IS IT NOT WISE TO INSURE NOW ?

With an uncertain future ahead Conservation and Consolidation of resources are the prime needs every individual should assiduously strive after.

If you already have Life Insurance, hold on to it. Don't allow it to lapse. If you haven't go in for it right now. A Life Policy gives an inestimable protection and it will cost you less now than later. It is cent per cent true that to be forewarned is to be forearmed.

Write to us for further particulars or advice.

WORLD OF INDIAN FINANCE

Friday evening.

THERE is no change to report in money market conditions, the change, if any, being further accentuation of cheap money feeling. Interbank call money is quoting ¼ percent in Bombay, ½ percent in Calcutta and ¾ percent in Madras, with no transactions passing at these rates. With Treasury Bill discount rate falling to ½ percent, the wisdom of maintaining ¾ percent as interbank call money in Madras is being increasingly questioned, and it is pointed out that what was till now a fiction has now become a farce. As was expected, the average rate of accepted tenders in respect of Government of India Treasury Bills sold this week has registered a further fall, the rate on August 12 being annas 8 percent per annum as compared with annas 9 and pies 4 on August 5. It can now be said that the rate reached this week is calculated to offer resistance to any further fall worth mention. Applications received on the tender day, however, were on a smaller scale than last week, being Rs. 2,59¼ lakhs as compared with Rs. 3,33½ lakhs. The offer for next week remains unchanged at Rs. 1 crore.

It is clear that the continuance of the sale of Treasury Bills on the basis of Rs. 1 crore per week is part of a deliberate policy to induce the piling-up of surplus funds in the hands of banks. This was the view taken by *Indian Finance* when the suspension of the sales of intermediate Treasury Bills and the reduction in the weekly offer of tender bills were announced. It was further argued by us that these measures were designed to pave the way for the third defence loan. We examined, in detail, the circumstances connected with defence borrowing and came to the conclusion that the list for the second defence loan might be closed shortly and that the announcement of the terms and conditions of the third defence loan was imminent. During the present week, a notification issued by the Finance Department gives details of the conversion terms offered to the holders of the 3 percent 1941 bonds. The 1941 loan is redeemable on September 15; and the amount outstanding is Rs. 10.69 crores. The holders of this loan are now given the option of converting their holdings at par into 3 percent 1949-52 loan (being the second defence loan) at an issue price of Rs. 100 or into 3 percent 1963-65 loan at an issue price of Rs. 95. The list for conversion will open on August 18, and close on August 21. The issue prices for the 3 percent 1949-52 and the 3 percent 1963-65 are in correspondence with the present market quotations. The question that we are now confronted with is whether and how far our view of an impending issue of the third defence loan has to be modified by the conversion loan now announced.

The total amount required to redeem the 3 percent 1941 loan is only Rs. 10½ crores; and the Government should be able to meet this commitment without experiencing any strain. For one thing, the results of conversion can be expected to prove quite satisfactory as the holders of 3 percent 1941 bonds cannot hope to make a better investment than is possible by conversion into 3 percent 1949-52. For our part, we believe that over 75 percent of the holders of 3 percent 1941 bonds will exercise the option to convert. This means that the amount of loan remaining to be redeemed in cash may be Rs. 3 crores at the outside limit. This is an amount which is well within the capacity of the Central Government to provide, situated as they are most comfortably from the point of view of their ways and means position. So comfortable is their ways and means position, that they were able last week to utilise Rs. 10 crores from their cash balance for redeeming a corresponding amount of *ad hoc* Treasury Bills sold to the Reserve Bank. The point we seek to make out is that the redemption of 3 percent 1941 bonds is such a comparatively trivial affair that it would not be necessary to let its redemption affect the general defence loan plans one way or the other.

There are other factors of far greater importance which have relevance to defence loan planning. Amongst such other factors, we may mention the importance of replacing the second defence loan by one more favourable to the Treasury. The changes in the British Treasury's plan of defence loans are another important consideration which has relevance to the plan of defence borrowings in India. We shall examine the prospects of a new defence loan from the point of view of these two factors. The Government of India are now offering a 8—11 year loan at par and a 22—24 year loan at a discount of five. We have no hesitation in reaffirming that the interest offered is far higher than is justified by the credit of this

country and by the stability of its finances. The War Bonds in Britain were issued on a 2½ percent basis. Why should the Indian Government issue their loan on the basis of 3 percent? Our case is, that, in the financial and other developments that have taken place during the present war, the credit of India is far higher than that of Britain. Britain started this war with a total public debt of £7,500 million. During the first twenty months of war, the gap between revenue and expenditure was as much as £3,439 million. And this gap was covered to the extent of £1,712 million by loans and other savings and £1,727 million by floating debt. That is to say, the public debt of Britain to-day is nearly £11,000 million; the Government are borrowing to-day at an average rate of £170 millions per month. If a Government with such a heavy public debt at the beginning of the war and with the need to raise £170 millions every month can successfully float its defence bonds on a basis of 2½ percent, why should the Indian Government, whose public debt is on the modest side and has not increased to any worthwhile extent during the war, be asked to pay 3 percent on its defence loans? Moreover, the credit of India is greatly strengthened by the fact that she has redeemed nearly £100 million of sterling loans long before their due dates. We can see no justification for the Indian Government issuing their defence loans at rates higher than those paid by the British Government. We wish that *Indian Finance* could have, with the Indian Government, the authority and persuasive power which J. M. Keynes holds with the British Treasury.

Another significant development is the announcement from London that the 2½ percent War Bonds, which were available through the tap, have been withdrawn. That is to say, no defence loan is now available on tap. The savings certificates, however, continue on the same old basis, though market circles expected that these certificates would be withdrawn and replaced by others at less favourable terms to the investor. Mr. Keynes has just returned from America; and it is quite possible that, after consultation with him, the terms of the new war bonds will be announced in London. The conviction is widespread in City circles that the new war bonds will be at stiffer terms to investors. Market circles are already talking of the 2½ percent war bonds going to a premium. The withdrawal of the 2½ percent bonds must, therefore, be considered as an interim measure, preparatory to the issue of the new war bonds which will be yet more favourable to the Government. We suggest that the example of Britain in this regard is worth copying by the authorities in India. We are convinced in our mind that the recent measures of the Reserve Bank in accentuating cheap money sentiment might have been inspired by their pre-knowledge of the steps taken by the British Government this week. We cannot help feeling that the present conversion offer, details of which appear in our advertisement columns, does not in any way interfere with the problem we have posed with respect to the advisability of closing the list of the second defence loan and the necessity of planning the third defence loan with greater regard to the high credit which India commands both at home and abroad. The events of the last two years have demonstrated that the borrower who has thorough self-assurance has the lender at his mercy. Timidity has ever been the besetting sin of the financial authorities in India. The excellent financial position of this country does not justify timidity but warrants hundred percent confidence and faith in the highest credit which it is the privilege of India to enjoy to-day.

The money market returns of this week do not call for any special comment. The statement of the Reserve Bank in the banking department shows a rather sharp fall in Government deposits from Rs. 18.81 crores to Rs. 13.85 crores, due partly to month-early disbursements and due possibly to heavy payments made on behalf of th British Government. Burma Government's deposits have declined from Rs. 2.55 crores to Rs. 2.10 crores; and the deposits of other governments from Rs. 5.92 crores to Rs. 4.36 crores, the beginning-of-the-month payments accounting for the fall. Deposits of member banks have risen from Rs. 30.45 crores to Rs. 32.35 crores. Owing to a contraction both under investments and advances, the cash balance of the Imperial Bank has risen from Rs. 13.64 crores to Rs. 15.26 crores.

The exchange market has been quietly steady, with rates unchanged.

ELECTRICITY

makes life easier

You won't remember those days, but it is not so very long ago that news went about the world in the satchels of dak runners and by mail coach. It took weeks to travel from Bombay to Calcutta. Electricity has transformed all this: by telephone, telegraph, and radio stop press news circles the globe in an hour. And the telephone and telegraph enable more business to be done today in a morning than could once be done in a month.

MAKE THE FULLEST POSSIBLE USE OF ELECTRICITY IN YOUR OFFICE

Finance Abroad

Friday Morning.

THE persistence of labour unrest in the U.S.A. confers more than temporary interest to the moves now being considered against inflationary tendencies. The most effective check, in the opinion of the U.S. Treasury, is an addition to taxation. In his evidence before the Senate Finance Committee, Mr. Morgenthau argued that the new tax bill involving an addition of 3206 million dollars to the public revenue was the bare minimum. He hinted that a larger revenue would be welcome, and added that the developments of the last few months made the tax proposals inadequate even before the new Bill was passed. This appears correct in view of the proposal to add a further appropriation under the Lease and Lend Act. The original appropriation of 7 billions, like the later loan of 425 millions, cannot be deemed the limit of financial assistance to Britain. Mr. Morgenthau's evidence supports the belief that expenditure for 1941-42 would rise by over 14 billions. The view taken in May was that total expenditure would rise to over 22 billions and a much larger revenue would be required. Mr. Morgenthau's testimony contained two interesting points as to the increased demand for goods and the restricted output. The diversion of industrial capacity to defence purposes was reflected in the early decision to curtail automobile output. A reduction in supply is invariably followed by a rise in prices, and the public, afraid of inflation, manifested keener interest in procuring consumable goods. Surplus consuming power could not be skimmed by any other means than taxation. and Mr. Morgenthau admitted that increased demand and restricted output were causing inflationary rises in prices. While the existence of a powerful farm bloc in Congress will prejudice the adoption of ceilings to prices of commodities and the unfreezing of stocks acquired under loans to farmers it must be admitted that the U.S.A. has not succeeded wtih its anti-inflation measures. The strikes in the New York, New Jersey and Pennsylvania shipbuilding yards have apparently extended for over 24,000 men are affected against only 14,000 men last week. The strikes cannot be due wholly to the demand for a closed shop and if due regard is had to the Administration's attitude in 1937-38 it will be recognised that U.S. labour has a strong case for higher wages since the cost of living has risen and the rising trend of profits justifies concessions.

While little has happened to make one argue that the Administration with its special powers can put the lid on labour agitation mention must be made of the efforts made by Government to interest the Federal Reserve Board in its programme to check instalment selling. That salesmen would lose their jobs does not appear a weighty reason as against the need to stop the undertaking of commitments by taxpayers under hire purchase contracts for durable and semi-durable goods. The ability of the F.R.B. to reverse the policy of cheap credit and compel the freezing of swollen bank deposits will appear problematical to some observers. What is obvious is that the U.S.A. is finding that non-belligerency entails acute budgetary disequilibrium enormous borrowing and serious disturbance to production apart from the unbalancing of family budgets to which Mr. Morgenthau referred. He, however, has upheld his own view that increased taxation is needed to maintain economic stability, though the Republicans may argue that full industrial activity and ample private prosperity are associated with a fairly low level of taxation.

The position is admittedly full of possibilities for controversy but the President in his third term enjoys the benefits of a large docile majority in both Houses and his efforts to promote Anglo-American cooperation have so far succeeded in bringing Nye of North Dakota over to the view that America must act in support of the Monroe Doctrine if Germany should manifest unhealthy interest in French possessions in the Western hemisphere. The joint declaration from the Presidential yacht relayed through Mr. Attlee has enormous significance for the markets. While U.S. party leaders have quickly ranged themselves on the President's side the U.S.A. has now the job of keeping the Allies up to the mark by releasing munitions and material. The early despatch of oil and other material to Vladivostok has been referred to.

The economic consequences of the extended draft can be known only after sometime. The passage of the Bill as anticipated has served to show that the third term is one long honeymoon for President and Congress though there is a disturbing possibility that the Executive may have to yield over amendments to the Price Control Bill. It is necessary to remember that the amendments will leave wheat and cotton at high levels and the Administration may find its own plans for a new pool for holding surplus commodities, to give relief after the war go wrong, though it may succeed in regard to steel control for securing Defence needs.

The absence of any change in London money or exchange rates makes comment difficult. The usual Friday tender for Treasury Bills resulted in allotment at a fraction over 1 per cent. There has been hardly anything to suggest reduced interest for the market quota is higher, indicating somewhat lower applications from outside quarters while clearing banks owing to their need for funds showed less interest in whatever bills were offering. As the total of applications for £75 million exceeded £159 million one must assume that easy money conditions still rule in London. While it is to the interest of the Treasury to keep on borrowing when money is cheap, the reason why the sale of 2½ per cent defence bonds, sold on tap from March last, has been stopped will not appear self-evident. The Treasury perhaps thinks of a loan on cheaper terms, should the giltedged market undergo rapid improvement as expected. The stage, in the opinion of some, is set for a new loan though it has been pointed out that Exchequer returns in the last month showed no inordinate increase in expenditure.

Trade in this war and the last

THE Report on Currency and Finance for 1940-41, released to the press this week, has added significance as there has been a severe war-time curtailment in the information and figures provided with regard to India's trade and other economic activities. In the United Kingdom also, trade and monetary statistics now available to the public are greatly reduced. In the absence of full information, we have had to rely largely upon guess-work for the continuous study of trade and economic problems. The annual Report on Currency and Finance provides a welcome opportunity to check up how far our guess-work has proved correct and where it has gone wrong. Moreover, the report for 1940-41 is a remarkable production not only because it provides an amplification of some of the earlier features and the introduction of some useful new features, but because, wherever possible and necessary, an attempt has been made to study the developments of the first nineteen months of the war as a single unit and to compare these with the developments in the first nineteen months of the last Great War.

Until the inauguration of the Reserve Bank of India, the report on Currency and Finance was the responsibility of the Controller of the Currency; and this document was always keenly looked forward to as furnishing trade and monetary statistics both clearly and comprehensively. With the abolition of the office of the Controller of the Currency, and with the Reserve Bank taking over the task that was being performed by the Controller of the Currency, the annual Report on Currency and Finance has also been taken over by the Reserve Bank. In the last five years, the Reserve Bank has spared no effort to make this annual report more informative and more increasingly useful to the student of economics and statistics. The report for 1940-41 carries the improvement further and is greatly valuable for the data it provides for an understanding of India's finances under the stress of war.

In the second chapter, which is devoted to trade, the report examines how trade is reacting to war conditions now as compared with the first two years of the last war. We extract below a table summarising the joint trade in merchandise of India and Burma during the first two years of the present war, and the quinquennium immediately preceding, and comparing these figures with those for the last war.

	Average for five years ended			Average for five years ended		
	1938-39	1939-40	1940-41	1913-14	1914-15	1915-16
	(In crores of rupees)					
Exports ..	1,81	2,22	2,08	2,24	1,82	1,97
Imports ..	1,37	1,45	1,39	1,46	1,38	1,32
Balance ..	44	77	69	78	44	65

The main conclusion from the above table is that the effects of the present war on trade so far differ from those of the last in important respects. In 1914-15, exports were lower at Rs. 182 crores as compared with Rs. 2,24 crores being the average for the five years ended 1913-14; and imports also at Rs. 1,38 crores showed a regress as compared with Rs. 1,46 crores being the average for the quinquennium ending 1913-14. With exports and imports both adversely affected, the favourable balance of trade in 1914-15 was also lower at Rs. 44 crores, comparing with Rs. 78 crores being the average for the five years ending 1913-14. Thus the immediate reaction of the last war was to depress both exports and imports and, with them, the favourable balance of trade.

The second year of the last war, however, saw some recovery in exports but the declining trend in imports continued. Exports in 1915-16 at Rs. 1,97 crores were Rs. 15 crores higher than in 1914-15 but were considerably lower than the average for the quinquennium ended 1913-14. Imports in 1915-16 at Rs. 132 crores were lower than those of 1914-15 and very much lower compared with the pre-war quinquennial average. The favourable balance of trade in 1915-16 showed a considerable improvement over that of 1914-15 though it was still smaller than the pre-war quinquennial average. The balance of trade in favour of India was Rs. 65 crores in the second year of the last war as compared with Rs. 44 crores in the first year of the last war and Rs. 78 crores being the pre-war quinquennial average.

In the case of the present war, the immediate reaction was in exactly the opposite direction. Both exports and imports in each of the years 1939-40 and 1940-41 were higher than the average for the five years ended 1938-39. By the same token, the favourable balance of trade in each of these two years records a substantial improvement as compared with the average in the quinquennium ended 1938-39.

1939-40, which is the first year of the present war, shows a considerable expansion in exports from Rs. 1,81 crores being the pre-war quinquennium average to Rs. 2,22 crores. Imports in 1939-40 are also higher at Rs. 1,45 crores comparing with Rs. 1,37 crores being the average for the five years ended 1938-39. The favourable balance of trade in 1939-40 was Rs. 77 crores compared with the pre-war quinquennial average of Rs. 44 crores. As compared with 1939-40, 1940-41 shows a declining trend in exports, imports and favourable balance of trade, though, in each of these respects, the figures for 1940-41 make better showing than the corresponding average figures for the quinquennium ended 1938-39. Exports in 1940-41 at Rs. 2,08 crores compared with Rs. 2,22 crores in 1939-40 and Rs. 1,81 crores being the average for the five years ended 1938-39; imports in 1940-41 were Rs. 1,39 crores as against Rs. 1,45 crores in 1939-40 and Rs. 1,37 crores being the pre-war quinquennial average; and the favourable balance of trade in 1940-41 was Rs. 69 crores as compared with Rs. 77 crores in 1939-40 and Rs. 44 crores being the pre-war quinquennial average. Thus, in the first two years of the present war, the favourable balance of trade is Rs. 146 crores as against Rs. 109 crores in the first two years of the last war. It must be noted, in this connection, that these increases do not include the large and increasing amounts involved in Government war transaction.

In another table, the Report examines the joint balance of trade in merchandise between India and Burma during the first nineteen months of the present war as compared with a similar pre-war period:

	(In crores of Rs.)		
	Exports	Imports.	Balance of trade
19 months September 1939 to March 1941 ..	3,49	2,23	+1,26
19 months February 1938 to August 1939 ..	2,91	2,33	+ 58

Since September 1939, the favourable balance of trade is, thus, Rs. 1,26 crores. We have already indicated that the balance of trade favourable to India from April 1939 to March 1941 was Rs. 146 crores. This means that, in the first five months of 1939-40, the favourable balance of trade was only Rs. 20 crores.

Another interesting table furnished in the annual report sets out comparative indices for the quantum and price-levels of imports and exports in respect of the first two years of this and the last war:

-(original base: 1927.28 = 100)

1939-40.—
Imports 102.0 (+2.0) Quantum, 106.4 (+6.4) Price level;
Exports 104.5 (+4.5) Quantum, 119.8 (+19.8) Price level;
1940-41—
Imports 81.2 (—20.6) Quantum, 126.7 (+19.2,) Price level;
Exports 88.1 (—15.7) Quantum, 130.3 (8.8) Price level;
1914-15:—
Imports 75.0 (—25.0) Quantum, 101 (+1.0) Price level;
Exports 71.7 (—28.3) Quantum, 102 (+2.0) Price level;
1915-16:—
Imports 57.3 (—23.6) Quantum, 126 (—24.7) Price level;
Exports 77.8 (+8.5) Quantum, 103 (+.98) Price level.

(Figures in brackets show the percentage rise or fall over the previous year).

The following explantion is offered with respect to the comparison of price level and quantum of imports and exports:

> Compared with 1938-39, the price-level of imports during 1940-41 was higher by nearly 27 percent, and the index of quantity was lower by about 19 percent. An almost equal increase in the price-level of imports was observed in the corresponding year of the last war, though the quantum of imports underwent a much more drastic curtailment then. As regards exports, the price-level during 1940-41 appeared to be higher than in 1938-39 to the extent of 30 percent, and the quantum lower by 12 percent.

An analysis of the changes in the direction of India's trade reveals significant conclusions. Imports from the United Kingdom into India have shown substantial decline while the United Kingdom has been taking increasing quantities of Indian merchandise. The same remark is more or less true of the trade between India and the British Empire. In the case of Japan and the United States, however, India has been importing more and exporting less. The result is, that the balance of trade as between India and the U.K. was Rs. 29 crores in favour of India in 1940-41 and Rs. 30-87 crores in 1939-40 as against only Rs. 9.02 crores in 1938-39. India's trade with Empire countries accounts for a favourable balance of Rs. 26.92 crores in 1940-41 and Rs. 20.95 crores in 1939-40 as against an unfavourable balance of Rs. 3.19 crores in 1938-39. In the case of Japan, the unfavourable balance of trade was only Rs. 82 lakhs in 1938-39. In 1939-40, it had risen to Rs. 5.30 crores. In 1940-41, it was as high as Rs. 12.55 crores. In ordinary conditions, India has always enjoyed a favourable balance of trade *vis-a-vis* the U.S.A. In 1938-39, her favourable balance was Rs. 4.10 crores. It rose to Rs. 12.56 crores in 1939-40. But, in 1940-41, there was an adverse balance of Rs. 1.10 crores, due to a more than 100 percent increase in American imports. The following table shows the important changes in the direction of Indian trade and the balance of trade between important countries and groups during the last three years:

DIRECTION OF TRADE.
(In lakhs of rupees).

	1938-39.			1939-40.			1940-41.		
	Imports of foreign merchandise.	Exports of Indian merchandise	Balance of trade (excluding re-exports).	Imports of foreign merchandise.	Exports of Indian merchandise.	Balance of trade (excluding re-exports.)	Imports of foreign merchandise.	Exports of Indian merchandise.	Balance of trade (excluding re-exports.)
U.K. ..	46,49	55,51	+ 9,02	41,61	72,48	+30,87	35,97	64,97	+29,00

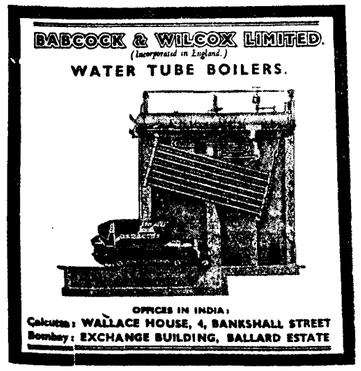
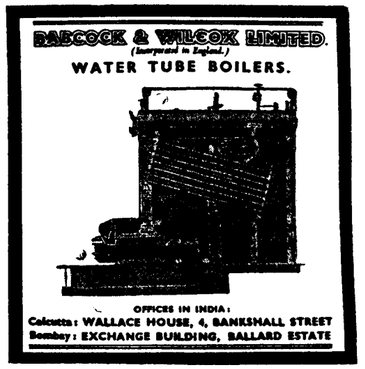
Shipping Losses and Gains



THE success of counter-measures as well as the preoccupations of Germany with her new eastern campaign are reflected in the reduced scale of losses at sea in June and since. The cessation of publication in regard to enemy sinkings does not at present inspire any mistrust since the June statistics were definitely reassuring. That the enemy should have no chance of knowing what happens is the main object and a sober silence would perhaps be the best answer to the delirious boasts of the enemy's propaganda machine. The Swedish press, which analysed the prospects of the Battle of the Atlantic even before the spring campaign got under way, concluded that, if the enemy could sink ten million tons in a year, he could have a chance of beating Britain in the race for imports still reaching her shores. The monthly losses for the four months of March to June were undoubtedly heavy, but the tonnage sunk, after reaching a high level in March, has fallen. It is doubtful if an average of barely 500,000 tons per month possible for the three months, March-May, can be maintained. For, the enemy's attacks on Atlantic shipping have been rendered partially nugatory by the establishment of the U.S. patrols off Greenland and Iceland. Co-operation of the U.S. fleet with the British Navy undoubtedly explains the outstanding improvement recorded in June. It will be recalled that in very few months has the enemy destroyed half a million tons of Allied shipping, and the answer to the insensate campaign illustrated by the sinking of the *Robin Moor* has been announced in the plans of the U.S. Maritime Commission. The Commission's aims and objects have been subject to frequent revision, but the U.S. Government has applied its emergency powers first against Axis shipping that sought an asylum in U.S. ports and secondly, through the requisitioning of ships on the U.S. register. It is certain that palpable subterfuges like transfer to Panamanian registry would not have been brooked and no reviewer of the Battle of the Atlantic will fail to take note of the gains made possible by the destruction of the *Bismarck*.

The June figures indicating greatly reduced enemy activity were taken as an earnest of what was to come, and the total for June representing, as it does, a tonnage less than the mean average for the war period gave rise to a hopeful view. In the twenty-two months of war ended June total losses have averaged 324,000 tons a month. The highest was in June 1940 and the lowest, strangely enough, was in March 1940. The enemy's attacks on merchant shipping opened on September 3 when the *Athenia* sailing from Glasgow met with disaster. It has not yet come to an end, but the situation is more than ever hopeful for the R.A.F. has been at the bases hammer and tongs, and the answer to the big Focke-Wulf bombers based on Breton ports has been found in regular attacks on the Focke-Wulf factory. The Northern French bases have been caught in the daylight sweeps started by the R.A.F. and French ports have become uncomfortable havens for German submarines. Though it is not possible to state that the Germans have lost their entire submarine fleet, the repeated attacks on Kiel should have made refitting difficult, and submarines, unable to return to their depots, are not likely to relish the summer campaign. While the recent loss of a destroyer in the Mediterranean has shown that the convoy got across though one of the escorts went down, the Italian fleet after its vain excursion to Malta may not move. Lest it be imagined that the crescendo of the enemy's air activity is likely to recur, there should be a reference to the regular attacks of British bombers by sorties on the entire Atlantic coast from Brittany to Prussia. The enemy's control of a coastline stretching from Bergen to Bordeaux has been no inconsiderable advantage until the R.A.F. started attacks on the bases last November. The extension of the convoy system with bigger escorts early this year was another way of dealing with the situation and the spring campaign threatened by Herr Hitler on February 26th has come to a lame conclusion. The Battle of the Atlantic, as the Premier has said more than once, is now taking a different shape and if losses for twenty-two months of war have totalled over 7 million tons one must look at the heavy losses of the Axis Germany's losses as second only to those of Britain. The rate of sinkings has naturally increased since blockade running has been attempted by a few, but more serious than the losses at sea has been the impounding of lucky fugitives by the U.S. Government. It is known that Germany started the war with a tonnage exceeding 4.4 million tons and Italy had a little over 3.4 million tons. How much of the total remains can only be guessed since enemy losses have run at the rate of half a million tons per month when the Mediterranean battle was at its height.



It is highly unlikely that new building could have been attempted in Italy owing to the chronic shortage of both metals and fuel, while Germany with Danish and Norwegian yards has found little time to devote any time to anything but submarines. Sabotage in the occupied countries represents a serious danger and the greater part of Norway's pre-war fleet of 4.8 million tons escaped as also part of the 3 million tons belonging to Holland. In the figures of losses at sea due note has always been taken of the destruction of Allied vessels so that the British Empire's own loss must be below 5 million tons. It cannot be gainsaid that the loss of carrying capacity is not a handicap. Attempts to divert ships from ports chosen for attack by the German air force have not always been attended with success and only the deletion of the Red Sea from the war zones specified under the Neutrality Act has helped to tilt the balance in Britain's favour this year.

The enormous losses have been largely due to the undue concentration of shipping in the West of Europe. The dependence of Britain and Holland on their empires and on their imports explains it as also the high development of manufacturing industries in a few countries. It traffic between the belligerents has been suspended, thereby reducing Europe's own maritime activity, the abnormal expansion of imports for war purposes increases it. That vast parts of the world are unknown to the raider and U-boat certainly proves that shipping activity can be maintained in spite of the war. But the rigours of Government control of rates and freights, the adoption of longer routes as also requisitioning make the shipowners' lot hard. Some may argue that erstwhile neutrals like Norway and Greece obtained substantial benefits through the war owing to the shortage of tonnage in Europe and the rise in freights. Their position has undergone a change since the war has engulfed them, and they are not so well off as the Netherlands which lost about a quarter of her tonnage by last year but yet retains a commercial empire based on the East Indies. The ship-building plans of the U.S.A. cannot result in immediate changes; but the transfer of Danish vessels seized in April, like the assignment of tankers for British use, represents an important addition to the British Empire's resources. The equivalent of new building for two years has been found and the despatch of Sir A. Salter this year to Washington has produced another victory for Britain.

Neutral observers have taken care to emphasise that in relation to population and resources, the British losses are inconsiderable. It is certainly correct to say that Norway's losses owing to the calamitous effect on national income are more serious than the losses of the major belligerents. And it may be pointed out that a neutral like Sweden or a country like Denmark, which did not strike a blow, has been more upset by the blockade and the war at sea than a country like France which has withdrawn from the contest. If total losses of over 7 million tons for British and allied shipping seem to suggest that the Great War totals have been eclipsed as also the relatively low average for the first six months of the war it must be remembered that Britain has enough shipping for her use. The U.S.A. which had Great Lakes shipping in addition to ocean-going tonnage has lost little or nothing and may have by 1943 a total tonnage exceeding that of Britain. Superiority in both naval and mercantile tonnage may be secured by the U.S.A. and no naval treaty can alter that. The losses at sea so far have to be viewed in the light of forthcoming changes and, if Japan's shipping is withdrawn from many routes in the Orient owing to the continued tension, one of the beneficiaries must be U.S. shipping. If the dreams of marine supremacy cherished by Morgan came to nothing after the last war there is nothing to portend that a new effort to make the ships of the U.S.A. dominant on the high seas will fail. No subsidised building programme, even if the money can be found, can help European countries to catch up, though they may be able to use the routes now closed by the war. It is in the light of possible mastery of the Pacific by the U.S. shipping companies already generously subsidised for hypothetical mail services that one must sound a note of caution. It is the British Dominions, whose secondary industries including shipbuilding have prospered, that must co-operate to ensure for Britain a proper share in the trade of the Far East and to see that gains at the expense of Japanese shipping are equitably distributed.

Editorial Notes

THE peremptory issue of notice in connection with the Indo-Japanese trade pact of 1937 and the cotton trade protocol appended thereto followed the freezing of Japanese assets in this country. While the trade returns for the first quarter of 1941-42 yield the conclusion that the cessation of trade after six months or earlier will cause much unrelieved difficulty, there is nothing to produce undiluted pessimism. No analysis has been attempted on the basis of trade in recent years to show how trade relationships will be affected. It is generally known that cotton piecegoods and yarn are the chief import from Japan. Takings from Japan in 1940-41 exceeded Rs. 7 crores in value and these two items made up about a third of India's total imports valued over Rs. 21 crores last year. Japan has also been an important source of woollen yarn and goods in recent years and total imports last year exceeded Rs. 81 lakhs. In the absence of imports from Europe, and the very substantial rise in prices of both wool and woollen goods, the most direct result of any break in commercial intercourse with Japan will be a big rise in prices and correspondingly in profits and, to that extent, will favour the Indian woollen industry. The protection for which claim was made some years ago would be obtained effortlessly. The other textiles, namely rayon yarn and goods of which Japan has held a monopoly of late accounted for over Rs. 5 crores out of the total imports in 1940-41 and more ardent analysts will be inclined to argue that India's total imports of goods valued over Rs. 12 crores must be made good by the cotton industry. While no one will question the improvement in prospects that should follow any fall in imports, must be noted here that until January 1942, the trade relations will be unchanged though difficulties in regard to remittance will put an end to trade. The anticipated failure of imports of Japanese silk and silk goods is already reflected in the unprecedented advance in prices, prices which suggest that the prohibitive duty asked for by Indian silk interests has been imposed. Under two items, machinery and millwork and ryestuffs, imports will be certainly difficult to replace. Total imports of both showed a striking increase in 1940-41 owing to the reduction of German supplies. It will be admittedly difficult to secure engineering and other stores from other countries than the U.S.A. The higher prices, the delay and inconvenience will have to be taken into account by Indian purchasers who may find import control a bigger barrier. The only other item of which Japan was an important supplier was glass and glassware. Any decline in imports should promote the development of the Indian glass industry which has asked in vain for protection against Japan. The obvious result will be a rise in prices in this case as also in the prices of bulbs, tubes, pipes, galvanised sheets, wire nails, hardware, electric cables, paper and stationery which were among the articles imported from Japan.

The two chief exports to Japan were cotton and raw jute valued at Rs. 7,04 lakhs and Rs. 29.12 lakhs respectively in 1940-41. Both these exports were lower than in 1939-40 for the recurring tension discouraged trade and commodity prices also registered a drop. The other items of India's export trade with Japan are mica, manganese, pigiron (all of reduced importance owing to the war and export control) gunny bags, castor-seeds, cow-hides, shellac and fibres and bristles for brushware. The main problem concerns the cottongrower, and it was not surprising that the E.I.C.A. took the lead in asking for information about the immediate consequences of the freezing order. While the loss of another market for raw jute cannot but occasion anxiety, there has been no abrupt fall in values as in the cotton market which cannot look forward even to reduced exports on the scale of 1940-41.

It may be noted in passing that imports from Japan in the first three months of 1941-42 showed a sharp rise owing to the increases in value under imports of cotton yarn and goods as also of other textiles. The increases under dyes, rubber manufacture, cutlery etc., this year showed that Japan must have increased her share of such imports. It is noteworthy that Indies' exports to Japan since the end of 1940-41 have shown improvement despite the fall under cotton jute and oilseeds. Total exports to Japan in the first quarter were valued at about Rs. 2.13 crores as against total imports valued at Rs. 7.18 crores. The great change in the balance of trade as compared with 1937-38 will not be missed and this may even suggest that the loss of another export market will not greatly prejudice India's trade. There is, however, the possibility that the Japanese match factory near Calcutta may be affected by the freezing order, and if this factory went out of production, prices may rise further while the match industry in India already handicapped by the war may experience difficulties.

Indian Goods in Britain

The latest available report of the Indian Trade Commissioner in London refers to the openings for Indian manufactures. A firm with oil fields and refineries abroad enquired regarding the supply of certain textile and surgical goods from India. Among the goods mentioned were gauze, lint, adhesive plaster and dressings. The company's agents in Calcutta were asked to get in touch with the Department of Commercial Intelligence. The Commissioner reports that there was an enquiry for certain drugs for direct shipment to Australia. The sale of Indian matches in the U. K. was encouraged by enquiries from importers and the names of suppliers in India were furnished. An exporter of drum and banjo vellum heads expressed interest in selling to Britain musical instruments, manufacturers were circularised and the names of those interested were communicated. A U. K. firm wanted to get the names of exporters of citronella and

caraway oil in India. The Trade Commissioner's office helped to give a London bank the names of exporters of rice as its clients in Trinidad wanted the information. Iron and steel manufactures are in request. Steel bands for cotton bales formed the subject of an enquiry from Egypt. Owing to the difficulty of getting an import license a London firm wanted to procure talc from India. The names of Indian producers were therefore given. A firm in London wanted to get in touch with exporters of beeswax in India. The Government of Mauritius put through an enquiry for 2000 gallons of Pyridine to be used as a denaturing agent. To avoid delay the names of firms in the U. K. representing Indian chamical works were forwarded. An enquiry regarding the possibility of getting scientific and surgical instruments made or assembled in India as also hypodermic syringes and needles from Indian manufacturers was turned over to the Department of Commercial Intelligence in India. The information sought by importers in Britain as regards casein, walnuts, jute, wool, eggs etc. was made available on request.

Higher Allowances for Textile Workers

WHILE the strike in Coimbatore continues to give rise to anxiety the situation in Cawnpore has undergone rapid improvement. Negotiations following the termination of the strike have been fruitful, and the result can be judged by the announcement made recently under the authority of the Employers Association of Northern India and the Labour Commissioner. The employers have conceded the workers' right to an additional allowance to compensate for the higher cost of living. It has been stated in this connexion that employers were considering the grant of an increased war allowance before the strike came in June. The rise in prices recorded since June is described as sufficient reason for the addition to wages. The scale of allowance has been fixed at 2 annas in the rupee for all workers in the jute industry getting below Rs. 14 per month and those getting up to Rs. 150 will get 1 anna 6 pies in the rupee. The principle of a graduated allowance is also accepted for workers in the cotton, wool and leather industries where those getting less than Rs. 19 per month are eligible for an increment of 2 annas in the rupee and those getting up to Rs. 150 are given a rise of 1 anna 6 pies in the rupee. The increase is granted in order to enable the worker keep step with a cost of living index up to 140 and provision for a further increase in the dearness allowance is made if the cost of living should go up over 140 for three consecutive months. Reduction of the allowances is possible only on application to the Labour Commissioner after the cost of living index falls below 121 for three months in succession. The increase is to operate from July and the additional allowance will be paid in the same way as the allowance granted in 1940. The payment of higher wages is preferred to the adoption of any profit-sharing scheme and the decision corresponds to that taken in Bombay by the millowners. More than 200,000 workers qualify for an enhanced allowance in Bombay. The basic rate as from July has been raised to Rs. 5-3-0 from Rs. 3-4 per head. It is believed that the new concession will cost the employers over Rs. 1½ crores. The flat rate adopted in Bombay will benefit the lower paid workers, but the actual increase which is Rs. 1-15 per head appears small having regard to the steady advance in prices recorded in the *Labour Journal*. It has been suggested that owing to the higher activity reported in the mill industry of late the earnings per worker should have risen and the extra allowance which is an *ex gratia* payment is to be given to all men getting below Rs. 150. The millowners' decision is mainly governed by the recommendations of the Court of Enquiry which went last year into the claim for a war allowance for mill workers. The report of the Court suggested that if the index rose above 123 there should be an additional allowance. Without waiting for the index to stay above the prescribed upper limit for three months, the Millowners' Association, after conferring with the Bombay Government, decided to grant a higher allowance. Instead of giving an allowance as from October, the millowners are prepared to pay higher allowances from July as the price trend is upwards, and industrial peace is essential. Both the major textile centres have evidently accepted the view that a rise in prices entitles the worker to an increment, and the Millowners Association in Bombay has provided for an automatic increase, should there be a further rise in the cost of living. If the cost of living index is 124 the dearness allowance would be Rs. 4-8 while the allowance would be raised to Rs. 9 per head if the cost of living index rose to 143. The acceptance of the cost of living bonus by Bombay millowners should influence all employers in India, and those, who have examined the trend of prices, wages and rents in wartime will agree that the decision taken in Cawnpore and Bombay is just and proper.

UNITED INDUSTRIAL BANK LTD.
7, WELLESLEY PLACE, CALCUTTA.
A SCHEDULED BANK.
The Share Subscription List will remain open until further notice, but this advertisement must not be treated as an invitation to the public to subscribe to shares. Persons desiring to obtain copies of the prospectus should communicate with the Head Office or any Branch of the Bank.
Current Accounts: Interest allowed at ½% per annum on daily balances of Rs. 300/- to Rupees 1 lac provided interest amounts to at least Rs. 2/- half-yearly.

Pressure on Thailand

It is hardly likely yet that Thailand has succeeded in resisting the importunity of Japan. The military concentrations on her Indo-China frontier may have no special significance, and the credit agreement, like the reported recognition of Manchukuo has shown that the rulers of Thailand, with their admiration of totalitarian governments, are not likely to spurn Japan's offers of co-operation particularly when the consequences of not adopting a 'realistic' policy are also described. The repetition of the now-familiar tactics was presaged by the parrot cry of encirclement in the Tokyo press. It is now apparent that the earlier assurances of the Thai Consul-General in Singapore have no relevance and the latest developments may be taken as meaning that Thailand has weakened. Repeated references to the non-aggression pact of June last can only have the effect of clouding the issue. It has been said latterly that the Thai Government has asked for a formal guarantee because her existence as a buffer state is at stake. There are non-aggression pacts and Bangkok has a small but useful navy, but what is wanted is an understanding between London and Tokyo. That, of course, is ruled out, and the Thai Government is merely playing for time or else bluffing Britain and America. The Japanese are said to have demanded the bulk of Siam's tin and rubber in addition to the usual bases and promised in return territorial advantages in Indo-China. This is highly probable for the freezing order is in force in Malaya and the Dutch Indies; the credit may have been granted to encourage Japanese buying or else to keep when the Thai accounts are blocked. The withdrawal of Thailand's production can have no effect either on the tin or rubber market and the prevailing stagnation shows that Far Eastern events cast a very small shadow. A great deal has been said about Japan's vaulting ambitions with particular mention of what can be done with the Kra Isthmus. But the recognition of Manchukuo or the Nanking regime by Bangkok like the earlier surrender of bases in Northern Indo-China cannot help Japan to cut the Burma-Yunnan highway. A direct statement from Washington as to the consequences may however deter Japan which has not so far evinced any desire for the South Seas policy. The statement of Mr. W. M. Hughes that Britain can put a fleet in the Pacific and has besides a very able navigator in Rear-Admiral Spooner, recently posted to Singapore, is reassuring so far as it goes, but the effect on Bangkok so far has been negligible. The application of sanctions may quicken the desire of Japan for the minerals of south-east Asia and if Dutch possessions are virtually guaranteed by agreement the Bangkok government can only turn from one Power to another. The Japanese may disguise the ultimatum to Bangkok as a strong invitation, and whatever may be said about the efficiency of Malaya's defences, they can have little bearing on Bangkok's view of what may happen if they refuse to take Japan's terms. The policy of all the Powers concerned has necessarily been provocative, and Japan, without forcing the pace, may develop a non-possumus attitude.

the jute mill industry in Japan. According to the Indian Trade Commissioner at Osaka there are five jute mills one of which the Taiwan Seimak consumes mainly jute grown in Formosa while the others use Indian jute. The mills get their raw material through the Importers Association in which 8 firms including the trading agencies of the Mitsui and Mitsubishi houses are members. In the five mills referred to the largest is that of Nadake near Kobe. Established in 1918 with a capital of 6 million yen its loomage is unknown but iit has cement factories and spinning mills among its customers. As the company is private nothing is known about the dividends paid except that the profit for the 6 months ended February 1940 was apparently satisfactory. The jute mill at Osaka is older but is not so large as the Kobe mill. Established in January 1917 it had a paid-up capital of 1½ million yen. Reporting an annual turnover of 3½ million yen the company paid a dividend of 10 per cent for the first half of 1940. The mill manufacture jute thread and yarn in addition to cloth and bags. Ropemakers and manufactures of electrical goods are numbered among the customers. The jute mills in Japan are said to use Formosan fibre in addition to that imported from India and also different fibres like flax, hemp and china grass which are available from Manchukuo, China and Hokkaido. The cultivation of alternative fibres is encouraged and the plantations in Manchukuo are being developed. Straw mats are used for packing cereals and water proof paper bags are chosen for packing sugar, cement etc. Substitutes for gunny bags have evidently become popular in Japan which has reduced successfully her imports of raw jute in recent years.

Europe's Trade

THE Economic Intelligence Service of the League of Nations has devoted a recent volume to an analysis of Europe's share of world trade. Having a larger share than the other Continents, Europe with 19 per cent of the world's total population, obtained half its goods from outside. Only half the trade was between European countries proper, because Colonial raw materials had to be imported. The suspension of trade between the belligerents does not affect the value of the conclusions drawn. Europe's share of world trade was determined largely by her takings of foodstuffs and raw materials (valued 2¼ billions in 1935,) and the greater part of the total was compounded of vegetable and animal foodstuffs though Europe produced and sold a large quantity of animal foodstuffs through her own imports of fats and fertilisers. Britain alone imported as much of food and raw materials as the rest of Europe, and a point that illustrates Europe's advance is that raw materials exceeded foodstuffs in value. The measure of dependence in regard to fibres, oilseeds and mineral oils was much greater than under food, revealing a difference as between Europe and Britain which imported more food than raw materials. Raw textile fibres, oilseeds and mineral oils accounted for about 60 per cent of Europe's total imports in most years indicating also why Europe has to look to other Continents. The more industrialised countries naturally had a larger share of the trade, and trade as between them exceeded trade with other countries. It might be said that the volume of trade is determined by the progress of trade since the ten most important industrial countries sent to each other 40 per cent of their exports, mostly manufactured goods, and only 16 per cent to the rest of Europe. This implies that over half of Europe's exports were destined for countries in that continent whereas the bulk of their imports were obtained from the other Continents. The industrialised countries generally had an excess of imports, for they alone has oversea investments and could provide shipping, financial and other services. Europe which might be classed as a creditor continent was, however, taking more from U.S.A. than was sold to that country. The explanation may be found in the U. S. tariff as much as in Europe's need for raw materials. There is, however, another explanation for the fact of a creditor nation sending more to Europe than she got in return. European countries had colonies, and the colonies provided raw materials required by the U.S.A. The phenomenon has long been satisfactorily explained by students of Anglo-American trade who naturally stress the fact that colonies have an export surplus which concels out Britain's large purchases of cotton, tobacco and foodstuffs from the U.S.A. The League publication presents a new series of trade balances though the trade has fallen away in the last decade owing to the growth of economic nationalism. Britain's share of Europe's trade has never been constant, and the growth of autarchy left Britain the biggest buyer of U.S. produce as also of India's. Her own share in the imports of wool, cotton, tobacco and other materials increased. Industrial development in Hungary and other countries led to changes in their trade position, but Germany's 'bloodless invasion' started in 1935 and their takings of raw materials for industry were reduced in consequence of barter agreements which assisted exports of German manufactures.

More Planes for Britain

When Lord Halifax went to inaugurate formally the production of Rolls Royce engines at the Packard plant, it was known that last year's reports that Packard was willing to do what Ford turned down were correct. The Packard Company gets a useful contract, but it is nothing like the nourishment poured out for the Lockheed Company whose sensational career climaxed last year because of the ever-increasing demands of the Coastal Command. The Consolidated Aircraft Company has been producing Catalinas by the hundreds for the R.A.F., and for the last two months, much has been heard of the first deliveries of Boeing Aircraft for Britain. With exports constantly rising, the aircraft industry represents an ususual sector of U.S. manfacturing industry. The profits last year advanced substantially and a further rise can be predicted confidently. In no field of U.S. defence has progress been so conspicuous and the plants scattered over the U.S.A. from coast to coast have nothing to worry about after the adoption of priorities procedure and the freezing of non-essential orders. Companies specialising in civil aviation e.g. Douglas Aircraft have by no means neglected the manufacture of fighting machines. Recent reports from Washington to the *Daily Telegraph* and *Morning Post* stated that the Northrop Aircraft Company was getting ready to manfacture Vultee Vengeance dive-bombers for Britain. The plant in California is expected to take on 3,000 workers by January. The company has £ 3 million worth of orders on its books. The same correspondent stated that the Douglas Aircraft Company which is concentrating on Havocs for Britain has sent out a call for new workers and has announced that its present staff of 32,000 will increase to 47,000 by the end of the year. For over a year the production of the Garand rifle, approved by the U.S. Army, has increasing. It has been announced that mass production has raised the rate of production to one complete rifle for every minute. The arsenal at Springfield, Mass. has delivered 250,000 Garands and is working day and night to make enough rifles for the soldiers of the U.S. Army. The extension of the draft like the passage of the Lease and Lend Act has its consequences for arms production and in adding to civilians in employment, stimulates both wages and prices.

North British Report

IN its effects on insurance war has been heavy and uneven. If the effects are more pronounced in Britain than in India the reason is obvious, and not many will argue about the inevitability of the setback reported by many companies last year. The 1940 reports emphasise that energy, care and prudence are still among the

assets and the unquestioned ability to maintain the best traditions is always there. These features are certainly obvious in the 141st annual report of the North British and Mercantile Insurance Company. The most cursory perusal of the report and accounts is enough to convince that North British is among the leaders. It must be confessed that the leading British insurance companies have again demonstrated their power and prestige in the difficulties of wartime. If business has not expanded their sound and economical management added to the enormous resources keep them buoyant and their own clients will be the first to admit that age and strength can bring them through. The contraction in new business is a mark of all 1940 reports and thus we find that the North British and Mercantile Insurance Co.'s life business has shrunk further rather abruptly whereas fire and marine business has improved in comparison with 1939. Total premium income of the company and its subsidiaries for the year amounted to over £ 8.78 millions showing a small increase on 1939 whereas net investment receipts have been reduced to some extent. In spite of a smaller provision for taxes on a smaller profit the profit and loss account shows smaller baances. Total income however shows something like normal growth rising from £ 10.35 millions to £10.48 millions but this is not the distinctive feature of the North British accounts. A truer gauge of the difficulties incident to war is the fall in the underwriting profits for the year, but that hardly concerns the public which has only to look at the revenue accounts and balance-sheet to discover that few insurance offices are so well-equipped for a critical period as the great Edinburgh company which has long enjoyed a special position in India. The Company's strong grasp over general insurance is well illustrated by the rise in fire premiums to over £ 3.4 millions. After meeting claims amounting to £ 1.64 millions and expenses, commissions etc. the Fund is higher at £4.36 millions.. With a life Fund totalling over £ 33 milions the North British had premiums of over £ 2.48 milions in 1940. The very substantial fall in new business figures is readily explained while the inescapable increase in claims has hit this branch rather hard. The Life Branch had an investment revenue exceeding £1 millions and this combined with the very modest total under expenses and commissions helped to provide a small addition to the Life Fund which stood at £33,267,969-16-10 at the end of 1940. Readers need not be reminded that business in the Annuity and sinking fund branches must have suffered alongside of the life business but the Funds in both cases close higher on the year. The life balance sheet shows total assets of over £34 millions of which over £ 32 millions are in investments. The greater part of the securities held are in the form of giltedged and semigilt and the reduction under mortgages and policy loans as compared with 1939 proves that N. B. whose holding of British Government securities has increased by about £900,000 has co-operated with the leading insurance companies in buying the new war loan and Defence Bonds. The marine and accident subsidiaries have done well, all things considered. Marine premiums rose on account of the revision in rates. The consolidated balance sheet shows that as in the past the company maintains strong reserves in addition to the free balances in the Profit and Loss account. The Contingency Reserve is unchanged at £ 1 millions and the main change noticeable in the latest balancesheet is an increase in the Company's investment in British Government Securities and Dominion, Indian and Colonial securities. The holding of railway stocks is virtually unchanged, and each balances totalling over £ 1 million show that a liquid position is maintained against outstanding claims and the reinsurances balances etc. The last valuation conducted at the end of 1939 showed that the position was quite strong and this enabled the North British to provide for a compound revisionary bonus of £ 1PER CENT (Rs. 10 per thousand) to its policyholders. The North British Company and its subsidiaries controlled total assets valued over £65¼ millions at the end of 1940 and there is little doubt that the postwar revival wil find N. B. in the van as usual.

Indian Bank's Progress

A very substantial increase in Deposits continues to be the distinctive feature of the Indian Bank's balancesheets. The latest (published in this issue of **Indian Finance**) shows that deposits have risen as compared with the position at the end of 1940 by as much as Rs.2.4 crores. The sensational rise is perhaps the most accurate index of the Indian Bank's progress in the last year and the increase in the last six months alone has been of the order of Rs.1½ crores nearly. The Indian Bank's strong and secure position is demonstrated once again by the impressive array of figures. Easily the most significant feature of the balancesheet is the increase under Bills Negotiated etc. The increase at a time when foreign trade generally has shrunk is unusual and unimportant too. The addition of another lakh to the Reserve as between this year and the last shows that the reduction in the Investment Reserve has been made good. The Contingent Fund is more or less maintained and the increase of Rs.65,000 nearly in the profit figure for the half year ended June 30 accounts for the increase in the balance at credit of the Profit and Loss account.

The changes of a prosperous year are admirably mirrored in the latest balancesheet. Parallel with the increase in deposits is an increase of nearly Rs.1½ crores under Advances. Total Advances a year ago were shown at Rs.307 lakhs. At the end of June 1941 they amounted to over Rs.453.22 lakhs. The distribution of these advances fully answers expectations and the most agreeable feature is the absolute increase in Advances. It is evident that the increase belongs to the year 1941 rather than the year 1940 and the greater measure of confidence as also the late appearance of the busy season explains this belated but striking increase. A simulataneous increase under Investments is only to be expected but it is worth nothing that while Investments in Government securities have risen by over Rs.50 lakhs; the holding of shares and debentures has been reduced.

With Deposits exceeding Rs.6.6 crores the Indian Bank has certainly to be classed with the Big Five, rather the Big Six of Indian banking now. No more convincing proof of the sound and well-ordered growth of the Indian Bank can be found than the manner in which over half the profits are retained in the books after the usual allocation to Reserve.

A Correction

A mistake to which attention has been drawn by an esteemed reader has to be corrected. In an article in the last issue chronicling the changes in Exchange Banks' deposits it was stated that the total for the five banks with Indian connexions at the end of 1938 amounted to Rs.38.86 crores (which is properly speaking the total for the 15 other Exchange Banks). The correct figure is Rs.28.33 crores showing that deposits had risen both in 1939 and 1938. This, of course, means that the Eastern Exchange Banks shared fully in the growth of deposits which is the principal feature of banking development in recent years. The error is regretted and the correction is published in the belief that the vigilant reader is the best corrector of the press.

It is a commonplace of discussions on the present war, that the economic resources of the belligerents and their fluctuations are far more important to the final issue than the prowess of the armed forces and their vicissitudes. The last war is believed to have been a colossal demonstration of the importance of the economic factor. And it stands to commonsense that, if the army marches on its belly and the soldier is but a tramp if he is not adequately equipped, the means of finding food and fighting equipment is more important than firing guns and storming towns and forts. What appeals to commonsense appeals to the masses. The ordinary man has an unquenchable thirst for knowledge about the war. But not only has warfare become highly technical, but the vocabulary of modern warfare is at once technical jargon and a babel of foreign tongues. What does the average man make of blitzkrieg or panzer, of U-boat or E-boat? Or, again, what conclusions can he make in the face of directly conflicting reports of battles and campaign from the belligerents concerned? It is easier to follow the babel or master the jargon than to see through the mist of propaganda. The ordinary man who is not concerned to docket the daily news for an authoritative History of the War is more interested in getting a clue to the final event. Does economic warfare provide the clue he wants? He understands the place of oil in modern warfare. One need not put in a term in a military school to know that the nation whose stocks of oil and foodstuffs will run out in three months has less chance of winning the war than one whose stocks will sustain operations for over a year. The average newspaper reader, therefore, greedily laps up all available economic statistics. An article on "Germany's oil supplies" in a Sunday paper has more readers than an article on "What is a Panzer Division? or "Why France Fell." There are people who do not care how many tanks or planes have been lost by Russia or Germany, who do not know whether Leningrad or Odessa is the German objective, but who carefully following shipping losses, note down the figures of oil production, crop yields and the like and hope thereby to be able to assess the strength of the combatants.

But economic interpretation, whether of history or of warfare, is an over-simplification. For there is the simple truth that if economic resources affect warfare, warfare, too, affects economic resources. Hitler marched overnight into Denmark and took possession of the large stocks of oil which Britain had allowed these neutrals to accumulate, little suspecting their doom. The stocks of Holland, France and Belgium also came under his control. No earlier estimate of Hitler's resources, however accurate, could take into account the booty which the rapacious Nazi hordes could appropriate for their use. There is no means of knowing how much of the occupied countries Germany could help herself to. To what lengths has German gone in the establishment of a plunder economy in the countries which she has conquered? It is not possible that Germany has kept as a carefully guarded secret the sources and means of her synthetic production? Is it impossible that more progress has been made in ersatz production even during the course of the war? If it is a question of assessing the relative economic strength of the belligerents, you have to get complete information about both sides, you have to estimate the damage effected from day to day, the additions to productive capacity that are being effected. These data are not had for the asking. And when they are lacking, the danger of wishful thinking is greater in the sphere of conomic warfare than in warfare pure and simple. And if you think of ersatz production, the production of oil from coal, the amount of coal needed for each ton of oil, the difierent kinds of oil that are needed and all the rest of it, you will find that economic warfare is, if anything, more technical than the merits of military, naval and aerial campaigns. It would be easier to follow a blitz campaign than the process of finding synthetic substitutes. In a word, economic warfare does not yield to the assault of lay intelligence any more than military warfare.

Even a superficial consideration of the economic factor in the present war shows that there is far more involved in it than the layman can master. But what is more important, there is a vast difference between, on the one hand, the free play of the economic factor

and the operation of the economic forces and on the other, the conscious pursuit of economic warfare based on a clear recognition of the importance of the economic factor in modern warfare. In the former case, the economic factor is but a part of the natural laws that affect, even if they do not altogether govern, the fortunes of nations. It does not figure as such in the plans and programmes of the belligerents. It is only seen, at a much later time, by the historian of the war, as an operative and a more or less decisive factor. But in modern times, the importance of the economic factor is not a discovery of the future historian. The belligerents are actively conscious of it. And each side is determined, not only that its own efforts should not be undermined by the economic factor turning against itself unperceived, but that the other side should be paralysed by adverse developments in the economic sphere.

What distinguishes modern from earlier warfare is the clarity of perception and the intensity of effort to enlist the economic factor on one's own side. It is doubtful if history affords any instance of a general or leader who marched onward and onward without any thought of how he is going to feed his victorious followers. And conversely, no general would have been so stupidly sporting as to let the enemy get plentiful supplies of food and weapons and then try to defeat him in battle. Warfare has necessarily an economic side to it. And if economic warfare is distinctly a modern development, it is because of the almost infinite range of raw material necessary for the equipment of the fighting forces, of the wide range of operations and the vulnerability of the centres of production, the sources of supply and the lines of communication. The absence of any one of these circumstances would have reduced the importance of economic warfare. The fact that lack of food compelled Germany to capitulate in the last war, arresting and important as it is, hardly suffices to give us an idea of the nature of economic warfare as it is planned. Those who look to figures of crop yield in Europe or who believe that the success of the German campaign in the Ukraine depends on whether or not Russia has harvested and removed the grain, are looking at only one facet of economic warfare. Even the British blockade of the high seas cannot be said to embrace a large part of such warfare, since admittedly Germany is not dependent to the same extent as before on outside sources of supply.

An invaluable help in understanding this complex and almost all-important aspect of modern warfare is now provided by Dr. Paul Einzig in his latest work entitled **Economic Warfare** (Macmillan, pp. 150, 7sh. 6d. nett) Dr. Einzig is no stranger to the readers of these columns. For, so long as the air-mail service made it desirable, Dr. Einzig was a regular contributor to **Indian Finance**. And as my readers know, he is an indefatigable writer on all topical problems, a thoroughly well-informed and able journalist, one who is remarkably quick in gathering all available data and making them illumine the problem on hand. This is precisely what he has done on this question of economic warfare. Broadly political considerations seemed to have argued against this publication being made earlier as the British people were till recently trying hard at once to improve the personnel of the Government and avoid personal recriminations and antipathies. For, while there have no doubt been instances of inefficiency which is highly culpable in these dangerous times, generally speaking, the issues connected with economic warfare have come to be appreciated only slowly. It might, perhaps, be said that, as a victim of the blockade, Germany knew better than any other where the shoe pinched. All the efforts of Nazi Germany during the last ten years have been directed to prevent economic strangulation. The determination, with which self-sufficiency has been pursued on the basis of ersatz production at home and subjugation of other countries on the Continent which possess vital sources of supply, is a measure of Germany's appreciation of the importance of the economic factor. But that is more in the nature of defensive economic warfare, a reply to the economic offensive of the British blockade. When Germany launches a submarine campaign in order to sink supply vessels and air-raids industrial towns to dislocate the production of munitions, she takes the economic war into the enemy's camp; and the parallelism between economic and military warfare and their complementary character become complete.

Dr. Einzig stresses what most of us are apt to forget, that economic warfare has both its offensive and its

defensive aspects, that Britain is not only concerned with the prosecution of the blockade and with air raids on the Continent, but has also to defend herself against Germany's economic offensive, that Germany is not only defending herself on the economic front, but is also launching her counter-attacks. But in this sphere, Britain has had the initiative. And the greater part of the book is devoted to a criticism of the old Government for failing to make the most of this initiative. One would expect that with her ideas of the importance of the blockade, Britain would leave no stone unturned to make it as complete and effective as possible, the more so as Germany's position in relation to it is far stronger in this war than in the last. But loopholes, and large ones at that, existed upto a late stage; and the Government was unaware of them in some cases and, in some, extremely reluctant to recognise them. There was also, it must be said in fairness, the need to placate countries like Spain and Italy with a view to prolong, as far as possible, their state of non-belligerency. Even other countries had to be propitiated in order that they might not be thrown into the hands of Hitler. While the Government of the time may be justly condemned for holding up to the people the illusion of a watertight blockade, there is nothing gained by denying the delicacy of diplomatic considerations in enforcing the blockade. It was the entry of Italy into the war and the passing of the whole of the Continent under German control that finally enabled the Government to sweep aside all these considerations and make the naval blockade as tight as it can possibly be made. With the entry of Russia into the war, of which Dr. Einzig seems to have had no anticipation, another large loophole may be said to have been plugged. But it is rather sad to think that even where diplomatic dilemmas were lacking, the authorities showed themselves thoroughly unimaginative and unenterprising. If the aim of the blockade is to cut off the German sources of supply, it is the elementary duty of the Ministry of Economic Warfare to see if there are not other means of furthering this end. Pre-emptive purchases of stocks which are equally available for Germany constitute an obvious weapon of economic warfare. German agents were all over the world buying up goods with calculated recklessness about prices. But the British ministry lost not only time but also the goods by haggling. Napoleon's gibe about the nation of shopkeepers, seems all too true!

On a par with this bungling of pre-emption was the mismanagement of "black lists", lists of firms which acted as intermediaries for the benefit of Germany. Omission of German controlled banks meant failure to block enemy assets. And Dr. Einzig makes a scathing remark when he says that the Foreign Exchange Departments of the Treasury and the Bank of England were justly nicknamed "Hitler's secret weapon". The story of the economic blockade, as related in the first few chapters of the book would be highly disheartening, if it had not been made clear at every stage that, with the advent of Dr. Dalton in the Ministry of Economic Warfare, conditions improved vastly and the blockade has been tightened as far as possible.

But the blockade is only part of the economic offensive, as air-raids on German industrial towns, oil depots and the like are a requirement, not so much of the military campaign, as of the anterior purpose of striking at the economic resources of the enemy. The chapters on air-bombing are among the most interesting parts of the book. Nice questions of economic employment of the available resources are involved. And here, too, Dr. Einzig believes that

NO. 6. THE 'MARKET'

Wherever there is a market, you will find Kerosene.

Stage by stage Kerosene is distributed to reach the innermost depths of the country. The most remote villager is sure of a regular supply, if not actually to his door-step, then at his local 'Market'. Week in, week out Kerosene is always available.

Over a period of many years, Burmah-Shell have built up not only a vast selling organization, but also a widespread service of Inspectors, whose main duties are to improve methods of distribution and to ensure that Kerosene is always available everywhere.

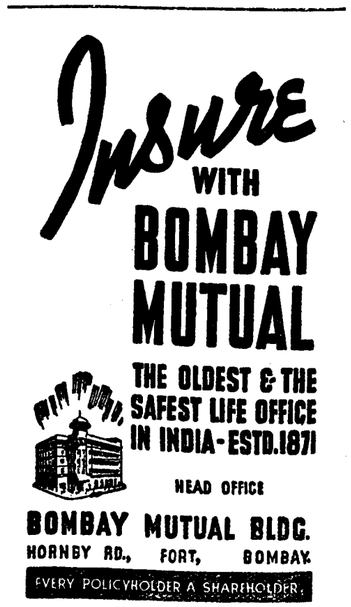
the Government were to blame in not concentrating exclusively on oil. He contends that more crushing blows could have been delivered. But the actual results achieved are something to boast of, though Dr. Einzig is not one of those who would exaggerate them. He does not, on the basis of reports of tourists, rush to conclusions about the damage to the transport system. He is not inclined to under-rate the oil resources still available to Germany. But it is heartening to learn from so severe a critic of the policy in the past that the resources for air raids have been well employed and the results are very considerable. He applauds the Government policy for refusing to listen to the clamour for reprisals on the civilian population and concentrating on the objectives of economic offensive. His considered conclusion is best stated in the following.

"There is no justification for believing that at the end of 1940 the German economic situation was in any sense catastrophical or even threatened to become so in the relatively near future. Nevertheless, the results of the British economic offensive upon Germany's economic situation were by no means negligible. The long-range outlook appeared to be particularly hopeful regarding oil and railway transport."



As for Britain's economic defensive, it is, in the main, an answer to the submarine campaign, the magnetic mine, the commerce raider, and aerial nightbombing. The results of these attempts of Germany to starve Britain into submission are too well known to call for detailed comment here. Suffice it to say that after the fall of France and French collaboration on the seas, and the necessity of taking longer ocean routes, the shipping shortage was seriously aggravated; the nation was made conscious of the fact that economic defensive necessarily included more careful conservation of available resources. Rationing was made stricter. But at no time was the state of supplies intolerable. Oil supplies continued to be more than adequate and there was no shortage of raw material. It is, however, in relation to the threat to production consequent on bombing that the most serious apprehensions are felt. Here, too, it is significant that more stoppage of work was caused by "shelteritis", overcaution in the matter of "alerts" and taking shelter, than by damage to plant and machinery. "Shelteritis" has been shaken off. And thanks to Hitler's faith in demoralising the civilian population, the worst horrors of the blitzkrieg were visited on civilian dwellings in London rather than military objectives or industrial plants. It would be idle to deny the damage done to Coventry and other industrial towns. But the policy of dispersion adopted by Government and industry has enabled the nation to weather the storm; and "by the end of 1940 the leading industrial centres represented a much smaller percentage of the country's total capacity of war material production than they did twelve months ago". An accurate profit and loss account of the economic warfare is impossible to make. But a not too distant approach to it is in the following.

"While the total damage inflicted upon British supplies and productive capacity was possibly larger than that inflicted upon German supplies and productive capacity by the R.A.F., the latter's more systematic attacks on special targets was probably more effective. In no branch of production did the German air attacks cause damage comparable with the damage inflicted upon German oil plants and upon the German transport system."

With the outbreak of war between Russia and Germany, Germany may be said to have laid on herself a heavy handicap in the game of economic warfare. Whether it will crush her altogether, or whether she will offset it by further conquests in the East, the present moment is particularly inopportune to say. Economic warfare has not yet got to the point of deciding the fate of military campaigns. But for the world at large it is time that nations were economic in warfare, rather than skilful in economic warfare.

On the death of Sir Sorabji Pochkhanawalla, Mr. H. C. Captain, who was, for nearly two decades, Secretary of the Central Bank of India, was made the Manager of the institution in 1937. Last year, he was made the General Manager. It is now announced that his designation hereafter will be Managing Director. This is fitting recognition of his excellent stewardship for the past four years. Succeeding a giant like Sir Sorabji, whose identity with the Bank he created was so complete that, in popular estimation, Central Bank meant Sorabji and Sorabji meant Central Bank, Mr. Captain had all the handicap which falls to the lot of one who steps into the shoes of a towering personality. He could not help feeling that all eyes were on him with the wistful interrogation if he could be worthy of the mantle that fell on his shoulders. Called to guide the destiny of an institution with far-flung branches and by far the largest number of clients among Indian joint-stock banks, Mr. Captain can claim, at the end of four years, that he has fully justified the confidence placed in him by his directors. When he assumed office as Manager, the Central Bank had 59 branches and 31 pay offices; to-day it has 140 branches and pay offices—an increase of 50 which works out to twelve new offices every year. The Central Bank is now a truly All-India organisation. At the end of 1937, the deposits of the Bank stood at Rs. 36.38 crors—and, in this regard, it holds the first place among banks in India barring the Imperial Bank. The Reserves have been strengthened by nearly Rs. 25 lakhs in this period. The net profits have risen from Rs. 27 lakhs to over Rs. 30 lakhs. The popularity of the Central Bank shares has also increased as is testified by a rise of 20 percent in its value. While other banks report of shrinking advances, the Central Bank has increased its advances from Rs. 14 crores to nearly Rs. 18½ crores. Mr. Captain has steadfastly adhered to the tradition of the higher liquidity, liquid assets in the shape of cash, and government and approved securities being nearly 60 percent of deposits. From every standpoint the Central Bank, under his care, has maintained and even accelerated its all-round progress, full of vitality and vigorous growth, and extending banking amenities to distant parts of this vast country.

Sir Frederick James, who is joining the Tatas, will be presumably taking on the 'political' side of the work which hitherto was part of the portfolio of Sir Hormusji Mody. It was at the time of the first Tariff Board enquiry on steel that the Tatas realised the need of some manner of influential 'liaison' with the Central Government. The burden of negotiations and manoeuvrings in New Delhi and Simla fell, at that time, on Mr. Ratanji D. Tata. To all outward appearances, he bore that burden lightly. For, he had an easy charm which spelt success for any mission he was engaged in. But those who knew him intimately could not but know that the work of negotiation of that kind was irksome to one so sensitive as he was. And he was convinced that the Tata interests had expanded to such a stage, and the general developments in India were shaping in such a way, that some kind of liaison with Olympus must be provided. When Sir Homi Mody was invited to join Tatas, he, among his many other responsibilities, served this purpose surpassingly well. With the all-essential part which the Tata Iron and Steel Company is playing in the matter of war supplies, the need for such contact is ever so much greater. Sir Frederick will prove a worthy successor to Sir Homi. Why not an Indian?—the carping critic may ask. The answer is simple: the policy of Tatas from the beginning has been to secure the best talents wherever they be found. Sir Ardeshir Dalal, Sir Homi Mody, Hon. Sushil Sinha, Mr. Mather, Mr. A. D. Shroff, Dr. John Matthai—these are the recruits secured by the Tatas on the criterion of the best available talents. Sir Frederick now joins this distinguished company; and, as knowing him intimately, I can say that he will add more lustre to the company.

Simla, August 12.

MANY important questions, in connection with the expansion of the Viceroy's Council are awaiting His Excellency's attention when he returns from tour. It is generally expected, thanks to the special arrangements which are being made to bring Sir Firoze Khan Noon and Dr. E. Raghavendra Rau back to India, that the new enlarged Council will be able to have its first meeting before the end of September. One question concerns Secretariat arrangements necessary for the new members. If the Departments are to be regrouped so as to give each Member a full-time Secretary and a separate independent staff, a number of new appointments will have to be made involving considerable addtion to expenditure-though it would appear a decision has already been taken to offer only a salary of Rs. 3500 per month to new Secretaries hereafter. There is however a proposal to copy the example of some of the Provincial Secretariats and to make arrangements with the existing staff itself for carrying on the work of all the Members. In that case it may not be necessary to disturb to any great extent the present Departmental arrangements though there may be new portfolios with new members in charge. All these questions—the readjustment of Department the new staff necessary, and the assignment of functions—will only be finally decided after the new members have taken charge of their offices and consulted the Viceroy. In the meantime there are also reports suggesting the possibility of a reshuffling of portfolios themselves before the end of the year. If, as is rumoured, Sir Andrew Clow is appointed to the Governorship of Assam, there is the likelihood of Sir Akbar Hydari being transferred to the Communications portfolio. In that case the Information portfolio may go to a non-official European like Mr. Griffiths who fulfils the statutory requirement of having served for at least ten years under the Crown.

* * *

One of the first problems which the new Council will have to face relates to the subject of additional taxation. The question whether an emergency taxation bill should be brought forward during the coming autumn session of the Central Legislature appears to be engaging the attention of the Finance Member, but as evidently there is a desire to do nothing which will offend the susceptibilities of the new members, no decision is likely to be taken before the new Council has had an opportunity to discuss the question. Though the Government of India is largely relying on its loan programme for financing the increasing cost of Defence expansion, it is certain that a certain amount of additional taxation will have to be imposed to cover at least part of the deficit next year. Psychologically there is an advantage in adopting the procedure followed last year of having part of the taxation proposals passed in the autumn session itself and reserving the other for the main Budget, for if the taxation proposals are brought forward all together at one time, their effect on the public mind will not be the same as when they are distributed. From the official point of view there is something to be said for the Raisman policy of seeking to lessen the effect of the taxation proposals by having two taxation bills every year instead of one as before. At one time, it being said that as the Finance Member had provided in his last Budget for the whole year as far as he was in a position to visualise the needs of the year, there was really no occasion for an emergency taxation measure, but it is now said that the situation created by the Far Eastern develoments, which has definitely hit our Customs receipts—not to mention the financial effect of petrol rationing and other measures—makes it necessary to reconsider the financial position and ascertain whether any interim urgent measures to recoup the finances are required. On the other hand, there is also the consideration that the new members of the "expanded" Council, who are already on their defensive for having agreed to join the Council in the existing circumstances, may not like to start their new career with an unpopular taxation measure. It is believed that the Viceroy's intention is to have the matter fully discussed by the new Council before taking any final decision.

* * *

It may be useful at the present stage to examine the real position of the Central Government's finances so far as they are known. Railway receipts are mounting up rapidly-an increase of nearly Rs. one crore during the last 11days of July alone as compared with the previous year. The income of Railways during the first four months of the year shows an unprecedented increase of over Rs. 4½ crores above the previous year's total. As this considerably exceeds Budget anticipations, the prospect of an increased contribution from Railways to general revenues is there, but it has to be remembered that a good portion of the increase in Railway earnings is due to military traffic and movement of goods for Government purposes. From the Reserve Bank has come an unexpected windfall of Rs. 1½ crores—very useful indeed at the present juncture. The position regarding excise receipts is not quite so satisfactory, for the three months, April to June, have brought only Rs. 2½ crores as against the expected Budget total of Rs. 12 crores for the whole year. It may not however be unreasonable to hope that the Budget total may as a result increase in the latter half of the year. Receipts from Corporation tax, Income Tax, Salt and other major heads of revenue have generally been on the increase as compared with the previous year and quite encouraging also, even as compared with the Budget estimates for the current year. Customs receipts during the first three months of the current year have been just over Rs. 10½ crores as against the budgeted total of Rs. 35 crores for the whole year. Though this figure cannot be regarded as very discouraging, the future of our imports-particularly from Japan is so uncertain that Customs receipts during the remaining part of the year cannot be expected to maintain this level. Revenue from land customs is not even half of what it was last year, while at present the yield from export duties is considerably less than the previous year's figure. On the other hand, such figures as are available regarding the expenditure of the Central Government shows that as compared with the previous year there is an increase of as much as a crore per month owing to the huge cost of Defence expansion. From a study of these and other figures one is led to believe that though there is no immediate urgency for fresh taxation to meet the current year's needs, the Finance Member may have to impose additional taxation to the extent of not less than Rs. 6 to 8 crores for the coming year, but it is for the new Council to decide whether an emergency Bill should be brought forward now to cover part of it or whether it would be better to wait and present them as consolidated proposals at the time of the general Budget later on in the year.

* * *

The Education Member, Sir G. S. Bajpai, has returned to Simla after his tour in South India. Very careful note has been taken by him of the points raised in the discussions which he had with the members of the Madras committee and other bodies. At present he is waiting for the Indian deputation which has come from Burma to make representations to the Government of India. The official view still is that some of the objections are due to misapprehension based on a wrong interpretation of the terms of the agreement and that some others are premature at the moment as they can only be taken up for discussion after the proposed Immigration Board has been set up and made its recommendations. In any case, the discussions have shown the need for full clarification of the issues raised, so that the implications of the agreement may be fully understood in both the countries and so that there may be no misunderstanding or complication later in the actual working of the agreement. As a result of the discussions which Sir G. S. Bajpai has already had with Indian leaders and will soon have with the Indian committee from Rangoon, it may be possible for the Government of India to get into touch with the Burma Government and secure the necessary assurances from them to satisfy Indian opinion. There seems very little hope of any radical changes in the text of the agreement, but in order to remove misapprehensions and also get rid of those ambiguities which may lead to difficulties in the future.

Bombay, Aug. 13.

For a week or so people here will keep talking about the luck of mill workers who have got an addition to their dearness allowance almost without asking for it. Though much fuss is made about the failure of Government to put into effect the recommendations of the Textile Labour Committee, it is not forgotten that the local Government indicated its pleasure to the millowners last month when the price-level rose further and an advance in wages appeared inescapable. Two annas plus two annas per head for the lowpaid textile operative seems high, but Bombay wages have not in most years been as high as those in Ahmedabad. Though it is frequently urged that the interim report of the Textile Labour Committee entailed an increase of 11.9 per cent in wages paid in Bombay mill industry, not many care to remember that there was a bitter fight over that increase and the next increase was rendered unavoidable by the big strike. An addition of 10 per cent to wages was made by the dearness allowance introduced last year and the latest increase represents a further addition to the wage-bill. It has been claimed that average wages in 1941 are 27 per cent above the rates prevailing in 1938, but few care to consider the radical difference in the situation in the mill industry. Prices of yarn and fabrics have risen well ahead of the addiitional allowance though not to the same extent as in Calcutta and other places and the textile manufacturer will defend his own action in putting up prices by pointing to the relief given to workers. The Bombay Government has been praised for telling the millowners what to do; but labour leaders who deplore the delay in introducing the reforms approved by the Labour Enquiry Committee are not likely to come out as fervent admirers. The increase in the allowance in Bombay was almost precipitated by the happenings in Cawnpore and Coimbatore. Discretion appeared to justify this step and those who are astounded by the millowners' generosity are not apparently mindful of the advantages accruing to Indian mills from the impending rupture of trade relations with Japan. Sharing prosperity is usual in agriculture, industry has learnt to imitate; that's about all that has happened.

Bombay has reacted favourably to the conversion offer made to holders of the 3 per cent 1941 loan. The notification issued on Monday simplified the business. As the shortterm loan fancied by institutional investors the 3 per cent loan is likely to be well held and nearly all holders would be ready to exchange into the other loans. Adjustments made with reference to interest due will favour the Government rather than the holder and this is as it should be. Part payment in cash to assentors should the 1941 loan tendered be not an exact equivalent of the issue price per cent has been provided for and it is believed that the majority of holders will agree to take the 2nd defence loan or else the 1963-65 loan this month. As the Government need not find the 10 crores and odd wanted for paying off the 1941 loan the ways and means position should strengthen further. The rates for the three loans involved in the converson offer seem to be about right and the time and manner of the offer should be more happy than last year's offer in regard to the 5 per cent 1940-43 loan.

Bombay millowners will not be long in expressing an opinion on the offer made by the Commerce Department as regards the rebate of duty on imported cotton. The Government has asked for proposals from textile interests regarding the procedure to be adopted which means that the Government adheres to the view expressed in May that the claim for a rebate upon export of goods made in whole or in part of imported cotton is legitimate. The Government in asking for suggestions from textile interests confesses that the Customs Department cannot put out a formula. It has also been urged that the war has stimulated textile exports and a rebate is held to be unnecessary. It is therefore likely that the rebate system will be introduced only after the war though a promise is held out that if circumstances require it, the rebate would be made available immediately. Government intends to devise a suitable administrative procedure for the purpose through consultation with the trade interests.

Bombay which followed the legislative proceedings in connexion with the Import of Drugs Col control Bill admits that Col. Chopra endorses the oft-expressed views regarding analysis and tests for pharmaceutical preparations. The first report of the Biochemical Standardisation laboratory contains evidence relating to the prevalence of adulteration and indicates also the remedy. The survey of Indian drugs without casting doubt on the therapeutic value of Indian medical drugs indicates that potency is a matter for conjecture. Only 22 per cent. of samples of digitalin came up to the prescribed standard and only 19 out of 36 samples of adrenalin hydrochlor tested were up to standard. The report certainly suggests that wartime progress in the field of drugs and chemicals manufacture will have to be carefully examined. In the three years covered by the first report the laboratory examined about 1,400 samples of drugs and medical chemicals described in the B. P. These included patent and proprietory preparations. About 50 per cent. of the samples were found not to conform to the standards or not to comply with the specifications mentioned by the senders of samples. About 75 per cent. of the samples submitted came from within India being either manufactured or bottled here. The report throws light on the problems raised by adulteration and lest it be imagined that the picture is over coloured it has been stated that a more alarming picture would be presented if proper arrangements for inspection and checking were made.

The Bombay cotton market finds nothing to ginger it up of late. The Far Eastern imbroglio weighs down everything and the agricultural bloc's activity in the U. S. Senate is hardly followed. Not much interest was roused by the first Bureau estimate issued on Friday. The U. S. A. expects a crop of 10,817,000 bales. The Bureau puts the average outturn at 224.4 lbs. per acre in spite of all the stories about weevil damage. The condition is given as 72 per cent. and the first ginnings are given as 2,000 bales. The first estimate shows that the crop forecast is more than half a million bales below that issued last August. Private estimates corresponded closely with the Bureau's forecast; but New York failed to respond because Futures fell last week-end and not even the 5 cents plus loan level is going to put cotton up even if ceilings are raised by Congress. The Karachi market which which must follow Americans closely has latterly been weak and stocks with shippers are rising. The Bombay market is flat though cotton paid for already may be conveyed in Japanese ships while the Port Trust is ready to show concessions if cargoes are detained. Far Eastern developments compromise recovery and the late monsoon is not going to make much difference to the 1941 crop which is likely to decline steadily as soon as it is established that Indian mills cannot take up 5 million bales.

Jute and Jute Manufactures

(From Our Correspondent)

Calcutta, August 14.

It is to be hoped that the Government of Bengal is not counting its chickens before they are hatched. In a Press Note issued the other day Government evince their complete self-satisfaction with the success of their Jute Regulation policy for this year. As the marketing of the crop has scarcely commenced yet, it might have been wiser to wait some time to see how the position develops before claiming complete success. But presumably it pays to advertise, and modesty is not as a rule the most noticeable characteristic in advertisers. With some aspects of the Press Note we have no quarrel. The exhortations to the cultivator with regard to the handling of the crop in preparing it for the market, if these exhortations can be made really to reach the cultivator, may do some good. particularly the item regarding marketing the jute 'perfectly dried.' The old bug-bear of excessive moisture is again raising its head as it invariably does in a period of high prices. It is a curious anomaly that when jute is cheap it is usually procurable dry, but as soon as the price begins to rise, moisture appears. Government having been largely instrumental in raising the price of jute might now evolve some scheme rather more likely to be effective than mere verbal exhortations, to penalise, the improper watering of jute or the attempt to market jute which contains excess moisture. The Jute Regulation Staff might be well employed in an endeavour of this sort which would be much appreciated by the trade in general.

Comment has been heard during the last two weeks on the almost complete fading out of overseas demand for jute goods. When one considers the volume of enquiry for jute fabrics which has been turned back in the past few months because Mills were unable to undertake it, it is almost more to be wondered at that buyers think it worth while to waste money in cable enquiries. This is another feature of the deliberate restriction of production policy which from a long term point of view cannot but be harmful to the Calcutta Jute Industry. The volume and variety of the enquiry has been such that it has been obvious that the world was in need of jute fabrics—always, be it kept in mind, at reasonable and competive prices. For a long time past Mills have not been in a position to accept orders to any extent for early shipment. On occasion, if the price was sufficiently attractive, they might be tempted to buy back standard goods and resell some speciality which was wanted. But such a transaction predicated a fat profit on the change, or in other words the buyer was being held up to ransom for his requirements, which under a more liberal production policy, should have been obtainable at market parity. As often as not the price available was not enough to tempt a mill to such a transaction and the order went unfulfilled, so far as Calcutta was concerned. But it is almost certain that the order was filled somewhere with a competitive fabric or a substitute of some sort, which means that Calcutta has been turning away business which may well be now diverted into another channel and may never come back here. The J. M. A. Committee might be astonished if they were to interrogate some of the fabrics brokers on the volume of business which has recently been refused.

Mill production for the month of July rose to 98,384 tons as against 88,446 tons in June and 93,830 tons in May. Hessian cloth amounted to 1738 lakhs yards and Sackings to 1131 lakhs. U. S. A. consumption shows satisfactory seasonal improvement to 640 lakhs in July against 490 in the previous month and 540 in July 1940. Stocks stood at 2250 lakhs against 2210 in the previous month and 2950 in July 1940.

There has been little to note in the Export Jute market. Enquiry continues for Dundee Tossa and business was reported in Assortment at Rs. 68 to Rs. 70 and in 4s at Rs. 52 to Rs. 54 the shipment being for Octr-Novr with the option of either Old Crop or New Crop. Nominal quotations for Old Crop Firsts and Lightnings for shipments are Rs. 51 and Rs. 41, while for New Crop August-September shipment Rs. 57 and Rs. 50 are quoted. These rates are based on a Fatka around Rs. 62. For Mill delivery Rs. 53 and Rs. 43 are now asked for old crop Firsts and Lightnings though some Lightnings alone were reported done at Rs. 40. Mills also bought in small quantity Outport Tossa 4s at Rs. 34, Straight morahed Rejections at Rs. 25 and Rs. 24 and Cuttings at Rs. 15-12 and Rs. 14-12 for N. C. and M. C. respectively. The Futures market has ruled fairly steady, recovering from below Rs. 60 to close around Rs. 62.

Loose Jute has not been an active market, buyers generally holding off in the belief that prices will ease when imports increase. A moderate demand has continued for high quality, Tops alone selling at Rs. 13 to Rs. 13-8. Further European sales have been recorded at Rs. 13-8, Rs. 11-8 and Rs. 8-8 for Tops. Middles and Bottoms and a margin of Rs. 3 between Middles and Bottoms seems to have been fairly well established. It is rather remarkable that this premium continues to be paid for European packing when Indian Jat is offering freely at one rupee less and Indian District at Rs. 1-8 less. But Indian offers are at a discount from up-country prices which continue very firm on account of the paucity of imports and the steady demand for all that is coming in. It is expected that after a fortnight imports will be arriving in greater quantity. Cutting has not been hurried as rivers are steady about normal levels.

To withstand the immense strain imposed on them, the smallest of details in modern structures are made of steel.

DEPENDS UPON THE STRENGTH OF STEEL

To the people of yesterday how amazing and unbelievable would appear the concrete fact that man, today, spans the sky-ways of the world. And, whether or not the heavens echo the menacing roar of bombers, or the hum of aerial argosies, it is the strength of steel which has given man his wings. It is the dependable, tested strength of this metal which has linked step to step in this scientific triumph of modern civilization.

In the years that lie ahead it is this same power which will be the basis of man's greater achievements—his higher success.

Always—Everywhere—Steel for Strength

TATA STEEL

—ISSUED BY THE TATA IRON & STEEL CO., LTD. HEAD SALES OFFICE: 102A, CLIVE STREET, CALCUTTA

JUTE

Calcutta, August 13.

Suspense regarding the Far Eastern situation has had a restraining influence on the jute market during the short period under review. Owing to the weakness of the jute manufacturers market and the poor buying by mills, a rather quiet tone is noticeable. During the course of to-day, however, a slightly better feeling is evident and the lost ground has been mostly regained. Sellers were more reserved towards the close.

Mill buying cannot be expected to be in any large scale so long as the uncertainty regarding the Far Eastern situation persists. As given out in the *communique* published by the Bengal Government earlier this week, there is no shortage of jute at the present moment. And with adequate stocks, mills have therefore no need to make additional purchases especially as supplies of new crop will be coming in large quantities next month. The export outlook is very discouraging. Actually during the period under review, no business of importance has been recorded.

In the loose jute section, only a small business has been passing. New crop Indian Jat Tops, Middles and Bottoms are now Rs. 12-8, Rs. 11-8 and Rs. 8-8 per maund respectively.

In the pucca bales section, shippers have been inactive with no export business done. Only a small amount of business has been done with mills. Firsts and Lightnings were done at Rs 51 and Rs. 41 respectively.

In the futures market after earlier weakness a slightly better tendency is noticeable at the time of writing. From Rs. 59-12, the lowest level for the week, there has been a rise to Rs. 61-2. The quotation at the close is Rs. 60-14.

JUTE MANUFACTURES

Calcutta, August 13.

The jute manufactures market is definitely easier during the last four days and operators are not inclined to enter into any commitments. Apart from the difficulty in getting freight, the possibility of dislocation to shipping traffic has caused a recession in values. Quotations are at the lowest levels for the week, 9 porters ready being Rs. 19, September Rs. 18-6, October/December Rs. 17 and January/March Rs. 16. 11 porters ready are Rs. 24, September Rs. 23-10, October/December Rs. 21-13 and January/March Rs. 19-14.

In the heavy goods section, quotations are barely steady. Apart from Liverpool Twills which were reported done at Rs. 42-4 for January/March there is little of business to be reported. B twills for August shipment sold on the basis of Rs. 38-4, Liverpool twills for the same position Rs. 44-8, and Cornsacks Rs. 39-8.

Under normal circumstances the American stock and consumption figures for July would have had an encouraging effect on the market. As from June onwards there will be an increase in consumption it is unfortunate that there should be a dislocation in shipping traffic at the present moment. Total consumption for the seven months of the year is 399 million yards against 357 million yards for the same months in 1939.

COTTON

Calcutta, August 13.

Favourable weather reports and the fears regarding the future of Japanese exports have resulted in a sharp break in prices in the Bombay raw cotton market during the past four days. Trading has been very quiet. If there is a cessation of exports to Japan the disposal of short staple varieties will be problematical. Broach April-May 1942 were Rs. 255-4, Oomra December-January Rs. 189-12 and Bengal December-January Rs. 146-8 against Rs. 270-4 Rs. 203 and Rs. 153-4 respectively on the last occasion.

In the New York market also easier conditions have been noticeable. There has been increased hedge selling and small trade buying. The quotation for October was 16.06 cents and December 16.27 cents against 16.68 cents and 16.87 cents. It is noteworthy that there has been an appreciation in the quotation for December.

PIECEGOODS

Calcutta, August 13.

While the raw cotton market is undecided with reports of renewed tension in the Far East and the possibility of a complete severance of economic relations with Japan the piecegoods market continues active and yet further rise in prices for indigenous goods has been recorded. Stocks of Japanese goods are small and having regard to the relative cheapness of indigenous goods there is no tendency to go in for the foreign styles at the present rates. As for Indian Mills they have not been keen on doing business. It is not possible to ensure delivery and it is generally expected that values will move further upward.

The yarn market also has been active with sellers reserved. There will be a scarcity of yarn as in the absence of imported yarn it will be impossible for Indian spinners to supply the entire demand. Already, considerable difficulty is being experienced by handloom weavers.

GOLD

Calcutta, August 13.

The continued uncertainty regarding the Far Eastern situation has been responsible for the extremely dull conditions in the Bombay gold market during the past week. Arbitrage business has been negligible, and the lack of confidence is clearly noticeable from the discount for forward positions. Last week, Second Settlement was quoting at a premium of six pies while at the time of writing it is at a discount of six pies. Gold ready is Rs. 42-1-3, First Settlement Rs. 42-1-3 and Second Settlement Rs. 42-0-9.

SILVER

Calcutta, August 13.

The Bombay Silver Market has been absolutely uninteresting and quotations were not very much changel on balance till Monday. On Tuesday, however, a definitely easier feeling was noticeable and the quotation for Indian Mint Silver ready came down to Rs. 62-10 from Rs. 62-13. There has been a slight recovery to day, the quotation for ready being Rs. 62-12. First settlement were quoting Rs. 62-13-6, and second settlement Rs. 62-15. The quotations at the end of last week were Rs. 62-13, Rs. 62-13 and Rs. 62-14-6, respectively. It is significant that there has been an appreciation in the premiums for the forward positions. Last week, Indian Mint Silver ready and First settlement were quoting at the same level and only for Second Settlement there was a premium of one and a half annas. There has since been an appreciation to three annas.

In the London market rather quiet conditions have been noticeable and the quotation for the most part has been around 23 7/16d., both for spot and forward. Small buying was satisfied by producers selling.

WHEAT

Calcutta, August 13.

The publication of the All-India Final Wheat forecast has not had any effect on the Karachi wheat market. As a matter of fact, even the anxiety regarding the Far Eastern situation and the absence of any rains in the wheat growing districts has not had any effect on prices. Opinion is divided and if there is any decline in values in the Karachi market, it is due to the weakness of the Karachi market. There are reports regarding price control in certain parts of U.P., and if this is extended to other parts of the country as well it may put a "ceiling" to wheat prices. Choice White ready were at the close Rs. 33-10, September Rs. 34 and November Rs. 34-15 against Rs. 34-5-6, Rs. 34-10-6 and Rs. 35-10 respectively at the time of last writing.

In the Calcutta market, easier conditions are noticeable, Cawnpore and Punjab ready were Rs. 4-14-6 and September Rs. 5 against Rs. 4-15-6 and Rs. 5-2. at the end of last week.

According to the All-India Final Wheat forecast 1940-41, published on Monday, the area under the crop is 34,862,000 acres and against 34,009,000 acres for 1939-40 or an increase of 3 per cent. The yield is estimated at 10,005,000 tons against 10,767,000 tons, a decrease of 7 per cent.

(Continued from page 311)

it is possible that the two Governments may come to some definite understanding and also, where possible, agree to possible modifications. In official circles, the fear is that any bitter agitation in this country may lead to counter-agitation in Burma and that this may have the unfortunate effect of disturbing the friendly relations between the two countries and provoking communal troubles again in that country.

It is now certain that Sir G. S. Bajpai will proceed to Ceylon early next month to resume the negotitations with the Ceylon Ministers. According to reports here Mr. M. S. Aney, the new Overseas Member, may also accompany him.

* * *

Simla is in a state of quiet expectancy—all the more quiet because of the absence of the Viceroy and several Members of Government and heads of Departments on tour. As even the newly appointed Members of Government, with the single notable exception of Mr. N. R. Sarker, have been observing unusual silence, the prevailing tendency in Simla talks is to indulge in no extravagant hopes but to wait and see. In official circles no surprise is expressed at the reception which the "expansion" proposals have received in the country. It was apparently expected that Congress would take no notice of them, that Mr. Jinnah would flare up at the desertion of some of his colleagues and that so far as the Sapru group is concerned they would follow the old Liberal policy of accepting what is given and asking for more. It is evidently the hope in official circles that the "expanded" Council would by its work seek to justify itself and win public sympathy. It is not without some political significance that Mr. M. S. Aney has been chosen as the Leader of the House in the Central Assembly. In the past this important position has generally been occupied by the Law Member but obviously the selection of Mr. Aney, one of the oldest members of the Assembly and the leader of a party, is intended as a gesture of goodwill to the elected members. As one friendly advocate put it to me the other day, the argument is "Here is one of your own men as Leader of the House. As he understands your interests, they are safe in his hands." It is reported that the Leader in the Upper House will be Sir Akbar Hydari.

* * *

The next Assembly session may prove eventful in many ways. It is not quite certain yet whether the Muslim League party will walk out of the Legislature as a protest against the expansion or continue to stay in order to demonstrate actively their opposition to the new Cabinet. Some of the Congress Nationalists do not feel quite happy over the decision of their leader, Mr. Aney, to join the Government. As they were vigorous critics in the past of the Government's policy, they would probably continue to be so regardless of the fact that their erstwhile leader, Mr. Aney, would now be identified with the Government.

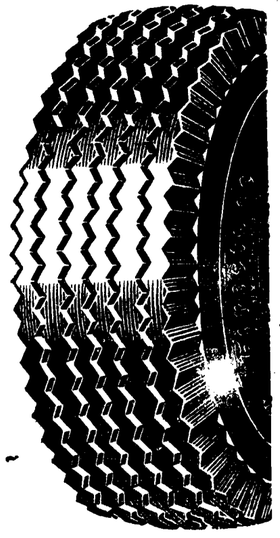
YOUR ROAD SAFETY
Proved on the TRACK

To drive all-out for 500 miles at Indianapolis, the Champions of the track must have that extra margin of safety to hit up increasing speeds, year by year. Ever since 1919, for 22 years, the winning cars have fitted Firestone Tyres, in order to make average speeds rising from 88 to 117 m. p. h. in 1938. You have benefitted from the combined experience of the Indianapolis Winners and the manufacturers by getting increased safety at higher road-speeds in your car. This classic race gave you 4-wheel brakes, driving mirrors, safety glass, streamlining, light-weight pistons, and now

GEAR-GRIP TREAD



The New Firestone Deluxe Champion's 6 tough, deep ribs, with 12 sharp edges and over 3856 angles grip the road to prevent skidding and enable you to bring the car to a safe stop when braking.

SAFETY-LOCK CORD

Each fibre in every cord, each cord in every ply, and the plies themselves are locked together by Firestone's exclusive Gum-Dip — to withstand bursting strain and ensure longer wear.

Stock Markets to-day and to-morrow

GOOD RESPONSE TO LATE NEWS

TILL Wednesday this week stock markets were inclined to be rather hesitant though there was no suggestion of weakness. The confusing situation in the Far East and the rapid progress of the Germans in the south of the Ukraine had a restraining influence and prices tended to fluctuate within narrow limits. The news of an important announcement by the British Government had a stimulating effect. On Thursday in the Bombay market prices firmed up: the effect of the joint declaration by the United States and Britain could not be gauged to-day as markets are closed both in Calcutta and Bombay. In unofficial transactions, however, it is reported that a better tendency is noticeable, *Indian Iron and Steel Corporation* being quoted at Rs. 32-4 and Rs. 20-1 respectively.

* * *

The conversion offer to holders of 3 per cent 1941 bonds should prove to be a success as money is ruling cheap and it will be impossible for holders to seek better investment. According to the terms offered, holders have the option to convert their holdings into the 3 per cent 1949/52 defence bonds at an issue price of Rs. 100 or into the 3 per cent 1963/65 bonds at an issue price of Rs. 95.

* * *

Cotton mills have experienced good trading conditions since the beginning of the year. The reduced imports of Japanese goods and the increase in war orders have almost made it impossible for mills to ensure delivery to civilian customers. Under such circumstances, it is not surprising that there has been a sharp increase in piecegoods prices and ever since the announcement regarding the freezing of Japanese assets in India was made, prices have hardened further. Evidence of the satisfactory conditions in the piecegoods trade is coming in the results of the *Bowreah* and *Dunbar Mills* for the half year ended June, 1941.

The net profit of the *Dunbar Mills, Limited* for the six months before provinding for taxation is Rs. 5,01,131 against Rs. 2,14,905 for the previous half-year. After providing for depreciation the sum of Rs. 50,000 (same) the amount set aside to taxation is Rs. 3,00,000 (Rs. 50,000). The dividend on the ordinary shares is higher at 8 per cent against 6 per cent. It was pointed out on the last occasion that with the conversion of the preference shares into ordinary shares, the chances of a higher dividend on the ordinary shares were brighter. On the basis of the latest dividend the yield should be considered satisfactory as being over 6.5 per cent tax free.

The *Bowreah Cotton Mills Company, Limited* also has done very well during the same half-year, the net earnings being Rs. 2,60,730 against Rs. 87,613 for the latter half of 1940. A sum of Rs. 50,000 is provided for depreciation and Rs. 40,000 for taxation. There were no appropriations in this regard on the last occasion from the profit and loss account. Arrears of dividend on the 'A' preference shares for seven half-years ended June 1937 is to be paid. The 'A' preferences shares at present quoting around Rs. 235 cum-dividend are correctly priced.

The balance sheet of the *Hukumchand Jute Mills, Limited* for the half-year ended March, 1941 has been just published and it makes a satisfactory showing. The improved conditions in the goods market and a larger turnover have been mainly responsible for the improvement in earnings. The net profit for the half year is Rs. 9,09,835 against Rs. 3,70,313 for the previous half-year. Out of the profit the substantial sum of Rs. 6 lakhs is provided for depreciation. The debit balance carried forward is considerably lower at Rs. 17,89,129 against Rs. 20,98,484 brought in. The balance sheet certainly presents a neater appearance. Against debentures redeemed to the total value of Rs. 39,14,300 new debentures bearing interest at 4¾ per cent for Rs. 20 lakhs have been issued thus resulting in a reduction under the total debenture liability by Rs. 19,14,300 as on August 8, 1941. The increase in sundry liabilities is due to the increase in stocks of jute.

* * *

The directors of the *Burma Corporation* have decided that a final dividend of three annas per share, the same as the interim dividend, should be paid to shareholders out of the profits for the year ended June, 1941. The total distribution for the year thus works out to six annas per share against seven annas per share for the previous year. Commenting on the results for 1939-40, I pointed out that with the imminence of a further increase in taxation it was impossible to estimate dividend prospects for 1940-41.

The declaration of the final dividend has had no effect on the market and the shares are quoting around Rs. 4-5 cum-dividend. The dividend is payable on September 30,1941 to shareholders registered on the 18th August, 1941, free of income tax.

With an increase in gross earnings and a decline in working expenses it has been possible for the *Shahdara (Delhi) Saharanpur Light Railway Company, Limited* to report a substantial increase in net earnings over the previous half-year. The net earnings, before providing for taxation, for the half-year ended March, 1941 are Rs. 2,85,207 of which Rs. 84,110 is provided for taxation. The gross earnings of the period were Rs. 6,50,342 against Rs. 5,82,404 for the previous half-year and working expenses Rs. 2,24,586 against Rs. 2,26,132. After bringing in the credit balance of Rs. 2,77,749 from the last account it is possible to transfer Rs. 2,60,000 to General Reserve and Rs. 40,000 to Dividend Equalisation Fund. The allocation to Renewal Reserve is Rs. 42,500, the same as previously. The dividend recommended is higher at 5 per cent against 3½ per cent.

* * *

Bengalee banking institutions have in recent years made good progress. Having scrupulous regard to banking principles the *Hooghly Bank, Limited* and the *Pioneer Bank, Limited* have gained a place among the bigger indigenous banks in the Province.

The balance sheet of the *Hooghly Bank* for the year ended December, 1940 reveals a very satisfactory position. Deposits have increased by over Rs. 10 lakhs to Rs. 36.09 lakhs while the increase in earnings in 1940 over 1939 is as much as 51 per cent. The liquid assets in cash, bullion and G.P. notes amount to Rs. 13.61 lakhs. Of the total advance nearly 97 per cent is fully secured so that the interests of shareholders have been completely safeguarded. The directors point out that the liquid advances made to parties against gold, G.P. notes etc. together with the liquid funds on hand amount to 63.17 per cent of the total working capital

A marked increase in deposits confers special interest on the latest report and accounts of the *Pioneer Bank, Limited*. The progress of this Comilla institution has in recent years attracted great attention. More significant is the rise in the paid-up Capital and Reserves of the Bank to over Rs. 7.21 lakhs. A high degree of liquidity has been preserved, for cash balances alone come to Rs. 9.62 lakhs out of the balance sheet total of Rs. 59.98 lakhs. The policy of cautious expansion has restrained the growth of profits but the dividend is maintained at 7½ per cent. Already a Scheduled Bank, the *Pioneer Bank* is likely to develop fast along healthy lines. WATCH-DOG.

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, Aug. 15.

THE uncertainty regarding the Far Eastern situation had a rather restraining influence on stock markets during the past week and an irregular tendency was noticeable in the several sections on the Calcutta Stock Exchange. Business, however, continued to be on a fairly large scale. In unofficial transactions to-day a definitely firmer tendency was noticeable with the publication of the joint declaration by the United States and Britain regarding war aims. There are no special features of interest. The popular shares continue to be in request while there has been good enquiry for tea shares.

Giltedged securities have been very steady. With the continuance of easy money conditions and the announcement of the terms of the conversion offer to holders of 3 per cent. 1941 bonds it cannot be expected that the tendency in this section would be otherwise. 3½ per cent. Paper has been sticky around Rs. 96. Terminable loans are not very much changed, 3 per cent. 1951/54 being Rs. 100, 3 per cent. 1946 Rs. 102, 4 per cent. 1960/70 Rs. 110-12, 5 per cent. 1945/55 Rs. 111-7 and 3 per cent. 1941 Rs. 100-3. A greater amount of business has been passing in provincial loans, the 3 per cent. 1952 issues being marked higher at Rs. 99-8. The Treasury bills rate during the week has come down to eight annas per cent. per annum from nine annas four pies per cent. per annum last week.

Among public bodies' debentures, 3¼ per cent. *Rangoon Municipal* debentures were Rs. 100-12 and 3½ per cent. *Calcutta Improvement Trust* debentures Rs. 99-8. In industrial debentures, 5 per cent. *Nawabganj Sugar* at Rs. 100-8 and 5 per cent. *Punjab Sugar* at Rs. 100-8 were the only two transactions recorded.

Among jute mills preference shares, *Bally* were dealt in at Rs. 166, *Cheviot* at Rs. 170-8 ex-dividend, *Craig* at Rs. 63-8, *Kamarhatty* at Rs. 156, *Rameshwara* at Rs. 13-6 and *Waverley* at Rs. 65. *Carew & Co.* were better at Rs. 127, *Purtabpore* at Rs. 13-14 cum-dividend and *Steel Corporation* at Rs. 121-8. *Dalmia* preferences were Rs. 122, *Alkali and Chemical* Rs. 122 and *Indo-Burma Petroleum* Rs. 119.

Bank shares have been firm with *Central Bank* shares bought up to Rs. 48-12 ex-dividend. *Imperial Bank* fully paids were Rs. 1,568 and *Contributories* Rs. 386. *Reserve Bank* were better at Rs. 107.

Cotton shares have remained steady at last levels with *Cawnpore Textiles* at Rs. 8-10, *Dunbar* at Rs. 245-8, *Elgin* at Rs. 25-6 and *Muir Mills* at Rs. 321-8.

Coal shares have not been quite in favour, *Bengal* being Rs. 365, *Dhemo Main* Rs. 12-10, *Equitable* Rs. 35-12, *New Beerbhoom* Rs. 16-8 and *Sendra* Rs. 13.

In the jute section, a satisfactory turnover is reported. Prices have been fluctuating in narrow limits. *Adamjee* changed hands at Rs. 26-4, *Albion* at Rs. 210, *Anglo-India* at Rs. 355, *Howrah* at Rs. 55-12, *Hukumchand* at Rs. 12-2, *Kamarhatty* at Rs. 560, *Nuddea* at Rs. 65-8 and *Waverley* at Rs. 3-7. The balance-sheet of the Hukumchand Jute Mills, Limited, for the half-year ended March, 1941 has been published and it makes a satisfactory showing. Owing to the large provision for depreciation, however, it has not been possible to effect any substantial reduction in the debit balance in profit and loss account.

In the Engineering section, only Burn & Co. have been marked higher with buyers up to Rs. 425. *Indian Iron* and *Steel Corporation* after being lower at Rs. 31-10 and Rs. 19-1 are higher to-day at Rs. 32-4 and Rs. 20-1 respectively. *Braithwaite & Co.* were Rs. 10-2, *Britannia Building and Iron* Rs. 10, *Indian Standard Wagon* Rs. 69-8, and *National Iron and Steel* Rs. 9-4.

Sugar shares were quiet with *Buland* at Rs. 18-12, *Carew & Co.* at Rs. 11-11, *Champarun* at Rs. 12-10, *Murree Brewery* at Rs. 15-6 and *Samastipore* at Rs. 9-4.

As pointed out above, a great volume of business has been reported in the Tea section. *Banarhat* were Rs. 435-8, *Dimakusi* Rs. 28-8, *North-Western Cachar* Rs. 236, *Patrakola* Rs. 945, *Sapoi* Rs. 11-12, *Teliapara* Rs. 428 and *Tezpore* Rs. 8-3.

In the miscellaneous section, the declaration of a final dividend of three annas per share for the year 1940-41 has not had any effect on quotation for *Burma Corporation* shares, which are sticky around Rs. 4-5. *Indian Copper Corporation* are quoting Rs. 2-1 and *Consolidated Tin* Rs. 2-8. *B. I. Corporation* have been firm at Rs. 4-12, *Bararee Coke* at Rs. 27-4 ex-dividend, *Indian Cable* at Rs. 28-12 and *New India Investment* at Rs. 60. *Calcutta Trams* after being higher at Rs. 18-8 are lower at Rs. 17-9. Among Paper shares, *Orient Paper* are higher at Rs. 14-4 as also *Titaghur* 'A' and 'B' ordinary shares at Rs. 20-2. *Shree Gopal Paper* were Rs. 12-13, *Star Paper* Rs. 12-2 and *Mysore Paper* Rs. 17-4. *India Paper Pulp* were Rs. 153-8 ex-dividend. *Boroogh Timber* changed hands at the higher level of Rs. 15-8, while *Humayan Properties* ordinary shares were Rs. 6-4 and *Assam Saws* Rs. 3-12.

Rs. 145-8. In the Cash list, *Ahmedabad Advance* were done at Rs. 381-4 and *Vishnu* at Rs. 1,337-8.

Hydro-electrics.—*Andhra Valley*, after opening at Rs. 1,730, were marked down on profit-taking at Rs. 1,717-8, while *Tata Power* showed a rise of about 10 points to close at Rs. 1,717. *Tata Hydro* were, however, in good enquiry, the closing price being higher at Rs. 190.

Steels.—Steel shares opened on Tuesday with *Tata* ordinaries at Rs. 397 and deferreds at Rs. 2,100, and these levels were maintained on Wednesday. On Thursday prices were marked up on some speculative support, the deferreds showing a gain of about 20 points to close at Rs. 2,120. The ordinaries were slightly better at Rs. 399. *Tata Steel* 1st Preferences came to business at Rs. 221-14 and 2nd preferences at Rs. 155-8.

Banks and Insurance.—There was small enquiry in Bank shares, *Central Bank* being done at Rs. 47-10; *Imperial Bank* fully paids at Rs. 1,567-8; contributories at Rs. 384-6; *Bank of India* at Rs. 142 and *Reserve Bank* at Rs. 106.

In the Insurances section, *New India* met with business at Rs. 46-4.

Miscellaneous.—*Bombay-Burma Trading*, after opening at Rs. 440, showed an improving tendency towards the close of the week to close at Rs. 456-4. *Associated Cement* were in demand at Rs. 153-4. An outstanding feature was a sudden spurt in *Bombay Trams* to Rs. 157 owing to the introduction of petrol rationing which, operators believe, will result in greater traffic receipts to the Company. *Belapur Sugar* were steady at Rs. 231; *Alcock Ashdown* at Rs. 575 and *Shivrajpur Syndicate* at Rs. 32. *Scindia Steam* met with some profit-taking during the week and the price closed a shade easier at Rs. 23-12. *Premier Construction* were higher at Rs. 104, while *Indian Iron* ruled steadier around Rs. 32.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, Aug. 14.

Money.—The rate for call money continued to be quoted at ¼ per cent.

Exchange Market.—This section continued to be quiet, Banks selling T.T. at 1s. 15/16d. and buying three months' bills at 1s. 6 7/32d.

Securities.—Business in the securities market continued to be restricted with prices remaining almost stagnant. 3½ per cent. Paper ruled steady at Rs. 96. Among other loans, 1948/52 Loan changed hands at Rs. 97-12; 1951/54 at Rs. 99-13; 1963/65 at Rs. 95-1; 1947/50 at Rs. 103-3; 1960/70 at Rs. 110-9; 1955/60 at Rs. 113-14; 1945/55 at Rs. 111-7 and 3 per cent. 1946 *Defence Bonds* at Rs. 101-13.

Shares.—Despite rumours of price restriction, the local share market exhibited a steady tendency during the week, the price movements being very narrow. Business was somewhat restricted as operators were cautious and preferred to watch developments in the war situation. Steel shares showed little change in prices, while Textiles closed a little higher than in the previous week. The closing rates in almost all sections were higher on improved demand.

Textiles.—Mill shares, after opening lower, advanced towards the close in sympathy with the rise in the raw commodity. *Bombay Dyeing*, after opening lower at Rs. 1,200, showed a rise of about Rs. 32 to close at Rs. 1,232-8. *Central India* closed slightly higher at Rs. 364; *Century* at Rs. 496; *Colaba* at Rs. 210-8; *Gokak* at Rs. 240; *Kohinoor* at Rs. 466; *Svadeshi* at Rs. 363-8 and *Simplex* at

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, Aug. 14.

The local market ruled somewhat steadier during the week under report. Mill shares were a shade easier on some profit-taking, while planting issues continued to be firm. Sugar shares were in good demand.

Securities.—There is practically no change to report in this section, 3½ per cent. Paper being steady at Rs. 96. There was a good enquiry for State Loans, but business was negligible for want of sellers. 3 per cent. 1956-61 *Mysore Loan* had buyers at Rs. 104-6 as also 3½ per cent. *Cochin Loan* at Rs. 104-10. 5 per cent. *Cochin Loan* were, however, on offer at Rs. 106-2.

Mills.—The demand for mill shares has been restricted owing to the scarcity of sellers. *Buckingham & Carnatic* were done up to Rs. 283-8, but closed a shade easier at Rs. 280 on some profit-taking. *Cambodia*, after being done higher at Rs. 10-14, closed at Rs. 10-10. *Mysore Spun Silk* were done at Rs. 10-11; *Mettur Industries* at Rs. 197 x.d.c.r. and *Palani Andavar* preferences at Rs. 57.

Utilities.—Prices remained very steady in this section. *South Madras Electric* ordinaries continued to be on offer at Rs. 13-8, while the first preferences were done at Rs. 13-5-6. *Vizagapatam Electric* were in good demand, but sellers were few.

Plantations.—Rubber shares met with good demand, but towards the close there was some profit-taking with the result the closing levels

(Continued on page 321)

Presidency:—(9th) 5-13; (11th) 5-7, 5-8, 5-12, 5-10.
Rameshwara:—(12th) 8.
Rameshwara (Pref.):—(11th) 13, 13-4, 13-8, 13-1; (12th) 13, 13-1, 13-2, 13-6.
Reliance:—(11th) 57-14, 58-2, 57-12; (12th) 58-8.
Union:—(11th) 434 s.l. 434.
Waverley (Pref.):—(11th) 65.

TEAS :

Arcuttipore:—(11th) 13-2, 13-4, 13-8, 13-12; (12th) 13-8, 13-12, 13-13, 13-10, 13-14, 13-15.
Banarhat (Pref.):—(12th) 168-8, 169, 170.
Betjan:—(11th) 30-2 c.t.
Bishnauth:—(11th) 27-12, 28.
Dejoo Valley:—(11th) 6-2, 6-6.
Dessai & Purbuttia:—(12th) 220, 222-8.
Ellenbari:—(12th) 335, 357 a.ls.
Grob 'A':—(12th) 14-8.
Hansqua:—(11th) 10-12, 11.
Hantapara:—(11th) 398, 400; (12th) 397, 400.
Hattikhira:—(11th) 20-12, 21; (12th) 20-4, 20-8, 20-12.
Huldibari:—(11th) 22-14; (12th) 23-2.
Ledo:—(11th) 209, 210-8.
New Terai:—(12th) 10-12.
Pussimbing:—(9th) 6-4.
Patrakola:—(9th) 945, 950; (12th) 952.
Rungamattee:—(11th) 275.
Rutema:—(9th) 9-12, 9-13, 9-14.
Sapoi:—(12th) 11-8.
Sarugaon:—(12th) 104, 10-6, 10-10, 10-7, 10-11, 10-5.
Singell:—(12th) 70-4.
Singtom:—(9th) 150.
Soom:—(9th) 14.
Teliapara:—(11th) 428.
Teen Ali:—(9th) 13-12.
Tezpore:—(12th) 8-3, 8-7, 8-2.
Teloijan:—(11th) 7-12; (12th) 7-12, 8.
Tongani:—(11th) 5-8.

SUGARS :

Basti:—(9th) 188, s.l.c.t.
Buland:—(9th) 18-8, 18-12; (11th) 18-8, 18-12.
Carew & Co.:—(9th) 12-2; (11th) 11-14, 12-2, 11-12, 12, 12-4, 11-15, 12-3, 12-3 s.l.; (12th) 11-12, 12 (12-4, 12-6 s.ls.) 11-10, 11-11.
Carew & Co. (Pref.):—(12th) 126, 127.
Dyer Meakin Brewery:—(9th) 15-8; (11th) 15, 15-2, 15-4, 15-8, 15-4.
Murree Brewery:—(9th) 15-8.
New Savan:—(12th) 10-6.
Purtabpore:—(11th) 10-12, 10-6, 10.
Purtabpore (Pref.):—(12th) 18-14 c.d.
Punjab Sugar:—(11th) 184 s.l.c.t.
Raza:—(9th) 18-8.
Samastipore:—(9th) 9-12, 9-6; (12th) 9-3, 9-4, 9-8.
Shee Krishna Gyanoday (Pref.):—(11th) 113, 116; (12th) 117.
Shee Sitaram:—(12th) 10-2.

ENGINEERINGS :

Braithwaite:—(9th) 9-14, 10 c.t.; (11th) 9-14, 10-2.
Britannia Engineering:—(9th) 11-12, 11-11; (11th) 11-12, 12, 11-8, 11-7; (12th) 11-10, 11-14, 11-12.
Britannia Building and Iron:—(11th) 10, 10-6; (12th) 10-8, 10-5.
Burn & Co.:—(9th) 415, 417-8; (11th) 420 s.l., 420, 422, 417, 423; (12th) 419, 421-8, 418, 420.
Hukumchand Steel:—(9th) 14-8; (11th) 14-8, 14-16, 14-10; (12th) 14-3, 14-4, 14-8, 14-5, 14-12, 14-13, 14-6.
Indian Galvanising:—(9th) 29-12, 30 (29-4 s.l.); (11th) 29-8.
Indian Standard Wagon:—(9th) 68-8, 69, 69-8.
Indian Steel and Wire Products (Ordy.):—(9th) 57-8, 58.
Indian Steel and Wire Products (Defd.):—(9th) 37-12, 38.
Indian Iron and Steel:—(9th) 31-10, 31-12, 31-13, 31-14, 32-2, 31-12, 31-12; (11th) 31-15, 32-1, 32-5, 32-4 (31-12 s.l.) 32 s.o.l. 31-12, 32, 31-13, 31-13, 31-15; (12th) 31-12, 32-3, 31-13, 31-14, 32-2, 31-11.
Indian Malleable Castings (Defd.):—(11th) 2-12, 2-14; (12th) 2-15.
Indian Standard Wagon:—(11th) 69-8, 70, 70-8.

(Continued from page 318)

were slightly lower. *Cochin Malabar* were done at Rs. 7-10; *Malankara* at Rs. 40-8; *Kalpetta* at Rs. 22-8 and *Midland* at Rs. 6-13. *Nellithanam* came in for business at Rs. 8-6. Tea shares met with good investment support, *Chembra Peak* being done at Rs. 4-4-6; *Peria Karamalai* at Rs. 18-12; *Vellamalai* at Rs. 15-4 c.d. and *United Nilgiri* sat Rs. 125.

Sugars.—An improved demand was noticeable in this section. *Mysore Sugar* attracted good buying up to Rs. 54-4. *Deccan Sugar* small shares were done at Rs. 53-12, while *Travancore Sugars* improved to Rs. 15.

Miscellaneous.—*Mysore Chemicals* met with renewed buying, the closing rate being Rs. 18-8. *Mysore Paper* met with good outside support, and the rate after touching a high of Rs. 17-6, closed at Rs. 17. *Mysore Tobaccos* were done at Rs. 11-8; *Mysore Match* at Rs. 10-8 and *Mysore Lamp* at Rs. 9-13. *Andhra Cement* had some sellers at Rs. 93. *Singareni Collieries* met with business at Rs. 10-12 and *Indian Steel Rolling Mills* preferences at Rs. 11-4.

LONDON STOCK EXCHANGE

Till Wednesday rather irregular conditions were noticeable on the London Stock Exchange and business was on a restricted scale. The reports regarding an important announcement by the Government had an encouraging on the market and substantial gains were recorded on Thursday. Giltedged, however, have not been very firm. Among British funds, 2½ per cent. Consols were 81, 3½ per cent. War Loan 105¼, 3 per cent. War Loan 101½ and 4 per cent. Funding Loan 114¼. 3½ per cent. Indian Sterling Paper were 98¼.

Among other sections, Tea and Rubber shares were unchanged. Gold Mining shares are better with *Spring Mines* at 22*s.* 6d. Oil shares were irregular but towards the close there has been a sharp recovery, *Burmah Oil* being higher at 57*s.* 6d. against 55*s.* and *Shell Transport* at 50*s.* against 48*s.* 9d. Home Rails are better and the ground lost in mid-week has been completely recovered. Other industrials are firmer.

NEW YORK STOCK EXCHANGE

After earlier weakness Wall Street is better during the last two days. The news of the meeting between President Roosevelt and Mr. Churchill has had an encouraging effect on the market. *U. S. Steel* were $57⅞ and *Anaconda Copper* $27⅝.

THE STEEL CORPORATION OF BENGAL, LIMITED.

NOTICE.

The Fourth Ordinary General Meeting of the Shareholders of The Steel Corporation of Bengal, Ltd., will be held on Wednesday, 17th September, 1941, at 11 a.m., at the Registered Office, 12, Mission Row, Calcutta, to transact the following business:—

The Share Transfer Register of the Company will be closed from the 12th August, 1941 to 27th August, 1941, both days inclusive.

By Order of the Board,
RAMDUTT RAMKISSENDASS,
Managing Agents.

Calcutta, the 8th August, 1941.

COMPANY REPORTS

GUZERAT RAILWAYS COMPANY, LIMITED

Year ended March.

	1941	1940	1939	1938
	Rs.	Rs.	Rs.	Rs.
Total Gross earnings	4,90,286	4,29,459	4,66,832	5,19,125
Total net earnings	78,575	17,980	72,743	1,25,826
Net profit	1,64,394	1,64,749	1,53,474	1,54,005
Working expenses including commission etc.	4,11,711	4,11,479	3,94,089	3,93,299
Percentage of working expenses to gross earnings	83.97	95.81	84.42	75.76
Provision for taxation	22,910	12,032	9,952	6,860
Dividend amount	1,46,625	1,55,250	1,55,250	1,55,250
Dividend %	4½	4½	4½	4½
Carry forward	35,985	41,126	43,659	55,387

(Annual meeting held 30th July, 1941)

Audited accounts for the year ended 31st March, 1941:—

The results of working the three Sections of the Company's Railways including Rebate from Government, show a credit balance Rs. 1,41,484-4-11 to which must be added the sum of Rs. 41,125-15-1 brought forward from last year's accounts making Rs. 1,82,610-4-0 in all.

The Directors declared an ad-interim dividend for the first half-year at the rate of 4% per annum, less Income-tax, which absorbed a sum of Rs. 69,000, leaving a balance of Rs. 1,13,610-4-0 which they recommend should be applied as follows:—

	Rs.	As.	P.
Dividend for the second half-year ended 31st March, 1941 at 4½% per annum (making 4½% for the year) payable less Income-tax. ..	77,625	0	0
Balance to be carried forward	85,985	4	0
Total ..	1,13,610	4	0

Company's Contract:—The Railway Board have advised that the Company's lines will be worked by the Government of India from 31st December, 1941 from which date the *B.B. & C.I. Railway*, who are at present responsible, are taken over by them. This does not alter the Company's terms of agreement with the Secretary of State in any way, but it may here be noted that the Government of India may, if they so desire, by giving 12 month's prior notice, terminate the present contract by purchasing the Railway on 31st March, 1941, or, if not then, at succeeding intervals of ten years.

If the Contract is determined on 31st March, 1941, it is throught unlikely that the redemption value will be more than about Rs. 100/- per share, having regard to present earnings.

Goods Traffic:—In spite of a small decrease in tonnage, the earnings have increased by about Rs. 42,000/-. This is due to the surcharge on freight which was introduced from 1st March, 1940 and to better crops and improved trading in forest products.

Working Expenses:—The total increase this year in the gross earnings is more than Rs. 60,000/-, but the working expenses are almost identical, so that the ratio of working expenses to gross earnings has decreased by approximately 12%.

Agents:—Messrs. Killick, Nixon & Co.

Authorised Capital:—Rs. 50,00,000. Issued and Subscribed—Rs. 34,50,000 in 34,500 Shares of Rs. 100 each, fully paid up. Debenture Capital:—Rs. 13,00,000 in 1.300 4½% taxable debentures of Rs. 500 each and 90 7% taxable debentures of Rs. 10,000 each, both repayable on 31st March, 1944 or earlier in the event of special purchase of the Company's undertaking by the Secretary of State for India in Council.

Synopsis of the Balance Sheet as at 31st March, 1941:—

Liabilities:—	Rs.	Assets:—	Rs.
Capital paid up ..	34,50,000	Fixed Capital Expenditure	51,57,141
4½% Mort. Debentures ..	9,00,000	Investments	1,22,602
7% Mort. Debentures ..	9,00,000	Outstandings	1,29,971
Current debts ..	1,81,513	Cash	57,784
Carry forward ..	35,985		
Total ..	54,67,498	Total ..	54,67,498
		Total liquid assets ..	3,10,357

FORTHCOMING MEETINGS

Hukumchand Jute Mills, Ld.—Meeting, 27th August, 1941 at 3-30 p.m. Transfer Books closed from the 12th to the 27th August, 1941. *Dividends proposed nil.*

**Arrah-Sasaram Light Ry., Co., Ld.*—Meeting, 27th August, 1941 at 10-45 a.m.

IS IT NOT WISE TO INSURE NOW ?

With an uncertain future ahead Conservation and Consolidation of resources are the prime needs every individual should assiduously strive after.

If you already have Life Insurance, hold on to it. Don't allow it to lapse. If you haven't go in for it right now. A Life Policy gives an inestimable protection and it will cost you less now than later. It is cent per cent true that to be forewarned is to be forearmed.

Write to us for further particulars or advice.

WORLD OF INDIAN FINANCE

Friday Evening.

THE outstanding features of the current week in the money market are further accentuation of cheap money; decline in the average yield of Treasury Bills to the lowest level within the past four years; considerable increase in the deposits of member banks; and considerable fall in the deposits maintained by the Central Government with the Reserve Bank. All these developments are, presumably, in accord with official policy and the aims of that policy. Interbank call money has been quoting nominally at ¼ per cent in Bombay, ½ per cent in Calcutta and ¾ per cent in Madras. There are no takers of money, call or term, except that banks reluctantly agree to take deposits on renewal. The amount of tender bills on offer this week was Rs. 1 crore; applications came to Rs. 2,59¾ lakhs. The average rate of accepted tenders came down from annas eight per cent per annum on August 12 to annas six and pies eleven on August 19. This is the lowest rate touched since August 20, 1937. The amount of tender bills offered for next week remains unchanged at Rs. 1 crore.

What with the heavy Treasury bill maturities and what with the sales of fresh bills restricted to Rs. 1 crore per week, the cash balance of the Central Government is being rather rapidly depleted. On August 1, Central Treasury's deposits with the Reserve Bank stood at Rs. 18.81 crores; on August 8 at Rs. 13.85 crores; and on August 15, at Rs. 10.46 crores. There has, thus, been a decrease of Rs. 8⅜ crores. Against this deposits of scheduled banks have risen from Rs. 30.45 crores on August 1 to Rs. 37.04 crores on August 15. The returns of the Imperial Bank of India show that it has shared largely in the increase of banks' cash. The cash balance of the Imperial Bank has risen from Rs. 13.64 crores on August 1 to Rs. 18.68 crores on August 15. In the same period, investments have shrunk from Rs. 63.56 crores to Rs. 61.75 crores, and trade advances from Rs. 36.11 crores to Rs. 33.69 crores. The deposits of the Imperial Bank at Rs. 104.51 crores on August 15 constitute an all-time high record.

Returning to the statement of the Reserve Bank, the Burma Government's deposits have risen substantially from Rs. 2.10 crores to Rs. 2.64 crores while the deposits of other Governments have fallen from Rs. 4.36 crores to Rs. 4.06 crores. The other items show only minor changes.

The list for the conversion offer of 3 per cent 1941 loan was closed yesterday. Our enquiries in Calcutta banking circles go to show that the response so far as Clive Street is concerned has been satisfactory. There is no reason to think that Bombay would have lagged behind Calcutta in the exercise of the option of conversion. Taking all circumstances into account, it would not be a matter for surprise if the final results disclosed that between 80 per cent to 90 per cent of the holders of the 1941 loan have elected to convert. This means that the actual cash which the Government will have to pay out next month may not exceed Rs. 2 crores to Rs. 3 crores. This should impose no strain whatever on the ways and means position of the Central Treasury.

The loan to be redeemed this year will thus be out of the way; meantime, official policy is designed to underline and emphasise cheap money and to induce an accumulation of surplus cash in the hands of bankers. That the monetary authorities have definite aims in this regard and that these aims are being fulfilled according to plan, is obvious. Measures of this kind have clearly some relevance and significance to the early launching of the third defence loan. It is also not unlikely that the publication of the terms of the third defence loan will synchronise with a scheme for the redemption of 3½ per cent India sterling paper. During the current week, the British Treasury announced the requisitioning of further Canadian and Ontario Government sterling securities. And it was stated that this step was taken to assist in financing the war effort both in the Empire and elsewhere. Canada and Ontario have stood in analogous position with India in the London market. These three countries have been redeeming their sterling loans before the maturity dates. Such repayment of Dominion securities before redemption date has been greatly helpful in Britain's defence loan programmes. As we pointed out last week the list for the 2½ per cent war bonds closed on August 14. It is now revealed that there was a last-minute rush, applications in the week ended August 12 being £36.33 million as against £7.17 million in the previous week. It is further expected that applications on August 13 and August 14 must have been on the heavy side. The conviction is growing in London City circles that the Treasury will be shortly making announcements regarding the next instalment of the defence loan and that this loan will be more favourable to the Government.

The requisitioning of further Canadian and Ontario securities and the closure of the list for 2½ per cent war bonds suggest the possibility of similar operations in India. We believe that we are on the eve of the redemption of 3½ per cent non-terminable Indian sterling loan and the closure of the list of the second Indian defence loan.

The exchange market has been quietly steady, both export bills and remittance enquiry being on the small side. Rates are unchanged.

TREASURY BILLS

India

Tenders for Rs. 1 crore of three months' Government of India Treasury Bills were opened on Tuesday, August 19, 1941. The total amount offered was Rs. 2 crores, 59, lakhs and 75 thousand. Tenders at Rs. 99-14-3 per cent and above were accepted in full and those at Rs. 99-14-0 per cent. were allotted approxinately 2 per cent. Lower tenders were rejected. The total amount accepted was Rs. 1 crore, the average rate of accepted tenders being annas six and pies eleven per cent per annum.

Tenders for Rs. 1 crore of three months' Government of India Treasury Bills will be received on Monday, August 25, 1941. Successful tenderers should make payment on Friday, August 29, 1941. Other conditions are as usual.

During the week ended August 15, 1941. Government of India Treasury Bills for Rs. 2,90,00,000 were sold in favour of the Issue Department of the Reserve Bank of India.

EAST INDIAN RAILWAY

DOORGA POOJAH HOLIDAY CONCESSIONS

Holiday Concession Return Journey Tickets in all classes will be issued over the East Indian Railway from 11th September to 16th October 1941 both days inclusive for distance 101 miles and over at ONE and ONE THIRD single journey fares in the case of 1st, 2nd and Inter Class and ONE and ONE HALF single journey fares in the case of THIRD CLASS.

Similar concession fares will apply over the Hardwar Dehra Railway Section on the combined distances over the E. I. and H. D. Railways.

Return journeys on these concession tickets must be completed within 45 days from the midnight of the date of issue but not later than midnight of 17th November 1941.

Inter and Third class concessions are subject, as usual, to restrictions on travel by certain trains.

Break journey on these tickets will be allowed at any intermediate station for as long a period as desired provided no part of the line is travelled over more than once in the same direction, and the return journey is completed within the prescribed period. Break of journey on return trips will, however, not be allowed at stations distant 30 miles or less from stations of issue of such tickets.

MOTOR CAR CONCESSIONS

Return tickets at single journey rates for distances in excess of 100 miles in local booking only will be issued for the same period between stations where loading and unloading facilities exist, provided the same car as is despatched on the outward journey is booked on the return journey.

Motor Car Return journey tickets will be available for BOOKING OF CARS on the return journey up to midnight of 17th November 1941.

REFUND ON UNUSED TICKETS

No refunds will be made on unused halves of either passenger or motor car concession tickets.

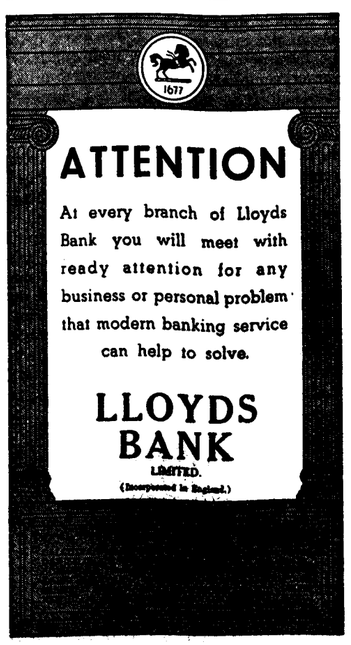
CHIEF COMMERCIAL MANAGER.

Finance Abroad

Friday Morning.

WITHOUT any change of importance in conditions or rates the world's financial centres appear to stay put. The major happenings are nearly always in the political sphere and new agreements between Russia and America and Russia and Britain are only shrouds for the policy of opposing Hitler. The close cooperation between Washington and London makes it unnecessary to ask questions as to the way in which Russia is going to be helped. The British Government has agreed last Saturday itself to provide goods on credit as also under a clearing arrangement. A loan of £ 10 million at 3 per cent for an average of five years has been provided for by the new pact signed on Saturday by M. Mikoyan and Sir S. Cripps. There is provision for its renewal after the first credit of 10 million is exhausted. The trade pact made headline news and it was believed that the agreement was the work of the economic coadjutors of the British mission to Moscow. It was known that Mr. Lawrence Cadbury, a Director of the Bank of England, had been sent to Moscow to examine trade and financial questions. Russia expects to get tin, rubber, wool, hides, shellac, jute and industrial diamonds from Britain who desires in exchange such goods as hemp, platinum and glycerine. The £ 10 million credit is perhaps to be worked in the usual way by the Export Credits Guarantee Department with British suppliers taking notes payable by the Department of Overseas Trade. The mention of a clearing agreement implies that the actual value of goods supplied by Britain will exceed £10 million, for Russia presuamly expects to send a certain quantity of exports to Britain. Presumably Russia's exports will like imports come by the Far East since Russia can hardly expect to use the Baltic route or try sending goods by way of Murmansk.

The subsequent agreement with the U.S.A. is likely to be of greater importance. The Soviet envoy has outlined Russia's pressing needs but it is hardly likely that the U.S.A. will undertake to provide such a sum as 1000 million dollars as an open credit. The Russian demands will have to be scaled down to the minimum of 40 million dollars if business is to follow. That the U.S.A. has not insisted on cash and carry, demanding gold and platinum in return for the oil cargoes now on their way to Vladivostok is a very important result of the joint declaration. The postcript to the declaration was the letter to M. Stalin asking that meetings should be held in Moscow to decide how the three Powers could act in concert. Mr. Jones has spoken rather vaguely already but the latest reports seem to suggest that the Russians are still taking soundings in Washington. The Loan Adminsistrator has not apparently reached any conclusion as to the scale of U.S. financial assistance to the Soviet Union. Much will depend on the reactions of Congress to the President's declaration and the follow-up statements. The statement of Senator Connally, the Chairman of the Foreign Affairs Committee, that the greater part of the original appropriation of 7 million dollars has not been expended has to be read along with the affirmation that next appropriation under the Lease and Lend Act would be about 4 billion dollars. The leaders of the Democratic party have been told by the President what should be done to see that the eight points issued from the mid-Atlantic are fulfilled, but doubts linger and the answer of the veteran Aloen W. Barkley to Senator Clark has shown that not all Republicans make ready converts.



The return of Mr. Churchill to London and Mr. Roosevelt to Washington has not eased the situation in the Far East. The steadiness of the Hong-Kong dollar does not conceal the depreciation of the Shanghai dollar. Though the trade of Free Crina will not be affected by the freezing order and the regulations drafted in India and Burma and as also in Britain will not apply to imports through Burma the Chinese currency developed some weakness. Latterly it has regained steadiness since the London rate for T.T. on Shanghai is up to 3d. There are no quotations in India for the Chinese currency and quotations are not made as before on the basis of the London-Shanghai cross rate. The tightening of export regulations in Britain has found a close parallel in India. The strict scrutiny of all transactions under which payments into blocked accounts will follow has been promised under the arrangements booked by the Reserve Bank. The communiques and advertisements issued by the Reserve Bank have indicated that the commercial relations between India and Japan are subject to very strict supervision. There is also Captain Eden's assurance in the House of Commons that the provisional arrangements made with the Yokohama Specie Bank do not compromise in any way the decision to limit and suppress if need be Japan's trade.

It has been long held that the rupture of trade with the U.S.A. would cast a a heavy burden on Japan which has been compelled to take the totalitarian road The complete control of several industries including shipping has been foreshadowed, but that will not be the only result of national mobilisation. The freezing of royalties for foreign patents is part of the Japanese reprisals programme, and only the understanding as regards payments for previous transactions shows that relations with the British Empire subsist. In recent month the Japanese banks were keen buyers of sterling for commercial purposes. They must presumably have sold the greater part of the purchases before the freezing order. There is of late an increasing disposition to regard the relations between Tokyo and Batavia as developing along satisfactory lines for Britain and the U.S.A. The latter has denied the insinuation that trade treaty talks have been resumed and it is now certain that Japan is not going to get oil from Borneo or Sumatra. The rapid infiltration into Indo-China has provoked suspicion in many countries but the Japanese have so far held their hand. The Dominious have evinced great interest in the improved defences of Malaya and this interest has been translated into reports that in the view of many Australians an Imperial War Cabinet is required in the exigencies of the present.

More interest than usual attaches to the attitude of Thailand. So far as one can see the rupee-baht rate remains unaffected and it must be presumed that the Thai currency is still worth a little less than 2 shillings. There has been no description of the emergency measures adopted by Bangkok. The Thai Premier has shed a few Ministries and is ready to receive the new envoys of both the U.S.A. and Japan. The tension is hardly reflected in the unfluctuating exchanges but the Japanese have evidently shot their bolt. Whatever be their requests it is not likely that Thailand is will mortgage the rubber, tin and zinc which the Japanese covet. Thailand is producing rubber and tin without being subject to the international agreements and the Japanese may consider that an advantage. It is clear that Indo-China will not give the Japanese all they want. Without any appearance of an ultimatum the Japanese may be however arranging for a military demonstration mainly under cover of other activities such as the composing of boundary disputes in the north with Russia.

The financial aspects of Lord Beaverbrook's request for more and more planes from America are not likely to be of much importance. His statement that only 2,200 planes had arrived and that 1,200 had gone into service show that there is still vast scope for aircraft exports. Wing-Commander Fraser has recently described how the Bomber, Fighter and Coastal Commands draw regularly on the output of U.S. factories. South Africa has used Tomahawk fighters and other types, Glenn Martins and Maryland Bombers have been used in Africa as aerial

The Rise, Growth, and Fall (?) of the Sugar industry

THE Presidential address of Mr. R. L. Nopany at the Annual General Meeting of the Indian Sugar Mills Association serves to focus, once again, the attention of the public on the plight of the Indian sugar industry. As Mr. Nopany pointed out, it looks as though the abnormality, which characterised the 1939-40 working of the sugar factories, has become a normal feature of the industry from year to year. The rise and growth of the industry may be said to have been achieved in the first quinquennium after the grant of protection in 1932. The developments of the second quinquennium are of such a character that one fears that the history of the decade may have to be described as the rise, growth and fall of the sugar industry.

India has no parallel in any other industry for the phenomenal progress achieved by the sugar industry in the short space of a five-year period. Nor has any other industry presented such a variety and complexity of conundrums to solve within its short career. These conundrums have been such as to require recurrent action by the Government and as to necessitate various plans and proposals on the part of the interests connected with the management of the sugar factories. For such vicissitudes, the Government have blamed the industry; the industry in its turn has blamed the Government. In the result, there has been more mutual recrimination than mutual accord and sympathetic understanding. The other factors concerned with the industry, namely, the canegrowers, the consumers and the workmen have fared sometimes extremely well; sometimes extremely ill.

All this makes a sad story; but the industry has now taken such deep root, it has such splendid achievements to its credit, it has drawn such a large amount of indigenous capital, it plays such an important part in the agricultural economy of the country, it has, finally, so fully justified the claim to be deemed one of the major national industries of India, that, however complicated the problems and however conflicting the interests, it is in the highest national interest to see that a proper solution is found and that the industry is assured of a smooth and fruitful career, dispensing benefits to the large body of canegrowers at one end and the shareholders at the other end, while, at the same time, providing cheap sugar to the Indian population.

The formal grant of protection to the Indian sugar industry was in 1932. We have used the word "formal" advisedly. For, the revenue duty on sugar, which was recurrently screwed up higher and higher by Sir George Schuster till the climax was reached in the levy of a 25 per cent surcharge in the 1931 Emergency Budget of September, was already so high that the grant of protection meant nothing more than that what was a revenue duty was to be thereafter described as protective duty. Production of factory sugar in India in 1931-32 was only 1.58 lakhs of tons. The high revenue duty was already attracting capital to the sugar industry in 1931. Real expansion, however, began from 1932-33. While, as we have stated, production of sugar in India was 1.58 lakhs of tons in 1931-32, it had risen to 11.11 lakhs of tons by 1936-37. The increase in domestic production of sugar to 11 lakhs meant that India was, for all practical purposes, independent of supplies of foreign sugar.

Till 1931-32 India was importing an annual average of 10 lakhs of tons of sugar mostly from Java; and the amount that was thus paid to foreign manufacturers was in the neighbourhood of Rs. 15 crores annually. That, within five years the Indian sugar industry had expanded to such an extent as to cut out foreign imports of sugar altogether, and to stem completely the outflow of Rs. 15 crores from the country, is a magnificent achievement; and those industrialists who were responsible for bringing about this result have not been given the abundant praise which is their due.

On the other hand, various interests, for reasons special to themselves, have expressed themselves as not quite happy at the strident enterprise shown by the Indian sugar industry. Some critics averred that the pace was too fast to be healthy. Others pointed out that the establishment of sugar factories was being carried out in a haphazard fashion. A few others uttered the warning that there was overcrowding in the two Provinces of Bihar and the United Provinces. And, generally, it was the opinion that the class of capitalists who had ventured into the sugar industry were, in a large number of cases, not men who have had any tradition or experience in industrial management; and that, therefore, the industry might soon be in difficulties partly because of mismanagement and mostly because of amateurishness in an industry which calls for expert skill in its various departments. The sugar industry has had its critics from the very beginning. It has been its singular misfortune to have had not many friends in high quarters. *Indian Finance,* however, has never stinted its expression of praise for the phenomenal growth in the industry; and for those who were responsible for it and, where it has been obliged to criticise, it has taken care to see that its suggestions were in the nature of constructive criticism.

The Government, on their part, have been none too friendly to the sugar industry. Finance Member after Finance Member seized with glee every opportunity to stiffen the tax burden on the back of the sugar industry. The excise duty imposed by the Central Government soon after protection was granted to the industry was raised in quick successive stages. Sir James Grigg did not even care to conceal his dissatisfaction that the industry had grown so rapidly as to put an end to imports of sugar from Java. Sir James was more concerned with the customs revenue from sugar imports than with the manifold benefits which are conferred on national economy by India becoming self-sufficient in respect of so important a commodity as sugar.

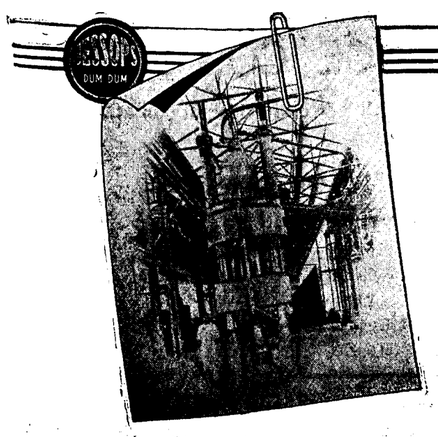
Nor have provincial governments been any friendlier. The intentions of the Governments of Bihar and the United Provinces, however, have not been coloured by any anti-nationalist bias. These two Governments, who have been acting in close consultation with each other in regard to the control of the sugar industry, have mainly been moved by a desire to secure the maximum benefit to the sugarcane growers. As between the agricultural and industrial aspects of sugar, the Governments of Bihar and U. P. were definitely more solicitous of the agricultural interests. We need not blame them for this bias. Their subsequent attitude towards the sugar industry was affected by the chaotic conditions that came to prevail with respect to the sugar industry on account of the constant intervention of the Government, but mostly on account of the definite overcrowding of sugar mills in the two provinces.

The scheme for ensuring a minimum price to the canegrower has everything to commend it, but the working of the scheme since its adoption by the Governments of Bihar and U. P. in 1934-35 cannot be said to have been on right lines. Mr. Nopany makes an exhaustive analysis of the various developments connected with price fixation and makes out a convincing case that much of the instability of the industry can be traced to the crude way in which the policy of price fixation was given effect to.

The present position is that the sugar factories in the whole of India, including the Indian States, can produce all the sugar that the country needs. If the factories in India work to their optimum limit, their capacity is estimated at 14 lakhs of tons of sugar per annum. The consumption is estimated at 12 lakhs of tons which includes exports to Burma. It is, therefore, evident that, unless internal consumption increases or India is allowed to export sugar, the potential capacity of Indian factories is slightly in excess of domestic consumption. With the extremely cheap cost of sugar manufacture in Java, it will be highly unwise to assume that India, at any time in the near future, can hope to figure as a prominent exporter of sugar. That is to say, Indian sugar mills should be content to manufacture for domestic consumption. This is a fact which, we believe, is unchallenged. We cannot, in the light of this fact, escape the conclusion that it will be sheer waste of the resources of the country if any more capital is allowed to be diverted to the further expansion of the capacity of the Indian sugar mill industry.

Modern economics has robbed State control of its odium. And it is, therefore, nothing running counter to expected economic practice, if we suggest that there should be all-India legislation forbidding the expansion of the existing plants and the installation of any new plants. Provinces which are not now in the fortunate position of having any large number of sugar factories may complain that such all-India legislation would mean the guaranteeing of some manner of monopoly for the two favoured provinces of Bihar and U. P. Those who would take a parochial view with regard to industrial distribution, may be properly reminded that the capital market in this country is not provincially distributed; that it is an all-India capital market; that the resources of that capital market are limited; and that those resources must not be frittered away in any project which would only add to the embarrassment of Indian industries.



At the same time, the continuing mutual recrimination between the industrialists and the Government must be once for all removed. The Governments of Bihar and U. P. have introduced various measures of control; some of them have proved good, the effects of some are questioned by one interest or other. We believe that the time has come for an all-India review of the conditions of the sugar industry with a view to taking such steps as will place the industry on an enduring basis. Such all-India enquiry must include a careful examination of the point of view of the industrialists in Bihar and U. P. and the point of view of the two Governments. The extent to which State control must continue and the machinery by which the control must be exercised must be precisely defined as a result of the enquiry we suggest.

As our main proposal is all-India legislation affecting the sugar industry, the interests concerned must not hesitate to accept the further suggestion that the need today is for an enquiry that will advise on the reorganisation of the sugar industry on an all-India basis.

Progress in Chemicals

THE high interest excited by the opening of a new factory for the manufacture of bichromate of potash, like the opposition provoked by the issue of orders relating to chemicals in the hands of tanneries, has shown that no materials are assigned the same importance as chemicals at present. More than a year ago, it was pointed out that investment interest in companies producing chemicals and drugs was steadily growing, and it is no longer necessary to read the famous bulletin of the Industrial Research Bureau to find out what scope there is for the heavy chemical industry. The actual progress made under the stimulus of war shows that the conclusions of the report had ample justification. There are two major enterprises that dominate the field, but smaller concerns have, in recent years, made headway.

The production of synthetic manure has been a valuable prop of the heavy chemical industry. Though production and trade figures are unprocurable at present, the general situation has improved along with the development of indigenous production. The production of soda ash, synthetic ammonia, caustic soda, chlorine, bleaching powder and bichromate has begun. A factory for stabilised bleaching powder at Rishra, another at Khewra and the plant at Port Okha are expected to start work soon. A factory for producing 10 tons of sulphuric acid in a day is being erected in Bombay and the necessary machinary has been already ordered. Chemical manufacturers have co-operated betimes with the Supply Department in producing essential requirements. They have given special attention to acetic acid, lead acetate, the bichromates and caustic alkalis. Industrial demand for chemicals is necessarily

larger than Government requirements, and the difficulty of getting imports, even at enhanced prices, has naturally induced the Government to let the Indian manufacturer know that he should make the most of indigenous sources. There are many important chemicals, besides dyestuffs, the lack of which threatened to disorganise industrial output in the early stages of the war. The production of sulphuric acid has increased, and this increase in the case of the basic chemical, has resulted in the adequate production of nitric and hydrochloric acid. Attempts made to grapple with the sulphur production have so far not been in vain and the exploitation of the Baluchistan deposits. even though it is delayed by various adverse factors, will be of greater benefit than the beginning made with the use of pyrites.

Certain companies in the South are said to be contemplating the use of pyrites for producing sulphuric acid. A factory near Ahmedabad has embarked recently on the production of acetic acid from acetate of lime supplied by Mysore. Another in Bengal proposes to use alcohol for the production of the acid which is used in rubber and textile manufactures. India is no longer wholly dependent on imports of organic acids as a firm in the Punjab has set about preparing oxalic acid. It is considered that enough raw materials are available for the manufacture of tartaric acid. A Calcutta firm produces boric acid but overseas imports will always be needed.

The alkali industry has got off with a flying start. Annual production is estimated at 32,000 tons at present. Production of caustic soda, liquid chlorine and bleaching powder has begun; and it has been suggested that hydrogen (a by-product) can be turned to advantage by a vegetable oil hydrogenation plant in the vicinity of the chemical plant. Coke ovens have long provided a considerable quantity of ammonium sulphate. It is certainly known that production increased following the war. The application of synthetic ammonia for the production of nitric acid has become common and explosives factories use it. Ammonia can also be turned into ammonium sulphate, in wide request as a manure for tea, sugarcane and other crops.

India's large deposits of chromite have led to the development of new plants producing bichromates. The large demand for khaki dyed cloth has decidedly helped in this development. Madras, Mysore, Bombay and Cawnpore have plants producing 30 to 40 tons per month. Smaller factories have sprung up at Lahore, Calcutta and Bombay; but existing sources cannot satisfy the internal demand for about 500 tons of sodium bichromate per month. Imports from the United Kingdom and the U.S.A. have to augment local supplies and that is why the Madras, Mysore and Cawnpore factories are thinking of extensions. It is admitted that expansion of output can confer only temporary benefits and Indian producers may encounter difficulties in the postwar period.

Wood distillation at Bhadravati has helped to increase the supply of acetone in addition to methyl alcohol and calcium. An ordnance factory has also taken up the production of acetone from acetate of lime. The oxidation of alcohol will be tried by other ordnance factories. Molasses has proved a source of methyl alcohol. The production of chemicals in Bengal embraces the manufacture of sodium hydrosulphide. Large supplies of ammonium chloride are available and urban water supply authorities can count on home-produced supplies of cleansing agents.

The majority of secondary Indian industries are dependent on chemicals, and the progress made by soap and glass factories in wartime is obviously governed by their ability to obtain soda ash at reasonable prices. The munitions factories are large and regular users of chemicals, but civilian enterprises are also dependent on chemicals. The paper, leather, ceramics, and medicinal drugs factories are large users of chemicals and the progress made in one branch of the heavy chemical industry ensures progress in several other industries. That is why accounts of recent progress in the chemical industry are eagerly scanned and the report of a company like Tata Chemicals, Limited attracts wide attention even if it does not promote optimism.

The delay in the start of operations in any case is of limited importance as compared with the progress outlined. The evolution of local dyes in place of imports like the emergence of vegetable substitutes together with the attention bestowed on India's salt, saltpetre and borax deposits has shown that science stimulates industrial development. One must wait for the first report of the new Board of Scientific and Industrial Research to assess the extent to which the chemical industry has benefited through Government's assistance or guidance. What has been done by the Medical Stores Departments for indigenous supplies of pharmaceuticals has of course no bearing on such assistance as has been vouchsafed, but some who may recall that the heavy chemical industry failed to qualify for protection when its claims were investigated in 1928-29 will remember that the applicant found an unexpected advocate in the Ordnance Department, which has apparently satisfied with the quality of Indian chemicals, and referred to the overriding considerations of defence in asking that special consideration must be shown to be manufacturer of chemicals. The view was endorsed by the Tariff Board but nothing came of its recommendation. The industry is now larger, more mature and broadbased, and it is likely that a strong claim will be made for protection for a period in this case. The progress made at present will buttress such a claim and efficiency may be adduced as a further qualification for tariff advantages in the post-war period.

The less familiar aspects of industrial progress are little known nor is their import for the future grasped. Those who draw conclusions from the flotation of new companies with the word 'chemical' tacked on to their names should however wait to see what the capital is like and what the prospects are like. Though progress in wartime appears to be varied and considerable it is worth considering that the major enterprises were initiated in 1938 and that the beginnings of the heavy chemical industry can be traced to the last war. But there is the fact that the immediate response to the situation created by the war has been gratifying and the interest manifested by the new Board of Scientific and Industrial research in industrial development has been of distinct assistance for enterprises have been told what are promising lines and what are pressing needs. The answer to suggestions made in regard to India's industrial deficiencies is contained in the development, despite the war, of the chemical industry. In its broadest aspect the chemical industry is the foundation of all industrial progress, and the long view taken by the members of the industry is not the least attractive feature of the striking growth of the chemical industry.

Editorial Notes

Calcutta's Trade

THE effects of the war on Calcutta's seaborne trade can be clearly seen in the tonnage statistics of Calcutta port for 1940-41. Total tonnage amounting to 7,747,898 tons showed a fall of about 22 per cent. Imports declined by 625,822 tons owing to decreases under rice, salt, steel, cotton goods, petrol and machinery. There were similar decreases under sugar and wheat imports of which were exceptional in 1939-40. The decline under exports is much greater owing to the considerable decreases under coal, jute, gunnies, manganese and pig iron. There was a decrease of 26,158 tons on account of the prohibition of exports of scrap iron. The revenue accounts clearly indicate how the fall in trade has affected both income and expenditure, but the fall of Rs. 48 lakhs under revenue as compared with 1939-40 is not very damaging, since there was a small surplus for 1940-41 and the next Port Trust budget indeed showed that the position was well held. Except for an increase under income from land and buildings as also a small rise in railway receipts, the main sources of revenue were definitely affected by the fall in exports and imports. There is little or no military traffic originating from this port, so that immediate recovery in the tonnage figures is virtually ruled out. The war by itself will restrain any expansion of exports this year, and continued difficulty in regard to shipping suggests that no improvement can be expected. A study of import tables shows that except for increases under asphalt, pitch etc., betelnuts, tea shooks, and tinplate all imports through Calcutta showed decreases. On the export side the main changes are the fall of over 850,000 tons under coal and a fall of 135,000 tons under manganese. The increase under cotton is exceptional, but the rise under Sundries shows that some part of the increased shipments of manufactured goods from India proceed through Calcutta. It is noteworthy that the decreases under myrobalans, shellac, skins, jute and jute manufactures support the conclusion that exports to the U.S.A. did not show any marked increase in 1940-41 whatever may be the changes recorded in the value of Indian exports. The shipping figures also point to a substantial reduction in Calcutta's trade as 1,208 vessels entered and left port as compared with 1,409 in 1939-40. The foreign and coasting tonnage entered and cleared fell by over 2.1 million tons and the number of vessels using the jetties showed a decrease. In spite of reduced trade the port was active and wartime regulations increased the incidental delays. Importers have been shown special consideration as rents have been reduced by the Port Commissioners. The report records that receipts have increased owing to the storage of Army materials at the Docks, but it is pointed out that special expenditure and trouble are entailed by the provision of space at the Docks. Anyway, there has been no need for the Army to set up special depots outside the Dock area, and the Port's known efficiency has been equal to this as to other wartime demands. The year passed without any casualties necessitating a Government inquiry, and the five vessels that grounded in the river were refloated without difficulty. The decline in trade has had little or no effect on the Port Trust's finances and the actual fall in total tonnage is less than the fall of 29 per cent reported by the Madras Port Trust whose total export and import trade declined to 914,235 tons.

Railway Earnings

Railway earnings this year have shown consistent improvement. The last communique issued by the Railway Board stated that total approximate earnings of State-owned railways for the 10 days ended July 20th amounted to Rs. 298 lakhs showing an increase of Rs. 30 lakhs on the actuals for the corresponding period of 1940-41. With the exception of the A.B.,B.B. & C.I., and Tirhut, Lucknow-Bareilly railways all railways reported an increase in earnings. The increase is due to the improvement in both coaching and goods receipts, and it is noteworthy that the largest increase is shown in the case of the G.I.P. Railway. It is obvious that military traffic must have contributed to the growth of earnings this year; but the increase in passenger earnings is most pronounced in the case of the N.W.R. whose earnings show a larger increase than those of other railways. The influence of the floods is clearly discernible in the decline recorded under the receipts of the B.B. & C.I. for the same period. The total for the period from 1st April to July 20th shows an increase of Rs. 369 lakhs on the previous year and an increase of Rs. 722 lakhs on the earnings for the corresponding period of 1939-40. It is noteworthy that railway receipts for the 3 months and 20 days covered amounted to Rs. 35.92 crores and increases were reported by all railways except the Tirhut and Lucknow-Bareilly lines. The increase is Rs. 1 lakh in the case of the A.B. Railway; but it is over Rs. 1 crore in the case of both the N.W.R. and the G.I.P. If wagon turnround shows improvement, a further growth of earnings is assured, while petrol rationing can be trusted to have a favourable effect on coaching earnings. Wagon loadings reflect only slightly the increase in earnings. The decrease under metre gauge wagons is naturally surprising and the recent appeal for keeping the wagons moving receives its justification from the very small increase this year in wagon loadings on Class I railways as also the need to accelerate delivery of war materials. An analysis of details of wagons yields the conclusion that civilian traffic under cotton and oilseeds has increased this year, perhaps under the stimulus of rising prices. The increase under miscellaneous full wagons must necessarily be put down to military traffic. While traffic and receipts alike have improved, an increase in working expenses is only to be expected. Working expenses excluding appropriation to and from the depreciation fund of State-owned railways showed an increase of Rs. 83 lakhs at Rs. 13.42 crores for the three months ended June 30th. There was no increase in the case of A.B. Railway and the largest increases were reported by the G.I.P. and N.W.R.

Indian Cotton Problems

The export problem in the case of Indian cotton may become unmanageable in view of the freezing order. In spite of the substantial decline recorded last year, total exports of Indian cotton to Japan were valued over Rs. 7 crores and the possible disappearance of the single largest market explains the decline in prices noticed since July 26th. Though assurances have been forthcoming as regards

cotton sold and held in the custody of shippers and the maintenance of shipping communications, the future is decidedly dark and uncertain. The application of export control in the manner prescribed by the Board of Trade is not going to have a soothing effect especially, as the trade pact has been denounced last month. Since exports to North China too are likely to disappear, the actual loss must be well over 1 million bales, the minimum stated in the 1937 protocol. The possible disappearance of the remaining market has upset the Bombay market, though it has latterly shown a few signs of recovery. The improvement, despite the persistent decline in American markets, may induce many to think that the outlook for the 1941-42 crop is more hopeful than it seemed. It must, however, be noted that the problem is essentially one of disposing of Oomras and varieties below 7-8" staple. Since the various announcements that followed the freezing order have a bearing on Indo-Japanese trade, and trade with China is possible only by the highway leading to Yunnan-fu, the loss in the next few months will be serious. Exports to China have in recent years shown a considerable increase and Japan's reprisals alone will put an end to the takings of North China mills. As regards cotton exports to Japan, they have long exceeded 1 million bales per annum, though the quota restrictions on textile imports from Japan have, since 1934, reduced shipments of cotton to below 1½ million bales, the average for the post-war period. During the last war, one of the chief features of India's trade was an expansion of cotton exports to Japan more than usually welcome when exports to Europe had suffered. During the present war, it looks as if European and Far Eastern markets alike will be lost.

It has been suggested that Indian mills must show special consideration for the cotton grower in view of the larger arrivals and reduced exports reported from the leading centres. Whatever may be the prospects for the U.S. crop, it is certain that special means must be found to keep up the prices of short staples. The Buyers and Shippers' Chamber of Karachi has suggested the levy of an excise duty on Indian mills using foregin cotton of less than 1⅛ in staple and foreign yarns of 40 counts and over. The proceeds of the new duty should be applied towards subsidising mills using Indian cotton. Another well-meant suggestion is that half the yield of the duty on imported cotton should be given in order to encourage the consumption of short staple cotton in Indian mills. It will be recognised that such suggestions are not likely to appeal to Government which cannot revive the cotton excise duty in any form. There have been other suggestions, too, in this regard, such as an arrangement between Britain and India on the lines of the Anglo-Egyptian cotton pact. This again is not likely to be well received, and the most effective means would be crop restriction which has been adopted already in the case of oilseeds and jute which have suffered through the loss of markets in Europe. The replacement of shortstaple by long staples would be convenient as it is also a means of reducing imports, but this is more difficult to put into execution. There is, of course, the possibility that mill consumption of cotton will increase substantially owing to the anticipated reduction of imports from Japan and China, which provided over two thirds of the piecegoods and over 90 per cent of India's yarn imports in 1939-40. The failure of rayon imports too might stimulate the consumption of cotton goods, but the problem will remain. It is, in the main, one for Government rather than the mill and industry, and it will hardly suffice to correlate wartime benefits with the mill industry's duty to the cotton grower.

Indian Manganese

The depression in the manganese industry that came with 1930 and persisted until 1935 may come back in another form since Russian competition like South African may be intensified, but the war is a factor to reckon with. The revival in the manganese trade came in 1937 and the rush for prospecting in the four districts of the C. P. known to contain manganese ore was great. Exports, which in most recent years have averaged a million tons, sustained the mining industry, but prices came down in the wake of larger production. A considerable decline in prices was recorded in 1938 and since then, the downtrend in prices of manganese ore has been pronounced. This fall may seem not a little surprising to those who have been assured that Indian manganese has exceptional prospects in the U. S. A.; but others will remember the geologist's opinion that the only important war mineral obtained from India is mica. Pessimistic opinion in the trade was naturally accentuated by the loss of European markets accustomed to take Indian manganese. Expansion of demand in the U. S. A. can only benefit mica and shellac, but hardly manganese; and the prohibition of exports to Japan represents another blow to the industry. In the first few months of war some signs of recovery were apparent. But the fall in prices since June when important buyers withdrew, has made manganese the Cinderella of Indian minerals. It is clear that the larger exports of Indian merchandise to the U. S. A. do not take in manganese. Minor producers have been forced out of existence and the curtailment of production by the Shivrajpur Mining Syndicate since December throws a lurid light on the situation in the manganese trade. It is not implied that the depression affects all in equal measure, and a company like the Central Provinces Manganese Co. can carry on as before. A large producer has lower costs and larger reserves, and C. P. manganese has long been a favourite of British investors owing to its strong position. It has been said that other mining companies are facing difficult conditions, since purchasers refuse to buy even at prices below cost, and such buying as still remains, is conditional on the securing of freight space. High phosphoric content ones have no chance and a trickle of demand for ore with low phosphoric, low iron content cannot help much. The trade is agreed that the U. S. A. is indifferent to Indian manganese and wonders why an opmistic report was furnished by Drs. Meek and Gregory. Purchase and storage by the Government would appear advantageous; but there is the possibility that in the postwar period the demand for manganese may be subnormal. The conditions in the manganese industry have been characterised as the reverse of prosperous and suggestions for a minimum price and a new marketing company under Government auspices have been recently advanced.

Cattle Exports

An editorial in *Indian Farming* draws attention to the possibility of exporting Indian livestock to other countries. In view of the success attained in the past through the export of Indian cattle to the British West Indies, it is only natural to expect that Indian breeds will thrive in tropical countries which are not congenial to European types. It has been pointed out that Indian cattle are the most suited for cross-breeding but new blood from India is needed for the maintenance of quality in local types. Various parts of South America have tried Indian cattle for breeding and Brazil has done quite well with Ongole cattle. The local breed compares well with the Indian variety and encouraging results have been obtained with other breeds like the Gir, Kankrej and the Sahiwal. There is, of course, a danger in building up an export trade in superior types. If Indian breeders were deprived of the services of the best stock for their own use, the advantages of an export trade are dubious. In view of the limited progress made in regard to formation of first class herds there might be objections on the score of limited supplies. Even the tempting prices offered by foreign buyers may, without increasing the multiplication of herds denude the supply of first class stock. Experience suggests that this may happen; and *Indian Farming* indeed refers to the disastrous results of large scale exports of Ongole cattle. Damage had been done; and the prohibition of export has not restored importance to this breed. It would be otherwise if adequate safeguards were adopted; and there is no reason why Indian pedigree stock should not be exported for instance to Costa Rica which evinced interest in Indian cattle. If local production of pedigree cattle increased, there can be no objection to export and this branch of export trade may become a very important support of animal husbandry. It has been suggested that with the help of breeding societies and an efficient herd book organisation registering pure-bred stock it should be easy to regulate the export trade in the interest of both

breed and breeder. The active encouragement of cattle breeding must come, however, before the export trade under suitable conditions is built up. The Indian breeder will naturally benefit if export develops rapidly, but the generally poor condition of Indian cattle must determine to what extent export can be allowed to develop.

Indian Insurance Handicaps

Formal reiteration of the claims of Indian Insurance to protection is not unknown even after the failure to secure statutory safeguards in 1938. It is not surprising that Indian Insurance Companies feel handicapped, and their spokesmen are ready to express their grievances while asking for extended support from other Indian business interests. There is undoubtedly some force in the address of Mr. J. C. Setalvad on August 11th when he described the efforts to restrict marine policies to British and American companies even in regard to consignments coming in Japanese vessels. The President of the Indian Insurance Companies Association therefore, appealed to the Government for the removal of obstacles and the provision of various advantages for Indian insurance to develop. He mentioned that active assistance had been furnished by the Federation of Indian Chambers whose circular regarding joint effort and co-operation for common advantage was referred to as it contained a clause advocating insurance with Indian companies, even at a small financial sacrifice. It must be inferred that it is not racial prejudice or business jealousy, but a consciousness of unusual handicaps erected, mainly in the interest of the foreign rivals. Mr. Setalvad declared that exchange banks were still unwilling to grant normal facilities by accepting policies isued by Indian companies. He contrasted this with the procedure in the United Kingdom where it has been laid down during the war that insurance policies taken out from British companies must accompany bills submitted by importers. The demand of Exchange Banks for a certain amount of deposit to be made by Indian insurance companies was characterised as unreasonable and Mr. Setalvad pointed out that Indian companies had all made deposits with the Government of India and further that all their assets were held in India. That marine premiums have risen and that riot insurance is without risks are matters of common knowledge. Mr. Setalvad's answer to the request from certain trade associations for a reduction in premium rates therefore referred to the loss experience and the need for a fair trading profit in the case of insurance companies. It was only to be expected that provisions of the Insurance Act would come in for criticism. The Commerce Member has in recent months received representations about the need for modifying Section 27 which compels insurance companies to invest 55 per cent of the Life Fund in approved securities. This provision, besides fettering the choice of the companies has reduced the yield of the Funds in addition to increasing the risk of depreciation in wartime. Mr. Setalvad discussed the point by comparing the present yield on giltedged securities with that obtainable some years ago and urged that the increase in taxation reduced the already low yield, so that insurance companies were forced to ask for the removal of statutory restrictions. Informed opinion has always admitted the necessity for elastic provisions in the law; and no one would possibly say that companies should provide out of revenue, as they did last year, the sum lost by changes in security values. A reduction of the prescribed percentage like the acceptance of the plea that buildings for head offices in cities should be grouped with giltedged and approved assets has much to recommend it. Mr. Setalvad's speech covered certain other points like the limited progress made by Indian insurance and the necessity for treating Lloyd's underwriters like other insurers.

Ruby General Insurance

THE remarkable expansion in business naturally raises the Ruby General Insurance Co's report for 1940 to a special place among the annual reports of Indian Insurance Companies. The outstanding features are the big rises in the Company's premium revenue and funds. A comparison with the 1939 results will indicate how rapid and healthy progress has been in spite of war conditions. Net premiums in the Fire Branch amounted to Rs. 5,31,612-12-11 as against Rs. 3,25,906-4-11 in 1939. Total claims paid and outstanding came to Rs. 70,371-2-3. The loss ratio is singularly favourable in this as also the Marine Department. The total expenses and commissions for the year absorbed Rs. 1,73,640-1-11 and the revenue account permits a transfer of Rs. 1,39,807-6-11 to the Profit and Loss account. The happy character of the results for the year are also reflected in the substantial addition to the Fire Fund which stood at the end of 1940 at Rs. 2,12,645-1 showing that an adequate reserve for unexpired risks was retained. The net premiums in the Marine branch amounted to Rs. 50,586-15 and the moderate decline, as compared with 1939, is explained by the caution exhibited in underwriting marine risks. The surplus of receipts allows a transfer of Rs. 25,408-14 from the Marine Branch to the Profit and Loss account while the Fund is maintained at 40 per cent of the premiums for the year.

More favourable results are reported by the Accident branch which obtained total premiums of Rs. 1,83,455-3-1 and paid out claims totalling Rs. 1,04,503-10-9. The Fund at the end of the year was higher at Rs. 73,381-15-6. The Accident Branch contributes Rs. 43,714-15-5 to the Profit and Loss account. The most impressive increase under business is reported by the Life branch which received 1,660 proposals and issued 1,141 policies assuring in the aggregate over Rs. 30.65 lakhs last year. The outstanding growth of business shows that Ruby has made a very good beginning. Total premiums for the year amounted to over Rs. 1.54 lakhs and interest receipts provided Rs. 4,218-12. Claims were inconsiderable at Rs. 6,000 but the expansion in new business has been secured through a substantial rise in general expenses. The year's revenue provides nearly the whole of the addition made to the Life Fund which has advanced from Rs. 10,000 to Rs. 60,000. The successful reduction of organisation expenses is also an achievement to the credit of Ruby and the Director's report has expressed satisfaction with the results. The bulk of profits from the branches is allocated to a special Reserve and the balance of Rs. 44,253-2-10 has been carried forward. It is noteworthy that in the first full year of working the Life Branch, which normally suffers owing to the dislocation produced by the war, has recorded unusually good results. The main feature of the year's accounts is the increase under interest receipts which accounts for the rise in profits of the year. In his review of the year's results at the annual meeting last month Mr. B. M. Birla adverted to the growth of the funds *pari passu* with the increase in revenue. The latest balance-sheet shows that in addition to the statutory deposits the Company had over Rs. 4.08 lakhs in Government securities. A striking feature is the amplitude of cash balances totalling nearly Rs. 5.3 lakhs. The Company had reserves totalling Rs. 2.75 lakhs in addition to the various Funds. The paid-up capital is deservedly high at Rs. 14.4 lakhs but such items as agents' balances and outstanding premiums appear to be rather large. The most interesting change of the year is the increase under loans and advances indicating that Ruby's assets are employed to advantage.

THE second year of the war is fast drawing to its end. But still the mists hang as thick as ever over its future course. Will Germany start the third year of the war with another nation added to the longish roll of victims? News from the Russian front has of late been far from heartening. Till a fortnight ago, it seemed as though in this tug-of-war between the two great land powers, a new equilibrium, however unstable, had been gained. The respective High Commands were content with issuing communiques of a more or less routine kind. One missed the usual swagger in the German broadcasts. The Moscow Radio had the advantage that its denial of German claims were substantiated by later developments. The battles in the various sectors were of the ding-dong kind. In a week all this would appear to have changed. The German High Command dramatically rung new changes. New generals came in in place of the old. New objectives were chosen. And while the attack on the path to Moscow, Leningrad and Kiev was maintained, there was a dash towards Odessa. There were suspicions that it was a feint and that the real objectives of the German offensive had undergone no change. But now Odessa is threatened. Leningrad, if the latest reports are accurate, is as good as fallen. The area around Kiev is virtually overrun by the German army; and Marshal Budenny has barely succeeded in withdrawing his forces in the Dnieper bend. There is still more than a week left of the second year of the war. And that is why one is obliged to ask whether the dawn of the third year will see the doom of Russian resistance and, as a consequence, the entry of Japan and Spain into the arena.

When one thinks of the different possibilities that the war might yet unfold, one cannot help feeling that there will be no end to the surprises that it has still in store for us. The usual tendency to make dogmatic assertions about what will happen next has by now died a natural, or rather an unnatural, death. Few people are given to exercising their minds seriously on an appraisement of the daily packet of news, except, of course, those who are obliged to. But the present phase of Russo-German War and the joint Anglo-American declaration of war aims, followed as it is by renewed American efforts in the cause of Democracy, clearly suggest that another crucial stage has been reached, which it is necessary everyone should try to understand to the best of one's light. Obviously, the most important factor in the present position is the fate of Russia. And, unfortunately, few people ever cared to judge Russian strength with freedom from prejudice either way. German successes only helped the detractors of Russia to run her down without exposing themselves to charges of blind prejudice. Two or three weeks of the Russian war; and the pendulum swung to the other equally uncritical extreme. It is hard to believe that those who talked of the Russian army as a kind of rabble could within such a short time, change over to the other extreme of envisaging an absolute Russian triumph over German arms.

I am somewhat tickled to find that many of the points which I made out in these columns soon after the outbreak of the Russo-German war, were afterwards expatiated on by military commentators and news reporters from abroad. It is not that these latter were ignorant of such simple facts as that Russia had been totalitarian for a longer period than Germany or Italy, that the Soviet Government had from the beginning prepared for a war of defence against the whole of the rest of the world, that some of the arresting features of the German blitzkrieg were really Russian inventions. But the prejudice against communism combined with awe of German prowess to obscure these facts and make people forget them wholesale. Given that attitude the breakdown of Russia seemed a matter of days rather than weeks. When Stalin spoke on the Moscow Radio, there were unwarranted reports that he was nervous and hesitant. Every stand that Russia made was a matter for surprise. Counter-attacks were received with ill-concealed incredulity. It was not till the Germans themselves began to admit the stubbornness of the Russian resistance that the old attitude began to undergo any considerable modification.

D. F. SANDERS, *General Manager.*

But, as I said earlier, it is no gain if one kind of extremism gives place to another. It was thought before long that the Russians had only to hold out for two or three weeks to be able to launch a large-scale counter-offensive. When the much-advertised second offensive of the Germans failed to produce the results that were expected of it, the door was opened for exaggeration of every kind. The communiques of the German High Command were responsible for this violent reaction. In the first one year and a half of the war, the Germans had little or no reason to exaggerate their success, which was impressive enough, as a plain unvarnished tale. But from the second week of the Russian campaign, the German High Command had to cook up glowing accounts of the achievements on the Russian front. Bessarabia was claimed to have been occupied fully two weeks before the Germans gained possession of it. Similar fantastic claims were made about Smolensk; and, though the event may show them to have been only premature, the claims were, nevertheless, a lie when they were first made. Of course, German estimates of Russian losses in men or planes ran into astronomical figures. All this was unhelpful to judgment; and Russian reverses during the last week or two have been as much of a surprise as their earlier success in stemmming the tide of German advance; and the tendency now is to wait for the collapse of Russian resistance.

But is it really imminent? What the eight weeks of the Russo-German war have brought out is that only Russia knew her own strength and weakness, that she had no illusions about the striking power of the German army and that the Russian High Command has its own nimble ideas of strategy and tactics. While others have been dogmatising about the course of the Russo-German war, the Russian generals have been content to adjust themselves to every situation as it arose or could be foreseen. Not many seem to remember that the "scorched earth" policy, which is now applauded all over the world, was formulated at the nick of time after the burst through of the German divisions and commended to the people by Stalin himself over the Radio in that much misunderstood broadcast. It has worked extremely well. The people have readily wrecked their own houses and gone into the wilderness. The German armies are suffering from the perfect execution of this policy. Guerilla warfare, and threats to communications, go with this "scorched earth."

If the people have adjusted themselves to the vicissitudes of the war, the Generals have been doing the same with even greater calculation. I imagine that what they care for is the price at which the Germans gain fresh ground. The Russian army fights to ensure that the price is higher than what in the long view of a war like this should be deemed economical. Once a high price is extorted, they are only too ready to yield to the tremendous pressure of the German attack and fall back on comparatively more secure positions. What distinguishes Russia from the other nations whom Germany has fought and vanquished is her ability to force an exorbitant price for these successes and retain the power to give more battle. To talk of the collapse of Russian resistance is to be influenced by what happened in Poland or France. Nobody seems to attach any importance to the fact—perhaps it has not been noticed at all—that though the Germans have gone far past the pre-war Russian frontier, though Smolensk has fallen, Leningrad virtually so and Odessa and Moscow and Kiev are threatened, the Russians have not till now been strategically outwitted.

French and Polish Generals were not so much beaten in battle as befooled in matters of strategy. Armies were cut up; divisions found themselves trapped by the enemy's directions given in successful imitation of the voice of their own officers. Parachutists jumped behind the lines; and German encirclement moves rarely failed of their objectives. It is heartening that no such thing has so far been heard in the Russo-German war. By all tokens, Marshal Budenny in the southern sector was the most dangerously placed of all the Russian generals. He, too, it would now appear, has escaped encirclement. The danger of encirclement stared every section of the Russian Army in the face. But the Russians have taken the risk; and at no place are they known to have retreated before inflicting the requisite amount of losses on the enemy. The chief points, then, to note are, firstly, that Russia never yielded ground without making the Germans pay for it in men and material, secondly, that she has taken care that the invading army gets no manner of help from the territory it occupies, and thirdly, that it is to a large extent a case of falling upon on lines from which a stronger defence may be possible. I say this, for all this talk of collapse of Russian resistance lacks warrant in facts. There is no gainsaying the seriousness of the most recent developments. If Leningrad has fallen and the Germans are in a position to march against Moscow, while the Ukraine and the industrial areas around Kiev are weakly held, the outlook is indeed dark. But there can be no question of the history of France repeating itself or Russia getting her counterpart of Vichy.

Any worsening in the Russian front is a danger not so much in itself as that it might prove to be the signal for Japan playing the part which Italy played in the case of France. But there are certain differences which should, indeed, be made the most of. Firstly, Russia has a Far Eastern army which is a completely independent unit, independent not only in its personnel, but also in the sources of its supplies. Italy, at the moment of her entry into the war, had little to lose and much to gain by attacking France at the moment she did. But Japan will have to face the full strength of great powers if she chooses, to take advantage of any worsening of the Russian position. The question is not so much how long Russia will hold out, but what use is going to be made of it in the plans for that counter-offensive of the Allies which must finally bring Germany to her knees.

It is in relation to this question that the joint Anglo-American statement of war aims must be considered. I have been chary of commenting on it for the obvious reason that any Indian's comment on it must be obvious. The first impulse is to see how far the terms of the statement apply to India, and whether they are meant to—which is quite a different thing—apply to this country. Of course, I can't speak of the latter. As for the former, there is the phrase 'all peoples,' without any exception or qualification; and unless it is argued that the people, or as we used to be called, the peoples of India belong to the animal kingdom, the terms of the Churchill-Roosevelt declaration ought to apply to India. But the question of India apart,

(From Our Correspondent)

Simla, August 19.

THE most outstanding question now before the Government of India is the Indo-Burma Agreement which has been the subject of keen controversy during the last few weeks. To-day the Member-in-charge, Sir G. S. Bajpai, meets the deputation of Burma Indians to discuss the issues which have been raised in their memorandum. It does not appear that the memorandum of the Federation of Indian Chambers of Commerce and Industries has so far reached the Government of India. The viewpoint of the Indian delegation from Burma is, broadly stated, that there is both need for an agreement and also for regulation of the immigration of unskilled labour. The main consideration which they propose to urge is the security and contentment of the Indian community in Burma numbering 12 lakhs. So far as one can judge from reports current here, there are certain points in the concluded agreement which the Burma Government regard as essential, but there is no reason to think that the present Ministry in Burma will take up a truculent attitude. It recognises the need for friendly relations with this country and, for this purpose, may be quite prepared to reconsider the provisions so as to free them from the charge of harshness and try to allay the fears and suspicions in this country. There is a real need to get assurances from the Burma Government that the agreement will be worked in a friendly and liberal spirit with due regard to the interests of the Indian community and the past associations between the two countries. There is every hope of a suitable understanding being reached as a result of further consultations based on the representations made to the Government of India.

* * *

Some idea is now available of the legislative programme for the coming autumn session of the Central Legislature. It is now certain that Commerce Member will introduce a bill to replace the Coffee Control Ordinance with such changes as have been found necessary from experience of its working. Another important measure which he is expected to introduce is a Bill to amend the Indian Companies Act to improve the administration of the present law relating to banking—as indicated by the Governor of the Reserve Bank in his report. There appears to be no truth in the report that a bill to regulate petrol rationing will be introduced, for as the Government has taken action under the Defence of India Act Rules for petrol rationing, there is no need for further legislation. The Finance Department has two bills—one to amend the Indian Coinage Act to permit the introduction of half anna nickel coins and the other to amend the Indian Income Tax Act the exact details of which are not yet available. The Communications Department has also an important bill to amend the Motor Vehicles Act based on the decisions taken at the recent meeting of the Transport Advisory Council. A number of Labour measures are reported to be ready also for introduction. A bill to amend the Factories Act reduces to ten the number of workers necessary to bring any place of employment within the definition of a factory under the Act. There are also bills to provide for maternity benefits to women workers in coal mines, the grant of a weekly holiday to employees in commercial establishments and for the collection of industrial statistics. In accordance with the resolution passed during the last session of the Central Legislature the Government of India propose also to amend the Workmen's Compensation Act and the Merchant Shipping Act to relieve employers of liability to pay compensation for war injuries. The Home Department is also preparing an urgent bill for disposal during the current session. If in addition there is to be also an Emergency Finance Bill, the legislative work for the coming session will be fairly heavy.

* * *

It is understood that Government of India is carefully watching the working of the petrol rationing scheme. Its special officer, Mr. Reynolds, has proceeded on a tour of the provinces to acquaint himself with its actual working and will on his return report to the Government. No serious dislocation of public motor transport or of factory production is anticipated by the authorities here, but in the light of experience the scheme will have to be adjusted to meet the country's requirements. In the meantime a special officer, Mr. Watney, has also been appointed by the Communications Department to study the possibilities of producer gas as a substitute for petrol. He is also now on tour conferring with Provincial Governments. Nothing, however is known as to what is being done for developing the power alcohol industry to augment our petrol supplies. At the meeting of the Indian Sugar Mills Association at New Delhi on Sunday, a resolution was passed urging the Central and Provincial Governments to grant licenses freely for the manufacture of power alcohol and to compel the admixture of power alcohol with petrol.

* * *

A detailed scheme has been worked out by the Government of India for India's participation in the Lease and Lend Act arrangements with America. The scheme is primarily concerned with steel imports, but though no definite information is available regarding other classes of imports, it is said that if they are directly connected with the war effort, there is no reason why they should not receive favourable consideration. Only time will show how far India is able to benefit from the proposed arrangements. There are two difficulties in the way under the existing procedure followed by the U.S.A. authorities. Firstly, India has to go through the British Purchasing Mission along with the United Kingdom and the Dominions. As everything has to be centralised and the various purchasing missions have to decide among themselves the apportionment, according to their respective needs, of whatever America is able to give, India cannot be quite certain of its position. In the first place, it is entirely in the hands of American authorities to determine the nature and extent of priority rationing. And, secondly, it will probably depend on the British Purchasing Mission in consultation with other purchasing missions to decide how much should go to India and how much to each of the others. The other difficulty is with reference to the availability of shipping facilities for which the Ministry of Shipping is responsible. It is not going to be an easy task for Sir Shanmukham Chetti to get full satisfaction for the indents placed by India and, arrange for shipping without unnecessary delay. For facilitating his task, however, an elaborate organisation has been set up by the Supply Department to get full particulars, to consolidate indents and make such arrangements as are needed to secure for India the fullest participation possible in the benefits accruing from the Lease and Lend Act. This organisation has been entrusted to Mr. Yeatts who was formerly Census Commissioner.

* * *

THE first of the seven new members appointed to the Viceroy's Council takes charge this week. It is understood that before the second week of September two more may have taken charge of their offices—Sir Sultan Ahmed and, Sir Akbar Hydari. Nothing is definitely known regarding the date of arrival of Sir Firoze Khan Noon and Dr. E. Raghavendra Rau, but the intention of the Viceroy appears to be to have the first meeting of the expanded Council before the end of September. Arrangements are also being made for holding the first meeting of the National Defence Council early in September by which time the names of the Princes' representatives will be ready announcement. One interesting question which has been raised in the course of political talks is the need for forming an Inner Cabinet to facilitate the working of the "expanded" council. In their opinion a Cabinet of thirteen members, composed of members drawn from various groups and parties who cannot be said to have any common political affiliation, may prove unwieldy for dealing with day to day problems. They seem to think that the formation of a smaller body—like the inner War Cabinet in England—which can be in daily touch with the Viceroy and advise him on all questions of urgent policy will be useful. At present it would appear that there is what is called an Economic Subcommittee of the Viceroy's Council, but with the expansion of the Council, the need for the formation of a smaller and more compact body to facilitate the working of the larger Council and also give greater opportunities to the Viceroy for consultation with his colleagues is being mentioned as a matter for immediate consideration.

* * *

There are various rumours that a new loan may soon be floated for Defence purposes. In his Madras speech the Viceroy revealed that the Government of India required at least Rs. 100 crores a year by way of loans to meet the cost of Defence expansion and the financing of war supplies. The fact is that the present Defence loans have yielded only about Rs. 60 to 70 crores a year. It is possible that the Government of India may revise its loan policy in the light of existing conditions and offer new terms which may be expected to bring better response. It is likely that when the Central Legislature meets in October the Finance Member may make a statement explaining the present financial position. At present the only indication available is that given in the Central Government's statement of receipts and disbursements for the month of June. The scale on which Defence expansion is proceeding is disclosed by the fact that in the first three months of the current financial year alone the net cost Defence Services is over Rs. 20½ crores. This is an increase of nearly Rs. 8 ½ crores as compared with the previous year. In the month of June alone the increase has been nearly Rs. 6 crores as compared with June of the previous year. Owing to the latest developments in the war situation and the extensive measures undertaken by the Government of India it is quite possible that the actual expenditure may exceed the Budget provision of Rs. 84 crores for the current year. On the revenue side the three months have disclosed an increase of Rs. 4 crores as compared with last year which amounts to not even half of the increase in expenditure during the same period. One has however to be prepared for a big fall in Customs receipts during the coming months owing to the import restrictions rendered necessary by the course of the war. Opinion in informed circles is that though the present financial position is by no means unfavourable as compared with the Budget estimates the country will have to be prepared for a further measure of additional taxation to meet the cost of next year's Defence programme if the war continues on the scale now threatened. Instead of reserving the whole of the taxation programme for the General Budget, it is quite possible that the Government of India may decide to have part of it sanctioned immediately during the ensuing Assembly session.

(From Our Correspondent)

Bombay, August 20.

FOR a month people talked here about the flood: now they have started to talk about the drought. The suspicious firmness of cotton prices can only be ascribed to the disastrous tailing off of the monsoon. If cotton market operators are not troubled it is otherwise with a public harassed by the rise in the prices of foodstuffs. The weakening of the monsoon has cast a gloom over many districts. In the Deccan more than one district faces scarcity even before the relief operations of the past year have closed down. It is stated that there are no epidemics and prices are not rising abnormally, but that is small consolation to the Bombay Deccan.

The most surprising thing is that Gujerat also reports lack of rain, and if rains do not come in time crops in this part of the Province are likely to fail as in Konkan and the Deccan. District reports agree in tracing part of the trouble to the flood damage, and if Rajputana and the U.P. are in a happier position at present, many Bombay districts face a critical situation. Conversation about the climate and crops no longer wears a conventional look. Things look pretty grim for districts accustomed to a generous monsoon and the threatened loss of the paddy crop will put the price controllers in a fix. It is not enough to blame the monsoon's vagaries when the Government can't get the grain ships from Burma to do their work.

The delegation from Burma may say little about the rice problem but a great deal about the difficulties of immigrants. Discussions in the Bengal Council have revealed that only at the port of embarkation was the working class emigrant told that everything is in abeyance pending the establishment of an Immigration Board. The Indian delegation lately here has perhaps added little to the volume of protests, but would have indicated clearly that the Indian residents are definitely against the agreement negotiated by Sir G. S. Bajpai. Representatives of the leading organisations including the Federation of Indian Chambers met the delegation led by Mr. Tyabji and the representatives chosen by the protest meeting held last month in Madras. Sir P. Thakurdas met the delegates from Burma on behalf of the Imperial Indian Citizenship Association. It is believed that a joint memorandum will be submitted to the Government from the delegates and the sympathetic Associations in order to get the agreement amended. The Indian delegation has put up a strong case and will cite more points when the meeting with Sir G. S. Bajpai comes off on Tuesday. Bombay has not disguised its opinion that the agreement is marred by serious defects and the Indian Merchants Chamber has endorsed the view that the Burman terms should have been rejected.

After the reaction in sugar comes the rise in piecegoods. If the rise has been gradual instead of abrupt as in Calcutta it is not less substantial. Reports from the main markets ascribe the advance in prices to speculative buying. But this has naturally affected genuine consumption demand and many here deplore the unhealthy rise. It is feared that if the rise is not checked demand will shrink to lamentably small proportions, and some continue to hope that Government intervention will enforce a decline. If only prices of coarse goods are subject to control, nothing can help the consumer who will be fleeced mercilessly by the middlemen still bent on keeping stocks and forcing up prices. At the end of June speculative activity expanded in the belief that war orders and export demand will impose additional strain at home. The stringent regulations concerning Japanese imports support the belief that supplies for the festival season will be below normal and those who are keen on profits think of a new opportunity. It is assumed that the price control conference will end in pious resolutions and their own stocks will be of higher value than at the time of purchase. Mills, of course, are not in a position to accept orders for forward delivery and dealers holding stocks of their own are voluntarily approached by speculators. Outside interest has unexpectedly increased and mofussil dealers have made sales of their own undelivered supplies in respect of earlier orders mainly in order to snatch a quick profit. Prices have in the case of most varieties risen by over 20 per cent. Shirtings have gone up by 25 per cent or 3¼ annas per lb. and drills are even costlier. The increase in the case of finer goods is more conspicuous. But the rise in the case of chaddars will appear moderate compared with the cent per cent rise recorded in the case of grey domestics since the beginning of the year. The increase is not at all warranted by mill quotations or cotton prices of late. Some speculators fearing a decline have started selling of their own accord. There is also a belief that domstic demand will fall on account of the higher cost of living and the monsoon's vagaries. Some people say that internal demand will fall by as much as 25 per cent and they argue that higher prices will bring a sort of retribution. It is urged that that there cannot be a famine of piecegoods simply because mills are not ready to take on new orders when they have in hand orders for about 500,000 bales. Assuming that war demand and exports enlarge the offtake of Indian goods by 1,000 million yards in the coming year mills can produce the 5,000 million yards and more wanted by the country without effort. Most mills have not departed from single shift working and in view of superabundant supplies of cotton it is rather surprising that a few dealers think that fancy prices can be had for the asking.

Apart from the strong protest lodged by the motor trade and the usual grumbles, there has been nothing to show that rationing is not accepted as part of the privations of war. Complaints against the undue rise in the prices of vegetables milk and fruit have been many but that situation can be dealt with earlier by liberal petrol allowances to lorries. The city does not show so many cars as in the past; many have vanished into garages perhaps to re-emerge after the war, and old crocks have naturally sought the knacker's yard. Late applicants for ration cards have experienced some difficulty in getting about and applicants for supplementary rations are not likely to meet with instantaneous success. There is no place for optimism whatever press notes say. Many streets are free from the traffic problem, and the pedestrian like the victoria driver has no objections to petrol rationing. There is, of course the difficulty connected with vegetables and prices. The absence of enough lorries is assigned as the reason for the scarcity and consequent rise in prices to rates above those at the end of June. Carts and railways have to carry vegetables formerly transported in lorries from upcountry centres. The inevitable delay is a factor in the rise in prices but dealers have certainly been unscrupulous. The encouragement given to producer gas vehicles in Madras, has naturally stimulated interest in Hyderabad. A report from that State refers to the possibility of all buses and cars changing over to charcoal gas as a source of power. Bus-owners are certainly desirous of getting the better of petrol rationing. The State Forest Deprartment has already set an example by using lorries fitted with gas generators. Charcoal burning is evidently an industry on the threshold of development and the influ-

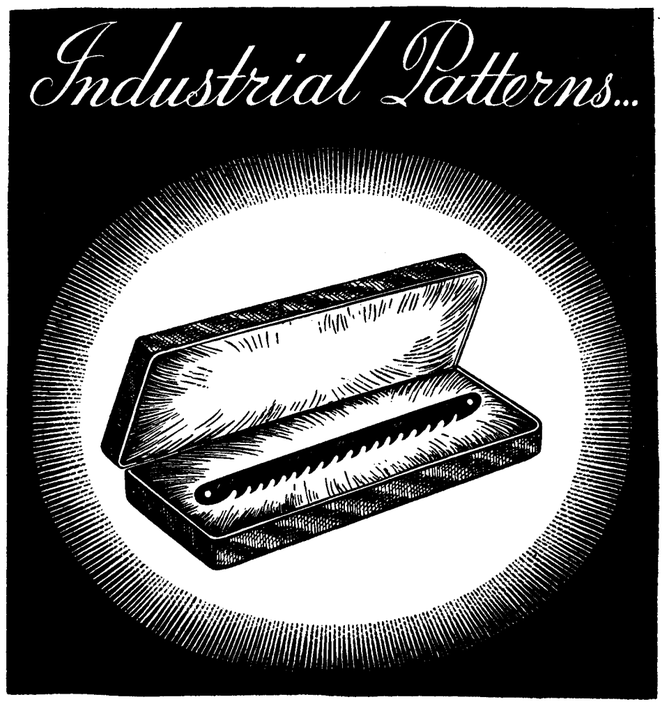
the time and manner of this declaration suggest that it is part of the war effort, not of this nation or that, but of all free peoples, who are also civilised, to meet this threat of Nazi tyranny. I confess, I am not clear in my mind as to whom this statement is meant for. Is it for the anti-Nazis, within Germany and without, who emblazon the V-sign wherever possible and are biding their time for throwing off the Nazi yoke? Or does the situation in the United States call for this open commitment on the part of Mr. Churchill, a commitment which can be adequate protection for Mr. Roosevelt from the fate of Woodrow Wilson? Foreign comment is mostly in language at once flamboyant and conventional. It throws little light on the motives behind the declaration. No attempt is made to judge the practical advantages that are expected to accrue from this proclamation of the rights of man. But, considering that Mr. Roosevelt is busy rousing the spirit of his people by apt quotations from Lincoln, it seems possible that the declaration is addressed in the main to the American public. In this war, as in the last, the decisive phase awaits America's entry into it. On that, there can be little difference of opinion. But time is the essence of the contract, implicit and without adequate consideration as it is, between the two great English-speaking peoples. And again there are more battles to be fought in this war than those of the Pacific and the Atlantic, battles which will have to be fought by a free India if they are to be won for civilisation.



An improving afternoon with the Rotarians taught me many things about the fine work of Indian seamen. Bengal from which province the majority of Indian Seamen hail has just reason to be proud of a fine class of men who in war and peace have shown that they are real seadogs. Mr. R. R. Haddow whose firm is rightly distinguished for its encouragement of maritime labour spoke of the slights and hardships peculiar to seamen. They may not all be absent-minded beggars but most of us are and it is only the shipping Companies that realise what a fine class of men go to sea. Hours and wages are not all they should be: but never a squeal is heard. In port or on the high seas the Indian seamen is a plucky and jolly soul for whom little has been done even in the most contrite mood of Government. Mr. Haddow however mentioned that lascars who are prisoners of war get some comforts sent to them and Mr. Haddow's firm expects that with the co-operation of the Port Trust Calcutta should provide the Home which even Glasgow has got up for Indian seamen in port.

'EAVESDROPPER'

artillery. Naturally Lord Beaverbrook wants to get many more of the machines that confer superority on the R.A.F.

The City of London is said to have received the news of the Anglo-Soviet agreement well. Russia's acts in regard to the Lena Goldfields' debentures and the Estonian bonds have forgotten and it is likely that nothing has been said about the blocked assets of the Baltic States and the outstanding payments against which the City registered its protest in November. One must suppose that an artifical rate for the sterling-rouble exchange will be maintained; so far as one can see the present war has not touched the rouble rate. It may be officially quoted at 7 and odd roubles to the £ and the New York rate may be just the same as in September 1939. The Russian currency has in the Stalin era been immune from the changes produced by the tripartite agreement of 1936. The Russians, however, have been driven to cooperate with others and London may have to evolve a special rate or else put a rate governed by a payments agreement appurtenant to the loan arrangement. The Russian currency normally has been strong in recent years, but that may be changed by excessive borrowing in the U.S.A. in the near future. The repudiation of the Romanoffs' debts has been evidently forgiven by the arch-capitalists, and the most interesting echo of the Anglo Russian pourparlers has been a letter in the Indian press suggesting that Indians who bought up rouble notes on speculation in 1920 should be given some sort of relief, now that there is a working alliance with Russia and India too is going to help that country against the Nazis.

Shaping and cutting materials to his purpose, man must use tools of dependable strength and toughness.

In this sphere the hammer, the screw-driver, the slender saw-blade render vital service times without number.

It is the strength of steel, which gives these tools the reliability they possess.

Jute and Jute Manufactures

(From Our Correspondent)

Calcutta, 21st August

THE Jute Mill Association deemed it necessary to issue a Press statement last week to justify their policy with regard to working hourse, from which the most interesting point which emerges is that the Committee will not permit the working-times agreement being used as a corrective to factors purely speculative in character. Apart from the fact that it might be argued with some cogency that the opportunity for speculation has been to a large extent created by the policy of restricted production, a backward glance at the policy of the Association in the not distant past would suggest that working hours have been adjusted on more than one occasion to combat conditions which, if not solely due to speculative factors, were much influenced thereby. Not all will agree that the theory now propounded is a sound one. In a market so liable to violent speculative fluctuations as we are accustomed to in Calcutta, the power to adjust working hours to combat such ramps is a potent influence towards stablising price movements and might, with every justification, be used as such. While it must be admitted that the shipping situation should receive due consideration, if other factors are ignored the ultimate reactions on the industry may be much worse than the temporary holding of some extra stocks of goods would entail.

The Raw Jute Taxation Bill passed through the Assembly with remarkably little opposition considering that Government have not yet formulated any definite proposals on which the receipts are to be expended, nor even given any precise guarantee that the receipts will be devoted to any specific purpose, other than the extremely nebulous description contained in the preamble to the Bill.

Apparently Calcutta is not the only market where there is speculation and profiteering in Jute Goods. Information has been received that maximum prices are being imposed in U.S.A. and though details are not yet sufficiently complete to judge of the full implications of the steps taken, the controlled prices appear to be around the equivalent of Calcutta rates at Rs. 21-12 for 9 porters and Rs. 28 for elevens, which are still consideramly over the ready prices ruling here.

Reverting to the proposals for the stabilisation of jute standards, it is understood that as the Mills Committee were not unanimously in favour of the suggestions put up by the standards sub-committee, the proposals have been submitted to members for their opinion, and that unless there is a greater volume of opposition than appears likely, the experiment of abolishing all private settlements and of submitting all disputes to a simplified form of arbitration, has a very good chance of being tried out during the current season. The results will be watched with interest. With the introduction of petrol rationing, a more appropriate moment for introducing the scheme could not have been selected.

A considerably greater turnover has to be recorded in the Pucca Bale market than for some time. Both Shippers and Mills have been interested, though shipping contracts more often than not include the option of Godown delivery. Sales of Oid Crop Jute include Outport Tossa assortment for shipment at Rs. 48, and Dundee Daisee 2-3 and Dundee Tossa 4s to Mills at Rs. 56 and Rs. 55 respectively. In New Crop, Dundee Firsts were sold for shipment at Rs. 95 and Dundee Lightnings to Mills at Rs. 85 to Rs. 87 according to mark. New Dundee Daisee 2-3 were done for shipment at Rs. 56 to Rs. 57-8 and reported to Mills at Rs. 58. Dundee Tossa 4s for shipment were done at Rs. 54 to Rs. 55-8. New Crop L.J.A Reds sold at Rs. 68 to Rs. 69 for shipment, and Firsts at Rs. 58, while Mills paid Rs. 60 for Firsts and up to Rs. 65 for Free from Samla Firsts. After ruling quiet for several days, the Futures market assumed a firmer tone on more active enquiry in both Mill and shipment markets. From Rs. 62-8 the rate has gradually hardened, with minor setbacks, to Rs. 65-14 but closes quieter in sympathy with other markets at Rs. 64-4.

There has also been considerably more activity to note in the Loose Jute market, both old and new crop having been taken up in greater volume. First a fair business was put through in Old Crop Jat Bottoms at Rs. 8 to Rs. 8-12, mainly supervised or picked marks. New Crop supervised continued to be quietly taken at Rs. 13-4, Rs. 11-4 and Rs. 8-8 for Tops, Middles and Bottoms with four annas more ultimately paid. Indian District was loan to some extent at Rs. 12-8, Rs. 10-8 and Rs. 8. Old Crop District Middles were sold at Rs. 10-8 and X Bottoms at Rs. 6-12. Owing to the firmness of upcountry markets, sellers at the close are very reserved and unwilling to trade except at an advance in prices, with mills again holding off. Actually the Mills stock position is a strong one, judging by the final figures published for last season, which show that Mills actually consumed during the year 1st July 1940 to 30th June 1941, 53,84,000 Bales. Mills therefore increased their stocks of raw material during last season from 20,00,000 Bales at 1st July 1940 to around 43,00,000 Bales at 1st July 1941. while their consumption during the current season, assuming a steady 45 hour week, will not exceed 60,00,000 Bales. There would not therefore appear to be any urgency about Mill purchases, unless from the necessity of procuring some good quality jute.

Mofussil markets have ruled very strong and excited. Weather has interfered somewhat with the arrival of imports which continue much less in volume than is usual at this time of year. There has been no pressure to cut prematurely on account of high rivers, in fact the danger, now rather is that some of the jute is being left till it is over-mature, which will detract from quality. Government is taking credit for having taught the cultivator to market his crop slowly and to better advantage. They might give some credit to Providence for having adjusted conditions in the matter of weather and river levels to assist this process to the maximum degree.

This week has also seen greater activity in the Fabrics section and prices have been marked up all round. Eleven porters account for most of the Hessian business with sales recorded at Rs. 25-8 to Rs. 26-10 Aug. at Rs. 24-8 to Rs. 26 Septr. at Rs. 23 to Rs. 24 Oct/Dec, at Rs. Rs. 20-12 and Rs. 21 Jan/March and at Rs. 20 and Rs. 21 April/June. In 9 porters up to Rs. 20-12 was paid for August, Rs. 18-12 to Rs. 19-12 Septr, Rs. 17 to Rs. 19 Oct/Dec and Rs. 16/12 to Rs. 17 April/June. All these prices have been marked back about eight annas at the close. Heavy Goods have also come in for a good measure of attention, "B" Twills at Rs. 39-12 ready, Rs. 39-8 Aug/Sep, Rs. 39-4 Septr, and Rs. 39 Oct/Dec. Cornsacks fetched Rs. 41 to Rs. 41-8 near and Rs. 40 Oct/Dec. Liverpools touched Rs. 46-6 ready and sold at Rs. 44 Oct/Dec. "A" Twills have also been in demand. Woolpacks sold at Rs. 1-14 Aug/Sep and Cuban Sugars at Rs. 46-8 Jan/March. Heavy Goods rates are also lower by 4 to 6 annas at the close. Final quotations on a quieter market are :—

9 porters Rs. 20-4 August, Rs. 19-12 September, Rs. 18-6 October/December, Rs. 17-6 January/March, Rs. 16-8 April/June. 11 porters Rs. 26-3 August, Rs. 25-11 September, Rs. 23-10 October/December, Rs. 21-8 January/March, Rs. 20-10 April/June. "B" Twills Rs. 39-6 August, Rs. 39-4 September, Rs. 39-2 October/December, Rs. 38-12 January/March, Rs. 38-4 April/June. Cornsacks Rs. 41-4 August, Rs. 41-4 September, Rs. 40-8 October/December, Rs. 39-10 January/March, Rs. 38-12 April/June. Liverpools Rs. 46 August, Rs. 46 September, Rs. 44-8 October/December, Rs. 43-8 January/March, Rs. 43 April/June. Heavy Cees Rs. 36-12 August, Rs. 36-12 September, Rs. 36-12 October/December.

A Correction

In our issue of *Indian Finance* dated August 16, 1941 on page 302 the net profit figure in the Profit and Loss Account of the Indian Bank Limited was wrongly given as Rs. 9,47,151-9-5. The correct figure should be Rs. 3,47,151-9-5.

JUTE

Calcutta, August 21.

The continued strength of the hessian market and the greater interest shown by mills in new crop have led to a firming up in values all round. Sellers are reserved towards the close, and quotations are fully two points higher. There are also reports regarding the possibility of large Government orders. No important developments have occurred to change the outlook for jute but with the determination of the Bengal Government to do everything possible to increase the return for the ryot, and the likelihood of a large production, a more confident feeling is noticeable.

In the loose jute section mills have bought fairly large quantities of new crop. Indian jat Tops, Middles and Bottoms were done at Rs. 14/8, Rs. 12/8, and Rs. 10/8 per maund. District jute are quoting eight annas per maund lower. Old crop, Indian Jat Middles, were done at Rs. 10/8 per maund.

In the pucca bales section, mills are reported to have bought New Crop Reds at Rs. 69 per bale. On Wednesday shippers are reported to have bought New Crop firsts at Rs. 58 to Rs. 59 per bale, Dundee Daisee 2/3 at Rs. 57/8 and Tossa 4's at Rs. 55/8. Mills also bought New Crop firsts at Rs. 60 per bale.

As pointed out above, the futures market has been active and the quotation was noted as high as Rs. 65/10 this morning. Selling at the higher levels in sympathy with the weakness of the stock markets has brought down the quotation to Rs. 64/14 at the time of writing.

JUTE MANUFACTURES

Calcutta, August 21.

The emergence of buying from the United States and the Riverplate together with reports regarding the possibility of fresh war orders, have been responsible for the sudden increase in values. The sentiment in the market at the present moment is in strong contrast with last week. The fears regarding the Far Eastern situation and the difficulties in freight tended to have a restraining influence on prices. It is now, however, believed that the freight position would improve and that there will be heavy buying for the near positions. Interest during the last two days has been confined mainly to the earlier positions. 9 porters ready are now quoting Rs. 20/4, against Rs. 19 at the end of last week. 9 porters September are Rs. 19/12, October-December Rs. 18/4, and January-March Rs. 17/4, 11 porters ready are Rs. 26/4, September Rs. 25/12, October-December Rs. 23/10 and January-March Rs. 21/8. There has been greater buying of 11 porters.

In the heavy goods section also quotations have improved in sympathy with the strength of hessian and jute markets. Riverplate has been interested only in Liverpools for near shipment and the quotation has been marked higher at Rs. 46, Cornsacks for the same position were Rs. 41 and A. Twills Rs. 47.

COTTON

Calcutta, August 21.

The raw cotton market was inclined to be steady earlier in the week on reports of dry weather conditions in the Broach district. Option dealers bought on the reaction theory. In midweek, however, there was heavy speculative selling on the deterioration in the Far Eastern situation and the successes of the Germans in the Northern and Southern sectors. Later, there has been a recovery with the publication of the All-India First Cotton Forecast and speculative buying. Reports regarding the grave threat to Leningrad have again been responsible for a lower tendency.

Every since the suspension of dollar credits for "futures" business in New York, operators are inclined to adopt a more realistic attitude and there is considerable anxiety regarding the future of Japanese exports. How far the Roosevelt-Churchill meeting prevents Japanese entry into war remains to be seen. Broach April-May 1942 are quoting Rs. 260/8, Oomra December-January Rs. 203/- and Bengal December-January Rs. 152/-. The quotations at the end of last week were Rs. 253/4, Rs. 189/12, and Rs. 166/8 respectively.

The New York market is inclined to be better on trade buying and mill demand. Weather conditions in the cotton belt are not reported to be satisfactory. October is quoting 16.24 cents and December 16.44 cents against 16.06 cents and 16.27 cents.

PIECEGOODS

Calcutta, August 21.

Rather slack conditions have been noticeable in the piecegoods market during the past week. The warning uttered by the Government of Bengal and the report that a conference of millowners is to be held in Delhi to make a survey of the situation, have had a sobering effect, and there has been a decline in values. Forward contracts have been on a very small scale and operators are reported to be nervous regarding the future trend. The undertone is uncertain. In the Japanese goods section business has been mostly of a scrappy character and buyers generally are not prepared to pay the prices asked. In the Lancashire goods section there is very little to report.

Similar conditions have also been noticeable in the yarn market.

GOLD

Calcutta, August 21.

The gold market has continued inactive and quotations have been fluctuatiing in very narrow limits. They are slightly lower on balance. Earlier in the week some support was extended to the market by arbitrageurs and the "special source." Gold ready are now quoting Rs. 42/4/6, First Settlement Rs. 42/1 and Second Settlement Rs. 42/-.

The London price for gold has remained unchanged at 168sh.

SILVER

Calcutta, August 21.

The Bombay silver market has not been quite steady. In mid-week a slightly easier feeling was noticeable in sympathy with the weakness of the cotton market. Quotations are a shade better towards the close. Indian mint silver ready is quoting Rs. 62/13, First settlement Rs. 62/14 and Second settlement Rs. 62/15.

The London market has been featureless and the quotation for both spot and Forward is quoting 23-7/16d. Trade demand has been negligible.

WHEAT

Calcutta, August 21.

The reserved attitude of sellers and the reports regarding the attacks of locusts in Sind, have resulted in a substantial improvement in values. The relapse in the cotton market has not had any effect on wheat values. Prices would perhaps have been marked higher but for the continued absence of buying from Burma. Choice white ready are quoting Rs. 35/3, September Rs. 35/7/8 and November Rs. 36/6/6.

In the Calcutta market steady conditions have been noticeable and Cawnpore ready are quoting Rs. 5/1, September Rs. 5/2/6 and May Rs. 4/15/6.

CROPS IN THE NEW WORLD

According to a cable from Ottawa dated August 8, the condition of the Canadian wheat crop for the current season is now estimated at 72 per cent of the normal and the condition of the linseed crop is reported to be 80 per cent of the normal. Last year's forecast put the wheat crop at 87 per cent and the linseed crop at 85 per cent. A cable from Washington dated August 11, stated that the outturn of the wheat and linseed crops of the U.S.A. for the current season is now estimated at 950,953,000 bushels or 25,472,000 tons and 30,711,000 bushels or 768,000 tons respectively. The crop estimates last year put the wheat crop at 760,623,000 bushels or 20,374,000 tons in the case of wheat and the U.S. linseed crop was estimated at 29,279,000 bushels or 732,000 tons. Another Washington cable last week gave the U.S. Department of Agriculture's estimate of the cotton crop. The area and yield are estimated at 23,102,000 acres and 10,817,000 bales of 500 lbs each against 24,616,000 acres and 11,429,000 bales of 500 lbs. each reported in August last year.

ence of the Hyderabad example will not be negligible in Bombay.

Bombay's war effort was examined in detail by the Viceroy when he made the visit to the Sewri plant of General Motors. The officials of the company were ready to show how the plant worked to the advantage of India and adjacent countries. The Viceroy started a new assembly line and received a brochure with the autographs of the 3,000 employees of General Motors (India). The Viceroy addressed the workers about the importance of tools for the job of beating the Nazi and hoped that the Sewri plant workers would do their utmost to support the armies in the field. His Excellency expressed appreciation of the lay-out and mechanical arrangements. He also saw the A.R.P. demonstration and went back satisfied after seeing how American plants are helping to produce mechanised vehicles for India's army. Another visit on Saturday afternoon enabled the Viceroy to see what Alcock Ashdown is doing. The firm which is managed by Turner Morrison is far more than a name in the forward list. The officials of the Supply Department who attended on the Viceroy along with the Directors should have been the first to emphasise the importance of the materials produced by the firm. The ship-repairing facilities have been fully utilised in wartime and 700 ships have been attended to since the outbreak of the war. The ship-building and structural departments are now almost overshadowed by the forge which produces thousands of horseshoes. It was, therefore, a happy thought to give a silver horseshoe to the Viceroy as a memento and 2,000 employees shouted a slogan for the Victory when the Viceroy left the workshop. The Viceroy found time to interview leading businessmen as also members of the new Defence Council. He paid a visit to the new canteen for the Services housed in the Jehangir Building. He saw a rest home and reading room for troops and got an idea of the work put in by the hospitality committee organised by Lady Lumley. Both British and Indian troops have to be thankful to the ladies who got the canteen going and added amenities like singsongs, concerts and cinema shows.

Vivid appreciation of Sir Homi Mody's work for the war gifts committee is contained in a letter of Mr. N. M. Dumasia to the local papers. Apart from his work for the war gifts committee, which he has to give up, Sir Homi Mody has been praised for many other things. A Parsi leader, he belongs to the remant of the Liberal party that is anxious to promote the war effort. Sir Homi Mody is described as a non-party man selected for the first time since the Minto-Morley reforms on non-political grounds. Expansion of the Viceroy's Council can be justified on the ground of its giving a chance to others than professional patriots. Sir Homi Mody's work for the War Gifts Fund is illustrated by the collection of more than Rs. 48 lakhs in a year. The City alone has put up over two thirds of the Fund and how much the Fund owes to Sir Homi Mody's ability and energy will perhaps be realised after his resignation.

Vol. XXVIII. No. 8 SATURDAY AUGUST 23, 1941. Price Re. 1

Stock Markets to-day and to-morrow

STEEL CORPORATION RESULTS

STOCK markets have been rather undecided during the past few days. With a complete lack of support prices have shown a downward tendency. The discouraging foreign news has been mainly responsible for the easier tone of the markets. It is noteworthy, however, there has not been any selling pressure and there is no suggestion of weakness. Operators and investors alike are inclined to await further developments.

* * *

The balance-sheet of the *Steel Corporation of Bengal Limited* for the year ended December, 1940 was keenly awaited as with the reports regarding the Corporation being busily engaged on war orders it was generally expected that a dividend on the Ordinary shares would be paid. The actual results, however, reveal that enough has been earned during the year only for provision for depreciation and the preference dividend. But, there is no reason to be dissatisfied with the performance of the Company during last year. Only operators and investors were inclined to be more generous in their estimation of the Corporation's earning capacity in the first year of full working.

Production figures have not been published, as they cannot be made available, but the directors express their extreme satisfaction with the progress achieved by all the departments during the year. It is expected that during 1941 the Corporation's works will have reached the normal capacity production rating for which the works were originally planned. The works are almost entirely engaged in the production of material for war supplies.

The prospectus estimate of gross profits, without taking into consideration the special measure of protection enjoyed by the industry, was almost Rs. 62 lakhs. After providing for debenture interest, preference dividend, taxation (on the old basis) etc., an amount equivalent to 11 per cent, subject to depreciation, on the original issued capital would be available for disposal.

On the basis of full production the earnings for the current year can be expected to be even more as prices at which the company's products are supplied are considerably above the prospectus estimates. Only, as has been pointed out on former occasions, the higher rate of taxation and the liability for E.P.T. should be kept in mind.

The net profit for the year, before providing for depreciation, is Rs. 22,28,911. The sum set aside for depreciation is Rs. 15,21,389. After providing for the payment of the preference dividend out of profits or the seven months to December, 1940 the amount carried forward is Rs. 3,77,656. The net profit is calculated after provision for repairs and renewals to the extent of Rs. 18,35,272.

The surplus on account of the conversion of the 4½ per cent converible debentures into ordinary shares has been partly utilised in wiping off the excess of expenditure over receipts up to the end of 1939. The balance-sheet shows a very healthy position.

After the close of the year the half-yearly dividend up to May 31, 1940 *plus* arrears of dividend to the extent of Rs. 1 per share have been paid. It would be remembered only 4 per cent interest was paid out of capital for the three years ended May, 1940 and that 1 per cent was kept in arrear. Thus out of Rs. 3 per share arrears of dividend, Rs. 1 per share has been already paid and it can be expected that the remaining arrears will be paid along with the next half yearly dividend.

* * *

Another important balance-sheet to be published during the week is that of the *Tata Oil Mills Company Limited*. Thanks mainly to an increase in the volume of production it has been possible to report an increase in earnings. The rise in profits would perhaps have been more pronounced but for the increase in costs of production and the more or less stationary level of prices for the company's products during the major portion of the year ended March, 1941. The net profit, before providing for taxation, is Rs. 4,41,938 against Rs. 3,87,528 for 1939-40. The amount set aside to depreciation is Rs. 2,10,000 against Rs. 1,75,000 while other funds receive Rs. 47,597 against Rs. 27,000.

The dividend has been maintained at Re. 1 per share on the old shares. The new shares issued during the year rank for dividend from January 1, 1941 and as such receive a dividend of 2½ annas per share.

* * *

While commenting on the results of Dunbar and Bowreach Cotton Mills Limited it was remarked that conditions in the cotton textile industry had considerably improved and that earnings should show a considerable rise. Even from February this year prices for cotton textiles have been on the upgrade and the rise in prices has been pronounced especially in the last month. For this reason the earnings for the later half of 1941 should make even better showing.

One of the best mills in South India, the *Bangalore Woolen, Cotton and Silk Mills Limited* has been able to report a substantial increase in earnings for the half year ended June, 1941 over the previous half year.

The net profit, before providing for depreciation and taxation, for the half-year is Rs. 12,19,507 against Rs. 9,89,111 for the previous half year. The amount set aside for depreciation is Rs. 3,72,414 against Rs. 3,50,631 on the previous occasion. The amount on account of taxation is Rs. 2,87,360 against Rs. 1,74,000 while the allocation to Raw Materials Fluctuation Reserve is Rs. 2 lakhs against Rs. 1 lakh. The transfer to General Reserve is Rs. 1 lakh against Rs. 1.6 lakhs. Other funds receive Rs. 97,000 against Rs. 76,000.

On the last occasion, I pointed out that the directors were rather cautious in the declaration of the ordinary dividend. It is not surprising, therefore, that they have now decided to increase the dividend on the ordinary shares from Rs. 5 to Rs. 6-4 per share. The amount carried forward is Rs. 48,182 against Rs. 30,012 brought in.

There has been a rise in the quotation for the ordinary shares from Rs. 216 to Rs. 275 cum-dividend. On an earlier occasion, I pointed out that the shares of Bangalore, Wollen, Cotton and Silk Mills should be eventually quoting on a par with the shares of the sister company, Buckingham and Carnatic Company Limited. The quotation for B & C shares are now quoting only around Rs. 280.

* * *

The first ordinary dividend after the lapse of five and a half years is to be paid by the *Alexandra Jute Mills Limited*. The arrears of dividend on the preference shares were fully cleared during the last half-year. The net profit, before providing for taxation, for the six months ended June, 1941 is Rs. 2,92,638 against Rs. 2,25,125 for the previous half-year. The provision for taxation is higher at 1,40,000 against Rs. 1,00,000. The sum of Rs. 50,000 has been written off depreciation while Rs. 43,972 has been transferred to General Reserve in addition. After paying the preference dividend, the ordinary shares are to receive Rs. 7-8 per share.

The 7 per cent preference shares now quoting Rs. 135-8 cum dividend should be considered rather low-priced.

* * *

At the Tisco meeting special reference was made to the progress of the plan for turning the Deferred shares into Ordinaries. Mr. J. R. D. Tata stated that the Company would soon put in train arrangements for the modification of the capital structure.

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, August 22.

EARLIER in the week a steady tendency was noticeable in the several sections on the Calcutta Stock Exchange. During the latter half of the period under report, however, definitely easier conditions have been noticeable and with a declining volume of turnover prices have been marked down alround. The publication of the annual report of the *Steel Corporation of Bengal, Limited* has not been very well received by the market as the absence of a dividend on the ordinary shares has been to a certain extent disappointing. The main reason for the apathetic tone of the markets is the uncertainty regarding the war situation. The recent successes of the Germans in the Eastern Front and the reports regarding armed concentrations in Thailand have had a discouraging effect. In the absence of any support prices have naturally drifted downard. There has not been any heavy selling, however, and the decline in prices has been purely precautionary.

The giltedged securities section has been steady throughout the week though a smaller volume of business has been passing. With the prevalence of extremely easy money conditions it cannot be expected that the giltedged market will show any setback unless for political reasons. 3½ per cent. Paper has been sticky around Rs. 96. 3 per cent. 1963-65 were Rs. 95-2, 3 per cent. Defence Bonds 1946 Rs. 102-2, 3 per cent. 1951-54 Rs. 99-12, 3½ per cent. 1947-50 Rs. 103-2, 4 per cent. 1960-70 Rs. 110-12, 4½ per cent. 1955-60 Rs. 114 and 5 per cent. 1945-55 Rs. 111-4. It will be noted that there is not much change in rates for terminable loans. The treasury bills rate has come down to six annas and eleven pies per cent per annum from eight annas last week. Among provincial loans, some transactions have been recorded though at slightly lower rates. 3 per cent. 1952 issues were Rs. 99-4.

Some business has been done in public bodies' debentures. 3¼ per cent. *Howrah Bridge* debentures were dealt in at Rs. 99-4 and 3¼ per cent. *Rangoon Municipal* debentures at Rs. 100-10. Among industrial debentures, 4¼ per cent. *Steel Corporation* debentures changed hands at £119. 5½ per cent. *Great Easten Hotel* debentures were Rs. 107-8 and 6 per cent. *Shree Gopal Paper* Rs. 106.

Bank shares have been steady with *Imperial Bank* fully paids at Rs. 1,564 and contributories at Rs. 385. *Central Bank* were Rs. 47-12 cum dividend. *Reserve Bank* shares have been marked higher at Rs. 109.

First class preference shares have been well held *Bally* among jute mill preferences being quoted at Rs. 167, *Hastings* at Rs. 140-8, *Lansdowne* at Rs. 144 and *Soorah* at Rs. 140.

Among other sections, *Burrakur* were noted at Rs. 155-8, *Muir Mills* at Rs. 80, *Steel Corporation* at Rs. 120, *Dalmia Cement* at Rs. 122-8, *Shree Gopal* at Rs. 119 and *Dunlop Rubber* Second preferences at Rs. 121.

Cotton shares have been uninteresting and quotations are a shade lower. *Cawnpore Textiles* were Rs. 8-4, *Dunbar* Rs. 238, *Kesoram* Rs. 7-13 and *New Victoria* Rs. 3-12.

Coal shares have been less in favour with *Amalgamated* at Rs. 95. *Bengal* were more or less steady at Rs. 361 while *Bhalgora* were Rs. 5, *Central Kurkend* Rs. 14-4, *East India* Rs. 16-4, *Raneegunge* Rs. 25-14, *Sendra* Rs. 12-10 and *West Jamuria* Rs. 29-2. *Burrakur* after being higher at Rs. 14-6 are slightly easier at Rs. 14. Among the speculative counters, *Samla* were Rs. 2-7, *South Karanpura* Rs. 4-10 and *Talcher* Rs. 1-11.

With the continued strength of the jute manufactures market jute shares have not been very much affected, *Howrah* being dealt in around Rs. 55-8. *Agarpara* were Rs. 30, *Adamjee* Rs. 26-4, *Clive* Rs. 26-5, *Hukumchand* Rs. 12-2, *Kamarhatty* Rs. 518, *Kankinarrah* Rs. 419-8, *National* Rs. 23-4, *Nuddea* Rs. 65 *Rameshwara* Rs. 7-9 and *Standard* Rs. 283.

In the Eningeering section, rather easy conditions have been noticeable. From Rs. 32-4 at the end of last week there has been a decline to Rs. 31-5 on Thursday. The quotation at the time of writing is little better at Rs. 31-7. *Steel Corporation* have been done as low as Rs. 18-8 on the publication of the report for the year ended December, 1940. There is some disappointment with the absence of any dividend on the ordinary shares. *Burn & Co.* also are lower at Rs. 418. *Arthur Butler* were Rs. 12-4, *Britannia Building and Iron* Rs. 11-2, *Britannia Engineering* Rs. 11-7, *Indian Standard Wagon* Rs. 67-8 and *National Iron and Steel* Rs. 9-5.

In the Sugar section, *Murree Brewery* and *New Savan* are higher at Rs. 15-13 and Rs. 11 respectively. *Dyer Meakin Breweries* were Rs. 10-5, *Ramnugger* Rs. 9-6 and *Samastipore Central* Rs. 9-2.

Greater interest has been shown in Tea shares on the quota increase to 100 per cent. *Bishnauth* were Rs. 26-10 ex-dividend, *Betjan* Rs. 30-4, *East India* Rs. 10-4, *Hasimara* Rs. 45-14, *Patrakola* Rs. 950, *Rungamattee* Rs. 281-8 and *Tezpore* Rs. 8-7.

In the miscellaneous section, *Burma Corporation* were Rs. 4-5, *Indian Copper Corporation* Rs. 2-1 and *Consolidated Tin* Rs. 2-1. *B.I. Corporation* were steady at Rs. 4-10 while *Dunlop Rubber* were higher at Rs. 42-4. *Indian Wood Products* were Rs. 27-12, *Borooah Timber* Rs. 15-8 and *Assam Saws* Rs. 3-13. *Calcutta Trams* were steady at the lower level of Rs. 17-12. Among Paper shares, *Bengal Paper* were Rs. 129, *India Paper Pulp* Rs. 151-8, *Mysore Paper* Rs. 15-14 and *Orient Paper* Rs. 14-5.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, August 21.

Money: Call money continued to be quoted at ¼ per cent.

Exchange Market: Banks were selling T.T. at 1s. 5 15-16d. and buying three months' bills at 1s. 6 7-32d.

Securities: Government securities were a dull market and prices ruled steady around the previous week's levels. 3½ per cent Paper closed at Rs. 96. Among other loans, 1948-52 Loan were done at Rs. 97-12; 1951-54 at Rs. 99-12; 1963-65 at Rs. 95-1. 1947-50 at Rs. 103-4; 1960-70 at Rs. 110-8; 1955-60 at Rs. 113-14; 1945-55 at Rs. 111-8 and 1946 *Defence Bonds* at Rs. 101-14.

Shares: Operators in the local share market continued to adopt a cautious attitude throughout the week under review in view of the confusing reports about the war situation and the confusing Japanese policy. They were inclined to unload their holdings with the result that prices opened easy on Monday and drifted downward on continued selling pressure following the news of the successful German advance towards Leningrad. Towards the close on Thursday, however, some support was forthcoming, and prices closed a shade higher.

Mills: Mill shares, after opening lower, improved towards the close of the week in sympathy with the rise in the raw commodity. *Bombay Dyeing* were the chief centre of attraction. The announcement by the Board of Directors of the Company to pay an adinterim dividend at the rate of Rs. 20 per share for the year ended 31-12-1941 took most operators by surprise and the shares spurted up at the close to Rs. 1,216-8. *Century* followed in the wake of *Dyeings* and moved up to Rs. 498-8. *Central India* were also higher at Rs. 359; *Colaba* at Rs. 205-8; *Gokak* at Rs. 238; *Kohinoor* at Rs. 476-8 and *Svadeshi* at Rs. 356. In the Cash list, *Vishnu* were quoting at Rs. 1,360; *Sholapoor* at Rs. 3,800 and *Ahmedabad Advance* at Rs. 331-4.

Hydro-electrics: *Andhra Valley* were steady at Rs. 1,717-8, while *Tata Power* were in good request at Rs. 1,722-8. *Tata Hydro* moved up to Rs. 198. *Bombay Trams* were more or less unchanged at Rs. 158.

Steels: Steel shares fluctuated within narrow limits. *Tata* ordinaries and deferreds, after opening at Rs. 400 and deferreds at Rs. 2,28-12 met with selling pressure in the absence of any encouraging foreign news and were marked down in mid-week at Rs. 391 and Rs. 2,105 respectively. The closing levels to-day are slightly better, the ordinaries being slightly better at Rs. 392-8 and the deferreds at Rs. 2,115.

Banks: *Central Bank* were done at Rs. 47-8; *Imperial Bank* fully paids at Rs. 1,573-12; contributories at Rs. 384-10; *Bank of India* at Rs. 142-4 and *Reserve Bank* at Rs. 110.

Miscellaneous: *Associated Cement* maintained their last week's level of Rs. 153-4. *Bombay Burma Trading*, after opening at Rs. 461-4, touched a low of Rs. 442-8, closing slightly better at Rs. 448-12. *Belapur Sugar* were a neglected counter at Rs. 277. *Scindia Steam* met with good buying, the closing price being Rs. 23-11. *Tata Chemical*, on the publication of a disappointing report, fell sharply to Rs. 13-8. *Shivrajpur Syndicate* were done at Rs. 31; *Premier Construction* at Rs. 105; *Indian Iron* at Rs. 31-10 and *Alcock Ashdown* at Rs. 575.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, August 21.

The local market continued steady during the week under report with prices showing little or no change. Planting issues were in good enquiry, while mill shares were steady.

Securities: Business in this section was on a small scale with occasional buying in 3½ per cent Paper at Rs. 96. 3 per cent 1963-65 came to business at Rs. 95-1. Among State Loans, 5 per cent *Cochin Loan* were on offer at Rs. 105-6, while 3½ per cent *Travancore Loan* were in request at Rs. 104-14. In Provincial Loans, 3 per cent 1952 *C. P.* came in for business at Rs. 99-2.

Mills: *Buckingham & Carnatic* were steady at Rs. 281, while *Madura* were slightly higher at Rs. 44-12. *Cambodia* were done at Rs. 10-14; *Coimbatore* at Rs. 66-8 *Radhakrishna* at Rs. 151-8. *Bangalore Woollen* were in demand at 275 c.d. following the declaration of higher dividend of Rs. 6¼ per share for the half-year ended 30th June, 1941 as against only Rs. 5 per share in the previous half-year.

Utilities: *South Madras Electric* ordinaries were in fair enquriy at Rs. 13-14, while *Cochin State Power* were placed at Rs. 8-14.

Plantations: This section has been active due to investors taking more interest in plantation shares. *Cochin Malabar* were done at Rs. 7-12 x.d; *Rajagiri* at Rs. 7-6; *Cottanad* at Rs. 7-2; *Be Be* at Rs. 7-5 c.d. and *Midland* at Rs. 6-13. Among Tea shares, *Chembra Peak* were in good demand and the price was marked as high as Rs. 4-12 on the expectation of a higher dividend for the current year. *Devashola* were done at Rs. 8-12 and *Peermade Tea* at Rs. 30-12. *Mlamallay* met with good enquiry following the declaration of a dividend of 10 per cent as against only 7½ per cent for the previous year.

Sugars: *Mysore Sugar* improved further on demand to Rs. 55-4. *India Sugar* changed hands at Rs. 10-8.

Banks: *Indo-Commercial Bank* 'C' shares came to business at Rs. 48-8. *Reserve* were done higher at Rs. 108.

Miscellaneous: *Mysore Chemicals* continued to be steady at Rs. 18-6. *Mysore Match* were done at Rs. 10-2 and *Mysore Tobacco* at Rs. 12. *Andhra Cement* met with some selling pressure, the closing price being slightly easier at Rs. 89-8. *Indian Steel Rolling Mills* ordinaries were better at Rs. 8 and *Singareni Collieries* at Rs. 11.

LONDON STOCK EXCHANGE

With the requisitioning of Canadian securities a definitely firmer fendency was noticeable on the London Stock Exchange in mid-week and there was good investment demand for giltedged securities, Home Rails, and industrials. 2½ per cent. Consols were 82, 3½ per cent. War Loan 105 3-16 and 3 per cent War Loan 101 7-16. 3½ per cent, Indian Sterling Paper were not very much changed at 98 5-8.

Among others, Rubber shares have been unaffected by the quota increase to 120 per cent. Tea shares have remained steady. Speculative Kaffirs have been marked higher on Cape support while among Oils, *Anglo-Iranian* are weak at 34s. 4d. on the developments in the Middle East. Home Rails have flared up on reports regarding the new agreement with the Government. *Great Western* ordinary were £40¾ against 37¼ at the end of last week, and *Southern Deferred* £14¾ against £12 7-8.

NEW YORK STOCK EXCHANGE

Wall Street has been slightly better with a larger volume of business passing. *U.S. Steel* were $57, *General Motors* $38 5/8 and *Anaconda Copper* $28 3-8.

MARKET POINTERS

Indian Jute Mills

In its latest review of the situation, the Indian Jute Mill Association has decided that unless exceptional circumstances arise, mills in the membership of the Association will work not less than 45 hours per week, and there will be no closed week from now on until the end of the year.

The Note observes that stocks have steadily increased until at the present moment they are about 57,500,000 yards of hessians and almost 35,000,000 yards of sacking greater than at the beginning of the year. These figures exclude stocks on Government account.

It would obviously be wrong in the present uncertainties in shipping and in the international situation generally, to increase production still further when there are not the facilities available for shipment of the goods already produced, when stocks are steadily increasing and mills stroage capacity is fully occupied.

* * *

Customs Revenue

According to returns received in the Department of Commercial Intelligence and Statictics, the total gross Indian Sea Customs Revenue including Land Customs but excluding Salt Revenue, collected in British India during the month of July 1941, amounted to Rs. 414 lakhs as compared with Rs. 391 lakhs in June, 1941, and Rs. 314 lakhs in July, 1940.

The total gross central excise duties on motor spirit, kerosene, sugar, matches etc., amounted to Rs. 97 lakhs in July 1941, as compared with Rs. 84 lakhs in June, 1941, and Rs. 59 lakhs in July 1940.

The grand total of gross Customs and Central Excise Revenues, realised in the four months ended July, 1941 was Rs. 18,90 lakhs as compared with Rs. 16,29 lakhs during the same period last year.

* * *

Supply of Cotton Goods

The best measures of securing an assured flow of supplies as and when required by the Government will be discussed at a meeting of cotton interests in the country, proposed by the Hon. Commerce and Supply members of the Government of India to be held in Bombay on September 8.

The meeting will also discuss problems arising out of the present trend of prices of cotton yarn and piecegoods.

The various Millowners Associations in the provinces have been invited to send their delegations to the meeting.

Rise in Madras Yarn

Speculation in the yarn market is stated to have resulted in an abnormal rise in the prices of yarn. Reports received by Government show that yarn prices have increased by about 50 per cent. in Coimbatore and 30 to 50 per cent. in Madura.

Government, it is understood, are in correspondence with the Government of India on the question of measures to be taken to check speculation among dealers, and it is likely that a conference of the interests concerned will be convened by Government as soon as they hear from the Government of India.

* * *

Match Prices Normal

The retail rate for match boxes, which had suddenly gone up by 50 per cent, a few days ago, has again come down to the normal level in Bombay and match boxes containing 40 sticks are now being sold at three pice for two boxes.

The fall in prices is attributed to the decision of the Western India Match Co., Ltd., the leading manufacturers of matches, to sell match boxes freely to the retailers. With a view to ensuring the normal rate for match boxes, arrangements have also been made for the sale of match boxes at all the Government grain shops in the city.

AGRA ELECTRIC SUPPLY COMPANY, LTD.

NOTICE.

NOTICE is hereby given that the Thirty-second Ordinary General Meeting of the above-named Company will be held at the Registered Office, No. 12, Mission Row, Calcutta on Tuesday, the 9th September, 1941 at 11-0 a.m., for the purpose of receiving and considering the Directors' Report, the Statement of Accounts and Balance Sheet for the Half-year ended 31st March, 1941, and to transact any ordinary business of the Company.

THE AHMEDABAD-PRANTEJ RLY. CO., LTD.

NOTICE.

NOTICE is hereby given that an Ad-interim dividend for the half-year ended 30th June 1941 at the rate of 9% per annum less Income Tax, has been made payable at the Chartered Bank of India, Australia & China, Bombay, on and after the 12th September 1941 to those Shareholders whose names stand on the Company's Register on the 23rd August, 1941 to whom Dividend warrants will be posted.

Intimation of any change of address should be given to the undersigned immediately.

The Transfer Books of the Company will be closed from Monday, the 25th August 1941 to Monday, the 8th September 1941, both days inclusive.

By Order of the Board,
KILLICK, NIXON & CO.,
Agents.

Home Street Fort,
Bombay, 13th August 1941.

COMPANY REPORTS

STEEL CORPORATION OF BENGAL, LIMITED

Audited Accounts for the year ended 31st December, 1940:—

Shareholders will remember that up to 1st January, 1947, the holders of the one million pounds 4½ per cent Mortgage Debentures possess the right to convert their debentures into fully paid Ordinary shares of the Corporation at the rate of 40 Ordinary shares for each £50 Debenture. During the year 1940 debentures of the face value of £377,950 were so converted into 3,02,360 Ordinary shares of Rs. 10 each.

Due to this conversation the Issued and Subscribed Share Capital of the Corporation is increased from Rs. 3,69,91,600 to Rs. 4,00,16,325, while the Debenture liability has decreased from Rs. 1,33,33,333-5-4 to Rs. 82,94,000.

The conversion of Debentures into Ordinary Share Capital has resulted in a surplus on conversion reserve of Rs. 20,15,733-5-4 part of which has been utilised in writing off the excess of expenditure over receipts as shown in the accounts up to 31st December, 1939.

For the year under review the gross profits amounted to Rs. 29,56,245-8-2. During the year interest was paid out of Capital at the rate of 4 per cent per annum on the Corporation's Preference Shares up to 31st May, 1940. Subsequent to this date payment of interest is chargeable to Revenue and the Directors accorded sanction for payment of interest at the rate of 5 per cent per annum on the Preference Capital for the half-year ended 30th November, 1940. After making provision for Debenture and Preference interest, depreciation and other appropriations, and all charges for the year there is available a sum of Rs. 3,77,655-15-2 which sum the Directors recommend be carried forward.

The presentation of this report has been unduly delayed for reasons connected with the war and beyond the control of the Directors. While uncertainties and delays in communications with England have hindered an early compilation of accounts, the Articles of Association of the Corporation make it obligatory that these annual accounts should be published simultaneously in India and the United Kingdom. So, while this report is being written in early June, its publication will not be possible until London is ready to issue the same to the shareholders on the London Register.

The final construction stages of the Corporation's Works, as originally planned, were completed during the year.

The first furnace commenced operation in November, 1939. The second furnace was tapped in the early part of 1940 and the third furnace a little later. With the mixer operating satisfactorily, the working conditions of the furnaces have improved considerably. The preliminary difficulties experienced with the dolomite plant and the use of gases were gradually lessened, but it became necessary to extend the producer gas plant.

There were no serious operational dislocations of work. During the year there were no off-casts made and all the steel made was rolled into saleable products. As the year progressed, improved conditions were reflected in lower refractory costs and lower coal and dolomite consumption.

The 40" Mill rolled the first ingot on 14th November, 1939. It worked on one shift until the beginning of March, 1940, when with increased ingot production a second shift was brought in. The Mill has been working satisfactorily and the amount of time lost due to mechanical and electrical troubles was remarkably low.

The year started with one shift in operation on the 34" Mill which continued till March. Despite the initial starting troubles, operation has been satisfactory and mechanical and electrical delays very low.

The 18" Mill, soon after the year commenced, was engaged on 2-shift working. The equipment has given very little trouble and the operation progress was very satisfactory during the year. New sections were incorporated in the rolling and joists, channels, angles, rounds, squares, billets and flats were rolled.

As the conditions created by the war emphasised the need for a larger output of heavier sections, the Government of India expressly requested the Company to carry out an extension of the finishing bays of the rolling mills which it had planned to execute 3 or 4 years hence. The directors requested to arrange for the production of special quality of steel required by the Ordnance factories. Accordingly, they commenced work on these extensions which, it is expected, will be completed during 1941.

At the commencement of the year the Sheet Mills were less forward in construction in comparison with the rest of the plant. Black sheets were rolled in the first montr of the year and the annealing furnaces were started immediately afterwards. With these operations satisfactorily launched, the galvanising units were started and the manufacture of corrugated sheets undertaken. The roughing and finishing mills by the close of the year were in a position to operate to full capacity.

The coke oven and the blast furnace gas holders went into commission and helped to give better gas control in the melting shop as well as in the mill reheating furnaces.

During the year arrangements were made for new sidings to link up with the East Indian Railway for despatch of finished products.

Operation.—Labour troubles at the Hirapur Works of the *Indian Iron & Steel Co., Ltd.*, in October, 1940 interfered with the operations at the Napuria Works for a short time. Measures have been taken to minimise the consequences of a similar occurrence in the future.

The Directors are precluded from publishing any production figures, but they desire to express their extreme satisfaction with the progress achieved by all the departments during this year. It is expected that during 1941 the Corporation's Works will have reached the normal capacity production rating for which the Works were originally planned.

Operations at Napuria commenced at the time when work, both in the United Kingdom and America, was plentiful and skilled operators were difficult to obtain.

Sales.—The Works are almost entirely engaged in the production of material for war supplies. Owing to the acute shortage of steel all over the Empire, a system of priorities has been functioning in regard to supplies and the Managing Agents have been giving their utmost co-operation in this respect. A number of the Sales Staff, including the Manager, have been on deputation with the office of the Adviser on Steel Supplies and have been instructed to render all possible assistance.

Managing Agents.—Messrs. Burn & Co.

Authorised Capital—Rs. 10,00,00,0 00 in 80,00,000 Ordy. of Rs. 10 and 2,00,000 5% Cum. Pref. of Rs. 100 each. Issued—Rs. 4,00,23,600 in 28,02,360 Ordy. and 1,20,000 Pref. Subscribed—Rs. 4,00,13,900 in 28,01,850 Ordy. and 1,19,954 Pref., both fully paid up. Debenture Capital Rs. 82,94,000. These debentures may be converted at any time upto 1-1-1947 into Ordinary Shares at the rate of 40 Shares of Rs. 10 each, fully paid for each £50 Debenture.

Synopsis of the Balance Sheet as at 31st December, 1940:—

Liabilities:—	Rs.	Assets:—	Rs.

(Annual Meeting 27th August, 1941 at 4-30 p.m. at Bombay)

Audited accounts for the year ended 31st March, 1941:—

	Rs.	As.	P.
The Company has made a profit during the year of ..	4,34,450	0	0
to which must be added:—			
Amount brought forward from last year's account ..	9,988	0	0
making a total of	4,44,438	0	0
Out of this, the Directors have decided to make the following appropriations:			
For writing off the balance of the Sewri Mill Deferred Revenue Expenditure	24,000	0	0
For writing off tank foundations etc., at Tatapuram on transfer of two 400—ton tanks to Sewri ..	9,764	0	0
For transfer to the Workmen's Compensation Fund ..	4,071	0	0
For transfer to the Employees' Gratuity Fund ..	5,000	0	0
For transfer to Provision for Bad & Doubtful Debts	2,500	0	0
For transfer to Depreciation Fund	2,10,000	0	0
leaving a balance of	1,89,103	0	0
which the Directors' recommend be disposed of as follows:—			
A dividend at the rate of Rs. 1/- per share free of Income-tax, on 1,79,741 Old Issue Shares ..	1,79,741	0	0
A dividend at the rate of As. 2½ per share, free of Income-tax, on 40,765 New Issue Shares ..	6,370	0	0
Balance to be carried forward	2,992	0	0
Total ..	1,89,103	0	0

The improvement in the Company's position has enabled the Directors to provide Rs. 2.10 lakhs for Depreciation this year, but in view of the fact that the Company's plant and machinery are now over 20 years old, this provision is still inadequate. In addition to this sum, a further sum of Rs. 1,666/- representing amount received on remission of forfeiture of Further Issue Shares during the year has also been transferred to the Depreciation Fund, which now stands at Rs. 8,36,666/-.

The Managing Agents have foregone the minimum commission of Rs. 50,000/- and have only charged 10% on the net profits of the Company, after providing for Depreciation on buildings, machinery and other assets.

The loan of Rs. 10 lakhs, which the Managing Agents had advanced to the Company for the erection of the Sewri Mills, was repaid last February, and a fresh Loan was taken from the Bank of Baroda, Limited. This repayment of the loan to the Managing Agents releases the charge on the Sewri Mills.

Operations.—The result of the year's working shows improvement over that of last year, and it may be taken as satisfactory looking to the fact that the Company had to pay during the year.

(*a*) nearly Rs. 56,000/- as against Rs. 14,000/- last year by way of Dearness Allowance to its Labour and other lower-salaried employees, and

(*b*) an increase of about Rs. 60,000/- in steamer and Railway freights due to increase in their rates.

The Crushing Mills at Sewri and Tatapuram were able to crush a little over 23,000 tons of copra, groundnut, mowra, etc., which was about the same as in the previous year. The position regarding the sale of groundnut and mowra cakes further deteriorated due to the total loss of European markets, and these cakes had to be sold in India at very low rates. The market prices of the Company's finished products remained more or less stationary throughout the year, whilst the prices of glycerine had actually to be reduced in order to bring them into parity with the prices quoted by competitors. The sales of laundry and toilet soaps, hydrogenated and refined oils, minor products and glycerine showed a satisfactory progress during the year. The quantitative increase in toilet soap was as much as 30% and the toilet soap plant was worked to full capacity throughout the year. Owing to the increasing sales of vegetable product, the Directors have decided to extend this plant and have placed orders in England for further equipment, which when received, will increase the Company's output by about 50%. The minor products are continuing to enjoy a reputation for their quality and are commanding a wider market. The Company was successful in obtaining orders from Government both for soaps and glycerine.

Share Capital.—As resolved at the Extraordinary General Meeting of the Company held on 24-9-40, 40,842 shares of Rs. 25/- each were offered to the Company's shareholders on terms and conditions approved of at the said meeting. The New Shares were considerably over subscribed and the allotment was made on a *pro-rata* basis. 40,765 Shares were allotted up to 31-3-41, leaving a balance of 77 shares which have since been allotted. According to the terms of issue the New Shares rank for dividend from 1st January, 1941, which explains the recommendation of a dividend of 2¼ annas per New Shares in this Report.

The Directors were reluctantly compelled, during the year, to exercise the Company's lien on 1,318 Old Issue Shares in accordance with Articles 31 and 32 of the Company's Articles of Association. A sum of Rs. 53,062/- has been realised by the sale of these shares.

Managing Agents.—Messrs. Tata Sons, Limited.

Authorised Capital—Rs. 75,00,000 in 3,00,000 Shares of Rs. 25 each. Issued—Rs. 55,98,075 in 2,23,923 Shares. Subscribed—Rs. 51,04,310 in 2,20,506 Shares, fully paid up.

Synopsis of the Balance Sheet as at 31st March, 1941:—

Liabilities	Rs.	Assets	Rs.
Capital paid up ..	52,36,570*	Fixed Capital Expenditure ..	55,32,226

* On the 1st July, 1940 the Preference Shares of the Company were converted into Ordinary Shares in accordance with resolutions previously passed at a special meeting.
† Includes Rs. 50,000 transferred from Reserve Fund.

(Half-yearly meeting 1st September, 1941 at 3-10 p.m.)

Audited accounts for the half-year ended 30th June, 1941:—

	Rs.	As.	P.
After writing off for Depreciation Rs. 50,000 the accounts show a profit of	4,51,131	2	2
To which has to be added the balance brought forward from the last account, namely ..	12,438	10	6
giving a total of	4,63,569	12	8
From this is deducted the amount set aside as a Reserve for all Taxattion	3,00,000	0	0
leaving a balance for disposal of	1,63,569	12	8

	Rs.	As.	P.
The Directors that this should be dealt with as follows:—			
To paying a dividend on the Share Capital of the Company @ Rs. 8/- per share (i.e. 16% per annum, free of Income Tax	1,52,000	0	0
To carry forward	11,569	12	8
Total ..	1,63,569	12	8

The improvement in trading conditions on which the directors commented in the last report has continued throughout the period under review. After a steady spell at comparatively low lovels the price of raw cotton registered a sustained advance in consequence of the increased consumption by Indian mills, but since the close of the half-year there has been some reaction owing to the abrogation of the Indo-Japanese Trade Agreement. With regard to goods the dealers in both cloth and yarn, encouraged by a satisfactory volume of demand from the upcountry consuming centres, have bought freely from mills in order to maintain their stocks, whilst enquiry from Eastern and Colonial overseas markets has shown considerable expansion.

Prospects for the immediate future may be regarded as favourable.

Managing Agents.—Messrs. Kettlewell Bullen & Co., Ltd.

Authorised, issued and Subscribed Capital—Rs. 19,00,000 in 19,000 Shares of Rs. 100 each, fully paid up.

** Less income-tax*

(Half-yearly Meeting 27th August, 1941, at 10-45 a.m.)

Audited accounts for the half-year ended 31st March, 1941:—

Gross Earnings.—Gross Earnings for the half-year were Rs. 2,19,067 which is Rs. 7,507 more than the earnings of the corresponding period ended 31st March, 1940. There is an increase of Rs. 17,564 or 13.46% under Coaching and a decrease of Rs. 10,437 or 13.03% under Goods. The increase in Coaching is due to carriage of less ballast for the District Board.

Working Expenses.—The Working Expenses for the half-year were Rs. 1,17,022 *plus* Rs. 25,000 set aside to Renewal Reserve, making a total of Rs. 1,42,022, which is Rs. 18,904 more than the figure for the corresponding period 31st March, 1940.

Net Earnings.—The Net Earnings for the half-year were Rs. 77,045, a decrease on the figure for tre corresponding period ended 31st March, 1940, of Rs. 11,397.

Available Balance.—The balance available for distribution is:—

	Rs.
Net profit for the half-year	37,366
Balance brought forward	22,963
	60,329

Dividend.—The Directors recommend that the available balance be disposed as follows:—

Payment of a dividend for the half-year ended 31st March, 1941 at the rate of 4% p.a., less Income-Tax costing ..	34,347
Balance to be carried forward	25,982
	60,329

Managing Agents.—Messrs. Martin & Co.

Authorised Capital—Rs. 22,00,000 in 22,000 Shares of Rs. 100 each. Issued and Subscribed—Rs. 21,69,300 in 21,693 Shares fully paid up.

Synopsis of the Balance Sheet as at 31st March, 1941:—

IS IT NOT WISE TO INSURE NOW?

With an uncertain future ahead Conservation and Consolidation of resources are the prime needs every individual should assiduously strive after.

If you already have Life Insurance, hold on to it. Don't allow it to lapse. If you haven't go in for it right now. A Life Policy gives an inestimable protection and it will cost you less now than later. It is cent per cent true that to be forewarned is to be forearmed.

Write to us for further particulars or advice.

EAST INDIAN RAILWAY

DOORGA POOJAH HOLIDAY CONCESSIONS

Holiday Concession Return Journey Tickets in all classes will be issued over the East Indian Railway from 11th September to 16th October 1941 both days inclusive for distance 101 miles and over at ONE and ONE THIRD single journey fares in the case of 1st, 2nd and Inter Class and ONE and ONE HALF single journey fares in the case of THIRD CLASS.

Similar concession fares will apply over the Hardwar Dehra Railway Section on the combined distances over the E. I. and H. D. Railways.

Return journeys on these concession tickets must be completed within 45 days from the midnight of the date of issue but not later than midnight of 17th November 1941.

Inter and Third class concessions are subject, as usual, to restrictions on travel by certain trains.

Break journey on these tickets will be allowed at any intermediate station for as long a period as desired provided no part of the line is travelled over more than once in the same direction, and the return journey is completed within the prescribed period. Break of journey on return trips will, however, not be allowed at stations distant 30 miles or less from stations of issue of such tickets.

MOTOR CAR CONCESSIONS

Return tickets at single journey rates for distances in excess of 100 miles in local booking only will be issued for the same period between stations where loading and unloading facilities exist, provided the same car as is despatched on the outward journey is booked on the return journey.

Motor Car Return journey tickets will be available for BOOKING OF CARS on the return journey up to midnight of 17th November 1941.

REFUND ON UNUSED TICKETS

No refunds will be made on unused halves of either passenger or motor car concession tickets.

NO SHARE HOLDERS

The NORWICH UNION LIFE INSURANCE SOCIETY is a Mutual Company and there are no shareholders to absorb any of the profits accruing to the business. ALL profits that are made are returned to the With Profits policy-holders, and the Society is run for their benefit. It is one of the very few Mutual Societies transacting business in India and is in a position to offer the very finest Life Insurance contracts at competitive rates of premium. Having been founded in 1808 the Society absorbed the Amicable Society in 1866 and thus can claim to be the OLDEST LIFE INSURANCE OFFICE in the World. The Society is represented in India by

WORLD OF INDIAN FINANCE

Friday Evening.

SHORT credits have been in super-abundant supply. Interbank call money continues to be nominally quoted at ¼ percent in Bombay, ½ percent in Calcutta and ¾ percent in Madras. Madras would appear to be the first centre to wake up to the fiction and farce of the quotation for interbank call money; and there are reports that banks in the Southern capital might be effecting a change from the quotation of the interbank call money rate. There have been five Treasury Bill tender days in the course of August; and the offer of tender bills was Rs. 1 crore on every one of the tender days. That is to say, fresh bills due during August secured for the Government Rs. 5 crores. Against which the Government must have have paid out Rs. 14.66 crores in respect of Treasury Bill maturities. On balance, the net outflow from the coffers of the Central Government is slightly over Rs. 9½ crores. As was to be expected, this has had the effect of making a heavy inroad into the deposits maintained by the Central Treasury with the Reserve Bank. These deposits stood at Rs. 18.81 crores on August1; by August 22, they have declined to Rs. 5.59 crores. The shrinkage in Government deposits is thus Rs. 13¼ crores. It is quite possible that the Reserve Bank returns for the banking department as on August 29, will disclose further deterioration in the cash balances of the Central Government, necessitating possibly recourse to a ways and means advance from the Reserve Bank. Besides, the increased offer of tender Treasury Bills will make funds available to the Government only on September 5. That is to say, while the bank returns which will be issued next week, will show a low cash balance for the Central Government, and, perhaps, also a ways and means advance, the Government will have, in such a depleted condition, to provide for the usual month-early disbursements at the beginning of September. We should, therefore, infer that the Government may have to be borrowing as much as Rs. 5 crores from the Reserve Bank on ways and means account for the first three or four days of September. A portion of this indebtedness would be reduced by September 5, from the proceeds of the Treasury Bills sold next week.

On August 25, the offer of tender Treasury Bills was Rs. 1 crore; and applications came to Rs. 1.89 crores. The average rate of accepted tenders registered a further decline to annas 6 percent per annum as compared with annas 6 and pies 11 percent on August 19. In view of the low state of Government's cash, the offer of tender bills for September 2, has been increased to Rs. 2 crores. Successful tenderers should make payment on Friday September 5, 1941, or on Wednesday 3, where Friday is a holiday.

September 3.

The Treasury Bill transactions during August bear ample testimony to the extremely smooth functioning of the ways and means machinery of the Central Government. The Government have been able to meet heavy Treasury Bill maturities with weekly sales of fresh bills restricted to Rs. 1 crore. What is more, the large sterling payment received towards the end of July in respect of inter-governmental transactions, was utilised for strengthening the holdings of sterling securities in the issue department of the Reserve Bank, and correspondingly reducing the *ad hoc* rupee securities in the reserves. But for the exceptional affluence of the Central Government, sterling receipts from the British Government would have been pressed into service for strengthening the cash position. As, during the past five months, the Reserve Bank returns have disclosed that the settlement of transactions between the Indian Government and the British Government is being effected either at the end of the month or early in the following month, it is quite likely that another of such heavy payments falls due in a day or two. If this turns out to be the case, it might not be necessary for the Government to have recourse to ways and means advances. In fact, it is quite possible that, thanks to large sterling receipts, the next return or the one after that of the Reserve Bank for the banking department shows a sharp recovery in the cash balances of the Central Government.

In the banking department of the Reserve Bank Central Treasury deposits have gone down from Rs. 10.46 crores to Rs. 5.59 crores; while those of the Burma Government have risen from Rs. 2.64 crores to Rs. 2.95 crores and those of other governments from

TREASURY BILLS

India

Tenders for Rs. 1 crore of three months' Government of India Treasury Bills were opened on Monday August 25, 1941. Total amount offered was Rs. 1 crore and 89 lakhs. Tenders at Rs. 99-14-6 per cent were allotted approximately 76 per cent. Lower tenders were rejected. Total amount accepted was Rs. 1 crore, the average rate of accepted tenders being annas six per cent per annum.

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills will be received on Tuesday, September 2, 1941. Successful tenderers should make payment on Friday, September 5, 1941, or on Wednesday, September 3, 1941, where Friday is a holiday. Others conditions are as usual

During the week ended August 22, 1941. Government of India Treasury Bills for Rs. 2,58,00,000 were sold in favour of the India.

Bengal

Tenders for Rs. 1 crore of three months' Government of Bengal Treasury Bills will be received at the offices of the Reserve Bank of India at Calcutta and Bombay up to 1 p.m. ndard time), on Monday September 1, 1941. Successful tenderers will be required to make payment and take up their bills on Wednesday, September 3, 1941.

Friday morning.

A NEW agreement made by Japan with Thailand appears to be the biggest event of the week. The absence of any change in rates with sterling in New York anchored to the old rate of 4.03¼ suggests that Japan's anxiety to sell gold and retain a link through the baht with sterling is about the most impressive evidence available of the new position of sterling. The Atlantic charter like the forging of a fresh link between the currency of Syria and that of Palestine indicated that sterling was again the international currency. That Japan has been forced to take a loan of a sum equal to £2¼ million, in exchange for gold not a promise to pay, shows that foreign exchange is more than ever precious for trading nations. The reported agreement between the Yokohama Specie Bank and the Thai Ministry of Finance was negotiated by a special emissary sent to Bangkok and the agreement corresponds to that concluded previously when a Thai banking Syndicate agreed to lend 10 million bahts to Japan. It is evident that recent attempts to add to the stock of Thai currency are a consequence of big purchases of raw materials by Japan. While nothing has been said about the rumours of ultimatums for putting Thailand into the co-prosperity sphere, the agreement suggests that Bangkok is not fiercely anti-Japanese and the Japanese, now strongly entrenched in Indo-China, may try to use the new financial agreement as the thin end of their wedge. Thailand is expected to make available under the agreement the price of newly mined gold to be sold by Japan, the price being calculated in yen on the basis of the baht-sterling exchange and the New York price of gold.

It should not, however, be overlooked that additional gold would be welcome backing for the baht which if it is quite steady in the exchanges has certainly depreciated after the outbreak of the war. One must resist the temptation to read too much into the reports of an agreement which has been arranged for the sake of Japan to get at a little more sterling than is available under the restricted payments agreement made after the enforcement of the freezing order. There appears to be no change in the London quotation for the yen still standing at 14d but that is of little importance now. Reports that Japan threatened the existence of Shanghai by enforcing a blockade have been strenuously denied and the Japanese have applied soft soap in the special message from Prince Konoye to Washington after tame acceptance of the refusal to consider any *modus vivendi*. It is evident that Japan's new-found consideration for the maintenance of foreign interests and connections at Shanghai augurs for the Shanghai exchange which has regained further poise after Anglo-American assurances concerning the maintenance of the new life line from Kunming. The provision of fresh money for the Stabilisation Fund is now taken as certain and the Chinese dollar is now well over 3⅛d though Indian centres do not quote the equivalent. It is quite likely that further recovery will help China, more as the Burma Road is to be improved for the sake of increasing China's exports by land. Britain has issued fresh orders for curtailing exports to Japan. The licensing of exports to China is one way of preventing goods reaching Japanese occupied territory. This order is as important as the virtual prohibition of crab meat imports by the U.S.A.

A recent Colombo message described the transfer of a part of Ceylon's currency reserve to the Reserve Bank of India. The new currency ordinance maintains the link between the Ceylon rupee and the Indian rupee. Ceylon is on the exchange standard and the link with the rupee is not less important than that with sterling. The history of the Ceylon currency has been quite recently made the subject of a special study by Mr. B. R. Shenoy (Longmans 1941) and his view that Ceylon must keep in touch with India which in the past provided silver coin or sterling exchange wanted has been evidently accepted. It is only in the unlikely event of a devaluation of the Indian rupee that Ceylon will be forced to evolve independent arrangements. The transfer of the metallic reserve by the Ceylon Currency Commission will be followed by the transfer of other assets. Ceylon expects to buy securities and obtain income from the currency reserve. It may be mentioned in passing that the cover for the Island's note issue has always been ample and the British rupee is a far stronger currency than the rix-dollar introduced by the Dutch. The currency reserve is located in India for another reason. Ceylon sends most of her exports to Britain and obtains the greater part of her imports from India. That is to say she needs rupees more than sterling for her trade and can even hope to sell sterling to India directly on occasions. The transfer of the reserve from Ceylon will facilitate exchange operations. Rupee credits and debits in favour of the Currency Commission will be directly carried out by the Reserve Bank which now orders the currency and exchange of Burma under a special agreement.

A further fall in the volume of applications for Treasury Bills has been taken to mean that increased buying of 2½ per cent. Defence Bonds had reduced the supply of funds. The retention of the Treasury deposit note system however ensures an ample supply of funds from the clearing Banks particularly as no deposits are to be taken this week. Yet the weekly cable about the money market is of very little interest nowadays, as the rate for three months' Treasury bills is virtually unchanged for long periods and Dominions and colonies, engaged in reducing their external debt, are not likely to show much interest in Treasury Bill offerings for some time which again explains why the market's quota occasionally records very sharp increases.

There has been little or no news from the U.S.A. except that the Administration and the currency authorities are decided on checking instalment selling of specified articles. The worry there is still about checking consumption and stimulating savings. It is believed that the first three months produced no adequate response to the offerings of defence bonds. That they should be bought out of current income, not through conversion of other investments is admitted by the anxiety of the Administration which however has to consider labour trouble and the exigent demands of the lease and lend programme. That the U. S. Treasury is very well placed in regard to the capital market has been proved by the success of the 2½ per cent 15-17 year bonds issued in May. Total subscriptions in a day produced 8,268 million dollars for a total of 600 millions wanted and allotment was on the basis of 8 per cent. The bonds rose immediately to a premium of 2½ points and the issue was more profitable to the Treasury than the tax free of 2¾ per cent. Bonds sold in December 1938. Similar success attended the conversion of 3¼ per cent bonds for 834 million dollars maturing in August. The holders were told that they could take the new 2½ per cent Bonds or else ¾ of 1 per cent Treasury notes maturing in March 1943. About 788 million dollars of the maturing issue was exchanged for the 2½ per cent Bonds and 1 million was put up for the notes. The Treasury does note the unusual plenitude of money or the easiness of getting loans. The higher taxation in force from July is a remedy against the dangers of unduly cheap money because it is known that people with treasury bonds will borrow money on the security of such bonds and keep on spending on the same scale as before.

After many months speculations has revived concerning the gold reserves belonging to France. The *Financial News* of London asked questions last week about the location of the gold. The first weekly statement published after the full liquidation of the Third Republic with Petain as a full Fuehrer disclosed that gold held by the Bank of France amounted to 84½ milliard francs. The total was almost the same as that published in May last but the question is how much of it is in Occupied territory and how much abroad. It is known that Martinique houses the aircraft carrier *Bearn* and some part of the gold. Some gold has been frozen as part of the assets held in the U.S.A. and the West Indian colonies got back a little owing to petitions and protests. It has been noted that a considerable part of the gold reserve was sent out to Dakar and the stories of Nazi infiltration in North and West Africa seem to suggest that one of the Nazi objectives is the gold at Dakar.

More Sandbag Orders

Two new orders for sandbags have been placed with the Indian Jute Mills Association this week. The first order for 4.7 crores sandbags is on account of the India, while the second for 15 crores sandbags is on behalf of the British Government. The sandbags intended for the Government of India are to be delivered in the last three months of the current year while those for the British Government are to be spread over one year beginning from October next in equal monthly instalments. The market was, for some time, full of rumours of impending new orders; but no one expected that it would be for such a large quantity. These are the biggest orders for over one year, in fact, from November 1939, when the biggest order of the war period for 50 crores sandbags was placed.

The placing of the large orders is heartening confirmation that sandbags are still very useful for defence purposes and as affording protection against air raids. One significant point about the requirements for His Majesty's Government is that the bags have to be rot-proofed, which process increases the life of the bag twenty to thirty times.

It will be remembered that, soon after the outbreak of the war, there was a flood of orders for sandbags. The demand for ordinary consumption also tended to increase so that it was expected that the production of mills would be restricted only by the availability of jute. And as the orders were received in the middle of the season 1939-40, it was even wondered whether supplies of the crop would last till the new crop of 1940-41 season became available. Prices for both jute and jute manufactures rose sharply, and by December 1939, the highest levels for the war period were touched. 9 porters ready were marked as high as Rs. 26-8, while jute in the futures market was as high as Rs. 126-8. Mills' working hours had to be increased to 60 per week. It was only in the last week of January 1940, that hopes regarding a perennial flow of war orders were shattered. It was announced that the deliveries of sandbags were to be extended over another six months. The fears of a large new crop and shipping difficulties brought down prices both for jute and jute manufactures. It was found necessary to reduce the number of working hours to 54 per week from 60 per week as from April 8, 1940. After the completion of the order for sandbags, mills began working 45 hours per week from August 17, 1940.

The fall of France and the closing of Continental markets aggravated the difficulties of the industry. With plentiful supplies of jute and accumulating stocks of goods with mills, it was impossible to prevent a collapse of the price structure.

The lowest levels for the war period were touched in September 1940, when Jute Firsts 2/3 were done at Rs. 30 per bale and 9 porters ready at Rs. 8-10. Production had to be curtailed further. Mills closed down for one week from September 1940 to February this year. The Government's declaration to restrict sowings for 1940-41 and the minimum price agreement between the Indian Jute Mills Assiciation and the Bengal Government saved the trade and the ryot from ruin. For fully two months mills did not transact business and, in the abrupt rise witnessed earlier this year, it was the bazar operators that benefited to a great extent.

From the beginning of this year, production has been strictly regulated to demand in relation to the shipping position. There is good demand for jute products and many an offer has had to be turned down on account of the difficulty in ensuring delivery. Bazar speculators have taken the initiative in recent months; and their activity has brought about a rapid rise in prices. In relation to the quotation for the raw material, prices for jute manufactures should be considered certainly high and out of all relation to the existing conditions in the industry. The policy of the Indian Jute Mills Association could be justifiably criticised only if it were made sure that the existing demand in relation to the shipping position was in excess of production and that the mills were guided by a policy of profiteering. Another reason put forward is that mills are afraid of buying jute at higher levels which is inevitable if there were to be an increase in production. The restricted supplies of the crop will naturally bring a higher return to the ryot who has learnt very well to dispose of his holdings in regulated quantities, thanks to the propaganda conducted by the Bengal Government. Mills will most certainly be obliged to pay a much higher price for jute if there was a rush for buying; but, having regard to the ample stocks of the raw material in mill godowns, this cannot be exactly the motive by which the Committee of the Indian Jute Mills Association is guided. They are properly anxious that the good work of the last twelve months should not be undone.

The lessons of the earlier months of the war period have not been lost on them. Operators in their greed took up prices to giddy heights; and, when the time for deliveries came, they were saddled with stocks bought at higher prices. Mills had to oblige bazar operators by extending deliveries or affording financial help. The prices for jute manufactures could be brought down by an increase in production; but, without a guaranteed outlet for the products, it will prove to be a solution that will create more problems than it solves. The evils that have befallen the industry have been mainly on account of bazar speculation. That points to the need for a reform of the futures market. *Indian Finance* has always been in favour of the existence of futures markets as affording a hedge to the ryots and manufacturers; but they must be reformed so as to function on proper lines.

Speaking at the special meeting of the members of the Indian Jute Mills Association to pass the resolution regarding the increase in working hours Mr. W. A. M. Walker, the Chairman, defended the Committee's policy thus:—

> "I would remind those members who advocate drastic increases in working hours, which without a corresponding offtake, would merely mean piling up stocks, that most mill godowns are already full to overflowing. Government urged us to buy a great deal more jute than we were using and most of us did so. In addition to this, we are carrying large stocks of sandbags in the storing of which the Government made very exacting conditions requiring more than normal space. We should therefore soon be faced with the question of reducing our overwhelming stocks and this would mean a drastic curtailment of working hours, playing into the hands of speculators and running the grave risk of labour troubles. I cannot emphasise too strongly the danger of troubles in the last named direction. Our policy all along has taken particular care of the labour situation and in all our considerations and recommendations, this factor has weighed heavily with your Committee."

Viewed against this background, the decision of the Committee of the Indian Jute Mills Association to increase the number of working hours to 50 per week from 45 per week from the beginning of next month can be properly appreciated. The deliveries under the new orders have to be made only from October. Mills begin working increased hours from the beginning of September. The shipping position is being watched; and, if it were found necessary, working hours will be increased without any hesitation.

U. S. Shipping in Wartime

More than ever it has been demonstrated during this war that transport dominates production and trade. If the R.A.F.'s systematic bombing of railway junctions and yards in Germany has sought to create an unusual bottleneck, it has been shown that presence or lack of shipping space is always a vital market factor. The delay and disruptions incident to wartime are magnified by the fluctuations in prices, and hessian prices in Calcutta, for instance, are at the mercy of reports relating to the availability of freight space. It is, therefore, natural to ask whether all the satisfying conclusions drawn from the failure of submarine warfare and the indications of U.S. friendship can be set against the prevailing inadequacy of shipping space. It is evident that the world's mercantile fleet is hampered by delay and danger, and a great maritime nation like the U.S.A. experiences some of the dire results arising from the war. To the most ill-informed of optimistic observers it will be now apparent that shipping is the most vital of key industries.

The latest available issue of the National City Bank's monthly letter discusses in detail the effects of the shipping situation. It is pointed out that the rise in commodity prices is largely influenced by the shipping problem. Imports into the U.S.A., owing to the keen demand, showed the greatest sensitivity to the rise in prices, propelled by forward buying largely for stock-piles. The apprehension that shipping troubles would persist, and increase, led to the rise in prices noted since January, and the relation between higher freights and higher prices is clearly brought out in the disparate rise in the prices of imported and domestic commodities. Since supply and demand for cargo space vary on each run and advances in fuel and other vessel costs have not been uniform, the extent of the rise has varied widely as between routes. The largest increase appears to be in conference rates from Indian ports (the rates for jute, burlap, shellac and goatskins have risen substantially as between May 1940 and May 1941) and the smallest in the South American routes, though freight for wool shipped from Argentina has doubled and the rate for cotton from Brazil rose by over 50 percent in a year.

The tonnage available for charter in areas outside the war zone has dwindled and rates per ton per month were as high as $1 to $1.75 before the war. It is only in the case of sugar from Cuba that a decline in freight has been recorded this year. The more important reasons for the shipping shortage and the consequent jump in freights are the diversion of British and Allied ships from former routes. Though vessels withdrawn from European routes reinforce the tonnage available for American needs, due note must be taken of the transfer of a considerable part of U.S. tonnage to foreign registry. Nevertheless, U.S. shipping has responded gallantly to increased demands and almost half the total imports from non-European areas were brought by American vessels in the last quarter of 1940 in contrast with 31 percent in 1939 and the proportion has since increased. As on March 31, 1941, the U.S.A. employed 257,700 tons in overseas trade and it is only the fact that cargoes are bulkier and have to be carried over longer distance that made the problem loom large in spite of the withdrawal of ships totalling over 770,000 gross tons from the Atlantic and Mediterranean routes. One of the main results of the diversion has been a large increase in the tonnage employed on African routes. For the transport of manganese and chrome ore from South Africa as also for cocoa and manganese from British West Africa more and more, American vessels have to be employed. An analysis of shipping in various routes indicates that, if the net increase in total tonnage has been small, there has been an enormous increase in tonnage engaged in the Orient and Far East. The total in this case exceeded the total employed in lines to South America. It is, however, clear that the largest proportion of overseas tonnage, as on March 31, was employed in traffic with Canada and the Caribbean.

The total tonnage employed in trade with India rose from 65,000 tons at the end of September 1939 to 148,000 tons at the end of March 1941. The change is illustrative of several others still in progress. A more important point is that trans-pacific tonnage exceeded trans-atlantic tonnage and some will say that the two-ocean mercantile navy has to emerge as a consequence of the growth of U.S. shipping. It is however significant that coastwise shipping greatly exceeds overseas tonnage. The greater part of this is naturally tanker tonnage and the slight increase as between September 1939 and March 1940 in this case indicates why certain decisions relating to petroleum consumption in the U.S.A. had to be taken. The increased demands of overseas trade are certainly reflected in a reduced total under coastwise tonnage. The maintenance of routes and services to Hawaii and Porto Rico has been achieved only at the cost of services to the Pacific coast. The increase in tanker tonnage on the Atlantic and the Gulf until March coincides, in point of time at least, with a reduction under dry cargo vessels. In spite of a very substantial reduction in laid-up tonnage which totalled over 1,400,000 at the end of September 1939, the actual total of tonnage available to the U.S.A. at the end of March 1941 at a little over 7 million tons was over a million tons below that at the outbreak of war.

The demands for the accumulation of strategic materials left little space available for the purpose and the successive addition to tonnage employed for Far Eastern and Australian trade were made with difficulty. The scarcity of shipping in the Pacific is a result of several factors. Japanese ocean-going ships had been withdrawn for military purposes and the transport of rice. It was obvious that the China Incident would lead to an increase of Japanese shipping on the Yangtse and Pearl Rivers at the expense of Britain. The withdrawal was accentuated by the termination of British services since June last. According to the *Economist*, over 60 percent of British tonnage plying to and from China had been withdrawn by the end of 1940. The shipping situation became acute for other reasons. The U.S.A. requires tin, rubber, tungsten ,bauxite, manganese and chromite from Eastern countries and the grant of priority certificates for these imports naturally accentuates the shipping difficulty. It has been remarked that even though the total tonnage on trans-pacific routes has doubled, the cargoes have outstripped the capacity of ships. Attempts have been made by joint action on the part of British, Dutch and American shipping to co-ordinate services, and to save time further, by sending supplies to the U.S. ports on the Pacific coast instead of ships going round the Panama Canal. Army transports going to the Philippines have also been converted into cargo carriers on the homeward run as they take rubber and tin to the U.S.A.

The very substantial addition made to the stocks of rubber despite record consumption in the U.S.A. shows how far the U.S.A. has succeeded in mastering the situation. Supplies of tin for a year and a half have been acquired and the building up of a wool reserve on the basis of imports from Australia has begun in the U.S.A. But the raw material reserves have not been built up without a reduction in the imports of non-essentials like sugar, tobacco and copra. The U.S.A. has neglected all other imports from Malaya and the Dutch Indies for the sake of tin and rubber. Part of the difficulty has arisen from another fact discoverable by reference to the U.S. Maritime Commission's papers. The increase of about 160,000 tons engaged on trade routes with South America alone shows that 30 percent more tonnage is devoted to services to Latin America. It has been reported that sailings are more frequent as the Grace Line alone has doubled its total. The forging of stronger links is in part due to the

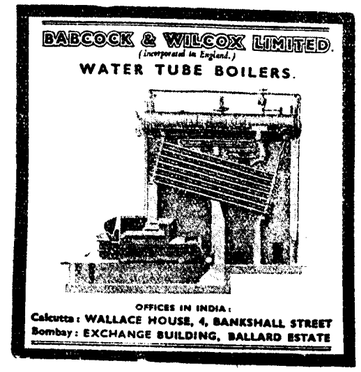
increase in the volume of trade. While the need for tin, lead and bauxite for the defence programme remained acute, the increase of shipping services could give no relief to the U.S.A. There was, however, the consideration that export trade with Latin America could only be maintained by taking hides, wool, coffee, cocoa and minerals available from the Ten Republics. Preference has to be shown to Latin America which has lost European markets and there was also the need to keep up preemptive purchases of copper, tungsten and tin from the Andean republics. It has been said that imports into the U.S.A. from South America show an increase of over 40 percent this year, compared with the last year when the monthly average value of such imports was $54 million. An unusual increase has been noted under imports of manganese as also coffee from Brazil since 1940 and the U.S.A. has to play the good neighbour to Uruguay by taking wool, and hides and more recently by helping her in the armament programme.

There has been no mention of lake and river tonnage available to the U. S. A. at all times. Such diversion as is possible under coastal services can hardly be effected without serious derangement, more so as the American railways' carrying capacity is strained seriously, and it is assumed that in spite of an anticipated increase of 100,000 cars the weekly car-loadings total in the autumn may rise to 950.000 as compared with the 1939 peak of 856,000 cars. The losses of European powers make it difficult for the U. S. A. to look outside for new tonnage and the periodical revision of the building programme is in response to new demands. Trade is hampered by the lack of shipping space in many countries and bulky cargoes like coal and cattle-feed are rejected. In spite of the contraction of world trade, the total shipping available is inadequate, more so on account of delays arising from the adoption of navicerts and ships' warrants. The formation in April of a special pool, to be drawn upon for supplies despatched under the Lease and Lend programme, has naturally reduced the total tonnage available for coast to coast traffic. The withdrawal of tankers fron the Gulf is a threat to oil supplies for States on the Eastern seaboard. It has been pointed out that the Eastern States normally obtain over 95 per cent of fuel and gasoline supplies through imports in tankers and the reduction of the tanker fleet tonnage of about two million tons by a fifth would present a fresh problem met by the appointment of Mr. Ickes and Mr. Davies. The extension of the U.S. Maritime Commission's authority has been unquestioned and the various changes reported in the last six months have been made at the instance of President Roosevelt himself. While Britain has met the situation by reducing imports of foodstuffs from the Dominions, the rate of sinkings until June suggested that some other means of relief had to be provided. The U.S. shipbuilding programme, too, was frequently revised in order to attain a total output of one million tons this year. But the total cannot offset the losses at sea of the belligerent nations and the first call naturally was one for replacement of U.S. tonnage. It was in anticipation of this that the Administration planned for a total of three million tons in 1942 and looked forward to a further increase in 1943.



There is, however, the fact that steel requirements this year will exceed production and the introduction of priorities procedure this month was undertaken as a result of difficulties experienced in the execution of the defence programme. Purchases from South America will probably increase, but the countries concerned are anxious to build up fleets of their own. The acceptance of shipping priorities and what amounts to a form of import control at the other end have shown that in spite of all efforts the shipping position remains difficult.

The pegging of freight rates does not offer a complete solution, and private shipbuilders are naturally reluctant to lay new vessels on the stocks, when the prices of all essential materials have risen. Shipping companies, which may not protest against requisitioning, may find it difficult to procure tonnage for replacement especially, when a part is earmarked for the new pool, and the old race between prices and wages has thus a bearing on the shipping situation. There has been legislation in this connection and attempts have also been made to control freight rates on all routes for all ships. But the Government have not been able to protect shipowners from additions to wages and other operating expenses. The major consideration that emerges is that the U. S. A. is in difficulties and the Government's anxiety to help Britain across the Atlantic prejudices shipping in other parts of the world. The increase in services to South America represents however a valuable gain and in the postwar period when British shipping may find it convenient to limit tonnage on the River Plate route, the U. S. A. may come in for a share of the carrying trade across the Atlantic. Gains in the Far East too are likely to be permanent, though the cessation of commercial intercourse with Japan will lead to certain drastic changes in the near future, but decidedly beneficial to India's trade with America.

Editorial Notes

Indo-Afghan Trade

INDUSTRIAL and financial developments in Afghanistan are little known; and such light as is thrown by the annual and other reports of the Indian Trade Agent at Kabul is all the more valuable at present for showing how a small neutral faces up to the difficulties occasioned by the war. The period covered by the third annual report saw the outbreak of war and the intensification of preparations for self-sufficiency. Price control inevitably followed the advance of rates for imports and the accumulation of stocks. What is more important, the war stimulated the cultivation of both cotton and beetroot in Afghanistan, and the appreciation of the Afghani rupee promoted the normal growth of imports. The report is mainly a record of increases in production and trade under cotton. If industrial progress is limited by the lack of fuel, the attempts made to discover coal with the help of Indian geologists testify to a proper spirit of enterprise. Afghanistan hopes to have a sugar factory and a big cotton mill with 3,000 looms and 105,000 spindles enabling her to meet 80 per cent. of her requirements of sugar and 50 per cent. of cloth. This ambitious programme will certainly retard the growth of Indian exports of Afghanistan, but one must record here that prospects are improved by the decay of trade with the Soviet Union and Japan. There is the possibility that Afghanistan may export more and more long staple cotton to India in return for textile manufactures; and among the first conclusions drawn from the application of the freezing order against Japan was that Indian piecegoods would command a bigger market in Afghanistan. Afghanistan's plans for a vegetable oil refinery and tobacco factory are referred to, as also the introduction of virginia tobacco, turmeric and ginger for cultivation. Afghanistan is credited with a desire to develop sericulture, and the main result of the economic progress in evidence since 1932-33 has been, according to the Minister for National Economy, a substantial increase in Afghan customs revenue. The lapse of the trade treaty with Russia resulted in an increase of trade with India in 1939-40, says the report which draws attention to the increased exports of cotton and wool to India. The State monopoly reported a decrease in imports of sugar and petrol from Russia. Exports across the land frontier from India therefore showed a considerable increase while the exports of Afghanistan improved in value to over Rs. 3.97 crores. The increase in exports of lambskins is responsible for the rise of Rs. 1.48 crores in the value of exports. Lambskins and other furs found a good market in the U. S. A., while the exports of fruits, nuts and vegetables the next item, showed a big fall. Re-exports of wool and cotton from India explain the rise under cotton from India though the latter was offset by the fall under blankets, carpets etc.

India is still the principal supplier of Afghanistan and the chief item is cotton piecegoods. Though Japan takes no produce of Afghanistan, she is second in importance. The U. K. sent machinery and millwork and the lost share of Germany in Afghan trade was evidently acquired by the U. S. A., Italy and the U. K. during 1939-40 in varying proportions. An increase in imports of sugar from Java is one of the main features of trade in 1939-40 and this will indicate how valuable is the freight concession given to Indian exporters of sugar. This year Afghanistan has been described in previous reports as presenting opportunities to Indian boot and shoe manufacturers. The rebate of 50 per cent. in the freight on Indian cement has helped to win a bigger market in the country, and such increases as have occurred under paper, hardware, drugs and medicines etc., point to the decline of trade with Europe owing to the war. A small increase under tea in 1939-40 may lead to a bigger increase hereafter since imports of green tea from Japan are likely to fall away. The most hopeful line is however presented by cotton goods. The imports in 1939-40 from Japan amounted to Rs. 50.9 lakhs; despite an increase in imports from India the greater part of imports came from Japan which sent also over Rs. 6 lakhs of silk and artificial silk goods.

Help for Industry

That industrial banks should not count on deposits but on their own resources has so long been an axiom that one need hardly adduce fresh arguments in its support. Experience in the case of the Industrial Bank of Japan certainly supports the conclusion that it is best to rely on own resources rather than deposits. That the Bank has played a great part in industrial progress in the past and has in the midst of war assisted Governmental borrowing and the expansion of arms output in several ways during 1940 has been indicated often. The fact that the total funds raised up to 1940 since the second half of 1937 exceed 21,581 million yen proves that the Bank is the largest single source of capital. Through loans and subscriptions to debentures the Bank helped to stimulate productivity. By additions to its own paid-up capital by calling up unpaid liability on its own shares, the Bank strengthened itself for increasing its issues of debentures also since 1937. The Bank can raise debentures to the value of ten times its paid up capital. The larger deposits made by the Bank of Japan and the Finance Ministry were also added to the fluid resources at the disposal of the Bank, while successive increases in deposits made by trusts clearly showed that they too preferred to do their investing through the Industrial Bank. Legislation has enabled the Bank to add to the maximum already possible under debentures and the Diet granted the Bank authority to issue debentures up to 2,000 million yen over and above the limit of 875 million yen. The additional funds available have led to an increase in loans also. Private enterprises obtained up to 1940 as much as 1960 million yen from loans made by the Bank but the principal form of help was for the debenture issues floated by industrial corporations for the higher productivity programme entailed by an adventurous foreign policy. Support has also been given by the Industrial Bank to the stock exchange on occasions, because the maintenance of quotations at attractive levels is essential for the issue of debentures and the calling up of unpaid capital by private jointstock companies. At a time when the Government is in the market for as much money as can be had, private enterprise is obviously in a difficult position and it is only the existence of an alternative lender that made it possible for them to increase their productive capacity. There is, however, the admission that in recent years the volume of saving is insufficient for the three main purposes of increasing production, developing the continent and lending to Governments. Bonds had almost elbowed debentures out and the Industrial Bank of Japan has come to replace the private investor. The successive additions to debenture capital can only be treated as a sign of chronic shortage of capital in Japan even when inflation has boosted prices and stimulated investment generally. That the Bank has helped to water the capital of many industries and companies is proved by the enormous increase in the share capital entailed by the calling in of share. It was the Industrial Bank which had to go to the rescue of various enterprises, not the shareholder directly concerned. And this by itself is proof of increasing strain at home.

Advice to New Zealand

The wartime conditions of New Zealand's farming are largely the result of rationing in Britain and the diversion of more and more shipping to the Atlantic. New Zealand has prepared to meet them with a new production plan, to judge by a scheme issued for the guidance of farmers by Mr. Barclay, the Minister for Agriculture. Three principles are formulated in the scheme. Farmers are asked to swing to wool production from meat production, whenever practicable. In this connexion it may be advisable, according to the Minister, not to breed next season from many ewes which verge on cull quality, but which, if run dry, will produce a good wool clip. As far as fat lamb production is concerned, New Zealand farmers are told that the position is under examination and they will be advised of any important developments. The third and broadest principle is that a swing from sheep farming to dairy farming is inadvisable. The advice may seem strange, when the disappearance of Danish and Dutch supplies from the

British market seems to confer special advantages on the New Zealand farmer. But there is the shipping difficulty as also the feeling that dairy produce is unimportant when ships are wanted for essential imports. It may be recalled that Australian and New Zealand farmers were advised not to hope for much on account of the war and were bluntly told that exchange, tariff and other advantages would avail little when Britain was compelled to reduce civilian consumption. It was pointed out towards the end of last year that Britain might not display the same generosity as in the first few months of the war, and a cautious policy of adjustment was advocated on the ground that alternative markets could not be found. The same changes as have been seen in regard to oilseed, cotton and jute cultivation in India might arise in the Dominions; for, one of the consequences of the Lease and Lend Act is that Britain comes to depend on the U. S. A. for some of the materials obtained from the Dominions. It is evident that only under wool is war demand likely to help the Dominions, but here again due notice must be taken of the situation created by the virtual cessation of trade with Japan, though the supply position is reassuring. New Zealand has been asked by Mr. Barclay to aim at an increase in cheese production. She has also been asked to extend the area under flax. The other piece of advice is to increase cereal production in the Dominion to maintain the standard of living at home. It is clear that specialised agriculture is not advantageous either in Britain or the new countries, and the war, if not any other factor, must reduce the area under commercial crops as in India.

Prices and Parities

The fate of the U. S. price control bill is as yet known, but the adoption of various amendments calculated to defeat the main object of the measure indeed suggests that the Presidential veto may be exercised. The Farm bloc's demand for full parity prices appears irresistible. But the subsequent move to freeze all loan holdings has for its purpose the creation of an artificial scarcity. The virtual adoption of minimum prices by the adoption of new limits for loan, in the case of cotton, 14.85 cents. per lb., has certainly demonstrated the strength of the forces working against the advocates of ceilings to prices. For over eight years, Mr. Roosevelt has been identified with higher prices, and the agitation for higher parities this year has come from his own supporters. The demand for higher loans and ergo for higher parities has been based on the steady upswing in the prices of cotton, wheat and corn. The parity prices are calculated according to a formula set forth in 1933. They are framed on the basis of the 1909-14 average prices of each agricultural product (in the case of tobacco it is 1919-29) adjusted for changes in prices of things which farmers buy; in other words, parity prices are prices at which each farm product would have the same buying power over other products as in 1909-14. The parities must change as the prices of things bought change. A cost of living bonus for farmers is apparently the aim of the scheme; and loans to farmers at 85 per cent. of the parity prices means that the loan level this year must be necessarily higher. The Commodity Credit Corporation may have smaller appropriations this year but higher terminal prices and increased transportation costs are allowed for by the Bankhead-Fulmer Act of May 1941. Compensation for lost European markets cannot be provided, but the U. S. farmer can and will point to the advance in wages when producing new arguments in favour of higher prices. Large scale purchases of dried and canned foodstuffs for Britain by the Government can also be quoted of enhanced prices for all farm produce, but the farmer's case, if it has impressed Congress so far, contains more than one dangerous fallacy. The general antagonism in the U. S. A. to inflationary influences has been stimulated by the increase in public expenditure, and it is strongly urged that higher loans to farmers apart from increasing the Government's own holdings of commodities, together with the risk of losing on them, will increase the deficit and add to the tax burden. Since it is to the interest of Government to limit wage increases by restraining the advance in prices the higher loan levels represent defeat rather than a compromise since the U. S. farmer is also eligible for compensation under the soil conservation scheme. While it is to the interest of Government to adjust supply to demand the Commodity Credit Corporation's holdings of wheat, corn and cotton are a danger to the growers who may urge that in the past eight years they have seldom obtained parity prices and are entitled to boom prices now. The Commodity Credit Corporation controlled over 1,200 million dollars' worth of commodities at the end of April, and that is one reason why wheat, in spite of a carryover of nearly 400 million bushels and an anticipated surplus of over 600 million bushels, is quoting in Chicago at 130 cents. the loan stocks of cotton exceeding 3½ million bales, or over 9 million bales, if the Governments own stock are added, have not had as much effect on prices as the current crop estimate and consumption figures. If the stocks are to be sold at some time, subsidies may be required and the grower must pay for them. If U. S. cotton prices appear too high, due regard must be had to the loan level and the freezing Act, as also to the possibility that Governmental action may stabilise both the volume and value of supplies in coming years. Export prospects are admittedly poor for the U. S. farmer and it seems a pity that Indian markets should have followed the U. S. A. as regards cotton and wheat when export prospects in both cases are extremely discouraging.

Cochin Budget

The budget estimates of the State of Cochin were presented on July 29 and after the usual discussion in the legislature have been approved. Certain cut motions reduced the grants for some departments and the token cuts have not been restored. The total ordinary revenue for the year is put at Rs. 113,48,400 against Rs. 11,997,800 shown in the Revised Estimates for the Malayalam year 1116. The total revenue for the current year is also below the total shown in the budget estimates for last year. The fall of Rs. 1 lakh or so is in effect due to an anticipated reduction under Income-tax. A decline in abkari and ganja revenue also has been forecast, but land revenue like forest revenue is expected to go higher. The total ordinary expenditure in the year 1117 is expected to be Rs. 108,96,500. The surplus is certainly gratifying at a time when so many States are faced with deficits. For three years in succession Cochin has had surpluses, and the fourth surplus is due as much to the pruning of expenditure as the resiliency of the State revenue. It is certainly a tribute to the efficiency of Cochin's administration that the largest single head of Expenditure is Education. Out of a total expenditure of Rs. 109.86 lakhs as much as Rs. 19.78 lakhs are allotted for Education. It is worth pointing that the annual expenditure on Education has shown a steady increase and few Provinces or States are within hailing distance of Cochin in the matter of providing about 18 per cent. of the total revenue for Education.

Cochin has been helped to some extent by the fact that the Palace expenditure is limited to Rs. 7½ lakhs. Significant increases in expenditure during the current year are shown under such heads as Charities, Forests and village Panchayats. The decrease under Public works is as inevitable as the increase under Pension Charges. There is, however, the fact that total expenditure in spite of the war is stabilised at last year's level and the surplus is in the main, the result of careful adjustments of expenditure on development while expenditure on essential services like medical relief has decreased very slightly the expenditure on general administration like that on the collection of revenue has been reduced from year to year. This is as noteworthy as the limits imposed on capital expenditure. This has been reduced in order to keep it down to the bare minimum and provide Rs. 1 lakh to be transferred to the Revenue Reserve. And the absence of any allotment for expenditure on the harbour is to be viewed as a mark not only of Cochin's strictly limited liability but of the successful carrying out of the fourth stage on which the State has spent over Rs. 63.43 lakhs. The reduction of the opening balance is necessarily a factor in the reduction of capital expenditure, but Cochin's finances have always been on a strong basis, and the year's surplus will go far towards meeting the reduction in the revenue balance shown by the Revised Estimates for the year 1116. There will be no change in the debt position, but the 5 per cent. loan of Rs. 75 lakhs is sure to be converted in 1943 particularly as the State Treasury holds nearly Rs. 70 lakhs in giltedged securities at present. The greater part of Cochin's expenditure is votable and this alone will serve to distinguish the budget of this progressive principality. It is obvious that palace expenditure, the subsidy and interest amounting to Rs. 5,70,854 must be treated as consolidated expenditure for which the sanction of popular representatives is unnecessary and even the removal of railway expenditure from legislative disuussion has for its purpose the ideal of efficiency and non-fluctuating expenditure, all the more necessary as the railway contributes Rs. 20 lakhs and the revenue has shown consistent improvement in recent years.

Norwich Union Results

Almost alone among leading British life offices, the Norwich Union Life Insurance Society reports fair stability of new business in 1940. In spite of the recession incident to all life offices in wartime, the Society obtained new business of the aggregate value of £6,791,312

and this total was obtained in spite of the loss of connections in France and Belgium. The Society, which is the oldest mutual life office in the world, is entitled to credit for preserving its position among the leading insurance offices. The sound traditions and strong funds have again helped to keep Norwich Union in the forefront, and Mr. Ernest Hicks in his review of the 1940 results at the annual meeting on May 27 at Norwich dwelt with satisfaction on the results recorded both in the annual report and the latest valuation. The Society's war effort on the financial front apart from its own Spitfire called *Nuffler* has been altogether impressive. The Society subscribed over £2¼ million to the new war loans last year thereby raising the total holdings of war securities to over £5.8 millions. The Secretary's foreign exchange assets also helped to provide the Government with the equivalent of £600,000 for the purchase of essential imports. Remarkable as the record of 1940 is, the Society cannot afford to rest on its oars. The process of adjustment to war time conditions is reflected in a further fall in the expense ratio in spite of the new liability under War Damage Act. The ordinary claim experience was more than favourable and the increase of £100,000 on account of war claims last year has been met by the introduction of a small extra premium covering war risks added to the usual premium in respect of new business. There is another reason besides the war for the addition to the amount payable by the new policyholders. The low level of interest rates represents a handicap, and it is in defence of the interests of existing policyholders that the Society has been impelled to charge extra for home war risks. With an expense ratio of 13.5 per cent. the Society has few reasons for complaint and the decline in the yield on the Funds to £3-10-4 per cent. is partly due to higher taxation and partly to the large investment in the new war loan will be taken in good part. Some relief has been however given by the Exchequer in respect of the policyholders' share of the interest earned on the funds of life insurance companies. Mr. Hicks described how the last valuation of the assets and liabilities disclosed the largest surplus so far revealed. Since the valuation rate of interest at 2½ per cent. is more than one per cent. lower than the actual yield on the funds in 1940 the Society can count on a big surplus next time also. A net surplus of £5,174,554 has been ascertained and policyholders, who are hit by the no-bonus decision applicable to nearly all British officers in wartime, will note that the surplus for the quinquennium is larger than that reported previously. How the Society proposes to treat assets and liabilities amounting to £2 millions in enemy-occupied countries was explained by Mr. Hicks who remarked that the surplus was to be carried forward and the declaration of bonus was only postponed. Mr. Hicks added that the Board had reached a decision to pay for the years 1935-36 interim bonus at the full prewar rates. Under the compromise only policies which become claims by death after one or two years' premiums will be excluded and the old policyholders evidently come off best.

Surprise for Simla

A problem of no small importance for the authorities in Simla has arisen as a result of the decisions of the Muslim League's executive in Bombay this week under Mr. Jinnah's advice. It is not expected that any one of the three new Muslim Members, Sir Ahmed, Sir Firoze Khan Noon and Sir Akbar Hydari will pay heed to the directions of the League's executive—as a matter of fact only one of them is a member of the League. So far therefore as the expanded Council of the Viceroy is considered, nothing has happened to disturb the Government's plans. But the resignation of the two Muslim Premiers of the Punjab and Assam, which is expected to be followed also by the resignation of the Premier of Bengal and Begum Shah Nawaz from the National Defence Council, makes a material difference in view of the recent controversy and the explanation given by Mr. Amery himself. There is a good deal of surprise in official circles that having accepted the Viceroy's invitation to join the Defence Council and having even gone to the extent of negotiating with the Viceroy for more seats in the Viceroy's Council in order to get representation for the Punjab, Sir Sikandar should have now decided to withdraw from the Defence Council. Only after his return from Bombay and after any further talks which he may have with the authorities here, will a final decision be taken regarding further nominations to the Council in the vacancies caused by these resignations—whether the Provincial Governments concerned will be allowed to be represented by such Ministers as are not bound by the Muslim League's decision or by some other independent Muslim leaders as representatives of the community and not of the Provincial Governments. In any case, the first meeting of the Defence Council will be delayed by these new developments.

More Exploratory Talks

An official announcement has now been made that Sir G. S. Bajpai with a delegation consisting both of official and non-official members will be leaving immediately for Ceylon to resume negotiations on the immigration question. Apparently the Government feel that the representation made by the Federation of Indian Chambers of Commerce and others suggesting postponement of the talks is based on unwarranted apprehensions and that there can be no harm in accepting the invitation of the Ceylon Government for further exploratory talks. In two respects the Government of India may be said to have modified their usual procedure in deference to public opinion. Two non-officials have been added—one in the person of Sir Mirza Ismail who is highly respected in South India and the other being Mr. T. R. Venkatrama Sastri who is an eminent lawyer and public man. So far as non-official opinion is concerned these two can be expected to keep it in view in the course of the discussions. As they are members of the delegation and not merely advisers one may hope that they will not commit themselves to anything which is likely to be resented in this country. It is also explained by the Government of India that these talks are exploratory. The mistakes therefore of initialling an agreement on behalf of the Governments of India without giving an opportunity to Indian opinion to express itself need not be feared this time. There is reason to think—particularly from the fact that Mr. Bandaranaike has been excluded from the Ceylon delegation—that the majority of the Ceylon Ministers are anxious to end the impasse and find a solution acceptable to India. The coming talks hold out reasonable prospects of success, but there is the danger that the Burma precedent may have an adverse effect on India's case. If it is assured that nothing in the Indo-Burma agreement will be taken as a precedent, it will be helpful.

Iran's Currency

The sudden irruption of Iran into the news, and the swift success of British and Russian military action in that country have excited little surprise. Iran at present has no reason to regret Anglo-Russian joint intervention, and how far the world has travelled from the past century is proved by the combination of Russia with Britain. There has been no hint of rivalry, and if the anticipated junction with Indian troops has not taken place, it is quite certain that fraternisation with Iranian troops will take place. Iran has obtained not long ago a good deal of wheat from India and one can assume that the interlude will not hamper the maintenance of commercial relations. After the cabinet crisis and the cease fire order, it is quite likely that a new agreement will be entered into and Iran, like the rest of the Middle East, will be purged of the parasitic Nazi and be wholly eligible for British assistance. The swift recovery in Anglo-Iranian shares is but one of the consequences of the week's happenings. Iran is large and backward. After fifteen years of Riza Khan's firm rule the country has scarcely recovered from the lethargic misrule of the last member of the Kajar dynasty. Iran has long been dependent on oil royalties to supplement the revenue, and the very considerable increase in the contribution payable by the Company reported after the outbreak of war indeed suggested that the Shah was bent on exploiting Britain's difficulty. There is a bare possibility that the royalty may be scaled down, in which case Anglo-Iranian shareholders, notably H.M.G. and the Burmah Oil Co., stand to benefit. Iran's currency has undergone in the last ten years a few changes. Technically, the Rial is based on gold but exchange control and clearing agreements have rendered it very difficult to say that there is a gold standard at all. Iran's older currency the Kran is forgotten and the Rial which was quoting at 80.5 to the £ two years ago was definitely among the managed currencies. The exchange control in this case was supplemented by a foreign trade monopoly and trade with India particularly was made purposely difficult by Iran which sought to cultivate trade with Russia as though to demonstrate independence of British assistance. The U.K. generally brought the greater part of Iran's export surplus made up of oil products. Imports in a year were below exports and this fact underlies the consistent improvement which has permitted railway and harbour development. Iran's external debt has been very small in recent years and the public debt in 1939 amounted to 989 million rials. The Iranian currency was obviously in a strong position as the total note circulation of 856 million rials was backed by a gold reserve of 310 million rials. Exchange on Teheran in London was mainly governed by the balance of payments while the Ottoman Bank retained a fairly strong position in Iran's trade and finance. Iran's Finance Ministry owes much to American advisers, and it is but right to say that their disinterested guidance kept out complications.

I SAID in the course of my last week's Gossip that I am chary of commenting on the joint statement of Mr. Churchill and Mr. Roosevelt. I don't feel differently now. But it seems that I can ill afford to stop at the few remarks that I permitted myself to make on that eight-point declaration. My objection is restricted to commenting on it from the Indian standpoint. Somehow, I have a growing aversion to the kind of comment that rests on the unstated assumption that it is somebody's task to invest India with a free democratic constitution and put her on her feet. Not that I believe the rest of the world, or Britain particularly, has no manner of obligation to this country. Most of the world problems, economic as well as political, would be easier of solution if the great powers could be more helpful to us. That they are not is, indeed, lamentable. But it is meaningless to put forth comment in place of lament. As I said last week, the application of the eight-point declaration to the case of India is obvious. No people in the world "live their lives" in so much "fear and want" as the masses in this country. In no country in the world is there greater need for "improved labour standards, economic advancement and social security". No country is keener on the abandonment of force. It is true that we have no grievances in respect of access to raw materials; our trouble is rather the lack of outlets for them. But collaboration between all nations in the economic field can be to our interest. And even in respect of those points which have a purely political import, we can say that our deprivation of soverign rights and self-government was not by quite peaceful means and that, thanks to Mr. Jinnah we, too, live in fear of "territorial changes that do not accord with the ..wishes of the peoples concerned". All that is true; and the British Premier and the American President can hardly be unaware of the bearing which their statement has on India. But India is not, and will not be, their prime concern. The only people to whom India can be, or should be, the prime concern are the Indians themselves.

Little is gained, therefore, from looking wistfully or wrathfully at this statement from the middle of the Atlantic. It is as a factor in the future of world politics and economy that it is worthwhile examining the joint statement of Mr. Churchill and Mr. Roosevelt. The first impulse is not only to read between the lines and indulge in hair-splitting with a view to discover the mental reservations, but also to divine the motives behind a document which must, in spite of all its frankness, must be deemed to have some diplomatic significance. But nothing can be gained by such a course. It is far more helpful to form in outline the ideas which the two great statesmen have in their mind about the nature of the peace settlement and of the efforts at post-war reconstruction. To say this is not, however, to deny that there are mental reservations or that there are no diplomatic aims behind this declaration. Surely it is as just as it is expedient to assure the numerous peoples, who are now feeling the weight of the Nazi yoke and who have memories, green and bitter, of the unsatisfactory settlement of boundaries after the last war, that this time the U. S. A. and Britain will try to prevent territorial changes which are not in accordance with the freely expressed wishes of the peoples concerned. And this sentiment cannot be free from certain mental reservations. It would be foolish to think that the Germans in Alsace can as legitimately expect to benefit from it as the Czechs or the Poles in the same breath, if Russia and Poland had not been brought together, through the good offices of the British Government, to settle their differences. Mental reservations and diplomatic aims need not necessarily detract from the frankness and sincerity of the statement.

But whatever that may be, the political settlement in Europe after the present war is bound to tax the ingenuity of the wisest and the best men in Europe and America. The problems that will arise—in fact, they have been there ever since the break-up of the old Austrian Empire—such that they cannot be solved by the application of any political or broadly moral principle. If Nature knows no morality, History knows no

politics, least of all the politics of nationalism, democracy and self-determination. A great war is a great phenomenon, whoever may win or lose it. Changes that occur in the course of the war have a way of defying all efforts at annulment and of perpetuating themselves. Britain's regard for the rights of small nationalities is by no means shared by History which chooses to steam-roller the small nationalities with the crude and repulsive instrument of Nazi aggression. H. A. L. Fisher once observed that the inability of the small nationalities of Central Europe to live together in harmony has been one of the most potent causes of European wars and that, so long as they suffer from this ineptitude, Europe can have no peace. But the solution might lie in the close integration of Europe and not in the repetition of old blunders in new forms. All that may be. But one can well sympathise with the heads of two great democratic countries refusing to despair about the power of democracy to repair the ravages of war and teach the people of different races to live together amicably. None but the most purblind Fascist will think of war and dictatorship as an enduring basis of social life. There can be no stable solution except on the basis of democracy and self-determination. But Europe's need for integration seems to have gained but little recognition at the hands of Mr. Churchill and of Mr. Roosevelt. The amazing speed with which Germany has overrun the whole of the Continent of Europe seems, to my mind, to signify, not the invincibility of the German, as many people seem to think, but the ripeness of Europe for a closer integration, political and economic, than the Continent has till now experienced.

The political integration of Europe towards which the events of the last decade seem to be tending does not seem to have had as much attention from the democratic statesmen as it deserves. Nazidom does not become less hateful because it seems for the moment to be working towards that end. After all, even so laudable a purpose as the unity of Europe cannot be aimed at at the sacrifice of freedom. But the success of the next settlement depends assuredly on putting an end to the old system of client-States and competition for European hegemony. The pro-Nazi clique in France seems to have made the most of the apparent inevitability of European integration. Most Frenchmen must be feeling thoroughly fed up with this perpetual insecurity of their national existence, this ceaseless shunting, so to say, of the dining-car of Compeigne. Faced with a hostile nation which outnumbers them many times, Frenchmen naturally wish for a European order in which this liability for frequent warfare could be liquidated for ever. The freedom of the small nations of Europe is, no doubt, a high-sounding and, in a sense, even lofty idea. But it is more doubtful than ever if it can provide the solution for Europe's problem. If democracy and autonomy are to be thrust on the small nationalities of Europe, what time it is denied to countries like India, or at least withheld from them for quite unconvincing reasons, the next post-war period will prove to be no more stable than the last one.

It must not be forgotten that in so short a statement of war aims, one can only lay down a few principles which, as such, are unexceptionable, and not enter into the details of their application. Or, probably, the British Premier and the American President are actuated by the belief that the apparent deficiencies of the democratic principle can, and should, be made up by greater care and efficiency in the organisation of world economy. In fact, it may be argued that it is not the political integration of this country or that, that is now required, so much as the integration of national economies into a world system, in which all the nations cooperate freely in the improvement of labour standards, the increase of social security and of material prosperity. Mr. Churchill and Mr. Roosevelt probably envisage the solution of the problem of recurrent world wars in terms of disarmament of temperamentally aggressive nations, freedom for all peoples who have been forcibly deprived of it and equal access to trade and raw materials. That is why four out of the eight points refer specifically to economic reconstruction. It would be well to quote here the three relevant paragraphs before attempting to appraise their exact import:

Fourth, they will endeavour, with due respect for their existing obligations, to further the enjoyment by all States, great or small, victor or vanquished, if access on equal terms to trade and to the raw materials of the world which are needed for their economic prosperity.

Fifth, they desire to bring about the fullest collaboration between all nations in the economic field, with the object of securing for all improved labour standards, economic advancement and social security.

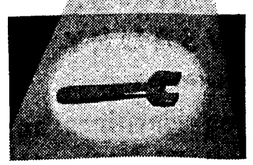
Sixth, after the final destruction of Nazi tyranny, they hope to see established a peace which will afford to all nations the means of dwelling in safety within their own boundaries and which will afford assurance that all men in all lands may live out their lives in freedom from fear and want.

Seventh, such a peace should enable all men to traverse the high seas and oceans without hindrance.

It will be seen that the last two refer to the quasi-political issues involved in economic reconstruction. The freedom to traverse the high seas and oceans is a bare necessity for world trade. And in assuring the world of this necessity, the two democracies may be held to imply that their position to control these high seas will not be utilised for their own benefit, that the control of the Suez Canal, the Panama Canal and similar short cuts will not be exercised to the detriment of other nations. This is a pointed answer to the exaggerated grievances of countries like Italy and Germany. Likewise, the German cry for lebensraum may be deemed to have been answered indirectly in the emphasis on "a peace that will afford all nations the means of dwelling in safety within their own boundaries and which will afford assurance that all peoples may live out their lives in freedom from fear and want". Some nice problems, no doubt, arise from what has been quoted above. Is a distinction sought to be made between "nations" and "peoples"? And is it suggested that the "nations" should be content with dwelling in safety within their boundaries and that the "peoples" with freedom from fear and want? I cannot help feeling that this clause is by no means happily worded. If the aim is to emphasise that no nation will be deemed to have strong claims to other people's lands and that the consequences of overpopulation must be suffered by the prolific races themselves and not shifted on to others, it could have been stated in plain terms. As it is, the wording seems to suggest that "nations" must dwell in safety within their own boundaries and that all "peoples", whether they are nations or not, should live their lives in freedom from fear and want. This implies that peoples, who are not classed as nations, are liable to the encroachments of individuals of other nations or peoples. If it may be presumed that all nations are not to have equal rights in respect of this encroachment on people's domains, this analysis yields the following deductions from the terms of the sixth clause: (1) that all peoples must be free from fear and want (2) that nations cannot be deemed to have a natural right on grounds of overpopulation or of lack of lebensraum to the territory of other nations or the lands of other peoples and (3) that some nations will continue to occupy the lands of "peoples" without detriment to their freedom from fear and want. The last one does not logically flow from the terms of the clause; but it is still unthinkable that America and Britain are prepared to include themselves among nations who should dwell in safety within their own boundaries.

If we leave aside the quasi-political clauses, there are only two clauses on the question of economic reconstruction. One refers to access of all nations, whether victor or vanquished, to raw materials and to trade; and the other refers to the co-operation of all nations in raising the level of economic security and prosperity. The average man will naturally want to know how the two democratic statesmen view the vexed questions of social ideology. Fascism, of course, calls for no comment; it is unadulterated poison. The same thing cannot, however, be said of the various brands of socialism professed by respectable political groups even in the democracies of Great Britain and the United States of America. Here, I believe, the specific reference to improved labour standards is meant to be not only a profession of liberal sympathies for the demands of labour, but also a gentle reminder that the authors of the statement are not considering any far-reaching scheme of social reconstruction.

It is within the framework of a largely individualist society that the economic reconstruction of the post-war period is contemplated. And the guiding principles in addition to the freedom of the seas and the denial of claims to colonies are access to raw materials on equal terms and co-operation in certain common objectives. These two principles are by no means so simple as they may be thought to be. The first is conditioned by the previous obligations of the U.S.A. and of Britain. And as regards the second, it is doubtful if the two countries will be prepared to exert themselves to the utmost to banish fear and want from the lives of all peoples and, what is more important, whether they will admit all nations into equal partnership in this profitable mission. Equal access to raw materials for all nation, great and small, may well



(Continued on page 407)

Across the seven seas the floating fortresses churn their way. Immense, imposing structures dedicated to protection and, when necessary, attack and destruction. In them is concentrated the marine art and invention of generations.

But where today those Gleaming banks of guns throw their shadows across the ocean, tomorrow the happy keel of cargoboat and merchantman will cleave the seas.

Just as today Steel serves with its strength, to defend the battleship to give it invincible might; tomorrow, Steel will give dependability to the argosies of men, giving wings to the narrow bows as they cleave the waters.

To withstand the immense strain imposed on them, the smallest of details in modern structures are made of steel.

TATA STEEL

ISSUED BY THE TATA IRON & STEEL CO., LTD. HEAD SALES OFFICE: 102A, CLIVE STREET, CALCUTTA

Olympus

(From Our Correspondent)

Simla, Aug. 27.

SIMLA has been buzzing with intense activity during the last few days—the imbroglio in Punjab Ministerialist politics, the Indo-Burma talks behind closed doors,—the dissection of the Government of India's financial policy at the meetings of the Public Accounts Committee and various other conferences. As the Viceroy is also back from his long, though uneventful, tour, it has given added interest to the political and other activities in the capital. An important visitor to Simla last week was the Nawab of Chhatari, the Prime Minister—designate of Hyderabad, who met both the Viceroy and the Governor of the Punjab. His talks are said largely to have related to the recent sensational developments in Muslim League politics. So far as the Nawab is concerned he does not seem to be worried by Mr. Jinnah's fiats and threats —nor as reports from Bihar show, Sir Sultan Ahmed who is shortly to assume the Law Membership. It would appear that Sir Sikandar had an interview with the Viceroy before he left for Bombay with his two Muslim colleagues in the Punjab Cabinet. At the moment political circles in the Punjab are anxiously awaiting the outcome of the Bombay meeting, for upon it depends the course of politics in the province in the next few months. Important developments are expected at the coming meeting of the Punjab Assembly—partly because of the Sikh opposition which is gathering strength and partly because of the new turn in Muslim League politics which is bound to reflect itself in the party alignments in the Punjab Assembly.

* * *

Indications of what may be expected in the coming autumn session of the Central Legislature are already available in the tales here among members now in Simla for various meetings. The Muslim League party is awaiting Mr. Jinnah's instructions—whether they should boycott the Legislature as a protest against the Council expansion or whether they should stay and show their resentment in other ways. Even if they decide to stay, their role is expected to be one of increased opposition to the Government in a manner more pronounced than ever before. As they are the largest single party left in the House, it would be interesting to watch their activities. The Nationalist party, formerly led by Mr. Aney, is in a peculiarly difficult position. One section of it particularly the Bengal group, which is strongly nationalist, does not seem to be happy over Mr. Aney's decision. There are members like Sirdar Sant Singh in it who are strongly opposed to the "expansion" proposals and cannot be expected to change their attitude merely because of the presence of their ex-leader on the Treasury Bench. While efforts are being made to reorganise the party so as to include Muslim and other members, there are also proposals to make it a limb of the All-India Hindu League. Its future is now in the balance. So also is that of the newly formed party of Independents led by Sir Henry Gidney as there are already reports of defections. There is reason to think that though the number of elected members attending the session may be comparatively small, it will have a fairly exciting time—all the more so if the Government decides to introduce a supplementary Finance bill for additional taxation.

* * *

The eight-point Roosevelt-Churchill declaration—particularly the commentary of Mr. Attlee which accompanied it—came as a pleasant surprise to Simla. It is not unlikely that the British Government anticipated fully the reactions in this country. In any case official circles in Simla are reported to have paid more than ordinary attention to the comments in this country on the declaration. The Secretary of State must by now be fully aware of the universal feeling in India that Mr. Winston Churchill should follow up this declaration by an unequivocal statement assuring the people of India that the declaration applies in every respect to their future also. A broadcast by the Viceroy on the subject would be helpful also if he can take an early opportunity to do it on behalf of His Majesty's Government. It is not known, however, if anything in this direction can be expected in the near future to satisfy Indian demands. In this connection there is a good deal of criticism of the policy pursued by All-India Radio. In giving Indian press comments on the Roosevelt-Churchill declaration All-India Radio took a one-sided view and made no mention whatever of the demand made in every Indian paper that if as was stated in the declaration the principle of self-determination was accepted by the British Government, it should be made clear that it would apply equally to India. It is only fair to say that if All-India Radio wishes to give a summary of Indian Press comments, it should be impartial and fully representative and not onesided.

* * *

Only one new member of the Viceroy's Council has so far taken charge—Sir H. P. Mody. He has already settled down to his new duties as the head of the Supply organisation. The general anticipation in political circles is that though from the political point of view Sir Homi may not be able to influence the Government's policy, his drive and energy may be helpful to the cause of industrialisation. Sir Homi even as a non-official was one of the chief advisers of Sir Ramaswami Mudaliar who as Commerce Member has been trying to do a good deal for promoting industrial research and helping the establishment of new industries. The two together have now the opportunity to show a more forward policy for the rapid development of Indian industries than has been evident so far. The next two to join the Viceroy's Council are Sir Akbar Hydari and Sir Sultan Ahmed. There have been rumours that Sir Akbar may serve in the Government of India only for six months or so. It is true that owing to his age he may like to retire from active official life but it is difficult to believe that he would have accepted the appointment only for six months. If he is not able to continue longer, he would rather have declined the appointment altogether. The general impression is that the Viceroy has selected Sir Akbar Hydari owing to his special standing in the country as an elder statesman so that he may virtually come to occupy the position of leader for the Indian non-official members and aid the working of the Council in the arduous and difficult days to come. Nothing is yet known definitely about the date of arrival of Sir Firoze Khan Noon and Dr. Raghavendra Rao nor of the assumption of office of the other two. It does not appear that the first meeting of the expanded Council in its full strength will be possible before October. Sir Girja Shanker leaves this week for Ceylon and will probably not be able to return before the middle of September. After completing the work in connection with the Indo-Burma agreement and the Indo-Ceylon talks he expects to hand over charge to his successors and leave for America before the end of the month.

* * *

For four days continuously the Indian delegates from Burma have been engaged in discussions with Sir G. S. Bajpai on the terms of the Indo-Burma agreement. The suggestions made by the Indian delegates for improving the agreement and removing its harsh features have been fully discussed. It now remains for the Government of India to take up the question with the Government of Burma and see how far the agreement can be modified by mutual

(From Our Correspondent)

Bombay, August 27.

CRITICISM in the case of the iron and steel control order has been loud and frequent. The protest meeting organised by the iron and hardware merchants from all parts of India was conducted with Mr. Manu Subedar in the chair. Mr. A. A. Jasdenwala said that the control order was vague, complicated and mischievous. Traders were at a loss to see why it was necessary to ask for compulsory acquisition of stocks and the cessation of all dealings except under the licensing system. The trade besides listing its grievances asked for the setting up of local advisory committees to secure a modified policy. The views of Mr. Jasdenwala were quite acceptable to the meeting which passed resolutions regretting the introduction of the Control Order. Mr. Subedar drew attention to the circumstances of the iron and steel trade, and asked why the difficulties of the trade in regard to procuring supplies were not taken into account. He urged that the claims of small and unorganised industries should not be neglected and if they were extinguished for lack of iron and steel the blame would rightly fall on the Government. He too criticised the order as vague, unduly wide and abrupt. Describing the legitimate apprehensions of the trade, Mr. Subedar endorsed the view that Governmental requirements should have priority in wartime but called attention to the abuses arising from the existence of priviledged contractors mostly in Calcutta. Mr. Subedar also upheld the view of many traders that Indian firms should not lose ground in the trade merely on account of the introduction of the Control Order. It is clear that the conference is prepared to make further representations for the amendment or relaxation of the order so that the difficulty and loss arising therefrom should be reduced.

Petrol rationing remains a live subject of discussion, and the ventilation of grievances has been followed by the issue of a statement describing the nature and scope of rationing. It has been said that the aim of the system is to reduce total consumption in Bombay by 25 per cent only. The measures adopted do not seek to upset the activities of persons and institutions who may use more petrol than is absolutely necessary. Consumption by the police, Government departments and essential municipal services can hardly be reduced without detriment to the public and even school buses are regarded as essential vehicles entitled to the original allowance of petrol. It is only traders and private motorists that will have to take the shock. It is, however, argued that many enterprises essential for the war effort depend on lorries for their supplies, and it is asked how the war effort can succeed if the new rubber and textile factories in Bombay are deprived of the use of their own lorries merely on account of rationing. It is clear that the rationing authority is in a difficult position. If trade lorries are forced out of use, the loss will be as much the Government's as the owner's and it has been therefore urged that special concessions should be shown to firms that are turning out war supplies in the Province. In the case of car-owners who are engaged in outdoor work or actively helping in A.R.P. and similar services the line cannot be drawn strictly, and doctors and others in a semi-public position cannot be expected to cut down their petrol consumption. It is because of the favour shown to specified classes that the basic ration in the case of all others is kept low. Those doing war work of course, come off best, but the claims advanced on behalf of the lorry and bus business are not taken seriously. The agitation is dismissed as artificial and it is pointed out that dislocation of certain services connecting British Indian towns with States cannot be avoided. If vehicles registered in States do not get enough petrol the bus-owners cannot expect to get more by getting registration certificates in British India.

The railways are sure to benefit on account of the blow given to bus transport. Complaints that entire districts have been cut off have been described as unwarranted and it is only the criticism of the I.R.T.D.A. president of Government's road policy that confers interest on the protests and petitions from the motor industry. The letter addressed by the Motor Merchants association repeats the plea that prior consultation should have been attempted and urges that the fixation of 200 miles as the upper limit for monthly mileage is arbitrary. The lorry-owners have put up a separate memorandum stating that some heavy lorries used up 180 gallons in a month and they naturally want a much larger ration than that allowed. Motor drivers have joined the chorus and the secretary of the Drivers Union, who points to a threatened reduction of 25 per cent in cars in Bombay, adverts to the possibility of 5000 to 6000 drivers being thrown out of employment. They will add to the number of bus drivers who have lost their jobs already and the Secretary has asked the W.I.A.A. to remember their case.

There has been some comment about the Corporation's refusal to co-operate fully in the matter of air raid precautions. Last week the Council turned down a resolution suggesting that the Commissioner be asked to frame a special A.R.P. scheme for school children numbering over a lakh. The Corporation refused to depart from its previous policy largely based on the Congress group's attitude to the whole business of helping the war effort. The result was no surprise, though some will say that the Council which referred the Commissioner's proposals as regards municipal property and A. R. P. to the Works Committee should have preserved an open mind. The Corporation's indifference does not please those who want the Council to demonstrate that it is as fussy as the crowds that joined in the demonstration staged during the Viceroy's visit. Children are better out of the city than huddled in shelters will be the opinion of some and it is better to think of evacuation as a contingency in the event of air raids.

A further decline in cloth prices has been reported this week. This however, means that fears concerning price control have spread quickly. In the last week or two rates for standard lines have come down in a rush, more so as city godowns are full of uncleared stocks. The sunshine stories of big orders from the Eastern group do not appear to have much effect. Fluctuations have been noticed in Ahmedabad and there is a fear that demand will shrink. Transport difficulties have made stockists in Bombay anxious for business. Though some argue that high prices will necessarily check consumption which might be diverted usefully to war savings and also point out that the higher prices will stimulate production of mills and rectify the position, provided always that the manufacturer is assured of a reasonable profit. It has been remarked also that American practice in regard to price control should be studied. It is freely recognised that prices are likely to go down further before the September conference is held. There is no longer excited buying of Japanese goods and rates have dropped in all markets. In the case of Indian mill goods dealers have been swapping orders, and the survival of some export has kept the market going. The change in the cotton outlook has apparently led to altered conditions in the cloth trade.

A Resume of Commodity Markets

A GENERALLY firm tone has been noticeable in the various commodity markets during the week. The concerted military action by Russia and Britain in Iran has had an encouraging effect on the markets. Likewise the order by the Iranian Government to its troops to cease fire should have a further stimulating effect. There have been other favourable developments also during the week. Two orders for 19.7 crores sandbags have been placed with the Indian Jute Mills Association by the Government of India and the British Government. These orders seem to have been anticipated to a certain extent for there was heavy buying of jute by mills, and speculators were also busy in the goods market. The new orders for sandbags has led to an increase in the number of working hours from 45 per week to 50 hours per week from the beginning of next month.

The raw cotton market has been steadier only in sympathy with the firmness of other commodity markets, while there has been substantial buying of wheat in anticipation of large Government orders. Operators in the linseed market have been more reserved and the British Government has not been able to get its full requirements at the scheduled prices.

Jute

The raw jute market has been very active during the last two weeks. Even before the sandbag order was announced, there was considerable buying of new crop jute and sellers were asking for an advance in prices. Arrivals into mofussil centres have so far been on a very small scale, and there is considerable difficulty in transport on account of the rains. There are also reports that considerable damage to the crop has been caused by the floods. It was not surprising therefore that there was a sharp rise in prices just before the announcement of the order for sandbags. There was a considerably oversold position in the futures market and the quotation at one time was reported to be as high as Rs. 75.

At the higher levels there has been considerable selling and there were reports that mills would endeavour to fix maximum prices regarding their purchases. The recent sharp increase in values has enabled the Bengal Government to dispose of its holding of. Old crop jute sold at around Rs. 64 per bale. The Government therefore have not lost on their purchase of old crop jute.

The new order for sandbags would take up about two lakhs jute. It has also necessitated an increase in the number of mills' working hours from 45 per week to 50 per week. On the basis of a 45 hour working week, mills were well stocked with jute till the end of this year. It is their intention that these enchanced hours should remain in force until the end of the year.

Jute Manufactures

The rise in prices in the jute manufactures market is perhaps not so pronounced for the effect of the news of fresh orders for sandbags had been discounted to a certain extent. For the last two weeks, the market has been full of rumours regarding new war orders. But for the proposed control of prices in the U.S.A. there would perhaps be a further improvement in values. The recession in jute prices towards the close and the decision to increase mill working hours also had a chilling effect. 9 porters ready were done as high as Rs. 21-12. There has been a decline to Rs. 20-14 towards the close. The rates for 9 porters and 11 porters hessian in the United States have been fixed at Rs. 21-12, and Rs. 28 respectively with prices expressed in rupee currency.

The Indian Jute Mills Association has again come out with a statement elaborately defending its policy regarding regulation of production. It is pointed out that only to prevent further violent fluctations in prices it has been decided not to control prices by an increase in production. Another reason put forward is the fear of labour discontent.

At the special meeting of the members of the Indian Jute Mills Association held to adopt the resolution regarding working hours the Chairman said:

"I would remind those members who advocate drastic increases in working hours, which without a corresponding offtake would merely mean piling up stocks, that most mill godowns are already full to overflowing. Government urged us to buy a great deal more jute than we were using and most of us did so. In addition to this we are carrying large stocks of sandbags in the storing of which Government made very exacting conditions requiring more than normal space. We should therefore soon be faced with the question of reducing our overwhelming stocks, and this would mean a drastic curtailment of working hours, playing into the hands of speculators and running the grave risk of labour trouble. I cannot emphasise too strongly the danger of troubles in the last named direction. Our policy all along has taken particular care of the labour situation and in all our considerations and recommendations, this factor has weighed heavily with your Committee."

The reasons put forward may be convincing from the point of view of the industry. It is also convenient for mills as it enables them to earn a very substantial margin of profit with the present level of prices but whether the bogey of competition from substitutes has been duly considered remains to be seen.

Cotton

The Bombay raw cotton market is undecided and it will be impossible to take a definite view so long as the uncertainty regarding the Far Eastern situation is present. The recent improvement in prices has been mainly due to a more optimistic outlook regarding the Far Eastern situation and the belief that negotiations between the U.S.A. and Japan are going on for a peaceful settlement. The activity of the Indian mill industry also has been a sustaining influence.

Rubber

The market has not been affected by the recent quota increase. It has been decided that the export quota for the fourth quarter of the year should be 120 percent instead of 100 percent. Quotations for both spot and forward are at 13 11-16d. The quota increase has been effected presumably to satisfy the increased requirements of the United States.

Rice

The warnings uttered by the price controlling authorities against the recent abrupt rise in prices and the efforts taken to increase stocks of rice have had a salutary effect and there has been a drop in values during the last two weeks. The position in this Province is considered satisfactory. As the Director of Rural Reconstruction remarked recently, one of the direct results of jute regulation has been to make Bengal less dependent on imports of rice. Bengal would henceforth be self-sufficient in the production of paddy to the extent of 300 crores maunds annually which were so long imported from Burma and Indo-China.

(From Our Correspondent)

Calcutta, 28th August.

TWO noteworthy events have marked the past week. Government has thought it well to take advantage of the firm jute position to get rid of their holding of 50,000 bales of Firsts bought during June 1940. They had the opportunity once before of getting out at a profit but did not take it. They are probably wise to quit now as that class of jute does not become more attractive with age. The price secured, Rs. 64/- per bale ex-godown, should show a small profit on the transaction and it might be considered unkind to suggest that it took an expenditure of some 36 lakhs of rupees on Jute Regulation to achieve a market position which enabled Government to get out without loss.

The other event was the placing of orders for 197 million sandbags for delivery over a year from October, with the heavier proportion required by the end of this year. With the Mills' sold position as it is this obviously necessitated an immediate review of the working hours, and it has been decided that from 1st Sept. up to the end of the year, Mills will work 50 hours per week. This extra 5 hours per week is practically equivalent to the hessian production necessary to produce the quantity of bags due this year, so it will do little or nothing to relieve the pinch in near at hand consumers goods, unless a large proportion of the sandbags are to be made on Sacking looms. The view was strongly held in many quarters before the placing of these fresh War orders that the market position imperatively called for an increase in working hours, not only to meet consumers demands but at the same time to prevent prices being forced to unhealthily high levels. The increase now decided on does little or nothing to remedy that situation and it is perhaps unfortunate that the Mills did not go the whole hog and work 54 hours per week. We shall be told no doubt that with the regulated (?) jute position as acute as it is, such an increase would have forced jute prices still higher, as Mills would have to buy more. But there are other factors to be taken into consideration. We have pointed out before that Mills more than doubled their stocks of raw material during the past year. What then is the urgency to buy? Admittedly, Mills like to keep covering their sales of goods with purchases of jute and we have no quarrel with this policy which is the acme of wisdom. But where is the urgency to sell? At the moment Mills have scarcely anything to sell earlier than April/June next year and the buyers for that position are to all intents and purposes exclusively Bazar speculators. That is to say, such sales are not made to consumers and such goods have sooner or later to be resold on this market, not infrequently to the detriment of Mills selling when that time arrives. Mills have been, during the past few months, turning away thousands of bales of genuine consumers orders because on account of previous sales to the Bazar and of restricted working hours they were not in a position to sell for early shipment. Why then for a change should Mills not sit out of the forward position for a month or more and turn away some of these Bazar orders? This would do away with the urgent necessity to purchase jute wherewith to cover sales and would give up-country markets a chance to settle down to normality with an increase in imports acting as a brake on the fantastic advance in prices which has lately been a feature of the mofussil. That there is a sufficiency of jute to cover all prospective requirements for more than a year ahead, there is no shadow of doubt. The quality may not be all that is desired, but if there were some falling off in the colour of the cloth produced in these days, it would not be a matter of vital importance. The argument therefore that an increase in hours to 54 per week, rather than to 50 which has been virtually forced on the Mills Committee, would necessarily result in a further rise in the price of raw material, is by no means conclusive, if a more restrained policy with regard to forward sales were followed. Again, the margin of near goods which would be released for sale would tend to bring back the price level for such goods to a more reasonable basis, which in its turn would undoubtedly reflect on the raw material side and tend to restore a proper balance. There is no denying that prices of both raw jute and manufactured goods have been dangerously near getting out of hand. As we write there has been a slight set-back but the danger is still there, and the only safeguard against it appears to be a co-ordinated policy on the part of the Mills, first to adjust working hours to relieve the tightness for near goods, and second to curtail their forward selling to the Bazar so as to avoid the urgency to buy jute to cover such forward sales.

Government has all along been insistent that its policy with regard to jute is one of "regulation" and stabilisation of prices. We are waiting with keen interest to see if this "regulation" policy works both ways or if there is any ceiling to stabilisation. The prices which the cultivator is now getting for his jute must be affording Government the utmost satisfaction, but "regulation" connotes a limit in either direction, and if the welfare of the industry at large is to be considered, as it ought, the upper limit of price should be engaging attention. "Regulation" might also with reason cover the marketing of jute in proper storable condition, but buyers are at present being called upon to pay vast sums for water, which the Government "regulation" staff appear to be doing nothing to prevent.

Rope
W. H. Haxton & Co. Ld.
61, HARRISON ROAD
CALCUTTA

(Continued from page 387)

Rs. 4.06 crores to Rs. 4.43 crores. Deposits of member banks have registered quite a substantial rise from Rs. 37.04 crores to Rs. 41.74 crores. Miscellaneous deposits are also substantially higher from Rs. 2.93 crores to Rs. 4.79 crores. On the assets side, the only item of importance is the slight increase in foreign balances from Rs. 44.99 crores to 45.45 crores. The return for the issue department does not call for any comment. The statement of the Imperial Bank discloses swelling cash balances at Rs. 21.67 crores as against Rs. 18.68 crores, due to the shrinkage both in the investment portfolio and trade advances portfolio. At Rs. 104.66 crores, the Imperial Bank's deposits constitute another record.

As from September 1, 1941, we understand that banks in India are reducing their interest rate on savings bank accounts from 1½ per cent to 1 per cent per annum. It is reported, however, that Lloyds Bank and Grindlays are against any reduction in interest rates. As two of the Big Five they must have been the first to come forward with any suggestion for lowering interest rates. They must, therefore, have some special reasons for adopting such a course and we would like to know them if there are any.

The exchange market remains steady.

Banks were sellers of T. T. at 1s. 5-15/16d., for ready up to six months forward; and banks were buyers of T. T. at 1s. 6d., for the same delivery.

Banks were buyers of three months A. D. bills at 1s. 6-7/32d., for three months and 1s. 6-9/32d., for the fourth month.

Interbank call money is quoted ½ percent.

Firms' money for call and short quoted ¼ percent; and ½ percent for one to four months deposits.

JUTE

Calcutta, August 28.

The jute market has been very active during the past week. Operators seemed to have had received information of the new order for sandbags even before it was announced. Perhaps the buying of new crop jute by mills on a large scale last week was in itself suggestive. With rains in the mofussil, there is a scarcity of imports in that centre. It is even reported that the standing crops have been considerably damaged and that there will be considerable difficulty in getting early arrivals. There have been good buying of loose jute and quotations are nearly two points higher on balance. As a result of the new orders for sandbags, it has been decided that mills under the membership of the Indian Jute Mills Association should work 50 hours per week from the beginning of next month. This should naturally increase mill consumption.

In the loose jute section, a large amount of business has been done. Indian Jat Tops, Middles and Bottoms were done at Rs. 10-8, 13-8 and Rs. 10-8 respectively. Old crop European Middles were done at Rs. 13-8 per maund. Indian Jat Bottoms were done at Rs. 10, District Bittoms at Rs. 9-8 and Cross Bottoms at Rs. 7-8.

In the pucca bales section, shippers and mills have been active. The market was rather excited on reports regarding the receipt of sandbags and Firsts were done up to Rs. 72-8 per bale. New crop Lightnings were done at Rs. 64-8 and on port Tossa 4's at Rs. 52 per bale. The recent increase in prices has been beneficial to the Bengal Government, and it is reported that they have disposed of their holdings of old crop jute to the mills.

The jute futures market was very active till yesterday morning. From the quotation of Rs. 64-8 last week there was a jump by more than ten points yesterday to Rs. 75. The reports regarding the orders for sandbags and forced bear covering were mainly responsible for the rise in prices. At the higher level there has been selling. There was a drop in the quotation to Rs. 70-12. The tendency in today's session is irregular and the quotation at the time of writing is Rs. 72.

JUTE MANUFACTURES

Calcutta, August 28.

The strength of the jute market and good buying from North America and the Riverplate and the receipt of the new orders for sandbags have been mainly responsible for the strength of the jute manufactures market. The improvement in values would perhaps have been more pronounced but for the increase in working hours to 50. However, even at the lower levels quotations are fully one point higher on balance. 9 porters were done as high as Rs. 21-12 on Wednesday. There was a setback to Rs. 21. They are now higher at Rs. 21-4, Septembers are quoting Rs. 21, October/December Rs. 20, and January/March Rs. 19. 11 porters ready are Rs. 27-4, September Rs. 27, October/December Rs. 24-12 and January/March Rs. 22-12.

Two orders for sandbags amounting to 19.7 crores have been placed with the Indian Jute Mills Association. One for 4.7 crores on account of the Government of India for delivery in three months between October and December and the other for the British Government to be delivered in twelve equal monthly lots beginning from October. There are significant points about the order from the British Government in that the sand bags have to be rot-proofed. Even though the new order takes effect only from October, the Indian Jute Mills Association has decided to increase the number of working hours from 45 per week to 50 per week from the beginning of September.

In the heavy goids section, similar conditions have been noticeable. B Twills for September shipment have been sold on the basis of Rs. 41, Heavy Cees at Rs. 38-12, Cornsacks Rs. 42-14, Liverpool twills Rs. 48-5 and A twills Rs. 50, all for the same position.

COTTON

Calcutta, August 28.

The strength of the jute market and the good mill buying have been responsible for the better tone of the raw cotton market, during the past week. With no help from the New York market it is satisfactory to note that the market has developed resistance for selling pressure. But for the anxiety regarding the Far Eastern situation the improvement in values would perhaps have been more pronounced. There is a tendency to take profits at every bulge so far as the short staple varities are concerned.

After being higher at Rs. 271-8 Broach April/May are now quoting Rs. 269-8, Oomra December/January Rs. 210 and Bengal December/January Rs. 158. The quotations at the end of last week were Rs. 260-8, Rs. 203 and Rs. 152 respectively.

In the New York market active conditions have been noticeable on report of unfavourable conditions. The passing of the Freezing Order has had an encouraging effect on values, but if the President exercises his veto it is feared there will be a decline in prices. October were 16.84 cents and December 17.01 cents against 16.24 cents and 16.44 cents.

PIECEGOODS

Calcutta, August 28.

The volume of turnover in the piecegoods market has been disappointingly small. Forward business has been on a restricted scale and dealers are not inclined to commit themselves. Owing to the absence of competition mills are not keen to do new business. Replacement costs are very high and deliveries are as far ahead as June 1942. Business passing has been in ready goods. The course of the market will be dependent on the extent of the Poojah demand.

In the Japanese goods sections quotations are not available for forward positions and there is a general tendency to take profits rather than accumulate stocks at the present levels.

The yarn market has not been active and quotations are at the low levels touched last week.

GOLD

Calcutta, August 28.

The gold market has been quiet and idle and quotations have been fluctuating in narrow limits. Owing to the availability of freight, arbitrageurs have been buying ready gold and hence the premium for ready position over quotations, for first and second settlement.

The London quotation has remained unchanged at 168s for fine ounce.

SILVER

Calcutta, August 28.

The silver market has been more or less unchanged. Indian mint silver ready are Rs. 62-14

The London market is quietly steady. Trade demand has been met by producers selling. The quotations for both spot and forward is 23⅛d.

WHEAT

Calcutta, August 23.

The Karachi wheat market has been very active during the past week. Speculative buying and the report regarding the possibility of large-Scale Government buying have been mainly responsible for the jump in values. The rise in prices is perhaps also due to the effect that the Punjab official control fixing the maximum limit at Rs. 4 is due to expire. There is a rise of nearly two points at Karachi, Choice white ready being Rs. 36-2-6 and November Rs. 37-12. There has been a large expansion in the amount of business transacted.

Steady conditions have been noticeable in the Calcutta market also. Cawnpore ready were done at Rs. 5-3-6 and September at Rs. 5-6-6. Mills have been very active but there is some competition for Karachi flour.

(Continued from page 402)

consent. So far as the Government is concerned, it appears to be willing to reopen the question with the Burma Government and use its influence to secure modifications and assurances demands by Indian commercial bodies and others, but it is difficult to say how far the present Government of Burma will be prepared to go to conciliate Indian opinion. The present Ministry in Burma is known to be liberal in its policy and accommodating in its dealings with the Government of India. It is not likely to take up a reclacitrant attitude and refuse to oblige the Government of India if the latter presses for some modifications on the basis of discussions which have taken place in this country and the apprehensions genuinely felt by the Indian community in Burma. An official announcement has also been made regarding the Bajpai delegation to Ceylon. In this case care has been taken to add two prominent non-officials to the delegations, to make it clear that the coming talks will only be exploratory and to postpone for the present the trade talks. As the Bandranaike group in Ceylon which is mainly responsible for the failure of the talks last year, has more or less been isolated now owing to internal political difference in Ceylon, the chances are that the majority group led by Mr. Senanaike may show itself more accommodating this time.

(Continued from page 401)

become the counterpart in international life of equality of opportunity in national life. And if it does, this war will have done nothing to end war. The whole notion of freedom of trade, as it has been handed to us by nineteenth-century imperialism, has become inapplicable to modern conditions. And such freedom can no more raise the level of prosperity than deprive potential Hitlers of a menacing war cry. The problem of European wars has to be studied against the background of primitive conditions over the greater part of the world and among by far the largest masses of humanity. But the Churchill-Roosevelt statement, if it breathes a lofty purpose, still dwells in the low plane of old feuds and quarrels. And even here, when one scans it closely, it is more like a hesitant declaration of dubious individual faith than a charter conferred on the peoples of the world by two of the most powerful nations.

To those who have had time to ponder over warnings against the plain danger of inflation, little need be said here in favour of price control. But men and institutions handling the media of exchange, as distinguished from commodities, are none the less concerned to emphasise how a runaway rise in prices will prejudice permanently the productive activity of the country. To Sir James Taylor's warning against the danger of an immoderate rise in prices, engendered by speculation, has been added another warning, clear and forceful from Mr. G. H. Hodgson whose vast and varied experience makes him cautious. In his speech at the Imperial Bank meeting last week at Madras he discussed the bearings of war finance for the body economic, and sought to show that the duty to save is as great as the duty to pay enhanced taxes. Saving stimulates banking progress also; but that is a minor consideration, when we look on it, as at present, mainly as an anti-inflationary factor, and in this case, the appeal to save is reinforced by a timely reference to the lightness of the tax burden in India despite the war. At any rate many classes can and must save more, and few will criticise the importance assigned by Mr. Hodgson to the need for saving and lending. In his review of the year's developments he made special reference to the recovery staged by the sugar industry and the stock position in the industry. He had much to say of the financial and fiscal developments of recent months; stressed the high stability of the giltedged market and passed on to describe the success of Government's borrowing programme. We had also a good deal to say about the expansion of the Imperial Bank's business in the midst of war. If Advances have not kept step with Deposits there have been other favourable factors, and the liability to E.P.T. was, as Mr. Hodgson remarked, a proof of the progress and prosperity.

'EAVESDROPPER'

NORTH WESTERN RAILWAY

Tender No. 212-S/2A.

Code word "ASSAM".

Tenders are invited on a rupee basis for purchase by the North Western Railway of "Globes of sorts" required during 1941-42. Tenders must reach office of the General Manager, N. W. Railway, Lahore, not later than 14.00 hours on Wednesday the 1st October, 1941, and will be opened in office of the Controller of Stores, N. W. Railway, Lahore, at 11.00 A.M. on the following working day. Tender forms and other relative documents can be seen at and obtained from office of the Controller of Stores on and from 25th August, 1941. The sale price of the tender is Rs. 3 Local and Rs. 3-8 Muffasil excluding the cost of specification and drawing.

Stock Markets to-day and to-morrow

HIGHER INDIAN IRON FINAL DIVIDEND

On top of the good news received during the latter half of the week comes the declaration of a higher final dividend by the Indian Iron and Steel Company, Limited for the year ended 31st March, 1941. The order to Iranian troops by the Shah of Iran to cease hostilities and the reports regarding the possibility of a successful conclusion to the negotiations between Japan and the United States have had a definitely encouraging effect on the markets. The Bombay market has been firmer and there has been a rise of more than 25 points in Tata deferreds.

On the Calcutta Stock Exchange a steadier feeling was noticeable even early in Friday's session. Late in the afternoon there were rumours regarding the possibility of a higher final dividend for 1940-41 for the Indian Iron and Steel Company Limited. The Committee of the Calcutta Stock Exchange has been intimated by the directors of the above mentioned Company that the final dividend for 1940-41 is to be Rs. 1¼ per share against Rs. 1¼ per share on the last occasion. This, with the interim dividend of As. 12 per share already paid, makes Rs. 2¼ per share against Rs. 2 per share for the whole year. The market has been agreeably surprised and the quotation for the shares has been marked higher at Rs. 33-2. Even at the time the interim dividend for 1940-41 was declared I pointed out that with production running at a very high level it would be possible to declare a higher dividend. There is scope for a further rise in the quotation for the shares.

* * *

The new order for 19.7 crores sandbags has naturally had an encouraging effect on both the jute and jute manufactures markets. Prices for jute shares also have been marked higher.

Of the 19.7 crores sandbags, 4.7 crores sandbags are on account of the Government of India to be delivered in three months from October to December this year and 15 crores bags on account of the British Government to be delivered in twelve months in equal instalments also beginning from October. These large orders have necessitated an increase in mills' working hours from 45 per week to 50 per week, from the beginning of September. The increase in production, it should be noted, will be barely equivalent to the additional production on account of the sandbag orders. The decision to increase production has not, therefore, had an adverse effect on prices for jute manufactures.

With the declared policy of the committee of the Indian Jute Mills Association to regulate production according to demand in relation to the shipping position there is no fear of a collapse in prices. In fact there is good buying for the forward positions, and with the emergence of a hopeful view regarding early and successful conclusion of U. S.-Japanese negotiations the freight position too might become easier. Jute mills can, therefore, earn higher profits during the current half year. The increase in working hours is to be in force till the end of the year.

* * *

Following the publication of the results of the *Bangalore Woollen, Cotton and Silk Mills, Limited* for the half-year ended June, 1941, the results of the *Buckingham and Carnatic Company, Limited* for the same period are even more impressive. The earnings of the latter company during the last half-year are even higher than those for the whole of last year. The net profit, before providing for taxation, is Rs. 42,88,226 against Rs. 21,97,943 for the previous half-year and Rs. 39,22,103 for the whole of 1939. The amount set aside to depreciation is naturally higher at Rs. 4,15,075 against Rs. 3,26,355 on the former occasion while the provision for taxation is substantial at Rs. 29 lakhs against Rs. 19.61 lakhs for the whole of 1939.

The increase in the provision for taxation is understandable on account of the various reports regarding the possibility of fresh taxation, but the directors seem to have been unduly conservative. Even after a substantial increase in profits the dividend on the ordinary shares is only slightly higher at Rs. 6-4 per share against Rs. 6 per share previously. The same dividend was paid by the *Bangalore Woollen, Cotton and Silk Mills, Ltd.* The sum of Rs. 2.75 lakhs is transferred to a newly created Raw Materials Fluctuation Reserve. The amount carried forward is Rs. 2,12,759 against Rs. 1,78,885 brought in.

* * *

The balance sheet of the *Indian Standard Wagon Company, Limited* for the year ended March, 1941 does not make very impressive reading. There is a decline in earnings for the year as the works were not fully employed in any section, due, in the main, to conditions resultant from the war. Difficulties in obtaining supply of raw materials particularly affected the wagon-building and spring-making sections, but war demands in other directions compensated in some degree. Prospects for the current year are not unsatisfactory.

The net profit, before providing for taxation for the year is Rs. 4,50,372 against Rs. 5,84,605 for 1939-40. The provision for depreciation is lower at Rs. 1 lakh against Rs. 2 lakhs previously. The provision for taxation is higher at Rs. 80,000 against Rs. 60,000. On the previous occasion there was a transfer of Rs. 25,000 to Dividend Equalisation Fund. The dividend on the ordinary shares has been maintained at 15 per cent. per annum tax-free.

* * *

Attention has been drawn to the merits of the ordinary shares of the *Chembra Peak Estates, Limited* on earlier occasions. The Company has made rapid progress during the past few years and the earnings for the year ended March, 1941 are the highest over several years. The net profit before providing for taxation and depreciation is Rs. 1,42,318 against Rs. 1,05,906 for 1939-40. After setting aside Rs. 8,012 (Rs. 24,577) for depreciation and providing Rs. 27,500 (Rs. 8,800) for taxation the dividend recommended is higher at 15 per cent. against only 5 per cent. on the former occasion. The allocation to General Reserve is Rs. 50,000 (Rs. 31,332). The ordinary shares presently quoting around Rs. 4-12 cum-dividend afford a return of 6.7 per cent. tax-free.

* * *

The conversion offer to holders of 3 per cent. bonds 1941 has been a complete success.

The total face value of the 3 per cent. bonds 1941 tendered for conversion in terms of the offer was Rs. 8.26 crores. Of this, Rs. 5.49 crores was converted into 3 per cent. 1949-52 and Rs. 2.77 crores into 3 per cent. 1963-65. As the total outstanding was Rs. 10.67 crores, the unconverted balance is Rs. 2.41 crores.

This amount can be easily paid out of Government balances in the middle of next month. One significant point to be noted in connection with the conversion is the fact that holders have shown preference for short-dated loans.

WATCH-DOG.

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, August 29.

THE Calcutta Stock Exchange has been slightly steadier during the period under review in sympathy with the strength of the jute and jute manufactures markets. But there has not been any appreciable increase in the volume of business and there is a tendency to await further developments. The joint military action by Britain and Russia in Iran had a slightly encouraging effect in mid-week. With the reports regarding negotiations between Japan and the United States operators are inclined to take a more optimistic view but there is no general broadening of interest as in the event of the collapse of Russian resistance Japan may revert to her former policy. The Poojah holidays will begin in the third week of next month. If there is no improvement in values before the end of next week it would be useless to look for any substantial rise in prices before the holidays.

There are no outstanding features of interest during the week. Coal shares have been in slightly better demand while jute shares have derived encouragement from the recent orders for sandbags and the increase in the number of working hours.

The giltedged securities section has been absolutely uninteresting and quotations are mostly unchanged. Business passing is on a very restricted scale. 3½ per cent. Paper is quoting Rs. 96. Among terminable loans, 2¾ per cent. 1948-52 were done at Rs. 97-11, 3 per cent. Defence Bonds at Rs. 102-2, 3 per cent. 1963-65 at Rs. 95-3, 3½ per cent. 1947-50 at Rs. 103-6, 4 per cent. 1960-70 at Rs. 110-11 and 5 per cent. 1945-55 at Rs. 111-7. Among provincial loans, 3 per cent. 1952 issues were done at Rs. 99-4. 5 per cent. U. P. bonds changed hands at Rs. 106-10. Cheap money conditions continue to prevail in the market and there has been a further decline in the treasury bills rate from six annas and eleven pies per cent. per annum last week to six annas per cent. per annum this week. As there cannot be any further appreciable decline in the average discount rate the Government of India have decided to increase the amount on offer to Rs. 2 crores from Rs. 1 crore.

Among public bodies' debentures, 3½ per cent. *Howrah Bridge* debentures changed hands at Rs. 99-10, 4 per cent. *Calcutta Municipal* debentures at Rs. 101 and 5 per cent. *Calcutta Port Trust* at Rs. 109-8. Industrial debentures have been in good demand. 5½ per cent. *Dalhousie Properties* changed hands at Rs. 102, 5½ per cent. *Dalmia Cement* at Rs. 105-8 and 6 per cent. *Nawabganj Sugar* at Rs. 102-4.

Preference shares have been well held and business has been on a restricted scale. In view of the rumours regarding additional taxation there is good enquiry for tax-free preference shares. Among first class jute mill preferences, *Adamjee* were noted at Rs. 159, *Birla* at Rs. 136-8, *Hastings* at Rs. 142, *Naihati* at Rs. 178, *Northbrook* at Rs. 150 and *Reliance* at Rs. 180. *Hukumchand* and *Soorah* were noted at Rs. 144-8 and Rs. 142 respectively. In other sections, *Steel Corporation* were steady at Rs. 122, *Burn and Co.*, 7 per cent. preferences at Rs. 176 and *Indian Standard Wagon* at Rs. 172-8. *Orient Paper* old preference shares were Rs. 110, *Titaghur Paper* First preferences Rs. 203-8 and *Associated Hotels* Rs. 99-8.

There are few transactions in the Bank section. *Central Bank* were noted at Rs. 47-4 ex-dividend, *Imperial Bank* contributories at Rs. 387 and *Reserve Bank* at Rs. 108-12.

Cotton shares have been better with *Cawnpore Textile* at Rs. 8-8, *Dunbar* at Rs. 248, *Elgin* at Rs. 24-4, *Kesoram* at Rs. 8-6 and *New Victoria* at Rs. 3-12.

With the better wagon position and the possibility of a further improvement in the freight position there is slightly more enquiry for coal shares. *Bengal* are nearly ten points higher at Rs. 372. *Burrakur* were Rs. 14-1, *Bokaro and Ramgur* Rs. 15-15, *Dhemo Main* Rs. 12-8 and *West Jamuria* Rs. 30-4. Among the speculative counters, *Parasea* were done at Rs. 1-6, *Samla* at Rs. 2-8 and *Talcher* at Rs. 1/10.

With the receipt of the new orders for sandbags and the decision of the Committee of the Indian Jute Mills Association to increase working hours to 50 per week from 45 per week as from the beginning of next week jute shares have been in greater demand and with a large amount of business passing prices are higher. *Anglo-India* are now quoting Rs. 358, *Clive* Rs. 27-3, *Birla* Rs. 29-4, *Howrah* Rs. 55-12, *Hukumchand* Rs. 12-4, *Kamarhatty* Rs. 528, *National* Rs. 23-11, *Megna* Rs. 50-8, *Nuddea* Rs. 68, *Reliance* Rs. 59 and *Waverley* Rs. 3-7.

In the Engineering section, quotations have been fluctuating in narrow limits. *Indian Iron* have been done between Rs. 31-15 & Rs. 32-4 while *Steel Corporation* have been more or less steady around Rs. 19-2. *Burn and Co.*, were Rs. 420, *Britannia Building and Iron* Rs. 11-12, *Braithwaite and Co.*, Rs. 9-9, *Hukumchand Electric Steel* ordinaries Rs. 14-1, *Marshalls* Rs. 2-6 and *National Iron and Steel Rs.* 9-8.

In the Sugar section, *Buland* were Rs. 18-4, *Carew and Co.* Rs. 11-8, *Ramnugger* Rs. 9-6 and *South Behar* Rs. 17-4. There has been a further rise in *New Savan* to Rs. 11-12 from Rs. 10-14.

In the Tea section there are no outstanding features of interest. *Central Cachar* were Rs. 71-8, *East India* Rs. 10-2, *Hasimara* Rs. 45-14, *New Chumta* Rs. 42-8 and *Tengpani* Rs. 19-8.

In the Miscellaneous section, *Burma Corporation* and *Indian Corporation* were done at Rs. 4-7 and Rs. 2-1 respectively. *B. I. Corporation* were Rs. 4-9, *Indian Wood Products* Rs. 27-12, *Calcutta Trams* Rs. 17, *Rohtas Industries* Rs. 21-8 and *Walford Transport* Rs. 1-8. *Dalmia Cement* were Rs. 13-8 and *Reliance Firebrick* Rs. 10-8. Among Paper shares, *Titaghur Paper* were dealt in at Rs. 19-11, *Orient Paper* at Rs. 13-14 and *Shree Gopal Paper* at Rs. 13. There is good demand for *Borooah Timber* which have been done up to Rs. 15-14.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, Aug. 28.

Money: Call money continued to be quoted at ¼ per cent.

Exchange Market: There is nothing important to report in this section, the rates remaining unchanged. Banks were selling T.T. on London at 1s. 5 15/16d. and buying three months' bills at 1s. 6 7/32d.

Securities: The giltedged market remained featureless due to the absence of any encouraging news from the war front and price movements were practically negligible. 3½ per cent. Paper remained unchanged at Rs. 96. Among other loans, 1948-52 were done at Rs. 97-12; 1951-54 at Rs. 99-13; 1963-65 at Rs. 95-1; 1947-50 at Rs. 103-4; 1960-70 at Rs. 110-8; 1955-60 at Rs. 113-14; 1945-55 at Rs. 111-8 and 3 per cent. 1946 at Rs. 101-15.

Shares: Business in the local share market was somewhat restricted as the market remained closed for two days during the week under report. The market took a favourable turn on Monday influenced by the joint military action in Iran by Russia and Britain. There was allround buying and prices recorded sharp improvements. Towards the close on Thursday, however, prices ruled easier due to reports of successful German advance in Russia and the rumours of the German claim to have cut the Leningrad-Moscow Line. Operators continued to adopt a cautious attitude and the closing prices were the lowest for the week.

Textiles: Mill shares were steadier. *Bombay Dyeing*, after opening at Rs. 1,221-4, closed easier at Rs. 1,215. *Century* on continued buying moved up to Rs. 509-8, closing a shade easier at Rs. 506. *Kohinoor* were in good favour at Rs. 478-8 on rumours that the Company is likely to pay an interim dividend. *Colaba* were steady at Rs. 208-8; *Central India* at Rs. 365-8; *Gokak* at Rs. 234-8 and *Svadeshi* at Rs. 364. In the Cash list, *Sholapoor* were done at Rs. 3,82 and *Vishnu* at Rs. 1,360.

Hydro-electrics: There were only slight changes in prices in this section. *Tata Power* improved to Rs. 1,740, while *Andhra Valley* were slightly lower at Rs. 1,721-4. *Tata Hydro* were unchanged at Rs. 191-8. *Bombay Suburban* came to business at Rs. 187-8 and *Ajmer* at Rs. 12-8.

Steels: Steel shares were marked down after a steady opening. There was some selling in *Tata* ordinaries and buying in deferreds in the hope that, when the scheme of conversion takes place, the ratio per deferred share might be 5½ or more. The ordinaries closed at Rs. 372-8 and deferreds at Rs. 1,997-8. The first preferences came in for business at Rs. 214 and second preferences at Rs. 147-12.

Banks: *Central Bank* changed hands at Rs. 46-12; *Imperial Bank* fully paids at Rs. 1,572-8; contributories at Rs. 387-8; *Bank of India* at Rs. 142-8 and *Reserve Bank* at Rs. 109-4.

Miscellaneous: *Belapur Sugar* continued to be dull at Rs. 227. *Bombay Burma Trading*, after opening at Rs. 470, closed slightly easier at Rs. 466-4 owing to the far eastern situation. *Associated Cement* were marked lower at Rs. 150-12. *Scindia Steam* ruled steady at Rs. 23-14. *Premier Construction* were slightly higher at Rs. 108-8. *Shivrajpur Syndicate* were done at Rs. 31-8; *Indian Iron* at Rs. 31-0 and *Bombay Tramways* at Rs. 158.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, Aug. 28.

The local market ruled very much steadier and a fair volume of business was put through. Mill shares ruled steady, while planting issues met with fair support. Sugar shares were unchanged.

Securities: Business in this section continued to be restricted, 3½ per cent. Paper remaining steady at Rs. 96. State Loans met with limited business, 3 per cent. 1956-61 *Mysore Loan* being done at Rs. 104-13 and 5 per cent. 1943-53 *Cochin Loan* at Rs. 105-8. Madras Provincial Loans were firm with 1952 and 1953 Loans at Rs. 99-5.

Mills: Prices were maintained in this section though there was some falling off in enquiry. *Buckingham and Carnatic* preferences came to business at Rs. 188; *Coimbatore Spinning* at Rs. 123; *Cochin Textiles* preferences at Rs. 111 and *Janardhana* ordinaries at Rs. 51. The *Buckingham and Carnatic Company, Limited* has declared a dividend of Rs. 6¼ per share for the half-year ended 30th June, 1941 as against Rs. 6 per share in the previous half-year.

Utilities: *South Arcot Electric* changed hands at Rs. 97, while *Cochin State Power* met with good business at Rs. 8-13. *Shahjahanpur Electric* were crossed at Rs. 6-12.

Plantations: Rubber shares, especially cheaper-priced ones, continued to meet with steady demand. *Be Be* were done at Rs. 7-5 c.d.; *Midland* at Rs. 6-14; *Tropical Plantations* at Rs. 18-14; *Kalpetta* at Rs. 23-4 and *Cottanad Plantations* preferences at Rs. 12-8. Renewed enquiry for the cheaper-priced shares resulted in a large turnover in the Tea section. *Chembra Peak* were done higher at Rs. 4-14 on the announcement of a dividend of 15 per cent. for the year ended 31st March, 1941 as against only 5 per cent. for the previous year. *Nilgiri Neerugundi* attracted support at Rs. 2-6-6 with buyers over. *Peria Karamalai* recorded business at Rs. 18-10 x.d.

Sugars: *Mysore Sugar* were unchanged at Rs 55, while *Travancore Sugars* improved to Rs. 15-4 on good demand. *Deccan Sugar* big shares were done at Rs. 215.

Miscellaneous: *Mysore Chemicals and Fertilisers* remained steady at Rs. 18-2. *Mysore Chemicals and Manufactures* came to business at Rs. 15-4. There were buyers of *Indian Steel Rolling Mills* ordinaries and the price closed higher at Rs. 8-4.

LONDON STOCK EXCHANGE

Rather steady conditions have been noticeable on the London Stock Exchange during the past week. The reports regarding the British entry into Iran had an encouraging effect earlier in the week. Giltedged securities are about unchanged, 2½ per cent. Consols being 81⅞, 3½ per cent. Conversion 99¾, 3½ per cent. War Loan 105 1/8 and 3 per cent. War Loan 101½. 3½ per cent. India Sterling Paper were noted at 98 5/8.

Among other sections, Tea and Rubber issues were unchanged while among Oils, *Anglo-Iranian* sharply reacted to 33s. earlier in the week on the reports regarding hostilities in Iran. There has, however, been a recovery towards the close to 37s. 6d. *Burma Oil* also are higher at 58s. Speculative mining issues have received support from the Cape. Home Rails have again been prominent, *Great Western* ordinary being £42, *Southern* Deferred £14 5/8 and *L.M.S. ord.* £15¾.

NEW YORK STOCK EXCHANGE

Wall Street was inclined to be irregular earlier in the week. Towards the close a firmer tendency has been noticeable with the British successes in Iran and the more hopeful Japanese situation. The reaction to the proposals for new taxation is keenly awaited. *U. S. Steel* were $58 1/8, *Anaconda Copper* $29¼ and *General Motors* $39¼.

(*Annual meeting 12th September, 1941 at 11 a.m.*)

Audited accounts for the year ended 31st March, 1941:—

During the year under review, the Works were not fullv employed in any section, due, in the main, to conditions resultant from the war.

Difficulties in obtaining supply of raw materials particularly affected the wagon building and spring sections, but war demands in other directions compensated in some degree. *Prospects for the current year are not unsatisfactory.*

Labour conditions generally continued satisfactory and no major difficulties were experienced. A dearness food allowance was granted during the year to all the workmen.

	Rs. As. P.	Rs. As. P.
After providing Rs. 1,00,000 for Depreciation, Taxation, and all other charges, the profit on the year's trading amounted to	2,70,371 10 7	
Add the balance carried forward from last year of	41,163 0 9	
Resulting in a balance at credit of ..		3,11,534 11 4
The Directors recommend that this sum be be disposed of as follows:		
Payment of Interest at 7% on Preference Shares for the year ended 31st March, 1941 absorbing	1,37,655 0 0	
Payment of a Dividend of 15% on the Ordinary Shares for the year ended 31st March, 1941 amounting to ..	1,46,193 0 0	
Balance Profit to be carried forward ..	27,685 15 4	
		3,11,534 11 4

Total ..		89,632 1 0	

During the period under review orders for the Company's Workshop have increased, but Building Contracts have been reduced on account of the War.

Both the Steel Contructural Shop in Howrah and the Woodworking Factory in Entally are working nearly up to capacity almost entirely on Government Contracts for Defence requirements.

The prospects for the near future have improved.

* *Less income-tax*

(*Half-yearly Meeting held 27th August, 1941*).

Audited accounts for the half year ended 31st march, 1941:—

Gross Earnings.—For the half-year were Rs. 6,50,342 which is Rs. 88,034 more than the earnings of the corresponding period ended 31st March, 1940. There are increases under Coaching of Rs. 57,436 or 14.24% and under Goods of Rs. 35,287 or 10.98%.

Working Expenses.—The Working expenses for the half-year were Rs. 2,24,586 *plus* Rs. 42,500 set aside to the Depreciation Reserve Fund, making a total of Rs. 2,67,086 which is Rs. 10,898 less than the figure for the corresponding period ended 31st March, 1940.

Net Earnings.—The Net Earnings for the half-year were Rs. 3,83,256.

Reserve Account.—The Total Capital Outlay of the Company at the 31st March, 1941 amounted to Rs. 51.50,003 against capital raised by shares and debentures of Rs. 45,00,000. The excess capital expenditure of Rs. 6,50,003 has been financed out of profits and is reflected in the sum of Rs. 5,90,000 standing at credit of General Reserve at 30th September, 1940. Profits have also accumulated in order to provide for further improvement of the Railway, the carry forward on Revenue Account at 30th September, 1940 amounting to Rs. 2,77,749. The Directors now consider it advisable that the profits so accumulated should be separated to Reserve in these Accounts.

Available Balance.—The balance available for distribution is—

	Rs.	Rs.	Rs.
Net profit for the half-year ..		1,08,283	
Balance brought forward		2,77,749	
		3,86,032	
Less—Transferred to General Reserve ..	2,60,000		
" Dividend Equalisation A/c. ..	40,000	3,00,000	86,032

Dividend.—The Directors recommend that the available balance be disposed of as follows:—

Payment of a dividend for the half-year at the rate of 10% per annum, less Income-Tax costing		59,375
Balance to be carried forward		26,657
		86,032

Managing Agents.—Messrs. Martin & Co.

Authorised Capital—Rs. 39,00,000 in 39,000 Shares of Rs. 100 each. Issued and Subscribed—Rs. 15,00,000 in 15,000 Shares fully paid up.

Dividend %	1½*	1½*	1½*	1½*
Carry forward ..	6,195	6,175	5,887	5,694

* Dividend on recept of amount from guarantor, less income-tax.
† Includes the amount of Rs. 43,333, Rs. 32,489, Rs 38,138, and Rs. 28,764, received from the guarantor in respect of the half-years ended 31st March 1941, 30th September 1940, 31st March 1940 and 30th September 1939, respectively.

Audited accounts for the half-year ended 31st March, 1941:—

Gross Earnings.—Gross Earnings for the half-year were Rs. 51,452 which is Rs. 9,230 less than the earnings of the corresponding period ended 31st March, 1940. There are decreases of Rs. 4,298 or 9.68 per cent under Coaching and Rs. 5,190 or 32.76 per cent under Goods.

Working Expenses.—The Working Expenses for the half-year were Rs. 54,538 which is Rs. 4,390 less than the figure for the corresponding period ended 31st March, 1940.

Nett Earnings.—The Net Earnings for the half-year were Rs. 3,086. As in previous half-years the guaranteed profits of the Company are reduced by the amount of Super-Tax paid and thus do not permit of payment in full of a dividend at the rate of 3½ per cent per annum.

Dividend and Balance.—The Directors recommend that the available balance be disposed of as follows:—

Payment of a net dividend of Rs. 15,352 as under:—

3½% on Share Capital Rs. 11,49,700 for the half-year ..			20,120
Less—Company Super Tax		1,362	
Company Income Tax		3,406	4,768
Net Amount for distribution			15,352
Balance to be carried forward			6,195
		Total ..	21,547

The dividend, if sanctioned at the General Meeting, will be paid on receipt of the amount due from the Government of India.

Managing Agents:—Messrs. Martin & Co.

† Includes Rs. 19,000, Rs. 19,000, Rs. 19,000 and Rs. 38,000 provisionally due from District Board for the half-years ended 31st March, 1941, 31st March, 1940 and 30th September, 1939 respectively.

(*Half-yearly meeting held 27th August*, 1941).

Audited accounts for the half-year ended 31st March, 1941:—

Gross Earnings.—Gross Earnings for the half-year were Rs. 2,39,061, which is Rs. 28,384 more than the earnings of the corresponding period ended 31st March, 1940. There are increases of Rs. 14,234, Rs. 14,100 and Rs. 50 under Coaching, Goods and Miscellaneous respectively.

Working Expenses.—The Working Expenses for the half-year were Rs. 1,87,209 plus Rs. 25,000 set aside to Renewal Reserve, making a total of Rs. 2,12,209 which is Rs. 2,497 more than the figure for the corresponding period ended 31st March, 1940.

Net Earnings.—The Net Earnings for the half-year were Rs. 26,852 or Rs. 25,887 more than the corresponding period ended 31st March, 1940.

District Board.—On the results for the year ended 31st March, 1941 the District Board of 24-Parganas is liable under its guarantee to the Company for a sum of Rs. 38,000 being the maximum liability of the Board in any one year. Credit was taken for Rs. 19,000 of this amount in the accounts for the half-year ended 30th September, 1940 and the balance of Rs. 19,000 is shown in these accounts.

Available Balance.—The balance available for distribution is—

Net Profit for the half-year ended 31st March, 1941 ..	29,750
Balance brought forward	36,302
Total ..	66,052

Dividend and Balance.—The profit for the full year ended 31st March, 1941 amounts to Rs. 34,431 which is entirely represented by the amount due from the District Board for the year. Steps are being taken to enforce the Company's claim against the District Board but, pending realisation of the amount outstanding, the Directors regret that the financial position of the Company does not permit of payment of a dividend. They, therefore, recommend that the balance of Rs. 66,052 be carried forward.

STRAW PRODUCTS LIMITED

Audited accounts for the year ended 31st December, 1940:—

The profit for the year, after making all usual allowances and Bonus, amounts to Rs. 3,67,670-7-1 from which has to be deducted the amount brought forward from last year, namely, Rs. 1,982-10-10, making the total sum available Rs. 3,65,687-12-3 The directors recommend that this sum should be disposed off in the following manner:—

	Rs.	As.	P.
Depreciation for the year	88,935	0	0
Dividend for the year ended 31st December, 1940 on 75,000 Ordinary Shares at Rupees two per share (out of which an Interim Dividend at Re. 1/- per share has already been paid) ..	1,50,000	0	0
Balance to be carried forward to the next year ..	1,26,752	12	3
Total ..	3,65,687	12	3

In spite of serious war situation during which the Directors had to face numerous difficulties in obtaining certain machinery parts and accessories, the Company has shown good results, which the Directors think are very satisfactory.

Besides showing the above good results in the first year of its actual working, the Directors have decided to extend the Factory and have been able to get most of the machines manufactured in this country. During these days when it was difficult to obtain any machineries, accessories and other spare parts from foreign countries, the Directors have arranged with some Indian Firms for the manufacture of certain machines and have themselves arranged a large-scale workshop and moulding furnace in the Factory in which they have arranged to manufacture many machineries and their component parts at a cheaper cost as compared with the prices being charged by the foreign manufacturers. The Directors hope that with the addition of the plant the production will increase and the manufacturing cost will be more economic. Even with the present plant the Mill is getting 25% more production than what was guaranteed by the Machine Suppliers.

Director: Mr. Ram Kumar Newatia.

Synopsis of the Balance Sheet as at 31st December, 1940:—

	Rs.		Rs.
Capital paid up ..	7,49,895	Gross Block ..	8,05,781
Forfeited share A/c. ..	40	Depreciation ..	94,027
Current debts ..	1,06,543		
Profit & Loss ..	2,01,808	Block (Net) ..	7,11,754
		Stores & spares ..	28,459
		Stocks	1,02,226
		Outstandings ..	1,70,202
		Cash and other balances ..	45,645
Total ..	10,58,286	Total ..	10,58,286
		Total liquid assets ..	3,46,532

FORTHCOMING MEETINGS

MARKET POINTERS

Jute Mills Working:

The recommendation that the working hours of the jute mills should be increased from 45 to 50 hours per week with effect from September 1, was made to the member mills by the committee of the Indian Jute Mills Association at a special meeting held on Wednesday.

It is intended that these enhanced hours should continue until the end of the year, according to a press note issued by the Mills Association.

* * *

Huge Sand Bag Order:

Two further orders for 15,00,00,000 and 4,70,00,000 sand bags have been placed by the Controller of Jute with the Indian Jute Mills Association. Of these, the first one will have to be given delivery of between October, 1941, and September, 1942, while the later, namely, for 4,70,00,000, to be delivered between October and December, 1941.

* * *

Indo-Afghan Trade:

That the exports to Afghanistan from India during the year 1939-40 have been the largest as compared with the preceding two years, is revealed in the annual report on the working of the Indian Trade Agency, Kabul.

Cotton piecegoods constituted 39 per cent of the total exports, while silk manufactures were thrice as much as in the preceding year. The boots and shoes, supplied by India to Afghanistan during the period, were worth Rs. 2,33,688 as against Rs. 1,70,121 in the preceding year. The import of leather showed an improvement from Rs. 1,50,063 worth of goods in the preceding year to Rs. 1,86,781 in the year under review.

The increase in the import of cement, recorded in last year's report, showed a further improvement. According to the Trade Agent the consumption of cement in Afghanistan is likely to increase in the future. Hardware, Cutlery and other iron and steel materials accounted for an increase in the value of imports by Rs. 93,952 over the figures of the preceding year.

The imports of paper from India showed a big increase from Rs. 39,263 worth in the previous year to Rs. 1,29,695 in the year under review, which was assigned to the stoppage of imports from foreign countries owing to the outbreak of the war. The advance recorded by the imports of tea on the figures of the preceding years was also very good. The Agent, in this connection, remarks that India has not only imporved her exports of black tea, of which she is the sole supplier to Afghanistan, but has also secured a predominant share in the supply of green tea at the cost of the other two rivals, viz., China and Japan.

* * *

Indian Sugar Cultivation:

This year's estimate of the area under sugar cultivation is 1,800,000 acres against 2,358,000 acres at the corresponding time last year, according to the first forecast of sugarcane crop for 1941 in the U.P. The average acreage for the five years 1934-38 was 2,059,022 acres. The outturn per acre, according to crop reports is estimated at 73 per cent of the normal. It may be noted that the average of the percentages reported in the estimates of the last ten years is 80 per cent. The growth of the crop, says the review, is retarded by lack of rain in the western and central districts.

Owing to the enforced delay in sowings and to the restrictions on cane crushing imposed on mills and the low price of gur resulting from the heavy production of last year, there has been a shrinkage in the area under cane all over the province.

* * *

G. I. P. Railway:

The approximate earnings of the **G. I. P. Railway** for the 10 days ending August 20 amounted to Rs.52,95,000 while the actual earnings for the corresponding period last year came to Rs.34,86,000.

THE INDIAN IRON & STEEL COMPANY, LIMITED.

NOTICE

In view of the uncertainty of mails from and to the United Kingdom the publication of the Directors' Report and the Accounts of the Indian Iron and Steel Company, Limited, for the year ended 31st March, 1941, which are to be published simultaneously in India and England, will be delayed. All possible steps are, however, being taken to have matters expedited. In order to enable shareholders to obtain payment of their dividends as soon as possible, however, the Directors have sanctioned the payment by way of an ad-interim dividend of Rs. 1-8-0 per share on the Ordinary shares of the Company ranking for dividend for the year ended 31st March, 1941, which, shareholders must understand, will be the final dividend for the year. The Transfer Books of the Company will be closed from 10th to 23rd September 1941, both days inclusive. Payments will be made on and after 23rd September to those members or their mandatees whose names appear in the registers on the 9th September 1941.

By order of the Board,
BURN & CO.
MANAGING AGENTS.

Calcutta,
30th August, 1941.

Insure and Increase Nation's Strength

Financial Independence of the individual is the measure of Nation's financial strength.

In this hour of world turmoil, all Life Insurance Policy-holders should take stock of their insurance cover and ascertain just how strongly they are fortified against the unpredictable that lies ahead.

And, those individuals who have not yet made provision for their protection need do so without delay and thereby contribute towards Nation's strength.

WORLD OF INDIAN FINANCE

Friday Evening.

THE state of the money market shows no change with interbank call money in plentiful supply and with trade demand at ¼ per cent in Bombay and ½ per cent in Calcutta; with banks being but reluctant takers of term money. September may be said to be the peak of the slack season; apart from the tenor of money rates and the sentiment in the money market, further confirmatory evidence is to be found in the rapid piling up of cash in the hands of banks. The latest return of the bank in the banking department shows cash of member banks at Rs. 45.17 crores which compares with Rs. 41.74 crores on August 22. The expansion in the cash balance of banks during August is on a substantial scale. As on August 1, deposits maintained by scheduled banks with the Reserve Bank were Rs. 30.45 crores. The increase in the course of August is, thus, of the order of Rs. 15 crores. The Government's Treasury Bills policy has been an important contributory factor towards this rapid accumulation of cash with banks. There were four days in the last month when tenders were invited for Treasury Bills; and on each of these tender days the amount offered was only Rs. 1 crore. That is to say, Treasury Bills sales in the course of August fetched only Rs. 4 crores for the Central Government. On the other hand, Treasury Bill maturities in that month were no less than Rs. 14.66 crores. On balance, the Central Government would thus have paid out Rs. 10½ crores in respect of Treasury Bill transactions. It is also noteworthy that, in the week ended August 1, the Government of India found their cash position so comfortable that they were able to utilise Rs. 10 crores of the sterling receipts from the British Government for the strengthening of the sterling reserves in the issue department of the Reserve Bank. In other words, the ways and means machinery has been able to stand in the course of August a strain of over Rs. 20½ crores in respect of these two items. Towards the end of the month, however, the drain thus caused on cash balances of the Central Government has made it necessary for the Treasury to have recourse to a ways and means advance of Rs. 5 crores from the Reserve Bank. It must also be added that, as from September 2, the weekly offer of tender Treasury Bills has been increased to Rs. 2 crores. It is, however, significant that sales of tap bills have not been so far resumed. There will be five tender days in September; and, if sales of Treasury Bills should be on the basis of Rs. 2 crores of tender bills per week, the total realisations in the month would amount to Rs. 10 crores. Treasury Bill maturities in September are over Rs. 14.87 crores. This would mean that Treasury Bill maturities will exceed fresh sales of bills by Rs. 5 crores in September. By the end of August, the Government find themselves obliged to take a loan of Rs. 5 crores from the Reserve Bank on ways and means account. The month-early disbursements must account for the ways and means debt rising to, perhaps, Rs. 7 crores. There is, thus, a debt of Rs. 7 crores at the very beginning of the month; and Treasury Bill transactions on the present basis would necessitate a further increase of the debt by Rs. 5 crores. In these circumstance, it seems reasonable to infer that, for relief in the ways and means position, the Government should be counting on a substantial sterling payment by the British Treasury. The effect of these inter-governmental transactions is sure to be reflected either in the Reserve Bank returns for the last week of the month or the first week of the month. The Reserve Bank returns for August 29, bear no impress of any such inter-governmental transactions. It is therefore quite on the cards that the next return which will be on September 5, would disclose a substantial sterling receipt, thereby enabling the Central Government to liquidate the ways and means loan and to strengthen their cash position.

The suspension of Tap Treasury Bills in July and the subsequent reduction in the weekly offer of tender Treasury Bills from Rs. 2 crores to Rs. 1 crore led us to connect these developments with the possibility of the closing of the lists for the second defence loan and the announcement of the terms for the third defence loan. Sales of tender bills had remained at Rs. 1 crore throughout August; the conversion plan for the 3 per cent 1941 loan was announced, and the list had opened and closed; and nothing has so far happened to lend confirmation to the forecast of *Indian Finance* that these changes in Treasury Bill operations foreshadowed a change in the plan of defence loans. On the other hand, the weekly offer of Treasury Bills has again been raised to Rs. 2 crores. This may seem to indicate that our interpretation was a trifle too far-fetched and that the reduction in the sales of Treasury Bills had no more significance than that the Central Government had an extremely comfortable cash position. If, following the recent increase in the weekly offer of Treasury Bills, resumption of intermediate Treasury Bills is announced in the course of September, it may be taken as reasonably certain that no change is intended for the time being in the defence loan plans. Whether sales of tap bills will have to be commenced, can be clearly seen only after we know the amount of stering payment that the Indian Government received from the British Government early in September. If the sterling payment thus received is in the vicinity of Rs. 10 crores, it might be possible for the Treasury to meet the commitments in the course of September with no more than Rs. 2 crores secured by sales of fresh Treasury Bills. Even so, it might be found necessary to take a ways and means advance towards the end of the month, as payment has to be made on September 15, to those holders of 1941 loan who have not availed themselves of the option to convert. While we analyse the alternatives open to the Government for ensuring the smooth functioning of the ways and means machinery, it is well to realise that the alternatives open to them are so many that some of these adjustments of the ways and means problems may be predicted as certain.

On September 2, applications received against Rs. 2 crores of Treasury Bills offered were Rs. 3,12.50 lakhs. The average rate of

The Telephone Number Cal. 3624 will remain the same.

May 26th, 1941
CALCUTTA

Managing Editor.

Finance Abroad

Friday morning.

THE foreign exchange market in London displays few changes, and its former sensitivity to events has practically disappeared. Though there has been mention of a loan for Iran under conditions it is not known how Iran's currency will be linked, whether its relations to sterling or the rouble would remain unchanged. The maintenance of financial and other connections with Iran in spite of the four days' war has been indicated but it is not known how trade with Iran is to be promoted under various territorial guarantees. The notable expansion of imports from India in recent months after the large setback recorded in 1939-40 shows that Iran's trade and currency will be shaped by relations with India. It is however doubtful whether the Political Department will have a say in the impending settlement. There must be a new clearing arrangement and if Iran is to be a route for supplies to Russia, the source of supplies for instance of jute, gunnies tea etc., must have something to say about exchange and clearing arrangements. The sharp rise in marine war risk premiums about a fortnight ago was the first signal of what was to come. There has been no indication that the 5 per cent premium has been lowered yet with Syria a non-enemy territory at present. India must be prepared for a new alignment of trade and finance. For a long time the rupee had been current in Iraq and it is worth asking if new arrangements will cover special rates for the Iraqi and other Eastern currencies. A certain amount of latitude in regard to exports and imports of silver may be demanded and it may be suggested that the existing relaxations in respect of pilgrim traffic with Arabia may be applied in order to encourage trade between India and the Middle East. The evolution of a new block dealing in the rupee rather than the pound may be envisaged but the lower silver content of the Indian coin and the stringent regulations concerning bullion dealings may retard its growth. But the government of India has plenty of silver and India's trade with the Middle East and East Africa can only be stimulated if a certain amount of freedom is available. If Abyssinia is open to Indian trade it can only be on the basis of exchange in silver, for coffee and hides are plentiful in India and the Abyssinians must have silver to sell be on they can take cloth. The building up of a silver bloc may seem fanciful at best but there is a sound case for the restoration of freedom to buy and sell silver. There may be keen demand for Indian manufacturers but many countries have no bullion to offer in exchange and loans of surplus silver to Abyssinia by the India Government for instance may prove an advantageous investment, better than the deputation of officers.

The end of August saw what appears to be a reversal of the easy conditions prevailing in London. It appears that demand for Treasuary Bills last week was not very keen to judge merely by the high quota for the market. The discount and call rates are unchanged over a long period but banks called in short loans and billbrokers are said to have turned to the Bank of England. It must have been unusual for the market to look beyond the Clearing Banks, and the chronic shortage of bills had evidently disappeared for the nonce as the Treasury Bill rate in London rose sharply last week. The position is expected to change this week as the Banks retain larger deposits with the Bank of England and such demands as are made for Treasury deposits will not cause any strain. It is stated that only £ 30 million will be wanted but the actual volume of six month deposits is not known. It may be over 400 millions. It is however certain that the expansion in note circulation leaves plenty of loanable money with the market.

Economic warfare on the part of a neutral is decidedly one of the peculiarities of this age. The U.S.A. has extended the operation of the freezing order by imposing a condition that sequestered tonnage allotted for the use of Latin America cannot be turned into a source of income for the occupied countries and diverted on any pretext to the Axis countries. Evidently these conditions have been attached to satisfy the British claim to many of the ships as spoils of war, but the transfer will inevitably accentuate the U.S. need for additional tonnage. Mr. Sumner Welles has, however, said that payment to Denmark etc. will be made at some date in the future. That the shipbuilding programme is in itself a big item in the American plan to aid the democracies is clearly established by the comments of Admiral Emory S. Land. The President of the U.S. Maritime Commission has made a pleasing speech by announcing that the programme is ahead of schedule. He said nothing about 1941 tonnage, but indulged in a prediction that new ships totalling over 12.41 million tons deadweight would have been placed in service between the beginning of July and the end of 1943. The new tonnage estimate does not cover the vessels already provided under the Maritime Commission's normal programme or the light craft which the Commission will order. Admiral Land is said to have delivered a progress report to inform Congress that the U. S. Commission is doing its job. He affirmed that 130 to 134 new vessels would be forthcoming soon from U.S. yards which are building ships in haste. A big increase in 1942 is also foreshadowed. He estimated output for the first quarter at 90 ships of 1 million tons; for the second quarter of 146 ships of 1.4 million tons for the third quarter of 154 ships of 1.64 million tons and for the final quarter of 184 ships of 2 million tons. The 1943 programme is even more ambitious for a tonnage of 2,270,000 tons is expected in the first quarter. Admiral Land thinks that the U.S. industry can produce more in a quarter than it usually does in a year.

Admiral Land's statement indicates that expenditure under the Lease and Lend programme in 1942 will surpass all anticipations. Its reactions on industrial production must be immense, particularly, in view of the fact that the naval programme too is gigantic. The Navy department has been at it for over a year, and reports that 213 new vessels have been commissioned and 136 new craft are on the stocks at present. Appeals for full all-out production figure in all speeches today and the Labour Day speech of Mr. Roosevelt has been reinforced by a book addressed to Labour organisations. These appeals are more than ever necessary to convince U.S. labour that any invasion of priveleges must be temporary. The U.S.A. has already experienced difficulties in regard to steel, and producers called upon to provide 10 million tons over capacity were not bucked at all.

Mr. Roosevelt keeps on creating jobs for his revised version of a New Deal for Europe and sending Mr. Biggers to London and Mr. Harriman to London are all quite in the day's work. He has set up another coordinating board of seven with the Vice-President over it the notoriously tongue-tied Vice has said his piece about output. There is a new job for Mr. Nelson and the Office of Production Management is to play second fiddle. There is a prospect of coal shortage in Britain and miners are to go back to their pits. Railways have asked for compensation amounting to 43 millions—hard on the Treasury—and the need for assistance from America to Britain can be readily inferred from the fact that the withdrawal of the invasion barges is treated as a feint. The Foreign Secretary at Coventry spoke at length on production. It caught more than one answering echo in the press. America too is buckling down to the job of production. The tune has been called; the piper has to be paid. The tax bill has been amended by the Senate Finance Committee. Four new levies are recommended. An enchanced surcharge on telephone bills, theatre and other amusement tickets and excise on electric light bulbs are among levies approved by the Senate Committee. The entertainment tax has been raised more than once in Britain. In the U.S.A. it is now 15 per cent as against 10 per cent previously. The corporation tax is raised to 6 per cent in the case of companies with an income below 25,000 dollars per annum and raised to 7 per cent from 6 per cent where the annual income exceeds 25,000 dollars. The local telephone bill surcharge has been raised to 10 per cent from 5 per cent and the tax on electric bulbs is new; presumably it is an excise duty though a special sales would be in order.

As to the U.S. citizen's part in this business of paying for production we have

India's rights in Burma

FEW decisions of the Government of India have come in for such widespread and unaminous condemnation as the acceptance of the terms of the Indo-Burmese Immigration Agreement negotiated by Sir G. S. Bajpai. Public opinion lost no time in raising a strong protest against these proposals; for, not only are our rights in Burma of vital importance, but the proposals are such as to call for no prolonged or laborious appraisement. The Federation of Indian Chambers of Commerce, the All-parties meeting held at Madras in July 28 and the Imperial Indian Citizens' Association have now forwarded to the Government of India a memorandum which compels ready agreement with its main conclusions. Calcutta is shortly to have a representative meeting of its citizens to reinforce the demand made in the memorandum. Though the terms of the agreement were announced at a time when the public was preoccupied with the changes at the Centre, opposition to the agreement has been vigorous and well-informed.

In the memorandum under comment, the signatory associations have made the demand that the whole question be gone into **de novo**. It may appear at first sight not only extraordinary but also unreasonable to ask that the entire work of the Bajpai Delegation should be scrapped. But a perusal of the memorandum will suffice to show that nothing short of a fresh start will suffice. To defy or ignore Indian claims or susceptibilities is in negotiators in India's behalf too common a failing to call for mention. But the speciality of the Indo-Burmese Agreement is that it runs counter to the letter and spirit of the Government of Burma Act and the Instrument of Instructions given thereunder, to all notions of domicile under international law, to all the bonds, economic, political, cultural and historic that have subsisted and must persist between India and Burma, and most of all, to the impressive warnings uttered by Mr. Baxter against certain kinds of unwise decisions on this question of immigration into Burma. An agreement that has defied so many salutary rules and principles naturally defies also any attempt at mere revision or reconsideration.

India's relations with Burma are, indeed, so unique in the history of inter-racial relations that one must be prepared for special efforts to understand the problem on hand and to devise the remedies that will fit the case. India and Burma are unique in that till recently they had neighbourly feelings, though—how sad we have to say, though—they have been neighbours. Mr. Baxter aptly observes in his report:—

"Migration from India to Burma is no new thing. It has been going on as far back as Burmese history can be traced through its chronicles and legendary lore."

It is no surprise: for, India when she was great, created a greater India that was to survive even her own greatness. The cultural bonds between the two are so strong that the end of the present embitterment can be reasonably hoped for. But on this basis of cultural affinity has been superimposed the doings of an extraneous authority which at one time knit them together in common administration and citizenship, allowed free immigration, encouraged a tangle of consequences of the separation of Burma as still being slowly unfolded. But one may venture to say that it will not be long before the evils of this short sighted step will be fully made known to its authors. Meantime, India suffers, though only in a more arresting way than Burma, where a section of opinion may be content with the cheap sensation of slave baiting slave.

The problem of Indian immigration into Burma and Indian's rights in that country arises from the sudden and flat denial of history symbolised by the separation of Burma. India is still as much in need of greater India as ever before in her history. Though it might smack of German **Lebensraum**, it is true that, to the lands brodering the Indian ocean and the islands therein, India has a natural right. Not a right to exploit those places or take the bread out of the mouths of their inhabitants, but to provide the labour, capital and other assistance that they need and that they can avail of without detriment to the interests of their own native population. It is idle to compare the claims of the Indian in Burma to those of any imperialist nation, for the obvious reason, that the former did not carve his place in Burma, or attempt to keep it, at the point of the bayonet. In the case of Burma, unlike South Africa or even Ceylon, there was a whole century of common citizenship and the protection of a common administration and a common system of laws.

It is in view of this that when separation was decided on and the Government of Burma Act was before Parliament British politicians and statesmen were careful to state the limits of Burma's rights to change the status of Indians in that country and the rights of India in respect of immigration and trade. The joint memorandum aptly recalls some of those assurances. But it is not the observations in the course of a debate, but a clause in the Act that India can now take her stand on. Under subsection (3) of Section 44 of the Government of Burma Act, 1935, no "disability, liability, restriction or condition" can be imposed on British subjects domiciled in India and subjects of an Indian State "in regard to travel, residence, the acquistion, holding or disposition of property, the holding of public office, or the carrying on of any occupation, trade, business or profession." Earl Winterton in fact moved an amendment to restrict the powers of the Burma Legislature to the regulation of the immigration of unskilled Indian labour only into Burma and while it was not accepted for the reason that it was difficult to define "unskilled labour," Sir Thomas Inskip gave the assurance that

> the proposals contained in this clause together with certain suggestions which were made by the Joint Select Committee in their report, are intended to be incorporated in the Instrument of Instructions, which, together with one or two other clauses in the Bill will it is hoped effect the desired object.

When the Instrument of Instructions was under the consideration of the House of Commons in November 1936, Mr. Butler, speaking on behalf of the Government said,

> Therefore I think, the fear that has been felt on this score by Indians who wish to enter Burma may be quietened in view of the contents of Paragraph XX of the Instrument of Instructions.

and added

> the reason that we cannot make a simple rule is that we have to make this differentiation in regard to unskilled labour while at the same time we do not want to stop the free entry of Indians in general.

It will be clear from the foregoing that the Burma Legislature was not intended to be free in this respect and that, at any rate, any alteration of India's rights was to be restricted to the regulation of unskilled labour. The distinction is quite understandable; for while it is reasonable that Burma should be free to regulate large-scale additions from abroad to its inhabitants it should not be allowed to affect the right of Indians to engage in business or the professions or to continue to look after their business in that country. But the Bajpai Delegation has altogether ignored all these considerations and distinctions and produced a scheme in which Indians in Burma are classified according to altogether novel principles of domicile, immigration is restricted, Indian businessmen subjected to the vagaries of official permits and India humiliated with special laws in regard to the marriages of Indians with Burmese women.

The memorandum of the Federation and its joint signatories thus sums up the obnoxions features of the proposed agreement:—

> The acquisition of immigration permits on Indians resident in Burma or on those who have business connections with Burma, the restriction of the period for which the permit may be given, the fixing of quotas for persons other than those coming under the category of unskilled labourers, the imposition of a literacy test, the demand for the payment of residential fees and deposits and the insistence of the clauses "have made Burma their permanent home" and "regard their future and the future of their families as bound up with its interests" as conditions precedent for the acquistion of the Burma domicile.

When one looks at these obnoxions features of the agreement, it is hard to realise how even the Government of India found its way to accept it. Apparently, the authorities think that in the conditions of the present war the susceptibilities of every people on earth except the Indians should be respected. Every obvious consideration which argues for the rejection of the proposals has been rejected. It matters little to them that on a question like this the representatives of the provinces most concerned should have a say in the matter. They do not stop to reflect that the British Government themselves offered certain assurances about protection of the rights of Indians and that they thought it so important that they incorporated clauses to that effect in the Government of Burma Act. What is most distressing is that every effort has been made to invest the Agreement with the character of a fait accompli and to render nugatory the formalities of consultation with non-official opinion resorted to as the inescapable minimum. Such a deal cannot stand; and the Government of India should need no formidable agitation to undertake a reconsideration of the whole question.

Groundnut Problems

NOT many will forget that the war has cast a shadow over India's export trade, and the melancholy experience of 1914-18 has been repeated in more than one case. It is quite certain that groundnut is the commodity worst affected by the war and a year ago, the future of this crop was discussed anxiously and frequently. It is likely that crop restriction, aided by the periodical buying in London by the Food Ministry at fixed prices will sustain the groundnut market in India though the greater part of the improvement recorded this year must be ascribed to the general upswing of commodity prices. As to the course of demand and the stability of prices that nothing like an assured prophecy is possible; but many who argue on the basis of current crop forecasts will deduce that there is nothing to compromise the existing level of prices. For those desirous of getting nearly all the information available at present the report of the marketing adviser to the Government of India published this week may be recommended. In form and essence it corresponds to the first and most famous report, that on linseed. It may not afford much information to those who already know enough about the oilseeds trade but it will assuredly indicate how improved organisation can help the grower. The main conclusions drawn in the report are likely to find support. For those desirous of adding to the facts brought together in a recent volume, published by the Annamalai University in its Economics series under the title Groundnut, the marketing report may be recommended. The usual statements as to the growth of the trade in groundnuts are reinforced by certain little-known facts. India's production of groundnut oil for edible and industrial purposes is increasing. The average production for the five years from

1933-34 to 1937-38 is estimated at 336,000 tons indicating that India which is the largest producer of groundnuts finds an expanding market at home. Though China has ceased to be a formidable competitor, there are rivals in West Africa, Burma and the U. S. A. which produces linseed and soya beans as also peanuts. The average yield per acre in India is low at 900 lbs. per acre compared with 1,600 lbs. in China and 2,200 lbs in Mauritius. The extension of the acreage under groundnuts belongs to this century and progress has been most rapid in the Madras Presidency where it is the most important crop grown for export. Madras is also the most important consumer of groundnuts with a per capita consumption of 3.36 lbs.

Though an increasing proportion of India's groundnut crop has gone into internal consumption, Madras and Bombay are still largely dependent on foreign markets, and the loss of trade with Europe has upset the agricultural economy of two provinces at least. It is hardly necessary to predict what will be the volume of exports or the state of demand in the coming season, but there is no doubt that there will be a serious fall compared with the record level reached in 1938-39. Of the former markets only the U. K. remains, and it is admittedly doubtful if one country which took on an average only 20 per cent of India's groundnut exports can make good the loss of the French, Dutch, Italian and German markets. It is quite likely that France is untroubled by the cessation of supplies from India because Senegal and other colonies provided usually fourfifths of the requirements in most years. But India will continue to feel the loss of fourfifths of an export trade that brought in on an average over Rs. 11 crores every year. Some compensation may be provided by an increase in exports of groundnut oil and cake to the U. K. and the Colonies. but not much can be expected of Burma whose offtake is governed by the rise and fall in home production. It is, therefore, certain that oilcrushing must be developed in India. Though statistics are incomplete it is known that 840,000 tons of kernels equivalent to 1.2 million tons of raw groundnuts are taken by factories. It is estimated that only an eighth of the total annual production is taken up for seed and one-sixteenth for eating, and as much as two-fifths is taken for crushing. The Khandesh crop is preferred by crushers and the total production of oil and cake is placed at 336,000 tons and 504,000 tons respectively.

That groundnut oil is a substitute or an adulterant is a commonplace but less familiar is the relation between the prices of groundnut and other edible oils. Demand from export markets fluctuates, and it is the latter fact that may stand in the way of rapid development of the oil-crushing industry, though it may be plausibly argued that limitation of imports of copra and cocoanut oil will be of advantage to the groundnut crusher, as also the Indian cocoanut grower. Madras provides about threefourths of India's total exports and the uninterrupted extension of cultivation at the expense of other oilseeds until the Great Depression is illustrated by the development in the single district of South Arcot covered by Dr. Naidu's investigation. In spite of a fall in the average yield per acre in recent years it is certain that this district is confronted with unusual problems for which no one remedy can be treated as complete or final. It is, however, possible to suggest that the inter-provincial trade can be developed and the actual proportion of crop consumed can be increased.

The blow to India's export trade last year came after a marked improvement in prices with the average price in London recovering to the level of 1937-38. As in the case of jute the war seemed to promise satisfactory conditions. But the collapse of France introduced unusual complications, and the chronic shortage of shipping compelled the Export Advisory Council to devote special attention to the surplus. There have been violent price fluctuations in the past, and Nigerian kernels have often been at a premium compared with Coromandel nuts, but never has there been such sensitiveness to London prices. Though Bombay mills in many years have paid better prices than shippers it is generally known that export demand settles both the volume and average value of groundnuts. There are however various differences as between various centres and the division of trade, is a big factor. Whatever extent of loss has been ascribed to the Ottawa Pact, it has fallen on groundnuts and Colonial preference in France has hampered recovery since the depression. Variations within India are not entirely due to seasonal factors and if due regard be paid to the persistent depression in prices since 1933, as compared with the piping lines after the last war, it will be agreed that grading and improved marketing are required. The lack of defensive organisation for the benefit of growers is universally deplored. But market committees and correct weighment cannot altogether restore health. The adoption of a standard contract is recommended at least for the elimination of malpractices rife in the trade but the major factor in better prices must be an improvement in quality.

A higher oil content or a larger percentage of free fatty acid is required by such new consumers as the soap and vanaspati or vegetable ghee factories. It is interesting to note that legislation for the restraint of the sale of vanaspati is not generally approved, and it is urged in the marketing report that vanaspati should have its proper place in the dietary of the country. Though many cling to the view that co-operative marketing societies will lead automatically to an improved return to the producer, it is doubtful whether in the circumstances of to-day, anything but a drastic curtailment of cultivation will help. The official policy is and will be crop restriction and it is satisfactory to note that the shortage of the summer crop underlies the advance in prices reported since June. The retention of the crop by the grower, until the nuts are dry and mature, is advocated for several reasons but the necessary financial assistance to the grower in the interval can hardly come when warehouse facilities are negligible. The wide adoption of decorticators has led to an unexpected extension of the trade but the nature and functions of various intermediaries are hardly indicated. It cannot be contended that all are superfluous or parasitical and as everybody knows produce finance is invariably provided by the private trader. The suggestion that commercial organisation will undertake reform of the trade for its own sake appears dubious but all will agree that only a lower margin for refraction will raise Indian nuts in the esteem of all markets.

Editorial Notes

Burma's Trade

A CONSIDERABLE increase in exports is the main feature of Burma's trade in the first quarter of 1941-42. The value of exports rose by nearly Rs. 3 crores compared with the first quarter of 1940-41 while the value of imports was virtually stationary at Rs. 7.17 crores. The advance in shipments of rice by as much as 200,000 tons explains the increase of Rs. 3.23 crores recorded under the head. The outstanding features of Burma's trade since Separation are the rapid recovery in exports after the violent fall recorded towards the middle of last year and the continuous fall in imports after the last month of 1940. It is noteworthy that the index number for Burma's exports is over 120 whereas the index number for imports has dropped to below 100 the figure for the base year 1936-37. A distinctive feature of the period has been the high stability of trade with India with imports showing certain marked fluctuations though charts might suggest that the period of large exports to India coincides with the period of smaller imports. It is, however, evident that certain imports from India show contra-seasonal improvement. The April/June figures reveal increases under cotton yarn and twist, metals, coal and gunnybags. An abnormal increase under yarn alone has been reported showing that the importing country has benefited. Exports to foreign countries have increased during the first quarter whereas exports to India compared with the total for the first quarter of 1940-41 show a fall in value. Imports from India show an increase compared when the corresponding period of 1940-41; but the simultaneous decline in imports from other countries shows that Burma has come to rely to an increasing extent on India for her imports. Burma is in the unique position of reporting a greatly improved balance of trade for the first 3 months of this year owing to the improved trade turnover, especially, with India. The trade returns covering the first quarter of reciprocal preferences indicate that there have been substantial falls under salt and sugar. And the improvement noticeable under metals, vehicles and machinary cannot help India which must pin her faith to the rise recorded in respect of gunnybags, cotton yarn, footwear and coal and coke. The absence of any increase under Burma's exports of mineral oils and minerals shows that further improvement in her foreign trade can be expected. While imports from India during June may show that tariffs have not altered either the volume or character of the trade, there is reason to believe that India is not as important as foreign markets for Burma's exports. But it is apparent that Burma will have a large surplus of exports in her trade with India. This may vary but will probably fall in coming months. A certain part of the trade must be affected by the import control adopted by Burma; for licences have to be procured in many cases from the Controller of Supplies or the Collector of Customs and such exceptions as are permitted are in line with arrangements in force in India.

Karachi Port

The latest administration report of the Karachi port trust reveals that exports through the port declined very slightly in 1940-41. But there was a fall of over 25 per cent under imports with the result that the total tonnage of cargo passing through Karachi registered a fall of 11.1 per cent. In this respect Karachi's experience is similar to that of all Indian ports. The annual trade figures point to exceptional increases under grain and oilseeds in 1940. The majority of import and export heads indeed show a marked decrease, the only item to show a rise being liquid fuel. The fall in traffic affected shipping more than revenue which fell only slightly by 4 per cent to Rs. 68,05,000. The number of vessels entered and cleared last year shows a considerable decrease. The decline in trade affected coastal trade like foreign trade and it is noteworthy that the war did not lead to any increase in country craft using the port. Tonnage statistics for the year disclose a fall of 30.8 per cent. The greater part of shipping that used the port last year flew the British flag and next in importance to British was the Norwegian tonnage. Karachi port trust like other port trust continues to enjoy a strong financial position. Revenue exceeded expenditure by Rs. 337,000 in the past year and a debenture loan of Rs. 19.95 lakhs was paid off during the year reducing the capital at charge to that extent. The capital debt at the end of 1940-41 was Rs. 315.75 lakhs and the Port Trust retained sinking funds totalling Rs. 174.8 lakhs. There was also a reserve fund of Rs. 60.43 lakhs. A further fall in debt may be expected when 4 per cent debentures for Rs. 10 lakhs are retired in October. The year's accounts show that several other funds were retained and the opening balance of Rs. 15.38 lakhs for 1941-42 will ally anxiety in regard to results for the current year. It is quite likely that operations in the Middle East as also the revival of trade with Iraq and Iran will have led to a striking though temporary increase in traffic and receipts.

Larger Loans from U.S. Banks

The influence of rising industrial activity in the U.S.A. where the Federal Reserve Index has risen from 115 in May 1940 to stand at 149 in May 1941 is clearly discernible in the enlargement of bank loans and investments. The combined total for weekly reporting banks from 101 cities shows an increase of 10 per cent up to May compared with the position at the beginning of the year. Banks' advances have surpassed the highwater mark of 1937 since an increase of over 1 billion dollars in loans alone has been recorded in 1941. Only a very small proportion of the increase in loans can be assigned to stock exchange loans, for speculative investment is at an ebb, and the increased demand for money has proceeded mainly from manufacturing Companies co-operating with the defence programme. Since June last Banks' loans to industrial enterprises have increased by 1.4 billion dollars and the total returned at 5.8 billion dollars shows that the expansion in bank credit remains one of the cardinal factors in a business situation that was being overshadowed by the advance in prices. Capital refinancing programmes account for a part of the increase in loans to industry. Advantage has been taken of the low level of in-

terest rates by firms which have defence contracts on hand. According to a special survey undertaken by the F.R.B. at the end of April, defence loans from member banks both paid and outstanding amounted to over 1,090 million dollars. The total is likely to have grown larger as the U.S. Government's spending programme is subject to frequent revision. While advances have risen there has been a larger increase in the Bank's holdings of securities. A marked increase in the holdings of U.S. Government securities shows that excess reserves are being reduced in a familiar manner. It has been noted that investments of banks belonging to the Federal system have risen by more than 2½ billion dollars in the eleven months ending May 1941. The expansion is clearly due to the frequent demands made by the U.S. Treasury. It is quite likely that a further increase will folow the scaling up of national expenditure, and not many fail to point out that Banks' prompt subscriptions to new Government issues may provoke an expansion of credit. The most satisfactory feature is the continued increase in deposits. The rate of growth is naturally slower in a period of rising activity, but the increase under Advances and Investments is partly due to another reason. A reduction in the imports of gold has been noted. Instead of the usual sterilisation programme averting the threat of inflation, there was at work the stimulating influence of enlarged demand for funds from agriculture, trade, and above all, industry. The results are that, notwithstanding a steady rise in circulation from 1938, there has been in the past few months a sharp drop in excess reserves, largely due to the reduced inflow of gold. So long as gold was coming in and being bought up by the Treasury in large quantities, it was the major influence swelling loanable funds and depressing interest rates notwithstanding the enlarged demand for gold generated by the expansion of currency and the rise in bank deposits. It has been started that imports of gold reached the record level of 4744.5 million dollars in 1940 but the trend has been decisively reversed this year as imports up to May totalled 668.2 millions in value. Owing to the rise in circulation and the increase in advances the excess reserves of all banks, particularly New York banks, have fallen in recent months. The reduction does not, however, portend anything like monetary stringency since the U.S. Treasury's conversion worked according to plan. There is, however, reason to expect that unprecedentedly cheap money conditions will disappear, and interest rates would look up in consequence while the sustained advance in bond prices too would be effectually checked. It has been remarked that bonds have strengthened consistently since 1939, but this may be due to Banks' buying of investments for their own rise. There is however the possibility that interest may be diverted to equities in view of expansion in industrial output and earnings and it is only the certainty of higher taxation that has restrained the stock market from adopting towards industrials the same optimism as it exhibited towards municipal and railroad bonds.

New Links with Iran

The junction of British and Russian troops at Kasvin on the route from Teheran to the Caspian on September 1st shows that the operations in Iran have reached their logical conclusion. The enforcement of martial law in the capital has no bearing on these operations which were intended to eliminate Dr. Grobba and his Oriental allies. The terms of settlement can only be guessed, but it is certain that in the South, the oil zone will be entirely under British control. Under the Anglo-Russian Convention of 1907 it was accepted that South Persia was in the British sphere of influence and the contiguity of British Baluchistan indeed made this essential. If Tabriz and the ports on the Caspian were to be retained by Russian troops, it would appear essential for Britain to keep the South with its many ports. The existence of large oilwells and refineries makes this imperative. It is generally known that Iran is the oldest and also the largest source of oil in the Middle East, and the emergence of Bahrein since 1939 as a big producer has not reduced her importance. Production ten years ago amounted to barely 6 million tons. Since then Iran's output has increased considerably being well over 10 million in 1938 and petrol and crude oil are still the most important exports. The very mild steps taken by the invading forces must have indicated to the Iranians that their country stands to gain by the removal of the Nazi threat. British tonnage has been predominant over a long period in Iran's maritime trade since the British Empire had more trade with Iran than any European country. The old dispute with Iraq over rights in the Shattelz Arab having been settled, it is only to be expected that assigment of control to Britain over the ports in the Persian Gulf will help the development of Iran. It is known that iron, nickel, cobalt, manganese, gold and several other minerals are available, and the lack of fuel and water alone has stood in the way of development. The new Premier, who has in the past been Foreign Minister under Riza Shah, may even agree to accept foreign help in developing Iran's resources. The end of capitulations and the acceptance of Iran's full fiscal autonomy in 1928 have removed causes of friction. If Iran delayed recognising the Government in Iraq until 1928 she has certainly reason to remember with gratitude the graceful withdrawal of Britain which in 1918 was in a position to establish a protectorate. The reactions of the Irani colony in Bombay contain a clue to the general prevalence of pro-British sympathies in Iran which are likely to be strengthened by the assurances conveyed by the invading troops. Though railway development in Iran owes much to German backing in the past, it is well to recognise that Riza Shah's regime has kept down foreign assistance to the minimum and the very substantial increase in mileage between 1932 and 1940 apart from linking the Caspian with Teheran connected the North and Southern ports was the result of the Shah's programme of development.

India's Phosphates

Among mineral deposits of economic value are the rock phosphates found in the Trichinopoly District, Madras and in Singhbhum, Bihar. There are over 8 million tons of phosphates within, a depth of 200 feet in Trichinopoly according to a press note issued recently and over 700,000 tons in Singhbhum. The latter was examined often; but the attempt to work the deposits failed . In the last few years India has not exploited her phosphates though they are admittedly valuable to both industry and agriculture. The Government of Madras has more than once examined the possibility of using the phosphate nodules of Trichinopoly. But no systematic research followed the field investigation of Dr. Warth, the Superintendent of the Madras Museum. Except for a few attempts to use the powdered material in the raw state as manure no attempt has been made to establish their value. Coffee and tea estates in South India and Ceylon discovered that the powdered nodules have a low solubility in the soil and are not comparable to superphosphate and ammonium phosphate. It is quite certain that ample scope exists for the production of fertiliser from these phosphate deposits as India regularly imports inorganic manures for the plantation industries. Since phosphorous is essential for plant growth, fertilisers with phosphorous must command a large market. Phosphorous again is essential for shell manufacture, tracer bullets, fireworks, medicines and vermin-destroyers. The acids and salts derived from phosphorous find wide application but the principal outlet remains the manufacture of fertilisers. India's total imports of manures in a year come to Rs. 1 crore and the limited production of superphosphate hardly meets requirements. The exports of bone meal and fish manure deprive India of another source of fertiliser. It has been often suggested that production of fertillisers ought to be developed rapidly in India and the present difficulty in getting imports should not only lead to an increase in the production of sulphate of ammonia but also assist in the development of the phosphate industry leading in turn to the increased use of inorganic manures. There is an adequate foundation in the extensive known deposits and the numerous industrial uses of phosphorous including explosives manufacture could also be considered in this connexion.

(Railway Board)

NOTICE.

Tender for the Supply of Coal to the State-Manage Railways during the period 1st October 1941 to 31st March 1942.

Tenders are invited for the supply of following quantities of coal for the above Railways during the period 1st October 1941 to 31st March 1942:—

1. Bengal Steam coal by Rail .. 3,86,000 tons
2. Pench Valley Slack Coal (as per description given below) .. 14,000 „

2. Forms of Tender, Specifications and instructions to Tenderers may be obtained from the Office of the Chief Mining Engineer, Railway Board, 1, Council House Street, Calcutta, on payment of Re. 1 for each set.

3. Tenders should be deposited in the Tender Box kept in the office of the Chief Mining Engineer, Railway Board before 11 a.m. (Calcutta time) on Friday the 19th Sept. 1941 and they will be opened at 11-15 a.m. in the presence of Tenderers on the same day.

Description of Slack Coal.

Slack coal with calorific value of not less than 9,000 British Thermal Units per lb. as fired and should not contain more than 20% ash. The coal should be to the following sizes:—

Screen.	Retain.	Pass.
1″	0.0%	100%
1/2″	10.0%	90%
1/4″	40.0%	60%
1/8″	16.0%	25%
1/16″	16.0%	10%

J. R. HARRISON.

Chief Mining Engineer, Rly., Board.

Calcutta,

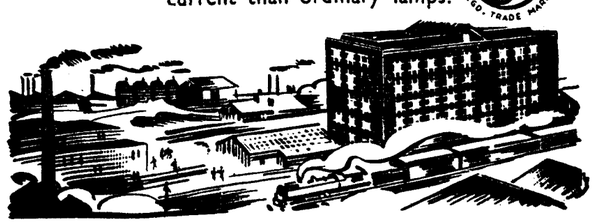
Dated, the 4th September 1941.

Canada's pulp production

The 1940 trade returns showed that pulp and paper production in Canada followed the inordinate increase in foreign demand. Expansion in both production and trade has evidently continued as the output figures for the first quarter of 1941 at 7,83,000 short tons reveal an increase of 6 percent on the first quarter of 1940. The increase occured in spite of a substantial increase in the stocks held by U.S. consumers and the difficulties experienced by foreign buyers as regards shipment facilities. Since the summer of 1940 it is clear that the demand for Canadian pulp and paper has increased rapidly. But throughout 1940 productive capacity was not strained seriously for Canadian pulp and paper production had outstripped demand before the depression caused serious head-shaking. Mill operations were at 77 percent of capacity in the final quarter of 1940 when the ratio of shipments to capacity had dropped slightly to 70 percent. The recession in exports was not temporary because mills realised that the summer of 1940 with production at 91 percent of capacity was unique. A decline in U.S. demand is generally anticipated but this will have no great effect on Canada's general industrial production since the summer is usually accompanied by increased buying of pulp and paper. It is believed that demand for pulp from outside sources as also from newsprint manufacturers will be on the enlarged scale recorded last year. Exports of pulp in the first quarter of 1941 help up well and prices were 50 percent over those for the corresponding period of 1940. There is, however, the possibility that expansion in U.S. production, particularly in the South, will reduce the demand for Canadian supplies this year. Expansion of plant in sulphate mills processing pulp was reported early this year. It is quite likely that pulp and paper will not make the same headway as the locomotive and heavy iron and steel industries in Canada this year despite a rise of over 20 percent in the index for industrial activity in the Dominion.

Mercury from South Africa

The begginnings of commercial production of mercury in South Africa have been reported. It is of interest to note in this connection that the industrial uses of mercury outnumber its uses as a drug. For various chemical processes mercury is essential, and it was apprehended last year that Spain, owing to her sympathy with the Axis, would hold up production or withhold essential supplies until prohibitive prices were paid. The squeezing of American buyers did not continue long since the U. S. A. besides producing mercury can count on regular imports from Mexico. Mercury is used in the manufacture of vermillion, and mercury fulmmate is used for the manufacture of detonators and percussion caps. Mercury's importance for explosives production is as great as its importance for gold mining. It is the latter aspect however which has impelled South Africa to develop local production. The mines on the Rand bought about £10,000 worth of mercury in a year. Over three-fourths of the world's total mercury production comes from Italy and Spain. Turkey is a small producer like China and the Axis powers had a definite superiority as regards mercury. The mines near Trieste have long been the chief source of Italy's mercury. The richest mines, however, are in Spain the most famous being the Almadan mine and the Civil War led to a steep rise in prices and profits. The deposits found in Oregon, Arizona, Texas and California put the U. S. A. among the leading producers; buth the U.S.A., usually obtained over half its mercury from foreign sources until 1937. More recently, the U. S. has stepped up production to the point at which exports are possible. The British Empire can now have no anxiety as U. S. supplies are available. The development of production in Canada is a wartime feature based largely on the very considerable advance in the price of mercury, towards the end of 1939. Deposits of cinnabar in British Columbia are now being worked and the plant near Pinchie Lake has been enlarged to treat 100 tons of the mineral in a day. South Africa too has no longer reason to rely on imports from Spain and Italy. Deposits of cinnabar in the Eastern Transvaal are not the only ores known to the mining industry. Mercury production began last June, after a successful strike in January had indicated that the substantial deposits in the Murchison range in the Letaban district would provide ample supplies. A large plant is being erected and the South African gold-mining industry like explosive factories will be a permanent customer. A surplus for export is aimed at by the Union which has in recent months produced about 800 lbs. per month for local consumption.



Afghan Monopolies

THE organisation of trading monopolies in Afghanistan is presumably due to Russian influence, but it may be taken as a mark of backwardness. In spite of an increase in Afghan resources their purpose and scope are apparently limited. The latest report of Mr. Nasrulla, the Indian Trade Agent at Kabul, gives a list of the joint stock companies in addition to the names of monopoly concerns. The concentration of all transactions in gold and silver gives added importance to the Afghanistan Bank, but the Afghan National Bank is the more important bank still. Started in 1930 with a capital of 5 million Afghanis (equal to Rs. 12½ lakhs) it has control over the note issue which appeared first in 1934. Its capital had been increased to 60 million Afghanis in 1937-38 and the Bank retains control over a wide field of trade and finance. Its control over foreign trade and internal development makes it always a big factor in Afghan fiscal policy. The Bank controls the note

Ill-lighted factories mean workers with eye-strain and a consequent loss of efficiency. Good lighting is easily achieved by fitting MAZDA Pearl coiled-coil lamps with the wonderful non-sag filament. They give more light for the same current than ordinary lamps.

issue which amounted to 180 million Afghanis by the end of 1929. It has also a controlling interest in various syndicates and companies whose aggregate capital, according to a recent estimate, is stated to be 710 million Afghanis. Of the various companies under its control is one which controls the trade in Persian lambskins. A monopoly of export has been created, but the purchase of lambskins is as privilege available to 26 companies which are empowered to buy up to 1,379,000 skins. The Karakul Shirkat of Kabul enjoys the largest share of the trade and like the other companies engages also in the import of piecegoods, tea etc. The Afghan Sugar Syndicate had the monopoly of importing sugar and petrol into Afghanistan. It has since set up a sugar factory using beatroot at Baghlan. The motor company enjoys the privilege of importing motor vehicles and controls the workshop for repairs at Kabul. The monopoly of importing spares and accessories is held by another company. The cotton company with a capital of 70 million Afghanis has the sole right of purchasing and exporting raw cotton. It runs a certain number of gins and presses in the Northern Provinces and has established lately a factory at Kunduz for the production of cotton seed oil and soap. The export of casings of sheep and goats is a property right that has been assigned to an Afghan trader in return for a payment to Government of 21 lakhs Afghanis. Another trader has obtained monopoly rights over the production and sale of snuff and chewing tobacco in return for 16,23,000 Afghanis. The opium company with its headquarters at Herat has a monopoly of export and exported over 16.2 lakhs' worth of opium in 1938-39. The Textile Company with a capital of 55 million Afghanis is credited with the intention to set up a modern cotton mill at Pul-i-Khimi. The Government has authorised an increase in capital, and a surcharge of 10 per cent. on all exports from Afghanistan excepting cotton and lambskins is expected to provide part of the capital. The exporters including Indian traders who pay 1,000 Afghanis on the total value of exports consigned by them have been promised shares in the company which will thus have a few foreigners among its shareholders. The parallel to the Russian trading delegation called Sovafghantory has been provided by three companies specialising in the export of raw wool and cotton wool and furs and wool and cotton with headquarters at Shimil, Herat and Kandahar. Though there is no monopoly, the three companies held the lion's share of the export trade and sales through the National Bank were also made on their behalf. A Kandahar company has built up an export trade in dried fruits and prepares sweets, preserves and syrups. In 1939-40 the company sold several thousand bottles and tins to India.

South Iranian Trade

In view of the interest excited by the operations in Iran a note on the trade of Bandar Abbas which is the port for Kerman would not be out of place. According to a statement issued last week, the total value of imports and exports through this port in the Iranian year (21st March 1940 to 20th March 1941) showed a very considerable fall. The total value of imports is given as 11,767,000 rials as against 26,357,000 rials in 1939-40. The total value of exports in 1940-41 is given as 23,308,000 rials as against 34,075,000 rials in the previous year. The statistics which record a big decline under both exports and imports indicate also that trade between India and Bandar Abbas fell away. The total value of imports from India during the year 1940-41 fell to 1,918,000 rials from 2,817,000 rials in the preceding year showing a decrease of

899,000 rials. The decrease is attributed to the reduced imports of tea, such reduction being explained by limited cargo space and high freights on the Gulf route. Imports of tea alone accounted for trade valued 2,385,000 rials in 1939-40. Import into Southern Iran by the land frontier may have risen in consequence since Iran has been among the most dependable markets for Indian tea in recent years.

New India

In year in which it has been difficult for insurance companies to maintain their normal progress, not to speak of improving on it, the New India Insurance Company has been able produce a very satisfactory report and show a record in the business of the Fire and Marine departments. The adverse circumstances of the year have, no doubt told in one or two respects.

There is a small decline in premium income in the Accident department due mainly to the loss of overseas business on account of the war, and a decrease in the volume of business written in the Life department which is a feature to a number of companies.

Of the two departments, Fire and Marine, the Fire department has had the most profitable year both as regards the volume of profit and the percentage it bears to premium and this, inspite of a large premium reserve being call ed for following an increase in the premium of the department.

As regards the Marine department, it is hardly to be expected that the same amount of business can be written during the current year as in the previous year. In fact, there has been only a larger premium income in 1940 with a smaller volume of business written. The larger income was due in greater part to the high war risk premiums charged to cover the losses at sea from enemy action and, to an extent, to the surcharges on premium levied to cover the additional marine risks arising from navigation under the restrictions imposed by war. With increasing shipping control and the extension of the theatres of war, there should naturally be a reduction in the volume of business as well as income in future. Losses even are not definitely ascertainable as claims take a long time to be settled. Thus, it has been decided to carry forward in the Marine account the balance remaining in the account for 1938 and previous years. The net premiums amounted to Rs. 28,10,763 and the net claims paid to Rs. 21,10.822. In compliance with Form E of the Third Schedule of the Insurance Act 1938 outstanding Marine claims amounting to Rs. 10,82,244 have not been debited. After deducting Rs. 4,28,821 or 11.3 per cent of premiums on account of commission etc. the Marine Fund is higher at Rs. 44.89,137 against Rs. 31,13,308 at the end of 1939.

The surplus in the Accident department of Rs. 2,98,214 after creating an additional reserve of Rs. 60,000 is transferred to the profit and loss account.

In the Life department, 6452 policies were received for assurance amounting to Rs. 1,74 lakhs against 7,991 proposals for Rs. 2,03 lakhs. The actual number of policies issued was 5,281 for Rs. 1,43 lakhs against 16,842 policies for 1,73 lakhs. It is noteworthy that the authorities have been particularly careful in the selection of business and that inspite of a smaller number of policies issued there has not been a proportionate reduction in the amount of business written. In addition, 6 immediate annuity bonds for a consideration of Rs. 1,00,648 and two deferred annuity bonds for annual premiums of Rs. 1,546 were issued. The total number of ordinary policies in force is 35,564 assuring with bonuses a sum of Rs. 9,24 lakhs of which Rs. 47.6 lakhs are reassured. There is a sharp decrease in the expense ratio from 26.2 per cent to 23.8 per cent.

The balance-sheet makes even more satisfactory showing. As a result of the year's operations total funds have increased by Rs. 64.30 lakhs against Rs. 37.61 lakhs in 1939. The larger increase in funds in 1940 is due to the larger renewal premium income in the Life department and the transfer of portfolio on revision of reinsurance treaty. The amount on account of depreciation of Rs. 2,07,904 provided out of the profits of 1939 towards the loss in the market value of investments has also been written back.

The reserves in the Fire and Accident departments are considerably in excess of the required minimum of 40% of the premium income for the year. In the fire department the combined reserves amount to Rs. 41,84,331. The additional reserve amount included in this figure is Rs. 27,30,000. In the accident and miscellaneous department the total reserves amount to Rs. 12.65 lakhs, the additional reserve amount being Rs. 8 lakhs. In the marine department complete provision has been made against all unforeseen losses and there has been no transfer to the profit and loss account from the year's surplus.

Total assets show an increase from Rs. 3,38 lakhs at the end of 1939 to Rs. 4,15 lakhs at the end of 1940. There has been a distinct change in the policy of investment. Out of the total increase in assets by Rs. 77 lakhs only about Rs. 15 lakhs has been invested in

Clive Street Gossip

"I must have liberty
Withal, as large a charter as the wind
To blow on whom I please."
—(As You Like It).

THE third year of war has dawned on a world which has survived the nightmare of the last two years and learned to fare the trials and tribulations that there may still be in store for it. Only with effort can one remember that this war, whose duration none was prepared to forecast, and which seemed at times to draw to a speedy end and at others to provide for its tedious prolongation, is, after all, more than two years old. This war has challenged many things; but, not least of all, man's understanding of the phenomena it symbolises, of the issues it embodies, and of the significance to the future of its final upshot. Mankind has left far behind the stage when the significance of wars betwen nations was restricted to the active belligerents or to a small group of countries more or less contiguous to the theatres of war. Dynastic wars and wars for mere national glory are to be found only in the earlier chapters of modern history. Even the last war was less a war between Britain and Germany than a result of deep forces operating in the economic life of advanced industrial nations and coming to a final clash over questions of world-wide importance. It was not till long after the war was over that its significance as a phenomenon was understood. Of course, the usual, cheap way of labelling it as "imperialistic" and imagining that the label can serve for mental effort to understand what it means has nothing to be said for it. But if the last war was the first world war, in the sense, that ponderous forces of world-wide importance combined to bring about that clash, it is certain that this war is even more so. Every war of modern times is both an important phenomenon for the world at large and a matter of life and death for those directly involved in it. The latter can hardly afford to indulge in academic appreciation of its phenomenal importance any more than the world at large can agree to regard the war in the same terms as the principal combatants.

Both as a trial of strength between two groups of nations and as a phenomenon of importance to the world as a whole, this war has never been quite easy to follow. At the beginning of the third year of war, it may be said, the war has become comparatively understandable. That is no small gain for two years of a war whose duration, it is still impossible to foresee. No longer do Britain and the Empire and the wide ring of allies and sympathisers live in the atmosphere of complacency which past successes left in their wake. No longer does Britain live in uneasy contemplation of the incalcuable strength of the enemy or, as it seemed on the facts of a year ago, his apparent invincibility. The perplexing uncertainty, which loomed so large on the international horizon a year ago, the attitude and sympathies of Soviet Russia, is now a thing of the past. Russia is solidly on the side of Britain fighting the battles for which Britain is rendered unfit by her geographical position. And of even Russia's ability to continue the fight till she can be reinforced by the enemy's exhaustion and by her allies' efforts, there is less doubt than a few months ago. The military aspect of the present war no longer defies ordinary understanding as completely as it did a year ago.

That is not to say that the future is clear and that with a little effort we can map the course that the war will make in the months or years to come. Fascism has not been suddenly rendered *hors de combat*. The resources of Nazi Germany have not yet run dry. Hitler has not exhausted his diplomatic trump cards. There may be still one or two nasty surprises in store for the Democracies. But the question in this war was not whether Nazism would win or lose, but how its defeat was going to be encompassed. For the fact was that, when Germany threw down the gauntlet, she had been strengthened immeasurably both by her prolonged and, as we can see now, perfect preparation, and by the successive surrenders which the Democracies had made to placate the implacable. The Democracies entered the war almost unwillingly and wholly unprepared. Even after the actual outbreak of war, there was talk only of war effort", as if winning the war was one of many objectives which the Government could achieve at about the same time. There was little evidence that the magnitude of the effort called for and the scope of preparations and operations had been ful-

ly realised. Unprepared, irresolute and dissentient nations faced the perfected might of a unified and fanatically determined Germany. Poland and France went to pieces at the first blast of the Nazi war machine. The British forces on the Continent escaped by the skin of their teeth leaving Germany to plant her feet firmly on the neck of the fallen foes and help herself to their resources and not the British blockade of its worst terrors. For those who were convinced, on the strength of the verities of history and of social life, that a German triumph was impossible, could hardly see where to rest their faith on. With Germany mistress of the whole continent of Europe and Britain looking to her island home and the life lines of the Atlantic and the Indian Oceans and the war confined almost to the atmosphere above the cities and towns of England and Scotland, it was hard to see how exactly the might of Germany was to be finally overwhelmed and the menace of barbarians and ruthless aggression wiped off the face of the earth.

This narrowing of the scope of active warfare was so patently against the unmistakable world significance of the war, that one felt all at sea in understanding the events of the time. It was not till the Battle of Britain was decisively won and the Luftwaffe sent back over the Channel to moult its damaged wings, that one felt that there were other and more crucial phases of the war yet to come. Once it became clear that the invasion of Britain was an altogether different proposition from the over-running of the countries of Europe, that it was possible to believe that Germany could not have everything her own way. The only question was how much more havoc she could cause and how she was to be finally overpowered.

It is to these two questions that the events of the second year are so largely an answer. For, at the beginning of the third year, it is possible to say, as it was not at any earlier time, that Germany has been effectively ringed round, though the ring may be wider than one would desire. The achievement of the second year lies in the demolition of Italy's Empire in Africa, the stoppage of German inroads into Northern Africa, the blocking of the path to the East, in Iraq, Syria, Iran and in Turkey. The Atlantic is no longer the happy hunting-ground of German submarines. Britain's life lines are guarded by another great navy besides her own. And the British blockade, which was so largely neutralised by German access to Russian sources, regains its former terrors with the outbreak of the Russo-German war. German scope for exploits of arms has thus been circumscribed. The list of small nations she could defeat and devour is exhausted.

To deprive Germany of the chance of fresh triumphs is, of course, the necessary preliminary to her final defeat. Russia's war with Germany must, strictly speaking, be viewed both as a means of what I have called ringing round the

GF—262

Nazis and as a first step in the great counter-offensive. For, but for the hostilities between the two former friends, the German thrust towards the East should theoretically be without any limits, a large loophole in the blockade would persist and by far the largest drain on Germany's resources would have been absent. It is only to be expected that the war between Russia and Germany should partake of the characteristics of both the first stage of the war and the next stage which he can now envisage. Russia has staged retreats, but never suffered a rout. She has evacuated territory; but there is no part of Russia which the Germans can "occupy" and lord it over. And the transitional stage is best exemplified in that combination of strategic retreat and powerful counter attacks, of which both Voroshilov and Budenny seem to be past masters. It is not merely that the stage of walk-overs is gone. Germany is dropping games, and sets too. And Russia has more than levelled up to her opponent.

But it is so rash to bank too much on the success of Russian arms. A major reverse for Germany at the hands of Marshal Budenny is only a possibility, while further German successes in some sections are quite probable. To overpower Germany, mobilisation of men and resources has to be carried on over more than half the surface of the earth. Here, too, the second year of the war has seen significant progress. The U.S.A. has not entered the war. But America has stiffened her opposition to Hitler and Hitlerism. The decision to convoy ships carrying goods for Britain makes a huge difference both practically and in theory. The speeding up of production, the provision of supplies for Soviet Russia and, above all, the mental preparedness of the American Government and public for the eventuality of actual entry into the war—these are great gains. And one may say a little in this context of the development of another great arsenal, though only potentially, of democracy, namely, India. India, too, has not been standing still. The nature of our war effort has been slowly changing under the import of sheer expediency. During the whole of the first year of the war, the war effort ran the grooves cut by the last war. Collection of war funds, organisation of humdrum publicity, doling out of orders of Supply Department and manufacture of sundry stores for war industries comprised the much-advertised war effort of those days. The collapse of France administered the first shock to the complacency behind this policy. Talk of a one million army for India, mechanisation, navy and air force were heard for the first time. But while matters of direct military concern have probably been attended to with a degree of expeditious care, the industrial and technical projects necessary for ensuring the security of India and her taking her share in the final overthrow of Germany have been approached with the accumulated inertia of a century and a half. War potential is industrial actual, if I may put it that way. And plans to develop war industries are for that reason viewed askance. Nevertheless, India has taken a few good long strides since the days when sandbags were all that were expected or asked of that country. If this war is a mighty world phenonenon, its impact on the nations cannot be cushioned by the holders of cushy jobs. The war has drawn this country into the orbit of its direct and indirect consequences. We are shortly to have a one million army of the most modern type. Armoured vehicles and most of the appurtenances of mechanised warfare are being made in this country. The Royal Indian Navy is growing from its slow beginnings. Aircraft is being assembled and is to be manufactured here. The Indian army bore the brunt of the fighting wherever it made its appearance and covered itself with glory. Its share of the successes over Germany uptodate is a high proportion, indeed. And who can doubt that the Indian army will have a big role to fill in the final defeat of the Fascists?

The picture of the war at the end of the second year is a hopeful and heartening one. But what of the war as a world phenonenon? What sort of a world will it leave behind when it is over? The last war tore world economy from its setting of *laissez faire* and international free trade and left it in a chaos of currencies and protective tariffs. It struggled out of this chaos only to get stuck in the bogs of a great depression. And the depression was ended only by a rearmament boom which duly ushered in the present war. The experience of the last war encourages no optimism about the gains of this. But is it not precisely the mishaps and blunders of the last post-war period that are the source of hope for the future.' Politically, you may rule out reparations. If there is to be a Versailles, it will have to be 1943 or 1944 model. And in the place of France and Clemenceau, there will probably be Russia and Stalin. And what is most important of all, Wilson's chair will be occupied by one far more astute than that Professor-President. But the immense gain of this war is that the breach between Democracy and Socialism has been bridged and the old baneful talk about the ideological affinity between Fasicism and Communism is finished for ever. Of course, the Churchill-Roosevelt declaration is there. I cannot pretend to think much of it. But some at least of the principles enunciated are admirable. And most of the reform and reorganisation that the world is having to-day is forged by the hammer blows of a mighty world war.

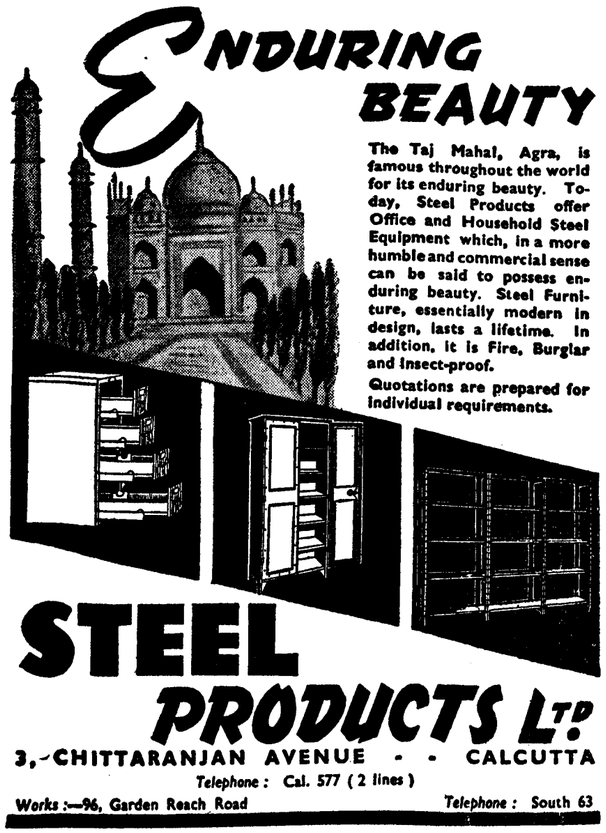
(From Our Correspondent)

Simla, September 2

NOBODY in Simla is happy over the week's developments—not even Sir Sikandar who has now resigned from the Defence Council. In official circles there was a feeling of confidence that as Sir Sikandar had worked closely with the Viceroy in giving final shape to the expansion scheme and had definitely agreed to serve on the Defence Council, he would stick to his position. The ease with which the Punjab Premier was won over by Mr. Jinnah came as an unpleasant shock to the authorities concerned. For the arrangements contemplated in connection with the first meeting of the Defence Council have been held in abeyance. As soon as the resignations of Sir Sikandar and others have been formally received, other appointments will be made to fill the vacancies. Though it is regretted that certain important members like Sir Sikandar have thought it fit to withdraw, there is no intention to modify the nature and functions of the Council or interrupt its work by any long delay. The first meeting will be probably held in the third week of this month. In the course of the next few days the names of the Princes' representatives will be announced.

* * *



There is great satisfaction in Simla at the successful conclusion of the military operations in Iran. As in the case of Iraq these were directly under the control of India's Commander-in-Chief. The excellent account which Indian troops gave of themselves in the difficult conditions prevailing is warmly ackowledged by military spokesmen here. At the moment the British authorities are engaged in discussing the terms of settlement with the Iran Government, but it is felt that this will present no great difficulty. The previous Ministry was either unable to realise the gravity of the danger of German infiltration or felt too terrified to act as it ought to have done when it received the British Government's representation. But the new Ministry which on the very day of its assumpton of office ordered its troops to cease fighting, has shown readiness to come to terms in the interests of both the countries. The terms of settlement will include permission for British troops to remain in certain areas for the protection of oil installations and communications, guarantees against any further German infiltration and the right of passage for supplies and war materials to the Soviet Government through Iran. There appears to have been no interference with British nationals or any dislocation of their business of other interests. It is stated that in order to relieve distress the British authorities have been supplying large quantities of wheat and other foodstuffs to the Iranian population. The full story of the Iran military campaign, though short, cannot be recounted, but there is no doubt that it has added greatly to the reputation already enjoyed by Indian troops in the Middle East.

The July figures for India's seaborne trade compare very favourably with the previous months. The value of imports during the month totalled over Rs. 18 crores—a figure never before reached since the war began two years ago. As compared with the corresponding month of the previous year, the increase is very nearly Rs. 7 crores. Exports of Indian merchandise during the month were well over Rs. 20 crores in value—also a figure much above the average of the preceding twelve months. The increase in exports is partly due to the fact that Dominions like Canada, Australia and, New Zealand and even Colonies like Kenya have trebled or quadrupled their purchases from India. India's exports to the United States have come up to nearly Rs. 4 crores during the month. On the import side the most noticeable feature is that the share of the United States has nearly doubled as compared with the previous year and even the share of the United Kingdom has improved by more than a crore during the month. Taking the four months, April to July, one finds that while imports have improved by more than Rs. 14 crores as compared with last year, there is a fall in exports to the extent of Rs. 7 crores. Owing to the recent developments in the international situation, particularly in the Far East, and the control measures taken in this country, one has to be prepared for a further setback in succeeding months.

* * *

The Public Accounts Committe has now concluded its examination of the accounts of 1939-40. It will meet finally to-morrow to record its conclusions and sign the draft report. Owing to the absence of the veterans of the Congress party, the Committee's sittings have not provided the interest which in former years used to attach to them. It appears that the need for more stringent measures of economy was continually pressed by elected members throughout the session. There are several measures which as an example in war economy can be usefully taken. The Simla exodus which costs the taxpayer several lakhs every year can be conveniently given up. It may be also asked whether it is still necessary or appropriate to go on paying several lakhs a year to the League of Nations. According to the information supplied to the committee, the gross traffic receipt of all Railways may reach the figure of Rs. 112 crores in 1940-41. The income of the Posts and Telegraph Department has also been steadily increasing. The profit in 1940-41 is expected to be Rs. 1 1/4 crores. It has however to be remembered that these increases though unprecedented are to no small extent due to war conditions and Government traffic. They cannot be taken as an indication of any sudden accesion of prosperity or increase in national income. In fact in regard to the Posts and Telegraph Department it has been decided for this reason that on the accumulated surplus beyond Rs. 1 crore, the Department should not be credited with any interest.

(From Our Correspondent)

BOMBAY has followed closely the operations in Iran which have come to an end though the final settlement is still the subject of negotiation. With Iran accessible from Iraq the major port for that country must be Busrah rather than Bushire or other towns on the Gulf. The prevailing scarcity will probably lead to large scale assistance on the part of Britain which is said to be ready to lend money or material to Iran provided that relation with the Axis countries are severed. If there is no chance of withdrawal there may be large scale investment in Iran, and Parsees, for instance, are sure to do something for their old homeland. As the despatch of foodstuffs is considered a duty thrown on both the Soviet and British governments who have been informed that if Kerman is quiet it is due to the lack of sugar, rice and pulses. Supplies by land to southern Iran may be ruled out, but the provision of additional ships for service to Gulf ports will entail some difficulties for India. It is regarded as certain that if any large force is to be permanently cantoned in Iran there will have to be a considerable increase in trade with India. If the territory of the Shah is divided into well-defined British and Russian spheres there will be no question about the security of oil supplies for India and the vigors of rationing may be lessened. It is believed that Iran's trade with Japan will languish if Iran were to enter the sterling area and Bombay thinks that textile supplies will have to be provided by India rather than Russia in the near future.

Though little is known about the agenda of next week's conference on cotton mills problems it is certain that the spokesmen of the industry will indicate how far they can proceed in controlling prices or what they can do to square their responsibilities to shareholders with the duty to place plentiful supplies at once for the Army. It is known that military orders are of a pressing nature but civilian demand cannot be altogether neglected. The shortage of imports has admittedly led to an increase in civilian demand and if the advance in prices is not relished it is widely realised that cotton goods cannot be dispensed with. The yarn famine in the South has provoked acute dissatisfaction and the most acceptable suggestion that may emanate from any conference will be one relating to an immediate and substantial increase in yarn supplies. The conference may examine the raw cotton problem in all its bearings for there is a threat of excessive supplies of short-staple cotton owing to the cessation of exports to Japan. It is belived that questions relating to export will claim the attention of the conference. Mills must win and keep markets abroad, for example the Dutch Indies will be more than worth cultivating if Japan is out. The increase in trade with the Colonies must make good losses sustained by the closure of European markets. The official view is in favour of exports. It may be assumed that the rationing of clothing in Australia may count for much as demand from various other parts of the Empire will have to be taken into account. It is learnt that the Supply Member will be present in Bombay along with the Commerce Member and several officials. The Millowners Association here is fully acquainted with the plan and purpose of the conference which is under scope than that held in May. The Middle Eastern theatres are likely to require more and more supplies and Bombay's factories and workshops are likely to be called upon to provide more and more tools for the job in the third year of the war while the railways and port will have to stand up to increasing strain.

The Governor of Bombay went off on a tour a little while after his letters to Mr. Jinnah were published. The usual correspondent was in attendance to say in as many words as possible what the Governor did or said at public meetings. There were the usual parades and the familiar junketings with Civic Guards too in the limelight, and much fuss is still made about the planes donated by the Karnatak. A new market in Hubli built at a cost of Rs. 3½ lakhs, is named after Sir Roger Lumley. But the town has slums to answer for, and the Administrator who superseded the Municipal Council could only put in a petition for a grant of Rs. 10 lakhs. The Governor made no promises but complimented all and sundry and passed on to make the speech usual at recruiting meetings. People connected with the war gifts fund got more compliments than the men who worked for village improvement in the time of Sir Frederick Sykes. Meetings at Belgaum were flattered to learn that everybody is impressed by what one backward district has done or is doing and the Governor must have been forced to say some good things about Australians 'who are keeping away the war in the east' at least to remove the bad impression they made last year. The Governor declared more than once that the Adviser regime is not identified with stagnation, and even if cooperation in war effort is entirely an individual's choice, the Government will not cease to work for village welfare. Reference was made often to the special provision made in the current year's budget and the Chairman of small municipalities were told that their progress is the Governments special concern.

The pressmen of Bombay buttonholed Sir Victor Sassoon as soon as he was free to receive visitors. Before he left for Poona he was persuaded to talk about happenings in the U.S.A. and Far East. He said little that is not already known, but he spoke with the authority of a visitor who had fortified personal impressions by conversations with the best-informed people. Sir Victor reiterated his view that Japan would not get mixed up in the war because she was in a blue funk. Recent events certainly support his inference that the war will not spread to the Far East. Sir Victor said a good deal about the U.S. Citizen's attitude to the War. There is apparently little trace of isolationism there. In spite of Britain doing little to argue the U.S.A. out of her traditional indifference to Europe there was real alarm over Hitler's feats. Sir Victor gave for record his own views as to the probable course of events in the Pacific. After referring to what he saw and heard in Singapore and Manila he declared that the balance of advantage lay with the Anglo-American concert. He described the German advisers as uninfluential for the Government of the adhered to its own views, and Japan was not at all eager to take on more antagonists. Successful resistance on the part of Russia would inevitably affect Japan's views on the Russo-Japanese war and the extensive preparations in Malaya and elsewhere would let Japan know that she must go slow. Sir Victor's assurance has naturally made all markets take a less jaundiced view of developments in the Far East, and the share market is more hopeful than seemed possible just after the annual meeting in August had taken place.

A recent conference convened by the Government reviewed the working of the Industrial Disputes Act. The proposed amendments were also discussed by Mr. C.H. Bristow with the Labour Commissioner and others who attended. The lack of any provision in the Act for the adjustment of disputes between employees and employees though the phrase appeared in certain sections was attended to. It has been suggested that an omnibus phrase like 'connected with any industrial matter' could be inserted. The Labour representative approved the suggestion. The meeting considered the definition of a trade union. Only those who have paid subscriptions for six consecutive months and are not in arrear for more than three months could be treated as pucca members

according to a new provision in the Industrial Disputes Act. Mr. Mirza siad that seamen off shore for long periods could not come up to the exacting requirements of the new clause, and it was therefore accepted that the seamen's union would be exempt. The Conference is likely to meet again but nothing was said about the desirability of putting into effect any of the recommendations of the Textile Labour Committee. In spite of the further addition to the dearness allowance granted by the Millowners association there is strong feeling against the standstill policy of the Bombay Government. It might be very well to sound opinion before enacting another of those Governor's Acts but the public which is obviously pleased by the High Court's ruling in the Shops Act case wants that something should be done for millhands. The additions to wages do not help,, and it is asked why the forthcoming textile conference cannot settle the subject of a minimum wage or frame rules relating to double shift working which is likely to become the rule.

The mill worker is not likely to take much comfort least from small mercies like provision for injuries due to the war. The recent ordinance supplements the workmen's compensation act which employers contended cannot cover war risks. The liability had to be shouldered by the Government which has agreed to pay others besides civil defence volunteers Special schemes have to be framed for approval by Government. Compensation may take the form of disability allowances or adequate payment for permanent injuries. Aid for the purchase of artificial limbs etc. is promised under the Ordinance. Government is empowered to deal with claims as under the Workmen's Compensation Act, and Government reserves to itself the right to withhold compensation in the event of contributory negligence. Assignments of a charges on payments under the Ordinance are to be treated as void. If one of the old demands of businessmen has been satisfied by the war injuries compensation scheme government has been slow in evolving a scheme for the insurance of immovable property against war risks. The weight of opinion against compulsory insurance remains great and the evolution of a voluntary scheme with suitable sales of premium has not been completed by the discussions that took place last month when the insurance advisory committee met here.

(Continued from page 452)

The Bajpai delegation left for ceylon on Saturday and will be starting its talks on Thursday or friday in Colombo this week. There has been some criticism that while the fate of the Indo-Burma agreement is still in the balance, the Government of India should have agreed to reopen these talks with another country on similar problems. On the other hand the Official defence is that there is really no harm in accepting the invitation of the Ceylon Government and ascertaining how far they are prepared to go in this matter. As the talks are only exploratory these negotiations will commit neither Government to anything. In the Ceylon Ministry there appear to be two rival parties, but as the majority group headed by Mr. Senanaike is reported to be anxious to end the impasse and secure a satisfactory settlement, the coming talks may yield some practical results. The good offices of the Ceylon Governor will also be available to the delegations in their difficult task. It is expected that as soon as Sir G. S. Bajpai returns to Simla he will call a meeting of the Standing Emigration Committee and communicate to them the results of their talks in Ceylon. The opportunity may be availed of also to bring the Burma Indian delegation into touch with the members of the Emigration Committee. At present the whole question of the Indo-Burma agreement appears to be before the Secretary of State. Public opposition in this country to the terms of the present agreement is so great that if the Burma Government is unwilling to make substantial modifications, the Government of India may decide to give up the agreement altogether and leave the Burma Government free to introduce legislation in their own legislature. No indication is available here of the Burma Government's attitude.

More than one member of the Central Legislature now in Simla told me that the prospect of legislation for additional taxation during the coming session cannot be ruled out. As I have previously explained, no final decision can be taken until all the members of the expanded cabinet have taken charge and have had an opportunity to go into the question. Still the prevailing impression is that if an emergency taxation bill is now brought, it will be to raise the salt tax, for that is the only safe and convenient way of raising a few crores more. There is no talk now of increasing the present rate of either income tax or supertax, but at the time of the next Budget the position will have to be reviewed in the light of the circumstances then. It is still being stated that subscriptions to the Defence loans are not flowing in to the extent desired by the authorities. New measures will have to be devised by the expanded cabinet to popularise these loans and make them yield more funds for Defence purposes.

NORTH WESTERN RAILWAY.

Tender No. 214-S/15.

Code word "ATKINS".

Tender are invited on a rupee basis for purchase by the N. W. Railway of wagon bottom boards (Burma or Andaman gurjan, & Kanyin & Kalpayin) for Mechanical Workshops, required during 1042. Tenders must reach office of General Manager not later than 14 hours on Monday, the 13th October, 1941, and will be opened in office of Controller of Stores, Lahore, at 11 hours on the following working day. Tender forms can be seen at and obtained from office of Controller of Stores, on and from 30-8-41. The sale price of tender is Rs. 5/- plus As. -/8/- to cover postage and packing charges for outstations.

NORTH WESTERN RAILWAY.

Tender No. 212-S/5.

Code word "ANCHOR".

Tender are invited on a rupee basis for purchase by the North Western Railway of wick holder barton. Tenders must reach office of the General Manager, N. W. Railway, Lahore, not later than 14.00 hours on Wednesday the 24th September, 1941, and will be opened in office of the Controller of Stores, N. W. Railway, Lahore at 11-00 A.M. on the following working day. Tender forms and other relative documents can be seen at and obtained from office of the Controller of Stores on and from 1st September, 1941. The sale price of the tender is Re. 1/- local and Rs. 1/8/- Muffasil.

A Resume of Commodity Markets

GENERALLY firm conditions have been noticeable in the several commodity markets during the past week. With the vigorous counter-attacks of the Russians in the Eastern Front and the comparative quiet in the Far Eastern situation operators have been inclined to adopt a more optimistic view. There are hopes that the freight position might become still easier.

The strength of the raw cotton market has been mainly due to the continued good mill buying and the absence of any fresh complications in the Far Eastern situation. Jute manufactures, especially heavy goods, have been very firm on the report of the conclusion of an agreement between the Government and the Indian Jute Mills' Association for the manufacture of tarpaulins and other heavy textile articles. The seeds markets have not been quite active but values are higher on balance.

The most important feature is the big rise in the Karachi wheat market. The reports that large quantities of wheat have already been exported to Iran from India have been mainly responsible for the improvement in prices to new high levels for the war period. It is said that already about 60,000 tons of wheat have been exported to Iran and another cargo of 5,000 tons of wheat, sugar and tea is awaiting shipment to the Persian Gulf from an Indian port.

Jute

Mills are in no mood to concede the recent advance in prices and are buying only sparingly. The expected rush of arrivals for the Poojah season has not yet come and what arrivals are coming in are being eagerly absorbed. There is good demand especially for the higher grade jutes, but it looks as if there will be a scarcity of the better qualities this year as the general tendency everywhere is to increase the yield. The difficulty in obtaining large quantities of jute without an appreciable rise in prices has been mainly responsible for the reserve of mills to sell for the forward position in the goods market.

Jute Manufactures

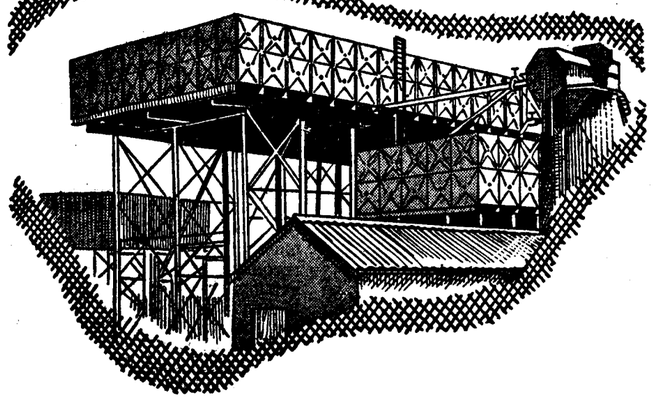
The strength of the jute market and forced covering for near positions in the hessian market have forced up prices for ready-September shipment to levels considerably above the "ceiling" fixed in the United States. But greater interest in forward positions in the later half of the week has brought about a decline in rates for ready positions. Business has been reported in positions upto the end of September, 1942. Only the reserve of mills has prevented a large amount of business being transacted. The difficulty in covering their sales with purchases of jute and the uncertainty regarding the number of working hours after the end of this year have been mainly responsible for the conservative attitude of mills.

The news regarding the conclusion of an agreement for the manufacture of tarpaulins and other heavy textile articles has had a tonic effect on the heavy goods section. With sellers scarce buyers have been forced to pay the advance in prices.

The total stock figures for the month of August reveal no appreciable change in hessian stocks, those for ordinary consumption revealing only a small increase from 20.56 crores yards to 20.73 crores yards. Sacking, both cloth and bags, show a slight decline from 17.99 crores yards to 17.40 crores yards. Out of the total August hessian stocks 1.01 crores yards weighing 2,255 tons represent 8 oz. 40" cloth. The corresponding figures for July were 73,10,782 yards weighing 1,633 tons.

Piecegoods

After several weeks of indecision operators have been more free in the matter of their purchases during the past few days with the Poojah season drawing very near. Prices have again tended to move higher. It is also generally felt that it will be useless to expect any concessions from manufacturers as there is good demand for internal consumption and also from Far Eastern markets. It is reported that during the week there has been good enquiry from the Netherlands East Indies for the supply of cotton textiles from Indian mills.



Rubber

The quotation for both spot and forward was inclined to be steady at 13 11-16d. for the most part of the week but towards the close there has been a rise in the quotation for spot to 13 ¾ d.

Linseed

The linseed market tended to improve in sympathy with other markets, but has turned slightly easier towards the close. Linseed for September position is quoting Rs. 6-6-3 after being higher at Rs. 6-7-3.

Indian Government securities and public bodies debentures. The directors have been evidently

Investments.

	Life	
	1939	1940
Indian Govt. securities ..	16.28	34.65
Public bodies debentures	31.94	35.50
Other debentures ..	3.67	6.10
Guaranteed preference shares ..	13.30	17.61
Ordinary shares ..	11.36	17.77

The above table will show that there has actually been a decline in investments in Indian Government securities in respect of other class of business while the investments on account of life business show a rise from Rs. 16.28 lakhs to Rs. 34.65 lakhs. Investments in public bodies debentures, for both life and other classes of business, show a moderate rise. The biggest rise is in investments in ordinary shares of companies in India. The Life department shows an increase from Rs. 11.36 lakhs to Rs. 17.77 lakhs while other departments show a big rise from Rs. 4.40 lakhs to Rs. 14.66 lakhs. Cash at banks on deposit account is as much as Rs. 39.56 lakhs against Rs. 16.19 lakhs. At the end of 1939 the sum of Rs. 10.69 had been invested in three months' treasury bills.

These amounts are much in excess of the customary funds the company has with banks. The reason for this rather unusual, but temporary, feature in the accounts was the decision during the year to realise, and repatriate the proceeds of certain of the sterling and other overseas investments. At the same time it was felt that the investment outlook was unsettled.

It is important to note that there is no depreciation in the market value of investments over book value at the end of the year. The total book value of investments was Rs. 3,52.32 lakhs against the maket value of Rs. 365.80 lakhs. In this connection the remarks of the chairman at the annual general meeting this year are very interesting.

"At the close of the year—and also as at this date—the book values are in the aggregate below the market values. In the general department, which invested the bulk of its funds when the prices of securities were much lower than they are to-day, the excess of market values over book values represents a substantial sum. The position in the life department, in which the investments are of more recent origin, is naturally not so strong but is, nevertheless, satisfactory in that, after writing back the provision of Rs. 2,07,903 made last year for depreciation of investments, there is still a not guided by a desire to provide a hedge against giltedged portfolio and an increase in the interest rate earned on investments.

(In lakhs Rs.)

Other business		Total	
1939	1940	1939	1940
102.04	93.09	118.69	127.72
15.71	17.64	47.66	53.15
3.38	5.63	7.06	11.73
3.47	7.34	16.77	24.95
4.40	14.66	15.76	32.42

in considerable excess of market values over book values."

House property in India shows an increase from Rs. 6.78 lakhs to Rs. 9.80 lakhs while there are no important changes in loans on mortgages of property. The difficult conditions under which the life department has been doing business is revealed by the increase in loans on policies within their surrender value and advances to policyholders under automatic non-forfeiture benefit. The former shows an increase from Rs. 4.90 lakhs to Rs. 7.37 lakhs and the latter from Rs. 4.28 lakhs to Rs. 6.52 lakhs.

More Control Orders

Importers and traders are not agitated over the announcement that machinery imports cannot be had from Britain unless priority certificates or permits are furnished. Information has been received that manufacturers will not accept orders unless the orders are supported by the Government. The importer or agent must therefore be armed with official recommendation if he is keen on getting what he wants. This procedure is just a variation of export control, but from the importing end. The purpose of the order is plain enough, it is desired that useless stocks should not be piled up by indentors and agents who may imagine that supplies can be had for the asking since all payments are to be made in sterling. The latest order promulgated by the Government of India lays down that would-be importers of machinery must apply for the necessary recommendation to the Director-General of Munitions Production who for the present will deal not only with cases of plant and machinery required for industries engaged wholly in producing goods needed for defence or war supply orders but also with the cases of plant and machinery required for other industries. The Order will have the natural effect of stimulating local production of equipment and stores required in Indian industry. Under the latest order the Control has been extended. The notification of February has been amended by the Supply Department: it is not only new and re-conditioned tools of a certain age that require licenses. According to the revised Order the term machine tool covers appliances for treating wood or metal and certain tools are listed as Scheduled Machine Tools. The Controller has to be approached for obtaining a license necessary for the import, use or sale of any Scheduled tool. The license is obtainable without any charge from the Control.

"WE ARE fighting by ourselves alone, but we are not fighting for ourselves alone.

It is only in times like these that nations can preserve their freedom and thus only can they uphold the cause entrusted to their care. But all depends now upon the whole life and strength of the British race in every part of the world, and all our associated peoples and all our well-wishers in every land doing their utmost, night and day, giving all, daring all, enduring all to the utmost to the end.

This is no war of chieftains, of princes, of dynastics or national ambitions. It is a war of people and of causes."

MR. WINSTON CHURCHILL.

Jute and Jute Manufactures

(From Our Correspondent)

Calcutta, September 4.

THE Final Review of the Jute Crop for the 1940 season, issued a few days ago, throws very little new light on the situation, and it seems doubtful if the innovation is worth the expense which must be involved. Rather does the review make confusion worse confounded. For this we do not blame the Agricultural Department who, as we admitted at the time of last year's Final Forecast, seem to have made the best shot at an accurate estimate that we have seen for many years. Unfortunately that estimate has now got involved with the Bengal Jute Regulation Act "recorded" acreage, with the result that an increase of thirteen and one third lakhs of acres has apparently produced a miserable increase of six and a half lakhs of bales—a yield of less than half a bale per acre on the excess acreage. This is the first apparent deduction to be drawn from the figures. The official average yield of a normal crop is about 3.6 bales per acre. This has been accepted for many years as sufficiently correct as representing a 100% yield. There are many in the trade who, in an average season, calculate 3 bales per acre to make allowance for short outturn from a variety of causes which almost invariably affect the crop to some extent. In his Final Forecast for last season, the Director's figures gave an overhead yield of almost exactly 3 bales per acre, which was generally accepted as being a very safe estimate, for last season's crop suffered less harm than usual from unfavourable weather conditions, and from actual experience of the jute handled, the growth was fully average. But if we are to accept the revised figures incorporated in the Review, the overall yield of last season's crop was no more than two and one third bales per acre. This figure of yield will not be accepted by any in the trade as a more accurate one than that propounded by the Director in his Final Forecast. Either the yield in bales is still underestimated, or the revised acreage as recorded under the Act is very considerably inflated. While probably the conclusion is affected by errors in both directions, there can be little doubt that the major error is in the much vaunted Regulation Act acreage, recorded at such enormous expense. While the Final Review therefore probably places the total outturn figure at nearer the actual yield than the Final Forecast did, it cannot but arouse graver doubts than before on any estimates based on the "recorded" acreage.

We have not hitherto attributed to the Jute Mills Committee a cynical sense of humour, but nothing else could account for the issue, at the present moment, of a circular asking member Mills to relpy to a questionnaire on the subject of developing markets by entertaining orders for specialities previously made in Dundee. It is notorious that much of the Dundee trade, and very profitable trade at that, consists of comparatively small orders for special goods—orders so small that Mills in Calcutta would turn up their noses at them even if they were for standard goods. At a time like the present when Calcutta has been turning away orders to the extent of thousands of bales of gunny cloth and bags of standard make, let alone special goods, simply because they had no early shipment goods for sale owing to the policy of restricted workhours, enquiry regarding their willingness to undertake the manufacture of specialities can be nothing more than a gesture. During the depression, when production was at a discount and only on special goods could a profitable price be secured, not a few local mills undertook orders which they would never have looked at in the ordinary way. But it seems unlikely that, in present circumstances, many will look so far ahead to the next depression when there is at present unsatisfied demand for standard goods at extremely profitable prices if they only had the margin of production to meet it.

The turnover in Export Jute has not been extensive. Sales are reported of Dundee Daisee assortment at Rs. 66-8 and of Dundee Tossa 4s at Rs. 64 both for Octr.-Nov. shipment. Neither has business in pucca bales with Mills been on such a large scale though Old Crop Firsts and Lightnings were taken up at Rs. 64-8 and Rs. 54 respectively. Outport Tossa Fours, Old Crop, sold at Rs. 52, Narayanganj Cuttings at Rs. 17 and Mixings at Rs. 16. Fluctuations in the Futures market have been frequent but not markedly wide. Opening at Rs. 71-8. the highest touched was Rs. 75, the lowest Rs. 70-8 and the closing is around Rs. 72.

The higher prices asked for New Crop loose jute and the reserve of sellers owing to the extreme firmness of Mofussil markets, has curtailed the amount of business, and buyers have been looking more to Old Crop balances as offering relatively better value. European Bottoms sold at Rs. 11 and Cross Bottoms at Rs. 7-12. Old Crop Indian Jat Middles sold at Rs. 12-8 to Rs. 13, Bottoms at Rs. 10 and X Bots at Rs. 7-8. A few sales of New Crop Indian Jat Middles were recorded at Rs. 13-8 while Tops and Special Tops continue in demand at Rs. 16 to Rs. 18. Imports into Mofussil markets while showing some slight increase in quantity, are still far short of normal, while quality is definitely disappointing and moisture well to the fore. The whole position is most anomalous. The Bear account open is remarkably small in reality and the fact that there is ample jute for all prospective requirements cannot be gainsaid. Yet prices are being forced to fantastic levels and Dealers put to heavy losses by a deliberate and Government encouraged policy of withholding imports. Much of the high land crop is being left to stand too long uncut with the result that the quality will be inferior though the out-turn in weight may be greater. If the cultivator is to be encouraged to look for even higher prices than are at present ruling, there is a grave possibility that what the politicians delight to call the "golden fibre of Bengal" may turn out to be of no more value than straw, for they will deliberately choke off the demand for jute or divert that demand into other channels only too eager to receive it, and to supply it with substitute and competitive materials.

The Fabrics market has ruled firm, and sharp advances have been recorded in all positions and for all descriptions. Mills have been reserved in their selling attitude while the Bazar have been eager buyers for anything and for any position. The extra five hours per week from next month has done nothing to relieve the position and, shipping space or no shipping space, demand is obviously ahead of supply. It would seem questionable if even 54 hours working would be sufficient to restore the balance, though it would certainly do something to ameliorate it. Demand has run most keenly on Heavy Goods with the result that Liverpool Twills fetched from Rs. 50 to Rs. 52 Sept. Rs. 50 Oct.-Dec. Rs. 49 to Rs. 50 Jan.-March and Rs. 48 to Rs. 49 April-June. Similarly "B" Twills sold at Rs. 43-8 and Rs. 44 Sept, Rs. 41-8 to Rs. 43-8 Oct.-Dec. and Rs. 42-8 to Rs. 43 Jan.-Mar. Cornsacks sold at Rs. 46 and Rs. 46-8 Sept. and at Rs. 42-8 and Rs. 43 Jan.-March.

RHINO Brand KRAFT PAPER

JUTE

Calcutta, Sept. 4.

Having regard to the firmness of the loose jute and pucca bales sections it should be said that interest in the futures market has not been quite on the usual scale. In spite of the approach of the Puja season, there has not been any increase in arrivals and prices in mofussil markets have been advancing daily. Mills are not prepared to pay the higher prices asked for and the volume of business passing during the week has been on a very small scale. In the absence of any large buying sellers, however, are not eager to do business. Arrivals of new crop are absorbed promptly and there is good demand especially in higher grades. The general undertone is steady, and it is generally expected that in the absence of any appreciable increase in prices, prices could be forced up further higher.

In the loose jute section, sellers have been reserved. Mills also have been buying only in small quantities. There is good demand for Indian Jat Tops and special Tops. A small amount of business was done at Rs. 16/8 and Rs. 17/8 respectively. Indian Jat Middles, new crop, have been done between Rs. 12/8 and Rs. 13 per maund.

There has not been much export business in the pucca bales section. Old crop Tossa 4's were done at Rs. 52 per bale as well as N.C's. and M.C's. at Rs. 17 and Rs. 16 per bale. Old crop firsts were done at Rs. 64/8 per bale; Dundee 2/3 and Tossa 4's for October-November shipment sold at Rs. 66/8 and Rs. 64 per bale.

The futures market has been rather irregular and the rise in the quotation to Rs. 75 has not been held. The market is closed to-day on account of a religious festival but in unofficial transactions the quotation is around Rs. 72/12.

The Department of Agriculture, Bengal for the first time has published a final review of the jute crop for Bengal, 1940. The revised estimated area of the three provinces, two Indian states and the area recorded in Bengal under the Bengal Jute Regulation Act is 5,688,750 acres, an increase of 1,324,800 acres as compared with the final forcast figures of 1940. It is estimated that the crop yielded 13,186,450 bales on the final forecast figures of 1940.

JUTE MANUFACTURES

Calcutta, Sept. 4.

The jute futures market has been very active throughout the week. Greater interest has been shown in forward positions and the reserve on the part of mills has been responsible for an appreciable rise in prices. There has been forced covering for the near positions. 9 porters ready are now quoting Rs. 22/6, October-December Rs. 20/6 and January-March Rs. 19/6. 11 porters ready September are Rs. 28/10, October-December Rs. 26/12 and January-March Rs. 24. As the freight position is expected to be somewhat easier, there should be yet further improvement in the quotation for forward positions, in the absence of any complications in the Far Eastern situation.

The report that an agreement has been reached between the Government and the Indian Jute Mills Association for the manufacture of tarpaulins and other heavy textile articles has helped to re-establish firmness. This report has led to a considerable enquiry in the heavy goods section. With few sellers in evidence, buyers have been forced to pay the advance in prices. From Rs. 41 at the time of last writing B Twills have improved to Rs. 43/14, Liverpool Twills are higher at Rs. 51/8, against Rs. 48/8 and A Twills at Rs. 53/8 against Rs. 50. Cornsacks are quoting at Rs. 47 against Rs. 42/14.

COTTON

Calcutta, Sept. 4.

With the continued lull in the Far Eastern situation and the abrupt rise in New York prices, there has been a further rise in prices in the Bombay raw cotton market. Only during the last two days prices have showed a slight decline in prices. The difference between Oomra, December-January and Broach April-May narrowed to Rs. 55 in mid-week, it has widened to Rs. 60 towards the close. Broach April-May are quoting Rs. 275/4, Oomra December- January Rs. 215/4, and Bengal December-January Rs. 161/8. The highest quotation for the week are Rs. 289/8, Rs. 210 and Rs. 158 respectively.

The New York market has been very active. The Freezing Bill has been vetoed by the President but the market has not been disheartened by the veto. It is still believed that Farm bloc Senators will carry on further agitation. Greater attention is now being paid to crop news. It is reported that boll-weevil has affected the crop in important sections of the Belt and the gathering of this crop is not well under way. Ginning returns are not at all normal for this time of the year. In New York, the quotation for October is 17.39 cents and December 17.53 cents against 16.84 cents and 17.01 cents.

PIECEGOODS

Calcutta, Sept. 4.

The piecegoods market has been firmer during the last week and there is greater inclination to operate more freely in forward positions. With the strength of the raw cotton market, manufacturers are not inclined to reduce their quotations. There has been greater enquiry and a larger volume of business has been placed with Bombay and Ahmedabad for Indian cloth for internal consumption, and from export demands no appreciable decline in raw cotton prices is considered likely even if the exports to Japan are completely cut off.

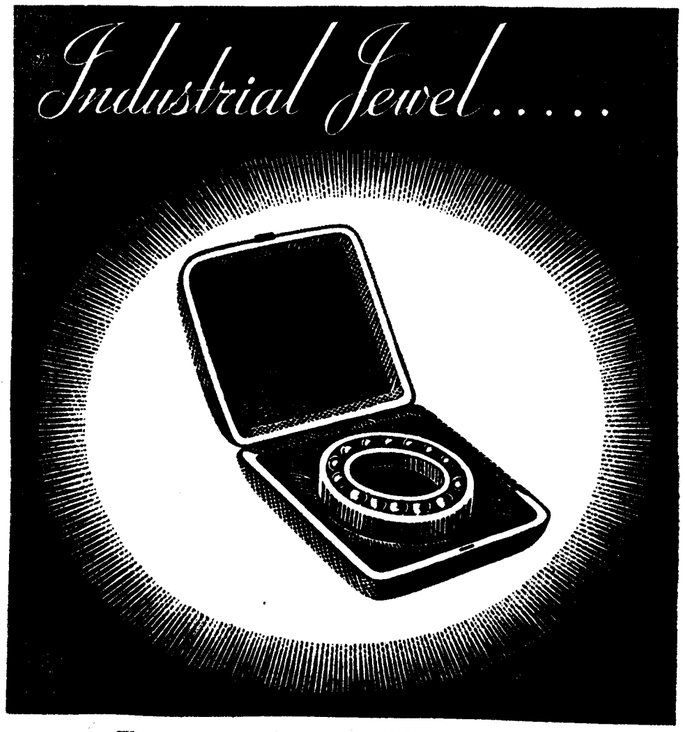
In the Japanese goods section there has naturally been no enquiry for forward positions. In the Lancashire section, only retail business has been possible, and dealers are unable to satisfy requirements owing to the operation of the rationing scheme.

The yarn market has not been very active but spinners have not been eager to do any business and there is no weakness in the price structure.

GOLD

Calcutta, Sept. 4.

The firmness of the gold market was noticeable towards the close of last week and rates were maintained at the higher levels till Wednesday. The greatest interest has been shown in first settlements in to-day's season and the quotation is at a premium over ready gold which is quoting Rs. 42/3/3, first settlement Rs. 42/3/6 and second settlement Rs. 42/3. Business done has been mostly on account of arbitrageurs.



The London price for gold has remaintd unchanged at 168s.

SILVER

Calcutta, Sept. 4.

The silver market has been uninteresting and quotations have beeen maintained only in sympathy with the gold market. Quotations at the time of writing are mostly unchanged. London Mint silver ready are 62/14, First settlement Rs. 62/14/6 and second settlement Rs. 62/15.

The London market has been rather inactive. Producer's selling has been enough to satisfy small demand. The quotation for spot silver is stationary at 23½d. but that for forward is at a discount of 1/16d.

The smooth running and precision of a watch depend upon the unseen jewels set in the movement. They take the constant friction of the pivots without wearing. Similarly the smooth efficiency of the giant machinery installed for the economic advancement of man depends upon the hidden ball-bearings we illustrate. To perform their modest, uncomplaining, withal important duty they must possess a strength that only steel can give. These jewels in Industry are made of STEEL. No wonder, therefore, that Man has learnt to depend so much upon the strength of steel.

ALWAYS — EVERYWHERE — STEEL FOR STRENGTH

ISSUED BY THE TATA IRON & STEEL CO., LTD. HEAD SALES OFFICE: 102A, CLIVE STREET, CALCUTTA.

T. N. 1738

WHEAT

Calcutta, Sept. 4.

There has been a sudden upturn in prices in the Karachi wheat market during the last two days and if there has been a slight decline in quotations towards the close, it has been due mainly to reports regarding the possibility of the removal of the import duty on wheat. In spite of the reports regarding the control of prices in the U.P. and the favourable reports regarding the progress of crop, operators are inclined to adopt a bullish view. Large-scale Government buying is expected in the near future. Choice white ready are Rs. 38/3, September Rs. 38/3, and November 39 against Rs. 36/2/6 and Rs. 36/2/6 and Rs. 37/12 respectively at the end of last week.

The Calcutta market also is active, Cawnpore ready is quoting Rs. 5/4 and September Rs. 5/6/6. Competition from Karachi flour has been less keen and it is expected that owing to the talk of tonnage competition from this quarter, may not bee keen. It is learned that a cargo of 5,000 tons mostly of wheat and sugar and some tea is being loaded and is expected shortly in its way to the Persian Gulf from an Indian port.

(*Continued from page* 435)

accepted tenders was annas 7 and pies 4 per cent per annum as compared with annas 6 on August 25, when the amount on offer was only Rs. 1 crore. The offer for next week remains unchanged at Rs. 2 crores. The Bengal Government came on the market on September 1, for Rs. 1 crore of three months Treasury Bills. Bidding was exceptionally lively the total amount offered being Rs. 2,14¼ lakhs. The average rate of discount was annas 7 and pies 11 per cent per annum which compares with annas 7 and pies 4 being the average discount rate on Central Treasury Bills. The gap between Provincial treasury bills and Central treasury bills has thus been narrowed down to pies 7 per cent per annum. This is the narrowest gap so far recorded. The statement of the Reserve Bank in the issue department does not call for any comment. In the banking department, deposits of the Central Government as on August 29, were Rs. 5.97 crores as against Rs. 5.59 crores on August 22. It is obvious that the Central Government had to take a large ways and means advance of Rs. 5 crores in order to bring their deposits with the Reserve Bank to the level of Rs. 5.97 crore.s The deposits of the Burma Government are lower at Rs. 2.52 crores while those of provincial governments are substantially higher at Rs. 5.28 crores. Deposits of banks show a sharp rise from 41.74 crores to Rs. 45.17 crores. Miscellaneous deposits have maintained a rising trend, the latest figure being Rs. 5.11 crores as against Rs. 4.79 crores on August 22. and Rs. 2.93 crores on August 15. On the assets side, foreign balances are nearly Rs. 40 lakhs down at Rs. 45.14 crores. Ways and means advances at Rs. 5.01 crores are Rs. 5 crores higher.

The Imperial Bank has abundantly shared in the swelling cash balances of scheduled banks as on August 29, Imperial Bank's cash stood at Rs. 23.50 crores as compared with Rs. 21.67 crores. Investments had sharply fallen from Rs. 60.30 crores to Rs. 58.56 crores; and this is, no doubt, connected with the general trend of Treasury Bill transactions in August during which the Government paid out more towards Treasury Bill maturities than they received against Treasury Bill sales.

The exchange market has been quite steady, with fairly considerable business passing both in respect of export bills and remittances.

Banks were sellers of T.T. at 1s. 5 15/16d., for ready up to six months forward; and banks were buyers of T.T. at 1s. 6d., for the same delivery.

Banks were buyers of three months D.A. bills at 1s. 6 7/32d., for three months and 1s. 6 9/32d., for the fourth month.

Interbank call money remains unchanged at ½ per cent.

Firms' money for call and short is quoted ¼ per cent; and ½ per cent for one to four month deposits.

(Continued from page 437)

had the President's assurance that a new appropriation of 5 billion dollars is wanted for the Lease and Lend Programme. The President hinted on Wednesday that a lot of money is needed if not now, next year. The President mentioned also that the Allies have had 3½ billion' worth out of the initial appropriation of seven billions. There was mention of curtailed production in civilian industries and reduced consumption in order to speed up the defence programme. Part of the new scheme of hemisphere defence is a loan to Mexico. The failure of Mr. Donald Richberg to make Mexico play ball in the matter of the annulled old leases is apparently overlooked. The **New York Times** printed the story that a land of 50 to 100 million would be given but there are quite a few strings to the offer. British companies (Mexican Eagle is meant) are not in the reckoning, but it is said that the State Department would help negotiations with President Camacho de Avila who is obviously milder to deal with than Cardenas. The result is the steady rise in Mexican Eagle shares during July and August. Now treated as a likely spec, it was once shunned by the sober investor. There is nothing far-fetched about the stray: a contract to take new mined silver may follow. Maybe it would hurt home producers but it would link the U.S. Treasury once again with the buying of silver and any tie-up with Mexico is a reasonably bullish point for the silver market despite the enlargement of supplies.

THE BANK OF BARODA, Ltd.

Stock Markets to-day and to-morrow

MACNEILL COAL GROUP RESULTS

WITH no unsettling developments in the war situation during the week stock markets have been rather active in the past few days. Operators on the Calcutta Stock Exchange especially, have been inclined to adopt a more optimistic view during the latter half of the week. The declaration of a higher final dividend by the Indian Iron and Steel Company Limited for the year ended March, 1941 and the conclusion of an agreement between the Indian Jute Mills Association and the Government for the manufacture of tarpaulins and other heavy textile articles have had an encouraging effect. Indian Irons and Steel Corporation have been in good request in Friday's session and quotations are at the highest levels for the week. Jute shares have been marked higher alround. The general undertone is very firm. Given the continuance of the present conditions it would be difficult to prevent a further rise in prices.

* * *

The balance-sheets of the Macneill coal Group of companies for the half-year ended June, 1941 have been published and, as expected, there is a decline in earnings for the half. year over those for the previous six months. It will be remembered that even at the time of last writing the directors referred to the difficult conditions in the trade and I remarked that it would not be possible to prevent a decline in earnings on account of the difficulties in securing transport facilities. There was a large increase in stocks and production had to be curtailed. Raisings for the whole group during the first half of 1941, therefore, were lower at 9,48,883 tons against 10,11,266 tons for the previous six months while despatches were 9,26,081 tons against 10,56,636 tons.

The aggregate profit for the group for the half year is Rs. 10,28,156 against Rs. 12,60,160 for the previous half-year. The decline in earnings over the previous half-year is more than in proportion to the decrease in despatches on account of increased working expenses.

The results of the Dhemo Main Collieries Limited and West Jamuria Coal Co., Limited, especially make poor showing. A steep decline in despatches has been responsible for the appreciable reduction in profits. The performance of the Dhemo Main Collieries Limited during the last three half-years has not been quite convincing.

Of the five companies three have maintained their ordinary dividends at the previous levels. But of the other two companies, Dhemo Main Collieries Limited is reducing the dividend from 2½ per cent to 1¼ per cent. and West Jamuria Coal Company Limited from 12½ per cent to 10 per cent.

Regarding the prospects for the current half year the directors are inclined to take a more optimistic view. Since the close of the half year improved shipping facilities, and in a lesser degree, improved wagon supplies have enabled production to be increased.

* * *

The amalgamation of the Aldih Coal Company Limited with the Equitable Coal Company Limited is now an accomplished fact. The Scheme of Arrangement for the absorption of the Aldih Coal Company Limited has been completed and the account now pleaced before the shareholders of the *Equitable Coal Company Limited* are the amalgamated accounts.

The net profit before providing for taxation for the half-year is Rs. 7,89,259 against Rs. 8,22,686 for the previous six months. After providing for depreciation Rs. 1,28,735 against Rs. 1,47,548, Rs. 2,25,000 against Rs. 1,50,000 for taxation and cesses and Rs. 1,50,000 against Rs. 2,00,000 to General Development Reserve, the dividend on the ordinary shares has been maintained at Rs. 1 per share.

* * *

Thanks to large war orders, an increase in prices and a larger volume of production the *Indian Steel & Wire Products, Limited* has experienced a very successful working period in the twelve months ended March, 1941.

The net profit, before providing for depreciation and taxation, for 1940/41 is Rs. 54,92,668 against Rs. 32,04,811 for 1939/40. The charge on account of depreciation is higher at Rs. 7,62,388 against Rs. 3,64,889. The provision for taxation, including E.P.T., is Rs. 26 lakhs against only Rs. 10 lakhs on the former occasion. The allocation to General Reserve is Rs. 6 lakhs against Rs. 5.5 lakhs. The dividend on the ordinary shares is higher at Rs. 4/8 cum-dividend against Rs. 4 per share while that on the deferred shares is Rs. 3-6 per share against Rs. 2-14-11½ per share.

The balance sheet, more than ever, presents a strong position. During the year under review, to meet the requirements of Government, additional machinery had to be procured and installed such as, barbed wire machines, galvanizing plant which is under construction and wire drawing equipment which is shortly expected to meet the demand of additional galvanized wire for barbed wire, telegraph and telephone wires. All this plant will become more or less useless after the war, and, therefore, the directors have set aside a larger amount on depreciation account.

The ordinary shares presently quoting around Rs. 60 cum-dividend afford a return of more than 7.5 per cent tax-free.

* * *

Another Company to be benefited to a considerable extent by large government orders is the *Steel Products, Limited*. Sales have increased from Rs. 2,45,630 in the previous year to Rs. 5,09,283 during the year ended April, 1941. Considerable progress has been made in handling government orders in general sheet-metal engineering line.

The net profit before providing for taxation and depreciation is Rs. 57,105 against Rs. 24,434 for 1939/40. The provision for depreciation is Rs. 7,340 against Rs. 3,944. The sum of Rs. 20,000 has been provided for taxation while Rs. 13,016 is to be transferred to General Reserve. The dividend declared is higher at six annas per share against four annas per share.

During the current year new machinery have been purchased and erected. The Company has already undertaken a big government order for the newly-erected machinery.

The balance Sheet shows a much healthier appearance as the capital reduction scheme approved during the year has been given effect to.

The shares presently quoting around Rs. 5-8 cum-dividend afford a return of more than 7.6 per cent tax-free.

WATCH-DOG.

THE NELLIMARLA JUTE MILLS CO., LTD.

The Fourth Ordinary General Meeting of the Shareholders of The Nellimarla Jute Mills Co., Ltd., will be held at McLeod House, No. 28, Dalhousie Square, Calcutta, the Registered Office of the Company, on Thursday, the 25th September, 1941, at 1-0 P.M., for the purpose of passing the Balance Sheet and the Profit and Loss Account, and receiving the Report of the Directors and of the Auditors for the half-year ended 30th June, 1941, declaring a dividend and transacting any other business that may be brought forward.

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, September 5.

It was pointed out last week that if there was to be any improvement in the markets it should be before the end of this week as with the nearness of the Poojah holidays there would be no tendency to enter into new commintments. With the stalemate in the Russo-German war situation and the absence of any complications in the Far Eastern situation operators have been naturally active during the past few days. The declaration of a higher final dividend, the conclusion of an agreement between the Indian Jute Mills Association and the Government for the manufacture of tarpaulins and other heavy textile articles and the continuance of cheap money conditions have been mainly responsible for the improvement in the several sections on the stock Exchange. Jute shares have been in great favour while Coal shares have been marked higher in sympathy. In the Enginnering section, Indian Irons are quoting around the highest levels for the week. There has been good enquiry for Timber shares and *Borooah Timber* have met with good buying and been done upto Rs. 17-4.

In the giltedged securities section there are no outstanding features of interest and rates have been maintained at last levels. 3½ per cent. Paper is stationary around Rs. 96 for the past several weeks. Business passing in terminable loans has been on a very restricted scale. 3 per cent. Defence Bonds have been noted at Rs. 102-4, 3 per cent. Defence Loan 1949-52 at Rs. 100, 3 per cent. 1963-65 at Rs. 95-2, 3½ per cent. 1947-50 at Rs. 103-8, 4½ per cent. 1955-60 at Rs. 114, 4 per cent 1960-70 at Rs. 110-8 and 5 per cent. 1945-55 at Rs. 111-5. Only a small number of transactions has been reported in provincial loans. 5 per cent. U.P. bonds were Rs. 106-11 and 3 per cent. 1952 loans Rs. 99-4. 3 per cent. 1961-66 bonds were done at Rs. 95-6.

There has been very little doing in public bodies' debentures, 3¼ per cent. *Howrah Bride* debentures being noted at Rs. 100-4 and 3¼ per cent. *Rangoon Municipal* debentures at Rs. 100-5. Among industrial debentures, 5¼ per cent. *Rohtas Industries* were Rs. 106 and 6 per cent. *Nawabganj Sugar* Rs. 102.

Bank shares have remained more or less steady around last levels. *Imperial Bank* fully paids were Rs. 1,578 and contributories Rs. 385. *Reserve Bank* were steady at Rs. 109, *Central Bank* at Rs. 47-4 ex-dividend and *Bank of India* at Rs. 141-12 c.t.

Cotton shares have been active and *Cawnpore Textiles* have been quoted at the higher level of Rs. 9-2. *Dunbar* were Rs. 145-8 ex-dividend, *Kesoram* Rs. 8-8 and *New Victoria* Rs. 4. *Elgin* were Rs. 25-2.

Coal shares also have been looking up. The publication of the results of the Macneill group of coal companies for the half-year ended June, 1941 has not had a discouraging effect on markets. If there has been a decline in earnings it is not on account of any lack in demand but to the difficulty in despatching coal with the restriction in transport facilities. It is pointed out that conditions in this regard have improved during the past few weeks and that it would be possible for coal companies to report a higher level of earnings during the current half-year. *Amalgamated* are quoting Rs. 26, *Bengal* Rs. 385, *Bokaro and Ramgur* Rs. 16-2, *Dhemo Main* Rs. 13-5, *Equitable* Rs. 36-12, *Pench Valley* Rs. 35-2, *Sendra* Rs. 13-12 and *West Jamuria* Rs. 31-12.

The jute section has been more active and a larger number of transactions has been recorded. The announcement of the conclusion of an agreement for the manufacture of tarpaulins and other heavy textile articles soon after the placing of the order for sandbags has had an encouraging effect on the market. *Albion* were Rs. 230, *Alliance* Rs. 336, *Anglo-India* Rs. 375, *Bally* Rs. 252-8, *Clive* Rs. 28-8, *Gourepore* Rs. 705, *Kamarhatty* Rs. 525 ex-dividend, *Kankinarrah* Rs. 472-8 ex-dividend, *National* Rs. 24-14, *Nuddea* Rs. 70-12 and *Reliance* Rs. 60-8.

In the Engineering section, the declaration of a higher final dividend by the Indian Iron and Steel Company Limited for the year ended March, 1941 has had an encouraging effect on the market and the quotation for Indian Irons is at the highest level for the week, being around Rs. 34-3 cum-dividend. The rise in prices has been pronounced especially during the last two days. *Burn & Co.* also have had good buyers and been done upto Rs. 440. *Indian Galvanizing* are Rs. 30-1, *Braithwaite & Co.* Rs. 9-9 and *Indian Standard Wagon* Rs. 70. The renewed support for *Kumardhubi Engineering* is not quite understandable. *Saran Engineering* were Rs. 6-14, and *Marshalls* Rs. 2-10. *Steel Corporation* have been marked higher at Rs. 19-10 in sympathy with the rise in Indian Irons.

Sugar shares have been in good favour, *Buland* and *Raza* being higher at Rs. 19. *Carew & Co.* were Rs. 11-12, *Champarun* Rs. 17-11, *Samastipore Central* Rs. 9-12 and *Murree Brewery* Rs. 16-4.

Tea shares have not been very much in favour. *Bishnauth* were Rs. 27-12, *Hasimara* Rs. 45-12, *Hattikhira* Rs. 21-2, *Tezpore* Rs. 8-8, and *Patrakola* Rs. 949.

In the miscellaneous section, *Burma Corporation* have been freely bought and done upto Rs. 4-9 ex-dividend. *Indian Copper* are unchanged at Rs. 2-3. *B.I. Corporation* were Rs. 4-14, *Bararee Coke* Rs. 27-8, *Indian Cable* Rs. 27-2 and *New India Investment* Rs. 60. Among Paper shares, *Bengal Paper* were Rs. 130, *India Paper Pulp* Rs. 160, *Orient Paper* Rs. 14-15 and *Titaghur Paper* 'A' and 'B' Rs. 19-12. Timber shares have been in good request and sellers are scarce. *Assam Saws* were Rs. 3-12, *Borooah Timber* Rs. 17-8 and *Bengal Timber* Rs. 192. *Midnapore Zemindary* were Rs. 71, *Alkali and Chemical* Rs. 19-12 and *Frank Ross* Rs. 6-12 cum-dividend.

Business in preference shares has been restricted owing to the paucity of offerings. In view of the possibility of a further increase in taxation holders are unwilling to part with tax-free preference shares. *Birla* were Rs. 132-8, *Cheviot* Rs. 169-8, *Clive* 6 per cent. preferences Rs. 144, *Hastings* Rs. 143-8, *Hukumchand* Rs. 146, *Howrah* 'A' preferences Rs. 174, *Kankinarrah* Rs. 150 cum-dividend and *Waverley* Rs. 67-8. There has been a sharp rise in *Soorah* preferences to Rs. 148. *Burn & Co.* 6 per cent. preferences were Rs. 160-8, *Steel Corporation* Rs. 120, and *Purtabpore* Rs. 18-12.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, September 5.

Money: The rate for call money continued to be quoted at ¼ per cent.

Exchange Market: This section continues steady, Banks selling T. T. at 1s. 5 15-16d. and buying three months' bills at 1s. 6s. 7/32d.

Securities: The turnover in the securities market was restricted and there was practically no change in prices. 3½ per cent Paper were done at Rs. 96. 1948-52 Loan changed hands at Rs. 97-12; 1951-54 at Rs. 99-12; 1963-65 at Rs. 95; 1947-50 at Rs. 103-4; 1960-70 at Rs. 110-8; 1955-60 at Rs. 113-15; 1945-55 at Rs. 111-5 and 1946 *Defence Bonds* at Rs. 102.

Shares: Owing to the intervention of holidays the week under review was short-working. The undertone of the market was good throughout the week. There was some profit-taking at the higher levels towards the close of the week, which was well absorbed. The closing rates of almost all speculative counters were the highest for the week. Tata Steels and Textiles met with good support.

Textiles: Mill shares were steadier, particularly due to the strength in cotton. *Bombay Dyeing*, after opening at Rs. 1,216-4, recorded a rise of about 10 points to close at Rs. 1,225. *Central India* closed at Rs. 371-8; *Century* at Rs. 513-8; *Colaba* at Rs. 211; *Gokak* at Rs. 242; *Kohinoor* a Rs. 479; *Simplex* at Rs. 143 and *Svadeshi* at Rs. 377. In the Cash list, *Ahmedabad Advance* were done at Rs. 326-4; *Sholapoor* at Rs. 3,825 and *Vishnu* at Rs. 1,357-8.

Hydro-electrics: In this section, *Tata Power* met with good demand following the reports that the Company is paying a final dividend of Rs. 45 per share *i.e.*, in all Rs. 70 per share as against Rs. 65 per share in the previous year. *Andhra Valley* were also higher at Rs. 1,750 with buyers over. *Tata Hydro* were, however, unchanged at Rs. 191-8.

Steels: Steel shares were a firm market in the absence of sellers. There was a good enquiry for the shares, the closing rates being the highest for the week. The ordinaries opened at Rs. 375-8 and the deferreds at Rs. 2,031-8, closing at Rs. 376 and

Rs. 2,046-4 respectively. The first preferences came to business at Rs. 213-2 and the second preferences at Rs. 149.

Banks: Bank shares were a neglected market. *Bank of India* were Rs. 144-8; *Central Bank* Rs. 47-4; *Imperial Bank* fully paids Rs. 1,581-4; contributories Rs. 394-6 and *Reserve Bank* Rs. 109-8.

Miscellaneous: *Bombay Burma Trading* met with some selling pressure, the closing rate being slightly easier at Rs. 490. *Associated Cement* were quietly steady around Rs. 150-12. *Belapur Sugar* were dull at Rs. 230, while *Scindia Steam* were higher at Rs. 25-4. *Shivrajpur Syndicate* were done at Rs. 33-4; *Premier Construction* at Rs. 118; *Indian Iron* at Rs. 33-10 and *Steel Corporation* at Rs. 19-5. *New India Assurance* improved to close at Rs. 48.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, September 5.

Prices in the local market showed little or no change during the week under report. Rubber and Tea shares were well supported, while sellers predominated in cotton mill shares. Sugars closed slightly higher than in the previous week.

Securities: Government securities continued to be very steady, 3½ per cent Paper quoting at Rs. 96. Other loans remained unchanged. Provincial Loans were a firm market, 3 per cent 1952 *Madras Loan* belong done at Rs. 99-5.

Mills: Sellers were in predominence in this section during the week. *Buckingham & Carnatic* met with some profit-taking, being done lower at Rs. 277. *Madura* were done at Rs. 44. *Mettur Industries* came to business at Rs. 200 c.r; *Cochin Textiles* preferences at 111; *Radhakrishna* at Rs. 151; *Sitaram* at Rs. 69-8 and *Coimbatore Spinning* at Rs. 70-12.

Utilities: *South Madras Electric* met with presistent buying by Bombay investors with the result that the price spurted up to Rs. 14-8. *Berhampore Electric* were done at Rs. 12.

Plantations: This section was an active counter and prices advanced on good buying. Among Rubber shares, *Cochin Malabar* were done at Rs. 8-4; *Midland* at Rs. 7 c.d.; *Kalpetta* at Rs. 23 c.d; *Ayer Manis* ordinaries at Rs. 7-12 and preferences at Rs. 97. In the Tea section, *Chembra Peak* met with good demand, the price improving further to close at Rs. 5-1 c.d. *Nilgiri Neerugundi* were done at Rs. 2-8; *Fringford* at Rs. 7-14 c.d; *Peermade* at Rs. 30-12 and *Fringford* debentures at Rs. 103.

Sugars: Sugar shares were somewhat active during the week, *Mysore Sugar* being slightly higher at Rs. 56-2. *Deccan Sugar* small shares changed hands at Rs. 53-4 and *Jeypore Sugar* at Rs. 11-6.

Miscellaneous: *Andhra Cement* were a dull market with sellers in evidence at Rs. 87-8. *Dalmia Cement* deferreds were crossed at Rs. 3-1. *Mysore Chemicals and Fertilisers* were slightly lower at Rs. 18-1. *Mysore Chemicals and Manufactures* were taken up at Rs. 15-4. This Company's profits are reported to be lower than for the previous years though the dividend has been maintained at 8½ annas per share. *India Jute* came in for business at Rs. 375-12; *Consolidated Tin* at Rs. 2-7-6 and *Marshall Sons* at Rs. 2-4.

LONDON STOCK EXCHANGE

Steadier conditions have been noticeable on the London Stock Exchange during the past week. Giltedged securities have been very steady and there has been good support for industrials, especially Oils and Kaffirs. The declaration of a higher final dividend by the Indian Iron and Steel Company has been well received by the London market. Giltedgd securities have been very firm with 2½ per cent. *Consols* at 81 5-8, 3½ per cent. Conversion at 105 7-16, 3½ per cent. War Loan at 105 5-8 and 3 per cent. War Loan at 101 9-16. 3½ per cent. India Sterling Paper were a shade lower at 98½.

Among other sections, Tea issues have been irregular while Rubbers have been better. There has been good buying of Mining issues while Oils have shown further improvement. *Anglo-Iranian* are now quoting 41s. 3d. Home Rails have shown a reactionary trend.

NEW YORK STOCK EXCHANGE

Prices have been fluctuating in narrow limits on Wall Street during the past week. Activity has been on a smaller scale. *General Motors* were $39½. *Anaconda Copper* $28½ and *U.S. Steel* $58¼.

STEEL PRODUCTS, LIMITED

DIRECTORS' REPORTS AND AUDITED ACCOUNTS FOR THE YEAR ENDED 30TH APRIL, 1941,

Gentlemen,

We beg to submit herewith the Audited Accounts of the Company for the year ended 30th April 1941.

We have pleasure to report that the Company has made a net profit of Rs. 49,756/6/10 after allowing for depreciation and other incidental charges. After adding Rs. 8,833/13/7 brought forward from last year the total amount of the net profit to the credit of the Profit & Loss Account is Rs. 58,599/4/5. Out of this sum, we recommend setting apart of a sum of Rs. 20,000 for Income Tax etc. After deducting the said amount, a sum of Rs. 38,599/4/5 is available for distribution and we recommend that a dividend at the rate of -/6/- per share be paid. This will absorb Rs. 18,750 leaving a balance of Rs. 19,849/4/5. Out of this sum Rs. 13,015/9/5 be transferred to reserve fund and the balance of Rs. 6,833/11/- be carried forward.

As reported to you last year the Capital of the Company was reduced from Rs. 3,00,000 to Rs. 1,75,000 and the sum of Rs. 1,25,000 so made available was duly adjusted in the current year, and out of this sum the debit balance of the Profit & Loss Account was written off and the balance sum of Rs. 16,984/6/7 was transferred to reserve fund.

This year our sales have been for Rs. 5,09,,282/10/- as against Rs. 2,45,630/0/3 during the corresponding period of the last year. We consider the result quite satisfactory. We have also made considerable progress in handling Government Orders in general Sheet—Metal Engineering line. It is a matter of satisfaction that the factory has been kept quite busy on account of our having extended our activities in different lines.

During the current year we have also purchased machineries which are under erection and we hope that the same will be completed within a fortnight's time. We have already undertaken big Government order for the said machines.

Board: Mr. Jna Basu and Mr. B. P. Khaitan retire by rotation and being eligible offer themselves for re-election.

Auditors: Messrs. H. P. Khandelwal & Co., retire and being eligible for re-election, offer themselves for re-election. We recommend that the remuneration of the Auditors be fixed at Rs. 500 for current year.

** Transfer Books closed from the 6th to the 9th September, 1941.

MARKET POINTERS

Smaller Exports of Jute:

ARRIVALS of jute into Calcutta and the mill area during the period from July 1, 1940 to June 21, 1941 totalled 91,94,000 bales as compared with 98,95,000 bales during the corresponding period of the previous year, according to the August issue of the Indian Central Jute Committee's *Bulletin*.

Exports of raw jute from Calcutta and Chittagong from July 1, 1940 to June 21, 1941 and for the corresponding period of the previous year were 23,16,000 and 30,31,000 bales, respectively.

Raw jute and jute butts to the extent of 4,772 tons and burlap and jute bags to the extent of 15,131 tons were imported into the U.S.A. during April, 1941 as compared with 5,165 and 8,755 tons, respectively, during the corresponding month a year ago.

Considerable uneasiness with regard to the shortage in the supply of bags in the country districts of the Argentine for the next grain crops prevails in the Argentine Republic. As the stocks of bags in the country are expected to be exhausted by the crops of maize and sunflower seed alone, the Government has been approached to take immediate steps to import necessary quantities of canvas to manufacture bags therefrom for the next crops by using any boats that it may be possible to obtain or, if necessary, by the use of the Argentine Navy. The Government have decided to charter four Argentine ships to take jute from India.

* * *

Cotton Textile Industry:

Decisions of far-reaching importance to the cotton textile industry in India are expected to emerge from a conference to be held in Bombay on September 8 and 9 of representatives of the Central Government and cotton textile manufacturers from different parts of the country.

The specific subjects or proposals to be considered by the conference have not yet been announced, but it is understood that discussions will be of an all-embracing nature so far as the production and distribution of cotton fabrics are concerned.

The problem of securing adequate supplies for the army of textile manufactures of numerour varities will, no doubt, take the first place in the agenda of the conference. Then will come the question of meeting civilian needs at a reasonable price—a problem which has become somewhat acute by the elimination of Japanese imports and the drastic reduction in the imports from Britain.

It is generally recognised that since the freezing order was applied against Japan, prices of cotton piecegoods have shot up. There is a regular yarn famine, so to say, and the handloom weavers are finding it difficult to carry on their trade. To meet this difficult situation the conference is likely to consider a suggestion for a scheme by which all the mills in the country, working to fullest capacity, should be made to produce sufficient to meet all civilian and army requirements, both in yarn and finished piecegoods. A fuller use of the short-staple cotton produced in India for this purpose is also likely to receive consideration by the conference.

* * *

Bengal and Assam Railway:

It is officially announced that the Railway systems, now known as the Assam Bengal Railway and the Eastern Bengal Railway, will be combined with effect from January 1, 1942, and known as the Bengal and Assam Railway (B. & A. Railway).

Insure and Increase Nation's Strength

Financial Independence of the individual is the measure of Nation's financial strength.

In this hour of world turmoil, all Life Insurance Policy-holders should take stock of their insurance cover and ascertain just how strongly they are fortified against the unpredictable that lies ahead.

And, those individuals who have not yet made provision for their protection need do so without delay and thereby contribute towards Nation's strength.

Be advised and write to-day to

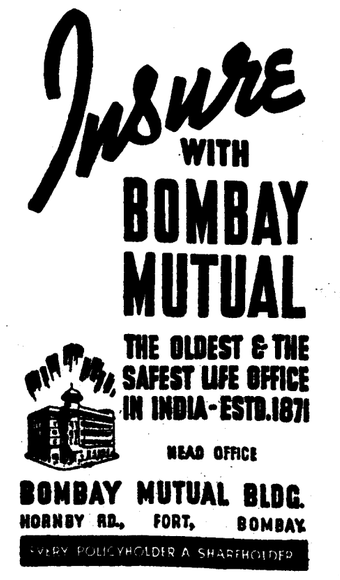
WORLD OF INDIAN FINANCE

Friday Evening.



THE week has been marked by continued ease in the money market and continued steadiness in the exchange market. Interbank call money rates are unchanged, Bombay quoting ¼ per cent and Calcutta ½ per cent. It is needless to add that these rates are purely nominal. As regards term deposits, banks are reluctant takers of new money; and most of the transactions in this respect are renewals of maturing deposits. On the weekly tender bill day, the amount on offer was Rs. 2 crores. This is the second tender day of this month; and this is also the second tender day after the increase of the weekly offer from Rs. 1 crore to Rs. 2 crores. While, against Rs. 2 crores on offer on September 2 applications came to Rs. 3,12½ lakhs, the tenders received on September 9 also against Rs. 2 crores on offer, amounted to Rs. 3,68 lakhs. Applications are thus higher than last week by over Rs. 50 lakhs. The heavier applications would, on the face of it, suggest keener bidding at this week's auction. But this conclusion is not borne out by the average discount rate. Keener bidding should have meant lower average rate of accepted tenders. On the contrary, the average discount rate this week is higher at annas eight and pies two per cent per annum as compared with annas seven and pies four last week.

This increase in the average discount rate could have been avoided if the Reserve Bank had rejected unsuitable tenders. Such rejection would have been construed by the market circles as an indication that the authorities propose to pursue a firm and confident treasury bill policy. Once the market knows that the Government are not prepared to pay higher rates for their short-term borrowings, the tenders put in next week might be expected to be on a more favourable basis to the Treasury. And there is no reason to apprehend that a lower rate would mean a drying up of treasury bill applications. It is in this regard that applications of this week at Rs. 3.68 crores are of significance. The demand for treasury bills is there and is quite substantial. The banks would like to get as high a rate of interest as possible. But, if they are made to know that they can't open their mouths too wide, they will take what they can get, considering that surplus resources in the hands of banks are mounting up, the latest figure of the deposits of scheduled banks with the Reserve Bank being Rs. 45.62 crores. In relation to money market conditions and to the Central Government's ways and means position, the monetary authorities are well able to enforce full control over treasury bill rates. If such control was not exercised this week and if the treasury bill rate was allowed to rise, it is because a discount rate of annas eight and pies two per cent per annum cannot be considered an onerous rate under any circumstances. Official treasury bill policy has not only to aim at securing short-term accommodation on the cheapest terms possible, but also at sustaining a general interest for treasury bill sales. From the latter point of view, the present treasury bill discount rate may be said to be justified.

In our last week's discussion of the ways and means problem that the Central Government will have to tackle in the course of September, we suggested that much depends upon the amount of sterling payments received by the Indian Government from the British Government. The return of the Reserve Bank of India in the banking department for the week ended September 5 furnishes us with this information. Foreign balances have risen by Rs. 11.60 crores from Rs. 45.14 crores to Rs. 56.74 crores. It is not unlikely that the month-early disbursements of the India Office and the Indian High Commissioner in London might have amounted to Rs. 40 lakhs. In simple terms, the Government of India should have received roundabout Rs. 12 crores this month in respect of inter-governmental transactions.

The increase in sterling balances on August 1 was Rs. 10 crores, this increase being in the sterling securities held in the issue department. In the week ended July 4 foreign balances in the banking department went up by Rs. 9.43 crores. In the week ended May 30 foreign balances rose by Rs. 8.34 crores. An increase of Rs. 6.40 crores was reported in the week ended May 2. The statement for the week ended April 4 is not easy to interpret from this point of view as there were large counter-transactions connected with payments to the holders of redeemed dated India sterling stocks. In the week ended March 7, foreign balances were up by Rs. 8.48 crores; and, in the week ended January 31, by Rs. 8.61 crores. It will thus be seen that the sterling payments due by the British Government have been steadily increasing month by month, till the high water-mark of Rs. 12 crores was reached early this month. If this rising trend is kept up, it is quite on the cards that the sterling accumulations during 1941 arising purely from inter-governmental transactions may be anything between £80 million and £100 million. This brings into prominence the proximity of the redemption of 3½ per cent non-terminable India sterling stock.

TREASURY BILLS

India

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills were opened on Tuesday, September 9. Total amount offered was Rs. 3 crores and 68 lakhs. Tenders at Rs. 99-14-0 per cent and above were accepted in full and those at Rs. 99-13-9 per cent were allotted approximately 30 per cent. Total amount accepted was Rs. 2 crores, the average rate of accepted tenders being annas eight and pies two per cent annum.

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills will be received on Tuesday, September 16. Successful tenderers should make payment on Friday September 19. Other conditions are as usual.

During the week ended September 5, Government of India Treasury Bills for Rs. 3,50,00,000 were sold in favour of the Issue Department of the Reserve Bank of India.

"WE ARE fighting by ourselves alone, but we are not fighting for ourselves alone.

It is only in times like these that nations can preserve their freedom and thus only can they uphold the cause entrusted to their care. But all depends now upon the whole life and strength of the British race in every part of the world, and all our associated peoples and all our well-wishers in every land doing their utmost, night and day, giving all, daring all, enduring all to the utmost to the end.

This is no war of chieftains, of princes, of dynastics or national ambitions. It is a war of people and of causes."

MR. WINSTON CHURCHILL.

Finance Abroad

Friday morning.

THE slight rise in the New York quotation for sterling may be taken as an indication of the greater strength developed by the British currency in recent weeks. The advance to 4.03¾ from the previous level of 4.03½ is presumably the end of the free sterling quotation for the official rate is now lower, and there can be no inducement to accept sterling for dollars at a price that shows no profit. The strength is based largely on political developments, reviewed exhaustively by Mr. Churchill in his speech dealing with the war. The quotation for dollars in Bombay is unchanged at Rs. 333-4 per 100 dollars and Banks' buying rate for D.D. is still lower at Rs. 328½. The rates are identical with those ruling a week ago and the absence of any movement in gold prices reflects the unusual steadiness of exchange rates. The rate for T.T. on Shanghai too is maintained over a week at 3 3-16d and the Hong Kong dollar display rocklike stablity at 1 sh. 3 1-32d. The rates for the Swiss and Swedish currencies in terms of sterling are unaltered over a long period and this again furnishes evidence of the enormous change following the adoption of the Lease and Lend plan.

The British Government's assurance that materials procured from America under the special arrangement would not be offered for sale in other markets to compete with U.S. manufactures has been forthcoming, and German propaganda has sustained another defeat. The universal belief that U.S. production will be geared to the war effort is reflected also in the calculation that with 5 billions more in the locker the democracies are setting a straight course for victory. The Greer incident cannot but exacerbate relations that started to deteriorate when Professor Dodd went to represent the U.S.A. in Berlin. The nasty remarks in the Nazi press are not going to make any difference at all, and subsequent developments may induce the Administration to do something pretty drastic.

Uruguay is not the only country qualified for financial assistance from the U.S.A. The anti-Axis policy of Washington is being stoked up with finance and a report appearing on Monday indicated that Washington had a smaller lease, and lend programme. Confirmation of the Mexican loan story was forthcoming from the Secretary to the U.S. Treasury over the weekend. A stabilisation loan is being negotiated and newspaper reports speak of similar loans to Ecuador, Colombia and possibly other countries. Colombia deserves a loan if one thinks of what Theodore Roosevelt did to set up a puppet state in Panama. It has been said that the new loan will be a prop of Mexican currency which has from 1938 displayed weakness as commercial relations with the U.S.A. were affected by the oil dispute. It is no surprise to hear that the loan is linked up with the settlement of the oil dispute; for, oil politics come in every time. At any rate the current belief is that the Mexicans must sell oil at a special price 20 per cent lower than usual to American companies and put down 9 million dollars out of any loan granted to Mexico. The stabilisation loan for 30 million dollars and the trade credit for 30 million through the Export-Import Bank will put Mexico in debt but will at the same time increase her ability to act up to her professions of preparedness to act in support of democracy.

An agreement in a week or a month was expected in Washington which affirmed that the oil companies involved had been informed of the new compromise formula. The negotiations should put the peso back in London at the old level around 2 shillings. Large scale purchases of oil would mitigate the rigours of petrol rationing in any form in the Eastern states. The balance of advantage will be with the United States of Mexico because the expropriation decree is allowed to stand and the workers are in a strong position. An agreement will help to shut off oil supplies to Japan because Japan was credited three years ago with plans to develop relations with Mexico at least to spite the U.S.A.

Mr. Morgenthau came out with another warning against inflation. He is worried about defence expenditure and about the clamour for higher wages. The belief that no man or board could put through the immense production programme is ascribed to Mr. Bernard M. Baruch who was a big figure in Wilson's time and knows all about war finance and defence production. There is a later report suggesting that Mr. Biggers will order all things his own way. There is also a report indicating that the railway brotherhoods (American for trade unions) are restive. They are, it seems, set on higher wages, and transport is any day a key industry. So it seems as if all is not quiet on the labour front though the auxiliary of the C.I.O. in New Jersey has made a nice gesture in asking for a donation of one hour's pay for the benefit of British labour to make a new home for children. That is nothing compared with the big news that the revenue bill was remitted to the House of Representatives. The incometax exemption limit has been lowered by an amendment to 1,500 dollars from 2,000 dollars in the case of married persons and from 800 dollars to 750 dollars in the case of single persons. The amendments will put 367.5 million dollars more into the Treasury and the Lower House will probably "okay" the proposal.

The Germans lost ground in Turkey's trade during 1940. The U. K. Commercial Corporation had staked out a big claim and got hold of the wool and other produce. Germany could not make use of her barter agreement and delayed deliveries upset the plans of Papen Dr. Clodius has gone out to Ankara to oil the wheels of trade. There is the acute need for chrome ore and something has to be done after the Anglo-Russian joint guarantee to Turkey. The fears regarding invasion by way of Bulgaria have to be countered by soothing assurances and with a lorry service in operation between Sofia and Istanbul the Germans may make a strong attempt to recover their footing in the Turkish market.

(Continued from page 463)

As we had pointed out on earlier occasions, the Government of India have had to provide a kind of working capital with respect to the agency work they discharge for the British Government. In broad terms, it may be said that half the working capital is found from the balance of the Government and half by recourse to ways and means advance from the Reserve Bank towards the last week of the month. That is to say, a substantial ways and means advance is now being taken more or less regularly towards the end of the month; and this is being promptly liquidated early in the following month from the reimbursement received by way of sterling balances.

The statement of the Reserve Bank in the banking department shows important changes as a result of the substantial sterling receipt from the British Government. The Central Government's deposits have risen from Rs. 5.97 crores to Rs. 8.73 crores, after paying off the ways and means advance of Rs. 5 crores. The increase in the Central Government's cash balance would have been much greater except for the beginning-of-the-month payments. For the same reason, Burma Government's balances have gone down from Rs. 2.82 crores to Rs. 1.96 crores; and the deposits of provincial governments from Rs. 5.28 crores to Rs. 4.76 crores. Deposits of member banks show a small rise from Rs. 45.17 crores to Rs. 45.62 crores. Miscellaneous deposits have shrunk from Rs. 5.11 crores to Rs. 4.08 crores. On the assets side, foreign balances have risen substantially from Rs. 45.15 crores to Rs. 56.74 crores. In the issue department, active note circulation registers a new record at Rs. 263.17 crores. Notes held in the banking department have fallen from Rs. 16.44 crores to Rs. 10.40 crores.

The return of the Imperial Bank shows a further shrinkage of investments from Rs. 60.30 crores to Rs. 58.56 crores and a further expansion in cash from Rs. 21.67 crores to Rs. 23.50 crores.

The exchange market has been quite steady, with fairly considerable business passing in respect of export bills.

Banks were sellers of T.T. at 1s. 5 15-16d., for ready up to six months forward; and banks were buyers of T.T. at 1s. 6d., for the same delivery.

Banks were buyers of three months D.A. bills at 1s. 6 7-32d., for three months and 1s. 6 9-32d., for the fourth month.

Interbank call money remains unchanged at ½ per cent.

Firms' money for call and short is quoted ¼ per cent; and ½ per cent for one to four month deposits.

Control of Cotton Textile Industry

THOUGH the effects of the war on industrial activity were foreseen more or less clearly from the beginning, few in India ever suspected that Government control of industry would become expedient. It is true that control, similar to what is being exercised in Britain, will not be found necessary. But there can be little doubt that with the increasing responsibilities of this country as a source of supply and with the special conditions obtaining in every branch of production and the market therefore, Government's interference in industry will not be limited to price control.. Conditions in iron and steel brought about the control order issued a few weeks ago. It would seem that it is now the turn of cotton textiles, where the certain cessation of Japanese exports and the growing demand on the Indian industry have brought about a big spurt in prices. The repercussions of so steep a rise in the price of clothing on working class standards of living and the large scale requirements of Government of cotton goods form a strong *a priori* case for official control and regulation; and it is encouraging that Sir Homi Mody, the new Supply Member and the cotton textile interests have already conferred on how best to meet the present situation.

The present situation in the cotton textile industry, while in part due to the abrupt increase in the orders placed by the Supply Department, is the direct result of the decision of the Central Government to freeze Japanese assets, which is bound to lead to a virtual cessation of Japanese imports into India. The responsibilities of the indigenous industry will be multiplied as single-handed it will have to meet Government needs, cater to civilian consumption and leave an export surplus for markets which have now no other source of supply. Owing to the freight problem and the rationing scheme in Britain Lancashire manufacturers are now more or less out of the picture. It is not surprising, therefore, that there has been an abrupt rise in values since the announcement of the freezing order.

As a matter of fact, the upward trend in prices of piecegoods is traceable to as far back as November 1940 when the Eastern group Supply Council visited this country. The improvement in prices has been pronounced since the beginning of this year but during the last three months there has been a spurt in prices. The rise was so high that provincial governments found it necessary to utter a warning against any unduly speculative increase in prices.

The intrinsic position may be held to warrant the higher levels of prices now theatened. Government requirements at the moment amount to as much as 25 per cent of the total production which is now running at the highest levels. More and more mills are working double shift. Total production in the year ended March, 1941 was 4,259.8 millions and just falls short of the record production for 1938-39. Production has been keyed up after March last and one may be sure that the current year will record in the history of the Indian cotton textile industry.

Apart from the increase in the Government's requirements, the demand from neighbouring countries has also increased. Total exports in the financial year 1940-41 amounted to Rs. 16.49 crores against Rs. 8.58 crores in 1938-39. In the three months ended June, 1941, there has been a further increase in exports to Rs. 3.90 crores from Rs. 3.28 crores in the corresponding period in 1939-40 and Rs. 1.92 crores in 1938-39. The flow of exports can be expected to be accelerated still further, as there is no alterative source of supply for the countries in the sterling area in the Near and Far East. Imports of cotton yarn and manufactures in 1941 were Rs. 11.35 crores against Rs. 14.05 crores in 1939-40 and Rs. 14.15 crores in 1938-39. The fact that imports during the months ended June, 1941 were higher at Rs. 3.14 crores against Rs. 2.72 crores in the corresponding period in 1939-40 perhaps suggests that the Japanese had tried to forestal the freezing order.

The freezing order, as remarked above, had therefore, a galvanizing effect on the piecegoods market. Mills were unable to ensure deliveries and there was a scramble for ready stocks. Prices were rushed up to giddy heights and only the check to speculative activity has prevented a further increase. Values in August are slightly below the highest levels for the period. The table given below will indicate clearly the progress of prices since the beginning of 1940.

Index Nos. of Wholesale Prices in Calcutta.

(Base 1914=100)

1940	Cotton Raw	Cotton Manufactures	Other Textiles
January ..	113	131	155
February ..	110	124	147

March ..	74	138	157
April ..	66	142	165
May ..	72	150	170
June ..	81	158	169
July ..	88	214	177

Such then are the developments that have led up to the present situation. And not the least important of their effects is that it is now profitable to cater to civilian requirements than to military requirements. Only a few months back the position was quite the reverse. War orders which were placed with select mills yielded a wider margin of profit and led to the outcry that these mills had been unduly favoured. The same mills have now asked for a proper distribution of war orders so that everyone would take advantage of the improved conditions in the year. In May this year a Conference was convened to consider the distribution and the fixing of prices for government contracts. As the biggest buyer of cotton textiles, the Government were naturally anxious to safeguard its position. It has now been decided that prices are to be fixed at May levels and allowances will be made for any further increase in costs.

As for civilian consumption, production has to be pushed up further and prices will be controlled by a panel of textile representatives which will be formed shortly. The headquarters of the Supply Department for cotton textiles will be transferred to Bombay and will work in conjunction with the panel mentioned above. The demand for the creation of a panel was made by the industry even earlier; but the Government did not grant the request. It is to the credit of Sir Homi Mody that he has been able to satisfy the industry; and though there is no reason to be apprehensive, it is to be hoped that the question of effective price control will not be lost sight of. The present level of piecegoods prices is almost prohibitive; and the repercussions of a rise in prices of goods which enter so largely into working class cost of living can be easily imagined. The fact that the handloom industry can afford considerable relief in the present position rapidly needs mention. But such relief will not be available unless the shortage of yarn is promptly attended to and weavers are enabled to adopt intensive production.

Another important problem to be taken into consideration is that of the utilisation of the surplus stocks of the short-staple varieties. There is no fear of a surplus of the long staple varieties. As a matter of fact, it is even feared there will be a shortage in this regard. The increasing imports of foreign cotton are perhaps due to this anxiety. Imports of cotton raw and waste in 1940-41 were Rs. 9.47 crores against Rs. 8.05 crores in 1939-40 anl Rs. 8.51 crores in 1938-39. In the three months ended June, 1941, imports were Rs. 4.99 crores against Rs. 3.06 crores in the corresponding period in 1939-40 and Rs. 2.34 crores in 1938-39.

Exports of Indian cotton are lower at Rs. 34.56 crores in 1940-41 against Rs. 31.54 crores in 1939-40 and Rs. 24.67 crores in 1938-39. In the three months ended June, 1941 total exports were Rs. 5.79 crores against Rs. 8.18 crores in the corresponding period in 1940, and Rs. 9.38 crores in 1939.

It is true that the Indian industry adapted itself to the use of the inferior grades. We have heard much about the efforts to increase the use of shortstaple varieties and the new methods introduced in mixing and the like. But the ground yet to be covered is enormous. The problem now thrown up can be solved only if it is attacked on all fronts. The existence of a highly prosperous cotton textile industry side by side with starving cotton growers is not only anamolous but is full of social and economic dangers to the future. The cotton industry has of late learned to take the cotton growers under its wing. It is to be hoped that Sir Homi Mody will go beyond the strict limits of his task as a Supply Member when he deals with such a vital and far-reaching problem.

Drug Control Under Way

IN such an industry as the manufacture of medicines the task of laying down and maintaining standards is first where the scientist assumes control over industry. The essence of all sound progress is conformity to standards, for deviation is fraught with grave dangers to others besides the producers. How successfully a beginning has been made in the field of testing and assaying medicinal preparations in India may be gauged by a perusal of the first report, covering three years, of the work of the Biochemical Standardisation Laboratory. Extracts from the Director's report have appeared in the press suggesting quite clearly that the laboratory, which came into being earlier than the Drugs Act, has more than made good its promise. It is only in the full report that the connection between the Drugs Enquiry Committee's recommendations and the new machinery for the regular testing of drugs to judge their purity and strength is brought out. The Provincial laboratories recommended by the Committee have not been set up except in Bengal and the functions thrown by the Drugs Act of 1940 must be assumed by the Calcutta laboratory. This fact alone would confer on it special importance since the need for an efficient agency for standardising drugs and chemicals is fully recognised.

The laboratory was set up in January 1937 after Colonel Sir Ram Nath Chopra had formulated a scheme for the testing and analysis of drugs. The visit of the Director-Designate to Europe and his correspondence with America resulted in the collection of data for the proposed organisation. The report states that the first two months after the securing of premises for the laboratory were spent in marking lists of apparatus needed. Nearly six months passed before work in the laboratory started; yet regular additions to equipment have shown that the laboratory contains the seeds of progress. For two years the laboratory was handicapped by the lack of a storeroom and proper accommodation was obtained only in 1939. The growing library and the drug museum to rouse substandard samples are valuable adjuncts. What the laboratory could and should do was indicated by the Chopra Committee and the nucleus laboratory had to assume very wide and varied functions before the requisite legislation had been enacted.

What followed the setting up of the laboratory was a general survey of the quality of drugs. The laboratory had to obtain factual data on the subject of the quality of drugs in the Indian market. The laboratory staff also gained valuable training before the Act of 1940 came into force. It is certain that a large and fruitful field awaits cultivation since the provinces are long likely to rely on the Central laboratory for guidance and analysis and to act as referee in cases of dispute.

581, Merchant Street, Rangoon

Specimens poured in after the issue of circulars to local governments, and the record of the next two years may be studied in the appendices to the report dealing with the foreign and Indian drugs submitted for analysis. Sera, vaccines, antigens etc., were put before the laboratory which had to decline to undertake bacteriological work and indicate that chemical and pharmacological testing alone was possible.

The results of the survey of the quality of drugs offered for sale in India are the collection of data on the nature and quality of drugs available in India and the extent of adulteration existing in the country. Colonel Chopra records his opinion that "the laboratory has developed a consciousness of the importance of the purity and potency of drugs as a necessary corollary of adequate medical treatment and progress. It has acted as a deterrent to the nefarious practices of non-ethical fraudulent manufacturers who have been exploiting peoples' credulity and undermining people's confidence for the sake of gains. It has, moreover, helped in the training of a band of Indian workers of the most difficult and almost virgin field of biological and chemical analysis who in the future should be able to shoulder the responsibilities attendant on the enforcement of drug control legislation.

The Customs Department, the Medical and Public Health Departments as also the open market were sources of supply of drugs, both locally produced and imported. If analytical work was confined to drugs important from the point of view of the medical profession, the results obtained were revealing. As many as 163 samples of digitalis preparations were taken for bio-assay. Only 22.08 per cent. of the samples were found to be within the prescribed standard....to bring about the desired clinical effect. About 14 per cent of the samples were found to be completely inert or weak in potency to such an extent as to be completely valueless as therapeutic agents. The rest of the lot varied from 50 to 79 per cent in potency and would not ordinarily be expected to bring about in the usual dosages the desired effect on the heart and circulation for which a physician would prescribe that remedy.

The report should be, therefore, of special interest to the medical profession. The report contains a reference to tests on two samples of insulin of foreign origin. Both were equal in potency to International Standard Insulin. From Bangalore came a preparation known as anti-diabetic tablet. The powers of reducing the blood sugar level claimed were found to be illusory on administration to rabbits. The report adds dryly: It is probable that there are in the market many such preparations with fantastic claims which can be disproved by scientific analysis.

Chemical methods applied to samples of drugs reputed to conform to B. P. or B. P. C. yield the conclusion that over 50 per cent of the samples did not conform to standards or conform to specifications claimed by the manufacturers or senders. The larger percentage of the preparations were manufactured or bottled in India and 17.3 percent were of foreign origin. The report points out that 44 per cent of pharmaceutical preparations submitted to analysis did not conform to standard. The evidence as to adulteration is conclusive, and the report adds that situation might be viewed as worse if judged by the quality of drugs available to the consufer in the market. An abstract of investigations states that 80 per cent of 175 samples of Ergot extracts did not come within the B. P. limits. Out of sixteen samples of Tincture Belladonna as many as six were found to be deficient in alkaloid contents. Out of 17 calcium gluconate preparations, 8 samples did not come up to standard. Four samples of castor oil out of six did not come up to standard, and the greater part of 119 samples of cod liver oil failed to come up to the B. P. specifications.

The laboratory extended its attention to patent, proprietary and miscellaneous remedies. Here too the experience was disappointing though wide range of preparations was taken in the investigations. In spite of the fact that in many cases no definite standard or claim could be ascertained out of 94 medicines tested by the Laboratory 33 samples have been found to be not up to the claims. Of these 33 samples 25 were of Indian make, 7 foreign and 1 of unknown origin. If the position is disturbing as regards patent medicines advertised for sale, an even more alarming situation prevails as regards hospital mixtures. The poor quality of medicines supplied by dispensaries to out-patients is brought out by an investigation that revealed that quinine contents in 79 samples were not up to stated quantity and in 11 samples exceeded the declared quantity. It is easy to add also other examples from the report which puts down dispassionately how few of the hospital mixtures or solutions are up to description.

Editorial Notes

Wages in Wartime

THE steady rise in note circulation like the advance in prices despite control affords a measure of the inflation that has overtaken Britain. In spite of all assurances to the contrary, neither prices nor wages have been held to the level of September; for the prices of imports have naturally advanced since the outbreak of war, and every advance in manufacturing costs is inevitably reflected in the higher prices asked for. Workers however have been assured that the cost of living too would be subject to control and the assurances have become more frequent this year, as it has become difficult or useless to concede increases in wages. Officially the policy is one of leaving wages untouched but Sunday work, night work, overtime etc. add to the labour costs and it would not be possible to keep wages down when the cry has gone up for cent per cent production. It is true that dilution of labour may keep down average wages; but the labour organisations have not always subscribed to the view that wages must be stationary merely because the Chancellor of the Exchequer fears inflation. Government adheres to the view that the distress of the worker arising from rationing and higher prices in part due to higher taxation can only be temporary and has indicated to the N.U.R. for instance that increments to wages are ruled out because the Government has to keep down prices and make sure of its own borrowing. The statement of policy has been criticised by Sir Walter Citrine last week in a speech asking for shorter hours and more economic production. The fact that Government had admitted the necessity for such increases in wages as had taken place appeared to Sir Walter Citrine as conclusive evidence for his view that additions to wages had been inadequate. It has been estimated that between September 1939 and February 1940 the cost of living had risen by 35 per cent. The General Secretary of the T.U.C. summed it up by saying that the cost of living had risen by 30 per cent, since the war had broken out, while wages had risen only by about 20 per cent. Sir Walter argued that stabilisation of wages meant a lower standard of living and the T.U.C. could not subscribe to the view that war entailed such a sacrifice. He complained that the wage policy would reduce the worker's share in the national income and he was resentful of measures that curbed the demand for wages when war expenditure as such had not risen greatly. The harmony of the proceedings at Edinburgh was evidently spoilt by Sir Walter Citrine's strong criticism of the new doctrine that it is impossible to follow the rise in the cost of living by periodic negotiations and addition to wages. Sir Walter recognised that incipient inflation is there and has to be checked. If the Government, warned by the reports of the Committee on national expenditure, is averse to grant just demands merely because of further dangers, Labour's spokesman does not accept that reasonable increases should be withheld. It is clear that there is an important difference of opinion despite the support given in Mr. Gibson's speech to Mr. Churchill's policy at home and abroad. Sir Walter's speech contained a reference to the possibility of voluntary saving proving inadequate, and he has already grasped the possibility of an increase in compulsory saving or deferred wages. This may be in line with the policy of stabilisation of wages but will go against the grain of those advocates who want to see that the worker's standard of living does not suffer.

Rising Railway Receipts

A surplus of as much as Rs. 20 crores far larger than that realised in 1940-41 is expected at present. The consistent improvement in railway earnings supports such an inference, and it has been concluded on the basis of the earnings figures up to the end of August 10, that any fall in the indirect revenue would be made good by a substantially larger contribution from railway revenues. The assumption that higher prices will be reflected in more active conditions in trade and industry would appear to underline such an optimistic forecast as appeared on Monday estimating the probable increase as Rs. 20 crores. For the last 11 days of July the increase over the earnings for the comparable period of 1940-41 was Rs. 85 lakhs, and if this average were to be maintained throughout the year it should be easy to secure an increase of Rs. 20 crores. The last railway earnings statement indicated that all the State railways benefited from the increase in earnings; the last communique again indicates that the G. I. P. and N. W. R. showed the strongest rise in earnings owing to the increased movement of both goods and passengers. Earnings of the State Railways for the four months ended July 31, disclose an increase of Rs. 4.54 crores at Rs. 39.54 crores. The increase is not uniform in the sense that it is negligible in the case of the A. B. Railway and it is as much as Rs. 125 lakhs in the case of the G. I. P. and Rs. 123 lakhs in the case of the N. W. R. By August 10, the increase in railway earnings had increased to Rs. 5.44 crores owing to a further advance in earnings compared with 1940-41. Total earnings from April 1 to August 10, had risen to Rs. 42.96 crores as against Rs. 37.52 crores in the corresponding period of last year. Wagon freight totals for the period ended August show that the increase in car loadings reported from the U. S. A. has no exact parallel in India since the wagon details on the broad gauge lines show a fall except under cotton. In the case of metre gauge lines an increase under cotton and oilseeds is disclosed. The overall increase in wagon loadings was 3 per cent for the broad gauge and 0.29 per cent for the metre gauge lines. The increase in the first 10 days of August was more pronounced, as the earnings statement too suggests, and it is reflected also in a rise in the overall percentage of increase. Traffic in cotton and oilseeds accounts for the improvement on both the broad gauge and metre gauge lines, and one can understand why the call for keeping wagons moving has gone forth. Increased movement should not only stimulate trade but relieve the railways of such anxiety as is produced by delay.

have now to face. This, however, need provoke no anxiety as to the U. S. attitude to the blockade. The efforts of the blockade are certainly reflected in the steep fall in the imports of several countries while the denudation of supplies by force and cunning explains the rise in the exports of such countries as have passed under German control. The League of Nations bulletin of statistics for April has brought in a statistical survey of foreign trade the changes in the foreign trade of many European countries as between 1938 and 1940. A steep fall in imports during 1940 was reported by Denmark whose takings of grain and foodstuffs were sadly reduced in 1939. The enormous increase in exports of livestock entailed by scarcity of feeding stuffs, is shown in the rise in exports of swine from 136,800 in 1939 to 754,000 in 1940. There was no such increased under either bacon, butter or eggs but the totals for 1940 show clearly that Denmark's specialised agriculture was hit hard. The fall in trade with Britain during 1939 was inconsiderable compared with the calamity of a German conquest in April last. The vast increase in exports of manufactures from a country whose light engineering and machinary products were famous is again testimony to the plundering habits of the Teutons. The grip over Balkan trade obtained by Germany is seen in the enormous expansion of fruit and tobacco exports from Greece to Germany. The trade statistics show that Greece sent bauxite, iron and pyrites, chrome ore, manganese and nickel in previous years but 1940 figures are lacking. In spite of the war in the last two months of 1940 exports to Italy showed the same expansion; but Italy, which increased her share of the import trade of Greece, did not have the same dominant position as Germany. The terms of trade were evidently advantageous to Germany although her ability to export was compromised seriously. The reduction in German supplies of coal and coke, textiles, metals and machinery and chemicals, drugs and dyes can only be explained by the assumption that the war and the scarcity of raw materials were damaging factors. The expansion of German exports to Hungary forms part of a process that has culminated in the alliance directed against Russia. Hungary's reduced imports of oil were responsible for a large increase in imports of coal and coke. The German share of trade in machinary fuel and paper etc. increased considerably; but Hungary's nascent industries must have been hit by the reduction in imports of all raw materials except timber.

Neutrals with a seaboard have evidently experienced little difficulty. The main feature of Portugal's trade in 1940 was an increase of 24 percent in the value of imports despite a serious fall in the imports of raw materials. Increased requirements of food for a fairly large fugitive population accounts for the increase under wheat, sugar, oilseeds etc. A substantial increase under mineral oils and tinplate was also witnessed last year. Exports of wolfram recorded a surprising increase in value though not in quantity. The increase is only to be expected since Portugal is the solitary European producer of woolfram. The major producer of Beralt Tin and Wolfram is a company under British management so that it is certain that the military mineral would not have found its way to Germany. The expansion in trade between Rumania and Germany owes not a little to the renunciation of the British guarantee. The decrease in Rumania's total exports of petrol, gasoline etc. from 4,178,000 metric tons in 1939 to 3,529,000 metric tons in 1940 can only bear one interpretation. The earthquake and Russian raids since then must have caused far more damage than the natural adverse factors. It is noteworthy that Rumania sent 473,000 tons of oil products to the U.K. last year; though the quantity was less, the value was much higher than in 1939. Oil exports to Turkey and Yugoslavia increased at the same time as her exports of oil to Germany rose to 1,148,000 tons. The impact of the war on Sweden's trade has been discussed more than once. The 1940 statistics are incomplete; but the reduction in all classes of imports as also the principal exports can hardly be measured in terms of currency alone as furnished by the Bulletin. Figures relating to Sweden's trade with Britain, Norway and America are not available. Another neutral, Turkey experienced a sharp fall in imports and the German share in Turkey's import trade fell from 50 per cent in 1938 to 11 per cent in 1940. The share of the U.K. exceptionally showed an increase, and a remarkable increase was registered by Switzerland whose position in the import trade of Yugoslavia and Hungary also showed a notable increase.

Coffee Control

The renewal of the Coffee Control Ordinance was certainly expected by the planting industry. The caution against forward dealings last month suggested that much. That the control scheme has not produced vast good

but lessened the surplus and established prices has been recognised even by trade interests which long saw in the pool holdings a threat to the price-structure. On a strictly short-term view the strict regulation of sales will be condoned, but anticipated renewal of the ordinance will probably leave India without any competitive ability in the post-war period. It seems unlikely that the recovery of foreign markets after the war will be helped by the retention of pool coffee or the adoption of export dumping. Having regard to the fact that control of exports is practised under agreement by the Latin American countries which account for the bulk of the world's coffee, one may come to think of the market expansion ordinance as a *pis aller*. Ordinance No. 8 of 1941 introduces certain amendments and adds a new section prohibiting sale by any registered owner of coffee not grown on his own estate. The penalty or contravention of sections 16-19 of the ordinance of 1940 is fixed as a fine which may extend to one thousand rupees. Certain contracts concluded before December 3, 1940 are excluded from the purview of the ordinance provided particulars of such contracts are furnished. The merits of the control scheme have been canvassed at the meetings of planters this year and Mr. Ivor Bull's statement approving the scheme now in operation indicated also that its success arose from the support given by the industry. The reduction in pool holdings and the advance in coffee prices during the past two months must naturally induce the feeling that the renewal of the ordinance as amended is both inevitable and desirable.

In the Third Year

The second anniversary of the war released a flood of oratory that has hardly yet subsided. Whatever be the extent of Hitler's failure it certainly should not stimulate the complacency to which many are prone. The British Premier's warnings on this subject should be given due weight, but Hitler's recent meeting with Mussolini has some sinister significance. It is certain that the manifestations of discontent in areas assaulted by the R.A.F. may lead to an intensification of pressure on France. The doubts and fears expressed by the Free French are not without foundation. The negotiations for a peace are evidently in an advanced stage, and the new constitution with its emphasis on reconciliation has stimulated a policy of repression that has had unpleasant results on MM. Laval and Deat. In this connexion it is interesting to follow the speculations of Mr. David Thomson, a very subtle analyst of propaganda and its results. He claims that France is divided not into two but eight parts and they are all pieces in a gigantic game of chess. Alsace and Lorraine have been annexed and French nationals have fled in large numbers from the two provinces. The G.H.Q. at Brussels retains control over the prohibited zone of two Departments. Containing the most important industrial concentration, this zone represents an important asset. The occupied zone is large and is still governed from Paris and more important industrially than Vichy's domain. Captive France is Hitler's biggest bargaining counter, and the anxiety to procure the return of many Frenchmen in the prime of life may explain Marshall Petain's approval of collaboration. Since the Mediterranean coastline is under the control of the Vichy government, it has the fleet and the African Colonies under its control. With an enormous population of refugees from other parts of France it has grave problems for which Darlan has only a single formula. African

ELECTRICITY

makes life easier

FOR example, nothing can be more convenient than an electric kettle. The drinking of tea is a growing habit, but with an ordinary kettle it is sometimes rather a nuisance to make, especially if the fire has burnt low. When you come home unexpectedly late or feel that a cup of tea would be just the thing to end the day before going to bed, that is when you will appreciate how useful an electric kettle is—hot, fresh tea in ten minutes!

France is only nominally under the control of Weygand, for German infiltration has been rapid, and the endorsement of Spanish policy in Marshall Petain's last broadcast speech pointed to a serious danger. The Asiatic France to which Mr. Thomson referred has virtually disappeared; for the Japanese have taken over Indo-China and Syria is no longer under Vichy control. Reference must be made to Free France which has added Syria and Lebanon to the French Congo, Gabon, Chad and the Cameroons. The growing power of General de Gaulle, for whom notice has been taken by the State Department in Washington, has induced Vichy to make the most of the collusion for which Abetz and de Brinon were original sponsors. There is some reason to think that the eagerness of Vichy to throw in its lot with Germany arises from the feeling that Britain is likely to break the invasion threat once for all and the sudden breaking off of diplomatic relations with Russia can only be understood by reference to the Germanophile policy of Admiral Darlan. It has been noted often that Vichy may be prepared to give the fleet and bases asked for despite the warnings addressed by the U.S.A. There have been few references to the subject after the reported abdication of General Nogues in Moscow and the mention of Weygand having composed his differences with Darlan who expressed admiration of German generosity and humanity even before he had got the agreement he yearned for. Failure in Syria and the Middle East may impel Hitler to seek a victory in the west at the expense of France necessarily, for Britain is too strong and resolute an adversary. Hitler has at least six out of the eight Frances under his control, and if Italian claims to Nice, Corsica and Tunis are as peremptorily withdrawn as they were advanced in December 1939 the old men of Vichy may accept Hitler's terms, particularly, as Franco-American relations have steadily deteriorated, just as Hitler wanted them to. With another winter ahead, there is no saying what lever may be pulled and when, and it is therefore best to look at goings on in France when talking of German reverses in the Ukraine or a dismal deadlock in the north.

Immovable obstacles

Much that is difficult to understand in Far Eastern developments becomes intelligible on a review of events in April. Sir Robert Brooke-Popham went to the Philippines and talked things over with Admiral Hart. He proceeded to Hongkong and since that visit the A.B.C.D. front has taken definite shape. The Japanese Foreign Minister went to Moscow in April and Mr. Matsuoka was lucky to come home with a neutrality pact. He may have imagined that the road to the southeast was clear but the Anglo-American entente had prepared. The logical sequence of the Lease and Lend Bill was a thorough revision of British policy in the Pacific. M. Van Kleffens had already arrived in Manila by way of the U.S.A. and the Air Marshal saw him on his second visit to Manila after a trip to Hongkong where the local Chinese population gave an assurance comparable to the testimany of goodwill in Malaya. American officials including the High Commissioner in the Philippines consulted Sir Robert Brooke-Popham and the defensive preparations in the Philippines acquired fresh significance. The calling up of reservists last week represents the last stage in the preparations that began in April. The preparations undoubtedly received a filip from the fears of the Chinese that Japan would exploit the differences between the Kuomintang and the Communists by flourishing the new pact. The pact has, however, been followed by little save the adjustment of frontier differences in which Manchukuo was primarily interested and Mr. Matsuoka, the author of the pact soon fell from power. He is now credited with different intentions. He is said to have given up his admiration for the Axis, because he wanted to use his pact with Moscow to break with the Axis, and he is said to be keener than Admiral Nomura on some sort of arrangement with the U.S.A. The U.S.A. has fortunately made up its mind, and Japan's inability to proceed beyond Indo-China has been demonstrated in the asseverations of goodwill in Bangkok. And the implications of persisting in an aggressive policy have not been lost on Prince Konoye who is evidently ready to shift his gear to reverse.

Industrial and Prudential Results

In the Directors' report and accounts of the Industrial and Prudential Assurance Company reference is made to a slight decline in the value of new business secured during the year 1940. The reason is obvious and recovery to former proportions may be expected soon. The total number of policies issued in 1940 namely 3,600 policies for an aggregate sum of Rs. 81,41,509 compares favourably with the 1939 total of 3,809 policies assuring Rs. 95.42 lakhs. It cannot be said that the closing of the industrial branch has influenced the decline in new business which is due to external factors. Total business in force at the end of 1940 has risen to 27,636 policies assuring over Rs. 6.2 crores of which policies for Rs. 30.28 lakhs have been reinsured. It may be said that Industrial and Prudential carries an increasing volume of business thanks to the normal growth of

revenue and funds. The revenue figures for the year are distinctly encouraging. Premium against 29.4 lakhs in 1939 and investment income amounted to over Rs. 30.27 lakhs as receipts less tax accruing from the Life Fund of Rs. 117.47 lakhs came to Rs. 4,56,390-11-7. The figure suggests that the net yield on the funds was up to average in a period of unduly depressed interest rates. The total outgo under claims in the ordinary branch came to Rs. 9,22,203-6-0 and surrenders took Rs. 1,17,025-4. The total expenses and commissions for the year recorded a decrease compared with 1939 and this fact must be given special weight in assessing the record for the year. The expense ratio is around 25 per cent and further reduction may be confidently expected. The stabilisation of business explains the substantial addition to the Funds which has risen from Rs. 117.48 lakhs to stand at Rs. 134.44 lakhs at the end of the year. The increase of nearly Rs. 17 lakhs in a chequered year is creditable and the further addition after successive increases certainly confers importance on the year's accounts. The investment position is again more stable, to judge by the balancesheet and the absence of any appropriation to the special reserve fund for depreciation. In the previous year the company had to make special provision, but the position has improved greatly since and it will be noticed that the reserve funds exceed as in previous years the paid-up capital. The Directors' report refers to a petition submitted to the High Court for the reduction of the nominal value of the shares which are of the value of Rs. 50 each with Rs. 6 paid up. The Life Fund is the chief liability shown in the balancesheet and other liabilities in regard to outstanding claims and premium deposits are well covered by the revenue items among the assets and free cash balances totalling Rs. 2.64 lakhs. The only noteworthy changes in the 1940 balancesheet are the increases under Policy loans, house property and mortgages. The large percentage of investments in giltedged securities indicates that policyholders are strongly placed and the increase in the holding of prior charges is in line with the current belief that an extension of interest in fixed interest stocks is desirable on many grounds. The Directors express the belief that this company, entirely Indian in capital and management, will continue to receive the support of all shareholders and policyholders. The 1940 results, reviewed here, certainly confirm all previous estimates of the sound and progressive office, and they should go far towards strengthening the faith of the Company's supporters in future.

Dutch Indies' trade

The revelations concerning Japanese demands and the Dutch East Indies refusal give added importance to the report dealing with the trade of the colonies in the last year. There have been important changes in the trade of the Netherlands Indies. The share of Europe fell steadily but a larger percentage of exports went to Britain. According to the report of the President of the Javasche Bank exports to Britain in 1940 rose from 34.2 million guilders to 53.7 million guilders. Trade with Turkey and Greece alone was possible and Europe's share of East Indian exports fell while Americas rose from 20.96 percent to 34.93 percent. The enlarged exports of tin and rubber to the U.S.A. account for the development and Singapore's entrepot trade benefited substantially. It may be assumed that half of the N.E.I's total exports were consigned to the U.S.A. Increases in exports to the S.S. and Malaya, Japan and China were part of a general movement in which trade with Asia rose from 34.86 percent to 37.41 percent. Japan derived supplies from the N.E.I. valued 48.5 million guilders in 1940 as compared with 24.7 million guilders in 1939 owing to larger exports of oil products, rubber and tin. China took larger quantities of sugar while India reduced her imports of sugar to a great extent. Trade with North and East Africa was hampered by the war while Australia too limited her imports from the Dutch Indies. The principal feature of N.E.I. trade last year was a fall of 14.1 percent in the volume of imports. Reduced imports of rice were noted last year owing to the higher degree of self-sufficiency obtaining and the imports, too, fell, especially, during the second half of 1940. In the first half of the year imports showed an increase owing to a re-stocking movement and this was helpful when war came. Trade with Germany disappeared in September 1939; in May 1940 trade with Europe was cut and trade with Britain too was none too easy.

Imports from the U.S.A. Japan, Australia and British India became, more important thereafter but these countries were not anxious to sell as they had their own difficulties. Even the rise in the prices of all imports did not stimulate interest in the N.E.I. market. Though import control appeared late, the reduced purchasing power of the population of the Dutch colonies as also persistent shipping difficulties influenced the import trade. The non-belligerents like the U.S.A. continued to increase their share of the Netherlands Indies import trade; the share of the U.S.A. rose to 23.1 percent; it was 29.9 percent in the last quarter, while that of Japan rose to 23.3 per cent for the year, being as high as 31.8 percent in the final quarter. The percentage figures convey an idea of what must follow the freezing orders issued on July 25. Japan stands to lose considerably as regards her export trade while she is deprived of essential imports like oil, tin and rubber though the last two can be had from Indo-China and Thailand. Trade with China and Hongkong was flourishing according to the Javasche Bank's report and imports from South Africa, Australia, India and Thailand increased last year. The growth of local industries was influenced by the difficulties experienced as regards imports but smaller enterprises could hardly benefit. The large enterprises with bigger capital have greatly strengthened their position.

Office workers, from senior executive to junior clerk, need efficient lighting for efficient work. The best and most economical way of achieving good lighting is by using MAZDA Pearl coiled-coil lamps with the wonderful non-sag filament. More light for the same current as you use today or the same light for less current.

It is certainly too early to shout, as far as the war is concerned. But I have a feeling that, while we are still groping in what might be the heart of the wood, we can also think of how best to race home, once we get out of it. The optimism behind this attitude, I have of late found to be irrepressible. I may preface my discussions of post-war problems with observations of this kind. But I cannot refrain from them altogether. Those who can do nothing for the war except exhort others to do their work need hardly plead the war as an excuse for postponing or shirking important work. Politicians in India, of the co-operating kind, of course, plead the war as sufficient reason for evading every bit of work of national importance. The President of the Muslim League calls upon the Premiers to resign from the Defence Advisory Committee because the League cannot afford a split in the present period of unsettlement. The supporters of the Premiers adduce the same reason for allowing things to stand as they were a few days ago. The Congress is happy under the compound opiate of non-cooperation and non-embarrassment. Those who wage war actively against the Nazis have, no doubt, every reason to concentrate their energies on the fight. As for others, it can hardly be said that they also fight, who talk and wait. My point is that, if war requires preparation far in advance of its actual outbreak, no less does peace call for fore-thought. The last war showed that peace, badly handled, can bring on war more surely than the sabre-rattling of ambitious dictators. Nothing can be more foolish than to go to sleep after depriving enemy generals and armies of their weapons. Like the sea-weed polyps, which grows new stems when the old ones are cut off, arms seem to grow in good time even after the most careful disarmament. Powerful brains have to toil hard and catch flashes of inspiration if the Battle of Peace is to be won. If anything, it is an even more arduous fight than what goes on in the western frontier of Russia. The preparations for that war can never be too early; and they can go on side by side with the war effort without detriment to the latter.

It is motives like these that impel some not to be too preoccupied mentally with the war and to give some attention to the shape and nature of post-war problems. Unfortunately, however, much of the writing on post-war problems is somewhat too didactic to be of any practical use. Mr. H. G. Wells' "Rights of Man" has little or no use now and will have little or no application when the problems of peace are actually tackled by men in power. The joint declaration of Mr. Churchill and Roosevelt is a naive blend of abstract principles, pious wishes with subtle provisos which qualify the former and detract from the latter. It is no use criticising those in power, who must naturally be reluctant to tie their hands in advance. It is the duty of those who have, not power, but influence, to give currency to constructive ideas and lay by a rich store of them, from which, when the time comes, statesmen and sovereign peoples can draw, to the advantage of themselves and the world at large. But we can ill afford to forget that ideas which are too ideal, in the sense that they are mere mental constructions utterly out of touch with the facts of life, are a hindrance, rather than a help. To leave the average man mystified about good ends and purposes is the surest way to drive them into the arms of chauvinists and charlatans. What good you want must seem to grow out of the evil that there is. It is only then that ideas influence large masses of people and statesmen feel impelled to respect their wishes.

It is in the political field that such good preparations for peace are needed. And here all that we have is H. G. Wells' "Rights of Man." But political developments are notoriously hard to foresee or provide for in advance. When expediency and wisdom point to the same course of action, developments are favourable. Such favourable turns are known to have occurred only in the history of particular nations; whether they will happen in international affairs is a different matter. At the moment, we can think of no such turn except the breakdown of the Soviet-German pact and the outbreak of active hostilities between the two countries. Perhaps, this was inevitable; but when the two countries were broadcasting their friendly feelings to each other, confidence in our own understanding was by no means strong. Now that they

are at war and Russia doesn't seem to be doing badly, we might say that even in the international sphere there may be a natural pressure towards the good and the better.

But that is still a matter for speculation. Relatively less speculative are the fortunes of world economy and the future of economic policies. When I discussed the Churchill-Roosevelt statement in these columns, I expressed my doubts whether the two democracies could do as much for the removal of want as for the removal of fear. For removal of want from the lives of all the peoples of the world—and the statement mentioned nothing less—involves not national economic planning—we are all familiar, only too familiar, with that phrase—but world economic planning. If planning is to a large extent the opposite of **laissez faire,** it implies an authority which can plan and execute it over the whole sphere to which the plan is meant to apply. That is where economics comes up against politics. We can think of plans which do not involve a frontal attack on political power, which compromises with it on certain points, brings it round in certain others and leaves the rest to adjustment in the future. But there is a minimum of power, and influence, which is a slight variant of it, without which no country or even group of countries can initiate an economic plan which aims at the removal of want from the lives of men. But it is not too optimistic to think that, once the Nazi menace is removed, any move for a world economic plan will enjoy sufficient support to have a fair chance of success. Britain and the U. S. A. are not two nations but two large groups of nations. Add to them the U. S. S. R., spread over two continents, then you have nearly three-quarters of the earth's surface behind the plan.

But the support will necessarily depend on the nature of the plan and the manner in which its benefits are proposed to be distributed. I have said before that the Churchill-Roosevelt declaration contains a plain hint that no serious change in the structure of economic society is contemplated by its authors. Whether and how far this insistence on a predominantly individualist basis of economic society will alienate Soviet Russia, there is no means of knowing now. For my part, I have often thought that Stalin's enthusiasm for communism was of the most tepid kind and that he would not care very much for converting other countries to communism. I have less faith now in that view than I had formerly. If it is true that Stalin, too, is a more or less devout communist, Russia's co-operation in a world economic policy would be far from hearty or generous. The chances of a world economic policy rest not a little on the degree of understanding between the two democracies and the Communist Leviathan in the heart of the old world. There is no reason to think that opinion in Britain or the U. S. A. must remain necessarily moored to the principles expounded by the Premier and the President. The war, which changes many things, may change also the position and mood of the ruling classes in the great democracies. It may conceivably leave an economic structure which effectively shuts the door of retreat to pre-war individualism. If objective economic conditions

necessitate larger concessions to socialism and if, at the same time, the working classes gain political power and power of perception and action, and, if at the same time, Soviet Russia makes concessions to the individualist viewpoint, then there may well be a broad common ground for agreement among what we may call the victorious powers.

But is there a similar common ground of action? This is assuredly a more difficult question to answer. When the war will be over and peace will be declared, the architects of a world economic plan will find that they have to deal with a number of different categories of nations and peoples—I am using the terms employed by Mr. Churchill and Mr. Roosevelt in their declaration. These categories are important, because all of them cannot be treated alike. There are, to begin with, the victors and their allies and active sympathisers. Then there are the vanquished and their sympathisers. Neutrals have to be divided into those who have to be treated with deference and those who can be expected to yield to pressure. There are sovereign, but weak, peoples like the Chinese. There are the South American republics who are only gradually getting over their distrust of their powerful neighbour on the north. The colonies of European nations on the African Continent stand on a special footing of their own. Then there is India, whose position politically is simplicity itself, but whose economic significance is a source of great complication.

What will a world economic policy be like when it is meant for such a wide variety of nations and peoples? The removal of want and the most pressing physical needs naturally come first. That is a fairly definite ideal. The League of Nations in its economics branch and the International Labour Office did a great deal of spadework in this regard in what proved afterwards to be the evening of the League's life. The reports of the Nutrition Committee and the writings of Mr. Harold Butler, furnish a useful starting point for any inquiry with the means of removing want from the lives of the backward peoples of the East. There is yet no clear idea of the repercussions of any large scale programme devoted to that purpose on the economic life of the advanced industrial nations of the west. One can only ask a few questions. Can it be supposed that the production of substitutes will relieve the pressure on the tropical countries for the production of industrial raw materials? It seems quite unreasonable to make that supposition. Ersatz may prove, after the war is over, to be a kind of hothouse plant which can thrive in the artificial conditions of Fascist war economy but cannot survive conditions of peacetime. Or Germany may have got ersatz production so inextricably intertwined with normal productive activities, that the social costs of effecting a separation will be found to be forbidding. After all, when the attempt at another world economic conference or some equivalent or improvement of it will be made, the architects of the world economic policy will not find their hands altogether free. The basis on which they will have to work will be a congeries of national economies, each bearing the traces of the great depression, the controls that followed and the conditions of a war without all precedent. Every natural economy will be found to be singed by the depression, distorted by the controls, misshapen as a result of hasty administrative action and altogether mutilated by the condition of the war period.

In such conditions, faith in a national economic policy, far from dwindling, will actually be on the increase. Speaking for India, I, for my part, would say that I would much rather trust the economic future of this country to an amateurish cabinet of Indian politicians than to an international committee of experts. This is not prejudice, nor narrow economic nationalism. National needs are either invisible or distorted when seen through international eyes. There is always a degree of interdependence among nations which raises problems of its own. But that is hardly sufficient reason for denying the importance of shaping the national economy primarily with reference to national needs.

Tit Bits of Industrial Technique

Quality in Sugar

A large number of sugar mills sent samples for analysis during the year 1940-41. According to the Director of the Indian Institute of Sugar technology a very larger proportion of samples of commercial sugar belonged to the 1st class crystals. Crushed grades constituted only 4.1 per cent of the total number of samples. The analysis of quality revealed that the majority of samples received this year belonged to colour ranges between No. 25 and 27 and in grain size ranged between Indian sugar standards C to F. A definite improvement in the colour was also recorded. A fairly large number of factories produced more than one grade. The Director states 'It is satisfactory to note that the number of grades to be produced by individual factories is lesser than any previous years. The number of factories producing a single grade has increased to 36 out of a total of 114. Most of the Indian sugar crystals now correspond in colour and grain to Java white having colour equal to 26 and grain size equal to C. The director adds "General improvement in quality is evident so far as colour is concerned but uniformity in grain size is still lacking a tendency for producing to many grades is on the decline. The use of Indian Sugar Standards number for denoting qualities has slightly improved but is still far from satisfactory. Only four samples of Khandsari sugar were received and their colour and grain was those submitted by the factories.

Munitions from Mines

The gold mining industry in South Africa has played an important part in the munitions production. Apart from the steady increase in gold production which gives dollars South African mining companies are placing workshops and machine tools at the disposal of the Government. The other heavy additional work in the form of munitions production was undertaken for instance by mining companies which had also released a large number of employees for military service. At the annual meeting of the Crown Mines, Limited Mr. John Martin said that in common with the rest of the industry the manufacture of munitions for the Director of War Supplies had been undertaken. The adoptation for the purposes of machine tools equipment in the workshop has been quickly and successfully organised and the work produced in spite of the volume, variety and quality reflects credit on those responsible. A statement to the same effect was made by Mr. Martin at the Rand Mines meeting also.

U. S. Tea Imports

The U.S. import statistics disclose a fall in the import of black tea into that country during the nine months ending February 28, 1941. A fall of over 8 million lbs. is recorded in the statistics and imports from India have fallen from 12.39 million lbs. in the previous year to 7.8 million lbs. in the eight months ending February 28, 1941. Imports from Ceylon have increased during this period and figures reveal an increase in Supplies from Sumatra. A noteworthy feature is a very sharp decline in the imports of tea from Formosa and Japan. The decrease suggests that any recovery in U.S. imports will benefit India and Java rather than producers. Imports of green tea from Japan recorded only a small decrease, and it is noteworthy that total takings of green tea for these eight months reveal an increase of nearly 7,00,000 lbs. The decline in total imports in tea is not unexpected in view of the very substantial improvement in American imports of tea during 1940-41.

The Indian Tea Market Expansion Board considered at its last meeting a proposal for the introduction of tea cars for Indian troops serving overseas. It was decided by the Committee that a special service would be of great value and would without affecting its propaganda value provide facilities and amenities for Indian troops. It was indicated that the Indian Board might provide funds to start and maintain services in Egypt if the International Board's representative could undertake to manage it. The International Board informed the Indian Board that the schemes was acceptable and suggested that cars and and staff should be supplied from India. Five cars could be operated in Egypt with advantage in the opinion of the International Board. Negotiations with the military authorities as regards the despatch of cars etc. were said to be in progress.

(From Our Correspondent)

Simla, Sept. 9.

Two more of the Viceroy's new members—Sir Sultan Ahmed and Sir Akbar Hydari—have arrived in Simla. The only change so far as the Law portfolio is concerned is that the Judicial Section of the Home Department will now be transferred to the Legislative Department. It was anomalous in many ways that subjects like Hindu law reform, amendment of the Criminal and Civil Procedure Codes and several other questions of purely judicial interest should be in the hands of the Home Member. The transfer of this section will give a little more work to the Law Member, but the fact is that even with the addition of these responsibilities there will not be sufficient work for an active Law Member. It is possible that Sir Sultan Ahmed may try to keep himself busy by undertaking new legislation, but there are already rumours that when Sir Andrew Clow vacates his office early next year to take up a Governorship Sir Sultan may be given the Communications portifolio. In that case Dr. Ambedkar may be considered for the Law Membership. With the arrival of Sir Hydari discussions have already begun for re-organising and extending the Information Department. One question to be decided is whether the present attached offices like the Information Bureau and the All-India Radio which will now be under Sir Akbar, should be completely separated from their respective Departments. There appears to be a proposal that in order to lighten the task of the new Information Member the administrative control of the Information Bureau may continue to be with the Home Department, and that of the All-India Radio with the Communications Department so that Sir Akbar Hydari may confine himself to questions of policy and direction and be free from administrative worries.

* * *

A new Department for Civil Defence under a separate Director-General, Mr. Ibbetson, is now in the process of creation in anticipation of the arrival of the new Member, Dr. E. Raghavendra Rau. There has already been some complaint that none of the three administrative heads of this Department as now proposed is an Indian, but as these are temporary arrangements it is expected that the new Member will look into them after he takes charge. It is now becoming increasingly clear that as a result of these changes the Home Member will be left with very little work compared to other members. In any case there will be no justification for retaining the large staff now concentrated in the Home Department. The suggestion made in INDIAN FINANCE that the present Finance portfolio of the Government of India should be bifurcated into two separate portfolios —Finance and Revenue—has attracted a good deal of attention. Both administratively and otherwise this bifurcation will lead to considerable improvement. There is reason to believe that the new members of the expanded Council will take up with the Viceroy the question of redistribution of portfolios on a more satisfactory basis. It is neither fair to the Members concerned nor conducive to efficient administration that some Members should be over-burdened and some should be complaining of insufficient work.

* * *

The Commerce Member who is now away on tour in connection with the Textile Conference in Bombay is expected back in Simla on Thursday. As the Petrol Rationing Officer, Mr. C. H. Reynolds, who has for some weeks been visiting the provincial centres to study the working of petrol rationing, is also returning to Simla this week it is understood that the Commerce Member will review the whole question in the light of the reports received. A further statement will then be made by the Government of India on the policy and working of the rationing rules to reassure the public. In this connection, it is understood that the production of power alcohol from molasses as one way of augmenting our petrol supplies is receiving the Government's attention. According to official figures available in Simla the proportion of the total production of molasses profitably utilised is not even one half and possibly not more than one third. Over 300,000 tons of molasses are discharged to waste annually from sugar factories in India. It is estimated that if the compulsory use of a 20 per cent. alcohol petrol mixture as fuel for motor vehicles (as provided for in the United Provinces Power Alcohol Act) is extended throughout India the present total output of 450,000 tons could be absorbed entirely by alcohol production. The importance of building up this industry for motor fuel purposes is realised, but there is the difficulty of obtaining the plants necessary for any large scheme of development. The countries from which the required distilling plant can be imported are now few, and owing to indefinitely long deliveries and poor and hazardous shipping-facilities importation is difficult and doubtful. It is also pointed out that though engineering firms in India are in some cases capable of undertaking the construction of distilling apparatus time and experience would be required before manufacture could be properly established. Negotiations are reported to be going on with certain Indian firms regarding the design and manufacture of distillery apparatus. From these facts it is clear that if the Central Government and the Provincial Governments take the intiative profitable use can be made of the existing supply of molasses, admittedly ample and cheap, for the expansion of the production of power alcohol.

* * *

A two-day meeting of the Standing Finance Committee concluded to-day. One important proposal sanctioned to-day by the committee was the appointment of a Trade Agent in South Africa. In former years the attitude of the South African Government towards this country was such that there was little prospect of any useful results from the appointment of a Trade Agent, but owing to the war, and particularly owing to the contact secured through the establishment of the Eastern Group Council recently in India which includes a South African representative conditions have to some extent changed. According to the latest trade returns South Africa has been exporting to India goods worth about Rs. 8½ lakhs per month. South Africa's purchases from India during the four months, April to July this year, amounted to Rs. 1¼ crores. It may be possible for a Trade Agent to develop Indo-South African trade to mutual advantage. At its yesterday's sitting the committee sanctioned a new telephone exchange for Madras, a three channel telephone and a four channel telegraph carrier between Bombay, and Delhi *via* Rutlam and the development of the Bengal Telephone Corporation's telephone system in Calcutta. The Calcutta scheme includes the installation of an automatic exchange of 4000 lines in the South Exchange. Another interesting proposal sanctioned is the grant of over a lakh of rupees to the Indian Gliding Association.

* * *

The report of the Government of India's Agent-General in South Africa gives disquieting information regarding the position of Indians in industry. Twenty years ago the number of Indians employed in Railways and Harbours was nearly 3000. As a result of the White Labour policy this fell to less than 500 in 1939. The present Ministry in South Africa seems willing to afford greater scope to Indians, but even the latest figure is not more than 533. In his report the Agent-General says that while it cannot be said that there has been any marked symptom of intensified racial prejudice during the year (1940) it must however be also recorded that there has been little practical recognition in South Africa of the great part being played by India in the war. He refers to the failure of the Natal Provincial Administration adequately to respond to his appeal for a substantial provision for the development of Indian education and for the free education of girls. One out of every two Indian children in Natal, it appears, never go to school and of those who do, very few reach a secondary school. Says the Agent-General "until this state of things is remedied it is clear that the community is bound to remain in a state of economic subjection."

* * *

There has been some criticism regarding the Government of India's delay in coming to a decision on the appointment of a High Commissioner in South Africa. Reports mention the name of Sir Shafaat Ahmed Khan as the most likely choice of the Government of India. It would appear Sir Rama Rau was asked to accept a second term, but for personal reasons he was unable to comply.

Bombay, Sept. 10.

The holding of the textile conference here appears to have imparted much-needed strength to both cotton and piecegoods. The cotton market is distinctly better though profit-taking introduces irregularity. The reactionary trend in U. S. markets has apparently been ignored by local operators who attach greater importance to the second Bureau report than the President's veto of the freezing bill. There is, of course, the possibility that the firmness of the seeds and wheat market influences an advance in cotton, but the major factor is likely to be the improvement in piecegoods. Such unsteadiness as characterised the market has been temporary and a broadening of demand is expected. The profit statements of most mills in Ahmedabad and Bombay point to a wholly satisfactory position and the restricted trading for forward delivery cannot be viewed as a depressing feature at present. The assurance of larger demand from abroad and a drastic fall in imports is a much bigger factor just now and the recession in prices of standard lines is offset by the fact that higher prices are being paid for coloured and printed goods, while the recent conference gave a wide berth to the subject of price contest. The arrival of the official of the Supply Department to talk things over with millowners is widely interpreted as betokening large orders. The settlement in Iran should also stimulate export trade to the Middle East and the questions regarding prices etc., may be settled by argument and adjustment.

There is going to be shortly another conference, this time of chemical manufacturers. Mr. B. D. Amin will preside over the third Annual meeting of Indian Chemical Manufacturers in Bombay and a number of important questions will be considered by the representatives of the chemical industry which is not a new but a fast growing one. Simultaneously discussions will be held concerning the place and purpose of research between industrialists and research workers with a view to develop co-operation. There will be a social function at the Taj since the delegates will be entertained by the President and the importance of the meeting will be enhanced by the presence of delegates from all parts of India.

The trouble in Iran naturally excites attention. Martial law in the capital and the manifestations of disaffection in the air force indicated that the Fifth Column, happily dispersed by British intervention, had made some sort of progress. Diplomatic complications have been happily resolved by the demilitarisation of the north western and western districts of Iran and make possible the opening up of the country. A 'Persian' writing in the '*Times of India*' has explained why and how India should help Iran at present. Reference is made to the fact that Iran is affected by famine. If the capital is in the grip of scarcity conditions in the country can be imagined. There is urgent need for warm clothing and the act that monopoly concerns neglected the home market and sold all the cotton and woollen goods to Germany is a measure of the prevailing distress. Price control had paralysed trade and the rate of exchange was bolstered up by the cruel curtailment of imports. New light is thrown on the situation in Iran by the correspondent who points out that where there were a hundred shops there is now hardly one or two. Shortage of tea, sugar and all foodstuffs has been reported frequently and the only shops that keep going are the opium and drink shops seen everywhere because the Government monopoly wants to rake in the shekels. There is an alarming lack of medicines in this mediaeval country punished by an Oriental despotism. Five years of drought and police oppression have, according to the correspondent, undermined the vitality of the nation, instanced by the low morale of the armed forces. Relief must be organised by Muslims and Parsis interested in Iran's welfare. Voluntary medical workers are needed and the Government must arrange that imports of foodstuffs into Iran are free of duty. It has been suggested that part of the royalties paid by the Anglo-Iranian Oil Co., should be earmarked for the relief expenditure to be undertaken by the Iranian Government which cannot expect outside agencies to do everything. The letter indicates that what was read off and on in American papers about Iran's progress under Riza Shah has no bearing on Iran's present plight. The recent removal of the ban on imports from Gulf Ports should help to promote trade with Iran.

Businessmen in Bombay have followed carefully the speeches of the Commerce Member in Karachi. They have found a more sympathetic approach and his promise that post-war problems would not be treated as a minor question of civil administration has been noted. His assurance concerning cotton has kindled a hope that the situation in the Far East would not be the sole factor. When he met a deputation of merchants in Hyderabad he discussed the problem of repatriating Indians from Japan. As a steamer would be leaving soon for taking off British subjects, including Indians he argued there was no room for anxiety. The Commerce Member assured the deputation that steps were being taken to safeguard Indian interests in Japan. Difficulties created by the freezing order would be cleared up in a short time. This must be welcome to Sindhi merchants who are known to have above Rs. 1 crore invested in branch businesses in Japan. He advised merchants to see the Indian Trade Commissioner at Osaka regarding their difficulty. With reference to openings in new markets he said that India should seize all opportunities of extending trade with the Dutch Indies, Malaya and East Africa. He declared that steamers would be made available for shipments of Indian goods to overseas markets and he expressed a hope that Indian traders would build up trade with every part of the world. He advised that in order to keep their markets permanently Indian traders should quote reasonable rates for goods and not to take undue advantage of the situation created by the war.

What the Parsis have done in the year that ended last week has been made the subject of a special review. What the Parsi Panchayat aided by various trust committees has accomplished for the good of the community may be inferred from the statistics relating to outdoor relief. The increase in relief expenditure is however taken as evidence of increasing distress. It has been noted that nothing has come out of various special schemes for the amelioration of the poor. The Parsi Panchayats decision to open small workshops for the manufacture of articles of daily use was anyway a happy beginning. The Youth Conference and the Political League are offshoots of older organisations. The priesthood which has latterly indicated the community's duty to help in the war effort had clashes with the reformists in the press. The community's reputation for charity and loyalty is upheld by the figures relating to charities. Parsi charities during the year amounted to Rs. 40 lakhs including Rs. 30 lakhs from Mr. Hirji Kolah the notable solicitor, and the community's share of the donations to the war gifts fund amounted to nearly Rs. 8¼ lakhs.

Mr. K. B. Vaidya who has come home from Canton told a Chronicle reporter how things look like in the Far East. The interview indicated that China knows little of India in spite of an inherent sympathy for this country which had expressed aversion to Japanese aggression often enough. The Chinese still retained the impression that Indians were either watchmen

(Continued on page 503)

EASTERN GROUP-SLEEPER CONTROL

(Tender No. 51/41-42.)

Sealed tenders are invited and will be opened at 3 p.m. (Calcutta time) on the 17th October 1941 for the supply of 9981 (Nine thousand five hundred and eighty one only) special size sawn sal and/or pyinkado and teak sleepers. Full particulars may be obtained from the undersigned on payment first of Rs. 5 (Rupees five), being the cost of tender documents to the Chief Auditor, B. N. Railway House, Kidderpore whose receipt for the amount must be produced before such documents can be issued. This sum will not be refunded.

C. F. GILBERT,
Sleeper Control Officer,
Eastern Group.

B. N. Railway House,
Kidderpore, Calcutta,
Dated 22-8-1941.

A Resume of Commodity Markets

AFTER the earlier firmness a generally easier tone is noticeable in several commodity markets during the past week. The recent strength of the market was due mainly to the activity in the jute and raw cotton markets. The acceptance of tenders by the British Government for linseed, castorseed and groundnuts at somewhat higher rates was also another favourable factor. But the rise in prices, which was to a certain extent speculative in nature, has received a check. Profit-taking in the raw jute market at the higher levels has been mainly responsible for the appreciable decline in values, well below the best levels for the week.

The feeling that enormous supplies of rubber, tin, wool, jute, cotton etc. from Britain's reserves to Russia should lead to an increase in exports from this country is still there. The establishment of an Iranian route for supplies to Russia also gives added importance to the position of this country as the pivot of the group.

The most important feature of the week is the continued firmness of the Karachi wheat market. Prominent buying by exporters have resulted in a substantial improvement in values. The exports to Iran and the broad hint of the possibility of further exports to the same region have pushed up prices. The price control exercised in the United Provinces has lost its significance at the present moment. It is even feared that there will be a shortage of wheat supplies in this country, since with the virtual cessation of Australian imports, India's exportable surplus is very small.

The freight problem alone creates a very difficult situation. Australian wheat cannot be carried all the way to Iran. It is on this account that there have been rumours recently that there is a possibility of the import duty on wheat being removed so that Australian wheat can be landed in Calcutta and supplies in Karachi and Bombay released for export elsewhere. It is not surprising, therefore, that there has not been any suggestion of weakness so far even after the substantial improvement in values. Closing prices are at the highest levels for the war period.

Jute:

It was remarked earlier that the jute market was rather active in the early days of the week and that new high levels for the recovery movement were touched, the quotation in the jute futures market being at one time as high as Rs. 81-4. The strength of the jute market has been mainly due to the firmness of upcountry markets and the lack of arrivals. Mills have not been eager to cover their requirements. During the last day or two an irregular tone has been noticeable and prices are below the best levels for the week.

Piecegoods:

The approach of the Poojah season has in itself lead to the gayer appearance of the piecegoods market. Prices have been marked higher again, and as remarked last week, there is a tendency on the part of dealers to operate more freely for the forward positions. The announcements made during and after the proceedings of the textile supply conference in Bombay reveal that the problem of manufacturing cotton textiles in adequate quantities to meet the demands of the Defence Services, for internal consumption and for export markets is rather acute. The need for catering freely to military requirements and at the same time look after production for civil consumption calls for co-operation from the different sections of the industry.

Rice:

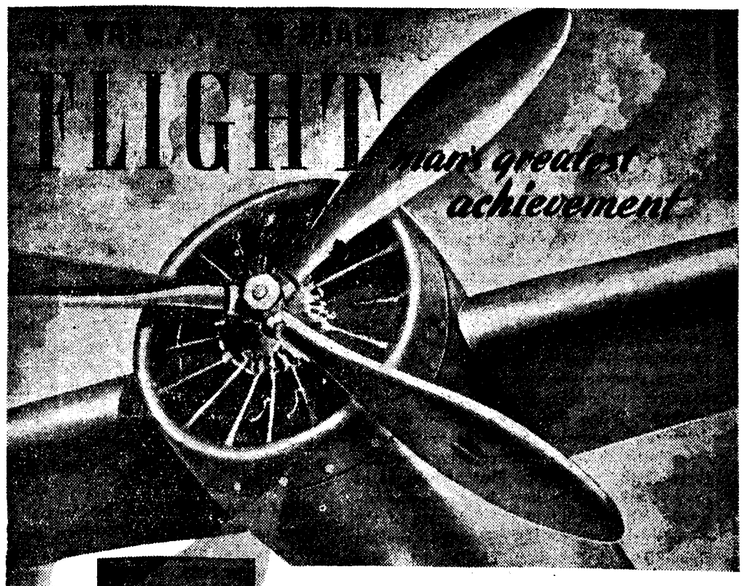
The exports of rice from Burma out of the next year's crop is to be controlled and the Burma Government will be the sole exporter.

This decision has naturally caused considerable anxiety to the Indian commercial community for a good number are vitally interested in Burma's rice export trade. The Indian Chamber of Commerce has protested against the decision of the Burma Government and asked the Government of India to move in the matter.

EAST INDIAN RAILWAY

TENDER NOTICE

Sealed tenders are invited for the following and will be received in General Manager's Office, East Indian Railway, 105, Clive Street, Calcutta, upto 12 O'clock noon on 7-10-41.



Tender No. S/SP/633/GB4/491/C for the supply of Phosphor Copper Ingot.

Tender forms with full particulars can be had from the Office of the Controller of Stores, Calcutta, on payment of Rs. 2/- per copy to the Treasurer, East Indian Railway, Calcutta, and on production of his receipt when applying for the same.

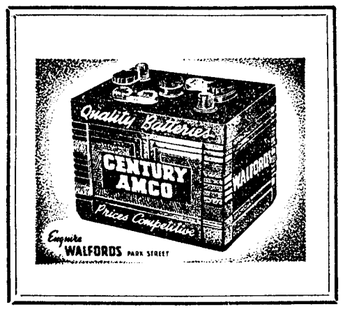
Firms outside Calcutta, may however, remit the amount to the Controller of Stores, direct by Money Order. No refund is permissible.

Sealed tenders delivered by hand should be presented for registration in the General Manager's Office and then put into the tender box outside the Deputy General Manager's (Works) room by the tenderer or his representative.

R. E. Marriott.
GENERAL MANAGER.

To withstand the immense strain imposed on them, the smallest of details in modern structures are made of steel.

DEPENDS UPON THE STRENGTH OF STEEL



To the people of yesterday how amazing and unbelievable would appear the concrete fact that man, today, spans the sky-ways of the world. And, whether or not the heavens echo the menacing roar of bombers, or the hum of aerial argosies, it is the strength of steel which has given man his wings. It is the dependable, tested strength of this metal which has linked step to step in this scientific triumph of modern civilization.

In the years that lie ahead it is this same power which will be the basis of man's greater achievements—his higher success.

Always—Everywhere—Steel for Strength

(From Our Correspondent)

THE Raw Jute Taxation Bill has now passed the Council and presumably will soon become law. It may be worth while to recapitulate the ostensible objects of the Bill; "for carrying out measures for the stabilisation of jute prices and for furthering the interests of the jute growers and of the industry generally." It should also be emphasised that the European Group, representing the Jute Mill Industry, offered almost no opposition to the measure, though some other sections of the trade considered that they ought to have insisted on certain safeguards. Bearing in mind the objects and reasons noted above, it is interesting to find that one supporter of the Bill gave as his reason for supporting it "only because it was definitely stated that the proceeds of this tax would be entirely earmarked for the benefit of the jute grower." Where then do "the interests of the industry generally" and "the stabilisation of jute prices" come in? Pretty obviously only as window-dressing. Again it is instructive to observe the varying attitude of the Minister-in-charge towards the Fatka market. When the Fatka market is on a downward course, no words are strong enough to inveigh against the machinations of the gamblers. But when, as at present, the Fatka has been soaring upwards, "it was not in the interests of the agriculturists that the Futures market should be abolished." The Minister was discreetly silent on the subject of "stabilisation" except to say that he wished the jute-grower to receive a stable and adequate price year after year and almost on the same level. But there was no suggestion that he was of opinion that the grower was even yet, at around Rs. 15 per maund, getting an adequate price. So presumably the time for stabilisation, in the opinion of the Minister, is not yet. We should be interested to learn what he does consider as adequate price. For a crop which costs not more than Rs. 4 a maund to grow, a return of Rs. 15 seems not only adequate but fabulous. Nor do we know of any other agricultural produce which offers anything approaching such a return. But Government propagandists are still stumping the mofussil exhorting the ryots to hold back their jute for still higher prices. In most other directions, and particularly in regard to commodities required for the prosecution of the war, there has been an effort to prevent inflation and profiteering. It seems regrettable that in the matter of Jute, the local Government should have deliberately created and exploited a situation which has come to a point when it can be stigmatised as inflation and profiteering and nothing else but.

We would further emphasise that "the interests of the industry generally" mentioned in the preamble of the Bill, are being gravely imperilled. Information has recently come from the U.S.A. that the high price of jute goods was causing concern amongst dealers in those fabrics as lending weight to the demands of the well organised cotton and paper interests that jute goods should be excluded. When this information was transmitted, the goods market was considerably lower than it is to-day, so the case of cotton and paper has since been further strengthened. One strong argument of these interests is that the import of jute goods into U.S.A takes up valuable freight space which could be devoted to more essential commodities, while the jute goods could easily be substituted by cotton and paper materials of local production and manufacture. The Jute Bag manufacturing interests in the States are old-established and not without influence, but their efforts to preserve a market for Calcutta's products cannot but be severely handicapped by the **laissez faire** policy of the local Mills and their apparent blindness to the dangers of the present situation.

Mills total production for August is returned as 90,624 tons, 8,000 tons less than the previous month. Hessian produced amounted to 1634 lakhs and Sackings to 1038 lakhs yards. The stock position at the end of August therefore represented 5 weeks production of Hessian and 7 weeks production of Sacking. American stock figures show, at the end of August, a drop of 270 lakhs while consumption also shows a drop of 40 lakhs yards.

There has been little activity in Export jute. Old Crop Outport Tossa assortment sold at Rs. 67-. Dundee Daisee New Crop has been in demand and the Satta has during the week contracted from Rs. 6 under Fatka to Rs. 4-8 only. Mills have continued to buy baled jute steadily if in less quantity. Old Crop Dundee Hearts were reported at Rs. 84 to Rs. 86 and Out-port Hearts at Rs. 47-. Firsts, Old Crop, have sold from Rs. 66- to Rs. 72- and back to Rs. 70- while business was reported in New Crop Firsts at Rs. 74-, Lightnings at Rs. 64- and special Lightnings at Rs. 68-. The Futures market rose rapidly from Rs. 71-12 till Rs. 81-4 was touched. Since then the tone has been somewhat unsettled between Rs. 78- and Rs. 75-12, closing at Rs. 77-8. It is announced that the Final Forecast figures will be published piecemeal from 16th to 22nd inst. and the Consolidated Forecast on 27th Septr. Expectations seems to vary widely from 47 to 60 lakhs of bales.

Loose Jute quotations have had to be advanced steadily during the week in consonance with mofussil prices and this has to a large extent choked off Mill demand. Buying interest has centred mainly in offerings of Old Crop which are relatively cheaper. Indian Jat Mids have sold at Rs. 13-8 to Rs. 15- and District at Rs. 12-8 to Rs. 13-8-. Indian Jat Bottoms at Rs. 11-12 and Rs. 12-. European Mids sold at Rs. 15-8, Bots at Rs. 12-8 and Cross Bots at Rs. 9-4. In New Crop Indian Jat Mids and Bots were reported at Rs. 14- and Rs. 11- early on, and later Supervised District at Rs. 15-4 and Rs. 12-. European Jat and District sold at Rs. 15-8 and Rs. 12-8 Mid & Bot. Tops alone have fetched up to Rs. 19- and Balers have bought Tossa at varying prices. The Mofussil continues to rule very firm though imports are tending to increase slightly. Moisture is still a menace. Estimated arrivals of Jute into Calcutta during August amounted to 504,000 bales against 690,000 last August. Total arrivals since 1st July are now 984,000 against 939,000 bales for the same period last year. A very large proportion of the arrivals so far this season represent Old Crop Jute.

There is still plenty of evidence in the paucity of fresh enquiry for fabrics from overseas, that the high range of prices is slowing down demand. The Bazar are showing more inclination to take their profits on holdings, and after a sharp rise over the week-end, quotations have all been marked down to below the opening rates. Sales recorded include, in 9 porters, Rs. 22- to Rs. 21-12 Septr., Rs. 20-4 Oct.-Dec., Rs. 19-4 to Rs. 19- Jan-March and Rs. 18-4 to Rs. 18- April-June. In elevens, Rs. 28-8 to Rs. 27-8 Septr., Rs. 26-8 to Rs. 26- Oct.-Dec. and Rs. 24- to Rs. 23-12 Jan.-March. In "B" Twills, after Rs. 44-10 was paid for Sept. and Oct., the price is now Rs. 43-4 while Jan.-March has dropped from Rs. 43-12 to Rs. 42-12. Liverpools sold at Rs. 52- Sept., at Rs. 51-8 to Rs. 50- Oct.-Dec., at Rs. 49- Jan.-March and at Rs. 48- April-June. Cornsacks have declined from Rs. 47-4 to Rs. 46 for near. Heavy Cees sold at Rs. 41-6 Septr. and at Rs. 42- Oct.-Dec. Woolpacks fetched Rs. 2-3-3 for Septr. and Rs. 2-2 for Jan.-June. The market closes steady at the decline.

JUTE

Calcutta, Sept. 11.

There has been a further rise in prices in the raw jute market during the past week. The firmness of upcountry markets and the reserved attitude of sellers of new crop have been mainly responsible for the further improvement in values. Mills have been trying to keep out of the market. They are anxious to replenish the supplies of their crop.

Harvesting has been delayed and arrivals have been coming in very small quantities.. Higher grade jutes are very difficult to obtain and a good premium is offered for these quantities.

The loose jute section was firm for the most part of the week and only towards the close a slightly easier tone is noticeable. Indian Jat Tops, Middles and Bottoms were done at Rs. 17/3, Rs. 15/8 and Rs. 12/8 per maund. Old crop Indian Jat Bottoms were done at Rs. 12/- per maund. Balers are reported to have bought Tossa qualities at various rates.

In the pucca bales section there has not been much export business. Mills are reported to have bought old crop Heart 2/3 at Rs. 47/- and Dundee Daisee 2/3 at Rs. 84/- to 88/- per bale. Old crop outport Tossa 2/3 were done at Rs. 67/- per bale. Quotations for new crop are nominal and vary considerably

The futures market has been very active and new high levels were recorded in mid week. After being quoted as high as Rs. 81/4 there has been a setback to Rs. 75/12. The quotation is now higher at Rs. 76/14. There has been considerable profit-taking at the higher levels.

JUTE MANUFACTURES

Calcutta, Sept. 11.

The jute manufactures market has not been very active. Owing to the recent abrupt rise in prices American enquiry has fallen off. In the absence of any appreciable overseas buying prices have tended to decline. At the time of last writing there was good buying for the forward positions and rates were marked higher. The demand has apparently been satisfied and buyers are awaiting further developments. 9 Porters ready-September are quoting Rs. 21/12 after being higher at Rs. 22/4; October-December are Rs. 20/- January-March Rs. 19 and April-June Rs. 18/-. 11 Porters ready are Rs. 27/8, October-December Rs. 25/12 and April-June Rs. 22/4.

In the heavy goods section sellers were rather reserved early in the week but the easier tone of the raw jute market and the smaller volume of business passing have resulted in a decline in rates. "B" Twills for September shipment sold on the basis of Rs. 43/12, Heavy Cees for the same position Rs. 41/8, Cornsacks Rs. 45/12, Liverpool Twills Rs. 51/4 and A. Twills Rs. 53/-.

INDIAN JUTE MILLS ASSOCIATION

Total Reported Production of Manufactured Goods by the mills in the membership of the Association and also by Gagalbhai Mills.*

1.	TWIST AND YARN—	
	(a) for sale ..	2,072 tons

	(iv) Canvas (both as bags & cloth) ..	10,51,930 yards

*The returns of Maheswari Devi are not received and are excluded.

COTTON

Calcutta, Sept. 11.

Bullish foreign advices and good buying by mills have been responsible for the earlier strength of the raw cotton market during the past week. Most of the gains have been lost. The closing quotations are only slightly higher on balance. A ship has left with about 30,000 bales of licensed cotton during the week. There is a narrowing in the difference between Broach and Oomra. Broach April-May 1942 are quoting Rs. 276/12, Oomra December-January Rs. 218/4 and Bengal December-January Rs. 165.

The American cotton exchanges have been very active on good trade buying and little hedge selling. Mills have been buying freely. Closing quotations are only slightly below the best levels for the week. In New York, the quotation for October was 17.75 cents and December 17.82 cents against 17.39 cents and 17.53 cents respectively at the end of last week.

PIECEGOODS

Calcutta, Sept. 11.

The piecegoods market has continued firm during the week. The earlier strength of the raw cotton market had a stimulating effect. With the approach of the puja festivities a greater amount of business has naturally been passing. Dealers have done a fair amount of business out of ready stocks. Buyers have been inclined to place orders more freely for forward positions while mills are not very keen to accept new business. In the Japanese goods section, there has been very little business while in the Lancashire goods section business has been as usual of a retail character. Mr. H. P. Mody's speech at the conference of textile interests revealed that the supply problem was very acute and that demand could not be met in full and with the wholehearted co-operation of the industry.

GOLD

Calcutta, Sept. 11.

The gold market has been uninteresting inspite of the steadier tone of the silver market. Gold prices are easier towards the close. Gold ready are quoting Rs. 42/2/9. First Settlement Rs. 42/2/3 and Second Settlement Rs. 42/1/9.

The quotations at the end of last week were Rs. 42/3/-, Rs. 42/3/6 and Rs. 42/3 respectively. Arbitrage business has been on a considerably smaller scale. Sovereigns are quoted at Rs. 28/8/3.

The London price for gold has remained unchanged at 168s.

SILVER

Calcutta, Sept. 11.

The silver market has been more active during the last two days and a slight rise in prices has been recorded. There has been greater buying from mofussil centres. Indian Mint Silver ready were Rs. 62/15/6, First settlement Rs. 63/0/3 and Second settlement Rs. 63/1. A higher premium is available for the forward positions.

The London market has remained unchanged and production selling has been enough to satisfy consumer buying. The quotations for both spot and forward are unchanged at 23d. and 23-1/16d. respectively.

WHEAT

Calcutta, Sept. 11.

It will be remembered that there was considerable buying in the Karachi market at the end of last week on reports regarding the possibility of large scale buying by government for export to the Middle East and elsewhere. The actual despatch of several thousands of tons of Indian wheat to Iran whetted the appetite of speculators. It is reported that there has been good buying by shippers during the past few days.

Choice White Ready are now quoting Rs. 42/- September Rs. 42/- and November Rs. 42/9/6. The undertone is strong. The quotations at the end of last week were Rs. 38/3, September Rs. 38/3 and November Rs. 39/-.

Inspite of the heavy arrivals from the United Provinces the Calcutta market has been very firm. Demand for flour and flour products is satisfactory and is expected to increase further on account of the poojah festivities. Cawnpore September were Rs. 5/10 and May Rs. 5/- against Rs. 5/6/6 and Rs. 5/2/3 respectively last week.

(Continued from page 500)

or moneylenders and long residence in Hongkong had not helped Mr. Vaidya to put the Chinese wise. The medical mission to China and Pandit Nehru's visit had helped to get rid of some misconceptions and the Indian Association had done something to clear up wrong ideas. Still not much was known about India's ideals and aims in China and the ignorance prior to 1930 was inconceivable. The Civil Disobedience movement was largely responsible for exciting great interest in China because the Rango Agency (Japanese news service) referred to the progress of the movement. People got to know something about Gandhiji but the intelligentsia thought only of the U.S.A. The war with Japan changed everything and Mr. Vaidya conceded that Gandhi and Nehru had become household words in China. India's war effort found occasional mention in the Chinese press because a journalist like Mr. Vaidya asked that something should be done about it. Sikhs, Bohras, Multanis and Parsis were to be found and Multanis were prominent in the trade of Hongkong. Eye doctors abounded among the Indians in China and the Sikh policeman was as familiar as the Indian durwan picked up by the foreign resident. There was, however, little contact with Chinese, and Mr. Vaidya after 11 years in China confessed that Bombay looked marvellous. He regretted that he was not allowed to land either at Singapore or at Penang though he was armed with a reference from the Colonial Secretary of Hongkong and could claim acquaintance with the Governor too.

Stock Markets to-day and to-morrow

McLEOD JUTE GROUP RESULTS

STOCK markets were rather active early in the week. Indian Irons and Steel Corporations were noted at new high levels. Greater interest was also shown in other sections. In midweek there was some selling on rumours regarding taxation but the reaction in prices has been only temporary. The undertone is very firm. The Western Centre has been very active and there has been a consistent rise in prices. In Friday's session, Mill shares have been well favoured. The outcome of the Supply Conference of Textile interests has been satisfactory to those concerned with the industry.

President Roosevelt's speech on Friday morning should have a stimulating effect on markets as it is an open challenge to Germany to try its strength against the United States. So far there are no suggestion of any complications in the Far Eastern situation. And in the absence of any such possibilities markets should continue to be bullish.

* * *

Further testimony to the improved conditions in the jute industry has been provided by the results of the McLeod group of jute companies for the half-year ended June, 1941. There is a big increase in aggregate earnings to Rs. 14,53,449 from only Rs. 6,41,628 for the previous half-year. The performance of the Nellimarla, Presidency and Soorah companies especially make very satisfactory showing. The ordinary dividends have been increased in the case of four companies. The Soorah Jute Mills Company, Limited has been able to wipe off the arrears of preference dividend in respect of three half-years. With a further rise in prices for jute manufactures and an increase in production, it can be expected, that there will be yet further improvement in earnings for the current half-year.

* * *

The net profit of the *Soorah Jute Mills Company, Limited* for the half-year ended June, 1941, before providing for taxation and depreciation, is Rs.2,21,781 against only Rs. 70,224 for the previous half-year. During the half-year ended December, 1940 there was a transfer of Rs.1,76,000 from General Reserve and the huge debit balance was wiped off. After providing Rs.50,000 for depreciation the arrears of dividend on the preference shares for the half-year ended June, 1937 was paid. Out of the earnings for the first half of 1941 the sum of Rs.50,000 has been charged to depreciation. A similar amount has been provided for taxation. The arrears of preference dividend in respect of three half-years ended December, 1938 are to be paid. The amount carried forward is higher at Rs. 27,429 against Rs. 10,629 brought in.

There has been a sharp rise in the quotation for the shares to Rs. 148 cum dividend. There are arrears of dividend for five half-years still to be paid. Which means, one will be getting a seven per cent preference share at the present quotation for Rs. 117 (taking into consideration the dividend for the current half year also). With the present level of earnings it may be possible to pay off two years' dividends out of the profits for the current half-year. The attractiveness of the bargain will be evident from the fact that a regular dividend paying seven per cent preference share is now quoting around Rs. 170.

* * *

The *Nellimarla Jute Mills Company, Limited* also has experienced a very good half-year. The net profit for the first half of 1941 is Rs. 1,81,037 against a loss of Rs. 92,752 for the latter half of 1940. After providing for depreciation Rs. 35,636 (nil) it has been possible to pay off the arrears of dividend on the preference shares in full.

The ordinary shares receive a dividend of 2½ per cent. But for the debit balance of Rs. 85,260 brought in from the previous accounts it would have been possible to recommend a higher ordinary dividend.

* * *

Thanks to a large increase in sales of energy for industrial consumption it has been possible for the *Salem-Erode Electricity Distribution Company, Limited* to report a substantial rise in earnings. The net profit, before providing for taxation, for the year ended March, 1941 is Rs. 1,28,588 against Rs. 94,850 for 1939-40. The amount set aside to depreciation is Rs. 44,567 (Rs. 44,057). The allocation to reserve for taxation is Rs. 25,000 (Rs. 8,000). The dividend recommended is higher at 6¼ per cent against 5 per cent. The amount carried forward is higher at Rs. 11,673 against Rs. 5,058 brought in.

Due to the expansion of the company's business it has been necessary to consider a reorganisation of the mains system and arrangements are in hand to increase the substation capacity of the undertaking to meet load development.

* * *

The *Jubbulpore Electric Supply Company, Limited* has made rapid progress during the last three half-years. But for the increase in working expenses it would have been possible to report a higher level of earnings for the six months ended March, 1941. The net profit for the half-year, before providing for taxation, is Rs. 1,71,777 against Rs. 1,72,253 for the previous half-year. The sum of Rs. 48,688 (Rs. 57,636) is set aside to depreciation, Rs. 52,200 (Rs. 42,250) to Taxation and Rs.25,000 (Rs. 15,000) to General Reserve. The sum of Rs. 10,000 was transferred to Gratuity Fund Reserve on the last occasion. The dividend has been maintained at 6 per cent per annum.

* * *

Another preference share which is attractive for the investor is that of the *Hastings Mills, Limited*. The preference dividend is in arrear from March, 1937. The accounts for the half-year ended August, 1941, are due to be published shortly. As it can be expected that a substantial portion of arrears will be paid out of the earnings for the last half-year, the shares presently quoting around Rs. 144 should be considered very cheap as the net price is only Rs. 117.

WATCH-DOG.

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, September 12.

AFTER earlier firmness a slightly easier tone is noticeable in the several sections on the Calcutta Stock Exchange during the past week. The undertone, however, continues firm and there has been a slight recovery on the encouraging speech made by President Roosevelt. The earlier firmness of the markets was due to the receipt of encouraging news from the war fronts and the more optimistic view taken by operators regarding the future outlook. After the rapid advance in prices there was naturally a slight reaction in mid-week. There were rumours regarding the possibility of increased taxation. From Rs. 35-12 Indian Irons were marked lower at Rs. 34-6. There has since been a recovery to Rs. 34-14. The feature of the week is the marked expansion in the volume of business in all sections. Even at the lower levels turnover has not been limited. In today's session, however, business has been rather restricted and there is a tendency to await further developments.

The giltedged securities section has been very steady and the volume of business has been on a small scale owing to the scaricity of offerings. 3½ per cent. Paper has remained unchanged at Rs. 96. Among terminable loans, 3 per cent. 1951-54 were done at par, 3½ per cent. 1947-50 at Rs. 103-6-6, 4 per cent. 1960-70 at Rs. 110-12, 4½ per cent. 1955-60 at Rs. 114 and 5 per cent 1945-55 at Rs. 111-4. Provincial loans have been in good request and the 3 per cent. 1952 issues have been done at Rs. 99-4. Money conditions continue cheap though there has been an increase in the treasury bills rate to eight annas and two pies per cent per annum. There has been a further increase in bank deposits.

Bank shares have been firm with *Imperial Bank* fully paids at Rs. 1,592 and contributories at Rs. 393. *Reserve Bank* were noted at Rs. 109-8.

Fixed interest securities were in great demand but in view of the rumours regarding fresh taxation investors are not prepared to part with their holdings of tax-free preference shares. *Alexandra* were done at Rs. 147, *Fort Gloster* at Rs. 179, *Hukumchand* at Rs. 149, *Standard* at Rs. 154 and *Rameshwara* at Rs. 14. *Chitavalsah* preferences have been in good request while *Hastings* have been done upto Rs. 145. It is expected that there will be a further rise in the quotation for the latter shares. Among other sections, *Bowreah* 'B' preferences were done at Rs. 102, *New Victoria* at Rs. 6-2, *Bengal Chemical* at Rs. 17-6, *Indian Standard Wagon* at Rs. 172 and *Steel Corporation* at Rs. 122. *Shree Gopal* preferences were in good request at Rs. 122 with *Purtabpore* at Rs. 18.

Business in public bodies debentures has been very restricted and it is impossible to execute orders in the absence of sellers. 3¼ per cent. *Howrah Bridge* debentures were done at par. 4 per cent. *Calcutta Port Trust* debentures were Rs. 100. 4 per cent. *Calcutta Municipal* debentures 1941 Rs. 101 and 3¼ per cent. *Rangoon Municipal* debentures Rs. 100-12. Among industrial debentures, 5 per cent. *India General Navigation* debentures were Rs. 103-8 and 4½ per cent. *Titaghur Paper* debentures Rs. 100.

Cotton shares have remained firm with *Bowreah* at Rs. 337, *Cawnpore Textiles* at Rs. 9, *Dunbar* at Rs. 246-8 and *Elgin* at Rs. 25-4. After being higher at Rs. 8-8 *Kesoram* are now quoting Rs. 8-1.

The reports regarding increased shipping facilities and the efforts to relieve the wagon shortage have been responsible for the revival of interest in coal shares. There has been good enquiry for shares in the Macneill group, *Equitable* being marked as high as Rs. 38-12 buyers and *West Jamuria* Rs. 33. *Burrakur* were firmer at Rs. 15, *Central Kurkend* at Rs. 15, *Bengal* at Rs. 384, *Raneegunge* at Rs. 29-14 and *Standard* at Rs. 22 Rs. 14. Prices at the time of writing are slightly below the best levels for the week.

Jute shares also have been in favour. A longer list of transactions has been recorded. *Adamjee* were Rs. 27-8, *Clive* Rs. 28-10, *Howrah* Rs. 56-8, *India* Rs. 385, *National* Rs. 24-14, *Nuddea* Rs. 71 and *Rameshwara* Rs. 8-4. Among the bigger-priced shares, *Ganges* were Rs. 329, *Kamarhatty* Rs. 520, *Gondalpara* Rs. 1,099-8 and *India* Rs. 385.

The Engineering section was very active with *Indian Iron* and *Steel Corporation* being marked higher at one time at Rs. 35-12 and Rs. 20-6 respectively. There was some selling at the higher levels and the quotations were marked down at Rs. 34-6 and Rs. 19-8 respectively. There has since been a recovery to Rs. 34-14 and Rs. 19-14 respectively. *Burn & Co.* have been steady at Rs. 438. *Indian Standard Wagon* were Rs. 70, *Indian Steel and Wire Products* ordinaries Rs. 60 cum-dividend, *Kumardhubi Engineering* Rs. 6-1 and *Steel Products* Rs. 6-5.

Sugar shares have been firmer and the popular shares are quoted higher. With petrol rationing in full swing the prospects regarding the manufacture of power alcohol are keenly discussed. The sugar industry must be able to report a large increase in earnings if the Government gives sanction for the manufacture of power alcohol. *Buland* and *Raza* are quoting Rs. 20, *New Savan* Rs. 12, *Carew & Co.* Rs. 12-7, *Punjab Sugar* Rs. 202-8, and *Ramnugger Cane & Sugar* Rs. 10.

Tea shares have been steady with *East India* dealt in at Rs. 10-2, *Gungaram* at Rs. 405-8, *Hattikhira* at Rs. 21-4, *Tengpani* at Rs. 21 and *Tezpore* at Rs. 8-12.

In the miscellaneous section, *Burma Corporation* and *Indian Copper Corporation* have been noted at Rs. 4-9 and Rs. 2-3 respectively. *B. I. Corporation* were higher at Rs. 4-14. *Dunlop Rubber* were Rs. 42, *Indian Cable* Rs. 28-2, *Bararee Coke* Rs. 27-8, *Kalimpong Ropeway* Rs. 12-7 cum-dividend and *Walford Transport* Rs. 2-9. There has been a rise in the quotation for *Publicity Society* to Rs. 8-12 in anticipation of a higher dividend for the year ended July, 1941. The company is reported to be doing very well. There has been good enquiry for Paper shares in to-day's session. *Titaghur Paper* have been done upto Rs. 22-4, *Orient Paper* upto Rs. 15-8 abd *Shree Gopal Paper* upto Rs. 14-8. Timber shares have continued to be in favour with *Borooah Timber* at Rs. 17-14, *Bengal Timber* at Rs. 191 and *Assam Saws* at Rs. 4-3.

Securities: The securities market continued to be very steady during the week and 3½ per cent Paper ruled unaltered at Rs. 96. Among other loans, 1948-52 changed hands at Rs. 97-12; 1951-54 at Rs. 99-13; 1963-65 at Rs. 95; 1947-50 at Rs. 103-4; 1960-70 at Rs. 110-8; 1955-60 at Rs. 114; 1945-55 at Rs. 111-6 and 3 per cent 1946 *Defence Bonds* at Rs. 102.

Shares: The local share market displayed a cheerful tone during the week influenced by favourable political news with the result that buyers predominated in most sections. Prices recorded sharp improvements and the sentiment continues to be bullish. Steel shares were active throughout. Mill shares were marked up owing to good investment outlook.

Textiles: Mill shares staged an all round advance in sympathy with higher cotton advices and in anticipation of important decisions at the Textile Supplies Conference which will have far-reaching effects on the industry. There is, however, some disposition among the operators to await the final outcome of the Conference. *Bombay Dyeing*, after opening at Rs. 1,237-8, closed slightly higher at Rs. 1,241-4. Rumours regarding the amalgamation of all the mills under the management of Tata Sons, Limited were responsible for operators for cussing their attention on *Central India* and *Svadeshi* which improved to Rs. 382-8 and Rs. 391 respectively. *Century* were Rs. 521; *Colaba* Rs. 215; *Gokak* Rs. 255; *Kohinoor* Rs. 493 and *Simplex* Rs. 149. In the cash list, *Ahmedabad Advance* were marked higher at Rs. 335; *Sholapoor* at Rs. 3,825 and *Vishnu* at Rs. 1,360.

Hydro-electrics: There was enquiry for *Tata Power* which gained about 20 points to close at Rs. 1,795. *Andhra Vally* were practically unchanged at Rs. 1,755 and *Tata Hydro* at Rs. 191-8.

Steels: Steel shares met with good support. *Tata* ordinaries showed a rise of about 5 points to close at Rs. 385, while the deferreds steadily advanced, closing at Rs. 2,104.

Banks: Bank shares showed a slight rise in prices during the week, *Central Bank* changing hands at Rs. 48-14; *Imperial Bank* fully paids at Rs. 1,620; contributories at Rs. 398-12; *Bank of India* at Rs. 148 and *Reserve Bank* at Rs. 112.

Miscellaneous: *Associated Cement* met with some enquiry, being done higher at Rs. 154. *Bombay Burma Trading* closed the week with a gain of Rs. 13 at Rs. 528-12. *Shivrajpur Syndicate* were prominent and the price spurted from Rs. 34 to Rs. 42-8. *Belapur Sugar* were done at Rs. 238-8; *Scindia Steam* at Rs. 26-1; *Alcock Ashdown* at Rs. 625 and *Bombay Tramways* at Rs. 156. On reports of receipt of substantial war orders, *Premier Construction* received good support which caused a rise of about 10 points to Rs. 125-8.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, September 11.

Money: Call money continued to be quoted at ¼ per cent.

Exchange Market: Banks are selling T.T. at 1s. 5 15-16d. and buying three months' bills at 1s. 6 7-32d.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, September 11.

Although the turnover in the local market continues to be restricted, the general undertone remains very steady. Textiles were generally firm, while some activity was noticeable in Sugar shares. Planting issues were strongly supported at rising prices.

Securities: Government securities were unchanged with 3½ per cent Paper at Rs. 96. 3 per cent 1963-65 came to business at Rs. 94-12 and 5 per cent 1945-55 at Rs. 111-4. *Mysore Loans* were firm, 3 per cent 1956-61 being done at 104-13 and 5 per cent 1955 at Rs. 127-4. Among Provincial Loans, 3 per cent *Madras Loan* were done at Rs. 99-6.

Mills: This section has not been so active as in previous weeks and the market remained very easy with more sellers than buyers in most counters. *Buckingham & Carnatic* were marked at Rs. 277; *Madura* at Rs. 44-8 and *Cambodia* at Rs. 10-4. *Sitaram* came to business at Rs. 70-4; *Palani Andavar* preferences at Rs. 61; *Elgin* at Rs. 25 and *E. D. Sassoon* deferreds at Rs. 2-5-9.

Utilities: *South Madras Electric* ordinaries continued to meet with good invesment demand at Rs. 14-8. *Cochin State Power* had buyers at Rs. 8-12 *Karaikkal* at Rs. 38-12 c.d. and *West Coast* preferences at Rs. 10-4.

Sugars: There has been good buying for *Mysore Sugar* in anticipation of a higher dividend and bonus share and the price spurted to Rs. 56-4. *India Sugar* were done at Rs. 11-2, while *United Breweries* had sellers at Rs. 91-4 x.d.

Plantations: Both Rubber and Tea shares were an active market and a fairly large turnover was possible. Among Rubber shares, *Cochin Malabar* improved to Rs. 8-8 with buyers over. *Kalpetta* were done at Rs. 23-12 c.d; *Vaikundam* at Rs. 9-8; *Tropical Plantations* at Rs. 21-8; *Midland* Rs. 7-6 c.d. and *Periar* at Rs. 6-6-6. In the Tea section, *Chembra Peak* attracted attention, the price improving further to Rs. 5-4 c.d. *Peermade* were done at Rs. 30-12; *Kalasa* at Rs. 8-6 c.d; *Devashola* at Rs. 9-4 and *Nilgiri Neerungundi* at Rs. 27.

Miscellaneous: *Mysore Chemicals* were on offer at Rs. 18-4 with buyers at Rs. 18. *Mysore Paper* were unchanged at Rs. 17-4. *Indian Steel Rolling Mills* ordinaries were a shade better at Rs. 8-4, while the preferences were done at Rs. 12-2. *Little's Oriental Balm* changed hands at Rs. 2-8; *Indian Iron* at Rs. 35-4 c.d. and *Steel Corporation* at Rs. 20-2.

LONDON STOCK EXCHANGE

The speech made by the British Premier has had an encouraging effect on the London Stock Exchange and quotations are at the highest levels for the week. The issue of the new 3 per cent. bonds with a longer maturity should have an encouraging effect on the market. Among British Funds, 2½ per cent. Consols were 82 9-16, 3½ per cent. Conversion 106 1-16, 3½ per cent. War Loan 106¼ and 3 per cent. War Loan 100¾. 3½ per cent. India Sterling Paper were 99 3-8.

Among other sections, Tea shares have been quite steady while Rubber shares have improved on hopes of a Far Eastern settlement. Oil shares have improved further with *Anglo-Iranian* quoted at 42s. 6d. Home Rails were easier but they have rallied towards the close on reports of definite steps for a wage settlement.

NEW YORK STOCK EXCHANGE

Wall Street has been rather uninteresting. Operators have been keeniy awaiting President Roosevelt's speech. *U.S. Steel* were $56 7-8, *General Motors* $38 7-8 and *Anaconda Copper* 28 1-8.

CALCUTTA ELECTRIC SUPPLY CORPORATION, LIMITED

REVIEW OF 1940 ACCOUNTS

By R. Gordon Cummings

Progress of the Calcutta Electric Supply Corporation, which has been consistent for many years, continued unabated during the twelve months ended December 31st, 1940. Profits, after being on the down grade since 1936, are the best for four years; they reflect the benefits derived from the further big increase in unit sales. The Corporation is at last gaining from reductions in selling prices and the expansion in output which has followed each successive cut in rates. Until last year the policy of passing on to consumers the benefits of expanding sales had practically no helpful effect on net profit.

Output of the Corporation's stations, which supply electric power and light to the City of Calcutta, Howrah and suburban districts and the Bhatpara Municipality, has far more than doubled in the last ten years. In 1940 total units sold were 448,853,348; in 1931 they were only 177,752,613. Details given in the latest annual report shew that last year's sales compared with 394,611,033 units in 1939 and 365,140,289 units in 1938. The number of houses connected rose on the year by 2,111 to the fresh high record of 59,526. Detailed figures shew that the expansion in 1940 was, as in previous years, well spread over all sections. Here are details of units sales for the past two years:—

	1939	1940
Power purposes	320,085,167	370,758,770
Flat rate (lights & fans) ..	57,683,491	60,166,898
Public lighting	4,822,478	5,175,877
Special contract	12,019,897	12,751,803
Total Units Sold ..	394,611,033	448,853,348
Houses connected at year-end	57,415	59,256

Up to March, 1937 there were a number of big reductions in domestic supply rates, but since that date the charge has remained at 2 annas per unit. The last cut in power rates was in October, 1938. The profit figures for 1939 therefore bore the full brunt of these reductions; figures reflect, for the first time for a full year, the benefits of expanding production.

Net revenue before taxation rose last year by £38,059 to £514,250, the best net profit since that of £532,458 in 1936. Examination of the accounts shews that costs of production, excluding depreciation, rose in 1940 by barely £10,000. Depreciation, including obsolescence, has been a steadily rising charge since 1933. This is merely a reflex of the large scale expenditure on renewals and expansion of plant and equipment, on which millions of pounds have been expended in the past few years. In 1940 the depreciation charge was stepped up to £369,618, from £310,850 in 1939, and £288,212 in 1938. The most important sales and revenue figures for the six years ended December 31st, 1940 are given in the following table:—

Year	Units sold	Gross Revenue	Net Revenue*
		£	£
1935	262,913,080	1,223,763	529,851
1936	311,412,003	1,278,589	532,458
1937	348,236,650	1,270,923	508,774
1938	365,140,289	1,357,920	495,572
1939	394,611,033	1,398,955	476,191
1940	448,853,348	1,501,264	514,250

* After charging depreciation, but before taxation.

For the second successive year the ordinary dividend is reduced; this time by one per cent. to 7 per cent. free of income tax. On a "net" basis this is lowest rate for many years—it goes against 8 per cent. for 1939, 10 per cent. for 1937 and 1938, and 12 per cent. for the three previous years. As the final for 1940 is 3 per cent. against the interim of 4 per cent. it is evident that the directors have been influenced in their decision to reduce the total rate by the perhaps somewhat uncertain future politically and the recent big increase in British income-tax. Account must also have been taken of the fact that since 1935 increasing amounts of ordinary capital have been issued and have been ranking for dividend.

Most important of the appropriations from 1940 profits is the allocation of £75,000 to a newly created War Contingencies reserve; a year ago nothing was put to reserve, although £8,432 was used in writing off capital issue expenses. Another big change is a reduction from £25,000 for 1939 to only £4,000 in the transfer to Retiring Gratuity fund. After providing for dividends the balance to carry forward is reduced by £323 to £49,575. Summarised details of net profits and appropriations for the three years ended December 31st 1940 are as under:—

Year	1938	1939	1940
	£	£	£
Profit after depreciation ..	495,572	476,191	514,250
Less Taxation ..	98,634	102,730	114,069
Retiring Fund	25,000	25,000	4,000
Net Profit	£371,938	£348,461	£396,181
Preference Divd. ..	90,909	114,046	122,581
Ordinary Divd. ..	237,473	227,341	198,923
To Reserves	25,000	nil	75,000
Other appropriations ..	18,692	8,432	nil
Surplus (+) or Deficiency (—) ..	—136	—1,358	—323

The Indian Staff, as in previous years, are to receive a percentage of the Indian net profit not exceeding 2 per cent. of that figure. Provision for this distribution has been made in arriving at the above mentioned profit figures.

† Includes bonus of 2½ per cent.

Audited accounts for the half-year ended 30th June, 1941:—

After providing Rs. 1,28,735-0-0 for Depreciation, Rs. 2,25,00-0-0 for Taxes and Cesses and transferring Rs. 1,50,000-0-0 to General Development Reserve, the accounts show a sum of Rs. 4,83,739-2-8 at credit of Profit and Loss Account including Rs. 1,98,215-9-4 brought forward from last half-year. The directors recommend that this should be allocated as follows:—

To payment of a dividend on the Preference Capital at the rate of 6 per cent per annum, free of Income Tax	12,000	0 0
To payment of a dividend on the Ordinary Capital free of Income Tax	2,96,376	0 0
Leaving to carry forward	1,75,363	2 8
Total ..	4,83,739	2 8

Premium on Shares:—Rs. 8,72,543-4-0 has been transferred in reduction of Block and Plant and Machinery items.

Absorption of Aldih Coal Co., Ltds—The Scheme of Arrangement for the aborption of the Aldih Coal Co., Ltd., by this Company has been completed, and the accounts now placed before Shareholders are the amalgamated Accounts.

Collieries:—Conditions at the Company's Collieries are satisfactory. Sinking and fitting up of the two new shafts at Bhanora continues. A Central Sandstowing Scheme for the Dishergarh Group of Collieries, which will include a light railway for sand transport, has been prepared, and the necessary plant is at present under construction.

General:—The shortage of steamer freight resulting from war conditions curtailed severely the export trade previously carried on. The continued failure of the Railways to provide adequate transport for the delivery of coal to consumers in India also restricted inland despatches considerably.

These two factors compelled the Company to restrict production, but since the close of the period under review, improved shipping facilities, and in a lesser degree, improved wagon supplies, have enabled production to be increased.

Managing Agents:—*Messrs. Macneill & Co.*

Authorised Capital—Rs. 40,00,000 in 3,00,000 Ordy. of Rs. 10 and 4,000 6% Pref. of Rs. 100 each. Issued and Subscribed—Rs. 33,63,760 in 2,96,376 Ordy. and 4,000 Pref., both fully paid up.

Annual accounts for the year ended 31st March, 1941:—

The disposable profits for the year ended 31st March, 1941, are as under:—

Net Profit, after providing for taxes and setting aside a sum of	7,62,388	9	6
on account of Depreciation, amount to ..	21,30,280	3	6
Amount brought forward from last year's account ..	63,781	11	3
The Amount available is, therefore, ...	21,94,061	14	9

Out of this total of Rs. 21,94,061-14-9 the Directors have transferred Rs. 6,00,000 to the Reserve Fund, leaving a balance of Rs. 15,94,061-14-9.

Out of this sum of Rs. 15,94,061-14-9 the directors have proposed to declare dividend as follows:—

Dividend at the rate of Rs. 4-8 per share (free of Income-tax) on 1,70,000 Ordinary Shares of Rs. 10 each, fully paid up, and at the rate of Rs. 0-7-2.4 per share on 26,580 Ordinary Shares of Rs. 10 each, Rs. 1 per share paid up, absorbing	7,76,961	0	0
A Dividend at the rate of Rs. 3-6-0 per share (free of Income-tax) on 2,00,000 Deferred Shares of Rs. 2-8 each, fully paid up, absorbing	6,75,000	0	0
C. F. ..	14,51,961	0	0
And to carry forward to the next year's account ..	1,42,100	14	9
Total ..	15,94,061	14	9

During the year under review, to meet the requirements of Government, additional machinery had to be procured and installed such as, Barbed Wire Machines, Galvanising Plant which is under construction and new Wire Drawing equipment which is shortly expected to meet the demand of Additional Galvanized Wire for Barbed Wire, Telegraph and Telephone Wires. All this plant will become more or less useless after the War, and, therefore, the Directors have set aside a larger amount on Depreciation Account.

Trading conditions throughout the year were dominated by the international situation and prices fluctuated to a great extent. The demand for the products has been very great. The directors have done their best to maintain production up to the requirements of the Army and Civil Departments. Production shows a considerable increase over the last year, but the fact should not be lost sight of that production during the year 1939-40 was low on account of the labour troubles. The increased production is largely responsible for higher returns as is clear from the Balance Sheet.

Bolts and Nuts Plant, which did not operate to their satisfaction during the year 1939-40, has worked satisfactorily in the year under review. Actual working of the plant shows that it will give them the required production, provided they get enough raw material, and so far they have experienced very little difficulty in securing it.

Labour:—*Their* relations with labour have been cordial during the year under review. They are glad to say that labour has co-operated to the fullest extent in operations of different New Departments opened since the declaration of the War. The Management takes special care of labour that it employs and is keenly interested in promoting its welfare and safeguarding its interests in a liberal spirit. The result is the present cordial relations which, it is hoped, will continue.

It is proposed to distribute three months' pay as bonus for the year 1940-41. This will involve an expenditure of about Rs. 1,50,000.

Managing Agents:—Messrs. Indra Singh & Son Ltd.

Authorised and Issued Capital—Rs. 50,00,000 in 4,50,000 Ordy. of Rs. 10 and 2,00,000 Defd. of Rs. 2½ each. Subscribed—Rs. 24,65,800 in 1,96,580 Ordy. and 2,00,000 Defd. Called and Paid up—Rs. 22,26,580 in 1,70,000 Ordy. of Rs. 10; 26,580 Ordy. of Rs. 10 each, Rs. 1 per Share Called and paid up and 2,00,000 Defd. of Rs. 2½ each.

ISSUED WEEKLY

Vol. XXVIII. No. 12 FRIDAY, SEPTEMBER 19, 1941 Price Re. 1

Insure and Increase Nation's Strength

Financial Independence of the individual is the measure of Nation's financial strength.

In this hour of world turmoil, all Life Insurance Policy-holders should take stock of their insurance cover and ascertain just how strongly they are fortified against the unpredictable that lies ahead.

And, those individuals who have not yet made provision for their protection need do so without delay and thereby contribute towards Nation's strength.

Be advised and write to-day to

WORLD OF INDIAN FINANCE

Calcutta, Thursday Evening.

SHORT credits have continued to rule easy, and the interbank call money rate remains unchanged at ½ percent in Bombay, and ¼ percent in Calcutta, the rates being purely nominal. The deposits of scheduled banks with the Reserve Bank are roundabout Rs. 45½ crores. The expansion in cash balances is particularly noticeable in the case of the Imperial Bank. The Imperial Bank's cash has risen from Rs. 25.55 crores on September 5, to Rs. 26.81 crores on September 12. In fact, the Imperial Bank has strengthened its cash position between August 1, and September 12, by slightly over Rs. 13 crores. During this period the deposits of all the member banks with the Reserve Bank have increased by about Rs. 15 crores. That is to say, the lion's share of the increase in the cash balance of banks since August 1, goes to the Imperial Bank. During this period, the Imperial Bank has allowed its Treasury Bill portfolio to shrink by nearly Rs. 7½ crores. Since the end of August, the shrinkage in the Treasury Bills holdings with the Imperial Bank is Rs. 2½ crores. It seems likely, that with respect to fresh purchases of Treasury Bills, the Imperial Bank is, so to say, lying low, in the hope that it might be able to secure more favourable rates in the coming weeks. That the Imperial Bank may not be taking full interest in Treasury Bills at the present moment, is possibly the explanation for the applications on the Treasury Bill tender day this week being Rs. 2.65 crores against Rs. 2 crores on offer. This unimpressive total of Treasury Bill tenders is not in accord with the state of the money market and the swollen cash balances of banks. Now that the average discount rate has risen to annas 9 and pies 8 percent per annum, it is quite on the cards that the banks in general, and the Imperial Bank in particular, take keener interest in the weekly sales of Treasury Bills.

The returns of the Reserve Bank for the week ended September 12, disclose a further expansion of currency. Rs. 5 crores of sterling securities have been transferred from the banking department to the issue department. As a result, foreign balances in the banking department have fallen from Rs. 56.74 crores to Rs. 51.99 crores. Sterling securities from the issue department have risen from Rs. 131.63 crores to Rs. 136.63 crores. In the ordinary course, this would have resulted in an expansion of currency for Rs. 5 crores. Actually, currency expansion is only Rs. 3 crores, as against the increase of Rs. 5 crores in sterling securities, and a decrease of Rs. 2 crores in rupee securities. That is to say, the Reserve Bank has returned to the Government *ad hoc* Treasury Bills for Rs. 2 crores. For the value of the *ad hoc* securities, thus surrendered, the cash balance of the Central Government with the Reserve Bank must have been debited with Rs. 2 crores. In spite of this debit the deposits of the Central Treasury with the Reserve Bank show only a slight fall of Rs. 15 lakhs from Rs. 8.73 crores to Rs. 8.59 crores. That, in connection with the present addition of sterling securities, to the assets of the issue department, *ad hoc* Treasury Bills have been cancelled for Rs. 2 crores, is further testimony to the comfortable ways and means position of the Central Government. There are two other developments in the Reserve Bank returns which call for comment. Investments held in the banking department show a sharp and somewhat unusual rise from Rs. 7.65 crores to Rs. 9.59 crores. It is possible to offer an explanation for this increase only on the basis of pure guess-work. It is not an improbable theory that the rupee securities which have been removed from the issue department for an amount of Rs. 2 crores may not be *ad hoc* Treasury Bills, but a portion of those securities which the Reserve Bank acquired in connection with the recent redemption of India sterling stocks. Perhaps, these rupee securities have been transferred to the banking department so as to enable the Reserve Bank to sell them in gradual degree as the conditions in the giltedged market are now quite favourable. If this theory be accepted, it follows that the changes in the composition of rupee securities and sterling securities in the week ended

TREASURY BILLS

India

Tenders for Rs. 2 crore of three months' Government of India Treasury Bills were opened on Tuesday, September 16, 1941. Total amount offered was Rs. 2 crores and 65 lakhs. Tenders at Rs. 99-13-9 per cent and above were accepted in full and those at Rs. 99-13-6 per cent were allotted approximately 69 per cent. Total amount accepted was Rs. 2 crores, the average rate of accepted tenders being annas nine and pies eight per cent per annum.

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills will be received on Tuesday, September 23, 1941. Successful tenders should make payment on Friday, September 26, 1941. Other conditions are as usual.

During the week ended September 12, 1941. Government of India Treasury Bills for Rs. 3,26,50,000 were sold in favour of the Issue Department of the Reserve Bank of India.

(Continued from page 531)

September 12, are entirely confined to the Reserve Bank. The Government do not come into the picture. In simple terms, the earlier view we have advanced with these operations might have meant a cut of Rs. 2 crores in the cash balance of the Central Government will not fit in with this tale. The second point of interest is the sharp rise in rupee coin held in the issue department of the Reserve Bank after the sharp fall recorded in the week ended September 5. The return for September 5, showed a shrinkage of rupee coins from Rs. 38.49 crores to Rs. 37.76 crores. During the week ended September 12, this loss has been more than made up, the latest figure for rupee coin being Rs. 38.87 crores.

The exchange market has been very steady, with substantial business both in respect of export bills and remittances.

Banks were sellers of T. T. at 1s. 5-15/16d., for ready up to six months; and banks were buyers of T. T. at 1s. 6d., for the same delivery.

Banks were buyers of three months D. A. bills at 1. 6-7/32d., for three months; and 1s. 6-9/32d., for the fourth month.

Interbank call money remains unchanged at ½ percent.

Firms' money for call and short is quoted ½ percent; and ½ percent from one to four months.

Finance Abroad

Thursday morning.

THE large increase in banks' deposits provided once again the main feature of the Bank Return issued in London last Thursday. The plenitude of funds in London explains the large volume of applications for Treasury Bills issued last week. Total applications for £75 million in Bills came to £168 million and the average rate for 3 months Bills was just a little over 1 per cent. The market quota was 41 per cent; perhaps the increase is due to the larger volume of Treasury deposits called for this week from Clearing Banks. The easier conditions reported in the cables received last Sunday may be said to mark the beginning of a new slack season. The reduced outflow of money into Defence Loans may explain the increase in Banks' balances with the Bank of England. But the success of any new borrowing programme is assured with the further expansion in British note circulation. While commentators have taken care to express the view that the inflation is limited and far from pronounced, they have adverted to the greater increase in note circulation in Germany. This is proved by the sudden increase in the Bank of England's proportion which is now well over 31 per cent. While the bullion reserve shows a fall at £1.8 million as compared with the position two months ago, the substantial increase in the Bank's holdings of securities and currency will claim greater attention. This increase is responsible for the rise in the Proportion to what is perhaps the highest level in the war period. Confidence in the currency and credit system alike explain the stability of sterling in the exchanges. By mistake it was stated that sterling in New York had risen to ¼ of a cent above the London quotation. The New York rate is and was at the upper limit of 4.03½ quoted in London so that all observations based on the erroneous figure are invalid.

By this time interest must have naturally passed from developments in Britain connected with a new borrowing at a reduced rate to the very important steps taken in America to increase production and enlarge the scope of the lease and lend programme. The actual working of the programme involving an outlay of 4,400 million dollars in the first six months has induced the President to suggest modifications and to ask also for a further addition to the second appropriation asked for. And Congressional approval will be had, for the third term looks like a long honeymoon. The two Houses are not now concerned with the revenue Bill as much as with making the lease and lend act an instrument of government. It is probable that the Speaker's conference will result in giving a new status to the Bill enacted into law in March., and also help to get the modifications to the Neutrality act of 1939 desired by the President.

Little is known of the behaviour of various currencies in New York, but one may well remark here that the freezing of the Axis countries' funds was followed by marked depreciation of both the Italian and German currencies in May. It is quite likely that the unfavourable trend persists and it must have been accentuated by recent developments. It might be added that the mark must now be worth much less in terms of Latin American currencies as export trade is at an end.

At the same time as Dr. Clodius, a representative of the United Kingdom Corporation, the British Treasury's Agent in commercial matters, has been engaged in negotiations with Turkey. These have been successful, and Britain can count on a larger share of dried fruits from Anatolia. This, of course, was only to be expected from the desire to check Germany's efforts to increase trade with Turkey, particularly by allowing Greek exports of tobacco, olive oil and other commodities to the U.S.A. by way of Turkey.

According to an Ankara cable to the *Daily Telegraph* Britain has put Italy's nose out of joint by shipping copper sulphate promptly and has also provided coffee, locomotives and rolling stock required by Turkey. It has been said that at Alexandretta British goods worth £1,600,000 have been unloaded. The docks there are said to be blocked with goods that have to be sent on by rail.

The Government of the U. S. A. is now more than ever interested in sending on supplies for the Allies. While little has been heard of the proposed amendments to the Neutrality Act of 1939 all spokesmen continue to stress that Britain's victory is America's business. Mr. Appleby speaking for the Department of Agriculture after a visit to Britain said that the U.S.A. will send as much canned pork as the U.S.A. produces in a year. Millions of cans are wanted and the shipments will be doubled in October and further increased in November and December. The successful production of larger quantities of foodstuffs at home must have pleased Lord Woolton who has announced that the third winter will be milder because shipping losses for the last two months have been greatly reduced and U.S. tonnage has been available in larger quantities. The intention of Britain to help Russia fully has been expressed more than once and the Premier, impressed by the quiet landing of oil supplies at Vladivostok has indicated clearly that Russia will get large supplies, for instance of tin and rubber from Malaya as in July last by this route until winter when the door in Iran will be open and the Trans-Iranian Railway will become the main route. Road-building will be unnecessary.

The U.S.A. is credited with an ambitious plan. Mr. Nelson is to go into a complete survey of military and civilian requirements and settle all questions of priorities off hand. There may be enough aluminium to go round as Mr. Jesse Jones stated recently, that the defence plant corporation has undertaken to produce 30 million lbs of aluminium and 112 million lbs of magnesium at a cost of 72 million dollars. Total output will expand to 1,130 million lbs for this year, making the U.S.A. the world's biggest maker and user of aluminium. With ample supplies of tranxite from Gvianes and assured, also of Canadian supplies the U.S.A. had little need to worry about aluminium though it was apprehended that the increase in 1940 was not enough for the projected expansion of aircraft production this year.

While the blockade is maintained the relief of small nations is still the concern of Britain. Greece is to receive 50,000 tons of foodstuffs by sea from Turkey in a ship for which safe conduct has been promised according to a reliable source. A recent White Paper summarised in a Reuter cable has amplified previous declarations on Britain's export policy. Exception are precisely defined and it is clear that neutrals will get little or nothing of exports for which essential materials are needed. The American Ambassador has been informed how and when Lease and Lend materials will be used. It is assumed that Britain would be free to retain 2/3rds of her export trade. In spite of Stalin's scorched earth tactics there has been a bumper harvest in Russia. The harvest is as much boosted as the spring sowing, and it is stressed that the Germans got little of the harvest. In the greater part of the Ukraine and the Crimea the reaping is over. The only other item of interest is the report that after the appointment of the British representative on the Chinese Stabilisation Committee the Chungking Government consented to use Hongkong for discussions. The elimination of the black market was the object of the discussions and foreign banks have agreed to help. Foreign coins may be handled in a small way but they should not prejudice the Chinese currency. Financial circles in Chungking are said to be pleased. Chinese confidence can also be inferred from the report that subscriptions for a new British Textile Company in Shanghai over fifty times more than the capital of 4.2 million dollars wanted.

Japan's concession in regard to the unfreezing of assets belonging to diplomatic and consular staffs is but part of a reciprocal arrangement. This concession will not induce the democracies to conclose any rival of exports, and the House of Commons last week to another assurance that export licenses had been withheld in the past three months for shipments to Japan. The A. B. C. D. front holds, and Dr. Kung's recent move to get the Stabilisation Board going indicates that the Chinese dollar is the stronger currency. The yen's behaviour is hardly known but it is quite certain that its value is nowhere near the former parity of 23.48 cents; only the right sort of agreement with Washington will help the yen. Proposals for an outright loan to Russia have appeared in the American press which has uttered the appropriate caution. If Mr. Hoover's last utterance suggests a weakening of the traditional Republican prejudice there is little doubt that all sorts of elements will combine to fight a proposal for help to Russia. Yet Dr. Grady's mission to the East suggests that he is concerned with investigating all ways of helping Russia through the Middle East with warlike supplies under the lease and lend programme. The sequestration of Queen Wilhelmina's property was only to be expected. It was a wonder that the Nazis waited for a year before taking over the private property of a thrifty and well-to-do dynasty.

Problem of Indian Emigration

THE agitation against the Indo-Burmese Agreement and the general feeling of nervousness in the country about the negotiations with Ceylon are sufficient to remind the Indian public that one of the first tasks of India under the post-war constitution will be to regularise the position of Indians abroad. That it will prove one of the most delicate tasks of the future government of this country, there can be no doubt, if only because the general background of political conditions will never be quite helpful for an equitable settlement of outstanding issues. But it is well to realise that the problem will exist so long as such a vast and important country like India has no manner of political influence on the lands lying adjacent to her. In her political helplessness, India becomes the recruiting ground of labour which other countries need for the development of their resources. But Indians overseas are denied even the slow rate of emancipation which falls to the lot of their countrymen at home. The power of the people amongst whom they have settled to oppress the new comers varies from country to country. The stakes and strength of our emigrants are not the same in the lands they have settled in. And the complexity is increased by the fact that the attitude of the Government of India to the offending governments is not the same. We have no reason to think that conditions in the post-war period will be more favourable for a stable solution.

It is necessary, therefore, that the problem of Indians overseas should be considered in its entirety, so that certain leading principles can be formulated, for which we should seek to gain the approbation of international opinion and which we can follow in all our dealings with neighbouring countries in which large numbers of Indians have settled. Such principles are necessary if Indian interests are not to be damaged beyond repair, as in the case of the repatriation effected in the past or in the case of the Indo-Burmese Agreement negotiated by Sir G. S. Bajpai. All the countries which have been availing themselves of supplies of Indian labour have started with a flat denial of all rights to Indian settlers. They have proceeded on the assumption that the Indian remains on their soil only on sufferance and that the right to stop further immigration and the right to alter the status of Indians already settled in their midst are both on the same footing. In South Africa, Gandhiji's passive resistance shifted the whole dispute to the plane of ordinary humanity. Rights, as they are ordinarily understood in political or economic disputes, were hardly in the picture. And in the regime of Agent-Generals which followed thereafter, the theory that Indians may be treated differently has gained in respectability. Burma and Ceylon with their new pretentions to political freedom have walked with faltering steps in the path marked by South Africa. And in the case of these two countries, the existence of a comparatively large amount of trade passing between them and India is an additional source of complexity. In fact, it is not a little significant that Indo-Ceylonese trade negotiations were abandoned as a protest against the treatment of Indians in Ceylon and India was asked to be generous to Burma in her trade terms with a view to secure better treatment for Indians in that country.

While agreements with each of these countries have, no doubt, to be negotiated from time to time with reference to the needs of the hour and the relative bargaining strength, it is necessary that opinion in India should take definite shape on the two questions into which the whole problem may be resolved, (1) the right of Indians to emigrate to and colonise adjacent lands and (2) the rights of such Indians overseas in the lands they have settled in. When we discussed a fortnight ago the Indo-Burmese Agreement, we made it clear that India has a right to settle in adjacent lands where for any reason there is scope for the employment of Indian labour. The problem of Indians overseas to-day arises from the fact that in the past emigration occurred not as an act of national volition, but because planters and other capitalists in neighbouring countries found labour to be the most suitable for the development of their estates and other property. With the pressure of population as it has been, one has only to provide the least outlet for emigrants to flow in a heady rush to the lands that would take them in. But it is one thing for a country to send out emigrants in exercise of the natural right of an overpopulated country to colonise lands where labour is needed. It is quite another to grab the opportunity of escaping the want and misery at home. To effect this change in the basis of any outflow of population from India is the first task of any Government of India having pretensions to freedom and a representative character.

The post-war period will see the emergence of the problem of overpopulation and colonisation coming to the fore. The Atlantic Charter, it is well to recall here, has been carefully worded, not to speak of Mr. Churchill's interpretation of it, to shut out the enemy countries and the unwanted peoples from the areas which can afford relief from overpopulation. Nations are to live in safety within their own boundaries! While politically the Atlantic charter will be deemed to have no reference to India, in the economic sphere, it may serve to shut us out of the new areas and even to make out that Indians overseas can look forward to nothing but repatriation.

It may be said that there is not much land left vacant for colonisation. But there is undeniably scope in the lands adjoining India for the kind of infiltration of Indian labour, capital and enterprise which has gone on for nearly a century. In fact, if we recall the words of the Baxter report, immigration from India into Burma is as old as the two countries. It can hardly be said that the work which Indians can do in Burma, Ceyon, Malaya and Africa is finished. And if India is to continue to be a member of the British Commonwealth, Indians must have the same right to settle and acquire domicile as other nationals of the Empire. The right to emigrate and to settle in foreign countries has been surrendered or compromised or watered down in the past; and it is high time that public opinion in India stood solidly by this right. It need hardly be said that this right is modified by the rights of other countries to restrict the flow of immigration. But it is the former that requires emphasis in the context of recent developments. Relief from the pressure of population is in the long run in the interests of world peace. And world economic policy or world economic planning would be altogether inconceivable without provision for the flow of population from over-populated areas.

The rights of Indians who are already settled in foreign countries is clearly on a different basis from the right of Indians to emigrate. This is generally viewed as a political problem where political prejudices and antipathies are not merely relevant but have a special sanctity. Such, indeed, has been the view of the South African government which has insisted on segregation and discrimination in every walk of life. But the beginning of the settler's right is what may be called the squatter's right. The Indian settler abroad has the right to continue to live where he lives. But repatriation cuts at the root of this fundamental right; and the fact that worse misfortunes await the Indian, should he continue in the colonies, is only a consideration for temporary acquiescence in repatriation. The idea of repatriation has gained ground in recent times, through the lot of the first batch repatriated to India should be an effective warning against the repetition of the blunder. The right to continue in the lands settled in comes naturally next to the right to emigrate. And those whose task it is to form opinion in the country will be well advised not to pitch their claims low merely because the country is powerless at present to secure its rights.

What are known as the rights of Indians overseas are generally believed to be of a political rather than of an economic character. And it is largely true that the best way of denying economic rights is to give Indians an altogether different political status. But there can be no mistaking the predominantly economic significance of the problem. When Indians are disabled for owning land, when Indian capital is obliged to be repatriated, when Indian labourers suffer special hardships, it is no doubt the political sentiment that is outraged. But the economic loss sustained is staggering. This problem, like other aspects of the problem of Indians overseas will have to wait for India's political advancement for a satisfactory solution. The Indo-Burmese agreement should serve a better purpose than cause apprehensions about the nature of the coming agreement with Ceylon. It should awaken the country to a sense of the importance of emigration and the rights of Indians abroad to India's economic future.

Pointers to Prosperity

IF the request for news of industrial development is made, only the vaguest generalities can be supplied as information; and it is therefore advisable to provide for informants a composite, if somewhat blurred, picture of many an industry struggling to make the most of its resources and opportunities. The picture that emerges from an offhand analysis of such statistics as are available may bear no resemblance to that which temperament or temper, lead some to expect; but it will have the merit of being the nearest approach to reality that we can have. It is a picture that is sure to have changed, and all that can be claimed for it is that it represents the facts of growth and change. The picture confirms the impression made by the advance in India's exports of manufactured goods in the war period, and serves also to make clear that the recovery in the jute market of late is based on the improved conditions in the industry, illustrated by the increase in production noticeable since the beginning of 1941-42. The figures made available by the Survey of Business Conditions in May indicate that the production of cotton failed to pursue an upward course though there was no such adverse factor as a strike. It may be argued that the advance in the price of cotton goods then and since, sprang from the decline in production recorded after the end of 1940-41 and since we know that the conference on textile supplies was held to enlist the co-operation of the mills, one may legitimately infer that the trend was reversed since then under the stimulus of higher prices and other favourable influences like the freezing order directed against Japan, though it is not quite certain whether the contemporaneous expansion of demand has been met. How much of the recovery in export trade, measurable by the rise in the index for merchandise exports to the level of August 1939-40 is really due to the increase in exports of manufactures from India is a point on which no definite opinion can be expressed. The trend of civilian production in most cases is favourable. It is known that the cotton mill industry recorded an expansion of output in 1940-41 as total production rose to 4,259.8

million yards and the first month of 1941-42 witnessed a total output of 338.8 million yards as against 310.5 million yards in April 1940-41. Though the production statistics for the preceding three months indicate that April was not a good month, the next month saw an increase in double shift working and a fall in the number of idle looms and spindles in India. The continuous decline in textile imports like the increase of over 169 million yards in re-exports for 1940-41 supports the conclusion that the position was favourable proved again by the higher average prices for cotton yarn and goods paid from the beginning of 1941. The increase of over a quarter million bales in the mill consumption of cotton also indicated that the trend was singularly favourable and the April total at 291,000 tons bales showed an increase of 66,000 bales on April 1940 is the more welcome as the exports of raw cotton at 135,000 bales showed a decrease of 53,000 bales as compared with exports in April 1940.

The production of the Indian jute mill industry fell during 1940-41 by over 176,000 tons. The decrease is reflected also in the production total for April which at 100,700 tons shows a fall of 15,000 tons as compared with April 1940. Mill company reports for the second half of 1940-41 have clearly indicated that the level of prices discouraged production. The slight increase in hessian and sacking stocks during the first few months of 1941 indicated that external influences were by no means encouraging and such recovery as was registered in exports was no fillip. There have been since two important war orders, and the manifestation of interest in the new crop on the part of mills leads to the deduction that the mill industry finds other things besides Heavy Goods profitable at present particularly as the higher prices for manufactures have been stabilised.

In the case of iron and steel little is known except that production for 1939-40 showed a striking increase under pig-iron as also steel ingots and finished steel. There is, however, the fully optimistic survey of the situation in the industry made only last month by Mr. J. R. D. Tata. There is also the fact that imports, after the brief improvement recorded in April, are not likely to come up to the reduced proportions of 1940-41. The fall in imports during 1940-41 was undoubtedly a favourable factor. Imports of protected iron and steel fell from 118,400 tons in 1930-40 to 77,900 tons in 1940-41. The increase in the exports of pig-iron during 1940-41 is not accompanied by an increase in the exports of iron and steel, but the reduced volume of exports since February may be due to other factors such as increased internal consumption or shipping difficulties.

The conditions in the sugar industry cannot be accurately indicated though the official estimates of production published in the *Indian Trade Journal* showed that the 1940-41 season was favourable in some respects. The steep fall in imports shows that indigenous production assisted by the large stocks was equal to demand. The increase in stocks as compared with May 1940 showed how the rise in prices was braked. There has been a smart rise before the beginning of the 1941-42 season in November and it is useful to remember that the rise in prices is past and probably the reflex effect of the reduction in cane cultivation this year.

Though the figures are not complete, or final it is easy to guess that the coal production for 1940-41 must have surpassed the record of 25.05 million tons reached in the 1939-40 season. The sustained increase in industrial production makes for such an increase, though it is apparent that the decrease in exports visible after November last year, must have been a restraining influence. The trend of exports remains unfavourable and railway statistics also point to the reduced movement of coal and coke. Such relief as may be afforded by the postponment of the usual surcharge cannot be great since prices are stagnant, and the coal industry, from time to time, records its regret that it does not obtain its due share of prosperity.

If tea production and export figures are of limited interest, their value for the foreign trade of the country must be recognised. It is unfortunate that except in the case of the paper industry, production statistics are not available. Total production of paper in March was as high as 152,000 cwt. as against 125,000 cwt. in April 1940. The increase as between the first and last month of 1940-41 is of great significance for those who would desire to contrast the prosperity of the protected industries with the stagnation that characterises, for example, the coal industry, though it might be said to benefit in a way from the fall in imports of coal last year there was an increase in the generation and consumption of electricity for industrial purposes during the last year. Though it is not possible to draw any valuable conclusions from the fall recorded under imports of cement and sulphate of ammonia or from the increased shipments of wheat flour during the past year it will be seen that both are in many ways pointers to increased production. Evidence for this view is forthcoming also on the imports of foreign merchandise with such exceptions as cotton during the months of April and May. The fall in exports of raw materials may appear more serious than the expansion recorded under manufactures. But the latter is invested with a significance denied to the former since it is obvious that, except possibly in the case of jute manufactures, the trend is still favourable. The increased consumption of industrial chemicals e.g., sulphuric acid must continue with favourable results. And the increase in 1940-41 in raw material production evidently found a close parallel in the increase in the production of all industries excepting the jute mill industry. What is suggested is that the foreign trade statistics and coastal shipping returns must be viewed as unconnected with the secular trend in Indian industry. The economic outlook in India must be more hopeful than the fall under shipments of jute, jute manufactures and raw cotton may suggest, and it is interesting to find that inland trade e.g., in yarn and piecegoods as also jute and sugar in 1940-41 recorded appreciable improvement suggestive of more active conditions in the respective industries. It is difficult to express the improvement apparent in Indian industrial production in the terms of a properly adjusted index comparable to the Federal Reserve Board's index for business activity in the U. S. A. or conveying incidentally the improvement in the volume of employment. The lack of such a convenience makes every analysis of available figures look a scrappy commentary. The figures relating to cheque clearances since February point to a definite improvement in business conditions in India. The bank statements for the first half of 1941 did not conflict with the optimistic conclusions drawn from the uninterrupted increase in note circulation and incidentally from the reduction in the number of trade disputes over a fairly long period. The view is reinforced by a glance at what may appear at first sight unimportant, the figures relating to postal traffic. The further increase in telegrams and registered letter reinforces the view that independent of the decline in foreign trade the business situation in its various other facets showed consistent improvement during 1940-41 and the improvement, if one may go by more recent indications as those referred to continues. The conclusion may not be cogent but it is decidedly comforting and provides a welcome fund of assurance to the optimists who spotted a boom in the offing.

Editorial Notes

Expenditure on Roads

In the annual report of the I. R. T. D. A. is to be found a fairly detailed analysis of road development in India during 1940. Since the bulk of the expenditure has to come out of the share assigned to the Provinces from the import excise duty on petrol the actual development has been limited. In Assam the separate programme financed by the Tea Rates Road Fund is likely to be more important as the share of the Province in the Road Fund is barely Rs. 4 lakhs and the prospects of any substantial assistance from the Reserve appear to be meagre. Receipts from the M. V. Tax fund will, however, be available for local board schemes. It is only in Bengal that marked progress was recorded in the execution of schemes. It is expected that by April 1942 the Bengal Government will be up to date with their expenditure. Approved schemes estimated to cost Rs. 155 lakhs were awaiting execution on September 30, 1940, and the Province had on hand a balance of about Rs. 40 lakhs in the Road Development Fund with the prospect of an additional income of Rs. 20 lakhs. To obtain additional revenue for financing a development programme based on Mr. King's report, the Bengal Government have introduced a sales tax on motor spirit. In Bombay complaints against the neglect of roads have been frequent though the Government have stuck to the 3½ crores plan for road improvement as Bombay gets Rs. 29 lakhs as its share of the petrol duty.

The C. P. and Madras have undertaken development schemes costing Rs. 31 and Rs. 50 lakhs respectively. The U. P. Government has given up the idea of raising a loan of Rs. 1½ crores for an extensive development programme and the original five year programme should be complete by the end of 1941-42. In Sind the first programme is approaching completion, and there is a prospect of Sind being connected with the Punjab and Baluchistan by a trunk road, the cost of which amounting to nearly Rs. 25 lakhs will be borne by the Government of India. The business of taking over important roads from the control of Local Boards and putting them in the charge of the Provincial P. W. D. has made headway in some provinces, especially, the Punjab. The appendices strengthen the common belief that the older Provinces like Bombay have made the most out of allocations from the Road Fund. The reduction in the share of the petrol duty for 1940-41 however create difficulties for most Provinces and pleas for improved roads are apt to be overlooked. The statement of expenditure incurred indicates that the full grant has not been spent in most cases and Mr. Parker's point made in his speech during the annual meeting of the I. R. T. D. A. that expenditure on roads has fallen short of the revenue arising from motor traffic is brought out by the difference between Rs. 960 lakhs realised in 1938-39 and the total outlay inclusive of assignments from the Road Fund of Rs. 602.1 lakhs. The grants from the latter are important from the point of new construction since Provincial and local revenues bear the brunt of maintenance charges. In the case of most provinces, the expenditure on original works has been small though a substantial part of expenditure is covered by the Provincial and local taxation of motor transport, as in Bombay and Madras. The enhanced grants paid from the Road Fund have been helpful to the Punjab where the expenditure on roads and bridges has risen steadily during the seven years ending 1939. Bengal too has consistently increased her expenditure on roads, and if the ratio of metalled roads to unmetalled does not appear high, the average expenditure per mile on maintenance was the highest.

Banking Legislation

Though consideration of the proposals for an Indian Banks Act has been postponed on account of the war, interest in the subject of reform has by no means disappeared. The proposals that appeared last year attracted the attention of interested organisations, and improvements thereon will probably be suggested by a consideration of the draft bill under consideration in South Africa. The Union Parliament has under consideration a measure designed to bring all persons receiving deposits within the scope of the Banks Bill. Mr. B. L. Panjabi in an article in the *Journal of the Indian Institute of Bankers* says that a new official designated Registrar of Banks will have wide powers of superintendance. He can refuse applications for registration subject to appeal to the Minister of Finance within 30 days. All returns etc., are to be made to him. The Bill prescribes conditions as regards capital etc. A commercial bank must have capital and unimpaired reserve funds amounting to not less than £30,000 and in addition £5,000 for each branch or agency in excess of three or 10 per cent. of the total owed under deposits up to the sum of £200,000 and 5 per cent. of the total amount of deposits in excess of £200,000. Capital and reserves are defined by law in order to protect the depositor. The Bill also demands, like the draft Indian bill, that the subscribed capital must be at least 50 per cent. of the authorised capital and the paid-up capital must be at least 25 per cent. of the subscribed capital. The South African measure requires that 10 per cent. of demand liabilities and 3 per cent. of time liabilities in the case of each commercial bank must be deposited with the South African Reserve Bank. It is only in the case of Scheduled Banks that there is such a provision in India. The South African bill makes it necessary to keep 30 per cent. of the deposit liabilities in liquid reserves which are different from cash and approved securities since bills and balances with other Banks are treated as liquid reserves. Only negative restrictions are imposed on the activities of banks. The purchase of a bank's own shares or advancing money on them is forbidden, but what a bank can do is hardly defined since that must be done by its Articles of Association. It has been suggested that the South African Bill is more comprehensive because it requires a variety of returns to be submitted each month so that the Registrar can adjudge the financial position of each Bank in the Union.

Export Policy

The last issue of the bulletin published by the British Trade Commissioner in India discusses the nature and objects of Britain's export policy.

C. N. MUKERJEE,
Managing Director.

The variety of import restrictions in force in India at present preclude any large development and all exporting countries, too, evince less and less interest in maintaining trade though Britain is able and willing to send out goods in nearly all cases. The re-acquisition of markets after the war is evidently a minor consideration compared with production for victory. The conservation of resources through the concentration of production in nucleus factories implies that consumption in markets outside Britain is to be reduced and only essential exports can be expected by any importing country from Britain. The policy has been defined in May as one of reducing demand for materials, labour and shipping space for the sake of the war effort. The encouragement of exports comes into play only when the exports earn or save exchange needed for the payment of essential imports or are deemed vital to the importing country. If the value of an exported product is high in relation to the imported material and if the article can be manufactured and exported without putting an undue strain on resources needed for war purposes, exports are not unwelcome. The export drive has limited scope and precise objects, but except for metals and manufactures thereof, certain textiles and provisions, a wide range of goods can be obtained from Britain since licensing does not apply to them. It has been said in this connection that before any importer turns to a non-British source he must try to test the Home market as it is frequently possible to obtain goods which at first may appear difficult. Price considerations and exchange restrictions alone must make India turn as usual to the U.K. and the Commissioner's request that the U.K. should be given first refusal follows from the retention of ability to export certain classes of goods, and is also based on the fact that the U.K. remains the biggest customer for India's exports.

Insurance in Wartime

Among the important services performed by the Indian Insurance Institute is the preparation of broadsheets dealing with subjects of wide and permanent interest. Reviewing conditions under which insurance companies operate in Europe the latest bulletin remarks that insurance business is holding up remarkably in Europe. It is noted that the exceptional difficulties arising from the war have not affected insurance in Europe as much as was expected, and this stability has an important lesson for the public in India which is apt to exaggerate the uncertainties of wartime against the vaster risks of a future against which no policy has been taken out. The insuring public—and the wider section that still misses voluntarily the value of protection by insurance—will do well to note that in spite of war the British insurance companies carry on, and further the national effort by large and regular subscriptions to defence loans. If the total business of insurance companies in Britain declined in 1939 and 1940, it was due to a variety of reasons among which are the reduction in field workers and staff and the increase in taxation. The increase in premiums did not militate to the same extent as the reduction in the number of eligible lives. Due note must also be taken of the increase in savings diverted to the defence loans. A reduction in the total volume of premiums was forced by the steady increase in subscriptions to defence and savings certificates. Though some commentators have argued that there is no need for the volume of savings to fall, owing to the rise in money incomes, there is little doubt that savings fell off last year as indicated by the reduction in new business. Due note must also be taken of the loss of Continental business owing to the war. Insurers also evinced a measure of reluctance to take up business on account of the war.

The Indian Insurance Institute's bulletin rightly stresses the fact that British insurance companies have been hardly affected by the increase in claims. Air raids and the resultant casualties have made little difficulty. The average British life office is strongly entrenched, and the bulletin points out 'that their reserves are so large that they are finding no difficulty in paying all claims with their usual promptness.' This voluntary tribute must put an end to the silly speculation indulged in by the unusually ignorant and the abnormally timid about the probable return of their own premium payments when their policies mature. The bulletin also provides information relating to the position of German insurance companies. The Reich Government has given special support and asked companies to lodge their reserves in the German Insurance Co-operative Association. It is learnt that during 1939 and 1940 the total new business of German companies increased as also their assets. German companies have been asked to insure properties formerly insured by British companies operating in France. A central office in Strasburg has been set up to take care of the business of British companies in Alsace-Lorraine where German companies have been assigned the interests of other companies. Policyholders have not suffered in the least through these changes. In Occupied Norway, the business of British companies has been transferred by individual arrangement to Norwegian companies. The representatives of British companies have become agents of Norwegian companies and they have been authorised to indemnify policyholders who have remained in Norway. In Finland, too, insurance companies surmounted difficulties due to war and payment was made on claims even if special war risk premiums had not been paid. In Denmark business was scarcely interrupted by the war and companies carry on as before. Danes enlisted in war service pay an additional premium of 4 per cent. only. German companies are busy in Belgium and in Holland the indigenous companies are not touched by the difficulties to which British and French companies have been put. German companies have annexed the business of British and Polish companies in Danzig and the Corridor. Those of German race will be given certified policies provided they continue to pay premia. Policyholders of other nationalities have to be content with policies made up to the extent of the funds of the companies taken over after the German conquest.

Economic Warfare

The Ministry of Economic Warfare sprang like Athena in full panoply but its work lacked efficient direction as Dr. Einzig has complained in his recent book. A great change, however, came with the advent of Dr. Hugh Dalton who believed in going all out. Reviewing the operations of the year ended last week, an official publication, summarised in a cable received by the Associated Chambers of Commerce last week, dwells on the evolution of the blockade applicable to exports also during this war. The legal aspects have been discussed by many experts, and it is only the efficacy of the measures that has been questioned. The expediency of allowing French African Colonies to procure oil imports has also been called in question and the arrest and release of the tanker Scheherazde is a subject that may provoke controversy in the future. The Ministry's work has been praise particularly as neutrals' co-operation has been secured and Germany's imports never leave the country of origin. The Ministry's review points out that control of sources has proved effective while *bona fide* neutral trade has not been reduced. Eire, Iran and Iraq for instance have been added to countries for which navicerts are available, 68,500 applications for navicerts were received since August, 1940 whereof about 2/3rd were granted. As many as 3,535 vessels sailed with ships navicerts and only 48 without them in circumstances where they were required. The issue of certificates of origin for goods shipped from Europe overseas has greatly hampered Germany's efforts to gain foreign exchange by exporting *via* neutral countries. The Navy has effectively reminded Germany that the navicert system is backed by naval power by intercepting a number of German ships attempting to run the blockade.

The other machinery of economic war is the export licensing system; black listing with the object of putting enemy firms out of business, action taken to immobilise enemy funds held abroad and the preemptive buying of goods wanted by the enemy fall in the scope of economic warfare. In all these spheres Britain was greatly helped during the last year by the U. S. A. whose policy of economic defence has often served the same objects as British. German industrial concentrations have been selected for attack and the Nazis have a two front war at least in the air as the Russian bombing of eastern areas has begun. Despite feverish efforts to build up war industries in the south and east, Western Germany remains the principal arsenal and the R. A. F.'s summer offensive has brought important assistance to Russia by sapping supply lines on the eastern front and has at the same time brought home to the front line workers in the German industries the realities of war on two fronts. The attack on Russia has fundamentally affected the work of the Ministry. The Far Eastern leak has been closed, and Germany has been deprived of supplies of vegetable, oils, silk, tungsten and rubber. The imports of Russian oil, grain, manganese, phosphates, cotton etc. have also come to an end. The closure of the Russian gap emphasises the importance of the remaining gap *via* Marseilles where Germans are trying to increase traffic from North and West Africa. But this cannot compensate Germany for what Germany is losing economically in the Russian campaign. The Occupied countries too are in a bad way and the same raw materials are wanted by them. It is not easy to develop additional capacity for producing substitutes. The effects of the blockade are seen in Germany's difficulties regarding manpower, transport and administration. They are the outcome of supply difficulties which must increase if the present rate of expenditure of materials and men is kept up.

Puja Travel by B.N.R.

A recently issued booklet brings to the notice of the public the many holiday resorts and pilgrim centres served by the Bengal Nagpur Railway. It is fortunate that the attractions of holiday travel at reduced rates are paraded this month when the holidays come and there is a chance for many to escape from the daily task, the common round. The essential information, presented in the booklet in summary form, is of

special interest to Hindus who may choose to make pious use of the holidays this year. Puri alone promises two important festivals in the month for pilgrims and the temples of the four Provinces served by the B. N. R. are all equally accessible to the happy traveller. This is not meant to say that pilgrimages alone are recommended during the Puja holidays for everybody knows that Calcutta's attractions are sampled by the mofussilite. For enjoying these too the B. N. R. holds out the promise of a fast, comfortable and above all, a safe journey at concession rates. The seasonal influx into the city will doubtless be encouraged by the return tickets and other special facilities offered this year. Many who have put off necessary trips will be induced to move, now that reduced fares are the rule.

Lac Institute's Work

The diversion of interest that occurred in the activities of the Indian Lac Research Institute during 1940-41 arose as much from the difficulty of getting chemicals and apparatus as the demands of the Supply Department. The Medical department too turned to the Lac Institute and plastics were in more request than ever. The annual report for 1940-41 states that urea and formaldehyde not being procurable from abroad, the Institute has concentrated on manufacturing the chemicals for the benefit of moulding powders. To evolve a plastic entirely from indigenous materials has been an object of researches pursued by the Institute which also engaged in a search for new filling materials. The results of successful work earlier on laminated board, waterproofing compositions, stoving enamel etc., based on shellac were not overlooked. A new departure was in the work on lac-dye. Its constitution has been ascertained and one more indigenous source of dyes may be turned to advantage. Dr. H. K. Sen's report refers also to a new outlet for the large quantity of *kiri* produced by shellac factories. Examination of uses for shellac, in combination with rubber, is in progress. As the resulting material is both tough and flexible, manufacturers are likely to manifest great interest. The lac insect and its hosts were studied in relation to their enemies since suppression is the object of schemes for distribution of high quality lac in demonstration areas. Improved methods have been appreciated and the ordinary cultivator has been impressed by the Institute's work, while one of the biggest Zemindars of Chota Nagpur has offered support for a plan of co-operative cultivation among his tenants. Entomological work extended to Bengal and the Santal Parganas and four more demonstrators were taken to work in Bihar.

The Namkum Institute's work has many sides and the chemical and other research work had various purposes for instance learning what are suitable solvents. The properties of lac and lac mouldings were systematically investigated and the effects of storage on the quality of lac and shellac were studied. That deterioration is less in air-conditioned storage than in storage under ordinary conditions has been learnt. The study of manufacturing methods with particular attention to the utilisation of waste material, like *Kiri* resulted in further progress on the production of black baking varnishes from refuse lac. A new lac oil varnish was evolved for coating fabrics against damage by water or petrol and a new attempt to replace nitro-cellulose lacquer was made by the adoption of shellac-coaltar, varnish obtained by the treatment of an alcoholic solution of shellac with the neutral whole or fraction obtained on distillation of coal tar. Such a composition, says the report, is comparatively cheap as both the nitro-cellulose and the necessary plasticiser could be omitted and a glossy finish could be obtained on the articles which after a short baking could obtain the required weather resistance. The improvement of French polish by the use of melamine as a reagent yields better results. A glossy film is produced by the application of the varnish which can be pigmented according to desire. In the work on shellac plastics new materials were tried, for instance, protein and cashew shell oil. A new filler for injection moulding was

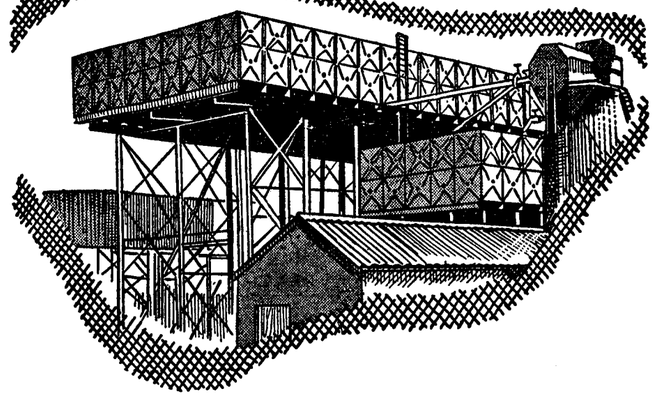
sought in waste jute with good results. Inquiries were received from several companies including one in Australia with reference to moulding powders which were sent out. The report contains many references to new combinations of shellac with other materials and a new varnish made with latex is considered promising as a waterproofing composition for fabrics. Research work on the same lines is in progress with a view to prepare petrol-proof and gas-proof fabrics.

Non-Belligerence Revised



The attitude of the U. S. A. to the war is changing day by day. Colonel Knox's address to the American Legion is of a different temper from President Roosevelt's broadcast warning to Hitler. The non-belligerency of the U. S. A. may be of a different nature should the Speaker persuade Congress to consider the amendment of the Neutrality Act. The Isolationists are treated as a discontented rump, and President Roosevelt's foreign policy, interventionist as it appears, is vigorously commended by the press. The audacity of German attacks has been met by a plainer warning than seemed possible. The convoy system for Lease and Lend supplies may precipitate a naval conflict but it is doubtful if Herr Hitler will take on another adversary in the West. Writing recently in *Reynolds News*, Mr. H. N. Brailsford who wrote last year of America as an Ally asked why should the U. S. A. turn its back on peace and plunge into war? The sampling of opinion, according to Mr. Brailsford, does not give a correct notion of the real division in every individual American breast and adds 'I think he would acquiece in any action in the air or on the sea that the President might order'. That means support for the Administrations policy adopted to prevent a repetition of the Greer incident and avoid loss of lease-lend supplies at sea. The battle of the Atlantic must change in spite of the last desperate attack by enemy aircraft based on France on a British convoy involving the loss of eight ships. The losses during the last two months average only 40,000 tons per week. The average is substantially lower than the average for the first twenty-two months of war.

The deliberate choice of American ships for attack may be taken to imply hostility to U. S. entry into Iceland. But the Icelandic Government has approved, and the possible entry of Iceland into the British Commonwealth after the war concerns only Iceland. Even Denmark may not protest, in case Iceland breaks with her, and the Nazis alarmed more recently by the loss of Spitzbergen have registered a futile protest by attacks on U. S. shipping. The attack may imply that the U-boat commanders are desperate. They have reason to be because in thirteen weeks the invading forces have accomplished little in Russia. The leading cities hold out—there is still no question of a siege—and a counter offensive has developed. The shipping problem has been more important than the food problem and the assurances of safe carriage is far more important than Lord Woolton's belief that with an abundant harvest at home, Britain can count on adequate supplies. Ample supplies of dry milk and canned foods have been promised by U. S. officials who visited Britain recently.

The hesitation of Japan is another fact that goes a long way to show the success of U. S. foreign policy. Oil, ammunition and machine tools can go to Russia by way of Vladivostok and before the winter sets in the new route through Iran for supplies to Russia will have been prepared. The U. S. President had no reason to discuss these things. He took a familiar stand by speaking of the freedom of the seas and of maintaining the British navy as a bulwark of American security.

It was made out in these columns last week that the most important of the problems of peace will be those connected with a world economic policy. But more than that, one cannot possibly say by way of forecast. It is not even certain whether the victorious powers and the other nations will succeed in bringing about anything like a world policy in economic matters. Whatever they may do or fail to do, the stability of peace will depend less on the nature of the political aggregations and their relative strength or weakness than on the nature of the economic policy which the nations will follow and the stresses and strains it will set up in international life. But economic problems have a better chance of gaining due attention at the end of this war than they had at the end of the last war.

It is not alone the reparations and war debts fiasco that accounts for the difference. Everything that happened in the decade before the outbreak of war and even the ostensible reasons for German aggression have been largely economic. After all, this war, if it is to be attributed to any recognisable causes, should be attributed to the failure of the disarmament conference in the political sphere and of the world economic conference in the economic sphere. In the latter, the nations were groping for a solution of the problem of poverty in plenty. The solution which appealed to the great powers, namely, removal of trade barriers, was found to be impracticable. And the evil which they vainly attempted to remove was strengthened by their failure. Empire trade and other measures which followed the break-up of the World Economic Conference gave Hitler his opportunity to cover up German aggression with the cry for Lebensraum. And the fact that access to raw materials figures so prominently in the Atlantic charter is sufficient proof that the German grouse is not altogether frivolous. It is clear that, when the war is won, both Britain and the U. S. A. will exert themselves to ensure free access for all nations to the sources of raw materials. And this could hardly be done unless economic policies of wider scope are conceived and implemented by the Powers. There is also the fact that loans and credits which the U. S. A. has granted to Britain and Russia and other friends of democracy are not on the old basis. During the last war, there was little or no doubt that loans would be returned as a matter of course. Now creditors are wiser, thanks to a lot of unwelcome experience. They can have no illusions either about capacity or willingness to pay. When compensations are sought for aid given, they will naturally take less familiar forms. For my part, if I were an American, I would consider a world economic policy, which can afford a fair immunity from cyclical depression, good recompense for all the help which the U. S. A. is rendering to the cause of democracy. In any case, debts settlement will involve settlement of economic policies and trade relations.

It will thus be seen that there are powerful forces working to ensure that economic problems are given their due share of attention. But will they produce a world economic policy? By a world economic policy, I mean certain broad principles which the nations will agree, tacitly or explicitly, to follow in their economic policies. The principles will naturally be such that their observance by the nations will tend to minimise conflict and the pursuit of incompatible aims and policies. Such principles are inconceivable, unless there is behind them the assumption that the world is one economic unit and that humanity is best served by all the peoples agreeing to seek economic development according to certain well understood principles.

Before discussing the chances of such a world economic policy, it is interesting and important to note that in the sense I have mentioned, such a policy was not quite unknown in the past. The era of **laissez faire** and free trade certainly knew of an economic policy which was equally binding on all nations. And the economic theory behind it was based on the assumption that the world as a whole is one economic unit. That is a commonplace of economic discussions. But even before this era of free inter-national trade, no country thought of developing its own resources in complete disdain of what other countries had to offer. Foreign trade was from time immemorial the ambition of monarchs and peoples.

Dated 22-8-1941.

The absence of bluebooks telling month after month that so much of foreign goods were imported into the country may perhaps explain the absence of active opposition to imports. But foreign trade implies imports, and the implication does not seem to have been shirked. Ancient peoples prided themselves on getting things from the furthest corners of the earth. The idea that to produce at home what is got from abroad is a laudable aim seems to have been far from pronounced. The reason is very simple. In that stage of the development of productive technique, Nature seemed to set a vigorous limit on the kinds of goods which each country should attempt to produce. And since people were not satisfied with what their own soil could produce, foreign trade seemed natural and commendable. There were no restraints to trade other than the prevalence of burglary and piracy and the levy of tolls and duties. Localisation of production was severe and inescapable, exchange of goods brought revenue to the authorities and trade flourished as well as it could in the conditions of those times. Only the short period in which mercantilism with its exaggerated importance of gold, which was also misunderstood, held sway, was there any world economy. But mercantilism was soon out of vogue; and modern economic science made short work of the doctrine which interfered with the old partially for foreign trade.

Economic nationalism as an idea or as a policy is an upstart. It is a growth of yesterday. And the difficulties of formulating a world economic policy in modern times should not blind us to that fact. But economic internationalism may gain in respectability by its hoary age. It does not for that reason become the better policy to follow. For, the appropriateness of a policy depends not on its appeal to our aesthetic instincts or to some of our treasured sentiments, but on the conditions obtaining at a time. When nature set limits on the products of each locality, exchange was natural and inevitable. Likewise, when the development of communications enabled the transport of large volume of goods over long distances and industrial skill is highly developed in countries which are not producers of raw materials, the value of international trade is unquestionable. It is understandable, too, that in such periods, the value of international trade and its potentialities for developing world economy should be unconsciously exaggerated both by businessmen and by academic economists. But the reaction set in with the last war. Nations have found themselves obliged to tread the path of economic nationalism. The question naturally occurs whether it is a mere reaction from the excesses of the past or whether there are more deep-rooted causes behind it, whether there is a rationale behind the tendencies of the last decade.

Even the most permanent changes in social life have at one stage all the characteristics of a mechanical reaction. In political history, counter-revolution is a familiar phenomenon, though no counter-revolution is known to have cancelled the revolution. Even the historic revolutions could be viewed as, in the main, a reaction from autocratic excesses in an earlier period. But, obviously, to regard every revolution as a reaction is to misunderstand its purport. The phenomenon of economic nationalism was at the beginning a reaction

SE.—38

from the excesses of free trade in the earlier era, the excesses that fastened on the producers of raw cotton the role of mere consumers of cotton cloth. And to the extent that economic nationalism was unbridled, it accentuated the hardships of the transition and made people sigh more passionately for the good old days of free trade. There was mentally a counter-revolution in the interests of free trade. International conferences met and discussed the lowering of trade barriers. The League of Nations, the International Chamber of Commerce and other august bodies missed no opportunity to emphasise the value of free trade.

All this I say is in the nature of a futile counter-revolution. The course of economic nationalism was unimpeded. One has, therefore, to conclude that there were substantial changes in objective conditions arguing for the change. I have said before that the reasons for economic internationalism in the earlier ages were firstly the restrictions which Nature placed on the kinds of goods which each locality could produce. In the eighteenth and nineteenth centuries there was the additional reason that knowledge of utilising raw material was not always found in the centres of production of such raw material. The moment these factors are weakened, the basis of international trade relations is considerably altered. To what extent is a matter which can be considered later. For the present, it should suffice to note that Nature no longer insists on what was formerly called the geographical division of labour. Not at any rate on the same scale as before. It no longer seems to be the obvious decree of Nature that countries which can manufacture iron and steel and iron and steel goods shall not grow their own food, or that countries which grow their own food, should also get their clothing from abroad by exporting raw materials. For such an ancient dictate of Nature to become obsolete all of a sudden, two changes are necessary; firstly, that manufacturing skill should no longer be confined to a few countries and secondly, that natural conditions should not be as severe a restraint as formerly on the range of productive activity. Both these conditions are being satisfied. Producers of raw materials have been acquiring the skill for utilising them in manufacture. Science has enabled the industrialist to keep natural conditions at arm's length when he is engaged in production. Naturally, modern societies find themselves moving away from the tradition of economic internationalism.

But the question may be asked, whether these changes are a sufficient argument for economic nationalism, though they are certainly necessary. To say that economic nationalism is possible, as it was not in the last century, is not to say that it is necessary. The fact is that nobody will see the necessity of economic nationalism, who does not recognise that the legitimate aim of economic policy is to find the necessaries of life for all people. At any earlier age, this was only a pious aspiration. It simply could not be done. Man had no means of controlling his economic fortunes. Society had to be the plaything of Malthusian. And the fortunate and the capable in one country dealt with their opposite numbers in other countries. Foreign trade flourished; and the upper classes were happy. I am not suggesting that there was a criminal neglect of others. It could not be otherwise. I have a theory that inequality, while it is often injustice to individuals is as often justice to society in the sense that it helps social progress. But the fact remains that no earlier age addressed itself to the task of finding the necessaries of existence for all classes of people. Laissez-faire economics was content with indicating that under conditions of free trade, optimum employment was only during the last two decades that on the one hand democratic electorates were insisting on economic development adequate for meeting the needs of all and on the other changes in productive technique and the mapping out of natural resources made such development seem feasible. If governments have to aim at the provision of the necessaries of life for all the citizens and if technical conditions permit a wider range of productive activity, then there is very little to be said against intensive internal organisation. Except, of course, the half-truths of free

(From Our Correspondent)

Simla, Sept. 15.

AN official announcement has now been made regarding the arrangements for setting up Sir Akbar Hydari's new Department—the Department of Information and Broadcasting. Though these arrangements will not be completed before the end of October, the decision has been taken to relieve the Communications Member of the All-India Radio and also transfer from the Home Department the administration and control of the Information Bureau and the Press Advising Office. There was never any justification for attaching the All-India Radio to the Communications portfolio which was heavy enough even without it. Now that it has come under an Indian Member, who from his past associations may be expected to have a sympathetic understanding of Indian opinion and its needs, it is hoped that the All-India Radio will hereafter develop on progressive national lines and give up its old self-imposed limitations. The transfer of the publicity organisation, and more particularly the Press Advising section which is responsible for maintaining correct relations between the Government and the Press, is also of great importance, for the traditions of the Home Department have been such that for the proper development of publicity which would command public confidence, it was far from desirable that this activity, so essential in wartime, should continue in the hands of the Home Department's officials. One of the first tasks which the new Information Member has undertaken is the reorganisation of the Central Information Board. It is at the moment composed almost wholly of European officials. No one is in a position to know better than Sir Akbar that if this Board is to function usefully in the future, it should have a greater proportion of Indian non-officials, particularly, those connected with the Indian Press.

* * *

No official information is available regarding the four remaining Members of Government who have yet to join. The next to take charge will probably be Dr. Raghavendra Rau who will be responsible for Civil Defence. In order to make the preliminary arrangements for this new Department, a senior Civilian of the United Provinces, Mr. Ibbetson, has already been appointed as Director-General. After the arrival of Dr. Raghavendra Rau, the new Department will be fully organised, but this will not create much difficulty as the section of the Home Department now dealing with A. R. P., Civic Guards etc. will serve as a nucleus. It is apprehended that there may be some delay in the case of Sir Feroze Khan Noon, but as the Central Legislature is to meet in the last week of October, it is expected that he will be in India before then. The position regarding Mr. Aney and Mr. N. R. Sarker is also in doubt, owing to the uncertain plans of Sir G. S. Bajpai. As soon as the latter returns from Ceylon, it will be decided when he should hand over charge to his successors and what arrangements should be made in case it is necessary to retain the services of Sir Girija for the Assembly session in connection with the Indo-Burma agreement and the Ceylon negotiations. There is even a proposal that if Sir Firoze Khan Noon's return to India is delayed, Sir G. S. Bajpai may be placed temporarily in charge of the Labour portfolio.

* * *

There is a good deal of surprise that the opportunity available as a result of the Council's expansion is not being utilised to increase the number of Indians holding appointments as Secretaries to Government. At present there is only one Indian occupying this position in the whole of the Government of India's Secretariat. The expansion scheme provides for the creation of at least four new portfolios, Labour, Overseas, Information and Civil Defence. In the case of the Labour Department, the vacancy as Secretary caused by the transfer of Mr. Hydari to the Eastern Group Council was given to Mr. H. C. Prior of the Commerce Department. For the Information Department Mr. Puckle who is now Director-General becomes automatically Secretary. It was thought that at least for the Overseas and the Civil Defence portfolios, preference will be given to Indian officials, but for the latter Mr. Ibbetson has already been selected—even before the arrival of the Member in Charge,—while for the former the name of another European official is being mentioned. The number of Departments in the Government of India has been steadily increasing—particularly after the outbreak of the war and the consequent increase in the Government's work—but though there is now no lack of senior Indian I. C. S., officers with the requisite experience, the number of Indian Secretaries has fallen to one! There are no more than three Indians as Additional Secretaries—and only one as Joint Secretary. It is likely that when the Central Legislature meets, this glaring disparity, which is eloquent in itself, will be brought to the notice of the new members of the expanded Council.

* * *

Very heartening are the revenue figures for July published by the Government of India. As compared with the figure for the corresponding month of the previous year, the income has more than doubled. Customs receipts have improved by over a crore, Excise and Income Tax by half a crore each, and what is particularly noteworthy, income under "other heads" has jumped from Rs. 52 lakhs last year to nearly Rs. 3½ crores in July this year—thanks to the windfall from the Reserve Bank. The total revenue during these four months has come up to Rs. 30½ crores during these four months under the major revenue heads does not compare favourably with the Budget estimate of Rs. 105.88 crores for the whole year, but it is expected that these steadily improving revenue returns will help to convince the members of the expanded Council that there is really no case for any emergency supplementary taxation measure this year. On the expenditure side the figures show that the cost of Defence services (net) increased during the July by over Rs. 2¾ crores while civil expenditure increased by half a crore. The total expenditure charged to revenue during these four months has risen by nearly Rs. 11 crores—far from encouraging as the Budget estimate put the increase for the whole year as only Rs. 14 crores.

* * *

Excellent reports have been received from England of the progress made by the "Bevin boys" in British factories. The first batch is due to return to India early next year after completing their training in England. It is hoped that though no employment has been guaranteed to them, they will mostly be employed in ordinance and other factories in India as supervisors for specially skilled work. The selection for the third batch to England has now been completed, and as soon as shipping facilities are available, they will proceed to England. At present selection is going on for the fourth batch. The quickness and adaptability shown by the Indian workers now under training in England are reported to have greatly impressed the authorities in the Labour Ministry. The question has, however, arisen whether some of them cannot be sent to America or Australia also for receiving training owing to the difficulty in securing passages for England. It would be surprising if the Commonwealth Government of Australia, which is an active participant in the

(From Our Correspondent)

Bombay, Sept. 16.

WHILE readers of the **Statesman** can read new and more satisfying Bagdad sketches by the intrepid Miss Freya Stark, the local Anglo-Indian daily is content to make the most of its special correspondent's speculations on Arab unity. Not a very advantageous exchange, but the correspondence is interesting as showing that the federal bug has bitten the most unlikely people not only the Oxford cum Geneva-educated C. K. Streit. Syria is to be independent; it is not to be attached to Transjordan as Axis propaganda suggested. But unqualified independence is always dangerous and it is better to group all the Arab States says the neo-Federalist. There can be no caliph to serve as the visible symbol of unity; federation too may appear risky, so a customs union appears safer. Syria, Palestine, Iraq and Transjordan can be grouped into an economic federation because the population is of Arab origin and the unity of Arabia such as obtained under Turkish rule can be realised. A customs union would promote contentment and its effects on revenue will be slight. By facilitating internal trade, it will solve some of Syria's immediate problems and strengthen also the existing links with the British Empire including the connexion with the British currency. The disappearence of the threat from Iran should induce the Arab States to examine the chances of federation. Iraqi statesmen are likely to bless the scheme which was put out at the conference in March, 1939 when the Moslems of the world and Arab princes showed great interest in this question as also the Palestine question.

Not much interest has been excited by the appointment of several gentlemen here to just another committee. The local analogue to the National Defence Council is regarded as just another ornamental facade. There is no disposition to make anything out of it when the majority of Muslims frown at their petty manoeuvers. Meanwhile some Hindus are showing a friendly attitude towards Government by cheerfully endorsing an appeal for work in A.R.P. services. The appeal asked for 20,000 volunteers and the Governor made it because the passive defence of the city could not be conducted by a scanty body of volunteers. The Governor said that protection from fire was essential and said that the auxiliary fire services alone required a lot of men fit and fresh, energetic and enduring fatigue. The Hindu leaders including Dr. Jayakar and Veer Savarkar agree that whatever may be the short comings of Government it should be recognised that the city is the people's and they should help to defend it. They have asked the Hindus to take advantage of the training and discipline available to volunteers. They added in their appeal that they hope Government will endeavour to make the training really efficacious and will bring its methods into close accord with public requirements. The Hindu Community has not so far registered appropriate enthusiasm

Dyestuffs and the difficulty of getting them locally or from abroad are still the subject of discussion. When the Commerce Member visited Bombay last week a deputation went to talk the matter over. The chances of making dyes and colours in India in sufficient quantity were canvassed and the local merchants approved the idea of starting manufacture during the war period. The deputation led by Mr. Valabhdas Khatau ndicated to the Commerce Member the difficulties that might be experienced by the promoters of a local dyestuff industry at present.

Some light on shell production in Bombay is thrown by a newspaper article dealing with the progress made under the Industrial Planning Officer. The operations are carefully distributed between various workshops for though a large part of the machining work is connected with the first stage only a few workshops have hydraulic power and can proceed beyond the bottling stage. Feeder works are necessarily distinguished from major works and the finishing is all done at the central workshop where several thread millers have been put up for the sake of shell manufacture. Quick transport has helped to concentrate assembly and inspection in the central workshop and economy of both plant and time has been secured since most of the balancing plant is set up in the central workshop. Most of the new plant was made to order locally for the first time and Bombay will soon obtain locally manufactured base plates also. Arrangements for loading 4.5 inch shells direct into wagons have already been made but workshops have at command some storage space so that expansion of shell output mainly on the basis of increased output in feeder works will be made easy.

The merchants had a field day in telling the Commerce Member about their grievances. The difficulty of getting silk and artificial silk goods from Japan impelled the deputation led by Mr. B. N. Karanjai to express old complaints. Reference was made to the fact that Japanese exporters were favoured for the issue of permits for exports to India. Indian merchants in Japan had a new problem owing to the piling up of stocks now valued at Rs. 60 lakhs. They could not send on the goods to India because the necessary permits and shipping space could not be had. The Commerce Member was informed that importers in India could not get hold of goods due on old contracts and they were asked to pay damages by the Japanese Government which has asked exporters to put up prices so that Japan could take over more cotton due under old contracts, simply by raising prices of reducing the quantity of goods payable in return. The Commerce Member repeated his promise that Indian Interests in Japan would not be unprotected and the deputation was assured that the question of export control in Japan was engaging the attention of the Government of India.

Tit Bits of Industrial Technique

Help for groundnut growers

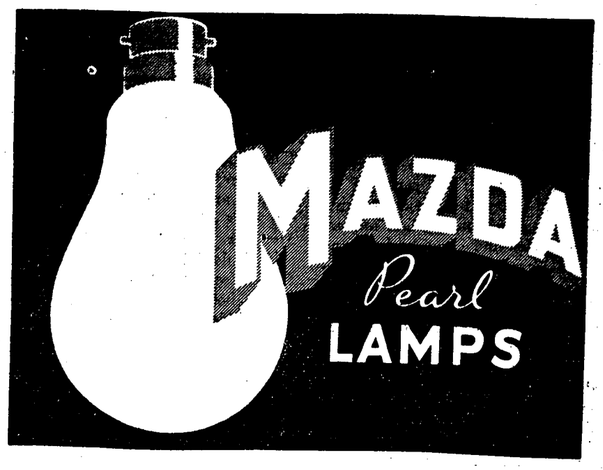
A RESOLUTION of the Commerce department states that special fund for the relief of groundnut cultivators is already in existence. The fund is to be applied for schemes of research relating to groundnut and groundnut products conducted under the supervision of the Central government and schemes to be forwarded by the governments of groundnut-growing provinces for encouraging consumption of nuts or products in their respective areas. This will be in addition to the crop restriction propaganda and extend to schemes for consumption and research schemes connected with the utilisation of groundnut. Though shippers' rebate have virtually ceased moneys are likely to be added to the fund and a special committee of respresentatives of the governments of Madras, Bombay and Hyderabad together with the India Government's representatives is to be set up. Allotments are to be made on the basis of crop in the groundnut-growing provinces and States.

Reduced area under cane

The first sugar cane forecast relating to 95% of the total area under cane in India deals with the condition as at the end of July. The total area planted under this sugar cane this year is estimated at 3,516,000 acres as against 4,215,000 acres last year. The area under cane shows a decrease of 17 per cent. Weather conditions at the time of planting were generally unfavourable, but the condition of the crop appears to be good. The area under cane shows a fall except in the Punjab, Bombay & Frontier Provinces. The probable out turn is not mentioned; India will have a smaller sugar production than in 1940-41. World production for the last year according to Willett and Gray amounted to over 29.38 million tons. The sugar production in many of the cane-producing countries recorded an increase on 1939-40. The increased output reported in Louisiana Argentina & Brazil was not exceptional. The trend of production was unfavourable in Japan and Australia as also in South Africa while the U.S.A. reported a decrease of 2% in total sugar production.

Fuel Research

In view of the meagre reserves of metallurgical coal which were estimated to last only 60 years, Mr. H. D. Nag recently deplored that even this variety of coal was being subjected to wasteful extraction and use. As India was steadily increasing her production of steel, it would be to her interest to enhance the life of metallurgical coal by preventing the present wasteful methods.



Mr. Nag emphasized the need for the establishment of an institution for fuel research. On account of the meagre oil reserves, it was imperative in the interest of the defence of India that all grades of oil should be manufactured from coal by different scientific processes. He mentioned in this connection that some useful work was being carried out regarding fuel research under the guidance of the newly formed Board of Scientific and Industrial Research, but it was far too inadequate to cover all the aspects of the problem to be of general benefit to the Government and the country.

Munitions-Making

In the sphere of civil type production, progress continues to be made in the manufacture of shells, shots, fuses, mortar bombs, anti-tank mines, and various components according to a recent press note. Heavy demands have also been placed on the trade for Bren gun parts. The first roller bearing produced in India outside of ordnance factories has recently been manufactured by a railway workshop.

Customs and Central Excise Revenue

The total gross Indian Sea Customs Revenue, including Land Customs but excluding Salt Revenue collected in British India during the month of July 1941 amounted to Rs. 4,14 lakhs as compared with Rs. 3,91 lakhs in June 1941 and Rs. 3,14 lakhs in July 1941. The total gross Central excise duties on motor spirit, kerosene, sugar, matches, etc., amounted to Rs. 97 lakhs in July 1941 as compared with Rs. 84 lakhs in June 1941 and Rs. 59 lakhs in July 1940. The grand total of gross customs and Central excise revenues realised in the four months ended July 1941, was Rs. 18,90 lakhs during the same period last year. Of this amount import duties accounted for Rs. 14,11 lakhs, export duties for Rs. 105 lakhs, and customs and miscellaneous for Rs. 19 lakhs and Central excise duties for Rs. 3,55 lakhs.

Ill-lighted factories mean workers with eye-strain and a consequent loss of efficiency. Good lighting is easily achieved by fitting MAZDA Pearl coiled-coil lamps with the wonderful non-sag filament. They give more light for the same current than ordinary lamps.

A Resume of Commodity Markets

THERE are no features of interest in the several commodity markets during the week. A generally easier tone has been noticeable all round and quotations in some places are considerably below the best levels for the week. The main reason for the downward trend in the wheat and cotton markets is the reports regarding favourable weather conditions in the growing districts.

The publication of the first two instalments of the jute final forecast has had an unfavourable effect on the market. The seeds market has been absolutely uninteresting and prices have shown a rather easy tendency in the absence of first buying. Only in the wheat and jute manufactures markets has there been a late rally.

There is considerable discussion regarding the Price Control Conference which is to be held in New Delhi this month. Pending the conclusion of the conference, it is unlikely that there will be any appreciable fluctuations in prices in the commodity markets..

Jute:

After the consistent advance in prices during the past few weeks sellers have been obliged to abandon their reserved attitude. Some pressure for selling to realise cash for the Poojah festivities and the publication of the first two instalments of the final jute crop forecast indicating a yield above current market expectations have been mainly responsible for the fall in prices. Mills have been buying in small quantities.

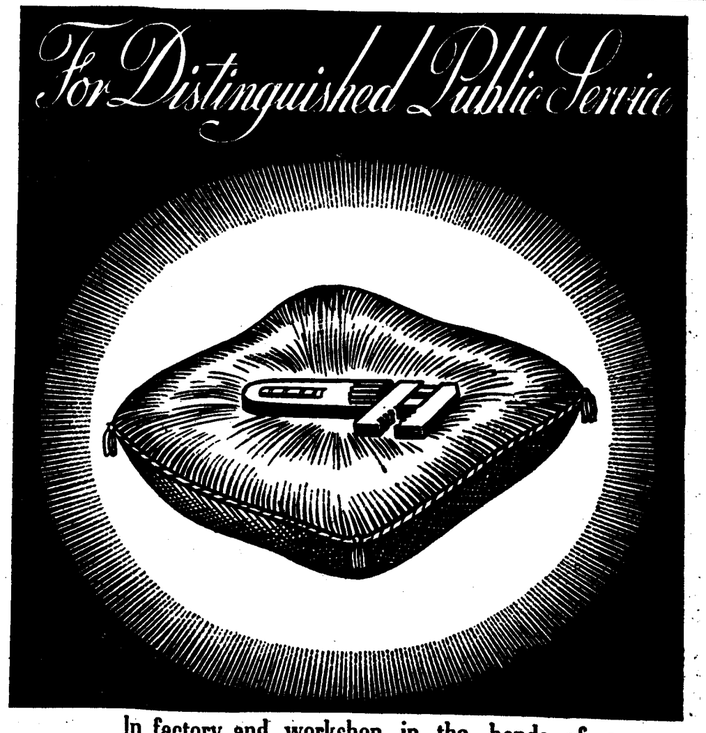
Jute Manufactures:

Nothing of importance has taken place in the jute manufactures market. The erratic behaviour of the jute market has not been helpful neither the stock and consumption figures of the United States for August. Only on Wednesday there was a firming up on near covering and reports regarding the availability of freight space. The heavy goods section has been dull and neglected throughout.

The consumption figures for the United States for the month of August should be considered rather disappointing when it was generally expected that the figures would show a seasonal increase. It is, however, satisfactory to note that while there is a decline from 64 million yards in July to 60 million yards in August there is an increase of five million yards over the corresponding month for 1940. The abrupt rise in consumption in July was perhaps due to the fears regarding the possibility of an increase in prices and the anxiety of consumers to lay in stocks in the event of interruption in exports into U.S.A. on account of difficulties in the Pacific.

The decline in stocks afloat suggest that one should not entertain extravagant hopes regarding the availability of freight.

Raw Cotton:



While mill consumption of Indian cotton is encouraging, there being a substantial increase in mill consumption in July 1941 over July 1940, with mills good buyers of staple varieties, it is believed that the problem of disposing of short staple varieties with the poor exports to the United Kingdom, and the uncertain outlook regarding exports to Japan, will prove to be very difficult this season. The carry-over from the last season is as much as 1.2 million bales. The reports regarding favourable monsoon conditions in the cotton-growing districts has naturally had a discouraging effect and there has been a widening in the difference between Oomra and Broach from Rs. 60 per candy. The only favourable factor in the situation is the possibility of a speeding up of textile production and a greater enquiry from the cloth market on account of the Poojah and Moorat festivities. The firmness of cloth prices might support cotton prices.

Piecegoods.

The Supply Member, now in Calcutta, while receiving a deputation of the Bengal Millowners Association praised the part played by Bengal mills in the war effort. He referred particularly to the necessity for increasing production to meet civilian requirements. The proposal for the appointment of a liaison officer he said would be considered.

Wheat:

The sensation created by the abrupt rise in wheat prices during the past two weeks as a result of renewed speculation regarding large-scale purchases by the Government, has served as a check to a further rise in prices. There were reports of a conference to be held in Amritsar to consider the situation. The news of beneficial rains in the Punjab and the satisfactory growing conditions for other food crops also had a restraining influence. Rumours regarding the possibility of the import duty on wheat being lifted persist; the military requirements of the Government also seem to be considerable.

In factory and workshop, in the hands of a million workmen, this humble tool plays its part. Men have learnt to depend upon it. It is as vital to the workman as to the gigantic machine he controls.

Steel—the metal of mighty strength—is always used because it means strength and reliability.

ALWAYS—EVERYWHERE—STEEL FOR STRENGTH

Jute and Jute Manufactures

(From Our Correspondent)

RATHER more interest than for some years past is being evinced in the issue of the Final Jute Forecast figures. Mainly an academic interest, be it said, to see what sort of forecast will emanate from the Government "regulation" of the crop, rather than from any expectation of an accurate figure. For there are few in the trade who will be prepared to accept any figures based on the Government "recorded" acreage without considerable reservation. It was generally conceded that the Director of Agriculture had made a better shot at the forecast last year than for a number of years before, though his estimate was still considered to be somewhat on the low side. Then along came the "recorded" acreage figure under the Jute Regulation Act, which increased the Director's figure of acreage by no less than 13¼ lakhs of acres. We were asked to believe that the Director had underestimated his area by over 30 per cent. and by over 2000 square miles! We have often called in question the accuracy of the Director's figures in the past, but we never accused him of being so far astray as his own Government tried to make him out. A matter of 2000 square miles under jute is not easily overlooked even in a place the size of Bengal. The "recorded" figure was simply discredited by the trade. Ultimately appeared the Final Review of the 1940 Jute Crop, from which it emerged that this enormously increased area only produced an additional 6¼ lakhs of bales, or at the rate of half a bale per acre. This merely served to confirm the generally held opinion that the "recorded" area was less accurate than the Director's area and that any estimates based on that former figure, however modified under the Regulation Act, could be nothing but misleading. It is these estimates which are now being issued and which are therefore more or less discredited beforehand. The returns issued so far only represent less than one third of the total, so it is not safe to draw any sort of conclusion from them, though the Bazar seems to find in them a bearish indication and have sharply dropped Fatka as a result. Over the districts reported, the outturn in bales is only 2.7 per acre and we have not yet got the figures from Backerganj and Noakhali which suffered the worst of the damage. The only Eastern District issued so far is Faridpur with a return of 2.84 bales per acre. Another important district, Rangpur, is only credited with 2.5 bales per acre. It may be said that, judging by the jute handled already from both these districts, the outturn should be better than the figures recorded. It is to be presumed that the Fatka fraternity have been banking on a crop estimate of 50 lakhs of bales or under, whereas an outturn as low as 2¾ bales per acre on the licensed acreage would yield over 60 lakhs of bales. Hence the depression. But the Director may still have some surprises up his sleeve. At the same time it should be reiterated that there is nothing in the situation to suggest an acute shortage of jute such as to justify the unduly high level of prices demanded in the mofussil markets. The only encouraging feature is that imports into upcountry markets show an appreciable increase in the past week while quality also shows a tendency to improve.

It is a measure of the clumsiness and cumbersomeness of the Bengal Sales Tax Act that, though raw jute, as a raw material for manufacturing purposes, is exempt from taxation, it is incumbent on everyone dealing in that commodity, even as brokers only, to register under the Act, though they will never be called upon to pay a pice of tax. It would surely have been simpler in the first instance to place raw jute on the schedule of exempted commodities and so save all the trouble, particularly as raw jute was simultaneously being called upon to bear a special tax under a specific act. Incidentally, under the Raw Jute Taxation Act, Mills seem to be under the impression that the simplest method of collecting the tax will be to deduct two annas per maund from all sellers' invoices. Apart from the fact that this would imply collecting the tax on the invoice weight and not on the weight actually delivered, it would look suspiciously like passing the onus of the tax back through the seller to the cultivator, which would have an unfortunate appearance, though it would not necessarily imply that the incidence of the tax would actually finally fall on the producer. But a more diplomatic method of "passing the buck" might be conceived.

The Export Jute market has been rather inactive and very few transactions have been reported. About the only notable feature has been the tendency for the Sattas to contract. This was first noticeable in Daisee and has been followed by a similar contraction in Firsts. Neither have Mills been operating to any extent in baled jute beyond a sale recorded at Rs. 74-8 for New Crop Firsts at the end of last week. Over the week-end the Futures quotation firmed up from Rs. 76-12 to Rs. 80-12. Since then the tendency has been easier, accelerated by the bearish view taken of the Forecast figures so far issued. The quotation dropped as low as Rs. 73-8 closing slightly better at Rs. 74-12. As the market has this week switched from September settlement to December, the actual drop is greater than appears by nine annas.

A quieter Goods market combined with the high range of prices demanded for loose jute, has acted as a definite check on mill purchasing and comparatively little has been recorded during the week. At the opening some business was done in Indian District Tossa Middles at Rs. 16-. Later European business was reported at Rs. 18. Rs. 16 and Rs. 13 for Tops, Middle and Bottoms, but at the close these rates could be discounted by eight annas while Supervised jute is reported done at Rs. 15-4 and Rs. 12-4 for Mids and Bots. Indian Sellers have also reduced their prices towards the close in anxiety to get on to business but without result.

(Continued from page 545)

trade and the democratic pretensions of capitalists and freetraders who really care little for the masses. No government can organise effort or develop resources, if it finds itself fettered by outside agencies, whether in the shape of doctrines or of international conventions and organisations. The necessity for economic nationalism, then, arises from the insistence of awakened masses on employment and the need of every government for a free hand for the purpose of intensive economic development.

No international authority, however expert and powerful, can serve as well as a national government which has to satisfy its electorate. Changes in human society and in natural conditions alike argue for the change to economic nationalism. Nothing that can happen in the course of this war will change these facts. And it is against this background that a world economic policy will have to be formulated. One wonders what sort of world economic policy will be possible when, as all my argument shows, there is a case only for economic nationalism for intensive economic development of each country without reference to conditions in others. Such a question can arise only from an exaggeration of the changes that have tended to displace internationalism. The world is not an economic unit. Nor is each country a self-sufficient unit. It is not as if the whole world is one vast agricultural tract which the nations can parcel out among themselves and cultivate to the best of their ability. There is still a degree of old interdependence which sets up problems of its own. Into these I shall go in the next issue.

'EAVESDROPPER'.

"WE ARE fighting by ourselves alone, but we are not fighting for ourselves alone.

It is only in times like these that nations can preserve their freedom and thus only can they uphold the cause entrusted to their care. But all depends now upon the whole life and strength of the British race in every part of the world, and all our associated peoples and all our well-wishers in every land doing their utmost, night and day, giving all, daring all, enduring all to the utmost to the end.

This is no war of chieftains, of princes, of dynastics or national ambitions. It is a war of people and of causes."

MR. WINSTON CHURCHILL.

JUTE

Calcutta, September 17.

The jute market has been rather irregular during the past week and quotations are appreciably lower on balance. With mills buying in small quantities and a complete lack of export demand, speculative activity has been on a considerably smaller scale. The publication of the first instalment of the forecast figures had a rather bearish effect on the market. Quotations are now around the lowest levels for the week.

In the loose jute section, mills have been buying only in small quantities. With the issue of the final forecast figures, sellers have been willing to discount prices. Business was done yesterday in European Packing at Rs. 18, Rs. 16 and Rs. 13 per maund for Tops, Middles and Bottoms respectively. In mid-week, Indian Jat Middles and Bottoms were done at Rs. 15 and Rs. 12 per maund.

In the pucca bales section shippers have been inactive. Mills are reported to have bought in small quantities. Firsts 2-3, new crop, were dealt in earlier in the week at Rs. 74-8 per bale. Old crop, Outport Tossa 2-3 sold at Rs. 67 per bale.

In the futures market rather irregular conditions have been in evidence during the past week. Earlier in the week there was some recovery and the quotation was as high as Rs. 80-12 on Saturday. There has since been a decline in the rate to Rs. 74-4. The quotation was fluctuating around Rs. 75-12 early in to-day's session. In the afternoon there has been a decline in the quotation to Rs. 74-14.

JUTE SEASON 1941-1942
MONTHLY STATEMENT
(000's omitted)

for the two months ending 31st August 1941

	July		August	
	1941	1940	1939	1938

Rangpur	1,94,300	1,88,680	4,71,500
Faridpur	1,30,000	1,28,040	3,64,515
Tripura State	17,000*	17,000*	34,000

* Estimated.

JUTE MANUFACTURES

Calcutta, September 17.

The jute manufactures market was absolutely uninteresting for the most part of the week. Overseas buyers were not interested in the market. During the last two days, however, there has been a slight improvement in the tone on reports that there has been a greater amount of shipping. 9 Porters Ready are quoting Rs. 22-1, October Rs. 21-8, November-December Rs. 19-12 and January-March Rs. 19-2. 11 Porters Ready are Rs. 27-14, October Rs. 27, November-December Rs. 25-8 and January-March Rs. 23-12.

The heavy goods section has been rather quiet with not much of business passing. B. Twills for September shipment sold on the basis of Rs. 42-10, Cornsacks for the same position Rs. 41, Liverpool Twills Rs. 50-10 and A. Twills Rs. 52-8.

The stock and consumption figures for the month of August are not quite encouraging. There has been a decline in consumption to 60 million yards from 64 the previous month. There is an increase in stocks spot while there is an appreciable decline in stocks afloat.

COTTON

Calcutta, September 17.

The Bombay raw cotton market has been rather quiet during the last week. The reports regarding favourable monsoon conditions in the districts and commission houses selling have been mainly responsible for the decline in prices. Export to the United Kingdom are on a very small scale and it is reported that the United States have taken some interest in Bengals. Mills are buying staple varieties only in small quantities. Broach April-May are quoting Rs. 269-12, Oomra December-January Rs. 208 and Bengal December-January Rs. 162. The quotations at the time of last writing were Rs. 276-12, Rs. 218-4, and Rs. 165 respectively.

A further rise was recorded in American cotton prices in the early part of the period under review on general and trade buying. During the last two days there has been some nervous liquidation with the warning by the Administration that inflationary rise in prices should be checked. In New York, July are quoting 17.60 cents and December 17.8 against 17.97 cents and 18.19 cents last week.

PIECEGOODS

Calcutta, September 17.

The piecegoods market continues firm in spite of the erratic tone of the piecegoods market. The decisions of the Textile Supply Conference have had a bullish effect on the market. It is expected that the demand for the Poojah season will be good and the requirements for 'Moorat' also are expected to be satisfactory. Mills have reported some business for forward positions. In the Japanese goods section, there has not been much interest and business has been confined mainly to ready goods. In the Lancashire goods section, business, as usual, has been of a retail character.

GOLD

Calcutta, September 17.

The Bombay gold market has beeen absolutely uninteresting in the absence of any business. Quotations are lower and are at the same peak positions at Rs. 42-2. Although freight is available, arbitrageurs have not been able to do business as quotations are around export parity. There are also fears that insurance rates may be increased in view of the recent attacks on American shipping.

The London price for gold has remained unchanged at 168s.

SILVER

Calcutta, September 17.

The silver market, on the other hand, has been more active. The reports regarding the resumption of exports from this country to the United Kingdom have been mainly responsible for the firmness of silver prices. In mid-week there were rumours that the Reserve Bank had suspended sales of silver. Indian mint ready are now suoting Rs. 63-0-3, first settlement Rs. 63-0-6, and second settlement Rs. 63-1. The quotations at the time of last writing were Rs. 62-15-6. Rs. 63-0-3 and Rs. 63-1 respectively. It will be noted that the quotations for ready and first settlement only are higher.

WHEAT

Calcutta, September 17.

The wheat market continued active in the first three days of the period under review. Increased offerings from Punjab Commission houses were offset by export buying but the reports of a price control conference in Amritsar and the beneficial rains in the wheat growing districts have been responsible for an appreciable decline in prices towards the close. In the Karachi market, Choice White Ready were quoting Rs. 39-9, September Rs. 39-9, and November Rs. 40-2-6. The quotations at the end of last week were Rs. 42, Rs. 42 and Rs. 42-9-6 respectively.

In the Calcutta market similar conditions have been noticeable. The decline is, however, pronounced in the quotation for May position. Cawnpore for September are quoting Rs. 5-9 and May Rs. 5-3 against Rs. 5-10 and Rs. 5-7 respectively last week.

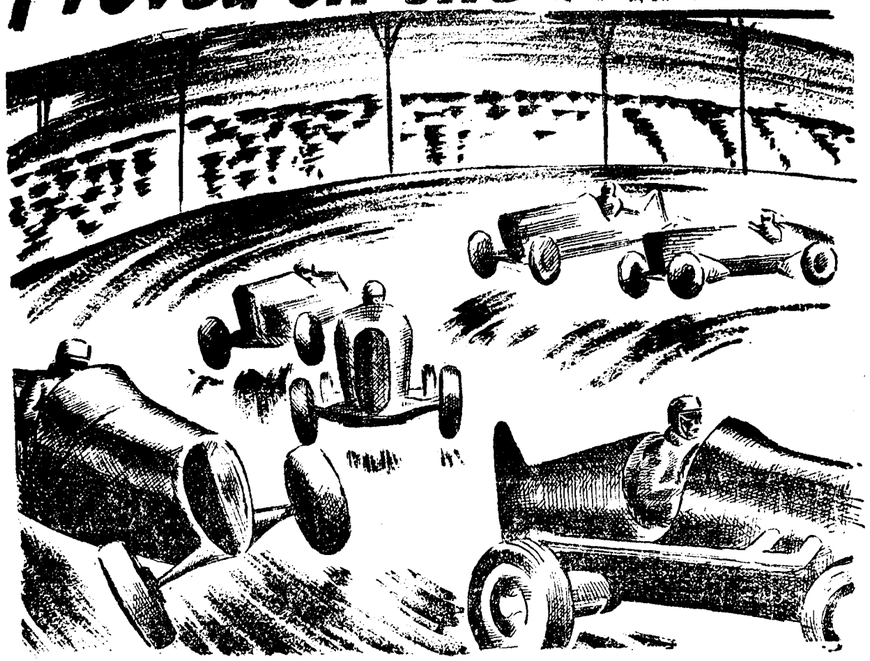
(Continued from page 546)

Eastern Group Council, were to show any unwillingness to receive Indian workers and give them advanced training in their factories.

It is now definitely known that the long-deferred meeting of the National Defence Council will meet in Simla in the first week of October. The delay has been partly due to the absence from India of the Chancellor of the Princes Chamber and the time taken in selecting the representatives of the Indian States. It was partly also due to the resignation of the Muslim League Premiers which upset official plans as originally contemplated. According to Simla reports, the Viceroy does not propose to fill up these vacancies for the present. The first meeting of the Council will continue for two days at least. Both the Viceroy and the Commander-in-Chief will address the member on the war situation in detail, after which there will be a general discussion for intensifying the war effort and co-ordinating the activities of the Provincial War Boards. As this is the first time in India when the Princes and representatives of British India will be sitting together in a common conference, it is expected to pave the way for future conferences for dealing with political and other questions also. After the meeting of the Council the Viceroy leaves Simla on tour before returning to New Delhi.

HILL-BIRD.

INDIAN TEA LICENSING COMMITTEE



NOTICE

A Final Export Quota of 3·35% making a total of 68·35% of the crop basis for the year 1941-42 is now being issued.

Individual Tea Estates will be advised as to the amount of their final export quota as promptly as possible.

Stock Markets to-day and to-morrow

PAPER SHARES TO THE FORE

Under normal circumstances one would have expected that the Calcutta Stock Exchange would turn easier with the near approach of the long Poojah holidays. However, with the continued strength of the Bombay market operators in the Calcutta market have been led to take a more optimistic view. Thus, Indian Irons and Steel Corporations are as high as Rs. 35-14 and Rs. 21-4 in to-day's session. There is nothing of importance to note in other sections but the undertone is steady throughout with transactions continually attesting the extension of interest.

In the Bombay market, mill shares improved earlier in the week on satisfaction with the decisions of the Textile Supply Conference last week. Tata Steel deferreds and ordinaries have been in request on all days with very few sellers in evidence.

The general outlook is considered satisfactory and with the possibility of any immediate complication in the Far Eastern situation removed alongside of the stiff resistance of the Russians in the Eastern Front share prices should improve further.

* * *

The balance sheet of the *Ahmedabad Advance Mills, Limited* for the year ended June, 1941, shows almost a hundred per cent. increase in earnings over those for the previous accounting period. The improvement in earnings is noteworthy as in only eight months of the period under mention active trading conditions were witnessed and there was some setback in production on account of the Bombay and Ahmedabad riots this year. The increase in the distribution on the ordinary shares, however, is not very much higher as it has been necessary to provide a larger amount for taxation and depreciation. The net profit, before providing for depreciation, is Rs. 4,26,817 against Rs. 2,18,099 for 1939-40. The sum set aside to depreciation is Rs. 50,000 against Rs. 1,00,000 while the provision for taxation is Rs. 10,000 against Rs. 1,20,000. The allocation to Investment Reserve Account is the same at Rs. 25,000. There is an allocation of Rs. 25,000 in addition to General Reserve. The final dividend of Rs. 6-8 per share, with the interim dividend of Rs. 3-8 per share already paid, makes Rs. 10 per share for the whole year against Rs. 8 per share for 1939-40.

The return on the shares at present quoting around Rs. 341 is hardly generous, but in view of the prospects for the current year allied to the soundness and standing of the company they are not overvalued.

There has been good demand for paper shares during the past few days and a good rise in prices has been recorded. The demand for first-class shares is still unsatisfied. The shortage in certain kinds of paper material and the recent sharp increase in prices for the same have led many to expect that there will be a substantial increase in dividend distributions. Thus, Titaghur 'A' and 'B' shares are now quoting at the highest level recorded for some time. Shares of the mills started in recent years also are in request.

The results of the *Bengal Paper Mill Company Limited* for the half-year ended June, 1941, fully justify the prevailing optimism of investors. Even without any increase in production it has been possible to report an increase in earnings by as much as 30 per cent. The improvement in earnings would have been even more pronounced but for the higher production costs entailed by the war among other things. The net profit, before providing for taxation and depreciation, is Rs. 11,42,205 against Rs. 8,55,306 for the previous half-year. The provision for depreciation is Rs. 1,92,629 against Rs. 1,88,913 on the former occasion. The provision for taxation is considerably higher at Rs. 5,68,200 against Rs. 3,08,000. The appropriation to Reserve against raw materials and stores is unchanged at Rs. 1 lakh while the transfer to General Reserve is Rs. 63,500 (Rs. 54,845) and to Reserve for Indian Workers' Pensions and Gratuities Rs. 28,000 (Rs. 10,000). The ordinary dividends have been maintained at 12½ per cent. The bonus recommended is higher at 6 per cent. against 4 per cent. An extract from the report will not be out of place. 'The extension to the Pulp-Preparing Plant is now almost complete and will be functioning within the next two months. This valuable addition will have the effect of considerably increasing the consumption of indigenous raw materials.' The Company's prospects may be taken as assured and the balance sheet reflects a very strong position indeed.

At the present quotation around Rs. 140 the return is about 6.6 per cent. tax-free. Even after the recent rapid rise in the quotation for Titaghur Paper A and B shares the return is 6.7 per cent. taxfree. As it is confidently expected that the dividend for the current half-year will be higher, it is needless to emphasise that there is scope for yet further rise in prices.

* * *

On the basis of the earnings of the Bengal Paper Mill Company, Limited the net profit of the Titaghur Paper Company, Limited for the six months ending September, 1941 may well be about Rs. 50 lakhs, an increase of Rs. 12 lakhs over the figure for the previous half-year. There was an increase in the bonus distribution on "A" and "B" shares on the last occasion by two annas, the total distribution being twelve annas per share. It will not be a surprise if the dividend for the current half-year proves to be as much as Rs. 1 per share. This calculation would appear to underlie the rapid improvement in Titaghur shares, improvement which has in turn contributed to a rise in Orient, Star and other shares during the past few days.

* * *

The accounts of the *United Provinces Electric Supply Company, Limited* for the half-year ended March, 1941 should be considered rather satisfactory as earnings have been maintained at the level of the previous half-year and there is also a considerable improvement over the figure for the corresponding period of 1939-40. It is noteworthy that there has been a decline in working expenses.

The net profit, before providing for taxation, is Rs. 6,21,692 against Rs. 6,21,150. Allocations to funds including depreciation is Rs. 3,75,000 against Rs. 3,65,000. Provision for taxation is unchanged at Rs. 1.25 lakhs. The dividend has been maintained at 4 per cent.

* * *

As a result of the higher rate of industrial activity and increased railway traffic there has been a large increase in the sales of energy by the Tata Hydro-electric group of companies. Earnings also are higher in the case of the three companies but it has not been possible to effect any increase in the distribution to ordinary shareholders as the provision for taxation is considerably higher. While the ordinary dividends have been maintained at the former levels by the Andhra Valley and Tata Hydro-Electric Power Supply companies the increase in the distribution by the Tata Power Company, Limited to 7 per cent from 6½ per cent. has been possible only by drawing on the amount brought in from the previous accounts. It must be added that the three shares have been strong after the reports were published.

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, Sept.18.

The continued strength of the Bombay market and the encouraging news regarding the war situation have been mainly responsible for the improved tone of the several sections on the Calcutta Stock Exchange during the past week. There has been an increase in the volume of business and greater confidence is expressed regarding the future of stock exchange values. The important features of the week are the strength of Steel Corporations and Timber shares. There has been good buying from Bombay. In to-day's session not much of business is passing but the undertone is steady. Operators are reserved in view of the near approach of the holidays.

The giltedged securities section has continued steady with business on a very restricted scale. There is practically no change in rates, in spite of the further rise in the Treasury Bills rate. 3½ per cent. Paper is unchanged at Rs. 96 while 3 per cent. Paper was quoted at Rs. 82-8. Among terminable loans 3 per cent. 1963-65 were Rs. 95-3, 3 per cent. Defence Bonds Rs. 102-1, 3½ per cent. 1947-50 Rs. 103-8, 4 per cent. 1960-70 Rs. 110-8 and 4½ per cent. 1955-60 Rs. 114. 5 per cent. 1945-55 were Rs. 111-6 and 3 per cent Defence Bonds 1949-52 Rs. 100. Money conditions continue cheap even though there has been a rise in the treasury bills rate to nine annas and eight pies per cent. per annum from eight annas and four pies per cent. per annum last week. Business in provincial loans is difficult on account of the scarcity of sellers.

Bank shares are very firm with *Imperial Bank* fully paids quoting Rs. 1,610-8 and contributories Rs. 49-8. *Central Bank* were Rs. 49-8 and *Reserve Bank* Rs. 111.

Business is impossible in public bodies' debentures on account of the lack of sellers. 4 per cent. 1942 *Calcutta Port Trust* debentures were done at Rs. 101. Among industrial debentures, 5½ per cent. *Rohtas Industries* debentures changed hands at Rs. 104-8; 5 per cent. *Sijua Jherriah* debentures at Rs. 101 and 5 per cent. *India General Navigation* debentures at Rs. 105.

Business in first class preference shares also has been restricted. Among first class jute mills preference shares, *Birla* were higher at Rs. 139, *Anglo-India* at Rs. 178 and *Lansdowne* at Rs. 145. There has been good enquiry for *Hastings* which have been marked higher at Rs. 151. *Chitavalsah* were Rs. 151 and *Nellimarla* Rs. 121. Among other sections, *New Victoria* were dealt in at Rs. 6-15 and *Kesoram* at Rs. 144. *Alkali and Chemical* were Rs. 125-8, *Aluminum Corporation* Rs. 128 and *Carew & Co.* Rs. 138. *Dunlop* Second preferences were Rs. 122 and *Bowreah* 'B' preferences Rs. 112.

Cotton shares are not very much higher but the undertone in this section is very steady. *Bengal-Nagpur* were Rs. 16-12. *Cawnpore Textiles* Rs. 9-2, *Dunbar* Rs. 250, *Elgin* Rs. 25-9 and *New Victoria* Rs. 4-7.

Coal shares have not been very much in demand but there has been some selective buying in this section. *Bengal Coal* were Rs. 387 and *Amalgamated* Rs. 27-1. *Central Kurkend* have been in good request and are one point higher at Rs. 16-2. *Burrakur* were Rs. 14-12, *Equitable* Rs. 38-12, *Dhemo Main* Rs. 13-7, *Raneegunge* Rs. 29-14, *New Beerbhoom* Rs. 18 and *West Jamuria* Rs. 33-2. *Union* changed hands at the higher level of Rs. 33-12. Among the speculative counters, *Bhalgora* were Rs. 6, *Ghusick and Muslia* Rs. 4-14, *Jainty Central* Rs. 2-3 and *Talcher* Rs. 1-11.

Jute shares have been marked higher in places. *Anglo-India* were Rs. 374, *Birla* Rs. 30-8, *Champdany* Rs. 182, *Clive* Rs. 28-12, *Gourepore* Rs. 698-8, *Kamarhatty* Rs. 520, *Megna* Rs. 52-8, *National* Rs. 24-14 *Nellimarla* Rs. 12-12, *Nuddea* Rs. 70 and *Reliance* Rs. 60.

In the Engineering section both *Indian Iron and Steel corporation* are higher at Rs. 35-12 and Rs. 21-2 respectively. There has been greater activity in these two speculative counters. *Braithwaite & Co.* were Rr. 8-14, *Britannia Building and Iron* Rs. 11-14, *Burn & Co.* Rs. 438, *Hukumchand Electric Steel* Rs. 14-14, *Indian Steel and Wire Products* ordinaries Rs. 60-8, and *Kumardhubi Engineering* Rs. 5-12.

Sugar shares have been firmer and are keenly in favour in to-day's session. *Buland* and *Raza* are nearly two points higher at Rs. 21-10. *Champarun* were Rs. 17-8, *Carew & Co.* Rs. 13-6 and *South Behar* Rs. 16-8.

Tea shares have been steady with *Bishnauth* at Rs. 28, *Central Cachar* at Rs. 73, *Hattikhira* at Rs. 21-9, *New Chumta* Rs. 43-4, *Rungamattee* Rs. 300 and *Tirrihannah* Rs. 4-10.

In the miscellaneous section, *Burma Corporation* and *Steel Corporation* are higher at Rs. 4-1 and Rs. 2-5 respectively. *Aluminum Corporation of India* were largely dealt in at Rs. 14-8 while *Bararee Coke* were unchanged at Rs. 27-14 and *B. I. Corporation* at Rs. 4-14. *Indian Cable* were Rs. 27-12, *Indian Wood Products* Rs. 29-6 and *Dunlop Rubber* Rs. 42. *Publicity Society* are further higher higher at Rs. 10-2 on reports of a substantially higher dividend for the last accounting period. Paper shares have been firm though *Titaghur Paper* are not very much higher at Rs. 22-6. *Bengal Paper* were done upto Rs. 140 on the publication of the balance-sheet for the half-year ended June, 1941. *India Paper Pulp* were Rs. 165 while among the shares of newly started companies, *Orient Paper* were Rs. 16, *Mysore Paper* Rs. 18, *Shree Gopal Paper* Rs. 15-8 and *Star Paper* Rs. 14. Timber shares have been in greater request with *Borooah Timber* at Rs. 19. *Assam Saws* were Rs. 4-9.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, Sept. 17.

Money: The rate for interbank call money remained nominal at ¼ per cent.

Securities: The securities market continued to be featureless while prices have been maintained at the previous week's levels. 3½ per cent. Paper was done at Rs. 96. The 1948-52 loan changed hands at Rs. 97-12; 1951-54 at Rs. 99-13; 1963-65 at Rs. 95; 1947-50 at Rs. 103-4; 1960-70 at Rs. 110-8; 1955-60 at Rs. 114; 1945-55 at Rs. 111-6 and 3 per cent. *Defence Bonds* 1946 at Rs. 102.

Shares: Favourable developments in the war situation, the belief that Japan is not likely to enter the conflict and the optimism engendered by Mr. Roosevelt's speech were mainly responsible for the spectacular rise in prices witnessed during the week. Buyers dominated the market with the result that the tone was jubilant throughout the week. At the higher levels there was some profit-taking which was well absorbed. Textiles and Steels were greatly in favour among the operators and miscellaneous scrips, too, were in continued demand.

Textiles: Cotton mill shares presented a cheerful picture. After a steady opening, prices suffered a slight setback on scattered selling, but rallied at the close. *Bombay Dyeing* have again spurted to Rs. 1,300, closing slightly easier at Rs. 1,290 owing to profit-taking. *Century* gained about 10 points to close at Rs. 537. *Svadeshi* met with some speculative support and closed at Rs. 404. *Central India* were done at Rs. 397-8; *Colaba* at Rs. 222; *Gokak* at Rs. 262; *Kohinoor* at Rs. 525 and *Simplex* at Rs. 157-4. In the cash list, *Ahmedabad Advance* were higher at Rs. 343-12; *Sholapoor* at Rs. 4,000 and *Vishnu* at Rs. 1,360.

The holding of the Textile Supplies Conference in Bombay has given a special fillip to textile shares. The agreement arrived at by the Conference, regarding production and supply by mills in the country, envisages the transfer of the Textile section of the Department of Supply from Delhi to Bombay, the appointment of an Advisory Committee representing the mill-owners to advise Government on textile supply problems and fixing the prices for war orders.

Hydro-electrics:—There was hectic activity in this section, particularly in *Tata Power* which were done at Rs. 1,845. *Andhra Valley* were also higher at Rs. 1,780, while *Tata Hydro* showed a slight improvement, closing at Rs. 194.

Steels: Steel shares were much favoured and were in continued demand following the improvement in the general sentiment. *Tata* deferreds have touched a new high level of Rs. 2,177-8, showing a rise of about Rs. 70 over the last week. The ordinaries improved from Rs. 385 to Rs. 411-8. The issue of a

notice concerning the proposed change in the articles of association has helped evidently.

Banks: A noteworthy feature of the week was the keen demand for Bank shares, *Central Bank* being done at Rs. 50-4; *Imperial Bank* fully paids at Rs. 1,620; the contributories at Rs. 400; *Band of India* at Rs. 148 and *Reserve Bank* at Rs. 113-8.

Miscellaneous: *Bombay-Burma Trading* met with good support and were marked up to Rs 562-8. *Shivrajpur Syndicate* were done slightly lower at Rs. 41-8. *Belapur Sugar* were, however, done higher at Rs. 254; *Scindia Steam* at Rs. 26-11. *Premier Construction* changed hands at Rs. 123; *India Iron* at Rs. 35-10 and *Associated Cement* at Rs. 156-12. *New India Assurance* touched a high of Rs. 53, closing a shade easier at Rs. 51-12. *Tata Chemicals* were better at Rs. 15-2. The Chairman of this Company, at the annual general meeting, announced that the company is going to issue Rs. 35 lakhs 4 per cent. 10 year debentures, convertible into ordinary shares, to the existing shareholders for meeting further capital expenditure.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, Sept. 17.

The general tone of the local market continues to be healthy and a fair volume of business was put through. An improved demand was noticeable for Planting issues. Sugars were an active market in the wake of the improvement reported from Calcutta.

Securities: Giltedged securities have been steady with 3½ per cent. Paper quoting at Rs. 96. 3 per cent. 1951-54 came to business at Rs. 99-15 and 3 per cent. 1963-65 at Rs. 95-1. Business in *Mysore Loans* was not possible in the absence of sellers, 5 per cent. 1955 changing hands at Rs. 127-8. *Madras Provincial Loans* were in good request, 3 per cent. 1952 being done at Rs. 99-6.

Mills: Prices were slightly higher during the week on improved buying. *Buckingham and Carnatic* were done at Rs. 279; *Cambodia* at Rs. 10-10 and *Madura* at Rs. 44-8. Among Bombay shares, E. D. Sassoon deferreds came in for business at Rs. 2-2-6; *Kohinoor* at Rs. 501-9 Oct. and *Century* at Rs. 521-8 Oct.

Utilities: There was persistent enquiry for *South Madras Electric*, being done at Rs. 14-10. *Cochin State Power* were steady at Rs. 8-12. *Guntur* Power Second preferences were transacted at Rs. 132-8 c.d.

Plantations: This was an active counter throughout the week. Among Rubber shares, *Cochin Malabar* continued to meet with good demand at Rs. 8-12; *Coorg* at Rs. 32-12; *Midland* at Rs. 7-12 and *Kalpetta* at Rs. 24-4 c.d. *Nilambur* had buyers at Rs. 11-4 x.d. and *Be Be* at Rs. 7-10 c.d. Tea shares met with good buying, *Chembra Peak* being done at Rs. 5-8 c.d.; *Ouchterlony Valley* at Rs. 3-1; *Fringford* at Rs. 8-10 c.d. and *Mlamallay* at Rs. 25-12.

Sugars: *Mysore Sugar* were taken up at Rs. 57; *Deccan Sugar* small shares at Rs. 55 and *United Breweries* at Rs. 94-8 x.d.

Banks: *Indian Overseas Bank* met with good buying, changing hands at Rs. 112-8 and *Indian Bank* big shares at Rs. 137-8. *Reserve Bank* were dull at Rs. 109.

Miscellaneous: *Mysore Chemicals and Fertilisers* continued to be steady at Rs. 18-8, while *Mysore Chemicals and Manufactures* were done at Rs. 15-12 c.d. *Mysore Paper*, after opening at Rs. 18, closed slightly better at Rs. 18-4. *Indian Steel Rolling Mills* preferences met with some selling pressure at Rs. 12-4. *Brunton Engineering* were done at Rs. 10-12 c.d. and *Burma Corporation* at Rs. 4-11.

LONDON STOCK EXCHANGE

The London Stock Exchange has been quietly steady and there are no important changes in prices to be recorded. Giltedged securities are slightly lower on balance. Among British funds, 2½ per cent, Consols were 82, 3½ per cent. Conversion 105¾, 3½ per cent. War Loan 106¼ and 3 per cent. War Loan 100⅜. 3½ per cent. Sterling Paper was quoted at 99.

Among other sections, Tea issues have been steady while Rubber issues have been marked higher with the strength of the commodity markets. Minings have been better on Cape support while Home Rails are easier. Oils were irregular but towards the close *Anglo-Iranian* have recovered to 42s. 6d.

NEW YORK STOCK EXCHANGE

Wall Street has been rather dull and idle and there are no important change in quotations to be recorded.

New Savan:—(11th) 11-12, 11-14, 12; (12th) 11-12, 12, 11-14; (15th) 11-12, 12, 11-10, 11-11; 16th) 12.
Punjab Sugar:—(11th) 202-8.
Purtabpore:—(12th) 10-6, 10-10, 10-5, 10-8, 10-12 (10-8 s.l.)
Purtabpore (Pref.):—(16th) 19.
Ramnugger Cane & Sugar:—(11th) 9-13, 10-1, 9-12, 10; (12th) 10-2; (15th) 10-1.
Raza:—(2th) 20-10, 20-14, 21, 21-4, 21-8.
Samastipore:—(12th) 10; (15th) 9-14, 10; (16th) 9-14, 10, 10-4.
South Behar:—(11th) 15-12; (13th) 16 C.T.

MININGS :—

Burma Corporation:—(11th) 4-9, 4-11, 4-8, 4-10, 4-9; (12th) 4-9, 4-8, 4-10, 4-12, 4-9; (13th) 4-9, 4-12, 4-10; (15th) 4-11, 4-13, 4-14, 4-11; (16th) 4-11, 4-13, 4-14, 4-11.
Consolidated Tin:—(11th) 2-8; (12th) 2-8, 2-7, 2-9.
Indian Copper:—(11th) 2-3, 2-5; (12th) 2-3, 2-5, 2-4, 2-6; (13th) 2-3; (14th) 2-3, 2-5, 2-3; (16th) 2-3, 2-4, 2-6, 2-4.
Rhodesia Copper:—(12th) As. 15; (13th) As. 15; (15th) As. 15; (16th) As. 13, 12.

CHEMICALS :

Alkali & Chemical:—(13th) 19-14; (15th) 19-12, 20, 19-14, 20-2 (19-12, 20, 20-4 sls.) (16th) 19-12, 20.
Alkali & Chemical (Pref.):—(12th) 124, 125; (15th) 125-8 s.l.; (16th) 124-8, 125-8.
Bengal Aerating Gas:—(11th) 74, s.l.; (12th) 74, 75; (13th) 73, 74 s.ls. (15th) 74, 75; (16th) 75, 75-8.
Bengal Chemical (Pref):—(11th) 18-6 s.l.
Frank Ross:—(12th) 6-14.

ELECTRICALS AND TELEPHONES :—

Bareilly:—(16th) 12-8, 12-12.
Benares:—(12th) 15, 15-4; (16th) 15-4, 15-8.
Bhagalpore:—(15th) 11, 11-10.
Lahore Electric 'A':—(13th) 326, 328.
Lahore Electric 'B':—(11th) 30-10, 30-14; (12th) 31-2, 31-6; (13th) 31-12, 32; (15th) 32-4, 32-8, 32-12.
Cuttack:—(12th) 11-8, 11-10, 12.
Patna:—(16th) 18.
Rawalpindi:—(12th) 27 c.d.
Upper Ganges:—(16th) 12, 12-4.

INSURANCE:

Concord of India:—(15th) 10, 10-4, 10-2 pren.
Ruby General Insurance:—(11th) 9-8 s.l. 9; (15th) 9-4, 9-8.
National Indian Life:—(16th) 1,000.

OILS:—

British Burma Petroleum:—(11th) 3-12; (12th) 3-10; (16th) 3-9.
Indo-Burma Petroleum:—(16th) 99 s.o.l.
Indo-Burma Petroleum (Pref.):—(16th) 120-8.
Tide Water Oil:—(16th) 15-14.

SAW MILLS—

Assam Saws:—(11th) 4-1, 4-3, 4, 4-2, 4-3; (12th) 4, 4-1, 4-3, 4-4; (13th) 4-1, 4-2, 4-5; (15th) 4-2, 4-4, 4-3, 4-5, 4-6; (16th) 4-3, 3-5, 4-7, 4-9, 4-4, 4-6, 4-8, 4-10.
Bengal Timber:—(11th) 19; (16th) 18-4, 18-6, 18-10, 18-8, 18-12, 19 (18-4 o.l.)
Borooah Timber:—(12th) 18-4.

SHIPPINGS:

Bengal Assam Steamship:—(11th) 262-8; (12th) 261-8.
Calcutta Landing & Shipping:—(11th) 15 (15 s.l.)
India General Navigation:—(12th) 84-8, 85 s.ls. 86-8, 87-8; (15th) 89; (16th) 88, 89, 88-8, 89-8, 90.
Port Shipping:—(12th) 17-8 c.d. s.l. 18 c.d.; (16th) 18.

CEMENTS :

Dalmia:—(12th) 13-4, 13-8, 13-6, 13-10; (15th) 13-6, 13-8, 13-12 (13 s.o.l.); (16th) 13-12, 14 (13-8 s.l.) 13-8 s.o.l. 13-14, 14-2, 13-13, 14-1, (13-8 13-12, 14 s.ls.) 14-7.
Dalmia (Defd.):—(15th) 2-15; (16th) 2-14, 3-1.
Dalmia (Pref.):—(15th) 122-8 s.o.l.; (16th) 128, 129.
Reliance Firebricks:—(15th) 10-15; (16th) 11-12, 12 s.o.l.

REAL PROPERTIES :

Midnapore Zemindary:—(12th) 91, 71-8; (15th) 70-8, 71-8; (16th) 71, 72, 70-8, 71-8.

FLOUR MILLS:

Bengal:—(16th) 13-2.
United Flour:—(16th) 10-6, 10-8, 11-2, 11-10.

ENGINEERINGS :

Arthur Butler:—(11th) 12-15, 13-3; (12th) 14, 14-4.
Arther Butler (Pref.):—(13th) 14-6, 14-10; (16th) 14-6 s.l.
Braithwaithe & Co.:—(11th) 9-6, 9-10; (12th) 9-12; (13th) 9-8, 9-9, 9-13, 9-10; (15th) 9-8, 9-12, 9-10; (16th) 9-12.
Britannia Engineering:—(11th) 11-10 C.T. 11-6, 11-10; (12th) 11-7, 11-8, 11-12; (13th) 11-11, 11-15; (15th) 12-2,11-8, 11-10, 11-14, 12-6, 12-10, 12-4, 12-7, 12-9; (16th) 12-4, 12-8.
Britannia Building & Iron:—(11th) 11; (16th) 10-14 x.d. o.l. 11-2 x.d. s.l.
Burn & Co.:—(11th) 430, 434, 438 s.l.; (12th) 436 s.l.c.t.; (13th) 440, (437 s.l.).
Burn & Co. (6% Pref.):—(15th) 151, 152.
Indian Iron & Steel:—(11th) 34-9, 34-10, 34-14, 34-8, 34-12, 35, 34-7, 34-11, 34-15, 34-10, 34-14, 35-2, 34-14; (12th) 34-14, 35-2, 34-13, (34-12 s.l.) 34-14; (13th) 35-2, 35-8 34-15, 35; (15th) 34-14, 34-15 (34-14 s.o.l.) 35-3 (35-6 s.l.) 35-4, 35-6, 34-15, 35-3, 34-14; (16th) 34-15, 35-3, 35, 35-4, 35-3, 35-7, 35-4, 35-8 (35-4 s.l.) 35-6, 35-10, 35-6.
Indian Malleable Castings:—(11th) 8-7, 8-12, 8-13.
Indian Malleable Castings (Defd.):—(11th) 2-14, 3, 2-13, 2-15, 2-15, 3-1, 3, 3-2; (12th) 2-15, 3, 3-2; (15th) 2-15; (16th) 3-1, 3, 3-2.
Indian Standard Wagon:—(12th) 70.
Indian Standard Wagon (Pref.):—(11th) 172 C.T.; (16th) 170 c.d. s.l.
Indian Steel and Wire Products:—(11th) 59-8, 60-2, 60; (12th) 60-8, 60-6, 59-10, 59-12, 60 c.d.; (13th) 60-8 c.d.; (15th) 60-12, 60-6, 60-8 c.d. (60, 60-4 s.l. c.d.); (16th) 60-4 c.d. s.l. 60-12 c.d.
Indian Steel and Wire Products (Defd.):—(11th) 40-4, 40-8; (12th) 40-2; (13th) 40-2, 40-10 c.d.; (15th) 40-6, 40-10, c.d.; (16th) 40-10 c.d.
Kumardhubi Engineering:—(11th) 5-13, 6-1; (12th) 5-12; (13th) 5-13 (15th) 5-10, 5-12; (16th) 5-10.
Kumardhubi Engineering (Pref.):—(12th) 146 s.l. 147.

(*Half-yearly meeting 26th September*, 1941 *at* 12 *noon*).

Audited accounts for the half-year ended 30th June, 1941:—

The profit for the half-year, after providing for Debenture interest, Depreciation and Taxation, was	3,81,376	2 10
To which is added the balance brought forward of ..	80,626	1 0
Total ..	4,62,002	3 10
Out of this the directors have set aside the following amounts:—		
General Reserve	63,500	0 0
Raw Materials and Stores Reserve	1,00,000	0 0
Reserve for Indian Workers' Pension and Gratuities ..	28,000	0 0
Total ..	1,91,500	0 0
This leaves a balance of Rs. 2,70,502-3-10 available for distribution, which the directors recommend be dealt with as follows:—		
Dividend on Cumulative Preference Shares at 7 per cent per annum, free of Income-Tax	7,000	0 0
Dividend on "A" Cumulative Preference Shares at 7 per cent per annum, free of Income-Tax ..	14,000	0 0
Dividend on Ordinary Shares at 25 per cent per annum, free of Income-Tax	1,12,500	0 0
Bonus of Rs. 1-8 per share on Ordinary Shares, free of Income-Tax	54,000	0 0
Balance carried forward	83,002	3 10
Total ..	2,70,502	3 10

The output for the half-year was well maintained and a large proportion of the sales was made to various Government Departments and to firms engaged on Defence Orders.

Costs of manufactures still tend to rise due to increased prices that have to be paid for Raw Materials, Chemicals, Mill furnishings, etc. The Directors have, therefore, decided to build up the special Raw Materials and Stores Reserve to Rs. 2 lakhs by setting aside a further Rs. 1 lakh from the half-yearly profits.

The extension to the Pulp-Preparing Plant is now almost complete, and will be functioning within the next two months. This valuable addition will have the effect of considerably increasing the consumption of indigenous raw materials.

Further Capital expenditure will be incurred during the next half-year through the building of a new Engineering Stores, which is badly needed, also for the provision of a Hospital, and further Quarters and General amenities for the workmen.

Managing Agents:—Messrs. Balmer Lawrie & Co., Ltd.

Authorised Capital—Rs. 18,00,000 in 48,000 Ordy. of Rs. 25; 4000 7% Cum. Pref. of Rs. 50 and 4,000 7% 'A' Cum. Pref. of Rs. 100. Issued and Subscribed—Rs. 15,00,000 in 36,000 Ordy. 4,000 Cum. Pref. and 4,000 'A' Cum. Pref., all fully paid up. Debenture Capital—Rs. 6,00,000 in 1,200 4½% taxable bearer bonds of Rs. 500 each, repayable at par, on 30th June, 1957 with the option of redemption on or after 30-6-1917.

(*Annual meeting 25th September*, 1941 *at* 12 *noon*).

Audited accounts for the half-year ended 31st March, 1941:—

The Revenue Account shows a profit for the year of Rs. 99,342-7-10 as compared with Rs. 66,746-13-6 for the previous year. After charging income-tax and super tax there is a net profit for the year of Rs. 84,021-7-10, which, with the balance brought forward at credit of Profit and Loss Account from last year and a sum of Rs. 2,574-6-0 recovered from the Government of Madras in adjustment of charges for electricity supplied in a previous year, gives a balance of Rs. 91,654-2-1 at credit of Profit and Loss Account.

The Directors recommend that this sum be disposed of thus:—

Payment of dividend at 6¼ per cent, free of Income-Tax	54,981	4	0
Transfer to Reserve for Taxation	25,000	0	0
Carry forward	11,672	14	1
Total ..	91,654	2	1

General:—During the year under review very satisfactory progress was recorded, and a reference to the statement of units sold shows an improvement of approximately 31 per cent over the figures for the previous year.

The Jawahar Mills, Ltd., commenced operation in October, 1940, and it is understood that they are now endeavouring to secure additional plant in order to extend production.

During the year the Government of Madras Electricity Department completed an overhead high tension line between Mettur and Salem, thus providing an alternative route for the supply of energy to the latter town.

Due to the expansion of the Company's business it has been necessary to consider a reorganisation of the mains system, and arrangements are in hand to increase the Substation capacity of the undertaking to meet load development.

Managing Agents:—Messrs. Octavius Steel & Co., Ltd.

Authorised Capital—Rs. 10,00,000 in 1,00,000 Shares of Rs. 10 each. Issued—Rs. 9,30,000 in 93,000 Shares. Subscribed—Rs. 8,79,700 in 87,970 Shares, fully paid up.

Synopsis of the Balance Sheet as at 31st March, 1941:—

Liabilities:—	Rs.	Assets:—	Rs.

* Transfer Books closed from 19th to 25th September, 1941.

MARKET POINTERS

Cotton Consumption:

The following is a statement of Indian cotton (pressed and unpressed) consumed in mills in India, sent by the Indian Central Cotton Committee. It s based on returns made under the Indian Cotton Cess Act, 1923, by mills in British India and on voluntary returns from mills in Indian States.

CONSUMPTION

(In bales of 400 lbs. net)

	During July 1941.	During July 1940.
British India	267,090	222,442
Indian States	58,031	43,323
Total—India	325,121	265,765

	Since 1st September 1940.	During the corresponding period last year.
British India	2,693,030	2,328,430
Indian States	563,310	508,375
Total—India	3,256,340	2,746,805

Owing to corrections which have sometimes to be made in the figures previously published, the progressive totals shown in these statistics do not necessarily represent the sum of the latest month's figures and the progressive totals published in the preceding month.

* * *

Output of Textiles:

A further large increase in the output of clothing factories was recorded in the month of July. The total number of articles produced was 5,971,855 as compared with 4,652,857 in the previous month, which represents an increase of 1,318,998.

Madras, as usual, topped the list with an output of 1,454,390 articles, an increase of 345,615 over the previous month's figure. Shahjahanpur came second with 1,393,225 articles, showing an increase of 359,552. Calcutta with an output of 1,121,603 exceeded its previous month's figure by 206,861, while Bombay with 973,803 showed an increase of 137,961.

* * *

Madras Raw Cotton Statistics:

The receipts of loose cotton at presses and spinning mills in the Madras Presidency from 1st February to 29th August 1941 amounted to 528,447 bales of 400 lb. lint as against an estimate of 503,500 bales of the total crop of 1940-41. The receipts in the corresponding period of the previous year were 413,940 bales. 461,528 bales mainly of pressed cotton were received at spinning mills and 58,883 bales were exported by sea while 93,800 bales were imported by sea mainly from Karachi and Bombay.

Dry Rubber Exports:

It is announced that the permissible maximum net exports of dry rubber from British India for the last quarter of 1941 shall be 5.325 tons.—

Heavy Textiles:

An agreement, it is reported, has been reached on the basis of a contract, between the Supply Department and the Indian Jute Mills Association under which certain jute mills in the Calcutta area will undertake the fabrication of paulins and other heavy textile articles.

The agreement was reached at a meeting held recently in the Office of the Adviser on Jute Supplies, Calcutta, following preliminary negotiations with representatives of the Association.

Steel Re-Rolling:

The Government of India have issued a warning against the establishment of new re-rolling mills in the expectation of making large profits on account of shortage of steel.

The available scrap, which constitutes the raw material for the re-rolling mills, is scarcely enough to enable the existing mills to carry on their normal business. In the event of the Government of India having to take special measures to regulate the supply of scrap to re-rolling mills and other users, it will not include any re-rolling mills started on or after September 1, 1941.
