(a) Carry preferential claim to dividend of 7%. Rank equally with "A" shares for further distribution after similar distribution. (c) Carry no preferential claim to repayment of capital. (d) Carry right to fixed cumulative preferential dividend of 5% per annum and to a noncumulative dividend of 3% per annum. After dividend of 8% on ordinary shares also participate in a further dividend of 2% per annum rateably with the ordinary shares in proportion with the respective capital thereon. Before December, 1938 may be converted into ordinary shares with equal rights. (e) Holders have option to exchange holding to fully paid ordinary shares at par on six months' notice expiring at the end of any half-year. (g) Redeemable at par between 1935—1966. (h) Redeemable from 1st January, 1943, by 12 annual instalments. (i) Repayable at par by 12 annual instalments from 1st January, 1944, with the option to redeem one six months' notice after 1st January, 1939.

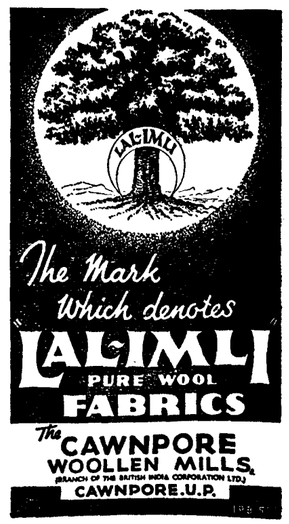
WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

THERE is no change to report in the money market. Short credits continued extremely easy; and the exchange market is as lifeless as ever. Before we deal with the money market communiques of the week, it may be useful to study the Railway Budget (which was issued this week) in relation to Central Government finances, and, particularly, in relation to the general budget which is about to be placed before the Legislature on the eve of next Friday. From the point of view of general finances, the most noteworthy point about the Railway Budget is that the contribution, which railways are expected to make to general revenues in the current year, will be a little below Rs. 10 crores, and, in the next year, a little over Rs. 10 crores. In the Emergency Budget, which Sir Jeremy Raisman introduced in the Assembly on November 5, 1939, he expected that the Railways will pay to general Revenues not only their full contribution of Rs. 4.63 crores, based at one per cent on the capital at charge, but also a further Rs. 79 lakhs as one-third of the excess over the first Rs. 3 crores transferred to the Railway Reserve Fund. But, as the arrears in the contribution due on account of 1939-40 were smaller than expected, the actual increase in the Railway contribution for 1940-41 was estimated at only Rs. 41 lakhs more than the budget figure. The contribution which General Revenues will, on the basis of the figures given by Sir Andrew Clow in the Railway Budget, receive from the railways this year will, thus, be Rs. 5 crores more than what the Finance Member anticipated. So far as the current year is concerned, "We are faced", said Sir Jeremy, "with a prospective deficit of roughly Rs. 13 crores in the current year, which might easily extend to Rs. 15 crores". It is now certain that this deficit should be reduced by at least Rs. 5 crores on account of the improved earnings of the railways. Due to large profits on subsidiary coinage, there is every likelihood of a further reduction in the deficit.

While such may turn out to be the case in regard to the current year, the position would seem more favourable under these two heads as regards the next year. The contribution to general revenues from railways is expected to exceed Rs. 10 crores. As we have already indicated in INDIAN FINANCE, the favourable effect produced on the budget by the redemption of India sterling stocks, the issue of *ad hoc* Treasury Bills to the Reserve Bank in the earlier months of this year, and the issue of one-rupee notes will be anything between Rs. 5 crores to Rs. 6 crores. Assuming that the deficit for the next year will be of the same order as that which the Finance Member visualised for the current year in his Emergency Budget, more than two thirds of the gap may be expected to be filled up by the factors pertaining to railways and currency. We know, of course, that we have no warrant to assume that the deficit for 1941-42 will be roundabout the figure anticipated for the current year. It may be that defence expediture has grown in more strident style than was at one time thought possible. There is no manner of knowing what the exact position in this regard may be until the Finance Member makes his budget statement.



Meantime, another favourable factor that needs to be emphasised in this connection is that the realisations in a full year of the two measures of fresh taxation which were incorporated in the Emergency Budget are estimated at Rs. 6 crores. Taking all circumstances into account, there seems to be good reason to believe that the deficit which Sir Jeremy will have to tackle in the coming year may not prove as terrifying as is generally apprehended in certain quarters. In other words, the fears of extremely onerous taxation may also turn out to be groundless. It is quite on the cards that the excess profits tax is raised to, say, 66 2/3 per cent. or to 75 per cent. It is also quite on the cards that the surcharge on income-tax is raised further from 25 per cent. to, say, 33 1/3 per cent. Barring this stiffening of taxes, which definitely fall on the shoulders of those who are able to bear them, the budget may not contain too many unpleasant shocks.

The statement of the Reserve Bank for the week ended February 14 shows a sharp rise of Rs. 4 crores in the Central Government's deposits, thanks to increased revenue collections and thanks to the resumption of the sale of tap Bills. The deposits of banks disclose a shrinkage, due possibly to the heavier applications for Treasury Bills. Foreign balances show a rise of nearly Rs. 2 crores to Rs. 65.85 crores. The statement of the Reserve Bank in the issue department does not call for any special comment. On the weekly Treasury Bill tender day, applications came to Rs. 3.16 crores, and the average rate of accepted tenders was annas 11 and pie 1 per cent. per annum, showing an increase of a bare pie on the last week. Realisations from intermediate Treasury Bills were Rs. 2.23 crores. Sale of tap bills is kept on; and the tap rate remains unchanged.

The Reserve Bank's tap rate for sterling is 1s. 6d. all through for six months.

Banks were sellers of T.T. at 1s. 5 31/32d., all through for six months; banks were buyers of T.T. at 1s. 6 1/32d., for six months.

TREASURY BILLS

India

Tenders for Rs. 1 crore of three months' Government of India Treasury Bills were opened on Tuesday, February 18, 1941. Total amount offered was Rs. 3 crores and 16 lakhs. Tenders at Rs. 99-13-3 per cent were accepted in full and those at Rs. 99-13-0 per cent were allotted approximately 2 per cent. Total amount accepted was Rs. 1 crore, the average rate of accepted tenders being annas eleven and pie one per cent per annum.

Tenders for Rs. 1 crore of three months' Government of India Treasury Bills will be received on Tuesday, February 25, 1941. Successful tenderers should make payment on Friday, February 28, 1941. Other conditions are as usual.

Three months' Intermediates will be sold from February 19, 1941 to February 24, 1941 at Rs. 99-13-6 per cent subject to the conditions previously announced (viz. sales can be stopped at any time without previous notice if Government thing it necessary).

Three months' Intermediates sold from February 12 to February 17, 1941, amounted to Rs. 2,23,25,000.

During the week ended February 14, 1941, Government of India Treasury Bills for Rs. 2,76,75,000 were sold in favour of the Issue Department of the Reserve Bank of India.

Finance Abroad

INFLATION talk is again much in the air in London. Both in Parliament and outside, questions have been asked whether the Treasury is fully prepared to cope with any incipient signs of inflation. It would appear that the President of the Association of British Chambers of Commerce had written a letter to the Prime Minister, emphasising the drift towards inflation owing to wage increases being followed by a rise in commodity prices. Latterly, the rise in prices has been notable enough to excite suspicion, which has been further heightened by the fact that both industry and the people have been the recipients of enhanced incomes. It is feared that, though a rise in prices may not in itself suggest the existence of inflation, the cumulative effect of increasing incomes in the hands of the people and a rise in basic prices will be to set the economic barometer definitely on the road to inflation. In the House of Lords, Lord Balfour said that he was afraid that a vicious spiral of inflation was already in operation and cited the gap between expenditure and revenue computed at £600 millions as the cause. He pleaded strongly for the adoption of Mr. Keynes' plan for the adoption of a scheme of deferred pay, particularly in the case of wage-earners who are getting larger and larger earnings than ever before. The reply of Lord Simon on behalf of the Government was not exactly reassuring, and the Ex-Chancellor took refuge in the argument that rapidly rising prices did not necessarily connote inflation ; and that the rise may well occur in circumstances which did not involve this inflationary trend at all.

Whatever the real basis for the presentiments in regard to the vicious spiral, it is obvious that the problem of the Government, in the twofold aspect of paying for the war and getting the people to save more and spend less, is not being tackled as adequately as circumstances warrant. The position may become serious, to judge from the vote of credit of £1,800 millions recently granted by Parliament, to set free funds for half a year of warfare, but Parliament has not specified the means of procuring the money. It may be that in the heightened phase of the war, this sum will fall short of the actual expenditure. War expenditure has been going up faster than before, and the previous estimate of £3,600 millions expenditure in a year has now been superseded by the estimate of £4,000 millions. There is no means of ascertaining how much of the extra £1,800 millions would be found from further taxation and how much from borrowing. There is, however, an increasing realisation in Britain that total war has to be won by total sacrifice.

Financial circles have been persistently asking for further increases in taxation. Perhaps, there is no other country in the world in which, faced with so much expenditure, the taxpayer himself demands an increase in taxation. That is the symbol of Britain's will to victory. The London Financial press, particularly the *Economist, Statist, Financial News* and *Financial Times* have been demanding, with one voice, that the national belt should be further tightened ; that taxation should be raised and that means of compelling people to save more money must be adopted immediately. There has already been a sufficiency of discussion as to the directions in which taxes could be further revised ; and the plea is generally for financing at least half the nation's expenditure from revenue. It is hoped that, by this means, excess profits as well as excess incomes would both be eliminated, with a consequent curtailment, if not cessation, of luxury expenditure. Increased taxation on incomes over £2,000, reduced allowances on smaller incomes and a tax on very small incomes are some of the taxes which have been proposed, not to mention higher tax on the net profits of business firms, with a small reduction in the percentage of the excess profits tax. The belief is that by means of this enhanced taxation and the exceedingly reassuring flow of subscriptions to the defence loans, the large gap between expenditure and revenue could, and should, be made up. As an instance, it may be mentioned that the National Savings Certificates subscriptions up to the middle of February reached a total of £220 millions while the 3 percent bonds issued totalled £218. Over and above these is the increase in deposits in the savings banks by £150 millions. No better proof of the momentum of the savings movement could be had than in these figures.

While the vicious spiral is so much deprecated and feared, and while there is so much faith in a wholly static condition of prices and wages at a time when imports have to be paid for at higher levels of prices, it is interesting to analyse the trends that have been taken to argue the onset of inchoate inflation. At the beginning of the war, few people believed that the war could be financed without recourse to inflation. In fact, until even recently, there was a tendency everywhere to view the British financial outlook with nervousness. It was felt that budget leniency, along with the existence of a nebulous wage policy, might lead Britain very soon into the vicious spiral. It was only latterly that the technique of control has so far improved as to make inflation, with an annual disbursement of expenditure to the tune of £4,000 millions, improbable.

The two facts which are usually cited as justifying optimism on this question are (1) the striking result achieved by the savings movement ; and (2) the steadiness of giltedged prices. It is no doubt true that so long as these two indications obtain, the existence of inflation cannot be proved conclusively. Looking at the question from a different standpoint, it may well be said that both these could, in themselves, be argued to be the result of a moderate dose of inflation, however fallacious it may seem to associate steady giltedged prices with an inflationary phase. When other things remain the same, it may be said that the larger the volume of loans subscribed, the more the tendency towards inflation. The basis for this argument is that inflation can and does generate its own savings ; the bigger the inflation, the greater will be the response to loans issued. As for the firmness in the giltedged market, it may be due to the revival of confidence in the general outlook and also to the steady flow of investment money which has its origin in the large and rapid credit expansion which has been taking place since the war. Rise in giltedged values is perhaps no more than a reflex of this large dose of credit expansion. After all, the large deficits in Government finances are being financed mainly by borrowings from the banking system and it is an incontrovertible fact that credit expansion has been heavy. If, then, the defence outlay increases, as is likely in the coming months—and some observers expect it to reach £5,000 million—such a huge disbursement cannot possibly be financed without causing inflation. Much would, therefore, depend upon increasing taxation to the highest pitch and upon the efficiency of a policy of restricting internal consumption to the minimum. If the Lease and Lend Bill goes through the Congress, it may possibly result in a reduction in British expenditure on defence services at home. If it really does, then it would be another factor against inflation. However, notwithstanding current apprehensions, it seems safe to conclude that the British Government's grip on the general financial situation is as firm as ever.

The Railway Budget

THE Railway Budget for 1940-41 which was presented to the Assembly by Sir Andrew Clow and to the Council of State by Mr. L. Wilson contains a number of pleasant surprises, encourages expectations and occasions more than one regret in the public mind. Such a budget calls for consideration in all its various aspects and the normal tendency either to go into raptures over a budget or condemn it by fastening on the sombre parts was never more inappropriate than in this case. Indian Railways have passed through a decade of trial and tribulation. The old idea that the State is the proprietor of a prosperous system of Railways and can draw fat profits therefrom, was gradually, but more or less completely, abandoned. There was general appreciation of the fact that not only were the Railways handicapped by the complexities of the national economy in a period of transition, but more permanent factors like the the rise of motor transport had begun to affect the Railways adversely. The old certainty about contribution to the general revenues was abandoned for a mere wistful longing for it. But even that wistful longing had died before the first sign of a surplus emerged into view. During the period of the depression, the finances and financial position of the Railways had undergone many a radical change. For the Railways had become indebted to General Revenues and to their own Depreciation Fund to the extent of about Rs. 65 crores. A new spirit of enterprise appropriate to commercial undertakings, which the Railways are, animated the Administration. Economies, though only of a sort, had been carried out. And when the turn of the cycle began to yield some good results, the authorities added to them a general increase in rates and fares and made doubly sure that there would be no embarrassment. They had also secured the benefits of a moratorium in respect of the obligations to the general revenues and to the Depreciation Fund. Thus, when a fair-sized surplus emerges, it is possible to view it as an achievement and handle it as a profit free from encumbrances of any kind.

But it must be remembered that, if today the revised estimates reveal a surplus for the current year of Rs. 11.88 crores, and the general revenues are able to appropriate as much as Rs. 9.96 crores in this year's accounts, many circumstances have gone to the making of this surplus. Nevertheless, and making all allowance for favourable circumstances, the share of credit left for the Railway Administration is something to be proud of. Not the least of the factors that determined the results of this year's working is the care with which the Railway chiefs have worked for them during recent years. One hardly needs to be told that the Railway Member and the Railway Board have, in recent times, been conscious of the fact that the importance of the Railway contribution to the General Budget had increased in direct proportion to the increase in the difficulties of the Railways. The working of Provincial Autonomy was made indirectly a responsibility of the Railways, inasmuch as the share of the Provinces in income-tax was made to depend on the resumption of railway contributions to general revenues. Even apart from all question of income-tax, there were trends in the finances of the Centre which made it abundantly clear that the key to the financial deadlock lay, to a large extent, in the hands of the Railways. The Railway authority was far from being blind to these changes in India's public finance. But on the top of all these, came the war with the consequent increase in Defence expenditure. The value of railway contribution was increased manifold. The surplus that it is now possible to envisage as the result of the current year's working is the result of constant attention to what has now become the keystone of our Central finance. Few will deny Sir Andrew Clow and the Railway Chiefs credit for a result, creditable in itself and invaluable for the relief it affords in other directions.

But the tendency to read too much into the surplus must, of course be deprecated. To stress the circumstances which have helped in the realisation of a surplus or to draw attention to some of the ponderous problems of our railway finance is not to detract from the credit of the Administration for what they have achieved. Neither Sir Andrew Clow in the Legislative Assembly nor Mr. Wilson in the Council of State has attempted to underrate these problems. But one would wish that they attached greater importance to the burden of rates and fares which the public has had to bear. It is, no doubt, a gratifying thought that the increase has not gone to meet an impending deficit, but has been productive of a surplus. There was, no doubt, a time when such an increase would only have led to the operation of the law of diminishing returns. Thanks to the war and the larger material movement of trade, the effects of the increase have been positively beneficial to the taxpayer. But it is no good arguing that the attitude of the average trader or traveller should be governed by the thought of possible increases in taxation. It is quite legitimate to urge that, beyond a certain point, the exigencies of Central finance during wartime are an extraneous consideration to the Administration of the Railways. The question of revising rates and fares does not appear to have been regarded as within the pale of serious consideration. For if it were, the enquiry into it should have been completed in time to enable the Railway Member at least to state some tentative conclusions in this regard. As it is, Sir Andrew Clow can only make the negative statement that, for three months at least, there is no prospect of revision. Only the question of suburban fares will be looked into. And the solitary instance of relief to trade, namely, removal of the surcharge on coal in a limited period is with a view to force coal traffic to move at a time of the year which is more convenient to the authorities. It may be mentioned here, incidentally, that the business community has good reason to feel gratified for the special enquiries conducted into the question of turn-round of wagons, of which there has already been appreciable results of a concrete kind. But that apart, there is little to suggest that the surplus has done more than to excite the budgetary cupidity of the Administration.

Persistence in a policy of high rates and fares, however, hardly holds forth the assurance of a sounder financial position. For the two tests of improvement in the financial strength are, not the size of the Railway contribution and dubious reliefs to the taxpayer, but preparation for the post-moratorium period and the size of the Depreciation and Railway Reserve Funds. It cannot be contended that at the end of the period covered by the present budget, Railways will be in a better position to resume their obligations

to the General Revenues and the Reserve Fund. The question of the moratorium may be kept outside any practical or useful consideration. The moratorium regarding the obligations of the Railways may have the same fate as the moratorium for war debts. The need for contribution to general revenues, the need to maintain adequate reserves and the capacity of the Railways to meet either or both, all these will remain the same, whether or not there were an accumulated indebtedness to the Central Exchequer and the Depreciation Fund. We may leave aside therefore any obsessions about the moratorium as such. The Convention is important for the restraints it imposes on the Government in the matter of the utilisation of the surplus; the ultimate test is financial security; and fairness to the taxpayer, if it is not covered by it, is certainly secondary to it.

The utilisation of the surplus both for the current year and for 1940-41, is given below in the words of Mr. Wilson:

> "The surplus, under the Convention of 1924, would be divisible as follows:—
>
> Rs. 7.15 crores to general revenues for 1940-41 (including Rs. 30 lakhs arrears for 1939-40);
>
> Rs. 7.44 crores to railway reserve.
>
> But with a view to assist general revenues in the present emergency, it is proposed that, out of the sum of Rs. 7.44 crores payable into the railway reserve, Rs. 1.82 crores representing the approximate amount due to general revenues in 1942-43 under clause (2) of the Convention, should be held in reserve for transfer to general revenues next year as an advance payment of what will be due in 1942-43, and that half of the balance, that is, Rs. 2.81 crores, should this year be paid to general revenues. General revenues will then get Rs. 9.96 crores in 1940-41. Of the remaining Rs. 4.63 crores, after earmarking the Rs. 1.82 crores required for the advance payment to general revenues next year, we propose to utilise Rs. 1 crore towards writing down part of the capital cost of the State-managed lines which have been dismantled during the year and to devote the balance towards building up our railway reserve, the sum at credit of which now stands at the very inadequate figure of about Rs. 49 lakhs. At the end of the year, and excluding the sum of Rs. 1.82 crores earmarked for payment to general revenues next year, its balance will be Rs. 2.30 Crores.
>
> . . . We estimate that the year's working should result in a surplus of about Rs. 2¾ crores less than in the current year, that is Rs. 11.83 crores against Rs. 14.59 crores. The contribution payable to the general revenues for the next year under the Convention and with the moratorium still in force is Rs. 6.14 crores. But after the payment of this contribution the budget has been framed on the assumption that we assist general revenues out of the remaining Rs. 5.69 crores in the same manner as is proposed in the current year. This would mean that Rs. 2.22 crores will be allocated to general revenues and a sum of Rs. 3.47 crores to railway reserve. Of the latter amount Rs. 1.25 crores represents a liability to general revenues in 1943-44 under clause (2) of the Convention. We also, as I have already mentioned, propose to withdraw the sum of Rs. 1.82 crores paid into the railway reserve this year and transfer it to general revenues as advance payment of the contribution due in 1942-43. The total contribution to the general revenues would thus be Rs. 10.18 crores, bringing the total in the fund to Rs. 5.77 crores including the liability to general revenues of Rs. 1.25 crores."

Mr. Wilson himself affords a telling commentary on the results of the two years' workings, so far as financial strength is concerned:

> "This is a very small reserve in view of the fact that in the five years following 1924-25 when the reserve fund was opened, a sum of Rs. 18¾ crores was accumulated and that during the depression period which followed, this amount, with the exception of about Rs. ½ crore which was invested, was used up in three years and afterwards railways failed to meet their obligations to general revenues to the extent of Rs. 35 crores and also had to borrow Rs. 30 crores from the depreciation fund to meet interest charges. A reserve of about Rs. 83 crores would, therefore, have been necessary to enable railways to meet their obligations, without borrowing, during the last depression period. The appropriation to the depreciation fund during 1941-42 will be Rs. 12.68 crores and the withdrawals about Rs. 6¾ crores; the balance at credit of the fund at the end of the year will be about Rs. 41 crores."

It is noteworthy that a sum of Rs. 1 crore goes to the writing off of the difference between the outlay on the dismantled lines on the one hand, and on the other, the sum realised from the sale of material and the amounts estimated to be paid into the Depreciation Fund on their account. One would have thought that some satisfaction would be afforded to the public that the price realised is the true market price. Sir Andrew has sought to defend the dismantling of lines, not so much on the ground that it was necessary for the war, which would be understandable, as that, in any case, we would have to take the same step at an early date, war or no war. The Indian public will decline to judge the value of lines of communication by their yields in present conditions. And what applies to lines now condemned applies also to the question of State ownership and management of Railways, which the authorities seem inclined to consider an open one. In fact, no nice calculations of profit or loss enter into this question of State acquisition of Railways. It is a policy from which there is no harking back; and Sir Andrew's remarks about State administration are a trifle disquieting. It is up to the Assembly to re-emphasise the policy, and to make it clear that, while the surplus is certainly a matter for gratification, the claims of traffic to relief will be given far better consideration than has been promised in the Railway Member's speech.

Better Outlook for Jute ?

To the exaggerated pessimism with which the future prospects of the jute industry are frequently assessed, the remarks of Mr. W. A. M. Walker, the outgoing Chairman of the I.J.M.A., will provide a partial antidote. The certain prospect of a curtailment of the crop to a third of last year's acreage and the wholehearted co-operation prevailing not only among members of the trade but between the latter and the Bengal Government are of extremely happy augury. The problem of over-production is now more or less fully brought under control; and if only the shipping position would improve, it may well be that interventionism will have scored a signal success in Bengal. The outlook for jute is thus suffused with an amount of hope, which would have seemed a crime to indulge in a few months back. The complexion of the industry has been changing with startling suddenness throughout the year. Mr. P. S. Macdonald was optimistic last February; by the middle of the year, dark indeed was the prospect, and it was not in fact until the Delhi conference that there was some hope of chaos being brought under control. Truly, a memorable year for jute.

At the time Mr. P. S. Macdonald addressed the I.J.M.A. at the annual general meeting early last year, nobody could have foreseen that conditions in the jute industry would undergo such a rapid change. The industry was then in a flourishing condition, the number of working hours per week being as high as 60 per cent. Though the slowing down in the delivery of the sandbags on account of shipping difficulties suggested that production could not be maintained at a high level and that there would be a reduction in the volume of exports, few could have anticipated that the developments in the middle of the year would so completely alter the complexion of the industry. The invasion of Norway and Denmark and the overrunning of Belgium and Holland culminating in the fall of France cut off Continental markets, whose closure gave rise to new problems. The production of mills had necessarily to be regulated. At the same time, the difficult problem of disposing of the huge surplus jute crop had to be satisfactorialy solved in order to ensure a fair price to the cultivator. Even before the fall of France, the Bengal Government had been alarmed at the size of the crop for the current season. It is unnecessary here to go into the measures that the Bengal Government adopted then to stabilise prices. Suffice it here that the Government could not have anticipated such a reduction in local mill consumption and exports; and if the regulation of the crop was at one stage abandoned, it was because of a desire to avoid a shortage of crop in a material which had acquired strategic value. On all these questions and the developments during the past six months, the speech of the Chairman at the annual general meeting of the Indian Jute Mills Association gives a succint review.

The deadlock in working the original minimum price agreement between the Indian Jute Mills Association and the Bengal Government was certainly a damper to the Jute trade. But, happily, the Delhi Conference provided a new starting point. According to this agreement, mills were to buy 15 lakhs bales in the first period of the agreement and 10 lakhs bales in the second period of the agreement. The failure of the mills to fulfill the quotas for the first two periods of the agreement has been the subject of considerable comment. The short fall in the quota for the first period of the agreement was 1.4 lakhs bales and that for the second period 1.92 lakhs. It was expected that the Bengal Government would enter the market and purchase up to the deficit in the quotas. An announcement towards this effect was expected, but nothing has so far been forthcoming. The remarks of the Chairman in this regard are worthy of note:

> As regards the raw material I think it is generally considered that the crop this year will amount to round about 120 lakhs of bales. If we implement to the full our undertaking with Government, mills will have absorbed some 62½ lakhs of bales by the 15th April. It is not possible to forecast export figures but it may be assumed that by the end of June some 90 lakhs of bales will have been absorbed by mills and export; and this apart from stocks in the hands of middlemen. I do not think it beyond the bounds of reason to expect that the ryot will hold quite a considerable quantity of crop over till next season: therefore if there are no untoward developments before then, it seems to me the position does not warrant undue pessimism. I firmly believe that it is the intention of Government to ensure that restriction of the crop to 1/3 of that of this season will be rigidly enforced and I can see no reason why they should not be able to give reasonable effect to this—in fact it is a part of our understanding with them.

It will be noted that the Chairman is inclined to adopt a rather optimistic view regarding the satisfactory solution of the jute problem, though market circles are inclined to be still sceptical regarding the ability of holders to wait till the next season. There is also considerable difference of opinion regarding the size of the surplus. As for restriction of the crop for the next season, the Government issued a communique only yesterday and it is expected that the restriction scheme will be successfuly carried through.

On the subject of the futures markets, Mr. Walker had some interesting remarks to make. It is well-known that the jute industry is opposed to the existence of the future market in its present form and has even been demanding the total abolition of the futures market. In his opinion there is much in Professor Todd's proposals for a sound reform of the futures market. The suggestion, however, that the existing futures market should be closed, pending the setting up of any new organisation which might eventuate as the result of Professor Todd's investigation, is hardly likely to meet with approval. In regard to hessian futures, he said: "I feel sure you will agree that we have been better without this market and personally hope that it will not be reopened".

The industry continues to play an important part in the country's war effort. Although the volume of business has not been of such great magnitude as that of the preceding year, it has not been inconsiderable and orders to the value of Rs. 3.09 crores have been placed during the past year. Apart from the supply of technical personnel to the Government, the mills under the membership of the Association have released lathes for shell production. The mills are also being utilised for the manufacture of parts of ammunition and no profit is derived from any of these contributions to the war effort.

The Chairman's remarks about the immediate future of the industry are very significant:

> So far as our Industry is concerned, it is difficult to make any forecast of the future but one thing we may say with reasonable certainty and that is, we have gained from our past experiences and are more than ever before in a position to meet whatever may lie ahead of us. We have proved the strength of our constitution and the value of co-operative effort. Despite adverse trade conditions, the Industry is in a sound position and I trust that the future will see even closer co-operation amongst ourselves.
>
> Our immediate future is dependent to a great extent upon shipping facilities. I believe there is a good demand for our manufactures in those markets which are still open to us and that this demand will continue. Provided tonnage is available, I do not consider our position will materially alter from that of the past six months and with any improvement in the situation this industry will share. In addition to this I fully anticipate that we shall continue to receive valuable orders for war materials.

The survey is both illuminating and instructive. The cautious optimism regarding a satisfactory solution of the jute problem and the anticipations regarding an early improvement in the position in the industry are indeed encouraging. If by any chance, war should come nearer our shores, the usefulness of the industry cannot be overemphasised. The jute mill industry has gone through a very difficult year and as the Chairman has rightly said, the members of the Indian Jute Mills Association have proved the strength of their constitution and the value of co-operative effort.

Editorial Notes

Bengal Finances

Mr. H. S. Suhrawardy's second budget is no more cheering than the first was. If honest lament and unexceptionable sentiment *can redeem* a budget, Mr. Suhrawardy can certainly claim to have made the best of a bad job. But the road to hell is paved with good intentions, as Dr. Johnson said; and when the Finance Minister uttered the truism that "a progressive Government . . . . . must necessarily go on increasing its scale of expenditure on nation-building activities", the public will be tempted to question the premise. It is worth recalling here that *there was a time* when Bengal Ministers could indulge in facile optimism and feel on velvet, what time other provinces were striving heroically to implement progressive policies and trying to give a new orientation to provincial budgets. While their administrative prudence in former years availed them little in the Niemeyer dispensation, Bengal, which often played the Prodigal Son to perfection in the past, was enabled to start provincial autonomy with a clean slate. *It is now clear* that the clean-slate theory has done little real good, and Bengal's fourth autonomous budget is a dismal confession of the lack of a financial policy inspired by foresight. To Mr. Suhrawardy, however, must go the credit for stressing, even at the risk of being dubbed a pessimist, that a tremendous amount of leeway is to be made up and that Bengal comes out poorly in comparison with her compeers. He has an uphill fight in convincing the people of the province that nation-building cannot go on without a measure of new taxation. This repugnance to fresh taxation indicates an inability to realise that the scope for expansion of provincial revenues is extremely limited. So far, the province *has had* little experience of fresh taxation; but, as the Finance Minister was at pains to make out, new taxation is both inevitable and indispensable to progress. One fails to see why this province should so fight shy of such economic discipline when, in fact, other provinces and particularly the erstwhile Congress-governed provinces, have reconciled themselves to it. The time has come when Bengal's deficits must necessarily be financed by fresh taxation. *After all*, the ministry certainly deserves better from the people for its courageous and wise jute policy on which depends the prosperity of the province.

Coming to the relevant figures, the *1939-40 final accounts* showed a revenue surplus of Rs. 60 lakhs where a deficit of Rs. 14 lakhs had been expected. This improvement in the revenue account was made possible by an increase of Rs. 29 lakhs in receipts and a reduction of Rs. 45 lakhs in expenditure. The jute duty was prominent in the former. Against these must be set the decrease in the Debt Deposit section of the Budget by Rs. 18 lakhs, due to a smaller issue of Treasury Bills. The net result of the year's working was to raise the closing balance from Rs. 155 lakhs to Rs. 216 lakhs, which *included Rs. 30 lakhs borrowed through* Treasury Bills.

The Revised estimates for 1940-41 show the same change over previous estimates; and where the year was expected to close with a balance of Rs. 72 lakhs, the revised puts the balance at Rs. 192 lakhs. This improvement is derived from the improvement of Rs. 61 lakhs in the opening balance, an improvement of Rs. 105 lakhs in the Capital Budget, offset by an increase of Rs. 31 lakhs in revenue expenditure, and a decrease of Rs. 15 lakhs in revenue receipts. The fall in Jute duty, owing to the reduced export trade, is the most notable reason for the decline in revenue, while the increase in expenditure has occurred under several items of administration. The improvement in the Capital Budget is due to only Rs. 30 lakhs of Treasury Bills being outstanding where Rs. 60 lakhs had been expected. In the Revised, borrowed money to the extent of Rs. 75 lakhs will remain with the Treasury, the total gain in resources being Rs. 105 lakhs.

The 1941-42 estimates put revenue at Rs. 14.03 crores—*i.e.*, Rs. 21 lakhs higher than the Revised, while expenditure is placed at Rs. 57 lakhs more at Rs. 15.37 crores. The resultant deficit on revenue account is placed at Rs. 134 lakhs, while on the Capital account, a deficit of Rs. 25 lakhs is expected. In the result, the closing balance will come down to Rs. 33 lakhs, unless the new taxes should be levied. On the revenue side, a small improvement in the receipts from the Jute duty is expected. The increased expenditure contemplated in the estimates is really Rs. 80 lakhs, since it includes Rs. 28 lakhs provided for purchases of Jute. The increased allocation to the nation-building departments are not calculated to rouse much enthusiasm; but there will be *general satisfaction* at the stout-hearted policy of the government for stabilising Jute prices.

Central Bank's Progress

Few will miss the significance at any time of a report so eminently reassuring and so completely satisfying as the Central Bank's report and accounts for 1940. In spite of the recession in profits, adequately explained by prevailing conditions, the profit and loss account shows that the leading Indian jointstock bank continues to progress because it possesses in ample measure enterprise, prudence and all the qualities needed for success. The opening of two new branches and sixteen pay offices during the last year prove that the C.B.I. does not rest on its oars in regard to opening up new territories, and the marked increase in deposits—current accounts show an increase of over Rs. 8½ crores on the previous year—proves that the policy of expansion pays though the London branch has hardly made good yet. The net profit for the year is over Rs. 30 lakhs which exceeds the profit for 1938 but is less than the profit for 1939 when profits showed a striking improvement. But due regard must be had to the increase in salaries and other items of expenditure for the year, the difficult conditions of the summer when normal trends were reversed and the unusual slackness of trade demand for funds towards the close of the year. Reference has been made to the rise of over Rs. 8½ crores under Current, Call and other deposits which stood at Rs. 21.68 crores. The decline under fixed deposits and cash certificates compared with the balance sheet as on December 31, 1939, can be explained in many ways as also the contraction under debts due to Banks, Agents, Correspondent etc. Obviously, the most remarkable feature of the assets side is the total of advances. These total Rs. 12.04 crores nearly as against Rs. 13.95 crores suggesting that the financial requirements of the Central Bank's constituents were reduced by wartime uncertainties.

In the case of no bank is the figure relating to Advances anywhere near the 1939 total, and this fact must be stressed in discussing the way in which the Central Bank's profits have been maintained. The total under investments shows a small decline though the holdings of terminable Government loans shows an increase of about one crore. The outstanding feature of the 1940 balance sheet is the increase in cash and other balances. These totalled over Rs. 9 crores at the end of December showing that the ratio of fully liquid assets including Treasury Bills to time and call liabilities was well above the average. This feature is not peculiar to the Central Bank's year-end statement, but it is hardly conditioned by the desire for window-dressing. A point that deserves special mention here is the difference between the market value of the bank's investments and the value placed on them in the balance sheet. A very substantial margin of over Rs. 57 lakhs exists and this distinguishes the last balance sheet from that appearing at the end of 1939.

Calcutta Port Finances

Another deficit is expected by the Chairman of the Calcutta Port Commission. In the note introducing the Budget estimates for 1941-42, reference is made to the fall in revenue during the year 1940-41 and the probable contraction of receipts in the coming year. The fall in receipts in 1940-41 is explained by the reduction in shipping. Despite the increased activity noticeable during April and May, the receipts from goods, vessels and railway showed a fall of Rs. 17 lakhs compared with the estimate made last year. The Revised Estimates indicate that the rise in the Port's revenues recorded in preceding years has been arrested, and the Port Commissioners are now faced with declining receipts. The income of Rs. 3,07,47,336 shown in the Revised Estimates for 1940-41 is below the expenditure of Rs. 3,08,54,746. The surplus originally anticipated turns out to be a deficit in spite of a reduction of Rs. 6½ lakhs in expenditure and a profit of Rs. 3.81 lakhs arising from the revaluation of investment. Though the sum of Rs. 3.8 lakhs is not exactly a receipt, the Port Commission has obtained larger receipts from the sale of unserviceable materials, and the revenue from surplus investments, too, has been larger than expected. The deficit of Rs. 1,07,410 for 1940-41 is met by drawing Rs. 1 lakh from the Revenue Reserve but the appropriation points to the need for shortening sail, and this has been done in the Budget for 1941-42. The Calcutta Port Commission has always been noted for its cautious policy, and the Estimates presented on Monday, show that Sir Thomas Elderton's careful guidance is still of inestimable value. The difficulties of the period must reduce receipts in 1941-42 and total revenue is placed at Rs. 2,92,52,501 as compared with Rs. 316.10 lakhs in the Estimates for the previous year. It is assumed that there will be no great variations in the trade of the Port, but with export control in force and foreign markets for Indian produce lost owing to the war, a shrinkage of traffic is probable. Allowance has, however, been made for increased imports of Burma rice and larger receipts from storage charges. Nevertheless, income from goods, vessels and railway is expected to be Rs. 2,47,77,750 as against Rs. 2,56,82,250 shown in the Revised Estimates referred to by the Chairman.

The total income for the year is expected to be Rs. 2,92,52,501 as compared with Rs. 3,07,47,336 for 1940-41 shown in the Revised Estimates, and this decrease in income is to be met by economies in expenditure. The provision for Maintenance and Repairs has been reduced and certain works are to be postponed. There is also a possibility that repairs to Dry Docks except those in progress may be deferred if the demand for dock accommodation is urgent. Repairs to one of the Dredgers will render an increase in the provision for Dredging unavoidable but this is the only increase. The Port Commission is, however, strongly placed after the repayment of the K. P. Dock Loans and a deficit of Rs. 11.73 lakhs will not give rise to alarm. And the Port Commission in spite of the anticipated fall in income has not decided to raise port charges unless the traffic dwindles and the Port authority is forced to increase them. The deficit for 1941-42 will be met by a withdrawal from the Revenue reserve. Since the Port Commission does not contemplate borrowing, any fall in the balances like the deficit is a matter of unimportance. The deficit will not occasion surprise in view of the continued fall in exports and the shortage of shipping. What is noteworthy is the decision to refrain from enhancing charges and placing new burdens on shippers. This is sure to give satisfaction to all concerned, and the extension of Sir Thomas Elderton's term as Chairman assures continuity of policy when it is most essential. The usual comparisons with preceding budgets are vitiated by the abnormal circumstances of wartime, but it must be said here that the Port finances are vastly stronger after a series of surpluses and the smallness of the deficit for 1940-41 will have to be viewed in relation to the fall of nearly Rs. 17 lakhs under the revenue from docks, railways etc. The essential soundness has been proved by successive administration reports and the deficit now expected will admittedly cause no strain to the finances.

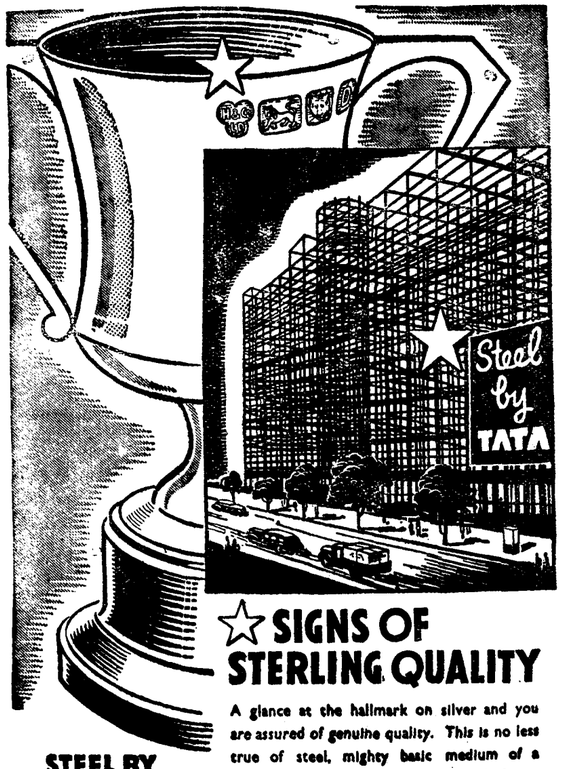
THE MISRA HOSIERY MILLS have, from the commencement of the war, been "on active service". Working day and night, the mills have been supplying essential requirements of the Army in the knitting line.

MISRA HOSIERY cater to the requirements of the general population and comprise socks, stockings, undervests, sports shirts, interlock underwear and outerwear, for men, women and children.



Production 8,000 Articles, daily.

Mining in India

A further reduction in the number of women employed in mines is recorded in the annual report of the Chief Inspector of Mines for 1939. Of the total of 305,344 persons employed in mines governed by the Mines Act, males numbered 254,898 and women were restricted to open workings and surface labour. In spite of a fall in the gross total the daily average number of persons employed in coal mines was 201,989 which is 896 more than the average in 1938. Of these 53,639 were employed in cutting coal 33,820 were males employed as loaders and 23,004 were women. The increase occurred in spite of a fall in the output of coal. A random test made in February 1940 revealed the extent of absenteeism in the mining industry. On a selected day, it was found that 7 per cent of the total labour was absent but in the Jharia field the percentage of absentees was only 3 per cent, the explanation being the residence of most workers in the vicinity of the mines. The report records that the per capita output of coal at 108 tons showed a slight increase though this does not compare with the Japanese average of 207 tons or the British average output of 287 tons. But the Indian average covers the output of women also and may be higher if men alone were considered. The report states that the withdrawal of women from underground work had no effect either on the labour supply or the output of coal. Unrest in the Jharia field was reflected in sporadic strikes. The wage-level rose in consequence of increments given by most collieries where it was warranted by the increase in cost of living following the war. A result of the outbreak of war is the fall in the number of mines engaged in extracting iron ore. At the beginning of the year, there was a large demand for ore from Singhbhum and large quantities were mined and shipped but early in 1940 shipment was stopped with the result that a large number of small mines closed down ; only the large companies using their own ore in India continued to work. Housing and labour conditions in most mining districts continued to show improvement. Except in the Pench Valley during June to October no shortage of labour was reported. But only in the coal industry was there any increase in wages, these being highest on the Jharia field both for underground and surface workers. But it must be noted here that the Punjab salt mines pay higher daily wages for all classes of labour, the rate of Rs. 0-11-3 for unskilled labour being exceptional.

The report records an increase in the use of mechanical coal-cutters worked by electricity. 56 machines were in use in the Jharia field 130 in the Raniganj field and 12 in C.P. and Berar. Output compared with 1938 was lower in all the coalfields except the Pench Valley and Assam fields. Total output for 1939 was 24.662 million tons and despatches totalled 21.43 millions tons. Over 1½ million tons were consumed on the fields and 1.64 million tons were sent to be turned into hard coke, the quantity showing an increase on 1938. There were 266 fatal accidents resulting in 286 deaths, a figure exceeding that for 1938 and also the average for the previous two years. There were 1,380 serious accidents, and an analysis of the accidents reveals that the incidence was greatest below ground and misadventure was the most common cause returned. Of the accidents due to haulage, there has been a regrettable increase, and the Chief Inspector records his opinion that the steady increase in the number of fatal and serious accidents could have been prevented by better supervision, suitable haulage roads and greater care on the part of

FORTY-SIXTH REPORT OF THE BOARD OF DIRECTORS

Gentlemen,

The Directors beg to place before the Shareholders the Balance Sheet and Profit and Loss Account for the year ended 31st December, 1940.

	Rs	A. P.
The Net Profit for the year, including the sum of Rs. 8,08,303-12-10 brought forward from the previous year's account, amounts to ...	38,55,507	0 2
The following amounts have been appropriated to the under mentioned purposes:—		
An ad-interim Dividend for the half-year ended 30th June 1940 at 6 per cent. per annum, free of Income-Tax (already paid)	5,04,396	0 0
Amount provided for Income-Tax and Super-Tax	3,00,000	0 0
Amount transferred to Sinking Fund in respect of Lands and Buildings	3,00,000	0 0
Amount transferred to Reserve and Contingency Fund	7,00,000	0 0
Bonus to Staff	2,30,000	0 0
	20,34,396	0 0
The balance of Rs. 18,21,111-0-2 the Directors propose to dispose of as follows:—		
To pay a final dividend for the half-year ended 31st December 1940, at the rate of 8 per cent. per annum, free of Income-Tax, *i.e.*, Re. 1 per Share on 6,72,528 Shares, (making 7 per cent. for the whole year), which will utilize ...	6,72,528	0 0
To pay a Bonus at the rate of 2 per cent. per annum, *i.e.*, Annas 8 per Share, free of Income-Tax	3,36,264	0 0
To carry forward to next year's account ...	8,12,319	0 2
	38,55,507	0 2

The Bank's business during the year showed satisfactory progress.

During the year under review, Brnach Offices were opened at Moradabad and Shaharanpur and sixteen Pay Offices at various centres.

The Directors report with great regret the untimely death of their colleague, Sir Dossabhoy H. Bhiwandiwalla, Kt., and desire to place on record their appreciation of the valuable services rendered by him to the Bank during the period he was on the Board. Sir Ardeshir Dalal, Kt., was invited to join the Board in place of the late Sir Dossabhoy H. Bhiwandiwalla. He retires under Article 86 of the Articles of Association, and you are requested to re-elect him.

Three of your Directors, namely Mr. Ardeshir Bomanji Dubash, Mr. Haridas Madhavdas and Mr. Dinshaw D. Romer retire under Article 94 of the Articles of Association read with Regulation 78 of Table "A" of the Indian Companies Act. They are eligible for re-election, and offer themselves accordingly.

The Shareholders are requested to appoint Auditors for the ensuing year, and to fix their remuneration.

Bombay, 10th February, 1941.

H. P. MODY,
Chairman.

Statement pursuant to Section 132A of the Indian Companies Act of 1913 as amended by Act XXII of 1936.

The profits of two of the Subsidiary Companies of the Bank, namely The Central Bank Executor and Trustee Company, Limited, and The Depositors' Benefit Insurance Company, Limited, respectively, for the year ending 31st December, 1939, have been included in the item "By interest etc." in the Profit and Loss Account to the extent of the dividends (in respect of the Bank's shareholdings) declared and paid by the said Subsidiary Companies.

Undistributed balances of the two above-named subsidiary Companies have been carried forward or otherwise dealt with in the accounts of such Companies.

The Balance Sheet of the third Subsidiary Company, namely the Central Exchange Bank of India, Limited, as at 31st of March 1940 shows a net loss of £7-10-5, against which the Bank holds full provision made from the profits of the Bank of previous years.

H. P. MODY (*Chairman*).

Bombay, 10th February, 1941.

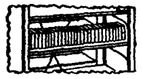
persons employed on haulage roads. A detailed list of inquiries into accidents is published in the report, and a summary of prosecutions under the Mines Act shows that the Inspectorate under the Labour Department performed valuable functions. The drafting of the new Coal Mines Rescue Rules and the appointment of a special committee as also the notification relating to the Coal Mines Safety (Stowing) Rules belong to the year 1939.

STEEL FOR GOOD STORAGE

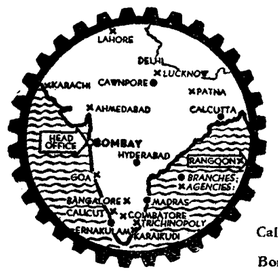
by Godrej

For durability, space-saving and planned efficiency in storage, steel is unrivalled. It cannot rot or warp, nor be eaten by white ants, like wood. But it must be of first-class fabrication, in accurately fitting units and with full protection against rust.



GODREJ SECTIONAL STEEL SHELVING—as supplied to a great Life Assurance Company.

EVERY GODREJ ARTICLE IS AN ACCURATE ENGINEERING JOB



GODREJ STEEL SHELVING CUPBOARD — with adjustable shelves, and secured with a Godrej unpickable Lock. Example, 48 x 24 x 16 inches costs only Rs. 47 net, ex-works, Bombay.

PORTION OF LIBRARY STACK BY GODREJ—as supplied to well-known university and other libraries.

- Godrej use none but best tested sheet steel and sections, pickled and machine-scrubbed for *anti-rust* before the successive coats of hard-baked enamel are applied; Godrej alone, in India, have facilities for such thorough treatment.
- Godrej Shelving offers a variety of different types, shapes and sizes in shelf and locker accommodation, and is erected, taken down, or rearranged easily with a spanner and a screw driver.
- The colossal Godrej Presses turn out sheets self-braced with cold-bent flanges—so that the maximum strength, *rigidity* and *load-capacity* are secured with minimum weight and cost.

Britain's Imports Increase

The British oversea trade returns for 1940 disclose that imports topped the £1,000 million mark. As compared with 1939 when the total value of imports amounted to £885.5 millions, imports in 1940 exceeded £1099.9 millions in value recording a growth of as much as 25 per cent. This increase occurred in spite of the price control measures in force and the continued assault by air. The United Kingdom carried on trade as much as possible in the usual way because essential imports had to be obtained even though several sources were cut off by the war. And the Navy made possible the securing of supplies without great difficulty, and the trade figures certainly bear witness to the efficiency of the convoy system. Britain's exports in 1940 totalled £413 millions in value as against £439.5 millions in 1939 indicating a fall of only 6 per cent. The totals may not reflect the great changes in progress on account of the war because prices have not been stationary either for imports or exports but Mr. Oswald Dutch argues that, allowing for a rise or 15 per cent. in the average value of all imports, the increase last year amounts to 10% under imports. Since the war period comes into the 1939 figures the totals for 1938 may be taken as the basis of comparison, in which case, imports have risen by 20 per cent. in value while exports have fallen by 14.5 per cent. The inference most usually drawn from such a comparison would be that Britain could command the world's resources in spite of shipping losses and the proclamation of a blockade by Hitler last July. It has been often noted that the adverse balance of trade shows a strong rise on account of the increased imports of raw materials wanted for munitions-making. Imports of raw materials alone accounted for £336.5 millions in 1940 as compared with £240.6 millions in 1939. The increase of over 40 per cent. reflect Britain's need for outside supplies and her ability to draw them as of yore. The increase is hardly noticeable in the case of foodstuffs; the value of imports in 1940 was only 6 per cent. above 1939 indicating that rationing and price control had a definite effect first on value and secondly on the value of imports. Food imports were actually 2 per cent. below 1938 but some allowance must be made fot the slow and more or less uniform rise in prices. In which case, foodstuffs and imports should have fallen to a greater extent. But the decrease was inevitable both on account of the tendency to cut out superfluous imports (Britain has decided to curtail imports of bananas) but also of the success of the Government's policy of developing home agricultural production. The "Dig for Victory" campaign has reduced imports of vegetables and also of cereals, and foodstuffs are therefore no longer the most important item in Britain's imports.

The increase in raw material imports may not be wholly due to the war. The export trade drive e.g. in regard to textiles means that export industries must be fed with the essential raw materials, a fact which explains also the decline in exports from Britain of raw materials. The decrease is not accounted for by the decline of £13 million in the value of coal shipments. But coal exports last year have not suffered to the degree anticipated originally when the war spread rapidly. The loss of the export markets for British coal and manufactures fmay however explain the fall in exports from £489.5 millions even though

trade with other countries may have actually risen during 1940. This affords justification for the steps taken to promote trade with South America whose need for imported goods must be great though, their export trade may be in a bad way.

The great gulf between the total value of imports and exports indicates that the £700 million or so of the import surplus is part of the price paid for the war. The increase is an abnormal temporary development and the question of expanding invisible exports to that degree cannot arise. But the vast difference between exports and imports will impress on many the need to keep up Britain's trade with countries which can provide payment in foreign currency and the drafting of women into industry is part of the new policy aiming at increased production in the export trades.

Indian Chamber Meeting

Mr. N. L. Puri's valedictory address at the Indian Chamber's annual meeting covered a wide range of topics which have nowadays become incumbent in every economic survey, thanks to the tempo of change in the national economy. The outgoing President aptly prefaced his survey with a reference to the growing importance of the Chamber as a link between the commercial community and the outside world and as a clearing house of commercial information. Importance has always to be paid for; and it is a matter for satisfaction that the increased expenditure entailed by growing activity and services has been nearly offset by enhanced revenue. It is a matter for some regret that the financial position of these commercial bodies is not as strong as they might, and should, be. In a sense, it is a slur upon the members of each trade. But there is satisfaction in the thought that an increasing number of commercial and industrial organisations are getting affiliated to the Chamber. With a President of undoubted eminence in Sir Badridas Goenka, and with a Secretary of tireless energy in Mr. S. R. Dhadda, the Chamber's activities in the new year will be watched with interest.

The diversity of tropics covered by Mr. Puri is a measure of the number of problems before the country. His plea for a careful study of trade figures is timely; the increase in total exports (in 1940) by Rs. 30 crores, alongside an increase in imports by only Rs. 2 crores, must not obscure the fact that the commodities trade is doing very badly, and that, with shipping facilities, industries like cement and coal would be doing much better. This country is not in a position to take as much advantage of prevailing conditions as she could, at a time when the Empire countries are importing more and more from India. Mr. Puri did well to stress that the boast of the Supply Member, that Rs. 762½ crores worth of war orders had been placed in India between September 1, 1939, and December 31, 1940, has no meaning, since it has benefitted only a few industries. He was also on good ground to point to the danger that the powers given to the Roger Mission and the Eastern Group Supply Council might result in Indian industry being subordinated to Dominion and Imperial interests. The sterling debt reduction was naturally dealt at length with a note of approval. Mr. Puri's plea for detached and careful analysis of current problems will be endorsed by everyone. These are times when we might easily lose sight of the wood in looking at the trees.

"I must have liberty
Withal, as large a charter as the wind
To blow on whom I please."
—(As You Like It.)

LAST week, I set up the journalist's wail, though I protested here and there that it was not my intention to do so. Having made a beginning, the temptation to continue in the same strain is all too strong. A mood of self-pity has the tendency to prolong itself. For, self-pity has a peculiar fascination, as it enables one to be both benefactor and beneficiary at the same time. One side of you asks for pity; and the other gives it gushingly. But self-pity is a dangerous and, in a sense, contemptible emotion. And if I expatiate on the peculiar difficulties of journalists, it is not in a spirit of personal grousing, but in the hope that they will be recognised to be what they are, a matter of public importance. I think it is high time that men of position and influence asked themselves whether they have done well by the Indian press. So far as our politicians are concerned, the Indian press has only duties, no rights. Indian newspapers have an obligation, regardless of the cost of paper, to publish every long-winded statement that Congressmen feel like "releasing" for the Press. Not only the high and mighty of the Working Committee, or the Big Five or Six of Provincial Congress Committees, even the Presidents of District Congress Committees sometimes feel like taking space which it costs to produce, and which has a market value even in these chilling conditions. It is not for the Editor or the News Editor to question the length of these statements; and a cut here or there is sure to offend the susceptibilities of these important personalities. My friend, Mr. B. N. Dutt, who is now in Jamshedpur and who was manager of *Forward* in its heyday, used to tell me that the help he got from our political potentates was requests for free copies! The Editor had, as I said, his headache.

Recent controversies about the part which the press has to play in the political movement only serve to emphasise the prevalence of the view that the Press has only duties and no rights. The average Indian expects every newspaper to be an active volcano and the leading article to be its crater. Fire, brimstone and lava must be showered on the Government. No language should be deemed too strong to describe the Government or its intentions or even its personnel. Either the laws which affect the Press should be deemed a dead letter or every journalist must consider himself a fanatic martyr. The British commercial community should be similarly treated and talked of. Any deviation from this path of pure nationalism shows you up as a toady and traitor. You can slow down the tempo of this warfare of words, when no civil disobedience movement is on; but once the ultimatum of non-violent warfare is handed to the Government, the Press must be prepared to close down, and proprietors and staff to shift for themselves as well as they can.

Granted all that, what is the help that public men, who make these impossible demands on the Press, are prepared to give to Indian newspapers in comparatively normal times? To guard against misunderstanding, let me say, at the outset, that I am not thinking at this stage of the business side or of advertisement. I know that Indian politicians have little or nothing of advertisement in their hands, that, even if they have, it will be a job for them to adjudge rival claims and all that. Here, too, it is not quite without significance that Congress managed to rule in the Provinces for more than two full years without conferring a single benefit on the Indian Press. But, as I said, I am not on that. My point rather is that, if politicians make such severe demands of Indian newspapers, that is, even to the point of their committing suicide, they ought, in fairness, to bestow some thought on their obligations to the Press. The only instance of help to Indian journalism that I can recollect is the preference shown by Congressmen sometimes to the United Press over the Associated Press. But that, too, not always. And the reason given was that a statement given to the latter was sure to find its way to all papers. That question is not of much importance now. The Associated Press is not so foreign or the U. P. so ill-patronised by the Dailies. But the argument I referred to betrays a dangerous line of thought. If Congressmen are not sure of reaching the Indian public, through Indian papers, is it any wonder that in most cities of India, Indian newspapers have made little headway? If we are to win swaraj you have to break those habits of the public which make for slavery. I am by no means opposed to Indians reading English-owned papers. But it must be due to a breadth of outlook, to an anxiety to know the other side and to imbibe what the English-owned papers have to offer to the reader, not in the thraldom of established habit. There are many in India—not in the South, I pride myself—who see nothing objectionable in their sole reliance on the *Statesman* or the *Times of India*. They used to turn up their nose at the *Patrika;* and for long

years they probably got on without it. They did not learn to think of the *Patrika* as a paper they couldn't do without. Those, who think that the *Patrika* should pour forth brimstone and lava when they want it to, have certainly an obligation to do their bit in breaking this indifference to the leading Indian daily. Let there be some special article from a leading Congressman in the *Patrika*, which cannot be read elsewhere and the public will learn to look for it every day and regard it with great deference. That the *Patrika* of to-day is not the *Patrika* of years ago is, not because of our Congressmen or other political leaders, but in spite of them. The leaders could have speeded up the growth of the *Patrika's* influence and prestige. But I am not aware that our politicians ever spent a moment's thought on how they could strengthen the position of the Indian press.

The truth is that to build up a paper, which is a national institution, is not the work of the Editor and the Manager only. The public is passive. The average man has not much discrimination. He rarely knows a good paper when he sees it. And yet it is popularity that gives a paper, influence and prestige. It is for the leaders to help a deserving paper to such popularity. Not everyone who reads Shakespeare can recognise him to be a great poet and dramatist. But thanks to the lead given by the discerning, the charms of Shakespeare's plays are not lost on the dullest reader. What is true of good literature is true of good journalism. If the leaders show signs of regard for the Indian press, the public is sure to follow.

Do you think it of no significance that the correspondence columns of Indian dailies are filled by absolute nonentities airing some petty local grievance? Turn to copies of the *Times* or the *Manchester Guardian* or the *Economist*. You will find the foremost men and women in the country writing to the Editor on some question of national importance. It is sometimes a criticism of an editorial view, sometimes a corrective to it. I remember an occasion when Mr. Keynes wrote in three, four successive issues of the *Economist*, criticising a view taken by that journal. A letter to the Editor from Mr. Keynes is the hallmark of quality; and the public is enabled thereby to form its judgment and to invest the paper with influence and importance. Make no mistake about it, it is not the violence of language employed, but the standing and the reputation of a paper that weigh with the authorities who come in for criticism. We in India have an idea that fearlessness consists in readiness to employ violent language and to go to jail, if that is to be the consequence.

A paper with prestige can criticise Government more effectively and with less risks than a paper which is a thing of yesterday and makes up for lack of standing with violence of sentiment and language. It is certainly in the power of our political leaders to confer prestige, if not patronage, on Indian newspapers.

Part of the credit for the success of the *Hindu* in the South is due to the importance which leaders like V. Krishnaswami Iyer were ready to invest it with. That readiness is conspicuous by its absence in other parts of India.

Our politicians feel themselves taller when they see themselves in print in English-owned dailies than if their statements are published only in the Indian press. An eager critic of my view may imagine that I am inconsistent in complaining that Indian politicians dump their statements on Indian papers and in the same breath making a grievance of their preference for English-owned papers. But in reality there is no inconsistency. For the same attitude of indifference induces them to give of their best to one section and forcing all their vapid outpourings on the other. My critic may also argue that the English-owned papers afford better publicity. That, as I have pointed out, is a subtle variant of *petitio principi*. Such an argument would be valid in the case of foreign newspapers and journals. If there is to be publicity for the Indian Nationalist cause, eminent nationalist politicians must present their case in the columns of influential sections of the press in foreign countries. When Pandit Jawaharlal Nehru writes for *Foreign Affairs* or Mahatma Gandhi gives a special interview to the *News Chronicle*, it is a real help to the cause. But to preserve the same attitude in respect of newspapers and journals in India is only to present another facet of our slave mentality. I would fain shirk the conclusion that Gandhiji, too, is not an exception. But it is inescapable. When I find a letter from the Mahatma displayed most attractively on the editorial page of the *Times of India*, I cannot help feeling that the Mahatma, too, is ready to increase the handicaps of the Indian press. I do not recollect any occasion when the Mahatma paid a similar compliment to an Indian newspaper. Once *Indian Finance* had the privilege of a special interview with Gandhiji; and the result was immediately felt in the interview being the subject of special editorial comment in most of the dailies. But that remains an almost solitary instance. If what is important is the attitude, then Gandhiji's alacrity in replying to the *Times of India* is in striking contrast to his indifference to what appears in Indian journals. *Indian Affairs* carried a series of thoughtful articles on "Non-violence as a Political Principle" and it has offered in more recent times a most reasoned criti-

"ASK JACKS ABOUT IT"

Olympus

New Delhi, Feb. 19.

IT was to an unusually thin House in the Assembly Chamber this morning that Sir Andrew Clow, the Communications Member presented his second Budget. He had no surprises, pleasant or unpleasant, to offer, no shocks to the expectant public outside by way of any further increase in rates or fares, and alas, no announcement of any relief to the travelling public though he had an unprecedented surplus in his hands. From the fortnightly statements of Railway earnings which, by the way, appear to have reached their peak in the present quarter, it was known that the surplus would exceed ten crores. Actually the surplus according to the revised estimates for 1940-41 is Rs. 14.59 crores and a surplus of Rs. 11.83 crores is anticipated for the following year. Naturally the question asked in Assembly circles is whether in view of this tide of prosperity in Railway earnings, which cannot be regarded as temporary, it is not the duty of the Railway Member to withdraw the increases in rates and fares which he imposed last year. The reason which he gave last year for increasing the rates and fares was the need to find additional money in order to meet in full the financial obligations of the Railways to general revenues. Actually the sum expected to be realised this year in traffic receipts is Rs. 6¼ crores more than the Budget estimate. As the increases were intended to bring an additional income of Rs. 5¼ crores only, it is asked whether the public is not entitled to the cancellation of these increases ordered last year as there is no longer any justification. The official answer to this plea is that the traffic is well able to bear these additional charges and that it would be unwise to forgo this revenue as the only alternative to their retention is increase in general taxation.

According to the Railway Member's proposals general revenues are to benefit to the extent of well over Rs. 20 crores in the present year and the following year. In official opinion this is the main justification for leaving the present rates and fares as they are. It is, however, admitted to the credit of the Railway Member that he has given to general revenues the maximum possible and has resisted the temptation to set apart any portion of the surplus for financing any new schemes or commitments of the Railways beyond what are strictly necessary. The hope expressed in Assembly circles is that this large amount released from the Railway revenues for general revenues will materially count when the Finance Member decides his taxation policy for the coming year. According to his November statement, the deficit this year may amount to Rs. 13 crores. If we make allowance for the additional taxation imposed in November one may assume that the deficit will not be less than Rs. 10 crores. In addition there is the recurring and non-recurring expenditure connected with Defence measures which will amount to no less than Rs. 50 crores during the next two years. A good part of this amount has to be met from Defence loans so that one may hope that with this large amount of Rs. 20 crores in his hands from the Railways, the Finance Member may not find it necessary to face the Assembly with heavy taxation measures. To this extent the Railway Member has undoubtedly helped the Finance Member in preparing his War Budget for the coming year.

One interesting item which finds mention in the Railway Member's Budget statement is the provision of half a crore to meet possible charges for war allowances and other emergent charges this year. For the coming year an increase of Rs. 1.89 crores over the current year's revised estimate has been provided, the largest item in this increase representing a provision for possible war allowances. No decision has been announced yet on the claim for dearness allowance made by Railway employees, but these figures disclose that the Government's idea is to spend about Rs. 1 crore a year on these war allowances. It is wellknown that the Railway authorities have not taken kindly to the report of Sir B. N. Rau's court of enquiry. They seem to think that the recommendations in certain cases go beyond the needs of the situation. In any case it is hoped that as a result of the the negotiations now going on between the the Railway Board and the Railwaymen's Federation an agreed solution will be found. For people earning below Rs. 35 the amount recommended by the court of enquiry is Rs. 3, but as the Federation has asked for some relief to people earning over Rs. 35 also, a via media has to be found in the case of the former in order to find some money for relieving the latter class of Railway employees also.

The Railway Member was very guarded in his observations on the results of State management. In fact one may say that he is unduly pessimistic in speaking of the difficulties inherent in official management of industrial enterprises. Still the step which he has taken in terminating the contracts of two important Railways the B. B. & C. I. Railway and the Assam-Bengal Railway and arranging to purchase them at a cost of about Rs. 5 crores has been generally welcomed. The B.B. & C.I. Railway is said to yield a good return. As for the Assam Bengal Railway it is stated that it has not been yielding adequate return on the capital. As it is proposed to bring under unified control the Assam Bengal Railway and the Eastern Bengal Railway there is bound to be some improvement in the financial position. It is also proposed to acquire the Tapti Valley Railway Company at a cost of Rs. 1 2/3 crores. At the same time the question of dismantling Railway lines though they have been described as unremunerative by the Railway Member is causing some concern to Assembly members. The Railway Member has offered the solace that the motor transport industry should be able to carry profitably most of the traffic which these branch lines were carrying, but this new solicitude for motor transport is hardly likely to satisfy the critics. This question is expected to figure very largely in the coming discussions on the Railway Budget.

Several interesting new projects were sanctioned by the Standing Finance Committee at its last meeting. The most important is the construction of the new mint at Calcutta at a cost of Rs. 65 lakhs non-recurring and Rs 6¾ lakhs terminable recurring. Another is the decision to acquire the three private telephone companies of Bombay, Bengal and Madras at a cost of about Rs. 5 crores. For this purpose a company is to be formed with the names of the Government Telephone Board, Ltd. the shares of which are to be held by the Governor-General-in-Council. The cost to the Central Government for financing the Civic Guards in the provinces is expected to be about Rs. 35 lakhs. Another interesting decision is the opening of a Broadcasting Station at Karachi. Lastly there is the decision to have in Calcutta a Special Branch of the Income-Tax Office on the same lines as the one in Bombay for dealing with cases of suspected under-assessment. According to the statement made to the Standing Finance Committee by the Central Board of Revenue, the Bombay Branch in 1939-40 was responsible for a total demand of Rs. 44½ lakhs of which only Rs. 14½ lakhs would have been collected if the returns made by the assessees had been accepted as correct.

IT'S A FACT—
that more than 90% of India's teeming millions never save a rupee of their earnings. Money borrowed at fantastic interest cripples them financially for life. An account with the Palai Central Bank safeguards you from debt and worry—it puts success within your grasp.

Bombay, Feb. 18.

THE cotton trade should have learnt with some interest that while Britain aims at restricting cotton imports and making the Controller the sole importer, there is not much chance of India increasing exports to Britain as provided for by the Indo-British trade treaty. The practical abandonment of business in Liverpool and the new machinery of import and distribution will render it impossible to look for improved offtake, and the Indian mill industry's responsibilities to the cotton grower naturally increase in view of the aggravated tension in the Far East. Exports to China can hardly improve when Britons there are urged to liquidate their interests and the increase in shipments last year may be conveniently ignored. While trade with Egypt in recent months has fluctuated wildly, India's chances of developing trade with East Africa have not suffered. A reference in a recent Government report to the possibility of supplying glass, crockery, medicines, confectionery and other goods in addition to textile manufactures should have indicated to Indian manufacturers that they should grasp the opportunities presented in East Africa by the war.

A short announcement in the press that Sudan cotton will be sold by auction at Port Sudan will create considerable interest in cotton from the Red Sea coast. While Bombay has long been familiar with imported cotton from Kenya and Uganda, cotton from the Sudan has not made much headway and in view of the high quality of Uppers generally, the supplies from the Sudan may prove quite acceptable to Indian mills which have to extend their range of manufacturers and improve the quality of yarn spun. It is believed that Bombay will not fail to show a proper interest in the auction sales arranged by the S. P. Syndicate for the sale of cotton grown on the Gezira estates. Prices may prove advantageous to Indian mills as Britain may not keep up purchases on the usual scale and if the announcement relating to conditions and dates has to be obtained by asking for them, many are likely to write to Port Sudan. Now that the danger from Italian East Africa has disappeared there is nothing to stand in the way of trade with the Sudan developing rapidly.

Though no call-up is likely in the immediate future, the Anglo-Indian and Domiciled community is preparing a register, on a purey voluntary basis, of available men. The local survey of manpower is to be made with a view to find out how many men can be had for national service. The scheme is approved by the Army authorities and the Governor of Bombay has sent a message declaring that the Register will prove useful when recruitment is decided upon. Though it is not easy to compile an accurate register, the Association concerned hopes to succeed as the co-operation of all employers will be enlisted and the Government, too, will extend the fullest measure of support. As the scheme will enable reinforcements to the armed forces to be obtained promptly, the Governor has asked all concerned to co-operate fully with the Association. The scheme of registration will apply to all males between the ages of 15 and 50 irrespective of registration under the National Service Ordinance or liability to serve with the A.F.I. Compliance with the request made by those preparing the register does not create any liability to compulsory service but is merely intended to provide an additional source of reference in case of need.

The limited supply of good stable cotton is giving rise to anxiety on the cotton market. As the fluctuations in futures indicate the deterioration in sentiment in Bombay there is nothing to produce enthusiasm. As for local sentiment, it has suffered damage and sellers have outnumbered buyers. The difficulty of covering by purchases in other markets does not stand against sellers who think that any type of cotton can be tendered against the Broach contract. Variations as between the practice in the U. S. A. and Bombay merely bring out the disadvantages of adhering to the present procedure, though it may be argued that good staple growths are likely to be at a premium, and in view of the limited supply, the rates for the Broach hedge contract should rise. But news from the Far East, the rumours of a negotiated peace and the apprehensions caused by astrological forecasts still give rise to a bearish feeling. The feeling is nourished by fears originating from the probable loss of Japan as a customer for Indian cotton and the difficulty of getting shipment facilities. Though trading during the last week shows that there is support at the lower levels, the irregular tone testifies to the onset of nervousness. The decline in Broach may be due to the fear that only a fall in prices will help the sellers to provide staple cotton against their contracts not by reducing the difference of price between Broach and superior varieties, but by making it unprofitable for others to claim the fulfilment of the contract.

The Bombay Liberals have had another field day when a meeting to discuss the political situation was arranged by the National Liberal Association. Sir C. H. Setalvad was in the chair and he did not disguise his anxiety. He deplored the stalemate due to a misunderstanding as between the principal parties. In his review of the situation Sir Chimanlal did not omit to criticise the Congress and he condemned the Pakistan demand. But Sir Chimanlal did not let off the Government lightly. In this he supported the Liberals who replied to the nine men of Westminster. The final appeal for co-operation and understanding, for the removal of grievances and the ending of strife, was only to be expected as Dr. Paranjpye followed with an explanation of what should be done to end the deadlock. His speech indicated that differences between the Liberals and Congress were narrowing. Sir Cowasji Jehangir's speech was not cast on the same lines and he was more than ever concerned to put Congress in the wrong. People may say his tribute to Britain was very well, but he should not have accused Congress of deliberately thwarting the war effort.

The chronic delays in the carriage of mails has brought forth plenty of protests. The leading article in the *Times of India* last week, explains what the patient public has to put up with. The Airways people think that a valiant effort was being made to reduce delays but the war period has demonstrated the inability of the postal department to satisfy the public demand for regular though slow carriage of mail. The air mail charges are known to be fantastically high and the services by way of the Far East are beyond the reach of all but the wealthy. In fact, the surface route may appear as safe and speedy as the air mail route though the promise of a regular service to China may bring about improvement in the service up to Hongkong. The carriage of letters by way of the U. S. A. partly by sea means three to four weeks and the postal charges even then are inordinately high. If the Durban-Britain route were in order, complaints would not be frequent or furious, and alter the recent mention of a service from Cairo to Bathurst an African service would reduce anxiety. Anyway, the collapse of the service between Karachi and Croydon must result in grievances and there is a demand for a clear statement as to when any improvement can be expected.

The resignation of Mr. Mohammad Suleman Mitha from the Assembly and from the Muslim League at the same time deserves to be widely known. In a letter to Mr. Jinnah announcing his resignation, Mr. Mitha says that he cannot support the League and as he stood on the party ticket from East Khandesh, he had decided to resign from the Bombay Assembly. His disapproval of the League's views is not explained in detail but the refusal to subcribe to the view of Mr. Jinnah can only mean that moderate men cannot support the demand for Pakistan. As Mr. Mitha belongs to an important commercial house and is among Bombay's best-known citi-

A Resume of Commodity Markets

EARLY in the week rather weak conditions were noticeable in most of the several markets. The fears regarding further worsening of the Far Eastern situation and the acute weakness of the raw jute market did not help to improve the tone. There was a slump in prices in the raw jute futures market and the quotation was at one time as low as Rs. 32-12. The Karachi Wheat market was inclined to be downward. Heavy selling and the difficulties in shipments caused a sharp decline in prices and Choice White ready came down to Rs. 27-14. Linseed and other markets were lower in sympathy. The Bombay raw cotton market has been inclined to be easier and the quotation for Broach April-May is five points lower on balance. The decline in rates would perhaps have been more pronounced but for the soundness of the technical position of the market and the firmness of the basic staple varieties. The only feature of the week is the strength of the hessian market. The difficulties in placing orders for near deliveries and the possibility of greater freight allotment have been mainly responsible for the sharp rise in quotations for the near positions. In the bullion market, silver prices have been easier but gold values improved sharply early in the week. Closing prices are below the best levels for the week.

There has been a recovery in the raw jute market on reports of Government buying, while the wheat market has been steadier on Amritsar and Bombay buying. The Far Eastern situation also is considered to be less critical. The tone in the several markets during the latter half of the week is definitely better.

Jute

There was considerable anxiety regarding the policy of the Bengal Government in maintaining prices of jute at the minimum rates. It is expected that there would be a shortfall of at least 2 lakhs bales in the quota for the second period of the agreement and that mills will not be able to buy for the third period of the agreement. With the eagerness of sellers to do business, there was heavy selling in the futures market and the quotation came down to Rs. 32-12. There has been a sharp recovery since Saturday, but the tendency still continues to be bearish.

The remarks of the Chairman of the Indian Jute Mills Association in this connection are not, however, quite discouraging. With the exception of certain small units whose returns have yet to be received, member mills had purchased up to February 15, 1941, 21.68 lakhs of bales against the quantity of 25 lakhs, the quota fixed at Delhi. It is not definite whether Government will decide to make the purchases upto the deficit amount as they are entitled to under the agreement, but the Chairman said that, if mills implemented to the full the undertaking, they would have absorbed about 62½ lakhs bales by 15th April. These purchases with exports would amount to 90 lakhs bales out of a crop of 120 lakhs bales. He added: "I do not think it beyond the bounds of reason to expect that the ryot will hold quite a considerable quantity of crop over till next season: therefore, if there are no untoward developments before then, it seems to me the position does not warrant undue pessimism. I firmly believe that it is the intention of Government to ensure that restriction of the crop to 1/3 of that of this season will be rigidly enforced and I can see no reason why they should not be able to give reasonable effect to this—in fact, it is a part of our understanding with them."

Jute Manufactures

The jute manufactures market has been very firm throughout the week. Good buying by the bazar has resulted in substantial appreciation in the quotation for hessians. The rise in prices has been due to the difficulty of mills in selling for the nearer positions. They have been free sellers for the forward positions. Regarding the immediate prospects for the industry, the Chairman of the I. J. M. A. said: "Our immediate future is dependent to a great extent upon shipping facilities. I believe there is a good demand for our manufactures in those markets which are still open to us and that this demand will continue. Provided tonnage is available, I do not consider our position will materially alter from that of the past six months and in any improvement in the situation this industry will share. In addition to this I fully anticipate that we shall continue to receive valuable orders for war materials."

Cotton

The behaviour of the raw cotton market during the week should be considered rather satisfactory. There has been only a slight decline in prices and there is good resistance to selling pressure. Regarding the difficulty in disposing of surplus raw cotton the Commerce Member in the Central Assembly said: "Generally speaking, it is not easy to find new markets for cotton and groundnuts in place of those which have been lost owing to the war. There has been appreciable increase during the current year in the total exports of cotton textiles to all destinations and a certain quantity of the cotton surplus, therefore, may be expected to be absorbed by increased consumption in Indian mills in connection with the extra demand and also in coenection with the demand of the Supply Department". When asked whether it would be possible for the Government to call a conference of cotton interests on the lines of the conference held in connection with jute, the Commerce Member replied that the position was constantly under consideration by the Government and that at the meeting in the Export Advisory Council, this question had been under review. He would, however, consider the suggestion for the holding of a conference.

Rubber and Tin

The reports regarding the Japanese threat to Malaya have resulted in a sharp rise in prices for Rubber and Tin. The fears regarding the possibility of a shortage in supplies have been mainly responsible for the rise in the quotation for Tin from £250 to £279 and Rubber Spot from 12½d. to 13⅛d.

Jute and Jute Manufactures

(From Our Jute Correspondent)

Calcutta, Feb. 20.

As far as can be ascertained at present, the quantity of jute purchased by Mills under the Delhi scheme up to the end of the second quota period, that is 15th February, will fall short of the quantity aimed at by some three lakhs of bales. The total fixed for 15th February was 25 lakhs of bales and allowing for some returns still to come in, it appears improbable that the total actually purchased will exceed 22 lakhs. This situation, accompanied as it is by exceedingly dull conditions in the market with strong pressure to sell from all quarters at minimum rates is bound to leave Government in somewhat of a quandry. Two-thirds of the total purchase under the scheme was to have been completed by 15th February so that the buying power during the second half of the scheme will naturally be weaker and the heavier offerings at minimum prices would normally herald a break in rates, a contingency which it is difficult to see can be avoided in the circumstances. The mere making up of the short-fall in purchases by Government buying would have no appreciable effect on the position, and it is not very apparent what other steps Government can take to prop up the artificial range of prices they have endeavoured to establish. The vast amount of money which would be required to make purchases sufficient to relieve the position is such as to give them pause, in addition to which the storage capacity to accommodate any such purchases is simply not there. Mill Godowns are so full that most Mills are asking for shipments to be deferred. Presshouse and public godowns in Calcutta are bulging with unshipped jute for overseas, the freight for which is definitely not in sight for some considerable time ahead. It looks altogether as if circumstances, combined with the inexorable law of supply and demand, were to prove too strong for the well meant but misguided efforts to rescue the cultivator from the morass of excess jute which he has produced. As a matter of cold fact, a break in price at this juncture would be of the greatest assistance to Government in their effort to restrict the coming crop, whereas the maintenance of current prices cannot but prove a definite handicap to the success of that scheme. It cannot be fairly urged that Mills have let the Government down. They have for the most part done their bit in support of a scheme which few approved and the small margin by which they have failed to meet the total purchase aimed at is not sufficient to invalidate its success if the scheme had been sound. Developments will be watched with interest.

Professor Todd's interim report on the working of the Futures Markets has now been issued and provides interesting reading. He sums up the defects of the present market shortly as, too narrow a contract, system of tendering almost non-existent, and too much sheer speculation; while the remedies he proposes are to change the medium of trading to Kutcha bales, with optional tenders of grades higher and lower than the basis grade in order to widen the scope and avoid any possibility of cornering, to have twelve monthly contracts open all the time, each monthly contract to be closed out by tender or by buying or selling at market value, eliminating the present system of carrying forward, limiting the daily fluctuations to prevent undue speculation and also, to this end, to limit the open interest of each broker and client by margins and deposits. It is his suggestion that a properly constituted Jute Futures market should have the legal monopoly of dealing in Futures and that all existing concerns in this line should be abolished. Professor Todd's remarks on the necessity for a Hessian Futures market are interesting. He points out that its only utility is to facilitate Bazar operations and that the Bazar only exists to enable Mills to sell goods ahead as a hedge against their holdings of jute. If the Mills were to utilise a properly constituted Jute Futures market they would not require the Bazar into which to sell their forward goods, so the elimination of the Bazar would automatically do away with the necessity for a Hessian Futures market. It has been pointed out many times in these pages that the facilities offered by the Hessian Futures market inevitably led to overtrading, with the resulting crashes which have periodically overtaken the Fabrics market in recent years.

Business reported in the Export Jute market during the past week has been practically nil, the absence of any near prospect of freight and the accumulation of unshipped holdings making shippers scared to enter into any fresh commitments. Nominal quotation for Firsts has dropped to Rs. 33 with Lightnings at Rs. 27-8 and Dundee Daisee Rs. 2-8 at Rs. 33-8. A small speculative business for storage was reported in Outport Tossa 4s. and in Lightnings, both at Rs. 27. Reliable N. C. Cuttings were done at Rs. 15. The Futures market has shown a declining tendency. From the opening at Rs. 35-8 the quotation dropped to Rs. 33, then showed some recovery in sympathy with Fabrics to Rs. 35-10 and has since fluctuated between that point and Rs. 34-10, closing at the latter figure.

Loose Jute has been featureless. Towards the end of the quota period there was some further business reported in European Jute 50/50 assortment at minimum prices of Rs. 8-8 and Rs. 6-12 Middles and Bottoms. Indian District Tossa was taken to a small extent, also at minimum rates, Rs. 7-12 and Rs. 6. Since then Mills have shown no anxiety to continue purchases and strong selling pressure at minimum prices is meeting with no response from buyers. Jute arrivals for the first half of February are estimated at 5,35,000 B/s against 2,48,000 B/s in the same period last year. This brings the total arrivals out of this crop up to mid-February to 62,51,000 B/s as against 86,49,000 B/s at the same point last year. Owing to the slackening of demand due to the scarcity of new business in Calcutta, mofussil markets are tending easier though sellers are showing some reluctance to part with holdings at under the rates recently ruling. Buyers generally are perforce sitting out.

There has been fair activity in the Fabrics section with a demand for near goods which is difficult to satisfy owing to Mills being fully sold. Bazar operators have also been taking advantage of the reduction in 80z/40 stocks of hessian to stage a minor squeeze.

JUTE

Calcutta, February 20.

THERE was a sharp decline in prices in the raw jute futures market early in the week on heavy bear selling. The sentiment in the market was predominantly bearish. A level as low as Rs. 32-12 was recorded. Only during the last two days a firmer tendency has been noticeable on reports of Government buying. There has been a recovery to Rs. 359. The tendency, however, still continues to be bearish and the quotation is again easier at Rs. 34-9. Mill buying during the past few weeks has been on a very small scale while business for export has not been possible owing to the difficulty in shipments. It is feared that there would be a considerable short-fall in the quota for the second period of the agreement and that mills would not be in a position to buy in any quantities towards fulfilment of the quota for the third period of the agreement. In the absence of any mill buying and the uncertainty there has been anxiety regarding the maintenance of prices around the minimum rates. Sellers are eager to do business. In the mofussil centres also a decline in prices has been noticeable but there is a tendency to hold back supplies in the hope that Government will yet adopt some measures to prevent a decline in prices.

In the loose jute section only a small volume of business has been reported. European Middles and Bottoms 20/80 assortment have been done at Rs. 8-8 and Rs. 6-12 per maund. Indian District Tossa Bottoms alone were done at Rs. 6 per maund.

As pointed out above, there has not been any business in the pucca bales section on account of shippers owing to the difficulty in guaranteeing shipments. A weaker tendency was noticeable in sympathy with the futures market. Quotations are purely nominal. Firsts for March shipment were quoted on the basis of Rs. 34 per bale.

In the futures market rather weak conditions were noticeable early in the week. On heavy bear selling there was a drop to Rs. 32-12 on Saturday. The quotation towards the close on that day was slightly better at Rs. 33-12. On Wednesday there were reports regarding Government buying and the quotation improved to Rs. 35-2 There was a further improvement to Rs. 35-9 yesterday but an easier tendency is noticeable to-day with the quotation around Rs. 34-9.

JUTE MANUFACTURES

Calcutta, Feb. 20.

IN spite of the weakness of the raw jute market the jute manufactures market was inclined to be firm throughout the week. The quotations towards the close are at the highest levels for the week. The strength of the hessian market has been mainly due to the speculative buying by the bazar on hopes regarding the possibility of there being greater freight allotment. There has also been some enquiry from overseas markets. Orders for the standard qualities for the near months is absolutely unplaceable. As the bazar has got some stocks the rates naturally have been pushed up. There are also reports that there will be a re-opening of the Hessian futures market shortly. 9 Porters ready are higher at Rs. 13/15 from Rs. 13/9 at the time of last writing. March are quoted at Rs. 13/13/6, April/June Rs. 13/8/6 and July/September at Rs. 13. The quotations at the end of last week were Rs. 13/9, Rs. 13/7 and Rs. 13 respectively. It will thus clearly be seen that the improvement in the quotations is mainly for the nearer positions. Mills are still free sellers for the farther postions. II Porters ready are quoting Rs. 17/13, March Rs. 17/11, April/June Rs. 16/13 and July/September Rs. 16/4.

In the heavy goods section a firmer tone has been noticeable but not much of businesss has been passing. Cornsacks for early shipment have been in some demand and done upto Rs. 34/2. Cornsacks for April/June were done at Rs. 33/4. Liverpool Twills for February shipment Rs. 37/10 and B Twills for the same position at Rs. 32/2.

COTTON

Calcutta, February 20.

The Bombay raw cotton market has been rather weak. The developments during the past few days have not been quite encouraging to the market, the fears regarding fresh complications in the Far East having a disturbing effect. In the absence of any large mill buying and with the difficulties in export business prices have been sagging and the close has been around the lowest levels for the week. However, there has never been any selling pressure and it is generally felt that with the present high level of Indian mill consumption and the possibility of even a shortage in the staple varieties the decline in prices has been rather overdone. American advices also have been none too helpful to the market. The developments in the Balkans and the Far East have had a discouraging influence on the markets. Broach April/May closed at Rs. 182-8, July/August at Rs. 185, Oomra March at Rs. 143, May at Rs. 145, Bengal at Rs. 118, and May at Rs. 119.

Overseas markets also have been easier. In Liverpool, the quotation for March was 8.24d. and May 8.25d. In New York, March closed at 10.28 cents and May at 10.26 cents against 10.39 cents and 10.36 cents on the last occasion. The closing quotations are slightly better than the lowest levels for the week.

PIECEGOODS

Calcutta, February 20.

FIRMER conditions have been noticeable in the piecegoods market during the past week in spite of the weaker tone of the raw cotton market. Owing to the fears regarding the possibility of getting adequate supplies from Japan, imports have already shrunk to very small dimensions, and with the smaller stocks in the bazar there has been a good rise in the quotations for Japanese styles. Forward contracts with Japanese manufacturers have been confined to very small quantities for the special qualities. There has been good enquiry for Indian textiles. In the Lancashire goods section there has been little activity and business has been mostly of a retail character.

The yarn market has been firm with good business reported by South Indian mills in coarse and medium yarns. Offtake from mofussil centres has been satisfactory.

SILVER

Calcutta, Feb. 20.

THE Bombay silver market has been absolutely uninteresting. In the absence of any business quotations are slightly lower on balance. Even when the gold market showed a tendency to improve in mid-week there were no signs a rally. Indian Mint Silver ready were quoting Rs. 63.

GOVERNMENT OF INDIA

3% LOAN 1949-52

(Second Defence Loan)

Redeemable at par not earlier than 1949 and not later than 1952.

Subscriptions in cash unlimited as to amount, will be received from 1st February, 1941, until further notice.

ISSUE PRICE.—The prices at which the loan will be issued are as follows :—

Issue Price on any date from the—	Price per Rs. 100 nominal
1st February 1941 to the 8th February 1941 ..	Rs. 100 0 0
10th February 1941 to the 15th February 1941 ..	Rs. 100 0 9
17th February 1941 to the 22nd February 1941 ..	Rs. 100 1 6
24th February 1941 to the 1st March 1941 ..	Rs. 100 2 3

and thereafter at prices increasing by 9 pies per cent. weekly until further notice. This weekly increase approximates to the net interest which accrues on the securities.

Copies of the Notification and application Forms will be available at the offices of the Reserve Bank of India, Bombay, Calcutta, Delhi and Madras, at branches of Imperial Bank of India at other places and at all Government Treasuries.

First Settlement Rs. 62/13 and Second Settlement Rs. 62/14. The London market has been uninteresting and featureless with the quotation for both spot and forward unchanged at 23 5/16.

GOLD

Calcutta, Feb. 20.

THE Bombay gold market was inclined to be firmer in mid-week on reports regarding the possibility of more complications in the Far East. There was good spot buying and the quotation was at one time as high as Rs. 42/10 for Second Settlement. The quotation at the end of last week was Rs. 42/3/9. The tendency has been rather irregular during the past three days and quotations, though slightly lower than the highest levels for the week, are considerably higher on balance. During the course of to-day an easier tendency was noticeable in the afternoon session but towards the close the losses have been more or less regained. Gold ready closed at Rs. 42/6/3, First Settlement at Rs. 42/7/3 and Second Settlement at Rs. 42/8/3. The London price for gold has remained unchanged at 168s.

TEA

SALE No. 32 was held on 18th February, 1941, when only teas for internal consumption were sold, 16,480 packages were sold at an average price of As. 4-2 as against 19,520 packages (Sale No. 34) at on average price of As. 3-8 last year. All grares had a good enquiry with prices well maintained. A slightly higher level was maintained for well-made tippy teas and best liquoring Fannings.

QUOTA

THE export quota was quoting As. 9-6 nominal. The export quota for 1941/42 was quoted at As. 6-9. Internal quota was done at As. 1-3 to As 1-6.

Final auctions of export teas and dusts will be held on 24th and 25th February, 1941.

WHEAT

Calcutta, February 20.

The Karachi Wheat market struck a bad patch early this week. The lower advices and heavy selling by holders and Punjab commission houses caused a sharp break in prices early this week. The absence of any large government buying and the favourable prospects for the new crop have induced holders to part with their holdings. Hitherto, ryots in the mofussil centres were inclined to keep back their stocks in the hope of getter higher prices on large government buying. But with the improving prospects for the new crop ryots have grown tired of waiting and there has been a general tendency to take advantage of the premium for old crop positions. The rush for selling has, therefore, resulted in a substantial decline in rates. Only towards the close there has been a feeble rally on Bombay buying. While quotations are slightly above the lowest levels they are considerably lower than the quotations at the end of last week. Choice White ready after being lower at Rs. 27-14 have closed at Rs. 28-4. March were Rs. 28-7 and July Rs. 26-13-6. The quotations at the end of last week were Rs. 32-3, Rs. 31-11-6 and Rs. 28-3-6. It will be noticed that the decline in the quotation for ready is four points while that for July is only one and a quarter points. It will be noted at the same time that the quotation for both ready and March are at a level.

In the Calcutta market too weak conditions have been noticeable. With no signs of an increase in the demand for flour and flour products the quotation for Cawnpore and Punjab has come down to Rs. 3-12-6 from Rs. 4.

MADRAS GROUNDNUTS

THE market in Madras ruled quiet during the week, and a definitely easier tone developed towards the close. It is reported that the Ministry of Food was interested in about 5,000 tons kernels for shipment from both the East and West coasts. Business during the week was negligible on account of poor buying by 'offices.' There was some local buying by Rangoon shippers earlier in the week, but latterly there were no enquiries from that quarter. It is reported in well-informed circles that the forthcoming conference at Delhi pertaining to the Groundnut trade will consider in addition to the plan to restrict the acrage under the crop, a proposal for the purchase by the State of the surplus left over in the 1940-41 crop, it being estimated that out of the approximate yield of 2,300,000 tons a surplus of about 1½ lakhs of tons will be left over, after taking into account exports to the United Kingdom, local consumption and the requirements for seedlings. It is felt that an immediate purchase of about 50,000 tons by the Government would have a heartening effect on this sluggish market. Shippers' buying limits opened on Tusday last around Rs. 20-12 to Rs. 20-15 for Machined (Per candy of 531 lbs. ex-coast godowns), and declined steadily to Rs. 20-4 and Rs. 20-8 and Friday and to Rs. 19-12 and Rs. 20-5 this morning. Local buyers' limits opened on Tusday last around Rs. 20 to Rs. 20-8 for Machined (Per candy of 531 lbs. ex-Madras harbour godowns), and eased to Rs. 19-12 and Rs. 20-2 on Friday, to Rs. 19-12 and Rs. 20 yesterday and to Rs. 19-8 and Rs. 19-12 this morning. It is significant that prices have now slumped below the twenty rupee mark. There is good demand for oil, and despite the weakness in the kernel market, oil prices are steady.

MADRAS HIDES AND SKINS

THE stalemate in the local Tanned Hide and Skin market continued during the week. Enquiries that were rather free in the previous weeks have been slackening since Monday last, and the business done is negligible. Despite the shipping difficulties buyers in Britain were prepared to accept offers at the schedule prices for April/May, but both shippers and dealers in Madras are not disposed to extend their commitments in view of the prevailing uncertainty in the matter of shipments and their accumulated stocks for which financial accomodation has to be obtained. Indeed, a prominent European shipper has received cable advice from his London friends to stop all business in Hides pending clarification of the situation as regards shipping space in the coming months. No definite news as regards shipping space for Hides even in march is yet obtainable, nor has any encouraging reply come through from the authorities in responses to the appeal of the local Trade associations in the matter. The local representative of the Ministry of Supply who met the representative of the Madras Hides Trade in conference on Wednesday last had precious little to say about the possible solution of the shipping scarcity at an early date. The only tangible result of the conference was the news that 7-7½ lbs. Kips in all grades excepting Interiors and 15/16 lbs. Kips Run have been removed from the Non-priority list and added on to the Priority list. It was also announced that orders for Non-priority goods accepted on and before the 10th January 1941, when the communique on Priority list was issued, would be allowed to be shipped in due course. To a representation that Government must take over and finance the holdings of the traders, the local representative is reported to have advised the shippers to lodge their goods in the Port trust godowns to facilitate allotment on an equitable basis and added that he was not in a position to give any assurance as regards Government financing of the goods. It is understood that the local Hides and Skins Association has telegraphed to the Honourable the Commerce Member to the Government of India for an appointment to receive a delegation from Madras to represent the grievances of the trade in person.

(*Continued from page 341*)

cism of the Congress policy of absolute and uncircumscribed non-violence. If a reply is due to pointed and bonafide criticism, then *Indian Affairs* calls for it far more than the article in the *Times of India*, which lacked the essential basis of any discussion, understanding, if not acceptance, of the premises of the other side. And yet, the "Open Letter to Gandhiji" which *Indian Affairs* published drew but a postcard from the Mahatma; and its criticisms of Congress policy, which, unlike other criticisms, are based on the acceptance of non-violence as a social principle, have met with utter indifference. The Mahatma is eager to give *The Times of India* the inestimable advantage of carrying a special from his pen; but he would grudge Indian papers the compliment of legitimate notice! The moral is simple, that the Indian public and public men are slow to realise that they have a part to play in strengthening the Indian press. They seem hardly aware of its existence except when they sound the call for its self-immolation.

Great institutions do not run of their own accord even after they are firmly established. Their smooth functioning is dependent on the personal factor. Fortunate as the Central Bank has been in its founders and chiefs, it owes something to the trained personnel, imbued with the traditions of quarter of a century, men who made the traditions and uphold it. I don't know if the new title General Manager adds to Mr. H. C. Captain's importance ; but it is a mark of recognition for which his admirers and friends should feel glad. The additional importance of one long in a key portion can be gauged by the adoption of a title similar to those of the chief executives of the big British banks. The composite and unwieldy directorate is unknown in India, but the trained superior executive, responsible for policy and administration, has its counterpart in men like Mr. H. C. Captain who has been a skilful pilot in times which call for something more than the ability born of experience.

An example characteristic of the practical philanthrophy for which Cawnpore's leading citizens are famed is the starting of work on 15,000 garments to be given by Mr. H. G. Misra to the fighting forces and to the victims of air raids in Britain. None will fail to note the generous way in which Mr. Misra of hosiery fame shares his prosperity with others less fortunate. About the contribution of his factory to war work of all descriptions the Governor of the U. P. said very handsome things last week when he went and saw what was being done in what was once among the smaller but is now among the bigger and best-known of Cawnpore establishments. The war has multiplied the labour force and raised the average efficiency of all men in the Misra Mills. That is not the least of the services performed by a factory that has been on active service from last year and can claim a record of good work well done. It is not as well known as it deserves to be that Mr. Misra has engaged with great success in a great deal of pioneering work in behalf of the Supply authorities, work which has been fully appreciated and further encouraged.

'EAVESDROPPER'.

(*Continued from page 348*)

zens, there is a belief that the League will lose more adherents. At any rate, many will refuse support to the claim for a third of India to be placed under Muslim control.

The Bombay Government is considering the grant of a special wartime allowance to low-paid employees. The Bengal decision regarding the grant of Re. 1 to employees getting less than Rs. 30 per mensem may have no bearing, but findings of the Court of Enquiry which examined the G.I.P. railwaymen's claim for a dearness allowance must have considerable weight. The question is not a pressing one, but an announcement is expected when Mr. Knight returns from tour. As Bengal has shouldered additional expenditures to the extent of Rs. 8 lakhs, per annumn, Bombay too must do justice by the lowpaid servants of Government. A plan for giving the allowance is known to be ready, and only the details have to be settled.

DEAL WITH YOUR OWN BANK

WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

WITH the budget announced this evening, this column must needs deal with the implications of the budget proposals so far as the various sections of the money market are concerned. First, as regards monetary conditions: Sir Jeremy Raisman has reaffirmed that the settled policy of the Government is cheap money. There need, therefore, be no apprehension that the age-old deflationary bias of the monetary authorities will have anything like free play, while war conditions necessitate an alignment of the Indian money market to the form and structure of the London money market. There should be no difficulty for the Government to pursue a cheap money policy. Thanks to satisfactory realisations from the Defence Loans, the Finance Member is able to announce that he can do with a smaller floating debt. The Treasury bills in the hands of the public show a definite shrinkage; and it is no matter for surprise that the Government are able to secure their three months accommodation at less than roundabout ¾ per cent. per annum. The real snag in this regard is the likelihood of the Government coming out with large loans for taking care of the sterling debt redemption. But the point to emphasise here is that larger and larger borrowings by the Government need not necessarily be a bearish factor if only each loan is fashioned on scientific lines. We have every reason to hope that the rupee loans in the present regime will be planned on such lines as to maintain the integrity of the Government's credit and make it possible for the cheap money policy to be continued.

We are not exactly happy about the proposal to give the Reserve Bank the rupee counterparts of the sterling loans. But we take comfort from the observation of the Finance Member that the full details of the scheme could be worked out only after we know where we stand in regard to the various categories of holders of the redeemed sterling stocks.

We may now turn to a detailed consideration of the ways and means budget, which provides the highlight of the 1941-42 budget. It is natural that it should be so when defence expenditure is running at Rs. 25 lakhs a day and nearly three-fourths of the new defence expenditure is being financed from borrowings. In addition, there is the big sterling repatriation deal to be put through next month. Rarely has the ways and means budget been so important to the giltedged and money markets. It redounds to Sir Jeremy's credit that his financial policy is founded essentially in conserving and enhancing the credit of the country. Facts are witness that the Finance Member's policy in this regard is abundantly justified by results. The rupee giltedged market, despite the incessant drafts on it, has forged ahead so far in fine style.

The loan programme in the past and the present year is naturally merged in the borrowing operations through the First Defence Loan in the first instance; and, after 1st February, the Second Defence Loan. The former netted Rs. 45 crores in all, of which Rs. 31½ crores were tendered in cash (through the Six-year Defence Bonds, Ten-year Defence Saving Certificate, Interest-free Bonds), the balance representing conversions of the 5 per cent. 1940-48 loan into the new loans. The success of the first *tranche* of the Defence Loan was reflected in the lower issue price of the Second *tranche*, and the strength of India's financial credit is reflected in the fact that the total receipts through the Defence Loans were over Rs. 50 crores in eight months. Even more intensive mobilisation of the country's earnings is, of course, necessary and the setting up of the Defence Savings Provident Fund for the Government servants and the opening of the new scheme of Post Office Savings Bank Accounts, etc., are measures calculated to swell subscriptions to the defence loans. In 1941, the 3 per cent. Bonds in which the outstanding balance is Rs. 10.67 crores will have to be redeemed, but its repayment can be little more than a flea-bite. The Defence Loan will tend to overshadow every factor, as indeed it has done already. For instance, the Finance Member expects, despite the increase in defence expenditure and the heavy outgo from Postal Savings Banks and Cash Certificates which would ordinarily have necessitated a large expansion in the floating debt, a reduction in the volume of Treasury Bills outstanding by about Rs. 8 crores in the current year alone. How serious were the panicky withdrawals from postal savings banks may be gathered from the increased provision in the budget for net repayments of Post Office Cash Certificates from Rs. 1½ crores to Rs. 10 crores, and a net outgo of Rs. 19 crores under Postal Savings Banks deposits, both in the current year. Moreover, the popularity of the Cash Certificates must be less as a result of the advent of the more attractive Defence Savings Certificates. These withdrawals were offset partly by the good response to the defence loans, and partly by the payment of Rs. 12 crores by the Reserve Bank when it took from the Government the silver rupees and the one-rupee notes. The reduction in the volume of Treasury Bills outstanding must tend to keep the money market easy; indeed, the whole financing policy rests on cheap money sentiment being assiduously helped and fostered. Also, as a fresh bout of lack of confidence is very unlikely, it is on the cards that postal savings, too, may show a rise. Judged, therefore, by all these ordinary criteria, ways and means conundrums should be few and far between.

We now come to the sterling exchange position which, thanks to the war, is one of impregnable strength. The steady improvement in the country's balance of trade enabled the Reserve Bank to purchase £47 millions in the ten months of 1940-41. The large payments made, and still being made by the British Government towards the cost of war supplies and war expenditure in their behalf are an important factor. In fact, the ordinary

TREASURY BILLS

India

Tenders for Rs. 1 crore of three months' Government of India Treasury Bills were opened on Tuesday February 25, 1941. Total amount offered was Rs. 2 crores, 74 lakhs and 25 thousand. Tenders at Rs. 99-13-3 per cent were accepted in full and those at Rs. 99-13-0 per cent were allotted approximately 16 per cent. Total amount accepted was Rs. 1 crore, the average rate of accepted tenders being annas eleven and pies four per cent per annum.

Tenders for Rs. 1 crore of three months' Government of India Treasury Bills will be received on Tuesday March 4, 1941. Successful tenderers should make a payment on Friday March 7, 1941. Other conditions are as usual.

Three months' Intermediates will be sold from February 26, 1941 to March 3, 1941 at Rs. 99-13-6 per cent subject to the conditions previously announced (viz. sales can be stopped at any time without previous notice if Government think it necessary).

Three months' Intermediates sold from February 19 to February 24, 1941 amounted to Rs. 2,33,50,000.

MISRA HOSIERY
MILLS
CAWNPORE

Telegrams: MISRA, Cawnpore Telephone: 2336 Cawnpore

THE MISRA HOSIERY MILLS have, from the commencement of the war, been "on active service". Working day and night, the mills have been supplying essential requirements of the Army in the knitting line.

MISRA HOSIERY cater to the requirements of the general population and comprise socks, stockings, undervests, sports shirts, interlock underwear and outerwear, for men, women and children.

Production 8,000 Articles, daily.

Finance Abroad

In discussing the effects of the huge sterling debt repatriation scheme, announced by the Government of India, on the structure and functioning of the London money market, we had occasion to notice a sharp rise in the quotation for 3½ per cent. India sterling stock. As soon as the announcement was made, this undated stock appreciated by about two points. Since then, further rises have taken place and it is now being taken up to par, the present quotation being £99. To what extent the commandeering of the six terminable loans of the Government of India will aid the British Government in its financing operations cannot be outlined with any certainty. For one thing, the precise extent of the holdings of the United Kingdom residents of the India sterling stocks are not known; and only to the extent that cash in payment will be necessary will it at all affect the amount of credit in supply in the London money market. We may, however, proceed upon the assumption that, when the Reserve Bank of India uses the Rs. 66 odd crores of its sterling balances in London, its effect upon the acuteness of competition for London Treasury Bills is bound to be felt in due course. Except for the tiny amounts required by the Secretary of State for India for day-to-day purposes, nearly the whole of this amount was being utilised for investment in London Treasury Bills. In the past year, a feature of the money market has been the high degree of competition offered by the dominion and colonial governments' sterling pools for the Treasury Bills tender. In the result, the London discount houses have often been obliged to be content with less than their accustomed share of bills. The lessening of competition which must follow in the wake of the sterling redemption becoming a *fait accompli* will, therefore, be hailed by the discount houses with some relief.

It is, therefore, extremely probable that the short-term money market in London may have to carry on without the funds hitherto available from this source. Whether this cash release of the sterling equivalent of the Rs. 66 crores of India sterling balances will have any appreciable effect on interest rates in Britain is more than anyone can say. Ever since the sterling redemption scheme was announced, the Indian undated loans have been experiencing keen demand, which is no wonder since these stocks yield much more than existing British securities. Hence, even cash payment of British holders of Indian undated sterling loans may not have any effect upon interest rates, though it may conceivably have the effect of bringing down the spread in the quotations for India sterling and British sterling securities.

It is very significant that the reactions of the London financial press in general to the British *order* for compulsory handing over of India sterling stocks, now due to be repatriated, have generally been unfavourable. A common line of criticism of investors as well as of the financial press seems to be that loans already repayable, that is undated stocks, ought to be selected instead of bringing the British Treasury to enforce the premature redemption of "those (stocks) which brought the greatest immediate savings to the borrower without consideration of his contract with the lender." Even such a liberal paper as the *Economist* is found to align itself with this sort of criticism against the financial deal. It is only the *Financial News*, always noted for the catholicity of its views and the boldness of its outlook, which has had something to say in favour of the compulsory sterling redemption scheme. The paper adduces arguments other than the "blanket" argument that, in wartime, the individual must bow to the necessities of the State. In fact, the Defence (Finance) regulations of 1939 provided explicitly that the British Government could prohibit "dealings in securities which in the opinion of the British Government are likely to be marketable outside the United Kingdom." The *Financial News*, therefore, concludes that, in this instance, there is no question of criticism because "there is nothing to criticise." Another important point made out by the paper is that the payments due to be made to holders of these dated stocks are considered to be "fully adequate, if not generous." This precisely is the standpoint taken by INDIAN FINANCE; and in our leading article on this subject a fortnight ago, attention was drawn to the fact that this country would have benefited much more if the scheme had been put through even a year ago as was first urged in this journal. The appreciation in the value of these sterling stocks over the past year will, by any impartial judge, be considered to be quite sufficient inducement to enable the British holder of these stocks to waive the original conditions in the contract. It seems a pity that even papers of the liberal tradition should have taken the view that the British holder has been deprived of an important right, a view, which, in fact, amounts to one of acquiescing in fleecing the Indian tax-payer.

(Continued from page 375)

sterling requirements of the Secretary of State in the current year are expected to be only £1 million, while, in the next year, far from India having to remit to the Secretary of State, a refund of £26 millions is actually expected. In any case, the accumulation of sterling to the Reserve Bank, even after the redemption of the terminable portion of the sterling debt, must, so long as the war continues, be on a scale sufficient to replenish sterling balances in London, and, hence, to help in further redemption of sterling loans. The rate of acquisition of sterling balances may be guessed from the fact that, where Sir Jeremy himself had anticipated last year sterling remittance of £11 millions, he now expects sterling requirements, after the redemption scheme, to be just £1 million. At this rate of accumulation, the chances of India being able to repay the whole of her sterling debt must be deemed to be extremely rosy. That would be a consummation which would raise the credit of India sky-high and which is bound to exert its beneficent influence on Indian giltedged. Already sterling interest charges in the past six years have been halved, and as repatriation progresses, the saving on this account must increase.

The influence of the budget on rupee giltedge must be deemed to be favourable, if for no other reason than that India's credit would go up tremendously as a result of £90 millions of sterling repatriation. The machinery to be instituted for financing that operation and to prevent undesirable repercussions need not concern us here. Rather we are more more concerned, for the nonce, with the replacement of sterling by rupee obligations. The Finance Member has said that the scheme of creating rupee counterparts will be persisted with—that is, the *status quo* will be maintained as an *interim* measure. We are glad to note the tentativeness evident in this.

The Reserve Bank's tap rate for sterling is 1s. 6d., all through for six months.

Banks were sellers of T.T. at 1s. 5 31/32d., all through for six months; banks were buyers of T.T. at 1s. 6 1/32d., for six months.

Three months' D. A. bills were quoted: 1s. 6 7/32d., for the first month; 1s. 6 1/4d., for the second month; 1s. 6 9/32d., for the third month; and 1s. 6 5/16d., for the fourth month.

Inter-bank call money quoted ½ per cent. nominal in Calcutta.

The Central Budget

INDIA'S second war budget is a performance for which Sir Jeremy Raisman may justly hold his head high. Despite room for grousing here and there, not all of which is justified, the country will receive the budget with a feeling of relief which, with some reflection, can well develop into one of satisfaction. Though the present budget is the second since the outbreak of war, it is, strictly speaking, the first budget which reveals military expenditure on a war scale. Public anticipations of large scale deficits had led to apprehensions of drastic new taxation. Sir Jeremy had never sought to allay these apprehensions by holding out false hopes. With the danger of war looming ever larger, and the increasing costs of raising the level of defence equipment, there was no doubt the level of expenditure would be steadily rising. The development of our public finance had left little of fresh sources for new taxation. In these circumstances, the feelings about the new budget may be easily imagined. It is to the credit of Sir Jeremy Raisman that he has disarmed most of these fears without detriment to the soundness of his financial policy. In the conditions of the present, the results of the three years covered by the present budget must be deemed heartening. A surplus of Rs. 7.77 crores for 1939-40, a deficit of Rs. 8.42 crores for the current year as against the November estimate of Rs. 18 to 15 crores and a deficit on the basis of existing taxation of Rs. 20.46 crores, of which only Rs. 6.61 crores is to be met by new taxation, all this represents an achievement of which the Finance Member may well feel proud.

It might be thought that new taxation is not difficult to avoid, when so large an addition as Rs. 20 crores to the unproductive debt is not viewed askance. The critical nature of the present times and the new expenditure that has been incurred or provided for are sufficient answer to such a suggestion. But there has distinctly been more in Sir Jeremy's stewardship of India's finances than what is suggested by the reference to the unsettled conditions of the present or to the increasing demands that are made by defence requirements on India's finances. Before estimating the special features of Sir Jeremy's financial policy, it is necessary to go in some detail into the financial experiences and anticipations of the three-year period covered by the present budget statement. As pointed out earlier, the financial year 1939-40, which was expected in the revised estimates to end in a surplus of Rs. 91 lakhs actually left a far larger surplus of Rs. 7.77 crores as a result of an improvement of Rs. 6.81 lakhs in revenue and a reduction of Rs. 5 lakhs in expenditure. The improvement in revenue was due to the fact that customs revenue recovered to its previous level after the sharp fall that had occurred towards the outbreak of war and was abnormally high towards the close. There were also large receipts from abnormal stock clearances of salt resulting in an increase over revised estimates of Rs. 1.86 crores. Increases under small coin of Rs. 87 lakhs and under Railway contribution of Rs. 72 lakhs and in income-tax of Rs. 107 lakhs have also contributed to the gratifying result. Though, in the present conditions of the war, the provincial finances call for less attention, the increase in the income-tax payable to the provinces from Rs. 288 lakhs to Rs. 283 lakhs may be noted with some satisfaction.

As for the current year, the revised estimates for revenue showed a net improvement of Rs. 421 lakhs as compared with the budget estimates even excluding the additional Rs. 6.86 lakhs which the increase in the previous year's surplus, effected in the revenue reserve fund. But revised estimates for expenditure showed a net increase of no less than Rs. 19.54 crores of which Rs. 18½ crores are on account of the defence services. Even the Rs. 104 lakhs of increase under civil estimates is mainly on account of schemes connected with the war. Thus, while the budget estimates provided for a nominal surplus of Rs. 5 lakhs, and the revised estimates of November anticipated a deficit of Rs. 13 crores without taking into account the revenue from fresh taxation, the deficit for the current year is now estimated at Rs. 8.42 crores. The decline under customs revenue now seems to have been larger than was originally estimated. In the revised estimates, it is now put at Rs. 37.75 crores against Rs. 39.16 crores in the budget estimates and the actuals of Rs. 45.88 crores for 1939-40. Under excise, there is a drop of 2.1 crores under sugar. Salt revenue is expected to yield half a crore more than the budget estimates. For these disappointments, railway earnings have made up to a considerable extent; and the sum the railways are expected to pay the Central Revenues is Rs. 7.15 crores, which, with the additional refund of Rs. 2.81 crores is Rs. 4.65 crores more than was provided in the budget estimates. Other increases are Rs. 92 lakhs under currency and Rs. 65 lakhs in the surplus of the posts and telegraphs, while taxes on incomes show a rise of Rs. 3.30 crores, part of which goes to increase the share of the provinces from the budget sum of Rs. 3 crores to Rs. 3.73 crores. It may be mentioned in passing here that owing to the slow progress of the preliminary work in connection with the E.P.T., the actual results in the current financial year are not expected to exceed Rs. 2 crores and a substantial portion of the original estimated receipts for 1940-41 amounting to about a crore, will go to swell the collections of 1941-42.

On the expenditure side, the budget estimate of Rs. 53½ crores for defence during 1940-41 is now expected to be exceeded by at least Rs. 14½ crores. The revised civil estimates for the current year are put at Rs. 40.11 crores as compared with Rs. 39.07 crores. With a net defence expenditure placed at Rs. 72.02 crores, total expenditure is estimated at Rs. 112.13 crores as against the total revenue of Rs. 103.71 crores. The deficit for the current year may, therefore, be put at Rs. 8.42 crores. If it is remembered that the amount provided for the reduction or avoidance of debt is Rs. 3 crores, the net addition to our indebtedness at the end of the current year will be only of the order of Rs. 5½ crores.

As regards the budget year 1941-42, total revenue estimates on the basis of existing taxation amount to Rs. 106.39 crores as compared with Rs. 103.71 crores of the revised estimates of the current year. Though there is no balance in the revenue reserve fund, the difference of Rs. 7.77 crores on this account is more than made up by the first full year's receipt from the Excess Profits Tax and the central surcharge imposed last November. Revenue from customs duties is put at Rs. 3 crores less at Rs. 34.75 crores. Excise duties show an increase of Rs. 1.75 crores, almost entirely on sugar, while the central surcharge is expected to produce Rs. 5.68 crores. The E.P.T. is to yield Rs. 8½

crores, inclusive of a carry over of Rs. 1 crore from the current year. The share of the Provinces in the income-tax, it is hoped, will reach the figure of Rs. 4.46 crores, as compared with Rs. 3.73 crores under the Government's share of the Reserve Bank's profits, while, at the same time, there is a decrease of Rs. 1.21 crores in mint receipts. The revenue from Posts and Telegraphs is expected to be Rs. 13.49 crores and expenditure Rs. 12.09 crores. On the expenditure side, the appropriation for defence is put at Rs. 84.13 crores as compared with Rs. 73.02 crores for the current year. Increase in civil expenditure over the current year's revised estimates comes to Rs. 2.61 crores. The result is that total expenditure amounts to Rs. 126.85 crores, against Rs. 106.39 crores revenue and the deficit on the basis of the present taxation, comes to Rs. 20.46 crores. The Finance Member, as has been hinted at the start, proposes to meet only Rs. 6.61 crores of this deficit by the levy of new taxation, leaving the balance of Rs. 13.85 crores as an addition to our unproductive debt. The new taxes now proposed and the yields expected from them are as below:

(1) The excess profits tax is to be increased from 50 to 66 2/3 per cent. to yield Rs. 2.5 crores.

(2) The surcharge in income-tax and super-tax to be increased from 25 per cent. to 33 1/3 per cent. to yield Rs. 1.9 crores.

(3) The excise duty on matches to be doubled to produce Rs. 1.5 crores.

(4) The import duty on artificial silk, yarn and thread to be increased from 25 per cent. *ad valorem* or 3 annas per pound whichever is higher to a specific duty of 5 annas per pound to yield Rs. 36 lakhs.

(5) A new excise duty of 10 per cent. **ad valorem** on pneumatic tyres and tubes to yield Rs. 35 lakhs.

(6) In regard to ways and means position, Treasury Bills outstandings are to be considerably reduced; the remittance programme has now been reduced to almost nothing.

It is always too much to expect that proposals for new taxation will meet with unanimity of support. Those who are directly affected must perforce be loudest in their protest, if only with a view to correct a possible feeling that no revenue can be tapped from the same source in the emergencies of the future. But so far as the proposals now made are concerned, the appropriateness of war profits for specially heavy taxation to meet the expenditure caused by the war must be deemed to be axiomatic. At the time the E.P.T. was first introduced, we had little hesitation in pointing out, despite our opposition to the inopportuneness of the measure at that time, that we would be prepared to support an even higher level of taxation under this head. Now that the exigencies of the war necessitate a higher, increasing, and even at this stage, indefinable outlay on defence equipment, it would be hard to find any reason for opposing the enhancement of the rate of taxation on excess profits. The other items may be deemed to be on a slightly different footing. In so far as the increase in the Central surcharge and the excise duty on tyres and tubes are a taxation of the richer classes, opposition to it will find it difficult to adduce any broad public spirit or principle in its support. It is only in respect of the duty on matches that one might wish that the Finance Member had turned elsewhere for this small amount of additional revenue. Here too, the moral, if not exactly the fiscal, value of a mode of taxation that enables all classes to contribute equally to the public exchequer may be cited in support of the new proposals.

But the special merit of Sir Jeremy's financial policy during the last two years and more may, nevertheless, be said to lie outside the scope of the calculations that enter into the framing of the budget at budget time. Sir Jeremy has been long enough in office to enable an estimate of the main principles that have guided him in the particularly difficult task he has had since he succeeded Sir James Grigg. It was not long after his assumption of office before it became clear that the new Finance Member would have to find ways and means of financing what is undoubtedly the costliest war in history and at a time when the various developments in the sphere of India's public finance had practically dried up all available springs of public revenue. As we understand it, Sir Jeremy has, from the beginning, been quite clear in his mind that the sheet anchor of financial policy during his regime must be a sound credit policy which can, on the one hand, effect considerable savings in current expenditure on account of interest charges and, on the other, conserve the credit of the Government so efficiently that the Government will face with equanimity the large demands that the war of the Empire with the totalitarian countries might make on the resources of the Indian Government. Sir Jeremy has also taken care to ensure that the only other fruitful source of public revenue, namely, the railways make their due contribution to the Central Exchequer in these trying times. If in the present budget new taxation to the extent suggested by the increased outlay on defence has been avoided, it is largely because the Railway contribution has been brought up by various measures to a level which we dared not dream of a few years ago. For our part, we attach more value to what Sir Jeremy has left undone than for what he has done. From the time of the outbreak of hostilities in Europe, we have been insisting, at every suitable opportunity, that nothing can be more harmful to our financial policy than a pharisaic horror of deficits. That at the present juncture Sir Jeremy should have summoned courage to allow an addition of nearly 20 crores to our unproductive debt without half-baked ideas of new taxation is a matter which may not be as fully appreciated as it deserves to be. With the repatriation of a large part of our sterling debt and the decrease in interest charges and our comparative independence of foreign obligations, and what is most important of all, with so large a part of our public debt in the shape of productive assets, the Central Government is in a position to face any demand that a mad and troubled world might make on its finances in the years to come.

Banks and Industry

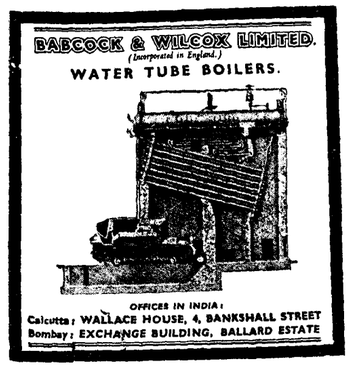
SINCE the Banking Enquiry Committee's report on the need to stimulate saving, reduce indebtedness and divert funds to industry, there has been in India an unmistakable though unexpressed desire, both for changes in the banking system and the establishment of new State-sponsored institutions entrusted with the task of encouraging new industries with financial assistance. The problems of industrial finance have been separately examined and the appearance of a special report prepared last year by the sub-committee of the National Planning Committee merely served to remind the country that industrial development is largely a function of the State, the banking system and entrepenurial ability. While everybody recognises that the managing agency system discharged its responsibilities efficiently in the pioneering days, it is now argued by some that the system has its flaws, retards the development of true financial democracy and is hardly equal to the tasks of the future. But the system is neither effete nor decadent and industrial development, during and after the war, will not be altogether independent of it.

As the flotation of companies in the recent past indicates, there has been no break with the past as managing agents are generally retained by new enterprises. Technical and financial assistance, such as can be had of the managing agents, makes the new companies keep to the old well-tried system. Except insurance companies which have to dispense with them under the Act of 1938 most new concerns are hardly in a position to stand without their assistance. The provision of working capital, the furnishing of debenture capital, the placing of shares and the giving of a guarantee in regard to bank loans are among the functions assumed by the managing agencies in many cases. These are always important since under-capitalisation is a mark of many industries and enterprises in India, and the managing agent is often called upon to help with loans or procure loans from others, sell goods and wait for profits. The actual incidence of the system on the industrial organisation has been studied more than once, and in spite of the burdens placed on companies, the services of the managing agents have been

commended. It has, however, been pointed out that companies must be freed from the shackles of a system that diverts a part of the profits (other than the residue assigned to managerial ability) to the managing agent and weakens the position of the shareholders as against the men in control. It has often been said that a system of mixed banking, such as prevails in many European countries could be successfully adopted to Indian conditions in view of the managing agency and reliance thereon for funds and Indian universities favour a departure from orthodox commercial banking. Yet Continental banking methods have not been blameless nor have they been wholly beneficial in their effects. If German industry recovered after the inflation crisis it was due to foreign loans and sound government, not to the further modification of banking methods in the direction of increased assistance to industry. Nor can we dissociate reparations from the recovery made by French industry, though the rapid collapse of France in 1940 suggests that the alliance between finance-capital and industry has been as dangerous to the State as to the working class. The practices favoured in Belgium and Italy in the past have necessarily been influenced by French and German examples and here, too, one may mention the infiltration of Fascist principles into the body economic as in the body politic.

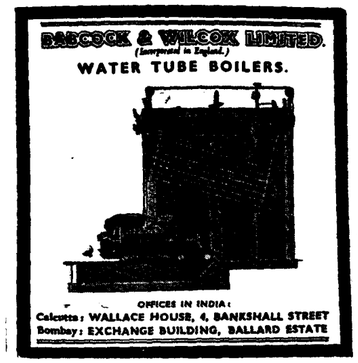
Though generalisation is undesirable, it certainly seems that too close an alliance between banking and industry altogether magnifies the influence of financial institutions and increases also the risks which the latter run. Considerable light is thrown on the problem as a whole by a recent article of Mr. Mulky in the Journal of the University of Bombay. He connects popular misconceptions and removes lingering prejudices against the current policy of restricted aid on the part of Indian banks to industry. The seeds of the crisis of 1931 were sown by the too intimate association of European banks with individual enterprises and a banking crisis was as much a mark of the Great Depression as of the Crisis of 1907. And it will occur to many that the banking crisis in the U. S. A. was due not so much to plurality of banks or freezing of assets, as of too generous lending on securities originated by investing trusts allied to the banks. And the most important reforms of the Roosevelt era relate to the strict delimitation of functions, divorcing wholly the issuing and underwriting functions that too many financial institutions were apt to assume in spite of inexperience and ignorance. Jointstock banks were apt to invade the field of private banks though it was unusual in Europe. The Glass-Steagall Act and the Securities Exchange Act alike have restricted the interest of such institutions in industry and investment with consequences that are wholly salutary. Such a conclusion may seem very harsh doctrine but its correctness will not be doubted. Whatever may have been the justification for German banks to take a greater interest in industrial ventures, than is usual, it was not without adequate safeguards. That the latter proved unequal to a crisis does not mean that they were ineffective.

The banking syndicates which took up the new issues and distributed them to the public in Germany assumed the functions of the specialist issuing and underwriting houses. Here the bank was an intermediary rather than a capitalist and the general policy of German banks was to avoid long-term commitments. In regard to working capital, the German banks encouraged their clients by providing funds in the first instance, and arranging for a new issue of shares later on. This again is of dubious propriety by ordinary standards, and the provision of new capital is the duty of more specialised institutions though it must be recognised that in Britain too during the postwar period, there has been a break with the past, as is implied by the establishment of the Bankers Industrial Development Company. That banking interests are not too careful of the interests of the common shareholder is proved by the experience of Richard Thomas, and the last meeting of shareholders was notable for more than one expression of disappointment and anxiety as to the riveting of new fetters on the Company by the financiers and by the rivals in the iron and steel industry. The melancholy experience of Richard Thomas may be peculiar to that Company, but it illustrates the hazards of divided control. While on the subject of German banks, it is well to point out that they were in the habit of appointing supervisors on the boards of the companies they helped with capital. Moreover, German banks relied to a much greater extent than British banks on their own capital. In this connection, it is proper to point out that Indian banks, even the oldest and soundest ones, do not have a larger capital than is needed in relation to deposits and the security of depositors must be the prime consideration unless some other superior authority proposes to ensure the safety of depositors' capital.



Students of banking have long emphasised that the cash ratio of the German system was lower than the normal ratio of about 10 per cent in Britain and this was a disturbing factor at critical times. If the leading Indian banks preserve a cash ratio of over 15 per cent, at most times, the ratio is essentially dictated by circumstances. Unless Indian banks increase their own capital they can hardly forge strong and permanent links with industry and cannot embark on a policy of reducing the security to which depositors are entitled. Any such reduction of security will militate against both the growth of savings and the spread of the banking habit.

It has been justly pointed out that unless India enjoys the peculiarly favourable combination of circumstances which Germany enjoyed after the Franco-Prussian war, there cannot be similar success for what is called 'mixed' banking. The success of new, original methods of production was more directly responsible for the economic development of Germany than banking assistance. The perils of 'mixed' banking have been apparent even in Germany, though it may be urged that it was the increase of short-term foreign deposits that accentuated the inherent vulnerability of the system.



In the post-war period, industrial progress in Germany was a consequence of rationalisation and trustification rather than of the capital put up by banks and it is admitted the chronic shortage of capital embarrassed industry as much as the banks which were forced to help industry. When industry was caught in the depression, the banks were involved, and it is only necessary to emphasise the fact that Indian banking has, during the depression and the equally critical war period, experienced nothing like a shock because it preserves a high degree of liquidity. This would be irretrievably compromised by the locking up of assets in industrial securities, and once the investing public loses faith, neither pure nor mixed banking can thrive.

This discussion while it reinforces the arguments for caution does not imply that there is no place for a special financing corporation. Official reports have more than once endorsed the suggestions for a special type of industrial bank (other than a managing agency) and in their absence existing jointstock banks can only sponsor new issues and turn over the shares to the investing public soon afterwards. This is about the only function that can be assumed with safety by banks, provided also that the share capital of banks is substantially increased in order to permit the adoption of a somewhat enterprising and hazardous policy. But the ability of banks to dispose of shares of new companies taken up in the first instance argues also confidence on the part of the investing public and this, the foundation for any bold and adventurous amendment of policy, may be altogether lacking to-day. It is not necessary to refer to the restrictions imposed by the Articles of Association to plead that Indian jointstock banks will fight shy of any risky ventures, and they will naturally hesitate at any time to take the place of merchant bankers who figure among the managing agency houses.

There is however a point that arises in regard to the provision of capital for small and cottage industries. The capital market is too far removed from them and there is admittedly a need for a special credit corporation. In this connection reference may be made to the U.P. Industrial Corporation originally sponsored by the Government. Conversion into a co-operative bank is favoured by the present Government on the recommendation of the Reserve Bank. The move will be deprecated by the shareholders who were originally impressed by the guarantee provision, and it will be difficult to avoid a charge of bad faith. And it must be pointed out that the change of status implied by a conversion into a co-operative bank means that the institution must avoid making long-term advances, preserve ample cash balances and try to attract deposits. Apart from the propriety of setting up any new institution to compete with strong, efficient and worthy rivals, the shareholders of the corporation, however meagre in number, may well argue that they approved only the original proposal to help create a financing agency for such enterprises as could not obtain adequate or timely assistance from banks. It has been reported that legal obstacles will prevent the U. P. Government trying to escape out of the dividend guarantee agreement. It must, in this connection, be observed that to contemplate such a reversal of policy is strange when other provinces e.g. Bombay and Madras have been urged to create on special terms similar industrial credit corporations.

Editorial Notes

Revision of Fiscal Policy

Revision of India's fiscal policy has often enough been urged by many, but when it comes from a person of the authority and experience of Dr. John Matthai, it has a force and weight all its own. Few have better title to speak on the subject. His views, delivered at the Sydenham College of Economics and Commerce Society, have a claim on the attention alike of the Government and the public. Dr. Matthai urges a complete revision of the basis of our protection policy with special reference to existing conditions. The reasons are well-known. First, the Fiscal Commission's recommendations have become effete and obsolete; second, discriminating protection is known to have only discriminated against Indian industries; and the conditions are far too stringent, complex and unworkable. When the war ends, the lot of old and new industries alike will become difficult; and it would be the part of wisdom to examine in advance the lines on which the present protection policy should be revised. The question is one of paramount importance and should be taken up even now. Official utterances so far have been mainly designed to give the assurance that the industries started during the war will not be left high and dry. The point is that it is not alone the new industries but the old ones, too, which will require treatment.

The plight of the sugar industry is a case in point. The sugar producing interests have now been obliged to request the Government to reduce the quantum of protection in the expection that it would automatically check the forces of overproduction now causing chaos in the industry. Thus, a review of the protected industries as well as of the progress they have made under the shelter of protection might well be called for, in trying to fashion a new fiscal policy that will take into account not only the past but the current forces. In addition, there are the industries which have, in a manner of speaking, circumvented the tariff by being established in India, often with the help of foreign capital. The contribution made by these industries to the country's industrial stature is undeniable; but it is also a plain fact that the extreme Left in Indian business resents, not perhaps unnaturally, what it terms these incursions into the field, thereby weakening, to some extent at least, the protectionist forces. Dr. Matthai is, therefore, on good ground in urging that the broad lines of the new fiscal policy should be thought out even from now on. Equally important is his suggestion for the replacement of the Tariff Board by a single Tariff Commissioner, to be assisted, if need be, in the more important enquiries by two other colleagues co-opted for the purpose. This is a step necessary for the speedier working of the machinery of investigation. The tariff enquiries of the past have too often been tedious and cumbrous things of their kind. Such dilatoriness in important fiscal questions can hardly be permitted in the future.

The Coal Trade

The difficulties of the coal trade are perhaps common knowledge, but if any doubts were there, the lack of support for coal shares on the stock exchange and the disappointing trend of the last half-year profits, disclosed by the balance-sheets of the coal companies, might be cited to convince the more sceptical. The situation is such that to talk of a slump in the trade would not be an exaggeration. The piquant fact in this regard is that, while the trade is greatly handicapped by the inability to export owing to lack of freight, the levy of the Excess Profits Duty takes away even the exiguous margin of profits available for distribution. Even so prosperous a state of Railway finances as that disclosed by Sir Andrew Clow last week has not resulted in a more helpful freight policy on the part of the railways towards the coal industry; and the special surcharge on coal freights is still retained. Apart from these, there are the purely internal problems of the industry, which have, from time to time, come to the forefront of public discussion. Coal conservation and sandstowing are even to-day aspects of the trade in which its members do not, by any means, all see eye to eye with one another. Regulation of output is still an ideal, and a depression in the trade gives rise only to fatuous discussion, unattended by any fixed and agreed policy. The importance of conservation is bound to grow in future. There is, again, the age-old question of state-owned *versus* private collieries, in addition to the host of problems which have to be faced for a planned working of the industry. Apparently, it is this multitude of problems which has caused the Indian Mining Federation to address the Commerce Department and urge a detailed enquiry into the condition of the trade. We dare say the Commerce Member's attention is sought to be drawn to many a similar appeal; and not only their numerousness but the exigencies of war make it highly unlikely that such economic enquiries could be instituted. The most interesting point of the present phase of Indian economic life is that almost every limb of it should be facing some bottleneck or other. To postpone consideration of them would be perhaps to have a crushing load later; better far would it be to tackle them one by one even now. The present contains sufficient intimations of the post-war economic confusion to call for an attitude of preparedness and caution from now on.

The Sind Budget

A surplus of Rs. 1 lakh in the 1941-42 budget in a province economically and politically so backward as Sind may not speak much for a forward policy; but, at the same time, Sind has very weighty reasons for budgetary prudence. The province has a huge capital debt of the order of Rs. 2,800 lakhs, (up to March, 1941) and the payment towards the liquidation of the Lloyd Barrage debt alone takes up quite a lot of money. Revenue receipts are expected to be Rs. 4.35 crores, the main feature being increased revenue in land and excise. Subventions from the Central Government and income-tax contributions alone account for receipts to the tune of Rs. 118¼ lakhs. Though the new items of expenditure provide for expansion of education and larger allotments for irrigation, the provisions on capital account still continue to dominate the Sind Budget. A provision has been made for capital expenditure of Rs. 85.42 lakhs and redemption of debt to the Central Government to the extent of Rs. 40 lakhs, of which Rs. 36 lakhs is to be credited towards the Lloyd Barrage debt account. Fresh canal projects and irrigation schemes are being undertaken, and in the current year, the Karo Canal project alone is estimated to absorb Rs. 34 lakhs. It is natural that most of the expenditure should be on irrigation schemes, because the economic future of the province is indissolubly linked with the expansion of these irrigation schemes and the consequent output of larger agricultural crops, notably cotton. In a sense, therefore, Sind is only laying the foundation for a better future, and the budget of these years must be regarded more or less as paving the way for a better and economically richer province.

With regard to the debt position, it is expected that Sind will be able to pay in the next financial year, in addition to interest charges, Rs. 35.97 lakhs towards the refunding of capital. In the current year, she will be able to pay, besides interest charges in full, the sum of Rs. 44 lakhs towards the capital debts. It is noteworthy that, since the beginning of provincial autonomy, the province has liquidated a debt of Rs. 135½ lakhs. Of the total debt of Rs. 2,804 lakhs, no less than Rs. 2,898

lakhs is on the Lloyd Barrage account, while Rs. 406 lakhs will represent the capital expenditure incurred in connection with the other items. No wonder, that, with the weight of the Lloyd Barrage debt pressing upon both the capital and the revenue sides, the provincial budget does not contain much by way of allocation for expenditure on the so-called nation-building departments, which figure conspicuously in the other provincial budgets. The emergence of a surplus is hardly an indication that the general financial position of the province is free from anxiety. The most acute problems will have to be faced from 1942-43 onwards when the debt liabilities will make serious inroads into the amount of funds available for distribution on vital lines of expenditure. Hence the necessity to exercise the greatest caution in planning expenditure of a recurring nature.

Bombay Port Trust

In spite of the setback in general exports, the fillip given by the war is clearly responsible for the rise in revenue revealed by the Revised Estimates for 1940-41 appended to the Bombay Port Trust's Budget. Receipts from the docks, railway and rents have gone up, and an increase of Rs. 24.42 lakhs on the original estimates leaves no room for anxiety although cotton, oilseeds, piecegoods and other exports are likely to fall away rather than increase. In view of the increases recorded during 1940-41 under imports of copra, fuel oil, cotton yarn, Government stores etc., one may say that the volume of trade suffered no great shrinkage and the small increase of Rs. 1.16 lakhs recorded under Expenditure in the Revised Estimates is more than covered by the rise in revenue. The Chairman's note explains that the improvement in revenue is based on the larger handling charges obtained from Government owing to the military traffic. While Calcutta does not derive any such advantage in outward traffic, Bombay, through which troops depart and prisoners arrive, is benefiting to some extent, and war apparently affords adequate compensation for the reduction in exports. This is a conclusion justified by the Revised Estimates for 1940-41 as well as the Budget Estimates for 1941-42. No great variations in trade are expected as is shown by the abstract of the revenue accounts furnished and total revenue is expected to be about Rs. 14 lakhs more than in last year's budget estimates though it will be Rs. 10 lakhs less than the sum shown in the Revised Estimates. The reduction will leave a total revenue of Rs. 245.23 lakhs for the year. Expenditure in 1941-42 will be uninfluenced by the war and the total at Rs. 230.87 lakhs will be only Rs. 1¼ lakhs more than the total estimate for last year as debt charges will fall by Rs. 1.22 lakhs. The surplus of Rs. 14.46 lakhs, resulting from the stability of revenue and expenditure alike, will permit the continuance of concessions to traders and tenants of the Trust, while the 20 per cent. rebate in pilotage fees will work for the benefit of the trade of the port, justified too as the Special Fund has over Rs. 10 lakhs to its credit. The capital works programme was limited to Rs. 6.56 lakhs in 1940-41 as the proposed purchase of the Gun Carriage Basin is to be deferred. The programme for 1941-42 is restricted to Rs. 7.42 lakhs and will be financed out of a loan of Rs. 8 lakhs to be floated. Last year's surplus and the current year's will be retained to augment the Revenue Reserve fund. Mr. Kirpalani's note describes also the reduction in debt owed by the Port Trust to Government and the public. Sinking Fund contributions in the coming year totalling over Rs. 28 lakhs and a reduction of Rs. 22 lakhs in the debt due to Government will reduce the total debt, though the balance of debt due to the public is expected to rise by Rs. 8 lakhs on account of capital expenditure in the next year. The special receipts for the year including interest on sinking fund balances will be over Rs. 28.4 lakhs while all expenditure on special heads is provided for out of interest and the amounts taken out of the reserve funds. While comparisons with Calcutta port may not be on all fours the Estimates indicate that Bombay is relatively better off during the war period and the financial outlook is encouraging rather than otherwise. The debt position, too, is wholly reassuring though the 30 year sterling loan floated in 1922, bearing interest at 6 percent and calling for a provision of Rs. 12.8 lakhs is the largest single issue outstanding. Redemption before the due date may not be impossible though it will be hard on the holders of the stock.

Railway Board's Report

The appearance of the Railway Budget last week confers great interest on the annual report of the Railway Board released on February 18. The railway surplus for 1939-40 was only Rs. 30 lakhs below the full contribution, and a net addition of Rs. 4.33 crores was made to the Central revenues. The surplus was due largely to the increased movement of goods in the war period since the increase in rates and fares came into effect only in March 1, 1940. The gross traffic receipts of the State-owned railways amounted to Rs. 97.65 crores as against Rs. 94.48 crores in 1938-39. Despite an increase of Rs. 75 lakhs in ordinary working expenses, the operating ratio dropped from 53.1 per cent. to 52 per cent. in 1939-40. To prove that goods traffic accounts for the improvement of Rs. 3 crores, one may point out that passenger earnings dropped from Rs. 30.73 crores to Rs. 30.47 crores. The number of passengers carried also shows a slight decrease, and the average distance travelled by each passenger was less. An increase of nearly 4 million tons in the total goods traffic for the year is accompanied by a parallel increase in the number of ton-miles while the average haul was also greater in length. Goods earnings rose by nearly Rs. 4 crores as earnings from coal, rice, iron and steel were the highest for the decade though traffic in oilseeds and sugar declined. The railways have been important purchasers and then assistance to industrial production has been considerable. The percentage of indigenous stores out of the total stores purchased during 1939-40, by the Railways rose to 66.36. The war may explain the reduction in the proportion of imported stores. The railways took 87380 tons of rails and fishplates from the Tatas' iron and steel works.

The addition to open railway mileage during 1939-40 was 71 miles of which 21 miles was constructed in Sind and the remainder in States by the governments of the princes. The net addition was only 22 miles as 49 miles of existing lines were closed. Owing to the dismantling of various branch lines, the mileage should show a fall though the Sind Right Bank Feeder should be ready soon and the capital at charge as at the end of March, 1941, must also be less than the figure of Rs. 758.62 crores shown in the report as the total for State-owned lines Only one twentyfifth of the capital was owned by private Companies, and the share should have fallen further in consequence of the decision to take over the B. B. & C. I. and A. B. Railways. The report refers to the speeding up of traffic on lines where motor competition was encountered and goods traffic was made faster on most lines. Measures designed to conserve engine power and prolong the life of rolling stock were adopted on account of the war, and a reduction in the number of locomotives was made possible by new pooling arrangements.

The Punjab Budget

The attainment of a surplus instead of the originally anticipated deficit during the year 1940-41, is a distinctive feature of the Punjab Budget presented on February 27. Revenue for 1940-41 had increased by Rs. 84 lakhs from Rs. 11.74 crores to Rs. 12.68 crores and this has simplified the Finance Minister's task. While expenditure shows a rise in the Revised Estimates, the increase is hardly near the special revenue of Rs. 83 lakhs which is available for strengthening reserves and capital expenditure. Sir Manohar Lal could point to the parallel improvement in revenue and the turn of the tide, judging by the end of the famine which afflicted Hissar and other southern districts since 1937. A probable improvement in land revenue, arising from the cessation of revenue remissions, should augment receipts. Total revenue for 1941-42 is estimated at Rs. 12.6 crores against Rs. 12.63 crores shown in the Revised Estimates. The expenditure for the coming year is estimated at Rs. 12.56 crores when total expenditure in 1940-41 according to the Revised Estimates amounted to Rs. 12.39 crores. The surplus of Rs. 24 lakhs available in respect of 1940-41 is independent of the rise in extraordinary receipts. In 1941-42, these are expected to provide Rs. 68.09 lakhs, a figure well above the triennial average, and the completion of various capital projects out of provincial borrowing has reinforced the sources and size of revenues. In the years of autonomy the growth of expenditure in the Punjab has been accompanied by a simultaneous growth of revenue. It is noteworthy that this growth is virtually independent of the survey of resources and suggestions for retrenchment made last year by a special committee which advocated taxation for public welfare. It is not without interest to analyse the increase in revenue during 1941-42 compared with the actuals for 1939-40. The increase forecast is as much as Rs. 90 lakhs of which Rs. 53 lakhs is contributed by land revenue, Rs. 13 lakhs by the provincial share of income-tax and Rs. 13 lakhs by the other taxes and duties. It may well be claimed that there is no need for the controversial urban property tax which is designed to weigh the balance in favour of the rural masses. One must, however, note that the anticipated rise in land revenue though it is due to natural factors, is a bigger contribution from the agriculturists, and taxes on entertainments and the sale of petrol are essentially designed to broaden the tax structure

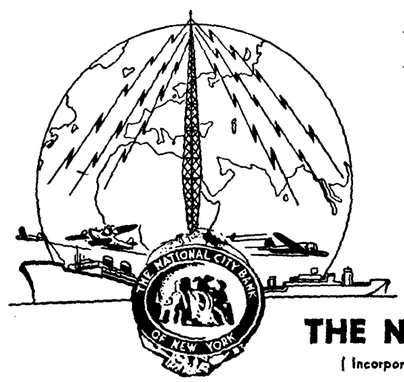
"I must have liberty
Withal, as large a charter as the wind
To blow on whom I please."
—(As You Like It.)

THE Ides of March are come! Well might one say it to the Citizen who, according to democratic theory, is a fractional Caesar in himself. And when the citizen values his money more than his life, the soothsayer can add most poignantly, "Aye, Caesar, but not gone." In modern times, politics and economics vie with each other in widening the hole in the taxpayer's pocket. And, while politics owes nothing to public finance, except in the very vague manner of that half-truth that heavy taxes are the cause of revolt and revolution, the science of economics owes its origin to the calculating cupidity of absolute monarchs and their ingenious ministers. When economics grew into some respectability, it kept governments at arm's length from the tax-payer. It evolved the theory that money is best left to fructify in the pockets of the taxpayer. For all its apparent consideration for the average man, it marked no change in the relation between the State and the citizen; for, what was Treasury to the monarchs had become in the days of oligarchic government, "the pockets of the taxpayer." Both alike indicated the cupidity of the ruler or rulers. But we are living in times when distinctions between rulers and ruled, so far as taxation is concerned, have been swept away by the tide of totalitarian war. And even before the war, accepted theories of public finance had all gone west. And now the war has completed the chaos. The most baffling of post-war problems would be the formulation of some principles of taxation which would enable governments to defray the public expenditure without driving any section of the people to desperate revolt.



I am not sufficiently imaginative to foresee the state of public finance in the belligerent countries after the war is over. But there is no doubt that in the last half-century, the budget has been the most potent instrument of social change and that it cannot be otherwise in the post-war period. Finance is what brought arrogant monarchs to their knees and forced them to share their power with the nobility. The same factor accounted for the Lower House wielding all power over Money Bills. And once the Lords were deprived of their control over taxation, democracy has gone on merrily increasing the bill of public expenditure. The theory that money must be left to fructify in the pockets of the taxpayer was slowly but surely torpedoed. "We are all socialists now," Sir William Harcourt ruefully declared after Sir William succeeded in getting his death duties passed with the aid of the Imperialist group. A democratic government has better uses for the taxpayer's money than he can find for it. It can bear better fruit by flowing in and out of public coffers than if it stagnated in the pockets of the citizen. "Hands up," cried the State. And the taxpayer stood and delivered.

But, then, it soon became a question of taking one another's washing. It has been said that Frenchmen live on one another's tips. Some of the democracies of the West were very near achieving this miracle. The budgets were swollen enough by the last war. Popular cartoonists loved to show public expenditure as a bulging burden and the taxpayer as a decrepit wretch staggering under it. The repudiation of war debts brought some relief. But there had been a process of impoverishment, the effects of which had to be faced some day. A large part of public expenditure went to payment of unemployment relief. And taxes were largely paid by industry which could not afford to pay men directly, by employing them in productive work. Industry which had to bear the burden of taxation was often in need of subsidies or other relief at the expense of the Exchequer. But subsidies were given, taxes paid, and relief afforded. People did live by tipping one another.

How long this process could have continued, nobody knows. But under the shadow of the war, each country learned to put up with all manner of disabilities. Sir John Simon's budgets tinkered with the problem of financing rearmament. Even so, the bill mounted up; and the limit of taxation now is the sky. If you want more shillings in the pound, you must increase the number of shillings in the pound. And that gets you nowhere! The fact is that war with totalitarianism involves acceptance of totalitarianism. And finance is the first to be affected by the change. All old theories of taxation or public finance have no application. Nor for the matter of that, current prejudice against totalitarianism. It is an all-in show. So throw all, everything, into the horrid crucible of the war.

Only the United States among the great powers is still safe from this mess-up of public finance. It was not untouched by it. The repudiation of war debts, repara-

tions, Dawes Loan, Young loan and standstill credits affected the U.S.A. more than any other country. It retaliated with the Johnson Act and other expressions of non-entanglement in European affairs. But no debtor smashes up his credit, till he has made up his mind not to ask for its renewal. And the U.S.A. did not hope to do more than avoid further loss by such measures. U.S. finances did not take long to recover from the disturbances caused by moratorium and repudiation. But the depression sent both sides of the budget rocketing. The New Deal laid enormous burdens on the national finances. The most far-reaching schemes of national expenditure were launched by Mr. Roosevelt to redress the social wrongs that the break-neck speed of American individualism had caused. And on the top of these came the need for rearmament. The career of Fascism on the European Continent and the growth of Japanese ambitions on the other side of the Pacific both served to shake up America from its complacency about the state of its defences. Now America is almost face to face with war. A two-ocean navy, an air force that can protect the farthest outposts, co-operation with Canada, Britain and Australia, all these mean expenditure of vast sums. America has nerved herself up to the effort. This is not the time to think of levels of taxation.

It is against the background of such trends in the outside world that India's budget for 1941-42 has been announced. India's finances have had little in the past in common with the finances of foreign countries. We had no progressive taxation worth mention, no death duties, no unemployment relief, no public works programme. For a century, our Government has been content to discharge the minimum function of protection of life and property. The former is an ever-increasing factor; the present census may return a figure of 400 millions. But it is different with property. At any rate, there has been no expansion of taxable resources. The Finance Members of the Government of India have, so to say, been digging holes and filling them. Remit the provincial contribution and increase customs duties. If protection is accorded and customs revenue falls, resort to excise. If the provinces want their share of the income tax, whip up the Railway rates and fares to yield a surplus. If you want retrenchment, show some saving by spreading capital expenditure in the Army budget. All these processes have been resorted to in the past. But the war upsets them all. It has the same effect in India as in other countries, though the differences are numerous and vast. It has upset all the nice calculations of the past.

Retrenchment of defence expenditure is the dubious achievement of more than a decade and a half. I say, "dubious," because part of the reduction was due to the fall in prices. But that achievement has melted into thin air. First came the Chatfield report, with the significant admission that India could not finance her defence. It was bad enough not to man our defence forces ourselves. But even finance was lacking. It had an elaborate system of British aid to India. And when the war broke out, the Chatfield scheme was as good as a dead letter. India's war expenditure, too, has been going up. Excess profits tax is a drop in the ocean. The Railways' obligation to the Depreciation Fund and the general revenues was scrapped. Rates and fares were increased; and with the increased movement of traffic consequent on the war, there has emerged a far-sized surplus in the Railway Budget. The bulk of it goes to the general revenues. But will it suffice for meeting all the expenditure that is threatened?

It is too much to hope that it will. The political situation in India and the international situation and the war make it of little or no use to apply the usual criteria to the Budget. Two or three years ago, it was possible to keep a rosy view of things. Provincial Autonomy had just been inaugurated. Popular ministers were getting their first experience of the realities of public finance. Old dreams were beginning to be translated into new policies. We could address our minds to the larger problems of new sources of taxation, the redistribution of tax burdens, the revision of federal and provincial revenue. We were looking forward to the growth of Railway contributions which would release a part of the income tax for the provinces. Here we are with a Railway contribution of nearly Rs. 12 crores to Central revenues and the Finance Member still asking for more!

The first public excursion by railway ever organised was on July 5, 1841, when Thomas Cook arranged a trip for 870 people from Leicester to Loughborough. I know that it was Leicester because Priestley makes special mention in his *English Journey* of a Midlander who was to revolutionise the art of travel by organising that journey from Leicester. It is therefore the centenary year for the famous travel agency which has achieved distinction all over the world, created the tourist industry and made for the happiness of individuals and nations. The agency, now a hundred years old can look back with pride on the first efforts made by Mr. Cook to turn English holiday-makers to North Wales, the Isle of Man and Ireland. It was characteristic of

Thomas Cook that he put the Crystal Palace Exhibition of 1851 right before the provincial travellers of his time and every big European exhibition found him ready to attend on intending travellers. The great travel agency took shape about ten years after the trip to Loughborough. What a lot of developments, circular tours, conducted tours and travel over the world on the coupon system. If one compares the Grand Tour reserved for the top section of the Upper Ten and the pleasanter inexpensive form of travel made possible by Cook's organisation and efficiency one can guess that a vastly larger number of people were able to travel and therefore to conquer.

The London office of Cook's established in 1865 has a continuous history though the building at Ludgate Circus dates from 1872. Mark Twain who penned a memorable tribute to Cook's agency did not put the Innocents Abroad in the charge of the agency for their experiences would have been less pictureque. The Haj traffic found Cook's equal to the job for experience in Egypt lay behind the service. The travel agency has seen changes in travel from the Franco-Prussian War to Hitler's war but never has it been unequal to the job on hand. The same singular efficiency has distinguished the banking department rightly famous the world over. The receipt of deposits like exchange and remittance are ancillary to travel, but a reading of their balance sheet makes one wonder if Cook's should not be considered a financial institution. A very high degree of liquidity has always been demanded by the business and it is definitely forthcoming. Insurance of baggage and life too is logical and storage and transport are cognate activities. Cook's perform a variety of services, typing and translation included, and helping the newcomer to get his requirements in London from shops is what may be called part of the inclusive service. Other travel agents may have to look to their laurels as Cook's on the threshold of its second century is bound to develop its banking side along with the organisation of travel for an age that prides itself on knowing what it likes.

Employment in Cawnpore has risen substantially on acount of the war. The figures of the Industries Department's report are thrown into the shade by the figures furnished by Mr. R. Menzies at the 53rd annual general meeting of the Upper India Chamber of Commerce. Just before the war there were employed in the major industrial establishments alone 47,416 workers and the monthly wage bill totalled over Rs. 11,13,844, the average earnings for workers being Rs. 23-8, a figure that suggests immediately that the Cawnpore average is well above the All-India average as calculated by informed students. The total number of workers in a recent month was 66,063 in the same number of establishments, and monthly wages paid out by them amount to Rs. 16,96,861 giving an average of Rs. 25-12 per individual worker. An increase of 39 per cent in the labour force and of 9.4 per cent in the average earnings per worker affords a measure of the direct economic effects of the war on industrial Cawnpore. I referred last week to the impressive addition to the men on the payroll of the Misra Hosiery Mills alone. The rise in employment is evidently spread over a large field, and then overtime must be the rule in most or all the establishments. Labour must have shared truly in the benefits with the employers during the last year, and Mr. Menzies made a brief reference in a very full and interesting speech to the labour legislation under consideration at present by the Central Government. The official bills drafted recently can be traced to the conferences held last year and last month when representatives of employers' organisations discussed the outlines of new measures. Mr. H. A. Wilkinson was the delegate from Cawnpore, and Mr. Menzies acknowledged the Chamber's indebtedness to Mr. Wilkinson as also to Mr. E. M. Souter whose work for industries in the U. P. has acquired a new significance and greater importance after his resignation from the committee of the Chamber to take up a post under the War Supplies Board.

By the death of Raja Janaki Nath Roy, Bengal loses not only a merchant prince but an industrial pioneer. The memorials to his genius are many and varied. Jute Mills, shipping companies and Banks proclaim the ability and aptitude of the dynasty which he and his distinguished brother founded. In the commercial history of Bengal, few names will shine more brightly, and the death at an advanced age amid surroundings of dignified ease was a fitting climax to a great career.

EVEN the fact that it was a "prosperity Budget" disclosing an unprecedented surplus did not save the Railway Member, Sir Andrew Clow, from unusual reception which he had in the two Houses of the Central Legislature. In both thte Houses, the Muslim League party walked out of the chamber as a protest against the Railway Member's recruitment policy which, it was alleged, operated to the prejudice of the Muslim community. The question which has been brought to the forefront by this controversy is whether not only at the initial stage of recruitment but also in promotions from one grade to another the rule of communal proportions should be observed. So far Sir Andrew Clow has been uncompromising in taking up the position that promotions should not be made on communal considerations and "that he would regard it as his duty that every man serving under him whatever his class or creed, had fair chance of advancement to posts for which he was eligible and qualified." Sir Andrew found unqualified support for this stand of his in both the Houses, but it is too early to say if as a result of this new agitation started by the Muslim League modifications may not slowly creep in.

No orders have yet been passed by the Government of India on the D' Souza report which examined the representation of minority communities in State-Managed Railways. Figures have been collected by Mr. De Souza which generally show that the representation obtained by the Muslim community as a result of the working of the new recruitment rules has been satisfactory, but he has also made recommendations which raise many questions of policy laid down by Sir Andrew Clow when he says as regards promotions themselves "that there should be reservations for minority communities for such promotions on merit similar to those applicable for direct recruitment." One important recommendation of Mr. De Souza which in the debate in the Council of State was commended by Pandit N. Kunzru is to the effect that an independent body, a Railway Services Commission should be established to control all recruitment to the subordinate grades in the four State-Managed Railways. In his report Mr. De Souza says; "The desirability of having a commission of this kind has been discussed with General Managers and several other officers of administrative rank. All favoured the idea, several enthusiastically, but differed in their views on various points relating to procedure." The only objection raised seems to have been that a Central Recruiting Authority might not be able to give relatives of railway employees the degree of preference being given now.

The debates in the two Houses on the Railway Budget are now over. One important assurance which has been elicited from the Government Member is that the authorities concerned are seriously examining the question of giving notice of purchase to the B.N.W. Ry. Some of the remarks made by Sir Andrew Clow in his *Budget speech* on the State management of Railways, particularly his reference to "the handicap to efficient administration which is involved in a system rendering the organisation answerable to a popular legislature" aroused a good deal of comment. Nonofficial speakers maintained that the vigilance of the Legislature had helped to increase the efficiency of the Railways and also provide greater amenties to passengers. Opinion on the question of the reduction of rates and fares was divided, for it was admitted by even those accepting the case for reduction that under present conditions the only alternative will be increase in general taxation. There was some controversy also on the claim made by the Railway Member that the increase in coaching earnings is evidence of increased prosperity among the masses. In the opinion of Mr. Shantidas Askuran, who spoke in the council of State, the causes for this year's increased earnings are four —diversion of traffic from the coastal shipping line to the Railways, diminishing competition from motor traffic which is becoming more costly, increased traffic due to war activities and higher railway rates and fares. He also went on to point out that the agricultural population, which really constituted the masses in this country, had suffered as a result of the fall in agricultural prices and the loss of markets and their lot had not improved in the least.

Today consideration of "cut" motions begins in the Assembly. The list owing to the absence of the Congress party and the withdrawal of the Muslim League is an unusually short one, but this year the European Group has come forward with several motions. One of them seeks to bring up for discussion the report of the court of enquiry on dearness allowance. Among the subjects raised by the Congress Nationalist Party are the Government's failure to make proper and timely arrangements for the construction of broad guage locomotives in India, the policy of dismantling of Railway lines in India, the policy of purchase in connection with the development of Indian industries, and the question of the removal of surcharges on fares and freights. In addition to the old subjects of Indianisation, grievances of third class passengers and prevention of accidents, one new subject which has figured in this year's list of cuts is the policy of communalism in services in the Railway Administration.

The debate on the construction of broad guage locomotives in India which concluded today in the Central Assembly did not reveal any possibility of this industry coming into existence before the end of the war. The position as stated by the Railway Member is that at the moment it is difficult to find either the technical personnel or the material needed for the plant. The former is not available in sufficient number even for Army needs. The hope extended by the Railway Member was that at the end of the war there would be a large surplus both of technical personnel and of machinery which can well be utilised for starting new heavy industries like the manufacture of locomotives. On the nonofficial side the view expressed was that even now it is possible to get the required plant from the United States of America if only the Government of India would agree to take up the question seriously. The debates in the two Houses have undoubtedly revealed the strong feeling among nonofficial members that efforts should be made to start this important industry at once and it was not necessary to wait till the end of the war.

Through the courtesy of Army authorities I was able to spend a day at Ambala and see the working of the Service Flying Training School started a few months back for the training of Indian pilots for the Indian Air Force. The first batch of Indian cadets now under training is only forty, but as recruitment proceeds, the actual turnover may be expected to be in the neighbourhood of three hundred before the end of next year. This is a small number, but the main difficulty is said to be lack of training facilities for a larger batch of Indian pilots. Two facts have however been established by the success of the Ambala scheme within less than a year. The first is that in India it is quite possible to organise military flying schools of the same high standard as Cranwell in England for giving instruction on the most modern lines in the latest methods of aerial warfare. The second is that the quality of candidates coming forward for training as military pilots is also exceptionally high. Though the course is strenuous and the cadets have to master several highly specialised subjects like navigation, wireless, management of fighting equipment, aerial photography etc. besides being good pilots from the military point of view the Indian pilots now under training have come up to expectations and according to the military authorities they are bound to shape well in the new sphere of life which they are about to enter.

(From Our Correspondent)

Bombay, Feb. 26.

In view of the critical comments made by Mr. Jamnadas Mehta, on the report of Sir B. N. Rau, and his colleagues on the Court of Enquiry that went into the railwaymen's claim, there is something to ponder over in the resolution passed on Sunday by the Executive Committee of the G. I. P. Railway workers' Union. It will be recalled that Mr. Mehta, described the recommendations as falling short of genuine expectations, and Mr. Guruswami traversed the findings in detail to show that much more than what was provided in the report was needed to meet the just claims of the workers. The resolution threatening a general strike for the purpose of obtaining a dearness allowance will serve as a reminder to the Government that an early decision is demanded by the workers. Though provision has been made in the Railway Budget, a decision on the Court of Enquiry's report has not been reached. The special convention of the railwaymen's federation meeting shortly at Delhi will be asked to consider the proposal for a strike on all the railways in order to get the allowance. The G. I. P. Union, however, does not resent the idea of further negotiations, so that an amicable settlement could be reached soon. A special committee is to be entrusted with negotiations if they follow. The G. I. P. Union has expressed the hope that Government and the Railway Board would sanction the allowance and avert the strike. Explaining the reaand avert the strike.

The appointment of a new committee to examine the possibilities for developing the extraction of essential oils in India has been very well received in Bombay. Since Mr. Narielwala of Tomco is the convener the commercial aspects of development will receive adequate attention. The encouragement give to users of essential oils which have a place in the making of fine chemicals and medicines is only to be expected after efforts made to widen the application of oils in industry. The war may not have cut off producers from markets, but the development of local industries is one of the important possibilities. The reference of the subject to a special committee proves that the Board of Industrial Research is congnisant of the possible development of the essential oil industry at present.

The Merchants Chamber have reinforced the plea made in the Government of India communique last week about the threatened rise in the price of rice. The Bombay organisation refers to the danger of a heady rise in prices following a shortage however brief and limited. The local situation is not regarded as healthy and the communique would not be an adequate remedy. The right way to meet a distressing situation is to release additional tonnage. It has been pointed out that vessels of Indian registry, normally engaged in the coastal trade, could be readily freed from the control, and permission to engage in the rice carrying trade for a brief period would be of help to both countries. The value of the gesture would not be lost on the Burma shippers too. It has been pointed out that control cannot be justly applied to a weak and struggling industry like the Indian shipping industry. Though such an argument sounds suspiciously like special pleading, the consumer's difficulties will have to be taken into account. A leading importer from Calcutta has immediately endorsed the plea that Indian ships should be made available for the transport of rice urgently needed in India. The representations made by the Indian Merchants Chamber have been strongly supported in the local press, for several reasons.

Another plea recently put forth by the Indian Chamber relates to the constitution of an Import Advisory Council. Apart from arguments based on the plea for the new frugality, there is the situation created by the import control and rationing in regard to essential materials. The Chamber has pointed out that the principal port towns should have special committees to advise on modifications or reliefs when necessary. There has been a demand that the special requirements of the iron and steel trade in Bombay should be examined constantly by a controller; because licences and permits have to be procured from Calcutta, there is considerable inconvenience to the trade. The committee reverts to the subject of relaxing restrictions in regard to taking delivery of goods e.g., paper ordered before the system of control was instituted. And whenever quota regulations are adopted the view of the trade concerned should be ascertained according to the letter addressed to the Government by the Indian Merchants Chamber.

The repercussions of the war on the import trade in motor vehicles must be considerable. Apart from the rise in the cost of petrol, an increase permitted under special arrangement in war-time, there have been the freight and exchange difficulties over a long period. The decline in the imports of British motor vehicles may seem surprising as the export section of the British motor industry has been working though home demand has been effectively choked off. The figures recently published show that imports in 1940 fell by 20 per cent. compared with 1939 and by 40 per cent. as compared with 1938. The decline will appear small compared with the fall in British registration statistics but they certainly show that war has hit the trade as the demand for vehicles which as a luxury can be dispensed with has fallen away. The decline is attributed to uncertainties of delivery, a small rise in prices and the high cost of petrol to which the sales duty is an unwelcome addition. The increase in the prices for spares and accessories and the revised prices for tyres make motoring more than ever expensive. Though it is claimed that the U. K. holds its own in the motor trade, sales keeping up very well at a time when American and Canadian vehicles in spite of proved selling points have been hard to sell. The agents of British car manufacturers have dwelt with pride on the fact that in war time British cars sell easily as being more economical to run. The contrast between the years 1914 to 1918 when U. S. cars elbowed British rivals out of all markets including India and the present war is borne out by the fact that shipments of British cars have been coming regularly.

The Government of Bombay has examined the report submitted three months ago by Sir P. Thakurdas, and his colleagues of the Industrial Survey Committee. The Government declines to accept the recommendation that a special development department should be set up on the ground that funds are not available. Geological exploration can be left to the special survey. The Government agrees that forest resources should be utilised in industries and is prepared to make special efforts to carry out research and popularies the results. The establishment of a machinery industry is, in Government's view, rendered difficult by wartime difficulties. There is, in theory, no objection to the grant of assistance in case, the new industry deserves it. Experiments in tanning and dyeing are considered worthy of all encouragement, and a proposal for the setting up of a factory for the manufacture of tanning agents from myrobalans is under discussion. Canning has possibilities, but only experimental work is possible at present, according to the press note, setting out the Government's orders. Describing the work already none in connection with the survey of fibres locally available, reference is made in the press note to the results of the survey previously carried out and development proposed when Government gets an expert to replace the expert who resigned. The Government admits that it is not easy to get a fishery expert from Japan to assist in the development of the sea fishieries in the province. Road construction on borrowed money does not appeal to Government which refers to the fact that the present Government is running on Section 93 of the Government of India Act, and all that can be done is to push on with the present programme. Government after referring to the high cost of increasing educational and health facilities recalls what has been done in the recent past and expresses the opinion that local boards should do more in these fields.

A Resume of Commodity Markets

THERE are important features of interest in the commodity markets during the week. Only the strength of the raw cotton market, in the face of the disturbed Far Eastern situation, would seem to be surprising to some. The soundness of the technical position and the firmness of staple varieties have, however, been stressed in these columns on more than one occasion. The reports regarding the possibility of Indian mills receiving more war orders has more than offset the bearish effect of the possibility of a stoppage of exports in the event of a conflagration in the Far East. Among other markets, the jute market has relapsed into its former state of dullness. The rise in prices last week on reports regarding Government intervention and the optimistic references by the Chairman of the Indian Jute Mills Association regarding the jute problem has been short-lived. Likewise, the rise in the jute manufactures market has not been well held and there has been a sharp relapse from the highest levels for the week. It is satisfactory, however, to note that there has been a recovery in prices all round. With no panic in the stock markets and commodity markets relatively steady, the sharp rise in gold prices during the latter half of the week is perhaps not quite understandable. There has been a reluctance to part with holdings and, in a market short of supplies, increased buying has, therefore, resulted in a sharp rise in prices. The highest levels were recorded yesterday. There was heavy selling at the higher levels and most of the gains during the day were lost. But values are considerably higher on balance.

It would be remembered that, about the middle of last year, there was considerable panic in the several markets and there was a rush for buying both in the silver and gold markets. There has been no panic, however, on this occasion, but the rise in gold prices are very near the peak levels for that period, though the extent of the rise is not the same. The silver market has been thoroughly unresponsive, and there has been only a slight firming up in the quotation for spot towards the close.

Jute

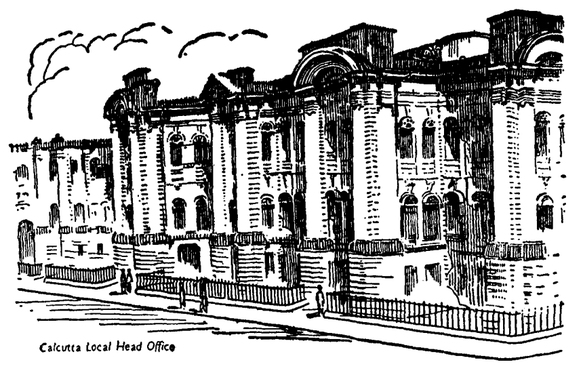
The market is very sceptical of the ability of the Indian Jute Mills Association to solve the jute problem successfully. Even the putting up of the clearing rate last Friday has not had any effect, and there is considerable difference of opinion regarding the validity of the decision on the last occasion of the Board of Control of the East India Jute Association. On February 6, 1941, the clearing rate was Rs. 1-8 below the closing quotation for that day, while on February 21, 1941, it was Rs. 1-4 higher than the closing quotation on that day. Nothing has happened during the two weeks to alter the outlook for jute. There was a decline in the quotation in the futures market from Rs. 34-9 to Rs. 32-12 with a subsequent recovery to Rs. 33-10. The sentiment is predominantly bearish. Business in loose jute has been extremely limited and sellers are prepared to discount minimum rates. No export business is possible.

Jute Manufactures

The jute manufactures market was rather lively in the first half of the week. On good buying by American consumers and speculative buying by the bazar, there was a sharp rise in values and early this week 9 Porters ready were as high as Rs. 14-11. The rumours regarding shipping difficulties and the detention of Japanese steamers in Calcutta docks brought down prices. The continued weakness of the jute market was also partly responsible. American buying during the past few weeks has been considerable, but the goods cannot be shipped owing to the difficulty in obtaining freight. It appears that Japanese freight is available, but American consumers are not willing to utilise Japanese bottoms for carrying their goods. This has been mainly responsible for the difficulty in obtaining shipment. There is no truth whatever in the statement that Japanese steamers are being detained. 9 Porters ready, after being lower at Rs. 13-11, have recovered to Rs. 14.

Cotton

The Bombay raw cotton market has been very firm, but towards the close has been easier on reports regarding the possibility of a break-down in the Thai-Indo-China peace talks. In the middle of the week, there was a slight marking down in prices on the publication of the All-India fourth cotton forecast. The crop is estimated at 5,638,000 bales and the area under the crop at 22,775,000 acres. There is an increase in the acreage under the crop by 15 per cent. and yield by 9 per cent. The cotton textile industry is working at full capacity for the production of goods for the Supply Department. There has been a sharp increase in mill production during the closing months of 1940. It is expected that the Government of India are likely to place much heavier orders in the year 1942 than in the current year. The full crop of medium and long staple varieties will, it is believed, be taken up by the increase in Indian mill consumption. There will only be some difficulty in disposing of short staple cotton. Hence the reason for the widening in the disparity between the quotations for Oomra and Broach on the one side and Bengals on the other.



Rubber and Tin

With the precautionary measures adopted by the British and U. S. Governments in the Pacific there has been a sharp fall in the prices for Tin. Rubber values however, have been maintained at the higher levels, though a slightly easier tendency was noticeable early in the week. While rubber Spot is quoting 18 1/8d. and Forward 13 3/16d., Tin cash per ton is sharply lower at £264 per ton.

Mr. Saxena's Report

Mr. Saxena's report makes interesting reading. India's share in the import trade of Japan is steadily decreasing. The offtake of Indian cotton by Japan in 1940 fell owing to high prices in Bombay and the disturbances in the Indo-American parity.

Regarding the trade in other commodities, the prospects are certainly gloomy and it is only natural that Japan, striving towards self-sufficiency cannot continue to take Indian goods indefinitely. With regard to other fibres, Mr. Saxena has no encouraging word to the Indian producer.

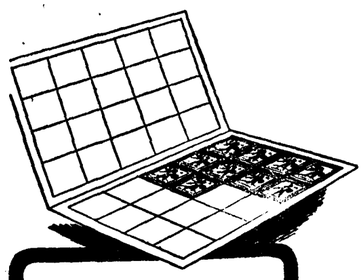
which is called upon to take the strain of additional expenditure *in wartime*. The increase shown under additional police (Rs. 14 lakhs) in the Revised Estimates is expected to continue and Rs. 1½ lakhs provided for war publicity Rs. 5 lakhs on A. R. P. Rs- 1 lakh for the General Election due to take place next year are the consequences of war. While the provincial debt has hardly kept step with the capital outlay for the last four years, the difficulties of borrowing in wartime justify the replenishment of balances, including even those held on capital account out of revenue surpluses. The Punjab has experimented with special reserves for its development programme. There is admittedly a place for the adoption of commercial accounting practice, and the Minister rightly claimed that the gap between the value of assets and liabilities on capital account, achieved largely through the regular provision for Depreciation and Sinking Funds, gave the Punjab very special advantages in regard to future borrowing as also in current reveinue to judge by the increasing proportion of the special receipts estimated at Rs, 68.09 lakhs. The surplus for 1941-42 is estimated at Rs. 4 lakhs but due regard must be had to the rise of Rs. 17 lakhs in total expenditure from revenue. The greater portion of this increase is absorbed by the Education, Public Health and other departments so that it may be claimed with justice that the taxpayer in the Punjab benefits more than he would if he received any slight relief in regard to a minor tax.

Make money this way!

WATCH YOUR SAVINGS GROW!



Your Rs. 10|- Certificate automatically increases in value, free of income-tax. It becomes worth at the completion of

the 2nd year		Rs. 10 5
the 3rd year		Rs. 10 10
the 4th year		Rs. 10 15
the 5th year	(Bonus year)	Rs. 11 8
the 6th year		Rs. 11 13
the 7th year		Rs. 12 2
the 8th year		Rs. 12 7
the 9th year		Rs. 12 12
the 10th year	(Bonus year)	Rs. 13 9

These accrued profits are yours on demand from the Post Office

Defence Savings Certificates are a very safe and convenient method of investment. They are issued in amounts of Rs. 10, Rs. 50, Rs. 100, Rs. 500, and Rs. 1,000, up to a limit of Rs. 5,000 (face value) for any one person. Interest is paid at the rate of 3⅛% compound interest—free of income-tax. The accompanying table shows how each Rs. 10 certificate automatically increases in value until at the end of ten years it is worth Rs. 13|9|-, showing a profit of Rs. 3|9|-.

Defence Savings Certificates can be bought at any Post Office and a holder who wishes to get his money back at any time has only to apply to the Post Office from which the certificate was bought and it will be refunded together with interest and bonus earned.

Rs. 3/9 PROFIT ON EVERY RS: 10

Jute and Jute Manufactures

(From Our Jute Correspondent)

Calcutta, February, 27.

In his Interim Report on the Jute Futures Market, Professor Todd writes of the Board of Control: "The Board possesses powers which should enable it to exercise a salutary control over the operation of the Exchange. Unfortunately—the duties it has actually performed seem to have deteriorated into a mere routine fixing of the Clearing Rate for the fortnightly settlements." It would appear that the Board has now abdicated even this function judging by the manner in which it permitted itself, almost without protest, to be browbeaten by the Government representative into breaking its own Bye-laws, to meet Government's desire for a fictitious Spot rate. Government's view seems to be that, owing to the scarcity of shipment business, the market quotation for First marks is purely nominal, and they insist that the actual value should be taken as the basis. "Actual value" in Government's view apparently is to be deemed the "packing cost," and the Board stultified themselves by acquiescing in this view and fixed a Spot rate accordingly. Now "value" is a term never used in market quotations unless there are neither buyers nor sellers of the commodity quoted, and usually represents the last price at which business was done. Value can certainly not be deemed synonymous with packing cost if there are either buyers or sellers quoted. And last Friday there were plenty of Sellers of L. J. A. Firsts at Rs. 33. Further, the E. I. J. A. Bye-laws, by which the Board of Control is bound, specifically define the "Spot rate" as "the market rate of the day for ready Jute First Quality." The "Market rate" is not necessarily the packing cost, but may be higher or lower according to whether buyers or sellers predominate. When sellers predominate as they do at present, the market rate is almost inevitably below packing cost. In fact when there are Sellers and no Buyers, it might reasonably be argued that the Market rate must be below Sellers quotation. It certainly cannot be higher, but with Sellers in the open market at Rs. 33, the Board actually acquiesced, at the behest of the Government representative, in declaring a Spot rate of Rs. 37, based on the day's packing cost of an L. J. A. First. This is just another instance of Government's frantic efforts, by hook or by crook, to support the price of jute at a *fictitious* level, but it is to be regretted that the Board of Control should have allowed themselces to be coerced into breaking their own Byelaws in this manner. In the circumstances it is a moot point whether the clearing rate so arrived at is not void. It seems extremely doubtful if claims for differences on this basis could be enforced, either in law or in arbitration.

The Government representative professed to disbelieve in the existence of a real L. J. A. First standard in view of the varying quotations e.g., Rs. 41 for Mill Firsts, Rs. 37, for packing cost and Rs. 33, for shipment. It is sometimes difficult to put one's finger on "reality" in a market so full of make-believe and fictitious prices resulting from Government interference. But as an analogy, one might go to Rankens and pay Rs. 10, for a pair of white drill trousers, go to Whiteaways and pay Rs. 7, for a similar pair, and go to a dirzie and pay Rs. 4-12, and all might be made from the same brand of material. But it would scarcely be logical to argue from that, that there was no such thing as a pair of drill trousers.

At the annual general meeting of the Indian Jute Mills Association the Chairman was in a position to congratulate the Mills on having come through many vicissitudes successfully during the past year and on being able to look to the future with some confidence owing to the prudent adjustment from time to time of production to world requirements, or to the world's capacity to take delivery, which is the crux of the problem at present. What, in his modesty, the Chairman did not perhaps sufficiently emphasise was the magnitude of the financial support from the Mills without which the Government schemes for maintaining for the cultivator a remunerative price for jute, would have been impossible of accomplishment.

The Export Jute market has been dull and idle and almost no business has been reported. There are however hopes that a better supply of freight may be available in March/April, and it is certain that, with quite a brisk revival in the Dundee manufacturing trade, there will be urgent demands from that centre for more supplies of the raw material. In the allotment of freight for jute in future, outstanding contracts of sale alone will be taken into account and it is expected that some priority will be accorded to long outstanding sales, awaiting shipment. Ready shipment Firsts quote Rs. 32, with Lightnings at Rs. 27. There was reported to be enquiry in the market from Spain but no sales are yet reported. Mills have bought Pucca bales in limited quantities, Special Lightnings at Rs. 36 to Rs. 38, Special Firsts at Rs. 41 and Rs. 42, Dundee Daisee 2/3 at Rs. 35 and Rs. 36, also some high quality and some Cuttings. The Futures quotation has tended to sag further despite official efforts to keep it up. From the opening rate of Rs. 34-6, Rs. 34-12 was touched but it has since wavered between Rs. 34 and Rs. 33 closing at Rs. 33-10.

In Loose Jute there is very little to record. Mills continue steady purchasers of Daisee and Bazar jute at minimum rates, but of contract jute little has been heard, except some European and Supervised Middles at Rs. 9 and Rs. 8-12 respectively. If a return is called for of the quota purchases for the second half of February, it is not likely to cover much paper. Mofussil markets are tending easier with strong pressure to sell in "District" stations. Reports indicate that, so far as the Meshta crop is concerned, no restriction whatever is being enforced. It may be argued that Meshta is not Jute, but it can be, and is, applied to the same purposes. Reports from Assam suggest preparations for an increase in acreage in that Province.

The minor ramp in 8oz/40 hessian mentioned in our last report carried the price to Rs. 14-12 but the unexpected appearance of Mill sellers punctured the balloon and the price rapidly dropped to Rs. 13-8, though there has since been a recovery to Rs. 14. Overdone in both directions as usual. Eleven porters participated mildly in the movement, Rs. 18-4, being touched for ready. But Hessian demand has faded out considerably in the last few days, to be replaced by renewed interest in Heavy Goods. In this section there has been a keen demand for Cornsacks for ready shipment, Rs. 37, having been recorded and even higher rates reported. Rs. 34-4 has been paid for March, Rs. 38-8, for May and Rs. 33-4 for June. Liverpools sold at Rs. 38, to Rs. 38-8, for ready and at Rs. 38 and Rs. 38-4 for March. Both these descriptions are now scarce for the early months. A good sale of Cubans is reported at Rs. 39 and Rs. 39-8, May/Septr. and June Woolpacks fetched Rs. 1-9.

Closing quotations on a steady market are:—

	Ready.	March.	April-June.	July-Sept.
	Rs. A.	Rs. A.	Rs. A.	Rs. A.

NORTH WESTERN RAILWAY

Tender No. 212-S/5-A/41

Code word "AMEND".

Tenders are invited on a rupee basis for purchase by the North Western Railway of "Tricolour Guards Hand Signal Lamps. Tenders must reach office of General Manager, N. W. Railway, Lahore, not later than 14-00 hours on Monday, 17th March, 1941 and will be opened in office of Controller of Stores, N. W. Railway, at 11-00 a.m. on the following working day. Tender forms and drawings can be seen at and obtained from office of Controller of Stores on and from 19th February, 1941. The sale price of the tender is Rs. 4/- Local and Rs. 4/8/- Muffasil per set of 2 copies of tender and two copies of drawing.

JUTE

Calcutta, Feb. 27.

THE raw jute market has been absolutely uninteresting. There has been very little volume of business in the several sections. In the absence of any export business, and with mill buying on a very small scale, sellers have been pressing for business. The optimistic remarks by the Chairman of the Indian Jute Mills Association at the annual general meeting last Friday has not had any effect on the market. Quotations have been marked further lower in the futures market, and a level as low as Rs. 32-12 was recorded on Wednesday.

Mr. W. A. M. Walker at the meeting disclosed that the mills had purchased upto the end of the second period of the agreement 21.98 lakhs against the agreed quota of 25 lakhs bales. The market does not seem inclined to share his hopes of a successful solution of the jute problem.

In the loose jute section, only small business has been done. Mills are not interested in the market. Sellers are prepared to discount agreed minimum rates to do business. Balers are reported to have done some business in Indian District Tossa Bottoms at varying rates.

In the pucca bales section, there has been no business and quotations have been purely nominal.

In the futures market, a slightly firmer tendency than at the time of last writing was seen on reports regarding Government intervention, but the rise in prices has been only temporary. The sentiment in the market is predominantly bearish. There was a decline in the quotation yesterday to Rs. 32-12, but towards the close, it was better at Rs. 33-8. In the course of today, there has not been much change in the quotation, the same fluctuating around Rs. 33-7 for the most part of the day.

JUTE MANUFACTURES

Calcutta, Feb. 27.

THE hopeful remarks by the Chairman of the Indian Jute Mills Association at the annual meeting of the members held on Friday last had an encouraging effect. Increase in overseas buying and greater speculation by bazar operators resulted in a sharp rise in the quotation for 9 Porters ready to Rs. 14-11. But the higher levels, in the face of the continued weakness of the jute market, have not been maintained. There has been an equally sharp decline in prices during the last three days on profit-taking and selling. As such, quotations on balance are even lower. The earlier rise in prices was forced up by bazar operators as orders for near positions could not be placed and mills were only sellers for the farther positions. 9 Porters ready are now quoting Rs. 13-12, March Rs. 13-10, April/June Rs. 13-5 and July/September Rs. 12-14. 11 Porters ready are Rs. 17-10, March Rs. 17-9, April/June Rs. 16-9 and July/September Rs. 16-1.

In the heavy goods section, there has not been much interest. Earlier in the week, firmer conditions were noticeable in sympathy with the hessian market. 'B' Twills for March shipment sold on the basis of Rs. 32, Cornsacks for the same position at Rs. 33-14 and Liverpool Twills at Rs. 37-12. Cornsacks for April/May were done at Rs. 33-8 and Liverpool Twills for the same position at Rs. 37-6.

COTTON

Calcutta, Feb. 27.

THE Bombay raw cotton market has been rather steady during the past week. In mid-week, the publication of the forecast had a discouraging effect temporarily. Mill buying and firmer overseas advices have caused a recovery and quotations are several points higher on balance. Spot buying on a larger scale and the soundness of the basis for staple varieties have been mainly responsible for the strength of the markets, in spite of the fresh complications in the Far Eastern situation. Broach April/May are now quoting Rs. 186-8, July/August Rs. 189-8, Oomra March Rs. 146-12, May Rs. 149, Bengal March Rs. 120 and May Rs. 121-4 The quotations at the end of last week were Rs. 182-8, Rs. 185, Rs. 143, Rs. 145, Rs. 118 and Rs. 119 respectively. It will be noticed that the rise in quotation for Bengal is not equally pronounced.

The reports that there will be no change in the farm programme have had an encouraging effect on the American cotton exchanges. There has been a good recovery and the quotation has improved from Rs. 10.26 cents to 10.43 cents for March position. May is quoting at 10.41 cents against 10.26 cents. In Liverpool also higher levels have been registered, March quoting at 8.29d. and May at 8.30d. against 8.24d. and 8.25d. respectively.

Following is the final (February) all-India cotton forecast 1940-41:—

	Acres.	Bales.
All-India	... 22,775,000	5,638,000
Trade descriptions:—		
Bengals	... 2,807,000	1,127,000
Americans	... 2,496,000	1,079,000
Oomras	... 6,595,000	1,410,000
Broachs	... 889,000	245,000
Surti	... 654,000	166,000
Dholleras	... 2,007,000	321,000
Others	... 7,287,000	1,290,000

Remarks: Increase 9% in area and 15% in yield as compared with the corresponding forecast (revised) of last year.

PIECEGOODS

THE Far eastern situation had a slightly discouraging effect on values in the Japanese goods section, as there was some anxiety to collar stocks. The general tendency of the market, however, should be considered to be firm. There is good enquiry for indigenous goods, but in view of the difficulty of the mills to accept orders for early delivery owing to their preoccupation with war orders, forward business has not been done on a large scale. Bazaar values have shown a tendency to rise but any appreciable improvement in values has not been possible owing to the poor demand from the upcountry centres. The Lancashire goods section has been firmer, but business passing has been only on a restricted scale.

The yarn market also has been firmer with mills not quite willing sellers. They are fully booked for the next few months. In the absence of any mill selling, bazar rates have improved.

GOLD

Calcutta, Feb. 27.

THE anxiety regarding the situation in the Far East and the Balkans had led to considerable buying of gold. In a market short of supplies and sellers unwilling to part with their holdings, there has therefore been a substantial rise in prices. The highest levels for the week, which were touched to-day, are nearly two points higher. The tone in the market is strong and there has been only a slight reaction at the higher levels. Gold ready is quoting Rs. 44-2 against Rs. 42-6-3 at the end of last week, First Settlement Rs. 44-2 against Rs. 42-7-3 and Second Settlement Rs. 44-3-6 against Rs. 42-8-3. The London price for gold has remained unchanged at 168s.

SILVER

Calcutta, Feb. 27.

THE silver market, on the other hand, has remained unchanged and there has been little fluctuation in prices, with a small volume of business passing. Quotations are slightly lower on balance. Indian Mint Silver ready is quoting Rs. 62-14, First Settlement Rs. 62-12 and Second Settlement Rs. 62-12.

The London market has been very idle, but quotations are higher with Spot at 23 7/16d. and forward at 23 5/16d.

TEA

Teas for export.

1,637 packages of teas for export were sold at Sale No. 33 held on 24th and 25th February, 1941 at an average price of As. 13-4 per lb. There were a few enquiries and prices were 9 pies lower than last week's levels.

Teas for internal consumption.

There was a limited quantity of Green teas on offer and prices were considerably irregular. Dusts had a strong market and prices were dearer by 6 pies. This brings the official Dust sales to a close and any further offerings will be put under internal sales catalogues. Other grades had a keen demand also but prices sagged by 1 to 3 pies lower in buyers favour except small fannings which were slightly dearer.

Quota.

The export quota was quoted at Rs. 8-9 per lb. The quotation for 1941/42 quota was done at As. 7-0 per lb. Sellers were scarce in the internal quota which quoted As. 1-3 per lb. buyers.

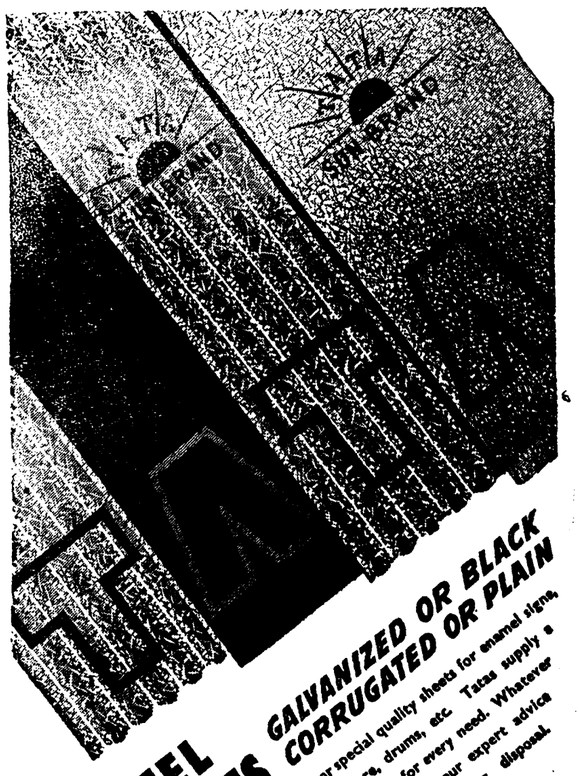
It is expected that the sales will be completed by the end of March. The quota for 1941/42 season has been reduced from 92½ per cent to 90 per cent.

WHEAT

THE Karachi wheat market has been narrowly irregular. After the sharp decline in prices during the last few weeks, a steady tendency has been noticeable, but in the face of the weakness of the other commodity markets and the prospects for the new crop, any appreciable recovery in prices is considered unlikely. The tone towards the close has been firmer with some mill buying. Choice White Ready closed at Rs. 28-3, March at Rs. 27-15 and July at Rs. 26-13.

In the Calcutta market, there has been little fluctuation in prices. Demand for flour and flour products shows no signs of improvement. Cawnpore Ready are quoting Rs. 4-2, Punjab ready Rs. 4-6 and May Rs. 3-12-6.

MADRAS HIDES AND SKINS



Madras, February 25, 1941.

REPORTS of the proceedings of the Groundnut conference held at New Delhi on the 20th instant have not helped to allay the panic amongst traders and producers at the steady fall in values. Whilst it is recognised that there are practical difficulties in the way of any compulsory restriction of output and distribution of 'bonus' to the cultivator, the absence of any concrete measures to mitigate the difficulties of the trade is commented on in business circles. It is pointed out, for instance, that an immediate purchase of a big quantity, say 50,000 tons, by the British Food Military would arrest the downward march of prices and stabilize the position somewhat. It is also suggested that the abolition of the quota system and the purchase by the Government at Indian ports on the open tender system will improve the pirce-level and benefit both the middlemen and the grower and obviate the need to collect 'rebates' from the shippers. It is hoped that the committee envisaged by the Government of India would co-opt representatives of the Groundnut trade and growers and device practicable measures to alleviate the sufferings of the latter. During the week, prices slumped below the twenty rupee mark, although a slightly better feeling was in evidence at the close. Shippers' buying limits opened on Tuesday last around Rs. 19-12 to Rs. 20-5 for Machined (Per candy of 531 lbs. ex-coast godowns), and declined to Rs. 19-8 and Rs. 19-15 on Thursday and to Rs. 19-6 on Friday. Prices subsequently rallied slightly and at the close stood around Rs. 19-8 to Rs. 19-12. Local buyers' limits opened at Rs. 19-8 to Rs. 19-12 for Machined (per candy of 531 lbs. ex-Madras harbour godowns), and, after easing progressively to Rs. 19 and Rs. 19-4 on Friday and to Rs. 18-8 and Rs. 19 on Saturday, closed better around Rs. 19-4 to Rs. 19-8. During the week, Bombay and Singapore buyers have been active in Madras and are reported to have bought about 400 tons Kernels. Groundnut oil prices after easing off closed a shade better around Rs. 46 for "Chekku" quality and Rs. 48-8 to Rs. 49 for "Prodattur" quality, per candy of 500 lbs. loose, ex-sellers' Madras godowns.

MADRAS GROUNDNUTS.

Madras, February 25, 1941.

THE local Tanned Hides and Skin markets continue inactive and practically closed to business, there being no buyers even at 3 annas per lb. below last prices. It is feared that even if there be resumption of shipments in April/May it would be difficult to maintain local prices anywhere near the schedule limits. February is almost drawing to a close, but the prospects of shipments in March/April are still very obscure. Even if the Government were to withdraw the restrictions on the export of non-schedule goods, the position will hardly improve in the absence of adequate shipping space to lift off the market at least a good portion of the stocks awaiting shipment. London buyers advise transmission of offers immediately after shipping space becomes available. In response to suggestions from some buyers, some of the Indian shippers, it is understood, are reported to be trying to find shipping space for Hides from other Indian ports, should this be possible and premissable. No definite news is yet available regarding the intentions of the Ministry of shipping as regards allotment of shipping space for Hides and Skins from Madras in the coming months. A deputation of Indian merchants has, it is reported, left for New Delhi to interview the Honourable the Commerce Member in connection with the crisis in the Tanned Hide and Skin trade. Cabled quotations coming through for Tanned Buffalo and Calf skins are as follows: Tanned Buffalo 12/13 lbs. 12d. to 12½d., Tanned Buff Calf 18d. to 18½d., Tanned Cow Calf 28d. for Coasts and 30d. for Primes. Madrassee tanners are not operating now in the Raw hide markets, and prices for the qualities they usually buy have come down. Dacca Dry salted is quoting at Rs. 5 per 20 lbs., Darbhanga-Purneas at Rs. 7 per 20 lbs., Kishanganj at Rs. 8 per 20 lbs., Chowri Chowra at Rs. 22 per 80 lbs., PURAB at Rs. 50 per 20 pieces and HALALI at Rs. 60 per 20 pieces,

Stock Markets to-day and to-morrow

LENIENT BUDGET PROPOSALS

THE Central Budget has not come as a surprise for the stock markets. In fact, the aggressive rise in prices in the Bombay market during the last two days was rather significant.

The deficit for 1940-41 is estimated to be Rs. 8.42 crores and that for 1941-42 on the basis of existing taxation Rs. 20.46 crores. It is proposed to raise Rs. 6.61 crores by way of new taxation in 1941-42.

The new taxes and their yields are as follows:—

(1) The Excess Profits Tax is to be increased from 50 to 66⅔ per cent to yield Rs. 2.5 crores.

(2) The surcharge on income-tax and super-tax to be increased from 25 per cent to 33 1/3 per cent to yield Rs. 1.9 crores.

(3) The excise duty on matches to be doubled to produce Rs. 1.5 crores.

(4) The import duty on artificial silk, yarn and thread to be increased from 25 per cent ad valorem duty or 3 annas per pound whichever is higher to 5 annas per pound to yield Rs. 36 lakhs.

(5) A new ad valorem excise duty of 10 per cent on pneumatic tyres and tubes to yield Rs. 35 lakhs.

The increase in Excess Profits Tax to 66⅔ per cent and the surcharge on income-tax and super-tax to 33 1/3 per cent is indeed less than market expectations. For, in view of the tense Far Eastern situation and the large increase in defence expenditure, an increase to 75 per cent was generally anticipated.

The total yield from Excess Profits Tax is estimated to be Rs. 10 crores, so that it is expected that the loss in revenue on account of the lower level of earnings in the jute industry will be made up in other directions. With a generally low level of profits for the standard period, the incidence of Excess Profits Tax will, perhaps, be heavy on the textile industry, but it can be hoped that with he large increase in earnings in war orders and export demand, it would be possible to increase the distribution to shareholders.

The coal industry will be the worst sufferer on account of the new increase.

With the increase in the surcharge on income-tax and super-tax, there will be a further rise in tax-free preference shares. There cannot be any change in the basis for giltedged securities, as, with the reduction in foreign obligations, the lower interest charges and the retention of so much money within the country giltedged prices, if anything, will tend to improve.

* * *

Further evidence as to the improved conditions in the Indian textile industry is provide by the results of two companies under the management of Messrs. W. H. Brady & Company, Limited. Thanks to the improved conditions of the piecegoods market in the latter half of the year and the receipt of large war orders, it has been possible to report a substantial increase in earnings even with the strikes which extended for about seven weeks in March and April, 1940.

The net profit of the *New Great Eastern Spinning and Weaving Co., Ltd.* is Rs. 4,67,528 against *Rs. 1,82,701* for the previous year. As a greater allowance has been made for depreciation, the provision for taxation is not very high at Rs. 65,000. There was no provision on this account in 1939. Depreciation on buildings and machinery amounts to Rs. 1,41,734 against Rs. 59,184 previously. The sum of Rs. 75,000 is placed to General Reserve while the allocation to Gratuity Fund is higher at Rs. 10,000 against Rs. 5,000. After meeting the dividend on the preference shares the dividend on the ordinary shares is increased to Rs. 15 per share from Rs. 10 per share.

* * *

The Colaba Land and Mill Company, Ltd. also is able to report an increase in earnings for the year 1940 at Rs. 4,33,185 against Rs. 1,50,935. The improvement in earnings, however, is not as pronounced as it is in the case of the New Great Eastern Spinning and Manufacturing Company, Limited. During the period there was a general strike in cotton mills in Bombay but the company's mills continued working throughout without any difficulty. On account of the lower level of profits for the standard period, the shareholders, however, do not derive any considerable benefit, the dividend being only slightly higher at 5 per cent against 4 per cent.

Out of the net profit of Rs. 4,33,185 (Rs. 1,50,935), Rs. 1,52,128 is set aside to depreciation against Rs. 29,805 previously. The allocation to pension and gratuity fund is Rs. 10,000. The provision for taxation is Rs. 1,25,000 against nothing formerly. The industry is at present busily engaged on war orders. It is anticipated that further heavier orders will be placed with the industry. Increase in war orders, export demand and internal consumption should necessarily be reflected promptly in a further improvement in earnings. But so far as the shares in the Bombay market are concerned, they seem to be fully valued and even discount prospects to a extent.

The highest level of earnings in recent years has been reported by the *Tapti Valley Railway Company, Limited* owing to the large increase in the number of passengers who travelled and the levy of the surcharge on freight rates and fares from March 1, 1940. Gross earnings are Rs. 21,17,205 for the year ended December 1940 against Rs. 17,66,603 for the previous year. The net profit, before providing for taxation, is Rs. 14,79,470 against Rs. 14,31,127 for 1939. The provision for taxation is Rs. 2,87,452 against Rs. 90,966. The dividend is maintained at last year's level, the final dividend of 4½ per cent making with the interim dividend of 3½ per cent, 8 per cent for the whole year. A bonus of 1 per cent is to be paid in addition. The Government of India have exercised their option to purchase this railway on March 31, 1942. The requisite twelve months' notice was issued to the company on February 6, 1941.

Far more has been read into my comments on the balance-sheet of the Ahmedabad Electricity Company than ever crossed my mind. In an analysis of the dividend prospects, I had in the ordinary course to refer to the fact that the Company is "not obliged to reduce rates" till May 1944. It did not occur to me that this carries any suggestion that it requires Government pressure to bring about the reduction of electricity rates in the city of Ahmedabad. Messrs. Killick Nixon have an excellent record as managers of a public utility concern; and for the benefit of those, who may not be acquainted with the facts, let me stress here that in the last seven years, the company has lowered its rates to lights and fans consumers six times to mention only one class of supply. The seventh reduction need not, and I am sure will not, require Government pressure.

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, Feb. 28.

WITH the imminence of the Central Budget there has been a reduction in the volume of transactions. There is still little or no disposition to enter into fresh commitments. For the most part of the week quotations were fluctuating in very narrow limits indicating the narrowness of interest even at the ebb. The weakness of the jute and other commodity markets was not without a bearing. For, any rise in share prices can come only if other markets firm up. Only the firmness of the Bombay stock exchange during the last two days has been responsible for the slight improvement in values towards the close. The undertone in several sections is subdued pending the publication of the Budget proposals. While the Western centre is inclined to adopt a more optimistic view the local market is rather anxious than otherwise. It would like to know the budget proposals first and operators are not prepared to push up prices. Markets are closed today on account of the death of a founder-member.

The Budget proposals are due to be announced in the Central Assembly this evening. While it is generally agreed that fresh taxation is inevitable the Budget will not prove to be discouraging to any of the markets.

There has been very little interest in the giltedged securities section. The disturbed situation in the Far East and lack of investment demand have been mainly responsible for the low level of prices in this section. 3½ per cent. Paper has been sticky for the most part of the week at Rs. 94-12. The close has been even slightly easier at Rs. 94-10. Among terminable loans there is little change to be recorded. 3 per cent. 1968/65 were Rs. 94-4, 3½ per cent. 1947/50 Rs. 102-2, 4 per cent. 1960/70 Rs. 108-2, 4½ per cent. 1960/70 Rs. 118-2 and 4 per cent. 1945/55 Rs. 112. 3 per cent. 1946 Defence Bonds were unchanged at Rs. 100-18.

There has been very little doing in provincial loans and the 3 per cent. issue 1952 are around Rs. 96-4. London advices during the week have been rather satisfactory as 3½ per cent. Sterling stock is quoting at a new high level of 99. Money conditions during the week have been slightly firmer though there is still plenty of money seeking investment. The Treasury Bills rate is higher at eleven annas four pies per cent. per annum against eleven annas one pie last week.

Bank shares have been slightly easier with *Imperial Bank* fully paids at Rs. 1,550 and contributories at Rs. 888. *Reserve Bank* were noted at Rs. 104. *Central Bank* changed hands at Rs. 48-8.

Business in fixed interest securities has been extremely restricted. 5 per cent. *Calcutta Port Trust* debentures were Rs. 107-8. Among industrial debentures, 6 per cent. *National Iron and Steel* were Rs. 101-12, 5½ per cent. *Rohtas Industries* Rs. 102-8 and 4 per cent. *Darjeeling Himalayan* debentures Rs. 102.

First class preference issues have been well held, *Anglo-India* being Rs. 173, *Dalhousie* Rs. 174, *Howrah* 'A' preferences Rs. 160 and *New Central* Rs. 174. *Hukumchand* were Rs. 117. *Alkali and Chemical* were Rs. 123-8, *Steel Corporation* Rs. 116, *Dunlop Rubber* First Preferences Rs. 154, Second preferences Rs. 115 and *Burn & Co.* First Preferences Rs. 166.

In the Coal section, a fewer number of transactions has been recorded. *Bengal* have been fluctuating in narrow limits around Rs. 359 while *Amalgamated* were Rs. 27, *Equitable* Rs. 36-10, *Burrakur* Rs. 18-10, *New Beerbhoom* Rs. 15-8, *Raneegunge* Rs. 25-15, *Standard* Rs. 20-7 and *West Jamuria* Rs. 30-6.

Jute shares were firmer in sympathy with the earlier strength of the jute manufactures market but the advance in prices has not been sustained. Closing prices, however, are higher all round in the week. *Anglo-India* were Rs. 315, *Clive* Rs. 21-8, *Howrah* Rs. 50-4, *Kamarhatty* Rs. 455, *Kanknarrah* Rs. 370, *Naskarpara* Rs. 18-4, *National* Rs. 21-7, *Nuddea* Rs. 55-8 and *Reliance* Rs. 54-8.

Textile issues also have not been quite so much in favour and quotations therefore are slightly lower. *Cawnpore Textiles* were Rs. 6-6, *Elgin Mills* Rs. 18-12, *Kesoram* Rs. 6-5, *Muir Mills* Rs. 300 and *New Victoria* Rs. 2. *Bengal Nagpur* were Rs. 13-10 and *Benares Cotton and Silk* Rs. 2-8.

In the Engineering section there were no features of interest. *Indian Iron and Steel Corporation* have been fluctuating within narrow limits for the greater part of the week. Only towards the close a slight improvement in quotations has been recorded following the sharp rise in prices for Tata Deferreds. *Indian Iron* closed at Rs. 31-2 and *Steel Corporation* at Rs. 19-2. *Burn & Co.* were uninteresting, being quoted at Rs. 380. *Braithwaite & Co.* were slightly lower at Rs. 10. A higher dividend of eight annas per share is to be paid for the year year 1940.. There was some enquiry for *Hukumchand Electric Steel* Ordinaries around Rs. 10-6. *National Iron and Steel* were Rs. 8-4 and *B. I. Electric Construction* Rs. 8-4.

In the Sugar section *Ramnugger Sugar and Cane* were better at Rs. 8-4. *New Savan* were noted at Rs. 7-12, *Balrampore* at Rs. 7-4 and *Murree Brewery* at Rs. 18-4.

A smaller number of transactions has been recorded in the Tea section and quotations are slightly lower. The results of the *Dessai Hand Parbuttia Tea Co., Ld.*, indicate that there has been a sharp increase in working expenses during last year. Also the quota for the next season has been reduced from 92½ per cent. to 90 per cent. *Bishnauth* were Rs. 25-8, *Hasimara* Rs. 42, *Sapoi* Rs. 10-4 and *Tezpore* Rs. 8-2.

In the miscellaneous section, *Burma Corporation* and *Indian Copper Corporation* have been fluctuating around last levels. *B. I. Corporation* have been listless around Rs. 4-9 while *Dunlop Rubber* also have been a shade easier at Rs. 39-8. *Indian Cable* were steady at Rs. 21-12. *Bararee Coke* were steady at Rs. 21-1. *Assam Saw* were Rs. 3-11 and *Borooah Timber* Rs. 15-6. Paper shares are slightly easier with *India Paper Pulp* quoting Rs. 142-8 and *Titaghur Paper* Rs. 16-14. *Mysore Paper* were Rs. 14-10 and *Orient Paper* Rs. 10-12. *Midnapore Zemindary* were lower at Rs. 70. *Bengal Assam Steamship* were Rs. 249-8 and *Calcutta Landing and Shipping* Rs. 16.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, February 27.

Money.—The demand for funds continued to be dull and call money was quoted at ½ per cent.

Exchange Market.—This section remained featureless and the rates ruled unchanged.

Securities.—Very little business was put through in the securities market during the week where prices tended to slightly lower levels. The sharp fall was attributed to selling by disappointed and weak holders following the increased tension in the Far East and the Balkans. 3½ per cent Paper, after opening at Rs. 95, gradually declined to close at Rs. 94-10. There were sellers in all other scrips, 1948/52 being offered at Rs. 96-12 ; 1951/54 at Rs. 99 ; 1963/65 at Rs. 94-4 ; 1947/50 at Rs. 102-2 ; 1960/70 at Rs. 108 ; 1955/60 at Rs. 113-2 ; 1945/55 at Rs. 112 and 3 per cent 1946 Defence Loan at Rs. 100-13.

Shares.—Price changes in the local share market during the week under review were minor and unimportant. Turnover was extremely small and traders preferred to watch the developments in connection with the Central Budget. The Far Eastern tension continued to influence the market. There was some nervous liquidation in shares, but prices recovered to some extent towards the close of the week on the belief that taxation in the Central Budget will not be such as to harm industrial progress. Steel shares showed a rise of few points as compared with the previous week.

Textiles.—Prices in this section opened slightly lower in sympathy with the cotton market where prices declined on liquidation following the publication of the final All-India cotton forecast which was estimated by operators to be bearish. The prices towards the close of the week, however, advanced on speculative buying in sympathy with the sharp rise in price of gold. *Bombay Dyeing* closed at Rs. 1,106-4 ; *Central India* at Rs. 306-8 ; *Century* at Rs. 381 ;

Colaba at Rs. 174 ; *Gokak* at Rs. 213-8 ; *Kohinoor* at Rs. 420; *New Great* at Rs. 453; *Swadeshi* at Rs. 282 ; *New City* at Rs. 435; and *Sholapoor* at Rs. 2,790.

Hydro-electrics.—Andhra Valley met with good investment enquiry, being done higher at Rs. 1,850 as against Rs. 1,830 in the previous week, while *Tata Power* were slightly easier at Rs. 1,625. *Tata Hydro* were done at Rs. 184. *It is notified that the whole of the outstanding 6 per cent First Mortgage Debentures will be repaid on the 1st April,* 1941.

Steels.—The belief that taxation in the Central Budget will not be such as to harm industrial progress encouraged the traders in this section and prices recorded substantial gains. *Tata* ordinaries closed higher at Rs. 389 as against Rs. 380-8 in the previous week. The deferreds showed a rise of about 60 points to close at Rs. 2,006-4.

Banks.—Bank of Baroda changed hands at Rs. 109 ; *Bank of India* at Rs. 143-12 ; *Central Bank* at Rs. 43-14 ; *Imperial Bank* fully paids at Rs. 1,550 ; contributories at Rs. 385-10 ; *Reserve Bank* at Rs. 105-8 and *Union Bank* at Rs. 6-10.

Miscellaneous.—Associated Cement met with some demand during the week on the belief that there will not be any special duty on cement production. The shares were done as high as Rs. 144-4 as against Rs. 141-4 in the previous week. *Belapur Sugar* were slightly better at Rs. 214. *Bombay Burma Trading* improved from Rs. 531-4 to Rs. 541-4. *Wimco* met with some profit-taking, closing slightly easier at Rs. 194-6. *Scindia Steam* were done at Rs. 21 ; *Tata Oil* at Rs. 41-12 ; *Indian Iron* at Rs. 31 and *Steel Corporation* ordinaries at Rs. 19. *Bombay Telephone* changed hands at Rs. 89, while *Premier Construction* were unchanged at Rs. 96.

MADRAS STOCK EXCHANGE
(From Our Correspondent)

Madras, February 27.

The local market remained very dull and featureless during the week under review. Mill shares met with good support with sellers reserved, while Sugars were firm. Rubbers met with fair enquiry. Teas remained unchanged.

Securities.—The feature of the week was characterised by the absence of buying enquiry in this section and prices were marked down. 3½ per cent Paper was done as low at Rs. 94-10, the closing level being slightly better at Rs. 94-12. 4 per cent 1960/70 changed hands at Rs. 108-1. Among State Loans, 5 per cent 1955 *Mysore Loan* were in demand at Rs. 125-8 with very few sellers in evidence. Provincial Loans were a nominal market.

Mills.—Buckingham and Carnatic continued to meet with good business, being done at Rs. 243, while *Madura* were a shade easier at Rs. 39-4. *Kohinoor* came in for business at Rs. 411 cash ; *Lakshmi* at Rs. 51 and *Vasanta* ordinaries at Rs. 115 c.d.

Plantations.—In spite of the slight rise in the price of raw commodity to 13⅛d. rubber shares showed little tendency to move up. The International Rubber Regulation Committee has fixed the basic quota for the quarter ended June, 1941 at 100 per cent. *Be Be* changed hands at Rs. 5-10 ; *Tropical Plantations* at Rs. 19 and *Midland* at Rs. 5-3. *Cochin Malabar* were in demand, being done higher at Rs. 6-14. *Kalpetta* remained unchanged at Rs. 19. Among Tea shares, *Chembra Peak* met with good support at Rs. 3-7, while *Periakaramalai* were steady at Rs. 17-12. *Balanoor* were transacted at Rs. 9-14 ; *United Nilgiri* at Rs. 121-8 and *Nilgiri Neerugundi* at Rs. 1-7.

Sugars.—Mysore Sugar showed no change at Rs. 49. *India Sugar* ordinaries were crossed at Rs. 10-2 and *E. I. D.* ordinaries at Rs. 19s. 3d. *Deccan Sugar* big shares were quoted at Rs. 223 and small shares at Rs. 55.

Miscellaneous.—Mysore Chemicals were again prominent, being done at Rs. 17-2 buyers. *Mettur Chemicals* deferreds were done at Rs. 2-8. *Spencer 'B'* preferences came in for business at Rs. 9-12. Business took place in *Associated Cement* at Rs. 138 cash ; *Orient Paper* preferences at Rs. 104-8; *Indian Iron* at Rs. 31-4 and *Steel Corporation* ordinaries at Rs. 19-2. *Amrutanjan* preferences were crossed at Rs. 97.

LONDON STOCK EXCHANGE

Firmer conditions have been noticeable on the London Stock Exchange during the past week. 3½ per cent Sterling Paper has been marked further higher at 99. British Funds have been slightly easier though there has not been any suggestion of weakness. There has been a slight recovery towards the close. 2½ per cent Consols were 77⅜, 3½ per cent Conversion 102¾, 3½ per cent War Loan 103½ and 3 per cent War Loan 101¼.

Among other sections, Tea issues have been firm and *Empire of India and Ceylon Tea* are again higher at 22s. 6d. Kaffirs have been firmer as also Oils but Burma Oil have been marked lower on the adverse developments in the Far Eastern situation. Home Rails are weak, but giltedged industrials are firmer. The export quota for tea has been reduced from 92½ per cent to 90 per cent.

NEW YORK STOCK EXCHANGE

Wall Street has been narrowly irregular during the last three days. Earlier in the week a firmer tendency was noticeable. The developments in the Far East have had a restraining influence, Meanwhile, domestic industrial business news is very good and steel mill activity is further higher. *U. S. Steel* closed at $59¼, *Central Motors* at $43¼ and *Anaconda Copper* at $23¾.

† Arrears of dividends for two years ended December, 1935.

(*Annual meeting, 3rd March, 1941 at 5 p.m. at Bombay*).

Audited accounts for the year ended 31st December, 1940 :—

The accounts show a gross profit of Rs. 5,23,547-8-5. Adding the balance brought forward of Rs. 1,785-15-7, there is a total sum of Rs. 5,25,333-8-0. After deducting the secretaries' and agents' commission of Rs. 55,919-7-2 there is a balance of Rs. 4,69,414-0-10 which the directors recommend to dispose of as follows:—

	Rs.	A.	P.
Provision for taxaion	65,000	0	0
Depreciation on buildings	40,893	15	0
Depreciation on Machinery and Plant	96,932	14	6
Depreciation on Motor Vans, Furniture and Fittings	3,906	11	0
Transfer to Old Employees' Pension Fund ...	15,000	0	0
Dividend on the Preference Shares	44,000	0	0
Dividend on the Ordinary Shares	1,12,500	0	0
Transfer to Reserve Fund	75,000	0	0
Total ...	4,53,233	8	6

leaving a balance of Rs. 16,180-8-4 to be carried forward to next year's accounts.

The directors have decided to transfer the Reserve Fund of Rs. 1,00,000, which was set aside some years ago for the purpose of building work-people's chawl to the General Reserve Fund, as owing to the conditions in housing labour in Bombay having changed so much in recent years this sum is not now likely to be required for that purpose.

The year was again marked by labour troubles which culminated in a general strike in the cotton mills in Bombay and brought about a complete cessation of work from the beginning of March until the middle of April, with resultant losses to both capital and labour.

For the first half of the year prices of manufactured goods in the main were unremunerative, but later on, following the orders placed with the mills by Government for war purposes, combined with a better export demand and declining imports, markets became more stable, and the end of the year saw an improvement throughout the industry.

Managing Agents.—Messrs. W. H. Brady & Co., Ld.

Authorised, Issued and Subscribed Capital—Rs. 23,00,000 in 7,500 Ordy. and 4,000 5½ per cent annum. Pref., both of Rs. 200 each, fully paid up.

‡ Includes Bonus of Rs. 6 per share.

(*Annual meeting, 6th March, 1941 at 4-30 p.m. at Bombay*).

Audited accounts for the year ended 31st December, 1940 :—

The accounts show that, after providing for the Depreciation as well as Rs. 1,81,000 for Income-tax and Super-tax, the year's working has resulted in a net profit of Rs. 4,77,592 which, together with the amount of Rs. 29,652 brought forward from last year, makes a total of Rs. 5,07,244 which the Directors recommend should be disposed of as follows:—

	Rs.	A.	P.
Dividend for the year at Rs. 12 per share, free of income-tax	3,00,648	0	0
Bonus for the year at Rs. 6 per share, free of income-tax	1,50,324	0	0
Employees' Provident Fund	22,092	0	0

leaving a balance of Rs. 10,180 to carried forward.

Depreciation based on the written down value system recently brought into force amounts to Rs. 4,47,170 which includes an allowance of 50 per cent on Machinery on double shift working. In view of this allowance, the directors have not thought it necessary to set aside any further sum for depreciation.

Trading Conditions.—Owing to the serious reverses suffered by the Allies during the early part of 1940, culminating in the defeat of France in June great uncertainty prevailed in all markets at that time, and the prices of cloth and yarn fell to very low levels. A contributory factor to the poor state of the Textile Industry was the strike which took place in March and April, and lasted for about 7 weeks.

With an improvement in the war situation during the second half of the year, confidence began to return and cloth and yarn prices improved.

No. 3 Mill.—Owing to the lack of space in Nos. 1 and 2 Mills for further expansion in well established lines, the directors purchased Messrs. Courtauld's Mill for a sum of Rs. 7,15,000. This Mill contains valuable artificial silk pocessing machinery as well as 282 looms, and work commenced on the 1st July, 1940.

Increase in Capital.—In order to finance the purchase of the New Mill and to pay for part of the new machinery received during the year, the remaining 5,000 shares of the authorised capital were issued at a premium of Rs. 150 per share and with the exception of 1 share only, which has since been allotted, were fully subscribed.

Agents.—Messrs. Killick, Nixon & Co.

Authorised Capital—Rs. 30,00,000 in 30,000 shares of Rs. 100 each. Issued and Subscribed—Rs. 29,99,900 in 29,999 shares, fully paid up. Debenture Capital—Rs. 4,55,000 in 4½ per cent. taxable bearer bonds of Rs. 100 each, redeemable at par on 1st May, 1942.

Synopsis of the balance sheet as at 31st December, 1940:—

Liabilities.	Rs.	Assets.	Rs.

(*Annual meeting, 3rd March, 1941 at 2-30 p.m. at Bombay*).

Audited accounts for the year ended 31st December, 1940 :—

The working during the period under review has resulted as follows:—

	Rs.	A.	P.	Rs.	A.	P.
Land—Property net revenue ...	90,362	9	10			
Mill profits ...	3,84,930	5	1			
	4,75,292	14	11			
Deducting managing agents' commission	42,107	8	7	4,33,185	6	4
Balance brought from last year				4,692	15	10
Net profit				4,37,878	6	2
which the directors recommend to dispose of as follows:—						
Depreciation on buildings ...	49,625	7	5			
Depreciation on mill building and machinery, etc.	1,02,502	13	10			
Total deprecaition	1,52,128	5	3			
Transfer to Pension Fund ...	10,000	0	0			
Provision for Taxation ...	1,25,000	0	0			
Dividend at Rs. 5 per share ...	1,40,000	0	0	4,27,128	5	3

leaving a balance of Rs. 10,750-0-11 to be carried forward to the next account.

The net yield from the Company's land shows some increase as compared with the previous year owing to the revenue received from further two plots of land leased out as mentioned in the last report. One more plot of land was leased out during the year. The income from property was lower than in 1939, due to vacancies which occurred in the various blocks of flats, but subsequently some of the flats were engaged by the military authorities.

Managing Agents.—Messrs. W. H. Brady & Co., Ld.

Authorised Capital—Rs. 50,00,000 in 50,000 shares of Rs. 100 each. Issued and Subscribed—Rs. 28,00,000 in 28,000 shares, fully paid up.

Synopsis of the balance sheet as at 31st December, 1940:—

* On the 1st July, 1940, the Preference Shares of the Company were converted into Ordinary Shares in accordance with resolutions previously passed at a special meeting.

† Includes Rs. 50,000 transferred from Reserve for Cotton purchases.

(*Half-yearly meeting, 10th March, 1941 at 3-10 p.m.*)

Audited accounts for the half-year ended 31st December, 1940 :—

The accounts, after provision for Taxation and after writting off for Depreciation Rs. 50,000, show a profit of Rs. 1,14,905-7-11. To this has to be added the balance brought forward from the last account of Rs. 11,533-2-7, giving a total sum of Rs. 1,26,438-10-6, which the directors recommend to dispose of as follows:—

	Rs.	A.	P.
Dividend on the shares at Rs. 6 per share, free of income-tax	1,14,000	0	0
Leaving a balance of	12,438	10	6

to be carried forward.

On the 1st July, 1940, the Preference Shares of the Company were converted into Ordinary Shares in accordance with the Resolution previously passed at a special meeting and notified to all the shareholders.

After the difficulties and uncertainties which characterised the preceding period, it is satisfactory to record an improvement in trading conditions during the half-year under review. The rapid decline in raw cotton, that took place during the first six months of last year, was followed by an interval of comparative steadiness, while more favourable developments in the Middle East have recently helped to promote a return of confidence in markets generally and encouraged buyers of piecegoods or yarn to replenish their stocks. Imports of these commodities, moreover, have been reduced and with an appreciable proportion of India's production now being absorbed by Government orders or the requirements of overseas markets the position appears to be more reassuring.

Managing Agents.—Messrs. Kettlewell Bullen & Co., Ld.

Authorised Capital—Rs. 50,00,000 in 19,000 shares of Rs. 100 each. Subscribed Capital—Rs. 19,00,000 in 19,000 shares, fully paid up.

* The dividend is paid from General Reserve.

(Annual meeting, at Tuticorin, 28th March, 1941, at 4 p.m.)

Audited accounts for the year ended 31st December, 1940 :—

After allowing for depreciation and manager's commission the year's working shows a net profit of Rs. 9,98,892-10-4 which, after taking into account the debit carried forward from the previous trading period, leaves a balance at credit of Profit and Loss Account of Rs. 4,19,040-9-8.

Whilst the directors have no reason for dissatisfaction with the trade outlook, they consider it advisable, in the present abnormal situation, to defer consideration of a dividend until the General Meeting in March.

Chairman.—Mr. J. M. Doak.

Authorised Capital—Rs. 1,00,00,050 in 6,66,670 shares of Rs. 15 each....Subscribed—Rs. 87,51,240 in 5,83,416 shares, fully paid up.

* Includes Bonus of 1 per cent per annum.

(Annual meeting, 17th March, 1941 at 4-30 p.m. at Bombay).

Audited accounts for the year ended 31st December, 1940 :—

The working of the line has resulted in a net profit of Rs. 11,94,018-11-3, after making necessary provision for Taxation including Rs. 76,249-4-0 to meet Excess Profits Tax. To this must be added the sum of Rs 13,513-15-6 brought forward from last year's accounts, making Rs. 12,07,532-10-9 in all.

The directors declared *an ad-interim* dividend at the rate of 7 per cent per annum, less income-tax, which absorbed Rs. 1,61,055, leaving a balance of Rs. 7,46,477-10-9 available for distribution, which they recommend should be applied as follows:—

	Rs.	A.	P.
Dividend for the second half-year at 9 per cent per annum, less income-tax	5,92,785	0	0
Bonus for the year of 1 per cent payable less income-tax	1,31,730	0	0
Bonus to the company's staff	2,000	0	0
Balance to be carried forward	19,962	10	9
Total ...	7,46,477	10	9

Company's Contract.—The Railway Board have advised that the Company's line will be worked by the Government of India from 31st December, 1941, from which date the *B. B. and C. I. Railway*, who are at present responsible, are taken over by them. This does not alter the Company's terms of agreement with the Secretary of State in any way. *The notice was received from the Government of India on the 6th February, 1941 of their intention to exercise their option to terminate the company's contract on the 31st March, 1942.*

The following table gives a comparision of the traffic figures for the past three years:—

	1940.*	1939.	1938.
	Rs.	Rs.	Rs.
Gross earnings (passengers) ...	8,39,775	7,55,180	8,76,985
Gross earnings (merchandise)	21,17,205	17,66,603	21,17,205

* The figures for 1940 will require adjustments as the audited returns for November and December have not been received.

Agents.—Messrs. Killick, Nixon & Co.

Authorised Capital—Rs. 1,35,00,000 in 27,000 shares of Rs. 500 each. Issued and Subscribed—Rs. 1,31,73,000 in 26,346 shares, fully paid up.

Shortage of Bags

A serious shortage of bags is complained of in the important grain-growing districts of the Argentine, states the Argentine correspondent of the Indian Central Jute Committee, in his latest report.

* * *

G. I. P. Railway

The approximate traffic returns in the G. I. P. Railway for the period ended February 10, 1941, totalled Rs. 52,79,000, against Rs. 39,16,000, the actual earnings for the corresponding period in 1940. The up-to-date earnings for 1941 are Rs.14,24,03,000 against Rs. 11,91,36,000, the earnings for the corresponding period in 1940.

* * *

B.B. & C.I. Railway

The approximate traffic returns of the B. B, & C.I. Railway for the period ended, February 10, 1941, amounted to Rs. 42,46,000, against Rs. 36,48,000 and Rs. 34,13,000, the figures for the corresponding periods in 1939, and 1940, respectively. The total returns to date were Rs. 11,69,14,000 against Rs. 10,11,63,000 and Rs. 10,31,10,000 for the corresponding periods in 1939 and 1940, respectively.

* * *

B. N. Railway

Following is the statement of approximate earnings of the Bengal-Nagpur Railway Co., Ltd. for the period ended February 20, 1941 :—

		Rs.
Earnings for the period	...	36,02,000
Total to end of period	...	10,57,28,000
Corresponding period of last year	...	35,34,000
Total last year	...	9,56,36,000

MARKET POINTERS

More War Orders for Cotton Mills

The Government of India are likely to place very much heavier orders in the year 1942 than in the current year with the textile industry. In this connection the Government of India propose to appoint an Advisory Panel representing the Mill Associations of Bombay, Ahmedabad, Bengal, Indore, Southern India and Upper India Chamber of Commerce at Cawnpore. The Government of India have requested various Mill Associations to lend the services of their Secretaries as the work involved in organising any expansion of production can best be performed by such executive officers.

The first meeting of the Advisory Panel, it is understood, will be called at Delhi by the Director-General of Supply on receipt of the views of the Associations concerned.

* * *

Jute Production

The reported production of the Indian Jute Mills Association and of those non-member mills who send in other returns amounted in January to 73,030 tons. The hessian, sacking and canvas production figures showed pratically no change. The total production from the start of the season, that is, from July to January inclusive, now amounts to 533,783 tons, compared with 709,422 tons in the corresponding seven months of 1939-40, a reduction of approximately 22 per cent. The consumption of jute for the seven months is approximately 3,100,000 bales. In January, 1940, the production was 121,377 tons and in January, 1939, 95,716 tons.

* * *

Rubber Export Quota

The International Rubber Regulation Committee fixed the following percentage of basic quotas for 1941 as the permissible exportable amount:—For April-May-June 100 per cent.

* * *

Rolling Rolls for Steel Works

Further amendments in the Notification relating to export trade control are announced in the Gazette of India. The schedule attached to the notification relating to the steel control scheme contains the following additions: Rolling rolls for steel works (whether of cast iron, cast steel or forged) and constructional steel, whether fabricated or not for inclusion in the structure of any building. The notification prohibits the bringing into British India by sea from any place outside India of any iron or steel of the description specified in the schedule.

WORLD OF INDIAN FINANCE

Friday, Evening.

AFTER the small spasm of stringency evident in the past fortnight, the money market in Calcutta has again relapsed into its wonted ease. With inter-bank call money quoting ¼ per cent. and none so needy as to be borrowers even at that rate, banks are positively spurning fixed deposit money except for the longer periods. Money is thus absolutely unusable and, as one money market reporter observed, is simply pouring in from nowhere. That the credit situation is thus one of unprecedented ease is also borne out by other money market indices. Banks deposits with the Reserve Bank are showing an upward trend and it is only the Reserve Bank's statement for the week ended 28th February that shows a decline of a crore in bankers' balances with the central banking institution. How far this is to be attributed to the emergence of any trade demand for money is doubtful, especially as the Imperial Bank's advances remain practically unchanged at Rs. 35.4 crores.

The current year is probably the first year when money conditions have, far from firming up, actually eased with the advent of the busy season. Even the large offtake from the market on account of Treasury bills a few weeks ago did not make any difference to the state of the market. When such is the position, it is not a little interesting to speculate on the trend of money rates in the coming months, expecially as, according to the Finance Meber, the floating debt is to be reduced in volume by Rs. 8 crores in the new financial year. Suffice it to say that there is every prospect of the Government being able to secure its short-term requirements from the market at record low rates. This should greatly conduce to solve the few ways and means conundrums that Government might be faced with. On the other hand, one can easily foresee a time when banks' interest in Treasury Bills would dwindle to small proportions, even though alternative forms of short-term investment may be scarce.

At the moment, and for sometime to come, Treasury Bill maturities just balance the sales at Rs. 1 crore; and the high level of Central Government's cash balances with the Reserve Bank make it unlikely that a rise in the weekly sales will be effected. Meantime, such is the unusability of funds, that, even at so low a yield of about 3/8th per cent. sales of intermediates are proving extremely popular. The sale of tap bills was commenced on the 12th February and, in the three weeks following, their sales fetched Rs. 2.23 crores, Rs. 2.33 crores and Rs. 2.37 crores respectively. The sales are still being continued, and will be, until the response should prove at all disappointing, of which, however, there is absolutely no likelihood. Meantime, the average rate of accepted tenders for tender Treasury Bills is almost unchanged around eleven annas percent per annum.

These bumper sales of intermediates are reflected in the handsome rise in Central Government's balance with the Reserve Bank from Rs. 19.83 crores on February 21, 1941 to Rs. 21.85 crores on February 28. In addition, the small ways and means advance of Rs. 35 lakhs has also been liquidated. In every way, therefore, the position is clear for effecting the gigantic financial operations which would be entailed by the redemption of the sterling debt. On March 10, the authorities in the united Kingdom and in India would obtain the full returns as to the nature and size of holdings of the terminable loans. There is at present no means of knowing how much is actually held by foreign holders, but reports to hand suggest that a small bit of the total of £90 millions of sterling stock is held by Indian holders. To that extent, the utilisation of sterling balances will be less than Rs. 120 crores, because Indian holders will have to accept rupee counterparts in return for the amount of stocks surrendered.

It is a matter for surprise, not to say pain, that the sterling redemption scheme still continues to evoke criticisms which follow a curious line. The attitude of those who have or had a sneaking faith in outright repudiation of sterling obligations seems far less irrational that that of those who apprehend that the utilisation of sterling balances in London to retire our sterling debt would impair the financial backing of the currency or the strength of the rupee exchange in the post-war period. Such groundless fears are the height of topsy-turvydom in that they amount to this conclusion—that, to have a foreign debt, is the best symbol of credit.

In his budget speech, the Finance Member showed how, in the past six years, our foreign debt has been reduced by £170 millions of which £110 millions were retired since September, 1939. The sterling stocks still to be redeemed hereafter would be £165 millions, of which anything like £15 millions might be held by Indian investors.

The balance to be redeemed is £150 millions. How long will it take for India to be completely free of foreign debt?

In the seven weeks, January 3, to February 21, sterling securities in the Issue Department of the Reserve Bank rose from Rs. 131.50 crores to Rs. 140.50 crores, or by Rs. 9 crores. In the same period, foreign

TREASURY BILLS

India

Tenders for Rs. one crore of three months' Government of India Treasury Bills were opened on Tuesday, March 4, 1941. Total amount offered was Rs. 3 crores and 20 lakhs. Tenders at Rs. 99-13-3 per cent and above were accepted in full and those at Rs. 99-13-0 per cent were allotted approximately 8 per cent. Lower tenders were rejected. Total amount accepted was Rs. one crore, the average rate of accepted tenders being annas eleven and pie one per cent per annum.

Tenders for Rs. one crore of three months' Government of India Treasury Bills will be received on Tuesday, March 11, 1941. Successful tenders should make payment on Friday, March 14, or March 13, 1941, where Friday is a holiday. Other conditions are as usual.

Three months' Intermediates will be sold from March 5, 1941, to March 10, 1941 at Rs. 99-13-6 per cent subject to the conditions previously announced (viz sales can be stopped at any time without previous notice if Government think it necessary).

Three months' Intermediates sold from February 26 to March 3, 1941 amounted to Rs. 2,37,50,000.

During the week ended February 28, 1941 Government of India Treasury Bills for Rs. 6,50,00,000 were sold in favour of the Issue Department of the Reserve Bank of India.

THE MISRA HOSIERY MILLS have, from the commencement of the war, been "on active service". Working day and night, the mills have been supplying essential requirements of the Army in the knitting line.

MISRA HOSIERY cater to the requirements of the general population and comprise socks, stockings, undervests, sports shirts, interlock underwear and outerwear, for men, women and children.

Production 8,000 Articles, daily.

Finance Abroad

WITH the emergence of the Lease and Lend Bill and in the face of the almost certain prospect of its being passed by the Congress, the question of Anglo-American financial payments has naturally tended to recede into the background. No longer do facts and figures of the dwindled gold reserves of the United Kingdom nor the balance of payments as between the two countries figure so important in current discussions. The London-New York cross-rate, until only a few months ago, used to be the subject of careful and close scrutiny, whose every fluctuation excited considerable interest. It is, no doubt, sometime now since the cross-rate fell below the 4.00 mark. On the other hand, there has been a noticeable amount of firmness in the rate around the prevailing level of 4.02, and fluctations generally range between 4.02½. In normal times, even a small appreciation or depreciation in the currencies would be noted with interest, but now their significance is naturally of a limited character. In retrospect, it may be remembered that the accession of firmness to the sterling-dollar rate was achieved as much by the complete control of all transactions at both ends as by the elimination of the much-discussed free sterling market.

The history of exchange regulations however, abounds in curious and difficult phases and new problems continually arise. On the other hand, more and more new regulations have been rendered necessary from time to time, designed to check or control certain kinds of financial operations and not merely to strengthen the armoury of the exchange control. The introduction of "blocked" accounts in December last gave to British monetary vocabulary a new term that had for long been considered disreputable and was associated only with the highly controlled economies on the Continent. As from December, the British Treasury and the Bank of England as its agent, took powers to direct that any payment due to a non-resident shall be made in sterling to a blocked sterling account. What particular payments are to be treated was, of course, left to the full discretion of the authorities. To appreciate what the particular kinds of operations are which made the introduction of blocked sterling necessary, and to understand the uses to which this new category of sterling may be put, a brief resume of the experiences of the exchange control in the period prior to its introduction may not be out of place.

Actually, the official admission of the existence of blocked sterling accounts has been made only after fifteen months of its actual existence, because blocked sterling was automatically born with the coming of exchange control. In a masterly analysis and description of the working of the blocked sterling arrangements, the *Economist* traces the factors that led to its coming as well as the probable uses to which the new arrangements would lend itself. "Blocked sterling" had its origin in the fact that the non-payment of amounts due to non-residents, for which official sanction has not been given whether in the form of foreign exchange or of free sterling had created immobilised claims on London. Very often these claims were in the form of sterling funds which could not be converted into foreign currency nor could they be transferred to banking funds opened in the name of the non-resident creditor. At the outbreak of war, British film exhibitors owed substantial sums to the U. S. film industry. Similarly, there were other causes of comparable blocked sterling due to non-residents who had been unable to withdraw the proceeds of the realisations on their investments in Britain either through the official or free exchange markets. Until November, at least, the manner in which such immobilised assets could be utilised were largely left to the discretion of the interests concerned. The arrangements created very few apparent difficulties and evoked little dissatisfaction from the creditors concerned.

Commendable as this treatment of immobilised sterling claims of non-residents had been, it did not obviate certain legal difficulties of which one was that the unofficial and unadmitted blocking of sterling did not enable the resident debtor or agent to discharge his full legal obligation to his non-resident creditor, as a result of exchange regulations. It is this legal difficulty that forced the authorities to admit officially the creation of blocked sterling accounts. Payment ordinarily allowed on such accounts are the sterling proceeds of maturing securities, proceeds of the sale of estates, dissolution of partnerships etc. The funds accumulated in these accounts could only be invested in a specified list of trustee securities, and—as blocked accounts are not allowed to earn any interest, they have necessarily to be invested. It is, however, necessary to understand that no merely immobilised sterling claims will be admitted to the blocked account, nor will the many payments to which the authorities do not accord their sanction be admitted to it. The blocked sterling accounts, in fine, are something more than a residual category of sterling in which all payments due to non-residents, for which the authorities are not prepared to grant exchange, will be pooled. The scope of new accounts is to be less restricted than the above arrangement suggest.

Transfers from one blocked account to another are tabooed. But it is only in theory that this can be expected to prevent the emergence of an exchange rate for blocked sterling. The experiences of blocked currency arrangements has shown that a quotation cannot altogether be avoided. This is because there are certain obvious ways in which the ownership of blocked sterling can change without involving changes in the titular name of the account. It is with a view to reduce these unwanted operations to the minimum, that the charge of maintaining blocked sterling accounts and of investing their proceeds has been left exclusively in the hands of the joint stock banks, while the special agencies are passed over. The latter's income, however, would not be much affected on account of this by-passing of business.

WORLD OF INDIAN FINANCE

(Continued from page 428)

balances in the Banking Department increased from Rs. 59.58 crores to Rs. 66.27 crores; or by Rs. 6.69 crores. The total increase in sterling assets in seven weeks is, thus, Rs. 15.69 crores. This gives a weekly average of Rs. 2¼ crores.. Or Rs. 9 crores per month. And Rs. 108 crores in a year.

There is, besides, the significant statement in the Budget speech that the remittance programme for 1940-41 would be only £1 million. In 1941-42, far from our needing to make remittances to the Secretary of State, the Indian Government will be getting £26 millions on balance.

It almost looks as though, between now and March 31, 1942, our surplus sterling resources may be of the order of £100 millions. By the time Sir Jeremy places his next budget before the Central Assembly, he might well be able to announce that all the sterling loans left are a meagre £50 millions. With accelerated orders placed by the U. K. Government in India and with other expanded services rendered by the Indian Government, it might not be altogether fanciful to indulge in the dream of an India substantially free of foreign debt in the course of 1942—in the earlier part of 1942 rather than the latter.

The exchange market continues to be devoid of interest. The freight situation is still the dominant factor and bills are few and very far between.

The Reserve Bank's tap rate for sterling is 1s. 6d., all through for six months.

Banks were sellers of T.T. at 1s. 5 31/32d., all through for six months; banks were buyers of T.T. at 1s. 6 1/32d., for six months.

Three months' D. A. bills were quoted: 1s. 6 7/32d., for the first month; 1s. 6½d., for the second month; 1s. 6 9/32d., for the third month; and 1s. 6 5/16d., for the fourth month.

Inter-bank call money is quoted ½ per cent. nominal in Calcutta.

Budget and Economic Policy

FIRST thoughts on the budget nearly always need to be supplemented by the conclusions of further and more leisurely consideration, though to return to the subject does not imply a revision of views expressed earlier.

INDIAN FINANCE is perhaps alone in the ranks of the nationalist press to stress the essential conformity of the Budget to accepted canons of public finance. As a piece of financial policy, it would be difficult to improve upon the lines on which the Finance Member set himself to draft the picture of our national finances, faced as he is with the immense task of financing the costliest war in history. If second thoughts on his *chef d'oeuvre* suggest what may seem a modification, it is not in respect of the main lines of policy, but in respect of the diverse ancillary lines of economic policy, whose confluence and correlation determine the ultimate success of any financial policy however sound it may be in itself.

The framing of every budget and the realisation of its expectations depend on the Finance Member's assumptions and prescience in relation to the tempo of economic life. And it is a matter of no small relevance at the moment to enquire whether the forces causing the vast changes in the structure of our public finance are correctly understood and properly guided. In Sir Jeremy Raisman's term, we see, for, perhaps, the first time in India's financial history, the faint glimmerings of a financial policy which may claim to take due note alike of the verities of war and the requirements of national well-being. To widen and deepen the grooves along which that policy flows should be the desire of the Government and the public alike. A receptive and eclectic mind on the part of the former and an unprejudiced outlook on the part of the latter would greatly help in its consummation.

Sir Jeremy's unfailing courtesy and good humour are a great encouragement in this regard; and the intolerant and unflattering traditions which the Finance Department built up in the time of his predecessor have been completely lived down. It is now possible, as it was not three years ago, to visualise an era in which the right of the public to make helpful criticism of official policy, at any rate in the financial sphere, is no longer doubted.

The debates in the Central Legislature have, we regret to say, been marked by a spirit either of flippant congratulation or wholesale condemnation and do not redound to the credit of those on whom rests the onerous responsibility for sound criticism. The debates were characterised not only by an utter lack of standpoint, but there was a regrettable obtrusion of personal bias, not to say, idiosyncrasies. That a budget, which foresees a deficit of the order of Rs. 20 crores and a colossal defence expenditure of Rs. 80 crores, should provoke little more than straggling comment is, perhaps, the price the country has to pay for the barren policies of the Congress. It is to be hoped that, at least when the Finance Bill is taken up, a more informed sense of public duty will actuate the people's representatives.

As was only to be expected, it was the Finance Member's plan for making up the deficit that provoked sharp differences of opinion. Big Business in India has its own notions of what part of the deficit should be financed out of borrowing and bank credit, and what part through fresh taxation. And the millionaire in India, like his confreres all over the world, cannot take kindly to new taxation even when a substantial deficit has to be made up. He would rather that the Government financed the whole deficit by means of borrowing, so that he could have the double advantage of escaping higher taxation and getting a higher rate of interest on his investments in government loans. This attitude is not unprevalent in India and is, to say the least, essentially unsocial.

There is the other school which believes in higher taxation and the people tightening the belt in the interests of national security. And it is often argued, not without point, that, when so large a defence expansion programme has to be put through, a certain measure of economic discipline in the shape of higher taxation would be the best antidote to the onset of inflationary conditions. After all, borrowing to finance the current deficits entailed by a large defence expenditure would only be an addition to the unproductive debt; and the lower it is kept down, the better.

The Finance Member's proposal to raise no more than a third of the anticipated deficit from new taxation is eminently satisfactory. The justification for it lies as much in the conditions created by the repatriation of our sterling obligations to the tune of Rs. 120 crores, as in the admittedly vital fact that the country cannot, at this stage, be called upon to shoulder too large a burden of taxation. To take up the latter point first: the new taxation proposed can, on the whole, claim that it leaves the lower income groups largely unaffected. And, by common consent, the enhancement of the Central surcharge on income-tax, and the raising of the E.P.T. levy are calculated to make the rich pay more. The rise in the latter levy has called forth from industry the complaint that it is called upon to pay for a war which, to some sections at least, has not been an unmixed blessing. In reply to the representations of the Federation of Indian Chambers of Commerce and Industry, the Finance Member stated that the incidence of the E.P.T. on industry was exaggerated.

While this may be true in a measure, the Government has a duty to see that it affects only those to whom war has provided any gains. The importance of this standpoint cannot be exaggerated. The success of the defence programme and the improvement in productive technique and output will both be conditioned in a large measure by the elasticity of the taxation policy pursued. All that can be claimed by the Finance Member is that the burden that Indian industry is called upon to bear has not, by comparison with other countries of the world, reached anywhere near snapping point. Had pre-war industrial policy been more enlightened, one which would have speeded up industrialisation, the Government could to-day command greater moral support in bringing forth proposals for new heavier taxation. In this sense, and to this degree, the sins of past neglect have perforce to be visited on the present and future generations in the shape of a needless addition to the unproductive public debt of the country.

In advocating the financing of the 1941-42 deficit by borrowing to the extent of Rs. 14 crores, the Finance Member has the great argument to fall back upon, that the total public debt of the country is very soon to suffer a handsome shrinkage. The comfortable ways and means position, the contemplated reduction in short-term debt, the steadfast adherence to cheap money, and the low interest on new borrowing are only a few of the impressive array of evidence that Government can cite in defence of its budgetary programme. In his last two budgets, Sir Jeremy Raisman has shown a refreshing freedom from the horror of deficits which marked the official mind, not so long ago. It is, we contend, not heterodox to suggest that, to a country with the unimpugnable credit-worthiness of India, the financing of a portion of its mounting defence expenditure may well be undertaken by means of a borrowing policy fashioned on correct and modern lines. From the first, the present Finance Member can claim to have acted with foresight of the shape of things to come. That claim would rest on his clear conviction that the sheet-anchor of financial policy during his regime must be a sound credit policy which, while helping a reduction in current expenditure, would facilitate easy and cheap borrowing. It is a far cry from the days of Finance Members to whom dear money was the first article of economic faith to one who is candid enough to avow that the official pursuit of cheap money to-day would be no more than "enlightened self-interest."

The part of the budget, which really should have received the most critical attention but has not, is the defence budget. The country has a right to ask whether so large an expenditure of Rs. 80 crores must be accepted as a *chose jugee*, and whether, if it is, it is directed along channels that would ensure a higher quantum of industrial production in the country. The account given by the Finance Member as to the progress of our defensive preparations is certainly heartening. But enthusiasm is also damped by the misgiving, which is fast becoming a fear, in the country that there is a lot of wasteful expenditure, which greater official vigilance can well prevent. Waste in so crucial a time as this would be criminal; and the enormously inflated salaries and payments figuring in the defence bill are indefensible. It is time that the Finance Member paid heed to the clamant requests of the public to have a Committee, which would not only put a check on these vagaries but suggest, where possible, retrenchment. The failure of the Government to associate Indian opinion in the working of the Defence Department naturally induces scepticism as to the justification for the large expenditures now undertaken. Sir Jeremy owes it to himself to take early action in this regard.

Plunder and Poverty

MANY stories have appeared in recent months to show that the new order, if still an aspiration, is not all jam for the millions of subjugated Europe. Behind the new order there lurks a formidable machine bent not only on propaganda but on plunder. The scraps of information provided by neutral reporters have, at times, looked crude, blatant and ill-assorted; but their truth has never been questioned. It is well to know how high the cost of Hitler really is, in terms of suffering for the people in the occupied countries.

Explanations are seldom so interesting as facts. And the facts collected and collated in an admirable way are to hand in the new Penguin Special *Europe in Chains*. Dr. Paul Einzig has surely taken the measure of the Nazis long ago and the man who gave the low-down on the bloodless invasion gives the dismal, dolorous story that began with the *Anschluss* and has not come to an end yet. It is a formidable charge sheet that is presented against the Nazis, and not even the exigencies of war can be offered in extenuation. The swift progress of events since September when Dr. Einzig finished writing his book does not detract from the correctness of his main conclusions. Nations beaten in battle are condemned to poverty and misery.

The facts of industrial conscription and of remorseless looting are now unchallenged, and the experience of France, pressed insistently to co-operate since December when Laval was ejected by Petain is no more encouraging than that of Denmark which yielded without protest. The economic history of Europe in 1940 is not in the least distorted by charges and counter-charges such as that Britain's economic warfare is responsible for short commons in many countries. For, given the record of the Nazis in Austria, Poland and Czechoslovakia, it could hardly be otherwise. The Nazi mind, cold, clear, precise and inhuman is intoxicated not only by the lust for power but by the heady wine of swift successes, and the oppression, in Norway, Holland and above all, in Poland is the final proof of the incapacity of Germans to rule either themselves or others. But Dr. Einzig does not go all the way with his analysis of Nazi psychology. He is really concerned with describing how the German war machine has abandoned nearly all the rules of war and even more concerned with chronicling the consequences for the forgotten common man. They are equally unpleasant, both in prospect and retrospect, almost alike for those which yielded without fighting and for those which refused to take it lying down. The destruction of civil liberty is one thing, the ruin of the means of production is another. The rupture of neutrality means plunder, and in thirteen chapters running into 128 pages only, Dr. Einzig shows how clever, how violent and how systematic Nazi spoliation has been. Aggression has never taken a subtler form than in Holland where the exchange has been fixed to let the Nazis bring up the stocks of tin, copper etc., remove all portable property, curtail the issue of fuel to industries and to consumers. And Dutch workmen deprived of work and unemployment benefit in Holland are latterly forced to seek work in German factories. The calculated savagery of the procedure is not

masked by attempts to delude the Dutch by fair words. The Gestapo is too patent and unpleasant to reconcile Holland where patriotism survives amid privation.

While British war aims remain undefined, and people in the occupied countries often acquire the feeling that it is no use struggling, the Germans have thrown away nearly all their advantages by unmitigated greed. Even the Fifth Column in Holland and France must be repentant because Nazi performance is infinitely worse than Nazi promises. Occupied France has felt the weight of German capacity. The daily bill for the garrison is about £5 million and the Bank of France has continuously lost gold. Belgium and Norway have their gold abroad under the control of the governments in exile and only the prompt blocking of assets in the U. S. A. has saved a portion of the carefully husbanded wealth of European nations. The story of Belgium's gold and of Norway's too, brings out the audacity and hideousness of the currency experiments inaugurated by the German commissars. It is never too late to condemn, once the responsibility is fixed, and Dr. Einzig, himself of foreign birth but every inch a good European, totals up the score against the Nazis.

In Austria, the Nazis cut their teeth on the carefully stored up reserves of the Central Bank, doubly valuable as the Reichsbank was almost at the end of its tether. The Jews suffered inevitably and Nazi officials beat Verres hollow in the minor matter of private extortions. Established concerns were taken over and German tourists made cheap tours to the Tyrol. Austria is therefore numb in her grief. The stoicism of suffering may have been late in coming but in Czechoslovakia, too, the experience has been even more unhappy. The acquisition of the Skoda shares at a price fixed by the Nazis, the transfer, under duress, of the shares of Czech banks in local companies or by the devious machinery of new issue and allotment at a special price forged new fetters for a once prosperous industrial country. The term Protectorate does not obscure the ferocity of German spoilation. Even the pulling of wires which made the B.I.S. order payment of Czech gold worth £6 millions, which went to Berlin inevitably, was a minor operation in the campaign of plunder that has brought banking and industry under German control with German staffs in charge. Imperialism in the Congo and Brazil pales into insignificance before the way in which the Bohemian Discount Bank lost its assets. The Bank was forced to give up its branches to the Dresdner Bank after the Munich agreement. Certain overdraits of insolvent debtors were rejected because of the confiscation of Jewish assets. In such circumstances, it was not difficult to induce the Bohemian Bank to come under the control of the Dresdner Bank. This is only an example of the abominable ingenuity which has led to the statement by a Herr Doktor that there was no such thing as inflation in Holland. There was only a shortage of most articles needed for consumption and a surplus of purchasing power arising from the issue of additional currency.

The story of Denmark where half the livestock have gone to swell German meat rations because cattleteed could not be procured, could be paralleled by the tale of millions of chickens sent off to Germany from Holland. The Dutch dairy industry is not so badly off as the Danish industry, but nobody can say how things have shaped during the winter. The Danish market for coal has been captured, but shortage of fuel hampers all industries, save those feeding the German war machine. The world famous Diesel works of Burmeister and Waine at Copenhagen, were seized by the occupation authorities and set to produce motor vessels for the German navy.

The manner in which forged notes were issued by the High Commissioner in Norway, who got hold of the printing press of the Bank of Norway, makes it clear that Quisling got little out of his treachery. Rationing according to a set pattern followed the capture of Norway's stocks of food and raw materials. The six month's supply of petrol was seized and civilian consumption virtually prohibited. The sugar stocks, too, went down the German maw, and Sweden was requested in July to help with a little sugar.

It is only natural that Dr. Einzig who tells at length the story of German greed and cruelty, should argue why the blockade should go on. And Dr. Einzig who wears his learning lightly does not find it hard to explain that the blockade, if it has been countered by the organised looting of ten months, does not lack plan or purpose. Though few will agree at present that Soviet Russia is viewed by the Nazis as part of Germany's *lebensraum*, mainly because of Hitler's overpowering dread of a war on two fronts, there may be truth in the statement that the British Navy and airforce unwillingly act as the Soviet Union's first line of defence. This is not the only striking or original observation in a book that makes for reflection and action too.

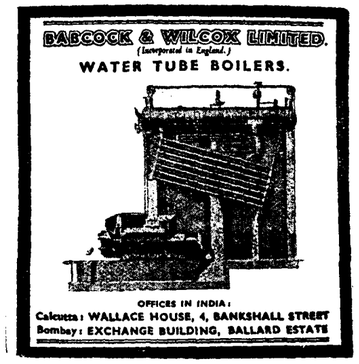
Editorial Notes

Trade in January

The seaborne trade accounts of British India bear witness to a striking recovery in January after the recession in December. Imports are up by Rs. 3.66 crores and this explains the parallel rise in re-exports. The value of retained imports in January amounts to Rs. 13 crores while the value of Indian exports in the month comes to Rs. 19.79 crores nearly. It will appear from the summary total of figures that exports in all the months of 1940-41 except November-December and January topped the totals for the corresponding months of 1939-40. Yet the decrease as compared with the busy months of 1939-40 carried with it a warning that India's export trade is hardly in very good condition. The major element in the export situation still appears to be the limited supply of shipping, and if exports in January show an improvement of over Rs. 3.84 crores at the same time, as the value of imports has risen from Rs. 11.03 crores to Rs. 14.71 crores, the explanation may be provided by an intensification of shipping activity during a particular month though, the tonnage statistics cannot be adduced to support such a view. The ten months' totals would appear to indicate that in the second year of war India's foreign trade has almost attained something like equilibrium. If due regard be had, first to the freight position and secondly the recession in prices in evidence since June last, one may even argue that the position shows continuous improvement. Comparisons with the corresponding periods of 1938-39 and 1939-40 would justify such a conclusion. Though the price factor in both years cannot be disregarded there is justification for saying that the balance of trade has moved further in favour of British India. Exports of Indian merchandise alone in the ten months ended January amounted in value to Rs. 163.72 crores as against Rs. 162.58 crores in 1939-40 while imports during the same period show a fall of over Rs. 4 crores compared with the ten months of the previous year. The rise under imports of dyestuffs, drugs and chemicals as also steel is capable of a different explanation. The simultaneous growth in the exports of wholly or mainly manufactured goods from India during 1940-41 is the development of the highest interest. It has been more than once mentioned that India is the source of textile manufactures other than sacking and hessian. Jute manufactures alone account for an increase of Rs. 2.31 crores compared with 1939-40 though the increase would disappear if comparisons are made on the basis of a full year. Manufactures have gone up by Rs. 11.24 crores largely on account of a rise of Rs. 6.5 crores under cotton manufactures incidentally showing that exports have almost doubled in value since new markets have turned to India. The rise of Rs. 1.51 crores under iron and steel is as significant as the rise of Rs. 20.75 lakhs under paper and pasteboard. India's raw material exports have gone down by Rs. 12.56 crores (coal, rubber and shellac being exceptions to the general decline) as compared with the ten months of 1939-40 while exports of manufactures and foodstuffs have risen by Rs. 11.24 and Rs. 2.59 crores respectively.

The City



Finished before the outbreak of war **"The City"*** is an able endeavour to give a factual summary of all the financial markets in the City of London. The book is the result of discussions carried on by the "Enquirers' Club", which meets in Toynbee Hall. The subject chosen for the 1935-36 session of the Club was "The City and its Activities". Following the usual practice of the club, specialists in the different fields of City activity explained their work and were cross-examined. Mr. Barnard Ellinger, M.A., acted as **rapporteur** of the meetings and eventually summarised the huge mass of matter collected in the present book.

The greatest value of this work will be historical. Although just published the book deals with City markets as they were before the outbreak of war. No attempt has been made to record the numerous and drastic changes which have taken place in the routine of the City since September 1939. After the war it is probable that many of the old City institutions will pass away or will be drastically reorganised. For this reason alone, therefore, any publication which gives a factual picture of things as they were before the war will be of inestimable value to the historian.

Mr. Ellinger has gone into considerable detail and covers many of the lesser known functions of the City, such as the National Savings Organisations, the Investment Trusts, and the Insurance Companies, all of which play a large part in the distribution and flow of capital into business and to the Government. He also very thoroughly explains the functions of the Merchant Banks, the Discount Market, the Foreign Exchange Market, the Colonial and Overseas Banks, and the Exchange Equalisation Account.

His history of the Bank of England and the Joint Stock Banks is full. Critics of the "Bank" will perhaps quarrel with his unintentional attempt to give the good side only of its doings and to throw cold water on most of the recent criticisms of its activities. The value of the work is not, however, spoilt by this partiality. R. G. C.

Industry and Research

The committee that met last month to discuss ways in which industrial research should be utilised reached certain decisions. Research schemes which can be exploited without much capital investment or the creation of plant and machinery or as cottage industries and are of general public benefit may be released without any ed thereto. With reference to other research schmes, applications should be invited on the widest possible scale possible from those interested in the development of such research schemes. Any information regarding the nature of the schemes should be circulated to commercial organisations, associations of employers and others specially interested. These two decisions conform to expectations. There will be no suspicion of favouritism or improper patronage if full publicity is secured and special concessions allowed in regard to small industries show that their inability to pay for patents or to for research done is recognised. These two decisions are beyond criticism, and the Commerce Member has helped the committee to define the conditions requisite for selecting any concern or concerns to develop any research scheme from a point at which commercial utilisation is held desirable. In selecting the individual concern, attention will be paid to the financial resources of the company, the technical skill available, advantages in regard to labour, raw materials, transport fcilities and markets as also the terms relating to payment of royalties. Another condition accepted is that regard should be had to the proper location of the industry and the number of concerns which utilise the results of research without overproduction. Thus the Commerce Member's remark in regard to industrial location has been of definite value, and the risks of the future are to be assessed in relation to the possibilities. Other terms accepted by the conference relate to the existence of facilities of further research under the auspices of any concern favoured with the grant of any patent or other rights. If the results of research made available are not properly or promptly utilised, Government reserve the power to withdraw the concession and turn them over to other concerns. The communication of any secret process is to be governed by the terms laid down for patens and in case, the results of research are made available to several concerns, the results of further research conducted at the instance of any of them, should be given to all concerned. The new conditions afford a safeguard against the spirit of monopoly and ensure the successful development of the research schemes while the assumption that financial terms should not override considerations of national advantage. Will be acceptable to all. To safeguard against mistakes, the Government intend to make use of the advice of an *ad hoc* committee in selecting the enterprise which is to be favoured. And the committee will be composed of members of the Research Utilisation Committee who have some special knowledge but have no personal interest in the promotion of that particular industry. A further decision of great consequence is the creation out of the royalties received of a separate fund for the further endowment of research. But most of the other decisions such as Government control of new concerns made possible by the results of research and engaged in producing a basic product of importance to other industries and the starting of a new journal relating to the application of research follow from the acceptance of the principle that the Government, in making available the results of research, should lay down conditions that they will be of permanent value and that industry's own requirements in regard to research in the future would not be ignored in case it was possible to comply with the conditions laid down.

Shops Act Rules

In a letter addressed by the Bengal Chamber of Commerce, reference is made to the draft rules made under the Shops Act. The letter deprecates the tendency to exceed in the proposed Rules the legal authority which the Act confers. Detailed comment is made on the draft rules published with the Notification of January, 7. The Chamber has drawn attention to the provisions of Draft Rule 6 relating to the method of inspection and the powers of inspectors; to Rules 11 and 12 with forms C and D respectively, which attempt to impose on commercial establishments certain obligations which the Act, does not authorise and to Rule 14 relating to leave, which in the Chamber's opinion, goes beyond the implications of Section 12 of the Act, in so far as it applies to commercial establishments. A request for consideration of the points raised by the criticism of the rules is necessarily a request for revision before final promulgation of the rules. The Chamber has, in the letter, asked for changes in the rule governing the suspension of the provision in the Act, which requires the closing of shops by 8 p.m. The Draft Rule makes an exception of certain holidays when the hours regulation will not apply, and the Government is empowered to extent the closing hour of shops during the month of Ramzan. The Chamber recommends that the words' by notification in the official gazette should be added to the draft rule. A plea that the qualifications of the inspectorate should be as high as possible is made in commenting on the provision that one who is directly or indirectly interested in a shop or establishment coming under the Act, is disqualified to act as an inspector. A change in the method of inspection prescribed by the draft rules is favoured

and the Chamber wants the incorporation of a clause 'that the inspector shall not as far as possible cause any suspension of business in conducting the inspection.' The Chamber also wants to restrict the power of interrogation conferred by Rule 6 and it is recommended that all that can be done is to put in a clause 'that the Inspector may require any explanation of any prescribed record, register or notice as he may consider necessary for the purpose of the Shops Act.' The maintenance of a visit book so as to permit the inspector to put down his remarks is not unacceptable but the Chamber wants that the time allowed for reply to any demand for information must be 15 days instead of 7 days. Changes in the form of the leave and overtime work register are recommended on the ground that certain provisions of the Act do not apply to commercial establishments and more time than is provided by Rule 11 is required to keep up the entries in the register. The Chamber points out that the rule relating to the keeping of an Acquittance roll is not warranted by the Act and nothing more can be attempted than compliance with Section 11.

Advances and Profits Up

Few banks have succeeded in reporting uniform progress in all directions during the last year. The Indian Bank was an exception since it has long occupied an unquestioned position in the southern province, and each year has seen the Bank's resources augmented and the Reserves have kept rising steadily. The preliminary profit statement of the Indian Bank, Ltd., for the year ended December 31, 1940 made sufficiently encouraging reading to make one regard the detailed statement of accounts now available as memorable in every respect. The strong expansionist trend discernible in most bank statements distinguishes that of the Indian Bank. One distinguishing feature to which attention may be usefully drawn, is the simultaneous though not strictly proportionate, rise under Advances. If the Indian Bank has escaped the contraction recorded under Advances, it is a striking indication of the prosperity to which the Directors' Report bears witness. The net profit has risen from Rs. 3,16,947-3-2 shown in the last balance sheet to Rs. 4,18,167-5 in the statement published in this issue of *Indian Finance*. The striking growth of profits despite the restraining influences of wartime can only be explained by the statement that the tide is still running strongly in favour of the Indian Bank. The significant rise in Deposits which are returned at over Rs. 511.64 lakhs proves that the Indian Bank has almost passed the stage of being one of the Little Five. It is noteworthy that adverse circumstances peculiar to South India have not held up the progress of Madras' *premier bank*, and the satisfaction derived from a contemplation of uninterrupted progress is enhanced by the realisation that it is wholly deserved. The increase in the cash balances returned in the balance-sheet as on Dec. 31st, 1940 is a measure of the policy pursued unswervingly, unremittingly by a Board that has certainly derived advantages from the infusion of new blood. If the rise in Deposits is a generic feature of recent statements the rise in Advances marks off the Indian Bank as one receiving greater attention as a possible lender and the increase under Bills suggests that trade demand has favoured the Indian Bank more than its rivals. The striking increase under Bills negotiated, Letters of Credit and exchange contracts shows that the connections and influence have expanded more rapidly than expected. The Indian Bank has benefited like other Banks from the spread of the banking habit though no new branches have been opened. If part of the increase in Deposits is distributed as between Cash and Investments it reflects credit on a management intent on preserving a high degree of liquidity at all times. The cash ratio is well over 20 per cent. and all the marks of increased turnover to which reference has been made are merely marks of public approval and confidence, deserved and strengthened year after year. If the disposal of the year's profits conforms to approval and moral practice, it must be noted that the shareholder's part of the profits is barely a third of the year's profits. And the earnings cover for the Indian Bank shares is well over 30 per cent. This is certainly a fact to invite comment among shareholders who get 10 per cent. free of tax plus a bonus of 1¼ per cent. but more important is the amplitude of Reserves totalling Rs. 15 lakhs against a capital of Rs. 12,79,280. In spite of increased provision for taxation, the Investment Reserve Fund is replenished and the sum carried forward to 1941 is slightly higher than the last transfer from the books. The Indian Bank results surpass general expectations, and are therefore welcome as an indication that banking in South India is now fully normal and that the leading institutions have more than made up the leeway in the years after the crisis of 1938.

"I must have liberty
Withal, as large a charter as the wind
To blow on whom I please."
—(As You Like It.)

My observations of last week on budgets and public finance, the reader may have guessed, were written before the copy of Sir Jeremy Raisman's budget speech was received in this office. And there was little difficulty in defining in advance my attitude to the Budget, as I was viewing the need for new taxation, of which there could be no doubt, against the background of changes in public finance, not only in India, but all the world over. For the old attitude to financial policy and new taxation is not only indefensible, but thoroughly unhelpful alike to the individual and to the State. How could one reconcile oneself to the State having the bigger slice of one's income except with the aid of a new outlook? And in India, how can we persuade ourselves that it is legitimate to spend crores on a war of others' making, when the Government had been grudging lakhs for the most vital needs of national life?

It is, no doubt, easy to shut one's eyes to all that has happened and all that is happening in the world, to insist that army expenditure is just as wrong when there is a war on as when there is none, and to continue the criticism of the budget in the same old spirit. As I said, such a criticism would be a mere indulgence in old habits. It would be singularly unhelpful. The only person, who can reasonably indulge in such criticism, is not the ordinary nationalist, whose mind is divided between war and isolation, economy of war expenditure and war profits, but the sincere follower of Gandhiji, the true exponent of non-violence. With him, there can be no argument. Either he has his way or he has not, and chooses some corner of the world from which to propagate his doctrines. For all others, the war is an inexorable fact; and arming for the war a necessary evil. All the past sins of commission and omission which would have been extremely pertinent in the context of criticism of the budget, are now utterly irrelevant. Take your stand on the present; and when you do, you get a new outlook, a new sense of proportion.

There is another important consideration which makes criticism in the usual way so utterly meaningless. And that is nothing more than another of the unalterable facts of the present situation, that the budget is not a reasonably certain programme of revenue and expenditure for the next twelve months. The current financial year saw a supplementary emergency budget in November last. And there is, and there can be, no manner of assurance that a similar necessity will not arise in 1941-42. It is impossible to fix the scale of war expenditure in advance. On both sides of the budget changes will not be such as will mutually offset one another. Nothing will be gained, therefore, by extracting Rs. 50 lakhs or Rs. 1 crore for the so-called nation-building projects, when the fate of the nation is being made or marred by other imponderable forces. What matters today is the general principles with which financial policy during the war is being framed and followed. And it is only from that broad standpoint that any valid criticism can be made.

INDIAN FINANCE'S comments on the budget are made precisely from this standpoint. The most important criterion from this point of view is the proportion in which war expenditure is being met by current revenue and by borrowing. The division of the burden of war expenditure between the present generation and posterity has somewhat lost in importance in countries like Great Britain. For the whole nation is straining to save itself. The bulk of the war effort is not through the expenditure of public money, but through the spontaneous efforts of individual men and women. There is no means—nor does any one ask for it—of effecting an equality of sacrifice in respect of the war. The whole thing rests on the communist principle that every one shall give of his best and, with a little variation, take the least he can do with. In these circumstances, there is no thought of the possible inequalities of taxation. Conditions in India are different. Here the question of dividing expenditure between revenue and loans still retains its importance, partly because heavier taxation involves handicaps for current economic activity, but even more because future generations will be better able to bear the additional burdens than the present. For, much of the expenditure on the war has great significance to the productive capacity of the future. So long as care is taken in the present that a fair part of war expenditure is met by taxation, and that the burden left for the future is not rendered heavier by onerous interest charges, we can have a clean conscience. There is also the other consideration that the utmost possible economy is being exercised in incurring current war expenditure. If we apply these criteria to Sir Jeremy's second budget, there is only one

respect in which it is open to serious criticism.

I consider it a serious defect that, when public expenditure has gone up by crores, Sir Jeremy had not a word to say about economy and retrenchment. The urgency and imperative character of the projects now undertaken is in itself no assurance that strict economy and vigilance are being exercised. On the other hand, expansion in so many different directions, all at the same time, creates in the Departments concerned a bias in favour of liberal expenditure. Cases are not unknown where salaries have been increased two or three times, and new cadres on very liberal scales of pay have been created. Not all these can be completely justified. To subject the Departments to a fever of excitement about new grades and new work may be quite necessary. But, neglect of considerations of economy is an accompaniment of it. And it is the task of the Finance Member to provide the machinery which will offset this danger. May I suggest to Sir Jeremy that a special officer for scrutiny of expenditure in new departments will go a long way to allay public apprehension in this regard? The decision to allow comparatively small additions to the unproductive debt and the successful efforts to reduce interest charges and increase our capacity to carry a heavier load of unproductive debt are, indeed, great achievements. But they are incomplete without provision for economy. For the success of war finance depends less on what we do now for the present than on the way we prepare ourselves for the future. If a supplementary budget should become essential in a few months, then everything that Government omits to do now will become important. There can be no stronger claim to new taxes in the future than that Government have exercised the greatest vigilance over current expenditure.

Talking of a possible Supplementary Budget, I cannot help saying that the best financial policy one can think of will not be sufficient to persuade the country to acquiesce in further new taxation. Political discontent has so far been wholly inoperative in the practical plane. But the next instalment of increase in taxation might well make a serious difference. Thrice have taxes been stepped up in the last thirteen months. And though there is a well-organised political party and an active political movement afoot, nothing has been said of the increased taxation. That is chiefly because political sentiment has been raised by the unique personality of the Mahatma to a different plane where the ordinary grouses of political malcontents have no reference. In fact, the Congress has little relation even to ordinary political demands such as the expansion of the Viceroy's Executive Council, or the next provincial election. It has hitched its wagon to the star of some other solar system. A pice more on the rupee by way of income-tax is now altogether beneath its notice. It has other notions of political proprieties. It is still swearing by the old formulæ of non-embarrassment. And that is why the Government have been able to increase taxes without having to encounter any discontent. But there is no certainty that the next increase will not make a difference. For by the time more taxation becomes necessary, there will have been considerable changes in the attitude of other groups. Those who had looked at the troubles of the Congress as their opportunity will have been thoroughly disillusioned and will have become less disinclined to play their hand. And the classes which will be called upon to foot heavier bills of public expenditure might look for a share in political power for themselves.

It requires no detailed study of the political situation to realise that the next demand on the pockets of the taxpayer had better come from a predominantly Indian, rather than a wholly foreign, government. For while the Congress might be content to continue to work for its ideals of non-violence, those who are impatient of the political stalemate might well regard the increase of tax burdens as the occasion for making political discontent more active than it is.

One would wish, therefore, that the present move that is now being taken for a political settlement will be crowned with success. Whether there is room for hope or not is more than one can say. For politicians have a way of encouraging hopes and dashing them, without extinguishing them altogether, which is particularly annoying to the working journalist, who, as soon as he receives a bit of news, has to frame his comment therein without waiting for changes in the moods of politicians. For some time, there have been numerous reports of peace moves from every quarter. Not to speak of Sir Tej Bahadur Sapru and Sir Jagdish Prasad, Dr. Varadarajulu Naidu in the South has also been moving about frantically. Mr. K. Srinivasan, the Editor of *The Hindu* is believed to have ascertained the wishes and ideas of Mr. C. Rajagopalachari who, let it be remembered, is the most astute politician in the ranks of the Congress. Sir Tej Bahadur and Sir Jagdish Prasad have both had the benefit of talks with Gandhiji which included discussions on the political situation. The Mahatma has issued a statement discouraging journalistic flights of imagination and attaching political importance to the meeting of old friends. But the fact remains that there is what Gandhiji has called "the search for common action" And the Mahatma has, for the ninth time, reiterated the fact that he has authority to conduct the Satyagraha movement and that for any change of policy, only the Congress President, the Working Committee and the A.I.C.C. have the decisive say. This statement has in the context of this search for common action a special significance. It means that, if Sir Tej Bahadur and his friends can bring round Government to agree to a scheme of immediate change that will appeal to Congress leaders other than Gandhiji, a settlement is possible. That is a small mercy we might be thankful for. More than that, one cannot say. The natural trends working for settlement are yet to become powerful or to assert themselves against the vagaries of the individuals.

Questions relating to monetary policy seldom figure in the speeches of Chairmen of companies though I am disposed to put a special cross against the recent address of Sir H. P. Mody at the annual meeting of the Central Bank. Let me say first of all that I am an unabashed admirer of Sir Homi though I don't subscribe to the somewhat arid Liberal creed. And my admiration springs not from the fact that Sir Homi is an astute businessman but that he is able to view things, so to say, in the round and take a large view of the affairs of the business community. It has often surprised me that Sir Homi Mody with his experience of the Central Assembly does not speak more often, for his speech is more than silver. If I were to presume on a long acquaintance with Chairman's speeches merely from professional habit, I should rate the recent speech as the most compressed, yet most impressive, survey of war finance. Monetary control, leading to the definite maintenance of cheap money conditions with its inseparable consequences, a low level of interest rates and stable giltedged values that has come quite early. This unusual steadiness in the money market is adequately reflected in the prolonged easiness of rates with advantages accruing to borrowers and hence to the growth of industry. This is a point on which one may linger, in spite of the fall in Advances reported by most banks, because the existence of ample facilities at terms well below the average in spite of the war is perhaps the distinctive feature of this war period. And the repercussions on industry are wholly favourable. The favourable developments in the paper, textile and engineering industries are not independent of the money conditions. And the crisis of the summer was not in any way connected with banking or industry. It was a craze for metallic currency as such and it was got over sooner than expected. But the Bank's services to industry are limited by the timorousness of entrepreneurs. The retarding factor is not hard to locate, and the remarks addressed to the Commerce Member in particular may well receive universal endorsement. The backwardness of investment may be measured by the volume of unemployed funds reflected also in the ever-rising level of balances belonging to the Scheduled Banks lodged with the Reserve Bank. The possible effects of higher taxation could only be indicated, and if Sir Homi Mody is, as I fear, a cautious pessimist, he reflects what is undoubtedly the Bombay view on the Budget and cognate topics. The change over from sterling to rupee securities was explained, and it is certainly arresting, to say the least, to find that the Central Bank has seen it fit to increase its holding of rupee securities, to invest Rs. 1½ crores in the new Defence Bonds alone so that the Bank's funds irrigate although indirectly, the field of industry that is fertilised by the arms programme. On one point, I may venture to record that Sir Homi is in complete agreement with me. His observations on the giltedged market are the essential corrective to the apprehensions born of listening to credulous and obtuse panic-mongers. Government securities have really shown extraordinary form over a year, and financiers should learn to say with Sir Homi that there is nothing so safe as giltedged even in wartime.

An entry in my diary brings to mind the name of Mr. M. P. Gandhi who has recently been roped in by the Supply Department. The new recruit to the Department whose importance continues to increase is no stranger to Calcutta where the Indian Chamber and its associated institutions have felt his vitalising touch. Mr. Gandhi has had close touch with many of our leading industries, all of which he has made the subject of special study for his very well-known annuals. Author, practical businessman and a familiar figure in business circles, he is an obvious choice for the Supply Department.

"ASK JACKS ABOUT IT"

New Delhi, March 5.

THERE were not many points of interest in the general debate on the Budget yesterday in the Central Assembly. It was only from the European Group, however, that the Government found full support for its new taxation proposals; but even Mr. Buss, the Leader of the European Group, was obliged to warn the Government that there was a mathematical limit to the maximum yield from the wealthier sections of the community and that, sooner than later, it would be necessary for the Government to broaden the basis of taxation. Another interesting point raised by Mr. Buss was the present financial position of the Provinces. He pointed out that some of them had shown substantial surpluses—some of the present Provincial Governments had gone to the extent of cancelling certain taxes which the former Congress Ministries had imposed. Was it therefore right that the Central Government, burdened already with the abnormally heavy expenditure on Defence measures, should be called upon to meet the cost of civic guards, A.R.P. measures, etc. in the Provinces? This was the question raised by Mr. Buss. In fact in the course of a talk with me on the Budget, Mr. Hossain Imam, Leader of the Muslim League Party in the Council of State, suggested that at least during the war period the Provinces should voluntarily waive the contributions which they were now receiving from the Centre under the Niemeyer Award.

Criticism of the Budget proposals in the Assembly took two main lines. Sir Cowasji Jehangir who was one of the principal speakers yesterday recognised the necessity for large scale expenditure for the defence of the country in the present war emergency, but he wanted to know what was the check on expenditure to prevent waste and extravagance. How was the public to know that it was getting full value for the money? The other point raised by Sir Cowasji was that for meeting capital expenditure in connection with war efforts the Finance Member should rely more largely on borrowing than on taxation. He gave figures to show that while in the United Kingdom last year the Government had raised by borrowing more than cent per cent of the actual revenue, the percentage in India was less than eight per cent. To this objection the Finance Member's reply was that in the conditions of India there were obvious factors operating to increase the income of important taxable classes and it would be a serious dereliction of duty to refrain from levying on those classes taxation as a current contribution to the cost of the war. From lobby reports, however, I find that in non-official circles there is a definite feeling in favour of greater borrowing to meet war expenditure in order to lessen the burden of taxation on the people.

There was a good deal of discussion on the apprehension expressed by the Federation of Indian Chambers of Commerce and Industry in its statement on the Budget. Is there any reason to think that this high level of taxation—as much as Rs. 31 crores additional taxation in the next year according to Dr. P. N. Banerji—will affect industrial enterprises? More than one member pointed out in the course of the debate that if heavy taxation was imposed on industries, it would drive away capital and discourage industrial enterprise. For instance, the Bombay businessman, Mr. Hosseinbhai Laljee, said that the high rates of income-tax, supertax, and excess profits would not leave much capital to start new industries. It was also urged that industrial concerns were entitled to a reasonable portion of war-time profits for building up reserves to meet the cost of expansion not only now but in the more difficult period after the war. A different view, however was taken by the Finance Member, for he assured the House in his reply to the debate that the effect on industry and business is not likely to be as serious or as detrimental as these critics would have us believe.

The number of "cut" motions tabled so far in the Central Assembly though not so many or so wide in this range as in previous years, gives a fairly clear idea of the subjects agitating the minds of the members. On behalf of the Muslim League Party Sir Ziauddin Ahmed has tabled a motion seeking to discuss the administration of the Supply and allied Departments. The Congress Nationalist Party appears to be anxious to raise the subject of economy and retrenchment in the Central Government's expenditure. Another question raised by Muslim Members is the recent order of the Home Department fixing a higher scale of pay for Anglo-Indians in all the Government Services. So far as the Finance Bill is concerned, all that is possible to be done this year is to raise discussions and try to make out a case for reduction in taxation. The number of Indian elected members attending the session is so small that no amendment can be carried against the Government's wishes.

It has been a matter of common knowledge that the new Commander-in-Chief General Auchinleck, has been meeting a number of non-official leaders in order to ascertain their views on Defence subjects. Nothing is yet known however of the actual plans which he has in view for associating leaders of non-official opinion with the Defence Department. Two suggestions have been made in the course of debates in the Assembly for the consideration of the Defence Member—one for the appointment of a Defence Committee to advise on questions of Defence expenditure, and another for taking suitable measures to broaden the basis of recruitment and give greater chances to provinces which have not so far been as much represented as one would have desired. It is also known that certain Provincial Governors who were recently in New Delhi pleaded with the Army authorities for further extension of recruitment in their areas and the raising of as many new units as is possible. This subject will be discussed to-morrow when Pundit Kunzru moves his resolution urging the extension to all classes and provinces of Army recruitment. An amendment has been given notice of by the Commander-in-Chief which shows that His Excellency is anxious to befriend the critics of Army policy and avoid the mistakes of his predecessors who were merely content to oppose non-official resolutions without even trying to meet non-official members half-way. The solution suggested by the Commander-in-Chief in his resolution is that the Army authorities should now review sources of man-power throughout the country and should exclude no class or area from consideration for recruitment in the formation of new units.

There has been considerable lobby speculation on the prospects of the resolution for the expansion of the Viceroy's Executive Council which Mr. Kalikar is to move to-morrow in the Council of State. As it was known that the Leader of the House, Sir G. S. Bajpai, would speak on behalf of the Government and explain in detail the intentions behind the Viceroy's offer of August last there was unusual interest. The most important points raised in the resolution were, firstly, that there should be a majority of non-official representative Indians in the Viceroy's Cabinet, and secondly that there should be Indian members in charge of Finance and Defence. It would be useful to know the Government's reactions to these proposals—particularly the proposal for the transfer of Finance and Defence to Indian members. To-day however, it appears from lobby talks that Mr. Kalikar may not after all move his resolution as his own party feels that it does not go far enough. In the opinion of members like Pundit Kunzru the demand should be for a wholly non-official Indian Cabinet and not merely for a majority.

Mr. M. P. Gandhi's appointment as Assistant Controller of War Supplies has been received with satisfaction in Delhi circles, if only as an official admission that suitable Indians for responsible posts in the War Supply Board may always be had, if only the Government were keen on it.

Bombay, March 5.

THE formal opening last week of the Dorab Tata Memorial Hospital by H. E. Sir Roger Lumley is proof of the way the Trust funds are being applied to the maximum advantage of the country. It is one more distinction claimed by the House of Tata, that industrial success leads to the provision of institutions for public welfare, and it is justly recalled that the profits earned by Tata industries go to swell the Trust funds. The people benefit directly therefrom. The new Tata Memorial Cancer Hospital is the first effort to grapple with a serious disease. Sir J. N. Duggan, formerly of the I.M.S. is the first Superintendent and two American surgeons have been appointed already to the staff. Radium therapy will not be the least of the features, and the equipment is of the highest quality. Westinghouse is largely responsible for the electrical fittings and installations. The clinic will be separate, and the special provision for lectures is meant to give the profession a chance to see what the hospital is doing. The laboratories attached to the new hospital will engage in the fight against the dread disease. The voluntary system is greatly strengthened by the latest addition to Bombay's hospitals. The clinic is designed to prove that cancer in most forms is curable disease and to add to the knowledge concerning the disease. The hospital at Parel has been described as the first large contribution of India to the international fight against the dangerous disease. The opening ceremony attracted a large number of doctors. As the hospital will treat the poor free of charge all the 100 beds procured by the hospital will not be filled by paying patients. Sir S. D. Saklatwalla who asked Sir Roger Lumley to declare the hospital open referred to the five years of hard work that had gone to make the institution impeccable in every respect. Few know that cancer takes a heavy toll of Indian lives and all will agree that the hospital will succeed in wresting from the dread scourge some of its terrible secrets as Sir Sorabji hoped. The hospital is described as one of the best equipped in the world and is a fitting memorial to the great philanthropist Sir Dorab Tata. The Tata Trustees have added one more institution to make Bombay feel that she is *urbe primis in Inde*.

The conference convened by Indian commercial interests to discuss manufacturing problems opened on Saturday last with Sir M. Visweswarayya in the chair. Important officials attended the conference which discussed ways and means of fostering Indian industries. Mr. Sankalchand G. Shah struck the right note by a rapid review of the difficulties and opportunities created by War. The absence of a plan or policy to increase the occupations, production and income of the people was deplored by the President. Sir M. Visweswarayya paused to discuss poverty and kindred problems. But industrial advance was the obvious remedy in his and everybody's opinion: yet industrial progress appears an empty dream. He urged that there was a rare opportunity to start on heavy industries for making, such requirements as ships and cars as also rayon and dyestuff. But Government had not taken active steps. The conference which met so soon after the Government order on the Industrial Survey Committee's report deprecating the grant of special facilities appeared adopted a resolution asking for the establishment of industrial banks at the instance of Government. Another resolution asked for a vigorous and refashioned tariff policy. References to the danger of foreign concerns with Indian domicile reaping tariff benefits were not absent, and one of the resolutions disapproved of the placing of long-term contracts with non-Indian companies without offering adequate opportunities to indigenous manufacturers to tender for and supply stores. The conference, however, recognised that the Stores Department had done much to promote industrial development particularly, during the war. A series of resolutions asking for a new and sympathetic industrial policy was passed without question, but the charges of neglect against Government would probably invite contradiction.

The Bombay market spent nothing more than the proverbial unpleasant quarter of an hour in digesting the Central Budget. The Stock Exchange behaved according to form. Steel shares were in demand and textiles found more support. But the higher excise on matches drove up the price of matchboxes by 50 per cent. at once. The traders who bought sugar and salt in the belief that taxation would rise were disappointed. Swift sales followed, and the price of copper and yellow metal too went down slightly. The seven-year old excise on matchboxes has been doubled. The industry will have no difficulty in shifting the burden and the promise of price control is about the only reassuring feature in the situation. The increased duty on rayon yarn has been condemned by those producing goods from imported yarn. Seth R. A. Podar representing their interests assails the Budget on the ground that a developing industry is endangered. But the cotton mill industry and the cotton trade should feel pleased. The Indian Central Cotton Committee indeed suggested an increase in the duty. While the rayon weaving mills in the Punjab and other provinces would object to the higher duty, other textile manufacturers may benefit to some extent. As the measure touches Japan, which is no longer in treaty relations with India, the proposal will have no special repercussions. The new excise on tyres will have to be paid by the consumer and the tyre-makers will promptly revise price schedules. Motorists therefore feel justified in complaining against the new excise, and those claiming to speak for road transport point out that the margin of profit would vanish in a country of bad roads.

A summary of opinions appearing in the local press on the Budget would indicate that Bombay is not indifferent to the threat of higher taxation but accepts it as inevitable. Mr. C. P. Bramble, the President of the Bombay Chamber called the Budget sound and welcomed the increase in the rate of tax on excess profits. Though middleclass salary earners would suffer to some extent, the higher surcharge in income-tax and super-tax too was justified in his opinion. The stock exchange through its President has criticised the proposals to raise both the surcharges and the E.P.T. Mr. K. R. P. Shroff observed that the yield would be inconsiderable. Sir Ardeshir Dalal admitted that distribution of new expenditure as between loans and taxation was justified but declined to agree that there was any available margin of taxable capacity. He could not endorse the proposal to double the excise duty on an article of essential consumption like matches. Professor S. R. Davar discussing the outlook for the investor has restated the case for borrowing in greater measure. Financial circles here subscribe to the view that the reduction of external debt favours borrowing at home though tax-free securities are likely to attract more and more investors. The Finance Member's loan policy is regarded as one strengthening the gilt-edged market by raising India's credit status at home and abroad. The recent drop in security values is largely independent of the Budget, being ascribed by the majority of observers to the Balkan developments. Sir Jeremy Raisman's financial methods, if unacceptable to Liberals like Sir Cowasji Jehangir, are not condemned by the more important and representative figure, the average man in the street. In a city of over 1½ millions there are not many who think that wartime burdens are excessive. The rise in defence expenditure is merely a sign of the times, and if the benefits transmitted to private industry are to be shared with the Government, few will complain. It is impossible to expect changes in the tax proposals but the special committee of the Federation of Indian Chambers of Commerce, which contest the dictum that war prosperity is a feature common to Indian industries, expects to make successful representations regarding the enhancement of the excise on matches and keeping down the excess profits tax to the previous rate.

A Resume of Commodity Markets

COMMODITY markets during the week have again been uninteresting. Only the raw cotton market has been firm in the face of the troubled situation in the Far East and quotations are several points higher on balance. It was also pointed out last week that the improvement in prices for gold was not quite understandable in the absence of any panic in the commodity and stock markets. The rise in prices has not been maintained and most of the gains have been lost. The jute and jute manufactures markets have been absolutely uninteresting. The wheat market has shown a slight tendency to recover while there has been a sharp rise in the quotation for rubber.

Jute

The jute market has been absolutely uninteresting. There is considerable difference of opinion in the market regarding the decision of the Board of Control in fixing the settlement rate on the last occasion. Speculative activity in the futures market has been at a very low ebb. The quotations have shown a tendency to move irregularly downward.

Jute Manufactures

The hessain market has not been very steady. There was even a slight suggestion of weakness. Only the announcement of new orders has had an encouraging effect towards the close. The publication of the stock figures showing a large increase in hessain stocks has had a discouraging effect. The hessain futures market reopened for business after a long time during the week.

The increase in the local stocks of hessain from 21.69 crores yards to 24.08 crores yards is mainly due to the working of mills throughout the month. Sacking cloth and bags show a decline from 14.51 crores yards to 14.24 crores yards. Stocks of hessain for ordinary consumption are sharply higher at 20.32 crores yards from 14.84 crores yards at the end of January, 1941. The reason for this big increase in stocks for ordinary consumption is the larger amount of production in February.

The jute industry has received another order during the course of a few days. The first order was for 4.5 million yards hessians and 25.00 million yards sacking and other miscellaneous items. The latest order is for one crore yards sacking and 12 lakhs yards 7½ ozs. hessains. It is also said that the jute mills have received an assurance from the Government of India that an order for 3.75 crores sand bags will be shortly placed with the industry.

Cotton

The Bombay raw cotton market has been very steady. Even the publication of a favourable forecast and the disturbed conditions in the Far East have not had any discouraging effect on the market. Quotations are several point higher on balance. The encouraging reports from cloth markets and good buying by mills have been mainly responsible for the strength of the markets.

Piecegoods

The large increase in war orders, exports and the decline in imports have kept the Indian mills busy. There have been substantial rise in the rates for piecegoods. Speaking at the annual general meeting of the Millowners Association the Chairman said that the war had stimulated demand for piecegoods from a number of Empire countries. The Netherlands East Indies and Egypt have also evinced an interest in purchases from India. Provided that necessary freight could be obtained the industry would retain tha trade during the war. The increase in production which mills have been able to effect during the last six months on account of the greater demad from the bazar, military authorities, and from overseas, has not only benefited the mills themselves but has greatly relieved the Government of India's anxiety in regard to the offtake of cotton.

Bullion

There has not been any important development in the silver and gold markets. The silver market has been absolutely uninteresing while the gold market has been easier. The sharp rise in prices at the time of last writing has not been maintained and closing prices are substantially lower on balance. As prices were pushed up higher without any reason there has been a natural reaction.

Rubber

The quota has been maintained at 100 per cent. for the second quarter of the current year. In spite of the fact that production of rubber is at a high level there has been a sharp rise in prices during the past few weeks and quotations at the present moment are at the highest levels for the year. Rubber spot is quoting 13 5/8d. and forward 13 11/16d.

Rice

The All-India final rice forecast for 1940/41 estimates the area under the crop at 72,216,000 acres against 74,255,000 acres in 1939/40, or a decrease of 3 per cent. The yield is estimated at 21,850,000 tons against 24,800,000 tons or decrease of 15 per cent.

Jute and Jute Manufactures

(From Our Jute Correspondent)

Calcutta, 6th March.

The publicity which the "rigging" of the last clearing rate in the Jute Futures market has received is apparently the cause of no little perturbation to Government, so much so that the Board of Control were summoned to appear before the Finance Minister this week and were soundly lectured on the views of Government as regards jute and the duty of the Board to support Government's efforts to support the price of jute. There may be differences of opinion as to whether this is one of the functions of the Board and we are not aware that it is incorporated in their Byelaws or Articles. But the Board was left in no doubt as to what was expected of them, without of course, any suggestion of threats or coercion by Government! The Finance Minister was most insistent that the Board had absolute discretion as to how the "clearing rate" should be fixed, and equally insistent that it should not be allowed to fall below Rs. 35-8, for Government view with apprehension any tendency for Futures prices to fall further as it might cause panic. The recent steady but very gradual decline in Futures prices has not caused any appreciable panic in the market and there were no indications of a steepening in the decline. What might however very easily cause a panic should be if there were any suggestion that the Board of Control was "monkeying" with the "clearing rate." That would almost certainly result in a rush to get out of Fatka, because if operators lose confidence in the probity of the Board, they would not be disposed to wait to get their fingers burnt. To retain such confidence the Board has a well defined method of arriving at the "clearing rate," which method was embodied in a Resolution in 1939. As the Board has absolute discretion in this matter, according to no less an authority than the Finance Minister, surely that discretion must extend, if the Board deem it advisable, to enunciating their method of fixing the clearing rate in a Resolution. It is curious therefore to find the Special Officer (Jute) in a letter to a contemporary, declaring that the Resolution referred to is *ultra vires*. Government cannot have it both ways. Either the Board has discretion or it has ot. If it has discretion, it is not a discretion to be used lightheartedly. Unless some recognised system applied to the fixation of the "clearing rate" with regard to the market, the result would be chaos. The personnel of the Board is not constant—it may change considerably in the course of a year, so what simpler method of guiding new members than to have the fixation system embodied in a Resolution.

Another curious point is that it is only the "clearing rate" which Government seem to wish upheld. They profess apprehension that the publication of declining quotations will have a depressing effect on markets and lead to panic. But the clearing rate is only published once a fortnight while the Fatka quotation is published and broadcast every day. Perhaps Government believe that the fixation of a fictitiously high clearing rate, but this by no means follows. Government profess to wish the market supported on behalf of, *inter alia*, dealers who holding stocks. It is largely hedgeselling by such holders of stocks in a market in which no buyers can be found that has been the principal cause of the recent decline in Futures, and such selling is more likely than not to continue. The maintenance of an artificially high clearing rate appears likely to benefit only whatever stale Bulls there may be about.

It was pointed out to the Finance Minister that the Board could not play fast and loose in the fixing of the clearing rate and that if Government feared the consequences of a further decline in Futures, the best thing they could do was to close the market. This step Government professed their inability to take "on account of exsiting contracts." They also professed disinclination towards the automatic suspension of operations by the fixation of a high minimum rate. What Government seems to want is that the Board of Control should act as their catspaw by fixing the clearing rate at a high level which meets with the approval of Government. It will be interesting to see the reactions of the Board to their lecture when they meet on 7th March.

Nothing has yet transpired regarding Government intentions in the matter of jute purchases to make up the shortfall in Mill purchases, but the Jute Mill Association has issued a long memorandum detailing the procedure which will be followed in the event of such purchases being made. It would almost appear that many mills are under the impression that, in the light of this memorandum, such purchases are imminent, so why should the Mills worry if Government is ready to do the buying for them! Actually the available storage accommodation is so limited that buying on an extensive scale for storage in Mill godowns is out of the question. For any Government purchases must be stored in godowns apart from other stocks. And no buying either by Government or through any other medium, unless on a definitely extensive scale, would be likely to afford adequate support to prevent a decline in jute prices at the present moment.

The Export jute market calls for little comment. Business for shipment has been almost nil and no freight allotments have yet been made. A sale of Mixing Cuttings at Rs. 13-4 is about the only transaction reported. Mills have continued to take small parcels of pucca bales specially packed to official rates. The Futures market has wavered narrowly between Rs. 33-8 and Rs. 34 but closes rather firmer at Rs. 34-5, possibly in anticipation of a high clearing rate as required by Government to-morrow.

Loose jute has also been inactive. European Middles were sold from Rs. 9 to Rs. 8-8 with Tossa Bottoms from Rs. 6-12 to Rs. 6-8. Recent rain in the districts has enabled the ground to be prepared for sowing and the progress of the restriction scheme will now be watched with interest. Jute arrivals into Calcutta during February were estimated at 9,25,000 bales against 4,48,000 bales last year, the increase being due to the support accorded by Mills to the Delhi purchase scheme. The total figure for the season to 28th February is now 66,41,000 B/s against 88,49,000 bales last season to that date.

Mill stock figures at 28th Feb., the full month having been worked, show a sharp rise in Hessians to the level of last September. Leaving aside Sandbags stored for Govt. account, the stocks of Hessian stand at 20.32 crores against 14.84 crores at the end of January an increase of 548 lakhs. 80z/40 cloth shows a further decline of 47 lakhs yards. Sackings show a slight drop of 29 lakhs yards from 14.51 crores to 14.22 crores. Mills will only work three weeks again in March, but the Committee has not yet decided regarding a "week off" in April. Fabrics have been a pretty active market in both sections. Demand for odd widths and weights of hessian for near shipment has run prices for such up to Rs. 14-8 and Rs. 14-12 in nines and to Rs. 18-8 to Rs. 18-10 in elevens. Nor have forward positions been neglected, Rs. 13-12 April/June and Rs. 13 July/December having been recorded in 9 porters and Rs. 17-6 April/June and Rs. 16-8 July/September in elevens. Up to Rs. 40 was paid for ready Cornsacks Rs. 36 for March and Rs. 33 for July/September. Up to Rs. 40-8 was paid for May/September Cubans, and Rs. 38 for 6×8 Sugars, May/June. Liverpools fetched Rs. 40 for March and Rs. 38-8 for April/June, while Union sewn "A" Twills sold at Rs. 42 March and at Rs. 41 for April. Rs. 1-9-3 was paid for April/June Woolpacks up to Rs. 33 for March "B" Twills and Rs. 32 for May/June Heavy Cees.

INDIAN TEA LICENSING COMMITTEE

Registration of Quota transfers 1940-41

PRODUCERS OF TEA ARE HEREBY NOTIFIED that the latest date for registration of transfers of Export Quota Rights in respect of the year 1940-41 is the 20th March, 1941. Quota transfers will not be registered unless the necessary transfer forms are received by the Joint Controller, from both parties to the transfer, by that date.

J. M. PYE,
Joint Controller.

JUTE

Calcutta, March 6.

The raw jute market has been absolutely uninteresting during the past week and quotations have been fluctuating in very narrow limits. There has been little speculative interest and in the absence of any mill buying and export enquiry sellers have been pressing for business. Mill purchases have been confined to only small quantities of the higher grade jutes. With the uncertainty regarding Government policy and the unwillingness of mills to complete their quota a sagging tendency has been noticeable in upcountry centres. Ryots are prepared to discount rates.

In the loose jute section there has been very little business. Mills have been buying in small quantities. Supervised Middles were done at Rs. 8-12 per maund. Balers are reported to have bought Indian District Tossa jute.

In the pucca bales section there has been very little doing. Shippers have been uninterested and mill business has been very poor. Balers are reported to be willing sellers of Firsts for ready shipment at Rs. 32 per bale. Business unfortunately is very difficult to put through owing to the considerable difficulty in booking space.

In the futures market there has been very little interest and fluctuations during the past few days have been confined to very narrow limits. Earlier in the week, a firmer tendency was noticeable on the announcement of a new order for hessian and sacking goods but the quotation receded to Rs. 33-6. There was a subsequent recovery to Rs. 34-5 and quotations have been fluctuating in narrow limits since then.

JUTE MANUFACTURES

Calcutta, March 6.

The recent order for 4.5 million yards of hessian and 25 million yards of sacking goods has had a distinctly encouraging effect on the heavy goods section. The hessian market was inclined to be firmer and 9 Porters ready were done as high as Rs. 13-3 but the higher levels have not been maintained and with some selling and the apprehension regarding the local stock figures for the month of February quotations at the present moment are lower than the highest levels for the week. They are, however, higher on balance. 9 Porters ready are quoting Rs. 14, April Rs. 13-14, May-June Rs. 13-9 and July-September Rs. 13-3. 11 Porters ready are Rs. 18, April Rs. 18, May-June Rs. 17-4 and July-September Rs. 16-5.

The hessian futures market was re-opened during the week and transactions for May position have been begun around Rs. 13-8.

In the heavy goods section definitely firmer conditions have been noticeable and there is good enquiry for the nearer positions. 'B' Twills for March shipment sold on the basis of Rs. 32-12, Liverpool Twills for the same position at Rs. 39-8 and Cornsacks at Rs. 36.

COTTON

Calcutta, March 6.

The Bombay raw cotton market has been definitely firmer. The highest levels were touched in the earlier part of the period under review. The reports regarding tension in the Far Eastern situation had a slightly discouraging effect but the settlement in the last minute on the main points has had an encouraging effect. Broach April-May closed at Rs. 189-8, July-August at Rs. 191-4, Oomra March at Rs. 148-4, May at Rs. 150, Bengal March at Rs. 119 and May at Rs. 120. The reports from cloth markets are encouraging. Export demand for Oomra qualities also is satisfactory, though the uncertainty regarding the Far Eastern situation makes it difficult to take any definite view.

Overseas markets have been better and quotations are higher in both Liverpool and New York. The strength of the American cotton exchanges has been due to the proposals regarding crop restriction in the United States and higher loan prospects. March closed at 10.43 cents and May at 10.39 cents. In Liverpool, March closed at 8.31d. and May at 8.32d.

PIECEGOODS

Calcutta, March 6.

A better tone has been noticeable in the piecegoods market. With mills fully engaged with war orders and the difficulties in placing business with foreign countries, owing to the uncertainty regarding the international situation, bazar values have been pushed higher. There is good demand for indigenous goods and orders are reported to have been placed for positions as far as November. Business in the Japanese goods section has been confined only to ready lots with importers. Forward business has been restricted in this section owing to the difficulty in ensuring supplies and the uncertainty regarding the Far Eastern situation. Business in the Lancashire goods section has been more satisfactory and quotations have now improved. The disparity between bazar values and replacement costs has narrowed and it is hoped that it will be possible to do business for forward positions.

The yarn market has not been active and forward business has not been on a large scale. There is a general feeling that existing replacement costs are very high. Business in ready yarns, however, has been done to a certain extent.

GOLD

Calcutta, March 6.

The substantial rise in prices in the Bombay gold market last week has not been fully maintained. The loss serious view taken regarding the situation in the Far East and the Balkans has led to some profit-taking. Quotations are around the lowest levels for the week. Gold ready being Rs. 43-8, First Settlement Rs. 43-8 and Second Settlement Rs. 43-9.

SILVER

Calcutta, March 6.

The silver market has been absolutely uninteresting. Earlier in the week a firmer tendency was noticeable in sympathy with the strength of the gold market but the higher levels have not been held. The premium for spot over First settlement was as high as four annas at one time. Indian Mint Silver ready are now quoting Rs. 63-1, First Settlement Rs. 62-15 and Second Settlement Rs. 62-15.

The London market has been absolutely featureless with quotations narrowly irregular. Spot is quoting at 23 3/8d. and forward at 23 5/16d.

WHEAT

Calcutta, March 6.

The Karachi wheat market has been definitely firmer during the past week. The sentiment has changed for the better. In view of the smallness of stocks and the more hopeful view regarding the future prices have recorded a good rise. There has been good mill buying. Bombay speculators have been busy. Closing prices, however, are below the best levels for the week. Choice White ready closed at Rs. 29, March at Rs. 28-7-6 and July at Rs. 26-5-6. It is interesting that the improvement has been noticeable only in the quotations for old crop positions. The quotation for new crop is actually lower on balance.

The Calcutta market has been absolutely dull and uninteresting with Cawnpore at Rs. 4, Punjab ready at Rs. 4-5, and May at Rs. 3-12-6.

MADRAS HIDES AND SKINS

The latest available news from England reports that the continued strong Government demand for the great majority of suitable dressing leathers absorbed most of the available supply. There was no sign of ease in this demand nor likely to be any in the near future, considering the enormous quantities of clothing and equipment needed for the Forces, to say nothing of what may be termed official civilian requirements. The available supply of rough Kips has not always been sufficient. There is also a marked shortage in the spot supplies of E. I. Tanned Goat and Sheepskins as evidenced by the small quantities of 40,000 Sheep and 120,000 Goat on offer at the next London public sale. There is thus a regular famine for leather, and the Madras trade will therefore come into its own, if only shipping facilities were available. At long last, news is to hand that the Ministry of Supply will allow a shipment of 1,740 tons of Hides in the Priority schedule (roughly 5,220 bales) during the month of March and early April. Shipping space will, it is reported, be available about the latter part of March. Locally, there has been no exchange of goods. It is reported that European House are resolved not to buy for two months until their holdings are cleared and the export position clarifies. Some of the London buyers seem eager for fresh business, but shippers here are not prepared to oversell in the present conditions of the market before clearing their stocks. It is reported that none of the Madrassee tanners are buying in the Calcutta raw hide markets. Quotations stand around Rs. 7-8 per 20 lbs. for Dharbanga Purneas, Rs. 9 for Kishenganj Dry per 20 lbs, Rs. 5 per 20 lbs. for Dacca Dry 70 per cent. selection Rs. 4 to Rs. 4-4 for 50-55 per cent. selection. Reports from Cawnpore and Karachi indicate that the raw hide markets in those centres are not much affected by the stalemate in Madras.

IT'S A FACT—

that more than 90% of India's teeming millions never save a rupee of their earnings. Money borrowed at fantastic interest cripples them financially for life. An account with the Palai Central Bank safeguards you from debt and worry—it puts success within your grasp.

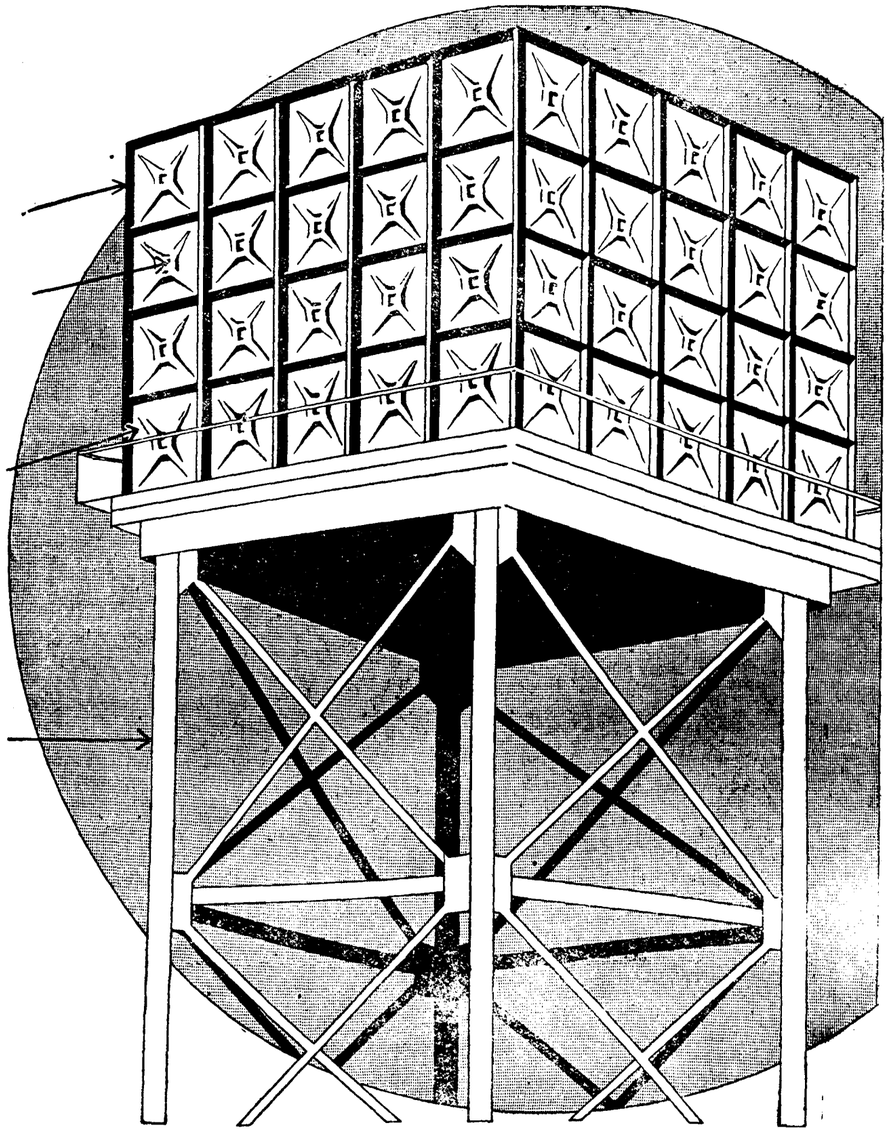
INDIAN TEA LICENSING COMMITTEE



Export Licenses : Special Export Licenses

The attention of tea producers, tea exporters and shippers of tea is drawn to the provisions of Sections 16 and 17 of the Indian Tea Control Act of 1938 so far as they relate to the issue of ordinary and special export licenses towards the end of each financial year.

It should first of all be noted that Ordinary Export Licenses are valid between the 1st of April and the 31st of March of each financial year and Special Export Licenses are valid only between the 1st of April and the 31st of May of the year in which they are issued.

Section 16 (1) deals with the question of the issue of ordinary Export Licenses during the financial year to which the export quota relates. It will be observed that the latest date for application for an ordinary export license remains the same as under the 1933 Act viz. before 21st March of each financial year, but under the terms of Section 17(2) it is made clear that failure to apply for an ordinary export license before 21st March does not disqualify the party concerned from obtaining Special Export Licenses to cover the balance of export quota standing to their credit in the books of the Licensing Committee provided application is made for the Special Export Licenses before the 14th April of the following financial year.

J. M. PYE,
Joint Controller.

Stock Markets to-day and to-morrow

NEW ORDERS FOR THE JUTE INDUSTRY

THE general reaction to the Budget proposals has been very little on the stock markets in both Bombay and Calcutta. As the new taxation proposals lacked in surprise there could not be any reaction on the Bombay Stock Exchange for the simple reason that the rise in prices had occurred prior to the publication of the Budget. Activity on the Calcutta Stock Exchange in recent weeks has been negligible, and price fluctuations have been confined to very narrow limits.

* * *

An optimistic view regarding the future of the Indian cotton textile industry has been taken by the chairman at the annual meeting of the Millowners' Association. He remarked, "At the end of January this year unclaimed stocks with mills were comparatively low and our market reports indicate that stocks with merchants in the consuming centres are also not heavy. The prices of cloth and yarn have also risen to more reasonable levels, and if this state of affairs continues, the industry generally should make fair profits in 1941. After a period of almost unrelieved depression since 1928, during which the industry in Bombay has been fighting a battle for existence against foreign and domestic competition, I feel that nobody will grudge us any little profit that may come to us, especially as almost the whole of it will have to be paid to Government by way of income-tax and excess profits tax."

These remarks confirm in the main the conclusions reached in these columns last week. Owing to the depression in the cotton textile industry the earnings of most companies are naturally at a low level for the standard period and the incidence of the excess profits tax will prove to be heavy on companies' earnings. It is in this regard that there is need for selecting companies which have a relatively high level of profit for the standard period.

The vastly improved conditions in the industry have been reflected in the results of two important companies in South India for the half-year ended 31st December, 1940. The improvement in the earnings of the Bangalore Woollen, Cotton and Silk Mills Company, Limited is even more pronounced than in the case of the Buckingham & Carnatic Company, Limited. While the production of both companies has been mostly taken up by war orders, the potential capacity of the Bangalore Woollen, Cotton and Silk Mills has been increased by the purchase of the plant and property of the Kaiser-i-Hind Woollen, Cotton and Silk Mills Company, Limited.

* * *

The net profit, before providing for taxation, of the *Buckingham & Carnatic Company, Limited* for the half-year ended 31st December, 1940 is Rs. 21,97,942 against Rs. 17,24,151 for the previous half-year. The amount set aside for depreciation is not very much changed at Rs. 3,06,355 (Rs. 3,06,493) but there has been a substantial increase in the provision for taxation from Rs. 7,50,000 to Rs. 12,11,500. The allocation to Superannuation Fund is Rs. 25,250 against Rs. 24,552. The ordinary dividend has been maintained at Rs. 6 per share. The amount carried forward is higher at Rs. 1,78,885 againts Rs. 1,39,364 brought in.

* * *

The Bangalore Woollen, Cotton and Silk Mills Company, Limited has been able to report an even more pronounced increase in the earnings for the same period. Throughout the period Government contracts have largely taken the place of the company's normal business and everything has been done to increase the production of materials required by the Defence services. To meet these demands the directors have purchased from the liquidators the plant and property of the Kaiser-i-Hind Woollen, Cotton and Silk Mills Company, Limited. The earnings before taxation for the second half of 1940 were Rs. 9,89,111 against Rs. 6,47,497 for the first half of the same year. The amount set aside to depreciation is Rs. 3,50,631 against Rs. 3,08,334 previously, while the amount on account of taxation is not very much higher at Rs. 1,74,000 (Rs. 1,49,000). The sum of Rs. 1,00,000 has been placed to a newly created Raw Material Fluctuation Reserve and Rs. 1,60,000 to General Reserve, while the other funds receive Rs. 76,000 against Rs. 67,000. The caution of the directors in the declaration of the dividend has been mainly due to the advisability of strengthening the position of the company. In view of the fact that the ordinary dividend is covered nearly four times after providing for taxation and depreciation and paying the preference dividend there is good scope for increase in the distribution. The shares at Rs. 216 *cum*-dividend are good from the investment point of view.

* * *

Mr. W. A. M. Walker, speaking at the annual general meeting of the members of the Indian Jute Mills Association only two weeks back remarked "Provided tonnage is available, I do not consider our position will materially alter from that of the past six months and with any improvement in the situation this industry will share. *In addition to this I fully anticipate that we shall continue to receive valuable orders for war materials*". **(The Italics are ours.)**

One week after this statement was made the mills received an order for 45 lakhs yards hessians and 2.5 crores yards sacking cloth and other miscellaneous items. It is now reported that another order has been placed for one crore yards sacking cloth and 27 lakhs yards $7\frac{1}{2}$ ozs. hessian cloth. Besides this order, the mills have also received an assurance that an order for 3.5 crores sandbags will be placed shortly.

With mills working 45 hours per week throughout February there was a sharp increase in local stocks and it was generally feared that it will not be possible at any time, with the prevalence of the present conditions in the trade, to increase production. The recent orders, however, have enabled mills to increase production and it has been decided to work fully throughout the next month.

I have pointed out in these columns on more than one occasion that the present prices for jute shares discount fully even the worst prospects and that with any favourable developments there should be an improvement in values. It is unnecessary to point out here, therefore, that the better class shares are attractive.

* * *

The maintenance of the dividend of the *British India Corporation, Limited* at four annas per share for the year ended 31st December, 1940, has come as a surprise to operators and investors alike. But somehow market circles seem to have anticipated this declaration. There has

(Continued on page 449)

P. & O. STEAM NAVIGATION COMPANY

NEW PROFIT RECORD

By R. Gordon Cummings

THE highest profits for many years were made by *Peninsular and Oriental Steam Navigation Company* during its centenary year ended September 30th, 1940. How much of the big increase was due to the war and how much to normal expansion it is impossible to tell. Considering, however, that the accounts just published cover the operating results of the combine for ten months of war to June 30th, 1940 and include certain other revenue from Government hire up to September 30th, it is fairly safe to assume that a great part of the increase was due to the war. A year ago when dealing with the results for 1938/39 I expressed the opinion that it was then—just after the outbreak of war—impossible to foretell what would happen to this great company. So far, anyhow, it has not done too badly financially and stockholders can congratulate themselves on receiving the highest dividend for some considerable time. Thus, in the midst of war, the P. & O. can celebrate its centenary with "record" profits and an increased dividend.

According to the profit and loss account published with the report for the year to September 30th, last the amount available for dividends was very little changed from the previous year and actually less than in 1937/38. The "official" net profit last year was £505,936, compared with £446,182 in 1938/39, and £547,904 in 1937/38. These figures, as shown in the tables given later, do not by any means give the real position. Last year not only was the "official" profit struck after charging £867,968 for reserves and other special appropriations but an undisclosed sum was deducted from the net voyage profit for taxation (including Excess Profits Tax), deferred repairs and contingencies. Strict comparison with previous accounting periods is, therefore, impossible. Moreover, the basis on which the accounts are prepared has been altered "by reason of the requisitioning of certain of the Company's ships at the outbreak of war and the subsequent introduction of the Liner Requisition Scheme in February, 1940." The long established practice of bringing in to the profit and loss account voyage results closed before June 30th of each year has been dropped. Revenue account for the twelve months ended September 30th, 1940, not only includes voyage results closed before June 30th, but certain hire under Government charters down to end-September, 1940. Consequently, when hostilities end and the company's requisitioned ships are handed back by the Government there will be one year's profit and loss account which will include voyage results for a period of less than a year. To counter-act this unevenness the directors have considered it advisable to transfer £250,000 of the past year's revenue to reserve.

Apart from the factors mentioned above the profit and loss account for 1939/40 differs in other respects from previous statements. Making comparison with the previous twelve months ended September 30th, 1939, provision for depreciation has been raised from the fixed annual amount of £885,000 instituted in 1935/36 to £1,034,068, the highest appropriation in this respect since £1,313,944 was so provided out of the 1934/35 profits. Cost of administration and directors fees have fallen sharply, mainly as a result of recoveries under the Liner Requisition Scheme, the total being down from £477,803 for the previous year to £196,394. On the other hand nothing was recovered last year for income tax, nor were there any exceptional credits of a strictly non-revenue nature, two items which brought in £192,902 and £16,249 respectively in 1938/39.

Reserve allocations and provision for capital losses at £867,968 were the greatest for many years and £501,878 more than in 1938/39. Transfer to reserve was £250,000, tonnage replacement reserve received £300,000 and £19,732 was provided for losses on Continental interests, all as against nothing for the year ended September 30th, 1939. Allocation to provident good service account was increased from £50,000 to £225,000, but losses on sale of securities fell from £216,090 to £73,236, and nothing, compared with £100,000 in 1938/39, was put to reserve for special repairs and reconditioning. Here is a summary of the profit and loss accounts for the three years ended September 30th, 1940 :—

	1940	1939	1938
	£	£	£
Gross Profit ...	2,780,126	2,098,288	1,912,570
Less—Interest, etc.	872,154	417,215	392,162
Depreciation	1,034,068	885,000	885,000
Net Profit	1,373,904	796,023	635,408
Add—Surplus on Ship Sales ...	...	16,249	28,175
Less—to Reserves, etc.	*867,968	†866,090	‡110,679
"Official" Net Profit ...	505,936	446,182	547,904

*Reserve account, £250,000 ; Provident good service account, £225,000 ; Tonnage replacement reserve, £300,000 ; loss on security sales, £78,236 ; losses on Continental interests, £19,732

†Loss on security sales, £216,090 ; Reserve for special repairs, etc,, £100,000; Provident good service account, £50,000.

‡Loss on Investments, £10,679 ; Reconditioning reserve, £25,000 ; Provident good service account, £75,000.

With the exception of dividends from subsidiary shipping companies, income from general investments and income tax recoveries each heading of revenue expanded last year. Strict comparison with previous accounting periods is, however, as already pointed out, vitiated by the undisclosed amount deducted in arriving at the latest net voyage profits. Details of revenue for the three years ended September 30th, 1940, were:—

	1940	1939	1938
	£	£	£
Voyages (Net) ...	2,075,794	1,381,281	1,326,264
Subsidiary Shipping Cos. ...	482,325	552,404	564,134
Coaling, Wharfage and Engineering Cos. ...	75,955	60,343	72,619
General Investments ...	210,206	272,927	201,363
Miscellaneous, Rentals, etc. ...	134,240	116,184	96,044
Income tax credit	Nil	192,902	21,679
TOTAL ORDINARY REVENUE ...	2,976,520	2,576,041	2,382,103
Exceptional credits ...	Nil	16,249	23,175
TOTAL REVENUE...	2,976,520	2,592,290	2,405,278

Preferred dividend took £152,000, leaving £353,936 of the "official" net profit for the deferred capital, which receives a total of 7½ per cent.—2 per cent. interim, 3 per cent. final and 2½ per cent. cash bonus—or 1 per cent. more than the 6½ per cent. for 1938-39, but ½ per cent. less than the 8 per cent. of 1937-38. After allowing £797 for interest on profit sharing scheme deposits the balance to carry forward is £173,498, or £8,701 more than the balance of £164,797 brought in. Allowing for the preferred dividend and deducting all special appropriations except the transfers to reserve and tonnage replacements reserve, together totalling £550,000, the amount available for the deferred capital was equal to 28¾ per cent., or nearly four times the dividend. For the previous year earnings were only 6.4 per cent., but in 1937-38 they were 8.8 per cent.

Serious delays in the mails have again precluded the possibility of preparing a consolidated balance-sheet. Accordingly, as a year ago, shareholders have to be content with the financial statement of the parent company only. This, as usual, shows a strong financial position. The table below summarises the balance-sheets of the past three years ended September 30th, 1940:—

ASSETS	1940	1939	1938
	£	£	£
Steamers, etc. ...	6,684,205	7,734,273	8,443,942
Freehold Properties ...	806,302	806,306	809,289
Investments in Subsidiaries ...	10,602,233	10,597,183	10,597,183
Investments in Other Cos. ...	710,577	722,424	733,087
Liquid Assets ...	8,523,536	7,468,445	8,948,981
TOTAL ...	27,326,853	27,328,631	29,532,482
LIABILITIES	£	£	£
Capital Issued ...	7,632,518	7,632,518	7,632,518
Debentures ...	6,943,370	7,008,070	7,158,560
Loans, Creditors etc. ...	7,215,867	8,523,246	10,571,095
Reserve ...	4,250,000	4,000,000	4,000,000
Tonnage Replacement Reserve	1,111,600	Nil	Nil
Profit and Loss Balance ...	173,498	164,797	170,369
TOTAL ...	27,326,853	27,328,631	29,532,482

Depreciation has been provided on a liberal scale, no less than £16,647,891 having been written off to date from a fleet having a cost value of £23,321,593—if depreciation at 5 per cent. per annum on cost had been allowed the amount needed would have been only £13,738,467, or almost £3,000,000 less than the sum actually allowed by the directors. Judging by the amount of the tonnage replacement reserve other sums than the £300,000 transferred from profits have been received during the year—possibly the extra amount of £811,600 represents the surplus

(*Continued on page 471*)

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, March 7.

THE Calcutta Stock Exchange has been absolutely uninteresting during the past week. With a holiday feeling in evidence on account of the approach of the *Holi* festival and the uncertainty regarding the international situation there is little disposition to enter into any commitments. The reaction to the budget proposals, announced last Friday, has been negligible. Opinion was at first divided as to the effect the new taxation proposals would have on share prices. However, as the Bombay market was inclined to believe that the budget lacked any surprise and that the increase in the rate of Excess Profits Tax and the surcharge on income-tax and super-tax had been rather expected there has not been any important fluctuations in prices. The undertone in the several setcions is quietly steady. Pending further favourable developments it cannot be expected that there will be any substantial improvement in prices but the strength of the markets in the face of the tension in the Far East and the German penetration of Bulgaria suggests that the technical position is healthy.

There has been very little business in the giltedged securities section and quotations are more or less unchanged. The lack of interest in the giltedged securities section in the face of the continued easiness in money conditions is not quite understandable, the Treasury Bills rate during the week being lower at eleven annas one pie per cent annum against eleven annas four pies per cent per annum last week, but it should not be forgotten that operators and investors have to reconcile themselves to the increase in the surcharge on income-tax and super-tax. 3½ per cent. Paper is slightly better at Rs. 94-14 at the time of writing. Terminable loans are mostly unchanged, 3 per cent. 1968/65 being Rs. 94-6, 3½ per cent. 1947/50 Rs. 102-1, 4 per cent. 1960/70 Rs. 108 and 4½ per cent. 1955/60 Rs. 118-2.

Bank shares have been uninteresting with *Imperial Bank* fully paids at Rs. 1,568, contributories at Rs. 385 and *Reserve Bank* at Rs. 103-8.

Fixed-interest securities have been steady. There has been a slight rise in prices in places. Business in public bodies debentures has been negligible. *Empire* preferences were Rs. 158, *Howrah* 'A' preferences Rs. 161-8, *Kanknarrah* Rs. 161 ex-dividend, *Hukumchand* Rs. 117-8 and *Lansdowne* Rs. 135-8. Among other sections, *Alkali and Chemical* were Rs. 123-8, *Steel Corporation* Rs. 117, *Titaghur* First Preferences Rs. 205, Second Preferences Rs. 117, *Humayan Properties* Rs. 8-8 and *Carew & Co.* Rs. 117. *Dunlop Rubber* Second Preferences were frequently dealt in at Rs. 116 and *New Victoria* at Rs. 5-4.

In the Cotton section, *Cawnpore Textiles* have been uninteresting at Rs. 6-6. *Muir Mills* were Rs. 300, *Kesoram* Rs. 6-3 and *New Victoria* Rs. 2.

The coal section has been easier with *Bengal* at Rs. 354, *Amalgamated* at Rs. 26-4, *Burrakur* at Rs. 13-10, *Dhemo Main* at Rs. 14-10, *Equitable* at Rs. 86-12, *Raneegunge* at Rs. 24-12, *Standard* at Rs. 20 and *West Jamuria* at Rs. 31. The decision to continue the higher surcharge on coal during the busy months and the difficulties experienced regarding export have had a discouraging influence on the markets.

Jute shares have not been very interesting but there was a tendency to improve earlier in the week on the announcement of the new order for hessian and sacking goods. The improvement in prices, however, has not been held and quotations are again at the former levels. *Adamjee* were Rs. 20, *Anglo-India* Rs. 308, *Bally* Rs. 213-8, *Clive* Rs. 21, *Champdany* Rs. 159, *Howrah* Rs. 49-4, *Kamarhatty* Rs. 440, *Kanknarrah* Rs. 360, *National* Rs. 21-8, *Northbrook* Rs. 30, *Nuddea* Rs. 55-8 and *Reliance* Rs. 54-8.

In the Engineering section *Indian Iron* and *Steel Corporation* were inclined to be firmer at Rs. 31-6 and Rs. 19-6 earlier in the week in sympathy with the strength of the Bombay market. In mid-week, however, there was some selling on fears regarding further complications in the Far Eastern situation. Indian Iron came down to Rs. 30-3 and Steel Corporation to Rs. 18-5. There has been little recovery from the lower levels, quotations at the time of writing being around Rs. 30-6 and Rs. 18-7 respectively. There is not much change in the quotations for other shares. *Braithwaite & Co.* were Rs. 10, *Burn & Co.* Rs. 378, *Indian Galvanizing* Rs. 30, *Indian Standard Wagon* Rs. 61-8 and *Saarn Engineering* Rs. 5-6.

Among Utilities, *Agra Electric* and *Benares Electric* are better at Rs. 131-8 and Rs. 14-6 respectively. *Jubbulpore Electric were* Rs. 14-9, *Bengal Telephone* were higher at Rs. 18-12 and *Dacca Electric* at Rs. 17-12.

Sugar shares have been neglected with *Cawnpore* at Rs. 18-14, *Champarun* at Rs. 14-12, *New Savan* at Rs. 6-12, *Raza* at Rs. 15-2 and *Carew & Co* at Rs. 8-4.

A smaller number of transactions has been recorded in the Tea section. *Hasimara* were Rs. 42, *Basmatia* Rs. 14-4, *Hantapara* Rs. 340, *Killcott* Rs. 49-4, *North-Western Cachar* Rs. 236-8 and *Teliapara* Rs. 402-8.

In the Miscellaneous section, *Burma Corporation* have been sticky at Rs. 4-5 ex-dividend with *Indian Copper Corporation* at Rs. 2-1. The announcement of the dividend of four annas per share by the British India Corporation for 1940 had a slightly discouraging effect but there has been a subequent recovery from Rs. 4-7 to Rs. 4-10 cum-dividend. The proposal to levy a new *ad valorem* excise duty of 10 per cent. on pneumatic tyres and tubes has not had any effect on the prices for Dunlop Rubber which are presently quoting around Rs. 39-12. *Bararee Coke* are Rs. 20 ex-dividend, *Indian Cable* Rs. 21-2, *Borooah Timber* Rs. 15-2, *Assam Saw* Rs. 3-11 and *Midnapore Zemindary* Rs. 70-8. Paper shares have been easier with *Titaghur Paper* ordinary shares at Rs. 17, *Indian Paper Pulp* at Rs. 142 and *Mysore Paper* at Rs. 14-8.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, March 6.

Money.—Call money continued to be quoted at ¼ per cent (unlendable).

Exchange market.—Banks were selling T.T. at 1s. 5 31/32d. and buying three months' bills at 1s. 6 1/32d.

Securities.—Steady conditions were witnessed in the securities market during the week under review. 3½ per cent Paper, after opening at Rs. 94-12, ruled steady throughout the week, closing better at Rs. 94-18 as against Rs. 94-10 in the previous week. Activity in terminable loans was confined to long-dated loans. 1955/60 were Rs. 113-2. 1948/52 remained, however, unchanged at Rs. 96-18; 1947/50 at Rs. 102-1 and 1945/55 at Rs. 112.

Shares.—Business in the local share market, during the week under review, was on a small scale and there was a disposition among the operators to await the developments in the war situation. The budget proposals for 1941/42 were well received by the market which was unaffected by the taxation proposals as the increase in surtax was generally anticipated. Buyers predominated the market early in the week with the result there was a rise in prices. There was, however, some profit-taking at the higher levels on lack of support. The market took a downward trend and prices in all sections were slightly marked down. A satisfactory feature of the week's trading, however, was the steadier feeling that prevailed towards the close owing to some small buying.

Textiles.—Prices of cotton mill shares were slightly lower than in the previous close. Dealings were small and of selective nature. *Bombay Dyeing*, after opening at Rs. 1,105, touched Rs. 1,081-4 in mid-week, but improved again at the close to Rs. 1,101-4. *Kohinoor* were better at Rs. 425 and *Century* at Rs. 885. *Central India* were steady at Rs. 805-8; *Colaba* at Rs. 173; *Swadeshi* at Rs. 282 and *Sholapur* at Rs. 2,790. *New Great*, however, declined from Rs. 458 to Rs. 488. *Western India* were dealt in at Rs.

Hydro-electrics.—Prices in this section were easier in sympathy with giltedged securities. *Andhra Valley* lost about 15 points to close at Rs. 1,885, while *Tata Power* declined from Rs. 1,625 to Rs. 1,600. *Tata Hydro* were steady at Rs. 185. The following ad-interim dividends for the year ended 30th June, 1941 have been declared:—

Andhra Valley Power Supply Co., Ld.—Rs. 30 per Ordinary Share.

Tata Power Co., Ld.—Rs. 25 per Ordinary Share.

Tata Hydro-electric Power Supply Co., Ld.—Rs. 3 per Ordinary share.

Steels.—Steel shares, after some fluctuations, were slightly marked down. *Tata* ordinaries and deferreds, after opening at Rs. 388 and Rs. 2,007-8, developed a sagging tendency during the course of the week owing to some liquidation, sellers dominating the market. The deferreds touched a low of Rs. 1,968-12 and the ordinaries Rs. 384 in mid-week. Towards the close of the week, however, the deferreds met with some investment support and closed at Rs. 1,976-4, while the ordinaries closed better at Rs. 385.

Banks.—*Bank of Baroda* continued to meet with good business, being done further higher at Rs. 110-8. *Bank of India* were slightly higher at Rs. 144-8, while *Central Bank* were marked down at Rs. 42-15. *Imperial Bank* fully paids changed hands at Rs. 1,550; contributories at Rs. 385-10 and *Union Bank* at Rs. 6-10.

Miscellaneous.—*Bombay Burma Trading* were marked down during the week on lack of support, being done lower at Rs. 532-8 as against Rs. 541-4 in the previous week. *Associated Cement* were a feature and met with continued demand,

done higher at Rs. 145-4. *Belapur Sugar* were done at Rs. 212-8; *Shivrajpur Syndicate* at Rs. 37 and *Premier Construction* at Rs. 95-12. *Scindia Steam* were marked higher at Rs. 22-5 as against Rs. 21 in the previous week. *Indian Iron* changed hands at Rs. 30-6; *Steel Corporation* ordinaries at Rs. 18-7 and *Bombay Telephone* at Rs. 87-8. *Wimco* improved again to close at Rs. 199.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, March 6.

Prices in the local market remained more or less unchanged during the week under review. Textiles were a firm counter, while Rubbers recorded small gains. Teas were unchanged.

Securities.—The securities market ruled steady, 3½ per cent Paper being quoted at Rs. 94-12. Among other issues, 3 per cent 1963/65 changed hands at Rs. 94-9 and 4 per cent 1960/70 at Rs. 108. Among State Loans, 5 per cent 1948/58 *Cochin Loan* were placed at Rs. 105-2. Provincial Loans met with good buying during the week, 3 per cent 1953 *Madras* being taken up at Rs. 97-8 and 1952 at Rs. 97-6. 3 per cent 1958 *Punjab* changed hands at Rs. 96-2.

Mills.—Buckingham and Carnatic remained unchanged at Rs. 244 on the announcement of the maintenance of the dividend at Rs. 6 per share for the half-year ended 31st December, 1940. The dividend has also been maintained in the case of the *Bangaloro Woollen, Cotton and Silk Mills Company, Limited. Madura* were done at Rs. 40; *Cambodia* at Rs. 9-2. *Aaron Spinning and Weaving* preferences came in for business at Rs. 10 and *Sitaram* at Rs. 48-8 c.d.

Utilities.—A fair volume of business was done in this section. *Madras Telephone* were a dull counter at Rs. 16-8. *Vizagapatam Electric* were dealt in at Rs. 67-12; *Vellore Electric* at Rs. 12; *South Arcot Electric* at Rs. 91-12 and *Negapatam Electric* at Rs. 9. *Natarasankottai Electric* debentures were crossed at Rs. 101.

Plantations.—Rubber shares recorded small gains with the slight increase in the price of the commodity. *Cochin Malabar* were done higher at Rs. 6-12; *Tropical Plantations* at Rs. 19-1 and *Kalpetta* at Rs. 19-4. Among Tea shares, *Peermade* were unchanged at Rs. 27-8 and *Perikaramalai* at Rs. 17-12. *Kalasa* changed hands at Rs. 6-12; *Vellamalai* at Rs. 13; *Nilgiri Neerugundi* at Rs. 1-8 and *Devon* preferences at Rs. 107-8.

Sugars.—*Mysore Sugar* showed slight change, closing better at Rs. 49-12. *Travancore Sugars* met with some buying at Rs. 14.

Miscellaneous.—Mysore Chemicals were a dull counter at Rs. 17. *Singareni Collieries* were taken up at Rs. 10; *Indian Steel Rolling Mills* ordinaries at Rs. 7-12 and *Spencer 'A'* preferences at Rs. 9-8. *Titaghur Paper* were dealt in at Rs. 17; *Orient Paper* at Rs. 10-8; *Mettur Chemicals* at Rs. 9-12 and *Associated Cement* at Rs. 145 March. *Mysore Paper* were dull at Rs. 14-7, while *Mysore Stoneware Pipes* were placed at Rs. 8-4.

LONDON STOCK EXCHANGE

Fears regarding the drastic industrial curtailment plans, the German penetration into Bulgaria and the tension in the Far East had a discouraging influence and operators were inclined to await further developments. Prices were marked down in the several sections. Towards the close there has been a slight recovery and quotations are above the lowest levels for the week. Giltedged securities after earlier weakness showed a tendency to recover. Among India loans, 3½ per cent. Sterling Paper were 98 5/8. Among British funds, 2½ per cent. Consols were 77¼, 3½ per cent. Conversion 99, 3½ per cent. War Loan 103 7/8 and 3 per cent. War Loan 101¼.

Among other sections, Rubber issues were inclined to be easier, especially *Anglo-Dutch*. The rise in the price for the commodity was due the fears regarding the difficulty in getting supplies. Oil shares were irregular and *Burma Oil* were lower at 51s. 10½d. Home Rails were weak while giltedged industrials were easier.

NEW YORK STOCK EXCHANGE

Wall Street has shown a tendency to improve towards the close and a good rise in prices has been recorded all round. The earlier weakness of the markets was due to the fears regarding the Balkan situation and the concern regarding the taxation proposals. The speedy passage of the Excess Profit Tax Bill and the further increase in steel mill activity were encouraging factors. Other domestic industrial business news was satisfactory. *U. S. Steel* were $58, *General Motors* $42½ and *Anaconda Copper* $25.

(*Continued from page 445*)

not been any sharp decline in the quotation which is at present around Rs. 4-8 *cum*-dividend.

* * *

A further increase in both domestic and industrial consumption goes to explain the progress reported by the *Oriental Gas Company, Limited*. The Chairman explained at the annual meeting that sales of by-products too showed some improvement. Improved revenue must be considered against rising costs from which the Company is not immune. But favourable influences continue to prevail in Calcutta where gas enjoys increasing vogue. The distribution system has undergone improvement and a continued labour force secures the Company from many of the usual troubles. Mr. Ellis, who reviewed the results at length, could adopt an optimistic view of the immediate future.

WATCH-DOG.

BRAITHWAITE & CO. (INDIA), LD.

NOTICE

is hereby given that the Share Transfer Books of the Company will be closed from 18th March to 31st March, 1941, both days inclusive.

As Dividend Warrants are sent only to registered Shareholders or their Mandatees, Shares on blank Transfers should be submitted with complete deeds for transfer registration before the Share Transfer Books are closed.

By Order of the Board,
P. GOFFEY,
Secretary.

Calcutta, 27th February, 1941.

THE ORIENTAL GAS CO., LTD.

The ordinary general meeting of the Oriental Gas Co., Ltd., was held on the 12th December, in London.

Mr. Bertram Wyburne Ellis, A. M. Inst. C. E., the Chairman, in the course of his address, said: As indicated last year the accounts are now kept at 1/6d. per rupee, but in any comparison in the revenue account that I may make with last year, the figures have been adjusted from 1/4d. to 1/6d. so as to form a true picture.

The capital account is unchanged. In the revenue account coal costs have increased by £1,800, more having been carbonized. Salaries are lower by £530. Carbonizing wages are higher by £500, as allowances have been made to our men to meet the rise in the cost of living. Purification has disappeared as a debt, the sale of spent oxide realizing more than the charge under this head.

Repair and maintenance of works plant shews an increase of £8,430, largely retort renewals to meet the call on our carbonizing capacity occasioned by the cold weather. The actual increase is somewhat higher, as we have included less capital expenditure than in last year. Total manufacturing costs are higher by £9,700.

Distribution salaries are higher by £285. These are normal increases. In repairs of mains and services the increase is £6,030, but we have charged to revenue the cost of over two miles of 9" main. The actual increase is £620, and is partly increase in wages. Meters shew a rise of £374. Fittings are £3,330 lower. A large proportion, especially geysers, have been sold outright instead of being placed out on hire. Besides the resulting profit the labour charges have been lower. Total distribution costs are £3,360 higher, and management costs are £1,620 higher. Revenue expenditure is higher by £12,590, but this includes £8,826 capital expenditure charged to revenue, against £5,327 in 1938/39.

Receipts from sales of gas increased by £9,630, the quantity sold being over 700 million cubic feet —an increase of 8.9 in quantity and 7 per cent. in money. Meter and cooker rentals are £250 higher.

Residuals shew an increase of £3,365, we having sold more coke at a higher price. Tar receipts are also up owing to price, as a less quantity was sold. Total receipts are higher by £13,670, and the trading profit is £1,078 higher.

The increase in consumption of gas during the year is mainly due to industrial development. Still, the domestic part shews a decided increase. The percentages are as follows:—public lighting 40; private and domestic 25.6; industrial 28.7; institutions 5.7.

The increase in the industrial percentage is 4.9 per cent. over last year, which shewed an increase of 2.4 per cent. over 1937/38. This class of consumption has been stimulated by war conditions. The effect is to bring down our average return in money per million.

During the year our relations with the Public Authorities have been, most amicable and satisfactory. At Sealdah and Howrah the condition of the works has been fully maintained. We have laid a new 9" main from the works to the south of the City, and installed a boosting plant in connection with the same. We can generate our own electricity for this, but can also draw from the local supply, so that each acts as a stand by in case of trouble. The meter and fittings department has been active, as is shewn by the addition of over one thousand new appliances fixed. This, under existing conditions, is very satisfactory.

Labour generally has been quiet and undisturbed, having been treated with fairness, and allowances to meet rising costs of living granted. This, with the rise in the cost of all supplies, imported and local, has occasioned the large increase in expenditure, and we are entitled to take credit for not having raised our price for gas. The practical effect is equivalant to a reduction in times of static costs, which is what we have always aimed at.

The war has made working difficult for our staff in Calcutta. Fortunately, our shipments of goods from Britain have not suffered. Year by year we are more able to fill our requirements from Indian sources, and this move will tend to increase.

The report and accounts were adopted.

(Half-yearly meeting 18th March, 1941 at 3 p.m. at Madras).

Audited accounts for the half-year ended 31st December, 1940 :—

The result of the Company's working, after allowing Rs. 3,06,354-12-7 for depreciation, is a profit of Rs. 6,80,087-2-0. Adding the balance brought forward from last half-year of Rs. 1,39,374-7-7, there is a total sum of Rs. 8,19,451-9-7.

The directors recommend to dispose of this sum as follows:—

	Rs.	A.	P.
Dividend at Rs. 3½ per share on the Preference shares	79,882	8	0
Dividend at Rs. 6 per share on the Ordinary shares	5,35,434	0	0
To Superannuation Fund	25,250	0	0
To carry forward	1,78,885	1	7
Total ...	8,19,451	9	7

The Mills have been employed almost entirely on work of National importance. Production has been greatly expanded in order to meet the very heavy programme of the Government for the Defence services.

Managing Agents.—Messrs. Binny & Co. (Madras), Ld.

Authorised Capital—Rs. 2,50,00,000, in 2,00,000 Ordy. and 50,000 7½ per cent. Pref., both of Rs. 100 each. Issued and subscribed—Rs. 1,10,54,000 in 89,239 Ordy. and 21,302 Pref., both fully paid up.

Synopsis of the balance sheet as at 31st December, 1940.

(Annual meeting held 22nd February, 1941).

Audited accounts for the year ended 31st December, 1940 :—

The year's trading has resulted in a profit to the company of Rs. 2,51,344-6-9 after payment of all expenses. This added to Rs. 1,968-14-2 being the amount carried forward from last year's account, there is a total sum of Rs. 2,53,313-4-11 out of which the directors have written off Rs. 1,25,000 for Depreciation and paid as Bonus to Staff Rs. 3,000, leaving a balance of Rs. 1,25,313-4-11 and this the directors recommend to appropriate as follows:—

	Rs.	A.	P.
Debenture Redemption Fund	20,000	0	0
Income-tax Reserve	25,000	0	0
Preference Share dividend	28,500	0	0
Dividend on Ordinary Shares	49,000	0	0
Total ...	1,22,500	0	0

the balance of Rs. 2,813-4-11 is carried forward.

During the year under review the price of cotton ruled high at the beginning of the year and declined considerably thereafter. In consequence, the parity between the prices of cotton and yarn remained so narrow as not to enable the company to earn larger profits. The off-take of cloth, however, was fairly good in spite of the interference from trade depression.

The Company has now a total spindleage of 28,104 in addition to 270 looms all of which are working in full complement.

Managing Agents and Secretaries.—Messrs. R. K. Shanmukham Chetty & Bros.

Authorised Capital—Rs. 20,00,000 in 15,000 Ordy. and 5,000 Cum. Pref., both of Rs. 100 each. Issued, subscribed and Paid up—Rs. 11,50,000 in 7,000 Ordy. and 4,500 Pref., both fully paid up. Debenture Capital—Rs. 2,50,000 in 4 per cent. taxable debentures of Rs. 5,000 each, redeemable on the 31st Dec., 1942 or at the option of the Company on 31st December 1944.

Synopsis of the balance sheet as at 31st December, 1940:—

Carry forward ...	38,977	−1,01,670	−80,764

(Annual meeting held 18th March, 1941 at 3-30 p.m.)

Audited accounts for the year ended 31st August, 1940 :—

The Profit and Loss Account, after deduction of all working charges and commissions, shows a profit of Rs. 3,63,426-1-0 from which must be deducted the debit balance brought forward from the previous year of Rs. 1,01,670-8-10, leaving a balance of Rs. 2,61,755-8-2. After providing Rs. 1,35,998 for Depreciation, there remains a balance of Rs. 1,25,757-8-2 which the directors recommend to allocate as follows:—

	Rs.	A.	P.
To writing off preliminary expenses	22,815	11	9
To writing off Brokerage and underwriting commission	55,965	0	0
To writing off Discount on issue of 2nd Debentures	8,000	0	0
Amount to be carried forward	38,976	12	5
Total ...	1,25,757	8	2

It is calculated that no Excess Profits Tax will be payable. In order to assist the Company the managing agents have foregone the sum of Rs. 20,946-12-0, being half the commission to which they are entitled.

Crushing commenced on the 15th December, 1939, and continued till the 23rd March, 1940, during which period the factory worked very satisfactorily throughout. Due to the shortage of cultivators' cane and to a certain amount of damage by flood to their own crop, the Company was not able to crush for a full season. Cane prices ruled high, but even so the company was able to dispose of its entire output of sugar at profitable prices.

Prospects for 1940-41 Season.—The mill started crushing on the 14th December, 1940 and up to date has crushed an average of about 635 tons per day. Cane supplies are more plentiful than has been the case during the past few years so there is every prospect of the mill being able to manufacture as much larger quantity of sugar. The quality of the cane is not so good this year due to the abnormally low rainfall during the monsoon which may somewhat affect the recovery.

Sugar prices are much below those ruling a year ago, but on the other hand cane prices are lower and with the larger crush which is anticipated manufacturing costs will be reduced.

Managing Agents.—Messrs. Anderson, Wright & Co.

Authorised Capital—Rs. 50,00,000 in 3,60,000 Ordy. of Rs. 10 and 14,000 6 per cent. Cum. Pref. of Rs. 100 each. Issued and subscribed—Rs. 14,00,000 in 1,00,000 Ordy. and 4,000 Pref. both fully paid up. Debenture Capital—Rs. 10,00,000 in 1,200 5½ per cent. Bearer Mortgage Debentures of Rs. 500 each and 800 5¾ per cent Bearer Mortgage Debentures of Rs. 500 each, the former being repayable at par on 31st December, 1956 with the option of redemption at any time, in whole or part, after 15th June, 1946 on six months' notice and the latter being repayable at a premium of Rs. 2½ per cent. on 31st March, 1948.

Synopsis of the balance sheet as at 31st August, 1940:—

NATIONAL BANK OF INDIA, LIMITED.

The Calcutta Office of the *National Bank of India, Ltd.*, have received the following telegram from their Head Office in London.

Owing delay submitting annual accounts Directors declared ad interim dividend for half-year to 31st December last at 16 per cent per annum, less income-tax payable 3rd April."

BOMBAY TELEPHONE COMPANY, LIMITED.

The Directors of the *Bombay Telephone Company, Limited*, announce that "The Government Telephones Board Limited" has made an offer under Section 153B of the Indian Companies Act, 1913, to purchase all the shares of the Bombay Telephone Company, Limited, at the price of Rs. 89-15 per share. This price is subject to the deduction of every dividend (final and interim) declared payable after the 31st January, 1941, and does not bear interest, but the Directors do not propose to recommend the payment of any further dividend pending the final disposal of this offer.

This price for the shares is the equivalent of a sale of the Company's undertaking and assets on terms that, over and above the sum payable under the Licenses in respect of the undertaking acquired and of the other assets The Government Telephones Board Limited, pay an additional sum to compensate the shareholders for the profits which would have been earned down to 1943, when the Government of India would, according to their present intention, purchase the undertaking.

No discount has been deducted in respect of early payment of such estimated profits.

The Directors of the Bombay Telephone Company, Limited, have considered the offer and will strongly recommend the Shareholders to accept it.

There will be some weeks delay before the offer can be communicated to Shareholders as it will have to be accompanied by a transfer deed ready for signature by each Shareholder.

(Continued from page 476)

receipts over book value of vessels sold or for which insurance has been paid as a result of loss. Retention of a large amount of the year's profits has helped to strengthen the liquid position, mainly through a reduction in liabilities. Secured loans of £1,050,000 have been paid off and deposits by subsidiaries have fallen by almost £800,000. It is the directors' intention to transfer the amount of £800,000 standing to the credit of provident good service account to Trustees as the nucleus of a formal pension scheme. Liabilities will thus be further reduced in the current year.

Issued capital consists of £3,040,000 cumulative 5 per cent. preferred stock and £4,592,518 deferred stock. Debenture indebtedness is being steadily reduced by purchases of the 4½ per cent. redeemable stock—the amount outstanding of £6,943,370 on September 30th, 1940 comprised £1,487,560 in two 3½ per cent. perpetual stocks and £5,455,810 in 4½ per cent. redeemable stock, which can be repaid any time between April 1943 and April 1972, and is being redeemed by means of a cumulative sinking fund.

Ramifications of the group are enormous. The company, it's subsidiaries and subsubsidiaries serve more than half the world, employing for this purpose 297 ships with a gross tonnage of 1,958,208, of which the parent company owns 34 ships of 445,934 tons. Directly controlled subsidiaries are; British India Steam Navigation, New Zealand Shipping, Union Steamship Company of New Zealand, Hain Steamship, Orient Steam Navigation, and General Steam Navigation. Jointly with Shaw, Savill and Albion, the company owns all the shares of Aberdeen and Commonwealth Line.

London, December 14th, 1940.

UPPER JUMNA VALLEY ELECTRICITY SUPPLY CO., LTD.

ISSUED WEEKLY

VOL. XXVII. No. 11 SATURDAY, MARCH 15, 1941 PRICE RE. 1

EAST INDIAN RAILWAY

EASTER HOLIDAY CONCESSIONS

Holiday Concession return Journey Tickets in all classes will be issued over the East Indian Railway from 4th to 14th April, 1941, both days inclusive for distances 101 miles and over at ONE and ONE THIRD single journey fares.

Similar concession fares will apply over the Hardwar Dehra Railway Section on the combined distances over the E. I. and H. D. Railways.

Return journeys on these concession tickets must be completed by midnight of 28th April, 1941.

Inter and Third Class concessions are subject, as usual, to restrictions on travel by certain trains.

Break journey on these tickets will be allowed at any intermediate station for as long a period as desired provided no part of the line is travelled over more than once in the same direction, and the return journey is completed within the prescribed period. Break of journey on return trips will, however, not be allowed at stations distant 30 miles or less from stations of issue of such tickets.

MOTOR CAR CONCESSIONS

Return tickets at single journey rates for distances in excess of 100 miles in local booking only will be issued for the same period between stations where loading and unloading facilities exist, provided the same car as is despatched on the outward journey is booked on the return journey.

Motor Car Return journey tickets will be available for BOOKING of CARS on the return journey up to midnight of 28th April, 1941.

REFUNDS ON UNUSED TICKETS

No refunds will be made on unused halves of either passenger or motor car concession tickets.

WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

MONEY has been a little more usable in the past week, presumably owing to the greater activity in the commodity markets. And though interbank call money is still quoted ½ per cent and rates for firms' fixed deposits remain unchanged, the steadiness in the money market has been reflected in the Treasury Bills tender. Against Rs. 1 crore of Treasury Bills on sale, total applications came to Rs. 259.25 lakhs, as against Rs. 320 lakhs last week. There has been a fractional change in the average rate of accepted tenders which has risen by 5 pies to annas 11 and pies 6 per cent per annum. The sale of Intermediates continues to be successful and, in the past five weeks, it has fetched Rs. 12 crores in all. They will be sold again from March 12 to March 17, at a slightly better rate for the market at Rs. 99-13-3 per cent, as against Rs. 99-13-6 per cent hitherto. The Treasury Bill tender is kept unchanged at Rs. 1 crore, for the next week.

The Reserve Bank's statement in the banking department for the week ended March 7 shows a sharp bulge in foreign balances to the tune of Rs. 8.48 crores. This is, doubtless, to be attributed to payments by the British Treasury to the Indian Government. There is also a parallel rise, equally sharp, in the Central Government's deposits with the Reserve Bank from Rs. 21.85 crores to Rs. 27.04 crores. Last week, we had occasion to remark on the steady increase in sterling balances at the rate of about Rs. 2¼ crores per week. And now this sudden jump by Rs. 8.48 crores in the balances held abroad raises the question of the redemption of the undated sterling loans. The three remaining sterling loans of India have been persistently in demand ever since the announcement of the cancellation, before their maturity, of the six dated loans. While the demand may be largely explained by the inclination of previous holders to reinvest in similar stocks, the steady rise in the quotation for the terminable loans may be ascribed to the fairly widespread belief that their requisitioning is now only a question of time.

This is based on the rate of growth of India sterling balances. In the heightened phase of the war effort, which we will soon witness, it is definitely on the cards that the rate of accumulation of India sterling balances will be much higher than heretofore. But what really transforms the probability of the repatriation of the undated loans from a mere prospect into a distinct feasibility is the likelihood of large British Government contributions to India's defence expenditure as well as numerous other special payments in the current year. According to the *Manchester Guardian*, the British contribution to the re-equipment of the Indian army forces is expected to be in the neighbourhood of £55 millions. This, taken together with the rapid growth of sterling balances in London, makes it extremely likely that this country will be in a position to wipe out the entire sterling debt before very long. In the last budget statement for 1941-42 Sir Jeremy Raisman expected that the remittance programme for 1940-41 would be only £1 million and that, in 1941-42, far from India having to make remittances to the Secretary of State, the Indian Government would really be getting credit for £26 millions from the British Government. If one may judge from the estimates of the City Editor of the *Manchester Guardian*, the Finance Member's estimates seem to need revision.

We, therefore, suggest that, in view of the current trends making for a sterling accumulation of £100 millions for India, before long, the Government of India should, even from now, envisage a clear plan and programme for the retirement of the remaining sterling debt. On the last occasion, it took them nearly 18 months of needless and costly hesitation to decide on the repatriation of the dated loans, though the availability of the requisite sterling balances was never in doubt. It is to be hoped that, on the present occasion at least, the Government will show greater alacrity to seize the opportunity now presenting itself. The various amounts of the remaining sterling loans are:

	£
3½ per cent.	87,817,884
3 per cent.	76,784,185
2½ per cent.	11,589,986
Total ...	175,642,055

It must, however, be remembered that not all the £175 millions will need to be repatriated—for two reasons. Firstly,

TREASURY BILLS

India

Tenders for Rs. 1 crore of three months' Government of India Treasury Bills were opened on Tuesday, March 11, 1941. Total amount offered was Rs. 2 crores, 59 lakhs and 25 thousand. Tenders at Rs. 99-13-3 per cent. were accepted in full and those at Rs. 99-13-0 per cent. were allotted approximately 24 per cent. Total amount accepted was Rs. 1 crore, the average rate of accepted tenders being eleven and pies six per cent. per annum.

Tenders for Rs. 1 crore of three months' Government of India Treasury Bills will be received on Tusday, March 18, 1941. Successful tenderers should make payment on Friday March 21, 1941 or March 20, 1941 where Friday is a holiday. Other conditions are as usual.

Three months' Intermediates will be sold from March 12, 1941 to March 17, 1941, at Rs. 99-13-3 per cent. subject to the conditions previously announced (viz. sales can be stopped at any time without previous notice if Government think it necessary).

Three months' Intermediates sold from March 5 to March 10, 1941 amounted to Rs. 2,76,25,000.

During the week ended March 7, 1941. Government of India Treasury Bills for Rs. 5,19,50,000 were sold in favour of the Issue Department of the Reserve Bank of India.

MISRA HOSIERY
MILLS
CAWNPORE

Telegrams: MISRA, Cawnpore Telephone: 2336 Cawnpore

THE MISRA HOSIERY MILLS have, from the commencement of the war, been "on active service". Working day and night, the mills have been supplying essential requirements of the Army in the knitting line.

MISRA HOSIERY cater to the requirements of the general population and comprise socks, stockings, undervests, sports shirts, interlock underwear and outerwear, for men, women and children.

Production 8,000 Articles, daily.

Finance Abroad

THE historic Lease and Lend Law is already in active operation. Such is the celerity and spontaneity with which aid is rushed to Britain as well as to the smaller bastions of democracy that President Roosevelt has already requested the appropriation of a sum of $7,000 million *all in cash* (instead of a part being in contractual authority) towards rendering effective help. And Congress and Administration both seem to agree that this would be the best earnest of their intention to salvage democracy. Mr. Sam Rayburn, Speaker of the House, has been specially adjured by the President to give quick sanction so that the world may not be in any doubt as to the intentions of the United States to give the maximum help in the shortest time. At this rate, there seems to be no limit to the expenditure which the Administration will undertake, and the estimate of $10,000 millions to be spent within three years seems to err, if anything, on the side of conservatism. The Senate's amendment that the value of existing defence equipment, to be transferred should not exceed $323 millions has no special significance except as symbolising the desire of Congress that United States defences should not become unduly weakened as a result of indiscriminate transfers. Nearly all the amendments to the Lease and Lend Bill have been conceived with a view to prevent the President from acquiring dictatorial powers. Even in normal times, the President enjoys wide powers and Congress rightly feels that there should be provision for the President being obliged to consult the appropriate committees before taking any decisions of far-reaching importance.

The Lease and Land Law cuts across most of the previous laws. Among them the most relevant to this section is that the Johnson Act of 1934 banning foreign loans is now naturally held in abeyance, and the author of that Bill was himself one of those who voted for the Bill. We may, therefore, anticipate a period in the near future when the United States Administration may embark on a policy of extensive foreign lending to those nations whose stand against Nazism and its allies the U. S. Government appreciates and would like to promote. The importance of this revival of foreign lending to the ultimate redistribution of the world's gold must be appreciated. Although the U.S.A. cannot be expected to embark on such lending on as wide a scale as in the last decade, the grant of credits, if only on a limited scale, to non-American countries is a potential factor capable of redressing, to some extent the utter lack of balance in world economy today. As yet, sufficient information as regards the precise obligations of the countries, which will receive cash credit, defence equipment etc, from the U.S.A. are not known, besides so many other aspects of the working of the new law. Further comment must, therefore, necessarily wait for fuller details.

Belatedly comes the report of an announcement from Vichy that the Bank of France's gold reserve totalling 1,000 million francs was all in Martinique, having been transported there even in June last when the French collapsed on the Somme front. The transport of France's gold reserve to Africa puts one in mind of the tortuous course taken by Belgium's gold, which after being sent to Africa was finally handed over to the Germans. In fact, the unlawful surrender by France of Belgium's gold entrusted to her charge was the subject of a recent report in which the ex-Belgian Permier, M. Theunis, was said to have moved a New York Court for attachment of France's gold now "frozen" by the Administration. In the middle of 1940, France's gold position was far superior to that of Britain. When Paul Reynaud was Minister of Finance, prior to the outbreak of war, France witnessed the return of all that capital and gold which, in the time of previous governments, had all been exported out of the country. Paul Reynaud himself, on more than one occasion, has referred to the then rising industrial production of France and the return of confidence.

At the outbreak of war, France's gold reserve was really extremely impressive, as may be judged from the fact that, after prosecuting the war for nine months, France had nearly about £250 millions worth of gold, not to mention the amount which had been kept in New York and is now "frozen" by the orders of the U.S. Administration. French purchases from the U.S.A. in those days were smaller than Britain's and most of the French orders were later taken over by the British Purchasing Commission when France concluded the Armistice with Germany. France's half-hearted war effort was indeed responsible for the absence of any serious depletion of her gold resources, in and out of France. There is, therefore, good reason for concluding in retrospect that France must have had at least £400 millions at the start of war. Now more than half of it is still intact, though not in France. One wonders how unoccupied France, with its defeatist mood and greatly slowed industrial production and a host of other problems coming in the wake of surrender, is meeting the enormous costs of the German occupation which are put at 50 million francs a day. Germany's reparations plan, unlike that of the Allies in the last war, has not been delayed in being put into execution, and Hitler, who so often goes into a rage about the Versailles settlement, has shown that he can, in this as in other matters, out-Herod Herod himself. But one may be sure that France's gold reserve like the French Navy, will not be made so readily available to him. The Nazis have perhaps paid the greatest compliment to gold by the avidity with which they are cracking European central banks' vaults.

WORLD OF INDIAN FINANCE

(Continued from page 475)

there have been the small amounts of sterling loans of non-terminable character repatriated since 1937. These amounted to £9,337,500. Secondly, there are the amounts of the undated sterling loans held in the portfolios of Indian insurance companies, which may be anything like £10 millions. Over and above these are the amounts held by Indian nationals, banks and other institutions. The total of these is by no means negligible; and taking all these various sources together, anything like £20 millions is likely to be held in India itself. Applying these corrections to the total of the sterling debt, the non-dated loans to be cancelled should not be in excess of, say, £150 millions. Assuming a higher level of exports in the coming months and, quite possibly, larger gold shipments, and taking into account also the British Government's contributions, the liquidation of this £150 millions sterling debt should not be beyond accomplishment.

An analysis of India's balance of payments published in the current issue of *The Banker* shows excess of imports and merchandise, gold and silver from India between September 1939 and December 1940 at £90 millions, besides special payments like contributions, defence etc. In the coming year, the accumulation of £150 million sterling is almost a certainty, which therefore makes it incumbent on the Government of India to take steps for its retirement.

Just as the good offices of the British Government were readily forthcoming for the repatriation of the dated loans, before their due date, their help may now be sought and should readily be forthcoming. That London financial circles would greatly welcome the move may be gathered from their criticism of the repatriation of the dated loans that the undated ones should have been taken up first for retirement. The Government of India cannot take up the question a day too soon.

The exchange market has been dull and without any special feature. More export bills have been showing, owing to a slight improvement in the freight position.

The Reserve Bank's tap rate for sterling is 1s. 6d., all through for six months.

Banks were sellers of T.T. at 1s. 5 31/32d., for the third month; and 1s. 6 5/16d., for the fourth month.

Interbank call money is quoted ½ per cent nominal in Calcutta.

Help your servant to save

Each time wages are paid this employer buys for his servant an As. 8 Savings Stamp and his servant buys another of the same value. As soon as stamps to the value of Rs. 10|- have been bought and stuck on the Savings Card—given free at any Post Office—it is exchanged at the Post Office for a Defence Savings Certificate. This certificate will, after ten years, be worth Rs. 13|9|- but if the money is wanted before the expiry of ten years it will be paid out in full with the interest due.

Employers who usually give a cash gratuity when a servant retires after long service, can instead purchase Defence Savings Certificates on account of their servants and give them as presents upon termination of service.

The Future of Gold

LIKE the poor, the gold problem is always with us. With nearly 80 per cent. of the total monetary reserves of the world locked up in the capacious vaults of a Kentucky fortress and with the stream of gold movements still flowing towards the United States, the post-war gold problem seems one of abnormal complexity. Current discussions on the gold problem all emphasise the existing uneven distribution of gold and the high probability of the mal-distribution becoming greater and greater as the war continues to drag on. It is, no doubt, true that, at present, not only the current production of the precious metal but also the monetary reserves in most countries are being fast diverted to the United States. On a superficial view, therefore, the choice before the post-war world is between devising a monetary system in which gold will cease to play the role of international medium of payments and of the means of stabilising the international exchanges and accepting the handicaps and hardships of a lop-sided system of international finance.

So pessimistic a view, however, fails to take into account certain aspects of the character and composition of the gold accretions of the United States. For, beneath the monotony of this international flow of gold may be discerned a few features which have become prominent in the past year. The bulk of the increase in the gold holdings of the United States in 1939 was due to massive movements of capital. From being primarily a reflection of the flow of capital, the gold movement is now tending to become more and more the result of commercial transactions. In 1940, control of capital markets in all countries, belligerent and otherwise, was complete, with the result that a large part of the flow of capital into the United States was held in check. In addition, there was the German occupation of most European countries completing the embargo on capital export. Thus, on capital account, far from sending fresh capital to the U. S. A., the rest of the world was rather realising its investments in that country. And there can be no doubt that, but for the restrictions on the export of capital, the gold flow would have been much greater in the past year than it was ever before.

It is this change in the character of the gold inflow which holds out any hope that the ultimate international redistribution of gold need not be so difficult a task as is often imagined. The difference in the implications of a gold inflow on account of the emergence of an export surplus and those on account of a movement of capital, needs to be carefully examined. The gold that represents an export surplus for America will not come back except in consequence of a new sequence of commercial and financial transactions. On the other hand, gold stocks representing the movement of capital are capable of a reverse flow, because the foreign capital deposited with American banks or invested in American securities can always be persuaded to come back to Europe with the return of stable conditions in that Continent after the war. The tasks of rebuilding a Europe utterly demolished by the Nazis will certainly hold out handsome attractions to capital, in the shape of a higher interest and of greater possibilities of capital appreciation.

Certain computations would greatly help to clarify these possibilities. Between 1935 and the middle of 1940, the net inflow of capital into the U. S. A. according to the U. S. Treasury's official estimates of the international capital transactions of the United States, amounted to $5,877.3 millions, as against net imports of gold, over the same period, to the tune of $12,734.5 millions. Of the $5,877.3 millions of capital inflow, $2,716.6 millions was due to an increase in the banking funds of the U.S.A.—thus, nearly half of the movement of capital into that country was represented by a type of funds which is real 'hot money' and may, therefore, be expected to leave the country as readily if it can have reasonable assurances of safety. Then again, purchases of foreign securities is said to have amounted to about $1,092 millions, while at the same time, the United States funds is known to have been swollen by the return of U. S. banking funds abroad to the extent of $684 millions and by the sales by U. S. nationals of foreign securities to the tune of $785 millions. Making these corrections to the total figures of the increase in funds in the U. S., it will be seen that there is a large volume of foreign capital which is capable of being tempted out of that country and thereby provides a factor which can go a long way to reduce the existing mal-distribution of gold.

Yet another factor capable of modifying the position further is that, though the gold inflow has not had any inflationary consequences, as would normally be expected, and U. S. price levels have not risen, the time may ultimately come when the latter may rise and thereby affect the volume of U. S. exports. It is necessary to study this aspect a little more closely in the light of the history of the past few years. The bulk of the gold inflow was the result of a movement of capital. The Administration's greatest success was in its policy of effective segregation of the incoming gold from the credit structure. In fact, at one time, this policy was carried so far as to exercise a deflationary effect and the Administration had to release a portion of the neutralised gold. It is true that monetary reserves increased and excess member bank reserves went up. But the influx of gold had no effect on the quantum of effective purchasing power in the country, and, hence, on the level of dollar prices. On the other ahnd, the sales of gold by gold-producing countries to the U.S.A. and the application of their dollar proceeds to the redemption of dollar debt was definitely deflationary in its incidence on the national economy, a fact which explains why the United States export trade did not suffer the handicap of rising prices.

It is, however, well to note that these trends are reversible. For one thing, with the colossal expenditures now undertaken by the Administration on the effort to help Britain and to place U. S. defence on an impregnable footing, it is more difficult now than before to avoid inflationary consequences. Already, there is a spate of discussion in the U.S.A. on the need for vigilance in this matter. Though the price-level is the least of the factors that will determine America's balance during the war, the significance of rising prices should not be ignored. The effective operation of these factors in the gold position is severely circumscribed by the course and exigencies of the war. For, in the first place, most of the foreign capital now in the U.S.A. may be increasingly utilised by the governments of the Allied

countries in paying for the war material and ammunitions they buy from America. And, secondly, the prospects of America's export surplus undergoing a reduction are, to say the least, meagre, because the war cannot be won except by such exports on an increasing scale. They cannot, therefore, be discouraged by such economic forces as the incidence of rising price levels on exports or the manifestation in the near future of an inflationary trend in America.

If we give to these exigencies of the war the importance due to them, it will be seen that the postwar gold problem must remain a formidable one. And in so far as it is now possible to foresee currency relationships in the uncertain world of that future, we may say that the other currencies will not be able, so to say, to look the dollar in the face. By the end of the war, American industry will have improved its competitive power to fresh heights, and there would be many things needed for peace-time life which the U.S.A. alone would be in a position to supply. On the other hand, the rest of the world would, in the same period, have impoverished itself either through the fall of prices or restriction of production in consideration of the shrinkage of markets therefor. The weakening would also be further felt in the non-American countries when the stimulus provided now by the war demand is no longer there. Thus, a strengthening of America's economic power and a weakening in the same in the case of the rest of the world would together cause an unbalance on trade account such as will not be easy to redress. On top of that, if, on the close of the war, capital should flow back to Europe, the difficulties on commercial account would be increased much more.

In a previous paragraph, we alluded to the position of immense advantage in which the dollar would stand vis-a-vis other currencies. It is interesting to speculate on the degree of freedom which one can visualise for international exchanges in the post-war period. Britain has pledged herself to the restoration of their freedom as part of her peace aims. It is, however, inconceivable how such freedom is possible and how, even if it is, it can be in the best interests of world currencies. For, immediately on the restoration of the freedom of the exchanges, there is bound to arise such an enormous and irrepressible demand for dollars that even the few amounts of gold left in the currency reserves of countries would immediately find their way to America, *thereby worsening the position further*. All things considered, there seems to be no escape from the conclusion that, after this war, at least for a transition period, some degree of exchange control will be inevitable and necessary. The restoration of free commercial transactions and of the liberty of payments for imports visible and invisible, is, no, doubt, very laudable. But, in regard to movement of capital, it is difficult to resist a feeling that the movement of capital will, and must, continue to be under duress. Such a state of partial freedom for international exchanges will, perhaps, result in the creation of *currency blocs* grouped around each major currency. There might be a lot of latitude permitted to members with each currency group, but the measure of freedom of transactions between the currency groups themselves would be of a limited character.

In such circumstances—with the U.S.A. holding nearly nine-tenths of the world's gold, and with alignment of world currencies along currency *blocs* with greatly restricted freedom as between the currency groups themselves—the role which gold may be assigned seems one of limited importance. The question that arises, therefore, is the chances of gold continuing to be the international medium for settling of accounts.

At the outset, may be mentioned the extreme unlikelihood of the world ever dispensing with a medium altogether for settling international transactions. Nor is it likely that exchange control can be so rigidly and so successfully applied as between countries that no balances will remain on the transactions. It is enough to mention that even Germany has not succeeded in working exchange control to such perfection that Germany's external accounts are settled completely. In any case, after the war is over, commercial transactions will tend to increase greatly, and leave large balances to be settled. If at all any form of exchange control is continued after the war, it will be more with a view to regulate and canalise the flow of balances rather than to stop international clearing of money on account of transactions on commercial as well as capital account.

As for the continuance of gold as the international settling medium, there are very strong reasons why gold cannot be displaced. But, before we pass to them, it is necessary to stress the fact here that gold has been quite unnecessarily saddled with the blame for a state of affairs which would have been brought about by any other medium. If pebbles had been the medium of world transactions, four-fifths of the world's stocks of pebbles would still have gone to America. Moreover, there are powerful countries interested in the preservation of the present monetary status of gold. The United States alone has invested a fabulous amount of money in its gold stocks and would not allow any relegation of the precious metal to unimportance. Then again, there are the Empire countries and Russia, whose output of gold is considerable and who will hardly permit any monkeying wih the international status of gold. After all, depite the prejudice against it, there is no other article which enjoys the same advantages nor the same universal acceptance for settling debts. By every criterion, therefore, the importance of gold in international finance can hardly diminish, even though the immense concentration in one country gives rise to so many complications in trade and monetary management.

All that can be hazarded is that we have probably seen the end of the gold standard. In the early years of the postwar period, at any rate, fixed relationship between a unit of gold and a unit of money will be impossible to revive. Nor will any country bother unduly about it when its problem would be one of finding dollars. The so-called gold problem will really be a dollar problem. Mr. McKenna may be right, in a sense which he probably did not suspect, when he said that the world is on a dollar standard.

Editorial Notes

WITHOUT expatiating in detail on the merits of the compilation one can say that the *Statistical Year Book of the League of Nations* prepared in October 1940 and received only lately, represents an attempt to provide much in little. The essential value is based on the great care taken by Mr. Loveday and his staff. Working under unusually difficult conditions, the statistical compilation is more than a regular annual to be acknowledged perfunctorily and ignored thereafter. Mortality statistics, production figures, wage standards, banking statements whatever be the subject under reference, the Year Book can throw light. The latest edition corresponds to its predecessors in most respects and the position of world agriculture and industry as at the end of 1939 is described and collected in tabular form. In certain cases, information is incomplete or not available, owing to the war, and the disappearance of several tables relating to minor subjects can therefore be satisfactorily explained. The population statistics provided in the volume make use of the U.S. census of April 1, 1940. The total of 181.41 millions is not as large as it should be in view of the fact that the population as estimated at the end of 1938 is given as 180.3 millions of which nearly 14 millions was non-white. The Year Book refers to the area and population of the international zone of Tangier without going into the fact that in June itself Spain had taken effective steps towards the recovery of Spanish authority.

An interesting fact disclosed by the Year Book is that the population of Soviet Russia (including Asiatic provinces) as recorded by the 1939 census exceeded 170,467,000 a figure lower than originally anticipated. The chapter of German aggression beginning on September 1, 1939 brought under the authority of Germany 10⅛ millions and the rendition of the Southern Dobrudja gave Bulgaria a district of 7,726 square kilometres and a population of 378,314, a total based on the census of 1939. The total population of Bulgaria including the Dobrudja as at the end of 1939 may be estimated at 6,720,000. The Year Book may therefore be depended upon to give information that elucidates the news from day to day. It is however singular that the addition of nearly two-thirds of Transylvania to Hungary is not discussed in an appropriate footnote but then the absorption of the Baltic peoples minus the Balts into the limitless manpower of the Soviet Union does not find mention. No reference work compiled when frontiers are changing can claim finality or irreproachable accuracy. But the statistics presented are useful in many other ways, for determining natural increase from year to year, measuring the death rate in age-groups and by sexes.

The regrettable black-out of statistics in several countries is primarily responsible for the gaps and lapses discernible in a work that aims at giving as much as possible of information to the student of economic and financial questions. The Monthly Bulletin of Statistics has accustomed one and all to expect a high degree of accuracy and clearness, and there is certainly no reason to believe that the 1940 edition of the Statistical Year Book with its galaxy of tables relating to output, prices and stocks is less interesting and dependable than previous editions. Material from various allied publications prepared by the League financial and economic section has been laid under contribution. And wartime changes as regards money and exchange can be studied, as through a glass darkly, in the pages of the Year Book. For some idea can be obtained now of the over-valuation of the mark in the Occupied countries as the rates fixed invariably exceed the last official rates ignoring the fact that the Reichsbank practised such rigid control as to destroy the belief that the mark was anchored to gold.

Assam Budget

Like the year which it follows, 1940-41 will be a deficit year for Assam. This fact gives special force to the observations of the Finance Member when introducing the Budget Estimates. A revenue deficit of Rs. 11.89 lakhs is anticipated as expenditure at Rs. 324.9 lakhs will exceed the revenue totalling Rs. 313.01 lakhs in 1941-42. That the revenue shows a fall compared with 1940-41 is only to be expected as revenue receipts started to fall below expectations in the preceding year largely because of the delay in geting the proceeds of the agricultural income-tax. The deficit is not large and the possession of fairly large balances derived from the loan floated last year relieves Assam of anxiety as to further borrowing as also to the anticipated deficit. Assam has however to face up to reduced revenue and reduced grants from the Centre, but the actual draft on the revenue balances will not be great. The Minister stated that the year would end with Rs. 46.97 lakhs as against an opening balance of Rs. 51.47 lakhs shown in the Revised Estimates for 1940-41. The provision for increased appropriations to beneficent departments induced the Minister to ignore the deficit which arose in consequence of increases in public health expenditure, education and prohibition propaganda. The deficit will result in an increase in the unfunded debt of the Province but the loan floated in 1940 will be met by regular sinking fund contributions which have started well with the initial appropriation of Rs. 2.6 lakhs. The increase under Revenue referred to by the Finance Minister is under two heads only, namely, Land Revenue and Forests, more on account of retrenchment and abeyance of remissions than from natural increase. A general review of the financial administration of the Province together with one about the Ministry's work was provided by the Minister who discussed the results of the prohibition policy on the excise revenue. The Minister mentioned, in this connection, the desirability of introducing new taxation measures to replace revenue lost through Prohibition. Assam has tried already the taxation of amusements, petrol sales and agricultural income-tax but the yield of one or all of them has been disappointing. The Minister referred to the possibility of relief under the expenditure on the Assam Rifles, the control of which force is to pass soon under the Central Government. Total receipts from revenue in Assam in 1941-42 will show a fall compared with the Revised Estimates for 1940-41 as also the Budget Estimates. But the growth of revenue as compared with 1939-40 when total revenue realised was Rs. 293.38 lakhs only is clear enough though Central grants-in aid are not larger. This has certainly to be considered in relation to the parallel growth of expenditure shown in the financial statement.

Air Mastery

Though the financial details are lacking the Air Force Estimates introduced on Tuesday by Sir A. Sinclair in the House of Commons suggest that mastery of the air is now an object within definite reach. Some months ago, when night bombing started, it was stated in the *Spectator* 'we need a new type of night fighter and it is not yet available in adequate numbers yet and a new type of long-range fighter to cope with the German bombers which based on aerodromes in the northwest corner of Brittany are able to attack, and are systematically attacking British shipping far out in the Atlantic.' In the last month or two reference has been made to the new aircraft in commission with particular emphasis on the increase in speed and striking power. The Whirlwind, Tornado, Avro Manchester and the Short Stirling have been described already and Sir Archibald made first mention of the Beau fighter (evidently a Bristol product) designed for long-range operations and night fighting and carrying very heavy armament, also the heavy Halifax bomber. The new models of existing bombers were described as being heavier and faster, able to carry a bigger load of bombs and also heavier defensive equipment.

Sir Archibald's assurance that technical superiority with the moral superiority that accompanies it, will certainly be maintained throughout the year 1941, is the best answer to the jitterbugs who still survive the failure of the *blitz* of summer. Sir A. Sinclair gave also figures relating to losses in the past year in two theatres of war. The R.A.F. had a bag of 4,250 German 'planes and 700 Italian 'planes and had lost 1,800 'planes. With 280 raids on aerodromes and seaplane bases, 300 on docks and shipping, 470 on railways and communications, 630 on industrial targets, all in Germany apart from many heavy raids on objectives in Occupied territory, the R.A.F., according to the Air Minister, had started its own offensive. Though full figures relating to existing strength are not obtainable, Sir Archibald's statement that the aircraft of R.A.F. command alone exceeded the total peace-time strength of the whole R.A.F. by nearly 50 per cent., while two other commands had a strength equal to more than half the peace-time R.A.F. total shows that quantitative progress has been rapid. Guesses can be indulged in on the basis of this statement as regards the actual wartime expansion of the R.A.F. The assurance that training is thorough and efficient at all times explains the vast difference between the German and British air losses. The claim that half the Italian aircraft of the first line had been destroyed along with more than half of the aircraft with which the Germans entered the war is sure to inspire satisfaction. The statement may ignore the German spoils of war as also the replacements coming from factories but, the figures of 30,000 and 35,000 bombers, frequently referred to as available for Germany, can hardly be correct. The introduction of the Air Force Estimates this week was the preliminary warming up for the Budget. The other Service Estimates will provide for more money on the strength of their achievements and the taxpayer's liabilities in this regard, may be therefore heavier for the next year. The certainty of higher taxation has been referred to by *Reuter's* lobby correspondent this week. The possibility of an increase in direct taxation has been mentioned as also the likelihood of new expedients like a tax on services, namely an impost on railway fares, meals in restaurants and the like. Though the latest estimate of Britain's national income at £8,000 millions suggests that a gap of £2,000 millions between revenue and expenditure can be without difficulty met by frech taxation, the rise in national income compared with 1939 may not be wholly due to the rise in employment due to the war.

Submarine War Prospects

The threats of aggravated submarine warfare have not died down. The shipping losses for the past three months are by no means discouraging and the spring campaign foreshadowed in Hitler's speech has not begun. Attacks on shipping from the air or under sea present however a danger as a further reduction in shipping space available to Britain would entail stricter rationing and in addition a slackening of munitions output. But the shipping position may undergo a great change, in case American vessels are made available to Britain. Up to November, the gains had nearly cancelled out the losses. The loss of British tonnage in the first year of war was made good by the additions from the Norwegian, Dutch and French mercantile fleets. And remembering that Britain started with a slightly larger tonnage than at the beginning of the last war and that losses at sea so far have been below the average for 1917 when the submarine menace was acute, the position in November was one to engender confidence if not complacency. It is by no means certain that Hitler's U-boat campaign would cover the Mediterranean which is the more important theatre of war just now. Supplies to the Middle East by convoy should be main-

tained as the Italian navy is hardly encountered. And the German submarine attack may not be so virulent as imagined. It has been ascertained that the total of 600 to 1,000 submarines mentioned in German reports is abnormally high. The total represents a multiplication by five or ten of the possible output of German yards in a twelvemonths' spurt. Submarines even of the small 400 ton type cannot be mass-produced on the scale of the small motorcar. Hulls and engines may be turned out in large numbers up to the limit of supplies of raw materials, but these are only basic elements in submarine construction. There are scores of intricate pieces of machinery which demand careful manufacture. The supply of workers skilled in the intricacies of submarine construction is limited in Germany and there is no evidence that the Germans have been able to recruit willing extra hands among dockyard workers in Denmark, Norway and Holland, countries in which submarine building has been carried on for many years. There is also the problem of space. The number of ships on which Germany can lay down a vessel of 200 to 300 feet in length is known and though yards in the Occupied countries can be added to those in Germany, there is still no place for 600 new keels in the last 12 or even 17 months. There might have been a programme in hand for 150 new boats. An American naval estimate puts the total at 180 and there may have been that number on paper. But the construction total cannot be reached and only 100 to 120 boats may be actually available for service.

Over
1400 MILES
of CAST IRON PIPES
ARE LAID AS WATER MAINS
UNDER THE CITY OF CALCUTTA

The durability of Cast Iron Pipes is so thoroughly proved that no limit is placed on their life. Water Supply Engineers regard Cast Iron Pipes as the most economical form of piping because they are impervious to corrosion and rust, they are the cheapest to maintain, save money on street openings and pay a final dividend in salvage value.

Cast Iron Pipes are manufactured at our Kulti Works to B. S. S.

Deductions must be made from the total for training vessels. If 4,000 men are in training at Kiel at least 20 submarines are needed. Further, all submarines cannot be at sea at the same time. There must be a rota of boats at sea, boats resting their crews and undergoing extensive repairs. Experience has shown that only one-third of the available craft can be on active service in any one week. This means that Hitler could put into the attack only 50 out of a possible maximum of 150 submarines. The total is not regarded as formidable because it is certain that most of the new boats are only replacements and do not represent new building. It may be concluded that the submarine attack will not be more dangerous than in September, 1939 when the British Navy picked off its anemies effortlessly. Allowance must be made for German losses though they are not so high as in the first six months of war when the average bag was two to four per week. The slackening in attack may not be measured as yet in continued losses because some of the British vessels lost at sea may have been destroyed by enemy aircraft or the mine. Hess and Hitler may have talked big for other reasons and the Prime Minister's last review contained no more than a brief reference to the possibility of increased losses of merchant vessels because preparations to meet the submarine threat have been assisted by accelerated scientific developments during wartime. Thus the coming war in the Atlantic will be no more terrifying than the imaginary invasion.

National City Bank of N. Y.

A statement published for general information shows that the National City Bank of New York long ranked among the world's greatest banks finds in war as in peace new opportunities for efficient and complete service. The statement reminds us that war has its consequences for the financial institutions of neutral countries too, but the 25 per cent. increase in deposits recorded is perhaps a local and unsurpassed development. With total deposits amounting to $2,908 millions against $2,331 millions at the end of December, 1939 the Bank is more than ever a Titan of the financial world. The cash balances as shown in the statement stand at over $1,300 millions, a figure that brings out fully the progress made in the year preceding the 129th annual meeting. A point that invites special consideration is that cash and bank balances exceed in value both Advances and Investments. The statement drawn up at the end of the year emphasises also the fact that the National City Bank is well equipped to discharge its two major responsibilities. One is to safeguard the funds entrusted to it as Mr. Gordon S. Rentschler told the shareholders on January 14. The other is to give the utmost aid to the national defence programme. Apart from subscriptions to issues of securities the Bank has made available loans and commitments directly for defence and a large amount of informal and more personal aid to the programme through the relations the Bank maintains with its industrial customers and with the agencies of government. The point was amplified by Mr. Rentschler in discussing the place of bank credit in defence production particularly as the Bank had indicated its willingness to finance emergency construction when contracts have been placed for the purpose. The vital changes of wartime received due attention in Mr. Rentschler's survey and the Bank's constituents will note that despite the risks and difficulties incident to the emergency, the Bank tries to carry on business as usual. The fall of Paris and the writing off of the value of the premises there were referred to; banking under air raid conditions has not been the experience of one branch alone as the report recalls.

The composition of earnings, the character of deposits and the completeness of services were touched upon in the Chairman's speech. While business in Europe had suffered through the war, the Bank has made great headway in South America justifying the assumption that there is a sound basis for more extensive economic relations. What the Bank and its subsidiaries have done and are doing is writ large on the page of economic history. American business abroad has benefited continuously even in the most difficult conditions and the 66 branches in 23 different countries are an essential factor in the progress reported.

No. 1 THE INSTALLATION

The Installation is the foundation on which Burmah-Shell's elaborate and extremely wide spread organisation of Kerosene distribution is built.

Here vast quantities of Kerosene are stored and packed. Each of these operations calls for specialised treatment, and at all of their Installations Burmah-Shell employ a large staff of Engineers and labour in order to guarantee that the public throughout the length and breadth of India obtain Kerosene of standard quality and of full measure.

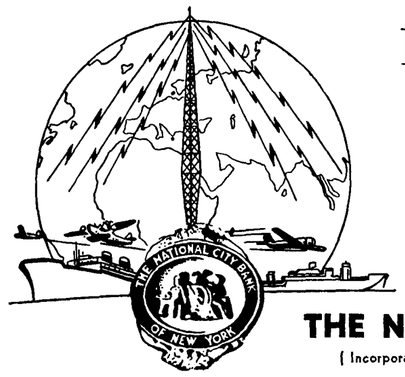
"I must have liberty
Withal, as large a charter as the wind
To blow on whom I please."
—(As You Like It.)



THE Lease and Lend Bill is now on the American Statute Book. And one might well exclaim as Fox did on hearing of the storming of the Bastille, "How much the greatest thing that ever happened in history!" To all appearances, the Lease and Lend Bill is only a piece of internal legislation. It is a measure which the American Administration and the majority in both Houses of the Congress deem to be necessary in the interests of American defence and security. The passage has been marked, at least in the early stages, by all the characteristics of party legislation. To fasten on these features of the Bill is to miss its enormous significance in current affairs or to the future of the world. The Lease and Lend Bill lends itself to being viewed from a variety of angles. It marks the signal success of President Roosevelt in persuading Congress to recognise America's vital interest in the war that is being fought on the European Continent. It may also be viewed as the success of the efforts first made in striking fashion by Lord Lothian after his return from a brief visit to London. In fact, the British nation owes a deep debt of gratitude to their Ambassador in Washington who brought to a head the subject which now forms the official title to the Aid to Britain Bill. There can be no question about the credit due to the leading personalities. Lord Lothian, President Roosevelt, Mr. Cordell Hull and many others have faced courageously the initial unpopularity and lent powerful strength to a cause which they knew to be true.

And it is even less disputable that of these, the President is entitled to the utmost praise. To Mr. Roosevelt, the Presidency has never been a bed of roses. He rode to power on the crest of popular resentment against poverty amidst plenty. Mr. Hoover had bungled and never knew he had. American economy was moving fast on the inclined plane. Mr. Roosevelt arrested it, first with the force of buoyant hope and then with innumerable administrative devices. Slowly, the New Deal took shape in a brain endowed in uncommon measure with plain common sense. Its details, he left to be worked out by a Brain Trust. All the forces of narrow self-interest and stupid scepticism were arrayed against it. But the problem for Mr. Roosevelt was not so much to salvage the New Deal as to conserve his influence and power over American opinion. For problems of even geater importance were looming on the horizon. Autocracy had lain its heavy hand over a large part of Europe. The Democracies were bungling and playing into the hands of the Dictators. A major clash between the two could be postponed, but was ultimately inevitable. Mr. Roosevelt knew that America might conceivably fail to play her true part, if he were not at the helm of affairs.

It is a marvel of modern politics, how Mr. Roosevelt protected his personal prestige after the wreck of the New Deal, how he humoured and cajoled American public opinion on the two questions on which its prejudice was deeprooted, the third term and isolationism. Nothing was easier than to commit a fatal mistake in these two matters. A premature proposal for the third term would have spoiled all chances. And so would any suggestion that the third term was out of consideration. Likewise, a frontal attack on isolationism could only result in a rout. At the same time, it would only be strengthened by any appearance of pandering to it. There is consummate combination of tact and straight-forwardness in Mr. Roosevelt's way of solving these two problems. What Chatham said of the British Empire in its moment of peril, Mr. Roosevelt must have felt of Democracy when the clouds were gathering on the European horizon. To gain his purpose of constituting himself the saviour of Democracy, he never compromised either the spirit or the letter of democratic government. In more than one sense, Mr. Roosevelt is the last hope of Democracy.

However, the importance of the Lease and Lend Bill, as I said, is not to be confused with the triumph of personalities. To my mind, it lies in the fact that it is Democracy's authentic answer to all the moves that Fascism and Dictatorship have been taking during the last ten years. I realise I am not saying anything simple or obvious. But I am certain that most people will agree with me that, though the Dictators have been plotting and planning and executing all these years, there has not been till the passing of the Lease and Lend Bill by the American Congress anything which may be regarded as Democracy's answer to the challenge of the dictatorships. Take your mind over the last ten years, if not a longer period. Axis aggression started with the attack on Manchukuo. The Axis itself was formed a long while ago, soon after the sabotage of the Disarmament Conference, in which the Democracies have quite an unenviable record. Germany and Italy

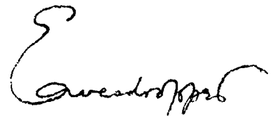
and Japan have been literally thick as thieves. They have plotted and carried out one act of aggression after another, on Manchuria, China, Abyssinia. Only when it came to Sudetenland were the eyes of the Western Democracies opened. Hitler gave the challenge; his accomplice Mussolini played the mediator. And the democracies came out of Munich as dupes, though in fact they, too, were cheats. As Hitler's aggression became more pronounced and dictatorship menaced all equally, it was the duty of Democracy to furnish the answer. But the democracies kept mum. When Poland was attacked, they stirred themselves. But so did the Fascist gangs in Britain and France. While in the former they were rendered innocuous, in the latter they were victorious. France surrendered. Britain, too, fights in the main, for her safety and security. If she had been more specific about war aims which do not concern her exclusively, her action may be viewed as Democracy's answer to the Fascist challenge.

As things are, though Britain is, no doubt,, fighting for her freedom and the forms of government that appeal to her, her reply is not in behalf of Democracy as such. The Fascist challenge has a unity about it, which the answer of France and Britain has always lacked. It never occurred to the champions of democracy that the least they should do to the cause is to make the most of all its well-wishers. To spurn Russian aid and stand behind the narrowest oligarchy in history, namely, Poland, is easily the worst disservice that could be done. By neglecting the most elementary preparations, they increased the handicaps of democracy. Country after country has come under the German heel. Even Greece which stood up against the Axis and beat back the Italian armies, is now face to face with Germany. Till Mr. Roosevelt drew up the Lease and Lend Bill, Democracy had not formulated the answer to Dictatorship.

There is about this Bill an indubitable internationalism for which we have hitherto looked in vain in the actions of other Great Powers. America is not thinking of herself alone when she enacts the Lease and Lend Bill. For when she did think of herself alone, she was isolationist. The Johnson Act, the Neutrality Act and similar Acts were the U.S.A.'s answer to the war in Europe. And it would be wrong, not to say ungracious, to suggest that the purpose of the U.S.A. is only to save her skin and that the motive behind the Lease and Lend Bill is only one of enlightened self-interest. The aim of the Lease and Lend Bill is to make the U.S.A. the great arsenal of Democracy. Though the Act stresses the considerations of the defence and security of the U.S.A., every member of the Senate and the House of Representatives knew that under the Act, the President could lend American help to countries as far away and as far apart as China and Greece. For what matters is the threat of Axis aggression. We may have to thank the world outlook of the Axis for the internationalism of the Congress. But this internationalism is a fact. Its aim is to rescue the world from the threat of dictatorship and make the world really safe for democracy. To Woodrow Wilson this was a phrase, impressive rhetoric or at best a flight of fancy. To the American people today, it is a practical expedient, a frank necessity. They do not propose to kick

Apply to your Banker or Honorary Secretary, British War Savings Committee, P. O. Box 625, Calcutta for leaflet with application form



BWS/7

against it, or to hum and haw. They seize the facts and the objectives; and they are prepared to go ahead. They make a bonfire of all the dusty account-books with their bad debts and their worse feelings. And, in fact, they are prepared not to keep any account at all for the help they will be giving to Democracies in their fight against Dictatorship.

That is why I prefer to regard the Lease and Lend Bill as Democracy's authentic answer to the challenge of Germany, Italy and Japan. Now the Axis will know that the fate of Democracy is not in the hands of a hard-pressed island or even its far-flung Empire, but in those of a Power which is supreme over a whole hemisphere. German power rests on the effective stringing up of a number of countries and the pooling of their resources. On the side of Democracy, there has not till now been a similar phenomenon. The British Empire is distributed over the whole world and is not comparable in this view to the countries which Hitler has under his control. Now that President Roosevelt has the formal authority to convert the States into the great arsenal of democracy, the Axis is face to face with a combination which has unlimited potentialities of growth.

For the first time, therefore, the scales of war have been tilted against the Axis. The old idea that Germany could concentrate the power of her air raids on Great Britain and keep in the background the vague threat of moving Japan in the Far East has to be abandoned. That Germany does not mistake the significance of America's aid is clear from the view current in Germany that American help will prolong the war. It is too much to expect a confession that it alters the entire look of things. But the admission that the Lease and Lend Bill will prolong the war is a confession of the disquiet that is prevalent in Germany. It could hardly be otherwise; for the Bill is but a beginning of radical changes that are yet to come. At the present stage it signifies primarily that the American people have at last defined their position to the war. At the beginning their reaction was one of unqualified adherence to the isolationist view. There was widespread fear that America might be cajoled into making large loans and then forced to throw good lives after bad money. Legislative safeguards against these dangers were tightened. But slowly the perils of isolationism became evident. The people were divided in mind. And Mr. Roosevelt skillfully assisted the public in its appreciation of facts. Now they know that their entry into the war, on which they still entertain strong views, is a matter of no great practical importance. What counts is the measure of help which America will extend to the Democracies. And this, the President is now free to give to the fullest extent possible consistent with America's own defence requirements.

If the war should spread, the significance of the Lease and Lend Bill will prove almost immeasureable. The Dominions of British Empire have taken forced marches towards complete independence. Canada by virtue of her position came under the Monroe Doctrine and is now within the scope of the American scheme of defending the Western Hemisphere. The position of Australia, too, is not far different. In view of the Japanese menace in the East, Australia is forced to consult and collaborate with the U.S.A. without the intermediacy of British Cabinet. The efforts of the Democracies to remove the menace of Fascism may even involve American aid in the development of India's resources in munitions. So mighty an effort is bound to change the complexion of the post-war settlement. Woodrow Wilson was an almost unwanted intruder in the Versailles Conference. Mr. Roosevelt's position would be far different. He may be found to champion democracy as vigorously after the war as during it.

New Delhi, March 12.

VERY few questions of financial importance were raised in the course of the debates on Budget grants in the Central Assembly which concluded on Monday last. The grievances of political prisoners, reforms for Baluchistan, Muslim complaints against census officials, paucity of Muslims in the Civil Aviation Department and similar questions which were either communal or political seemed to excite far more interest than questions of financial policy. It is only the European group which tried to utilise the occasion to discuss problems of war finance and elicit a statement of policy from the Finance Member. The "cut" motion tabled by the European group was specifically intended "to discuss financial policy with special reference to war finance." In the long speech which Sir Jeremy Raisman made in reply to the debate on it many important issues found elucidation. His reply to those who had objected to additional taxation on the ground that the taxable capacity of the people had not increased was that as the government's expenditure took place mostly in the country it meant that money went out of the Treasury in increasingly large quantities into private pockets. So as the Government's expenditure increased, national income increased too—so argued the Finance Member. Reference was also made by him to the difficulties arising from the imperfect taxation system in India because "a whole field of taxation such as agriculture which was not subject to the Central tax system."

A further statement was made by the Finance Member on dearness allowances in reply to the debate initiated by Mr. N. M. Joshi. In his opinion, the position which prevailed over large areas of India was that the cost of living had increased if at all only to the extent of barely ten per cent. It was quite impossible, he maintained, to preserve any kind of wage structure if fluctuations of that kind were to be continually adjusted. The principle which he reiterated was that the cost of living in any particular locality was peculiarly a local matter regarding which the Provincial Government was obviously in the best position to form an opinion. The Government of India's policy was therefore that in the case of the Central Government's own employees serving in provincial areas the Central Government should apply to them also any scale of allowance decided by the Provincial Government in that particular area for its own employees. As regards Central areas the Finance Member's view appeared to be that the Government of India should formulate something on the lines which were applicable in the neighbouring districts of contiguous provinces. At the meeting of the Standing Finance Committee last week it was disclosed that the Provincial Governments have already prepared schemes for the grant of allowances to their employees drawing Rs. 30 per month or less (Rs. 40 per month or less in Bombay and Madras cities) if there is a given rise in the general cost of living or if the price of certain staple food grains increases to certain specific levels. It was announced that Central Government servants will be given the allowances applicable to the province in which they served. The Bengal scheme has already come into force with effect from 1st February.

Orders have at last been passed for the appointment of two more Trade Commissioners abroad. According to the proposals submitted to the Standing Finance Committee, the jurisdiction of the new Indian Trade Commissioner at Toronto will be the entire Dominion of Canada and that of the Trade Commissioner at Buenos Ayres, the whole of South America as far north as and including Guatemala. It appears that these appointments are intended in the first instance only for the duration of the war under the new Trade Commissioner in New York. As has been previously stated, there is also a proposal to attach a Trade Commissioner to the office of the Indian Agent-General in South Africa who has now been given the rank and designation of a High Commissioner. The only other subject considered at the meeting of the Standing Finance Committee was the proposal for the installation of a three channel telephone carrier between Delhi and Lahore *via* Bhatinda as an alternative to the existing route and also the construction of a second trunk telephone circuit between Calcutta and Dacca—the total expenditure involved being about Rs. 3½ lakhs.

Defence questions loomed large in the discussions of the Central Legislature. It may be remembered that in the Council of State the Commander-in-chief, had referred to the demand for an Advisory Committee for Defence. The actual words used by him were that the demand for closer co-operation between the Legislature and the Defence Department, specially in respect of giving advice to the Defence Department and receiving information had his full sympathy. He expressed the hope that before long it might be possible to arrive at a compromise which would be useful both to the House and to the Government. Though the assurance was definite it did not convey any idea of the exact machinery which was proposed to be set up to achieve the object in view. It was therefore hoped that when the subject was again raised in the Assembly on Monday more information would be vouchsafed to the House. Unfortunately, even Mr. Ogilvie who spoke on behalf of the Defence Department in the Assembly, had no more details to communicate. All that he said was that the Commander-in-chief was firmly of opinion that the possibilities of his receiving the views and the advice of representatives of the public on the one hand and his giving them information on the other required regularisation and His Excellency hoped that arrangements would be worked out whereby this could be given effect to. He was not in a position to explain in what precise manner this was proposed to be done, but he went on to refer to the "many difficulties, not only constitutional but also practical." It is not yet known whether the result of the Commander-in-Chief's re-examination of the question would be a committee in some form or other as desired by the public or some meagre substitute for it as indicated by speakers like Sir Frederick James —merely some method of consultation with party leaders and others at periodical intervals or whenever necessary. Lobby comment regards it as far from certain that any committee approximating to that of Standing Committee will be appointed—despite all the good intentions of the present Commander-in-chief.

The debate on the present method of class recruitment to the Army in the Council of State ended in the acceptance of the compromise amendment moved by the Commander-in-chief. Pundit H. N. Kunzru who opened the debate pointed out that as a result of the present policy of recruitment which confined itself to certain "listed" classes, some provinces were unduly favoured and many went without adequate representation. In the recruitment for the expansion of the Army last year, the Punjab according to the figures given by the Pundit had secured as much as sixty per cent. The claim put forward by nonofficial speakers was that every province and every class were entitled to their due share in the defence of the country. In the sympathetic speech made by the Commander-in-chief a satisfactory assurance was given regarding the future. According to the amendment moved by His Excellency and accepted by the House, the Army authorities are expected to review sources of manpower throughout the country and also ensure that no class or area is excluded from consideration for recruitment in the formation of new units. It is thus far and no more that the Commander-in-Chief is prepared to go at the moment.

One important point in connection with the Finance Bill which the opening day's speeches have prominently brought to light is the need to levy a counter-balancing

(*Continued on page* 494)

Gateway of India

Bombay, Mar. 11.

PEOPLE here are so busy talking about the leaders' conference on the 13th that one wonders whether it is worth all the fuss. It is a lucky thing that the event was not called off on account of the lunar eclipse. If Sir Jagadish Prasad expects his friends at the conference to put up a plan acceptable to the leading parties, not his friends at the conference, and to the Government too, he must be an invincible optimist. The conference with its majority of Hindu moderates may decide on its demand but the question is how the Government views it. Of course, the promise that India will be induced to help heartily in the war effort is there, but industrial advance, defence and other subjects are not of great interest to the Government at present. The assurance of increasing assistance from the U.S.A. may make the Government indifferent to Indian claims while the idea of a constituent committee may not appeal to any but those who propose to serve on it. The situation may require more precise and realistic minds than those of retired members bent on getting office, but the presence of select publicists may act as a leaven in the matter of public spirit for the habitually cautious moderates. Nothing that the conference can say on Pakistan will weigh with Mr. Jinnah, who has only to look at the opinion of the Punjab Premier on the subject as expressed in the Punjab Assembly, at present to know that he has other opponents than Hindus.

The rise in textile manufacturing costs in Britain affords India more than ever an opportunity to win new markets. The control machinery does not lead to economy, and in India, too, the rates quoted for replacement chokes off demand effectually. If the Dutch Indies and Malaya can buy as before from English suppliers India obviously cannot, and the meagre demand for fancy and coloured goods makes people think that Lancashire has no chance against Indian mills. The improved prospects of the textile industry were described only last week by the Chairman of the Millowners Association. Improvement in the future depended mainly on the ability of the industry to supply new overseas markets with the cotton goods they need and the capacity to ship those goods when orders have been obtained. He referred to the importance of trade commissioners, examining the scope for exports in promising markets with due regard for all details. The textile trade believes that trade agents and missions have an enduring value. A big increase in mill consumption is needed for solving the problem of the surplus crop. The increase in output demands additional markets and the interests of the growers and manufacturers are seen to be identical. If the mill industry's position is to improve continuously, the export trade must keep expanding, and increased trade within the Empire will not surprise any one who knows that India is both a grower and manufacturer of cotton with a total output of textiles much larger than that of Lancashire.

The cotton trade is acquainted with the industry's problems, to judge by the address of Sir Joseph Kay at the annual meeting of the Cotton Buyers' Association. He hoped that satisfactory arrangements would be evolved in connection with the delivery of cotton on call. New by-laws to be framed by the E.I.C.A. would meet the wishes of the buyers, and if sufficient time were given for weighment, the new method might go down well with the mills. The proposed alteration of rules relating to double month trading was approved by Sir Joseph, though he suggested that the December Oomra contract should be converted into a January contract. Sir Joseph reviewed conditions in the trade and referred to the widest parity with American for a decade and added that the basis for Indian cotton had registered levels not seen for many years. The speaker attributed it to the large demand from mills on account of orders that the Government had placed for cloth of a certain specification. Sir Joseph mentioned the carry-over of short staple cotton and the surplus from this crop is no small figure. He seems to suggest that there should be a further effort to even up supplies of short staple as compared with staple cotton in India. While there has been some progress in the past, the future calls for a further effort to increase Indian staple cotton and reduce short staple because even in peace time, it has been acknowledged that the supply of staple cotton of $\frac{7}{8}$" was inadequate and the present situation helped to emphasise this all the more.

The Millowners Association has not been long in adding its voice to the criticisms of the higher duty on rayon yarn. The Association objects to the increased duty on yarn because the duty on fabrics is left unchanged. In a telegram sent last week, the Association has stated that imports of rayon piecegoods are not limited by quotas as cotton goods were, and expressed a fear that cheap imports of rayon goods will increase and the Indian artificial silk weaving industry will be placed in a very difficult position. The Association has made a request that the duties on artificial silk goods should be enhanced and also that rebate equal to the import duty paid on yarn should be given on exports of artificial silk goods and mixtures shipped. The Association has drawn attention to the fact that the handloom industry uses the bulk of the artificial silk yarn imported from abroad and will be adversely affected by the increased duty. Similar views were expressed by Seth Nandas Haridas, President of the Ahmedabad Millowners Association deprecating the action of the Government in raising the duty on rayon yarn. He said that foreign artificial silk goods would have an advantage over locally made rayon goods mixtures.

The Indian Chamber is never tired of insisting that political solutions are needed for certain economic grievances. In a recent wire addressed to the Government, reference is made to the fact that defence is not under the control of a responsilbe minister and that the Legislature without power to shape policy has reason to feel dissatisfied. The Chamber objects to the view that Britain is contributing in fair measure to the new defence expenditure entailed by war. Regret is expressed with reference to the slow progress of Indianisation in the officer ranks. The Chamber rebuts the Finance Member's view that taxable capacity has improved during the war period and that new taxation will not cause hardship. Like Sir Homi Mody, the Chamber apprehends that increased taxation will retard or postpone the development of new industries. Fears that the middle class will suffer through a lowered standard of living are also expressed and the Chamber has also pleaded for a careful scrutiny of the position created by the doubling of the excise on matches.

Reference to planning of output and production methods featured largely in the address of Mr. Malcolm Grange at the meeting of the Bombay Engineering Congress. Industrial production could be stimulated only by taking elaborate thought and control systems were essential for modern establishments. Control figures are invariably associated with the ambitious Russian schemes, but Mr. Gange showed that output plan for a specified period was essential for any regulated programme of work. Manufacturing methods had to be controlled and coordination in all phases was never more important. He stressed the need for planning methods in all processes and phases with a view to ensuring delivery on schedule. He explained the system of progress control and cost control employed by uptodate concerns. He made a strong plea for instituting in every organisation a system of standard costing which would help the management more than the old methods.

The census figures shown by the revised totals for Bombay prove that Bombay's population tops the one and a half million mark. The total proves that in the intercensal period, the City's numbers have risen by more than 25 per cent. A rise of more than 300,000 in ten years despite the depression of 1932-37 takes some beating. Explanations are forthcoming readily from several quarters. Some talk of the absence of epidemics, and others say that the last census was in a depression while the present one is in the middle of a boom. The rush of workers from the villages into the City may explain the strong rise. Much of the increase is due to fresh immigration, not merely of those who came in during prosperity for safe jobs, but of many who want to try their luck in a big city by looking for employment. Moreover, the last census was boycotted by many Congressmen for certain reasons. While some feared the census, others had an unreasoning prejudice. Now the double count instead of the one night numbering has reduced avoidance to a minimum. The natural increase seems amazing but if the census has attested the slow progress of knowledge concerning family limitation, it certainly affords a new reason for popularising birth control methods. India's millions represent a danger to herself, not to the world, according to many, appalled by the poverty and backwardness of the country.

Jute and Jute Manufactures

(From Our Jute Correspondent)

Calcutta, Mar. 18.

CONTRARY to some expectations the Mills Committee decided last week that mills should not close down for a week during April as they have been doing in most recent months. Coming on top of the announcement of the substantial increase in hessian stocks at the end of February, this caused some surprise but the Committee were presumably influenced by the fact that the increase in stocks was caused, not by any falling off in trade demand, but entirely by scarcity of freight. Also some substantial Government Orders to the extent of 80 lakhs of Hessian and 3½ crores of Sackings had been received and further orders for Sandbags are expected. That the Mills Committee were fully justified in their action is proved by the firm and advancing tendency of the Fabrics market since the announcement, and the fact that demand for near shipment goods continues and shows no sign of being satisfied.

The full month worked in February naturally resulted in a larger production which is reported as 84,000 tons, the highest figure touched since August of last year. The production of hessians was 1442 lakhs yards and of Sackings 958 lakhs yards. March, with one week closed will probably bring back the production figure to the region of 70,000 tons again, which will again rise with the full working month in April.

At the Board of Control meeting last Friday both the method of fixing of the Spot rate and the alleged *ultra vires* resolution came under discussion, and as a temporary measure, there being no appreciable change in the market situation since the previous fortnightly meeting, the Board took the line of least resistance and fixed the Clearing rate at Rs. 85-8 as before. Meantime, to remove the objection to the much canvassed Resolution, it is proposed to incorporate its terms into a new Bye-law, which will also provide that, if it is not possible to quote an actual market value for the Spot Rate, the Board shall take into account the packing cost of a L. J. A. First Group mark to arrive at a Spot Rate. This, if adopted, will certainly get over the ludicrous position of the Board having to infringe its own Bye-laws in order to placate Government.

Interest is beginning to be focussed on the success or otherwise of the Government Jute Regulation scheme. In the growing districts the land is practically all prepared for the sowings, which will commence with the next showers of rain. Unfortunately the question is being treated much more as a political than as an economic one, and while the administration is using every effort to impress on the cultivators the necessity for restriction, there is very considerable counter-propaganda by the political opposition against the scheme. What may be of some help to the Government is the relatively high price of rice, which may encourage the sowing of paddy on much of the lowland which normally is sown in jute.

The latest Bulletin of the Indian Central Jute Committee contains a number of reminders that jute and jute fabrics are subject to considerable competition due to war conditions. Owing to the difficulty in marketing inferior qualities of Argentine cotton, steps are being taken to examine the possibilities of using cotton instead of jute bags as containers for agricultural products. 3 per cent. of the 1940 Maine (U.S.A.) potato crop which formerly was entirely bagged in burlap, was bagged in paper. The Government of French Indo-China is granting a subsidy to planters to encourage the growth of Sisal fibre. The Government of New Zealand is taking control of the local manufacture of Wool-packs from locally grown Flax and intends to increase production from 300,000 packs to 800,000 packs annually. Production of bags from Rosella fibre in Java is increasing, encouraged by large military orders placed by the local Government, and some of the output is actually being exported to India and the U.S.A. Coals to Newcastle! Experiments in Soviet Russia have proved that jute can be successfully grown in some provinces on an industrial scale and it is reported that plants yield from 13 to 25 per cent. of fibre against a yield of about 6 per cent. of the green weight in India. The Brazilian Government has given instructions for the encouragement of the use of locally grown cotton as a packing material for raw cotton, cereals and other products for which burlap is usually employed. Individually the effects of all these efforts at self-sufficiency may not be great, but in the aggregate they are bound to have some repercussions on India's trade in Jute manufactures.

On the other side of the picture there is the report that the scheme for the establishment of Jute mills in Egypt is being kept in abeyance, and a forecast of a probable 17 per cent. increase in production of Floor-coverings, for which a jute fabric backing is employed, emanates from the U.S.A.

Fresh business in the Export Jute market has been negligible. Some inter-baler business was reported in March Dundee Daisee 2/3 at Rs. 33 and in Lightnings for Spain at Rs. 25 and Rs. 25-8, also Mixing Cuttings for shipment at Rs. 13-4. Mills have taken up a moderate quantity of pucca bales Dundee Firsts at Rs. 75, Dundee Lightnings at Rs. 65 and Rs. 68, Special Mill Firsts at Rs. 41, Mill Lightnings at Rs. 36 to Rs. 38 and Dundee Daisee at Rs. 35, also Cuttings at Rs. 12-8 N. C. and Rs. 12 Mixings.

After hovering between Rs. 34 and Rs. 34-8 the Futures market advanced, mainly in sympathy with the firm fabrics market, to Rs. 36-6 which is an unofficial price as the market has been officially closed the last two days. There has been a little more activity in Loose jute though the quantity of business reported during the quota period ending 15th March indicates a considerable shortage from the 10 lakhs of bales aimed at. Indian District Tossa Bottoms were taken at Rs. 6, Supervised White Bottoms at Rs. 6-8 Jat and Rs. 6 District, 30/70 assortment Supervised at Rs. 8-4 and Rs. 6-8 and Supervised Tossa Bottoms at Rs. 6-8 District. European Iow assortment sold at Rs. 8-8 and Rs. 6-12, White X-Bottoms at Rs. 3-8 and Tossa X-Bot at Rs. 4-12.

Fabrics market has been active and prices all round have been substantially marked up as a result of steady shipment demand for all positions up to September supported by considerable speculative operations. The decision to work throughout April had no dampening effect and if it were not for the acute freight shortage, there might be justification for increasing working hours to prevent an undue rise in prices. 9 porters have advanced from Rs. 14-8 to Rs. 15-4 near, and sales have been reported up to Rs. 15 March, Rs. 14-10 May/June, Rs. 14 July/September and Rs. 13-4 October/December. 11 porters moved from Rs. 18-8 to Rs. 20-8 near, Rs. 19-12 April, Rs. 18-8 May/June, Rs. 17-8 July/September and Rs. 16-6 October/December with sellers now asking higher rates. In Heavy Goods sales recorded include "B" Twills at Rs. 33-12 near, Rs. 33-8 May/June and Rs. 32-8 July/September. Cornsacks at Rs. 37-8 near, Rs. 35 May/June and Rs. 34 August/September. Liverpools at Rs. 40-4 ready and Rs. 36-8 October/December. Heavy Cees at Rs. 32 July/September and October/December. Cubans at Rs. 41 May/September.

(*Continued from page 492*)

duty on imports of artificial silk piecegoods along with the proposed increase in the duty on artificial silk yarns. Mr. Ramsay Scott who referred to this question in the course of his speech on Tuesday said that the industry which had grown up by weaving imported silk yarns—both a mill industry and a cottage industry—would suffer if this was not done. "I feel that these industries should be looked after and not penalised, especially as there is no raw material in the country" said Mr. Ramsay Scott. Another businessman, Mr. Shantidas Askuran, replying in the Council of State last week to the objection raised by the Finance Member, showed that this industry did not compete with the cotton textile industry as the price of cotton yarn was now only between four to seven annas a pound and that of artificial silk yarn was between Rs. 1-4-0 and Rs. 2 a pound including the duty. Further he warned the Finance Member: "There is also the possibility, I should say, the certainty, of this industry being transferred to the Indian States, especially the maritime States." In view of the strong representations made by commercial bodies, it is believed that the Finance Member will reconsider the question and see what can be done.

JUTE

Calcutta, March 12.

The recent orders for war materials and the strong rise in the jute manufactures market have been responsible for a firmer feeling in the raw jute futures market during the past week. Bear covering and speculative buying have resulted in the quotations closing at the highest levels for the week. Business reported during the week with mills has also been satisfactory. With the difficulty of buyers in getting the right assortment a better feeling is noticeable in the several sections towards the close. The decision to work mills throughout the whole of next month should be considered rather encouraging for the jute market.

In the loose jute section European Middles and Bottoms were done at Rs. 8-8 and Rs. 6-12 per maund 40-60 assortment. Mills are reported to have bought 'supervised' District Bottom alone at Rs. 6 per maund.

There has been greater activity in the pucca bales section. Shippers have taken some interest in the market. Outport Lightnings 2/3 have been done at Rs. 25-8 per bale for shipment to Spain. Dundee Lightnings were reported at Rs. 67 per bale. Mills are reported to have bought Marwari Cuttings N. C. and M. C. at Rs. 12-8 and Rs. 12 per bale respectively.

In the futures market a definitely firmer tendency has been noticeable during the last three days and closing quotations, as pointed out above, are at the highest levels for the week. From Rs. 34-5 at the end of last week there has been a rise to Rs. 36 per bale.

JUTE MANUFACTURES

Calcutta, March 12.

THE announcement of a new order for war material within a few days after the first order for 4.5 million yards hessians and 25 million yards sackings has had a distinctly encouraging effect on the jute manufactures market. The latest order is for one crore yards sacking cloth and twelve lakhs yards seven and a half ounces hessian cloth. It is also reported that jute mills have received an assurance from the Government that an order for 3.75 crores sandbags will shortly be placed.

At first, the effect of the announcement of the new order on prices was negligible as the Committee of the Indian Jute Mills Association decided at the same time that mills should work 45 hours per week throughout April and not close down for one week as in this month. During the last three days, however, a definitely better tendency has been noticeable. The emergence of American buying and speculative buying by the bazar has resulted in a substantial improvement in prices and markets finished strong towards the close. 9 porters are now quoting Rs. 14-12 against Rs. 14 at the end of last week, April at Rs. 14-10 against Rs. 13-14, May/June at Rs. 14-9, against Rs. 13-9, and July/September at Rs. 13-13 against Rs. 13-3. 11 porters ready are Rs. 19-9 against Rs. 18, April Rs. 19 against Rs. 18, May/June Rs. 18-3 against Rs. 17-4 and July/September Rs. 17-5 against Rs. 16-5. It will be noticed that the rise in the quotation for 9 porters May/June is very pronounced, fully one point higher. 11 porters ready have appreciated by one and a half points. Mills have not been free sellers for the nearer positions. Business for special lines is difficult to be placed for positions before June.

The heavy goods section also has improved, B. Twills for March shipment being Rs. 30-8, Liverpool Twills for the same position Rs. 40-4 and Cornsacks Rs. 37-12.

Memo of total reported production of manufactured goods by the mills in the membership of the Association and also by Gagalbhai Mills excluding Maheswari Devi, for the month of October, 1940.

Description.	Quantity.
1. Twist and Yarn—	
(a) for sale ...	... 1,979 tons
(b) all others, including that used in sewing bags ...	... 1,060 tons
2. Canvas	949 tons 19,63,279 yards
3. Gunny Bags (Tonnages exclude sewing twists)	6,663 tons
(a) Hessian ...	2,95,01,715 yards 2,65,12,967 number
(b) Sacking ...	39,837 tons 8,91,61,313 yards 3,68,27,161 number
4. Gunny Cloth—	
(a) Hessian ...	31,158 tons 11,47,51,070 yards
(b) Sacking ...	2,606 tons 62,12,735 yards
5. Other manufactures, including ropes ...	294 tons
6. Total production (above figures combined)—	
(i) All kinds ...	84,049 tons
(ii) Hessian (both as bags and cloth) ...	14,42,52,785 yards
(iii) Sacking (both as bags and cloth) ..	9,53,74,048 yards
(iv) Canvas (both as bags and cloth) ...	19,63,279 yards

COTTON

Calcutta, March 12.

The Bombay raw cotton market has been very firm during the past week. The easing of the tension in the Far Eastern situation with the signing of the Thai-Indo-China armistice, the easier freight position and good buying by mills, have been primarily responsible for the substantial improvement in values. It is believed that as the season advances, there will be a definite shortage of staple varieties. New York advices also have been favourable. Broach April/May are quoting Rs. 197-8, July/August Rs. 200/8, Oomra March Rs. 158-12, May Rs. 160, July Rs. 162-12 and Bengal March Rs. 125-14 and May Rs. 125-12.

In New York, good trade buying and reports regarding a higher loan have been primarily responsible for the sharp improvement in values. March has closed at 10.78 cents against 10.43 cents last week and May at 10.77 cents against 10.30 cents. The discount for the forward positions has narrowed. In Liverpool also there has been a good rise and March and May closed at 8.47d. and 8.48d. against 8.31d. and 8.32d. respectively. Owing to the rationing of cotton in the United Kingdom and the difficulty in getting further supplies it is feared that the Liverpool market will have to be closed.

PIECEGOODS

Calcutta, March 12.

The local piecegoods market has continued firm. The absence of selling pressure in the Japanese goods section has resulted in a sharp rise in bazar values. Business with indigenous mills has been rather restricted owing to their inability to guarantee early delivery. Replacement costs are very much higher and therer is disparity between sellers and buyers ideas. There is some enquiry from overseas countries. In the Lancashire goods section, there has been good enquiry for white mills but not much business has been put through. Local mills have received some orders for coarser qualities.

The yarn market has been more active with good business in coarse and medium counts.

GOLD

Calcutta, March 12.

The Bombay gold market has not been quite active. Earlier in the week an easier tendency was noticeable but during the last two days a firmer tendency has been in evidence and the earlier losses have been more than regained. Gold ready are now quoting Rs. 43-12, First settlement Rs. 42-12, and Second Settlement Rs. 43-13. The London price for gold has remained unchanged at 168s.

SILVER

Calcutta, March 12.

The Bombay silver market was absolutely uninteresting in the first half of the week with very little business passing. During the last two days, in sympathy with the strength of the raw cotton and gold markets, quotations are higher. Indian Mint Silver ready are now quoting Rs. 63-5. First Settlement Rs. 63-2 and Second Settlement Rs. 63-2.

The London silver market has been listless with Spot quoting 23 3/8d., and Forward 25 5/16d.

WHEAT

Calcutta, March 12.

The Karachi wheat market has been definitely firmer. The publication of the All-India Second Forecast for 1940/41 has had a rather encouraging effect. Also mill buying and the strength of the Bombay raw cotton market have been favourable factors. Choice White Ready are now quoting Rs. 30-10, March Rs. 29-15-6 and July Rs. 26-10-9. The quotations at the time of last writing were Rs. 29, Rs. 28-7-6 and Rs. 26-5-6 respectively.

In the local market a slightly better tendency has been noticeable. Mills have not curtailed working hours but local demand for flour and flour products is very poor. Cawnpore ready is now quoting Rs. 3-15, Punjab ready Rs. 4-5-0 and May Rs. 3-12-9.

The All-India Second Forecast for 1940-41 estimates the area under the crop at 33,368,000 acres against the revised figure of 33,338,000 acres or an increase of 0.1 per cent.

MADRAS GROUNDNUTS

The local market was very active during the early half of the week, but eased slightly during the latter part although the close was a shade steady. Purchases by the Ministry of Food have been fairly good, and due to this prices advanced during the first half of the week. The Ministry of Food is reported to have bought about 6,000 tons for shipment from Bombay at £10 with the contribution towards the Indian fund at 5 sh. per ton. They are also reported to have ordered for 10,000 tons for shipment from Madras with the contribution of 30sh. per ton, and the necessary freight space is said to have been transferred from Bombay to Madras. It is learnt that these purchases have been completed. Shippers are reported to have purchased upcountry for forward delivery at about the Madras level of prices. Shippers' buying limits opened on Tuesday last around Rs. 20-4 to Rs. 20-6 for Machined (Per candy of 531 lbs. ex-coast godowns), and advanced to Rs. 20-8 and Rs. 21 on Wednesday and to Rs. 21-4 on Thursday. Subsequently a slightly easier tone developed and prices eased to Rs. 20-10 and Rs. 21 on Friday. The close was, however, a shade steadier around Rs. 21 to Rs. 21-2. Local buyers' limits opened around Rs. 19-8 to Rs. 20 for Machined (Per candy of 531 lbs. ex-Madras harbour godowns), and remained more or less steady during the rest of the week. Rangoon and Calcutta buyers have not been as active as in the previous weeks. Groundnut oil ruled remarkably steady throughout the week around Rs. 45 to Rs. 45-8 in the case of "Chekku" oil and Rs. 48-8 to Rs. 49 for "Produttur" quality, for ready lots loose, per candy of 500 loose, ex-sellers' Madras godowns.

MADRAS HIDES AND SKINS

It now transpires that shipping opportunity for Tanned Hides and Skins will not be available at Madras before end March early April. It is also rumoured that only about 1,000 tons will be allowed to be shipped in the place of 1,740 tons allowed by the authorities. An emergent meeting of the local Hides and Skins Association was called on Friday last when the serious plight to which the Hides trade has been reduced was discussed and telegrams detailing the difficulties of the trade and urging speedy action to save the industry were despatched to the Commerce Member with the Government of India, the Department of Supply, New Delhi, the Controller of Shipping Calcutta and the Leather Controller London. It was stated in the course of this communication that shipping space allotted for Tanned Hides and Skins from Madras has been very inadequate since November last. Absolutely no space was available in February and early shipments even in March seem uncertain. This extreme scarcity of shipping space has led to heavy accumulation of stocks and freezing of capital, and a continuance of shipping scarcity will result in a financial debacle and utter ruin to the tanners and dealers. This is all the more regrettable in view of the clamour from London for prompt delivery and good demand for Kips in Britain. In conclusion, the Association urged the authorities to secure sufficient shipping space to clear the present heavy stocks as quickly as possible and to ensure enough space in future to meet the demand from the British industry. In the local markets utter confusion reigns. There are some weak holders who are anxious to sell a portion of their holdings to meet obligations, and it is reported that some speculators are taking advantage of this situation to hammer down prices. Indeed, an European buyer is reported to have taken into his godowns about 300 hides on Saturday. Developments are awaited as the present week progresses. This is all the more surprising in view of the news from London that the schedule prices for Tanned Kips will continue in force for another three months unchanged. There was a sale of Tanned Goat and Sheep skins in London during the week when all the quantities put up (30,000 Goat and 140,000 Sheep) were cleared at last sales' prices.

Stock Markets to-day and to-morrow

SHARP RISE IN BRITISH INDIA CORPORATION EARNINGS

GENERAL sentiment on the Bombay Stock Exchange is definitely bullish. *Tata* deferreds and ordinaries have been gaining strength day by day, the highest level for nearly a year being recorded by Tata deferreds on Friday at Rs. 2,045. The extraordinary increase in the demand for Indian Mill products and the strength of the raw cotton market have been responsible for a good rise in the prices of mill shares also.

Above all, the passing of the Lease and Lend Bill has had a definitely bullish effect on both giltedged and equities. 3½ per cent Rupee Paper is nearly a point higher at Rs. 95-12.

* * *

The Calcutta Stock Echange, however, has not been quite active. Perhaps, the long holidays on account of the *Doljatra* festival have been responsible for the thinness of the volume of business passing.

* * *

As I expected, the earnings of the *British India Corporation, Limited* for the year ended 31st December, 1940 show a spectacular increase over those for the year ended December, 1939. As the directors point out, "the results for the year again show an improvement which is due to the greatly increased turnover consequent on the orders received for woollen and leather goods for the Defence services."

The directors have deemed it advisable to recommend to place to reserve a sum which, having in view of the Finance Member's recent taxation proposals, they estimate, will suffice to meet Income-tax, Super-tax and Excess Profits Taxation demands in respect of the Corporation's trading operations in the year 1940. Further, in view of the fact that production is being maintained on an intensified scale for war purposes, the Board consider that it is prudent, at this stage, to create a Rehabilitation Reserve so that sums thus allocated will be available, when required, against the costs involved, after the present Emergency has passed, in recovering the Corporation's normal civil trade which meantime has, in most directions, had to be entirely suspended. The amount which it is possible to be allocated for this purpose is less than the sum which the directors woud have desired to set aside, but increased taxation and the maintenance of the usual dividends take up the balance of the amount available for disposal.

Thus, out of the net profit of Rs. 69,07,079, the sum of Rs. 7,00,000 against Rs. 3,50,000 has been charged to depreciation and Rs. 42,00,000 against Rs. 6,50,000 is placed to Taxation Reserve. Another sum of Rs. 3,00,000 has been transferred to a newly created Rehabilitation Reserve. The dividend on the ordinary shares is to be maintained at four annas per share.

The directors have been rather overgenerous in their provision to Taxation Reserve. For, even on the basis of the latest increase in the rate of the Excess Profits Tax and surcharge on income-tax and super-tax the provision seems to be more than adequate. Again, it is said that "the Excess Profits Tax imposed by section 4 of the Excess Profits Tax Act, 1940, shall in respect of any chargeable accounting period beginning after the 31st day of March, 1941, be an amount equal to sixty-six and two-thirds percent of the amount by which the profits of the business during that chargeable accounting period exceed the standard profits." It will, therefore be clear from this that the profits of the British India Corporation, Limited, as belonging to a chargeable accounting period ending before 31st March, 1941, is not liable to the enhanced rate. The increased provision on this account may well be of the order of Rs. 7 lakhs. The directors could have set aside some additional amount to Rehabilitation Reserve and increased the dividend to shareholders.

Anyway, the accounts should have an encouraging effect on the value for the shares.

* * *

In view of the difficult conditions in the jute industry in the latter half of 1940 the results of the companies under the management of Messrs. McLeod & Company, Limited for the six months ended 31st December, 1940, should be considered rather satisfactory. But, in view of the good performance of the three companies in the group, the sharp decline in earnings of the Presidency Jute Mills Company, Limited is surprising.

Two companies, the Empire Jute Company, Limited and the Kelvin Jute Company Limited have actually been able to show an increase in earnings. Hitherto, only a few companies have been able to maintain their dividends at the previous levels. The two companies mentioned above have been able to do likewise. Though normally, it would have not been possible to pay off any portion of the arrears of dividends on the preference shares, the net profit available being even insufficient to reduce the debit balance brought in, the directors of the *Soorah Jute Mills, Limited* have thought it fit to pay the dividend on the preference shares for the half-year ended June, 1937 by a transfer from the Reserve Account. The ordinary shares of the Presidency Jute Mills, Company, Limited return to the dividend list with a payment of 1¼ per cent since December, 1936.

The best showing in the group is made by the accounts of the *Kelvin Jute Company, Limited*. The higher profit of Rs. 3,80,600 for the half-year ended December , 1940 against Rs. 3,10,964 for the previous half-year is mainly due to the lower level of manufacturing expenses, total sales being appreciably lower at Rs. 28.82 lakhs against Rs. 40.52 lakhs. The sum of Rs. 1,50,000 (Rs. 1,00,000) is reserved for Taxation, while Rs. 75,000 (Rs. 50,000) is written off depreciation. The ordinary dividend has been maintained at Rs. 15 per share. The amount carried forward is higher at Rs. 1,49,815 against Rs. 1,34,215 brought in.

* * *

The Empire Jute Company, Limited has likewise been able to report an increase in earnings for the same accounting period though the improvement is not equally pronounced. The net profit, before providing for taxation, is Rs. 2,16,268 (Rs. 1,90,264). The provision for taxation is Rs. 75,000 (Rs. 50,000) and that for depreciation Rs. 50,000 (same). The dividend has been maintained at ten annas per share.

* * *

One would have expected that, after the experience of the Titaghur Paper Mills Company, Limited, the *Bengal Paper Mills Company, Limited*, would be

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, March 14.

MARKETS have remained closed for the major portion of the period under review on account of the *Doljatra* festival. Business, as a consequence, has been of very small proportions. However, with the continued firmness of the Bombay market a steadier tendency has been noticeable locally and though business passing has not shown any signs of expansion quotations have been marked higher. It is generally expected that the re-opening after the long holidays will be rather active in the several sections.

The passing of the Lease and Lend Bill has had a rather encouraging effect on the giltedged securities section. In spite of the slight increase in the discount on Treasury Bills, 3½ per cent Paper is sharply higher at Rs. 95-10. Terminable loans also are better with 3½ per cent 1947/50 at Rs. 102-4, 4 per cent 1960/70 at Rs. 108-4 and 4½ per cent 1955/60 at Rs. 113-4. 3 per cent 1963/65 were Rs. 94-10, 5 per cent 1945/55 Rs. 111-14 and 2½ per cent 1948/52 Rs. 97. Provincial loans also are higher with 3 per cent 1952 issues at Rs. 96-10.

Bank shares have been easier with *Imperial Bank* fully paids at Rs. 1,535 and contributories at Rs. 386. *Reserve Bank* were Rs. 105 and *Central Bank* Rs. 42-15.

Only a small amount of business has been reported in public bodies' debentures owing to the difficulty in finding sellers. Preference shares have been steady with *Bengal Telephone* at Rs. 11-14, *Bowreah* 'A' preferences at Rs. 215-8 cum-dividend, *Steel Corporation* at Rs. 116, *Dunlop Rubber* Second preferences at Rs. 116 and *Indian Standard Wagon* at Rs. 159. There is not much change in the quotations for jute mills preference shares.

Cotton shares have been fully steady. *Cawnpore Textiles* have been marked higher at Rs. 6-6. *Elgin Mills* were Rs. 18-8, *Kesoram* Rs. 6-4 and *New Victoria* Re. 1-14.

The coal section has been rather weak with quotations marked lower. *Amalgamated* were Rs. 26-4, *Bengal* Rs. 35, *Burrakur* Rs. 13-8, *New Beerbhoom* Rs. 15-8, *Raneegunge* Rs. 24-12, *Standard* Rs. 20 and *West Jamuria* Rs. 29-12.

A firmer tendency has been noticeable in this section but the prices of shares of companies having a relatively low level of profit for the standard period have been marked slightly lower. *Howrah* are firm, being higher at Rs. 50-2. *Bally* were Rs. 214, *Hukumchand* Rs. 8-11, *Kamarhatty* Rs. 447 ex-dividend and *Naskarpara* Rs. 18.

In the Engineering section, there has not been much activity. Indian Irons and Steel Corporations, however, are inclined to be firmer towards the close in sympathy with better advices from the Bombay market. *Indian Iron* were Rs. 31-2 and *Steel Corporation* Rs. 19-2. *Burn & Co.* were sticky at Rs. 374, *Indian Galvanizing* at Rs. 29-8 while *Indian Standard Wagon* were lower at Rs. 60. *Saran Engineering* were Rs. 5-6 and *Braithwaite & Co.* Rs. 9-8.

Electrical shares have been better with *Agra* at Rs. 132-4, *Benares* at Rs. 14-7 and *Bengal Telephone* at Rs. 18-12.

Sugar shares have been uninteresting with *Cawnpore* at Rs. 18-4, *Carew & Co.* at Rs. 18-4 and *Raza* at Rs. 15-12.

There has also been not much interest in the Tea section. *Hasimara* were Rs. 42, *Bishnauth* Rs. 25, and *Rydak* Rs. 58-8.

In the miscellaneous section there are no important features of interest. *Burma Corporation* and *Indian Copper Corporation* were unchanged at Rs. 4-15 ex-dividend and Rs. 2-1 respectively. *B. I. Corporation* were Rs. 4-10 cum-dividend, *Dunlop Rubber* Rs. 38-10, *Indian Wood Products* Rs. 27-6, *Rohtas Industries* Rs. 20-12 and *Tide Water Oil* Rs. 15. *The Indian Wood Products Company, Limited, has declared a dividend of 17½ per cent for the year ended September,* 1940. Among Paper shares, *Titaghur Paper* 'A' and 'B' ordinary shares have been rather uninteresting at Rs. 17. *Mysore Paper* were Rs. 14-8 and *Star Paper* Rs. 10. Among others, *Midnapore Zemindary* were Rs. 70-8 and *Bengal Assam Steamship* Rs. 250.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, March 12.

Money.—Easy conditions continued to prevail in the money market, and call money was quoted at ¼ per cent.

Securities.—Government securities were very steady and prices were inclined to move to slightly higher levels towards the close of the week under review on good investment demand. 3½ per cent. Paper which was done at Rs. 94-13 in the previous week, improved during the week to close at Rs. 95-10. 1948/52 were done slightly higher at Rs. 96-14 ; 1951/54 at Rs. 99-2 ; 1947/50 at Rs. 102-4; 1963/65 at Rs. 94-14; 1960/70 at Rs. 108-8 ; 1955/60 at Rs. 113-4 ; 1945/55 at Rs. 112 and 3 per cent 1946 *Defence Loan* at Rs. 101.

Shares.—No business was done in shares on the forward list on Monday, being the pay-day for the March settlement. Despite the news of the German occupation of Bulgaria and German rush towards Greece, the local market has been steady and there was very good activity in Steel and Textile shares. The passing of the Lease and Lend Bill in the U. S. Senate encouraged operators and prices developed a rising tendency on general buying from Tuesday onward. The rise in prices continued to be noticeable on Wednesday with further active and impressive buying. The market remained closed on Thursday owing to the *Holi* festival.

Textiles.—The passage of the Lease and Lend Bill by the U. S. Senate and the growing belief among trade circles in a higher loan caused considerable speculative buying in the American cotton markets. Following the sharp upturn in America, mill shares in the local market met with general buying and almost all the scrips recorded substantial gains. Operators believe that the Industry is assured of a bright future. Purchasers predominated during the latter part of the week. *Bombay Dyeing* gained about 15 points and *Century* 12 points to close at Rs. 1,117-8 ex-dividend Rs. 397-8 respectively. *Central India* were slightly higher at Rs. 319 ; *Colaba* at Rs. 179 ; *Gokak* at Rs. 227 ; *Kohinoor* at Rs. 429 ; *New Great* at Rs. 448 ; *Swadeshi* at Rs. 298-8 ; *Nagpur* at Rs. 78-8 and *Sholapoor* at Rs. 2,790.

Hydro-Electrics.—*Tata Power* improved by about 15 points to close at Rs. 1,615, while *Andhra Valley* were done at Rs. 1,842-8. *Tata Hydro* were little better at Rs. 186.

Steels.—There was active buying of Steel shares. *Tata* ordinaries and deferreds, after opening at Rs. 391-8 and Rs. 2,021-4, gradually advanced on good support and closed at Rs. 393 and Rs. 2,030 respectively, showing a rise of about 8 and 54 points respectively over the previous week.

Banks.—Bank shares were steady with *Bank of Baroda* at Rs. 111 ; *Bank of India* at Rs. 143-12 ; *Central Bank* at Rs. 42-5 ; *Imperial Bank* fully paids at Rs. 1,535 ; contributories at Rs. 385 ; *Reserve Bank* at Rs. 105 and *Union Bank* at Rs. 6-11.

Miscellaneous.—*Associated Cement* improved further during the week from Rs. 145-4 to Rs. 146-8. *Bombay Burma* Trading showed a rise of about Rs. 30 over the previous week to close at Rs. 563-12. *Belapur Sugar* were slightly higher at Rs. 216 and *Shivrajpur Syndicate* at Rs. 37-4, *Scindia Steam* were a shade easier at Rs. 22. *Wimco* were higher at Rs. 202-8, while *Premier Construction* were neglected at Rs. 96. *Bombay Telephone* changed hands at Rs. 87. The Share Transfer Books of the Company will be closed from the 22nd March to the 26th March, 1941 in connection with the issue to the shareholders of an offer by the newly constituted

Government Telephones Board, Limited for the purchase of all the shares of the Company at Rs. 89-15 per share. *Indian Iron* closed at Rs. 31-3 and *Steel Corporation* at Rs. 19-4.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, March 13.

Steady conditions prevailed in the local market during the period under review. Business in cotton mill shares was restricted in the absence of scrip. Rubbers were a shade easier, while Teas remained unchanged.

Securities.—Slightly better conditions were witnessed in this section and prices closed slightly higher than in the previous week owing to the absence of sellers. 3½ per cent Paper closed at Rs. 95-8 as against Rs. 94-12 in the previous week. 3 per cent 1951/54 changed hands at Rs. 99 ; 3½ per cent 1947/50 at Rs. 102-6 and 5 per cent 1945-55 at Rs. 112-2. Among State Loans, 3 per cent 1956/61 *Mysore Loan* had buyers at Rs. 103-15. Among Provincial Loans, 3 per cent 1959 *Madras Loan* met with business at Rs. 95-6.

Mills.—Prices in this section remained unchanged in the absence of sellers. *Buckingham and Carnatic* were steady at Rs. 246 and *Madura* at Rs. 39-12. *Bangalore Woollen* came in for business at Rs 213 ; *Cambodia* at Rs. 9-2 ; *Radhakrishna* at Rs. 126 c.d. and *Mysore Spun Silk* at Rs. 8-8.

Utilities.—No business was done in this section and prices remained unchanged.

Plantations.—A certain amount of selling pressure was noticeable in rubber shares. *Cochin Malabar* were done at Rs. 6-12 ; *Thirumbadi* at Rs. 1-15 ; *Kalpetta* at Rs. 18-8 ; *Nellithantm* at Rs. 8-8 and *Udayagiri* at Rs. 6-2. Among Tea shares, *Kalasa* were transacted at Rs. 6-12. *Peermade* were on offer at Rs. 27-8 and *Periakaramalai* at Rs. 17-6. *Chembra Peak* met with fair support at Rs. 3-7, while *Fringford* changed hands at Rs. 7-8.

Sugars.—Sugar shares were steady with *Mysore Sugar* at Rs. 49-12 and *Travancore Sugars* at Rs. 13-14.

Banks.—*Bank of Mysore* were dealt in at Rs. 286 ; *Indian Overseas Bank* at Rs. 50-12 and *Reserve Bank* at Rs. 104.

Miscellaneous.—*Mysore Chemicals* continued to be a dull market at Rs. 17. *Indian Steel Rolling Mills* ordinaries had sellers at Rs. 7-12. *Hindustan Investment Trust* came in for business at Rs. 13-12. *Mysore Paper* were a little better at Rs. 14-10. *Dalmia Cement* ordinaries were crossed at Rs. 11-13 and the preferences at Rs. 111. *Amrutanjan* preferences changed hands at Rs. 97. *Spencer 'A'* preferences were done at Rs. 9-9 ; *Indian Iron* at Rs. 31-3. and *Steel Corporation* ordinaries at Rs. 19-3.

LONDON STOCK EXCHANGE

Rather steady conditions have been noticeable on the London Stock Exchange during the past week. Giltedged securities have recorded appreciable gains on good buying. Indian loans have been marked higher. 3½ per cent Indian Stock 1931 after being higher at 99 is fractionally lower at 98⅝. British Funds have been better with 2½ per cent Consols at 77¾, 3½ per cent Conversion at 103⅝, 3½ per cent War Loan at 104¼ and 3 per cent War Loan at 100⅜.

Among other sections, Tea and Rubber issues have been slightly lower. Oils have been irregular while Home Rails have been uninteresting.

NEW YORK STOCK EXCHANGE

The passing of the Lease and Lend Bill at first had a rather encouraging effect on Wall Street, prices being marked substantially higher in all the sections. The view was generally held that with greater aid under the Bill there would be no need for Britain to liquidate her holdings of dollar securities. The fear of this liquidation and the actual liquidation of such holdings during the past few months have been mainly responsible for the weaker tone of the markets. Domestic business news is very encouraging and steel mill activity is running at 98.6 per cent of capacity. The higher levels, however, have not been fully held for there has been some hesitancy with the latest developments in the Balkans. Operators are inclined to adopt a conservative attitude. *U. S. Steel* were $57¾, *General Motors* $43⅜ and *Anaconda Copper* $24¼.

By Order of the Board.
DALMIA SABHARWAL JAIN & CO.,
Managing Agents.

Dalmianagar,
7th March, 1941.

MARKET POINTERS

Foreign Trade Improves.

India's foreign trade improved substantially during January, according to the latest trade returns. Exports amounting to Rs. 19,69,97,553 were the highest for any month during the current financial year, while imports totalled Rs. 14,70,92,234, indicating a smart recovery in arrivals of foreign goods. As compared, however, with the first month of 1940, imports and exports showed a decline of Rs. 1,71,95,091 and Rs. 3,55,44,656 respectively.

The decline in imports during January as compared with the corresponding month a year ago is most noticeable under food, drinks and tobacco, the arrivals of which dropped by Rs. 1,21,46,923. The rest of the decline was shared almost equally by imports of raw materials and manufactured goods.

Under exports, shipments of articles of food, drink and tobacco from India increased in value by Rs. 1,97,03,068, of which tea alone accounted for an improvement of Rs. 1,83,56,421. On the other hand, the value of exports of raw materials and produce and articles mainly unmanufactured declined by Rs. 2,80,41,725. The fall was mainly due to the reduced shipments of raw jute and raw cotton which were in demand a year ago. Their exports in January fell by Rs. 1,82,38,611 and Rs. 64,36,642 respectively. Exports of manufactured goods also declined. Owing to the reduced demand for jute manufactures from abroad, their overseas shipments were down by Rs. 3,51,49,151. Exports of hides and skins, tanned or dressed, also fell by Rs. 53,03,545. This shrinkage was partly compensated by increased exports of cotton manufactures and gains under metals, paper chemicals, apparel and rubber manufactures.

Sugar Production.

The Director of the Imperial Sugar Technological Institute in his first memorandum on the production of sugar directly from cane in modern sugar factories in India estimates the production in 1940-41 at about 1,000,000 tons against the actual production of 1,200,000 tons in 1939-40.

The production in all provinces, except in the U. P. and Bihar where it is restricted at 720,000 tons by Government, increased and is estimated at about 300,000 tons against the actual production of 260,000 tons in the previous year. In the U. P. and Bihar, the Director estimates the production at 715,000 tons only, as some factories are not expected to crush their full quota. The number of factories that are crushing increased to 148 from 143 in 1939-40.

(*Continued from page 497*)

able to report a higher level of earnings for the half-year ended December, 1940. That has not been the case, however. In spite of an increase in the value of sales from Rs. 31.94 lakhs to Rs. 32.61 lakhs, the net profit for the half-year is slightly lower at Rs. 8,55,306 against Rs. 8,71,506 for the previous half-year. The amount set aside to depreciation is Rs. 1,88,918 against Rs. 1,70,828 previously and the provision for taxation Rs. 3,08,000 against R.s 2,84,000. Against the transfer of Rs. 1,40,000 to Reserve for Improvements and Extensions Rs. 1,00,000 is placed to a special Reserve against Raw Materials and Stores. The transfer to Reserve for Indian Workers' Pensions and Gratuities is lower at Rs. 10,000 against Rs. 82,872. The General Reserve receives Rs. 54,845. The dividend and bonus have been maintained at 12½ per cent and 4 per cent respectively. The amount carried forward is higher at 80,626 against Rs. 56,578 brought in.

(Half-yearly meeting, held 14th March, 1941).

Audited accounts for the six months ended 31st December, 1940 :—

The result of the working for the six months ended 31st December, 1940, after allowing Rs. 3,50,631 for depreciation, is a profit of Rs. 3,64,479-4-9. Adding the balance brought forward of Rs. 20,782-8 there is a total sum of Rs. 3,85,261-12-9. The directors have made the following payments :—

Dividend at Rs. 3 Per Preference Share, free of income-tax	18,000	0	0

The directors propose to deal with the balance as follows :—

Dividend at Rs. 5 per Ordinary Share, free of income-tax	1,01,250	0	0
To General Reserve	1,60,000	0	0
To Dividend Equalisation Fund	40,000	0	0
To Officers' Retiring Fund	15,000	0	0
To Work-people's Housing Fund	15,000	0	0
To Fire Accident and Insurance Fund	6,000	0	0
To carry forward	30,011	12	9

Throughout the year Government contracts have largely taken the place of the Company's normal business and everything has been done to increase the production of materials required by the Defence forces. To meet these demands the directors have purchased from the liquidators the plant and property formerly owned by the Kaiser-i-Hind Woollen, Cotton and Silk Mills Co., Ltd.

Managing Agents.—Messrs. Binny & Co. (Madras), Ld.

Authorised, Issued and Subscribed Capital—Rs. 26,25,000 in 20,250 Ordy. and 6,000 6 per cent. Cum. Pref., both of Rs. 100 each, fully paid up.

(Half-yearly meeting, 21st March, 1941 at 11 a.m.)

Audited accounts for the half-year ended 30th September, 1940 :—

After providing for all charges including Rs. 2,40,000 on account of Depreciation and placing Rs. 1,25,000 to Reserve for Development and Rs. 1,25,000 to Reserve for taxation, a balance of Rs. 1,65,803-10-1 including Rs. 34,644-13-3 brought forward from the previous half-year remains available and this the directors recommend be disposed of as follows :—

Dividend at the rate of 8 per cent per annum, free of income-tax	1,28,000	0	0

leaving a balance of Rs. 37,803-10-1 to be carried forward.

Costs and Revenue.—The Revenue totalled Rs. 11,80,204, an increase of Rs. 10,810 when compared with the Revenue for the half-year ended 30th September, 1939, but the working expenses have been affected by the higher prices and enhanced charges for materials, stores and wages.

Managing Agents.—Messrs. Martin & Co.

Authorised Capital—Rs. 42,00,000 in 42,000 shares of Rs. 100 each. Issued and Subscribed—Rs. 32,00,000 in 32,000 shares fully paid up.

†The debit balance written off on capital reduction.

(Annual meeting, held 14th March, 1941).

Audited accounts for the year ended 30th September, 1940 :—

The Revenue account shows a credit balance of Rs. 2,86,205-8-2 and the Profit and Loss Account, after providing for depreciation, interest, etc., and transferring Rs. 40,000 to Debenture Redemption Fund, shows a credit balance of Rs. 83,904 which the directors recommend should be disposed of as follows :—

	Rs.	A.	P.
Dividend at four annas per share, free of income-tax	73,763	0	0

leaving a balance of Rs. 10,141 to be carried forward.

In the last report it was indicated that an increase in productive capacity was in hand. The extension has since been completed and the directors have pleasure in reporting that the increased output has been fully sold at satisfactory prices.

Managing Agents.—Messrs. Bird & Co.

†After transferring Rs. 35,000 from Reserve Fund.

(Annual meeting 31st March, 1941 at 2-30 p.m.)

Audited accounts for the nine months ended 31st December, 1940 :—

The balance available at Profit and Loss Account is Rs. 52,215-1-6 including the sum of Rs. 6,753-15-0 carried forward from the last account. Full provision has been made for depreciation and all contingencies, a total of Rs. 21,722-15-2 having been provided under these headings, and the directors recommend that out of the balance available the following dividends be paid.

On the Preferred Ordinary Shares at 8 per cent per annum, free of income-tax, and on the Ordinary Shares at the rate of 6 per cent per annum, free of income-tax, leaving a balance of Rs. 30,144-1-6 out of which the directors have transferred Rs. 20,000 to General Reserve. The balance of Rs. 10,144-1-6 is carried forward.

Manager.—Mr. J. W. Ross.

Authorised Capital—Rs. 40,00,000 in 2,10,200 Prfd. Ordy. and 37,89,800 Ordy., both of Rs. 1 each. Issued and subscribed—Rs. 4,20,400 in 2,10,200 Ordy. and 2,10,200 Prefd. Ordy., both fully paid up.

‡ Arrears of Dividend on Preference Shares Rs. 16,38,000. * Depreciation Fund Included Rs. 12,77,54,965 (a) Bearer bonds of Rs. 500 each issued at par in July, 1928, repayable at par on 1st July, 1948, with option repayment of all or any of the debentures at any time at par after 30th June 1938, on 3 months' notice. The date for repayment was extended to 30th June, 1958, with option repayment in whole or in part, any time after 30th June, 1948 and the rate of interest reduced to 5 per cent. per annum.) tax free. (b) Issued at par on January, 1935, repayable at par on 31st December, 1944. (c) Shares numbered 1-6,000 have priority over any class of share regarding repayment of capital. For dividend purposes both classes of preference shares rankeq rally. (d Issued at par on 13th November, 1922, redeemable at par on 31st December, 1942. Option redemption in whole or part on any interest date. (e) After 5 per cent. on the ordinary Shares eligible for one half of the surplus profits. Ordinary Shareen ank before the deferred Sha re- in respect of repayment of Capital. After deferred Shares surplus of assets divided equally. (g) Issued in December, 1936 at 98 per cent. redeemable by operation of sinking fund of 1¾% per annum. Commencing in 1941 Option demption in whole or part on any interest date after 31st December, 1951. Latest date of redemption 31st December, 1966. (h) Issued at par on 31st December, 1936 repayable at par 31st December, 1961. Option redemption in whole or part at 2 per cent. premium on any interest date after 31st December, 1943 after six months' notice. Option to holders for conversion into fully paid ordinary Shares at 1-10s. of Convertible Stock upto and including 1943. Converted ordinary Shares rank for dividend balance of assets available. (i) Entitled to participate in dividends only upto 10 per cent. per annum after the preference shares have received acumulative dividend of 6 per cent. and ordinary shares 10 per cent. Surplus divisible profit remaining after these dividends will be apportioned in three equal parts for payment of further dividends to the three classes of shares. * In payment of arrears of dividends on "A" preference shares for half-year ended December, 1927. † Bonus for every ordinary share held in the shape of a second preference share of Rs. 25 bearing interest at 4½%. ‡ Includes Bonus, § Arrears of dividend for six half-years ended June, 1934. Arrears of dividend to the extent of Rs. 1,22,500 to the end of December, 1937 outstanding. ** Includes 1152 mule spindles. (y) Arrears of Dividend for eight half-years ended 31st Dec., 1931. (z) Arrears of dividend for eight half-years ended 30th June, 1938. Also non-Cumulative dividend of Rs. 18 per share for the whole year 1938. (x) Arrears of dividend for 8 half-years in the following year after Conversion. Interest is paid at 4 per cent. in respect of year in which option was exercised. (j) After 3 per cent. on ordinary Shares eligible for half of the surplus profits. (k) 4½ per cent. guaranteed convertible registered mortgage debentures (unconditionally guaranteed as to principal and interest by the Indian Iron and Steel Co., Ltd.) issued at par in May, 1937, repayable at par on 1st January, 1967, option redemption in whole or part at 2 per cent premium on six months' notice on any interest date after 1st January, 1947. Option to holders at any time upto 1st January, 1947 to convert £50 worth debentures into 40 ordinary Shares of Rs. 10/- each. (l) Entitled to a non-cumulative dividend of 25 per cent. per annum, after the dividend on preference shares and 3 per cent. on ordinary shares. (m) Repayable after 1944 with the option of redemption after 1940.

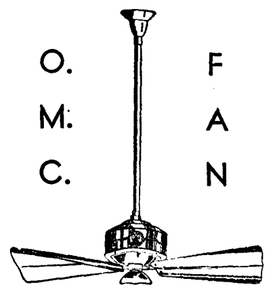
IS IT NOT WISE TO INSURE NOW ?

With an uncertain future ahead Conservation and Consolidation of resources are the prime needs every individual should assiduously strive after.



If you already have Life Insurance, hold on to it. Don't allow it to lapse. If you haven't, go in for it right now. A Life Policy gives an inestimable protection and it will cost you less now than later. It is cent per cent true that to be forewarned is to be forearmed.

Write to us for further particulars or advice.

WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

THOUGH inter-bank call money is still quoted at ½ per cent and the market has abundant supplies of credit, the results of the last Treasury Bills tender are divorced from these realities. On Tuesday, March 8, tenders for Rs. 1 crore of three months Treasury Bills were called and the total amount offered was Rs. 250.25 lakhs, as against Rs. 259.25 lakhs in the previous week. Indeed, applications for Treasury Bills have fallen from Rs. 320 lakhs on March 4, to Rs. 250 lakhs in the current week. The steady decline in applications has also been accompanied by a rise in the average rate of accepted tenders, which, in the current week, has risen by nearly an anna to annas 12 and pies 5 per cent per annum. The sale of intermediates in the past week has been lower at Rs. 1.75 crores whereas, in the five previous weeks, it was never less than Rs. 2 crores. It is obvious that the sale of Treasury Bills by tap has contributed greatly to the rise in the Treasury Bill discount, a rise which belies cheap money sentiment. The authorities are still continuing the sales of Intermediates; and, by all tokens, the Treasury Bill rate may go even higher in the next week. The policy underlying these operations is difficult to understand, particularly when the Central Government's balances with the Reserve Bank have been definitely on the high side in the past few weeks; in fact, the Government's balances have, for a long time, been well over Rs. 20 crores. In the face of the hardening trend in the discount rate, and the comfortable position of Central Government balances, persistence with the sales of intermediates suggests a reversion to the old deflationary bias which, we had thought, had been well left behind. After the repeated affirmations of their faith in cheap money policy, the authorities' preference, conscious or unconscious, for a rise in the Treasury Bill rate is hard to comprehend. With the rupee exchange absolutely in no need of any sort of support, even the old reason of bolstering up the exchange by higher money rates does not hold good on the present occasion. It is, therefore, inconceivable that the authorities should at all be party to a policy, which results in pulling up money rates at a time when a huge defence loan programme has to be put through and money cannot be made too cheap to ensure their success. We would commend to them the achievement of the British Treasury in being able to offer its £65 million tender at the rate of £0-19-11d., which is the lowest rate at which London Treasury Bills have been sold since the war began. And London looks forward to still lower rates for its short-term financing. Would that the same enthusiasm prevailed in India!

The Imperial Bank's statement for March 14 shows investments at Rs. 51.05 crores, the highest in the past two months. In fact, they were Rs. 47.26 crores on February 28, Rs. 48.67 crores on March 7, and Rs. 51.04 crores on March 14. Evidently, the Imperial Bank has invested substantial amounts in Treasury Bills, tap and tender. The same may also be said of the scheduled banks, whose balances with the Reserve Bank have declined from Rs. 46.25 crores on February 21 to Rs. 39.47 crores on March 14.

The statement of the Reserve Bank for the week ended March 14 shows foreign balances higher at Rs. 76.92 crores, what time cash in the till has gone down from Rs. 11.71 crores to Rs. 9.95 crores. The steady rise in balances held abroad in the past three or four weeks has naturally been accompanied by a reduction in the cash in the till in nearly proportionate measure. As this is the last week of the financial year, it is to be supposed that the year-end settlement of accounts and payments to India from the British Government will all be completed shortly, so that the foreign balances in the coming week should be even higher than they are. That would entail almost certainly a shrinkage in the cash of the banking department to even lower levels. As at current levels it is very low, a further decline can hardly be thought of. It seems, therefore, extremely probable that a transfer of sterling securities from the banking to the issue department may be rendered inevitable. Such a transfer would, of course, be accompanied by an expansion in total notes in circulation, by means of which the bank can replenish its cash in the till. Any conjecture in this regard has, however, to be made subject to the qualification that, as we are on the eve of the completion of the transactions in regard to the sterling redemption scheme, the bank might choose to have as high a foreign balance as possible until the deal is put through.

There has been no change in the exchange market during the week. Bills have been scarce owing to lack of freight.

The Reserve Bank's tap rate for sterling is 1s. 6d., all through for six months.

Banks were sellers of T.T. 1s. 5 31/32d., right through for six months; and banks were buyers of T.T. at 1s. 6 1/32d., for six months.

Three months' D.A. bills were quoted: 1s. 6 7/32d., for the first month; 1s. 6¼d., for the second month; 1s. 6 9/32d., for the third month and 1s. 6 5/16d., for the fourth month.

Interbank call money quoted ½ per cent.

Firms' deposits were ½ per cent for one and two months, and ½ per cent for three and four months.

TREASURY BILLS

India

Tenders for Rs. 1 crore of three months' Government of India Treasury Bills were opened on Tuesday, March 18, 1941. Total amount offered was Rs. 2 crores, 50 lakhs and 25 thousand. Tenders at Rs. 99-13-0 per cent and above were accepted in full and those at Rs. 99-12-9 per cent were allotted approximately 25 per cent. Total amount accepted was Rs. 1 crore, the average rate of accepted tenders being annas twelve and pies five per cent per annum.

Tenders for Rs. 1 crore of three months' Government of India Treasury Bills will be received on Tuesday, March 25, 1941. Successful tenderers should make payment on Friday, March 28, 1941 or March 27, 1941 where Friday is a holiday. Other conditions are as usual.

Three months' Intermediates will be sold frrm March 19, 1941 to March 24, 1941 at Rs. 99-13-3 per cent subject to the conditions previously announced (viz. sales can be stopped at any time without previous notice if Government think it necessary).

Three months' Intermediates sold from March 12 to March 17, 1941 amounted to Rs. 1,74,75,000.

During the week ended March 14, 1941 Government of India Treasury Bills for Rs. 2,62,00,000 were sold in favour of the Issue Department of the Reserve Bank of India.

MISRA HOSIERY

MILLS

CAWNPORE

Telegrams: MISRA, Cawnpore Telephone: 2336 Cawnpore

THE MISRA HOSIERY MILLS have, from the commencement of the war, been "on active service". Working day and night, the mills have been supplying essential requirements of the Army in the knitting line.

MISRA HOSIERY cater to the requirements of the general population and comprise socks, stockings, undervests, sports shirts, interlock underwear and outerwear, for men, women and children.

Production 8,000 Articles, daily.

Finance Abroad

IN the London money market, the last Treasury Bill tender is chiefly notable for the result that the £65 millions of Treasury Bills on offer were allotted at the lowest average rate since the war began. The rate has dipped below £1 and is now 19s. 11.79d., per cent. The total applications amounted to £153.8 millions as compared with £151.2 millions last week. In the result, the market Syndicate had to be content wih a lower allotment of 24 per cent. as against 42 per cent. in the previous week. The achievement of the British Treasury in being able to obtain its short-term requirements at so low a rate at a crucial phase of the war is nothing short of marvellous, particularly in the light of the fact that the size of the floating ebt is still growing. The trend of the money market is towards more and more ease. Though conditions in the market have, for close on a year, attained virtual immobility, it is obvious that the authorities are still thinking in terms of a falling trend of interest rates. A recent indication of this was provided by the Treasury's decision to lower by one quarter per cent. the whole range of rates charged on local loans. This is, however, not the only direction in which a lower rate of interest has been definitely striven for and attained. The increased competition in tender bills and a smaller allotment, with which the discount market has recently had to be satisfied, has been a factor in the decline in bills discounted as well as in short loans. While banks are more than compensated for the decline in the supply of Treasury Bills by increased Treasury deposits, the same luck has not befallen the discount market which had no similar compensation. Altogether, London is firmly entrenched in cheap money and borrowing should be greatly facilitated.

The U. S. Administration is going full speed ahead in its effort to help Britain and the seven billion dollar appropriation is now before the House of Representatives, with the strong exhortation of the Appropriations Committee for quick approval. The discussion on this important aid coincides dramatically enough with the opening of what may called the Battle of Atlantic. The debate on the appropriations has necessitated release of the evidence given by the U. S. Defence Chiefs at last week's secret hearings before the National Defence Committee. The evidence is striking as showing both the determination of Britain to meet her liabilities from every bit of her dollar resources and of the resolve of the U.S. to give her all-in aid. Mr. Harold Smith, the U.S. Budget Director, has given detailed figures of Britain's war expenditure as well as the various sources of dollar balances and of British investments in America, North and South.

However, before passing on to the revealing figures unfolded by Mr. Harold Smith, we might pause to take note of the effort made by Britain on her side to use every possible means of self-help and to use every bit of her resources before calling upon the U.S.A. to give help. Readers will remember that Sir Edward Peacock, the British Treasury Expert, has been in the United States for more than a month now, examining the possibilities of making the best use of British investments in United States. The first fruit of the Peacock mission has been the negotiation of the transfer of what is probably Britain's most valuable single holding in the United States as part of the programme to raise dollar exchange—British holdings in the American Viscose Corporation. A statement from London on the sale of these holdings says that 90 per cent. of a public issue to be made in the U.S. will go to the British. The Shares now sold total 448,000 all held by Courtaulds. The price to be paid to Courtaulds will be fixed by agreement or, if necessary,by arbitration. The total amount involved cannot yet be stated, but according to Reuter, the contract requires the payment of approximately of $40 million on account.

This is, however, only the beginning of the gradual liquidation of British interests and investments in American securities or corporations. According to Mr. Harold Smith, British holdings i ncluded $615 million of marketable securities at the beginning of the current year. In addition, to these, there are of course the less easily marketable investments which, needless to say, are far greater and are also spread in countries as different as Canada, South America and the U.S. itself. The total existing British orders, according to Mr. Smith, aggregated to $2.7 billion, against which payment of $1.6 billion has already been made. The remaining liabilities will, therefore, have to be met from existing British dollar resources. Thus, on orders already placed, alone, there is a deficit of more than $1,000 millions. The additional commitments have, therefore, to be met from funds to be raised hereafter or from credits allowed by the United States. It is significant, in this connection, that the seven billion dollar appropriations will be used to pay for orders placed by Britain before the passage of the Lease and Lend Bill. That should suffice to convey some idea of the enormous help which the U.S.A. proposes to give in the coming weeks and months.

The figures of British holdings and investments in non-American countries are interesting in retrospect as showing what large strides British investments had made in the last decade. Although, these investments may not be readily realisable and may not be available for immediate realisation in cash, there is no gainsaying their worth. In Canada, for instance, if the report of Mr. Harold Smith's statement is correct, British investments are of the nominal value of two billion dollars, and in South America 3.5 billion dollars. The market value of these investments is, of course, far less than the nominal value, but any scheme which envisages a transfer either in whole or in part of these investments to American Corporations can bring in a much higher "present-value" for these investments than the market barometer indicates. In the U.S.A. alone, the total of less easily marketable investments is put at nine billion dollars. It is difficult to give complete credence to these reports, which are often contradictory. The figures are often misleading and no two sources agree even roughly as to the size of such investments. It will, therefore, be valueless to try to arrive at conclusions on the basis of these figures. It must, however, be said that the figure purporting to give British investments in South America does not err on the high side ; and the stout resistance put up by British interests against American interests for smelting Bolivian tin in America sometime ago, provided a measure of the financial power wielded by British interests in South American countries. That is, however, by the way.

At the beginning of the current year, Britain, we are told, held $292 millions of gold, $54 millions of official dollar balances and $305 millions of private balances. On the credit side has also to be taken into account British capital assistance to U.S. manufacturing plants totalling $171 millions, in order to facilitate easier execution of the war orders. According to the Director-General of Defence, Mr. Knudsen, Britain financed the plant of 110 out of 784 available for the production of war material. The total of gold and dollar balances now in Britain *plus* the total of marketable investments, the capital assistance of $171 millions to U.S. industries, all come to no more than a little over $1,200 millions. That is to say, at about the present time Britain had sufficient resources to wipe out all the deficits of the war orders already placed. It, therefore, follows that further payments on account of the war orders will have to be met only from freshly accruing dollar balances of the U.K. as well as of the Empire and from the realisations of the British investments in America, Canada, South America etc. A stage for the grant of credits would come in only if the realisations on these investments or their transfer to United States nationals meet with any bottlenecks. How far the operation of the Lease and Land Law would obviate the necessity for the liquidation of these investments under compulsion remains to be seen. There is much about the Lease and Lend Bill which is still obscure, so far as its execution is concerned. We are yet to have a complete account of its provisions and its impact upon Anglo-American purchases and payments.

Governors' Budgets

PROVINCIAL finances in the past two decades have had an extremely chequered history; and in view of the crop of surpluses in the provincial budgets of 1941-42, it behoves us to look back and see, if only in a *tout ensemble*, the changes that have taken place in the interval. To take a province like the U. P., for instance, only five of the sixteen years since 1921-22 have ended in a revenue surplus. The whole period closed with an accumulated deficit of Rs. 4 crores, for which payments to the Centre on the basis of the Meston Award and the large and frequent remissions in revenue granted in the wake of a slump in prices were largely responsible. It was not, in fact, until the complete remission of provincial contributions to the Centre and the advent of the Niemeyer dispensation that the finances of the provinces could at all be placed on an even keel. It is now an accepted fact that the Meston settlement did irreparable harm to provincial finances, though the provinces have to show many instances of financial imprudence and the rigidity that characterised the structure of Central finances has its share of the responsibility.

Even after the advent of provincial autonomy, which helped the Provinces to start on a clean slate, the problems of provincial Finance Ministers were legion. They had to foot a growing bill of expenditure and to seek the wherewithal for it. The latter was a hard task because—at any rate, as it was then imagined—precious few sources of new income seemed to remain for the provinces, whose revenue was being derived from inelastic sources. It required courage of a high order to resort to new taxation, when the people had, for years, been praying for a Ministry that would lighten the burden of taxation. This, the Congress Governments unflinchingly faced, remitting land revenue, where necessary or desirable. They were prepared to go to the point of aggravating their difficulties by foregoing excise revenue to the tune of crores, though this was a measure of social, rather than financial reform. Posterity alone can be the best judge whether the Congress ministries would not have done better to concentrate first on a revision of the structure of provincial finances, readjusting tax burdens and building up new sources of revenue for nation-building policies before increasing their problems by premature sacrifice of existing revenue.

To their credit, however, it must be said that the new taxes introduced by them have proved wonderful sources of revenue, without being open to the charge that they weigh on shoulders least able to bear them. There can be no better tribute to their taxation policy, which chronologically at least started with the introduction of Prohibition, than that even today these taxes are persisted with. Both in Madras and Bombay, not all the furore against the Sales Tax in the former and the Urban Immovable Property Tax in the latter, has served to cause a reversal of policy. On the other hand, the Governors of the two provinces specifically recognise that these taxes have to be kept on, and have even introduced an innovation in the creation from their proceeds of a Revenue Reserve Fund to be made available to a future ministry in order that financial exigencies may not shackle its freedom to pursue any policy it chooses. The new taxes have, therefore, definitely come to stay. Their incidence has been exaggerated, but there is no doubt that the Congress ministries have made a great contribution to the problem of paucity of provincial revenues.

Nearly all the provincial budgets presented this year have disclosed surpluses, large and small. They convey the impression that provincial finances have turned the corner after all, that the days of chronic deficits have been definitely left behind and that the future will see recurring surpluses, at least in the budget of the older provinces. It is, therefore, extremely important to examine in detail whence the apparent prosperity has been derived and whether the changes, if any, in the structure and trend of provincial finances are such as to warrant pronounced optimism for the future.

In this connection, it is a matter for satisfaction that the Governors' budgets, in the provinces where autonomy has broken down, are not vitiated by the air of tentativeness which hung like a pall on them last year. On the other hand, the Governors have been at pains to formulate a budgetary policy which approximates to what a popular ministry would probably have pursued. At the same time, there is also, in the Governors' budgets, a readiness to concede that the existing regime has no right to dispose of the proceeds of taxes which had been introduced by a popular ministry in pursuit of certain avowed social and economic objectives which in the present conditions are not pursued. These two features of the Civilian budgets really make them more significant than the budgets of provinces like the Punjab and Bengal, where a popular ministry controls provincial finances.

There should, however, be no illusions about the manner in which the improvement in provincial finances has been brought about. In the first place, the war has directly and indirectly contributed to increases in revenue; and the increases in expenditure under heads like Police, Jails, etc., are more than offset by better receipts under the heads, Forests, Stamps, etc. Generally speaking, the additional burdens placed upon provincial finances by the war have been more than balanced by the increased revenues brought about by favourable agricultural conditions; and with rare exceptions, receipts from Land Revenue in almost all the budgets show considerable increase. But the factor which has been largely responsible for altering the outlook is the rising share of each province in the divisible pool of income-tax receipts at the Centre. The total of this pool has been steadily going up since 1939, owing to the improvement in the yield of income tax and the remarkable recovery of railway contributions to general revenues. It was Rs. 283 lakhs in 1939-40, Rs. 373 lakhs in 1940-41, and is estimated to reach Rs. 446 lakhs in 1941-42, according to the Central Budget. The enlarged share which, in the case of a province like Bombay, for instance, amounts to Rs. 83 lakhs, naturally figures conspicuously on the revenue account of all the budgets. It is well to realise that this rests on a multiplicity of uncertain factors, and that the end of the war may lead to a considerable shrinkage; and any improvement in the budgetary position that has been derived from this source must, therefore, be deemed essentially transitory. It is true, however, that the

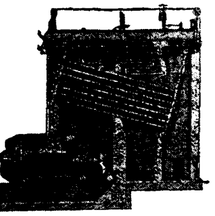
purely provincial sources, such as Irrigation, Forest, Excise, Stamps, have all shown a welcome increase in receipts.

Another factor which has made possible the emergence of provincial surpluses is that expenditure is practically immobilised at the old levels in most cases. It is obvious that, if progressive policies are to be implemented, the budgets would not look so spruce and tidy as they now do, and large surpluses would be out of the question. Even the Congress ministries did not embark upon large expenditure in the nation-building departments, and were mostly content to sanction token grants. It is, therefore, important to view current surpluses against the background of this policy of conservative, almost stand-still, spending, to appreciate their true import.

This is not to deny the degree of stability, if not expansion, which new taxation has served to impart to the finances of the provinces. Not all the provinces are moving in line, however, and while Madras and Bombay have a good dose of fresh taxation, provinces like Bengal and the Punjab are yet to resort to much of new taxation. The Bengal budget for 1941-42 makes it clear that new taxation cannot very well be avoided and the Sales Tax has already been brought in. As for the Punjab, the Resources and Retrenchment Committee's report stressed the need for fresh taxation, if the Government were to do its duty by the people. We may well witness the Sales Tax being more generally resorted to in all the provinces in the near future, though Assam's example in levying a tax on agricultural income may be much in advance of the times. The Lloyd Georgian budgets of provincial autonomy were really the budgets of Mr. Latthe in Bombay and Mr. Rajagopalachari in Madras. The Urban Immovable Property Tax was Mr. Latthe's obvious rejoinder to the anti-prohibitionists; while "C. R." was content to sit pat on the Turnover Tax. The levies on entertainment and electricity as well as the Sales Tax on petrol were adopted by all the provinces in the 1938-39 budget. They remain to this day a fruitful source of revenue, besides having the merit of being a relatively light burden. The Madras Sales taxes and the Bombay tax on urban property may also find fresh adopters—the Punjab is still toying with the idea of the latter. The Congress Governments can claim to have shown the way. Both the Madras and Bombay Budgets for 1941-42 bear this out. They are so significant that a reference to them here would not be out of place.

It is common to both budgets that they contain provision for a sort of Revenue reserve or development fund, constituted from the excess of the proceeds of the new taxes over the loss of revenue incurred on prohibition. This is set apart as a sort of nest-egg for the future government to go ahead with its policies untrammelled by the thought of budgetary expediency. The Bombay Budget for the current year contains provision on this account for a crore of rupees which will be set apart for this purpose. Nor has the Government forgotten its commitments in regard to tax relief because the tax on urban property has been reduced from ten to eight per cent. from April 1. Its total repeal can hardly be asked for in fairness because, firstly, prohibition is still in force, though a thing of sorts, and secondly, the appropriations to education, etc., have been raised considerably.

The Madras Budget provides for the creation of a Revenue Reserve Fund from the surplus proceeds of the commercial taxes introduced by the Congress ministry. An amount of Rs. 91.14 lakhs is expected to accrue to the fund at the end of 1941-42. The figures would make even better showing, were it not that a sum of Rs. 75 lakhs has been allocated from revenue to capital expenditure, in this and the current year, to avoid borrowing. This is also the case with Bombay. The decision not to compete for loans with the Centre in the open market is entirely to be commended, especially when (1) so large a part of the defence expenditure of India is to be financed from loans; (2) the provinces have ample hidden reserves to tide over their ways and means difficulties, thanks to the new taxes; (3) the revenue position also permits of capital expenditure being met out of it. If Sir Jeremy Raisman has had any hand in shaping these arrangements, as is very likely, he can take credit for correct direction.



It is perhaps unnecessary to stress here that the pooling of these surpluses into a new reserve has not in any way militated against larger appropriations for education, water supply, public health, etc. The Madras Budget is candid enough to admit that, even after reducing the rate of the general sales tax, the revenue realised is over expectations. And we endorse the statement of the Governor that "as these taxes will be required in future to finance ministerial policy, it would be undesirable to disrupt the new department and interfere with the valuable experience which is being gained in the assessment and collection of these various taxes, which were introduced with the object of replacing by more elastic sources of new revenue the old and inelastic heads of revenue, some of which, moreover, it was considered desirable to reduce. These considerations have led the Government to decide to continue during the year 1941-42 to levy the existing taxes at the present rates."

The 1941-42 budgets show the provinces in the transition to new taxation policies. The current improvement in provincial finances can only be stabilised by facing up to the need for ensuring, by suitable industrial and agricultural policies, a greater flow of purchasing power, that will justify new taxation. It is not enough, nor is it always possible, to temper the wind to the shorn lamb.

Trade with East Africa.

India has succeeded in getting a bigger share of the import trade of Kenya, Uganda and Tanganyika. This is proved by the figures furnished in the report of the Trade Commissioner stationed at Mombasa. The value of exports from Uganda and Kenya to India still exceeds greatly the value of imports from India. Over a quarter of the export trade of the two colonies is based on Indian demand and the report which shows that India's share of Tanganyika's trade is not negligible shows also that Uganda and Kenya continue to sell more than they take from India. Whether the persistence of a large difference between exports and imports is due to the need in Indian mills for imported cotton or is due to the advent of import control in the Colonies is not certain. The report states that when the order regulating import trade by means of a system of import balances came into force on November 15, 1939, a large number of indents placed and accepted prior to that date were outstanding and the effect of the control was not apparent in the early months of 1940. Owing partly to a curtailment of shipping facilities, these goods continued to arrive during the first six months wth the result that the import figures were only slightly affected as the reduction in tonnage was compensated for by increased prices. It is plain that all trade in Tanganyika was dislocated owing to the war and prospects have to be assessed cautiously. The report, however, notes that supplies from the U.K. and India were increasing though imports from all sources were reduced. Economic conditions in East Africa are said to be getting better. But bazar trade in Tanganyika may not show immediately the effects of activity in the mining industry. As statistics are incomplete, details relating to individual items of East African trade are not available. The list of enquiries dealt with by the Trade Commissioner shows that the Mombasa office is a valuable channel of communication. Interest was shown by traders in sports goods, hosiery and wire and wire nails of Indian origin. Exporters in India evinced increasing interest in scrap metal available in East Africa. The Indian enquiries turned largely on the prospects for manufactures such as yarn, cotton blankets, leather goods, stationery and brassware. Information was provided as usual and Indian goods exhibited at Kampala last June attracted interest.

Bihar Finances

Unlike the budgets of Bombay and Madras, the Bihar budget is a continuation of the *status quo* and changes on the Revised estimates of 1940-41 are few and unimportant. For 1941-42, a surplus of Rs. 31.26 lakhs is envisaged with the revenue being placed at Rs. 6.11 crores, Rs. 5 lakhs less than the Revised for the current year. The fall is mainly due to lower collections from the cess on sugarcane and from excise, both of which outweigh the increased receipts from incometax. The expenditure on public improvements has been reduced by four-fifths, though the grants on Irrigation, Civil works etc. have been raised. It may be mentioned, however, that the Congress Ministry's schemes of mass literacy, basic education, prohibition, rural development, rural electrification etc. have been retained and provided for. No new schemes are proposed, nor any fresh taxation. The budget leaves well alone the commitments of the Government in respect of the Co-operative movement, the grant of a cost of living allowance to low paid employees, not to mention the compensation to growers of surplus cane. It appears, however, that the provincial Government have arranged to take an advance from the Central Government for rehabilitation of the sugar industry. It is believed that at least Rs. 25 lakhs will be required. The amount sanctioned by the Government of India is equal to the amount of excise duty at one rupee per maund on sugar other than *khandsari* or palmyra. This advance is to be repaid on behalf of the industry within the next three years. This is about the only feature of interest in the Bihar budget.

The revised estimates for 1940-41 are interesting as showing much improvement over the original. Revenue in the revised is Rs. 6.16 crores as against Rs. 5.50 previously; similarly, expenditure is up at Rs. 6.1 crores as against Rs. 5.46 crores. The improvement in revenue is mainly due to an anticipated increase of Rs. 11½ lakhs in the share of income-tax revenue, Rs. 16 lakhs under Industries, Rs. 14 lakhs under Excise and Rs. 16½ lakhs under Stamps. The rise in expenditure is due to an allocation of Rs. 38½ lakhs as subsidy to sugar factories, and Rs. 18 akhs for avoidance of debt and part payment of the loan taken from the Central Government to help the sugar industry.

New Style Concentration.

Attempts to influence the concentration of consumer industries are, probably, the counterpart of attempts to examine and alter the basis of industrial location and may be viewed as part of the general problem of transference. While the pattern of industry cannot be reshaped easily, there is obviously justification for plans which will maximise efficiency of production and thereby release manpower for essential services. The Board of Trade's interest in the problem of post-war industrial reconstruction may not be so acute as its interest in raising efficiency immediately to the highest possible point in the non-essential food industries. Perhaps the time has come for taking out men even from the reserved occupations but the more logical explanation may be the destruction or dislocation of certain productive units making goods for consumers. Apart from the restraints imposed by the purchase tax on private consumption in wartime, the actual need for keeping down costs, and hence prices, remains great.

It may seem surprising that a new type of rationalisation is being tried out in wartime, but the reasons are convincing enough. There should be a saving in labour, even in distribution expenses and ultimately of costs, essential for averting the threat of inflation and Captain Lyttelton's scheme for the concentration of consumer production merely carries out the principle of territorial division of labour to the limit. Whether the concentration is entailed by air raid damage or is merely a step to facilitate rationing one need not pause to consider here. But the appearance of the scheme is proof that horizontal combination retains its value and the question is how individual enterprises are to carry out the fusion and transfer arrangements.

Anyway the scheme of Captain Lyttelton has impressed the British press and last week Frank Owen in the *Evening Standard* referred to its warm reception. Some idea of the terrific advantages obtained from a concentration resulting in full-time working of selected firms instead of part-time working of all firms can be seen in the investigation of the food, drink and tobacco trades by the Oxford Institute of Statistics; there were 354,350 persons employed in this industry in July, 1939. A reduction of consumption by 80 per cent. would release 33,260 persons if the reduction was distributed over the output of all firms. By concentrating production in the most efficient units, it is reckoned that no fewer than 203,400 workers would be released, six times as many. As an indicator of the possibilities of concentration, this example is revealing.

U. S. Industrial Capacity

The prompt provision of the gigantic vote of credit under the Lease and Lend plan may seem more important than the details relating to the building of ships in U.S.A. for Britain. The complete dominance of the Administration over Congress implies that neither financial nor other barriers will be allowed to stand in the way of assistance from America. Colonel Donovan who has finished his second wartime trip to Europe should be able to indicate how and where resistance to aggression can be immediately strengthened. The promise of enlarged aircraft supplies should be viewed against the steady rise in industrial output in the U.S.A. The Meek-Gregory report has made the idea of steady expansion familiar enough. The expansion in overseas trade up to August, 1940 undoubtedly reflected the current improvement in industry. Stocks of essential raw materials such as rubber and tin were being accumulated for the rearmament programme and the growth of the arms programme from the modest naval plans of the summer towards conscription, the two-ocean navy and all-in assistance for Britain has called forth efforts to develop industrial capacity. The situation is regarded as encouraging according to a cable received recently by the Associated Chambers of Commerce which sums up the position of the U.S.A. in relation to raw materials of modern industry, namely, coal, iron, copper, cotton, oil, rubber. The U.S.A. produces about 34 per cent of the coal, 38 per cent of the iron, 32 per cent of copper, 49 per cent of the cotton and over 60 per cent of the oil. Only in rubber is she dependent on foreign supplies. Of other raw materials, she produces bauxite (between 10 and 20 per cent of the world output) mercury, magnesite, gold, wool and soya beans; 20 to 30 per cent of the world's lead production in addition to a considerable share of vanadium, sulphur, molybdenum and other minerals.

The U.S. steel industry ranks first in the world with an estimated annual output of 75 to 80 million tons. This may be compared with the total of 19.35 million tons produced by Germany in the year before the war. The industry has been running up to over 97 per cent of capacity in the last three months mainly because of the extensive modernisation carried out since 1930 at a total cost of over one and a half billion dollars. Extensions to plant at additional cost are under contemplation. The Axis is said to control a steel output of over 40 million tons but the shortage of alloy metals destroys the effectiveness of the German steel-makers. Efforts to interest Finland reveal the acute need for nickel because Axis-controlled territories produce only 2 per cent of world's nickel; about the same of copper, only 10 per cent of manganese and no chrome.

In view of the threatened submarine war and the need for a bridge to Europe the figures relating to ship-building are of great interest. Expansion during the last war accounted for an increase from 157,200 tons gross in 1915 and 821,000 tons in 1917 to 2,602,000 tons in 1918 with a further increase to 3,580,000 tons in 1919 which figure is the greatest ever achieved by any country before or since. The U.S. maritime commission under Admiral Emory S. Land as Chairman had a big programme of 50 vessels per annum in hand. The current building programme is said to cover a higher figure on the basis of the initial output of 68 ships totalling 541,500 tons in 1940. As technical efficiency has increased and employment in U.S. yards had risen during 1940 by 45 per cent further rapid expansion is probable. Figures relating to probable aircraft output give 1,500 planes per month as the limit by June, 1941, while output is expected to rise thereafter to 3,500 planes by June, 1942. The Defence Production Council over which Mr. Knudsen presides has been busy for over three months and one of the first effects has been to secure

control over machine tool output. The U.S. Government has requested the industry not to make deliveries after the end of February to any customers except those granted official priority ratings.

South African Budget

Introducing the war budget in the Assembly, Dr. Hofmeyr the South African Minister of Finance said that the war may cost the Dominion £72 million sterling in 1941-42. There has thus been a rise of nearly £12 million over the expenditure for 1940-41. The soundness of the Dominion's financial position may be judged from the fact that, of the £72 millions, only 40 per cent. will come from revenue, while the remainder is proposed to be raised by borrowing. The defence appropriations have been leaping up at a fairly fast pace. In February, 1940, the budget envisaged a war expenditure of no more than £14 million for 1940-41 and it was then estimated that only £2 million need be charged to loan account, leaving a small deficit on revenue account. By September, 1940, however, the course of the war necessitated a much higher expenditure because South Africa was directly involved and her soldiers were in active service in East Africa. In the supplementary budget of August 28, 1940, an additional £82 million was voted for defence, and at £46 million in all, the total borrowing was put at £80.8 million of which £12 million were to come from the Public Debt Commissioners and £18 million from the public, by means of loans. To raise the latter amount, two loans were floated in October 28; one was issued at £99½ bearing interest at 8½ per cent and repayable 1952-57; and another of 2½ per cent, issued at £99 and repayable in 1946. The £18 million was raised without difficulty; and the terms of issue of the medium term loan as well as the short-term issue deserve the attention of the authorities in India, where excessive caution still comes before vision and courage.

The S. A. Government's war finance in the first year of war made no difference to the amount of banks' surplus cash; and bank deposits with the Reserve Bank stood at a pretty high level. Looking back into the history of South African banking, one finds that, in the first few years after she left the gold standard, it was a shortage of suitable stocks in the Union which prevented the commercial banks from using their large cash holdings to buy investments. Indeed, investments began to rise and cash to fall only after the Government had repatriated a large part of the foreign debt in 1936. It remains to be seen if the Government's war finance which involves the raising of nearly £45 million by fresh borrowing will reverse the trend in the near future. The closing of the London capital market must mean that the large municipalities and the Electric Supply Commissions, which hope to raise £10 million in the current year, have all to rely on local investors. The cumulative pressure on the Dominion's national savings must, to some extent, militate against the easy success of the loans. Against this, it may be noted, however, that South African banks have always maintained a higher cash ratio than Empire banks—sometimes as high as 18 per cent. on deposits—which does not probably obtain in any other part of the world. This high level of banks' cash must help the Government to put through its borrowing programme without any difficulty.

Moreover, the stimulus to economic activity, already at a high level, from the expenditure of as much as £72 million in the coming year, must not be ignored. Mr. Hofmeyr himself has said that the trade position is very healthy and that exports in 1940, excluding gold, were £37 million, about £6 million above those of 1939. Whether the flourishing economic situation is due only to the stimulus afforded by war-time activities cannot be said with any certainty, but economic activity is certaintly running at a high tempo. The gold mining industry continues to establish fresh records and the output in the first half of 1940 was 6,902,000 ounces valued at £57,978,000. These figures are an improvement on those of 1939. It makes no difference to economic conditions whether gold is shipped or not, because the Bank of England is automatically purchasing all the gold produced from the Reserve Bank, which buys it from the producers at the same price. The South African Budget thus presents a prosperous picture.

Sugar Figures.

Four new factories started work during the 1940-41 season, says the Memorandum on the production of sugar in India. The total production is estimated at one million tons as against 1.2 million tons in 1939-40. Production has fallen in U.P. and Bihar while an increase is recorded in Madras and Bombay. According to the forecast published last week sugar production in Provinces other than U.P. and Bihar will amount to 3 lakhs of tons as against 2.6 lakhs of tons in the previous

year. The advent of their new factories in Madras, Kapurthala State and the N.W.F.P. explains the increase. The fall in the output of the U.P. and Bihar factories is explained by the decision to limit output in these two provinces to 7.2 lakhs of tons, because of the existence of a heavy carryover of 4 lakhs of tons around the middle of November. The U.P. and Bihar factories could not crush all the cane offering and the normal season production had to be reduced to the point that the carryout at the end of the season would not exceed 4 lakhs of tons. According to the Memorandum 148 factories were at work this season, out of which 71 were in ing season for factories in these two provinces to take the Note was much shorter ries to take the Mode was much shorter than the All-India average for 142 factories. The memorandum furnishes particulars as to the cane crushed and sugar made. The quantity of cane crushed by 148 factories at work in the 1940-41 season is estimated at 10.69 million tons nearly and the sugar produced is put at 1,013,000 tons. Over 5 million tons of cane was crushed by the U.P. factories and the sugar produced in the U.P. alone is estimated at 482,800 tons, though the quantity may be a little less. The total quantity of Molasses produced is estimated at 377,800 tons, out of which the U.P. factories' share is 178,000 tons. The average recovery percentage is estimated at 9.54 though this percentage is lower than the 10.84 per cent reported by Bombay factories.

The reduction of nearly 2.3 million tons in the production of sugar will go far to reduce the carry-over. The fall may correct the statistical portion particularly as prices are stabilised at a lower level compared with last year. A part that invites allusion is that the 8 factories in Bombay depend not on irrigated cane but treat a larger quantity and produce more sugar than the 10 factories in Madras or the 9 situated in Bengal and Assam. The difference in the percentage of recovery partly explains this. The increased share of the States in sugar production is discernible in the latest forecast as 110,400 tons of sugar are produced by the 12 factories treating over 1.1 million tons of cane in 1940-41 reported from the States.

Tyre Industry's Case.

The manufacturers of pneumatic tyres have not been remiss in lodging a protest against the 10 per cent excise proposal. The partiality of the Central Government for excises is perhaps one disadvantage of developing industries. Where the industry does not enjoy protection as in the case of steel, sugar or matches the excise has no justification, and this gives great force to the pleas put forth recently against the proposed excise. If the need for revenue is acute, there is clearly a case for adding to the import duty on imported tyres. The existing duty of 25 per cent is not very high and an increase, which would neutralise the proposed excise, would be welcomed by the tyre industry. As in the case of rayon yarn, the interests of a developing industry are jeopardised by the proposed taxation. The industry has arranged to make representations to Government drawing attention to the effects of the excise duty on the tyre manufacturers in India. It has been pointed out that unless a countervailing duty is imposed on imported tyres at the same time, the position of the local manufacturer *vis-a-vis* the importer would be weakened. Apart from the benefits to the rubber planting industry, made possible by the growth of the tyre industry in India in recent years the industry's wartime importance apparently is not fully appreciated. It is surprising to find the excise proposal coming when tyre factories in India are being pressed for increased production and for further development as a part of the country's war effort. If imported tyres should not receive gratuitous benefit at the expense of the indigenous industry handicapped by the excise, one can see plainly enough the need for a higher import duty. It is only right to point out that India is the only country which does not give tariff protection to the tyre industry. The industry has developed without any favours except those inherent in a rubber producing country. The argument for a higher import duty is not one for protection, but one for equality of treatment. A point to consider here is that many of the factories producing rubber tyres and tubes in India are small factories who will find it difficult to shoulder the burden of the excise. Survival in the postwar period will become difficult for the smaller companies which under unregulated competition and the absence of tariff advantages have made limited progress. Their circumstances should not be overlooked. The tyre industry's case against the excise has been formally stated in the press last week, but the Finance Bill is not law yet and the representation, which urges mainly the imposition of a higher duty on imports, should receive careful consideration before the tax proposal goes through.

Indian Textile Progress.

Those interested in the cotton textile industry are sure to welcome the Jubilee Souvenir published by the Indian Textile Journal of Bombay. The history of the last fifty years is of absorbing interest not only to those who had watched the Bombay industry grow from small beginnings during the American Civil War to a point at which it required a special journal to chronicle its figures and uphold its interests but to all concerned with the economic history of the country. Mr. D. F. Karaka who has been asked to write the history of the journal alongside of the development of the industry, brings to his task not only literary gifts but the insight that makes him turn to the convocation address delivered by Lt.-Colonel King to the Madras University for a remarkable appeal in favour of industrialisation. The developments within the industry are of no less interest than the general industrial advance for, as Sir Homi Mody observes, loomage in India has increased substantially since yarn exports started to decline. But the decline, as Sir Ness Wadia points out, may be due to the fall in silver and the cotton exise duty of 1896. Sir Ness Wadia refers to the abortive mill merger scheme and records his opinion that its failure was a misfortune for the Bombay industry, though the progress of rationalisation since 1930 is an item on the credit side. The historical aspects fortified by statistics of course are discussed as thoroughly by Sir Sorabji Saklatwalla as the evolution of the cotton trade in Bumbay by Sir P. Thakurdas. The uniqueness of the Textile Journal receives ample support from the distinction of printing and get-up, and there is little about cotton in any form that is not touched by the special articles appearing in the Journal while notes on the progress of rayon in India confer an importance that cannot but be recognised. Other provinces than Bombay will admit that the Souvenir is at once sumptuous and dependable, covering both the technical and economic aspects of development in the textile industry. No industry has been so well served and Mr. T. Maloney's account of the Bombay Millowners Association with 85 members at present and its activities serves to show that the industry has not only found effective organisation but succeeded in getting rid of the excise and obtaining advantages under the Indian tariff. Progress in recent years has not admittedly been more impressive than in the war period of 1914-18 but the export prospects opened up by the war are substantial. The magnates of the industry have co-operated with the publishers in bringing out a volume that combines in high degree all necessary

advantages and the press as such, should like first to acclaim the appearance of a notable publication.

Bombay Dock Labour

The account by a research scholar of *Dock Labour in Bombay* (Longmans, Green Rs. 4-8) will be welcomed for several reasons. It is a valuable addition to the few books on the labour problem in India, and Mr. R. P. Cholia who conducted the survey has made a noteworthy addition to the extant firsthand studies of the working class. The editor, Professor Vakil refers to the 10,000 labourers whose condition is pictured by the investigation which rightly concentrates both on living conditions and conditions of work. The work carried out in 1933-34 has not lost in value for the dockyard workers of today lives very much the same life and Mr. Cholia's survey based on enquiries of as many as 1,000 dock workers takes in the conditions of the port trust worker as well as the gangmen employed by stevedores. A very useful account of the port of Bombay is also provided by Mr. Cholia. Based on the sumptuous and full account provided by the Bombay Port Trust, the introductory chapter gains in interest from the additional activity engendered by the war. Mr. Cholia, remembering the great strike of 1932, was induced to undertake the present study which is clear, complete and accurate within its limits. The stevedore labourers working on ships in ports form a separate class. Their work, according to Mr. Cholia, is more taxing in spite of the fact that it is casual labour. The jobber is a familiar figure and he sometimes succeeds in procuring work for the men on a regular basis. In Bombay Port the majority of dock labourers employed by stevedore firms are men in the prime of life. The majority are Muslims, and if the work demands no skill or training, acquaintance with the tindal or serang determines recruitment. The greater part of the dock labourers are not natives of Bombay and the dangers of work on board with two shifts in operation, together with the rather low margin of income over expenditure (only a tindal can hope to make Rs. 35 per mensem) do not attract many. Without families, without a dwelling even, the average dock labourer can hope to earn little more than his food. He is forced to pawn their clothes in case of need, and if few have debts, it proves that the class as a whole is not credit-worthy. The workers on the shore are relatively better off. The majority are Mahars and a few women, too, of the caste engage in the work, severe, prolonged and not very well-paid as work can we had for only ten days in the month by many. Many contract undesirable habits as family life is more or less impossible, but shore labourers, as a class, can hope to put by a little every month and remittances to the native village are common enough. Many, however, are plunged in debt. Work on vessels in port is not always of the same type. The specialised stacking of cottage bales for shipment is distinct from the loading of coal baskets. Bunkering is done by gangs controlled by muccadams and average wages range from Rs. 1-12 to Rs. 2 per day, in 1934 of course. The relation of creditor and debtor as between the foreman and labourer does not make for generosity of treatment and the stories of negroes on the waterfront may find a parallel when some Indian novelist decides to write a tale of the dock labourer. Highly irregular as employment is, the earnings are not unsatisfactory, though the standard of living is naturally low. The men working on the water constitute the aristocracy of longshoremen. Assured of continuous, albeit temporary employment, by the Port Trust, they enjoy Provident Fund, benefits or gratuities in addition to fairly high wages as even unskilled men can count on Rs. 31 to Rs. 35 per month. Here too indebtedness is the rule, and housing except for a limited number is not provided by the Port Trust. But men engaged in the mechanical workshop drawing over Rs. 40 per month can and do save. Life insurance is not unknown and remittances to the village for maintenance of the family are usual. Mr. Cholia considers that the class of 800 men employed by the Port Trust alone enjoy something like comfort and security. He has a good word for the Bhaiya who is an outstanding figure of Bombay life, and the men employed by the Port Trust are commended for industry, frugality and other virtues. A final chapter enables the author to present his conclusions and he outlines suggestions for registration (as recommended by the Whitley Commission) and distribution of regular work as also the elimination of sardars and intermediaries and the direct payment of the men.

GOVERNMENTS have a way of dealing with their advisers. It is the same, whether it is an absolute monarch or an irresponsible Council or even a responsible Cabinet. Advice, to be accepted, must be palatable. And in this case, it means no more than that the advice tendered should not be different from what the Government had in mind when it ostensibly sought advice. These thoughts occur to me whenever I deal with the decision of the Government on the report of an *ad hoc* inquiry. The existence of a legislature necessitates the preservation of such forms. A member asks a question or tables a motion on matters, on which Government are not prepared to take immediate action. An enquiry is the obvious way out; a committee is appointed, its terms of reference are formulated, and general directions issued. Valuable time is gained. The committee takes time to complete its enquiry, time to write out the report, to get it printed and formally to submit it to the Department concerned. The matter is taken up "in due course"; and in this lapse of time between the writing of the report and its consideration at the hands of the officials, some water has flowed under the bridge. And officials know how to make much of it, for justifying the desired deviation from the recommendations of the committee. Such, indeed has been the case of the report of the Court of Enquiry into the question of dearness allowance, at least in respect of some of its recommendations.

The Government of India have announced in a Gazette Extraordinary their decision on the question of dearness allowance to the lower paid staff of State-owned railways. In selected industrial areas, that is towns of over 100,000 inhabitants according to the 1936 census, employees on a salary of Rs. 50 or below are to get Rs. 2, while in other areas the same dearness allowance is granted only to employees on Rs. 30 and below. The communique containing this decision reflects the frequent changes in the ideas of the authorities on this matter. At the beginning it was thought that the award of a specially constituted court entrusted with an intensive enquiry into the conditions obtaining on the G.I.P. Railway, where the problem had become urgent, would enable the authorities to arrive at a decision. The report of the Court of Enquiry, of which the Hon'ble Mr. Justice B. N. Rau, Kt., C.I.E., I.C.S. was the Chairman and Sir Shafaat Ahmad Khan and Mr. A. Hughes I.C.S. were members, has been before the Government for nearly two months. But since the report was submitted, the Government have felt inclined to return to the process of negotiation between the Railway Board and the All-India Railwaymen's Federation.

Eventually, it would appear, it was agreed that an allowance might be given on the lines now decided on. In matters of trade disputes the agreement of the interests directly concerned should normally suffice for the acquiescence of the public in the decision arrived at. But in a period like the present when, within the last eighteen months and more, the cost of living index and wholesale indices have suffered considerable fluctuations, it is as important that the principles regulating the grant of dearness allowance should be fixed as that the agreement of the interests concerned be secured. It should be remembered that, though the Court of Enquiry was appointed under the Trade Disputes Act and its work had primary reference to the dispute on the G.I.P., the purpose of restricting the enquiry to the G.I.P. Railway was mainly to enable it to be conducted expeditiously. The resolution of the Government of India in the Department of Labour, dated August 7, 1940, made it clear that "if, as a result of the enquiry, the Government of India adopt any principle regulating the grant of an allowance to any class of workers on the G.I.P. Railway, they will be prepared to apply these principles to any other railway servant in their employ to whom they may be equally applicable." In such circumstances, the court was naturally meant to give its enquiry and its conclusions a far wider scope than would probably have been the case if its aim was restricted to the settlement of the dispute between the G.I.P. railway and its employees.

In their remarks on the report of the Court of Enquiry, the Government of India observe that they have found themselves obliged to vary the conclusions reached by the Court. And the grounds adduced are that, in the first place, the court felt precluded by the terms of reference from taking into account the capacity of the employer to pay; that from the nature of the case the court was not in a position to consider whether further negotiations between the parties could secure a clearer approach to agreement; secondly, that the Government have to consider the question not merely as it affects the G.I.P. Railway, with which

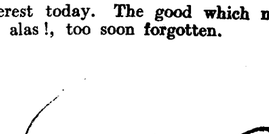
alone the court had to deal with, but as it affects all State railways. There is also the additional argument that the Government could not concur in the view that the level of wages selected by the court constituted an efficiency level representing the minimum necessary to maintain working capacity. It is in the light of these considerations that the Government of India have held that, instead of attempting to base the war allowance solely on economic analysis, it would be better to seek agreement through negotiations.

In the recent debate on this question in the Legislative Assembly, there was visible a notable cleavage of opinion. Though it was said in behalf of the European group that it was not quite opposed to the findings of the court, Mr. Miller had attempted to indicate the methods adopted by the court in certain instances. It would be surprising, indeed, if the testimony of an eminent Judge to the accuracy and reliability of a piece of evidence is found to be not well grounded. In fact, judging from tributes paid by the court to some of the witnesses who appeared before it, one has reason to feel that the whole enquiry and the arguments of both sides were made in the best atmosphere one could wish. The average layman could well understand the nature of the case when it is recalled that at one stage the court feel impelled to remark that "one of the results of the enquiry has been to show to us that the dispute between the two parties is of the rare kind in which both are in the right". Such an observation may smack of Sir Roger de Coverley. But when it comes from a judicial body in the matter of a trade dispute, there should be general appreciation of the spirit in which the case has been conducted not only by the judges, but by the parties, too. It is, therefore, somewhat inappropriate to impugn evidence. The doubts that have been cast on the Bombay index are also quite justified inasmuch as, admittedly, the changes in the figure for clothing have not been taken into account. It is not so uncommon in this country for statistics to be misleading or incomplete. "Figure for sugar was not available since—, and no suitable substitute has been found"—observations like this are quite common. And clothing takes so large a part of the total expenditure of working class households that this serious omission has necessarily to be made good. It is well however to note that Mr. Joshi's appeal for enlarging the class of employees eligible for dearness allowance has not gone in vain.

The importance of the report of Mr. Justice Rau and his colleagues lies in the breadth of outlook and the liberal sympathies with which they conducted the enquiry. It should suffice here to mention only some of them. The starting point is the general principles which should underlie any scheme of dearness allowance. The court quotes approvingly an article in the *Economist;* and the remarks deserve to be re-produced here:—

"Any attempt to raise all the wage rates in proportion to the rise in the cost of living must be self defeating. But there should be a second principle also; no one whose wages provide no margin over the cost of minimum subsistence must be pushed below that level by the rise in prices. These should be the limiting factors: on the one hand, no general adjustment to the cost of living; on the other hand, no refusal to help those already on the poverty line.



One (principle) that is of particular importance in the main strategy of the price problem is that wage increases should not come into play until the cost of living has risen above its minimum by more than a certain minimum number of points."

Another equally important principle which weighed with the court was that the subsistence level should be determined in relation to the cost of foods with essential nutrition. And the Court was careful to reject any argument which would have the result of driving back even the families which have improved that position slightly to the standards of 1921-22. The idea that improvement in standards since a particular period constitutes in itself an argument against the grant of dearness allowance has been scouted for good. The work of the Court was not an easy one. Not to speak of the difficulties of the index figures, in which the Chairman's attainments as a first rate mathematician should have been very serviceable, the existence of different zones, difference in scales of pay and the variety of relevant considerations must have made the work a highly exacting one. It is a matter for gratification that the Government of India have decided to compile on their own the statistics which are indispensable for such enquiries and to facilitate the work of future committees.

The death of Sir Dadiba Dalal has passed more or less unnoticed; and it only shows, how the present generation

does not remember the past. It is true that, for over two decades, Sir Dadiba had been very much of an extinct volcano. But in his heyday, his was an authority and compelling influence not only in Hornby Road but in the Indian financial world. There have been brokers and brokers; but the two men who established a tradition unique in itself were Sir Shapurji Barucha and Sir Dadiba Dalal. Of the two, Sir Shapurji was pre-eminent as the provider of Industrial finance, and Sir Dadiba was the dominant force in the money market. His firm, Merwanjee & Sons, has a proud record and illustrious tradition which have been handed down from generation to generation. He was a real specialist with all the important plans on his books so far as the exchange, money and bullion markets were concerned. They were the sole brokers to the old Bank of Bombay and the Bank of Bengal. It followed that they were brokers to almost every other bank. In the turnover of inter-bank accommodations, Merwanji's were easily the first. They were also brokers to the Bombay Corporation, the Bombay Improvement Trust and the Bombay Port Trust. And in the flotation of loans of public bodies they played a most important part. The giltedged market was swayed by their operations, and Finance Members used to consult Sir Dadiba Dalal in the planning of new loans. It was, therefore, the correct thing for the Government to appoint him as the Chairman of the Government Securities Rehabilitation Committee. His report did not do much to rehabilitate Government securities; all the same, it is noteworthy that the era of recovery started almost immediately on the conclusion of the labours of his Committee. But by far the *greatest* claim of Sir Dadiba to public recognition is the Minority Report which he wrote as a member of the Babington-Smith Committee. He was in a minority of one; but that did not daunt him. He demolished the 2s. recommendation of the majority and argued in favour of the 16d. ratio. He wrote a report which, to this day, remains classic as an exposition of the factors relevant to a study of the exchange value of the Rupee. Sir Dadiba mixed in circles, and had his clientele amongst people, to whom a bold stand in a minority of one against all the European colleagues, had been most unpalatable. In fact, he was the only Indian on the committee. That, in the circumstances he was placed, he expressed his views without fear or favour was a sign and symbol of his character and aggressive personality. He had, however, the satisfaction of seeing his colleagues confounded by the turn of events in the following twelve months. I was one of the friends who received him on his return from London after finishing his labours on the Babington-Smith Committee; and I can well remember the tumultuous welcome he received, such as one given to a Congress President. Yet, his death has caused only a mild ripple of interest today. The good which men do is, alas!, too soon forgotten.

(From Our Correspondent)

New Delhi, March 20.

A WEEKLY despatch cannot but deal with impending items of the legislative programme. The Tariff Board's recommendation in favour of further investigations at the end of a stipulated period has gone by the board. The status quokers now on top have their own remedy. Bills providing for the renewal of protection as regards the iron and steel industries, silver thread and wire, as also sugar have been introduced this week by the Commerce Member so as to continue the collection of the existing protective duties due to expire on March 31. It has been stated that the war introduces special difficulties in assessing the margin of protection desirable in such cases, because what is applicable under abnormal conditions may not be suited to a normal period. The renewal of the protection was not unexpected, but the Commerce Member's statement that a special committee is to supervise the working of protection in the case of sugar suggests that a new type of tariff commission is under consideration. It has always been regretted that the *ad hoc* enquiries resulted in delay, and the variance between Governments decision and the Tariff Board's views illustrated the point that a judicial authority whose views should not be put aside was essential for the further development of Indian industries.

The Commerce Member's statement is a sop to those who argue that Provincial Governments have messed up the sugar industry. The proposed committee clearly cannot provide remedies if the Central Government does not back its views and order the Provincial Governments about their business. No assurance has been forthcoming on this point, but the essential similarity of administration at the Centre and in the Provinces may create complete accord. The proposal to renew the life of duties levied under the Indian Tariff Act has been well received. Protection is to continue as regards wheat and wheat flour for a further period. It has been said that Government have watched the course of wheat prices and concluded that Indian wheat deserves protection. Protection is to run for a period of one year from March 31, this year.

Grants recommended by the new Board of Industrial and Scientific Research may result in a notable quickening of industrial progress. Provision has been made for work on fourteen schemes sponsored by university and other works. The schemes deal with the manufacture in Indian goods and apparatus of a diverse nature. The manufacture of radio sets is one of the schemes for which the assistance of the Government is now sought. A proposal to examine the possibilities of essential oil figures in the list of approved schemes and the extraction of sulphur from pyrites is due further investigation if the recommendation of the Board is approved.

The debate on the Finance Bill has been marked by greater anxiety over the political deadlock than in the reduced taxable capacity of the nation. The non-official critics of the tax proposals have not asked for the withdrawal of the proposals but for essential modifications. Sir H. P. Mody whose optimistic estimate of the probable yield of the Excess Profits Tax makes him a reluctant approver of the higher surcharge outlined two important suggestions. He asked for a higher duty on rayon goods imported into India and for also a reduction in the additional excise on matches. He gave sound reasons for the modification of the Finance Member's proposals, and there is a likelihood of one or both being accepted. The very wide field over which critics of Government are allowed to range during the discussion, spoils the effect. The time limit does not stop irrepressible members, and the malcontents resort to unusual methods to gain the ear of the House. Borrowing was approved by the leading representatives of Indian business. But the members do not appear to have taken the cue from the Federation of Indian Chambers. It is very doubtful if the committee's statement on the Budget proposals will gain consideration. Sir Ziauddin showed again that the anti-protectionist bee is buzzing very loudly in his bonnet. Excise in order to keep prices under control were advocated by the Doctor. Sir Jeremy Raisman's views on the higher taxable capacity of the country received unexpected support from Dr. Ziauddin who said that wartime expenditure must increase the national income. The European Group's representatives made brief but valuable contributions and Sir Federick James on the political situation or Mr. J. D. Boyle on the proposed increase in the import duty on rayon yarn held the attention of the House in a remarkable way. But the discussion was not always interesting and members drifted out of the House in such a way that the deficiency for a quorum attracted attention more than once.

The most important speech of the week was certainly that of the Commerce Member. His long speech dealt with postwar fiscal policy, industrial location and the creation of key industries to remove existing deficiencies. The advisory committee on sugar to make proposals with reference to the working of protection was referred to in the same speech. Periodical analysis of the working of protection has been promised by the Commerce Member so that the tariff is adjusted as need arises. This variable arrangement will be preferable to the tedious and always belated enquiries ordered by the Commerce Department. Assembly circles assume that the Commerce Member has developed original views and Indian industrialists should be glad that a reference to their responsibilities was accompanied by a mention of Government's duty to assist them. The Elders who have debated defence expenditure with an air of slight bewilderment did not get much satisfaction out of the Government. The Commander-in-Chief who has been busy arranging an exhibition of war weapons was not the one who held the stage this time. Non-official critics of expenditure and administration took up the time of the Elders. The only revelation made was that no decision had been reached as yet with reference to the proposals to vast appellate jurisdiction in the Federal Court. Mr. Conran Smith declined to give any promise about what would be done but told the Council of State that its views would be ascertained.

The capital has not shown its hand as regards the Bombay Conference. There is no disposition to exaggerate its importance because the resolution is not likely to win over either the Congress or the League immediately. The long resolution may be endorsed by the invited absentees but the League sticks to the Pakistan scheme and the League representatives in the Assembly have frankly poohpoohed the idea of a negotiated settlement. The demand for control over defence is not likely to win support because the Army may regard the demand as excessive. Responsiveness may not go far enough. If the Government of India cannot get beyond August 8 the conference is just another futile endeavour to create a unity platform. The leaders have not got further than Mr. Amery with his India First slogan. It is believed that Whitehall should first analyse and consider the resolution of the 32 leaders because the Viceroy on the eve of his departure is hardly in a position to shape policy on new lines. The idea of deputing somebody from New Delhi to go and tell Colonel Amery what is wanted is treated as subtle flattery and nothing more. If the British Government is wholly occupied with winning the war, it is surprising that nothing is done to enlist India's total aid. Even passive defence will call for special co-operation and as ministries are lacking in seven provinces the need for getting public support is always there. Stories of Indian troops' valour are tacitly ignored and the exhibition of a lucky trio is not at all going to produce an effect.

The soil survey which has been ordered by the I.C.A.A. will give effect to a scheme long under consideration. Part of the data is already available and further investigation will enable the Agricultural Departments to lay out their own programmes on the basis of information made available.

Bombay, March 20.

Now in the middle of the War Week, one does not feel like writing anything that does not relate to the war or the funds connected with it. The Gifts Fund has been growing far too slowly and some ask questions why Bombay's response is not so good as that of Madras. Sir Homi Mody's appeal for additional contributions refers to the ideal of a single squadron donated by Bombay for the Indian Airforce. A sum of Rs. 30 lakhs was needed for the purpose, but the Committee realise that the battle for India's security is being fought elsewhere and the Bombay Committee want donations for a squadron to be given to the R.A.F. As £65,000 has been sent already to the British Ministry of aircraft production, only £35,000 more is needed. Additional contributions will be utisised for providing armoured carriers for the Indian Army. Bombay believes that mechanisation gives results. The African victories have been won through superiority in armoured vehicles. Armoured vehicles are being made in India. They have proved effective on active service. The average cost of each has been given as Rs. 11,000 and donors have been told that the Army will get full value for their money. It has been announced that total donations to the Fund till now amount to Rs. 44 lakhs, but the Committee want more money as the end of the war is not in sight.

At the last meeting of the Tapti Valley Railway Company, the Chairman said that the managing agents had addressed a letter asking whether the Government would enter into a fresh contract for a further period, but on slightly different terms. No reply had been received according to Mr. Lowndes. He said that, if Government gave effect to the decision to take over the line, the shareholders would get about Rs. 630 for every fully paid-up share of Rs. 500. Reviewing the year's results, Mr. Lowndes referred to the improvement in railway revenue along-side of the general improvement in business. Total receipts were up by Rs. 360,591, but part of this was absorbed by higher taxation which took an additional sum of Rs. 196,486. He added that profits in the current year would be reduced by a draft of Rs. 44,716 entailed by the higher taxation imposed. The dividend of 8 per cent plus the one per cent bonus was approved. The report of the meeting provides one with an opportunity to discuss the chances of investors. In view of the policy of State purchase and management, investors in railway companies are not very happy. The contracts due to expire much later are giving anxiety. Many should have noted that Ahmedabad Prantej shares once hailed as the safest share to hold, have been falling steadily. It is all due to the statement that, the B.B.C.I. line having been taken over, the Government was sure to take over the line in a few years. The break-up value of the shares was precisely estimated and the quotation started to fall as soon as the Chairman had made known the difference between the probable compensation payable for each share and the previous quotation for the shares. Naturally all railway shares have been affected and questions are being asked about the validity of the premium paid for Upper Sind Railway shares. There is now a disposition to avoid all shares that are not standing around their paid-up value. High dividends do not mean much because contracts will not be renewed. But there is a chance that minor lines will not be taken over, if the Government thinks that the option on the B. & N. W. railway need not be exercised. During the Budget debates, members asked for an assurance concerning the purchase of the line which along with the R and K Railway serves the most populous and developed districts of Upper India. The Railway Member has not committed himself to any statement about the purchase, but the Legislature may ask for specific performance. Indian railway stocks have been bought in London owing to the scarcity of scrip, but the company concerned is not at all sure of getting the contract renewed as the B.B. & C.I. has been bought.

The foundation stone for the University's new department of Chemical Technology was laid on Monday. The Governor came to perform the formal ceremony and Mr. R. P. Masani referred to the services of the department now over seven years old. Sir Roger Lumley, too, referred to the collaboration with private industrialists. Both as regards training of men for the higher posts and for essential research, the department has shown its value. The University has been praised for its research work and a recent survey of wartime opportunities has revealed that the university can do more by concentrating on chemical research. What has been done since 1934 is an earnest of what is to come. The Andhra University toyed with technology, but Bombay with its mill industry has taken advantage of the research department. Studies have not suffered and students have been successful in getting worthwhile jobs and showing their value to businessmen. Practical training for students and practical schemes of research have distinguished the Bombay University's department. That is why leading business houses have co-operated willingly in developing the Department. The Director has been enthusiastic about the ways in which work can be broadened immediately. And he has never omitted to mention that chemisty comes first in all schemes of industrial research.

The scrap-salvage scheme has caught on amazingly. Waste paper was never in such keen demnd. The war fund people have stepped in with a rallying cry and there has been wide support for the scheme to take off the owners' hands all old journals and magazines. It has been computed that 200 tons of waste paper can be had from the city every month and readers have been asked to save their copies for the three scrap depots opened under the auspicies of the War Fund Committee. Three more are to be opened and the six should turn in a tidy contribution for the next month.

The Bombay Cotton market has suddenly firmed up. The stock exchange may be partly responsible for this but the improvement may be due to the steady improvement reported from the piecegoods market. Prices have been rising in an encouraging fashion though clearances are not large. Imported goods are in demand owing to the scarcity and Japanese goods are sought in view of the fear that future supplies may be affected. Offers are all at higher rates and there is now no fear of undercutting of local goods. Both gray and bleached goods of local origin are encountering ready purchasers and the broadening of demand is already reflected in prices. Reports from Lancashire as to the higher prices paid by customers following curtailed activity have naturally stimulated interest in fancies which are taken off the market readily though voiles are slow.

In view of the statements in the press it is surprising that few attempts have been made to cultivate the Dutch Indies. There is assuredly an opening for Indian textiles in the Dutch colonies and if Indian mills profit by connections with Malaya surely, they can do so in the Indies.

A Resume of Commodity Markets

THANKS to the sharp rise in prices in the Bombay raw cotton market a generally better feeling has been noticeable in the several commodity markets during the week. Only during the last two days a reactionary tendency has been in evidence and closing levels are below the highest levels for the week. In every market, prices are, however, substantially above the levels at the end of last week.

The sudden change in the tone of the markets has been mainly due to the squeeze in the raw cotton market. In the first two days of the week Broach April/May recorded a rise of nearly forty points. The higher American advices and heavy mill buying brought about the substantial increase in values.

The announcement of an order for 37 million sandbags and 42 lakhs yards hessian also led to good buying in the jute manufactures market. The definite shortage of ready goods and hopes regarding the freight position becoming easier were mainly responsible for the increase in buying from the bazar and overseas countries. At one stage, however, mills found it advantageous to sell for the farther positions. The withdrawal of Bombay operators from the market and selling by mills naturally caused a recession in prices.

The jute market improved with hessian and cotton but the higher levels could not be maintained and nearly half the gains have been lost. The wheat market has recorded a welcome recovery. While there is some selling for old crop positions new crop is well held and the tone is steadier. Bullion markets have been absolutely uninteresting and there has not been any important change in prices. With a favourable forecast, linseed prices also have been marked higher.

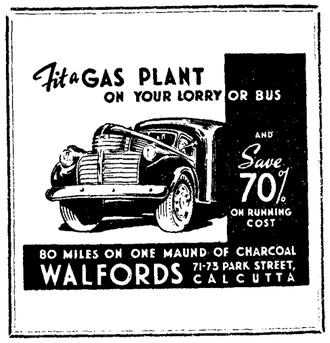
The sharp rebound in prices in several markets early this week only serves as a reminder that the position is not without possibilities. The better grade raw cottons are assured of a market on account of the intensification of the production of indigenous mills. As for other commodities everything is dependent on the freight situation and the mere hopes of the possibility of an improvement in the situation have been enough to push up prices.

Jute

The improvement in the raw jute market is only in sympathy with the jute manufactures market. Mills also have been more liberal in estimating their requirements. From Rs. 36 at the end of last week there was a rise to Rs. 40 on Wednesday but there has since been a reaction to Rs. 38-4. It was generally anticipated that mills would choose to work 45 hours per week throughout the month from April onwards. The decision, however, applies only to one month. If there is not going to be any large increase in mill consumption even with war orders, the recent orders are not so much a bullish factor for the jute market as for the jute manufactures market. The conservative attitude of the jute mills regarding the policy of regulating production will be evident from the fact that the Government of India experienced some difficulty in ensuring early delivery as mills were not willing to increase production unduly. Which means, mills are not inclined to view the freight situation optimistically. The intensification of the U-boat campaign also does not warrant any extravagant hopes in this regard.

Jute Manufactures :

The new orders for 37 million sandbags and 42 lakhs 7½ oz. hessian resulted in a rise in the price of 9 Porters ready to as high as Rs. 16-12. There was a reaction to Rs. 15-12 and the quotation is now around Rs. 15-15. The demand for near positions will be evident from the sharp rise in the quotations for May/June.



Evidence of the difficult freight position is provided by the sharp decline in stocks afloat in the American figures of stock and consumption for the month of February, 1941. At the same time it is satisfactory to note that consumption has recorded a rise and that on the basis of the present consumption, stocks are not enough for more than four months. Consumption during the last month was 60 million yards against 57 million yards for the previous month and 52 million yards for the corresponding month last year.

Cotton :

The persistent bear selling in earlier weeks created an oversold position in the market. The large buying by mills and the higher U.S. advices created a squeeze in the market and Broach April/May were done as high as Rs. 240. Even after the sharp rise in prices the reaction has not been pronounced. The scarcity of contracts has been so acute that it has been even considered advisable to tender new crop against April/May. It has been pointed out in these columns on more than one occasion that the scarcity of staple cottons would be felt as the season advances and that a rise in prices would be inevitable as the season of heavy arrivals was over. Arrivals into Bombay of Broach crop during recent weeks has been disappointingly small. As for short staples, it is reported that Government are advising mills to make greater use of these cottons in their manufactures. Already, considerable use has been made of these varieties in coarse manufactures.

Reference was made last week to the necessity for closing down the Liverpool futures market in view of the rationing of cotton in the United Kingdom. It is now reported that the Liverpool market is to be closed for futures transactions and that contracts will be adjusted on the basis of the rates prevailing on the last day of the month. The Government has formed a new company and stocks of cotton will be purchased by this company.

(From Our Jute Correspondent)

Calcutta, Mar. 20.

BEFORE he left for England, Professor Todd, who has submitted a report to the Government of Bengal on the reconstitution of the Jute Futures market, prepared a short monograph on "The Use of Futures in the Jute Trade", which merits careful study by all sections of the trade. The final paragraph is peculiarly apposite at the moment and in the present circumstances of the market. Professor Todd writes that it is his conviction that the greatest benefit of the Futures system to the Jute trade as a whole would be that it would enable the Mills gradually to release themselves from the hold which the Bazar has gained over them. The facility of selling forward to the Bazar and so relieving Mills of the necessity to seek for markets for their goods has been bought at a high price, viz., the atrophy of their selling system, and it is arguable that a proper selling system would in the long run have cost less and been more satisfactory. Professor Todd concludes with the warning that Jute is no longer a monopoly and under stress of competition the industry may well find it necessary to adopt changed methods. These comments are particularly apt today when Mills are again deliberately filling up the Bazar with forward goods, oblivious, or certainly regardless, of the muddles in which they have landed themselves repeatedly in the past—and the not very distant past—by the selfsame policy. The Latin tag has it that *experientia docet stultos*, but the Mills are no fools, for it would appear that experience teaches them nothing.

Fortunately the present movement has not proceeded very far before it has received a check, but the position a day or two ago looked definitely unhealthy and the rake's progress seemed to be well started. Fantastic levels were being reached for ready goods, not for ready *shipment*, there might have been some sense in that, but merely to be put in godowns in the hope that they would be shipped sometime soon. And these fantastic prices were quite enough encouragement for the volatile Bazar operators to continue paying advancing rates in the forward positions and to venture more than a year forward in their purchases. Apart from the fact that overseas buyers were being held to ransom for near goods at a time when the raw material had registered no appreciable rise and was still being freely offered at minimum prices, a situation which in present circumstances does not redound to the credit of the industry, it is probably not appreciated by those not in close contact with the trade that it was Bazar speculators, and only in a very minor degree the Mills, who were benefitting by the fantastic prices. But any stigma will attach to the Mills though they are only partially to blame, and it would seem desirable that some method of greater elasticity might be devised in regard to working hours which would prevent a repetition of the "ramp" engineered in the early part of this week. A larger reserve of stock might be sufficient to act as a stabiliser to the market, or even a warning from the Mills Committee that any undue price inflation would be countered by an increase in working hours. For it must be remembered that while any reduction of working hours must be notified a month in advance, an increase in working hours can be put into operation at once.

With regard to the 37 million Sandbag order which was placed recently for April/June delivery, and which was used by the Bazar as an additional Bull factor, it ought to be realised that most Mills have kept a quota of looms on Sandbags, the production of which looms is not reckoned into their selling policy, but reserved for Sandbag orders.

U.S.A. Hessian Stocks at the end of February were cabled as 215 million yards, practically the same as February last year, but a reduction of 540 lakhs yards from last month. This drop was entirely in afloat goods—freight shortage again. Consumption was reported as 600 lakhs yards as compared with 570 lakhs last month and 520 lakhs in February of last year, altogether quite a satisfactory position, except in regard to freight. That there may be some chance of America providing her own freight to lift exports from India is suggested by a cable which has come from New York asking for details of the quantity of raw Jute awaiting shipment to the Atlantic seaboard and to Gulf ports.

There has been a little more interest evinced in the Export Jute market both for America and the U. K. Short Group Dundee Tossa is reported done at Rs. 62, Short Group Daisee at Rs. 43-8 and Ordinary Dundee Daisee at Rs. 36 and Rs. 37 all for April shipment. Mills have taken a moderate quantity of Firsts and Lightnings at Rs. 41 and Rs. 36 respectively, also Dundee Daisee asstmt. at Rs. 36 and Outport Tossa at Rs. 37. Mixing Cuttings have sold at Rs. 13 and Tossa Cuttings at Rs. 12-8. The Futures market has faithfully followed the Fabrics market in its gyrations without any regard to the movements, or lack of movement, in the raw material side. From Rs. 36-12 a steady rise was registered with only minor fluctuations till Rs. 40-2 was touched at the peak, but when the crack came there was an immediate drop of Rs. 2 to Rs. 38-4 and the market closes quiet at around Rs. 38. In Loose jute a moderate interest has been shown and slight advances were recorded in Supervised Jat at Rs. 8-12 and Rs. 6-12 Middles and Bottoms, 50/50 assortment. Previous to that Rs. 7-12 and Rs. 6 had been paid again for Indian District Tossa and Rs. 6-8 to Rs. 6-12 for Supervised and European Tossa Bottoms. At the close there are still plenty of sellers at minimum rates. The higher Fatka quotations were reflected in the Mofussil by greater reserve on the part of Sellers, but with the best part of half the crop still to be marketed this is scarcely likely to be maintained if Buyers hold off. There has been some rain in the districts but scarcely enough yet to permit sowings to be started. Arrivals of Jute for the first half of March are estimated at 3,18,000 B/s as against 1,94,000 last year Total arrivals from 1st July to 15th March now stand at 69,62,000 B/s against 90,43,000 B/s for the same period last season.

It has been a very active week in the Fabrics section and Mills have met the demand freely and a large turnover has resulted. Renewed enquiry for early shipment goods, mainly hessian descriptions, brought out strong demand from Bazar speculators for all positions up to June next year. Among the sales recorded are, in 9 porters, Rs. 16 to Rs. 16-13 March, Rs. 16 March/June and May/June, Rs. 15 July/Sep. Rs. 15 to Rs. 13-12 Oct/Der. Rs. 12-8 Jan/March and Rs. 11-12 April/June 1942. In eleven porters, Rs. 21-8 to Rs. 22-4 March, Rs. 21-8 April, Rs. 20 May/June, Rs. 18 to Rs. 18-8 July/Sep., Rs. 17 to Rs. 17-4 Oct/Dec, Rs. 16 to Rs. 16-8 Jan/March, and Rs. 15-12 April/June 1942. Heavy Goods shared in the turnover and Sacks sold at Rs 37 April, Rs. 36 May/June, Rs. 34-8 to Rs. 35-8 July/Sep, and Rs. 33-8 Oct/Dec. Liverpools at Rs. 37 Oct/Dec. "B" Twills at Rs. 35 April/June and Rs. 35-4 April/May. Heavy Cees at Rs. 33-8 to Rs. 35 April, at Rs. 34 to Rs. 34-8 May/June, at Rs. 33-8 July/Sep, and at Rs. 33 Oct/Dec. 6×8 Sugars fetched Rs. 40-8 June and Woolpacks Rs. 1-10 and Rs. 1-10-8 for the same position. Prices have been marked back sharply at the close in all descriptions, Hessians more particularly. Closing quotations on an inactive market are :—

	March	April	May June	July Sep.	Oct. Dec.
	Rs. A.	Rs. A.	Rs. A.	Rs. A.	Rs. A.
9 porters	16 0	15 14	15 10	14 8	13 8
11 porters	21 2	20 8	19 8	17 14	16 14
"B" Twills	34 14	34 12	34 12	33 10	33 0
Cornsacks	38 0	37 0	35 12	34 12	33 8
Liverpools	41 8	40 8	39 0	38 0	37 0

JUTE

Calcutta, March 20.

The sharp rise in values in the jute manufactures market with the greater demand for goods and the placing of new orders resulted in a substantial rise in prices in the jute futures market. It was only last Friday that a new order for 1 crore yards sacking and 12 lakhs yards 7½ oz. hessian was placed. The placing of two orders in quick succession and the resumption of buying by mills were responsible for the improved tone in the several sections. It is generally believed that special facilities will be made available for the mills to export their goods. The strength of the raw cotton market had an encouraging influence. There were reports that Bombay operators were buying jute and jute manufactures. The higher levels, however, have not been well held, though closing prices are substantially higher on balance. The undertone is quiet to-day.

Reports from the mofussil regarding the progress of sowings are rather encouraging for the market. Owing to the unfavourable conditions at this time of the year, sowings have proceeded slowly. Government are also carrying on intensive propaganda asking ryots to conform to the Government's policy of regulation.

In the loose jute section, a fair amount of business has been done with mills. 'Supervised' Middles District Tossa Bottoms were done at Rs. 8-6 and Rs. 6-10 per maund respectively. Supervised Middles and Bottoms 50/50 assortment were done at Rs. 8-12 and Rs. 6-12 per maund respectively.

There has been greater activity in the pucca bales section with balers reporting a fair amount of business with mills. Some business was also reported with shippers. Dundee Daisee 2/3 were done at Rs. 37 per bale for April shipment. Mills are reported to have brought Marwari T.C.'s at Rs. 12-8 per bake. Firsts and Lightnings were done at Rs. 41 and Rs. 36 per bale, Outport Tossa ⅔ at Rs. 36 per bale and Dundee Daisee 2/3 at Rs. 36 per cale.

In the futures market, there was a rise in the quotation from Rs. 36 per bale to Rs. 40 per bale early this week, but selling at the higher levels has brought down the quotation at the time of writing to Rs. 38-4. The undertone is quiet.

JUTE MANUFACTURES

Calcutta, March 20.

There has been a further sharp rise in prices in the jute manufactures market this week. The announcement of the order for 37 million sandbags to be delivered in three monthly instalments and another order for 42 lakhs yards 7½ oz. hessian have been mainly responsible for the improvement in sentiment. The sharp rise in prices for cotton led to sympathetic buying in the local market and new high levels were touched yesterday. At the higher levels, however, mills turned sellers and quotations are much below the highest levels for the week. 9 Porters ready are now quoting Rs. 15-14, April Rs. 15-12, May/June Rs. 15-9, July/September Rs. 14-7 and October/December Rs. 13-7. 11 Porters ready are Rs. 21-4, April Rs. 20-10, May/June Rs. 19-8, July/September Rs. 18 and October/December Rs. 17.

In the heavy goods section also easier conditions have been noticeable towards the close with B Twills for April shipment sold on the basis of Rs. 35, Liverpool Twills Rs. 41 and Cornsacks Rs. 37.

The sharp spurt in prices during the week for 9 Porters Ready, from Rs. 14-10 at the time of last writing to Rs. 16-12 yesterday, was mainly due to the inability of mills to sell for near positions. But, as there was a good premium for the near positions and there was a tendency to buy the farther positions, mills took advantage of the occasion and sold heavily. The closing tone in consequence is slightly easier.

The American stock and consumption figures for the month of February are encouraging. Consumption is higher at 60 million yards against 57 million yards last month and 52 million yards for the corresponding month last year. This improvement in consumption and a sharp decline in stocks, both spot and afloat, had an encouraging effect on the market. Stocks spot are sharply lower at 83 million yards from 149 million yards in the previous month, while stocks float are at 74 million yards against 102 million yards.

MONTHLY STATEMENT OF JUTE

For the eight months ending 28th Feb. 1940

	July/ Feb. 1941	July/ Feb. 1940	July/ Feb. 1939	July/ Feb. 1938
	Bales	Bales	Bales	Bales
Estimated Stock in Calcutta on 1st July, carried over from previous crop.	3,50,000	1,50,000	4,50,000	3,50,000
Calcutta Imports	65,38,000	86,76,000	76,86,000	75,69,000
	68,88,000	88,26,000	81,36,000	79,19,000
Less transferred locally	Nil	Nil	Nil	3,000
	68,88,000	88,26,000	81,36,000	79,19,000
Exported from Chittagong	** 1,85,000	1,14,000	1,73,000	
	** 89,61,000	82,80,000	80,89,000

Received by mills	** 61,34,000	49,07,000	46,86,000	
	** 89,61,000	82,80,000	80,89,000	
Government Forecast	125,62,000	97,50,000*	68,44,000*	86,81,000*
Received	** 88,11,000	78,30,000	77,39,000	
Balance to come forward	** 9,39,000*	9,86,000*	9,44,000*	

Calculated at 82⅔ lbs. to the maund and 405 lbs. to the bale.

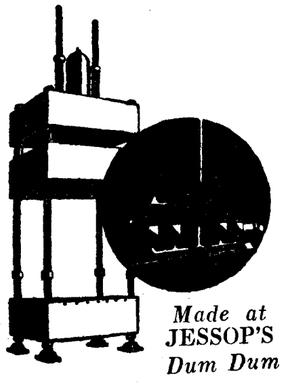
*Revised

**These figures can no longer be calculated as Government have ceased to issue their monthly Export Return for Jute shipped from both Calcutta and Chittagong.

COTTON

Calcutta, March 20.

There has been a sensational rise in prices in the Bombay raw cotton market during the past week. Heavy bear covering and mill buying have pushed up prices to very high levels. There was a regular squeeze. During the last two days, Oomras and Bengals have been practically neglected. The healthy position for the basic staple varieties has been pointed out in these columns on more than one occasion. It was not surprising, therefore, that with the sharp upturn in the American cotton exchanges and the scarcity of Broach contracts bulls gained the upperhand and the highest levels were touched yesterday. After being higher at Rs. 240 Broach April/May are now quoting Rs. 234. The quotation at the end of last week was Rs. 197-8. Broach July/August were Rs. 230 against Rs. 200-8, Oomra March Rs. 168-8 against Rs. 158-12, May Rs. 169-12 against Rs. 160, Bengal March Rs. 135 against Rs. 125-14 and May Rs. 134 against Rs. 125-12.



Overseas markets have been active. The provisions of the Bankhead Bill have had an encouraging influence. Also, the persistent reports regarding the possibility of restriction in the crop and the decision of the Administration to spend $100 millions on cotton exports to Britain have had an encouraging influence. In New York, March closed at 10.82 cents and May at 10.83 cents against 10.78 cents and 10.77 cents respectively last week. In Liverpool a bullish feeling has been noticeable owing to the shortage of cotton supplies. It has been decided to close the Liverpool market and buy up the stocks of cotton in the country. A government company has been floated for the purpose. In Liverpool, American March were 8.71d. against 8.47d. and May 8.72d. against 8.52d.

PIECEGOODS

Calcutta, March 20.

The strength of raw cotton and the encouraging reports from mofussil centres have resulted in a greater volume of business in the piecegoods market during the week. Bazar values are higher all round. At the same time, replacement costs are also higher. Buyers have not been much inclined to operate at the present levels, but the competitive prices for indigenous goods and the certainty regarding delivery have been mainly responsible for the bulk of the turnover in indigenous goods. Business in the Japanese goods section has been rather restricted and confined only to bare necessities. Forward contracts have been on a very small-scale and dealers are not inclined to enter into any forward contracts owing to the uncertainty regarding the situation in the Far East. In the Lancashire goods section, there is little business of importance.

Better advices from consuming centres and the firmer tone of the cloth market have resulted in a rise in prices in the yarn market also. Buyers have been active and more liberal in the matter of estimating their forward requirements. South Indian Mills have again accounted for the bulk of the turnover and business has been mostly confined to medium and coarser kinds.

MADRAS GROUNDNUTS

Madras, March 18, 1941.

The local Groundnut market improved steadily during the week and closed firm. The Ministry of Food is reported to have ordered for about 6,000 tons from Marmagoa and from Madras at £10 less 20 sh. and 30 sh. respectively being the usual contribution. Shippers were fairly active during the week. Opening around Rs. 21 to Rs. 21-2 for Machined (Per candy of 531 lbs. ex-coast godowns), shippers' buying limits advanced steadily to Rs. 21-4 and Rs. 21-8 on Thursday, to Rs. 21-12 and Rs. 22-4 yesterday and to Rs. 22-4 this morning. Local buyers were again actively purchasing during the week, and their buying limits advanced from Rs. 20 at the beginning of the week to Rs. 20-8 and Rs. 20-12 at the close, for Machined kernels, per candy of 531 lbs. ex-Madras harbour godowns. It is reported that Rangoon buyers were again buying during the week, their purchases amounting to nearly 2,000 bags. Buyers on account of Singapore and Hongkong were also canvassing business in Madras. There is good demand for Indian groundnuts not only from Burma but from the Straits and Hongkong, and buying activity is only limited by the shipping opportunity available. It is understood that whilst a fair proportion of the crop in the southern districts has been marketed, free arrivals in the Ceded districts are reported and fair buying by shippers. The groundnut oil market ruled strong during the week.

MADRAS HIDES AND SKINS

Madras, March 18, 1941.

The latest available news from Britain reports that the stoppage of shipments in February was causing much concern to the Curriers. These users of Kip leather were doing all they possibly can through the Controller to get better shipping facilities for the Madras trade. It was impossible to influence the Ministry of shipping regarding the quota of Tanned hides and skins which is allowed to be shipped from Madras. Something in the nature of a quota has been necessary, so that the fullest advantage may be taken of the available shipping space. Despite the fact that Curriers in England were somewhat disturbed at the small quantities of Madras Kips shipped per month, there is no possibility of a revision of the quota or permission to ship non-priority goods from Madras. Shipments during the month of January amounted to only 3,500 bales, and no shipments have since been possible. Buyers in Britain were prepared to buy practically all weights and grades of Tanned hides, but it does not appear to be much use purchasing these, unless the goods can be shipped within a reasonable time. The outlook for shipments during the current month is still obscure. News reached Madras in the middle of the week from the Director of Leather Manufactures at New Delhi that no shipments of non-priority goods from Madras will be allowed at present. Even the possibility of clearing the quantity of goods allowed to be shipped in March is discounted in some circles, in the face of the advice received during the latter part of the week that rough tanned leather from Madras and down coast ports to the U.K. for supply items were to be given secondary priority and that unshipped February and March requirements will be given priority in April. It is, nevertheless, hoped that at least a portion of the quantity permitted in March will be shipped by the end of the current month. A deputation from the Southern India Skin and Hides Association left for New Delhi yesterday morning to interview the Honourable the Commerce Member with the Government of India and seek redress of the grievances of the Madras Kip trade.

(*Continued from page 538*)

The Council's resolution is based on the success of preliminary investigations and the new survey will be guided mainly by a desire to increase agricultural production by preserving the qualities of the soil and preventing deterioration.

Relations with Ceylon and Burma are still the subject of discussion in political circles. The trade treaty is not any nearer after the meetings of the non-official advisers. But the latter know their own mind and the Government has been informed what Indian opinion would like in case the Burmese put up their own terms. The Emigration Committee backs the Government in standing up to the Ceylon State Council but retaliatory action is hardly under contemplation in view of the Ceylon Governor's warning to the Board of Ministers. Changes in the procedure of alloting space to shippers are forecast in view of representations that the Shipping Controller's decisions operate unequally as between port and port. Economy of time and space is not procured by centralised control, and commercial interests recently made representations. It has been explained that U.K. requirements override all considerations but arrangements have been made to increase the number of steamers plying to Burma from Madras. Relaxation of rules in regard to mica exports proves that export control is not always harsh, and if India is allowed to sell wheat, it will be one more useful point for those who argue that control benefits the export trade.

Stock Markets to-day and to-morrow

MACNEILL COAL GROUP DIVIDENDS

EARLY this week there were signs of a boomlet in several markets. The technical squeeze in the Bombay raw cotton market and the announcement of new war orders for jute mills had a stimulating effect. Bombay operators gave the lead and Tata deferreds touched a new high level of Rs, 2,080. Mill shares also improved. Operators on the Calcutta Stock Exchange, however, were not inclined to adopt a bullish view and there was only a small rise in prices. With the strength of the jute manufactures market Indian Irons recorded a rise to Rs. 33-6. As the improvement in prices in the jute manufactures market was overdone buyers withdrew from the market and mill selling only served to depress prices. The relapse in prices on Friday has caused a recession in the quotation for Indian Irons to Rs. 31-10. The undertone is quiet in all the sections towards the close on Friday.

* * *

While the Calcutta Stock Exchange has been rather hesitant there has been no suggestion of weakness in any of the markets in Bombay.

* * *

The dividends of the Macneill group of coal companies for the half-year ended December, 1940 have been announced. With the exception of the Dhemo Main Collieries, Limited they have been maintained at previous levels in all cases. The decision of the directors of the Dhemo Main Collieries, Limited to recommend a dividend of only four annas against eight annas per share previously has come as a disappointment to market circles. There has been a drop in the quotation for the shares from Rs. 15 to Rs. 13. There is also some disatisfaction with the dividend of the Equitable Coal Company, Limited as with the amalgamation of the Aldih Coal Company, Limited it was generally expected that a higher dividend would be paid.

* * *

The results of the Gillanders group of tea companies do not suggest that the earnings of tea companies have been unduly affected by the increase in costs. In fact, costs of production in 1940 in several cases in this group are lower than those for 1939. However, all the companies have not been able to increase the dividends for 1940. While four companies, out of the total of seven, have been able to increase the dividend distribution the same has been reduced in the case of two. Only one company has maintained the dividend at the level of 1939.

The aggregate profit for the group after providing for taxation for the twelve months ended 1940 is Rs. 5,21,622 against Rs. 5,06,494 for the previous year. The sharp rise in earnings of the Betjan and Gairkhata Tea companies has more than offset the decrease in earnings of Jutlibari, Lackatoorah and Tengpani.

* * *

Outstanding among the group are the results of the *Gairkhata Tea Company, Limited*. The net profit, before providing for taxation, for 1940 is Rs. 1,33,013 against Rs. 95,671 for 1939. The amount set aside to depreciation is Rs. 7,860 (Rs. 7,622) while the dividend is higher at 20 per cent. against 15 per cent. The amount carried forward is considerably higher at Rs. 68,462 against Rs. 43,490 brought in.

The Betjan Tea Company, Limited for for the same period reports a net profit after providing for taxation of Rs. 84,558 against Rs. 68,880 for 1939. The dividend has been increased from 20 to 25 per cent.

* * *

The total amount involved in the purchases of the Bombay, Bengal and Madras Telephone Companies is Rs. 4.75 crores. This represents the purchase price of shares discounted at 3½ per cent. and the average estimates of profits of companies up to 1943. Another sum of Rs. 75 lakhs is payable to debenture holders of the Bombay Telephone Company, Limited.

The purchase prices of the shares in the case of the several companies are as follows:—

		Rs.	A.	P.
Bombay Telephone	...	89	15	0
Bengal Telephone	...	18	8	0
Madras Telephone	...	15	8	0

These prices are subject to the deduction of every dividend (final and interim) declared payable after the 31st January, 1941, and do not bear interest. The directors of the companies concerned have, therefore, decided not to recommend the payment of any further dividend pending the disposal of the offer.

Four months are allowed to shareholders of the companies to accept the offer. The purchase prices for the ordinary shares of the three companies are favourable to the shareholders of the Bengal Telephone Corporation, Limited and the Bombay Telephone Company, Limited. This is due to the gearing of the capital of these two companies, the former having a debenture capital of Rs. 75 lakhs and the latter a preference capital of Rs. 30,00,000. Since the announcement of the offer the ordinary shares of the Bengal Telephone Corporation, Limited have improved to Rs. 18-12.

* * *

Commenting on the results of the *Alexandra Jute Mills Company, Limited* for the half-year ended June, 1940 it was pointed out that it would be possible to wipe off completely the arrears of dividend on the preference shares out of the earnings for the six months ended December, 1940. The preference shares were then quoting Rs. 116 cum-dividend. They have since then appreciated to Rs. 135-8.

The accounts for the latter half of 1940 just now to hand reveal that the company has been able to earn a net profit, before providing for taxation, of Rs. 2,25,126 against Rs. 3,38,188 for the previous half-year. After providing the sum of Rs. 1,00,000 against Rs. 1,60,000 for taxation the arrears of dividend for three half-years and the dividend for the last half-year are to be paid. At Rs. 135-8 cum-dividend the shares should be considered rather cheap as the return works out to more than 5.8 per cent, tax-free. The yield usually available on first class preference shares is only 4.5 per cent. There is, therefore, further scope for appreciation.

* * *

A commentary on War finance forms the appropriate introduction to the latest edition of the *Investors India Year Book*. The appearance of rivals merely serves to reveal the merits of the oldest publication, and it is well to emphasise that the familiar features which have gained for the Year, book its reputation are retained. The recovery in Giltedged towards the end of 1940 is taken as a mark of renewed confi-

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, March 21.

STRANGELY enough, the Calcutta Stock Exchange has not reacted favourably to the developments early in the week. Only a slightly steadier feeling was noticeable in the several sections in sympathy with the strength of the jute manufactures market, the raw cotton market and the Bombay Stock Exchange. There was some enquiry for jute shares and prices were marked higher on the announcement of new orders for sandbags. Indian Irons and Steel Corporations were higher on speculative buying but there has not been at any time any broadening of interest such has been the case in the Bombay market. During the course of to-day rather weak conditions have been noticeable and Indian Irons have been marked lower at Rs. 32 on the rumours that the directors might decide to pass the interim dividend for the year 1940-41. The undertone is rather subdued. It should be pointed, however, that caution has been overdone and that if the Bombay market continues to move upward an improvement in prices in the local market will be inevitable.

The giltedged securities section has been very steady. In spite of the firming up in money conditions there has been a rise in prices for both terminable and non-terminable loans. 3½ per cent. Paper has been done as high as Rs. 96. The quotation is only slightly easier at Rs. 95-14. Among terminable loans, 3 per cent 1963/65 have been done at Rs. 95/3, 4 per cent. 1960/70 at Rs. 108-14, 4½ per cent. 1955/60 at Rs. 113-6 and 5 per cent. 1945/55 at Rs. 111-14. 3 per cent. Defence Bonds were higher at Rs. 101-4. There has been good enquiry for provincial loans but not much of business has been passing owing to the paucity of offerings. 3 per cent. 1952 issues were marked at Rs. 97-4.

Bank shares have been uninteresting with *Imperial Bank* fully paids at Rs. 1,540 and *Reserve Bank* at Rs. 106.

In sympathy with the firmer tone of the giltedged securities section public bodies' debentures are higher but not much business has been passing. 3½ per cent. *Howrah Bridge* debentures were Rs. 98-12. Among industrial debentures, 5½ per cent. *Dalmia Cement* debentures were Rs. 103 and 5¼ per cent. *Rohtas Industries* debentures Rs. 102.

Preference shares have been steady with only a turnover in first class jute mills preferences. *Agarpara* were Rs. 155, *Hukumchand* Rs. 117 *Birla* Rs. 130, *Hastings* Rs. 138 and *Hooghly* Rs. 19-7. *Waverley* have been marked higher at Rs. 50-8 and *Kelvin* Rs. 175-8. *Dalmia Cement* are better at Rs. 116. Among others, *Kumardhubi Engineering* are lower at Rs. 119. *Rohtas Industries* were Rs. 149, *Titaghur* Second Preferences Rs. 113 and *Orient Paper* new preferences at Rs. 103. *Purtabpore* preferences were Rs. 15-4.

Cotton shares have been quite steady with *Cawnpore Textiles* at Rs. 6-9, *Elgin Mills* at Rs. 18-10 and *New Victoria* at Rs. 2-2.

A greater list of transactions has been recorded in the Coal section with a slight rise in prices. *Amalgamated* were Rs. 26, *Bengal* Rs. 357, *Burrakur* Rs. 13-14, *Equitable* Rs. 36, *New Beerbhoom* Rs. 15-8. *Raneegunge* Rs. 24-12 and *West Jamuria* Rs. 30. The results of the Macneill group of companies ar due to be published next week and they are eagerly waited by the market. The wagon shortage and the difficulty in getting freight space have adversely affected the coal industry.

The announcement of two orders for war materials has had an encouraging effect on the market. Prices, however, are below the highest levels for the week. *Howrah* are quoting around Rs. 52-8. *Anglo-India* were dealt in at Rs. 317, *Bally* at Rs. 216-8, *Adamjee* at Rs. 21-11, *Clive* at Rs. 21-9, *Hukumchand* at Rs. 9-4, *Kamarhatty* at Rs. 465, *Kanknarrah* at Rs. 380, *National* at Rs. 22-4, *Nuddea* at Rs. 57, *Presidency* at Rs. 4-8 and *Reliance* at Rs. 54. The present prices for jute manufactures afford a substantial margin of profit to mills.

In the Engineering section, *Indian Iron* were done at one time as high as Rs. 33-8 and *Steel Corporation* Rs. 20-4. But the higher levels have not been held in the profit-taking during the last two days most of the gains have been lost. Indian Irons are now quoting Rs. 32 and Steel Corporations Rs. 19-5. There are some rumours in the market regarding the possibility of the directors of the Indian Iron and Steel Company deciding to pass the declaration of the dividend for the current year. So far nothing definite is known in this regard. It can be said, however that the company is fully engaged on war orders and that the earnings for the current year will make satisfactory showing. *Burn & Co.* are higher at Rs. 384. *Arthur Butler* are slightly better at Rs. 13. *Britanni Building and Iron* were Rs. 8-2, *Hukumchand Electric Steel* deferreds Rs. 3-2 and *National Iron and Steel* Rs. 8-10.

Among Utilities, *Bengal Telephone* are very firm at Rs. 18-14. *Rawalpindi Electric* were Rs. 25-8 cum dividend, *Muttra Electric* Rs. 8, *Upper Jumna Electric* Rs. 10-14 and *Benares Electric* Rs. 14-7.

There has not been much doing in the Sugar section. *Cawnpore Sugar* changed hands at Rs. 18-6, *Carew & Co.* at Rs. 10-4 and *New Savan* at Rs. 7. *Raza Sugar* were done at Rs. 16.

In the Tea section there has been only some selective buying. *Hasimara* and *Bishnauth* have been sticky at Rs. 42 and Rs. 25-4 respectively. *Gungaram* were Rs. 358, *Killcott* Rs. 49-12 and *Sipoi* Rs. 10-12.

In the Miscellaneous section, *Burma Corporation* were not very much changed at Rs. 5 and Rs. 2-2 respectively. *B. I. Corporation* on the publication of the balance sheet are steadier at Rs. 4-12. *Dunlop Rubber* were Rs. 38-4, *Indian Wood Products* Rs. 27-12, *Balmer Lawrie* Rs. 324, and *Rohtas Industries* Rs. 21-4. Among Paper shares, *Bengal Paper* were Rs. 125, *India Paper Pulp* Rs. 141 and *Titaghur Paper* A and B ordinary shares Rs. 7-7. *Orient Paper* were higher at Rs. 11-3 and *Shree Gopal Paper* at Rs. 10-6. *Calcutta Steam Navigation* were Rs. 200 and *Indian General Navigation* Rs. 82.

BOMBAY STOCK EXCHANGE.

(From Our Correspondent).

Bombay, March 20.

Money.—The rate for call money remained unchanged at ¼ per cent.

Exchange Market.—The sterling exchange market continued to be featureless, banks selling T.T. at 1s. 5 31/32d. and buying three months' bills at 1s. 6 1/32d.

Securities.—A slight increase in turnover was the chief feature of the giltedged market during the week under review, all the scrips keeping in demand. 3½ per cent Paper from its last week's level of Rs. 95-10 slight improved and closed at Rs. 96. The long dated issues met with good enquiry, 1951/54 being done higher at Rs. 99-8 as against Rs. 99-2 in the previous week; 1960/70 at Rs. 108-13 against Rs. 108-8; 1955/60 at Rs. 113-8 against Rs. 113-4 and 1963/65 at Rs. 95-1 against Rs. 94-14. Among others, 1948/52 were slightly better at Rs. 97; 1947/50 at Rs. 102-6 and 1945/55 at Rs. 112.

Shares.—A sharp rise in cotton rates and an improvement of about $\$\frac{1}{8}$ in *U. S. Steel* shares gave a fresh impetus to the local share market and prices opened higher with an advance in rates. At the higher levels there was some scattered realising. Despite profit-taking, the market continued its upward trend. The undertone was good and the general feeling in the market circles remains bullish owing to better industrial outlook and the continuance of cheap money. Although prices of shares on the forward list, advanced substantially cash quotations showed little or no change. In view of, the wide differences between cash and forward quotations operators remained, however, cautious.

...*Textiles*.—Mill shares were much in prominence and advanced on good demand. The spurt in raw cotton, the satisfactory declaration of dividends by some leading mills in comparison with those of the previous years and the firm tone in the Calcutta jute market were responsible for the optimistic feeling in this section. *Bombay Dyeing*, the most outstanding scrip, touched a high of Rs. 1,150 in mid-week closed a shade easier at Rs. 1,146-4-0 on profit-taking. *Century* were marked up at Rs. 425, a rise of about 35 points over the previous week's close. *Nagpur* had good buyers at Rs. 82. *Central India* improved to Rs. 335 from Rs. 319; *Colaba* to Rs. 181 from Rs. 179; Gokak from Rs. 236-8 to Rs. 227; *Kohinoor* to Rs. 438 from Rs. 429; *New Great* to Rs. 457 from Rs. 448 and *Swadeshi* to Rs. 315-8 from Rs. 298-8.

Hydro-electrics: This section was a neglected market and prices showed little change, excepting *Tata Power* which improved to Rs. 1,662-8 from Rs. 1,615. *Andhra Valley* were marked lower at Rs. 1,840 and *Tata Hydro* at Rs. 181.

Steel.—*Tata Steel* shares were marked up in the wake of cotton mill shares. The rise in *U. S. Steel* shares had an encouraging effect and prices advanced on continuous demand. The ordinaries closed higher at Rs. 402 and the deferreds at Rs. 2,080 as against Rs. 393 and Rs. 2,030 respectively. The *Tata Iron & Steel Co., Ld.* is now completely occupied with supplying the necessary goods to the Government and the Company has very little to sell to the public.

Banks.—*Bank of Baroda* were slightly lower at Rs. 107-12, while *Imperial Bank* fully paids were done at Rs. 1,552-8; contributories at Rs. 386-14; *Bank of India* at Rs. 142-8; *Central Bank* at Rs. 43-4; *Reserve Bank* at Rs. 105-8 and *Union Bank* at Rs. 6-7.

Miscellaneous.—*Bombay Burma Trading* participated in the general rise and the price advanced to Rs. 582-8 from Rs. 563-12 in the previous week. *Associated Cement* showed a rise of Rs. 1 to close at Rs. 147-8. *Belapur Sugar* were slightly better at Rs. 221. *Wimco* were in keen demand at Rs. 205 on the announncement on an increase in the price of match-boxes. *Shivrajpur Syndicate*, however, were a dull market, being done lower at Rs. 33. *Premier Construction* were done at Rs. 93 as against Rs. 96 in the previous week. *Indian Iron* changed hands at Rs. 32-12 and *Steel Corporation* at Rs. 19-13. *Scindia Steam* were marked slightly lower at Rs. 21-7.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, March 20.

Business in the local share market was restricted in the absence of sellers during the week under review. Cotton mill shares were in strong request. Rubbers met with fair support, while Teas remained unchanged.

Securities.—The local securities market ruled very steady with some of the scrips recording gains in prices. 3½ per cent Paper was done higher at Rs. 96; 3 per cent 1963/65 changed hands at Rs. 95-1; 3½ per cent 1947/50 at Rs. 102-6 and 4 per cent 1960/70 at Rs. 108-10. There was good business in State Loans, 3 per cent 1956/61 *Mysore Loan* being done at Rs. 103-15; 3½ per cent 1951/58 at Rs. 107-13 and 4 per cent 1953/63 at Rs. 115-6. 5 per cent *Cochin Loan* were crossed at Rs. 105-4. Among Provincial Loans, 3 per cent 1953 *Madras* were done at Rs. 97-12.

Mills.—*Buckingham & Carnatic* met with continued support, being done at Rs. 244 x.d. *Mettur Industries* were in enquiry at Rs. 136-8; *Pankaja* at Rs. 92 x.d; *Vasanta* at Rs. 112; *Sitaram* at Rs. 50-8 c.d. and *Mysore Spun Silk* at Rs. 7-14.

Utilities.—*Cochin State Power* were slightly better at Rs. 9-2. *South Madras Electric ordinaries* were in enquiry at Rs. 13-2, while the 5½ per cent Debentures were transacted at Rs. 108-8. It is reported that the shareholders of the *Madras Telephone Company, Limited* are being asked by the directors to accept the Government offer of Rs. 15-8-0 for their shares and not to look forward to any dividend distribution for the year 1940.

Plantations—Rubber shares met with fair buying, *Cochin Malabar* being done at Rs. 6-12; *Kalpetta* at Rs. 18-10; *Midland* at Rs. 5-1-6 and *Valliamuttam* at Rs. 19. Among Tea shares, *Peermade* were dull at Rs. 27-8 and *Periakaramalai* at Rs. 17-6. *Nilgiri* Neerugundi came in for business at Rs. 1-8.

Sugars.—Mysore Sugar showed an improvement to Rs. 50. *Travancore Sugars* were better at Rs. 14.

Miscellaneous.—Mysore Paper were transacted at Rs. 14-6. *Mysore Chemicals* closed slightly better at Rs. 17-2. *Tata Chemicals* came to business at Rs. 13-2 and *Mettur Chemicals* at Rs. 9-11. *Mysore Tobaccos* were taken up at Rs. 9-10 and *Mysore Stoneware Pipes* at Rs. 8-6.

LONDON STOCK EXCHANGE

Steadier conditions have been noticeable on the London Stock Exchange during the latter half of the week and quotations for leading industrials are higher in places. Giltedged securities have been very steady. The Budget is to be announced before Easter. Among India loans, 3½ per cent. Sterling Paper were unchanged at 99. Among British funds, 2½ per cent. Consols were 77½, 3½ per cent. Conversion 99, 3½ per cent. War Loan 104⅛ and 3 per cent War Loan 100 ⅜.

Among other sections, Tea issues are slightly lower but Rubbers are better in sympathy with the higher prices for the commodity. Minings have been in favour while Oils have been irregular. Home Rails are higher.

NEW YORK STOCK EXCHANGE

There has not been much activity on Wall Street during the past week. There is a tendency to take profit even with a slight advance in prices. The increasing defence expenditure and the liberal farm policy will necessitate a large increase in taxation. Operators are inclined to adopt a cautious attitude. It is proposed to raise the new money required for the 7,000 million dollar appropriation bill by issuing four types of new certificates from 10 cents to 10,000 dollars. It is hoped to raise between 3,000 to 4,500 million dollars in the first fourteen months beginning from May 1, 1941. *U. S. Steel* were $\$58\frac{5}{8}$, *General Motors* $\$43\frac{5}{8}$ and *Anaconda Copper* $\$24\frac{1}{4}$.

Railway Purchases in 1939-40

The value of Indian material purchased by the Railways in 1939-40, both State and Company-managed, was higher by Rs. 95,00,000 than in the previous year, while the value of imported material was lower by Rs. 8,00,000, according to the Report by the Railway Board on Indian Railways for 1939-40.

These figures apply to purchases for the Class I Railways, excluding the Jodhpur, Mysore State and Nizam's State Railways.

The State-managed Railways were chiefly responsible for the larger orders placed in India, their purchases being Rs. 86,24,-000 higher—Rs. 6,81,30,000 as compared with Rs. 5,95,06,000 in 1938-39. The respective figures for orders placed by the Company-managed Railways were Rs. 4,42,80,000 and Rs. 4,33,72,000, the increase in the year under report being Rs. 9,08,000.

MARKET POINTERS

Order for 42,00,000 Yards of Hessian.

An order for 42,00,000 yards of hessian (40 inches 7½ ounces), it is learnt, was placed Tuesday with the Indian Jute Mills Association by the Controller of Jute in India.

* * *

Fixing of Tin Quota

The tin quota for the third and fourth quarters of the current year was fixed at 130 per cent of the standard tonnages at a meeting of the International Tin Committee held in London.

The Committee recommended to the signatory Governments that the present control scheme should be continued for a period from January 1, 1942.

They also suggested certain amendments to the scheme.

* * *

Export of Gold to Burma

The Government of Burma have introduced an important amendment to the regulations governing the importation of gold. When war broke out the movement of gold coin, bullion or gold ingots between India and Burma remained unaffected. While under the Indian regulations the export to Burma of gold coin, etc. remains unrestricted, import into Burma is, under the new notification, prohibited except with the permission of the Rangoon manager of the Reserve Bank of India.

* * *

Groundnut Exports

It is learned, the Government of India have, following the representation from the Southern India Chamber of Commerce, revised the rates of rebates collected from groundnut exporters. The rates charged at Bombay ports have now been brought down to five shillings per ton and that at Madras ports have been increased to 30 shillings per ton.

Now the rates have been revised in a manner which, in their opinion, "accentuates the difficulties of the Madras market". The Southern India Chamber of Commerce has requested Government to take steps to avoid discrimination between Madras and Bombay ports.

(Annual meeting 29th March 1941 at 8-30 a.m. at Cawnpore)

Audited accounts for the year ended 31st December, 1940 :—

The profit for the year, after making all usual allowances, including the sum of Rs. 7 lakhs for Depreciation, and including income from investments, amounts to Rs. 62,07,079-1-9 to which has to be added the amount brought forward from last year, namely, Rs. 1,86,778-1-11, making the total sum available Rs. 63,93,857-3-8. The directors recommend that this sum be disposed of as follows:—

	Rs.	A.	P.
Transfer to Taxation Reserve	42,00,000	0	0
Transfer to Rehabilitation Reserve	3,00,000	0	0
Dividend on the Cumulative Preference Shares at 8 per cent per annum, free of income-tax ...	6,48,000	0	0
Dividend on the Ordinary Shares at four annas per share, free of income-tax	11,03,750	0	0
Carry forward	1,42,107	3	8
Total ...	63,93,857	3	8

The results for the year again show an improvement which is due to the greatly increased turnover consequent on the orders received for woollen and leather goods for the Defence services.

There was considerably less unrest and indiscipline amongst the Corporation's labour force in the year 1940 than in the immediately preceding years and, within recent months, labour has been contended and industrious.

The directors have deemed it advisable to recommend the placing to Reserve of a sum which, having in view the Finance Member's recent Taxation proposals, they estimate will suffice to meet Income, Super and Excess Profits Taxation demands in respect of the Corporation's trading operations in the year 1940. Further, in view of the fact that production is being maintained on an intensified scale for war purposes, the Board consider that it is prudent, at this stage, to create a Rehabilitation Reserve so that sums thus allocated will be available, when required, against the costs involved, after the present emergency has passed, in recovering the Corporation's normal civil trade which, meantime, has in most directions, had to be entirely suspended. The amount, which it is possible to allocate for this purpose, is less than the sum which the directors would have desired to set aside, but increased Taxation and the maintenance of the usual dividends take up the balance of the amount available for disposal.

Chairman and Managing Director.—Mr. R. Menzies.

Authorised Capital—Rs. 3,65,00,000 in 65,00,000 Ordy. of Re. 1 and 3,00,000 8 per cent Cum. Pref. of Rs. 100. Issued and Subscribed—Rs. 1,25,15,000 in 44,15,000 Ordy. and 81,000 Pref., all fully paid-up.

Synopsis of the balance sheet as at 31st December, 1940:—

(Annual meeting 28th March, 1941 at 3-30 p.m.)

Audited accounts for the year ended 30th September, 1940 :—

The gross profit, including interest on Investments, of the Company was Rs. 5,25,942-2-6. After writing off Rs. 3,40,146-6-10 for Depreciation on Forest Concession, Buildings, Machinery and Plant and in providing for Calcutta charges, commission, income-tax and Excess Profit Tax and after deducting Rs. 301-12-7 on account of Loss on Investments, the net profit for the year amounted to Rs. 1,85,493-15-1. This sum added to Rs. 29,039-12-6 brought forward from the previous year's accounts provides a balance available for disposal of Rs. 2,14,533-11-7.

Last year the amount carried forward was increased to a figure which would cover any Excess Profits Tax to which the Company might be assessed. The liability for that period has been included in the Accounts under review and it is not necessary, therefore, to continue to carry forward such a large sum. The directors, therefore, recommend that the balance should be disposed of as follows:—

	Rs.	A.	P.
Payment of dividend of 17½ per cent, free of income-tax	2,10,000	0	0
Carry forward	4,533	11	7
Total ...	2,14,533	11	7

The factory was closed for the customary annual overhaul for 8 days in April and all Machinery and Plant is in excellent condition. Production has been satisfactory and Sales have shown a substantial improvement, stocks having been reduced to a satisfactory level.

Demand for the Company's products is in excess of production and the market can be considered to be very healthy. Further increases in prices were introduced in September and November last and it is felt that the current year can be faced with confidence.

Managing Agents.—Messrs. Gillanders, Arbuthnot & Co.

Authorised Capital—Rs. 15,00,000 in 1,50,000 shares of Rs. 10 each. Issued and Subscribed—Rs. 12,00,000 in 1,20,000 shares, fully paid up.

Synopsis of the balance sheet as at 30th September, 1940:—

* Includes Bonus of 4 per cent.

(Half-yearly meeting, 28th March, 1941 at 12 noon.)

Audited accounts for the half-year ended 31st December, 1940 :—

The profit for the half-year, after providing for debenture interest, depreciation and taxation was Rs. 3,58,393-5-11. To which is added the balance brought forward of Rs. 56,578-2-8 making a total of

Rs. 4,14,971-8-7, out of which the directors have set aside the following amounts:—

	Rs.	A.	P
General Reserve	54,845	7	7
Raw materials and Stores Reserve	1,00,000	0	0
Reserve for Indian Workers' Pensions and Gratuities	10,000	0	0

leaving a balance of Rs. 2,50,126-1-0 available for distribution, which the directors recommend be dealt with as follows:—

Dividend on the Cumulative Preference Shares at 7 per cent per annum, free of inncome-tax ...	7,000	0	0
Dividend on the 'A' Cumulative Preference Shares at 7 per cent per annum, free of income-tax	14,000	0	0
Dividend on the Ordinary Shares at 25 per cent per annum, free of income-tax	1,12,500	0	0
Bonus of Re. 1 per share on the Ordinary Shares, free of income-tax	36,000	0	0

leaving a balance of Rs. 80,626-1-0 to be carried forward.

The directors have drawn the attention to the fact that the Reserves previously appearing under headings the "Improvements and Extensions" "Bamboo Plant", "Indian Quarters and Welfare Service" and "Additional Quarters for Apprentices" have been merged into one General Reserve. The object for which these Reserves created have now been accomplished and transferring them to a General Reserve sets out more clearly the position of the Company.

At the same time the directors have adopted a different method of accounting Reserve Appropriations in order that the balance sheet at the end of the each heaf-year may show the current position. The alteration involves the transferring the amounts set aside by the directors, before the closing of the books, as opposed to the past custom of stating them only in the directors' report for the half-year. Output and sales during the half-year under review were satisfactory Manufacturing costs still continue to rise and in view of the present high prices of raw materials, stores etc., the directors have considered it wise to set aside the sum of Rs. 1,00,000 towards a special reserve to provide for the inevitable fall in value after the war.

Good progress has been made in connection with the extension to the Pulp-preparing Plant mentioned in the last report, which the new water filtration plant is now in operation, and entirely satsfactory results are being obtained.

Managing Agents.— Messrs. Balmer, Lawrie & Co., Ld.

Authorised Capital—Rs. 18,00,000 in 48,000 Ordy., of Rs. 25; 4,000 Original Cum. Pref. of Rs. 50 and 4,000 'A' Cum. Pref. of Rs. 100 Issued and Subscribed—Rs. 15,00,000 in 36,000 Ordy.; 4,000 Original Pref. and 4,000 'A' Pref., all fully paid up. Debenture Capital—Rs. 6,00,000 in 1,200 4½ taxable bearer bonds of Rs. 500 each, repayable at par on 30th June, 1957 with the option of redemption, in whole or part, at par, any time, on or after 30th June, 1947 on six months' notice.

(Half-yearly meeting 31st March, 1941 at 12-30 p.m.)

Audited accounts for the half-year ended 31st December, 1940 :—

Including the balance brought forward from the last half-year and providing for interest, Debenture interest, commissions and taxation, the accounts show a credit balance of Rs. 2,17,152-1-2 which sum, the directors recommend, should be dealt with as follows:—

	Rs.	A.	P.
Dividend due on the Preference Shares at 31st December, 1940, free of Income-tax ...	35,000	0	0
Dividend on the Ordinary Shares at the rate of 12½ per cent per annum or As. -/10/- per share for the half-year	37,500	0	0
Write off to Depreciation	50,000	0	0
Carried forward to Profit and Loss Account ...	94,652	1	2
Total ...	2,17,152	1	2

During the period under review, the Mills worked 54 hours per week up to Saturday, the 17th August. Thereafter weekly working hours were reduced to 45 hours, while during the months of September-December inclusive, the Mills remained closed for one week during each month.

(Annual meeting held 20th March, 1941 at New Delhi)

Audited accounts for the year ended 31st October, 1940 :—

The Revenue for the year was Rs. 54,233-11-10 and after providing Rs. 29,808-9-0 for Depreciation and Rs. 400 for Audit fee there remains a balance of Rs. 24,025-2-10. The carry forward from last year was Rs. 45,567-13-8 which, added to the balance for the current year, makes a total of Rs. 69,593-0-6. Out of this the Directors have placed Rs. 2,000 to the Employees' Bonus and Welfare Fund, and recommend payment of a dividend on the Preference Capital at the rate of 7 per cent per annum, less Income-tax, for the past year which will absorb Rs. 6,328 and a dividend on the Ordinary Capital at the rate of 7½ per cent per annum, less income-tax, for the past year which will absorb Rs. 42,000, leaving the sum of Rs. 19,265-0-6 (subject to the managing agents' commission of Rs. 2,402-8-0) to be carried forward.

In March 1940, the Sub-Committee of the Delhi Municipality approved of an increase in Terminal Tax from Re. 0-0-6 to 0-1-0 per maund on imported flour including atta, maida and sooji.

The North-Western Railway authorities declined to accede to their representation in the matter of reduction of railway freight on *flour* and *atta* from the Punjab producing centres to Delhi.

The directors have now entered into a contract with Government under which it is expected that the 'C' Mill will be worked to full capacity on Government grinding.

Managing Agents.—Messrs. R. G. Govan & Co.

Authorised Capital—Rs. 12,00,000 in 80,000 Ordy. of Rs. 10 and 4,000 7 per cent Cum. Pref. of Rs. 100 each. Issued and Subscribed—Rs. 6,50,400 in 56,000 Ordy. and 904 Pref., both fully paid up.

Synopsis of the balance sheet as at 31st October, 1940:—

(Annual meeting held 14th March, 1941 at Colombo.)

Audited accounts for the year ended 31st October, 1940 :—

After providing Rs. 114,724.46 for depreciation, the loss for the 12 months amounts to Rs. 220,782.47. From this must be deducted the amount brought forward from last year of Rs. 15,997.15, leaving a balance of Rs. 204,785.32 standing to the debit of Profit and Loss Account. This sum is carried forward to the next account.

Coconut Oil.—Available supplies of copra were short throughout the year. The position was further aggravated by shortage of freight and continued heavy demand for copra from India, which resulted in the output of Coconut Oil being 15,332 tons less than that of the previous year.

Poonac was practically unsaleable throughout the season, and demand for Coconut Oil was almost entirely confined to the Indian market during the earlier months of the year.

Secretary.—Mr. N. C. Alcock.

Authorised, Issued and Subscribed Capital—Rs. 30,00,000 in 3,00,000 Ordy. of Rs. 7½ each and 1,50,000 Pref. of Rs. 5 each, both fully paid up.

(*a*) Carry preferential claim to dividend of 7%. Rank equally with "A" shares for further distribution after similar distribution. (*c*) Carry no preferential claim to repayment of capital. (*d*) Carry right to fixed cumulative preferential dividend of 5% per annum and to a noncumulative dividend of 3% per annum. After dividend of 8% on ordinary shares also participate in a further dividend of 3% per annum rateably with the ordinary shares in proportion with the respective capital thereon. Before December, 1938 may be converted into ordinary shares with equal rights. (*e*) Holders have option to exchange holding to fully paid ordinary shares at par on six months' notice expiring at the end of any half-year. (*g*) Redeemable at par between 1955—1966. (*h*) Redeemable from 1st January, 1943, by 12 annual instalments. (*i*) Repayable at par by 12 annual instalments from 1st January, 1944, with the option to redeem one six months' notice after 1st January, 1939.

(a) Issued at par on 20th March, 1937, repayable at par on 20th March, 1947, with option repayment at any time after five years from the date of issue. (b) Issued at par in 1897, and repayable at par on 15th November, 1936, date of repayment has been extended to 15th November, 1956, and the rate of interest reduced to 4½ per cent (taxable) from 16th November, 1936. Option of repayment at a premium of 3 per cent. at any date after 15th November, 1926, on three months notice. (c) Issued at par on 14th May, 1938, repayable at par on 14th May. 1956. (d) Issued at par on 1st April, 1934, repayable at par on 1st April, 1959 with option repayment any time after 1st April, 1941, at 3 per cent. premium. (g) Issued at par on 1st October, 1923, redeemable at par on 30th September, 1943, out of a Sinking Fund to which 5 per cent. of the total issue, is due to be placed annually. (h) Carry in the event of a winding up preferential claim to cumulative dividend and to one fourth of the balance of assets available. (i) Entitled to participate in dividends only upto 10 per cent. per annum after the preference shares have received acumulative dividend of 6 per cent. and ordinary shares 10 per cent. Surplus divisible profit remaining after these dividends will be apportioned in three equal parts for payment of further dividends to the three classes of shares. * In payment of arrears of dividend on "A" preference shares for half-year ended December, 1927. † Bonus for every ordinary share held in the shape of a second preference share of Rs. 25 bearing interest at 4½%. ‡ Includes Bonus. § Arrears of dividend for six half-years ended June, 1934. Arrears of dividend to the extent of Rs. 1,22,500 to the end of December, 1937 outstanding. ** Includes 1152 mule spindles. (y) Arrears of Dividend for eight half-years ended 31st Dec., 1931. (z) Arrears of dividend for eight half-years ended 30th June, 1936. Also non-Cumulative dividend of Rs. 13 per share for the whole year 1938. (z) Arrears of dividend for 3 half-years ended 30.6.1933. (J) 6% for the year 1938 and 3% for 1937. (K) 8% for 1937 and 1938. (l) Included in Reserves. (L) 5% for 1938, 6% for 1939 and 6 ¾ for 1940 (M) For half-year ended 31-12-1938

dence—confidence lacking in the main commodity markets at that time. The outlook for jute and hessian was by no means clear and Jute shares lacked a following largely on account of the depression of jute and hessian. It is certainly striking that the survey of the year in the Jute trade remains severely objective and for those still keen on scanning the horizon the only remarks suggestive of confidence are to be found in comments on the expanding markets available for the paper industry.

The best features of the past, the analysis of working and the presentation of all available statistics, confer great value on a work whose utility is not greatly compromised by the prevailing black-out of commercial intelligence.

"WATCH-DOG"

AN APPEAL
FOR
CO-OPERATION

About 75% of consignments are tendered for booking at the Howrah Goods Sheds after 2 p.m. each day. This concentration of transactions within a limited period of the Working day leads to *delays* in the issue of Railway Receipts and inevitably a material proportion is carried over for issue the following morning.

Late booking on Saturdays in particular means many despatchers are not able to send for Receipts till Monday although the Receipt issue section works throughout Sundays.

Please book early in the day.

More receipts can then be issued on the day of booking. Consignors in turn will be able to send receipts to Consignees more quickly.

By Booking early you help us and yourselves.

WORLD OF INDIAN FINANCE

Friday Evening.

THE steadier conditions in the money market, noticed last week, still continue. Banks are active borrowers of call money, with lenders scarce, and with the Imperial, of course, providing the funds. The Inter-bank call rate, however, is unchanged at the nominal rate of ½ per cent in Calcutta and ¼ per cent in Bombay, the demand not being of such proportions as to cause a rise in the rate. There would seem to have been a fair amount of demand for funds to finance cotton and sugar, which is reflected in the steady decline in Bankers' deposits with the Reserve Bank. The fall has, in fact, been very steady since the February 21 when scheduled banks' balances stood at Rs. 46.25 crores. On March 21, exactly a month later, they have declined to Rs. 38.03 crores. Probably, the tax payments relevant to the close of the financial year, always noted for bumper tax collections, also account in large part for the decline.

The presentiments, which actuated our comments on the Treasury Bills policy of the authorities, seem abundantly justified. And, during the current week, the forces working for more stringent money conditions have gathered strength, thanks to the inexplicable official persistence in sales of Treasury Bills through the tap. We can find no other explanation for the abnormal reduction in the size of the Treasury Bill tender; on the last tender day, total applications, against Rs. 1 crore Treasury Bills on offer, amounted to a bare 155.75 lakhs as compared with Rs. 250.25 lakhs on March 18, Rs. 259.25 lakhs on March 11 and Rs. 320 lakhs on March 4. The average rate of accepted tenders on March 25 had risen to annas thirteen and pie one per cent per annum as compared with annas twelve and pies five per cent on March 18, annas eleven and pies six on March 11 and annas eleven and pie one per cent per annum on March 4. And yet, in spite of the progressive rise in the discount rate, and the fall in applications, Intermediates will continue to be sold up to the end of March. The fact that, between March 19 and March 24, these Intermediates could be sold only to the paltry sum of Rs. 18 lakhs does not seem to have any meaning for the authorities, who must needs do everything calculated to force up the market. The puzzle only deepens if the state of Central Government balances with the Reserve Bank is taken into account. In the week ending March 21, these have improved by no less than Rs. 3.02 crores to Rs. 27.29 crores, quite a tall sum, and normally more than sufficient for the Treasury's needs.

Contrary to expectations, no expansion of currency against addition to sterling securities in the Issue Department has taken place. On the other hand, the Reserve Bank's cash in the banking department has improved to the extent of Rs. 1.3 crores at Rs. 11.25 crores. Balances held abroad continue their upward trend and, at Rs. 78.35 crores, there has been a rise of Rs. 1.43 crores in the past week.

An important feature in the Reserve Bank statement in the banking department is the item entitled "Other deposits" shown alongside of Government and bankers' deposists. Usually of modest proportions, it has now risen to Rs. 5.86 crores. The reason for the change is not easy to guess, and we are obliged to go on the knowledge that this item used to represent the deposits maintained by semi-statutory bodies like municipalities, Port Trusts etc., with the Reserve Bank. The Imperial, of course, is still the repository of the accounts of these bodies, but some have been known to keep small sums with the Reserve Bank. Now, the present rise cannot obviously be due to increased deposits of these institutions. The greater likelihood is that the rise in the item is due to certain new accounts, whose character is anybody's guess. One would welcome greater light on the subject than the cryptic figures in the Reserve Bank statement provide. In some quarters, the probability of Dominion or colonial governments having opened new accounts with the Reserve Bank to pay for purchases of war material has been suggested. We confess that the explanation does not appeal to us, because, after all, such overseas payments would be in sterling and would go to swell the Reserve Bank's foreign balances, which is indeed what has been happening all these months.

There has been no change to report in the exchange market during the week. Lack of freight still dominates the bill market and bills have been very scarce.

The Reserve Bank's tap rate for sterling is 1s. 6d., all through for six months.

Banks were sellers of T.T. 1s. 5 31/32d., right through for six months; and banks were buyers of T.T. at 1s. 6 1/32d., for six months.

Three months' D.A. bills were quoted; 1s. 6 7/32d., for the first month; 1s. 6¼d., for the second month; 1s. 6 9/32d., for the third month and 1s. 6 5/16d., for the fourth months.

Interbank call money quoted ½ per cent.

Firms' deposits were ¼ per cent for one and two months, and ½ per cent for three and four months.

TREASURY BILLS

India

Tenders for Rs. 1 crore of three months' Government of India Treasury Bills were opened on Tuesday, March 25, 1941. Total amount offered was Rs. 1 crore, 55 lakhs and 75 thousand. Tenders at Rs. 99-12-9 per cent and above were accepted in full and those at Rs. 99-12-6 per cent were allotted approximately 44 per cent. Total amount accepted was Rs. 1 crore, the average rate of accepted tenders being annas thirteen and pie one per cent per annum.

Tenders for Rs. 1 crore of three months' Government of India Treasury Bills will be received on Tuesday, April 1, 1941. Successful tenderers should make payment on Friday, April 4, 1941. Other conditions are as usual.

Three months' Intermediates will be sold from March 26, 1941 to March 31, 1941, at Rs. 99-13-0 per cent subject to the conditions previously announced (viz., sales can be stopped at any time without previous notice if Government think it necessary.

Three months' Intermediates sold from March 19, to March 24, 1941, amounted to Rs. 18,00,000.

During the week ended March 21, 1941, Government of India Treasury Bills for Rs. 2,81,00,000 were sold in favour of the Issue Department of the Reserve Bank of India.

THE MISRA HOSIERY MILLS have, from the commencement of the war, been "on active service". Working day and night, the mills have been supplying essential requirements of the Army in the knitting line.

MISRA HOSIERY cater to the requirements of the general population and comprise socks, stockings, undervests, sports shirts, interlock underwear and outerwear, for men, women and children.

Production 8,000 Articles, daily.

Finance Abroad

THE financial corollaries of the programme of colossal re-armament as well as all-out aid to Britain by the United States are coming up one by one. It is true that the problem of financing defence expenditure in the case of the United States is not so formidable as it is to other countries, belligerent and non-belligerent. But the implications of financing re-armament are far more serious in the case of the United States if only because they are likely to be extensive in their repercussions on that modern economy. This aspect has indeed not been lost upon the Congress which, as early as last month, showed itself singularly anxious to vote for higher taxation to finance the increased appropriations for the military, naval and other departments. Obviously, even so rich a state as the U.S.A. cannot afford to meet all the fresh expenditure from taxation although the burden of the latter on the people is nothing compared to its incidence in other countries. For, it has to be remembered that the United States has the highest *per capita* income in the world and the national income runs in the neighbourhood of $75,000 millions every year. The brunt of new taxation is naturally borne by the larger combines and utility companies and the common man is relatively unaffected.

Meantime, the borrowing programme has also started and the first announcement from Washington in this regard came recently. Four new kinds of securities ranging in dollars from 10 cents to 10,000 dollars will be sold to the general public and bankers to finance the first part of the defence programme. This announcement was made by Mr. Morgenthau, Secretary to the Treasury, and it is said that Administration circles hope to sell between $3,000 to $5,000 millions in the first year after the official opening of the loan on May 1. Unlike other countries, the United States can afford to go slow in the matter for some time, but should the war drag on, and perhaps drag the U.S.A. also in it, the task before the Administration will be something far less easy than one can tell at the moment. The U.S.A. with billions of dollars lying idle in the vaults of banks and tucked away in Federal reserves as well as numerous other sources, can certainly make its defence financing programme a success, at least in the initial stages, and it should not require any slogan for the success of these loans to be an accomplished fact. That the Administration has already begun to tackle the canalisation of national savings, even from the lower income groups, into Government securities may be gathered from the type of securities which are soon to be sold as part of the defence programme. No doubt, the stage will have to come when a more vigorous plan for tapping national savings will have to be pursued and these touch-and-go borrowing policies will not avail. The significance of the present sales of securities is no more than that they constitute the beginning of a programme, the end of which cannot certainly be foreseen at the moment.

One point, however, may be stressed here. It is that the danger of inflation will be heightened if the Government's taxation policy is not sufficiently rigorous. In the U. S. A. the distaste for higher taxation is very pronounced and strong pressure is always brought to bear on the Administration to prevent taxes being raised. In the kind of plutocratic economy that now obtains in America, in which industrial capitalism has tended to drive finance capitalism into comparative insignificance, it is highly probable that the latter try to see that as much of the defence expenditure is financed from borrowing as possible. Millions of dollars are, and will be, spent every day on the defence programme and the vicious spiral will not take time to manifest itself, because of the likelihood of an early shortage of resources parallelled by rising prices. It is common ground between the Administration and its critics that, unless suitable action is taken from now, inflationary tendencies later cannot be controlled. Apart from the usual factors which work to bring about inflation, the Government's defence financing policy will determine the precise degree of strength to such inflationary forces. It is common knowledge that the Federal deficits have been mounting up particularly in the five years; the policies of Mr. Roosevelt have hardly been calculated to bring down the deficits. On the other hand, the pump-priming measures have been pursued in total disregard of the traditional apprehensions of budgetary deficits. It is true that, in the case of so mature an economy as the U. S. A, a pharisaical horror of deficits has nothing to commend it; but, at the same time, the fact that the public debt has been rising by leaps and bounds without a ceiling is certainly of great significance at a moment when unproductive expenditure to the tune of billions is going to be incurred in the interests of national defence. The financial policy of the Administration in the coming months will have to steer clear of many dangers, although superficially current indications may seem to encourage optimism.

Now that full particulars of the provisions of the Lease and Lend Act have been made available, it is possible to appraise the economic significance of the Lease and Lend Act, particularly as it affects Britain, who is going to be the chief beneficiary. The really dominant aspect of this historic measure is the economic aspect, though its political and moral implications would be of far-reaching significance, particularly in determining the contours of the post-war world. The transition from war to peace—time economy, when this war is over, is bound to be greatly helped by the measure, which may well assist the shaping the economic destinies of the post-war world. For the present, however, it would be well to note how the Act will affect Britain. In the first place, it will help Britain's balance of payments and relieve the British budget. From now on, no more dollars will have to be paid for American imports and the cash and carry clause is finally put on the shelf with the result that strain on the sterling-dollar rate is considerably relaxed. Hereafter, the problem of the Exchange Equalisation Account will be mainly to find the wherewithal to pay the non-American Countries. These, however, are comparatively unimportant. This should make a considerable saving in foreign exchange and help Britain's balance of payments. It might well enable Great Britain to increase her purchases of raw materials from countries overseas, provided the shipping problem is not so acute. The clause which has really given great relief to Britain is that American supplies may be repaid in kind after the war, for this will mean a saving to the British Budget of at least £2 millions a day. And inasmuch as the United States undertakes to provide both the war supplies there can well be a reduction in the level of British expenditure. At any rate, there need be no further increase above current levels, which is about £13 millions a day. Thus, it will be possible for the British Treasury authorities to balance the budget within a certain range—at about current levels of expenditure. That should be a source of considerable relief to all because the burden of finding money to finance a rising level of expenditure will not be there.

Two important agreements have just been concluded, according to the *Times*, between the British Government and the Council for the Defence of the French Empire. The agreements fix the rate of exchange between the French colonial franc and the pound sterling at the old parity which prevailed between the franc and the pound before the armistice. Each colony of the Free French Empire will dispose freely of the foreign exchange proceeds of its exports and gold production under control of the Council which will be able, where necessary, to use the surplus of one colony to meet deficits in others or the needs of the Free French forces as a whole or the common cause of the Allies. All colonies will have access to the supply facilities of the British Empire.

Industry and Agriculture

THE Commerce Member's speech on the larger problem of industry and commerce in the conditions of the present will be widely welcomed in the country as an indication of the Government's mind on these important questions. More than a year and a half has gone of the present war; and though it has in all probability more surprises, possibly of the unwelcome kind, in store for us, some of the economic problems thrown up by the war have taken definite shape. The opportunities, too, which were widely expected to be offered by the war, are no longer vague. It is true that we have suffered some disillusionment. But it is true also that, from the point of view of our relations with the rest of the world, the impact of the war on our national economy has clarified considerably. The Commerce Member's speech in the Assembly is the first exposition of Government policy without any severe narrowing of its scope.

It is well at the outset to realise that such an exposition has necessarily to err on the side of caution. Responsible ministers, who have a compact majority at their command within the Legislature and an expectant public outside usually err on the side of extravagance. When policies are outlined, they seek to widen their scope as far as possible, except, of course, in cases in which the vested interests of some among the party in power are concerned. They have no reason to fear the consequences of achievement falling short of original expectations; for such consequences are met by the voting of the majority. In an irresponsible government like the Government of India, where the primary considerations are protection of British interests and precautions against public agitation in the future, there is need to guard against giving room for high hopes.

It is regrettable that, even after making allowance for such considerations, the Commerce Member's speech is to be held disappointing and even disheartening. For, Sir Ramaswami Mudaliar seems inclined to shift the economic problem of the present out of focus. It may be readily granted that, so far as the problems of particular industries or agricultural commodities are concerned, Sir Ramaswami is well apprised of the facts and has not allowed himself to be side-tracked. What is far more important is the view that the authorities take of the nature and extent of industrialisation which is called for, taking all circumstances into consideration, in the situation created by the war. The average Indian will be unwilling to recognise that there are considerations arguing against the establishment of certain industries or the expansion of others to a certain extent, even though the opportunities to do so may be said to exist to-day. The assumption behind this attitude is that the creation of new industries in inopportune times is a far more difficult task than the readjustment of their position in less propitious times once they have been started in favourable conditions. One must be prepared to grant that the validity of this assumption is far from obvious and that there are considerations which suggest the unwisdom of starting new industries or expanding old ones only in consideration of temporary opportunities.

But the Commerce Member has not been content to stress this aspect of the problem and to utter a warning against the danger of utilising every opportunity that may offer itself for expanding Indian industry. The unwisdom of giving due weight to the needs of readjustment in the post-war period can hardly be gainsaid. And it would have been not a little helpful if Sir Ramaswami had given concrete instances. But what makes his speech disappointing and disheartening is that he has thought it fit to press certain general considerations merely because they are helpful for resisting the legitimate demand for utilising the opportunities afforded by the war for the industrialisation of the country. These considerations are firstly, the need for balance between industry and agriculture and secondly, the need for India making her contribution to the solution of the world economic problem in the post-war period.

We are surprised that the Commerce Member did not feel called upon to concretise his ideas under the one or the other. So far as the balance between industry and agriculture is concerned, he did not proceed farther than pouring scorn on the slogan, "industrialise or perish." He has adduced other slogans in which the alternative to perish is the opposite of industrialisation. If the slogans are taken together, there seems to be no practical alternative to racial extinction. The force of the joke is irresistible. But, while the members of the Assembly can feel gratified for the relief from boredom, it is neither a contribution to the examination of the problem he has raised nor an answer to the clamant demand of the public for more industrialisation. It is obviously idle to talk of the balance between industry and agriculture without quantitative ideas about industry and agriculture in the present conditions, the increase in industry or agriculture that is needed and the increase that is possible. Those who clamour for industrialisation have no obligation to give any precision to their quantitative ideas in regard to Indian industry and agriculture. For the leeway to be made in industry is so large that the utmost industrialisation we may find it possible to achieve would still leave the national economic system heavily weighted on the side of agriculture. It is this simple fact, which Sir Ramaswami Mudaliar can neither question nor escape, that has enabled the advocates of industrialisation to dispense with all manner of qualifications. Such stress as the Commerce Member thinks it necessary to put on these qualifications can have either an academic importance for which the average man does not care or a sinister significance, of which the less said the better.

The truth is that the limits on India's industrialisation are of the purely theoretical kind. We should, perhaps, make it clear that we are not talking of particular industries, in which conditions must vary from one another. The question how far we should allow the cotton textile industry to expand under the pressure of war-time demand is quite different from the extent of industrialisation as such. Industrialisation signifies the exploitation of resources, particularly the manipulation of raw material, through employment of uptodate mechanical methods of production. In the present conditions, India cannot possibly have too much of that. And those, who are apprehensive of losing the balance between agriculture and industry, will do well to remember that the benefits of industrialisation cannot be confined to the production of cotton cloth or steel or sugar or chemicals. As we are situated, our agriculture stands to benefit from industrialisation even more than industry. For our part, our idea of industrialisation is one that can enable the increase of agricultural production by three or four times, what time it brings about a similar increase in the products of mills, factories and workshops. The value of industrialisation does not lie in the sentiment which attaches to it in a country which has been kept down in the stage of primitive agriculture. It lies primarily in the quickening of the processes of production not alone in factories, but in the farms as well, and in the accumulation of fixed capital in the hands of the community. Genuine industrialisation cannot be restricted to production in factories. And when agricultural production expands under the stimulus given to it by the largescale production of fertilisers and farm machinery, agriculture will keep its lead over industry.

It will be seen, therefore, that the fear of the national economic system losing balance between industry and agriculture is little better than a bogey. And the question of our contribution to the solution of the problems of the post-war world is not far different. Here, again, there is need for quantitative notions regarding the extent of the export markets which we shall need or which will be available to us, and the nature and extent of the import trade for which we shall have to provide in our post-war economic system. We have expressed the view in these columns as often as occasions arose, that India should adopt national economic policies which admit of an import trade of about the same dimensions as in the years immediately preceding the war. Whatever the nature of the problems of world economy in the post-war years, it will be found to be such as to offer no help for solution in India agreeing to import more from the outside world. Increasing of imports would require for payment therefor an increase in our exports. And even if the rest of the world should be willing to import more from India—which is extremely unlikely—it is impossible that the requisite increase in the standard of living will be achieved by an expansion of both imports and exports. The root of the problem lies in the increase of internal productive activity; and agriculture, not less than industry, requires for its progress the kind of industrialisation we have indicated before. India can have no obligation to facilitate the solution of world problems by agreeing to reduce the tempo of her economic progress. The world has done nothing to India to be entitled to India's special concern. Quite apart from that, it would be well indeed, for us to recognise that it would be doing violence to our national self to do anything that might aggravate the economic problems of the post-war world. And in that view, it should suffice if India maintains an import trade of pre-war dimensions and refrains from any large scale grab of foreign markets.

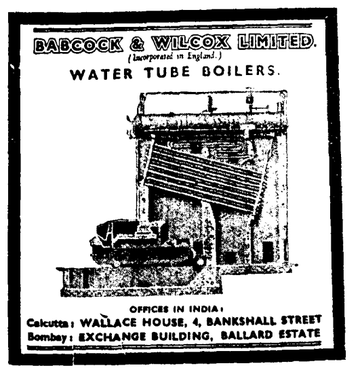
American Aid to Britain

THE final text of the Lease and Lend Act first drafted in January just after the President had reported to Congress on the state of the Union, has been made available recently. The Statute itself took two months in the making, and after the President's signature, interest has undoubtedly passed from the law to the actual measures adopted under it. While this may be legitimate, the Act which permits U.S. foreign policy to surmount the restrictions of the Johnson and Neutrality Acts is of permanent interest, while the doings of the U.S. Maritime Commission and the opinions of syndicated columnists are of evanescent interest. The Act contains only eleven sections on the whole, and of these, the first is the short title. The operative clauses are fewer than ten because Section 2 gives definitions. The term 'defence article' is stated to cover any weapon, munition, aircraft, vessel or boat (2) any machinery, facility, tool, material or supply necessary for the manufacture, production, processing, repair, servicing, or operation of any described in this subsection (3) any component material or part of a equipment for any article described in this section (4) any agricultural industrial or other commodity or article for defence. The term defence article includes any article described in this section, manufactured or produced pursuant to section 3 or to which the U.S. or any foreign government has or hereafter acquires title, possession or control. Defence information is defined by Section 2 as meaning any plan, specification, design, prototype or information pertaining to any defence article.

Except for the compromise with Congress over the term and limits of the President's powers the enactment, described significantly as an Act to promote the defence of the United States, corresponds to the measure whose draft provisions were cabled in January. The third section authorises the President, notwithstanding the provisions of any other law, when he deems it necessary in the interest of national defence to manufacture in arsenals, factories and shipyards under the jurisdiction of the War and Navy Departments to the extent to which funds are made available therefor (the first instalment of seven billion dollars approved by Congress has a special bearing on this clause). The defence articles are to be made available to the Government of any country whose defence the President deems vital to the defence of the United States. Sub-section two empowers the President to sell, exchange, lease, lend or otherwise dispose of to any such government, any defence, article, but no defence article not manufactured or procured under paragraph shall in anyway be disposed of except after consultation with the Chief of the Staff of the Army or the Chief of Naval operations or both. The value of defence articles disposed of under authority of this paragraph and procured from funds heretofore appropriated, shall not exceed $1,300 millions. The value of such defence articles shall be determined by the head of the Department or agency concerned or such other department or office as has been designated. The third paragraph provides the power to test, inspect, prove, repair, outfit, recondition or otherwise to place in good working order to the extent to which funds are made available therefor or contracts are authorised from time to time by the Congress or both, any defence article for any such government or to procure any or all such services by private contract.

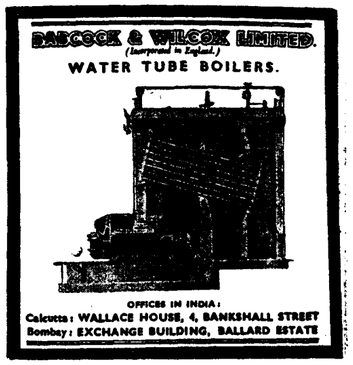
The next clause permits the grant of any defence information furnished to a government under the second paragraph of section 3c. The fifth paragraph provides for powers to release for export any defence articles disposed of in any way under the sub-section to any government. Sub-section B empowers the President to decide the terms and conditions under which any foreign government receives any aid authorised under sub-section (a) allowing for the benefit to the U.S.A. for payment or repayment in kind or in property or any other direct or indirect benefit which the President deems necessary. The next sub-section states that after June 30, 1943, or after the passage by the two Houses of Congress before June 30, 1943 of a concurrent resolution which declares that the powers conferred by or pursuant to sub-section (a) are no longer necessary to promote the defence of the United States. Neither the President nor the head of any department or agency shall exercise any of the powers except that until July 1, 1946 any of such powers may be exercised to the extent it may be necessary to carry out a contract or agreement with such a foreign Government made before July 1, 1943 or before the passage of such concurrent resolution, whichever is earlier. Sub-section d. lays down that nothing in this

Act shall be construed to authorise or to permit this authorisation of convoying vessels by naval vessels of the United States and the next sub-section proceeds to state that nothing in this Act shall be construed to authorise or to permit the authorisation of the entry of any American vessel into a Combat Area in violation of section 3 of the Neutrality Act of 1939. The two last sub-sections indicate that newspaper conjectures as to probable U. S. Government action amount to almost deliberate flying in the face of the express provisions of the Lease and Lend Act. The U.S. Navy will not be employed for purposes connected with the Act, and ship-building or repairing for the use of Britain are to be distinguished from the employment of U.S. vessels for transport. Carriage up to Lisbon may be permitted but not beyond, and the Atlantic Link is obviously shortened in spite of the recognition in Section 3 of the Act that the defence of Britain is a subject of immediate interest to the U.S.A.



Compared with Section 3 the succeeding sections are of less importance. The Army and Navy Departments are instructed to let the appropriate department know the quantity, value and nature of defence articles whenever these are exported under the provisions of Section 6 of the Act enacted on July 2, 1940. A report once in every three months of action taken under the Lease and Lend Act is to be transmitted to Congress which acquires not only financial but supervisory powers by virtue of the amendments made during discussion of the Bill presented by the Administration. Section 6 of the Lease and Lend Act says that such amounts may be appropriated from time to time out of any money in the Treasury not otherwise appropriated for carrying out the provisions of the Act. The next clause states that all money and all property which is converted into money received under Section 3 from any government shall with the approval of the Director of the Budget revert to the respective appropriation or appropriations out of which funds were expended with respect to the defence article or information for which such consideration is received, and shall be available for expenditure for which such funds are appropriated by law during the fiscal year but in no event shall any funds so received, be available for expenditure after June 30, 1946.

The purpose of the foregoing sections is plain. Apart from setting well-defined limits to the exercise of powers, conferred obviously for an emergency, on the Chief Executive they reiterate the view that if the U.S.A. is non-belligerent, there is no place for entanglements on the high seas, and Section 4, lays an obligation on the Government receiving assistance under the Act not to transfer title or possession of any defence article or permit its use by others than its own officers or agents. Thus equipment lent or made over to Britain cannot be transferred to another country like Greece without the express consent of the President. More important from our view are the financial provisions contained in the sections cited previously. The second paragraph prescribes how much and how defence articles can be lent or leased. The equipment out of existing resources that the U.S. Government is evidently prepared to replace out of its own funds is to be of the value of $1,300 millions. Further loans have to be authorised by Congress. The condition puts a specific limit to the U.S. ships or aircraft that may be sold as superfluous or out of date. But the heads of the Services have to approve any decision relating to the loan or sale of such defence articles. But the limit itself is so high that it may take months for the U.S.A. to replace equipment depleted by transfers under Section 3.



The immediate purpose of Section 3 is to give the British Government which has been compelled to limit its purchases since December last, control over additional defence materials which can be had without payment. But it is not at all certain that defence articles to the full value of $1,300 millions may be provided immediately. In view of the conflicting reports about the transfer of more destroyers in addition to the 50 given under the agreement of September 1940, it appears unlikely that the U.S.A. would give out of its fleet or air fleet the maximum permissible. The provision for payment in kind raises immediately interesting questions. If the President is authorised to accept in return for assistance vouchsafed under the Act securities, land or other tangible items or the loans contracted by other nations, the U.S. Government will become a creditor holding a varied assortment of collateral. But if the President is empowered to put a value on indirect benefit accruing from the successful resistance of Britain the position is hardly simplified. The main point is that the U.S.A. is prepared to take in return such goods or securities as Britain may offer in exchange for equipment made available under section 3 either under the main head or paragraph 2 thereof. The U.S.A. may take whatever is acceptable, and it is therefore not surprising that additional dollar resources have been sought mainly through the requisitioning of the assets of American subsidiaries of the leading British industrial firms referred to last week. The process of acquisition and sale is by no means cumbrous or irregular but American Viscose which until 1938 provided little or nothing to the proprietors of Courtaulds and figured more than once in the courts previously, is now the best rod in pickle for Courtaulds so that the shareholders may not regard the Treasury Order providing payment in sterling for the interest forcibly taken over as calculated to further their interests. Further, payments in kind or property as distinguished from the dollars held by Britain may be provided by the sale of interests in South American undertakings controlled by British capital. The elastic provisions of section 3 and section 6 have to be taken into consideration.

The Administration is armed with extensive powers over private industry not only by Section 3 but by Section 8 which lets the Secretaries for War and the Navy purchase or acquire arms, ammunitions and implements of war produced within the jurisdiction of any country to which Section 3 is applicable whenever the President deems such purchase or acquisition to be necessary in the interests of the defence of the U.S.A. Mexican oil, Peruvian Copper, Chilean nitrate or Bolivian tin may be regarded as essential for U.S. arms production, and the U.S. interests engaged in mining industries abroad may be compelled to take the Government's terms. The possibility is not removed by the section vesting rule-making powers in the President. As the Act applies only to arms production, repairs, the transmission of information and non-combatant service, the tenth section lays down that it does not affect the law governing the use of the land and naval forces of the U.S.A. The final clause is an escape clause trying to litigants. The emergency powers are liable to withdrawal, and specific dates are assigned both to the execution of contracts or the expenditure out of special grants.

Editorial Notes

The Employment Tax

It is well that the Central Assembly has agreed to the circulation of the Bill to limit to a maximum of Rs. 50 per annum, the amount payable in respect of any person by way of tax on professions, trades, callings and employment. The issues involved are really so complex and the parties affected so diverse that hasty action is to be deprecated. There is, on the one hand, the Central Government which has made no secret of its opposition to the tax on the ground that it is a surreptitious encroachment on the field of income-tax. On the other side are the provincial governments and the various local bodies to whom—and particularly to the latter this tax is an indispensable source of revenue. And, lastly, there is the taxpayer who feels aggrieved because, firstly, the tax in his eyes amounts to a surcharge on income-tax, sometimes up to even 25 per cent., and secondly, that the tax is hardly uniform in its incidence even within a presidency and much less so on an All-India basis. Hence the Bill moved by Sir Frederick James in whose province not only do the anomalies in respect of the tax abound, but its burden on the taxpayer is high.

There is a high degree of plausibility in the arguments of the three parties; but, to be carried away by it, is to confess inability to formulate a proper financial standpoint from which to view the question. It is undoubtedly true that these taxes constitute a superstructure of local taxation over the Central and Provincial taxes; that *per se* can hardly be an argument against them—at any rate, their validity is not affected, except where the constitution imposes an interdict The criterion in this question is really the financial needs of local bodies whose sources of income are slender and whose lot will be harder if the tax on employment is withdrawn. In that event, the provincial governments will have to subsidise them or find other sources of income, both of which would entail great difficulties. For, however unscientific the basis of assessment of the employment tax may seem, a more simple levy would not be easy to find. Even if it were, the choice before the taxpayer is probably little better than being spared by the local bodies only to be taxed again by the provincial governments. And it is unlikely that the latter will undertake to take over the responsibility for coming to the financial assistance of local bodies. Public finance in India rests on many tiers of taxes, and to remove them, without taking action to replace it at the same time, might well cause serious dislocation, while the reconstruction of provincial and local finances is fraught with great difficulties.

A preliminary survey, as stressed by Sir Jeremy Raisman, is, therefore, very necessary. The views of provincial governments must be given full weight in the matter. They are just now engaged in placing their finances on a new footing; new taxes are introduced in place of the old ones and revenues are being stepped up. In a few years, if economic conditions permit, it may well be possible for them to dispense with the profession tax and help local bodies directly. Till then, therefore, there is a place for the profession tax. To ask for its repeal because the provincial budgets show surpluses is to mistake the true meaning of the latter, which have resulted only because the provinces have put prudence before spending and only popular ministries can undertake new policies.

Indian Commerce Speaks Out

The discussions at the 14th annual meeting of the Federation of Indian Chambers must open the eyes of the Government to the attitude of extreme scepticism, not to say misgivings, with which economic policy is regarded by Indian businessmen. And the Federation can congratulate itself that the demand for a policy that is in the best interests of this country has been put forth with clarity and vigour. The shortcomings of official policy in the agricultural, industrial, financial and, not least, the political, spheres have been fully exposed; and for perhaps the first time, the Federation has succeeded in impressing the Government and the public with the seriousness of its criticisms no less than the weight of its authority. The conference had a good lead from Mr. Amritlal Ojha, the outgoing President, who in a long address subjected to incisive criticism the policy of the Government on all the issues of the hour. And the subsequent debates on the various resolutions served to focus attention on the gravity of the several problems. The resolutions covered the entire gamut of our economic life. Mr. D. P. Khaitan, who was obviously replying to the Commerce Member, moved the resolution asking for a clearer and more specific protection policy that would encourage the growth of industries. Sir Shri Ram urged the desirability and importance of a competent export organisation for the promotion of the export trade. Sir A. H. Ghaznavi plumped for complete state ownership of Railways, while Kumararaja M. A. Muthiah Chettiar wanted a firm policy in dealing with Ceylon and Burma where Indian nationals are persecuted.

But really the most important resolution was the one moved by Mr. G.L. Mehta, voicing the apprehensions of the Indian commercial community that the Eastern Group Conference had consigned Indians to the old role of 'hewers of wood,' while really the peak of the war production is sought to be attained in India. Mr. Mehta, in an able speech, dealt with the implications of the E.G.S. decisions, in so far as they are known and unknown; and was candid to say that the co-ordinating arrangements for the supply and production of munitions and other war supplies took little count of Indian interests. He affirmed the Federation's demand that the capital, control and management of the new enterprises should be in the hands of Indians. It is not desirable that this country, while shaking foreign control off by the reduction of its external debt, were allow it to enter again by the back-door. Stress may also be laid on Mr. Mehta's complaint that the Federation is ignored by the Government. This is greatly to be regretted, though, perhaps it cannot be said that the Federation has always been alive to the need for capitalising its importance into power. The sight of the Dominions getting better treatment than India while she is the hub of the war effort in the East, is a slight to this country. The remedy for these uncomplimentary state of affairs must come solely from a keener awareness in the country of the issues involved; and in bringing that about the Federation of Indian Chambers has a great part to play.

U. S. Steel Outport.

U. S. steel capacity is said to have risen during 1940 by 2,534,000 tons to 84,148,000 tons. The estimate appearing in the *New York Journal of Commerce* is in excess of figures relating to 1939 published by the *Iron and Steel Age* a few months ago. The American Iron and Steel Institute reported that the estimate of capacity does not cover the new steel producing facilities available after construction programmes are complete this year. It is said that within the next few months capacity should exceed a total of 85 million tons, a figure certainly higher than the production and capacity statistics for 1939. The total may be compared with the figure of 800,000 tons given by Sir Homi Mody during a recent Assembly debate as the contribution of the major Indian enterprise to India's steel output. The increase of only 3 per cent. during 1940 in the total steel capacity in the U. S. A. is no surprise to those who know that by January 1941 production and capacity was almost in line. A monthly production average of over 90 per cent of capacity was maintained in the year by the U.S. steel industry largely on account of home requirements. And it is this which gives more than passing interest to the report that Bethlehem, the U.S. steel producer No. 2, is affected by labour trouble originating in differences with the S. W. O. C. The rise in U. S. steel capacity last year was more or less independent of the addition of new furnaces. For the most part it was caused by the return to active use of marginal units previously retired and by improvements that permit more efficient operation of many finances. Allowing for normal shutdowns for repairs etc. it is possible that U. S. steel production will rise in 1941 to 85 million tons. This total will be more than double the quantity of steel that Germany and the occupied countries can produce in a year and at least four times more than what the British Empire can produce. It is believed that British requirements will take off from the total U. S. output a quantity equal to 20 million tons and the balance will be available for the use of U. S. consumers. The total U. S. steel production will be greatly in excess of the total of all recent years and much higher than the total of 63.2 million tons reported in 1929. Consumption in 1940 totalled about 60 millions and exports amounted to 6 million tons suggesting that the record of the Hoover boom had been definitely beaten. It is evident that capacity will not be greatly strained and such inconveniences as labour strikes occasioned partly by the demand for the dilution of the Wages and Hours Act will have no enduring effects on the total steel production. But it is possible that steel production as in Britain in 1939 for civilian requirements may be affected by exigent demands from the shipbuilding and defence industries. But there will be no desire to add to the number of furnaces for steel production because any shortage of steel for consumers outside the arms programme may be only temporary and a capacity of 85 million tons will more than meet the low demands created by the Lease and Lend Act.

"Britain and her Empire to-day are the spearhead of resistance to world conquest. They are putting up a fight which will live forever in the story of human gallantry."

—PRESIDENT ROOSEVELT

But gallantry is not enough: in modern war it must be backed by money and machines. And one thing all of us can do is to send a monthly subscription, however small it may be, to the EAST INDIA FUND for BRITISH WAR SERVICES.

Madras Budget

The commercial taxes introduced in 1938 have been mainly responsible for altering the complexion of Madras finances. The revenues have gone up from Rs. 16 to 18 crores, and in the three years 1939-40, 1940-41 and 1941-42, the revenue position has been considerably helped by better agricultural conditions and rising revenue from land. Prudence and conservatism, as usual, form the keynote of the financial management of the southern province, which has also the great advantage that its public debt, nearly all of which is productive, is not more than a year's revenue. No wonder the credit of the province stands high in the money market.

Coming down to the details, the final accounts of 1939-40 ended in a surplus of Rs. 28.51 lakhs (on the revenue account) as against Rs. 0.09 lakhs anticipated. The improvement was derived mainly from better land revenue collections and increased assignment from the Centre. The surplus was utilised to write back to capital from the revenues of 1939-40 the balance of the commuted value of pensions (about Rs. 10 lakhs) which had been debited to capital in 1938-39 by "C.R..". In the result, the capital account has benefited. The 1940-41 revised estimates reflect higher prices since there was an improvement of Rs. 128.35 lakhs in revenue, contributed by all heads. The new Commercial Taxes will produce Rs. 39½ lakhs more than the original estimates which under-rated the revenue from this source. The Sales Tax gives the greater part of the yield, but the other taxes, too, have been very remunerative. As it is realised that these surpluses have resulted mainly from the new taxes levied with the object of enforcing prohibition and as the present government, therefore, feels that the surplus should be available for a popular ministry, they have been set apart in the shape of a Revenue Reserve Fund. The Fund has already been credited with the surplus yields of the new taxes in the two years, which comes to Rs. 55.14 lakhs. Another advantage is that the Fund can be drawn upon to finance capital expenditiure temporarily; and since no new loan is announced, it is obvious that such a hidden reserve is greatly necessary. To conserve resources and at the same time not to starve development departments, capital expenditure is being financed from revenues to the extent of Rs. 30 lakhs in 1940-41 and Rs. 45 lakhs in 1941-42. The Rural Water Supply Fund is replenished and about Rs. 11⅛ lakhs will be spent in the two years. Rs. 10 lakhs has been credited to this fund. Larger teaching grants to elementary schools under private management are made and the cut in the grants given under the Grant-in-Aid code is removed, so that a school may now count upon the payment in full of the grant it earns under the Rules. On the capital account, only Rs. 70 lakhs were raised by borrowings as against Rs. 100 lakhs provided for; and correspondingly, expenditure financed from capital was down by Rs. 32.24 lakhs though the expenditure on works was not less because of a portion of it is being met from revenue. The province had also the distinction of paying the lowest rate on record for any provincial government on its Treasury Bills. Improvement under loans and advances etc. enabled a closing cash balance of Rs. 58.42 lakhs for the year, in addition to the Rs. 199.77 lakhs to be invested in Central Treasury Bills.

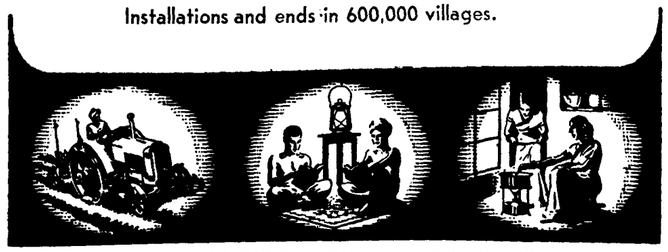
The estimates for 1941-42 have been framed on the assumption that these favourable trends will continue, while the same land revenue remissions are to be maintained. It is gratifying to note that the government recognise that the ryot has not gained by the war and that, therefore, the revenue remissions have to be continued for some time. All the taxes are continued at the same rates; and the Revenue Reserve Fund is expected to have about Rs. 91.14 lakhs at the end of the year. On the expenditure side, grants for the Pundi scheme, for handspinning, land colonisation, water supply and drainage schemes have been made. The estimates show a revenue of Rs. 1821.6 lakhs and expenditure of Rs. 1774.33 lakhs, leaving a revenue surplus of Rs. 46 lakhs.

On capital account, apart from Rs. 45 laks to be spent from revenues, the 1941-42 budget provides for expenditure on new works at Rs. 54.57 lakhs. Electricity schemes figure conspicuously and provision is made for work on the Papanasam Scheme, transmission of power from Pykara to the West Coast etc. Loans and Advances absorb Rs. 101.44 lakhs, being mainly composed of advances to the Co-operative Banks and to municipalities etc. Capital expenditure is thus Rs. 156 lakhs to be met from an opening balance of Rs. 58.42 lakhs plus Rs. 12.75 lakhs in the revenue account, Rs. 92 lakhs from repayment of loans and advances and Rs. 60.09 lakhs from transactions in the deposit section. On balance, the closing balance will be Rs. 67.26 lakhs, which is more than sufficient to keep the statutory minimum with the Reserve Bank and in Treasuries. While there will be no need to raise a loan, it may be necessary to issue Treasury Bills and take Ways and Means advances from the Reserve Bank, all of which, however, will be discharged before the end of the year. The attention bestowed in the budget on the capital account is most praiseworthy as it shows how scrupulously the credit of the province is nursed.



No. 3. THE UP-COUNTRY DEPOT

The problem of ensuring a regular supply of Kerosene throughout India is very considerable. Of major importance in the smooth-running organization is the up-country Depot. Each of these Depots stores sufficient quantities of Kerosene to meet any possible demand from the area it serves.

It is due to the large number of Depots situated at selected points that Burmah-Shell is able to supply Kerosene to the people of India with machine-like regularity.

Burmah-Shell has sunk vast capital in this important link in the chain of distribution which starts at the Company's Seaport Installations and ends in 600,000 villages.

Higher Advances and Lower Profits

The rise in deposits, the fall under Advances and the increase under Cash and Investments are features common to both British and Indian banking in wartime. The strong expansive trend disclosed in the balance-sheet totals does not take in Advances, and except in the case of a favoured few, bank profits have been subject to singularly depressing influences. The requirements of investors have been limited, and the need to preserve a fully liquid position has impelled depositors to keep more bank money than ever in wartime. How well British banking has stood up in war has been discussed recently by Oswald Dutch who thinks that the progress and prosperity recorded under most difficult conditions are exceptional. The Bank Chairmen are less complacent and do not believe that saving has increased to a great extent. Mr. Rupert Beckett of the Westminster Bank has remarked that about 100 millions of the total recorded increase of £437 millions under Total Deposits are due to postal delays and other factors. The effective increase in Deposits in a year and two months of war is estimated at £300 millions, a figure that suggests that the expansion in the circulation was neutralised to some extent by the rise in bank deposits. While the figure will immediately suggest that total deposits of Indian Banks have not risen to the same extent the increase in currency and credit is equally great; the percentage increase is as great. The fall in advances though many industries were booming and wages had risen last year, until checked, may be due to the setback suffered by the non-essential industries which were handicapped by reduced supplies of raw materials and falling consumption. The Chairman of the District Bank discussed this aspect as also the cutting out of the Banks by the direct financing of wartime production by the Government. The holding of Treasury deposit receipts by the Banks suggests that customers often turned over their funds to the Banks or used them as they liked. The expansion in credit brought no gain to the Banks as Mr. Reginald Mckenna points out and he also pointed out that dividends had to be directly related to the size of reserves and the high premium at which shares were issued. The Chairman of the Midland Bank in discussing the relationship of the Banks to the borrowing plans of the Government observed that the Banks were entitled to look for a return because interest had to be paid on Deposits and services could only be performed at a cost. A rise in Deposits entails an increase in expenses, and Banks, with swelling Deposits, cannot afford to make interest-free loans. And any rise in wages and prices is directly translated not only into higher Deposits but also rising costs and the Banks, in a time of inflation, are not reaping any special benefits. The payment of service charges by depositors operating accounts may meet part of the burden and the American system of no interest on current accounts and a checking charge will not be without its advantages when Banks have little employement for their funds and are compelled to take up Treasury Bills and other assets offering a low rate of interest.

Tax Relief in Bombay

The financial policy underlying the Bombay Budget has been commented on editorially last week. It only remains now to scan, at some detail, the budget figures, to discern the trends of revenue and expenditure. The features of the 1941-42 budget are a reduction in the Urban Immovable Property Tax by 80 per cent amounting to a relief of Rs. 24 lakhs; reservation of Rs. 2 lakhs for giving relief from the tax proceeds to charitable trusts; provision for a reserve of Rs. 11 lakhs noticed already; payment of dearness allowance to low-paid Government employees; increase of expenditure on social services of Rs. 50 lakhs under a three-year plan of development; no loan. A revenue of Rs. 13.57 crores and an expenditure of Rs. 13.56 crores are anticipated.

For the current year, revised estimates place receipts at Rs. 13.81 crores and expenditure at Rs. 13.78 crores leaving a surplus of Rs. 3.1 lakhs. The surplus remains after the transfer of Rs. 1 crore to the Development Fund. The chief reason for the improvement of the finances in the current year is a larger share of income from the Central Government under the Niemeyer Award, from Rs. 60 lakhs to about Rs. 90 lakhs. Again, revised revenue from excise shows an excess of nearly Rs. 50 lakhs over the original, due entirely to the modified policy of prohibition. In addition, the usual heads of revenue have all been better. On the expenditure side, the provision of Rs. 2.1 crores for education, about one-sixth of the total expenditure is easily the highlight of the budget. Credit has also to be given for higher expenditure under medical relief, water supply, industries, roads etc., all of which are expected to be entirely spent in the year. In judging the budgets in the last four years, and particularly the revenue figures, it is necessary to remember that the surpluses are due to substantial windfalls of income-tax, but because the departments have never spent fully the grants provided for the extension of their activity. As for the grant of Rs. 11 lakhs to the Industries Department, it is said to be made in response to the recommendations of the Bombay Economic and Industrial Survey Committee. It is impossible to believe that the recommendations have been taken seriously, to judge from the low allotment in this respect. Although the setting apart of Rs. 1 crore as reserve is to be welcomed as symbolic of the Government's desire to provide for the future, it cannot be denied that the allocations to the various departments still suggest a policy of half-hearted action. All that is done is to revise the figures here and there in an upward direction, probably to obtain the distinction that the social services have had better attention at the hands of the Government.

It is some time since I dealt with the political situation in this country; and that Indian politics has not been in the news will suffice to account for it. Apart from that on the few occasions on which I felt called upon to indulge in an escapade into the sphere of politics, it was due, in the main, to the feeling that an inchoate and intriguing situation had developed in which there was use for the views of one normally detached, but not uninterested in the development of Indian politics. Those were stirring days, when Gandhiji went up and down from Wardha to Delhi, when the fate of a whole country seemed to hang on the upshot of a conference or two, when it seemed as though with a little tact and some effort and understanding on the other side, the fate of a continent could be changed. We now know all that to be a perfect mirage. We are properly on our guard against comforting illusions of the kind. And we have learnt, too, to respect those verities of politics which do not give way under the first onslaught of events. We now know that if there is war in Europe and that war is capable of spreading over all parts of the world, it would constitute no reason for the British Government going all out to placate the Congress or to inaugurate a regime of dominion status in the country. Equally would it be no reason for the leaders of the Muslim League undermining the whole basis of their present importance and, I must add, jeopardising the special interests of their community by agreeing to sink their differences with the Congress. All this will continue by them till the current forces of a changing world make themselves more irresistible.

After more than eighteen months of a war, which has nothing in common with the previous war, it is well to consider whether in this respect there has been any considerable change since the beginning of September 1939. I am far from being inclined to be dogmatic. Nevertheless, from the standpoint of its impact on India's foreign policy and her relations with them, it is necessary to make an attempt to get some light from recent developments. Recent events in Yugoslavia have, no doubt, tended to complicate the situation. Before the present coup could be carried out, it seemed fairly certain that Hitler had had the same success in Yugoslavia as in other parts of Europe and that Yugoslavia had the same fate as Rumania and Bulgaria. Indeed Mr. Matsuoka, the Japanese Foreign Minister, who is now on a tour to the European capitals, even sent congratulations to Von Ribbentrop on this diplomatic achievement. It would now appear, however, that Germany's satisfaction and Japanese congratulation were alike premature and that there was a large volume of opinion in the country which enabled Yugoslav leaders to arrest the signing of the pact with Germany and restore an altogether new Government in the country. The exact forces of strength for the authors of this coup are difficult to ascertain. They might have counted on Russian sympathy and British help and American aid in the extremely couragous course which they have now adopted. That the army and airforce are said to be acting under the orders of the new King shows that the new Government would call for the worst of Hitler's blitzkreigs to be removed from power. It is not clear whether these lightning changes came as a surprise to the author of the blitzkriegs and whether he would be prepared to enforce the pact which Yugoslavia's new government is to repudiate.

Whatever may happen it is more or less certain that Greece and Yugoslavia will give Britain a firm foothold on the Continent of Europe. It is no less certain, too, that Germany is well entrenched on the mainland of Europe; and if the movement of German troops into Yugoslavia should be too quick to render British or American aid effective, the present war will take on the unprecedented form of a struggle between a nation which is all powerful on the Continent and a world power which has its home in an island of the northwest, but will have to direct all its strategic movements against the enemy from the Mediterranean sea board of North Africa.

It seems quite possible that from quite an early stage Mr. Churchill envisaged the war in similar terms. For his attempt to size the problem was made soon after the miraculous escape from Dunkirk and the more or less unexpected collapse of France. The attitude of Spain was uncertain, there was no reason then to count on such resistance that Spain has shown since then to Germany's advances. It was at that time that Mr. Churchill talked freely, without any fear of inducing a spirit of defeatism

in the nation, of fighting Germany from the Dominions and from every corner of the world. It was then probably that this idea of challenging the Continent from a firm basis in North Africa took shape in his highly imaginative mind. A month or two after the collapse of France, he gave a few hints of major strategic movements in other spheres. These were soon followed by Greece's amazing success against the Italian army and the remarkable triumphs of Wavell in North Africa. Though now and again there was news of the infiltration of German troops in Southern Europe and of the movement of German airforce in places like Sicily, there can now be no doubt that, whatever may happen on the Continent of Europe, Britain's position in Africa remains impregnable.

Such is the position of the war to-day, a world power facing a nation which has got practically the whole Continent under its heel. But it is not too much to suggest that both the principal belligerents have certain loose ends in their policies to tie. Germany has to decide how and how far she would utilise her far Eastern ally. For Britain, the problem is to provide from now for the ultimate counter-offensive which will, once and for all, do away with this menace of German aggression. The position is entirely different to-day from what it was during the last war. For, at that time Britain had active allies on the Continent. Germany was not drawing her supplies from the reserves of a whole continent. Economic blockade, though it doubtless has its value, cannot have the same effect as during the last war. The need for a mighty counter-offensive, as overwhelming and irresistible as the German blitzkreig in Holland and other small countries, is indisputable. It is not to be expected that Germany will allow the preparations for such an offensive to be made without resistance of any kind and Britain will have to provide, what time she is engaged in beating off air-raids and making the most of the thrust from Greece for the distractions which the Germans, might cause in the far East. It may be said, therefore, that though at present there is good ground for gratification, and for every hope that the triumphant career of British arms has started, British policy has to become more pointed. Mr. Churchill's strong points are the thorough preparations against air-raids and against possible invasion of Britain, the strong position built up in North Africa, the Lease and Lend Act in America and of the efforts of the Eastern Empire countries of their co-operation in the final contribution to the war effort. Does such a position in the war call for better relations between India and Britain? It is from this standpoint that I indulged in the apparent digression into the course of the war. It would be certainly foolish to be dogmatic on the point, either way.

To the future of India, not only the developments of the war and their effects on Britain, but also the internal developments are of great importance. For my part, I cannot help the belief that to the final overthrow of German arms and the establishment of world peace, free India has to make a large contribution. But I leave that aside for the moment, to stress the simple fact that if the developments of the war affect the attitude of Britain towards India, they also affect the attitude of the various groups in India towards one another. No people in the world is so stupid as to look on at a trend of affairs within the country which have no reference to what is going on without. People hear of trouble brewing in Far East. The orphaned colonies of France and other European countries have their hands full. Indo-China and Thailand had their squabbles and their arbitration. And Japan sent an ultimatum insisting on the acceptance of the arbitration and gained her point. Her Foreign Minister is on a tour to the European capitals and assures the Germans that Japan is with them in joy and sorrow. People can't help viewing domestic politics against this background.

And so doing, what do they find? Congress continuing in its old policy of leaving everything in the hands of the Mahatma, who wrote not long ago that the Poona Pact is lapsed for ever, and the Muslim League still a pocket borough of Mr. Jinnah'. The League leader will not

accommodate the Muslim Government of Bengal even in the matter of the Pakisthan day!

People do react to such a ridiculous situation. And one hears quite clearly the rumblings of discontent. The Bombay Conference which took place a week ago has all the appearance of a flop. But there is surely more than meets the eye. And the authors of any such move have necessarily to bear a number of, not only considerations, but also contingencies in mind. But I have a feeling that forces are present which are working for the formation of a truly nationalist party, one which will not water down nationalism with love of office in more or less disregard of the terms, and at the same time not confuse it with those thoroughly unpractical ideas for which we as a race have a weakness. Both Congress and League have such unpractical ideas which incapacitate them for action in this emergency. The new party, if it is to have power, must certainly be on its guard against the danger on the one hand, of being suspect of what is known as political moderation and on the other, of getting committed to impossible ideas. The Bombay Conference has not so far laid its cards on the table. Pro bably, the sponsors are throwing out feelers in all directions; and if the response is heartening, they might make the bid. How the Mahatma will stand in relation to any move that may be made —and that move will not be very tender on absolute non-violence—is not clear. But there are many in the leadership of the Congress on whom circumstances have forced this devotion to undiluted non-violence. The Mahatma knows that; and after his experience of the movement during the last few months, he may be unwilling to give Mr. Rajagopalachari and others of his way of thinking a chance. The first issue of the new *Harijan* may have something to reveal.

The truest test of a Briton who is identified with India is that he feels profoundly when he retires from this country and that Indians, who had come into contact with him, feel the separation as profoundly. From my experience of over twenty-five years in this regard, I can say that, much as a Briton loves his country and his home, he cannot help suffering the most acute pang when he is obliged to leave the country of his adoption, if he is one of those who has lived and worked as other than a "bird of passage". There are, perhaps, not many of that class; but the few that answer to that description are enough to fill one such as me with a perpetual sadness. That they are affected by a like sadness is a tribute to a mutual regard which is the foundation of aught that is worth while in human contacts. My first instance of this kind was Sir Edward Levinge whom I knew as the colleague of the Maharaja of Darbhanga to whom I was private Secretary at the time. Sir Edward retired from membership of the Bihar Executive Council a few months before the Maharaja did; and I can well recall the poignancy of his feeling at leaving what had been his field of activity for the best part of his life. George McNair, the famous solicitor of Calcutta, retired from India again and again, only to come back again and again. At one stage, he had nearly fixed up to settle down in Ootacamond in a house I was to arrange for him. Which reminds me that Mr. Neville, the Secretary and Treasurer of the Imperial Bank of India, is retiring shortly and also proposing to make a temporary sojourn in Ooty. Mr. Neville's retirement creates the kind of void which is caused by something, which is part and parcel of life, as we are accustomed to know being torn off. A sweeter, daintier, more competent officer, it will be hardly possible for the Imperial Bank to secure for this high office. Next to the Managing Director, the most responsible office in the Bank is the Secretaryship of the Calcutta territory. Mr. Neville filled that office with a natural ease and with perfect dignity. He has given thirty-five years to the Bank: one wishes he could go on giving more and more of his years. With minimum fuss and with maximum efficiency Neville has carried on his work; and, to every one who looks upon Clive Street as a field of his activity, his retirement will be a personal loss.

His place is taken by Mr. Morehouse—one whose selection for what is known as a selection job is appropriate. Mr. Morehouse has reached the top rungs of the ladder in good speed—but not in greater speed than those who have known him knew he would.

Cheerio, Neville: Three cheers, Morehouse!

I hasten to felicitate Mr. Chunilal B. Mehta on his accession to the Presidentship of the Federation of Indian Chambers of Commerce and Industry. The Federation's Delhi session was really a good hit and I am glad that Chunilal B. Mehta, whose claims to his present honour had been somewhat ignored in the past, has come into his own. The election of Gaganvihari L. Mehta to the Vice-Presidentship is not a surprise to me, at any rate, who has watched with a prophet's delight his growing ascendancy in the counsels of Indian commerce and industry. Mr. A. L. Ojha may well lay down his strenuous term of office with the satisfaction that the great work is in fully capable hands. May the Federation ever grow in stature and power!

(From Our Correspondent)

New Delhi, March 26.

It took no less than six days for the Central Assembly to have its say on the Finance Bill on the motion for consideration. Opposition to the motion was based mainly on constitutional grounds—inevitable even in ordinary times but all the more so under present conditions which have brought to the forefront the demand for a national government at the Centre. Still points of financial importance raised during the debate were many and varied. There was the demand that side by side with taxation for raising additional money there should also be retrenchment to release funds for more essential expenditure. To this the Finance Member's reply was; "The word "retrenchment" in my opinion is entirely out of place at a time like this, because the problem at a time like this is to enable the Government machine to take on more activity if possible. Now by general consent the scope of Government's activities is daily being widened and therefore the whole conception of retrenchment, that is to say of lopping off branches of the tree or of reducing whole parts of the machinery is entirely out of place." The Finance Member agreed however, that it was the duty of the Government to see that the activities which the Government must undertake at this time were carried out with the maximum regard for economy.

That was as far as the Finance Member was prepared to go, but it is clear from lobby comments that the position is not regarded as entirely satisfactory by the members. With all its efficiency and zeal for economy the machinery set up by the Finance Department cannot be expected to inspire the same amount of public confidence which a non-official body consisting of elected representatives entrusted with the task of examining the Government's expenditure methods and showing ways for economy can claim. The Finance Member pointed out that in order to secure continuous control over the vastly increased Defence expenditure, there had been an increase of no less than 28 officers or something in the order of two hundred per cent in the higher staff. So also in the Military Accounts Department which is responsible for the initial audit and accounting of expenditure, there had been an increase of some 60 to 70 per cent. This however does not meet the main objection voiced by non-official members that the latter have no means of satisfying themselves that there is no waste or needless expenditure. As the Commander-in-Chief is now engaged in considering what should be done to secure close relationship between the Defence Department and the Central Legislature, it would be well if the Finance Member can also have a strong committee to advise him on matters of financial policy—particularly on ways and means for ensuring the strictest economy in expenditure. It is also contended that the war, though it has widened the range of activity, cannot be said to have ruled out the case for retrenchment, for scope for the latter still exists to a degree well worth the Government's attention.

Another interesting point which elicited discussion was the financial relation between the Centre and the Provinces. According to the Finance Member the working of the Niemeyer Award even as amended, has left the Provinces in a position more favourable than they could ever hope to be but for the outbreak of the war, while the Central Government is a good deal worse off and faces a more difficult position than it would have done obviously if war had not broken out. "Most of the Provinces find themselves comparatively well off ; some of them find themselves distinctly affluent at the present time" added the Finance Member. The conclusions to be drawn are, in the main, three. Firstly the time has come for approaching the provinces with a request that they should take over a larger portion of the cost of passive defence activities, such as air raid precautions or civic guards. Secondly, as stated by the Finance Member, it would certainly suit the Central Government better if Provincial Governments could refrain from raising additional taxation at this time because obviously the needs of the Centre are such that the capacity of the taxpayer is likely to be heavily drawn upon for Central purposes and any other demands which are made on the same pocket must conflict to some extent with the requirements of the Centre. Thirdly is the need for the Provinces to keep a careful check over expenditure and avoid such non-essential items, such as public works expansion which can well be left to a more suitable period after the war. In this connection the Finance Member himself said that both in Bombay and Madras which are in the happy position of enjoying large surpluses the money is being put aside into a fund which will be available for financing desirable expenditure at a later stage.

For some reason the Finance Member has not cared to follow the example of his predecessor and convened a conference of Provincial Ministers. When the first conference met at the instance of Sir James Grigg, the conditions were very different, for the new Congress Ministries had only recently entered on their duties and were anxious to find new and expanding sources of revenue to finance their programmes of work. Even that conference, despite the emergence of rival claims, helped to promote a good measure of understanding. The need for such a conference is all the greater to-day, as in war time co-ordination of financial policies and the conservation of economic and financial resources for fulfilling the main task of finding the required money for work connected with the war which may well be a prolonged one, is absolutely essential. The speech of the Finance Member has left the impression that this co-ordination is not present to that extent which is necessary in the present circumstances. The recent visits of the Governors to New Delhi provided an opportunity for an interchange of views on this important subject, but the need for a formal conference of Finance Ministers to consider the problem in all its aspects and arrive at certain well-understood principles for the war period is undoubtedly urgent. It is hoped that an early opportunity will be taken in Simla to convene this conference.

The old controversy—whether the amount required for war expenditure should be met from taxation or loans—was easily disposed of by the Finance Member. The test which he applied was first to ascertain what it was reasonable for the taxpayer to bear today in the way of sacrifice and when that has been decided, to have recourse to borrowing. "You have to remember," cautioned the Finance Member "when laying off burdens for the next generation that the experience of history is that the next generation always has its own problems to face as well." In his opinion the additional sum of Rs. 30 crores per year which is the increase in taxation compared with the pre-war year, is not too great a burden on the present generation, but then there is still the other question—has the Finance Member chosen the right way to raise this money? The suggestion was made that the salt tax could have been increased as an alternative to the present taxation measures. This provoked the categorical statement from the Finance Member: "I shall tell him that the salt tax and other taxes are taxes which have undoubtedly to come under review and that there are circumstances in which the salt tax should undoubtedly be increased, circumstances in which it will be the duty of the Finance Member, whoever he may be to increase that tax. But those would be circumstances which are somewhat different from the circumstances prevailing at the present moment." The point to which he drew attention was that at the present time the additional expenditure was largely in spheres which increased the income of the commercial and industrial classes. "And at the same time there was the fact that the income of the agricultural classes had increased. On this ground he felt that increase in direct taxation was more justified than increase in "indirect taxation which must fall to be borne by the masses of the people." It is evident that the Finance Member is reserving these major revenue—yielding items for future use when the need may be greater, for he admitted in his speech himself that "direct taxation was now getting to what he may call a very respectable height."

A concerted attempt was made to persuade the Finance Member to levy a cor-

Bombay March, 26.

The cotton market has experienced in full measure the efforts of the bears who have in a nervous mood done more than the bulls to propel prices upward; some part of this movement is reflected in the Bombay piece-goods market. Cotton goods are in demand and prices keep rising as imports are scanty and stocks have been drained. Clearances during the past week have been distinctly satisfactory and the rise in textile consumption is not without a favourable effect on cotton prices. Forward trading has been restricted owing to the rising tendency of prices. Lancashire goods encounter keener demand but prices, based on replacement costs, are not attractive to local buyers. The late rise in Japanese goods has stimulated interest among consumers, and stockholders have found no difficulty in disposing of available supplies. As replacement costs tend to rise, interest in imported goods may decline abruptly. The fact that stocks of Indian goods at end February happened to be the lowest for many months should help sales of Indian goods in the immediate future. It is, however, believed that sales in February was stimulated by baseless fears of an excise duty on cotton mill production. Consumers show greater interest in coloured and fancy goods and mills are preparing to compete with the better grades of handloom goods. Reports from Ahmedabad indicate that if superior goods are slow to sell, there is no reason to anticipate that demand will not broaden and upcountry centres including Amritsar are expected to increase their stocks now that Holi is past and the seasonal improvement should continue.

Sir Alexander Roger in a farewell interview to the press here reviewed the work of the Ministry of Supply Mission and outlined in a somewhat indirect manner the recommendations that are expected to help and hasten industrialisation in India. Figures as to the miles travelled by the mission may be misleading but there is the fact that Sir Alexander and his Mission visited 700 factories and held at least 500 conferences before preparing their report. He referred to the demand for guidance and the desire to help. He said that the Mission had uncovered resources of production both of raw material and manufactures which had never been considered or ever known hitherto and which will be of immense service. He added that the Mission had pronounced in favour of factory expansion on a large scale. The factories are meant for war work but the machinery will be useful when peace comes and the net addition to the industrial capacity of India cannot but help. Every phase of the possibilities of Munitions production in India has been examined according to Sir Alexander Roger who said that the Mission in six months had got through a lot of work. He added that many members of the Roger Mission had worked without pay, giving up their own business at home. Though many had industrial interests, they had open minds, and far from cherishing any prejudice against the progress of Indian industry were ready to advance it by all means at once. He declared that India would come to appreciate the disinterested character of the advice tendered by the Mission which came out on a crusade for the production of Munitions, and if, our work leads to delivering the goods this will be sufficient reward to us. The rapid initial survey of the Roger Mission is likely to form the basis of larger and longer inquiries and inquiries into gaps in the industrial fabric may well be guided by the data assembled already in connection with the survey of resources.

Bombay is somewhat relieved to find that the Princes are more united than the political parties. The superficial agreement reached by the Bombay Leaders Conference is not half so impressive as the agreement among the Princes, first about their duty to help Britain in the war, and secondly, about their own importance. They want a war advisory council and the resolution passed last week answers to that put out by the committee of State Ministers from Bombay not long ago. The Viceroy's complacent survey does not lead to the conclusion that the Princes will be forced to stomach the idea of federation. Representation on the Eastern Group Council has been secured without difficulty. If the Viceroy is still keen on federation the Princes know that the constitutional impasse will strengthen their position. The reform movement within the States has not slackened. Baroda and Mysore are trying out dyarchy in view of the successful results obtained in Cochin. The Viceroy's advice to pool sovereignty is intended to produce co-operation for the sake of better police and judicial administration but not all Princes are desirous of sharing authority with their subjects. The Kathiawar States have lost their reforming enthusiasm. The situation in Limbdi has led to the appearance of appeals against the shipment of cotton grown there. The Chancellor of the Chamber who believes in keeping to the present order is not likely to advice a *detente* and not all the plane funds can hide the fact that many of the Rulers of the States have to set their houses in order.

The slight relief to the Bombay taxpayer promised by the Budget does not hide the fact that this gain is from the higher excise revenue. Though foreign liquor is still banned there is no trace of enthusiasm for prohibition and the High Court judgement is a *damnosa hereditas*. The reduction in Property Tax is due to the revenue surplus for 1940-41 amounting to over a crore. The relaxation of rules relating to the taxation of trusts and wakfs was overdue and Sir Roger Lumley's action is popular though belated.

Local shareholders of the Bombay Telephone Company are apparently in two minds about the offer communicated by the Government of India which has decided on the purchase of the undertaking before 1943. A letter in the papers draws attention to the disadvantageous terms of the offer. The writer of the letter speaking on behalf of dissentient shareholders refers to the prices paid for the shares by holders in many cases and asks why the price of Rs. 89.15 inclusive of a dividend of Rs. 2-8 has been fixed. It has been suggested that if the holders of 75 per cent. of the shares refuse to accept the offer the matter can be taken into Court and the price can be raised. Even if the application fails, no harm will be done, and so a start has been made in connection with the institution of proceedings.

A Resume of Commodity Markets

THERE have been no important developments during the past week in the several commodity markets but it is satisfactory to note that a generally better tone is noticeable in nearly every market and closing quotations are in most cases around the highest levels for the week. With the exception of the raw cotton market, which has been irregular and the bullion markets, which have been uninteresting, there has been greater activity in all other markets. It is held that prices for commodities are rather at low levels for war period and that with any improvement in demand there should be a good rise in prices.

In this connection, it was pointed out last week that the freight situation was the important factor governing the course of prices and that the earlier rise in values was mainly due to the hopes regarding the possibility of an improvement in the freight situation. There was naturally a reaction when the hopes were chilled but the recrudescence of reports during the last two days, that there would be greater freight allotment in April, have been responsible for the resumption of the upward movement. The hessian and linseed markets are firmer while the wheat market has been very active on large scale buying. There are again reports regarding the possibility of largescale buying by Government for military purposes.

Among other markets, Cotton has been rather irregular after the recent hectic rise in prices last week. There has been no suggestion of weakness but there is a feeling that any further rise in prices can be possible only with a good increase in exports. The technical position of the market is to a certain extent vulnerable at the present moment. The report that the shipments to China had been cancelled were responsible for a sharp break in prices yesterday.

Jute

The continued strength of the raw cotton market and the reports regarding the prevalence of dry weather conditions in the mofussil have been mainly responsible for the firmer tone of the raw jute market. It is now pointed out that mills are short of about 5 lakhs bales for completing their quota for the first three periods of the agreement and that with the recent large forward sales it would be possible for mills to complete their full quota by April 15. Mill buying has not been quite on a large scale but with three weeks more the quota can be expected to be completed. What is important at the present moment, therefore, is that the Bengal Government should ensure that they carry out their programme of regulating the crop for the next season. The weather has favoured the Government so far. In the absence of sufficient rain, sowings have been considerably delayed. Government propaganda in the mofussil has been intensive and if they are only on the alert during the next three months the problem of stabilising jute prices would have been successfully solved.

Jute Manufactures

The jute manufactures market is rather strong and there is a good premium for the near positions. Mills are absolutely unable to accept orders for early delivery. The sales by mills for this and next month during the week ended March 22, 1941, amounted only to 83.43 lakhs yards. There is good demand from overseas countries and exports are restricted only by the scarcity of freight. The reports that there would be greater allotment during the next month have resulted in a good rise in prices.

Cotton

The raw cotton market has been very steady for the most part of the week. Earlier in the week a firmer tendency was noticeable but towards the close the difficulty in the way of exports has resulted in a recession in values. Reports from cloth markets are encouraging and with the volume of enquiries now pouring in, the industry would be unable to cope with orders in a short time. Mill consumption is already at a record level and it is therefore questionable as to what extent the remaining surplus can be absorbed.

Rubber

The suggestion that American ships should be sent to Malaya to clear the surplus stocks of tin and rubber has been responsible for the sharp decline in the quotation for forward positions. Till Tuesday this week the quotation for forward was at a premium of ⅛d. over spot, *i.e.* the quotation was as high as 14⅜d. early this week. There has since been a sharp reaction to 14⅛d. The quotation for spot, however, has been well held around 14 7/16d.

UNITED INDUSTRIAL BANK LTD.
7, WELLESLEY PLACE, CALCUTTA
A SCHEDULED BANK

The share subscription list will remain open until further notice. Application Forms etc. can be obtained from Head Office or any branch of the Bank.

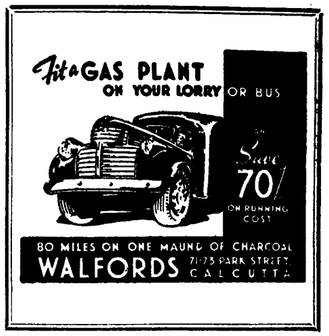
Jute and Jute Manufactures

(From Our Jute Correspondent)

Calcutta, 27th March.

AFTER all the controversy and clamour, the position of the Board of Control with regard to the method of fixing the Clearing rate seems to be very much *in statu quo ante bellum*. It will be remembered that about two years ago the Board agreed upon a convention for arriving at the Clearing Rate in such a manner as to discourage undue speculation, and this convention was embodied in a resolution in terms of which the Board has proceeded ever since. It must be remembered that Government has been represented on the Board all this time and has consequently been privy to all the Board's actions, though if the truth be told, the Government representative seldom thought it necessary to attend the fortnightly meetings of the Board. Only recently the practice of the Board in acting in terms of the two-year-old resolution has been called in question as being unconstitutional, and at the instance of the Government representative, the terms of the resolution were embodied in a new Bye-law. Before this was adopted however it was thought desirable to submit it for legal opinion and while giving legal approval to the proposed Bye-law, the solicitors point out that, as the Board can rescind any Bye-law by a simple majority, the position is no more stable than when the Board voluntarily circumscribed its discretion by the terms of the resolution. Much ado about nothing. After all the Board is presumably a responsible body, representative of all sections of the Jute industry, whether keenly interested in the working of the Futures market or not, and it was improbable that they would lightly betray the confidence reposed in them by playing fast and loose with the fixing of the Clearing Rate.

One grievance however, the Fatka operators still have. It was one of the complaints of Government that the transactions in the open shipment market on which the Spot rate was based, were not in real London Jute Association First, but something inferior, what was generally known as the H.A.R.B. First, the mysterious initials representing, Hamburg, Antwerp, Rotterdam, Bremen, which in the good old days of peace were the principal ports of discharge or transhipment for continental jute. It is perhaps correct to state that the average H.A.R.B. First would not stand up successfully to London Arbitration, though it was all subject thereto. But in any case the slight inferiority of the H.A.R.B. First is no new thing and has been tacitly recognised in the trade for years. But what was dealt in the futures market was certainly more the H.A.R.B. First of the open shipment market than the actual London Group Mark, so the Fatka operator now has the grievance that the Clearing rate in his market is now being fixed in relation to something different from what is handled in the daily market dealings. For at the behest of Government, the Board of Control has lately been ignoring the open market quotations for Firsts (of whatever sort; admittedly there has been very little genuine business wherewith to test the market), and has been taking into account the actual packing cost of a London Jute Association First mark which would pass in arbitration either here or in London. This latter certanly is what the Futures contract calls for and operators can scarcely complain if they have allowed practise to drift into something different.



Dundee seems to be becoming anxious about its supplies of Jute and importers have been complaining that gunnies have been getting an undue share of the allotments of available shipping space as compared with the raw material. It is difficult to know what the Controller may have up his sleeve in the way of jute diverted from other countries when France collapsed and Italy came into the war. But from last advices received, the trade was getting definitely bare of stocks and allotments of fresh freight have been few and far between lately. This week some 6,500 bales space was allotted to the whole of the shipment market, which is a mere drop in the bucket to the quantity awaiting shipment, some of it since October of last year. This 6,500 B/s also represents little more than two days supplies to Dundee if they are working anywhere near full capacity, which recent reports suggest that they are.

At the 15th of March, the end of the third quota period of the Delhi purchase scheme, Mills purchases are reported to have been just on 5 lakhs of bales in arrears. The fourth and final quota period from 16th March to 15th April called for a purchase of only 5 lakhs of bales and with pretty brisk trading in the Fabrics section there seems to be no reason why Mills if they wished could not catch up most of the arrears before the last official date. Storing capacity in many cases is a difficulty, and this is equally a snag if Government proposed to make up any shortage by purchasing on their own account through the agency of the Mills. But with the market in as steady a position as it is at the moment, there seems little justification for any further intervention.

The Export Jute market has not been active though the tone has ruled steadier in sympathy with Futures. Short Group Dundee Daisee was done at Rs. 43 and Rs. 44, ordinary Dundee Daisee at Rs. 36-8 and Rs. 37 and Dundee Tossa 4s at Rs. 36 all for April/15th May shipment. Quantities were not large. A fair turnover has been done with Mills in all grades of Pucca Bales at official minimum prices, with 8 to 4 rupees more paid for special packing. Some high quality marks were also reported. The Futures market has ruled higher, mainly owing to the lack of rain in the districts delaying the sowings, and also in sympathy with Fabrics. From an opening rate of Rs. 38-4 there was a dip to Rs. 37-4 but after that round about the Rs. 40 level was established with a high point at Rs. 41-8 and closing at Rs. 40-12.

In loose jute there has been little doing with plenty of sellers of Indian packing in 25/75 assortment at minimum rates. Europeans are now offering Bottoms only. Some European Tossa Bottoms sold to Balers at Rs. 7-4 all districts. There is nothing to cause anxiety yet in regard to sowings. In fact if sowings go down late there is less chance of interruption by a dry spell after the seeds germinate. This delay may be of assistance to the restriction scheme in as much as cultivators may be afraid to sow chur lands so late. Providence may be on the side of the Government! In any case there will be ample area in the mid and high lands to provide all the jute which will be needed next season.

The Fabrics market has been rather sensitive and there have been some fairly rapid fluctuations as demand for near shipment waxed and waned. This feature has been most marked in near hessians, heavy goods and forward hessians pursuing a steadier course with an upward tendency. Ready hessian rates varied from Rs. 15-8 low to Rs. 16-12 high in nine porters and from Rs. 20-10 low to Rs. 22-4 high in elevens, the closing being firm almost at the top rates. Mills are very fully sold now up to June and enquiry from the Plate this week has firmed up the position from July on to the end of the year. Among the sales reported have been 11 porters at Rs. 18 to Rs. 18-8 July/September, Rs. 17, to Rs. 17-4 October/December and Rs. 16-8 January/March. In nine porters, Rs. 14 October/December and Rs. 12-8 January/March. In Cornsacks, Rs. 35 to Rs. 35-8 July/September, and Rs. 34 October/December. Liverpools at Rs. 40 May and "A" Twills at Rs. 43-12 ready. Heavy Cees were taken at Rs. 34 July/September and Rs. 33 October/December.

JUTE

Calcutta, March 27.

THE continued firmness of the raw cotton market and the reports regarding dry weather conditions in the moffssil have been responsible for the firmer tendency of the raw jute market during the past week. Mill buying has not been on a large scale, but a steadier feeling has been noticeable in all sections in sympathy with the futures market. It was pointed out last week that, with the slow progress of sowings in the mofussil and the higher level of prices for jute manufactures, a rise in prices for jute was inevitable. The reports that mills will endeavour to fulfil the quota under the Delhi agreement also had an encouraging effect. In the absence of any improvement in the freight positiop, any substantial improvement in prices is not possible.

In the loose jute section, as pointed out above, steadier conditions were noticeable on reports of dry weather conditions in the mofussil. Earlier in the week, some buying was reported by mills. Some business was reported in European Tossa Bottom alone at Rs. 7-4 per maund.

A larger amount of business has been done in the pucca bales section. Shippers, however, have been inactive; and most of the business done has been with mills. Dundee Firsts and Lightnings for local delivery were done at Rs. 80 and Rs. 68 per bale. Dundee Daisee 2-3 and Lightnings 2-3 were done at Rs. 36 per bale.

In the futures market, firmer conditions were noticeable early in the week. There was a rise in the quotation to Rs. 41-2 and thence a reaction to Rs. 39-14. This morning a firmer tendency was noticeable with the quotation at Rs. 41, though there has been a recession in the afternoon to Rs. 40-6 on reports regarding showers in the jute growing districts.

JUTE MANUFACTURES

Calcutta, March 27.

The heavy selling by mills last week brought about a sharp reaction in prices and 9 Porters ready came down from Rs. 16-12 to Rs. 15-5. As the demand for near positions, however, is unsatisfied, and mills are free sellers only for the farther positions, there has been a recovery. The publication of the American stock and consumption figures also has had an encouraging effect. 9 Porters ready are now quoting Rs. 16-4, April Rs. 16-3-6, May/June Rs. 15-12, July/September Rs. 14-12 and October/December Rs. 13-12. 11 Porters ready are Rs. 22, April Rs. 21-6, May/June Rs. 20-2, July/September Rs. 18-4 and October/December Rs. 17-2.

In the heavy goods section, quietly steady conditions have been noticeable, with not much of business passing. B Twills for April shipment sold on the basis of Rs. 35-6, Liverpool Twills for the same position Rs. 41 and Cornsacks Rs. 38.

COTTON

Calcutta, March 27.

The Bombay raw cotton market has been very steady during the past week. Earlier in the week, there was a further sharp rise in prices on good bull support and mill buying. The large increase in production of Indian mills and the fears that there would be a shortage of the staple varieties have been responsible for the strength of the market. The reports that the House Senate Committee will report favourably on the Bankhead Bill have had an encouraging effect. There has been some reaction from the higher levels earlier in the week, but the undertone is very steady. Broach April/May are quoting Rs. 239-8, July/August Rs. 237, Oomra May Rs. 174, July 174-8, Bengal May Rs. 134-8 and July Rs. 136-8. The highest quotations for the period were Broach April Rs. 248-8 and July/August Rs. 248. It is interesting to note in this connection that the earlier rise in prices was confined mainly to Broach cotton.

Overseas markets have not been quite active and there has not been any appreciable rise in prices. It is, however, confidently expected that the farm policy of the Administration will result in an appreciable rise in prices for new crop. The quotation for May is 10.80 cents and July 10.77 cents. In the Liverpool market, there is little of interest and quotations for May and March are lower at 8.57d. and 8.58d. respectively against 8.71d. and 8.72d. respectively.

PIECEGOODS

Calcutta, March 27.

The piecegoods market has been very active. The volume of enquiries on account of government orders and foreign countries has been so great that, if enquiries were to come in at this rate, indigenous mills would be unable to cope with the demand. The strength of the raw cotton market has enabled manufacturers to adopt a firm view and replacement costs in most cases have been marked up. Owing to the difficulty in ensuring deliveries and the fears regarding further rise in costs, dealers have been anxious to secure their requirements. As a consequence, manufacturers have been able to accept orders on their own terms. General buying, however, has not been very keen, as consumers are not prepared to follow fully the advance in replacement costs. However, there has been some improvement in bazar values. The bulk of the forward business done during the week has been placed with indigenous mills. In Japanese goods, there has been greater enquiry, but bulk transactions cannot be concluded owing to the uncertainty regarding the political situation. Popular styles have been bought ex-stock.

The yarn market has been active with considerable business reported by South Indian Mills at higher prices with extended deliveries. Good business has been done in the medium and coarse kinds. Offtake from consuming centres also has been satisfactory.

WHEAT

Calcutta, March 27.

The better tone of the commodity markets and heavy speculative buying in the Karachi market on export demand have been mainly responsible for the sharp improvement in values. The rise in prices is particularly pronounced for the near positions. There is a general feeling that there will be considerable buying of wheat shortly, and as prices for food crops are considered to be rather low, stockholders are inclined to keep back their supplies. Also, higher Chicago advices and the reports regarding a higher loan have led to straddle buying. Choice White ready are now quoting Rs. 33-6, March Rs. 33 and July Rs. 28-6. The quotations at the end of last week were Rs. 31-3, Rs. 30-13 and Rs. 27-12-6 respectively.

The local market is firmer in sympathy with other centres. The recent reduction in rates for flour and flour products has not increased demand to any great extent and mills are buying only in small quantities. The rise in prices is purely speculative.

It has been decided that the import duty on wheat and flour should be continued for another year.

MADRAS GROUNDNUTS

Madras, Mar. 25.

The local market improved steadily during the week, and a fair volume of business was reported. Shippers' buying limits opened on Tuesday last around Rs. 22-4 for Machined (Per candy of 531 lbs. ex-coast godowns), and advanced to Rs. 22-8 and 23-4 at the close. Local buyers' limits likewise improved from Rs. 20-12 to Rs. 21 and Rs. 22 at the close. The Ministry of Food was interested in about 6,000 tons of Groundnut kernels for export from Bombay and Madras. A forward market in Groundnuts has been started in Madras under the aegis of the Madras Groundnut Merchants' Association. Prices for delivery 6th to 31st May opened at Rs. 22-6 and went up to Rs. 25-4 closing a little lower. It is reported that about 700 tons were done so far. The development of a Futures market in this city is a long-felt want and is welcomed in local business circles. At present, free arrivals continue in the Kondapuram area and in centres of the Chittoor district. The quality of the southern nuts left a good deal to be desired this season, owing to the larger proportion of shrivelled nuts, but the northern quality is reported to be up to the mark. Groundnut oil continues to be in good demand locally and for export. There was fair buying by Calcutta and Rangoon buyers. The latter are reported to be buying largely on account of rumours that the Burma Government is likely to impose a duty on the exports of Groundnut oil from India. Prices locally ruled firm throughout the week around Rs. 45-8 to Rs. 46 for "Chekku" quality, Rs. 49 to Rs. 50 for "Produttur" quality and Rs. 48 to Rs. 48-8 for local "Expeller" quality, for ready lots, loose, per candy of 500 lbs. ex-Sellers' Madras godowns.

MADRAS HIDES AND SKINS

Madras, Mar. 25.

Telegraphic advice has reached Madras from the representatives of the Southern India Skin and Hide Merchants' Association now in New Delhi that the Honourable the Commerce Member with the Government of India gave a very sympathetic hearing to the deputationists and has promised to arrange for adequate shipping space to clear the present heavy stocks of Hides in Madras or alternatively to arrange with the Ministry of Supply for financial accommodation to the stockists pending shipment. It is reported that two steamers expected at the end of the current month will clear about 3,000 bales. Apart from this quantity, unshipped February and March requirements amounting to nearly 8,500 bales will have to be found shipping space in April, according to the advice received about the middle of the current month. There is, of course, very good demand for Tanned Kips of all weights and grades from Britain, but both importers and shippers are anxious to get shipped goods already booked before extending their commitments. In Madras, dealers and shippers are primarily concerned with clearing present heavy stocks, and there is therefore general disinclination to operate on the local market at present. There is considerable dissatisfaction at the system of quotas in the allotment of shipping space, and the most seriously affected section of the trade seems to be the tanner-shippers. Owing to the shortage of freight space available, quotas are now being issued on the basis of the exports of the various shippers during the years 1938, 1939 and 1940. It is well-known that the more important shippers—European and Indian—whose standards and marks are well established, and the tanner-shippers are those that carry the largest stocks of baled goods sold and ready for shpiment. Under the system of quotas now in force, shippers who have little or no stocks and shippers who have either suspended their business or curtailed their activities have been given a higher quota whilst those carrying enormous stocks have been awarded, in some cases, negligible quotas. This anamolous arrangement is likely to lead the tanners to curtail their production considerably and act as a brake on any buying activity locally, as the larger buyers will have no incentive to buy while they carry unshipped goods. A more scientific device will have to be followed to clear baled and sold goods.

(*Continued from page 586*)

responding duty on the imports of artificial silk piecegoods. In his speech Sir Homi Mody objected to the duty on artificial silk yarn on the ground that it was a duty on raw material but the specific suggestion which he made was that he should reduce by half the proposed increase in the duty on yarn and put an additional anna per yard as duty on piecegoods. Sir Jeremy, however, was in no mood to yield, for he argued that as the protection enjoyed by the industry had only been reduced from 27 annas a pound to 25 annas, the difference was negligible. In the matter of export of artificial silk he, however, agreed that the question of relief to export trade from a duty on raw material which went into the making of a finished product deserved serious consideration at a suitable time.

Stock Markets to-day and to-morrow

INDIAN IRON INTERIM DIVIDEND

It has been a quite uninteresting week on the Stock Exchanges, both in Calcutta and Bombay. Continued uncertainty regarding the Balkan situation had a restraining influence. It is, however, thought that the *coup de etat* in Yugoslavia would have an encouraging effect on the market, though there is unmistakable anxiety regarding the next German move.

The feature of the week is the declaration by the Indian Iron & Steel Company, Limited, of an interim dividend of twelve annas per share, the same as last year, for the year ending March, 1941. The maintenance of the interim dividend at the previous level lends strength to the feeling that the total distribution for the year will not be lower. As a matter of fact, I am inclined to believe, that with production running at a very high level in recent months, it would be possible to declare even a higher dividend. Even on the basis of last year's dividend the shares quoting at present around Rs. 31-12 *cum-dividend* are attractive as the yield is 6.45 per cent. tax-free. They should be quoting above Rs. 35 if circumstances were more normal.

* * *

The results of the Macneill group of coal companies for the half-year ended 31st December, 1940 bring forth clearly the difficult conditions in the industry. The acute shortage of wagons supplied for carriage of coal within the country and the scarcity of shipping space have resulted in an appreciable decline in despatches for the whole group from 11,05,449 tons for the half-year ended June, 1940 to 10,11,266 tons for the latter half of 1940. Raisings, however, have been maintained at a high level, being 10,56,636 tons against 10,06,334 tons.

Since the close of the half-year there has been a substantial increase in stocks at the collieries, and it has been thought advisable to restrict output until there is an improvement in offtake. The increase in freight rates and costs of production combined with the lower level of despatches have thus resulted in reduced earnings for the group. Even allowing for the increased raisings, working expenses were more than proportionately higher at Rs. 33,50,950 against Rs. 30,33,564. The aggregate profit for the group before providing for depreciation and taxation works out to Rs. 12,60,160 against Rs. 16,82,327 or a decrease of 25.1 per cent.

As in the past the directors had adopted a conservative policy in the declaration of dividends it has been possible to maintain the ordinary dividends in all cases with the exception of the Dhemo Main Collieries, Limited. The dividends, both preference and ordinary, require Rs. 4,79,717 against Rs. 5,19,379 on the previous occasion.

* * *

The worst showing in the group is made by the figures of the *Hurriladih Coal Company, Limited*. Even with a large increase in raisings and despatches the net profit for the half-year is Rs. 56,610 against Rs. 1,08,206 for the previous half-year. The amount set aside to depreciation is Rs. 21,421 (Rs. 15,670) while the allocation to General Reserve is Rs. 10,000 (Rs. 43,800). The dividend has been maintained at 3¾ per cent. The amount carried forward is lower at Rs. 31,904 against Rs. 46,715 brought in.

* * *

A sharp decline in despatches is responsible for the lower level of earnings of the *Equitable Coal Company, Limited*. The net profit, before providing for taxation, is Rs. 8,22,686 against Rs. 11,72,933 for the previous half-year. The amount set aside to depreciation is Rs. 1,47,548 (Rs. 2,45,368). The allocation to General Development Reserve is Rs. 2,00,000 against Rs. 1,50,000. Provision for taxation and cesses is Rs. 1,50,000 against Rs. 4,43,435. The dividend has been maintained on the ordinary shares at Re. 1 per share. It is surprising to note that the directors should have been so conservative during the last two half-years. In view of the decline in earnings during the last six months no plea can now be put forward for an increase in the dividend distribution, but in view of the strong financial position and the possibility of an increase in earnings consequent on the amalgamation of the Aldih Coal Company, Limited, a higher dividend could have been paid to the shareholders. From this point of view the omission of the bonus in the half-year ended June, 1940 was not quite justifiable. Even with the reduced level of earnings the ordinary dividend is covered nearly twice.

In accordance with the resolution passed at the Extraordinary General Meeting of the shareholders held on the 27th August, 1940, the scheme of arrangement for the amalgamation of the Aldih Coal Co., Ltd, with this Company then adopted, and subsequently approved by them, the Aldih Coal Company is now in process of liquidation and the properties and assets of the company came under the management of the Equitable Company as from 1st January, 1941.

* * *

The year, 1940, has witnessed further expansion in the activities of the *Dunlop Rubber Company (India) Limited*. A considerable increase in turnover has been achieved compared with 1939, the total sales being Rs. 200.26 lakhs against Rs. 1,48.75 lakhs. The manufacturing capacity has been appreciably enlarged. It is significant, however, that the net profit does not show such a spectacular rise as on the last occasion. The net profit before providing for taxation is Rs. 44,51,542 against Rs. 38,15,750 for 1939. The amount set aside to depreciation is Rs. 5,73,296 against Rs. 5,36,304 while the provision for taxation reserve is Rs. 24,50,000 against Rs. 10,50,000. There were large allocations to the General Reserve and to other funds on the last occasion. The dividend has been maintained at Rs. 2 per share. The amount carried forward is considerably higher at Rs. 2,42,628 against Rs. 1,84,381 brought in.

* * *

The position as regards the Company's standard profit basis is still under consideration by the authorities, and the Directors, in recommending the transfer of Rs. 24,50,000 to Taxation Reserve, have again considered it expedient to take the most conservative view of the company's liability, based on the latest proposals contained in the Finance Member's 1941 Budget speech.

As the Directors themselves have pointed out, they have been conservative in the calculation of the liability of the company to the E. P. T. In view of the fact that earnings have continued to increase and it has been possible to maintain the dividend despite the large appropriation to taxation any favourable development should have an encouraging effect on the prices quoting for the shares.

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, March 28.

ABSOLUTELY dull and uninteresting conditions have been noticeable on the Calcutta Stock Exchange during the past week. There has been little fluctuation in prices. With public support on a very small scale, even jobbers have not taken any interest in the market. The developments during the week have not been quite favourable. The uncertainty regarding the Yugoslavian situation and the subsequent signing of the Axis pact by that country have forced operators to adopt a cautious attitude.

It was believed that the *coup de' etat* in Yugoslavia would have a stimulatnig effect on the market but there is considerable speculation regarding the next German move. In the absence of fresh buying and with the fears regarding further complications in the international situation the behaviour of the market during the week should be considered rather satisfactory. The under-tone in the several sections is quietly steady.

The giltedged securities section was inclined to be slightly easier with 3½ per cent Paper lower at Rs. 95-11 from Rs. 96 at the end of last week. There is no appreciable change, however, in the quotations tor terminable loans, 3 per cent 1963-65 being Rs. 94-14, 2¾ per cent 1948-52 Rs. 97, 3½ per cent 1947-50 Rs. 102-4, 4 per cent 1960-70 Rs. 108-14, 4½ per cent 1955-60 Rs. 113 and 5 per cent 1945-55 Rs. 111-14. Provincial loans are steady with 3 per cent issues 1952 at Rs. 97-4. There has been a further tightening in money conditions during the week and the Treasury Bills rate is higher at thirteen annas and one pie against twelve annas and five pies per cent per annum last week.

Bank shares have been easier with *Imperial Bank* fully paids at Rs. 1,540 and contributories at Rs. 383. *Reserve Bank* have been sticky around Rs. 104-12.

The results of the Macneill group of coal companies for the half-year ended December, 1940, have not had any effect on the market. Only, there has been some surprise with the declaration of a lower dividend by the *Dhemo Main Collieries, Limited* and the quotation for the shares has come down from Rs. 15 to Rs. 12-6. Other shares are uninteresting. *Amalgamated* were Rs. 26-8, *Bengal* Rs. 351, *Bokaro and Ramgur* Rs. 14, *Dhemo Main* Rs. 12-6, *Equitable* Rs. 36-1, *Mundulpoor* Rs. 10-2, *Nazira* Rs. 7-10, and *West Jamuria* Rs. 30.

There is not much interest in the jute section and quotations have been fluctuating around last levels. The strength of the jute manufactures market has not had any effect on prices for jute shares. *Howrah* are now quoting Rs. 51-6, *Anglo-India* Rs. 315, *Adamjee* Rs. 21-8, *Champdany* Rs. 163, *Bally* Rs. 224, *Kamarhatty* Rs. 465, *Lothian* Rs. 247, *National* Rs. 22-8, *Orient* Rs. 181 and *Presidency* Rs. 4-5.

The Engineering section has not been quite active and quotations are around last levels with Indian Irons at Rs. 31-14 and Steel Corporations at Rs. 18-15. The feature of the week is the declaration by the Indian Iron and Steel Company, Limited of the interim dividend of twelve annas per share, the same as last year. It would be remembered that last week there was a sharp relapse in the quotation to Rs. 31-10 on reports that the interim dividend would be passed. The declaration of the interim dividend of twelve annas per share makes sure that the distribution for the current year will be the same as last year, if not more. *Steel Corporation* have been fluctuating between Rs. 18-14 and Rs. 19-4. *Burn & Co.* were Rs. 384, *Arthur Butler* Rs. 13, *Hukumchand Electric Steel* ordinaries Rs. 10-11 and *Indian Malleable Castings* ordinaries Rs. 7-8. *Kumardhubi Engineering* were Rs. 4-2 and *Indian Steel and Wire Products* deferreds Rs. 36.

Among Utilities, not many transactions have been recorded. *U. P. Electric* were Rs. 189-8, *Upper Ganges Electric* Rs. 12 and *Shahjahanpur Electric* Rs. 6-4. *Bengal Telephone* were further higher at Rs. 19.

There has not been much interest in the Sugar section with *Cawnpore* at Rs. 17, *Buland* at Rs. 16, *Carew & Co.* at Rs. 9-3 and *Raza* at Rs. 16-2. *Murree Brewery* were Rs. 13-8 and *Purnea Sugar* Rs. 7.

There has been slightly more interest in the Tea section with *Hasimara* at Rs. 42-8, *Baradighi* at Rs. 43, *Huldibari* at Rs. 22-4 and *Teen Ali* at Rs. 15-4.

In the miscellaneous section, *Burma Corporation* and *Indian Copper Corporation* have been sticky at Rs. 4-15 and Rs. 2-3 respectively. *B. I. Corporation* were Rs. 4-10 cum-dividend, *Bararee Coke* Rs. 20-1 and *Dunlop Rubber* Rs. 37-14. The dividend of Dunlop Rubber Company for the year 1940 has been maintained at Rs. 2 per share. *Rohtas Industries* were at Rs. 20-4 ex-dividend. *B. B. Petroleum* were Rs. 3-12, *India General Navigation* Rs. 82 and *Bengal-Assam Steamship* Rs. 253. Among Paper shares, *Bengal Paper* were higher at Rs. 125 cum-dividend, while *India Paper Pulp* were Rs. 141-8 and *Titaghur Paper* ordinaries Rs. 17-7. *Mysore paper* were Rs. 13-12 and *Orient Paper* Rs. 11-2. *Midnapore Zemindary* were Rs. 70-8 and *Assam Saw* Rs. 3-4.

There has been very little doing in fixed-interest securities. Owing to the scarcity of offerings, business in public bodies' debentures has been very restricted. 3¼ per cent *Howrah Bridge* debentures were quoted around Rs. 98-8. Among industrial debentures, 5½ per cent *Carew & Co.*, second mortgage debentures were Rs. 101.

Among preference shares, not much business has been passing in jute mill preference shares. *Hastings* were Rs. 137-8, *Rameshwara* Rs. 11-3 and *Waverley* Rs. 52. Prices for first class preference shares are mostly unchanged. Among others, *Kumardhubi Engineering* were Rs. 119, *Dalmia Cement* Rs. 115, *Purtabpore* Rs. 15-8 and *Bengal Telephone* Rs. 11-13.

BOMBAY STOCK EXCHANGE

(From Our Correspondent).

Bombay, March 27.

Money.—Money continued to be easy, call money being quoted at ¼ per cent.

Exchange Market.—This section continued to be featureless, Banks selling T.T. at 1s. 5 31/32d. and buying three months' bills at 1s. 6 7/32d.

Securities.—There was little or no change in giltedged values during the week under review and the turnover was negligible. 3½ per cent Paper remained steady at Rs. 95-14 as against Rs. 96 in the previous week. Among other issues, 1948-52 changed hands at Rs. 97; 1951-54 at Rs. 99-6; 1963-65 at Rs. 95; 1947-50 at Rs. 102-6; 1960-70 at Rs. 108-15; 1955-60 at Rs. 113-8; 1945-55 at Rs. 111-12 and 3 per cent *Defence Loan* 1946 at Rs. 101-5.

Shares.—Barring temporary setbacks in mid-week, the local share market ruled steady during the week under review. Prices, after opening steady, slightly advanced, but sagged again towards the close owing to the lack of support. There was a tendency on the part of traders to await political developments. Steels and Textiles showed small changes in prices.

Textiles.—Cotton mill shares closed lower than in the previous week in the absence of buying enquiry coupled with the slight weakness of the cotton market. *Bombay Dycing* closed lower at Rs. 1,123-12 as against Rs. 1,146-4 in the previous week; *Central India* at Rs. 328 against Rs. 335; *Century* at Rs. 417 against Rs. 425; *Colaba* at Rs. 178-8 against Rs. 181; *Gokak* at Rs. 224 against Rs. 227; *Kohinoor* at Rs. 429-8 against Rs. 438; *New Great* at Rs. 444-8 against Rs. 457 and *Swadeshi* at Rs. 308 against Rs. 315-8. In the cash list, *Model Nagpur* closed better at Rs. 93; *Vishnu* at Rs. 1,402 and *Western India* at Rs. 1,205.

Hydro-electrics.—This section remained dull. *Andhra Valley* declined further from Rs. 1,840 to Rs. 1,810, while *Tata Hydro* were unchanged at Rs. 181. *Tata Power* showed a decrease of Rs. 30 to close at Rs. 1,630.

Steels.—Steel shares, after an initial advance, gradually declined owing to profit-taking. *Tata* ordinaries and deferreds, after opening at Rs. 398 and Rs. 2,055, touched a low of Rs. 393-8 and Rs. 2,025 respectively in mid-week. Towards the close, however, the shares met with some demand and recorded small gains, the ordinaries closing at Rs. 399-8 and the deferreds at Rs. 2,030.

Banks and Railways.—There was no change worth noting in Bank shares. *Bank of Baroda* were at Rs. 107-8; *Bank of India* at Rs. 141; *Central Bank* at Rs. 43-10; *Imperial Bank* fully paids at Rs. 1,555; contributories at Rs. 386-4; *Reserve Bank* at Rs. 105 and *Union Bank* at Rs. 6-8.

Among Railway shares, *Ahmedabad Prantej* changed hands at Rs. 838-12. *Tapti Valley* were quoted at Rs. 645.

Miscellaneous.—*Associated Cement* were marked lower at Rs. 144-8 as against Rs. 147-8 in the previous week, *Bombay Burma Trading*, after opening at Rs. 581-4, declined on lack of support and closed at Rs. 568-12. *Belapur Sugar* were done slightly lower at Rs. 217-8; *Shivrajpur Syndicate* at Rs. 32 and *Premier Construction* at Rs. 91-12. *Scindia Steam* were more or less unchanged at Rs. 21-4 and *Wimco* at Rs. 204. *Indian Iron* changed hands at Rs. 31-4 and *Steel Corporation* ordinaries at Rs. 18-15.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, March 27.

Dull conditions prevailed in the local market during the week under review and business continued to be restricted. Mill shares met with fair support. Rubbers were in fair enquiry, while Teas were unchanged.

Securities.—The securities market ruled dull during the week with some slight easing off in prices. 3½ per cent Paper closed at Rs. 95-10. 3 per cent 1963-65 came to business at Rs. 95-1; 3½ per cent 1947-50 at Rs. 102-7 and 4 per cent 1960-70 at Rs. 109-4. Among State Loans, 5 per cent *Cochin Loan* changed hands at Rs. 105-6. Provincial Loans were in keen request, 3 per cent 1952 *Madras* being done at Rs. 97-15; 1933 at Rs. 97-13 and 1949 *Punjab* at Rs. 98-2.

Mills.—The turnover in mill shares was fairly good. *Buckingham and Carnatic* were taken up at Rs. 252; *Cambodia* at Rs. 9-6 and *Mettur Industries* at Rs. 136-8. *Pankaja* were on offer at Rs. 92 and *Madura* at Rs. 40.

Utilities.—*South Madras Electric* ordinaries were slightly better at Rs. 13-4. *Cochin State Power*, after being done at Rs. 9-2, closed a shade easier at Rs. 8-14. *Vellore Electric* were done at Rs. 11-12 and and *Berhampur Electric* at Rs. 10.

Plantations.—A fair enquiry was in evidence for Rubber shares. *Cochin Malabar* came to business at Rs. 6-12; *Kalpetta* at Rs. 19; *Thirumbadi* at Re. 1-14; *Ayer Manis* ordinaries at Rs. 8-14 and *Velliamuttam* at Rs. 19-4. Among Tea shares, *Peermade* met with enquiry at Rs. 27-4 and *Periakaramalai* at Rs. 17-6. *Coonoor Tea* preferences came in for business at Rs. 115 and *Balanoor* ordinaries at Rs. 11-8. The *Peermade Tea Company, Limited* has paid a second interim dividend of 5 per cent, making 15 per cent so far. We expect a a final dividend of 7½ per cent, making on the whole 22½ per cent for the year.

Sugars.—Sugar shares showed less activity owing to the absence of sellers. *Mysore Sugar* had buyers at Rs. 50/8, while *Travancore Sugars* remained firm at Rs. 14.

Banks.—*Indian Bank* big shares were taken up at Rs. 126. *Indian Overseas Bank* were done at Rs. 50. This Bank has made a call of Rs. 30 per share and the shares will, therefore, be Rs. 100-80 paid-up from 1st July, 1941.

Miscellaneous.—*Mysore Chemicals* were on offer at 17-2-6. *Tata Chemicals* were done at Rs. 13-10. *Bangalore Municipal* debentures were crossed at Rs. 100-11. *Amrutanjan* preferences were marked at Rs. 99-8; *Spencer 'B'* preferences at Rs. 9-14; *A. V. Thomas* at Rs. 15-10 and *Mysore Stoneware Pipe* at Rs. 8-6.

LONDON STOCK EXCHANGE

Rather uninteresting conditions have been noticeable on the London Stock Exchange during the past week. The only feature of interest has been the strength of giltedged securities and Home Rails. There has been fair investment demand. The proximity of the Budget and the uncertain Balkan situation have had a restraining influence on other sections. Among India loans, 3½ per cent. Sterling Paper is higher at 99½. British funds have been very firm with 3½ per cent. War Loan at the highest level for the war period. 2½ per cent. Consols were 78, 3½ per cent. Conversion 99, 3½ per cent. War loan 104 7/8 and 3 per cent. War Loan 100 3/8.

Among other sections, Rubber issues have been easier while Tea shares have been steady. Kaffirs have been well held with Oils rather irregular. Home Rails have been marked higher.

NEW YORK STOCK EXCHANGE

Wall Street has been quiet during the past few days. The Balkan situation and the strikes in Bethlehem Steel and Allischarmers had a depressing effect and there was a tendency to await further developments. The revolution in Yugoslavia should have had an encouraginng effect but with the continued unrest in labour there was no disposition to push up prices.

(Annual meeting, 16th April, 1941 at 10 a.m. at Madras)

Audited accounts for the year ended 31st December, 1940:—

The net revenue of the Company for the year, after charging Rs. 1,23,431-10-8 for depreciation, is Rs. 3,52,439. To this should be added the balance brought forward of Rs. 42,926-11-11, making a total sum of Rs. 3,95,365-11-11.

The directors recommend that this amount be appropriated as follows:—

	Rs.	A.	P.
To place to Bad Debts. Reserve	1,329	6	8
To place to Income-tax and Super-tax Reserve ...	34,000	0	0
To carry forward	3,60,036	5	3
Total ...	3,95,365	11	11

During the year, 631 New Exchange Lines, 255 Extension Lines and Private Line were connected and 442 Exchange Lines, 167 Extension Lines and 5 Private Lines were relinquished, the net gain being 189 Exchange Lines and 88 Extension Lines and 4 Private Lines were given up.

Having regard to the difficult trading conditions obtaining at present an increase of 6 per cent in Exchange Lines and 5.66 per cent in Extension Lines is quite satisfactory. The figure for Private Lines is slightly lower. Development during 1941 is likely to be retarded to some extent.

An additional 300-line unit for Mount Road and a Satellite Exchange for St. Thomas' Mount are due to arrive about July or August. When this new apparatus is installed, there should be enough exchange accommodation to carry on until 1943. The time is ripe for this conversion of the Mount Road Exchange to a Main Exchange which will entail the building of new exchange premises. This matter is now under consideration.

Secretary.—Mr. J. A. Rowland Knox.

Authorised Capital—Rs. 50,00,000 in 5,00,000 shares of Rs. 10 each. Issued—Rs. 30,00,000 in 3,00,000 shares of Rs. 10 each, fully paid up.

(*Annual meeting, held 28th March,* 1941)

Audited accounts for the year ended 31st December, 1940:—

The total expenditure including sale charges amounted to Rs. 2,04,316-1-3. Many charges were, of necessity, higher during the year the most prominent being tea chests and chemical manures. Sale proceeds of tea realised and estimated amounted to Rs. 3,68,091-0-7. The net cost of quota purchased was Rs. 53,598-11-9. Income from the sale of sweepings and miscellaneous receipts amounted to Rs. 836-11-0.

After taking into account the interest earned on investments and deposits and other income and providing for staff commission, income-tax and agricultural income-tax and for a contribution of Rs. 1,565-1-0 to the Provident Fund there remains an available balance of Rs. 1,28,609-4-5 which includes Rs. 44,051-3-4 brought forward from the 1939 season after final adjustment.

It is not anticipated that any Excess Profits Tax will be payable. The directors recommend that this sum be disposed of as follows:—

	Rs.	A. P.
Dividend at 25 per cent, free of income-tax ...	80,000	0 0
leaving a balance of Rs. 48,609-4-5 t obe carried forward.		

The *estimate for* 1941 provides for a crop of 6,000 maunds for an expenditure of Rs. 2,10,852.

Managing agents.—Messrs. Gillanders Arbuthnot & Co.

Authorised Capital—Rs. 6,40,000 in 64,000 shares of Rs. 10 each. Issued and Subscribed—Rs. 3,20,000 in 32,000 shares, fully paid up.

(*Half-yearly meeting, 4th April,* 1941 *at* 3-15 *p.m.*)

Audited accounts for the half-year ended 31st December, 1940:—

After providing Rs. 1,47,548 for Depreciation, Rs. 1,50,000 for Taxes and Cesses and transferring Rs. 2,00,000 to General Development Reserve the accounts show a sum of Rs. 5,06,288-9-4 at credit of Profit and Loss Account including Rs. 1,81,419-15-4 brought forward from last half-year. The directors recommend that this should be allocated as follows:—

		Rs.	A.	P.
To payment of a dividend on the Preference Capital at the rate of 6 per cent per annum, free of income-tax, for the half-year ended 31st December 1940		12,000	0	0
To payment of a dividend on the Ordinary Capital at the rate of 20 per cent per annum, free of income-tax, for the half-year ended 31st December, 1940		2,96,073	0	0
Leaving to carry forward		1,98,215	9	4
	Total ...	5,06,288	9	4

Provision has been made for payment of dividend on 2,95,735 Ordinary shares issued as at 31st December, 1940 and on 338 Ordinary shares which have been issued since that date.

Collieries.—Conditions at the Company's collieries are satisfactory.

Sinking of two shafts has been commenced in Bhanora property.

Absorption of Aldih Coal Co., Ld.—In accordance with the resolutions passed at the Extraordinary General Meeting of Shareholders held on 27th August, 1940, the scheme of arrangement for the amalgamation of the *Aldih Coal Co., Ld.*, with this company then adopted, and subsequently approved by the Aldih shareholders and by the court, has been carried through. The Aldih Coal Co., is now in process of liquidation and the properties and assets of that Company came under the management of this company as from 1st January, 1941.

The number of Ordinary shares issued or to be issued in satisfaction of the claims of *Aldih Coal Co.*, shareholders is 641.

General.—The increased rate of surcharge on rail freight from 1st November, 1940, and the shortage of steamer space resulting from war conditions have combined to reduce sales considerably. Since the close of the half-year there has been a substantial increase in stocks of coal at the Collieries and it has been thought advisable to restrict output until there is an improvement in offtake.

Managing Agents.—Messrs. Macneill & Co.

Authorised Capital—Rs. 40,00,000 in 3,60,000 Ordy. of Rs. 10 and 4,000 6% Pref. of Rs. 100 each. Issued and Subscribed 33,57,350 in 2,95,735 Ordy. and 4,000 Pref., both fully paid up.

Synopsis of the balance sheet as at 31st December, 1940:—

(a) Issued at par on 20th March, 1937, repayable at par on 20th March, 1947, with option repayment at any time after five years from the date of issue. (b) Issued at par in 1897, and repayable at par on 15th November, 1936, date of repayment has been extended to 15th November, 1956, and the rate of interest reduced to 4½ per cent. (taxable) from 15th November, 1936. Option of repayment at a premium of 3 per cent. at any date after 15th November, 1926, on three months notice. (c) Issued at par on 14th May, 1938, repayable at par on 14th May, 1968. (d) Issued at par on 1st April, 1924, repayable at par on 1st April, 1959 with option repayment any time after 1st April, 1941, at 3 per cent. premium. (g) Issued at par on 1st October, 1923, redeemable at par on 30th September, 1943, out of a Sinking Fund to which 5 per cent. of the total issue, is due to be placed annually. (h) Carry in the event of a winding up preferential claim to cumulative dividend and to one fourth of the balance of assets available. (i) Entitled to participate in dividends only upto 10 per cent. per annum after the preference shares have received acumulative dividend of 6 per cent. and ordinary shares 10 per cent. Surplus divisible profit remaining after these dividends will be apportioned in three equal parts for payment of further dividends to the three classes of shares. * In payment of arrears of dividends on "A" preference shares for half-year ended December, 1927. † Bonus for every ordinary share held in the shape of a second preference share of Rs. 25 bearing interest at 4½%. ‡ Includes Bonus, § Arrears of dividend for six half-years ended June, 1934. Arrears of dividend to the extent of Rs. 1,22,500 to the end of December, 1937 outstanding. ** Includes 1152 mule spindles. (y) Arrears of Dividend for eight half-years ended 31st Dec., 1931. (z) Arrears of dividend for eight half-years ended 30th June, 1938. Also non-Cumulative dividend of Rs. 13. per share for the whole year 1938. (x) Arrears of dividend for 3 half-years ended 30.6.1933. (J) 6% for the year 1936 and 3% for 1937. (K) 3% for 1937 and 1938. (l) Included in Reserves. (L) 3% for 1938, 6% for 1939 and 6½ for 1940 (M) For half-year ended 31-12-1938
