THE British community in India is noted for its lack of flair for politics. Indeed, the community has often prided itself on this negative virtue. For the very deficiency may reasonably be supposed to denote the possession of the sterling qualities that go to make up a highly talented class of businessmen. But business never functions in a political vacuum. And there have been many occasions in which British businessmen in India have deplored their lukewarm interest in Indian politics and have felt called upon to take special measures to ensure that their political influence is kept unimpaired. These efforts, while they have, no doubt, helped the community to safeguard its interests whenever political developments tended to threaten them, have not yet had the effect of creating that capacity for independent political thought which is indispensable in the disturbed conditions of the present.

I am tempted to ponder over the position of the British community in India *vis-a-vis* the Indian political situation and Indo-British relations, as I believe that the British have committed one of those grave errors of judgment, the very avoidance of which would have been a singular contribution to the solution of the problem on hand. I trust I have indicated fairly clearly that it is not positive action that I am thinking of, so much as the avoidance of the kind of irritant which the Bengal Chamber of Commerce has thought fit to give to the public by sending its letter to the *Statesman* on its relation to the editorial policy of the *Statesman* and the views expressed by Mr. Arthur Moore. The President of the Committee of the Chamber has observed that it has been necessary to publish an explicit disclaimer of Mr. Moore's speeches. And the *Statesman's* articles are not a matter of yesterday. They have been a feature of our politics for nearly two years, though it is only recently that Mr. Moore proceeded to London and started to express his views at Home. The Chamber has waited all this time to express its dissent in a statement which, as I shall show presently, contains more than this avowed disclaimer. The European Association said the same thing a month or so ago. And the effect of the Bengal Chamber's letter on the country may be gauged from the fact that the Indian Chamber has thought fit to give a reply to it. It is clear from this reply that the Bengal Chamber has, whether it intended it or not, done far more than clarify its position in relation to Mr. Arthur Moore or the *Statesman*. It has stirred up the political antipathies which, unlike the major political parties in India, the Bengal Chamber should have left undisturbed.

I will not, at this stage, go into the merits of the issues raised by the letter of the Bengal Chamber. I have my ideas about the lines on which the British community in India should endeavour to build up constructive thought of its own, one which is determined by its appreciation of the situation in India, by its natural anxiety for its own interests in the country both in the near and the long view. I will put myself, let me assure my European readers, in their position and think out the problem from their standpoint, not that of a nationalist Indian, which unfortunately is, though it hardly need be, very different. It were wrong, not to say, unavailing, of an Indian to say, "These are the views which you should adopt". It were perhaps adding insult to injury, to follow it up by saying "And these views are most in your interest". But an attempt to show that, historically, the British community in India have been strangers to independent political thinking, that the conditions in which they can leave this thinking to be done for them either by the officials in India or at Home are long gone, that it is impossible in the nature of things that the Government of India or the British officials or politicians at Home can be adequately aware of all the conditions and considerations that are important to the British commercial community in India and that the community should do better than accept the views of others *mutatis mutandis*, such an attempt I say, is entitled to careful consideration at the hands of the leaders of British commerce.

Let me analyse the relation of the British community and Indian politics during the last half a century. I am certain that in the early stages of British rule there was no distinction between officials and non-officials among the British in India. Both deemed themselves the standard-bearers of the Empire. Both were full of colour prejudice. Both alike were free from vexatious problems of the way of treating Indians. Once in a way, when an Ilbert came up with a Bill far in advance of the time, the whole community rose in opposition to it. A Viceroy like Lord Ripon alienated officials and non-officials alike. That phase was perhaps the longest in the history of British India. In this question of the relation of the British community to Indian politics, what is important is how and when a difference

of viewpoint between the officials and the non-officials arose. Obviously, the difference could arise either in the economic or in the political sphere or both. Official policy might alienate the non-official Briton either by going further in the way of political concessions than the non-official would like or by pursuing economic policies which are harmful to British business interests. The former contingency has never arisen till now, as the British Government has not allowed itself to be outdone in political conservatism by its non-official representatives in India. Threat to economic interests has often made its appearance in a feeble form ; but opposition to Government proposals has been tempered by the knowledge that the Government is even more solicitous of British business interests than British businessmen in India and that no concessions would be made to Indian businessmen in excess of what was found to be politically expedient.

How, then, did it come about that the British community suddenly found it necessary to tone up the political side of its activities to the point of sending paid men to the Legislature? The answer is simple, that the need arose not from the need to fight the authorities, though it may have arisen now and then, but from the need of the British community starting to take a place in the internal political life of the country, to assert its importance as a factor in the national life of India in common with the Congress or the League, and to function, so to say, as an Estate of the Realm, no matter what its exact ranking may be. It is as "a factor in the national life of India" to use Lord Linlithgow's phrase, that British Business put up the "fight" for safeguards, ensured special representation in the legislatures, and functioned therein in the scheme of provincial autonomy. In all these activities, there has at no stage been any considerable difference of opinion between the British Government and British Business. All that can be said is that the latter was probably more enthusiastic about commercial safeguards than the former, as it appeals directly to crude or vague notions of self-interest; and it is a matter of little importance whether it is the Government that passed on the idea to the businessmen or *vice versa*.

I have said all this to show that at no stage in the past did British businessmen in India find it necessary or advisable to think out Indian political problems for themselves and let agreement with the Government emerge as a result of correct, independent thought, rather than adopt it as the starting-point. Identity of thought and main lines of thinking would be alright, if there are no special circumstances of which the Government could be as well appraised as the British businessmen in India. The identity would work no harm when the only relevent consideration is the ability of the Government to put down a nationalist rising or to quell a nationalist agitation. The moment that other factors emerge to view, there is need for thought. To adduce only one instance, a boycott movement is not one which can be quelled by force of arms. Indeed, a movement like that of the Congress could create conditions in which it would be impossible to carry on business. While official policy would conceivably be inspired by considerations of prestige, the hold-up of normal business activity would pinch the businessman very hard indeed. The same applies to any outbreak of communal rioting. Considerations of diplomacy are far different from the considerations which ought to weigh with businessmen. Business connections and the requirements of general goodwill and peaceful conditions do not carry the same weight with a Government used to autocratic authority as with businessmen. Big Business has sometimes to stake its possessions on the doubtful chances of a war. But the place of British business in India is far different. Its continuance and growth or preservation are bound up with the ordered progress of the country. But the British Government, especially at a time of war, is apt to think in terms of diplomacy and hostility. At the present moment, when war orders are an important factor in the conduct of business this goodwill may seem unimportant. But in post-war times, when British economy is bound to find itself in a very uncomfortable position, the look of things will change, too.

As I have said already, it is for the British commercial community to see how far it can leave political thinking to be done for it by the British Government. Perhaps, I shall be told that such independent thinking has been done intensively and that the letter to the *Statesman* is the result of it. It is very difficult to believe that the conclusions of British businessmen in India and the policy of the British Government are in such close agreement that both can stand by the terms of the

Viceroy's statement of August 8. I have no doubt in my mind that, should any change be made in that statement, even if it be to accept Pakistan or alter the proportion of seats in the Legislature, nothing would be changed in the Bengal Chamber's letter except the date of the Viceroy's statement. Such an attitude can hardly convince anybody that Britishers who have lived in India and have permanent business interests in this country have no different ideas on politics than people who look at this vast country through the lens of official files.

That is frankly impossible even in ordinary peacetime. But in the present conditions of the war, it seems almost absurd. Which Briton in India, I ask, can feel satisfied that the war effort in this country is all that it could be? The tides of war are lapping on our frontiers. And can the Britishers feel that all is well? It may not be easier for British businessmen than for any Indian party to suggest a way out of the present impasse. But it is one thing to dissociate yourselves from any set of views that may have been expressed. It is quite another to associate yourselves with a policy which has been condemned by almost everybody except its sponsors. Caution may call for this disclaimer, for silence is supposed to mean consent. But should not the British refrain from provoking another controversy in the critical times? To me as to many others, the letter to the *Statesman* has come as a surprise. The least that the Chamber could have done is to refrain from renewing its support to the August declaration. Mr. Moore may be disowned for the moment. But of him, it may be said, he has given independent thought to the problem on hand. He has had his wavering and wobbling. But he has persisted in his own line of thought. It is high time that other Britons in India did the same, no matter what their ultimate conclusions may be.

The arrival of Mr. Moorhouse in place of Mr. Neville found me a ready recorder, for local knowledge made me eager to add small tribute to one who had succeeded to an important position in the Bank. It is not however so to say the conventional word or two about Mr. A. McCulloch who vacated office in Bombay only lately. Mr. McCulloch who has just relinquished the office of Secretary in the Imperial Bank, Bombay, is a forerunner of the Scottish banking invasion that has always been noticed in many countries. I learn that Mr. McCulloch came from the Commercial Bank of Scotland to the Bank of Madras and spent a fairly long period there. Madras must have been congenial to the banker who comes from Scotland, and it is not at all surprising to those who know how quickly banking takes root in the South. Mr. McCulloch held charge of the Colombo branch for some years, and went to Bombay where he has been in charge as Secretary and Treasurer for many years. Mr. McCulloch is one of the not-so-numerous officers who carried through so successfully the transformation of the old Presidency Banks and helped not only to bridge the transition but to build up the bastion of the vast Indian banking edifice. The Imperial Bank loses a distinguished servant of high standing and Bombay a citizen who retained many interests outside his office. I should add here the Western Capital has always attracted the cream of the banking world and his successor may be congratulated on his accession to a position that is marked out as different in many ways. Mr. Dawson has been in Rangoon and other cities before going to Bombay. It is for Bombay to take him to its heart as it has done so many keen bankers including Sir Alexander Gray who must now be accounted a veteran by all standards.

In chronicling appointments and retirements one always manages to strike a grave note ; but describing the triumphal reopening of the New Empire Theatre on Thursday night, one must strike a new note of buoyancy and cheer. I hear the press had a sneak preview of an empty theatre with a blank screen on the previous morning and went back jubilant after cursory contemplation of the work of architect and decorator. When I say that the former was Mr. Bernard Mathews, all is said and the most hardened Calcutta cinema-goer is the latest and most enthusiastic of his admirers. The complete transformation wrought by the most ingenious of workmen in record time has made the theatre more than ever gay and intimate and it is now as ever the New Empire that sets the pace in screen entertainment. I certainly knew it when I saw the company assembled under the lead of Sir Harry Burn to pay tribute to the evergreen genius of Sir Seymour Hicks and add incidentally to the worthiest of local good causes, that of adding a little more to the East India Fund that keeps on growing and is responsible for more than

Simla, May 14.

POLITICAL questions continue to receive in Simla the first place in discussions whether in official or non-official circles. It would be far from correct to assume that Mr. Amery's speech has closed the matter for the present. It is being widely reported in Simla that further consultations are going on between the Viceroy and the authorities in Whitehall, but things are moving so slowly that it is difficult to say when if at all the next move will be taken. A number of prominent men have already interviewed the Viceroy and discussed with him ways and means to end the deadlock, notably Sir Maharaj Singh who was connected with the Bombay Conference, Mr. Fazlul Huq, the Premier of Bengal and Mr. Nalini Ranjan Sarker. It appears that Mr. Fazlul Huq urged the Viceroy to consider seriously the advisability of summoning a Conference of Premiers and other leaders but judging from talks here I do not think that there is any great enthusiasm in official circles for holding this Conference or any other Conference of political leaders at the moment.

Good work was done at the two-day meeting of the Industrial Research Utilisation Board which concluded on Tuesday. Though a year is all too short a period for the Board of Industrial and Scientific Research to demonstrate its usefulness in full, it has an impressive record of work which has been brought out in Sir S. S. Bhatnagar's report. Industrial houses have not been slow to take advantage of the opportunities offered by the Board's researches and apply to the Utilisation Board for permission to organise new industries on their basis. A number of new industries are expected to spring up as a result of this meeting during the next few months with fairly good promise for the future. Care appears to have been taken to see that they are as widely distributed as possible and that there is no room for the complaint that these new industries are concentrated in a few centres for the benefit of some big industrial houses. For instance South India which is now showing increased signs of industrial expansion will profit by the following industrial schemes sanctioned by the Board—dry cells, laminated paper fibre boards, bhilawhan stoving enamel and allied products and resin impregnation of wood.

* * *

There is a strong feeling that as the Board of Scientific and Industrial Research has now fully justified itself—thanks to the great personal interest taken by Sir Ramaswami Mudaliar—the Government of India should immediately proceed to expand its activities on a much larger scale. A sum of Rs. 5 lakhs per year is hardly sufficient to cover the huge field available for industrial research in this country. There is then the consideration that, however valuable may be the work of the Board, its activities are mainly confined to minor industries and that no organised campaign has yet been begun by the Central Government for establishing heavy industries in India. Without the Government's active help, particularly in the matter of importing machinery, it will not be possible for private enterprise to undertake them. The suggestion made is that the Government of India should set up a small Economic or Industrial Board to advise the Government on the general policy of industrialisation and the particular measures necessary for establishing as many big industries as possible in India with the least possible delay. Unfortunately, though Mr. Bevin has declared that India must be industrialised, there is so far neither in Simla nor Whitehall that zeal for starting heavy industries which the public had a right to expect.

* * *

The fate which has overtaken the automobile industry scheme in Mysore is an instance in point. It had good prospects, but the promoters were faced with heavy odds largely owing to the attitude of the Government of India which refused to consider it as a part of the war effort and provide it with the necessary facilities. It was hoped that at least as a result of the interest taken in the scheme by the Mysore Government the scheme would bear fruition, but the week has brought the sad news that Sir Mirza Ismail, the Dewan, is laying down his office at the end of the month. Reports which have reached Simla show that Sir Mirza's resignation is due partly to differences over the automobile industry scheme. No one has done more for the industrialisation of Mysore than Sir Mirza during his period of Dewanship. If he had continued as Dewan and had been allowed a free hand to proceed with his schemes, not only the automobile industry but many other industries would soon have come into existence in Mysore. It has not come as a surprise that the news of Sir Mirza's resignation has been followed by the report that the automobile industry scheme in Mysore has been given up for the present.

* * *

Several representations have reached the Government of India on the subject of newsprint import restrictions owing to the hardships which newspapers in India are threatened with. I understand that the Government of India have taken up seriously the question of controlling retail prices and are carefully watching the market to see what action is necessary. Two other questions are also receiving the Commerce Department's consideration—firstly, what concessions are possible in the case of orders placed before 12th April, the date of the Government's notification, and secondly, whether purchases through dealers should not also be included in addition to direct imports in 1940 for the purpose of estimating the quantity to be licensed for any particular newspaper. The need for organised action on the part of the newspaper Press to limit the consumption of newsprint as much as possible is reported to have been pointed out by the Government of India—particularly owing to the increasing difficulties in getting shipping space from America. It should be possible at least now for the Government of India to proceed vigorously with schemes for newsprint manufacture in this country. It was stated recently that in Mysore and elsewhere there were successful experiments on the production of mechanical pulp. Newsprint paper of good quality was produced on an experimental plant, and actually an issue of a small local newspaper was printed on it with satisfactory results. It is said that the experiments indicate fairly sound possibilities for the manufacture of newsprint quality papers. There is no reason why the Government of India should not follow the example of Australia and try to set up the newsprint industry in this country.

* * *

It may be remembered that the Finance Member in his concluding speech on the Finance Bill in the Assembly in March last, endorsed the suggestion of Mr. Boyle that the provinces should be asked to bear a larger portion of the expenses incurred in connection with A.R.P. measures and civic guards. The reason given was that with one or two exceptions the provinces were enjoying surplus budgets and so could be reasonably expected to come to the relief of the Central Government. It appears that a letter on these lines has already gone to the Provincial Governments, but I am afraid that it is not going to be an easy matter to convince the Provincial Governments that they should part with more of their money for financing these extraordinary measures necessitated by the war. The Bengal Premier, Mr. Fazlul Huq, is reported to have spoken to the authorities here on this subject. It will be some time before the consultations now going on between the Central Government and the Provincial authorities are concluded and a definite arrangement is entered into. Another suggestion made by the Finance Member was that the Provincial Governments should desist from imposing additional taxation in order that the taxable capacity of the people may be fully available to the Centre for financing the war effort, but even in the Punjab which figures as the most important centre for war expenditure, may be said to be in a better position financially than before, there has been new taxation in the shape of the sales tax. Considerable agitation is still going on in the province for the repeal of the sales tax measure.

* * *

It has been announced by the Government of India that up to the present date they have accepted responsibility for accommodating 84,000 European prisoners of war. As the entire expenditure is to be borne by His Majesty's Government, it does not affect the Indian budget, but it has been pointed out that at places where these camps have been opened, there has been a tendency towards abnormal rise in in prices of food-stuffs. It is understood that the situation and take necessary steps to prevent this rise.

(From Our Correspondent)

Bombay, May 14.

EVERYBODY is here talking about Iraq. What trade there is will be hampered by the trouble. Moreover trade with Turkey will become impossible. It is not the trouble about air communications that worries Bombay now though people here do not forget that it is only a distance of about 1,500 miles that separates the Indian coastline from Basrah. The trouble started a month ago when Rashid Ali got his own way and put the Prince Regent out. The attack on Habbaniyah was to all intents and purposes inspired by Germany but opinion here is not unanimous about the measure of support available in Iraq for the Axis. Though it is glibly asserted that the Fifth Column has been at work, the many refugees who have reached India state that the Nazis are not exactly popular. If Rashid Ali is compared to Quisling it is not forgotten that he has not succeeded like Major Quisling in letting the Germans in. When Basrah was evacuated the British residents knew that the Iraqi Premier was no friend of Britain. From Baghdad to Habbaniya and then to Basrah was uneventful and the voyage to India was not marked by any incident. The press is filled with many references to Rashid Ali's deep game and the notorious instability of Iraq's politics. It is not forgotten that Axis propaganda was busy ever since the Youth leader Baldur von Schirach visited Iraq in 1938. Something like the *Hitler-jugend* was organised and the excitable youth of Iraq started the anti-British campaign which began with the murder of Mr. Moneck-Mason at Mosul two years ago. The excitable tribesmen are not fond of the Nazis as yet according to a recent arrival who said that Indians in Bagdad were safe. The majority were small shopkeepers. The wife of the Sheriff of Bombay, Mr. T. Sinclair Kennedy has organised a small relief committee for helping the people who have left Iraq in a hurry.

A long memorandum published in the papers proves that social reform is a cause always dear to Bombay. The memorandum discusses the legal disabilities of women. The new committee of inquiry appointed by the Central Government should find the Social Reform Association's plea for an elaborate inquiry not wholly helpful but the criticism of piecemeal legislation is not without justification. That the law of succession is not satisfactory is a point raised in the memorandum which upholds the rights of a son's widow to inherit as against a daughter. The Association discusses also the questions raised by a Madras decision as to the validity of inter-caste marriages. It is only to be expected that a plea for legislation would be advanced with more particular reference to the rights of the offspring in the case of such unions. Widow re-marriage, the Hindu women's right to Property Act and monogamy are among the points discussed in the memorandum.

The end of the commerce raiders in the Indian Ocean has put fresh heart into those who believe that sea power will determine the outcome of the war. The Indian Ocean is now safer than the Pacific and India like South Africa has reason to feel that the war is remote where commerce is secure. The fine work of the Dominion Navies is appreciated and Bombay has been stired deeply by the news that a squadron of the U.S. Navy has been detailed lately to watch the Indian Ocean. Its purpose is plain enough; to make the approaches to the Red Sea safe so that supplies to Egypt get there in time. The British navy too will be relieved of anxiety and the Mediterranean fleet will be stronger in some ways.

The reports from the piecegoods market here suggest that Ahmedabad is still feeling the effect of the riots. The Bombay market is not jollied up by the report of the recent conference on war supplies. The narrow fall in cotton prices puts down enthusiasm and upcountry buyers hold off because there is a feeling that trouble may revive. Demand is therefore slow and prices have suffered to some extent. But mills still quote high rates and customers may come back to take off existing strokes when sentiment changes even slightly. The report that Britain's textile output will be reduced considerably and exports to the Empire will be actually discouraged has not made a great impression. It has, however, kept up the prices of imported fancy goods. In the case of Japanese goods demand is small though prices are steady. Supplies from Japan do not show signs of increasing and traders here do not show much interest either. But this does not help to sell Indian goods. Demand from abroad does not increase because shipping space is hard to get. The undertone may be good after Brigadier Wood's assurances to textile interests, but the war news depresses the cotton market regularly and nips improvement in the bud elsewhere. Importing markets do not give help because accumulated supplies are held up.

The views of Sir M. Visweswarayya on the collapse of the agreement for the start of automobile manufacture in Mysore have been quoted in Bombay papers because it was believed that the scheme would go through more so as the money wanted had been promised from many quarters. The Mysore Government has announced now that the original deal is off, so far as the guarantee of interest is concerned, and without State backing, the site chosen for any new car factory may not be Mysore at all. The Mysore reports do not wholly agree as to the reasons behind the Government's decision though it is felt that Sir Mirza Ismail's retirement, announced this week, must be connected with the dramatic dissociation of the Mysore Government from the promoters' plans. The long term of Sir Mirza as Dewan is recalled as a period of all-round progress, and his quarrel with the State Congress is seen in retrospect as a very minor episode indeed. Sir Mirza's great work for agriculture and industry is not overlooked in Bombay's estimates of his career and achievements. His enthusiasm for industrial development is mentioned appreciatively and his unexpected retirement has occasioned much regret. Speculation as to his successor has been provoked by various guesses as to the differences between Sir Mirza and His Highness.

Mention should be made here of the local government's notification relating to the prices of imported rice. The wholesale and retail prices have been determined with a view to peg prices down in relation to C.I.F. rates. The prices were in force from May 11, and the importers know what to expect per each bag of 168 lbs. Freight and delivery rates too have been fixed and the margin of profit for Vakharias and Chaparias has been fixed at 6 annas per bag. The rates fixed are for cash purchases; customers taking on account will presumably have to pay more.

The aeronautical training available at Begumpet and Kachiguda is not wholly without influence in Bombay which is more than ever air-minded. While Hyderabad holds the lead in regard to training facilities for Indian flyers, more advanced training is available for ground staff at Poona where the Engineering College during the usual

vacation have apprentices picked by the Civil Aviation Directorate. A hundred volunteers for the Air Force Reserve are training to become mechanics needed for the maintenance of aircraft. Poona is perhaps the biggest of the nine training centres and expects to contribute most to the pool of 2000 mechanics wanted every year. Residential accommodation are provided for the young men taking the 12 months course leading to another course at Ambala. Qualified Engineers are the instructors and trained fliers too are sent out by Ambala to coach the students who aim to become mechanics. Visitors to the hostel in Poona describe youths as keen and ready. Materials and stores are available for purposes of demonstration and the Deccan, with three or four centres available, will probably contribute most to the reserve of mechanics required at present.

Last week's Conference on textile supplies ended with the issue of a press note about the trend of discussions and conclusions reached. The millowners will have to put up names for the advisory panel which will sit in Bombay and advise on the distribution of war supply orders. Brigadier Wood's declaration that demand will increase substantiably in the future is regarded as soothing. The Government perhaps thinks of limiting any possible advance in prices the more equitable distribution of orders will be an advantage to all concerned. It was desired that production capacity should not be strained by war orders: hence the desire to spread the orders over a wider field. It will help to get supplies regularly from among all the mills willing to make textile to order. Brigadier Wood's statement that war orders will take 25 per cent. instead of 10 per cent. of existing production has made many believe that even if bulk orders are booked at small profits, the mills will benefit considerably. The many millowners from all parts of India who came to Bombay for the discussions last week helped to produce agreement on the ways and means to be adopted. It is known that the Bombay millowners association and most managing agents were represented in addition to the delegates from Ahmedabad, Cawnpore and other places.

A Resume of Commodity Markets

Calcutta, May 16.

THERE have been no important developments in the several commodity markets during the week but the raw cotton and the hessian markets have continued firm and have again provided the features for the week. It will be remebered that even last week a firmer tone was noticeable in the two markets and that with buyers unsatisfied the indications were that yet further rise in prices would be recorded. It is significant however that the outstanding improvement in prices in these two markets has not been followed by any general increase in values in the other markets. The improvement in prices as such has been due to special factors.

The strength of the jute manufactures market, particularly of hessians, has been due mainly to the technical position *viz.* the shortage of ready goods. It was never expected that the freight situation would improve so suddenly. The demand for particular fabrics also has left the market bare of stock and as mills have not been in any way able to relieve the situation bazar operators have been able to demand their rates. In mid-week there were reports regarding mills buying back stocks of 11 Porters and re-selling 9 Porters but the extent of these opperations would obviously be limited and could not have any permanent influence on the market. There was a temporary marking down in the premiums for the nearer positions but since then there has again been a rise in prices.

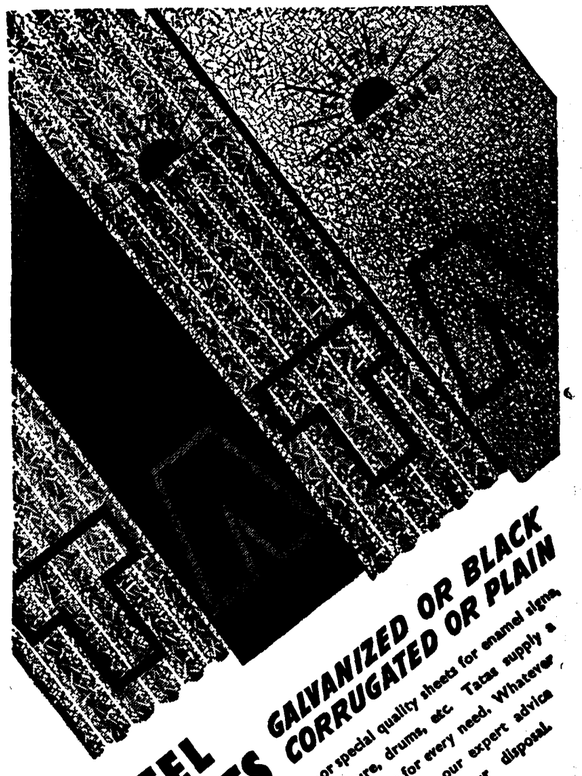
The raw cotton market has been very active. Good consumption by mills, a sharp rise in prices for American cotton and the shortage of Broach contracts for old crop have resulted in the jump in prices for Broach April/May. The rise in quotations for the forward positions is not proportionate but there has nevertheless been a substantial improvement. For sometime there was some selling for the new crop but it was fully absorbed.

As for other markets there has been nothing interesting and values have been fluctuating in very narrow limits. Linseed has been steady around last week's levels and only for a week there was a tendency to stage a slight rise in sympathy with cotton. The wheat market has been absolutely interesting while the bullion markets have been inactive with quotations at the lowest levels for the week.

Jute

With the exceptional strength of the hessian market and the reports regarding the delay in the progress of sowings and the possibility of damage to the young plants with excessive rain, there has not been any appreciable rise in prices in the jute market. This has been mainly due to the absen of any business on the part of mills who have been for the most part buying only cross bottoms in small quantities. Some interest has been shown in new crop by balers and business has been done at minimum rates. If the mills extended greater support and if the freight situation resulted in a greater volume of exports it might be expected that there would be a moderate rise in prices.

Meanwhile, one encouraging development as far as the jute market is concerned is that there is to be a conference of the representatives of Bengal and Assam at Shillong later this month to consider the Jute Regulation Scheme. This is in pursuance of the declaration of the Bengal Government that every effort will be made to make the restriction scheme a success.



Jute Manufactures

The hessian market has been very active. With continued buying for the near position and the higher level of shipments there is almost a scarcity of ready goods. Stockholders have been unwilling to dispose their holdings and even the re-selling by mills of 9 Porters and buying back of 11 Porters has not had any effect on prices. Bazar operators have been selling to shippers ready stocks and replacing them with purchases for the nearer positions. So that the quotation for July/September is considerably higher at Rs. 16-10. The American stock and consumption figures for the month of April are again satisfactory. Though there is a seasonal decline in consumption the figure is substantially higher than that for the corresponding month last year. The improvement in the freight situation is reflected in the higher level of shipments. If the present conditions continue to be in evidence mills should engage a greater proportion of looms on the manufacture of hessian such as was done sometime back when sacking looms were put on the manufacture of narrow hessian. This will incidentally relieve the sacking position also. Only last month there was a heavy increase in sacking goods, both cloth and bags.

Raw Cotton

The sharp rise in values in the American cotton exchanges and the shortage of old crop cotton have placed holders in a very enviable position. A new high level has been touched by Broach cotton April/May during the week and though the tone is uncertain at the higher levels there is no suggestion of a major setback. The improvement in American cotton prices is of no significance to the Bombay market at the present moment owing to the difficulty in getting shipments with import control added to the scarcity of shipping space. But the relative cheapness of Broach cotton and the large increase in consumption by mills have created almost scarcity in long staple varities. It is reported that manufacturers are devising ways and means to

(From Our Jute Correspondent)

Calcutta, 15th May.

We have just been looking up the word "co-operate" in our dictionary. It apparently does mean what we thought—to act jointly with others for the attainment of a desired end. We remarked last week on the call for co-operation by the Mills Association Committee in an effort to achieve stability in Loose Jute Standards. We pointed out at that time that the Mills Circular gave no lead as to how, on the lines propounded by the Committee, any chance of stability was to be achieved, so there was in fact nothing to co-operate about. Certain Associations connected with the selling end of the Loose Jute trade, however, in a well meant endeavour to show their willingness to co-operate, had the temerity to put their views before the Mills Committee, showing where, in their opinion, the proposed standards laid down by the Mills for the new season fell short of perfection, if not of practicable possibility. These representations have met with a well merited rebuff. The Mills do not see their way to alter the standards which they have laid down. Could a finer example of true co-operation be instanced? Hitlerian perhaps, but that of course is the fashion just now, though it is supposed to be what we are fighting against! However the Loose Jute trade now knows where it stands. Or does it? At least it can be taken for granted that the specifications laid down by the Mills Committee describing the proposed standards are a wash-out. Co-operation is a wash-out. All hope of stabilisation of standards is a wash-out. At least unless, what is by no means improbable, Government steps in and insists on a more practical and realistic view of the situation being taken. The writing has been on the wall for some considerable time. But it seems to be in a language which the Mills Committee cannot read. They have had the broadest hints that if they cannot put their house in order, somebody else will step in to do it for them. And little as this is desired by any section of the trade, no other alternative seems possible.

We have no doubt we shall be told that the co-operative remedy is in the hands of sellers. If they deliver strictly in accordance with the standard specifications, no one can complain. Quite true, but as we have pointed out before, they would never have the opportunity to make a second delivery. But we shall go further and point out that the buying policy of the mills will make it manifestly impossible for sellers to deliver strictly according to standard specifications. Business has been done this week in New Crop jute. If standard specifications were to be delivered in August/September, the assortment would, in anything approaching normal crop conditions, require to be around 30/50/20 Tops, Middles and Bottoms, and even then the proportion of Bottoms would be unduly high. It will be admitted that Buyers are in a position, more often than not, to specify what they want to buy and the sellers have to accommodate the buyers or do without the business. And what did buyers specify as their requirements for their proposed purchases of August/September New Crop? 50 per cent. Middles and 50 per cent. Bottoms! No Tops whatever, be it noted, and 50 per cent. Bottoms at a period of the season when it is improbable that more than 10 per cent. of a mark to yield no more than 70 per cent. sacking weft will be obtainable. Therefore the very first New Crop business following the issue of the Mill Circular on Standards virtually torpedos the whole scheme. It is only too obvious that a seller, in order to implement his contract, will have to deliver something vastly superior to the official specification of Bottom to get the necessary percentage of this mark. Undoubtedly his doing so will constitute an "infringement" according to the Circular, but will such "infringement" be reported? We doubt it. The cleaning up of the Bottom mark to get the necessary quantity will inevitably push up the standard of the Middle mark and the whole vicious circle starts over again. In fact the inherent viciousness is rather more acute this year, for last year we started with the Bottom as the lowest mark, and advanced during the season by fully a grade. This year the Bottom is only the second lowest mark. There is the ineffable "X" mark below it which intrinsically ought to be nothing but "habi-jabi" or tangled jute. But how long is it likely, in the circumstances, to remain only this? If standards were steadily advanced by one full grade last year starting with Bottoms as the lowest mark, it is only logical to look for an advance of two grades when there is another mark recognised below the Bottom. It is not difficult to visualise the introduction of a Double Cross—but that is bringing us back to the language of the films and we had better leave the subject at our previous definition—a wash-out.

The full month's working in April is reflected in the very substantial increase in production reported. From a figure of 69,612 tons in March, when the "week off" was still in vogue, production rose in April to 94,275 tons, the highest recorded since August. Hessian yardage was 1707 crores and Sacking 1072 crores. Comparing these figures with the end of March stock figures, hessian stocks totalled less than 5 weeks production while sacking stocks represented one and a half months'. American stock and consumption figures are also available. Stocks at 1890 lakhs yards are practically the same as the previous month but much less than the figure for a year ago. Consumption however has dropped sharply from 670 lakhs last month to 550 lakhs. This is a seasonal drop however and last April consumption was no more than 440 lakhs. So far consumption is well ahead this year at 2,390 lakhs yards for the first four months against 2,010 lakhs last year for the same period.

Export Jute has been far from active but a few transactions have been reported, Dundee Daisee 2/3 for shipment at Rs. 37 and the short group at Rs. 45. Sales for South America were also reported in Out-port Tossa 2/3 at Rs. 36 and in Heart marks at Rs. 26-8. A moderate business was put through with Mills at standard rates of Rs. 41 for Firsts and at Rs. 36 for Lightnings, with some Out-port Tossa done at Rs. 37. Cuttings were also sold in some quantity at Rs. 12-8 N. C. and at Rs. 12 M. C. The Futures market has fluctuated within fairly narrow limits, influenced partly by Hessian operations and partly by weather reports from the districts. From an opening rate of Rs. 39-4, Rs. 38-14 was touched, after which there ensued a hardening tendency up to a high of Rs. 40-6. Since then a quicter tone has prevailed and the quotation dropped a rupee to close at Rs. 39-10.

In Loose Jute a moderate business has been recorded in New Crop at minimum official rates for European standard, Indian Jat and Indian District jute, mainly the latter. In Old Crop there has been little reported beyond "X" Bottoms, White at Rs. 3-12 and Tossa at Rs. 4-4 to Rs. 4-8. Conditions in the mofussil have not been too satisfactory and a spell of dry weather is required to enable weeding to proceed and for sowings where these are not yet completed. Reports speak of waterlogged fields in many places, some of which may require to be resown. Where sowings are complete, reports indicate that the restriction limits have been exceeded to a small extent.

In the Fabrics section, interest has again mainly centred in the near nine porter position where the shortage of goods has become acute. The margin between the relative rates for near 9 and 11 porters made it profitable for Mills to buy back the latter in order to sell the former, and transactions of this description effected temporary relief. But the Bazar were not slow to come out as competitive buyers of near elevens, narrowing the margin and making the double business less attractive. Turnover has not been so extensive but there has been sufficient demand to keep the tone firm with only temporary small declines. From Rs. 18-1 the price of

(*Continued from page 911*)

(*Continued from page 903*)

one R.A.F. squadron in the air now. If the film were as agreeable a trifle as any that came from a British studio, I should not forget to mention the speeches of the evening. If the audience did not know what had been done to the theatre after the changes in the lighting, the new style foyer and the murals on the walls, there was the extra modern Dunlop cushions in the seats to remind them that the theatre was not the same. It was more modern and infinitely more comfortable with a new standard of entertainments to follow the Humayan Associated Theatres flag. In other respects the New Empire, which owes so much to the Humayan Properties' chairman the late Mr. A. de Bols Shrosbree, is as homely a theatre as the old that attracted Hallow'een concerts and entertainments got up by the C.A.T.S. for all sorts of local good works. The keynote of comfort and modernity has not yielded to the former. The result is pleasing and Calcutta must be properly grateful to the H. A. T. who run three theatres presenting the right type of picture through the year with a reasonable mixing of British films to vary the American fare.

Mr. Matthews was persuaded to tell how efficiently and quickly the Newer Empire took shape under his direction. Mr. Stanley MacPherson readily and gracefully acknowledged the help given both by Mr. Matthews and Mrs. Abbey who was responsible for the interior decoration. The result is delightful and the many expressions of pleasure and surprise heard during the interval attested the intensity and immediacy of audience-reaction. In the Upper Circle the old style seats remain but then the passage is made immensely easy for the late-comer. I fancy that those who turn out to see Deanna Durbin as Nice Girl will go back saying that the film is swell and the theatre too. As everybody agreed with the observations of Sir George Campbell and Sir Harry Burn that night about the theatre anything added by way of description of improvements (mentioned in detail in the daily press) would probably be unnecessary and improper. I have only to say that a remarkable job has been done by competent persons and the patrons will certainly approve the improvements and changes; and demonstrate their loyalty by brushing up (if need be) the habit of dropping in every Saturday night into the good old New Empire, as easy and familiar a haunt as any can want.

The Tea Trade and the War

Changes in the export quota alone do not confer interest on the past year in the tea trade. That a high degree of stability in regard to supplies and prices has been the most important feature of the year is recognised by all and the annual review of the season by Messrs. J. Thomas and Co. shows that the control procedure was helpful to Indian tea producers who got the average of the price realised in the past three year plus a penny per lb to cover any increase in costs of production. After the quota was increased to 92½ per cent. supplies of tea were not ample and outmarkets which were eager to buy did not get all they wanted. As the greater part of the export trade is conducted with the representative of the Ministry of Food acting also as the controller of export the influence of stocks and supplies on prices has not been determinate. The crop showed an increase of only ½ million lbs. and the variations in prices after the resumption of sales favoured the producer until the increase in quota was announced. The review records the fact that shippers did not experience any difficulty in getting freight. The review supports the conclusion drawn from the annual report of the Indian Tea Market Expansion Board for the last year. It is noted that demand for internal consumption was steady and prices showed a moderate increase for the better grades. It was only poor quality tea that was difficult to sell and cleanly sorted teas were always in demand. Dust teas commanded full support and prices were up by 6 pies per lb. compared with 1939 with prices firming up continously for good types. The statistics appended to the review indicate that production in South India and North India alike rose by half a million lbs. The monthly outturn was fairly large over the year being highest in August and lowest in December. Exports from Ceylon and the N. E. I. showed a small increase in 1940 but the figures show that India still produces and sells half the world's tea if Far Eastern production is excluded. The summary of the auctions shows that the crop basis for India was smaller than in the two previous years and the reduction in the quota for 1941 will perhaps reduce it again. The world can expect under the new revised quota of 92½ per cent only 727.59 million lbs. of which India will export 344.92 million lbs. The advance in export prices realised last year is spread over the crop offered by all Districts and the most surprising feature is the decline in offerings of Dooars and Terai teas last season. The quality of tea available for outmarkets in 1940 is less than the total for internal consumption. Ceylon and the N. E. I. have larger quotas for markets other than the U. K. and this difference may favour them in trade with the Dominions or America. The amplitude of supplies for the current year may be gauged by the difference between crop and exports. And the tea-drinker can count on regular supplies at prices which for internal consumption at least should be more than ever reasonable while consumption should reflect the advantages afforded. The tea trade has so far avoided all imputation of profiteering for prices realised for teas sold for internal comsumption were uniformly lower for all grades and districts though demand was rising and railborne supplies alone rose by over 10 million lbs. last season. The review establishes that while showing that dust teas rose by 6 pies per lb in price.

JUTE

Calcutta, May 15.

Not much of business has been passing in the jute market and the firmer tendency of the jute futures market has been mainly due to the reports of excessive rain and the damage caused to the new crop. Business passing has been on a very small scale and sellers are eager to sell stocks of old crop.

The firmer tone of the futures market, while mainly due to the unfavourable weather reports in the jute districts, has also been due to the strength of the hessian market. The recent rains have certainly affected the progress of sowings and weedings but the damage to the young plants has not been definitely estimated. A brief spell of sunshine is essential for the proper growth of the plants.

The jute restriction scheme will, it is learned, be discussed at a conference of representatives of the Governments of Bengal and Assam to be held in Shillong on May 20 and 21 when a final settlement is expected to be arrived at.

In the loose jute section, only a small business has been reported done. Mills are reported to have bought Cross Bottoms at Rs. 3-12 per maund and Tossa Cross Bottoms at Rs. 4-8 per maund. Some business has been reported in new crop Indian District Middles and Bottoms at Rs. 7-12 and Rs. 6 per maund.

In the pucca bales section, only a small amount of business has been done for export. Continental grades of Tossa and Hearts were done at Rs. 36 and Rs. 26-8 respectively. Mills bought cuttings N.C. and M.C. at Rs. 12-8 and Rs. 12 respectively. Special Firsts and Lightnings were done at Rs. 41 and Rs. 36 respectively. A small business was also done in Dundee Daisee at Rs. 37 per bale.

The jute futures market was firm even at the time of last writing. There has since been a further improvement in prices. The highest quotation for the week was touched on Thursday at Rs. 40-4. There has been some selling at the higher levels and the quotation is now around Rs. 39-12.

JUTE MANUFACTURES

Calcutta, May 15.

The jute manufactures market is further firm during the week. The improvement is pronounced only in 9 porters. There is a shortage of ready stocks of 9 porters. And, as has been pointed out in these columns, bazaar operators have been in a position to demand their rates. A further rise in prices would have been recorded but for the facilities afforded by mills in meeting buyers' requirements. It is reported that mills have been agreeable to buy back stocks of 11 porters and re-sell 9 porters 40" 8 oz. and 40" 7½ oz. This has resulted in a slight reduction in the premium for the near positions. The undertone in the several section continues firm. After being higher at Rs. 19-8, 9 porters ready are now quoting Rs. 19, June Rs. 18-4, July September Rs. 16-6 and October/December Rs. 14-12. 11 Porters ready are Rs. 22, June Rs. 21-12, July/September Rs. 20 and October/December Rs. 18-4.

The U. S. stock and consumption figures for the month of April reveal that there has been a seasonal decline in the consumption for the last month from 67 million yards to 55 million yards. There is, however a substantial increase over the figure for the corresponding month last year of 44 million yards.

The increase in shipments in the last week of April is reflected in stocks afloat which are higher at 84 million yards against 64 million yards.

The production figures for the month of April show naturally an increase in tonnage owing to the greater number of working days on account of mills working throughout 45 hours per week.

In the heavy goods section only a small volume of business has been passing and quotations are only a shade better. "B" Twill for May shipment sold on the basis of Rs. 34-2. Liverpool Twills at Rs. 37-12 and Cornsacks at Rs. 34-12.

Production figures for April

Memo of total reported production of manufactured goods by the mills in the membership of the Association and also by Gagalbhai Mills excluding Maheswari Devi, for the month of April 1941.

Description.	Quantity.
1. Twist and Yarn—	
(a) for sale ...	... 2,651 tons
(b) all others, including that used in sewing bags ...	... 1,156 tons
2. Canvas	1,096 tons 22,45,625 yards
3. Gunny Bags (Tonnages exclude sewing twists)	
(a) Hessian ...	6,520 tons 2,91,87,976 yards 2,75,28,467 number
(b) Sacking ...	42,799 tons 9,57,70,469 yards 3,91,89,496 number
4. Gunny Cloth—	
(a) Hessian ...	35,896 tons 14,15,58,394 yards
(b) Sacking ...	4,413 tons 1,14,82,614 yards
5. Other manufactures, including ropes ...	244 tons
6. Total production (above figures combined)—	
(i) All kinds ...	94,275 tons
(ii) Hessian (both as bags and cloth) ...	17,07,46,870 yards
(iii) Sacking (both as bags and cloth) ..	10,72,53,083 yards
(iv) Canvas (both as bags and cloth) ...	22,45,625 yards

RAW COTTON

Calcutta, May 15.

The scarcity of contracts and heavy mill buying have been responsible for the sharp upturn in values in the Bombay raw cotton market. The rise in the quotation for Broach April/May over last week is as much as 54 points. Bull operators have been bidding freely. Again, the improvement in Oomras and Bengals has not been proportionate though the net rise has been more substantial. Broach April/May are now quoting Rs. 320, July/August Rs. 249 and April/May 1942 Rs. 220. For, sometime there was heavy hedge selling of new crop 1942 but later it has ceased. The quotation at the end of last week were Rs. 256, 228-12 and 211-8.

American Cotton exchanges have been active on trade buying. The approval by the Senate Committee of the 85 per cent parity loan has had a stimulating effect. July are now quoted at 12.99 cents and October at 13.04 cents against 12.15 cents and 12.29 cents respectively.

PIECEGOODS

Calcutta, May 15.

The sharp upturn in the raw material market has resulted in a firming up in rates in the piecegoods market. Business passing has again been mostly in indigenous goods. Forward business has been restricted. In the Japanese goods section bazar values are higher but forward business has been very on a small scale.

It is reported that a meeting of textile manufacturers is to be held to consider government requirements. In order to facilitate production and additions to plant the manufacturers have asked for an approximate idea of war orders that would be placed with mills.

GOLD

Calcutta, May 15.

The Bombay gold market has been very inactive. Earlier in the week there was some selling by option dealers. Closing quotations are at the lowest levels for the week, gold ready being Rs. 42-1, First Settlement Rs. 42-1 and Second Settlement Rs. 42-2. There has been a further contraction in the premium for Second Settlement. The quotations at the time of last writing were Rs. 42-12-6, Rs. 42-12-6 and Rs. 42-13-9 respectively.

The London quotation has remained unchanged at 168s.

SILVER

Calcutta, May 15.

The weak tone of the silver market and the reports regarding selling at lower rates from a special source have been responsible for the downward trend in the silver market. Indian Mint Silver ready were Rs. 62-1, First Settlement Rs. 62-4 and Second Settlement Rs. 62-6.

A. R. P.

SELF PRIMING

Will pump water containing upto 25% solid matter - Self Priming up to 25 feet suction lift - Petrol and Petrol/Kerosene Engines - Light in weight

581, Merchant Street, Rangoon

The London market has been absolutely dull and idle. Quoations for both spot and forward are at 23½d.

WHEAT

Calcutta, May 15.

In the absence of any appreciable business, the Karachi wheat market was inclined to be irregular. The fears regarding the movement of new crop gaining momentum and having a disturbing effect on prices have not materialised though the continued suspension of business in the important centres of Punjab as a protest against the Sales Tax Bill has had a slight discouraging influence. The sharp improvement in values in the Bombay raw cotton market towards the close has had a steadying effect. Choice White ready were Rs. 29-6, July Rs. 28-14 and September Rs. 29 6-6. There is a considerable narrowing in the premium for ready over July.

The local market has been rather firm with Cawnpore and Punjab May quoting Rs. 4-2-9.

MADRAS GROUNDNUTS

Madras, May 13.

The market ruled steady during the greater part of the week. A slightly easier tone developed yesterday, but prices steadied at the close. Opening around Rs. 23 and Rs. 23-10 for Machined (Per candy of 531 lbs. ex-coast godowns) on Tuesday last, shippers' buying limits advanced to Rs. 23 and Rs. 23-12 on Wednesday and steadied to Rs. 23 and Rs. 23-8 subsequently. Yesterday, prices eased to Rs. 22-12 and Rs. 23-2, but improved to Rs. 23 and Rs. 23-8 at the close. It is understood that the Ministry of Food accepted tenders for 6,000 tons for shipment from Madras and Marmagoa during the past week at their standard buying limit of £10 with an uniform pool contribution of 15sh. Firms are reported to be buying freely in the Ceded districts. Local buyers' limits were nominally quoted around Rs. 21 and Rs. 21-8 for Machined (Per candy of 531 lbs. ex-Madras harbour godowns) but there were no sellers at these limits for the southern quality at the close. Groundnut oil ruled steady during the week. Opening around Rs. 46 to 46-8 and Rs. 48 to Rs. 48-8 for "Chekku" and "Expeller" qualities respectively, prices improved by annas 8 to Rs. 46-8 and Rs. 47 in the case of "Chekku" quality on Saturday with no quotable change for "Expeller" oil. The market closed a shade easier around Rs. 46-8 and Rs. 48 for "Chekku" and "Expeller" qualities respectively, for ready lots, per candy of 500 lbs. loose, ex-sellers' Madras godowns. Although demand for oil has not been brisk, the supply has fallen off especially of "Chekku" oil from upcountry producing centres, and this accounts for the steady tone of the oil market.

MADRAS HIDES AND SKINS

Madras, May 13.

The vexed question of allotment of shipping space to the various interests has yet to be finally settled by the authorities. The Indian section of the trade went into the question as it affected the tanner-shippers and suggested to the authorities that 12 per cent of the total freight space should be alloted to the new shippers holding no quotas but having on hand large orders with equally good stocks against contracts. They also suggested that the bigger shippers, whose quota has been rendered high on account of the sales of the tanner-shippers to them and through them, should surrender a portion of their quotas in proportion to the volume of business placed by the tanner-shippers. A meeting of the European shippers was held on Thursday last, and certain tentative conclusions were reached on the question of allocation of the allotment of shipping space. It was agreed that, although the present system of allotment was not satisfactory, it worked fairly well on the whole. The Europeans agreed that the big firms through whom tanner-shippers were transacting business must give to the better quotas out of the firms' allotment in proportion to the volume of business of their clients. But on the question of allotment of percentage of even 8 per cent of the extra space that the authorities can find for the new shippers, they were opposed, as it meant the withdrawal of allotment to that extent from the quotas of long-established and old shippers of repute. They are, however, agreeable to let the new shippers have the quotas of the old firms that possess quotas but are no longer in business. Even this concession must, according to them, be limited to contracts on hand on the 15th February, 1941, it being understood that no allotment can or will be made for any business concluded subsequently. It is understood that the local representative of the Ministry of Supply will again meet representatives of the various sections of the trade including the Southern India Hide and Skin Merchants' association, on Wednesday next and discuss the question further, and if possible, reach a satisfactory arrangement. It is understood that a boat is due to load Kips at the end of the week, and another one will follow early next week.

(*Continued from page 908*)

9 porters was quickly rushed up to Rs. 19-6 and though Rs. 18-18 has since been touched, the closing is again firm at Rs. 19-4. The buying of 11 porters took the rate from Rs. 21-14 to Rs. 22-8 at which rate it is again quoted at the close. Other recorded sales of nines include Rs. 16 July, Rs. 15-12 to Rs. 16 July/Sept., Rs. 15-14 August, Rs. 14-12 to Rs. 15 Oct./Dec. Eleven porters have been dealt in at Rs. 19-12 to Rs. 22 June, Rs. 20-8 July and July/Sept., Rs. 18-8 Oct./Dec. and Rs. 17-4 Jan./March. The sharp discounts for forward deliveries have encouraged speculative buying in these positions. Heavy Goods have not been a strong feature but a number of sales have been made at steady rates. "B" Twills at Rs. 34-4 May and Rs. 34 June. Cornsacks at Rs. 34-12 May, Rs. 34-10 June, Rs. 34-4 to Rs. 34-8 July/Sept. and Rs. 34 Oct./Dec. Liverpools at Rs. 37-12 and Rs. 38 July and Rs. 37 Jan./March. Cubans at Rs. 42-8 June and Rs. 42 Aug./Sept. Rs. 32 Jan./June. The closing tone is firm in Hessians and steady but quiet.

(*Continued from page 907*)

improve the use of short staple cotton in their manufactures.

As evidence of the higher level of consumption of cotton by Indian mills the figures for the period ended August 1940 to March 1941 show that the total of cotton consumed during these months was 2,301,000 bales against 1,867,000 bales for the corresponding period in 1939/40. This is the largest consumption on record and is ascribed firstly to larger number of mills, secondly, to big British Government's orders and thirdly to Indian speculative buying of textiles.

Wheat

There is little buying for the nearer positions. It is believed that it will take sometime yet for the accumulated stocks to be cleared from ports. Greater interest is shown in the forward positions and September is quoting at a good premium.

The British Ministry of Food has arranged with the Canadian Wheat Council for the purchase of 120 million bushels of wheat or 3,000,000 tons during the next twelve months.

Rubber

A firmer tone has been noticeable in the rubber market and quotation for spot is higher at 14⅜d. No quotation for forward position is available.

Stock Markets to-day and to-morrow

BALMER LAWRIE & COMPANY ACCOUNTS FOR 1940

EARLY in the week a definitely firmer tendency was noticeable in the several sections of the Calcutta Stock Exchange. Further forced covering and fresh buying resulted in an improvement in the rates for Indian Irons and Steel Corporations to Rs. 29-10 and Rs. 18 respectively. The Hess episode was an encouraging factor. Later developments in Syria and Iraq, however, have over-shadowed the Hess episode and there is now considerable anxiety regarding German intervention in Iraq. There has naturally been a decline in prices during the course of Friday, Indian Irons and Steel Corporation being quoted at Rs. 28-4 and Rs. 17-8 respectively. Giltedged securities have remained unchanged.

* * *

A considerable improvement in the earnings of the companies under the management of Balmer Lawrie and Company, Limited and an increase in the activities in which the company itself is engaged, have resulted in a substantial rise in the net profit for the year ended December, 1940. As the directors themselves point out : "All branches of our Engineering activities have been working at top pressure. The Paper Industry has been overwhelmed with orders; the Tea departments have had a satisfactory year's trading, and, despite disappointing conditions in the Coal trade, our Coal department has had a reasonably good year. The Merchant departments started the year with satisfactory stocks which, however, have been considerably depleted and are becoming increasingly difficult to replace."

* * *

The earnings of the company, since it became a public limited liability company in January, 1936, have shown a consistent improvement. The net profit, before providing for taxation for 1940, is the highest since 1935, being Rs. 22,04,075 against Rs. 15,18,868 for 1939. Owing to the liability on account of excess profits tax in respect of earnings for the whole year, the company does not derive any advantage on account of the increase in earnnigs, the provision for taxation being Rs. 10,55,170 against Rs. 3,92,900 previously. The amount set aside to depreciation is Rs. 33,350 against Rs. 23,151 while the allocation to Stock Reserve is considerably higher at Rs. 1,75,000 against Rs. 84,177. The transfer to General Reserve is lower at Rs. 1,50,000 against Rs. 2,50,000. After the usual preferential dividend of 5 per cent. on the ordinary shares a dividend of 7½ per cent., the same as last year, is to be paid on both the ordinary and deferred shares. The bonus recommended, however, is higher at 7½ per cent. against 5 per cent. on both classes of shares. The total distribution is thus 20 per cent. on ordinary shares and 15 per cent. on deferred shares.

At Rs. 325 cum-dividend the shares afford more than 6.4 per cent. tax-free. The preferential dividend on the ordinary shares was paid on September 27, 1940.

* * *

The vastly improved conditons in the cotton textile industry have been referred to in these columns on more than one occasion. The results of the *Elgin Mill Company Limited* and *Cawnpore Textiles Limited*, for the half-year ended March, 1941, just now available, reflect in full measue the changed condition in the industry.

The accounts of the former company are worthy of special comment. The results are the best ever shown by the old established company. Satisfactory and steady progress has been made during the past three or four years, and the amount spent in improvements during the past five years, which total some Rs. 3½ lakhs on buildings and Rs. 17 lakhs on machinery, have contributed considerably to the improved results.

The net profit, before providing for taxation and depreciation, for the six months ended March, 1941 is Rs. 10,05,051 against Rs. 6,31,648 for the previous half year. The provision for taxation is considerably higher at Rs. 4,75,000 against 2,10,000. The amount set aside to depreciation is Rs. 2,00,000 against 1,75,000 while the allocation to General Reserve is Rs. 1,00,000 against Rs. 47,145. The allocation to Debenture Sinking Fund is unchanged at Rs. 25,000. The dividend on the ordinary shares is higher at 7½ per cent. against 5 per cent.

There has naturally been a rise in the quotation for the shares to Rs. 19/10 cum-dividend on the publication of the results. With a sound financial position and assured prospects the shares are worth much more.

* * *

The sister company, *Cawnpore Textiles Limted*, has also done well during the same half-year. The net profit, before providing for taxation, is Rs. 1,88,050 against Rs. 1,16,196 for the previous half year. The provision for taxation is Rs. 31,000 against Rs. 2,500. The amount charged to depreciation is Rs. 50,000 (same) while the allocation to Sinking Fund is Rs. 11,250 (same). The allocation to General Reserve is considerably higher at Rs. 50,000 (Rs. 4,162). The dividend on the ordinary shares is higher at 7½ per cent. against 6¼ per cent.

With the publication of the accounts for the half-year ended March 1941, *Elgin* ordinary shares seem to be relatively undervalued. *Cawnpore Textiles* ordinary shares, however, at Rs. 5/8 cum-dividend have their preferences for the small invester.

* * *

A generally higher level of working costs and a large increase in expenditure incurred on replacement parts for the Brown-Boveri Turbo—Alternater have resulted in a decline in the net profit of the *Patna Electric Supply Co. Ltd.*, before providing for depreciation but after taxation, to Rs. 2,15,805 in 1940 from Rs. 2,87,651 in 1939. After setting aside Rs. 1,03,788 against Rs. 1,02,168 to depreciation, it has been possible to maintain the dividend at 7½ per cent. after transferring Rs. 30,000 from Reserve for Reduction in Rates.

* * *

The total number of units sold during the year is 6,014,957 against 5,277,652. The number of consumers connected to the company's system at the close of the year was 3,390 compared with 3,092 at the close of the previous year. A supply is now being given to the Hindustan Bicycle and Industrial Corporation, Limited and it is expected that the concern's offtake will improve considerably during the present year. The prospects generally are considered to be favourable.

* * *

The increase in costs of production on account of the war was largely offset by the large size of the crop made by the *Hasimara Tea Company, Limited* in 1940. The net profit, however, has been adversely affected by the lower average price realised. Even with the reduced level of earnings the directors could have maintained the ordinary dividend but they have chosen to strengthen the financial position of the Company instead.

The net profit, before providing for taxation, is Rs. 8,58,405 for 1940 against

(*Continued on Page* 915)

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, May 16.

AFTER earlier firmness a slightly easier feeling has been noticeable on the Calcutta Stock Exchange during the last two days. There has not been any appreciable decline in the quotations but business is on a very restricted scale. The earlier strength of the markets was due to bear covering and some fresh buying. Indian Irons and Steel Corporations were at one time quoted as high as Rs. 29-10 and Rs. 18 respectively. With the continued strength of the hessian market, jute shares also have been firm. Giltedged securities were generally steady though closing prices are a shade easier. The undertone in the several sections is quiet.

Giltedged securities have been quietly steady. Business has been on a restricted scale but with the continuance of easy money conditions and the absence of sellers prices have been fully maintained. 3½ per cent. Paper were quoting Rs. 95-4 for 'receipt of scrip' while a premium of four annas was demanded for ready delivery. Among terminable loans, 3 per cent. Defence Bonds are higher at Rs. 100-11 while there has been good demand for 5 per cent. 1945/55 tax-free bonds which were done upto Rs. 110-15. 3 per cent. 1963/65 were higher at Rs. 94-8. 3 per cent. 1951/54 were 99-10, 4 per cent. 1960/70 Rs. 108-5, 4½ per cent. 1955/60 Rs. 112-12 and 3½ per cent. 1947/50 Rs. 102-11. The provincial issues have been firmer with the quotation at Rs. 97-4 for the 3 per cent. 1952 issues.

Business in public bodies' debentures has again been restricted though the tone is better in this section in sympathy with the strength of the giltedged securities section. 3½ per cent. *Howrah Bridge* debentures changed hands at Rs. 98. 4 per cent. 1942 *Calcutta Municipal* debentures were Rs. 102-4, 4 per cent. 1945 *Calcutta Municipal* debentures Rs. 103-8 and 3 per cent. *Calcutta Improvement Trust* debentures 1936 Rs. 85-12.

Among industrial debentures, 4½ per cent. *Titaghur Paper* debentures were Rs. 102-12 and 5½ per cent. *Dalmia Cement* debentures Rs. 102-6.

Not much business has been passing in first class preference issues. *Delta* preferences were noted at Rs. 143, *Kamarhatty* at Rs. 173, *Northbrook* at Rs. 150 and *Craig* at Rs. 50. There was a sharp improvement in the quotation for *Hukumchand* preferences from Rs. 117-8 to Rs. 123-8 on reports regarding the possibility of a capital reconstruction scheme. Among others, *Steel Corporation* have been marked higher at Rs. 119 cum-dividend. *Titaghur Paper* Second preferences were in good request and done upto Rs. 115-8. *Alkali and Chemical* were Rs. 118, *Indian Standard Wagon* Rs. 159 and *Indo-Burma Petroleum* Rs. 118. *Carew & Co.* have been in favour being done upto Rs. 119.

Bank shares have been slightly better with *Imperial Bank* fully paids and contributories at Rs. 1,540 and Rs. 378 respectively. *Central Bank* were done at Rs. 41-8 and *Reserve Bank* at Rs. 102-8.

In sympathy with the strength of the raw material market a firmer tone has been noticeable in the Cotton section though closing prices are lower than the highest levels for the week. *Elgin* were Rs. 19-8, *Dunbar* Rs. 192, *Kesoram* Rs. 6-7 and *New Victoria* Rs. 2-2. The sharp rise in the quotation for *Elgin* is due to the excellent results of the company for the half-year ended March, 1941. The dividend recommended on the ordinary shares is higher at 7½ per cent. against 5 per cent. for the previous half-year.

The Coal section was inclined to be slightly firmer but the gains have been lost to wards the close. Business has been on a restricted scale. *Amalgamated* were in favour at Rs. 24-10 while *Bengal* after being higher at Rs. 350 are now quoting Rs. 340. *Bokaro and Ramgur* were Rs. 14-6, *Central Kurkend* Rs. 12-12, *Dhemo Main* Rs. 12-5, *Seebpore* Rs. 19-4 premium and *West Jamuria* Rs. 27-12.

As pointed out above, jute shares have been firmer in sympathy with the hessian market and the satisfactory showing of results of the important companies for the half-year ended March, 1941. From Rs. 49-12 at the end of last week *Howrah* improved to Rs. 51. They are now quoting around Rs. 50-10. *Anglo-India* were Rs. 320, *Adamjee* Rs. 22-12, *Clive* Rs. 22-6, *Megna* Rs. 40-4, *Kamarhatty* Rs. 463, *Nuddea* Rs. 56-4, *National* Rs. 21-10 and *Reliance* Rs. 51-10.

In the Engineering section there was good buying of Indian Irons and Steel Corporations early in the week and the quotations were at the highest levels for the week at Rs. 29-10 and Rs. 18 respectively. There has since been a decline in *Indian Iron* to Rs. 28-5 on profit-taking and selling. *Steel Corporation* also are quoting around Rs. 17-8. *Burn & Co.* were Rs. 365, *Braithwaite & Co.*, Rs. 8-12, *Hukumchand Electric Steel* deferreds Rs. 2-3 and *Kumardhubi Engineering* Rs. 4-4.

Sugar shares were slightly more in favour with *Carew* being at one time done at Rs. 10. *Ramnugger Cane and Sugar* were Rs. 7-10 and *Buland* and *Raza* Rs. 15-12.

Tea shares have continued firm. *Hasimara* were done at Rs. 41-14, *Banarhat* at Rs. 393, *Dauracherra* at Rs. 10-8, *Nagaisuree* at Rs. 992 and *Seajuli* at Rs. 23-12.

In the miscellaneous section, *Burma Corporation* showed a tendency to improve and were marked higher at Rs. 4-8. *Indian Copper Corporation* were Rs. 2. *B. I. Corporation* were dealt in at Rs. 4-4, *Dunlop Rubber* were firm at Rs. 40-4 as also *Indian Cable* at Rs. 20. *Tide Water Oil* were Rs. 15-4, and *Alkali and Chemical* Rs. 15-10. Among Paper shares, *Titaghur* ordinaries were higher at Rs. 17-4. *Bengal Paper* were Rs. 114, *India Paper Pulp* Rs. 135 and *Shree Gopal Paper* Rs. 10.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, May 15.

Money.—Easy conditions continued to prevail in the money market, the rate for call money being quoted at ½ per cent.

Exchange Market.—There was no change to report in this section, banks were selling T. T. at 1s. 5 15/16d. and buying three months' bills at 1s. 6 7/32d.

Securities.—Confidence in the giltedged market appeared to be reviving and prices of most securities improved further during the week under review. 3½ per cent Paper were done higher at Rs. 95-5 as against Rs. 95 in the previous week. A corresponding rise in prices of other scrips was also recorded, 1948/52 being done at Rs. 97-4; 1951/54 at Rs. 99-10: 1963/65 at Rs. 94-10; 1947/50 at Rs. 102-10; 1960/70 at Rs. 108-5; 1955/60 at Rs. 112-12; 1945/55 at Rs. 111 and 3 per cent Defence Bonds at Rs. 101-10.

Shares.—The rise in prices, which was noticeable during the last week, continued to be in evidence during the current week also. The action taken by the authorities of the local stock exchange in stopping jobbing operations, the absence o unfavourable war news and the firmer tendency in raw cotton—all these factors were responsible for the rise in share values. At the close of the week prices tended to be somewhat easier following the news that France had agreed to allow Germany to use Syria and French Morocco as air bases. The undertone, however, remains steady.

Textiles.—Cotton mill shares showed an alround improvement in prices on good buying support following the strength of the raw cotton market. *Bombay Dyeing* were done higher at Rs. 1,041-4, but closed easier at Rs. 1,012-8 on profit taking. *Central India* and *Century*, after being done higher at Rs. 288 and Rs. 398, closed slightly lower at Rs. 280 and Rs. 385-8 respectively. *Colaba* were done at Rs. 163; *Gokak* at Rs. 191; *Kohinoor* at Rs. 391 and *Svadeshi* at Rs. 279. In the cash list, *Indian Bleaching* came in for business at Rs. 130; *Ahmedabad advance* at Rs. 278-8; *Sholapoor* at Rs. 2,910 and *Vishnu* at Rs. 1,212-8.

Hydro-electrics.—*Andhra Valley* touched a high of Rs. 1,840 in mid-week, showing a rise of about 40 points over the previous week. Towards the close, however, the price declined to Rs. 1,815 on profit-taking. *Tata Power* showed a rise of about Rs. 10 to close at Rs. 1,570, while *Tata Hydro* were more or less unchanged at Rs. 178.

Steels.—Steel shares led the market with *Tata* ordinaries opening steady at Rs. 364-8 and deferreds at Rs. 1,776. The rates improved further to Rs. 367 and 1,850 respectively in mid-week on active and genuine buying. But at the close buyers were hesitant and there was some selling pressure following the news regarding the usage of the Syrian airbases by German aircraft. The ordinaries finally closed at Rs. 360 and the deferreds at Rs. 1,802-8.

Banks and Insurance.—Bank shares were steady, *Central Bank* being done at Rs. 41-12; *Imperial Bank* fully paids at Rs. 1,522-8; contributories at Rs. 379-6; *Bank of India* at Rs. 139-4 and *Reserve Bank* at Rs. 102-8.

In the Insurance section, *New India* changed hands at Rs. 42-4, while other shares were quoted at last week's rates.

Miscellaneous.—*Bombay Burma Trading* moved within narrow limits and closed at Rs. 435, the highest level touched during the week being Rs. 452-8. *Associated Cement*, after improving to Rs. 138, closed lower at Rs. 134-12 owing to lack of support. *Belapur Sugar* were done at Rs. 203-8; *Alcock Ashdown* at Rs. 557-8; *Indian Iron* at Rs. 28-14 and *Bombay Steam* at Rs. 308. *Premier Construction* were a shade easier at Rs. 85, while *Scindia Steam* were steady at Rs. 19-8. *Shivrajpur Syndicate* closed slightly higher at Rs. 31-12.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, May 15.

Business was again limited in the local market during the week under review on lack of support. Textiles met with fair support. Teas were neglected, while Rubbers closed a shade better. Sugars were a dull market.

Securities.—The local securities market continued to be steady with prices closing slightly higher than in the previous week. 3½ per cent Paper changed hands at Rs. 95-5, while 3 per cent 1963/65 came to business at Rs. 94-9. *Mysore Loans* were slightly better, the price of 4 per cent 1953/63 improving to Rs. 115-5 from Rs. 114-12. 5 per cent 1955 were done at Rs. 125-11. Among Provincial Loans, 3 per cent 1959 *Madras* were in request at Rs. 95-13 and 3 per cent 1952 *Assam* at Rs. 96-9.

Mills.—Prices showed slight changes in this section. *Buckingham & Carnatic* continued to be steady at Rs. 238, the closing level being slightly better at Rs. 240. *Radhakrishna* were lower at Rs. 128, while *Madura* were on offer at Rs. 36. *Cambodia*, after touching a low of Rs. 7-8, improved to Rs. 8.

Utilities.—*South Madras Electric* continued to be on offer at Rs. 12-4. *Berhampur Electric* ordinaries had buyers at Rs. 10-10.

Plantations.—Business in this section was on a reduced scale and some selling pressure was noticeable. *Cochin Malabar* were easier at Rs. 6-7. *Ayer Manis* ordinaries, in spite of the declaration of a 5% dividend on the ordinaries and the payment of 1½ years' interest on the preference shares, were freely on offer at Rs. 8-4. Among Tea shares, *Peermade* were dull at Rs. 27-8 and *Periakaramalai* at Rs. 17-4. *The Highland Produce Company, Limited* has declared a final dividend of 7½ per cent, making 27½ per cent for the year ended 31st December, 1940.

Sugars.—*Mysore Sugar* continued to meet with sellers at Rs. 53-12. *Travancore Sugars* were unchanged at Rs. 14 with no buyers in evidence.

Miscellaneous.—*Mysore Chemicals* were slightly better at Rs. 16-8. *Mysore Paper* were steady at Rs. 14. *Spencer 'A'* preferences changed hands at Rs. 9-8; *Indian Steel Rolling Mills* ordinaries at Rs. 6-14. *Mysore Vegetable Oil Products* came in for transaction at Rs. 19-12.

LONDON STOCK EXCHANGE

Generally steady conditions have been noticeable on the London Stock Exchange during the past week. Giltedged securities and Home Rails are inclined to be easier. The important features of the week have been provided by Kaffirs, Coppers and Oils. The announcement of wasting assets allowances in the Finance Bill has had an encouraging effect. British Funds have been a shade lower with a smaller volume of business passing. 2½ per cent. Consols were 78½, 3½ per cent. Conversion 104⅛, 3½ per cent. War Loan 103⅛ and 3 per cent. War Loan 100⅜. Among India loans 3½ per cent. Sterling Paper were 99½.

Industrials have been more active, the leaders being marked higher alround. *Dunlop Rubber* were 34s. 4½d., *I.C.I.* 30s. 10½d. and *Courtaulds* 31s. 10½d. Kaffirs have been firmer while among Oils, *Anglo-Iranian* and *Mexican Eagle* were very firm at 29s. 4½d. and 7s. 1½d. respectively. The latest developments in Iraq, however, have had a discouraging influence and quotations have been marked down. *Burma Oil* have been steady at 48s. 9d. Rubber and Tea issues have remained unchanged.

NEW YORK STOCK EXCHANGE

Wall Street has been rather irregular and quotations have been fluctuating in narrow limits. They are not very much changed on balance. *U. S. Steel* were $53⅜, *General Motors* $38⅝ and *Anaconda Copper* $25¼.

By Order of the Board,
MACKINNON MACKENZIE & CO.,
Managing Agents.

Calcutta,
The 16th May, 1941.

(*Continued from page 913*)

Rs. 9,14,383 for 1939. The amount written off capital expenditure in 1940 is Rs. 20,060 against Rs. 1,72,044. The allocation to Reserve for Renewals and Additions is Rs. 2,50,000 against Rs. 1,00,000. The dividend is lower at 80 per cent. against 82½ per cent. Even on the basis of the lower dividend the yield on the shares presently quoting around Rs. 42 cum-dividend is very satisfactory, being 7.5 per cent. tax-free.

"WATCH-DOG."

§ Includes Rs. 1,50,000 transferred from Reserves.

(Half-yearly meeting, 29th May, 1941 at 11 a.m.)

Audited accounts for the half-year ended 31st December, 1940 :—

The Profit and Loss Account, after transferring Rs. 20,000 from Equalisation of Dividend Reserve and providing Rs. 1,10,795-9-9 for depreciation and Rs. 68,350 for Taxation and including Rs. 71,366-15-11 brought forward from last half-year, shows an available balance of Rs. 2,28,474-2-4 which the directors propose to dispose of as follows:—

	Rs.	A.	P.
In paying a Dividend on the Preference Shares of 7 per cent per annum, free of Income Tax ...	80,493	0	0
In paying a Dividend on the Ordinary Shares at the rate of 6¼ per cent, per annum, free of Income Tax	1,42,070	0	0
In carrying forward	5,911	2	4
Total ...	2,28,474	2	4

Loyabad Colliery 9 and 10 Pits.—Although a certain amount of recovery and consolidation work is still being carried out at these pits, raisings have increased steadily during the half-year and development continues satisfactorily.

Katras Colliery.—The labour at this Colliery was on strike during the months of November and December, which has affected the profits for the half-year to some extent. This strike was instigated by professional agitators and no genuine grievances were put forward by the labour. A firm line was taken by the management and the directors are glad to report that the labour returned to work unconditionally.

Coke Plant.—During the half-year 42,955 tons were manufactured and 42,287 tons despatched as against 38,762 tons manufactured and 41,657 tons despatched during the previous half-year.

Owing to the continuance of the steel industry's policy of making itself self-sufficient as regards coke supplies, the future of the coke industry is uncertain, and prospects are far from encouraging.

Market.—The market remained quiet throughout the half-year and and towards the end of the period there was a tendency for prices to fall. *The outlook for the future is unsettled.*

Taxation.—The recent increases in Income-tax and surcharge have necessitated not only larger provision for taxation in respect of the half-year under review, but also retrospective provision in respect of previous half-year's profits.

The substantial increases in the rates of Income-tax and Super-tax payable by companies are imposing a serious burden, in addition to which the Excess Profits Tax has been introduced. It will be impossible to maintain the present rate of dividend, tax free, unless increased profits are made and of this there can be no certainty in view of the present state of the coal market. Moreover, it should be mentioned that this Company is especially affected in this respect, owing to the Loyabad disaster; after this accident, dividends were paid to some extent out of reserves, and to pay a similar dividend out of current earnings may necessitate under present rates of taxation an increase of profits by four times the amount so transferred from Reserve.

Managing Agents.—Messrs. Bird & Co.

Authorised Capital—Rs. 1,00,00,000 in 5,00,000 Ordy. of Rs. 10 and 50,000 7 per cent Cum. Pref. of Rs. 100 each. Issued and Subscribed—Rs. 68,46,040 in 4,54,624 Ordy. and 22,998 Pref. both fully paid up.

Carry forward	36,321	28,980	35,257	33,275

(Yearly Meeting, 20th May, 1941 at 12 noon).

Audited accounts for the year ended 31st December, 1940 :—

The profit for the year, after providing for depreciation and Taxation, was Rs. 1,56,287-7-8. To this is added the balance brought forward of Rs. 28,979-15-5, making a total of Rs. 1,85,267-7-1. Out of this the directors have set aside the following amounts:—

Reserve	50,000	0	0
Reserve for Stock	16,844	10	5

This leaves a balance of Rs. 1,18,422-12-8 available for distribution, which the directors recommend to be dealt with as follows :—

Dividend at 20 per cent per annum, free of income-tax 82,102 0 0 leaving a balance of Rs. 36,320-12-8 to be carried forward.

The Workshops have been running night and day throughout the year. The demand for the products has been so great that it has been necessary to double the size of some of the buildings and to install special machines to obtain the output required. This necessitates taking an exceptional sum to cover depreciation as it is unlikely the directors shall be able to keep such special equipment employed after the war.

Managing Agents.—Messrs. Balmer, Lawrie & Co., Ld.

Authorised, Issued and Subscribed Capital—Rs. 4,10,510 in 41,051 shares of Rs. 10 each, fully paid up.

ARTHUR BUTLER & CO., (MOZAFFERPORE) LIMITED

	Year ended October		
	1940	1938	1937
	Rs.	Rs.	Rs.
Net Profit	70,200	67,486	81,269
Allocation to funds including depreciation	32,681	28,597	28,166
Provision for taxation	11,700	...	...
Dividend amount	24,100	39,100	54,100
Dividend % ordinary	1¼	2½	3¾
Dividend % preference	3½	3½	3½
Carry forward	13,411	38,949	39,210

(Annual meeting held 14th May, 1941).

Audited accounts for the year ended 31st October, 1940 :—

The profit for the year, after providing for depreciation, Taxation, bad and doubtful debts, was Rs. 25,819-0-8. To this is added the balance brought forward of Rs. 11,692-5-2, making a total of Rs. 37,511-5-10.

The directors recommend that the amount available for distribution should be dealt with as follows :—

Dividend on the Preference Shares at 7 per cent per annum, free of income-tax	9,100	0	0
Dividend on the Ordinary Shares at 2½ per cent per annum, free of income-tax	15,000	0	0

leaving a balance of Rs. 13,411-5-10 to be carried forward.

This year's revenue account show an improvement. The machine shop and foundry have been kept more fully employed. The directors have commenced the manufacture of their own roller shells and the quality of their shell castings has proved satisfactory.

The structural shop has a substantial tonnage of steelwork in hand and the machine shop is well booked with small miscellaneous orders. Although building work has fallen off to an insignificant amount the directors look forward to better results this year from the engineering departments.

Managing Agents.—Messrs. Balmer, Lawrie & Co., Ld.

Authorised Capital—Rs. 12,00,000 in 90,000 Ordy. and 30,000 7 per cent Cum. Pref., both of Rs. 10 each. Issued and Subscribed—Rs. 7,30,000 in 60,000 Ordy. and 13,000 Pref., both fully paid up.

Synopsis of the balance sheet as at 31st October, 1940 :—

BRIDGE AND ROOF CO., (INDIA) LIMITED

Audited accounts for the half-year ended 31st December, 1940 :—

The profit for the half-year, after providing for debenture interest, depreciation and Taxation, was Rs. 50,432-0-10. To this is added the balance brought forward of Rs. 36,988-13-0, making a total of Rs. 87,420-13-10. Out of this the Directors have set aside Rs. 20,000 to Reserve. This leaves a balance of Rs. 67,420-13-10 at the credit of Profit and Loss Account which the directors recommend be dealt with as follows :—

Dividend at 10 per cent per annum	...	...	30,000 0 0
leaving a balance of Rs. 37,420-13-10 to be carried forward.			

The Workshops continue to be very busy and are well supplied with orders for the next half-year.

Managing Agents.—Messrs. Balmer, Lawrie & Co., Ld.

Authorised Capital—Rs. 10,00,000 in 1,00,000 shares of Rs. 10 each. Issued and Subscribed—Rs. 6,00,000 in 60,000 shares of Rs. 10, fully paid up. Debenture Capital—Rs. 2,00,000 in 400 5 per cent debentures of Rs. 500 each, repayable at par on 30-6-1958, with the option of repayment, in whole or part, at any time after 30th June, 1948.

Adding the balance brought forward from 1939 ...		4,15,002	5	2
Total	...	13,55,557	12	5

Out of this total the directors paid the Preferential Dividend amounting to Rs. 1,50,035 on 27th September, 1940, and have placed Rs. 1,50,000 to Reserve Fund, leaving a balance of Rs. 10,55,522-12-5 available for distribution which they recommend be dealt with as follows:—

Final Dividend of 7½ per cent. on the ordinary and Deferred Shares		3,00,052	8 0
Bonus of 7½ per cent, on the Ordinary and Deferred Shares		3,00,052	8 0
Balance carried forward		4,55,417	12 5
Total	...	10,55,522	12 5

The stimulation of the business mentioned in the last report has continued throughout the past year. All branches of the Engineering activities have been working at top pressure. The Paper Industry has been overwhelmed with orders. The Tea departments have had a satisfactory year's trading, and, despite disappointing conditions in the Coal trade, the Coal department has had a reasonably good year. The Merchant departments started the year with satisfactory stocks which, however, have now been considerably depleted and are becoming increasingly difficult to replace.

Director.—Mr. I. P. F. Campbell.

Authorised Capital—Rs. 60,00,000 in 50,000 Ordy. of Rs. 100 and 25,000 Defd. of Rs. 40 each. Issued and Subscribed—Rs. 40,00,700 in 30,007 Ordy. and 25,000 Deferred, both fully paid up.

(*Half-yearly meeting, held 17th April, 1941*).

Audited accounts for the half-year ended 31st December, 1940:—

After providing Rs. 48,244-9-0 for Depreciation the balance at credit of Profit and Loss Account is Rs. 67,974-1-6 to which has to be added the sum of Rs. 28,382-14-1 brought forward from the previous account, making a gross total of Rs. 96,356-15-7.

From this has to be deducted Rs. 32,143-15-10 for income-tax, super-tax insurance, and commission, leaving a balance of Rs. 64,212-15-9 with which it is proposed to deal with as follows:—

		Rs.	A.	P.
To pay a Dividend of Rs. 5 per share	...	42,000	0	0
To carry forward in Profit and Loss Account	...	22,212	15	9
Total	...	64,212	15	9

With the exception of the Company's Boating Service in the Port, which suffered as a result of trading and war conditions during the half-year under review, the Company's revenue was not unsatisfactory.

The Company's Fleet of Steamers and Boats has been maintained in good condition.

Managing Agents.—Messrs. Hoare, Miller & Co., Ltd.

Authorised, Issued and Subscribed Capital—Rs. 8,40,000 in 8,400 shares of Rs. 100 each, fully paid up.

SHREE GOPAL PAPER MILLS, LIMITED

Audited accounts for the half-year ended 31st December, 1940 :—

The working of the Mill during the period under review has been very satisfactory. The Mill continued to work on full production.

In the last half-year report reference was made to the scheme for further additions to the machinery with a view to increasing output and the general efficiency of the Mills. Orders have since been placed for some of the machinery and the matter is under correspondence with regards to further machinery proposed to be purchased to replace some old machinery and as further additions.

Sales and deliveries during the period have continued to show fairly marked improvement. The standard of quality has consistently been maintained throughout.

The prices for various raw materials, chemicals, stores, etc., have shown further increases on account of the war conditions, particularly of those materials which have to be imported, with relative increase in manufacturing cost. In spite of all this the manufacturing cost has been maintained at a fairly low level. Supplies of various raw materials have been fairly satisfactory and Mills hold sufficient stock of the same.

During the period under review the Company made a gross profit of Rs. 8,43,875-7-6. The accounts, after allowing for interest (on Debenture and other loans), commissions, writing off preliminary, Debenture issue and other capital expenses *pro rata* and after providing Rs. 2,62,627-14-0 for depreciation, show a profit of Rs. 4,30,184 15 0.

There has been set aside a further sum of Rs. 2,25,000 for taxation (Income-tax and Excess Profit Tax), making total provision under this head during the year 1940 of Rs. 3,25,000. The balance in the Profit and Loss Account, after giving effect to this adjustment, is Rs. 2,10,506-14-7, including the sum of Rs. 5,321-15-6 brought forward from the last half-year and which the directors propose to dispose of as follows:—

		Rs.	A.	P.
To dividend on Preference shares for the half-year ended 31st December, 1940 at 6 per cent per annum		14,616	0	0
To dividend on Ordinary shares for the half-year ended 31st December, 1940 at annas eight per share		1,22,558	8	0
To General Reserves		50,000	0	0
To Balance carried forward		23,332	6	7
Total	...	2,10,506	14	7

Managing Agents.—Messrs. Karam Chand Thapar & Bros., Ld.

Authorised Capital—Rs. 32,50,000 in 2,50,000 Ordy. of Rs. 10 and 7,500 6 per cent Cum. Pref. of Rs. 100 each. Issued—Rs. 32,50,000 in 2,18,237 Ordy ; 31,763 Ordy. agreed to be issued to Vendors and 7,500 Pref. Subscribed and Paid up—Rs. 29,38,370 in 2,45,117 Ordy. and 4,872 Pref., both fully paid up. Debenture Capital—Rs. 10,00,000 in 6 per cent taxable bonds of Rs. 1,000, repayable at par in 1947 and Rs. 5,00,000 in 6 per cent taxable bonds of Rs. 1,000, repayable at par in 1949 with the option of repayment at par, in whole or part, at any time after 1946.

MARKET POINTERS

Jute Restriction Conference

The jute restriction scheme will, it is learned, be discussed at a conference of representatives of the Governments of Bengal and Assam, to be held in Shillong on May 20 and 21, when a final settlement is expected to be arrived at.

Negotiations between the two Governments have been carried on for some time past and recently the Government of Bengal submitted a draft agreement to the Government of Assam. If this draft is approved by the latter, it will then be initialled at the ensuing Shillong conference.

* * *

Reduced Sugar Prices

The Indian Sugar Syndicate has permitted a price reduction on sugars intended for despatch to the ports. A rebate upto a maximum of six annas per maund may be given on crystal sugar of the Syndicate's members sold and despatched to ports. A rebate upto a maximum of ten annas per maund may be given on crushed sugars and sold and despatched to ports. The rebate will be allowed only to backward factories, that is, factories whose sales have been poor. A backward factory is defined as one whose sales have been at least five per cent. less than the sales quota released so far. The rebate will not be borne by the Syndicate. Sales are taking place at the premium. Demand from ports has now become keen.

* * *

Cotton Consumption

The following is a statement of Indian cotton (pressed and unpressed) consumed in mills in India, issued by the Indian Central Cotton Committee, based on returns made under, the Indian Cotton Cess Act, 1923, by mills in British India and on voluntary returns from mills in Indian States: British India 243,090 bales in March, 1941 ; 159,959 bales in March, 1940; 1,685,587 bales since September, 1940 ; and 1,418,676 bales during the corresponding period last year. The figures for the same periods in the Indian States were 53,245 ; 45,196 ; 358,791 and 324,996 respectively.

The total number of bales consumed in the whole of India for the same periods were 296,335; 205,155; 2,044,378 and 1,743,672.

* * *

Cloth Exports to West Africa.

The Government of India have inquired of the Bengal Millowners' Association if there will be any difficulty in obtaining cotton piecegoods, particularly grey and bleached goods, from India in time to supply to the Gold Coast and Nigeria during the main buying season opening in October next. They have further inquired whether there will be difficulty in supplying special types of cotton piecegoods required by the West African market.

On the suggestion of the Export Advisory Council, the Government of India have asked the views of the Bengal Millowners' Association regarding the compulsory consumption of short staple cotton by Indian mills.

The Council, at its third meeting, had suggested that Indian Mills should be compelled to consume larger quantities of short staple cotton than they usually purchased and the Government of India should convene a conference of all interests concerned in order to decide on a course of action for increasing the consumption of such cotton, so largely grown in India.

IS IT NOT WISE TO INSURE NOW ?

With an uncertain future ahead Conservation and Consolidation of resources are the prime needs every individual should assiduously strive after.

If you already have Life Insurance, hold on to it. Don't allow it to lapse. If you haven't, go in for it right now. A Life Policy gives an inestimable protection and it will cost you less now than later. It is cent per cent true that to be forewarned is to be forearmed.

Write to us for further particulars or advice.

WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

INTER-BANK call money has been quoting nominally ½ per cent. in Calcutta and ¼ per cent. in Bombay. Supplies are plentiful and there is hardly any demand. So far as term deposits from firms are concerned, banks continue to be keenly interested, particularly in deposits of two to four months. The rate at which term deposits of one to four months are accepted by banks is ½ per cent, and interest on Treasury Bills fetches over ¾ per cent. There is this direct reason for fixed deposits being specially acceptable at the present moment. Besides, deposits maintained by scheduled banks with the Reserve Bank are creeping up only slowly. The figure on May 16, was Rs. 26.68 crores as compared with Rs. 25.52 crores on May 9. Banks would like to see their combined deposits with the Reserve Bank roundabout Rs. 35 crores. Once this level is attained, banks will feel sure in their minds about the slack season being definitely established.

There is no reason, however, to think that banks will suffer, during the slack season of this year, any undue embarrassment regarding industries. While produce finance is returning from mofussil areas to the money market centres, there is sustained demand from industries for bank advance in connection with the greatly expanded manufactures for war supplies. Thus, jute mills are planning to carry larger stocks of the raw material. By the same token, cotton mills are now working to full capacity to cope with war orders; and the accommodation required by cotton mills from banks must be considered greater both because they have to get larger stocks of cotton and because supplies made to the Government can be paid only in a rather leisurely fashion. The same may be said of the steel industry and the engineering industry as well as of large numbers of miscellaneous industries. It is in this connection that the Government announced recently certain facilities to those who have supplied goods to the War Supply Department and who have had to wait sometime before they could get payment. The net effect of these facilities will be that banks will be in a position to discount a considerable proportion of the bills arising from supplies made to the War Supply Department. We, therefore, are of the opinion that trade advances made by banks will not show the usual seasonal reduction. In this connection, it is significant that the real expansion in bank advances took place from March. On the last day of February, advances made by scheduled banks in India stood at Rs. 109.14 crores; by March 28, advances had risen to Rs. 118 crores. On April 25, the figure was Rs. 123.69 crores. May is usually a month in which the process of trade advances coming down makes itself definitely felt. This year, however, the contrary trend is manifest. On May 2, advances amounted to Rs. 124.80 crores; and they have risen to Rs. 125.91 crores by May 9. Bills discounted in India by member banks are also at the satisfactory level of Rs. 6½ crores.

While we believe that the war-stimulated industries will account for bank advances being maintained at a high level, there is reason to think that the demand for short-term funds in the hands of banks will be sustained by the Central Government's Treasury Bill operations. One of the most outstanding features of the recent sterling debt repatriation is that the ways and means adjustments insofar as they pertain to repercussions in India have involved a big cut in the current cash balance of the Central Treasury and a large-sized advance from the Reserve Bank. To liquidate the ways and means advances availed of from the Reserve Bank and to rebuild the Central Treasury's cash balance to what may be considered a reasonable level, the soundest advice, which can be utilised with advantage to the money market and with cheapness and smoothness for the Government, is larger weekly sales of Treasury Bills. The general conclusion from this discussion is that money, while not becoming dear at any time in the slack season, will remain more or less usable. In simple terms, banks will continue to find use for and, therefore, to provide a welcome to, term deposits in the coming months.

May 20, was the first week after a long interval when the market was called upon to put in tenders for a Rs. 2 crore offer of Treasury Bills. This bigger offer was at the end of a week during which the money market had put up as much as Rs. 2,88,75 lakhs towards tap Treasury Bills. Sales of

TREASURY BILLS

India

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills were opened on Tuesday, May 20, 1941. Total amount offered was Rs. 3 crores, 39 lakhs and 50 thousand. Tenders at Rs. 99-12-9 per cent and above were accepted in full and those at Rs. 99-12-6 per cent were allotted approximately 36 per cent. Total amount accepted was Rs. 2 crores, the average rate of accepted tenders being annas thirteen and pies two per cent per annum.

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills will be received on Tuesday, May 27, 1941. Successful tenders should make payment on Friday, May 30, 1941. Other conditions are usual.

Three months' Intermediates will be sold from May 21—26, 1941, at Rs. 99-13-0 per cent subject to the conditions previously announced (viz. sales can be stopped at any time without previous notice, if Government think it necessary).

Three months' Intermediates sold from May 14—19, 1941 amounted to Rs. 2,83,75,000.

During the week ended May 16, 1941, Government of India Treasury Bills for Rs. 3,45,00,000 were sold in favour of the Issue Department of the Reserve Bank of India.

THE MISRA HOSIERY MILLS have, from the commencement of the war, been "on active service". Working day and night, the mills have been supplying essential requirements of the Army in the knitting line.

MISRA HOSIERY cater to the requirements of the general population and comprise socks, stockings, undervests, sports shirts, interlock underwear and outerwear, for men, women and children.

Production 8,000 Articles, daily.

Finance Abroad

THE London money market has continued easy with supplies of money plentiful. It was pointed out in these columns last week that discount houses in an effort to get a greater allotment of the weekly offer of bills cut their rates which resulted in the average rate being pulled down from £1-0-3.16d to £1-0-0.17d. Discount houses have continued to be keen bidders for bills this week also. Despite the fact that there has been a further decline in the amount of applications to £154.7 millions, there is not any appreciable change in the rate which is £1.0018d. It looks as if discount houses will continue to take interest in the weekly tenders in which case there may not be any appreciable change in the average discount. The market quota was slightly lower at 38 per cent. against 40 per cent. in the previous week. Having secured a greater allotment of bills in the last two weeks, discount houses have been more willing sellers of various dates of bills.

It was pointed out at length last week that the problem of the U. S. Treasury was not only to find funds for the huge defence programme but also to finance the needs of the victims of aggressor countries. Towards this end, it was emphasised that it was necessary for the Administration to put into effect methods which would effectively describe the consumption of goods by a section of the population which had a greater amount of purchasing power what time there was an actual decrease in the production of consumers' goods. Apart from the need for discouraging the production of consumers' goods to increase the manufacture of arms and ammunitions and other raw materials, it was absolutely necessary that in order to stimulate saving, the consumption of ordinary goods had to be discouraged, either by way of indirect taxes or price control. The inflationary aspect of this question also should not be ignored.

Details now available go to show that since the beginning of the war, the average hourly wage-rate in twenty-five manufacturing industries has increased by 5.4 per cent. and the weekly wage by 12.2 per cent. The rise in the cost of living meanwhile has been only 1.9 per cent. and the purchasing power of the weekly wage is therefore 10.1 per cent. higher. This is the gain of the workers who were previously employed and the increase in employment is an additional increment to labour's income. Employment has risen by 18 per cent. and payrolls by 39 per cent. In spite of the outcry caused by the fall in exports affecting farmers' incomes, it is estimated that the cash income in 1940 was 5.2 per cent. higher than in 1939 and that this income was practically equal to that of 1937 and except for that year was the largest since 1929. With the possibility of further higher corporation earnings, the national income will therefore show a considerable rise.

A proper balance should therefore be struck between raising additional revenue through fresh taxation and filling up the gap through fresh borrowing. The deficit for the next fiscal year may not amount to the expected total as it cannot be expected that defence production will be speeded very much, and if there is an increase in exports at all it can be only a diversion of war material. In spite of the fact that a still further gain in revenues is indicated in the fiscal year 1942 with the probability of a still greater increase in expenditure, the deficit now forecast at $9.2 billions seems likely to be higher. On the basis of the 1942 budget of $17.52 billions, the ratio named by the Secretary, Mr. Morgenthau, would mean a total revenue of about $12 billions an increase of more than three billions over the present estimates. Additional revenue may be counted on to result in a rise in the national income, going out of defence expenditure, while there is talk of new taxation to yield a billion and a half.

As regards borrowings, the Treasury has been very successful recently. Response of the market to the new 11-13 year taxable 2½ per cent. bonds was definitely favourable demostrating that by raising the coupon and expanding the maturity, the treasury has offered an issue of definite appeal to a wide range of investors including savings banks and insurance companies. The offer of new 2½ per cent. bonds, taxable, consisted of both a cash and refinancing operation, designed to raise 500 million dollars of new money and to refund 504 million dollars of 1⅜ per cent. notes maturing June 15, next. Holders of maturing notes not wanting cash at the maturity date were given the option of converting into either the 2½ per cent. bonds or two year ¾ per cent. notes. The popularity of the offer is best shown by the fact that total subscriptions amounted to 6,145 million dollars against the offer of 500 million dollars and the allotment was only about 8 per cent. The bonds were subsequently quoted at a premium of 2⅜. Most of the holders found it advantageous to have their holdings converted into the new bonds. This augurs well for the future of the new financing operations of the U.S. Treasury which have begun this month with the offer of three new types of securities for which the President issued an appeal. The interest rates on the new bonds, ranging from 2½ to nearly 3 per cent., if held to maturity, may be compared with the rate on the new 11-13 year bonds marketed so successfully.

* * *

It will be remembered that some time ago the Chinese Government wanted to approach the U.S. Treasury in connection with the construction of the Burma-Yunnan Railway. Chinese railway officials and financial experts flew to the United States to hold conversations with U.S. railway interests and explore the possibilities of the sale of gold bonds to finance the construction of the Railway. It is now officially announced that there will be a loan for 10 million U.S. dollars in Yunnan-Burma Railway gold bonds which will be jointly issued by the Ministries of Finance and Communications. The bonds will be open to public subscription beginning on July 1, next at a discount of 2 per cent. and bearing interest at 5 per cent. per annum.

(*Continued from page* 239)

intermediate Treasury Bills between May 14 and May 19, amounted to Rs. 2,83¾ lakhs as compared with Rs. 1,52½ lakhs in the previous week. This was a creditable effort. That, after so substantial a contribution to Treasury Bills, applications on the tender day came to as much as Rs. 3,39½ lakhs, must be considered particularly satisfactory. While we cannot say that the bidding was particularly keen as indicated by the fact that it was found necessary to give allotment (though only partial) to applications at Rs. 99-12-6, it should be considered satisfactory that the average rate of accepted tenders in a week during which the offer of tender bills was Rs. 2 crores, rose only by 5 pies as compared with the previous week in which the tender bills offer was only Rs. 1 crore.

The statement of the Reserve Bank for the week ended May 16, does not show, in the issue department, any change worthy of comment. In the banking department, Central Government's deposits are slightly lower at Rs. 5.28 crores. Other Government accounts are also slightly lower at Rs. 3.64 crores. Burma Government's deposits, however, have risen from Rs. 1.81 crores to Rs. 2.10 crores. Deposits maintained by member banks have risen by over Rs. 1 crore to Rs. 26.68 crores. On the assets side, foreign balances show a small increase to Rs. 31.01 crores. Loans and advances to Governments show a substantial rise from Rs. 6.28 crores to Rs. 8.66 crores.

The exchange market was slightly more active in the early days of the week. This was due to rather freer freight position. There was more business of a general kind in the exchange market. Towards the finish of the week, however, the old dull conditions were re-established.

Banks were sellers of T.T. 1s. 5 15/16d., for ready up to six months forward; and banks were buyers of T.T. at 1s. 6d., for the same delivery.

Banks were buyers of three months' D.A. bills at 1s. 6 7/32d., for the third month and 1s. 6 9/32d., for the fourth month.

Inter-bank call money quoted ½ per cent with no takers.

Firms' money for call and short quoted ¼ per cent and ½ per cent for one month to four months.

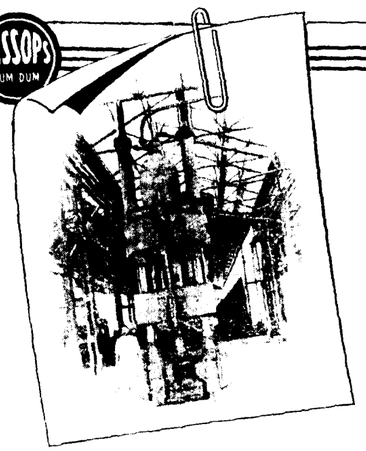
Nazi Economics & World Economy

THE economic aspect of National Socialism has rarely had the attention it deserves, as it has been all along thrown into the shade by the political aspect. And whenever Nazi economics came in for discussion, it was held up to ridicule, or facile prophecies of an early crash were made to serve for intelligent understanding. The outbreak of war can hardly be said to have improved our understanding of the economic policy and achievements of the Nazis as it is a reasonable presumption that an avowedly totalitarian State would carry totalitarianism to the utmost possible limit in a time of war. And what is more, the practical problems of the Nazis are lightened by the conquest and virtually complete subjugation of a whole continent. And when all is said and done, Nazism has to its credit a kind of achievement which is denied to the democracies; and if it is true that nothing is more dangerous than complacent assumptions of superiority, a little thought on the bases of National Socialism and the main lines of its working in Germany is more than ever necessary. An attempt in this direction has been made in a series of two articles published in the *Statesman* under special copyright arrangements with the London *Times*. The author shows a commendable freedom from the usual anxiety to deny credit, when it is due, to an enemy country. He is ready to recount what Hitler can truthfully claim with pride for his regime. He has an insight into the psychological factors that have made economic contentment and hopefulness a source of great strength to Hitler. At the same time he is able to test the foundations on which Nazi economy and, through it, Nazi polity are now resting. All this enquiry is not without purpose. It is intended to yield conclusions of some practical value to the prosecution of the war. Considering that British policy has never altogether discarded the possibility of disillusioning the German people about the merits of the Hitler regime, any study of the changes which the regime has wrought in Germany's national economy has its own value.

It is possible to view this study and its results not only from the point of view of prosecuting the war, but also that of the future of world economy and international trade relations. In the former view, it is important that, according to the writer of these articles, Hitler has made good the promises he made to German labour on his accession to power viz., that of giving a job to every worker and that of maintaining real wages by preventing any untoward development like inflation. Hitler has also succeeded in leading, step by step, the big industrialists of Germany along the path of economic totalitarianism, to the point at which there can be no harking back. They have to sink or swim with the Nazis. In other words, economic conditions in Germany are such that every class has either derived immense material advantage from Nazism or stands to lose by its fall. The attitude of any individual or class to the political creed of the National Socialists, which in most cases is unfavourable, does not affect the support which these individuals and classes feel impelled to give to the present regime. It may be said, therefore, that, if any attempt is to be made now, or at any later stage, to wean the Germans from their adherence to Hitler and the Nazis, the usual cliches of democratic liberalism will serve no purpose. Something positive, some scheme of economic reconstruction which will hold forth the same assurance to labour, and to capital, the guarantee that there will be no progressive unemployment of plant and machinery will have to be offered to Germany. If it is true that mere military successes will not win the present war for Britain, but that the establishment of peace depends on the care with which a new order will be thought out and a blue-print of it handed to all the peoples of Europe, then there is need for a great deal of hard thinking to be done to prevent the classes and masses of Germany heaving a sigh of regret for the Nazis.

At that point, the requirements of war and peace alike converge. For a future world order, what is important in the Nazi policy is firstly, the structural changes which the Nazis have carried out in so important a country as Germany and secondly, the extent to which, and the methods by which, they have met the most insistent and concrete demands of labour and created contentment in its ranks. The former, namely, the structural changes may be thought to affect only the capitalist classes. Though it is true that the capitalist classes are affected in the first instance, large-scale adaptation of the whole capital equipment of Germany to the needs of synthetic production impinges on world economy as a whole. As for Nazism's achievements in behalf of labour, available data are quite inadequate for any definite expression of opinion. If, as it seems not unlikely, German labour has been benefited, not by genuine economic reconstruction, but by the spoliation of other countries, which the Nazis have been able to carry on for years, the labour programme of Hitler has no economic significance. And it stands or falls by the ability of Hitler to stabilise his successes and to keep the conquered countries under his heel. For our part, we feel that *prima facie*, it is impossible for any nation, even for the Germans, to maintain a crushing military superiority over land and air and at the same time house and feed its millions adequately. The spoliatory character of the German economic system, whether it takes the shape of the diabolically ingenious schemes of Dr. Schacht, or the open billeting of Germans on the conquered countries, is indisputable. Starting with the maxim of "guns or butter," the Germans have achieved division of labour and unity of consumption. They produce their guns and take away other people's butter. In any case, distributive systems, while they should, no doubt, inform systems of production, are necessarily dependent on them. Hitler's largesse to his workers, while it can offer guidance in matters of administration, cannot be said to have discovered and enshrined any new economic principle.

The structural changes in Germany's national economy remain, therefore, as by far the most important factor. Here, there is an important question to be answered before any useful conclusions can be drawn. How far are these changes due to transient, though real, difficulties experienced by German industry in securing the necessary raw materials and paying for them? How far were they forced by the pressure of Nazism and the acceptance of a policy of preparing for a war against all the rest of the world? It stands to reason that, in goading German industry to accept war as an aim and to orientate itself to the production of synthetic substitutes, Hitler must have taken advantage of the difficulties genuinely experienced by German industrialists. All this will not suffice to establish that the expensive production of synthetic substitutes is the new trend in world economy. But this trend emphasises at once the need for economic reconstruction on a national basis and the wisdom of providing for a freer interchange of goods among the nations of the world. The integration of national economies, reconstructed on a rational basis, with complete freedom from "free trade," imperialist domination and, not less, from the glamour for the spectacular, but dubious, achievements of *ersatz* can alone provide the solution for the world's political and economic ills.



India's Foreign Trade in 1940-41

DISCUSSION on the problems of India's trade has been continuous, if a little confusing, and the appearance of the trade returns for March will naturally stimulate interest in a subject of vast and perennial interest. The seaborne trade accounts indeed support relatively favourable conclusions as to the quantum and the balance of India's trade in the past year. It is indeed possible to assert that the total value of India's trade shows a comparatively small decline though it may be argued that monthly variations are now much wider and the influence of price-changes more than ever distributing. Any marked improvement in the coming months is ruled out by the war but the resilience exhibited since July last suggests that not much damage can be caused to India's exports in the immediate future. That is a conclusion on which emphasis may be rightly laid, and if the supply position were corrected in order to adjust export trade to changes in demand, it may be admitted that no specific changes in policy will be required Whether the comparative steadiness of India's foreign trade supports the widely different conclusions drawn as to the effects of the war on India's economy or not, it is apparent that the changes disclosed by the latest trade returns are not wholly unexpected. Total exports of Indian merchandise valued at Rs. 186.9 crores in 1940-41 were only Rs. 17 crores below the value of exports in 1939-40 when exports were stimulated by the brief war boom and prices were put up. It may be recalled that an improvement of over Rs. 2 crores under re-exports as compared with 1939-40 reduces the fall in exports to Rs. 15 crores. A point to bear in mind here is that one must proceed with caution. It must be stressed that percentage changes can never convey an adequate impression of what is going on. The totals are furnished in the summary table below:

	1938-39 crores Rs.	1939-40 crores Rs.	1940-41 crores Rs.
Total imports ...	152.36	165.28	156.79
Total exports ...	160.21	213.57	198.71

It may be taken as proving that India's trade balance remains favourable and it has contributed in many ways to the strengthening of the country's financial position. That the repatriation of sterling debt is, in the main, a consequence of the large trade balance is generally appreciated though the creation of new rupee debt may obscure such favourable developments. A more important point to grasp is that imports have gone down at the same time as exports. Normal corrective influences are at work as the trade totals for 1940-41 are considerably in excess of the totals returned for 1938-39. The figures may even suggest that the closure of many markets has been counteracted by other and favourable factors during the war period but the quantity totals are not known and price changes if they are counted merely on the average value in March per unit of exported articles have not been inconsiderable. The changes are indeed striking as regards castor, groundnut, and linseed. It is equally striking in the case of raw jute and the accounts incidentally show that while jute manufactures have advanced, gunny cloth has gone down. Even more surprising is the rise under hides and the fall under skins. The steep rise under imported cotton yarn and the very slight increase under yarn and piecegoods adds one more paradox. That is why one regrets the absence of the usual details furnished in the monthly accounts. The material for a complete accurate picture does not exist at present and one working along rather difficult lines knows that with shipping difficulties such as restrain any recovery in exports the dislocations in the port trade have operated to the advantage of India. If the fall is of the order of Rs. 8½ crores against a fall of Rs. 15 crores under exports, the influence of the secular movement in prices cannot be ignored ; nor can one afford to overlook the adoption of import control adopted mainly to reduce the need for dollar exchange. It is noteworthy that the increases under imports shown in the detailed statement related to ale, beer and porter, raw cotton, kerosene and other kinds of mineral oil. The difficulties experienced in getting outside supplies underlie the increases shown under chemicals, dyestuffs, glassware and machinery of various classes. The most substantial fall recorded is under imports of cotton yarn and piecegoods of all descriptions. A fall of nearly Rs. 3 crores is recorded under the value of cotton textile imports, and the proportion of retained imports must be less as re-exports are known to have gone up last year. This explains the *confidence that* now marks the textile industry which took more imported cotton last year, exported a great deal more of yarn and piecegoods and got over most of the trouble caused by the strikes following the war. It may be mentioned here that cotton twist and yarn valued at Rs. 4.09 crores and piecegoods valued at Rs. 10.64 crores showed increases of Rs. 2.29 and Rs. 4.53 crores respeively over the previous year's exports. The comparatively *indifferent showing* made both by jute and jute manufactures (an increase is noted only under gunny cloth) explains why jute mill shares are frowned upon at present while cotton mill shares are favoured. The fall of over Rs. 5 crores under jute manufactures is unimportant as compared with the fall of Rs. 11.98 crores under jute as compared with the value of exports in 1939-40. The fall evidently furnishes the justification for the policy leading to curtailment of production. It is certainly worthy of comment that raw cotton, jute, jute manufactures, raw hides and skins and groundnuts suffered most on account of the war. The loss of neutral markets, too, in Europe explains the gradual decline but the war also explains the rise of Rs. 1.42 crores

to Rs. 27.73 crores in the value of tea exported from India last year. Tea now forms the largest single item in India's exports, having displaced cotton, and that is why in the editorial note on the tea trade last year special reference was made to the high stability of both prices and production owing to the continuance of demand on the same scale in spite of the war.

The main lines on which the trade of India is being shaped by the war emerge on the most cursory review of the figures. A remarkable fall under sugar imports was only to be anticipated when the indigenous industry has a large carry-over entailed by overproduction in 1939-40. The fall under paddy imports is as high as Rs. 4.94 crores but the circumstances of the year have to be considered. A relatively good harvest at home reduces the need for imports affected to some extent in the past year by the termination of trade relations with Indo-China and the chronic shipping shortage. Imports of cutlery, hardware, paints and colours, footwear, glass, porcelain etc., have gone down. The decline is sure to redound to the advantage of the secondary non-protected industries. A very substantial decrease under imports of machinery as compared with the two preceding years is disclosed. The reason is intelligible but the decline will have no specific influence on local industry. Further falls under iron and steel and manufactures thereof during 1940-41 were to be anticipated and the increase under copper can be referred to the advance in prices.

A feature of the returns is that only under wool and rayon yarn are there any appreciable increases. The latter suggests that the increase in the import duty on yarn was warranted ; for, any decrease would not be unwelcome to textile interests asking for quota restrictions repeatedly. The rise under wool is explained satisfactorily but the absence of German goods is reflected in the fall shown under shawls and lohis. A very small increase is shown under cotton hosiery and among the other textile items silk yarn shows an increase owing to the higher price while takings of silk piecegoods were reduced. The only miscellaneous item under which any large increase is shown is tea chests. In view of the enquiries made in the Australian market for teachests the increase is understandable. The further fall in soap and cement augur well for the Indian manufacturers and it may be pointed out that the only item under which any considerable increase occurs is paper and pasteboard as total imports have risen in value to Rs. 3.29 crores. The increase does not take into account the reduction in the volume of supplies, for Scandinavian and German supplies are impossible to obtain, and the Indian paper industry has reported a pressure on supplies while endeavouring to limit the inevitable rise in prices.

If the import statistics indicate that the war-leading to reduced foreign supplies, has helped several industries in India the export table shows that exports have risen in certain cases mainly on account of the war. The increase shown under wheat, wheat flour and rice can be safely put down to war demand. The calamitous fall under coffee is the consequence of events in Europe and the accelerated increase under lac owes much to the U. S. arms programme. It is again noteworthy that a decrease is shown under manganese ore. The decrease may suggest that the optimism of the Meek-Gregory mission was ill-founded. The increase shown under rape and linseed exports may appear exceptional but the arresting increase under groundnut oil proves that the oil-crushing industry has developed, perhaps under the stimulus of accumulating stocks of oilseeds. The fall under wool may not be entirely due to the export restrictions in force but the small fall under rubber is unexpected.

Reference has been already made to the marked expansion in the exports of textile manufactures but the prospects for carpets and rugs have been undermined by the war since the advance in the price of wool is accompanied by a fall in the value of shipments last year. An idea of the difficulties of the South Indian coir industry may be obtained from the fall of about 40 percent in the value of coir exports last year. Broadly speaking India's foreign trade moved only as was expected under the strain of war and the expansion under tea, cotton manufactures, shellac many lead to the conclusion that several heads of exports are likely to benefit further through the war. It is difficult to describe how far the expansion of other exports of Indian manufactures has progressed though occasional reports about the replacement of imported supplies and the opening up of new market for Indian manufactures shows that the composition like the direction of trade is changing fast. The changes in regard to India's supplies and markets will have to be considered later in relation to the widely favoured belief that the Empire including the U. K. must sustain India's trade as exports to foreign countries have fallen by Rs. 19.6 crores in 1940-41.

Editorial Notes

Trade with East Africa

REFERENCE has been made frequently to the new openings available for Indian manufacturers in East African markets. Mention was made of exports like paints and varnishes, builders' hardware, etc., in which U. K. and German competition had virtually disappeared and the prospects were appraised as more than promising by the Trade Commissioner in his reports. In the report tor 1939-40 released this week the subject of India's trade with British East Africa is discussed at some length. Textile imports to British colonies have improved as a result of the war, and the increase in imports of raw cotton from Kenya and Uganda last year suggests that the advantages are equally balanced. Mr. Ismail who is stationed at Mombasa writes in his second annual report that the despatch and receipt of samples has stimulated interest in Indian piecegoods. The adoption of import control in Tanganyika, Uganda and Kenya did not create any obstacles, and it is pointed out that imports into Tanganyika must increase as the Eastern port of the Belgian Congo and the territory of Ruanda-Urundi must look to Dar-es-Salaam. It is urged that Indian exporters should concentrate on keeping the new markets wondering in the war period. Suggestions are offered as regards the despatch of able commercial travellers, the sending of adequate, properly priced samples, the quotation of c.i.f. and f.o.b. rates and the publication of advertisements in leading local newspapers. Financial and trade conditions in East Africa generally are described in the report which notes that Kenya's exports rose to a record level in 1939-40. A shrinkage in total trade turnover is, however, reported by all the territories in whose trades the U. K. has long occupied first place. It may be remarked that Japan had a bigger share of the foreign trade of East Africa than India which took a much higher proportion of the exports than Japan. The point has been often explained and the recent improvement, conditioned largely by the inability of U. K. to send goods, though her share in 1939 showed little change is also attributable to the better conditions prevailing and the cessation of trade with Germany which was second only to Japan and Britain in the trade of Tanganyika whose exports rose rapidly while imports declined. The report notes that imports of bleached and dyed piecegoods into Kenya and Uganda increased while India shipped a larger quantity of cotton blankets. Imports of wheat and wheat flour, jute manufactures and footwear from India increased in both the Colonies and the Mandated territory of Tanganyika. Exports from the latter comprise gum Arabic of which India is the principal buyer as also of cotton. Imports of millet and cashew nut into India show that foodstuffs are also among the goods. Kenya and Uganda provide sodium carbonate of which India is, after Australia, the biggest buyer and wattle bask of which the U. S. A. takes the largest quantity followed by China the U. K. and Japan cotton and sesal are among the best-known exports and India as the biggest buyer of cotton takes about a third of the total export of Kenya and Uganda. A very significant increase in the number of trade enquiries cleared attests the interest shown in Indian goods. Films were among the goods wanted and exporters in India asked for information relating to suitable agents. The Trade Commissioner has recorded before and since his opinion that India has unusual opportunities as her former rivals are in difficulties. Suggestions as to attention to designs and specifications for local requirements and these may be commended to Indian manufacturers who should note that the ground lost by India under grey and printed piecegoods last year can be recovered. The openings available in the East African market are likely to increase after the victory of British arms in Abyssinia. It has been announced in April that trade between India and what was formerly Italian East Africa would be encouraged as early as possible.

Syria, Vichy and Britain

The range of operations in the Middle East considerably widened during the past week. The attempted invasion of Crete by air is of lesser importance than the establishment of German bases in Syria. The events in the country which ceases to be a Mandate as France is out of the League can only be described as depressing in the extreme. Darlan has evidently given away as much as Laval would have done, and the release of French prisoners of war has been procured by an act that is a flagrant breach of the promise made by Mittelhauser and Petain too in July immediately after the armistices. Syria is made available to the Nazis, it does not matter on what conditions, and when Mr. Eden said last week that Britain was aware and was prepared to act, everyone rendered the gravity of the warning. A more serious warning was conveyed on Thursday by Mr. Eden who spoke to the French people as distinct from the dejected and discredited Vichy clique when he announced that collaboration would lead to the peremptory effacement of the line drawn between Occupied and Unoccupied France. The consequences of collaboration have been serious. Apart from steps taken to prevent French ships leaving without notice for Europe there have been statements, precise and

emphatic, about the policy to be adopted by the Americans in regard to French colonies. The U. S. A. is no longer interested in the miseries of France for relations are strained and Admiral Leahy's mission is apparently a failure. The blockade will be tightened as many expect, and if controversy revives, it will be seen that the U.S.A. will dissociate itself from all protests. The U. S. A. has before the last war shown interest in Syrian nationalism and American influence has been paramount in Beirut. Apart from the jokes about the solitary Syrian found in University fraternities there has been immigration and Syrians like Armenians have been distinguished from Asiatics generally. The events in Iraq are a threat to U. S. oil interests which are increasingly prominent in the Middle East and the press has not yet forgotten that in new fields in Bahrein and Saudi Arabia the U. S. companies have assets to set against the losses in Iraq. The arrival of Nazis near the Iraq fields does not spell danger but the U. S. A. has decided that as in North Africa any threat to the existing arrangements would find her ready to adopt something more than precautions. If the Straits of Dakar (to use Lord Halifax's expression) were menaced by the advent of the Nazis the U. S. A. would go beyond verbal protestations. The President has not made yet his statement in foreign policy but he, like his cabinet, has indicated that the U. S. A. is prepared to move forward from non-belligerency to active intervention. Vichy's attitude may lead to a momentous change in U. S. foreign policy and the Germans may lose more than they gain. The consequences of Darlan's action cannot be localised, though it is not only the French Colonial Empire in America that may resolve where and how co-operation with Britain can be attempted on the basis of the terms accepted by General de Gaulle.

Capital Levy in Finland

Proposals for a capital levy may be regarded as essentially a post-war phenomenon but the successive additions to the public debt of nations are a reminder of the inevitability of such proposals. It is interesting to recall that the initial suggestion came in November 1914 and it was only after the proposal was rejected by the Colwyn Committee that it ceased to provoke controversy in Britain. Czechoslovakia is known to have tried it, the levy being paid in instalments so that it was virtually a heavy income-tax to which the capitalist was subject. Switzerland has rejected the idea of a capital levy but another small democracy has applied it. The Russo-Finnish war of 105 days left a disturbing legacy. Reparations had to be paid to the sufferers and Finland has boldly experimented with the capital levy. Professor Suviranta of the Bank of Finland has explained quite recently the genesis and character of a heroic remedy. It has been estimated that Finland lost on account of the war something like 20 to 25 per cent of her national wealth. The Treaty of March 1940 deprived her of territory and population too and the tasks of reconstruction imposed new obligations. Evacuees had to be helped and as was pointed out lately by a *Times* correspondent the absorption of the Baltic States threw up new claims for relief. Claims from Finnish citizens for compensation for war damage had to be met by compulsory insurance, means that claims have to be satisfied out of public funds. It has been said that 650 million finnmarks would cover the loss sustained by property owners and the premium receipts held by the State under the new insurance scheme are to be applied towards the compensation payable. Banks helped to meet the first payment calculated on the basis of 1938 valuation of property. A cash payment and 5 per cent short term bonds are offered to property owners normally entitled to compensation. The Finnish citizens who lost property through the transfer of Hangoe and other districts have obviously a claim to be indemnified. A graduated scale of compensation was devised and prices were not adjusted, mainly to protect the Government. Here too cash and bonds of two types, one bearing interest at four per cent and the other at 2½ per cent but redeemable in 25 years are offered. The legislation passed in Finland for this purpose puts the liability at 9,000 million finnmarks. The bonds are to be paid out of the capital levy. The bonds are not readily transferable so that the State's credit does not suffer through the emission of new debt and the public too does not borrow on the new securities issued. The Government of Finland passed a law which expects to secure 6,000 millions through a capital levy. All private property is subject to the new levy applying at rates from 2½ per cent for 40,000 marks up to 15 per cent for a large fortune of 6.4 million marks. Beyond this limit there is a flat rate of 20 per cent: only minors with less than 40,000 marks are exempt, and there is a higher rate for childless persons over 24 years of age. The levy is to be collected in ten half-yearly instalments. It is evident that a single payment is difficult. Property-owners who are offered rebates for advance payment to pay up additional instalments, are not all of one type. Moreover, it is much easier to collect a new property tax (which is what the capital levy amounts to) in addition to the regular income-tax. It is true that the capital may vanish within the period during which tax is paid. A non-recurring levy is difficult to collect, and Germany is known to have compromised over the capital levy in 1919. It is, however, apparent that in Finland the total wealth will be distributed in a new way after the lapse of five years, because corporate property may be sliced off on the sliding scale principle while the shareholder too is asked to contribute. The capital levy applied in Italy was worked differently, perhaps more equitably, but Finland has to see that the yield does not suffer. The increase in national debt has to be met by a substantial addition to revenue without changes in the income-tax. In spite of inherent contradictions the capital levy has merits. But the transfer of wealth to new classes of bondholders will create difficulties particularly as they too may be called upon to make payments to the State. Payment by means of an assignment to the State of title to an agreed proportion of property is not possible and only money will help the people impoverished by the war. This explains the terms of the levy which comes into force this month probably.

The Mark's Depreciation

It is known that the rate for the Reichmark quoted in the New York market has shown no change whatsoever since the war broke out, whereas sterling depreciated and was pegged soon afterwards. The stability must be artificial for Germany's difficulties are many and acute. The foreign exchange market in New York while it may show that the yen stands at 23.4 cents for over a year and half cannot be taken as indicating the true worth of the German currency which still stands at the dollar parity based on the old well-known rate of 12.4 marks to the pound sterling, according to the published quotation which is described as nominal. The vast additions to the Reich debt, the scarcity of goods in conjunction with the plenitude of money and the shifts to which Germany is put in order to procure foreign supplies paid for by a strict rationing of Reichsmarks for the Occupied Countries also demonstrate that the internal value of the Reichsmark is no longer the same, though the Reichsmark is technically linked to gold. The position has altered considerably, and recent movements in the European markets have shown that the Mark in spite of the numerous varieties created by clearing arrangements has gone down. A note in the *Svenska Handelsbanken's* quarterly review for March-December shows that while the Swedish Krona remains a 'hard' currency, other currencies have not displayed similar steadiness. The Reichsmark in particular has fluctuated though Sweden is one of the few countries with which the Reich preserves commercial relations still expanding in spite of the war. It is noted that German blocked commercial marks after a previous sharp rise again declined from about 35 kroner per 100 marks in the middle of December to about 26 kroner in the middle of March. The qualifying adjective blocked must not be taken seriously because all kinds of marks are blocked at some time in some way or other, and the Stockholm rate is not that quoted in a black market. The clearing rates between Germany and the countries of Southern Europe were quoted, after various adjustments, at a diagio for the mark amounting to a uniform 20 per cent for all those countries. That forward marks would be at a discount could be guessed, but it could not be inferred that the clearing rates would be affected to such an extent as that mentioned. It is known that the rate between Occupied France and Germany stood at 20 francs to 1 mark. The Unoccupied area retained a slender but wholly nominal connection with the dollar, the rate quoted being 43.8 francs per dollar which rate in turn means that the £ was treated as equal to 174.5 francs while the mark, on the same basis as that adopted in Occupied France means that 8.75 marks go to the pound sterling, a patently fictitious rate. It has been noted that the rate for the franc in the free market is considerably less advantageous. The Swiss quotation fell from 8.95 (8.72) at the turn of the year to a bottom of

6.6 (6.43) on March 12. Some improvement has taken place since owing to an agreement under which Switzerland has promised not to deal in French francs for other countries. The rate in Zurich rose to 7.10 (6.92) in consequence. It may be taken that the Zurich rates which point to the depreciation of both dollar and sterling (not permanent however) in the single free, fully neutral and wholly sensitive market towards the last quarter of the year are the most reliable guide to the changes in the value of both franc and Reichsmark. The perceptible recovery in the rates for sterling in Zurich since December show that in contradistinction to the mark and the French currency sterling appreciated. On the other hand fears regarding the freezing of foreign balances in the U.S.A. led to the free offering of dollars in Stockholm, though the rate was maintained at 4.20 kroner to the dollar while the rate in London was 16.95 kroner to the £ throughout the period ended March 15th.

More Ships from the U.S.A.

A telegram received this week from London by the Associated Chambers of Commerce of India adds much to one's knowledge of America's shipbuilding capacity and readiness to help. The telegram states that the output of merchant ships excluding vessels destined for the Great Lakes rose from 1,57,000 gross tons in 1915 to 35,80,000 tons in 1919. According to the *Journal of Commerce* the total tonnage of merchant ships delivered in 1939 was only 241,000 gross tons whereas deliveries during this year are expected to total 8,60,000 tons gross. Various alterations in the shipbuilding programme, announced since February, may raise the 1941 total of merchant tonnage to one million tons but with America's vast resources in material and industrial skill it should be possible for the United States to exceed even the 1919 output within a not too protected period. The estimates of shipbuilding capacity have to be related to America's rising steel output and the programme of closer co-operation with Canada only last week the Bureau of Shipping in Washington announced that 800 ships totalling over 5 million tons were building or were to be built under contract in U.S. yards as on May 1st. The majority of the ships have been ordered by the Government or the U.S. Maritime Commission. There is also an understanding that the fifty big cargo steamers aggregating 310,000 tons recently requistioned by the Maritime Commission from owners of intercoastal lines will be delivered within the next few weeks. These ships will be diverted to ports on the Red Sea by way of the Cape. The threat uttered by the Nazis against the use of the Red Sea is not likely to deter the U.S.A. from sending ships to a region that has been excluded from the combat areas specified by proclamation. Neither mines nor aircraft action will prevent the U.S.A. from sending ships carrying supplies for the Army of the Middle East towards the Red Sea.

Germany's problem

Discussing the econmic vulnerability of Germany particularly the deficiency of nonferrous metals, a note in the *Economist* of May 10th states with the exception of aluminium and to a lesser extent of spelter Nazi Europe is deficient in non-ferrous metals. Europe's mined production of copper only rose from 103,000 metric tons in 1909 to 149,600 tons in 1937 while its proportion to total world output fell from 10 per cent to 6 per cent. Europe's mined production of spelter increased from 438,000 metric tons to 445,200 tons but the share of Europe in total world output fell from 41 per cent to 25 per cent. Its output of lead showed an absolute decline from 332,000 tons to 248,600 tons and the percentage of Europe's to world production too fell from 28 per cent to 15 per cent. Europe does not produce tin and the Nazis certainly have to depend on outside supplies. It is pointed that substitutes have not helped Germany much: the search for synthetics which has revolutionised both arms and textile production has not been of influence on metals. There are no synthetic metals and the extent of substitution by plastics has been very small. While the supply position of Britain and her allies is vastly stronger than in the last year, as tin, copper and aluminium production have developed greatly, the Continent's supplies of non-ferrous metals except aluminium are not bigger than twenty-five years ago while Japan's resources are inadequate. The shortage of metals must remain a sore point with Germany who may find that the Balkans provide little. What was looted from the Low Countries must have gone by now, and the forecast that Norway's metal refining industries would not help much when the requisite ores could not be obtained as Britain was waging economic warfare finds ample vindication in the current estimates of the shortage of nonferrous metals in Germany and her victims.

Trade with Iraq

Following the outbreak of hostilities in Iraq a notification has appeared last week with reference to imports by sea from any port of Iraq or Iran in the Persian Gulf. The notification prohibits such imports unless accompanied by certificates of origin or interest in the form set forth in the notification (the form essentially similar to that of the ordinary consular invoice). The certificate has also to state that of the cost of the goods described therein not more than 25 per cent. was derived from materials grown or produced or form work done within enemy territory. The prohibition does not apply to certain specified commodities such as foodstuffs, animal fats, camel hair, goat's hair, raw cotton, carpets, raw and carded wool, hides and skins, leather, soapwort, petroleum and petroleum products, charcoal, vegetable oilseeds and oils, opium, gum, guts and gallnuts. Exemption is given to goods imported in pursuance of clause (a) of the proviso to subrule (1) of Rule 58 of the Defence of India Rules and to any consignments the delivery of which is authorised on payment of security, pending the submission of the certificate of origin and interest, or of a permit issued under the provisions of the Defence of India Rules. Exemption is also made as regards the bonafide personal or household effects of any person entering India and similar exemption is granted as regards goods which can be proved to the satisfaction of the Collector of Customs to have left the place from which they were consigned not later than May 14th as also goods which though not covered by certificates of origin and interest have been specifically approved for shipment by a consular officer of H. B. M. in Iraq or Iran as the case may be. The abovementioned certificate has to provide the description for each case or bale along with the value and contents together with the name of the producer or manufacturer.

MILEAGE COUPON TICKETS
FOR
COMMERCIAL FIRMS and TRADERS

With effect from 1st June 1941, a new series of Mercantile Mileage Coupon Books will be introduced on this Railway as follows:

28 coupons of 50 miles each — 20 coupons of 25 miles each
50 " " 10 " " — 100 " " 5 " "
100 coupons of 1 mile each

These may be used any time within **six months** from the date of issue of each book and are valid for use on the G. I. P., B. B. & C. I., N. W., E. I., E. B., N. S., M. & S. M., Mewar State, Mysore State and S. I. Railways

PRICE OF COUPON BOOKS

First Class ... ... Rs. **297-8** per book
Second " ... ... " **148-12** " "

Some Advantages of Mileage Coupons

1. You buy your rail travel in bulk which is much cheaper than a large number of short journeys.
2. You avoid the need (when on tour) of carrying with you considerable sums of mony for purchase of Railway tickets.
3. Cash disbursements to Representatives for the purchase of Railway tickets are avoided,
4. A book of coupons may be issued in favour of upto four persons bolonging to one Firm.

Full particulars about these time and money saving Coupons can be obtained on application to :—

LAST week, I suggested by way of criticism of the Bengal Chamber's letter to the *Statesman* that the time is come when the British commercial community in India should try to define for itself its attitude to the political problem in India. Ten years ago, it would have been all right for the Bengal Chamber to denounce unreservedly a prominent Briton for advocating a large measure of political reform in India and to state its own position as identically the same as that of the Government. The Chamber could also appear in the role of an inveterate opponent of India's political aspirations. But, once the nationalist movement has gathered momentum, the attitude of British commerce to India's freedom gains a new importance. Even if it be supposed that the movement secures no tangible achievement, that the Government's power to quell the movement is unlimited and unimpaired, even then, it cannot be in the interest of British commerce to bait public opinion in India by showing an attitude of inveterate opposition to India's aspirations. For, the ability of the nationalist leaders to organise opinion in the country introduces a new element into the situation. A boycott is a familiar and handy weapon in the hands of a community which, for some reason or other, is not able to gain control of the machinery of its government. The dangers of unreasoned opposition lie not only in the possibility of whipping up sentiment in favour of some kind of direct action or other but also in making a settlement with the nationalist government of the future more difficult than it need be. As I pointed out last week, politicians and officials can hardly be expected to bring to bear the same dispassionate view on the relations between business and politics that businessmen can or should. Political jingoism may have its origin in the requirements of big business. But jingoism is a peculiar emotion. It creates and sustains a psychology peculiar to itself. It is not always that policies springing from such motives are helpful to business. Up to a point, business requirements and jingoist policies may move in the same line. But once the divergence occurs, one must be quick to see it and adjust one's policies according to the changed requirements.

I hold that this divergence in the case on hand has been there during the last few years. The most arresting proof of it lay in the fact that during the non-co-operation movement, cotton mills under European management felt obliged to come to terms with the Congress for the conduct of their business. The power of the Congress over the various kinds of business must necessarily be uneven. Obviously, other business units found themselves in a position to snap their fingers at the Congress. And in one notable instance, shipping, the attempts to drive foreign interests out of the coastal trade proved to be a boomerang, not only for Indian shipping, but for Indian business as a whole. But the success of the British commercial community in getting safeguards incorporated into the Government of India Act is by no means a pointer to future trends. It is not that the safeguards are a beacon of hope. It is the action of the cotton mills that are a warning.

I should be the last to suggest that British business should make an abject surrender to India's claims regardless of justice and equity. On the other hand, I am one of those who believe that our economic problems cannot be solved except by a decade of close Indo-British co-operation. But neither co-operation, profitable to both sides, nor even the preservation of legitimate interests can be helped if the British commercial community will be content with playing second fiddle to the British Government whose judgment is handicapped by the prejudice of officialdom in this country. Any business in modern times finds itself obliged to give special attention to its relations with the public. This is considered to be important even in cases in which the interests concerned and the consuming public have a number of common bonds. How much more important should it be in the case of the British commercial community which has been, as the Indian Chamber has pointedly remarked in its statement, the traditional opponent of India's freedom. It is, indeed, strange that what seems so obvious and imperative in each individual case should, in the collective view, become so obscure and so unimportant. It is a fact that, faced with a boycott, cotton mills found it wise to come to terms with the Congress. It is a fact that almost every important business house has a public relations officer who presents the activities of the company in the best light to the public, sets out its view of service to the country and its people and combats the idea that the company is but an agent of ruthless exploitation. But to the commercial bodies, these facts seem to have no importance, and even those, who, I know, are full of sympathy for the Indian viewpoint, experience little difficulty in authorising an announcement calculated to have the most

exasperating effect on the mind of the public.

The Indian Chamber's reply makes effective use of all that was clear, though only implicit, in the letter of the Committee of the Bengal Chamber. It is a dignified statement and its plea for a rapproachement must appear to wide circles in India who are not affiliated too closely to any political party. In fact, the Indian Chamber's statement as, indeed, that of any Indian commercial body always shows that Indian business, while it appreciates the views of Indian nationalism, does not let them override the considerations which ought to have special weight with businessmen. In the rabid nationalist view that may not be a very admirable quality. But I contend that the views of the British Government and the British commercial community in India should reveal a difference similar to the difference between the views of the Congress and those of the Federation of Indian Chambers. Such a difference on both sides will be the best means of securing good relations between the Nationalist Government of the future and British business in India.

After all, there can be no better manifestation of the patriotism of the British community in India than the care and foresight with which it conserves its interest in this country. Its interest certainly does not lie in unthinking opposition to India's claims. On the other hand, it owes it to itself and to the Home country to show a keener awareness and appreciation of the position in India and its ability to suggest policies calculated to protect its interests in the long run. If the Briton in India takes his stand at the present moment and thinks out the problem afresh, he will realise what a variety of facts, factors and considerations crowd on his mind. There is, no doubt, the near view, in which, it is not that the eye sees, so much as the hand clutches and grabs whatever is felt to be at hand. The near view is no view, strictly speaking. Vision means, except in a narrow physical sense, foresight, the ability to focus the eye on what is at a distance, see it, both in its broad outlines and in its details, to size it, so to say, to a nicety. To the near view and the long view must be added the faculty of fastening on what is immediately imperative. It is not to be confused with either of what have been mentioned before; for it is not comprehended by the near view or the long view. It alters considerably either or both. But it is an entity by itself.

Adapting these somewhat abstract reflections to the case in hand, one might say, that the near view suggests nothing but grab and grip, to grip what you have, to grab what is near at hand; that the long view suggests the developments of amicable relations with the Indian public on the presupposition, of course, that India's Swaraj is inevitable; and lastly the immediate requirement is the harnessing of every ounce of available energy for the task of winning the war. And included in the last, is the other imperative task of keeping internal peace, protecting the country from the danger of internal strife and securing the co-operation of a united people in the prosecution of the war.

Mr. Arthur Moore appears to be one of the few Europeans in India who have cut themselves from the moorings of the traditional ways of thinking. He looks at the problems straight in the face, finds himself impelled to give predominant importance to the war, and to subordinate the craving for domination to the requirements of victory. The practical steps which he recommends are quite a different matter. How is it a solution of the present problem to make the Viceroy, King and Parliament in one? The proposal has not found favour with any one. Possibly, Mr. Moore has thought of

such a proposal as a safe retreat from his vehement advocacy of immediate grant of Dominion status to India. He continues to press it to the attention of the British public. And judging from the discussions in the East India Association where every one who heard him found it easy to criticise it has not found favour with any one. It is not support for Mr. Arthur Moore that I ask of the Bengal Chamber. What I expect is an acceptance of the paramount importance of the war effort from the point of view alike of Britain and of India, and a readiness to abandon old prejudices in the face of the paramount tasks of the present. To repudiate Mr. Moore and his views is one thing. It is quite another to say that the August declaration of the Viceroy is the last word in political wisdom.

The needs of the war effort and the needs of internal peace, of efficiency of administration and of the discharge of executive tasks of all kinds form the most important features of the situation within the country. I do not believe I am lacking in imagination or in the ability to understand what the imginative faculty can do for others who are endowed with it. But I should be loth to grant that the British Government at Home can, from that distance, appreciate these factors as those who are on the spot. Now what sort of reports should the officials be sending to the authorities at Home on matters which are important to them and to us? As far as the war effort is concerned, the British Government are more alive to the poverty of our means than our own officials here. And the former would, therefore, be in a mood to applaud any concrete results that the Government may have to show. To judge the results, one ought to judge them not in relation to what was formerly thought impossible in India, but in relation to what it is possible to achieve with a genuine enthusiasm and co-operation. The Government are not known to be modest about the claims they make about the achievements of the Supply Department. They have done many things, indeed, which, at first sight, would have seemed impossible. But by a patient search for substitutes and improvisations of various kinds, they have been able to get many things done. What is true of supplies may be true of the larger requirements of defence. No one stops to think how much more could have been done, if the first meeting between the Viceroy and the Congress leaders had been carried on in a different spirit.

But I have strayed from my line of thought. I was saying that with the most cultivated and disciplined imagination, the British Government would not be able to visualise the situation in India. The war effort is one instance of it. An even more important instance is the communal situation. What idea could have been conveyed to the British Government about the rioting in Dacca and other places? The potentialities which communal tension has for paralysing the whole of social life are not yet fully appreciated. Those businessmen who were in Bombay a year ago or were in Calcutta in 1926, will experience little difficulty in understanding the relation between rioting and normal activity. If the sense of insecurity should affect the war effort, too, then the position would be serious even from the standpoint of the authorities. I would appeal to the British commercial community to bring a fresh outlook to bear on the whole situation and reconsider its attitude to the policy now pursued by the authorities. It is long overdue; and further delay may make it too late.

"EAVESDROPPER"

Help your servant to save

Each time wages are paid this employer buys for his servant an As. 8 Savings Stamp and his servant buys another of the same value. As soon as stamps to the value of Rs. 10|- have been bought and stuck on the Savings Card—given free at any Post Office—it is exchanged at the Post Office for a Defence Savings Certificate. This certificate will, after ten years, be worth Rs. 13|9|- but if the money is wanted before the expiry of ten years it will be paid out in full with the interest due.

Employers who usually give a cash gratuity when a servant retires after long service, can instead purchase Defence Savings Certificates on account of their servants and give them as presents upon termination of service.

Simla, May 21.

ALL Simla is discussing the question whether the joint efforts of the two Provincial Premiers, Mr. Fazlul Huq and Sir Sikandar Hyat, will lead to anything at all in the near future. They have both urged that the Viceroy should convene a small conference consisting of Provincial Premiers, party leaders in the Central Legislature and other outstanding personalities like Sir T. B. Sapru, to find a way out of the deadlock. In Simla, so far as I can see, there is no hostility to the idea, for if the Viceroy considered the proposition useless or impracticable, he would not have hesitated to say so to Mr. Fazlul Huq. The decision has really to be taken by Whitehall, to whom a full account of the political reactions in this country to Mr. Amery's speech have already been communicated. The truth of the matter is that unless the British Government is prepared to modify the August offer considerably and show its readiness to accommodate itself to the wishes of the Premiers' Conference there is little purpose in holding the conference at all. Those who had interviews with the Viceroy have come back with the impression that the Viceroy is sympathetically inclined, but as His Excellency has to take Whitehall's instructions before he can do anything, no one is in a position to say anything at the moment. One of them told me the other day, "We may have to wait till July for any change in policy."

* * *

Newspaper deputations who have been recently meeting the Commerce Member have gratefully acknowledged his helpfulness. It is realised by the Government of India that newsprint stands in a different category from other commodities, for it cannot be described as a luxury article the imports of which can be safely controlled without loss to the community. The value of the newspaper in wartime as an effective instrument for disseminating correct news and educating the public cannot be questioned. In fact, official circles have been freely acknowledging the services which the Indian Press have rendered in connection with the war. So any measure taken by the Government of India which is likely to cripple the activities of the Press, particularly vernacular papers whose resources are comparatively limited, cannot but be deprecated. An assurance has been given by the Commerce Member that effective steps will be taken to keep prices within reasonable limits. He has also agreed in principle to the request of the deputation that in granting licenses the consumption figures for the whole of last year will be taken as the basis. This will to a large extent remove the fears felt by newspapers, but there is still the difficulty regarding shipping. Unless priority is secured for newsprint shipments, it may not be easy to avoid a paper famine in the country. This matter is also engaging the attention of the Commerce Department.

* * *

Very valuable indeed was the work done by the three committees which were convened by the Commerce Department. A full account of the research work done by the Board of Scientific and Industrial Research is expected to be soon available, but there is little doubt that its work has impressed industrialists throughout the country. Great credit is due to its Director, Sir S. S. Bhatnagar, for bringing practically the whole body of scientists in this country to help in industrial research. Owing to war needs which have necessarily to take the first place at this juncture, such lines of research as directly help war supplies have received pominent attention, but there is no reason why they should not be of use to the general public—not only in supplying them with things which used to be imported before but cannot be had now, but also in supplying the public with substitutes which are cheaper and more durable. The Industrial Museum which will shortly be started in Delhi will enable the public to have an idea of the useful work done and the scope which exists for future research with the object of starting new industries. It is hoped that as the Board has already established its reputation and usefulness, efforts will be made to extend its activities. As these researches offer to industrialists new lines for profitable enterprise, it appears that the more prominent among them are coming forward with financial assistance to the Board. So long as there is the war, it may not be possible to take up the question of any elaborate re-organisation of the machinery of the Board, but after the war it will have to reconstitute itself on the lines of the body which is now successfully working in England.

* * *

The welcome announcement was made by Sir Ramaswami Mudaliar at the last meeting of the Export Advisory Council that as a result of negotiations with His Majesty's Government regarding the difference between the minimum price of £10 per ton and the prevailing market rate of oilseeds purchased by the British Food Ministry it has now been arranged to recover the difference from the shippers and make it over to the Government of India. An amount of £100,000 has already accrued on this account. The intention of the Government as announced by the Commerce Member is to make allotments pro rata to the groundnut growing provinces and States on the distinct understanding that each made an equal contribution to the Fund. A similar scheme in connection with the purchases of linseed has brought a contribution of £15,000 pounds. So far as the former amount of £100,000 is concerned it was stated that it had not been found possible to pass on the amounts to the cultivator but that other ways and means would be devised for benefitting him either directly or indirectly. The question as to how the sum of £15,000 which had accreed on the linseed account should be utilised is also under consideration.

* * *

One of the most important subjects dealt with at the meeting of the Export Advisory Council was the need for standardisation of manufactured products. It was pointed out that this was being successfully followed by Japan. There had been complaints, it appears, from American importers that manufactured goods sent from India were not of uniform quality. For the purpose of meeting Japanese competition and also of expanding the market for Indian goods, some method of standardisation was essential. It is understood that the Government of India have already addressed the various commercial associations on the subject and invited their suggestions. The view of the Council is reported to have been that some kind of organisation of exporters should be established which would be competent to examine export goods and place a special mark on goods which passed the standardisation test. The Council suggested that the Government of India should accord their recognition and support such a body. The Question will be discussed again at the next meeting of the Council in the light of any legislation which will be possible before next year though the urgency of the problem is recognised.

* * *

It is understood that the autumn session of the Central Legislature will be held in New Delhi early in November. No big legislative programme appears to be contemplated by the Government of India. Among the pending bills there is one in connection with the Federal Court's working for which a select committee is shortly to it in Simla. Enquiries show that none of the bills upon which the Labour Department has been engaged is likely to be ready for the autumn session. there is also no probability of the Finance Member bringing up any emergency finance bill.

* * *

An increase of 11,028 in the number of co-operative societies in India (including the Indian States) in the year 1938-39 over the preceding year, is shown in the statistical statements relating to the Co-operative Movement in India during 1938-39 just published. The members of the primary societies in British India numbered 4,631,407; in Indian States 742,705, making a total in all India of 5,374,112, as compared with 4,849,874 in the previous year. There was an increase in the working capital—Rs. 1,06,47,33 as compared with Rs. 1,03,01,73 in the previous year.

Bombay, May 21.

SOMETHING has been heard again of the proposal to introduce forward trading on the Indian Stock Exchange. It may be remembered in this connection that when the proposal appeared, opinion among the members was divided and the actual voting confirmed it. The President of the new, second exchange indicated his willingness to be guided by the majority view when the latter emerged clearly after the modifications of procedure. Mr. Chunilal Mehta was not antagonistic then and he recalled at the annual meeting of the Indian Stock Exchange this week that forward trading was possible as soon as the rules were amended. Mr. Chunilal Mehta expressed his opinion that in a fortnight more dealings in the forward section would begin. He remarked however on the absence of any decision on the application to the Bombay Government for formal recognition. If the members did not get much by way of assurances they were treated to a close analysis of wartime financial developments in addition to a careful examination of the affairs of the Exchange. He mentioned that the Exchange had risen in public esteem and business for ready delivery had not been affected by the war.

The continued depression in bullion is apt to puzzle Bombay. Gold has been inactive and silver has met with poor support. This runs counter both to general expectations and the experience of the last year when the buying of gold and silver increased while other forms of investment were neglected. The difficulty in sizing up the future may explain this, but the major trouble may be the fear that all bearish activity would be curbed effectively. Prices have so far shown very slight fluctuations and the possibility of any advance being very limited, it is open to question if a big drop in prices can take place. Gold prices over a fortnight have shown no indication of being influenced by war developments. Never has business been so restricted with brokers firmly disinclined to deal forward. The inactivity has a moral for the layman who imagines that bullion dealers run up a gambling fever as soon as other markets show bearish symptoms. There is also the fact that confidence of a sort in the final outcome of the war manifests itself in a reluctance in increasing reluctance to go by the day's news alone. The encouraging steadiness of gold reacts favourably on silver and those who had been disposed to sell short have promptly reconsidered their views. The day-to-day fluctuations have no meaning for the public which is impressed by the average business man's inference that the decline in treasure exports, very much under control nowadays, will not lead to anything more than the maintenance of present prices for gold and silver. This view is firmly held against the minority opinion that the spread of war to the Middle East will induce panicky purchases of the precious metals and that there will be a flight from the currency as also from all stocks and shares. The latter view is not openly expressed but it is heard in some influential quarters.

While recent reports from England show that India is evincing some interest in Lancashire goods because of the fear that nothing may be had when output is restricted it has been noted that up-country markets are keen on English marks in printed and dyed goods. And the reluctance of shippers to quote stimulates the eagerness of some Indian merchants to know what can be had from Lancashire when and at what rates. It is not unlikely that in spite of the prevailing flatness of the piecegoods here that importers' views will give a definite shape to the share market's opinion of cotton mill shares.

I think many have missed the very important news about the strike in Ford's motor plant here. I suppose the news agencies have more important things to deal with, but locally the strike is big news, real, hot and what-not. The fact that the approach to the usual conciliation has been belated and ineffective does not worry many, but the more sensitive and well-informed still keep on asking questions. The labour tribunal has virtually endorsed the action of the Company and the arrival of some new employees to the works is being treated as the breakdown of the strike. The *Times* has discussed the subject in a dispassionate manner. Whatever be the details there is the plain fact that the labour trouble is bad for the war effort and very plain questions have been asked in a leading article about the Government's duty to settle the dispute quickly. It is a small concern with only 400 men on the roster of whom 147 were dismissed. The reason assigned is an incident arising out of an order to cancel the usual leave and work all the seven days of the week. The Union concerned has denied the Company's statement about the notice issued. Pleading ignorance, the men stayed away, and when they came back, they found they had no jobs because new men had been taken on. The Union complained and wanted to discuss; only after a week of futile petitioning was the strike decided upon. The Bombay Labour office was treated as *functus officio* by the employer in this case. Reference to some official who remarked that there was no question of principle does not appear like the kind of conciliation required by the Union. Fords have preserved a well-bred reticence over the whole affair, but over a hundred skilled men, urgently wanted for making the bodies of army trucks are in the street, merely because Fords claim that an oral order is as good a notice as any.

Bombay may claim to know a little more of what has happened in Iraq. The crisis is not local or temporary, and the change of ministry took place without Rashid Ali promising any departure in policy. Iraq has not enjoyed efficient or honest administration and the party cliques were wholly selfish. Sami Showkat and his brother Naji Showkat made up to the Nazis because anti-British feeling was rampant since 1936 and Rashid Ali during his exile in Kurdistan acquired a hatred of Jamil Madfai. That a number of desperate men support Rashid Ali shows that the army aspires to dominate politics. That Hikmat Suleiman who will be going to Moscow as special envoy has been called back to politics after his complicity in the 1936 disturbances shows that Bekir Sidky's associates are forgiven. Hikmat oppressed the Eastern Christians very badly and his education in Turkey made him a Pasha of the old type, unpopular and untrustworthy too.

The Maharashtra Chamber never fails to put forward an independent point of view. The lectures of Mr. Bhat on industrialisation with particular reference to the attitude of Government were preceded by Mr. Dahanukar's speech last week. At the usual quarterly meeting there was a new type of speech discussing the need of the hour. It was noted that India's trade would have suffered little if industries took off the now superfluous raw materials and she would also help more towards victory. Because export outlets were not very large or numerous there was a pressing need for new industries. Reference was made to the important new projects with which Mr. Walchand's name is linked, and it was argued that the war alone entailed the development of local industries ancillery to defence.

Bombay newspapers have taken the lead in asking for a modification of import control as regards newsprint. The deputation of proprietors and editors who went up to Simla this week wanted that quota permits should be issued without too much delay. And the press was prepared to help in every way, it was stated. Control of prices with reference to the basic prices ruling in Canada and to fix quotas for individual papers on a liberal basis with special reference to the size and form obtaining for the last three years. The deputation put in a plea for an advisory committee on which the press would be suitably represented, and it was stated that stock returns, etc., would be furnished to see that the control system was not defeated.

A Resume of Commodity Markets

Calcutta, May 23.

A FIRMER tone has been noticeable generally in the several commodity markets though, in the jute manufactures and raw cotton markets, there has been a suggestion that the rise in prices has been overdone. Buyers have been discouraged by the recent rapid advance in prices and by the profit-taking that has followed, a good part of the recent gains has been lost. The main feature of the markets is the sharp rise in values in the jute futures market during the latter half of the week. It has been pointed out in these columns more than once that jute was relatively undervalued taking into consideration the recent rapid advance in prices in the hessian market and that a more helpful policy on the part of mills would enable the ryots to get higher value for his crop. The favourable developments during the week have therefore been responsible for a sharp rise in the jute futures market and the quotation is naturally four points higher on balance at Rs. 43-14.

The rise in the jute futures market has occurred in spite of the irregular tone of the jute manufactures market during the latter half of the week, and has been mainly due to the reports regarding the possibility of an increase in production by mills to prevent the possibility of a speculative ramp in hessian again in the future. There has been no sympathetic improvement in values in other markets of late. Raw cotton has been fluctuating within narrow limits during the past few days and the huge premium for old crop Broach April/May has narrowed considerably with heavy hedge selling for July/August and April/May, 1942. Mills also have thought it advisable to postpone purchasing their requirements in view of the excessive rise in prices.

The wheat market has been rather uninteresting though a slightly firmer tone has been noticeable in sympathy with other produce markets and the continued strength of raw cotton.

Bullion markets have continued inactive for several weeks in succession and the drop in prices to export parity levels early this week induced some export buying which flickered out even with a small advance in values. During the past three days there is little activity worthy of note and values are again at the levels at the end of last week. Even the silver market has not been influenced by the continued firmness of raw cotton and prices have tended to fluctuate in sympathy with gold.

Rubber and tin have been definitely easier. The easier freight situation also has induced some selling and the more hopeful view taken regarding the future of exports is reflected in the discount for rubber for forward position of nearly 5/16d. what time there was a premium of nearly ¼d., only a few weeks back.

Jute

As pointed out above, a definitely firmer tendency has been noticeable in the jute futures market during the latter half of the week and a substantial rise in prices has been recorded in the several sections. Sellers for old crop have been adopting a reserved attitude in view of the fears regarding the possibility of an increase in the minimum price for new crop. There have also been rumours that mills would tend to increase production to relieve the shortage of ready goods in the hessian market. Heavy mill buying also tended to confirm the rumours though it is not quite sure whether the Indian Jute Mills Association would decide at this stage to effect an increase in the general production for, as was pointed out last week, there is already a surfeit of sacking production and there is need for turning over the sacking looms to the production of hessian. It is not therefore clear whether increased buying of jute on the part of mills has been accentuated by a desire to lay in more stocks in view of the possibility of a higher level of prices for new crop or to provide adequate stocks for an increase in production to relieve the ready position. Whatever may be the reason, the long-desired rise in prices has taken place. There have also been other contributory factors, such as the highly probable successful conclusion of the Jute Restriction Conference between the representatives of the Governments of Bengal and Assam in Shillong, and the further reports about the damage to the crop which should encourage ryots to hold back their supplies of old crop. Regarding the Jute Conference which was recently held in Shillong no *communique* has yet been issued by either of the Governments though it has been reported that the basis of an agreed settlement has been reached and the final details will be worked out later on.

Jute Manufactures

The tone of the market was definitely buoyant at the end of last week. Until Tuesday this week it continued so with a further substantial rise in prices, 9 porters ready being at one time quoted as high as Rs. 21-8. At the higher levels, however, not much business was passing. Buyers were rather discouraged by the unduly heavy premium demanded for near positions. The reserved attitude on the part of sellers to sell freely for July/September had a restricting effect on business for ready positions. In the profit-taking that followed there has naturally been a setback in values which is most pronounced in the near positions. There is no sign of weakness however. During the week an order for a further 500,000 sacking bags was placed by the Government of

(From Our Jute Correspondent)

Calcutta, May 22.

IN commenting last week on the Jute Mills Association Committee's attitude regarding any suggested modification of the standards and specifications laid down by them for the New Season, we suggested the possitibility of Government stepping in and insisting on a more practical and realistic view of the situation being taken. It is common knowledge that copies of all important correspondence between the various Associations connected with the industry go before the Special Officer (Jute) for his information and record and this officer could scarcely fail to be struck by the complete lack of support for the Mills dictated standards and specifications from any section of the organisations connected with the selling end of the Loose Jute business. Unanimous condemnation might more nearly describe the reception which the Mills "ukase" received. It is not surprising therefore to hear that a letter has been addressed to the Mills Association by the Special Officer (Jute) calling their attention to this fact and suggesting that as the Associations which together represent practically all sellers of Loose Jute to Mills are not in accord with the proposals, it appears necessary that these proposals should be reconsidered in the light of the objections raised. The letter goes on to suggest that while stability of standards is in the view of Government essential for the welfare of the jute cultivator, the reception of the Mills proposals at the hands of the trade holds out little prospect of such stabilisation being achieved. Without going into the merits (or demerits) of the Mills proposals in detail, the letter remarks that Government has noted the following general considerations :

1. The Mills decisions appear to have been arrived at without any reference to or consultation with the principal selling interests.

2. None of the recommendations of the Special Sub-Committee appointed by the Mills Association last year for the specific object of studying how best stability of standards could be achieved and maintained, which unanimous recommendations were embodied in a letter dated 16th September, 1940, none of these recommendations have been given effect to.

3. The proposals contain no provision for a penalty on Buyers who may countenance encourage or take advantage of departures from the authorised standards.

These points alone ought to give the Mill Association something to ponder over and their reaction to the letter will be awaited with some impatience, for the new season is getting near, and if anything is to be done about the standards, then it were well it were done quickly.

Meanwhile, a large section of the Bengal Government has been visiting Shillong to discuss with the Assam Government co-operation in the matter of Jute Crop Regulation. The first consideration which strikes one is that this conference might very well have been held two months or more ago before this season's crop was sown, though it has been realised all along that the Assam Government was not prepared to play ball so far as this year's crop was concerned. In fact, there seems to be little hope of co-operation until the Bengal Government advances the necessary funds to undertake a complete survey of the Assam jute area. Nothing has yet transpired officially as to the results of the meeting, if any, but one important snag appears to lie in the insistence of the Assam Government that only lands already under jute should come under the regulation scheme, and undeveloped lands should be uncontrolled. The factor of uncertainty if any such concession were made might be large enough to render the whole scheme nugatory. There seems little doubt that one of the main considerations influencing the Assam Government is the disinclination to sacrifice more of its share of the Jute Export Tax than can be avoided. If Big Brother Bengal wants to be altruistic it should not be at the expense of Little Brother Assam.

Meanwhile, the Loose Jute market here has been showing more liveliness than for some time past. The firmness started with a disinclination on the part of sellers to go on with sales of New Crop on account of the rather doubtful prospects then prevailing, backed up by rumours that it was the intention of Government to enhance the minimum prices laid down for Loose Jute. Incidentally, it would be only fair to the trade generally if an official pronouncement were made without delay on the policy to be followed after 30th June, up to which date the current minima hold good. The high levels reached by ready hessians also gave rise to rumours that the Mills would increase working hours to counteract the "corner" which had been virtually created in ready hessians, and such increase in working hours would mean a larger consumption of jute. Though this conclusion is by no means necessarily logical, because owing to the unbalanced position as between hessians and sackings, any increase in

JUTE

Calcutta, May 22.

THE view was advanced last week that the level of jute prices in relation to hessian prices was rather low and that a more helpful attitude on the part of the mills would enable a higher level of prices to be registered. The successful conclusion of the conference between the representatives of Bengal and Assam to consider the Jute Regulation Scheme sponsored by the Government of Bengal, the continued unfavourable conditions in the jute growing districts and the resumption in buying by mills during the last two days, have resulted in a substantial rise in prices.

The tone in the several sections is firm and quotations are at the highest levels for the week.

The Jute Restriction Conference at Shillong concluded yesterday and it is understood that the hopes for an agreed settlement has been reached. A communique on the subject is expected to be issued shortly.

In the loose jute section the tone is firm. In old crop Jat supervised Bottoms have been done at Rs. 6-8 and in New, District Middles and Bottoms at Rs. 8 and Rs. 6-4 respectively. Earlier in the week old crop supervised cross Bottoms were done at Rs. 3-12 per maund.

In the pucca bales section, there has been no business for export. Mills are reported to have bought Hearts at Rs. 26 per bale.

The jute futures market has suddenly turned active during the last three days. There has been a substantial rise in the quotation on speculative buying to Rs. 43-9, the highest level for the week. The quotation at the time of last writing was only Rs. 39-12. The undertone is firm.

JUTE MANUFACTURES

Calcutta, May 22.

With not much of business passing the jute manufactures market was inclined to be firmer earlier in the week on the reserved attitude of sellers and speculative buying. The unwillingness of mills to sell freely for the forward positions and the increase in their limits prevented any business in ready goods. There seems to be now a general feeling that the recent rise in prices has been overdone and more than half the gains during the week have been lost in the last two days. The huge premiums demanded for near positions is considered rather excessive.

An order for a further 500,000 sacking bags has been placed with the Indian Jute Mills Association during the week. 200,000 bags are to be delivered in Mid-June and the remaining 300,000 bags by mid-July. The order is for sacking bags and that too for a small quantity. It has not had any effect on the market, not even on the heavy goods section, as there is already a large accumulation of stocks.

9 porters ready are now quoting Rs. 20-12 after being higher at Rs. 21-8, June at Rs. 19-12 after being at Rs. 20-4, July/September at Rs. 17-7 after being at Rs. 17-10. It will thus be noticed that the decline in the quotations is pronounced only for ready and June positions. 11 porters ready are Rs. 23-4, June Rs. 22-14, July/September Rs. 21-4 and October/December Rs. 18-14.

As pointed out above, there has been very little doing in the heavy goods section. Quotations are only a shade better in sympathy with the firmer tone of the jute market. B. Twills for June shipment sold on the basis of Rs. 34-3, Liverpool Twills for the same position Rs. 38-2 and Cornsacks Rs. 35-4.

RAW COTTON

Calcutta, May 22.

A quieter tone has been noticeable in the Bombay raw cotton market during the past week. Heavy yearly tenders and the postponement of mill buying has cooled down speculative sentiment. Also there has been considerable hedge selling and the premiums for the near positions over forwards has narrowed. The outlook is considered satisfactory. There has been greater buying for export over the week-end. Broach April/May closed at Rs. 295, July/August Rs. 245/4 April/May 1942 Rs. 226, Oomra May at Rs. 165, July Rs. 167, Bengal May at Rs. 128 and July Rs. 129-8.

There has been a further improvement in prices in the American cotton exchanges. The possibility of a higher loan and the higher level of consumption in the United States have been mainly responsible for the improvement in values. It is expected that March quotation will be 15 cents. In New York July closed at 13.05 cents and October at 13.18 cents against the 12.99 cents and 13.04 cents last week. It is interesting to note that there has been a further improvement in the premium for forward positions.

PIECEGOODS

Calcutta, May 22.

The piecegoods market has continued active and a further rise in bazar values has been recorded with the possibility of a further increase in war orders and the sharp increase in demand from export markets. The order books of Indian mills are in a healthy state. It is unlikely, therefore, that replacement values show any decline. The offtake from consuming centres has been on a greater scale and there is a greater tendency to lay in stocks. However, no large forward contracts have been placed and the tendency is still to operate in small quantities. Indigenous goods have again come in for good attention. Business has been restricted in the Japanese goods section.

The yarn market has continued active. The higher raw cotton prices have resulted in further forward sales being made by South Indian mills at profitable rates.

GOLD

Calcutta, May 22.

The decline in prices in the Bombay gold market to about export parity prices caused a resumption of buying for export. It was however for only a short period for even a small rise in prices discouraged buying. Quotations are slightly higher on balance though the tone during the last two days has been rather irregular.

The London market has remained unchanged at 168s.

SILVER

Calcutta, May 22.

Similar conditions have been noticeable in the silver market. There was a slight rally on bear covering but the higher level of prices has not been fully held. Indian Mint Silver ready are now quoting Rs. 62-6, First settlement Rs. 62-5, and Second settlement Rs. 62-6. It is interesting to note that first settlement is quoting at a discount of one anna over ready.

The London market has been rather quiet. There has been little trade demand and the quotation for both spot and forward is lower at 23 7/16d.

WHEAT

Calcutta, May 22

The Karachi wheat market is slightly better with quotations for both actuals and forward marked higher. Greater interest is shown by mills and large quantities have been absorbed. There is no improvement in the situation in the Punjab and as a protest against the Marketing Act it has been agreed that Karachi operators will not deal in Punjab grains. The firm tone of the markets is mostly due to Bombay buying. Choice white ready were Rs. 29-6, July Rs. 28-15 and September Rs. 29-9.

The local market also has been firmer though there has been no increase in enquiry for flour and flour products. Cawnpore and Punjab for September were quoted at Rs. 4-5-6.

MADRAS GROUNDNUTS

Madras, May 20, 1941.

The market ruled quiet during the week. Prices ruled steady during the early part of the week, and improved slightly during the latter part of the week There were no purchases by the British Ministry of Food worth recording during the week, and shippers were buying on a small scale. Local buyers were not operating, owing to the prevailing uncertainty as regards shipping to the Far East and to Burma. Shippers' buying limits opened around Rs. 23 to Rs. 23-8 for Machined (Per candy of 531 lbs. ex-coast godowns) and after remaining steady and

unchanged during the early halt of the week, improved slightly to Rs. 23 and Rs. 23-12 on Friday and Saturday, to Rs. 23 and Rs. 24-4 yesterday and to Rs. 3-8 and Rs. 24-4 this morning. Local buyers' limits opened at Rs. 21 to Rs. 21-8 for Machined (Per candy of 531 lbs. ex-Madras harbour godowns), and after remaining unchanged during the greater part of the week, improved slightly to Rs. 21-12 and Rs. 22 on Saturday and to Rs. 22 at the close. Groundnut oil prices opened around Rs. 46-8 aand Rs. 48 for "Chekku" and "Expeller" qualities respectively, stood at Rs. 46 to Rs. 46-8 for "Chekku" quality and Rs. 48 to Rs. 48-8 for "Expeller" quality on Wednesday, and closed steady around Rs. 47 and Rs. 48-8 to Rs. 49 for "Chekku" and "Expeller" qualities respectively, for ready lots, loose, per candy of 500 lbs. ex-sellers' Madras godowns.

MADRAS HIDES AND SKINS

Madras, May 20, 1941.

At the conference of Kip interests convoked by the local Representative of the Ministry of Supply on Wednesday last, it is reported that an understanding was reached to the effect that the big shippers should, as far as possible, help the tanner-shippers, who have been selling through them, by arranging to ship their goods under their own quotas. Another suggestion was made that 7½ per cent. of the total tonnage reserved for hides should be alloted to shippers with little or no quota. The suggestions and tentative conclusions of the gathering were, it is understood, referred to the various bodies interested in the Madras Kip Trade for opinion and report. A steamer that was loading Kips in Madras at the week-end has taken on board 2,500 bales, Kips, ther is expected in the middle of the current besides about 400 bales of Tanned Skins. Another is expected in the middle of the current week, and a third is expected to follow at the end of the month. The former is expected to take about 2,000 bales and the latter about 4,000 bales, The considered opinion of the trade is that there will be good activity shipped off by these boats. Already, there are indications that the recovery is not far off. Business with London was done through the local European Houses during the past week at schedule limits in 4-4½ lbs, 5-5½ lbs. and 7-7½ lbs. Coasts as well as in Primes Cow hides on C. I. F. basis. A fair volume of business is reported locally in Tanned Cow Light weights Priority goods about a penny to 1½d. per lb. below the schedule limits. A fair amount of business was also put through in Tanned Sheep on account of Japanese account. There was likewise some buying of Goat-skins by shippers to America. There has been some small scale buying by Madrassee tanners in the North Indian Raw centres during the past week. Dry Daccas are quoting at Rs. 4-8 to Rs. 5 per 20 lbs, Dharbanga/Purneas at Rs. 6-8 to Rs. 7 and Kishenganj/Malda at Rs. 9 per 20 lbs.

(*Continued from page 957*)

hessian production would have to be arranged so that there would be no increase in sacking production, the view received some support from mills themselves who came out as buyers of old crop to a considerable extent. The Fatka market, after a long period of comparative coma, came into its own again and staged a rise from Rs. 39-8 to Rs. 44-12 during the week, though it closes somewhat quieter at Rs. 44. It has had no encouragement from the Export side of Jute which has remained moribund, a small sale of Hearts for shipment at Rs. 26 being almost the only transaction reported. Nor have Mills been as active buyers of Pucca bales.

In Loose Jute some further sales of New Crop were recorded in Indian District packing at Rs. 7-12 and Rs. 6 Mids and Bots 50/50, after which four annas advance was paid. Rs. 8-12 and Rs. 6-12 was paid for European standard of packing August/September and later a sale was reported (inter-speculator) of 5 European marks at Rs. 9 and Rs. 7. For the past few days there have been no offerings of new crop on the market at all, but Mills have reverted to purchases of Old Crop in which a fair turnover has been recorded in European packed Bottoms at Rs. 6-12, in supervised Indian Jat at Rs. 6-8 and in supervised Indian District at Rs. 6-4. Bottoms have also been in fair request at from Rs. 3-12 to Rs. 4 with sellers now holding for higher rates.

Conditions in the mofussil have improved and though some damage is reported, not all of it is irreparable. But a continuation of dry conditions is wanted to enable weeding operations to proceed. Rivers are generally above their normal level for the time of year.

LEADERSHIP THROUGH QUALITY

Now successfully made from Bamboo Pulp with such exquisite finish and strength, the quality of Rhino Kraft is widely acknowledged as the best.

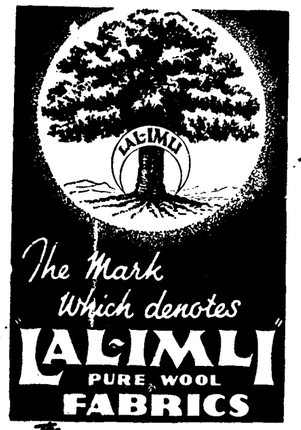
RHINO BRAND KRAFT

Orient **PAPER MILLS LTD.**

8, ROYAL EXCHANGE PLACE, CALCUTTA

The Fabrics section of the trade has again been marked by a further advance in the price of hessians in all positions, though most emphatic in the near deliveries. From Rs. 18-14, nine porters steadily mounted till Rs. 21-8 was touched, after which there was a drop to Rs. 20 with a steadier close at Rs. 20-8. Elevens similarly shot up from Rs. 22-8 to Rs. 23-8 to close at around Rs. 23. Some enquiry from the Plate resulted in higher rates being paid forward, which move speculators were not slow to follow. Among the hessian sales reported are, 9 porters at Rs. 19 to Rs. 21-8 May, at Rs. 20 to Rs. 20-4 June, at Rs. 17 July/September, at Rs. 15 to Rs. 15-12 October/December, at Rs. 13-12 to Rs. 14 January/March, at Rs. 14 January/June, and at Rs. 13 April/June. In 11 porters, Rs. 22-12 June, Rs. 20-8 July, Rs. 20-8 to Rs. 20-14 July/September, Rs. 18-8 to Rs. 19 October/December, Rs. 18-2 October/March, Rs. 17-8 to Rs. 18 January/March, Rs. 17 April/June. In the Heavy Goods section there was some renewal of enquiry from Australia and elsewhere and Cornsacks were reported at Rs. 35 June, at Rs. 34-8 July/September, and at Rs. 34 October/December. Liverpool Twills met with fair enquiry and sales were recorded at Rs. 38 June/August and July/September, at Rs. 37-8 September at Rs. 37 to Rs. 38 January/March and at Rs. 37 April/June. Other sales included "B" Twills at Rs. 34 June and Rs. 33-8 July/September, Cubans at Rs. 42 August/September and Rs. 41 October/December, and Woolpacks at Rs. 1-10 basis June and July. At the close all descriptions are marked down from the highest touched, but the undertone seems sound. Closing quotations are:—

	May.	June.	July-Sept.	Oct.-Dec.
	Rs. A.	Rs. A.	Rs. A.	Rs. A.
9 Porters ...	20 8	19 6	16 10	15 4
11 Porters ...	23 0	22 6	20 10	18 8
"B" Twills ...	34 0	33 12	33 4	32 12
Cornsacks ...	34 12	34 8	34 0	33 8
Liverpools ...	37 12	37 12	37 8	37 0
Heavy Cees ...	33 0	33 0	32 12	32 8



(*Continued from page 356*).

India with the Indian Jute Mills Association. Out of this quantity 200,000 bags are to be delivered in mid-June and the remaining 800,000 bags by the end of July. As the order is for sacking bags, and is rather for a small quantity, it has not had any effect on the market. Even the further increase in values in jute during the last three days has not been fully reflected in the prices for heavy goods for which there is practically no demand at the moment.

Raw Cotton.

In spite of the further improvement in values in the American cotton exchanges, Bombay raw cotton market has been fluctuating in rather narrow limits though a more confident tone is noticeable as regards the forward positions. It was pointed out last week that the unexpected rise in prices for Broach April/May was rather unjustified and was mostly due to the technical squeeze and the policy of the bull operators which induced them to dictate their prices. In the absence of any mill buying, and the profit-taking unescapable at any time, the quotation would naturally come down and the premium over July/August is smaller.

It is revealed that as a result of the ge war orders that are likely to be placed in the near future in even greater quantities, there will be a shortage of the long staple varieties.

Stock Markets to-day and to-morrow

RESULTS OF BIRD & HEILGERS GROUP OF JUTE COMPANIES

THE soundness of the technical position in the stock exchanges in Calcutta and Bombay and the continued strength of the commodity markets have prevented any decline in prices for securities. The recrudescence of rioting in the Western centre and the reports regarding heavy fighting in Crete can be hardly considered as favourable developments for the markets. Indian Irons and Steel Corporations were inclined to be steady for the most part of Friday at Rs. 29-2 and Rs. 18-2 respectively. The tone is easier at the close at Rs. 28-12 and Rs. 17-12 respectively.

* * *

The strength of the jute and hessian markets has had a sustaining influence on the stock markets and it is generally believed unless there is positively bad news there will be no setback in prices.

* * *

The balance-sheets of seven jute companies belonging to the Bird and Heilgers group for the half-year ended March, 1941, just now available, make very satisfactory showing. The aggregate profit of these companies for the half-year under mention, in spite of the difficult trading conditions, is even higher than that for the six months ended September, 1940, being Rs. 21,93,016 against Rs. 20,84,535 for the previous six months.

Commenting on the results of this group of companies for the half-year ended September, 1940, I pointed out that the relotively poor earnings figures were due to special difficulties and remarked: "The disappointment of the present is but a measure of the assured prospects of the future. The Bird group had to extend help to some of the hessian dealers who had bought forward while markets were at hectic levels and were in difficulties when the time for taking delivery came. In such cases, the managing agents had to agree to extension of delivery dates; the mills have been protected against sales while the dealers have been saved from ruin. In simple terms, the profits accruing on contracts such as these will be disclosed in the accounts for the current half-year."

* * *

The slight improvement in earnings for the last half-year, against the general trend, is therefore fully explainable. The ordinary dividend has been maintained in the case of five companies while it has been increased from Rs. 2 to Rs. 2-8 per share by Auckland Jute Company and reduced from Rs. 15 to Rs. 12-8 per share by Kinnison Jute Mills Limited.

* * *

Of the three remaining companies belonging to the Bird and Heilgers group, for which accounts are not available, the Lansdowne and Union Jute companies have maintained their dividends while the Clive Mills Company Limited is paying a dividend of twelve annas against no dividend on the former occasion.

* * *

Outstanding among the group are the results of the Auckland, Dalhousie and Kinnison Jute Company Limited. And of these three mills the earnings of the Dalhousie Jute Company show the biggest rise. The net profit of this company before providing for taxation is Rs. 3,56,343 against Rs. 2,80,582 for the six months ended September, 1940. The improvement in earnings, however, has been more than offset by the need for higher provision for taxation, being Rs. 1,97,216 against Rs. 55,124. An application for relief has been lodged with the proper authorities under the Excess Profits Tax but it is not known when this application will be considered.

The amount set aside to depreciation is Rs. 44,863 (Rs. 45,469) while no allocation has been made to General Reserve against Rs. 25,000 previously. The ordinary dividend has been maintained at Rs. 7-8 per share.

* * *

The reduction in the ordinary dividend of the *Kinnison Jute Mills Company Limited* for the same half-year, in spite of the increase in earnings, is again due to the higher provision for taxation being Rs. 1,30,787 against Rs. 94,235. The net profit for the half-year before providing for taxation is Rs. 4,21,924 (Rs. 4,02,159). In any case, the reduction in the dividend was inevitable as the payment of the last dividend was only possible by drawing on the balance brought forward from the previous accounts. The dividend on the ordinary shares is Rs. 12-8 per share against Rs. 15 per share previously. The amount carried forward is again lower at Rs. 18,286 against Rs. 35,047 brought in.

Auckland Jute Company Limited is able to report a net profit, for the same half-year, of Rs. 2,99,052 against Rs. 2,21,737 previously. The provision for taxation is Rs. 69,723 against Rs. 4,826 while the amount set aside to depreciation is Rs. 1,42,168 against Rs. 1,45,000. The dividend on the ordinary shares is higher at Rs. 2-8 against Rs. 2 per share.

* * *

The higher level of earnings of the *Saran Engineering Company, Limited* bears another testimony to the vastly improved conditions in the engineering industry. The net profit of the company for the year ended March, 1941 is Rs. 1,41,736 against Rs. 77,449 for the previous year. The amount charged to depreciation is Rs. 20,000 (same) while taxation appropriation is higher at Rs. 40,000 (Rs. 20,000). There is an allocation of Rs. 25,000 to the General Reserve in addition. The dividend is higher at six annas against four annas per share.

On the basis of the latest dividend the yield on the shares which are presently quoting Rs. 6 cum dividend is more than 7.6 per cent tax-free.

The *Cuttack Electric Supply Company Limited* has made further progress during the year ended December, 1940 though the net earnings have been affected by the higher level of working expenses. The supply of electricity was satisfactorily maintained throughout the year and the number of units sold showed an increase as compared with the previous year.

Negotiations with the Bengal Nagpur Railway Company, Limited were concluded during the year, and in December the Cuttack Railway Station was completely wired and connected to this Company's mains. The load consists of lighting, fans and a pumping installation.

The net profit before providing for taxation is Rs. 5,781 against Rs. 57,670 for 1939. The sum set aside to depreciation is Rs. 20,167 against Rs. 19,904. The provision for taxation is Rs. 4,171 (nil) while Rs. 10,000 is placed to Reserve for Taxation. The maiden dividend of six annas per share is to be paid.

The prospects for the current year should be considered even mere satisfactory.

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, May 23.

WITHOUT any appreciable increase in the volume of turnover rather firm conditions have been noticeable in the Calcutta Stock Exchange during the past week. In the early days of the period under report the undertone in the several sections was quietly steady. The firmer tone of the markets during the past three days is mainly due to the strength of the jute futures market and the more hopeful view taken regarding the war situation. It was generally expected that the grim battle that is being fought out in the island of Crete will have a generally depressing influence, but prices have been well held. With any favourable developments a rise in prices is expected.

The giltedged securities section has been steady. The continuance of easy money conditions has kept up prices. 3½ per cent Paper for the most part of the week has been quoting around Rs. 95-4. Terminable loans have been marked higher where quotations are unchanged. Thus, 3 per cent 1963-65 have been marked higher at Rs. 95. 3 per cent Defence Bonds were also higher at Rs. 101-15. 5 per cent 1945-55 were steady at Rs. 110-12, 3½ per cent 1947-50 at Rs. 102-8 and 4 per cent 1960-70 at Rs. 108-8. The provincial loans are higher with 3 per cent 1952 issues at Rs. 97-10.

Among public bodies debentures, business has continued to be on a restricted scale. 3 per cent *Calcutta Port Trust* debentures were Rs. 96-4, 4 per cent *Calcutta Port Trust* debentures 1941 Rs. 100-6, and 3½ per cent *Howrah Bridge* debentures Rs. 98. Among industrial debentures, 5½ per cent *Dalmia Cement* debentures were Rs. 103-8, 5½ per cent *Ramnugger Cane and Sugar* Rs. 103-8 and 5½ per cent *Rohtas Industries* Rs. 102-12.

Quotations have been well held for first class jute mills preference shares in the absence of sellers. *Anglo-India* were Rs. 170, *Cheviot* Rs. 161, *Northbrook* Rs. 148 and *Soorah* Rs. 117. *Hukumchand* were a shade easier at Rs. 121-8. Among others, *Dalmia Cement* were done at Rs. 111, *Burn & Co.* six per cent preferences at Rs. 146, and *Steel Corporation* at Rs. 119. *New Victoria* preferences were done at Rs. 5-9. *Alkali and Chemical* are slightly higher at Rs. 120. *B. I. Corporation* were Rs. 176 and *British Ceylon Corporation* Rs. 4-4.

Bank shares have been slightly better with *Central Bank* at Rs. 42-4, *Punjab National Bank* at Rs. 57 and *Reserve Bank* at Rs. 102-8.

Following the publication of satisfactory results by Elgin and Cawnpore Textiles a firmer tendency has been noticeable in the cotton section. *Elgin Mills* were in good favour at Rs. 20-12, *Cawnpore Textiles* at Rs. 6-6, *Kesoram* at Rs. 6-5, *New Victoria* at Rs. 2-3 and *Dunbar* at Rs. 192.

Interest in the Coal section continues to be restricted and there are no important price changes. *Bengal* were Rs. 345, *Bokaro and Ramgur* Rs. 14-6, *Burrakur* Rs. 12-6, *Equitable* Rs. 34, *New Beerbhoom* Rs. 13-12 and *Pench Valley* Rs. 32-8.

Jute shares have been firmer and a longer list of transactions has been recorded. The continued strength of the hessian market, the new order for sacking bags and the reports regarding the possibility of an increase in working hours have been favourable factors. *Howrah* are now quoting Rs. 51-4 against Rs. 50-10 at the end of last week. *Anglo-India* have been dealt in at Rs. 309 ex-dividend, *Bally* at Rs. 215-8, *Hukumchand* at Rs. 9, *Kamarhatty* at Rs. 468, *Megna* at Rs. 39-4, *Naskarpara* at Rs. 17-6, *Northbrook* at Rs. 30-7, *Nuddea* at Rs. 55 and *Reliance* at Rs. 53-10.

A greater volume of business has been passing in the Engineering section. Indian Irons and Steel Corporations have been marked higher at Rs. 29 and Rs. 18 respectively. The quotations were fluctuating in narrow limits in the early days of the week. *Burn & Co.* also have been in better enquiry being done at Rs. 367. *Hukumchand Electric Steel* ordinaries were Rs. 11-6, *Indian Standard Wagon* Rs. 61, *National Iron and Steel* Rs. 8 and *Arthur Butler* Rs. 10-15 ex-dividend.

Among Utilities, *Benares Electric* were Rs. 14 and *Jubbulpore Electric* Rs. 14-4.

There is little activity in the Sugar section. *Carew & Co.* were Rs. 9-8 and *Ramnugger Cane and Sugar* Rs. 7-12.

A greater number of transactions has been recorded in the Tea section. *Killcott* have been marked higher at Rs. 50-8 on the announcement of the higher dividend of 35 per cent for 1940. *Hatlikhira* were Rs. 17-8, *Nugaisuree* Rs. 991 *New Dooars* Rs. 1,000 and *Sonai River* Rs. 16-10.

In the miscellaneous section, *Burma Corporation* and *Indian Copper Corporation* were Rs. 4-6 and Rs. 2 respectively. *B. I. Corporation* were Rs. 4-1, *Balmer Lawrie* Rs. 327, *Dunlop Rubber* Rs. 39-12, *Indian Cables* Rs. 19-10, and *Assam Saws* Rs. 3-7. Among Paper shares, *Titaghur Paper* were Rs. 17-2, *Orient Paper* Rs. 11-10 and *Shree Gopal Paper* Rs. 10-8. *Alkali and Chemical* were Rs. 16 and *Dalmia Cement* ordinaries Rs. 11-5.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, May 22.

Money.—Call money continued to be quoted at ¼ per cent.

Exchange Market.—Banks were selling T.T. at 1s. 5 15/16d. and buying three months' bills at 1s. 6 7/32d.

Securities.—There was little or no change in prices of giltedged securities during the week under review, 3½ per cent Paper remaining steady at Rs. 94-4. Among other issues, 1948-52 changed hands at Rs. 97-5; 1951-54 at Rs. 99-10; 1963-65 at Rs. 94-12; 1947-50 at Rs. 102-9; 1960-70 at Rs. 108-8; 1955-60 at Rs. 112-10; 1945-55 at Rs. 110-13 and 3 per cent 1946 Defence Bonds at Rs. 101-10.

Shares.—The local share market opened fairly steady with moderate buying. There was better demand for Bombay Dyeing and Tata Steels, particularly, which recorded some gains, while other shares ruled steady at last week's levels. There was some selling pressure in mid-week with the result prices showed a drop of a few points. Towards the close of the week, however, the market improved on some scattered buying and prices closed around the opening levels. Operators are still cautious in making their commitments, awaiting developments in the war situation.

Textiles.—The strength in the cotton market was responsible for the keen enquiry in mill shares. *Bombay Dyeing*, after opening at Rs. 1,002-8, touched a low of Rs. 985 in mid-week, but closed again higher at Rs. 1,007-8. *Central India* were a shade at Rs. 279-8. *Century* were done slightly lower at Rs. 383-8 as against Rs. 383-8 in the previous week; *Colaba* at Rs. 162 against Rs. 163; *Gokak* at Rs. 188-8 against Rs. 191 and *Swadeshi* at Rs. 270-8 against Rs. 279. *Kohinoor* were, however, better at Rs. 391-8. In the cash list, *Ahmedabad Advance* declined from Rs. 278-8 to Rs. 265, while *Sholapoor* and *Vishnu* remained unchanged at Rs. 2,910 and Rs. 1,212-8 respectively.

Hydro-Electrics. This section continued to be featureless. *Andhra Valley* closed slightly lower at Rs. 1,812-8, while *Tata Power* showed a drop of about Rs. 25 to close at Rs. 1,545. *Tata Hydro* were unchanged at Rs. 178.

Steels.—Steel shares opened with *Tata* ordinaries at Rs. 354-8 and deferreds at Rs. 1,800. The rumours of the conversion of the deferreds into ordinaries at a particular ratio brought about some selling pressure. The developments in the international political situation were also responsible for the general selling. Many operators sold ordinaries and bought deferreds instead. This selling pressure brought down the value of the ordinaries to Rs. 349-8. Towards the close the price improved on some demand to Rs. 352-8. The deferreds, after touching a low of Rs. 1,772-8, closed at Rs. 1,812-8.

Banks.—*Central Bank* were done at Rs. 42-8; *Imperial Bank* fully paids at Rs. 1,547-8; contributories at Rs. 377-8; *Bank of India* at Rs. 139-8 and *Reserve Bank* at Rs. 102-4.

Miscellaneous.—*Associated Cement* improved slightly during the week to close at Rs. 137-12 as against the same a fortnight ago. *Bombay Burmah Trading* declined further from Rs. 435 to Rs. 432-8 on lack of support. *Belapur Sugar* were also lower at Rs. 200; *Scindia Steam* at Rs. 19 and *Shivrajpur Syndicate* at Rs. 28-8. *Aicock Ashdown* were unchanged at Rs. 557-8. *Indian Iron* came to business at Rs. 28-1 and *Premier Construction* at Rs. 85.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, May 22.

The local market continued to be dull and featureless. Transactions were limited. Textiles met with fair support, sellers being scarce. There was some enquiry for planting issues.

Securities.—The securities market continued to be steady and the prices of 3½ per cent Paper closed at Rs. 95-5. 3 per cent 1963-65 came in for transaction at Rs. 94-12. Among State Loans, 3½ per cent *Cochin Loan* had buyers at Rs. 104-12. Provincial Loans were in request, 3 per cent 1952 Madras changing hands at Rs. 98-1.

Mills.—*Buckingham and Carnatic* showed no change at Rs. 240. *Madura* had sellers at Rs. 35 s.l., while *Cambodia* continued to to meet with buyers at Rs. 40.

Utilities.—*South Madras Electric* ordinaries were slightly better at Rs. 12-14. There were sellers of *Madras Telephone* at Rs. 15-10. *Cochin State Power* were quoted at Rs. 9.

Plantations.—Business in this section was dull in the absence of fresh buying and prices in most cases remained unchanged. The International Rubber Regulation Committee has fixed the quota for the third quarter at 100 per cent. *Cochin Malabar* were done at Rs. 6-8; *Tropical Plantations* at Rs. 19-4 and *Woodland* at Rs. 5-14. Among Tea shares, *Peermade* were on offer at Rs. 27-8 and *Periakaramalai* at Rs. 17-4. *Devon* were nominal at Rs. 8-10.

Sugars.—Sugar shares were a dull market with poor enquiry in evidence. *Mysore Sugar* were unchanged at Rs. 13-12. *Travancore Sugars* were done at Rs. 14 with sellers at this level.

Miscellaneous.—*Mysore Paper* showed a slight improvement in the price to Rs. 14. There were sellers of *Mettur Chemicals* at Rs. 9-4. *Brunton Engineering* met with good buying on the announcement of a dividend of 8 per cent and there were buyers at Rs. 9-2 with sellers holding off. *Amalgamated Coal* were crossed at Rs. 24-14. *Indian Iron* were dealt in at Rs. 28-13-6 and *Steel Corporation* at Re. 1-14. *Indian Steel Rolling Mills* preferences were quoted at Rs. 11. The balance sheet of this Company is expected in a month or two. There is considerable speculation in the market regarding the possibility of payment of the arrears of preference dividend this year.

LONDON STOCK EXCHANGE

Generally firm conditions have been noticeable on the London Stock Exchange during the past week. During the latter half of the week especially there has been good buying of textile preference issues and shipping shares. Giltedged securities have closed firm while in the Foreign bond section Japanese issues are higher. Among British funds, 2½ per cent *Consols* were 78⅜, 3½ per cent Conversion 104, 3½ per cent War Loan 103⅛ and 3 per cent War Loan 100¼. Among India Loans, 3½ per cent Sterling Paper was slightly easier at 99⅜.

Tea and Rubber issues have been steady with Kaffirs firm. Among Oils, *Anglo-Iranian* have been marked lower. *Burmah Oil*, on the other hand, are higher at 49s. 4½d. Home Rails have been firm.

NEW YORK STOCK EXCHANGE

Wall Street has been distinctly firmer towards the close. The better domestic business news and the encouraging earnings figures of U. S. Steel have been mainly responsible for the improvement in the markets. *U. S. Steel* were 53⅝, *General Motors* $38 and *Anaconda Copper* $26⅛.

Indian Galvanizing:—(17th) 29-8, 29-12,
Kumardhubi Engineering:—(15th) 4-3, 4-4.
Marshalls:—(20th) 1-14.
Saran Engineering:—(19th) 5-4, 5-8, 5-12; (21st) 5-10, 5-12, 6.
Steel Corporation (Ordy.):—(15th) 17-14, 18-1, 18-5, 18, 17-15, 17-12, 17-13, 18-1, 17-13; (16th) 17-8, 17-7, 17-12, 17-5, 17-6, 17-10; (17th) 17-11, 17-15, 18, 17-14, 17-10; (19th) 17-10, (17-10 s.l.) 17-11, 17-15, 17-14; (20th) 17-12, 18-, 17-13, 17-19; (21st) 17-9, 17-8, 17-19 17-11, 17-12, 18, 17-13.
Steel Corporation (Pref.):—(15th) 118-3, 118, 119, (119, s.l.) 120; (16th) 118, (119, 120, s.ls.) 120; (19th) 118, 119, 118-8; (20th) 119.
Steel Products:—(19th) 5-7; (20th) 5-4, 5-8, 5-5, 5-9, 5-10.
Indian Steel & Wire Products (Ordy.):—(16th) 54, s.o.l.
Indian Steel & Wire Products:—(19th) 33-12 C. T.

MININGS :—

Burma Corporation:—(15th) 4-7, 4-9, 4-6, 4-8, 4-7; (16th) 4-6, 4-5, 4-7; (17th) 4-7, 4-6; (19th) 4-6, 4-8, 4-6; (20th) 4-6, 4-4, 4-7, 4-5; (21st) 4-5, 4-6, 4-3, 4-5.
Consolidated Tin:—(16th) 2-3, 2-6; (17th) 2-2; (20th) 2-2, 2-4.
Indian Copper:—(15th) 2, 2-2, 2-1, 2-3, 2; (16th) 2, 2-2, 1-15, 2, 2; (17th) 2; (19th) 2, 1-15; (20th) 2, 1-15, 2-1, 1-14, 1-5; (21st) 1-5, 2-1, 1-15.
Rhodesia Copper:—(16th) As. (17) As. 11 (0th) As. 11, 13; (21st) As. 11.

CEMENTS :—

Dalmia Cement (Ordy.):—(17th) 11-5, 11-6, 11-10; (20th) 11-10, (11-4 s.o.l.) 11-4, 11-5.
Dalmia Cement (Pref.):—(15th) 113, 114; (17th) 111-8; (19th) 112, (112, s.l.) 114.
Dalmia Cement (Defd.):—(20th 2-10, (2-8 s.o.l; (21st) 2-9, 2-10.

FLOUR MILLS :—

Bengal Flour:—(15th) 10-12, 11.
United Flour:—(15th) 8-6, 8-10; (20th) 8-6, 8-10.

CHEMICALS :

Alkali and Chemical (Ord.):—(15th) 16 C. T.; (16th) 15-12; (19th) 15-12, 16.
Alkali & Chemical (Pref.):—(15th) 118; (16th) 117-8 s.l. 118-, 119; (20th) 119, 120 s.ls.
Bengal Aerating Gas:—(15th) 49. 52-8, 53; (16th) 52 s.l.; (19th) 55, 56-8.
Bengal Chemical (Ord.):—(15th) 385, s.l.
Frank Ross:—(20th) 4.

OILS :

British Burma Petroleum:—(16th) 3-4, 3-6, 3-5, 3-7; (19th) 3-4, 3-6; (20th) 3-4; (21st) 3-4.
Indo Burma Petroleum (Pref.):—(15th) 117-, 118.
North India Oil (Pref.):—(15th) 96-8.
Tide Water Oil:—(15th) 15-4.

SHIPPINGS :—

India General Navigation:—(20th) 80, 78-8; (21st) 81, 82.

TEAS :—

Banarhat:—(15th) 391, 393; (16th) 391, 393.
Banarhat (Pref.):—(21st) 155, 156.
Barduar Tea & Timber:—(16th) 4, 4-2.

MINERVA MILLS, LIMITED

NOTICE

NOTICE is hereby given that the Twenty-first Ordinary General Meeting of the Shareholders of the above Company will be held at the Registered Office of the Company, Temple Bar Building, 70, Forbes Street, Fort, Bombay, on Wednesday the 18th June, 1941 at 1-15 p.m. (S. T.), (1) To receive and adopt the Directors' Report and Audited Statements of Accounts for the year ended 31st December, 1940, (2) To declare a dividend, (3) To elect Directors in place of those who retire by rotation but who are eligible for re-election, and (4) To appoint Auditors for the current year and to fix their remuneration.

The TRANSFER BOOKS of the Company will be CLOSED from the 4th June, 1941 to the 18th June, 1941, both days inclusive.

By Order of the Board,
N. SIRUR & CO., LTD.,
Managing Agents,
V. N. CHANDAVARKAR,
Managing Director.

Bombay, 16th May, 1941.

N. B.—The Dividend, when declared, will be made payable at the Registered Office of the Company on and after Monday the 30th June 1941 between 12 Noon and 3 p.m., on week days, other than Saturdays, and between 12 Noon and 1-30 P.M. on Saturdays, to those Shareholders whose names stand on the Register of Members on the 3rd June 1941 and who have paid all dues to the Company whether in respect of the calls on their shares, interest thereon or otherwise. Shareholders are requested to intimate change of address if any.

MARKET POINTERS

Indian Sea Customs Revenue

According to returns received in the Department of Commercial Intelligence and statistics, the total gross Indian sea customs revenue, including land customs but excluding salt revenue, collected in British India during the month of April, 1941, amounted to Rs. 3,48,00,000 compared with Rs. 3,46,00,000 in March, 1941, and Rs. 3,69,00,000 in April, 1940.

The total gross central excise duties on motor spirit, kerosene, sugar, matches, etc., amounted to Rs. 84,00,000 in April, 1941, compared with Rs. 1,13,00,000 in March, 1941, and Rs. 54,00,000 in April, 1940.

Jute Conference Concludes

The jute restriction conference between the representatives of the Governments of Bengal and Assam, which began yesterday, concluded its deliberations this afternoon.

It is understood that the fundamental basis of an agreed settlement on the restriction scheme between the two provinces has been reached.

An official announcement simultaneously from Darjeeling and Shillong is likely to be made in the course of the next few days.

Order for 500,000 Sacking Bags

A further order for 500,000 sacking bags, it is learnt, has been received by the Indian Jute Mills' Association from the Government of India this week.

Of the total order, 200,000 bags are to be delivered by the middle of June and the remaining 300,000 by the end of July.

Indian Exports to Mombasa

Advices received from Mombasa show that it has been made obligatory that the invoices for goods imported from India should bear a certificate by the original supplier that the goods are of Indian origin. Invoices shall be on a conference form, complete in every respect, showing all charges up to the time of exportation, supported by a certificate to the effect that the exporter is a stockist or a manufacturer of the goods involved.

B. E. S. & T. Co., Ltd.

The earnings of the Bombay Electric Supply and Tramways Co., Ltd., for April from electric supply (exclusive of supply to tramways) amounted to Rs. 7,95,272 and from traction Rs. 7,34,267.

U. P. Sugar Rates Fixed

The Government of U.P. have fixed rates for the sale of new sugar manufactured in the U.P. during 1940-41 for the various mills in the Province. The prices range from Rs. 8-9-9 to Rs. 10-5-6 per maund.

Decline in Railway Earnings

For the first time since the war started Railway earnings showed a decline during the first ten days of May.

They amounted to Rs. 310 lakhs, or Rs. 5 lakhs less than the approximate gross earnings for the corresponding period of 1940-41.

The total approximate gross earnings from April 1 to May 10, 1941, amount to Rs. 12.85 crores, or Rs. 52 lakhs more than the actuals for the previous year.

*Appropriations under the scheme of arrangement.

(Annual Meeting, held 28th April 1941 at Bombay)

Audited accounts for the year ended 31st December, 1940 :—

There is a sum of Rs. 1,24,296-12-5 including the sum of Rs. 38,000 set apart in the accounts of the previous year as Provision for Taxes and not now required, available for payment of Debenture interest in accordance with the Scheme of Arrangement and without taking depreciation into account.

The Directors have decided to pay out of this sum interest to the Debenture-holders at Rs. 12 per Debenture. This will absorb Rs. 1,20,000, leaving a balance of Rs. 4,296-12-5 to the credit of the Debenture Interest Reserve Account.

The date of repayment of the Company's Debenture was extended by one year from 31st December, 1940 to 31st December, 1941 with the sanction of the Debenture-holders.

Managing Agents.—Messrs. Tata Sons, Limited.

*Includes Rs. 30,000 from reserve for reduction in rates.

(*Annual meeting 7th June, 1941 at 12 noon*)

Audited accounts for the year ended 31st December, 1940 :—

The revenue account shows a profit for the year of Rs. 1,62,743-9-7 as compared with Rs. 2,03,108-7-4 for the year 1939. After deducting:—

		Rs.	A.	P.
Income-Tax and Super-Tax ...	...	47,015	0	6
Bonus to employees ...	...	4,161	4	0
TOTAL	...	51,176	4	6

there is a net profit of Rs. 1,11,567-5-1. The Directors decided to augment this by transferring Rs. 30,000-0-0 from the Reserve for Reduction in Rates and after allowing for the sum of Rs. 19,362-14-8 brought forward from 1939, there is a balance of Rs. 1,60,930-3-9 at credit of Profit and Loss Account, which they recommend should be disposed of thus:—

	Rs.	A.	P.
Pay a dividend of 7½ per cent. free of Income-tax for the year 1940 ...	1,49,597	4	0
Carry forward	11,332	15	9
TOTAL ...	1,60,930	3	9

The further decline in profits is mainly attributable to the heavy expenditure incurred on replacement parts for the Brown Boveri Turbo-Alternator.

General.—The plant operated satisfactorily throughout the year. It will be noted that as compared with results of 1939, there is an improvement in sales of approximately 14 per cent. A supply now is being given to the *Hindustan Bicycle Manufacturing and Industrial Corporation, Ltd.*, and it is expected, that this concern's off-take will improve considerably during the present year. Industrial enterprises are securing increasing business, and the prospects generally are considered to be favourable.

Plant.—Repairs to the Brown-Boveri Turbo-Alternator are not yet compleed, as considerable difficulty and delay was experienced in obtaining spares from the makers' works, due to the situation in Europe. It is expected that the Set will be recommissioned in five to six weeks from the date of this Report.

Bihar Electrification Scheme.—It is expected that the Special Engineer's report regarding this matter will be available in the near future.

Managing Agents.—Messrs. Octavius Steel & Co., Ltd.

Authorised Capital—Rs. 20,00,000 in 2,00,000 shares of Rs. 10 each. Issued and Subscribed Capital—Rs. 19,94,630 in 1,99,463 shares, fully paid up.

Synopsis of the balance sheet as at 31st December, 1940:—

(*Annual meeting 30th May, 1941 at 3-45 p.m.*)

Audited accounts for the year ended 31st December, 1941 :—

The Revenue Account shows a profit of Rs. 43,000-7-10 as compared with Rs. 37,935-5-8 for the year ended 31st December, 1939. After debiting Income-tax and Super-tax in respect of 1940-41, there is a net profit of Rs. 32,688-12-10 which, with the balance brought forward from 1939, gives a balance of Rs. 39,855-9-10 at credit of Profit and Loss Account.

The Directors recommend that the amount available should be disposed of as follows:—

		Rs.	A.	P.
Pay a dividend of 6¼ per cent., free of Income-Tax for the year 1940 ...		21,875	0	0
Place to Reserve for Taxation ...	...	5,000	0	0
Place to General Reserve ...	...	5,000	0	0
Carry forward ...	...	7,980	9	10
TOTAL	...	39,855	9	10

General.—The supply of electricity was maintained satisfactorily during the year, and the number of units sold continues to show improvement as compared with previous years.

The Bengal and North Western Railway completed the installation of their electrically driven water pumping plant, but the reconstruction of the Railway Station has been deferred until after the war. This decision has postponed the connection of fairly considerable new lighting and fan load.

Advisory Board.—The Government of Bihar accepted the recommendations of the Advisory Board which sat in August, 1939, and the revised rates were brought into force from 1st September, 1940. The net rate for supply to domestic consumers is now 5 annas per unit after allowing a rebate of one anna per unit for prompt payment. Reductions were also effected in the rates charged for power consumption and street lighting.

Managing Agents.—Messrs. Octavius Steel & Co., Ltd.

Authorised Capital—Rs. 6,00,000 in 60,000 shares of Rs. 10 each. Issued and Subscribed—Rs. 3,50,000 in 35,000 shares, fully paid up.

(*Annual Meeting, 30th May, 1941 at 3-45 p.m.*)

Audited accounts for the year ended 31st December, 1940 :—

The Revenue Account shows a profit on the year's working of Rs. 9,921-9-3 as compared with Rs. 104-6-7 for the previous year and there remains at debit of Profit and Loss Account a sum of Rs. 1,25,893-12-10 to be carried forward.

Progress.—The plant operated satisfactorily throughout the year, and a continuous supply of electricity was maintained.

An improvement was shown in the number of new connections made, and the number of units sold during the year increased by approximately 34 per cent. as compared with the year ended 31st December, 1939. This was attributable largely to improved cindtions in the industrial field, brought about directly and indirectly by war conditions.

Managing Agents.—Messrs. Octavius Steel & Co., Ltd.

Authorised Capital—Rs. 8,00,000 in 80,000 shares of Rs. 10 each. Issued and Subscribed—Rs. 5,49,900 in 54,990 shares, fully paid up.

Audited accounts for the half-year ended 31st March, 1941 :—

	Rs.	A.	P.
After providing Rs. 2,08,487-11-6 for Depreciation on Block and Rs. 50,000 for Taxation, there is a profit for the half-year of	2,82,742	13	7
Add balance brought forward from last half-year ...	76,609	0	11
or an amount available of	3,59,351	14	6
which the Directors recommend should be dealt with as follows:—			
Payment of Dividend of Rs. 5 per share	2,95,820	0	0
Leaving a balance to be carried forward of ...	63,531	14	6

Working Hours.—In accordance with the recommendations of the Indian Jute Mills Association, both Mills worked 45 hours weekly, but were closed for one week per month with the exception of February.

Jute.—The Company continues to maintain an adequate supply of raw material at an average price which compares favourably with current market rates.

Manufactured Goods.—Prices have recorded a steady and sustained advance during the past six months chiefly as a result of speculative activity in the local bazar following the effects of what now appears to have been an unnecessarily severe curtailment of hessian production. Although the shortage of freight space to the United Kingdom has naturally affected the stock position, shipments to America and Australia have, however, been reasonably good. *Prospects for the current half-year, despite the continued increase in overhead costs, are fairly satisfactory, whilst further ahead the future remains obscure owing to the international situation.*

Managing Agents.—Messrs. James Finlay & Co., Ltd.

Authorised Capital—Rs. 60,00,000 in 60,000 shares of Rs. 100 each. Issued and Subscribed—Rs. 59,16,400 in 59,164 shares, fully paid up.

(*Annual Meeting, 4th June, 1941 at 11 a.m.*)

Audited accounts for the year ended 31st December, 1940 :—

The gross profit transferred from the Divisional Accounts is Rs. 8,45,279-1-2, out of which the directors have reserved for taxation and furlough and staff expenses, and have written off the cost of the minor improvements. The directors have also reserved Rs. 2,00,000 to meet commitments already incurred, but for which payment had not been made owing to delayed supplies. Allowing for all these adjustments, the net profit for the year is Rs. 5,48,975-5-5 which, with the amount brought forward from 1939, gives a total balance on the Account of Rs. 6,96,544-11-3.

Out of this the Preference Dividend for the year and an Interim Dividend on the Ordinary Capital of 7½ per cent., absorbing Rs. 1,41,000 in all, were declared payable on the 20th December, 1940; and there now remains a nett balance of Rs. 5,55,544-11-3, which with the approval the directors propose to deal with as follows:—

		Rs.	A.	P.
Pay a Final Dividend on the Ordinary Shares of 22½ per cent., making 30 per cent. for the year ...	...	3,60,000	0	0
Place to Renewals and Additions Reserve ...		50,000	0	0

(*Annual meeting, 9th June, 1941 at noon*).

Audited accounts for the year ended 31st December, 1940 :—

The result of the season's working is a profit of Rs. 1,83,901-6-1, which has been transferred to Profit and Loss Account. After sundry adjustments there is at credit of the account a balance of Rs. 2,34,219-6-11.

An interim dividend of 5 per cent was paid on 3rd December, 1940, leaving Rs. 2,11,719-6-11 now to be dealt with. The directors recommend that a final dividend of 35 per cent be declared at the Annual Meeting, leaving Rs. 54,219-6-11 to be carried forward to 1941.

Estimates for 1941 provide for a crop of 9,100 maunds for an outlay of **Rs. 2,64,671**; including inland freight and sale charges.

Managing Agents:—Messrs. Duncan Brothers & Co., Ltd.

Authorised, Issued and Subscribed Capital—Rs. 4,50,000 in 45,000 shares of Rs. 10 each, fully paid up.

BENGAL CENTRAL BANK, LIMITED

Report for the year ended 31st December, 1940:—

On account of the war conditions, the directors have thought it judicious to strengthen the liquid position of the bank. The cash and bank balances are 32 per cent of the deposits and the market value of securities is 16 per cent of the deposits, making a total of 48 per cent. Over and above these, there are considerable advances against liquid securities. The bank's position in these uncertain days is, therefore, all that is desired.

A sum of Rs. 20,000 has been added to the Reserve Fund, making it Rs. 3,10,000. The available total of Profit and Loss Account is Rs. 40,248-7-6 and the directors recommend the payment of a dividend off 5 per cent per annum, free of income-tax.

***Manager.*—Mr. A. K. Roy.**

WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

EASY conditions have continued in the money market, the rate for interbank call money being ½ per cent. This is a purely nominal rate. As we explained in the last issue, the increased sales of Treasury Bills both by tender and through the tap have not adversely affected the surplus resources in banking circles as Treasury Bills maturities, too, are on a heavy scale. Money market sentiment is definitely inclined towards continuance of cheap money and, if, the Treasury Bill rate showed slight rise during the current week, it was less due to current market conditions than to the psychological effect which the offer of tender Treasury Bills for as much an amount as Rs. 2 crores has on bankers. Their general line of thinking in such circumstances is that they have hardly known the Reserve Bank to reject tender as unsuitable if, by such rejection, the full quota of tender bills for the week is not made up; and that, in simple terms, the authorities will not put up any great resistance if they are mulcted to the extent of a few pies more. We do not suggest that the average discount rate of this week, which was annas 13 and pies 9 per cent per annum, was unduly unfavourable to the Treasury. But there is certainly a case for the occasional demonstration of firmness in Treasury Bills policy. The Reserve Bank seems to be desirous of being able to announce that the total amount accepted on the tender day is equal to the total amount on offer. We suggest that this is not always the correct objective to be kept in view in Treasury Bills operations. When it is found that bankers are inclined to put up the discount rate on the confident assumption that the authorities would not mind it, the most effective way of preventing such progressive rise is for the rejection of unsuitable tenders even at the risk of securing only a portion of the funds which the Treasury was out to secure through the tender. On May 18, the offer of Tender bills was Rs. 1 crore; and the average rate of accepted tenders was annas 12 and pies 9 per cent. On May 20, the market was asked to tender for an increased offer of Rs. 2 crores; and the average rate of accepted tenders rose to annas 13 pies 2 per cent. On May 27, the offer was Rs. 2 crores; and the average discount rate has shown a further rise to annas 13 and pies 9 per cent. Doubtless, the Reserve Bank authorities have realised that a halt has to be called, at some stage, to this progressive increase in the average discount rate. It may be perhaps admitted that a rate roundabout annas 14 cannot be considered onerous in conditions in which the Treasury is calling on the market to put up anything like Rs. 4 crores per week for its short-term requirements. While admitting this, we should strongly urge that the market must not be allowed to get on with the idea of fleecing the Government.

On the weekly tender day, against Rs. 2 crores on offer, applications came to Rs. 3,88¼ lakhs. This figure is more or less the same as last week. The average rate is 7 pies higher at annas 13 and pies 9 per annum. Tap treasury bills sold between May 21 and May 26 amounted to Rs. 1,76¼ lakhs, comparing with Rs. 2,83¾ lakhs in the last week. Sale of intermediate Treasury Bills is to be continued at the unchanged rate of Rs. 99-13-0 per cent.

The Bengal Government are in the market for three months Treasury Bills for an amount of Rs. 40 lakhs. Tenders are to be submitted on June 2. The Bengal Government should be able to secure their three months' accommodation at a rate which does not compare unfavourably with the rate of the Central Government. The average rate of accepted tenders might turn out to be roundabout annas 14. Since *Indian Finance* started its criticism of the invidious distinction which was being made between Central Treasury Bills and Provincial Treasury Bills, and between the Treasury Bills of one Government and those of another, there has been a gradual narrowing of the difference in the discount rates. For our part, we shall not be satisfied till we see all distinctions in the way removed between the Central Treasury Bills and Provincial Treasury Bills; for, as we have stated again and again, there can be no question of any difference between the credit of the Central Government and that of the Provincial so long as the debt repayable in three months is concerned. As lending force and support to our plea, we may again draw attention to the rates at which the Treasury Bills of the Northern Ireland Government are placed on the market from time to time. Northern Ireland bills are taken up by the market at the same rate as British Treasury Bills. We shall, therefore, watch the results of Bengal Treasury Bills on Monday with special interest.

The ways and means of the Government has functioned exceptionally smoothly, particularly when it is remembered that the Indian side of the ways and means adjustments connected with the sterling debt repayment has involved colossal amounts. The ways and means advances taken by the Government from the Reserve Bank are slowly but steadily going down; and the amount that yet remains to be liquidated is only Rs. 7 crores. Leaving out of account the adjustments made by the issue of *ad hoc* rupee securities to the issue department of the Reserve Bank the only problem left to be tackled is the repayment of ways and means advances for Rs. 7 crores. While, the greatest credit is due to Sir Jeremy Raisman and Sir James Taylor for putting through gigantic operations with hardly any strain on the ways and means machinery, methinks the time has come for serious attention being given to the various ways by which further strengthening of the ways and means position can be achieved in suitable adjustments and adaptations in

TREASURY BILLS

India

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills were opened on Tuesday, the 27th May, 1941. Total amount offered was Rs. 3 crores. 38 lakhs and 25 thousand. Tenders at Rs. 99-12-9 per cent were accepted in full and those at Rs. 99-12-6 per cent were allotted approximately 54 per cent. Lower tenders were rejected. Total amount accepted was Rs. 2 crores, the average rate of accepted tenders being annas thirteen and pies nine per cent per annum.

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills will be received on Tuesday, the 3rd June, 1941. Successful tenderers should make payment on Friday, the 6th June, 1941. Other conditions are as usual.

Three months' Intermediates will be sold from the 28th May to 2nd June, 1941 at Rs. 99-13-0 per cent subject to the conditions previously announced (viz., sales can be stopped at any time without previous notice if Government think it necessary).

Three months' Intermediates sold from the 21st to 26th May 1941 amounted to Rs. 1,76,25,000.

During the week ended the 23rd May, 1941, Government of India Treasury Bills for Rs. 3,00,00,000 were sold in favour of the Issue Department of the Reserve Bank of India.

Bengal

Tenders for Rs. 40 lakhs of three months' Government of Bengal Treasury Bills will be received at the offices of the Reserve Bank of India at Calcutta and Bombay up to 1 p.m. (Standard Time) on Monday, the 2nd June, 1941.

Successful tenderers will be required to make payment and take up their bills on Wednesday, the 4th June, 1941.

MISRA HOSIERY
MILLS
CAWNPORE

Telegrams: MISRA, Cawnpore — Telephone: 2336 Cawnpore

THE MISRA HOSIERY MILLS have, from the commencement of the war, been "on active service". Working day and night, the mills have been supplying essential requirements of the Army in the knitting line.

MISRA HOSIERY cater to the requirements of the general population and comprise socks, stockings, undervests, sports shirts, interlock underwear and outerwear, for men, women and children.

Production 8,000 Articles, daily.

Finance Abroad

THE determination of the British Government to get their short-term requirements on as cheap a basis as possible is reflected in the decision of the authorities, last week, to allot only £65 millions of Treasury Bills against the offer of £75 millions. There was a sharp decline in the amount of applications as a result of the drive in London for War Weapons Week. It was announced on Tuesday that collections of London's War Weapons Week was £120.041 millions which is an average per head of population of £21.

In spite of the smaller offer of bills it has, however, not been possible to prevent an increase in the rate from £1-0-0.18d. to £1-0-0.59d. The Market Syndicate has again been successful in getting a big allotment, being 44 percent against 38 percent.

* * *

The conservation of foreign exchange and the pooling of dollar investments and credits of individuals within the Empire have been receiving considerable attention in recent months. Towards this end there has been a tightening of import control in this country and it was only sometime back that 59 more articles were placed on the list and licenses had to be obtained for the import of those articles. The seriousness of the situation will be evident from the fact that even imports of newsprint are now prohibited.

The latest move in this direction is by the Australian Government.

Under an order gazetted on Wednesday, all persons resident in Australia owning United States dollar funds and currency of any form in Australia or overseas are required to sell them to the Commonwealth. It is estimated that the proceeds will be about $1½ millions, mostly in bank balances held by Australians in the United States. The Government have also decided to acquire Canadian dollar credits held by Australians in their currency notes or bank notes, transfer or mortgaging of Australian security and land owned outside the "sterling area" to anyone outside the sterling area. Transfers are illegal without the Commonwealth Bank's permission.

* * *

Almost alone among the Empire countries, New Zealand is having a surplus war budget. Despite the increase in military expenditure, the country has been able to boast of a surplus of 1,726,000 New Zealand pounds as tax realisations were considerably higher than expectations. It was originally estimated that there would be a small surplus of £ (N.Z.) 46,000. Revenue totalled £ (N.Z.) 40,439,000 and expenditure £ (N.Z.) 38,712,000.

President Roosevelt has again been successful. There was considerable opposition from the Republicans for the extension of the President's term of power for a period of another two years regarding the revaluation of the dollar and the continuation of the 2,000 million dollar Currency Stabilisation Fund. Both of these powers would normally expire on June 30. The Bill now goes to the Senate.

An idea of the colossal amounts spent on war production and new plant will be evident from the expenditure incurred by Canada.

During the past year Canada had been authorizing expenditure of some £700,000 monthly for new plant and equipment for war material according to the Department of Munitions and Supply.

The total investment in new plant and equipment approximated to the total invested in industry in the metropolitan cities of Montreal or Toronto. The whole programme involves expenditure of 1.6 times the total ordinary expenditure of all the nine Provinces in 1939 while, for example, the sum being provided for the manufacture of ammunition alone exceeds the total annual Canadian post office revenue.

Several illustrative commitments are shells, 46,000,000 dollars, gun mountings 121,000,000 dollars; tanks, carriers etc. 10,500,000 dollars: aircraft, 23,000.000 dollars: chemicals and explosives, 112,000,000 dollars; railway equipment, 24,300,000 dollars.

Australia is to speed up production immensely and plans are being drawn up vigorously. Which means, further increase in expenditure.

There has not been any activity in the bullion markets during the past week. The important centre in this country, Bombay, has been closed for the most part of the week on account of the communal disturbances. On reopening yesterday a slightly firmer tone was noticeable but no appreciable rise in prices has been recorded. Gold ready is quoting slightly above export parity price while silver ready is not very much changed. There is very little interest in the market and business has been mostly on account of arbitrageurs.

(Continued from page 987)

Treasury Bills policy and new loan planning. We consider that it should be possible for the Indian money market to sustain a far higher floating debt; and, if the floating debt outstanding in the hands of the public could be doubled, what a difference it would make to the ways and means problems of the Central Treasury; what great saving in interest charges would be effected? What greater mobility and resilience would be imparted to the money market? These are questions of far-reaching significance; and the achievement in this direction is possible only by bolder ideas and more thorough-going plans with respect to the creation of a Treasury Bill market in India. So far as the new loan planning is concerned, the second defence loan does not make impressive showing. The subscriptions are but a tiny flow, and its far-flung advertising in papers and an indefinite offer through the tap, do not seem to have had any favourable effect. Even in the case of the first defence loan, the real heady flow was towards the close; and this was due to the market anticipating that the second defence loan would not be as favourable as the first. The sale of a new loan through the tap has its first and foremost disadvantage that there is nothing like a prospect to look forward to. The first defence loan was a success in the period when the market could look to the prospect that would be created by the second defence loan. In other words, a new loan has more chances of success not by static but by dynamic conditions induced in the gilt-edged market. The 3 percent 1941 loan for Rs. 10½ crores is due for redemption on September 15, though it is yet 8½ months before the funds for the redemption will be required, it should be the policy of the Government not to wait too long as political developments in the international world might inflict an inopportune shock. While money conditions are definitely easy and while the giltedged market is in a confident mood, it is prudent to plan the new loan on lines that are suited to the market psychology and rope-in whatever monies may be required for immediate and future requirements. It may not be without hazard to postpone the timing of the new loan to August or September. At the present moment, there is acute political tension; but conditions in the money and giltedged market are definitely propitious.

The Reserve Bank returns and the Imperial Bank returns of this week do not call for any particular comment. Deposits maintained by scheduled banks with the Reserve Bank show rise of over Rs. 2 crores. This is satisfactory. Foreign balances in the banking department of the Reserve Bank are slightly higher.

The exchange market has been very steady to the relief of bankers and brokers who had been condemned to dull and quietish business for what seemed unending weeks. There was a fair showing in export bills mostly on jute and gunny account. The freight position was more encouraging; and the shipments were in large part for the United States. There were also some shipments to the United Kingdom.

Banks were sellers of T. T. at 1s. 5 15/16d., for ready up to six months forward; and banks were buyers of T. T. at 1s. 6d., for the same delivery.

Banks were buyers of three months' D.A. bills at 1s. 6 7/82d., for the third month and 1s. 6 9/82d., for the fourth month.

Interbank call money quoted ¼ per cent with no takers.

Firms' money for call and short quoted ¼ percent and ½ percent for one month to four months.

LLOYDS BANK LIMITED — INCORPORATED IN ENGLAND — 1677

SAVING MADE EASY

Five Rupees will open a SAVINGS BANK ACCOUNT at Lloyds Bank, and small sums deposited regularly quickly accumulate to a substantial amount.

This is a most convenient method of preparing for the payment of periodical demands, such as insurance premiums, income tax, medical expenses or school fees.

Interest allowed at 1½% per annum. WITHDRAWALS CAN BE MADE BY CHEQUE.

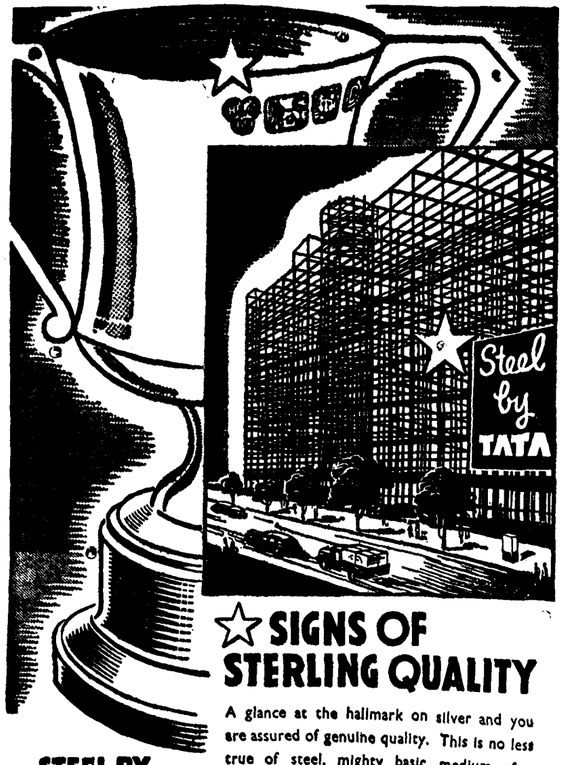
Changes in India's Foreign Trade

In the study of India's foreign trade, in which the balance of trade and the composition of exports and imports are normally important, the war has shifted the centre of interest to the direction of trade. That the war has closed practically the whole of the continent of Europe to India's export trade is a matter of common knowledge. And one would think that a year or a year and a half is altogether inadequate for effecting those readjustments which so serious an upset would seem to call for. But the figures for India's foreign trade for 1940-41, which were examined in a special article last week, show that compensatory advantages for the loss of European markets are not altogether lacking. It should not be forgotten that, if the war shut out India's exports from continental markets, it has also created a kind of low pressure area in Empire and other markets which, so to say, attracts goods in geater volume than before. It would, of course, be too much to claim that the loss has been made up or that India is out of the wood into which the war in Europe suddenly plunged us. Much less valid would it be to argue that the changes in the direction of our trade have any degree of permanency. No new channels of international trade have been cut by the overflow of Indian exports into non-European markets. Nevertheless, it is of great interest to find that Empire markets other than the U.K. and Japan have all increased substantially their offtake of Indian goods and that the foreign countries with whom trade communications are maintained have improved their positon in our import trade at the expense of Great Britain.

No adequate idea of wartime changes can be had if the changes in the direction of trade are left unconsidered. If the total turnover shows no great variation in spite of the vicissitudes of the summer, it must be due mainly to the restorative action of the developments connected with the Eastern Group. One is naturally induced to attribute this to the Delhi Conference; but the monthly accounts published from time to time indicated that the expansionist tendency was already in operation. It is certainly noteworthy that exports to the U.K. in 1940-41 fell away to some extent, when the exports to the Empire increased. It is true that the U.K. remains still the single largest customer, but the fact that imports from India into Britain fell, while imports from other countries showed unusual increase, indicates that the decline in total imports from the U. K. from Rs. 41.61 crores to Rs. 35.96 crores militated against any increase in trade. While imports from Britain fell away by over Rs. 5.6 crores the decline of Rs. 7½ crores under exports was inevitable, but due regard must be had to the fact that exports in 1939-40 were inflated by the rapid advance in commodity prices and a more correct picture of the essentially healthy position may be had from the 1940-41 figures.



An arresting figure in the trade returns is the big rise in exports to Burma. The increase is invested with unusual significance in view of the trade treaty that came into force after the close of the last fiscal year. A rise of nearly Rs. 4 crores under exports and a fall over Rs. 3 crores under imports lend point to the contention that the balance of trade in favour of Burma is being reduced and that any duties on imports of Indian origin would not operate to the disadvantage of India since India is in a position to ignore her rivals. The rise in merchandise exports attests the fact that several lines of manufactured goods needed by Burma are provided by India in whose trade with Burma textile manufactures have naturally acquired prominence.

A feature of the 1940-41 trade figures is the increase in trade with Malaya, Hongkong and Ceylon. The increase points to the importance of India in their trade in wartime, since their own exports to India have risen more rapidly than expected. Among the Dominions, New Zealand and, even more, Australia have taken larger quantities of Indian goods after the outbreak of war. The increase noticed in 1939-40 has persisted; and it is to be noted here that exports to Canada alone show a decline as compared with 1939-40.

The further growth in exports to the Empire merits more detailed analysis than is possible at present; but there is this fact to consider, that, while total exports have fallen by Rs. 17 crores, exports to the Empire, as distinct from Britain, have risen by over Rs. 10 crores. Not a few commentators will point to this as conclusive evidence in favour of the now-familiar theory that compensation for the loss of European markets has been provided by the growth of trade with the Empire. It must, however, be mentioned that exports to Canada fell by nearly a crore. Though Canada is outside the sterling area, imports from the Dominion increased by over 100 per cent to Rs. 2.96 crores. The increase noticed under imports of paper, metals, steel etc. in 1940-41 go far towards explaining the rise which must also owe much to the larger share of Canada in the trade in motor vehicles. With the Continent out of the picture and U. S. imports officially discouraged, it was easy for Canada to increase her share, though total imports last year, valued at Rs. 6.81 crores, might show a fall as compared with 1939-40. More remarkable is the increase in imports from New Zealand last year. It is likely that the rise from Rs. 12.66 lakhs to Rs. 1.17 crores is the result of the cessation of im-

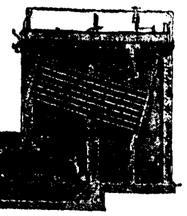
ports of dairy produce etc., from Europe. Imports and exports are almost equal in this case, whereas imports from Australia valued at Rs. 2.48 crores fall short of the value of exports shown in the March trade returns at Rs. 7.34 crores. It may be inferred that the efforts made to stimulate trade are influenced largely by the expansion in exports from India.

While total exports to the Empire including Britain have risen by Rs. 2.6 crores, total imports have fallen by Rs. 3.36 crores. This must be attributed to the fall in imports from Britain and Burma already referred to. In fact, all countries, with which trading relations are maintained, have increased their supplies to India during the year, and the increases recorded under imports of wool and cotton explain satisfactorily the increase registered under imports from Australia and Kenya. The increase shown under imports from Ceylon is accounted for by the increase noticed under rubber and copra last year and the absence of a trade treaty does not appear to have done any harm as imports and exports alike have shown parallel growth and the balance of trade is tilted heavily in India's favour.

While there is a temptation to read much into the growth of inter-Imperial trade, it must not be forgotten that the Dominions are gaining a larger market in India at the expense of Britain. They have not concealed their anxiety to develop secondary industries and increase manufactured exports, because agricultural exports are affected by the war. The only observation to add here is that a similar tendency is noticeable in the case of India's exports also. Exports of manufactures improved by Rs. 5.22 crores in 1940-41 as compared with 1939-40, while exports of raw materials and produce and articles mainly unmanufactured fell by Rs. 24.1 crores. No special encouragement is apparently needed for the development of an export trade in paper, rubber manufactures or iron and steel. Exports of apparel, cutlery, glassware etc., show a moderate increase compared with 1939-40.

The most important development of the year undoubtedly was the increasing importance of the U. S. A. both as buyer and provider of India's requirements. At first sight, the rise in imports may seem disproportionately large, as compared with the increase of about Rs. 1.5 crores under exports; but it must be pointed out that imports from the U.S.A. at Rs. 27 crores are not very much larger than exports to that country valued at Rs. 25.9 crores. The increase of over Rs. 15 crores compared with the previous year noticed under imports from the U.S.A. has taken place in spite of a fall of Rs. 8½ crores under total imports. It is apparent that the U.S.A. has gained at the expense of both Britain and Germany in India as in Latin America. The increase was achieved in spite of the introduction of import control and the disadvantageous course of exchange rates. The fall of nearly Rs. 5 crores under exports to Japan must be related to the fall of Rs. 6.58 crores under exports of cotton last year. The essentially unfavourable nature of India's trade relations with Japan last year cannot be independent of the divergence in views between Japan and Britain first as regards the Far East and latterly as regards the war in Europe. That imports from Japan have risen and have advanced from Rs. 19.28 crores to Rs. 21.54 crores despite adverse influences shows that Japanese manufactures remain essentially for general consumption; but the increase may be partly traceable to the general advance in Japanese exports in 1940 which yielded an export surplus as against the unfavourable balance of trade that has characterised Japan's trade in the past. The widening gap in the adverse balance of trade gives force to the observations made in the last report of the Trade Commissioner at Osaka as to the effect of war on Japan's import trade. While exports from India to China rose further, exports to Japan showed a decline. The changes in the cotton trade go far towards explaining the changes. The table of imports gives a most vivid portrayal of the fall in trade with Europe. Import from Switzerland declined owing to the appreciation of the Swiss franc and the active discouragement of luxury imports like watches. Italy, in the two months of peace, shipped exports of a greater value than neutral Sweden over a year; and the war by itself makes intelligible the vast changes in India's trade with the Low Countries. It is not surprising to find that trade with Russia has practically disappeared and notifications as regards trade with Hungary were hardly necessary in view of the striking fall in imports.



Certain other facts disclosed by the table of merchandise exports must find a place in this account of wartime changes. The increase in imports from Portugese East Africa and Dutch Borneo are as significant as the fall in imports from Java and Spain. The decrease in exports to Indo-China and Thailand find a close parallel in the decline in imports from the French colony. Exports to Borneo and Java (grouped together in the export table though there is a separate entry against Sumatra) fell away in comparison with the previous year, and India's trade with the Dutch Empire did not show any marked increase. The case is different with the Brtish colonies since colonies as far removed as Hongkong and Zanzibar increased their offtake of Indian exports. Another fact disclosed is that despite the unofficial trade mission from Turkey followed by the establishment of through railway communication, there was an arresting fall in exports to Turkey. But this fall may be explained by reference to the expansion in Inda's exports to Iraq. Turkey is known to use Basra as a port through which foreign supplies are drawn, and anxiety over the recent events was attributed largely to Turkey's desire to keep the line to America by way of the Persian Gulf ports open. Exports to South America declined last year, though exports to North America showed a remarkable increase. China in spite of the war exported more to India than in 1939-40; and this is as noteworthy as the decline in India's trade with Aden at a time when trade with Arabia shows a surprising measure of stability.

The press has naturally featured the plea for ending the deadlock made by Sir Badridas Goenka last Friday at the quarterly meeting of the Indian Chamber. But there are many other features of interest to which attention may be called. His remarks on the lowness of per capita consumption under the heads of sugar, grain and salt show that under-nourishment is one of the main facts of everyday life in India. The total per capita consumption of cloth including handloom goods is as low as sixteen yards and this fact by itself supports the view that the standard of living is very low and if consumption of cloth should increase, there would be no export problem so far as raw cotton is concerned. The main depressing feature is the inadequacy of incomes, and only full employment following industrialisation, which absorbs indigenous raw materials, can add to the people's income. Any such increase will by itself absorb the primary production and the agriculturist would not have to look to foreign markets for disposing of his produce. Sir Badridas did not merely furnish new arguments in favour of increased industrial production. He described how the Dominions had not only harnessed their industries to the war effort, but made use of new opportunities. He cited figures from Canada and Australia in order to emphasise the different nature of India's position. There are the fall in overseas trade and the depression in wholesale prices of agricultural commodities to show that such favourable economic effects as are attributed to the war are few and limited. The President of the Indian Chamber had much to say on the Government's attitude towards industrialisation. The liberalisation of fiscal policy is yet to come and references to the declaration of the Commerce Member last year as regards protection should be supplemented by reference to the way in which the assurance is being given effect to. Sir Badridas stated "Your Committee had an occasion recently to approach the Commerce Department for such an assurance of protection with reference to a particular industry but I regret to have to say that the reply which the Chamber received from the Government did not reveal any changed outlook. On the contrary, the Government refused to consider the request merely on technical grounds. In another case, the Government did not even agree to maintain the level of revenue duties already in force for a few years so as to enable any new indigenous venture to stand on its own legs.' The quotation serves to show that fiscal policy is still the subject of criticism and Sir Badridas Goenka added his complaint as regards the absence of connection between Industry and the Supply Dept. Many industrialists have discussed the subject of machinery imports in wartime. Import control should not by itself prejudice industrial development, and the relaxation of restrictions relating to exchange and shipping space was, therefore, advocated by the President of the Indian Chamber who referred also to the handicaps imposed on the Indian shipping industry which continues to hope 'that the peculiar circumstances of Indian shipping will not be overlooked.' The rights of Indians in Burma were mentioned in order to show that the commercial community in India is concerned over the notice given as regards the notice of termination of the Immigration Order of 1937 given by the Burma Government.

Export Problems

A sharp reminder of the difficulties in the way of India's export trade recovering to its previous proportions is contained in the recently published summary of the discussions of the Export Advisory Council. Oilseeds are known as the commodity most seriously attacked by the closure of European markets and the shortage of shipping space. Efforts made to alleviate the position in the last six months were preceded by discussions of the Madras Government with the interests concerned. A misapprehension in regard to the position of Messrs Ralli Brothers, one of the firms who tendered oilseeds for the Food Ministry's requirements was cleared up and it was pointed out that any difference over the agreed price was held in a pool, the funds of which were to be applied for the relief of the producer. It is known that £100,000 is now available for the purpose of relief on the understanding that the province or State interested would put up a proportionate sum for the relief of the groundnut cultivator, though not directly in cash but through indirect means such as the encouragement of the oilcrushing industry by freight facilities of the working of a similar scheme in regard to linseed shipments is little known ; but the Commerce Member announced that £15,000 had been obtained and funds from this new type of cess were to be devoted for the benefit of the cultivator rather than the trade. Owing to the discontent manifested in connection with the chronic shortage of shipping, it was necessary to outline the system under which shippers got freight space. It was stated that space for the U.K. was alloted to each shipper in proportion to his shipments in prewar years to the U.K. by each line. It has been recognised that the system is less than fair to shippers who had used foreign ships or who had traded with countries other than the U.K. in the prewar period. It was therefore natural for the Council to discuss the subject at length and record its opinion in favour of a more generous policy to those shippers who were now unable to get space. The Commerce Member suggested that detailed proposals in this regard should come from the trade associations concerned. A further point raised during the last meeting of the Advisory Council turned on the practice adopted by Ameria of alloting space as among the importers in the U.S.A. without any concern for the Indian shipper. Reference was made to the change in procedure adopted by the American Liners' Conference which declined to provide space to established shippers. It was pointed out in reply that redress could not be had where the importing country had changed over to some form of import control and space was alloted on the production of licenses. The point to note here is that India is practising the same thing and the export of other countries has suffered thereby. The Export Advisory Council started again the discussion over the possibility of improving trade with the U.S.A. The

claim that Indian mica has benefitted from the timely despatch of the special mission was made. It was stated that the Government made arrangements for the air purchase and supply of large quantities of mica to the U. S. Government. If strict control in regard to the mica trade is varied when necessary and the prospects in view of the national emergency in the U.S.A. are unaffected by the existence of restrictions, there can be little ground for complaints. Control is modified as required in the case of black and the grey wool, also the prices in this case being fixed on consultation with the Supply Department, so that the ultimate consumer, the Government, supervises the transactions with the mills.

U. S. Industrial Profits

More information is now available as to the trend of profits in the U.S.A. In spite of the rise in industrial activity in America profits, as a whole, did not rise above the 1937 level. The reason assigned is the increase in taxation. The reports of 154 selected companies indicate that appropriation for taxes were two and a half times those for 1939 and took as much as 33 per cent. of aggregate profits. That is why net profits rose by only 3 per cent. as compared with 1937 in the case of the 154 companies referred to. The trend of profits and taxation are not far dissimilar in Britain and the U.S.A. and instances will not be wanting in India to establish that the trend of profits in most industries was not exceptionally favourable. In the case of the jute and coal industry the originally favourable trend was reversed. It is not likely that earnings for 1940 in any industry except the paper, tyre, woollen, textile, match and other miscellaneous industries will reflect anything resembling boom conditions, and in these cases, too, the expansion in earnings of several companies did not lead to any increase in dividends. The course of profits was uneven and it is only necessary to glance at the usual tables relating to cumulative earnings of companies tabulated from week to week to ascertain that industrial profits in India have no means advanced strongly as a result of the war.

Reference was made last week to the change in profits of industrial companies in the U.S.A. to show that the increase was not spread over a wide field, and it was also noted that the arms programme did not lead to any big rise in profits, except in the case of a few favoured companies. The changes were discussed in order to show that profits in several big industries including brewing declined in comparison with 1939. A further analysis of over one thousand companies made in order to determine the major trend shows that the most pronounced changes took place in the ship-building and coal-mining industries. And the tabulation proves that in spite of stories current about the depression in Hollywood many motion picture companies reported an increase in profits. The trend in retail trade was essentially adverse and the most fortunate by accepted standards were the aircraft companies which got both home and foreign orders in excess of current production. A feature of the analysis is that the capital equipment industries make a far more favourable showing than anticipated, while the unexpected decline in the consumption trades shows that higher wages do not necessarily mean better custom for the department and mail order stores. Just as the companies which show any striking increase in profits in India are those engaged on war work, the companies which got defence contracts report sizeable gains in profits. But profits in the majority of consumption industries in the U.S.A. were above the recession level and the third term started therefore with the barometer set fair. A more striking feature of the year was the recovery in railroad receipts. The higher level of traffic led to a doubling of the earnings of 136 class 1 railroads in 1940. The earnings were the highest for any year since 1939. The income of public utility companies showed only a small increase and this is perhaps one reason for the different conditions reported on Wall Street where the daily turnover has yet failed to achieve the million mark. The 1940 boom appears to have been so

mild as to pass unnoticed; but the further improvement in progress since January was not confined to the durable goods industries which continued to benefit from war orders. The demand for metals increased and attempts were made to control the prices and supply of lead and zinc. The need for building up stock-piles of nickel, manganese, tungsten and chromite was stressed by the new advisory and executive boards.

Germany's Shortage of Lead

In a note of the *Economist* of May 17, on lead supplies reference is made to Germany's known deficiency in one or more of the metals. The difficulties of Germany as regards non-ferrous metals were described by reference to the fact that Balkan or European supplies would not alleviate the position. The *Economist* says lead has always been one of the chief munition metals. The much-increased firing power of machine-guns has substantially increased the demand for lead for the production of bullets. Among the chief industrial countries directly involved in this war, Germany finds it most difficult to cover her lead requirements. Germany and Austria together can produce 100,000 metric tons of lead in a year. Another 100,000 tons per annum may be obtained from Poland while Yugoslavia may be able to supply 80,000 metric tons provided the Trepca mine has been kept intact. Spain, normally not an insignificant producer, has hardly any exportable surplus at present. Russia is not self-sufficient in lead. Compared with Germany's estimated minimum requirements of over 300,000 tons of lead per annum, the supplies to which she has accesss to thus appear seriously inadequate even if allowance is made for tonnage recovered from scrap. Britain, on the other hand, while producing only about 40,000 metric tons of lead per annum from domestic sources, has access to ample supplies abroad. The British Empire alone produces about 600,000 metric tons every year and the greater part of the production is refined near the mines. The Empire's production is more than adequate for its needs. The survey of the lead position shows that as under copper and zinc the Reich is seriously handicapped in war, first because the blockade shuts out direct imports and possible supplies through the few surviving neutrals and secondly, because the home production is disturbed by regular raids by the R.A.F. Germany's war machine may not run down to a standstill but there is scarcity of raw materials except perhaps for bauxite and magnesite and the oil position is more than ever discouraging explaining in turn the eagerness for Iraq's lubricants. Many will agree that the new expansionist urge is born of the fever produced by inadequate nourishment for her industries.

Rising Arms Output

The Federal Reserve Board has noted that the index of industrial production rose by two points in February. The gains of the final quarter of 1940 were preserved after the growing realisation that the defence programme is the chief business of the country. Occasionally, strikes are reported but concessions are readily forthcoming, and production is resumed, for the defence programme and its main subsidiary aid to Britain are considered vital to national safety and progress. In view of Mr. Walter Tower's recent assurance that U.S. steel production at present is far ahead of any of its rivals, and that the Axis cannot hope for more than half the U.S. output, the cable received this week by the Associated Chambers will be of high interest. According to the New York correspondent of the *Times*, for all the labour difficulties reported and the growing scarcity of some basic materials, industrial production has now swung back almost to the record high level of the days prior to the soft coal strikes. Steel output is again 99.2 per cent. of capacity which means that U.S. steel industry is producing at rate of 80 million tons per annum and this figures is more than all other countries together produce. Motor production is running at the rate of more than 500 units per month. The production of military aeroplanes has risen during the year from 450 per month to more than 1,400 and is rising by leaps and bounds. By October this will have been doubled. The production of tanks, guns, warships and other supplies of war is far ahead of schedule in some cases as much as six or eight months ahead. It is a big beginning but still only a beginning and so it is recognised. The New York cable to the *Times* shows how

Working of the Protective Tariff in India

Sir Kikabhai Premchand Readership Lectures 1938-39.

This course of ten lectures delivered under the auspices of the University of Delhi, reveals the qualities of clarity of writing, logical arrangement of matter characteristic of the author's previously published writings. A careful survey of the working of protective tariffs in India, during the last 15 years leads the author to conclude, that "because of tariffs the people of the country on the whole are richer." There can be no doubt that the cultivators and labourers are better off with production than without it. Dr. Jain is struck with the phenomenal progress not only of the Iron and Steel Industry, but also of the cotton spinning and weaving industry. He is on controversial ground, when he approvingly endorses the observations of the delegation of experts who visited India under the leadership of the Rt. Hon'ble Tom Shaw, that many of the manufacturing processes were fully equal to European standards, and in some cases, the variety of yarns spun and cloths woven, show a range and variety which is not equalled by any individual European concern. He feels that the rapid progress of large-scale weaving will, in recent years, call for the avoidance of undue competition between the products of mill and cottage industries. In the case of gur and sugar which have separate markets, Dr. Jain is anxious that efforts should be made to expand both and not one at the cost of the other. It is true that the efficacy of the tariff in stimulating, the industrial development of India is seen in its proper perspective if we bear in mind that India's industrial progress, has been handicapped at every stage, by the absence of adequate industrial and scientific research and statistics on the one hand and by the primitiveness of her system of industrial banking on the other. But it is an interesting point for debate how far the doctrine of discriminating protection, within the four corners of which more or less most of our Tariff Boards operated, made for the slow and intermittent growth of Indian industries. It is unfortunate that official retechnique has prevented Dr. L. C. Jain from giving his finding on the adequacy of the technique of tariff-making practised by our Tariff Boards. We are happy to note that the author is quite emphatic in his statement that the burden on the consumer has been gradually reduced, and that the conditions of labour employed in most of the Indian factories are quite satisfactory. Dr. Jain's course of lectures, in short, is sure to confirm the faith of all those students, who see in protection the most important single device, for accelerating the industrial development of our country. His book has a useful bibliography attached to it.

Hercules Insurance

The accounts of the Hercules Insurance Co. show that the company continues to draw greater revenue in spite of a fall in fire business last year. The Chairman discussed the results at the annual meeting last month and described the results

ONLY a quarter remains to complete the second year of the war in Europe, and Africa. And still we are completely in the dark as to how near to its end we are. All these months and the spectacular victories Hitler has secured for himself have not sufficed to give any indication either of the probable duration of the war or of its ultimate upshot. Normally, one would think that the conquest and subjugation of a whole continent constitutes by itself such a stupendous achievement that it must be deemed the most decisive factor in the shape of things to come. One might go further and say that not to think so is to indulge in wishful thinking. Impartiality and objectivity are not, after all, such an impossible mental feat as they are commonly supposed to be. One could easily overcome for a moment one's hatred of the Nazis and one's sense of fear that the established order of the world might all of a sudden be turned topsy-turvy. One might brace oneself to face what may reasonably be held to be in prospect. But such objectivitiy does not allow you to ignore the unrevealed potentialities of factors which are already present in the situation. I have been careful to limit consideration to factors already present. For, the possibility of unknown factors coming into play, while it cannot reasonably be denied, is no help to thought.

If speculation about the future is to be rigorously rational, one can neither think of unknown factors emerging at some time in the future nor fasten exclusively on the more arresting features of the present. There is a point at which the more important of the existing facts of the situation may be deemed to be so decisive that one need not wait for changes in other factors to estimate the final upshot. In the case of the war, there was at the beginning not a glimmer of light with which to see the future. How could the average man know what was the combined strength of Britain and France? Or what was the capacity of the belligerent countries or what were the chief sources of supply? I am referring only to the resources, because in regard to plans and campaigns and the technique of warfare, even the general staff do not appear to have been much better placed than the laymen. The lines on which actual campaigns were to be pursued were revealed but slowly. What was expected to be a world war continued for nearly seven months as a tussle between only three of the Great Powers. It was not long before a series of shocks and surprises were administered to the world. Poland, which ranked high as a military nation, was snuffed out in no time. The whole of Northern Europe was overrun by German arms without let or hindrance. The impressive edifice of French military power crashed before the German onslaught in less than a fortight. Italy, who had, for long, been an ardent worshipper at the altar of Mars, was routed by a peace-loving people like the Greeks. Britain, fortified her island home with every material and initiated a big sources at her command and initated a big and triumphant offensive against Italy in Africa. The collapse of the Italian effort is, strictly speaking, the beginning of the eastward drive of Hitler and the Nazis. By swift but cleverly planned moves, Hitler came in possession of the whole continent of Europe. He subjugated all the Balkan States, fomented trouble in Iraq and is now directing a terrific fusillade against Crete.

So far as the military side of the war is concerned, these constitute the main facts in the situation. And normally as I said at the start, this should be held to be the most important, if not an altogether decisive, factor in the future course of the war. This view naturally provokes the question, why so big an achievement is still found to be insufficient for securing victory or at least bringing victory into view. Even the German Radio, never known for the modesty of its claims, does not profess to see a speedy end of the war. And from a commonsense point of view, it would seem that the conquest of the Continent, while no doubt, it is a big achievement in itself, has but a small place in Germany's campaign against Britain.

The completion of the Balkan campaign should have brought home to Hitler that in his war with Britain, victory can be secured either by direct invasion and subjugation or by completely isolating her from all communication with the other parts of the Empire or with the United States of America. Though these two objectives have been attempted partially and in a half-hearted way, during all these months, Germany is yet unequal to tackling either or both these tasks directly. Dictatorship over the Continent avails little in the attack on Brtain's island home, while it no doubt helps repeated air raids and devastation on an increasing scale. It may also help a sort of guerilla warfare on the seas, which can work havoc on British shipping and take toll of British vessels well above British capacity for replacement. It may, therefore, be said that in the long view of the present war, air raids and submarine attacks have in fact greater importance than the spectacular achievements of Hitler on the Continent of Europe. But these air raids and submarine attacks are not all that is to be said about Germany's direct fight with Britain. For air attacks, while they cause

destruction of property, have not yet been known to have made the invasion of Britain a whit easier than before they were started. Neither the morale of the people nor the material resources which they have secured to repel possible invasion have been affected.

And as for the communications with the rest of the world, Britain and the British Navy are not the only factors to reckon with. It is the quality of over-vaulting ambition that it creates more enemies than it secures friends. God knows what world history and the course of the war would have been like, if Hitler had taken care not to raise the suspicion and the enmity of the United States. That is a useless and well-nigh impossible speculation. It is not easy to see how Hitler could have retained the friendliness of the American people. But whether he could or could not have, the fact remains that America declares with almost one voice that Germany is her enemy as well. Given that attitude, what the U.S.A. can and will do becomes vastly more important than Hitler's conquest of the Continent of Europe. One is not assuming unknown factors or dogmatising on the doubtful. What Hitler's power over the Continent can do is not a matter for speculation. France surrendered in the middle of last year. Only Yugoslavia, Greece and Bulgaria were conquered during the last few months. It is nearly a year since Hitler acquired the bases of attack on Britain. It was supposed then that he could have a walk-over in Britain if he attacked her after Dunkirk. And yet, all these months he has been marching his armies to the farthest corners of Europe. Twenty miles of water count for far more than thousand miles of land. And on water, there are others besides Britain to reckon with.

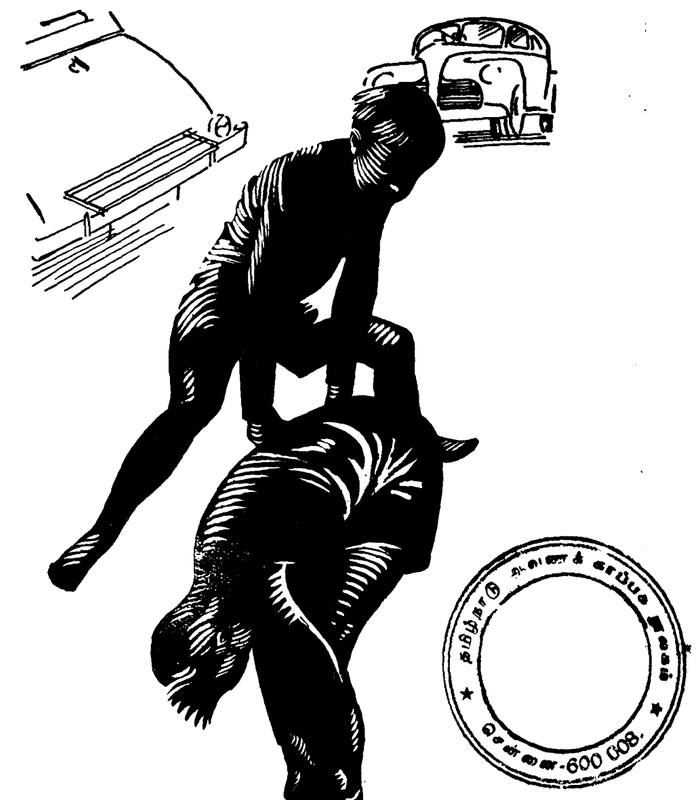
With this reading of the war situation, it is hard to quarrel. One may say that Hitler is spreading his net not over Britain alone, but over the British Empire, that the three-pronged attack on Africa from the North-Eastern side of the Mediterranean is intended to cut off the communications. But all that lies in the future and may be foiled. For this plan is closely linked with the wider plan, which has been, strangely enough, little heard of of late, of spreading the war all over the world. If it is true that Germany is yet to come to grips with Britain, it is also true that she cannot do so except by widening the scope of the war and fighting more enemies than she has now.

In this line of reasoning, the course of the war so far has still a remote bearing on its future progress or its ultimate upshot. Now, as when it first began, the diplomatic background is more important than the vicissitudes of the actual fighting. Even the pact with Russia and the changes which Soviet-German relations have, or are supposed to have, undergone have comparatively less importance than the world at first thought. For one thing seems certain, that Russia's active participation in the war is out of the question. The changes are confined to the degrees of cordiality and of help and collaboration. If Soviet-German relations are confined to questions of supply, they cannot fundamentally alter the position of Germany vis-a-vis Britain. For, in any circumstance Hitler would only be the master of a wider area of the mainland than formerly, and this would leave the question of supremacy on the seas untouched.

It is this question of control of the seas that binds America so closely to Britain. For not all the inhibitory ideas of isolation have prevented the U.S. from realising that the British Navy stands between her and the Nazis. It is no wonder therefore that Mr. Roosevelt concentrated on this in his fireside chat on Tuesday night. It was a fiery chat, full of fire for the ideals of the American Federation, for the American love of freedom, for life, liberty and the pursuit of happiness. It was fiery in its denunciation of Nazi ideals, Nazi methods and the Nazi's progress in the war. It was practical, too, in the sense that the President declared an unlimited state of national emergency and assumed for himself the powers necessary to protect the national interest.

It is not an easy task to appraise the President's statement at its true worth. Most people are ready with the impatient and ill-thought out question, what has the President done? Or, what will he do? It is rarely, if ever, realised that the criterion for judgment must flow from what is judged. It is the American President speaking to the American people. He can deal only with American problems; and if he touches on other problems, it can only be in their bearings on American problems. It is not only idle, but stupid, to expect Roosevelt to discuss the situation in Crete or Libya, assess the relative strength of the combatants, and announce a decision to send immediate help to the side which has his sympathies. What you have to watch is the development of American opinion on the various questions relating to the war. If you have reason to suppose that there is some difference of opinion between the President and the people, you have to look for signs of its disappearance. In other words, it is not from any external viewpoint that you can judge the speech. If you recognise this truth, then your capacity to estimate the significance of the speech is increased, not reduced, by this initial readiness to look at it from the American point of view.

From this American point of view, the first thing to consider is, how far Roosevelt has been able to take the people with him in his view of the threat of Nazism and the need to help Britain. The second point is, to what length is he prepared to go in the matter of aid to Britain? Thirdly what relations has his plan of action to the course of the war? People generally reverse this order, though this order is important to a correct appraisement of the President's speech. In regard to the first question, the President himself admits, in the words he addressed to Canada, that there are some among the people of America who differ from his view of the threat. The open reference to this small minority is the best testimony one can have of the support of public opinion which the President has been able to gain for himself. There is no



longer a trace of that difference of opinion which the Government of the country would feel called upon to refer to before taking any momentous or decisive step. It is a question still, what the Government is prepared to do. And here, let no one get away from the fact that if individuals find it difficult to be altruistic, nations will find it impossible. Aid to Britain must rest, not on the shifty sands of altruism, but on the solid ground of genuine American interest. Roosevelt has been careful to rest the whole of his argument on the latter. He does not appeal to any empty sentiment, not even love of freedom, though it figures a great deal in the end of his speech. Do you want to protect your hearth and home, asks Roosevelt of the average American, sitting, so to say, by his fireside and engaging him in a friendly chat. Then, he answers, protect the States from aggression, not the mere possibility of it, but the actuality of it, as you can see it across the Atlantic, drunk with power, stretching its arms over the broad ocean and seeking either to leap over it or swim across it. If you want to protect the United States, you must defend the Americas, so runs the Presidential argument, unless you prevent the seas from passing under the control of the arch-aggressor hungering for world domination.

That is how Roosevelt comes to the question of aid to Britain. "It must be done; it will be done." The objective stated, the means are clear. The objective may be stepped forward to war, if war alone can prevent German control of the seas. Roosevelt may not have said anything about convoys. But he is committed to far more than convoy or any other specific measure. The aim of American policy once stated so clearly, it is meaningless to ask about details.

Will this do? Will the actuality of American effort be equal to what it will be called upon to accomplish? Why does America hover on the brink of war, when to take the plunge would simplify matters? These and other questions reveal not understanding, but only impatience. American policy proceeds apace. Even now, no orders have been issued under the proclamation. The Neutrality Act is not to be repealed. But the details cannot alter the shape which the outlines give to the picture. We must be content to leave it at that.

There is one omission in the speech of Mr. Roosevelt which is more important than all the explicit statements it contains. Why no mention of the Pacific or of Japan? The question has been asked and answered. Mr. Roosevelt knows more than he unfolds. Perhaps, he has reason to believe that Japan is not as much with the Axis as she formerly was. And if she is, there are innumerable sentences in his speech about the Axis powers; and Japan must needs wear the cap if it fits her. But if the guess is true about the Japanese attitude to the Axis, then one of the vital points of the original Nazi plan has gone awry.

Simla, May 28.

A detailed note has now been issued by the Government of India explaining the work of the Board of Scientific and Industrial Research. It reveals that the research work done by the Board has been of considerable assistance to the military authorities in meeting some of their urgent wants. Of special importance is the anti-gas cloth prepared from purely indigenous raw materials which has successfully passed all tests required by the army. Four firms operating in India have been entrusted with the production of the varnish for preparing anti-gas cloth according to the approved formula. It is hoped that this will not only solve the problem of manufacturing anti-gas cloth for the army but also develop on better and more economic lines the oilcloth and bookbinders cloth industries in India. As a result of the successful research conducted by the Board two compositions for making identity discs have also been evolved which have satisfied military requirements. Its value consists in the fact that the composition is made of easily available indigenous materials and is considerably cheaper. Another important industry which is expected to develop on the basis of the Board's researches is the substitute for glass called "windolite" which has been evolved. Large quantities of this are required both by the Supply Department and the army authorities.

Of the greatest importance is the work of the Sulphur Committee whose report shows that at least 30,000 tons of sulphur rock are available from surface collections in Baluchistan and that with further excavations much more can be produced. A new process has also been discovered to obtain sulphur from iron pyrites at a reasonable price. As besides discoveries of sulphur rock in large quantities in Baluchistan several new deposits of iron pyrites have been discovered. It is now officially claimed that so far as sulphur requirements are concerned adequate quantities of sulphur can be produced in India. Previous to the war India's sulphur requirements were about 10,000 tons per annum. At present there is a demand for 30,000 tons, but India can easily raise 1,00,000 tons or more if required. As only a few months ago it was stated by the Director-General of the Supply Department, Brigadier Wood, that the greatest problem which faced them was the production of indigenous sulphur, these disclosures of the Sulphur Committee may be regarded as very heartening not only for war purposes but also for enabling Indian industries to get adequate supplies of sulphuric acid. It is said that one Indian firm is already successfully manufacturing sulphuric acid by burning iron pyrites. Experiments are also going on for the utilisation of waste sulphur dioxide and sulphuretted hydrogen.

It is understood that at the last meeting of the Board over fifty schemes of research were considered. Twelve have been recommended while the remaining have either been deferred for future consideration pending the receipt of further details or have been rejected on the ground that research in that particular line has already been done. An exhibition of the varied products which the Board's researches have helped to prepare was arranged by Sir S. Bhatnagar last week for the benefit of the members who had come. It revealed among other things the great possibilities of the plastics industry in this country. Electrical insulation, brake lining in motor cars, interior decorative panelling, suit cases, trunks, trays, cabinets, silent machine gears, and even a special material made of jute waste as a substitute for corrugated iron or cement sheets for roofing represented a few of the laminated products prepared from indigenous materials. It is said that a composition as hard as steel and capable of resistance to water, air and sun has been prepared which can be put to many different uses.

In connection with drug production it appears to be the intention of the Commerce Member to utilise the services of Col. Chopra as soon as he is free from his present official duties in Calcutta. In addition to what has been done by the office of the Director General of the I.M.S. where special officers are now working to help production, it is stated that as a result of the research work of the Board several new drugs and chemicals have been put in the market—for example vitamin products, formaldehyde, casein plastics, thyroxin, potassium salts etc. Further work is expected to be done as soon as Col. Chopra is able to accept the chairmanship of the Drug committee and start intensive development work. As imports can no longer be relied on for the supply of the necessary medical stores, both for the army and the civil population, the task of developing Indian resources in order to find suitable substitutes for imported drugs can no longer be neglected. As Col. Chopra has already done immense pioneer work, the Government of India have acted wisely in inviting him to take charge of the committee. Indian varieties are so plentiful in this country that there can be no difficulty in dispensing with the need for imports altogether so far as drugs are concerned. Even in the matter of dressings, rubber goods for hospital use, surgical instruments and other medical requirements, official circles in Simla state that considerable progress has been made.

For the first time after several months the earnings of State-owned Railways show a fall. The income during the first ten days of May was Rs. 14 lakhs less than that of a year ago. Practically all Railways with the exception of the G. I. P. and the S. I. have had decreased earnings. The fall has been much more in goods earnings than in coaching. This fall is probably only accidental for taking the whole period, 1st April to 10th May, the increase is more than half a crore as compared with last year. The Finance Department's statement of customs and excise receipts in April is also encouraging. Collections from import duties show a fall of only Rs. 18 lakhs as compared with the pre-war month of April, 1939. This is indeed very satisfactory as the Finance Member has budgetted for an income of only Rs. 35 crores under import duties for this year as against Rs. 45½ crores collected in 1939-40. Export duties have shown increased collections during April this year—Rs. 5 lakhs as compared with the prewar month. The position as regards excise revenue is that in April alone the collections have come up to Rs. 84 lakhs as against only Rs. 49 lakhs in April, 1939. This is largely due to the big increase in the sugar excise collections. So far as the Excess Profits Tax is concerned it is stated that the collections in 1940-41 amounted to Rs. 1½ crores—just half of what was budgetted.

The report of the Indian Trade Commissioner in the United States which is shortly expected to be published is said to contain very interesting material very interesting material. There is a growing demand for Indian commodities in America, for with the rapid increase in factory production, the demand for larger exports from India is also rising proportionately. It is stated that India accounted for over 19 millions of the 21 million pounds of shortstaple cotton imported by the United States during this period. It was more than four times the amount imported from India during the corresponding period of 1939. And also the value of the cotton imported from India during the first quarter of 1940 practically equalled the value of cotton imports from India during the entire year of 1939. The explanation given for the increased American demand for Indian cotton is partly the dearth of supplies from China and partly the effect of the new Defence programme. The prices fetched by the Indian raw cotton at the time are described as comparatively high. It appears, however, that efforts are now being made in the United States to duplicate the shortstaple cotton usually imported from China and India. In India, the trade figures for April show that there is a big fall in the imports of raw cotton. The import duty on raw cotton fetched only Rs. 8¼ lakhs this year as against over Rs. 16½ crores in April last year.

COSSIPUR . . . CALCUTTA

(From Our Correspondent)

Bombay, May 28.

THE riots have come to occupy pride of place in all local conversation for a week. Naturally the restrictions on the publication of news in the local press must answer for idle talk. The restrictions stimulate talk and the gravity of the situation gains by the colour of conversation. The closure of all markets here for two days in succession proves that the situation is essentially unchanged after the appeals made to Government to adopt special measures. The tension is obviously responsible for the decline in prices and the Stock Exchange, for instance, has failed to respond to the good news of the sinking of the Bismarck. Though business in government securities continued on Tuesday, with the prices tending to harden slightly, there is no disposition to make much of war news as a stimulus to market activity. It is hardly likely that speculators will develop courage or confidence when local warfare, as distinct from the European war, has taken a bad turn. Karachi does not afford much support for the commodity markets still perplexed by the Punjab trade strike. Citizens are hoping much from the conciliation committee revived and sponsored by the new Mayor Dr. Collaco. Instead of protection committees wedded to safeguards unity committees devoted to compromise are needed, as the intelligent citizen is getting communally-minded owing to intense communal activity. The conciliation committee dates from 1931 and will not disdain the essential job of relieving the riot victims. The Government may not have the time or the means to consider the hardships of individuals, and the most disturbing fact today is that well-to-do shopkeepers rendered poor by the riots have nobody to turn to. It may go against their grain to ask for charity and Government won't bother about their losses when it is set merely on mastering the foes of law and order. There has been a demand for a new non-official corps of watchers to aid and encourage police work but the police would probably say that the Civic Guard is enough for the present. There is a general fear that food supplies may diminish owing to the riots because shopkeepers cannot get in their usual supplies from outside and this may accentuate the rice shortage against which there were so many complaints in the past two months. It is said that in Ahmedabad there has been failure of certain supplies owing to the dislocation of trade arising from the riots. The post office there may be working well but the vegetable market is more vital and if that is not open, more citizens suffer than is imagined while the greengrocer too is not likely to be compensated but may have to add his contribution to some forthcoming special tax.

Bombay papers have taken kindly to the controversy over the reputed shortcomings of war publicity. The good work of the local propaganda committee which has issued two useful books and devised ways and means of interesting people and letting them touch their pockets is not forgotten, but it is All-India Radio which is now under fire. The critics here seize on the fact that native talent apart from that required for translation has so far found little encouragement. And Indian language broadcasts are condemned as smug and stale. The war talks are referred to by the opponents of the critics as showing that much is being done to interest and educate the listener. There lingers, however, the suspicion that many talk kindly to foreign station and dont trouble to follow the special news digests and surveys. But pure propaganda is beyond any agency and India has not yet got a totalitarian government anxious to mould all opinion to a desired shape and destined end. It is not admitted by all that Mr. Taleyarkhan's attack on the poverty and defects of A. I. R. propaganda work finds complete support; for it is not as though the Press is moribund and not all care to go in for heavy propaganda turned on tap from their wireless sets. There is not much doubt that entertainment is the main thing wanted and if the quality is all right no listener would worry about the lack of war news or propaganda.

A most important development in the cotton trade has been the promulgation of a new rule empowering the Board of the E.I.C.A. to fix and register the rates for hedge contracts and also spot rates. The control procedure is not unfamiliar, and it is generally known that the E.I.C.A. has been forced more than once to intervene for the good of the cotton grower. But the power to fix rates means that an arbitrary minimum may be chosen and the trade cannot expect the forces of demand and supply to work. Many brokers fear that official minima represent a dangerous innovation and the fixation of a higher difference than usual in the case of rejected tenders, giving the offerer a profit instead of a loss has not been popular. And the control instead of raising local prices has depressed them because more cotton was offered and taken back. The E.I.C.A. in its attempt to cure the tight spot situation has adopted price-restraining tactics of an unusual type. The reduction of the margin payable by those who don't accept cotton offered has reduced the volume of cotton tendered, and in the long run, the effects of the Board's decision must be welcome to the trade which has witnessed a sharp rise followed by an equally sharp setback. But there is the next contract to consider. Many have bought cotton and the staple of what is offered may not be up to standard, Rejection means payment to the tenderer, and this will not be relished by the trade which will not care to see the bulls who came to the rescue of the market in April punished for their enterprise and helpful spirit. It might be urged that any attempt to corner Broach cotton must be defeated, but the present situation is unusual, and it is not a small ring working for a corner but a large section of the trade that took prices up and hold contracts. A difficult situation has arisen as the bulls are likely to suffer and they may even urge that they want all the Broach cotton that can be had at the stipulated price.

A recent arrival in India, Sir B. Rama Rau has lost no time in telling his countrymen how things stand in South Africa. His views were put before the public last week and his main point was that race prejudice was not acute and Indians could hope for some improvement in their position. Field Marshal Smut's Government was not unsympathetic according to Sir Rama Rau. Reference was made to the fact Indians were only lately allowed to occupy and own property on the Rand and Sir Rama Rau said that a new agreement would be sought as regards the old claim for segregation of Asiatics. The postponement of anti-Asiatic legislation on request implied a willingness to accept a solution by agreement. The commission of inquiry into Indian penetration had been replaced by another committee anxious to promote agreement. He confessed that the lot of Indians in Natal showed no change for the better. Reference to the fact that Indians were allowed to join the units raised for the war were naturally many, but the interview has inspired the feeling that the next High Commissioner has an easier task than Sir Rama Rau.

Sir Abdul Halim Ghaznavi's statement on what is being done in India under the auspices of the Board of Industrial and Scientific research has appeared in part in most Bombay papers. The application of results so far obtained to actual industrial production has followed the recent meeting of the Board and more schemes have been put up for the consideration of industrialists. The transfer of patents under certain conditions had been decided upon, and mention is made in his statement of dry cell manufacture, laminated paper fibre board, luminous pigments and paints, stove enamel out of certain seeds, the manufacture of glass substitutes and resin impregnation of wood among the schemes assigned for commercial production as the investigations are over. Another report mentions that carbon electrodes and vegetable dyes are among the articles on which experiments in standardisation would be carried out. A pilot plant for butyl alcohol and acetone is to be set up at Cawnpore as a result of the recent meeting. Synthetic dyestuffs and problems relating thereto will be examined by four different scientists and their colleagues working at different centres on different problems.

A Resume of Commodity Markets

Calcutta, May 30.

It has been a cheerful week in the several commodity markets, thanks to the publication of encouraging crop forecasts and the heavy speculative buying in the jute futures market. The raw jute market has again led other markets. Substantial mill buying on reports of further damage to the standing crop in the jute districts and the disinclination of dealers to sell new crop have resulted in a rise in the quotations. After the rapid advance in recent weeks, the undertone in the market is very steady and the quotation at the time of writing is only slightly lower on account of profit-taking.

It was remarked even last week that the speculative fervour had spent itself out in the hessian market and if there was any rise in prices early this week, it was only due to the strength of the raw jute market. With mills not quite inclined to sell freely for the forward positions, business in ready positions has been restricted. Outside enquiry has been on a smaller scale. The strength of the heavy goods section is due to the higher prices for the raw material.

There are still presistent rumours regarding the possibility of the increase in the number of mill working hours from the beginning of July. And the recent heavy buying by mills gives room for such a belief. It is, however, pointed out that the recent buying is mainly induced by the unwillingness of sellers to deal in new crop and the possibility of higher prices for the next season. In view of the possibility of complications in the Far Eastern situation and the need for strengthening defences to afford protection against air raids, it is not altogether improbable that mills will choose to decide on the increase in working hourse from the beginning of July.

Raw Cotton

After being closed for nearly four days in the week, the Bombay raw cotton market has opened in a rather buoyant manner and a substantial rise in prices has been recorded on heavy bear covering and buying. It is feared that there will be a definite shortage of old crop Broach cotton and on this account, members of the East India Cotton Association have been warned to reduce their commitments to the minimum possible. As mills also sold their stocks of old cotton recently in order to take advantage of the high level of prices, there is need for some covering by new crop purchases. The prospects for new crop cotton should, therefore, be said to have considerably improved though it is too early to say what will be the position at this time next year. It can be said, however, that the discount for April/May 1942 over July/August will tend to diminish as time progresses.

As regards short staple varieties, there has been a good rise in recent weeks. But the gains have not been fully held owing to the fears regarding the exports to Japan and the standstill in the piecegoods trade with that country. The only encouraging factor in this regard is the large increase in exports of these cottons to the United States for mixing purposes.

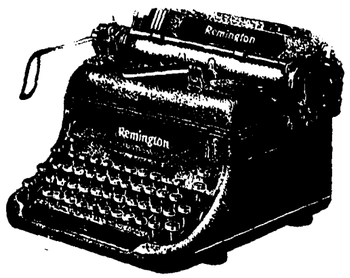
Wheat

The publication of the All-India Fourth Wheat Forecast for 1940-41 revealing an increase in the area by 2 per cent, but a decline in the estimated yield by six per cent, had an encouraging effect on the market early in the week. It was generally expected that the new crop would be about 10.5 million tons. The continuance of the deadlock in the situation in the Punjab also was a contributory factor. During the last three days, however, the resumption of trading in the principal centres in the Punjab as a result of agreement between the Government and the traders and selling by Punjab commission houses have led to a decline in values. The tone towards the close is slightly better only in sympathy with the raw cotton market.

According to the forecast, the area under wheat is 34,499,000 acres as against 33,673,000 acres (revised) in the corresponding forecast last year, and the yield 9,969,000 tons against 10,641,000 tons (revised) in the corresponding forecast last year. The condition of the crop is reported to be on the whole good.

Linseed

The Final Winter Oilseeds Forecast has not come as a surprise to the market. A reduction in the yield in the linseed crop was anticipated by the market. There is a decline in the area by 4 per cent and in the yield by 8 per cent, the area under the crop being 3,583,000 acres against 3,715,000 acres in the corresponding forecast last year and the yield 4,33,000 tons against 466,000 tons. The condition of the crop is fairly good on the whole. At the time the Forecast was published, there was no appreciable reaction in the market but during the last three days, a definitely better tendency is noticeable. The quotation for September is at the highest level for the week at Rs. 5-9-3.



Tea

The quota for season 1941-42 has been fixed at 95 per cent of standard export. The figure for last season was 90 per cent. The increase in the quota for the regulating countries indicates the confidence of the United Kingdom to be able to take full delivery of her allotment, as a consequence of the easier freight situation that is expected to develop. The higher quota will enable tea estates to reduce their costs of production which have shown a tendency to rise as a result of war.

Rubber

The decision to maintain the quota at 100 per cent for the third quarter of the

(From Our Jute Correspondent)

Calcutta, 29th May.

NOTHING has yet transpired as to the reaction of the I. J. M. A. Committee to the letter sent to them on behalf of the Bengal Government by the Special Officer (Jute) with regard to reconsideration of the question of whether official minimum prices are to be continued after 30th June, and if so, at what level, will be dealt with speedily so that both Buyers and Sellers may know where they stand. The recent recrudescence of interest amongst buyers in old crop jute may be to some extent due to the vagueness of the new crop situation and if this is so, it is all to the good, as holders of old crop stocks have been able to clear their hands considerably, even of low quality grades like "Z" Bottoms, which for so long were a drug on the market. There is certainly still a very large quantity of the old crop to be marketed—some districts reporting four annas still to come in, and it is quite on the cards that official quarters may prefer to maintain a Sphinx-like silence as to their views on the future course of prices in the hope that more of the balance of old crop may be taken up while the new crop position is left uncertain. As a measure of self-defence sellers are keeping their new crop quotations at a pretty safe level, on the basis of a premium of a rupee per maund over old, but even at that there are a few Bull speculators who are prepared to nibble. But the general tendency is to await events.

Despite very much more reassuring reports on new crop prospects from the districts recently, the Bull movement in Jute has not been retarded; it has rather been intensified. Fatka market has resumed a much more active aspect and Rs. 50 has been actually touched though not maintained. Strong Bazar rumours of further war requirements being on the point of issue to the Mills helped to sustain the Bullish atmosphere though actually no such orders have yet materialised. Another bullish factor has been the more generous allotment of freight space for jute. This curiously enough seems to have caught shippers and balers bending. Instead of their being paralysed with heavy holdings awaiting shipment, the larger freight allotment caused a rush for cover, particularly in Daisee and Tossa. The presumption is that, tired of holding stocks for which they could not get shipping space, holders eased their hands, by selling locally to mills, and now that the freight is available they have to replace. There can be no other explanation of the fact that, in the local bazar, while white jute has recently advanced only by a few annas per maund, Daisee and Tossa have gone up nearly two rupees.

It was announced this week that the member mils of the Indian Jute Mill Association with the addition of Gagalbhai Mill, have made a contribution to the East India Fund of Rs. 3,20,387. Out of this very handsome gift, the odd Rs. 20,000 is earmarked for the benefit of Air-raid victims, while the Rs. 3 lakhs is to be devoted to the purchase of four fighter planes. The Jute Mills are to be congratulated on this gesture and it is to be remembered that this is by no means their only voluntary contribution towards the war effort. All war requirements of jute fabrics are supplied at controlled prices based on levels far below market rates. In addition, Mill workshops are turning out no mean quantity of munitions on a "no profit" basis. Nor should their contributions to the Excess Profits Tax be forgotten. Shareholders do not need reminding of this!

The greater quantity of shipping space available for Export Jute has induced more activity in this section of the market and some remarkable price advances have been recorded. Dundee Daisee assortment for shipment has jumped from Rs. 41 in the end of last week to Rs. 46 while a sale of guaranteed May shipment was recorded at Rs. 49. Dundee Tossa 2/3 sold at Rs. 58 and at the colse there are further buyers at Rs. 60 with sellers holding for Rs. 61. Dundee Tossa 4s. sold at Rs. 45. One reason for these smart rises has been suggested above. Mills have also shown little reluctance to follow the advance and have paid from Rs. 40 to Rs. 45 for Dundee Daisee 2/3, from Rs. 37 to Rs. 42 for Out-port Tossa 2/3 and Rs. 35 for 4s. Fatka has come into its own again to some extent and has registered a somewhat erratic advance from Rs. 43-6 till Rs. 50 was actually touched. This level has not been maintained, however, and after wavering between Rs. 48 and Rs. 49 closes around Rs. 48.

Loose Jute has also come in for a fair amount of attention. The minimum rate of Rs. 6-8 for Indian Jat Bottoms soon disappeared and Rs. 6-12 established with Rs. 7 paid for picked marks. Supervised Bottoms also fetched Rs. 7, while European Bottoms having sold earlier at Rs. 6-12 and Rs. 7 are no longer on offer. Indian District, after having sold at Rs. 6 is now held for Rs. 6-4. Cross Bottoms have been in fair demand and have sold from Rs. 4 up to Rs. 5 according to quality. Balers are reported to have paid Rs. 9-12 and Rs. 8 for Tossa Middles and Bottoms. The only New Crop reported was inter-speculator business in 5 European marks at Rs. 10 and Rs. 8, Middles and Bottoms, and even higher rates are offered by Bullish speculators at the close, with sellers reserved.

Reports from the mofussil have been satisfactory, weeding proceeding under good weather conditions, and the crop doing well, though a small amount of damage is confirmed.

There is another week of active trading to report in the Fabrics a good deal of the business has been on behalf of the Bazar. There has been enough support from overseas markets to impart a core of soundness to the position. Particularly welcome has been a recrudescence of interest in Heavy Good, principally in Liverpools, Cornsacks and "B" Twills from outside markets, and speculators were not slow to help the good work along. Mills have been able to put substantial orders on their books in all positions forwards as far as June next year.

The near hessian position is still tight and subject to fairly rapid fluctuations according to immediate demand. Nine porters, starting at Rs. 20-10 soon touched Rs. 22 and even Rs. 22-8, with intervening lapses to Rs. 21-8, which is again the closing level. Elevens from Rs. 22-12 touched Rs. 25 before pausing and close at Rs. 24-4. Among the sales recorded are: Nine porters at Rs. 20 to Rs. 21-4 June, at Rs. 17-8 and Rs. 18 July/September, at Rs. 15-4 to Rs. 16-8 October/December, at Rs. 16 October/March, at Rs. 14-8 to Rs. 15 January/March, at Rs. 14-8 January/June, and at Rs. 14 April/June. Eleven porters at Rs. 24 May, at Rs. 21-6 to Rs. 23 July/September, at Rs. 20 October, at Rs. 19 to Rs. 19-14 October/December, at Rs. 18 to Rs. 18-8 October/March, at Rs. 17-8 January/June and at Rs. 17 April/June. In Heavy Goods "B" Twills sold at Rs. 34-4 to Rs. 35-12 near, at Rs. 35 May/June and June, at Rs. 34 to Rs. 35 July/September, at Rs. 34 to Rs. 35 October/December, at Rs. 33-12 January/March and at Rs. 34 January/June. Cornsacks sales include Rs. 35 August/September, Rs. 34 to Rs. 35-8 October/December and Rs. 33-8 to Rs. 34 January/March. Liverpool Twills sold at from Rs. 38-4 to Rs. 39-12 ready, at Rs. 38-4 June, at Rs. 38 October/December and January/March and at Rs. 37-8 October/March. "A" Twills were reported at Rs. 39-8 January/March and Cuban Sugars at Rs. 41-8 to Rs. 42 October/December, and at Rs. 42 December.

Closing prices on a market where the undertone seems very sound are:—

	May.	June.	July-Sept.	Oct.-Dec.
	Rs. A.	Rs. A.	Rs. A.	Rs. A.
9 Porters ...	21 8	20 8	18 2	16 4

Heavy Cees ...	33 12	33 12	33 12	33 12

JUTE

Calcutta, May 29.

There has been a further sharp improvement in prices in the raw jute market during the last few days. Continued mill buying and reports regarding adverse weather conditions have caused a substantial rise in values. The sudden emergence of buying by mills and the unwillingness of sellers to do business in new crop have resulted in the abrupt rise in values. At the time the buying started jute prices had been unduly depressed and the rise in prices has therefore been cumulative.

The tone during the last two days has been rather irregular but the undertone continues quite steady.

There are various rumours in the bazar regarding the possibility of an increase in war orders and mills being obliged to increase the number of working hours.

In the loose jute section firm conditions have prevailed with sellers rather reserved. Balers are reported to have bought in a large quantity. European Tossa Middles and Bottoms were done at Rs. 9-12 and Rs. 8 per maund respectively. Mills are reported to have paid good Indian Jat Bottoms and Cross Bottoms at Rs. 7 and Rs. 5 respectively. Covering business was reported in new crop European Middles and Bottoms at Rs. 10 and Rs. 8 per maund respectively.

In the pucca bales section some small business was reported for export. Firmer conditions have been noticeable in sympathy with the futures market. Dundee Daisee 2/3 for export were done at Rs. 46 per bale. Mills have done business in the same grade at Rs. 45 per bale. Earlier in the week up to Rs. 44 was paid for Dundee assortment.

The futures market has been very active during the last four days. A reactionary tendency was noticeable on Monday but renewed by mills and the unwillingness of sellers caused a rise in values.

A quotation as high as Rs. 49-14 has been recorded. There has been since a reaction to 48-8 to-day but the undertone continues steady.

JUTE MANUFACTURES

The Jute Manufactures market has continued active but the higher level of prices now quoting is due mainly to the improvement in the quotations for jute. Good business is reported to have been done by bazar operators up to positions beyond March, 1942. There is good shipment business. The quotation for forward position has been firmly held. 9 porters ready are now quoting Rs. 24-10 after being higher at Rs. 22-10, June are now quoting Rs. 20-12, after being higher at Rs. 21-12, July-September Rs. 18-8, after being at Rs. 19 and October-December Rs. 16-6 against Rs. 16-12. 11 porters ready are now quoting Rs. 24-9, June Rs. 24-7, July-September Rs. 22-4 and October-December Rs. 19-12.

In the Heavy Goods section quotations have been marked higher in sympathy with the strength of the Jute market. There is not much business passing. 'B' Twills sold on the basis of Rs. 35-8, Liverpool Twills Rs. 39-14, 'A' Twills Rs. 42-4, and Cornsacks Rs. 36-4. There are various rumours in the market regarding the possibility of fresh orders but so far no announcements have been made.

RAW COTTON

Calcutta, May 29.

The sharp advance in prices on American cotton exchanges was responsible for heavy speculative buying early in the week in the Bombay raw cotton market but business has not been possible for the major portion of the week as markets have remained closed on account of the communal distrubances. After being closed for three days this week, a definitely firmer tendency has been noticeable in the market on re-opening this morning. In view of the warning uttered to operators by the East India Cotton Association to reduce their commitments for July-August with the fears regarding the scarcity of old crop and in view of the selling by mills of old crop cotton to take advantage of the higher level of prices and the need for replacing stocks, the situation is full of possibilities. Broach July-August are now quoting Rs. 263-12, April-May 1942 Rs. 234, Oomra July Rs. 179, December-January Rs. 186, Bengal Rs. 135 and December-January 142. The quotations for Bengals and Oomras are appreciably lower in the afternoon than the opening prices.

On reports that loan cotton would be freezed, there was a jump in prices in the American cotton exchanges early this week. In New York, the quotation for July was as high as 13.27 cents. An irregular tendency has been noticeable since. July are now quoting 13.15 cents and October 13.32 cents against 13.05 cents and 13.12 cents respectively last week. It will be noticed that there is a further rise in the premium for forward positions.

PIECEGOODS

Calcutta, May 29.

The piecegoods market has continued active. With the disturbances in Bombay and Ahmedabad production has been considerably affected. Mills have not been very keen on doing business owing to the large orders on hand and the decline in the rate of production. There is considerable disparity between bazar and replacement values. Dealers are now slowly realising that there will not be any appreciable decline in manufactures' quotations especially with the present level of prices for the raw material. There have been no forward contracts on a large scale. A greater amount of business has been reported in ready goods.

In the Japanese goods section forward dealings are more scarce than ever and business has been confined mainly to ready lots.

The yarn market has continued firm. South Indian mills have done a large amount of business and are rather reserved at the moment.

GOLD

Calcutta, May 29.

The Bombay gold market has remained during the major portion of the period under review. Early in the week a rather quiet tendency was noticeable. Business was done mostly on account of arbitrageurs. On Friday gold ready were Rs. 42-2-6, first settlement Rs. 42-2-6 and second settlement Rs. 42-3-6.

The London quotation has remained unchanged at 168s.

SILVER

Calcutta, May 29.

The Bombay silver market also has remained closed during the major portion of the week on account of communal disturbances. On Friday Indian Mint silver ready closed at Rs. 62-2, first settlement at Rs. 62-2, and second settlement at Rs. 62-2.

Rather quiet conditions have been noticeable on the London market. There was some Indian and speculative selling though it was absorbed. The quotation for both spot and forward is lower at 23⅜d.

WHEAT

Calcutta, May 29.

Early in the week a rather firm tendency was noticeable with the continued deadlock in the Punjab situation and the publication of the bullish All-India Fourth Wheat Forecast 1940-41. Market expectations of the crop were in the neighbourhood of 10,800,000 tons. In spite of the increase in the area under the crop there is a decline of six percent in the estimated yield over the figures for the corresponding forecast last year. The area under the crop is 34,499,000 acres against 33,673,000 and the yield 9,969,000 tons against 10,641,000 tons. The condition of the crop is, on the whole, good. The solution to the deadlock in the marketing situation led to heavy Punjab selling and the tone at the close is easier.

Choice white ready are now quoting Rs. 29-7, after being higher at Rs. 30-1-6. July are quoting Rs. 29 and September Rs. 29-8-6.

Similar conditions have been noticeable in the local market. There is greater enquiry for flour and flour products; Cawnpore ready are quoting Rs. 4-1, May Rs. 4-4, and September Rs. 4-6-3. Rs. 4-6-3.

MADRAS GROUNDNUTS

The market improved rapidly during the week, and shippers have been very active at the close. Shippers' buying limits opened around Rs 23-8 and Rs. 24-4 for Machined (Per candy of 531 lbs. ex-coast godowns), improved to Rs. 24 and Rs. 24-8 on Thursday, to Rs. 24-4 and Rs. 24-10 on Friday and to Rs. 24-8 and Rs. 25 on Saturday, and closed firm around Rs. 25-0. It is understood that large quantities have changed hands in the Ceded districts area. This brisk demand is due to regular and larger orders from the Ministry of Food for Indian groundnuts. During the past week, the purchase of the Food Ministry amounted to about 6000 tons. If only regular weekly orders to the tune of this figure were forthcoming, a good portion of the crop in the North would be marketed ere long. It is also learnt that shippers are buying Groundnut oil for export in the Northern centres and that the Oil expellers are working to capacity and consuming fairly large quantities of kernels. Local buyers were apathetic during the week owing to the scarcity of freight space to the Straits. Local buyers' limits have therefore, remained nominal around Rs. 22 for Machined, per candy of 531 lbs. ex-Madras harbour godowns.

NORTH WESTERN RAILWAY

Applications are invited up to 1-7-41 from candidates for one Nurse in "B" Division in Class II Grade I (100-10/2-120) without free quarters. In addition a waiting list of candidates for further vacancies will also be maintained for one year only after which the names will be removed without notice. Candidates must be registered under the Punjab Nurses Registration Act 1932 as "B" Division Nurse". Full details will be furnished if stamped and addressed envelope is submitted to General Manager, N. W. Railway, Lahore, superscribed in left hand top corner "Particulars for Nurse."

General Manager.

NORTH-WESTERN RAILWAY

Tender No. 210-S/22/62. Code Word "AMOUNT" Teders are invited on a rupee basis, for purchase by the North-Western Railway of carts conservancy, iron, night soil. Tenders must reach office of General Manager not later than 14.00 hours on 14th July, 1941, and will be opened in office of Controller of Stores, Lahore, at 11 a.m. on the following working day. Tender forms and other relative documents can be seen at and obtained from office of Controller of Stores, on and from 2nd June, 1941. The sale price of the tender is local Re. 1 and Muffusil Re. 1-8 without drawings and with one set of drawings local Rs. 3 and Muffusil Rs. 3-8.

Groundnut oil advanced during the week and closed firm. Opening around Rs. 47 and Rs. 49 for "Chekku" and "Expeller" qualities respectively, prices of Groundnut oil advanced to Rs. 49-8 and Rs. 50 in the case of "Expeller" quality and Rs. 48 for "Chekku" quality on Saturday, and closed at Rs. 48 for "Chekku" and Rs. 50-8 for "Expeller quality, for ready lots, loose, per candy of 500 lbs. ex-sellers' Madras godowns. It is reported that there is good demand for Groundnut oil from New York.

MADRAS HIDES AND SKINS

It is now definitely known that there will be a boat from Madras during the week taking about 5,400 bales in all, including Skins. Another boat is likely to follow and will, it is reported, carry about 1,500 bales. During the week, there were some enquiries for Tanned Buffalo from America. Light weight Buffs 4/4½ lbs. and 9/10 lbs. were in request at 350 to 360 C.I.F. and 22½ C.I.F. respectively. The increased enquiries indicate there will be further advance in prices Tanned Cow Lights 5/5½ lbs. and 4/4½ lbs. were enquired for, but since the prices were below London values, do not much business was possible. There seems to be some enquiry from the Indian government for Hides, although the present orders are on a small scale. It is nevertheless hoped that, as a sequel to the talks of Brigadier Wood with the leather trade units here, there is a possibility of larger and more suubstantial orders materialising. It is learnt that the Government of India are shortly calling a conference of the various interests in the Hides trade to discuss the question of shipping space, and that the local Skin and Hide association has been asked to send three representatives to Simla in that connection. The Tanned Skins market has been steady. The improved outlook is, in part, due to the allocation of shipping space in each vessel for Tanned Goat and sheep cargoes. At the meeting convened by the Representative of the Ministry of Supply, Madras, regarding the allotment of freight space for Priority hides, it was resolved that the Freight conference list be accepted for quotas. As for the basis of conversion of bales of hides and skins into tons, it was agreed that the maximum weight of each bale shall be 600 lbs. for Cow and Buff hides and Cow Buff calf skins and that for Goat and Sheep 550 lbs. The bales of larger weight than the above will be accepted for shipments up to three months or for a maximum of 3,000 bales of Goat and Sheepskins from the 1st June, whichever limit is reached sooner. As regards liquidation of old contracts of Priority hides, shipment of these on local contracts which big shippers do not undertake to clear together with the bales on direct contracts will then be arranged under the orders of the Representative of the Ministry of Supply.

(*Continued from page* 1004)

year, though not a surprise, has had an adverse effect on the market. There has been an appreciable drop in recent weeks. The absence of pressure for immediate buying and the more hopeful view taken in regard to the future of exports, have resulted in a decline in the quotations for both spot and forward to 13 3/8d and 13 1/8d respectively. And if there has been a late rally to 13⅜d and 13¼d buyers, it must be set down to news of strikes in Malaya.

(*Continued from page* 997)

particularly, the rise in premium income as satisfactory. The revenue account of the Fire Department shows that the year's premiums yielded Rs. 3,15,441-0-5. Claims took Rs. 1,09,763-0-4 and commissions and salaries accounted for Rs. 120,748-1-9. A surplus of Rs. 23,224-6-6 is appropriated to the Profit and Loss account and the Fund for Unexpired Risks together with the Additional Reserve stands at Rs. 1,66,948 as on December 31st 1940. Business in the Accident Branch provided premiums totalling Rs. 91,327-10-4. After meeting claims and commissions etc. the sum of Rs. 13,884-0-4 is transferred to the Profit and Loss account and the Fund together with the additional Reserve stands higher at Rs. 56,098 at the end of 1940. In spite of the war marine business showed improvement. Premiums in this branch provided Rs. 1,71,501-14-5; claims took Rs. 52,174-6-9 and commissions amounted to Rs. 28,728-10-9. The total marine fund at the end of the year shows that a substantial addition was made because of the year's surplus of Rs. 80,378-9-0. The transfer to Profit and Loss account of Rs. 18,953-12-11 provides that account with a total of Rs. 55,762-3-9 in addition to investment receipts of Rs. 63,796-2-4. The appropriation of Rs. 70,000 to General Reserve after the provision of Rs. 14,255-12-6 for depreciation of securities together with Rs. 25,000 for taxation leaves the sum of Rs. 14,834-1-6 to the credit of the account. The balance sheet shows total investments of Rs. 18,52,228-3-3 and the book value of these was lower than the market value as on December 31st. The General Reserve of 3.45 lakhs shown therein exceeds the three Branch Funds, and the liability under outstanding claims is as small as Rs. 32,867-4-0. The progress in all directions afforded a favourable background for the review of Sir Badridas Goenka at the annual meeting. Sir Badridas added also his tribute to Messrs. Ralli Bros. the Correspondents in the U. K. of the Hercules Insurance Company, Ltd.

The Excess Profits Tax

By Mr. V. S. Sundaram—Late Accountant General, Madras

This book is largely a supplement to the authors Law of Income Tax, which has run into its fifth Edition. A difficult task, a commentary on an enactment in which the case law is extremely meagre, we must say, has been most skilfully accomplished. The bulk of the cases that arose under the old Excess Profits duty related to questions common to Income tax and Excess Profits Duty, and these cases have already been dealt with at length, in the author's *Law of Income tax.* In this book the author has most sensibly confined himself to a discussion of all questions that can arise under the Excess profits Tax, but have not appeared yet before the Courts. The author, who was for sometime, Commissioner of Income tax, has naturally used his experience, to elucidate not only the provisions of the Excess Profits Act, but also the Rules made under that Act. His discussion of such expressions as Depreciation rates and Accounting period, is most exhaustive and comprehensive. The index adds to the practical qualities of the book.

Stock Markets to-day and to-morrow

DUNCAN BROTHERS TEA GROUP MAKES VERY GOOD SHOWING

THE Calcutta Stock Exchange has moved independently of other markets during the past few days. The Bombay stock market was closed till Friday on account of the communal disturbances. Earlier in the week a definitely firmer tendency was noticeable in Calcutta and a quotation as high as Rs. 30-10 was recorded for Indian Irons. It is significant, however, that the volume of turnover has been definitely on the small side.

Re-opening after nearly a week, the Bombay Stock Exchange was rather steady and quotations are slightly higher, Tata deferreds being Rs. 1,822-8 and ordinaries Rs. 351-8 against Rs. 1,800 and Rs. 348-8 respectively.

The feature of the week is the strength of the giltedged securities section and 3½ per cent Paper is now quoting at the highest level for sometime at Rs. 95-14.

* * *

It was generally believed that with the prosperous conditions in the engineering industry the *Kumardhubi Engineering Company, Limited*, would benefit to a great extent and the financial position of the company would be affected very favourably. There has certainly been an increase, and that substantial, in the earnings for the year ended November, 1940, but the necessity for a higher charge on account of depreciation and a larger provision for taxation have resulted only in a slight decline in the debit balance brought in from the last accounts. Without any appreciable increase in the volume of sales a good increase in earnings has been possible and they would have been probably more but for the delay in production due to non-delivery of steel.

Readers are perhaps aware that I uttered a warning against entertaining any extravagant hopes regarding an early payment of arrears of dividends on the preference shares. The poor level of earnings for the standard period has necessitated a large provision for taxation. It is pointed out that a claim in respect of the Exuess Profits Tax has been made to the authorities concerned.

Prospects for the current year are favourable provided raw materials are made available to the works. The works are now employed mainly upon government contracts on which the margin of profit is not large.

The net profit before providing for taxation for the year is Rs. 4,29,987 against Rs. 2,83,647 for the previous year. The amount set aside to depreciation is Rs. 1,95,656 against Rs. 1,38,735 previously while the provision for taxation, including Excess Profits Tax, is Rs. 1,27,700 against Rs. 46,221. Full reserve has been provided for Excess Profits Tax in the accounts. The debit balance carried forward is lower at Rs. 3,00,444 against Rs. 4,07,166 brought in.

The recurrent rumours regarding the possibility of a capital reconstruction scheme have not so far proved correct. I understand on enquiry that the directors have got in view a capital reconstruction scheme, but that the stage has not come for a consideration of the same.

* * *

One of the few jute companies to report a higher level of earnings for the half-year ended March, 1941 is the *Birla Jute Manufacturing Company, Limited*. A larger margin profit on sales has resulted in the higher net profit, before providing for taxation, for the half-year of Rs. 8,27,231 against Rs. 7,33,513 for the previous half-year. The provision for depreciation is lower at Rs. 1,10,000 against Rs. 1,50,381 while the provision for taxation is considerably higher at Rs. 3,50,000 against Rs. 2,00,000. The ordinary dividend has been maintained at Re. 1-4 per share.

In view of the steady progress of the company in recent years the shares are very attractive at Rs. 27 cum-dividend as affording the very high yield of over 9 per cent tax free.

* * *

The first dividend since February, 1938, is to be paid by the *Reliance Firebrick and Pottery Company, Limited*, out of the earnings for the six months ended February, 1941. Sales during the half-year were satisfactory and the works were fairly fully employed, but difficulty in securing freight adversely affected certain deliveries.

The net profit before providing for taxation and depreciation is Rs. 70,064 against Rs. 39,574 for the previous half-year. The provision for depreciation is Rs. 35,000 (Rs. 33,352) and that for taxation Rs. 10,000 (Rs. 2,500). The sum of Rs. 7,500 (Rs. 2,500) is transferred to Reserve for bad and doubtful debts. The dividend of four annas per share is to be paid leaving a balance of Rs. 10,722 to be carried forward against Rs. 8,158 brought in.

* * *

The results of the Duncan Brothers Group of tea companies for the last year make a uniformly good showing, and in most cases, the dividend distributions have been increased.

Among the balance sheets published during the week is that of the *Patrakola Tea Company, Limited*. The accounts have been made available on this occasion earlier than usual. In spite of the smaller crop outturn the net profit for 1940 is substantially higher at Rs. 12,27,911 against Rs. 10,51,463 for the previous year. After providing for taxation the sum of Rs. 2,25,000 against Rs. 2,27,500 the total distribution for the year is considerably higher at 72½ per cent against 62½ per cent for 1939. The amount carried forward is higher at Rs. 5,19,308 against Rs. 4,36,343 brought in.

The total crop made during the year was 53,634 maunds against 57,450 maunds while the average price realised was considerably higher at 9 annas 7 pies per lb. against 8 annas 5 pies per lb. With the increase in the export quota for 1941 to 95 per cent from 90 per cent, the prospects for the current year should be considered even more favourable.

The shares quoting around Rs. 880 cum-dividend at present afford a return of more than 8.9 per cent tax free.

* * *

Another of the important companies in the group, the *Teliapara Tea Company Limited*, has been able to report a higher level of earnings in spite of the smaller crop made owing to the increase in the average price realised per lb. The net profit, before providing for taxation, for 1940 is Rs. 1,94,541 against Rs. 1,64,535 for 1939. The provision for taxation is Rs. 34,000 against Rs. 35,000 on the previous occasion. The total distribution for the year is higher at 35 per cent. against 30 per cent. previously. The amount carried forward is higher at Rs. 55,415 against Rs. 46,673 brought in.

WATCH DOG.

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, May 30.

After earlier firmness the tone in the several sections on the Calcutta Stock Exchange is rather irregular during the past two days. The earlier strength of the market was mainly due to forced covering in anticipation of President Roosevelt's speech. The rise in Indian Irons especially was pronounced, the quotation being at one time as high as Rs. 80-10. It is reported that this sharp advance in the quotation for Indian Iron was due to heavy buying by a prominent jobber. Despite the fact that the U.S. President's speech has been well received all the world over operators in the local market are inclined to think that the speech has not gone far enough. There was a drop in the quotation to Rs. 29-4 this morning but there has since been a recovery to Rs. 29-9. Steel Corporations have not commanded much attention and the highest quotation recorded this week was only Rs. 18-8. The continued strength of the jute manufactures and jute markets have resulted in a good appreciation in the values for jute shares. Howrah are now quoting Rs. 52-4. The undertone in the several sections is quietly steady.

The feature of the week is the strength of the giltedged securities section. 3½ per cent. Paper is half a point higher at Rs. 95-12 while terminable loans where changed are in sellers' favour. Not much of business has been passing in this section. Among terminable loans, a small lot of 8 per cent. Defence Bonds 1946 was done at Rs. 102. 3½ per cent. 1947-50 were done at Rs. 102-12, 4 per cent. 1960-70 at Rs. 108-10 and 5 per cent. 1945-55 at Rs. 110-15. Among provincial loans, 8 per cent. 1952 issues have been marked higher at Rs. 97-10. Money conditions have continued easy during the week though there has been a further increase in the average discount on treasury bills, the rate being thirteen annas and nine pies per cent. per annum against thirteen annas and two pies last week.

Not many transactions have been recorded in the Bank section. *Imperial Bank* fully paids were done at Rs. 1,558 and contributories at Rs. 388. *Reserve Bank* are now quoting Rs. 102 after being higher at Rs. 102-12.

Among fixed interest securities, no business has been recorded in public bodies debentures and 3½ per cent. *Howrah Bridge* debentures are nominally quoting around Rs. 98. Among industrial debentures, 5½ per cent. *Dalmia Cement* debentures were done at Rs. 103-8, 6 per cent. *Humayan Properties* debentures at Rs. 105-8 and 5½ per cent. *Rohtas Industries* debenturs at Rs. 102-8.

Business in first class preference shares has been restricted on account of the scarcity of offerings. *Clive* six per cent. preferences were done at Rs. 138-8, *Fort Gloster* at Rs. 178, *Empire* at Rs. 158, *Hastings* at Rs. 187-8, *Hooghly* at Rs. 18-13, *Hukumchand* at Rs. 124 and *Soorah* at Rs. 117-8. *Waverley* and *Craig* have been marked higher at Rs. 53-4.

Among others, *Dalmia Cement* preferences were Rs. 112, *Dunlop Rubber* Second Preferences Rs. 117 and *British India Corporatoin* Rs. 176-8. *Indian Standard Wagon* were in good request at Rs. 160 as also *Steel Corporation* at Rs. 120. *Kumardhubi Engineering* preferences were noted at Rs. 122. The balance-sheet for the year ended November, 1940 has been published. It has not been possible to wipe off even the debit balance brought in from the last accounts owing to the heavy incidence of taxation on the company's earnings. *Orient Paper* new preferences were Rs. 103-4 and *British Ceylon Corporation* Rs. 4-4.

The Cotton section has been rather quiet. Not many transactions have been recorded during the week. *Dunbar* were noted at Rs. 200, *New Victoria* at Rs. 2-8 and *Mohini Mills* at Rs. 12.

The Coal section has been extremely uninteresting with *Bengal* at Rs. 850, *Dhemo Main* at Rs. 12-8, *New Beerbhoom* at Rs. 14-8 and *West Jamuria* at Rs. 28. *Central Kurkend* were done earlier in the week at Rs. 18, *Equitable* at Rs. 84 and *Bokaro* and *Ramgur* at Rs. 14-2.

As pointed out above, jute shares have been firm with the improvement in prices both in the jute and jute manufactures market. *Anglo-India* are now quoting Rs. 319 against Rs. 309 at the time of last writing, *Howrah* Rs. 52-4 against Rs. 51-4, *Bally* Rs. 219 against Rs. 215-8, *Kamarhatty* Rs. 478 against Rs. 468 and *Nuddea* Rs. 56 against Rs. 55. *National* were done at Rs. 21-12, *India* at Rs. 315, *Lothian* at Rs. 242, *Orient* at Rs. 183 and *Waverley* at Rs. 2-12.

The Engineering section was inclined to be active in the first three days of the week and the quotation for Indian Irons was marked as high as Rs. 80-10. There has since been a decline to Rs. 29-4 though the quotation is slightly higher at Rs. 29-10. *Steel Corporation* have not been active. After being higher at Rs. 18-8 they are now quoting Rs. 18-4. There has been good enquiry for *Hukumchand Electric Steel* ordinaries which have been done upto Rs. 11-8. *Kumardhubi Engineering* were Rs. 4-2, *Britannia Building and Iron* Rs. 6-8 and *Marshalls* Rs. 1-14.

Among Electrical shares, *Patna Electric* were done at Rs. 17-10, *Shahjahanpur Electric* at Rs. 6-8 and *Upper Ganges Electric* at Rs. 12-1.

Among the transactions recorded in Sugar shares, *Balrampore* were noted at Rs. 6-8, *Buland* at Rs. 15-12, *Cawnpore* at Rs. 15-12 and *Raza* at Rs. 16.

Following the increase in the export quota for the next season from 90 per cent. to 95 per cent. there is good enquiry for select Tea shares. *Dauracherra* were done at Rs. 12 cum-dividend, *Killcott* at Rs. 51, *New Chumta* at Rs. 81-12, *Gungaram* at Rs. 882, *Sapoi* at Rs. 11-8 and *Tezpore* at Rs. 7-13.

In the miscellaneous section, *Burma Corporation* and *Indian Copper Corporation* are unchanged at Rs. 4-6 and Rs. 2 respectively. *B. I. Corporation* were Rs. 4-4, *Dunlop Rubber* Rs. 39-12, *Alkali and Chemical* Rs. 16, *Indian Rubber Manufacturers* Rs. 26-4 and *Borooah Timber* Rs. 15-4. Paper shares have been firmer with the quotation for *Titaghur Paper* 'A' and 'B' ordinary shares considerably higher at Rs. 18-2. The results for the half-year ended March, 1941 are expected to make very satisfactory showing. *India Paper Pulp* were Rs. 137 and *Shree Gopal Paper* Rs. 10-6. *Rohtas Industries* were Rs. 20 and *Ruby General Insurance* Rs. 6-7.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, May 29.

No business was done during the week under review on account of the communal tension in the city. The President of the Stock Exchange has informed the Finance Secretary of the Government of Bombay that the Committee considered it desirable not to reopen the market in view of the communal disturbances. It is considered unsafe for the members and their staff to come to the Exchange from the riot-affected areas. The Finance Secretary, it is reported, is placing the matter before the Government.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, May 29.

The local market was quiet and dull with small business passing. Planting issues met with limited support, while cotton mill shares showed no change in prices.

Securities:—The securities market continued to be steady, the price of 3½ per cent. Paper improving to close at Rs. 95-14. 3½ per cent. 1947-50 changed hands at Rs. 102-9 and 4 per cent. 1960-70 at Rs. 108-9. *Mysore Loans* came in for some attention, 4 per cent. 1953-63 being done at Rs. 115-4 and 5 per cent. 1955 at Rs. 125-7. 3½ per cent. *Travancore Loan* were placed at Rs. 104-6.

Mills:—Business in this section was on a small scale. *Buckingham and Carnatic* remained steady at Rs. 240. *Cambodia* had good buyers at Rs. 8-8 with no scrips on offer. *Madura* were dull at Rs. 36. *Mettur Industries* were in support at Rs. 144.

Utilities:—*Cochin State Power* found support at Rs. 8-8 x.d. *South Madras Electric* were a shade better at Rs. 13.

Plantations:—Rubber shares were very steady. *Cochin Malabar* continued to meet with buyers at Rs. 6-10. *Malankara* were transacted at Rs. 34-12. Tea shares accounted for very limited business. The International Tea Committee have increased the quota from 90 to 95 per cent. for the year April 1, 1941 to March 31, 1942 of the standard exports of tea from the regulating countries. *Peermade* were on offer at Rs. 27-8; *Periakaramalai* at Rs. 17-4 and *Chembra Peak* at Rs. 3-5.

Sugars:—This section continued to be a dull and neglected market. *Mysore Sugar* showed a slight decline to close at Rs. 58-4, while *Travancore Sugars* were unchanged at Rs. 14.

Miscellaneous:—*Mysore Paper* ruled steady at Rs. 13-14. *Indian Steel Rolling Mills* ordinaries were lower at Rs. 7-2, while the preferences were done at Rs. 11-2. *Mysore Chemicals* met with buyers at Rs. 16-8 and *Spencer 'B'* preferences at Rs. 9-10.

(*Continued on page* 1027)

As the Bombay Stock Exchange remained closed the relative share tables do not appear in this issue.—Ed. I. F.

(Half-yearly meeting, 14th June, 1941 at 11-25 a.m.)

Audited accounts for the half-year ended 31st March, 1941 :—

The accounts show a profit of Rs. 2,96,551-12-0. After providing Rs. 69,723-0-0 for taxation (including Excess Profits Tax) and Rs. 1,42,168-0-0 for depreciation, there is an available balance at credit of Profit and Loss Account of Rs. 87,690-15-10, which includes Rs. 3,030-3-10 brought forward from last half-year.

The directors propose to dispose of this as follows:—

	Rs.	A.	P.
In paying a Dividend on the Preference shares at the rate of 7 per cent per annum, free of income-tax	35,000	0	0
In paying a Dividend on the Ordinary shares of Rs. 2-8 per share, free of income-tax ...	50,000	0	0
In carrying forward	2,690	15	10
Total Rs. ...	87,690	15	10

The directors draw the particular attention to the very high taxation in this half-year which amounts to Rs. 69,723-0-0. An application for relief has been lodged with the proper authorities under the Excess Profits Tax Act, but it is not known when this application will be considered.

During the period under review, in accordance with the working time agreement, the mill worked 45 hours weekly with a monthly stoppage of one week except in February.

In the month of December representatives of the Indian Jute Mills Association attended a conference in Delhi at which an agreement was reached with the Central and Bengal Governments, whereby the Bengal Government was empowered to arrange for the jute mills to purchase jute on behalf of Government in the event of the jute purchased by the mills on their own behalf not reaching certain determined quantities during the first four months of 1941. Although the quantities actually purchased by the mills during the periods in question fell short of the desired figure, the Bengal Government decided not to ask the mills to buy jute on its behalf.

The policy of maintaining minimum prices for both jute and gunnies mentioned in the last report has been followed with benefit to all branches of the trade.

The Bengal Government have regulated the extent of sowings for the 1941-42 jute crop and this should partly relieve the weight of jute available from the current season.

Demand from consumers of hessian has been satisfactory but lack of buying by the Far East has reflected on prices of gunnies which have remained near the minima fixed. Satisfactory sales have been made for sometime ahead but though the near position is healthy the future is both difficult and uncertain and is likely to be governed by the shipping position and the movement of goods.

By Order of the Board,
MARTIN & CO.,
Managing Agents.

Calcutta, the 29th May, 1941.

MARKET POINTERS

Indian Cotton Exports

Indian exports of short-staple cotton to the United States during the first quarter of 1940 were very large. India accounted for over 19,000,000 of the approximately 21,000,000 pounds of short-staple cotton imported during this period, which is more than four times the amount imported from India during the corresponding quarter of 1939. Besides, the value of the cotton imported from India during the first quarter of 1940, practically equalled the value of cotton imports from India during the entire year in 1939.

China cotton is preferred to Indian cotton, because it is cleaner, whiter and rougher. This explains why Calcutta cotton, which approximates more closely to the quality of China cotton than Karachi cotton does, commands normally about 25 per cent. higher prices and in the spring of 1940, fetched as much as 100 per cent. higher prices than Karachi cotton. Although, as is generally felt, little can be done to change the quality of roughness which is due to natural climatic and geographical conditions, if somehow Karachi and even Calcutta cotton could be improved and sent to the U. S. A. cleaner and whiter, they would both command higher prices.

* * *

India's African Trade

A small increase in India's share of the East African trade in certain categories of cotton textiles, such as bleached goods and cotton blankets, jute bags and sacks, boots and shoes, pulses, spices and certain kinds of leather manufactures has been recorded, according to the annual report of the Indian Government Trade Commissioner in East Arica, Mombasa.

As usual, cotton textiles continued to be the most important item of the import trade of the East African territories of Kenya, Uganda and Tanganyika.

Imports of dressed leather from all sources of supply including India declined. While Tanganyika took from India more of wheat flour and grain including wheat, rice and pulse, the imports into Kenya and Uganda of wheat and wheat flour fell slightly, though the imports of pulse and spices registered an increase.

* * *

New Tea Export Quota

It is understood that the International Tea Committee have increased the figure of regulation for the year April 1, 1941, to March 31, 1942, from 90 per cent to 95 per cent of the standard exports of tea from the regulating countries.

* * *

Burma Starch Duty-Free

In accordance with the terms of the revised trade agreement between India and Burma, no duty is levied in Iudia on imports of starch from Burma.

This information is contained in a communication of the Government of India to the Bengal Millowners' Association, who had requested Government to exempt starch, imported from Burma, from the imposition of duties in the interest of the textile mills of the country.

* * *

S. I. Railway Earnings

The approximate traffic earnings of the *South Indian Railway* for the period ended May 20 were Rs. 18,71,717 as against Rs. 16,97,405 for the corresponding period last year.

(*Continued from page* 1010)

LONDON STOCK EXCHANGE

The sinking of the 'Bismarck' had a toning up effect on the markets early in the week and quotations for giltedged securities were marked at the highest levels for some time. A slightly irregular tone is noticeable towards the close though the undertone continues steady. Among British funds, 2½ per cent. Consols were 78⅞, 3½ per cent. Conversion 104½, 3½ per cent. War Loan 103¼ and 3 per cent. War Loan 100 1/8. The highest quotation touched by Consols during the week is 79. 3½ per cent. Indian Sterling Paper were 99¼.

Among other sections, Tea shares are higher with the increase in the export quota. Rubber issues also have been firm. Among Mining issues, Indian gold mining shares have been well held, while Oils have been relatively uninteresting with quotations not very much changed on balance. Home Rails were firmer earlier in the week, but towards the close an easier tone has been noticeable. Giltedged industrials have been very firm.

NEW YORK STOCK EXCHANGE

Wall Street has not been cheered by the President's speech and quotations have been fluctuating in narrow limits. Despite the reports about the possibility of a shortage of steel, *U. S. Steel* are quoting only around $52⅞. *General Motors* were $37⅜ and *Anaconda Copper* $26.

THE KALITI TEA CO., LTD.

IS IT NOT WISE TO INSURE NOW ?

With an uncertain future ahead Conservation and Consolidation of resources are the prime needs every individual should assiduously strive after.

If you already have Life Insurance, hold on to it. Don't allow it to lapse. If you haven't go in for it right now. A Life Policy gives an inestimable protection and it will cost you less now than later. It is cent per cent true that to be forewarned is to be forearmed.

Write to us for further particulars or advice.

WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

Interbank calls money is quoting ½ percent, nominal. No takers. Short credits are in abundant supply. Banks continue to be takers of firms' money at ½ percent for one to four months.

Comfortable credit conditions are emphasised in the various weekly returns of the money market. During this week, the Central Treasury was in the market for Rs. 2 crores of tender bills. Between May 28 and June 2, sales of tap bills came to Rs. 1,95¼ lakhs as compared with 1,76¼ lakhs in the corresponding period of the previous week. That is to say, the Central Government realised nearly Rs. 4 crores by sale of tender bills and tap bills. In addition, the Bengal Government secured Rs. 40 lakhs through three months Treasury Bills. In a week during which the short loan market was asked to put up over Rs. 4 1/3 crores, the average discount rate of Central Treasury Bills has remained unchanged at annas 13 and pies 9 percent per annum. Applications on June 3 were rather on the small side at Rs. 2.86 crores. But what is important to note is that the average discount rate is unchanged; and that the tap rate for the period June 4 to June 9 is the same as in the previous week. As against annas 13 and pies 9 percent being the discount rate of Central Treasury Bills, that for the Bengal Treasury Bills was annas 15 and pies 9. The difference between the central and provincial treasury bills is thus annas 2 percent per annum. Not so bad as it used to be at one time. But we should certainly like to see this invidious distinction ended once and for all.

The return of the Reserve Bank for the week ended May 30 in the banking department shows a sharp rise in the deposits of the Central Government from Rs. 6.01 crores to Rs. 12.68 crores. The significance of this increase is discussed in a later part of this review. The main point to note in this context is that the ways and means position of the Central Treasury has been rendered exceptionally comfortable by the substantial replenishment of its cash balances. The deposits of other provincial governments are also higher at Rs. 4.98 crores as compared with Rs. 4.04 crores. Deposits maintained by scheduled banks have risen from Rs. 28.90 crores to Rs. 29.54 crores.

The return of the Imperial Bank for the week ended May 30, establishes a record in the annals, not only of the Imperial Bank, but of banks operating in India. Deposits have now passed the Rs. 100 crore mark and the latest figure is Rs. 100.62 crores. We believe that this is the first occasion when the deposits of the Imperial Bank exceed the Rs. 100 crores mark. We also believe that no other bank in India has so far reached this figure.

In spite of the Imperial Bank increasing its investment portfolio from Rs. 57.53 crores to Rs. 58.07 crores, cash balances are higher at Rs. 11.22 crores as against Rs. 11.06 crores.

The most noteworthy feature of this week is the increase of Rs. 6.67 crores in the deposits of the Central Government with the Reserve Bank. This increase is significant not because it is so substantial, but because it is connected with a new development in the Government's ways and means problems. We have, on many occasions in the past, drawn attention to the significance of the Indian Government being agents for the British Government in the conditions created by the war. The Government of India are making considerable purchases for the British war office and incurring considerable commitments on behalf of the British Treasury. Payments in respect of these purchases and these commitments are made as they accrue; and the Indian Government are reimbursed by the British Government not as each item is paid off in India, but in a lump sum consolidating a number of sundry items. That is to say, the Indian Government, besides being the agents of the British Government, are also financing various transactions, the net effect of which is that they have to maintain, so to say, a larger working capital so as to cope with their own requirements as well as with the financing which they are doing in respect of the work they do for the British Government.

We have tried to make a study of the various factors connected with this financing responsibility. By far the most intriguing question in this connection is: What is the total amount that the Indian Government are out of

TREASURY BILLS

India.

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills were opened on Tuesday June 3, 1941. Total amount offered was Rs. 2 crores and 86 lakhs. Tenders at Rs. 99-13-0 per cent and above were accepted in full and those at Rs. 99-12-6 per cent were allotted approximately 68 per cent. Lower tenders were rejected. Total amount accepted was Rs. 2 crores, the average rate of accepted tenders being annas thirteen and pies nine per cent per annum.

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills will be received on Tuesday, June 10, 1941. Successful tenderers should make payment on Friday, June 13, 1941. Other conditions are as usual.

Three months' Intermediate will be sold from June 4, to June 9, 1941 at Rs. 99-13-0 per cent subject to the conditions previously announced (*viz.*, sales can be stopped at any time without previous notice if Government think it necessary).

Bengal

Tenders for Rs. 40 lakhs of three months' Government of Bengal Treasury Bills were opened on Monday, the 2nd June, 1941. Total amount offered was Rs. 50 lakhs. Tenders at Rs. 99-12-3 per cent were accepted in full and those at Rs. 99-12-0 per cent were allotted approximately 75 per cent. Total amount accepted was Rs. 40 lakhs, the average rate of accepted tenders being annas fifteen and pies nine per cent per annum.

THE MISRA HOSIERY MILLS have, from the commencement of the war, been "on active service." Working day and night, the mills have been supplying essential requirements of the Army in the knitting line.

MISRA HOSIERY cater to the requirements of the general population and comprise socks, stockings, undervests, sports shirts, interlock underwear and outerwear, for men, women and children.

Production 8,000 Articles, daily.

Finance Abroad

With the Foreign Exchange market well under control, there has been hardly any movement in rates in London or India. The money market too has been distinguished by the same amenability to control as before and this keeps the money market almost featureless. And the enlarged issue of Treasury Bills again of £75 millions, allotted last Friday, found buyers at just a fraction over 1 per cent. The rates disclosed a very slight increase over previous week while the volume of applications was also higher at £45 millions. It is reported that the market got a bigger allotment of 47 per cent as against 44 per cent last week. The larger volume of applications is ascribed to the greater volume of funds at the disposal of the Clearing Banks which were not under any obligation to make up monthly statements. If the exchange market continues to show imperturbability, for, sterling in New York and other centres shows no change over the last few days and the New York official rate stands at 4.03 3/4 still.

War expenditure continues to overshadow the exchequer returns. The savings campaign in England has been intensified and the success of the War Weapons Week mentioned last week is likely to be repeated when the campaign takes another form. The Exchequer returns in the third week of May show that the war takes out £10 million per day. From the beginning of 1941-42, expenditure on the supply services has exceeded £488 millions. Only the high rate at which revenue is running into the treasury can afford justification for the belief that Britain will be made to meet the cost of the war. London exchange rates mirror in a very precise form the absence of any change in spite of the evacuation of Crete. Only the stock exchange has shown anything like former sensitiveness but the new difficulties with regard to the war are to be noted in the virtual stability of the rate quoted for the yen. The difference over Rs. 4 per 100 yen in regard to telegraphic transfer shows that the yen has now taken its place amongst strong currencies. The view is supported by the new regulations as regards the production of certificates for exports from India. A notification issued last week draws attention to the need for showing that bona fide trading transactions have taken place. The notification issued under the Defence of India Rules applies to exports to America and various other countries. The rate quoted for the rupee in relation to foreign currencies is almost unchanged week after week. If one goes by the U. S. dollar alone, one might say that for the past six months, no change has occurred. The Netherlands guilder is virtually unchanged. But in the last two months small changes have been reported in regard to the Swiss franc and a minor currency like the Bangkok ticul. These changes are hardly important from the market point of view. They may, however, be referred to, to show that control is not so absolute as to rule out occasional fluctuations. The flightiness of the bullion market is almost a consequence of the exceedingly small fluctuations in the exchange rates. With the gold movement subject to the strictest type of control, there is hardly any place for the usual type speculative dealing and the revival noticed this week must be put down to a quickening of apprehensions in Bombay which has hardly got over the fright caused by the riots. Reports from the dominions as to the successful financing of war effort have been referred to by many to prove that the Commonwealth has adapted its financial strength to the new scale and pace of modern war. The remarkable stability of British Funds is adduced to prove that interest rates are kept rigidly under control. And one more point in favour of the successful working of control is put forward in reference to the absence of change in the price of either gold or silver.

The return of the Prince Regent to Iraq and the formation of a new Government in Bagdad justify the anticipations that Iraq will return to the sterling area. It was believed that Iraq would be denied the benefits of membership in the sterling area as soon as Rashid Ali started his treaty-breaking campaign. That fear has disappeared after the right of Rashid Ali and the recovery of British authority in Baghdad should be facilitated by the emergence of a new Cabinet. The Iraqi dinar, worth £1, is definitely a new currency. It came into effect some years after the State had taken shape as an independent kingdom, and in view of the special ties with Britain, the dinar has always been linked with sterling. But for the temporary break this year, the dinar has been a singularly stable currency and this Arab kingdom has, like other parts of the Middle East, retained its preference for silver coinage. The return of confidence in Iraq should promote the prosperity of the banking institutions connected with the country. These were jeopardised by the treachery of Rashid Ali, and now that the traitor has disappeared, the Banks are free to carry on as before. It is, however, noteworthy, that the dinar is not quoted on the Bombay market where rates on Lisbon, Montreal and Batavia are quoted but not for Baghdad. Evidently conversion into sterling is common as regards transactions with Iraq.

An announcement of some interest relates to the commandeering of U. S. and Canadian dollar securities in Australia by the Government. The procedure adopted is similar to that adopted in India early this year. The requisitioning may not provide much but it is taken as an earnest of Australia's will to victory. A similar intention is discernible in proposals for the rationing of clothing in Australia. It would indeed be singular if the world's largest producer of wool were to accept proposals for the curtailment of clothes for a very limited population. Mr. H. C. Daymond, in his reference to the rationing introduced in Great Britain, said that Australia must have rationing some time in the future and added "it is already impossible to buy blankets in most of the Sydney shops." If Australia has recorded its opinion in favour of a more vigorous savings campaign, Mr. Mackenzie King, in his promise of reinforcements from Canada has almost reaffirmed what he has said in connection with a new victory loan campaign started on June 2. But, for the moment, news from the dominions is of limited interest as compared with the steps taken in the United States to speed up help to Britain. The grant of emergency powers to President Roosevelt was distinctly foreshadowed in reports over the week-end. And commandeering of ships undoubtedly marks the first step for a new campaign for hastening help to the democracies.

How shipbuilding and other industries are going to co-operate is not known yet, but opinion has taken a very precise shape already. The absence of any quotation for the lira on most days in New York is a reminder of the depreciation which Italy's currency has undergone since war was declared about a year ago. It may be in part due to the steady loss of gold and the unprecedented rise in the Italian budget. It may be also due to the anticipated freezing of funds in the U. S. A., though the freezing is not likely to be timely or effective. It may be mentioned here that Mr. Morgenthau expressed the view on Monday that it is too late to prevent the escape of Axis funds but by a freezing order. It is now said that the Axis has already removed funds in anticipation of such an order. So, whatever might be the experience of a private corporation like Scherings, the Axis is not likely to lose much. Another item of information available recently is that the United States Treasury is going to restrict its tax requests to 3,500 million dollars in spite of the increased estimates of expenditure for the coming year. This means that borrowing might increase but the United States has plenty of funds and the slackness of money market conditions has been so pronounced that success for any borrowing plan, such as that which came into effect early in May, is taken as assured.

LLOYDS BANK
LIMITED
(Incorporated in England.)

Safety

In times of uncertainty, safety of capital should be the investor's chief concern.

A FIXED DEPOSIT ACCOUNT or SAVINGS BANK ACCOUNT with Lloyds Bank gives complete security of capital.

INTEREST is allowed at rates which can be ascertained on application.

War—and Ways and Means Budget

THE war has wrought various significant changes in the ways and means problems of the Central Government. For a full appreciation of the nature and import of such changes, it is necessary and useful to have a general understanding of the working of the ways and means machinery in normal conditions. At the outset, it may be stated that the section devoted to ways and means proposals in the annual budget speech of the Finance Member is still a mystery to most people. Even those who have a grounding in public finance and economics do not appreciate, in most part, the place which the ways and means budget occupies in relation to the interpretation and gauging of the trends and developments in the various sections of the money market. We shall, therefore, indicate briefly the problems that are embraced in the ways and means budget and examine the relationship of these problems to the exchange, money and giltedged markets.

The first part of the budget speech is devoted to a description of the actual results in the year before, the revised estimates for the current year, and the estimates for the coming year on the basis of the prevalent taxation. The budget estimates for the coming year, on the basis of current taxation, may disclose a deficit or a surplus. The second section of the budget speech deals with the measures taken to deal with the deficit or surplus as the case may be. In case of a surplus, the Finance Member may find himself able to reduce taxes. In case of a deficit, he may have to impose new taxes or raise some of the existing taxes. In so far as it is the second section of the budget that deals with new taxes or with remission of taxes, this section attracts more popular interest than any other section of the budget speech.

We now come to the ways and means section. In the first place, the main budget proposals might have contained schemes involving the raising of new capital. What will be the new capital that has to be raised for such purposes? —is the first problem of the ways and means budget. In the second place, some rupee loan may be due for repayment in the course of the budget year. What amount has to be raised from the capital market for the repayment of the maturing loan? This is the second problem of the ways and means budget. What is likely to be the progress of postal cash certificates and postal savings banks' deposits? Is there likely to be an increase in realisations for the Government through these two sources? Or, are there any special circumstances which make it advisable for the Government to be prepared for the contingency of withdrawals? These questions are considered as part of the ways and means proposals, and the final conclusion arrived at by the Finance Member determines whether he has to raise correspondingly more or less from the new loans of the year.

The Finance Member has also to take note of the various net accruals which take in departmental funds such as railway reserve fund, railway depreciation fund, provident funds, debt redemption fund, etc. All these are taken into account together—that is, the funds required for new capital works; the funds for the redemption of maturing loans, if any; the position as regards postal certificates and deposits; and the accruals in the departmental funds—and it is then possible for the Finance Member to give a rough indication of the amount that he might be needing from the new loan or loans to be issued in the budget year.

These factors relate to long-term loan problems. The Finance Member has also to consider, in the ways and means budget, the probable course of short-term borrowings. In this connection, he has to take note of the Treasury Bills outstandings in the hands of the public and the *ad hoc* Treasury Bills issued to the Reserve Bank. In relation to the bigger problem of the funds he might be requiring during the year, and in relation to the probable course of money rates and such transactions in *ad hoc* Treasury Bills as are connected with the option of the Reserve Bank to return rupee coin or demand rupee coin, the Finance Member is in a position to make a tentative estimate of the total floating debt at the beginning of the financial year and at the end of it.

Another important question connected with the ways and means budget is the funds that have to be made available to the India Office for interest charges on sterling debt, payment of pensions, etc. These are generally described as Home Charges. What is the estimate of Home Charges in the budget year? This problem is usually referred to as the remittance programme. It may also be that the Finance Member has to make provision for an India sterling loan maturing in the coming year. If there is such a maturing loan, the subsequent events will decide whether the loan would be paid off from the proceeds of a fresh loan issued in London or from the proceeds of the remittances effected in India. In general terms, the remittance programme has to include provision for the normal requirements of the India Office as well as for extraordinary requirements such as will occur when there is any maturing sterling loan.

It will thus be seen that there are an Indian section of the ways and means budget, and a London section. A ways and means budget deals both with long-term loans as well with short-term Treasury Bills. There may have to be new loans in India as well as in London. As a bridge between the Indian end and the London end is the remittance programme. This, in broad outline, is the routine ways and means budget of the Central Government.

The nature of the varied problems we have set forth will be understood better if we furnish some idea of the amounts involved in the respective sub-sections. Let us first take the new programme. In the 'twenties, the Government of India had taken on hand important projects, most of them connected with the extension and expansion of railways. In such circumstances, the new capital requirements every year were quite considerable. It was also a period during which there was some maturing loan or other year after year. The loans raised in the last and in the year or two following the war started maturing from 1924; and some of them were for quite large amounts. Thus, both on new capital account and on account of the funds required for the repayment of maturing loans, the new loan programme for each year, especially in the second half of the 'twenties, was for quite substantial amounts.

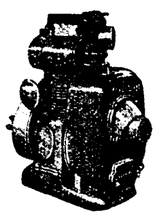
The new money for which the Central Government used to come on the market in those years was of the order of Rs. 20 crores; and loan maturities were sometimes as big as Rs. 30 crores. Thanks to the adroit credit policy and correct financial policy pursued by Sir Basil, the borrowing rate of the Government of India was brought down appreciably; and the loans issued were so aptly planned and so skilfully placed on the market that, even though the Treasury had big loan programmes, they were smoothly executed. The second quinquennium of the 'twenties marked the high watermark of new rupee loans alike for the amounts involved and for the success with which the loans were put through. As we said, the capital market was able to put up as much as Rs. 20 crores of new money and also to provide for the conversion of Rs. 20 crores and over of maturing loans every year.

Towards the close of the 'twenties, the rigorous policy of deflation pursued in pursuance of the eighteenpence ratio brought about such a terrific contraction of currency that the Government were finding it increasingly difficult to float new loans and ensure success for them. By the summer of 1931, the climax of this difficult phase of Government borrowing had been reached; and it was found necessary to offer as much as 6½ percent for the new loan of that year. The loan was kept open for months through the tap. Yet it fetched only Rs. 15 crores. This compares with Rs. 25 crores secured within three hours in June 1926 from the 4 percent 1960-70 loans.

September 1931 saw the rupee delinked from gold. This made it possible for an accelerated process of reflation. This provided more propitious conditions for new loans; and advantage was taken of the more favourable circumstances to replace a number of loans by new loans issued on a lower interest basis. The 'thirties, especially the first quinquennium, witnessed considerable conversions of this kind. But this was a period during which the Government had cried a halt to capital expenditure. The result was that the capital market was called upon to provide no new money but only to tackle the various conversion loans.

We now turn to Treasury Bills. It was in the summer of 1931 that Treasury Bills outstandings in the hands of the public reached the highest level; and the rate that the Treasury had to pay was also exceptionally onerous. Since then, however, it has been possible, thanks to expansion of currency since the end of 1931, to reduce total Treasury Bills outstandings and to effect a sensational cut in the rate at which short-term accommodation can be secured by the Government. In the last five years, the Treasury Bills issued to the public are between Rs. 25 crores and Rs. 35 crores.

As regards our remittance programme, till a few years back, the Indian Government needed to provide as much as £30 millions annually to the Secretary of State. Before the beginning of this war, the remittance programme, had been slightly reduced; and Home Charges could be met if remittances were made for roundabout £27 millions.



Since Sir Basil Blackett's time, the deliberate policy of the Government has been to avoid sterling loans; and every effort has been made to repay maturing sterling loans from the proceeds of remittances effected from India. There have been one or two exceptions. But the raising of a sterling loan has ceased to be a ways and means problem.

The picture of the routine ways and means budget will be complete if we give an indication of the significance to the money market of the nature and amounts involved in these various transactions. The size of a new loan is of vital moment to the giltedged market. If the new money that the Government are seeking to secure from the market in a year is on the small side, or none at all as in the years preceding this war, this must be construed as a definitely bullish factor for giltedged. It has been estimated that the annual savings earmarked in India for investment, in giltedged and only in giltedged are of the order of Rs. 20 crores. If the fresh money required by the Government in the form of new loan is less than Rs. 20 crores, it means that some of those who have these savings accruing in their hands will be obliged to invest them by purchasing securities from the open market. On the other hand, if the fresh money needed by the Government exceeds Rs. 20 crores, it may be straining the capacity of the market.

Similarly, the size of the Treasury Bills in the hands of the public determines money market conditions.

Remittances of the Government are a bearish factor in exchange. The smaller the remittance programme, the more favourable is its effect on the exchange market.

As we have said at the beginning, many changes have been effected in the ways and means problems by the conditions created by the war. With these developments we shall deal in the next.

Editorial Notes

Emergency Powers

THE proclamation of an emergency in the U. S.A. by the President last week, has led to speculation not about its duration or nature, but about the way in which President Roosevelt will use the powers, that he will naturally claim. The conversation with the British Ambassadr and the trip of Mr. Winant to the U. S. A., suggest that the President will outline his own plans for Anglo-American Co-operation because he has informed the U. S. public that Britain has by the leasing of naval and air bases, in Newfoundland, Bermudas and the West India, directly helped to increase U. S. security. The President who has been invested with special powers this week and has prepared for the strengthening of Atlantic squadrons on patrol and other duties by appointing more Vice-Admirals, is not likely to act quickly in implementing powers under the emergency. According to the New York Correspondent of the **Daily Mail** he will move slowly. He has no intention of staging a repeal or revision of the Neutralty Act, which forbids American ships, to enter the war zones. In industry he proposes to apply priorities to steel, and action is to be taken to keep production rolling. Last week it was said that a ministry of economic warfare might be set up under the emergency powers. Though convoys are definitely out, said the New York Correspondent of the **Daily Telegraph and Morning Post** in a recent cable to London there has been a reversion to the sea lane idea. The difference between the two conceptions is best illustrated, by an example. If you wish to walk in a lawless section of the town you can either take a couple of bodyguards with you or see that the police force clear the street of gangsters, before you enter it. Convoys are bodyguards. The new plan consists in keeping the road clear. As the correspondent points out, United States interests now extend as far as Iceland. The sea lane could with ease be kept free of marauders by American sea and air patrols, operating from Atlantic ports, and basis now being established in Newfoundland and Greenland. Since the President has declared that he will not ask Congress to modify the Neutrality Act of 1939 the protection of the last stretch of the journey will be Britain's job. Actually American naval and air force could venture into the combat zone, despite the Neutrality Act, which applies only to American merchant shipping but, as generally presented, America's task is assumed to end at Iceland. The shipping problem is more important to those who are conversant with the difficulties of building fresh tonnage. A fresh attempt has been made to deal with it. According to the Washington correspondent of the **Daily Telegraph and Morning Post,** orders were given on May 29th for the withdrawal of 13 liners totalling 200, 000 tons from the merchant service, for use, as military ancillaries: Tsese should be added to the five liners including the **America** requisitioned on May 28. The **America** whose 12 day cruise to the West Indies with 200 passengers was only partly completed was ordered to return without dealy.

No Gains for Pains

Crete has fallen victim to the furious assaults of the **Luftwaffe.** Invasion by air has succeeded and the Germans bent on retrieving their lost prestige in the island have succeeded in smashing Canea the martyred capital. Like Warsaw and Rotterdam it has taken exemplary punishment and in the **Daily Mail** last week appeared the report that Canea is no longer recognisable as a town. The fact that anybody survived is due to the wonderful natural caves there. The battle of Crete has ended with the enemy losing at least 30,000 troops in the twelve days during which General Freyberg stayed on, to fight with his New Zealanders. What will Crete give the Germans is a question readily answered. The reply is little or nothing for minerals are absent and agriculture is backward. Sericulture has decayed and citrus growing is moribund. Crete an island of capes and crags has experienced plenty of earthquakes in the past. And the coastal plain does not produce enough cereals. The forests are scanty and demand of timber and the Island's speciality is the Carob tree yielding the Carob bean. Sheep-breeding is known and Cretarr mules are still famous. The ibex is the only wild animal worth the name. Gypsum, slate and iron are said to occur, but the volcanic origin of the island is belied by the paucity of minerals. In spite of references to lead, manganese, sulphur and zinc nothing has been proved to exist. The Island, definitely under Greek rule since the admission made in the Treaty of London signed in December 1913 has had a population under 300,000, not much in excess of the population returned at the time it was under Venetian rule. For ten years this island was ruled by an Egyptian Governor, an interlude in the Turkish chapter which began with an attack in 1645 A. D. Revolts marked the 19th century but the most successful one was that of 1898 after which came the annexation by Greece in 1905 not approved by the Powers and ratified only after Crete sent deputies, to the Greek Chamber. Though Crete is supposed to have been rich in the time of Venetian rule, Turkish misrule has made the island poor and backward. The Germans have the airfields and nothing more while a further advance is sure to meet with a definite check from the Royal Navy.

Trade Disputes

The latest available statistics dealing with trade disputes in British India refer to the quarter ended September 30, 1940. There were 40 labour disputes entailing a loss of 856,494 working days. The number of workers affected was 70,976. In the preceeding quarter there were 101 disputes affecting 268,580 workers and resulting in a loss of 2,474,263 days, Of the disputes tabulated, the most important was the strike in the Empress Mills, Nagpur, which involved 14.000 working and resulted in a loss of 140,000 working days. The strike in the Model Mills affecting 3,221 workers, led to a greater loss of days and the 11 days' strike among the workers of the Calcutta Corporation in which 9080 people were involved was among the serious disputes reported. Over 65 per cent of the disputes turned on wage demands. Eleven were successful, 12 partially successful and 24 unsuccessful while two were still in progress at the end of the quarter. In regard to the number and duration of trade disputes as also the number of workers involved, Bengal comes first with 19 strikes of which 10 were unsuccessful. As many as 12 arose out of differences as to wages. In the case of the Nagpur strikes the reasons are not specified under wages, bonus, leave or personnel demands but 307,492 days were lost by the mills. The total returned for nine Provinces is 49 and the best showing as regards industrial peace is made by Orissa where two disputes involving 728 workers, were reported. The statement has no particular value but the statistics support the inference that labour unrest had died down before the summer and the economic dislocation caused over a wide front by the events in Europe had singularly slight effect on the world of labour.

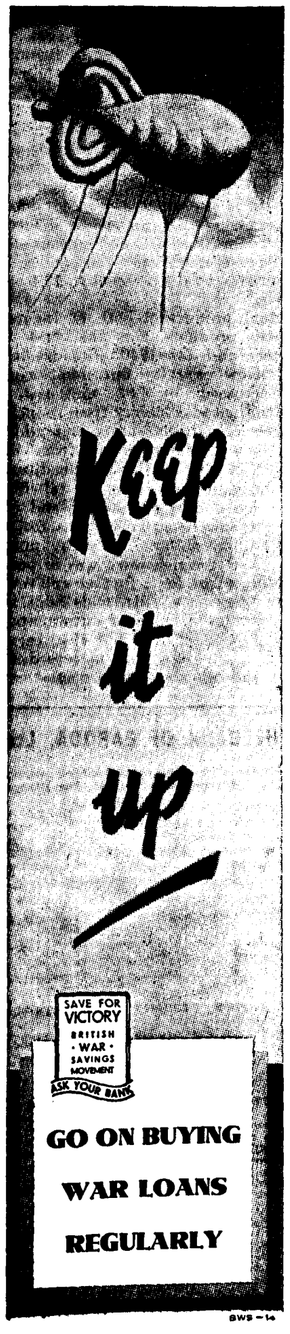
Wartime Reorganisation



ABOUT a month ago there was a reference to the progress made with reference to the new schemes in Britain for industrial concentration; one of these will throw out of use a million spindles. The primary purpose of these schemes is to reduce the demand for labour which is being diverted to war work and another aim is to reduce non-essential consumption so that taxation and borrowing alike are rendered easy. The Board of Trade has prepared plans within two months of the suggestion. According to Oswald Dutch over 500 proposals for concentration have already been sumitted. It is expected that 200 out of 500 schemes will be accepted and the rest deferred. The principal industry affected is the cotton textile industry. It is apparent that there is no place for hundreds of competitive mills. There are approximately 400 spinning mills alone and so far it has been decided that 111 mills are to carry on as so-called nucleus mills and that 61 mills should go out of work by the end of April. As regards the other 229 mills it is believed that about one third will close down and that two thirds will go on working. The result will be that the number of mills will be reduced by about one third. Reorganisation is contemplated in the hosiery industry also. Large firms are prepared to close down some of the mills they own. The textile industry will have four units and the result will be much the same as that proposed in the bill which Mr. Oliver Stanley introduced in 1938 in order to secure for the cotton industry the advantages of rationalisation. It has been long apparent that the Lancashire cotton industry contains far too many establishments and the division of functions has not made for efficiency or economy. What the proposal for a pool under a statutory commission could not accomplish in peacetime has been achieved under the stress of war and the reorganisation will be carried out with due regard for labour requirements and also in the light of the findings of the Royal Commission on industrial location. The woollen textile industry also has various branches and a reduction of establishments and workers in the Yorkshire industry may come if output is reduced by the drastic curtailment of consumption. Reference has been made to the schemes put up by knitting factories. Nottinghamshire will become a more compact industrial unit if the cotton industry's example is copied. Nucleus mills will be favoured as regards raw material supply and their workers will not be drawn out. The actual saving in manpower effected by the reduction in factories and the maximisation of output may not be great. It is, however, computed that if the 500 proposals put up by Industry of its own accord go through, at least 100,000 workers would be available for heavy industries . The concentration of light industries, particularly, the food industries should proceed rapidly as there are few unemployed workers who can be turned to in order to meet the demand for men. The March employment returns show that on the day of the count the Labour Reserve had fallen by 123,000. The number of workless in March totalled 172,000 only and of these 36,000 were described by the Ministry of Labour as unsuitable for normal industrial employment. Whether the rise in employment is altogether independent of the rise in wages is a difficult point to settle; but the drafting of more and more men into the armed forces furnishes an explanation. The actual need for men remains undiminished, for the Battle of Britain has been resumed and the nation has again "gone to it."

Shellac and Cellulose Lacquers

LAC is widely known as a base for special paints known as lacquers and the use of lac compounds in place of cellulose lacquers has been proved to show good results. Quick drying varnishes wanted nowadays mean that cellulose lacquers will not lose popularity, but the shellac producer is necessarily interested in seeing that lac is used for new type lacquers. For many years past lac has been used along with cellulose in solutions, and a recent publication of the London Shellac Bureau details the work done in connection with the preparation of cellulose lacquers with standard qualities. The use of combination lacquers is primarily meant

to encourage the consumption of shellac. In the preparation of cellulose lacquers, the admixture of damar or ester gum is general. Dewaxed shellac is also widely used for such lacquers. The study undertaken in connection with the qualities of cellulose lacquers refers to the difference produced by variations in the type of lac used. These qualities are looked for in good furniture varnishes (1) suitable viscosity (2) fairly high solid contents and (3) rapid drying. Many experiments conducted by various scientists have established the fact that suitable diluents produce the needed properties in conjunction tion lacquers made with ester-soluble with cellulose nitrate solutions. It was never forgotten that a competitive product is desired in order to extend the use of lac in the furniture and cabinet trades. It has been noted since that not more than 15 per cent cellulose nitrate is wanted for the lacquers which can acquire quick-drying proporties if alcohol soluble nitrate is used. Various types of diluents including toluene were tried in order to determine the viscosity ratio. Combination lacqueers made with ester-soluble nitrate were marked by high viscosty and low non-volalite content. Addition of of toluene modified the properties and tests with films produced by the lacquer showed that grater hardness was obtained with hard lac resin. Comparative tests showed that cellulose lacquers were harder than plain lacquer and those with nitrate produced a higher gloss. Of the five types of lac solutions used each showed specific qualities as regards time taken for drying, ability to resist scratches and capacity to retain gloss. Water immersion tests were applied to panels coated with cellulose lacquers and the behaviour of the latter was studied in order to show how bloom or blush could be obtained or avoided. A series of detailed tests were made by the investigators using different types of solutions and variations in the period allowed for drying as also in the dilution ratio led to differences in non volalit content and viscosity too. The purpose of the study was to give a set of formulæ to buyers of shellac interested in making combination lacquers who have so far depended on their own rule of thumb methods. For about eight years lac spirit varnishes have been studied carefully because french polish has lost ground to cellulose lacquers and dealers in shellac are greatly interested in making the manufacturers of lacquers try lac as a base of new conbinations which would be acceptable to the furniture trades and provide a new outlet for shellac in the stock solutions used for this purpose.

Plea for Investigation

IN the April bulletin of the Bombay Millowners' Association reference is made again to the Handloom industry Fact-Finding Committee. It is stated that the Association in its meetings with the Inquiry Committee and the Deputy Secretary of the Commerce Department insisted on the value of a comprehensive and accurate enquiry. The need for special field investigation was emphasised, and the Millowners also declared that the collection of accurate data could not be completed within nine months, the period mentioned in the instructions issued to the Committee. In the opinion of the Association, the need for an early report was much less urgent now than before for the reason that the war had brought about a considerable improvement in the position of the handloom weaver. It was therefore suggested that the time limit for the submission of a report by the Committee might be relaxed and the opportunity taken to order an exhaustive survey of the extent and position of the hand and cottage weaving industry by means of a detailed field investigation. Association argues that the long and detailed questionnaire issued by the Committee makes a special advance investigation necessary. It would be impossible for an average weaver to give satisfactory answers to some of the questions; and replies from the Mahajan or the owner of a small powerloom factory, not subject to the Factories Act, might make the report a collection of partisan views. Further representations made at a conference with Mr. T. S. Pillay related to the grant of authority to the Committee to appoint expert field investigators for collecting accurate data as there was a danger that a misleading picture of mill-handloom competition might result if the Committee relied on information put out by interested parties. It was promised that even if Provincial agencies collected information the Government proposed to ask the Inquiry Committee to take steps to have the facts placed before them, verified and established. The Committee of the Millowners Association did not agree that such an arrangement would be satisfactory and a letter was written to the Commerce Department to point out that Provincial Industries Departments, handicapped by lack of complete information, could not furnish complete or correct information to the Enquiry Committee. The fact that proposals for control measures in the interests of handloom weaving had been put forward showed that the majar enquiry itself might suffer. The Committee reiterates the view that any action directed towards penalising the powerloom industry of the country, ostensibly with the object of assisting handweaving industry, must be preceded by the establishment of the need for such assistance by the comprehensive enquiry and survey on lines suggested by the Mill-owners' Association. A detailed field investigation alone would, in the commitee's opinion, yield reliable data and a fairly large number of experienced investigators are wanted for ascertaining once for all the true relationship between the hand and powerloom weaving industry of the country. A uniform set of instructions issued by the Central Committee would help such investigators to elicit the facts concerning the handloom industry. Without such an investigation the Committee apprehends that the Fact-Finding inquiry would provide results of doubtful utility, and the Committee records its view "that any conclusions or actions based thereon would lend themselves open to the charge of having been built on preconceived ideas entirely unrelated to and dissociated from the needs of the situation."

U. S. Steel Corporation

In view of the advance in U. S. steel output in 1940 and a further advance in production, almost up to the limit of capacity, the last reported being 99.2 per cent, the annual report of the United States Steel Corporation, the largest and best-known producer of steel in the world, is of high interest. Total sales after adjustments amounted to 1081 million dollars according to Mr. Irving Olds who has remarked that the increase of 26 per cent in the value of output as compared with 1939 was independent of any change in prices. There was a slight improvement in the realised prices on certain products in the year, says the annual report, but no general increase was made in published prices for major products. The U.S. Steel report supports the conclusions drawn as regards the earnings of representative corporations in the U. S. A. last year. The demand for steel was shaped largely by events at home and abroad. The report states that the fall of France and other European countries left the United States as the one nation which could export steel in large quantities and the principal source of supply for countries not under Axis control. Mr. Olds says in the report that exports of all types of steel products made up 20 per cent of total steel tonnage sold in 1940 about one half going to Britain and quarter to Latin America and the remainder to other foreign countries. Shipments of rolled and finished steel in 1940 exceeded 15 million tons showing a gain of 28.2 per cent on 1939. Sales of pigiron ingots, scraps and secondary steel mill products were over 15.4 million tons showing a rise of 48.3 per cent on 1939. Shipments of limestone, coal, ore and other products at 6.03 million tons showed an increase of 82.5 per cent and sales of cement rose by 6.4 per cent to 13.4 million barrels.

Actual production both of ingots and finished products for the first three quarters and for 1940 as a whole was well below capacity but ingot capacity was increased by 1.92 million tons to 29.72 million tons mainly from re-inclusion of certain marginal units and additions from new installation or from higher production rating. Gross expenditure for additions and improvements totalled about 72 million dollars and at the end of the year there were authorisations for about 134 million dollars for such purposes upon most of which work was in progress including plans for a further enlargement of ingot capacity. Mr. Olds adds in his report that the value of output approximated to that of 1929 but 1940 earnings, reflecting the effect of increased taxes, wages and other costs, were substantially below those for 1929. In the intervening years the U. S. Steel Corporation has put through a programme of plant modernisation which has brought about savings in costs but these have been insufficient to offset rise in expenses over which the Corporation has little or no control. It is cited in the report that the Corporation paid over 85.42 million dollars in taxes showing an increase of 27.5 per cent over 1939. The Corporation employed an average of 254,393 persons in 1940 and paid over 438.6 million dollars in wages and salaries over the year. The average hours worked were 36.7 per week and average weekly earnings per worker were 32,97 dollars showing an increase over the 1929 wage-level in spite of a shorter working week in 1940.

THE BANK OF BARODA, Ltd.

Under the Patronage of and largely supported by the Government of H. H. the Maharaja Gaekwar.

Capital Authorised	Rs.	2,40,00,000
Capital Issued & Subscribed	,,	1,20,00,000
Capital Called-up	,,	60,00,000
Capital Paid-up as on 31-12-40	,,	60,00,000
Reserve Fund	,,	55,00,000

Head Office:—BARODA

Branches:

Amreli, Ahmedabad (Bhadra), Bhavnagar, Billimora, Bombay, Calcutta, Dabhoi, Dwarka, Harij (N. G.), Kadi, Kalol, Mehsana, Navsari, Ahmedabad (Pachkuva), Patna, Petlad, Port Okha, Sidhpur, Surat, Karjan, Kapadwanj, Visnagar (N. G.), Vyara

CURRENT DEPOSIT ACCOUNTS—Interest on daily balances from Rs. 300 to Rs. 1,00,000 will be allowed at ½ per cent. per annum, and on sums over Rs. 1,00,000 by special arrangements. No interest which does not come to Rs. 5 per half year will be allowed.

FIXED DEPOSITS—Received for long or short periods Terms on auplication.

LOANS, OVERDRAFTS AND CASH CREDITS—The Bank grants accommodation on terms and undertakes on behalf of its constituents the **Safe Custody of Shares and Securities** and the collection of dividends and interests thereon; it also undertakes the sale and purchase of Government Paper and all description of Stock at moderate charges. Terms on application.

SAVINGS BANK DEPOSIT ACCOUNTS—Sums of Rs. 300 and over accepted at 1½ per cent. by transfers from **Savings Bank** accounts, subject to three months' Notice on withdrawal Rules on application.

W. G. GROUNDWATER, *General Manager.*

Danger of High Prices

According to the latest bulletin of the Indian Central Jute Committee the scarcity of supplies of jute and jute manufactures in the U.S.A. as a result of the lack of shipping facilities and the increase in freight is responsible for the spectacular rise in prices. The prices of 10½ oz 40 spot burlap rose steadily from 9.4 cents at the beginning of March to 11.15 cents on the last day of the montr. The reaction to this menace has been a considerable substitution of cotton and paper for burlap. Paper especially profited by the difficulties of the burlap trade and it is feared that the continuance of the present situation would result in the enlarged use of both cotton and paper. The steady rise since March in hessian prices in Calcutta may, therefore, accentuate the tendency in the U. S. A. to turn to other packing material and a permanent fall in export demand may follow. The Jute Mills Association has always adhered to the view that prosperity cannot come from high prices engineered by speculation and the present prices may not be maintained if demand from abroad falls. That the recent rise is due to local and temporary factors has been the view of many who claim that the shortage of ready goods was exploited by the bulls last month when prices were run up to the surprise of the mills. It was imagined by people outside the trade that the failure of the mills to buy the entire quantity of jute prescribed by the December Agreement would, instead of assisting, hold up any advance in prices while the small scale on which war orders are issued to the Association would by itself damp the speculator's ardour. The place of jute in the U. S. defence programme may be inferred from its inclusion among essential commodities. This position has led to the adoption since March 24 of the system of export licensing as regards jute manufactures shipped from the U. S. A. so that the Axis countries do not get any of the goods sold by the Burlap Bag Dealers' Association. The classification of jute and jute goods as an essential commodity wanted for the U. S. defence programme might affect the allocation of shipping space for these imports. Since the procedure governing the grant of facilities is regulated at the other end and the requirements of importers rather than Indian shippers guide the booking and transport of exports from India, the classification will assist the Indian exporter, provided however that the prices do not injuriously affect demand. The jute industry in America has benefited through the defeat of a Bill advocating the marketing of raw cotton on a net bale weight basis which would discourage the use of jute bagging.

BRAITHWAITE
BOMBAY PIPELINE

THE TANSA PIPE LINE.

Running over a distance of 110 miles, the Tansa Pipe Line conveys 90 million gallons of water per day for the city of Bombay. Designed and laid out by Messrs Braithwaite & Co., (India) Ltd. a total of 90,000 tons of steel were required for the completion of the work and due to the very high pressure that the line can bear it has been known as "the Longest Boiler Barrel on Earth"

Clive Street Gossip

"I must have liberty
Withal, as large a charter as the wind
To blow on whom I please."
—(*As You Like It*).

"BUSINESS as usual" was the famous motto of, I believe, Mr. Lloyd George when, on the midnight of August 4, 1914, it was known that the British ultimatum to Germany had expired and the two countries were at war. It has been famous ever since; and the British have been proud of the fact that their devotion to business does not suffer even when the whole country is plunged into a life and death struggle. The motto sums up both the realism and the idealism of the nation, the ideal blend that has made Britain great. But time works vast changes. What was ideal two or three decades ago, may not be even ordinarily suitable to-day. The conditions in which nations can strive to keep up ordinary business connections with neutrals and close contact with the enemy at the same time may have gone for ever. To bestow care and attention on the export trade may at one time be admirable foresight. At another, it would be inexcusable shortsight. Trade connections, once lost, may be difficult to get back. But survival stands by itself. It is second to none, and allows no second to follow close to it. There is no order of priorities, no fine choice of alternatives. It calls for the sacrifice of everything. It compels concentration on the present and on the immediate future. The eye, thus focussed on the moment, can stray away from it only at the peril of life itself. The requirements of the postwar years, while the mind may inevitably linger on them sometimes, have, nevertheless, to be curtly brushed aside. That is totalitarian war. Though the phrase itself is employed quite often, the appropriate changes in attitude and outlook have not been accomplished. The tradition of "business as usual," which was a help on a heroic scale in the last war, may to-day be a hindrance.

It is no answer to this to say that the continuance of business as usual is essential for the prosecution of the war. That is a strong argument, no doubt. No one can deny that, unless the usual productive activities are continued, the export trade cannot be maintained; and without exports, Britain would not have the wherewithal for continuing essential imports. All that is true, but a course of action which can be justified is not necessarily the best course of action. For, justification, as a rule, follows action; while what is required is the kind of forethought that determines action. In the former case, what determines action is not the consciousness that justification can be found for it, but the proneness to continue in the old habits of thought. Nearly every significant omission, which in the recent past has proved to be nearly fatal, has had justification in abundant measure. But *post facto* justification does not alter the fact or its consequences. There is no action, which is not too deliberate, which a man of average intelligence cannot somehow justify. What matters in life is the freedom from inhibitory modes of thought and the capacity to act as each imminent development requires you to act. This freedom and capacity, important enough even in normal life, become indispensable in moments of crisis. But the mind, which, not only runs in grooves, but is also proud of it, revels in past achievements consisting in the cutting of such grooves. It flaunts old sayings with a dwindling content of wisdom and makes half-hearted compromises with the new principles of action which claim its allegiance.

I was prompted to this line of thought on reading the extract from an article in the *Times Trade and Engineering Supplement*, which has been cabled to this country. I would ask the intelligent reader to leave off my Gossip at this point and go through that extract as it appeared in the *Statesman* of yesterday. He will find for himself with what complacency, the writer extols the achievements of the Empire in respect of the war industries. He will note how scrupulously he counts the costs of every effort that has been , or may be made in every part of the Empire. He is conscious of all possible criticisms. But he has a supreme disdain for them; for, he believes, he looks far beyond his critics' ken. While the critics are thinking of avoiding a repetition of the withdrawals so far effected, he is thinking of how the industries started to save the Empire will fare when the Empire will have survived all its dangers. Soundness of investment must take precedence over the future of the Empire!

I shall not anticipate any more the later stages of my gossip. I have said this because I should so much like the reader to leave off this gossip at the point I have indicated and see whether my earlier remarks are not justified. It is clear that, throughout the article, the main standpoint is the economics of industry from the standpoint of private enterprise and free trade, both of which were on their last gasp when the war broke out in August 1914. I trust I shall not have to argue this point that nothing can be a worse obstacle to winning this war than the ideas which died with the last one. I have said that survival, as an aim, will not brook any comparison with the inconveniences and hardships that the fight may entail in the future. For the choice of means is not left to you. In every war the weapons and the tech-

nique are to some extent pre-determined; and to some extent they develop during the course of the war. But in the present instance they were all determined years before the actual outbreak of hostilities. Germany did not prepare for the war in the ordinary way. She dedicated herself to it. It was not as if she accumulated stocks of this thing and that and the other. She did not go about acquiring stocks of foodstuffs and munitions. She did not hoard dollar balances. She decided to give war the supreme place in the national ideology. Nothing else counted. There was not a whisper about what a particular new industry started for the purpose of the war would do, once peace is signed. In fact, the changes in the structure of German industry are so vast that all the forces of private interest have been harnessed to the winning of the war. She has provided for every foreseeable contingency. And once the die is cast, there is no looking back. If the war can be won only by making one thousand planes a month, it must be done; and the lot of the industry which manufactures a certain part of the aeroplane is better looked after by concentrating on victory than by giving it special consideration during the course of the war and the preparation for it.

That is totalitarianism.

We may not like it. Indeed, it is a wonder how men are found who not only will not oppose it, but are prepared to enthuse over it. But aesthetic shortcomings, unfortunately, do not act as military handicaps any more than a high philosophy or a fine sense of values can win battles. Democracy lacks the power to compel its opponents to adopt its ways. It has no chance of beating totalitarianism unless it gives the first place to winning the war. It may make war itself a means to some end outside of itself. But that can be only after the war is won.

All that is plain truth for all to see. But the writer in the *Times Trade and Engineering* approaches it from the point of view of precisely these ideas of private enterprise, free trade and differential costs and post-war prospects. "After all," he says, "private enterprise is responsible for British prosperity." The tone is apologetic enough; but strident claims for private enterprise would to-day be laughed out of court. It is better to pitch the claims low and make up for it in the deductions. "The enterprising citizen who sees an opportunity must not be unduly blamed for seizing it." "But his Government," it is argued "has the interests of the State and the Empire to consider and presumably knows much more about economic conditions than the average citizen." The writer in the *Supplement* contends, therefore, that 'very wisely governments are not desirous of encouraging the birth of mushroom industries that will be uneconomic after the war is over and prove an embarrassment."

I will quote in full the crux of the article without trying to intersperse running comments of my own:

"Few would deny that there are occasions when subsidising an uneconomic industry is justified. But such instances are not very common and prudence dictates that no Government should permit a state of affairs to come about when it will have to face the alternatives of ruining many people and creating unemployment or granting subsidies. We fully recognise that each Government must decide its policy in such matters for itself, but the prudence with which the Governments are approaching the question is to be commended.

"Even in respect of war industries, it is in the general interest not necessarily the best course to enter on indiscriminate production. All relevant facts should first be taken into account.

Obviously, it would be misdirection of material and manpower to establish new war industries where the necessary plant and skilled labour do not exist or could only be obtained at the expense of some other part of the Empire which conceivably may be in a much better position to execute the work."

It is the London School of Economics, and not the War Council, that speaks in what I have quoted above. If the extract on which I am basing my comments does no injustice—and that seems extremely unlikely—the writer is not quite sure in his mind what place the possible embarrassments of the post-war period must have in the direction of the war effort to-day. For, obviously, it is one thing to oppose a new industry in some Dominion or colony on the ground that it will cause diversion of material and talent from a place in which they are most effectively employed to one in which their establishment may not be as efficient and effective. It is quite another to oppose it because its establishment may lead to some embarrassing problems in the post-war period. Strictly speaking, even the former objection carries with it no obvious validity. For economic employment of men and material, which is, no doubt, the criterion in peace time is not necessarily the best criterion in times of war for determining the location or expansion of an industry. It is just commonsense that if the course of the war is such as to cut off a very efficient centre of production from the theatre of war, the cost accounts in your files will not carry the goods to where there are wanted. The establishment of numerous centres of production and sources of supply is but an elementary precaution in a war that has known only lightning developments. It is no use arguing that "if the maximum results are to be attained, the diversion of men or material from one spot to another requires very serious consideration."

Now, it is not a little significant that this is precisely the ground on which the Government of India refused to give the assurances asked for by the Mysore Government and torpedoed the scheme for an automobile industry. The *Times'* article, starting as it does about the economic principles which ought to govern the Empire's war effort, makes very pointed remarks about the question of new industries for India. Indeed one is tempted to think that the general remarks were meant to lead up to the special defence of the policy pursued in India. "In India," the article runs, "there appears to be a disposition in some quarters to complain that more use is not being made of her great potential resources for the purposes of the war. It is urged that an immense army might be raised and equipped there." It is not appearance, but reality. I was the first to raise the cry of a two million army for India and the establishment of the industries necessary to equip such an army. When I asked for a two million army, I was not asking for thousands of tons of cannon fodder but for an army which can bring the war to a speedy conclusion by prevailing over the enemy without unnecessary vicissitudes or unduly long-drawn warfare. British writers are ready to pay the most extravagant tributes to the Indian army; for such tributes are meant to cover up the grievous omissions of the Government in respect of increasing its strength and equipment. These tributes help them to raise, after an appropriate pause, the question, "Can men be raised and equipped as quickly in India as elsewhere?" "It is not," it is said, "a question of sentiment, but of manufacturing capacity. Surely there can be but one answer and that is, the raising of men should proceed just as quickly as it is possible to equip them." The adverb, "quickly", militates against veracity and accuracy. "Slowly" would be better.

But let us look into these propositions a little more closely. Raising men and equipping them are the problems we are confronted with. Of the two, raising surely is no problem at all, except to the extent that politics makes it so. Neither the Army nor the Supply Department need place an order with any firm for men. We have men we do not know what to do with. And now that the sinewy six foot soldier is not the only type that can wage a war, we can rule raising out of consideration. Let it be admitted that equipment is the only important problem, Here, the argument shows curious wavering between diversion of men and material and delay. "New works in India for making such things as aeroplanes, tanks and warships would entail long delay in training personnel and equipping factories." Does that mean an admission that there is no intrinsic, insuperable difficulty in establishing such works? And if there is no such difficulty, one is entitled to ask, what was responsible for postponement to a point at which the delay involved is a conclusive argument against it? Presumably, it was diversion at the beginning of the war; it is delay now. And all attempts to defend the policy pursued waver between diversion and delay. But the net result is the same. No help for India. If it is "too late now to deplore the past," it will be even more so in the future. Diversion at one time would have been enrichment; for the men and material so diverted would have helped to create far more of such men and material. Likewise, once you face the risks of delay, it will cease for ever to account. For, only delay is the thief of time and makes the time factor so forbiddingly intractable. The *Times* can say with pontific gravity that it is not a question of sentiment but of manufacturing capacity. But it is neither. It is a question of facing up to the problems on hand. And if there is any tinge of sentiment, it is not from the side of India, but of Britain which, most unaccountably, thinks more of post-war economic competition than of the supply problems on hand.

Simla, June 4.

No instructions appear to have been received from White Hall so far on the subject of future political policy in India. In a recent speech, the present Under-Secretary of State for India, the Duke of Devonshire, who, according to reports current in Simla, is likely to succeed Lord Linlithgow as Viceroy, referred to the Government of India "for India by India in India", but the truth is that today the authorities in India cannot initiate any fresh political move without further instructions from London. It is believed here that a statement is being prepared to explain the policy of His Majesty's Government. When that is published, it may show to what extent the British Government is prepared to go in response to the demand for liberalising the August offer in the light of the Bombay resolution and other representations made to the Viceroy. Political talks in Simla do not show that though the British Government may be prepared to expand the Viceroy's Council and provide for a clear non-official majority, the demands made by Sir T. B. Sapru for complete Indianisation of the Cabinet and the introduction of Cabinet Government in the accepted constitutional sense find any favour with the authorities. The reason advanced is that no radical changes at the Centre which may jeopardise the direction of the war effort can be considered at present.

* * *

The presence in Simla of a large number of newspaper editors was utilised for leading a deputation to the Commerce Member in connection with the proposed restrictions on newsprint imports. The discussions continued for two days to ascertain the difficulties experienced by newspaper interests and the measures necessary to remove them. It is proposed as a result of these discussions to settle a permanent plan for correlating imports with the actual minimum requirements of the numerous newspapers. For this purpose a Newsprint Control Order has been issued providing that returns of consumption shall be made by all newspapers and returns of stocks by dealers. It is the intention of the Government of India that after these returns have been checked and quotas fixed for each newspaper, import licenses should be given only in accordance with those quotas. One question which appears to have been discussed at great length in the conference was the procedure in respect of the grant of these licenses. To whom should they be granted—to the dealers or to newspapers? It is expected that in the permanent plan to be evolved an equitable arrangement will be made which will not adversely affect newspaper interests by throwing them at the mercy of dealers or unfairly affect the dealers by depriving them of their legitimate business. As complaints were made by certain newspaper interests that calculations based on past importations for the purpose of fixing quotas would place certain papers at an advantage and others at a disadvantage, it has now been made clear that the criterion would be actual requirements and not past importations. For regulating prices in orler to check unfair monopolistic tendencies the Government of India propose that it should be a condition of grant of licenses to them that they shall not, on pain of refusal of all further licenses, sell newsprint so imported or allow it to be sold at a price covering more than the import price plus a prescribed margin for profit and incidental expenses. The prices at which newsprint is sold by importers during the interim period will also be taken into consideration in granting these licenses. Finally an assurance was elicited from the Commerce Member that the good offices of the Government of India will be used for the purpose of getting as high priority as possible for shipments of newsprint imports after essential war supplies. The newspaper editors who met the Commerce Member expressed great satisfaction with the results of their discussions.

* * *

I understand that the Government of India have forwarded their reply to the Ceylon Government's letter regarding the two immigration Bills which are now before the Ceylon State Council. This reply was considered and approved by the Standing Emigration Committee at its recent meeting. The contention of the Government of India is, as it has always been, that the question of emigration should be considered along with the question of the status and rights of Indian settlers in Ceylon and not separately. There is no reason to feel unduly nervous about these Bills, for apart from the certainty that it will take some time for the Ceylon State Council itself to complete the consideration of these Bills, the Governor of Ceylon has already signified that even if they are passed, they will be reserved for His Majesty's consideration. No immediate need, therefore, arises for any special steps on the part of the Government of India beyond the reiteration of its opposition to the Bills and of its determination to protect Indian interests by every means in its power. In the meantime the possibility that wiser counsels may prevail with the Ceylon Ministry and induce them to deal more reasonably with the Indian question, cannot be overlooked. To the Ceylon Ministry it must be perfectly clear that if the Government of India is forced to resort to economic retaliation in defence of Indian rights, the consequences will be serious to Ceylon. In Ceylon's own interests it is far better to cultivate a policy of friendship and sympathetic understanding of each other's needs and rights than to persist in insensate opposition on purely racial grounds.

* * *

The report of the Indian Trade Commissioner in New York which was issued by the Government of India this week should serve as a reminder to the Government of India that they should no longer postpone giving effect to their decision to appoint Trade Commissioners in Canada and South America. America's ability or desire to absorb India's products, says the report, has by no means reached a saturation point. It adds, however, that the needs and demands of the American consumer have to be studied and that mutually satisfactory and reliable relations between the Indian exporter and the American exporter have to be established. The report points out that if the Indian exporter will think in terms of the American market rather than of home conditions and standards the possibilities of increasing India's exports to the United States will be immeasurably enhanced. As regards Canada it is stated in the report that if Canada, as seems likely, becomes more highly industrialised and if the size of her population keeps pace with her developing industries, as can be expected in the light of the history of industrial expansion in other countries, Indian commodities will find larger markets in Canada. At present Indian imports into Canada are just one-seventh of Indian imports into the United States. The two main categories of Canadian imports from India, according to the report, are agricultural and vegetable products, and fibres and textiles.

Bombay, June 5.

With all markets almost afraid to open the riot situation is the dominant factor in the life of the city this week also. Casualties have been numerous as violence revived in a fiercer form, and it is not possible to report improvement after all the elaborate bundobust. The police have however, done their best and the crime wave has receded. The curfew order has not been withdrawn, and the extended discussions among the citizens who formed a peace committee under the leadership of the Mayor were followed by regular visits to stricken areas. Preventive arrests have been many and frequent, but the situation remains difficult. The main cloth market the Moolji Jetha bazaar remains closed in pursuance of a resolution adopted by the Merchants Association because the authorities failed to comply with certain requests. Schools under the control of the Corporation have been closed, and shopkeepers remain afraid to open their shops. Mr. Gordhandas Marajee wrote on behalf of the cloth merchants to the Police Commissioner saying that cloth shops cannot open at present because shopkeepers are not treated as above suspicion. The Stock Exchange has been half-open for the last two days mainly because of the exigencies of settlement though several brokers decided to abstain from business. Muslim merchants have recorded their disapproval of the rioting in a convincing manner. The political motive is absent.

It has come to many as a surprise that the Middle East situation is now simplified by the flight of Rashid Ali. If Bagded were in hostile hands Iran would be in danger of losing her neutrality. Indian trade with Iran would be endangered and this would be more serious than the suspension of pilgrimages to Kerbela and Najaf this year. The trade with Iran and Iraq last year has developed in spite of restrictions concerning the export of silver and silver coin, for Iraq and Iran are obviously routes through which trade with Turkey and Syria is maintained. It is evident that the rupture of trade relations with the French Mandate will lead to reduced traffic with the Gulfports and the war will therefore upset some Bombay firms. That the trouble in Iraq has been mastered within six weeks proves that Hitler can be beaten at his own game. The oil of the Middle East is now safe and this country need not worry about the quantity of petrol though prices are expected to go up very soon as the rationing scheme is almost ready for introduction. While Turkey's position is eased by the recovery of British supremacy over Iraq, the situation in Syria has created fresh problems. That Syria will be invaded and used as a base appears certain in view of the collusions of the Vichy clique and the retirement of General Fougere at this juncture is viewed with suspicion.

The newspapers have been regaled last month with a long memorandum from the Bombay Presidency Council of Women about Hindu women's rights to property. Nothing less than complete equality will satisfy the Council which advocates extensive reforms in pursuance of the ideal of equality. The All-India Women's Conference which recently considered the same subject traverses the decision of the Federal Court, though not in the usual manner, by recommending that Provincial Governments should advice the Central Government to introduce legislation for the purpose of securing women's right to inherit agricultural property. The conference has put up its own memorandum for consideration by Mr. Justice Rau's Committee urging that the inferiority of women should disappear and that differences in rights should be done away with. Hindu law is full of absurdities and injustices in view of present day conditions, according to the memorandum issued by the women's conference. A denand is made for the inclusion of women in any committee of investigation, charged also with the task of considering proposals for reform.

Not a little interest has been manifested in reports that the Central government is anxious that the Privinces should bear a part of air raid precautions expenditure. The Bengal Ministers are evidently discussing at Simla the subject in a representative capacity and the belief that an acceptable formula has been evolved has gained ground in view of a report that a new coordinating agency is to be set up. Nothing is known about the details contained in the circular issued by the Central Government. It is known that A. R. P. is divided into two parts and the Central Government is prepared to pay for the defensive schemes but not for the passive schemes, except where there are industrial concentrations. A grant-in-aid is, however, promised for passive defence expenditure increased by the Provinces. The Punjab which has no coast has demurred and indicated that only 50 per cent of A. R. P. expenses and that on the passive side alone can be met by the Provincial Government. Experiments in blacking-out now extend from the Coastal towns, and the discussions with Provincial ministers, according to Calcutta reports have not been unfruitful. The Home Secretary has pursuaded the Bengal Ministers that a share of A. R. P. expenses must be paid out of Provincial revenues. The position of the Maritime States is, however, not known. It is certain that they must undertake A. R. P. in some form sooner than the Imperial capital, and it is not known of the Political Department has any finger in the pie. The Agent-General has to move in the matter of telling the maritime states of Kathiawar the special outlay is needed for putting the ports in order so that the air raid peril may be met. It is easy to see that war effort in the States must take in the precautions, now general in Indian cities.

An event of more than ordinary interest to thousands of policy-holders and the public too is the annual meeting of the Oriental Life Assurance Co. At the meeting last Wednesday Sir P. Thakurdas announced that new business in 1940 resulted in the issue of 35,764 policies assuring in the aggregate Rs. 7.49 crores. Striking recovery in regard to the new business figures means that the Oriental is vastly better off than most companies. Total premium revenue for 1940 was nearly Rs. 373 lakhs and interest income rose by Rs. 6 lakhs to Rs. 112 lakhs. Net yield on funds declined to 4.34 per cent owing to the stability of interest rates. Claim experience was satisfactory and the Chairman 20.6 per cent. A fall of 2 per cent therereported a fall in the expense ratio to under shows that the biggest Indian office can claim a distinction that is claimed by a few others at present. Total funds stands at over Rs. 27½ crores revealing an increase of Rs. 2 crores over 1939. The change in the Articles of Association last year explains the appearance of debentures and preference shares among the classified assets. A beginning has been made with Rs. 9½ lakhs in the first year, and it is hoped that the new money coming in every year will be applied towards the purchase of shares which will provide at least 4 per cent tax-free instead of the much lower return offering on giltedged. Reference was made to the investment conversion operations carried out on occasions. This may provide a larger margin for investment in debentures, etc., necessary in view of the increasing demands made by policyholders for loans. Investments belonging to the company showed a difference of Rs. 299.25 lakhs over the ledger value. Sir P. Thakurdas explained that holdings of 3 per cent. and 3½ per cent Paper were shown at specially low values and that holdings too had been reduced in consonance with the changes in investment policy. The Company's strong position furnished the Chairman with many points to put before the meeting.

(Continued from page 1031)

pocket at any one time on account of their agency work for the British Government? There are difficulties of various kinds in making any accurate estimate. The main data are furnished in the Reserve Bank returns; but some of the figures which are relevant to our study are susceptible to other influences also.. Subject to this reservation, we may set forth the relevant figures and the tentative conclusions.

In the week ended May 30, foreign balances in the banking department are higher by Rs. 8.43 crores. Obviously, such a large increase in foreign balances cannot be due to purchases of sterling from the open market as the tenor of the exchange market does not warrant such a conclusion. That the increase in foreign balances is connected with inter-governmental transactions is confirmed by an equally sharp rise in the Central Government's deposits. Central Treasury's deposits are higher by Rs. 6.62 crores; and this increase will have been greater if it were not for the fact that the Government have presumably utilised Rs. 1½ crores for the reduction of the ways and means advance they had taken from the Reserve Bank. In other words, while foreign balances have gone up by Rs. 8.43 crores, Central Government's cash appears to have been replenished to the extent of Rs. 8.17 crores.

Such a coincidence of a sharp rise in foreign balances with a sharp rise in Central Government's cash has taken place periodically in the past few months. For purposes of this study, we have taken the six months period from November 29, 1940 to May 30, 1941. We have not included the earlier months in this study as foreign balances in the banking department of the Reserve Bank were, in those months, largely affected by heavy purchases of sterling by the central banking institution. Since the end of November, however, exchange market conditions have been rather quiet; and most of the increases in foreign balance can now be said to be due to inter-governmental transactions. In the week ended May 2, foreign balances showed an increase of Rs. 6.67 crores, as against which Central Treasury's deposits with the Reserve Bank are higher by Rs. 85 lakhs. This would have been greater but for the utilisation of Rs. 6½ crores for the repayment of ways and means advances. In the week ended March 7, foreign balances are higher by Rs. 8.48 crores while Government's cash had risen by Rs. 5.19 crores, after the month-early disbursements of the Government had been made. In the week ended January 31, foreign balances are up by Rs. 8.61 crores and Government's deposits by Rs. 3.88 crores. In the week ended January 17, foreign balances are higher by Rs. 2.93 crores; and Government's cash balance by Rs. 2.79 crores. In the week ended January 3, foreign balances are higher by Rs. 2.43 crores; and Government's cash balance by Rs. 1.65 crores, after making the usual beginning-of-the-month disburaments. In the week ended November 29, 1940, foreign balances are up by Rs. 5.02 crores; and Central Government's cash by Rs. 6.44 crores.

Thus, we can trace, between November 29 and May 30, an increase of Rs. 42.57 crores as more or less directly due to payments made in sterling by the British Government to the Indian Government. This works out to an average of Rs. 7 crores per month. In addition, it must not be forgotten that the remittance programme as announced by Sir Jeremy Raisman last February provided for the direct utilisation of some of the sterling receipts for Home charges. We may, therefore, hazard the view that the disbursements which the Government are making in India on behalf of the British Government might be of the order of Rs. 10 crores per month. Assuming that there is a lag of six weeks between payment in India and reimbursement in London, the working capital which the Government of India now be employing for their agency work, may be in the neighbourhood of Rs. 15 crores.

If our general conclusion is correct that the payments and commitments of the Indian Government in their capacity as agents are roughly Rs. 10 crores a month, this means a monthly sterling receipt of £7½ millions. This gives £90 millions in a year. We seem to be adding to our sterling assets on a scale of less than £100 millions per annum.

At the beginning of the week, there were a good few export bills on the account of Indian shippers. These were in continuation of the considerable volume of bills that made their showing last week. Freight position has been distinctly more favourable; and shipments of jute fabrics in June are expected to be satisfactory. It is believed that the United States and the Plate have made good purchases of hessian for nearer deliveries; and, according as freight is found available, a more abundant showing of bills may be expected. At the moment, however, after the good spell of activity throughout last week and early this week, bills appear to have dried somewhat.

Banks were sellers of T.T. at 1s. 5 15/16d., for ready up to six months forward; and banks were buyers of T.T. at 1s. 6d. for the same delivery.

Banks were buyers of three months' D.A. bills at 1s. 6 7/32d., for the third month and 1s. 6 9/32d., for the fourth month.

Interbank call money quoted ½ percent, with no takers.

Firms' money for call and short quoted ½ percent; and for one month to four months ½ percent.

(Continued from page 1049)

Calcutta during May were again heavy, being estimated at 6,62,000 B-s against 2,75,000 for May last year. This brings the season's total arrivals up to 88,22,000 B-s as at 31st May, against 99,27,000 B-s at the same date last year. Conditions in the mofussil have continued favorable and the crop generally is making good progress though Northern Bengal and one or two stations on the Eastern side again report too much rain. New Crop is not on offer for sale to any extent, the quotation for European packing Middles and Bottoms being Rs. 11-8 and Rs.9-8 respectively.

Jute and Jute Manufactures

(From Our Correspondent)

Calcutta, 5th June.

It is understood that the acute shortage of ready Hessians has been receiving the attention of the Jute Mills Committee this week, but so far as can be ascertained, no practical step has yet been decided on to overcome the difficulty. Rumours have been freely circulating that working hours for hessian looms would be increased to 50 or 54 per week as from the 1st of July, while Sacking looms were to be left on the 45 hour basis. This might not be altogether practical from a working point of view and it is to be assumed that as many sacking looms as possible have adready been switched over to Sandbag cloth or other narrow hessians. The Stock position as shown by the 31st May figures is not materially worse than a month ago. Hessian stocks are slightly higher at 2001½ lakhs, excluding Sandbags, as against 1929 lakhs at 30th April. Sacking stocks are slightly lower by 18 lakhs at 1602 lakhs, and as this is probably rather more satisfactory than was expected, it would appear that the Committee has decided to let the matter ride till the end of this month when it will be again reviewed in the light of the Stock Figures then. Meantime the ostensible working hours for July will stand at 45, but it may be borne in mind that the Committee are empowered to increase working hours immediately in case of necessity. Only in the case of a decrease is a month's notice necessary. The stocks of 8 oz/ 40 hessian cloth show a further diminution from nearly 103 lakhs yards to 95½ lakhs. This is of course the root of the trouble—not enough Delivery Order goods to cope with the speculative requirements of the Bazar, who have had to turn also to eleven porters to find more gambling counters.

Another matter which has been engaging Committee's attention is the question of a continuation of controlled prices after 30th June, when the existing agreement lapses. No lead has been given as to the Committee's own views on the subject, but member Mills have been sounded to get the opinion of the industry in general. Owing to the superficial appearance of success which has attended the policy of controlled prices, it is unlikely that the Bengal Government would willingly relinquish it altogether, but there are factors which ought to be kept in mind in coming to any decision. Primarily, it is strongly held in many quarters that, if a minimum price is justified then there ought also to be a maximum price, if there is to be a fair deal all round. It has been blatantly demonstrated recently in the case of hessians that **somebody** is being soaked under the current policy. Furthermore, it cannot be denied that the present system appears to have been arrived at by purely arbitrary methods. If control were to be fair and at the same time effective, a price system on a tonnage basis, taking into consideration the cost of the raw material and adding manufacturing costs and a moderate margin of profit could scarcely be cavilled at. It might not be a glove fit for both " A " Group Mills, But neither is the present system, and the tonnage basis would tend to remove the reproach to the ransom prices which have permitted to come into existence lately. Also it is to be assumed that the experience of the past year will enable the Mills Committee to judge the required production with a greater degree of accuracy, so that necessary adjustments may be made in anticipation, before the situation becomes acute.

From the Government point of view, I should like them to make careful enquiry as to how much the price control policy actually benefited the cultivator, in whose interest it was mainly designed. I am afraid that candid enquiry would reveal the fact that the middleman jute dealer and the manufacturer actually gleaned far more benefit than the cultivator. While the price control was superficially effective in Calcutta, there was a long period when only a pale shadow of the Calcutta price for jute was available in upcountry markets. The margin was divided more or less equally between the Jute Dealer, who buying cheaply, could afford to give away a good deal in quality and the Mills who, for the standard prices they paid, received quality probably a grade at least higher than that price was supposed to represent. Even lately, since prices in the mofussil went up, it is problematic whether the cultivator has got much benefit, so much of the remaining old crop jute being now in the hands of beparies and other middlemen. So while superficially the price control policy has an appearance of success, it is questionable how much of the benefit has actually reached the primary producer.

The only reaction which has so far appeared to the Special Officer's letter to the Mills Committee on the subject of Jute Standards has been a request to the **adhoc** Sub-committe, whose recommendations were completely ignored last September, to arrange to meet regularly to maintain control over the stablity of standards. In the circumstances a retro-sisyphean job indeed!

The Export Jute market has not produced any great turnover of business but sellers of the better grades of white jute and of all grades of Daisee and Tossa have been extremely reserved, with quotations advancing sharply in consequence. Dundee Daisee assortment sold in small lots from Rs. 44 to Rs. 49 and is now held for Rs. 52. Dundee Tossa assortment similarly was marked up on small sales from Rs. 58 to Rs. 63 and at the close sellers are asking Rs. 67. Dundee Tossa 4s sold at Rs. 45. earlier. The price is now Rs. 51. Mills paid from Rs. 39 to Rs. 41 for Outport Tossa 4s. Firsts at the close quote Rs. 48 for shipment, Rs. 50 to Mills. The Fatka market has had another pretty hectic week. From an opening rate of Rs. 48-4 it was not long before Rs. 50 was passed and the price has since fluctuated between Rs. 51-8 and Rs. 54 to close at Rs. 52-12. The Clearing rate was fixed last Friday at Rs. 47-8. At the same meetting of the Board of Control, on the insistent demand of all the elements of the trade who use the Fatka market, it was agreed to open the New Crop Fatka from 1st June. Unofficial transactions were already going on in New Crop at a premium of around Rs. 5 over Old Crop, but since the official opening this premium has widened to between Rs. 9 and Rs. 10. The closing rate for September Fatka is Rs. 62-8. This premium represents a margin of Rs. 2 per maund, whereas the the rise in loose jute, except for high quality and for Tossa is from eight annas to one rupee per maund.

Loose jute has been less active and only a small amount of business has been reported with Mills at Rs. 7-4 for Indian Jat Bottoms with Rs. 7-8 paid for selected marks. District Bottoms are on offer at Rs. 6-8 without finding buyers. Full prices are occasionally recorded for good quality with Tossa ruling about Rs. 2 over white jute. Arrivals of jute into

JUTE

Calcutta, June 5.

The beginning of a new month saw the Calcutta jute revise its ideas as to prices and crop. Instead of the fear that the break of the monsoon would lead to an increase in estimates of the crop, which might on the other hand suffer damage through excessive and unwanted rain, there is a feeling that the new crop must and might be wanted soon at the official minima. It is characteristic of the market that sentiment swings both ways and the tendency since Wednesday has not been as firm as imagined previously. It is also true that prices have hardened owing largely to the reluctance of sellers to accept offers but the weather reports combined with mofussil advices have naturally stabilised the ardour of the speculators who turn to hessian and derive satisfaction from the fact that last week's advance has been well held. It is, however, suspected that there is no great desire to follow up the rise in futures. For the past two days there have not been the usual signs of an animated market and the impulse to active business has been wanting. There remains, however, the fact that the advance in prices recorded last week has been surpassed. Firm conditions have been reported on all days and sellers impressed by the rise in prices have shown no eagerness in the loose jute section. The more recent tendency is quieter as there are reports that Mills' working hours will be increased. Whereas new crop is sought after mainly because sellers are more than ever reserved, there is no eagerness to take up old crop as was done last week and the steadiness of futures alone has been a compensating feature. Only small business has been reported on most days and rates reported are Rs. 36 for Hearts and Rs. 41 for outport Tossa. There has been little doing in Dundeed or Daisee which are in short supply with Balers holding out of the market. Old crop has been sold at Rs. 7-8 per maund for Jat Bottoms showing that until lately old crop has been in some demand in spite of the reluctance of mills to take up jute at the higher prices asked. Little or nothing has been reported in Pucca Bales; there has been no demand for export and only the firmness of loose jute and hessian has sustained rates over previous levels. The advance in futures was the result of increased activity until Wednesday when a setback was noticed. Prices however finish higher on the week and the undertone remains steady June Delivery has been done as high as Rs. 52/10½- and the slipback to Rs. 51-12 is a minor occurence.

JUTE MANUFACTURES

Calcutta, June 5.

The hessian market has by all tokens for firmed after June 1st. What must be ascribed to the rise in raw jute and what is the share of speculation cannot be determined at present. It is, however, believed that the interest in 11 porters is likely to extend and profit-taking had passed off prior to Wednesday without causing anything more than a slight break. The unwillingness of sellers to offer at higher prices has helped to maintain prices, and the encomiums latterly bestowed on the Bengal Government policy engender the belief that the higher level of prices will stand. It is noteworthy that little or no harm came of the bad news from Crete. Locally sentiment is definitely hardening, and higher prices were paid for 11 porters Ready on all days. The rate improved to Rs. 26/8 on Wednesday and Rs. 20/14 was paid for October-December delivery. Nine porters by comparison are quieter though June delivery quoted Rs. 21/4 on Wednesday against Rs. 20/10 last week. The bazaar retains its faith in higher hessian, and forward rates, if a little off on Thursday suggest that the rise is more than sympathetic. Only on Wednesday did prices sag slightly, but even then, the quotations for 9 porters June was Rs. 21/8 for July-September Rs. 19/2, October-December Rs. 17/2 and January-March 1942 quoted Rs. 15/12 after rising to Rs. 16/- on Tuesday. As said previously Eleven Porters have more than stood their ground as the rate for Ready rose to Rs. 26/8 for July-September to Rs. 24/- and Rs. 20/14 for October-December delivery. Heavy Goods too have been steady throughout the week, and business was reported in Cornsacks at Rs. 36/12 for July shipment. At the beginning of the week, Heavy goods were described as steadier though business was restricted, with B. Twills standing at Rs. 35/8 for October-December and Rs. 35/- for January-March. Liverpool Twills have been risen over the week to Rs. 40/12 and Cornsacks have been taken up to Rs. 37/- while B. Twills ready command buyers at Rs. 37/-. Jute and hessian have risen together and heavy manufactures exhibit the same or greater steadiness than mentioned last week.

Total reported stocks of manufactured goods as at the end of May:—

Description	30th April Yds.	Tons.
Hessian Cloth & Bags*	25,23,49,218	63,581
Less sandbags on Govt. Account	5,94,54,641	
	19,28,94,577	
Sacking Cloth & Bags	16,20,39,767	72,058
Description	**31st May**	
	Yds.	Tons.
Hessian Cloth & Bags*	26,28,63,980	65,624
Less sandbags on Govt. Accounts	6,27,18,610	
	20,01,45,370	
Sacking Cloth & Bags	16,02,31,643	70,845

These figures include the returns of Gagalbhai in addition to those of members. The returns of Katihar and Maheswari Devi have not been received and are excluded.

*Out of the total May hessian stock 95,51,260 yds. weighing 2,122 tons represent 8 oz. 40 ins. cloth. The corresponding figures for April were 1,02,81,006 yds. weighing 2,301 tons.

RAW COTTON

Calcutta, June 5.

No change is discernible in the raw cotton market as rates up to Wednesday showed no great variation. The closure of the market in Bombay for more than one day on account of the riots has been a distinctly favourable factor since outside interest has not revived and local dealings have been necessarily restricted owing to the amendments in regulations and procedure decided upon by the Board of the E. I. C. A. about two weeks ago. The position of holders of the July-August contract is regarded as fairly strong, and 'shorts' have since beaten a retreat. Much of the improvement is in reality due to the advance in New York which has stood the test of a week. The rise in other Futures there alongside of July futures claims the attention of market observers who believe that the war will not upset the Farm programme in mind, and there is also the belief that the increased consumption at home of U. S. cotton will keep prices up even if exports to Britain are reduced by drastic control measures. Constructive views are not yet in shape, but the 'longs' have been active and bears in Bombay driven to cover previous short sales have provided a measure of support. It is certain that Broach which has been absorbed at Rs. 268/4 this week is favoured by all operators who think that Broach is the best hedge for all those who want to take up cotton. If a few jobbers are of a contrary view it is not reflected in prices. A point to mention here is that staples below ⅞" have not been neglected by those confident of India retaining a place in the export trade in cotton and also by mills who have latterly veered to the view that despite the reduced volume of exports, cotton is likely to be in demand at present prices partly because other commodity prices have risen in the last two months, and partly because the Indian cotton-grower deserves a square deal. The demand for new crop has increased owing to a desire on the part of mills to make sure of supplies, especially, where they have parted with the old crop at prices which showed a profit. There has been no marked change in regard to the April/May 1942 contract which closed at Rs. 23/12 on Wednesday whereas July/August was at a premium of over Rs. 33¼-. Oomra Futures are almost unchanged on the week standing at Rs. 178/- for July and Rs. 184/- for December at the close of business on Wednesday. The rise in New York has kept Bombay up to the mark and Bengals finish slightly higher over a week at Rs. 138/- for July and Rs.144/8 for December/January. The premium suggests that Bombay prices, except for the tightness in regard to the July/August contract and the limited supply of good staple cotton, are not out of line with the world, that is to say, New York prices. The rates for ready cotton in the Sewri Rooms kept step as was to be expected.

PIECEGOODS

Calcutta, June 5.

Though no improvement has been reported yet from Bombay the mild advance in raw cotton has made the buyers of yarn and piecegoods adhere to the view that there will not be any reaction. The shortage of imports has favoured sellers who have been able to point to the rise in replacement values and also to the upswing in raw cotton. As the riots will affect production in Western India supplies in the immediate future will not be excessive, and this by itself has led to a slight hardening of rates. Though Bombay rates suggest that no change is expected, the contraction of forward business limits the improvement. Mills are reluctant sellers and the increasing proportion of war orders to total production makes mills averse to enter into fairly distant contracts. The break of the monsoon has to some extent retarded the expansion of ready business too, but dealers continue to hope that consuming centres will show more interest next month. Stocks are not at all heavy and the greater interest evinced in Calcutta springs from the feeling that Bombay may concentrate on export orders in the near future. The anxiety to enter into contracts is again a mark of yarn dealings here with South Indian Mills securing the biggest share of the business put through. The decline in the rates quoted by a few sellers of Japanese goods has had no influence either on yarn or piecegoods, and locally prices look like firming up.

GOLD

Calcutta, June 5.

There has been no change to report in either section of the bullion market. The changes recorded in rates have necessarily favoured sellers since confidence has been restored and prices have moved upwards. The ready price on Wednesday was a few annas higher compared with the price on May 28th. And the small premium paid for the usual settlements has been maintained. The closing prices on Wednesday reflected the greatest measure of steadiness as the margins for options, after the reopening in Bombay, showed no increase while the quotations stood higher. The rate for Ready per tola was Rs. 42/6 while the price for June settlement too was Rs. 42/6. The rate for second settlement was slightly higher at Rs. 42/6/3. The premium for sovereigns was again in evidence.

SILVER

Calcutta, June 5.

The recent improvement in bullion market sentiment generally has led to a cessation of such small selling as was noticed. Whether the swing in sentiment is due to war news or other factors the Calcutta like the Bombay market has regained confidence and forward rates have risen in the last three days. The enforced holiday has apparently done the Bombay market some good while Calcutta has, as usual, followed Bombay. London rates remain unaltered and the slight hardening in gold has also influenced silver. The trend towards higher prices has been established since June 2, and the fall of one anna per 100 tolas reported on Wednesday should have no bearing. There has been a revival of interest in Bombay silver particularly from upcountry buyers and this should stabilise prices at slightly higher levels. Closing prices on a steady market on Wednesday were Rs. 62/12 for Ready silver and for the settlement on June 20 the price quoted was Rs. 62/10. For second settlement the rate was Rs. 62/9 per 100 tolas. The market is not expected to show any change in the next few days.

WHEAT

Calcutta, June 5.

The wheat market has continued to enjoy the sunshine spell originating from the termination of the Punjab market holiday. Since sentiment in the Punjab and U. P. is bullish there is no reason to apprehend that the bullish feeling will evaporate abruptly. It is currently said that war orders for flour will be large and continuous and there is also likely to be an expansion of exports. As was remarked last week the Forecast was by no means discouraging and it is only a brisk monsoon that will hold up the further improvement presaged. Stocks are known to be rising, but the demand for flour still sustains Karachi prices. Though old contracts have been liquidated at Karachi, and the Punjab is selling freely a steady tone is noticeable of late as the September contract is taken here at Rs. 4/10 and ready delivery is two annas higher on the week at Rs. 4/3. It is reported that the tendency in the local flour market too is unchanged, and the Karachi market, which displays an upward trend, is now a guide to all markets. Choice white ready is now well over Rs. 30/- per candy and the price on Wednesday was Rs. 1/6 higher at Rs. 30/13. The September contract is again higher at Rs. 31/9 in spite of profit-taking towards the middle of the week. The market reports agree in labelling the general tendency as steadier, as Karachi is essentially bullish, after a relapse into an easier tendency before the beginning of June. The spot market has recovered strength and the favourable monsoon forecast has not upset uncountry markets.

Set in the roaring intricacy of great beams and whirling masses lie those minute, vital parts of machinery we seldom see—the jewels of Industry.
Step by step improvements have come to the great Industrial plan of man. Touches have added efficiency. Insignificant adjuncts have revolutionised production methods.
And such innovations—the ball-bearings we illustrate, for example—must possess a reliable toughness able to withstand the strains and stresses of the mighty machines they are set in. In every case it is steel which is moulded and shaped to the new adjunct; steel, it is, which gives strength and vital dependability to the smallest, and most important, of mechanical part. Man has learnt to depend upon the strength of steel.

Stock Markets to-day and to-morrow

HUKUMCHAND JUTE PREFERENCE MERITS ATTENTION

THE most significant feature revealed by dealings this week has been the obvious readiness of the market to look for a measure of recovery in jute shares. This was already noticeable in the early days of the week. The rise in prices continued until Wednesday noon after which there was something like a reaction from the highest levels reached. The marking down of prices, even though it was slight, sufficed to check the buying movement. Political news with its influence on sentiment has, of course, played a certain part. The marking down of prices was due to the reports regarding the withdrawal of Allied troops from Crete and the uncertainty in the Eastern Mediterranean. It may be, that the market was due for a pause, and this would in itself account for the mild reaction which has so far taken place. In the absence of any further incentive to activity, it was natural that a profit-taking tendency should develop. The underlying tendency, however, remain firm.

* * *

The present conditions in the jute and hessian markets further emphasise and make plain the investment attractions of jute shares. The margin of profits for jute mills is most satisfactory. There is every likelihood of more widespread activity and headier advances in the jute share section. *Hukumchand Jute* preference shares have particularly good possibilities. The profits so far made by the Hukumchand Mills must make it possible for the Company to put through a scheme of capital reconstruction so that the arrears of dividends on preference shares might be wiped off, and both preference and ordinary shares placed on a dividend-paying basis from the current half-year. In the light of the probability—I may say, a certainty—of such a reconstruction scheme, I believe, that Hukumchand Jute Preference shares combine to-day the safety of a preference share and the attraction of an ordinary share. There is considerable scope for appreciation; the present price is roundabout Rs. 125; the proper price for the share is nearer Rs. 150.

* * *

Accounts of two more jute companies for the half-year ended 31st March, 1941 have now been issued and they show a marked decrease in earnings in contrast with the seven companies belonging to the Bird and Heilgers group the balance sheets of which were reviewed a fortnight ago in these columns. The aggregate profit of the two companies, namely, the Megna Mills Company, Limited and the India Jute Company, Limited, is Rs. 9,06,660 against Rs. 11,83,728 for the previous half-year.

* * *

There has been a perceptible decline in earnings of the *Megna Mills Company Limited* during the six months end March, 1941, the net profit before providing for taxation and depreciation being Rs. 5,06,718 against Rs. 8,27,274 for the previous half-year. A sum of Rs. 1,00,000 has been provided for taxation against Rs. 2,00,000 previously, while Rs. 1,46,963 (Rs. 1,50,203) has been set aside for depreciation. There is a transfer to Contingency Suspense of Rs. 2,00,000 against the same amount previously.

Commenting on the results of this Company for the half-year ended September, 1940, I remarked: "The debit balance of Rs. 5,44,908 brought in is reduced to Rs. 2,54,592. It is highly doubtful whether the Company would be able to wipe off the debit balance in full out of the earnings for the current half-year after providing for taxation and depreciation." The slight improvement in earnings for the last half-year has enabled the Company to wipe off the debit balance, bringing a balance at credit of Profit and Loss Account of Rs. 22,479 as on 30th September, 1940. In spite of the sharp decline in earnings for the period under review when compared with the previous half-year, the Company has been able to declare a maiden dividend of 5 per cent. per annum owing to the available balance enough for the distribution of the same. The amount carried forward is slightly lower at Rs. 20,995 against Rs. 22,479 brought in.

* * *

The net profit, before providing for taxation, of the *India Jute Company, Limited* for the half-year ended 31st March, 1941 shows a slight increase over the figures for the previous half-year. The net profit figure is Rs. 3,99,942 against Rs. 3,56,454. The improvement in earnings has been more than offset by the need for higher provision for taxation, being Rs. 1,10,000 against Rs. 50,000. A sum of Rs. 75,000 has been transferred to Replacement of Machinery Reserve against Rs. 1,00,000 for the previous half-year. The dividend has been maintained at 5 per cent. per annum on both the ordinary and deferred shares. The amount carried forward is Rs. 24,437 against Rs. 27,745 previously.

The balance sheet of the *Minerva Mills, Limited* for the year ended 31st December, 1940 reveals a slight decline in net earnings. The Company's operations during the year under review show a profit of Rs. 2,59,709 against Rs. 2,98,444 for the previous year. The sum set aside for depreciation on buildings and machinery is Rs. 1,30,000 against Rs. 1,75,000 previously, while Rs. 2,000 (Rs. 5,878) is written off Debenture charges and Rs. 2,000 (Rs. 4,000) is written off Underwriters' Commission Account. The dividend is maintained at Rs. 3½ per share. The amount carried forward to next year's account, including provision for taxation, is slightly lower at Rs. 44,325 against Rs. 52,402 in the previous year.

* * *

Prices for cotton manufactures began slowly to improve under the stimulus of war orders and overseas requirements during the six months ended March, 1941. Most of the mills were working to full capacity with their order books well-filled with forward contracts extending over a number of months. It is also widely known that mills are devoting a major portion of productive capacity to execute war orders. As this year is regarded as one of the best periods for the cotton mill industry in India, the prospects for the cotton mill industry are well secured.

* * *

The *Amalgamated Coalfields, Limited* has reported a decrease of about Rs. 67,039 in the net profit for the half-year ended 31st March, 1941 to Rs. 1,55,248. The decline in earnings has been mainly due to the following reasons. Costs show an increase, largely owing to the higher prices of all stores, but, unfortunately, so far there has been no corresponding advance in selling prices. Output during the half-year was also affected by labour trouble. After setting aside Rs. 57,398 (Rs. 71,429) for depreciation a sum of Rs. 12,178 (Rs. 64,975) has been provided for taxation. Though the dividend has been maintained at 15 per cent. per annum, no bonus has been declared during the half-year as against 2½ per cent. per annum in the previus half-year. The amount carried forward is Rs. 7,397 against Rs. 9,850 previously.

Demand for the class of coal produced by the Company continues to be satisfactory and a substantial contract for the year 1941/42 has again been secured from the G. I. P. Railway.

"WATCH-DOG."

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, June 6.

Without any appreciable increase in the volume of business rather firm conditions have been noticeable on the Calcutta Stock Exchange during the past week. The improvement in prices witnessed in the early days of the period under review was mainly in sympathy with the rise in values of the jute and jute manufactures markets. The rise in Howrah especially was pronounced, the quotation being at one time as high as Rs. 52/12 x.d. In sympathy with this Indian Iron touched a high of Rs. 30/10. There was a drop in the quotation to Rs. 29/8 which was the closing level for the period under review. The Stock Exchange remained closed on Thursday on account of the Hindu festival "Dasahara".

The feature of the week is the strength of the giltedged securities section. 3½ per cent. Paper is now quoting at Rs. 95/14. Terminable loans were done slightly lower, 4 per cent. 1960/70, after opening at Rs. 109/2, closed slightly lower at Rs. 108/12. 3 per cent. 1946 Defence Bonds were done at Rs. 101/14, while 3½ per cent. 1947/50 were done slightly higher at Rs. 103/1. 3 per cent. Government Paper was done at Rs. 82/7 and 3 per cent. 1963/65 at Rs. 95/4.

Money conditions have continued easy during the week and the average rate on treasury bills was maintained at 13 annas and 9 pies per cent. per annum.

Among public bodies debentures, business continued on a restricted scale. 3½ per cent. *Rangoon Municipal* debentures were done at Rs. 100/6; 6½ per cent. *Calcutta Municipal* debentures at Rs. 121/8; 5 per cent. *Calcutta Port Trust* debentures at Rs. 115/8 and 3 per cent. *Calcutta Improvement Trust* debentures at Rs. 91/4. Among industrial debentures, 4½ per cent. *Hukumchand Jute* 1st Mortgage debentures came to business at Rs. 103/8.

Business in first class preference shares has been restricted on account of the scarcity of offerings. *Kinnison* were Rs. 175, *Clive* 7 per cent. preferences Rs. 151 and *Hukumchand* Rs. 125.

Bank shares were steady with *Imperial Bank* fully paids at Rs. 1,568; Contributories at Rs. 368 and *Reserve Bank* at Rs. 103/8.

A firmer tendency has been noticeable in the cotton section. *Elgin* were noted at Rs. 20/13; *Dunbar* at Rs. 200; *Cawnpore Textiles* at Rs. 6/14 and *New Victoria* at Rs. 2/4.

Some interest was taken in the Coal section. *Burrakur* recorded a deal at Rs. 12/8 and *Seebpore* at Rs. 22/4 premium. *Equitable* came to business at Rs. 34/2 and *West Jamuria* at Rs. 28/4.

Jute shares were an active market and a longer list of transaction has been recorded every day. The improvement in prices both in jute and jute manufactures market was a favourable factor and a good rise in prices was recorded in the early days of the week, *Howrah* touching a high of Rs. 52/10 x.d. The rate, however, declined towards the close owing to profit-taking. *Howrah* closed at Rs. 51/6; *Adamjee* at Rs. 25/4, *Hukumchand* at Rs. 9, *Nuddea* at Rs. 56/12, *Anglo-India* at Rs. 329, *Gourepore* at Rs. 676 and *Ganges Manufacturing* at Rs. 269.

The Committee of the Indian Jute Mills Association at their special meeting held yesterday agreed that, even though there were favourable shipping prospects for June, it would be unwise to rely on these to the extent of now declaring longer working hours for July. Accordingly, for the month of July the Committee's present decision is that there shall be no "closed week" and tha the hours of work shall continue at 45 per week. Should, however, the prospects in June shipping be realised, the Committee will, at the end of this month, consider whether any increase in hours should be immediately brought about in July and will also pay attention to the position in the succeeding months of August and September.

In the Engineering section, *Indian Iron*, after opening at Rs. 29/15, improved to Rs. 30/10 at one time, but the closing level was slightly lower at Rs. 29/9. *Steel Corporation* are now Rs. 18/2 after being done higher at Rs. 18/15. *Hukumchand Steel* ordinaries were Rs. 11/12; *Indian Standard Wagon* Rs. 62/14; *Saran* Rs. 6/6 c.d. and *Kumardhubi* preferences Rs. 124.

Among Utilities, *Mirzapur Electric* were done at Rs. 3/12 and *Rawalpindi* at Rs. 25/6.

There is little activity in the Sugar section. *Purnea* were noted at Rs. 6/4; *Buland* at Rs. 15/12 and *Murree Brewery* at Rs. 14/6.

Tea shares met with fair enquiry. *Amlukie* were placed at Rs. 68; *Sonai River* at Rs. 15/12, *Patrakola* at Rs. 905 and *North-Western Cachar* at Rs. 235.

In the miscellaneous section, *Titaghur Paper* were a quite good feature at Rs. 18/4, the closing rate being slightly lower at Rs. 18/2. *Burma Corporation* and *Indian Copper* were steady at Rs. 4/7 and Rs. 2 respectively. *India Paper Pulp* were dealt in at Rs. 142; *Indian Cables* at Rs. 20, *Dunlop Rubber* at Rs. 40, and *Indian Rubber Manufactures* at Rs. 27. *India General Navigation* were crossed at Rs. 89. *Alkali and Chemical* ordinaries turned firmer at Rs. 16.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, June 5.

Money: There was no change in the money market during the week under review and the rate for call money continued to be quoted at ¼ per cent.

Exchange Market: The sterling-exchange market continued to be steady. Banks were selling T. T. at 1s. 5 15/16d. and buying three months' bills at 1s. 6 7/32d.

Securities: Except for a small rise in the price of 3½ per cent. Paper the local securities market kept dull during the week under review. 3½ per cent. Paper, after opening at Rs. 95/14, improved slightly to close at Rs. 95/15. Among other loans, 1948/52 Loan changed hands at Rs. 97/8; 1951/54 at Rs. 99/14; 1963-65 at Rs. 95/1; 1947-50 at Rs. 102/12; 1960-70 at Rs. 108/15; 1955-60 at Rs 112/10 and 1945-55 at Rs .110/14.

Shares: The local share market opened fairly steady after a week's forced holiday owing to communal disturbances in the city. On reopening, the market presented a fairly steady tone and prices recorded moderate gains. The withdrawal of the Allied forces from Crete and the uncertainty in the Eastern Mediterranean had a restraining influence on the market. Small losses were recorded in prominent scrips owing to some selling pressure. Later on, however, the selling pressure was comparatively small and all the losses were soon recovered. Textiles met with good demand. The closing tone was firm. The share market remained closed on Thursday owing to the death of a member.

Textiles: Cotton mill shares were in good request. *Simplex* met with some speculative support and were done higher at Rs. 117/8, the closing level being slightly easier at Rs. 114 owing to profit-taking. *Bombay Dyeing*, after opening at Rs. 1,016/4, touched Rs. 1,032/8 in mid-week, but the close was slightly lower at Rs. 1,028/12. *Central India* were done at Rs. 268; *Century* at Rs. 401; *Colaba* at Rs. 165/8; *Gokak* at Rs. 199; *Kohinoor* at Rs. 409 and *Swadeshi* at Rs. 277. In the cash list, *Minerva* were marked at Rs. 81. The Minerva mills, Limited has maintained the dividend at Rs. 3½ per share for the year ended 31st December, 1940. *E. D. Sassoon* met with fresh buying enquiry and were done upto Rs. 1/8/9.

Hydro-electrics: This section was dull with *Andhra Valley* at Rs. 1,640; *Tata Hydro* at Rs. 177 and *Tata Pwer* at Rs. 1,560.

Steels: Steel shares opened with *Tata* ordinaries at Rs. 360 and the deferreds at Rs. 1,847/8. In mid-week there was some speculative buying and the deferreds went upto Rs. 1,885. The rate, however, drifted lower owing to some liquidation and the closing rate was Rs. 1,865. The ordinaries, after touching Rs. 366, closed at Rs. 362.

Banks: Bank issues remained steady with *Central Bank* at Rs. 44/12 and *Bank of Baroda* at Rs. 107/8; *Bank of India* at Rs. 142; *Imperial Bank* fully paids at Rs. 1,551/8; contributories at Rs. 385; *Reserve Bank* at Rs. 104/4 and *Union Bank* at Rs. 6/8/6.

Miscellaneous: *Bombay Burma Trading* touched a high of Rs. 482/8 in mid-week, but closed slightly lower at Rs. 462/8 on profit-taking. *Associated Cement* fluctuated between Rs. 138/4 and Rs. 140/4, closing around Rs. 139. *Belapur Sugar* were at Rs. 204/8; *Shivrajpur Syndicate* at Rs. 30; *Premier Construction* at Rs. 87/8 and *Scindia Steam* at Rs. 19/11. *Tata Chemicals* met with buying equiry at Rs. 12. *Indian Iron* changed hands at Rs. 29/13 and *Steel Corporation* at Rs. 18/4. *New India Assurance* were better at Rs. 43.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, June 5.

The local market opened dull with buyers showing very little interest. Good enquiries were, however, seen for cotton mill shares. Among planting issues, Teas were neglected while price movements in Rubber shares were irregular.

Securities: The securities market continued to be steady, 3½ per cent. paper quoting at Rs. 95/14. Among other loans, 3 per cent. 1963/65 met with business at Rs. 95/1; 3 per cent. 1951/54 at Rs. 99/13 and 4 per cnt. 1943 at Rs. 104/4. State Loans were in demand, but sellers were scarce. 6½ per cent. 1941/51 *Mysore Loan* were on offer at Rs. 102. The Mysore Government has already notified that this loan will be fully redeemed on 1st November, 1941, and the interest will not accrue on this loan thereafter. 5 per cent. *Cochin Loan* had buyers at Rs. 105/8. Among Provincial Loans, 3 per cent 1952 *Assam Loan* came in for business at Rs. 96/7 and 3 per cent 1952 *United Province* at Rs. 97/15.

Mills: *Buckingham & Carnatic* were steady at Rs. 240, while *Madura* were slightly better at Rs. 36/4. There were a few sellers for *Vasanta* at Rs. 113/12.

Utilities: *South Madras Electric* ordinaries met with buyers at Rs. 13 c. d. *West Coast* had buyers at Rs. 5/8 and *Salem-Erode* at Rs. 10/12. *Madras Telephone* were in request at Rs. 15/4.

Plantations: Rubber shares were more or less unchanged in prices. *Cochin Malabar* came in for business at Rs. 6/12; *Coorg* at Rs. 30 and *Thirumbadi* at Rs. 1/14. Among Tea shares, *Highland Prduce* were on offer at Rs. 28/12 x.d. *Peermade* changed at Rs. 27/8 and *Periakaramalai* at Rs. 17/4.

Sugars: *Mysore Sugar* continued to be on offer at Rs. 53, while *Travancore Sugars* closed a shade easier at Rs. 13/12.

Miscellaneous. *Mysore Paper* met with enquiry at Rs. 13/12. *Mysore Lamp* met with sellers at Rs. 9/2. The balance sheet of this Company reveals a decline in the net profit for the year ended 31st December, 1940. There has been a repetation of no dividend. *Singareni Collieries* met with business at Rs. 9/12, while *Mysore Chemicals* remained unchanged at Rs. 16/8 and *Indian Steel Rolling Mills* ordinaries at Rs. 7. *India Nut* were available at Rs. 2/12. *Andhra Cement* were steady at Rs. 66.

LONDON STOCK EXCHANGE

THE acceptance of the usual Whitsun holiday undoubtedly marks the return of poise to the London Stock Exchange. If interest has not broadened, it must be put down to the Cretan episode and the renewed fears regarding German infiltration in Syria. Since the beginning of the week, there has been a setback in stores shares explained by the introduction of rationing of clothing in Britain. The fall in Marks and Spencers' 5 shilling shares to 30-4½ will evoke as much interest as the fall in 'Bats' caused by the announcement of a lower interim dividend. The Iraq situation has led to a hardening of Anglo-Iranian which went up to 27/6 and has receded only slightly since. Steadiness still characterises British Funds and the movements in gilt-edeged have favoured holders although 3½ per cent. India stock gave way to 98¾. But the belief that the 5 per cent. Australian Loan may be repatriated does not wholly account for the maintenance of the price at 104½. Dealings on Thursday reflected the prevailing obscurity and complexity of views and the lack of support for gilteged and industrials claimed attention. Rubber shares over a week tended to harden, but gold minings appeared to be off colour. More support was in evidence for Oils ordinarily and Attock continued steady at 35/-. The narrowness of movements in Home Rails pointed to a further contraction of demand and the only good feature of the week ended Thursday has been the striking steadiness of gilts with Old Consols standing at 78⅜ and new War Loan at 100 ⅜. The slow climb in 'Emmies' stands out in a generally dull Industrial market and firm spots have been found in Dunlop Rubber and I. C. I. also exceptionally in Courtaulds.

It's a Fact—

that three simple factors govern the acquisition of financial security—forethought, thrift and regularity.

If you open an account with the Palai Central Bank TODAY, live within the limits of your income and save the surplus regularly each month —you are on the road to permanent prosperity.

NEW YORK STOCK EXCHANGE

On most days Wall Street is reported to have opened dull. The main reason is the obscurity of the outlook which has seriously restrained the expansion of investment interest though steadiness in prices has been a distinctive feature. The slightly firm tendency of the leaders may be both the cause and effect of the firmness developed by the commodity markets. The limited interest shown by the New York Stock Exchange is attributable to the fears regarding additions to taxation, though the promise of Mr. Morganthau that new taxation would be limited to 3½ billions may encourage some to take a more constructive view. The mild revival in U. S. Steel after the week-end will attract more than usual interest as the steel industry is War Baby No. 1. The reaction in leading industrials had spent itself before the week, and opening prices on Thursday were $37⅜ for General Motors Common stock and $ 54 for U. S. Steel Common. The Preference shares appeared to find greater support as the quotation is high as $117¼.

THE CENTRAL PROVINCES RAILWAYS COMPANY, LIMITED

NOTICE

NOTICE is hereby given that an Adinterim dividend for the half year ended 31st March 1941 at the rate of 3½% per annum, less Income Tax has been made payable at the Chartered Bank of India, Australia & China, Bombay, on and after the 16th June 1941 to those Shareholders whose names stand in the Company's Register on the 31st May 1941 to whom Dividend Warrants will be posted.

Intimation of any change of address should be given to the undersigned immediately.

By Order of the Board,

KILLICK, NIXON & Co.,
Agents.

Home Street, Fort,
Bombay, 28th May, 1941.

BOMBAY TELEPHONE COMPANY LTD.

NOTICE

NOTICE is hereby given that the Debenture Stock Transfer Register and the Register of Debenture Stockholders of the above Company will be closed from the 17th day of June 1941 to the 30th day of June 1941 (both days inclusive) for preparation of interest warrants.

A. L. TERRY,
Assistant Secretary.

Bombay, 2nd June, 1941.

THE BHAGALPUR ELECTRIC SUPPLY CO. LTD.

The Annual Ordinary General Meeting of the Shareholders will be held at the Office of the Company's Managing Agents, No. 14, Old Court House Street, Calcutta, on Monday, the 23rd day of June, 1941, at 3 P.M., for the following purposes:—

(1) To receive and pass the Directors' Report and the audited Accounts for the year ended 31st December, 1940.
(2) To declare a dividend.
(3) To elect a Director in place of the retiring Director.
(4) To elect Auditors for the ensuing year, and to fix their remuneration.
(5) To transact any other business that may be brought forward.

The Share Register of the Company will be closed from 14th June 1941 to 23rd June 1941, both days inclusive.

OCTAVIUS STEEL & CO. LTD.
Managing Agents

Calcutta, 4th June 1941

THE SOUTH MADRAS ELECTRIC SUPPLY CORPORATION, LIMITED

NOTICE

Notice is hereby given that the first Ordinary General Body Meeting of the Company will be held at the Office premises of the Corporation at Tennur Railway Road, Trichinopoly at 4 P.M. on Saturday the 5th July 1941 to transact the usual business.

The Board of Directors have recommended for payment to the Shareholders a tax-free dividend of 3½% on the Ordinary shares, of 2½% on the First Preference shares and of 2½% on the Second Preference shares for the second half-year ended 31-3-1941, making up 6½% per annum on Ordinary shares and 5½% per annum on Preference shares for the whole year.

The dividend warrants will be despatched during the second week of July, 1941 to the shareholders standing registered in our books as on 20-6-1941.

The share transfer books of the Company will be closed from 21st June 1941 to 5th July 1941 (both days inclusive).

MARKET POINTERS

Mills' Working Hours in July

As "complete uncertainties" in the shipping position render it impossible for a definite statement of the mills' intention regarding working hours for any length of time ahead, the Committee of the Indian Jute Mills Association at a special meeting in Calcutta yesterday agreed that, even though there were favourable shipping prospects for June, it would be unwise to rely on these to the extent of now declaring longer working hours for July. Accordingly, for July the Committee's present decision is that there shall be no "closed week" and that the hours of work shall continue at 45 per week.

Should, however, the prospects in June shipping be realized, the Committee will, at the end of this month, consider whether any increase in working hours should be brought about in July, and will also pay attention to the position in the succeeding months of August and September.

* * *

Bengal Telephone Shares

In connexion with the Government of India scheme for the purchase of the shares of the Bengal Telephone Corporation Ltd., the majority of the shareholders, it is understood, have agreed to sell at the prices offered by the Government.

* * *

Bombay Telephone Company, Limited

The Committee of the Bombay Shareholders' Association, after full consideration of the offer for purchase of the Bombay Telephone Company shares by the Government Telephones Board, have come to the decision that the offer is in the best interests of the shareholders to accept. The committee understand that the Telephones Board will make payment as soon as acceptances have been received from shareholders holding 75 per cent. of the shares issued.

* * *

Ford Companys' Record Output

The Ford Motor Company of India, Bombay, in May produced the largest number of vhicles in any single month in their history, exceeding the previous record made in January, 1941, by 130 vehicles, practically the entire output being for Army use.

* * *

Rice stocks in Madras

The position in regard to stocks of rice is satisfactory except in one or two places. More than 60,000 tons of rice from Burma have reached the Malabar ports since February 20 and more is on its way, says a Press Note issued by the Government price control in the Presidency. District Collectors have been asked to watch the state of supplies and the movements of stocks.

* * *

B. B. & C. I. Railway

The approximate traffic returns of the B. B. and C. I. Railway for the week ending May 20, last amounted to Rs. 43,25,000 as against Rs. 41,47,000 for the corresponding period last year.

* * *

Telephone Companies' Shares

The Government Telephones Board, Ltd., have been active during the week in connection with the acquisition of the Bengal Telephone Corporation, Limited, with whom Sir Gurunath Bewoor, Director-General of Posts and Telegraphs, and Mr. M. K. Sen Gupta, Financial Adviser, Communications Department, Government of India, have been negotiating. It is understood that the offer made to the shareholders of the Bengal Telephone Corporation Limited is to purchase all the shares of the Company, the Preference shares at Rs. 12-4 per share and the Ordinary shares at Rs. 19-7 per share. These prices are subject to the deduction of all dividends declared payable after 31st January, 1941, in respect of such shares, and do not bear interest. The Board have made this offer conditional on the scheme being approved by not less than 75 per cent. of each class of shareholders, and it is understood that the majority of shareholders are agreeable to close with this offer.

Simultaneously comes a Press statement from the Bombay Shareholders' Association, who have been considering a similar offer made to the Bombay Telephone Company, Limited, intimating that after consideration of all the details and consultation with the Chairman and Managing Director of the Company, it has decided that the offer is one which it is in the interests of shareholders to accept.

Indo-Japanese Trade

Indo-Japanese trade for the year ending 31st March, 1941, reflects the general shrinkage of India's export and import trade effected by the war. During the year the value of India's exports of raw cotton to Japan dropped by Rs. 370 lakhs. In the preceding year Japan, the best customer for Indian raw cotton, had reduced her takings from 1,211,000 bales to 1,056,000 bales, but the total imports of raw cotton into Japan from all sources showed an increase from 533,000 tons in 1933 to 596,000 tons in 1939, of which India accounted for about 34 per cent. Japan is obviously replacing Indian cotton by cotton from other sources.

The net imports of Japanese cotton piecegoods into India dropped in value by Rs. 216 lakhs during 1940-41. The imports of grey unbleached dropped by Rs. 50 lakhs, of white printed and dyed textiles by Rs. 28 lakhs. Of these, goods worth Rs. 60 lakhs were re-exported. During 1939-40 the decrease of imports from Japan was mostly confined to white goods also.

CHANGE OF ADDRESS

ON AND FROM JUNE 1, 1941, THE OFFICES OF "INDIAN FINANCE," AND "INDIAN AFFAIRS," HAVE BEEN REMOVED TO PREMISES NO. 128-A DHARAMTOLLA STREET, CALCUTTA.

THE TELEPHONE NUMBER CAL. 3624 ——WILL REMAIN THE SAME——

MANAGING EDITOR

Audited Accounts for the half-year ended 28th February, 1941:—

	Rs.	a.	p.
The balance available for appropriation after the inclusion of the amount brought forward from the previous half-year is	73,679	10	3
Out of which the directors recommend the payment of a dividend at the rate of 17½% per annum, free of income tax, absorbing	68,906	4	0
Leaving to be carried forward	4,773	6	3

Sales.—During the period under review labour disputes and strikes at several large consuming centres served by the Collieries adversely affected demand.

The Collieries themselves experienced a strike in December, though fortunately of short duration, since when the labour position has been normal.

In spite of increased costs due to the greatly enhanced prices for all classes of stores and material, there has been no advance in coal prices owing to the keen competition from other fields.

These adverse factors are all reflected in the output figures and profits for the half-year.

Managing Agents:—Messrs. Shaw Wallace & Co.

Authorised Capital—Rs. 12,00,000. Issued and Subscribed—Rs. 7,87,500 in 78,750 shares of Rs. 10, fully paid up.

IS IT NOT WISE TO INSURE NOW?

With an uncertain future ahead Conservation and Consolidation of resources are the prime needs every individual should assiduously strive after.

If you already have Life Insurance, hold on to it. Don't allow it to lapse. If you haven't go in for it right now. A Life Policy gives an inestimable protection and it will cost you less now than later. It is cent per cent true that to be forewarned is to be forearmed.

Write to us for further particulars or advice.

WORLD OF INDIAN FINANCE

Friday evening.

Short credits have been slightly more usable; but this must not be understood as meaning that the rate of half-per cent for inter-bank call money was other than purely nominal. It is firms' money which was slightly more usable; and banks were definitely interested in deposits. This is quite understandable as, over the past four weeks, sales of tender Treasury Bills have been on the basis of Rs. 2 crores per week; and, at the same time, sales of tap bills have been quite substantial. Between May 14 and May 19, three months' intermediates were sold for Rs. 2,83¾ lakhs; between May 21 and May 26, for Rs. Rs. 1,76¼ lakhs; between May 28 and June 2, for Rs. 1,95¼ lakhs; and between June 4 and June 9, for Rs. 2,20 lakhs. In the last week, the market has put up as much as Rs. 4.20 crores towards Treasury Bills. That subscriptions for Treasury Bills on this are affecting the cash balances of banks is borne out by the decline in the deposits of member banks with the Reserve Bank from Rs. 29.54 crores to Rs. 26.75 crores.

On June 10, the amount of Treasury bills on offer was Rs. 2 crores. Applications came to Rs. 3,24½ lakhs as compared with Rs. 2,86 lakhs on June 3. The average rate of accepted tenders was annas thirteen and pies nine per cent per annum. This rate has remained unchanged for three weeks. The offer for next week is Rs. 2 crores. Sales of intermediate Treasury Bills will be continued.

The statement of the Reserve Bank for the week ended June 6, in the issue department discloses a considerable expansion in active note circulation in India. Active note circulation has risen from Rs. 255.18 crores to Rs. 259.70 crores, the latter constituting a record for all time. This expansion in note circulation is due to the currency expansion that has taken place against sterling securities to the extent of Rs. 5 crores. Immediately after the withdrawal of sterling assets from the issue department for payments in connection with the redemption of the dated sterling loans, sterling securities in the issue departmnt fell to Rs. 102.24 crores. Since then, there have been additions to these sterling securities from time to time. The latest figure is Rs. 118.80 crores. There has thus been currency expansion to the extent of Rs. 16½ crores against sterling securities. On account of this transfer of sterling securities for Rs. 5 crores to the issue department, foreign balances held in the banking department have declined from Rs. 40.30 crores to Rs. 36.12 crores. Ways and means advances have declined from Rs. 5½ crores to Rs. 50 lakhs. And this accounts for the steep decline in Central Treasury's deposits from Rs. 12.68 crores to Rs. 6.31 crores. Other government balances are also lower. The deposits of Burma Government have declined from Rs. 2.44 crores to Rs. 2.02 crores; those of other Governments from Rs. 4.98 crores to Rs. 4.24 crores.

The statement of the Imperial Bank in the week ended June 6 reveals that the Bank has taken up a substantial parcel of Treasury Bills. Investments have increased from Rs. 58.07 crores to Rs. 59.74 crores. As a result, cash has declined from Rs. 11.22 crores to Rs. 9.45 crores.

The event of the week is the announcement of conversion plans with respect to the 4½ per cent 1950-55 rupee counterpart and 4½ per cent 1958-68 rupee counterpart. These two loans were created in connection with the redemption of India sterling stocks. As we have shown elsewhere in this issue, the total amounts outstanding on these two loans are estimated to be Rs. 60 crores. It is quite probable that more than Rs. 50 crores are held by the Government and by the Reserve Bank. Holders of these two loans are given the option to convert into 3 per cent 1951-54 or 3 per cent 1963-65. Both these 3 per cent loans are existing securities,

TREASURY BILLS

India

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills were opened on Tuesday, June 10, 1941. The total amount offered was Rs. 3 crores, 24 lakhs and 50 thousand. Tenders at Rs. 99-12-9 per cent. and above were accepted in full and those at Rs. 99-12-6 per cent. were allotted approximately 57 per cent. Lower tenders were rejected. The total amount accepted was Rs. 2 crores, the average rate of accepted tenders being annas thirteen and pies nine per cent. per annum.

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills will be received on Tuesday, June 17, 1941. Successful tenders should make payment on Friday, June 20, 1941. Other conditions are as usual.

Three months' Intermediates will be sold from June 11, to June 16, 1941, at Rs. 99-13-0 per cent. subject to the conditions previously announced (*viz.*, sales can be stopped at any time without previous notice if Government think it necessary).

Three months' Intermediates sold from June 4 to 9, 1941, amounted to Rs. 2,20,00,000.

During the week ended June 6, 1941, Government of India Treasury Bills for Rs. 4,78,00,000 were sold in favour of the Issue Department of the Reserve Bank of India.

THE MISRA HOSIERY MILLS have, from the commencement of the war, been "on active service." Working day and night, the mills have been supplying essential requirements of the Army in the knitting line.

MISRA HOSIERY cater to the requirements of the general population and comprise socks, stockings, undervests, sports shirts, interlock underwear and outerwear, for men, women and children.

Production 8,000 Articles, daily.

Finance Abroad

Friday Morning.

To chronicle financial developments abroad is something of an impossibility at present. Little is known about the London money market which is functioning to all intents and purposes under control and more interest is raised by the City Corporation's plan to buy out ground landlords than by the bald statement that the Treasury raised another £75 million by way of Treasury Bills. It is not likely that any change will be remarked this week and allotment of tender bills at a decimal over the £1 per cent rate will be reported again. The only change disclosed last week was an increase in the volume of applications which totalled £156 millions against £145 millions previously. The increase in the volume of loanable funds is attributed to interest and other payments. The increase occurred in spite of an increase in the floating supply of bills and the plenitude of funds after the holiday suggests that the turn of the second year will be more comfortable than anticipated. The increase in call loans referred to in a cable received after the week-end may be a mark of increased investment interest and the readiness with which commercial paper was bought last week might have been due to the increase in short-term funds at the disposal of discount houses which are not likely to ask for support in view of the chronic scarcity of suitable bills apart from Treasury Bills. The increase in the buying of bills by clearing banks reported last week may be a consequence of the rise in deposits which has always accompanied a rise in note circulation. It is known that the note circulation in Great Britain has risen continuously, and the advance in the price-level is productive of further changes in wages and incomes. The absence of any incentive to spend has been reflected first in the increased volume of savings—the success of Weapons Week in London has been enthusiastically described — and secondly in the larger resources made available to banks which have got to finance the enlarged production of armaments. Changes in the Bank of England return over the last month confirmed the opinion that the banks are not likely to increase their deposits because they may be inclined to increase their six months deposits with the Treasury. These deposits bearing interest at 1¼ per cent. have been in most weeks over the £300 million mark showing that the banks are ready to help the Exchequer by assisting an increase in the short-term debt represented by these deposits. The steady expansion noticeable since the deposits came into vogue last year, has shown how banks are solving in a way the problem created by the reduced trade demand for funds. A year of **blitzkrieg** has not resulted in many changes in the financial system. The banks and the discount houses work as usual and Provincial Banks particularly the Scottish Banks appear to be very well placed. Lord Elphinstone discussed the changes at the annual meeting of the Bank of Scotland on April 1. Like English banks, Scottish banks are earning smaller profits while attracting larger deposits, and the Bank of Scotland, in maintaining a highly liquid position, has only conformed to expectations.

Reference made last week to the stability of exchange rates in London was followed by a mention of the effectiveness of control. The control seems to be complete as the New York rate for sterling is steadier than ever at 4.03½. In the absence of any change in the dollar-sterling rate, all other rates stand at the same level. The rupee in relation to all other currencies stands at the same level, and the noteworthy feature is that T.T. on New York has been always quoted at Rs. 332¾ per 100 dollars. The Japanese currency still quoted at 23.48 cents. in New York is unchanged, for Banks sell T.T. at 81½ and buy at 77¾. The buying rate for 60 days sight is 76½ and these rates indicate that there is no change for weeks or months in the exchange rates reproduced day after day in the papers. There is, however, a small change to which attention may be drawn. For a long time the rate for the Thai currency was Rs. 124 per 100 bahts then it rose to 124¼ now it is said to be 124½. The reason is not easy to find at present but it may be due to the increasingly closer relations between Bangkok and Tokyo. The only other change of any consequence is the rise in rate for Hong-Kong dollars to Rs. 84½ for 100 dollars. For a long time the rate was about 84 and the latest change may be readily attributed to the resurgence of doubts regarding the Far Eastern situation.

Reference was made here last week to the wide spread between the buying and the selling rates for certain currencies. In Bombay the quotation for Swiss francs is Rs. 126¾ per 100 francs (as compared with Rs. 128 in Calcutta) when Banks sell T.T. and Rs. 131¼ when they buy. There is a similar difference of Rs. 5 between the buying rate and the selling rate for the Swedish krone; quoted last at Rs. 123 per 100 Kroner when Banks sell T.T. and at Rs. 128 when they buy T.T. or D.D. The spread in rates is not merely the result of exchange control but of the virtual disappearance of trade bills and remittance business. By comparison with the difference of 1/16d. in the case of the buying and selling rate for T.T. on London the difference in the Bombay-Batavia rate which is 55¾ and 57½ guilders per Rs. 100 is not at all unexpected at present though the difference may appear excessive as the London-Java rate is unchanged over a long period at 7.58 to 7.62 guilders per £. There is presumably an explanation for these variations which can only be touched upon here briefly.

The main item of news this week is the report that a little over two months the U.S.A. gave 75 million dollars worth of materials under the Lend and Lease act. Aircraft alone worth over 43 million dollars were sent under the arrangement. But President Roosevelt in reporting to Congress did not omit to mention that allocations up to May 31st were vastly in excess of the value of the war materials shipped. It was stated by the President that 88 million dollars were appropriated for ordnance stores, 318 million dollars for tanks and other vehicles and 551 millions for ships. The figures show that the initial appropriation of 7 billions has been split up and only a fraction of the money provided has been spent up so far. When arms production increase is more than ever likely the President has the power to check labour trouble effectively at present.

Not much interest has been shown in the decision reported from Australia of the Commonwealth Government's ban on the collection of charitable or other funds for use in London. The ban is applicable also to the efforts of the well-to-do to help Britain in war, and the reason assigned is the Commonwealth's desire to conserve its sterling balances and not to permit any draft thereon by the remittance of periodical collections even for quite obvious and useful purposes. When reference was made to the end of the trouble in Iraq where Nuri Es Said Pasha is now again in charge of foreign policy, no mention was made of the connexions of the Eastern Exchange Banks. The Eastern Bank particularly has a large stake in the Middle East particularly in Iraq and last year Sir James Leigh-Wood in reviewing the results at the annual meeting made special mention of the improvement in Iraqi agriculture trade and finance. It may be inferred that the trouble this year would have caused only small disturbance and the Eastern Bank will have special reason to welcome the return of peace to the country.

Exchange banks which have felt the dislocation of trade and the various controls must have by no means lost their spirit of enterprise. The statement of the Chairman of the Chartered Bank of Australia issued with the report for 1940 refers to the further rise in deposits during the year and explains why cash balances have increased sharply from £6.86 millions to £11.58 million. The increase is not wholly due to the contraction in Bills of Exchange which are lower also owing to the delays in postal and shipping services. The Bank is known to have given good support to the war loans. In spite of a reduction in trade demand for funds, the profit returned is better than that for the two previous years. Mr. V. A. Grantham in examining the effects of the war on the Bank's operations referred at length to the compensatory factors. He concluded on a note of confidence which receives ample support from the latest balance sheet which discloses that total deposits were over £65 million at the end of the year.

LLOYDS BANK
LIMITED
(Incorporated in England.)

Safety

In times of uncertainty, safety of capital should be the investor's chief concern.

A FIXED DEPOSIT ACCOUNT or SAVINGS BANK ACCOUNT with Lloyds Bank gives complete security of capital.

INTEREST is allowed at rates which can be ascertained on application.

DEPENDS UPON THE STRENGTH OF STEEL

To the people of yesterday how amazing and unbelievable would appear the concrete fact that man, today, spans the sky-ways of the world. And, whether or not the heavens echo the menacing roar of bombers, or the hum of aerial argosies, it is the strength of steel which has given man his wings. It is the dependable, tested strength of this metal which has linked step to step in this scientific triumph of modern civilization.

In the years that lie ahead it is this same power which will be the basis of man's greater achievements—his higher success.

War—and Ways and Means Budget : II

In a study of the changes which war has wrought in the ways and means problems of the Central Government, what strikes one first and foremost is that by far the most far-reaching changes have occurred with respect to loans and remittances. The position as regards new borrowings has been affected by various developments. Apart from routine considerations which have to be taken into account in formulating new loan plans, the war has given rise to special factors which have had an important bearing on the size and *modus operandi* of new loans. So far as the routine problems are concerned, the first has reference to arrangements for funds in respect of maturing loans. In 1940-41, the 5 percent 1940-43 loan was repaid on the earlier option date; and the amount required for the purpose was Rs. 20 crores. In the current year, the 3 percent 1941 loan is to be paid off; and Rs. 10½ crores will be required for the redemption.

The second routine problem is connected with the funds required for capital works, if any. In connection with the expansion of munition factories and with the mechanisation of the Army, India has had to incur expenditure which may, in a large sense, be considered capital expenditure. As the tenor of defence expenditure is hardly foreseeable in advance, and as the military budget in the peculiar conditions of this war has to be determined by developments and expectations from time to time, it is not possible to give any accurate estimate of the amounts which the Finance Member is being called upon to provide for what we have described as military capital expenditure. Other capital expenditure has been kept under strict control.

We now turn to other-than-routine developments which, as connected with the war, have relevance in new loan planning. In the first place, the Finance Member has to make up by borrowings what he could not raise by way of taxes for balancing the budget. In other words, budget deficits have had to be covered by loans. It was a welcome surprise that 1939-40 closed with an unexpectedly large surplus. It was also a pleasant surprise that the deficit for 1940-41 according to revised estimates turned out to be less than the original estimate. The anticipated deficit in 1941-42 is, naturally, higher. Taking the three years together, it may be said that the amount needed to be raised by loans as against the deficit of the three years is approximately Rs. 20 crores.

In the second place, a most adverse development in the ways and means position was the colossal withdrawals from postal savings banks' accounts and colossal cashings of postal cash certificates, which took place a year ago on account of general panic. The ways and means position was adversely affected to the extent of Rs. 20 crores by these withdrawals. Defence savings certificates, which were subsequently introduced, have not proved popular; and we are nowhere near realisation from these certificates making up for the withdrawals in postal savings accounts. Since the defence savings certificates were made available, the Government have been able to secure only Rs. 2.80 crores from this source. This means that the adverse developments with respect to postal savings accounts had to be rectified by recourse to large borrowings in the form of new loans.

In the third place, the Government of India have been making payments in respect of purchases made by them for the British Government and in respect of other commitments incurred on account of the British War Office; these payments are being made from time to time, and there is a lag between payments by the Government of India and reimbursements from the British Treasury. This question was discussed at some length in the money market section in last week's issue of *Indian Finance;* and the conclusion stressed in that context was that the working capital required by the Government of India for doing their agency work for and on behalf of the British Government was of the order of Rs. 15 crores. In simple terms, in addition to the usual minimum cash balance which the Government of India have been maintaining, they have to be prepared for calls up to Rs. 15 crores at any one time on account of the British Government.

It will thus be seen that the funds to be raised from new loans were as follows: (1) Rs. 30½ crores in respect of maturing loans; (2) an unspecified amount for military capital expenditure; (3) Rs. 20 crores for budget deficit; (4) Rs. 20 crores for withdrawals from postal savings accounts; and (5) Rs. 15 crores for the agency work of the British Government. The total is roughly Rs. 100 crores.

The first defence loan fetched for the Government Rs. 44.86 crores. The second defence loan, which is still available through the tap, has so far realised Rs. 7.63 crores. Interest-free defence bonds account for Rs. 2.39 crores. From post office 10-year defence savings certificates, Rs. 2.80 crores have been secured. The grand total is Rs. 57.69 crores. The 3 percent second defence loan continues to be on offer on tap; and it is reasonable to expect that the average monthly realisations will be of the order of Rs. 2 crores.

The Government have been helped by two important windfalls. Owing to the heavy public demand for rupee coin from the Reserve Bank, it was found necessary to introduce one rupee notes. These one rupee notes are not banknotes but Treasury notes. By delivering such one rupee notes and, perhaps, rupee coin from their stock of surplus silver to the extent of Rs. 12 crores, the Central Government have been able to secure funds for a corresponding amount. During the war period, the Government were also able to issue *ad hoc* Treasury Bills to the Issue Department of the Reserve Bank and raised Rs. 11½ crores by this means. It may also be observed that, while in the years immediately preceding the war, the Reserve Bank was in a position to return rupee coin to the Treasury and

demand *ad hoc* Treasury Bills in their place, the position has been reversed since the war began. Far from having to increase the floating debt, the Central Government have been able to reimburse their cash balances by delivering one rupee notes or rupee coin to the Reserve Bank.

By all these methods, the Central Government have been able to secure funds to the extent of Rs. 81 crores. Assuming that the second defence loan will be continued for some time, it should be able to provide, say, Rs. 9 crores. This means that, against a requirement of Rs. 100 crores, Rs. 90 crores has been comfortably provided for. At the moment, the ways and means machinery is functioning in the smoothest manner imaginable. Treasury Bills in the hands of the public are roundabout Rs. 35 crores, which was also the figure of Treasury Bills outstandings at the beginning of the war. Though the Government had to take a large-sized ways and means advance for Rs. 16 crores from the Reserve Bank in the last week of March, the entire advance has now been liquidated. For three months short-term accommodation, the Government are paying only about annas 14 percent per annum. It is a most creditable achievement that the various adverse developments in the ways and means position have been quickly and effectively tackled, with the result that the ways and means machinery is functioning to-day without the slightest hitch or friction.

There is another important development in new loan plans arising from the redemption of sterling loans. The redemption of sterling loans is best studied with reference to two important stages. In the first stage, the Government were buying sterling securities in the open market in London and selling rupee counterparts in India through the tap. Sterling loans purchased in this stage were about £24 millions; and the rupee counterparts issued in India came to Rs. 32 crores. So far as these particular transactions were concerned, no question of a new loan arises; for, the position has been adjusted by sale of rupee counterparts from time to time.

New loan planning is an important consideration only in the second stage of sterling debt redemption. During the latter stage, the good offices of the British Government were secured to get all the dated India sterling stocks repaid last March. The total of these loans was £90 millions. This is equivalent to Rs. 120 crores. The sterling loans in question have not yet been fully paid off, as some of the holders of these loans are not subject to the rules issued by the British Government and the Indian Government under the Defence Act. The present position is that sterling stock for a total face value of £69,628,300 has so far been redeemed, being made up of

5	percent stock	1942-47	.. 4,759,200
4½	,,	,, 1950-55	.. 29,534,800
4½	,,	,, 1958-68	.. 12,253,700
4	,,	,, 1948-53	.. 8,289,600
3½	,,	,, 1954-59	.. 7,630,300
3	,,	,, 1949-52	.. 7,160,700
		Total	.. £69,628,300

Against the cancellation of sterling stock for £69.63 million, rupee counterparts have been created for a total face value of Rs. 92.84 crores of which Rs. 12.52 crores were delivered to the public and the balance divided approximately equally between the Government and the Reserve Bank. There are thus six rupee counterparts that have been created; and the Government realise that this was only an interim measure and that the position needs to be simplified. The final proposals for effecting such simplifications were announced at the beginning of this week. In deciding the permanent arrangements, the Government have had two ends in view: "Firstly to reduce as far as possible the stock of counterparts bearing a high nominal rate of interest; and, secondly, to leave a sufficient volume of counterparts to maintain marketability in the interest of those who have accepted payment of sterling loans in this form. They have also taken into consideration the improbability of the market being able, within a reasonable period of time, to absorb as much as Rs. 80 crores of counterparts and the possibility of the continued retention of surpluses judged unsaleable acting, to however limited an extent, as a depressing factor on the market." In pursuance of these objectives, the Government have offered, in the first place, conversion terms to holders of 4½ percent 1950-55 rupee counterpart and 4½ percent 1958-68 counterparts.

The holders of these loans are offered the option to convert into 3 percent 1951-54 or 3 percent 1963-65. The total of the two 4½ percent loans as created in connection with the recent sterling debt redemption is Rs. 56 crores. Rupee counterparts of these two loans had also been created in the first stage when sterling securities were bought in the open market in London and cancelled. The total stocks issued on that occasion must be in the neighbourhood of Rs. 6 crores. That is to say, the conversion plan now announced affects a total of Rs. 60 crores in the two 4½ percent loans. It is quite probable that anything like Rs. 50 crores are held between the Government and the Reserve Bank. We may, therefore, take it as certain that there will be hardly any 4½ percent loan left unconverted. To the extent that sterling debt redemption resulted in the creation of 4½ percent loans for Rs. 60 crores, there is no problem of a new loan issue. The final proposal carried out in this connection envisages their conversion into 3 percent stocks and their continued retention, for some time, in the hands of the Government and of the Reserve Bank.

Other rupee counterparts created in respect of the redemption of the dated sterling loans are also to be dealt with under the arrangement now decided upon. We understand that part of the 3 percent, 3½ percent, 4 percent and 5 percent rupee counterparts recently created will be cancelled. So far as the Government are concerned, the cancellation should not affect them in any way as the rupee counterparts which fell to the share of the Government are being held as part of Treasury balances. So far as the Reserve Bank is concerned, it has to be assumed that, in the place of such rupee counterparts as are cancelled, *ad hoc* Treasury Bills will be handed over to the Bank.

From the wording of the two notifications issued early this week, we are led to believe that the arrangements now proposed are final. If this be so, we may infer that the authorities will be in no hurry to sell from their stock of rupee counterparts or of the loans into which some of them are being converted. At the same time, as and when market conditions allow it, the authorities will be slowly reducing their holdings in these scrips.

With the other changes in the ways and means budget as a result of the war, we hope to deal in the next issue.

EVIDENCE of a valuable nature as to the recovery in customs revenue and in general import trade, is forthcoming in the trade returns for British India for the month of April. If imports are lower in the value than in April 1940, their value exceeded that of any other month of 1940-41. The striking recovery in imports and its effects on customs revenue have been already adverted to. But the more important feature of wartime, that monthly changes are irregular and often too wide has to be considered. The point has a special bearing on the export trade. The total value of exports of Indian merchandise in April amounted to Rs. 11.41 crores, or taking re-exports into account the value was Rs.12.1 crores. The wide disparity between imports and exports would prompt disquieting reflection, but the preliminary caution that the month-to-month fluctuations are no safe or certain guide as to trends must be remembered. The export trade is handicappd by the shortage of freight, and the difficulties of shippers are reflected in the contraction in the export trade. A comparison with the figures for April 1940 might suggest that India's export have fallen by over 40 per cent since the totals of Rs. 19.51 crores and Rs. 12.1 crores are too far removed. At the same time, it may be suggested that imports have held up very well as they totalled Rs. 16.96 crores against Rs. 17.32 crores in April, 1940. The major trend established since June last is equally unfavourable to imports and exports, and the only point that may be usefully made here is to draw attention to the fluctuations in the value of the rupee in April. A temporary adverse balance of trade in that month compelled the Reserve Bank to come out with Reverse Councils. An observer unimpressed by the fall in exports would say that the weakness developed out of the debt repatriation scheme and the operations of the Reserve Bank were warranted by the circumstances.

Exports to the U. K. in April 1941 were valued at Rs. 2.67 crores against Rs. 6.26 crores in April 1940. The fall under imports was of the order of Rs. 34 lakhs only. A more important consideration is that never had there been adverse balances in succession. In March, too, imports into India exceeded exports, and the fluctuations in the exchange rate were indicative of the fact that India's balance of payments was not altogether favourable, though this need not be qualified by any reference to the fact that imports from the Empire excluding Canada in April valued at Rs. 8.53 crores were in excess of exports to the Empire which were valued at Rs. 5.96 crores. The beginning of April saw changes in the buying and selling rates for sterling though few cared to relate them to the vast changes that are recorded in the April trade returns.

Trade with Europe

A look at the tables showing the direction of trade suffices to show that trade with Erope has disappeared except for total exports to European Turkey which at Rs. 88,132 represents the entire trade with the Continent. This, of course, is the result of war, though not of any artifical diversion of trade caused by proclamations relating to enemy occupied territory. The was has not evidently affected imports so much; for, entries are still found against Holland, Belgium, and even Germany representing perhaps cargo cleared from vessels sheltering in neutral ports. The operation of a compensating tendency is discernible in regard to imports from U.S.S.R. and Japan. If one goes by the April figures, the biggest share in the import trade is claimed by the U.S.A. which provided Rs. 4.07 crores worth of imports as against Rs. 3.93 crores' worth provided by the U.K. Imports from the Empire show a fall compared with April 1940 though higher than in March whereas imports from foreign countries exceptionally show an increase on April 1940 mainly on account of the larger imports from the U.S.A. and Japan and to a smaller extent, of Egypt, Iran and Iraq. The absence of Yugoslavia and Greece in the import tables shows that Hitler's latest conquests are not responsible for the fall in trade with Europe. Imports from neutral Spain and Hungary with which trade was permitted until April, show a striking fall. The import trade with Middle East has not suffered, but except for the increase in imports from Japan and Hongkong, trade with the Far East is in a bad way. Exports to China show a very considerable fall as compared with April 1940 and export trade with Malaya alone show improvement. The cessation of trade with Russia may well make one ask why the entry is retained. Exports to Japan are substantially lower than the imports from that country and the delinking of the yen from sterling has evidently not affected trade with that country. Exports in April, however, are lower than anticipated at Rs. 62.27 lakhs against imports of over Rs. 2.16 crores. The most welcome feature is the continued growth of exports to the U.S.A. Exports in April despite the generally unfavourable tendency totalled Rs. 2.69 crores in value and the figure suggests that the 1940-41 average has been surpassed. More arresting is the increase in exports to the South American continent Though comparisons on the basis of April 1940 may be invalid it may be said that the increase is particularly welcome as the Latin American countries may offer markets for cotton manufactures in addition to jute manufactures This must be welcome also for the reason that except for the increase in exports to the Straits Settlements, trade with the British Empire has declined. Trade with the U.S.A. alone looks like increasing though it may be urged that trade with Japan shows no sign of diminution at present. The April returns prove that trade with Japan is unaffected by the war, for Japan's capacity to export remains, and she is not unprepared to take advantage of opportunities created by the virtual disappearance of trade with Europe.

Industrial Concentration

THAT British industry is undergoing vast structural changes under the pressure of war is what every one would expect. But neither their nature nor their extent, not to speak of their significance to the comparatively distant future, attracts much attention at present. The British public is preoccupied with the war; its hardships, the duties it entails, the sensations that flow from it allow them little time or energy to devote to these questions. And it is only understandable that changes, that are now being effected in pursuance of the policy of industrial concentration formally announced in March, would in normal peace time have occasioned endless discussion and negotiation, witness the numerous committees and reports on rationalisation. But to-day rationalisation is a dictate of the needs of survival; and though policy proceeds on the basis of the voluntary principle, the powers vested in the Board of Trade are quite adequate for the purpose. The Board issues only general instructions; but the progress of the work is well maintained, and in spite of its obvious importance, the policy and the actual methods are described somewhat casually in the press.

An article in the *Economist* of April 5 explains that there are five main lines on which concentration can be effected. The permanent concentration of ownership and production entailed by mergers is the most obvious; but the merger will efface the distinction between nucleus and closed-down establishments. Under the second principle, one of levy and compensation, the nucleus firms would take over the entire trade and pay compensation to the firms forced to give up business for the general good. The third method is one of transfer of quotas. It provides for a quota for each firm so that its pre-war proportion of business is ensured. In a large number of industries this has been done. The nucleus firms are to purchase the quotas of the firms which are to close down; and it is believed more advantageous terms may be secured by giving the parties freedom of bargaining. The fourth, called the pooling method, is one by which all the firms in an industry join in a pool to operate the nucleus plant. For example, the firms in an industry would take shares in a new operating company which would lease the nucleus plant and distribute the profits of the industry to all the firms who are shareholders. This must be distinguished from the holding company which concentrates ownership and control, while under any pooling arrangement the financial interest is widely dispersed. In an industry where trade marks etc. are valuable this is certainly the most suitable system; because it will not be fair to allow the nucleus firms to acquire anything like a monopoly. A fifth form of concentration is described as one of agency agreement under which the nucleus firm produces articles as the agent of firms which have closed down which are still allowed to buy at cost and sell them through the usual channels. The closed-down firms remain in existence though actual production is concentrated.

Examining the consequences of the various types of concentration, one comes to the conclusion that the best type of concentration is that which will keep the door open for a return to previous methods of production and organisation while enabling adjustment to the conditions of the present. This implies that all this planning is temporary and that arrangement that may cease to be expedient after sometime there will be a return to private unregulated capitalism after the war which enforces concentration owing to the scarcity of men and materials. The argument is based on the need to protect the interests of small firms forced out of existence and the responsibility of compensating one and all affected by the new type of rationalisation. A further point is that concentration will have to give place to dispersion or expansions in the post-war period in order that the variety and quality of goods for private consumption may be guaranteed. The five methods have different merits, and no one is universally applicable, though the textile industry is a case where levy and compensation would be acceptable.

It is widely argued that the structure of industry should not be altered through concentration, and it is also urged that the luxury trades, which are in abeyance for the duration of the war, must be given scope to develop because of their importance to the export trade. There is, however, a possibility that the trust movement in British industry will gain in strength though Captain Lyttelton has promised Parliament that monopoly in any form will not be encouraged. There is, however, a risk that in the post-war period British industry will be tempted to embark on restrictionism naturally through private agreements, and only trade organisations, with a social conscience, in Sir George Schuster's view will counter the tendency. All that, however, is in the future while British industrialist will continue to look fondly on the old system. The experience of the last war shows how much of war's changes on industry can be effected when peace comes.

Sulphur Discovered

IN view of the labours of the committee set up last year by the Board of Scientific and Industrial Research, there is more than usual interest attaching to the news that sulphur deposits in Baluchistan will be exploited soon. Sulphur has gained in importance because sulphuric acid is the basic material for many industries and imports of sulphur have been upset by the war, the country has therefore to turn to other sources of sulphur. Gypsum and pyrites can be used for the production of sulphur; but they are hardly important as commercial production has not been attempted. The extraction of sulphur compounds from coal, oil and other mineral products has also been investigated. The extracted sulphur compounds have not been very effective, as anti-oxidants, and there may be no need to go on with them. The most important development,

therefore, is that reported this week of discovery of sulphur by the Geological Survey at Koh-i-Sultan. Substantial quantities of good sulphur can be had now from an indigenous source and the deposits are said to be high grade. The proved amount is 85,000 tons of sulphur bearing rock with an average content of about 60 percent, although larger quantities of this high-grade material, say, 100,000 tons, may be anticipated. A further 300,000 to 400,000 tons from a place near Sanni where sulphur-bearing rock averaging roughly 35 per cent, sulphur is available. But this has yet to be established and even larger quantities may be had out of occurrences reported from other parts of India. The Geological Survey is said to be investigating these too. The importance of the discovery lies in the fact that India can produce both sulphuric acid and pure sulphur from the Baluchistan deposits. Natural sulphur was discovered more than forty years ago at Koh-i-Sultan and thirty years ago at Sanni by the Geological Survey of India. But one of the mines near Sanni caught fire and prospecting operations ceased along with mining. Since then it was imagined that there were no other sulphur deposits. According to a recent report, the Board of Industrial and Scientific Research has developed another method of producing sulphur by the burning of iron pyrites. It is claimed that the product is pure and reasonable, in a cost, as experiments made with a pilot plant have shown that pyrites are a useful source of sulphur. Pyrites are available in many places accessible to those who want to produce sulphur. A resulting by-product iron oxide is useful in the paint industry. The process used for producing sulphur would ensure a perennial supply as Bihar, Madras and the Simla hills hold deposits of pyrites and their exact value has not been determined. It is known that at least one Indian firm is manufacturing sulphuric acid by burning iron pyrites and others are likely to do so. The existence of a second source like pyrites will reduce to a great extent the demand for natural sulphur which can be made available for war purposes and the urgent needs of various industries.

More Looting

GERMAN banks are known to have penetrated into Yugoslavia and Hungarian industry through the acquisition of Belgian interests. A correspondent of the *Sunday Times* recently described how German looting of the Balkan countries had begun before the fighting had ended. It is generally presumed that Yugoslavia's minerals will be ruthlessly exploited as the German need for non-ferrous metals is acute. In their first conquered territory of Czechs, the Nazis have squashed the Jews and bought up their assets at bargain prices. The process continues and a few wave of anti-Semitism advanced this year in the towns of Czechoslovakia. The Jews, the Ex-servicemen who fought for the Allies in the last war, and the native civil service have in turn been chosen for attack. The labour unions, too, are subordinated to the Nazi party and the employees of private businesses are subject to rigorous espionage. But these sinister attacks are of slight importance as compared with the transfer of Czech industrial properties to German interests. The Germans keep on buying up the firms in devious ways. The process has gone further with the transfer to the Prague Union Bank of the capital of the important *Berg und Huttenwerke* mining and foundries. The jointstock company was once owned by the *Union European Industrielle et Financiere* of Paris. The transfer to the Czech Union Bank means transfer into German hands, since the Bank is merely the Prague branch of the Dresdner Bank. The Union Bank, since October 1938, has been the agent of the acquisitive Germans. The majority of shares in the *Berg und Hettenwerke* were compulsorily acquird by the Czech Union Bank from the Zionostanska Bank. The French holdings, too, have gone the same way and it is not only in the Balkans that Germany is garnering where she had not strawed.

Nickel Consumption

ONE of the metals for which the war has stimulated demand to an exceptional degree is nickel. And nickel consumption is naturally reaching new heights as it enters into an ever-increasing range of alloys. The U.S. Bureau of Mines puts the total annual production of nickel at 121,000 metric tons, a quantity much below the estimated consumption of 128,000. The previous year production was 115,500 tons while consumption was lower at 102,000 tons. The 1939 figures can no longer be regarded as a record, as there can be no doubt about the enlarged consumption of Britain and U.S.A. in 1940.

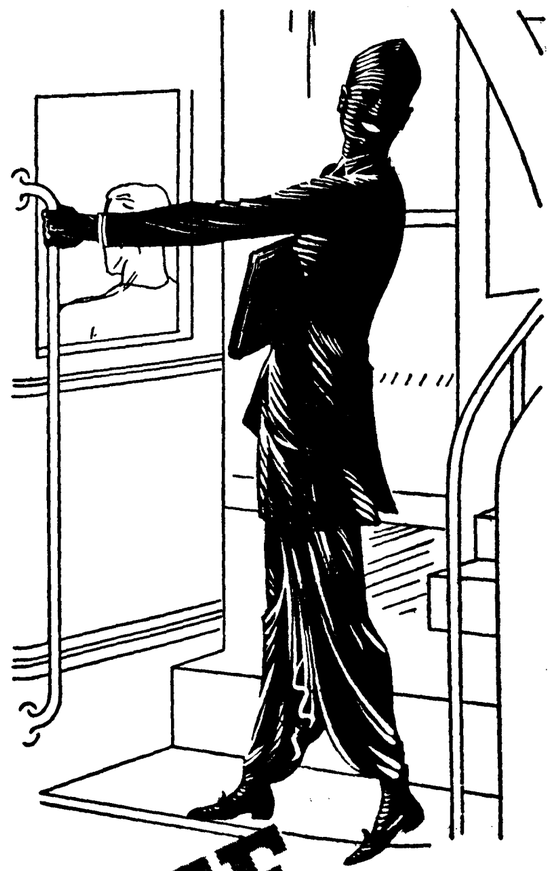
The two countries referred to, take 85 percent of the world's nickel for their arms production; but civilian industries outside the U.S.A. and Britain could secure essential supplies under licence from the Canadian Government.

Europe has had no source of supply comparable to Canada. The scanty production of Greece has not been allowed to develop; while the Finnish war practically put an end to the mines at Petsamo, where the plant was destroyed. Stocks built up carefully by Germany in 1937-39 must have been eaten into; and the stories occasionally put out to foster fear and confusion in Finland are inspired by a desire to take over the small nickel production of Finland. It is believed that the use of nickel in wartime will increase further. Production in Canada will increase as productive capacity has been enlarged rapidly first to deal with a larger quantity of ore in addition to that mined (by the Falconbridge Nickel Mines) and refined formerly at Kristiansand in Norway. It is believed that Canada's share in nickel production will advance to 125,000 tons. The increase is justified by the decline to less than half in the output from New Caledonia, which cannot send its ores to France for smelting and refining as before. Canada will thus have over 90 percent of the world's nickel output and the steady increase is largely due to the efforts of one of the world's largest corporations, the International Nickel Company of Canada. Reference has been made here to the careful policy pursued by the great company which has kept prices down and has encouraged by research and other means the use of nickel in every form. Alone among the metals, nickel shows no variation in the price quoted over 18 months of war and the price around £190-195 per ton shows public spirit rather than the desire to maximise profits.



Control of Cotton Contracts

The Secretary of the East India Cotton Association writes from Bombay under date June 5:

In your Bombay correspondent's letter published in the weekly issue of 'Indian Finance' dated 31st May 1941, reference has been made to the fixation of spot rates for cotton by the Board of the East India Cotton Association Limited. As the comments made are rather misleading, I send the following observations in connection therewith, for due publicity in your paper.

It is not correct that a new rule empowering the Board to fix and register the rates for hedge contracts and also spot rates has been promulgated. By-law 31 under which the Board took upon themselves the function of registering and fixing forward and spot rates for cotton has been in force for a number of years and the Board had in the past exercised this whenever they considered it necessary to do so owing to extraordinary circumstances prevailing in the market. In the present case, it appeared to the Board towards the end of last March that an artificial position might develop in connection with the Broach Contracts and the Board bearing in mind that Broach is largely used as a Hedge Contract in order to avoid any inconvenience to the Trade, opened trading in new Crop earlier than May, by virtue of the powers vested in them by By-law 47. The Board expected that the trade would thereafter change their hedge position from April-May and July-August Broach Contracts of this season to the new crop contracts. They also expected that those who had bought 'on call' on the basis of April-May and July-August would similarly call their cotton without delay or

THE terms of conversion of the 4½ per cent loans announced early in the week bring to an advanced stage the scheme of repatriation of our sterling debt which the authorities adopted at about the beginning of the last financial year and brought to near perfection in February last after a process of hesitant experimentation. Public interest in the question of utilisation of sterling balances or of the changes and vicissitudes of the scheme adopted has never been keen. And, at the moment, it may be said that the operations now announced do not touch the market as near as may be supposed. Nevertheless, a big chapter in the history of Indian finance—I have good reason to put the words in italics so as to signify this journal as well—has been completed. I seek some kudos for this journal, for not only has *Indian Finance* the honour of inspiring and originating the scheme now adopted, but it has also the credit of being a proved prophet in regard to the demerits of measures which were tried and afterwards discarded. Indeed, I cannot help thinking, while entertaining the warmest feelings of thankfulness and gratification for what the authorities have done for this country, that, if they had shown greater receptiveness to the proposals made in the columns of this journal soon after the outbreak of war, the results would have been even more gratifying. For, the careful reader can see, even in the terms of the communiques emanating from the Government of India and the Reserve Bank, broad hints about the aftermath of the unwise experiments of the earlier stages. The references to the capacity of the market to take up scrips to the value of Rs. 80 crores and the need to preserve the marketability of those issued as counterparts of the sterling loans show that there are still loose ends which have to be tied at a later stage and which could have been avoided, had the scheme been adopted from the start. Of course, it is too much to expect the average reader to detect these weak points; for that requires knowledge both of principles and facts which he cannot ordinarily have. I shall go into these matters presently to appraise what has been achieved so far.

Meanwhile, it is necessary generously to recognise that the replacement of sterling loans by rupee counterparts to the extent of Rs. 92 crores is an achievement of the first magnitude. Embitterment caused by Britain's unreasonableness in the political sphere has led many not only to ignore this, but also to question its beneficial character. It is too easily forgotten that the reduction of foreign indebtedness was one of the bigger planks in our platform of economic and financial swaraj. The first deduction from the postulates of Swadeshi, not less than of Swaraj, is that India should not be tied too close to the apron-strings of the London money market. Not one or two, but many, nations, who are sovereign states according to international law, have found themselves reduced to worse than vassalage by the legal and extra-legal obligations of foreign indebtedness. Nationalist opinion in India had, therefore, asked for a policy of reducing India's debts to Britain. There were three ways of achieving this purpose, firstly, to put an end to the old practice of raising sterling loans or at least to reduce to the absolute minimum such borrowings in the London market; secondly, to acquire for the State the railways in India as soon as the terms of the contracts with the companies give the Government the option to do so, and, thirdly, to repay sterling loans when the credit of the Government in India and the state of our foreign balances enable the Government to do so.

It is the last method that is important in this context. For, the first two have been put into force long ago; and notwithstanding occasional deviations, the policy may be said to have been effectively pursued. But the actual repayment of sterling loans is a different matter. For, there has to be a singular combination of a number of favourable circumstances. A high level of government credit, large external balances and either timely maturities of foreign loans or some artificial or natural pressure on holders of our loans to part with them, are a combination which is altogether rare. And that is precisely why the fullest utilisation of an opportunity when it occurs is of such incomparable importance.

Such an opportunity did occur at the time of the last war. But the authorities let it slip, not inadvertently, of course. Our foreign balances were ample enough for any large scheme of debt repatriation. Or, one might say, that even if no scheme were adopted, if only the authorities refrained from providing an abnormal solution for the transfer problem, which arose at that time, by buying silver and minting rupee coins and by offering Council Bills, there would have been a natural liquidation of our foreign indebtedness. The sight of very large sterling balances was the signal for all sorts of audacious departures in currency and exchange. The result was, not only was that opportunity missed, but the country was subjected to all the ravages of an outrageous policy of currency deflation.

On this occasion, therefore, not only the oldest demand of Indian nationalism in the sphere of finance, but the disastrous experiences of the last war demanded that the

opportunity, which the present war was bound to renew, should be availed of fully. It was with this view that *Indian Finance* published a series of leading articles on Planned Money during the war which furnished among others a very concrete scheme for the repatriation of the sterling debt. The article in question will today bear reproduction in full. Suffice it here to say that we calculated then in November 1939 that, before the end of the financial year 1939-40, India would have accumulated sterling balances to the extent of £100 million, that the need for the British Treasury to have all foreign loans repaid would have increased to near its maximum, that the main principles of financing the present war and the special position of the Government of India would combine to produce and preserve a strong and healthy giltedge market, and that all the conditions necessary for a large scale repatriation of our sterling debt would be present. There were, of course, other considerations besides, the easing of the transfer problem, the avoidance of inflation within the country, reduction of interest charges during the trying times of war etc. When the objective conditions of the markets and of public finance, the requirements of the two nations, the dictates of sentiment and genuine national interest, all pointed in the same way, there could be no doubt that the road so indicated would be taken sooner or later.

But in a deal of such gigantic proportions and momentous importance, the details are not less important than the broad principles of action. And the actual execution of the task by the authorities also serves to emphasise the importance of the operations.

We urged, in our leading article of November 25, 1939, that the good offices of the British Treasury should be requisitioned for making repayment well before the dates mentioned in the terms of the loans when they were issued; that at least £75 millions of sterling loans should be paid off at the start and that more loans should be brought within the scope of the scheme as more and more sterling balances accumulated. Now that £100 millions have been paid off inclusive of the units bought in the open market before this scheme, there is cause for gratification. But the replacement of sterling loans by rupee loans subscribed for in this country is, if anything, a more important part of the task; and it is here that the authorities have been chary of adopting the scheme which the experiences of the last one year have shown to be well-conceived. To understand this part of the scheme of repatriation, it is necessary, in the first place, to recapitulate the suggestions made in the editorial columns of this journal. We urged in our issue of November 25, 1939, that "the surplus sterling reserves must be kept apart from the currency reserve and the payment for sterling purchases must be made by recourse to expension against *ad hoc* Treasury Bills"; that "the Government should take steps immediately to raise the maximum (of rupee securities in the Issue Department) to, say, Rs. 120 crores"; that "the process of reduction (of *ad hoc* securities) must be connected with the plan for diverting the extra-purchasing power of the country into the channel of savings invested in government securities" and that "for the balance, the Indian capital market could, in the more prosperous conditions, be trusted to find the required amount on fully favourable terms." We cited the precedent of creation of *ad hoc* securities at the time of the gold exports and showed how a similar course could be adopted at the present juncture.

It will be readily seen that the essence of our scheme lay in the utilisation of *ad hoc* securities for the purchase of sterling and for enabling the Government to choose the time, manner and measure of replacement of sterling loans by rupee loans. This system would have the advantage of avoiding the impact of the buying programme on the market in which we had to buy and the impact of the selling programmes in the market in which sales of these new loans had to be effected. It would have given the Government the opportunity to promote a savings movement, to watch its progress, to measure its success, and, in the light of that, to decide to what extent they would invite the market to take up the rupee loans that are to replace the sterling loans.

But for reasons best known to themselves, the authorities preferred at first the system of buying in the London market and providing rupee counterparts in India at what they thought were suitable intervals. This scheme was given formal publicity after it had been in operation for some time. And *Indian Finance* lost no time in pointing out the grave defects that vitiated the scheme. For it contained in an acute form precisely those dangers of buying dear and selling cheap which had been carefully provided against in the scheme adumbrated by this journal. And the view was clearly expressed that the defects would bring the scheme to a speedy end and that the authorities would find themselves obliged to adopt one more in accordance with the suggestions of *Indian Finance*. The scheme, whose final stages are now being reached, was in fact announced only in February last; and the dated loans have been taken together and paid off after getting the necessary authority from the British Government.

But the process of issuing rupee securities in place of the sterling loans has been by no means a smooth one. All the advantages that might have accrued from accepting the scheme whole-heartedly have been foregone. The giltedged market was denied the strength which it should have gained by so significant a demonstration of the credit of the country. The process of strengthening the London market and depressing the Indian was persisted in up to a late stage. And because the expansion against *ad hocs* was not resorted to, there has to be a degree of impatience in issuing the rupee counterparts, which does not augur well for the smooth completion of the scheme. For the issue of rupee counterparts requires, as a necessary preliminary, the accrual of full strength to the Indian giltedged market which must belong to it as a result of the reduction of our foreign indebtedness. And in the conditions thus created, the authorities must issue loans of different types in the light of the proved requirements of investors in this country. It would then be no problem to preserve the marketability of particular issues and change the maturity dates of the rupee counterparts as a belated afterthought.

The notification made early this week refers, in fact, though not in form, to the change in the maturity and the nominal interest rate of the 4½ per cent loans in accordance with the requirements of its official holders. And elaborate explanations have been thought to be necessary about the intentions of the authorities in respect of further supplies of these scrips and their marketability. I cannot

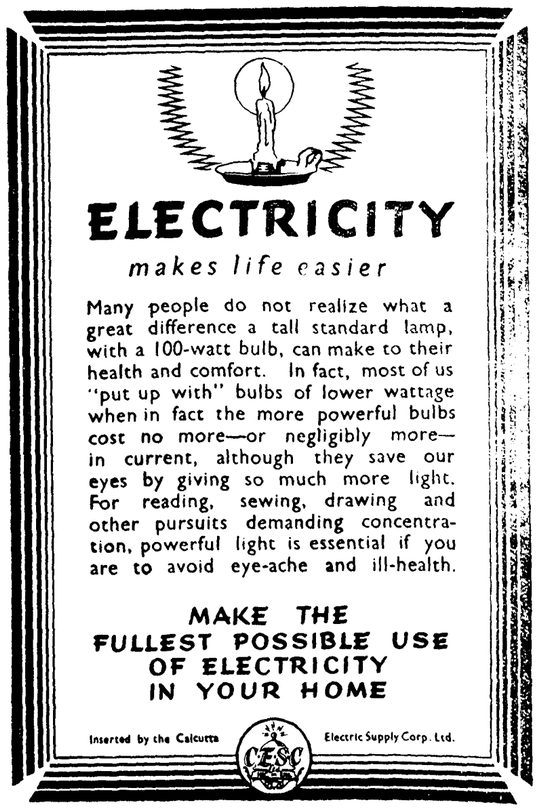
help reflecting how different the position would have been if the repatriation scheme had been thought out as a whole and not dealt with piecemeal. Nevertheless, it is a great achievement, and one for which both Sir Jeremy Raisman and Sir James Taylor are entitled to the country's gratitude.

—*EAVESDROPPER*

(Continued from page 1075)

the total of 1951-54 being Rs. 15.13 crores and that of 1963-65 being Rs. 15.72 crores. For the purpose of conversion, the issue price of the three per cent loans, 1951-54 and 1963-65 will be Rs. 100 and Rs. 95 respectively for every rupees one hundred of the loan applied for. The 4½ per cent loan 1950-55 will be accepted for conversion at Rs. 110-12-0 and the 4½ per cent loan 1958-68 at Rs. 113-8-0.

As we have said, a very considerable portion of the 4½ per cent loans is held by the Government and the Reserve Bank; and it may, therefore, be said that the success of the conversion loan is a foregone conclusion. All the same, this conversion is largely a matter of adjustments in the books of the Reserve Bank and of the Government. Public interest in the conversion loans can be but of the meagerest kind.



This, perhaps, explains why the Reserve Bank did not deem it necessary or useful to have the advertisement of the loan published widely. The advertisement has been given to some of the daily papers; and we do not appear to have noticed any of them commenting on the loan proposals. This is one of the very few loans whose advertisement has not appeared in *Indian Finance*. We have always thought that the Government fully realise the important part which *Indian Finance* plays in interpreting new loan proposals to investors in India. Many a time, we have had requests from the Government to bring out special new loan supplements. In fact, Lord Willingdon paid a generous tribute, in one of his addresses to the legislature, to the great support which his Government had derived from the new loan supplements of *Indian Finance*. Even if the present loan did not need wide publicity, the past services which *Indian Finance* has rendered for interpretation of new loans and, generally, for the cause of giltedged are such that the one paper in which a new loan advertisement must appear as a matter of propriety is *Indian Finance*.

It has been a very dull, uneventful week.

Banks were sellers of T.T. at 1s. 5 15 16d., for ready up to six months forward; and banks were buyer of T.T. at 1s. 6d. for the same delivery.

Banks were buyers of three months' D.A. bills at 1s. 6 7 32d., for the third month and 1s. 6 9 32d., for the fourth month.

Interbank call money quoted ½ per cent; and for one month to four months ½ per cent.

(From Our Correspondent)

Bombay, June 11.

Opinion here is not so much divided as inchoate about the final report of the Textile Labour Committee. There is good reason for the slowness of opinion to form and assert itself as the report issued last week is a bulky tome on which the press note issued as a matter of course throws little light. Mr. Justice Divatia and his colleagues are known to have made a good job of it in spite of the wide terms of reference and the difficulties experienced in the collection and sifting of intractable evidence. The interim report of February 1938 excited controversy; it will not be surprising if the final report does the same. Those who followed the first hearings of the Committee are aware of the variety of views offered on the question of a living wage and there is a fear that the Adviser Government may shelve the final report as inconvenient and impractical. The report, reasonably priced in view of its vast importance to the labour, stills all doubt as to the value and length of its labours. Mr. D. R. Gadgil was one of the members and the academic bias is not altogether absent from the work whose publication has been delayed for several reasons. The arrangement is most precise, and those who are acquainted with the earlier performances of the Bombay Labour Department in the matter of investigation and analysis are confident that this report is certainly the best job turned out on this side.

The discussion ranges over a wide field and recommendations of various classes will entail action on the part of both the Central and Local governments. It is one thing to say that coordination is wanted, another to suggest the exact ways and means. Unemployment insurance and holidays with pay cannot be obtained unless the Centre legislates and devises means for their adoption. While it is currently imagined that labour reforms can be suspended on account of the war, the Committee propound suggestions for far-reaching reforms. Mr. H. V. Divatia, Mr. V. L. Mehta and Professor Gadgil are by no means Radicals and their endoursement of proposals for a minimum wage means that there is a very strong case in favour of its enforcement. The formation of trade boards to supervise working conditions and regularise procedure in regard to disputes etc., is advocated in the report which favours also the opening of labour exchanges. European theory and practice have admittedly influenced the committee which has calculated the cost of concessions and reforms. In view of the dearness allowance granted before the strike of March, may be contended by some that concessions which will involve a net addition of at least 10 per cent to existing wages have no justification, and the employers as a class will not be slow to record their disapproval of the expensive reforms recommended. Moreover, reference will be made, as in 1938 to the setback suffered by the Bombay mill industry whose importance is actually diminishing with the further growth of the mill industry in outside provinces and upcountry centres. It will be argued, and with reason too, that Bombay mills cannot afford to forfeit their few advantages by voluntarily providing higher wages and special amenities that employers in other Provinces, and the States too, do not provide. It is claimed that Bombay leads the rest of India in wage and labour standards and the millowners will urge that consideration of the recommendations must be deferred until uniformity is secured. Only rules regarding recognition of trade unions etc., can be amended and only the Central Government can procure through its immediate intervention the co-operation that is an essential perliminary to the working out of recommendations regarding health insurance and holidays with pay. Consideration must be slow and detailed and caution both in the examination and application of the recommendations has been advised by the *Times of India* in a leading article that shows how far mill labour has benefited after the restoration of the wage cuts made in the depression. The arguments are difficult to compress but the report leans heavily in favour of advanced reforms. It is difficult to perceive how the other Provinces and States will be persuaded to adopt an enlightened view and nothing short of coercion by the Central Government will lead to the acceptance of the proposals contained in the report for it is recognised that the All-India Industrial Council approved by the Textile Labour Committee will suffer from unavoidable differences of opinion which will retard action.

The conversion offer made this week was not much of a surprise. That the Government intends to save in interest charges was long known and this part of the sequel to the repatriation scheme was not unanticipated. The reasons set out in the communique are regarded as convincing for the Government is bound to create a market for the 4½ per cent loan and the cash bonus paid for conversion is likely to attract holders. Local interest in the annouuncement has been quite small, for it has been carefully explained that the new offer has a very limited appeal. The rupee counterparts are not held by private investors. Only banks and insurance companies keep the 4½ per cent loans. Opinion is not unanimous as to the advantage of the offer though the redemption yield is almost equal and the longer term of the 1963-65 loan may appeal to many. A few point to the opportunity given to holders to take their profit now and take advantage of a chance to get the 3 per cent loan at Rs. 95. The institutional investor is likely to appreciate any chance that will enable him to meet some of the losses incurred on account of the war and the resulting depreciation of investments. It is explained that the profit booked by exchanging out of the high priced loan into that standing at a discount is not liable to income-tax and this will be presented as an added attraction. A further point that emerges from comments here is that the Second Defence Loan repayable in 1949-52 looks more tempting as it matures two years earlier than the 1951-54 loan of which a larger volume is outstanding. It has been argued that the conversion does not add to the total volume of outstanding securities and there is nothing whatever to suggest that holders of 3½ per cent paper will have a chance to get hold of a dated stock in return for Rupee Paper. Only the 4½ per cent loans are to be converted, for four other sterling loans for which rupee counterparts exist are not affected by the offer. The Finance Member's decision to put an end to interim arrangements evolved in February-March is approved.

The death of Mr. J. A. Wadia reported this week deprives the Parsi community of one of its foremost members and also one who was one of the natural leaders of the mill industry. It is recalled that Mr. Wadia was for long one of the spokesmen of the mill industry for which he worked devotedly. His fondness for bimetallism and free silver has been mentioned. Educated in England, Mr. J. A. Wadia was known as a Director of the Sassoon group of mills. The recovery made by the group in wartime must have given him much pleasure. He was long a member of the City Council. Among his sons is Mr. Justice B. J. Wadia and Sir A. R. Dalal is a son-in-law of his.

The riot situation has been nearly mastered and more people talk now about the monsoon and business prospects than about local outrages. In spite of the arguments advanced against press restrictions, it is doubtful if the press has been put to trouble. The ban was meant to suppress retaliatory attacks, and the police went out of their way to help the press this year. Most of the shops have reopened and both Hindus and Muslims have shed their apprehensions. Preventive arrests continued until the end of the last week and many of the injured are not out of hospital yet to tell their own tales of the sad doings. The piecegoods market is still feeling the effects as demand is disappointingly small and it does not look as if the re-opening of the cloth market will lead to any rivival of activity. Japanese goods do not offer much competition as holders of stocks alarmed by the rise in replacement costs, are not at all eager to dispose of their goods. Bombay does not get many orders now from upcountry markets though prices should tempt buyers who must know that the rise in cotton is likely to keep prices up. Ahmedabad reports something like brisk buying but the Punjab has taken little or nothing and mill stocks have increased rather unexpectedly. The one relieving feature is that foreign rivals are not going to pick up any business passing because they cannot hope to do business in the future.

Reference must be made to the proposal to amend the Trade Disputes Act. The Government propose that the Act should make arbitration compulsory. In view of the Ford assembly plant strike last month anything that promotes accord between capital and labour is to be welcomed. Conciliation through special boards appointed in each case by special notification does not make settlement of disputes easy because it was always open to either party to reject the Award. Under the Act of 1939 voluntary arbitration was restricted to registered unions which are very few in number. The proposed measure seeks to make arbitration compulsory. Disputes referred by Government to the Court of Arbitration will not lead to any strike or lockout. Government is now keen on peace in industry for very good reasons. The Ford plant strike has shown that war work might suffer. Moreover peace in industry is essential for carrying on business as usual and provide goods needed by civilians who have now to pay more for their foodstaffs. The Industrial Court will be the tribunal for arbitration in labour disputes. Employers have no reason to distrust this new tribunal and compulsory arbitration is a principle acceptable to the Congress party. It has been suggested that the Central Government should issue directions to all the Provincial Governments about the virtues of compulsory arbitration which may be imposed at any stage of a labour dispute according to the proposed law.

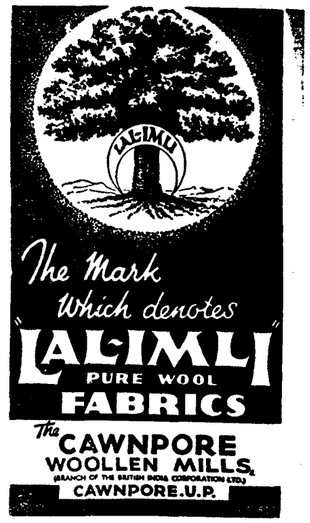
Jute and Jute Manufactures

Calcutta, 12th June.

AS a sample of equivocal sophistry the reply of the Mills Association to the letter of the Special Officer (Jute) on the subject of Jute Standards would be hard to beat. The reason advanced for non-consultation with selling interests is lack of time due to the urgency of the matter. But heavy emphasis is laid on the principle that the Buyer is entitled to lay down the law as to what he wants and that it is up to the seller to comply. There would be more force in this argument if the Buyer in this instance stated clearly what he did want. The letter goes on to claim that the recommendations of the **ad hoc** Sub-committee were rendered nugatory by the subsequent Delhi Agreement and by the specification of a guarantee for the Bottom grade. Almost in the same breath it is admitted that it was all along recognised even by Government that trading would go on outside the terms of the Delhi Agreement and that it did so go on. It would have been more frank to admit that probably 90 % of the trading was outside the Delhi Agreement which would indicate that it was the Agreement which was nugatory and not the recommendations of the **ad hoc** Sub-committee. One of the most potent of these recommendations was for the prohibition of selling the Bottom grade alone, to prevent over-trading in this quality and the consequent forcing up of the standard. To claim that this situation was met by the placing of a guarantee of "not more than 70% sacking weft" on the Bottom grade, which guarantee, incidentally, was never for a moment recognised by member Mills is, to put it mildly, disingenuous. It is rather reluctantly admitted that some blame may attach to Mills for encouraging sellers to deliver assortment higher than the official standards, but it is emphasised that a Buyer would be the world's biggest B. F. if he refused to accept something better than he paid for. The letter states that Mills' requirements are covered by three standard grades but it studiously refrains from explaining why these three grades should not be Tops, Middles and Bottoms, as was laid down for all time only three years ago. Much virtue is claimed from the fact that the grades specified by the Mills Committee accord closely to what Professor Todd outlined in his "Futures" scheme. This is interesting inasmuch as the deliberations of the Chamber Sub-committee to report on this scheme have been delayed because the opinions of the Mills were not available. In any case, a **sine qua non** of the Todd scheme is the preparation and maintenance of Standard Sample Boxes, no new proposal by any means, but one against which the Mills Association has always steadfastly set its face. It would be instructive to know if it is now agreeable to the establishment of this important item in the Todd scheme. Finally, the threat of expunging a Seller's name from the Register is designed to prevent pressure from Mills on a Seller to pack above the standards. This sounds analogous to foiling the blackmailer by putting his threatened victim in jail. The Hitler touch emerging again. The reply would have been much more valuable if it had frankly admitted that deliveries during the past season had averaged a full grade in quality above what they officially purported to be, and if at the same time it had made it clear whether the Mills expected these standards to be maintained in the coming season or whether the Committee's intention and desire was that the specifications prescribed in their recent circular should be strictly adhered to. We know of no member Mills who believe for a moment that the latter is correct, so it is eminently desirable that the matter should be made clear beyond the possibility of misapprehension.

It has been announced that the Bengal Government has ratified the agreement with the Assam Government regarding the regulation of Jute Crops from season 1942-43 onwards, but the terms of the agreement have not been made public.



All markets have assumed a quieter tone this week. Probably the primary cause was the switching of freight which had been intended for hessian shipments to America, to carrying manganese ore. Also there can be little doubt that the very high prices ruling recently for near goods has definitely checked demand from consuming markets, who feel that they are being held up to ransom for their requirements of jute goods and are reverting to competitive substitutes.

There has been very little activity in the Pucca Bale market either for export or for local sale. Daisee, Tossa and the higher grades of white jute continue scarce. Only a few small transactions have been reported in Firsts at Rs. 45/8, Lightnings at Rs. 38/-, Hearts at Rs. 33/- and Dundee Daisee assortment at Rs. 52/-.

The Fatka market has registered a fairly sharp drop. The June position opened at Rs. 52/8, touched Rs. 47/10 and closes steadier at Rs. 49/4. The "Satta" for the September position has ruled around Rs. 9/-, the highest quotation being at the opening, Rs. 62/2, the lowest Rs. 56/12 and the close Rs. 58/12.

Loose jute has been stagnant and even though sellers have reduced their asking rates, Mills have shown no interest. Old Crop Indian Jat Bottoms could be bought at Rs. 7/- and District at Rs. 6/4. Nor has New Crop evoked any interest. European is quoted at Rs. 11/- and Rs. 9/ for Mids and Bots with Indian Jat at Rs. 10/12 and Rs. 8/12 and District Rs. 10/4 and Rs. 8/4 Heavy rain and high rivers are reported from the mofussil where a break of clear weather would be beneficial. The crop however is growing well.

The freight position referred to above and little export demand have combined to take the froth off the Fabrics market and turnover has been on a much more limited scale than recently. Prices also have been marked down fairly sharply though the tone at the close is again slightly steadier. From Rs. 21/8, nine porters touched Rs. 19/10 but close at Rs. 20/8. Similarly eleven porters opening at Rs. 26/12 touched Rs. 25/- and close at Rs. 25/6. Sales reported include 9 porters at Rs. 20/- June, Rs. 19/8 to Rs. 18/12 July, Rs. 19/- July/Sep. and Rs. 15/8 to Rs. 5/4 Jan./March. Eleven porters were recorded at Rs. 25/8 and Rs. 25/- June, Rs. 23/- July/Sep., Rs. 21/4 to Rs. 20/- Oct./Dec., Rs. 19/4 to Rs. 19/- Jan./March and Rs. 18/4 to Rs. 18/- April/June. Heavy Goods have been rather neglected and few sales have been reported. Earlier on "B" Twills for June sold at Rs. 26/12. Liverpools changed hands at Rs. 41/- and Rs. 40/8 June and at Rs. 40/- and Rs. 39/12 July. Woolpacks sold at Rs. 1/11 July and at Rs. 1/10/6 August. Later buyers of near Cornsacks could not get on at Rs. 36/-.

JUTE

Calcutta, June 12.

THE lack of buying interest has been noticeable enough on most days. This in itself will excite misgivings as to the stability of present prices. Raw jute for ready delivery does not appear to be in request and the illusion of steadiness must not make one blind to the fact that conditions are highly artificial. Old crop does not seem to attract anybody who wants to follow futures and the recession in prices, observable since Saturday, prompts questions as to the future course of prices. The jute mills' decision acted as a damper, for no increase in consumption can be confidently predicted by the hardened bulls. The result is certainly shown by the ragged course of prices over the last few days. There is nothing at all to indicate that pristine enthusiasm has returned, and the fall this week has focused interest on the progress of the new crop. The definitive arrival of the monsoon has certainly created a feeling that the high rates for Futures cannot stand. The spasmodic interest in old crop has upset all calculations as to the loose jute market also and the flicker of interest in pucca bales towards the end of last week has now become a memory. It is obvious that the steadiness of hessian cannot long support jute prices and sellers of Jat and Bottoms alike have on most days found few takers. The situation is hardly cheerful as mills are out of the market, and whatever may be said about the interest in new crop, which continues to find a few buyers in spite of the feeling that speculative sales have forced up prices, there is not much doing in the jute market. Hearts are flat at Rs. 33 and Lightnings at Rs. 38 is but one among the transactions reported this week. The premium paid for new crop, particularly for September delivery sustains the impression that firm and active conditions characterise the market. The market is narrower than usual and rumours of new taxation accentuate apprehensions as to the stability of present prices. It is true that other commodity markets, particularly, cotton are on the mend and the majority of operators are getting up a sort of Dutch courage from the bullish feeling in the cotton and seeds market. Whatever be said about the ready jute market does not apply to the futures market which has ruled steady throughout the week. Fluctuations on most days have been slight, and the jute market as a whole is buoyed up by the feeling that September Futures must stand higher even if hessians for future delivery are quoting lower merely because of the fear that shipment may not be easy.

JUTE MANUFACTURES

Calcutta, June 12.

THE hessian market continues to show every sign of confidence at present. This may seem surprising to those who had remarked on the relapse and the late recovery this week. The present tendency is distinctly steady but the lack of interest among buyers suggests that the average outsider is not at all impressed by the reports that futures quotations are held around last week's levels. It is not surprising that rates stand because the I. J. M. A. did not reach the decision anticipated last week as regards an increase in working hours. The committee declined to make any change, but it indicates pretty clearly that if hessian prices were forced up, for reasons best known to the bazaar, the committee would promptly intervene by increasing hours of work in the mills. Though it is feared that stocks have risen during May the diversion of sacking looms for the manufacture of sandbags is held to militate against an increase of working hours. Last week's decision is said to have pleased the hessian market, but views generally have changed as a dropping tendency was apparent until Wednesday. The rally on Wednesday afternoon was spirited enough and Nine Porters were sold at Rs. 20/8 after they had dropped steadily during the previous two days. Only small business is reported from day to day and there is an air of artificiality about the course of prices. It is not out of place to emphasise that shipments are not large, though export prospects are good enough, and warnings uttered against any undue rise in prices are more than ever valid. In point of fact, it may be said that demand at current rates is negligible except for Heavy Goods which command fairly higher prices. Cornsacks have been bought on most days at Rs. 36 and over and B. Twills continue steady around Rs. 36. The majority of operations are necessarily speculative and the downslide in jute following the rally reported on Tuesday may lead to a revision of views on the subject of hessian prices in general. There is, to most minds, air of unreality when mills display little or no interest in both jute and hessian, and it is proper to regard the present fluctuations as an indifferent guide.

The new crop may be smaller than usual and trade estimates may be wrong as compared with official forecasts but the jute market cannot hope for much comfort from any new aggreement between the industry and the Government. There is, however, a feeling that a way will be found to keep up the price of new crop without prejudice to the hessian market. Only limited interest is evidenced in the past week's dealings in Eleven Porters which have dropped by over a rupee because the speculative buying movement is at an end. The main point to emphasise in this review is that the rise in Eleven Porters has been more than checked by the fall in jute noticed over the last three days. The fall in Jute Fatka and the absence of demand for Old crop conspire to restrain interest in hessian just now. The demand for Nine Porters is negligible, and this must not be put down wholly to the reserve of sellers for in spite of much that is said there is not much genuine support at present prices. On most days the market has been languid rather than active and the changes in prices over a week have not been in favour of the confident bulls who cling to the view that hessian must rise because jute cannot go down.

RAW COTTON

Calcutta, June 12.

THE cotton market continues to develop steadiness. The further advance in U. S. markets particularly in distant Futures has sustained the bullish feeling. The definite disappearance of the lingering traces of pessimism may be adverted to here to prove the point that Indian cotton, if it fluctuates from day to day, is not likely to fall as it did last year. Bulls are said to be showing more interest in the new crop and the rate for in spite of periodical liquidation. Buyers are not enough risen in contrast to the fall in the July-August contract. The rise in medium and lower staples is even more suggestive, and the selling of jobbers and commission houses on certain days has apparently not influenced general sentiment. It may be pointed out that the rise in shares prices and the improvement in the Bombay riot situation are material factors at present and occasional selling by holders who had bought cheap earlier in the year cannot affect the ultimate trend. The main feature has been the resurgence of faith in export markets. China and Japan are expected to help substantially though reports of divergence of views between Japan and America promote misgivings. There is, however, the fact that U. S. consumption will keep American prices up and keep Indian prices too in parity, and any mild relief given through exports to Britain will keep up the prices of superior varieties of Indian cotton. The highest touched by Broach July-August this week was Rs. 267/- but the general trend latterly has been reactionary, though great attention must be paid to the rise in Oomras and Bengals. There is no sign that the market is flat in spite of periodical liquidation. Buyers are not out and other markets in Bombay help to steady up cotton.

PIECEGOODS

Calcutta, June 12.

THE steadiness of raw cotton accompanied by reports that Bombay is not unwilling to sell, as the riots are at an end, help to create a irrigated atmosphere in the piecegoods market. The scarcity of imported supplies together with the feeling that Britain cannot export to India helps indigenous goods which are of late meeting with better demand from consuming centres. Madras has lately reported a revival as also Ahmedabad which has got over the langour noticed last month. It has been said that Cacutta orders have appeared in time at the latter centre. But Bombay is said to be dull with prices however tending to harden. Japan is an unwilling seller and replacement rates are still above current notions. Holders of imported goods are not keen sellers as future supplies are uncertain and the rise in cotton precludes any setback in ruling quotations. Yarn from South India is sought after as there is a fear that supplies may not be readily available when war orders for textiles increase. It has been reported that orders to mills since May have increased appreciably and it is realised that the civilian buyer has to bestir himself early. There is every sign of a brisk monsoon and fairly large consumption at home. Lancashire competition should taper off and dealings with Japan are hampered by the feeling that trouble may arise in the Far East. It looks as if the Indian manufacturer will have a long innings, and once fears of internal disturbances disappear, there is every reason to hope for an improvement in demand. Commodity markets generally are turning firmer soon to find support in the absence of any eagerness to press goods for sale.

GOLD

Calcutta, June 12.

THE steadiness of bullion prices belies the ebb of interest during the past week. The current lack of enthusiasm is not unintelligible, and recent news from Syria has checked the rising tendency noted last week. The stocks in the Bombay market are small, so is the offtake. A slight fall in prices is disclosed in comparison with prices ruling last week, and it is now anticipated that Bombay prices offer no inducement to operators to increase their commitments. The rate per tola for Ready came down to Rs. 42.4 early this week and the changes since do not reflect any extension of buying interest. The rates for forward delivery do not show the small customary premium, and the general apathy is attributed to the reluctance of jobbers to take a hand.

SILVER

Calcutta, June 12.

NARROW movements in a generally dull market indicate that market enthusiasm has waned. Silver has been in small demand though commodity markets, especially wheat and cotton, tend to move upwards. The Bombay silver market does not yet benefit much from a strong technical position and limited offerings in conjunction with a certain amount of investment buying. The ebb of outside interest does not adequately explain the very slight changes in prices. Perhaps wartime uncertainties will continue to repress enthusiasm and the absence of any change in London rates retards any rise in forward prices here. The differences between spot and forward prices in Bombay suggests that a decline is anticipated in most quarters, and the late rise on Wednesday may not be held. The holiday break may restore tone, but prices must be pegged to the 62-63 level for some time. In a dull but steady market on Wednesday Ready stood at 62-12 per 100 tolas and 1st settlement was unchanged. The rate for July settlement improved slightly to close at 62-10 with the teji 2 mandi rate widening somewhat to 0-13-0. The bullion market this week may be summed up as stagnant. Gold is in small demand and silver lacks support. The small range of fluctuations is natural and not at all unexpected.

EAST INDIAN RAILWAY

RESERVATION OF I & II CLASS BERTH EX. HOWRAH

The attention of the public is drawn to para 23 (6) of Chapter XV at Page 160 of this Railway's Time Table and Guide in force from 1st April, 1941 which reads:—

Applications received before tickets are available for issue will be registered but allotment of berths and compartments will only be made strictly in order of presentation of tickets and not registration.

Purchasers of I and II Class tickets are reminded that tickets for distances 250 miles and over can be purchased in advance and made available for commencement of journeys up to midnight of the third day from date of purchase.

With immediate effect the above rule will be strictly enforced and berths registered in advance either in Train Services or in Air-Conditioned Coaches will be CANCELLED and allotted to other ticket holders unless tickets are purchased and presented for final reservation by 4 p.m. of the day preceding the date of departure.

WHEAT

Calcutta, June 12.

THE wheat market continues to exhibit former firmness. Cawnpore Ready is quoting at 4/4 and the rate for September delivery is practically unchanged at Rs. 4-9. Weekly reviews continue to dwell on the fact that demand has broadened and producing centres are not keen sellers. The general belief that prices are stable finds support in quotations from Hapur and Karachi. The small advance cotton has steadied up prices at Karachi where Choice White ready stands at Rs. 30-10-6 per candy. The premium for September delivery is maintained and the quietness of Bombay or the lassitude of linseed will not produce any change. An expansion in the demand for flour has been reported in Calcutta, and the increase in seaborne imports of wheat as compared with last year is accompanied by a fall in imports from abroad. The stock position in Karachi encourages optimism, but export may not be a helpful factor. Oversea advices indicate that the main producing countries will have longer crop and fewer markets. This will certainly check any advance in India which cannot hope to get a look in when Australia is ready to sell at reduced prices.

The situation prevailing in the cotton market particularly during May was such that the spot market was disorganised and therefore the Board had to fix these rates in such a manner as to restore confidence in the Trade and to prevent the dislocation of the market and development of a crisis. No arbitrary minimum rate was fixed by the Board as stated in the article, but the Board had to discount certain artificial position prevailing in the market in fixing the rates. This action of the Board was fully justified, as subsequent events proved and was welcomed by the Trade as a whole.

Further your correspondent's remark that 'the reduction of the margin payable by those who don't accept cotton offered has reduced the volume of cotton tendered' is not correct as the tenders during April and May totalled 252,400 bales which is the largest quantity of cotton delivered on docket since September 1922. As regards the July-August contracts it is an acknowledged fact that there will be a definite shortage of cotton tenderable against the Broach Contract owing to the open position which is estimated at about 300,000 to 400,000 bales. Recognising that position the Board of the East India Cotton Association Limited issued a notice on the 19th May 1941 warning both longs and shorts to avail themselves of every opportunity offered to liquidate their positions, failing which, it was made clear that, action would have to be taken by them according to the conditions the prevailing.

(*Continued from page* 1085)

change the basis to new crop Broach. The developments during April and May showed that the Trade had not done this to be expected extent and it was an acknowledged fact that an extraordinary state of affairs had developed in the cotton market. In view of this the Board resolved to take over from 17th May 1941 the fixing of daily rates themselves, in accordance with the powers vested in them under the By-laws and also in view of the responsibility imposed upon them under the Memorandum of Association of the Association for the prevention of and dealing with 'Corners' or 'Bear Raids' in any and every kind of cotton and cotton transactions so as to prevent or stop or mitigate undue speculation inimical to the trade as a whole.

With regard to the remark made by your correspondent that "the power to fix rates that an arbitrary minimum may be chosen and the trade cannot expect the forces of demand and supply to work," it may be pointed out that as far as the hedge contract rates were concerned, they were registered by the Board according to the ruling rates, but the spot rates were fixed for the purpose of invoicing back cotton tendered against hedge and delivery contracts, rejected in survey and-or appeal. According to the definition of "Spot rate" under the By-laws, it ordinarily means the market rate of the day for ready cotton and shall when the circumstances so require, be deemed to include any rate for ready cotton fixed by the Board e.g. in the case of a crisis in the trade, actual or anticipated.

It's a Fact—

that you can practically mint money without the slightest effort on your part by depositing your surplus income regularly with the Palai Central Bank. Year by year, add the interest earned to your capital and watch the total grow steadily and safely.

Stock Markets to-day and to-morrow

TITAGHUR PAPER : HIGHER PROFITS

THE course set for stock markets this week, both in Calcutta and Bombay, has been uninterruptedly good. The market barometer seems to be set fair, and dealings are already marked by a note of distinct optimism. The improvement has, of course, been stimulated by the recent speech made by Mr. Churchill and the progress of operations in Syria. The chief centre of interest has naturally been the market for jute shares; in many scrips the rise during the past few days has been very considerable. The political situation abroad or at home, however, has not yet cleared sufficiently to permit larger commitments, though speculative interest is not altogether absent in all markets. Of late the continued international tension destroys any incentive which might otherwise develop, either for investment or speculation. It would be more than ever difficult to look for any well-defined movement in any direction. The technical position, however, is extremely good, and this accounts for the rapidity of the improvement. In the circumstances of today, with political conditions virtually unaltered, a week or two of mild improvement would seem at present to be a very real blessing, not unexpected or undeserved, as one might be tempted to add.

* * *

Despite a further increase in the prices of raw materials, chemicals, etc., it has been possible for the *Titaghur Paper Mills Company, Limited* to report an increase in earnings for the half-year ended 31st March, 1941 by about 25 per cent. The full published accounts, now available, indicate that the Company has made substantial progress during the last six months ended 31st March 1941. The net profit, before providing for taxation and depreciation, is Rs. 37,65,913 against Rs. 30,31,433 in the previous half-year. Owing to the company's liability to E. P. T. and the imposition of the higher charge on both Income-tax and Super-tax, the provision for taxation has naturally absorbed the greater part of the increase in earnings, the amount allocated on this account alone being Rs. 19,30,000 against Rs. 13,80,000 for the previous half-year. The provision for depreciation is Rs. 4,84,981 against Rs. 6,88,671 previously. In regard to depreciation allowance the Central Board of Revenue agreed to allow additional depreciation to concerns working multiple shifts, the company was permitted to make a substantially greater allowance for depreciation for Income-tax purposes than was thought at the closing of the accounts for six months ended 30th September, 1940. As the depreciation provided for the half-year 31st March, 1940 was not found to be adequate, the allocation in this regard, therefore, was much as Rs. 6,88,671 of which the provision on account of arrears of depreciation being Rs. 2,83,398. A sum of Rs. 1,00,000 against the same amount previously has been allocated to General Reserve, and Rs. 1,92,923 to other funds against Rs. 1,40,000 in view of the increasing heavy stocks of all descriptions of raw materials and stores at rising prices which the Company is compelled to carry a further sum of Rs. 1,50,000 has been added to the Reserve for Revaluation of Stocks and Stores against the contingency of any change in the value of stocks and spares which must be held. After meeting the dividends on the Preference and Preferred Ordinary Shares, the "A" and "B" ordinary shares receive a dividend of twelve annas per share against annas ten per share, the increase in the distribution this time being in the higher bonus, which is two annas over that for last half-year.

According to the latest report the Mills continue to work to full capacity and are experiencing difficulty in meeting the new and increasing demands for qualities of paper which were previously imported from abroad. Arrangements to enlarge the production of pulp are being successfully developed and progress is being made with schemes to improve and increase the chemical producing plants at the mills. The directors have decided that the Company must continue to conserve its resources to be in a position to meet the economic dislocation and world-wide competition which are bound to come after the war. In view of the increasing difficulties experienced, as regards shipping facilities, the directors have been endeavouring to manufacture as large a tonnage as possible.

* * *

With the coming into operation of a scheme to enlarge the production of pulp and increase the chemical-producing plants at the mills, it may be expected, that costs of production will be reduced further. There is, therefore, every possibility of a higher level of earnings for the current half-year. The news of an increase in the dividend did not come as a surprise to the market. Anticipating an increase in the distribution, there has been a rise in the quotation for the "A" and "B" Ordinary Shares to Rs. 18½. One cannot help concluding, therefore, that the dividend for the current half-year should be much better. At the present price of Rs. 18½ cum-dividend, the shares should be considered attractive.

* * *

Results of three important tea companies of the McLeod group have now been issued and they make a satisfactory showing. The aggregate profits, before providing for taxation, of these three companies, Rajabhat, Rutema and Bhatkawa, for the year ended 31st December, 1940 amount to Rs. 3,37,456 against Rs. 3,78,424.

Of the three accounts published, those belonging to the *Rutema Tea Company, Limited* show a slight increase over the figures for the previous half-year. The rise in profit has been due to the average price realised as also the larger crop. The average selling price was As. 8/6 as against As. /7/- in the previous season. The crop made was 8,831 lbs. against 8,279 lbs. in 1939. The net profit, before providing for taxation and depreciation, is Rs. 86,235 against Rs. 70,550 in the previous year. A sum of Rs. 40,000 against Rs. 35,000 is allocated to Reserves, while the provision for taxation is Rs. 12,000 against Rs. 10,000 previously. The dividend declared is slightly higher at 12½ per cent against 10 per cent. The amount carried forward is substantially higher at Rs. 11,342 against Rs. 8,357 brought in.

* * *

The net profit of the *Bhatkawa Tea Company, Limited* for the same period is Rs. 1,40,277 against Rs. 1,80,614 for 1939. In spite of the decrease in the profit the dividend has been maintained at 35 per cent. The amount set aside to Reserves is slightly lower at Rs. 30,000 against Rs. 35,000 previously. The amount carried forward is more or less at the same level of last year, being Rs. 19,926 against Rs. 19,649.

* * *

The dividend is also maintained in the case of the *Rajabhat Tea Company, Limited* at 25 per cent in spite of the decrease in the net profit from Rs. 1,27,260 to Rs. 1,10,944. The amount allocated to Reserves is, however, higher at Rs. 25,000 against Rs. 20,000 previously and the amount carried forward is also higher at Rs. 23,675 against Rs. 17,371 brought in.

* * *

As there has been a broadening of interest in tea shares for the last few weeks together with the improved outlook for the Tea industry the buying of select shares may be recommended for investment purposes.

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, June 12.

The Calcutta Stock Exchange has maintained a steady undertone during the past week. A comparatively larger turnover, especially, in jute, coal and tea shares, was the chief feature. The improvement in prices, witnessed in the early part of the week, was not fully maintained right till the end. The jute section has been definitely firm with good rises in several cases, while inquiry in the Tea section still continues to broaden and there are unsatisfied buyers for a number of shares. There has been a slightly better feeling in the Coal section too, but rates throughout showed little variation. Cotton mill shares are evidently recovering from the recent setback and the turnover has been fairly satisfactory. In the miscellaneous section, Indian Iron and Steel Corporation closed a shade easier at Rs. 3-4 and Rs. 18-7 respectively. Titaghur Paper, after improving to Rs. 18-8, are slightly easier at As. 18-4.

Government securities have been very steady and the price of 3½ per cent Paper remains unaltered at Rs. 95-14. 3 per cent 1963/65 changed hands at Rs. 95-4; 3 per cent 1951/54 at Rs. 99-14; 4 per cent 1960/70 at Rs. 108-12 and 5 per cent 1945/55 at Rs. 110-15. Among Provincial Loans, 3 per cent 1952 *Assam Loan* were done at Rs. 96-14.

Money conditions have continued easy during the week and the average rate on Treasury Bills remains unchanged at annas thirteen and pies nine per cent per annum.

Among industrial debentures, 5 per cent 1399-41 *Britannia Engineering* was done at Rs. 101.

Business in Preference shares was mostly in the Jute section. *Hukumchond* have been particularly firm at Rs. 127-8. Transactions took peace in *Kamarhatty* at Rs. 156; *New Central* at Rs. 173 and *Howrah 'A'* preferences at Rs. 160-8.

Bank Shares were steady with *Allahabad Bank* preferences at Rs. 151-8; *Central Bank* at Rs. 44-14; *Imperial Bank* contributories at Rs. 382 and *Reserve Bank* at Rs. 103-8.

Among Railway shares, *Mayurbhanj* met with some enquiry and the price improved to Rs. 71.

Prices in the Cotton section are a shade steadier. A good turnover took place in *Kesoram* roundabout Rs. 6-11 following the announcement of the declaration of a dividend of annas two per share as against nil in the previous half-year. The closing price was, however, easier at Rs. 6-6 owing to some profit-taking. There was also a good enquiry for *New Victoria* ordinaries at Rs. 2-6. *Dunbar* were done higher at Rs. 203 and *Bengal Nagpur* at 13-8.

Coal shares showed minor changes in prices, *Bengal* closing at Rs. 354; *Amalgamated* at Rs. 25-4; *Central Kurkend* at Rs. 13-2; *Katras Jherria* at Rs. 24-12 and *Equitable* at Rs. 34-4.

Jute shares continued to be an active market and a fair amount of business was marked. *Howrah* were steady at Rs. 52-10. There was enquiry for *Anglo-India*, which touched a high of Rs. 336, the closing price being easier at Rs. 328. *Kamarhatty* were Rs. 505, *Kankanarrah* Rs. 405, *New Central* Rs. 306, *Nnddea* Rs. 59 and *Reliance* Rs. 57-8. *India*, after moving to Rs. 328, closed easier at Rs. 322.

In the Tea section, the enquiry for select shares continued. *Bishnauth* met with business at Rs. 25-13. *Hasimara* had buyers at Rs. 41-4, *Ethelbari* at Rs. 11-4 c.d., *Rydak* at 55-4 x.d., *New Dooars* Rs. 1,005; *Hantapara* at Rs. 384 and *Rajnagar* at 7-8 x.d.

Among Public utilities, *Bareilly Elec.* were marked at Rs. 12-12 x.d. and *Benares Elec.* at Rs. 14-2.

In the Engineering section, *Indian Iron* touched Rs. 30-10 in mid-week, but at the time of going to press these shares are easier at Rs. 30-4. *Steel Corporation*, which at one time touched Rs. 18-12, are now Rs. 18-7, *Burn & Co.*, ordinary shares were higher at Rs. 38. *Hukumchand Steel* ordinaries gradually improved to close at Rs. 12. *National Iron* were Rs. 8-6; *Indian Steel and Wire Products* deferreds Rs. 34-14 and *Arthur Butler* Rs. 11-2.

In sugar shares, *Buland* were crossed at Rs. 16. A good business was put through in *Carew & Co.*, at Rs. 9-8; *Champarun* at Rs. 13-12 *Balrampore* at Rs. 6-12.

In the miscellaneous section, *Titaghur Paper* fluctuated between Rs. 18-2 and Rs. 18-8 and closed at Rs. 18-4. *Bengal Paper* closed at Rs. 115-8 and *Mysore Paper* at Rs. 14-2. There were buyers of *Ruby General Insurance* at Rs. 6-15. *Borooah Timber* were marked at Rs. 15-12, *Calcutta Safe Deposit* at Rs. 7 and *B. I. C.* at Rs. 4-5. Among Shipping shares, *Port Shipping* were higher at Rs. 7, while *I. G. N.* were steady at Rs. 69. Mining shares showed no change, *Burma Corporation* being Rs. 4-8; *Indian Copper* Rs. 2. Among others, *Midnapore Zemindary* were quoted at Rs. 69, *Dunlop Rubber* Ord., at Rs. 41-8 and *New India Investment* at Rs. 53.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, June 12.

Money: Money conditions remain unchanged, the rate for call money being quoted at ¼ per cent (unlendable).

Exchange Market: Banks were selling T. T. at ls. 5 15/16d. and buying three months' bills at ls. 6 7/32d

Securities: The securities market kept steady during the week, all the issues registering small gians. Business in 3½ per cent Paper was done at Rs. 95/15. Among dated securities, 1948/52 were done at Rs. 97/9; 1951/54 at Rs. 99/14; 1963/65 at Rs. 95/1; 1947-50 at Rs. 102/14; 1960/70 at Rs. 108/15; 1955/60 at Rs. 112/10 and 1945/55 at Rs. 111/1.

Shares: The local share market displayed a cheerful tone during the week with improved buying and prices recorded slight gains. The improvement in sentiment was helped by the firmness of the cotton market. At the higher levels ther was some profit-taking with the result there was some slight setback, the closing levels being, however, the highest for the week under review. The market remains closed to-day owing to the birthday celebration of His Majesty The King Emperor.

Textiles: Buyers predominated in this section during the week and all popular scrips were in keen demand. The strength in cotton and other commodities induced good buying enquiries and prices were quoted slightly higher than in the previous week. *Bombay Dyeing*, after opening at Rs. 1,038/12, registered a rise of about 20 points to close at Rs. 1,057/8. The shares of the *Simplex Mills* were a special feature at Rs. 117 8 following the declaration of a higher dividend of Rs. 6 per share against only Rs. 1¼ per share for the year ended 31st March, 1941. *Central India* were done higher at Rs. 295; *Century* at Rs. 417; *Colaba* at Rs. 179/8; *Gokak* at Rs. 207; *Kohinoor* at Rs. 424/8; *New Great* at Rs. 407 and *Swadeshi* at Rs. 292/8. *E. D. Sasson* were quoted at Rs. 1/6 0.

Hydro-electrics: *Andhra Valley* were done at Rs. 1,640 and *Tata Hydro* at Rs. 179. *Tata Power*, after being done higher at Rs. 1,612/8, closed at Rs. 1,610.

Steels: Steel shares were marked up in the absence of sellers. *Tata* ordinaries opened at Rs. 369 and the deferreds at Rs. 1, 923/12. Prices gradually improved towards the close to Rs. 370 and Rs. 1,925 respectively, which were the closing levels for the period under review.

Banks & Insurance: Bank shares were in demand with sellers reserved. *Central Bank* were done higher at Rs. 45/8, while *Bank of India* were at Rs. 143; *Bank of Baroda* at Rs. 107/12; *Imperial Bank* fully paids at Rs. 1,577; contributories at Rs. 387 8 and *Reserve Bank* at Rs. 104.

In the Insurance section, *New India* were firm at Rs. 45/8, while *Oriental* improved from Rs. 4,000 to Rs. 4,200.

Miscellaneous: *Bombay-Burma Trading* were an active market and the shares touched a high of Rs. 487/8 in mid-week, but closed easier at Rs. 478/12 on profit-taking. *Associated Cement* were steady, closing slightly higher at Rs. 140/12. *Shivrajpur Syndicate*, after touching a level of Rs. 30, closed lower at Rs. 29/8 following the announcement of a reduction in the dividend from Re. 1 to Annas 8 per share for the year ended 30th November, 1940. *Scindia Steam* closed lower at Rs. 19/3 and *Tata Oil* at Rs. 42/4. *Tata Chemicals* had sellers at Rs. 12/2, closing slightly better at Rs. 12/6. *Indian Iron* came to business at Rs. 30/2; *Steel Corporation* at Rs. 18/5 and *Wimco* at Rs. 192.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, June 12.

Prices in the local market showed slight improvement during the week under review. Cotton mill shares were steady. Business in Planting issues were limited.

Securities: The securities market continues to be steady, 3½ per cent Paper being done at Rs. 95/14. Among other loans, 3½ per cent 1947/50 met with business at Rs. 102/10. No business in State Loans was possible in the absence of sellers. Among Provincian Loans, 3 per cent 1952 C. P. were crossed at Rs. 98/1.

Mills: *Buckingham & Carnatic* remained unchanged at Rs. 239, while *Madura* were better at Rs. 36/12. *Cambodia* noted a deal at Rs. 8 10. *Swadeshi* came in for business at Rs. 284 July.

Plantations: Rubber shares continued to be steady, *Cochin Malabar* being done at Rs. 6/12. *Tropical Plantations* were done upto Rs. 19 8 on expectations of a 7½ per cent dividend. Among Tea shares, *Peermade* were in request at Rs. 27/8. *Chembra Peak* were at Rs. 3/6.

Miscellaneous: *Indian Steel Rolling Mills* ordinaries were done at Rs. 7/4. There is a rumour that the second mill of this Company started working recently. *Mysore Chemicals* were a steady feature at Rs. 16/8, while *Tata Chemicals* were easier at Rs. 12 4 on news that the commencement of production will be delayed.

LONDON STOCK EXCHANGE

Few definite indications are forthcoming from the movements in London where interest has been restricted even after the Premier's elaborate analysis of the war situation. Dealings on most days were tempered by the caution appropriate to wartime and the relief given by evidence of a firmer tendency in British Funds under the stimulus of the Premier's speech. New war loan moved up to 100½ by Wednesday and old Consols finished somewhat higher at 78⅞. The response of the Foreign Bond section to war news was distinctly gratifying and the rise in Egyptian Unified has been referred to more than once. India loans displayed usual steadiness and the decline of half a crown in 3½ per cent stock on Wednesday may be ignored. The return of confidence to the industrial section has been noticed and rises in textile issues reflected the revision of earlier views. The leading industrials do not show much change as compared with Home Rails which are definitely recovering. A late rise in Transport 'C' attests the better feeling prevailing.

Cable and Wireless stock is said to have eased abruptly on the dividend of 4 per cent only but traces of recovery in tobacco shares support the belief that Home Industrials are attracting more attention. A feature of some interest is the rise in *Ford Motor* in a dull market. Interest in gold shares is known to have been bought. Among dividend-payers Spring Mines split shares of 5 shares have turned firmer at 22-6. Among base metal issues *Burma Corp.* has been a shade firmer. The improvement in Iraq is reflected in the higher quotation for *Anglo-Iranian Oil* which has been the centre of interest in an otherwise listless oil market. *Trinidad* issues have exceptionally hardened and *Attock* at 35/- has been a firm spot.

NEW YORK STOCK EXCHANGE

The signs of improvement for which Wall Street has waited have emerged with the assumption of special emergency powers by the President. The major factor is no longer the labour situation but the arms programme. On Thursday Wall Street is said to have opened firmer after showing exceptional firmness on Wednesday. The leading industrials are definitely higher on the last week and the outstanding improvement in *U. S. Steel* Common now standing at over 56 has contributed directly to the firmness noticed in Bombay since Tuesday. The support for automobile issues has increased and the best feature of the past week has been the continuous advance over a wide front. The Premier's speech had little or no effect on New York where war news counts for little against the increase in support for the Administration's policy. The fears of taxation may persist but Wall Street's nerves are definitely stronger.

THE TITAGHUR PAPER MILLS CO., LTD.

NOTICE is hereby given that an Extraordinary General Meeting of the Members of the abovenamed Company will be held at the Registered Office of the Company, Chartered Bank Buildings, Clive Street, Calcutta, on Friday, the 4th of July, 1941, at 11.50 o'clock in the forenoon, for the purpose of considering and, if thought fit, of passing the following Resolution, which will be proposed as a Special Resolution, viz.:—

(*Half-yearly meeting 4th July*, 1941 *at* 11-45 *A.M.*)

Audited accounts for the half-year ended 31st March, 1941:—

After allowing for General and Debenture Interest, Commissions and Allowances, Provision for Taxation (including Excess Profits Tax), etc., the accounts show a balance of Re. 18,85,913-0-8. There has been set aside for Depreciation Rs. 4,84,980-9-11 while Rs. 1,00,000 has been transferred to General Reserve, Rs. 1,50,000 to Reserve for Revaluation of Stocks and Stores, Rs. 50,000 to Reserve for Labour Quarters and Welfare, Rs. 40,000 to Indian Workers and Indian Staff Pensions, Rs. 1,02,923 to Bad Debts Reserve, and Rs. 2.50,000 to Debenture Redemption Reserve. The balance remaining, after giving effect to these transfers, is Rs. 6,58,009-6-9, which, together with Rs. 1,35,836-0-10 brought down from last half-year, gives a total of Rs. 7,93,845-7-7.

The amount set aside in the accounts for taxation covers Excess Profits Tax calculated to be due to the profits for the half-year, also Income Tax and Super Tax.

The directors propose that the balance available for distribution be disposed of as follows:—

	Rs.	As.	P.
In paying a dividend on the 1st Preference Shares at the rate of 8 per cent, per annum, free of Income Tax ..	46,000	0	0
In paying a dividend on the 2nd Preference Shares at the rate of 5 per cent, per annum, free of Income Tax	37,500	0	0
In paying a dividend on the Preferred Ordinary Shares at the rate of 10 per cent, per annum, free of Income Tax ..	21,875	0	0
In paying a dividend on the "A" and "B" Ordinary Shares at Annas eight per share, free of Income Tax ..	3,50,150	0	0
In paying a bonus on the 'A" and "B" Ordinary Shares at Annas four per share, free of Income Tax ..	1,75,075	0	0
In carrying forward	1,63,245	7	7
Total Rs. ..	7,93,845	7	7

Notwithstanding the satisfactory results of the half-years working, the directors, after giving careful consideration to both the present and the future position of the Company and the paper-making industry as a whole, have decided that the Company must continue to conserve its resources to put it in a position to meet the economic dislocation and world-wide competition which are bound to occur after the war. It will be realised that the future of the paper-making industry here under normal conditions will continue to depend upon the provision of protectice by Government.

The mills continue to work at full capacity and are experiencing difficulty in meeting the new and increasing demands for qualities of paper which were previously imported from abroad.

Arrangements to enlarge the production of pulp are being successfully developed and progress is being made with schemes to improve and increase the chemical-producing plants at the mill, all of which require further financial provision. In view of the increasing shipping difficulties, it is extremely important to endeavour to manufacture as large a tonnage of chemicals as possible.

It will be realised that all paper mills in this country depend for their operation on imports of machine clothing, machine wires, dyes, chemicals, etc., and although the mills have hitherto held adequate stocks, these have now to be replaced at greatly increasing values.

In view of the increasingly heavy stocks of all descriptions of raw materials and stores at rising prices which the Company is compelled to carry, a further Rs. 1,50,000 has been added to the Reserve for Revaluation of Stocks and Stores against the slump in stock values which must be expected.

Managing Agents.—Messrs. F. W. Heilgers & Co.

Authorised, Issued and Subscribed Capital—Rs. 65,89,000 in 3,50,000 'A' Ordy; 3,50,300 'B' Ordy; both of Rs. 5 each; 1,75,000 Preferred Ordy. of Rs. 2½ each; 15,000 5% Cum. Pref. of Rs. 100 and 11,500 8% Cum. Pref. of Rs. 100; all fully paid up. Debenture Capital—Rs. 25,00,000 in 2,500 4½% taxable bearer bonds of Rs. 1,000 each, repayable at par on March, 1946, with the option of repayment at par at any time, in whole or part, on or after 1st April, 1941 on 3 months' notice.

(*Half-yearly meeting, 25th June, 1941 at noon.*)

Audited accounts for the half-year ended 31st March, 1941:—

	Rs.	As.	P.
The balance available for appropriation after the inclusion of the amount brought forward from the previous half-year is	95,521	8	10
Out of which the Directors recommend the payment of a dividend at the rate of 15% per annum, free of Income Tax, absorbing	88,125	0	0
Leaving to be carried forward	7,396	8	10

Sales:—Demand for the class of coal continues to be satisfactory and a substantial contract for the year 1941-42 has again been secured from the G. I. P. Railway. Costs show an increase, largely owing to the higher prices of all stores but, unfortunately, so far there has been no corresponding advance in selling prices. *Output* during the half-year was adversely affected by labour trouble.

Managing Agents:—Messrs. Shaw Wallace & Co.

Authorised Capital—Rs. 12,00,000 in 1,20,000 shares of Rs. 10 each. Issued and Subscribed—Rs. 11,75,000 in 1,17,500 shares, fully paid up.

MARKET POINTERS

WORLD CONSUMPTION OF JUTE:

THE Indian Central Jute Committee has just issued an important brochure entitled "World Consumption of Jute, 1938-39 and 1939-40" (Economic Research Bulletin No.I.). This publication has brought together much valuable statistical material on jute trade and industry and gives various estimates that are not available elsewhere.

Reliable estimates of the total consumption of jute in the world are given in this **Bulletin** for the period from 1933-34 to 1939-40. They show how this figure reached its peak in the year 1936-37, when an aggregate consumption of about 123 lakhs of bales was reached, and how inspite of the hectic buying at the beginning of the war, the total world consumption of jute in 1939-40 fell considerably short of this peak figure. Independent estimates of the yield of the jute crop are also given for the 1938-39 and 1939-40 seasons. The **Bulletin** also embodies the results of important investigations carried out by the Economic Research Sub-Section of the Committee in connection with the estimation of the world consumption of jute. These cover a number of important subjects, such as the trend of Indian jute mill production as compared with that of world industrial production, changes in the jute export trade, effect of war on the consumption of jute, etc.

An interesting feature of the **Bulletin** is an attempt to give a general idea of the extent of jute consumption in the 1940-41 season on the basis of the demand for jute in the first few months of the season. The brochure concludes with a forecast that the consumption of jute in 1940-41 will be abnormally low.

WHOLESALE PRICES IN BOMBAY:

Wholesale prices in Bombay went up further during April according to the May issue of the **Labour Gazette.** The wholesale prices index number rose by two points to 122, but that for food articles declined by five points. The working class cost of living index number in Bombay in May moved up by one point to 122, despite the fact that the index number for food articles remained unchanged at 138.

* * *

ELECTRICAL ENERGY PRODUCTION:

Messrs. Tata Hydro-Electric Agencies Limited, Agents for the Tata Hydro-Electric Power Supply Co., Ltd., the Andhra Valley Power Supply Co., Ltd., report that the total electrical (Board of Trade) units generated at the three Power Stations at Khopoli, Bhivpuri and Bhira during the week ended June 3 were 18,783,000 as compared to 15,846,600 for the same period last year.

* * *

KOLAR OUTPUT:

The total output of the four Kolar companies during May, 1941, was 19,868 fine ounces of gold by crushing 56,038 tons of current ore and 636 ounces of gold by treating 9,635 tons of old tailings—a total of 20,504 ounces of gold, as compared with 24,321 ounces in March and 23,408 in April, 1941.

SHIPPING COMPANIES AND INCOME-TAX RELIEF:

It is learned that additional concessions in respect of depreciation for income-tax purposes have been granted to Indian shipping companies.

From September 1, 1939, to a date six months after the cessation of the present hostilities all ocean-going ships will be allowed depreciation at the rate of 6 per cent instead of 5 per cent as at present. Furthermore, the United Kingdom practice has been adopted to deal with cases where ships are purchased second-hand.

Under this decision life allowed for a second-hand ship will be more than the normal life allowed for depreciation purposes. For instance, if the normal life of a ship, for depreciation purposes is 20 years and that ship is purchased when it is 15 years old, the permissible life would be more than the remaining five years.

Then again, in the case of second-hand ships, if additions are made to them, say the installation of a refrigerating plant or a new boiler for the engine, the permissible life of the additions will be the remaining life of the ship and not the normal life of the additions.

WORLD OF INDIAN FINANCE

Friday Evening.

SHORT credits have been in plethoric supply; and interbank call money continues to be nominally quoted at ½ per cent in Clive Street and ¾ per cent in Hornby Road. At these rates, there are no takers. Owing to the comparatively attractive yield available on Treasury Bills, and owing to tap bills continuing to be on offer, banks are definitely interested in term deposits at the quoted rate of ½ per cent for one month to four months. Treasury Bill maturities between June 12 and June 17 were only Rs. 1¾ crores. During this period, the amount put up by the market for tender bills and tap bills was no less than Rs. 4,45½ lakhs. That fresh sales of Treasury Bills exceeded maturities by over Rs. 2¾ crores did not seem to make much difference to the money market. The Imperial Bank must have taken a lion's share in the Treasury Bills sold this week. The statement of the Imperial Bank for the week ended June 30 shows a rise of nearly Rs. 1 crore in investments from Rs. 59.74 crores to Rs. 60.72 crores. The increase of Rs. 1 crore must be, presumably, connected with further additions to its treasury bill port folio. It may well be that the bank had, in its portfolio, some Treasury Bills maturing during this period. That is to say, out of nearly Rs. 4¾ crores of Treasury Bills sold by tender and through the tap, anything like 40 per cent might have been the contribution of the Imperial Bank.

In spite of such a considerable drain of cash resources from banking circles, cash balances maintained by scheduled banks with the Reserve Bank have gone up in the week ended June 13 from Rs. 26.75 crores to Rs. 27.96 crores. It is also noteworthy that, despite the Imperial Bank investigating a further Rs. 1 crore in Treasury Bills, its cash has risen from Rs. 9.45 crores to Rs. 10.11 crores. That the Imperial Bank has thus strengthened its cash position in a week in which it has subscribed for more Treasury Bills, and that member banks have increased their deposits with the Reserve Bank in a week in which Treasury Bill maturities fell far short of fresh sales of Treasury Bills, may be taken as definite evidence of the return of funds engaged in produce finance. More accelerated return of produce finance must be expected in the remaining days of June and in the early half of July. We should, therefore, infer that cash resources must be piling up in the hands of banks; and that subscriptions to Treasury Bills must be on a substantial scale.

On June 17, the amount offered of three months Treasury Bills was Rs. 2 crores. Applications came to Rs. 2.82 lakhs as compared with Rs. 3,23¾ lakhs on June 10. The average rate of accepted tenders this week is annas thirteen and pies eleven per cent per annum, which compares with annas thirteen and pies nine last week. The offer of tender bills for next week remains unchanged at Rs. 2 crores. Sales of tap bills between June 11 and June 16 amounted to Rs. 2,45¼ lakhs as compared with Rs. 2,20 lakhs between June 4 and June 9. Sales of tap bills are to continue, the tap rate being unchanged at Rs. 99-13-0.

The statement of the Reserve Bank for the week ended June 13 for the issue department establishes a new record in active circulation of notes in India. The figure as on June 13 is Rs. 261.25 crores. Since the beginning of this year, active note circulation in India has gone up from Rs. 229.96 crores to Rs. 261.25 crores or by Rs. 30.29 crores. This is a period during which there has been nothing like panicky hoarding of currency or coin. Nor is this a period which has witnessed anything like sensational rises in commodity prices or any greatly extended activity in the stock exchanges. It is true that, both in commodity and share markets, prices are definitely higher; but the rises are comparatively modest. The increase in active note circulation of over Rs. 30 crores cannot, therefore, be connected with increases in prices.

A more appropriate explanation is the increased demand for currency set up by the high tempo of manufacturing in war stimulated industries. That the disbursements made by the Government on account of purchases of general war supplies and on account of the considerably enlarged manufacture of munitions in their own factories and in other engineering workshops, must be on the big side in recent months, may now be taken for granted.

There is no other feature of interest in the Reserve Bank's return in the issue department. Rupee coin is slightly lower at Rs. 35.57 crores as against Rs. 35.70 crores. The return for the banking department does not also call for any detailed comment. The deposits of the Central Government have gone down from Rs. 6.31 crores to Rs. 5.91 crores; and that of other governments from Rs. 4.24 crores to Rs. 3.60 crores. The deposits of the Burma Government, however, have gone up from Rs. 2.02 crores to Rs. 2.22 crores.

TREASURY BILLS

India

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills were opened on Tuesday June 17, 1941. The total amount offered was Rs. 2 crores, 82 lakhs and 50 thousand. Tenders at Rs. 99-12-9 per cent. were accepted in full and those at Rs. 99-12-6 per cent. were allotted approximately 69 per cent. The total amount accepted was Rs. 2 crores, the average rate of accepted tenders being annas thirteen and pies eleven per cent. per annum.

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills will be received on Tuesday, June 24, 1941. Successful tenderers should make payment on Friday, June 27, 1941. Other conditions are as usual.

Three months' Intermediates will be sold from June 18 to June 23, 1941 at Rs. 99-13-0 per cent. subject to the conditions previously announced (viz., sales can be stopped at any time without previous notice if Government think it necessary).

Three months' Intermediates sold from June 11 to 16, 1941, amounted to Rs. 2,45,50,000.

During the week ended June 13, 1941, Government of India Treasury Bills for Rs. 3,26,50,000 were sold in favour of the Issue Department of the Reserve Bank of India.

MILLS
CAWNPORE

Telegrams : MISRA, Cawnpore Telephone : 2336 Cawnpore

THE MISRA HOSIERY MILLS have, from the commencement of the war, been "on active service." Working day and night, the mills have been supplying essential requirements of the Army in the knitting line.

MISRA HOSIERY cater to the requirements of the general population and comprise socks, stockings, undervests, sports shirts, interlock underwear and outerwear, for men, women and children.

Production 8,000 Articles, daily.

Finance Abroad

Friday Morning.

IF the interest of the world has shifted rapidly from movements in the exchanges to political events abroad, the explanation is ready to hand. The U.S. President's order for the immediate freezing of the assets of the Axis in the U. S. A. followed after a lengthy interval the statement of Mr. Morgenthau that the barn was nearly empty. The order issued last weekend covers not only Axis assets but also the assets of invaded and occupied countries not covered by previous orders. The order is the culmination of a series of blocking orders, and the only question that arises is what will be the amount brought under the order. It has been said that Axis assets total in value only $200 millions while the freezing of the assets of other occupied countries—the question is do Syria and Lebanon come under this grouping—may produce inconsiderable sums.

It is obvious that in the retaliatory action that has followed in Italy and Germany, there is going to be a larger sacrifice on the part of the U.S.A. nationals. The present estimate is 569 million dollars. It is, of course, known that exchange regulations had made transfer impossible and the Italian procedure prior to temporary sequestration, in spite of its being a copy of U.S. Treasury procedure, shows that Italy is not over-scrupulous about taking a little more than is due to her. In view of the report that Greece would become as dependency, there was a real need to freeze Greek assets in the U.S.A. Private remittances must have ceased earlier but the Axis Powers cannot hope to take the funds over now or in the future.

The order is the logical sequel to the statute empowering the U.S.A. to take over ships temporarily sheltering in U.S. ports and the breach was complete with the expulsion order served on the consular establishments of Germany. The further steps taken to suppress Fifth Column activity, promoted by the German consular corps, indicate that the U.S.A is not worrying over possible reactions. The order passed last week states that it is issued under the emergency vested in the President. The Treasury is said to have moved already. The freezing order brings all transactions in which German and Italian interests are involved under the control of the Federal Government and heavy penalties are laid down for persons who fail to comply with them. The order is intended to prevent the use of financial facilities in the U.S.A. in ways harmful to U.S. defence, to prevent liquidation in the United States of assets looted by duress and conquest and help curb subversive activity in the U.S.A. To assist in implementing the control of Axis assets, the order, has been extended to all countries but provision is made to exempt through the medium of general licences Finland, Portugal, Spain, Sweden, Russia and Switzerland. The non-belligerents have no reason to be annoyed by the order and two of them, Sweden and Switzerland, have taken care to take the bulk of their funds out before the freezing order was passed.

It has been said that exemption will be given only on receipt of adequate assurance from the Governments of the six countries that the general licences will not be used by them or their nationals to evade the order. Interest in the freezing order has again raised the question as to how U.S. interests would fare in the parts of Europe under Axis control. The usual diplomatic courtesies have been dropped and the U.S. Government is not worried about consequences. Questions of compensation do not arise as the U.S.A. is now anxious to restrict oil supplies to Japan the partner of the Axis. The U.S.A. is moving ahead and congressional opinion has evidently kept step. Non-belligerency has been proclaimed after the sinking of the **Robin Moor** and ample aid to Britain is assured by the Administration.

The London money market is steadier than ever. The increase in the note issue ensures ample funds and the pressure of demand is reflected in the fall in the Treasury Bill rate last week to 19s. 11.88d percent on three months bills for £75 millions of bills sold last week. The market quota dropped to 26 percent from 34 percent. This shows that Public Departments are taking up more bills as they have more funds and this proves incidentally that the market syndicate cannot expect better terms for the next month. The rise in circulation means that there will be no stringency as is usually noted at the beginning of July.

The volume of applications had risen last week to 166 millions from 156 millions and a further rise is certain as discount houses were keen takers of bills last week and were free lenders. Discount rates are pegged and exchange rates are firmly held by control. Exchange rates in Bombay show no change except for a further rise in the rate for Hongkong dollars. The selling rate for both T. T. and D. D. has gone up to Rs. 85¼ per $100. The Japanese currency is steady around 77¼-81½ per 100 yen and the wide spread between the selling and buying rates is not unusual. The steadiness of sterling explains the absence of any change in the rates this week for all foreign currencies.

The only item of news to attract attention this week is the report that Australia is ready to spend more. The Commonwealth Treasurer has indulged in some plain speaking for the good of his countrymen. Another item is that the U.S.A. will carry cooperation with the Dominion of Canada to its limit. The St. Lawrence power agreement though it has no bearing on war production proves that Canadian policy is more and more in line with U.S. requirements.

Another item of intelligence relates to the success of the F.M.S. Government loan of 20 million Straits dollars following the un-exampled success of an earlier loan of $20 million. The money will be given to the British Government. A big agricultural producer like Australia thinks now of reducing consumption according to the Premier's broadcast. The cutting down of imports is foreshadowed. This means that trade with India will not be allowed to develop freely. A ban on strikes and a revision of the call-up procedure have been foreshadowed.

The only other item of interest relates to the withdrawal of control on remittances of sterling by residents in Iraq. With the return of peace there is no need for such control and Captain Eden who told the House of Commons that the new Government would observe the Treaty of 1930 loyally announced also that sterling balances would not be blocked. Residents in Iraq could draw on London and remittances would not be forbidden.

Syria and Lebanon are now countries with which commercial intercourse is at an end. Articles in the Egyptian press have referred to the scarcity of consumption goods and the addition of paper assets to the Central Bank's reserve has not obscured the reduced backing provided by French treasury control and inflation is not the worst of the evils seen. The cupidity of the French officials in the Mandate has been described by a Rotarian visiting the States. The Syrian pound has depreciated considerably according to a Syrian contributor in a Cairo newspaper. Over a long period the Mandate has had a large import surplus and the shortage of imported goods must tell severely on the population. The Syrian pound divided into 100 piastres used to be worth 20 francs (one piastre=20 centimes) but it must have depreciated along with the franc. Though wheat, tobacco and silk have been produced for export in Syria, agriculture is not very advanced. Minerals are scarce, but there are indications of phosphates, lead, copper, antimony, nickel, and chrome. Germany's interest in the

War—and Ways and Means Budget : III

An examination of the changes effected by the war in our remittance programme will complete the picture sketched in this series. As we pointed out in the first article, the Indian Government, till a few years back, needed to provide as much as £30 million annually to the Secretary of State. In the years immediately preceding this war, the remittance programme had been slightly reduced and Home Charges could be met if remittances were made for roundabout £27 million. We had also pointed out that the raising of a sterling loan has, in recent years, ceased to be a ways and means problem. Both in regard to the size and nature of our remittance programme, and in regard to sterling loans, the change wrought by the war may be described as truly astounding. Without seeking to anticipate the conclusion of this study, we may say that the present position is that, instead of the Indian Government having to remit money to London, they will be actually receiving money in the form of sterling credits; and, instead of India having to raise any sterling loan in the London market, she is now enabled to redeem a good part of the old sterling stocks long before their dates of maturity. This transformation from a debtor status to an almost creditor status is an interesting, though not an unexpected, phenonemon, to which reference has been made from time to time in these columns. In the present context, it will be useful to study the problem in its entirety.

Even in the last war India was building up sterling credits on a substantial scale; and many of the factors which led to such accumulation of sterling balances on that occasion, are present today. The main differences are that our surplus sterling resources have, during the present war, piled up at a faster rate; and that there are at work some new factors which are responsible for accelerating the pace of accumulation.

During a war period, imports into India tend to be reduced to the minimum. For one thing, the country from which we import most of our requirements in normal circumstances is the United Kingdom; and while the industrial resources of the U. K. are diverted to the manufacture of munitions and war materials, many of the lines which Britain usually supplies are no longer available during a a war. It is true that attempts are made to secure similar articles from other sources. But, owing to the necessity to conserve foreign exchange, various import restrictions have been imposed, and these restrictions are both extensive and severe in the present war. The result is that the imports that are permissible and that we do manage to get can amount only to very little. It has also been the experience that war stimulates domestic industries; and this process of domestic manufactures taking the place of imports has been strengthened by the higher industrial status of India at the beginning of this war by the quickened activity in war-stimulated industries.

While our imports are thus under the most rigorous control, and are kept at the lowest possible by the operation of various factors, exports are not subject to similar restrictive influences. On the other hand, the main handicap with which exports have to contend is the difficulty of securing adequate shipping facilities. Otherwise, the various factors at work are all calculated to expand and extend our export trade. India is, in this war, not only the granary but the arsenal of what has come to be described as the Eastern Group of the Empire. This country is now manufacturing a wider range of war materials on a far bigger scale than in the last war. These supplies have to be made for more theatres of war than was the case in 1914-18. In respect of supplies of war materials and other articles connected with military preparations from Egypt in the West to Singapore in the East, the exports that India is able to make in the present war are of quite colossal proportions.

On private merchandise account also, India is fortunate in being able to supply many commodities in which she has a monopolistic or semi-monopolistic position. There is, thus considered, an irreducible minimum in India's exports.

This country has been continuing to export gold; and this is another contributory cause for the accumulation of foreign balances.

Sir Jeremy Raisman was responsible for concluding an arrangement with the British War Office whereby all military expenditure incurred by India over and above the figures arrived at on the basis of the new convention, will be borne by the British War Office. Before the war began, the British Government had undertaken to make a contribution towards the mechanisation of the Indian Army. By the operation of these two factors, considerable sterling credits have accrued to the Indian Government.

Taking all these factors into account, it may be said, in bread terms, that India has accumulated as much sterling balances within the twenty-one months of this war as she had done in the four and odd years of the last war. We may now attempt to make an estimate of the sterling balances which have been acquired since the beginning of the war. On September 1, 1939, sterling securities held in the issue department of the Reserve Bank stood at Rs. 59.50 crores; the latest return, which is for the week ended June 13, 1941, shows sterling securities at Rs. 118.80 crores. There has thus been an increase of Rs. 59.30 crores. Foreign balances held in the banking department stood at Rs. 10.08 crores on September 1, 1939. The corresponding figure on June 13, 1941 is Rs. 37.06 crores. There is thus an increase of Rs. 26.98 crores. Taking the banking and issue departments together, sterling securities have risen by Rs. 86.28 crores.

It is necessary to point out here that the increase in sterling securities would have been much higher if considerable parcels of sterling assets had not been utilised, during

this period, for repatriation or redemption of India sterling stocks. There have been two stages in such sterling stock redemption. In the first stage, sterling securities were purchased from the open market and cancelled. Sterling balances of the Reserve Bank used for this purpose were £24 million or Rs. 32 crores. In the second stage, the dated sterling stocks were redeemed in pursuance of the scheme announced last February. Sterling payments involved in this scheme are £70 million or Rs. 93⅓ crores.

In addition to the withdrawal of sterling assets from the Reserve Bank for the purposes connected with the redemption of sterling securities, the Secretary of State has to be financed with respect to Home Charges during all this period. The exact figure of Home Charges is not available to us. We may not be far wrong in assuming an average monthly expenditure of £2 million for the India Office. That is to say, during the twenty-one months of war, Home Charges should have been approximately £42 million, or Rs. 56 crores.

We are now in a position to arrive at the total of sterling assets acquired since September 1, 1939. Sterling assets acquired during the war period are Rs. 86.28 crores being the increase disclosed in the Reserve Bank return *plus* Rs. 32 crores being the amount involved in the first stage of sterling debt repatriation *plus* Rs. 93⅓ crores being the amount which should have been paid over to the Secretary of State for Home Charges. The total comes to Rs. 267.61 crores or nearly £200 million.

Two important points may be stressed at this stage. The first is that, while, in the last war, our sterling accumulations were not put to any proper use, the surplus sterling resources in the present war have been properly applied to reduce the debtor status of India. We have already paid off nearly £100 million of the debt we owed in the London market. The second point is that, even after these colossal payments, the sterling assets in the hands of the Reserve Bank to-day are higher than at the beginning of the war by as much as Rs. 86.28 crores or £64 million. At the rate at which we are building up our sterling balances, it should be possible, before the end of the year, to tackle the redemption of at least the 3½ per cent non-terminable India sterling stock.

Thanks to the rapid piling up of our sterling resources, the maintenance of the statutory rupee sterling rate has not caused the embarrassment which it used to do in earlier years. On the other hand, if the Reserve Bank had not been a buyer of sterling for indefinite amounts, the rupee-rate must have risen much higher than 1s. 6d.

So far as the Government are concerned, their remittance programmes have undergone a surprising transformation. Because of the sterling credits which they are getting from the British Government, from time to time, in respect of purchases which they make for Britain in the Indian markets and in respect of other commitments which the Indian Government incur for the British War Office, the remittance programme has been becoming smaller and smaller, and, in the current year ,the opposite trend has been manifest. For 1940-41, the original remittance programme was £11 million. The revised estimate, as furnished by Sir Jeremy Raisman last February-end, was expected to be only £1 million for 1940-41. So far as 1941-42 is concerned, far from the Indian Government having to make any remittances from India, they actually expect a refund of £26 million.

Exports to the U. S. A.

The numerous reports that India will in the near future have a representative alongside of the British Purchasing Mission, whose special function will be to stimulate trade between India and the U.S.A. have kindled in a notable degree, interest in a subject that emerged as a topic of public discussion as early as 1936. That Sir Shanmukham Chetty is qualified to undertake the duties of a special trade commissioner goes without saying. There is a belief that the foreign trade of India with the U.S.A. must continue to grow and the 1940-41 trade returns furnish ample support for such a view. Trends in the preceding year, if not uniformly favourable, indicated that expansion in India's trade with the U.S.A. was rapid and the information provided, for instance, in the first annual report of the Indian Trade Commissioner at New York provides ample justification for the view that at present the U.S.A. is second only to the U.K. in India's foreign trade.

The survey puts in their proper place the findings and recommendations of the Meek-Gregory Mission and one can see that the description of the fundamental characteristics of India's export trade with the U.S.A. is quite valid. It is stated that the trade is mostly in primary products or semi-manufactures, secondly, that the articles that India exports to the U.S.A. are for the most part non-competitive with American produce and are, moreover, of considerable value and at times vitally important to American economy, besides being obtainable in some cases mainly or solely from India. It follows, therefore, that India's export trade with the U.S.A. is, generally speaking, complementary to the economy of the latter country and not competitive with it. A third statement for which support must be readily forthcoming is that the volume of India's exports to the U.S.A. usually follows the trend of business conditions in the U.S.A. especially in those commodities which find their main use in American industry.

Broadly speaking, the conclusions drawn in regard to India's export trade are of higher value than the analysis and prescriptions given in the Meek-Gregory report which, concentrating on each item, failed to come to clear conclusions as to prospects, and restrained optimism rather than encouraged it. The report of Mr. H. S. Malik takes up the more important aspects of India's place in U. S. import trade. The rise and fall of the value of imports from India is ascribed to the upswing and depression in the States, and the average value has been only about 3 per cent of total imports. If the trade had not recovered in 1939 to the high level of 1937, there is little doubt that in the year ended March 1941, total imports from India into the U.S.A. would have eclipsed all records. The more important consideration at present is that India's exports to the U.S.A. constitute over an eighth of total exports and the place formerly held by Japan is now occupied by the U. S. A. in both the import and export trade. That the development is directly due to the war and is not unrelated to the adverse influences to which India's trade with Japan is exposed is obvious enough and may recall the experience of the last war, when Japan and the U.S.A. acquired the share of the Central Powers, in India's trade. But the U.S.A. did not retain its wartime gains, whereas Japan did by developing shipping services, and studying the market in the immediate post-war period. That the U.S.A. is not averse to develop trade on broader lines has been inferred fom the striking growth of imports in the year ended March 1941. That was only to be expected after the deduction drawn early in 1940 as regards increased exports from India to the U.S.A. in spite of indications of a recession in the first quarter of 1940.

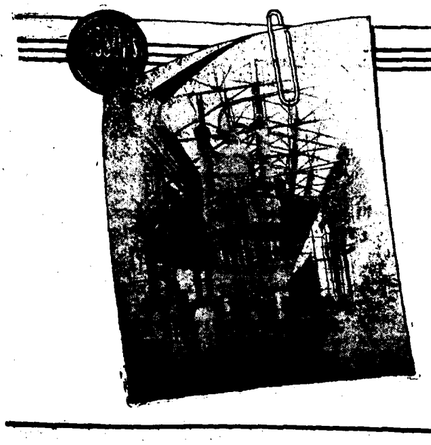
It is rightly stressed that the war confers special opportunities, and conditions in the trade in 1939-40 favoured India. Increased demand was noticed for hessian as consumption showed recovery in 1939 after the decline recorded in 1938, and imports of sacking and hessian from India increased at the expense both of U.K. and other suppliers, but in response to the recovery in the States. The U.S.A. is known to take over half of the total exports of jute manufactures shipped from India and the report urges that the ground that is lost in the bag manufacturing industry must be made up by the Indian mills, by manufacturing larger quantities of the large widths of burlap referred to in an earlier portion of the report (as wanted for linoleum and as foundation

for hair rug liners and punched rugs) of jute webbing and of improving the appearance and finish of burlap, so as to increase the possibilities of its introduction into new fields such as drapery, curtains, upholstery materials etc.

Indian cotton is imported primarily for the manufacturing of cotton blankets and for padding. India has sent more cotton; and imports from North China have declined because of the war in the Far East. It is likely that exports since 1939-40 have increased as stocks by the beginning of 1940, were described as light. It is noteworthy that imports were heavy in 1937 when prices were relatively low and imports from India exceeded those from Mexico over the years cited in the report. The need for improvement in quality is mentioned in order to show that it is essential to keep the U.S. market for Indian cotton, more important on account of the loss of several European markets, and the fall in shipments to Japan.

Larger in value and of higher importance to Indian exporters are the shipments of carpet wools from India. Though India has traded through Liverpool and Argentina holds a larger share of the trade, while the Middle East has no inconsiderable share of the raw wool trade, the imports in 1939 showed that the business recovery of that year in the U.S.A. led to an increase in U.S. takings. But the trend was decisively reversed by the first quarter of 1940 mainly through the introduction of export control, while imports from Argentina showed a striking increase in the period referred to. As stocks had been laid down, U.S. consumers did not experience much difficulty on account of the advance in prices so that there is not much support for the belief that the raw wool trade has suffered on account of price-fixing and export licensing, unfamiliar and strict as they were considered last year. "The American market for Indian wools can be additionally enlarged if the Indian exporter will accommodate his practice to the requirements and customs of the American importer and manufacturer especially in regard to quality." The extract indicates that the outlook is distinctly hopeful as the arms programme leads to a rise in wages and pro tanto to increased expenditure. The situation in the shoe industry is analysed to indicate that India, which ships to the U.S.A. more than half the total goatskins exported in a year has every reason to hope for a larger share, as prices have been stable, and not run up to suit the speculators' fancy.

Imports of tanning materials as well as skins increased during 1939-40. India's exports of myrobalans to the U.S.A. responded to the stimulus forthcoming and suggestions are provided in the report as regards grading and preservation of quality. Though there is not much risk of any substitute displacing myrobalans, any unwarranted increase in prices would lead to a contraction of demand.



Considerable light is thrown on the shellac trade. India holds virtually a monopoly of both lac and shellac and the year covered by the report was notable for an increase in imports into the U.S.A. though prices had moved against U.S. buyers after the outbreak of war. The report discloses that seed lac preponderates in the takings of shellac by the U.S.A. which takes about half of India's total production of lac. Shellac is another article facing the challenge of substitutes and only the discovery of new uses can sustain the demand. The report points to the revival in the gramophone industry which in turn will lead to the increased use of shellac. New paints and varnishes are being produced and shellac is finding application in the manufacture of plastics and sizing materials.

Mica is another commodity for which the U.S.A. is the principal market. One, therefore, turns to the analysis of the trade compromised by the advent of export control but likely to benefit substantially from the U.S. defence programme. Sheet mica is a strategic material needed for the aircraft industry as also the electrical industry in addition to the paper and paint industries which take scrap mica. Imports of mica into the U.S.A. showed a welcome increase in 1939 particularly after the war broke out, but they were greatly below the volume and value of imports in 1937. Until the present, states the Report, India has been the United States' main soure of supply for mica, supplying in 1937, 1938 and 1939 as much as 80.9 per cent; 79.7 per cent and 67.2 per cent respectively of the total imports of mica, exclusive of waste and scrap. And India is holding also the largest share of the trade in split mica. Re-exports from Europe have ceased to be important but imports from Canada, South Africa (mostly scrap and waste) and Madagascar show that Brazil and Argentina are not the only sources of supply. The report adds that imports from all sources in the first quarter of 1940 showed a spectacular increase, particularly imports of unmanufactured mica. As all countries, with the possible exception of the Soviet Union, depend on imports, the world's No. 1 producer of mica need not be alarmed about rivals. It is, however, pointed out that Tanganyika and Rhodesia have important muscovite deposits. Mica remains important in spite of a new patent for synthetic mica. It is known that 'stock-piles' have been built up by important consumers.

Tea and cashewnuts are among the principal imports, and in the case of the former, India can hope to improve her position at the expense of Japan (obviously tea from Formosa) which provided about a quarter of the U.S.A.'s imports in 1939. The Netherlands Indies have the biggest share of imports which is only to be expected, as India, with the biggest share of the U.K. market, has a smaller quota available for exporting to neutral, as distinguished from preferential, markets. The report makes known the fact that an extensive advertising and sales promotion campaign by one of the biggest firms has won for cashewnuts a constantly widening market. India sent over four millions dollars' worth of cashewnuts in 1939 and has little to fear from East Africa.

And the conclusions drawn as regards manganese, titanium ores, chrome ores and pig iron are necessarily of interest for those anxious to assess how far U.S. defence expenditure will promote India's exports. If prices and foods are acceptable, there is reason to hope for a bigger trade in miscellaneous exports and Mr. Malik endorses the view that, in regard to arts and crafts products, the designation, "Made in India," has a definite value in the U.S.A.

An interesting suggestion is thrown out to canners. It is stated that the Mediterranean countries cannot provide the canned shrimp which the U.S.A. and India whose coastal waters harbour the shrimp can expect to take their place.

Higher Cost of Living?

THE *Labour Gazette* published by the Labour Office, Bombay, shows that the working class cost of living index for May rose by one point to 122 (base July 1933 to June 1934-100). The increase occured in spite of the fact that the index number for all food articles remained stationary. The index numbers for fuel and lighting as also clothing rose during the month. The chart appended to the note shows that the index has risen steadily in 1941 whereas the movements last year were irregular. It has been noted that the index number for May is eleven points higher than the number for the corresponding month of 1940. It may be noted that the index finished at 115 at the end of 1940 and has risen since to 122. The Ahmedabad index is known to have risen in April by two points. There will be a natural temptation to relate the movements to the communal disturbances in both cities as the fall of one point in the Sholapur index for April may suggest. But a caution must be uttered. The charts establish that the downward trend in the cost of living noticed after the rise in the war booms has been reversed. The advance in prices (Bombay wholesale prices rose by 2 points in April) finds its counterpart in the rise in the cost of living. Such rises were reported from Nagpur, Jubbulpore and Madras. They indicate that an enquiry such as the one contemplated by the Economic Adviser with the assistance of the Labour Office, Bombay, will not be premature or unwarranted. It is apparent that the war is having its effect on prices, and without any public regulation of wages such as obtains in Britain, the working class will require and clamour for special treatment. The changes since February prove that the G. I. P. railway men's claim had ample support and the dearness allowance which the Court of Enquiry favoured finds impressive support in the movements in the cost of living index in many cities after proof has been forthcoming as to the rise during 1940 of both the food and non-food indices by 5 points to 116 and by 91 points to 119 respectively, while the general index based on wholesale prices has risen by nine points to finish at 118. It is not surprising that labour disputes this year, too, so often turn on the grant of a dearness allowance.

Mysore Budget

The inauguration of the Reforms this month in Mysore gives added interest to the story of prosperity and prudence unfolded by the Budget presented last week. Revenue in 1941-42 according to the Estimates prepared by the Comptroller is expected to be Rs. 7.42 lakhs less than in 1940-41, as decreases are anticipated under several heads such as forest revenue, income tax and the new excise duty on gold. The total revenue is estimated at Rs. 4,58.24 lakhs against total expenditure of Rs. 4,57.04 lakhs leaving a surplus of Rs. 1.2 lakhs. In any comparison with 1940-41 account should be taken of the fact that revenue in 1940-41 according to the Revised Estimates presented together with the Budget showed an improvement of Rs. 26.6 lakhs when compared with the Budget Estimates of last year. As Rs. 5.19 lakhs are payable to the Government of India, the net increase is over Rs. 21.4 lakhs. This will indicate that in spite of the war Mysore looks forward to a larger revenue than that expected last year. The reasons are to be found in the further improvement recorded under Irrigation Receipts from the Krishnarajasagara works, hydro-electric revenue and revenue from the Assigned Tracts in accordance with information supplied by the Residency.

A mark of the Mysore Budget over a long period has been the surplus of revenue as also the increasing contribution made by non-tax sources to Government's expenditure. Both irrigation and hydro-electric works provide together over Rs. 1 crore and this factor helps to render fluctuations in land revenue (caused by adverse seasons) or excise (liable to drop as temperance makes headway) of little importance. The Mysore Iron and Steel Works as mentioned last year continue to share in the prosperity promoted by the war. Profits for 1940-41 are estimated at Rs. 33 lakhs and a further increase is anticipated as regards 1941-42. Out of Rs. 33¼ lakhs expected Rs. 2 lakhs will be allocated to employees' welfare and Rs. 8 lakhs for depreciation. The balance, as may be expected, is appropriated towards the arrears owing to the depreciation account, which means that by the end of 1941-42 a substantial reduction would have been effected under this head by the improvement in receipts during the period 1939 to 1942.

A decrease in public expenditure is almost unusual; but Mysore almost exceptionally looks forward to a fall in expenditure mainly through restrictions on capital expenditure on works and communications. Reduced contributions to the Irrigation Development Fund and the Road Fund are explained by the fall in revenue anticipated under various heads. But the spirit of economy is not allowed to militate against an increase in the provision for primary university education. Apart from funds for additional allowances required by the expansion of the State legislature a block grant of Rs. 1 lakh for Ministers' salaries etc., has been provided in the Budget. The only important item on capital account is the sum of Rs. 42 lakhs made available for the Jog Hydro-Electric project. One of the outstanding features of Mysore finances is the progressive improvement in revenue alongside of the larger expenditure on the beneficent departments. Expenditure on medical relief and urban improvements in 1941-42 is expected to show a considerable increase and rural reconstruction including water supply schemes will take over Rs. 5 lakhs in the coming year. The sources of revenue which have benefited directly from the war are Forest Receipts and, to some extent, the sale proceeds of sandal oil. Demand in Inlia and the U. S. A. is said to have improved. Excise does not show any signs of falling away; but the rise in working expenses militates against any enhanced contribution from railway receipts. The new regime, new

alike in spirit and in the head of the Administration, has thus received a good start, so far as the finances of the State are concerned.

Regulating Oil Consumption

The curtailment of both motoring and oil consumption is foreshadowed in recent reports from the U. S. A. At first sight there might seem little justification for such unusual steps as those that Mr. Harold Ickes is prepared to take, because the export trade in oil has suffered through the war and the licensing procedure has reduced exports to the Far East. During the whole of 1940 the U. S. Oil industry was among those hit by the war. Like the cotton-grower and the tobacco-grower of the south, the oil fields in Oklahoma and Texas experienced adverse conditions and temporary shutdowns took place in more than one state. Consumption prospects naturally worsen with the winter, and only summer motor tours can cause the larger consumption which oil companies look forward to. But this year there are two adverse factors. One is, that the automobile industry has decided on a 20 per cent. reduction in output which means that new models will not be sold; and the more serious one is the Administration's view concerning motoring holidays. It has been said that apart from drastic deliberate restriction of all oil exports to Japan which had been getting more than half her oil after the end of the trade pact last January, the U. S. A. should extend aid to the democracies (including China) by increasing oil supplies for the defence programme and for shipments under the Lease and Lend plan. Various public organisations have only lately appealed for a complete embargo on oil exports to Japan in view of the terroristic raids on Chungking. And the plea has been supported on the score of conservation also. The possible appointment of a controller who will provide oil for essential industries engaged in war production and reduce the supplies for civilian requirements has been referred to, and one may expect that Mr. Harold Ickes as Secretary of the Interior, the author of the prorationing scheme that lifted oil out of the Great Depression will soon apply his powers as he has been chosen for the job of co-ordinating consumption. It may seem surprising that the Eastern States should consider regulating or limiting pleasure motoring for the U. S. A. with a population of 131 million and over two thirds of the world's total oil production. If there is any country which is not confronted by the threat of rationing, it is the U. S. A. yet recent reports suggest that New England may have to face limitation of supplies and camping out in the Adirondacks may become impossible for the New Yorker, while caravan holidays will be a pleasant memory for many citizens.

Manure from Town Waste

The efficiency of agriculture must be interpreted primarily in terms of the use of manure, and the backwardness of India stands out in this respect, too. Dr. G. T. Wrench puts in the latest number of *Indian Farming* a powerful plea for the use of town waste, so far unused. There may appear no need when modern sewage systems are present, to plead for the direct use of nightsoil and other refuse, but there is a pressing demand for additional agricultural production, and urban refuse according to many, represents the best form of manure. Dr. Wrench quotes Dr. King's opinion that nitrogen, potassium anl phosphorous are being washed away in sewage effluents instead of being used for enriching the soil. Dr. King has contrasted this with the agricultural practice in the Far East and has observed that 'the Mongolian races, unable to avail themselves of mineral fertilisers could not tolerate such waste and survive'. Owing to the experience of the last war when foodstuffs had to be grown, there was mild encouragement of the use of town refuse in Britain. Gateshead and several other municipalities turned stable manure, slaughterhouse refuse and town waste from which glass, metal and other hard substances had been removed into manure which was largely bought by farmers. German practice has been far ahead as the slogan in Germany, has been sewage use, not sewage disposal. Turning to India, Dr. Wrench observes that the lessons drawn from the Far East have not been applied. Attempts have been made to use nightsoil and street refuse as in Mysore where these were collected and transported to the fields. The piles were allowed to decompose and, after they had broken down to an odourless humus mass, were used as fertiliser on the fields. A number of towns have adopted composting procedure: as many as thirty towns are in the vanguard as regards the use of town waste. In increasing the use of wastes as a war measure, more rapid results can be secured from towns; but the villages too must learn to adopt their own refuse to agricultural purposes. Dr. Wrench points out that artificial manures, which supply minerals that are deficient in the same way as some medical tonics supply deficiencies in the case of invalids, have their share in promoting soil fertility as a war measure. However intricate this preparation may be, when they reach the cultivator, they are simple in application. Increased fertility of the soil is possible only if wastes are returned to the soil, and farmers are entitled to get additional equipment for adding to the food supply in time of war. Dr. Wrench mentions that Mysore and Bangalore compost their waste and night-soil. A number of towns in Madras and Travancore do the same. The Bombay Municipality tests the composting of its sludge and refuse; Nasik makes poudrette: Jamshedpur turns out activated sludge and Ahmedabad is interested in refuse powdered by a crushing machine. There are also towns that follow either the Indore or Hot Fermentation methods. So one can marshall the following thirty towns as pioneering the use of town wastes for the soil, Mysore, Bangalore, Indore, Alwar, Rewa, Bharatpur, Datia, Neemuch Cantt., Secunderabad Cantt., Nanded, Tollygunge, Shahjahanpur, Sabour, Jaipur, Jodhpur, Madura, Cocanada, Conjeevaram, Tenali, Guntur, Tuticorin, Vizagapatam, Negapatam, Nellore, Alleppey, Jamshedpur, Nasik, Cawnpore, Ahmedabad and Bombay. It seems a long list when it encumbers a sentence. But the practice must spread to other towns and needs to be developed all over the country.

National Indian Life.

The Directors of the National Indian Life Insurance Co. are able to report a recovery in new business after the setback noticed in 1939. The latest annual report states that 3,516 proposals for Rs. 62.38 lakhs were received in 1940 and 2,847 policies assuring Rs. 49.41 lakhs were issued during the year. The total under new business may be regarded as satisfactory. The revenue account shows that total premium revenue for the year amounted to Rs. 13.6 lakhs nearly and investment receipts provided over Rs. 3.09 lakhs. Total income for 1940 amounted to Rs. 16,69,296-9-7 showing an increase of Rs. 1,05,357-3-6 on the previous year. Claims by death and maturity absorbed Rs. 6.93 lakhs and surrenders amounted to Rs. 53,496-10. The total outgo for the year inclusive of claims and surrenders is shown as Rs. 12,07,053-6-2 and the excess of receipts has led to an increase in the Fund which has been raised by Rs. 4,41,881-10-5 to stand at Rs. 72,58,323-0-5. The Directors point to a fall of 1.5% in the expense ratio and refer also to the rise in the lapse ratio, one of the effects of the war. Another effect of the war can be seen in the appropriation of Rs. 45,827-10-0 in the revenue account against depreciation of securities. The Company has not taken into account the appreciation in the value of other securities held in the Life Fund. The market value of investments held by the Company as on December 31, 1940, exceeded the book value by Rs. 3,35,652-15-0. The useful internal reserve is likely to be larger, as there has been since the end of last year a perceptible rise in stock exchange values. The dividend to shareholders is 6 per cent free of income-tax, so that the transfer of Rs. 24,426 made to the Profit and Loss Account covers the dividend amount, many times over, though shareholders will note that their share of this profit has been reduced in order to comply with the provision of the Insurance Act which does not allow the Board

to give credit of the interest on the money earned by the Company's capital at the same rate as earned by the mean Fund of the Company.

The latest balance sheet shows that the National Indian Life is distinguished by a sound and conservative policy as regards investments. The capital, too, remains small and the balance at credit of Profit and Loss Account may be regarded as the Reserve. As against the only important liability, claims outstanding shown at Rs. 3,32,329-1-11 in the balancesheet the company had to its credit outstanding premiums and interest payments due totalling over Rs. 3.5 lakhs. These revenue items are supported by cash assets totalling over Rs. 5.24 lakhs and the high degree of liquidity is as striking a feature as in the past. The distribution of investments is notable for the care exercised in regard to the choice of preference shares and debentures which show an excess of market values over book values. Loans on mortgages shown at Rs. 2.3 lakhs are small compared with policy loans shown at Rs. 10.54 lakhs nearly. The major portion of the Life Fund, as shown by the classified summary of assets, is in stock exchange securities of which Rs. 17.96 lakhs are in Government of India stocks; Rs. 1.78 lakhs in Provincial Government Stocks and Rs. 8.99 lakhs in Municipal and Port Trust loans in addition to Rs. 1.23 lakhs in British, Colonial and Dominion Government stocks.

Fieldman Special Number

The second anniversary number of the insurance journal *Fieldman* is to be specially welcomed as providing, in reasonably brief compass, a picture of the conditions under which Indian insurance continues to progress. The executives of many insurance companies figure as contributors to the 1941 annual. In the estimate of problems and the analysis of trends, the journal adopts a severely practical tone, and the most valuable feature is the advice offered to agents. It is now obvious that if the agent loses his nerve, the acquisition of new business suffers, and there is obviously no place for doubt or anxiety in spite of the war. Successful and experienced agents will agree with the view that agents alone can contribute to an increase in business to the proportions of 1938 and it is to their interest, as of the country, to foster confidence. Indian insurance is in a greatly strengthened position, and adaptability has not been the least of the virtues claimed for a system that has displayed signs of benefiting from the amendments to the law.

An Outline of War Time Financial Control in the United Kingdom :—By Mr. W. F. CRICK : Macmillans Price 6d.

Mr. Crick, in this book, makes an attempt to stress that the recent regulations of the United Kingdom are all part of a connected and comprehensive plan of war effort, though readers of the *Economist* have been fed on an entirely different view. Mr. Crick's account is written in fairly non-technical language and not only covers the wide field of British control of capital and credit, but also gives an account of British regulations relating to

trading with neutral and enemy countries. In the first chapter, Mr. Crick suggests that the comprehensive direction of new investments in Britain by the Government takes the form of persuasion more than of compulsory regulation of control of new investments. The whole aim of the Government has been to ensure that neither long term capital nor short-term credit shall be dissipated through unimportant channels. Such capital as is available, the Government has been anxious to earmark for the production of war materials and not for the expansion of the luxury trades. There has been apparently, in recent months, one important exception to this type of regulation; the Government itself has had to expand certain luxury trades, when the export of such luxury goods enables the Government to obtain either certain necessary raw materials or manufactured goods from countries such as the U.S.A. As significant as the passive or active methods of control pursued by the British Treasury, largely in collaboration with British banks, all the series of prohibitions are calculated to prevent enemy countries from either trading with Britain or realising their capital assets or obtaining interest on ther capital investments in the U.K. At first this type of economic regulation, according to Mr. Crick, was launched on a small scale. Later, in the course of the war, however, the inherent danger of British manufacturing, trading and financial undertakings in different countries of the world losing their foothold was stressed though forced selling was pursued by the British Treasury. The British Treasury, has also taken care to watch the sales of, and control the movements of, British securities whenever they are held by foreigners. The issue of new bearer securities has been, once and for all, prohibited and the conversion of bearer into registered securities is now encouraged. To encourage this process, banks and other undertakings which act as registrars for particular issues have waived the fees ordinarily payable to them for converting bearer into registered securities. Under the existing regulations, sales of securities by Britishers have to be accompanied by a declaration as to residence, and all transactions, whether the parties are residents or non-residents, require a certificate testifying to the absence of any enemy interest in the securities, either at the time of the sale or any other time since the war began.

The final impression produced by a perusal of Mr. Crick's work is that, to a very large extent, largely because of the voluntary co-operation of the Council of the Corporation of Foreign Bondholders, the drain of war on the country's capital resources has been considerably minimised. In any estimate of this legislation, it must always be remembered that most of the measures have been devised and applied to meet the situation as it arose and developed; too fastidious or critical judgment, therefore, Mr. Crick remarks, would be uncharitable. One may remark, by the way, that Mr. Crick is merely content to describe recent types of financial control launched in Britain and does not project his imagination into the future when new problems are likely to arise as a result of wartime regulation being either scrapped or modified.

MR. AMERY is a marvellous tactician. By the same speech with which he set Sir Tej Bahadur Sapru and Mr. Jinnah by the ears, he has also made the businessmen, economists and journalists of India examine elaborately, the obvious. Is India prosperous? All of a sudden, Indians find themselves putting this question to themselves and answering it in the elaborate terms of an enquiry into national wealth. It has been sprung on us as if from nowhere; and with the lack of a sense of humour so characteristic of us, we are seriously debating the question. "Do you believe in luck?" asked an enterprising American journalist of Bernard Shaw and expected to have a long interview and a longish discussion on free will and the like. But G. B. S. cut him short: "Believe in luck? You might as well ask me whether I believe in the sun. Luck is a fact."

And so is India's poverty. It needs no elaborate investigation, no massing of facts and figures, no intricate economic reasoning. It is there for all to see. Anyone in India, be he Indian or European, comes across in his daily life with inescapable proofs of it. Advertise for a thirty rupees job; and you will have thousands of applications from persons who, in any other country, will get three times that wage. Ask an employer; and he will tell you that more than half his employees are below the margin of subsistence. Ask any man in employment or in business; and he will tell you of the dependents outside his own family whom he has to help with a miserable pittance now and again. Go out into the country, watch the labourers at their meal or in their homes, and you will see what frail bonds keep body and soul together in this country. India's poverty is not a matter of opinion. It is no inference, no deduction. It is a plain fact.

But once it is questioned and denied, once the opposite is asserted, the obvious becomes a matter of doubt. The simple becomes complicated. We ask ourselves, what is meant by poverty or prosperity? Is India poor? If she is poor, is she not richer relatively to some previous time or some other country?

Is prosperity such a serious allegation that all our leaders and our press should be concerned to refute it? Sir Ibrahim Rahimtollah has issued a two column statement giving facts and figures to show that India is not prosperous. I understand that Mr. G. D. Birla contributed an article on the subject to *The Searchlight*. The *Patrika* devotes a leading article to the same subject. Normally, one should be glad that one is thought to be prosperous. But when one is in the grip of poverty, any suggestion that one is prosperous seems like adding insult to injury. And it can be literally true when the suggestion comes from the Secretary of State for India.

For myself, the question of India's poverty or prosperity need have no special topical importance. I need not wait for the Secretary of State to make a statement on it to examine this question, though, of course, the statement can be provoking in more senses than one. Looking into the speech of Mr. Amery, I must confess that he did not mean to invest it with any special significance. The reference to prosperity is part of the general assurance he held out to an uneasy Opposition that all is well with India. But even as an incidental observation, it cannot be allowed to pass muster. For, so long as the responsibility of the British Parliament for the governance of India continues, the Secretary of State's words are bound to carry authority. It is more than I can say whether Mr. Amery took the trouble to ascertain the correctness of the statement or simply felt that he could assert a thing so long as the contrary was not proved. One thing, we must say in fairness to Mr. Amery that all the facts of which he has lately had special cognisance by virtue of the office he holds are suggestive of India's prosperity rather than poverty. What is the most outstanding development in India's finances during recent times of which the Secretary of State should have had direct knowledge? The repatriation of our sterling debt. A country which has been paying off its foreign debts on such a large scale cannot be held to be other than prosperous. If, at the same time, Mr. Amery had to open a conference for the revision of a trade treaty or the conclusion of a trade agreement with some foreign country, he would have had occasion to see that at one stroke, India had lost a big slice of her export markets and that she was, as

a consequence, suffering from glut in a number of export staples. He would then have balanced the one against the other and tried to see how best he should qualify the statement about India's prosperity.

Anyway, nothing is gained by treating this question as one of the issues outstanding between India and Britain. It is not as if Swaraj will get nearer, if we can prove India's poverty or that we can get a reduction in our dues to Great Britain. The question has independent importance; and to make it a matter of current political controversy is to cloud the issue and deprive ourselves of any value that this country-wide discussion can have for us. As I hinted at an earlier stage, there is no notion of poverty, except relatively to a given standard of life according to what prevailed at some time in the past or in some other country, or according to certain basic requirements of life. One need hardly take the trouble of arguing that, compared to other countries, India is insufferably poor. I say, insufferably, because once you institute a comparison, you get a devastating sense of inferiority. You feel an unspeakable humiliation that your country comes last, whatever the criterion of judgment. If it is per capita income, it is the lowest among the civilised countries of the country. It may be said that natural resources are larger. But the test is what you make of them. Take agriculture. Whether it is cotton or rice or groundnuts, the yield per acre in India is a fraction of what it is in other countries of the world. If it is industrial labour, productivity per man hour is lower than most countries. You can add other tests, but whatever the test, the result is the same. But these criteria, it must be said, seem to lack validity. Comparisons must be made only between comparable quantities. What is the meaning of comparing the yield per acre or productivity per man hour in India with those in the U. S. A.? And if the two are not comparable, whose fault is it? It is not wholly the people's. By the same token, not wholly the Government's. And there is a sense in which the Government's blame can be ultimately put to the debit of the people.

Leave aside, then, this comparison with other countries. A basic standard of living seems a better yardstick. Yes, a good yardstick. But how shall we use it? Or have we any use for it at all? There has not been a single committee of enquiry into trade disputes which has not felt impelled to confess that the conditions of Indian industry do not allow the grant of a living wage to all classes of workers. Large scale unemployment, under-employment for large masses of people and inadequate wages even for those who have work to do, a sprinkling of income tax payers in this vast country, and a few oases of individuals paying super-tax—that is the picture of India's "prosperity". There are more apposite words to describe such conditions, though Mr. Amery prefers the word prosperity.

But let us not yield to the temptation of suggesting that India has seen better times. India has seen barely better times. But the wealth of Ormuz and of Ind is largely a legend. In trying to get a picture of economic conditions in India in the past, we must remember that there are limits to the poverty of an agricultural country. If you scratch the soil, it yields you a subsistence. Millions can live, that is, live a miserable life, on naturally fertile land. And it is such a mass of people that also throws up the kind of oligarchy which sucks the workers and gives the country an impressive facade of wealth and pomp. It is the ostentation of the ruling classes and not the wealth of the people that created the old legend about India's riches. This talk of India having been prosperous might have been good political propaganda at one time. But we have outlived the need for it. And to-day nothing is gained by telling ourselves fairy tales about the past. In one respect, however, India to-day is indisputably poorer; and it is through the increase in numbers. The population of India has doubled in the last one century. And as the fertility of the soil does not improve at the same rate as the fertility of the population—on the other hand, it deteriorates—there is reason for saying that comparatively better conditions must have prevailed at some time in the past. But then, foreign exploitation and the drain of wealth caused by a foreign government must of themselves take a secondary place to the increase in population as a cause of our poverty. And we can't hold others responsible for it.

In any case, comparison with the past has no practical value except a dubious one, by way of political propaganda. For a true nationalist as much as a true economist, the only criterion is whether India is better fitted now than at any earlier time to overcome her poverty. A static notion of poverty or prosperity is more or less wholly meaningless. For, what can it mean, when its connotation is fixed to one point in time? That at the moment you have less to eat than you could eat or that you have more to eat than you need or want to eat? It is not the conditions at any given time that matter, so much as the potentialities for the future. That to-day India is poor, that the classes are half-starved and the masses wholly starved has far less importance than that we have not the means of effecting any appreciable improvement on these conditions for the next, say, thirty years.

If you ask whether India is in a better position than some years ago to provide a decent subsistence for our teeming millions, I for one would shrink from giving a direct or clear answer to it. There is no doubt that national wealth and real income are less to-day than before the outbreak of the war. By depriving us of our foreign markets, the war has certainly cut a big hole in the nation's pocket and the compensations it has provided are still dubious. The present is not the moment when a question of this kind can be posed and answered. If it proves that the war has enabled India to fill in the gaps in our industrial structure, to establish industries for utilising the raw material which she had formerly exported, to produce in ever increasing quantities the producer's and consumer's goods necessary for a progressive standard

of living for the people of the country, then, even the present setback in current income will count for nothing by the side of the prospects before us. But it is too soon to attempt such an appraisement of the present trend. To my mind, everything hinges on our ability to obviate the need for restriction of production of our export staples by bringing about the necessary expansion of consumption of such staples in indigenous industry. I am full of hope that, whatever official policy may be, we shall achieve this purpose. And once it is achieved, we shall be on the highroad to prosperity.

Better late than never—it is not always that this is true. But in making good the regrettable omission of all reference to birthday honours last week, it serves me better than a sheepish reference to "exigencies of space" or last minute changes in the making up of the pages. Anyway, I have said enough, I believe, to exculpate myself.

There has seldom been an honours list which has shown such discrimination (in every sense of the word) as Thursday's which added Sir Jeremy Raisman and Sir Andrew Clow to the Knight Commanders of the Star of India. It is not surprising that Mr. Jones, the Finance Secretary, who won his spurs as Deputy and later as Finance Secretary in Madras, is among the new Companions. The States and Provinces too are not in speaking of Simla's choice I should make special mention of Mr. Ghulam Mahomed who made his mark as the first Indian in the Stores Department after the long incumbency of Sir James Pitkeathly.

The names of many new knights are familiar to you and me. Clive Street has its new trio in Sir John Richardson, Sir Edmund Pratt and Sir Henry Cooper. But Bombay, too, can show its quota of new Knights in Sir Fred Stones O. B. E., Sir V. N. Chandavarkar and Sir M. B. Namavati. In the case of Sir V. N. Chandavarkar as of Sir M. A. Muthiah Chettiar, the title merely shows that the honours of the fathers can sit lightly and gracefully too on the sons. In the case of the Kumara Raja of Chettinad as of Sir V. N. Chandavarkar political acumen and business ability are blended in happy proportions, and the Bombay Millowners Association which has long enjoyed the benefit of the sound and moderate views of Sir Vithal has good reason to be pleased. In the case of Sir Fred Stones, long a pillar of the house of Sassoon, the title is a mark of Royal recognition for which many have waited and in the case of Sir Manilal Namavati the quickly approaching end of his term of office makes the honour inevitable. The value of war work is recognised in the Knighthood conferred on Mr. G. A. Bambridge of Binnys; and the O. B. E. bestowed on Mr. Misra of Cawnpore is a happy mark of official good will and appreciation. I have referred more than once to Misra and his place in the hosiery industry. His name, I fear is not the only one from Cawnpore where all enterprises have been quickly geared to war production. Engineers, Military officers, Residents and Advisers to Governors naturally bulk large. But I must not omit to make mention of the fact that the genial General Manager of the Bengal Nagpur Railway finishes high. And services to Bombay banking are happily recognised by the title bestowed on Mr. B. M. Bhargava who is in many ways the Union Bank of India. Mr. W. R. Watt of the British India Corporation has been awarded the C. B. E. and Mr. T. R. S. Kynnersley comes in for the O. B. E..

Services to Indian Industry in general find appropriate recognition in the award of the C. I. E. to Mr. J. T. Ghandy, a name now well known to Calcutta from his own vigorous and precise description of what he is doing in Jamshedpur to-day. There is little doubt that the first Indian Manager has been responsible for much of the progress in the iron and steel industry in India in the last three years, and I apprehend that my next visit to Jamshedpur where the war is taken as seriously as possible will prove that what I learnt last time is both inadequate and out-of-date. I suppose Mr. Ghandy who made a flying visit to the States to pick up a few wrinkles is largely responsible for the many-sides developments I described not long ago. And the Government has shown timely recognition of the esteem and affection which Joe Ghandy commands.

But the most notable feature of the Honours list is the award of a C.I.E. to Mr. G. W. Tyson. It is rarely that journalists come in for official honours; the instances can be counted on your fingers; and not all of them meet with all round approbation. Mr. Tyson has reinforced his claims to the honour with valuable work in the cause of the war.

(From Our Correspondent)

Simla, June 18

AN important stage has been reached in the negotiations which for some time had been going on between the Government of India and the Government of Burma on the immigration question. An invitation was received from the Government of Burma that, in view of the satisfactory progress of the preliminary discussions, a delegation may be sent from this country for conducting personal negotiations. Accordingly Sir G. S. Bajpai, accompanied by the Joint Secretary, Mr. G. S. Bozman, left Simla last evening for Rangoon. There seems good reason to believe that the Burma Ministry is anxious to follow up the successful conclusion of the Indo-Burma trade negotiations with an attempt to settle problems relating to immigration. In the personal talks which the Burma Ministers had here during their recent visit to India and in the statements issued by them, they displayed an attitude very different from that of the Ceylon Ministers. The subsequent discussions, which appear to have proceeded on the basis of the Baxter report, have revealed that the line taken by the Government of India, as is stated in the official communique, offers a reasonable prospect of success. The recommendations of the Baxter report have not yet been made public, but they were confidentially communicated to the members of the Standing Emigration Committee for eliciting their views. There was unanimous agreement between the members of the Immigration Committee and the Government of India on the line to be pursued in the coming negotiations.

It was as a result of the Braund report on the Burma riots that Mr. Baxter, with the assistance of two assessors, one an Indian and the other a Burman, was entrusted with the investigation into the volume of Indian immigration and other problems connected with it. Among the terms of reference were the occupations in which Indians were mainly employed, whether in such employment Indians either have displaced Burmans or could be replaced by Burmans, due regard being paid both to the previous history of such occupations and their economic requirements and whether any system of equating the supply of Indian unskilled labour to Burman requirements is needed. So far as information here goes, the report which Mr. Baxter has submitted to his Government is fair in its treatment of the Indian question. The Government of India's attitude is based on two fundamental principles. One is that Indians, who have permanently settled in Burma, should not be subjected to any political or economic disabilities as compared with others. There is a statutory provision in the 1935 Act which prevents the Government of Burma from enacting without the consent of the Government of India any legislation affecting adversely these rights of Indians. On the other question, viz., whether Indians were competing unfairly or were going into Burma in large numbers, the Government of India are ready to consider suitable measures to regulate immigration if there is evidence to prove the truth of these allegations. Unfortunately, there are no reliable records kept of immigrants into Burma. It does not appear that even Mr. Baxter has been able to pronounce any definite opinion on these difficult questions. For, according to messages from Rangoon, he has suggested the appointment of a joint board representing the two Governments. In any case there is every reason to hope that the Indian delegaton led by Sir G. S. Bajpai, whose ability and skill as a negotiator and firmness in upholding the rights of Indians overseas are unquestioned, will be able to secure fair terms for India in any agreement that may be entered into.

An official announcement has been made regarding the constitution and functions of the Defence Committee of the Central Legislature. It has been so needlessly delayed that it will be some time before its first meeting is held, for the nominations from leaders of parties have yet to be received. It is generally assumed that neither the Congress party nor the Muslim League will agree to send any representatives. The remaining parties will probably be represented by their leaders themselves as, for instance, Mr. Aney, Mr. Ramsaran Das and, Sir Henry Gidney. It is also certain that the committee will include Sardar Sant Singh, Pundit H. N. Kunzru, Sir Homi Modi, Sir A. P. Patro, Sir A. H. Ghuznavi and one or two others besides, the representative of the European Group. It is the intention of the Commander in Chief to make the fullest use of this Committee for securing closer understanding between the Central Legislature and the Defence Department, to take the members as much into his confidence as he possibly can and to invite the Committee's suggestions on a variety of subjects. In ordinary circumstances, the appointment of this Committee, though it meets a long standing demand of the Central Legislature would not have aroused any enthusiasm but as the new Commander-in-Chief, General Auchinleck, has already given sufficient evidence of his anxiety to keep himself in touch with public opinion and respond to it sympathetically, it is anticipated that the Committee will be able to give a good account of itself.

The Eastern Group Supply Council has now been able to complete its organisation and settle down to intensive work. It is understood that the members of the Council are shortly leaving on tours to various industrial centres to make a personal study of India's industrial capacity and ascertain the view of leading Indian industrialists. The Indian Member, Mr. Hydari, is starting on his tour early in July. Next week, the Australian Member, Sir Bertram Stevens, proceeds to Tatanagar and certain other industrial centres in that part of the country. For obvious reasons, the Supply Council is not in a position to give detailed figures of its total purchases. But recent statements have revealed that owing to the great advance made in India's industrial output, this country has been so far able to secure nearly threefourths of the orders placed by the Supply Council. In the production of ordnance materials, India easily takes the first place among Empire countries. As regards textile production, India is next only to Japan and the United States. It is only in respect of heavy industries, like the manufacture of aeroplanes, locomotives and shipbuilding, that production has not yet begun, but according to the authorities here, it will not be many months before a good beginning is made in this direction also.

Another important organisation which is proposed to be set up at the Government of India's headquarters is that of the Chief Controller of Imports. Two reasons have been given by the Government of India to explain the need for a central organisation of this kind. The first is that owing to export restrictions in America and import restrictions here, it has become necessary to introduce a system of priority certificates granted by the Government of India. It is stated that it is clearly impossible to settle the problem by granting quotas based on past imports as in the case of those less essential imports to which with a very few exceptions the existing system of import control has been confined. Secondly, it is pointed out that difficulties of supply in addition to stringency in the matter of foreign exchange facilities make it doubly necessary to secure that such imports as can be obtained and can be allowed after war supply needs have been satisfied are directed to the most useful purposes. A senior I. C. S. officer, Mr.

(From Our Correspondent)

Bombay, June 18.

The recrudescence of rioting this week has spoilt the taste for discussion in public of the issues of the day including the Textile Labour Committee's recommendations. There has been in the press frequent complaint as to the delay in publishing the report and the inaction that seeks refuge in emphasising the need for coordination. There have been Mr. Joshi's remark on the moderation of the report and the trustful attitude of labour. One may see in the *Labour Gazette* that all is not quiet in Bombay. There have been strikes, big and small mainly in order to procure a dearness allowance and they combine to produce the impression that a minimum wage designed to satisfy the human needs of labour may and can be prescribed, if Government is able and sincere. The attitude shown by the Advisers' Government to labour questions in general has been characterised as weak and callous by many, and the amendment of the Trade Disputes Act last month does not obscure the fact that employers have been so often favoured that labour has lost faith in the good wishes of the Government. From Ahmedabad has come a memorandum regretting the fact that Government is reluctant to endorse or implement the proposals of the Committee. The lame and half-hearted resolution published with the report has not given satisfaction to the Textile Labour Association which has remarked that Government has contented itself with saying that owing to its pre-occupation with the war situation, it could not afford to tackle inconvenient questions and must therefore leave things as they are while the war lasted. The Association recognises that the present is not the time for far-reaching readjustments in industrial structure however necessary they may be from the standpoint of social justice or welfare. But what shall we think of a procedure which makes Government responsible for classifying and characterising the recommendations of the report in such a manner as to leave practically nothing on its own hands to do or to consider. A reasonable view, concludes the Association's memorandum, is that since the Bomay Presidency holds a leading position with regard to the textile industry, it is expected to go ahead with reforms in the interests of Labour with the conviction that other Provinces would be persuaded or constrained to follow at no distant date.

The Bombay piecegoods market in spite of the nervous feeling generated by the riots and the mass arrests has shown signs of improvement stimulated by news of better trade in Ahmedabad. The advance in cotton has infused interest in dealings and consumers evince a desire to buy a little ahead. Slow and steady improvement in the immediate is predicted by competent observers who think that demand will increase as soon as it is known that war orders are increasing and civilian orders will be allowed to stand over. The increased demand for imported goods does not affect the situation because demand for mill goods cannot be checked and prices, too, are likely to advance. Dealers' interest in Japanese goods continues to increase as replacement costs are high and a certain amount of re-export business put through recently has shown that Japanese suppliers are not likely to lower prices particularly as raw cotton is not likely to go down. The limited supply of British goods continues to find eager buyers and prices for standard lines have risen again. Prices for all types of printed goods have advanced and it is realised that in the absence of fresh regular supplies English goods will be scarce and expensive. Upcountry buying has reappeared in the cloth bazar and goods for export have been booked. Export demand specially has helped to keep prices up and cloths of the larger widths have been in larger demand with the result that prices have gone up. Buying from Calcutta is said to have increased and the demand for whites and fancies has definitely expanded. There is not much doing in voiles and low grade shirtings, but here too, dealers have reason to expect early improvement.

Bombay hardly shows any sign of pleasure over the news that the Central Government have decided that the rate of premium payable on policies in respect of commodity stocks insured against war risks should remain at ¼ percent per month or part of a month. The increase in April was criticised but events since have shown that the war has come nearer to hand and some may think that the business organisation which criticised the increase from 1/32 percent to 1/16 per cent should feel pleased that the rate is left unchanged. The increase in the War Gifts Fund shows that public interest has increased considerably. The Governor who is preoccupied with law and order has not had much time to campaign for collections but the Fund is now over Rs. 60 lakhs and additions to the Fund are independent of the striking response to the European Association's appeal for a special birthday fund. In order to prove loyalty and devotion a special collection was made in record time and £5,000 was remitted by the European Association to His Majesty. A supplementary donation will be sent soon according to Mr. A. Mcintosh who expects to hear soon how the donation will be utilised. This is not less important than the inauguration of a special loud speaker scheme in Ahmedabad. This scheme is in some ways like a local broadcasting station. The scheme will concentrate on war news for Indian listeners.

The restrictions on nespapers during the riots have been criticised and defended from several angles but a novel phase of the communal warfare is the distribution of various anonymous leaflets containing often an incitement to violence. The language is rabid and the surprising thing is that they are printed and distributed without regard of the consequences. The riot situation here is bad enough and further embitterment if it is not immediately produced by the reckless language of the leaflets used as placards in certain localities and distributed by hand may lead to the appearence of even more leaflets of an undesirable type. That a skilled organisation exists is proved by the printing and distribution of these unwanted leaflets. Citizens have been asked to destroy the leaflets or give them away to the police. It is urged that the great thing is that they should not be allowed to circulate but the suppression of these is more properly a job for the special branch who think so often of communists that they forget the communalists. That the leaflets have a lamentable vogue is known but many people here insist that it is for the Government to suppress such pernicious literature. On paper there are lots of safeguards and penalities but they do not seem to apply to the leaflets.

Bombay is pleased with the names in the last Honours list. The local European community finds that Mr. Stones so long a popular member of the Legislative Council finds proper reward for his services. Mr. Stones has long been a popular figure in the mill industry. The business world recognises that the Knighthood given to Mr. V. N. Chandavarkar is a tribute to his work both as Mayor and Vice-Chancellor of Bombay. Mr. Chandavarkar has maintained certainly Bombay's reputation as the home of Liberalism, not yet a lost cause. Mr. Chandavarkar has only lately been invited to assist in the work of a new committee in Mysore appointed to consider reforms and concessions to labour in the State. As a member of the export Advisory Council, Mr. Chandavarkar has retained content with the world of business outside the mill industry. The titles given to Rear-Admiral Fitzherbert and Mr. Tymms are an acknowledgement of the important parts they have played in India's defence programme and Bombay notes with interest that a former Agent of the G. I. P. is among the new Knights.

In chronicling local events reference must be made to the departure of Dr. C. Manshardt. Many know him as the author of a book on the communal problem but not many know how much he has done for the Dorab Tata school of Social Work. Dr. Manshardt and his wife are not likely to come back but sociological investigation will continue. Dr. Manshardt had many Indian friends and a crowd of social workers were assembled to say goodbye when he sailed on the *President Garfield*. His work began in the Nagpada Neighbourhood House, a civic settlement concentrating on welfare work. His interest in adult education was keen and real and the committee on adult education which started the literacy drive owes much to his suggestions and advice.

(Continued from page 1119)

As pointed out already, deposits of member banks have risen from Rs. 26.75 crores to Rs. 27.96 crores. On the assets side, notes are lower, mainly because of foreign balances advancing from Rs. 36.12 crores to Rs. 37.06. crores, and ways and means advances being higher at Rs. 90 lakhs as compared with Rs. 50 lakhs.

The list for the conversion loans opened on June 16 and will close to-morrow. As we had pointed out in the last week's issue, public interest in conversion is very strictly limited. A preponderating proportion of the loans to which the option of conversion is extended is held between the Reserve Bank and the Government of India. So far as the outside public are concerned, the number of parties affected by the conversion are more or less limited to a few investment institutions. These investors have been addressed directly by the Reserve Bank. It may, therefore, be taken as certain that, except for such portions of 4½ per cent 1950-55 and 4½ per cent 1958-68 which the Government may think it necessary to retain for purposes of ensuring marketability in the interest of those holders who still cling on to these 4½ per cent scrips, the conversion is assured of 100 per cent success. If we may hazard an opinion as to the respective preferences for three per cent 1951-54 loan and 3 per cent 1963-65 loan, it is quite possible that the Reserve Bank is much more interested in converting its holdings into 3 per cent 1951-54. The Government may take up a higher proportion of 3 per cent 1963-65, as it should be possible for them to dispose of the stock in this scrip, in the due course of time, to institutional investors like insurance companies to whom 3 per cent 1963-65 is calculated to make a special appeal.

The exchange market has been dull and inactive. The rates are unchanged.

Banks were sellers of T.T. at 1s. 5 15/16d., for ready up to six months forward; and banks were buyers of T.T. at 1s. 6d. for the same delivery.

Banks were buyers of three months' D.A. bills at 1s. 6-7/32d., for the third month and 1s. 6-9/32d., for the fourth month.

Interbank call money quoted ½ per cent; no takers.

Firms' money for call and short quoted ½ per cent; and ¼ per cent for one to four months deposits.

(Continued from page 1121)

country is thus explained. Northern Lebanon produces some iron ore but the country may not be long under Vichy's control as Beirut is likely to fall, and when Aleppo is taken, local resistance will end in all probability. Not long ago prewar Turkish coins used to circulate, and after the transfer of Alexandretta, Turkish currency must have become familiar to Syrians, who are prominent in Egypt though not in Turkey.

(Continued from page 1134)

Ram Chandra, who was formerly Joint Secretary in the Government of India and was recently selected for the High Commissionership in South Africa, which for personal reasons he could not accept, has been chosen as Chief Controller of Imports. It would have been better if for this post also a nonofficial who had intimate practical experience of trade conditions had been selected, but evidently the Government desired to keep this post in official hands. The new Chief Controller, Mr. Ramachandra, enjoys a great reputation as a Secretariat officer both in the Government of India and in the Punjab Government where he was Finance Secretary for a full term.

In Memoriam: H. Karmally

Eavesdropper writes:—

Few deaths can be said to cause such poignant feelings in so wide a circle of friends and acquaintances as that of Mr. Karmally. Mr. Karmally was known to be ailing for a considerably long time; but the love and regard in which he was held would allow no thought of his death. He had a sweetness, and urbanity and elegance all his own; and his death is a personal loss to me.

Orient **PAPER MILLS LTD.**

8, ROYAL EXCHANGE PLACE, CALCUTTA

Jute and Jute Manufactures

(From Our Correspondent)

Calcutta, 19th June.

NOTHING further has transpired regarding Loose Jute Standards. All Sellers associations were furnished by the Special Officer (Jute) with a copy of the Mills Association letter and a request for comments thereon. So far as can be ascertained the most general comment was that a clear and unequivocal statement was desired from the Mills as to whether they expected deliveries of New Crop to correspond with the specifications laid down in the recent Mill circular, or whether, as appeared to be the general opinion of Mill Buyers, the standards current for Old Crop deliveries were expected. Until this point is cleared up any further discussion of standards is obviously futile, as arguments would quite likely be based on very different premises.

With regard to the maintenance of stability of standards, once these have been agreed upon, a suggestion worth serious consideration is that all private inspections and settlements should be done away with, and all disputes regarding quality and condition should be referred to arbitration. There is much to be said for this idea. In the first place it is what the contract calls for. There is no provision in the contract for private inspection and settlement of disputes, and though this method has been practised for so long as to have become a "custom" of the trade, arbitration is still the ultimate method of settlement of disputes. The "private" method easily leads to abuses. That is when pressure is put on a seller to raise his standard of assortment. He is informed that his competitor so-and-so is delivering a higher standard and that if he, the sinning seller, is to expect any more business, then he will have to bring his standard up in line with so-and-so. Quite possibly he is shown a bale of so-and so's super-excellent delivery, for it is a curious sidelight on the mentality of mill buyers that, regardless of what may be laid down by their association as to what the standard of a grade is, the best delivery they receive in that grade is sanctified by them as the "standard." No question of thankfully accepting an extra good delivery as manna from Heaven. That promptly becomes the "standard" and every other seller has to work up to it or pay the penalty. Which very often, for the sake of peace and in the hope of more business, the erring seller does. The proportion of claims made without a real justification, and as often as not paid merely to placate the buyer, must be very large. There is a very general belief that, if private inspection were entirely abolished, the number of claims made would be enormously reduced. For the buyer would think more than twice before proceedng to arbitration on a contract bearing the I.J.M.A. guarantee unless there were something very serious in the matter with the parcel. And as the guarantee written in the contract must be the basis of the arbitration, no question of "so-and-so" is delivering a better standard" can come into the question.

This suggestion however brings up the cognate subject of the reform of the methods of Chamber of Commerce Arbitration which have been ineffectually pressed for many years by Sellers' associations. A Court of Appeal to deal with obviously bad awards has long been demanded, but consistently refused by the Chamber, with the result that that body is laying itself open to interference from higher authority if something is not done. And if reform is insisted on from above, this will most probably take the form of the institution of a panel of stipendiary arbitrators, a system the desirability of which has long been voiced, but, interfering as it does with vested interests, has never obtained a hearing. Such a panel of stipendiary arbitrators would certainly have the merit of being unbiassed in its awards, which avpears to be more than can be truthfully said of some of the existing panel. And while a Court of Appeal would still, even in these circumstances be desirable, references to it would, in the nature of things, be few and far between. It is regrettable if the Chamber, by its unaccommodating attitude, leaves the way open to outside interference, but it may rest assured that the demand for reform is there and will be pressed with increasing vehemence unless something is done from within to placate it.

The freight factor has been mainly responsibile for a sharp setback in hessian prices during the past few days. It appears that orders have issued from the U.S.A. that all steamers sailing for that destination must fill 40% of their space with manganese ore, that the commodities next in prirority are kapok and mica, and that hessians take only fourth place in the roster and raw jute fifth. Thus the space available for hessians this month has been drastically reduced, with depression effects on the bazar. American stock figures at the end of May also showed an increase of 250 lakhs yards combined with a decline in consumption of 80 lakhs yards during the month, the latter figure clearly indicating that American buyers were resisting the advance in prices registered in this market. The consequent pressure to sell near holdings has brought down quotations with a run. It would be a salutary lesson to those who persist in ignoring the price factor in the demand for jute goods, if the Mills Committee would so adjust their working hours policy to permit the accumulation of more substantial stocks and this put a spoke in the wheel of the bazar speculator.

There has been little volume of business in the Export Jute market though full prices have been paid for odd lots. Short Group Dundee Tossa 2/3 fetched from Rs. 82 to Rs. 84. Dundee Daisee for July sold at Rs. 56 and Rs. 55 though the closing value is only Rs. 53. Outport Tossa 4s sold at Rs. 40 and the quotations for Mill delivery are, Firsts Rs. 50, Lightning Rs. 43, Hearts Rs. 36. Speculative purchases of Old Crop for godown delivery have been reported at from Rs. 12 to Rs. 10-8 under the current rate for September Fatka. The forward Futures quotation has fluctuated a good deal. From Rs. 59-8 it dropped a rupee, then jumped to Rs. 63-4, declined to Rs. 60, recovered to Rs. 62-12 then declined again to close around Rs. 59-6. The Satta between Old and New has varied from Rs. 10 to Rs. 12 and is about Rs. 11 at the close.

There is little to record in Loose Jute. Mills have been showing little interest while interest to sell has varied with Jat Bottoms at Rs. 7-4 with District available at Rs. 6-8 and possibly less. Some European standard Bots and Cross Bots sold at Rs. 7-12 and Rs. 5-12 respectively. There has again been more rain than necessary in the mofussil but in only a few districts is any harm apprehended. Rivers continue high and a few days of sunshine would be advantageous, but the crop generally is growing well. Small cutting on Lowlands is reported.

On a declining market, the turnover in fabrics has been on a much more limited scale. Near 9 porters have dropped from Rs. 20-2 to Rs. 18-4 while elevens have dropped from Rs. 24-13 to Rs. 22-12. Sales of elevens were recorded for July at from Rs. 24-4 to Rs. 22-4. For September at Rs. 22, for Oct./Dec. at Rs. 20-4 to Rs. 19-4 and for April/June at Rs. 18. Heavy Goods have also been marked down but not so severely. "B" Twills sold at Rs. 37 to Rs. 36-4 June, at Rs. 36 August, at Rs. 35-8 Oct./Dec. and Jan/March and at Rs. 34-8 Jan./June. Cornsacks were reported at Rs. 36-8 June and Liverpools at Rs. 40 July and at Rs. 39 Oct./Dec. "A" Twills fetched Rs. 41-12 and Rs. 42 for Sept. The market closed at 1 p.m. today out of respect for the memory of Mr. H. Karmally, a Director of Messrs. Adamjee Hajee Dawood & Co., Ltd., whose death was reported this morning.

JUTE

Calcutta, June 19.

THE jute market has passed through its own minor vicissitudes during the week and the future is getting a little obscure. Reports agree as to a recovery, a reaction, a further recovery and another decline, all of course on the basis of futures quotations. Otherwise, the market must be described as stagnant. Export demand is more than ever restricted and mills refuse to show any interest. The rise and fall of prices is devoid of significance though phrases such as quietly steady, inactive and dull recur in recent reports to show that the big difference between Ready and September prices for new crop is to many minds all my eye and Betty Martin. The Futures quotation is now below Rs. 60 and the fall of Rs. 4 from the highest level of Rs. 62-12 touched this week points to an ebb of interest not inexplicable. Weather reports caused the quick rise and the swift decline must also be due to the weather reports. The new crop is said to be progressing and the rain is not supposed to have done much damage to crop, which, in most districts, is less than half of last year's sowings. The market has reacted also on account of the appreciable decline in hessian prices. It is now evident that speculators cannot hold up prices when shipment is difficult and new orders are few and far between. There is no interest either in District Jute or Bottom grades and pucca bales still excite no interest. Though there has been reported over the last week a certain amount of interbaler business there is not any buying on the part of mills and interest in the new crop is mainly speculative. Before the weekend it looked as if the stage was set for a big rise and the heavy rainfall would of itself force prices up. But that view has been revised rather quickly and Firsts are now below Rs. 50. The ebb and flow of sentiment in the market has no particular interest because business in actuals has been poorer than expected. The hessian market apart from a short-lived rise in mid-week has shown few signs of vitality and the jute market can no longer get much sustenance out of the news that the Bengal Government had ratified the agreement with Assam as regards crop restriction.

The jute market is getting more than ever irregular and present prices are hardly indicative of any settled trend. Transactions in Bottoms have been scattered, nothing has been heard of Tossa or Daisee in market reports. There is, however, a belief that U. S. demand will broaden and this belief, apart from a hessian market still attuned to the speculator's turns of thinking, regulates transactions. In a dull and quiet market quotations for old crop are almost unchanged while new crop has kept on rising and falling. The quotation for First is Rs. 48-8 for June and Rs. 59-10 for September delivery. On most days the market has moved both ways and the close on Wednesday was quieter than expected.

MONTHLY STATEMENT

For the eleven months ending 31st May, 1941.

	July-May 1940-41 Bales.	July-May 1939-40 Bales.
Estimated Stock in Calcutta on 1st July carried over from previous crop	3,50,000	1,50,000
Calcutta Imports ..	86,73,000	97,20,000
Total ..	90,23,000	98,70,000
Less transferred locally	Nil.	Nil.
Total ..	90,23,000	98,70,000
Exported from Chittagong **	**	**
Exported from Chittagong **	**	**

Exported	**	**
Stocks:— Bazar, Presshouses and ships' holds	16,00,000	4,00,000
Received by mills ..	**	**
	**	**
Government Forecast	*125,58,000	*97,50,000
Received ..	**	**
Arrivals in excess of Govt. Forecast ..	**	**

	July-May 1938-39 Bales.	July-May 1937-38 Bales.
Estimated Stock in Calcutta on 1st July carried over from previous crop	4,50,000	3,50,000
Calcutta Imports ..	86,64,000	93,89,000
Total ..	91,14,000	96,89,000
Less transferred locally	Nil.	4,000
	91,14,000	96,85,000
Export from Chittagong	1,88,000	2,25,000
	93,02,000	99,10,000
Distributed as follows:—		
Exported	36,66,000	35,26,000
Stocks:— Bazar, Presshouses and ships' holds	2,00,000	5,00,000
Received by mills ..	54,36,000	58,84,000
Government Forecast ..	*68,44,000	*86,81,000
Received	88,52,000	95,60,000
Arrivals in excess of Govt. Forecase ..	*20,08,000	*8,79,000

Calculated at 82-2/7 lbs. to the maund and 405 lbs. to the bale.

*Revised.

** These figures can no longer be calculated as Government have ceased to issue their monthly Export Return for Jute shipped from both Calcutta and Chittagong.

JUTE MANUFACTURES

Calcutta, June 19.

THE hessian market has had its brief hectic spell before the week-end. The tendency this week is evidently reactionary for an adverse trend in cotton too is established and the bullish weather has broken. There has been only moderate demand for near delivery and buying interest in Eleven Porters has flickered out this week. It does not look as if recovery is in sight as the covering of speculation sales is said to have taken place and news of crop damage in certain districts does not encourage the hessian market which is more often inclined to go by the fall in Futures. The moderate interest exhibited in Heavy Goods led to a small and slow rise but this rise has been followed by a setback. B. Twills are back to Rs. 36 and Liverpool Twills done over Rs. 40 on many days last week are quoting Rs. 39-10. Heavy Cees have been neglected on most days and Cornsacks have weakened unexpectedly and the fall in Heavy Goods which have been in request for export suggests that the hessian market must have taken a bad knock. If one goes by the decline in quotations for later delivery the hessian market is not expected to recover promptly. Nine Porters Ready stand at Rs. 18-6, October/December at Rs. 15-8 and January/March at Rs. 14-8. The market has quietened down after Wednesday and a further fall in Eleven Porters has been reported. Eleven Porters which a fortnight ago stood at Rs. 26 are down to Rs. 22-10 and there is not any prospect of early recovery as outside interest in hessians has weakened considerably this month. Eleven Porters for January/March delivery have dropped to Rs. 18-2 and this shows that last week's rise was just a flash in the pan.

COTTON

Calcutta, June 19.

THERE has been heavy profit-taking according to current reports. The Bombay cotton market has developed an easier tendency this week after the renewal of communal disturbance and the selling of bulls anxious to take a profit. The emergence of realisation by holders of contracts was not unexpected, but the riots have spoilt the tone. The U. S. markets too after showing initial firmness have showed signs of some weakness in spite of the good news that the U. S. Crop will not be over 13 million bales, that home consumption is unusually large and that the crop has been badly damaged in several States. In spite of a slow rise in spot with U. S. Middling at over 14½ cents per lb. the futures quotations in New York have seesawed rather unexpectedly. The market is not likely to move higher as the export situation is very difficult. But Wall Street is said to be supporting cotton at over 14 cents and this may help the Bombay market to regain confidence.

Interest in the Broach April, May 1942 contract has narrowed suddenly and heavy selling has brought down the price to below that for the July/August contract. Day to day fluctuations have not been much and Broach is still over Rs. 260. The rate is compared at present with the price five or six months ago to show that improvement in India has proceeded along the lines seen in America. General expectations based on a review of prices during the last week are not exactly discouraging for mill consumption is running strongly ahead of estimates, and good demand in the cloth market is likely to make mills ready buyers of cotton. Oomras have been steadier than usual with July futures at Rs. 199 and Bengals have found some support at last week's levels. Rs. 260, Rs. 200, Rs. 160 may be assumed as the rates for the July Broach, Oomra and Bengal contracts. Falls in other markets, e.g., groundnuts and linseed tempt many holders to take their profits and the fall in jute has led to the appearance of some Calcutta selling in the cotton market of late.

PIECEGOODS

Callutta, June 19.

As the cloth market in Bombay exhibits greatly improved form it is only natural to expect similar improvement in Calcutta. The monsoon has stimulated activity in the cloth market. The tone is described as buoyant though forward trade has been restrained by the caution natural to wartime. Mills are not willing sellers and prices have favoured manufacturers everywhere. Though demand from upcountry has not emerged in sufficient proportions, the outlook is more cheerful as raw cotton prices have held well in spite of an uneven tendency latterly. A quickening of interest, owing to reports that war orders will be given preference by mills, has led to a hardening of prices. The difficulty in persuading mills to promise large and prompt supplies puts holders of stocks in a strong position, and those who delayed sending orders are not at all comfortable at present because forward booking is difficult and prices look like rising further after the advance. Difficulties in regard to imports put Japanese and British goods out of reach. Replacement costs are far too high for the task of the local dealer. Japanese shippers are not inclined to reduce rates because cotton has gone up and the future course of export trade is uncertain. Moffusil markets have turned keen buyers of late both for yarn and piecegoods. Both coarse and medium counts have been bought, and South Indian mills have booked large orders this month. Japanese goods are now regarded as expensive and a large decline in imports is necessarily anticipated. As cotton has gone up Indian cloth manufacturers are not likely to lower prices, and before the Puja season comes, active conditions are likely to rule in all centres.

GOLD

Calcutta, June 19.

Interest in the gold market owes little or nothing to war news. A contraction of demand was noticed towards the end of last week and the keen demand for sovereign failed to appear. The price of gold in Bombay has fallen slightly since last week though the share market there has shown better form. The changes in prices around the basic level of Rs. 42-4 per tola hardly call for comment for gold prices are not often influenced by addition to local supplies and the limited turnover reported on most days merely points to the absence of any positive feeling outside the bullion market. The market has been flat as war news has been of two kinds, and the Indian buyer cannot expect a quick rise. The closing rates on Wednesday reflected a dull and steady tone in Bombay. Prices in Calcutta are a few annas higher with Ready at Rs. 42-6 per tola while Bombay quotes only ½ anna higher for August settlement over the rate of Rs. 42-3-6 for Ready delivery.

SILVER

Calcutta, June 19.

NO change of importance can be discerned in the silver market. New York is steady at 34¾ cents per oz. and London, of course, is unchanged over months at 23 3/8d. as for spot &c.

WHEAT

Calcutta, June 19.

The wheat market is almost exceptional in showing still a tendency towards increasing firmness. Speculative buying has been encouraged by war news and the rise in gram has led both Karachi and Cawnpore to look out for an advance in wheat this week. On all days Karachi has developed a steadier tone and Choice white closed at Rs. 31-10 on Wednesday. Though Karachi stocks are increasing all upcountry markets cling to the belief that export demand will appear soon on account of the war. The recovery in London rates for foreign wheat supports the view that foreign rivals will not slump. With Chicago still quoting over 1 dollar per bushel for spot wheaa the local market has been turning firmer. Good buying has been reported and the rate for ready rise to Rs. 4-8. The Cawnpore market has been described as unfirmly firm on most days and all that can be said is that wheat is in better condition than jute or cotton, as prices are not likely to slide down in spite of the irregular tendency noted at Hapur recently.

Coal in U. P.

In May, 1939 reports appeared in the Press in regard to the deposits of coal (first discovered by Captain Wroughton in 1840) in the south-west of Mirzapur District (United Provinces) in Singrauli, close on the boundary of Rewa State. No good deposits of coal of first-class quality are known to exist in the area under discussion, nor does there appear to be much likelihood of such being found, writes Dr. A. L. Coulson, Superintending Geologist, in a paper contributed to the Records of the Geological Survey of India. On the contrary, he continues, judging by the known quality of the best seams in the Singrauli coalfield in the Rewa State adjoining the Kota area, it would seem vain to hope for any coal better than second-class quality. Whilst it has been stated that the Purari seam is very attractive and that the Naunagar seam, if sampled foot by foot, may yield good quality coal, the analyses so far available do not lend much encouragement for hopes for large extraction from this region of coal that would be able to compete with Bengal and Bihar coal.

Again, modern developments in the utilisation of poor-quality coal, on the lines sketched by various authors in papers read at the Symposium on Coal in India, held in Calcutta on August 25 and 26, 1939, under the auspices of the National Institute of Sciences of India, may, in the course of time, hold out hopes for greater importance for Singrauli (and Kota) coal.

DEPENDS UPON THE STRENGTH OF STEEL

To the people of yesterday how amazing and unbelievable would appear the concrete fact that man, today, spans the sky-ways of the world. And, whether or not the heavens echo the menacing roar of bombers, or the hum of aerial argosies, it is the strength of steel which has given man his wings. It is the dependable, tested strength of this metal which has linked step to step in this scientific triumph of modern civilization.

In the years that lie ahead it is this same power which will be the basis of man's greater achievements—his higher success.

Always—Everywhere—Steel for Strength

Stock Markets to-day and to-morrow

CAPITAL RECONSTRUCTION PLAN FOR HUKUMCHAND JUTE MILL

Those who took advantage of my oft-repeated advice to purchase *Hukumchand Jute* preferences shares must be greatly gratified by the sensational rise which has taken place in the last few days. I understand that it is a case of all buyers and no sellers. The rate touched to-day was nearly Rs. 140. I have been closely studying the latest balance sheet of Hukumchand Jute Mills with a view to find out if the time has arrived for this Company to take in hand a scheme of capital reconstruction. The accounts for the half-year ended March 31, 1941, are not yet available. I have had, therefore, to make my study on the basis of the figures for the half-year ended September 30, 1940. From the point of view of reconstruction of capital, there are two items with which we are mainly concerned. The first is the debit balance of Rs. 21 lakhs as on September 30, 1940. The second is the amount of Rs. 4 1/3 lakhs due by the former managing agents. So far as this latter amount is concerned, I find that, between March 31, 1940 and September 30, 1940, Rs. 56,000 was paid towards the reduction of this debt. I believe, that there is an arrangement whereby the profits available to the former managing agents for the share which they continue to have in the new managing agency, are to be utilised for liquidating this debt. This means that the Company will be perfectly justified in treating this debt as an absolutely good debt. It is only the debit balance in the profit and loss account which needs to be tackled in the reconstruction scheme. Against Rs. 21 lakhs which represents the debit, Rs. 10 lakhs at least may be available from the profits of the half-year ended March 31, 1941 for being utilised to reduce the debit balance. We are thus left with Rs. 11 lakhs of the debit balance to be made good. We will now turn to the capital structure of the Company. The total paid-up capital is Rs.70 lakhs, of which Rs. 40 lakhs is in the form of 7 per cent. tax-free, preference shares; and Rs. 30 lakhs in the form of ordinary shares of Rs. 7/8 paid up. I would propose that Rs. 2/8 be written off from Rs. 7/8 paid on each ordinary share. The total number of ordinary shares is 4,00,000. At Rs. 2/8 per share, the capital written off on 4 lakhs of shares would be Rs. 10 lakhs. This is more or less equal to the debit balance which remains to be wiped off. If my suggestion for wiping out Rs. 2/8 on each ordinary share is accepted, my next proposal will be that two of such shares of Rs. 5 each must be merged into one share of Rs. 10. The full effect of these two proposals will be that, while there are now 4 lakhs of ordinary shares of Rs. 7/8 each, there will be, in the reconstructed capital plan, 2 lakhs of ordinary shares of Rs. 10 each; and the total ordinary capital will be reduced from Rs. 30 lakhs to Rs. 20 lakhs.

We have now to find a solution for the arrears of dividend due on the preference shares. On each preference share of Rs. 100, the arrears of dividend as at March 31, 1941, amounts to Rs. 24½. I propose in lieu of the arrears of dividend for Rs. 24½ each preference shareholder be given an ordinary share of Rs. 10 paid up. This scheme cannot be unpalatable to the ordinary preference shareholder as the Rs. 10 share under the new capital plan will be worth at least Rs. 20. That is to say, the preference shareholder will get a scrip whose market value is Rs. 20. He thus loses Rs. 4½. On the other hand, the acceptance of the scheme will place the preference shares on a dividend-paying basis straight from the current half-year. A 7 per cent tax-free preference share, which is on a dividend-paying basis, will come to be priced, on the stock exchange, at around Rs. 150. The preference shareholder has thus three distinct advantages: (1) he will straightaway get a scrip which he can sell for Rs. 20; (2) he will start earning a dividend from the current half-year; once these preference shares are free from the odium of dividends in arrear there should be considerable capital appreciation.

My scheme for the arrears of preference dividend will involve the creation of 40,000 ordinary shares of Rs. 10 each. In other words, the new ordinary capital will be Rs. 20 lakhs, being the reconstructed ordinary capital plus Rs. 4 lakhs being the ordinary shares issued in lieu of preference arrears of dividend, or Rs. 24 lakhs.

The final problem is how this additional liability of Rs. 4 lakhs is to be adjusted. There are many suggestions which I can advance in this connection. The managing agents may forego a part of their remuneration or commission as their contribution towards the success of the reconstruction scheme. If this is not possible, a portion of the profits for the current half-year may be utilised for this purpose. I have given sufficient details of the latest available balance sheet of Hukumchand Jute Mills and I have provided sufficient justification for the practicability and advisability of my suggestion to hope that before the present half-year is over, Hukumchand Jute Mills will appear in a reconditioned, reconstructed and rejuvenated form.

* * *

In my last week's study of the *Megna Mills* I had overlooked one or two important features. This is a mill of over 1,000 looms and the paid-up capital is only Rs. 24½ lakhs. The capital has been deliberately kept at a low figure; and the managing agents have lent Rs. 34¼ lakhs at a rate of interest which appears to be extremely reasonable. For, the total loans taken by the Company are for Rs. 66 lakhs; and the interest paid in a half-year was only Rs. 1.13 lakhs. In simple terms, the finance provided by the managing agents is on a far cheaper basis than would have been possible if debentures had been raised. So far as bank loan is concerned, it is against stocks which are over Rs. 40 lakhs. As for what may be called the capital loan, the policy of the Company is to set apart considerable sums from current profits for liquidation of this loan. The profit in the half-year ended March 31, 1941 was over Rs. 6 lakhs. Dividend distribution accounted for only Rs. 61,000. Considering that the Company carried jute stocks for over Rs. 30 lakhs, the working of the Megna in the current half-year and the next half-year must be extremely profitable. The shares of the Company are Rs. 40 paid up. The present quotation is roundabout Rs. 41. This rate is cum-dividend of Re. 1. That is to say, Megna ordinary shares are one of the very few jute shares available roundabout their par value. This itself invests the shares with a special value. Considering that the Company is in a position to make an even better showing than the excellent results of the last half-year. I will strongly take Megna shares as holding extremely attractive investment possibilities, both from the point of view of yield and capital appreciation.

* * *

Another share in the same stable merits the attention of investors. The *Ganges Rope Company* is doing exceedingly well. The Mill is working all the 24 hours. The balance sheet is neat and natty. These shares have great possibilities. I have to postpone a detailed examination of this balance sheet for next week as I have already exceeded the space allotted.

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, June 19

THE Calcutta Stock Exchange has maintained a steady tendency during the week and quite a satisfactory volume of business was put through. The outstanding feature has been an increase in dealings in Jute shares, on reports that mills are making good profits. There has been good buying of all shares and sellers are scarce; this is the reason for a general firming up of rates. Coal shares showed little or no change in prices. Tea shares continued to be in good demand and buying was of a selective nature. There was some enquiry for Sugar shares at steady prices. In the Miscellaneous section, Indian Iron and Steel Corporation were somewhat easier. Burma Corporation remained unchanged at last week's level, while Indian Copper improved to Rs. 2/4 on the expectation of a satisfactory dividend. Other shares showed no important change, Titaghur Paper quoting Rs. 18/12; Dunlop Rs. 40 and Alkali and Chemical Rs. 17/6. Cotton shares were an active market.

Government securities continued to be steady with a good investment demand for all stocks. 3½ per cent. Paper has slightly improved to Rs. 96, closing at Rs. 95/15. Among other loans, 3 per cent. 1963/65 came to business at Rs. 95/2; 3 per cent. 1951/54 at Rs. 99/14; 3½ per cent. 1947/50 at Rs. 102/15; 4½ per cent. 1955/60 at Rs. 112/14 and 5 per cent. 1945/55 at Rs. 111/2 s.1. Provincial loans met with good business, 3 per cent. 1952 *Punjab* changing hands at Rs. 97/15; 3 per cent. 1952 *U.P.* at Rs. 98 and 3 Per cent. 1952 *Assam* at Rs. 97.

Money conditions continue to be steady and the average rate on Treasury Bills is slightly higher at annas thirteen and pies eleven per cent. per annum as against annas thirteen and pies nine per cent. per annum in the previous week.

Port Trust and Municipal issues had another dull week. 5 per cent. 1957/87 *Calcutta Port Trust* were done at Rs. 115. 3½ per cent. *Howrah Bridge* were Rs. 98/2; 5½ per cent. *Chowringhee Property* Rs. 102/8 and 5½ per cent *Rohtas Industries* Rs. 102/14.

Business in Preference shares was rather on a larger scale. Among Jute shares, *Howrah* 7 per cent. preferences were Rs. 176; *Hukumchand* Rs. 134; *Craig* Rs. 54/12; *Waverley* Rs. 54/12 and *Hastings* Rs. 135. There was a good enquiry for *Steel Corporation* which were done higher at Rs. 120/8 with buyers over. *Kumardhubi Engineering* were slightly higher at Rs. 125/8. *British India Corporation* were taken up at Rs. 180; *Orient Paper* at Rs. 105 and *New Victoria* at Rs. 5/12.

Bank shares were steady with *Central Bank* at Rs. 44/12; *Imperial Bank* fully paids at Rs. 1,586¾ and *Reserve Bank* at Rs. 102.

Among Railway shares, *Arrah Sasaram* were marked at Rs. 63 and *Hoshiarpur Doab* at Rs. 103.

In the Cotton section, there was a strong demand for *Elgin* at Rs. 20/12 x.d. *Kesoram* were steady at Rs. 6/11; *Cawnpore Textiles* at Rs. 6/11 x.d. and *New Victoria* at Rs. 2/7.

There were only very few changes in prices of Coal shares. The best features have been *Dhemo Main* for which there has been good enquiry at Rs. 12/13. *East Indian* found support at Rs. 15/12 x.d; *Nazira* at Rs. 7/12 and *Sendra* at Rs. 12. *Central Kurkend* were Rs. 13/14; *Bengal* Rs. 355 and *Burrakur* Rs. 12/6.

In the Jute section, there has been good buying of all shares, though prices in the hessian market are slightly easier. Among the higher priced—shares, *Kamarhatty* were Rs. 503; *Kankinarrah* Rs. 408½; *Gourepore* Rs. 685; *Anglo-India* Rs. 332 and *Auckland* Rs. 171. Among others, *Howrah* were steady, closing slightly lower at Rs. 52/6. *Nuddea* were Rs. 59/12; *Megna* Rs. 40/12 and *Clive* Rs. 23/8 x.d.

There still continue to be buyers of selected shares in the Tea section. *Bishnauth* came to business at Rs. 26/4; *North Western Cachar* at Rs. 213 x.d. *Rajnagar* at Rs. 7/12 and *Hattikhira* at Rs. 18/12. *Hasimara* met wtih good enquiry at Rs. 42.

A definite improvement has been noticeable in prices of Sugar shares. *Champarun* improved to Rs. 14. *Samastipore* changed hands at the improved figure of Rs. 7/6. *Carew* were Rs. 9/8 and *Dyer Meakin Breweries* Rs. 7/6.

In the Engineering section, *Indian Iron* touched Rs. 31/1 in mid week, but closed a shade easier at Rs. 30/8. *Steel Corporation* moved between Rs. 18/4 and 18/15 and closed at Rs. 18/6. *Burn & Co.*, came in for support at Rs. 386. *Kumardhubi Eng.* were marked at Rs. 4/4 and *Saran* at Rs. 6/4 x.d. *Indian Standard Wagon* had buyers at Rs. 64. *Hukumchand Electric* were in steady enquiry and the shares were done as high as Rs. 12/14, but closed at Rs. 12/10. *Indian Malleable Castings* ordinaries are quoting around Rs. 7/8. This Company has declared a maiden dividend of 3 per cent. on the ordinary shares for the year ended 31st March, 1941. Extensions have been carried out to the works of the Company and the productive capacity is now considerably increased.

In the Miscellaneous section, *Bararee Coke* met with continued support closing higher at Rs. 22. *Burma Corporation* were dealt in at Rs. 4/8, while *Indian Copper* improved to Rs. 2/4 on expectation of a satisfactory dividend for the year ended 31st December 1940. *Titaghur Paper* were moderately active, being done at Rs. 18/12. *Dunlop Rubber* recorded business at Rs. 40; *Frank Ross* at Rs. 5/4; *Orient Paper* ordinaries at Rs. 13/1 and *Calcutta Tramways* at Rs. 14/7. *Indian Rubber Manufacturers* are steady at Rs. 27/4. The shares are likely to improve as a result of the announcement of the increase in the dividend to 12½ per cent. for the year ended 31st March, 1941 as against 10 per cent. in the previous year. *Alkali and Chemical* were Rs. 17/1 and *Bengal Chemical* Rs. 379.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, June 19.

Money.—Call money continued to be quoted at ¼ per cent (unlendable).

Exchange Market.—Banks were selling T. T. at 1s. 5 15/16d. and buying a month's sight credit at 1s. 6 7/32d.

Securities.—All the scrips continued to be steady with prices virtually unchanged from their previous week's levels. 3½ per cent Paper was done at Rs. 95-15. 1948/52 Loan changed hands at Rs. 97-9; 1951/54 at Rs. 99-15; 1963/65 at Rs. 95-1; 1947/50 at Rs. 102-13; 1960/70 at Rs. 109; 1955/60 at Rs. 112-14 and 1945/55 at Rs. 111-3. 3 per cent 1946 were at Rs. 101-12.

Shares.—During the week under review, the local share market exhibited an active tendency. The news of the advance of the Allied troops into Damascus and the unconfirmed rumour of Russo-German rupture together with the firmness of the cotton market were responsible for the bullish tendency of the market. Buyers predominated, particularly for Steels and Textiles, which showed a good rise in prices yesterday also. The undertone, too, remains steady.

Textiles.—Mill shares have shown very good improvement on brisk buying in all the leading counters. The continued firmness of the cotton market coupled with encouraging prospects for the Indian cotton mill industry imparted an optimistic outlook among operators. *Bombay Dyeing, Central India* and *Century* were the prominent features. *Bombay Dyeing*, after opening at Rs. 1,072-8, gradually improved to close at Rs. 1,083-12. *Central India* showed a rise of 35 points, closing at Rs. 306. *Century* improved by Rs. 15 to close at Rs. 415-8. *Colaba* were also higher at Rs. 174; *Gokak* at Rs. 210; *Indian Bleaching* at Rs. 126 and *Kohinoor* at Rn. 430. In the cash list, *Sholapur* changed hands at Rs. 3,025 and *Vishnu* at Rs. 1,275.

Hydro-electrics.—This was a neglected market with *Andhra Valley* at Rs. 1,630; *Tata Hydro* at Rs. 178 and *Tata Power* at Rs. 1,635.

Steels.—Steel shares, despite profit-taking, met with good speculative support during the week. Optimistic anticipations of higher dividends and the unconfirmed rumour regarding the Russo-German rupture led to keen buying. Opening at Rs. 1,920, *Tata deferreds* touched a high of Rs. 1,960 to close at the same level. The ordinaries, however, slightly improved to Rs. 374, showing a rise of about Rs. 12 over the last week's level.

Banks & Insurance.—Among Bank shares, *Central Bank* were in request at Rs. 45-4; *Imperial Bank* fully paids were done slightly higher at Rs. 1,590 and contributories at Rs. 391-4. *Bank of India* were steady at Rs. 143. *Reserve Bank* were done at Rs. 105-4.

In the Insurance section, *New India* moved up to Rs. 45-8.

Miscellaneous.—*Bombay Burma Trading* remained more or less unchanged at Rs. 466-4. *Associated Cement* were well supported throughout, closing higher at Rs. 143. *Belapur Sugar* were done at Rs. 206. *Shivrajpur Syndicate* were a shade easier at Rs. 29-8. *Bombay Telephone* were steady at Rs. 85-8. *Indian Iron* came in for business at Rs. 30-12; *Indian Copper* at Rs. 2-2-0 and *Premier Construction* at Rs. 92. *Scindia Steam* were unchanged at Rs. 19-14 and *Tinco* at Rs. 192.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, June 19.

The local market was slightly active during the week and most sections showed appreciable price movements. Cotton mill shares were better in sympathy with the cotton and yarn markets. Planting issues continued to be steady.

Securities.—Business in this section was meagre, 3½ per cent Paper quoting at Rs. 95-14. 3 per cent 1951 54 was done at Rs. 99-13; 3 per cent 1963/65 at Rs. 94-14 and 5 per cent 1945/55 at Rs. 110-15. *Mysore Loans* continued to be firm with scrips in short supply. *Cochin Loans* were steady at last week's levels. Among Provincial Loans, 3 per cent 1952 *Madras* were dealt in at Rs. 98-5.

Mills.—*Buckingham & Carnatic* were slightly better at Rs. 241 and *Madura* at Rs. 36-12. *Cambodia* were done at Rs. 8-10; *Vasanta* at Rs. 115-8 and *Lakshmi* at Rs. 66. *Kohinoor* were crossed at Rs. 425 July.

Utilities.—*South Madras Electric* ordinaries, on the declaration of a final dividend of 3¼ per cent, were in good enquiry at Rn. 13-2 c.d. The preference shares were done at Rs. 12-14. *Madras Telephone* had buyers at Rs. 15.

Sugars.—Sugar shares remained dull, *Mysore Sugar* being done at Rs. 52-8. *Travancore Sugars* were at Rs. 13-12 with no sellers in evidence. *Deccan Sugar* small shares were well supported at Rs. 44-8.

Plantations.—Both Rubber and Tea shares came in for a fair demand during the week. *Cochin Malabar* came to business at Rs. 6-12. *Midland* were marked at Rs. 5 and *Nellithanam* at Rs. 8-3 c.d. Among Tea shares, *Peermade* were in good enquiry, being done at Rs. 28-8 c.d. following the excellent results for the year ended 31st December, 1940. The profit earned by the company, it is reported, is the highest for the past many years. *Periakaramalai* were at Rs. 17-12. *Chembra Peak* had buyers at Rs. 3-5.

Miscellaneous.—*Mysore Chemicals* were firm at Rs. 16-12. *Mysore Paper* changed hands at Rs. 14-6. *Singareni Collieries* came in for business at Rs. 9-12; *Andhra Cement* at Rs. 67 and *Associated Cement* at Rs. 140.

LONDON STOCK EXCHANGE

The London Stock Exchange manifests no disposition to change its view of investments. The main feature of this week has been the upward movement in leading Industrials. In an otherwise dull market the blue chips *I. C. I.* and *Dunlop Rubber* are quoted higher and a feature of some interest has been provided by the rise in *Emmies* to over par. Cement shares have evidently struck form but textiles have been a shade off. Giltedged continue to firm up and old *Consols* quoting at 80¼ have testified to the keener demand for British Funds. Old War loan is now over 104 and 4 per cent Funding has hardened to 113 1/8. The rise in 3½ per cent Indian Stock to par has not failed to attract comment and the giltedged rise has been of some service to the Indian securities market here. A mild recovery in stores shares has been reported and the rise in *Marks and Spencers'* 5 shilling shares to 29/- has to be mentioned in this connection.

The lack of interest in plantings despite the firmness of tea and rubber prices has not been adequately explained. Not much has been doing in the mining market after the previous week's activity in both Kaffirs and diamonds. Dividend paying shares have attracted some attention as against the previous week's activity in developing mines. The finance issues are somewhat flat after a small rise in *Rand Mines* while *Union Corp.* shows little or no change.

The oil market has quietened down and war news has depressed the prices of the leaders. *Shell Transport and Trading Co.* is back to 43/9 and *Anglo-Iranian* has slipped back to 29/4½. *Attock* has been a firm spot at 35/- while *Burma* has risen exceptionally after going x.d. and a small rise and fall in *Mexican Eagle* has attested a revival of interest in the shares which were among the most active some years ago.

Changes in the Home Rail market have uniformly favoured holders though the marginal stocks still appear to be very low. A further rise in Transport Co. stock to 34 shows that it is not only the 'A' stock that is in demand.

NEW YORK STOCK EXCHANGE

The uneven tendency on Wall Street this week will not excite surprise especially after the steady advance last week. The leaders have lost ground only to a slight extent and the explanation must be found in the domestic business situation which is influenced by labour unrest. Automobile issues show no great change in spite of the current talk of curtailment of output owing to the diversion of plants to war production, and oil issues have not been greatly affected by the news that 50 per cent of British requirements will be found from U. S. oil wells. The commandeering of more tanker tonnage has been a negative factor. The market on most days has opened steady though prices have shaded off after the improvement on Wednesday. The highest touched by *U. S. Steel* common this week has been 56¼ dollars. Copper minings have weakened very slightly and Industrials have not been pressed for sale. The turnover is more than ever restricted by apprehension concerning the European situation. But the Under-Secretary of State's statement on the German note has restored confidence to a market that did not stand in need of it. The slight fall on Thursday in the market leaders after the earlier rally shows that the trend is again unsettled.

(*Continued from page 1141*)

THE *Bombay Telephone Company, Limited* has been going on from strength to strength and for the tenth year in succession has been able to earn higher profits. The results for the year ended 31st December, 1940 create a new record for the company. There has been a record increase in the number of lines working. The increase in revenue from subscriptions is the biggest reported over several years. The net profit, before providing for taxation and depreciation, is Rs. 35, 01,454 compares very favourably with Rs. 31,70,596 for the previous year. The allocation to Depreciation Fund is Rs. 15,04,959 against Rs. 12,54,342 previously. Magneto Plant received an allocation of Rs. 3,09,329 last year, while nothing is provided for the same during the year under review. The amount set aside for Taxation is Rs. 8,06,636 against Re. 4,09,715. There is a transfer to Reserve Fund of Rs. 30,783 as against nil in the previous year. The usual provision for bonus to staff has been provided. An interim dividend has already been paid and there remains a balance available of Rs. 13,24, 179, which is carried forward.

As many are aware the Government of India had an option to purchase the Company's undertaking in 1943, but decided to exercise it earlier and made an offer to the shareholders.

The option to purchase the Company has to be exercised by the Government before 1943 and a decision was reached early this year. The Committee of the Bombay Shareholders' Association, after full consideration of the offer for purchase of the Company's shares by the Government Telephones Board, came to the decision that the offer is in the best interests of the shareholders to accept. The Committee indicated that the Telephones Board will make payment as soon as acceptances have been received from shareholders holding 75 per cent of the shares issued. The price offered was Rs. 87-15-0 per each share of Rs. 50/- paid up.

It may be assumed that the shareholders will take the Government offer and accept the compensation payable. It may be said that the price mentioned in the offer is a little over the percent quotation of Rs. 85/- which, of course, includes any dividend that may be recommended by the Board at the coming meeting.

So far as the question of purchasing the three telephone companies of Madras, Bombay and Calcutta is concerned, the present position is that the required consent of 75 per cent of the shareholders has been procured in Calcutta. The final reply has not yet been received from Madras and Bombay, for the time allowed by the Government of India's notice expires only in August. It appears that certain representations have been made by some shareholders in Madras asking for revised terms, but they have been told that the Government's terms are final. It is hoped that before the stipulated date in August the shareholders in both the cities of Bombay and Madras would have signified their consent in the required proportion. According to reports in Simla, the services of Mr. Sur, who is at present the Chief Controller of Stores, may be requisitioned for the Secretaryship of the Government Telephone Company formed to take over these three private telephone companies.

'*Watch-dog*'

THE GHUSICK & MUSLIA COLLIERIES, LTD.

NOTICE

is hereby given that the Sixty-eighth Half-yearly Ordinary General Meeting of the above-named Company will be held at the Registered Office, No. 12, Mission Row, Calcutta, on Saturday the 5th day of July, 1941 at 12-0 noon for the purpose of receiving and considering the Directors' Report, the Statement of Accounts and Balance Sheet for the half-year ended 31st March, 1941, declaring the Dividend—recommended by the Directors and to transact any other ordinary business of the Company.

MARKET POINTERS

Indian Customs Revenue:—

ACCORDING to returns received in the *Department of Commercial Intelligence* and Statistics, the total gross Indian Sea Customs Revenue, including Land Customs but excluding Salt Revenue, collected in *British India during the month of May*, 1941, amounted to Rs. 3,83 lakhs as compared with Rs. 3,48 lakhs in April, 1941, and Rs, 3,68 lakhs in May, 1940. The total gross Central Excise duties on moter spirit, kerosene, sugar, matches, etc. amounted to Rs. 82 lakhs in May, 1941, as compared with Rs. 87 lakhs in April, 1941, and Rs. 62 lakhs in May, 1940. The grand total of gross Customs and Central Excise Revenues realised in the two months ended May, 1941, was Rs. 9,00 lakhs as compared with Rs. 8,52 lakhs during the same period last year. Of this amount, import duties accounted for Rs. 6,67 lakhs, export duties for Rs. 55 lakhs, land customs and *miscellaneous for Rs. 9 lakhs and* Central Excise duties for Rs. 1,69 lakhs.

* * *

1939 Rubber Statistics:—

The total production of raw rubber during the year is reported to be 31,390,663. lb. as against 31,065,759 lb. a year ago. The yield per acre of tapped area was 316 lb. in Cochin, 269 lb. in Travancore, 256 lb. in Madras, 239 lb. in Coorg, and 81 lb in Mysore.

The total stock of dry ruber held on Dec. 31, 1939 was estimated at 56,74,618 lb. as against 8,051,166 lb. on the same date of 1938.

The exports of rubber by sea from India to foreign countries during 1939-40 amounted to 23.3 million lb. as compared with *20 million lb.* in the preceding year. Of this, the United Kingdom absorbed 27 per cent., the U. S. A. 46 per cent. Germany 7 per cent., and Ceylon 16 per cent. These figures are exclusive of exports from Burma, *which has been treated as a foreign* country from April 1937.

* * *

Groundnut Consumption:—

As a result of the war, the overseas markets for Indian groundnut cake have been very considerably reduced. The area under this crop, which is grown mainly in Madras, Hyderabad and Bombay, has increased appreciably within recent years and, to avoid a considerable excess of production under existing conditions, the Government of India, in consultation with the other Governments concerned, have considered the possibility of obtaining an effective reduction in the area sown and measures to stimulate and increase the consumption of groundnuts in India, says a "communique" from the Director of Information, Bombay.

* * *

Cotton Consumption:—

The amount of Indian cotton consumed in mills in India during April last was 291, 048 bales *compared* with 225,003 bales in May 1940, according to the Indian Central Cotton Committee. The consumption since September 1 last has been 2,337,441 bales compared with 1,968,675 bales in the corresponding period of the previous year.

* * *

Railway Earnings Rise:—

It is announced that the total approximate gross earnings of all State-owned railways for the period of 11 days ended on May 31, 1941, amount to Rs. 356 lakhs. This is Rs. 30 lakhs more than the approximate gross earnings for the corresponding period of the previous year or Rs. 20 lakhs more than the actuals for the corresponding period of 1940-41.

The total approximate gross earnings from April 1 to May 31, 1941, amount to Rs. 19.56 crores. This is Rs. 76 lakhs more than the actuals for the previous year.—

* * *

Bengal Nagpur Railway:—

The following are the approximate earnings of the **Bengal Nagpur Railway Co. Ltd.** for the period ended June 10, 1941:—

Earnings for the period Rs. 34,08,000; Total to end of period Rs. 2,41,27,000; Corresponding period of last year Rs. 30,55,000; Total last year Rs. 2,37,54,000.

Carry forward	4,922	5,978	7,706	10,294

(Annual meeting 23rd June, 1941 at 3 p.m.).

Audited accounts for the year ended 31st December, 1940:—

After deducting Income-tax and Super-tax and crediting a refund of Income-tax for 1939-40, there is a net profit of Rs. 41,284-2-10 which, with the sum brought forward from 1939, gives a balance of Rs. 47,261-12-2 at credit of Profit and Loss Account. This sum should be disposed of thus:—

	Rs.	As.	P.
Pay a dividend of 7 annas per share, free of Income-tax, for the year 1940	32,340	0	0
Place to Rserve for Taxation	10,000	0	0
Carry forward	4,921	12	2
Total	47,261	12	2

General:—The supply of electricity was satisfactorily maintained *throughout the year. Although the number of units sold shows* an increase as compared with the previous year, the improvement in sales was not as marked as had been anticipated, due to various difficulties experienced by the larger mill consumers. The position has improved to some extent since the close of the year and while for the first three months of 1940 the Company sold 298,449 units, the units sold for the corresponding period in 1941 were approximately 431,000 and it is hoped, that this improvement will continue. *Certain fairly increases in load are expected to materialise* in the near future.

Managing Agents:—Messrs. Octavius Steel & Co., Ltd.

Authorised Capital—Rs. 9,60,000 in 1,20,000 shares of Rs. 8 each. Issued and Subscribed—Rs. 5,91,360 in 73,920 shares, fully paid up.

Synopsis of the balance sheet as at 31st December, 1940:—

Liabilities	Rs.	Assets	Rs.

Carry forward	2,430	1,202	—36,563	—65,203

(Annual meeting held 7th June, 1941).

Audited accounts for the year ended 31st December, 1940:—

The Revenue Account shows a profit of Rs. 35,615-9-6 for the year as compared with Rs. 37,765-8-7 for the year 1939. After deducting Income-tax and Super-tax in respect of 1940-41, there is a nett profit of Rs. 31,444-2-6 which, with the sum brought forward from 1939, gives a balance of Rs. 32,646-3-10 at credit of Profit and Loss account. This sum should be disposed of thus.

	Rs.	As.	P.
Pay a dividend of 6 annas per share, free of Income Tax, for the year 1940	16,875	0	0
Place to Reserve for Taxation	10,000	0	0
Write off Expenditure during construction	3,341	8	4
Carry forward	2,429	11	6
Total	32,646	3	10

General:—The supply of electricity was satisfactorily maintained throughout the year, and the number of units sold shows an increase as compared with the previous year.

Negotiations with the *Bengal Nagpur Railway Co., Ltd.*, were concluded during the year, and in December the Cuttack Railway Station was completely wired and connected to this Company's mains. The load consists of lighting, fans and a pumping installation.

The connection of domestic load continues to be slow, but a slight improvement is noticeable.

Managing Agents:—Messrs. Octavius Steel & Co., Ltd.

Authorised Capital—Rs. 7,00,000 in 70,000 shares of Rs. 10 each. Issued and Subscribed—Rs. 4,50,000 in 45,000 shares, fully paid up.

Synopsis of the balance sheet as at 31st December, 1940:—

Liabilities	Rs.	Assets	Rs.
Capital paid up	4,50,000	Gross Block	5,60,410
Reserve	46,790	Depreciation	1,88,271
Current debts	50,493		
Carry forward	2,430	Block (net)	3,72,139
		Stores	28,328
		Outstandings	22,697
		Investments	15,500
		Cash balances	1,11,049
Total	5,49,713	Total	5,49,713
		Total liquid assets	1,77,574

NAGPUR ELECTRIC LIGHT & POWER CO., LTD.

Audited accounts for the year ended 31st December, 1940:—

The Company's profit during the year ended 31st December, 1940 amounted to Rs. 1,63,475-3-0 which, with the sum of Rs. 8,673-6-6 brought forward from the last year's account, makes a total of Rs. 1,72,148-9-6. Of this sum the directors have made the following allocations:—

	Rs.	As.	P.
Provisions for Excess Profits Tax ..	15,000	0	0
Bonus to Staff	14,000	0	0
Reserve for Replacement of Fans ..	70,000	0	0
Total ..	99,000	0	0

There is thus left for disposal the sum of Rs. 73,148-9-6.

This amount is to be allocated as under:—

	Rs.	As.	P.
Payment of a Dividend of 6½% to holders of fully paid up Cumulative Preference Shares for the year ended 31st December, 1940 less Income Tax ..	32,500	0	0
For the payment of a Dividend of 7% free of Income Tax to holders of fully paid up Ordinary Shares for the year ended 31st December, 1940 ..	35,000	0	0
For carrying forward to next year's account ..	5,648	9	6
Total ..	73,148	9	6

The Company maintained the progress during the year under review. The sales of electricity expanded by nearly 23% and this improvement can be attributed to the active load development programme followed by the Company and the progressive policy shown in respect of rate reduction to promote greater use of electricity.

The following table shows the progress of the Company for the last three years.

Year	Total units.
1938	18,48,172
1939	21,25,352
1940	26,17,728

A comparison for a similar period under the heads of Public Lighting and Installations connected:—

Year	No. of Street lamps installed	Total connections
1938	2,960	4,557
1939	3,183	5,064
1940	3,216	5,584

Manager:—Mr. F. P. Dordi.

Authorised, Issued and Subscribed Capital—Rs. 10,00,000 in 20,000 Ordy. and 20,000 6½% Cum. Pref. both of Rs. 25 each, fully paid up.

Synopsis of the balance sheet as at 31st December, 1940:—

Liabilities	Rs.	Assets	Rs.
Capital paid up ..	10,00,000	Gross Block ..	30,84,993

Total ..	25,76,654	Total ..	25,76,654
		Total liquid assets ..	9,12,132

SOUTH ARCOT ELECTRICITY DISTRIBUTION CO., LTD.

Audited accounts for the year ended 31st December, 1940:—

The net profit is Rs. 53,408-10-2 including Rs. 8,008-4-8, the balance carried forward from the previous year. The interim dividend of 3% paid in January last on Rs. 1,33,500/- 6% Preference Shares absorbed Rs. 4,004-7-0. The balance of Rs. 49,404-3-2, the directors proposed to appropriate as follows:—

	Rs.	As.	P.
For paying the balance dividend of 3% on the above Preference Shares	4,004	7	0
For paying a dividend at 4½% (free of tax) on ordinary shares	35,883	0	0
Leaving a balance of	9,516	12	0

The Government have sanctioned the extension of South Arcot Electric license for a further period of 10 years from 1953. This should be considered as very satisfactory from the investors' point of view.

The directors have Capitalised the Debenture interest, as the Debenture Loan of Rs. 3,00,000 has been entirely utilised for Capital expensions and purchase of stores for future developments. This is done only for the first year when the investment does not bring in a revenue; the interest in future will be debited to revenue account.

Managing Director:—Mr. P. Natesan.

Authorised Capital—Rs. 10,00,000 in 8,000 Ordy. and 2,000 6% Pref., both of Rs. 100 each. Subscribed and Paid up—Rs. 9,30,860 in 8,000 Ordy. and 1,335 Pref., both fully paid up. Less calls in arrears Rs. 2,640. Debenture Capital—Rs. 3,00,000.

Synopsis of the balance sheet as at 31st December, 1940:—

Liabilities	Rs.	Assets	Rs.
Capital paid up ..	9,30,860	Block ..	10,75,279
Reserves ..	59,204*	Stores & spares ..	1,65,613

Provision for taxation ..	Nil	Nil	Nil	Nil
Dividend amount	1,45,000	70,000	70,000	1,45,000
Dividend % ordy. ..	5	Nil	Nil	5
Dividend % Pref. ..	3½	3½	3½	3½
Carry forward	9,884	20,321	12,374	1,35,606

(Half-yearly meeting 27th June, 1941 at 4 p.m.).

Audited accounts for the half-year ended 31st March, 1941:—

After payment of the dividend passed at the last Ordinary General Meeting from the balance brought forward from the previous half-year, paying directors' fees, interest and commission, providing five lakhs for depreciation on machinery and making sundry adjustments, there remains a balance of Rs. 6,04,884-8-1 to the credit of Profit and Loss Account.

	Rs.	A.	P.
The directors recommend to transfer to General Reserve ..	4,50,000	0	0
To pay dividends on Preference Shares @ 7% per annum, free of income-tax	70,000	0	0
On Ordinary Shares @ 0-2-0 per share, free of income-tax	75,000	0	0
And to carry forward balance to the current half-year's Account	9,884	8	1

After the unfavourable trading conditions witnessed during the preceding half-year, it is gratifying to note that the progress of the Company has been quite satisfactory during the period under review in spite of the increase in prices of stores, colours, chemicals etc. With better export opportunities, an appreciable decline in imports and with big Government purchases, the future outlook of the Cotton industry seems to be good. On the other hand, there has been recently a sharp rise in the price of raw cotton which has increased the cost of production of manufactured goods. The out-look, however, is not unpromising.

Managing Agents.—Messrs. Birla Brothers Ltd.

Authorised, Issued and Subscribed Capital—Rs. 35,00,000 in 6,00,000 Ordy. of Rs. 2½ and 20,000 7% Cum. Pref., both fully paid up.

Synopsis of the balance sheet as at 31st March, 1941:—

(Annual meeting held 18th June, 1941 at Bombay).

Audited accounts for the year ended 31st December, 1940:—

The Company's operations during the year show a profit of Rs. 2,59,709-6-5 which with Rs. 52,401-10-6 (inclusive of provision for taxation) brought forward from the previous year's account, makes a total of .. .. Rs. 3,12,111 0 11

	Rs.	A.	P.
Out of which payment has been made in respect of taxation for the year ended 31st December, 1939 amounting to	46,285	9	0
Leaving a balance of	2,65,825	7	11
From this sum the directors have allocated to:—			
Depreciation on Buildings ..	20,000	0	0
Depreciation on Machinery ..	1,10,000	0	0
Writing off Debenture charges Account ..	2,000	0	0
Writing off Underwriters' Commission account ..	2,000	0	0
	1,34,000	0	0
Leaving a balance of	1,31,825	7	11
And the directors propose to dispose of same as under:—			
Dividend of Rs. 3-8-0 per share	87,500	0	0
To carry to next year's account including provision for taxation	44,325	7	11
Total Rs. ..	1,31,825	7	11

Owing to the rise in the cost of living, the directors had to sanction from August, 1940 payment of a Dearness Allowance to the workmen and clerical staff of the Mills in Bangalore earning not more than Rs. 100/- per month. The total expenditure incurred in respect of dearness allowance during the year under report amounts to Rs. 13,668-0-1.

Chairman:—Mr. V. N. Chandavarkar.

Authorised Capital—Rs. 30,00,000 in 30,000 shares of Rs. 100 each. Issued and Subscribed—Rs. 24,41,600 in 24,383 shares plus 33 forfeited shares. Amount Called up—Rs. 24,79,874 in 24,383 shares, fully paid up, amount on 33 forfeited shares restored being Rs. 3,300 and amount paid on shares forfeited being Rs. 38,274. Debenture Capital—Rs. 12,00,000.

Synopsis of the balance sheet as at 31st December, 1940:—

Liabilities	Rs.	Assets	Rs.

‡ Arrears of Dividend on Preference Shares Rs 16,38,000. Depreciation Fund Included Rs. 12.77,54,965 (a) Bearer bonds of Rs. 500 each issued at par in July, 1928, repayable at par on 1st July, 1948, with option repayment of all or any of the debentures at any time at par after 30th June 1938, on 3 months' notice. The date for repayment was extended to 30th June, 1958, with option repayment in whole or in part, any time after 30th June, 1948 and the rate of interest reduced to 5 per cent per annum tax free. (b) Issued at par on January, 1935, repayable at par on 31st December, 1941. (c) Shares numbered 1-6,600 have priority over any class of share regarding repayment of capital. For dividend purposes both classes of preference shares rank equally. (d) Issued at par on 13th November, 1922, redeemable at par on 31st December, 1942. Option redemption in whole or part on any interest date. (e) After 5 per cent. on the ordinary Shares eligible for one half of the surplus profits. Ordinary Shares rank before the deferred Shares in respect of repayment of Capital. After deferred Shares surplus of assets divided equally. (g) Issued in December, 1936 at 98 per cent, redeemable by operation of sinking fund of 1½% per annum. Commencing in 1941 Option redemption in whole or in part on any interest date after 31st December, 1951. Latest date of redemption 31st December, 1966. (h) Issued at par on 31st December, 1936 repayable at par 31st December, 1961. Option redemption in whole or in part at 2 per cent. premium on any interest date after 31st December, 1943 after six months' notice. Option to holders for conversion into fully paid ordinary Shares at £1-10s. of Convertible Stock upto and including 1943. Converted ordinary Shares rank for dividend in the following year after conversion. Interest is paid at 4 per cent. in respect of year in which option was exercised. (j) After 3 per cent on ordinary Shares eligible for half of the surplus profits. (k) 4½ per cent guaranteed convertible registered mortgage debentures (unconditionally guaranteed as to principal and interest by the Indian Iron and Steel Co., Ltd.,) issued at par in May, 1937, repayable at par on 1st January 1967, option redemption in whole or in part at 2 per cent premium on six months' notice on any interest date after 1st January, 1947. Option to holders at any time upto 1st January, 1947 to convert £50 worth debentures into 40 Ordinary Shares of Rs. 10/- each. (l) Entitled to a non -cumulative dividend of 25 per cent. per annum, after the dividend on preference shares and 3 per cent. on ordinary shares. (m) Repayable after 1944 with the option of redemption after 1940.

IS IT NOT WISE TO INSURE NOW?

With an uncertain future ahead Conservation and Consolidation of resources are the prime needs every individual should assiduously strive after.

If you already have Life Insurance, hold on to it. Don't allow it to lapse. If you haven't go in for it right now. A Life Policy gives an inestimable protection and it will cost you less now than later. It is cent per cent true that to be forewarned is to be forearmed.

Write to us for further particulars or advice.

WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

CHEAP money conditions have continued; and the interbank call money rate remains unchanged at ¼ per cent. in Calcutta and ¼ per cent. in Bombay. There are no borrowers at these rates. In the light of such a plethoric supply of short-term funds, it was surprising that applications on the Treasury Bill tender day were exceptionally poor. The amount of tended bills offered was Rs. 2 crores; and applications exceeded this amount by only Rs. 8¼ lakhs. Nevertheless—another curious anomaly—the average rate of accepted tenders was 1 pie lower than last week. Sales of intermediate Treasury Bills between June 18 and June 23 at Rs. 26.75 lakhs made also a poor showing. This has not deterred the Reserve Bank authorities from continuing sales of tap bills. The disappointing subscriptions for intermediate Treasury Bills and the unimpressive total of tenders must not be construed as any significant indices of conditions in the money market. These only go to show that Treasury Bill maturities were rather on the small side during this period. Treasury Bill operations have now come to be in the nature of giving with one hand and taking with the other. If maturities are heavy, and if intermediate Treasury Bills are available on tap, what the Government lose through maturities come back, in large part, through the tap. Treasury Bill results have thus more to do with Treasury Bill maturities than with actual conditions in the money market. This is a kind of balancing that works well within a limited scope. But the aim of the authorities should be to give more vitality and liveliness to the Treasury Bill market and this can be done only when the question of the creation of a bill market in India is viewed from a fresh standpoint.

The returns of the Reserve Bank for the week ended June 20 do not disclose any great changes except in regard to active note circulation and deposits of member banks. After touching the all-time high of Rs. 261¼ crores on June 13, active note circulation in India has receded to Rs. 258.63 crores on June 20. This is largely due to the increase in deposits of member banks from Rs. 27.96 crores to Rs. 31.43 crores, and the resultant rise in the notes held in the banking department of the Reserve Bank. Deposits of the Central Government have declined from Rs. 5.91 crores to Rs. 4.93 crores. Other Government accounts have risen from Rs. 3.60 crores to Rs. 4.23 crores. Foreign balances are slightly higher at Rs. 37.44 crores. Ways and means advances are slightly lower at Rs. 65 lakhs against Rs. 90 lakhs. The statement of the Imperial Bank for the same week shows a substantial increase in cash balance from Rs. 11.11 crores to Rs. 11.66 crores. Investments have also risen from Rs. 60.72 crores to Rs. 61.11 crores. Advances and loans are, however, lower at Rs. 38.97 crores as compared with Rs. 39.89 crores. Deposits continue to show a rise and are now Rs. 101.73 crores.

From the Bombay papers reaching us this afternoon, we gather that the Bombay Office of the Reserve Bank has released to the press a communique giving the results of the conversion effected in terms of Government's offer of June 9 to holders of rupee securities of such loans created as counterparts of the India sterling loans. We do not appear to have received a copy of this communique nor have we noticed its publication in any other daily paper of this City. We mention this less as a complaint than as a circumstance which necessitates the qualification of some of the figures given in the discussion on ways and means budget in this week's editorial section. We received the information from the Bombay papers too late to be able to make all the consequential changes in the editorial which had been prepared before noon. It may be that such changes as have to be made in the figures of the article as a result of the communique now available to us, may not affect the fundamental arguments; but we always prefer to be as precise in our figures as possible while discussing the kind of problems presented in to-day's editorial.

The communique as issued by the Bombay Office of the Reserve Bank provides information as regards two operations. The first is the conversion operation. We understand that conversions from 4½ per cent 1951-55 to 3 per cent. 1951-54 amounted to Rs. 15.16 crores; and conversion from 4½ per cent. 1958-68 to 3 per cent. 1963-65 amounted to about Rs. 13.40 crores. In addition, the notification provides information regarding the cancellation of stocks as a supplementary transaction of the conversion. The communique says:—

> As a complementary transaction, Government have cancelled stocks held by them or purchased for cancellation from the Reserve Bank as below:—
>
5 p.c.,	1942-47	about Rs.	10,73,00,000
4 „	1948-53	„ „	9,48,00,000
3 „	1949-52	„ „	4,14,00,000
4½ „	1950-55	„ „	21,76,00,000

The total of the two 4½ per cent. loans as created in connection with the recent sterling debt redemption was Rs. 56 crores. We now understand that only Rs. 28.56 crores has been tendered for conversion. We also understand that 4½ per cent. 1950-55 stock for Rs. 21.76 crores has been cancelled. Considering that the total amount of stocks now cancelled is as much as Rs. 46.11 crores, it seems likely that the Government have cancelled all the rupee counterparts that came into their hands except such amounts as are held, according to their promise, for maintain-

TREASURY BILLS

India

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills were opened on Tuesday, the 24th June, 1941. Total amount offered was Rs. 2 crores, 8 lakhs and 25 thousand. Tenders at Rs. 99-12-9 per cent. were accepted in full and those at Rs. 99-12-6 per cent. were allotted approximately 95 per cent. Total amount accepted was Rs. 2 crores, the average rate of accepted tenders being annas thirteen and pies ten per cent. per annum.

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills will be received on Wednesday, the 2nd July, 1941. Successful tenderers should make payment on Friday, the 4th July, 1941. Other conditions are as usual.

Three months' Intermediates will be sold from the 25th June to 1st July, 1941 at Rs. 99-13-0 per cent. subject to the conditions previously announced (viz. sales can be stopped at any time without previous notice if Government think it necessary).

Three months' Intermediates sold from the 18th to 23rd June, 1941 amounted to Rs. 26,75,000.

During the week ended the 20th June, 1941 Government of India Treasury Bills for Rs. 2,70,00,000 were sold in favour of the Issue Department of the Reserve Bank of India.

Bengal

Tenders for Rs. 60 lakhs of three months' Government of Bengal Treasury Bills will be received at the offices of the Reserve Bank of India at Calcutta and Bombay up to 1 p.m. (Standard time) on Monday, the 30th June, 1941.

Successful tenderers will be required to make payment and take up their bills on Friday, the 4th July, 1941.

THE MISRA HOSIERY MILLS have, from the commencement of the war, been "on active service." Working day and night, the mills have been supplying essential requirements of the Army in the knitting line.

MISRA HOSIERY cater to the requirements of the general population and comprise socks, stockings, undervests, sports shirts, interlock underwear and outerwear, for men, women and children.

Production 8,000 Articles, daily.

Finance Abroad

Friday Morning.

The punishment inflicted on a Scottish farmer by a London magistrate has thrown some light on the way in which the Treasury's control of foreign exchange works. The accused failed to declare his stock of 26,822 U.S. dollars, was found out and fined 15,000. The Magistrate's remarks have been cabled by **Reuter** but they are irrelevant. Punishment has in this case been deterrent showing that the Treasury will not countenance evasion or fraud.

There may not be any need for special precautions now that the dollar reserve has been replenished by the sale of of transaltantic investments negotiated by the Treasury's special missions to the U.S.A. The report that the Hon. Mr. Jesse Jones is considering a proposal to lend Britain an unspecified sum has naturally attracted wide attention. Nothing is said about the Johnson Act of 1934 and Britain's previous default. Congress can probably make an exception in favour of Britain and provide millions in the twinkling of an eye. Vast changes have been noted in U.S. opinion and the Federal Loan Administrator may put through his programme without difficulties as farm relief may not demand any large provision, particularly, after the rise in commodity prices.

President Roosevelt is known to have provided for exemptions to the freezing order. The U.S. Treasury has therefore released Swedish and Swiss assets from the operation of the order. This indicates, according to a **Reuter** message, that the two countries have given an assurance that their credits would not be used to benefit the Axis or Axis occupied territories. And it may be taken that the ban is not likely to be reimposed in view of Sweden s assent to the German proposal to send troops from Norway through Swedish territory. The Swedish Government's difficulties must be known and the existence of fairly large investments e.g. in Finland will be viewed as a handicap for that country at present.

The difficulties of the Vichy Government again make the headlines. The Darlan-Hitler agreement has evidently not been implemented in one important respect. The reduction in the cost of occupation has not been granted and Vichy has been told that the concession will operate only if gold and foreign exchange to the value of 300 million francs is made available. So all that Vichy gets out of the agreement is an order to lay hands on gold and foreign exchange. The Bank of France cannot do it as part of the gold is already attached by the Belgian Government in the U.S.A. under orders from the court. Vichy has lately been ordered to pay back 120 tons of silver and silver coins to Spain. A Paris court has ordered its return to the Spanish Government. But there are only a small pat of the difficulties. Abelz has gone to Berlin to bring back fresh instructions and the French Govevrnment, worried greethy over the loss of Damascus, is again with its back to the wall.

The events in the financial world proper are thrown into the shade by the battle of the gap now being fought by the British Treasury. The vote of credit approved on June 24th showed that war expenditure is still running ahead of estimates. Despite the aid promised under the Lease and Lend Act the daily cost of the war is said to be 10¼ million sterling. Total expenditure for 1940-41 is now placed at 4,400 million and the vote of credit passed in February has apparently been used up. The Chancellor of the Exchequer admitted that there has been a rise in war expenditure per diem as compared with February. Expenditure at home has risen though expenditure abroad had fallen. Increased demands will be made on Britain's investors who are providing about 40 millions weekly. The figures suggest that annual savings must be doubled this year mainly through a strict regulation of private expenditure. Another drive for increased savings is foreshadowed in this week's news and this can succeed fully only if the price level remains stable and wages are not allowed to increase on any pretext.

The rapid transformation of the U. S. economy to a war footing is presaged by an order suspending private imports of rubber. A government concern will take in all supplies from the Far East and private consumption will have to be cut to the extent of 20 per cent. The Government's rubber reserve will be available for firms engaged on war orders. Rubber will be bought on the basis of 18½ cents per lb. of standard smoked ribbed sheet, and transport charges from the source of supply will be paid by the buyer. The Price Administrator of the office of Production Management has asked motorists not to go in for new tyres and has also promised that the price per tyre will be soon fixed. Evidently price control and rationing is a problem for the U. S. government as for the Ministry of Supply. Other monopolies to deal with strategic materials are likely to be set up soon in the U. S. A. and this means that the labour situation is being dealt with from the angle of price control for important materials needed by armament makers. The labour troubles have been got over for C. I. O's late victory over Ford means that the labour organisation will not be hereafter concerned with questions of prestige.

Events in the purely financial sphere are the success of the Canadian Victory loan, the lists for which closed on June 21st. It is reported that Mr. Ilsley the Dominion Minister of Finance is pleased with the total volume of subscriptions, 710 million dollars are against the total of 600 millions aimed at by the Government. New Zealand is busy taking men for war service by the usual combing-out procedure. The Dominion has spent since the end of March £36 million on war account, obtaining as much as £17 million through special taxation.

An unusual item of information has been vouchsafed this week as regards the detailing of a special officer to stimulate the war savings campaign in India. The somewhat disappointing response to the Defence loans which have netted about Rs. 57 crores in about a year has not been explained. The need for a special savings drive has been referred to by many and an I.C.S. officer has been asked to consider methods for encouraging the subscriptions to the loans in India. The appointment will be widely welcomed by those who regretted that ordinary publicity failed to procure results equal to the urgency of India's defence needs in wartime.

The foreign exchange market in London is more or less unchanged. A new war does not bring any convulsive change in rates. The rouble is a more strictly controlled currency than any and the main consequence will probably be a reduction of gold exports from Russia. The decrease is readily forecast in spite of the fact that war will entail an increase in expenditure. That the U.S.A. is prepared to withdraw all obstacles in the way of help to Russia and is further prepared to treat Russia as one of the democracies resisting aggression mean that there will be no need to put up gold for purchases from U.S.A. which can be earned in American bottoms to the Far East as the Neutrality Act has not been invoked. The cessation or reduction of gold exports from Russia is obviously a point in favour of the bullion market which at one time feared that prices would be pulled down by excessive sales combined with the reluctance of the U. S. Treasury to keep on buying at 35 dollars per ounce.

The absence of any change in the official rates for the hard currencies in London is reflected in the Bombay rates for Swiss francs and swedish kroner. Hong Kong dollars and the yen are unaltered after a week. There has been no change of note in the quotations for the Shanghai dollar. The comparatively wide difference between buying and selling rates may become smaller as two Chinese Bank are expected to open branches in Calcutta. The Bank of China and the Bank of Communications are soon to have Indian branches, and presumably in Burma also, a part of a long-term policy. The war has resulted in

War—and Ways and Means Budget: IV

In the first three articles of this series, we dealt with the nature and significance of the ways and means budget in normal times, and with the changes which have been wrought in ways and means problems by the events and developments of the twenty-two months of war. While the changes thus brought about are, in some respects, of a far-reaching character, two important points need stressing in this connection. The first is that, in spite of revolutionary changes and resultant problems of a serious nature and of an unexpected character, the ways and means machinary in India has been functioning with remarkable smoothness. Secondly, the ways and means position as at the end of the twenty-two months of war reveals a considerable strengthening of the intrinsic financial factors. We propose to deal, in this article of the series, with the problems that should engage our attention in the near future and in the somewhat distant future from the point of view of ways and means, and with the measures that should be taken to ensure maximum advantage being derived by the Indian financial system.

As we contemplate the developments since the beginning of this war from the point of view of what future trends they foreshadow, there are three factors which require careful study. In the first place, so rapid and colossal have been our accumulations of sterling assets that we have been able to redeem India sterling stocks for nearly £100 million and, in addition, we are able to show an increase of Rs. 87 crores in sterling securities held by the Reserve Bank as compared with the sterling assets on September 1, 1939. In the second place, while reducing our sterling debt by £100 million, we have replaced it, in large part, by rupee debt. A third to a fourth of the rupee debt thus created has already passed into the hands of investors in India. A considerable proportion of such debt is held between the Reserve Bank and the Government of India. A small proportion of the debt so created is proposed to be cancelled. The net result is that, between the Government and the Reserve Bank, they may have rupee securities for about Rs. 60 crores that they may wish to sell through the tap as and when practicable. In the third place, the remittance programme as such has ceased to be a problem of ways and means.

On the basis of these three factors, we should like to gauge the future of ways and means problems. Let us, in the first instance, understand the full implications of the third factor. So long as the war continues, it may be taken as more or less certain that the Home charges to be met by the India Office will be fully taken care of by the substantial sterling credits which will accrue in favour of the Government of India in respct of inter-governmental transactions. The position in this regard is, indeed, so satisfactory that the sterling credits will leave a surplus in favour of the Indian Government after the expenditure of the India Office has been fully provided for. Far from the Indian Government having to call upon the Reserve Bank, as in ordinary conditions, to provide them with sterling credits, it is the Government that will be handing over sterling balances to the Reserve Bank from time to time. This is the position that may be expected while the war lasts. After the war comes to an end, inter-governmental transactions will not have the result of providing surplus credits to the Indian Government. That is to say, the remittance programme will again re-appear as a ways and means problem. At the same time, it is clear that the remittance programme of the postwar years will be of much smaller dimensions than in the pre-war years.

The large-scale redemption of sterling debt already effected must mean a saving in interest charges of anything like £4 million a year. As we will show later in this study, further substantial repayment of sterling debt may be confidently expected. It should not be difficult to effect, by the time the war is over, total savings of £8 million to £10 million in interest charges on our foreign loans. In simple terms, the post-war remittance programme should be in the neighbourhood of £20 million per annum. The responsibility of the Reserve Bank to put the Secretary of State in funds according to his requirements will thus become much similar.

At the same time, the circumstances conducive to the accrual of sterling balances to the Reserve Bank will be definitely more favourable. The industries that have now extended their plants and expanded their output will make it less and less necessary for India to depend upon foreign imports. Putting it in another way, Indian industries are now getting better equipped to provide fully for the domestic markets; and, in many categories, post-war imports into India from foreign countries will be much less than what they were before this war. It is also to be emphasised that many new industries are being brought into being; and, in these respects also, the dependence on imports is being reduced. Particularly in regard to spare parts, miscellaneous industries and equipment for the Army, we would need to import much less in future.

On the other hand, there is no reason to believe that any similar restrictive influences will affect India's exports. As a matter of fact, markets now shut out by their being within the theatres of war will require to buy, on a heady scale, some of the commodities which India alone can supply. There may be difficulties of exchange, chaos in currencies, and wild fluctuations in prices. But the technique of finance is now being worked with such expertness that the world after this war will be spared most of the disruptions and dislocations which followed the last war. Taking all circumstances into account, we may reasonably hope that India will do a thriving export business in the months following the termination of hostilities.

Our case, then, is that, in the postwar period, we will need to import less and will be asked to export more. Substantial trade balances in favour of India may be taken as fully assured in the postwar years.

The Reserve Bank will, from this point of view, be finding itself in the position in which it has more chances of strengthening its sterling balances and less calls for sterling payments. This conclusion has an important bearing on the ways and means problems of the future. If our annual liability for sterling payments is reduced, and if the annual accruals of sterling assets will be on a higher scale, the Reserve Bank need not be anxious to maintain too large a portfolio of sterling securities. If, at the end of this war, the sterling securities held by the Reserve Bank are not less than the securities which it held in the beginning the war, this is as strong a position in external reserves as the Reserve Bank needs to maintain.

The next logical step in this plan of reasoning is that such sterling balances as are in excess of what the Reserve Bank had at the beginning of the war, must be used for reduction of the sterling debt on as big a scale and in as speedy a manner as possible. Between September 1, 1939, and June 20, 1941, the sterling securities in the banking and issue departments of the Reserve Bank have risen by Rs. 87 crores, or £65 million. Our case is that this £65 million is, now and here, available for the next instalment of sterling debt redemption.

We would, therefore, suggest that there need not be any delay in taking in hand the repayment of the 3½ percent India sterling stock. The total outstandings of this loan are in the neighbourhood of £87 million. We know that Indian investors have considerable holdings of the 3½ percent sterling stock. Correct estimates of such holdings are not possible; but we may not be wide of the mark if we assume that scrips held by Indian holders are of the order of £17 million. It follows that the Reserve Bank will have to find sterling only for £70 million of the 3½ percent stock. The total outlay for this redemption may, therefore, be roughly estimated at £70 million. As we have already pointed out, the sterling assets that the Reserve Bank can now spare are £65 million. This examination proves the practicability and possibility of repeating, in the case of the 3½ percent non-terminable India sterling stock, the operation which was put into effect in the case of the dated India sterling securities.

It was **Indian Finance** which pointed out, in the early months of the war, that the redemption by India of its sterling debt will be a direct help which this country can render to Britain with respect to her heavy defence loan programmes. This point has been emphasised in most of the comments made at the time the sterling debt redemption scheme was announced last February. If, in the course of the next few months, India pays off her sterling loans for a further £70 million, it will be another important measure to strengthen the giltedged situation in London.

Equally important from the point of view of ways and means are the measures taken to replace sterling debt by rupee debt. With regard to the creation of rupee debt against sterling debt thus far redeemed and cancelled, it has to be borne in mind that the total of rupee debt does not exactly correspond to the total of sterling debt replaced. Some portion of the rupee debt has been cancelled. In fact, it seems possible that the realisations from the two defence loans in India have enabled the Government to cancel a goodly portion of the rupee counterparts without any serious embarrassment to their ways and means position. The position now is that the Government and the Reserve Bank between them may not have more than Rs. 60 crores of securities to dispose of, the rupee securities being those connected with the sterling debt redemption. A notification issued recently gives the results of the rupee loan conversions and leads us to think that the cancellation of rupee counterparts has been so substantial that the securities left in the hands of the Government and the Reserve Bank may be even less than Rs. 60 crores.

In the case of the proposed redemption of the 3½ percent India sterling stock, it may not be possible to have such equally smooth and simple functioning of the Indian end of the ways and means. Our own view is that the entire amount of £87 million will have to be replaced by a corresponding amount of rupee debt. Of which, say, Rs. 25 crores will present no difficult problem as the Indian holders of the sterling stock will accept rupee stock. The real problem is that the Government of India will have to raise about Rs. 95 crores by way of new loan in India in order to put through the repayment of 3½ percent sterling stock.

Including the rupee securities that have to be disposed of sooner or later, the rupee loan programme of the Government in connection with sterling debt redemption may be said to be Rs. 120 crores to Rs. 130 crores. What exactly is the most scientific and most economic way of tackling a loan programme of this size, is the question we will tackle in the next and final article of this series.

DIRECTORS' REPORT

For the period of 12 months from 1st January to 31st December, 1940

The Directors have pleasure in submitting their *Thirty-fourth Report* of the Company's operation together with the Audited Revenue Accounts and Balance Sheet as at the year ending 31st December, 1940.

During the year, 9,268 New Proposals under Life Assurance and Capital Obligation Fund were received for sums aggregating Rs. 1,88,37,805 and for Annuities of Rs. 783/- per annum. Of this number 7,709 were accepted and resulted in New Policies including two annuities of Rs. 525/- per annum. The total sum assured is Rs. 1,56,55,807 including sums reassured of which the sum assured under Capital Obligation Fund is Rs. 1,52,287. The rest were either declined or accepted on terms which have not been agreed to by the proposers, or are awaiting completion. The net Annual Premium Income attaching to the New Business for the year after deduction for sums Re-assured is Rs. 8,09,802-13-0.

During the year claims on account of death have been presented for an aggregate sum of Rs. 9,58,481-3-2 and the further sum of Rs. 16,56,318-4-0 became due in respect of matured Endowment Assurances.

The Life Assurance Fund now amounts to Rs. 3,46,35,456-12-3 as compared with Rs. 3,21,11,316-0-7 at the beginning of the year. The funds have thus increased during the year by the substantial sum of Rs. 25,24,140-11-8. The Capital Obligation Fund stands at Rs. 4,69,261-0-0.

The total Interest Income of the Company on its investments was Rs. 14,58,681-1-3 after deducting Income-Tax. The ratio of Expenses of Management to Premium Income in the Life Revenue Account is 27.4%

Sir H. S. Paul, Kt. and Mr. K. M. Naik retire from the Board of Directors by rotation and being eligible offer themselves for re-election.

The Auditors, Messrs. Batliboi and Purohit retire and offer themselves for re-election in the new name and style of Batliboi, Purohit and Darbari as Auditors for the current year.

The Directors recommend the payment of a Dividend of 6% free of Income-tax for the period under report payable on or after 28th May, 1941.

The Directors wish to record their appreciation of the work of the Agents of the Company and of the Officers and Staff at Head Office and Branches which has materially helped to maintain the steady progressive development of the Company.

Statement pursuant to Section 132A of the Indian Companies Act of 1913 as amended by Act XXII of 1936—The National Fire and General Insurance Co., Ltd., has not declared any dividend during the period under report and the debit balance of the Profit and Loss Account has been carried forward in the Accounts of that Company.

AUDITORS' REPORT.

We have audited the Balance Sheet of the NATIONAL INSURANCE COMPANY, LTD., as at the 31st day of December, 1940, above set forth, and also the annexed Balance Sheet of the Life Assurance Fund as at the 31st day of December, 1940, and the Life Assurance, the Capital Obligation and the Guarantee Business Revenue Accounts and the Profit and Loss and Appropriation Account of the said Company for the year ended 31st December, 1940, in which are incorporated Returns certified by the various Branch Managers and Agents, and we have obtained all the information and explanations we have required. In our opinion the above Balance Sheet, the Balance Sheet of the Life Assurance Fund, and the Revenue and Profit and Loss and Appropriation accounts have been drawn up in conformity with the Insurance Act, 1938, and the Balance Sheet exhibits a true and correct view of the state of affairs of the Company according to the best of our information and the explanation given to us and as shown by the books of the Company. In our opinion books of account have been kept by the Company as required by Section 130 of the Indian Companies Act.

We certify that no part of the assets of the Life Assurance Fund has been directly or indirectly applied in contravention of the provisions of the Insurance Act, 1938, relating to the application and investment of Life Assurance Fund.

We have verified the Cash and Bank balances at the Head Office in Calcutta, and those at the Branches have been taken as per the Returns certified by the Branch Managers, and we have verified the Securities relating to the Company's loans and investments by actual inspection of the documents and Scrips concerned or with the certificates of the parties and the Banks concerned with whom such documents or Scrips were lying deposited.

Jute – Retrospect and Prospect

A Plea for Higher Price

(By H. P. Bagaria)

THE success of the jute restriction plan of the Government of Bengal this year is an event of the greatest importance to the people of the province. It is a remarkable achievement. It should be remembered that the scheme prepared by them was in the nature of an experiment; and that, whenever the question was discussed with those who are engaged in the jute trade or jute industry, even those who vociferously claim to be the champions of the cultivators' cause did everything possible to discourage the Government from putting into effect the scheme for regulating the jute crop. Examples of failures of various restriction schemes by other governments were constantly quoted; and it was urged with vehemence that the cost would be prohibitive. The fact that, in their very first attempt, the Government of Bengal have been able to achieve complete success proves beyond doubt that these plans were shrewdly prepared and ably executed.

In 1929, when the price of jute came down, for the first time in the present century to as low as Rs. 25, I pointed out that, if the Government of Bengal could regulate the supplies of jute, the prosperity of the Province could be assured.

The success of the jute restriction plan is of as great importance to the jute-growing community as the success of the first short-time working agreement among jute mills was to the jute manufacturers. It is only due to their ability to control production that the jute manufacturers in India have been able to enjoy prosperity and take the fullest advantage of their position as the only supplier of jute goods.

In a speech at the Rotary Club of Calcutta, in analysing the balance-sheet of jute, I showed how, by the close organisation of trade interests and the helpless plight of the growers, the evil effects of a fall in the price of jute goods or of curtailment of demand were passed on almost entirely to the poor jute-growers who were least able to bear them. With proper regulation of the jute crop, this will now be a matter of the past.

But there is one important aspect of this question to which I must now draw the attention of the members of the Government of Bengal. Restriction of production is not desired as an end, but a means to achieve an end; and that end is the realisation of better prices by the growers.

The last crop was a large one; and, due to reduction in demand, a large surplus was left in the hands of the trade. It is a well-known economic fact that the mere size of the supply or of demand does not control prices. A very important factor in price movements is the bargaining power of the sellers or buyers. The accumulation of large stocks in the hands of jute mills and jute dealers has placed them in an exceptionally strong bargaining position. Unless the Government of Bengal are on the watch, it is quite possible that, in spite of a very small crop this year, the cultivators of jute may be compelled to part with their crop at low prices.

The Government have to be specially careful this year as this is the first year of compulsory restriction; and if, in spite of a short crop, the cultivators do not realise a price which, in the aggregate, more than compensates them for the decreased production, it will give a powerful handle to the opponents of the scheme. After all, it is simple arithmetic: if, by producing one maund of jute, I am able to get four rupees per maund, I should get at least twelve rupees per maund if I am compelled to produce only one third of a maund.

In spite of the fact that the present crop is going to be a very short one, the price of jute continues to be well below the minimum that the Government of Bengal aimed at last year. In July last, the Government of Bengal, even in circumstances which were very unfavourable as compared with the present circumstances, thought that the price of Rs. 60 per bale in Calcutta was the minimum to which the cultivators were entitled. Owing to adverse circumstances, the Government did not succeed in making this minimum effective. But this year the circumstances are very favourable. Among such favourable factors, I will mention (1) better international outlook, (2) higher prices for jute manufactures, (3) a very short crop and (4) success of the restriction plan.

Due to these reasons, the Government of Bengal should take all possible steps to see that, for the balance of the old crop left in the hands of the cultivators and for the coming crop, the producers realise a good price. The question is: what is a good price? By good price is meant a level considerably above the minimum aimed at last year.

Coming to the question as to how this can be done, we have before us the example of the success achieved by the Indian Jute Mills Association. Last year, due to a great falling off in demand and the accumulation of large stocks, the price of jute manufactures was forced down to an uneconomic level. The members of the Indian Jute Mills Association agreed to cut down their production. But they were not content with merely cutting down supplies. They also entered into an agreement not to sell their production below a certain minimum price. The result was that the prices for jute manufacturers, which were considerably below the minimum fixed at the time of the agreement, improved within a few months to the maximum levels and, thereafter, the upward trend was kept up till they recently touched as high as Rs. 22/- per 100 yards for Liverpools as against Rs. 12/- fixed by the mills.

Of course, it is not possible for the millions of cultivators to come to an agreement like the jute mills. But the Government of Bengal can take the following steps to achieve this object.

(1) Fix a minimum price in the Futures market as they did in 1939 and 1940;

(2) Carry on vigorous propaganda in the jute districts explaining the present scheme to the cultivators and advising them to withhold supplies of jute till they get a certain price;

(3) Arrive at an agreement with the mills to continue the agreement of minimum buying prices for jute and minimum selling prices for jute manufactures; and

(4) Give facilities to the people who would like to hold stocks of the old crop which are acting as a dead weight on the market.

NATIONAL INSURANCE COMPANY, LIMITED

BALANCE SHEET—***Contd.***

We hereby certify that:

1. The Investments in Stocks and Shares have been shown in the Balance Sheet at market values which have been arrived at from the published market quotations. No redeemable Security, however, stands at above par. The Securities in the aggregate stand below their market value.

2. The values of all the Assets have been reviewed as at the date of the Balance Sheet and that in our belief the assets set forth in the Balance Sheet under the headings "Loans", "Investments," "Agents' Balances", "Outstanding Premiums," "Interest, Dividends and Rents Outstandings," "Interest accrued but not due", "Sundry Debtors," "Cash," "Furniture, Fixtures and Machinery, etc." are shown in the aggregate at amounts which taking into consideration the Investment and Contingency Reserve Fund and the General Investment Fund do not exceed their realisable or market value.

3. No part of the Assets of the Life Insurance Fund has been directly or indirectly applied in contravention of the provisions of the Insurance Act, 1938, relating to the application and investment of Life Insurance Funds.

Slow Sovietisation

THE outbreak of war between Russia and Germany creates a new interest in the Baltic States which were absorbed last year almost effortlessly by the Soviet Union and which Germany hopes to annex before long. Though the attitude of the people to the two Powers may not be a decisive factor in the present war, it is unquestionably important to the belligerents in the pursuit of hostilities and to the ultimate fate of their republics. The treatment accorded by Russia to the people whom they have brought into the fold of the Soviet Union also determines their attitude to the war. From all available evidence, it would appear that Russia has carried out the sovietisation of the Baltic republics warily and without undue haste either in its political or in its economic aspect. Actual absorption with the U. S. S. R. was delayed by the elaborate arrangements connected with admission to the Federation. It has to be pointed out that the Communist party had to be made supreme in the States before the elections could take place as admission into the U. S. S. R. entailed sending representatives to distant Moscow.

The grip over economic life was complete with the introduction of the rouble into the three Baltic States. The U. S. S. R. had also to arrange for the formal absorption of territory ceded by Rumania and the process that began in June was not complete till January this year. It has been often said that lack of general outside recongnition for the new acquisition is damaging to Russian prestige, but the main aim was gained early. Germany had to share supremacy of the Baltic with Russia which was quite agreeable to the removal of the Balts. The transition period preceding the election of delegates of the Supreme Soviet Council was marked by a series of revolutionary changes. The Right elements were discredited and prostrate and Red Soviets emerged in the new lands. The populations of the new territories are Soviet citizens, and they are being Russianised slowly. The differences between Russian and German methods appeared soon after the partition of Poland and the main point is that oppression is not a ruling principle. In the peasant republics of the Baltic the socialism of industrial towns does not catch on easily, so local autonomy has to be recognised and Russification delayed. Cooperation can only be obtained by compromise and cultural claims are conceded in the States.

The process of nationalisation of industrial and business undertaking coincided with the redistribution of the land. The landless peasant got a new deal and the landed capitalist was told that the maximum for any farmer was 30 hectares tilled entirely by family labour. Collective farms were not tried, in view of the difficulties experienced in Russia proper in the past, but demonstration farms run by collective cells have been set up. Private belongings were not confiscated, but housing arrangements were refashioned on thoroughgoing socialist lines. New cooperatives on the Soviet models are elbowing out established business; and the capitalist, if he is allowed to remain in business, is being forced to throw in his hand. The preparation stage was passed when the Latvian, Estonian and Lithuanian Presidents became exofficio Vice-presidents of the Federal Republic. The further advance of Sovietisation through propaganda without its defects must make the invaders' task difficult though over-running these territories may be easy enough. Russian occupation was not welcome; it was not resisted. But the German invasion will stimulate national resistance and promote collectivism.

Help for Industry in South Africa

The policy and practice of the Union of South Africa as regards imports of raw materials is discussed in the March issue of the official journal of the Union Department of Commerce and Industries. A number of applications were submitted to the Board of Trade and Industries in connection with tariff concessions asked for by manufactures. The applicants concerned asked for assistance in regard to materials needed for the manufacture of (1) gymnasium frocks and womens' and girls' blazers and gaberdine raincoats. (2) tartaric acid for the purpose of Jam-making (3) flannel board socking sheets for slippers (4) mineral turpentine and turpentine substitutes for the production of conne oil (5) bottles for the packing of medicinal preparations (6) benzine for the manufacture of thinners (7) bleached cotton for the manufacture of absorbent cotton wool. The Board's recommendations need not be set out in full. It is enough to say that the Board in presenting the evidence to Government strove to make recommendations, as far as possible, practical and impartial. As regards materials for clothing manufacture, the Board suggests that the stuff required for the gymnasium frocks should qualify for rebate of the duty allowed in case of imports of materials for making similar garments. The application was supported, though the Government did not agree with similar views expressed in 1939. In regard to tartaric acid, it is recalled that an application from a firm of canners was opposed by another firm on the ground that, if tartaric acid obtained a rebate, it would impose the manufacture of cream of tartar and because the latter firm was contemplating eventually the manufacture of tartaric acid. The opposition has been withdrawn, and it has been pointed that plans for local manufacture had to be postponed on account of the prohibitive price of stainless steel which is essential for the plant. In view of the need to encourage the canning industry, more than ever important as many markets for fresh fruit had been lost, the Board agreed to support the application of the jam manufacture for the admission, under rebate of duty, of tartaric acid required for the manufacture of jam. Applications from other concerns for the admission of flannel board sheets obtained the support of the Board on the ground that local manufacture would be costly and difficult, that Indian and Chinese consumers want this board for the slippers they wear, and thirdly, on the ground that similar materials required by the boot and shoe industry were eligible for rebate of duty. As core oil is wanted for the iron and steel industry, mineral turpentine substitutes are of importance and the application forwarded through the Board had been approved by the Transvaal Engineers and Founders' Association. As more oil is admitted duty free when it is required for the iron and steel industry, materials from which it is manufactured must enjoy special consideration and the application was, therefore, backed by the Board.

There are other cases cited. But what is important is that a wide variety of products are to be admitted on terms which afford to Union manufacturers the Advantages desired.

Though, the functions of Board are merely advisory, its practice of picking and examining in advance the cases presented to the Department makes it certain that the Board's views will command great respect. The Board, of course, differs from the Tariff Board in vogue many countries but its close connection with customs classification and administration shows that in regard to functions it has been assimilated to the I. D. A. C. set up in Britain. The long, elaborate quasi-judicial procedure of the Tariff Board in India has its disadvantages and a different type of organisation in contact at all times both with government and industry which would pronounce upon the merits of applications for tariff or other concessions may be held desirable on various counts. The Board in South Africa is free from prejudice on the subject of encouragement to minor industries, and individual applicants pleading to a Government with an eye on revenue, could always appeal to the previously expressed opinions of the Board which has a Chairman and a Secretary in addition to three members.

World Silver Supplies

THE absence of any change over a long period in silver quotations in London cannot be wholly ascribed to the difficulties in procuring outside supplies or the contraction of demand in India. The stability of prices points as much to the effectiveness of control as to the constriction of speculative interest in wartime. The advance in the world's silver output sets at rest doubts as to the reappearance of conditions similar to those preceding the Pittman Act of 1918. The U. S. silver purchase programme has not been wholly abandoned and the New York price of 34¾ cents per ounce maintained over a long period has determined, to a great extent, the course of prices in Bombay. For it is now generally known that London's stocks are small that it is hard to add to them, and that outside demand is actually discouraged. Industrial demand is satisfied by the silver supplies from Australia, whose base metal producers are important as sellers of silver as well. And the Indian Government, on occasion, adds to the floating supplies by sales from its own holdings of silver. It was bound for four years from 1933 to abstain from selling; now there is nothing to bar sales, and it has been noted that since the beginning of 1941 the Indian Government has again emerged as a seller and given relief to the London silver market besides making an important contribution to the policy of pegged prices.

Silver production expanded considerably last year from 254.2 million ounces to 278 million ounces. The increase might naturally be set down to the big increase in the output of base metals. The lapse of the Silver purchase Act and the appearance of the Townshend Bill objecting to purchase of newly mined silver did not upset U. S. silver production which, according to Messrs Handy & Harman of New York, rose from 57.8 million ounces to 65 million ounces in 1940. Mexico remains the most important producer with a total output of 83 million ounces out of the world's total output of 278 million ounces, and the recent indications of accord between Mexico and her neighbour may have a very important bearing on the outlook for silver. Production in Latin America with the exception of Mexico declined during 1940. Canadian production however rose by half a million ounces to 24½ millions and a small rise was reported by the Union of South Africa. Japan with a total output of 11 million ounces has a place among the world's producers; but her output is below that of Australia and New Zealand which reported a total output of 14½ million ounces for both 1939 and 1940.

U. S. Shipping aid

A telegram from London dated June 20, received by the Associated Chambers adverts to the fact that shipbuilding activities in American yards is at the highest level since the World War. According to the *New York Journal of Commerce* quoting a report of the American Bureau of Shipping, ten speedy new vessels totalling 80,000 tons have been completed while twelve ships slid down ways and are now awaiting completion. American yards produced 33 ships with a gross tonnage of 264,451 by June 1 this year as compared with 19 ships with gross tonnage of 147,052 in the same period last year. Launchings this year of 39 ships with a gross tonnage of 309,680 as against 16 ships with a gross tonnage of 1,34,060 last year show how rapid and substantial the progress has been. It has been lately revealed by the U. S. Maritime Commission that ship construction in the U.S.A. has risen to the 1918 peak and in some respects has even surpassed it. The estimated production for 1942 is 3,500,000 tons deadweight and the production for the three years ending December 1943 is estimated at over 9 million tons. The present aim of the Commission is to construct 705 merchant vessels of all types by the end of 1943. At New York a Director of the Commission said that ship for ship present production is far superior to that in the last year. The figures cited in the telegram suggest that a total of five million tons for the annual construction in 1943 is envisaged. But the immediate problem posed by the Battle of the Atlantic is not solved by a recital of estimates of yards capacity and probable construction totals. The figures of sinkings in May released barely week ago showed that the shortage caused by enemy activity is undoubtedly grave. Relief can, however, be expected after the destruction of the *Bismarck* and the withdrawal of many U-boats into the Baltic while the R.A.F's attacks on Kiel will make their own contribution to the suppression of submarine activity.

Coffee Problems

Coffee dealt with under the Control scheme amounted to 7,000 tons, about one half the quantity expected under normal conditions, said the Chairman of the Coffee Market Expansion Board last week. The new title bestowed on the old Cess Committee must not conceal the differences between the tea and coffee control schemes. In origin, scope and purpose, the two organisations differ widely. Even greater is the difference in the type of restriction resorted to, and the actual merits of the coffee

control scheme are not above question in the opinion of some. The Coffee Market Expansion Board fixed an internal quota of 40 per cent for each estate as a higher figure would have depressed, according to the Chairman, the internal market which had already received large supplies from non-controlled sources in the early part of the season. The pool into which producers are expected to throw their surplus coffee received 3,900 tons, a tonnage below the 60 per cent quota to be surrendered. The actual receipts are likely to be supplemented by coffee for which foreign orders have been cancelled and the surplus may be as much as 5,000 tons. Reduction was effected by the release of 1,024 tons for export and 437 tons for the internal market leaving a surplus of 2,435 tons as on April 30, a carry over that threatens the future. The proprietors of coffee estates are consoled with the statement that the prices realised for the Pool coffee were satisfactory and Rs. 6 lakhs were paid out as compensation on the basis of recognised grades delivered to the Pool. The payment of a final dividend will be delayed until all the Pool coffee is sold.

Mr. Madhava Rao, the Chairman of the Board, discussed other things besides the Pool and its contents. He roundly stated that the "loss of oversea markets is inevitable and must be faced." To a limited extent, it might be compensated by the expansion of the internal market but it would be unwise to count upon this as a factor of immediate importance." Control of the crop by the 1940 ordinance can only secure equality of sacrifice among producers, it cannot reduce supply or increase demand. Mr. Madhava Rao did not say anything about the latest Pan-American coffee agreement which limits sales by individual countries to an agreed quota. There is far too much coffee in the world even after the latest quota agreement. One thing is certain that new foreign markets cannot be looked for during or after the war. The Control scheme can only give temporary and partial relief, and the Chairman rightly cautioned the planter against expecting too much from restriction. Discussing the results of the campaign to popularise coffee in England he mentioned that Indian coffee was introduced into canteens and demonstrations were given at two London stores. More wholesale firms showed interest in Indian coffee. Propaganda in India has made slow progress; but two new coffee houses on the West Coast of South India have been opened and the established coffee-houses show larger receipts, so that it costs much less to run them. Economies in expenditure retard the development of this side of the work but it is unavoidable as cess receipts from exports have fallen away sharply. The Board is handicapped by having to concentrate on control to the neglect of market expansion work.

Varied Production

Enough has been heard this year about war demand and export outlets for Indian textile manufacturers to make one wish that one had close, and more detailed knowledge of what to get and where. Long familiarity with retail lines in the ordinary shops does not make the individual conscious of the specialities offered by each manufacturer, nor is it easy for him to ascertain what a wide range of choice can be had in Swadeshi goods at present. The lack of knowledge on the part of the individual consumer is excusable, but the trade might not have learnt that the higher competitive capacity of the Indian mills is reflected also in the wide variety of manufactures offered to all markets. Between the foundation of the first mill in Bombay and the emergence of an export trade lay a long interval, and the early trade in yarn has since been affected by a welter of influences, none of which can be withdrawn. But the cotton textile industry has never forborne to grasp advantages in export markets and the increasing demands from the Eastern Group Council constitute but one egg in the basket. It is not necessary to dwell on the advantages of an export trade. Because India is compelled to afford preference to British goods, one might claim that advantages in Colonial markets should be provided in return. There is again the difficulty of a diminishing foreign trade on the main export staples to compel India to concentrate on manufacturing industry. And cotton textiles, being in wide demand even in the most backward country, undoubtedly present the Indian shipper with his chance. There is again the need to secure something like reciprocity in commercial relations with Egypt and East Africa. One cannot countenance large imports of cotton from Uganda and Kenya if Indian cloth does not sell in those markets. There is nothing like forcing them, for as the Chairman of the Bombay Millowners Association, Sir V. N. Chandavarkar, reminds us, many overseas markets have been virtually cut off from their previous suppliers with the result that India has been called upon in increasing measure to meet their requirements for textile goods and during the last few months, a very large number of enquiries have been received by the Association from overseas merchanting houses for information as to the manufacturers of particular types of goods in which they are interested. The answer to all such enquirers as also to the naturally curious who are anxious to know something of the progress of India's mill industry, is contained in a publication issued recently by the Association. Particulars are furnished as regards agents and dealers. The number of mills about whom particulars are furnished is 92 only; but it is noteworthy that mills in Madras, Amraoti, Gwalior, Coimbatore and Delhi find a place. Industrialists will have reason to regard this departure in co-operative advertising as a special type of publicity for which the experiences of the past ten years affords ample justification. Indian mill Companies besides furnishing particulars have indicated their special lines and made their marks famous. It is to the credit of the Bombay Millowners Association that it is keener than any expert group and has not forgotton to take a lesson from Lancashire's thrustfulness.

EAST INDIAN RAILWAY
TENDER NOTICE.

Annual Contract items costing over Rs. 8,000. Sealed tenders are invited for the following items and will be received in the General Manager's office, 105, Clive Street, Calcutta, up to 12 o'clock (noon) on 25th July 1941.

Tender No. S/SP/702/Gb. 10/Camp/C for the supply of Compound ase hardening Tender form with full particulars can be had from the office of the Controller of Stores, Calcutta, on payment of Rs. 2 per copy to the Treasurer, East Indian Railway, Calcutta, and on production of his receipt when applying for the same. Firms outside Calcutta, may however remit the amount direct to the Controller of Stores, by Money Order. No refund is permissible.

CONTROLLER OF STORES.

National Insurance

THE shrinkage of new business reported by the leading insurance companies in India is one of the penalties of the war. That the war is a disturbing influence was recognised a year ago, and the belated recovery, noticed latterly, is not striking enough to arrest attention. But the contraction in new business can have no repercussions whatsoever on the policy or standing of the major companies. The reports for 1940 issued by the leading companies establish the fact that insurance companies have very successfully weathered the uncertainties remarked last year. The regular additions to income and funds continue, and high stability is the distinctive mark of an investment policy, framed as much in the interests of a vast number of policyholders as of the company which can point to the reduced margin of depreciation on investments and a more correct distribution of investment alongside of an unusually favourable claim experience. Such claims are justified by the record of the National Insurance Company whose annual report and accounts show that it is more than ever in the vanguard of Indian insurance.

The 1940 report merits special attention because it throws into relief the main features of insurance progress in India besides showing that the National in its 44th year rose superior in many ways to the adverse influences of the of the period. The figures need be taken as merely illustrative of conclusions expressed in INDIAN FINANCE more than once, The Directors report that out of 9268 proposals assuring Rs. 1.88 crores, 7,709 were accepted resulting in the issue of policies for nearly Rs. 1.57 crores yielding a premium revenue of Rs. 8,09,802-13. The new business figures are lower than for the three preceding years but this is unimportant as compared with the maintenance of high standards in all other respects.

The Life revenue account shows that net investment income advanced to Rs. 14,28, 348-10-3. Total premium revenue amounted to over Rs. 57.7 lakhs revealing an increase of Rs. 3½ lakhs on the preceding year. A wartime feature is the transfer of Rs. 93,091-3 from the Investments and Contingency Reserve. The year's outgo was more or less normal as claims by death took Rs. 9.58 lakhs only and claims by maturity Rs. 16.56 lakhs. Comparisons with previous years may indicate that the expense ratio has not fallen steeply as expected, but the year was unsual in many respects, and the only fact to consider is that the Life Fund receives an addition of over Rs. 25.24 lakhs. The Life Fund has risen to over Rs. 3.46 crores showing that, in spite of a reduction in new business and the falling rate of yield on investments, the National Insurance Company's progress

"We have no illusions about 1941. It is going to be a hard, dangerous year. But we are not in the least dismayed. With help from you we are confident that we can win, and win decisively, by 1942, if not before".

The late LORD LOTHIAN.

Lord Lothian was addressing the American people, but his words apply as strongly to us here. *We* can help, by contributing month by month whatever we can afford, be it four annas or four hundred rupees, to the East India Fund—the Fund that is providing aircraft for democracy All of us can send a monthly subscription, however small, to the

is assured. Eminently reassuring must be the description for the balance-sheet which shows that except for a total of Rs. 72 lakhs in mortgages and policy loans the assets were well distributed: the Company held stock exchange securities valued at Rs. 2.38 crores nearly. The classified summary shows that investments in approved securities total over Rs. 1.27 crores. The considerable stiffening as regards average yield provided by the holdings of ordinary and preference shares (shown at cost) must always attract attention. Revenue items shown among the assets total over Rs. 15.5 lakhs and cash in hand with banks and in process of realisation is shown at Rs. 4.34 lakhs. While the Life Department continues to make satisfactory progress the Guarantee Business and the general insurance subsidiary make an indifferent showing. The 1940 results, however, show that the Guarantee Business branch makes a contribution to the Profit and Loss Account while the Fire Branch reports a very considerable improvement as regards business and funds. It is to be hoped that such late expansion will be quickened by the war. The beginning of of a more prosperous period for the National Fire and General Insurance may be discerned by all in the report and accounts reviewed today.

Central Finances

Of no small interest in indicating the finance of the Central Government during the current year is the statement of income and expenditure for April issued. As compared with the previous year all heads of revenue with the exception of Customs show an increase. Despite the fall in Customs receipts by Rs. 21 lakhs, there is an improvement in the general revenue position by Rs. 58 lakhs. The fact that the first month of the current financial year has brought in only Rs. 6¼ crores though the Budget estimate for the whole year is nearly Rs. 106 crores is no ground for any adverse conclusions, for the first month is no safe guide for judging future revenue collections.. On the expenditure side the increase during the month, despite a saving in gross debt charges to the extent of Rs. 84 lakhs is over a crore of Rupees. This is almost entirely due to the rise in Defence expenditure which during the first month alone was as much as Rs. 1½ crores more than the figure for April last year. The is that the expenditure has exceeded the net result shown by the month's figures income by over Rs. 6 crores. Railway earnings, however, continue to show an upward trend. The first two months of the current financial year have brought nearly Rs. 20 crores—an improvement of over Rs. ¾ crore over the actuals for the previous year.

The New Asiatic Life

The total under new business for 1940 reached a new high level in the case of the New Asiatic Life Insurance Co. The report for 1940 discloses that under new business alone there is an increase of Rs. 10 lakhs. The Directors state that out of proposals for Rs. 72.23 lakhs proposals assuring in the aggregate the sum of Rs. 60.13 lakhs resulted in policies. On any comparison with previous results, the New Asiatic must be said to have strengthened itself. The Directors' report in analysing the progressive improvement in new business secured year after year records that doubt and uncertainty marked the year as a whole. And the company has more than usual reason to congratulate itself on the brilliance of the results, indicated sufficiently by a rise of 20 per cent over the previous year's total as regards new business. The 1940 report distinguishes the New Asiatic as somewhat exceptional in regard to new business. The increase in premium income and funds is only to be expected in the case of a vigorously growing and progressive life office. The total premiums as shown in the Revenue account amounted to Rs. 6,87,838-11-6 against Rs. 5,53,095-8-6 in 1939. The increase of 24 per cent in premium income shows that the increase is distributed over both renewal and first premiums, and almost exceptionally, there is an increase under single premiums also.

A small rise in investment receipts is recorded in the Revenue account which shows that total receipts came to Rs. 10,77,772-0-1 showing a rise of Rs. 2.6 lakhs on the preceding year. Total claims including those intimated accounted for payments totalling Rs. 79,160 and surrenders during the year took Rs. 2, 069-14-4. Expenses in the case of a young company are naturally high, and if the total for 1940 is over Rs. 3.9 lakhs, the striking expansion of new business, may be said to justify a high expense ratio. The 1940 results confirm the view that the New Asiatic is developing rapidly: the satisfactory growth of the Life Fund standing at Rs. 5,76,773-6-1 at the end of the year proves it. The usual analysis of the balancesheet reveals in this case that Investments total Rs. 3.02 lakhs and loans of all classes amount to Rs. 1.25 lakhs. Organisation expenses are being successfully reduced and the regular provision of depreciation shows that dead assets are being attended to. The classified summary of assets supports the view that the Company's policy in regard to investments is impeccable though the difference between the market value and cost of Government securities held by the Company must have disappeared by now and no calls will be made on the Investment Reserve of Rs. 20,615-13-6. The impression is heightened by the ample cash balances of Rs. 3.01 lakhs as these are greatly in excess of the Company's liability on outstanding claims, premiums and sundry creditors.

Customs Revenue

Customs including land customs revenue collected in May in British India amounted to Rs. 383 lakhs according to returns received by the Department of Commercial Intelligence. The total revenue for May is higher than the April total of Rs. 348 lakhs and higher also than the revenue collected in May 1940. The increase in revenue points to a further improvement in India's import trade after the rise noticed in April. The total under Central Excises at Rs. 82 lakhs shows a fall as compared with April but shows an increase of Rs. 20 lakhs on April 1940. The total customs and Central Excise revenue for April and May is stated to be Rs. 9 crores against Rs. 8.52 crores in 1940-41. Import duties provided a total revenue of Rs. 6.67 crores and Excises yielded Rs. 1.69 crores. The balance was made up of export duties (Rs. 55 lakhs) and Land customs and miscellaneous receipts (Rs. 9 lakhs). The increase in revenue is traced to a rise under import duties levied on motor spirit, rayon yarn and goods, kerosene, liquors, tobacco, silver, matches, match splints and tin. As compared with 1940-41 higher receipts were obtained from the export duty on raw jute and the excises on sugar, matches and kerosene. The increase in revenue occurred in spite of a fall in imports of cotton manufactures, motor vehicles, raw cotton, sugar, betelnuts, machinery, iron and steel, paper and stationery as also silk fabrics as compared with the corresponding period of last year. Reduced receipts are to be noticed under receipts from the export duty on jute manufactures and land customs revenue fell probably on account of the very considerable changes in administration involved in the agreement with French India.

U. S. Aluminium Needs

The new drive in the U.S.A. for additional aluminium production has been featured in news agency messages lately. The drive may seem unusual in a country that leads the world in aluminium output. The appeal for pots and pans and the use of such slogans as 'Up Housewives and at'em' may seem redundant in the U.S.A. which has not only a vast integrated combine (dominated by the Mellon dynasty) but control over aluminium production in other countries besides access to bauxite resources in many lands. Perhaps aircraft production in the U.S.A. is to be developed so rapidly that a slow advance in aluminium production will not answer, this in spite of the fact that the Aluminium Company of America has decided to carry out a plant expansion programme costing 150 million dollars. Total production according to the U. S. Bureau of mines rose to 184,000 tons in 1940 from the total of 146,000 tons in 1939 which marked a big increase on the preceding year's output. By the middle of 1942 the U. S. A. expects production to rise to 312,500 tons per annum mainly on account of the additions to aluminium production plants. But the Republic is not prepared to wait for a year and the drive for private collection of the indispensable metal has begun. Three months ago the opinion expressed by Mr. Edward R. Stettinius Jr. was to the effect that the output of virgin and secondary aluminium and the fabricating facilities of the industry would be able to meet the demands of the aircraft construction programmes of Britain and the U.S.A. for the next two years. Since it was generally expected that U.S. production would exceed consumption by the spring one may infer that the U.S. aluminium drive is meant to lay up additional supplies so that more aluminium can be exported to Britain

THERE is nothing too surprising in this war of surprises. The impossible has proved easy and Germany and Russia have glided, so to say, into active hostility. For over a month, there has been a slow trickle of reports about increasing tension between Russia and Germany. But every time the authors of the reports were careful to hedge them in with innumerable qualifications. Even on Saturday night, when there was no doubt that hostilities had broken out, the American correspondents at Ankara could not bring themselves to make a categorical statement. And there are many who would still trust in Russo-German friendship but for the series of communiques from the respective High Commands. I guess that those who were so sceptical of these reports are the very men who should have found it difficult to believe in the Russo-German Pact when it was concluded in August 1939. The temptation to project current trends into the future without any thought of change therein, not to speak of a reversal, is so strong in the average man that he finds it hard to gulp anything that runs contrary to his previous expectations. After all, let us not forget that in regard to this war, we had no right to be sure of any of the developments that have actually occurred. Who could have felt certain about American help to Britain on the generous scale on which it has been actually afforded? Who could have counted on the collapse of France? The easy over-running of the entire Continent by Germany, which now seems to us inevitable, did we have any right to expect it? Was not the whole strategy of German militarism new and untried when the war started?

It is clear that we have need for an altogether new mental apparatus for following and understanding the course of the war and the shifts in its diplomatic background. If France and Britain can be on the brink of war with each other, and Germany and Russia can become friends and foes in alternation within less than two years, the old attitude of confidence in our understanding has to be revised. Never did war so confound men and confuse men's understanding. Why is it that, alone of all the wars of history, the one that is now raging in Europe should be so packed with surprises? It would not be useless to recollect for a moment all the unexpected turns of history during the last two years. When shall we date this war from? Not surely from the date on which Hitler attacked Poland. It is much older. Munich was but a prologue to a play which had been got up much earlier. The play starts with the break-up of the Versailles settlement, a break-up which was wrought partly by the Great Depression and, in even greater part, by that rift in the Anglo-French front, which, despite all the goodwill that there is on both sides, has pushed the two nations to the brink of war. This rift was Hitler's opportunity; and he made the most of it. For it paralysed the democracies for action against the Nazi menace. The democracies were divided till the last minute and when they united at Munich, it was only to throw Russia into the arms of her sworn enemy.

If I were asked to characterise the history of Europe in the last ten years, I would say that its most salient feature is the evaporation of French security and the European system based thereon. It is no exaggeration to say that French security, for which Clemenceau and Poincare laboured hard, has simply evaporated in the six, seven years that followed the death of the former. Neither the financial hegemony which M. Poincare built up for France, nor the political stranglehold over Germany which M. Clemenceau gave to his country through the Treaty of Versailles has availed France in the trials to which she is now subjected. Germany has eluded both with equal success. Economic totalitarianism and the financial jugglery which the ingenious Dr. Schacht evolved and perfected within a year or two enabled Germany to go ahead with her plans, regardless of whether it is France or the U.S.A. that chooses to carry the load of the world's gold stocks. France looked on while she was being denuded of her gold and rendered more unfit to pursue the rearmament which was so obviously her need. She felt however that the Maginot line was sufficient to keep at bay any invader from the North. But this threefold security, political, financial and military, vanished in no time. The client States have been wiped out of existence. The Franco-Soviet Pact was reduced to a dead letter by the action of M. Daladier at Munich. Spain

went over to the side of Germany. And the Maginot line is now a protected monument, for sight-seeing Maori tourists, as Bernard Shaw would put it.

Once you get a grip on the fact that this system of French security which has now crumbled was fated to crumble even before the war began, then the upsets become a little more intelligible than they would be otherwise. I imagine that Soviet Russia was the only country which estimated the strength of German militarism aright. Russian policy would conceivably have been different if the Western democracies were capable of co-operation with Russia, if France had not been so incapacitated for timely action as she was by Fascist cliques in her ruling class, if the French system of client States had more vitality than it in reality had. Not only the international situation at that time, but Russia's internal situation, too, must have argued powerfully against any precipitate clash with Germany.

Stalin's diplomacy as we can see it now was governed as much by the opportunism of the moment as by the requirements of the long view. Who can doubt that, if Russia had land in war with Germany in 1939, all the little States that are now grovelling under the German heel would have baited her like so many street dogs. Once Czecho-Slovakia was gone, it suited Russia to wait for the others to be wiped out of existence; so that Germany and Russia could face each other in a straight fight. Even to-day, Finland, true to her traditions, does not desist from administering pin-pricks to her mammoth neighbour. Of course, Russia had to, as indeed she did, take care to see that in the process of liquidating the small States, she, too, had her share, so that the first shock of German aggression would be felt by the newly acquired territory. It seems cynical; but it would be more correct to call it realistic.

Russian diplomacy has never suffered under any delusions about the intentions of Germany. The pact of August 1939 was most clearly a makeshift for both sides. On the other hand, Germany had to remove all risk of a war on two fronts till the subjugation of Western Europe. And on the other, Russia had to recover from the effects of the army purge and tie up the loose ends of her military programme before she could face Germany. The pact suited both sides. Germany scored a diplomatic triumph over the Allies. Russia got even with the Democracies for the slight at Munich. The small countries were wiped out. But Russia extended her border to the pre-great war stage. Germany got oil and wheat up to a point. Russia had technical assistance and turned off the oil taps in time to protect herself.

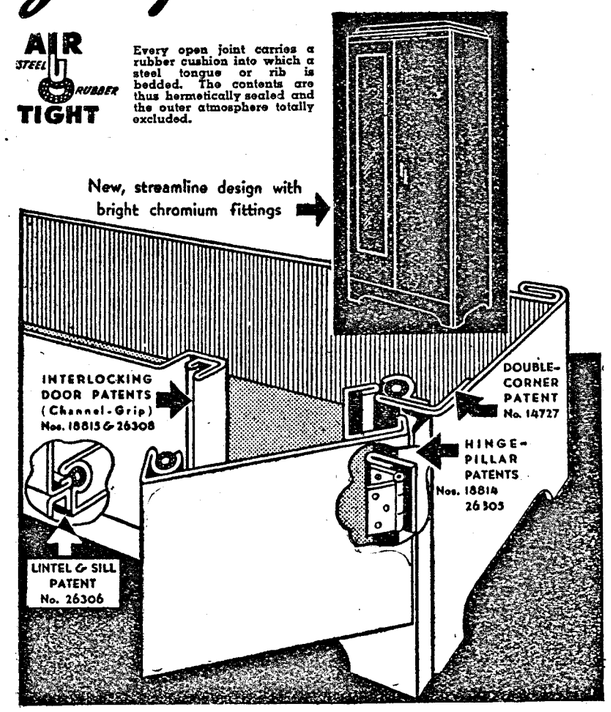
And now comes the putsch. People, accustomed to see a series of German triumphs on land, are unwilling to believe that Russia can fight. It is less than a week since the war started. But I think we have had enough to prove that Russia is not Poland or Greece; and that, whatever the upshot of this war, Germany is not going to have a walk-over there. It is true that there have been reports of a German thrust into Russian territory here and there. But the Russian forces have nowhere been on the defence. Upto the moment of writing, Russian loss in planes is less than that of Germany. And there has been at least one instance of Russian forces beating back the invader, the cavalry actually chasing him sabre in hand. And what is most significant of all, we hear for the first time of battles of tanks. Though we heard a lot of tanks, it was of tanks advancing and tanks retreating, but never till now of a battle of tanks.

Germany and Russia, then, are well-matched, at least as far as reports up to the moment enable us to judge the matter. But one feels that all the impressive triumphs, which the former has had on the Continent of Europe, must be set against the unimpressive performance which Russia put up against so puny a country as Finland. It is true that the two are quite relevant. But all that was said at the time of the Russian campaign against Finland is not true. The Russian objective in that war was limited to securing just that degree of protection for Leningrad, the neglect of which would have proved fatal. Of course prejudiced propaganda branded Russia as an aggressor and made the most of the limitations of a war which started on the day of the longest night of the year. Russia could have, if she wished, carried out a large scale bombing of Finland. But that would have provoked the democracies to more active help than they gave to Finland and might conceivably have precipitated another war, one which would not have dovetailed into this, but would have superseded it in interest. I guess that one of the major aims of Russian diplomacy, as soon as war was seen to be clearly in prospect, was to destroy all chances of the democracies joining hands with the Axis in an overwhelming attack against the only Communist Power in the world. If that was the aim —and it is impossible that it was not the aim—then Stalin has achieved it with great skill. The Russo-German pact achieved the double purpose of removing the weak spots in the Russian armour and letting Germany be seen for what she is, the inveterate foe of the democracies whom the latter should never think of treating with. Once German designs for world dominion are made clear beyond the least shadow of a doubt, Russia could face the risks of a war with Germany, and not till then.

Fortunately for Russia, the two purposes of separating the democracies from Germany and removing the weak spots in her defences were, far from being mutually conflicting, really complementary. A temporary friendship with Germany enabled Russia to achieve both objects; and unless it can be urged that, if Russia had joined France and Britain, the course of the war would have been different, there is little cause now to regret Russian policy in the last two years. And such an argument is clearly untenable as Russia's aloofness from the democracies was not of her making. But the main point to urge now is that the Russo-Finnish war was not meant to be a demonstration of Russian strength. A crude kind of capitalist propaganda made the most of the small reverses that the Russians suffered in the Finnish war; and now when any thought of Russian weakness is far from pleasant, there is much

to be unsaid and counter-acted; and the painful process goes on, as all, who have eyes, can see.

If we are to have more correct ideas about Russian strength, we have to remember that, while Germany prepared for war on all countries, one by one, and over a period, Russia has been arming for twenty-five years against the contingency of the whole world springing to arms at the same time against herself. If Germany has been totalitarian for the last eight or nine years, Russia has had the advantage of totalitarianism for the last quarter of a century. Parachute attacks and troop carrying planes, of which Germany has made so much during the last two years, are Russian, and not German, devices and inventions. The Russian has a new idea to live and die for, while the German has nothing but the resentment of two decades ago and the infectious megalomania of his Fuehrer.



Of course, no country goes into a war without reasonable hope of success. And Germany has had such close contact with Russia in recent years that she must have formed her own ideas of Russian strength. There is always an element of uncertainty in war which it would be foolish to ignore. But for the purpose of judging the ultimate upshot of the war in Europe, it would suffice that Germany cannot finish the war with Russia in a few weeks or months. If Russia's experience is different from that of the other countries which Germany has overrun and occupied, it would mean that she has had the handicap sufficient to ensure her defeat at the hands of Britain.

Unfortunately, that seems to be the only way most people in Britain and the U. S. A. seem to regard the Russo-German war. There is a general disposition to regard Russia, not as a comrade in the common cause of putting down the menace of Nazism, but as the agent of an indirect help. Years of accumulated prejudice are proving a dead weight on thought. One can see the workings of that prejudice in the reports that are being sent out of the course of the fighting on the Russo-German frontier. There is a general reluctance to believe in the possibility of a Russian victory, whose consequences might be far-reaching. The only encouraging sign is that both Mr. Churchill and Mr. Roosevelt have a firm grasp of the realities of the situation. Traces of Toryism are hard to erase. But Mr. Churchill has had no hesitation in declaring that whoever is a foe of Hitler is his ally. Mr. Roosevelt declares "All aid to Russia." Thoughtful men in both countries have recognised that, if Germany is allowed to overrun and control Russia, the same as she did France and other countries in Western Europe, she would have such a vast access to her resources that she could become invincible for centuries. This recognition should pave the way for closer understanding and co-operation. America has made credits available to Russia. The British Mission is on its way to Moscow. And probably, Hitler has relaxed his efforts towards winning the Battle of the Atlantic and the Battle of Britain.

The net is closing in on Hitler. But it is too early to shout. There are still two big marks of interrogation hanging over international politics, Spain and Japan. But at this stage, it is well to recognise the services done to their country by three men, Lord Lothian in the U. S. A. Sir Samuel Hoare in Spain and Sir Stafford Cripps in Russia, all three out of the caste of the diplomatic service. All have done well; and to-day Britain is able to feel a confidence in victory which is not based only on the will to win. Lord Lothian had a comparatively easy task in winning the American public to a recognition of Britain's perils. Sir Stafford's success in a task, at once intricate and

(From Our Correspondent)

Bombay, June 25.

THE first meeting of the Committee of the All-India Manufacturers' Conference held on Sunday last is an event of more than ordinary interest. The meeting was presided over by Sir M. Visveswarayya, the President of the Conference. The Conference, it will be remembered, met in March last and the Conference has for its object the bringing together on a common platform the representatives of medium and small-scale industries, hitherto not organised. The constitution and functions of the Central Committee appointed by the Conference were adopted at the meeting and the question of organising regional bodies in different parts of the country and forming special committees to carry out the objects of the Conference were considered. These special committees will be entrusted with the task of raising sufficient funds, looking into the ways and means of meeting them and getting uptodate information regarding existing industries by establishing contact with economists and statisticians. The present system of marketing of India's products will be examined by the special committees, and standards and specifications are to be drawn up when the examination is over.

The week-end has withnessed a further deterioration in the riot situation of Bombay. After the midnight of Sunday, there has been increased activity on the part of rioters and several fresh cases of stabbing have been reported. On Wednesday last, a joint meeting of Hindu and Muslim merchants was held to consider the situation and devise more effective means to tackle the riot situation. The local Muslim League will be staging a Muslim League Week beginning from June 27. In view of the high temperature of communal feeling which has resulted in the repeated outbreak of riots, the interests of peace could not be better served than by postponment of the demonstrations of the League Week till conditions became more normal. It is up to the Muslim League authorities to secure this end.

The offices of Messrs. Tata Sons Ltd., were closed on Friday, June 20, as a mark of respect to the memory of Mr. B. J. Padshah, a leading industrialist whose death occurred on Friday, at the age of 77. He was closely associated with the late Mr. Jamshedji N. Tata during the last ten years of that great indusrialist's life. Mr. Padshah graduated in the Elphinstone College, Bombay and went thereafter to England for further studies. On his return to India, he was appointed a professor of the Sind College at Karachi where he rose to the position of the Vice-Principal of the College. It was after he had severed his connections with the College, that he came into intimate contact with the late Mr. Tata who found in him, the man he needed for making investigations in foreign countries for the establishment of a research institute. This commission led to the establishment of the institute now known as the Indian Institute of Science. Mr. Padshah was a director of the Tata Iron and Steel Company, ever since its inception, till he retired about ten years ago.

The sixty-third annual general meeting of the shareholders of the Mogul Line, Limited was held on Tuesday last with Mr. W. L. A. Radcliffe in the chair. The Chairman, addressing the meeting, drew in a pointed fashion the attention of the shareholders to two points in the accounts of the company. Firstly, he referred to the provision for taxation amounting to as much as Rs. 8 lakhs which, he said was an arbitrary figure, necessitated by the excess profits tax. Secondly, he drew attention to Rs. 11,20,000 a disproportionately high figure in normal times but which was justified owing to the tremendous increase in war risk insurance on the Company's fleet. He pointed out that the Company had not, during the past year suffered any direct attack from the rival company and that the press campaign conducted by several papers during the end of last year to the effect that the Government of India had shown the Mogul Line special discrimination in pilgrim trade had been entirely refuted by the Communique issued by the Government of India, dated December 10, 1940. He admitted that the pilgrim trade during the past year had been a small one, amounting only to 5,071 pilgrims, but, then, the Company had landed all the pilgrims at Jeddah without mishap, which was no small achievement considering the dangers attending sea traffic in war time. He paid a glowing tribute to His Majesty's Government, the Government of India, the Royal Navy, the Royal Indian Navy and the Royal Air Force for the co-operation given by them which alone had made it possible for the Company to make its voyages without incident. The Company had borne its share in the war effort and worked in closest co-operation with the Naval authorities. The Company had suffered in common with other shipping in the matter of requisitioning of steamers by Government for war purposes.

The A.R.P. organisation in Bombay which started with one officer and one assistant in July 1939, has now developed into a formidable body. Its present strength consists of no less than 3,000 wardens, 200 first aid posts, 2,000 doctors. Besides, they can lay claim to an auxiliary fire-fighting unit, also of no mean strength. The A.R.P. wardens and workers have received intensive training in dealing with every situation that might arise in an air raid. The local A.R.P. have now taken up a scheme on hand which aims at increasing, in the near future, the number of wardens to three times its present strength. The auxiliary fighting corps is to be provided with eight heavy trailer pumps in addition to the four already in its possession. A civic guard organisation, started in June last year has to-day a total strength of over 4,000 distributed in Bombay City and other district headquarters. The activities of the Civic Guard will be allied closely to those of the A.R.P. service. Their function is to help the Police during emergencies for the protection of the public, thus complementing the work of the A.R.P.

(Continued from page 1169)

various improvements in banking legislation and last August the Chungking Government framed new regulations for safeguarding the interests of depositors. The leading banks have co-operated loyally with the Government and their oversea connections have been maintained in part despite the depreciation of the Chinese dollar over a long period. The opening of branches in India will show that Japan's example has not been lost on China though trade with China is small compared with Japan's share in India's foreign trade. The assurance that American support for the Chinese currency will be provided has been given by an expert attached to the Chinese Currency Board and this assurance will go far to set and rest fears regarding adverse movements in China's currency. None of the manouevres in Nanking and Shanghai has helped Japan to squeeze out the Chinese dollar. It may be only worth a quarter of its companion the HongKong dollar but its soundness is unquestioned and the promise of America support may be more effective than the £10 million credit given by Sir John Simon as Chancellor of the Exchequer to the Chinese Stabilisation Fund.

Olympus

(From Our Correspondent)

Simla, June 25.

It is expected that Sir Shanmukham chetty will leave for America almost immediately as soon as passage arrangements for his travel by air have been completed. Owing to the many urgent problems awaiting immediate attention, it is essential that he should be in America with as little delay as possible. In addition to the Indian Trade Commissioner, Mr. H. S. Malik, there is already Brigadier Tute on behalf of the Government of India associated with the British mission. If necessary Sir Shanmukham may engage other technical experts to assist him but it is not intended that anyone else should go from India with Sir Shanmukham. Orders are also expected to be issued within the next few days regarding the proposed Trade Commissioners' offices in Canada and South America—already unduly delayed though they had been sactioned as long ago as March last by the Standing Finance Committee. From inquiries I learn that it will be no part of Sir Shanmukham's duties to make any propagandist speeches of the kind delivered by Sir Firoze Khan Noon. In his individual capacity he may address meetings, but as he will be giving expression to his own personal views it is safe to assure, that he will not say things which may lead to controversy in this country. As an official entrusted with an important economic mission he may consider it more appropriate to avoid political questions when he addresses American audiences. It is also possible that in the very near future the Government of India may take up for consideration a proposal to appoint an Indian High Commissioner in Canada on the same lines as the one recently sanctioned for South Africa. Apart from the need for a co-ordinating agency to deal with the work of the purchase mission and the three Trade Commissioners, there are several matters of immediate concern to India for which it may be useful to the Government of India to have a separate High Commissioner in America. It is well-known that the London High Commissioner, Sir Firoze Khan Noon, is now in Canada on a visit.

* * *

From more than one point of view the coming meeting of the Railway Standing Finance Committee in Simla is important. Though it is only the second year of the war, the question of locomotive engine supplies for our Railway services is already presenting difficulties. It would appear that the Secretary of State has addressed the Government of India, though not directly, on the need for enforcing all possible measures to reduce to the minimum the wear and tear of existing stock and prolong the life of locomotives to the utmost. In the Central Legislature, it has always been a matter of complaint that despite the very encouraging report presented by the Locomotive Manufacture Inquiry Committee the Government of India did not see the wisdom of making immediate arrangements for starting locomotive Manufacture in India—at least as reparation for past neglect in this connection. The suggestion of the Secretary of State is that, if necessary, train services should be curtailed for economising the use of the existing stock of locomotives. The course of the war has clearly shown that the Government of India was not right in its decision to shelve the Locomotive Manufacture Committee's report and leave the question to be examined after the war. It is not known when if at all the supply of locomotives ordered from England will be shipped to India, for the United Kingdom has to think first of her own war requirements and conserve shipping for essential services. It is said that India may now have to turn to the United States for her locomotive engine needs, but owing to the present restrictions, based partly on shipping difficulties and party on the dollar exchange, this is also not an easy or certain source. A good deal has been said about the work going on at the Ajmer workshops, but according to present information, not more than ten light broad guage locomotives are expected to be ready at Ajmer next year. This is hardly sufficient to meet the growing needs of Indian Railways. It would be well if the Railway Standing Finance Committee could at least now insist on the starting of a locomotive factory on a sufficiently large scale to meet Indian requirements instead of thinking of curtailing train services which are bound to inconvenience the public. The progress made by Australia in locomotive construction should serve as a useful lesson to the Government of India.

* * *

The new proposals for changing the present system of charging telephones have provoked hostile criticism from all quarters. No objection is taken on the ground of principle to the proposed message rate system provided it is confined only to big cities, but the general criticism is that the proposed rates will make every subscriber pay more. It is also urged that if there have been individual instances of abuses, special measures should be taken to deal with them without trying to penalise everybody for the actual or possible abuses by a few. It is hoped that the Government Of India would defer the scheme for the present and take commercial bodies and other interests into close consultation before it decides on enforcing any changes in the present system. It is also far from equitable that five towns should be singled out for the so-called experiment.

* * *

There is reason to hope that the coming meeting of the Standing Finance Committee for Railways, which has been called to consider the rolling stock programme for Railways, will revive the question of locomotive manufacture in India. At last year's meeting the Humphreys—Srinivasan report was announced, but later developments make it clear that the matter cannot be allowed to rest here. A plain warning has been received from the United Kingdom that no further orders for locomotives will be accepted in that country. It is by no means certain that even the orders already accepted and now awaiting execution, can be relied upon. The position in the United States as a possible source for locomotive supplies to this country is also obscure. On the other hand, encouraging reports have been received from the Ajmere workshops regarding the progress made in the manufacture of broadguage locomotives. An order for ten placed by the N. W. Railway is already on hand which will probably be ready for delivery next year. In the course of his Budget speech the Chief Commissioner for Railways expressed the hope that it might be possible to build 25 broadguage locomotives this year, but evidently this was too optimistic an estimate owing to the difficulty in getting the required materials from outside. Still the beginning made at Ajmer should serve as an inducement to the members of the Standing Finance Committee to urge upon the Railway authorities to cease thinking of importing locomotives and try to extend the arrangements for manufacture in this country.

On more than one occasion Sir Bertram Stevens, the Australian representative in the Eastern Group Council, expressed the readiness of the Government of his country to help Indian industrialisation. As locomotive manufacture is an advanced industry in Australia, it should be possible for that country to give active assistance in establishing the industry in India also. Then again, there is little doubt that Sir Shanmukham Chetti who will be in the United States as head of the Purchase Mission before the end of July, will be able to assist in getting the required machinery and other materials for developing the locomotive industry in India. So far there has been no need for any drastic curtailent of train services, but there is grave apprehension in the public that the strain on the train services, partly owing to heavy military traffic and partly to big increases in the movement of goods, has been so great that it may soon become necessary to curtail services as a, measure of economy to prolong the life of existing stock, but whatever may be the needs of the future, it would not be wise to give up available opportunities to set up the locomotive industry on a sufficiently large scale in this country on the basis of the Enquiry Committee's report.

* * *

Of great importance also is the coming meeting of the Transport Advisory Council. Commercial bodies have been urging the Government of India to take up for urgent consideration the question of co-ordinating transport services and extending them wherever possible. It is well-known that the requisitioning of coastal ships for war purposes has thrown an additional volume of traffic on rail and road services. Motor transport, owing to the increasing cost of petrol and other necessaries, is not exactly in a favourable position to meet the new demand. The Railways have to think of military needs first and cannot obviously undertake any further expansion. One suggestion which has been made is that the possibilities of inland water transport should be fully explored. It seems likely that a special officer may be appointed by the Government of India to go into the question of co-ordination and expansion of existing and other possible transport serviced in view of war conditions. In any case the question is expected to be brought up for discussion at the Council's meeting A large development programme not only for improving and extending the road system of India but also for developing inland waterways which for years have been sadly neglected, seems urgently necessary.

* * *

The Petrol Conference which concluded last week spent a good deal of its time in examining the rationing scheme prepared by the Government of India. The views of Provincial Governments have now been received, though all the statistics required for full examination of the question do not appear to be ready. The model of the United Kingdom has been made the basis for the Government of India's proposals. According to reports current here the rationing scheme will be brought into force sometime in autumn owing to the growing seriousness of the war situation. Ordinarily the maximum which any civilian can obtain under the rationing scheme under consideration is said to be 12 gallons. Provision, however, will be made for special concessions in the cases of persons who can prove special need. For regulating petrol rationing, an elaborate coupon system is being devised to meet the needs of various classes of the motoring public. At the moment it would appear that the Government's tentative scheme has already been discussed at the Petrol conference and will also be introduced for

discussion at the ensuing meeting of the Transport Advisory Council is still being perfected to be finally ready for enforcement as an emergency measure when necessary. The Government's view is reported to be that if in the Government's opinion there is any danger of interruption in petrol supplies by sea necessitating conservation of existing stocks the scheme will be immediately brought into operation.

* * *

What exactly has been the effect of the war on Customs and excise revenue which is the mainstay of the Central Government's finances? The latest figures available for the first two months of the current financial year compared with the corresponding months in the prewar period of 1939 reveal certain interesting facts. Revenue from imports, which includes collections both from protective duties and revenue duties, shows a fall in these two months of nearly a crore. The total of net customs revenue, despite the increase in many duties, is also below the prewar figure by nearly a crore. Land customs receipts, though they form a small proportion to the other receipts, have fallen by more than 50 per cent. Even the increase in excise receipts which is largely due to new taxation measures cannot be said to be enough to make up for the growing loss in customs receipts. From the prewar figure of Rs. 94 lakhs in these two months it has risen now to Rs. 167 lakhs. The position regarding income from export duties is disclosed by the fact that as against receipts amounting to Rs. 45 1/2 lakhs in May last year, the receipts last month were just over Rs. 34 1/2 lakhs. According to the latest returns, sugar imports may be deemed to have practically stopped. Imports of cotton fabries of British manufacture, to take another typical instance, have fallen to less than one fourth of what they were last year. Two facts emerge as a result of these indications. Firstly, Central revenues will have to rely less and less on Customs receipts as a source of income. And, secondly, certain important markets which Great Britain and other countries had enjoyed in this country, have been more or less been completely displaced by indigenous manufactures.

* * *

The week saw the birth of the Reconstruction Committee promised by the Commerce Member in one of his speeches in the Council of State. Its duties will be generally speaking, to carry out a preliminary survey, to collect factual data and to prepare proposals and plans for postwar re-construction. So far as the Co-ordination committee itself is concerned, the position is that it will be a purely departmental committee consisting of a number of Secretaries of the Government of India, the Chief Commissioner of Railways and the Economic Adviser. In the four Planning Committees which are prposed to be set up the Government's intention is to include industrialists, businessmen and non-official experts with the necessary experience and knowledge. Provision has also been made for the formation of a Consultative Committee of Economists. It is also proposed that the Commerce Member and the Economic Adviser should tour the country to hold group discussions at various centres. The first planning committee will deal with the problem of employment after the war-particularly of those who are demobilised from the army or are thrown out of employment as a result of the closure of war industries. The second committee is intended to consider the question of adjustments and arrangements necessary to protect the economic structure against those adverse results which would otherwise follow the cessation of war production. The third committee will try to determine agreed public works and Government purchasing policies. The fourth committee will prepare the ground for the formulation of longterm trade and industrial policies after the war, such as the measures necessary to safeguard the position of industries, the possibilities of diverting agricultural production along new lines where necessary, etc. At the moment the Government of India is engaged in considering the personnel of the various Planning Committees and other arrangements necessary for their work.

Head Office: BOMBAY Estd. in India, 1874

WHETHER YOUR

SALARY IS Rs. 40

OR Rs. 1,000

YOU CAN BUY

A PROFITABLE INVESTMENT

Whatever may be the source of your present income, be it business, a profession or an investment, you cannot afford to take risks with your future. You must have security and there is no safer way than by an investment in Defence Savings Certificates. Sold at Post Offices for Rs. 10|- each, they give a profit of Rs. 3|9|- free of income-tax, at the end of ten years. Money refunded with interest at any time required.

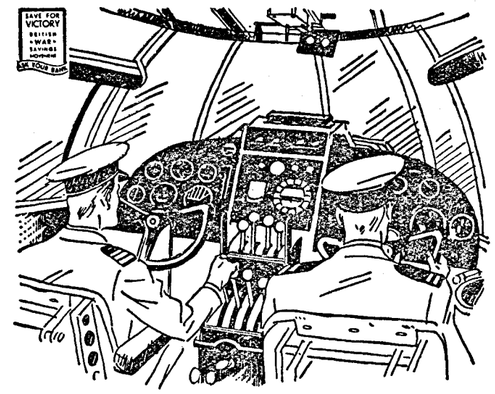
DEFENCE SAVINGS STAMPS HELP YOU TO SAVE

Defence Savings Certificates sold at the Post Office are an ideal security, safe against theft, cannot decline in value. Start saving NOW. If you cannot afford Rs. 10|- then buy Defence Savings Stamps at As. 4, As. 8 or Re. 1|- and stick on card, provided free. When you have stamps amounting to Rs. 10|- exchange the card at the Post Office for a certificate.

DEFENCE SAVINGS CERTIFICATES

(Continued from page 1179)

which stands in need of additional supplies on account of the Nazi conquest of Norway and France. It may be mentioned that reference was made to the special provision made against the losses of the British Aluminium Company at the annual meeting in the first week of April and more serious than the loss of assets belonging to the Company is the reduction in output available for Britain. U.S. exports are subject to licensing and this too must help Britain. Bauxite production is known to have increased considerably in Arkansas, and production this year is expected to increase in Georgia, Alabama and Virginia. The U.S.A. imports in addition large quantities of bauxite from Dutch and British Guiana.



Sugar Syndicate Defended

The sugar industry passed through a difficult year in 1939-40. It is not difficult to procure evidence on this point or on the fact that the industry inherits most of the difficulties engendered by over production. The Sugar Syndicate's authority was challenged not only by dissentient factories, but by the Governments, and the lack of competent organisation added to the problems created by the even of last year. While the history of the sugar industry in the last two years presents a very disturbing record a number of valuable lessons have been drawn, and the final compromise reached last year between the Syndicate and the Provincial Government implied that the canegrower's interests would claim attention at every stage. The Syndicate's services to the industry have been recognised and the latest annual report indeed shows that its usefulness has not been exhausted. As the chairman Lala Karamchand Thapar pointed out at the annual meeting this last year's crises belong to history and the speech bears out the earlier estimates of Mr. James Aitken and Mr. B. L. Gray as regards the improved statistical position and the stability of sugar prices. If the chairman's speech reads as a speech for the defence it is only necessary to recall that the Syndicate's policy last year met with vigorous criticism. It is true that there have been since indications of differences between the Syndicate and the Commission and the defence of the Syndicate will probably have to be undertaken again on other grounds. It is enough to say that last year's compromise has worked well, and the reduction in the enormous carryover and the creation of demand for the new season's sugar are undoubtedly achievements to the credit of the Syndicate. Wider issues were also dealt with by the chairman in his speech and the duty of regulating further development of factories was naturally stressed. Lala Karamchand's views are sure to be endorsed as original and sincere too and his argument that redistribution may even be attempted so that too many factories are not set up looks at the problem of regional planning from another angle. That the Syndicate is prepared for such a redistribution can and should regulate the affairs of the sugar industry. An advisory committee like the one approved by the Commerce Member in February will not be able to do anything beyond examining the effects of protection. Provincial control has so far yielded indifferent results for the sugar industry is now united in criticising the Provincial Government's policy. Planning up from the ground may be possible in the postwar period and the interdepartmental committee must surely consider in the connexion that the future of sugar production is at stake and examine the rate and direction of growth in an industry which within nine years of the grant of protection has made India wholly independent of imported sugar.

Scindia's Venture

Credit must be given to the Scindia Steam Navigation Co. for, having persevered with its own project of a shipbuilding yard. Mr. Walchand's heroic labours and the admirable spadework of the Consulting Engineers, Sir Robert Gibb and Partners have indeed received formal recognition much earlier. The ceremonial opening at Vizagapatam on Saturday last was the final stage in a scheme that came into being when the Scindia Steam Company increased its capital. Criticisms were many and loud at the opening ceremony, but the Government of India has not put any obstacles in the way of realisation of the scheme and has made possible the import of steel for hulls. The lack of co-operation from the Port Commissioners of Calcutta has been referred to by some but Vizagapatam as a site has very important advantages. The port has a deep harbour and its rocky bed close to the surface is well suited for launching craft. The yards will be in the South-Western part of the port and two slips in the initial stage will give the yard an outturn of 4 ships of 8 to 10 thousand tons. The vessels will make it unnecessary for the Scindia Company to order vessels from yards abroad and the prudence of the Company in safeguarding its supply of supplementary tonnage, at a time when shipbuilding and shipping alike are strictly controlled industries in all countries, will be widely applauded. The emergence of a major industry in the Railway port of Vizagapatam may make a considerable difference to a port constructed as a half way house between Calcutta and Madras. Its dependence on manganese exports has made the port finances somewhat weak, and the new yard which will give work to nearly four thousand workers at the start and increase its labour requirements substantially later on will probably be the kind of enterprise that will give the desired stimulus to the trade of the port. The Scindia yard may be said to mark the beginning of another secondary industry dependent on a regular supply of steel by rail and steamer. Timber and stone are among the materials required, and Vizagapatam offers special advantages as regards both so that there is no reason to regret that Vizagapatam rather than Calcutta was chosen.

Jute and Jute Manufactures

(From Our Correspondent)

Calcutta, June 26.

THERE is some progress reported in the matter of Loose Jute Standards. At a meeting between the Mills Committee and representatives of the Sellers' interests at the end of last week it was apparent that the Mills Committee were sincerely anxious that whatever standards were ultimately agreed upon should be maintained, and they asked for any suggestions which other interests cared to put forward with a view to attaining this end. It is to be hoped that the Mills Committee will carry the whole body of their members with them in this laudable endeavour, for it has to be borne in mind that dealers and brokers do not sell their jute to the Mills Committee but to individual Mill Buyers. And unless the latter see eye to eye with their Committee in the matter of standards and their maintenance, nothing will be achieved.

The start is not too auspicious, for while the general inclination of selling interests is to accept the specifications laid down by the Mills for the Top, Middle, Bottom and Cross marks, sellers' suggestion that it should be clearly understood that the percentages of cutting named for the Tops and Middles should be the **average** of the parcel, has been promptly and firmly turned down by the Mills, and these percentages are to be taken as the maxima permissible. That is harking back to the old attitude of Mills generally, that everything equal to the standard, or better, is acceptable, while anything below the standard must go out. Now it may be regrettable, but it is a fact which cannot be got over, that Jute stubbornly refuses to grow to a set specification, and it is the job of the up-country baler to assort the varying grades of imports into certain classes as closely as possible comforming to the specifications laid down by Mills for their own convenience, of the standards they require. This necessitates the assortment representing an **average** of the jute approximating to the standard, some exactly right, some a little better, some a little worse. But with the great variation in the different characteristics of jute, a standard can only be attained and maintained by keeping an **average**. Mills themselves tacitly recognise this fact in making their own selections. A few bales are opened at random, the roots cut, the fibre suitable for hessian warp, hessian weft, sacking warp and sacking weft selected and piled separately and weighed, and the result is the **average** of the bales so dealt with. It is strange therefore that they should refuse to recognise this average when specifying what they expect the standards to yield. To take what is by no means an extreme example. It quite frequently happens that jute produced in parts of Tipperah district is of very nice clean, good coloured fibre, not of great length, but carrying rather a heavy black cutting. In other words this type of jute may yield 60% hessian warp and 40% cuttings. The Top specification limits the percentage of cuttings to 25. So such jute cannot go into a Top. The Middle specifications limits the cuttings to 35%, so this jute cannot even go into a Middle. It has to be degraded to a Bottom. So that jute yielding 60% hessian warp has to be thrown away in a grade of which the specification is "not more than 70% sacking weft", or by implication, not less than 30% sacking warp. We would emphasise that this is no "*reductio ad absurdum*," but an instance of what may very well occur if Mills persist in their refusal to accept the percentage of cutting specified as an **average**. It might help matters somewhat to raise the percentage if this is to be considered as the maximum permissible. But it must be obvious that persistence in the present attitude must inevitably lead to the forcing up of standards, against which contingency the Mills Committee are invoking the assistance of all interests in the industry.

As it is, the qualification of the Middle specification by the introduction of a "colour" clause, tends to widen the margin between the Middle and the Bottom to a dangerous extent. It opens the way for Mills to say that they can get all the hessian they require out of the Middle mark and that they do not require to buy any Tops. In other words it leaves the series of grades with two hessian grades, one sacking weft grade and NO sacking warp grade. Sellers are exhorted by the Mills Committee only to offer New Crop in assortment of Tops, Middles and Bottoms, with only a small percentage, say 10 to 20% of the Bottoms. In their recent letter which we criticised a fortnight ago, the Mills Committee laid down the dictum that it was the Buyer who was entitled to say what he wanted to buy and not for the Seller to say what he wanted to sell. If the Mills Committee is really sincere in its present attitude towards standards and their maintenance, we think we are entitled to look for a strong exhortation to individual Mill buyers as to the assortments they should buy, with suitable penalties attached for non-observance of such recommendation.

With regard to the proposed abolition of private inspection and settlement of claims which we discussed last week and which idea, it is understood receives considerable support from Mill interests, it is surprising that it has not been received with unanimous approval by some of the selling interests. The objection seems to be the settlement of claims by a third party. But what else is arbitration? In any case we do not see that third party inspection is an essential factor in the schmee. Provided the system of arbitration could be simplified and speeded up by holding the arbitrations at the Mills instead of at the Chamber of Commerce, preliminary third party inspection could be eliminated and direct reference to arbitration made the rule. It is suggested that this method would reduce the number of claims by 70%, at the same time providing the greatest possible safeguard against pushing up of standards.

Lack of any sign of freight has limited business in the Export Jute market to the minimum. There have been a few inter baler transactions reported and September shipment Dundee Daisee assortment sold at Rs. 56/-. The quotation for Aug-Sep. Firsts has varied from Rs. 4/8 to Rs. 3/- under the rate for September Fatka. A good business was reported with local Mills in Old Crop Firsts at Rs. 50/- and Lightnings at Rs. 44/-. Dundee Daisee has been has been bought by Mills at Rs. 52/- with buyers over. Fatka operators interpreted the outbreak of hostilities between Russia and Germany as a Bull factor and rushed Fatka from Rs. 58/8, where it had been hovering at the end of last week, to Rs. 62/8. There have been fairly wide and rapid fluctuations since and to-day Rs. 64/8 was touched, the closing rate being Rs. 63/12.

Little interest has been shown in Loose jute beyond the picking up of some small lots of X Bottoms at Rs. 5/- to Rs. 5/4. Indian Jat Bottoms, which were on offer at Rs. 7/- were advanced to Rs. 7/8 and then reduced to Rs. 7/4 without attracting buyers. District jute quotes twelve annas less. New Crop sellers are reserved till the standard question is clarified. Reports from parts of the Mofussil speak of heavy rain and rivers above normal height and some premature cutting going on. Growth generally is satisfactory however and only in a few places is damage apprehended.

In the Fabrics Market quotations were raised in sympathy with Jute, but lack of support from overseas and freight scarcity had a dampening effect on the near positions which sagged markedly as compared with forward quotations. The report of the fixing of a steamer for the Plate together with some fresh enquiry for Heavy Goods has improved the tone towards the close. Nine porters which had dropped to Rs. 17/10 improved to Rs. 19/5. Eleven porters touched Rs. 22/6 near but close again at Rs. 24/12. Sales of elevens were reported at Rs. 23/8 and Rs. 24/- July, at Rs. 22/4 Aug/Sep. at Rs. 19/4 to Rs. 20/8 Oct/Dec and at Rs. 18/- Jan/March. There has been a fair turnover in Heavy Goods towards the close including "B" Twills at Rs. 37/- to Rs. 37/12 ready and at Rs. 36/- Oct/Dec. Liverpools sold at Rs. 41/- June, at Rs. 40/12 July, at Rs. 40/8 Aug/Sep, at Rs. 40/- Oct/Dec and Jan/March and at Rs. 39/- April/June. Cornsacks were dealt in at 37/- July, at Rs. 36/8 August, at Rs. 36/- to Rs. 36/8 Aug/Sep and Septr, and at Rs. 36/4 Oct/Dec. Other sales reported include Woolpacks at Rs. 1/10/6 and Rs. 1/11/- for Aug-Sep and Cuban Sugars at Rs. 47/- July/Aug, at Rs. 45/- and Rs. 46/- October. The market closed firm at the following quotations:—

	June	July	July/Sep	Oct/Dec
9 porters	Rs. 19/3	Rs. 18/14	Rs. 18/9	Rs. 17/-
11 porters	Rs. 24/12	Rs. 24/10	Rs. 23/14	Rs. 21/4
"B" Twills	Rs.37/12	Rs. 37/6	Rs. 37/2	Rs. 36/4
Cornsacks	Rs. 38/4	Rs. 38/-	Rs. 37/8	Rs. 36/8
Liverpools	Rs. 41/8	Rs. 41/4	Rs. 40/10	Rs. 40/4
Heavy Cess	Rs. 35/4	Rs. 35/4	Rs. 35/4	Rs. 35/4

JUTE

Calcutta, June 26.

HARDLY a week passes without the jute market undergoing revolutionary changes. Last week it was ebb, now it is again flow. Sentiment has veered round in a sensational manner, and the bulls are again in a majority. The man recording prices day after day should not, however, be missed into thinking that demand has improved to any extent, and the late rise in the jute market is merely sympatomatic of the bullish feeling generated by news from Europe. Over a week interest in loose jute has been more than ever restricted; but mills are showing some interest lately. Business has been reported in First at Rs. 50 and in Lightnings at Rs. 44 per bale on Wednesday and a stray transaction in Cuttings showed that the market is idle despite the hectic rise in futures this week. Futures still look like rising but that may not mean that the new crop is going to be in great demand. It has been said that more than ever jute is the speculator's fancy and the rise engineered this week may have no adequate basis.

Pucca bales have latterly been firmer and loose jute has been in moderate demand with Indian Bottoms at Rs. 7-8 and District Bottoms at Rs. 6-12. A rise of 8 annas per maund betokens some revival of interest in low quality jute after a long while, but so far buyers are few and far between. The reluctance of sellers to offer jute may be due to the view that the smaller crop will be hard to get, but the mills still continue to adopt a cautious attitude so far as pucca bales are concerned. Export demand has hardly emerged yet, and the extension of the war in Europe is not likely to promote foreign buying, though there is the certainty that war demand will increase and there is always the rise in hessian to stimulate confidence. At the end of the last week the most gloomy deductions were drawn by many as regards the jute and hessian markets. Shippers were known to be uninterested and the prevailing malaise overpowered even Heavy goods. A complete transformation was effected by war news on Sunday proving that the markets are ultra-political in the sense that they are governed by other factors than demand and supply at home. In the last few days Jute Futures (both June and September) have risen by Rs. 4.4 per bale. The prevailing tendency makes most observers optimistic, but there may be many of offsetting influences by the time the new crop comes into the market. The crop is known to be doing well in most districts though flood damage has been reported in parts of East Bengal and river levels are said to be rising.

JUTE MANUFACTURES

Calcutta, June 26.

AT the end of last week it seemed as if a bearish spell would supervene, but the weather has brightened up cnexpectedly after news came through of another war in Europe. Operators adopt the view that the hessian market decline, and their confidence is attested by the striking recovery in prices. Over the last three days Nine Porters have risen by over Re. 1 and the latest report shows that the rise is unbroken. Turnover has been restricted in spite of the rise in rates. Earlier there was a disposition to cover earlier sales, but offerings were small and sellers few. The preponderance of buyers has restored poise to the jute manufactures market in spite of the fear that demand for shipment is small. There is, of course, the belief that U.S. shipping assistance will take a practical form and the daily range of movements proves again that the hessian market shares the belief of the stock exchange as regards recent developments in the European situation. On every day of the week the opening has been steady and prices have advanced regularly both for Nears and Distants. On Tuesday Nine Porters Ready rose by six annas and Eleven Porters by twelve annas. The margin certainly flatters the market but much of the rise must be attributed to the firmness of jute. It was stated that even after the receipt of news on Monday the demand for hessian was very small. Sellers however have regularly revised their ideas of prices, and it has been, as before, a race between the Jute Futures market and the hessian market. The anxiety of those who had sold forward to cover earlier transactions resulted in a further rise on Wednesday and Thursday's holiday languor did not result in any retrograde movement. Eleven Porters have risen continuously after dropping to Rs. 22-6 on Saturday; they have regained almost half the loss by rising since to Rs 24-4 The advance in rates for December and March shipment has been regular and uniform, but as remarked before, the spread between Ready and Futures is not what it was at the beginning of June. Evidently there has been some hard thinking and the result is seen in the slow rise over the last few days There is no hurry to pull prices up and even Jute Futures have not gone up with a rush. Mill demand for jute is small and slow: export demand for jute manufactures is limited in more ways than one by the restricted shipping facilities. There are two hard and plain facts there is no getting away from. A feature of the week has been the smart recovery in Heavy Goods. Australian demand is said to have expanded rather unexpectedly and rates for Cornsacks have risen sharply to Rs. 37 for July Delivery. No interest has been shown in other lines but some business has taken place in Woolpacks and rates on Wednesday rose to Rs. 37-4 for Cornsacks, Rs. 36-12 for B. Twills, Rs. 40-12 for Liverpool Twills, all for July shipment.

COTTON

Calcutta, June 26.

THE raw cotton market has passed through another brisk spell without showing much change either in tone or prices. The first reaction to news from Europe was essentially bullish and the firmness of New York cotton led to a revision of earlier views on the subject of Indian cotton. It has been noted that turnover registered a sharp improvement in Bombay, but there was at times the profittaking tendency that restrained the continued rise expected by the outside speculator. The general anticipation that Indian cotton cannot go down has been shown to be correct by the rise recorded until Tuesday, and the quick recovery, noticed on Thursday when most markets were closed. The selling of commission houses and liquidation by bulls caused an irregular tendency on Monday and afterwards too but extensive profit-taking has been noticed previously without leading to any permanent decline in prices. The market has latterly benefited from a revival of bullish enthusiasm based on the slow progress of the monsoon which started briskly and has not spread fast. This may affect the canning crop. The regular rallies have been explained as due to the belief that outside interest will expand rapidly just now, and there is assuredly justification for the opinion that the war and mill demand will help to maintain cotton prices in Bombay. New York and New Orleans alike are not upset by the smallness of exports as daily receipts are small.

The Bombay cotton market shows again a tendency to put up the prices of Oomras and the U. S. reports about the rising tendency in prices produced by apprehensions of damage to this year's crop have sustained the feeling that Bombay cannot be out of step with New York. The firmness of the share market there has not had much effect on cotton this week, and if one goes by the price fluctuations alone all that can be said today is that the adverse trend noted last week has been reversed. There has been some small buying of the 1942 April contract for Broach but the future is deemed promising as mill consumption must increase steadily to over 3 million bales in 1940-41. It has been again a week of active trading, but bulls have shown a partiality for snatching a profit, understandable as the war is an unsettling factor. The difference between July-August and April-May rates has been commented upon, but fluctuations in hedge contracts are not an accurate guide to conditions in the spot market which has on occasions been lively and firm. The market felt the effect of rumours on Monday and reacted but fluctuations since are the fruit of the liquidation by eager bulls. Last week's statement has regenerated enthusiasm and the current feeling that Japan will not enter the Russo-German war supports the ruling feeling. The crop will come only in the cold weather and this is a point in favour of steadiness in prices. There have been frequent setbacks in spite of the upward trend, but cotton in both Bombay and New York does not look like falling back.

PIECEGOODS

Calcutta, June 26.

IN spite of the dullness reported from Bombay where adverse influences are still operative the piece goods market has developed considerable strength. The rise in raw cotton has been the principal restorative influence but the rise in other markets too has been a favourable factor. The mill production that has so far enjoyed good demand is likely to meet with keener demand as foreign supplies are likely to be more scanty.

The present valuation of textile shares by the stock exchange indicates that the outlook for Indian piecegoods is considered very favourable. The steady progress of the Indian mill industry; its active response to wartime demand and its ability to attend to the requirements of oversea markets are indicated in a recent publication of the Bombay Millowners Ossociation. Naturally interest in local goods will continue to grow as imports continue to fall away during the war and

Orient PAPER MILLS LTD.

8, ROYAL EXCHANGE PLACE, CALCUTTA

forward business has latterly been brisk. Rates continue to harden and the undertone in all commodity markets since the outbreak of the Russo-German war confirms the news that mills are not keen on taking new orders Ahmedabad has enjoyed a good share of the new business passing but interest shown by Calcutta in Western India markets has not been assisted by any concession in prices

There is no reluctance to order as the advance in rates in Bombay has field and buyers are not at all reluctant to take supplies at any prices. Only small business has been reported in Japanese goods as the replacement costs quoted are not to the liking of Indian dealers. The appreciation in bazzar values has induced from buying and the tendency has been firmer than expected. There has been considerable buying of medium counts in the yarn market though the yarn exchange in Bombay reports idle and depressed conditions. Grey yarns have been in request locally and an extension of interest to hosiery yarns has been since reported. Limited interest so far has been exhibited in imported lines and only small lots of special types of Japanese goods have found buyers. Far Eastern yarns are not coming into the market in any quantity and the most important feature at present is that Indian mills, if upset by the steady rise in cotton, can count on an expansion of demand at home for both yarn and goods. The usual comparison with cloth prices six months ago suggests that cotton and cotton goods have moved upward in much the same way as jute and jute goods. The parallel is not complete in certain respects, but conditions disclose continuous and substantial improvement.

GOLD

Calcutta, June 26.

The very small decline in prices registered by the gold section of the Bombay bullion market in the last few days attests an unbroken spell of dullness at a time when other markets have been quickly stirred into fresh activity. The reason is not far to seek as demand for gold has slowed up alongside of the bare trickle of supplies. The rate for tola of ready gold in Bombay has come down to Rs. 42-1-9 and the very small premium paid for both settlements reflects the belief that prices in a dull market must remain stationary. The absence of any change in New York and London hardly deserves to be mentioned here except to reinforce the observation that bullion prices in India, will show little or no change for some time. The market is flatter than ever on account of the resurgence of riots in Bombay. The riots may lead to a constriction of sales and this may affect demand in an unexpected manner. Trading on all days has been influenced by the lack of positive news which would encourage the market to look for some welcome break. The prices in a dull but steady market on Wednesday were Rs. 42-1-9 for Ready Rs. 42-2-6 for August Settlement. The closure of the market on Thursday implies that trade is slacker than ever and no brisk rise is expected.

SILVER

Calcutta, June 26.

The silver market is overpowered by a stagnation worse than any decline in prices. The unusual stability of prices shows that speculative interest has waned rapidly again. War news has not kindled bullish enthusiasm in the silver market and Wednesday's rate of Rs. 63 for 100 tolas of silver. Ready shows only a small rise after so many days. Prices for First Settlement and Second Settlement show a small gain on the week at Rs. 62-14 and Rs. 62-13 but the premium for ready closing at Rs. 63 certainly shows that war news has stimulated small buying only. The offtake is said to be encouraging in both Calcutta and Bombay while stocks too are on the small side. Replacement demand is likely to appear soon according to market opinion, and this helps to keep things going. The small rise in silver may be contrasted with the stodginess of the gold market which has had one of its dead best dull spells. The silver market has not evidently acquired much, confidence from the small rise in cotton and the big rise in shares this week to behave according to the expectations of hardened bulls. The daly turnover has been limited, one may say by the minute rise in price. There was a temporary fall on Monday and only late support led to the rise in the Ready rate. There is not likely to be any investment buying when the share market is almost on the verge of a boom and most commodities claim attention on various grounds.

WHEAT

Calcutta, June 26.

THE wheat market has strengthened continuously on the strength of other markets and prices at Hapur have shown a steady rise of late. In spite of the easy feelings at Karachi where the rate for Choice White has fallen to Rs. 31-4-6 on account of extensive liquidation and the unsteadiness of gram prices then the wheat outlook is regarded widely as very hopeful. The advance in price owing to shortage of supplies in India is expected to lead to enlarged demand for wheat in India. The price in Calcutta has risen slightly to Rs. 4-8-6 for ready and Rs. 4-12 for September delivery. The tone has been described as consistently steady, and the steadiness of Bombay and Cawnpore has again been a dominant feature. The demand for flour is expected to increase on account of the war, but there is not much likelihood of any big rise in demand for wheat immediately. Supplies at up-country centres are increasing and speculative demand cannot continue indefinitely to push up prices. Karachi has reported a break to Rs. 31-4-6 for July delivery after a small rise. This week a quieter feeling has prevailed in most wheat markets. Foreign advices show that supplies are large and demand is very slow. The possibility of Canadian wheat going to Russia does not mean that any change will come as the U. K. government is interested in holding prices down. Prices in Chicago have been firming up this month but the appearance of Australia as an eager seller a tall times is likely to brake further improvement. For Eastern demand may survive the extension of the war but the increase of imports into Calcutta affects the average man's view who argue that flour prices are unchanged and demand for wheat products will not go up quickly merely because the war has spread to another country.

MADRAS GROUNDNUTS

Calcutta, June 25.

THE market ruled very firm during the week and closed strong. It is reported that the British Ministry of Supply's order during the past week was for a very large quantity—about 12,000 tons on the usual terms. 'Offices' are reported to have bought nearly 10,000 tons up the line during the period. If the British Supply authorities keep up their purchases at the present rate, not only the entire large stock in the hands of shippers but the available supply in the Ceded districts would have been marketted ere long. The outlook for the irrigated Summer crop in the southern districts is not cheering. For, although the standing crop is reported to be in excellent condition the acreage this year has been below normal; and the quantity available for export after meeting the demands of local crushers will not be appreciable. First arrivals have already begun in some centres, but free arrivals will commence in a fortnight's time. There has been some local buying during the week by Rangoon shippers. Shippers' buying limits opened on Tuesday last around Rs. 25-12 to Rs. 26 for Machined (Per candy of 531 lbs. ex-coast godowns), and advanced steadily to Rs. 36 and Rs. 26-8 on Friday, to Rs. 36-13 and Rs. 27 yesterday and to Rs. 37 and Rs. 27-3 this morning. Local buyers' limits opened at Rs. 34 for Machined (Per candy of 531 lbs. ex-Madras harbour godowns), and improved rapidly to Rs. 24-8 and Rs. 25 on Thursday, to Rs. 24-8 and Rs. 25-4 on Friday, to Rs. 24-12 and Rs. 25-8 yesterday and to Rs. 25-8 this morning. Groundnut oil staged a sensational advance during the week. Opening around Rs. 49 and Rs. 51-8 for "Chekku" and "Expeller" qualities respectively, prices advanced to Rs. 50 and Rs. 53 for 'Chekku" and "Expeller" qualities respectively in mid-week. Later in the week, prices improved further and closed firm around Rs. 52 for "Chekku" quality and Rs. 55 for "Expeller" quality for ready lots, loose, per candy of 500 lbs. ex-sellers' Madras godowns.

MADRAS HIDES AND SKINS

Calcutta, June 25.

DURING the week, there was a fair clearance at ¼d. to ½d. per lb. below schedule prices in nearly all weights and grades of Tanned Kips. In some cases, business at control prices is also reported for godown delivery. The market is firm with a better tone. It is reported that the British Government's requirements will be stabilized around 5,000 bales of Kips per month. It is also understood that import quotas to Factors and Import Houses would be made on the basis of this **monthly offtake.** The decision of the Leather Control not to be change the Kip price schedule for a further period of three months is also another stabilising factor making for a steady run of business. Last week, about 1,000 bales of Kips were shipped by a steamer, and during the week that has opened today a boat is scheduled early this week to load about 1,200 bales and another one scheduled at the end of the week. It is also reported that there will be fixtures next month to take Kip cargoes from Madras. Tanned Buffalo is very firm and prices have advanced locally by about 1½d. per lb. This is due to some small shippers operating to cover their

buyers booked some months ago. For instance, in order to cover orders of 8/9 lbs. Buffs that were placed at 13½d. and 14d., goods are being bought at the parity of 13d. for fear of shortage of supplies. Tanned Buff Calf and Cow Calf skins are in good request, and prices stand at 19d. and 29 d. respectively. Although raw hide prices remain firm, some tanneries, particularly those dealing with Prime Bangalore hides have commenced soakings, albeit on a limited scale. The numerous enquiries from London, the fact that import licences now being granted will result in new orders being booked and the generally firm tone of the market have encouraged tanners to go ahead with production, of course, with caution. The dearth of Tanned Buffalo and Calf skins will not, it is recognised, advance considerably as in such an event import licences may be withheld.

(Continued from page 1167)

ing the marketability in the various categories of rupee counterparts. The total amount of rupee counterparts issued in connection with the redemption of the dated sterling stocks was given out as Rs. 92.84 crores. Of this, Rs. 12.52 crores were delivered to the public. It was also stated in the Government notification that the balance of Rs. 80·23 crores was divided approximately equally between the Government and the Reserve Bank. The Government's share in this distribution must, therefore, have been roundabout Rs. 40 crores. The stocks cancelled are Rs. 46.11 crores. It is clear that the Government must have purchased quite considerable parcels of rupee counterparts from the Reserve Bank and cancelled them. The net effect of the recent conversion and the present cancellation of some of the rupee counterparts is that the securities which may be offered for sale through the tap by the authorities will turn out to be much less than the Rs. 60 crores which we have mentioned in our editorial article; and such securities for sale are more likely to be in the neighbourhood of Rs. 35 crores. Considering the strength of the giltedged market and the continued demand for government securities on the part of insurance companies, there should be no difficulty in disposing of the 3 per cent loans which the Reserve Bank must now be holding as a result of these operations.

delicate, can no longer be questioned. And in the case of Sir Samuel Hoare, it is sufficient achievement that he has kept Spain out of the war so long. Only Japan remains. But the firm attitude taken by the U. S. A. and the outbreak of war between Russia and Germany seem to have made Japan pause and think. Japanese press comment has dwelt for the first time, so far as I know, on the consequences of a German victory over Russia and Britain. There is talk, accompanied, of course, by the usual contradiction, of a cabinet reshuffle. But whatever it may be, Japan is not in a hurry to get entangled in the war. Germany will be left to face the music in the East. And one reverse in the Eastern fromt will suffice to take Germany down the inclined plane to defeat and ruin.

Across the seven seas the floating fortresses churn their way. Immense, imposing structures dedicated to protection and, when necessary, attack and destruction. In them is concentrated the marine art and invention of generations.

But where today those Gleaming banks of guns throw their shadows across the ocean, tomorrow the happy keel of cargoboat and merchantman will cleave the seas.

Just as today Steel serves with its strength, to defend the battleship to give it invincible might; tomorrow, Steel will give dependability to the argosies of men, giving wings to the narrow bows as they cleave the waters.

Stock Markets to-day and to-morrow

SMART RISE IN STEELS AND TEXTILES

THE opening this week in markets coincided with the adoption of bullish view of equities in general. An optimistic interpretation of news this week has promoted directly the firmness following Monday's rise. The mid-week reaction was in nature of a shake-out of weak holders and yesterday's news influenced something more than a sentimental recovery. The successful resistance of the Russian forces, the pronounced hesitation of Japan and indications of the U. S. A.'s resolve to give maximum assistance have led to a radically altered view of the investment situation. The revival of speculative activity in both the stock and commodity markets owes much to hopeful news from Washington. It is not unlikely that markets will continue to look ahead raher than at the dismal events of last June. A comparison with prices a year ago shows that the 'bulls have it' in more ways than one. And dividend estimates in, connection with **Tata Steels** have influenced sentiment in Bombay favourably.

* * *

It is generally believed, unless there is any positively bad news, there will not be any setback in prices. The steady decline in prices of **Bengal Coal** shares from Rs.368 to Rs.345 during the course of the week has proved correct. Contrary to market expectations, the net profit of this company shows a sharp decline in earnings for the half-year ended 30th April, 1941. Regarding the prospects for the half-year under review the Chairman, at the last half-yearly general meeting, pointed out "I am afraid that we may be in for a difficult time this half-year, as the satisfactory profits recently obtained have in a large measure been due to the fact that we have been able to mine a large output without running into stock". The big reduction in despatches from 8,77,926 tons to 8,23,202 tons during this half-year has been caused by a scarcity of tonnage for the export trade which constitues a large proportion of the Company's business. An acute shortage of wagons affecting deliveries to inland consumers has also been responsible for the fall in earnings. The net profit amounts to Rs.6,84,368, showing a decrease of Rs.8,75,021 over the figure of the last half-year of Rs. 15,59,389. The sum set aside to depreciation stands at the same figure of last half-year. While no provision has been made for Taxation and Cesses, a sum of Rs. 8,00,000 was set aside on the same account in the previous half-year. The directors have recommended a dividend of only Rs.10 per share as compared with Rs.12 per share last year, the increase in the distribution last time being in the bonus which was Rs.2 per share. The amount carried forward is slightly lower at Rs.2,51,082 against Rs.2,58,914 brought in.

The prospects for the current half-year cannot be regarded as quite satisfactory as despatches and raisings have shown a tendency to decrease. But Bengal Coal is more than ever a sound investment as the return on the shares around Rs.346 is more than 5 per cent.

* * *

The reports and accounts of the Andrew Yule group of jute companies for half-year ended 30th April, 1941 have now been to hand and the general decline in earnings of all the three compinies undernoted has not, however, been affected to any great extent the distribution to the shareholders. The decline in profits is such that with a smaller provision for Taxation it has been possible to recommend the same dividend. Only in the case of the Budge-Budge Jute Mills Company, Limited the dividend declared is slightly lower at Rs.12½ per share against Rs.15 per share for the previous half-year. The aggregate profit of the three companies, before providing for taxation and depreciation, is nearly half of earned last half-year.

	10,40,649	23,30,277

DIVIDEND PER SHARE

	30/4/1941	31/10/1940
Albion ..	4	4
Budge-Budge ..	12½	15
National ..	As. 12	As. 12

The provision for Taxation for the half-year ended 31st October, 1940 was as much as Rs. 11,88,565, while a sum of only Rs.1,20,216 has been set aside in this respect during the half-year under review.

With a lower level of production and a smaller margin of profits on sales it may not be possible for mills to report any high level of profits. The earnings for the current half-year, however, should be much better as there has been a substantial improvement in the prices of jute manufactures.

* * *

An unsatisfied demand for textile shares has been noted this week too. Reference may be made here to the substantial rise in **Elgin** ordinary shares as also in **Cawnpore Textiles.** The improvement is doubtless due to the constructive view put on developments in Europe. **Kesoram Cotton** has strengthened continuously after the appearance of the reports and accounts. Saturday's rise in **Dunbar** showed that it is not the cheaper shares alone that are having free run. Calcutta has followed or rather anticipated Bombay in putting up the prices of all textile shares. The big rise in **Elgin** has been attributed to investment demand. Reference may be made to the swift rise to par and over in the case of **New Victoria** shares. The Preference shares too have risen but not to the same extent as the ordinaries. A belief that dividends may be paid on the ordinary shares for the year 1940-41 may underlie the rise for the company is known to have benefited like many Cawnpore mills from war orders. The shares have been bought daily in a rising market and this week's improvement in both jute and cotton shares may be said to distinguish it as one characteristic of active and firm markets.

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, June 27.

Another week of significant recovery. The Calcutta Stock Exchange experienced, generally speaking, active trading conditions throughout the week under review with prices tending to move up. There have been setbacks, it is true, but as I pointed out a week ago, these are to be welcomed as providing a breathing spell in which the position can be consolidated. The volume of transactions was greater than in any week in recent months. The news of the declaration of war by Germany against Russia brought an all-round rise in prices. The sharp improvement in prices, which was noticeable on Monday, was, however, short-lived, and prices have closed to-day a shade easier. In view of the easier tendency in prices, the trend in the near future will have to be watched very closely. If the market holds steady at around present levels then the outlook should be quite promising. Just now it looks as if the market has taken a decision to 'wait and see.'

This has been a week notable for the strength of giltedged securities. Sellers are scarce and it is difficult to find scrip. 3½ per cent Paper is now quoting around Rs. 96/0. 3½ per cent 1947/50 came to business at Rs. 102/13; 4 per cent 1960/70 at Rs. 109/5; 3 per cent 1963/65 at Rs. 95/3 and 5 per cent 1945/55 at Rs. 111/7. Provincial Loans were in fair demand, 3 per cent *C.P.* 1949 being done at Rs. 99/8; 3 per cent *Punjab* 1949 at Rs. 99/4; 3 per cent *Assam* 1952 at Rs. 97/8 and 3 per cent *U.P.* 1952 at Rs. 98/8.

Conditions in the money market show no change. The average rate of accepted tenders has fallen by a pie to annas thirteen and pies ten per cent per annum as compared with annas thirteen and pies eleven per cent per annum in the previous week.

Among Debentures, 3 per cent (1957-87) *Calcutta Port Trust* are done at Rs. 115/8; 3¼ per cent (1956/66) *Howrah Bridge* at Rs. 99; 5¾ per cent (1938/53) *Carew & Co.*, at Rs. 106 and 5½ per cent (1938/50) *Rohtas Industries* at Rs. 103.

Business in Preference shares has been steady and there have been one or two improvements such as *New Victoria* Rs. 5/14; *Auckland* Rs. 149 and *Steel Corporation* Rs. 121. *Hukumchand* are done slightly lower at Rs. 141. *Soorah* are quoted at Rs. 134; *Empire Jute* Rs 102/12 and *Tezpore* at Rs. 13/8 x.d. *Bowreah 'B'* preferences were crossed at Rs. 78.

Bank shares are firm with *Imperial Bank* contributories changing hands at Rs. 393 and *Reserve Bank* at Rs. 105. Other shares remained unchanged.

Jute shares continued to meet with good support and there was an all round advance in prices, although the closing quotations are slowly lower owing to profit-taking. There have been good buyers of *Howrah*. The price opened higher at Rs. 55, but closed lower at Rs. 53/12 on profit—taking. *Kamarhatty* was done at one time at Rs. 520, but now closed at Rs. 518. *Anglo-India* were Rs. 351; *Megna* at Rs. 43/2; *Reliance* at Rs. 58/8; *Gourepore* at Rs. 697 and *Nuddea* at Rs. 62/8.

Coal shares have been steady and business was on a restricted scale. *Bengal, after opening* at Rs. 364, touched a high of Rs. 368, but closed lower at Rs. 345 following the announcement of the reduction in the dividend from Rs. 12 per share to Rs. 10 per share for the half-year ended 30th April, 1941. *Dhemo Main* have advanced to Rs. 13/6; *Hurriladih* to Rs. 12/6 and *West Jamuria* to Rs. 29/8, while *Seebpore* are a shade easier at Rs. 21/14 prem. Among the lower-priced shares, *South Karanpura* are Rs. 4/9; *Churulia* at Rs. 1/9 and *Bhalgora* at Rs. 4/11.

There continues to be buyers of selected shares in the Tea section. The main interest is centred around *Patrakola, Bishnauth* and *Hattikhira* which are done at Rs. 900, Rs. 26/8 and Rs. 19/13 respectively. *East India* are quoted slightly higher at Rs. 10/2; *Dauracherra* at Rs. 12/1 and *Rajnagar* at Rs. 7/8 x.d.

Sugar shares are also in good enquiry. *Buland* fetched Rs. 17/4; *Cawpore* at Rs. 18/6 *Champarun* Rs. 14/12; *Murree Brewery* Rs. 14/4 and *Carew* ordinaries at Rs. 9/13. *Ramnugger Cane* changed hands at Rs. 8/8 and *Purtabpore* at Rs. 7.

In the Cotton section, *Dunbar*, after being done higher at Rs. 225, closed to-day a shade easier at Rs. 224. There has been a good turnover in *New Victoria* at rates up to Rs. 2/11; *Cawnpore Textiles* at Rs. 7/7 and *Bengal Nagpur* at Rs. 14/8. *Elgin* are now higher at Rs. 22/12. *Muir* ordinaries are wanted at Rs. 275.

Among Utility shares, *Rawalpindi* are slightly higher at Rs. 25/10 and *Upper Jumna* at Rs. 11/2. *Patna* have buyers around last week's rates.

In the Engineering section, *Indian Iron* have been the main feature. The outbreak of hostilities between Russia and Germany heartened the operators and the shares met with impressive buying on Monday, touching a high level of Rs. 34. *Steel Corporation*, in sympathy, moved up to Rs. 20/11 on the same day. These levels have not, however, been maintained owing to profit-taking. The closing prices are slightly lower to-day at Rs. 32/8 and Rs. 20/6 respectively. *Burn & Co.*, ordinairies moved up to Rs. 405, but closed at Rs. 399. *Britannia Engineering* changed hands at 10/8. The directors of this Company have maintained the dividend at 5 per cent for the year ended 31st December, 1940. Transactions took place in *Braithwaite & Co.*, at varying rates between Rs. 9/1 and Rs. 9/9. *Hukumchand Steel* ordinaries gradually improved to Rs. 14/2. The deferred shares too are better at Rs. 2/8. *Kumardhubi* ordinaries are done at Rs. 4/6; *Marshalls* at Rs. 2/2; *Indian Standard Wagon* at Rs. 64/8 and *Indian Steel Products* ordinaries at Rs. 54/8. *Saran*, after being done higher at Rs. 6/11, closed at Rs. 6/4.

In the Miscelleneous section *B. I. C.* have slightly improved to Rs. 4/7, closing at Rs. 4/4; *British Ceylon Corporation* to Rs. 4; *Reliance Firebricks* to Rs. 9/1 and *Alkali & Chemical* ordinaries to Rs. 17/4. There are buyers of the *Indian Cable* at Rs. 21. *Dunlop Rubber* closed slightly higher at Rs. 40/12 and *Midnapore Zemindary* at Rs. 72/8. *Lister Antiseptic* ordinaries after a long time came to business at Rs. 80, while the preferences were done at Rs. 85. Among Paper shares, *Titaghur Paper* touched at one time Rs. 19/12, and closed at Rs. 19/5 owing to profit-taking. *Mysore Paper* are Rs. 15/2. *India Pulp* improved to Rs. 149, but now are quoting around Rs. 147. *Orient Paper* met with good business at Rs. 12/11. Mining shares were also in demand. *Burma Corporation* closed at Rs. 4/12. *Indian Copper Corporation* met with good turnover, being done higher at Rs. 2/6 following the announcement of a dividend of 15 per cent for the year ended 31st December, 1940. The highest levels touched by these two mining shares are Rs. 5/4 and Rs. 2/8 respectively. *Indian Wood Products* closed at Rs. 27/12; *Assam Saws* at Rs. 3/8 and *I. C. N.* ordinaries at Rs. 87/8.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, June 26.

Money: Call money is quoted at ¼ per cent. *Exchange Market*: Banks are selling T. T. at ls. 5 15/16d. and buying three months' bills at ls. 6 7/32d.

Securities: Government securities ruled steady during the week and the prices of most of the scrips have shown slight changes. 3½ per cent Paper which was done at Rs. 95/15 improved slightly during the week to close at Rs. 96/1. Among other loans, 1948/52 were more or less unchanged at Rs. 97/10; 1951/54 at 99/15; 1963/65 at Rs. 95/1; 1947/50 at Rs. 102/13; 1960/70 at Rs. 109; 1955/60 at Rs. 113; 1945/55 at 114 and 3 per cent 1946 at Rs. 101/11.

Shares: The local share market continued to be cheerful during the week under review. Early in the week, the news of the outbreak of hostilities between Russia and Germany encouraged the operators and prices advanced by leaps and bounds. At the higher levels frequent realisations of profit-taking nature prevented any marked rise. Consequently prices declined and the market assumed a quiet tone towards the close of the week. The market operators are, however, adopting a cautious attitude, pending further developments in the war situation. Steel and Mill shares, after an early advance, were marked down mostly on profit-taking.

Textiles: The strength in cotton and reports that most of the mills are working wonderfully well induced very good demand in this section and a fairly large volume of business was put through. *Bombay Dyeing* opened higher at Rs. 1,121/4; *Century* at Rs. 429 and *Central India* at Rs. 316. Towards the close of the week prices declined in sympathy with the easier tendency in the cotton market and they closed at Rs. 1,097/8, Rs. 418 and Rs. 310 respectively. *Kohinoor* improved to Rs. 457, but closed at Rs. 439. *New Great* showed a drop of Rs. 12 to close at Rs. 415. Among other shares, *Colaba* were done at Rs. 173; *Gokak* at Rs. 210; *Swadeshi* at Rs. 316; *Western India* at Rs. 1,265 and *Sholapoor* at Rs. 3,045.

Hydro-electrics: *Andhra Valley* recorded a rise of 20 points over the previous week to close at Rs. 1,650. *Tata Power* closed a little lower at Rs. 1,615. *Tata Hydro* were steady around Rs. 179.

Steels: Steel shares were an active market. The rumours of a possibility of a very satisfactory dividend for the year just ended and the announcement of the closure of the Transfer Books of the Company from 21st July to the 18th August, 1941 (both days inclusive) gave fresh impetus to the operators. Exceptional strength was shown in the early part of the week following the news of the declaration of war by Germany over Russia. *Tata* deferreds touched a high of Rs. 2,060 and the ordinaries Rs. 384/8. At these levels there was some profit-taking with the result the deferreds declined to Rs. 1,997/8 and the ordinaries to Rs. 379/8 at which levels they closed. There are rumours in the market that the dividend per ordinary share for the year is likely to be around Rs. 28 and per deferred share around Rs. 165 as against Rs. 25 and Rs. 143/10/7 respectively paid last year.

Banks: *Central Bank* were done at Rs. 45/8; *Imperial Bank* fully paids at Rs. 1,583/12; contributories at Rs. 391/14; *Reserve Bank* at Rs. 106 and *Bank of India* at Rs. 143.

Miscellenaous: *Bombay Burma Trading*, after opening at Rs. 497/8, gradually improved to close at Rs. 502/8. *Associated Cement* were in fair demand, being done at Rs. 142/12. *Scindia Steam* were done higher at Rs. 20/10. *Shivrajpur Syndicate* were slightly better at Rs. 30 and *Premier Construction* at Rs. 92/8. *Wimco* remained unchanged at Rs. 192. *Tata Chemicals* came to business at Rs. 12/12; *Indian Iron* at Rs. 32/4; *Steel Corporation* at Rs. 20/6 and *Tata Oil* at Rs. 42.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, June 26.

The local market was slightly active during the week under review, and a wide range of business was put through. Cotton mill shares recorded small gains. Planting issues met with good support.

Securities: The securities market continued to be steady, 3½ per cent paper closing slightly better at Rs. 96/1. 3 per cent 1963/65 met with business at Rs. 95/3; 3½ per cent 1947-50 at Rs. 103 and 4½ per cent 1950-55. Rupee counterpart at Rs. 110/13/6.

Among State loans, *Mysore Loans* were in good enquiry, but business was not possible owing to the absence of sellers. 3½ per cent *Cochin Loan* and 3½ per cent *Travancore Loan* were quoted at Rs. 104/4 and Rs. 104/6 respectively.

Mills: *Buckingham and Carnatic* improved to Rs. 243/8 and *Cambodia* to Rs. 9. *Kothari Textiles* ordinaries came in for business at Rs. 10/12; *Gokak* at Rs. 218 July; *Bombay Dyeing* at Rs. 1,118 and *Swadeshi* at Rs. 316 July.

Utilities: *South Madras Electric* ordinaries maintained their last week's level of Rs. 13/4 c.d. The directors of the *South Arcot Electricity Distribution Co., Ltd.*' have declared a dividend of 4½ per cent, tax-free as compared with the same dividend, subject to tax. *Vellore Electric* had buyers at Rs. 12.

Plantations: The volume of business in this section was restricted, though prices were maintained. *Coorg* were done at Rs. 31/12 c.d. This Company has declared a dividend of 30 per cent for the whole year. *Cochin Malabar* were steady at Rs. 6/12; *Manalur* at Rs. 3/10 and *Tropical Plantations* at Rs. 19/8. Among Tea shares, *Peermade* were supported at Rs. 28/8 c.d.; *Periakaramalai* at Rs. 18 and *Nilgiri Neerugundi* at Rs. 1/8.

Sugars: *Mysore Sugar* continued to be on offer at Rs. 53 with buyers showing no interest. *Travancore Sugars* were taken up at Rs. 13/8 with buyers over.

Miscellaneous: *Mysore Chemicals* have shown a slight improvement during the week, closing at Rs. 17. *Mysore Paper* were done at Rs. 15/2, while *Orient Paper* changed hands at Rs. 13. *Andhra Cement* were a popular share, the ordinaries being at Rs. 68. *Indian Steel Rolling Mills* ordinaries were quoted at Rs. 7/4.

LONDON STOCK EXCHANGE

Enough evidence has been forthcoming to show that all sections of the Stock Exchange have shown encouraging from. The London market registered little surprise when the news of the German attack on Russia came through, and the show put up by the giltedged market was enough to show that the market is both strong and sensitive. Good features of the week have been the continued rise in Home Railway stocks. G.W.Ord has risen further to 33¾ and a strong rise in Southern Deferred after variable movements in the quotation has shown that interest in Rails will grow.

The giltedged market has developed exceptional confidence in the face of the news from Europe. The R. A. F.'s steady offensive has generated more confidence than the vote of credit adopted in the week. A late rise in old Consols has brought 2⅛ issues into the foreground. The higher quotations for both old War loan and Conversion loan proves that the Funds are holding the investor's attention again despite the rising tendency noted elsewhere

The main feature of the week has been the renewed interest in foreign issues. Improvement in Brazilian issues has been reported as also in Egyptian and Japanese Bonds. The latter attract attention owing to the low prices for issues which are not in default and are likely to go much higher if Japan sticks to neutrality in the Russo-German war.

The depression overhanging Home Industrials has disappeared and a number of gains are shown by the leaders. The stodginess of textiles apart, the industrial market with tobacco and stores shares going up appears to be receiving increasing support. Changes in nearly all cases have favoured holders this week too, and the swift improvement in other sections has imparted additional firmness to the best industrials.

The war situation would of itself explain the improvement in oil issues. The leading shares have appreciated and the increased buying of Shell, Anglo-Iranian etc. shows that disappointment over the absence of an interim has disappeared. A further rise in Burmah oil stock deserves mention though the prices in this case and of Shell have fluctuated. Attock (£1) shares have been conspicuously steady at 35 sh. over a week owing to the approach of the annual meeting.

The mining market has been good in patches and the movement in Burma Corp. & Indian Copper would appear to be governed by Indian buying. The remarkable firmness of giltedged shows that month-end stringency of money is not in sight nor is there any apprehension as to the nature or scale of help from America. The steady rise in the prices of industrial shares indicates that the latest developments are viewed in an optimistic manner and there is much to support the view that the Premier's frank speech gave a clear lead to all markets. By the turn of the half-year a considerable advance should take place and rises in investment values should stimulate savings and also discourage the selling of investments.

THE NEW MANBHOOM COAL COMPANY, LIMITED

Notice is hereby given that the Half-yearly Ordinary General Meeting of the Shareholders will be held at the Registered Office of the Company, No. 14, Old Court House Street, Calcutta, on Friday, the 11th day of July 1941, at 3 P.M., for the following purposes:—

(*Half-yearly meeting, 4th July*, 1941).

Audited accounts for the half-year ended 30th April, 1941:—

After transferring Rs. 1,772 to Insurance Fund, providing Rs. 30,000 for Taxation and making sundry adjustments, the results for the half-year show a profit of Rs. 1,11,687-5-0. After bringing forward the balance from the last account and transferring Rs. 25,000 to Dividend Equalization Reserve, there remains at the credit of the Profit and Loss Account a sum of Rs. 1,42,583-8-0, which the directors recommend be applied as follows:—

Dividends on Preference shares at Rs. 3-8 per share	Rs. 31,500	0 0
And on Ordinary shares at Rs. 4 per share	„ 48,000	0 0

the balance Rs. 63,083-8-0 to be carried forward.

The Mills worked 54 hours per week up to 15th February, 1941, the extra 9 hours per week being required to make up the time lost during the previous half-year on account of the explosion in the Economiser connected to the Boiler Plant to which reference was made in the last published report. From 15th February, 1941, to the end of the half-year they worked 45 hours per week and were closed for one week in each of the months of November and December, 1940, and January and March, 1941. This was all in accordance with the Indian Jute Mills Association Agreement.

Managing Agents:—Messrs. Andrew Yule & Co., Ltd.

Authorised, Issued and Subscribed Capital—Rs. 21,00,000 in 12,000 Ordy. and 9,000 7% Cum. Pref. both of Rs. 100 each, fully paid up.
