Institute a grant of Rs. 12,000 a year for the publication of the B. S. S. and the Government Oriental Series. The Institute has also started a series called the *Bhandarkar Oriental Series* in which seven works have been already published and some others have been undertaken. The Institute has undertaken to edit *Mahabharata* critically at the initiation of the Late Raja of Aundh who donated a total grant of Rs. one lakh for that purpose. Dr. V. S. Sukthankar was the General Editor of the *Mahabharata* up to 21st January 1943 the date of his unfortunate demise. Dr. S. K. Belvalkar has now been appointed General Editor. Grants are being received from the Government of India (Rs. 6,000 a year), the University of Bombay (Rs. 3,000 a year), the University of Poona (Rs. 2,000 a year) and the Government of Bombay (Rs. 6,000 a year), as also from some other State Governments. A few years ago the former Government of H.H. the Maharaja Scindia of Gwalior sanctioned Rs. 25,000 for the *Mahabharata* at the rate of Rs. 2,500 per year for 10 years. The British Academy has also given a grant to the *Mahabharata* as a token of their appreciation of this work. The Institute has received so far about Rs. 33,615 from the trustees of the *Mahabharata* publication fund, London. During 1949 and 1950 the Institute received a special grant of Rs. 55,000 for the printing of the Santiparwan of the *Mahabharata*. On 25th March 1944, the Institute inaugurated its *Mahabharata* Printing Department with a view to expediting the printing of the *Mahabharata* Edition. The Institute issues a journal called *Annals of the Bhandarkar Oriental Research Institute* published four times a year. It also held under its auspices the First Oriental Conference on the 5th, 6th and 7th of November 1919 under the patronage of Sir George Lloyd and the presidency of Sir R. G. Bhandarkar. Thanks to liberal donations from the Tatas and the Jain community, supplemented by Grants-in-Aid from the Government of Bombay, the Institute is housed in a fine building. Since August 1927 the Institute has been conducting regular M.A. classes in Sanskrit, Pali, Ardhamagadhi and Ancient Indian Culture. Recently the Sanskrit Department of this Institute has been affiliated to the University of Poona and students are being coached for the M.A. and Ph.D. degrees of the above mentioned University. Lectures by eminent scholars are also delivered occasionally. The Institute celebrated its Silver Jubilee on the 4th and 5th of January 1943. Membership dues Rs. 10 a year or Rs. 100 compounded for life. Members can, subject to certain conditions borrow books from the library and get the "Annals" free and other publications (a list covering about 100 titles sent free upon request) at concession rates.

BHARATA ITIHASA SAMSHODHAKA MANDALA, POONA

Address : 312-13, Sadashiv Peth, Poona City.

Founded in 1910 by the late Mr. V. K. Rajwade and Sardar K. C. Mehendale and registered under Act XXI of 1860 in 1910 with the object of collecting and conserving historical materials, erecting suitable buildings for preserving and exhibiting them, publishing such materials and other works of historical research and generally to encourage and foster critical study of and research in Indian history. Possesses the best collection of Persian and Marathi historical papers owned by any private society. Has a rare collection of about a thousand Indian paintings now housed in a special wing, maintains a coin cabinet and an armoury of old weapons. Has a section for copper plates, sculpture and archæology and has a library of general, historical and rare books. Holds fortnightly and annual meetings where notes and papers based on original documents are presented, discussed and afterwards published. The Poona City Research Section of the Mandala does research work in the city and publishes findings. Has published several volumes of original historical letters and other historical and literary books whose total number exceeds 90. Conducts a quarterly journal devoted to research. Has done some excavation at Karad and got findings of the Second Century A.D. Work done mostly in Marathi. Celebrated the Silver Jubilee by calling the first All-India Modern History Congress in 1935. Has been receiving some grant-in-aid from the Government of Bombay and Central Government. Was supported by many Rajas, Jahagirdars, Sardars and the public. The late Dr. J. E. Abbot of New Jersey, U.S.A., left by will a gift of 30,000 dollars to the Mandala for buildings. Annual membership fees for various classes are Rs. 3, 6, 12, 25, 125, and 300 which can be compounded for life by paying ten times the annual subscription for a particular class in a single year. Effective members over 1,000; Annual income averages between 6 and 8 thousand rupees.

THE INSTITUTE OF CHARTERED ACCOUNTANTS OF INDIA

Address : Room No. 98-102, Gurdwara Road Hutments, New Delhi; *President's Office* : Hamam House, Hamam Street, Fort, Bombay 1.

The Institute of Chartered Accountants of India was established on 1st July, 1949, as a result of the enactment of the Chartered Accountants Act, 1949, by the then Dominion Parliament on 9th April, 1949, which came into force on 1st July, 1949. This Institute is an autonomous body of all accountants with perpetual succession and is entrusted with the performance of all the functions previously carried out by the Central Government in respect of the profession of Accountancy.

The members of the Institute have been divided into two categories, namely, practising members and non-practising members. The practising members are designated as "Chartered Accountants" while non-practising members cannot style themselves as such. Further, there are two categories of members, namely, Associates and Fellows. Every member on admission to the Institute is known as Associate member and a practising member after a practice of 5 years is entitled to become a Fellow. A member of the Institute who has been in continuous practice for a period of over three years is entitled to train articled clerks.

Council of the Institute :—*President*, G. P. Kapadia; *Vice-President*, S. B. L. Vaish.

Members (Elected) :—N. R. Mody; N. M. Shah; B. D. Birdy; N. M. Raiji; C. S. Sastri; S. Suryanarayana Iyer; R. N. Rajam Aiyar; S. Ghose; G. Basu; S. N. Banerjea; M. K. Deb; S. B. L. Vaish; P. R. Mehra.

Members (Nominated) :—K. G. Ambegaokar; P. C. Das Gupta; S. D. Nargolwala; K. N. Guttia; G. M. Bathgate.

Secretary to the Council :—S. Venkataraman.

INDIAN STANDARDS INSTITUTION

19, University Road, Civil Lines, Delhi 8.

Origin : With a view to co-ordinating standardization activities of various laboratories and institutions and to introduce industrial standards on a national basis the Government of India by their Resolution No. 1-Std(4)/45 dated the 3rd September 1946, brought into existence the Indian Standards Institution.

Aims and Objects : The aims and objects of the Institution include the co-ordination of efforts of Producers and Consumers for the improvement of materials, products, appliances, processes and methods, introduction of codes of practices, provisions or arrangements of facilities for examination and testing of commodities, processes and practices and planning and direction of related investigations and research.

Management : The affairs of the Institution are administered by the General Council, on which are represented Ministries of the Government of India, Governments of States and State Unions, professional societies of technologists and scientists, Chambers of Commerce and Industry and other important interests.

General Council :—*President* : The Hon'ble Shri T. T. Krishnamachari. *Vice-Presidents* : Dr. K. S. Krishnan, Lala Shri Ram. *Secretary (Ex-officio)* : Dr. Lal C. Verman, Director, Indian Standards Institution.

Preparation of Standards : The technical work of preparing standards, specifications, codes of practices, etc., will, for the present be carried out under the authority of three division councils, namely, (*a*) Engineering, (*b*) Textiles, and (*c*) Chemicals.

Finances : The income of the Institution is derived from (*a*) Government grants, (*b*) contributions from industry, the States and other interested public bodies, (*c*) subscription from members and (*d*) sale of Indian Standards, specifications, etc.

The Government of India have increased their grant-in-aid to the Institution from Rs. 2.2 lakhs in 1951-52 to Rs. 4.2 lakhs for 1952-53.

I.S.I. Certification Marks : The Indian Parliament passed on 1st March 1952, the Indian Standards Institution (Certification Marks) Bill. The Act authorises the Institution to specify certification marks and issue, renew and cancel licenses for their use on commodities conforming to Indian Standards.

Director : Dr. Lal C. Verman.

INDIAN INSTITUTE OF CULTURE

6, North Public Square Road, Basavangudi, Bangalore City.

The Indian Institute of Culture was founded in 1945 at Basavangudi, Bangalore, with three main objects : (1) To establish a Centre affording opportunities for cultural and intellectual development; (2) To spread correct ideas on education, especially of adults and of youth; (3) To promote exchange of thought among the various States of India and other countries of the world towards establishing true national and international concord and co-operation.

For the furtherance of these objects, the Indian Institute of Culture has had since August 1945 a Cosmopolitan Home, and since the opening of its free public library in July 1947, has had a regular weekly programme of lectures on a wide variety of cultural subjects, alternating with discussion group meetings, at each of which an outstanding recent book is orally reviewed and then discussed or a paper specially sent for the purpose is read and its points considered.

Like all the activities of the Institute, membership is open to all, irrespective of race, nationality, religion, colour, sex, class or caste; subscribing to the ideal of Universal Human Brotherhood being the only criterion of eligibility.

There are Ordinary Members, Life Members and Patrons; the Institute has numerous members in different countries.

Numerous lectures, papers read and book reviews have appeared in *The Aryan Path*, the Institute's monthly organ. In 1951 a new building was erected in the Institute's grounds, housing the growing free library and offices and providing an auditorium seating 300.

President, Council of Management : B. P. Wadia.

Honorary Secretary : Dr. L. S. Dorasami, M.Sc., Ph.D., F.A.Sc.

KALAKSHETRA—INTERNATIONAL ACADEMY OF THE ARTS, ADYAR, MADRAS 20

Literally "The Sacred Abode of the Arts" was founded at Adyar in 1936 by Shrimati Rukmini Devi, to emphasize the essential unity of all true Art and to work for the recognition of the Arts as vital to individual, national, religious and international growth.

A weaving department, famous all over India for its manufacture of saris, and a publication department are also part of the Academy's activities. Attached to the Academy is the Mahamahopadhyaya Dr. U. V. Swaminatha Iyer Library, the largest Tamil Manuscript Library in the world, with a rare collection of palm-leaf manuscripts.

Two other educational institutions work in close connection with and are benefited by the Kalakshetra's art activities, namely the Besant Theosophical High School and the Arundale Training Centre for Teachers (Montessori System).

MADRAS LITERARY SOCIETY AND AUXILIARY OF THE ROYAL ASIATIC SOCIETY

Office : College Road, Nugumbakam, Madras.

The Society's Library contains nearly a lakh of books which are circulated to members.

THE NATIONAL LIBRARY, CALCUTTA (FORMERLY IMPERIAL LIBRARY)

The Library contains most of the important and rare works in English and Indian languages dealing with India, apart from a collection of important books of reference and of standard works on various subjects which is added to from year to year. The present stock of the Library is 537,436 books excluding a little over 1,640 manuscripts.

The Library is provided with Reading Rooms, public and private, where facilities are offered to students, research workers and general readers. There is a separate Reading Room for women. Books are also lent out against cash security to any one living in any part of the Republic of India. The membership of both the Reading Rooms and the Lending Section is free. General and special reference enquiries are also attended to.

The Library of late Sir Asutosh Mukhopadhyay which consists of a most valuable collection of books and publications was presented to this Library in 1949 by his distinguished sons. This collection contains about 80,000 books and covers subjects so diverse as literature, History, Philosophy, Economics, Mathematics, Astronomy, Physics, Physiology, Anthropology, Law and Art. This collection is known as "Sir Asutosh Mukhopadhyay Collection".

In accordance with the decision of the Ministry of States, Government of India, all the books of the late Hyderabad Residency Library excepting those required for the use of the former Military Government, Hyderabad, were presented to this Library. The collection contains 4,295 volumes.

One Sri Nityananda Bhattacherjee made over to this Library, on behalf of Sri Tripura Sankar Banerjee, Uprahti, Rewa, one hundred Sanskrit manuscripts of standard works on various subjects. Some of the manuscripts are more than three hundred years old.

Another collection of 3,476 books and manuscripts known as Ramdas Sen Collection of Berhampore, Murshidabad, West Bengal, is going to be presented shortly to this Library by the heirs of late Sri Ramdas Sen.

Bibliographical work :—The Library has undertaken the task of compilation of a far-reaching Bibliography on all aspects on Indian Culture. In addition a large number of short Bibliographies in response to enquiries received from the various individuals and Institutions was also compiled.

Extension activities :—The Library co-operated in holding the Library Training Classes conducted by the Calcutta University and provided facilities for the Summer Training School conducted by the Bengal Library Association. The U.S. Consulate held an exhibition of American books at this Library and this opportunity was utilised to explain the scope of the activities and nature of the Collections of this Library to the elite of the city. The Librarian visited the United States as guest of that Government under the Leader Exchange Programme.

Librarian : B. S. Kesavan. *Deputy Librarian* : V. M. Mulay. *Supdt., Reading Rooms* : J. M. Kanitkar.

P. E. N. ALL-INDIA CENTRE

The aim of the P.E.N. everywhere is to promote friendliness among writers and to uphold freedom of speech. In addition, the All-India Centre is working for national cultural unity by spreading appreciation of the many Indian literatures outside their own language areas and also abroad. This is done by means of public lectures, through its monthly journal *The Indian P.E.N.*, free to P.E.N. members and available to the general public in India for Rs. 5 per annum, and through its "P.E.N. Books" series on the different Indian literatures. The All-India Centre has about 400 members among the country's leading writers and editors, and has sponsored two All-India Writers' Conferences. Membership is open to any Indian of recognised position as a writer, subject to the approval of the Executive Committee. Entrance fee Rs. 5; annual fee Rs. 10; life membership fee Rs. 150.

An auxiliary association called "Friends of the P.E.N." was formed in 1949. Its membership is open to all those who are interested in literature. Annual fee Rs. 10.

Address : "Aryasangha," 22, Narayan Dabholkar Road, Malabar Hill, Bombay 6.

PHILATELIC SOCIETY OF INDIA

Formed 6th March 1897; Annual subscription Rs. 12. *Hon. Secretary* : E. Franklin DeSouza, 30-C, Khotachi Wadi, Bombay 4.

RAMAKRISHNA MISSION AND MATH

P. O. Belur Math, Dt. Howrah.

The Ramakrishna Mission is an association for missionary, philanthropic and educational service. It is registered under Act XXI of 1860 and has 67 centres spread over India, Pakistan, Burma, Ceylon and some British colonies. It has under it eight Indoor Hospitals, 41 Outdoor dispensaries, three colleges, 40 secondary schools, nine vocational and industrial schools, 75 other types of schools and 37 hostels for boys and girls. Besides it undertakes occasional relief work. The Ramakrishna Math or Monastery, though distinct, is closely related with the Ramakrishna Mission, both having the same office-bearers and doing similar work. The monks of the Ramakrishna Math are the principal workers of the Ramakrishna Mission. The Ramakrishna Math has 66 branch centres spread over India, Pakistan, Europe and U.S.A. It conducts 4 Indoor Hospitals, 14 Outdoor dispensaries, 2 High Schools, 14 other types of schools and seven hostels for boys and girls. OFFICE-BEARERS: *President*—Swami Sankarananda; *General Secretary*—Swami Madhavananda.

Hon. Secretary : N. A. Subramaniam.

SCIENTIFIC

AGRICULTURAL AND HORTICULTURAL SOCIETY (THE ROYAL OF INDIA, CALCUTTA

Founded 1820.

Patron :—The President of the Republic of India.

Vice-Patron :—His Excellency the Governor of West Bengal.

General Objects and Utility.—The development of horticulture in India and the encouragement, promotion, extension and improvement thereof in all its branches.

Member, Annual subscription Rs. 40. Entrance fee Rs. 10. Associate, Entrance fee Rs. 5, Annual subscription Rs. 20, Life Membership Rs. 500. *Secretary* : S. Percy-Lancaster, F.L.S., F.R.H.S., M.R.A.S., 1, Alipore Road, Alipore.

AGRI-HORTICULTURAL SOCIETY OF MADRAS

Established 1835. Quarterly subscription for members in Class A Rs. 7, in Class B Rs. 3. *President* : H. E. The Governor of Madras; *Chairman* : V. S. Hejmadi, I.C.S.; *Hon. Secretary* : Richard Appel, M.D.; *Hon. Treasurer* : Rao Saheb P. S. V. Nambi.

ANTHROPOLOGICAL SOCIETY OF BOMBAY

Founded 1886, to promote the prosecution of anthropological research in India; to correspond with Anthropological Societies throughout the world; to hold meetings for reading and discussing papers; and to publish a journal containing the transactions of the Society. Annual subscription Rs. 10. *President* : P. G. Shah, M.A., B.SC., I.A.A.S. (Retd.). *Hon. Secretary* : Sapur F. Desai, B.SC. *Asstt. Secretary* : K. P. Dastoor, M.A. *Office Address* : C/o K. R. Cama, Oriental Institute Building, 136, Apollo Street, Bombay.

BHARATA GANITA PARISHAD (FORMERLY BENARES MATHEMATICAL SOCIETY)

Address : Lucknow University, Lucknow.

Founded in 1918 for the encouragement and promotion of research in the various branches of Pure and Applied Mathematics, and in the History of mathematics. It publishes a journal entitled *The Proceedings of the Benares Mathematical Society*, now called *Ganita* in which original papers on Mathematics, Statistics, and history of mathematics are published. It also maintains a library. There are over 120 members in India and abroad. Annual Subscription for members is Rs. 5. Price of Journal Rs. 10 (in India) or 15 Shillings or 3 dollars (Foreign).

President : Dr. Gorakh Prasad.

Vice-Presidents : Dr. R. D. Misra, Dr. T. Vijayaraghvan, Prof. Chandi Prasad.

Secretary : Dr. Ram Ballabh.
Jt. Secretary : Dr. R. S. Mishra.
Editor : Professor A. N. Singh.
Editorial Secretary : Dr. S. D. Sinvhal.
Treasurer : U. K. Shukla.
Librarians : Dr. B. Mohan and K. S. Shukla.

THE BOMBAY JOINT TOWN PLANNING COMMITTEE

Office : Mercantile Bank Building, Mahatma Gandhi Road, Fort, Bombay.

A non-official body on which are represented leading commercial, civic and engineering organisations in Bombay. The aims and objects *inter alia* include investigation and advising on town and traffic planning, formulation of Master Plans for cities, etc.

Chairman : N. V. Modak, C.I.E., B.E. (Bom.), M.I.C.E., M.I.E. (Ind.), M.I.M.

Hon. Secretary : D. S. Venkatraman.

BOMBAY SANITARY ASSOCIATION

Office : Municipal Offices, Fort, Bombay.

Founded (*a*) to create an educated public opinion with regard to sanitary matters in general; (*b*) to diffuse the knowledge of sanitation and hygiene generally, and of the prevention of the spread of disease amongst all classes of people by means of lectures, leaflets and practical demonstrations and if possible, by holding classes and examinations; (*c*) to promote sanitary science by giving prizes, rewards or medals to those who may by diligent application add to our knowledge in sanitary science by original research or otherwise; (*d*) to arrange for homely talk or simple practical lectures for mothers and girls in the various localities and different chawls, provided the people in such localities or chawls give facilities. The Sanitary Institute Building in Princess Street was built by the Association at a cost of nearly Rs. 1,00,000. The foundation stone was laid by Lady Willingdon in March, 1914, and it was opened in March, 1915. It is a large and handsome structure with a large Lecture Hall, Library, Museum, etc., and also provides accommodation for King George V Anti-Tuberculosis League Dispensary transferred to the Municipality in 1924, the Museum and office of the Assistant Health Officer, C and D Wards, and the Vaccination Station. *Hon. Secretary and Treasurer* : Dr. V. V. Puri, M.B.B.S. (Punjab), D.P.H. (Lond.), D.T.M. (Liverpool), *Joint Honorary Secretary* : Dr. M. D. Vakil, M.B.B.S., B.HY. *Health Visitor* : S. K. Kulkarni.

BRITISH MEDICAL ASSOCIATION

(Bombay Branch)

Founded 1886, to promote Medical and the Allied Sciences and the maintenance of the honour and interests of the Medical Profession. *Secretary* : Dr. D. R. Bharucha, F.R.C.S. (Eng.), 'Dreamland', 25, New Queen's Road, Bombay 4.

INDIAN CHEMICAL SOCIETY

Was founded in 1924 with Sir P. C. Ray as *President*, located in the University College of Science Buildings, 92, Upper Circular Road, Calcutta. Dr. P. C. Guha, *President*; Sir S. S. Bhatnagar, F.R.S., Dr. B. B. Dey, Prof. N. R. Dhar, Dr. Gilbert Fowler, Sir J. C. Ghosh, Prof. B. K. Singh, Dr. J. N. Mukherjee, Dr. J. N. Ray, Dr. S. Krishna, Dr. Mata Prasad, Dr. B. C. Guha, *Vice-Presidents*; Prof. P. Ray and Dr. B. B. Dey, *Hony. Editors*; Dr. D. Chakravarti, *Hony. Secretary*; Dr. B. N. Ghosh, *Hony. Treasurer*; G. Banerjee, *Asst. Editor*; B. K. Mukerji, *Asst., Secretary. Bombay Branch* : G. P. Kane, *President*; Dr. G. V. Jadhav and Prof. P. M. Barve, *Vice-Presidents*; Dr. M. B. Kabadi and A. N. Kothare, *Joint Hony. Secretaries*; Dr. V. M. Bhabe, *Hony. Treasurer*.

The Society publishes a monthly Journal dealing with original researches in Chemistry in India and a quarterly Industrial Edition of the main Journal specially devoted to industrial topics. Annual subscription for the Industrial Edition is Rs. 6 for non-Fellows. Subscription for Fellows, Rs. 16, non-Fellows Rs. 20 and an additional Rs. 4 for the Industrial and News Edition. Fellowship is open to graduates of Chemistry and to those who are interested.

INDIAN INSTITUTE OF SCIENCE, BANGALORE 3.

The Institute owes its origin to the munificence of J. N. Tata, whose plan for establishing a Research Institute, was brought to fruition after his death by the generosity of his two sons, Sir Dorabji Tata and Sir Ratanji Tata, supported by the Government of India and the Government of H. H. the Maharaja of Mysore. The Institute began work in July 1911, and its laboratories provide facilities for post-graduate work in the following branches of Science, namely Physics, General Chemistry, Organic Chemistry, Chemical Engineering, Biochemistry, Pharmacology, Fermentation Technology, Food Technology, Electrical Technology, Electrical Communication Engineering, Aeronautical Engineering, Power Engineering, Internal Combustion Engineering and Metallurgy. There is a library of scientific books and journals comprising about 38,400 volumes. The Institute awards a limited number of research studentships, research scholarships and research stipends. The Associateship is awarded by the Governing Council on the recommendation of the Senate after five terms, devoted entirely to research carried on during the period. Diplomas are granted to students who satisfactorily complete approved courses of study in Electrical Technology, Electrical Communication Engineering, Chemical Engineering, Aeronautical Engineering and Metallurgy. A department of Power Engineering is being set up and a section of Economics and Social Sciences has been added. The scientific work of the Institute is recorded in the Quarterly Journal of the Indian Institute of Science. *Chairman of the Governing Council*, Sir Vithal N. Chandavarkar, Kt., M.A., Bar-at-Law; *Director*, Prof. M. S. Thacker, B.SC. (Eng.), M.I.E.E., F. AM.I.E.E., M.I.E. (Ind.), M.Inst.F., M.I.R.E., F.A.SC., etc.; *Registrar*: A. G. Pai, M.A. (Cantab.).

INDIAN MATHEMATICAL SOCIETY (MYLAPORE, MADRAS.)

Founded in 1907 for the advancement of mathematical studies in India. It conducts two quarterly journals, *The Journal of the Indian Mathematical Society* and *The Mathematics Student*; the former publishes original papers on mathematical subjects and the latter is devoted to the needs of students and teachers of mathematics. The Society maintains a library of books and current mathematical periodicals in all languages and some new books on the subject. The library is located at the Ramanujan Institute of Mathematics, "Krishna Vilas", Vepery, Madras where the journals and books are circulated to members by post. The journals of the Society are published in Madras. There are about 400 members from all parts of India. *President* : Dr. T. Vijayaraghavan, Ramanujan Institute of Mathematics. *Secretaries* : Dr. Ram Behari, Delhi University and Prof. S. Mahadevan, 2, Bhaskarapuram, Mylapore, Madras.

THE INDIAN COUNCIL OF MEDICAL RESEARCH

Address : "P" Block, Raisina Road, P.B. 494, New Delhi.

The Indian Council of Medical Research was formerly known as the Indian Research Fund Association and was constituted in 1911 by the Government of India with a sum of Rs. 5,00,000 set aside as an endowment for the prosecution and assistance of research, the propagation of knowledge and experimental measures generally in connection with the causation, mode of spread and prevention of communicable diseases.

Membership of the Council is open to non-officials. Every donor of Rs. 5,000 is entitled to become a permanent life member, while every subscriber of Rs. 100 per annum can be a temporary member.

The control and management of the Council is vested in a Governing Body, the President of which is the Hon'ble Health Minister of the Government of India. This body is assisted by a Scientific Advisory Board.

The Scientific Advisory Board annually publishes a technical report describing the research work done by the various enquiries carried out under the auspices of the Council during each calendar year. This report is obtainable from the office of the Secretary, Indian Council of Medical Research, New Delhi. The Council publishes the *Indian Journal of Medical Research* and its *Memoirs* and the *Indian Journal of Malariology*. In addition a number of special reports dealing with important subjects of medical research are also published from time to time. So far, over twenty such reports have been published.

The Council maintains the Nutrition Research Laboratories at Coonoor, which is the premier institution in India entirely devoted to research in nutrition and allied sciences.

The Council has set up nutrition units at the Seth G. S. Medical College, Bombay, University College of Science and Technology, Calcutta, and at the Indian Institute of Science, Bangalore, a Clinical Research and Neuropathological Unit at the Tata Memorial Hospital, Bombay, a Polio Research Unit at the Grant Medical College, Bombay, and an Industrial Health Research Unit at the All-India Institute of Hygiene and Public Health, Calcutta.

A Virus Research Centre has also recently been set up by the Council at Poona in collaboration with the Rockfeller Foundation of the U.S.A.

In order to foster medical research in the country and to encourage young medical and science graduates to take to research work the Council annually awards Research Fellowships tenable for two years of the value of Rs. 250 p.m. with a contingent grant of Rs. 500 per annum for each fellowship.

The Council maintains a library at the Central Research Institute, Kasauli. The Council has also established a Micro-film Service and Photostat Unit at the Institute. A Micro-film Service Unit has also been established at the Tata Memorial Hospital, Bombay, under the auspices of the Council.

THE INDIAN ROADS AND TRANSPORT DEVELOPMENT ASSOCIATION LIMITED.

Office : 27, Bastion Road, Bombay.

The Association was formed in 1926 and registered in October 1927 having a Council with headquarters in Bombay and Branches at Calcutta, Bombay, Madras, Dibrugarh, Nagpur and New Delhi, each with a Local Committee.

The Annual Subscriptions for membership of the Association are: Associate Members Rs. 5; Ordinary Members Rs. 10; and Supporting Members Rs. 300.

All persons, associations, firms or companies interested in transport development are eligible for election as members.

The composition of the Council is as follows:

President.—M. R. Masani.

Vice-President.—E. A. Nadirshah, O.B.E., J.P., M.Inst. C.E., B.A., B.E., B.SC.

Members.—S. Guevrek, Habib Chinoy, A. D. Wenzel, G. G. Stack, E. A. Oakley, J. Littlejohn, Dr. F. P. Antia, B. V. Vagh, J. C. Taylor, M. N. Dalal, W. A. Griffiths, E. P. Nicolaides, C. H. Hilgers, C. A. Ayling, W. W. Russell, R. C. Hughes and N. J. Stork.

THE NATIONAL ACADEMY OF SCIENCES, ALLAHABAD.

Address : University Science Buildings, Allahabad.

The National Academy of Sciences, India, Allahabad, was founded on the 4th of December, 1930, by Professor M. N. Saha, D.SC., F.R.S., F.N.I., as the Founder with eighteen other prominent Scientists as Founder Fellows. It was registered under the Registration Act, XXI of 1860, on the 4th of December 1930.

The affairs of the Academy are managed by a Council which consists of the President, the two Vice-Presidents, the Honorary Treasurer, the two General Secretaries, the Foreign Secretary and nine other members.

Annual subscription for Ordinary Member is Rs. 25. Fellows, whose number is not to exceed 150, are elected from among persons of distinction in scientific work. Fellows are regarded as Ordinary Members in matters of payment of subscriptions and exercise of privileges.

Office-Bearers for 1952.—*President*, Professor P. K. Parija, O.B.E., D.SC., I.E.S. (Retd.), F.N.I., F.N.A.SC.

Vice-Presidents, Professor D. R. Bhattacharya, Ph.D., D.SC., F.Z.S., F.N.I., F.N.A.SC.; Professor H. J. Bhabha, Ph.D., D.SC. (Hon.), F.R.S., F.N.I., F.N.A.SC.

Honorary Treasurer, Professor N. R. Dhar, D.Sc. (London & Paris), F.R.I.C., I.E.S. (Retd.), F.N.I., F.N.A.Sc.

Foreign Secretary, Professor H. R. Mehra, M.Sc., Ph.D. (Cantab.), F.N.I., F.N.A.Sc.

General Secretaries, Dr. Ram Kumar Saksena, D.Sc. (Paris), F.N.A.Sc.; Professor R. C. Majumdar, Dr. Phil. Nat. (Jena), F.N.I., F.N.A.Sc.

INDIAN SCIENCE CONGRESS ASSOCIATION

Office: 1 Park Street, Calcutta 16.

Membership of the Association is open to all interested in the activities of the Congress. The Association has an average total membership (Ordinary Members) of 1,500. The annual subscription is Rs. 12. There are also Sessional Members, and Associate and Student Members who are enrolled at concession rates. The members receive free of cost the proceedings of the annual sessions, which are issued in four parts. No educational qualification is generally insisted upon at the time of enrolment.

President:—Dr. D. M. Bose, Ph.D., F.N.I.
Past President:—Dr. J. N. Mukherjee, D.Sc.

General Secretaries:—Dr. S. R. Sen Gupta, B.Sc., Ph.D., M.Am.Soc.C.E., M.Am.Soc.M.E., M.I.Ae.Sc., M.I.E.; Dr. B. N. Prasad, D.Sc. (Paris), Ph.D. (Liverpool), M.Sc., F.N.I.

INSTITUTION OF ENGINEERS (INDIA)

Headquarters:—8, Gokhale Road, Calcutta 20.

The Institution is administered by a Council consisting of about 50 Corporate Members representing all branches of engineering. It has twelve Local Centres with their own administrative committees, and the total membership is about 7,800. It publishes a quarterly technical Journal Bulletin.

The Council of this Institution act as the Indian National Committee of the World Power Conference. *President*:—M. S. Thirumala Iyengar. *General Secretary*:—P. P. Adalja. *Asstt. Secretary (Tech.)*:—B. Seshadri.

NATIONAL HORSE BREEDING AND SHOW SOCIETY OF INDIA

President:—H. H. The Maharaja of Idar; *Vice-President*:—F. D. Wadia; *Secretary*:—B. W. Rahalkar. *Hony. Legal Adviser*:—Tricumdas Dwarkadas.

Registered Office:—New Delhi. At present the office has been shifted from New Delhi and is situated at 6, Burnett Road, Poona (India).

NATIONAL INSTITUTE OF SCIENCES OF INDIA

Office:—Mathura Road, New Delhi.

Objects:—Founded in 1935 for the promotion of natural knowledge in the country including its practical application to problems of national welfare. Recognised by Government as the premier scientific organisation in India. Has three co-operating Academies, *viz.*, Asiatic Society (Calcutta), Indian Academy of Sciences (Bangalore) and National Academy of Sciences, India (Allahabad). Annual Subscription Rs. 36.

President:—Dr. S. L. Hora, Director, Zoological Survey of India.

Treasurer:—Dr. B. P. Pal, Director, Indian Agricultural Research Institute.

Foreign Secretary:—Prof. P. C. Mahalanobis, Honorary Statistical Adviser, Cabinet Secretariat, Government of India.

Secretaries:—Dr. H. S. Pruthi, Plant Protection Adviser, Ministry of Agriculture; Prof. R. C. Majumdar, Dean, Faculty of Science, Delhi University.

SOCIAL, RELIGIOUS AND POLITICAL

THE ALL INDIA CRIME PREVENTION SOCIETY

Office:—U.P. Discharged Prisoners' Aid Society, Hazratganj, Lucknow.

The Society was formed to co-ordinate methods of crime prevention in all the States in India and to introduce latest scientific and psychological methods for crime prevention in the country.

The Central Government has issued a circular to all the States requesting them to help the Society and keep it posted about their crime prevention measures. Three States, *viz.*, U.P., Madhya Pradesh and Bihar have become contributory members of the Society paying Rs. 2,000 each. Others are expected to follow. Public subscription and State donation are the main sources of income of this Society.

President:—Paripurnand Varma.

ALL-INDIA GIRL GUIDES ASSOCIATION

Office-Bearers:—*President*, Dr. Amaranatha Jha, Ex-Vice-Chancellor, Allahabad and Banaras Universities.

Vice-Presidents, Dr. Zakir Hussain, Vice-Chancellor, Aligarh University, Aligarh. J. L. P. Roche-Victoria, K. G. Saiyidain, Educational Adviser to the Government of Bombay, Bombay, Ranjit M. Chetsingh, Principal, Baring Union Christian College, Batala, Punjab (I), A. N. Basu, Principal, Central Institute of Education, Delhi, Uma Charan Patnaik, T. Madhe Gowda, Chairman, Mysore State Adult Education Council, Mysore.

Hony. General Secretary: Dr. S. R. Ranganathan.

Treasurer and Org. Secy.: V. S. Mathur.

INDIAN CHRISTIAN ASSOCIATION Tiruchirapalli District.

President: Dr. E. P. Mathuram; *Vice-Presidents:* Rao Sahib D. Yesudian, B.A., Theodore Samuel, M.A., L.T.; *Treasurer:* Capt. J. R. Davies, I.A.P.S.; *Publicity Officer:* M. P. H. Albert, M.A., L.T.; *Secretary:* R. J. Johnson, D.A., L.T., Dip. in Geo.; *Joint Secretary:* J. G. Clement, B.A., L.T. *Office:* 23, Pottukara Street, Palakarai, Tiruchirapalli, South India.

INDIAN COUNCIL OF WORLD AFFAIRS

President: Hriday Nath Kunzru.

Vice-Presidents: N. Gopalaswamy Ayyangar; Acharya Narendra Deo; Sri Ram; Dr. Zakir Hussain.

Treasurer: Yodh Raj.

INDIA SUNDAY SCHOOL UNION

The India Sunday School Union, founded in Allahabad in 1876, is an interdenominational and ecumenical organisation having for its object the strengthening of religious and moral education in the Christian schools throughout India and Pakistan. It has 4 secretaries. Its General Council is composed of representatives from the National and State Christian Councils, regional and denominational unions of Sunday schools which are Auxiliaries of the I.S.S.U. and from Churches and Missions and Christian Youth Organizations in the country.

The headquarters of the Union are at Coonoor on the Nilgiri Hills, where, besides the office and well-stocked bookshop, there is the St. Andrew Teachers Training Institution. In this institution Summer Schools are held where a short but intensive course of study and training is offered to leaders of christian education from all parts of India.

The officers of the Union are as follows:—

President: Bishop S. K. Mondol.

Treasurer: W. H. Warren, Madras.

General Secretary: V. M. Koshy, Coonoor.

The latest statistics show that there are in India and Pakistan 22,304 Sunday Schools with 42,886 teachers, and 881,568 scholars.

INDIAN RED CROSS SOCIETY

Headquarters : **20, Talkatora Road, New Delhi.**

President : Dr. Rajendra Prasad, President of the Republic of India.

Chairman, Managing Body : The Hon'ble Rajkumari Amrit Kaur.

Vice-Chairman : Sir Usha Nath Sen, C.B.E.

General Secretary : Sardar Bahadur Balwant Singh Puri, C.I.E., O.B.E.

Constitution.—The President of the Republic of India is the President of the Society. The Managing Body ordinarily consists of a Chairman nominated by the President and 25 members of the Society, of whom 12 are the Vice-Presidents nominated by State Branches, 8 selected by the Society at the Annual General Meeting from among the members of the Society, and 5 nominated by the President.

Junior Red Cross.—Junior Red Cross is an integral part of the Indian Red Cross Society and is its youth section. It was started in 1920 and celebrated its Silver Jubilee in 1951. The movement aims at inculcating Red Cross ideals in the younger generation and has an internationally recognised programme for the promotion of health, service to others, specially children, and development of international friendliness among the juvenile population of the world. The movement is confined to schools and the membership, which has been steadily growing, stood at 890,511 divided into 15,115 groups at the end of 1950.

Nursing Service.—The number of trained nurses registered on the Red Cross roll maintained for civil emergency service is 43. These nurses live in different parts of the country and in order to ensure immediate availability in times of need, the headquarters maintains an accurate and up-to-date record of their addresses.

Medical After-Care of Ex-Servicemen.—With a view to granting relief for medical treatment and cognate purposes to the sick Indian ex-Service personnel, who participated in the Second World War, the Indian Forces Medical After-Care Fund was instituted at the headquarters towards the end of 1941. The scope of the Fund was extended in 1949 so as to include the ex-Servicemen of World War I. Assistance from the Fund is invoked by an increasing number of deserving cases. The total number of applications dealt with till the end of 1950 was 2,507. During 1951, 532 fresh applications were received from the ex-Servicemen suffering from tuberculosis, leprosy, mental and other diseases, and a sum of Rs. 1,57,651 was given in grants to the new as well as the old cases raising the total of disbursements from the fund during the last 10 years to Rs. 8,41,743.

Bureau of Maternity and Child Welfare.—The development of child health services is another important peace-time activity. The various branches of the Indian Red Cross Society have initiated and maintained Maternity and Child Welfare schemes in the States.

Health Education.—Popular health education is carried on steadily by the Society by varied methods. Health lectures in several Indian languages illustrated by films and slides are regularly organised under Red Cross auspices. Two Quarterly Journals are published from the headquarters of the Society, namely, the *Indian Red Cross Journal* and the *Indian Junior*.

Hospitals.—The Society provides various amenities and comforts including games, writing materials, toilet requisites, musical instruments, gramophones, sweets and work party articles ; newspapers, periodicals and books and diversional therapy stores and welfare service to patients in all military hospitals.

Finances.—The investments of the Society at the end of 1951 stood at Rs. 2,16,27,900 and the floating and fixed deposits at Rs. 1,81,117. From the total income of Rs. 7,02,020 derived from investments of the Society, a sum of Rs. 1,98,000 is distributed under the Act to the State Branches in the Republic of India and those in Pakistan in proportion to their contributions to the Central "Our Day" Fund raised in the First World War.

INDIA VILLAGE SERVICE

Address :—Kasganj, U.P.

The aim of the service is to enable the village people to realize their needs by living and working among them. The programme of work includes health, sanitation, agriculture, handwork, child care, literacy, citizenship, etc.

The service has at present a staff of eight both men and women, and is located in three different areas : Marekra (Dist. Etah), Fatepur (Dist. Lucknow), Gazipur (Dist. Allahabad). Enquiries, however, should be sent to Marekra. Funds are largely raised from private sources both in India and abroad.

Director, Dr. William H. Wiser.

ISMAILIA ASSOCIATION

Office : Recreation Chambers, Imamwada Road, Bombay 9.

This Institution—a philanthropic and humanitarian body—was established by the members of the Ismaili Dharmic Library in 1911 under the name of the Recreation Club with the object of uplifting and elevating the poor, without distinction of caste or creed. It also tries to improve the social, economic and spiritual condition of the poor classes of people and with this intent has founded primary schools, associations and such other departments in order to ameliorate their condition and to achieve these objects by constructive and constitutional means. It publishes *Ismaili* (Weekly) and *Aina* (Monthly) both Anglo-Gujarati. *Board of Executives.—President :* Gulamhusein S. Thaverbhoy, M.P. ; *Chief Secretary :* Abdulhusein C. Rahimtoola ; *Hon. Press Secretary :* Valimohomed N. Hooda ; *Hon. Education Secretary and Hon. Treasurer :* Mahomedali G. Fazulbhoy.

KASTURBA GANDHI NATIONAL MEMORIAL TRUST

Address :—P. O. Kasturbagram, Dist. Indore (Madhya Bharat).

Aims and Objects :—Welfare of women and children in rural areas of India. The Trust trains women workers for educational, vocational and health programmes and after training deputes them to rural areas.

A sum of Rs. 1,28,00,000 was collected in 1944 and the beginning of 1945 towards the Kasturba Memorial Fund. At present the Trust Fund amounts to Rs. 1,10,00,000, which has been invested mostly in Government Securities. The sources of income are :—Corpus of the original Trust Fund ; Interest on Government Securities and Fixed Deposits ; Subscriptions collected in States towards a part of the expenses of the village centres.

The Trust at present runs about 250 centres in pre-basic, basic, adult education and craft centres, maternity homes, leprosy relief centres, etc.

Besides running 15 training schools, the Central Training Institute is located at the Kasturbagram, five miles from Indore, where the Madhya Bharat Government has made available to the Trust about 500 acres of land.

Chairman : Hon'ble Shri G. V. Mavalankar.

Vice-President : Lady Premlila Thackersey.

Secretary : Susheela Pai.

THE NATIONAL ASSOCIATION FOR THE BLIND

Office :—C/o The Victoria Memorial School for the Blind, Tardeo, Bombay 7.

Aims and Objects :—To work in the whole of India for the blind and the welfare of the Blind, to bring co-operation among the various organizations of the Blind, to co-ordinate their activities, to organise and start new organisations and institutions for various activities for the welfare of the blind and to do all such other things as may be necessary for the promotion of the interest of the Blind.

Funds are derived from donations from the public organising entertainments, etc.

Office-Bearers :—President, R. M. Alpaiwalla, Bar-at-Law ; *Vice-Presidents,* Col. Sir Jamshedji N. Dugzan, K.B.E., C.I.E., D.O. (Oxon.), Sir Rustom P. Masani, Principal Amal Shah ; *Secretaries,* Capt. H. J. M. Desai, V. B. Parulkar, K. N. Jussawala, Lt. G. L. Nardekar, P. N. S. Razdan ; *Treasurers,* B. R. B. Vakil, R. S. Pochkanawalla.

PASSENGERS AND TRAFFIC RELIEF ASSOCIATION

(Established in 1915).

Head Office : **Albert Building, Hornby Road, Fort, Bombay 1.**

President : Jasvantray G. Mehta ; *Vice-President :* A. B. Pandya ; *Hony. Secretaries :* G. D. Modi and N. J. Katgara ; *Treasurer :* C. R. Shroff.

POONA SEVA SADAN SOCIETY

Office : 789-790, Sadashiv Peth, Poona City.

This Institution was started in 1909 by the late Mrs. Ramabai Ranade, the late Mr. G. K. Devadhar and a few other ladies and gentlemen in Poona, and registered in 1917. Its main object is to make women self-reliant and to train them for missionary work, including educational and medical work, on a non-sectarian basis, amongst their sisters and brethren in backward areas, especially among women. Nominal fees are charged for instruction in all classes. There are eight different departments subdivided into about 110 classes. The total number of women and girls on the rolls at the various Centres of the Society is about 3,125. There is in Poona a common hostel for women with 125 inmates including inmates from Backward Classes. Two fully qualified nurses were so far sent by the Society for Post-graduate Course in Public Health Nursing at the Bedford College for Women, London, with the partial help of a scholarship from the League of Red Cross Societies, Paris. The Society manages Maternity Hospitals, Nursing Homes and Infant Welfare Centres at Alibag, Baramati, Ahmednagar and Sholapur in co-operation with other organisations. The Institution is largely dependent upon public contributions and Government aids. The annual expenditure of the whole organisation now exceeds Rs. 3,00,000.

President : Shrimant Sow. Laxmidevi Naik Nimbalkar, Rani Saheb of Phaltan ; *General Secy. & Lady Supdt. :* Miss Kashibai Athavale, B.Sc. ; *Jt. General Secy. :* N. S. Pathak, M.A., S.T.C. ; *Hon. Medical Adviser :* Dr. N. L. Ranade, B.A., M.B.B.S. ; *Asst. Secy., Treasurer and Member in Charge of Propaganda Work and Collection of Funds :* C. G. Kulkarni, B.A., B.T.

SAFETY FIRST ASSOCIATION OF INDIA

(Incorporated in 1932).

Registered Office : Dinshaw Vacha Road, Churchgate Reclamation, Bombay.

The Association is registered under Section 26 of the Indian Companies Act. The liability of its members is limited by guarantee to a contribution of Rs. 5.

The aims include the promotion of safety teaching and safety measures for the prevention of accidents on roads, in factories, mines, workshops, schools and homes and the encouragement of co-operation between different sections of road-users and between employers and employed.

Sustained educational safety propaganda is conducted through the Press, Platform, the Radio, the Association's monthly magazine *Efficiency News* as well as through publications such as Games Lessons, Indian Highway Codes, leaflets and posters, exhibitions and film shows.

President.—Sir Rahimtoola Chinoy, Kt.

Hon. General Secretary.—P. J. D'Souza.

Chairman, Bombay Provincial Branch.—A. A. Jasdenvala.

Hon. Secretary.—D. S. Venkatraman.

SERVANTS OF INDIA SOCIETY, POONA 4

The Servants of India Society, founded by the late G. K. Gokhale in 1905, is a body of men who are pledged to devote their life to the service of the country on such allowances as the Society may be able to give. Its objects are to train national missionaries for the service of India and to promote, by all constitutional means, the interests of the Indian people. Its present strength is 23 members. The Society has its headquarters in Poona with branches at Madras, Bombay, Allahabad and Nagpur, and other centres of work at Mangalore and Calicut in the Madras State ; Shendurjana in Madhya Pradesh ; Lucknow and Kotdwara in U.P. ; Ambala in the Punjab (India), Cuttack and Raigada in Orissa.

The Society's work is primarily political but as it believes in all-round progress of the Indian people, it has always laid equal emphasis on social, economic, educational, labour and depressed class activities and has worked in these fields. The political work is done through the legislatures, the non-official political organizations deputations to foreign countries and propaganda.

In the field of social, economic and educational work, the Society's activities are equally varied. Some of its members are practically the founders of such institutions as the Poona Seva Sadan, Bombay and Madras Social Service Leagues, the U.P. Seva Samiti, and the Bhil Seva Mandal catering for the needs and uplift of the aboriginal tribes in Gujarat. The Society is also doing tribal welfare work in the Mirzapur Dist. (U.P.), Orissa and in Malabar on a considerable scale. The Society has been conducting a Depressed Class Mission in Mangalore and the Devadhar Malabar Reconstruction Trust activities in Malabar District. By its work in the Mopla rebellion, the Society has become a household name in Malabar. During natural calamities such as floods, famine and epidemics, the Society has done relief work in every part of India. During recent years several members of the Society have paid special attention to rural reconstruction, including rural education.

The Society is a non-communal, non-sectarian body which does not recognise any caste distinctions.

The Society conducts the *Hitawad*, an English daily issued from Nagpur. It has also published several pamphlets on public questions.

Dr. H. N. Kunzru is the President, and D. V. Ambekar, the Secretary.

SEVA SADAN

The Seva Sadan Society was started on the 11th of July 1908, by the late B. M. Malabari and Dayaram Gidumal. It is the pioneer Indian ladies' society for training Indian sisters and serving the poor, the sick and the distressed. To spread its gospel far and wide, the first branch was opened at Poona as early as 1909. The Society has its headquarters in Gamdevi, Bombay, and maintains the following departments of work : (1) Home for the Homeless ; (2) *Ashramas* (Training Homes) ; (3) a Marathi Training College, with a Primary School ; (4) Home Education Classes ; (5) Industrial Department including a workroom ; sewing, cutting, hosiery, cooking and pastry, and machine and hand embroidery are among the chief industries taught. The total number of women in the different classes is over 700.

Hon. Secretary : Miss B. A. Engineer, M.A., LL.B., M.B.E., J.P.

SOCIETY FOR PROTECTION OF CHILDREN IN INDIA

Address :—2B, Camac Street, Calcutta.

The S.P.C.I. is the oldest child protective Society in India. It seeks to rescue and protect children who are exposed to any kind of danger, *e.g.*, cruelty, moral danger, exploitation, vagrancy, delinquency and the like. The protection of the Society is open to all children in India, irrespective of caste or creed or nationality.

The Society is supported by public subscriptions and donations, proceeds of charity entertainments, grants-in-aid from Government, etc. Its expenditure on the maintenance and education of children in its custody is over Rs. 11,000 a month.

President : The Hon'ble Mr. Justice Jyoti P. Mitter.

Vice-Presidents : The Maharajadhiraja Bahadur of Burdwan ; The Most Rev. Dr. J. Fernandes, Archbishop of Delhi and Simla ; Dr. K. C. Chaudhuri ; Mrs. N. F. Barwell.

Hon. Treasurer : B. A. Watt.

SOCIETY FOR THE PROTECTION OF CHILDREN IN WESTERN INDIA

Office and Homes at King's Circle, Shraddhanand Road, Matunga, Bombay 19.

The Objects of the Society are : To rescue children of all castes and creeds from the streets of Bombay, to prevent begging or other improper use of poor children by adults to pass such children on to existing charitable institutions and to provide for those otherwise unprovided for, with the support and assistance of the police, to prevent children so far as possible from appearing in Police Courts, to prevent the public and private wrongs of children and the corruption of their morals, to take action for the enforcement of the laws for the children and if necessary to suggest new laws or amendments to the existing laws, to promote education, to provide and maintain an organization for those objects, to do all other lawful things, incidental or conducive to the attainments of the foregoing objects.

Several experiments are being carried out successfully in self-expression and self-government by children of the B. J. Home. Subscription for Annual Membership, Rs. 10 ; for Life Membership, Rs. 100.

THEOSOPHICAL SOCIETY

International Headquarters: Adyar, Madras. Founded at New York, 1875, transferred to Madras, 1882 and Incorporated, 1905.

Objects : To form a nucleus of the Universal Brotherhood of humanity, without distinction of race, creed, sex, caste or colour ; to encourage the study of comparative religion, philosophy, and science ; to investigate unexplained laws of nature and the powers latent in man.

Founders : Colonel H. S. Olcott and Madam H. P. Blavatsky ; *Past Presidents :* Col. H. S. Olcott, 1875 to 1907, Dr. Annie Besant, 1907 to 1933 and Dr. G. S. Arundale, 1933-1945 ; *Present President :* C. Jinarajadasa, M.A. (Cantab.) ; *Vice-President :* Sidney A. Cook ; *Recording Secretary :* Miss Helen V. Zahara, A.T.I.A. (Aust.) ; *Treasurer :* C. D. T. Shores.

There are National Societies, or Lodges (branches) in 47 Countries. Each Section organizes its own activities. The Indian Section consists of 400 Lodges with headquarters at Banaras City, U.P. *General Secretary :* Rohit Mehta.

The Society has its own printing house (Vasanta Press) and the Theosophical Publishing House where books and journals are produced and dispatched to many countries.

The Adyar Library containing about 60,000 books and 15,000 MSS and transcripts is one of the finest Oriental Libraries in the world. Subsidiary activity : Dr. V. Swaminatha Iyer Tamil Library owned by Kalakshetra containing 1,831 Tamil MSS is the largest Tamil Manuscript Library in the world.

The Headquarters estate comprises nearly 300 acres, extending east along the Adyar river from the Adyar Bridge to the sea, with many picturesque buildings in beautiful gardens including temples of the great religions. The banyan tree is one of the finest in India.

Secretary :—S. Sangle.

Branch :—Nasik.

WESTERN INDIA NATIONAL LIBERAL ASSOCIATION—(*Founded in 1919*)

***Office :*—107, Esplanade Road, Fort, Bombay.**

The object of the Association is to foster a spirit of broadminded liberalism based on principles of liberty, equality and fraternity among the different classes and communities of the people. For the fulfilment of these objects the Association carries on educative and propagandist work by means of leaflets, pamphlets and other publications, (*a*) representations to Government, (*b*) meetings or conferences, lectures and all such methods as may be deemed practicable and expedient to educate public opinion, and (*c*) for advancing the interests of the Liberal Party by organising and influencing elections to the legislatures, Central and State, to Municipalities and District Local Boards.

WOMEN'S INDIAN ASSOCIATION "MERU", TEYNAMPET, MADRAS

This Association was started in Madras in July 1917, with the aim of service.

***Aims and Objects :*—To present to women their responsibilities as daughters of India. To secure for every girl and boy the right of education through schemes of compulsory primary education, including the teaching of religion. To secure the abolition of child-marriage and other social evils.**

The Madras Seva Sadan, the Madras Children's Aid Society, The Avvai Home for Orphan Children and the Montessori School owe their origin to the efforts of this Association. The Association opened a Rescue Home to facilitate the working of the Rescue Section of the Immoral Traffic Act, enforced by Government. The Home was opened on 21st March 1934 by Lady Beatrice Stanley and is now under the Madras Vigilance Association.

It has four branches in the city, where cultural, recreational and educational activities for women are provided.

YOUNG MEN'S CHRISTIAN ASSOCIATION

This Association, which was founded by Sir George Williams in 1844, is now a world-wide movement, well established in almost every country in both the hemispheres. The aim of the Association is, through its religious, social, educational, and physical work to answer the fourfold—spiritual, social, mental and physical—needs of young men and boys.

The Young Men's Christian Association in India, started in Calcutta in 1857, is spreading rapidly. The 'local' Associations are autonomous and governed by local Boards of Directors. These Associations in Convention elect a General Board which is responsible for the supervision and expansion of all forms of the Association work in India, Pakistan and Ceylon.

There are now 80 Associations in large towns and cities and 82 village Associations with over 25,000 members of all races and creeds.

The work of the Council (excluding that of the 80 local Y.M.C.A.'s) called for a Budget of Rs. 1,26,766 in 1951. Of this sum Rs. 35,000 had to be raised from the public in India.

The Headquarters of the Council of Y.M.C.A. is 5, Russell Street, Calcutta. The officers are :—

President of the Council :—Raja Maharaj Singh, Bar-at-Law.

General Secretary :—T. D. Santwan, 5 Russell Street, Calcutta 16.

Y.M.C.A. (BOMBAY)

In Bombay there are five hostels for working men, apprentices and students.

General Secretary :—John Antony.

Central Branch :—(12, Wodehouse Road). Hostel for 80 persons. *Secretary* :—A. I. Thomas.

Student :—(412, Lamington Road). Hostel for 55 students. *Secretary* :—C. P. Pothen.

Byculla and Annexe : (16, Reynolds Road and Gell Street). Hostel for 100 working people and students. *Secretary* : S. P. Kelkar; *Warden* :—K. M. George.

Proctor :—(19, Rebsch Street). Hostel for 60 students

Secretary :—Wolter A. Keers.

YOUNG WOMEN'S CHRISTIAN ASSOCIATION OF INDIA

This Association founded in the year 1875 was organised nationally in 1896.

The aim of the Association is to unite women and girls of India, in fellowship and mutual service for their spiritual, intellectual, social and physical development. The Association exists for women and girls of all communities. The Y.W.C.A. of India, Burma, Pakistan and Ceylon in May 1951 at its Quadrennial Conference in Bombay allowed Burma, Ceylon and Pakistan to disaffiliate themselves, so that they may become independent National units directly affiliated to the World's Y.W.C.A.

The Y.W.C.A. of India now has 63 places in the country where the Y.W.C.A. work of some kind or other is being done. The needs of women and girls are met by recreation clubs and classes, lectures, commercial classes, dramatics, health courses, Bible study and devotional meetings, and functions for social intercourse. There are 28 hostels in 18 centres, some of them having over 175 girls. There are also six holiday and rest homes in the hill stations. These hostels accommodate working girls, teachers, nurses, students and apprentices. In addition to holiday homes, Summer conferences are held annually in Ootacamund in South India and at Mussoorie. Special Girls' Camps are arranged from time to time in many centres.

The official organ of the Association is the leaflet *Everymember* which is issued each month and sent to members and friends of the Association.

President, Headquarters Committee :—Mrs. E. Ahmad Shah. *Vice-Presidents* : Mrs. John Matthai, Raj Kumari Amrit Kaur, Rani Maharaj Singh and Mrs. A. N. Shukla.

General Secretary : Miss Olga I. Lawrence.

Office : 37, Cantonment Road, Lucknow, U.P.

COMMERCIAL AND INDUSTRIAL

ALL-INDIA VILLAGE INDUSTRIES ASSOCIATION

Address : Maganvadi, Wardha (Madhya Pradesh).

The object of the Association is the relief and service of the poor in the villages by all means including village reorganisation and reconstruction, the revival, encouragement and improvement of village industries and the moral and physical advancement of the villagers of India, and to undertake all other activities of a public nature calculated to achieve the above object.

Trustees :—Dr. Gopichand B. Bhargava (Simla); Dr. Khan Sahib (Frontier); J. C. Kumarappa (Wardha); Vaikunth L. Mehta (Bombay).

Board of Management :—J. C. Kumarappa (*President*, Maganvadi, Wardha); G. Ramachandran (*Secretary*, Maganvadi, Wardha); Smt. Goshiben Captain (Andheri, Bombay); Dhiren Majumdar (Gandhi Ashram, Raniwan, P.O. Goshalganj, Fyzabad); G. Sitaram Sastry (Vinayashram, Guntur, S. India); R. R. Keithahn (Gandhigram, P.O. Chinnalapatti, Madura); A. W. Sahasrabudhe (Congress House, Poona 5).

Two years ago the Association merged into the Akhil Bharat Sarva Seva Sangh becoming its Gram Udyog Vibhag.

BLANKET AND SHAWL TRADERS' ASSOCIATION

To protect the legitimate interests and rights of merchants dealing in piece goods, particularly blankets and shawls in cooperation with Government.

President : B. N. Bhiwaniwalla.

Address : 30, Cotton Street, Calcutta 7.

BOMBAY PIECE-GOODS MERCHANTS' ASSOCIATION

Office :—Mulji Jetha Cloth Market Hall, Shaik Memon Street, Bombay 2.

The objects of the Association are :—

(*a*) To promote, by creating friendly feelings and unity amongst the merchants, the business of the piece-goods trade in general at Bombay, and to protect the interests thereof; (*b*) to remove, as far as it will be within the powers of the Association to do so, all trade difficulties of the piece-goods business and to frame such line of conduct as will facilitate the trade; (*c*) to collect and assort statistics relating to piece-goods and to correspond with public bodies on matters affecting the trade, and which may be deemed advisable for the protection and advancement of the objects of the Association or any of them; and (*d*) to hear and decide disputes that may be referred to the Association for arbitration.

The following are the office-bearers for the current year :—

Chairman :—

Purshottam Mulji Kapadia, Advocate.

Deputy Chairman :—

Narottamdas Keshavlal.

Hon. Jt. Secretaries :—

Padamsey Damodar Govindji.

Himatlal Trimbaklal Mual.

Navnitlal Lallubhai Shah.

Hon. Treasurer :—

Jethabhai Kallanji

DEPARTMENT OF COMMERCIAL INTELLIGENCE AND STATISTICS

1, COUNCIL HOUSE STREET, CALCUTTA

The Department of Commercial Intelligence and Statistics has its office at No. 1, Council House Street, Calcutta, and is administered by the Director-General of Commercial Intelligence and Statistics assisted by a Deputy Director and two Assistant Directors. Some of its main functions are :

(*a*) Collection and dissemination of commercial information relating to openings for Indian goods in foreign countries, the Customs Tariffs, the import, export and exchange control regulations, etc. with a view to helping the trade; interests, particularly the export trade of India; revision and publication of the Indian Customs Tariff; revision of the tariff values of articles in the Indian Customs Tariff; revision of the list of imported cotton piecegoods; enquiry into and settlement of trade disputes between Indian and foreign firms and sponsoring of visits of businessmen from India to Japan.

(*b*) Compilation and publication of All-India statistics relating to foreign sea and air-borne trade and coasting trade and rail and river-borne trade of India; Customs and Excise Revenue of India and Joint Stock Companies.

The Department also publishes a weekly journal, the *Indian Trade Journal*.

The Department also administers the COMMERCIAL LIBRARY AND READING ROOM located at No. 1, Council House Street, Calcutta, containing about 24,000 volumes on different subjects of commercial, economic and industrial interest as well as Indian and foreign statistical publications, and about 400 technical and commercial journals and market reports.

EAST INDIA COTTON ASSOCIATION LIMITED

The Association is the outcome of the findings of the Indian Cotton Committee which was appointed by the Governor-General in Council under a resolution dated September 27th, 1917. The necessity of a system of periodical settlements, such as existed in Liverpool, was badly felt, especially when speculation was rife in figures which was so excessive in 1918 that the Trade had to invoke the aid of Government to prevent a financial crisis.

The Association has a fine Building, at Sewri Cotton Depot, containing 121 Buyers' Rooms and 84 Sellers' Rooms, a large Trading Hall on the lines of Liverpool and New York Exchanges, Survey Rooms, Appeal Rooms, etc.

The Association has another fine Building, "The Cotton Exchange" at the corner of Sheikh Memon Street and Kalbadevi Road, whereln trading in forward contracts is conducted.

The Association has a membership of 832.

The Bombay Cotton Annual containing matters relating to every branch of the trade is published annually in December and statistics are issued twice weekly.

The constitution of the Board of Directors for the year 1951-52 was as under :—

Sir Purshotamdas Thakurdas, K.B.E., C.I.E. (*Chairman*); Chimanlal Bapalal Parikh, J.P. (*Vice-Chairman*); Ramdas Kilachand, Hansraj Jivandas, J.P., Fatehchand Jhunjhunwala, Madanmohan Ramnarain Ruia, B.A., Chunilal Krishnalal Sayta, Venilal Narottamdas Patwa, J.P., Gatulal Rangildas, Tricumdas Chhabildas, Rameshwardas Shankermal, Chandulal Kasturchand Shah, Motilal Bubna, Radhakrishna B. Makharia, Shivji Ramji Thakkar, P. S. Patil, M.L.A., S. R. Rane, M.A., LL.B., D. N. Mahta, O.B.E., J.P., Y. R. Joshi, Raje J. R. Deshmukh, B.Sc. (Agri.), S. S. Salimath.

Officers.—C. M. Parikh, B.com., J.P., *Secretary*; S. A. P. Aiyar, *Assistant Secretary*; M. L. Merchant, *Asstt. Manager, Clearing House*.

Address :—Cotton Exchange, Marwari Bazar, Bombay 2.

Telephone :—Bombay No. 26176.

Telegraphic Address :—"Cotboard."

INDIAN CENTRAL COTTON COMMITTEE

The Office.—The Indian Mercantile Chambers, 14, Nicol Road, Ballard Estate, Bombay. *Secretary*.—Kalidas Sawhney, M.Sc., F.N.I., F.A.S. *Deputy Secretary*.—P. D. Gadkari, M.Sc.. *Asstt. Secretary*.—C. J. Bocarro, M.A. *Director, Technological Laboratory*.—Dr. C. Nanjundayya, M.Sc., Ph.D. (Manchester), F.T.I.

President.—Sardar Datar Singh, Vice-President, Indian Council of Agricultural Research.

Vice-President.—R. G. Saraiya, J.P.

The activities of the Committee now extend to all branches of cotton improvement in India, and, as an authoritative body to advise the Central and State Governments on important matters of cotton policy, it has attained an outstanding position.

THE INDIAN JUTE MILLS ASSOCIATION

Office.—Royal Exchange, Post Box No. 280, Calcutta.

Now one of the most important, of the bodies affiliated to the Bengal Chamber of Commerce, was started in 1886.

Working Agreements have since formed the most important link between this Association of members, which today represent 97 per cent of the trade in India, the term of each agreement now being for a 5 year period. In 1937 the need for a Research Department to deal with all the technical problems arising out of quality production and the demand for speciality fabrics resulted in the Association opening a laboratory which now has developed into an Institute of notable dimensions with a qualified staff of scientists, and is known as the Indian Jute Mills Association Research Institute, with offices at No. 3, Taratola Road, Calcutta 27.

THE INDIAN NEWSPAPERS CO-OPERATIVE SOCIETY LIMITED

Office :—Jan̄abhoomi Bhavan, Ghogha Street, Fort, Bombay.

The Indian Newspapers Co-operative Society Ltd. is the only Co-operative Society of its kind in India, having 225 Newspaper members, the majority of whom being small newspapers, was started early in 1947 with an authorised capital of Rs. 2,00,000 made up of 2,000 shares of Rs. 100 each.

The main business of the Society is to import newsprint and to supply it to its members. In the last financial year the Society sold newsprint worth Rs. 2,18,809. In days of dearth of newsprint, the Society proved a veritable boon to the small newspapers of the country.

Board of Directors of the Society :—Shantilal H. Shah, *President and Chairman*; Indravadan Thakor; Haribhau M. Joshi; D. S. Potnis; Bindu Madhav Pandit; U. H. Khan Saheb; V. P. Bhagvat; Uttamsingh; Pratapkumar Vaidya; Ratilal M. Sheth (*Hon. Secretary*).

MARWARI ASSOCIATION

160A, Chittaranjan Avenue, Calcutta.

The Association was established in the year 1898.

Its chief objects are :—To promote and advance the moral, intellectual, commercial, economic, political and social interests of the Marwari community and to protect its rights and status.

A. C. M. Cursetjee, M.A., LL.B., *Secretary*.

PRESS ASSOCIATION, NEW DELHI/SIMLA

Address : 2, Keeling Lane, New Delhi.

Established in 1938 to secure and safeguard the rights and the privileges of the press in the discharge of their duties in relation to the Central Government and the Central Legislature and to promote whatever may tend to the elevation of the status of the journalistic profession and the maintenance of the independence of the Press.

BOMBAY PRESS-OWNERS' ASSOCIATION

Office :—196-B, Gaiwadi, Girgaum, Bombay 4.

Started on 30th April 1919 to promote the interests of the printing and litho presses and allied trades, to bring about harmony and co-operation among press-owners, proprietors and press workers and to take such steps as may be necessary in furtherance of the above objects.

Secretary :—Manilal C. Modi.

YARN MERCHANTS' ASSOCIATION, LTD.

Registered Office—111, Chawala Building, Tambakanta, Bombay 3.

The Association previously known as the Bombay Yarn and Silk Merchants' Association was formed in 1935 and was subsequently registered under the Indian Companies Act on the 4th June 1944 and styled as the Yarn Merchants' Association, Ltd.

The Association has members all over the country. At present there are 476 members and 509 registered brokers.

The Association was appointed in 1945 as the nominee of the Government of Bombay for the distribution of yarn, in Bombay State.

President : M. R. Bharucha; *Vice-President* : Punjalal N. Shah, B.Sc.; *Hon. Treasurer* : Nanakchand Devidas Khanna; *Secretary* : D. M. Boradia, B.A., LL.B.

ALL-INDIA ORGANISATION OF INDUSTRIAL EMPLOYERS

Office :—28, Ferozshah Road, New Delhi 5.

Established in 1933. The objects of the Organisation are to promote and protect the industrial development of India by studying various problems relating to trade, industry and labour and advising the Central and State Governments suitably; to study questions coming up at the International Labour Organisation and other international and national conferences from the point of view of Indian industry and to enable the Indian representatives at these conferences to take an appropriate stand; and to promote harmonious relations between the management and labour.

Any association representing employers in any trade and industry is entitled to become an Association Member of the Organisation. Any individual, firm or joint-stock company engaged in any industry is eligible to the Individual Membership of the Organisation. The annual subscription for Association Members is Rs. 500 and for Individual Members, Rs. 100. The Organisation has on its roll 25 Association Members representing employers in the cotton, jute, cement, sugar, coal, tea, paper, chemicals,

engineering and other important industries in all parts of the country. There are also about 150 large industrial concerns in the membership of the Organisation.

President : Shanti Prasad Jain, Calcutta.
Vice-President : M. L. Shah, Calcutta.
Hony. Treasurer : B. N. Banerjee, Calcutta.
Secretary : G. L. Bansal.

EMPLOYERS' FEDERATION OF INDIA

Office :—Elphinstone Bldg., Churchgate Street, Bombay.

The Employers' Federation of India was registered early in 1933 with the following among its main objects :—To promote and protect the interests of employers engaged in the trade, commerce, industries and manufactures of India ; to promote or oppose legislative or other measures affecting their interests ; to nominate delegates and advisers to the International Labour Conferences and to formulate opinions on the subjects coming for discussion before such bodies ; to consider and support well-considered schemes for the welfare and uplift of Labour and establish harmonious relations between Capital and Labour.

Most of the leading employers' organisations in India are members of the Federation.

President.—Sir Vithal Chandavarkar ; *Deputy Presidents.*—Sir Paul Benthall, Sir Robert Menzies and C. S. Ratnasabapathy Mudaliar.

NATIONAL EMPLOYMENT SERVICE

As a means of ensuring the maximum utilisation of available manpower and supplying employers with the right type of workers, the Government of India is running an Employment Organization. This Organization consists of a network of Employment Exchanges in the Republic of India and a large number of technical, vocational and apprenticeship training centres.

The objects of the organization are :—(1) to place applicants in suitable employment ; (2) to increase the mobility of labour both territorial and occupational ; (3) to substitute a free, impartial and scientific system of recruitment for the one through jobbers and misfries which was condemned by the Whitley Commission on labour about two decades ago ; (4) to assist in organizing training and retraining courses ; (5) to provide the necessary machinery and suitable data for the adoption of social security measures by the State ; and ultimately (6) to promote full employment for the manpower available in the country.

The organization is under the administrative charge of the Directorate-General of Resettlement and Employment which exercises powers of control and supervision over the eleven Regional or State Offices.

By the end of December 1951, the Employment Exchanges had registered 5,,74,103 persons of whom 801,244 were displaced persons, and placed in employment 1,542,310 of whom 183,861 were displaced persons.

At the end of 1951 there were 126 Employment Exchanges operating in India, in addition to a number of sub-offices. At some centres decasualisation schemes for industrial workers were organised through the agency of the Employment Exchange Service.

As an integral part of the Employment Organisation, the Directorate-General of Resettlement and Employment is running technical and vocational training institutes/centres where training is imparted in more than 60 technical and vocational trades. At the end of December 1951 there were 35 Technical, 16 Combined and 11 Vocational Training Institutes/Centres (including 4 for training of women). In these institutions 9,972 persons including 2,821 displaced persons and 3,2 women were under training. In addition to above 190 Primary School Teachers were receiving training in woodwork at the Industrial Training Institute, Aundh under special arrangement with the Government of Bombay.

With a view to ensuring a steady supply of trained instructors for running technical and vocational training centres, both Government and private, a Central Institute for Training Instructors has been set up at Koni near Bilaspur in Madhya Pradesh. By the end of December, it had turned out 667 Instructor-Trainees and there were another 125 under training.

Address : Directorate-General of Resettlement and Employment, Gurdwara Road, New Delhi.

PUNJAB FEDERATION OF INDUSTRIES, AMRITSAR

The Punjab Federation of Industries was established in 1937, with the object of creating a solid body of Industrialists of the Punjab and Northern India to promote and protect their interests through organised effort. It is now the only body of its kind in the Punjab as a purely industrial association which can speak with authority on all matters relating to industrial development. The Federation has now among its members the largest industrial units in the State and no industry of any importance is left unrepresented in the Federation.

NATIONAL ASSOCIATION FOR SUPPLYING MEDICAL AID BY WOMEN TO THE WOMEN OF INDIA

Office : Red Cross Buildings, 20, Talkatora Road, New Delhi.

The National Association for Supplying Medical Aid by Women to the Women of India was founded by the Countess of Dufferin in 1885, the object being to open women's hospitals and women's wards in existing hospitals ; to train women doctors, nurses and midwives in India. An endowment fund of about 6 lakhs was obtained by public subscription. In addition, branches were formed in each State, each branch having its own funds and each having a number of Local Committees and Zenana Hospitals affiliated to it.

The National Association has appointed the Countess of Dufferin's Fund Council to formulate policies for the promotion of medical aid, and its day to day affairs are managed by an Executive Committee of which Dr. Jivraj N. Mehta is the *Chairman* and Dr. S. Pandit *Secretary.*

ESTABLISHMENT OF THE BOMBAY NURSES, MIDWIVES AND HEALTH VISITORS' COUNCIL

Office :—Old Yacht Club Building, Apollo Bunder, Bombay 1.

The legislation for the registration of Nurses, Midwives and Health Visitors with a view to protecting the public from persons who misrepresent themselves as fully qualified Nurses, Midwives or Health Visitors was passed by the Bombay Government, in April 1935, namely the Bombay Nurses, Midwives and Health Visitors' Registration Act. In the absence of State Registration the nurses trained in this State were subject to certain disabilities and were refused Registration in other States and in other countries, where state registration prevailed. The Act obtains for them the necessary status and secures their registration in other States and States Unions in India.

The training and registration of nurses, midwives and health visitors in Bombay State is controlled by the Council. Nurses who are trained and registered in this State can now get registration with the General Nursing Council of England and Wales and the General Nursing Council of Scotland and can practise as qualified nurses in these Countries.

ST. JOHN AMBULANCE ASSOCIATION (INDIA) AND ST JOHN AMBULANCE BRIGADE (INDIA)

Office :—20, Talkatora Road, New Delhi 2.

The St. John Ambulance Association was founded in 1877, by the Order of the Hospital of St. John of Jerusalem in England, and has for its objects :—

(*a*) The instruction of persons in rendering First Aid in cases of accident or sudden illness and in the transport of the sick and injured ;
(*b*) The instruction of persons in the elementary principles and practice of nursing, and also of hygiene and sanitation, especially of a sick room ;
(*c*) The manufacture, and distribution by sale or presentation, of ambulance material, and the formation of ambulance depots in mines, factories and other centres of industry and traffic ;
(*d*) The Organisation of Ambulance Corps, Invalid Transport Corps, and Nursing Corps ;
(*e*) And generally the promotion of instruction and carrying out of works for the relief of suffering of the sick and injured in peace and war independently of class, nationality or denomination.

During the year 1951, 71,623 persons attended courses of instruction in First Aid, Home Nursing, Hygiene and Sanitation and Domestic Hygiene, and Mothercraft. Of these 60,625 qualified for the Association's certificates : *i.e.*, 5,,125 in First Aid; 4,171 in Home Nursing, 93 in Hygiene and Sanitation and 236 in Mothercraft and Childwelfare.

The Association has five grades of members, namely, Patrons, Honorary Councillors, Life Members, Annual Members and Annual Associates. Their respective subscriptions are Rs. 1,000, Rs. 500, Rs. 100, Rs. 5 and Rs. 2.

The income of the Indian Council at headquarters consists primarily of interest on securities, a fixed annual grant from Government, fees for certificates and membership subscriptions.

The President of the Republic of India is the President of the Association. Its general business is conducted by an Executive Committee of which The Hon'ble Rajkumari Amrit Kaur is the Chairman and Sardar Bahadur Balwant Singh Puri, C.I.E., O.B.E., the Secretary-General.

The St. John Ambulance Brigade is a uniformed, disciplined body of men and women, all of whom are holders of First Aid, and, in the case of women also Home Nursing certificates. They meet together regularly for practice, are inspected and re-examined annually and undertake to turn out for public duty whenever required.

The Brigade in India is commanded by The Hon'ble Rajkumari Amrit Kaur as Chief Commissioner for India. Under her are 18 Districts covering almost all the States and major railways in India with headquarters at Calcutta, Bombay, Madras, Bangalore, Lucknow, Nagpur, Patna, Delhi, Gorakhpur, Shillong, Indore, Bhubaneshwar, Secunderabad and Simla.

THE TRAINED NURSES ASSOCIATION OF INDIA AND THE ASSOCIATION OF NURSING SUPERINTENDENTS OF INDIA

Office :—28, Alipore Road, Delhi 8.

The Trained Nurses' Association of India was founded in 1905 and incorporates the Association of Nursing Superintendents of India. It is affiliated with the International Council of Nurses, the National Council of Women in India and the Indian Conference of Social Work, and the Nurses Auxiliary of the Christian Medical Association is its affiliated Association. Its objects are :—

(*a*) to uphold in every way the dignity and honour of nursing profession,
(*b*) to promote a sense of *esprit de corps* among all nurses,
(*c*) to enable members to take counsel together on matters affecting their profession,
(*d*) to elevate nursing education and to raise the standard of training.
(*e*) to strive to bring about a more uniform system of education, examination, certification and registration.

The branches of the Association are the Health Visitor's League, the Midwives' Union and the Student Nurses' Association. The number of qualified members are 2,578 and student members 3,101 totalling 5,679. The official organ of the Association is *The Nursing Journal of India.*

Deputy Director ; Dr. K. Borch.

4. World Health Organisation Regional Office for South East Asia : Patiala House, Hardinge Avenue, New Delhi.
Director : Dr. C. Mani.
Deputy Director : Dr. S. F. Chellappah.

Museums and the Indian War Memorial, 2. Juma Masjid (built by Shahjahan, the biggest mosque in the world), 3. Chandni Chowk (the main thoroughfare), 4. Kashmiri Gate, 5. Kalan Masjid, 6. Sunheri Masjid, 7. Tomb of Nizamuddin, 8. Rajghat and Safimgarh, 9. Public Gardens, 10. Jantar Mantar (Jaisingh's old observatory) 11. Purana Kila (built by Sher Shah). Places near-about Delhi which are worth a visit are: 12. Kutub Minar (11 miles from Delhi), 13. Tuglakabad (12 miles from Delhi), 14. Humayun's Tomb (4¼ miles), 15. Safdar Jung's Tomb (5 miles). 16. Rajghat (Mahatma Gandhi's samadhi). The means of conveyance are tongas, buses, taxis, and trams (in old Delhi only).

Delhi is directly connected by railway with Bombay, Calcutta and Madras. The Central and Western Railways connect it with Bombay, the N. and E.R. connect it with Calcutta, and the Southern and Central Railways together connect it with Madras.

Ellora Caves: are situated about 15 miles to the north-west of Aurangabad in Hyderabad State. The caves which are excavated in the face of a hill are 34 in number and run north to south for a distance of a mile and a quarter. The hill has the shape of a crescent the southern, the centre, and the northern being occupied respectively by Buddhist, Hindu and Jain temples. There are 12 Buddhist caves, 17 Hindu caves and 5 Jain caves. The Hindu caves are more lavishly decorated than others and Kailash Temple which is the most famous of the caves is also the biggest cave temple in India. It stands in a court averaging 154 feet wide, 276 feet long with a scarp 107 feet high at the back. Among other notable caves are the Carpenter's cave and Dining caves. It is believed that the Ellora Caves are about a thousand years old. They are reached from Aurangabad by bus or car.

Ernakulam: in Travancore-Cochin, is famous for its back-waters fringed by Hindu, Muslim, Christian and Jewish settlements.

Fatehpur Sikri: founded by Akbar in 1569 but now a dead forsaken city, is situated 23 miles from Agra. Akbar wished to make it his capital but it had to be abandoned because of lack of water. Here Akbar's son Salim who later became the Emperor Jehangir was born. The place contains a number of palaces, shrines, mosques built of marble and red sandstone. *The more notable among the ruins are:* 1. Buland Darwaja, the Gateway of Victory, built to commemorate the conquest of Khandesh. It is 176 feet high and is the highest gateway in India. It forms the southern gateway to the most imposing structure in Fatehpur Sikri, 2. the Jami Masjid, said to be a copy of the mosque at Mecca or Medina. Then there are 3. Panch Mahal, 4. Diwan-i-Khas (Hall of Private Audience), 5. Maryam's House, 6. Palace of Jodh Bai, 7. House of Birbal, 8. Elephant Tower and 9. Khas Mahal. Fatehpur Sikri has a railway station, and the ruins can also be easily reached by car. There is a dak bungalow where visitors can get meals by previous arrangement.

Golconda: in Hyderabad is an ancient spectacular fort.

Gopalpur-on-Sea: in Orissa is a sea-side resort for a quiet holiday.

Gulmarg: an ideal hill station about twenty-five miles from Srinagar, is a little less than 9,000 feet above sea-level. The place boasts of all modern facilities and is particularly noted as a winter play-ground affording scope for skating, ski-ing, tobogganning, and golf. Round about are ideal places for walks, rides and excursions.

Gwalior: one of the two capital towns of Madhya Bharat, best known for its fort (which is reputed to be the most interesting and remarkable example of a Hindu palace of an early age) lies about 200 miles to the south of Delhi. *Places worth a visit:* 1. Gwalior fort (includes Man Singh's Palace and a number of temples and shrines), 2. Tansen's Tomb, 3. Rani Laxmi Bai's Chhatri, 4. the Chhatries of other Mahratta rulers, 5. tomb of Mahomed Ghaus, 6. Jami Masjid, 7. State Museum, 8. King George Park and Zoo. Seventy-three miles from Gwalior is Shivpuri or Sipri famous for its lake and scenery. Survaya which is twelve miles again from Shivpuri contains the remains of a fortress of the early mediæval period. The chief means of conveyance are tongas and buses. There are two dharmasalas open only to Hindus but at Dufferin Sarai opposite the station rooms are available for rent. Gwalior is on the main Central Railway line between Bombay and Delhi.

Halebid: in Mysore, is well known for its elaborately sculptured temples of the Hoysala period.

Hampi: in Madras State, is the ruined capital of the Vijayanagar Empire.

Hardwar: in U.P. on the Inner Himalayas is a great Hindu pilgrim centre.

Imphal: north-east frontier town and capital of Manipur. It is celebrated for the Manipur dance and handloom products.

Jabalpur: in Madhya Pradesh, twelve miles from Jabalpur are the marble rocks.

Jaipur: provisional capital of Rajasthan Union is a well laid-out modern city. It is famous all over India for the beauty of its art and the skill of its artisans. Jaipur pottery, brass ware, stone carving, ivory and sandalwood work and jewellery have enjoyed a great reputation from ancient times. Pop. 291,183 (1951). *Places worth a visit:* 1. Maharaja's Palace, 2. Jai Singh's Observatory, 3. the ruins of Amber (ancient capital), 4. the Hawa Mahal, 5. the Palace Armoury, 6. Cenotaphs of the Queens, 7. Galta (place of pilgrimage) and Ghat, 8. School of Arts, 9. Public Library, 10. Transport Gardens, 11. Museum. The chief means of transport are tongas, ekkas, phaetons, taxis, buses and palgharis.

Jaipur is on the metre-gauge line of the Western Railway between Ahmedabad and Delhi.

Jamshedpur: in Bihar, famous as India's 'steel town'.

Jog Falls: in Mysore State, are one of the highest waterfalls in the world.

Junagadh: in Saurashtra, is situated below the celebrated Girnar Hill and is one of the most ancient cities in India. The temples on the hill are noted for their architecture and delicate painting. On the way to Girnar is a rock with an Asoka edict.

Kangra Valley: famous for its magnificent landscapes and historic temples, lies in the Punjab. Semi-urban hill stations are Kangra, Dalhousie and Dharamsala. *Places worth a visit in Dharamsala are:* 1. Bhagsunath Water Springs, 2. State Quarries, 3. Himalayan Snow View. The chief means of conveyance are cars and buses. There is also a dak bungalow at Dharamsala where visitors can stay. To get to the Kangra Valley a visitor has to change at Pathankot into the narrow-gauge railway which runs to Jogindranagar in the Mandi State. Dharamsala can also be reached from Pathankot by car.

Kanheri: in Bombay State, is famous for Buddhist caves of different dates beginning with the 1st century A.D. It is about twenty miles from Bombay.

Kashmir: unsurpassed for the beauty of its mountain, lakes and valleys is a State called the State of Jammu and Kashmir, situated in the north of India. The State is also famous for its shawls and carpets and the exquisite beauty of its wood-work and papier-mache articles. Its fruit and vegetables are equally well-known. The normal recreations include trips on lakes in house boats and mountain climbing. Other attractions in the State are big and small game, golf, fishing and swimming. Gulmarg in Kashmir is a place where wealthy people congregate for winter sports. The capital is Srinagar. Besides Srinagar and Gulmarg other places which are worth a visit are Pahalgam, the summer capital, about 60 miles from Srinagar, and Amarnath, a place of pilgrimage about 30 miles from Pahalgam. The way to Srinagar is from Pathankot, which is a railway terminus. From Pathankot one goes to Srinagar by road passing Jammu on the way. From Pakistan the way into Kashmir is from Rawalpindi by way of Murree. All along the way there are dak bungalows and excellent catering arrangements. Medical relief is available, so are postal and telegraph facilities. Srinagar, the winter capital is situated on the river Jhelum. It is a little over 5,000 feet above sea-level. The chief means of conveyance are boats, tongas, cars or buses. *Places worth a visit:* 1. The Moghul Gardens, like *a.* Shalimar, *b.* Chashama, *c.* Acchabal, and *d.* Nishat. 2. The lakes like *a.* Dal Lake, *b.* Wulur Lake, *c.* Anchar Lake, *d.* Manasbal Lake and so on. 3. Places of historical and religious interest like *a.* Martand temple, *b.* Pandranthan temple, *c.* Bhaumazu caves, *d.* Avanti Pura and *e.* Pari Mahal.

Khajuraho: is famous for its group of highly ornate mediæval temples.

Kodaikanal: famous hill station on the Palni Hills in South India. It is about 7,000 feet above sea-level and is neither too hot nor too cold. The average annual rainfall is 65 inches, the major part of the rain falling in October, November and December. The months of April, May and June constitute the 'season'. The town enjoys excellent water-supply and is also well-equipped with all the ordinary amenities of life. The place affords plenty of scope for such recreations as walking, hiking, boating, fishing, hill climbing and golf. Going on an excursion or picnic is yet another way of diverting oneself. For the more adventurous there is big game hunting. Kodaikanal is the delight of the gardener and plants are in bloom all the year round. *Places worth a visit:* 1. the lake skirted by a three-mile road, 2. the water falls like *a.* Fairy Falls, *b.* Silver Cascades, *c.* Bear Shola Falls, *d.* Glen Falls, *e.* Pamber Falls, 3. There are view points like *a.* Coaker's Walk, *b.* Pillar Rocks, *c.* Prospect Point, *d.* Vembadi Shola Peak, *e.* Dolphin's Nose. Then 4. the Solar Observatory.

There are a number of boarding houses, and fully furnished flats can also be rented. Kodaikanal is reached from Kodaikanal railway junction on the Southern Railway *via* Trichinopoly. Kodaikanal town is 50 miles from the railway station and the journey can be done by car, taxi or bus on a very good motoring road.

Kanarak or Konark: place in Orissa, famous as the site of the Temple of the Sun God otherwise called Black Pagoda. It is remarkable both as an example of ancient Indian architecture and sculpture and of engineering skill. A great part of the temple is destroyed but the porch stands with the huge figures of warriors and life-sized pieces of horses and elephants and the famous carved wheels at the basement. The image of the sun in the yard of Puri Temple is generally supposed to have come from Kanarak. Kanarak is about 20 miles from Puri with which it is connected by road which is about 50 miles long.

Kolar: in Mysore, is the site of the famous gold fields.

Kotagiri: hill station on the Nilgiris, higher than Coonoor, but lower than Ootacamund is smaller and quieter than either. It is about 6,500 feet above sea-level and has a mean day temperature of 62 degrees. The town has electricity, a number of shops and boarding houses, a local board hospital and golf course. Kotagiri is reached from Coonoor or Ootacamund by car or bus. The roads are excellent and there is regular bus service. Between Kotagiri and Ootacamund the road goes over Dodda-betta the highest peak in the Nilgiri Hills.

Kulu Valley: well-known for the variety of its scenery and places of historical interest is situated in the Punjab, north of Simla. It is ideal for hiking and trout fishing. The important part of the valley from the tourist's point of view is the road which runs from Pathankot or Nagrota the railheads into the valley. A few miles beyond Pathankot the road passes through the rich cultivation of the Kangra Valley and the extensive tea gardens surrounding Palampur and Baijnath. The traveller has a view of the majestic snow-capped mountains of the Dhanla Dhar range standing out in bold relief against the sky-line. He also comes across the ancient temples of Baijnath. Beyond Ant after Mandi the valley opens out and the final stretch through the lovely Kulu Valley mainly along the left bank of the river Beas offers an entirely different type of scenic effect. The Kulu Valley is also called the 'Valley of the Gods' as in addition to several important deities like Raghunathji at Sultanpur and Jamlu of Malana every village has its own particular God. The best season is from March to May and September to November. The summer is never uncomfortably hot. The main centres of the Kulu Valley are: 1. Kulu or Sultanpur, the principal town, about 4,000 feet above sea-level. It is the main shopping centre and has a dak bungalow, and a number of rest-houses. 2. Raison, 8 miles from Sultanpur and 4,600 feet above sea-level. The available sports are golf, tennis and swimming. Mayflower and the Shacks are two hotels. 3. Katrain, is in the widest part of the Valley, 12 miles from Sultanpur and 4,800 feet above sea-level. 4. Naggar, summer headquarters, is 5,800 feet above sea-level. There is a departmental rest-house and a serai. 5. Manali, the head of the valley and terminus of the motor road, is 23 miles from Sultanpur and is situated amid typical alpine scenery. Accommodation for visitors is available at Sunshine Orchards, Departmental rest houses and Mission Hospital. Except Manali, the road to which may be occasionally closed owing to snow-fall the rest of the valley is open throughout the year. There is regular bus service from Pathankot and Nagrota to Kulu. Amritsar is the main railway junction for Kulu. From Amritsar a line runs to Pathankot and thence to Nagrota which is the railhead.

Kumaon Hills: in U.P. form part of the Himalayas and are known as the sportsman's paradise. Two important summer resorts are Nainital and Ranikhet. Most mountaineering parties establish their base at Ranikhet.

Lansdowne: in U.P. in Garhwal about half way between Mussoorie and Nainital.

Lonavla: in Bombay State, lies in the heart of the Western Ghats and is known for the Karla Caves.

Lucknow: the city of gardens is the capital of U.P. It is full of places of historical interest and of architectural beauty and is generally regarded as the cultural capital of Moghul India. It is well-known for its pottery, copper and brass ware, wood and ivory carvings and gold and silver embroidery on cloth. Legend connects the founding of the city with Laxmana, the brother of Rama, the mythical hero of the Hindus, and is sometimes called Laxmanpur. Pop. 497,594 (1951). The chief means of conveyance are tongas, ekkas, phaetons and taxis. *Places worth a visit:* 1. Great Imambara, 2. Small Imambara, 3. tombs of Wajid Ali Shah and his Begum, 4. Kaiser Bagh Palace, 5. Chattar Manzil, 6. Dilkhusha Palace, 7. Moti Mahal, 8. Machi Bhavan Palace, 9. Jumma Masjid, 10. Charbagh, 11. Alambagh, 12. Sikander Bagh, 13. Musa Bagh, 14. Wingfield Park, 15. Residency, 16. Havelock's Tomb, 17. Clock Tower, 18. Museum, 19. Observatory, 20. Iron Bridge. Lucknow is a big junction on the N.R.

Madras: the third largest city in the subcontinent and the capital of Madras State. It is the place where the English first settled to trade. Pop. 1,429,985 (1951 census). The chief means of conveyance are rickshaws, jutkas, horse carriages, taxis, buses and trams. *Places worth a visit:* 1. Fort St. George (contains the oldest Protestant church in the country where Clive was married), 2. High Court, 3. Light House, from the top of which one can get a panoramic view of the city, 4. Marina. The Marina is one of the most beautiful promenades in the world; sea-bathing is possible at certain points. 5. The Museum, 6. Connemara Library, 7. the Zoo, 8. the Observatory, 9. Moore Market, 10. Parthasarathy Temple, 11. Mylapore Tank and Kapaleshwar Temple, 12. St. George's Cathedral, 13. St. Thomas Mount, 14. Race Course, 15. Buckingham and Carnatic Mill, 16. Madras Pencil Factory and 17. Adyar, where the headquarters of the Theosophical Society are located. There are two places round about Madras which are also worth a visit: 1. the ruins of the Gingee Fort famous in the days of the Vijayanagar Empire are about 95 miles from Madras and can be reached by rail and road, 2. The seven Pagodas of Mahabalipuram which can be reached by road from Chingiepet Railway Junction. Kalakshetra is a well-known institution for music, dance and drama.

Madura: the second biggest city in Madras State is a great religious centre, containing as it does a number of famous temples. In the old days it was the capital of the Pandya kingdom and has always been a seat of Hindu culture particularly Hindu architecture. The silk-weaving industry of Madura is also noteworthy. *Places worth a visit:* 1. The Great Temple, actually made up of two temples one of Meenakshi and the other of Shiva. Adjoining the temple are *a.* Nandi Hall, *b.* temple of the Saints, *c.* the Jewel House, *d.* the Stable Houses. Then there is 2. Tirumal Nayak's Palace.

Mahableshwar: a hill station in Bombay State, the season being April and May. It is 4,500 feet above sea-level and is noted for its dry and bracing climate. It is also well-known for its fruit and vegetables, orchids and lilies which bloom in April and May. The chief recreations are hiking and driving in a car. Among the sports which are available are tennis, golf and polo. *Places worth a visit:* 1. The two Government Houses old and new. 2. Reay Garden and 3. the two temples Krishna and Mahableshwar. Then there are a number of points from which magnificent views can be obtained, like Arthur Seat Point, Baghdad Point, Castle Rock, Carnac Point, Connaught Point, Falkland Point and so on. Then there are the waterfalls like Chinaman Waterfall, Dhobi Waterfall, Lingmala Waterfall and a lake called Yenna Lake. The places of historical interest are all connected with the name of the Mahratha leader Shivaji such as Kamalgarh Fort, Makrandgarh Fort, Pandavgarh Fort, Pratapgarh Fort and Raigarh Fort. Near Pratapgarh are the Bhavani Temple and the tomb of Afzulkhan. All these places are accessible by road from Mahableshwar.

Mahableshwar can be reached from Poona both by road and railway. By railway one can go as far as Wathar Station from where Mahableshwar is only about half-an-hour's journey.

Mandu: in Madhya Bharat is one of the greatest mediæval city sites in India with extensive remains including fortifications and palaces. Thirty miles west of Mandu is Bagh which has a large number of caves adorned with fine old frescoes.

Matheran: the nearest hill station to Bombay is 2,650 feet above sea-level, and is famous for the magnificent views which it yields. The town looks on to the sea, and the coastal plain rises imperceptibly until it reaches the steep ascent of the Ghats. In his walk round the eighteen-mile circumference of the hill the visitor can reach no fewer than thirty-three points of which the following deserve mention: 1. Garbut Point, 2. Panorama Point, 3. Porcupine Point, 4. Louisa Point, 5. Chowk Point, 6. Alexandra Point, 7. Belvedere Point. At every one of these points the visitor will find comfortable seats, shady trees and fine views. Among other places which are worth a visit are: 1. Charlotte Lake, 2. Paymaster Park, 3. Band-stand, 4. Castle Hill Tower, 5. Race Course. The chief recreations are walking and riding. Rickshaws, munchils and horses are the chief means of conveyance.

Matheran is reached from Neral Station on the main line between Bombay and Poona. From Neral there is a light railway to Matheran which is about one-and-a-half-hour's journey. Alternatively one can do the journey by rickshaw or pony by previous engagement at Matheran.

Mathura: in U.P. is an important place of pilgrimage for Hindus, connected with Shri Krishna. It has also an archæological museum. Six miles from Mathura is Brindavan.

Mussoorie: hill station in U.P. lies to the north of Dehra Dun. It is 7,000 feet above sea-level. The town has excellent water-supply, electric lighting system, hospitals, nursing homes and some of the best schools in India both for boys and girls. There are also plenty of sports and amusements. And like every Himalayan hill station one can obtain magnificent views of mountain tops and green river valleys. Hiking and going on excursion or picnic are among the main recreations. The means of conveyance are rickshaws, ponies, dandis, buses and cars. *Places worth a visit:* 1. The falls like *a.* Bhatta Falls, *b.* Kamptee Falls, *c.* Hearsay Falls, *d.* Mossy Falls. 2. Wimper's Tank, 3. Bandstand. Mussoorie is reached from Dehra Dun by car and is about two hours' journey.

Mysore (State): commemorates the destruction of Mahishasur, the monster by Chamundi who is the tutelary goddess of the royal family of Mysore. Mysore is a picturesque land of forest and mountain presenting the most diversified and beautiful scenery. In the southern forests are found wild elephants for the capture of which khedda operations are undertaken from time to time. Tigers, leopards, bears and bisons are also numerous. *Places worth a visit in Mysore State:* 1. The Chenna Kesava Temple at Belur, 25 miles from Hasan, 2. Sivasamadram Falls on the Cavery River, 3. Hoysaleswara Temple at Halebid, 4. Gersoppa Falls also called the Jog Falls on the Saraswati River, the most famous beauty spot in Mysore. The falls are higher than Niagara, 5. Kolar Gold Fields, the biggest in India worked by electric power, 6. Nandidurg, a hill station near Bangalore, and the summer residence of Tippu Sultan, 7. Seringapatam of historical and religious interest as the capital of Tippu and as the city of many temples, 8. Shravanabelgola, the great Jain religious centre with the huge statue of Gomateshwara and of course the city of Bangalore and the town of Mysore.

Mysore (City): the capital of the State, is built in accordance with modern standards, and contains a number of beautiful public buildings. It attracts great crowds twice a year when the city wears a gala appearance. These two occasions are the Maharaja's birthday and the Dasarrah. *Places worth a visit:* 1. The various palaces like the Maharaja's Palace, Jaganmohan Palace and so on, 2. Chamundi Hill, with the Bull and the Temple, 3. Zoological Gardens, 4. Silk Factory, 5. Sandalwood Factory, 6. Krishnarajasagar Dam and the Brindavan Gardens, among the most beautiful in the world, about 12 miles from Mysore. The chief means of conveyance are jutkas, coaches, and taxis. Mysore is one of the terminii of the Southern Railway.

Naini Tal: hill station and summer capital of the U.P. Government, is about 6,400 feet above sea-level. Among the principal recreations are hiking, boating and yatching on the lake on which the town stands, and fishing and riding. One can also enjoy the Himalayan mountain scenery. *Places worth a visit:* 1. Cheeva Peak, 2. Land's End, 3. Lariya Kantha Peak. Naini Tal is reached from Kathgodam railway station which is connected with Bareilly and Mathura. From Kathgodam one goes by bus or car to Naini Tal which is 22 miles away.

Nalanda: in Bihar contains a group of ruined Buddhist temples and monasteries and a small local museum. It was the seat of an ancient Buddhist university.

Nasik: in Bombay State, is a place of pilgrimage for Hindus and is famous for Buddhist rock-cut temples of the first century B.C. and later.

Ootacamund: hill station and summer capital of Madras State, stands 7,500 feet above sea-level on the Nilgiris. It is sometimes called 'the Queen of the hill stations.' One of the main features which distinguishes it from other hill stations is the number and length of motorable roads which go winding in and out of spacious parks or long stretches of turf studded with ornamental trees. The mean temperature for the year is 57.33°; during the winter the

A TOURIST'S GUIDE

THE following hints meant for foreign tourists may be useful :

1. Every foreign tourist entering India should be in possession of a valid passport issued by his Government.

He should also obtain before leaving his country a visa from the Indian representative abroad (or the British representative in countries where there are no Indian representatives). Commonwealth citizens are exempt from the visa requirement, provided their passports are valid for travel to India. Persons of non-Indian origin domiciled in South Africa are, however, required to obtain entry permits.

Visas for India are, unless otherwise specified, valid for a single journey only.

2. All non-Commonwealth tourists arriving in India are required to get themselves registered at the port of arrival and obtain certificates of registration. They will be registered as "tourists" and will not be required to report their movements to the police or registration authorities during their stay in India.

3. The Government of India have placed no health restrictions on persons entering India by sea or air, except in regard to yellow fever.

However, all persons are advised, in their own interest, to be protected against small-pox and cholera according to international requirements.

4. All baggage is open to customs examination. The duty payable on most articles varies from 25 per cent to 75 per cent according to the article.

Personal effects are allowed to enter free. Also alcoholic liquor up to one quart, provided the tourist can procure a permit on arrival by producing his tourist card.

The following are duty free : a reasonable quantity of films, two cameras (including one cine), two watches, 100 cigarettes, 50 cigars, ½ lb. of tobacco, personal jewellery Rs. 5,000. Arms and radio sets, are dutiable. But if the tourist does not wish to pay any duty he could leave them in bond with the customs to be collected later.

5. Tourists are allowed to bring into India any amount of Indian or foreign currency notes or coins except among others in the cases specified below :

Bank of England notes up to £5 per head ; U.S. dollar notes up to $45 per head ; Australian notes up to A£10 per head. There is no limit on the amount of Travellers' Cheques. The official rates of exchange are as follows : £1 equal to Rs. 13·33 ; $1 equal to Rs. 4·76. The actual buying and selling rates, however, differ slightly from these rates.

6. Tourists are advised to arrange for clearing their baggage by one of the recognized travel agencies.

TOURIST AGENCIES

Here is a list of agencies, with addresses., 1. American Express Co., Inc., Oriental Life Building, 364, Hornby Road, Bombay ; 2. Balmer Lawrie & Co., Ltd., 21, Netaji Subhas Road, Calcutta ; 3. There are Regional Tourist Offices in Bombay, Delhi, Calcutta and Madras.

For foreign tourists there are standard itineraries—a week's tour, fortnight's tour, monthly tour.

TOURIST CENTRES

Mount Abu (hill station) : Pop. 4,316 (1941) in Bombay State, about 4,500 feet above sea-level. There are two seasons in the year, the first lasting about two and a half months from the middle of March to the beginning of June, and the second lasting about one and a half months from the middle of September to the end of October. *Places worth a visit :* 1. the Dilwara Jain temples, 2. Achalgarh temples, 3. Ruins of an ancient town called Chandravati, 4. Nakhli Talao (lake), 5. Arbuda Devi, a shrine cut in rock, 6. Hermit's Peak, the highest in the Aravali Hills, 7. Sun-set point, 8. Palanpur point, 9. Devangan temples, and 10. the Municipal Park. Mount Abu is electrified and has waterworks with public utility taps. The *chief* means of conveyance are rickshaws, touring cars and buses. There is a Dak Bungalow containing furnished rooms, permission to use which has to be obtained from the Assistant Engineer, P.W.D., Mount Abu. Mount Abu is reached by railway and road. The nearest railway station is Abu Road on the metre-gauge section of the Western Rly., from Ahmedabad to Delhi. From the station Abu Road is about 17½ miles by road, and there is regular motor service between the town and the station.

Agra : Pop. 375,994 (1951), a town in U.P., stands on the banks of the River Jumna. It was the capital of the Moghul Empire during the reigns of Babar and Akbar. *Places worth a visit :* 1. the Taj Mahal, regarded by many as the most beautiful building in the world, 2. the Fort, 3. the Juma Masjid, 4. Moti Masjid, 5. the tomb of Itmimad-ud-Daula, 6. the Dewan-I-Am, 7. Akbar's tomb at Sikandra, about five miles from Agra, 8. Kailash Temple at Sikandra, 9. Ram Bagh, 10. Government Gardens, 11. Dayal Bagh.

Agra, which has many railway stations, is on the main Bombay-Delhi and Calcutta-Delhi lines and is accessible by the Central or the Western or the Northern Railway.

Ahmedabad in Bombay State, is an important textile centre. It contains numerous monuments of the fifteenth and sixteenth centuries.

Aiholi contains about fifty temples important in the development of Hindu architecture and sculpture.

Ajmer : Capital of Ajmer-Merwara, Hindu and Muslim religious centre, contains Western railway workshop. Pop. 196,731 (1951). *Places worth a visit :* 1. the Durga of Kwaja Sahib (tomb of Muslim saint), 2. the Magazine (Akbar's old palace now museum), 3. Ana Sagar Lake (built by Shah Jehan), 4. Daulat Bagh, 5. Badh Shahi Building, 6. Taragarh Fortress (built by Akbar), 7. Mayo College, 8. Pushkar, the most sacred lake in India, is about seven miles away. The chief means of conveyance are buses, tongas and pao gharis. Ajmer lies on the metre-gauge section of the Western Rly. line between Delhi and Ahmedabad. A line from Ajmer goes south to connect it with Khandwa on the Central Railway line between Delhi and Bombay.

Ajanta Caves are 66 miles north of Aurangabad in the State of Hyderabad. The caves are 29 in number (5 chaityas or shrines and 24 viharas or monasteries, all Buddhist) and present a record of a unique combination of painting, sculpture and architecture of a period extending over nine centuries from about the 2nd Century B.C. to about 7th Century A.D. Three miles from the caves are a rest-house and a travellers' bungalow under the charge of the Director of Archæology of the State. There is a curator's office next to the rest-house from which help and information can always be obtained. The caves can be reached from Aurangabad on the railway line between Hyderabad and Manmad by the State railway buses which regularly ply between Aurangabad Station and the Ajanta caves.

Allahabad city in U.P., situated at the confluence of the Ganga and the Jumna. It has an old fort and also an Asoka pillar. Sixty-five miles from Allahabad is Kosambi where the ruins of an ancient capital are being excavated.

Alwar, Bikaner, Jodhpur, Kotah are famous for Rajput historical monuments.

Amritsar town in the Punjab, sacred to the Sikhs. Pop. 320,465 (1951). Amritsar is the very centre of the Sikh religion and has a big trade in grain and textiles. *Places worth a visit :* 1. the Golden Temple standing in the Pool of Immortality, 2. Baba Atal Tower, 3. Akal Takht, 4. Ram Bagh Gardens, and 5. Fort Govind Garh. The chief means of conveyance in the city are buses and hackney carriages. Fares are fixed. Amritsar is the Indian terminus of the frontier line from Delhi. It is on the Northern Railway.

Aurangabad in Hyderabad, has a fort built by Aurangzeb. Eight miles from Aurangabad is Daulatabad, a remarkably complete mediæval capital of India.

Badami in Bombay State, is famous for sculptured caves of the 6th century and for a group of Hindu temples. Fifteen miles from Badami is Pattadakal with another group of early Hindu temples.

Bangalore : Largest city in Mysore and a health resort is about 3,000 feet above sea-level. It is well laid-out and up-to-date with every urban facility. *Places worth a visit :* 1. Cubbon Park, 2. Lal Bagh, 3. Band-stand, 4. Race Course, 5. Maharaja's Palace, 6. Tippu's Palace, 7. Venkataramanaswamy Temple. The chief means of conveyance are rickshaws, jutkas, buses and taxis.

Baroda : Capital town of the former Baroda State, now part of Bombay State, is about 250 miles to the north of Bombay, modern, pop. 211,413(1951). *Places worth a visit :* 1. Laxmi Vilas Palace (the residence of the Maharaja, one of the most beautiful in India), 2. Old Nazar Bagh Palace, 3. Museum and Public Park, 4. Jubilee Garden, 5. L. F. Battery, and 6. the city walls. The chief means of conveyance are tongas, buses, taxis. Baroda lies on the main lines of the Western Railway between Bombay and Delhi and Bombay and Ahmedabad.

Belur : in Mysore, noted for its elaborately sculptured temples of the Hoysala period.

Banaras : town in U.P. on the banks of the Ganges, very sacred to the Hindus. It is in fact the religious capital of Hindu India and contains about 1,500 comparatively large temples besides countless minor shrines. It is also reputed to be the oldest city in the country. Pop. 357,175 (1951). *Places worth a visit :* 1. Vishwanath Temple, 2. Bharat Mata Temple, 3. Manmandir, with Jaisingh's Observatory, 4. Aurangzeb's Mosque, 5. Gyan Wapi Mosque, 6. Nandeswar Kothi, 7. Ramnagar Fort, 8. Maidajin Garden, 9. Victoria Gardens, 10. Benares Hindu University, and 11. Sarnath, a great Buddhist centre with many architectural remains, is about six miles from Banaras. The chief means of conveyance are taxis and tongas.

There are also about 30 dharmasalas for Hindu pilgrims. Benares is on the branch line from Moghul Sarai to Saharanpur. It is also connected with Allahabad by railway.

Bharatpur : town in Rajasthan is famous for its historic fort.

Bhuvaneshwar : place in Orissa, notable as containing the only relics of the Age of the Guptas. *Places worth a visit :* 1. Lingaraj Temple, visitors are not allowed inside the compound but have to see it from a platform, 2. Kukteshwar Temple, 3. Parasurameswar Temple. Nearby are the Jain rock-cut caves of Khandagiri and Asoka's Rock Edict at Dhauli. There is a Dak Bungalow where visitors can stay with the District Board's permission. Bhuvaneshwar is on the main E. R. line between Waltair and Howrah, about 20 miles from Cuttack. Bhuvaneshwar has been selected as the new capital of Orissa.

Bijapur : town in Bombay State, capital of the old Muslim kingdom of Bijapur is full of the remains of palaces, mosques, tombs of the rule of the Adil Shahi kings. *Places worth a visit :* 1. Jami Masjid (the greatest mosque in South India), 2. Goli Gumbas (the tomb of Mahammad Adil Shah and the second largest dome in the world), also called the Whispering Gallery, 3. Methar Mahal, 4. Ashar Mahal 5. Gagan Mahal, 6. Chini Mahal, 7. Mecca Masjid, 8. Taj-Baury (water-tank), 9. Malik-I-Maidan, (Great Gun), 10. Landi-Kasab Gun, 11. Haidar Burj (tower), 12. Ibrahim Roza (the tomb and mosque of Ibrahim II), 13. Jala Mandir (reservoir), 14. Chand Bauri (old tank), 15. Granary, 16. Jod Gombaz (double tombs), 17. Bara Kaman Masjid, and 18. Begum Tank. The chief means of conveyance are taxis, lorries, tongas and bullock-carts. Bijapur is a railway station on the Gadag-Sholapur section of the Southern Railway. There are a dharmasala and a dak bungalow about one and a half miles from the station.

Bombay : second city and port in India generally called the gateway to India, is big, western, modern. Pop. : about 3 million ; Area (Greater Bombay) 92 sq. miles. It is the principal centre of the textile industry, and the second biggest financial centre. The foreign trade of Bombay is about 30 per cent of the total trade of India. The city returns 25 per cent of the country's total income-tax, and 40 per cent of the corporation tax. It is a big communications centre, served by seventeen air-lines and two big railways of both of which it is a terminus. May and October are the hottest months, but from November to March it is very cool. *Places worth a visit :* 1. the Gateway of India, 2. Apollo Bunder, 3. Prince of Wales Museum, 4. the Town Hall, 5. Bombay Castle, 6. Rajabai Tower and University Building, 7. Victoria Terminus of the Central Railway, 8. the General Post Office, 9. Crawford Market, 10. Brabourne Stadium, 11. Chowpatty sands, 12. Malabar Hill and Hanging Gardens, 13. Central Station, terminus of the Western Railway, 14. Race Course, 15. Bhandarwada Reservoir and Gardens, 16. Victoria Gardens. Places near about Bombay which are worth a visit are 1. Juhu (sea-side resort), 2. Versova (sea-side resort), 3. Vehar Lake (from which the city gets its water-supply), 4. Kennery Caves (rock-cut caves of Buddhist origin), 5. Jogeshwari Caves, 6. Vajreshwari (temple and hot springs of medicinal property), 7. Mandapeshwar (cave temple), 8. Nirmal (temple and lake), 9. Ambarnath (temple), 10. Uran (port, with private garden and zoo), 11. Pali (hot springs and small game shooting), 12. Elephanta Caves (originally Buddhist rock-cut, contain carved Hindu deities). The chief means of conveyance in Bombay are trams, buses, electric railway, taxis and tongas. *Clubs :* 1. Bombay Club, 2. Bombay Commercial Gymkhana, 3. Bombay Flying Club, 4. Bombay Gymkhana, 5. Bombay Presidency Golf Club, 6. Catholic Gymkhana, 7. Cricket Club of India, 8. Islam Gymkhana, 9. Orient Club, 10. P. J. Hindu Gymkhana, 11. Princess Mary Victoria Gymkhana, 12. Ripon Club, 13. Rotary Club, 14. Royal Bombay Yacht Club, 15. Royal Western India Turf Club, 16. Western India Automobile Association, 17. Willingdon Sports Club, 18. Y.M.C.A., and 19. Y.W.C.A.

Brindavan : holy place of Hindus, about five miles north of Mathura in U.P. It is sacred because of its association with the birth and early life of the Hindu God Shri Krishna. *Places worth a visit :* 1. Govind Dev Temple, 2. Gopinath Temple, 3. Ranganath Mandir.

There are travellers' bungalows. Brindavan is accessible by railway or road from Mathura.

Budh Gaya : in Bihar, a Buddhist centre of pilgrimage. It contains the famous mediæval Buddhist temple.

Bundi : in Rajasthan is well-known for its buildings. Jungles nearby provide plenty of tiger shooting.

Calcutta : until March, 1912, the headquarters of the Indian Government, and now, as then, the commercial capital of India. It is the terminus of three great railways, and the port of an immense river traffic. Though it lies 84 miles from the Bay of Bengal on the River Hooghly, it has a larger foreign trade than any other Indian port, and its enterprising Port Trust the largest revenue among Indian port authorities. It is the centre of five great industries—jute, tea, hides and skins, coal and lac. Its exports include gunny bags, raw jute, tea, shellac, coal, hides and skins, rice and linseed, while it is the chief distributing centre for Lancashire piece-goods, metals and machinery, and the vast and varied requirements of the States of West Bengal, East Bengal (Pakistan), Bihar and Orissa and the tea districts. Population of West Bengal is 24,786,633 and of Greater Calcutta 4,550,117. *Places worth a visit :* 1. Victoria Memorial (contains picture-gallery and museum), 2. the Indian Museum, 3. the Zoological Gardens, 4. the Jain Temple, 5. the Kalighat Temple, 6. Belvedere House (where the British Viceroys stayed when on visit to Calcutta), now being turned into a museum, 7. Government House (residence of the Governor of West Bengal), 8. Marble Palace (containing art treasures property of the Mullick family), 9. Fort William, 10. the Eden Gardens, 11. the Town Hall, 12. the Imperial Library, 13. Dalhousie Square, 14. the Race Course, 15. Dhakuria Lake, and 16. the Hindu bathing ghats. Places near-about Calcutta which are worth a visit are : 1. Bally (holy place), 2. Belur (home of the Ramakrishna Mission), 3. the Royal Botanical Gardens (contains the biggest banyan tree in existence), 4. Diamond Harbour (fort and customs house), 5. Dum Dum (airport of Calcutta).

Cape Comorin : in Travancore-Cochin, is the southern-most tip of India.

Conjeevaram (Kanchipuram) : also called the city of temples, the Banaras of the South, is about 60 miles to the south of Madras. It is one of the seven holy cities of India and the only one in the South. The place is divided into three parts, Shiva Conjeevaram (containing Shiva temples), Vishnu Conjeevaram (containing a smaller number of Vishnu temples) and Pillayar Paliyam, a testimony to the part played by all the main Hindu religious sects in the history of the city. There are over a thousand temples in all. *Places worth a visit :* 1. the Devaraja Temple (Vaishnavait, has a seven-storeyed tower, 100 feet high), 2. the Ekambarnath Temple (Shaivait, has 10 stories and is 188 feet high), 3. the Temple of Kamakshi Amma.

Conjeevaram is on the Renigunta-Chinglepet section of the Southern Railway and is easily accessible from Madras *via* Chinglepet.

Cooch-Behar : in north-east India, is known for the facilities and opportunities which it offers to shikaris in search of big game hunting.

Coonoor : hill station on the Nilgiri Hills in Madras State, is about 6,000 feet above sea-level. The climate is mild and genial neither too hot in the summer nor too cold in the winter. The mean day temperature is 64 degrees. The north-east monsoon breaks in October and lasts about two months. The town has good water-supply and natural drainage facilities and is reputed to be one of the cleanest towns in South India. *Places worth a visit :* 1. Sim's Park (contains collection of plants), 2. Low's Waterfall, 3. Tiger Rock (hill fort). There are innumerable places for excursion and picnic purposes, *e.g.* the Droog, the Dolfin Nose, the Lamb's Rock, Laz Falls, Lady Canning Seat, the Ralliah Dam and Catherine Falls. The chief means of conveyance are cars which can be hired.

Coonoor lies on the Mettupalayam-Ootacamund line of the Southern Railway. It is also connected by road with Ootacamund, and Kotagiri, another hill station.

Darjeeling : hill station and summer capital of the West Bengal Government lies on the lower slopes of the Himalayas about 370 miles to the north of Calcutta. It is 8,000 feet above sea-level. The maximum temperature in the summer is about 80 degrees and the minimum in the winter is about 30. The town commands picturesque views including that of Mount Kinchinjunga and on a clear day of Mount Everest. Various sports are available during the season such as fishing, shooting, horse-riding and a number of other indoor and outdoor sports. Darjeeling has also a first-class sanatorium known as Eden Sanatorium. *Places worth a visit :* 1. Government House, 2. Town Hall, 3. Museum, 4. Observatory Hill (from where a magnificent view of Kinchinjunga can be obtained), 5. the Mall, 6. Lloyd Botanic Garden, 7. Birch Hill Park, 8. Senchal Lakes, 9. Ghoom Ghoom Rock, 10. Tiger Hill (from where the sunrise over Everest is generally viewed).

The chief means of conveyance are rickshaws, ponies and dandies. Darjeeling is the terminus of the Darjeeling-Himalayan section of the N. E. Railway, is about 14 hours' journey from Calcutta.

Hotels : Hotel Mount Everest. Grains: "SNOWS." Phone : 90, 90A, 236 and 236A. The leading hotel in Darjeeling—Renowned for comforts and entertainments.

Daulatabad : See under Aurangabad.

Delhi (New) : the capital of India and the seat of the Government. It was planned in accordance with modern ideas by the architect Sir Edwin Lutyens and completed in 1931. New Delhi houses the President's House, the Parliament, and the Secretariat. All the buildings in New Delhi are white except the ones mentioned above. These latter are built of red sandstone. *Places worth a visit :* 1. Connaught Place (shopping centre), 2. All India War Memorial and 3. Willingdon Air Port (port of call of all air services). Pop. Old and New Delhi, 1,193,697 (1951).

Delhi (Old) : also called Shahjahanabad, the ancient capital of India stands on the river Jumna, and is enclosed by a stone wall with seven gates. It has a history going back to 3,000 years and within an area of 50 square miles eight Delhis rose and declined and fell. The seven predecessors of present-day Delhi are Kutub, Siri, Tuglakabad, Jahanabad, Firozabad, Purana Quila and Shahjahanabad. No city in India contains as many historical remains as Old Delhi. One can trace here the growth and decay of almost every dynasty which held sway over the ancient land of Hindustan. There are also a number of factories and jewellery and gold and silver embroidery and ivory carvings works for which Delhi is well-known. Pop. about 1,000,000 (1951). Delhi is a great distributing centre for cotton, wool and silk. Industries include hardware, utensils and stoneware. Delhi is also a large market for grain. Lately tourist traffic has grown into a regular new trade. *Places worth a visit :* 1. the Fort (built by Shahjahan) contains Moti Masjid, Diwan-I-Khas, Khas Mahal, Jal Mahal, Rang Mahal, the Delhi

thermometer touches freezing point. Ootacamund is called the sportsman's paradise: plenty of fishing and big game shooting being available. There is also golf and tennis and during the season races and tournaments are held. *Places worth a visit:* 1. Botanical Gardens, 2. Race Course, 3. the Palaces, 4. Assembly Room, 5. Dodda Betta, the highest peak in the Nilgiris, and 6. Pykara Hydro-Electric Dam which is about 18 miles from Ootacamund. The chief means of conveyance are jutkas, rickshaws and taxis. Ootacamund is the terminus of the Nilgiri Mountain Railway.

Pachmarhi: hill station and summer capital of Madhya Pradesh lies on the Mahadeo hills of the Satpura Range and is about 4,500 feet above sea-level. There are about 20 golf links in the town and plenty of game is also available in the Pipariya forest. *Places worth a visit:* 1. Bee Dam, 2. Mahadeo Hills Cave, 3. Dhupgarh, 4. Dorothy Deep Falls, 5. Duchess Falls, 6. Lansdowne Hill, 7. Nilphur springs. Pachmarhi is reached from Pipariya station on the main Central Railway line from Bombay to Jabalpur. From Pipariya, Pachmarhi is 32 miles and the journey can be done by bus or car.

Padmanabhapuram: in Travancore-Cochin, is the ancient capital of the State.

Palitana: in Saurashtra, is famous for its holy hill Shatranjaya (see separate note) and its Jain temples.

Patna: capital of Bihar, stands on the site of the ancient city of Pataliputra.

Poona: In Bombay State has many old palaces and parks and one of the best race courses in India.

Porbander: in Saurashtra, is the birth-place of Mahatma Gandhi and an attractive summer resort.

Prabhas Patan: in Saurashtra, is the site of the famous Somnath Temple, the idol in which was reinstated in May 1951.

Puri: famous for the Jagannath Temple, is a coastal town in the State of Orissa and is the State's summer capital. The car festival when an image of Jagannath is taken in procession in a huge rath is an event of India-wide importance. The temple has a black marble pillar in front and a 24-feet high stone wall all round. There are four entrances. The presiding deities are Krishna, Balaram and their sister Subhadra. One interesting feature of the place is that in the matter of taking the *prasad* no caste distinctions are recognised, a practice unknown elsewhere in the country. A reason given is the influence of Buddhism. Besides the Jagannath Temple other places worth a visit are the monastic establishments (maths). Twenty miles from Puri is Konarak, famous for the Sun Temple.

Rameshwaram: an island to the south-east connected with the mainland by railway across the Palk Straits. It contains the Ramnathswamy Temple believed to be the richest in India. Legend says that the temple was built by Sri Rama himself before voyaging across Ceylon to do battle with the kidnapper of his wife. Rameswaram is thus one of the most famous centres of pilgrimage in the whole country. According to history the temple which took 350 years to complete was built in the 15th century with the help of a Ceylon prince. The temple is typical of Dravidian sculpture and architecture. Off Rameshwaram where the Arabian Sea meets the Indian Ocean is a sacred bathing ghat. *Other places worth a visit:* 1. The tombs of Cain and Abel near the railway station, 2. Noah's Ark on the Dhanuskodi Beach, a funny-shaped stone structure. 3. the other temples of Rameshwaram all of which are noted for their style. Rameshwaram is reached from Pamban Junction on the Madras Dhanuskodi Railway.

Ranchi: hill station and summer capital of Bihar, noted for its picturesque scenery and fine roads.

Ranikhet: in U.P. on the Kumaon Hills. Most mountaineering parties establish their bases at Ranikhet.

Sanchi: small village in Bhopal State, famous for the Buddhist stupa which is the largest and the best preserved in India. The stupa is built with red stone and is about 103 feet in diameter and 42 feet high. The sculpture is remarkable in that there is no anthropomorphic figure of Buddha. Sanchi is on the main Central Railway line between Bombay and Delhi. There is a state-owned dak bungalow at the place where lodging and boarding are available by previous arrangement.

Santiniketan: in West Bengal, is the home of the famous Viswa Bharati, the international university founded by Tagore.

Sasaram: in Bihar is famous for the magnificent tomb of Sher Shah, Emperor of Delhi.

Seringapatam: in Mysore State, is the ancient capital of Tippu Sultan. It has the Sultan's fort, mosque and palaces.

Sevagram: in Madhya Pradesh is the village where Mahatma Gandhi founded his ashram.

Shatrunjaya Hills.—Shatrunjaya, near Palitana in Saurashtra, is also known to the Jains as Siddhagiri or Siddhachala or the Hill of the Perfected Ones. It is the most sacred place (*tirtha*) of Shvetambara Jains. There are a great number of temples in groups on *touks* or summits. The most important one is the *touk* of Adishvara Bhagavan. The ancient image, consecrated by the prophet's son, Batubal, has been replaced. This is perhaps the most holy site within the most sacred precincts of the Shatrunjaya Hills. At this place a large number of saints attained *Nirvana* or absolution. A number of inscriptions have been found here, which have been utilised towards writing the history of Western India and the history of the different schools of Jainism.

Shillong: is the headquarters of the Assam Government. Thirty miles from here is Cherrapunji, the wettest place in the world.

Simla: the summer capital of the Government of India and the Government of the Punjab, it is situated on a spur of the Himalayas at a height of 7,100 feet. Among the recreations of the place are hiking, riding and shooting. The roads are excellent. *Places worth a visit:* 1. President's House, 2. Race Course, 3. Jakko Hill, 4. Observatory Hill, 5. Prospect Hill, and 6. Mashobra, seven miles away. There is a very good road into the interior and hikers to Narkunda, Kotgarh, Rampur and Bushahr can lodge in rest-houses that line the road. There is also a motor bus service on this road and holiday-makers who leave in the morning can be back in Simla by evening. Simla is also well provided with a number of excellent schools. The chief means of conveyance are rickshaws and horses.

Simla is reached from Delhi *via* Kalka on the Delhi-Ambala line. From Kalka there is a mountain railway upto Simla. At Kalka motor cars are available for those who prefer to travel by road, the journey taking 3½ hours. For cheaper travel there are buses which regularly run between Kulka and Simla. All through the scenery is superb, with mountain peaks or luxuriant foliage.

Somnath: see under Prabhas Patan.

Sravanabelgola: in Mysore State, is noted for its Jain temples and the colossal statue of Gomatesvara.

Srirangam: an island on the Cavery, two miles north of Trichinopoly, contains the largest temple in India. The temple is consecrated to Rangannath. Changes were made from the 9th to the 16th centuries and inscriptions of Chola, Pandya, Hoyasala and Vijayanagar are all found on it. The north gopuram is 152 feet high.

Tanjore: in the delta of the Cavery river in Madras State is noted for its temples and palaces. It was the capital of the Cholas under whom it grew in name and fame as a great centre of culture. *Places worth a visit:* 1. the temple of Brihadishvara built by Raja-Raja the great, 2. Naik's Court, 3. Mahratha Court (the two together are often called the Palace in Tanjore), 4. the Bull Nandi. The chief means of conveyance are jutkas and taxis. There are also good dak bungalows. Tanjore is reached from Madras by the Southern Railway.

Travancore (constituent part of Travancore-Cochin Union): the most beautiful and fertile region in all southern India has many charms to offer the traveller within its domains. It has scenery ranging from a countryside of lakes, creeks and canals, to low hills, undulating land, rice fields and forests of cocoanut and areca palms, with a heavy undergrowth of pepper vines and tapioca.

It has also a wonderful highland zone with mountains touching heights of from 5,000 feet to over 8,000 feet, and hills covered with the densest of virgin jungle, the home of great herds of wild elephants and bison, tiger, bear, black panther and wild boar, and where lies the lovely Periyar Lake over which one may cruise in comfort and see wild life in its natural habitat.

Trivandrum, the capital, is accessible by well-kept roads and railway, and is also now connected by air with Bombay, Madras and Colombo, except during the monsoon.

About seven miles south of Trivandrum is Kovalam, a pleasant seaside resort with good facilities for bathing.

Cape Comorin, the Lands End of India, is the southern most point of Travancore where the sunrise and sunset are magnificent sights. It is a sacred spot to Hindus and a place of pilgrimage as the reputed abode of Kanyakumari, the virgin Goddess to whom the temple there is dedicated.

North of Trivandrum is the ancient town of Quilon and to the north of this again, a pleasant trip by boat along delightful backwaters or by car along a good motor road, is the busy seaport of Alleppey.

Trichinopoly: the third largest city in Madras State is situated on the Cavery. It is a very ancient city and was the strategic capital of the Chola and Naik kings. Trichinopoly is also known as the Kashi of the South. It is now a great educational centre. *Places worth a visit:* 1. the Rock and the temple on the Rock, 2. the two huge masses of granite known as the Golden Rock and Fakir Rock, 3. the Jambukeshwar Temple, two miles north of Trichinopoly dedicated to Appulinga or the water-phallus.

Trivandrum: See under Travancore.

Udaipur: in Rajasthan, is a city of lakes with island palaces. Seventy miles from Udaipur is Chittorgarh, the abandoned capital of Mewar famous for its Tower of Victory.

Ujjain: in Madhya Bharat, is one of the seven cities sacred to the Hindus.

CONNEMARA HOTEL: Binny's Road.

MAHABLESHWAR

FREDERIC'S HOTEL: Poona-Mewar Road; RACE VIEW HOTEL: Cassum Sajan Hill.

MATHERAN

LORD'S HOTEL: Mahatma Gandhi Road; RUGBY HOTEL: Vithalrao Kotwal Road.

MOUNT ABU

MOUNT VIEW HOTEL.

MUSSOORIE

CHARLEVILLE HOTEL; HAKMAN'S GRAND HOTEL: The Mall; SAVOY HOTEL.

MYSORE

CARLTON HOTEL: Dee's Road; HOTEL METROPOLE: Viceroy Road.

NAGPUR

MOUNT HOTEL: Commercial Road, Civil Lines.

NAINITAL

GRAND HOTEL: The Mall; HOTEL METROPOLE: Near Secretariat; ROYAL HOTEL: The Mall.

NASIK

LIBERTY HOTEL: Bombay-Agra Road; GOLF CLUB (Write to District Magistrate).

OOTACAMUND

HOTEL CECIL; SAVOY HOTEL.

PATNA

GRAND HOTEL: Fraser Road.

POONA

NAPIER HOTEL: 10, Moledina Road, Camp; POONA HOTEL: 4, Connaught Road; WELLESLEY HOTEL: 12-A, Connaught Road.

PURI

E. RAILWAY HOTEL: Sea beach.

RANCHI

E. RAILWAY HOTEL: Opposite Railway Station.

SECUNDERABAD

PERCY'S HOTEL: Alexandra Road.

SHILLONG

PINEWOOD HOTEL: Near Government House.

SIMLA

CECIL HOTEL: Grams: "Cecil". Phone Nos. 2073, 3659 and 2419. A cool retreat and a centre of social life—the appointed hotel in India.

CLARKE'S HOTEL: Grams: "Clarkes". Phone Nos. 2971 & 2941. Most central—renowned for its cool surroundings and best cuisine.

SRINAGAR

NEDOU'S HOTEL: Hotel Road.

TRIVANDRUM

MASCOT HOTEL.

UDAIPUR

ANAND BHAWAN STATE GUEST HOUSE & STATE HOTEL: Near Lakshmi Vilas Palace.

DAK BUNGALOWS

Here is a list of Dak Bungalows, Retiring Rooms and Rest Houses, etc. at important tourist centres:

ACHHABAL (Kashmir): Dak bungalow.

AJANTA: State Hotel at Aurangabad. Dak bungalows and a State Guest House at about 3 miles from the Caves.

AJMER: Railway retiring rooms and dak bungalow.

ALLEPPEY (Travancore-Cochin): Dak bungalow.

ALWAR: Dak bungalow.

ALWAYE (Travancore-Cochin): Dak bungalow.

AMRITSAR: Dak bungalow.

BADAMI: Dak bungalow.

BAGH: Inspection bungalow.

BAGHI (Himachal Pradesh): Dak bungalow.

BANIHAL (Kashmir): Dak bungalow.

BARODA: Dak bungalow

BATOT (Kashmir): Dak bungalow.

BELUR: Dak bungalow.

BHARATPUR: Dak bungalow.

BHILSA: Dak bungalow.

BHOPAL: Dak bungalow.

BHUVANESHWAR: Dak bungalow.

BIJAPUR: Dak bungalow.

BUDH GAYA: Dak bungalow at Gaya.

BUNDI: Dak bungalow.

CHAMBA: Dak bungalow.

CHIDAMBARAM: Dak bungalow.

CHITTOR: Dak bungalow and Railway retiring room.

CONJEEVARAM: Dak bungalow.

COOCH BEHAR: Dak bungalow.

DAULATABAD: Dak bungalow. (Railway Hotel at Aurangabad).

DHAR: Dak bungalow.

ELLORA: Dak bungalow and State Guest House. (Railway Hotel at Aurangabad).

ERNAKULAM: Dak bungalow.

HAMPI: Dak bungalow at Hospet (8 miles from Hampi).

IMPHAL: Rest House.

JOG FALLS: Rest House.

JOGINDAR NAGAR (Himachal Pradesh): Dak bungalow.

JUNAGADH: Dak bungalow.

KHAJURAHO: Dak bungalow at Chhattarpur Circuit House at Nowgong and Panna and Rest House at Khajuraho.

KONARAK: Dak bungalow.

KOTAH: Dak bungalow.

KOTTAYAM (Travancore-Cochin): Dak bungalow.

KUD (Kashmir): Dak bungalow.

KULU: Dak bungalow and Rest House.

MADURAI: Retiring room, and Dak bungalow.

MAHABALIPURAM: P.W.D. Inspection bungalow. (Can be visited from Madras).

MANDU: Dak bungalow.

MATHURA: Retiring room and Dak bungalow.

MOUNT ABU: Dak bungalow.

NALANDA: Rest House.

NALDERA (Himachal Pradesh): Rest House.

NARKANDA (Himachal Pradesh): Dak bungalow.

PALITANA: Dak bungalow.

PATHANKOT: Retiring room.

QAZIGUND (Kashmir): Dak bungalow.

QUILON (Travancore-Cochin): Dak bungalow.

RAMESHWARAM: Rest House.

SANCHI: Two dak bungalows.

TANJORE: Dak bungalow and Railway retiring rooms.

TANMARG (Kashmir): Dak bungalow.

TIRUCHIRAPALLI: Railway retiring rooms.

UJJAIN: Dak bungalow.

GENERAL ELECTIONS 1952.*

THE first general elections under the new constitution were really divided into three stages. First, there were the elections to the House of the People and the State Legislative Assemblies. After an interval there took place the elections to the upper Houses, the Council of States at the centre and the Legislative Councils in the States. Finally there were the elections of the President of the Union and the Vice-President.

The elections were thus spread over a period of about six months. They started in October (Oct. 25) 1951 and ended in May, 1952.

Here are a few facts pertaining to the constitution (For details see under Constitution):

President—Elected by the elected members of Parliament and the State Legislative Assemblies.

Vice-President—Elected by members of both Houses of Parliament at a joint session.

Council of States—Elected by elected members of State Legislative Assemblies and Electoral Colleges; some nominated by President.

House of the People—Elected on adult suffrage.

State Legislative Council—Elected partly by members of local bodies, graduates, members of State Assembly, and partly nominated by Governor.

State Legislative Assembly—Elected on adult suffrage.

Here are a few more election facts which give some idea of the scale on which the elections were organized:

Seats:

PARLIAMENT—		
House of the People	.. ..	497
Council of States	.. .. ..	216
STATE ASSEMBLIES (22)	.. ..	3,283
STATE LEGISLATIVE COUNCILS (7)	..	419
ELECTORAL COLLEGES (3)	.. ..	90
		4,505

Legislators:

Directly Elected	.. .. ..	3,772
Indirectly Elected	.. .. ..	546
Nominated	.. .. ..	97
		4,415

Number of Constituencies (including Council constituencies) 3,293

Number of Voters—About 176 millions (nearly half are women).

Average Number of Voters per Seat—House of the People 3,60,000 (in A or B States).

State Assemblies 30,000—73,000 (in A or B States).

Polling Booths—2,25,000 (approximate).

Ballot Boxes—Over 2.3 millions.

Ballot Papers—600 millions.

Staff Engaged on Election Work—5,60,000 (appro.).

Maximum Election Expenses—House of the People (Single-Member Constituency) Rs. 25,000; (Multi-Member Constituency) Rs. 40,000; State Assembly (Single-Member Constituency) Rs. 1,000—Rs. 8,000; (Multi-Member Constituency) Rs. 2,000—Rs. 12,000.

Cost—Rs. 10 crores.

(Cost in Part C States wholly borne by Central Government, in Part A and B States the extra cost of the election was shared half and half between Central and State Governments.)

A list of the parties with the symbols allotted is given below: Congress (two bullocks with a yoke), Communist Party (ears of corn with a sickle), Forward Bloc (Marxist) (standing lion), Forward Bloc (Ruikar group) (human hand), Kishak Mazdoor Praja Party (hut), Hindu Mahasabha (horse and rider), Ram Rajya Parishad (rising sun), Scheduled Castes Federation (elephant), Socialist Party (tree).

Here is a list of other approved symbols: spade and stoker, flaming torch, star, cultivator winnowing grain, lamp, bow and arrow, railway engine, cycle, cart, boat, flower, pitcher, ladder, scales, cock, camel.

Many Part B and C States had never experienced an election before. Everywhere the present elections were different from past elections in the following respects: 1. adult suffrage, 2. no communal electorates, 3. all-India scale of the elections, 4. allotment of symbols to candidates, 5. voting by dropping ballot paper in box, 6. canvassing near polling booths forbidden, 7. no election meeting on day of election or on day previous to election, 8. heavy punishment for attempting to create disturbance at meeting, 9. stamping part of voter's body with indelible ink to prevent voter from voting more than once.

ELECTION COMMISSIONER'S SURVEY

In a general review of the mechanism of the elections Mr. Sukumar Sen, the Election Commissioner made the following observations:

He paid a tribute to the extraordinary enthusiasm and discipline displayed by the electorate and congratulated the State administrations on their able and efficient conduct of the polls.

On the other hand, Mr. Sen admitted that the present delimitation procedure was "too lengthy and cumbersome" and "unscientific in parts" and forecast some modifications for the future.

The fact that the delimitation proposals as well as the electoral rolls were based on the 1941 census figures, which were now completely out of date, was itself a major deficiency which would be remedied by working on the latest census returns. There might also have to be some slight revision in the number of seats allotted to the different State Assemblies.

The electoral rolls would be under constant revision and the unfortunate omission of some 28 lakh women from the rolls this time —mostly in Rajasthan and Bihar—on account of the non-disclosure of their names, would be made good.

In some States, it was particularly noteworthy that more women exercised their franchise than men.

Polling had been very peaceful and in only six polling stations out of a total of 2,25,000 in the entire country, had polling to be adjourned on account of disturbances. Even the crime-graph had shown a marked drop during the period.

Only six election petitions had reached the Commissioner's office till the first week of February, but they expected many more—possibly up to a thousand.

An interesting feature of the elections was that as many as 14 ex-Rulers of princely States had been elected to State Assemblies and two to the House of the People. Seven of these were from Madhya Pradesh, five from Orissa and two from Rajasthan. Six Rulers had been elected on the Congress ticket and seven were officially labelled Independents. Two belonged to the Ram Rajya Parishad and one was a nominee of the Ganatantra Parishad.

In the present General Elections, repolling had so far (first week of February) been ordered in 348 polling stations, 66 for Parliament and 282 for the Assemblies. The total number of adjourned polls, including six due to violence, was 62—33 for Parliament and 29 for Assemblies.

Inconclusive figures up to January 29 showed that candidates who lost their deposits had contributed about Rs. 11 lakhs to the public exchequer.

There were about five candidates for every Assembly or Parliamentary seat on an average, compared to the previous average of three candidates to a seat. This exceeded the expectations of the Election Commission who provided for an average of four candidates per seat.

Paradoxically, villages displayed greater keenness and enthusiasm in these elections than the more "sophisticated" towns. While in villages, polling on the whole reached 60 per cent of the electorate, in towns it was only 40 per cent.

Keenness was most marked amongst the old, infirm, blind and sick persons, almost a hundred per cent of whom in many cases came out to exercise their franchise. The psychological explanation for this, as observed by the Election Commissioner was that these people, frustrated for years, had seized the chance to feel equal with others.

PARTY POSITION

India's first adult suffrage General Elections have passed into history as the world's biggest General Election because: The choosers were 176 million men and women—the World's Largest Electorate; they chose from among 17,000 candidates representing nearly 75 political parties; and the chosen were 3,283 members to fill 22 State Assemblies and 489 seats to the House of the People.

The vast electorate has voted the Congress Party to power with absolute majority in 18 out of 22 States and also at the Centre. The party has also been returned as the biggest single party but short of absolute majority in four State Assemblies.

The General Elections commenced towards the end of October as already mentioned, in the two mountainous sub-districts of the Himalayan State of Himachal Pradesh. The scene then moved over to the coastal State of Travancore-Cochin at the southern tip in November, and slowly worked towards a climax in January when the bulk of voters went to polls.

Of the representatives selected for the 22 State Assemblies, 2,248 were Congressmen, 126 Socialists, 181 came from the Communist Party and its allies, 78 belonged to the Kisan Mazdoor Praja Party, 35 were Jan Sangh nominees, 12 represented the Scheduled Castes Federation and independents numbered 283.

Successful candidates of other parties annexed 237 seats. These included Jharkhand in Bihar (32), Janata in Bihar (11), Lok Sewak Sangh in Bihar (7), Forward Bloc (Marxist) (15), Ganatantra Parishad (32), Krishikar Lok Party (22), Akalis (32), Peasants and Workers' Party (26), Tamilnad Toilers' Party (19), United Socialist Organisation (8), Muslim League (5), Commonweal Party of Madras (6), Travancore Tamilnad Congress (8), and Independent Anti-Merger Group in Coorg (9).

The conduct of these elections during three and half months kept a staff of nearly 5,60,000, some of them specially trained but mostly drawn from teachers, Government servants, employees of local authorities and other public institutions, engaged in manning 2,25,000 polling booths, and then counting over 103.592 million votes in the Assembly elections and over 107.578 millions in the Parliamentary elections.

The polling throughout the country was orderly though to a considerable number of voters, voting was a novel experience. Reports received at the time of polling had indicated that throughout the country voting was denser in rural areas.

* The introductory part of this article is based on P.T.I. surveys, and the tables and lists of members on Election Commission reports.

The density of polling varied from 30 per cent in the mountainous parts of Himachal Pradesh, where communications are difficult to over 70 per cent in the highly literate State of Travancore-Cochin. But in most of the States it was round about 50 per cent.

Congress Party

The Congress Party, voted to power at the Centre and in 18 States, scored its most resounding victories in Uttar Pradesh, the home State of the Prime Minister, and Saurashtra, where it captured 90 per cent of the Assembly seats. In Bombay, Madhya Pradesh, Bhopal and Delhi it secured over 80 per cent of the Assembly seats. In other States its strength varies from 53 per cent to 77 per cent except in Rajasthan, where it succeeded in securing a bare workable majority winning 81 of the 160 seats.

Of the 103.592 million votes cast in Assembly elections, the Congress which won 2,248 of the 3,283 seats it contested, secured 41.96 per cent.

In the four States of Madras, Travancore-Cochin, PEPSU and Orissa, the Party was returned as the largest single party though not in absolute majority. In Orissa, the Party was three short of an absolute majority.

The challenge to the Congress in the southern States of Madras and Travancore-Cochin came from the Communists and their allies and the K.M.P. Party. But in the north-western border State of Rajasthan, formed by the integration of ten former Princely States of Rajputana and in the eastern State of Orissa, enlarged in area in recent years by the merger of 24 former States, the challenge came from the former Rulers, big landlords and allied forces. In PEPSU the main rival of the Congress was the Shiromani Akali Dal, an organisation of the Sikhs, which captured 19 of the 60 seats in the Assembly as against 25 won by the Congress.

In Orissa, the Ganatantra Parishad, led by the Maharaja of Patna, secured 31 seats, its successes being more marked in Balangir and Kalahandi Districts, former State areas, and the Koraput District, comprising former Jaipore State. In Rajasthan jagirdars and former Rulers contesting either as Independents or on the tickets of Jan Sangh, Ram Rajya Parishad and Hindu Mahasabha upset the calculations of the Congress Party and together secured 62 seats.

The Congress which swept the polls in the last Madras elections securing more than 77 per cent of the seats, obtained in the new House just over 40 per cent of the seats polling 34.6 per cent of the total of 19.229 million votes cast. Six of the Ministers, including the Chief Minister, failed to find favour with the electorate in the State which provided some of the biggest election surprises. Leaders of other parties were equally luckless in Madras.

In Travancore-Cochin, the Party obtained just over 40 per cent of 108 Assembly seats with the aid of 35.1 per cent of the total of 3.403 million votes cast.

Communist Party

Next to the Congress the Communist Party and its allies secured the largest number of seats in the Assembly elections. They gained 181 seats out of 587 seats they contested, and its nominees obtained 6.04 per cent of the total votes cast.

The party had notable success in Travancore-Cochin, Madras, Hyderabad and in the Part C State of Tripura on the Burma border. Contesting mostly as Independents, Communists in Travancore-Cochin combined with the Revolutionary Socialist Party and the Kerala Socialist Party to form the United Front of Leftists and secured 32 seats. In the State of Madras, the Communists won 61 seats in the Assembly. In Hyderabad contesting on the ticket of the Peoples' Democratic Front, they annexed 42 seats and in West Bengal 28 seats. In the elections to the Electoral College in Tripura, the small Chief Commissioner's State the Communists and Independents contesting with the support of the party secured an absolute majority gaining 16 of the 30 seats.

The Communist Party failed completely in Bihar, Madhya Pradesh, Madhya Bharat, Rajasthan, Saurashtra and Uttar Pradesh, where it drew completely blank though it had put up in all 110 candidates in these States.

Other Parties

The All-India Socialist Party which contested the largest number of seats after the Congress was generally luckless with the electorate. Of the 1,793 candidates who contested the Assembly elections on the party ticket, only 126 were returned. The Party candidates, however, polled 9.62 per cent of the total votes cast in the Assembly elections. The largest block of the Socialists returned is in Bihar, home State of their leader Mr. Jayaprakash Narayan, where they won 23 of the 264 seats they contested for the 330-member Assembly. The other States where they secured a fair number of returns are Uttar Pradesh (18), Madras (13), Travancore-Cochin (12), Vindhya Pradesh and Hyderabad (11 each), Orissa (10) and Bombay (9).

The worst defeats for the party came from West Bengal, the Punjab and PEPSU, where they failed to secure any seat. In West Bengal, the party had set up 79 candidates, 45 of whom lost their deposits, in the Punjab and PEPSU they had 31 and 17 candidates respectively.

Of other all-India parties in the election field, the Kisan Mazdoor Praja Party of Acharya Kripalani, obtained 78 of the 945 seats they contested. The votes polled by the Party's candidates run to 4.91 per cent of the total votes polled. This party's main successes came from Madras (35), West Bengal (15), and Mysore (8). The returns in Madras were just over 27 per cent. of the 33 seats the Party contested, but its leader, Mr. T. Prakasam, a former Chief Minister of Madras could not get elected to the Assembly. The gains in Bengal were nearly 12 per cent of the seats contested.

The Jan Sangh founded by Dr. Shayma Prasad Mookerjee obtained only 35 seats of the the 732 it contested. The Party got 2.73 per cent. of the total poll. Nine of its successes came from West Bengal and eight from Rajasthan. But the party suffered a complete rout in the Punjab, which was considered one of its strongholds, and none of the 65 candidates it put up could top the polls in any Assembly seat.

The Ram Rajya Parishad and the Hindu Mahasabha fared no better, the Sabha winning 20 of the 206 seats it contested and the Parishad 32 of the 304 it contested. In terms of votes, the Parishad secured 1.17 per cent and the Sabha 0.82 per cent of the total poll.

The Scheduled Castes Federation, which under the leadership of Dr. B. R. Ambedkar, former Law Minister of the Government of India, on its own and in some places in alliance with other parties tried for 73 seats but got just a dozen seats. But it secured 1.63 per cent of the total poll.

The Peasants' and Workers' Party, which obtained 26 seats in Bombay, Hyderabad and Madhya Pradesh, got 1.04 per cent. of the votes while Independents got 20.17 per cent. of the total poll. Other parties, mostly regional, together polled 8.82 per cent. of the total votes. Invalid votes accounted for nearly 1.08 per cent of the total poll.

Two hundred and eighty-seven Independents out of 5,681 who contested have been returned to the 22 State Assemblies, which is the largest number after the Congress Party. The Madras electorate returned the largest number—63, while in Rajasthan Independents returned number 35. Every other State Asembly has among its members a few Independents whose number varies from two in Vindhya Pradesh and Saurashtra to 19 in the Punjab except in Coorg, where none of the 10 independent candidates, who contested two seats, could find favour with the electorate.

UNOPPOSED RETURNS

The names and constituencies of the 57 members returned uncontested are given below:

Assam (3): Harison Momin (ST) (*Baghmara*); Hakim Chandra Rabha (ST) (*Goalpara*); Davidson Bhobora (ST) (Con.) (*Panery*).

Bihar (1): Muhammad Tahir (*Amour*).

Bombay (4): Bhaijibhai Garbadbhai Tadvi (ST) (Con.) (*Chhota Udaypur*); Bhulabhai Dulabhai Tadvi (ST.) (Con.) (*Nasvadi*); Nisarta Virsenghbhai Kanjibhai (ST) (Con.) (*Sehara-Limkhida-East Baria*); Solanki Purshotam Jethabhai (SC) (Con.) (*Prantij-Bayed-Malpur*).

Madhya Pradesh (7): Pritam Kurrey (SC) (*Mandra Garh*); Thakur Parasnath (ST) (*Ambikapur*); Rameshwar Arjun (ST) (Con.) (*Narayanpur*); Rajman (ST) (*Keskal*); Boda Dara (ST) (*Dantewara*); Pilloo Jagru (ST) (*Sukma*); Hirasah (Con.) (*Bijapur*).

Madras (3): A. K. Subbaraya Gounder (Con.) (*Kangayam*); Kankipati Veeranna Padal (ST) (K.L.) (*Golugonda*); V. Srungaram (SC) (*Chittoor*).

Orissa (5): Mudi Naiko (ST) (Con.) (*Nawrangpur*); Arkhita Naik (SC) (Con.) (*Angul-Hindol*); Surendra Singh (SC) (Con.) (*Baripada*); Baidhar Naik (SC) (*Pal-Lahara-K. Nagar*); Jadab Padra (ST) (*Balliguda*).

Punjab (1): Mohammed Yasin Khan (Con.) (*Ferozepur Jhirka*).

West Bengal (1): Debendra Brahma Mandal (ST) (*Alipur-Duars*).

Hyderabad (2): Srimati Shajihan Begum (*Pargi*); Veeraswami (SC) (*Kodangal*).

Madhya Bharat (1): Jeta (ST) (*Sailana*).

Mysore (1): T. Channiah (SC) (*Mulbagal-Srinivasapur*).

PEPSU (1): Ranjit Singh (SC) (*Kandaghat*).

Rajasthan (5): Deenbhandu Bhil (ST) (*Saira*); Laxman Bhil (ST) (*Sarada-Salumber*); Jai Chand (SC) (*Badli Sadri-Kapasin*); Hari Ram (ST) (Con.) (*Bagidora*); Sampat Ram (SC) (*Lachhmangarh-Rajgarh*).

Saurashtra (3): Vankar Hamir Jiva (SC) (Soc.) (*Limbdi-Wadhwan*); Maniar Laloobhai Kishoredas (Con.) (*Talaja-Datha*); Abdullah Hamir Kajedia (*Morvi-Malia*).

Bhopal (1): Keshri Mal Jain (Con.) (*Ichhawar*).

Delhi (1): Bhagat Amin Chand (SC) (Ind.) (*Reading Road*).

Vindhya Pradesh (1): Rilli Chamar (SC) (*Tikamgarh*).

Travancore-Cochin (4): Dr. P. T. Thomas (Con.) (*Vijayapuram*); D. Kesavan Sastri (SC) (Con.) (*Changanacherry*); K. P. Nilakanta Pillai (Soc.) (*Vamanapuram*); N. Cherian (Con.) (*Kallupara*).

Himachal Pradesh (2): Jivnu (SC) (Con.) (*Pachhad*); Partap Singh (SC) (*Renka*).

Kutch (2): Maneklal Nensi (Con.) (*Adhoi*); Hetubha Ravaji (Con.) (*Chachan*).

Manipur (2): Shinam Bijoy (*Jiri*); Susia (All-Manipur National Union) (*Ukhrul*).

Tripura (6): Sudan Chandra Deb Barma (Comm.) (*Agartala-Sadar III*); Aghore Chandra Deb Barma (Comm.) (*Charilam*); Bir Chandra Deb Barma (Ganatantrik Sangha) (*Takarjala*); Pyari Mohan Jang (Con.) (*Dumbarnagar*); Garu Meah (Con.) (*Birganj*); Kala Mia (Con.) (*Sonamura North*).

19718

PRESIDENT AND VICE-PRESIDENT

Dr. Rajendra Prasad was elected President on May 6. The election started on May 2, and the results were declared on May 6. Dr. Prasad was sworn in as President on May 13.

The votes polled by the candidates for the Presidentship were as follows: Dr. Rajendra Prasad 2,896; Prof. K. T. Shah 561; Mr. L. G. Thatte 13; Mr. Hari Ram 11; Mr. K. K. Chatterji 5; total valid votes cast 3,486; invalid votes 73. The total electorate was 4,057.

In order to secure as large a degree of uniformity as possible in the scale of representation of the different States in the Presidential election, the Constitution lays down a formula for assigning weights to the votes cast by individual members on the basis of the populations of the States they represent.

Each vote cast by any one of the 699 members of Parliament has, under this formula, to be multiplied by 494, while the 3,358 votes cast by members of the State Legislatures have to be multiplied by different weights ranging from 145 and 104 in the case of Madras and Bombay respectively, to 31 for Delhi and seven in respect of Coorg.

With the assignment of these values, Dr. Rajendra Prasad secured 507,400 votes out of a possible total of 690,557. The votes secured by the other candidates were as follows: Prof. K. T. Shah 92,827; Mr. Thatte 2,672; Mr. Hari Ram 1,954; and Mr. Chatterji 537. The number of invalid votes was 10,527.

Five hundred and thirty-nine out of the 699 members of Parliament voted for Dr. Prasad and 83 for Prof. Shah.

A State-wise analysis of voting shows that Dr. Prasad secured a majority of votes in all the States. Only in one State, PEPSU, was the voting equally divided between Dr. Prasad and Prof. K. T. Shah, both receiving 26 votes each.

In Madras, Dr. Prasad secured 197 votes against 141 cast for Prof. Shah. In Travancore-Cochin, the corresponding figures are 55 and 36, in Hyderabad 96 and 48, in West Bengal 149 and 47, in Orissa 68 and 46, in Bombay 266 and 24 and in Delhi 40 and 3.

All the 62 votes in Kashmir and the entire 22 votes in Coorg were cast in favour of Dr. Prasad.

Two detenus voted by postal ballot.

The results declared are on the basis of first preference votes, as Dr. Prasad secured an absolute majority at the first count.

Dr. Sarvapalli Radhakrishnan was elected Vice-President without a contest on April 26, as he was the only candidate. He was sworn in as Vice-President on May 13.

The new Government of India Cabinet was also sworn in on the same day.

So far as the actual composition of the present House of the People is concerned the analysis is as follows: The members of the House represent 49.4 per cent of the total votes cast in the elections. The remaining 50.6 per cent of the votes were polled by the unsuccessful candidates.

The Congress Party members in the House obtained 36.1 per cent of the total votes cast, while all other parties and Independents put together got 13.3 per cent.

The Independent members of the House with 4,089,020 votes come second, obtaining 3.9 per cent. The Communist Party members with 2,934,009 votes come third with 2.8 per cent.

The figures for the other parties and the percentages of total votes are: Socialists: 1,087,313 votes and 1.0 per cent; K.M.P.P.: 969,976 votes and 0.9 per cent; Akali: 699,964 votes and 0.7 per cent; S.C.F.: 368,603 votes and 0.4 per cent; R.S.P.L.: 302,891 votes and 0.3 per cent; Jan Sangh: 268,979 and 0.2 per cent; H.M.S.: 260,341 votes and 0.2 per cent; K.L.P.: 176,395 votes and 0.2 per cent; R.A.P.: 145,257 votes and 0.1 per cent. Other parties: 2,795,577 votes and 2.6 per cent.

HOUSE OF THE PEOPLE ELECTION

The Congress Party secured an overall majority of 235 over other parties and independents in the House of the People.

Parliamentary elections, which commenced simultaneously with Assembly and Electoral college elections in 26 of the States forming the Indian Union, were held for 489 seats, and of these Congress has claimed 362.

The Communists and allied parties won 23 seats, Socialists 12, K.M.P.P. 9, Jan Sangh 3, Hindu Mahasabha 4, Ram Rajya Parishad 3, Peasants and Workers' Party 1, Scheduled Castes' Federation 2, Ganatantra Parishad 5 and Independents 41.

Of the remaining seats, the Jharkhand of Bihar, led by Mr. Jaipal Singh, M.P., won 3, Lok Sewak Sangh, another organisation from Bihar 2, Akali Dal 2, Tamilnad Toilers' Party of Madras 4, Commonweal Party of Madras 3, the Revolutionary Socialist Party 2, the Krishikar Lok Party of Prof. N. G. Ranga, the Forward Bloc and the Muslim League have one member each in the House of the People.

The Indian Electorate chose its 489 representatives from among 1,800 candidates. Actual contests were, however, only for 479 seats, ten members—seven Congressmen, two Independents and one K.M.P.P. candidate—having been returned unopposed to the House. The total number of votes cast in the elections to the 479 seats ran to over 10.598 millions of which nearly 205,200 or 1.0 per cent had to be rejected as invalid.

A striking feature of the elections has been the defeat of some of the top men of all political parties, including the Congress, as also that of some well-known unattached Parliamentarians.

Besides the Congress President, Mr. Nehru, the only other head of an all-India political organisation who was successful was Dr. Shyama Prasad Mookerjee, President of the Jan Sangh.

The list of "casualties" included Mr. Asoka Mehta, General Secretary of the Socialist Party and Mrs. Kamaladevi Chattopadhyaya, another prominent Socialist leader, Dr. B. R. Ambedkar, former Law Minister of the Government of India and leader of the Scheduled Castes' Federation, Prof. N. G. Ranga, President of the Krishikar Lok Party, Acharya Kripalani, Chief of the K.M.P.P., Mr. S. A. Dange, Communist leader from Bombay, Dr. N. B. Khare, President of the All-India Hindu Mahasabha, Mrs. Prabhavati Raje, President of the Ram Rajya Parishad, Mr. K. M. Jedhe, leader of the Peasants and Workers' Party.

Among prominent Congressmen who lost in the elections were Mr. K. Santhanam, Minister of State for Railways, who has since been appointed Lieutenant-Governor of Vindhya Pradesh, Mr. M. Thirumal Rao, Deputy Minister for Food and Mr. Raj Bahadur, Deputy Minister for Communications. The first two lost to Communists in Madras, while Mr. Raj Bahadur was defeated by an Independent in Rajasthan. All other members of the then Central Government—all the eleven members of the Cabinet, four Ministers of State and six Deputy Ministers who contested the elections—have been returned to the House. Outside the Ministerial fold a notable Congress defeat was that of Mr. Khandubhai Desai, President of the I.N.T.U.C. who lost to an Independent in Bombay State.

Two of the women members from the Congress side who do not sit in the new House are Mrs. Durgabai and Mrs. Renuka Ray.

Among candidates who contested as Independents, the outstanding defeats were those of Pandit Hirday Nath Kunzru, an elder member of the present Parliament and Mr. H. V. Kamath.

Dr. Shyama Prasad Mookerjee was elected from one of the constituencies in Calcutta City, his home town, while Mr. Nehru was elected from his home district of Allahabad. The Congress President polled 233,571 or roughly 64 per cent of the votes cast for the general seat in his constituency. But the highest poll recorded in Parliamentary elections was 309,162 votes obtained by the Communist, Mr. Ravi Narayana Reddi, which was about 78·6 per cent of the total votes cast for the general seat in the Nalgonda constituency in Hyderabad.

Among notable newcomers on the Congress ticket were: Mrs. Vijayalaxmi Pandit, former Indian Ambassador to America and Mr. V. V. Giri, former High Commissioner for India in Ceylon.

The new House also includes Mr. Harindranath Chattopadhyaya, poet, and Dr. Meghnad Saha, a scientist, who was the only successful nominee of the United Socialist Organisation.

The 362 Congress successes came from the 477 seats the Party contested, and the party candidates polled 44.4 per cent of the total poll in the elections.

The Party strength was composed of 291 members from 9 Part A States, 56 from Part B States and 1 from Part C States. The Party had cent per cent success in Saurashtra where it won all the 60 seats and from Kutch where it got all the three seats. The Congress scored heavily in seven other States—Uttar Pradesh, where it won 81 of the 86 seats, the Punjab 16 out of 18, Bombay 40 out of 45, Assam 11 out of 12, Madhya Bharat 9 out of 11, Mysore 10 out of 11 and Madhya Pradesh 27 out of 29.

Its main reverses came from Madras where it secured only 35 of the 75 seats, from Travancore-Cochin where it won only half of 12 seats, from Rajasthan where only nine Congressmen were returned and eleven seats lost, and from PEPSU which voted for only two Congressmen though the Party made a bid for all the five seats. In the border State of Tripura, Congressmen lost both the House of the People seats to Communists.

The Socialist Party, which contested the largest number of seats next to the Congress—namely 254—secured only a dozen seats. Its candidates polled nearly 10.23 per cent of the total votes. From the nine Part A States which filled in 302 seats, the party won only nine, while from the seven Part B States its only success came from Hyderabad. The other two successes were recorded in Part C States.

The Party drew blank in West Bengal, Madhya Pradesh, Rajasthan, the Punjab, Travancore-Cochin, Bombay and Madhya Bharat where it had put up in all 81 candidates.

The Communists and their allies form the largest single opposition block in the House with their 23 members. Seventy of them contested the elections and polled 5.44 per cent of the total votes cast, and just as in the Assembly elections, their success came mainly from Madras, Travancore-Cochin, West Bengal, Hyderabad and Tripura, which together returned 23 members.

The K.M.P.P. which made a bid for 146 seats won only 9 seats. Its nominees scored 5.26 per cent of the total votes cast. Only three of the 93 Jan Sangh candidates were successful, the party nominees obtaining 2.98 per cent of the total poll. The Hindu Mahasabha successes were four out of 31 seats it contested, and the Ram Rajya Parishad won three of the 62 contested. In terms of votes Hindu Mahasabha nominees accounted for 0.91 per cent of the votes and the R.R.P. 1.8 per cent.

The All-India Scheduled Castes Federation was successful in only two of the 34 constituencies where it put up its candidates. They obtained 2.20 per cent of the total votes. The party's general secretary, Mr. P. N. Rajbhoj, as also Mr. S. S. More, General Secretary of the All-India Peasants and Workers Party, who contested from the same double member constituency in Sholapur in Bombay State were successful. The 16 candidates of the Peasants and Workers Party of whom two were elected, obtained 0.98 per cent of the total poll.

524 Independent candidates who contested the elections had 14.43 per cent of the votes cast in their favour but only 41 of them were returned to the House. Fifteen of these successful candidates came from Madras, six from Rajasthan, three from Bombay, and two each from Madhya Pradesh and Orissa.

The number of candidates put up by other parties in the field was 166 of whom 24 were successful. Between them these 166 candidates obtained 6.30 per cent of the total poll.

The following table describes the general position:

Parties	Valid votes polled	Percentage to total valid votes polled	Seats Won
Congress	47,528,911	44·85	362
Socialist	11,126,344	10·50	12

11. Khedut Sangh Lok Paksh	28	28	1	4	—	—	—	1	1	—	1	1	—	210,484	9
12. Peasants' and Workers' Party	87	87	2	6	—	—	—	14	—	1	14	—	1	705,858	31
13. Joint Front of Communist Party of India, left Socialist group and Kisan Kamgar Paksha	9	9	—	—	—	—	—	—	—	—	—	—	—	63,026	3
14. Independents	425	211	7	9	—	—	—	18	1	—	18	1	—	1,924,331	326
Total	1,243	—	—	—	4	1	3	311	26	26	315	27	29	11,123,388	543

The final party position is: Congress: 269 (including four unopposed returns), Workers' and Peasants' Party: 14; Socialist: 9; Kisan Kamgar Paksh: 3; Khedut Sangh-Lok Paksh: 1; Scheduled Castes Federation: 1; Communists and Joint Front: 0 and Independents: 18.

The Congress has won 85.6 per cent. of the seats on a poll of less than 50 per cent. of the total votes cast. Of the 269 successful Congress candidates 161 won by an absolute majority. The successful Congress candidates include the Ruler of Phaltan and the Rani of Akalkot.

The Socialist contested 181 seats, and won 9, polling 11.7 per cent. of the total votes cast. Two of the successful Socialist candidates won by an absolute majority.

The Workers' and Peasants' Party contested 87 and won 14 seats. The Party's poll was 6.7 per cent. and six of its 14 successful candidates won by an absolute majority.

Agrawal, Kashinath Mannalal (*Elected by Assembly*); Ambekar, G. D. (*Nominated*); Barfivala, Chunilal Damodar (*Bombay City, Local Authorities*); Belawadi, Gavishiddappa Shidlappa (*Elected by Assembly*); Benadikar, Sadashiv Laxman (*Elected by Assembly*); Bhat, Atmaram Raoji (*Elected by Assembly*); Bhatewara, Maneklal Amolakchand (*Nasik, Local Authorities*); Bhatt, Premshanker Keshavram (*Surat, Local Authorities*); Bhatt, Santprasad Ranchhodlal (*Elected by Assembly*); Bhave, Ramchandra Narayan (*North Satara, Local Authorities*); Chinai, Pannalal Maneklal (*Elected by Assembly*); Colaco, Dr. Joseph Altino (*Elected by Assembly*); Daboo, Dinshawji Ratanji (*Elected by Assembly*); Dahanukar, Shantaram Mahadeo (*Elected by Assembly*); Dalal, Bejonji Aderji (*Bombay City, Local Authorities*); Desai, Shrimati Lilavati Harilal (*Elected by Assembly*);

The Kamgar Kisan Paksh—a splinter group of the Workers' and Peasants' Party—contested 39 seats and won three on a poll of 2.2 per cent. One of the Party's candidates won by an absolute majority.

The Khedut Sangh-Lok Paksh contested 28 seats out of which it won only one with a poll of 3.4 per cent.

The Scheduled Castes Federation contested 37, including 12 General seats, and won only one. Its total poll was 4.6 per cent. The successful Federation candidate won by an absolute majority.

The Communists and Joint Front secured none of the 24 seats they contested and polled less than 2 per cent. of the total votes cast.

The Independents numbered 425, out of whom only 18 including a Ruler, were successful. The Independents polled 15.7 per cent. of the total votes cast.

The Kisan Mazdoor Praja Party, the Ram Rajya Parishad, the Hindu Mahasabha, the Jan Sangh and the Forward Bloc had in all 109 candidates, all of whom were defeated. The poll of all these Parties together was 4.9 per cent.

Of the 56 Reserved seats—29 for Scheduled Tribes and 27 for Scheduled Castes—4 went, one each, to the Scheduled Castes Federation, the Workers' and Peasants' Party, the Lok Paksh and an Independent. The remaining seats were secured by the Congress.

The largest majority of over 32,000 was secured by two candidates, an Independent over his Congress rival and a Congressman over his Lok Paksh opponent. The narrowest majority of 19 was obtained by a Socialist candidate over his Congress rival.

There were in all 1,243 candidates—an average of four per seat—and 543 of them, *i. e.*, about 40 per cent. lost their security deposits. There

* Santal Parganas Janata Party set up 43 candidates, won 11 seats, polled 332,085 votes, forfeited 22 deposits. Jharkhand Party set up 53 candidates, won 32 seats, polled 766,332 votes, forfeited 5 deposits. Kisan Sabha set up 21 candidates, did not win any seats, polled 81,518 votes, forfeited 15 deposits. Lok Sewak Sangh set up 12 candidates, won 7 seats, polled 148,923 votes, forfeited one deposit. Adibasi Mahasabha set up 2 candidates, did not win any seats, polled 1,654 votes, forfeited 2 deposits. Ganatantra Parishad set up one candidate, won one seat, polled 14,237 votes, did not forfeit any deposit.

The Congress has 243 seats in the Bihar Legislative Assembly out of a total of 330. The Socialist Party has barely 23, while the Jharkhand Party is the largest single opposition party with 32 seats. The other parties are : the Ram Rajya Parishad—1 ; the Lok Sewak Sangh—7 ; the Forward Bloc Marxist Group—1 ; the Ganatantra Parishad—1 ; the Chota Nagpur and Santhal Parganas Janata Party—11 ; and Independents—13.

Of 79 members elected to reserved seats, 43 are Congressmen, three Socialists, 27 of the Jharkhand Party, three of the Lok Sewak Sangh, two of the Janata Party, and one Independent.

There are 14 women elected, including one Scheduled Caste candidate, and 24 Muslims elected on the Congress ticket and one Independent.

Two Ministers out of nine were defeated and one, Dr. Syed Mahmud, has been returned to Parliament.

In all, 1,583 candidates contested the elections and the number of seats contested by the various parties was as follows: Congress—321, Socialists—265, Jan Sangh—49, Janata—43, K.M.P.P.—97, Communists—24, Ram Rajya Parishad—28, Forward Bloc—34, Lok Sewak Sangh—12, Hindu Mahasabha—5, United Kisan Sabha—21, Jharkhand—53. The number of Independents who contested the elections including the Ganatantra Parishad, was 619.

* Tamilnad Toilers' Party set up 31 candidates, won 19 seats, polled 783,346 votes, forfeited 4 deposits. Commonweal Party set up 12 candidates, won 6 seats, polled 195,598 votes, forfeited one deposit. Justice Party set up 9 candidates, won one seat, polled 82,231 votes, forfeited 4 deposits. Republican Party set up 6 candidates, did not win any seats, polled 48,233 votes, forfeited 2 deposits. Madras Muslim League set up 12 candidates, won 5 seats, polled 181,950 votes, forfeited 3 deposits.

The Congress Party has 152 seats in the 375-member Assembly, or 36 short of an absolute majority.

The next biggest Party is the Communist Party with 62 seats and after it the K.M.P.P. with 35. The rest of the House is made up of : Socialist 13, Krishikar Lok 15, Independents 62, Justice Party 1, Forward Bloc 3, Commonweal Party 6, Tamilnad Toilers' Party 19, S.C.F. 2 and Muslim League 5.

The Congress, which swept the polls in the last elections securing more than 77 per cent. of the seats, has now secured just over 40 per cent. of the seats in the present enlarged House. It has, however, emerged as the largest single party with 152 seats. The Party polled 34.6 per cent. of a total of 19,974,801 votes cast in the State out of an electorate of 26,958,006.

The Communists, the second largest single Party, which has obtained 62 seats, polled 12 per cent. of the total votes.

A striking feature of the elections was the defeat of several prominent leaders not only of the Congress but of all Parties.

A region-wise analysis of election returns shows that Congress captured 82 per cent. of the seats from South Kanara, 50.5 per cent. from Tamilnad, 26.7 per cent. from Andhra and 13.8 per cent. from Malabar.

Communist Returns

The Communists had their best returns in Andhra, particularly in Guntur and Krishna bordering the Telengana area, which till recently was the scene of Communist activities. They captured 27.5 per cent. of the total seats from Andhra, 24.1 per cent. from Malabar, 6.8 per cent from Tamilnad and none from South Kanara. The Party's nominees including Mr. Anandan Nambiyar, Mr. Nagi Reddi and Mr. P. Ramamurthi secured notable victories over prominent leaders.

Andhra also returned the largest number of K.M.P.P. candidates. Of 35 seats secured by the Party, 20 were from this area. The Party obtained 10.1 per cent. of the total votes polled in the State.

Tamilnad returned 7 K.M.P.P. candidates, Malabar 6 and South Kanara 2.

The K.M.P. Party secured maximum support from Malabar where it won 20.7 per cent of the seats in the region. The Party obtained 18.2 per cent. in South Kanara, 13.4 per cent. in Andhra and 3.7 per cent in Tamilnad.

Socialists have for the first time, entered the Madras Assembly with 13 of its nominees led by Dr. K. B. Menon who was elected from a Malabar constituency. Next to the Congress, the Socialists contested the largest number of seats but secured only 13 with the support of 6.7 per cent. of the total votes polled.

Socialists had their best returns in Malabar where they secured 13.8 per cent. of the seats. They got 4.2 per cent in Andhra and 1.6 per cent in Tamilnad, and nothing in South Kanara.

The Krishikar Lok Party of Mr. N. G. Ranga had all its 15 wins including the two unopposed returns in Andhra where alone it set up candidates. It polled a little less than 3 per cent of votes cast in the State.

The Forward Bloc and the Scheduled Castes Federation contested six and 38 seats respectively. The former won three and the latter two They together polled 2 per cent. of the total votes cast.

The Forward Bloc leader Mr. U. Muthuramalinga Thevar, won both the Parliamentary and Assemby seats which he contested.

Mr. P. T. Rajan, Leader of the Justice Party which was in power during the diarchy rule, will be the spokesman of the Party in the State Assembly.

The Moplah-dominated areas of Malabar District returned five Muslim Leaguers to the State Assembly and one to the House of the People. They got less than one per cent. of the total votes polled.

were straight contests only for 56 seats. The average poll per constituency was 66.5 per cent., the highest in any one constituency being 92 per cent. and the lowest 32 per cent. The average poll per elected candidate was a little over 50 per cent. of the total votes cast.

BOMBAY LEGISLATIVE ASSEMBLY

Speaker: D. K. Kunte.

Dy. Speaker: S. R. Kanthi.

The Hindu Mahasabha, the Jan Sangh and the Ram Rajya Parishad had together contested 14 seats drew blank.

Among the State Parties, the Tamilnad Toilers' Party and the Commonweal Party, recently formed with the avowed object of safeguarding the interests of backward classes, secured 19 and 6 seats respectively from Tamilnad region. They together polled 5.7 per cent. of the votes cast.

Independents, about 670 of whom contested 302 seats, obtained 23.4 per cent. of the total votes polled. They won 62 seats in all. About 500 of them lost deposits. Mr. Sivashanmugham Pillai, Speaker of the Assembly, and the Raja of Chettinad, Mr. M. A. Muthiah Chettiar, an Opposition Leader in the sitting House, were among the prominent Independents re-elected to the Assembly. Congress did not set up candidates to oppose them.

Excluding the three unopposed returns, the remaining 372 seats in the State Assembly were contested by about 1,700 candidates, an average of four for a constituency.

The ruling party of the State, the Congress, has been returned to power very much reduced in strength solely on the ground of its being the largest single party in the 140-member State Assembly.

The Ganatantra Parishad will be the main Opposition party in the Assembly with its strength of 31. The Leftists, Socialists and Communists have obtained ten and seven seats respectively in the Assembly.

Among the four of the Independent People's Party are two leading figures, Pandit Nilakant Das and Pandit Godavarish Misra.

The election showed the hold of the Ganatantra Parishad under the leadership of the Maharaja of Patna in the Bolangir district where it captured all the nine seats to the Assembly and the two seats to the House of People. In Kalahandi district neighbouring Bolangir it obtained four out of the seven seats. The Parishad upset the

Congress Party's calculations by capturing seven out of eleven seats in Koraput district.

Out of 28 Scheduled Tribe seats in the Assembly, 11 have gone to the Ganatantra Parishad and 12 to Congress. The Socialists have two Scheduled Tribe members, the Communists one and only two were returned on an Independent ticket.

The Congress could not obtain a single seat out of five in Keonjhar district. In Phulbani district they secured one out of the four seats. The only district where Congress obtained full support is Balasore in which it captured 11 out of the 12 seats. The twelfth seat has gone to a dissident Congressman.

The great success achieved by ex-rulers and zamindars or members of their families is a feature of the elections. In all there are fifteen of them, four belonging to the Congress Party, three to the Ganatantra Parishad and the rest were returned as Independents. In almost all the 15 constituencies, they obtained over-whelming majorities. This is stated to be mainly owing to the personalities, who hitherto having remained secluded and unapproachable to the masses, went to the electorate personally, some ably assisted by their wives, and met the electorate in their huts in the villages. This approach touched the sentiment of the people.

Out of the 140 seats, 50 belong to the former States' areas. Only 14 of these 50 seats went in favour of the Congress and 21 to the Ganatantra Parishad. The Ganatantra Parishad, in fact, has its main strength drawn from the States' areas. Another feature of its composition is that the Scheduled Tribe and Scheduled Caste members are in a majority with 16 out of its total strength of 31.

* Punjab Zamindara League put up 32 candidates, won 2 seats, polled 383,126 votes, forfeited 5 deposits. Lal Communist Party put up 18 candidates, won 2 seats, polled 94,992 votes, forfeited 11 deposits. Depressed Classes League put up 17 candidates, did not win any seats, polled 75,078 votes, forfeited 13 deposits. Bharat Lok Congress put up 8 candidates, did not win any seats, polled 11,398 votes, forfeited 8 deposits.

The elections in the Punjab provided many surprises, of which the major one was the exit of Dr. Gopichand Bhargava, the dominant figure in the State's turbulent politics since partition in 1947.

Another surprise was the failure of the Jan Sangh with 68 candidates to secure a single seat in the State, where it took its first organisational shape and where it was considered to be very strong.

The elections also marked the total eclipse of the Socialist Party, the Scheduled Castes Federation and the Depressed Classes League, a provincial party led by the former Punjab Minister, Mr. Prithvi Singh Azad.

Elections were held for 125 seats as one seat had been won by the Congress earlier without opposition. There were in all 837 candidates contesting on 17 different party tickets and as Independents. Of these, 550 lost their deposits. Polling was 74 per cent.

The Congress, which contested all but three seats, got 38.25 per cent. of the 4,974,234 votes polled in the State Assembly elections. Only four of its candidates forfeited their deposits.

The Independents contested 116 seats and polled 20.18 per cent. of the votes, but secured not more than four seats.

The Akalis, who with their slogan of a Punjabi-speaking province once looked formidable, captured only 14 of the 62 seats contested. They secured 13.3 per cent. of the votes polled. Nineteen Akalis lost their deposits.

Their leader, Sardar Umrao Singh, lost to the State Congress chief, Sardar Pratap Singh Kairon, from an Amritsar constituency on the Indo-Pakistani border by a margin of over 1,000 votes.

Reds Win 5 Seats

Of the 68 candidates put up by the Socialist Party 61 lost their deposits. The party got 4.2 per cent. of the votes.

With only .5 per cent. more votes, the Communists won four seats with 17 forfeitures. Their candidates numbered 32. Three of their successful candidates are detenus and the fourth is on parole.

The other leftists were the Lal Communists and the Forward Bloc, who got two seats each with 18 and 36 candidates, respectively.

The United Democratic Front contested four seats, the Progressive Bloc two and the Bolshevik Party one, but they were unable to secure a single seat.

The Forward Bloc got 1.43 per cent. of the votes. Thirty-two of its candidates forfeited their deposits. The other leftists combined polled 1.1 per cent. of the votes.

The Jan Sangh had put up 68 candidates for the State legislature, 45 of whom forfeited their deposits. The party polled 5.33 per cent. of the votes.

The Zamindara League got two seats of the 32 contested. Its leaders, Chaudhri Suraj Mal and Chaudhri Tika Ram, the last-mentioned of whom was Revenue Minister in undivided Punjab, however, lost in the fight. The League secured 7.74 per cent. of the votes cast.

The All-India Scheduled Castes Federation suffered 22 forfeitures. Its 30 candidates polled 2.6 per cent. of the votes.

The Depressed Classes League had set up 17 candidates. It suffered 13 forfeitures and polled .9 per cent. of the votes.

Other parties in the field were the Refugee Board and the Krishikar Lok Party which had put up one candidate each. Their combined votes formed only .22 per cent. of the total cast.

Congress seceders and the Socialists did not do well, while Independents did not fare any better.

The parties wedded to the extreme Right—the Jan Sangh, the Hindu Mahasabha, the Ram Rajya Parishad and the U.P. Rajya Party (zamindars)—also were trounced and the Communists and the K.M.P.P. completely routed.

The defeat of Acharya Narendra Dev, the Socialist leader, and Mr. Triloki Singh of the Opposition in the former Assembly, was the biggest surprise of the elections.

The Congress, which contested 429 seats for the 430-member State Legislative Assembly (the nomination paper of its candidate for the remaining one seat having been rejected), got 49 per cent. of the votes polled and secured 390 seats, that is, over 91 per cent. of the seats.

Of the 39 seats conceded by the Congress, 19 went to the Socialists, who had set up 351 candidates and secured 11·71 per cent. of the votes cast; two went to the Jan Sangh, which had 209 candidates in the field and secured 6.5 per cent. of the votes; one went to the K.M.P.P., which had set up 264 candidates and secured five per cent. of the votes; one to the Hindu Mahasabha, which had 62 candidates and secured 1.2 per cent. of the votes; two to the U.P. Praja Party (the state Party of zamindars), which had 58 candidates and got 2.1 per cent. of the votes; one to the U.P. Revolutionary Socialist Party which had 27 candidates and polled less than one per cent. of the votes; and 14 seats to Independent candidates, 989 of whom entered the contest and secured 19.5 per cent. of the total votes cast.

Among the Independents were 282 dissident Congressmen, who sought election in defiance of their Party's mandate, but none of them could secure the verdict of the electorate in his favour.

The Communists, with 43 candidates, the Revolutionary Socialist Party (official group) with 25 candidates, the Bolsheviks with two, the Forward Bloc (Ruikar Group) with one, the Scheduled Castes Federation with 82 and the Ram Rajya Parishad with 95 candidates in the contest, did not get a single seat, though, among themselves, they polled five per cent. of the votes cast.

Although handicapped by the absence of their leader, Acharya Narendra Dev, and their sitting M.L.A., Raja Ram Shastri, both of whom lost after a tough fight the Socialists will form the main opposition in the Assembly. They will have the satisfaction of having defeated the State I.N.T.U.C. Chief, Mr. K. N. Pande, who was the only prominent Congressman to lose.

Uttar Pradesh is probably the only State which has returned all the present Ministers, Parliamentary Secretaries and other prominent Congress leaders with a thumping majority.

The Himalayan districts did not vote solidly with the Congress. Of the 16 seats which these districts have, three went to Independents and

* Is now a member of the Central Cabinet.

two to the Socialists. Economically, these districts are some of the poorest and, socially, among the most backward. All the three seats in the Tehri Garhwal District went to independents.

All the Muslim candidates set up by the Congress were returned to the Assembly, including two women candidates. None of the Muslims set up by Opposition parties, except Mr. Nihaluddin (Socialist), sitting M.L.A., and Raja Saadaat Ali Khan of Nanpara (Independent) succeeded.

Only 37 women entered the contest, though they form 47 per cent. of the electorate. Eleven of them all Congress nominees, including one from a reserved seat, got elected.

An appreciable portion of the total election expenses in Uttar Pradesh is expected to be realised from the deposits forfeited, amounting roughly to over Rs. 3,50,000.

UTTAR PRADESH LEGISLATIVE ASSEMBLY

Speaker : A. G. Kher.

Dy. Speaker : Har Govind.

HYDERABAD ASSEMBLY ELECTIONS

Population : 18,652,964.

Electorate : 9,035,497.

Seats : 175 (31 for SC, 2 for ST).

The Congress has emerged as the largest single Party in the Hyderabad State Assembly with an absolute majority over all other.

The Party has 93 seats, eleven more than the combined strength of other political Parties and Independents.

The People's Democratic Front (Communists) comes next with 42.

Ten Muslims have been returned to the Assembly. Of these eight belong to the Congress Party, one to the P.D.F. and one is an Independent. The 175-member House will have eight women, five of them being Congress, 1 P.D.F., 1 S.C.F. and 1 Independent.

Eighteen of the seats reserved for the Scheduled Castes have been captured by the Congress, 2 by the Socialists, 5 by the S.C.F. and 6 by the P.D.F.

The Congress contested all the seats except two and annexed 93, including four unopposed returns. It suffered some major reverses at the hands of the People's Democratic Front (Communists) in Telengana, Peasants and Workers (pro-Communists) in Marathwada and Independents (Rebel Congressmen) in Karnatak regions.

In Telegana, which consists of the eight "disturbed" districts of the State, out of the 93 seats it contested, the Congress won only 38. It lost all the 14 seats in Nalgonda to the Communists and annexed only 2 each in Karimnagar and Warangal. Six prominent Congressmen, including the two General Secretaries of the Congress, were defeated. Two prominent Nationalist Muslims who stood on Congress ticket were also defeated.

Fifty-eight per cent of the over 90 lakhs of voters exercised their franchise. The Congress polled roughly 41 per cent. of the total votes polled. Six Congress candidates forfeited their deposits.

The Socialist party won eleven of the 99 seats it contested. Fifty-five of their candidates lost their deposits. Almost all the prominent members of the party, including Mr. Mahadev Singh and Mr. Y. S. Rao were defeated.

The People's Democratic Front (Communists) which is a coalition of four Leftist Parties concentrated its attention on Telengana which it claimed as its stronghold. It set up 77 candidates of whom 42 came out successful.

The Front is the second largest Party in the Assembly. It obtained 10,82,553 votes, about 21 per cent. of the total polled. Some of the heaviest polling in the State was witnessed in the villages of Telegana, Mr. Ravi Narayan Reddy's home village Bellapalli heading the list with 95 per cent.

The Peasants' and Workers' Party, who follow the Marxian ideology and which is expected to support the P.D.F. in the Assembly annexed ten out of the 19 seats it contested in Marathwada. Its candidates obtained 2,12,934 votes, about four per cent of the total polled. Three of its candidates lost their deposits.

The Scheduled Castes Federation won five out of 22 seats. Its chief, Mr. J. H. Subbiah, who stood for the House of the People from Ibrahimpatnam for the General Seat was defeated by a Congressman. The Federation contested three general seats to the State Assembly and lost all of them. The Federation polled 2,45,379 votes, about five per cent of the total polled. Nine of its candidates forfeited their deposits.

One hundred and forty-eight Independents contested 100 seats and secured only 14. The P.D.F. claims to have supported four of them. Six others are former Congressmen. The Independents polled 8,17,686 votes, about 16 per cent. of the total polled. Eighty-seven of them forfeited their deposits.

The Hindu Mahasabha, the United Scheduled Castes Federation, the Depressed Classes' Association, the State Praja Party and the Republican Party contested three, two, five, six and one seat respectively and annexed none.

10. Independents	200	92	8	—	—	38	1	38	1	1,169,552	121
Total	441	—	—	4	1	104	10	108	11	3,394,668	181

The final party position in a House of 108 is: Congress 43 (including three returned unopposed); Left Front 32; Socialist 11 (including one returned unopposed); Independent 11; Travancore-Tamil Nad Congress 8; and Cochin Party one.

The Congress, which has won 40.7 per cent of the total number of seats polled 35.3 per cent of the total votes cast. Of the 108 seats it set up candidates for 104 and won 40 per cent of them. Only about 34 per cent of the successful candidates polled 50 per cent or more of the votes cast. The average number of votes per candidate and the average number per elected candidate were 11,696 and 15,108, respectively. The party had candidates for 10 of the 11 reserved seats for the Scheduled Castes and annexed six of them.

The Left Front (Communist, Kerala Socialist Party and Revolutionary Socialist Party) won 29.6 per cent of the total seats on a poll of 21.4 per cent of the total votes cast. It contested 58 seats and won 55.1 per cent of them. Fifty per cent of the successful candidates won by an absolute majority. The average number of votes per candidate and the average number per elected candidate were 12,491 and 15,388, respectively.

The Socialists won 11.1 per cent of the total seats on a poll of 14.1 per cent of the total votes cast. The party won 16 per cent of the 70 contested seats and the average number of votes per candidate and the average per elected candidate were 6,807 and 15,673, respectively. Thirty-six per cent of the elected candidates won by an absolute majority. The party won two of the six reserved seats which it contested.

Independents proper numbered 158. They won 10.1 per cent. of the total seats and their poll was 18.3 per cent. of the total votes cast. On an average, an Independent polled 3,913 votes, the average number per elected candidate being 13,142. Twenty-seven per cent. of the elected candidates won by an absolute majority.

The Travancore-Tamil Nad Congress won 7.4 per cent. of the total seats and its poll was 5.9 per cent. of the total votes cast. It won 53.3 per cent. of the 15 seats it contested. Fifty per cent. of the elected candidates won by an absolute majority. The average number of votes per candidate was 13,421 and the average per elected candidate was 17,600. The party contested three reserved seats and annexed one.

The Cochin Party had 12 candidates and its only successful nominee was from a reserved seat. The party polled 2.9 per cent. of the total votes cast.

There was an aggregate of 20 candidates set up by the Republican Praja Party, the Tamil Nad Congress, the Tamil Nad People's Front and the Independent South Party. All of them were defeated and their total poll was 2.8 per cent. of the total votes cast.

Of the total of 441 candidates 181 lost their deposits, a percentage of 42.6. There was a straight fight only in 12 constituencies and in others the number of candidates ranged from three to ten. The largest majority of about 25,000 was scored by a Left Front candidate over a Congressman and the narrowest of 140 was won by an Independent over a Left Front candidate.

Only in two contituencies was the poll less than 50 per cent. The poll in one constituency was 88 per cent. and in 58 constituencies the poll was more than 70 per cent. The average poll for all the constituencies was 80 per cent.

SOME IMPORTANT REPORTS

NATIONAL PLANNING COMMISSION REPORT

The National Planning Commission was appointed in March 1950 under the Chairmanship of the Prime Minister, Mr. Nehru. It presented an outline report on July 9, 1951. Original members of the Commission (each in charge of a 'division') : Mr. Gulzarilal Nanda, Deputy Chairman (Employment and Social Services); Mr. Chintaman Deshmukh (Resources, Economic Survey and Finances); Mr. G. L. Mehta (Industry, Trade and Communications); Mr. R. K. Patil (Food and Agriculture); and Mr. V. T. Krishnamachari (Natural Resources); Secretary, Mr. N. Raghavan Pillai, and the Deputy Secretary, Mr. Tarlok Singh.

As stated above the draft report now published is merely an outline of the Five-Year Plan* and "is intended to be a document for the widest possible discussion", which will not be finalised before the Commission has been able to study public reactions to the proposals contained therein.

The Commission expected to take two months to prepare detailed plans for the public sector, working plans on individual industries and cottage industries and the programme of implementation of agricultural targets.

The final plan would probably be ready by the end of August, 1951.†

BRIEF SUMMARY

The draft programme involves an outlay of Rs. 1,493 crores, envisaging a rate of development expenditure 10 per cent. higher than that estimated for 1950-51.

The first part of the Five-Year Plan which is to be financed out of the internal resources of the country should, the Commission recommends, be implemented at all costs.

It is designed to restore the pre-war availability of essential consumer goods by the end of 1955-56 to a population expected to increase by 26 millions during the same period.

The second part of the Plan involves a further expenditure of Rs. 300 crores which if expended will allow a higher rate of development. But it is wholly dependent on the availability of external aid. Given such aid the grand total of expenditure visualised amounts to Rs. 1,793 crores.

Priorities.—An order of priorities has been laid down. First, the completion of programmes already under way including the rehabilitation of displaced persons. Next the increased production of food and agriculture largely through increased irrigation and then the enlargement of employment opportunities and the development of welfare services.

The Commission has also indicated the framework within which the Plan is to be accomplished —a Centrally-directed economy in which the State plays an active role and there is close co-ordination between the public and private sectors.

The price policy for the next few years, it is suggested, 'should be to prevent a further rise in prices until they can be brought down by increased production and to maintain the parities between section prices such as those of food grains and commercial crops so as to provide the right measure of incentive for producers in these lines.

Meanwhile, any upward movement in wages which would be reflected in the cost of production should be avoided in the present circumstances. The Commission opines that in any economy "organised for planned production and distribution, aiming at the realisation of social justice and welfare of the masses, strikes and lock-outs have no place."

The adverse repercussions of decontrol in 1947-48 and the existence of a large black market are cited as warning against any hasty measures of partial or complete decontrol.

The Commission states that in recent years there has been too large an area within which policy has been weak or in doubt and in consequence of which administration has been ineffective. Various proposals for improvement in public administration are reviewed the objectives being greater integrity, greater efficiency and greater response to the needs of the public.

Targets.—The targets to be achieved over different sectors of the economy during the next five years are as follows :—

Irrigation and Power.—The total cost of projects included in the first part of the Plan is Rs. 729 crores of which Rs. 138 crores has already been spent. The projects are calcted to irrigate an additional area of 8.7 million acres by 1956 and to provide additional power amounting to 1.1 million kW.

Agriculture.—To make as much available in 1956 as was available in 1950, allowing an anticipated increase in population of about 26 millions, the individual targets of additional agricultural production are : food 7.2 million tons; jute 2 million bales; and cotton 1.2 million bales.

India's food problem according to the Commission is not a temporary disequilibrium between supply and demand. It, therefore, urges that during the next few years an annual import of food grains of about 3 million tons should be planned. It recommends monopoly procurement and urban rationing and a food reserve of at least a million tons in order to meet emergencies and to influence prices.

Transport.—The railway programme is primarily one of rehabilitation so as to bring about a degree of operative efficiency comparable with pre-war standards. Expenditure to this end is placed at Rs. 350 crores including Rs. 150 crores to cover the depreciation of assets over the next five years.

Industry.—The private sector is to be held in harness and brought into line with the public sector by Development Councils, the administrative and technical staff of which will be provided by Government.

The objective put before private industry is to meet the demands for industrial products on account of agricultural and irrigation development schemes, largely by securing a fuller utilisation of existing capacity. The Commission also lays stress on the necessity for expanding the capacity of industries producing iron and steel, heavy chemicals and other products of basic importance.

The estimated outlay over five years for financing expansion of industries and for making up arrears in replacement of machinery is Rs. 250-300 crores.

Small-scale and Cottage Industries.—In view of the prevailing scarcity of capital, the need for relieving middle class unemployment and the desirability of decentralisation of industry the Commission underlines the importance of developing small-scale industries linked to large-scale industry through common production programmes. Similarly cottage industries have been assigned a central place in the programme of rural development. The Commission has examined different methods of assisting cottage industries including the possibility of small cesses on the corresponding large-scale industries. The stores purchase policy of Government is also recommended as a medium of incentive for cottage industries.

Housing.—The Commission has worked out a scheme for financing industrial houses on the basis of contributions from workers, employers and the State. The target is 125,000 subsidized houses for industrial workers.

Rehabilitation.—The Plan provides for an expenditure on rehabilitation of Rs. 79 crores over three years which, the Commission says, should not be viewed in isolation, but as part of a much larger programme of development which is calculated to help in the rehabilitation of displaced persons.

Social Services.—A total expenditure of Rs. 253 crores has been budgetted including Rs. 123 crores for education, Rs. 84 crores for health, Rs. 23 crores for housing, Rs. 7 crores for labour and labour welfare and Rs. 18 crores for expenditure for the amelioration of backward classes.

Population Policy.—"While it may be difficult to say what the optimum level of population for India should be and while it would also be wrong to underrate the potentialities of modern science and techniques to augment the productive capacity of the country, it is clear that under present conditions an increase in man-power 'resources' does not strengthen the economy but in fact weakens it." The Commission recommends the provision of facilities for sterilisation and for giving advice on contraception.

Agrarian Policy.—The main solution to the problem of Indian agriculture according to the Commission lies in the direction of co-operative cultivation. The ultimate objective is stated to be the establishment of co-operative village management under which the area of the village becomes the unit of land management and all the land of the village is regarded as a single farm. But more immediately the Commission proposes the setting up of village production councils, co-operative farming societies and registered farms formed out of amalgamations of holdings above a prescribed level.

FINANCE

The possible adverse effect on the capital market through any material increase in direct taxation at this stage is pointed out. The Commission calls for stringent measures to prevent the leakage of revenue through tax evasion. But since correcting inequalities of income is only part of the larger problem of reducing inequalities of wealth, the early enactment of legislation for introducing Death Duties is recommended.

A preference for corporate savings over private savings is indicated as the better alternative for maintaining capital formation at the desired level in future.

The States are asked to finance their development plans through enhanced land tax, estate duties, a wider coverage of sales-tax, betterment levies and taxes on entertainment and motor vehicles.

The Sources of Finance.—The resources available to the Centre are placed at Rs. 641 crores which includes Rs. 211 crores of assistance given to the States. The net resources available for the development expenditure of the States (including Central assistance) is placed at Rs. 691 crores. The total long-term borrowing, envisaged and included in the above estimates is of the order of Rs. 115 crores.

This still leaves a gap of Rs. 372 crores over 5 years in the first part of the Plan. But taking credit for Rs. 82 crores on account of the food loan from the United States and through aid offered by Canada and Australia under the Colombo Plan this gap is reduced to Rs. 290 crores. In the absence of external aid to meet this deficit the Commission recommends resort to deficit financing, part of the strain of which could be diminished by drawing on our sterling balances.

The grand total of external assistance required, therefore, is Rs. 590 crores, but less than half this sum may be met through deficit financing whereas the remaining Rs. 300 crores included in the second part of the Plan is granted no such concession.

*Now converted into Six-Year Plan. See end of report. † The final plan was not ready at the time of writing (1952 September).

Sources of Finance

The internal resources for financing the first part of the Five-Year Plan amounting to Rs. 1,493 crores are expected to be found from the following sources:

Centre	Rs. (Crores)
1. Surplus on revenue account	130
2. Resources normally set apart in the revenue account for development expenditure under civil aviation, broadcasting, education, etc., for grants to States for GMF and development, for rehabilitation of displaced persons, etc.	118
3. Resources available from capital account for development:	
(a) public loans	35
(b) small savings and unfunded debt.	250
(c) others	78
4. Resources available for railway development out of the ordinary revenues of the railways	30
5. Total resources available to the Centre	641
6. Assistance to States assumed in the preparation of their plans	211
7. Resources available for the development expenditure of the Centre	430
8. Surplus on revenue account	81
9. Resources normally set apart in the revenue account for schemes of expansion under social services, agriculture, irrigation, electricity, roads, etc.	275
10. Resources available from capital account for development:	
(a) public loans	79
(b) others	45
11. Assistance from the Centre assumed in the preparation of the plans of States	211
12. Resources available for the development expenditure of the States	691

NEW VERSION (SIX YEARS)

On March 31, 1952, Mr. C. D. Deshmukh, Finance Minister said that the Five-Year Plan would be converted into a Six-Year Plan to bring it in line with the Colombo Plan.

The outlay would increase from Rs. 1,793 crores to over Rs. 2,300 crores.

This only meant, the Finance Minister said, that development programmes which were to be left over for the first year of the second Five-Year Plan would now be brought within the scope of the present plan.

Although the outlay would be bigger, external assistance contemplated would remain at Rs. 672 crores for the two parts of the plan and would bear a smaller proportion to the amount to be raised from internal resources. "We shall thus be more self-reliant," Mr. Deshmukh said.

Because of the addition of a sixth year to the plan, expenditure would increase by about Rs. 360 crores, which is one-fifth of the expenditure at present estimated.

Certain accounting changes to be made, Mr. Deshmukh added, would swell both the assets and expenditure. For instance, expenditure on current depreciation of railways had not been included in the Five-Year Plan but would be shown in the final plan. In the five-year period this was estimated at Rs. 150 crores and another Rs. 30 crores would have to be added to it for the sixth year.

It envisages large increases in targets especially in respect of irrigation and power.

As against the original Plan's target of three million tons the increase in food grains in the revised Plan envisages 7,202,000 tons increase in the yield of food grains.

Again nearly three times as much additional land is to be irrigated in the first year both in the additional acreage to be irrigated and the power generating capacity to be installed.

In addition to the increase in the irrigated area on account of major projects it is expected that minor irrigation works consisting of restoration of tanks, construction of wells and repairs to small canals will benefit by another seven million acres.

A further four million acres will be restored to cultivation from fallow lands and one and half million acres reclaimed by the Central Tractor Organisation.

TARGETS

The revised targets do not, however, include benefits from irrigation and power schemes which may be selected for inclusion in the still undecided segment of 3,600 million in the revised Six-Year Plan.

The revised programme places relatively less emphasis than before on expansion of their agricultural production; the target for increase in the growth of cotton has been altered from 195,000 tons to 214,000 tons, of jute from 375,000 to 368,000 tons, and of oil seeds from 150,000 tons to 375,000 tons.

The revised Plan is now estimated to cost Rs. 23,336 million out of which a greater portion, Rs. 15,510 million is expected to be met from domestic sources.

Agriculture and irrigation claim Rs. 3,984·1 million as against Rs. 3,574·1 million in the original plans.

Multipurposes projects—irrigation and power have now been allotted Rs. 2,284·1 million as against the original Rs. 2,505·5 million.

Transport and communications claim Rs. 6,515·4 million as against Rs. 7,027·4 million. Fuel and power have been given Rs. 1,443·4 million as against Rs. 575·9 million provided in the original Plan. Mining and industry claim Rs. 1,239·9 million as against Rs. 1,799·8 million. Miscellaneous projects are allotted Rs. 4,269·8 million as against Rs. 2,912·7 million.

An amount of Rs. 3,600 million has been provided for schemes the optimum deployment of which is still being determined by the Planning Commission in the light of the availability of external assistance.

The total effect of the revised Six-Year Plan may be estimated as an increase of roughly ten per cent in the gross national product. The estimated level of 104,000 million (1950-51) gross national product may be expected to reach around 115,000 million at current prices by 1956-57. Notwithstanding the increase to be expected in India's population *per capita* real income is expected thus to be slightly increased.

Part of the increase in the revised estimates is explained by the inclusion of various minor schemes not covered in the original Plan which are being financed from current revenues.

A part is made possible by the fresh measures to raise domestic resources such as betterment levies and water rates, wider coverage and better administration of the sales tax, raising of many minor taxes on entertainment, motor vehicles and so on.

It has also been estimated that small savings will yield annually a net sum of Rs. 400 million or Rs. 2,400 million over six years and that Central and State Governments will together be able to raise some Rs. 1,370 million in loans in the same period.

The domestic resources of Rs. 15,510 million will be composed broadly of revenue surplus and receipts from fresh sources, Rs. 10,000 million; small savings (net) Rs. 2,400 million; loans raised by the Centre and States Rs. 1,370 million; and receipts of public authorities, Rs. 10,740 million.

In terms of September, 1951 prices the public investment programme during 1952-53 is estimated at Rs. 4,100 million against which Rs. 1,720 million can be expected to be available to the public authorities.

The foreign exchange required to implement the Plan is not likely to exceed Rs.300-350 crores.

The Five-Year Plan represents an advance over the Six-Year Plan prepared by the Commission last year at short notice for incorporation in the Colombo Plan. On a comparable basis the outlay contemplated in the present plan over five years is about Rs. 100 crores more than the outlay over six years in the Colombo Plan.

SUMMARY IN FULL

The distribution of expenditure in the first part of the Five-Year Plan, which has been worked out in detail is shown broadly in Table I.

In the first part of the Plan, the priorities are (1) completing of programmes in hand, including rehabilitation of displaced persons; (2) increasing the production of food and raw materials over a relatively short period; (3) implementing schemes essential for developing material and technical resources and enlarging the scope for employment; (4) consolidating progress already made in social services and providing for gradual expansion; and (5) providing for more adequate administrative and social services and a more rapid rate of development in the less developed States.

Agriculture.—The principal emphasis in the Plan is on agriculture and irrigation. This is explained by the serious view which the Commission takes of the country's food problem. To make as much available in 1956 as was available in 1950, allowing for the anticipated increase in population to the extent of about 26 millions, that is, 13.67 oz. per adult per day, the additional food production required is 6.9 million tons. If the 'per capita' availability is to be raised to 14, 15 or 16 oz. per adult, the additional production required would be 8.2, 12 and 15.8 million tons respectively. These figures indicate the magnitude of the task that lies ahead and of the effort which is called for. The distribution of the targets of additional agricultural production which the Commission has worked out tentatively in consultation with States is given in Table II.

The planned increase in the production of commercial crops may be expected, according to the Commission, in the ordinary course in view of the favourable factors which prevail at present and appear likely to continue. Increase in the production of foodgrains, on the other hand, will require positive measures of assistance to the farmer. According to the Commission's estimates, out of 7.2 million tons of additional production, 2.3 million may come from major irrigation projects, 1.9 million from minor irrigation schemes, 1.5 million from land improvement and reclamation schemes, 0.6 million from manure and fertilizer schemes, 0.4 million from seed distribution schemes, and 0.5 million tons from other schemes.

For the attainment of the objectives of the Plan, the Commission considers an effective price policy to be an indispensable instrument. The first step in this direction is to prevent the prices of commercial crops like jute, cotton and oilseeds from rising further.

Large disparities between the prices of competing crops will come in the way of the fulfilment of the Plan and the desired distribution of resources as between different lines of production. When price incentives are offered which favour certain crops at the expense of others, it is likely that the farmer will respond and there will be some additional production in the lines which are favoured.

Such a policy, is however, inconsistent with the expectation that production of different crops, some stimulated by the price incentives, others retarded, will reach defined levels of production. It is, therefore, of the greatest importance to take steps to maintain an appropriate structure of relative prices as between the main agricultural commodities.

The programme of irrigation and power development, the Commission suggests, has to be viewed in terms of a major long-term objective. This should be, over a period of 15 to 20 years, to double the area under irrigation and to secure additional production of power amounting to 7 million kW. According to the Commission, "it is only by utilising available resources for irrigation and generation of power on this scale, and by the adoption of intensive measures for improving the standard of agricultural production and the promotion of cottage, small-scale and large-scale industries with the help of cheap electric power, that an appreciable rise in the standard of living can be achieved."

Plan for Industry.—Reviewing the industrial development which has taken place in recent years, the Commission sets forth the following main aims for the Five-Year Plan for industry:

(1) meeting the demands for industrial products on account of schemes for agricultural development and expansion of irrigation and power.
(2) fuller utilisation of the existing capacity of producer goods industries like jute, and consumer goods industries like cotton textiles, sugar and soap;
(3) expanding the capacity of industries producing pig iron, steel, heavy chemicals, etc., which are of basic importance to the general economic development of the country;
(4) completion of industrial units on which a part of the capital expenditure has already been incurred;
(5) removing the lacunæ and drawbacks in the existing industries.

With these considerations in view, the Commission has drawn up the five-year programme of development for the main industries in consultation with representatives of the various industries as in Table III.

Local autonomy and devolution of economic power, the Commission suggests, are imperative for off-setting over-centralisation which saps initiative and enterprise.

A number of measures for the development of small-scale industries are suggested by the Commission, for instance establishment of small-scale units at suitable localities for producing steel casting, evolution of small spinning machines for production of yarn and establishment of trading estates at selected centres where cheap power and transport facilities are available.

While small-scale industries are likely to be mainly urban in character for a considerable period, cottage industries are in the main rural in character. Cottage industries have been assigned a central place in the programme of rural development. "It has become necessary for Government," states the Commission, "to assume in relation to cottage and small-scale industries obligations somewhat similar to those it has already assumed in relation to the development of agriculture."

The Central Government should, therefore, equip themselves with an organisation capable of handling various questions of policy, assisting in drawing up common production programmes and co-ordinating the development and use of research. It will be necessary to ensure that the common production programmes afford increasing scope for employment in the rural areas. The cottage industries which appear to offer, in the Commission's view, scope for organising intensive development programmes are: khadi, manufacture of palm gur and gur, the village oil industry, production of neem oil, utilisation of dead cattle, manufacture of hand-made paper, manufacture of woollen blankets, and, in certain areas, hand-pounding of rice, and manufacture of matches. The economic aspects of these cottage industries have been examined and the Commission expects to make detailed proposals in a separate report.

Assistance to Indian shipping, to the extent of Rs. 13 crores is provided for, about 70 per cent. of which is in respect of works, the balance being for technical equipment. The Plan also provides a sum of Rs. 2½ crores during the second part of the planning period, in order to assist air companies in regard to replacement of their fleet.

Priorities for road development are indicated, and a sum of Rs. 23 crores over a period of five years has been provided. As regards road transport, it is suggested that, wherever such services are run by the States, a corporation should be formed.

Finance.—The first part of the Plan involving an expenditure of Rs. 1,493 crores envisages a rate of development expenditure ten per cent. higher than that estimated for 1950-51 which was, in turn, about twice the rate of 1948-49. For both parts of the Plan taken together, which involve a total expenditure of Rs. 1,793 crores over five years, the rate of outlay will be about a third over the level of 1950-51. In the first part of the Five-Year Plan, the total expenditure of the Central Government is Rs. 734 crores and the share of the States is Rs. 759 crores.

The expenditure on the Bhakra-Nangal Project, Damodar Valley, Hirakud and Harike Schemes and a large part of the expenditure on refugee rehabilitation form part of the outlay of State Governments, but they have been shown among the schemes of the Central Government. If allowance is made for these items the share of the States comes to about Rs. 975 crores. The size of the plans of the State Governments included in the first part of the Five-Year Plan is given in Table V.

The surplus of Rs. 81 crores on revenue account in the States over five years is to be secured by raising additional resources of the order of Rs. 213 crores.

The programme for mobilising internal resources for development in the States contemplates increased income from land, estate duties, wider coverage and better administration of sales tax, betterment levies, water rates, certain minor taxes on entertainment and motor vehicles economies in expenditure, and local loans for local projects which do not encroach on normal sources of funds for the capital market. There will still be a gap of Rs. 372 crores over five years in the first part of the Plan.

After taking into account the resources likely to become available through the food loan from the United States and through aid offered under the Colombo Plan by Canada and Australia, there remains the possibility of being compelled to resort to deficit-financing to the extent of about Rs. 290 crores if further external assistance is not available.

Deficit-financing of this order would impose a definite strain on the economy, although, to some extent, this strain could be diminished by drawing on the sterling balances. The releases from these balances, including the unspent balances of 1950-51 which can be carried over, would amount to about Rs. 290 crores over the period.

While emphasising the need for avoiding deficit financing, the Commission suggests that, if faced with the choice between the continuation of the existing difficulties for some time and the abandonment of the rate of development implicit in an outlay of Rs. 1,493 crores over five years, the country will choose the former.

The Commission expresses the view that, if external assistance on a sufficient scale becomes available, it would be possible to implement the first part of the Plan without undue strain and at the same time implement the second part involving an outlay of Rs. 300 crores over five years. With external assistance amounting each year to no more than one or two per cent. of the national income and an effort on the part of the country to develop its own internal resources to the maximum extent, it should be possible to implement in full the entire five-year plan.

Price Policy.—Dealing with the price policy, the Commission lays down the objective to be attained, namely, prevention of further rise and maintenance of the parities between sectional prices so as to provide the right measure of incentive for producers. Maintaining that it may be difficult for Government to follow a strong deflationary fiscal policy and also embark on a large-scale development plan, the Commission stresses the importance of a monetary and banking policy which will curb excessive investment in speculative trade and increase the volume of savings available for productive investment. It also suggests that the existing system of controls should be maintained and improved.

The Commission stresses the need to reduce as far as possible the impact of foreign prices on internal economy and recommends constant adjustments in coverage and rates of levy of export duties.

Financing Industry.—The Plan examines the question of finance both for expansion of industries and for making up arrears in replacements of machinery. It estimates the required outlay at Rs. 250 crores to Rs. 300 crores during the five years. The assistance from the State, provided for in the Five-Year Plan, will help to meet about Rs. 25 crores of the estimated expenditure on schemes of expansion, while assistance from specialised institutions like the Industrial Finance Corporation will help to cover the rest of the Rs. 200 crores under this head. Expenditure on arrears and replacements of machinery is estimated to cost Rs. 125 crores to Rs. 175 crores. Out of this amount, private industries will receive some relief from refunds of the Excess Profits Tax. They can also draw upon their accumulated reserves to some extent. The remaining finance will have to be found by the industries through reducing costs. In this way they will be assisted by the greater availability of raw materials at home, expected as a result of the Plan.

Discussing the subject of foreign capital for the development of Indian industries, the Plan welcomes the free flow of foreign capital, particularly because it would ensure the supply of capital goods and technical knowledge and make it possible to utilise foreign patented processes. But it suggests that foreign investments should take the form of equity capital.

The Commission suggests that adequate measures should be taken to prevent large investments in the share of other concerns under the managing agency system to obtain control in their management. These measures are recommended even pending the report of the Company Law Committee.

Food and Agriculture.—Holding the view that India's food problem is a manifestation of the continually growing pressure of population on food supply, the Commission urges careful and sustained application of relatively long-term measures. It also estimates that during the next few years annual imports of foodgrains will be about three million tons and this should be planned for. "There can be no certainty that even with increase in production the marketable surplus will be large enough to render imports unnecessary," avers the Commission and suggests certain steps to increase such a surplus.

The Commission recommends monopoly procurement and urban rationing as the minimum measures which should prevail in all States and proposes that a reserve of a million tons should be built up to meet emergencies and to influence prices.

Describing the equitable distribution of foodgrains among different sections of the population at reasonable prices as Government's first duty in the economic field, the Commission draws attention to the dangers of a policy of complete or partial decontrol of foodgrains.

After reviewing the land reform legislation in various States, the Plan suggests that agrarian policy has to be conceived so as to strike a balance between three different objectives, namely, maintenance and increase of total production, economic efficiency and social justice. Stating that uneconomic holdings are at the root of all agricultural difficulties, the Commission suggests from measures to secure a substantial increase in the size of the unit of management; but out of them, it rejects nationalisation of land as impracticable and the policy of placing ceilings on individual holdings as beset with difficulties. In the circumstances, the Commission points out that the main solution of Indian agriculture lies in the direction of co-operative cultivation. It recommends co-operative village management as the ultimate objective of reorganisation of agriculture.

Referring to the improvement of the lot of agricultural workers, the Plan recommends immediate application of the Minimum Wages Act in low wage pockets, application of minimum wages on farms above a size to be prescribed, corresponding to the size fixed for registered farms, reference to co-operative consisting of landless workers in the settlement of all newly-reclaimed land and a progressive welfare policy designed to improve the living conditions and social status of the agricultural labourers.

Examining the grow-more-food campaign, the Commission makes detailed proposals for a rural extension service for organised intensive work at village level for groups of about 100 villages with a population of about 5,000 and larger blocks of 50 to 60 villages with a population of 25,000 to 30,000, instead of spreading effort widely over different districts.

Labour.—Adverting to the role of labour in planned economy of the future, it is suggested that there should be a revision of the attitude to the question of restrictions on the right to strike or lock-out in the light of the fact that the country is moving in the direction of an economy organised on planned production and distribution. Various measures are suggested for avoiding disputes and to secure internal settlement, including machinery for joint consultation at all levels. Works Committees are the keystone of the structure of industrial relations. The machinery and procedure relating to arbitration and adjudication of disputes should be so designed as to secure the essence of a fair settlement based on the principles of natural and social justice with the minimum expenditure, money and time without legal technicalities, formalities and appeals.

The Plan recommends the establishment of tripartite machinery for the determination of norms and standards which may govern the settlement of industrial disputes. The establishment of a Central Wages Board is also recommended. The Plan has also suggested improvements of the present system of recruiting and has emphasised the importance of greatly improved and expanded facilities for technical training. The Commission has drawn up a scheme for re-training retrenched employees in consultations with employers and workers so that these employees may be re-absorbed in alternative occupations.

The undertaking of production surveys by the Ministry of Labour with the technical assistance from abroad, if necessary, has also been proposed.

Other proposals are the drawing up of priorities of inspection under the Factory Act, initiation of studies of problems of industrial health and the establishment of a national industrial health museum at a centrally situated industrial centre.

Social Services.—The Plan has worked out a scheme for financing industrial housing on the basis of contributions from workers, employers and the State, and the programme envisages construction of 25,000 subsidised houses every year for industrial workers. The establishment of a national housing board is also recommended for promoting a programme of building throughout the country, co-ordinating research in building construction and undertaking technical and other surveys. A suitable land policy, evolution of less expensive structural designs, promotion of maximum use of local material are urged to reduce housing costs.

The Plan provides for an expenditure on rehabilitation of refugees of Rs. 79 crores over three years, which, the Commission says, should not be viewed in isolation but as part of a much larger programme of development which is calculated to help in the rehabilitation of displaced persons.

The first part of the Plan provides for a total expenditure of Rs. 253 crores on social services. This includes Rs. 123 crores for education, Rs. 7 crores for labour and labour welfare and Rs. 18 crores for expenditure for the amelioration of backward classes, Rs. 23 crores for housing and Rs. 84 crores for health. It is also suggested that there should be a central research organisation for social sciences, whose main function would be to assist in the encouraging, pooling and direction of research work in the social field in various university departments and research institutions.

Holding the view that family planning is a vital step in economy and social planning, the Commission recommends that the State should provide facilities for sterilisation or giving advice on contraception on medical grounds. Such help and advice should not be withheld from others who seek and need it on social and economic grounds; and research and information centres should be organised by the State by means of financial assistance and otherwise.

Periodical Review.—The role of public co-operation in the implementation of the Plan is discussed at length in the Commission's report. The proposal to set up a new organisation for this purpose is discussed at length and the objectives and functions of such an organisation, whose name has been suggested as Bharat Seva Sangh, are outlined in the report.

Dwelling on the role of the Central Government in relation to the National Plan, the report suggests that the administration should ensure that economic conditions necessary for the fulfilment of the Plan are maintained; that it should ensure that the pattern for the utilisation and development of the resources is in accordance with the Plan; that it should make an objective assessment from time to time of the results achieved in its own sector of the Plan and in the States, as also in the private sector; that it should keep under constant review the financial aspects of the Plan and it should make such changes and adjustments in it as may be necessary from time to time.

The Commission discusses proposals to strengthen economic administration in its different aspects.

Pleading for improvement in the administration of controls, the Plan suggests that it should be one of the first tasks of the Centre and the States to improve the working of all controls.

The Plan describes in details the machinery necessary and the manner in which the structure of planning in the public and private sectors should be built up. It emphasises the need for a forum such as a national development council at which from time to time the Prime Minister of India, and the Chief Ministers of States can review the working of the Plan and of its various aspects.

TABLES

The following tables show all aspects of the subject at a glance:

Per Capita Targets

Food	14½ oz.
Cloth	15 yards.
Sugar	8·3 lb.

Digest of Plan

	Rs. Crores

Part "A" States	560
Part "B" States	171
Part "C" States	28
Aid to Kashmir	276
Total foreign exchange budget.. ..	300–350

COLOMBO PLAN

The Colombo Plan for the economic development of South and South-East Asia was inaugurated on July 1, 1951.

For the first year Canada was to offer about Rs. 50 crores and Australia Rs. 5·5 crores.

It may be mentioned that the U.S.A. is a member of the Consultative Committee of the Colombo Plan. Arrangements have also been made to associate the International Bank with the work of the Committee. It may also be mentioned that the American Foreign Aid Bill presented to the U. S. Congress provided for 375 million dollars for Asia and the general expectation was that some part of this amount would go to the Colombo Plan countries. Further, the proceeds of the two million tons of wheat purchased by India as loan from the U.S.A. would also be available for the execution of some of the schemes included under the Colombo Plan. According to one estimate, this amount is likely to be Rs. 80 crores.

After the Planning Commission submitted its report* the Government of India took a final decision regarding the development of schemes for which external financial assistance should be sought either under the Colombo Plan or from the World Bank which had already lent India 78·5 million dollars.

The total outlay of Rs. 1,840 crores covers a programme for the economic development of India embracing agriculture, transport and communications, fuel and power, industry and mining and social capital. The development outlined in the Plan involves an investment of Rs. 307 crores per year, as compared with an estimated recent rate of Rs. 225 crores per annum.

India, according to the estimates prepared by the Government of India, would require Rs. 800 crores from external financial sources out of Rs. 1,840 crores for the execution of the plan.

The internal resources from which about Rs. 1,000 crores is expected to be raised will be taxation, economies in public expenditure and borrowing. The amounts already being spent on development from the revenues of the Central and State Governments together with economies in expenditure are expected to yield approximately Rs. 490 crores, economies in expenditure accounting for Rs. 110 crores of this figure. Subscriptions to public loans are expected to bring about Rs. 40 crores a year.

The utilisation of sterling resources to the extent of £35 millions per year for six years is estimated to provide Rs. 280 crores. The total amount of external finance necessary for the programme, that is about Rs. 800 crores will be exclusive of the utilisation of sterling balances.

In a message to Mr. C. D. Deshmukh at the inauguration of the Plan the then British Chancellor of the Exchequer, Mr. Hugh Gaitskell, said that the U. K. would do her utmost to maintain the flow of capital goods to the Colombo Plan countries of South and South-East Asia.

The message stated, "Much has been done in the past nine months to set the stage and my own confidence in the ultimate success of the Plan remains undiminished. Indeed, I have been heartened by the spirit of continuing co-operation shown despite the difficulties which rearmament and its consequent shortages are causing."

Assuring the Colombo Plan countries of the U. K.'s continuing support, Mr. Gaitskell said: "We have already offered some 30 experts and nearly 150 training awards under the technical co-operation scheme besides offering to supply text books, laboratory equipment, instructional films and other training apparatus. The product of our engineering and other heavy industries are becoming increasingly scarce but we shall do our utmost to maintain the flow of capital goods to the Colombo Plan countries of South and South-East Asia. I wish the Plan and the individual plans contained within it every success."

GROW MORE FOOD CAMPAIGN REPORT

The following are points from the report of the Committee: make the campaign part of wider plan to improve rural life; rename 'grow more food campaign' as 'rural improvement scheme'; utilize non-official leadership; assure floor prices for crops; put greater emphasis on minor irrigation works; allot Rs. 10 crores per year to Food and Agriculture Ministry for granting loans to States so that they may undertake minor irrigation works; a development block formed by one taluka of about 120 villages in charge of Revenue Divisional Officer assisted by technical officers; at the village level a unit of five to ten villagers under one worker; at district level under Collector assisted by technical officers; at State level a Cabinet Committee, Official Committee, Non-official Board to formulate and co-ordinate policy; village panchayats and multi-purpose co-operative societies to enlist non-official aid; Centre's duty to set targets, to give financial and technical assistance, arrange supply of material, periodical assessment of results.

Cost of scheme Rs. 300 per village; Centre should provide Rs. 125; five year grants for block; in tenth year 4 lakh villages will be covered and cost to Centre Rs. 5 crores; more liberal aid to backward and tribal areas, Rs. one crore.

Credit for agricultural operations, long-term and medium-term credit by Centre, short-term eventually by co-operative movement, to start with by Centre and State; subsidies for permanent works to be given to villages or societies not individuals except for wells.

First preference to Community Development Projects under Indo-U.S. Co-operation Programme.

Minor irrigation works important, preference to repair of existing works.

The following are points from the findings: The production of cotton and jute has increased. There are no accurate statistics. Hence the failure of the grow more food campaign cannot be assumed. But the campaign has not yielded the results expected, and has failed to arouse mass enthusiasm.

* The report was submitted on July 9, 1951.

REFUGEES AND REHABILITATION

BELOW we give a few facts and figures.
Displaced persons from West Pakistan 49·05 lakhs, from East Pakistan 25·75 lakhs, total 74·80 lakhs.

Number of displaced families settled on land from West Pakistan 4·67 lakhs, from East Pakistan 3·37 lakhs, total settled 8·04 lakhs.

Rural loans advanced to displaced families from West Pakistan Rs. 7·48 crores, from East Pakistan Rs. 8·45 crores, total Rs. 15·93 crores.

Number of displaced persons from West Pakistan provided with housing through evacuee houses 14·70 lakhs, through new construction 7·50 lakhs, total 22·20 lakhs.

Number of residential units provided for displaced persons from West Pakistan through evacuee houses 1·79 lakhs, new construction by Government 1·14 lakhs, by private parties with Government assistance ·37 lakhs, total 3·3 lakhs.

Displaced persons who secured employment through Employment Exchanges, from West Pakistan 1·60 lakhs, from East Pakistan 0·29 lakhs.

Displaced persons placed in Government service 0·8 lakhs.

Displaced persons given technical or vocational training 0·57 lakhs, under training 0·12 lakhs.

Loans to students from West Pakistan Rs. 0·49 lakhs, to students studying abroad Rs. 0·07 lakhs; expenditure on educational schemes during 1951-52 Rs. 100·0 lakhs.

Number of business and industrial premises provided to displaced persons from West Pakistan through evacuee shops 0·27 lakhs, through industrial premises 0·02 lakhs, through new shops 0·28 lakhs, total 0·57 lakhs.

Number of displaced persons from West Pakistan to whom small loans were sanctioned 1·61 lakhs, amount sanctioned Rs. 10·58 crores, number of recepients 1·56 lakhs, amount paid Rs. 9·95 crores; amount sanctioned to displaced persons from East Pakistan Rs. 4·24 crores; total amount sanctioned Rs. 14·82 crores.

Number of displaced persons to whom loans were sanctioned by the Rehabilitation Finance Administration 0·10 lakhs, amount sanctioned Rs. 8·25 crores, amount paid Rs. 4·17 crores.

Number receiving dole from Government, temporary liability 0·40 lakhs, permanent and semi-permanent liability 0·74 lakhs, Kashmiris in Yole Camp 0·11 lakhs, monthly maintenance allowance paid Rs. 3·23 lakhs, number of recepients 0·16 lakhs.

Total expenditure on displaced persons from 1947-52, Rs. 146·30 crores. This is broken up as follows: establishment Rs. 72·82 lakhs; grants Rs. 6,630·36 lakhs (West Rs. 4,985·83 lakhs, East Rs. 1,644·53 lakhs); loans Rs. 3,341·69 lakhs (West Rs. 2,277·15 lakhs, East Rs. 1,064·54 lakhs); housing Rs. 4,585·61 lakhs (West Rs. 3,816·0 lakhs, East Rs. 769·61 lakhs).

Total grant sanctioned for 1951-52, Rs. 38·31 crores (Rs. 22·53 crores West, 15·78 East).

Total number of claims registered for immovable property abandoned in West Pakistan 5·35 lakhs, property sheets involved 10·30 lakhs, number of claims verified 3·01 lakhs, property sheets involved 6·10 lakhs.

Ten townships planned and executed (number in brackets denotes target population): Faridabad (Punjab) (40,000), Gandhidham (Kutch) (75,000), Rajpura (PEPSU) (15,000), Nilokheri (Punjab) (10,000), Tripuri (PEPSU) (6,000), Sardarnagar (30,000), Ulhasnagar (Bombay) (1,30,000), (Govindpuri, also called Modinagar (U.P.) (30,000), Hastinapur (U.P.) (10,000), Chandigarh (Punjab) (60,000).

Townships planned: Bairagarh (Bhopal) (15,000), Kubernagar (Bombay) (30,000), Partapnagar (Rajasthan) (20,000), Habra Baigachi (West Bengal) (40,000), Fulia (West Bengal) (5,000).

The distribution of displaced persons among the various States is as follows: Assam 277,000; Bihar 79,000; Bombay 341,000; Madhya Pradesh 121,000; Madras 10,000; Orissa 21,000; Punjab 2,468,000; Uttar Pradesh 476,000; West Bengal 2,118,000; Hyderabad 4,000; Madhya Bharat 68,000; Mysore 8,000; PEPSU 380,000; Rajasthan 313,000; Saurashtra 61,000; Ajmer 72,000; Bhopal 18,000; Delhi 510,000; Himachal Pradesh 5,000; Kutch 12,000; Manipur 1,000; Tripura 100,000; Vindhya Pradesh 15,000; Andaman and Nicobar Islands 2,000.

BOMBAY BUDGET—FINAL

(In lakhs of Rupees)

Year	Receipts	Expenditure	Surplus	Deficit
1950-51 (Accounts)	6430.86	6437.18	—	6.32
1951-52 (Revised)	6108.04	6226.39	—	118.35
1952-53 (Estimates)	6753.09	6750.90	2.19	—

The financial results of the modified tax proposals for 1952-53 are summarised below:

1. Additional revenue from changes in Sales Tax law .. .. .. Rs. 250 lakhs.*
2. Surcharge on land revenue† .. .. Rs. 95 lakhs.
3. Increase in motor vehicles tax .. .. Rs. 50 lakhs.
4. Increase in the sales tax on motor spirit .. .. Rs. 75 lakhs.
5. Loss on account of reduction of the rate of the Urban Immovable Property Tax from seven per cent to five per cent in Bombay .. Rs. 20 lakhs.

Total receipts from modified taxes .. .. Rs. 450 lakhs.

Features: surcharge on land revenue†, multiple-point sales tax.

TRAVANCORE-COCHIN BUDGET—FINAL

Revenue Receipts, 1952-53—Rs. 1,685.59 lakhs.
Expenditure—Rs. 1,693.34 lakhs.
Deficit—Rs. 7.75 lakhs.
Features: no fresh taxation.

MADHYA PRADESH BUDGET—FINAL

Revenue Receipts 1952-53—Rs. 2,189.76 lakhs.
Expenditure—Rs. 2,082.41 lakhs.
Surplus—Rs. 107.35 lakhs.

MADRAS BUDGET—FINAL

Revenue Receipts, 1952-53—Rs. 6,176 lakhs.
Expenditure—Rs. 6,534 lakhs.
Deficit—Rs. 358 lakhs.
Features: new taxes to yield Rs. 270 lakhs, final deficit Rs. 89 lakhs.

MYSORE BUDGET—FINAL

Revenue for 1952-53—Rs. 2,001.62 lakhs.
Expenditure—Rs. 2,103.34 lakhs.
Deficit—Rs. 83.95 lakhs.
No fresh taxes.

FOOD

The latest developments about food policy which are to be noted are:

1. Food was decontrolled in Madras State on June 15, 1952. Features of the new set-up are: (1) There is no control as regards price or quantity of rice bought and sold in the free market. (2) The State would be divided into 6 zones, each zone having one or two surplus Districts; within these zones movement of food grains would be free. But inter-zonal movement would not be allowed except through permits. Even so small quantities by head-loads or carts would not be interfered with. (3) The sale of imported wheat and milo would also be free, the sales being effected through wholesale co-operative societies. (4) The Government would keep a reserve of 450,000 tons of rice to meet emergencies. (5) Next year (1953) a reserve of 150,000 tons would be built by an easy levy system in the surplus districts. (6) The Government will also keep a reserve stock of 25,000 tons of wheat and 30,000 tons of milo to meet any emergency. (7) The procurement machinery would be retained against future use. (8) If procurement was restored procurement prices would not be higher than those prevailing when procurement was abandoned.

Madras had at the time 5 lakh tons of grains, and with an additional 2 lakh tons of grains from the Centre it was assumed that this was sufficient to provide the fair price shops for another 18 months.

2. Food was decontrolled in Bihar on June 18, 1952. Features of the new set-up are: (1) The supply of Government food grains will continue to be made through Government rationing and fair price shops. 2. Statutory rationing in Jamshedpur was withdrawn and monopoly procurement from Singhbhum District, and Godda and Sahibganj sub-divisions of Santhal Parganas. (3) The levy on agriculturists of paddy and wheat was withdrawn. (4) Restrictions on movements of food grains were removed except the movement of rice and paddy from the district of Ranchi, Manbhum Sadar sub-division, and the District of Santhal Parganas excluding Godda and Sahibganj sub-divisions.

3. Food was decontrolled in U.P. on July 1, 1952. Features of the new set-up are: (1) Government ration shops will continue to sell the normal quantities of rations at the existing issue price. (2) The austerity and hill provisioning schemes in the scarcity areas will continue. (3) Further procurement of food grains is suspended for the time being though cultivators could still sell their grain to the Government at prescribed rates. (4) Movement outside the State will be banned, but inter-District movement within the State will be permitted. (5) Restrictions on entertainment will continue.

4. Orissa, Mysore and Rajasthan lifted restrictions on inter-District movement.

In general the following measures are adopted among others to keep the private dealer in check. There is a Government order requiring every grain dealer, wholesaler or retailer, to be registered. He should keep an account of the stock he purchased and disposed of and his account book should be open to inspection. Also, whenever the Government finds that in any particular area the prices have risen beyond the means of the ordinary consumer, the Government would have the authority to requisition the stock of the private dealer and distribute it through fair price shops at the procurement price plus a small margin.

The Government of India gave expression to the following views from time to time through the Food Minister:

The country had a food deficiency of about one and three-quarter million tons.

Roughly the northern zone consisting of East Punjab, Uttar Pradesh, PEPSU, Delhi, Rajasthan, Madhya Bharat, Vindhya Pradesh, Madhya Pradesh, Assam, Bihar and Bengal (minus Calcutta) was either surplus in food or just self-sufficient. The southern zone, which included Bombay, was, however, deficit. Bombay's overall food shortage in a year was one million tons.

Madhya Pradesh, Madhya Bharat, Rajasthan, Bihar, U.P. and Punjab were States where rationing had become unnecessary, the open market price was below rationed prices.

* This has now been raised to 400 lakhs.

† This has now been dropped.

Facts and Figures: The following facts and figures were revealed:

If the Five-Year Plan targets were fulfilled the country should be able to achieve self-sufficiency by 1956 on the basis of a per capita ration of 14 ounces a day.

At the beginning of 1952 the stock of food grains held by the Government amounted to 1,337,000. On the basis of the present estimates of off take, procurement, imports, the stock at the end of 1952 would be roughly 2,900,000 tons.

The total amount of subsidy paid to the State Governments for imported food in 1950-51 was Rs. 15.15 crores and in 1951-52 Rs. 15.81 crores. Bombay received the highest Rs. 4.83 crores in 1950-51 and Rs. 4.92 crores in the subsequent year. Subsidy was confined to only 22 industrial cities besides Travancore-Cochin. If the Centre was to give the same amount of subsidy as in 1950 the subsidy in 1952 would amount to Rs. 44 crores plus Rs. 10 crores as loss in connection with loaned wheat. The Government had therefore decided to subsidize the cost of living in industrial towns and a few highly deficit areas like Travancore-Cochin. In general the Government reduced the price of wheat and milo by Rs. 2 and Rs. 1-8-0 per maund respectively.

The withdrawal of food subsidy resulted in an increase in the issue price of rationed food grains in all States except U.P. and Madhya Pradesh where State Governments maintained subsidized price levels.

As a result of the withdrawal of the subsidies prices increased as follows: wheat in Bombay, Poona, Ahmedabad and Sholapur Rs. 7-8-0 per maund; wheat in Delhi Rs. 5; the average increase in the country being about Rs. 7. The rise in the price of coarse rice ranged from Rs. 10 per maund in the four rationed cities of Bombay State and Rs. 11-15-0 in Jamshedpur to Rs 10 in Calcutta and the Asansol area.

For 1952 the surplus areas for rice were Madhya Pradesh, Orissa, Uttar Pradesh, Punjab, PEPSU, Coorg and Vindhya Pradesh. And the amounts they offered for export were as follows: Madhya Pradesh and Orissa 83,000 tons each, Punjab 18,000 tons, Uttar Pradesh 15,000 tons, Coorg 8,000 tons, PEPSU and Vindhya Pradesh 1,000 tons each.

The total amount of wheat received from the U.S.A. under the Loan Agreement was 1,805,500 tons upto June 10, 1952.

CENTRAL COUNCIL OF MINISTERS

On August 11, 1952 new appointments to the Council were announced:

D. P. Karmarkar (*Minister with Cabinet rank, Ministry of Commerce and Industry*), Dr. Punjabrao S. Deshmukh (*Minister with Cabinet rank, Ministry of Food and Agriculture*).

Ten new Deputy Ministers were appointed*: Keshava Deva Malaviya (*Natural Resources and Scientific Research*), Sardar Surjit Singh Majithia (*Defence*), Balwant Nagesh Datar (*Home*), Abid Ali (*Labour*), Manilal Chaturbhai Shah (*Finance*), Jagannathrao Krishnarao Bhonsle (*Rehabilitation*), O. V. Alagesan (*Railways and Transport*), Mrs. Maragatham Chandrasekharan (*Health*), Anil Kumar Chanda (*External Affairs*), M. V. Krishnappa (*Food and Agriculture*), Mr. Malaviya and Mr. Krishnappa were till then Parliamentary Secretaries to the Prime Minister and the Minister for Food and Agriculture, respectively.

The four new Parliamentary Secretaries are: Mrs. Lakshmi N. Menon (*Ministry of External Affairs*), Shahnawaz Khan (*Railway and Transport*), J. N. Hazarika (*to the Prime Minister*), Bali Ram Bhagat (*to the Minister of Finance*).

HEALTH INSURANCE SCHEME

The following facts may be noted:

The number of factories covered by the Employees State Insurance Act, 9,000; workers (less than Rs. 400 a month) covered 2.5 million, among these women workers, 250,000; to start with insurance applicable in Delhi, Kanpur and (from January 1953) in Greater Bombay and Bangalore.

Total income of Corporation from contributions Rs. 11 crores; is likely to handle 2.5 million claims for sickness benefit; 500,000 claims for disablement benefit and about 55,000 claims for maternity benefit; the contribution of the employers will be 1¼ per cent of the total wage bill.

BIRTH RATES

Birth-rate for 1950 was 24.8 per thousand. It has decreased during the last two decades at the average rate of 0.26 and 0.76 per thousand respectively. The decline has affected all the States except Orissa where there has been an increase of 0.2 per thousand. Assam registered the steepest decrease 6.1. Decreases for other States are as follows: West Bengal 4.4; Bihar 4.5; U.P. 3.5; M.P. 4.6; Delhi 2.5; Bombay 1.7; Madras, 1.5; Punjab 0.2.

AMERICAN AID TO INDIA

THE $190 million wheat loan of 1951 and the $54.5 million allotted to India under the Indo-U.S. Technical Co-operation Programme early in 1952 stand out on any reckoning of U.S. aid to India. Other instances, though not so wellknown, are none the less significant in the growing friendship between the two countries.

A regular and organised programme for the exchange of persons between the two countries in order to foster closer relationships in the intellectual field was established in February, 1950, with the signing of the India-U.S. Fulbright Agreement. The agreement is a sequel to the Fulbright Act of the U.S. Congress which provides for the use of U.S. receipts from sales of World War II surplus property abroad for travel grants to foreign students. It provides for the utilisation of the rupee equivalent of up to $400,000 a year towards travelling expenses of Indian students to and from the United States and all expenses of Americans coming to India for study, research and instruction. More than a hundred Indian students are awarded Fulbright travel grants every year.

Another U.S. programme, the Smith-Mundt Act, has the same broad objective. It enables leaders of public opinion, both American and Indian, in fields such as public welfare, labour, the social sciences, and the arts, to visit each other's countries. Under this programme, Indians conduct observations and surveys, exchange information and renew contacts with colleagues and private and governmental organisations and agencies in the United States. Leaders from the United States serve in India as consultants, advisers and lecturers in fields of professional specialisation.

A provision of the India Emergency Food Aid Act sets apart $5,000,000 accruing from the interest payments by India on the food loans for the promotion of cultural interchanges between the two countries. The amount will be used for the exchange of scholars, books and technical equipment for higher education between the United States and India.

This programme can, technically, come into force on December 31, 1952, the date on which India will make the first payment toward interest on the $190 million loan at the rate of 2½ per cent. Principal payments themselves will not begin until June 30, 1957, as provided for in the Act.

India is again a full participant in the U.S. programme of sharing its technical know-how with other countries. Hundreds of Indian experts in various fields visit the United States every year for observation and training in U.S. techniques.

EMERGENCY FOOD AID ACT

The India Emergency Food Aid Act, signed into law by President Truman, June 13, 1951, provided for a U.S. loan to India of up to $190 million for the purchase of approximately two million tons of food grains in the United States to tide over the emergency resulting from a series of natural disasters in India during the previous year.

Soon after the President's signing of the bill into law, India signed an agreement with the U.S. Export-Import Bank setting forth the actual terms of the loan. Under the agreement, the loan of $190 million is to be repaid in 35 years at an interest of 2½ per cent, with no interest due for a year and no principal due for five years.

Under another provision of the India Aid Bill, the Reconstruction Finance Corporation was empowered to advance up to $20 million to re-activate "mothball" (stored) World War II Liberty-type ships for quick transport of the grain to India.

This provision was made necessary because of the acute shortage of merchant shipping at that time. Nearly 100 ships have been reactivated under this provision for speeding the delivery of the loan grain to India.

U.S. grain shipments to India reached a record total of 3,236,000 long tons during the 11 months from July, 1951, to May, 1952, according to the U.S. Department of Agriculture. The total includes both shipments under the India Aid Bill and commercial purchases in the United States by the Government of India. Pre-loan U.S. grain shipments to India under the Government of India's commercial procurement programme totalled 1,629,394 tons during the 12 months ended June 30, 1951.

These U.S. grain shipments have played a large part in averting a threatened famine in India last year (1951). Also, the rupee equivalent earned by the Government of India from the sales of American loan grain in India has come in handy for pushing development projects under India's five-year plan.

In addition to governmental aid, several U.S. relief organisations have sent hundreds of thousands of dollars worth of food and medicines for relief in India. The latest consignment of one million pounds of food voluntarily donated by Americans for relief in India left the United States early in July, 1952. During the period July 9, 1951, to May 12, 1952, private American shipments of food and medical supplies to India totalled 2,894,744 pounds, valued at more than $250,000. In all, 35 individual shipments were made through CARE (Co-operative for American Remittances to Europe and Asia), American Friends Service Committee and Church World Service.

* On September 3, 1952 a new Deputy Minister was appointed: Mr. Jaisukhlal Hathee (*Planning and River Valley Projects*).

TECHNICAL CO-OPERATION PROGRAMME

The main channel of U.S. aid to India is the Technical Co-operation (Point Four) programme. A Point Four General Agreement was signed between India and the United States on December 28, 1950. In the fiscal year ended June 30, 1951, this aid totalled $634,000. Of this amount nearly $400,000 was obligated for agriculture and rural development work. Other types of assistance extended included experts in soil research, agricultural machinery, ground water geology, mineral geology, child welfare, vaccines and locust control. In addition, a Point Four grant of $150,000 was made available to the American Friends Service Committee to undertake a programme of rural improvement.

For the fiscal year ended June 30, 1952, $54.5 million was allocated for aid to India. On January 5, 1952, the United States and India signed an agreement providing for American co-operation under an expanding technical co-operation programme.

Under this agreement, the U.S. Government agreed to make a contribution of $50 million, to be deposited in a fund called the Indo-American Technical Co-operation Fund. The Government of India agreed to contribute in rupees for projects to be financed out of this fund. As finally worked out in subsequent operational agreements, the Indian contribution amounts to Rs. 410,152,000.

The projects financed under the fund are co-ordinated with the Five-Year Plan of the Government of India and are administered in close co-operation with the Central and State Governments. Use of the fund is largely concentrated on projects aimed primarily at raising the efficiency of agriculture and increasing the food production of the country.

The first operational agreement under the Indo-American Technical Co-operation Fund, provided for the utilisation of $10,650,000 for the import of 108,000 tons of fertilizer for an immediate increase in agricultural production of nearly 200,000 tons of food grains. Distribution of the fertilizer is under the general supervision of the Ministry of Food and Agriculture of the Government of India.

The fertilizer import agreement was followed soon afterward by a special agreement to explore possibilities of expansion of the Sindri Fertilizer Factory. Funds for this survey came from general Point Four funds in the United States and not from the $50 million allocation.

A second operational agreement allocated $8,385,000 for importation of 55,000 tons of iron and steel for making agricultural tools and implements. Again, distribution will be under supervision of the Ministry of Food and Agriculture.

A third operational agreement provides for the allocation of $230,000 for aiding India's locust control programme. It is co-ordinated with the international locust control campaign in the Near East and South Asia. In view of its international nature, the U.S. Technical Co-operation Administration has set up a pool of eight spraying planes, equipment and insecticides, with trained aerial crews and supervising experts to work in countries in the area. Under the Indo-American locust control agreement, additional ground control equipment is provided, such as light vehicles, power sprayers and wireless sets.

Another operational agreement allocates $200,000 for determination of soil fertility and fertilizer use in India. The Indian Agricultural Research Institute and State agricultural experiment stations are the immediate beneficiaries under this project, which aims at providing technical assistance and equipment for determining the fertility status of Indian soils, evaluating the performance of fertilizers and development of a soil testing service.

Yet another operational agreement allocates $2,462,000 for expansion and modernisation of India's marine fisheries. The project involves motorisation of small fishing craft with 140 small Diesel engines, dredging of obstructed harbour entrances, and exploratory and experimental fishing with multipurpose fishing boats, tugs acting as "mother craft" for small boats and bull trawlers. Five 20-ton ice and cold storage plants and four 50-ton plants also are to be provided for preservation of fresh fish.

A sum of $13,700,000 has been allocated under another operational agreement for augmenting ground water irrigation by construction of some 2,000 new tube wells. These will be located in the States of Punjab, PEPSU, Uttar Pradesh and Bihar, where conditions are most favourable for this type of water supply. At least 750 of these wells will be located, as far as possible, in community project areas.

Some $166,000 for a village workers' training programme was allocated under another operational agreement. Twenty-five training centres will be set up under the programme, and an estimated 1,800 workers will be trained every six months.

A sum of $8,671,000 has been allocated under an operational agreement for a Community Development Programme, encompassing 55 projects of rural development located in selected areas throughout India.

Each of the proposed 55 community development projects will embrace approximately 300 villages with a population of about 200,000 people and will cover a cultivated area of approximately 150,000 acres of land. The major share of the cost of these projects will be met out of the rupee part of the Indo-U.S. Technical Co-operation Fund, to an estimated total of Rs. 343,834,000.

The last three operational agreements and the dollar allocation for each of them are: river development, $4,784,000; malaria control, $648,000; and forestry research and desert afforestation, $104,000.

A SUMMARY

A summary of projects and the U.S. dollar allocations are:

Community development	..	$ 8,671,000
Fertilizer Imports	..	$ 10,650,000
Tubewells for irrigation	..	$ 13,700,000
Iron and steel imports for agricultural uses	..	$ 8,385,000
River development	..	$ 4,784,000
Fisheries	..	$ 2,462,000
Locust Control	..	$ 230,000
Soil surveys	..	$ 200,000
Village worker training	..	$ 166,000
Forestry research and desert afforestation	..	$ 104,000
Malaria control	..	$ 648,000

All the operational agreements were signed for their respective Governments by Clifford H. Willson, U.S. Director of Technical Co-operation for India, and P.C. Bhattacharyya, joint secretary of the Indian Ministry of Finance.

With the signing of these agreements the United States is giving effective aid in the largest rural development programme undertaken anywhere in the world. The United States will provide some of the technicians and supplies for a co-operative effort in increasing the agricultural production and the standard of living of 12 million Indians in 16,500 villages. About 7,000 Indians will be trained, with the assistance of U.S. technicians, to bring simple but basic improvements in agriculture, health and education to the Indian farmer.

More than three-quarters of the remaining $4.5 million is being used to cover costs of U.S. technical specialists already sent or to be sent to India at the request of the Government of India, including technical equipment needed for their work, and to send Indians to America for training. As on May 16, 1952, 57 U.S. specialists were working in India under the Technical Co-operation programme, 26 of them agricultural experts of the county agent type. More than 200 Indians were being selected for training in the United States.

OTHER PRIVATE AID

Large American philanthropic organisations, such as the Ford Foundation, have also extended their programmes to India. In December, 1951, the Ford Foundation appropriated $1,000,000 to assist in organising 15 village development projects and setting up five training centres. In April, 1952, the Ford Foundation approved another grant of $1,873,485 to cover current expenses of organising and operating 25 additional training centres under the Indo-American community development programme.

The Rockefeller Foundation is also operating projects in India, in the field of medicine and public health, as well as a fellowship programme.

The Watumull Foundation has a substantial programme for India in the fields of education and population control.

Also, a total of 669 comparatively minor projects have been undertaken by U.S. mission groups in India in the fields of education, medicine, social services, industrial training and agriculture.

COMMUNITY DEVELOPMENT PROJECTS

COMMUNITY development projects are to be put through in a quarter of India's villages in the course of the next six years. For 1952-53 it is proposed to put through 55 projects which are now being blue-printed, work on which is expected to start in September 1952. They will cover about 16,000 villages with a total population of 12 million and a land area of 15 million acres.

The purpose of a community project is to serve as a pilot in the establishment for the men, women and children covered by the project area of the right to live, food receiving the primary emphasis in the initial stages. The realisation of this objective is through the co-operative endeavour of the people themselves, assisted by active State assistance.

Thus, under a community project, while leadership and finance is provided by the State, its fruition can only be assured if active popular support comes in the requisite degree.

The estimated cost of each project is about Rs. 70 lakhs. If we assume that about 350 projects in all will be necessary to cover a quarter of India's villages the total expenditure will amount to Rs. 250 crores. It is expected that at least half of this outlay will be financed from internal resources. Part will come from funds under American technical aid and also from the Ford Foundation.

The work on the project will be undertaken in close collaboration with both Central and State Government agencies, more especially the Departments of Agriculture, Education, Health and Irrigation.

The Planning Commission is the Central Committee for the whole project. It will lay down broad principles and provide general supervision.

In this work the Commission will be assisted by an Advisory Board consisting of Mr. Vishnu Sahay, Secretary, Ministry of Food and Agriculture, Mr. K. R. K. Menon, Secretary, Ministry of Finance, Mr. A. N. Khosla, Additional Secretary, Ministry of Natural Resources and Scientific Research, Mr. P. C. Bhattacharya, Joint Secretary, Ministry of Finance. Mr. S. K. Dey will be administrator under the Central Committee.

According to the Planning Commission's recommendation each State is to have a State Development Committee with a Development Commissioner and a Development Secretary. In the District there will be a District Development Office.

According to present schedule, operations must start on September 1, 1952 in at least one of the development blocks in each project area. To this end survey must be completed by the middle of July, estimates should reach the Community Projects Administration by July 31, Administration must approve by August 15 so that work could start on September 1.

Broadly speaking, a project area will comprise 300 villages covering about 450 to 500 sq. miles, a cultivated area of about 150,000 acres and a population of about 200,000. Every project area is divided in its turn into 3 parts called blocks.

Generally speaking, a project is to be completed in three years, the period being broken into five stages : conception, 3 months ; initiation, 6 months ; operation, 18 months ; consolidation, 6 months and finalisation, 3 months.

TYPES OF PROJECT

Development projects will be of three main types. First of all, there are envisaged the so-called "basic" community development projects, consisting of 300 villages and some 200,000 villagers, in which the primary emphasis will be on raising agricultural production, with some work on public health and sanitation, education and road building. The smaller basic development "blocks" consisting of 100 villages will have exactly the same programme and the same emphasis on agricultural improvement.

Second, there are to be the so-called "composite" development projects and blocks, in which emphasis will be on development of small industries, as well as on agricultural production. The industry phase of these "composites," it is proposed, will be patterned after the present industry-development project in Nilokheri and Faridabad.

The third main type of project is a training centre for instructing village workers. It is proposed that each of these centres be located either in or nearby rural development areas to permit the students practical on-the-job training in the villages.

Substantially the proposed programme aims at these objectives in each village : two surface wells or other facility per village to assure a safe, clean drinking water supply ; tube wells for irrigation in those areas where tube wells can be sunk (approximately a tenth of the proposed projects are in tube well areas) ; in other areas, assistance to canal, tank and well construction for irrigation purposes, with the proposal that at least half the land in each village be given improved irrigation ; reclamation of culturable waste land where feasible ; sanitary services plus improvement of village drainage as a sanitation measure ; improvement of roads to link village to village ; and facilities for primary and adult education.

Last, but of major importance, the Planning Commission and the local governments have proposed heavy emphasis on extension services. These services would be provided by trained village workers who will instruct the villagers in new improved agricultural methods, use of better seeds, green manure crops and commercial fertilizers and better but simple tools.

Included in the plans for each project and block is the development of a "Mandi" unit for each 15 to 25 villages where one does not already exist. Under present proposals, this Mandi unit would have a dispensary and health centre reaching out to the villagers through mobile units and serviced by a health visitor, midwives and the sanitary inspector. It would also have a transport and tractor servicing centre, a centre for marketing and shopping, a storage godown for agricultural produce and veterinary centre.

Experience at various successful agricultural projects carried on in India over a period of time have led to estimates that in four years a community development programme following these general lines can bring about an increase in food production of roughly 50 per cent in each area. In addition there can be an increase in cash income per village of some 35 per cent.

The second part of India's over-all community development programme is that which is to be supervised by the Ministry of Food and Agriculture, with financial aid from the Ford Foundation. This programme was put under way many months earlier than that of the Community Projects Administration.

Part of this programme is the setting up of 15 community development projects, which though smaller (only 100 villages each) propose exactly the same objectives and general programme for agricultural development as those under the Community Projects Administration. Plans and budgets have now been approved for fourteen of these projects. Dedication of one of the projects—the Bhadson project in PEPSU took place on April 9.

The second part of this programme is the establishment of training centres for village workers and project supervisors—the critical core of the whole community development programme of both the Planning Commission and the Food Ministry. For each of the large 300-village projects will need a staff of 103 Indian village workers and 22 Indian specialists in agricultural work, public health and education. The smaller 100-village "blocks" will each require about a third of that number. This means that a total of roughly 7,500 trained workers must be developed in India as rapidly as possible.

Five training centres have now been either set up or strengthened under a grant from the Ford Foundation. All of these centres are now staffed and receiving people for training. Each is attached to a community development project so that the trainees can gain actual field experience in the villages.

For the Basic Community Development Project, Basic Development Blocks and Composite Blocks financial aid will come from the Indo-American Development Fund, while for the Development Projects, Training-cum-Development Projects and Training Centres financial aid will come from the Ford Foundation. The former group will be supervised by the Government of India Community Projects Administration, and the latter by the Ministry of Food and Agriculture.

STATE-WISE DISTRIBUTION

In Bombay 1,142 villages will be covered with a population of 165,000 ; in Uttar Pradesh 2,102 villages with a population of 964,000 ; in West Bengal 755 villages with a population of 280,000 ; Mysore 1,328 villages with a population of 378,272 ; Saurashtra 106 villages with a population of 129,044.

The distribution and location of projects is given in the following table :

Assam

COMMUNITY PROJECTS ADMINISTRATION.
1. Project—Cachar District.
2. Project—Darrang District.
3. Block—tribal area.
4. Block—tribal area.
5. Block—North-east Frontier Agency.

FOOD MINISTRY.
6. Project—Kamrup District.
7. Training centre—location not yet assigned.

Bihar

COMMUNITY PROJECTS ADMINISTRATION.
1. Project—Darbhanga—Monghyr Districts.
2. Project—Shahabad District.
3. Project—Ranchi District.
4. Project—Patna District.
5. Block—Santhal Parganas District.

FOOD MINISTRY.
6. Project—Patna District.
7. Training centre—location not yet assigned.
8. Training centre—location not yet assigned.

Bombay

COMMUNITY PROJECTS ADMINISTRATION.
1. Project—Mehsana District.
2. Project—Kolhapur District.
3. Project—Thana-Kolaba Districts.
4. Project—Belgaum District.
5. Block—Sabarkantha District.

FOOD MINISTRY.
6. Project with training centre—Anand.
7. Training centre—location not yet assigned.
8. Training centre—location not yet assigned.

Madhya Pradesh

COMMUNITY PROJECTS ADMINISTRATION.
1. Project—Raipur District.
2. Project—Hoshangabad District.
3. Project—Amraoti District.
4. Project—In area merged in Madhya Pradesh.

FOOD MINISTRY.
5. Project with training centre—Chanda District.
6. Training centre—location not yet assigned.

Madras

COMMUNITY PROJECTS ADMINISTRATION.
1. Project—Kurnool-Cuddapah Districts.
2. Project—Coimbatore District.
3. Project—Malabar District.
4. Project—East Godavari District.
5. Project—South Kanara District.
6. Project—Madurai District.

FOOD MINISTRY.
7. Training centre—location not yet assigned.
8. Training centre—location not yet assigned.
9. Training centre—location not yet assigned.

Orissa

COMMUNITY PROJECTS ADMINISTRATION.
1. Project—Kalahandi District.
2. Project—Cuttack District.
3. Project—Ganjam District.

FOOD MINISTRY.
4. Project—Bolangir District.
5. Training centre—location not yet assigned.

Punjab

COMMUNITY PROJECTS ADMINISTRATION.
1. Project—Gurdaspur District.
2. Project—Ambala District.
3. Project—Jullundur District.
4. Block—Nilokheri.
5. Two Blocks—Faridabad.

FOOD MINISTRY.
6. Training centre—location not yet assigned.
7. Training centre—location not yet assigned.

Uttar Pradesh

COMMUNITY PROJECTS ADMINISTRATION.
1. Project—Gorakhpur District.
2. Project—Azamgarh District.
3. Project—Faizabad District.
4. Project—Mainpuri District.
5. Project—Jhansi District.
6. Project—Almora District.

FOOD MINISTRY.
7. Project with training centre—Lucknow District.
8. Training centre—location not yet assigned.
9. Training centre—location not yet assigned.

West Bengal *

COMMUNITY PROJECTS ADMINISTRATION.
1. Block (composite)—Birbhum District, Sadar Sub-division.
2. Block (composite)—Birbhum District, Sadar Sub-division.
3. Block (composite)—Birbhum District, Rampurhat, Sub-division.
4. Block (composite)—Burdwan District, Burdwan-Sadar-Katwa.
5. Block (composite)—Burdwan-Sadar.
6. Block (composite)—24 Parganas District, Sadar Sub-division.
7. Block (composite)—Midnapore District, Sadar Sub-division.
8. Block (composite)—Nadia District, Sadar Sub-division (Fulia).

FOOD MINISTRY.
9. Project with training centre—Burdwan District.
10. Training centre—location not yet assigned.
11. Training centre—location not yet assigned.

Hyderabad

COMMUNITY PROJECTS ADMINISTRATION.
1. Project—Nalgonda District.
2. Project—Raichur District.
3. Block—location not yet assigned.

FOOD MINISTRY.
4. Project—Nizamabad District.
5. Training centre—location not yet assigned.

Madhya Bharat

COMMUNITY PROJECTS ADMINISTRATION.
1. Project—Gird District.
2. Project—Nimar District.

FOOD MINISTRY.
3. Project—Gwalior District.
4. Training centre—location not yet assigned.

Mysore

COMMUNITY PROJECTS ADMINISTRATION
1. Project—Shimoga District.

FOOD MINISTRY.
2. Project with training centre—Visvesvaraya Canal area.

Pepsu

COMMUNITY PROJECTS ADMINISTRATION.
1. Project—Dhuri Tehsil.

FOOD MINISTRY.
2. Project—Nabha Tehsil.
3. Training centre—location not yet assigned.

Rajasthan

COMMUNITY PROJECTS ADMINISTRATION.
1. Project—Sawai Madhopur.
2. Project—Jodhpur.
3. Block—Bikaner.

FOOD MINISTRY
4. Training centre—location not yet assigned.

Saurashtra

COMMUNITY PROJECTS ADMINISTRATION.
1. Project—Sorath District.

FOOD MINISTRY.
2. Training centre—location not yet assigned.

Travancore-Cochin

COMMUNITY PROJECTS ADMINISTRATION.
1. Project—Trichur District.
2. Project—Trivandrum District.

FOOD MINISTRY.
3. Project—location not yet assigned.
4. Training centre—location not yet assigned.

Ajmer

COMMUNITY PROJECTS ADMINISTRATION.
1. Block—Kekri-Beawar Tehsils.

Bhopal

COMMUNITY PROJECTS ADMINISTRATION.
1. Project—Sehore and Raisen Districts.

FOOD MINISTRY.
2. Project—Raisen District.
3. Training centre—location not yet assigned.

Bilaspur

COMMUNITY PROJECTS ADMINISTRATION.
1. Block—Saddar Tehsil.

Coorg

COMMUNITY PROJECTS ADMINISTRATION.
1. Block.

Delhi

COMMUNITY PROJECTS ADMINISTRATION.
1. Block.

Himachal Pradesh

COMMUNITY PROJECTS ADMINISTRATION.
1. Project—Sirmur and Mandi Districts.

FOOD MINISTRY.
2. Project—near Narkanda.
3. Training centre—location not yet assigned.

Kutch

COMMUNITY PROJECTS ADMINISTRATION.
1. Block—Nakhatrana-Bhuj Tehsils.

Manipur

COMMUNITY PROJECTS ADMINISTRATION.
1. Block—Thoubal Tehsil.

Tripura

COMMUNITY PROJECTS ADMINISTRATION.
1. Block.

Vindhya Pradesh

COMMUNITY PROJECTS ADMINISTRATION.
1. Block—Amarpatan Tehsil.

FOOD MINISTRY.
2. Project—Chhatarpur District.
3. Training centre—location not yet assigned.

* The eight West Bengal composite blocks are taken to be equivalent to three composite projects. A total of six composite projects have been scheduled for this year's programme. The location of the other three will be chosen from the list shown above, but this choice has not yet been announced.

FARIDABAD-NILOKHERI-ETAWAH

THESE are three separate experiments in community development. They have invited attention as models of co-operative urban, urban-rural and rural developments respectively which could possibly be integrated into a single unity.

The pattern of development visualised is as follows : New Etawahs are to be developed round the nucleus of a Nilokheri, that is, a small township with small-scale industries serving the needs of the villages around it and providing a market for their produce. Then groups of Etawah-Nilokeri will centre round Faridabad, a town with light and medium industries with a power base and linked to the great road and rail arteries.

Some money was invested by Government to start with. But the success of the experiments is ascribed mainly to three things—the enthusiasm generated among the people to do new and better things and sustain their efforts, the close co-ordination and contact between the administrative machinery and the people, and the maintenance of an unfailing supply line between the needs of the people and the materials required to satisfy those needs.

The outstanding feature of Faridabad and Nilokheri is that both have been built entirely by the inhabitants themselves (refugees) financed by relatively small loans from the Centre.

Individual inspiration is present in all the three cases. The birth of Faridabad and of Nilokheri (both refugee townships) could be traced to the initiative of Mr. Sudhir Ghosh and Mr. S. K. Dey respectivcly, while Etawah owes its existence chiefly to the efforts of an American town planner called Albert Meyer who happened to be in India during the war, and later of Mr. Horace Holmes also an American. Mr. Meyer thought that the trouble was that various Government departments that existed to serve the cultivator worked in water-tight compartments and much above the level of the workers' needs and understanding. It occurred to him that this could be overcome by training teams of 'multi-purpose village level workers' with a geographical rather than a functional jurisdiction who would live and function at the level of the villager himself. The approach to the villager was vitally important and this must be through the villager's felt needs and the attempt to widen those felt needs to expand the villager's horizon. Thus the Pilot Project No. 1 was launched in 1948 in 97 villages in Etawah District.

The average yield per acre has increased by 30 to 50 per cent. On individual farms yields have increased by as much as 100 to 150 per cent.

Below we give more particulars about Faridabad, Nilokheri and Etawah :

Faridabad : population about 30,000; developed with loan of Rs. 2.5 crores given to Faridabad Development Board by Government of India; when complete income will be Rs. 35 lakhs per annum made up of rent of Rs. 11 each from 8,000 houses, Rs. 10 lakhs from sale of 6,000 kW of power, Rs. 3 lakhs from ground rent of 500 acres of factory sites at Rs. 600 per acre, water charges and miscellaneous items. Of this revenue Rs. 10 lakhs will be set aside in a sinking fund to repay loan with interest over 30 years; has power-driven factories, State-owned diesel engine plant, private firms which have set up light industries (Bata Shoe Factory, for example); a power house.

Nilokheri : population about 7,000; area 1,200 acres; 750 acres under cultivation; township developed at cost of Rs. 65 lakhs taken as loan from Centre at 3½ per cent interest; income from rents and recoveries from industry Rs. 3.6 lakhs per annum; debt will be repaid in 25 years; Rs. 5 lakhs already repaid; self-sufficiency in all essentials key-note; Government industries cover tanning and printing press; co-operative industries cover engineering tools, trunk making, tanning, hosiery, weaving, wood-working, soapmaking, iron and brass foundry, dairying, saltpetre; private industries cover cycle parts, oil, sugar, garments, hosiery, calico-printing, wirenetting, thread-ball making, brick-kilns, weaving, poultry, bakery; primary and high schools; unique socialised health service run by administrator; has its own panchayat; source of income of panchayat welfare tax imposed on all residents of colony at rate one per cent of income and surcharge on business; total income of panchayat in 1951 Rs. 19,076; total investment Rs. 66.05 lakhs, recoveries so far Rs. 7.37 lakhs.

Etawah : 97 villages; 24 village level workers each looking after four villages under expert guidance of Deputy Development Officers (Engineer, Agronomist, Principal of Training Centre, man in charge of education, Sanitary Inspector), all under District Planning Officers.

GOVERNMENT ENTERPRISES

SINDRI FERTILIZER FACTORY

ASIA'S largest and most modern; located at Sindri, Bihar; full name: Sindri Fertilizers and Chemicals Ltd.; registered 18th December 1951; started functioning in effective charge 15th January 1952; state-owned private limited liability company; Chairman of Board of Directors is Secretary in the Ministry of Production; all shares except one held by President of India, one held by Secretary of the former Ministry of Works, Production and Supply in his personal capacity.

Authorised share capital Rs. 30 crores; of this Rs. 17 crores paid up; further sum of Rs.10 crores invested by Government in 4 per cent redeemable debentures; out of Rs. 27 crores, Rs. 23 crores capital asset, Rs. 4 crores working capital.

Target production 350,000 tons of ammonium sulphate a year; means 875,000 tons of extra food; will save foreign exchange between Rs. 10 and Rs. 12 crores in import of artificial fertilizers.

Average daily production 299 tons (Feb. 1952); daily target production 1,000 tons; full production expected to be reached latter half of 1952.

Consists of gas, ammonia, sulphate plants; power from 80,000 kW Power House; water (some 12 million gallons a day) temporarily from barrage on Gowal river, ultimately from Damodar Valley; bagging plant; marshalling yards and 7-mile railway track.

Factory 100 per cent complete end of 1951; started production October 31, 1951; gas plant started 13th April 1951; production of anhydrous ammonia started 28th August 1951; marshalling yards completed 30th August 1951; bagging plant commissioned 4th February 1952; bags of ammonium sulphate went out of factory 7th February 1952.

Township designed for 4,000 employee families or 20,000 persons; 400 acres; 4 groups of composite and self-sufficient colonies; has all modern amenities (electric lighting, water supply); township complete and fully occupied; hospital, branch dispensaries, first-aid posts.

Board of Directors: *Chairman*, Secretary, Ministry of Production; *Members*, J. J. Ghandy; Sri Ram; Sri Narayan Mahta; Jt. Secy., Ministry of Finance (I. & C. Divisions).

PENICILLIN FACTORY

To be located at Pimpri near Poona; construction to start latter half of 1952; production to begin 1953; 3,600 billion units a year to start with, rising to 9,000 billion units; conclusions reached about number and type of personnel to be trained and places of training.

Plans based on tri-partite agreement between Government of India, World Health Organisation (W.H.O.) and United Nations International Children's Emergency Fund (UNICEF), concluded on 24th July 1951; Government will provide land, buildings, fittings, administrative offices, laboratories, pilot plant, workshop, other services like steam plant, electric substation, sewage disposal, water, etc.; estimates for providing these Rs. 1,30,00,000; UNICEF will supply imported equipment valued $850,000; W.H.O. will provide technical assistance valued $350,000.

MACHINE TOOL FACTORY

Is located at Jalahalli near Bangalore; plans based on agreement between Government of India and Oerlikon Machine Tool Works, Buhrle & Co., Zurich, Switzerland, concluded in April 1949.

Envisages manufacture of 900 high speed lathes, 460 milling machines, 240 heavy duty drilling machines per year; gear cutting shop; foundry; estimated capital cost Rs. 8.37 crores; annual value of output when in full production Rs. 4 crores.

Building work has started; work relating to water, power supply taken in hand; orders for plant, machinery being placed; key technical personnel (both Indian and Swiss) being recruited; as a preliminary stage production to be confined to manufacture of 400, 8½" high speed lathes; production of this to commence August 1953.

TELEPHONE CABLE FACTORY

Is located at Rupnarainpur in Asansol District in West Bengal; is estimated to cost Rs. 1.1 crores; the value of annual output Rs. 80 lakhs; expected to start production June 1953, full production December 1953.

Based on technical assistance agreement with Standard Telephones and Cables Ltd. of U.K., concluded on 31st October 1949; technical consultants will prepare drawings, designs, estimates, supervise erection of factory, provide engineers at their cost for initial construction, put plant and machinery into service, train Indian personnel.

Construction of factory has started; orders for major part of plant and machinery placed; construction of railway siding in progress; six Indian engineers selected for training in U.K.

NATIONAL INSTRUMENTS FACTORY

Is located in Calcutta; started more than a century ago; manufactures mathematical, survey, air-craft, instruments, excise apparatus, hydrometers, etc., microscopes, concentration eye-piece; expansion scheme envisages manufacture of optical glass and linen measuring tapes.

GOVERNMENT HOUSING FACTORY

Is located in Delhi; originally intended to manufacture pre-fabricated foam concrete houses on a mass scale in accordance with the patent of Structural and Mechanical Development Engineers of England; could not produce sound and mechanical houses till end of 1949; negotiations now in progress with Swedish-Indian combine for production of pre-fabricated housing components and special type of wall boards.

VISHAKAPATAM SHIPBUILDING YARD

Is located at Vishakapatam in Madras State; was designed by firm of Sir Alexander Gibbs and Partners; 8 berths basis, has now 2 building berths to build ships ranging from 320 to 550 ft. in length, and from about 5,000 tons to about 15,000 tons dead weight capacity, third berth of similar capacity now under construction would be ready latter half of 1952; has also fitting out wharf 1,200 ft. long which permits fitting out of 6 large ships and 3 medium sized ships in one year; about 4,000 technicians and workers; 56 acre site.

Was originally property of Scindia Steam Navigation Co., spent about Rs. 4.34 crores (according to their statement) upto June 1950; because of scarcity of funds approached Government for help; Government kept yard going through 1950 and 1951 by placing two orders for construction of three ships each; construction of first batch of ships over; construction of second batch in progress.

Now managed by Hindustan Shipyard Ltd.; took over 1st March 1952; Board of Directors consists of 4 Government nominees including Chairman and 2 nominees of Scindia Steam Navigation Co. Ltd.; authorized capital Rs. 10 crores divided into 100,000 ordinary shares issued in four stages and so arranged that Government contributes two-thirds of capital and has controlling interest; provisional valuation of shipyard Rs. 2.7 crores, represents fully paid-up shares.

So far 7 ships of 8,000 tons each built, 4 on Scindia's account and 3 on Government's; programme to build 18 more ships during next 4 years beginning 1952-53 on six-berth basis; provision of Rs. 10.91 crores in Five-Year Plan for acquiring interest, development of yard, construction of ships.

PROJECTS UNDER FIVE-YEAR PLAN

THE following is a list of the projects under the first part of the Five-Year Plan given Statewise. The figure in brackets gives the total cost in lakhs of rupees.

CENTRAL GOVERNMENT (2,87,10)

Bhakra-Nangal (1,32,90); Harike (13,80); Damodar Valley (74,98); Hirakud Dam (62,59); Investigations (2,83).

ASSAM (1,45)

Navigation, embankment, drainage (60); Umtru Hydro-Electric (85).

BIHAR (19,87)

The following are the irrigation projects :—Three hundred tube-wells in North Bihar (1,83), Tube-wells in South Bihar (1,38); Drainage, flood protection (1,57); Sakri Lower Valley (29); Tribeni Canal Extension (2.5); Emergency Pumping (93); Three hundred tube-wells in sugar factory areas (1,61); Sakri Upper Valley Irrigation (53); Further 200 tube-wells in South Bihar (98); Irrigation dams and weirs in hilly districts (2,00).

The following are the power projects :—P.B.B. E.B. Emergency Tube-wells Scheme (66); Dehri-Sasaram lift irrigation and electrification (55); Gaya electric supply (61); Hazaribagh electric supply (23); Kodarma and Mica Mines electrification (32); Coal-mines area electrification (2,66); Taking over of derelict electric supply (33); Girdih electric supply (14); Girdih-Madhopur-Jasidih electric supply (19); North Bihar tube-wells and electrification (1,60); Buxur tube-wells and electrification (35); Thermal power station in North Bihar (83).

BOMBAY (39,84)

The following are irrigation schemes :—Gangapur Storage (3,34); Wardala Dam (12); Ghataprabha Left Bank Canal (5,45); Mahi Right Bank Canal (4,25); Ranand Tank (22); Kolchi Weir (18); Kakrapara (12,16).

The following are power schemes: Radhanagari Hydro-Electric (2,07); Kolhapur emergency irrigation and city conversion (29); Jog distribution (2,13); Chola Power Station (2,95); North Gujarat Electric Grid (2,51); South Gujarat Electric Grid (3,21); Electrification of towns, villages (96).

MADHYA PRADESH (17,24)

The following are irrigation schemes :—Area tank in Chindwara (32); Dokerli (16); Bargoor (22); Gondli (75); Dudhwa (1,50); Sampra (30); Dukrikhera (30).

The following are power schemes :—Central Thermal Station at Nagpur (4,85); Distribution (36); Akola Power Distribution (3,71); Gondia extension (33); Northern grid, Jabalpur-Katni (62); Raipur Pilot Station (1,28); Power Station, Bilaspur (1,92); Others (62).

MADRAS (1,21,97)

The following are irrigation schemes :—Lower Bhavani (9,07); Malampuzha Reservoir (3,80); Mettur Canal (2,45); Rallapad 2nd Stage (58); Romperu Drain (90); Caveri Delta Drainage (30); Manimuthar Project (3,98); Upper Pennar Project (84); Bhiravanitippa Project (93); Aranjar Scheme (95); Walvar Scheme (1,00); Mangalam Reservoir (45); New G. M. F. Scheme in charge of P.W.D. (73); Tungabhadra (18,20).

The following are power schemes :—Moyar Hydro-Electric Scheme (4,64); Pykara—3rd stage extensions (4,89); Papanasam 2nd stage Extensions (3,36); Machkhund Hydel Scheme (6,82); Machkhund Transmission Lines (8,03); Madras Plant Extensions (10,43); Nellore Thermal Scheme (1,01); Madras Mettur Interconnection (2,18); Transmission line and distribution (22,93); Tungabhadra Hydel Scheme (7,94); Acquisition of electrical undertakings (4,50).

ORISSA (7,27)

The following are irrigation schemes :—Minor Irrigation (4,02).

The following are power schemes :—Duduma Transmission Scheme (2,30); Rural Electrification Scheme (41); Others (54).

PUNJAB (4,82)

The following are irrigation schemes :—Dera Babananak Tube-well Scheme (15); Aliwala Tube-well Scheme (10); Extension of irrigation to arid areas of Jandiala and Gurdaspur Division of U.B.D.C. from main line (25); Excavation of new distributary of Kasur Branch (25); Kiran Nallah (20); Raising banks of channels and giving temporary shoots during Kharif (1,26); Jagadhari Tube-well Scheme (1,25); Other schemes (65).

The following are power schemes :—Development of Nangal load (59); Publicity and Propaganda (1); Marketing and Utilization (11).

UTTAR PRADESH (74,75)

The following are the irrigation schemes :—600 State tube-wells in Western Districts (1,80); 50 additional tube-wells in T. W. Circle (E) (17); 200 additional tube-wells in T. W. Circle (W) (71); 100 State tube-wells in Gorakhpur, Basti and Deoria Districts (30); Extension of pucca lining on tube-well guls (1,91); 440 State tube-wells in the Districts of Shahjehanpur, Sitapore, etc. (1,80); 803 miles of extension of Sarda canal (49); 1,062 miles of extension of Sarda canal (90); Pratapgarh Branch (50); Trans-Kalyani project (60); Saprar Dam (46); Belan canal project (90); Kabrai lake (19); Construction of 5,293 State tube-wells (26,49); Lining, irrigation channels, guls and canals (90); Reservoirs and Bundhis and canal systems including Majhgawar in southern Uttar Pradesh (7,33); Contour guls and small channels in hill Districts (90); Other schemes (1,12).

The following are the power schemes :—Mohammadpur Station (1,06); Sarda Power House (7,50); Pathri Power House (1,80); Gorakhpur Power House (45); Ganga Transmission lines (1,00); Sarda Transmission lines (5,00); Eastern Area Power Station (4,57); Kanpur Electric Supply administration (5,00); Small Hydel schemes in Hill Districts (60); Other schemes (one) (24).

WEST BENGAL (20,56)

The following are the irrigation schemes :—Mayurakshi Reservoir (15,50); Surankar Daura Scheme (13); Sonarpur-Arah-Panch Matla Scheme (1,05); Bagjale Chuni Jantra-gachi Scheme (99); Other schemes (1,54).

The following are the power schemes :—North Calcutta Electrification Scheme (1,09); Appointment of Power Engineer Scheme (17); Other schemes (10).

HYDERABAD (39,43)

The following are the irrigation schemes :—Tungabhadra (23,04); Rajolibunda (4,30); Godavari First Phase (4,41); Koilsagar (60); Sarlasagar (22); Bendsura (43); Khasapur (32); Minor Irrigation (70); Others (8).

The following are the power schemes :—Nizamsagar Hydro-Electric Project (1,75); Tungabhadra Hydel (1st phase—Civil Works) (50); Ramgundam Thermal (2,81); Hyderabad Thermal (27).

MADHYA BHARAT (5,92)

The following are the irrigation schemes :—Khuj Project (1,00); Chiri Project (40); Lohagarh Project (50); Construction of new tanks (57); Repairs to old tanks (47); Improvement and extension of channels (34).

The following are the power schemes:—Central Power House at Indore, Installation of 3,000 K.W. reconditioned plant at Indore, H. T. from Indore and remodelling mains at Ujjain (1,76); Extension of power plant and remodelling of mains at Gwalior (55); Rural electrification (16); Others (18).

MYSORE (46,33)

The following are the irrigation schemes :—Constructing a Reservoir across the Bhadra River near Lakkavalli (20,00); Anicut across Tunga River near Sakrebyle (2,00); Reservoir across Nugu River (2,20); New tank across Jinigehalla (21); Normal expenditure of Krishnarajasagar and allied works in Visweswarayya Canal area (50); Reservoir across Salur Halla at Ambligola (18); New tank across Suvarnamukhi River at Kariyala (20); Other schemes (1,78).

The following are the power schemes:—Normal Capital Works (3,20); Mahatma Gandhi Hydro-Electric Works (730); Frequency Conversion (30); Shimsha Extension (3,20); Extension of transmission lines (1,63); Installation of Stepdown Station (1,16); Distribution (2.02); Power supply to irrigation pumping sets (40); Others (survey of projects) (3).

PEPSU (2,35)

The following are the irrigation schemes :—Remodelling of channels (15); Others (20).

The following are the power schemes :—Electrification of Pepsu Towns (2,00).

RAJASTHAN (10,27)

The following are the irrigation projects :—Jawai Project (2,39); Parbati Irrigation Project (50); Gudha Irrigation Project (34); Kali Sill Project (16); Other projects (6,50).

The following are the power projects :—Power project (38).

SAURASHTRA (9,03)

The following are the irrigation schemes :—Rangbola (54); Machu (76); Brahmani (72); Sashoi (68); Ghee (18); Puna (13); Surajwadi (28); Moj (72); Bhimdad (19); Malan (30); Aji (70); Bhogavo (50); Ozat (60); Lift irrigation (10).

The following are the power projects :—Establishment of thermal stations (2,62).

TRAVANCORE-COCHIN (23,30)

The following are the irrigation schemes :—Peechi (1,73); Chalakudy (1,20); Perunchrani (68); Wadakkancheri (49); Vembanad (80); Neyyar Scheme (1,20).

The following are the power schemes :—Palliwasal 2nd stage (2,30); Sengulam Hydel (2,75); Poringalkuthu Left Bank (260); Transmission and Distribution (9,55).

PART 'C' STATES (2,86)

BHOPAL: Bhopal Electric Power Extension Scheme (5).

COORG: Bulk Purchase of Power from Mysore (15).

KUTCH: Major irrigation works including wells (95); Power Project, Acquisition of Electricity Undertakings (11); Rural Electrification (12).

TRIPURA: Nationalisation of Electric Supply Company, Agartala (7).

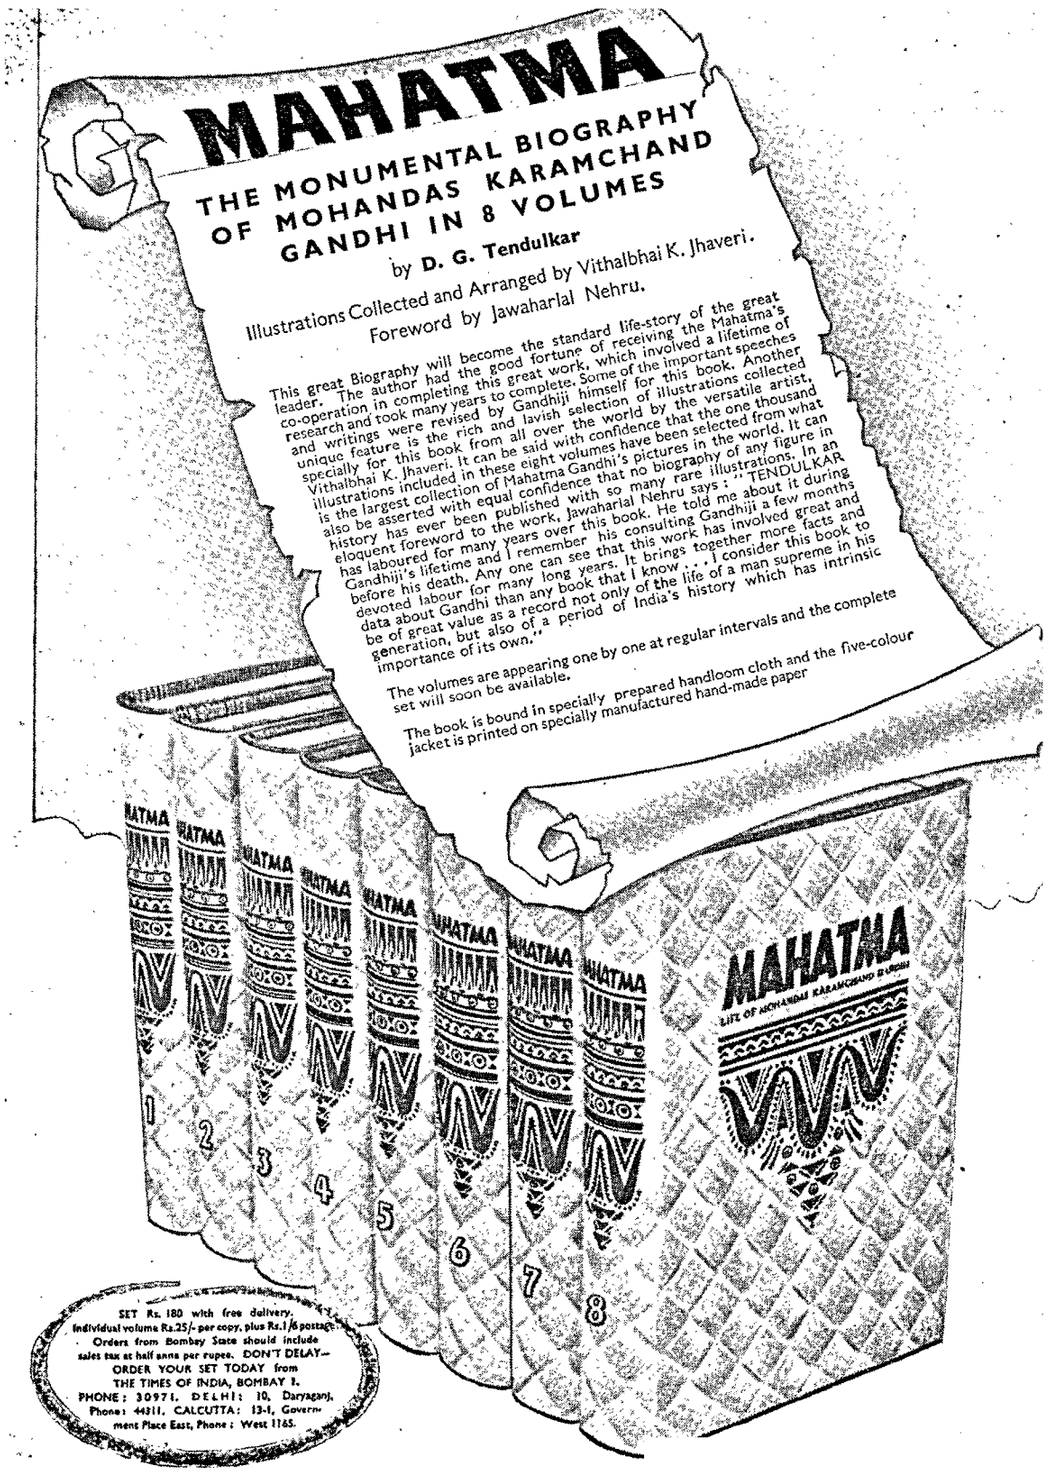
VINDHYA PRADESH: Power project (50).

HIMACHAL PRADESH: Medium irrigation projects (80); Power-installation of Hydel Plants in Mandi, Chamba and Mahasu and extension of electricity from Mandi to Sundarnagar (9).

MAHATMA

THE MONUMENTAL BIOGRAPHY OF MOHANDAS KARAMCHAND GANDHI IN 8 VOLUMES

by **D. G. Tendulkar**



Illustrations Collected and Arranged by Vithalbhai K. Jhaveri.

Foreword by Jawaharlal Nehru.

This great Biography will become the standard life-story of the great leader. The author had the good fortune of receiving the Mahatma's co-operation in completing this great work, which involved a lifetime of research and took many years to complete. Some of the important speeches and writings were revised by Gandhiji himself for this book. Another unique feature is the rich and lavish selection of illustrations collected specially for this book from all over the world by the versatile artist, Vithalbhai K. Jhaveri. It can be said with confidence that the one thousand illustrations included in these eight volumes have been selected from what is the largest collection of Mahatma Gandhi's pictures in the world. It can also be asserted with equal confidence that no biography of any figure in history has ever been published with so many rare illustrations. In an eloquent foreword to the work, Jawaharlal Nehru says : "TENDULKAR has laboured for many years over this book. He told me about it during Gandhiji's lifetime and I remember his consulting Gandhiji a few months before his death. Any one can see that this work has involved great and devoted labour for many long years. It brings together more facts and data about Gandhi than any book that I know . . . I consider this book to be of great value as a record not only of the life of a man supreme in his generation, but also of a period of India's history which has intrinsic importance of its own."

The volumes are appearing one by one at regular intervals and the complete set will soon be available.

The book is bound in specially prepared handloom cloth and the five-colour jacket is printed on specially manufactured hand-made paper

SET Rs. 180 with free delivery. Individual volume Rs.25/- per copy, plus Rs.1/6 postage. Orders from Bombay State should include sales tax at half anna per rupee. DON'T DELAY— ORDER YOUR SET TODAY from THE TIMES OF INDIA, BOMBAY 1. PHONE : 30971. DELHI : 10, Daryaganj, Phone : 44311. CALCUTTA : 13-1, Government Place East, Phone : West 1165.

The Dominion

OF

PAKISTAN

Eastern Pakistan was composed of East Bengal and included Sylhet (a district of the province of Assam).

Western Pakistan was composed of Sind and West Punjab (now called the Punjab). It included N.-W.F.P. and Baluchistan.

In the June 3 Plan, the Indian States were left free to join either India or Pakistan, subject, however, to geographical consideration or to remain independent. The States of Bahawalpur, Khairpur, Chitral, Swat, Dir, Las Bela, Kharan acceded to Pakistan, and Kalat followed suit after some months.

The Dominion of Pakistan and the Indian Union came into existence on the 15th August, 1947, when the power of the British Government in India was transferred to the two newly created States in their respective areas.

The transfer of power was unfortunately marred by outbreak of disturbances followed by mass migration of people. The migration of population on an unprecedented scale and under such distressing conditions put very great strain upon the economy of Pakistan.

Pakistan is the fifth biggest State in the world, and the largest among Muslim States. It is bifurcated into two zones, separated from each other by over a thousand miles—one lying to the north-west of the Indian Union and the other in the east sandwiched between two of India's eastern-most States. It comprises Sind, N.-W.F.P., Baluchistan and the western part of the old Punjab in the west, and the eastern part of Bengal coupled with the Sylhet district of Assam in the east.

PHYSIOGRAPHY

PAKISTAN consists of two geographical units: Eastern Pakistan with one large province, East Bengal, including the rich Sylhet district of Assam; and Western Pakistan comprising the Punjab, Sind, Baluchistan, North-West Frontier Province and the States which have acceded to Pakistan.

Western Pakistan adjoins Afghanistan and Iran in the west and north-west and the Indian State of Punjab and the Great Indian Desert in the east. To the north lies the State of Jammu and Kashmir; to the south and south-west the Arabian Sea.

East Bengal, the largest and the most thickly populated province of Pakistan is separated from Western Pakistan by more than a thousand miles of Indian territory. It is bounded on the north by the hilly regions of Jalpaiguri, Darjeeling and parts of Assam; in the south by the Bay of Bengal; in the west by the Indian States of West Bengal and Bihar and in the east by Assam State. The narrow strip of the Chittagong Hill Tracts adjoins Burma.

From its most northerly point to the sea-coast in the south, Western Pakistan covers a distance of nearly 800 miles, while its western tip at Killa Robat is separated from the Indian border by about 700 miles. The entire area to the north and west of the land is covered by the great ranges of the Hindu Kush and the Sulaiman mountains rising, in places, to a height of 14,000 feet. The Salt Range and its arid plateaux lie slightly towards the east of these mountain systems. To the south and south-west of this region stretches a vast plain right up to the Arabian Sea.

All the five rivers of Western Pakistan, Indus, Jhelum, Chenab, Ravi, Sutlej rise in the Himalayas and after long courses amid the snow-clad ranges debouch on the plains. The slope of the low country is to the south and south-west and this determines the course of the rivers. With the passage of time each stream has cut for itself a wide valley which lies well below the level of the plain.

Of these five rivers the longest is the Indus. A mighty stream when it emerges from the Hazara Hills, it flows almost due south past Attock—the oil district of Western Pakistan—where it enters a deep gorge. It flows on through the Punjab and enters the Province of Sind where the huge Lloyd Barrage spans its waters. The other four rivers which help to make West Punjab one of the richest wheat and cotton growing areas in Asia, also rise in the Himalayas and after traversing the plains of the West Punjab join the Indus, which flows into the Arabian Sea.

LANDSCAPE

Western Pakistan presents great variations in landscape, from the snow-covered peaks of the upper Himalayas to the grey, sombre desert of Sind. In the North-West Frontier Province where the land lies on an average more than 4,000 feet above sea-level, the scenery is rugged. At places there are vivid expanses of green. In the Salt Range of the Punjab the landscape takes on a gentler tone; the slopes are often covered with green box and bogmyrtle. But the true beauty of the Punjab and Sind landscapes lies in the plains. As harvest time approaches the traveller sees an endless expanse of waving crops of varying shades of colour above which the villages seem to rise like islets in a sea of green. After the harvest the whole aspect is changed and the rich brown of the fields contrasts sharply with the dull green foliage of groves and plantations.

In Baluchistan the general outlook resembles that of the Iranian plateau and, though sometimes oppressive in the severity of its lines, the landscape is not without a certain rugged charm. Barren, sunburnt mountains rent by huge chasms and gorges alternate with arid deserts and stony plains. The colours vary from a monotonous drab to warm brick-yellow, orange and sometimes even deep mauve. There are intermittent valleys of considerable size where the land is irrigated and rich crops of all kinds and fruits are grown. Within the mountains lie narrow glens, fringed in early summer by the brilliant green of carefully terraced fields. The clear streams are bordered by rows of willow trees often interlaced with a profusion of vines.

The sea-coast is arid and devoid of vegetation, but there is a good harbour at Karachi and many fine sandy beaches. Western Pakistan, except for the coastal strip in Sind, is subject to extremes of climate. In January and February the night temperature reaches freezing point, while during the day the temperature does not rise above 75°. The bright sunshine and the keen invigorating air make Western Pakistan in winter one of the healthiest spots in the world. In the summer months, on the other hand, the heat is fierce and the temperature ranges between 90 and 120°. The nights, however, are usually cool. These extremes of temperature have bred a people remarkably hardy and vigorous, endowed with good physique, great energy and stamina.

EASTERN PAKISTAN

Nearly the whole of the 54,000 square miles of Eastern Pakistan is a vast alluvial plain with hardly a hill or even a rock visible for miles. Only on the south-eastern frontier a succession of low mountain ranges cover the east of the Chittagong Division. The most outstanding feature of the Province is the network of its rivers—the Ganges and the Brahmaputra with their tributaries. These rivers furnish an admirable and cheap means of transport; they contain an inexhaustible supply of fish and bring down vast quantities of fertilizing silt which they deposit over the surface of the land.

Although East Bengal is largely a plain, the landscape cannot be described as dull, for even in the dry months the groves of bamboo, mango, the graceful areca and cocoanut palm, tamarind, peepal and other trees afford a profusion of green vegetation. In the rainy season the young rice-seedlings cover the ground for miles with a delicate green. In December the mature plants turn golden and are ready for the sickle.

The dense forests of the famous Sunderbans in the south abound in big game such as tigers, leopards, bears, wild hog and other animals.

Although East Bengal is situated almost entirely outside the tropical zone, its climate for about two-thirds of the year (from the middle of March to the end of October) has a tropical character, *i.e.*, high temperature and humidity and a dry season following heavy rains. From November to February, the climate is delightfully cool, the humidity is slight and the rainfall generally scanty. Eastern Pakistan does not suffer from the same rigours of climate as Western Pakistan, the mean temperature during the cold months being 64° and during the hot season about 83°.

POPULATION

According to the provisional figures released by the Census Commissioner, Pakistan has a population of 75,687,000. There are 40,089,000 males and 35,598,000 females. The figures given below show the distribution Province-wise (in thousands):—

Province or State	Total Persons	Total Males	Total Females
East Bengal	4,21,19	2,20,57	2,00,62
Punjab	1,88,14	1,00,41	87,73
Bahawalpur State	18,20	9,88	8,32
N.-W.F.P. (Settled Districts)	32,39	17,15	15,24
N.-W.F.P. Tribal Area	24,60	12,94	11,66
Sind	46,13	25,31	20,88
Khairpur State	3,20	1,77	1,43
Baluchistan	6,22	3,50	2,72
Baluchistan States	5,56	2,96	2,60
Federal Capital Area	11,18	6,40	4,78

Towns

The population of towns with a population of over 25,000 is given below

Karachi (Federal Capital Area) 1,118,417, Lahore (Punjab) 849,333, Dacca (East Bengal) 273,159, Hyderabad (Sind) 241,807, Rawalpindi (Punjab) 236,877, Multan (Punjab) 190,122, Lyallpur (Punjab) 179,127, Sialkot (Punjab) 156,378, Peshawar (North-Western Frontier Province)* 151,435, Chittagong (East Bengal) 143,264, Gujranwala (Punjab) 114,193, Barisal (East Bengal) 89,278, Quetta (Baluchistan) 83,892, Sargodha (Punjab) 78,447, Sukkur (Sind) 77,026, Jhang Maghiana (Punjab) 73,397, Narayangunj (East Bengal) 68,373, Kasur (Punjab) 63,086, Montgomery (Punjab) 50,185, Mardan (North-Western Frontier Province) 48,827, Comilla (East Bengal) 47,195, Gujrat (Punjab) 46,971, Shikarpur (Sind) 45,335, Mymensingh (East Bengal) 44,527, Kot Momin Town (Punjab) 43,331, Dera Ismail Khan (North-Western Frontier Province) 41,613, Khulna (East Bengal) 41,409, Nowshera (North-Western Frontier Province) 41,351, Bahawalpur (Bahawalpur State) 40,698, Kohat (North-Western Frontier Province) 40,527, Mirpurkhas (Sind) 40,412, Rajshahi (East Bengal) 39,662, Chiniot (Punjab) 39,042, Jhelum (Punjab) 38,567, Khanewal (Punjab) 37,915, Brahmanbaria (East Bengal) 37,865, Sirajgunj (East Bengal) 37,545, Dera Ghazi Khan (Punjab) 35,909, Okara (Punjab) 35,350, Dinajpur (East Bengal) 34,271, Nawab Shah (Sind) 34,201, Larkana (Sind) 33,247, Wazirabad (Punjab) 33,027, Sylhet (East Bengal) 32,773, Pabna (East Bengal) 31,924, Chandpur (East Bengal) 31,620, Rangpur (East Bengal) 30,501, Hafizabad (Punjab) 30,082, Sheikhupura (Punjab) 29,717, Kamalia (Punjab) 28,635, Abbottabad (North-Western Frontier Province) 27,602, Bannu (North-Western Frontier Province) 27,199, Charsadda (North-Western Frontier Province) 27,048, Jamalpur (East Bengal) 26,952, Faridpur (East Bengal) 25,287.

The number of persons claiming to be literate according to the provisional figures (literate means able to read one of the main languages of Pakistan) are as follows:—

Province or State	Number of Literates	Percentage of total population
East Bengal	6,712,000	16·0
Punjab	1,928,000	10·2
Bahawalpur State	110,000	6·0
N.-W.F.P. (Settled Districts)	251,000	7·8
N.-W.F.P. (Other Areas)	33,000	1·3
Sind	502,000	10·8
Khairpur	28,000	8·8
Baluchistan	51,000	8·2
Baluchistan States	12,000	2·2
Federal Capital Area (Karachi)	351,000	31·3

The approximate percentage of literate persons as a whole in Pakistan works out to 13·2 per cent.

The above figures are based on the preliminary count of the census slips by individual enumerators and are subject to revision during the checking and sorting stage.

The above provisional results are however very close to the figures given during the house-listing operation and more or less agree with the estimates made on the basis of the 1941 census, bearing in mind that the 1941 Census Report mentions the existence of inflation in certain areas.

The census enumeration included approximately 200,000 enumerators; 16,000 circle supervisors and 1,770 charge superintendents. These were directed by 88 district census officers. This total field team, amounting to some 218,000 men consisted partly of Government and Municipal officials, for whom the census work formed an enormous addition to their normal duties, but carried no extra pay, and partly of a large body of volunteer honorary non-official workers. Controlling this field organisation was the Census Commissioner assisted by Provincial Superintendents.

AGRICULTURE

Total area under cultivation .. .. .. 45 million acres.
Irrigated area .. .. .. 35 million acres.

PRINCIPAL CROPS (1950-51)

Crops	Area under cultivation (000 acres)	Production (000 tons)
Rice	22,401	8,195
Wheat	10,832	3,953
Cotton	3,011	228
Jute	1,250	795
Sugar-cane	700	874
Tea	75	17

ANNUAL MINERAL PRODUCTION

Mineral	Quantity
Petroleum	11,811,720 gallons.
Coal	405,325 tons.
Limestone	303,300 tons (1950).
Rocksalt	256,041 tons.
Chromite	18,130 tons (1950).
Gypsum	16,660 tons (1950).
Sulphur	66,300 tons.

RAILWAYS

North Western Railway	5,363	miles.
East Bengal Railway	1,631	,,
Total	6,994	,,

ROADS

	Unmetalled	Metalled	Total
East Pakistan	18,013	3,060	21,073
West Pakistan	30,894	9,973	40,867
Total Mileage	48,907	13,033	61,940

THE PEOPLE

THE 75 million odd inhabitants of Pakistan do not all come from one racial stock. There has been a great mingling of races and cultures—Indo-Aryan, Semitic, Mongol and Dravidian. The result is like the U.S.A., a variety of physical types, language groups, food habits and local customs and usages. Thus in the Punjab (pop.: 18,814,000), the physical type is distinctly Aryan, there being few traces of aboriginal or foreign blood. The typical Punjabi is of medium height, spare but muscular, broad-shouldered with dark eyes and an ample beard. His hair is invariably black but the complexion varies from a deep olive-brown to fair. His language is Punjabi though Urdu is the literary language and is widely understood and spoken.

The Pathan of the North-West Frontier Province (pop.: 3,239,000) is taller, somewhat heavier in build, the rigours of life and climate in his barren hills making him broad-boned and capable of harder living. In stature and physique the Frontier Pathan can stand comparison with any other people in the world. His general bearing is proud and resolute, with courage writ large on his face. His language is Pushto but he understands Urdu.

The Baluch (Baluchistan pop.: 622,000), differs markedly from his Pathan brother. His build is shorter, more spare and wiry. He has a long, oval face, an aqueline nose and wears his hair in long oiled curls. The Baluch Pathans are expert horsemen and generally carry swords or long knives for their defence.

Sind has a population of more than 4,619,000. The Muslims of the province are by race Pathans, Arabs, Baluchs, Brahuis, Jats, Makranis and original Sindhis. The Jat and the Makrani are allied to the Baluch and have the same physical characteristics. The descendents of the Arabs who settled in Sind after having conquered it in 712 A.D., are chiefly Saiyyids and number more than 100,000. They are of medium height and fair with long noses and a narrow facial index.

The original residents of Sind are tall, robust, dark-complexioned and of muscular build. They make strong and hardy cultivators and are by temperament gentle. Of the numerous tribal divisions among the Sindhis, the Sumro and Samo represent the dynasties which ruled in Sind from the 11th to the 16th century.

The Mushanos are boatmen and fishermen, forming a distinct group with their own customs and folklore.

In East Bengal (pop.: 42,119,000) there has been an admixture of the Mongoloid and Dravidian strains. The average Bengali is, therefore, different in physical characteristics from the average Western Pakistani. He is shorter in stature than the Pathan and of smaller build. His language is Bengali.

The great unifying force amidst these diversities of race, language and physical environment in Pakistan is its culture and civilisation. Nearly 80 per cent of the people of Pakistan are Muslims. Islam has given them a single social, ethical and legal code, and thus they form a single brotherhood. For the vast majority of the people of Pakistan the times of prayer, the days of fasting, the places of pilgrimage, the laws of marriage, succession and inheritance are the same. So are the essential ceremonies attending birth, marriage and death, days of rejoicing and of national mourning. This consciousness of common beliefs, rights and duties has given the people strong social and political cohesion.

* Also called 'North-West Frontier Province.'

THE BACKGROUND OF PAKISTAN

PAKISTAN was established on August 15, 1947 as a Dominion by the division of the sub-continent, according to an agreed plan between the British Government and the two main Indian political parties—the Indian National Congress and the All-India Muslim League. The word Pakistan has variously been construed but the general Muslim view is that it stands for all that is pure and noble in Islam.

The conception of Pakistan was first put forward by the poet philosopher Allama Sir Mohammad Iqbal in the course of his presidential address to the Muslim League in December 1930. The scheme was, however, not officially adopted by the Muslim League, and remained an ideal till after a decade. Meanwhile, Mr. C. Rahmat Ali, a barrister, founded the Pakistan movement in 1931 with the object of dividing India into Pakistan and Hindustan. His Pakistan comprised the Punjab, North-West Frontier (the land of the Pathans), Kashmir, Sind and Baluchistan; the rest was Hindustan. This proposal was circulated to the members of the First Round Table Conference, but the Muslim League spokesmen did not at this stage officially sponsor the scheme in spite of the general sympathy of Muslims for the movement.

QUAID-E-AZAM

Although, since its inception in 1906, the Muslim League sought to arouse political consciousness among Muslims, this organisation did not become very powerful till Quaid-e-Azam Jinnah became its President at the Bombay session in 1926. The next ten years saw slow but steady consolidation of the Muslim League under his leadership. All the rival Muslim groups and parties, both inside and outside the Indian National Congress, were losing ground rapidly by the time the Second Round Table Conference concluded in London. As the Congress and the Muslim League could not reach any agreement on a future constitution, the then British Prime Minister Mr. Ramsay MacDonald gave a decision generally called the Communal Award under which the Muslims got separate representation. When the first elections were held under the 1935 Government of India Act reforms, the Muslim League did not win as great a victory as was expected, although a majority of Muslim seats were captured by it. Nothing daunted Mr. Jinnah continued to organise provincial branches. The hope that under the new constitution both Congress and the League would work Provincial Autonomy in such manner as would prepare them for a joint shouldering of higher responsibility under a federal centre, as conceived under the 1935 India Act, disappeared when the Muslim League declined to sign the Congress pledge and merge its parliamentary party with that of the Congress, a condition on which the Congress insisted for the formation of Coalition Ministries. The Quaid-e-Azam refused to convert the League into as he called it "an understudy of the Congress."

The Lucknow session of the Muslim League in the autumn of 1937 found the League the most authoritative and representative organisation of the Muslims of India, although it was not the only spokesman for the community as many Muslims still remained outside the League either as members of the Congress or as members of other parties. When the Congress Ministries took non-League Muslims into the Government, it was construed as adding insult to injury, and a widespread campaign against the Congress administration ensued.

The outbreak of the Second World War came also as a blessing in disguise for the Muslim League which enhanced its power and prestige among the Muslims and its bargaining position with the British Power. Again the Congress attitude of neutrality to the war and its opposition to the war effort also helped the Muslim League whose Working Committee declared that it was ready to offer whole-hearted co-operation if the Government recognised the League as the sole representative organ of the Muslims. The rift with the Congress became wider still when the resignation of Congress Ministries was celebrated as a "Day of Deliverance" by Muslim Leaguers throughout India.

In October 1939, the then Viceroy, Lord Linlithgow, initiated a series of negotiations in order to bring about rapprochement between the two parties. One of the purposes of the Conference was to make known the British war aims *vis-a-vis* India. The subsequent Viceregal pronouncement was hailed as a charter of freedom for minorities, particularly for the Muslims of India.

THE RESOLUTION

The next and in fact, the most important landmark in the history of Indian Muslims, is the resolution passed at the Lahore session of the Muslim League, urging the establishment of Pakistan. The resolution stated:

"While approving and endorsing the action taken by the Council and the Working Committee of the All-India Muslim League, as indicated in their resolutions dated the 27th August, 18th September, 22nd October 1939, and 3rd February 1940, on the constitutional issue, this session of the All-India Muslim League emphatically reiterates that the scheme of federation embodied in the Government of India Act 1935 is totally unsuited to, and unworkable in the peculiar conditions of this country, and is altogether unacceptable to Muslim India.

"It further records its emphatic view that while the declaration dated the 18th October 1939 made by the Viceroy on behalf of His Majesty's Government is reassuring, in so far as it declares that the policy and plan on which the Government of India Act 1935 is based will be reconsidered in consultation with the various parties, interests and communities in India, Muslim India will not be satisfied unless the whole constitutional plan is reconsidered *de novo* and that no revised plan would be acceptable to the Muslims unless it is framed with their approval and consent.

"Resolved that it is the considered view of this session of the All-India Muslim League that no constitutional plan would be workable in this country or acceptable to the Muslims, unless it is designed on the following principle—*viz.*, that geographically contiguous units are demarcated into regions which should be so constituted with such territorial adjustments as may be necessary, that the areas in which the Muslims are numerically in a majority as in the north-western and eastern zones of India, should be grouped to constitute "independent states" in which the constituent units shall be autonomous and sovereign.

"The adequate, effective and mandatory safeguards should be specifically provided in the constitution for minorities in these units and in the regions for the protection of their religious, cultural, economic, political, administrative and other rights and interests, in consultation with them; and in other parts of India where the Mussalmans are in a minority, adequate, effective mandatory safeguards shall be specifically provided in the constitution for them and other minorities for the protection of their religious, cultural, economic, political, administrative and other rights and interests in consultation with them.

"The session further authorises the Working Committee to frame a scheme of constitution in accordance with these basic principles providing for the assumption finally by the respective regions of all powers such as defence, external affairs, communication, customs and such other matters as may be necessary."

In a nutshell the resolution intended that the provinces of Sind, Punjab, N.-W.F.P. and Baluchistan in the north-west region and Bengal in the eastern region, should be constituted into independent states, and there should be no common centre for the Hindustan and Pakistan parts of the sub-continent.

THE BIRTH

From this day onwards, Quaid-e-Azam Jinnah who had become the permanent and undisputed President of the Muslim League, refused to consider any arrangement which did not recognise the validity of the two-nation theory. He explained that Pakistan alone would save Muslims from the tyranny of the Hindu majority in India. The two-nation theory caught the imagination of the Muslim mind and the stronger the Congress objection the more insistent the Muslims became. At the Madras session of the Muslim League in 1941, the Quaid-e-Azam called on the British Government to divide India and establish separate western and eastern zones where Muslims were in majority so that they were free to manage their affairs as they chose while adequate safeguards were to be provided for Muslims in Hindu areas. Later the League declared its opposition to the Cripps proposals which conceded the principle of provincial autonomy partly on the ground that the Congress had already rejected them and partly that they did not go far enough. It was about this time that the Quaid-e-Azam sought to establish League Ministries in provinces where Muslims were in a majority, and except in Sind and N.-W.F.P. he quickly succeeded; later Sind also swung into line when Khan Bahadur Allahbaksh, Sind's non-League Premier was dismissed from office, for renouncing his titles.

The "Quit India" movement started by Mahatma Gandhi in 1942 actually gave the Muslim League a new slogan "divide and quit". But efforts were made to find a solution by both Mr. C. Rajagopalachari, the Madras Congress leader (later Governor-General of India), and later by Mahatma Gandhi himself, which would meet the League claim for Pakistan without loss of Indian unity. But it was too late. Still a last effort was made by the British Cabinet Mission consisting of Lord Pethick-Lawrence, Sir Stafford Cripps and Mr. A. V. Alexander to preserve Indian unity. These three formulated a scheme which conceded the substance of the League demand of autonomous governments in the Western provinces of the Punjab, Sind, N.-W.F.P. and Baluchistan, and the eastern provinces of Bengal and Assam, with an All-India federation having only three common subjects of defence, communications and foreign affairs. The League agreed; but the Congress rejected the grouping principle unless the provinces were given the right to opt out of a group, prior to the framing of the constitution, which was not acceptable to the League. This again resulted in deadlock and having failed in their last effort to maintain the unity of India the British Government at last decided with the agreement of the two parties to divide the country. And so a new state called Pakistan came to be established.

The provinces of the Punjab and Bengal were partitioned, the boundaries being decided finally by a Boundary Commission.

LANGUAGE AND LITERATURE

WITH its several provinces, each inhabited by a largely homogeneous racial group and each having its own tongue, it is only natural that Pakistan should have variations of language from province to province. But there is a common language which is spoken and understood in every province and which is the *lingua franca* of Pakistan. This language is Urdu. When the Muslims first came to India in the 8th century they found several languages spoken in this country. The necessity of communicating with the inhabitants of the country gave rise to the first faint beginnings of a new language consisting of elements of Persian, Arabic, Turki and the various dialects spoken in India, known as the prakrits. Since the Muslims made Delhi their capital, Saurseni and Brij Bhasha, the two dialects spoken around Delhi and its environs, Meerut, Agra and Mathura, became the main base of Urdu and supplied it the grammar, syntax and the largest part of its vocabulary. The other prakrits, spoken in the various provinces of the country, supplied it with innumerable words, with Muslim sufis, divines, soldiers, administrators sent to all parts of the country absorbing its language and culture. Thus a language of the common people was evolved which was a blend of Arabic, Persian, Turki and native dialects.

By the beginning of the 14th century poetical and mystical works were being written in this new language. Under the Moghals (1526-1857) it rose to high literary standards. This language, which was called Hindi (Persian word meaning 'pertaining to India') up to the time of Akbar, now came to be called by the Turkish word Urdu—meaning the language of the camp. When Shah Jahan (1627-58) built the Red Fort at Delhi and established his new capital there, he raised the status of the language by calling it Urdu-e-Moalla or "exalted Urdu". The court language was still Persian, but the language of the people and of the ladies of the palace was henceforth Urdu. While Urdu had been maturing in the zenanas and bazaars of Delhi in the fifteenth and sixteenth centuries, it was being nourished and used for literary expression in the south under the Bahmani Kingdom (1347-1526) and its successors. Thus the first definite school of Urdu poetry made its appearance in the first decade of the 16th century and flourished in the Deccan until the rise of the Delhi school in the first decade of the 18th century.

LITERARY SCENE

While in art, more especially that produced by the younger generation, the activity is today mainly experimental, in literature there is a surer sense of confidence, and a deeper realization of certain fundamental values. New techniques are of course not taboo; but old forms are being enthusiastically revived. *Ghazal* has staged a dramatic come-back; rhymed verse, lyrics, songs, quatrains are being produced at a rate with which blank or free verse can hardly ever hope to keep pace.

In prose, that most flexible and extremely manoeuvreable medium the short story seems to be giving in to the rigid but broader, fuller canvas of the Novel: more novels have in fact been written in one year now than in any twenty years in the past. Essay and criticism are also gaining in popularity and, with a generous sprinkling of humour and satire. Even the short story, though today not equal in quality to that of seven or eight years ago, and not as popular is making some headway.

Another interesting feature has been the growth of literary groups and societies—regional as well as national in scope and outlook. The average writer, though still exploited by the avaricious publisher, finds ready enlightened patronage among the new class of "listeners" created by these "open-air" discussion groups, symposia and *mushairas*, and above all, the radio. The number of literary weeklies, monthlies, quarterlies and annuals published in both East and West Pakistan is legion.

Reviewing the Pakistani literary scene from 1947 to 1951, the most striking feature that commends itself to the average reader is the way the younger writers have risen above the depressing circumstances of early Partition days.

URDU LITERATURE

The early specimens and works of Urdu are religious in character or are long tales in verse. The style often lacks perfection and grace and the images and similes are simple. Although Persian influence is easily discernible, the poetry of the Deccan was essentially Indian in theme and inspiration. With the 17th century, however, Persian influences became more active, and when Delhi took to writing in Urdu her poetry became modern, and the classical age that thus began with the commencement of the 18th century lasted till the first two decades of the present century.

During the last 50 years, or so, Urdu has been profoundly affected by Western thought and literature under whose influence new literary forms have sprung up. Moreover, a vast body of scientific work from English and the continental languages has been translated into Urdu. In the first decade of the 20th century Muslim political consciousness found a vivid and forceful expression in this language. Hali, Akbar, and Iqbal were three outstanding figures who instilled a new life into Muslim thought through their poetry. Urdu poetry can justifiably claim a high place among the literatures of the world. The poetry of Mir Anees, Ghalib, and Iqbal has attained an extremely high stature in world poetry.

Urdu literature blends the best traditions of three ancient cultures—Arabian, Persian and Hindu. During the last century it has absorbed European influences with ever-accelerated pace. In point of richness—both notional and verbal—it has few parallels among Asian literatures. Long before Pakistan's inception, Urdu poets had evolved a diction strikingly terse, meaningful and harmonious, to portray almost every variety of human mood to write with subtlety and effect of friendship and love and fate, to record with sweetness or vigour their observations on social and religious, moral and philosophical themes. Prose style enriched itself from diverse sources through one of the most extraordinary fusions in linguistic history. Urdu literature is a complex: its infinite variations of tone and colour come from the Indian Prakrits, from Arabic, from Persian, from Turkish, and from many other sources. And the prose-writers have turned this material to excellent account. From the transparently simple to the magnificently ornate, from the airily frolicsome to the seriously reflective Urdu prose covers a wide field both in matter and manner.

Notwithstanding these manifold accomplishments, Urdu literature has not kept up with the rapidity of advance in the modern age. Modernism, in the form of "popular appeal" and "realism," was first experimented upon by Nazir and Insha at the eighteenth-nineteenth century cross-roads. The experiment was continued with increasing vigour throughout the last century. But a genuine democratic outlook was still far away, awaiting the hour of national deliverance. Most (though certainly not all) of pre-Pakistan Urdu literature bears the hallmark of feudalism. In its courtly grace, in its aristocratically confident values of life, in its devotion to the ideal rather than the real, this literature speaks of a bygone age of pageantry and power.

Some of the outstanding literary contributions during this period have been claimed by fiction, especially the novel. Besides popular, picaresque and semi-historical novels of M. Aslam, Naseem Hijazi Rashid Akhtar Nadvi and Rees Ahmad Jaffri, two excellent novels have been published one by Aziz Ahmad, and another by the young woman writer, Quratul Ain Haider. Abu Saeed Qureshi's projected triology, two volumes of which have already been published, promises to be an interesting experiment in psychological writing. Hejab Imtiaz Ali's *Andhera Khawab* (The Dark Dream) is also a refined experiment in psycho-analysis and is one of the very few novels of this type in Urdu.

Aziz Ahmad's *Aisi Bulandi Aisi Pasti* (So High, So Low), has already been acclaimed as a most moving and penetrating study of upper and lower strata of social life under feudal system, but the novel is indeed much more than this: it is an extensive portrait gallery of remarkably vivid characters drawn from life and depicted against a realistic background of prejudices, inhibitions and a complex social order, Quratul Ain's novel *Mere Bhi Sanam-khane* (My Temples Too), on the other hand, develops in a rather too romantic atmosphere, and her lightly-drawn characters, sophisticated and aristocratic, seem to live in a glass-house which is ultimately shattered by the storm of events that took place shortly before the partition of the sub-continent. The vast refugee movement from India to Pakistan has inspired another remarkable novel *Darbe* by A. Hamid, which tells of the brave struggle of a refugee family from East Punjab, as it moves from slum to slum in Lahore.

Among the more topical novels and rapportage written under the direct impact of events following the partition, the most important are Mahmood Hashmi's brilliant *Kashmir Udas Hai* (Kashmir is Sad) and Qudratullah Shahab's powerful novelette on the aftermath of riots, *Ya Khuda* (Oh God).

Two excellent translations of Flaubert's *Madame Bovary* and Isherwood's *Goodbye To Berlin* were made by Hasan Askri, and were largely welcomed as the precursors of many more classics to be steadily rendered into Urdu.

This widening of the literary horizon has also introduced a welcome note to the modern short story which, at one time, seemed to have been completely eclipsed except under the versatile pen of Saadat Hasan Manto. Manto, in fact, is a very fine example of how intelligent writers reacted to the ghastly events closely following upon the partition of the sub-continent, and how the centre of interest shifted from actual atrocities to the many and varied socio-economic problems which these events brought in their wake. Manto is a meticulous craftsman, and with his great skill for telling a story he has described, in small narratives and incidents, some of the most important aspects of life as it is being moulded on the anvil of national aspirations.

Some outstanding volumes of short stories have been published during these four years, such as Qudratullah Shahab's *Nafsane*, Mumtaz Shirin's *Apni Nagaria*, Askari's *Qiamat Hamri-kab Ae na Ae*, Aziz Ahmad's *Bekar Din Bekar Raten*, Ghulam Abbas's *Anandi* and Shaista Suhrawardy's *Koshish-Natamam*. Among the younger short story writers who have come into prominence since Pakistan came into existence, the most remarkable are Ashfaq Ahmad, A. Hameed and Intezar Hussain.

In poetry as in fiction, while there is a deliberate return to some of the older forms, the stress is on the new vistas that have been opened, the new liberal, optimistic outlook and the new understanding of facts and phenomena of life which has come of the awareness of political as well as intellectual freedom. In the national as well as regional poetic literatures of the last four years, the assertive force of nationalism is present, but it has been tempered by a zest for championing the cause of the oppressed and the down-trodden anywhere on the surface of the earth.

The veteran poets are also there, represented by the silver-voiced Hafeez and Salik of the older school, and N. M. Rashed and Faiz of the modern.

But the younger generation is more active—Yusuf Zafar, Qayyum Nazar, Qateel, Qasmi, Khail and Mukhtar Siddiqi. Since Pakistan's inception two young *Ghazal* writers, Saif and Adam have shown considerable promise. The longer poem has gained momentum, though it is still in an experimental style. Azar, Shanul Haq, Jamiluddin Aali and Ibne Insha have made successful experiments in longer verse.

In literary criticism and research the two towering figures of Maulan Abdul Haq and Maulana Syed Sulaiman Nadvi are still actively at work.

In criticism, Iqbal has been the principal subject of study and discussion.

There are two other problems engaging the attention of the modern Pakistani critic. One of these is the shape and values of the literature to come and the place of 'tradition' in it. The other vital question concerns what may broadly be termed a rediscovery and revaluation of our classical literature. Askari, Dr. Abdullah, Maulana Salahuddin, Mumtaz Shirin, Ibadat Brelvi, Dr. Abul Lais Siddiqi and above all the late Dr. Taseer have been the most influential critics during these four years.

A new school of literary criticism is growing in Urdu, which is emphasising the necessity of closer harmony between, the literature which is being written, and the life in the country which has undergone a vital change since the attainment of freedom.

The most characteristic—and the really essential work of this period has been done not by the artists but by the "rude mechanicals" who have planned, organised and put in gear the mechanics of Urdu literature. There is the Kul-Pakistan Anjuman-e-Tarraqui-e-Urdu, jealously watching and directing the trend of events into channels favourable to the development of Urdu. There are the educationists who strove successfully to make Urdu literature a University subject up to the Master's degree and are now trying to make the Urdu language the medium of instruction and examination in all Pakistani Universities. There are others who are busy writing text-books or standardising technical terms, as also those who are devising ways and means to make Urdu the official language of the country. Among these workers, too, are the experts who are trying (with ever-increasing success) to make it possible for Urdu print to change from lithograph to type.

The inspiration of both literary creation and literary organisation is patriotic. Urdu has a peculiar place in Pakistan: it is not only the national language, it is also part of the national creed. One of the explicitly-stated objectives of the fight for the attainment of Pakistan was the survival of the Urdu language. Thus the devotion to Urdu springs from the omnipresent sentiment of nationality. The librarian who compiles our original work on the classification and cataloguing of books, and the shop-keeper who enthusiastically changes his signboard from English to Urdu, are both equally devoted to the cause.

PUNJABI LITERATURE

Although the province of the Punjab has played a leading role in the development of Urdu and some of the most famous writers of Urdu today belong to the Punjab, the spoken language of the province is Punjabi. It is a sister dialect of Prakrit and bears a close resemblance to Urdu. It is thus easy for an inhabitant of the Punjab to speak and understand Urdu and nearly everybody is able to speak it. Nevertheless, Punjabi has a literature of its own and poetry and folk-songs are still written in that language. One of its classics, the famous Hir Ranjha of Waris Shah, a mystical poem of several thousand verses, is ranked amongst the great poems of the world. Another great poem is the Sohani-Mahiniwal, a love story written by Fazal Shah. Both these poems are extremely popular, particularly in the villages. Education in the Punjab is imparted through the medium of Urdu except in the Universities where the medium of instruction is English. Urdu is also the court language in the Punjab.

SINDHI LITERATURE

Sindhi is the language spoken and written in Sind. Although an offshoot of the Indian Prakrit, it was the first language of the sub-continent to come under the influence of Arabic due to the Arab occupation of Sind in the 8th century A.D. Sindhi is written in the old Naskh Arabic script and 30 per cent of its vocabulary consists of Arabic words. Its literature is, comparatively speaking, small but contains some excellent poetry such as is found in highly cultivated languages only. Among the Sindhi poets the works of Shah Abdul Latif are universally popular.

PATHAN LITERATURE

The language of the Pathans is Pushtu which does not belong to the Indo-Aryan family of languages and is, therefore, very different from Urdu, Sindhi, Punjabi and Bengali, the main Pakistani languages of Indo-Aryan origin. It is written in a modified Arabic script and contains many words of Arabic and Persian which bring it close to Urdu. Pushtu literature has been traced back to the 7th century and consists mainly of poetry, lyrical as well as mystical. Khushal Khan Khattak and Rahman Baba, both belonging to the 17th century, are regarded as the national poets of the Pathans. They have left complete deevans, or collections of poems. Pushtu is spoken both in the North-West Frontier Province and Afghanistan, with some variations in vocabulary and script.

BENGALI LITERATURE

The language of East Bengal—Bengali—has a highly developed literature of its own. Belonging to the Indo-Aryan group of languages it has a predominantly Sanskrit vocabulary although a large number of Persian and Arabic words have become part of the lanzuage as a result of Muslim influence. Its script is also of the same family as Deva Nagari although it has existed independently for at least eight centuries. A hundred years ago Bengali prose and poetry were so heavily enfettered by Sanskrit words as to be unintelligible to the common people. In the early years of the 19th century, however, Raja Ram Mohan Roy, Akshay Kumar Datta and Ishwar Chandra Vidyasagar initiated a movement for simpler expression and a greater use of the spoken word in literature. This movement later blossomed into a renaissance which produced such great literary figures of modern Bengal as Bankim Chandra Chatterji, Madhusudhan Dutia and Rabindra Nath Tagore. Of these, Tagore achieved international recognition with his lyrics and plays which were largely inspired by Bengali folk-songs and many of which have been translated into English. He also wrote a large number of novels, short-stories, plays and philosophical discourses. Bengal has also produced some great Muslim poets and the songs of Alaul, Qazi Nazrul Islam and Jaseem-ud-Din are sung throughout East Bengal, and some of Jaseem-ud-Din's poems have been admirably translated into English under the title, The Painted Quilt.

Today Bengali literature of East Pakistan continues the rich tradition of Qazi Nazrul Islam, who is still alive, though wrecked and silenced by illness. Nazrul Islam had introduced a vast number of Arabic, Persian and Urdu words, paving the way for the younger writer to deepen the Islamic colour. The task of reviving the Islamic element in Bengali literature was taken up by a group of writers and friends of Nazrul Islam—Habibullah Bahar, Shahadat Hussain and Ghulam Mustafa and Jasimuddin, who is next to Nazrul Islam, the most renowned poet of East Bengal. He painted Muslim rural life in his lyrics with the skill, accuracy and the breadth of vision of a Dutch painter. A volume of his poems *Field of an Embroidered Quilt* has already appeared in an English translation.

Prose in East Pakistan developed Pakistani national trends even before Pakistan achieved a political existence. Habibullah Bahar's *Pakistan* is one of the first books written on the ideology of the new State. Progressive Muslim writers turned to Islamic history and culture. Post-partition literature of East Bengal has intensified this trend and given it an added momentum.

The human element which was introduced by Nazrul Islam, is being accentuated today. Short story writers, poets, essayist and novelists are all writing about the life in the villages. Their aim is to enrich Bengali language and literature on a very wide scale and, to turn it into a "systematised, simplified vast confluence of the words and thought of the Muslim World."

Among the East Pakistani short story writers of today, Shaukat Usman, Abu Rushd, Abul Kalam Shamsuddin are the most outstanding. Shaukat Usman's stories, prolific as they are are all about the poor and their fate. Abu Rushid has painted life in East Bengal with remarkable deftness in his *Rajdhani Te Jjor* (Storm in the Capital).

Among the dramatists, Shahdad Hussain is the most eminent. He has recreated the Muslim past in his plays, such as *Beer Bandhani* (Imprisoned Heroine) and *Morur Bukdy* (In the Heart of the Desert). Ibrahim Khan is another successful playwright whose *Anwar Pasha* and *Kamal Pasha* have been staged several times.

A number of writers in East Pakistan have made valuable contribution to Urdu literature. The veteran Urdu poet of East Bengal, Raza Ali Wahshat is as active as ever. Wahid Qaiser Nadvi and others have contributed very interesting articles about the life and the landscape of East Bengal. A Bengali woman is the professor of Urdu at the Government College of Women in Karachi.

ARCHÆOLOGY & ARCHITECTURE

BURIED cities dating back more than 5,000 years, and monuments of outstanding architectural and artistic interest form part of Pakistan's archæological heritage and furnish one of the richest fields for antiquarian research. Of the standing monuments, 172 lie in West Pakistan and 79 in Eastern Pakistan. While it has been ascertained that ancient mounds in Eastern Pakistan contain the structural remains of Buddhist monasteries and Brahmanic sanctuaries of the first millennium of the Christian era, those in Western Pakistan contain extensive remains of ruined cities and citadels of that highly developed pre-historic culture which is now known as the Indus Valley Civilisation. Four such ancient sites have been excavated so far in Western Pakistan. The one at Nal in Baluchistan has yielded vast remains of what was probably a royal cemetery. At Mohenjodaro in the Larkana District of Sind, a city of metropolitan proportions has come to light which, together with the portable finds it has yielded, has made archæological history. At Chanhu Daro, in the Nawab Shah District of Sind a town of the same period as that unearthed at Mohenjodaro has been revealed, while at Harappa in the Montgomery District of the Punjab, the remains of a vast citadel of the Mohenjodaro period have been exposed to view. Evidence of the immense variety of finds recovered from these sites of more or less contemporary period of pre-historic antiquity has established the fact that 3,000 years before Christ the people of those areas which are now known as Baluchistan, Sind and the Punjab, though not aware of iron and its uses and still making implements of chert and quartz for occupational purposes, were living in planned cities and well designed houses and had, in respect of the art of living, attained a high degree of culture and refinement in the development of which pictographic script played a conspicuous part. The Indus Valley Civilisation flourishing 5,000 years ago is one of the three oldest civilisations discovered so far in the world.

In Pakistan the archæological remains of the known period of history, as opposed to pre-history, embrace a period of more than 2,600 years beginning with the 7th Century B.C. The famous ancient city of Taxila, situated 21 miles north of Rawalpindi in Western Pakistan and extensively explored during the last 30 years, has furnished a great field for antiquarian research of absorbing interest. The excavations have brought to light the remains of three cities which flourished from the 7th Century B.C. to the 5th Century A.D. under the successive political and cultural domination of the Achæminid Persians; the Macedonians of Alexander's army; the Mauryas of Asoka's time; the Hellenised Bactrians; the Sakas or the Scythians; the Pahlavas of Parthia and the Kushans of Purushupura, or modern Peshawar. For about ten centuries—between 500 B.C. and 500 A.D.—Taxila was a great seat of culture and learning and a meeting ground for diverse cultural influences of Eastern and Western countries.

The Yusufzai tract with its neighbouring valley of Swat, north of Peshawar, is a happy hunting ground for the students of ancient plastic art. This tract in ancient days was called Gandhara and, during the first centuries of the Christian era its people developed a school of sculpture which specialised in applying the classical forms of Greek art to Indian and particularly Buddhist subjects. Known as the "Gandhara School of Art", or "Græco-Buddhist sculpture", specimens of these beautifully handled sculptured pieces are to be found in abundance in the whole of the Yusufzai tract. They have excited much interest and admiration in art circles in Europe and U.S.A.

ISLAMIC ARCHITECTURE

The architecture which has left the deepest impress upon the buildings of Pakistan, however, as of the entire sub-continent, is the Muslim architecture of Turkish, Persian and Central Asian origin brought to India by its Muslim conquerors.

The period of Muslim rule over India, beginning with the 13th century and extending right upto the middle of the 18th century, is the greatest building era in Indian history which is also the history of Pakistan. This is exemplified in its spectacular achievements no less than in the elaboration and full realization of certain principles and forms which became fundamental to all later Indian architecture. The most valuable contribution of Islamic architecture is the dome of monumental size used in the building of mosques, shrines and tombs throughout the sub-continent. The minaret, the niche, the monumental arch and other achievements in the sphere of architectural decoration, such as stucco, mosaic faience, pietra dura and the colourful inlay work along with thousands of other decorative devices, are some of the gifts which Islam later bestowed on all Indian architecture through the Moghals. Thus the famous Taj Mahal at Agra, the Pearl Mosque in the Red Fort at Delhi, the Jama Masjid at Delhi, the buildings of Fatehpur Sikri and of the Agra Fort are essentially Muslim in inspiration and execution and, though situated in India today, are a fundamental part of the heritage of Pakistan.

Muslim monuments which have survived in Pakistan belong mostly to the Moghal period. Even some of these were destroyed during disturbances in the Punjab previous to the beginning of British rule. The most important Moghal monument in Pakistan is the Fort at Lahore. Its existence can be traced back to the 10th century, but it was Akbar who enlarged and rebuilt it when he held his court here between 1578 and 1598. Various structures were, however, added by the Emperors Jehangir, Shahjahan and Aurangzeb. The Elephant Gate, which was the royal entrance is gorgeously decorated with tile mosaic. The unique feature of this decoration is that some panels depict living beings, a practice not found in Islamic architectural decoration. The ornamentation is continued on the Fort wall which is 500 yards long and 16 yards high, in other words a surface of nearly 8,000 square yards is covered with these brilliant tiles. In these panels elephants, camels, horses and human figures have been depicted with vigour and restraint. The other important buildings of the Fort are a palace built in parts by Jehangir and Shahjahan; a lovely mosque in white marble called Moti Masjid or Pearl Mosque, the Shish Mahal or Palace of Mirrors with its wonderful pietra dura decoration and the ornamental Shah Burj or Royal Tower, built by Shahjahan. There are also mausoleums of Jehangir and his queen, Nur Jahan.

Wazir Khan's Mosque, built in Lahore in 1634, is an extremely beautiful building. Its brick walls are covered with inlaid work of the Kashi type, a kind of mosaic of glazed tiles. The structure and the decorations are notably Persian in character. From the gallery round the minarets one can have a very fine view of the city. The Badshahi Mosque, built by Aurangzeb is a structure remarkable for its enormous size, though not so much for its elegance. It is the largest mosque in the world and can hold a congregation of 100,000 at a time.

Sind provides archæological material worth a life-time of study and research. Nearly every district of this ancient land is strewn with monuments dating from pre-historic times to the middle of the last century. At Mohenjodaro relics contemporaneous with and similar to those at Babylon have been discovered, while Brahmanabad, Mirpur Khas, and Jarak have Buddhist stupas and antiquities. Alor, Hyderabad, Sukkur and Larkana have many interesting monuments worth studying. Thatta 50 miles from Karachi, is full of Muslim monuments dating from the 13th century. The most important among these is a great mosque built by Shahjahan as a memorial to his visit to Thatta when, having quarrelled with his father, Jehangir, he was for the time being an exile from the Court. This mosque is one of the few surviving Moghal buildings in brick. Its great feature is its coloured tile-work within the whole interior being covered with it. The tiles are of beautiful colour and show an infinite variety of pigments and design.

At Paharpur in the Rajshahi District of Eastern Pakistan a 10th century Buddhist temple and monastery of brick masonry, the largest of its kind in the sub-continent, has been recently unearthed and is now being preserved with care. Gaur and Pandua in Eastern Pakistan possess a remarkable array of Muslim monuments.

Apart from the pursuit of archæological exploration and excavation of ancient sites, and preservation and conservation of standing monuments which are its primary functions, the Department of Archæology of the Government of Pakistan is also responsible for the maintenance of three museums of exclusively archæological exhibits at the three famous antiquarian centres of Mohenjodaro, Harappa and Taxila which have long since become places of pilgrimage for the serious as well as the casual students of the history of this ancient land.

The establishment of the Pakistan National Museum which has been housed in the Frere Hall at Karachi is worth mentioning. Karachi being one of the most important traffic-centres in the country the Government propose to develop the Museum into one of international importance. All important exhibits are being collected in this Museum.

1950 EXCAVATIONS

The year which opened in March, 1950 was one of intense activity in exploration of the archæology. Within fourteen months, no less than three major field campaigns were carried out, at Mohenjodaro in the heart of Sind, at Bhambhor on the coast, and in the Quetta Valley of Baluchistan. The first two of these were sponsored and conducted by the Archæological Survey of Pakistan, while on the third, the Survey was associated in the field with a party of American archæologists.

The excavations at Mohenjodaro, which opened the year, were the direct outcome of an excavation carried out in 1946 at Harappa, the other great city of the Indus Civilization, by Dr. R. E. M. Wheeler. But so vast in area are these two sites, so deep is the debris of buildings and household refuse which has accumulated through the centuries, that only a portion of either city had been brought to light. Moreover, one question of the greatest interest remained unanswered: had the cities of Mohenjodaro and Harappa been fortified or were they 'open' towns? It seemed that if these great cities had really been unfortified, then their inhabitants must have lived in a state of idyllic peacefulness unknown in the world today. Moreover the early excavations on the Indus cities, while carried out on the grand scale were not recorded in the accurate and detailed manner which had become usual on smaller sites in Europe.

Thus matters stood until the accidents of war and its aftermath brought to this sub-continent archæologists trained in other fields who gazed on the ancient sites with a fresh vision. To two of them, Director (then Brigadier) Mortimer Wheeler and Professor (then Colonel) Stuart Piggott goes the credit, of a new interpretation of Indus cities. They pointed out that, among the complex groups of mounds which represent the ancient cities of Mohenjodaro and Harappa, one mound at each site stands out from the rest by reason of its greater height and compactness. At Mohenjodaro the so-called Stupa mound had been the seat of some of the most

important public buildings of the city, the Great Bath, the 'collegiate' or Palace building, and the pillared Assembly Hall. Near the foot of the corresponding mound at Harappa had stood a granery, working platforms and cooly-quarters the layout of which suggested public rather than private control. Again an examination of the surface debris of these two mounds seemed to show that they had both been surrounded by a fortification wall built of sun-dried bricks. From these and other indications it was concluded that each of these mounds had formerly been a fortified administrative and religious centre, dominating the rest of the town; in fact, a citadel of the type familiar from the political history of many lands and times, and best represented in this country by the Shahi Qila at Lahore. Excavations at Harappa in 1946 proved the existence of the mud-brick fortification wall and, therefore, appeared to clinch the argument.

In late February, 1950 Dr. Wheeler directed a new set of operations with the assistance of Mr. Ahmad Hassan Dani and Leslie Alcock at two sites on the citadel mound. After two months of excavation there stood revealed an assemblage of solid block of masonry, which still rise more than ten feet above the level of the surrounding country. On the east, these solid towers were linked by a parapet, which looked out over a low valley at the residential quarters of the city. On the parapet itself were found almost a hundred balls of baked clay, which had clearly been intended as missiles.

At the second site was reborn the Great Granary of Mohenjodaro for such the building proved to be. Only the base of the Granary had escaped damage, but even so it forms one of the outstanding buildings in an area noted for its impressive remains.

Solid cubes of brick-work, up to twenty feet high formed a block over fifty yards long and twenty-five yards wide. Above this masonry base the Granary proper was raised on timber frame-work. The base was divided by a grid of corridors or air-ducts, which served to ventilate the Granary and to keep the grain fresh. The great size of the Granary suggests that it must have been a public building, comparable in this to other nearby edifices.

The excavations also gave some hint of the means of access from the plains to the Citadel, for to the south of the Granary was uncovered the foundations of a monumental ramp or stairway leading up between parallel walls to the level of the streets around the Granary and the Great Bath.

Whether or not the handful of pottery they recovered sixteen feet below water-level just before abandoning the trench really represents the earliest remains of the Indus civilization cannot yet be confirmed: but certainly these relics are far earlier than anything previously discovered on the site.

Outside the main mounds of ruins and below the present level of the plain, there stood a massive wall of sun-dried brick which had been repaired and strengthened on its outer face by the addition of yet more courses of mud-brick work. Its purpose was to defend the city against floods as much as against human enemies Now this wall goes back to a considerably earlier period than that of the Granary and the other buildings of the Citadel and indeed it was probably in ruins when the Citadel was raised. But there are no convincing signs of a defensive wall in the 'Citadel' period.

If it be true that the great public centre of Mohenjodaro was unfortified then the 'Citadel' thesis as it has been stated previously, requires some modification. Of course, it has never been necessary to see in the Citadel the seat of a despotic power, for a strong minded oligarchy or even a democracy of the Greek type would have been as capable of creating a well planned and socially-disciplined city as any tyrant. But now it appears that the two leading cases, Mohenjodaro and Harappa, are not strictly comparable. At Mohenjodaro we have the public buildings appropriate to a citadel but no fortifications. At Harappa we have a high fortified mound and no trace of public buildings on it.

Towards the clarification of that other matter left obscure by the early excavations, namely the internal history of the Indus Civilization the 1950 excavations contributed much. Firstly, the deep excavations helped to define three broad periods in the development of the city. Secondly, it has been possible to sketch the evolution of the material equipment of the Indus Civilization and to relate it to the stages of the city's growth. The earliest historical phase, represented by the large mud-brick rampart, and by traces of buildings underlying the south-east tower shows the first groping towards city life. Then came the construction of the citadel platform and its great public buildings which represent in terms both of social organization and architecture the apogee of the Indus Civilization. Such monuments as the Great Bath, and the newly discovered Granary show the natural magnificence of that culture. Afterwards came a long low period of decline, during which the superstructure of the Granary collapsed, its air-ducts were filled in and shoddy walls were erected over the debris.

The same history of advance and decay may be traced in the household objects of the time and especially in the pottery. The early excavators had believed that little or no development had taken place in the fashions and techniques of pottery-making throughout the long history of the Indus Civilization, but this view has now to be amended. The earliest crocks from the deep pit were crude, vigorous, and unstandardised. Those which were in use just before the construction of the citadel platform were equally vigorous, but a degree of standardization had been achieved which suggests that they must have been mass-produced. The citadel period exhibits, in a wide range of useful, shapely and finely turned pots, the mature excellence of Indus Valley ceramics. Thereafter less, and the repertory of types appears to decrease. Thus the Indus Civilization faded ingloriously away.

THE NEW CONSTITUTION

THE Constituent Assembly of Pakistan has not made much progress in the drafting of a new constitution for the Dominion. The only important step was the passing of an objectives resolution moved by the Prime Minister. Two Committees appointed by the Constituent Assembly have also submitted their reports—the Fundamental Rights of Minoritics Committee and the Basic Principles Committee.

OBJECTIVES RESOLUTION

"In the name of Allah, the beneficent, the Merciful:

Whereas sovereignty over the entire universe belongs to God Almighty alone and the authority which He has delegated to the State of Pakistan through its people for being exercised within the limits prescribed by Him is a sacred trust:

This Constituent Assembly representing the people of Pakistan resolves to frame a constitution for the sovereign independent State of Pakistan:

Wherein the State shall exercise its powers and authority through the chosen representatives of the people.

Wherein the principles of democracy, freedom, equality, tolerance and social justice as enunciated by Islam shall be fully observed;

Wherein Muslims shall be enabled to order their lives in the individual and collective spheres in accordance with the teachings and requirements of Islam as set out in the Holy Quran and the Sunna;

Wherein adequate provision shall be made for the minorities freely to profess and practise their religions and develop their cultures;

Whereby the territories now included in or in accession with Pakistan and such other territories as may hereafter be included in or accede to Pakistan shall form a Federation wherein the units will be autonomous with such boundaries and limitations on their powers and authority as may be prescribed;

Wherein shall be guaranteed fundamental rights including equality of status, of opportunity and before law, social, economic and political justice, and freedom of thought, expression, belief, faith, worship and association, subject to law and public majority;

Wherein adequate provision shall be made to safeguard the legitimate interests of minorities and backward and depressed classes;

Wherein the independence of the judiciary shall be fully secured;

Wherein the integrity of the territories of the Federation, its independence and all its rights including its sovereign rights on land, sea and air shall be safeguarded;

So that the people of Pakistan may prosper and attain their rightful and honoured place amongst the nations of the World and make their full contribution towards international peace and progress and happiness of humanity."

The scope of the Basic Principles Committee is to examine and submit recommendations on Federal and Provincial constitutions, the distribution of powers, judiciary, etc. The second Committee is to make recommendations, as its name suggests, on the fundamental rights of the citizens of Pakistan and the rights of minorities. Both these Committees have submitted their interim reports to the Constituent Assembly.

The Interim Report of the Fundamental Rights Committee contains recommendations in respect of the fundamental rights which should be incorporated in the Constitution and it was adopted by the Constituent Assembly on October 6, 1950. The protection of property, life, personal liberty, equality before law, *habeas corpus*, prohibition against discrimination on grounds of religion, race, caste or sex; equality of opportunity; freedom of speech, expression, association; freedom of profession of religion, are some of the rights enumerated in the report. The Report provides guarantee to all sections of the population for full freedom and opportunity for the development of their religion, education and culture. It also records as a directive principle of state policy that the "notion of untouchability being inconsistent with human dignity its practice is declared unlawful."

The Interim report of the Basic Principles Committee was submitted to the Constituent Assembly on 28th September, 1950. Its consideration was, however, postponed with a view to ascertaining public opinion on the recommendations contained in it. The main features of this report are that the head of the State will be elected in a joint session of the two Houses of the Central Legislature for a period of five years. The Central Legislature will consist of two Houses one to be elected directly by the people on the basis of population and the other to be elected by the provincial legislatures on the basis of equal representation of the provinces.

The type of constitution proposed is Federal, provinces being given full autonomy in matters like maintenance of law and order, justice, health, lands, etc. Legislative competence of the Central and Provincial legislatures will be determined on the basis of the three lists of subjects appended to the report. The first list contains subjects exclusively Central, and the second exclusively Provincial. The third list contains subjects on which the Central and Provincial Governments will have concurrent powers of legislation, but the Central law will prevail over the Provincial law in case of conflict. Much progress has also been made towards finalising recommendations of these committees on parts of the constitution relating to judiciary, franchise and rights of minorities.

Fundamental Rights

Here is the full text of the interim report on fundamental rights:—

Part I

1. At the date on which this Constitution comes into force every person shall be deemed to be a citizen of Pakistan,

(*a*) who or either of whose parents or grandparents was born in the territory comprising Pakistan and who after the fourteenth day of August, 1947, has not been permanently resident in any foreign State; or

(*b*) who or either of whose parents or grandparents was born in the territories which on the 31st March, 1937, comprised India and who has his domicile in Pakistan as described in Part II of the Indian Succession Act, 1925, had the provisions of that Part been applicable to him:

Provided that in case of his having, before the date of the commencement of this Constitution, acquired the citizenship of any foreign State, he has renounced such citizenship by depositing a declaration in writing to this effect with an authority appointed for that purpose.

2. The Legislature of Pakistan may make further provision in respect of acquisition and loss of citizenship and all other matters pertaining thereto.

Part II

1. (1) (*a*) All citizens are equal before law; and

(*b*) All persons are entitled to the equal protection of law.

(2) No person shall be deprived of life or liberty, save in accordance with law.

2. No person shall be punished in respect of an act the doing of which was not punishable at the time when it was done.

3. The right of a citizen to move the High Court for a writ of *habeas corpus* shall not be suspended, except in case of an external or internal threat to the security of the State or other grave emergency.

4. There shall be no discrimination on grounds only of religion, race, caste, sex or place of birth with regard to access to places of public entertainment, recreation, welfare or utility:

Provided that nothing in this Article shall derogate from the powers of the State to make special provision for the benefit of women and children:

Provided further that the provisions of this Article shall not apply to places of religious worship, shrines or other similar sacred premises.

5. (1) No one shall be held in slavery or servitude.

(2) All forms of forced labour are declared unlawful:

Provided that the State shall not be prevented from imposing compulsory service for public purposes.

(3) No one shall be subjected to torture or to cruel or inhuman treatment or punishment.

6. The employment of children under fourteen years of age in a factory or a mine, or in occupations involving danger to life or injury to health, is prohibited.

7. Every duly qualified citizen shall be eligible to appointment in the service of the State irrespective of religion, race, caste, sex, descent or place of birth:

Provided that it shall not be unlawful to make provision for the reservation of posts in favour of any minority or backward section of citizens in order to give them adequate representation:

Provided further that it shall be lawful to prescribe that only a person belonging to a particular religion or denomination shall be eligible to hold office in connection with any religious or denominational institution or governing body thereof.

8. (1) No person shall be deprived of his property except in accordance with law.

(2) No property shall be requisitioned or acquired for public purposes under any law authorising such requisition or acquisition unless the law provides for adequate compensation.

Nothing in this clause shall affect the provisions of any existing law or the provisions of any law which may hereafter be made for the purpose of imposing or levying any tax or for the promotion of public health or for the prevention of danger to life or property.

9. (1) Every citizen of Pakistan is guaranteed:

(*a*) freedom of speech, expression, association, profession, occupation, trade or business, acquisition and disposal of property and peaceful assembly without arms;

(*b*) the right to move freely throughout Pakistan and to reside or settle in any part thereof;

(*c*) the right to equal pay for equal work.

(2) Nothing in this Article shall affect the operation of any existing law or prevent the State from making any law relating to libel, slander, defamation, sedition or any other matter which offends against decency or morality or undermines the authority or foundation of the State; or from restricting or regulating, in the public interest or in the interest of public order, morality or health, any freedom or right guaranteed by this Article.

10. Freedom of conscience and the right to profess, practise and propagate religion are guaranteed subject to public order and morality:

Provided that this Article shall not affect the operation of any existing law or prohibit the making of any law, regulating or restricting any activity of a secular nature.

11. Subject to public order and morality, every religious denomination or any section thereof shall enjoy freedom in the management of its religious affairs including the establishment and maintenance of religious and charitable institutions and the acquisition of movable and immovable property for that purpose.

12. Subject to regulations to be made in this behalf every religious denomination or any section thereof shall have the right to procure exclusively for religious purposes all articles which are proved as being essential for worship in accordance with the rules, rites, ceremonies and customs of that denomination.

13. (1) No person attending any educational institution shall be required to take part in any religious instruction or to attend any religious worship other than that of his own community or denomination.

(2) No community or denomination shall be prevented from providing religious instruction for pupils of that community or denomination in any educational institution maintained by that community or denomination.

(3) No educational institution maintained wholly out of funds provided by a particular community or denomination shall be refused recognition by the State solely on the ground that it refuses admission to persons of a different community or denomination.

14. No person shall be compelled to pay any special taxes the proceeds of which are specifically appropriated in payment of expenses for the propagation or maintenance of any particular religion other than his own.

15. (1) Save with regard to matters governed by the personal law of a community, or otherwise expressly provided in this Constitution, any law in force in any part of Pakistan at the time of commencement of this Constitution shall be void in so far as it is repugnant to any provisions of this Part, and any law made hereafter which contravenes any of the provisions of this Part shall, to the extent of such contravention, be void.

(2) The term 'law' in this Article includes an ordinance, regulation, custom or usage having the force of law, bye-law, rule, order or notification.

16. The notion of untouchability being inconsistent with human dignity its practice is declared unlawful and shall be an offence in accordance with law.

EDUCATION

In order to achieve national integration and uniformity the Central Government have set up an Advisory Board of Education, an Inter-University Board and a Council of Technical Education. These bodies are composed of official and non-official experts.

A sum of Rs. 18 crores has been allotted for social uplift during 1951-52-53. Out of this amount nearly half is to be spent on education. The Pakistan Government has also drawn up under the Colombo Plan a Six Year Development Plan under which a sum of Rs. 19 crores out of a total budget of Rs. 260 crores has been allotted to education. The total cost of the Plan comes to Rs. 1,15,03,80,069 of which Rs. 42,79,82,914 is recurring and Rs. 72,23,97,155 non-recurring. It is estimated that the recurring expenditure at the end of 1957 will be approximately Rs. 17 crores.

Under the Plan it is proposed to open six schools in Karachi, eight in Sind and 16 in East Bengal. The Plan also provides for a total expenditure to be incurred during 1951-57 on infant schools, of the order of Rs. 31,65,302 (Rs. 14,73,702 recurring and Rs. 16,91,600 non-recurring).

The Pakistan Educational Conference recommended that free and compulsory primary education should be introduced for a period of five years which should be gradually raised to eight years. The Plan says that in the existing circumstances of the country it is considered that this period will provide a minimum preparation for citizenship. In Sind the primary stage is of four years' duration, while in Karachi it has been raised to five years. In the Punjab, the N.-W.F.P. Baluchistan, Bahawalpur and other areas the duration of the primary stage is five years. Sind expects to complete the process of introducing free compulsory education in six years, East Bengal and Karachi in ten years, and the Punjab, N.-W. F.P., Baluchistan and Bahawalpur in 20 years. Khairpur has fixed a target of five years.

The establishment of 24,027 new primary schools under this plan is expected to cost Rs. 42,54,49,499 of which Rs. 20,33,58,585 will be recurring and Rs. 22,21,35,914 will be non-recurring. As regards the quality of teachers, the report notes that out of 88,697 teachers employed in the existing primary schools, 43,471 are untrained.

There are at present 6,486 secondary schools with a total enrolment of 1,164,142. Of these 644 schools are for girls with a total enrolment of 97,737. Considering that there is a total enrolment of 3,212,312 in existing primary schools, one child out of every three children proceeds to a secondary school. During the period of the Plan, it is proposed to open 721 secondary schools (479 for boys and 242 for girls), with a total capacity of 237,600 (170,850 boys and 66,750 girls). Total expenditure to be incurred on these new schools as also on the improvement of existing ones comes to Rs. 22,79,45,788 out of which Rs. 5,74,62,311 is recurring and Rs. 177,04,83,477 non-recurring.

There are 88,697 teachers in primary schools of whom 43,471 are untrained. In secondary schools out of a total of 43,823 teachers, 24,076 are untrained. The total number of existing training institutions for primary school teachers is 125 with an enrolment of 6,145. Out of these 16 institutions are for women with an enrolment of 676. The total number of training institutions for secondary school teachers is 11 with an enrolment of 785. Out of these four institutions are for women with an enrolment of 276. It is interesting to note that in secondary schools, while the ratio between trained and untrained teachers is 1 : 1.3, among women teachers it is 2 : 1.

Under the Plan it is proposed to establish 101 training institutions for primary school teachers (men and women) with a total capacity of 11,220 and 26 training institutions for secondary school teachers (men and women) with a total capacity of 2,350. The total cost on the establishment of new training institutions as well as improvement of existing ones comes to Rs. 5,24,96,316 of which Rs. 2,87,54,016 is recurring and Rs. 2,37,42,300 is non-recurring. The total cost of inspectorial staff required during 1951-57 is Rs. 1,20,92,538 of which Rs. 1,13,54,238 is recurring and Rs. 7,38,300 is non-recurring.

HIGHER EDUCATION

The total number of existing colleges in the the country is 127. Of these 36 are intermediate colleges, 82 degree colleges and 9 post-graduate colleges. Among them are included women's colleges which are as follows : Intermediate 3 ; Degree 15; and Post-Graduate 1. The total enrolment is estimated at 39,393 (37,502 men and 1,891 women). This figure does not include students studying in the various departments of various universities. It is proposed to establish during the period of the plan 4 intermediate colleges, including one for women, 6 degree colleges including three for women and 10 hostels including three for women.

The total expenditure to be incurred on the improvement of existing colleges and hostels and the establishment of new ones is estimated at Rs. 4,00,85,856 of which Rs. 82,06,671 is recurring and Rs. 3,18,79,185 is non-recurring.

Pakistan is extremely deficient in Domestic Science and Arts institutions. There is at present only one school in Domestic Science in Lahore, which is proposed to be raised to the status of a College of Domestic and Social Sciences. Presently it has an enrolment of 41 students of whom 28 are girls studying in local colleges who have taken Domestic Science as one of their optional subjects.

In Karachi provision is being made for the establishment during 1952-53, under the auspices of the All-Pakistan Women's Association, of a full fledged College of Domestic Sciences and Arts which will impart instruction to 120 girls up to the Diploma standard and 120 students up to the Degree standard. Ten seats are being set apart for post-degree research students.

The East Bengal Government proposes to set up a department of Domestic Science in the Women's Training College at Dacca with a capacity of 50 students. Of these 25 students will be trained up to the Certificate standard and 25 up to the Diploma standard.

The total cost involved in the establishment of new institutions and the improvement of existing ones during the period of the Plan comes to Rs. 50,49,740 of which Rs. 13,92,500 is recurring and Rs. 36,57,240 non-recurring.

Of the 21 universities which existed in India before partition only three, *viz.* Punjab, Dacca and Sind remained in the territories now comprising Pakistan.

The University of the Punjab which was established in 1882 is mainly an affiliating university though it provides for post-graduate teaching and research in a few subjects. The Development schemes submitted by the University for 1951-57 involve a total expenditure of Rs. 2,77,38,418 of which Rs. 69,82,044 is recurring and Rs. 2,07,56,374 is non-recurring. These schemes include schemes for setting up one or two residential universities in the mofussil.

The Government of East Bengal is contemplating the establishment of two affiliating universities which will enable the Dacca University to revert to its original character. The Dacca University has nevertheless submitted schemes for 1951-57 on the assumption that the new universities, when established will not affect the scope of its activities as a residential teaching university. These schemes involve a total expenditure of Rs. 1,40,77,890 of which Rs. 11,73,140 is recurring and Rs. 1,29,04,750 is non-recurring.

Sind University established at Karachi early in 1947 had hardly started when partition came. The University was taken to Hyderabad in May 1951 and continues to function as an affiliating university. The development schemes submitted by this university indicate that it proposes to establish teaching-cum-research departments in a number of subjects. The total cost of these schemes is Rs. 2,92,23,218 of which Rs. 69,95,840 is recurring and Rs. 2,22,67,050 is non-recurring.

Peshawar University was established in 1950. It is a teaching-cum-residential-cum-affiliating university and as far as its development schemes for the six years are concerned, it aims at establishing a number of teaching-cum-research departments and a College of Electrical and Mechanical Engineering. The total expenditure involved in these schemes is Rs. 1,23,20,847 of which Rs. 24,84,847 is recurring and Rs. 96,36,000 is non-recurring.

Karachi University is the youngest university in Pakistan having been established in June 1951. It is intended to develop it into a unitary residential university with all the colleges in Karachi as its constituents and a number of Halls of Residence directly under its control and supervision. While undergraduate teaching and research will be organised and conducted by the colleges, all post-graduate teaching and research will be conducted by the University itself. The total expenditure involved on the the development schemes submitted by this university amounts to Rs. 6,71,66,638 of which Rs. 1,19,08,638 is recurring and Rs. 5,52,58,000 is non-recurring.

The overall cost of the development schemes of all the five universities comes to Rs. 15,05,27,011 of which Rs. 2,95,04,837 is recurring and Rs. 12,10,22,174 is non-recurring.

ADULT EDUCATION

Assuming that 60 per cent of the population belongs to the 15-40 age level suitable for adult education, and also assuming that 13.8 per cent of the population is literate, there are nearly four crores of illiterates in Pakistan.

Provision for adult education exists in all provinces except Sind, which after a brief experiment abandoned the attempt. There are altogether 881 adult education centres with a total enrolment of 27,736. Included in these are 169 centres for women with a total enrolment of 5,824. Under the six year plan it is proposed to open 8,072 centres with a capacity of 9,20,000. Thus at the end of 1957 it may be expected that 8,953 centres will be training nearly 9,47,736 adults at a time. Working on the assumption that the duration of the adult education course is four months, as many as 28,00,000 adults will be made literate every year. The emphasis will be on raising of the standards of living by initiating adults in improved methods of health, sanitation, agriculture, cottage industries, etc.

A more determined and purposeful drive may be expected if the project of a UNESCO mission of experts on fundamental education as contemplated by the Education Division of the Central Government materialises.

The total cost involved in the establishment of new adult education centres and the improvement of existing ones comes to Rs.88,85,240 of which Rs. 80,89,560 is recurring and Rs. 7,95,560 is non-recurring.

The Six Year Plan also provides for the establishment of 9 stadiums, 2 sports hostels, 530 gymnasiums and three swimming pools. The total cost involved is Rs. 1,17,86,033 of which Rs. 5,55,933 is recurring and Rs. 1,12,30,100 is non-recurring.

It is also proposed to establish 845 Youth Clubs and 27 Youth Hostels and to strengthen Scouting, Girl Guiding and the Junior Red Cross. The total expenditure involved is Rs. 83,89,112 of which Rs. 27,22,612 is recurring and Rs. 56,66,500 is non-recurring. At present there are 2,858 Youth Clubs and 6 Youth Hostels functioning in the whole of Pakistan.

On the technical side it is proposed to open 20 Technical High Schools with a total capacity of 5,430 students, 7 composite schools with a capacity of 1,770 students, 2 polytechnics with a total capacity of 2,250 students and two engineering colleges. The total cost comes to Rs. 7,52,22,390 of which Rs. 2,20,82,381 is recurring and Rs. 5,31,40,009 is non-recurring.

There are at present 8 commercial schools in Pakistan with a total enrolment of 774 students and three commercial colleges with a total enrolment of 614. It is proposed to establish 12 commercial schools with a total capacity of 4,420 students and one Institute of Commerce at Karachi with a total capacity of 350 students. The cost involved comes to Rs. 1,81,06,235 of which Rs. 60,43,389 is recurring and Rs. 1,20,62,936 is non-recurring.

FINANCIAL IMPLICATIONS

In the total budget of the Central, Provincial and State Governments for 1951-52 which comes to Rs. 1,71,34,93,350 a sum of Rs. 8,81,91,504 has been allotted to education. In view of the requirements this provision is on the face of it inadequate. The Plan involves a total expenditure of Rs. 1,15,39,00,515 of which Rs. 72,22,57,155 is non-recurring and Rs. 43,16,79,360 is the cumulative total of recurring expenditure spread over a period of six years. If the Plan is fully implemented, it is estimated that its recurring cost at the end of 1956-57 will be approximately Rs. 12.5 crores In other words at the end of 1956-57 the total recurring expenditure on education in the whole of Pakistan will be Rs. 21.5 crores.

The total non-recurring cost of primary education under the plan is estimated at approximately Rs. 22,21,00,000. This comprises the cost of land, buildings and equipment. Though it is suggested that the entire responsibility for the provision of land, building and equipment required for a primary school should be borne by the people of the locality concerned, it is realised at official level that conditions vary from province to province and in some areas within the province itself. For this reason the Government feels that its share will be approximately Rs. 5.5 crores. The responsibility of the recurring cost will be borne by the Government concerned.

In the field of secondary education, if fees are suitably adjusted, it should be possible for schools after providing for free studentships up to 20 per cent to be self-supporting and to impart education of a high standard. On this basis it has been assumed that the recurring expenditure on the existing schools and those that will be established under the Plan will be substantially reduced. Furthermore on the basis of three private schools for one Government school the cumulative recurring cost on secondary education under the Plan will be reduced from Rs. 5,74,62,311 to approximately Rs. 45,00,000. Similarly on the non-recurring side the cost of secondary education will be reduced from Rs. 17,04,83,477 to approximately Rs. 12 crores.

Since cultural activities are an important aspect of education, and it is necessary for the State to encourage them, Government propose that half of the non-recurring cost on Youth Movements and encouragement of arts and culture should be borne by Government while the remaining half should be contributed by private agencies. The total non-recurring cost of the plan is expected to be reduced by public co-operation from Rs. 72,22,21,155 to Rs. 45,34,02,570 while the cumulative total of the recurring cost for six years is expected to be reduced from Rs. 43,16,89,360 to Rs. 41.5 crores. With the reduction in the recurring cost of existing schools as well as those to be established under the Plan as a result of the expected adjustment of the present structure of tuition fees, it is estimated that the income accruing from increased fees will amount to approximately Rs. 10 crores at the end of 1956-57. This will further reduce the cumulative recurring cost of the Plan to Rs. 31.5 crores.

The recurring cost of the plan is estimated to be as follows : First Year Rs. 1.5 crores ; Second Year Rs. 3.5 crores ; Third Year Rs. 6.16 crores ; Fourth Year Rs. 8.5 crores ; Fifth Year Rs. 10.5 crores and Sixth Year Rs. 13 crores—Total Rs. 43.16 crores.

If to these figures the existing expenditure of Rs. 9 crores every year is added, the recurring cost on existing facilities and those to be provided under the Plan will amount to Rs. 10.5 crores, 12.5 crores, 15.16 crores, 17.5 crores, 19.5 crores and 22 crores in the first, second, third, fourth, fifth and sixth years of the plan respectively. If the amount of Rs. 10 crores as saving from income from fees is spread evenly over these years, the recurring cost per year will be reduced at the end of 1956-57 to Rs. 20.5 crores. The total estimated revenue of the whole of Pakistan for 1951-52 is Rs. 171 crores. This is not a large proportion of the total revenues and the advantages are expected to be very great indeed.

PUBLIC HEALTH

As in all other spheres, Pakistan has had to face immense difficulties in Public Health both in the procurement of trained men as well as of material as a result of partition and had virtually to start from scratch. Pakistan had to plan afresh the establishment of similar institutions lost to her.

Owing chiefly to high fertility and the poverty of the masses, the birth rate and the death rate in Pakistan is comparatively high. The following tables show the rates for the years 1947-48 :—

Year	Birth rate per 1000	Death rate per 1000
1947 ..	20.6	13.3
1948 ..	17.7	12.1

The existing method of compilation of vital health statistics is admittedly not satisfactory, particularly because registration is not yet compulsory in all parts of the country.

EPIDEMIC DISEASES

Both the Central and Provincial Governments have been taking necessary steps to prevent the outbreak of cholera and smallpox which constitute the principal epidemic diseases of Pakistan. In the wake of Partition, widespread epidemics of cholera broke out in West Pakistan, notably the Punjab. Pakistan had practically no anti-cholera vaccine at that time and the vaccine had to be imported from other countries or obtained from voluntary organisations, like the Red Cross Society. Eventually the epidemic was brought under control. Several districts of East Bengal were also badly affected by the diseases.

Smallpox is endemic in the Punjab and visits the province after varying periods of quiescence. In the North-West Frontier Province the disease is mild and affects only a few districts. In East Bengal its intensity is greater during the months of January to June, while there are only sporadic cases in Baluchistan.

Typhus is comparatively rare in Pakistan. In 1948 it occurred in the Dera Ismail Khan district of North-West Frontier Province but was quickly brought under control. In 1949, however, it broke out in a few districts of the North-West Frontier Province and one district of the Punjab. A few cases were also reported in Baluchistan. Plague and yellow fever do not exist in the country at all. Since, however, Pakistan is exposed to the risk of importation of yellow fever infection, the Aircraft (Public Health) Rules for Pakistan, which were published in October, 1950, have been made more stringent.

Leprosy is an age old problem. A Leper Hospital is located at Rawalpindi. Another, the Hiranand Leper Hospital at Mango Pir in Karachi is run under the auspices of the Pakistan Council of the British Empire Leprosy Relief Association and the entire expenses are provided by the Central Government in the form of a grant-in-aid (a sum of Rs. 2 lakhs has so far been provided for the purpose).

In June 1949, the Government of Pakistan set up a Pakistan Council of the British Empire Leprosy Relief Association to undertake research, propaganda and training of special doctors. The inaugural meeting of the Council was held on the July 5, 1949.

There are three schools for the blind in Pakistan : Emerson Institute for the Blind, Lahore ; Karachi School for the Blind, Bunder Road Extension, Karachi ; and the Red Cross House for War Blinds, Sialkot.

TUBERCULOSIS

Tuberculosis is widespread throughout Pakistan and ranks as one of the major public health problems of the country. Although no reliable statistics are available to show the morbidity and mortality resulting from this disease, the annual number of deaths caused by this disease in Pakistan is estimated to be 120,000 to 150,000. The number of active cases of tuberculosis may well be in the neighbourhood of 600,000.

While there are some clinics, sanatoria and hospitals for tuberculosis patients in almost all the provinces of Pakistan, in the Tuberculosis Sanatorium at Dadar the North-West Frontier Province has one of the best sanatoria. With a view to affording protection to susceptible groups of population mass B.C.G. Vaccination campaigns were started in 1949 all over the country with the co-operation of two foreign teams of the Joint Enterprise (United Nations International Children's Emergency Fund and voluntary organisations of Scandinavian countries). Upto February 1951, 6,50,132 children were tested and 2,08,870 vaccinated with B.C.G. A number of Pakistani doctors were also trained by these foreign experts in the technique of B.C.G. Vaccination and tuberculin testing.

A Tuberculosis Control and Demonstration Centre was established in Karachi with the assistance of the United Nations International Children's Emergency Fund. This centre will also serve as a training institution in modern methods of treatment and control of Tuberculosis for nominees of the Provincial Governments who will establish their own centres in due course.

The T. B. Association of Pakistan was formed in February 1949 under the patronage of the Governor-General of Pakistan and the Presidentship of Miss Fatima Jinnah. It functions as a Central Body for promoting closer co-operation between Government and voluntary agencies.

MALARIA

Malaria takes the greatest toll of lives in Pakistan, particularly in East Bengal where on account of the mosquitoes finding a good breeding ground the number of deaths on account of this disease is estimated to be 115,000 per year for a population of 45 millions. Anti-malaria campaigns are carried out in different parts of Pakistan. In the North-West Frontier Province mosquito spraying was carried out in the villages on the Kohat-Hango Road with good results. In Sind the anti-malaria campaign consisted of spraying operations, distribution of drugs like paludrine tablets and anti-malaria propaganda and demonstrations by the public health staff. Similar measures were effectively adopted in Baluchistan. In the Punjab the Anti-Malaria Organisation was as usual active in carrying out anti-larval operations, spraying of D.D.T. and treatment of fresh malaria cases. An Anti-malaria scheme for the towns of Lahore and Rawalpindi was also formulated.

At the request of the Government the World Health Organisation sent a Malaria Control Demonstration Team to Pakistan in 1949. The team carried out malaria control work for about two years in the Mymensing district of East Bengal with the result that the incidence of malaria was considerably reduced. Since the departure of the World Health Organisation team, the local malaria team has extended its activities to other malarial areas of East Bengal. While the provinces have their own anti-malaria organisations, the Malaria Institute of Pakistan at Karachi performs the important function of imparting training in malaria control work.

It was decided by the Government to set up all Anti-mosquito Organisation at Karachi to co-ordinate the activities of the various local bodies and Government Departments in eradicating the mosquitoes and flies from the Karachi area.

SOME CENTRAL ORGANISATION

In October 1948 a Medical Council was constituted under the Pakistan Medical Council Act, to establish a uniform standard of higher qualification in medicine for all provinces and to establish reciprocity with the Medical Councils and Boards of Commonwealth and Foreign countries for the mutual recognition of medical qualifications.

The Council is empowered to appoint medical inspectors and visitors to inspect examinations held by Medical Institutions for the purpose of granting recognised medical qualifications. It is also one of the functions of the Council to lay down standards regarding professional education and professional examinations.

To enable the country to meet its requirements of vaccines and sera, an Organisation called the Bureau of Laboratories was set up at Karachi in March 1948. The Bureau now manufactures various types of vaccines and sera and is in a position to meet foreign demands as well.

Additions to and improvements in the Jinnah Central Hospital, Karachi, which is the premier hospital in Pakistan, continue to be made. It has separate departments for Medicine, Surgery, Gynæcology, Eyes, Ear, Nose and Throat and a first class laboratory and an X-ray Unit in addition to a Tuberculosis Annexe. Arrangements to attach to this Hospital a Radium Institute were also well under way and the Institute was expected to start functioning by the middle of 1951.

An Inter Departmental Committee on Nutrition has been set up by the Central Government with a view to providing a forum for consultation in order to secure co-ordination of the policies and actions of Central Government Departments which may be concerned with the improvement of human nutrition. A few provinces have also set up similar committees. The first meeting of the Committee was held under the Chairmanship of the Director General, Health on February 17, 1951.

It has been decided to set up a Health Education Bureau under the Director General, Health in order to educate the public in the elementary principles of health and hygiene through publicity and by co-ordinating the activities of similar bodies in the Federal Capital and the provinces. Efforts are being made to secure the services of suitable individuals for this Bureau.

To control standards of quality, purity and labelling of drugs and medicines, drug control laws, as contained in the Drugs Act 1940 and the Drugs Rules 1945 framed thereunder, have been adapted and were enforced from March 1948. A drugs Technical Advisory Board was also formed at the same time to advise the Central and Provincial Governments on technical points arising out of the administration of drugs control laws.

The Director General, Health is also the Drugs Controller and Licensing Authority for the Federal Capital. The Provinces have their own Drugs Controllers and Licensing Authorities.

The Second All Pakistan Health Conference which was attended by representatives of Central and Provincial Governments was held at Decca in January 1951, to consider further improvements in the medical and public health sphere. The Conference approved of a six year development plan aiming at the establishment of new medical and public health institutions and improvements in the existing teaching institutions and hospitals. It also formulated the lines on which campaigns against T.B., V.D. and Malaria and for the promotion of maternal and child health should be undertaken.

The Conference made certain recommendations for fighting quackery, leprosy, checking the sale of spurious drugs and for the promotion of research in nutrition.

A scheme for the development of the Port Health Department, Chittagong, was sanctioned in 1949. Part of the equipment sanctioned has already arrived while a good portion of the additional staff required has been recruited. In December 1950, a Port Health Department was established at the Chalna Anchorage in East Bengal, thus raising the number of Port Health Departments in Pakistan to three, the third one being that at Karachi Seaport.

An Airport Health Department has been functioning at Karachi and Dacca.

A Central Committee for the provision of medical facilities for seamen at Pakistan Ports was set up in 1948 with the object of co-ordinating activities for maintaining hospital and dispensary facilities at Pakistan Ports for merchant navy seamen and seafarers.

MEDICAL EDUCATION

To provide training in post-graduate subjects and to promote research the Institute of Hygiene and Preventive Medicine, Lahore, was established in the Punjab in 1949 and the first course for the Diploma in Public Health commenced from October in that year.

One of the most important additions to the existing medical institutions in Pakistan is the Fatima Jinnah Medical College for Women which was established in Lahore in March 1948, for the exclusive teaching and training of women in medicine and surgery. It is fortunate in having attached to it a chain of excellent hospitals viz., Sir Ganga Ram Hospital and the Mool Chand Narain Dass Children's Hospital.

The other medical colleges in Pakistan are the King Edward Medical College, Lahore, the Dacca Medical College, Dacca, and the Dow Medical College, Karachi. There is also at Lahore the De Montmorency College of Dentistry.

NURSING

Centres for training, have been established in East Bengal, Punjab and Karachi where 120 girls are admitted annually and receive training for a period of three years. In addition the Provincial Governments, the Red Cross Society and similar other organisations impart training in nursing.

Under the scheme for training in higher nursing abroad 29 girls were sent to the United Kingdom in 1949 and 1950. Another batch of five was sent for advanced training in Sister Tutor's course in 1950.

Under the Central Nursing Council Ordinance Nurses are required to get themselves registered with either the Provincial Nursing Councils or the Central Nursing Council.

The Central Nursing Council of Pakistan prescribes standards for the training of Nurses, Midwives and Health visitors, etc. and carries out periodic inspection of Training Institutions to make sure that these standards are being maintained. It also establishes reciprocal relations with foreign nursing Councils for the purpose of mutual recognition of qualifications in Nursing, Midwifery and Health Visiting.

MATERNITY AND CHILD WELFARE

In the provinces much of the work relating to activities for the welfare of mothers and children is done by local bodies and voluntary organisations like the Red Cross Society. Local Governments also assume full or share part responsibility for the work done. The following figures show the number of Maternity and Child Welfare Centres in various provinces. North-West Frontier Province, 12 including one Provincial Red Cross Welfare Centre; East Bengal, 22; Punjab, 80 including five maintained by the North-Western Railway; Baluchistan, 4; Sind, 53; Karachi, 6.

In the North-West Frontier Province midwives are trained in the Provincial Midwives Training Centre, Peshawar, and dais at the District Health Centre. There is also a Maternity Hospital at Peshawar. Punjab Health School, Lahore trains lady Health Visitors. A Nursery Section has since been opened in the School for children between the ages of 2-5 while a child guidance clinic is also functioning. In Sind, arrangements for the training of Assistant Midwives exist at Sukkur and Hyderabad. For the training of lady Health Visitors arrangements have been made with the Punjab Health School. Work is considerably hampered for want of trained personnel like health visitors and midwives.

RED CROSS SOCIETY

The Red Cross Centres in the areas which formed part of Pakistan continued to work under the Indian Red Cross until December 20, 1947, when the Governor-General of Pakistan gave the Pakistan Red Cross Society a separate and independent existence by an Order called "The Pakistan Red Cross Society Order 1947." The newly formed Pakistan Red Cross was soon recognised by the League of Red Cross Societies as its sixty-sixth member and was also affiliated with the International Committee of Red Cross, Geneva. The Vice-Chairman of the Pakistan Red Cross Society—Colonel Jafar was appointed the first Governor from Pakistan on the Board of Governors of the League.

The Provincial and State Red Cross Branches in Pakistan were affiliated with the National Headquarters of the Pakistan Red Cross as soon as it was established in the Federal Capital in March 1948.

The Pakistan Red Cross was in its infancy when it was called upon to bear the brunt of providing succour and relief to millions of refugees. The Pakistan Red Cross Society, with its very meagre resources provided warm clothing, blankets, razais, bedding, utensils and multiple varieties of provisions to the sick and suffering immigrants. The Pakistan Red Cross Society organised a Medical Mission to that part of Kashmir where there are Pakistani troops. The Red Cross hospitals, fully manned and equipped were established at 11 various stations.

RADIO PAKISTAN

BROADCASTING in Pakistan is a State monopoly run by the Central Government through the Ministry of Interior, Information and Broadcasting (I & B Division). A former Station Director of A.I.R., Bombay, Mr. Z. A. Bokhari controls the organisation from the headquarters located on M. A. Jinnah Road, Karachi.

Radio Pakistan has at present four Regional Stations at Dacca, Lahore, Rawalpindi, and Peshawar, each under a Station Director. There are nine transmitters as detailed below:

Transmitter	Strength	Call Sign	Meter Band
1. Karachi (1)	10 K.W. M.W.	APK–1	363·6
2. Karachi (2)	50 K.W. S.W.	APK–2 }	16, 19, 25, 31, 41
3. Karachi (3)	50 K.W. S.W.	APK–3 }	& 49 meter band
4. Dacca (1)	5 K.W. M.W.	APD–1	257·1
5. Dacca (2)	7·5 K.W. S.W.	APD–2	31, 41 & 60
6. Lahore (1)	5 K.W. M.W.	APL–1	276·2
7. Lahore (2)	0·3 K.W. S.W.	APL–2	42 & 49
8. Peshawar	10 K.W. M.W.	APP	476·9
9. Rawalpindi	1 K.W. M.W.	APR	206

News Bulletins are broadcast at present in eight languages, viz., Urdu, English, Bengali, Pushtu, Burmese, Afghan-Persian, Iranian Sindhi, Turkish, Indonesian, Punjabi and Arabic. Radio Pakistan is on the air 94 hours a day.

External Services comprising news, features, talks commentaries, etc. are directed to the Arabic speaking countries of the Middle East, Iran, Afghanistan and Burma.

A very recent step taken by the Central Government to improve the news service of Radio Pakistan, was the installation of a Teleprinter-cum-Radio link between Lahore, and Karachi and Lahore and Peshawar.

The number of regional listeners of Pakistan is estimated at about 7,00,000.

Two fortnightly programme journals, viz., "Pakistan Calling" and "Ahang" in English and Urdu respectively, are published from Karachi, and a monthly pamphlet "Izaat Pakistan" also issued from the Headquarters office, contains details of programmes in Arabic.

According to Radio authorities, the main objectives of Radio Pakistan are to create and develop a sense of citizenship among the listeners at home and to afford them healthy entertainment.

Programmes broadcast by Radio Pakistan consist of entertainment items of classical, vocal, orchestral, film and recorded music, both Pakistani and Western, talks, features, broadcasts for special audience groups, e.g., for rural listeners, troops, school children and women.

Special programmes are broadcast on the anniversaries of prominent personalities of Pakistan and other countries. Specially prepared programmes are put out on religious festivals of various communities living in Pakistan, i.e., Muslims, Christians, Hindus, Parsis, and Buddhists.

Advertisements or commercial broadcasts are not sponsored or allowed to go on the air by Radio Pakistan as a matter of rigid policy.

The following is a list of the important officials of Radio Pakistan:—

RADIO PAKISTAN OFFICIALS

(Broadcasting House, Karachi).

Controller of Broadcasting, Z. A. Bokhari.

Director of Engineering, Riaz Ahmad.

Deputy Controller of Broadcasting (Programmes) Rashid Ahmed.

Deputy Controller of Broadcasting (Administration), A. Salman.

Deputy Director of Engineering, Agha Bashir Ahmad.

Administrative Officer, A. D. Shaikh.

Director of Programmes, S. A. Hafeez.

Public Relations Officer, Vacant.

Director of News, Central News Organisation of Radio Pakistan, Mohammad Sarfaraz.

Director, Staff Training, S. S. Niazi.

Director, External Services & Monitoring, G. K. Farid.

Maintenance Engineer, M. A. Rahman.

Research Engineer, S. A. Aziz.

Editor, Radio Journals, Ishrat Rehmani.

Station Director (Radio Pakistan, 6, Intelligence School, Karachi 2), Asnain Qutb.

Engineer-in-Charge, High Power Transmitters, Landhi, Karachi, Sadiq Shah.

(Regional Stations outside Karachi).

Station Director, Radio Pakistan, Dacca, Captain A. Huque.

Station Director, Radio Pakistan, Lahore, Agha Bashir Ahmed.

Station Director, Radio Pakistan, Peshawar, Captain N. M. Rashed.

Station Director, Radio Pakistan, Rawalpindi, Mahmud Nizami.

BANKING

THE banking system of Pakistan consists chiefly of the State Bank of Pakistan (which acts as the Central Bank of the country), the National Bank of Pakistan, other joint-stock banks and Foreign Exchange banks. The partition plan was implemented in such a short time that Pakistan authorities were left with no alternative but to allow the then existing monetary system to continue in Pakistan for some time at least to ensure smooth transition. Accordingly the Pakistan Monetary System and Reserve Bank Order (1947) was issued providing for the Reserve Bank of India to continue as the Central Bank of Pakistan controlling the issue of currency till the end of September, 1948 and managing the Public Debt and Exchange Control on behalf of Pakistan till 30th March 1948. Subsequent developments, however, disclosed that even these temporary arrangements were not working well and it was therefore decided that the Reserve Bank of India should cease to function as the Central Bank of this country with effect from the 30th June 1948 and give way to the State Bank of Pakistan.

There exist in Pakistan now (*i*) A Central Banking Authority; (*ii*) Commercial Banks; (*iii*) Industrial Finance Corporation; (*iv*) Refugee Rehabilitation Finance Corporation, and (*v*) Co-operative Banks.

(*i*) **Central Banking Authority.**—The State Bank of Pakistan, besides being the sole authority for the issue and management of currency also acts as bankers to the Central and Provincial Governments, manages Public Debt and Exchange Control and controls and supervises the operations of all commercial banks. It has at present three offices in Western Pakistan and two offices in Eastern Pakistan. 51 per cent of its total capital of Rs. 30 million, is owned by the State which has provided the Bank with a Reserve Fund of Rs. 30 millions.

(*ii*) **Commercial Banks.**—The total number of 'Scheduled Banks' in Pakistan on June 30, 1951 was 32, and the total number of their branches 201. The amount deposit on June 30, 1951, was Rs. 1,39,28 lakhs. The total number of non-scheduled banks stood at 76 at the end of March 1951, of which 18 banks were functioning in West Pakistan, and the remaining in East Pakistan, but their operations are very limited. The rest are either branches of banks with head offices in India or of banks with head offices in other countries.

(*iii*) **National Bank of Pakistan.**—An outstanding contribution of the Government of Pakistan and the State Bank towards the growth of commercial banking in Pakistan is the establishment of the National Bank of Pakistan which was established in November, 1949, with an authorised capital of Rs. 6 crores, of which 25 per cent was subscribed by Government. The business of the National Bank of Pakistan was initially confined to the financing of jute and cotton trades but it is now transacting all sorts of banking business including foreign exchange business. During the short period of its existence, the National Bank has opened 16 offices including three Local Principal Offices at Karachi, Lahore and Dacca. The Bank has also established a branch at Jedda in Saudi Arabia. In order to render efficient service to the business community, the Bank has established direct connections with over 50 leading banks in different parts of the world. The National Bank of Pakistan made rapid progress. It opened 11 branches during the year, 2 in East and 9 in West Pakistan. These branches are now full-fledged offices, undertaking all types of banking services. The peak figure of their advances exceeded Rs. 11 crores during the year under review.

(*iv*) **Industrial Finance Corporation.**—To provide long term credits for the development of industries, the Government of Pakistan have established an Industrial Finance Corporation in which 51 per cent of the capital is owned by the State. The authorized share capital of the Corporation is Rs. 30 million. The Corporation sanctioned up to the middle of 1950 loans amounting to roughly Rs. 65,25,000.

(*v*) **Refugee Rehabilitation Finance Corporation.**—Some seven million refugees, uprooted from houses in India, came to Pakistan immediately after the partition of the sub-Continent. To provide credit to enable them to take up some vocation and earn their living, the Central Government established the Pakistan Refugee Rehabilitation Finance Corporation. This Corporation is financed entirely by the State.

(*vi*) **Co-operative Banks.**—Besides the commercial banks, there is a Provincial Co-operative Bank in each of the four provinces of Pakistan and a number of central and urban co-operative banks. During the period immediately following the partition, these banks, particularly in Western Pakistan, played an important role in providing the much needed banking services at places where the commercial banks had closed down. Between them the co-operative banks have a working capital of over 200 million rupees.

With the steps that were taken, the banking structures has not only been saved from a complete collapse but has been put once again on its way to recovery. With the growing staff resources resulting from the various training schemes, banks are now in a position to step out for the opening of more offices all over Pakistan.

As a substantial portion of the country's hoarded wealth (which is estimated very roughly to be Rs. 200 to 300 crores) is located in rural areas, the co-operative banks play an important role in mobilising the savings in those areas. It is, therefore, Government's policy to encourage co-operative banking in the country. Co-operative banks are now taking part in commercial banking also.

There are at present five provincial co-operative banks and 134 central co-operative banks having a working capital of Rs. 115 million and Rs. 136 million respectively. There are over a thousand primary societies with a membership of over 2 million and a working capital of Rs. 145 million. Of these the credit societies are the most important. They number over 36 thousand, have a membership of nearly one million and a working capital of Rs. 66 million. Next in order of importance are the multi-purpose societies and industrial co-operative societies. The latter are generally organised amongst artisans and are usually engaged in the purchase of raw materials and implements for the members and in the marketing of their finished products. The extension of the co-operative field to industrial enterprises is significant for its results in the mobilisation of resources, the greater part of which would have otherwise found their way to industrial undertakings.

INSURANCE

Pakistan has 82 insurance companies. On the 11th of November 1950 there were 7,805 licensed insurance agents. During 1949 15,067 life policies were written. The total sums assured for life insurance only was Rs. 60 million, and the total premium income in 1949 was Rs. 26.3 million. Besides, the Central Government run a Postal Life Insurance Scheme for the benefit of Government employees. The minimum and maximum amounts for which insurance policies can be taken out under this are P. Rs. 100 and P. Rs. 20,000 respectively.

In order to promote the development of insurance in the country, the Government of Pakistan provided two foreign scholarships during 1950 for the training of Pakistan nationals as actuaries (there being no actuaries in any of the Muslim countries at present). Six scholarships have been provided for this year for training in insurance work abroad. An institute has also been established which arranges lectures to students.

THE STATE BANK OF PAKISTAN

JULY 1, 1948, was a memorable day in the financial history of Pakistan. On that day the State Bank of Pakistan was formally declared open by the Quaid-e-Azam.

Unlike some of the other Central Banks, the State Bank of Pakistan will not be controlled by a few private individual shareholders. The initial capital of the Bank has been fixed at three crores of rupees divided into 300,000 shares of rupees 100 each. The majority of these shares (51 per cent) have been, under the law, purchased by the Central Government as the representative body of the people, and the remaining shares (49 per cent) have been made available to the public. But here also a limit of 500 shares has been fixed for one person singly or jointly with other persons. Shareholders are entitled to one vote for every five shares upto the maximum of 10 votes.

The management consists of a Central Board, an Executive Committee and 3 local Boards.

The Governor will be the Chief Executive Officer who, on behalf of the Central Board, will conduct all the necessary business of the Bank. He is appointed by the Central Government for a term not exceeding five years, but he is eligible for reappointment. The supervision and direction of the affairs and business of the State Bank will be entrusted to the Central Board of Directors. The Board will consist of the Governor, Deputy Governors if any, and 9 Directors. Six Directors will be appointed by the Central Government and one will be elected from each area by the shareholders registered in Karachi, Lahore and Dacca separately. The Executive Committee consists of the Governor, Deputy Governors, if any, 3 Directors elected by the Central Board and a Government official appointed by the Central Government, and is authorized to dispose of the matters within the competence of the Central Board when that body is not in session.

A Deputy Governor (official) was appointed during the last quarter of the year 1951.

The Central Board will be, from time to time, advised by the local Boards of the three areas. Each local Board will consist of 4 members elected from amongst themselves by the share-holders registered in the area concerned and not more than five members nominated by the Central Government from amongst the shareholders registered in that area. No shareholder can be registered in more than one of the circles. In exercising the power of nomination the Central Government will aim at securing the representation of territorial or economic interests not already represented, and in particular interests of the co-operative banks. This provision has been made so as to bring the agricultural class in touch with the central banking authorities of Pakistan.

It is, however, considered necessary that the business of the Bank should be conducted on purely scientific lines under the guidance of the best available experts and that the Bank should be kept as free from political influences as possible. It has been accordingly provided that no member of the Cabinet or any Provincial Legislature will be eligible as Governor or Director of the Bank. Similarly all Government or State officials who draw their salaries from the Government Treasury shall be debarred from becoming Directors of the Bank.

FUNCTIONS

The functions of the State Bank of Pakistan can be divided into two separate compartments, one being that of note issue commonly known as 'Central Banking Functions' performed by the Issue Department of the Bank and the other is its banking business proper.

The Central Banking Functions of the State Bank of Pakistan are similar to those of other central banks. The Bank has the sole right to issue notes and is responsible for the management of the currency and credit in the best interest of the country. In addition to maintaining the internal value of the currency, the Bank is also responsible for maintaining the external value of the Pakistan rupee. This is done by the Bank with the help of exchange control for which it is responsible under the provisions of the Foreign Exchange Regulation Act, 1947.

For the purpose of note issue, the State Bank maintains a separate Issue Department which issues currency notes keeping in view the requirements of the country and the people. The issue of notes is governed by the proportional reserve system. Not less than 30 per cent of the total assets of the Note Issue Department is to consist of gold coins, gold bullion, silver bullion and approved foreign exchange. The remainder of the assets may be kept in rupee coins, rupee securities and eligible bills of exchange and promissory notes.

As regards the banking business, the State Bank is authorised to carry on and transact any or all types of business specified in the State Bank of Pakistan Order, 1948, namely, accepting of money on deposit without interest from and collection of money for Central and Provincial Governments, the purchase, sale and rediscount of specified bills of exchange and promissory notes, purchase and sale of approved foreign exchange, making of loans and advances to Central and Provincial Governments, local authorities, scheduled banks or provincial co-operative banks on specified terms, the purchase and sale of Government securities, acting as an agent to the Central and Provincial Governments and the management of the Public Debt. Besides, acting as a banker to the Central and Provincial Governments, it has been entrusted with the floatation and management of public loans on their behalf. It is the custodian of the monetary reserves of foreign exchange earnings in the country. As the control over the credit situation in the country is mainly exercised through the banking institutions, the State Bank of Pakistan has been invested with adequate powers to control and supervise the activities of the commercial banks in the country.

BANKING LEGISLATION

The following is in brief the main banking legislation enacted in Pakistan :—

To ensure the growth of banking on sound lines, the Banking Companies (Restriction of Branches) Act (1946) Amendment Ordinance was issued in 1948 which made it obligatory upon all banks (including the foreign banks) to obtain the sanction of the State Bank of Pakistan before opening any new branch or changing the location of any existing Branch.

By the Banking Companies (Control) Act of 1948, the Banking Companies were required to keep 20 per cent of their time and demand liabilities in the form of liquid assets, and to keep in the Provinces of Pakistan such percentage of their time and demand liabilities in the Provinces of Pakistan, not exceeding 75 per cent as may be specified by the State Bank from time to time.

The scheduled banks are also required to maintain with the State Bank of Pakistan a balance which must not be less, at the close of business on any day, than 5 per cent of the demand liabilities and 2 per cent of the time liabilities.

The Banking Companies (Control) (Amendment) Act, 1950, raised the above maximum percentage (of the time and demand liabilities to be kept in the Provinces) to 85 per cent and introduced several new measures designed to enable the State Bank to effectively control the banking activities of the scheduled banks. It also prescribed that the specified percentage of assets should be maintained throughout the year instead of at the close of each quarter as before. The State Bank came to possess under this Act general powers to call for any information from any bank regarding its business which it may require, and caution or prohibit Banks from entering into any particular or particular class of transactions. The State Bank was also empowered to determine the policy in relation to advances to be followed by any or all banking companies whenever it deemed expedient to do so, and to give directions to them as to the purposes for which advances may or may not be made, the margins to be maintained in respect of secured advances and the rates of interest to be charged on advances. It was laid down by the Act that the State Bank may prohibit any banking company from granting fresh loans or advances or impose such restrictions on its activities, as it may deem fit if it considered its loans and advances policy to be detrimental to depositors' interests.

Under the State Bank of Pakistan (Amendment) Order, 1949, the State Bank of Pakistan was given extra powers to control and help banking in Pakistan. It was given the power of direct lending to banking companies in Pakistan, under a General Order of the Central Board or a special order of the Governor, on such security as the Bank may consider sufficient, to enable the Banking Companies to secure financial accommodation in times of need. It was also authorised to purchase or discount eligible bills of exchange or promissory notes even though they may not bear the signature of a scheduled bank or a provincial co-operative bank. These provisions are expected to prove valuable in helping all sound banks in Pakistan.

CONTROL OF CAPITAL ISSUE

TO ensure that peoples' savings are not invested in insecure enterprises, the Government controls the issue of capital through the Capital Issues (Continuance of Control) Act, 1947. During the period 15th August 1947 to December 1950, 58 foreign companies were permitted to issue a total capital of Rs. 11.15 crores.

CURRENCY AND COINAGE

Separation of the currency of India and Pakistan could not possibly be effected during the short period and therefore having regard to practical considerations, it was arranged that :—

i) the existing India notes should be issued upto March 31, 1948 and remain legal tender upto September 30, 1948.

ii) from April 1, 1948 the Government of India and Reserve Bank of India notes inscribed with the words "Government of Pakistan" should be issued as Pakistan notes.

iii) India coins were to remain legal tender until replaced by Pakistan coins.

Immediate steps were, however, taken to introduce Pakistan notes and coins of distinctive designs. Pakistan notes of distinctive designs of the denomination of Rs. 5 and above were issued from October 1, 1948, and of the denomination of rupee one and two from March 1, 1949.

The process of withdrawal of India notes which remained legal tender in Pakistan upto September 30, 1948 was completed on June 30, 1949. The total amount of India notes so withdrawn was Rs. 176.75 crores.

From November 1, 1949, India notes inscribed with the words "Government of Pakistan" were demonetised, thus completing the process of replacement of India notes by Pakistan notes.

Arrangements for the minting of Pakistan coins of distinctive designs were also made soon after partition to replace India coins. All India coins with the exception of half pice and pies which are no longer in circulation have been demonetized and replaced by Pakistan coins.

The total amount of currency (notes) in circulation in Pakistan was Rs. 235 crores on 28th December 1951. The total amount of rupee coins in circulation on 28th December 1951 was Rs. 2.15 crores.

The opening of the Security Printing Press in Pakistan marks an important development in security printing. The Security Printing Press set up in a fifteen-year partnership with Thomas De La Rue & Co., Ltd., will make it possible for Pakistan to become self-sufficient in the production of currency notes, postal stationery, revenue stamps, legal stamps and many other articles and documents requiring security protection and control.

At the time of partition Pakistan had no security printing arrangements and the Reserve Bank of India continued to be the monetary authority for Pakistan as well and the currency notes issued by the Reserve Bank were legal tender in Pakistan. Pakistani notes of distinctive designs of the denomination of Rs. 5, 10 and 100 were however, issued from 1st October, 1948 and of the denomination of Re. 1 and 2 from 1st March 1949.

The withdrawal of Indian notes completed on 30th June, 1949 and the India notes inscribed with the words "Government of Pakistan" were demonetised on 1st November 1949 thus completing the process of replacement of India notes by Pakistani notes.

Till recently, there was no organized security market in Pakistan. The Karachi Stock Exchange was established in March, 1949 and its importance in the financial structure of the country is increasing steadily. It is estimated that its monthly volume of business, which is mainly investment business, at present averages about Rs. 10 million.

RAILWAYS

THE Pakistan Railways comprise two independent railway systems—the North-Western Railway in West Pakistan and the Eastern Bengal Railway in East Pakistan, and are State-managed and State-owned. Both of them were carved out of bigger units which existed prior to the Partition of the Indo-Pakistan sub-continent and are separated from each other by a distance of 1,200 miles across the Indian Railways. In the case of the North-Western Railway, some 1,818 of the pre-partition route mileage fell to the share of India against which 319 miles of the metre gauge railway situated in Sind and previously managed by the Jodhpur Railway were added to it. The North-Western Railway now has a route mileage of 5,362.

The partition of India left an area of 53,920 sq. miles in East Bengal which is inhabited by 42 million people. It is one of the most densely populated areas in the world but is served by only 1,620 miles of railway which constitutes the new Eastern Bengal Railway.

The Eastern Bengal Railway is split into two separate zones by the mighty river Brahmaputra which divides East Bengal into two separate portions and which, owing to its size and ever changing course, has not been bridged at any point so far. This river is crossed by means of Passenger and Wagon Ferries, which the Eastern Bengal Railway operate. The Wagon Ferry has a capacity of 400 to 500 wagons per day.

During the Second World War the Railways in the two zones of Pakistan were subjected to very heavy wear and tear. Deterioration was particularly severe on the Eastern Bengal Railway which was situated in the war zone and where during the Burma campaign a large number of troops, war materials and equipment especially for American armed forces, moved by rail.

SHORTAGE OF EQUIPMENT

Soon after the partition, the Pakistan Railways were faced with a problem of another kind, namely, serious curtailment in the supply of that vital commodity, coal, without which the Railway could not function. Supplies of coal from India, which from partition onwards had been inadequate, uncertain and irregular, became so low in January 1948, that a drastic cut in goods and passenger services had to be imposed. To reduce the consumption and dependence on coal, some of the coal burning engines were converted to oil-firing, and sources overseas were tapped for supplies of coal.

The coal supplies from India improved in 1949 but from the 22nd December 1949, they were completely cut off. The Railways then got their full requirements of coal from overseas. All this has naturally resulted in hastening the programme of converting locomotives to oil burning and hundreds of locomotives have already been converted.

Serious difficulties were also experienced in obtaining supplies of stores and materials for the repair and maintenance of locomotives, rolling stock and permanent way. A good number of these were made in or supplied through firms in India, and consequent upon the conditions following partition, these sources of supply dried up. The Pakistan Government were compelled in the summer of 1948 to send a special Purchase Mission to the U.K. and other European countries for the purpose of obtaining the vital items of stores and material required. These began to arrive from January 1949 onwards.

During the last two years, the condition of the coaching stock has improved considerably. Old and dilapidated carriages have been thoroughly rehabilitated, workshops have been intensively busy and their output has been increasing as materials became available. After renovation, such stock is expected to give trouble-free service for another ten years, by which time it is hoped that most of the obsolete stock will have been replaced by new stock of modern design. Eighty-one broad-gauge and 63 metre-gauge light weight all-steel coaches of the most up-to-date design will be purchased from abroad. These new coaches will be provided with fans in inter and third classes also, and will be fitted with other additional amenities for passengers. More air-conditioned coaches and dining cars are also being purchased.

THE PORTS

KARACHI

KARACHI, the premier port of Pakistan, is situated in the triangular Bay of Karachi which is separated from the Arabian Sea by a low sandy reef stretching southwards from the mainland to the rocky headland of Manora. Of all ports in the sub-continent, Karachi is nearest to south-west Asia and to Europe.

In 1886, the Karachi Port Trust was constituted in the place of the Harbour Board which had been formed in 1880 to levy shipping dues. The Trust consisted of eight members with the Collector of Karachi as ex-officio Chairman. The number of members then rose to 15, representing Government, Municipality, North-Western Railway, Labour and Commercial interests, with a whole-time Chairman appointed by Government. With the separation of Sind from Bombay State in 1936, the Port came under the direct control of the Government of India. On the partition of the sub-continent and with the birth of the Dominion of Pakistan, towards the middle of August 1947, the administration of the port has come under the control of the Central Government of Pakistan.

HARBOUR

LIGHTHOUSE on Manora Point is in Latitude 24° 47' 37" N.; Longitude 66° 58' 36" E.

Accommodation.—Entrance channel High Water Spring Tides 38½ ft., at mean neaps 35 ft. 11 in. Vessels drawing 30 ft. can enter port during monsoon season; but Dy. Conservator may allow vessels of deeper draught to enter at discretion. During fair season vessels drawing 31 ft. to 32 ft. can enter or leave at 8 ft. tide.

Steamer wharves can accommodate three steamers of 575 ft., with 31·6 ft. dft., and one of 600 ft., with 32·6 ft. dft., nine steamers of 550 ft., two of 500 ft., one of 470 ft., three of 450 ft., one of 400 ft., and one of 430 ft., with 26 to 29 ft. of water alongside and one of 325 ft. with 18 ft. dft.

There are sixteen electric cranes of 2 tons, one steam derrick crane of 5 tons; ninety-one hydraulic cranes of 35 cwt., one of 30 tons on the wharves and one 30 tons floating crane self-propelled and one 60 tons floating crane.

Boat Basin, at the south end of the wharves, contains the Commissariat Wharf length of quayage, 150 ft.; depth at high water 17½ ft.; low water 8 ft.; one 35-cwt. hydraulic crane and one 3-ton hand crane; the Passenger Landing Pier (length of quayage 450 ft.; depth at high water 16 ft., low water 6½ ft.).

The Railway Wharf—length of quayage, 800 ft.; depth at high water 19½ ft., low water 10 ft. Three 35-cwt. hydraulic cranes.

At the north-east end of the harbour are the Juna Bunder (length of quayage 1,235 ft.; depth at high water 17½ to 22½ ft.; low water 8 to 13 ft.), with three hydraulic cranes of 35 cwt.; five 1-ton hand cranes; one stationary hydraulic crane of 14 tons, and the Napier Mole Boat Wharf (length of quayage, 1,824 ft.; depth at high water 21½ ft., low water 12 ft.), with three hand cranes of 1-ton each. Five lightering piers and two lightering berths of 327 ft. and 519 ft. length and depth at low water of 6 to 10 ft. and at high water of 14½ and 18½ ft.; with one fixed 25-ton electric derrick crane at the shorter berth, for landing and shipping stores.

The Heavy Lift Pier north of ship wharves accommodation barges, d. at high water 15 ft., at low water 5½ ft. One hydraulic crane of 14 tons. One ship repairing berth with a length of 300 ft. between dolphins and depth of 16 ft. and 25½ ft. at low water and high water respectively.

Harbour moorings: five swinging moorings with a draft of 24 ft., and thirteen fixed moorings for vessels of 400 to 550 ft., of which two are with a draft of 17 to 23 ft., four of 32 ft., and seven of 27 to 28 ft.

Dry dock, length on blocks, 236½ ft.; breadth at entrance 50 ft.; depth on sill at High Water Ordinary Spring Tides 12½ ft. Coaling performed at the wharves and from lighters.

Cargoes are discharged into and loaded from railway wagons at the steamer wharves on the east side. On the west side cargo is loaded from and discharged into both railway wagons and transit sheds.

Bulk Oil Pier lies south of the Boat Basin; length of the quayage 403 ft.; vessels 550 ft. long can be berthed alongside; depth of low water 31 ft. Pipes are laid down from the pier to the oil installations, which are in the immediate neighbourhood. Liquid fuel pipes and connections are available from the Return Wharf and berths 1 to 11 of the Keamari wharves and are connected to the oil installations, permitting two ships to be bunkered with oil fuel simultaneously, or one ship being bunkered and one tanker discharging simultaneously, in addition to the service from the oil pier.

Charges.—Port dues on sea-going vessels on entering the port, 2 annas per net registered ton once in the same month (month reckoned from the first day (inclusive) of one month to the first (exclusive) of the next month, or from the second day (inclusive) of one month to the second day (exclusive) of the next, and so on). Moorings fixed or swinging Re. 1 per day, or part thereof, per 100 tons net registered or part thereof, with a minimum charge of (a) Rs. 40 for the period of stay of every vessel under 1,500 tons, (b) Rs. 20 per day or part of a day for every vessel of 1,500 tons and over, with maximum Rs. 40. Berthing fees Rs. 1-8-0 per day or part thereof, per 100 tons net registered or part thereof (1) with a minimum charge of Rs. 40 for the period of stay of every vessel under 1,500 tons, (2) maximum charge of Rs. 40 per day, or part of a day, for every vessel of 1,500 tons and over plus a surcharge of 33⅓ per cent on the total amount. Additional charges of Rs. 10 per hour or part of an hour, and Rs. 50 for every 24 hours, or part thereof for use of pipelines, are payable by vessels bunkering and discharging petroleum respectively plus a surcharge of 33⅓ per cent. on the total amount. Water supplied to vessels in the stream at Rs. 7-6-0 per 1,000 gallons, and to vessels at the wharves at Rs. 4-6-0 per 1,000 gallons.

Pilotage.—Compulsory on sea-going vessels of 200 tons net reg. and upwards. Fair season, 300 tons and under Rs. 35; monsoon season Rs. 52-8-0 for every additional 100 tons, or part thereof, Rs. 4 plus surcharge of 33⅓ per cent on the total amount. Pilots board incoming vessels day or night about 2 miles off breakwater. For services of a tug for assisting in berthing or unberthing Rs. 75.

Towage.—In or out, 3 annas per net reg. ton. Sailing vessels when towed in or out are charged half pilotage. Vessels not under steam towed from one part of the port to another: for use of one tug, Rs. 100, for every additional tug, Rs. 75. During monsoon season towage is compulsory for vessels leaving the wharves; charge Rs. 75. Otherwise towage is N.C. in the case of vessels of 1,000 tons and under, and in case of vessels using the west wharf, but if a tug is used, a charge of Rs. 50 is levied in the case of vessels of 1,000 tons and under; Rs. 75 for vessels over 1,000 tons.

The principal commodities imported and exported through the Port of Karachi are as under:—

Imports.—Coal, Piece-goods, Cotton Twist, Metals, Spices, Silk, Tea, Railway Plant, Matches, Kerosene Oil, Liquid Fuel, Petrol, Sugar, Machinery, Motor Vehicles and Liquors.

Exports.—Cotton Raw, Grain, Salt, Fish, Carpets, Dried Fruit, Hides & Skins, Oil Seeds and Wool.

The cargo handling capacity of the port is about 12,000 tons per day or 4 to 4½ million tons per annum.

The income and expenditure for financial year ending 31st March 1951 was Rs. 159.32 lakhs and Rs. 157.64 lakhs respectively.

The volume of traffic at the Karachi Port is shown by the following figures:—

Year	Imports (tons)	Exports (tons)	Total (tons)
1947-48	1,156,000	1,028,000	2,184,000
1948-49	1,614,000	940,000	2,554,000
1949-50	1,916,000	924,000	2,840,000
1950-51	2,391,000	1,082,000	3,473,000

TRUSTEES

Chairman.—Z. H. Khan.

Appointed by Government.—Mirza Fazal Ahmed, Divisional Superintendent, N.-W. Railway, Karachi; Abdul Rahman H. Narejo, President, Karachi Dock Workers' Union; Capt. (E) W. F. Ellis, R.N., J.P., Principal Officer, Mercantile Marine Department, Karachi; Rear Admiral J. W. Jefford, O.B.E., Flag Officer Commanding Royal Pakistan Navy; A. E. Wright, Collector of Customs, Karachi; Anwar Hussain Hidayatullah.

Elected by the Karachi Chamber of Commerce.—B. R. Graham, O.B.E., N. R. Ramsay, D. B. Ashworth, T. W. Leveritt.

Elected by the Pakistan Merchants' Association.—M. A. Rangoonwala.

Elected by the Buyers' and Shippers' Chamber.—Anver T. Khandwala.

Elected by the Karachi Port Haj Committee.—Haji Mohd. Hashim Gazdar.

Elected by the Chamber of Commerce, Pakistan,—Wali Mohammed H. Yacoob.

All Pakistan Chamber of Commerce.—Sahebzada H. H. Jamiluddin.

Principal Officers of the Port.—*Chairman.*—Z. H. Khan, B.A., LL.B., A.M. Inst. T. *Chief Engineer.*—B. L. Everett, M.I., C.E., M.I. mech.E.; *Traffic Manager.*—M. A. Raymond, M.A. (Cantab.), Bar-at-Law; *Chief Accountant.*—Farid Ahmed, M.A.; *Dy. Conservator.*—John Douglas; *Secretary.*—N. M. Dhalla, B.A., F.C.C.S. (London); *Chief Storekeeper.*—C. J. T. Rozario; *Labour Welfare Officer.*—S. M. Hatif; *Chief Medical Officer.*—P. M. Hoodbhoy, M.B.B.S.; *Consulting Engineers in London.*—Rendel, Palmer and Tritton; *Officer of the Pakistan Government Administering the Ports of Karachi, Chittagong and the Chalna Anchorage.*—Sher Mohammad Syed.

CHITTAGONG

Chittagong in Eastern Pakistan, lying on the right bank of the river Karnafuli at a distance of 9 miles from the sea, was already an important Port in the sixteenth century A.D., when the Portuguese gave it the name of Porto Grande. The construction of Assam-Bengal Railway (now known as Eastern Bengal Railway) further facilitated the trade with Assam and Eastern Bengal for which Chittagong is a natural outlet. Chittagong, East Pakistan, Lat. 22° 21' N.; Long. 91° 50' E., has a population of over one lakh.

The chief imports are salt, mineral oil, machinery, tea estate stores, rice, coal, railway material, textiles, etc. The principal exports are wax, jute, tea, hides and skins, cotton, capas, rice, paddy, poultry and livestocks..

Vessels of any size can proceed 9 miles up the Karnafuli to Chittagong at H.W. draught of 21 ft. to 26 ft. There are now 7 general cargo and one salt berths for ocean-going vessels. In addition, there are four fixed moorings belonging to the Port Authorities and three fixed moorings belonging to the Burma Oil Company which are also used when not occupied by the company's tankers, for unloading and loading general cargoes. The jetties are 3,120 feet long and have been provided with 23 hydraulic cranes to lift upto 5 tons. The shed accommodation at the Port is being increased to meet the demands of expanding trade. The present capacity is 7 lakh square feet as compared to 3 lakh square feet at the time of partition. These sheds as well as jetties are directly linked with the Eastern Bengal Railway system. Cargo in bulk is being directly dealt with in wagons. Depth at jetties is about 26' at L.W.S.T. Fresh provisions, good drinking water and bunkers are available.

Despite large increase in the trade the Chittagong port was free of any congestion during 1951. The handling capacity of the Port has been raised from about 5 lakh tons to over 25 lakh tons per annum. At present the Port can accommodate 15 ships against 4 on the eve of partition. The river Karnafuli on which Chittagong is situated has been lighted up and pilotage of ships during early morning and late in the evening is now possible though this has not yet been started. The tonnage handled by the Port from 1947-48 onward was as follows:—

Year	Imports (tons)	Exports (tons)	Total (tons)
1947-48	263,721	157,124	420,845
1948-49	358,008	239,572	597,580
1949-50	709,980	298,383	1,008,363
1950-51	1,268,608	426,401	1,675,009

Port dues are 4 annas 6 pies Pakistan currency per registered ton. Harbour Master's fee Rs. (Pakistan) 64, mooring and unmooring in fixed berths Rs. (Pakistan) 64, swinging berths Rs. (Pakistan) 32. Berths alongside jetties Rs. (Pakistan) 80 per day, night work and holidays extra. Towage is done by Port Commissioner's Tug.

The Commissioners for the Port of Chittagong constitute the Port Authority.

Port Commissioners.—Capt. Hans M. L. Hansen (*Chairman*); G. J. Kelly, J. A. Oliver, J. D. Geddes (*Elected by the Chamber of Commerce, Chittagong*); S. C. Banerji, S. N. Sen (*Elected by the Chittagong Merchants' Association*); Alhaj Shaikh Hafizuddin Ahmad Siddiqi, Abdul Kasem Khan, Abdullah Ismail Vaid (*Elected by the Muslim Chamber of Commerce, Chittagong*); Haji Rashid Ahmad (*Elected by the Pakistan Chamber of Commerce*); Moulvi Shamsul Huda (*Elected by the Chittagong Municipality*). *Nominated by Central Government*:—M. K. Mohiuddin; S. M. Abbas; Commander J. Abbot; Abdul Majid; S. A. Azad; Faiz Ahmad.

Port Officers.—*Chairman*, Captain Hans M. L. Hansen.

Senior Vice-Chairman, M. K. Mohiuddin.

Consulting Engineer, E. J. Green.

Chief Engineer, Zakaulla Khan.

Port Engineer, S. H. Khoja.

Chief Accountant, Ghulam Jeelani.

Secretary, S. H. Pasha.

Offg. Deputy Conservator, A. U. Shah.

CHALNA ANCHORAGE

Chalna Anchorage, the second port of East Bengal at the river Pussur was opened on the 11th Decemember, 1950. This port is designed not only to take a considerable burden off the port of Chittagong and the Eastern Bengal Railway but will also serve as a better distributing centre for Cis-Brahamaputra areas of East Bengal.

The geographical position of the new port of Chalna is as follows:—Latitudinal and Longitudinal position, 22° 36' North and 89° 32' 15" East. Population about 5,000. Distance of port from Chalna is about 1½ miles. Distance of port from sea about 80 miles. The extent of moorings is 1½ miles and of anchorage limits 19½ miles. Depth of water is 33 to 41 feet.

As regards the navigational aids the light vessel "PUSSUR" and watch buoy were positioned on 21st December, 1950 at the seaward approaches of the Pussur river. The vessel exhibits her characteristic light, serves as wireless transmitting station and also provides the necessary navigational aids in the nature of direction finding. There are two experienced pilots at the Port. The Officer-in-Charge of the Port is also a seasoned marine officer.

The minimum depth over the two bars is 17 feet and normally ships of 23 feet draught can enter the Anchorage at the neaps. At present four sets of moorings are being worked at Chalna port. Besides this more ships can lie on their own anchors.

The new port has a wireless link and an air service terminating at Jessore links it with Dacca and Chittagong. An air service to Chalna itself is contemplated.

The port is served by Inland Water Transport and loading and unloading is done midstream by the ship's derricks.

The chief export is jute and the chief imports are machinery, bagged foodgrains, salt, coal and general cargo in bulk.

Customs, health, postal service, police have been provided. For fresh provisions weekly markets are held.

The target of the handling capacity of the new port is 5 lakh tons per annum. The Port is at present administered directly by the Central Government.

Upto the end of January 1952 the Port has been able to handle 71 ships which carried 283,345 tons consisting of 202,564 tons of export and 80,781 tons of import.

KETI BANDAR, SHAH BANDAR AND SOKHI BANDAR

These are three minor ports in Sind. They are under the jurisdiction of the Collector of Customs, Karachi. None of them, however, is of sufficient importance to deserve detailed treatment.

CHAMBERS OF COMMERCE

KARACHI Chamber of Commerce.—Established in 1860, for all the usual purposes of a Chamber of Commerce.

Any firm or person interested in mercantile pursuits and having a permanent office in West Pakistan is eligible for election to membership of the Chamber. The membership fees are as follows:—

	Ordinary Members	Associate Members
	Rs.	Rs.
Entrance Fee.. ..	500	1,000
Annual Subscription..	240	360

Office-Bearers

Chairman, B. R. Graham, O.B.E.

Vice-Chairman, N. R. Ramsay.

Members of the Managing Committee, D. B. Ashworth; T. W. Cree; C. Gafafer; T. W. Leveritt; A. C. McKay; E. S. Vernon-Jones; T. Waddell; Syed Wajid Ali Shah.

Secretary & Public Measurer, H. J. Martin.

Deputy Secretary, J. S. Lobo, B.A.

Assistant Secretary, S. W. Vaz.

The Chamber is a member of the Federation of Chambers of Commerce of the British Empire, and of the Associated Chambers of Commerce of Pakistan; is also the official representative of the Federation of British Industries, and provides secretarial services for a number of Associations including the Employers' Association of West Pakistan, and the Pakistan Committee of the Overseas Rubber Cable Manufacturers' Association.

Address: Chamber of Commerce Bldg., Post Box No. 502, Wood Street, Karachi.

The Punjab & N.-W.F.P. Chamber of Commerce.—(Formerly the Northern India Chamber of Commerce) was founded in 1923, and has its headquarters at Lahore. The business of the Chamber is conducted by the Chairman, and a Committee consisting of a minimum of 8 but not more than 11 elected members, and a maximum of 3 co-opted members, and ex-officio members.

The Chamber is represented on the Government of Pakistan Foreign Trade Development Council; N.W.R. Local Advisory Committee; Communications Board, Punjab; Board of Economic Enquiry, Punjab; Hailey College of Commerce Managing Committee and Food and Civil Supplies Advisory Board, Punjab.

The Chamber is affiliated with the Associated Chambers of Commerce of Pakistan and with the Federation of Chambers of Commerce of the British Empire, London.

A Tribunal of Arbitration has been set up under the Rules of which arbitrations relating to commercial disputes are carried out on behalf of members and non-members. Surveys of merchandise are also frequently held. Certificates of origin are issued for goods produced or manufactured in West Pakistan.

The aim of the Chamber is to protect and further commercial, industrial and agricultural interests in Punjab and N.-W.F. Province by every possible means, and it is the constant endeavour of the Chamber to achieve as much as possible for the good of the common interest of members—the business prosperity of Punjab and N.-W.F. Province.

Chairman:—M. Fazal Din.

Secretary.—G. J. Lumb.

Address: Commerce House, 14, Lawrence Road, Lahore.

Telegraphic Address: "Commerce."

Telephone No. 2237.

DEVELOPMENT PROGRAMME

The development schemes of the Railways are properly planned and arranged in order of priority. Those which are important (besides the Chittagong harbour which is under the E.B. Railway), are described below.

Much consideration has been given since partition to the question of introducing diesel electric traction on the Railways of Pakistan, and it has now been decided to gradually replace steam locomotives by diesel electric traction and a move has already been made in this direction. When Diesel Electric Locomotives are received and the existing steam locos converted to oil-burning, the Pakistan Railways will not only become almost independent of coal but will also be able to provide better and faster services to the public.

New lines under consideration are as follows :—

(*i*) Amnura-Chapai Nawabganj Railway, 10 miles (E.B.R.) ; (*ii*) Sylhet-Chattak Railway, 20 miles (E.B.R.) ; (*iii*) Tando-Mohd. Khan—Moghalbin Railway, 70 miles (N.W.R.) ; (*iv*) Karachi Circular Railway, 20 miles (N.W.R.).

Survey is going on on the following lines : (*i*) Dacca-Aricha Railway, 52 miles (E.B.R.) ; (*ii*) Chittagong-Rangamati Railway (E.B.R.) ; (*iii*) Chattak-Bholaganj Railway (E.B.R.) ; (*iv*) Gunjiyal-Bhakkar Railway, 80 miles (N.W.R.) ; (*v*) Hyderabad-Mirpurkhas-Nawabshah Railway, 122 miles (N.W.R.). The line last mentioned is due for conversion from metre-gauge to broad-gauge.

East Pakistan is a land of rivers and as such water transport plays a great part in the economy of the country. Another factor which makes transport to and from Chittagong Port difficult is that inland water transport, for want of seaworthy craft, can serve the Port only during about four months in the year. In view of all this, the Eastern Bengal Railway have purchased the nucleus of a Railway Flotilla for the transport of goods between Chittagong Port and the hinterland. A number of tugs and barges have already been purchased and the Railway Flotilla which will eventually have a capacity of 350,000 tons per annum, has been operating from April, 1950.

RAILWAY SYSTEMS

I. Lines owned and worked by the Gover ment of Pakistan :—

			Miles
a) North Western—State Agency—Laho Punjab.			
i) Broad Gauge	(5 ft. 6 in.)		4,5
ii) Metre ,,	(3 ft. 3¾ in.)		3
iii) Narrow ,,	(2 ft. 6 in.)		4
		Total Route miles	5,3
b) Eastern Bengal—State Agency—Chittagon East Bengal.			Miles
i) Broad Gauge	(5 ft. 6 in.)		4
ii) Metre ,,	(3 ft. 3¾ in.)		1,1
iii) Narrow ,,	(2 ft. 6 in.)		
		Total Route miles	1,6

II. Lines owned by Pakistan States an worked by the Government of Pakistan :

Bahawalnagar—Fort Abbas—N. W. Railwa Administration.

Broad Gauge (5 ft. 6 in.)—84·25 Route mile

ROAD TRANSPORT

UNLIKE railways roads are a provincial subject under the present constitution. For the 20 years before 1947, the undivided Government of India was exercising some control in respect of roads through the agency of the Transport Advisory Council and the working of the Central Road Fund. But with effect from April 1947 the Government of India decided to accept financial responsibility for the construction and maintenance of national highways.

In Pakistan roads, both in the Provinces and States are financed out of general revenues on the basis of annual allocations in the budget, varying from year to year according to their needs and resources. Road user taxes such as customs and excise duty on petrol, registration fees and licence fees in respect of motor vehicles, import duties on motor vehicles and their spare parts including tyres and tubes, and sales tax on these commodities are merged in the general revenues and are not earmarked for road work in full. A portion of the custom and excise duty on petrol amounting to 2½ as. per gallon is, however, earmarked by the Centre for purposes of road development and is administered by the Central Government and distributed in the form of annual allocations which are non-lapsing.

Roads in Pakistan are mainly of three types : (*a*) Superior surface roads, which include cement concrete, bitumen, tar macadam, surface painted etc. ; (*b*) Metalled roads which are generally water bound macadam roads, brick pavements or kankar consolidated roads ; (c) Unmetalled roads consisting of kutcha earth roads or improved earth roads.

The question of classification of road according to the administrative units, in which they lie is under the consideration of Govern.nent.

The mileage of various types of roads broken up into geographical units is shown in the following table :—

Table No. 1.

Province	Superior surface roads	Metalled roads	Unmetalled or kutcha roads	Total
Punjab	2,694	410	12,883	15,987
N.-W.F.P	1,103	120	1,899	3,122
Sind	597	160	11,648	12,405
Baluchistan	586	637	3,453	4,675
West Pakistan	4,980	1,327	29,883	36,190
East Pakistan	594	1,028	20,172	21,794
Total Pakistan (excluding States) ..	5,574	2,355	50,055	57,984

Maintenance of roads is done by the Provincial Governments or District or Municipal Boards. The through inter-district and inter-provincial roads are maintained and administered by the Provincial Governments and these roads are also generally superior surface roads. The roads falling in the jurisdiction of District Boards are generally unmetalled roads.

The expenditure incurred by the Provinces and the States on the construction and maintenance of roads during 1950-51 is given in the following statement :—

Table No. 2.

Provinces-States	Amount spent Rs.
East Bengal	1,78,70,561
Punjab	1,74,18,386
N.-W.F.P.	14,30,810
Sind	34,50,000
Total	4,01,69,757

During 1949 a Central Road Fund was constituted out of 2½ as. excise and custom duty on petrol as mentioned above with effect from the 15th August, 1947. This fund, which stands at present at 1.24 crores including allocation to the Provinces and local bodies will be administered by the Central Government. 85 per cent will be available for distribution to the Provinces and States according to the following formula : (*i*) ½th in the ratio of the area of each unit to the total area of Pakistan ; (*ii*) ½th in the ratio of population of each unit to the total population of Pakistan ; (*iii*) ½th in the ratio of expenditure on maintenance of roads in the unit to the total expenditure on roads for the whole of Pakistan and (*iv*) ½th in the ratio of petrol consumption in each unit to the total consumption in the whole of Pakistan.

The balance of 15 per cent. is kept by the Central Government to defray the charges of the administration and for expenditure on research and for special grants. The following table shows the distribution of the Central Road Fund for 1950 and 1951 in Rs. :—

Table No. 3.

—	1950-51	1951-52
East Bengal	8,25,185	12,14,948
Punjab	8,53,399	13,63,146
N.-W.F.P.	2,68,010	5,44,935
Sind	4,23,173	4,21,920
Karachi	1,09,320	2,91,780
Baluchistan	2,18,638	3,30,424
Bahawalpur State ..	96,389	1,22,410
Khairpur State ..	27,036	39,027
15% Reserve ..	4,97,850	5,00,260
Defence's share ..	..	8,52,150
Total	33,19,000	56,81,000

Road programmes for full utilization of the allocation made have been received from most of the Provinces and have been approved for execution.

A semi-official organization (sponsored by the Central Government) known as the Pakistan Road Engineers' Association was formed in 1950, consisting of official and non-official engineers. The main function of the Association is to collect and disseminate information on road building and maintenance and to evolve standards and specifications. It would also assist in the formulation of an All-Pakistan Road Development Plan. Having been sponsored by the Government the Association would be assisted by a grant from the Central Road Fund.

As regards the future, the preparation of a Six-Year Road Development Plan has been taken up. A provision of Rs. 10 crores has also been made in the Six-Year National Development Plan of the Central Government.

Efforts are being made to see that the Six-Year Development Plan is executed without any hindrance. It is proposed to take advantage of the offer of technical assistance under President Truman's Point IV Programme and United Nations Technical Assistance Schemes. An expert on soil stabilization from abroad with special reference to rural roads has been asked for and it is proposed to depute certain practising engineers for advanced training abroad in modern methods of construction and maintenance of roads and bridges. Pilot surveys for road development schemes are being undertaken.

The most important inter-provincial road on which work has started is Karachi-Quetta road, which will be over 400 miles long and will be completed by 1954.

Transport

The following table shows the number of motor vehicles on the road in 1950 and 1951 :—

—	1950	1951	Percentage of increase
Motor Cars	16,715	28,860	72·66%
Motor cycles	3,694	8,021	119·82%
Taxi cabs	1,302	1,709	31·26%
Buses	4,570	8,180	78·90%
Trucks	4,514	7,415	64·26%
Other vehicles	2,874	1,525	46·93% Decrease.
Total	33,619	55,710	65·71% Increase.

The figures show a consistent upward trend. This increase is largely due to the liberal allocation of foreign exchange and to the need for augmenting the number of vehicles which have suffered limitation during the years of the last War and the years immediately following it. The control exercised by the Central Government on the distribution and the prices of motor vehicles spare parts was withdrawn with effect from May 1, 1950, resulting in increased facilities for fleet owners and transport operators. The withdrawal of petrol rationing with effect from July 1, 1950 is expected to further increase the number of vehicles on the road.

The automobile trade has been completely reorganised and assembly, agency and servicing facilities are expected to be up to the standard. In an endeavour to concentrate on improved facilities for automobile and mechanical workshop, advanced training of engineers in the running of such shops assistance has been asked under the United Nations Technical Assistance Programme.

General Motors Overseas Corporation of U.S.A. have started work in Karachi on a large assembly plant, which is likely to be completed by December 1952. The Corporation proposes to supply all types of automobiles to Pakistan and Middle-East countries through its Karachi office from the vehicles assembled in Pakistan.

ADVISORY COUNCIL

Twenty-two months after the establishment of Pakistan, a Transport Advisory Council was set up at the first Pakistan Road Transport Conference held in Karachi on May 26 and 27, 1949.

The Advisory Council consists of the representatives of the Central, Provincial and States Governments. Its functions are advisory—to make recommendations designed to evolve a policy for the development of a co-ordinated system of transport and suggest suitable measures to give effect to that policy. The special problem of East Bengal waterways also comes under the purview of the Advisory Council.

The Pakistan Road Transport Conference also decided to gradually nationalise the road transport system. Certain routes were nationalised with immediate effect while the remaining routes were to be nationalised gradually. It was also decided that private bus-owners would be allowed to ply their buses on some specified routes. That competition with the railways should be avoided was also agreed upon by the representatives. They also agreed to give a share to the railways in schemes for operating nationalised transport on roads that run parallel to railways. It was also decided to set up a non-official organisation to be known as Pakistan Road Congress which would be composed of specialists and experts to advise the Provincial and Central Governments on technical matters.

Another question that the Road Transport Conference discussed related to control over distribution and prices of motor vehicles, batteries, tyres, tubes and spare parts. It was further decided that for the present there was no need to impose new controls or continue old ones except in some cases such as import of spare parts from hard currency areas. This decision, however, is subject to changes from time to time.

The Conference further recommended the establishment of a Road Fund for the utilisation of the proceeds from the extra duty of 2½ annas per gallon on motor spirit. Yet another recommendation was the standardisation of the whole road transport system whether private or nationalised.

Finally the Central Government were asked to pass legislation to implement the recommendations of the Pakistan Road Transport Conference. This has now been done, and it is proposed to nationalise the road transport in Karachi in 3 years' time in gradual stages.

Pakistan was represented at two international conferences relating to road construction and transport matters, namely, the Conference of Inland Transport Experts of the ECAFE Region held at Singapore in October 1949 and the 4th Session of the Transport and Communications Commission held at Lake Success in March, 1950. While the latter was a regular session, and Pakistan was represented thereon by virtue of her election to the Commission, the former was specifically convened to study problems of rehabilitation and co-ordinated development of inland transport facilities in the ECAFE Region and the means best suited to promote the solution of these problems. Pakistan's delegations made effective and useful contribution to the deliberations of the respective conferences.

During the year the process initiated in 1949 by decontrolling spare parts of motor vehicles of non-American origin, was completed by the withdrawal of control on all varieties with effect from 1st May, 1950. A further step in the restoration of normal conditions was taken with the abolition with effect from 1st July, 1950, of petrol rationing.

WATER TRANSPORT

THERE are two major ports—Karachi and Chittagong. Karachi which is both a "port of call" and a "port of registry" serves the entire need of the import and export trade, as well as the passenger traffic of Western Pakistan. It is well developed, and quite capable of handling the normal trade passing through it.

There is practically no inland water transport in the western zone of Pakistan but this form of transport plays a very important role in the economic life of the eastern zone which has navigable waterways stretching over about 4,500 miles.

Inland navigation in East Pakistan is carried on in mechanically propelled craft and non-mechanically propelled country boats driven by oars, sails, etc. Transport by mechanically propelled craft is mostly in the hands of joint stock companies. These companies which are incorporated in England are among the biggest in the line, and have been running this business in the north-eastern portion of the Indo-Pakistan sub-Continent for nearly a century.

To augment the clearing capacity of Chittagong port the Eastern Bengal Railways have started an all-the-year round river-cum-sea service to carry mainly jute from internal riverine points to the port of Chittagong and to carry back salt and foodgrains.

Following the example of the railway flotilla, the Joint Steamer Companies have also augmented their fleet by the import of several deep sea steamers, tugs and deep sea-cum-river service barges with a view to maintain a regular service to and from Chittagong all the year round.

FOOD AND AGRICULTURE

PAKISTAN is an agricultural country. Cultivation of land forms the main occupation of the people and 80 per cent of the population is directly or indirectly dependent on it.

Rice is the principal food crop of Pakistan and accounts for more than half of the total area under food crops. The production is concentrated in Eastern Pakistan, which has about 90 per cent of the total area under rice in Pakistan. Rice is the staple food of the population of Eastern Pakistan. Although 97 per cent of the total area under food crops in Eastern Pakistan is under rice, yet the production is insufficient for local requirements and the deficit has to be met from Western Pakistan. Though the production of rice in Western Pakistan is much smaller than in Eastern Pakistan, Western Pakistan is able to meet the deficit of Eastern Pakistan. This is because wheat which is the staple food of the people is available in abundance so that a substantial part of the rice produced is not required for local consumption.

Wheat is the most important food crop next to rice. Out of the total area under food crops about one-fourth is under wheat. The cultivation of wheat is concentrated in Western Pakistan, which accounts for about 99 per cent of the total acreage under wheat in Pakistan. This production is more than sufficient for local requirements and a small surplus is available for export.

The other important food crops are gram, bajra, jowar, maize and barley. The production of these crops is confined mostly to Western Pakistan. On the whole the production of food crops is more diversified in Western than in Eastern Pakistan.

The non-food crops are mainly produced for the market and are an important factor determining the volume of purchasing power and the general prosperity of the country. In this connection it is significant that the area under these crops is very small, being only about 15 per cent of the total sown area. Jute, cotton, tobacco, tea, oilseeds, etc., are among the main cash crops.

Agricultural practices in the East are generally old-fashioned and Pakistan is no exception. Agricultural implements are generally made in the village blacksmith's and the village carpenter's shops. Draught power is supplied by bullocks, the crops are sown and harvested entirely by hand and the grain is thrashed by cattle. These practices are dictated by the economic limitations of the cultivator and the absence of large-scale industry in the country.

PUNJAB

Crops and agricultural methods differ from province to province according to soil and climate.

In the Punjab with its sandy loam, a dry climate and an average annual rainfall of about 10 inches, a good irrigation system is vital. A network of canals, reputed to be among the best in the world, has made the Punjab the principal wheat-producing area in Pakistan. The most important of these canals are the Upper Jhelum Canal, the Lower Jhelum Canal, the Upper Chenab Canal, the Lower Chenab Canal and parts of the Upper Bari Doab Canal and the Lower Bari Doab Canal.

As a result of this network of irrigation many parts of the Punjab are "double cropped". Apart from wheat which is the main crop, millet, barley and maize are also cultivated. Oilseeds are grown mainly for export while the most important cash crop is cotton of the "American" or long staple variety.

Fruit cultivation in the Punjab has made rapid progress in recent years and large quantities of citrus fruits such as orange, lemon, sweet lime, and grape fruit are grown. Other fruits grown in the province are melons, mangoes, mulberries and dates.

Animal breeding is also an important occupation of the cultivator, and the Punjab is famous for some breeds of horses such as the Baluch and Dhani. The stock has been improved by the utilisation of Arab and English thoroughbred stallions. Sheep are reared for their wool in the south-west Punjab and the *Docwba*, or the fat-tailed sheep, is found in the Salt Range. High yielding milch cattle—cows and buffaloes—are bred in large numbers.

SIND

Sind with its poor rainfall, the annual average being 4 inches only, is even more dependent on irrigation than the Punjab. Formerly irrigation was carried on by what are called "inundation canals" which carry water only when the river is in flood. But now a great dam has been built across the Indus at Sukkur and has helped bring nearly 6,000,000 acres under cultivation. The Sukkur, or the Lloyd Barrage as it is also known, is one of the largest works of irrigation ever attempted. This great water-regulator consists of 66 spans, each sixty feet wide, the opening being regulated by steel gates each weighing fifty tons. The barrage is about a mile long—approximately five times the length of the London Bridge. The total length of channels and water courses connected with it is 36,000 miles.

The chief crops of Sind are wheat, rice, millets and long-staple cotton. Large quantities of fruit such as dates, figs and melons are also grown. The province rears some of the finest breeds of milch-cows. Among the other domestic animals are the one-humped camel, buffaloes and a hardy breed of ponies.

BALUCHISTAN

In Baluchistan the average annual rainfall is from 6 to 7 inches and there are no perennial rivers. The agriculturist is certain of his crops only where cultivation is carried on by the curious Karez or underground water channels, by springs and small streams. Rice is grown on carefully terraced hillside fields while wheat and millets are sown on the plains.

Baluchistan is the fruit orchard of Pakistan. Melons, dates, several kinds of high quality grapes, apricots, almonds, apples, pomegranates, peaches, nectarines, quinces, plums and cherries are grown here in profusion. Large-scale mulberry cultivation has helped build up a small but growing sericulture industry. The province is famous for its horses. An exceptionally fine breed comes from Barkhan, the average specimens being about 15 hands in height, with small, delicately modelled heads, and long, slender arched necks.

N.-W. F. P.

In the North-West Frontier Province, as in the rest of Western Pakistan, cultivation largely depends on irrigation. The Peshawar and Bannu valleys are irrigated by wells and are intensively cultivated. In the foot-hills water is obtained by the damming of streams. In the riverain strip, wells and the flood water of the Indus and other hill torrents supply the required water. The valleys of Kohat are the most fertile because the soil is a good, clear loam, retentive of moisture and able to resist drought. The value of rotational crops is fully realised and crops such as wheat, cotton, tobacco or turmeric are followed by cloves, maize and barley. The chief crops in order of importance are wheat, barley, gram, maize and millets. Cotton and oilseeds are also produced but the acreage under them is small.

The North-West Frontier Province also produces a large quantity of fruits, which find their way to the markets of India. The fruits grown are grapes of several varieties. Orleans plums, quinces, pears, peaches, figs, pomegranates, melons, loquats, mulberries grow wild almost everywhere.

EAST BENGAL

Agriculture in East Bengal is very different. While the cultivator in Western Pakistan is almost always short of water and is dependent on irrigation for the watering of his crops, the cultivator in East Bengal has to wade waist-deep through water to transplant the young rice seedlings.

Here the great rivers are still building up their deltas and every year huge quantities of silt are brought down by the Ganges and the Brahmaputra. With an average rainfall of 60 inches in the year irrigation is unnecessary. On the contrary, due to the perennial overflow of rivers large areas of Eastern Pakistan are under water for at least six months in the year. The people build their cottages on high ground and move about by boat all the year round in some districts and for a part of the year in others. The surface is flat and much of it is covered with huge marshes where rice and jute grow in almost wild luxuriance. The total acreage under rice is a little over 20,000,000 and the entire produce is consumed. So fertile is the land that there are two major crops and a subsidiary crop in the year: the winter rice, which is the main crop, the early rice and the spring crop.

Winter rice is grown on low lands. A piece of high ground is usually selected for a seed nursery. In July or August the seedlings are transplanted to flooded fields which have been ploughed and reploughed till the whole surface is reduced to mud. Between November and January the crop is harvested. In the swamps, however, a variety of long-stemmed rice is sown broadcast after one or two ploughings.

The summer crop grows with the rains. By harvest time the fields are well under water but the ears maintain a fair margin as against the water-level. At times the reaping has to be done from boats. By the time the winter crop is reaped the fields are half dry.

The most important cash crop of East Bengal is jute of which it has an unquestioned monopoly, as it produces about 80 per cent of the world's supply. The total acreage under jute is nearly 1,300,000. Jute has been called the "brown paper" of world industry as it makes the best, the cheapest and the most durable packing material. Attempts have been made in different parts of the world to produce a synthetic substitute or, failing that, to grow it on a sufficiently large scale, but nowhere has the attempt succeeded. The average annual world consumption of this wonderful fibre runs into 10 million bales of 400 lbs. each, the principal markets being the U.S.A. and the U.K., but almost all countries require it in substantial quantities.

The seed is sown broadcast from February to May on finely prepared seedbeds. It is weeded and thinned at least twice and is cut after four or five months. The plants often grow to a height of 12 feet and are submerged under water for retting. In about ten to twenty days the retting is completed and the plants are removed. The fibre is then carefully separated from the stalk and after a process of cleaning and drying it is ready for its varied uses. The other crops are grani, oats, sugarcane, chillies, turmeric, ginger, tea and tobacco. The last named is grown in very large quantities and is exported while nearly 4 million pounds of tea are produced annually by the Sylhet District alone.

Tropical and sub-tropical fruits such as mangoes, of which the Malda variety is very well-known, pine-apples, custard apples, jackfruit and bananas grow in abundance. Coconut and areca palms cover large parts of the countryside and impart a pleasing appearance to the landscape.

ORGANIZATION

The All-Pakistan Food and Agricultural Conference has set up a Council of Food and Agriculture. An organisation for the study, research and active prevention of plant diseases and in particular locust pest was formed. Pakistan and its neighbouring countries, have large breeding areas of locust and the Locust Warning Organisation has, therefore, to keep a vigilant watch.

The Plant Quarantine Organisation is intended to prevent exotic pests from entering into Pakistan. A Quarantine Station has been started in Chaman to prevent the introduction of Palearctic pests from Afghanistan.

Pakistan is rich in its potentialities for the development of horticulture, fruit and vegetable preservation. To place this industry on a sound footing, a Fruit Products Control Order was issued. An Inspectorate has also been set up to inspect the factories and to give necessary assistance and guidance to the industry. To ensure that the products are manufactured under hygienic conditions, the Inspectorate constantly check samples some of which are examined at the Fruit Technological Laboratory, Lyallpur.

The Statistical Directorate, Ministry of Food, Agriculture and Health, has organised crop forecast work on a sound basis. It now issues regular forecasts for the benefit of commercial interests in respect of as many as thirteen principal crops grown in Pakistan, such as rice, wheat, barley, gram, cotton, jute, etc. Statistics of the area and yield of the different principal crops have also been compiled on all Pakistan basis.

The Directorate has also arranged to collect information regularly regarding the prices of agricultural commodities containing over 100 quotations relating to as many as 26 commodities, and is circulated to all the Ministries, Provincial Governments and Pakistan Embassies in foreign countries. In addition to this, a fortnightly All Pakistan Agricultural Index of the wholesale prices of the principal food and agricultural commodities is being issued. It also assists the Government in the consideration of important policy questions, and also tenders expert advice on questions relating to price stabilisation, sterling balances, etc.

Great importance is attached by the Government to agricultural development schemes to be completely financed by the Centre. These schemes cover agricultural research and development, plant protection, co-operation and marketing, fisheries, forests and animal husbandry. Priority is given to research and technical training.

Most of these schemes are expected to be completed by 1953. The total cost of the schemes is estimated to be approximately Rs. 2·71 crores, whereas the cost in the two years, 1950-51 and 1952-53 is expected to be about Rs. 1·56 crores. Out of this over Rs. 22 lakhs is to be spent on research and training schemes. These include schemes for the establishment of an Institute of Development Research in herbs drugs, etc., a Central Institute of Agricultural Research, Agricultural Engineering and Traction Technology Institute, Central Fruit Technological Institute, Soil Conservation Research Institute, Forest Research Institute, Forests Products Laboratory, Animal Husbandry Research Institute, Fisheries Department and Laboratory, and sending scholars abroad for training in fisheries. Almost all of these are expected to be completed in two years. The schemes further include horticultural development, setting up of a fish market at West Wharf (Karachi) and running of fish trawlers, a qualitative cattle census, breeding of cattle and poultry, establishment of wool-washing, shearing and grading centres, eradication of rinderpest, etc.

Besides the above schemes the Centre will also be responsible for the financing of Baluchistan's agricultural development schemes, for Baluchistan under the existing constitutional arrangement is the exclusive responsibility of the Centre. The Baluchistan agricultural development plan covers about seven schemes. These include distribution of improved variety of seeds, establishment of central and district farms, forest and soil conservation, introduction of machinery in agriculture, pest protection and minor irrigation like sinking of wells. The total cost of these schemes is estimated to be about Rs. 54 lakhs and almost all the schemes will be completed in about a year.

THE YEAR 1950-51

The production of foodgrains in Pakistan in the year 1950-51 was as follows:—

	(000 of tons)
Rice	8,195
Wheat	3,953
Bajra	355
Jowar	238
Maize	368
Barley	161

In the post-partition years Pakistan exported the following quantities of foodgrains.

000 of tons

1947-48	1948-49	1949-50	1950-51
66·2	5·6	59·5	107·0

As a result of disturbances consequent on partition and dislocation in the entire economy of the country Pakistan's food production was also put out of gear. Pakistan had consequently to import considerable quantities of foodgrains in order to meet deficits in East Bengal in the years 1947-48 to 1949-50.

Pakistan had undertaken to supply 1 lakh tons of wheat to Japan and 2,50,000 tons to Germany. As much as 73,000 tons of wheat were exported to Japan and 28,000 tons to West Germany. Owing to floods in the Punjab which adversly affected the kharif crops the export of foodgrains were temporarily suspended.

Pakistan has undertaken to supply 3 lakh tons of wheat, 4,50,000 tons of rice and 20,000 tons of gram to India amounting in all to 7,70,000 tons of foodgrains. It was planned to meet these exports from the production of various crop years as follows:

Year	Rice	Wheat	Gram
1949-50	103,400	16,000	..
1950-51	97,600	9,000	..
1951-52 / 1952-53 ..	249,000	275,000	20,000
Total ..	450,000	300,000	20,000

During 1951 there was a shortage of wheat in Pakistan. This was partly the result of a decrease of 11 per cent in the area under wheat. The ration was reduced and prices rose. Towards the end of the year supplies to foreign countries were suspended. In May 1952 Pakistan was actually negotiating with India for American wheat. There is now a proposal for stock-piling and regulating the area under foodgrains.

Yield of Principal Crops (1950-51)

(Yield in thousand tons)

CROPS	Baluchistan	E. Bengal	N.-W. F.P.	Sind	Punjab	Bahawalpur	Khairpur	All Pakistan

DEVELOPMENT SCHEMES

ON October 7, 1950, the Government of Pakistan announced they had drawn up a six year development plan estimated to cost Rs. 2,600 million (Rs. 260 crores).

The programme included agriculture: Rs. 820 million; Transport and communications: Rs. 530 million (Railways: Rs. 200 million; Ports: Rs. 140 million; Roads: Rs. 100 million; Tele-communications: Rs. 90 million); Fuel and Power: Rs. 470 million; Industry and Mining: Rs. 490 million; Federal Capital (education, health, housing, Karachi water supply): Rs. 200 million and technical training overseas and setting up of polytechnics, laboratories, etc.: Rs. 90 million.

The Plan was submitted to the Commonwealth Consultative Committee. The Agriculture programme includes *inter alia* sthemes for mechanisation, irrigation, anti-water-logging, land settlement, subsidisation of fertilizers, supply of improved varieties of seeds. It was proposed to set up a network of seed farms throughout the country which would ultimately be run on a co-operative basis.

As regards power new stations capable of generating additional 200,000 kW hydro-electric power and about 560,000 kW thermal power had been proposed.

The Plan contemplated the establishment of 6 jute mills, 24 cotton textile mills and one paper mill. It was also proposed to develop and modernise coal-mine workings. The Plan also provided for the extension of facilities at Chittagong Port to enable it to handle 3·96 million tons a year. There was provision for the rehabilitation and replacement of locomotives and rolling stock and the development of roads and tele-communications.

COLOMBO PLAN

On November 28, 1950, the Government in a resolution said: The basic ideal underlying the plan is that Pakistan must, due to its natural circumstances, continue to be essentially an agricultural country but the agricultural system must operate under the most favourable circumstances and that the national economy must be more diversified than it is at present.

The Resolution added: "Plans were ready and technicians and materials available for a larger plan but it was reckoned that Rs. 1,200 million (Rs. 120 crores) were as much as could reasonably be expected from external sources and the programme has been designed accordingly. The internal expenditure would amount to Rs. 1,400 million (Rs. 140 crores) for the completion of the projects included in the plan. Besides the expenditure of Rs. 200 million on social services included in the plan, the ordinary budgets of provinces provide for fairly heavy expenditure on social objectives".

The then Minister of State for Finance, Dr. Mahmud Hussain, in a broadcast speech explained the various implications of the Colombo Plan which now included the Pakistan Six-Year Development Plan.

He said in Pakistan the Development Board had till then examined 212 schemes sponsored by various provincial governments and central ministries and approved of 111 schemes of the total value of Rs. 1,12,57,00,000.

He further revealed that the income *per capita* was Rs. 64 while the cost of the bare necessities of life was Rs. 71. The cost included the following items:—

Food *per capita* per day: Cereals: 16 oz.; Pulses: 3 oz.; Vegetables: 6 oz.; Fruit: 2 oz.; Fats and oils: 1·5 oz.; Whole milk 8 oz.; Cloth: 30 yards *per capita* per year.

Housing: 100 sq. feet per person.

Health: One dispensary per village, general hospitals and maternity clinics in towns, specialised institutions for treatment of T.B. and proper sanitary and water supply arrangements.

Education: Every person of 10 years of age should be able to read and write and also take intelligent interest in private and social life.

This was at prices which prevailed in 1939. In Pakistan the cost of almost the same standard of life at prices as on July 1, 1950 would be Rs. 211 and the income *per capita* Rs. 215. The Tata Plan took as its ideal the doubling of the standard of living in a period of ten to fifteen years at a cost of Rs. 10,000 crores. The National Planning Committee also had set before itself the objective of doubling the standard of living in 10 years.

The Minister said the implementation of the six-year development plan would have the following effect:

Increase in power by 256,000 kW; Increase in area under cultivation by 6 million acres; Increase in production of foodgrains by 6,855,000 tons; Increase in production of non-food crops by 55,000,000 tons.

Rehabilitation of Railways: New Engines: 170; New wagons: 1,950; New carriages: 310; Machinery for workshops to provide necessary facilities for repairs and overhauls on E.B.R.; Replacement of sleepers: 3,000,000.

Development of Chittagong Port: handling capacity of the port will rise to 3,960,000 tons per annum.

Geological Survey: A full geological survey will be completed.

Mechanisation and Modernisation of Coal-mines: The annual production will rise to 3 million tons of coal.

Tele-communications: The number of telephones will increase from 17,527 to 47,800; telephone exchanges from 111 to 223; telegraph offices from 2,038 to 2,838; tele-printers from 4 to 15.

Increase in Water Supply of Karachi: By 25 million gallons a day.

Production of Textiles: Up to 1,350 million yards or 9 lakhs bales per year.

Production of Paper: 30,000 tons per year.

Production of Jute Goods: 130,000 tons per year.

In terms of standard of living, there will be an increase of 30 per cent but this does not take into account the effect on the economy of the country of the development of small-scale and cottage industries.

In the field of economic assistance, Canada has announced a contribution of 25 million dollars for the first year of the plan, Australia has offered £A 25 million for the first three years and New Zealand £3 million. The United Kingdom has released £23 million sterling in annual instalments of £4 million from the Blocked Sterling Account.

The plan was later revised and split up into "Two Year Priority Plan" and "Six Year Plan." The Two Year Plan contained about 30 schemes which were accorded top priority.

The operations under the Colombo Plan started on the first of July 1950. Since then considerable progres has been made with regard to the "Two Year Priority Plan". This Priority plan costing over Rs. 50 crores was drawn up in order to accord priority to various heavy developmental projects. But on account of the deteriorating international supply position progress was retarded. However, the progress of the 'Plan' was reviewed by the member delegates of the consultative committee meeting in Karachi in March 1952. It was agreed that under the circumstances the progress had been quite satisfactory. The Commonwealth Consultative Committee also decided to take the necessary steps in assuring the supply of capital goods which are needed so urgently.

DEVELOPMENT BOARD

The following are some of the important schemes approved by the Board from time to time:—Distribution of improved varieties of seeds in Baluchistan; Mechanical Cultivation Scheme in Baluchistan; Horticultural Scheme in Baluchistan; Drainage and Re-excavation Scheme in East Bengal; Power Pumping Irrigation Scheme in East Bengal; Mechanised Cultivation Scheme in East Bengal; Distribution of fertilizers in Sind and East Bengal; Scheme for the improvement of marketing, flaying and curing of hides and skins; Scheme for the improvement of wool in the N.-W.F.P.; The Karnafuli Multi-purpose Project; Hydro-electric Projects of Mianwali, Rasul and Dargai; The Warsak Multi-purpose Project; Extension of Malakand Hydro-electric Scheme; The Thal Development Project; Construction of a Weir at Kurram Garhi in the N.-W.F.P.; The Anambar Weir Project; Development of the Chittagong Port; Development of Roads; Development of Tele-communications; Setting up of a Paper Mill; Setting up of a Cotton Mill in East Bengal; Development of Woollen Industries in the Frontier regions of the N.-W.F.P. and Baluchistan; Establishment of Bureau of Laboratories, Central Testing Laboratory, Central Drugs Laboratory, Pakistan Animal Husbandry Research Institute, etc.

HYDRO-ELECTRIC DEVELOPMENT

These schemes cover a wide range of subjects, but topmost priority is given to schemes designed to increase the availability of electric power at all points where it is required for the optimum development of agriculture, industry, commerce and communications. The total generating capacity of Pakistan at its inception was 40,000 odd kilowatts. The major portion of this power was generated by old and inefficient diesel and steam stations, which had been in continuous operation for several years without repair and overhaul due to the ever-increasing demand for power and non-availability of spare parts during the war. As regards hydel energy, in spite of the unlimited possibilities of developing water power, Pakistan inherited only two small hydel power houses, generating about 10,000 kW in all. The Punjab, which was largely dependent on hydro-electric power generated at Joginder-nagar in India was threatened with stoppage of supply. The situation was further aggravated when several electric supply companies ceased working because of the communal upheavals of the time.

As an initial step towards improving the power supply position under these circumstances, Government directed their attention to the condition of the existing thermal stations and their rehabilitation, and in order to assist the Central Engineering Authority in dealing with the many complex technical problems, appointed Messrs. Rendel & Vatten (Pakistan), M.R.V. (P), a combine of three firms of Consulting Engineers of international repute, namely Messrs. Merz & McLellan of London, Messrs. Rendel Palmer & Tritton, also of London, and Messrs. Vatten-byggnadsbyrans of Stockholm, Sweden, as their Consulting Engineers. A few of the salient points brought out by the survey made by M.R.V. (P) are given below:—

The total installed capacity of different power stations in Pakistan (excluding small sets which certain units of industries are using for their own purpose) is 69,074 kW, which is distributed as follows:—Diesel, 24,450 kW; Steam, 32,868 kW; Gas, 56 kW; Hydel, 10,700 kW.

In 1948, the average number of units generated per month was 1,13,53,300 kWH. In 1949 the average monthly output was 1,45,71,473 kWH., indicating an increase of 3,218,473 kWH., *i.e.*, approximately 20 per cent in the average number of units generated per month.

An overall plan was under preparation, but authorities are going ahead with measures to relieve power shortage, by the improvement of existing and the construction of new hydro-electric and thermal stations at different places. All the existing and projected stations, and others that will follow in their wake, will form part of an all-embracing plan and will be linked up with each other enabling the transmission or flow of electric power from one end of the country to the other, to be tapped wherever it is needed. These inter-linking wires carried by high towers or pylons are technically known as "grids".

The Rasul Project which is now completed will quadruple the country's generating capacity, taking it to 42,000 kW. The Dargai Hydro-electric Project is expected to be completed by the end of 1952 adding another 15,000 kW raising the total output to 57,000 kW. The Warsak Project in the N.-W.F.P. and the Karnafuli Project in the Chittagong region are still at the investigation stage, but at Warsak these investigations had advanced sufficiently for work to start. Both the projects are expected to be completed by 1956-57.

In anticipation of the preparation of an overall Master Plan already mentioned Government have sanctioned the following Hydro-electric Schemes which will be co-ordinated with the long-term plans:

Malakand (N.-W.F.P.):—The Malakand Hydel Project has been completed which has increased the installed capacity of N.-W.F.P. by 10,000 kW. Additional power has been provided for the Wah Cement Works in the Punjab.

Dargai (N.-W.F.P.):—This scheme will utilise the water from the tail-race of the Malakand Power Station, which makes a further drop of 250 ft., before falling into the Upper Swat Canal, and will have an installed capacity of 20,000 kW. All the generating equipment has been received and the scheme (1.5 crores) is to be completed by December 1952.

Mianwali (Punjab):—During Stage I of the scheme it will have an installed capacity of 21,000 kW rising to a total of 70,000 kW in its final stage when its cost will be Rs. 4.5 crores. It is hoped that Stage I of this Scheme will be completed in 1952.

Schemes Under Investigation

The Consulting Engineers are engaged in preparing a detailed Project Report on the Karnafuli Hydro-electric and Flood Control Project in East Pakistan. It is estimated that the hydel station will have an installed capacity of 40,000 kW.; the Project will also mitigate to a very large extent the ravages caused by floods in the Chittagong region. Nearly 60,000 acres of land will be brought under cultivation besides making inland navigation possible for approximately 100 miles from Chittagong. In conjunction with the hydel station, the Consulting Engineers have been asked to prepare a Project for a 20,000 kW thermal station at Chittagong as a stand-by to ensure a firm supply. It is expected that work on the Scheme will be completed in three years from the date of its commencement.

The Warsak Dam Project in the N.-W.F.P. is again a multi-purpose project, and envisages the construction of a dam on the Kabul River in the N.-W.F.P. The hydel station will have a capacity of 1,25,000 kW and will help not only in the rapid industrialisation of the country but also in the electrification of railways, local buses and trolley traffic. The Project is expected to promote fish-culture on a large scale and bring under irrigation 65,000 acres of land in the Peshawar District and the adjoining Tribal Areas. It will also make the Kabul River navigable between the N-W.F.P. and Afghanistan, cutting out the circuitous Khyber Pass route. The Project is estimated to cost approximately Rs. 10 crores and will take six years to complete.

A few somewhat small canal hydel schemes under consideration in Sind are:—(*i*) Rohri Canal Hydel Scheme, 9,000 kW; (*ii*) Eastern Nara Canal, 7,500 kW; (*iii*) Yusuf Dhri Hydel on Rohri Canal, 5,000 kW; (*iv*) Kumb Luma Hydel on Rohri Canal, 2,000 kW.

These, however, are still only in an embryonic stage as also a scheme for a fair sized hydel station in conjunction with the Lower Sind Barrage which is being worked out by the Central Engineering Authority.

From the above it will be observed that within the next six to seven years, about 3 lakh kW of the water power potential of five to six million kW will have been harnessed in the service of the country.

INDUSTRIAL DEVELOPMENT

The proposed expenditure on industrial development is relatively low, but it may be mentioned here that the development of industries in Pakistan is aimed largely through private enterprise, and as such, the allocation under this head is meant only for such measures by Government as may aid industrial development. In the case of industries for which large capital investment is required, and there is little response from private enterprise, the Government of Pakistan will enter the field. To enable Government to do so the Pakistan Industrial Development Act was passed. The Act provided for the establishment of a Corporation responsible for the setting up of industries like paper, fertilizers, jute manufacture, heavy chemicals and heavy engineering. Government would also subject all development schemes to a very careful examination not only by their own experts and officers but also by foreign experts of international repute.

As noted above, the total expenditure to be incurred by the Government of Pakistan during the next five years on the 100 odd development schemes approved by the Development Board so far, will be in the neighbourhood of Rs. 113 crores. This amount, however, does not include expenditure on those schemes which can be met by Provincial Governments out of their own resources (as for example expenditure on the Lower Sind Barrage, which has so far been met by the Sind Government). Similarly, expenditure that is being incurred by the Centre on schemes which are regarded as part of normal departmental activities of the various Ministries is not included in this figure of Rs. 113 crores.

Agricultural Development.—The Central Government has also made outright grants to the Provincial Governments for agricultural development.

It has been estimated that when all the irrigation and agricultural schemes so far approved by the Board have been implemented, irrigation facilities will be provided for 36.5 lakh acres. The increased irrigation facilities and the agricultural improvements planned will yield an additional 10.5 lakh tons of crops per annum of which 8.5 lakh tons will be foodgrains and 2 lakh tons other crops. Of these East Bengal's share will be 3 lakh tons per annum composed of 2 lakh tons foodgrains and 1 lakh tons other crops. These figures do not include the additional area in which irrigation facilities will be provided by the Lower Sind Barrage, which is estimated to be 28 lakh acres and an additional yield of 2 lakh tons of crops per annum.

TRANSPORT

Although a comprehensive road development programme of Pakistan has not yet been prepared, it is estimated that as a result of the schemes which have so far been approved by the Board, 3,500 additional miles of road will be constructed in the course of the next five years.

Special attention is being paid to the development of the Port of Chittagong. Its capacity to handle cargo, which was of the order of 5 to 6 lakh tons per annum at the time of Partition, will ultimately increase to over 40 lakh tons per annum.

Just at present the Port of Chittagong can handle the entire jute produce of East Bengal.

Special attention is also being paid to the tele-communication system of Pakistan for the purpose of linking together not only the two parts of Pakistan but also for linking each of these two parts with the rest of the world. It is proposed to spend over Rs. 8 crores on the development of this sytems in the course of the next five years. Plans have been finalised for the establishment of a Radio Station each at Quetta, Hyderabad and Rawalpindi. Besides, the Karachi Station has been considerably improved by the installation of modern machinery.

An agreement with a German firm for the establishment of a Telephone Factory in Pakistan was reached in February-1952. In January 1952 work for the establishment of telegraph line store factory at Kotri was started.

The Development Board has so far been busy with the examination of schemes put forth by the Provincial Governments and the Ministries of the Central Government in compliance with its directive mentioned above. The second phase of planning consists of formulating a plan of national development spreading over a period of ten years. This will be a comprehensive plan integrating schemes pertaining to all spheres of the economic life of the country.

TABLE I

UNIT-WISE ESTIMATED COST OF DEVELOPMENT SCHEMES APPROVED BY BOARD UPTO MARCH, 1951.

Units.	Total estimated cost of approved schemes	Estimated cost during 1948-49.	Estimated cost during 1949-50.
	Rs.	Rs.	Rs.
Centre	31,97,50,000	1,51,94,000	3,17,05,500
Baluchistan	1,04,50,000	47,41,000	25,12,500
East Bengal	24,67,15,000	43,90,000	5,92,55,000
Punjab	37,29,22,000	5,23,27,000	7,60,85,000
Sind	4,23,83,500	2,30,09,000	1,93,74,000
N.-W.F.P.	13,07,28,500	68,07,000	1,43,79,500
	112,29,49,000	10,64,68,000	20,33,12,000

TABLE II

SUBJECT-WISE ESTIMATED COST OF DEVELOPMENT SCHEMES APPROVED BY DEVELOPMENT BOARD UPTO MARCH, 1951.

Subjects.	Total estimated cost of approved schemes.	Estimated cost during 1948-49.	Estimated cost during 1949-50.
	Rs.	Rs.	Rs.
Agriculture	16,04,45,500	20,43,000	3,69,13,000
Broadcasting & Publicity	50,00,000	32,00,000	18,00,000

IRRIGATION

WESTERN Pakistan is one of the most intensively irrigated areas in the world. Irrigation is made possible by the rivers Sutlej, Ravi, Chenab and Jhelum, which rise in the Himalayas and flow southwards, dividing the great Punjab plain until they join the Indus in its two-thousand-mile journey to the sea. The water supply is perennial as it comes from the glaciers of the Himalayas.

The preliminary surveys in Western Pakistan have often been carried out under extremely adverse conditions. The scorching heat, the constant illness of the staff and the labourers made progress slow and difficult. On the frontier the working parties had to be guarded from hostile tribesmen, who however later turned into peaceful cultivators. The difficulty of getting fuel to make bricks and lime often hindered construction.

After the failure of canal projects depending on private enterprise, Government decided in 1866 to take over irrigation construction. The Lower Swat Canal was begun in 1876 with the object of inducing the tribesmen to settle down and become peaceful farmers. In 20 years the treeless and uninhabited country became a vast expanse of cultivation, dotted with villages, the canal irrigating a total area about 160,000 acres.

The canals between the Jhelum and the Sutlej led to extensive colonisation and settlement. Though the greater portion of the region had a yearly rainfall of less than 10 inches, the soil was good. Colonists were encouraged to occupy irrigated land, and so successful was the experiment that the Government obtained large revenues from the project.

The Lower Chenab Canal of 1890 commanding an area of over 3 million acres, is one of the world's great irrigation works. The area was mapped out in squares of 2,725 or 16 acres, each square with its separate inlet of water. The squares were subdivided into one-acre fields by the cultivators, and grouped in villages of 1,500 and 2,000 acres. Peasants were offered land on a square basis, yeomen four to five and the monied upto 500. Each colonist was given land for two or three years; if at the end of that period the settler was satisfactory he was given a permanent right of occupancy and the rights became hereditary. Only the purchasing landholder had full proprietary rights. The settlers were rewarded by an excellent crop, and thousands applied for land.

In the Jhelum and Bari colonies, the railways were built even before colonisation, and towns were laid out. In ten years the population increased from 8,000 to 800,000.

The Triple Canals Project is also a remarkable piece of engineering. A large area to the west of the Sutlej—the Bari Doab—needed irrigation. The Chenab and Ravi had no water to spare and the Sutlej water was required to irrigate the territory on its own banks. The engineers in charge proposed to take the water from the Jhelum, the most westerly of the four Indus tributaries, and bring it by canal to the Chenab and turn it into the Lower Chenab Canal. The water from the Chenab, which was now not required for its own canal, was tapped higher up by a second great canal and the Chenab waters, conducted through another desert waste, which incidentally benefited *en route*, were taken in a level crossing over the third river, the Ravi, to irrigate the Lower Bari Doab region. The great scheme was completed between 1912 and 1915. It consisted of 433 miles of main canals, the total area commanded being 3,997,000 acres, or 6,250 square miles.

SIND

Till then the irrigation of Sind had received comparatively little attention, and the great Indus itself remained almost untapped. The design for a barrage at Sukkur and preparation of the canal projects were finalised in 1919-1920. This project is perhaps the most spectacular yet attempted in Western Pakistan, comprising as it does a mile-long barrage across the Indus and seven large canals, four at one end of the great dam and three at the other. It is the largest irrigation work of its kind in the world. The following figures give some idea of the immense scope of the project and the planning and labour involved in its construction. The canal system irrigates an area of nearly six million acres, equal to one-quarter of the area of England, or about one-fifth of the total irrigated area of Pakistan, which is 30 million acres.

The largest of the Sukkur canals, the Eastern Nara and the Rohri, are 226 and 208 miles long respectively. The total discharge of the seven canals is 46,617 cusecs. The cost of the barrage and canal-head regulators was Rs. 4.04 crores, about £3 millions. The maximum number of the workers working on the project at any time was 60,000, the excavation being divided between manual labour and dredgers.

Work on the site started in 1923. Townships had to be built on both banks, with hundreds of living quarters, hospitals, shops and recreation centres. Twelve miles of metalled roads were laid, and 40 miles of track to connect Sukkur with the broad guage railway. Cut-stone for the barrage was obtained from a quarry at Rohri, over about three miles of narrow guage rail. The immense amount of stores and machinery necessary for this gigantic project had all to be assembled. The barrage fleet numbered four steam tugs, four motor-launches, and forty 100-ton barges.

Work on the barrage itself started in 1926, and the whole scheme was formally opened by the Viceroy on the 13th January 1932.

A solid construction on sand foundations across the wide, deep waters was accomplished by using "cofferdams." Steel piles were driven into the river-bed projecting well above the flood-water level, like the sides of a huge box; these were supported on the inside by a rampart of sand dredged from the river, and the water was pumped from the hollow enclosure. The piers were built on a stone flooring. And the piles were removed on completion.

The foundations of the barrage were run out in two cofferdams from either side of the river, and one in midstream enabled the piers to be completed. On the piers were built two tiers of connecting arches, the lower tier carrying a roadway. Under each arch was fitted a gate of steel plate to be raised or lowered, the gates of both tiers being used in conjunction to control the flow of water.

The area irrigated by the barrage, nearly 6 million acres of land with an average rainfall of two to three inches, produces annually over a million tons of rice and millet, and about ninety thousand tons of cotton. The barrage changed the desert into the "granary of the East."

Pakistan has a total area of 200 million acres out of which 155 million is still uncultivated and 170 million unirrigated. Two multi-purpose hydro-electric schemes are under way, one at Warsak in the North-West Frontier Province and the other at Rasul in the West Punjab. These will provide power for Pakistan's industrial expansion programme and water for irrigation.

NEW PROJECTS

The biggest development scheme in agriculture is the Lower Sind Barrage. When completed the area that will come under cultivation will be 2.79 million acres. As soon as the Barrage starts working, enough foodgrain will be produced not only for supply to East Bengal and other deficit areas, but also for export.

The other major scheme is the Thal Project in the Punjab, which is already under construction. There is also the Rasul Tut-s-well Project.

With regard to the North-West Frontier Province a number of schemes have already obtained the sanction of the Centre, one of which the Khashmi Lift Irrigation scheme, for instance, will bring under cultivation, 10 to 12 thousand acres of land. Under the Lift Irrigation for Muqam Nullah about 2,000 acres of new land will be brought under cultivation. A third scheme which is sanctioned is the irrigation tube-wells in Qasba Begram.

Other schemes include the extension of Mama Khel Jadid canal, the remodelling of Takharwat distributary in the N.-W.F.P. and the Rod Kohi Irrigation scheme, the last of which will bring 6,187 acres under cultivation. All these schemes have been sanctioned by the Centre and the Provincial Government can have the money for putting the schemes into execution. These schemes have all been approved by the Development Board and by the Ministries of Agriculture and Finance.

Yet other important schemes include anti-waterlogging Projects in West Pakistan.

About the vast undeveloped area of Baluchistan, which is directly under the administration of the Central Government, it is clear from budget statements that about 30 to 40 lakhs will be spent on development schemes. Three irrigational schemes, bringing large areas of uncultivated and barren land under cultivation have been sanctioned and will be financed by the Centre. In addition to that, nine other schemes costing about 30 lakhs have been sanctioned by the Centre.

There are also 39 other schemes for providing irrigation facilities. Their total cost is Rs. 30.79 million. When completed these will bring under cultivation about 464,925 acres of land at present lying fallow in Baluchistan.

A new era of well-irrigation is being planned. The Government of Pakistan invited Sir William Stampe, former Chief Engineer of Uttar Pradesh, India, to explore the possibilities of tube-well irrigation. A large number of tube-wells are being manufactured in the Tube-well Workshops in Lahore for irrigation purposes in Lyallpur, Jhang, Sheikhupura and Sargodha Districts under the Ravi River system. The electrical power for these wells will be provided by the Rasul Hydro-Electric Works.

In East Bengal Karnafuli Multi-purpose Project is the major scheme. Under this scheme 25,000 pumping units will be installed. It is expected that these pumps will drain 5,000 square miles. During the dry season one million acres will be irrigated and two crops will be raised in a year. There are also various Land Reclamation Schemes in East Bengal which when completed will improve an area of 90 square miles and produce 50,000 tons of foodgrains.

The Irrigation Research Institute in Lahore started 25 years ago as a modest laboratory to investigate problems in certain aspects of irrigation engineering, is now generally recognised as one of the leading research institutes in the East. Work on future irrigation projects and on those now under construction will be greatly facilitated by the work now being done at the Institute as identical conditions can be reproduced by means of models in the Institute, thus avoiding the costly delays caused by faults in the actual construction.

MINES AND MINERALS

ACCORDING to the expert opinion of Dr. E. R. Gee, who helped to establish the Geological Survey of Pakistan, there are mineral resources sufficient in Western Pakistan to enable the Government to industrialise the State to an appreciable degree. Geologically speaking, Pakistan is very young, having been under the Tethys sea for long epochs before its birth. The age of the land is hardly 100 million years, while the earth is more than 1,000 million years old.

Limestones, sandstones, clays, calcium, sodium and potassium salts and gypsum are found in abundance in almost all the provinces of Pakistan. While there are Tertiary coal and petroliferous shales in several parts, there are quantities of glass sands, sulphur, alluvial gold, iron ore and mica in restricted areas.

Some intrusions of the ultra-basic type took place in the Mesozoic and Tertiary ages as a result of igneous activity in the mountains of the North-Western Frontier Province and the Baluchistan plateau. Rare minerals like chromite are thus found in numerous veins.

The Government of Pakistan passed the Regulation of Mines, Oilfield and Mineral Development (Federal Control Act) in December 1948. This Act came into force with effect from the 25th August 1949. By virtue of this Act, the responsibility for the grant of mineral concessions and exploitation of mineral, which had hitherto vested in the Provincial Governments, was taken over by the Central Government.

The Government have also framed rules for the grant of mineral concession, in supersession of the India Mining Concession Rules 1939, which were out-of-date. These rules are namely, the Pakistan Petroleum Production Rules, 1949, and the Pakistan Mining Concession Rules, 1949.

The Central Government have taken over the development of the following 21 minerals leaving the minor minerals to be looked after by the Provincial Governments:—Antimony, Asbestos, Barytes, Chromite, Coal, Copper, Fireclay, Glass sand including Silica sand, Gold, Gypsum, Iron, Lead ore, Limestone, Mica, Petroleum, Radio-active Minerals, Salt, Silver, Sulphur, Stronetirum minerals and Zinc.

The Mining Industry in Pakistan is the executive responsibility of a number of Departments. These are listed below:—Department of Geological Survey, Department of Mineral Concessions, Office of the Coal Commissioner, Office of the Chief Mining Engineer, Khewra, and Office of the Chief Inspector of Mines (Ministry of Labour).

In 1950, the Ministry of Industries set up a Mining Industry Advisory Committee of 17 persons with 12 official nominees to advise the Central Government.

MINERAL PRODUCTION IN PAKISTAN

(Tons)

Mineral	1949	1950	1951 January–October
COAL	337,965	436,750	404,731
CHROMITE	16,922	18,125	14,566
GYPSUM	14,169	16,659	15,537
LIMESTONE	280,233	303,295	283,985
SILICA SAND	1,178	4,905	2,883
FIRECLAY	6,997	1,980	2,801
PETROLEUM (Imperial Gallons)	32,942,120	44,834,920	39,478,844

SALTS

The Khewra mines in the Punjab Salt Range, with hundreds of feet of thick seams of rock salt, are very remarkable. The floors, the ceilings and walls are of solid translucent salt; a light torch is reflected from a myriad points. About 200,000 tons of pure rock-salt are extracted annually from the Khewra and Kohat salt mines.

Mining of rock-salt in Pakistan is a Government monopoly. The salt produced from these mines is 99 per cent. pure sodium chloride.

The production of rock-salt has recorded a progressive decrease from 57.21 lakh maunds in 1948-49 to 39.40 lakh maunds in 1950-51. The peak production was in the year 1945-46 when production reached 84.35 lakh maunds. The demand for rock-salt has gone down since the partition. India was the main market for the rock-salt. This market is now virtually closed. The production of rock-salt from various fields for the years 1948-49 to 1950-51 is given in the following table:—

(In Maunds)

Years	Khewra	Kalabagh	Warcha	Kohat	TOTAL
1948–49	3,889,078	345,600	815,874	661,622	5,712,223
1949–50	3,540,740	448,056	703,416	...	4,692,212
1950–51	2,045,864	466,050	693,304	735,518	3,940,736

Very rich potassium salts, which can be used as agricultural fertilizers and in other chemical industries, are intercalated with this salt in the Salt Range in some horizons.

Huge deposits of common salt are located in Tharparkar District (Sind), the beds, in some cases, being six feet thick. It is believed that these deposits alone would serve the entire population of Pakistan for over 2,000 years. Common salt is also manufactured by solar evaporation of brine at Mauripur (near Karachi). Large quantities of this commodity are exported to East and West Bengal. About 50,000,000 maunds of salt are produced annually at the Mauripur works.

Over a dozen mineral springs in fractured anticlines of Tertiary rocks in Kohistan, Laki (near Kotri) and Mangho Pir (near Karachi) have medicinal properties and can be developed into first class spas.

Some valuable natron-producing lakes (Kharo chanlio) are also found in Sind, Khairpur State and in the East Nara valley. Two to three thousand tons of soda and other sodium salts are extracted every year and exported to Arabia, Bombay and Aden. Kharo chanlio can also be used in making light biscuits, washing clothes, hardening treacle and manufacturing soap and tobacco products.

Another precious possession of Pakistan is gypsum, which is embedded in Tertiary rocks, associated with shales and clays. The deposits of gypsum are widespread throughout Western Pakistan in accessible areas and in very large quantities. Gypsum which can be useful in the manufacture of calcium salts, plaster of Paris, plasterboards and wall boards, is yet to be worked on a commercial basis. Selenite which is a crystal is also available in certain parts of the country.

The reserves which are mainly located in the Punjab total more than 30 million tons. The average annual production of gypsum is about 16,000 tons. The statistics of production for Gypsum for the years 1949 to 1951 is as follows:—1949, 14,169 tons; 1950, 16,659 tons; and 1951, 12,749 tons.

The production of gypsum has so far been limited to 16,000 tons which represents the requirements of cement companies. Recently the export of gypsum to India has been placed on the Open General Licence.

Glass sand is found in large quantities in Jungshahi (Sind), the Trans-Indus Salt Range, Mianwali and Basharat (the Punjab) and Paniala (N.-W.F.P.). Glass industry of the modern type was first established in the subcontinent in 1892 in Jhelum, the Punjab. One of the chief components in the manufacture of glass and of sodium silicate is silica sand, which is found in abundance in the soft sandstones of Tertiary age. According to Dr. Crookshanks, ex-Director of Archæology, Government of Pakistan, there are about 230,000 tons of silica sand, which with normal exploitation should last about 20 years.

During the year 1950-51, Pakistan produced over 293,881 tons of silica sand.

Pakistan has the second largest deposit of high-grade chromite in the world. Chromite, associated with serpentine, was discovered in segregated masses of ultra-basic intrusions along the hills, bordering the Zhob valley, and in the Upper Pishin Valley in Baluchistan. About two miles east of Khanzai, a mass of pure chromite, 400 feet in length and five feet in breadth, has also been discovered. More important than this is a deposit, in the same Zhob valley at Hindubagh with nearly 50 per cent chromium oxide. Chromite has also been discovered recently in the N.-W.F.P., on the Dattakhel road in North Waziristan and in Chitral State. There is some possibility of finding the ore also in Kalat State.

The mineral is essential for making ferro-chromium and other special steels required for projectiles, gun-lining, armour plates, high-speed tools, springs. It can also be used for manufacturing refractory bricks for furnaces, pigments and leather tanning. The average annual production of chromite during the last decade was nearly 12,000 tons, but lately the output has fallen. So far over 500,000 tons of chromite have been extracted from the time the mines started functioning. In 1947, 20,365 tons were produced, in 1948, 17,873, and in 1949, 15,635. During 1950-51, the total production of chromite in Pakistan exceeded 18,125 tons.

IRON AND COAL

There appear to be substantial deposits of coal below 250 feet in Baluchistan and the Punjab. The coal was of sufficiently good quality to raise steam and generate electricity, which, in conjunction with Pakistan's hydro-electric schemes ought to provide motive power for a rapid industrialisation of the country. Tertiary coal has been mined from the Dandot coalfield in the Punjab Salt Range for many decades.

The outstanding features of Pakistan coal are high percentage of ash content, high percentage of sulphur and dust content, high volatile content.

Years	Baluchistan	Punjab	Sind	N.-W.F.P.	TOTAL
1947	182,290	175,454	..	..	357,744
1948	95,955	144,822	..	..	240,777
1949	151,205	178,722	6,208	1,730	337,965
1950	234,641	191,908	2,988	7,213	436,750
1951 (January–October) ..	242,338	144,718	5,854	11,821	404,731

Realizing the immediate necessity of exploiting the indigenous coal resources of the country, the Government of Pakistan appointed Powell Duffryn Technical Services, Ltd., as their consultants in December 1948.

The Company has estimated that Pakistan's workable coal reserves are about 165 million tons, of which 77 million tons are located in Baluchistan and 88 million tons in the Punjab.

The Principal Coal Reserve Areas are: Khost-Shahring, 39,900,000 tons; Sove Range, 17,990,000 tons; Mach, 15,050,000 tons; Makerwal, 6,270,000 tons; Gullakhel, 12,000,000 tons; Salt Range, 30,000,000 tons; and other areas, 40,000,000 tons.

There are iron deposits in the valley of the Panj-Kora river, specially in the Baraul and in the Laspur Jandawal Hills, and also among the Hills south-east of Bannu in the N.-W.F.P. Brown haematite of low grade is found in the limestone and sandstone beds in some parts of Sind Kohistan. At Tatta (about 70 miles west of Karachi) smelting operations were carried on in the past, and swords and other weapons were manufactured. Iron ore is also found in association with lead ore in igneous and metamorphic rocks in the Baluchistan region.

It is estimated that there are about 50,000 tons of sulphur located in Koh-i-Sultan, at Sanni in Kalat State, and in the Chitral State and Mardan in the N.-W.F.P. Between 1941 and 1944 nearly 66,300 tons of sulphur ore were extracted and transported from Koh-i-Sultan, which was one of the main sources of supply for the sub-continent during the Second World War. Sulphur is also found in the alluvium in the Khairpur and Jacobabad areas and in the neighbourhood of hot springs like the Laki Spring.

The Koh-i-Sultan deposits are now idle.

An Association of Industrialists has been formed to exploit the sulphur resources of Pakistan.

Cores of excellent flint nodules are found in the Nummulitic limestones beds, as for instance, near Sukkur and Rohri (Sind). There are also remains near Aror. Flint pieces are found in alluvial deposits from Jurassic rocks.

Copper was worked near Mohenjo-Daro (Sind), nearly 5,000 years ago. Today copper ore of good quality is found in Mohmand (tribal area country) in Loral Pass (Chitral), North Waziristan, and in the Ras Koh Range in West Baluchistan.

Alluvial gold is secured from the gravels of old terraces in the higher reaches of the Punjab rivers, particularly in the Indus, and in the gravels in the Attock, Mardan, Hazara, Jhelum and Khyber Agency.

Antimony is only found in irregular veins in slates and gneisses in the Chitral State (N.-W.F.P.) and Sakrand (Kalat State).

In 1946 the production of antimony was 584 tons and in 1947 (up to August) 378. The entire output was formerly sent to Bombay. The deposits have not been worked since the partition.

Pakistan coal is hard to win. It is embedded in thin steep seams and in areas where communication facilities are difficult. It is comparatively very young and is entirely non-cooking in character.

The richest colliery in Pakistan is situated at Makerwal. The monthly production of coal in the country ranges between 25,000 and 40,000, tons, and efforts are being made to step up production to 50,000 tons per month. The following table shows the production of coal during the years 1947 to 1951:—

Granite, limestone, marble and slate occur in Sind, the Punjab, and the N.-W.F.P. Portions of the Lushai and Chittagong Hills in East Bengal also yield good limestone and associated minerals. Marble of good quality is found at Maneri in the Swabi Tehsil, Mardan District, Shahimina and Kanbela Khwar.

Pakistan produces on an average over 3 lakh tons of limestone annualy. The principal units of production are located in the Punjab and Sind. The following table gives the production of limestone for the years 1947 to 1950:—

(In Tons)

Year	Punjab	Sind	TOTAL
1947 ..	224,200	107,400	341,600
1948 ..	128,166	218,740	346,906
1949 ..	28,643	250,753	279,436
1950 ..	41,073	262,220	303,293

In Pakistan, Silica sand occurs in appreciable quantities in Jaghshahi and Dau Districts of Sind and also near Mianwali and Makerwali in the Punjab, and Paniala and Hazara Districts of the N.-W.F.P. Regular prospecting and mining has been limited to Jangshahi where the reserves are estimated to be 315,000 tons.

The production of Silica from this area totalled 1,600 tons in 1949 and 6,083 tons in 1950. Glass manufacturers are mainly interested in these deposits. If the devices used by the Glass Industry to eliminate its iron content becomes successful, the mineral will be of immense value to the industry.

Good road metal is available throughout Western Pakistan in a large number of open limestone and other quarries worked by the inhabitants for centuries. The best use for the Tertiary limestone found in Sylhet, Salt Range and Sind is in the manufacture of cement, which can be exported to foreign countries. There are cement factories at Karachi, Sukkur, Dandot, Wah and Sylhet.

Fireclay deposits are found in Paniala in the Dera Ismail Khan (N.-W.F.P.) to the extent of 15,000 tons. Orchre is found in Gaj deposits of Sind. Coloured clays are also found in Laki range in Sind.

Arsenic in orpiment and realgar deposits occur in Chitral State in Tirich valley.

Lead of galena deposits is available in the Chaghai District of Baluchistan. Cerussite or lead carbonate which is found in limestone breccia and is associated with antimony occurs in Sakran (Kalat State). Jamesonite deposits are found in Chitral (N.-W.F.P.) and Hazara Districts, while native lead is also available. There is large scope for oil exploration in Western Pakistan. Petroleum rocks which are mostly Nummulitic of Eocene and Miocene ages, can also yield precious oil. These extend from the Indus valley across the Salt Range and Suleiman-Kirthar Ranges to the plateau of Baluchistan. The Assam belt in Eastern Pakistan and the Lushai Hills in East Bengal, also have petroleum deposits.

OIL

The Punjab wells have so far yielded about 15 million gallons of petroleum annually. There is also an oil refinery established at Rawalpindi. The total production of petroleum in Pakistan during the year 1950-51 exceeded 1,118,440 barrels. There is at present only one petrol refining plant in Pakistan with a capacity of 4,500 barrels per day. The indigenous production, meets only 15 per cent of the total demands of the country.

Oil is obtained in commercial quantities from the Tertiary strata in Jhelum and Rawalpindi Districts. A continuous search for oil is now going on in Baluchistan, Sind and East Pakistan. At present the prospecting and mining of petroleum is being carried on in Pakistan by two companies: Attock Oil Company Limited and Burmah Oil Company Limited.

The following table shows the production of crude oil by fields owned by Attock Oil Company during the year 1947 to 1950:-

(In Barrels of 40 Gallons each)

Year	Khaur	Dhulian	Joya-Mair	Balkassar
1947..	19,704	109,371	135,740	69,129
1948..	16,621	107,609	170,798	207,337
1949..	14,906	351,558	149,795	498,837
1950..	16,312	72,865	52,967	529,045

In accordance with the Pakistan Petroleum Production Rules, 1949, the Attock Oil Company have formed a new Company in Pakistan called Pakistan Oilfield Limited. It has been incorporated with a capital of Rs. 10 million, 30 per cent of which has been offered for subscription to Pakistan nationals. The Company has been granted exploration and prospecting licences over an area generally known as the Potwar in Salt Range of the Punjab.

The Burmah Oil Company (Pakistan Concessions) have now formed a Pakistan Public Limited Company called Pakistan Petroleum Limited, with a share capital of Rs. 7 crores. This company has been granted several exploration and prospecting licences. The only oil producing field which this company is working is the Balkassar field.

Besides producing oil from the existing wells, both the companies are carrying on search for oil in new areas in East and West Pakistan. Two of the areas which are being prospected by Pakistan Petroleum Limited are of particular interest. One is the Patharia Forest Region in the Sylhet District of East Pakistan and the other is the Sui area in the Bugti territory of Baluchistan.

The indigenous production of crude oil has increased considerably since 1947 as is evident from the following table:—

(In Barrels of 40 Gallons each)

Year	Production
1947	333,944
1948	502,365
1949	823,552
1950	1,120,873

Oil produced in the various oilfields of Pakistan is refined at the Attock Oil Company's refinery situated at Morga about 5 miles from Rawalpindi. It is capable of refining approximately 4,500 barrels per day. It is not working to its full capacity at present and is refining only 3,500 barrels per day. The following table gives the details of Attock Oil Company's Refinery products during the years 1948, 1949 and 1950:—

(All figures in Imperial Gallons)

	1948	1949	1950
Motor Spirit ..	2,700,000	6,051,000	1,086,000
Superior Kerosene ..	425,000	985,000	2,062,000
Diesel Fuel ..	879,000	885,000	1,829,000
High Speed Diesel ..	462,000	441,000	417,000
Purchase Oil ..	6,522,000	15,193,000	24,504,000
Mineral Turpentine ..	43,000	101,000	104,000
Lubricant other than Aero ..	134,000	167,000	544,000

INDUSTRIES

"PAKISTAN would welcome foreign capital seeking investment with a purely industrial and economic objective and not claiming any special privileges," said a statement on industrial Policy issued by the Government of Pakistan on April 1, 1948—the blueprint of Pakistan's industrial development.

The statement ranged over the whole field of the country's economy, dealing with aims and objectives, the role of the Centre and the provinces in industrial planning and development, the relation of State to industry, State-owned and operated industries, assistance to industry, establishment of industrial trading estates, tariffs, taxation and participation of foreign capital.

Government announced that the following industries would be subject to Central Planning: Arms and ammunitions of war; Cement and Cement products; Edible Oil, hydrogenated or otherwise; Electrical communications and broadcasting equipment; Electricity including hydro-electric power; Electrical equipment, appliances and goods; Glass and Ceramics; Heavy chemicals; Iron and Steel; Machine tools, precision tools, guages and workshop equipment; Manufactures of heavy engineering industry; Minerals including salt and coal; Non-ferrous metals and alloy manufactures; Paper, cardboard and pulp; Petroleum and mineral oils; Pharmaceuticals, drugs and light chemicals; Power and industrial alcohol; Preserved and prepared foods; Products of Carbonisation industry; Rubber manufactures; Scientific and mathematical instruments; Sea fish and its products; Ships, barges, river boats and lighters; Sugar; Tanned leather and leather goods; Textiles—cotton, woollen, jute, silk and rayon; and Tobacco.

The Government of Pakistan believes in planned economy as distinguished from the nationalization of industry.

In September 1949 a body called the Pakistan Council of Industries was inaugurated. It was a further step towards the promotion of industries in the country. The Council consists of the representatives of the Central and Provincial Governments, States and private enterprises and advises the Central Government on all vital matters concerning industries. At its first meeting it approved of the targets fixed by the various Advisory Committees.

The Advisory Committees deal with the groups of Industries like Heavy Engineering, Ship-building and Ship Repairing, Light Engineering, Chemical and Leather, Glass and Ceramics and Food. These Committees have done quite valtable work and as an implementation of their recommendations for developing Pakistan's industrial structure, Government started a regular campaign—"Patronize Pakistan's products"—to popularize the industrial products of the country. The handloom industry and other industries depending chiefly on cotton and wool yarn already occupy a predominant position and have a fairly wide market within Pakistan. The Ant-War and Craft Wave, it is hoped, will find an easy market with the foreign connoisseur.

The most striking feature of Pakistan's present economy is the marked contrast between its vast natural resources and its extreme industrial backwardness. For instance, the country produces nearly 73 per cent of the world's production of jute but does not possess enough jute mills. There is an annual production of over 15 lakh bales of good quality cotton but there are very few textile mills in the country. There is also an abundant production of raw material such as hides and skins, wool, sugarcane and tobacco, while the country's considerable resources in minerals, petroleum and power also remain as yet untapped.

The aims and objects of the industrial policy of the State were defined as follows: "... Free play will be given to private enterprise and individual initiative subject to certain conditions. . ."

"In view of the predominantly rural economy of Pakistan, initial emphasis must perforce rest upon the reconstruction and development of agriculture and of industries based upon or connected with it; and on the promotion of medium, small and cottage industries. But the development of large-scale industries essential to the security of the State or its general prosperity will also receive the utmost attention and encouragement."

The statement added: "Pakistan would, therefore seek, in the first place, to manufacture in its own territories the products of its raw materials, in particular jute, cotton, hides and skins, etc. for which there is an assured market, whether at home or abroad."

Important legislation in connection with the planning of industries was passed in December 1948 and March 1949. The December legislation placed the entire control of mines and mineral development in the hands of the Central Government. The March legislation provided the planning of the industries mentioned above to be under Federal control.

To enable the Centre to perform the responsibilities taken upon itself by this legislation the Government of Pakistan set up a Development Board to co-ordinate development plans, Central and provincial, so that the available resources are put to the best possible use; to make recommendations regarding priorities among development plans, and to keep a watch on the progress of development schemes in order to remove bottle-necks and difficulties in the way of uniform progress in all fields.

Industrial Panels and Committees were also established by the Central and Provincial Governments.

Regarding assistance to Industry, the Government of Pakistan have made it absolutely clear that their role in industrial development will not be merely negative. On the positive side the Government would give all reasonable help for the establishment and development of private industry. Pakistan's considerable resources of minerals and mineral oil will be surveyed and energetically exploited. Schemes for development of the country's power resources are being worked out and their implementation will be given the highest priority. Plans for the improvement of the important ports of Chittagong and Karachi are in hand and steps are being taken to gear the transport services to the maximum efficiency.

The Government passed the Industrial Finance Corporation Act in December 1948 and the Corporation was set up with a capital of Rs. 3 crores. This Corporation has been giving loans for development of cottage industries and other small industries. This loan would be repayable in instalments along with a nominal interest.

The Corporation has also been providing implements and other machines on hire purchase to small investors.

FOREIGN CAPITAL

Regarding foreign capital, the Government made it clear that they would welcome such capital seeking investment from a purely industrial and economic objective and not claiming any special privileges. Participation of nationals of Pakistan must however be ensured, both in the administrative and technical services manning the industry, and training facilities should be provided to Pakistan nationals by concerns that wish to establish themselves in Pakistan. Where trading facilities rather than establishment of an industry are desired by foreign firms, subsidiaries should be registered in Pakistan. Government consider that in the national interest, nationals of Pakistan should ordinarily be given the option to subscribe at least 51 per cent of all classes of share capital in the following industries:—1. Cement; 2. Coal; 3. Cotton spinning and weaving mills; 4. Fish canning and fish oils; 5. Generation of electric power (other than hydro-electric); 6. Glass and Ceramics; 7. Heavy chemicals and dyestuff; 8. Minerals; 9. Preserved and prepared foods; 10. Power alcohol; 11. Shipbuilding; 12. Sugar and 13. Tanning and leather.

With regard to other industries, an opportunity should normally be given to Pakistan Nationals to subscribe at least thirty per cent of all classes of share capital and debentures. But if in either case Government are satisfied that the required amount of indigenous capital is not forthcoming the balance might with their approval be subscribed by foreign nationals.

Clarifications of these principles were sought and late in 1948 the Government gave an assurance that the minimal percentage of indigenous capital did not apply to existing units nor to any transfer of an established business nor to foreign companies which start subsidiaries in Pakistan and engage solely in trading activities and not industry. If however a trading company established in Pakistan wishes to expand its activities and undertake industrial production, the appropriate association of indigenous capital in the additional issue will be required.

Private limited companies would be on the same footing as public companies in regard to participation of indigenous capital.

The Government also made it clear that there was no intention to place any restrictions on the remittance of "reasonable proportion of profits". The only restrictions, said the Government, on the remittance of such profits would be those of general application arising from foreign exchange limitations and policy to which such remittances are subject everywhere.

The Government in a statement issued at the time said: "Cases have come to notice where direction and control which would naturally accrue to Pakistanis from their share in the capital of a business is diverted by a managing agency agreement which secures control to the foreign element in the business. If the object of such control is the maintenance of the quality of a product and of the standards of raw materials, Government would be prepared to condone this diversion and to let the managing agencies work to the primary objective of creating Pakistani administrative and executive control of the industry during the next ten years."

COTTON

The Indus valley has been the home of cotton cultivation from time immemorial. The recent excavations at Mohenjo Daro in the Larkana District of Sind have brought to light among the relics of prehistoric civilisation a small piece of fabric and a length of string which have been conclusively proved to be made of cotton. Other evidence showing that cotton was grown in the Indus valley in ancient times are the Babylonian and Greek words for cotton, Sindhu and Sindon.

The annual production of cotton is about 1,250,000 bales of 400 lbs. each. The total area under crop is about 3,001,000 acres.

The cotton grown in Pakistan may be classified into two broad groups: Desi (indigenous) and the American varieties. The American varieties occupy the bulk of the cotton area of Pakistan (about 80 per cent) and have found favour with the West Pakistan farmer on account of their better yield per acre and higher prices. Due to their superior spinning qualities and longer staple lengths, these varieties are greatly in demand in the textile industries of the world for manufacturing cloth of finer counts.

The trade has, however, classified the American varieties of Western Pakistan cotton into the following three groups:

1. 4F, where F stands for Foreign. This has a standard staple length of not less than 3/4 inches and its highest standard warp count is 24.

2. L.S.S. where the initials stand for Labh Singh's Selection. This is a selection from 4F made by Sardar Labh Singh, Deputy Director of Agriculture, Lyallpur in 1928. It has a standard staple length of 27/32 inches and its highest standard warp count is 40. The chief defect of this variety is its late maturing quality which is a drawback from the water supply aspect and which also renders it liable to damage by early frost.

3. 289 F.N.T., where the initials stand for "Foreign New Type." This group comprises American varieties with staple lengths of not less than 7/8 inches. The actual staple lengths of the various varieties included in this group extend to over one inch. During the pre-war period 4F occupied the bulk of cotton area under American varieties. During the war period, however, 289 FNT came to the forefront and covered over half the area under American varieties. This change which was stimulated by wartime conditions has come to stay during the post-war period. 4F now covers a little over one-tenth of the area under American varieties and the balance is covered by 289 FNT and LSS.

There are a number of cotton research stations in Sind and West Punjab. Lyallpur Central Station originally conducted all research work but sub-stations were later opened at Multan, Khanewal and Jhang. In Sind research stations at Mirpurkhas and Sakrand are doing useful research work in connection with the selection, breeding and expansion of improved varieties. A Pakistan Central Cotton Committee has now been established to carry on the direction and control of all such research work.

TEXTILE INDUSTRY

There is no cotton textile industry in Pakistan worthy of the huge quantities of excellent cotton grown in the country. At the time of partition there were 14 textile mills, with 4,874 looms and 184,616 spindles. Nine of these were in East Bengal, four in the Punjab and one in Sind.

The total productive capacity of these units in terms of cloth output, on the basis of shifts of 8 hours per day, comes to 103.5 million yards as against Pakistan's normal requirements of about 675 million yards per annum.

As against the small number of spindles and looms which existed at the time of partition, there are today over 3·15 lakh spindles and 5,330 looms, installed and under installation. In addition 309,720 spindles and 13,258 looms have been allotted to various industrial concerns, which have either placed orders, or are negotiating to place orders for machinery and other equipment with manufacturing concerns. The Government have set apart Rs. 7,50,00,000 for the development of the textile industry during the year 1952-53. It is expected that by 1957-58 there will be in Pakistan about 50 textile mills (both State-owned and private), producing enough cloth to allow 18 yards *per capita* per annum.

In order to meet the country's ever increasing demand for cloth Government have decided to permit the establishment of textile mills with a total capacity of one million spindles in the first five years, and 1½ million spindles in the next five years. Machinery for immediate development is being procured from various countries, notably the United Kingdom, United States of America and lately from Japan.

The Provincial Government of East Bengal have finalised a scheme for starting a cotton spinning mill of 50,000 spindles while arrangements to set up six new textile mills of 25,000 spindles and 500 looms each are being made by the Government of the Punjab with the assistance of the Central Government in three of these mills.

It has also been decided by the Sind Government to set up a textile mill of 50,000 spindles and 1,000 looms at Hyderabad.

The total annual cloth production of the existing mills in bales of 1,500 yards each, was 70,440 bales in 1950, as against 61,632 and 58,705 bales in 1949 and 1948 respectively.

As regards surplus yarn, the industry's output, in bales of 400 lbs. each was 37,861 in 1950 compared with 23,150 and 15,506 bales in 1949 and 1948 respectively.

The mill consumption of cotton in bales of 400 lbs. each was 100,388 bales in 1950, 70,967 bales in 1949 and 62,244 bales in 1948.

The total capital invested in the textile industry today is Rs. 8,57,00,753 as against Rs. 4,52,78,139 in 1947.

The total requirements of Pakistan on the basis of a population of 7·56 crores and of 18 yards per capita per annum, works out to 9,072,000 bales. The present first five-year target of 1·35 million spindles expected to be developed by 1954-55 should not only achieve the desired self-sufficiency but possibly give an export surplus.

Two of the new textile mills, *viz.*, the Kohinoor Mills at Lyallpur and the Zebtun Mills, Karachi have each installed 25,200 spindles of the latest American and H.B. type.

Cotton ginning and pressing factories account for about one-fourth of the total industrial employment in the country. All raw cotton is exported after being ginned and pressed into bales. The gross weight of a Pakistani bale is 400 lbs., about 392 lbs. net after allowing for the weight of hessian wrapping and iron hoops. The dimensions of a bale are about 48 inches by 18 inches with a density of 45 lbs. per cubic foot, compared with the U.S. 35 lbs. and the Egyptian 23 lbs.

An important provision of the Factories Act is that the owner must put a distinct mark and serial number on every bale. Thus any importer in any land can bring to book the owner of a ginning and pressing factory even six months after the purchase if it is proved that a bale contains a mixture of a variety inferior to what it purports to be.

JUTE

Jute is one of the most important commercial fibres grown in the world today. In bulk its annual production ranks second only to that of cotton. The province of East Bengal, in Pakistan, accounts for about 73 per cent of the total world production, although the acreage under jute is only 8 to 10 per cent of the cultivated area. The exports of raw jute constitute about 75 per cent of the total value of Pakistan's exports; and this extremely valuable crop is obtained only from a fraction of cultivated land.

The total production is about 7 million bales a year worth Rs. 1,100 million.

Jute is extracted from plants of the genus Corchorus. The plant is an annual, growing in a single stem, without branches or twigs until it reaches maturity. It consists of a woody stick surrounded by a bast layer in which the fibre is developed. It grows to an average height of 8 to 10 feet, the yield varying according to the district, soil, river and weather conditions and seed employed. An average crop produces about 1,300 lbs. of fibre per acre but yields as high as 2,500 lbs. have been recorded.

There are various qualities with different trade-names, the variation in quality usually being attributed to the district in which the jute is grown or the method by which the jute fibre is extracted.

Sowing commences in February in low-lying lands and on the highlands as late as May. *Capsularis*, the white jute, varies in colour from white to dark grey, largely depending on the water in which the plants are soaked. It is grown on both high and low lands, sown early and harvested from June to September. The *Olelorius* fibre is of a finer texture, stronger than white jute and varies in colour from golden yellow to dusty brown, also being influenced by the water; it is mainly a highland crop, sown later than white jute and harvested in August and September.

The flowering time of the plant is considered best for yield, though earlier cuttings may give finer qualities. After cutting the plants are tied up in bundles and left for about three or four days to allow the leaves to drop off. The bundles are then submerged in water and allowed to remain for ten days to three weeks. This process called "retting" results in the fermentation of the sift pith of the plant, which dissolves and leaves the fibre, which can then be easily separated from the stick. The fibre is then washed, dried, and made ready for sale and transport.

Though Pakistan produces about 73 per cent of the world's jute it has a 100 per cent monopoly of the really fine varieties of the fibre, grown largely in the Districts of Mymensingh, Dacca, Commilla, Faridpur, Pabna, Bogra and part of Rangpur. Mymensingh grows about 25 per cent of the total crop.

Jute is a regulated crop and the acreage is controlled by Government.

While Pakistan has a virtual monopoly of jute production, India has almost all the jute mills which are concentrated round Calcutta. The Calcutta mills are naturally the largest importers and consumers of raw jute from Pakistan, requiring a minimum of about 4,500,000 bales a year.

The United Kingdom imports from 20 to 25 per cent of the quantity exported from Pakistan. The manufacturers of Dundee produce a wide range of fabrics, yarns, twine and specialised lines for export such as hessian and sacking, tarpaulins, carpet, backing, linoleum cloth, rugs, upholstery, foundations, buckram, etc. For these Dundee requires superior qualities of jute grown in East Bengal only. About 30 per cent of the total exports of raw jute from Chittagong goes to the U.K.

Between 20 and 25 per cent goes to the U.S.A.

Belgium is Pakistan's third best consumer of raw jute. This country imports about 16 per cent of Chittagong's export closely followed by Italy which imports about 15 per cent. Another country which imports jute from Chittagong is France. It accounts for about 10 per cent of Chittagong's exports. Brazil, Argentina, Australia, Poland, Czechoslovakia and the Scandinavian countries are among other importers of jute.

A pukka bale normally weighs 400 to 410 lbs. and is packed by hydraulic presses to a density of 10½ cubic feet. A kutcha bale is loosely packed by hand or steam presses and ranges in weight from 120 to 320 lbs.; the 280 lbs. bale being the most common. The carrying capacity of a meter-guage railway wagon is 50 standard pukka bales and 30 to 40 kutcha bales. The Government of Pakistan has made arrangements for the import of baling presses and it is hoped that eventually the uneconomical kutcha bales will be eliminated from the export trade.

But with all this abundance of raw jute there is no jute manufacturing industry in East Bengal. Government are encouraging private enterprise to establish jute mills. Three private parties have come forward to set up three small units in East Pakistan. It is expected that these mills will begin functioning in the near future producing hessian cloth and gunny bags, both of which are in great demand. But on the whole the response from private industrialists for setting up of jute mills has not been encouraging, specially in the matter of setting up large jute mills. Government have, therefore, decided to establish initially five jute mills each of 1,000 looms. The first started work at the end of the year 1951. While the rest are expected to go into production by the end of 1953.

The following statement shows particulars about the jute industry:—

Location	Capacity	Govt.'s Share
Narayanganj ..	3 Mills of 1,000 looms each	50%
Khulna ..	1,000 looms	49% (Not final)
Khulna ..	500 looms to 1,000 looms	49 %
Chittagong ..	500 looms	50% (Not final)
Chittagong ..	75 looms	Nil
Chittagong ..	250 looms	Nil

WOOL INDUSTRY

Next to jute and cotton, the most important fibre in Pakistan is wool. Pakistan produces about 28 million pounds of wool per year and imports through its land frontiers about 7 million pounds. There are thus 35 million pounds of the fibre available for the development of a large-scale woollen industry in the country. The wool is of eight main varieties, namely Harnai, Bibrik, Baluchi, Kharani, Taraki, Shanwari, Khandhari and Regi. The Harnai and Bibrik species have an international reputation and fetch good prices in the Liverpool auctions.

The export trade has now been re-established and Pakistan was able to export more than 30 million lbs. of raw wool in 1951. Exports were mainly to U.S.A. and U.K. It is estimated that about 6 million lbs. of indigenous raw wool were consumed by the handlooms in Pakistan engaged in the manufacture of blankets and blanketing cloth, coarse tweeds, carpets, rugs, etc. Pakistan wool is used in the manufacture of tweeds, rugs, carpets and blankets. Twelve million pounds of wool is required for use by the local cottage industry for the manufacture of rough blankets and carpets. With the partition, all centres of organised woollen industry went to the Indian Union, and Pakistan was left entirely dependent on imports for her requirements of woollen and worsted goods. Pakistan has at present only one worsted mill (with 2,000 worsted spindles and necessary weaving capacity). A woollen mill with 4,000 spindles has also started production at Karachi. It has been decided to instal some 24,000 woollen and 20,000 worsted spindles in the country by 1954-55. It is also proposed to open finishing centres—each centre comprising 2 sets of raising and finishing machinery.

One woollen mill each at Bannu in N.-W.F.P. and Harnai in Baluchistan is already being installed and is likely to be completed by 1953-54.

Woollen spinneries are also being designed to produce woollen yarn, blankets, carpets, coarser tweeds, rugs and flannels at various centres in Baluchistan and the North-West Frontier Province. A portion of the yarn produced by these spinneries will be distributed to the Training-cum-Production centres in Baluchistan.

The worsted spindles already installed in Karachi are producing approximately 1,400 lbs. of worsted yarn per day. The woollen spinneries which will be established by the middle of 1953 are expected to produce over 5,000,000 lbs. of woollen yarn and woollen material annually, and will be consuming approximately 10,000,000 lbs. of indigenous raw wool.

The quality of indigenous wool being unsuitable for the production of worsted textiles, the total requirements of worsted spindleage of combed wool tops will have to be imported from abroad; and finer wools from countries like Australia, New Zealand and South Africa will have to be imported and mixed with our wool for the production of finer woollens. Also, over 30 million lbs. of finer woollens are imported annually at a cost of three crores of rupees.

SILK

Pakistan's share of the silk breeding areas is very small—an area of 2,000 acres of mulberry plantation land in Rajshahi District in East Pakistan. Some sericultural activities are also carried on in the District of Mymensingh and Sylhet. In all about 10,000 people are engaged in the silk industry with a total annual production of approximately 40,000 lbs. of silk. Sylhet particularly is famous for its Endi and Mogha culture.

In certain parts of the Punjab, it has been found that mulberry plantations can be successful. A Punjab Government scheme envisages the establishment of a silk factory in the Rawalpindi District. The required machinery is being imported from abroad and fresh varieties of silkworms of suitable breeds are being imported from Turkey, Iran, Italy and France.

In the tribal areas of N.-W.F.P. particularly in the Kurrum valley possibilities exist of developing sericulture. Government have employed a Sericulturist for the purpose and after an exhaustive survey, he has formulated a very comprehensive scheme.

Quite a number of weaving mills for silk and art silk have been established in different parts of the country and are working satisfactorily. These mills usually import silk and art silk yarn from abroad and produce various types of fabrics from it.

SPORTS GOODS

For three quarters of a century, the name of Sialkot has been synonymous with sports goods. Champions have wielded its rackets on the centre court at Wimbledon while its hockey sticks have brought fame to teams from undivided India.

A special kind of wood and superior tanned leather are two essential materials required for the manufacture of sports goods, and both are available in abundance in Pakistan. White and yellow mulberry wood, which is used in the manufacture of about 80 per cent of tennis rackets, badminton rackets and hockey sticks comes from the N.-W.F.P., and the States of Dir, Swat and Chitral and is found nowhere else in the whole sub-continent. Sialkot draws all its supplies of essential wood from these areas. The skilled labour of the city has always been predominantly Muslim and remained in Sialkot after partition.

The U.K. leads the list of importers of Sialkot sports goods with over 39 per cent of the total export from Pakistan. Australia comes second with over 9 per cent. U.S.A. comes next with about 8 per cent. India is a close fourth. Among sports goods, cricket bats are the ones which are most in demand.

The total annual production of buffalo hides, cow hides, goat skins and sheep skins is about 8 lakhs, 4,5 million, 5.3 million and 2 million respectively. There are a number of tanneries in the country. There are also a number of factories which manufacture footwear with power machinery. Additional tanning and leather goods factories are being established with Government aid.

SURGICAL INSTRUMENTS

At a critical stage in the Second World War, when surgical instruments were unobtainable elsewhere, Sialkot came to the rescue and made a notable contribution to the Allied war effort, saving many thousands of lives. The surgical instruments manufactured at Sialkot have been widely approved for the design, the fineness of the material and their general soundness. Experienced workmen possessing great skill are employed in the factories and every instrument is manufactured under expert supervision.

The value of the annual output of surgical instruments at Sialkot during the pre-war period has been estimated at about Rs. 4,00,000; during the war years it exceeded Rs. 35,00,000. With the termination of the war there has been an inevitable decline in production but it remains higher than the pre-war level. Pakistan's main customers are the Indian Union, Middle Eastern countries, East Africa and Burma. Many other countries also import smaller quantities.

HEAVY CHEMICALS

Three sulphuric acid plants, two of 10-ton capacity and one of 20-ton capacity were expected to start working in 1952. In addition there are two small units manufacturing sulphuric acid by the Chamber process—one at Rawalpindi and the other at Sukkur, the first with a capacity of 300 tons per annum and the second with 30 tons per annum.

The factory producing soda ash at Khewra which closed down due to the migration of the technical staff after partition and the non-availability of coal, iron and steel required for repairs and the maintenance of the factory, re-started production in December 1948 and is now producing light soda ash at the rate of about 20,000 tons per annum. The production of soda ash (heavy) was also expected to be started at this factory. It was also decided to instal a 10-ton a day capacity plant for the production of caustic soda and chlorine by the electrolytic process. A small unit with a capacity of 5 tons a month was to start producing chlorine for the needs of the Federal capital's water-supply system.

For the manufacture of fertilizers, it was decided to set up an ammonium sulphate plant in Western Pakistan with an annual production capacity of about 100,000 tons. To work out details of the scheme, two teams of experts one from the Power Gas Corporation of England and the other from the Union Chemique Belge of Brussels, Belgium, were invited to carry out the necessary survey.

Under the Six-Year Plan a huge fertilizer factory is being planned, work on which is likely to start by the end of 1952.

PHARMACEUTICALS

Pakistan is rich in some of the herbs required by the pharmaceutical industry. It has also substantial quantities of alcohol from molasses for conversion into tinctures like iodine, etc.

The Government have sanctioned the establishment of a Bureau of Laboratories which is already preparing vaccines and sera. A factory at Quetta manufactures Ephedrine Hydrochloride, etc. Another for the manufacture of Santonin is being shortly installed.

Pakistan wants private enterprise to establish five self-contained pharmaceuticals and drugs manufacturing concerns in the country—three in West Pakistan and two in East. These units will meet the internal requirements of Pakistan so far as tinctures and chemicals are concerned. Proposals to establish one such unit are already under scrutiny. Others are in the process of formulation.

GLASS

The glass industry in the sub-continent was initially started in 1892 at Jhelum (Pakistan). Pakistan's annual requirements are estimated at 21,000 tons of glassware and 7 million tons of sheet glass. Production capacity is about 3,000 tons of glassware per annum. There are three factories working in Western Pakistan and two in Eastern Pakistan which are mainly producing containers, pressed and blown table wares. More units are being erected in West as well as East Pakistan to produce all kinds of glassware like jars, tumblers, dishes, bowls, etc. One of these units is located at Chittagong in East Pakistan. The capacity of this factory is about 7 tons a day. Another glass manufacturing plant was to be located at Karachi with a capacity of 20 tons a day. The plant includes a tube drawing machine and equipment to make lamp shells which are being imported at present from abroad. It is also intended to instal a sheet glass factory using the Fourcalt process which will meet part of Pakistan's requirements.

PAPER, SUGAR

Paper worth Rs. 30 millions is imported annually into Pakistan. With a view to meeting the growing demand for newspapers in the country an up-to-date paper factory with a capacity of producing 100 tons of paper per day is being established in East Pakistan. The factory will be located somewhere in the Chittagong Hill Tracts and is estimated to cost about Rs. 5 crores. Kuptaimuk has been suggested as a suitable site. The mill is expected to go into production by the end of 1952.

Two industries, sugar and power alcohol from molasses which is a by-product of the sugar industry, are in the course of establishment. A 50,000 ton modern sugar factory—the biggest in Asia—has been set up at Mardan in North-West Frontier Province where it is also intended to instal a distillery for the manufacture of power alcohol with a capacity of 10,000 L.P. gallons per day.

This factory started its operation in the middle of 1951, and has been able to supply fine quality sugar.

Permission has also been granted to another sugar mill in the N.-W.F.P. to instal a distillery of a capacity of 1,100 gallons per day. Another power alcohol plant is being established in East Bengal.

At present there are two factories—one at Rawalpindi and the other in East-Bengal —producing industrial alcohol and liquors on a commercial scale. There are two other small distilleries, at Kotri in Sind and Quetta in Baluchistan.

The most recent achievement on the food industrial front comprise the establishment of two factories—one at Karachi and the other at Hyderabad (Sind) for hydrogenation of edible oil with a capacity of 3,000 tons each. To these factories which are expected to render the country self-sufficient in its requirement of 'Vanaspati' cooking medium, will be attached plants for refining the cotton seed oil to be used in the manufacture of Vanaspati.

Soap is mostly produced on a cottage-industry scale in Pakistan. There are over 800 big and small factories and the country is self-sufficient in washing soap. A toilet soap manufacturing plant has been installed in Karachi while two more (one in Karachi, one in Bahawalpur) were in the offing.

Most of the engineering industries that existed at the time of partition were closed when the labour engaged on it, migrated to India. The majority of the industries are once again operating up to their previous capacity level.

A firm which was previously manufacturing electric lamps of the general service type of certain sizes, is now manufacturing train lighting lamps and higher voltage lamps of the general service type. Two more firms are manufacturing battery plates for lead acid accumulator cells.

HEAVY INDUSTRY

Besides, industries like steel melting, re-melting and re-rolling, manufacture of hurricane lanterns from brass, complete storage batteries, electric accessories from plastics and fabrication of C.I. pipes are under consideration. One of the existing fan manufacturers hopes to produce very shortly both table and pedestal type of electric fans.

For the development of shipbuilding and ship repairing, a conference of the Industrial Advisory Committee was held in June, 1949, in Karachi. Three sub-committees were appointed to examine the possibility of immediate provision of a floating dock till such time as a dry dock was constructed, fixation of industrial targets for the next five years and preparation of a scheme for training technical supervisory staff in Pakistan and abroad and also devising ways and means to ensure regular supplies of raw materials.

The investigations for constructing a Commercial Dry Dock at Karachi were completed by the end of 1951, and the work on the dock has now started. The cost is likely to be Rs. 120 million.

For the exploitation of mines and minerals a team of geologists are investigating the mineral resources of Pakistan. Schemes for scientific exploitation of the country's resources are being worked out.

Pakistan has large mineral and ore deposits but its present output of coal is insufficient to meet its requirement. Indigenous production from the existing resources is about 300,000 to 400,000 tons per annum. Though of an inferior quality it can be used in specially designed engines for manufacturing briquettes.

In the opinion of an expert agency Messrs. Powell Duffryn Technica Servicesl Ltd., London, there are large deposits of coal below 250 feet in the Punjab and Baluchistan.

Production of coal from the Sharigh Mines, Baluchistan, is being stepped up. The scheme involves an expenditure of about Rs. 7 lakhs including the purchase of certain mining stores and means of transport.

In addition to the existing briquetting plant at Quetta it was proposed to instal two additional plants—one in the Punjab and the other in Baluchistan. In the Quetta plant imported coal-tar pitch is being used as binding material. The possibility of using indigenous bitumen produced by the Attock Oil Company is being investigated.

Lignite (brown coal) has been discovered in East Bengal. It is reported that it is scattered over an area of 170 square miles in Mymensingh and at Habibgunj (Sylhet). Coal in both places is expected to be useful for household consumption as well as for stationary boilers in industries. Further survey is in progress.

Among the active explorers of Pakistan's mineral resources are the Burmah Oil Co. (Pakistan Concessions) Ltd. and the Attock Oil Co., Ltd. A considerable amount of geophysical prospecting has been done by the Burmah Oil Co. in many parts of the country. Test wells are in the process of drilling, by the A.O.C. and the B.O.C. in the Potwar region in the Punjab. The B.O.C. test operations at Lakhra in Sind have since been abandoned as it proved to be a failure. Prospecting stopped when a depth of about 12,000 feet was reached.

Pakistan is rich in salt. It produces some of the purest rock salt in the world and has also some excellent sea salt. It is also rich in gypsum, nitrates and potash. Chromite of high quality (the second longest deposits in the world) antimony, copper, lead and sulphur are also found. Glass sands are also available. It is round these minerals that Pakistan expects to build its chemical industries.

For cement there are four factories at present in West Pakistan with a total annual production of 500,000 tons, while in East Pakistan, there is one factory with a production capacity of 75,000 tons per annum.

The Associated Cement Companies are expanding their Wah Works so as to produce an additional 10,000 tons of cement. The production of the cement factory in East Pakistan is being doubled and for this purpose the Government advanced a loan of Rs. 8 lakhs to the Assam Bengal Cement Company.

Before 1951, Pakistan was surplus in cement and used to export the commodity. Now the situation has been reversed on account of Pakistan's heavy construction programmes. Therefore Government have granted O.G.L. for the import of cement. Plans are also nearing completion for the establishment of more cement manufacturing factories by the Government.

Efforts are being made to manufacture fine bricks to improve the quality of which bauxite has to be added to the fire clay. Arrangements have therefore been made to import bauxite.

FRUIT INDUSTRY

The N.-W.F.P. is sometimes described as the California of Pakistan while the fruit drinks of the Punjab have as wide a reputation.

The total area under fruit cultivation is about 409,500 acres, of which 200,000 acres are in East Bengal, 150,000 acres in the Punjab, 50,000 acres in Sind, 80,000 acres in Baluchistan and 1,500 acres in the N.-W.F.P. The estimated annual production is 70,000,000 maunds. Approximately 40 per cent of the fruit is consumed within Pakistan in fresh condition, 15 to 30 per cent is used in canning and preservation industry and the rest is exported to India and other adjoining countries, either in fresh condition or after drying and processing.

Fruit varies from the world's best bananas of Munshiganj (East Bengal) and the Sylhet orange to the peaches and plums of N.-W.F.P., the grape fruit of Sind, the grapes, apples, cherries, apricots and muskmelons of Baluchistan, the dates of the Makran coast and of Bahawalpur, the mangoes, lemons, sweet limes and "Malta" oranges of the Punjab plains and the pears grown as far north as Peshawar.

It has been estimated that Pakistan's annual production of dates is about 4,100,000 maunds, second only to Iraq which is the largest producer of dates in the world. To improve its quality Government are considering the establishment of a "Date Research Station" in Pakistan.

Pakistan has thus a great variety of fruit and some of it is so cheap that the poorest labourer can afford to buy it.

East Bengal grows 43,565,000 maunds of bananas every year. The N.-W.F.P. has the same latitude, elevation and variations of climate and produces the same varieties of fruit as California. Perhaps in some respects the N.-W.F.P. is even more advantageously placed than California as it has areas which can produce tropical fruit such as mangoes, bananas, and lichis which are not grown in temperate zones.

To raise the standard of fruit preservation, the Government passed the Fruit Products Control Order. Under this order no factory can manufacture fruit and vegetable products unless it is licensed and agrees to abide by certain quality standards and sanitary and hygienic requirements in the factory premises as laid down in the order. The Fruit Products Control Order is a check on malpractices and as such has played an important part in making available genuine and wholesome products prepared under sanitary and hygienic conditions. At present there are nearly a hundred license holders in the country. The check samples are analysed at the Central Control Laboratory at Lyallpur.

TEA INDUSTRY

The Sylhet and Chittagong districts of East Bengal are the only two tea producing areas in Pakistan. Pakistan has been allotted a standard acreage of 76,700 acres and the export quota as fixed under the International Tea Agreement is 35 million lb. In Pakistan there are at present about 130 gardens and the annual production is estimated to be about 50 million pounds.

The export value of the tea crop is of the order of Rs. 5,00,00,000 and the trade pays about Rs. 1,00,00,000 in direct revenue to the Government.

Pakistan's best tea customer is the United Kingdom, which takes about 95 per cent of all the tea shipped from Pakistan.

To facilitate and encourage industrial development in general the Sind Government have undertaken the construction of three industrial Estates situated at Karachi, Hyderabad (Sind) and Sukkur. These Trading Estates aim to provide the services necessary to enable manufacturers to establish their factories with the minimum trouble and delay. All sites are leased out on a rental of approximately Rs. 750 per acre and leases may be obtained for any period desired up to a maximum of 99 years with options for renewal if necessary.

COTTAGE INDUSTRIES

Apart from the regular artisans who invariably form an important part of a village community, the peasantry is often engaged in some suitable cottage industry during the slack season. The industry is financed either by professional financiers, who purchase raw materials and supply them to workers or by middlemen advancing loans to artisans who purchase their own materials and sell the products to dealers who are either wholesalers or retailers, or the industry is self-financed and sold direct to consumers.

The main products of cottage industries are footwear, leather goods, leather curios, glue, guts and casings.

Hand spinning and weaving as a cottage industry is carried on all over Pakistan especially by women as a part-time occupation. In East Bengal women earn their livelihood by spinning and weaving. Dacca and Chittagong are the chief centres. The Dacca muslins were world famous at one time. The Government have today given a fillip to this industry by establishing a Spinners' Association. Jute spinning and weaving is a valuable cottage industry in East Bengal. A spindle is used for turning the jute fibre into thread. In one day over two lb. can be made into yarn. Some families have been engaged in this industry for generations. After spinning the yarn, the men turn it into twine or ropes. A primitive loom is used for making gunny bags. Of late the Government have been trying to popularise modern appliances and demonstration parties have been visiting the people engaged in this industry with a view to training them up in the use of modern methods.

The silk industry in East Bengal must also be mentioned. "Chikan" and "Kasida" are two well-known varieties of Dacca silks. "Phulkari" in the Punjab and "Makrani" in Sind are made of silk in multifarious colours. The N.-W.F.P. has the "Kohat lungi" as an important cottage industry. Patterns are distinctive for each clan or "Khel." "Chikan dor" of Peshawar and some patterns done on muslin are of exquisite fineness and beauty.

Peshawar is famous for copper-ware done on Persian models. Metal work is done all over Pakistan and consists of work in brass, bell metal, copper, iron, gold and silver.

The Pathans are extremely clever at metal work. One Frontier mechanic has succeeded in producing sewing machines entirely by hand. Rifles and revolvers are made by tribesmen on a cottage industry basis both in the Khyber and the Kohat passes. On the artistic side gold and silver work is done in all the provinces of Pakistan. At Dacca filigree work is done to perfection. What is called the "Bidri-work" of East Bengal consists in inlaying of silver with a kind of copper. In the Punjab enamelling is very popular.

Woodwork in Pakistan ranges from simple photoframe to up-to-date furniture. Exquisite carvings on furniture, windows, screens and doorways are met with throughout the Dominion. The standard of carpentry is high and can challenge comparison with the best in the world.

Tanning and leather goods form an important item on Pakistan's cottage industry list. Side by side with rough and partial tanning there is high class tanning and chrome leather manufacture. Shoes, slippers, belts, purses, suitcases, portmanteaus, saddles, drums, bellows, etc., are produced. Glue making is a side industry of tanneries. In the Punjab hides and skins are tanned in small cottage tanneries by indigenous processes.

The village potter turning out a pot a minute, as it were, is a familiar figure all over Pakistan. The chief raw materials used are clay and sand. They are baked in a kiln which burns any available cheap fuel. The primitive potter's wheel is still being used. Earthenware cooking vessels, tea cups, pots and pans and "hookah tops" are found in every village home. Easily cleaned and cheaply replaced made by local labour from local raw materials they are well suited for villagers' needs. In East Bengal tile and brick-making is an important branch of the potters' work. So is toy making. Baking is done in earthen jars so as to prevent direct contact with the flames.

Paper-making is a supplementary occupation. Some of those engaged in agriculture during the summer and the rainy season are busy with paper-making in the winter. The raw material used is waste paper cuttings from book binders, as well as rags, old gunny cloth, fibres, and fishing nets. The three popular varieties of paper are document, kite and blotting paper. The special feature of such paper is its durability.

Bangles, combs, necklaces, caskets, buttons, paper weights are made from ivory in East Bengal where no less than 80 different tools are used. Ivory work is also done at Lahore by means of simple tools such as chisels and knives.

Conch-shell work is done at Dacca. Buttons, bracelets, bangles, chains, rings and small images are made out of conch-shells.

A scheme was worked out in 1949 for the rehabilitation of some of the refugees concentrated in Karachi. This was estimated to cost the Government under Rs. 3,00,000 in the form of outright grants and Rs. 18,00,000 as loans and advances. Under this scheme it was proposed to establish 34 Industrial Co-operatives to absorb 2,000 families of refugee artisans in as many as 17 different types of cottage industry.

Government have started work on the construction of satellite towns in Karachi, Hyderabad, Nawabshah and Mirpurkhas, etc. In the Thal area 20,000 families are being absorbed. All these areas are being developed as full-fledged industrial colonies, where facilities for such cottage industries are being provided by Government.

Government have also launched a "Patronise Pakistan Products" campaign.

LABOUR

LESS than one per cent. of the total population of 75,687,000 in Pakistan is employed in organised industry. According to Government estimates the number of industrial workers in the country is about 700,000. The strength and distribution of labour employed in the various categories can be seen from the table given below, being the average daily number employed during 1949 :—

Factory Industries Group	..	181,752
Plantations (Tea)	..	150,000
Railways	..	135,357
Mercantile Marine	..	125,000
Docks	..	15,000
Mines	..	9,413
Others	..	50,000
Total	..	666,522

The labour conditions in the country showed a slight improvement during the year. However the volume of employment considerably diminished during 1950 and 1951 as judged by statistics of registrations and placings maintained by employment exchanges. This was due to surplus labour on plantations, unemployment amongst Pakistani seamen, influx of refugees and increase in landless agricultural labour.

The cost of living of industrial workers during 1951 was appreciably higher than 1950 according to the figures compiled by the Central Government. Prices showed a somewhat upward trend in 1951. The index number for Karachi rose from 94 in December 1950 to 101 in December 1951, for Sialkot from 78 in December 1950 to 83 in December 1951, for Khewra from 77 in December 1950 to 97 in December 1951, for Narayanganj from 99 in December 1950 to 106 in December 1951, and for Chittagong from 110 in December 1950 to 111 in December 1951. The structure of basic wages remained almost unchanged. The workers were granted profit bonuses by some textile, cement and leather factories.

Industrial unrest, as judged from stoppages of work considerably declined during 1950 in terms of total disputes, numbers of workers involved and mandays lost as compared with the year 1949.

The trade union movement as judged from the membership of registered trade unions does not appear to have permeated the rank and file of the working classes. The All Pakistan Confederation of Labour claims to be the most representative body of workers in Pakistan.

As regards legislation, the general policy was mainly towards extending the scope of existing labour legislation. The Mines Act and the Employment of Children Act were slightly amended consequent upon ratification by Pakistan of I.L.O. Convention No. 80 concerning Night Work of women and No. 90 concerning Night Work of young persons adapted during 1948. In the Provincial sphere the East Bengal Government enacted a new Act entitled East Bengal Shops and Establishments Act, 1951. The validating of the three bills outstanding from the Indian legislature at the time of partition *viz.* Trade Unions (Amendment) Bill, the Minimum Wages Bill and the Workmen's State Insurance Bill are still under consideration. No appreciable improvement was noticeable in the sphere of labour welfare during the period under review.

A more detailed account of each of these items is given below.

EMPLOYMENT

No uniform system of recruitment prevails in the country but the system of direct recruitment is generally in vogue and is favoured by the employers, both private and government. Recruitment through contractors, jobbers or other intermediaries is not much practised. However, the employment of contract labour is still prevalent on the docks by the stevedoring companies, on public works and in the cotton-ginning and baling industry. Skilled workers are usually recruited through the employment exchanges.

The Employment Exchange Organisation which was previously known as the Department of Resettlement and Employment was renamed Manpower and Employment Department on November 1, 1950, and was also reorganised in certain respects. It is now in the charge of a Director-General at the headquarters, who is assisted by Directors at each of the three separate regions, *viz.*, Sind and Baluchistan, Punjab and N.-W.F.P. and East Bengal, in addition to a Director at the headquarters. The number of employment exchanges were increased from 23 to 25 while the training centres were reduced from 28 to 7. The main functions of the Department are employment service and training. The Department, however, is still functioning on a temporary basis.

Employment Service.—The employment service is a free and voluntary service. The Department runs 25 employment exchanges and employment bureaux at different centres in the country. This figure includes one central employment exchange at the headquarters of the Department which acts as an inter-provincial clearing house. With a view to associating the public with the work of the organisation, Employment Advisory Committees consisting of representatives of workers, employers and other interests concerned have been set up. The total number of registrations at the exchanges from August 15, 1947 to December 31, 1951 was 1,000,981 out of which 248,152 were provided with jobs. The table below gives details during 1951 :—

Month			No. of registrations	No. of applicants
January	..	..	28,720	2,746
February	..	..	18,037	2,865
March	..	..	20,134	2,672
April	..	..	17,797	2,636
May	..	..	17,894	2,575
June	..	..	16,845	2,746
July	..	..	22,196	2,625
August	..	..	31,288	5,263
September	..	..	20,983	3,738
October	..	..	20,704	3,097
November	..	..	21,156	3,185
December	..	..	18,794	3,363
Grand Total		..	254,538	37,511

Training.—Upto the end of October 1950, 28 training centres functioned under this Department. The number was reduced to seven with a capacity for 1,250 trainees for purposes of efficiency. In addition to technical and vocational training, provision has been made at each centre for imparting general instruction to the trainees.

The services of two I.L.O. experts were secured by the Department early in 1951. They were to stay in Pakistan for a period of one year and were expected to build and organise an Instructors Training Centre and a new Vocational Training Centre at Karachi, and to set up a new Technical Training College and a Vocational Training Centre in East Pakistan. They are still working with the Department.

LABOUR LEGISLATION

There is a volume of labour legislation in force in the country. The main provisions of the various labour laws as they stand today are given below :—

Factories Act, 1934.—This applies to factories employing 20 or more workers and using power, but does not include mines. No adult worker is to work in a factory for more than 48 hours in a week, or in a seasonal factory for more than 50 hours. An adult worker employed in a factory engaged in work which for technical reasons must be continuous throughout the day may work for 56 hours in a week. The working hours of adults should not exceed nine per day in a factory. A male adult worker in a seasonal factory may work for 10 hours. The periods of work of adult workers along with their rest interval shall not spread over more than ten and a half hours in the case of perennial factories, and eleven and a half hours in the case of seasonal factories. Women are only allowed to work between 6 A. M. and 7 P.M. but this limit can be extended from 5 A.M. to 7-30 P.M. A weekly holiday is prescribed for all adult workers on a Sunday or on one of the days immediately before or after that Sunday provided that no worker is thus made to work for more than ten days consecutively without a holiday. Children under the age of 12 years are not allowed to work in any factory. A child between the age of 12 and 15 years and an adolescent shall only work in a factory if certified as physically fit and carries a token to this effect. The working hours of children are limited to five per day, and the spread over to seven and a half hours. An adult worker after twelve months of continuous work in a factory is entitled to paid holidays for a period of ten or, if a child, fourteen consecutive days, at a rate equivalent to his daily wages. The worker can accumulate his paid holidays earned during two years. Half the wages will be paid to him before proceeding on leave and the remaining half on return. A worker is entitled to overtime payment at the rate of twice his ordinary pay for work done in excess of nine hours a day or 48 hours a week in a non-seasonal factory and in excess of nine hours a day or 50 hours a week in a seasonal factory.

The law also makes provision for rest shelters, creches and canteens. It contains a number of provisions regarding cleanliness, ventilation, artificial humidification, cooling, over-crowding, lighting, supply of drinking water, latrines and urinals, position of doors, precautions against fire, fencing of machinery, safety of buildings, notice of accidents, and so on. The administration of the Act is the responsibility of the Provincial Governments.

The Industrial Statistics Act, 1942.—Section 2 (1) enables the Provincial Government to collect statistics on (*a*) any matter relating to factories and (*b*) any of the following matters so far as they relate to welfare and conditions of labour, namely :—(*i*) prices of commodities, (*ii*) attendance, (*iii*) living conditions, including housing, water supply and sanitation, (*iv*) indebtedness, (*v*) rents of dwelling houses, (*vi*) wages and other earnings, (*vii*) provident and other funds provided for labour, (*viii*) benefits and amenities provided for labour, (*ix*) hours of work, (*x*) employment and unemployment and (*xi*) industrial and labour disputes.

The Industrial Employment (Standing Orders) Act, 1946.—The Act came into force on 23rd April 1946, and applies to industrial establishments employing 100 or more workmen. The employer is required to submit to the certifying officer, within six months of the date of coming into force of the Act, five copies of the draft standing orders proposed by him for adoption in his industrial establishment. The draft should be in conformity with the model standing orders where prescribed and should make provision for all matters set out in the Schedule to the Act such as classification of workmen, shift working, attendance, termination of employment, suspension, dismissal, means of redress, etc.

The Mines Act, 1923.—No person is allowed to work in a mine for more than six days in a week. The maximum weekly and daily hours of work of persons employed above ground shall not exceed 54 and 10 respectively. Periods of work including rest interval of at least one hour is to be allowed after six hours of continuous work. The working hours of persons employed below ground are limited to nine per day. The employment of children (under 15) below ground is prohibited. The Act contains provision regarding supply of drinking water, urinals, safety, notice of accidents and appointment of courts of enquiry in case of accidents, etc.

By an Amendment Act in 1951, the employment of women and young persons between 15 and 17 years of age during the night was prohibited. Night signifies a period of at least 11 consecutive hours for women and twelve consecutive hours for young persons including an interval of at least 7 consecutive hours between 10 p.m. and 7 a.m.

The Railways Act, 1890.—Hours of work in railway workshops and railway mines are regulated by the Factories Act and the Mines Act respectively. This Act was amended in 1930 to make provision for the limitation of hours of work and for the grant of periodical rest. The hours of work of 'essentially intermittent' workers are prescribed at a maximum of 84 a week, and for other workers 60 per week on the average in any month. A railway servant other than 'essentially intermittent' shall be granted, each week commencing on Sunday, a rest interval of not less than 24 consecutive hours.

The Merchant Shipping Act, 1923.—Provision is made for recruitment and engagement or seamen, employment of young persons, payment of wages, health and accommodation, etc.

The Weekly Holidays Act, 1942.—The Act applies to shops, restaurants and theatres. It provides that every shop will remain entirely closed once a week. Persons employed in shops, restaurants or theatres except those employed in a confidential or managerial capacity are allowed one holiday each week.

East Bengal Shops and Establishments Act, 1951.—The Government of East Bengal enacted a comprehensive Shops and Establishments Act in 1951 and repealed the Bengal Shops and Establishments Act, 1940. It applies to shops, commercial or industrial establishments and establishments for public entertainment in certain specified towns and can be extended to other areas by notification. It provides for a nine hours' day and fifty-one hours' week and also for half holiday on Thursday and full holiday on Friday with pay in shops and establishments. Wages shall be paid within ten days of their becoming due. Provision also exists for 14 days privilege leave, ten days casual leave and 14 days sick leave on full pay in a year. Employment of children below 12 years is prohibited. Industrial disputes in shops and establishments are to be dealt with according to the procedure laid down in the Industrial Disputes Act, 1947.

The Punjab Trade Employees Act, 1940.—This Act applies to shops and commercial establishments generally. Hours of work in shops and commercial establishments are fixed at 10 a day and 54 a week. On occasions of pressure of work, overtime work upto 150 hours in a year is allowed which is to be paid at double the ordinary rate. A daily rest interval of one hour has been prescribed. The Act also prescribes a weekly holiday with pay and 14 days paid holidays after one year of continuous employment. The wages of every employee are to be paid on demand at the end of each fortnight unless otherwise contracted. Young persons below the age of fourteen years are only to be employed between 8 A.M. and 7 P.M. and their maximum hours of work are fixed at 42 a week and seven a day. One month's notice of termination of services is to be given to an employee. In case of dismissal without sufficient cause or without one month's notice the employee is entitled to compensation upto one month's salary.

The N.-W. F. P. Trade Employees Act, 1947.—The Act applies to municipal and cantonment limits of the province, and can be extended to other areas by notification. It limits the working hours of employees in shops and commercial establishments to nine per day and 51 per week. In case of exceptional pressure of work overtime work upto 150 hours in a year payable at double the rate is allowed. A rest interval of one hour is prescribed during the day and employment for more than six hours without half an hour break for rest is prohibited. The hours of work of young persons below the age of 14 are limited to seven per day and 42 per week. No overtime work is permissible in their case. A rest interval of at least half an hour is given after three and a half hours of work. Employment of any person below the age of ten is prohibited. All employees are to be given weekly rest of at least twenty-four hours with pay. In addition, 14 days' leave with pay after one year of service is to be given. Wages are to be paid on demand at the end of each wage period of not more than a month subject to any contract between the employer and the employee.

Sind Shops and Establishments Act, 1940.—It covers persons employed in shops, commercial establishments and places of public entertainment. The daily working hours of shops are limited to nine and a half, and overtime working upto 120 hours in a year payable at one and one-fourth times the ordinary rate is permissible. The daily spreadover should not exceed 12 hours. An interval of not less than half an hour for every four hours of continuous work or of one hour for every six hours of continuous work is prescribed. The weekly hours of commercial establishments are limited to 54 but overtime work upto 120 days in a year payable at one and a half times the ordinary rate is permissible. A rest interval of at least half an hour for every four and a half hour work or one hour for every six hours of work is prescribed. The spreadover shall not exceed 12 hours a day. The daily hours of work in places of public amusement and entertainment are limited to 10 which shall not spread over more than 14 hours in a day. At least half an hour rest for every six hours of work or one hour for every eight hours of work is prescribed. Employment of children below the age of twelve is prohibited in any shop, commercial establishment, restaurant, eating house, theatre or any other place of public entertainment to which the Act applies. A rest interval of at least half an hour for every four hours of work is prescribed for them. All persons covered by the Act are to be allowed one weekly holiday with pay and 14 days' privilege leave with pay for each year of service.

The Payment of Wages Act, 1936.—The Act applies in the first instance to factories and railways, but the Central and Provincial Governments are empowered to extend all or any of the provisions of the Act to any class of persons employed in any industrial establishment. In exercise of these powers the Central Government during 1948 extended the Act to all classes of mines and oilfields. The Act applies only to the payment of wages of persons getting less than Rs. 200 p.m. No wage period is to exceed one month. Wages in any railway, factory or industrial establishment employing less than one thousand workers shall be paid within seven days after the expiry of the wage period, and within ten days if employing more than one thousand workers. In the case of termination of employment by the employer, all wages due are to be paid within two days of the termination of employment. Wages are to be paid on a working day. Contracting out is not allowed. Deductions from wages are allowed only in respect of fines, absence from duty, damage to goods, house accommodation supplied by the employer, amenities provided, advances, income-tax, etc. Fines can only be imposed on a worker in respect of such acts and omissions as the employer may have specified by a notice with the approval of the Provincial Government. The total amount of fine in a wage period is not to exceed half an anna per rupee of the wages. No fine shall be imposed on any person below the age of fifteen years.

The Industrial Disputes Act, 1947.—Under this Act if any industrial dispute exists or is apprehended, the appropriate Government is authorised to :—(*a*) refer the dispute to a Board for promoting settlement; or (*b*) refer any matters connected with the dispute to a court of inquiry; or (*c*) refer the dispute to a Tribunal for adjudication. In the case of a public utility service when due notice of the strike has been given it is obligatory on the Government to make such a reference to a Board, Court or Tribunal. Such a reference is also obligatory when both the parties to an industrial dispute apply either separately or jointly for such reference. When an industrial dispute has been referred to a Board or Tribunal as aforesaid, the Government is authorised to prohibit the continuance of any strike or lock-out which may be in existence at the date of the reference. The Government may appoint a conciliation officer for promoting the settlement of disputes. The settlement brought about by the conciliation officer shall be binding for such period as is agreed upon by the parties, and if no such period is agreed upon, for a period of six months.

The appropriate Government may constitute a Board of Conciliation for the settlement of industrial disputes. If a settlement is arrived at it shall be binding in the manner of a settlement before a conciliation officer. If no settlement is arrived at, the Board shall submit a report stating the facts and circumstances of the cases and the reasons on account of which a settlement could not be arrived at. The Government may thereafter refer the dispute to an Industrial Tribunal for adjudication. The appropriate Government may as occasion arises constitute a court of inquiry into any matter connected with an industrial dispute, which must be reported on in six months. The Act further authorises the appropriate Government to constitute Industrial Tribunals for the adjudication of industrial disputes. The award of the Tribunal will be binding on the parties for one year.

The Act prohibits strikes and lock-outs in a public utility service if commenced : (*a*) without giving to the employer or the workmen as the case may be six weeks notice ; (*b*) within fourteen days of giving of such notice ; or (*c*) before the expiry of the date of strike specified in any such notice ; (*d*) during any conciliation proceedings before a conciliation officer and seven days after the conclusion of such proceedings.

The Act also makes a general prohibition of strikes and lock-outs in any industrial establishment : (*a*) during conciliation proceeding before a Board and seven days after their conclusion ; (*b*) during proceedings before a Tribunal and two months thereafter and (*c*) during any period in which a settlement or award is in operation in respect of any of the matters covered by the settlement or award. Strikes in contravention of these provisions are illegal and punishable with imprisonment or fine or both. The Act also prohibits financial aid for illegal strikes and lock-outs.

Trade Unions Act, 1926.—Half of the total officers of a union must be persons actually engaged in the industry with which the union is concerned. The Act grants immunity to registered trade unions from :—(*i*) legal proceeding in respect of any agreement made between its members for the furtherance of a legitimate trade union object unless the agreement is to commit an offence and (*ii*) civil suits in certain cases. The general funds of a registered trade union should only be spent on objects specified in the Act. A separate fund for political purposes can be constituted but no member can be compelled to contribute to the fund and non-subscribers to this fund will not be placed under any disability as compared with other members of the union.

The Workmen's Compensation Act, 1923.—Persons employed in an administrative or clerical capacity and those whose monthly earnings exceed Rs. 400 (except some of the railway servants) are excluded from the operation of the Act.

An employer is liable to pay compensation for personal injury caused to a workman by accident arising out of and in the course of employment. The contracting of any of the following diseases among others is also considered an injury by accident arising out of and in the course of employment :—anthrax, compressed air illness or its sequelæ, phosphorous poisoning, mercury poisoning or its sequelæ, poisoning by benzene and its homologues or the sequelæ of such poisoning, chrome ulceration or its sequelæ, pathological manifestations due to radium and other radio-active substances or due to X-rays and primary epithelliomatous cancer of the skin. The employer is not liable to pay compensation in

respect of any injury, which does not result in the "total" or "partial" disablement of the workman for more than seven days.

The amount of compensation payable depends in the case of death on the average monthly wages of the diseased workman and in the case of an injured workman both on the average monthly wages and the extent of disablement. The term 'wages' includes overtime pay and the value of any concessions or benefits in the form of food, clothing, free quarters, etc.

Provision has been made for the dependants of the workman in case of fatal accident to him. All cases of fatal accidents will be brought to the notice of the Commissioner for Workmen's Compensation and in cases where the employer admits liability, the amount of compensation payable will be deposited with the Commissioner. In cases where the employer disputes liability, the Commissioner will supply the dependants with necessary information to enable them to decide whether to prefer a claim or not. The employer can make advances to any dependant not exceeding one hundred rupees.

The administration of the Act is the responsibility of the Provincial Governments who have appointed Commissioners for Workmen's Compensation for the enforcement of the Act.

The Mines Maternity Benefit Act, 1941.—Women employed on the surface for continuously six months with the same employer are entitled to maternity leave for 6 weeks before and 6 weeks after delivery at the rate of twelve annas a day. A woman employed below ground is entitled to maternity leave for 10 weeks before and six weeks after delivery at the rate of six rupees a week. A woman who utilizes the services of a qualified midwife at the time of her delivery is entitled to a bonus of three rupees.

The Bombay Maternity Benefit Act, 1929.—Sind adopted this Act. The Act applies to factories under the purview of the Factories Act. The qualifying period is nine months of service. The period of benefit is four weeks before and four weeks after child-birth at the rate of 8 annas a day or average daily wages whichever is less.

The Bengal Maternity Act, 1939.—This Act underwent major changes consequent upon an amendment in 1951. It now applies to all female employees engaged by an employer for manual, clerical, skilled or unskilled labour for hire or reward for the purposes of carrying on his calling, trade or business, etc. The period of maternity leave is six weeks before and six weeks after child birth at the rate of one rupee per day.

The East Bengal Maternity Benefit (Tea Estate) Act, 1950.—It prescribes maternity benefit for women workers during six weeks before and six weeks after child-birth at the rate of one rupee per day, either in cash or kind or both. The qualifying period of maternity benefit is 150 days of service with the same employer during the 12 months preceding the day of delivery. No woman is to be employed during six weeks following the day of her delivery but she may undertake light work as advised by a medical practitioner during the period preceding child-birth. For such work she will be paid at the prevailing rate of pay in addition to maternity benefit. The Act also prescribes compulsory but free ante-natal and post-natal treatment for women workers either in an approved hospital or clinic; and where there is none the employer is to arrange that the services of an approved medical practitioner and a nurse are available for this purpose free of charge to women workers.

The Dock Labourers Act, 1934.—The Act empowers the Governor-General-in-Council to make regulations regarding safety of working places on shore, means of access, safe transport of workers, and so on.

The Coal Mines Labour Welfare Fund Act, 1947.—A summary of this Act will be found in the section on Labour Welfare.

The North-West Frontier Province Essential Services (Maintenance) Act, 1946.—It extends to the whole of the North-West Frontier Province. It applies to all employment (paid or unpaid) under the crown and to any employment or class of employment which the Provincial Government consider essential for public safety, the maintenance of public order or for maintaining supplies or services necessary to the life of the community. The Act provides that persons engaged in such employments shall not depart out of such areas as may be specified.

Essential Personnel (Registration) Ordinance, 1948.—The ordinance requires that all essential personnel specified in the Ordinance between the age of 18 and 55 and not being employees of Central or Provincial Governments shall register themselves at one of the employment exchanges in the country. The object of compulsory registration is to gather data regarding essential services personnel available in the country.

WAGES

The only annual data available is the one which relates to the trend of wages in different industries contained in the annual returns under the Payment of Wages Act. These returns, however, give only the average annual earnings per head in each industry and do not show individual earnings in different occupations. Average annual earnings per head during 1949 in respect of workers in perennial factories coming under the purview of the Payment of Wages Act are given below :—

Industry	Average annual earnings per head (in Rupees) 1949
Textiles	685·8
Engineering	873·0
Minerals and metals	831·9
Food, drink and tobacco	579·4
Chemicals, dyes, etc.	701·8
Paper and printing	997·8
Wood, stone and glass	692·3
Ordnance Factories	775·1
Mints	891·4
Skins and hides	1120·7
Miscellaneous	645·7

The available information in respect of certain industries, and on railways, ports, mines and plantations is given below :—

Cotton Mills.

There was no change in basic wage rates during 1951. The rates prevailing in two cotton mills are given below :—

——	Mill A Hour per shift 7½	Mill B Hour per shift 8
	Rs. a. p.	
Drawing Tenter	25 0 0	Rs. 67 to Rs. 75 (p)
Slubbing Tenter	27 0 0	Rs. 67 to Rs. 75 (p)
Inter Tenter	25 0 0	Rs. 75
Roving Tenter	..	..
Full Sider	29 0 0	Rs. 65
Half Sider	..	..
Double Sider	46 0 0	..
Grey Winder	35 0 0	Rs. 60 (Winder)
Cone Winder	..	..
Pirn Winder	..	..
Colour Winder	32 0 0	..
Reeler (Male)	28 0 0	Rs. 49 to Rs. 55 (p)
Reeler (Female)	..	..
Weaver (One Loom).	..	..
Weaver (TwoLooms)	40 0 0	Rs. 85 to Rs. 95 (p)
Cooly	18 8 0	Rs. 42 to Rs. 50
Doffer	18 8 0	Rs. 42
Sizer	45 0 0	Rs. 82
Creeler	20 0 0	Rs. 55

(p)=piece rates.

Cotton Mills—*Contd.*

——	Mill A Hour per shift 7½	Mill B Hour per shift 8
	Rs. a. p.	
Dearness Allowance	at Rs. 40 p.m. if wages upto Rs. 30, and Rs. 43 p.m. if wages above Rs. 30 for full attendance.	at Rs. 37 p.m. to all workers for full attendance.
Yearly Bonus	1th of annual basic wages earned.	Nil

Cement Industry

The rate of basic wages in two cement factories, one in Sind and the other in the Punjab are given below :—

Wages in Sind

	Rs.
First blacksmith, electrician, turner, winder	70–3 –100
Fitter	70–3 –100
Assistant turner, moulder, electric	45–2½–70
Welder, mason, carpenter	35–1½–50
Khalasi	30–1 –40
Coal attendant, loco fireman	30–1 –40
Mate	30–1 –40
Oilman	26–1 –35
Packer	45–2½–80
Machine man	35–1½–50
Miller	70–3 –100

Wages in Punjab.

In the Punjab Factory the rates of basic wages for certain selected occupations are as follows :—

——	Minimum Rs. a. p.	Maximum Rs. a. p.
Burner	2 10 0	3 10 0
Fitter	1 12 0	3 12 0
Turner	1 10 0	3 3 0
Drivers (Lorry and Car)	1 10 0	3 0 0
Loco driver	1 4 0	3 0 0
Carpenter	1 14 0	2 14 0
Miller	1 13 0	2 14 0
Cooly	0 12 0	0 14 0

Leather Industry.

The only leather factory in the country situated near Lahore works for five days in the week for 8 hours and 45 minutes per day. The existing monthly wage rates are shown below :—

——	Minimum Rs. a. p.	Maximum Rs. a. p.
SKILLED		
Fitter	54 0 0	130 0 0
Fireman	34 0 0	70 0 0
Carpenter	54 0 0	70 0 0
Blacksmith	74 0 0	92 0 0
Mochi	54 0 0	92 0 0
Press compositor	108 0 0	152 0 0
SEMI-SKILLED		
Workers on machines	55 0 0	109 0 0
UNSKILLED		
Chowkidar	52 0 0	70 0 0
Sweeper	34 0 0	52 0 0
Cooly	34 0 0	52 0 0

The dearness allowance is Rs. 7-12-0 per week. Quarterly bonus 10 per cent of basic wages for each quarter and 5 per cent attendance bonus annually.

Railways

In February 1948 the Government of Pakistan appointed a Pay Commission to enquire and report on the conditions of service of the Central and Provincial Services and their scales of pay and allowances. (See also under Administrative Services.) The Government announced their decision on the recommendations of the Commission on 1st March, 1949, in respect of pay scales and allowances for the non-gazetted staff. The Government accepted the pay scales recommended by the Commission and in some cases improved upon them. The new scales were enforced on 1st January 1949. They show a considerable improvement over the previous ones both in respect of starting pay as well as the top pay. The minimum emoluments including dearness allowance which the lowest paid employees are now getting are Rs. 55 p.m. in Western Pakistan and Rs. 61 p.m. in Eastern Pakistan. The details of pay and allowances now in force in respect of certain categories of workers are given below :—

Category	New scale Rs.
Highly skilled, Grade I	75– 5– 180
Skilled workmen, car driver and trained matriculates	60– 2– 80
Posts requiring literacy in English	40– 2– 60
Record sorters, etc.	38 –1– 45
Semi-skilled, Duftries, etc.	38– 1– 45
Unskilled workmen engaged in manual or manipulative work or required to walk long distances	28– ½– 32
Unskilled workers	28– ½– 32
Peons	28– ½– 32

The railways have enforced the following scales for different categories of workers (only the highest and the lowest scales are given). The prevalence of more than one scale for the same category is due to the difference in skill and experience.

	Rs.
Mistries	60– 2– 80
	125–10– 205
Skilled workers	60– 2– 80
	100– 5– 150
Semi-skilled workers	38– 1– 45
	40– 2– 60
Unskilled workers	23– ½– 37
	7– 8– 0
,, ,,	as special pay
	28– ½– 32
	5– 0– 0
,, ,,	as special pay
	33– ½– 37

Ports (Karachi)

The existing rates of wages of some selected categories of workers employed by the Karachi Port Trust and details of allowances are given below. The working hours are eight per day for six days in the week.

Occupation	Present rates of wages (since 1st May 1948) Rs.
Mistry	75– 3– 105
Mason, carpenter, fitter, sawyer, blacksmith, moulder, turner, welder, craneman, ladderman	50– 2– 80
Jemadar, hammerman, pumpman, mate, oilman, lascar, cook, stoker	40– 1– 50
Khalasi, keyman	35– 1– 40
Labourer, sweeper, watchman, trolleyman	30– ½– 35
Fireman	30– 1– 36
Pointsman, porter, cooly	27– 1– 30
Syrang Station	110– 8– 150
Engine Driver 1st class	100– 4– 120
,, ,, 2nd class	250–10– 300

The rate of dearness allowance for all workers is Rs. 25, 35 and 40 p.m. if their pay is upto Rs. 50 from 51 to 100 and from 101 to 150 respectively. The rate of compensatory allowance is Rs. 3 p.m. for wages upto Rs. 54 p.m. and Rs. 5 p.m. for wages from Rs. 55 to 100 p.m. A house rent allowance of Rs. 7 and Rs. 10 p.m. is given if the pay is upto Rs. 54 and between Rs. 55 and 100 respectively, in case free accommodation is not provided.

Mines.—The average daily earnings in the coal-mining industry during 1948 for different categories of workers are shown below :—

Province	Underground: Overman and Sardar	Underground: Loader	Underground: Skilled Labour	Underground: Unskilled Labour	Surface: Skilled Labour	Surface: Unskilled Labour
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
Punjab	2 15 0	2 12 0	2 6 0	1 4 0	2 4 0	1 8 0
Baluchistan	3 0 0	1 10 0	1 8 0	1 8 0	1 8 0	1 8 0

Plantations.—Plantations are situated in East Bengal only mainly in the districts of Sylhet and Chittagong. There are two systems of payment, hazira and ticca. Each worker is allotted a certain task on the completion of which he earns his hazira. The task is generally so calculated as to take an average labourer about five hours. When a worker has completed his hazira he is free either to stop work or to continue if the garden is in a position to offer him more work. In the other system called the unit system, the labourer is not given a fixed task, but is paid according to the volume of the work measured in terms of a unit. The unit is expected to be finished in one hour and the payment made for it is about one anna. The present hazira rates are as follows :—

	Rs. a. p.
Men	0 7 0 per day
Women	0 6 0 per day
Children	0 4 0 per day

A variable dearness allowance of 9 annas a day is in force. The plantation workers are supplied rice or paddy or atta and dal, salt, mustard oil, gur, etc. at concession prices. The quantity issued and the prices charged differ from district to district.

TRADE UNIONISM

Pakistan came into existence at a time when the trade union movement had taken firm root. The registration of trade unions is governed by the Trade Unions Act, 1926. The returns relate only to those trade unions which are registered under the Act. Registration is not compulsory. Consequently, authentic figures relating to unregistered trade unions and their membership are not available. On March 31, 1950, there were 243 registered trade unions with a membership of 192,542. The majority of these are industrial unions. There is almost total absence of trade unionism amongst agricultural workers who form a big proportion of the population. However, some crude organisations of agricultural workers do exist.

Most of the unions are federated with central federations of labour. There are four such federations :—(1) East Pakistan Federation of Labour, Narayanganj, (2) Western Pakistan Federation of Labour, Karachi, (3) Pakistan Trade Union Federation, Lahore, (4) Trade Union Federation, Pakistan, Dacca, (5) Baluchistan Labour Federation, Quetta.

During March 1950 the first two organisations confederated to form the All-Pakistan Confederation of Labour which claims to be the most representative organisation in the country with a membership of 320,000.

On March 31, 1949, there were 181 registered trade unions in the country.* Out of these only 134 furnished the annual returns showing a membership of 157,246. The number and membership on March 31, 1949 of registered trade unions sending returns classified according to industries is shown in the following table :—

Industry	Number of Unions submitting returns.	Number of Members.
Railways (including workshops) and other transport (excluding tramways)	20	71,038
Tramways	1	690
Textiles	8	10,645
Printing Presses	3	603
Municipal	4	410
Seamen	2	1,155
Docks & Port Trusts	7	7,441
Engineering	10	6,457
Mines	8	2,888
Miscellaneous	71	55,919
Total	134	157,246

The income of these 134 Unions during the year April 1, 1948 to March 31, 1949 was Rs. 1,44,495 while the expenditure was Rs. 1,19,379. Thus the year closed with a balance of Rs. 83,886.

INDUSTRIAL DISPUTES

An industrial dispute means any dispute involving more than 10 workers irrespective of its duration.

The incidence of industrial disputes in 1950 considerably went down. During 1950 there were 32 industrial disputes involving 16,836 workers with a loss of 83,164 man-days. Details are given below :—

Industry	No. of Strikes	Number of workers involved	Number of working days lost
Cotton, Woollen and Silk	4	4,646	24,866
Jute Presses	6	3,195	8,910
Engineering	2	108	216
Transport—			
(i) Railways including Railway Workshops	—	—	—
(ii) Other Transport	2	1,800	9,600
Docks and Ports	—	—	—
Ordnance	—	—	—
Mines	—	—	—
Plantations (Tea)	1	316	316
Miscellaneous	17	6,771	39,256
TOTAL	32	16,836	83,164

* Details for 1950 were not available at the time of writing.

COST OF LIVING

The base for the cost of living indices for industrial workers is April 1943 to March 1949=100. The following tables give the index numbers during 1951 for each centre:—

Karachi

Groups	General	Food	Fuel and Lighting	House Rent	Clothing, Bedding & Footwear	Miscellaneous

In addition to the indices shown above, working class cost of living index numbers for Lahore, Sialkot and Multan are being published by the Punjab Government. The base is June 1943=100. Index numbers for Chittagong have also been published by the Government of East Bengal since July 1948 with January to June 1948=100 as the base. Index numbers during 1951 for the series mentioned above are given in the following table:—

—	Lahore	Sialkot	Multan	Chittagong
January ..	150	150	202	108
February ..	152	150	210	109

December ..	171	156	173	..

STANDARD OF LIVING

A family budget inquiry in Chittagong was conducted by the Government of East Bengal for the period January to June 1948. The number of budgets collected was only 82 which constituted 2·6 per cent of the total number of workers employed at that Centre. An analysis of the family budgets showed that the average family consisted of 5·72 persons out of which 1·37 were men, 1·53 women, 1·37 boys and 1·45 girls. The number of dependents in a family was found to be 4·41. Among the bread-winners there were 1·21 men, 0·06 women, 0·02 boys and 0·02 girls. In 37 cases there were only 2 cases of 3 bread-winners in a family.

The average weekly family income was found to be Rs. 24-0-5 for 1·31 bread-winners of Rs. 18-5-5 per week per bread-winner, and Rs. 79-7-6 per month per bread-winner. Of the average weekly income of Rs. 24-0-5, Rs. 13-12-7, or 57·38 per cent was contributed by the head of the family in cash, Rs. 3-5-0 or 13·80 per cent by other adult men, Re. 0-0-8 or 0·19 per cent by boys, and Re. 0-1-1 or 0·28 per cent by girls. The subsidiary income from cheap ration, free clothing and housing, etc. was Rs. 5-2-9 or 21·53 per cent and the income from services other than regular employment was Rs. 1-10-2 or 6·81 per cent of the total. Nothing was contributed by other adult women but Rs. 1-1-5 or 4·54 per cent was contributed by those adult women who were heads of families. Their incomes were therefore included in the income of the head of the family. An analysis of the income and expenditure of the families showed that while the average weekly income was Rs. 24-0-5, the average weekly expenditure excluding provident fund, interest on loans, etc. was Rs. 24-13-9, thus causing a deficit of Re. 0-13-4 per week. The following figures indicate the actual and percentage distribution of expenditure on the various groups:—

—	Weekly expenditure	
	Actual	Percentage
	Rs. a. p.	
Food	17 0 7	68·524
Fuel & Lighting ..	2 11 6	10·954
House Rent, etc.	0 15 3	3·822
Clothing & Footwear	1 9 7	6·449
Bedding & Household Requisites	0 0 7	0·148
Miscellaneous ..	2 8 3	10·103

The main item of cost in the food group is rice accounting for nearly 47 per cent of the total expenditure on food. The weekly expenditure on food per consumption unit worked out on an average to Rs. 3-11-6 on the basis of a woman equalling 0·83 man and a child 0·69 man.

LABOUR WELFARE

The following paragraphs give a brief account of the welfare work done in the country by the Government and the employers including statutory provision as well in this respect:—

The Coal Mines Labour Welfare Fund Act, 1947 came into force on June 14, 1947. It provides for the imposition of a cess on all coke and coal at a rate between four and eight annas per ton. The proceeds of the duty are credited to a fund known as the Coal Mines Labour Housing and General Welfare Fund. Out of the proceeds of the duty, the former account shall receive not less than one anna and four pies and the latter account not more than four annas and eight pies. The amount in the Welfare account of the fund is to be spent on (i) the improvement of health, sanitation and medical facilities, (ii) provision of water supplies and washing facilities, (iii) provision and improvement of educational facilities, (iv) improvement of standard of living, including nutrition, amelioration of social conditions, and the provision of recreational facilities, and (v) the provision of transport to and from work. The Act provides for the constitution of a Coal Mines Labour Housing Board which shall be a body corporate having perpetual succession and a common seal with power to acquire property.

Government have sanctioned the establishment of two welfare centres, one at Pidh (a centrally located village in the Dandot Coalfields area in the Punjab) and the other at Sor Range at a distance of 11 miles towards the north of Quetta, each in charge of a Welfare Officer and comprising (a) six schools for the education of the miners and their children, (b) a four-bedded hospital at Pidh in the Punjab, and (c) a five-bedded hospital at Sor Range (Quetta). The total cost of these activities is estimated to be Rs. 26,760 recurring and Rs. 26,350 non-recurring.

Similar welfare funds also exist in the Lyallpur cotton mills, on the railways, the Karachi Port Trust, the Khewra salt mines and a few other undertakings. The contributions to these funds by the employers are either in lump sum or are linked to the profits.

Statutory provisions for welfare also exist in the Factories Act and the Mines Act. The former Act contains provision for adequate sanitary arrangements, good ventilation and lighting, reasonable temperatures inside work rooms, sufficient water supply, protection against fire, proper fencing and special provisions for hazardous operations. Government can also secure under the law, rest rooms and canteens for workers and creches for children.

Under the Mines Act, 1923, as amended subsequently, the Central Government may make rules for requiring (a) the maintenance in mines, where women are ordinarily employed, of suitable rooms to be reserved for the use of children under the age of 6 years, (b) the maintenance at or near the pit-heads of all the mines of bathing places equipped with shower baths and of locker rooms for the use of workers.

Housing

Statutory provision for the housing of coal-miners exists in the Coal Mines Labour Welfare Fund Act to which reference has already been made. No housing scheme has, however, so far been launched under the Act. A review of the housing conditions in factories, mines, etc. is given in the following paragraphs:—

The Cement Industry has made adequate and satisfactory provision for housing its labour force. The mineral oil industry in the Punjab has a refinery at Rawalpindi and two main oilfields at Khaur and Dhullian. At the refinery, about 50 per cent of the workers are housed in one and two-room quarters. No rent is charged. In the oilfields, only skilled workers are provided with houses. The unskilled ones come from the neighbouring villages and do not generally require accommodation. Some of the houses are single-roomed, others are double-roomed. All of them have electric lights.

Most of the salt miners, and nearly 60 per cent of the total operatives including those employed in workshops live in their own houses. The miners are allowed to build houses on Government land in certain colonies. They are given building advances which bear no interest; and no rent is charged for the use of the land.

In the coal mines the workers are given a lump sum of Rs. 20 or so by the mine-owners for building a house. Land is provided free to the workers and sometimes timber and other building material as well. The houses are made of stone and mud. Water is taken from springs and open tanks.

The tea gardens invariably provide housing to all settled labour. Usually no rent is charged and at the time of repairs materials are supplied free by the management.

As regards railways the general policy of the administration is to provide houses to those who are required to live close to their place of work, such as station staff, running staff, shed staff, medical staff, etc. About 30 per cent of the workers on the N.W.R. and an equivalent percentage on the E.B.R. are housed. The standard accommodation in most cases is one room per family. The situation has, no doubt, become more acute since partition due to the influx of refugees. All the same, the intolerable and inhuman housing conditions associated with large industrial towns as reported by the Royal Commission on Labour are comparatively non-existent.

General

Some employers provide medical facilities for their own employees. Fairly adequate medical arrangements exist in the cement factories, Defence Services installations, some of the mines and oil-fields, the plantations in East Bengal and the Ports of Karachi and Chittagong. The railway administrations have elaborate schemes for medical attention, hospitalisation, maternity care, etc. Provident fund schemes are also operative in the larger factories and establishments, railways and Port Trusts. However, the number of workers who benefit by provident fund schemes form a small proportion of the total

number of workers employed in the industries. The Government have, therefore, under consideration a scheme for compulsory provision of provident funds. Again, in most of the larger factories, the Karachi Port Trust and the railway workshops, canteens are provided for workers on a non-profit basis. Some factories have also made arrangements for recreation clubs, playing grounds, cinema shows and music and other entertainment. In the Ordnance Factories broadcasting sets have been installed and recorded music is played during the midday intervals.

The railways have a number of sports and recreation clubs including libraries and reading rooms. The railways have also started co-operative and savings banks. Co-operative societies have been formed in some factories also, particularly textile factories. Rural credit societies and banks exist all over the country to supply cheap credit to small cultivators. Better living societies and consumers' stores are also becoming popular.

HEALTH AND SAFETY

The Factories Act provides that factories shall be kept clean and free from affluvia arising from any drain, privy or other nuisance and also from impurities of gas, vapour, dust, excessive humidity and overcrowding. It is also provided that a factory should have sufficient and suitable supply of drinking water, sufficient light and ventilation and adequate latrines.

The mines Act contains provisions relating to sanitation and hygiene. It has been laid down that in every mine arrangements should be made for water fit for drinking, latrines and urinals.

ACCIDENTS

Under the Factories Act, 1934 it is obligatory on the part of the manager of a factory to report all accidents which cause death or bodily injury whereby any injured person is prevented from resuming his work during the next 48 hours. Accidents are classified as "fatal", "serious" and "minor" according to the nature of the injury. An accident is said to be serious if the injury involves absence from work for 21 days or more, and 'minor' if it involves absence from work for more than 48 hours but less than 21 days. Fatal accidents are those which result in death. During 1949 there were 1,584 accidents in factories (perennial and seasonal). Out of these 22 were fatal, 504 serious and the rest 1,528 minor.

In mining a minor accident is one in which absence from work exceeds 48 hours but does not exceed 20 days while a 'serious' accident is one in which an injury has been sustained which involves permanent loss or injury to sight or hearing or the fracture of any limb or enforced absence of the injured person from work for a period exceeding 20 days. During 1948 there were 8 fatal accidents in mines. Out of 8 deaths, 2 were due to suffocation by gas, one by explosives, one due to haulage, 2 by fall of roof and 2 on surface.

Extensive statutory provisions exist for the prevention of industrial accidents. The general provisions of the Factories Act relate to fencing of machinery, precautions against fire and safety of building and machinery.

Safety provisions relating to transport workers are contained in the Railways Act, 1890 and the Dock Labourers Act, 1934.

SEAMEN

The Merchant Shipping Act, 1923, lays down in detail the system of engagement of seamen. A seaman can be recruited only by a person holding a licence under the Act, or an owner. It also contains provisions for the regulation of employment of young persons, hours of work and wages. The Directorate of Seamen's Welfare supervises, on behalf of the Government, all seamen's welfare activities and is charged with the planning and control of seamen's (all nationalities) welfare in Pakistan, and Pakistan seamen abroad on a long term basis. Seamen's Welfare officers have been appointed at several ports in Pakistan and abroad. Port Welfare Committees have also been set up on a tripartite principle and are charged with the task of co-ordinating all welfare activities for seamen at the individual ports. Port Health Committees have been established at the ports of Karachi and Chittagong, and are responsible for the health arrangements of the Merchant Navy seamen at these ports. To provide funds to the various charitable organisations engaged in welfare work among seamen and to the Port Welfare Committees, Government have started a fund known as "Merchant Seamen's Welfare Fund". Amenities provided at the Pakistan ports include hospitalisation, arrangements for the safe custody of seaman's kit during the period they are in hospital, ocean library, exchange library, transport, outdoor games for families of distressed seamen and adult education.

PAKISTAN AND THE I.L.O.

Pakistan became a member of the Organisation soon after the partition (on October 31, 1947). Full delegations were sent to the annual sessions of the International Labour Conference held at San Francisco and Geneva. Tripartite delegations were also sent to participate in the regional meetings held at New Delhi, Nuwara Eliya (Ceylon) and Bandoeng (Indonesia). In addition, representatives were sent to certain smaller meetings convened under the auspices of the I.L.O. at Istanbul, Singapore and Geneva. Government also invited the I.L.O. to hold its Asian Technical Conference on co-operation in Pakistan which was held in Karachi during December 1950-January 1951.

Practical help has come to Pakistan from the I.L.O. in the shape of visits by a number of experts. The I.L.O. has also appointed a Correspondent for Pakistan in Karachi. The Correspondent's office supplies information relating to social affairs in Pakistan to the I.L.O. and is also available for the supply of I.L.O. literature and information to the public in Pakistan.

Pakistan has ratified the following 19 Conventions:—Hours of Work (Industry) Convention No. 1 of 1919; Night Work (Women) Convention No. 4 of 1919; Night Work of Young Persons (Industry) Convention No. 5 of 1919; Right of Association (Agriculture) Convention No. 11 of 1921; Weekly Rest (Industry) Convention No. 14 of 1921; Minimum Age (Trimmers and Stokers) Convention No. 15 of 1921; Medical Examination of Young Persons (Sea) Convention No. 16 of 1921; Workmen's Compensation (Occupational Diseases) Convention No. 18 of 1925; Equality of Treatment (Accident Compensation) Convention No. 19 of 1925; Inspection of Emigrants Convention No. 21 of 1926; Seamen's Articles of Agreement Convention No. 22 of 1926; Marking of Weight (Packages Transported by Vessels) Convention No. 27 of 1929; Protection against Accidents (Dockers) (Revised) Convention No. 32 of 1932; Night Work (Women) (Revised) Convention No. 41 of 1934; Underground Work (Women) Convention No. 45 of 1935; Final Articles (Revision) Convention No. 80 of 1948; Freedom of Association and Protection of the Right to Organise Convention No. 87 of 1948; Night Work of Women employed in Industry Convention No. 89 (Revised 1948); Night Work of Young Persons employed in Industry Convention No. 90 (Revised 1948).

LABOUR POLICY

Under the existing constitution of the country both the Central and Provincial Governments are empowered to make labour laws. The enforcement of laws framed by the Provincial Government is the responsibility of the respective provinces. In the case of Central laws the enforcement is partly the responsibility of the Centre and partly that of the Provinces. The Central Government is responsible for the enforcement of such laws in Central Government undertakings. However the enforcement of Factories Act and the Workmen's Compensation Act, both of which are Central laws, is the statutory reponsibility of the provinces even in Central undertakings. The constitution also provides that the executive authority of the Centre in this matter, extends to the giving of directions to a province as to the carrying into execution of any Act of the Federal Legislature.

For tripartite collaboration government have established permanent machinery consisting of the Pakistan Tripartite Labour Conference and the Standing Labour Committee consisting of representatives of Government (both Central and Provincial) workers and employers.

Among other things, the national Tripartite Conference has adopted a 5-year programme of Labour legislation and administrative action which is being progressively implemented. The measures under examination include minimum wage fixing machinery, compulsory recognition of trade unions, revision of existing laws, regulation of labour in plantations and transport services, housing, welfare, etc.

LABOUR ADMINISTRATION

In respect of the Central Government, the subject "Labour" is the responsibility of the Ministry of Labour. (The formation of a separate Ministry of Labour took place with effect on April 1, 1951. Previous to that there was only a Labour Division of the Ministry of Law and Labour.) The Ministry consists of the main Secretariat and the following offices:—Department of Manpower and Employment; Department of Central Labour Commissioner; Directorate of Seamen's Welfare.

FOREIGN TRADE OF PAKISTAN

(July 1950—June 1951)

THE most notable feature of Pakistan's foreign trade during the last 4½ years is the rapid expansion in the value and volume of her overseas transactions. The factors that have contributed to this phenomenon are easily listed. Pakistan is chiefly an exporter of raw materials. More than 95 per cent of her export earnings are on account of raw jute, raw cotton, hides and skins, wool and tea. Her export earnings are therefore dependent upon the international price levels of these commodities.

Due to a world-wide demand for these commodites, Pakistan has been able to gather a rich harvest of foreign exchange by realizing high prices for her exports. The decision of the Pakistan Government not to devalue their Rupee in September 1949, and the out-break of the Korean War in June 1950 gave a tremendous fillip to Pakistan's exports. Prices of raw jute, cotton and wool registered more than 300 per cent rise during the second half of 1950 and continued to rise during the whole of 1951.

During the first quarter of 1952, however, prices all over the world began to slump. This recession affected Pakistan too. To avoid a crash, the Government of Pakistan announced a "Price Support Scheme" in regard to both jute and cotton in March 1952. This scheme has resulted in stabilizing the prices of Pakistan's two major export commodities. The policy of diversification of exports and imports away from India and U.K. has also been vigorously and persistently advocated in Pakistan during the last 3 years. This policy has had a remarkable success. Pakistan has entered into bilateral trade agreements with more than 14 countries for periods varying between one and two years. This has resulted in lessening Pakistan's dependence upon a few markets for the disposal of her exports. She is also receiving her import requirements at competitive prices. Similarly Pakistan's policy of placing more than 70 per cent of her imports on Open General Licence has resulted in a large inflow of all sorts of goods with the result that prices of consumer goods have gone down and there is no scarcity.

During the year under review, Pakistan succeeded in persuading the U.K. Government to agree to revise the 12-year-old Indo-U.K. Trade Agreement of 1939. A new agreement was signed in Karachi in April 1952 with a view to correcting the inequality of advantages accruing to the signatory countries. Preferences on more than 30 items were abolished, on some items preferences were retained, and on others particularly cotton textiles, the preferential rate was considerably reduced. It has been estimated that as a result of the revised schedule of preferential rates, the benefits to Great Britain on the basis of 1948-49 volume of trade will be reduced from Rs. 1.78 crores to Rs. 65 lakhs while benefits to Pakistan will increase from Rs. 32 lakhs to Rs. 35 lakhs.

BALANCE OF TRADE

The total value of Pakistan's trade during the year 1950-51 (July-June) excluding trade with India aggregated Rs. 317.88 crores, as against Rs. 173.92 crores in 1949-50 showing an increase over the preceding year by about 90 per cent. This increase was registered both in respect of exports and imports. Exports in 1950-51 more than doubled as compared to the previous year. The value of export in 1950-51 amounted to Rs. 197.21 crores or Rs. 107.90 crores above the 1949-50 figure which was Rs. 89.31 crores. Imports in 1950-51 also rose by over 60 per cent and aggregated Rs. 120.67 crores as against Rs. 84.61 crores the year before. Pakistan's overall balance of trade in 1950-51 was thus favourable to the extent of Rs. 76.54 crores as against a small surplus of Rs. 4.70 crores in the year ended 30th June, 1950.

Balance of Trade

(Rupees in Crores)

——	1949–50	1950–51
Exports	89·31	197·21
Imports	84·61	120·67
Balance (+)	4·70	76·54

As regards balance of trade respectively of East and West Pakistan the following table clearly shows that West Pakistan finances quite a considerable part of its imports from the export earnings of East Pakistan.

(Rupees in Crores)

Trade of	Exports	Imports	Balance
East Pakistan	76·52	27·81	(+)48·71
West Pakistan	120·69	92·86	(+)27·83
Total Trade ..	197·21	120·67	(+)76·54

As regards balance of trade currency-wise the following table shows the position:—

(Rupees in Crores)

——	1949–50			1950–51		
	Exports	Imports	Balance	Exports	Imports	Balance
Dollar Area	11·57	12·04	(—) 1·47	16·88	10·68	(+) 6·20
Non-Dollar Area ..	77·74	72·57	(+) 5·17	180·33	109·99	(+)80·34

PRINCIPAL EXPORTS

Pakistan's exports consist mainly of raw materials. The two most important articles of export which collectively account for 85 per cent of her export earnings are raw cotton and raw jute. Due to a short fall of about 6 million bales in the world's supply of raw cotton in 1950-51, the price of raw cotton shot up by more than 300 per cent in the Karachi market. The following table makes the position clear:

Pakistan's Principal Exports

(Rupees in Crores)

Principal Exports	1949–50	1950–51
Raw Cotton	38·83	98·71
Raw Jute	31·31	71·42
Tea	4·56	2·91
Wool	3·51	7·98
Hides	1·11	3·53
Skins	1·55	2·09

Principal Imports

The main feature of Pakistan's economy is the predominance of manufactured goods which are imported into the country. More than 80 per cent of her imports consist of manufactured articles mostly consumer goods such as cotton textiles, chemicals, hardwares, paper and pasteboard, vegetable oils, machinery, etc. More than 25 per cent of Pakistan's imports is accounted for by cotton piece-goods and yarn, 10 per cent by machinery and 8 per cent by metals and ores. By placing the import of all textile goods on O.G.L., whose landed cost is Rs. 1-8-0 or below, Pakistan has opened her market to Japan which has emerged as her chief supplier of cotton piece-goods. The following table gives the value of the principal imports into Pakistan during the years 1949 and 1950:—

Principal Imports

(Rupees in Crores)

	1949–50	1950–51
Cotton Twist & Yarn	14·41	20·24
Cotton Piece-goods ..	17·48	23·62
Machinery	7·71	10·99
Metals and Ores ..	5·08	6·72
Mineral Oils	3·53	6·26
Vehicles	5·77	6·55
Drugs & Medicines ..	2·26	2·45
Dying & Tanning Substances	1·57	2·05
Hardwares	1·15	1·44
Artificial Silk Yarn and Piece-goods ..	1·29	3·09
Vegetable Oils ..	1·40	1·52

In 1950-51, Pakistan exported 1,363,000 bales of cotton worth Rs. 98·71 crores as against 939,000 bales in 1949-50 valued at Rs. 38·83 crores. The bulk of the exports went to non-dollar areas.

Destination of Export of Cotton

(Rupees in Lakhs)

Year	Dollar Area		Non-Dollar Area	
	Quantity Bales	Value	Quantity Bales	Value
1949–50	8,000	22,54	931,000	38,60
1950–51	11,000	20,06	1,368,000	98,60

The U.S.A. imported 4,000 bales of cotton from Pakistan in 1950-51 as against 8,000 bales in 1949-50. The U.S.S.R. which purchased 106,000 bales in 1949-50, did not figure as a buyer of Pakistan cotton in 1950-51.

India which ranked as Pakistan's major buyer of raw cotton in 1948-49 (700,000 bales) was conspicuous by its absence. India's withdrawal has, however, exercised little influence on the Karachi cotton market. With the emergence of Japan, China, Hongkong, Italy, France and Germany as her principal buyers of raw cotton, Pakistan has found it easy to dispose of her raw cotton at handsome prices. Continental Europe has more than trebled its imports of Pakistan cotton. The following table gives the value and volume of cotton exports to principal buyers :—

(Rupees in Crores)

Country	1949–50		1950–51	
	Quantity Bales	Value	Quantity Bales	Value
Japan	95,000	3·95	398,000	28·29
Hongkong	228,000	9·68	183,000	12·31
China	47,000	2·02	109,000	8·28
U.K.	57,000	2·14	128,000	9·78
Italy	40,000	1·59	110,000	7·52
France	104,000	5·00	102,000	8·06

RAW JUTE EXPORTS

Next to cotton, jute is Pakistan's number two foreign exchange earner. During the year under review, Pakistan shipped 42 lakh bales of raw jute to overseas countries—the highest on record. Since India commands over 60 per cent of world's jute loomage, this quantity (42 lakh bales) represents the optimum consumption of the rest of the world. Although India has reduced her off-take of Pakistan jute by 50 per cent since 1949, when she imported 42 lakh bales as against 24 lakh bales in 1950-51, this has not affected the volume of Pakistan jute exports. This is because overseas consumption of raw jute has also steadily risen from 15 lakh bales in 1948 to 40 lakh bales in 1951.

Over one-sixth of Pakistan's raw jute found its way in 1950-51 to the dollar area countries. The principal buyer was the U.S.A. which purchased 764,000 bales as against 220,000 bales in 1949-50. The other important dollar area purchaser was Canada which took 20,000 bales as compared to 8,000 in 1949-50.

(Rupees in Crores)

—	1949–50		1950–51	
	Quantity Bales	Value	Quantity Bales	Value
Dollar Area	228,000	4·16	731,000	12·31
Non-Dollar Area	1,500,000	27·14	3,468,000	59·10
Total ..	1,728,000	31·30	4,199,000	71·41

The principal buyers of Pakistan jute among the non-dollar countries are as follows :—

(Rupees in Crores)

Country	1949–50		1950–51	
	Quantity Bales	Value	Quantity Bales	Value
U.K.	742,000	8·79	670,000	12·01
France	276,000	4·96	513,000	8·73
Germany	116,000	2·08	447,000	7·83
Belgium	82,000	1·46	440,000	7·37
Italy	136,000	2·35	417,000	6·89

RAW WOOL EXPORTS

Pakistan shipped 31·32 million lbs. of raw wool in 1950-51 as against 25·07 million lbs. in 1949-50. The share of the Dollar Area was 6·72 million lbs. while the non-dollar countries purchased 24·60 million lbs. In terms of value, raw wool exports fetched Rs. 7·98 crores in 1950-51 as compared to Rs. 3·51 crores a year earlier. This is accounted for by the fact that the international price of raw wool went up by 200 per cent in 1950-51 due to hectic buying in U.S.A. which started the stock-piling of strategic raw materials immediately after the Korean War.

Pakistan's principal raw wool buyers are U.K. and the U.S.A. Collectively these two countries account for 95 per cent of Pakistan's shipments of raw wool. Some of the other buyers in 1950-51 were Italy (592,000 lbs.), Belgium (647,000 lbs.) and Germany (312,000 lbs.). The following table shows the value and volume of Pakistan's raw wool exported to overseas countries :—

(Rupees in Lakhs)

	1949–50		1950–51	
	Quantity lbs.	Value	Quantity lbs.	Value
To all destinations	25,979,000	351	31,331,000	797
U.K.	14,054,000	182	21,849,000	569
U.S.A.	10,229,000	135	6,729,000	145

TEA EXPORTS

Tea shipments from Pakistan recorded a crease of about 8 million lbs. in 1950-51 as mpared to the previous year. Total exports tea amounted to 22,691,000 lbs. in 1950-51 luced at Rs. 2·91 crores. Exports in 1949-50 re of the order of 30,612,000 lbs. valued at . 4·56 crores. This fall in the value and volume of tea shipments is due to the high price of Pakistan tea as compared to the Indian and Ceylonese tea.

The U.K. is Pakistan's chief buyer of tea and takes nearly 95 per cent of the total shipment. In 1950-51 the U.K. purchased from Pakistan 20,583,000 lbs. of tea worth Rs. 2·60 crores. A year earlier U.K's. purchases stood at 29,547,000 lbs. valued at Rs. 4·41 crores. The dollar area countries (U.S.A. and Canada) purchased 2,108,000 lbs. of tea from Pakistan in 1950-51. Some of the other buyers of Pakistan tea in 1950-51 were Chile (801,000 lbs.), Germany (197,000 lbs.), Egypt (106,000 lbs.), Netherlands (176,000 lbs.) and Tunisia (170,000 lbs.).

EXPORTS OF RAW HIDES

(Rupees in Lakhs)

—	1949–50		1950–51	
	Quantity (000) Pieces	Value	Quantity (000) Pieces	Value
ll Destinations	1,506	111·32	2,645	353·21
S.A.	157	8·59	559	71·49
K.	226	15·74	435	49·01
rmany	220	20·69	386	43·45
aly	414	20·06	369	26·11
pan	33	21	283	52·39

During the year 1950-51, Pakistan shipped 245,000 pieces of raw skins valued at Rs. 2·09 ores as against 7,628,000 pieces in 1949-50 orth Rs. 1·55 crores.

Due to world shortage and high demand, ieces of raw skins shot up by 100 per cent in e first half of 1951, and this enabled Pakistan realize high prices for its exports. The dollar ea countries purchased 3,354,000 pieces of w skins from Pakistan valued at Rs. 94·74 khs, while shipments to non-dollar countries mounted to 4,891,000 pieces valued at . 113·90 lakhs. The largest customer of raw ins was the U.S.A. which took 3,348,000 ces worth Rs. 94·72 lakhs. Among the non-llar countries, the chief buyers were Italy 877,000 pieces), Sweden (745,000 pieces), rmany (565,000 pieces) and U.K. (383,000 ces).

IMPORTS

During the year 1950-51, Pakistan imported tton piece-goods worth Rs. 28·62 crores presenting an increase of Rs. 11·14 crores er the year 1949-50. The principal suppliers re Japan (Rs. 17·49 crores) and the U.K. s. 6·41 crores). Due to the operation of the G.L. in regard to cotton piece-goods whose nded cost is Rs. 1-8-0 or below, Japan has ade head-way in the Pakistan market. Only year earlier imports of piece-goods from Japan re valued at Rs. 8·07 crores. The share of e dollar area in the supply of piece-goods as very small (Rs. 6·70 lakhs) as against . 65·81 lakhs in 1949-50. This is because kistan has deliberately restricted imports of xtiles from the dollar area with a view to nserve its dollar earnings. Some of the other ppliers of piece-goods in 1950-51 were Italy s. 66·93 lakhs), Spain (Rs. 47·08 lakhs), ina (Rs. 58 lakhs), Hungary (Rs. 46 lakhs), land (Rs. 59 lakhs), and the U.S.S.R. (Rs. 50 khs).

Mineral Oils

Pakistan imported mineral oils worth Rs. 6·26 crores in 1950-51 as against Rs. 3·53 crores in 1949-50. The bulk of the supplies came from Iran (Rs. 4·20 crores). The other suppliers were Straits Settlements (Rs. 54·48 lakhs), Bahrein (Rs. 61·15 lakhs), U.S.A. (Rs. 58·59 lakhs).

Drugs and Medicines

Pakistan imported drugs and medicines worth Rs. 2·45 crores in the year 1950-51 as against Rs. 2·26 crores a year earlier. The bulk of the supplies (Rs. 1·97 crores) came from non-dollar sources mainly U.K. (Rs. 1·43 crores). The U.S.A. supplied drugs and medicines worth Rs. 45·18 lakhs, Switzerland (Rs. 17·20 lakhs) and Germany (Rs. 11·31 lakhs).

TRADE WITH U.K.

Although Pakistan has established commercial relations with as many as 42 countries, her major customers and suppliers are the U.K., the U.S.A., Japan, Italy, France, China, Hongkong and Germany.

The value (in crores) of Pakistan's trade with U.K. is as follows :

(Rupees in Crores)

—	1949–50	1950–51
Exports	18·04	31·94
Imports	28·55	33·40
Balance	(—)10·51	(—) 1·46

The value of the principal exports to U.K. in 1950-51 (value in brackets is for 1949-50) is shown in Rs. lakhs : Raw Cotton 979 (214), Jute 1,201 (879), Hides and Skins 64 (41), Wool 569 (182), Tea 244 (427), other articles 135 (61).

The value of the principal imports into Pakistan from U.K. in 1950-51 is shown in Rs. lakhs, (figures in brackets are for 1949-50) : Machinery 612 (431), Cotton piece-goods 641 (685), Vehicles 217 (265), Cotton Twist and Yarn 139 (241), Metals and Ores 296 (225), Instruments and Apparatus 182 (83), Drugs and Medicines 143 (118), Dyeing and Tanning substances 59 (60), Rubber manufactures 105 (77), other articles 643 (468).

The imports are as follows:—Cotton Twist and Yarn 633·87 (23·12), Cotton piece-goods 59·27 (58·59), Artificial Silk goods 7·15 (2·06), Paper and Paste board 9·10 (8·49), Instruments and Apparatus 6·61 (8·13), Hardware 3·74 (5·24), Drugs and Medicines 1·45 (Nil), and other articles 118·42 (47·97).

INDIA

Although the economies of India and Pakistan are complementary rather than competitive, political issues have exercised a considerable influence over commercial relations. With the termination of the Stand-still Agreement entered into at the time of the partition, the economic policies of the two countries began to drift apart. This policy led to conflicts in several fields. Tariff walls between the two countries were raised with the result that the free flow of goods in either direction was stopped.

In May 1948, India and Pakistan signed a bilateral trade agreement. Pakistan agreed to supply the bulk of her jute and cotton to India in exchange for cotton piece-goods, iron and steel, vegetable oils, and a host of consumer goods. The agreement was renewed in June 1949 for a further period of one year but a trade deadlock occurred immediately after the devaluation of the pound-sterling in September 1949. While India devalued her rupee by 31 per cent in terms of the U.S. Dollar, Pakistan decided to retain its parity with the Dollar (Rs. 331 = $100). The Government of India did not recognize the par value of the Pakistan Rupee which resulted in a virtual stoppage of trade between the two countries. The deadlock was partially broken in May 1950, when India and Pakistan signed a limited trade agreement without agreeing to the basic issue of the par value of Pakistan Rupee. This agreement worked out satisfactorily for over six months. With the advent of the Korean War in June 1950, the prices of Pakistan's raw materials rocketted sky-high. This sent up the exchange value of the Pakistan Rupee. The Government of India too recognized this factor and agreed to extend formal recognition to the par value of the Pakistan Rupee at the end of February 1951. Consequent upon India's recognition of the par value of the Pakistan Rupee (Rs. 100 Pakistan) = (Rs. 144 India) the two countries signed a trade agreement in Karachi on February 26, 1951 for a period of 16 months ending 30th June 1952. This agreement stipulated the exchange of Pakistan jute, hides and skins and foodgrains for India's cotton piece-goods, coal, iron and steel and a host of other consumer goods. The Indo-Pakistan trade agreement has worked to the satisfaction of both the signatory countries. It has enabled India to import raw jute and foodgrains from Pakistan while Pakistan has imported coal from India.

During the period 26th February 1951 to 31st December 1951, Pakistan exported goods worth Rs. 55·75 crores to India while imports from India amounted to Rs. 19·12 crores. This resulted in a balance of Rs. 36·63 crores in favour of Pakistan. Out of the total exports (Rs. 55·75 crores), the share of East and West Pakistan was Rs. 46·45 and Rs. 9·30 crores respectively. Imports from India during the period into East and West Pakistan stood respectively at Rs. 10·96 crores and Rs. 8·16 crores.

(Rupees in Crores)

—	By Sea	By Land	Total
Exports of Pakistan Merchandise ..	7·67	48·08	55·75
Imports of Indian Merchandise ..	6·26	12·86	19·12

The available statistics of Indo-Pakistan Trade for the year 1950-51 show that during this period, Pakistan exported to India goods worth Rs. 31·79 crores and imported goods worth Rs. 27·32 crores. Pakistan enjoyed a favourable balance to the extent of Rs. 4·47 crores in its trading with India as against a favourable balance of Rs. 33·80 crores a year earlier. Indo-Pakistan trade during the last two years has considerably shrunk due to the restrictive trade policy of the two countries. India has lost her market in Pakistan for cotton piece-goods, while Pakistan has lost her market in India for raw cotton. A statement showing the Indo-Pakistan Trade during the years 1949-50 and 1950-51 is given below:—

Trade Figures

(Rupees in Crores)

—	1949-50	1950-51
Exports from Pakistan	31·79	55·63
Imports into Pakistan from India	27·32	21·83
Balance	(+) 4·47	(+)33·80

The principal exports from Pakistan to India during the years 1949-50 and 1950-51 both by sea and land were as follows:—

(Rupees in Lakhs)

Articles	1949-50		1950-51	
	Quantity	Value	Quantity	Value
Cotton (Bales) ..	20,910	92	387	4
Jute (,,)	1,654,275	21,75	2,467,116	38,42
Hides (Pieces) ..	464,693	21	1,077,997	48
Skins (,,)	485,686	9	2,468,320	39

The value of the principal imports from India during 1950-51 (within brackets for 1949-50) is expressed in Rs. lakhs below:—Cotton Yarn and manufactures 474 (478), Jute manufactures 158 (98), Artificial Silk piece-goods 41 (55), Mineral and Vegetable oils 168 (97), Chemicals and Drugs 66 (46), Coal and Coke 26 (55), Dyes and Colour 32 (55), Leather 38 (53), Machinery 20 (39), Metals and Ores 30 (52), Tobacco 409 (528).

THE BUDGET (1952-53)

ESTIMATED Revenue Receipts for 1952-53—Rs. 174·73 crores. Estimated Expenditure for 1952-53—Rs. 166·89 crores. Estimated Surplus for 1952-53—Rs. 7·84 crores. The year 1951-52 ended with a surplus of Rs. 7 crores 66 lakhs. During 1952-53, the surplus is estimated at Rs. 7 crores 84 lakhs. Out of the current year surplus three funds have been created namely, Rs. five crores for the development of roads of national importance, Rs. one crore for the promotion of cottage industries and Rs. one crore for civil defence, leaving a net surplus of Rs. 66 lakhs during the current year.

Out of the surplus for 1952-53, Rs. 5 crores are being spent on agricultural development, Rs. 50 lakhs for closer inter-provincial contacts especially between the two wings of Pakistan and Rs. 30 lakhs for overseas scholarship schemes, leaving a surplus next year of Rs. 2 crores 4 lakhs.

The customs duty on liquors and alcoholic drinks has been increased. In case of ale, beer, porter, cider and other fermented liquors, the increase on a bottle containing less than 27 ounces but not less than 20 ounces is two annas per bottle. In case of brandy, gin and whisky the increase is from Rs. 75 per imperial gallon to Rs. 100.

Customs duty on capital goods and cement has been completely abolished. In addition duty has been abolished on the following raw materials: steel ingots, iron or steel blooms, billets and slabs, high silicon steel sheets, totanin and khari salt and firebricks. Partial reduction in duty has also been effected on iron or steel sheets and plates.

Provision has been made for relief to the common man. The rate of import and excise duty on kerosene is reduced by one anna per gallon. Chhan grass and thin bamboos have been completely exempted from duty. On radios and parts duty has been partially reduced.

On the side of export, relief has been afforded to the tea industry by reducing export duty by one anna per pound.

Rates of stamp duty applicable in Karachi have been increased to bring them to the level of provincial rates. Betting tax has been raised from 10 to 15 per cent.

Exemption limit in respect of cottage industry and small-scale industry has been raised from Rs. 25,000 and Rs. 15,000 respectively to Rs. 36,000 per annum. Locally manufactured E.P.N.S goods, metal utensils, products of iron foundries, steam and hammer works, chemical fertilizers, bricks, newsprint and drugs and medicines including unani and ayurvedic medicines have been exempted from sales tax. Sales tax on hides and skins which was leviable to export stage has been removed. Full rebate of sales tax will be allowed on such exports of locally manufactured products.

The minimum amount of taxable income has been raised from Rs. 3,000 to Rs. 3,600. The rate of income-tax on the slab from Rs. 5,000 to Rs. 10,000 will be reduced from one anna and nine pies in the rupee to one anna and six pies and on the next slab of Rs. 5,000 from three annas and six pies to three annas. Rates of super tax have remained unaltered.

Profits of industrial undertakings set up in Pakistan after 14th August 1947 have been exempted from business profits tax. This tax will, however, continue on other concerns.

Concession of exemption in respect of investment in companies formed for the purpose of engaging in industrial undertakings allowed in 1951 has been extended upto 31st March 1954. Exemption was restricted to 25 per cent of amount invested subject to maximum of one-tenth of total income. Exemption will now apply to the whole of the amount invested subject to the existing maximum of one-tenth of the total income.

Central Government's total expenditure on development and nation-building activities, under Revenue, Capital and other heads, is estimated to amount to Rs. 57 crores 67 lakhs in 1951-53 bringing such expenditure to a total of Rs. 117 crores 15 lakhs during the two years.

The net revenues of Pakistan as indicated in the Revised Estimates, 1951-52 have reached the peak figure of Rs. 146 crores and 56 lakhs as against Rs. 67 crores in 1948-49, when the first budget of Pakistan was presented. Revenues have shown a steady rise and have now increased by more than 100 per cent.

Pakistan's balance of payments position has also improved as a result of improvement in trade. Reserves of foreign exchange which stood at Rs. 98 crores on first January 1950, increased to Rs. 138 crores by March 1951 and stood at Rs. 148 crores on first March 1952. It is expected that during 1953 also the balance of payments position will be maintained on a sound basis.

An *ad hoc* provision of Rs. 5 crores has been made in the budget for 1952-53 for repayment of debt to India the first instalment of which falls due in August, 1952.

Expressing satisfaction over the position of Pakistan's blocked sterling balances which consist of a transfer of a sum of 30 million pounds to a free account as currency reserve and the release of the remaining part of blocked sterling in annual instalments of 4 million pounds over a period of six years, the Minister said that gold worth 4 million pounds had also been transferred to Pakistan and was being held in Karachi as part of the currency reserve.

Pakistan's armed forces have been re-equipped and re-organised considerably, disclosed the Finance Minister. During 1950-51 provision for the pay and allowances of Armed Forces was increased by Rs. 68 lakhs per annum, which would provide enhanced attraction to young men for a service career. Budget estimates under Defence for 1952-53 stand at Rs. 67 crores 69 lakhs under Revenue and Rs. 27 crores 31 lakhs under Capital.

The State Bank of Pakistan had continued to improve and expand its surpluses while the position of the Scheduled banks had considerably improved and 20 new offices were opened during the current year. The deposits now stood at Rs. 1,49 crores against Rs. 1,19 crores a year ago. Advances by Scheduled banks also registered an increase during the year from Rs. 80 crores during February 1951 to Rs. 87 crores in February 1952.

In order to improve credit facilities, Government had already established the National Bank of Pakistan and the Industrial Finance Corporation. Now steps were being taken to set up an Agricultural Finance Corporation, Housing Finance Corporation and Insurance Promotion Coporation. The scope of the Industrial Finance Corporation has been enlarged to enable it to advance finance to all industrial concerns whether incorporated as companies or not and a similar institution to finance agriculture is envisaged, with an authorised share capital of Rs. 5 crores of which Rs. 2 crores will be issued in the first instance, the Government subscribing 51 per cent of the issued capital. Besides the Housing Corporation with an authorised share capital of Rs. 5 crores of which 51 per cent will be subscribed by the Central Government, the Government has in hand a proposal to establish a State Assisted Insurance Corporation which will deal mainly with reinsurance work and help in the training of personnel for insurance business.

The budget surpluses of the last and the current years were being utilised to fund a sum of Rs. 18 crores for social uplift schemes of education and public health. These grants help the Provincial Governments to undertake more schemes in the educational and public health fields.

With regard to industrialisation two important decisions were taken by Government as a result of the difficulties created by the Korean War in obtaining capital goods. Firstly, it was decided to give immediate priority to industrial development plans, and secondly that Government should itself take the initiative in establishing industries, where private enterprise was lacking. In pursuance of these decisions Purchase Missions were sent abroad to place orders for capital goods required for important industries and steps were taken to expedite the establishment of the Industrial Development Corporation.

Railways

The current year's budget has made a provision of Rs. 4.23 crores for capital outlay on Railways, Rs. 2.44 crores for the Chittagong Port and Rs. 7.67 crores for renewals and replacements. The last named expenditure will be met from the Depreciation Fund. An overall provision of Rs. 16.93 crores is being made in the 1953-54 Budget.

The long-term development plans under Stage I of the construction of Chittagong Port are well under way and the construction of seven new jetties has been taken up. On the Railway side, the next budget, among other items, provides for: Conversion of the narrow gauge line from Jacobabad to Kashmir to broad gauge standard and its extension *via* Dera Ghazi Khan to link with Shershah-Kundian line; New Railway line from Tando Mohammad Khan to Moghalbin; Construction of residential accommodation for railway employees.

Posts and Telegraphs

The current year's budget included Rs. 1.12 crores as capital outlay on the works of the Posts and Telegraphs Department against which expenditure is now estimated to be Rs. 1.36 crores. The increase is for the execution of urgent new works relating to the opening of telephone exchanges, etc. Out of the gross expenditure, an amount of Rs. 12 lakhs would be met from the Renewals Reserve Fund. It has also been decided that a portion of the capital outlay on residential buildings which are largely unproductive should be met from current revenues. A transfer of Rs. 20 lakhs has accordingly been made from capital expenditure to revenue on this account in the current year and of Rs. 25 lakhs in 1953. The expenditure on account of Stores and Manufacture Suspense account during the current year would be Rs. 3 lakhs. The net capital outlay during the current year will, therefore, be Rs. 1.23 crores.

Capital outlay during 1953 would amount to Rs. 2.33 crores. After meeting Rs. 25 lakhs from the Renewals Reserve Fund and the transfer of Rs. 25 lakhs for building works to revenue, net expenditure chargeable to capital amounts to Rs. 2.08 crores. Some of the more important works undertaken during the current year are: Installation of a new Radio Telephone equipment at Dacca and Karachi; Installation of a 1,000 lines new automatic exchange at Chittagong; New telephone exchanges at Khanpur, Hafizabad, Rahimyar Khan Pakpattan, Arifwala, Burewala and Vihari.

The slight increase in the revised estimates of the current year is due to the execution of the Thal Weir Project in Baluchistan.

The budget makes a provision of Rs. 10 lakhs for the Nari Bolan Flood Control Project.

Agriculture

A provision of Rs. 102 lakhs was made in the current year's budget representing Government's share (51%) in the capital of the Agricultural Development Finance Corporation. The proposed Corporation, could not, however, be established during the current year as the relevant bill was referred by the Legislature to a Select Committee. The provision of Rs. 102 lakhs has, therefore, been repeated in the next year's budget.

Industrial Development

The current year's budget included a provision of Rs. 251 lakhs under this head. The revised estimates for the year are now placed at Rs. 643 lakhs and a provision of Rs. 10.26 crores is included in the next year's budget. The details of the estimates are as follows:—

(In lakhs of Rupees)

—	Revised Estimates 1951-52	Budget Estimates 1952-53
Government's Share Capital in the Pakistan Industrial Development Corporation	25	....
Jute Mills	3,65	2,00
Paper Mill	1,62	1,44
Card Board Mills ..	33	43
Woollen Mills	30	50
Textile Mills	23	3,40
Cement Mills	....	1,10
Other Industrial Projects (Heavy Engineering and Chemical industries) ..	5	1,13
Cold Storage Plant for the Preservation of Potato Seeds ..	....	10
Vessels and Plants for Fisheries Department	....	16
Total	6,43	10,26

Out of the above, an amount of Rs. 5.90 crores in the current year and Rs. 5 crores in the next year will be met from the Economic Development Fund and the net Capital Outlay will, therefore, be Rs. 53 lakhs in the revised and Rs. 5.26 crores in the next budget. The projects pertaining to Jute Mills, Paper Mill, Card Board Mill and Heavy Engineering and Chemical Industries will be controlled by the Pakistan Industrial Development Corporation.

Against the current year's budget estimate of Rs. 60 lakhs the revised estimates for civil aviation stand at Rs. 108 lakhs. The increase is due to larger expenditure towards the purchase of three Constellations, the total cost of which would be over Rs. 2 crores. These would provide a faster service between East and West Pakistan. The total expenditure for the next year is estimated at Rs. 1.18 crores.

The increase in the revised estimates for broadcasting is due to larger expenditure on Works and Installations. Next year's budget provides Rs. 7 lakhs for Works and Rs. 1 lakh for Installations.

The current year's budget for currency provided Rs. 31.93 crores for subscription to the International Monetary Fund out of which Rs. 31.60 crores were to be paid in the form of non-interest bearing non-negotiable demand notes. The revised estimate conforms to the original budget with an additional amount of Rs. 6 lakhs on account of Government's share in the Capital of the Security Printing Corporation.

The next year's budget on capital outlay includes Rs. 10 lakhs for the construction of the new mint and Rs. 461 lakhs for the purchase of plant and machinery.

The Karachi Press building was completed during the current year and its total cost amounted to Rs. 22.16 lakhs. Expenditure of the Dacca Press building the construction of which was started in 1950-51, would amount to Rs. 13.24 lakhs in the current year and Rs. 1.70 lakhs next year.

Capital Outlay on Defence

The details are:— (In lakhs of Rupees)

—	Estimates 1951-52	Revised Estimates 1951-52	Budget Estimates 1952-53
Works	6,10	4,79	5,55
Plants and Machinery	19,59	19,02	21,76
Pensions debitable to Capital	1,70	1,70	....
Deduct amount met from Revenue Account ..	10,00	10,00	....
Total	17,39	15,51	27,31

An *ad hoc* amount of Rs. 10 crores was transferred from the capital to the revenue account during the current year.

Capital Outlay on State Trading

The current year's budget provided for a net expenditure of Rs. 14.37 crores after making allowance for Rs. 18 crores on account of a lump provision for the purchase of essential stores. The need for stock-piling, however, turned out to be less during the year and the revised estimates now stand at a net figure of Rs. 5.32 crores. Next year's budget provides for an expenditure of Rs. 2.83 crores.

The details are:— (In lakhs of Rupees)

—	Revised Estimates 1951-52	Budget Estimates 1952-53
Net Outlay on Medical Stores	6·00	20·00
Net Outlay on the purchase of Reserve Stores	796·53	261·76
Net Outlay on the purchase of Food Stuffs	222·92	—130·26
Net Outlay on the production and supply of Coal ..	40·22	103·98
Net Outlay on the purchase of Jute and Jute Manufactures ..	—534·06	16·14
Purchase of materials for the promotion of Cottage Industries ..	·60	2·00
Total ..	532·21	282·62

The minus provisions indicate that recoveries exceeded gross expenditure during the year. Next year's provision includes an additional expenditure of Rs. 32.04 lakhs on the Briquetting Plant in Baluchistan.

A lump sum provision of Rs. 30 lakhs was made in the current year's budget for Capital outlay on the Federal capital. Next year there will be a total expenditure of Rs. 2.32 crores.

Capital expenditure incurred on the Chalna Port and the Chittagong Port is included under Capital expenditure on Railways. A provision of Rs. 32.7 lakhs is being made in the next year's budget, the details of which are:— (Rs. lakhs)

Land and Works	8·98
Purchase of Inspection Launches, Water Barges and Light Vessels ..	10·00
Purchase of other Equipment for the Port	13·47
Miscellaneous	·25
Total	32·70

Miscellaneous capital investments have been opened with effect from the current year in order to accommodate Government's investments in certain miscellaneous Corporations. The details of the amount provided are as follows:—

		(Rs. lakhs)
Investment in the Share Capital of Refugees Finance Corporation ..	50·00	40·00
Investment in the Share Capital of Insurance Promotion Corporation.	....	10·20
Investment in the Share Capital of Housing Finance Corporation ..	....	102·00
Total	50·00	152·20

A lump sum provision of Rs. 61 lakhs has been made in the next year's budget for financing building projects, the details of which are:—

	(Rs. lakhs)
Residential quarters for the staff of Central Local Officer	25
Residential accommodation in Dacca and Chittagong	25
Office accommodation in Dacca	11
Total	61

Social Uplift

A fund for schemes of social uplift was set up by the Central Government from its revenue surpluses for 1950-51 and 1951-52. The amount allocated to this Fund was Rs. 7 crores in 1950-51 and Rs. 11 crores in 1951-52 or a total of Rs. 18 crores. The fund is to be utilised primarily for schemes of education and public health. The fund has since been allocated among the various units of Pakistan. The allocations together with certain other details are as follows:—

Name of the Unit	Total Allocation	Approved Health Schemes	Approved Education Schemes	Other Approved Schemes	Balances
	Rs.	Rs.	Rs.	Rs.	Rs.
East Bengal	5,50,00,000	2,52,08,000	2,79,57,000	....	18,35,000
Punjab	5,00,00,000	2,43,00,000	2,50,00,000	....	7,00,000
Sind	2,00,00,000	1,14,95,000	83,00,000	....	2,05,000
N.-W. F. P.	1,50,00,000	72,45,036	77,54,964	....	....

Karachi	1,90,00,000	64,44,000	93,30,000	23,72,946	8,53,054
Baluchistan	80,00,000	33,51,050	39,30,000	4,95,000	2,23,950
Frontier Regions	80,00,000	31,78,619	43,87,100	....	4,34,281
Other Areas	15,00,000	6,00,000	2,72,500	....	6,27,500
Total ..	18,00,00,000	8,39,79,006	8,81,63,564	29,78,645	48,78,785

In order to assist the rehabilitation of refugees, a Supplementary Finance Act was passed in 1950 and it was provided that the proceeds of the special refugee taxes will be placed in a separate fund and allocated among the various units for expenditure on the rehabilitation of refugees. The accretions to this fund up to the end of 1952-53 are estimated at Rs. 4.65 crores. The Central Government also contributed an amount of Rs. 3 crores in 1950-51 and Rs. 2 crores in 1951-52 towards this fund. The total amount of Rs. 9.65 crores has since been allocated among various units in the following manner:—

East Bengal 125 (lakhs), Punjab 300 (lakhs), Sind 100 (lakhs), N.-W. F. P. 10 (lakhs), Baluchistan 10 (lakhs), Karachi 300 (lakhs), Bahawalpur 20 (lakhs), Kashmir Refugees 100 (lakhs), total 965 (lakhs).

In addition to this the Central Government have also sanctioned the following loans to the various Provinces for the purpose of rehabilitation of refugees: East Bengal 100 (lakhs), Punjab 150 (lakhs), Sind 50 (lakhs), total 300 (lakhs).

EAST BENGAL PROVINCE

EAST Bengal, as a Province of the Dominion of Pakistan, was constituted under the Indian Independence Act, 1947. It comprises the eastern territories of the partitioned Province of Bengal and the former Assamese district of Sylhet, with the exception of certain thanas in the Karimganj sub-division. The area of East Bengal is about 54,000 sq. miles, and the total population about 42,000,000. Out of this 29,540,000 are Muslims, 11,700,000 are Hindus and 57,600 are Christians. The density of the population is 775.

The capital of the Province is Dacca and its chief port Chittagong. A new port at Chalna, in Khulna District, is being opened. The language spoken is Bengali.

The principal crops are rice, jute, tea and tobacco. The province is rich in raw material but industries are not developed.

The districts included in the Province of East Bengal are as follows:—

(1) Dacca Division: the districts of Dacca, Mymensingh, Faridpur and Bakarganj; (2) Chittagong Division: the districts of Chittagong, Tipperah, Noakhali, Chittagong Hill Tracts and Sylhet; (3) Rajshahi Division: the districts of Rajshahi, Dinajpur, Rangpur, Bogra, Pabna, Kushtia, Jessore and Khulna.

East Bengal is deficit in rice. The normal annual production of rice (excluding seed requirements) is 6.75 million tons and consumption, at 18 oz., per diem per capita, 7.11 million tons. The Province is subject to frequent floods which damage the crops and increase the deficit. Since the establishment of Pakistan the deficit has been made good mainly by imports from Sind and the Punjab and partially by increased production. The Provincial Government have built up reserves which are adequate to meet deficiencies due to normal causes. East Bengal is also deficit in some other essential commodities, such as edible oils, coal, salt, sugar and textiles. One of the redeeming features is its 250,000 handlooms which, if properly supplied with yarn, can meet ⅔ of the cloth requirements of the Province and thus considerably reduce the overall deficit in cloth. Yarn is being imported from foreign countries for the handlooms.

The number of District Boards is 15; Local Boards, four; Union Boards, 3,520; Municipalities, 50.

FOOD

Although 80 per cent of the total area of East Bengal is under cultivation, the Province is as already mentioned a deficit area so far as food is concerned. This is due to the fact that the yield per acre is very small. As against 71 mds. per acre in Spain, 34 mds. in Egypt, 42 mds. in Japan, only 12½ mds. is the average yield per acre in East Bengal. This poor productivity has engaged the serious attention of the Government who are taking measures to effect greater yield, thus bringing about a permanent solution of the food problem of the Province. In this connection, 15 schemes involving a total expenditure of Rs. 24,20,000 are already in operation. About 218,000 acres of land have come under these schemes and an additional yield of about 2,000,000 tons of food products is expected.

Besides, 79 drainage schemes estimated to cost about Rs. one crore were taken up for execution. The total area expected to be benefited by the execution of the schemes is over 263,000 acres of land and the total anticipated increased yield per annum is about 28 lakh mds. of food crops, mainly paddy. Out of these, 28 schemes aiming at increasing food crops of 70,000 acres of land by 30,000 tons per annum have been completed during the year.

The question of reclamation of the 26 lakh acres of cultivable waste lands scattered all over the Province for the purpose of increasing its food production is receiving the serious consideration of the Government. A special Act has been enacted for the acquisition of such waste lands on reasonable compensation. Two pilot schemes for reclamation of 14,000 acres of waste lands have been approved by the Provincial Development Board. There is another long-term scheme for the reclamation of 3 lakh acres of waste lands in six years, with the assistance of the Commonwealth Governments.

LAND REFORMS

The tillers of the soil in East Pakistan constituting about 95 per cent of the total population can look forward to the amelioration of their condition as a result of the various agrarian reforms and enactments undertaken by the Provincial Government.

To regulate the rights and liabilities of the tenants of the non-agricultural lands *vis-a-vis* their landlords—an important legislative measure—the East Bengal Non-agricultural Tenancy Act, 1949, popularly known as Chandina Satya Bill was passed by the Assembly. The incidence of non-agricultural tenancies had so far been governed by the terms of contracts and the provisions of the Transfer of Property Act, 1882. But as the provisions of that Act did not provide for adequate protection to the lessees, the Chandina Act was necessary. The Chandina Act seeks to give to the non-agricultural tenants, possessing non-agricultural lands for a period of twelve years or more, permanent heritable and transferable rights in such lands. Provisions have also been made in the Act for protecting all non-agricultural tenants against illegal exactions and arbitrary eviction and enhancement of rents.

The most important piece of legislation, however, is the State Acquisition Bill, envisaging the abolition of the Zamindari system.

HEALTH

In continuation of the anti-malaria campaign launched in 1943, the authorities are now taking vigorous measures in this direction with the assistance of malarial experts of the World Health Organisation. Two Health Experts of the W.H.O. made field experiments in one of the malaria centres in the District of Mymensingh. East Bengal Government have sanctioned Rs. 78,000 in the first instance, in this connection. Arrangements are being made by the health authorities to carry on such experiments in several other selected centres simultaneously. Anti-Malarial drugs worth Rs. 1,50,000 have been distributed throughout the Province through the Rural Health Staff during the year.

At present Government has started 19 anti-malarial centres and are spending Rs. 20 lakhs in the current year.

An East Bengal Anti-Tuberculosis Association was formed with H.E. the Governor as patron and the Provincial Health Minister as President. Twelve 20-bed T.B. segregation clinics are now functioning in the districts. While the construction of a 56-bed T.B. ward in the premises of the Mitford Hospital is also under way, the question of establishing a permanent T.B. Hospital near Dacca, as a long-term measure is being seriously considered. One medical officer was sent to Copenhagen for specialised training in the treatment of T.B. Six T.B. Chest Clinics have been started in six different districts and one in Mitford Hospital, Dacca.

A society for the prevention of blindness in East Bengal has been formed recently. The Provincial Government sanctioned a capital grant of Rs. 16,000 for the purchase of an ambulance for use as an Eye Mobile Dispensary. A Blind Relief Camp in the premises of the Medical College, Dacca, is capable of affording relief to over 500 patients per month.

Government has taken up a health and social upliftment scheme which will cost Rs. 2·5 crores. The scheme is already being implemented.

EDUCATION

For overhauling the present system of education, in conformity with Islamic ideology, East Bengal Government's Education Department has set up a high power committee known as the "East Bengal Educational System—Reconstruction Committee". The Committee has been asked to go into the question of how the system of education can be reconstructed and advise the Government accordingly at an early date. While these arrangements are in progress, the usual form of teaching is continued to avoid any dislocation in the sphere of education. Separate arrangements for suitable education of the minority communities are also being made. Along with various other reports, the 'Reconstruction Committee' has been asked to suggest if any change is necessary in the present form of female education.

The task of standardising the Bengali language through which education is to be imparted in the Province has been entrusted to another high power Committee known as the "East Bengal Language Committee" which has been asked by the Government to submit its recommendations in this connection at an early date.

With a view to deciding the needs of the University, Government appointed a Committee to examine its finances and to make recommendations regarding additional grants, if necessary, to enable the University to carry on its activities without hindrance. On the recommendations of the Committee, Government sanctioned a substantial increase in the pay scales of the various categories of University teachers and staff. To enable the University to meet extra expenditure on this and other items, Government have raised the recurring grant from about Rs. 7 lakhs to Rs. 10 lakhs. Government have further agreed to give a capital grant of Rs. 4,20,000 spread over two years for the improvement of University laboratories and construction of additional buildings. To provide adequate accommodation for all University teachers, Government have a scheme for constructing decent buildings at a cost of Rs. 5,18,000. Meanwhile, flats in the Azimpura Colony were allotted to them. Sheds were constructed for the residential accommodation of 500 University students at a cost of Rs. 2,53,000.

By promulgating the East Bengal Educational Ordinance, Government have transferred the management and control of the old Scheme Madrasahs from the Dacca University to a Madrasah Examination Board formed on the lines of the Central Madrasah Education Board of undivided Bengal.

An "Institution of Fine Arts" has also been established at Dacca.

Government have assumed control over the finances of the East Bengal Secondary Education Board.

In accordance with the declared policy of the East Bengal Government effective steps are being taken for the education of the Scheduled Caste community. A special officer has been appointed and a committee has been constituted to advise Government on matters of Scheduled Caste Education.

Provision has also been made for the education of Buddhists. For the development of Sanskrit education Government have appointed a committee to make arrangements for the constitution of a Sanskrit Association of East Bengal and to conduct Sanskrit examinations. Adequate funds have been set apart for this purpose.

East Bengal is probably the most backward Province in the whole Indo-Pakistan Sub-Continent in the matter of road communications. Government have already taken up the construction of as many as 42 roads comprising a total length of nearly 2,000 miles which will cost Rs. 15 crores approximately; by next cold weather works for 1,200 miles of road will start. Some of these roads which were taken up soon after partition are now nearing completion. Besides, a comprehensive 6-year plan for the systematic development of roads has already been prepared and it is receiving the active consideration of Government. The scheme envisages the construction of about 6,700 miles of trunk, district and feeder roads by 1957 at an approximate cost of Rs. 51 crores.

JUTE

The Government of East Bengal formulated their policy about the production and export of jute in such a way as to maintain the supply of the commodity throughout the world at a price strictly competitive in relation to its substitutes and to create circumstances under which the growers can receive a fair price for their produce.

About 75 per cent of the entire world production of jute, and indeed cent per cent of the best quality of it, is grown in East Bengal. The normal annual consumption of jute overseas is about 3,000,000 (three million) pressed bales of 400 lbs. each. The output of pressed bales from East Bengal increased from 904,674 during the year 1947-48 to 1,490,986 bales in 1948-49. It increased further to 1,948,834 bales in 1949-50. With the establishment of more and more pucca presses every year it is hoped that in a year or two, the total output will come up to 2,400,000 bales if not more. Besides, jute is also exported in kutcha bales to India and to soft currency areas overseas.

With a view to acquainting growers with the art of assortment of jute into different trade grades for facilitating of export, 58 jute-grading parties and other agencies were appointed by the provincial Government under a separate Directorate in 1948-49. Their duties also include the prevention of malpractices in the internal trade, in the enforcement of the standard weight of 80 sicca tolas seer, and the eradication of the evil of admixture of water with the jute, which have all been declared offences under the East Bengal Jute Dealers' Registration Rules.

A monthly bulletin giving a summary of jute statistics comprising all possible data relating to the condition of jute markets both inside the Province and abroad, is regularly published by the Director of Jute Prices at Narayanganj, East Bengal.

In order to stimulate private enterprise and accelerate the pace of industrial development, the Government of Pakistan have established an Industrial Development Corporation under a special Act of the legislature and place adequate funds at its disposal for the development of certain specified industries of which jute is one. In anticipation of the Industrial Development Corporation's coming into existence which occurred on the 12th January, 1952, Government had entered into certain arrangements with private enterprise on 50 : 50 to establish 3,000 looms in three jute mills under one management. The first of the jute mills has already come into production having produced the first yarn and sacking on the 21st of December, 1951. Erection work of the two other jute mills is proceeding apace and it is expected that by the end of 1953 the full complement of 3,000 looms would be in production.

The Industrial Development Corporation has also agreed to help seven other parties to establish units of varying sizes the smallest unit being of 250 looms. Two of these parties will locate their mills in the Chittagong area aggregating 1,000 looms for the present and the other parties will locate their units at Khulna covering a total of 3,500 looms. It is expected that the mills at Chittagong and Khulna will be in production by the end of 1955.

The total production from 7,500 looms working one shift of 8 hours will be 120,000 tons of jute goods both hessian and sacking in the proportion of 2 : 3 on an average. These mills are expected, however, to work at least two shifts and thus double the production.

The programme as now drawn up covers only 50 per cent of the target fixed by the Government of Pakistan to be achieved by 1958. When the full programme has been put into operation there will still be adequate raw jute available to meet the demand from India and overseas. In this connection it may be of interest to note that 45 pucca baling presses with an annual capacity of 460 thousand bales are now in operation and that the number will be increased at least by a third to 60 presses—the number required to pucca bale the entire raw jute of the Province. It is the intention of the authorities to export jute in pucca bale in future.

INDUSTRIAL PLANNING

Direct assistance to industrialists is rendered by the Department in procuring Government developed land in the planned zones at Dacca and Chittagong. Loans to needy industrialists are provided for under the State Aid to Industries Act. During the year ending March 1951 Rs. two lakhs was distributed by the Board of Industries.

Considerable progress has been made in establishing the Ceramic Institute under the Directorate in the Tejgaon Industrial Area, the Workshop having been already completed. The Tanning and the Textile Institutes are soon going to be taken up in the Hazaibagh and Tejgaon areas respectively while a number of nurseries, silk reeling and printing factories is also being developed in Rajshahi Division. About 50,000 one-year old mulberry bushes have been recently distributed among interested growers in the Province. The Department is working in close collaboration with the Central Ministry of Industries for refugee artisans and craftsmen through various cottage and small-scale industries and for the economic uplift of the Scheduled Castes in the Province. A number of new industries like manufacture of Virginia tobacco, aluminium utensils, rubber shoes tanneries, cold storage, modern type foundries, process block-making plastics, etc., has also come into existence.

There are now 13 textile mills in East Bengal with 119,460 spindles and 2,676 power-looms. About 15,000 spindles and 371 looms are under erection. The annual production of yarn is 40,000,000 yards, that is 26,666 bales of 1,500 yards each. The target has been fixed at 300,000 spindles.

The total production of sugar is 100,000 maunds per annum, while the target is 140,000.

An officer has been appointed to investigate the difficulties facing the salt industry such as fuel, procurement of Khas Mahal land. Steps are being taken to open ten demonstration centres.

There are lignite deposits the possibilities of which are being explored by foreign experts.

The estimated annual yield of cowhides is 3,000,000 pieces, buffalo hides 150,000 pieces, sheepskin 150,000 pieces and of goat-skins 1,450,000 pieces. The estimated total requirements of footwear are 76 lakh pairs. Arrangements are being made to manufacture foot-wear like Army boots, shoes on a scientific basis. A scheme for the development of tanning and leather industries is also being worked out.

DEVELOPMENT OF ELECTRICITY

The rapid growth and expansion since the establishment of Pakistan of cities like Dacca and Chittagong and many other towns in the interior have increased the demand for electric power.

The Karnafuli Hydro-electric scheme will ultimately supply cheap power over the entire industrial area around Chittagong. The thermal station as planned, will be large enough to meet the whole of the demand of industry during the interim period while the Hydel Scheme is under construction.

A revised scheme for the supply of electrical energy has since been worked out for the Dacca-Narayanganj area. The scheme when executed will be able to meet the growing demand for electricity at Dacca and Narayanganj including the requirements of the three jute mills to be started near Narayanganj.

NAVIGATION

East Bengal possesses very important natural resources in her navigable channels. There are three principal waterways, *viz.*, the Ganges, the Brahmaputra and the Meghna. These main waterways are freely used by inland steam vessels which serve areas where railways cannot be economically constructed. The main markets lie on the river banks and are easily accessible from the interior through a vast ramification of channels called 'Khals'. In the eastern part of the Province which is inundated by floods it is possible during the monsoon to carry goods by water practically from every village to the nearest feeder channels and from there to one of the principal waterways for transport to several trade centres.

Excluding small 'Khals' there are 2,202 miles of navigable waterways which are navigable for the whole year; a length of 468 miles is open during monsoon only.

Several schemes have been prepared for re-excavation of certain dead and dying Khals thereby making further 100 miles of waterways navigable throughout the year. In order to provide direct and easy means of transport of heavy goods from and to the only seaport of the Province, *viz.*, Chittagong, excavation of a ship Canal 133 miles in length is under contemplation.

Preliminary work in connection with the multipurpose scheme, *viz.*, the Karnafuli Flood Control and Hydro-electric scheme not only aims at affording protection from devastating floods to a large area, but also envisages the generation of hydro-electric power.

The estimated receipts for 1952-53 budget are Rs. 28.48 crores, the expenditure Rs. 29.18 crores, and the deficit Rs. 69.54 lakhs. The Central Government has given a social uplift grant of Rs. 4.61 crores.

ADMINISTRATION

GOVERNOR

His Excellency Malik Mohammad Feroz Khan Noon.

PERSONAL STAFF

Secretary, A. O. Raziur Rahman, C.S.P.

Military Secretary, Col. M. F. Keightley.

Aides-de-Camp, Capt. Shabbir Hashan Khan; Capt. Ilam Dopt.

MINISTRY

Prime Minister-in-Charge of (1) *Prime Minister's Department, Planning Department, Prime Minister's Secretariat and Cabinet Secretariat*, (2) *Home Department excluding the Jails Branch*, (3) *Judicial and Legislative Department*, (4) *Public Relations Department and* (5) *Finance Branch of the Finance and Revenue Department*, The Hon'ble Mr. Nurul Amin.

Minister-in-Charge of Education Branch of the Department of Education and Registration, The Hon'ble Mr. Abdul Hamid.

Minister-in-Charge of Department of Communications, Buildings and Irrigation, The Hon'ble Mr. Hassan Ali.

Minister-in-Charge of the Department of Civil Supplies, The Hon'ble Mr. Syed Muhammad Afzal.

Minister-in-Charge of Department of Health and Local Self-Government, The Hon'ble Mr. Muhammad Habibullah Chowdhury.

Minister-in-Charge of Relief and Rehabilitation Branches of the Department of Agriculture, Co-operation and Relief, Registration Branch of the Department of Education and Registration and Jails Branch of the Home Department, The Hon'ble Mr. Mafizuddin Ahmed.

Minister-in-Charge of the Revenue Branch of the Finance and Revenue Department, The Hon'ble Mr. Tafazzal Ali.

Minister-in-Charge of Commerce, Labour and Industries Department, The Hon'ble Mr. Syed Abdus Salim.

Minister for Co-operation Branch of the Department of Agriculture, Co-operation and Relief, The Hon'ble Mr. Dwarka Nath Barori.

Minister-in-Charge of Agriculture Branch of the Department of Agriculture, Co-operation and Relief, The Hon'ble Mr. Hamiduddin Ahmed.

SECRETARIAT

HOME DEPARTMENT

Chief Secretary, Azlz Ahmed.

Secretary, M. Azfar.

Provincial Transport Commissioner and Joint Secretary (ex-Officio), A. A. Shah, C.S.P.

Deputy Secretaries, I. A. Khan, C.S.P.; Capt. M. A. Vazir, M.Sc.; J. S. Treanor, C.S.P.; Khan Bahadur A. Ali; W. B. Kadri, C.S.P.

Special Officer: Emdad Ali.

Assistant Secretaries, Md. Wazihur Rahman; Yakub Ali Khan; A. H. Sayedullah; A. Q. M. Mahiuddin; Sultan Ahmed; Shamsher Ali Khan; Md. Fazlul Bari.

Asstt. Provincial Transport Commissioner and Asstt. Secretary (ex-Officio), Md. Tafazzal Husain.

Registrar, Sarwaruddin Khan.

HEALTH AND LOCAL SELF-GOVERNMENT DEPARTMENT

Joint Secretary, S. Rahmatullah, C.S.P.

Deputy Secretaries, Muhammad Abdul Kasem; Serajuddoula Khan.

Asstt. Secretaries, Abdul Mahib Choudhury; Abdur Rahman Khan.

Registrar, Derajuddin Ahmed.

CIVIL SUPPLIES DEPARTMENT

Commissioner and (ex-Officio) Secretary, S. B. Hatch Barnvell, C.S.P.

Deputy Secretaries, A. Majid; S. H. Ali.

Director of Accounts, N. A. Jaffery, P.A. & A.S.

Asstt. Secretaries, Fazlur Rahman; A. H. Chaudhary.

Registrar, A. A. Khan.

JUDICIAL AND LEGISLATIVE DEPARTMENT

Secretary, Judicial and Legislative and Supdt. and Remembrancer of Legal Affairs, H. G. S. Bivar, C.S.P.

Deputy Legal Remembrancer, Vacant.

Deputy Secretary, Legislative Department, Majibar Rahman Khan.

Asstt. Secretary (Judicial), Aminul Islam.

Asstt. Secy. (Legislative), Syed Ahsan Ali.

AGRICULTURE, CO-OPERATION AND RELIEF DEPARTMENT

Joint Secretary (Agriculture & Co-operation), S. G. Kabir.

Joint Secretary (Relief), Muhammad Sadiq Khan.

Deputy Secretary, A. K. Bazlul Karim.

Asstt. Secretaries, M. Abed; A. Momen Khan; Shamsuddin Ahmed (I); Anwaruddin Ahmed.

Registrar, Maulvi Md. Wajid Ullah.

EDUCATION AND REGISTRATION DEPARTMENT

Secretary, G. A. Faruqi, C.S.P.

Jt. Secretary (Registration), Md. Sadiq Khan.

Deputy Secretary, M. Barkatullah.

Asstt. Secretary, Md. Fazlul Haque.

COMMUNICATIONS, BUILDINGS AND IRRIGATION DEPARTMENT

Secretary, S. M. Hasan, C.S.P.

Deputy Secretaries, A. W. Syeduddin Khan; Muhammad Abdul Jalil.

Asstt. Secretaries, Moyenuddin Mian; Md. Abdul Hafiz; K. A. M. Md. H. Zaman.

FINANCE DEPARTMENT

Secretary, M. H. Ali, C.S.P.

Joint Secretary, H. T. Ali, C.S.P.

Deputy Secretaries, Mahammad Nabi; Khalil Ahmed.

Addl. Dy. Secretary, Gulam Ali.

Under-Secretary, V. A. Jafery, C.S.P. *(on training in U.K.)*.

Asstt. Secretaries, A. F. M. Yusuff; Wazid Ali Sarkar; A. Hafiz; L. R. Khan.

Accounts Officer, Serajul Huq.

REVENUE DEPARTMENT

Joint Secretary, Mahbubuddin Ahmed.

Deputy Secretary, Vacant.

Special Officer, Abdur Rahim.

Asstt. Secretary, Md. Harun Mallick.

Special Officer, S. M. Patwari.

COMMERCE, LABOUR AND INDUSTRIES DEPARTMENT

Industrial Development Commissioner and ex-Officio Secretary, Abbas Khalecli, C.S.P.

Deputy Secretary, Akramuddin.

Asstt. Secretaries, Abul Khair; Abdus Sattar; Momtazuddin.

PLANNING DEPARTMENT

Deputy Secretary, J. S. Treanor, C.S.P.

Asstt. Secretary, Sultan Ahmad.

PUBLIC RELATIONS DEPARTMENT

Director of Publicity and Deputy Secretary (ex-Officio), Mahmad Hussain.

Asstt. Secretaries, Muhammad Ahmed; A. Mia.

BOARD OF REVENUE

Member, T. I. M. Nurannbi Choudhury, C.S.P.

Estate Purchase Commissioner, H. S. M. Ishaque, C.S.P.

Secretary, M. Fozlul Karim.

Special Officer and Ex-Officio Asstt. Secretary, Revenue Department, Nazir Ahmad.

PUBLIC SERVICE COMMISSION

Chairman, K. B. Md. Mahmud.

Members, A. S. Mahomood; Ahmed Ali Mirdha.

Secretary, Badiar Rahman.

MISCELLANEOUS APPOINTMENTS

Inspector-General of Police, Zakir Hussain, P.S.P.

Surgeon-General, Col. M. K. Afridi, P.M.S.

Inspector-General of Prisons, Amir Hussain Khan.

Inspector-General of Registration, Khurshid Alam Choudhury.

Director of Public Instruction, Dr. Momtazuddin Ahmed.

Director of Agriculture, Dr. S. Hedayet Ullah.

Director of Industries, M. A. Azam; M. K. Nakata *(Additional)*.

Director of Fisheries, Q. M. Rahman.

Director of Animal Husbandry, S. M. Ali.

Director of Land Records and Surveys, S. A. Majid.

Director of Procurement and Distribution, M. H. Rahman.
Additional Director of Procurement and Distribution, D. N. Haque.
Director of Movements and Storage, S. Huq.
Director of Consumer Goods and Fuels, A. F. M. Faizur Rahman.
Director of Public Health, Dr. M. Nasiruddin.
Relief and Rehabilitation Commissioner, S. F. Meerza.
Director-General of Civil Defence, Col. Nawsharam Khan.
Director-General of Ansars, A. H. M. S. Doha, P.S.P.
Director of Ansars, Captain Khurshid Ahmed.
Director of Jute Prices, R. Ahmed.
Commissioner of Excise, M. D. Ahmed.
Commissioner of Agricultural Income-Tax, Hamid Rasul.
Commissioner of Commercial Taxes, H. Rasul.
Commissioners of Divisions, Ahsan-uddin, C.S.P. (*Dacca*); N. M. Khan, C.S.P. (*Chittagong Div.*); M. Khurshid, C.S.P. (*Rajshahi Div.*).
Conservator of Forests, M. R. Ahmed.
Registrar of Co-operative Societies, A. M. Salimullah.
Controller of Vagrancy, M. Nawaz.
Labour Commissioner and Chief Inspector, Shops and Establishments, S. A. E. B. Murshedi.
Chief Engineer, Electricity, W. C. Patton.
Officer-in-Charge of Electricity Development, T. Hussain.
Registrar, Joint Stock Companies, B. Haq.
Chief Engineer, Public Health, A. Latif.
Chief Engineer (Communications and Buildings), Muhammad Solaiman.
Chief Engineer (Irrigation), M. Azim.
Administrator-General and Official Trustee, M. S. Zoha.
Deputy Director of Publicity, Anwar Hussain.
Asstt. Directors of Publicity, M. Maswood; S. A. Wafa; S. Rahman; Q. D. Muhammad.
Secretary, Minority Commission, Khundkar Ali Tail.
Provincial Superintendent of Census, H. H. Nomani.
Director of Fire Service, P. J. Holden.
Director of Commercial Intelligence and Statistics, Dr. A. Sadeque.
Superintendent, East Bengal Govt. Printing, N. H. Khundkar.

LEGISLATIVE ASSEMBLY

Speaker, The Hon'ble Mr. Abdul Karim, M.L.A.
Deputy Speaker, Md. Najmul Huq, M.L.A.
Secretary, S. A. E. Hussain, M.A., B.L. (*Advocate*).
First Assistant Secretary, M. A. Ameen, M.Sc., B.L., E.P.C.S. (*Judicial*).
Second Assistant Secretary, S. N. Azfar, B.Sc.

Members:—Abdulla, Mohammad; Acharjee, Sitangshu Kanta; Adhikary, Amulya Chandra; Afzal, The Hon'ble Syed Mahammad; Ahad, Dr. Abdul; Ahammad, Emaduddin; Ahmad, Sharfuddin; Ahmed, Abdul Khaleque; Ahmed, The Hon'ble Mr. Hamiduddin; Ahmed, The Hon'ble Mr. Mafizuddin; Ahmed, Mashiuddin; Ahmed, Mobarak Ali; Ahmed, Nasiruddin; Ahmed, Nawajesh; Ahmed, Paniruddin; Ahmed, Serajuddin; Ahmed, Shamsuddin; Akhand, Maniruddin; Ali Akbar; Ali, The Hon'ble Mr. Hasan; Ali, Maulana Ibrahim; Ali, M. Shamsuddin; Singhi, Narendra Singh; Talukdar, A. K. M. Bafatuddin; Tarkabagish, Maulana Khondka Abdur Rashid; Vikrampuri, Md. Abdul Hakim.

NORTH-WEST FRONTIER PROVINCE

THE North-West Frontier Province of Pakistan, as its name indicates, lies on the North-Western extremity of the Indo-Pakistan sub-continent between latitudes 31.5N—37°N. and longitudes 69°E—72°E. It has an area of about 39,276 sq. miles, of which nearly one-third lies in the Tribal Territory, comprising six agencies of Malakand, Khyber, Kurram, North & South Waziristan and Mahmand (newly-created agency), and one-third in the six administered districts of Hazara, Mardan, Peshawar, Kohat, Bannu and Dera Ismail Khan. On the north, it is shut off from the Pamirs by the Hindu Kush range of mountains, on the south it is bounded by Baluchistan, on the south-east by the Punjab and Kashmir, and on the north-west by Afghanistan. Pop.: about 57 lakhs.

The territory falls mainly into three geographical regions. The trans-Indus sub-Himalayan tract of Hazara, the comparatively narrow strip between the Indus and the hills constituting the settled districts, and the rugged, mountainous belt in the north-west between the districts and Afghanistan, extending from the borders of Kashmir in the north-east to Baluchistan in the south-west.

Climatically, the greater part of the N.-W.F.P. is very dry, the rainfall averaging about 15 inches a year, and is of an extreme type with very hot summers and cold winters.

The tribal territory of Pakistan is separated from Afghanistan by a line of demarcation drawn by Sir Mortimer Durand in 1892. This line, constitutes the boundary between Afghanistan and W. Pakistan.

The Province's mineral resources have not yet been fully tapped—the only mineral being the rock-salt deposits of Kohat—the biggest of its kind in the world.

It has however, appreciable water-power for the generation of electricity. It is estimated that the existing Malakand Hydel Works, with the proposed extensions by the end of this year at Dargai, and with the completion of Pakistan's biggest Hydro-electric Project at Warsak, there will be about 180,000 Kw. The maximum may even rise to 220,000 Kw.

From the economic point of view, the province is not generously gifted. Agriculture is the main occupation of the people and on it depends nearly 70 per cent of the population for its living. The cultivable area according to the 1941 census is 67 per cent of the total of which the net cultivated area is only 39.2 per cent.

Under the Government of India Act of 1935, N.-W.F.P. became a full-fledged Governor's Province; and on the division of the sub-continent into India and Pakistan the people of the Frontier Province in a referendum voted for joining the latter and so the Province became part of Pakistan.

THE PEOPLE

The numerically strongest tribes or castes in the province are Pathans, Awans, Gujars and Jats. Of these, by far the largest number are the Pathans.

The most important tribes among the Pathans in the trans-border territory are the Yusufzais of the Malakand Agency, the Mohmands, the Afridis of the Khyber Agency and of the Kohat Pass, the Orakzais, the Turis of Kurrum, the Wazirs of North and South Waziristan with their offshoots, the Mahsuds, and the Bhittani and Shiranis of the Dik border. In the settled districts, the Tusufzais of Mardan, the Khalils, Mohmands, Mohamadzai, Daudzais, Gigianis and Khattaks of Peshawar District, the Khattak and Bangash of Kohat, the Marwats, Bannuchis, and Wazirs of Bannu and the Gandapurs, Kundies and Miankhel of Dik are the most important tribes. There are other minor tribes such as the Jaduns of Hazara and Swabi, the Shinwaris and Mullagories of the Khyber and Babars, Turis and Dawars.

The strongest in number are the Yusufzais mostly found in the border states of Dir and Swat, and the adjoining district of Mardan. Next to Yusufzais the Khattaks are the largest in number. This tribe is mostly found in Peshawar and Kohat. Third strongest in number are the Marwats who are found exclusively in Bannu.

The Afridis, the Mahsuds and the Wazirs are considered to be guerilla fighters while the Yusufzais and Khattaks are noted for their fine physique and martial qualities. It is on account of the fighting qualities of these tribes that the Frontier is looked upon as the sword-arm of Pakistan.

Next to Pathans, the numerically strongest tribe are the Awans. They are an agricultural tribe like the Pathans and have many characteristics common with the latter. The Awans are scattered over the whole province.

The Jats and Baluchs of Dik and the Tanaolies and Gujars of Hazara do not figure much in the population of the province.

The population of the North-West Frontier Province, including the tribal areas, according to the 1951 census registered an increase of about 4,00,000 since 1941.

Out of this, 32,39,000 live in six settled districts, and 24,60,000 in the tribal territory. The province is noted for the great disparity between the sexes, the proportion of females to males being only 835 per thousand.

The density of population for the whole province is 226 per sq. mile and the percentage for literacy 7.8 in settled districts and 1.3 in Tribal Areas.

The population of the province excluding tribal areas is 32,39,000 and is made up as follows:—

(in thousands)

District	Total Population	Males	Females	Literates
Hazara	8,46	4,42	4,04	62
Mardan	5,98	3,14	2,84	32
Peshawar	9,01	4,87	4,14	90
(Peshawar City)	(1,14)	(63)	(51)	(22)
Kohat	3,05	1,57	1,48	30
Bannu	3,06	1,63	1,43	17
Total Settled Area	32,39	17,15	15,24	2,51
Dera Ismail Khan	2,83	1,52	1,31	20

The population of the tribal areas is 24,60,000 and is composed as follows:—

(in thousands)

District	Total Population	Males	Females	Literates
Malakand Agency	12,41	6,46	5,95	27
(Chitral State)	(1,07)	(56)	(51)	(2)
(Dir State)	(1,48)	(75)	(73)	(0)
(Swat State)	(5,69)	(3,03)	(2,66)	(15)
Khyber Agency	2,17	1,07	1,10	1
Kurram Agency	1,63	91	72	2
N. Waziristan	1,28	66	62	1
S. Waziristan	1,36	68	68	1
Tribal area adjoining Hazara	1,92	1,02	90	1
" " " Mardan	35	19	16	—
" " " Peshawar	1,39	79	60	—
" " " Kohat	1,34	75	59	—
" " " Bannu	27	15	12	—
" " " Dik	48	26	22	—
N.-W.F.P. Total Including Tribal Areas	56,99	30,09	26,90	2,84

The physiognomy of the Pathan is unmistakable. His complexion is usually fair. In individuals there is frequently a Jewish cast of countenance, with a certain look of breeding common especially among the well-to-do classes. Tall in stature, above the average for the people of Asia, they carry themselves easily, often with a certain swagger. The Yusufzais of the Malakand Agency and Mardan, the Marwats of Bannu and the Afridis of Khyber are perhaps the handsomest of the Pathan tribes.

The important sects among Muslims are Sunnis, Shias, Ahli-Hadis and Ahmadies. The vast majority of Muslims in the Province are Sunnis. The largest contribution to Shia population is made by Kohat, where large number of the Bangash tribe have returned themselves as Shias.

The population of the Kurram valley is predominantly Shia. The Shia tribes of this valley are collectively known as "Turizuna", and they are the Turis, Syeds, Bangashes, Shia Chamkanis, Beda-Khels, Jalandharis and Sargha Khel. The Syed and Orakzai Pathans of Tirah are for the most part Shias.

Language: The most important languages spoken in the province are Pashto, Lahnda, Urdu and Persian.

The educated population of the province, whether Pathan or non-Pathan can speak and write Urdu; and in the case of the highly educated, English. The Pathan's accent is characteristic and he can be easily distinguished from a non-Pathan while speaking Urdu.

Urdu being the medium of instruction at the school stage, both these languages have come to occupy an important place in the educational system of the province. These two languages are also used in the Law Courts, by the Press and even in private correspondence.

The educated Pathans are generally bilingual if not multilingual. The more highly educated people can speak besides their mother tongue, Urdu, English, Lahnda or Pashto, and in many cases, Persian without difficulty.

GOVERNMENT

The administration of the North-West Frontier Province is conducted by H. E. the Governor and Agent to the Governor-General with a Council of five ministers:—

His Excellency Khwaja Shahabuddin (Governor).
(1) Hon'ble Abdul Qayum Khan (Chief Minister).
(2) Hon'ble Mian Jaffer Shah (Education and Civil Supplies).
(3) Hon'ble Mohammad Jalaluddin Khan (Local Self-Govt. and Rehabilitation).
(4) Hon'ble Mohammad Ayub Khan (Revenue & Civil Defence).
(5) Hon'ble Malik-ur-Rahman Khan Kiani (Health, Information & Jails).

Nationalization of the key-services was completed during 1949.

The districts under the Deputy Commissioners are divided into two to three sub-collectorates in charge of tahsildars, who are invested with criminal and revenue powers, and are assisted by naib-tahsildars, who exercise similar powers. Some sub-divisions are in charge of Assistant or Extra Assistant Commissioners. The village community characteristic of some other parts of the sub-continent is not indigenous among the Pathans. Its place as a social unit is to some extent taken by the tribe, which is held together by the ties of kinship and ancestry, real or imaginary.

Modern municipal local government has been introduced into the towns. There are also district boards. The district is the unit for police, medical and educational administration and the ordinary staff includes a District Superintendent of Police, a Civil Surgeon, the Superintendent of Jail and a District Inspector of Schools. The Province forms a single educational circle and only possesses two forest divisions, that of Hazara and of Kohat. The P.W.D. of the Province carries out duties connected with both Irrigation and Buildings & Roads. It is organised in two circles (in all seven Divisions) under a Chief Engineer, P.W.D., who is also *ex-officio* Secretary to H.E. the Governor. The administration of the civil police force of the districts is vested in an Inspector-General. There is a special force of Frontier Constabulary. Of the Agencies only Kurram and Tochi Valley pay land revenue to the Government. The revenue administration of all the six administered districts is controlled by the Revenue and Development Commissioner. For the administration of civil and criminal justice there are Civil and Sessions Judges and additional District and Sessions Judges and several Magistrates and Sub-Judges. The court of the Judicial Commissioner which consists of the Judicial Commissioner and another judge is the controlling authority in the judicial branch of the administration and is also the highest criminal and civil tribunal in this Province.

EDUCATION

There is a three-year programme for the expansion of education. The Islamia College, Peshawar together with its allied institutions has been taken over by Government. The number of educational institutions directly run by the Government has risen by 168 within the last two years, from 929 in the pre-partition days to 1,097, the number of institutions for girls having gone up from 145 to 165. A degree college for girls with facilities for teaching F.Sc., Medical and non-Medical has also been established. An industrial school for women has also started functioning in Peshawar City and offers facilities for the teaching of cutting, knitting, tie-making, embroidery and Silma work.

The most important step forward in the field of education has been the Peshawar University Act which was passed by the Provincial Assembly in March, 1950 and has now been applied in its entirety within its territorial jurisdiction. The University was opened by the late Liaquat Ali Khan, then Prime Minister of Pakistan on October 30, 1950. The Law College, the Teachers' Training College and M.A. classes in English, Mathematics and Economics in arts have already been opened.

On 10th January, 1952, when the newly-elected N.-W.F.P. Legislative Assembly opened its winter session, the leader of the House and the Chief Minister, Khan Abdul Qayum Khan announced that the Govt. of N.-W.F.P. had decided to make education free upto the Middle Standard throughout the Frontier Province, with effect from the 1st of February, 1952.

also given a better total yield than the Punjab had been for several years, the latest estimate being some 733,000 bales (of 400 lbs. each) which is about 60 per cent. of the total produce in Pakistan. Surgarcane and oil seeds are other important cash crops and occupy 1¼ per cent. each of the sown area.

In spite of the great damage caused by the unprecedented floods of September 1950, the prospects of the different crops for 1952 are quite bright. Cotton was sown over a comparatively large area (167,300 acres). It was badly damaged by the floods, but is still expected to yield a total of 638,000 bales, which is not far less than the 1950 yield of 718,000 bales.

The area under wheat crop in 1951 is estimated at 7,194,600 acres which is 5·5 per cent more than the actual wheat crop area of last year. Actual figures of the total yield are not available at the time of writing but it is expected that the Province will have as large a surplus as, if not larger, than last year.

The heaviest damage was caused by the flood to the rice crop, which has, according to the latest estimates, yielded a total amount of 279,600 tons or 14·7 per cent less than last year.

Livestock is important from the agricultural as well as food and commercial points of view. The bovine population aggregates to nearly 9 million heads and sheep and goats 4 million. Large profits are derived from cattle and dairy trades. The productions of hide and skin are also important industries.

A special census taken after the partition showed that the total number of cows and bullocks in the Province has decreased since the census of 1945. The number of buffaloes, however, showed some increase over the 1945 figures. The decrease in the number of bullocks which were needed for agricultural work has been made up to a large extent through imports from Baluchistan, Sind and elsewhere.

Breeding of cattle in the Punjab is mainly the business of the private owners. Government helps by providing bulls of suitable breeds, by maintaining the sources of supply from where private individuals can buy foundation stock at reasonable prices and by holding through local bodies exhibitions of cattle of good breeds.

INDUSTRIES

The number of factories registered under the Factories Act, 1934 can be divided into two categories seasonal and perennial. Cotton ginning and pressing factories form more than 90 per cent. of the total number of seasonal factories, the remaining are engaged in rice husking, sugar and fruit canning. Among the perennial factories the most important are textile mills, foundries and engineering workshops, cement factories, flour mills, glass and rubber factories, chemicals including turpentine, matches, paints and varnishes, petroleum refineries, sports and surgical goods.

Much reconstruction work had to be done at the beginning as a number of industrial establishments were disrupted by the partition. Before the partition there were 800 registered factories in the Punjab. More than 90 per cent. of these closed down immediately after partition. The rehabilitation of these factories has been one of the main problems of the Government. By now over 700 registered factories have been restored to normal working, providing employment to about 75,000 persons including about 12,000 employees of seasonal factories.

With an abundance of fine varieties of cotton the Punjab offers good opportunities for the growth of the cotton textile industry. Two new textile mills, one at Lyallpur and the other at Multan, have come into being since partition. A third mill which specialises in the manufacture of towels was expected to start operation at Rawalpindi. The total number of new spindles and looms that have been installed in the new textile mills since partition is about 55,000. Another 80,000 spindles are expected to be installed in the near future. Three colonies of hand-loom weavers have sprung up after partition. A large number of refugee hand-loom weavers from India have been settled in these colonies. Calendering and finishing plants are also being set up for the benefit of this cottage industry. Already 12 calendering plants and 3 woollen cloth finishing plants are working in the Province. Another finishing plant for the woollen hand-loom weavers of Jhang was expected to start work any time in 1951.

The well-known cottage industries of Sialkot namely sports goods, surgical instruments and E.P.N.S. goods which were disrupted by the exodus of non-Muslims who financed it are also being revived. The pre-partition volume of production was reached during 1951. An attempt is being made to organise the workers and small producers into co-operative units. The cutlery industry of Wazirabad and Nizamabad (Gujranwala District) which came into prominence during the last war is also being reorganised.

The oil industry has a big future. The Attock Oil Company is engaged in extracting and refining mineral oils in the Rawalpindi District.

The tanning industry has also considerable scope in this province. Three new tanning factories are being set up and three more are at the stage of planning. The Provincial Government has sanctioned a scheme for establishing a tanning and leather institute in Gujranwala to produce trained personnel for this expanding industry. A big footwear factory already exists near Lahore. Sericulture is also being encouraged. The production of silk in 1950 was about 2,000 ounces and is expected to rise to 3,000 ounces in 1951. The Provincial Government is setting up a silk reeling and throwing factory to utilise this raw material. A first rate sugar factory has also been set up at Mardan, North-West Frontier Province.

A Commercial and Industrial museum at Lahore is meant to display to the general public products of cottage as well as large-scale industry in the Province.

Small-scale and cottage industries form a heterogenous group comprising industries of a most varied character and of different sizes and forms of organisation. Some cottage industries are of considerable importance such as the manufacture of iron safes at Gujranwala; veterinary and surgical instruments at Sialkot and Lahore; pottery making at Gujrat; ivory carving at Chiniot; cutlery at Nizamabad and Wazirabad and utensils at Gujranwala. There is a big factory of footwear near Lahore. The manufacture of cycle parts has been taken up at Lahore and Sialkot. The sericulture industry has to make almost a fresh start as it has only one silkworm rearing station at Murree but a large number of agriculturists in submontane tracts are taking an increasing interest in silkworm rearing and reeling operations. There is an Arts and Crafts Depot at Lahore which provides a market for artistic wares and helps to secure improvement in design and workmanship.

COMMUNICATIONS

The P.W.D. Buildings and Roads Branch looks after the communications in the Punjab.

The mileage so far metalled and maintained is as under:—

P.W.D.	..	..	2,870 miles
District Boards	..	..	330 miles

In accordance with the six-year development plan which will be completed in 1956-57 it is proposed to construct 4,040 miles of new road at a cost of Rs. 158·3 million; also 1,362 miles of existing roads are expected to be widened at an estimated expense of Rs. 40·7 million.

In addition to the above existing and proposed road mileage, the Department looks after 1,340 miles of unmetalled roads and controls through the District Boards, a mileage of 11,933 of unmetalled roads, thus bringing the total of unmetalled roads to 13,273 miles.

Capital expenditure on development schemes could only be financed with loans. In this respect the provincial Government entered into an agreement with the Central Government early in 1948 that the former would raise no loans in the open market but obtain them from the latter. These loans were to be given for schemes which the Central Government approved.

EDUCATION

Rapid strides have been made in education in the Punjab since the partition. The advance has not been confined to any one form of education but is spread over all grades and varieties. A popular adult education programme, the Iqbal Academy, the Translation Board, Overseas Training Scholarships and a programme for the physical development of the youth are some of the features newly introduced into the system. In addition to institutions maintained in all parts of the province by private enterprise, Government itself maintains 18 arts colleges (including one for residential public school and 5 for women), 11 normal schools for males, 10 training classes and combined institutions for females, 106 secondary schools for boys and girls, 33 centres for vocational training and nine agricultural centres attached to the Normal Schools.

At present the Department of Education is in the charge of the Director of Public Instruction who is also Secretary to Government in the Education Department. The percentage of literacy is about 12. To raise this percentage the Government has launched a vigorous campaign.

The budget provision for the current year is Rs. 30,965,500. During the year 1951-52 a new College for Boys was opened at Mianwali and one for Girls was started at Rawalpindi. Three Government normal schools for women teachers were opened at Pasrur, Multan and Kamalia. 600 Primary Schools were started at a cost of Rs. 1 million, while 50 Lower Middle Schools were raised to the Upper Middle standard.

The pace of educational progress will be accelerated further in 1952. It has been decided to open two new Government Colleges for girls one at Montgomery and the other at Sialkot, at a cost of nearly Rs. 50,000 each. A sum of Rs. 600,000 has been set apart to be spent on adult education. Two new High Schools will be opened, while four Middle Schools will be raised to the High School standard. A sum of Rs. 300,000 has been provided as additional recurring grant for the maintenance of local bodies Secondary Schools. The field of primary education will be further enlarged by the opening of 600 new schools at a cost of Rs. 250,000. A special Committee has been set up by the Punjab Government to make recommendations regarding the most expeditious methods of making primary education universal in the Province.

An ambitious six-year plan of educational development has been drawn up by the new Ministry. The plan envisages the opening of a large-scale residential college for post-graduate studies in sciences and separate residential college for women. The Government also propose to open 1,200 primary schools each year in the Province. The existing 400 high schools will be raised to the Intermediate status. The expenditure to implement these proposals for the current year is estimated to Rs. 35 million.

HEALTH SERVICES

The expenditure on Health Services during the current year will amount to Rs. 16,000,000 against Rs. 11,500,000 last year.

The Government are devoting special attention to the campaign against T.B., which is being intensified in all the districts. Each district will soon have a B.C.G. team of its own. New T. B. hospitals and clinics will be opened at a number of places in the various districts. The Samli R. B. Sanatorium which is the only institution of its kind in this Province, will be remodelled on modern lines. A sum of Rs. 430,000 will be spent this year on this sanatorium for improvements in the buildings and Rs. 113,750 for the purchase of modern equipment.

Other schemes for expanding the Health Services include the provision of pure drinking water for 2,000 villages an anti-malaria campaign in the water logged areas, the remodelling of existing rural and civil dispensaries and the addition of 200 to their number.

Two chemical laboratories are functioning in the Punjab:—A Headquarters Laboratory at Lahore and a Divisional Laboratory at Rawalpindi. The Headquarters Laboratory is in the charge of the Provincial Public Analyst. The Divisional Laboratory is in the charge of the Deputy Provincial Public Analyst.

Government has recently expanded maternity and child welfare work. There are now throughout the Province over 75 maternity and child welfare centres staffed by fully trained Lady Health Visitors, who supervise the training and work of indigenous *dais*.

With the amalgamation of the Medical and Public Health Departments with effect from 2nd September, 1949, the rural dispensaries of both the departments—over 200 of them are now functioning in the Punjab under the control of the Punjab Health Directorate. The idea that curative and preventive medicine should go hand in hand, has thus been given a practical shape.

In addition to the rural dispensaries mentioned above the Punjab Government have also accorded sanction to the establishment of 20 mobile dispensaries for providing relief from door to door.

THAL PROJECT

Special attention has been paid to a scheme to irrigate and colonise a wide expanse of desert, known as Thal, in the north-west of the province, which is by far the most important scheme of economic development that the province has in hand.

It is to be completed at a cost of Rs. 180 million and is the biggest so far undertaken. It covers nearly 2 million acres of arid land in the districts of Mianwali and Muzaffargarh.

The work of colonisation is entrusted to a statutory body called Thal Development Authority which was created under the Thal Development Act of 1949 on the lines of the Tennessee Valley Authority of America. The colonisation of this inhospitable desert where sand-storms sometimes undo within a few hours what man may take months to build, presents special difficulties in the beginning. Once, however, this area has been properly developed, it will not only add 15 to 18 lakhs of acres to the Punjab's good agricultural land, but also become a beehive of trade and industry. Afforestation and agriculture will, it is expected, completely change the present forbidding aspects of its climate.

The colonisation of the Thal is now proceeding at a vigorous pace, and over 200,000 acres have already been occupied by the settlers. A considerable area has been reserved for the settlement of the families of refugee soldiers in the Pakistan Army. Land has also been allotted in the Thal to displaced Christian families. The Thal Development Authority takes up land, block by block, demarcates it into chaks and breaks it with the help of tractors and other modern machines, before settlers are sent for colonisation. The Authority not only operates on Government owned land but is also competent to acquire privately owned lands in the Thal so as to plan and carry out the development of the area as a whole.

Out of the total area 1,500,000 acres will be cultivated with crops including food grains, cotton and sugarcane and the rest taken up by forest, roads, canals, village sites and market towns. Work is in progress on the construction of two new townships, Guaidabad and Johrabad. More than 30,000 refugees have so far been settled in Thal on crown lands. The Authority expects to develop 200,000 acres during 1951-52.

There is practically no black-market in the province in any of the essential commodities. About 40 lakhs of the refugee population have been settled in the rural areas and about 15 lakhs in the urban areas. It has been estimated that between 75 and 80 per cent of the refugees resettled in urban areas have been properly absorbed in the economic life of the province at a level not lower than their pre-partition position. The problem of finding full and useful employment for the rest has still to be solved. It is being studied by an Inquiry Committee and whatever interim steps are possible are being taken to solve it. For the agriculturist Muhajir population an elaborate plan of giving semi-permanent proprietary rights to those who were land-owners in their original homes is being implemented. It has meant the study and tabulation of voluminous records and claims. The work of allotment is now in full swing.

The Rasul-Hydro-Electric project, which will generate 22,000 kW. of electricity is another very large project, which is now complete. It will not only render the Province independent of the existing power supplies from Jugindernagar power station situated in India, but will also make power available for the electrification of 28 towns in the Province, and for working tube-wells in the Chaj and Rachna Doabs for the reclamation of saline lands.

The total cost of the Rasul Project, according to the revised estimates, is Rs. 85·7 million.

The construction of a large number of tube-wells under the Rasul Tube-well Scheme is also progressing satisfactorily. This project is to cost about Rs. 44 million, and aims at the sinking of 1,816 tube-wells in the Rachna and Chaj Doabs. Of these 1,327 wells have already been sunk and 92 energised. With the completion of the Rasul Project the Province can look forward to the completion of Mianwali Hydel Works which will cost Rs. 99·7 million.

Efforts are also being made to install in various towns thermal plants for immediate availability of electricity. A Thermal Station is being installed at Lyallpur which will cost Rs. 8·3 million. The sets have been secured and preliminary work is in progress.

The irrigation Project, known as Bhambanwala-Ravi-Bedian Link was expected to be ready early in 1952. This Project has cost the Provincial exchequer Rs. 60·7 million.

The estimated receipts for the 1952-53 budget are Rs. 22·62 crores, the expenditure Rs. 23·80 crores and the deficit Rs. 1·18 crores. There is a small remission in the existing taxes.

ADMINISTRATION

Governor, H. E. Ismail Ibrahim Chundrigar.

PERSONAL STAFF

Secretary, Rashid Ahmed.

Military Secretary, Major M. Mobin.

Aide-de-Camp, Captain S. Durrani.

Cabinet

Chief Minister, Hon'ble Mian Mumtaz Muhammad Khan Daultana.

Minister for Agriculture, Hon'ble Sufi Abdul Hamid Khan.

Minister for Education, Hon'ble Sardar Abdul Hamid Khan Dasti.

Minister for Revenue, Hon'ble Chaudhri Muhammad Hussain Chatha.

Minister for Public Works, Hon'ble Sardar Muhammad Khan Legharl.

Minister for Rehabilitation and Colonies, Hon'ble Sh. Fazal Elahi Piracha.

Minister for Development, Hon'ble Syed Ali Hussain Shah Gardezi.

Secretaries to Government

Chief Secretary, H. A. Majid.

Secretary, Finance Department, A. K. Malik.

Secretary, Home Department, K. B. Syed Ahmad Ali.

Secretary, Medical and Local Govt. Departments, A. D. Arshad.

Secretary, Refugee and Rehabilitation Department, S. F. Hassan, C.S.P., O.B.E.

Commissioner, Development and Secretary, Industries, Civil Supplies, and Electricity, R. D. Howe.

Secretaries, P.W.D. Irrigation, K. B. Sh. M. A. Hamid; Shaik Abdul Ghafoor; K. B. Pir Muhammad Ibrahim.

Secretary, P.W.D. Buildings and Roads Br., Khan Muhammad Azam Khan.

Secretary, Education Department, U. Karamat.

Secretary, Legislative Department, Sh. Abdul Haq.

Secretary, Prov. Rationing Authority, Raja Muhammad Afzal Khan.

Secretary, Post-War Services Reconstruction, Lt.-Col. Akram R. Faruqi.

Heads of Departments

Financial Commissioner, Revenue, Nawabzada Saidullah Khan.

Financial Commissioner, Resettlement and Colonies, Akhtar Hussain, C.S.P.

Commissioner, Excise and Taxation Department, K. S. Agha Muhammad Usaf Khan.

Inspector-General of Police, Khan Qurban Ali Khan.

Inspector-General of Prisons, Lt.-Col. B. H. Syed.

Director, Public Relations, Syed Nur Ahmad.

Provincial Transport Controller, S. Majidullah.

Director, Govt. Transport Services, H. O. Hollas.

Chief Engineer, P.W.D. (Buildings and Roads), Khan Muhammad Azam Khan.

Chief Engineers, Irrigation, K. B. Sh. M. A. Hameed; K. B. Pir Muhammad Ibrahim.

Chief Engineer, P.W.D. Northern Adm., Khan Abdul Ghafoor.

Chief Engineer, Electricity, J. H. Appleby.

Consulting Architect, Habib J. A. Somji.

Director of Industries, B. A. Qureshi, C.S.P.

Director of Food Purchase, H. G. Sadik.

Director of Agriculture, Dr. Khan Abdur Rehman.

Registrar, Co-operative Societies, K. S. Ghulam Muhammad Khan Niazi.

Chief Conservator of Forests, Mian Allah Bakhsh.

Director of Animal Husbandry, S. M. A. Shah.

Director, Health Service, Lt.-Col. S. M. K. Mullick.

Director of Public Instruction, U. Karamat.

Legal Remembrancer, Sh. Abdul Haq.

Director of Land Records, Rai Sher Muhammad Bhatti.

Commissioner, Rehabilitation, S. F. Hassan, O.B.E.

Superintendent, Government Printing Press and Controller, Prov. Stationery, Mian Ahmad Din.

Chief Officer, Civil Defence Department, S. S. Shanks.

Accountant-General, Muhammad Bashir Ahmad.

Financial Adviser and Chief Accounts Officer N.W.R., A. R. Sufi.

A. G. Military, Rawalpindi, S. A. Siddiqui.

Commissioner of Sales Tax, Income Tax, Punjab and N.W.F.P., Syed Ahmad Hasan.

The loss to Provincial Exchequer from income from tuition fees is estimated at approximately six lakhs of rupees in the year 1952-53. Considering that there is an annual increase of 10 per cent in the school population, the loss from income from fees estimated at the end of the year 1957-58 will be nearly Rs. 10 lakhs.

INDUSTRIAL DEVELOPMENT

The sugar industry has been developed to a considerable extent. The pre-partition sugar factory at Takht Bhai, which had to be closed down because of the departure of the non-Muslim staff, has been restarted, and orders for machinery have been placed to increase its capacity from 10,000 tons a year to 40,000 tons a year. Another much bigger sugar factory was built and started in December 1950 at Mardan with a crushing capacity of 3,000 tons of sugarcane a day. This sugar factory alone, by producing 50,000 tons of sugar a year will meet 1/5 of the total sugar demands of West Pakistan.

Soaking of hides has begun at a big tanning factory at Nowshera which is capable of handling 1,000 hides and skins per day and a pharmaceutical factory established at Peshawar is manufacturing tinctures, spirits, medicinal syrups, etc. Besides plans are in progress for the establishment of one woollen, one textile and a cold storage plant and several oil and flour mills.

The Frontier Govt. have prepared a 6-year Industrial Development Plan, which is being considered by the Central Govt. It is intended to set up a one-crore textile mill at Nowshera, half of expenditure on which will be met by the Central Govt. as a loan. Bannu and Nowshera will also have two woollen textile mills, each costing Rs. 50 lakhs. A Soda Caustic and Chlorine factory, costing Rs. 45 lakhs, is also being opened at Nowshera, and land has already been acquired for the purpose. Another Card Board and Paper mill, costing Rs. 45 lakhs, will be set up at Nowshera. A D.D.T. plant at a cost of Rs. 5 lakhs will be set up in the Soda Caustic factory under the auspices of World Health Organisation. Besides, a Resin and Turpentine factory will be opened at Haripur in Hazara District at a cost of Rs. 10 lakhs, which will be borne by the Provincial Govt. A Cold Storage Plant has been established in Peshawar under the private enterprise of Pakistan Refrigeration Ltd.

Efforts are also being made to utilise raw material resources of the Province, and affording employment to the maximum number of people to the fullest extent possible. Various industries based on forest products, for example, matches, ply-wood, etc. are being set up in Hazara District. Possibilities of making cement and discovering lime stone and Mica are also being explored.

The power from the existing Malakand Hydro-electric scheme has been extended to 4 out of the 6 districts of the Province and some parts of the Punjab as well. The capacity of the plant has also been increased from 9,600 kW to 19,600 kW by the installation of two new generators of 5,000 kW each, in April, 1951.

Two other schemes, one designed to produce 20,000 kW of electricity at Dargai and another 18 crore multi-purpose project at Warsak to produce as much as over one lakh kW are well under way. This power in addition to irrigating more than 65,000 acres of tribal land, will help in the development of sugar, cement, textile and other industries and the electrification of railways.

Up-to-date three-fourths of the work on Dargai Scheme has been completed at a total cost of about Rs. 70.5 lakhs. All the remaining works were expected to be completed by the end of October, 1952. The total estimated cost of the Dargai Scheme is Rs. 1.95 crores.

AGRICULTURE

The activities of the agricultural Department of the Province has taken many forms. There is the botanical activity under which a new Basmati variety of rice, much superior in quality to the local variety, has been found. There are experiments conducted to produce hybrid corn by crossing suitable combinations. Finally there is the work on inbreeding maize varieties.

In addition to carrying out survey and control of plant diseases, the Department of Agriculture also produced two very useful sugarcane varieties which are expected to increase the production of sugarcane in the Province.

Expensive Government lands in Dera Ismail Khan district which were on long leases with private individuals were resumed by the Government on the expiry of the lease periods and split into holdings of 12½ and 25 acres each. They were partly leased out and partly sold to actual tillers of the soil, both local and refugees.

In order to put an end to the traditional tenant-landlord disputes, the Provincial Government appointed a Committee to examine the question. As a result of the labours of this Committee, a Bill entitled the N.-W.F.P. Tenancy Bill proposing to extinguish occupancy tenancy completely was passed by the Provincial Assembly. The occupancy tenants paying cash rent to the landlords can now purchase the rights of proprietorship on payment of compensation —10 times the annual rent to the landlord. In this way about 1,00,000 occupancy tenants with an area of more than 1,46,000 acres are expected to become owners of their holdings.

Yet another bold measure on the part of the Government was the abolition of the medieval jagirdari system. There were 300 jagirs in the N.-W.F.P. resulting in a loss to Government of over Rs. 10,00,000 annually.

Government schemes for the development of Agriculture cover Swabi Hazara, Kohat, Nowshera, Kheshakki, Bannu and D. I. Khan, while attention is also being given to making the Paharpur Canal perennial. On all these schemes, a sum of Rs. 80 lakhs will be spent, most of which will come as a loan from the Central Govt. A Research Station has also been established at Govt. Agricultural Farm at Tarnab, which is to run under the direction of a foreign expert.

The Restitution of Mortgaged Lands Act passed in 1950 has been enforced. According to this Act, all lands mortgaged prior to January 1, 1920 will be restituted to owners without having to pay any compensation. It is estimated that an area of about 3,71,396 acres mortgaged for Rs. 1,51,07,107 would be restituted.

The Government have also inaugurated a scheme of colonisation of tribesmen specially Mahsuds on the banks of the Indus in Dera Ismail Khan District. The scheme which involves an area of nearly 10,000 acres, will in addition to improving the economic condition of the tribesmen also go a long way towards easing the food problem of the province. So far an area of 1,872 acres has been allotted for settlement and a further area of 5,000 acres is being cleared and will be distributed as soon as it is fit for cultivation.

Live stock: The Government have in their Animal Husbandry Department a very useful auxiliary to the Agriculture Department. This Department ran 7 veterinary hospitals in 1950 treating as many as 4 lakhs of animals of all description.

The Provincial laboratory produced about 3½ lakhs of doses of various kinds of vaccines, with which about two lakhs of animals were inoculated. Also the Provincial Laboratory has been converted into the Pakistan Animal Husbandry Institute.

PUBLIC HEALTH

The number of hospitals and dispensaries in 1950 was 213. The total number of doctors was as under: P.C.M.S. Class I Officers 12; W.M.S. Officers 2; Assistant Surgeons 59 (men 53, and women 6) and Assistant Medical Officers 121 (men 108, and women 13), House Surgeons 4.

The expenditure on public health has gone up from Rs. 14 lakhs in 1947 to Rs. 29 lakhs in 1951-52. Mobile dispensaries are being arranged for affording medical facilities to far-flung villages. Dadar Sanatorium has been expanded. The 80-bed T. B. Hospital at Peshawar was formally inaugurated by His Excellency Khwaja Shahabuddin, Governor of N.-W.F.P. in January last. Construction work on 20-bed hospitals at Kohat and Mardan is nearing completion.

The Provincial Govt. have drawn up a 5-year Public Health Scheme, for which the Central Govt. has agreed to give Rs. 73 lakhs, which amount is to be spent in the coming two years. An important step of the Provincial Govt. has been the taking over of the Municipal Hospitals in the province. Under the scheme, dispensaries will be opened in most of the villages. A Compounders' Training School is shortly being opened at Peshawar. B. C. G. vaccinations are also being performed extensively to combat tuberculosis in the Province, which is estimated to take a toll of 9,000 persons every year.

PUBLIC WORKS

With a view to increasing production, and thereby diminishing shortage of food several irrigation works of considerable importance, in addition to the remodelling of two important aqueducts, were undertaken during 1951 by the Public Works Department. The irrigation work includes among others, remodelling of Katha jang distributary, the Toland flood irrigation scheme and the Kri Sheikhan irrigation scheme in Kohat District, the extension of the Mama Kheljadid Canal in the Bannu district, the remodelling of the Takarwah distributary in Dera Ismail Khan district, provision of tube-well irrigation in Qasba, Bagrami, Peshawar, etc.

Seven new roads have been completed either wholly or partially, in various districts in the Province at a total cost of Rs. 13,62,803 in 1951.

The Frontier Government's policy of transport nationalisation is going apace with full vigour. Government buses are now plying between Peshawar, Abbottabad, Rawalpindi and on all other important routes. In certain parts of the province, particularly in Hazara District, many new roads and bridges have been constructed. In 1952-53 the Government has decided to construct at least 60 miles of roads costing Rs. 25 lakhs. Besides, a 10-mile road costing Rs. 6 lakhs is being constructed between Abbottabad and Sherwan.

FINANCE

In order to meet the excess in expenditure over the income of the Province a subvention of Rs. one crore per annum is given by the Government of Pakistan out of Central Revenues.

The estimated revenue for 1952-53 is Rs. 6.03 crores, the expenditure Rs. 5.7 crores and the surplus Rs. 32.32 lakhs. A sum of Rs. 2.77 crores has been provided for capital expenditure, and a sum of Rs. 1.24 crores for social uplift.

ADMINISTRATIVE PERSONNEL

H.E. The Governor and Agent to the Governor-General, Khwaja Shahabuddin.

Secretary to the Governor, Aslam Abdullah.

Judicial Commissioner, Hon'ble K. B. Mohd. Ibrahim Khan, B.A., LL.B.

Judge, Judicial Commissioner's Court, Sheikh Mohd. Shafi.

Revenue and Divisional Commissioner, Lt.-Col. Allahdad Khan.

Chief Secretary, Moizuddin Ahmad, C.S.P.

Secretary, Development Department, Ghulam Ishaq Khan.

Secretary, Food and Civil Supplies Department, Sheikh Abdul Hamid.

Home Secretary, E. J. M. Dent, C.S.P.

Finance Secretary, Sheikh Abdul Jalil Uppal.

Advocate-General and Secretary, Legislative Department, Ch. Mohammad Ali.

Secretary, Information Department, A. K. Quereshi.

Secretary, Public Works Department, Lt.-Col. J. R. Hainsworth.

Chief Engineer and Secretary, Electricity Department, C. D'Cruz.

Secretary, Excise and Taxation and Local Self-Government, Ghulam Dawood Khan.

Secretary, Refugee and Rehabilitation, Sardar Mohammad Alam Khan.

District and Session Judge, Peshawar, Haji Arbab Ahmad Ali Jan Khan.

Additional Session Judge, Peshawar, Mian Shakirullah Jan.

District and Session Judge, Hazara, Mohammed Eusuf Hayat Khan.

District and Session Judge, D. I. Khan, Khan Mohd. Daud Khan, B.A., LL.B.

Khan* 7).

THE PUNJAB PROVINCE

THE Punjab Province was formed after the partition of August 15, 1947. It comprises the whole of the Rawalpindi and Multan Divisions, the Districts of Gujranwala, Sialkot, Sheikhupura, Lahore minus half the Kasur Tehsil and the Shakargarh Tehsil of the Gurdaspur District.

The figures for area, population, etc. are as follows:—

Area: 63,134 sq. miles (60 per cent of pre-partition Punjab).
Density: 302.
Population: 18,814,000.
Males: 10,041,000.
Females: 8,773,000.

On a previous census the communal distribution was as follows:—

Muslims: 184.25 lakhs.
Christians: 4.25 lakhs.
Others: 0.01 lakh.
Villages: 19,700.

The provincial elections started on March 11, 1951 and continued till March 20. The arrest of a number of people two of whom were high military officers for alleged conspiracy to overthrow the Pakistan Government took place two days before the elections started. But this event belongs more to developments in Pakistan during the year than to the Punjab and may therefore be passed over.

The elections were based on adult suffrage the first of their kind in India or Pakistan.

The elections resulted as follows: Muslim League, 153; Jinnah Awami Muslim League, 29; Independents, 5; Minorities, 5; Azad Pakistan Party, 1; Jamaat-e-Islami, 1.

The Assembly consists of 197 seats. Three members had successfully contested two constituencies each.

Mian Mumtaz Daultana the leader of the Muslim League Party formed a Ministry that was sworn in on April 5. The leader of the Jinnah Awami Muslim League, Khan Iftikhar Hussain Khan of Mamdot is the leader of the opposition.

AGRICULTURE

Nearly 50 per cent. of the total area (20 million acres) is under arable farming, nearly 3 per cent. under forests, and 28 per cent. and 19 per cent. respectively, lying as 'culturable' and 'uncultivable' wastes. A little less than 50 per cent. of the cultivated area depends upon rain and the rest is irrigated from a network of canal system and by surface percolation wells, tube-wells, etc.

The Lower Jhelum, the Lower Chenab, the Sutlej Valley and the Haveli Canals, respectively, command 3·3, 3, 1·3 and 1·3 million acres. The Thal, when completed, will irrigate another 2 million acres. Irrigation from this project has already begun.

Wheat and rice are the chief staple crops of the Province and cover about 37 and 5 per cent. (respectively) of the total area sown. Cotton is the chief cash crop of the Province and covers 10 per cent. of the total area sown under crops Short-staple indigenous cottons are chiefly fo home use and long-staple Punjab America Cotton for export. The improved strains ar of over 1 inch staple length and spin more tha 40 highest standard warp counts. Sugarcan and oilseed are other important cash crops an occupy 1½ per cent. each of the area under a crops. Other important crops are gram an pulses 13 per cent., millets 12 per cent. and fruit and vegetables 4 per cent.; of fruits citrus is b far the most important.

The first crop of wheat sown and harveste after partition produced a normal total tonnag in spite of the chaotic conditions which were then prevalent. The second crop (harveste in April-May 1949) proved to be a record cro in the history of the Punjab. It left the Pro vince with an exportable surplus of well ove 5 lakh tons. The years 1950 and 1951 were years of bumper crop.

The Punjab's cotton temporarily received a setback after the partition. When the non standard cotton of 1947-48 reached the buyer abroad, there were some protests which gave rise to several disputes. Due to the use of a mixed variety of seed in the sowing of cotton during 1948, the Punjab had a poor cotton crop both in quantity and quality. The Govern ment, therefore, felt it necessary to enact a law prescribing the sowing of particular varieties of cotton in particular areas of the Province The result was that a cotton crop conforming to the old standard was once again sown in 1949. This crop has re-established the position of the Punjab's cotton in the foreign markets. It has

Collector of Land Customs, Central Excise and Salt, Punjab and N.W.F.P., A. G. Bunn.
General Manager, N.W.R., B. A. Khan.
P.M.G., Punjab and N.W.F.P. Circle, Muhammad Salimul Haque.

PUNJAB LEGISLATIVE ASSEMBLY*

MINISTERS

The Hon'ble Mian Mumtaz Muhammad Khan Daultana (*Multan XIII*); The Hon'ble Sufi Abdul Hamid Khan (*Sheikhupura VII, Muslim, Reserved Seat*); The Hon'ble Sardar Abdul Hamid Khan Dasti, B.A., LL.B. (*Muzaffargarh V*); The Hon'ble Chaudhri Muhammad Hussain (*Sheikhupura IV*); The Hon'ble Sardar Muhammad Khan Leghari, B.A. (*Dera Ghazi Khan II*); The Hon'ble Khan Bahadur Shaikh Fazal Elahi Piracha, M.A., LL.B. (*Shahpur III*); The Hon'ble Syed Ali Hussain Shah Gardezi, B.A. (*Multan I*).

PARLIAMENTARY SECRETARIES

Chief Parl. Secy., Chaudhuri Abdul Gani.
Parl. Secy. to the Hon. Chief Minister, Malik Qudir Bakhsh.

Sh. Muhammad Saeed, B.A. (Hons.), LL.B. (*Jhang V*); Sheikh Zafar Hussain, B.A., LL.B. (*Gujranwala, III, Muslim, Reserved Seat*); Abdul Aziz Malik, B.A., LL.B. (*Sialkot IX, Muslim, Reserved Seat*).

MEMBERS

Malik Abbas Khan (*Jhelum IV*); Mian Abdul Bari (*Lyallpur VII*); Abdul Ghani (*Sheikhupura III*); Abdul Hamid (*Lyallpur VI, Muslim, Reserved Seat*); Rana Abdul Hamid Khan (*Montgomery VIII*); Sardar Abdul Hamid, B.A. (Hons.) (*Lahore V*); Mian Abdul Haq (*Montgomery III*); Amir Abdullah Khan (*Mianwali I*); Major Amir Abdullah Khan (*Shahpur X*); Abdul Latif (*Sheikhupura V, Muslim, Reserved Seat*); Abdul Majid (*Multan VII, Muslim, Reserved Seat*); Abdul Qayyum, B.A., LL.B. (*Lyallpur I*); Chaudhri Abdul Rahim (*Sialkot X*); Khan Abdus Sattar Khan Niazi (*Mianwali II*); Alhaj Abdul Wahid Chaudhri (*Lyallpur X*); Abdul Waheed Khan (*Corporation of the City of Lahore IV, Muslim, Reserved Seat*); Captain Saiyad Abid Hussain Shah (*Jhang III*); Abu Saeed Enver (*Corporation of the City of Lahore III, Muslim*); Ahmed Ali (*Lahore IV*); Subedar Ahmad Ali (*Rawalpindi V*); Ahmed Masud Said (*Lyallpur II, Muslim, Reserved Seat*); Ahmed Saeed (*Corporation of the City of Lahore V, Muslim*); Mehr Ahmed Yar Khan (*Shahpur VIII*); Chaudhri Ali Akbar Khan, B.A., LL.B. (*Lyallpur III, Muslim, Reserved Seat*); Chaudhri Ali Sher Khan (*Sheikhupura IV, Muslim, Reserved Seat*); Altaf Hussain Qadri (*Sialkot V, Muslim, Reserved Seat*); Subedar Amir Ali Khan (*Rawalpindi VII*); Saiyad Amir Hussain Shah (*Gujrat IV*); Nawabzada, Amir Muhammad Khan (*Mianwali VI*); Mian Amir-ud-Din (*Corporation of the City of Lahore II*); Nawabzada Chaudhri Asghar Ali Khan (*Gujrat II*); Sardar Ata Muhammad Khan Khosa (*Dera Ghazi Khan III*); Chaudhri Aziz Din, B.A., LL.B. (*Lyallpur III*); Sardar Bahadur Khan Drishak (*Dera Ghazi Khan IV*); Malik Bahawal Sher (*Montgomery II*); Bashir Ahmad Khan (*Sheikhupura VI*); Chaudhri Chandu Lall (*Pakistani Christian and Anglo-Pakistani II*); Maulvi Daud Ghaznavi (*Lahore V, Muslim, Reserved Seat*); Mian Dost Muhammad Khan (*Gujranwala VIII*); Chaudhri Faiz Ahmad, B.A., LL.B. (*Shahpur IX*); Mian Faiz Ahmad (*Montgomery IX, Muslim, Reserved Seat*); Malik Faiz Hussain (*Sialkot VII*); Mian Faiz Muhammad (*Jhang I*); Captain Mian Fateh Muhammad (*Gujrat VI*); Malik Fateh Muhammad Khan (*Shahpur V*); Malik Fateh Sher (*Mianwali IV*); Chaudhri Fazal Elahi, B.A., LL.B. (*Gujrat VII*); Malik Fazal Hussain (*Gujranwala VI*); Ghulam Abbas Bokhari, Dewan Saiyad *alias* Muhammad Sultan Ahmad (*Multan V*); Ghulam Haider (*Jhang VI*); Mian Ghulam Muhammad (*Montgomery VI*); Haji Khawaja Ghulam Murtaza (*Dera Ghazi Khan VIII*); Ghulam Mustafa Shah, Khalid Gilani, Saiyad (*Rawalpindi III*); Malik Ghulam Nabi (*Corporation of the City of Lahore I, Muslim, Reserved Seat*); Ghulam Rasul (*Gujrat IX*); Ghulam Sabir Khan (*Montgomery VI, Muslim, Reserved Seat*); C. E. Gibbon (*Pakistani Christian and Anglo-Pakistani III*); Gul Muhammad *alias* Abdul Aziz (*Multan IV*); Chaudhri Gul Nawaz Khan (*Gujrat VIII*); Dr. Gulzar Begum Muhammad Ali, M.B.B.S. * As constituted after the General Election.

SIND PROVINCE

SIND (excluding Karachi and Khairpur) has an area of 47,509 sq. miles and a population of 4,619,000 according to the 1951 census. Muslims number 4,149,146 or 96 per cent of the total population. Of this the refugees total 560,891. There are 454,124 Hindus including Scheduled Castes, 1,953 Christians, 670 Buddhists and 28 Parsis. Only 11 per cent are literate. Of the Hindu population there are 134,101 Caste Hindus and 320,024 Scheduled Castes.

The language of the Province, Sindhi, though it bears many marks of Arabic and Persian influence and is written in Perso-Arabic script, is nearer the original Sanskrit than any other Indian language in the Indo-Pakistan Subcontinent. The Hindus in the pre-Partition days enjoyed a virtual monopoly of the trade of the province. Also as against 263 Hindu literate males per 1,000 only 44 Muslims per 1,000 were literate; 51 per 1,000 literate Hindu females compared with 5 literate Muslim females.

On March 31, 1952 there were 3,742 educational institutions of all kinds in Sind out of which 227 were for girls. There were 14 colleges in the province. There were 106 secondary schools for boys with 14,672 students on the rolls, and eight for girls with 1,053 students. There were 3,613 primary schools for boys and girls with 177,992 students on the rolls. It is noteworthy that the Sind of 1952 excludes Karachi.

LLOYD BARRAGE

The cultivable area of the province is mostly commanded by the Sukkur Barrage and Sind canals, which, with other canals and the Indus river itself, supply water to 7,500,000 acres. The Barrage works have cost nearly 24 crores of rupees.

The Barrage owes its existence largely to the zeal of Lord Lloyd, an ex-Governor of Bombay, whose name it bears. Started in July 1923, it was completed in January 1932. It was the completion of the dream of many an engineer and an almost incredible boon to the cultivator, who formerly carried on his agricultural operations in a haphazard manner, being unable to depend on the proverbial vagaries of the Indus. What it means to the Sindhi, the Sindhi alone knows, for the Barrage has converted a waterless desert into a smiling garden flowing with milk and honey.

The Lloyd barrage is a huge water regulator consisting of 66 spans, each sixty feet wide, the openings being regulated by steel gates, each weighing fifty tons. The Barrage is about a mile long, about five times the length of London Bridge. Thousands of miles of new channels were excavated varying in width from 346 feet in the case of main canals to only two or three feet in the case of water courses. The total length of Government channels which were excavated was over 6,000 miles, and that of water courses over 30,000 miles. The total length is thus some 36,000 miles.

The function of the Barrage is to head up the river at Sukkur and from that to distribute it all the year round according to the requirements of cultivators. The distribution is made through seven great canals, regulated through regulators on both banks of the river—four on the left bank, three on the right. Those on the left bank are Rohri, the Eastern Nara, the Khairpur Feeder East and the Khairpur Feeder West. Those on the right bank are the North Western Canal, the Rice Canal and the Dadu Canal.

The total number of openings in all the canal Head Regulators is 55, each being of 25 feet span and each opening being equipped with three electrically operated gates. The total discharge of water into all the canals is approximately 46,617 cusecs or 285,100 gallons per second. The total length of all irrigation channels including old and new water courses is 54,300 miles. To accomplish this staggering feat, excavation of earthwork to the extent of 7,500,000,000 cubic feet was involved, as much as would fill a drain 14 feet wide and four feet deep, dug round the equator.

The Barrage has made it possible to bring under the plough about 6 million acres of land against 3·5 million acres in the pre-Barrage period. The ultimate area under main crops is estimated to be approximately as follows:

Wheat 2,440,000 acres; cotton 850,000 acres; rice 625,000 acres; *jawari, bajri*, 635,000 acres; and oilseeds 410,000 acres.

This denoted in produce would mean the following approximate quantities:

Wheat 1,133,000 tons; cotton 549,000 bales; rice 447,000 tons; *jawari, bajri*, 271,000 tons; and oilseeds 117,000 tons.

The area irrigated in Sind by the Barrage canals and other capital work during 1943-44 was 6·21 million acres.

Area under cotton has increased from 253,232 acres in pre-partition period to 811,910 acres in 1950-51. The area under wheat increased from 480,000 acres in pre-barrage period to 1,264,673 acres in 1950-51. The area under rice in 1950-51 was 1,376,449 acres.

The Sind Government have already started building another barrage across the Indus river in Lower Sind which will be known as the Lower Sind Barrage or the Kotri Barrage involving a total cost of 24 crores. The project consists of a barrage to be constructed above Kotri, a quarter mile below the Jamshoro regulator of the Fuleli Canal, a feeder on the right bank of the Indus. The total discharge of all canals taking off from above the Kotri barrage will be 45,775 million cusecs. The irrigable area to be served by this scheme will be about 2,792,000 acres of which 17 lakh acres will be entirely virgin land. The present out-turn of the crop in this zone is 1,70,000 tons expected to increase to 7,50,000 tons, the crop being mainly rice. The barrage is expected to be completed by the middle of 1953.

Subject.	Total capital expenditure as provided in the 6 year Development plan.	Expenditure during the Financial Year, 1951-52 as per 8-monthly Revised Estimates.	Provision made in the Budget for year 1952-53.

Health	318 „	14 lakhs	37 „
Resettlement of Refugees	250 „	..	67 „
Miscellaneous and Reserve	695 „	112 lakhs	137 „
Total ..	5,000 „	555 „	1,129 „

FINANCES

Sind's Budget Estimates for the financial year 1952-53 place revenue receipts at 9,31,87 thousands and expenditure chargeable to revenues at 9,16,42 thousands, thereby indicating a revenue surplus of 15,45 thousands. This is the first surplus Budget that the province has had since the birth of Pakistan.

The revenues of the province are expected to benefit to the extent of 61 lakhs on account of the implementation of the Raisman Award. No new taxation has been levied during the next financial year.

The Budget for the 1952-53 financial year is essentially a Development Budget. The underlying idea is the implementation of the Provincial Six-Year Development Plan, which has been drawn up within the framework of the Colombo Plan. The Sind Plan envisages capital expenditure of 50 crores over the six-year period, beginning with the 1st July 1951.

The details of the provision made in the Sind Development Plan in respect of various items, the expenditure incurred during the current financial year on the implementation of the plan and the provision made in the next year's Budget for the purpose are indicated below:—

Education.—Sind University Scheme for setting up a Teaching University and a University Town at Hyderabad involving a capital cost of 1·25 crores has been approved in principle by Government. The Budget provides for a 20 lakhs non-recurring grant to the University for implementation of this Scheme during the next financial year.

A Girls' College will be set up at Hyderabad at a capital cost of 8 lakhs. The construction of the building will start during the next financial year. A Hostel for College students will also be constructed at Hyderabad.

In the field of Secondary Education, for the first time two High Schools will be given a technical bias at the cost of 4·4 lakhs.

Compulsory Primary Education will be extended to three more Talukas in the province. The total number of Talukas in the compulsory area will rise to 33 out of the total of 58 Talukas in the province.

Medical and Public Health.—A new Medical College was started at Hyderabad in an existing building, which was suitably altered for the purpose. The work on the new building for the Medical College, which is estimated to cost 50 lakhs, will start during the next financial year.

The construction of well equipped Hospitals at Jacobabad, Sukkur and Larkana has already started during the current financial year. The construction of an Eye Hospital and a T. B. Sanatorium will also start shortly.

Civil Works.—To improve the efficiency of Public Works Department, a Scheme was drawn up some time ago for mechanising the earth works of Public Works Department. The Mechanisation Scheme is likely to result in considerable saving in works expenditure of this Government.

A record provision of 1,82 lakhs has been made for construction of roads in the province. Of this amount, 1,20 lakhs will be spent on the Arterial Highway running from Karachi to Reti. Half of the cost of construction of this Highway will be met from the Fund recently created by the Central Government for the purpose of financing construction of important roads.

Power.—Work will start during the next financial year on a Thermal Power Generating Station to be set up at Hyderabad. The station will generate about 12,000 kW. and is estimated to cost 1,53 lakhs. Government attach considerable importance to the establishment of this Power House, as it would give a fillip to industry.

It is proposed to set up a Hydro-Electric Station in conjunction with the Lower Sind Barrage system. The total cost of the Project has been estimated at 1,75 lakhs. The work will start early next year and a provision of 50 lakhs has been made in respect of this Project in the Budget.

Industry.—It is the intention of this Government to afford all possible facilities for development of industry. It has been decided to advance a loan to the Sind Industrial Trading Estates for setting up an Industrial Estate at Hyderabad. The total cost has been estimated at 30 lakhs. The Blue Prints of the Hyderabad Estate have been prepared and the work will commence shortly. The Estate will provide the industry with developed land and water. Power will also be available in adequate quantities on completion of Thermal and Hydel Stations, which are to be established at Hyderabad.

A Government Textile Mill with 50,000 spindles and a Cement Factory with an output of about 1·5 lakh tons per annum will be set up at Hyderabad. Each Factory is estimated to cost 1·5 crores.

A total provision of 7·32 lakhs has been made in the Revenue Section of the Budget for development of the Cottage Industries in the province. Two Cottage Industries Institutes will be set up one at Sukkur and the other at Hyderabad where training will be given in cottage industries, such as wool spinning, newar and tape making, bone button making and toy making. Attempt will also be made to introduce modern treadle looms among weavers in the province. A beginning will be made with the setting up of a small porcelain factory at Hala.

Agriculture and Livestock.—The Scheme for mechanisation of Agriculture, which has already been started, will progress further during the next financial year. Under this Scheme tractors will be made available to Sind agriculturists on hire. An expenditure of 10 lakhs will be incurred on this Scheme during the next financial year. Side by side, a Scheme for training of tractor drivers will be implemented. The extension staff of the Agriculture Department for plant protection will also be reorganised on a sound basis.

Four Travelling Dispensaries-cum-Laboratories will be set up for investigation and treatment of diseases of cattle.

Resettlement of Refugees.—The Work on satellite towns at Hyderabad, Mirpurkhas and Nawabshah will start during the next financial year. The establishment of these satellite towns will relieve congestion and housing shortage that is being felt in these areas.

Civil Defence.—A provision of 28·53 lakhs has been made for Civil Defence. Rifle Clubs will be established at a number of places in the province. Home Guards Organisation will also be set up for aiding the Police in times of emergency. Provision has been made for purchase of up-to-date fire fighting equipment, which will be supplied to the more important Municipalities in the province.

AGRICULTURAL DEVELOPMENT

The future of Sind depends on agriculture, which is the chief industry of Pakistan. The area actually sown in this Province is more than 6,108,000 acres and the area under current fallows is over 5,006,000 acres. The canals issuing from the Sukkur Barrage together with their distributaries and water courses measure nearly 36,000 miles in length—all from a river passing through 300 miles of the territory.

The lower Sind Barrage, work on which has already started is going to bring another 2½ million acres of land under flow irrigation and will greatly add to the prosperity of Sind.

The Province grows almost all kinds of agricultural crops—Rice, Wheat, Barley, Jowar, Bajri, Maize, Gram, Pulses and Cotton. Sugarcane and tobacco are also grown.

In each Taluka Farm there are demonstrative plots and the Department gives out thousands of maunds of wheat, paddy and gram seed to the registered growers. Every year the total quantity of cotton seed given to growers is about 50,000 maunds. Their "putties" are ginned in the presence of Department officers so that there is no mixing. A scheme has been evolved by Government to take 7,000 acres of land in the cotton belt and then sub-lease it to a recognised Co-operative Society, for reproducing nucleus cotton seed, which would come in all to about 30,000 maunds. Along with this Co-operative Training Society, a Co-operative Ginning and Pressing Factory will also be established, and only 50 per cent of its shares will be held by the Government. This will push up development work in cotton—the certification and sealing of 2 lakh maunds of cotton will further ensure purity and germination of the cotton seed. An Act aiming at the zoning of cotton may also be introduced.

LIVESTOCK

The following is the animal population of Sind :—

Buffaloes	.. ..	701,618	2,660,952
Cattle	.. ..	1,959,334	
Sheep	.. ..	638,040	
Goats	.. ..	1,414,285	
Horses	.. ..	105,784	
Poultry	.. ..	803,438	
Camels	.. ..	105,475	
Donkeys	.. ..	125,740	

Cattle breeding is receiving due attention. The demand for the Red Sindhi Breed, which ranks among the finest in the world, has increased so much after Partition that the Government instituted a special census of this breed to find what number can be exported to other parts of the world. The Government has handed over its Willingdon Cattle Breeding Farm to the Central Government and is opening similar Farms at Mirpurkhas and Hyderabad, instead. Research on Bhagnari breed and Tharl breed is being carried on at Dokri and Sukrand respectively. The Government also maintains 200 stud bulls and there is a proposal for the castration of scrub bulls.

Sind's poultry is undeveloped. But a scheme has now been prepared to control poultry diseases and establish a first class poultry multiplication Centre which should produce 30,000 chicks annually and train Hari's sons in poultry, at the rate of 48 a year.

Sind has 40 Veterinary Hospitals, of which 13 are under the control of the Government and the rest under the dual control of the Government and the District Local Boards.

FORESTS

The total area of the Forests of Sind is about 727,000 acres. Of this, the Interior Forests occupy 269,500 acres and the Riverain Forests, 457,500 acres. No change occurs in the former, but area under the latter varies from year to year due to erosion and accretion activities of the river. Irrigation also varies from year to year according to the size of floods. The Inland Forests receive irrigation through sluices provided in the embankment to let in flood water. The supply of water is uncertain and irrigation has become more unsatisfactory by the construction of Barrages in the Punjab and Sind.

The present annual rate of production of firewood is 12-15 cu. ft. per acre in Inland Forests, and 25 to 30 cu. ft. in Riverain Forests. Though the firewood requirements of Sind and Karachi are about 50 million cu. ft., the normal yield of Sind Forests is about 14 million cu. ft. —the balance is being met by Revenue and Zamindari Forests. As with the increase of population in town the demand for firewood will rise to 80 million cu. ft. within 10 or 15 years, the Forest Department intends to raise Irrigation Plantations in and about the Sukkur Barrage, Lower Sind Barrage and Upper Sind Barrage Zones. In the Sukkur Barrage Zone plantation work is in progress in about 20,000 acres. Trees will be planted in all the strips along the Sukkur Barrage canals, minors and channels, which cover 6,000 miles. This will go a long way in meeting increased demands. So far about 25,000 acres have been brought under irrigated plantation schemes in the Sukkur Barrage zone.

The major Forest Produce of Sind is firewood, charcoal and timber. The principal Forest species are (1) Babul, (2) Kandi, (3) Lai, and (4) Bahan. Babul yields timber used for carts, agriculture implements, poles, etc. Kandi and Babul also make excellent charcoal. Lai gives firewood of medium quality. Bahan is used for building, turnery, lacquer work and packing cases. After the creation of Pakistan there is a keen demand for Bahan in Match manufacture and in 1948, 17,00[illegible] cu. ft. of it were supplied at the rate of Rs. 2 per cu. ft. of West India Match Company, Lahore.

The minor Forest produce are (1) Kauh Sar and reeds, (2) Babul Bark, (3) Lac, (4) Lai brushwood and branches of mulberry, (5) Gum. Of these 10,000 tons of Kauh Sar is available and can be used to establish Straw Board Mills. Babul bark is utilised in Tanning Factories and we have one at Hyderabad. The estimated out-turn of lac is about 120 maunds.

MEDICAL FACILITIES

The Medical Department of Sind maintains 8 District Civil Hospitals in which there is a total indoor accommodation of 943 beds. Most of the rural dispensaries have provision of 4 male and 6 female indoor accommodation. The total number of dispensaries in the Province is about 90. A new Civil Hospital has been recently opened in Sukkur. An anti-malaria Institute has already been established in Sukkur.

The Province of Sind is singularly fortunate in that plague is totally absent. Nor is influenza a public health problem any more. Likewise cholera has never been a serious menace.

Smallpox is the only principal epidemic disease prevalent in this Province throughout the year, but generally it assumes a mild form. Vaccination, therefore, is compulsory in all towns and arrangements for it exist in each Taluka. The incidence of this disease in 1950 was negligible.

LOCAL SELF-GOVERNMENT

Local Self-Government in the Province comprises 8 District Local Boards, 6 Borough Municipalities and 20 District Municipalities. Notified Area Committees and Sanitary Committees in towns and villages respectively also come under Local Self-Government.

Conditions though better than before are not yet normal. More than 18 Municipalities are under supersession. They will be restored when conditions become normal. At present their administrators are assisted in matters of general policy by Advisory Committees appointed by the Government.

FOOD AND CIVIL SUPPLIES

(a) Foodgrains.—Being a surplus Province in all major foodgrains, Sind is feeding today millions in East Pakistan.

ACREAGE AND OUT-TURN OF PRINCIPAL FOOD AND CASH CROPS OF SIND

Crop.	1949-50		1950-51

Cotton Desi	84,095	33,638	7,75,753	41,099

(b) Cloth Supply.—There is plenty of foreign cloth in the market including Indian cloth on the latter of which rationing continues. During March and April, 1949, about 3,279,303 yards of cheap Czechoslovakian cloth was imported by the Government at reduced customs duty.

(c) Fuel.—The Province is surplus in charcoal and firewood. During 1949-50 about 5 lakh maunds of charcoal were supplied to Quetta, civil, about one lakh maunds of firewood to Quetta, military and 5·5 lakh maunds of firewood were exported to the Punjab.

(d) Smuggling.—Smuggling which started immediately after Partition has now been stopped by the Enforcement Police. The Enforcement staff detected 167 cases in 1948-49, (of which 69 were decided), seized 350 camels, 6 bullocks, 3 carts and confiscated 2,500 maunds of foodgrains. The fact that the border is long necessitated concentration on stocks of foodgrains in villages, so that the procurement figures during the year were found quite satisfactory. Twenty Border-Posts have now been established to combat smuggling.

(e) Controls.—At present no commodity in Sind is sold or distributed under any system of control, except the sale-price of sugar.

(f) Procurement.—This was done through the Sind Purchasing Board and Wheat Purchasing Department. The Government nationalised them to ensure maximum procurement and the Board was renamed Sind Foodgrains Nationalisation Board.

(g) Storage of Foodgrains.—At present Government-owned sheds and godowns are few in number and so privately owned buildings have been taken on rent. Necessary alterations are also being made in storage bulk bins in Sind, which were constructed by the former Government of India and abandoned for being faulty. A scheme for the construction of more sheds was finalised sometime back and is now being implemented.

Precautionary steps are taken to guard against infection and experiments are also being tried every year, as storage has become a highly specialised branch of Science.

LAW AND ORDER

The present strength of the police is inadequate; the 3 wings of S.P.R. (Infantry, Horse and Camel) which has a numerical strength of 2,500 are not well-equipped. Adequate provisions for the training of personnel have to be made, a highly efficient system of intelligence has to be organised, and armoured cars and mobile sets of Wireless have to be introduced.

In order to curb the Hurs and criminal tribes, they were all transferred to criminal settlements of which there are eleven in all, with a total population of 6,041 in 1950. Settlers placed in them are engaged in Agriculture or other avocations by which they earn their living. The settlers are not only usefully employed but an attempt is made to reform them by religious discourses and adult instruction. Free Primary Education is provided for their children.

ANTI-CORRUPTION DRIVE

The Anti-Corruption Department of the Sind Government came into existence on May 21, 1948. It had a skeleton staff of one Anti-Corruption Commissioner, 3 Deputy Superintendents, 12 Inspectors, 18 Head Constables and 60 Constables. Now every district headquarters have an Inspector of the Department with the passing of the Sind Prevention of Bribery and Corruption Act in 1950 and every office of an Anti-corruption Inspector has become a Police Station for the registration of crimes.

In 1949-50, 384 offences were registered at police stations. Of them 204 were challenged, out of which 141 were decided. In addition 46 Departmental cases were launched. The efforts of the Anti-corruption Department resulted in the departure of an I.G. of Prisons, two Superintendents of Jails, one Divisional forest officer and one mukhtiarkar in 1950.

Now the Anti-Corruption police have accelerated their activities and in the course of a single month, April 1951, they detected cases against a Mukhtiarkar, a Jail Superintendent, a Senior Jailer of Central Prison and suggested departmental action against an Assistant Executive Engineer, an Administrator of a Municipality and a Deputy Superintendent of Police.

INDUSTRY

Sind has great industrial possibilities particularly for the development of those industries which may help the agriculturists directly or indirectly, such as (a) Glass, Cement, Pottery and Paints; (b) Fish oils, Fish meal and Manures, Fish Glue and Gelatine and Pearl Buttons; (c) Biscuit and Confectionery, Starch, Glucose, Cotton Textiles and Oil Milling, Soap and Glycerine, Straw Boards, Sericulture and Cigarettes; (d) Tanning Extracts, Match Industry, Sugar, Plywood and Shellac; and (e) Tallow, Leather, Animal Glue, Bones and Bone Fertilizers, Wool and Animal Hair, Dairy Products and Fruit Canning.

As for the existing Large Scale Industries, Sind has a fairly large number of Ginning factories (about 130), Rice Husking factories (about 110) and Roller Flour mills (about 10). Among other important industries in the Province are edible oil industry (2 mills at Hyderabad, one at Tando Allayar and 7 at Sukkur), leather-tanning industry (2 big tanneries in Hyderabad), biscuit and confectionery (concentrated in Sukkur) and glass industry (Hyderabad).

The result of the effort to build up industrial estates (mentioned earlier) and the establishment of factories has been extremely good.

DEVELOPMENT SCHEMES

To co-ordinate development o the Indus Valley Government have constituted a Development Board and created the post of Development Commissioner to expedite the formulation and implementation of Development Schemes and to co-ordinate the development activities of all the Departments.

The Development Schemes evolved, hitherto fall under four different categories.

(a) Those Which Are Already Operating :— (1) Lower Sind Barrage Project; (2) Mechanisation of P.W.D. Earth Works; (3) Pumping Scheme from Lakhi to Kotri; (4) Nationalisation and Rehabilitation of Electrical Undertakings; (5) Construction of Roads; (6) Mechanisation of Agriculture; (7) Shifting of Agricultural college from Sakrand to Hyderabad; (8) Establishment of a Medical College at Hyderabad; (9) Extension and Improvement of Hospitals and Dispensaries; (10) Better Equipment for Mofussil Hospitals and Dispensaries; (11) Nationalisation of Transport; (12) Thano Bola Khan Scheme.

(b) Schemes Approved But Not In Operation.—Setting up of Textile Mill, Cement Factory and Paper and Cardboard Factory; (2) Setting up of two Thermal Power Stations; (3) Remodelling Rohri Canal and Diversion of Khairpur Feeder East.

(c) Social Uplift Schemes to be Implemented by Grant from Central Government.—(1) Establishment of Eye Hospital at Nawabshah; (2) Establishment of T. B. Sanatorium; (3) Training of Nurses, Midwives and Assistant Midwives; (4) Establishment of Maternity and Child Welfare Centre in each Taluka; (5) Establishment of two Training Institutions for Primary Teachers; (6) Hostels for Government Secondary Schools; (7) Establishment of Sind Arts School; (8) Establishment of two Teachnical High Schools at Larkana and Hyderabad; (9) Establishment of Library, Museum, Zoo and Art Gallery; (10) Establishment of Girls' Arts College; (11) Establishment of Provincial Sports Stadium; (12) Scheme for the Sind University; (13) Water Supply and Drainage in certain Boroughs and District Municipal Towns; (14) Establishment of Satellite Town near Hyderabad.

(d) Schemes Under Consideration.—(1) Hydro-Electric Schemes under the lower Sind Barrage Project; (2) Establishment of two Mechanised Farms; (3) Facilities to industrialists; (4) Veterinary schemes; (5) Rohri Canal Hydro-Electric generating Stations; (6) Eastern Nara Hydal Scheme; (7) Usif Dahri Hydel Scheme; (8) Kumb Lima Hydel Scheme; (9) Remodelling Desert Canal, Unar-Wah and Nur-Wah System; (10) Conversion of Right Bank Channels into non-perennial ones; (11) Impounding Reservoirs at Angai and Naiz.

HYDRO-ELECTRIC SCHEMES

The Sind Government have proposed to develop Hydro-Electric Power for industrial purposes and home use in middle and upper Sind. Apart from Kalri-Baghar Scheme, waterfalls in Rohri Canal and Eastern Nara are proposed to be exploited and it is estimated that 16,300 kW of electric power would be generated on the three falls of Rohri canal at Sukkur, Yusuf Dhari and Kumblima and one fall at mile 23 of Eastern Nara.

Of the many Hydel Schemes, the Rohri Canal Hydel alone is estimated to cost about Rs. 237 lakhs. The execution of this scheme depends upon the remodelling work of Rohri Canal which for the present has been postponed by Government. A 9,360 kW capacity Hydel generating station will be established at the proposed new 14 ft. fall at mile 2 of the Rohri Canal near Rohri with full capacity diesel electric stand by generating plant to provide against canal closing and other emergencies.

Eastern Nara Hydel Scheme :—This scheme is estimated to cost about Rs. 95 lakhs. The execution of this scheme depends upon the same conditions and circumstances as those of the Rohri Canal Hydel Scheme. A 7,500

kW capacity Hydro-Electric Station will be established at the proposed 10 ft. fall at mile 22 of the Eastern Nara Canal. This station will be interlinked with the station at Rohri Canal.

Usif Dhari Hydel Scheme :—Rs. 91 lakhs is the rough estimated cost of this scheme. Execution of work may take about 3 years and the scheme will take about 4 to 5 years to complete. A 4,200 kW capacity Hydel Station is to be established at Usif Dhari. The proposal contemplates combination of the existing two falls at Usif Dhari (8 ft.) and Daro (5·35 ft.).

Kumb Lima Hydel Scheme :—This scheme is roughly estimated to cost Rs. 40 lakhs. The scheme will take about 4 to 5 years to complete. A 2,000 kW capacity Hydro-Electric Station at 8·3 ft. fall at mile 141 of the Rohri Canal near Kumb Lima will be installed.

Kalri Lake Hydel Scheme :—This scheme is estimated to cost Rs. 163 lakhs including grid to Karachi and Hyderabad (Sind). The installed capacity will be 12,000 kW and is expected to be developed on a 20 ft. fall at the downstream end of the lake formed by diverting he Kalri Feeder into the Sonhera, Kinjri and Cuhi Dhands. The scheme will produce 86 million units gross annually.

It may be stated here that the Rohri Canal Hydel Scheme and the Eastern Nara Hydel Scheme will form the Upper Sind Grid System, the Usif Dhari Hydel Scheme and the Kumb Lima Hydel Scheme will form the Middle Grid System and the Kalri Lake Hydel Scheme will serve areas in the Lower Sind.

ADMINISTRATIVE PERSONNEL

GOVERNOR

His Excellency, Shaikh Din Mohammad.

PERSONAL STAFF OF THE GOVERNOR

Secretary to the Governor, Abdul Ali.

Military Secretary, Major M. M. Salahuddin.

A.D.C., Captain A. H. Q. Zahid.

SECRETARIES TO GOVERNMENT

Chief Secretary and Secretary, Political Services and General Administration and Home Departments, N. A. Faruqui, O.B.E., P.A.S.

Revenue Secretary, S. Ridley.

Secretary, Public Works Department and Chief Engineer, Sind, Mohammad Moosa.

Secretary, Lower Sind Barrage, T. A. W. Foy.

Finance Secretary, Aftab G. N. Kazi.

Secretary, Food and Agriculture, K. S. Ghulam Rasul Kehar.

Secretary, Legal Department and Remembrancer, Legal Affairs, Mohammad Hanif Siddiki.

Secretary, Education, Health and Local Self-Government, S. H. Raza, C.S.P.

Secretary, Sind Legislative Assembly, Zafar Ali Shaikh.

Secretary to Government and Chief Engineer, Lower Sind Barrage, T. A. W. Foy, P.E.S.

Secretary to Government, Refugee Rehabilitation Department and Rehabilitation Commissioner, Sind, on deputation to U.S.A. in Connection with F.A.D. Conference and to study schemes of colonisation, Nazir Ahmed, P.A.S.

PUBLIC SERVICE COMMISSION

Chairman : H. B. Hingorani.

Members : G. H. K. Agha ; Dr. H. N. Daudpota; Abdul Ghani F. Kasi.

INFORMATION DEPARTMENT

Director of Information, A. Ahmed Kirmani.

KARACHI

THE Karachi Administration came into existence on July 23, 1948 after the separation of Karachi from Sind. It is now a Chief Commissioner's Province. The population of Karachi has during the last four years shot up to 11,18,000 (1951 census) from the pre-partition figure of 3½ lakhs. Of this population 6,40,000 are males and 4,78,000 females.

The problem of housing has been one of the most difficult problems in Karachi in the post-partition days. Since the separation of Karachi from Sind the Rent Controller was able to issue over 6,000 allotments. The Central P.W.D. has constructed over 3,000 houses for the employees of the Central Government.

Nearly 3,000 acres of land has been granted to the various housing societies of whom the most important are the Pakistan Employees' Housing Society and the Karachi Co-operative Housing Society which comprehends 17 other housing societies.

The police force is now adequately manned. The increase in crimes is only due to the fact that there has been an increase in the population and a number of bad characters flocked to Karachi after partition. Still the proportion of crime to the population is not higher than it was at the time of the partition.

A scheme called the Nigheban scheme under which volunteers from the public are being enlisted to help the police in emergencies and also in the suppression and detection of crime was started in February 1950 and 4 platoons consisting of 148 officers and men were formed. Rifle Clubs were also started at the end of 1948 to train the people in drill and use of arms. Over 100 persons including women and boys were trained, and another batch of 80 persons were under training in the Jinnah Club. Another club called the Bahadur Yar Jung Club was also started.

Prostitution has been banned in Karachi under the Bombay Prevention of Prostitution (Karachi amendment) Act 1949. Schemes are now under preparation for providing honest living to the prostitute.

The labour situation has been peaceful on the whole. Though the number of factories has increased from 134 before partition to 300 and though the labour population has also increased considerably, there has been no corresponding increase in the number of strikes and lock-outs.

Complete prohibition of dangerous drugs like charas, ganja and opium-smoking has been enforced and the use of other drugs restricted. Full control under the Dangerous Drugs Act is exercised on the chemists and druggists whose number has shot up from 150 to over 750. Fresh licences for liquor shops have been stopped.

Administrative Personnel

Chief Commissioner, A. T. Naqvi.

Financial Adviser, A. A. Chaudhuri.

Secretaries, Abdul Latif Nabi Bakhsh Shaikh, Lutfurrehman, Harun-ur-Rashid.

Assistant Secretary, Sharif Hussain.

Collector and District Magistrate, A. H. Khan.

I. G. Police, O. G. Grace.

Assistant Inspector General Police, C. I. D., A. H. Mirza.

Chief Medical Officer, Jinnah Central Hospital, Lt.-Col. M. H. Shah.

Director, Civil Supplies, Yamin Qureshi.

Chief Judge, Small Causes Court, Feroz Nana Ghulamally.

Permit Officer, Muhammad Sharif Hussain.

Rent Controller, S. A. Hassan.

Director of Education, Imtiaz Muhammad Khan.

Accounts Officer, Rehmatullah Khan.

Supdt. Distt. Prison, L. G. Gordeiro.

BALUCHISTAN

BALUCHISTAN is an oblong stretch of country occupying the extreme western corner of Pakistan.

It is divided into two main divisions : (1) what was called British Baluchistan with an area of 9,476 square miles consisting of tracts assigned to the British Government by a treaty signed in 1879 ; (2) Baluchistan Leased and Tribal areas with an area of 44,345 square miles composed of tracts which have, from time to time, been acquired by lease or otherwise brought under control and placed directly under British officers. The States of Kalat, Las Bela, Mekran and Kharan with an area of 79,546 square miles, which were also regarded as parts of Baluchistan have acceded to Pakistan.

The legal position in regard to the former British Baluchistan and the Leased and Tribal territory is fluid.

The whole Province embraces an area of 134,139 square miles and a population of 11,54,167 composed of 11,37,000 Muslims, 13,000 Hindus, 4,000 Christians and 167 others, according to the 1951 census. Literacy works out to 8·2 in the Baluchistan districts and 2·2 in the Baluchistan States. The density of population is 11·8 per square mile in Baluchistan and 6·8 per square mile in the Baluchistan States.

The country, which is almost wholly mountainous, lies on a great belt of ranges connecting the Safed Koh with the hill system of Southern Iran. It thus forms a watershed the drainage of which enters the Indus on the east and the Arabian Sea on the south while on the north and west it makes its way to the inland lakes which form so large a feature of Central Asia. Rugged, barren sun-burnt mountains, rent by high chasms and gorges, alternate with arid deserts and stony plains, the prevailing colour of which is a monotonous sight. But this is redeemed in places by level valleys of considerable size in which irrigation enables much cultivation to be carried on and rich crops of all kinds to be raised.

INDUSTRIES

Baluchistan lies outside the monsoon area and its rainfall is exceedingly irregular and scanty. Shahrig, which has the heaviest rainfall, records no more than 14.72 inches in a year. In the highlands few places receive more than 10 inches and in the plains the average rainfall is about 5 inches, decreasing in some cases to 3.

The majority of the indigenous population are dependent for their livelihood on agriculture, care of animals and provision of transport. The majority of the Afghan and the Baluch, as a rule, cultivate their own lands. The Brahuis dislike agriculture and prefer a pastoral life. Previous to the advent of the British, life and property were so insecure that the cultivator was fortunate if he reaped his harvest. The establishment of peace and security has been accompanied by a marked extension of agriculture which accounts for the increase in the number of the purely cultivating classes.

The Mekran coast is famous for the quantity and quality of its fish and the industry is constantly developing. Fruit is extensively grown in the highlands and the export is increasing.

Coal is mined at Sharigh and Harnai on the Sind-Pishin Railway and in the Bolan Pass also in Sur Range in Quetta-Pishin District. Chromite is extracted in the Zhob District near Hindubagh. Limestone is quarried in small quantities. Gypsum is mined in the Sibi District near Spintangi Railway Station.

Education is imparted in public schools of all kinds. There is a widespread desire for education among the more enlightened headmen round about Quetta and other centres ; but on the whole education or the desire for it has made little or no advance in the outlying districts.

GOVERNMENT

The Baluchistan Administration is run by the Agent to the Governor-General under the direct supervision of the Centre. The AGG exercises the powers of the provincial Government generally but in certain cases he exercises the powers of the Central Government as well. He is assisted by five political agents in the discharge of his duties and responsibilities.

Baluchistan has been promised a fully responsible Government by 1953. A representative legislative assembly with popular ministers is to be set up.

Political Agents and their Sub-Divisional Officers discharge many functions. They are Magistrates, Revenue officials, Customs officials, Excise officials, Rationing officials, Custodians of Evacuee Property, Assistant Rehabilitation Commissioners, Registrars of Marriages, Commissioners under the Workmen's Compensation Act, etc.

The Marri and Bugti tribes enjoy a special position in that no land revenue is collected from them and in the case of the Marri tribe, the tribe is administered through the Tumandar who maintains his own jails and levies.

Apart from Quetta where there is a Municipality, other large towns are Bazar Fund areas. The Political Agents concerned administer the Bazar Fund funds.

Individual Service Allowances are granted to important Sardars and Maliks and the system of tribal responsibility is strictly enforced.

Apart from tribal levies, there are four corps of Civil Armed Forces for the protection of the frontiers with Afghanistan and Iran. They are Zhob Militia, Pishin Scouts, the Chagai Levy Corps and the Mekran Levy Corps.

Magistrates in Baluchistan exercise powers both under the F.C.R. and under the regular law.

There is a small separate Judiciary consisting of the Judicial Commissioner, the District and Sessions Judge and the Sub-Judges. Civil cases under the regular law are referred to the Sub-Judges.

The Baluchistan Police Force operates in "A" areas which are the larger towns and villages where the Headquarters are located. In these areas the regular Law is enforced, but under the provisions of the F.C.R. certain cases where the parties are tribesmen and a more satisfactory solution is likely to be found under the F.C.R., cases can be referred to the Jirga.

In "B" area the Police have no jurisdiction and law and order is maintained by the tribal levies. The cases are referred to Jirgas under the provisions of the F.C.R. and orders passed by Magistrates having powers under the F.C.R.

Jirga members are appointed by the Political Agents and are always men of standing in their tribes.

Cases referred to these Jirgas are decided according to *riwaj* which varies between tribes.

Important cases and all changes in *riwaj* are referred to the Shahi Jirga whose members are appointed by the Agent to the Governor-General. Members of this Jirga are all important Sardars and membership is almost hereditary.

Cases between the members of tribes of two different Agencies are referred to Joint Jirgas, and these are held between Agencies and States and inter-Provincial Jirgas with other Provinces.

PERSONNEL

Agent to the Governor-General and Chief Commissioner, The Hon'ble Mr. Amin-ud-din, C.S.P.

Revenue and Judicial Commissioner in Baluchistan, Nawabzada Mohd. Aslam Khan, C.S.P.

Wazir-i-Azam, Kalat State, Agha Abdul Hamid, C.S.P.

Secretary to the A.G.G. and Chief Commissioner in Baluchistan, Khan Shah Zaman, C.S.P.

Political Agent, Zibi, Major H. A. Arthington Davy.

Political Agent, Loralai, S. Afzal Aga, C.S.P.

Political Agent, Zhob, Sher Zaman Khan.

Political Agent, Chagai, Khan Abdullah Khan.

District and Sessions Judge in Baluchistan, Qazi Ghazanfar Hussain.

Under-Secretary to the Hon'ble the A.G.G. & C.C. in Baluchistan, Shaukat Baksh Awan, C.S.P.

Assistant Political Agent, Quetta-Pishin, Abdul Ehsan, C.S.P.

Assistant Political Agent, Zibi, Masrur Hassan, C.S.P.

Assistant Political Agent and Colonisation Officer, Nasirabad, Haji Mohd. Siddiq Khan.

Assistant Political Agent in Zhob, Khan Faqir Mohd. Khan.

Assistant Political Agent-cum-Wazir, Mekran, Haji Sheikh Ahmad Khan.

Officer on Special Duty, Baluchistan Secretariat, R. W. Innis, (G.A.R.).

Commissioner-cum-Additorial Custodian of Evacuee Property, Major Muin-ud-Din, (G.A.R.).

Deputy Inspector-General, Frontier Corps, Col. Khushwaqt-ul-Mulk.

Secretary to the A.G.G. in P.W.D., Lt.-Col. R. H. Muirhead, O.B.E.

Superintending Engineer, Irrigation, Baluchistan, Khan Bahadur Abdul Rehman.

Director of Education in Baluchistan, C. H. Sheikh.

Chief Medical Officer and Inspector-General of Prisons, Lt.-Col. F. M. Khan, I.M.S.

Senior Superintendent of Police in Baluchistan, R. G. Mellor.

Director of Agriculture in Baluchistan, Abdul Aziz Khan.

A/Rc. (Food), Malik Mohd. Ihsham-ud-Din Ahmad Khan.

Additional Superintendent of Police, Quetta-Pishin and Sibi, K. S. Mirza Bashir Ahmad.

The ruling dynasty belongs to the tribe of Nausherwanis who are the descendants of the old Kiani dynasty of Persia. The present ruler Khan Bahadur Nawab Amir Mohammad Habibullah Khan Nausherwani was assisted by a Wazir in matters of administration. The State is divided into fifteen Naibats, five major and ten minor ones. The Naibs are appointed by the Chief himself.

Mekran

The area of the State is 23,196 sq. miles, and the population 86,651. Mekran has a revenue of Rs. 8,30,514, and an expenditure of Rs. 7,24,065.

The Ruler of the State is Nawab Amir Bal Khan Baluch, and the administration is carried on with the assistance of a Wazir. Mekran is a maritime State. The development of its sea ports on modern lines is expected to be taken up soon. The State has one high school, five middle schools, and 32 primary schools. People are primitive and poor. Measures to uplift their condition have been taken and the question of introducing self-governmenting institutions was being considered when the Union took place. The capital of the State is Turbat.

ASSOCIATIONS

PAKISTAN MERCHANTS' ASSOCIATION

The Association was established in 1902 and registered in 1925. It had 156 members on the roll on 31st December 1951.

The aims and objects of the Association are to protect and promote Pakistan trade and industry in and around Karachi, settle members' disputes and secure equitable dealings in trade, negotiate and promote or oppose legislative and other measures affecting trade interests, maintain departments devoted to particular trades or industries, regulate trade exchanges, examine agenda of the International Labour Organisation, and recommend for nomination of Employers' delegates to the International Labour Conferences.

The Association is represented on various public bodies, *e.g.*, the Sind Legislative Assembly, the Karachi Port Trust, the Karachi Municipal Corporation, the N.W.R. Local Advisory Committee, the Sind Cotton Committee, the Advisory Communications Board, the Sind Provincial Board of Agriculture, the State Bank of Pakistan, the Pakistan Council of Accountants, the Foreign Trade Development Council, Karachi Improvement Trust, etc.

It has a Clearing House to settle differences periodically between members *inter se*. It is affiliated to the Federation of Pakistan Chambers of Commerce and Industry, and International Chamber of Commerce.

President : Ahmed E. H. Jaffer, M.C.A. ; *Senior Vice-President :* M. A. Rangoonwala, J.P. ; *Vice-President :* Haji Habib Haji Mohamed ; *Chairman, Produce Exchange Department :* Haji Habib Haji Mohamed ; *Secretary :* M. A. Sozer, A.C.I.S.

Office :—Nicol Road, Karachi 2.

ISMAILIA ASSOCIATION FOR PAKISTAN

This institution was started in October 1948. Its chief object is to conduct systematic research in Islamic history and philosophy, with special reference to movements in Islamic history from the 10th century A.D. to 13th century A.D.

It has a large and rare collections of Arabic manuscripts, dating back to 1,000 years and dealing with Islamic sociology, theology, philosophy, history and literature. The manuscripts are of unique importance to students who want to specialise in Islamic history of the Fatimid period.

Recently the Association has published many books in various languages, to mention a few, *Kitab-ul-Himma fi Adabi Ataba-el-a'emma* by Qazi Noaman, *Life and Lectures of Al-Muayyad-Fid-Din Al-Shirazi* and *Hassan-bin-Sabbah* in English and also *Prince Aga Khan* and *Zad-ul-Vaezeen* in Urdu. Well-known scholars like Prof. Jawad-al-Muscati (Ustad-fi-Uloom-il-Arabiya) al-Hamdani, Prof. Sultan Nazerali Al-Efrici, Prof. Kasam Ali, M.A. and Mr. Hashim Moleedina are engaged in doing research work at this institution.

Board of Executive : President : Vazir Dr. Peermahomed Hoodbhoy, M.B.B.S., J.P., C.M.O. ; *Hon. General Secretary :* K. Sherali Alidina, M.A., LL.B. ; *Hon. Treasurer :* Vazir Kassim Jinnah ; *Manager :* Sherali Rajabali Valliani.

Office :—Harris Road, Kharadar, Karachi 2 (Pakistan).

SIX YEAR PLAN

SOON after the political emancipation of the area which is now Pakistan, the task of social and economic emancipation was taken in hand. A Development Board was set up soon after the Partition in August 1947, of the Indo-Pakistan sub-continent, to co-ordinate and approve schemes of development. A six year plan has now been prepared and accepted.

It is estimated to cost about Rs. 260 crores out of which it is hoped that Rs. 140 crores could be raised internally during the six years and that it would be possible to acquire foreign loan for assistance to the extent of Rs. 120 crores. Foreign assistance would be necessary not only because we would not be able to earn adequate foreign exchange during the period but because it will also help in securing capital goods, and technical know-how.

Hand in hand with the programme of economic development, a programme of technical training of our own personnel has been taken up. Pakistanis are being sent abroad for training under the Technical Assistance Programmes of the U.N., the Colombo Plan, and the Point Four Plan and training institutions in this country are also being developed to produce more technicians.

The Six Year Plan concentrates on vital aspects of our economy. Development in the field of agriculture has been given the greatest importance. Out of a total of Rs. 260 crores, agricultural schemes are expected to cost Rs. 82 crores—32 per cent. Our main object is to mechanise agriculture as far as desirable, introduce better agriculture methods, improve seed varieties and popularise fertilisers. Measures are to be taken for conservation and fuller utilization of existing cultivable area through schemes of anti-water logging, reclamation of saline and eroded soils, flood control, etc. Large new areas are to be brought under the plough through schemes of irrigation and mechanical cultivation. Afforestation is vital for our country as a profusion of trees alone can remove the aridity of land and climate. Improvement of our cattle wealth and fisheries is also aimed at. All these measures are expected to add 6 million acres to the area under cultivation and increase production of food by 7 million tons and non-food crops by 55 million tons.

Most of the schemes have long passed the blue-print stage and appreciable progress has already been achieved in many directions. The Lower Sind Barrage Irrigation Scheme and the Thal Irrigation and Colonization Projects estimated to cost Rs. 20 crores and Rs. 33 crores respectively, are in an advanced stage of execution. In Thal, water channels have gone into a large area converting sand dunes into smiling fields. 200 miles of road has been constructed, two houses are coming up every hour and a village is being built every two days. 1,300 out of 1,800 tube-wells planned have been constructed. It has also been decided to start pilot projects in Punjab, Khairpur and Sind to investigate the best remedies for preventing rise of water table and throwing up of salts in irrigated areas. Technical staff and machinery for these projects are expected under the United Nations Expanded Programme of Technical Assistance. A large lift irrigation scheme has been sanctioned for East Bengal where there is too much water during monsoons and too little during the rest of the year. Pumps for this scheme are expected from Canada against her offer of economic assistance. A number of schemes for seed multiplication for East and West Pakistan have been put into operation.

Agricultural development must necessarily be linked with improvements in the field of transport and speedy distribution of agricultural produce.

The magnitude of proposed expenditure on transport and communications in the Six Year Plan, therefore, ranks next only to agriculture and is estimated at Rs. 53 crores. Vigorous steps have already been taken to secure improvement in this field. To start with, speedy improvisations were carried out at Chittagong port in order to deal with 13 ships simultaneously instead of 4. The handling capacity of the port has already risen from 5 lakh tons a year to 2.5 million and the construction of new jetties, storage and transit sheds and marshalling yards now in hand will take it to 3.9 million. The expansion of ship repairing facilities in East Bengal and the building of a dry dock in Karachi have begun. In the case of Railways, new sleepers are being put in the track on an unprecedented scale. Modern diesel electric engines capable of a speed of 90 miles an hour and a large number of new wagons have already arrived. Light steel carriages are on order in France and shortly a new standard of passenger service will be set up. A detailed road plan of the entire country with well-defined standards for inter-Provincial highways, district links and village roads has been drawn up. Large strides have already been taken in the development of tele-communications ; new telephones and telegraph wireless transmitters have been installed and there is direct link between East and West Pakistan and between each wing of Pakistan and the most important cities of the world.

INDUSTRY

Industry is essentially the field of private enterprise and the declared policy of the Government is to encourage and assist private enterpreneurs, both local and foreign. Material reliefs in taxation have been allowed and many other facilities promised. An Industrial Finance Corporation has been set up to grant loans to such concerns as cannot shoulder the entire burden of an undertaking. However, as response from private enterprise is as yet inadequate, the Government has recently set up an Industrial Development Corporation. This would undertake major industrial projects involving heavy outlay, initially on behalf of the Government and transfer their ownership to the public in due course. A total of Rs. 49 crores is expected to be spent on industry and mining during the six years period. The major schemes covered by this expenditure are the setting up of 5 jute mills of 1,000 looms each, 24 cotton textile mills of 25,000 spindles each and a paper mill of a capacity of 30,000 tons a year, besides a number of other essential industrial units. It is expected that by 1957 the country will be practically self-sufficient in cloth and paper and shall have some surplus jute-goods for export. The first jute mill has already gone into production and one more would be ready in 1952 and another in 1953. Apart from cotton mills set up by private enterprise (over 4 lakh spindles), 10 units of 25,000 spindles each have been recently ordered by the Government to step up cloth production. A paper mill is under construction near Chittagong and orders for almost the entire machinery have been placed. A number of other basic industrial units are to be established as part of a two year priority programme, *e.g.*, steel, caustic soda, sulphuric acid, cement, pharmaceuticals, cotton seed oil, etc.

Industral development cannot proceed without the provision of power. In Pakistan the resources of coal and oil are still unexplored but the scope for hydel power is considerable. As hydel projects take some time to complete, thermal power stations of 125,000 kW are proposed to be established within a period of two years. A provision of Rs. 47 crores has been made in the Six-Year Plan for expenditure on power and fuel. Major hydro-electric schemes in view are Warsak in N.-W. F. P. (400,000 kW) and Mianwali in Punjab (100,000 kW). Three small hydel projects are Malakand in N.-W. F. P. (19,600 kW) which was completed this year, Rasul in Punjab (22,000 kW) which was expected to go into production in February 1952 and Dargai in N.-W. F. P. (20,000 kW) which would be completed by December, 1952. Coal resources are to be tapped further and it is hoped that the present output of 3 lakh tons will be increased to over 8 lakhs tons a year. Search for oil in Baluchistan and elsewhere is going on.

BETTER LIVING CONDITIONS

All these projects will have only an indirect effect on the standard of living and social conditions. The Government of Pakistan considers immediate improvement in social conditions as important as the industrialisation of the country. A provision of Rs. 29 crores has therefore been made in the Plan for the improvenient of educational and medical facilities, housing and water supply to urban and rural areas. This is in addition to what the Provincial Governments may be able to spend. Already an amount of Rs. 18 crores has been made available to the Provinces for undertaking schemes of social uplift. A further amount of Rs. 5 crores has been allowed for the housing and rehabilitation of refugees.

The implementation of the Six-Year Plan, in which lies the country's hope for the future, has been entrusted to a high-power Economic Council to be presided over by the Prime Minister of Pakistan. The Council is assisted by a Planning Commission and a number of Sub-Commissions functioning in the different fields of development.

A REVIEW OF THE YEAR

PAKISTAN had its second and perhaps the biggest shock of its five year existence when on October 16, 1951 the first Prime Minister, "successor" of the Quaid-e-Azam, Leader unparalleled was assassinated at Rawalpindi while about to address a public meeting organised by the Muslim League at the Company Gardens. It is reported that that same morning Khan Liaquat Ali Khan got out of his bed at 3 a.m. and in a dressing gown went round all the rooms of his house in Karachi including some occupied by guards and servants. The household staff was surprised at this unusual occurrence.

A few hours later, just before his departure for Rawalpindi, his eldest son Ashraf pleaded with him to cancel the visit to Rawalpindi.

At the public meeting itself he had hardly uttered the words "Brathran-i-Islam (Brothers in Islam)" when one Said Akbar fired two revolver shots at him from the first row. The shots were fired at 4.25 p.m. and within an hour, surgeons had declared after operating upon him and giving him blood transfusions that Pakistan's first Prime Minister and President of the Pakistan Muslim League was no more.

The mortal remains were flown to Karachi the same night and he was laid to rest near the grave of his leader, Quaid-e-Azam Muhammad Ali Jinnah.

The Cabinet met without the Prime Minister and remained in session almost for the whole night. The then Governor-General Al-haj Khwaja Nazimuddin was requested to take up the more arduous duties as the second Prime Minister. The Finance Miniser, Mr. Ghulam Muhammad, who was not keeping good health and was convalescing in the Rawalpindi Combined Military Hospital, was elevated to the post of the Governor-General of Pakistan. The Secretary-General to the Government of Pakistan, Mr. Muhammad Ali succeeded Mr. Ghulam Muhammad.

An important change made in the Central Cabinet after the new Prime Minister Khwaja Nazimuddin took over was the replacement of Chaudhuri Nazir Ahmad Khan as Industries Minister by the then Governor of Punjab Sardar Abdur Rab Nishtar.

PROVINCIAL POLITICS

In the North-West Frontier general elections, the first on the basis of adult franchise the Muslim League was returned with an overwhelming majority. Khan Abdul Qaiyum Khan formed a new cabinet. There were however, numerous complaints of unfair methods having been used by the Ministry in power that of Khan Abdul Qaiyum Khan. No less a person than the General Secretary of the All Pakistan Muslim League, Khan Muhammad Yusuf Khattak and a member of the Central Executive of the Muslim League, Khan Ibrahim Khan Jhagra filed representations to the Central Muslim League and the Parliamentary Board. The Prime Minister who is also the President of the Pakistan Muslim League was authorised by the Central League Executive to examine the complaints.

A number of Red Shirt leaders continue to be in jail. Khan Abdul Ghaffar Khan has not been keeping good health and he had to undergo two operations in the Mayo Hospital. The Frontier Government have declared their intention of releasing as many Red Shirt prisoners as satisfy them that they would not be a party to any anti-State agitation. Dr. Khan Sahib, the Pre-parvition Premier of the province was released but interned in his District.

With the elections in the Punjab having been completed early in 1951, Mian Mumtaz Muhammad Khan Daultana formed a stable ministry—the Jal and the Azad Pakistan Party having been almost routed in the general elections. This Ministry has sponsored various measures for the betterment of the peasant classes. As in the Frontier, so in the Punjab all big Jagirs have been abolished and the bigger zamindars have had to part with much of their hereditary power and share the produce with the tenants in a more equitable manner. The tenants in the Punjab cannot now be ejected by the zamindars.

Another unit of the Federation in West Pakistan, Bahawalpur, had sweeping reforms carried at the instance of the Central Ministry of States and Frontier Regions. The first general elections to elect a representative legislative assembly were scheduled to be held by the end of May, 1952. The Ruler has given up most of his powers and is now the constitutional head of the State. His privy purse has been reduced and the right to nominate members to the Assembly taken away.

The general elections were actually to be held in April but when a scrutiny of the nomination papers revealed that out of 49 seats 41 had returned unopposed Muslim League members the Central Muslim League and the Central Government advised the Amir of Bahawalpur to cancel the elections and invite fresh nomination papers. The Amir readily agreed and ordered fresh nomination papers to be filed.

As progress comes to this State, the Centre is treating it as a unit of the Federation on par with the other provinces. This was provided for in the revised instrument of accession whereby the State gave more rights to the Centre including the right to incorporate the State Forces into the Pakistan Army and the collection of income tax and sales tax.

The other neighbouring State Khairpur is preparing to hand over to the Centre certain aspects of its administration on the same lines as Bahawalpur.

Sind has again had a turbulent year. Mr. Muhammad Ayub Khuhro came back to power ousting his former friend and lieutenant, Qazi Fazlullah. The latter however agreed to serve on Mr. Khuhro's cabinet as the Home Minister. This was as long ago as March 1951. But at the end of the year, Mr. Khuhro along with his former friend and now opponent, Qazi Fazlullah came under the PRODA fire. On December 30, 1951 the Legislative Assembly was wound up and along with it the eighth ministry that the province had had since the partition. Mr. Khuhro who had already faced a full inquiry under PRODA and had been disqualified from holding any public or representative office, had headed three of Sind's post-partition cabinets.

The Sind Governor Mr. Din Muhammad announced on December 18 the setting up of a Judicial Tribunal to try both Mr. Khuhro and Qazi Fazlullah.

This Tribunal consisting of the Chief Judge of the Sind Chief Court, Mr. Justice G. B. Constantine and Mr. Justice Muhammad Bachal has already started the inquiry.

The Federal capital, Karachi, has been raised to the status of a Chief Commissioner's Province. Till April 28, 1951, there was an Administrator who ruled the area under the direct supervision

THE STATES OF PAKISTAN

THE following States acceded to the Dominion of Pakistan after partition in August 1947: Bahawalpur, Khairpur, Kalat, Mekran, Las Bela, Kharan, Chitral, Dir, Swat, Amb.

It may be mentioned here that the Government of Pakistan claim that the States of Junagadh and Manawadar, whose rulers are at present in Pakistan, also acceded to Pakistan. The Pakistan Government also maintains that the Junagadh and Manawadar case is a dispute allied with the Indo-Pakistan dispute about the State of Jammu and Kashmir.

The Baluchistan States of Kalat, Mekran, Las Bela and Kharan have merged their States into one administrative unit called Baluchistan States Union with a common executive, legislature and judiciary.

Bahawalpur has now full responsible government and has the same status as that of any other province in Pakistan. Below we give a detailed account of individual States.

BAHAWALPUR

It is the only State in the former Punjab which, due to its geographical position, acceded to Pakistan. This it did on October 7, 1947.

Situated in the extreme south-west of west Punjab, it lies 300 miles from north-east to south-west, while its breadth is nowhere more than 40 miles. The State has an area of 17,494 sq. miles. The general appearance of the land is one of barrenness. There are no hills, and no streams except a few pools and back-waters of the rivers, Sutlej, Chenab and Indus. Three separate tracts can be distinguished:—(*a*) Rohi or Cholistan which is the eastern part of the State and western part of the Rajasthan desert. This part gets hardly any rain. Water level being 80 ft. below the sandy surface of the earth, subsoil irrigation is also not possible. Hence there is hardly any cultivation. (*b*) The soil of the central tract consists of clay mixed with sand. The Sutlej Canals have been instrumental in bringing a large part of this tract under cultivation. The State is in fact the major partner in the great Sutlej Valley Project. (*c*) The western strip called Sind is an old dry river valley. This is the most fertile part of the State because the river Indus has always been the chief source of the country's irrigation. The climate is abnormally hot and dry.

Apart from the main agricultural products such as wheat, gram, dates, mangoes, fruits and cotton, 'kankar' abounds in several places—more especially in the Minchinabad Tahsil. Manufacture of carbonate of soda and saltpetre from saline earth is a common industry in most of the villages in Minchinabad and Khairpur. Leather goods, metal and porcelain vessels are also made and exported to the neighbouring Provinces.

The average revenue of the State is about Rs. 4,50,00,000 per year and the expenditure Rs. 4,58,29,400.

Considering the area of the State, the total population is low, 1,820,000. About 9,000 sq. miles being desert, the majority of the population live in the Sind tract.

In the upper parts of the State the language is Multani or Bhawalpuri whereas the dialects of Rajasthani, Jatki and 'ubhechar' are commonly used in the rest of the State.

The rulers of Bahawalpur claim their descent from the Abbaside Caliphs of Egypt. During the days of Nadir Shah Durrani, Daud Khan occupied this part of the country, and his son Mubaruk Khan and grandson Bhawal Khan later consolidated their position as Chiefs of the State.

In 1833, Bhawal Khan III entered into a treaty with the British Government, by which his independence under British suzerainty was recognized.

The present ruler, Nawab Haji Sadiq Mohammad Khan, succeeded his father in 1907.

With effect from May 1, 1951, Bahawalpur has enjoyed a position almost similar to that of other provinces in the Dominion. The only difference is that the Amir will hold the position of a constitutional head of the State of Bahawalpur. Full responsible government was proclaimed on March 1, 1952.

The Central Government has been given the power and the right of legislation and administration in the State in respect of the subjects mentioned in List I of the Government of India Act, 1935. The State Legislature will be able to make laws for the State in the same manner as other provincial legislatures in matters included in the concurrent list.

The administration is in charge of the Ruler as the constitutional head of the State. He is assisted by a number of Ministers who are in charge of different portfolios. The whole State is divided into three Nizamats, and each Nizamat is under one Nizam who is the chief executive of the area. The principal court of judiciary known as Sadr Adalat was established in 1870. A large number of the Acts, including the Penal Code and Procedure Code, in force in the area formerly known as British India have been adopted.

The sixteen municipalities in the State are administered by the official and non-official representatives of the State. The P.W.D. working under the Mushir-i-Tamirat has carried out some very useful schemes of reconstruction.

KHAIRPUR

This State covering an area of over 6,050 sq. miles lies in Upper Sind. The climate is hot and dry and the average rainfall is never more than 15" a year.

The soil is cultivable and agriculture is the chief occupation of the people. Wheat, cotton and other grains are the main products. Irrigation is by canals branching off from the river Indus at the Lloyd Barrage.

Oil seeds, ghee, tobacco, hides, wheat and cotton are exported and fetch a good price. Carbonate of soda, Fuller's Earth and wool are also produced. Among the manufactures are cotton, silk and woollen cloth. Lacquer work, carpet making and pottery are other important means of livelihood which are open to the artisan class. The population of the State is about 320,000 and the language spoken is Sindhi. The average annual revenue of the State is about Rs. 56,25,000, and the average expenditure Rs. 55,42,500.

The founder of Khairpur was a nephew of the ruler of Sind with the name Mir Sohrab Khan Talpur. The State was recognized by the British in 1882.

His Highness Mir Ali Murad Khan, the ruler of the Khairpur State was invested with ruling powers on September 16, 1951. He is at present studying in England. He has appointed a regent to act on his behalf with certain limitations till his return to Khairpur.

Constitutional reforms have recently been announced according to which there will be a State Assembly consisting of a majority of elected members. Elections under the new constitution will be held shortly.

The State is surplus in respect of food grains. Free primary and secondary education has been introduced throughout the State. There are more than three high schools and one industrial school. There is a well-equipped hospital in the capital and a number of dispensaries are maintained in rural areas. A tannery and silk weaving factory are working. Plans for a textile mill are ready. Very good roads are maintained. Schemes for the extension of irrigation works and the transport system and for the development of the leather, the chemical and the textile industries are under the active consideration of the State Government. More than 30,000 refugees have been rehabilitated in the State. Banking facilities exist in the State. The capital of the State is Khairpur Mirs. The Ruler is entitled to a salute of 15 guns.

CHITRAL

This is another border State lying in the north-west of Pakistan. Surrounded by the Hindu Kush mountains on the north, Badakhshan and Kafiristan in the west, Dir in the south and Gilgit, Mastuj and Yas in the east, it covers an area of about 4,000 sq. miles.

The State can be divided into the valleys of Turikho Mulkho, and Tirich. These valleys are extremely fertile, and wheat, barley, maize and rice are grown in abundance.

Iron, copper, antimony, orpiment and timber of superior quality are found in Kashkar. The mines are not, however, fully worked. According to geologists it is possible the State contains more mineral wealth, which is not yet explored.

The population of the State is 107,906 and the average annual revenue about Rs. 3,40,000 and the expenditure about the same. The exports of Chitral consist of daggers, sword hilts, and embroidered pieces of cloth, while fruits are another important source of income. Under British rule the Mehtar of Chitral used to receive an annual subsidy in return for services in the defence of the border line.

The Mehtars of Chitral are the descendants of Baba Ayub who in the beginning of the 17th century settled in Chitral and entered the service of the then Rais of Chitral, who was a member of his own family. After a hundred years the Rais line became extinct and a descendant of Baba Ayub, Muhtaram Shah known as Shah Kator I, became the Chief of Chitral.

The present Mehtar is his Highness Saif-ur-Rehman who succeeded his late father in 1949. The young ruler is under training and the administration is carried on by a Board appointed for the purpose. The capital of the State is Chitral and the Ruler is entitled to a salute of 11 guns.

DIR

The territory of this State, over 3,000 sq. miles in area, includes the country drained by the Panj Kora and its affluents down to its junction with Bajaur Rud.

The present Nawab is Khan Bahadur Nawab Sir Mohammad Shah Jehan Khan. There are no Wazirs and the administration is carried on under the personal control of the Nawab.

The Nawab of Dir is also an over-lord, drawing tributes from a number of petty chiefs. In Dir proper live the Yusufzai Pathans while the non-Pathans are confined to the upper valley of Panj Kora known as Dir Kohistan. The river valleys are fertile and produce fruit in abundance. There are some forests on the flanks of the mountains wherefrom timber is procured and exported. The average annual revenue of the State is about Rs. 5,75,000 and the expenditure is about the same. This income is mostly drawn from the forest of Panj Kora Valley. The population of the whole State is a little over 250,000.

The State was founded in the 17th century by Mulla Ilias known as Akhund Baba, but real power was first acquired by his grandson, Ghulam Khan.

Recently much improvement has taken place in the State. A motor road has been constructed to join Dir to Malakand. A private telephone line has also been established between Chakdara and Dir.

SWAT

This small State is situated in the valley of river Swat flowing on the borders of the N.-W.F.P. The State can be divided into two sections, Swat Kohistan and Swat proper. The former is drained by the upper reaches of the Swat river and its affluents as far South as "Ain". The area of the State is a little over half of that of Dir, about 1,800 sq. miles and the population about 446,000. The annual revenue of the State is about Rs. 30,00,000 and the expenditure about Rs. 25,00,000. The lower valley is peopled by the Akazai branch of the Yusufzai Pathans while Swat Kohistan is peopled by Torwals and Garhwis. The fertility of the State depends upon the Swat river. The main commodity which is exported is fruit.

On the abdication of Miangul Gul-Shabzad Sir Abdul Wadud, K.B.E., his son Miangul Abdul Haq Jehanzeb, was installed as the new Wali of the Swat State on the 11th December, 1949. The new Ruler has been to college and taken a degree. Swat enjoys the reputation of being one of the best administered States in the Frontier and is financially stable. The Wali has been striving to educate the people so that one day they may be able to run the State administration themselves. There are no beggars in Swat. The State army paid by the State constructed the roads, helped the farmers in harvesting and did other odd jobs, but the State never took any unpaid work out of its people. The State is a surplus area in respect of food.

The Ruler's headquarters, Saidu Shareef, are 38 miles from Malakand and are linked with it by a motor road.

AMB

This State is situated in the upper valley of the Indus where the river divides the State territory into Trans-Indus territory and Feudal Tanawal. The latter section lies on the left bank of the Indus and occupies the centre of the western part of Hazara district. The area of the State is only 174 sq. miles and the population 47,910. The revenue of the State is about Rs. 3,55,000 and the expenditure Rs. 3,06,000. The main occupation of the people is agriculture.

Nawab Sir Mohammad Farid Khan, the present Ruler succeeded to the *gadi* in February 1936. There are no Wazirs (Ministers) and the administration is carried on by the Nawab with the help of Advisers. The Nawab maintains an arms factory where breach loading mountain guns and rifles and ammunition are made by hand.

The winter capital of the State is Durband and the summer capital Shergarh.

BALUCHISTAN STATES UNION

With the concurrence and guarantee of the Government of Pakistan, the Rulers of Kalat, Mekran, Las Bela and Kharan have entered into a Covenant for the formation of a Baluchistan States Union. The covenanting States have agreed to unite and integrate their territories into one State with a common executive, legislature and judiciary. The position of the Union will be analogous to that of a Governor's province.

There will be a Council of Rulers consisting of the Rulers of the covenanting States. The Council of Rulers will elect from among its members a President who will bear the title of Khan-i-Azam. He will hold office for a term of four years. The present Ruler of Kalat will be the President of the Council of Rulers of Baluchistan States Union during his life-time.

There will be a Legislative Assembly for the Union comprising 28 persons to be elected on the basis of adult franchise; 12 Sardars to be nominated by the Council of Rulers as follows: Kalat 8; Mekran 2; Las Bela 1; Kharan 1.

The Council of Rulers will appoint, with the previous concurrence and approval of the Pakistan Government a Chief Adviser who will be known as the Wazir-i-Azam. The Wazir-i-Azam will be responsible to the Council of Rulers for the good administration of the Union.

There will be a Kabina-i-Wizarat (Council of Ministers) to aid and assist the Council of Rulers in the exercise of its functions. The Ministers will be chosen by the Council of Rulers from the members of the Legislative Assembly.

The Wazir-i-Azam will be the Chairman of the Kabina-i-Wizarat and will hold the portfolios of Law and Order, Finance, Economic Development and Services.

Below we give short notes on each of the merged States as they were before the merger.

Kalat

Bounded on the west by Persia, on the east by Bolan Pass, the Marri and Bugti Hills, on the north by Chagi and Quetta-Pishin Districts and on the south by Las Bela and the Arabian Sea, Kalat, the biggest State in Baluchistan lies on the western border of Pakistan. It has an area of 30,799 sq. miles and a population of 166,654. It has an annual revenue of about Rs. 25,85,500 and an expenditure of about Rs. 17,20,000. Except for the plains of Kharan, Kachhi and Dasht in Mekran the whole country is mountainous. The main ranges of mountains are the central Brahui, Kirthar, Pab, Siahaw, and Central Mekran. They are intersected here and there by many small rivers the biggest of which is the river Rakhshan flowing from south to north.

The country consists of rugged, barren and sunburnt mountains, rent by chasms and gorges, alternating with arid deserts and stony plains, so that the whole State is deficient in water. The soil is sandy but here and there alluvial deposits of bright red clay are found in the northern parts of Mekran.

Permanent irrigation is possible only in the few tracts where water is obtained from karez, springs and rivulets of which there are not many; for the rest most of the vegetation depends upon the flood-water of the rivers.

The staple food of the people is wheat and jawar but on the coast of Mekran dates are consumed in very large quantity. Rice, barley, millet, tobacco, potatoes and melons are also cultivated on a comparatively small scale. Pomegranate, apricot, almond, mulberries, vine and apple are also grown and exported.

Marri, Kachhi and Sarawan are famous for the excellent breeds of their cattle and horses. Among the forest products are medicinal drugs, and gum Arabic. All these products are exported but not in large quantity.

A few minerals have been discovered but no schemes for developing them on scientific lines have yet been prepared. In the Sor Ranges of Sarawan coal is mined but it is not of superior quality. Good earth salt, which is a very profitable industry in Kalat, is obtained from swamps by means of lixiviation. Ferrous sulphate is obtainable in Jhalawan while iron ore, sulphur and petroleum are found at Shoran.

Cloth is made from cotton at Kachhi and Brahui. The womenfolk of these places are expert at needlework. Experiments in sericulture were conducted at Mastung but the industry could not thrive. Dark, coarse wool from sheep and goats is exported in large quantities. Fine and artistic embroidering, the Persian type pile-carpet making, manufacturing of leather goods, palm bags and mats are the commonest professions of the men and women in Kachhi, Mastung, and Kalat.

The people live in small villages in huts and tents.

Brahuis, Baloch, Dehwars, and Jats form the agriculturist class. "Loris" are artisans, while fishermen and seamen, who live on the Mekran coast come from "Meds" and "Koras" communities. The whole of the population is organized in tribes who usually pay their revenues in kind. Barter is still in vogue in some parts of the country. The languages spoken are Balochi, Brahui, Dehwari and Sindhi.

Before the birth of Pakistan, the revenue of the State used to be derived from three main sources:—(1) Subsidies and rents by the British Government according to the treaty of 1876; (2) Interests on the investments and (3) Land Revenue. From the first two the average annual income amounted to about Rs. 1,30,000. The land revenue is paid in kind, the rates varying from ¼ to ⅓ of the produce. There are some other taxes as well which bring the total rate of taxation up to almost ½ of the total produce. Zar-i-Kalang and Zar-i-Shah are also levied at some places. Transit dues and Octroi (Sung) are additional sources of income. The total average revenue is over Rs. 14,00,000 per annum.

The whole State is divided into 5 divisions, Kachhi, Sarawan, Jhalawan, Mekran and Kharan, the last being quasi-independent. In Mekran the Gichkis, Nausherwanis, Bizanjans and Marwaris are the principal holders of Jagirs. They enjoy almost complete independence in revenue, civil and criminal matters. But they are still under the suzerainty of Kalat in accordance with the practices of the feudal system.

The forefathers of the present ruling dynasty were under the suzerainty of Kabul, but during the Afghan War of 1838, they established direct relations with the British Government.

In 1854, their alliance with the British was further strengthened and the Kalat rulers came under complete British protection.

Beglar Begi Mir Sir Ahmad Yar Khan is entitled to a salute of 29 guns. He introduced constitutional reforms before his accession to Pakistan. The State's administration was, however, conducted with the assistance of a Wazir-i-Azam. Recently His Highness attended the meeting of the General Assembly of the United Nations at Lake Success, as a member of the Pakistan Delegation.

The capital of the State is Kalat; but for about four months of the year the Khan makes his winter headquarters at Dhadar in Kachhi, not far from Sibi. The State has recently added two more high schools, three middle schools and fourteen primary schools.

The State which until sometime back was absolutely without any regular means of communication is now closely linked with Quetta, Pasni and other places of importance in the neighbourhood.

The State acceded to Pakistan on March 31, 1948.

Las Bela

The State of Las Bela lies one hundred and fifteen miles to the north-west of Karachi. It is separated from Sind by the river Hub. The greater part of the State consists of the valley and delta of the Purali river. The area of the State is 7,043 sq. miles and the population 69,067. The average annual revenue is a little over Rs. 7,06,000 and the expenditure Rs. 6,64,000. The capital of the State is Las Bela.

The rulers of the State claim their descent from Abdul-Manaf of the Quraish tribe of Arabia. The name of the present ruler is Jam Mir Ghulam Qadir Khan. He ascended the *gadi* in 1937. He was educated in Karachi and the Aitchison College at Lahore. He was assisted in matters of administration by a Wazir. Civil and criminal cases are decided by the jirgas on the basis of customary laws. The Jam Saheb represents the Baluchistan States in the Constituent Assembly. The State acceded to Pakistan on March 17, 1948. The people are poor and apathetic.

This is the only other maritime State in Pakistan (besides Mekran).

Kharan

This small State lying in the south of Kalat has an area of 18,508 sq. miles and a population of 33,832. The revenue of the State is about Rs. 3,92,500 and the expenditure Rs. 3,30,900. The geographical and economic conditions are almost identical with those of Kalat.

of the Central Ministry of the Interior. Mr. A. T. Naqvi, formerly joint Secretary, Ministry of Defence has been appointed first Chief Commissioner.

Baluchistan is scheduled to have its first general elections in 1953. The status of a full-fledged province with an Assembly elected on the basis of adult franchise has been recommended for the area by a Special Committee appointed by the Constituent Assembly of Pakistan. The Government have accepted the recommendations of the Committee and necessary steps are being taken to give this the most backward area of the country its first responsible Government.

Another important step taken by the Government of Pakistan was the formation of the Union of Baluchistan States. The Khan of Kalat will be the Khan-i-Azam for life. Thereafter the post of Khan-i-Azam will be filled by election by the Princes of the various States comprising the Union.

LANGUAGE CONTROVERSY

East Bengal has had its own troubles. There was a demand for Bengali being made a State language along with Urdu. The occasion was provided by a speech by the Prime Minister of Pakistan, Khwaja Nazimuddin, in which he openly said that Urdu would be the State language of Pakistan. The students at once became agitated. There followed a wide-spread movement to make Bengali a State language along with Urdu. Congress members described the movement as spontaneous and genuine. The Government benches in the Dominion Parliament held that extraneous elements had taken advantage of the situation and started the trouble.

Three persons were killed and several seriously injured when the police opened fire in Dacca on the afternoon of February 21, 1952 on student demonstrators. The students had observed a general "hartal" in response to a province-wide call made by the State Language Committee of Action. Section 144 had been promulgated a day earlier.

On February 25, five persons including four M.L.A.s of East Bengal were arrested. They were Mr. Govindalal Bannerjee, Mr. Manoranjan Dhar, Mr. Khairat Hussain, Mr. Abdur Rasheed (Members of the East Bengal Legislative Assembly) and Mr. Abul Hashim, former General Secretary of the undivided Bengal Provincial Muslim League.

Mr. Dhar is the General Secretary of the Pakistan National Congress, while Mr. Bannerjee is the Chief Whip of the Congress Party in the East Bengal Legislative Assembly. Earlier Mr. Hamidul Haque Chaudhuri, former Finance Minister of East Bengal and the proprietor of "Pakistan Observer", an English Daily of Dacca had been arrested. The newspaper was banned.

The next day 28 more arrests were made. The arrested persons included another member of the East Bengal Legislative Assembly, Mr. Satindra Sen, bringing the total of M.L.A.s arrested to five. Others arrested included Dr. P. C. Chakravarty, a professor of the Dacca University, Mr. Ajit Kumar Guha, a teacher in the Jagan Nath College, Mr. Munir Chaudhuri and Muzaffar Hamid, also of the teaching staff of the University.

On February 27, the Dacca University was indefinitely closed. The resident-students of the University were ordered to leave the hostels. The number of arrested persons had now reached 41.

The East Bengal Muslim League Working Committee met and considered the situation and thought that "foreign agents" with sufficient resources at their disposal were "infiltrating" into East Bengal in alliance with the Jinnah Awami Muslim League and the Youth League and gave the verdict that the "disgruntled elements and political opportunists are trying to divert the movement to suit their personal ends".

Earlier the East Bengal Chief Minister had moved and the East Bengal Assembly had adopted a resolution recommending to the Constituent Assembly of Pakistan the adoption of Bengali as a State language along with Urdu. The Assembly was then prorogued and not allowed to carry on the discussion on the Provincial Budget. In a broadcast Mr. Nurul Amin said that his Government had no intention of stifling the constitutional expression of public opinion on the language or indeed any other question. He however held that according to evidence in possession of the Government what had happened had deeper significance than what appeared on the surface and that "some of the architects of the plan derive inspiration from outside Pakistan."

The language controversy had its repercussions in the western part of the country. Language newspapers especially 'Jang' and 'Anjam' went all out for Urdu and despite Government advice and pressure continued to publish extracts from the speeches of Mr. M. A. Jinnah where he had categorically stated that the national language of the country would be Urdu.

In the Constituent Assembly itself during the budget session, numerous resolutions were moved by Muslim League as well as Congress members to discuss the language issue. Some resolutions favoured the adoption of Urdu as the State language; others thought Bengali alone should be the national language, while the majority were of the view that Bengali along with Urdu should become the State language. One resolution moved by an East Bengal Muslim Leaguer, Mr. Lal Miah advocated the adoption of Arabic as the State language.

The Muslim League Party in the Constituent Assembly could not agree on any resolution and decided instead to defer the consideration of the issue. When Mr. Nur Ahmad moved his resolution that Bengali be declared a State language along with Urdu, Abdus Sattar Pirzada, the Food Minister introduced an amendment that the House postpone discussion of the matter. A general discussion did take place and members from both sides of the House expressed their views. The Assembly carried Mr. Pirzada's motion.

Later the East Bengal Government ordered a judicial inquiry into the circumstances of the firing to find whether the action taken by the police was justified or not.

The reports of other enquiries which are anxiously awaited are of the Commission appointed to investigate the circumstances of the assassination of the late Khan Liaquat Ali Khan and the Judicial Tribunal appointed to try the Rawalpindi Conspiracy accused. The report of the Rawalpindi Assassination Commission is already before the Government. The Home Minister, Mr. Mushtaq Ahmad Gurmani told the Dominion Parliament that the Govenment had not decided whether the report would be made public or not. The Pindi Assassination Inquiry Commission consisted of Mr. Justice Muhammad Munir, Chief Judge of the Lahore High Court and Mr. Akhtar Hussain, Financial Commissioner, Punjab. The trial of the accused has been completed and the judgment is now being written (May 1952).

RAISMAN AWARD

In the relations between the provinces and the Central Government an important landmark was the announcement of the Raisman Award. Sir Jeremy Raisman had been specially commissioned to go into the entire question of finances of the country and give his award. Its main points need reproduction below:

The Award gave 50 per cent of the proceeds of taxes on income except in so far as those proceeds are attributable to the capital of the Federation or to Federal emoluments, to the provinces in the following proportion: East Bengal 45%; Punjab 27%; Sind 12%; N.-W.F.P. 8%; Bahawalpur 4%; and remainder 4%. The share of the provinces in the initial year 1952-53 will amount roughly to Rs. 250 lakhs.

Sales Tax was previously centralised in agreement with provinces, subject to an allocation of roughly 50 per cent of proceeds to units. The Award gave permanent effect to this agreement. It also suggested that out of the collection of Sales Tax in Karachi, a larger share should be allotted to the provinces in West Pakistan than at present. The distribution is as follows: Punjab 54; Sind 16; N.-W.F.P. 10; Bahawalpur 4; Baluchistan 2. Under this proposal roughly 40 lakhs extra will be transferred to the provinces.

A compensation to the provinces for the share acquired by the centre in the proceeds of Sales Tax, the Award recommends that sums equal to one half of the net proceeds of Federal Excise duties in tobacco, betelnuts and tea be paid out of the revenues of the Federation to the units, the distribution being in accordance with the percentages recommended for income tax. The total amount to be transferred to the units during the initial year is expected to be in the neighbourhood of Rs. 250 lakhs.

Sir Jeremy Raisman recommended larger allocations of jute duties to East Bengal by way of providing further financial assistance to the provinces. He recommended that the additional duty of Re. 1 per maund on raw jute should be amalgamated with the basic duty of Rs. 3 per maund and the sum of the two should be taken as the export duty. Of the net proceeds of this basic duty, 62½ per cent should be assigned to East Bengal without an upper limit. As regards any further duty such as the additional export duty of Rs. 3 per maund which has been imposed since November 1, 1951, he has recommended that 10 per cent of the net proceeds be assigned to East Bengal. Under this formula East Bengal would get Rs. 1 crore per annum more than it was getting.

Subventions have been increased from Rs. 1 crore to Rs. 1¼ crores. The total transfers would thus be: East Bengal Rs. 324 lakhs; Punjab Rs. 158 lakhs; Sind Rs. 60 lakhs; N.-W.F.P. Rs. 80 lakhs; Bahawalpur Rs. 20 lakhs; Others Rs. 35 lakhs.

The Raisman Award has been incorporated into the Constitution by passing the necessary measures in the Constituent Assembly during its budget session in 1952.

ECONOMIC FRONT

On the industrial front an important step taken by the Government was the passing of the Industrial Finance Corporation Amendment Act. The amendment has extended the scope of the Act, originally passed in 1949, to embrace all industrial concerns for purposes of financial assistance by the Industrial Finance Corporation, irrespective of the fact whether they are public limited companies, co-operative societies, private companies or concerns owned by private individuals.

To provide credit facilities on a long term basis to agriculturists, the Agricultural Finance Corporation Act was passed. The Corporation will give loans in kind and cash and will co-ordinate and supplement the work of the country's financing agencies.

Another important measure passed by the House for the benefit of the refugees was the House Building Finance Corporation which will give loans for the construction of houses. The Corporation will be established with a capital of Rs. 5 crores divided into 500,000 fully paid up shares of Rs. 100 each. The dividends cannot exceed five per cent.

A strong movement has been launched at Governmental level for bringing the two wings of the Dominion culturally and socially closer to each other. An all-up air mail service has been introduced, fares by air and sea reduced and further reductions are being considered. Chartered steamers are being engaged to ply between Chittagong and Karachi. The need for such contact was felt more than ever after the language agitation in Dacca.

Food shortage was felt for the first time after the establishment of the Dominion. Certain areas came under rationing and the prices of foodgrains went up considerably. In Karachi itself the price of wheat went up from Rs. 7 per maund to about Rs. 14 per maund. The quantity of individual rations was reduced by 25 per cent on May 1, 1952. The procurement of foodgrains has been introduced in the two major food producing provinces of Punjab and Sind. Attractive buying prices have been fixed and the hoarding of more than stipulated quantities for household use, according to the size of the family, declared an offence. An early delivery premium of eight annas per maund in May and four annas in June has been announced to attract growers selling their produce to the Government during these two months.

The Food Minister repeated time and again that the shortage was not real but man-made. It was due to hoarders and smugglers that the foodgrains position in the country had become difficult. Khulna in East Bengal and Thar Parkar in Sind were declared famine stricken areas. There was general resentment among the people who thought that a country which normally exported foodgrains could not suffer from foodshortage without grave mishandling of the situation. With the coming into the market of the new wheat crop the shortage is expected to be made good and the food position in the country may once again become stable as before.

Before turning to Pakistan's relations with other countries, it is necessary to mention that two international conferences were held in the country during the year under review, the ECAFE Conference in Lahore and the Fourth session of the Consultative Committee of the Colombo Plan. Substantial economic assistance was given to Pakistan by member countries during the first year by Canada (10 million dollars), Australia (2 million pounds), New Zealand (250,000 pounds), and the U.S.A. (10 million dollars). Pakistan also received 1.6 million dollars from the Ford Foundation.

For the year 1951-52 the total expenditure on development by the Pakistan Government amounted to 577.6 million rupees. For 1952-53 it is estimated at Rs. 593.9 million. In addition expenditure on development by provincial Governments for these two years is estimated at Rs. 494 million and Rs. 512 million respectively. During the year 1952-53 provision has been made for the floatation of new loans to the amount of Rs. 100 million and a special drive has been undertaken to popularise the Small Savings Scheme.

During 1952-53 the development programmes estimated to cost a total of Rs. 1,106.7 million, will need about Rs. 500 million worth of imports. While it is hoped to mobilise the internal finance required external finance will be necessary for imports, particularly in view of the reduced prices of the country's exports and other commitments. Some assistance is expected from the International Bank for Reconstruction and Development with which a Loan Agreement for Railway Rehabilitation has been signed recently.

FOREIGN RELATIONS

An important move which came to nothing was a proposed conference of Prime Ministers of Muslim countries. The Pakistan Government proposed that a conference of the Governments of all Muslim countries might be held at Karachi or any other suitable place. Seven Governments (Turkey and Egypt were not among them) responded to the invitation and expressed their readiness to attend such a conference. It was originally proposed to hold the Conference in April 1952, but "owing to previous commitments of some Governments, it has now been proposed to hold it at a later date". No date has yet been finally settled. However, as a step to bring the Muslim countries closer to each other, the Governments of Egypt, Indonesia, Iran, Jordan and Pakistan agreed that with effect from February 1, 1952, postage on letters, post-cards, and packets sent by surface mail, should be leviable at inland rates.

The relations of Pakistan and India did not see any marked improvement. There was no deterioration either. The clenched fist, the symbol given to the nation by the late Khan Liaquat Ali Khan, after the Nehru-Liaquat correspondence on the alleged concentration of Indian troops on Pakistan borders was not taken up on a national scale. All the outstanding issues, the canal waters, the evacuee property, financial settlement and Kashmir, are still outstanding. On the financial front, there have been some signs of improvement. The officials of the two Governments have met to thrash out the issues and a meeting of Ministers sometime later was expected to yield some results. The agreement expressed by both India and Pakistan to the World Bank proposal may also prove useful in settling this issue.

Pakistan's change of policy towards Afghanistan is very striking. The "get tough" policy has been replaced by the "get friendly" one. After a lapse of over two years Pakistan announced the appointment of Col. A. S. B. Shah, former Secretary, Ministry of States and Frontier Regions, as her Ambassador to Pakistan.

In the United Nations Pakistan is now concerned with the Tunisian case before the Security Council to which Pakistan was elected at the beginning of 1952.

On Kashmir Government's attitude can be summed up in the words of the Foreign Minister: "I share the frustration and disappointment, but Government will not relent in its pursuit of an early settlement through peaceful means; but if peaceful means should become utterly of no avail they would have to consider what course was open to them next."

The Opposition parties especially the Azad Pakistan Party represented by Mian Iftikharuddin strongly criticise the foreign policy followed by Sir Zafrullah Khan and describe it as subservient to Britain.

KHYBER Pass : One of the gateways into Pakistan from Afghanistan is situated 10½ miles west of Peshawar in the North-West Frontier Province. The Pass is rich in historical association as it was the route by which all of the sub-continent's invaders swooped down on the inhabitants for conquest or plunder. It still remains a great highway for continental trade between India and Pakistan on the one hand and the countries of Central Asia on the other. On Tuesdays and Fridays one could see long caravans of men and camels laden with merchandise of every description passing into and from Afghanistan.

Hotels : Dean's Hotel, Peshawar. Telegrams: "Deans". Telephone : 81. The last addition to a list of first class hotels in the group of Associated Hotels of India, Ltd.

Lahore : One of the most ancient and famous cities of the sub-continent is the capital of the Punjab Province. The city has been notable since the 11th century when Babar the first of the Moghul dynasty made it a place of royal residence, the remains of which are found in the tombs, mosques, pavilions, and pleasure gardens of the city. But, the man who laid the foundations of the city's greatness was the Emperor Akbar. Today the city is almost wholly Muslim with a population of 849,333. *Places worth a visit :* 1. Ranjit Singh's mausoleum, 2. Jehangir's and Nurjehan's tombs, 3. Tomb of Asaf Khan, 4. Tomb of Anarkali, 5. Guru Arjun's Shrine, 6. Badshahi Masjid, 7. Sunheri Masjid, 8. Wazir Khan's mosque, 9. Moti Masjid, 10. Minto Park, 11. Shalimar Gardens, 12. Lawrence Gardens, 13. Gulabi Bagh, 14. Museum, 15. Zoo, 16. Chauburji, 17. The fort. The chief means of conveyance are cars, taxis and hackney carriages. *Clubs :* 1. Cosmopolitan Club, 2. Gymkhana Club, 3. Punjab Association club, 4. Y. M. C. A.

Hotels : Braganza Hotel.

Faletti's Hotel ; Telegrams : "Falettis." Telephones: 2635 and 3392. Maintains its old traditions of a comfortable and de luxe hotel.

Napier Hotel.

Stiffie's Hotel.

Lahore is on the North Western Railway and is connected with Karachi.

Mohenjo-Daro : The ruins of Mohenjo-Daro (the Domain of the Departed) are situated eight miles by car off Dorki station on the Kotri-Larkana branch of the N. W. Railway. Indian archæological history dates from the 3rd century B.C. The excavated remains in Mohenjo-Daro belong to the last city, which had been built on ancient cities which are suspected generally to be lower than the water-level. Excavations of the lower strata may be expected to yield the remains of a still older period.

It is a very remarkably well-planned city. All the streets were laid south to north as nothing is more welcome to an Indian city than the south wind. Homes were two-storeyed and the staircases lead not to the lower storey but to outside. This feature is not unknown in the houses in the hills. Covered balconies or open porticoes are conspicuous by their absence. The courtyards are somewhat small.

Proximity of the dwellings points to a very crowded city. Mohenjo-Daro is a city of bricks, fire-burnt and sun-burnt. It had probably stressed more on drainage than any other ancient city. Evidence of underground drains are to be found everywhere. They are large and high and provided with manholes. The vastness of the drainage surely reflects the greatness of the upper structure, now very much lost to view. It is not known, however, whether the drains led to any common dumping place away from the city, although soak pits have been noticed, but from their size one cannot be sure that they were used as the main dumping grounds. Bathrooms are another feature significant of the cleanliness of the city.

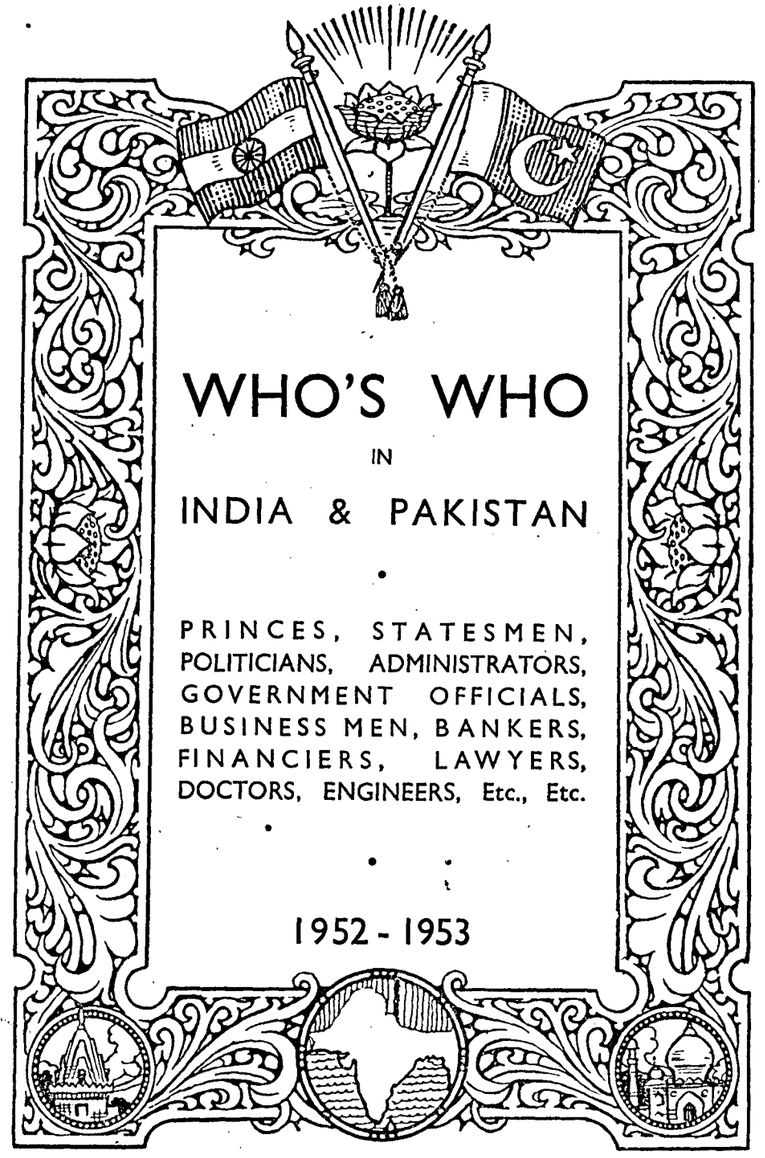
The objects found in the remains mainly consist of seals, jewelleries, potteries, figures (human and animal) and toys. The seals have on them inscribed characters of a conventionalised form of pictograph writing, which have not yet been deciphered. Most of them are of steatite and are square. The more common animal is difficult to identify. It has features both equine and bovine, with one horn only.

Murree : Hill station in the Punjab, is about 40 miles from Rawalpindi and is 7,500 feet above sea-level. It lies on the main road leading into Kashmir from Pakistan. In pre-Partition days it was the summer headquarters of the Northern Command, and was a great social and sports centre. *Places worth a visit :* 1. Kashmir Point, 2. Panch Pandu Park, and 3. Pind Point. The Himalayan views are an additional attraction. The chief means of conveyance are rickshaws, dandis, horses and buses. *Clubs :* 1, Mountain View Club, 2. Rawalpindi Club.

Hotels :

Cecil Hotel, Murree. Grams : "Cecil". Phone : 247. Situated at the top of hill—lovely view—all the comforts.

Flashman's Hotel, Rawalpindi. Grams: "Flashmans". Phone : 201. When in Rawalpindi, stay at Flashmans. All the comforts.



Viewforth Hotel.

From Rawalpindi the journey is usually made by car.

Taxila : Seat of a famous Buddhist University in the 7th century, is situated about 20 miles north-west of Rawalpindi. The Indian name literally means stone-cut city of the Takka clan. The remains are actually of three cities within three and a half miles of each other. The epics record that Rama's brother Bharata conquered this territory and the capital took its name from his son Taksha. It is believed that the great snake-sacrifice recorded in the Mahabharata was held at Taxila.

Taxila presents historical records extending over a period of about 1,000 years, from the 4th or 5th century B.C. to the 5th century A.D. Seven different peoples ruled at Taxila. Achæmenian and Alexandrian suzerainty have left almost no records. The Mauryan records consist mainly of almost primitive punch coins (they may be of an earlier date), jewelleries and lapidaries, which surely indicate that Indians were in that age the greatest masters in the treatment of the most refractory stones, and gold and silverworks of refined workmanship.

The most imposing pile at Taxila is the Dharmarajika or the Great Tope (Stupa). It is also known as Chir (split) tope, because of the cleft driven through its centre by former explorers. Around it there are a number of Stupas, Chaityas, Viharas, etc. The construction of the group extended over four centuries (2nd-5th). The original stupa was built in the Scytho-Parthian period and enlargements were made in the Kusha period. The most important architectural features are trefoil arches and Erothian pillars.

ABDUL Rahim, A., Founder and Proprietor, Popular Sola Hat Works, a leading Hat Manufacturing Concern in Western, Southern and Eastern India. *b.* 1920, *s.* of A. Abdul Subhan, retired business man of Madras State; *m.* Miss Aysha Begum; four *d.* and one *s.*; *Educ.:* North Arcot Dist. Has been taking active interest in business and industry: actively participates in social affairs; Pres., Bombay Hat Manufacturers' and Traders' Assoc.; member, Indian Merchants' Chamber, Bombay and Indian Manufacturers' Assoc., Delhi; Military, Naval, Govt. and Railway Contractor and Exporter & Importer. *Address:* C/o Popular Sola Hat Works, Baria Building, opp. Crawford Market, Bombay 3.

ABDULLAH, Sheikh Mohamad, Prime Minister, Jammu and Kashmir; popularly known by the name of Sher-I-Kashmir. *b.* 1905, in Soura, *near* Srinagar; *m.* Begum Abdullah; *Educ.:* Srinagar; Jammu; graduated with distinction from Lahore; M.Sc., Aligarh Univ.; while at Kashmir College he formed a Students' Union, 1927. Was a science teacher in the State High School; initiated a regular campaign for responsible Government, crystallising in the formation of the Kashmir Muslim Conference; created political consciousness among the people and took the opportunity of converting the Muslim Conference into the National Conference in 1938; launched the 'Quit Kashmir' movement, 1946, which aimed at compete democratisation of Kashmir; was put in prison; elected Pres., All-India States Peoples Conference; released, 1947; organised a Peace Brigade to maintain communal harmony in the State; organised national defence against the tribal raiders; was invited by the Maharaja of Kashmir to be the Head of the Emergency Administration at the time of the signing of the Instrument of Accession; member, Kashmir Delegation from India to the U.N.O.; M.P. for Kashmir till 1952. *Address:* Srinagar.

ABID Ali, Deputy Minister for Labour, Govt. of India. *b.* 1900, *s.* of late Jaferbhai, Business man; *m.* Zarina; three *s.* and one *d.*; *Educ.:* Received very little school education but got education in jails during several years of jail life. Resigned Govt. service and joined non-co-operation movement, 1921; Secy., C.P.P.C.C., 1923-24; Secy., Indian Assoc., Singapore; because of anti-Government activities was deported from Singapore and Malayan territories; on return to India joined the Bardoli struggle, 1928; General Secy., B.P.C.C., 1929-34; organised and conducted Salt Satyagraha; General Secy., Reception Cttee., Indian National Congress, 1934; organised relief in Bihar on behalf of the B.P.C.C. for earthquake sufferers, 1934; one of the founders of the I.N.T.U.C. and its Vice-Pres.; Founder & Office-bearer of a large number of Trade Union Organisations; took part in all national struggles and jailed several times; Member: A.I.C.C. for many years; Bombay Leg. Council for several years; Board of the Bombay State Road Transport Corporation; Bombay Housing Board since inception; Chairman, Divisional Cttees. of the State Transport Corpn. *Recreation:* Social Service. *Club:* National Sports Club of India. *Address:* Central Secretariat, New Delhi.

ABRAHAM, Emmanuel, Ethiopian Minister in India, since May 1949. *b.* March 17, 1913; *m.* Ellen Alemayehou; one *s.*, Amenti and two *d.*, Ruth and Sarah; *Educ.:* Tafari Makonnen School, Addis Ababa. Headmaster, Asba-Tafari School in Harar Province, 1931-35; Secretary, Ethiopian Legation in London, 1935-40; Secretary-in-Charge, Ethiopian Legation in London, 1940-42; Director-General, Ministry for Foreign Affairs, Ethiopian Govt., 1943-44; Director-General of Education, Ethiopian Govt., 1944-47; Delegate to the San Francisco Conference on International Organisation, 1945; Delegate to the General Assembly of the United Nations, New York, 1947, 1949 and 1950. *Recreations:* Reading; Walking. *Club:* Delhi Gymkhana Club. *Address:* Imperial Ethiopian Legation, New Delhi.

ACHARYA, Bejoy Krishna, B.A. (Hons.) (Econ.) (Calcutta), Dy. High Commissioner for India at Dacca. *b.* May 1, 1912, *s.* of Dr. Prankrishna Acharya, a prominent physician and social reformer of Calcutta; *m.* Smt. Nilima *née* Mukherji; two *s.*; *Educ.:* Calcutta & London Universities. Entered I.C.S., 1936; held charge of several important Bengal districts like Howrah, 24 Parganas, Bakarganj & Darjeeling; served as Dewan of Tripura & Dy. Chief Commissioner, Himachal Pradesh. *Recreations:* Motoring; Photography. *Clubs:* Delhi Gymkhana Club; Darjeeling Gymkhana Club; Dacca Club. *Address:* Baitul Aman, Mymensingh Road, Ramna, Dacca.

ACHARYYA, Chintamoni, M.A. (Gold medalist), LL.B. (Calcutta Univ.), Vice-Chancellor, Utkal Univ., Cuttack, since Oct. 1948. *b.* Dec. 9, 1893, *s.* of late Choudhury Braja Sundar Patjoshi; *m.* Srimati Ratnamani Devi; three *s.* and one *d.*; *Educ.:* Ravenshaw Coll., Cuttack; Presidency Coll., Calcutta; Univ. Law Coll., Calcutta. Advocate for 31 years; Govt. Pleader and Public Prosecutor and Govt. Advocate for 12 years; Part-time lecturer in Law for 12 years. *Publications:* Author of several publications in English, and Oriya such as books on History, Law and other literary matters. *Recreations:* Rotary activities. *Address:* Vice-Chancellor, Utkal University, Cuttack (Orissa).

ADARKAR, Bhaskar Namdeo, M.A. (Cantab.), B.A. (Bombay Univ.), B.A. (Cambridge), M.A. (Cambridge), Member, Tariff Commission, since Jan. 1952. *b.* May 18, 1910, *s.* of N. V. Adarkar and Mrs. Adarkar; *m.* Sarala Wagle (1935); two *s.* and one *d.*; *Educ.:* Wilson Coll., Bombay; Gonville and Caius Coll., Cambridge. Agent, Bank of India, Ltd., Bombay, 1938; Research Officer to the Economic Adviser to the Govt. of India, 1938-40; Chief Research Officer, 1940-41; Under-Secy. to the Govt. of India, Commerce Dept., 1941-43; Asstt. Economic Adviser to the Govt. of India, 1943-45; Dy. Economic Adviser to the Govt. of India, 1945-49; Member, Indian Tariff Board, June-November, 1949 and May 1950—Jan. 1952; Secy., Reconstruction Cttees., 1941-43; Govt. of India's Delegate to Preparatory Cttee. on Trade and Employment Drafting Cttee. of that Cttee., Havana Conference on Trade and Employment, ECAFE Sessions and meetings of the I.T.O. Interim Commission and Contracting Parties to the General Agreement on Tariffs and Trade; Vice-Chairman, Drafting Cttee. on Trade and Employment (1947). *Publications: Indian Tariff Policy; Devaluation of the Rupee; The Gold Problem; History of the Indian Tariff;* and several official publications. *Address:* Tariff Commission, Bombay.

ADVANI, Pritamdas Bhojraj, M.Sc. Tech. (Manch.), M.I.E. (India), A.M.I.E.E. (Lond.), J.P., Consulting Engineer and Industrial Adviser. *b.* May 21, 1891; *m.* Parpati Vaswani. *Educ.:* Hyderabad, Sind, & Manch. Univ. Engr., Bombay Office of Metropolitan Vickers till end of 1919 and later Mgr. till Aug. 1928; Director of Industries, Govt. of Bombay from August 1928 to Jan. 1944; Chairman, Board of Direction for Technical Education and Industrial Training, Bombay till Oct. 1944; Chairman, Board of Trustees, Victoria Jubilee Technical Institute, Bombay, 1938-48; member, Bombay Legislative Council, 1932-36; on special duty in U.S.A., 1939 in connection with proposal for the establishment of the automobile industry in Bombay Prov.; Member of Senate, Bombay University, 1931 to 1945; Member, Central Board of Irrigation and Power; Electrical Commsr., Govt. of Bombay, 1944-51. *Address:* "Oceana," Marine Drive, Bombay.

AGA, Jamshed Burjor, F.I.I.A., M. Inst. R.A. (Lond.), F.I.A.A. & S. (Lond.), M.I.S.E., G.D. Arch., Corporate Architect and Surveyor. *b.* Oct. 27, 1916; *Educ.:* After passing the Matriculation, obtained Govt. Diploma in Architecture being the youngest in India then. Fellow of the Indian Institute of Architects, and Member of the Indian Society of Engineers; is also a Fellow of the Association of Incorporated Architects and Surveyors of London, being the youngest Indian to acquire this distinction at the time; member, Institute of Registered Architects (Lond.), Chartered Insurance Institute; Partner, Shapoorjee N. Chandabhoy & Co., Architects, Engineers, Surveyors, and Fire Loss Assessors; Director and Committee Member of several Institutions; Charter Member, Rotary Club, Satara; Ex-President, Satara Suburban Municipality; is a Freemason and also founder of some Lodges. *Clubs:* Royal Western India Turf, Ripon, Bombay Presidency Radio, Mahableshwar, Satara and Poona. *Address:* Advani Chambers, Sir Phirozshah Mehta Road, Bombay.

AGA KHAN, Aga Sultan Mahomed Shah, P.C. (1934), G.C.I.E. (1902), G.C.S.I. (1911), G.C.V.O. (1923), K.C.I.E. (1898), Hon. LL.D., Camb. *b.* 1875. Brilliant Star of Zanzibar, 1000, 1st Class; has many religious followers in East Africa, Central Asia and India; head Ismail Mahomedans; granted rank and status of first class chief with salute of 11 guns in recognition of loyal services during European War;

led the Indian Delegation to the League of Nations Assembly in 1932, 1934 and 1935; accorded the unique honour of being the first Indian President of the League Assembly, 1937; celebrated the Golden Jubilee of his accession to the *gadi* of Imam, 1936; made an honorary citizen of Cannes, April 1947; presided over the League of Nations Session, Sept. 1937; celebrated the Diamond Jubilee of his Sultanate, 1945. *Publication: India in Transition. Address:* Aga Hall, Bombay.

AGARWALA, Amar Narain, M.A., B.Com., Reader, Faculty of Commerce, Allahabad University. Some time Dean, Faculty of Commerce, and Head of the Depts. of Economics and Commerce, Univ. of Sagar, M.P. *b.* July 8, 1917; *m.* Rajeshwari Agarwala; *Educ.:* Christian Coll., Lucknow, K.P.I. Coll., Allahabad, and Univ. of Allahabad. Had a brilliant academic career, winning most of the prizes and scholarships including Queen Empress Victoria Jubilee Medal (highest academic distinction, Allahabad Univ.); an economist of balanced and national views; an expert on social security and economic planning; his book *Samajvad ki Ruprekha* recognized the best book in Hindi on Socialism by Sahitya Sammelan (1939) which gave him the Muraraka Prize for it; regular contributor to many learned journals in India and foreign countries including *Economic Journal* (London) and *International Labour Review* (Montreal); was for some time on deputation in the Labour Dept., Govt. of India; associated with 21 economists in issuing a Manifesto on Government's monetary policy in 1946; edited a symposium on *Position and Prospects of India's Foreign Trade* with the co-operation of Trade Commissioners and on *Indian Labour Problems* containing articles of India's 24 leading labour experts; Mg. Ed., *Indian Journal of Economics*, Organ of the Indian Economic Association, 1943-1947; Mg. Ed., *Indian Journal of Commerce*, Organ of Ind. Commr. Assn.; Member of A. U. Committee of Courses and Studies, Faculty of Commerce, Academic Council and Court; Member: Board of Studies, Sagar Univ.; Examination Cttee., Patna Univ.; Secy. and Founder-Member, Indian Commerce Association; Founder and Research Secy., Indian Research Assocn., devoted to research and literary activities. *Hobbies:* Journalism, cinema and tennis. *Publications: Social Insurance Planning in India, Health Insurance in India, Pessimism in Planning, Socialism without Prejudice,* etc. *Address:* Kundu Gardens, Allahabad.

AGARWALA, Justice Chandra Bhan, M.A., B.L., Judge, Allahabad High Court, since May 14, 1948. *b.* 1897, *s.* of L. Munshi Lal; *Educ.:* St. Stephen's School, Delhi, Hindu College, Delhi and Calcutta University; Matric from Delhi, 1914; B.A. with Honours from Punjab Univ., 1918; M.A. in 1920 and B.L., Calcutta Univ., 1921.
