COIMBATORE DISTRICT

GUIDE TO THE RECORDS FROM 1799 to 1835

CHAPTER I.

INTRODUCTION.

1. *The Records.*—The records of the Coimbatore district which are available in the Madras Record Office consist of 105 volumes relating to the period from 1799 to 1835. The following appear to be missing from the series :—

(a) Letters from the Board		1799-800
(b) Letters from the Government		1831-3

The series of volumes between 1821-35 is a recent accession, a fact which accounts for a break in the series of volume numbers.

2. *The Table of Contents.*—The table of contents for all the volumes up to the year 1820, which consist mostly of the letters to and from the Board and Government, contains a precis of all papers except reminders and covering letters which have no intrinsic importance. Pressure of time has prevented the preparation, for the present, of a table of contents for the volumes 5176-208 which relate to the period 1821-35.

3. Chapter III contains a list of such reprints of the more important documents as are in the possession of the Record Office. The list is not confined to the period covered by the volumes but includes all available reprints, which run as late as 1878.

CHAPTER II.

HISTORICAL SKETCH.

1. *Physical Features.*—The district of Coimbatore is a sub-montane area extending over more than 7,000 square miles, forming part of the great plain of the Carnatic but including also to the south, the range of the Anamalais, to the west a portion of the Western Ghats and to the north numerous ranges which guard the approaches to the plateau of Mysore. Considered in relation to the main mountain range of Southern India, its position on the east of it is analogous to that of the district of Malabar on the west. The Eastern and Western Ghats gradually approach southward to a point which separates the two districts. To the south of the Nilgiris, they unite across the 'Palghat gap' and then climb the mountain ranges again to impinge upon the States of Cochin and Travancore. The line of division running from north to south through the forest of Walayar is singularly clear cut. As we cross from the west to the east, we emerge from a climate of constant humidity to one of exceptional dryness, from the flora of the lantana to that of the opuntia, from a hill to a plain country. The language changes, the people change and the stock and cultivation change. The contiguity of the two districts has brought about a close connexion between them in historic times, but has been unable to overcome or seriously modify differences in culture which are based on fundamental differences of physical condition and possibly of origin also.

2. *Early History.*—There is much that is obscure about the early history of the Coimbatore district. The earliest traces of civilization are to be found in several places in the stone built tombs containing an artistic type of pottery and sometimes of iron implements. Ptolemy refers to Karur, the capital of the

Chera king, and it is generally supposed that Coimbatore formed, with the plains of Malabar, the kingdom of Chera with its capital at the modern Karur in the Trichinopoly district. In the 9th century, we find the ruling kings of the Kongu dynasty displaced by the Cholas. In the 11th century, the Hoysala Bellal kings from Mysore gained the upper hand. In the 14th century, the district fell with the rest of South India under the sway of the empire of Vijayanagar. In the 17th century, it was annexed to the kingdom of Mysore and in 1799, on its capture by the British, it became part of the Madras Presidency.

3. *Pre-British Administration.*—During the 16th and the early part of the 17th century such government as existed was administered by local Poligars. They levied a lump sum on each village in the shape of land revenue, collected kaval fees to pay for the privilege of protection from crimes against person and property and carried out public works by means of forced labour. During the 17th century Chikka Deva Raja of Mysore carried out a field survey. Haider Ali, in the 18th century, appears to have collected the whole of the land revenue in money. Certainly he raised the level of the assessments and his son Tippoo raised it again by 25 per cent, so that during the forty years of the Mahomedan period the cultivated area gradually diminished.

4. When the British first took over the district, they divided it for purposes of administration into two divisions. North Coimbatore lay north of the river Noyil; South Coimbatore comprised the rest of the district. Major Macleod in North Coimbatore undertook a new survey and valuation of lands in 1800. His object was to maintain the total land revenue demand from each village but to distribute it more equally between the individual ryots. The result of this survey was to expose the gross inaccuracies of the existing survey and to bring to light vast areas of concealed cultivation. In South Coimbatore, Mr. Hurdis proceeded along different lines. He endeavoured to estimate the capacity of the soil to produce crops and to assess it regardless of Tippoo's beriz. The assessment that emerged from these operations in South Coimbatore was too high and that in the North was still more so. But before the assessment of South Coimbatore could be given a fair trial the era of experiment began. The attempts to introduce a permanent village settlement failed utterly, so that in 1816 Mr. Sullivan cancelled all the leases on account of fraud. He then introduced the ryotwari system. In 1817 Mr. Thackeray made his proposals for the introduction of a patkat settlement, that is, a settlement based, not on the field as unit, but on the holding. His idea was to assess the holding at a rate to be fixed for an extended period of years and then encourage the ryot to improve his land. The weakness of the system was that the ryot was compelled to include in his farm a certain proportion of poor land and was not permitted to relinquish it.

5. The early ryotwari system, as practised in Coimbatore, was not free from certain defects, the most serious of which was the restriction on the free relinquishment of land. At first the ryot was compelled to cultivate and pay tax for certain poor land, whether he wished to or not. Later on this practice ceased, but he was still subject to an indirect compulsion, not being allowed to relinquish bad land unless he relinquished at the same time a certain proportion of good also. Gradually the system was purged of its weaknesses and approximated to the form which it universally bears today and under which the district has steadily prospered. "In this district, the history of the land revenue, while comparatively uneventful, is very interesting, since the system has been purely ryotwari throughout, except for three years, the assessment has been comparatively moderate, every modification has been entirely in favour of the ryot, and but for one or two anomalies and restrictions, the system appears to have more nearly corresponded with that of the ideal ryotwari district of Sir Thomas Munro than any other in the Presidency. Roughly speaking, the progress of the system has been from comparative restriction to almost absolute freedom, from the practice of sharing profits even on the ryot's capital to entire relinquishment of everything except the fixed assessment, from a somewhat inquisitorial settlement to complete non-interference with individuals."

CHAPTER V.

TABLE OF CONTENTS.

The Table of Contents arranges the volumes in the order in which they are found in the catalogue. Certain series run parallel with or overlap others in point of time.

2. Each paper is headed by a brief title in thick type and most of them bear a sub-title in ordinary type. For a few entries it has been found convenient to use a place or personal name as a main head, e.g., many papers relating to the extensive frauds perpetrated in the Revenue Department appear under the head 'Kasi Chetty'. If the student wishes to collate such references by subject and not by place or personal name, he will find the necessary information in the sub-title. Most titles are particular (rather than general, as in the District Office Manual), but a Key to the Table of Contents has been added to assist the process of collation.

3. Considerations of space demand that all unnecessary matter be excluded. Unless otherwise indicated a paper concerns an individual case. Orders or discussions of general application are specially indicated if their character is not clear from the context. The designation of a correspondent is specifically stated only when it is of special importance and is not clear from the context.

4. Where, in any particular volume, more than one reference appears to the same subject, it has sometimes been found convenient to abandon a strictly chronological order in the table of contents and to group these references together, thereby saving space and assisting the student to collate his material.

5. The spelling of words of Indian origin has generally been modernized in the title but left in the précis as it stands in the original. Abbreviations are sparingly used. Examples are, 'f' for fasli, 'O.C.' for Officer Commanding, 'Rt.' for regiment, 'Bn.' for battalion. The names of the months are indicated by the first three letters of the word.

6. To save space and printing, page numbers, when consecutive, have been coalesced thus, 17-20, 21, 22-3 would be printed 17-23. The page numbers do not, therefore, necessarily correspond precisely with the dates opposite which they are printed.

KEY TO THE TABLE OF CONTENTS.

This Key to the Table of Contents gives a list of each heading which is printed therein in thick type, except those consisting of place or personal names. In addition to this most of the heads are grouped under the main administrative classifications to which they belong.

1- 3-02	Sandalwood China market. The Board forwards a letter from the Select Committee of Super Cargoes at Canton and states that sandalwood sells well in China and asks for the largest possible supply by the least expensive mode of conveyance.	45-53
8- 3-02	Poligars Carrying of arms. From the Board. Government, with a view to restore complete peace and order in the Southern Province, restrict the use of arms by the poligars. "The military service heretofore rendered by the Poligars and Sherogars having been suppressed, and the Company having in consequence charged itself with the protection and defence of the poligar countries, the possessions of fire arms and weapons of offence is manifestly become unnecessary to the safety of the people. The Right Honourable the Governor in Council therefore orders and directs all persons possessed of arms in the provinces of Dindigul, Tinnevely, Ramanadhapuram, Sivaganga and Madura to deliver the said arms, consisting of muskets, matchlocks, and pikes to Lt.-Col. Agnew, the officer now commanding the forces in those provinces." The Board forwards a copy of a regulation enacted for regulating the revenue derivable from the monopoly or exclusive sale of tobacco in the provinces of Malabar and Canara and a copy of its report to Government on the subject. 3. Regarding the Collector's proposals the Board states as follows :— "The measure of furnishing through your agency, the supply of tobacco required for the consumption monopoly of Malabar and eventually of Kanara, may be effected without enacting a particular regulation for the purpose, since under the regulation for that monopoly, the importation of tobacco is prohibited excepting on account of Government." 4. The Board asks the Collector— (a) How far, other provinces in which there exists no monopoly are dependant for their supplies of tobacco on Coimbatore. (b) What has been the extent of exportation in previous years. (c) Whether the same exportation will continue if the export price is raised. (d) How the proposed plan is viewed by the cultivators of tobacco. 5. He suggests :— (a) That the rent of every village shall be reduced to the average collections of seven years. (b) That the rent fixed upon waste lands by survey, shall be reduced in the same proportion. (c) That the cultivated lands which have yielded the fixed rent, shall be made over to the ryots to improve to the utmost. (d) That the waste land shall be made over to them upon the reduced rent whenever they demand it of their own accord. (e) That no ryot shall be compelled to cultivate, but that every one shall have a perfect freedom of choice. (f) That all the inhabitants of a village shall be answerable for the fixed rent. He states that this system will shortly render the inhabitants wealthy, and enable them to pay their rents with punctuality and ease. He solicits the orders of the Board to try his method in as many villages as possible in his district. The Board states that it has no objection to the proposed system, if it can be formed without considerable reduction in revenue, and with the hope of punctual collection. It issues further instructions as to the mode to be observed in reserving and renting waste lands. It authorizes the Collectors to commence generally with a septennial settlement, convertible into a perpetual lease in the course of its progress. 20- 1-12	Permanent Settlement Introduction of. From the Board. At the end of the triennial lease, the Board proposed to settle the villages in perpetuity and accordingly asked the Collector to take steps to introduce a permanent settlement. It explains the settlement as follows :— “The settlement which they were desirous to establish was a fixed grainwar settlement—a standard rent—to be determined upon a calculation of the average collections of former years, the general capabilities, and permanent resources of each village. “The principle of the proposed plan was to limit rather than to lower the assessment upon the villages—it involved at least no considerable remissions—the object as already stated was to keep the land revenue to the average of former years’ collections, and to abstain from taxing eventual improvement. “The principal feature of the plan proposed was the fixing the demand of Government at a limit beyond which it was never to be extended (though under particular circumstances it might be abated) and the principal advantage proposed by the measure was the simplification of the revenue system by rendering unnecessary the constant resort to temporary settlements. It was at the same time hoped and expected that the high advantage resulting to the renters from the knowledge of the amount which they could be called upon to pay, would give them a permanent interest in the improvement of the land if not a proprietary right in the soil.”	82-126

Decennial Settlement		
26- 3-12	Introduction of. From the Board. 1. Government inform the Board that the system of collection adopted under the native government had degraded and impoverished the inhabitants. They neither cared to acquire property nor to store grain. At the end of the triennial lease the bulk of the people were in a state of depression, having no inducement to improve or extend the cultivation of the land. So Government with a view to adopt a system which will afford a permanent incitement to industry and improvement of cultivation, desired to fix the public demand on lands in perpetuity. 2. They therefore ask the Board to conclude a decennial settlement in every village where satisfactory terms can be obtained, and to declare the same permanent, if it meets with the approval of Government and the Court of Directors. The current season was bad and they ask the Board to fix the revenue and to make such temporary arrangement as may be necessary. The detailed rules relating to the settlement should be framed as soon as possible and the rights of the parties concerned defined. 3. They forward a copy of the minutes of consultation of the Honourable the Governor in Council on the subject. The Board communicates these records with a copy of its detailed proceedings in the matter to the Collector for guidance.	180-269

	Permanent Settlement—cont.										
	3. To arrive at this average the Board desires to adopt the average of the collections of the seven years immediately preceding the triennial lease or from f. 1211 to f. 1217 inclusive as constituting the best and surest basis for the permanent settlement, so far as the northern division of the district is concerned.

	6. On these general principles the Board asks the Collector to enter into a decennial lease, with the following rent for the first five years:—										
	<table><tr><td></td><td>Division.</td><td>St. Pag.</td></tr><tr><td></td><td>Northern</td><td>322,810</td></tr><tr><td></td><td>Southern</td><td>227,190</td></tr></table>		Division.	St. Pag.		Northern	322,810		Southern	227,190	
	Division.	St. Pag.									
	Northern	322,810									
	Southern	227,190									
	and the following for the next five years and for permanent rent—										
	<table><tr><td></td><td>Division.</td><td>St. Pag.</td></tr><tr><td></td><td>Northern</td><td>340,000</td></tr><tr><td></td><td>Southern</td><td>245,000</td></tr></table>		Division.	St. Pag.		Northern	340,000		Southern	245,000	
	Division.	St. Pag.									
	Northern	340,000									
	Southern	245,000									
	7. The Board leaves it to the discretion of the Collector to apportion the rent to the several villages in the district, so as not to reduce the aggregate amount of the rent.										
	8. The Board hopes that this system of limiting of the demand will be an incitement to industry and will also lay the foundation of the real prosperity of the country.

	Tobacco Monopoly—cont.	
	The Board wanted to reward the Collector and his assistants by a suitable compensation for their extra work in this branch. For this purpose it recommends to Government that the Collector of Malabar should be asked to submit at the end of every year a statement of revenue derived from the tobacco monopoly. On receipt of this the Board states that a suitable recompense can be made to the Collector and his assistants in Coimbatore by charging it to the monopoly. Government approve the Board's proposals. 29- 7-13	Tobacco Monopoly Cochin supply. 1. The Rajah of Cochin was receiving his supplies of tobacco from Coimbatore direct. After the establishment of the monopoly, it was found prejudicial to allow the Rajah to continue receiving his supplies direct. An arrangement was therefore made according to which he should receive his supplies through the Collector of Malabar. After this system had continued for three years, the Rajah found that it was not to his interest. 2. The Resident in Travancore proposed to revert to the old system of getting supplies direct from Coimbatore. The Collector and the Board discussed the matter at great length, and came to the conclusion that the Rajah's right to obtain the tobacco as before could not be questioned. 3. The Board reports the circumstances to Government and states that any change in the existing system may renew the evils formerly experienced and recommends the continuance of the present system by reducing the price of the tobacco to a figure at which the Cochin Government is likely to be able to get it from elsewhere. 4. Government approve the recommendations of the Board and state that the price at which tobacco is to be supplied in future to Cochin, should be limited to the prime cost and charges, together with the established duty upon its exportation from Coimbatore. 5. 8- 9-1813	Tobacco Monopoly Administration report. The Board asks the Collector to report the nature of the working of the monopoly in the district under his charge. The Board resolves to authorize the Collector of Canara to procure the future supplies of tobacco from the Mysore country, since it does not want to force upon the inhabitants of Canara the consumption of Coimbatore tobacco which they do not like. The Board remarks that the present monopoly price in Canara is too high and that it should be regulated in such a way as to enable even the lowest classes of inhabitants to resort to its use. number.**Military Supplies—cont.**

2. The Commissary-General considers that "this change would no less than abrogate the whole of the existing system for providing for the undefined wants of troops when marching and would devolve on the Commissariat the additional, numerous and complicated duties of obtaining all the supplies of every detachment however small, by complying with the demand of individuals for coolies, carriages, etc., at all times and in all parts of the country, and of effectually preventing injustice by means of these servants, which, with all the influence of local authority and with all the power of the Police establishments, the natives deputed by the Collectors are understood to have been unable to effect."

3. He adds that such a transfer as proposed would not promote the object in view and would give rise to greater abuses. He states that the existing system with such slight changes as is found necessary by experience will serve the purpose. Government agree with this view and desire to make certain changes in the existing rules to prevent abuses.

4. On the recommendation of the Commissary-General they resolve "that when a corps or detachment shall be ordered to proceed from one station to another it shall be their duty to provide in the first instance sufficient means for the conveyance of their baggages for the whole period of their intended march; and that such parts of the Regulation III, A.D.1810, as relate to the supply of bearers, coolies, carts and cattle at any intermediate place, shall be applicable only to the case of such deficiencies as may arise from desertions or from casualties."

12-11-13 ——— The Board communicates these orders to the Collector and also asks
30-11-13 the Collector to appoint a native officer to follow the troops and attend to the supplies. 68-78

Misconduct

22-10-13 Revenue servants—Punishment of. 43-67
Embezzlement of public money as well as extensive combinations among the native servants for purposes of fraud, bribery and corruption frequently occurred. This was attributed to the inefficiency of the provisions then existing for the punishment of these offences. The Board therefore proposes to modify and amend certain parts of Regulation XXXIII of 1802, with a view to provide more adequate punishment for these offences. It forwards a draft of the amended regulation to the Collector for his remarks.

Revenue Defaulters

6-11-13 Sanctuary in Mysore. 83-97
In the matter of recovery of revenue due from persons who have taken refuge in Mysore territories, the Collector states "that the only measure likely to prove effectual is to re-establish between the Company's Government and that of Mysore, the ancient practice of mutually returning all emigrant ryots of every description whether defaulters or not".

But Government suggest the more lenient measure of compelling only absconding defaulters to return to the country from which they have fled.

The Board communicates these orders to the Collector.

Tobacco Monopoly

16-11-13 Judges' strictures on. 98-124
The Judges of the Court of Circuit state that the operation of the tobacco monopoly has caused considerable injury to the morals of the inhabitants of Coimbatore and Malabar and that the inhabitants are forced by the regulation to undersell their produce of tobacco to the Circar at fixed rates.
The Board communicates the views of the Judges to the Collector and asks him to take immediate steps to obviate the injurious effects described by them.

Extra Revenue		
24- 4-15	Management proposals. From the Board.	211-327
	The settlement of the land revenue, on the decennial lease system, which is eventually to become permanent, was made exclusive of all personal and professional taxes, licences, house and shop taxes, etc., and generally of every species of revenue not immediately arising from the produce of the soil. The Board obtained from the Collectors of the Ceded Districts a draft regulation, upon which it framed the following two regulations :— (a) "A regulation prescribing rules for the assessment and collection of veesabuddy, moturpha, sundry, personal and professional taxes in Ceded Districts." (b) "A regulation for the collection of revenue derived from the taxes variously called Moturpha, Swarnadayam, Pullaputtada, etc., for the resumption of the said taxes, in the cases in which they have been included in the permanent assessment of the land revenue of certain provinces, and for extending generally to the provinces, certain provisions of Regulation I." Regulation I, which is applicable to the Ceded Districts, was approved by Government and ordered to be given effect to. The Board communicates copies of the reports of all Collectors where the revenue has not been permanently settled, and its own proceedings on the subject of the regulation and collection of different taxes on income, trade, etc., called by the names of Moturpha, Veesabuddy and Swarnadayam, to the Collector. It states that these records will afford the Collector, necessary assistance to give his views in respect of the introduction of the proposed regulation in to Coimbatore and asks him to offer his suggestions to promote the object in view. It adds, that the gradual extension of the principles of these regulations will cause considerable improvement in this branch of revenue under consideration.

But the rule grants exemption to judicial officers when taking leave for short periods during Dasara and Mahuram, to political, revenue, and commercial officers for leave not exceeding six weeks in a year and all public officers when going on medical leave. The Board communicates these rules to the Collector.	360-1

The Collectors of the districts in the southern division made representations to the Board, that the prices of foodstuffs have fallen very low and that the revenues cannot be realized without causing hardship to the inhabitants. 2. number.**Garrow, Mr. G.—cont.**

2. The Board recorded their evidence at length. It came to the conclusion that the present complaints are the outcome of a conspiracy that exists in the district against Mr. Garrow and his servants. It states that the discharged native servants of Government joined together and set up some of the discharged monigars and karnams to make this false complaint. The chief allegation is that the Collector, with the help of his treasurer, has made unauthorized collections to an extent of Pag. 5,30,000.
3. The Board finds that there is absolutely no truth in the allegations made against Mr. Garrow. But the general accusations against the Collector's treasurer and native servants demand an investigation in the mode prescribed by Regulation I, A.D. 1809 and V, A.D. 1811.
4. This enquiry should be confined to the following points :—
 - (a) Whether or not any extra assessments have been levied on the country in the years 1811, 1812 and 1813 and if by any native servants, for what purpose and for what use.
 - (b) Whether or not restrictions have been imposed by any native servant on the sale of ghee and, if so, for whose benefit and to whom have the profits accrued.
 - (c) Whether any sale of village offices (such as monigar, karnam) was made and, if so, by whom and for whose benefit.
 - (d) Whether payments for supplies were withheld.
 - (e) Whether there was any oppression in the tobacco monopoly, and whether Kasi Chetty was engaged in trade, etc.
5. The Board proposes that the present Collector Mr. Bell may be directed to open a strict enquiry on the several subjects above mentioned and to bring the offenders to book. It communicates a copy of its report to Government on this subject to the Collector, Mr. Bell, and asks him to await the orders of Government.

In reply to the Collector's request to transfer Govinda Rao, Sarishtadar, from Chingleput to Coimbatore, the Board states it cannot do so, since a man with local knowledge is necessary for Chingleput. 14- 9-15	Revenue Departments Abuses in. From the Board. 1. Mr. Bell, acting Collector, having learnt the existence of serious abuses in the tobacco department in the district suspended some principal servants of the department. The Board confirmed the suspension and ordered an enquiry into their conduct according to the regulation. The Head Assistant Collector, Mr. Whish, who was deputed to make the enquiry, finds that other abuses exist and, in some parts of the district, the suppression and mutilation of public documents. He finds it difficult to conduct the enquiry in addition to his own regular work and so suggests the appointment of a committee for this purpose. 2. The Board considers that an enquiry into this affair by a committee will be against the provisions of the law, and, therefore, recommends to Government the appointment of another experienced revenue assistant to help the Collector. The Board forwards a copy of its letter to the Collector and states that Government orders on the subject of enquiry will be communicated as soon as orders are received.	175-90

Settlement		
14- 9-15	Fi. 1221—3, The Board's report. The Board submits to Government its report on the settlement of the district for fi. 1221—3. The revenue of the district was on the decrease during the period and a heavy balance remained uncollected. There was a considerable increase in the revenue defalcations, irregularities by revenue servants, concealment, combination and fraud. The Board forwards a copy of its report to Government and asks the Collector to explain the decrease in revenue and the heavy outstanding balance. He should report the progress made in introducing the decennial settlement and should revise the rents of villages which have been fixed very low on the basis of false accounts of produce and resources.	175 190-243
Misconduct		
19- 9-15	Tahsildar of Perundurai. From the Board. The Board reviews Mr. Bell's report on his investigations into the misconduct of Tahsildar Annavaiah. The Tahsildar admits the offences committed by him, and states that all the unauthorized collections from the inhabitants were made for Kasi Chetty the Collector's treasurer, and under his orders. Thus a sum of Pag. 32,000 was collected at different times and paid into the hands of the people belonging to Kasi Chetty. The Tahsildar's confession is supported by evidence recorded by the Collector. From this, the Board concludes that extra collections were widely made in the district and that Tahsildar Annavaiah is responsible. The enquiry further brought to light the use of money from the public treasury for the purpose of private trade in ghee and cotton. The Board directs the Collector to take steps to recover the amount both from Kasi Chetty and Annavaiah under Regulation XXXIII of 1802. It authorizes him to suspend the Sarishtadar who was partly responsible for these abuses and other native servants who were involved in them.	244-77
Village Rents		
18- 9-15	Revision of. From the Board. The enquiry into the misconduct of the native servants brought to light that 67 villages were rented by Kasi Chetty the treasurer, and 8 by the Sarishtadar. The Board suspects that the rents of these villages have been fraudulently and corruptly lowered. It asks the Collector to revise the rent of all such villages, with a view to realize the lawful revenue due to Government.	269-77
Salt		
18- 9-15	Supply from Malabar. From the Board. In the matter of the introduction of a system for the supply of marine salt to Coimbatore by means of water carriages from Tanjore, the Collector of Trichinopoly explains the inexpediency of the measure and the risk and injury that might be caused to the natives employed in that trade. The Board therefore opines that the attempt of Mr. Garrow to introduce marine salt from Malabar may be successful. So it asks the Collector to report the steps already taken in the matter and the expediency or otherwise of renting the supply on a contract system, free from all Government interference.	278-309
Misconduct		
21- 9-15	Revenue servants. From the Board. The Board issues further instructions for the conduct of the enquiry into the abuses and asks the Collector to report the result of his enquiries into the conduct of the Tahsildars who were kept under suspension. It also informs the Collector that it had not granted permission to Kasi Chetty to proceed to Madras to give the information required by the administrator to the estate of the late Mr. Garrow.	310-7

21- 9-15	Kasi Chetty Unauthorized disbursement. From the Board. Kasi Chetty, Treasurer, issued an advance of Pag. 13,000 in March 1815 for the purchase of tobacco required for the monopoly. This was considered to have been made without due authority. So the Board asks the Collector to proceed to recover the amount from Kasi Chetty, if he cannot prove that the amount was duly spent on public account. It also informs the Collector that Mr. Whish, the then Assistant Collector, is personally responsible for any eventual deficiency that may not be recoverable from Kasi Chetty.	318-24
28- 9-15	Collector's facsimiles. From the Board. The Board informs the Collector that the possession of Mr. Garrow's facsimiles by Kasi Chetty has attracted its attention. He must explain how he came into possession of them. If its improper use can be proved the Board asks the Collector to commit Kasi Chetty for trial before the Court of Circuit for forgery under Regulation VI of 1811. The Board asks the Collector to urge on all native subordinates who are involved in the various abuses that a full and ample confession will secure them some leniency and that they should be prepared to suffer in proportion to their guilt. It also asks the Collector to "ascertain the extent of embezzlement and fraud committed on the public revenue or on Government by any act of public servants, and the extent of the private extra collections made from individuals for corrupt purposes or for the benefit of individuals in situations of public trust." It asks the Collector to proceed against Kasi Chetty according to law for the recovery of the public accounts that may be in his possession. It issues general instructions to him in the matter of dealing with other kinds of abuses and offenders in the district.	325-48
28- 9-15	Decennial Lease From the Board. Informs the Collector that no reduction in rent is possible and that he should discourage all expectation of a reduction in the standard fixed for the decennial lease.	349-65

The Collector therefore annulled these arrangements and introduced the ryotwar settlement in its place. The Board reports these circumstances to Government and also informs the Collector that his proposals are recommended for approval by Government.	97-9
19- 2-16	Treasury Verification of balances. From the Board. With a view to prevent defalcation of public money the Board directed the Collectors to make a periodical examination of the balances in taluk treasuries. In reply to this Board's direction, Mr. Ross, Collector of Cuddapah, suggests certain improvements. The Board forwards an extract from Mr. Ross's report to the Collector and asks him to state whether that system can be adopted in his district without objection.	100-9
4- 3-16	Appeals Revenue servants. From the Board. With a view to avoid the inconvenience resulting from the receipt of a large number of appeals from revenue servants who are either suspended or dismissed, the Board invites the Collector's attention to Regulation I, A.D. 1809 and V, A.D. 1811 and asks him to be careful in providing full information in each case for the Board's consideration.	110-2

22- 4-16	Regulations for the conduct of. From the Board. The Board explains to Government the several embezzlements and unauthorized collections and exactions, that have taken place in the Company's territories and proposes the introduction of a special regulation to empower Collectors to enquire into these abuses and to inflict severe punishments on native servants proved guilty of them. At the same time, the Board reports "that however severe the penalties enacted for the punishment of these offences may be, they must in the end prove totally ineffectual unless some measures are at the same time taken to apply a remedy to the root of the evil by diminishing the inducements which at present so powerfully operate to the commission of these crimes." The Board ascribes the tendency to corruption to (a) defects of education, (b) uncertain tenure of employment, (c) uncertainty of promotion and (d) smallness of pay. As for the improvement of the education of native servants, the Board suggests the establishment of a seminary in every district for the education of native public servants, particularly Brahmins, with the view to improve their moral principles and attach them to Government. Their allowances should be increased and they should be eligible for honorary distinction, grants of shrotriems, and promotions in service. Government approve these recommendations of the Board. The Board communicates a copy of the regulations and the correspondence on the subject to the Collector and asks him to submit a list of all servants in the district who deserve promotion, and to give effect to the graduated scale of allowances granted by Government to the head native servant of the district.	243-337

The Board observes that this situation arose on account of the indiscriminate grant of licences by the Collector for tobacco cultivation and that, by his action, he has exposed the Government to eventual loss. So the Board asks the Collector to permit the ryots to dispose of their tobacco to individuals privately subject to the payment of the usual duties and to purchase all the remaining stock at the rates fixed by him for supply to Malabar through contractors.	446-53

The Board reports to Government "that although the evidence against each is by no means equally conclusive, and the guilt of several has neither been established nor fully investigated, the Board had no alternative left to them than to issue a general order for the dismissal of the whole indiscriminately, leaving it to the present acting Collector to re-employ such as he may deem entitled there-to when opportunities occur." Government generally agree with the Board and state "that the grounds on which native servants are to be dismissed must be established after a deliberate investigation and by a judicial process conducted before the authority possessing the power of dismissal." The Accountant-General communicates the proposal to the Resident and asks for his views in the matter. The Resident states in reply that "the plan of granting bills on Coimbatore will certainly, if properly managed, be beneficial to the commerce there, and to the merchants of this place, but endeavours will be frequently used to obtain orders from Mysore on the Coimbatore treasury to exchange Mysore coins for those of the Company as the latter generally bring a premium." He therefore suggests the issue of bills only to merchants trading in particular articles. 3. 	Ryotwari Settlement	
21-12-18	Mr. Thackeray's report reviewed. 1. In reviewing the report of the Collector the Board states that it illustrates the unsatisfactory state of the ryotwari system as pursued in Coimbatore. 2. The assessment in many instances is excessive, is very unequal, and liable to vary according to the purpose for which the fields are appropriated. "The whole of Mr. Thackeray's report demonstrates that the ryotwari settlement in Coimbatore is only in name what it professes to be, that it taxes the ryot, not the land, that it forces land upon him against his will, and that as he improves his land, the demand on him increases." It is on the whole a struggle between the ryots, and the revenue officers. The Board considers that all cultivators should have entire liberty to occupy or abandon land, as they wish. 3. It also suggests a reduction in the assessment, abandonment of the system of levying additional tirvai or assessment on improvements, reduction of assessment on all pasture lands by one-fourth and the equalization of the rates of assessment between the two divisions of the district. 4. With these observations, the Board submits the Collector's reports to Government and recommends that the Collector may be directed to modify the cowle, according to its suggestion.	53-98

The Board communicates these orders to the Collector, states the several items of expenditure for which permanent sanction is necessary and asks him to submit detailed account in a given form in respect of the charges under those items.	101-25

15- 2-19	Medical Inams Control of native practitioners. From the Board.	126-36
	1. With a view to utilize the services of all native practitioners for the benefit of the public, the Medical Board suggests to Government that all native practitioners who are in receipt of inams, maniums, or other allowances for rendering medical aid to inhabitants should be made to work under the superintendence and control of the European Medical Officer. They should be trained and given proper instructions in the administration of European medicines. If this is done the Medical Board opines that the prevalence of epidemics can be arrested more quickly. It also suggests that the allowances, pensions or inams that may be due to these native practitioners should be made payable only on a certificate and recommendation of the European Medical Officer under whom they will be working. 2. If this proposal meets with the approval of Government it asks for a list of all persons who are receiving concessions on condition of the performance of medical duties. 3. The Board communicates a copy of the Medical Board's letter and asks the Collector to report whether any grants of this or any former Government in money or in land, are held by natives on condition of the performance of medical duties and, if so, to name the individuals and the value of the grant.

26-5-1819	Kasi Chetty Suit by. From the Board. Kasi Chetty was the late Treasurer during Mr. Garrow's time. A case of embezzlement was brought against him, besides several complaints of exaction and unauthorized collection in the district. A Committee consisting of Col. Thomas Munro and John Sullivan was appointed to investigate the several complaints against Kasi Chetty and other revenue servants of the district and to deal with the culprits suitably. The Committee found Kasi Chetty responsible for the embezzlement of large sums of public money. They attached his properties, sold them in auction and began to collect the amount. Kasi Chetty now files a suit in the Supreme Court, against the Commissioners and the East India Company. The complaint states that the Commissioners have acted contrary to rules in attaching and selling his properties and thereby he has incurred a great loss, that he was not responsible for any loss, and that all the acts done by him were under the orders of the then Collector. It also explains several abuses practised by the Commissioners and their servants in dealing with his properties. The present suit is for the recovery of all his properties. The Collector again explains his original recommendations in detail and states that there is practically no such interference in the proposal and on the other hand there is every chance of preventing the merchants from increasing the price of salt in combination with others. He adds that Government by this interference can regulate the supply to the consumption in the district and can also fix the price of salt at a uniform moderate rate. These letters were seized from the records of the taluks, and they go to show the enormous influence which the man wielded. He practically exercised the powers of the Collector and the whole establishment of public servants was in awe of him. The Sarishtadar was unable to explain the real state of the country and was in complete subservience to his orders. 3. In the taluks so far examined, Kasi Chetty was found to have held either solely or jointly the rents of 67 villages and the Sarishtadar those of 8 villages. 4. In these circumstances the Collector recommends the institution of a prosecution in the Zilla Court against Kasi Chetty for the recovery of the several sums alleged to have been received by him from different monigars. 5. 22-9-17	Settlement Proposals. To the Board. 1 <i>Inequality of rates.</i> The Collector informs the Board that at the time of survey, the lands in some cases have been assessed too high and in some too low. This will cause a loss to Government, for the ryots will tend to throw up highly assessed lands and to concentrate their attention on lands assessed low. 2 The Collector does not suggest any sudden changes in the system but proposes to insist that the ryots shall occupy the lands, they have usually occupied and pay the usual rent. In regard to the future settlement, the Collector hopes to induce the ryots to come to some permanent terms, and to take the lands forming their putcut farms or estates, for 20 or 30 years.	6-10
26-9-17	Kasi Chetti Property attached. To the Board. The Collector explains the nature of the security given by Kasi Chetty in Court and states that the bonds and other accounts attached for the recovery of the amount due from him, may be returned to him.	11

26-9-17	Monigars Remuneration in land. To the Board. In f. 1226 Mr. Sullivan, the then Collector directed that waste lands should be assigned to monigars instead of ready money payments. This was introduced in some villages and in others the usual money payment was continued. There were complaints from monigars, that the lands assigned to them were not fit for cultivation in some cases and in others they were assigned too late in the year to admit cultivation in that year. So the revenue fell into arrears. The Collector made an enquiry and suspended the demand in deserving cases. To secure uniformity he recommends that the lands assigned under Mr. Sullivan's arrangement may be continued, where there is no objection from monigars and that in other cases, ready money payments may be continued.	13-7

4-10-17	Annual Settlement F. 1227. To the Board. The Collector submits his report on the nature of the settlement made by him for f. 1227. The assessments are unequal. The ryots being allowed to throw up their lands as they please they naturally give up, all highly assessed lands. This will eventually lead to loss of revenue to Government. The Collector does not favour a wholesale remission of rates, which would cause alarm, confusion and expense.	25-57

	Annual Settlement—cont.	
	He thinks that the safest course is to get the ryots to come to some permanent agreement for the lands they usually occupy and for the rent they usually pay.	
	On this principle, he submits a draft cowl which gives the ryots the right to hold their usual putcut lands at the usual rent for 20 or 30 years and to become a permanent putcut ryot, constituting himself and his heirs as the sole proprietor of the putcut lands. They are to have full right over the lands to sell, mortgage, or dispose of as they please and also to make improvements, etc. The settlement is to remain in force for a period of 20 or 30 years or until a revision of the settlement for the whole province shall take place.	
	He states that lands in Erode taluk have been assessed very high during survey and recommends reduction in rates.	
	He proposes to let out all waste lands to such inhabitants as may voluntarily come forward at the usual rate of revenue.	
	He recommends exemption from house-tax to all those who hold lands under the permanent putcut system.	
7-10-17	Misconduct Tahsildar of Andoor. To the Board. The Collector urged that these documents were of very great importance to the case, and that their authenticity could be proved from the evidence of persons by whom they were written. Further, the documents came into possession of Government, in the course of attaching the property of Kasi Chetty according to the Regulations and its relevancy was not also questioned by the plaintiff. In spite of these representations the Court refused to admit the documents. There was also an increase in the revenue under abkari and piece-goods trade. The increase in the latter was attributed to the discontinuance of the Company's investment. The reduction in f. 1228 was made on the produce of the lands ascertained from the ryots themselves. The villages were arranged in four classes according to their produce and a gradation was established to determine the sorts in each village.
