

MONTHLY
RAINFALL
OF
INDIA
FOR
1929

Published by the various Provincial Governments

AND ISSUED BY

THE METEOROLOGICAL DEPARTMENT.

CALCUTTA : GOVERNMENT OF INDIA
CENTRAL PUBLICATION BRANCH
1931

Price Rs. 16-9-0.

PREFACE.

The registration of rainfall in India has always been carried out under the control of provincial authorities, and the Director-General of Observatories is only a consulting officer in connection with this work. Daily rainfall data for provinces are in general printed by local Governments in their gazettes as soon as figures are available, and these printed statements form the source of prompt information to the public. Subsequently the Meteorological Department collects all the statements throughout India and binds them into volumes for permanent record. The present volume contains monthly and annual rainfall for more than 3,100 stations over the Indian Empire.

Symons' rain-gauges were in use at the great majority of stations, the only important exceptions being the Mysore and Travancore rain-gauge stations, which are provided with rain-gauges of local construction. The rainfall is measured at all stations daily at 8 A.M.

It may be noted that these statements are prepared in most cases by local officers appointed by the Provincial Governments, and that they are published in the first place in the Provincial Gazettes. Copies are sent to the Meteorological Office, Calcutta, which arranges through the Government Press for their combination into volumes and for their issue to the recipients. The Meteorological Department is hence not responsible for the accuracy of the data. Great attention is, however, now paid to the correct registration of rainfall in India by the Provincial Governments, and it is believed that the returns are as a whole reliable.

The tables are arranged, as far as possible, in the order of the provinces adopted in the Indian Daily Weather Report and the other publications of the Meteorological Department. They are drawn up in a form which practically explains itself. It should be noted that, although the rainfall is measured to hundredths of an inch, a "rainy day" is assumed to be that on which a tenth of an inch or upwards has fallen, and the figures in the column "Total number of rainy days" and "Normal total number of rainy days" are calculated on this assumption.

It may be noted that the available rainfall data of India were originally collected and tabulated in the Meteorological Office, Calcutta, in the year 1888, and that the average monthly rainfall and number of rainy days in each month, were calculated from this tabulated information for all stations for which at least five years' rainfall statistics were available. These averages were used in the tables of Volumes I to XI of this "Rainfall of India." In 1901 the additional data for the period from 1889 to 1900 were utilised, and fresh normals based on the whole of the available data up to the year 1900 were prepared; in the great majority of cases the normals depended on the records of 30 to 40 years. The preparation of averages based on records as far as 1910 was begun in 1911, and from October 1911 inclusive these new normals were used in the returns of Assam and Eastern Bengal. The normals revised up to 1910 for the whole of India were published in 1913 in Volume XXII, Parts I and II, of the Memoirs of the Indian Meteorological Department and were brought into general use from January 1914. A further revision of the rainfall normals from all the available records up to 1915 was effected in 1917, and the new normals were introduced from January 1918. In the returns of Bihar and Orissa revised normals of number of rainy days were used from August 1918 and in those of Bengal from December 1918, while in the other returns the normals of 1910 were employed throughout the year. From January 1919, however, these new normals were used for all the provinces and no change was effected till December 1922. Another fresh revision of the normals was in the meantime undertaken from data extending up to December 1920 and in the volume for 1923 these latest normals, both of rainfall and the number of rainy days, were employed in the case of Kashmir, the North-West Frontier Province, Baluchistan, Rajputana and Central India. In the volume for 1924 the new normals were employed throughout for all divisions except Hyderabad, where the change in the normals was introduced from 1st December 1924. Since then no change has occurred in the normals.

The district averages of actual and normal rainfall published in the monthly and annual rainfall tables were not strictly comparable with each other prior to 1928, as the normal averages were based only upon the number of stations for which normals had been determined while the actual averages were based on the full number of stations in the district.

To make the two comparable, both the district averages have been based, from 1928 onwards, upon the stations for which normals are available.

METEOROLOGICAL OFFICE,
POONA.
The 1st June 1931.

C. W. B. NORMAND,
Director-General of Observatories.

TABLE OF CONTENTS.

Monthly and annual rainfall for 1929.

	Stations.
1. BURMA	234
2. ASSAM	133
3. BENGAL	262
4. BIHAR AND ORISSA	320
5. THE UNITED PROVINCES	285
6. THE PUNJAB	194
7. KASHMIR	41 with corrigenda.
8. THE NORTH-WEST FRONTIER PROVINCE	35 with corrigenda.
9. BALUCHISTAN	82 with corrigenda.
10. RAJPUTANA	182 with corrigenda.
11. CENTRAL INDIA	98 with corrigenda.
12. THE CENTRAL PROVINCES AND BERAR.	245
13. BOMBAY PRESIDENCY	310
14. WESTERN INDIA STATES AGENCY	28
15. BARODA STATE	12
16. HYDERABAD	19
17. MYSORE	73
18. MADRAS	544

RAIN-RECORDING STATIONS IN BURMA FOR THE YEAR 1929—contd.

‡ Eight years' average.

RAIN-RECORDING STATIONS IN BURMA FOR THE YEAR 1929—contd.

(a) Meteorological Observatory.

(b) Public Works Department Rain-recording Stations,

* Six years' average.

† Seven years' average.

† Eight years' average.

|| Revised figures.

STATEMENT SHOWING THE MONTHLY AND ANNUAL RAINFALL

RAIN-RECORDING STATIONS IN BURMA FOR THE YEAR 1929—concl'd.

[illegible]

Exclude figures for Kyauktaw station. c No observation from 12th to 15th June owing to floods.

† Six years' average.

(a) Meteorological Observatories.

||. Revised figures.

* Five years' average.

N=Not ascertained.

d No observation from 12th to 24th June due to the place being flooded.

RANGOON, 14th June 1930.

G.B.C.P.O.—No. 4, C.S.L.R., 21-6-1930—271.

H. O. REYNOLDS,

Commissioner of Settlements and Land Records, Burma.

Table showing the Monthly and Annual
Rainfall at 133 Rainfall-recording Stations
in the Province of Assam for the year 1929.

Table showing the Monthly and Annual rainfall at 133 rainfall-record stations in the province of Assam for the year 1929.

* Rainfall return not received.
 ? This sign is shown in the columns for normal rainfall against those stations for which "normals" have not been established; in the columns for total rainfall and number of rainy days it means that owing to the records being incomplete the totals are not known.

* Rainfall return not received.
 ? This sign is shown in the columns for normal rainfall against those stations for which 'normals' have not been established; in the columns for total rainfall and number of rainy days it means that owing to the records being incomplete the totals are not known.
