ISSUED WEEKLY

Vol. XXVIII. No. 1 SATURDAY, JULY 5, 1941 Price Re. 1

EAST INDIAN RAILWAY

TENDER NOTICE

Sealed tenders are invited for the following and will be received in the General Manager's Office, East Indian Railway, 105 Clive Street, Calcutta up to 12 o'clock noon on 1st August 1941.

Tender No. 703/F1/B CST/41-42 for the supply of Wheels C.I. Rubber tyred 12" dia. with 1.1/4" dia. hole for Axles with rubber tread 2"

Tender forms with full particulars can be had from the office of the Controller of Stores, East Indian Railway, Calcutta, on payment of Rs. 2/- per copy to the Treasurer, East Inlian Railway, Calcutta, and on production of his receipt when applying for the same.

Firms outside Calcutta may, however, remit the amount to the Controller of Stores direct by Money-Order. Ones this document is issued, no refund is permissible.

Sealed tenders delivered by hand should be presented for registration in the General Manager's Office and then put into the Tender Box outside the Deputy General Manager's (Works) Office, by the Tenderer or his Representative.

R. E. MARRIOTT,
General Manager.

WORLD OF INDIAN FINANCE

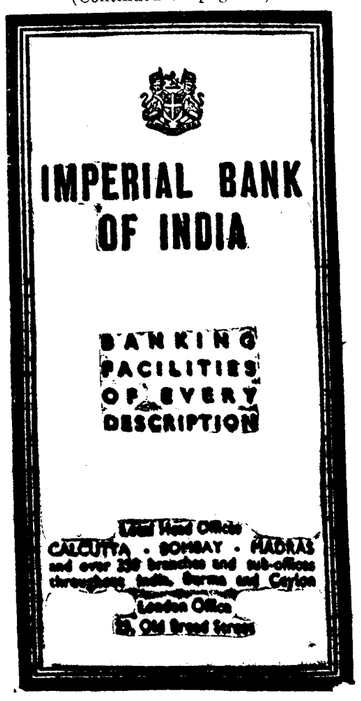
Calcutta, Friday evening.

ALL the signs and portents of the slack season are now clear and unambiguous; and it may be expected that short credits will continue to be in plethoric supply. The inter-bank call money market as such experiences no activity worth mention; and the rates in this market are nominally quoted at ½ per cent in Calcutta and ¼ per cent in Bombay. Both these rates are fictitious for the simple reason that no banker will take money unless it be term deposits. If both the rates are fictitious, it follows that ½ per cent is more fictitious than ¼ per cent. Why should not Calcutta fall in line and quote ¼ per cent as the inter-bank call money rate? It is a kind of convention that prevents Calcutta banks from quoting ¼ per cent as the call money rate. There is no point in such a convention if the Bombay branches of these same banks are regularly quoting ¼ per cent.

On the Treasury Bill tender day, applications at Rs. 2,26 lakhs made a better showing than last week when the total tenders were only Rs. 2,08¼ lakhs. From the total applications being only Rs. 226 lakhs, one has to infer that bidding was not keen. All the same, the average rate of accepted tenders is one pie lower at annas thirteen and pies nine per cent per annum. Sales of tap bills also make a better showing, though the figure, considered absolutely, cannot be said to be impressive. Three months' intermediates sold from June 21 to July 1 amounted to Rs. 58¼ lakhs as compared with Rs. 36¾ lakhs from June 18 to June 23.

The Bengal Government, who came on the market on Monday for Rs. 60 lakhs of three months' bills, had an undoubtedly pleasant experience. Banks paid the Bengal Government a great compliment by showing unexpected avidity for their bills. Total applications came to as much as Rs. 1,61 lakhs. The average rate of accepted tenders was annas fifteen and pie one, which is only anna one and pies four per cent higher than the Central Treasury rate. This is the narrowest gap, we have known so far, between a Provincial treasury bill rate and the Central treasury bill rate. The plea which INDIAN FINANCE has been repeatedly urging for the removal of invidious distinctions between Central treasury bills and provincial treasury bills has, we are gratified to note, not been without effect, though it has been a very slow progress towards the objective we outlined more than three years ago.

The statement of the Reserve Bank for the issue department shows a slight rise in active note circulation from Rs. 258.63 crores to Rs. 258.80 crores. Notes held in the banking department are also slightly higher at Rs. 13.94 crores. On the assets side, the only change is a further rise in rupee coins from Rs. 36.15 crores to Rs. 36.57 crores. In the banking department, the Central Government's deposits have risen from Rs. 4.93 crores to Rs. 5.27 crores; those of the Burma Government from Rs. 2.10 crores to Rs. 2.39 crores; and those of other Governments from Rs. 4.23 crores to Rs. 4.69 crores. Deposits of member banks are down by over a crore to Rs. 30.35 crores. On the assets side, foreign balances have fallen from Rs. 37.44 crores to Rs. 37.06 crores; and ways and means advances from Rs. 65 lakhs to Rs. 15 lakhs. There has been a substantial addition to investments of Rs. 40 lakhs, the latest figure being Rs. 8.44 crores.



The Imperial Bank of India for the week ended June 27 establishes another high record for deposits which stood at Rs. 103.32 crores. Investments are slightly higher at Rs. 61.32 crores. Advances continue the declining trend and are now Rs. 38.13 crores as compared with Rs. 38.97 crores on June 20. Cash shows a sharp rise from Rs. 11.66 crores to Rs. 13.90 crores.

A press **communique** issued on July 3 contains the following announcement.

"The figure of the Government of India Treasury Bills sold in favour of the Issue Department of the Reserve Bank of India given in the press **communique** of the 2nd July 1941 excludes Bills for Rs. 24,16,00,000 issued in exchange for Rupee counter parts taken over by Government for cancellation."

It was pointed out, in earlier issues of INDIAN FINANCE, that the Government had purchased considerable parcels of rupee counterparts from the Reserve Bank and cancelled them in addition to some of their own holdings in rupee counterparts. The stocks thus cancelled, which were described as a complementary transaction to the sterling debt redemption, were Rs. 46.11 crores. We now learn that the rupee counterparts which the Government purchased from the Reserve Bank for cancellation amounted to Rs. 24.16 crores. In the

TREASURY BILLS

India

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills were opened on Wednesday, July 2, 1941. Total amount offered was Rs. 2 crores and 26 lakhs. Tenders at Rs. 99-12-9 per cent were accepted in full and those at Rs. 99-12-6 per cent were allotted approximately 88 per cent. Lower tenders were rejected. Total amount accepted was Rs. 2 crores, the average rate of accepted tenders being annas thirteen and pies nine per cent per annum.

Tenders for Rs. 2 crores of three months' Goverment of India Treasury Bills will be received on Tuesday, July 8, 1941. Successful tenders should make payment on Friday, July 11, 1941. Other conditions are as usual.

Three months' Intermediates will be sold from July 3 to July 7, 1941, at Rs. 99-13-0 per cent subject to the conditions previously announced (viz. sales can be stopped at any time without previous notice if Government think it necessary).

Three months' Intermediates sold from June 25 to July 1, 1941 amounted to Rs. 58,25,000.

During the week ended June 27, 1941. Government of India Treasury Bills for Rs. 2,38,00,000 were sold in favour of the Issue Department of the Reserve Bank of India. This figure excludes Bills for Rs. 24,16,00,000 sold in exchange for Rupee counter-parts taken by Government for cancellation.

Bengal

Tenders for Rs. 60 lakhs of three months' Government of Bengal Treasury Bills were opened on Monday June 30, 1941. Total amount offered was Rs. 1 crore and 61 lakhs. Tenders at Rs. 99-12-3 per cent were accepted in full and those at Rs. 99-12-0 per cent were allotted approximately 7 per cent. Lower tenders were rejected. Total amount accepted was Rs. 60 lakhs, the average rate of accepted tenders being annas fifteen and pie one per cent per annum.

THE MISRA HOSIERY MILLS have, from the commencement of the war, been "on active service." Working day and night, the mills have been supplying essential requirements of the Army in the knitting line.

MISRA HOSIERY cater to the requirements of the general population and comprise socks, stockings, undervests, sports shirts, interlock underwear and outerwear, for men, women and children.

Production 8,000 Articles, daily.

Finance Abroad

Friday Morning.

ALL the anticipations of a completely comfortable turn round the half-year must be due to the plenitude of investible funds in London; it now looks as if the weekly tender finds takers at below percent and the fall in June indeed attracted less attention than the temporary decline fractionally to below percent in March. The increase in the volume of applications (£163 millions last Friday) after a slight recession in the third week of June shows that the normal volume is stabilised at over double the issue of £75 millions and the market syndicate's quota might have been reduced since outside applicants might have naturally manifested more interest even though other Bills may be available. And they obtained a bigger allotment than the indicate which got 27 percent only. The actual increase in applications might indicate to some extent that bank deposits keep growing but savings will have to be double to catch up with the demands made on the British taxpayer in his other capacity of investor. The cheque returns, nowadays, are not published in B. O. W. messages but the fact that ordinary revenue and self-financing items will never cope with the weekly expenditure is known. The increase in the floating debt must continue and the fact that the cost of annual service on the total debt of over £1,000 millions is under 2 percent carries its own lesson for the investor and the taxpayer alike everywhere. The Treasury is demonstrably more skilled in monetary management and financial practice. That special qualities are needed for the application of new policies is generally known, but the actual situation has demanded the continuance of a strong Governor at the Bank of England who would work effectively with the Treasury but would not allow the Bank to become nationalised even in wartime.

The small improvement in the New York rate for sterling was the subject of a brief mention in some papers last month. The actual movement to 4.03½ was as no interest as free sterling has ceased to exist. But there were other free markets in Havana, Lisbon and Shanghai. Attempts have been made to liquidate one or all of them and regulations framed a few months ago concerning the taking out of British currency notes and declaration of possession on landing were designed to curb the traffic in notes by which sterling was exchanged for varying quantities of dollars or other currencies. The new control of the mails carried in neutral ships will help in closing one other leak but relaxation in favour of Portugal may encourage it. The free market in Havana where European fugitives set up dealings must have disappeared if the U.S.A. had indicated disapproval, particularly, after the depreciation of the Cuban currency in terms of dollars. The Shanghai market has lost its importance in the second year of war though the battle of the notes in North China will always keep the Shanghai money-changers busy.

The absence of any change in either bullion, exchange or mover rates over most days shows that all exchange, money and all markets are static over long periods. In fact, more attention is devoted to Mr. Morgenthau's suggestion that the British Government should hypothecate securities and take loans instead of disposing of them outright. The suggestion came soon after the report that the Administration had under consideration a loan proposal. There have been, in this connection, reports unconfirmed as yet that the U. S. Treasury would allow Britain to negotiate with the Banks loans on the security of dollar securities as yet unsold. It has been hinted that Britain did not get full value for the American Viscose deal which means that the loss was ultimately sustained by the shareholders of Courtaulds. The fact that the shares have not gone much higher after the Viscose sale may be due to the fact that falling rayon consumption may have offset fresh hopes of active combination with British Celanese. The recovery of European assets too may be regarded as problematical at present but Courtaulds is not the only firm to have suffered through the war Unilever, British Aluminium, I. C. Gas and other companies' fortunes have been greatly affected by the war in which the Nazis show no quarter.

There has recently been another circumstantial report to the effect that a loan of several hundred million dollars will shortly be made to the British Government by the R.F.C. According to the Washington correspondent of the *Wall Street Journal*, the loan will be used for war supplies ordered in the U.S.A. before the Lease and Lend programme came into effect. As collateral security for this loan all the direct investments of Britain in the U.S.A. and part of British holdings of marketable securities would be deposited with the R.F.C. A formal announcement is expected shortly according to the correspondent who argues that no assets will be offered for sale unless some provision for their liquidation is made by the Corporation. The sale of B.A.T.S. holdings in a U.S. subsidiary and the previous sale of American Viscose may, therefore, be isolated but subsequent deposit of other securities will raise the question of refund or compensation to the companies concerned though it will be urged that after payment in sterling for dollar assets there is no binding claim.

The very recent but quite pronounced rise in bullion prices in Bombay, is probably based on apprehensions concerning the local riots and there is nothing to relate it to any movement in sterling. The fact that Japan has recently sought to re-establish a link with sterling for the sake of conserving and developing her trade with the British Empire, shows that the yen looks both ways. The dollar alone is not prized and the statement last week-end of Viscount Kano of the Yokohama Specie Bank to *Reuter* in London showed that sterling was valued and Japan's necessity to import cotton and other raw materials compelled the Government to re-open facilities for conversion into sterling and also to safeguard the importers against the difficulty of obtaining sterling in the event of changes in exchange rates, normally favourable. The break between China and the Axis may have very wide repercussions. The most important consequence for the postwar period will be that Germany will lose the Chinese market where she long held a special position. The present break with the Axis may stimulate U.S. help to China after the special loan for the Yunnan Railway. The appointment of a retired British officer to put the scheme through by connecting the Burma Railway with the projected Chinese railway, shows that Anglo-Chinese co-operation has entered on a new phase. This will put an end to fears as to the further depreciation in the Chinese dollar still quoting under 3½d in London. It will be recalled that at the annual meeting of the Hongkong and Shanghai Banking Corporation only a very brief reference was made to the subject and it was indicated that China's exchange difficulties had no special relevance for the outer world which, of course, could complain of the default on the customs loans. It is currently assumed that U.S. material aid will increase as Chungking is the only Government recognised by Washington after the Axis recognition of Wang Ching-Wei.

The variations in exchange rates as between Bombay, Madras and Calcutta have never been explained but one may argue that Bombay being the biggest centre, the rates there are more accurate and complete. In fact, Bombay gives the rates for the Portugese and Mexican currencies in addition to the Far Eastern currencies. The discrepancy in rates has never been so conspicuous as in wartime.

War—and Ways and Means Budget: V

THE problem that remains to be tackled in this last article of the series is connected with the raising of Rs. 120 crores to Rs. 130 crores by way of rupee loans or otherwise. At first sight, it might look too tall an order for the Indian giltedged market. For, we have been accustomed to new loans of between Rs. 20 crores and Rs. 30 crores; and can this market, one may ask, put up as much as Rs. 120 crores.

In the first place, there is no reason why loan requirements of this size should not be dealt with by way of three or four instalments.

In the second place, the amount as such need not frighten us. In the last twenty months or so, the Indian giltedged market has put up quite substantial amounts for the loans issued or sold by the Government. While the first stage of the sterling debt redemption was functioning, the Reserve Bank sold, through the tap, as much as Rs. 32 crores of rupee counterparts. There have also been the first and second defence loans, the first loan realising Rs. 44.86 crores and the second Rs. 10.07 crores. Interest-free defence bonds account for Rs. 2.42 crores. The Government have thus been able to collect as much as Rs. 57½ crores from the defence loans. Including the securities sold through the tap, the market has absorbed, in this period, about Rs. 90 crores.

In the third place, as a result of the considerable strengthening in the Indian financial position due to the repayment of sterling loans, the credit of India is higher than it ever was. This is reflected in the present quotations of India sterling stocks and India rupee stocks. In fact, if the Government had not been selling the defence loans through the tap, the level of giltedged prices in India should have been much higher. The intrinsic factors in the Indian giltedged market are most healthy; and, if suitably tackled, this market in its present condition must prove fully equal to big-sized loan operations.

In the fourth place, it should be possible to raise a moiety of the Rs. 120 crores by other means and through other channels. What these other means and these other channels are, we shall indicate presently; and, if the suggestions in this regard are accepted, and if the operations turn out to be successful, the new loan problem which the Finance Member has to tackle may turn out to be no more than half of the Rs. 120 crores.

It were best to deal with the last point first. It was expected, at least by *Indian Finance*, that the re-valuation of gold in the issue department of the Reserve Bank would be one of the changes put through as a consequence of sterling debt redemption. The Government have been able to carry out the connected transactions without recourse to such revaluation of gold stocks and without the help of the inner reserve that would thereby have been released. Such inner reserve is of the order of Rs. 40 crores. And, we suggest, this should be utilised in connection with the repayment of 3½ percent India sterling stock. The purpose for which the gold stocks are maintained in the currency reserve is mainl connected with the convertibility of the rupee into sterlin In the last article, we had indicated that our current liabil ties in sterling would be considerably reduced in the pos war years; and that the Reserve Bank need not mainta as much external reserve as heretofore. As a result sterling debt redemption, our sterling liabilities to be m year after year are being reduced. It is, therefore, appr priate that re-valuation of gold is effected in connecti with an operation which contributes its share towards t lightening of our current sterling liabilities. In sim terms, our proposal is that we should re-value gold a thereby utilise the inner reserve of Rs. 40 crores for ducing the amount of new loans that have to be rais The new loan programme is, thus, reduced to Rs. 80 cror

Our next suggestion is that immediate steps should taken to widen, strengthen and enliven the Treasury F market. The maximum Treasury Bill holdings in t hands of the public at any one time have been Rs. 35 crore as judged by the experience of the past few year There have, however, been occasions when the floating de in the hands of the public has even exceeded twice th figure. In 1931, for example, Treasury Bill outstanding with the public were, in many occasions, as high as Rs. 7 crores. But, then, the rate paid for short-term accommoda tion at that time was extremely onerous. We do not sug gest that the Government should increase the Treasury B outstandings by forcing up the rates. Our main point i that a Treasury Bill total much higher than the figure o Rs. 35 crores must not be considered beyond the capacity o the Indian market. What we would like to see is the estab lishment of Treasury Bills in the Indian money market as the counterpart of British Treasury Bills in the London market. With apt and energetic steps taken in this regard there should be no difficulty in bringing up the total o Treasury Bill outstandings to Rs. 60 crores. This mean that our new loan programme is reduced by Rs. 25 crores this amount being found from the expanded and enlivene Treasury Bill market. The new loan programme is, there fore, further reduced to Rs. 55 crores.

We are, thus, left with a problem which is much les formidable than it looked at first sight and at the beginnin of the study. For raising Rs. 55 crores, the question whether the present method of keeping the defence loa available indefinitely through the tap is the best. The pr sent progress of the second defence loan cannot be conside ed inspiring. The monthly takings are roundabout Rs. crores. Nor was the first defence loan much of a succe except in the final stages when, too, the real impetus cam from the advance knowledge which the market had that th first loan was going to be withdrawn and replaced by second loan which would be less favourable to the invesio In recent years, we have had experience of loans sol through the tap and such experience is not favourable to th continuance of this plan. The issue of loans limited amount and limited in respect of the period for which th subscription list remains open, is better understood in Indi and evokes better response. We suggest that, once it is decided to redeem 3½ per cent. India sterling paper, the question of the advisability or otherwise of loans issued through the tap must be carefully reviewed.

Our own view is that there should be a series of loan issues; and each issue must make available to the public loans of varying maturities so that each can subscribe according to his particular preference. We would suggest, in the first instance, the issue of loans for July, Rs. 25 crores. That is to say, the amount will be limited to Rs. 25 crores; and the list will close as soon as this amount is subscribed. There would be a 2 per cent three-five year loan; a 2½ per cent six-eight year loan; and a 3 per cent nine-twelve year loan. Here are types of loans which will satisfy varied tastes. After allowing a suitable interval, and while carrying out, meanwhile, open market operations with shrewdness and nimbleness, the next issue of loans will be made, say, for Rs. 20 crores. These will also be three types of loans, namely, a 2 per cent. four-seven year loan; a 2½ per cent. eight-twelve year loan; and a 3 per cent. thirteen-twenty year loan.

By such means, the kind of new loan problem which the Finance Member must needs solve to carry out successfully the redemption of the 3½ per cent sterling paper will be smoothly tackled in easy stages and in a way that imparts greater strength to the Indian giltedged market.

Above all, we would strongly urge that Sir Jeremy Raisman, as the steward of the finances of a country which enjoys the highest credit with the investor in London and in India, must make up his mind and must make it clear to the market that this is a 2½ per cent. war rather than a 3 per cent war so far as India is concerned.

Jute Consumption—Rise And Fall

IN the nature of things, little light thrown on the process by which India's national economy is adjusting itself to the changed conditions following the loss of the European markets. Even in normal peacetime, the process takes time to become clear to the public. And at present when trade statistics are meagre and out of date, one must be content to glean every piece of relevant information as it becomes available. So far as jute is concerned, the bulletin published by the Indian Central Jute Committee affords valuable information as to the repercussions of the loss of Continental markets and the readjustments it has set up in consequence. It may be observed at the outset that while the interference with communications caused by the war force in Indian industry the production of certain lines of essential imports, it also sets up similar adjustments in the case of the export trade. The loss of foreign markets for raw cotton is calculated to increase its consumption by indigenous mills. But here a long chain of consequential changes, such as the consumption of Indian mill products, a fall in imports of foreign goods, and to some extent, an expansion of internal consumption is involved, in the case of raw jute, the presence of a demand for jute goods from foreign countries facilitates to a greater degree the consumption of raw jute by Indian mills. It is hardly necessary to utter the caution that consumption is not so well maintained that the need for restriction is obviated. But as illustrative and symptomatic of the new trend the increase in mill consumption is unquestionably significant. The Bengal Govern-

SUMMARY OF REPORT FOR 1940

Business in Force	Rs. 96,16,700
New Business	Rs. 17,14,500
Over-all Expense Ratio	34·4 p.c.
Assets Exceed	Rs. 19,00,000

Applications for Agencies and Organiserships are invited from influential parties and may be addressed to the undersigned.

A. FRANCIS,
General Manager

NATIONAL INDIAN LIFE INSURANCE CO., LD.

REPORT BY THE DIRECTORS

FOR THE YEAR FROM 1st JANUARY TO 31st DECEMBER, 1940

The Directors have pleasure in submitting herewith the audited accounts of the Company for the year ended 31st December, 1940.

During the year under review 3,516 proposals for the assurance of Rs. 62,38,600 were received and 2,847 policies for Rs. 49,41,550 were issued of which Rs. 2,32,800 under 22 policies were reassured. The rest were either declined or accepted on modified terms or not proceeded with or are awaiting completion. This shows an increase of Rs. 4,48,150 over the previous year and in view of the difficult times through which we are passing owing to the War, this may be considered as satisfactory.

The total income from all sources amounted to Rs. 16,69,296-9-7 and shows an increase of Rs. 1,05,357-3-6 over the previous year. The Life Fund increased by Rs. 4,41,881-10-5 and now stands at Rs. 72,58,323-0-5.

It will be noted with satisfaction that the expense ratio declined by 1.5%. In common with other Indian Insurance Companies we had to contend with early lapses of policies and though every effort is made to keep the policies in force by automatic non-forfeiture scheme and easy rules of revivals considerable number of policies are lapsed by policy-holders putting the Company and themselves to unnecessary losses.

It will be noticed that a sum of Rs. 45,827-10-0 has been written off as depreciations of securities but no appreciation has been taken into account. The market values of the securities exceed the book value by Rs. 3,35,652-15-0.

The net rate of interest earned came to 4.32%.

During the year claim arose by death on 110 lives under 123 polities securing the sum of Rs. 1,88,704-11-0 while 315 policies on 310 lives matured by survivance involving the sum of Rs. 5,04,357-9. The longest duration at death was 31 years 6 months and the shortest 2 months. The average duration of policies which became claim by death is 10 years.

The Valuation Report of our Actuary Mr. V. A. Burrows, F.I.A., has just been received and is under the examination of the Directors.

The Directors recommend the payment of dividend at the rate of 6%, free of income tax, on the Paid-Up Capital of the Company. They regret that the dividend of the previous year could not be maintained as according to the New Insurance Act, they could not give credit of the interest on the money earned by their Capital at the same rate as earned by the mean fund of the Company as was their practice in previous years.

Mr. T. L. Martin, Sir Nil Ratan Sircar and Mr. H. F. Bensly retire from the Board of Directors but being eligible offer themselves for re-election.

The Auditors Messrs. Lovelock & Lewes, Chartered Accountants also retire but offer themselves for re-election.

12, Mission Row,
Calcutta, 9th June, 1941.

By Order of the Board of Directors,
T. LESLIE MARTIN,
Chairman.

AUDITORS' REPORT TO THE SHAREHOLDERS

We beg to report that we have audited the foregoing Balance Sheet of **The National Indian Life Insurance Co., Ltd.**, as at 31st December, 1940, and Revenue and Profit and Loss Accounts for the year ended 31st December, 1940, in which have been incorporated the certified returns from Agencies.

We have obtained all the information and explanations we have required, and in our opinion such Balance Sheet and Revenue and Profit and Loss Accounts are drawn up in conformity with the Insurance Act, 1938, and the Balance Sheet exhibits a true and correct view of the state of the affairs of the Company according to the best of our information and the explanations given to us, and as shown by the books of the Company. In our opinion, books of account have been kept by the Company as required by law.

We have verified the cash balances and the whole of the investments by reference to certificates and relative securities.

We have not seen Loan Bonds to the value of Rs. 555 in respect of Loans on the Company's policies.

We certify that no parts of the Assets of the Life Insurance Fund has been directly or indirectly applied in contravention of the provisions of the Insurance Act, 1938, relative to the application and investment of Life Insurance Funds.

ment's policy of compulsory restriction of the crop certainly finds justification in the fall in world consumption of jute apparent since 1937-38. The rise in consumption during 1930-40 reversed the trend, but there is nothing to suggest in the succeeding years the outlook for jute could have improved. World consumption in 1938-39 is put at 107.8 lakhs of bales and this would have fallen in 1939-40 but for the war which inspite of all the stories about warbag orders led to a rise of barely 1.5 per cent in consumption.

It might be argued that exports of jute manufactures increased considerably in 1939-40, though internal consumption fell to some extent, while the mills enjoyed both high prices and larger demand. In the survey of the work done by the Indian Central Jute Committee special reference was made to the departure in economic and statistical research. The first fruits of such research are gathered in the bulletin on the world's consumption of jute in the year 1938-39 and 1939-40. Special praise is due to the orderly arrangement of the statistics, which without laying any claim to absolute accuracy, convey clearly the central idea that consumption fluctuates and that prospects for 1941-42 in the light of trends discerned in the years immediately preceding are far from encouraging. But no specific conclusions can yet be drawn as regards the future; for the bulletin is content to chronicle and describe. Two main facts emerge from the analysis, first that consumption in the seven months following the war increased rapidly as sandbag orders accounted for some 8 lakhs of bales in July 1939 to June 1940 and the rise in demand was reflected in the advance in prices. Another fact of equal significance is that Indian mill production has fluctuated within wide limits, a fact which can be used for establishing the case for regulation of the crop. It has been deduced that the trend of mill production is not unconnected with industrial production in general, though there is more than the usual time lag in this case. Mill consumption is the main channel of consumption as exports of raw jute have fallen steadily since 1929 and village or extra-mill consumption does not account for more than 3.3 per cent of total consumption. The bulletin records the fact that before the war the countries within the British Empire took about 1/6 lbs of the total export of jute goods from India, but since the outbreak of war more than 80 per cent of the total export from India is shared between the U.S.A. and Empire countries.

A very important point brought out is that the Association Mills increased their purchases of raw jute about 15.7 lakhs of bales in 1939-40 and their purchases of raw jute the quantity exceeded, for the first time after seven years of mill production. These statistics illuminate subsequent developments in the world of jute if they do not lend support to any particular argument. There is little doubt that jute consumption in the future may recede to the low level touched in 1935-36 when total mill purchases fell to 47.78 lakhs of bales. The relation between production and stocks is brought out in a note which indicates that mills held reduced quantities of jute in stock while production had increased and their own holdings of manufactures had declined considerably. The figures might be adduced to prove that the mills had a duty to the jute-grower in 1940-41 in regard to generous purchases of raw jute, but it will not be forgotten that such reluctance, as was manifested, was wholly due to apprehensions engendered by the outsize crop of 1940-41 and the new scheme of statutory price minima for the main grades of raw jute. The bulletin incidentally shows that crop forecasts for 1938-39 and 1939-40 figures sustain the inference that the decision as regards crop restriction to 1/3 rds was the inevitable sequel to the suspension of crop restriction in 1940. The forecast put the 1940 crop at 125.6 lakhs of bales, obviously an under-estimate, while consumption fell off as shown by the decline in arrivals of raw jute into Calcutta, in shipments from Calcutta and Chittagong, in mill production and in the reduced exports of hessian and sacking from Calcutta in comparison with the previous year in selected periods.

The statistical appendix indicates that the war has led to the loss of European markets, which on the basis of ten-year averages, took about half the raw jute exported from India. The appendix shows that the U.K. was the biggest buyer of raw jute over the period taking larger quantities in years when Indian mill consumption was low. The most important market for jute manufactures is the U.S.A. which on the basis of ten-year averages took 25.5 per cent of India's exports. Australia and New Zealand rank second with 13.2%; and the U.K. and Ireland took 6 per cent as compared with Far Eastern markets which took 2.7 per cent of bags and cloth. The U.S.A. was then as now the principal buyer of hessian while the Far East took more sacking than other markets. South American markets are not unimportant, for the Argentine claimed 8.6 per cent of exports in the ten-year period 1929-39 and the rest of America took 8.6 per cent of India's exports. European markets, with the exception of Belgium, took inconsiderable quantities so that it might be suggested that the war, while it has reduced exports of raw jute, has not led to any vast changes for it can be argued that only 3.5 percent of the export trade has been lost through the war.

Editorial Notes

Central Banks in Wartime

IN the monthly bulletin of statistics of the League of Nations there is a special table showing the composition of the balancesheets of the Central Banks so that the percentage of advances to Governments and holdings of Government securities may be seen at a glance. Although the significance of the data varies with the monetary and banking organisation of each country, the recent increase in credits granted to the State is clearly revealed in most countries for which figures are available in the February bulletin. Among these countries are Canada and Japan where the Central Banks' holdings of Government securities have more than doubled. A 50 per cent increase was noted in Bulgaria and an increase of 18 per cent was shown in the Banking Department of the Bank of England. In Yugoslavia the holding was nil at the outbreak of the war: at the end of 1940 securities held by the Bank of Yugoslavia totalled 7,000 million dinars. In the case of the U.S.A. the Federal Reserve Banks sold off part of their securities and increased their liquid assets. Increased holdings of Treasury Bills and commercial paper were reported by several Banks. A very big increase has been reported in the Netherlands where the addition of German I.O.U. to the currency backing must have stimulated it, and smaller increases in Hungary and Rumania show that default on external debt was not without its advantages. In Germany short-term assets of the Reichsbank increased by one-third but holdings of Government securities and credits to the State diminished. In spite of the increase in the gross debt of the Reich it is now recognised that Nazi war finance has a successful record. The cost of new borrowing has been rigidly controlled and the flow of funds stimulated. After the beginning of 1941 it was reported that apart from questions of price control there were in reality no problems because savings and consumption were alike adjusted to the war effort. The burden of German occupation is clearly shown in the statement of the Bank of Denmark where over 500 million kroner was locked up in debts presumably German and in Belgium where advances to the State have risen. Increases in note circulation and commercial bank deposits were more or less general. Exceptions to the dominant trend were Switzerland, Denmark, Norway and the Netherlands. The outstanding feature of the year was the reduction in interim rates. A graph indicates that in 24 countries the rates of interest were inclined to drop. In the United States the average yield on Government bonds was as low as 2 per cent towards the end of the year. The persistence of singular easiness in money conditions has been recorded since and the U. S. budget problem is now largely assessed in terms of surplus bank balances and the falling rate on the Treasury's obligations.

Rice Supplies

THE increases in the prices of cereals this year has not probably attracted so much notice as the rise in those of fibres. Yet the increase under rice came first in February and one may naturally put it down to changes in the supply position during 1940-41. It is generally known that a shortfall of 15 per cent in India's total supplies estimated at 24,254,000 tons accentuates the dependence on imports of rice from Burma, and shipping difficulties restricting such imports had by themselves a pronounced effect on both prices and supplies. The All-India crop forecast indicated that with a reduction of only 3 per cent in the total acreage under rice the cutturn for 1940-41 would be 15 per cent below that for 1939-40. The position is reversed in Burma where the sown area is estimated to be 12,797,000 acres against 12,892,000 acres in 1939-40. The yield for 1940-41 is estimated at 5,971,000 tons against 5,178,000 tons in the preceding year. The exportable surplus is in consequence estimated to be bigger. It is assumed that total exportable supplies will be 3,580,000 tons of rice and rice products as against last year's estimate of 3,200,000 tons of which only 2,839,000 tons were actually exported. Present indications are that India's shortage may persist owing to a variety of reasons. The increase in Burma's exportable surplus has not so far caused any downtrend in Rangoon prices. It will be recalled that prices moved upward during 1940 steadily in spite of slow demand at times. Prices advanced continuously till September, but the reaction since then was slight and prices have since hardened owing to the belief that India must buy a larger quantity. The figures for the rice crop in other countries show that in spite of a normal crop in Korea the Japanese crop may be barely sufficient as total yield estimated at 8,500,000 tons is expected to be 12 per cent lower than the 1939-40 crop. A small increase in Formosa's crop is expected and even an increase in the area under rice in Thailand may not lead to any large increase in rice supplies available for Japan unless it be that she acquires a monopoly of Indo-China's supplies. Foreign demand for Burma's rice is likely to be keen during 1941 and the reduction of homegrown supplies in India will, as in the past, reveal that prices move in a manner that does not correspond to the fact that India can increase supplies at will by stopping exports and extending cultivation.

Burma's Trade in 1940-41

From the review of the seaborne trade of Burma in 1940-41 one can infer that exports and imports alike have increased in value in spite of a decline in the volume of Burma's foreign trade. Decreases were recorded in 1940-41 under exports of rice, mineral oils, metals and teakwood. Increases under matches, tobacco and rubber are exceptions. Except for an increase under cotton yarn and twist, the major items on the import side also showed a decrease. Total trade turnover in spite of the increase of Rs. 4.73 crores in value reflected the adverse effects of the war, measurable also in the reduced excess of exports over imports. Exports to India in 1940-41 fell away in comparison with the previous year. India's position in Burma's trade can be deduced from the fact that total exports to India were valued at Rs. 26.57 crores as compared with total exports to foreign countries (Rs. 26.8 crores). It is true that exports to India in 1939-40 constituted 41 per cent of the total trade of Burma, but that is not of so much importance at present as the higher proportion of imports drawn from India. During 1940-41 total imports from India were valued Rs. 18.53 crores as against Rs. 13.99 crores in 1939-40, while imports from foreign countries declined from Rs. 11.17 crores in 1939-40 to Rs. 11.02 crores. After allowing for re-exports from India, there is an increase of over Rs. 3.95 crores in imports from India which explains the high stability of the total trade of Burma particularly with India. The main changes in the export trade of Burma are set out in the April issue of the *Burma Trade Journal*. It appears therefrom that exports of rice valued Rs. 26.91 crores as against Rs. 24.10 crores in 1939-40 were again the single largest item. The increase is accounted for by the increase in shipments to Japan (555,000 tons value Rs. 5.13 crores in 1940-41). Decreases were recorded under cotton, potatoes, pulses, oilcakes and spices but improvement occurred under paraffin wax, cutch, candles and hides and skins. The outstanding feature of the import trade is the increase in imports of all piecegoods with the exception of silk goods. A very big increase under cotton yarn and piecegoods is disclosed whereas nearly all other imports have gone down in both value and volume. On analysis it will be found that the increase under coal and coke (Rs. 67.27 lakhs against Rs. 62.69 lakhs in 1939-40) is of less importance than the rise of Rs. 36 lakhs in imports of cotton piecegoods or of Rs. 36 lakhs in imports of tobacco. The increases are of undoubted advantage to India which looks for further improvement in exports to Burma under the new reciprocity arrangements concluded in April. It is not without interest to observe that in spite of the fall under jute gunny bags (in spite of a pronounced increase in the last quarter) the increase under certain imports must have been of advantage to India. The improvement in the intake of chemicals, drugs and medicines, boots and shoes, paper and cardboard, seeds as also metals in general indicates that imports from India in certain lines of manufactures must have increased last year. The 1940-41 figures support the conclusion that over the wartime period India has improved her position considerably as a supplier of Burma's requirements. The promise not to increase the quota assigned to Japanese piecegoods into Burma must help Indian textile manufacturers in the Burma market where they are granted a preference of 7½ per cent over British goods and are subject to a duty of 10 per cent. The Burma market is likely to increase in importance in view of concessions shown to exporters of tobacco, salt, sugar and tea. It is known that the Government of Burma has agreed to accord a specific margin of preference of one anna per lb. of tea against the preferential rate and of three annas per lb. against the standard rate. India would thus have considerable advantage against Ceylon and the Netherlands Indies which may concentrate on neutral markets like the U.S.A. mainly because they have a larger exportable surplus and their own consumption is quite small compared with India's.

Canadian Market Prospects

Openings in Canada for Indian manufacturers are restricted and the trade figures for 1940-41 certainly suggest that India's trade with Canada has not expanded after the initial stimulus given by the war. Though India's trade with Canada is in non-competitive and reduce Canada's demand is small. According to the Indian Trade Commissioner in New York total imports into Canada from India in 1939 were valued at only 9.8 million dollars. In spite of the improvement recorded in the trade returns for 1939 as compared with the two preceding years, Canada has not greatly increased her imports from India. There is very much demand for jute and hessian and the requirements of lac and carpet are obviously limited. Among agricultural imports into Canada are included tea, rice and nuts. Canada imported in 1939 more than 20 million lbs. of black tea valued at nearly 4½ million dollars. The popularity of India is attested by the fact that two-thirds of the tea imported are Indian. Canada took 7.4 per cent of India's total exports of tea whereas the U.S.A. took 3.6 per cent. The war as the 1939-41 trade returns have shown has hardly touched the export trade in tea. Imports into Canada were running at over 2½ million lbs. per month after November 1939. Canada shares with the U.S.A. a partiality for cashew nuts, but imports from India in the first quarter of 1940 declined while takings from the U.S.A. increased. Imports of peanuts showed a striking recovery in March 1940 after a marked shrinkage. Some demand for walnuts, rice, cleaned and uncleaned, as also peas has been noticed. Canada imported over 4 million dollars worth of coffee either direct or through the U. K. and the Canadian import figures show that as under tea the demand is likely to improve further. Canada's total imports of jute fabrics in 1939 were valued at 3.5 million dollars showing a marked increase in value though not in yardage over the previous year. Canada's purchase of burlap were inconsiderable. In spite of the increase shown under imports of jute and hessian Canada is not an important purchaser as the large wheat crop is handled in bulk; and only potatoes, onions and such crops necessitate the use of bags. Canada's imports of woollen carpets declined in 1939 but recovered sharply towards the end of 1939 and the favourable trend continued into 1940. The statistics show that Canada is among the buyers of castor oil and also of essential oils, imports of which increased in 1939. Drugs of vegetable origin and certain seeds like mustard and celery seeds were drawn from India, but India's share in the total import trade was inconsiderable. Canada imported canvas shoes with rubber soles and also manufactures of rubber and gutta percha from India though the value of both items in 1939 did not exceed 23,000 dollars. It must, however, be noted that Indian goods are obtained largely through the U. S. A. The bulk of Canada's imports of shellac in 1939 came from the U.S.A. Mica too is obtained through the U.S.A. as direct imports were inconsiderable while it is known that over 61,000 dollars worth of mica was taken by Canada in 1939. The report which speaks of participation in the Canadian National Exhibition stated that exports to Canada from India showed increase as Canadian industry was developing fast in response to war demands and the upswing in Canadian economy would probably be reflected in increased imports from India. The trade returns for 1940-41 which record a fairly big increase in India's imports from Canada in spite of the working of import control do not indicate a similar expansion in India's exports to the Dominion as interest in miscellaneous Indian goods has evidently waned after the outbreak of war.

Jute in Brazil

The success of jute-growing experiments in Brazil has been reported more than once. The work of a Japanese diplomat in this connection has been referred to and the beginnings of jute-growing on a commercial scale have also been noticed. In the June issue of the Indian Central Jute Committee's bulletin reference is made to the reports appearing in a Brazilian paper to the effect that Brazil has succeeded in growing jute. It is reported that the golden fibre finds a favourable habitat, the plants attaining greater proportions than in India. The Amazon Industrial Company tried cultivation with seed imported from India and the area sown in the municipality of Parentivs in the Amazons yielded 10 tons of jute in 1937; 60 tons in 1938; 160 tons in 1939 and 350 tons in 1940. The present crop is estimated at 1,000 tons. The progressive increase in both the area and yield shows that cultivation is no longer in the experimental stage. According to the analysis made by the Ministry of Agriculture it is claimed that the fibre of Brazilian jute is more resistant than that of Indian jute. The most cheerful item in the bulletin for an exporting country like India is the apprehended shortage of sacking in Argentine. Contrary to the usual practice the Argentine bag manufacturers had not until recently purchased burlap in sufficient quantities to manufacture bags to meet the demand for bags during the coming harvest of corn which is expected to be the largest on record. Only recently the Argentine Agrarian Federation sent a representation to the Minister of Agriculture requesting him to interfere and save the corn-grower from a bag famine.

Rising Expenditure in Japan

Japan's Budget for 1941-42 reveals the limitations of the Konoye Cabinet. The Diet approved the estimates which show that the fourth year of war has taken heavy toll of the

revenues which increase more slowly than expenditure. Total expenditure for 1941-42 is estimated at Y6863 millions showing an increase of Y760 millions on the previous year, or after adjustments to the special military account, an increase of 696 millions. The fighting services alone claim 2,628 million yen or 38.3 per cent of the total expenditure. In spite of the fact that the Budget expenditure is divided into two parts, Recurrent and Provisional, the very considerable increase over the last five years shows that Japan faces continuous and immense strain owing to the enlarged gap between revenue and expenditure. Only the expenditure on the Imperial Household has remained stationary at yen 4.5 million, and except for agriculture and forestry, the civilian departments too are keen on additional funds. The rise in expenditure is greater again than the anticipated rise of 541 million yen in revenue from taxes. Total tax revenue is put at 3,705 million yen and the improvement is expected to proceed from the higher yield of the Corporation tax, the excise on saké and the inheritance tax. Revenue from stamps and several Government enterprises is expected to show an increase but ordinary tax revenue under other heads is expected to decrease more or less.

The segregation of the war outlay has long been a feature of the Japanese Government's accounts which do not mask the rise in debt service as the Finance Ministry too is asking more for 1940-41. In spite of the anticipated increase of 765 million yen in total revenue the Government will have to keep on borrowing. Bond issues in 1941-42 are expected to total 1,880 million yen even after the successive increases in taxation and the continuous expansion of non-tax revenue which provides a substantial part of the Government's provisional expenditure. The Budget estimates evidently do not include two special appropriations of 1,000 million yen in February and 4,880 million yen subsequently to the special fund for military expenditure. In addition to the budget provision total military expenditure in 1941-42 will be oven Yen 7,500 million, a figure 7½ times higher than the comparable total for 1935-36. It is known that total expenditure on the China Incident (estimated up to January 1942) is put at 23,335 million yen of which the bulk has been raised through bond issues. Total military expenditure after adding up the special appropriation of 4,880 million yen will be 7,508 million yen, a total exceeding the budget total which provides for considerable fresh borrowing. In spite of the distribution of new debt under various heads there is the fact that both taxes and bonds have multiplied. Taxation has gone up from 925 million yen in the pre-war year to 3,705 million yen and bond issues since the beginning of the war have risen by 18,876 million yen. Every month the Treasury issues new bonds and the monthly average of 589 million yen in 1940-41 shows that the recurrent and provisional revenues added together have provided less than half the total outlay for 1940-41. It is known that the contributions from borrowers have been less than the enormous totals put in the finance accounts, because in spite of special campaigns and the control over the capital market, the public has not responded to the extent of the demands made on it. The actual subscriptions to bond issues in 1940-41 were lower than in 1939-40 and the gap between Estimates and Actuals widened with the result that the estimate of the net addition to national debt in 1941-42 has been scaled down to 6,367 million yen, a total which includes the borrowing programme of 1,880 million referred to in the Budget Estimates.

Cawnpore Cases

A digest of rulings given by the Labour Commissioner of the U. P. has been prepared lately by the Employers Association of Northern India. The value of such a digest is likely to increase with the increasing frequency of references to duly constituted authority. That the digest will itself breed the habit of difference cannot be expected, but the nature, extent and origin of justiciable disputes, indicated by the digest prepared for the use of members of the Association by Mr. S. S. Saraf, Bar-at-law of Cawnpore, shows that conciliation has been of demonstrable value in Cawnpore. Cases decided by the Labour Commissioner have evidently been brought already to the notice of employers through circulars, but the digest has a value far removed from that of any copies of circulars, in that it has the merit of orderly arrangement and has an index which makes reference easy. It is obvious that in the infancy of trade unionism there are likely to be extravagant claims and fanciful grievances. It is here that the Labour Commissioner's intervention has proved fruitful. Questions relating to dismissal, reinstatement and absenteeism arose in most of the cases decided by the Labour Commissioner between October 1938 and January 1941. The value of an impartial judicial authority in such cases has been amply proved by experience everywhere and the considerable improvement in the labour situation in Cawnpore must be attributed to the work of the U. P. Labour Dept. under successive Commissioners. It is correct to say that individuals' cases were dealt with but points regarding lightning strikes arose occasionally and one of those decided by the Labour Commissioner resulted in a decision upholding dismissal for refusal to work. The digest must be of value in a country in which

industrial law and practice have so far not taken any definite shape and this is naturally a field where case law may naturally be deemed more binding than substantive law.

National Indian Valuation

THE latest quinquennial valuation report of the National Indian Life Insurance Company prepared by Mr. V. A. Burrows shows that the number of policies issued at the end of 1939 after deducting reassurances was 17,885 assuring in the aggregate Rs. 263.081 lakhs. A 50 per cent increase in new business between 1934-39 accounts for the rise in total assurances and premium income indicating also that progress since Mr. S. P. Bose took charge as Manager has been outstanding. The Valuation Report refers also to an increase of about Rs. 15.7 lakhs in the Life Fund during this period. The average rate earned on the funds was 4.74 per cent but having regard to the grounding of interest rates the Actuary has decided to change the Valuation rate to 3½ per cent from 4 per cent. In spite of the reduction, the surplus is not what it should be if interest rates had been fairly high and the expense ratio had undergone reduction. The Actuary records his opinion that the Company's mortality experience was favourable. But the surplus is by no means as large as expected and a reduction in bonus rates is recommended. The Actuary has recommended that a reversionary bouns of one half per cent of the sum assured be added to participating policies in force in respect of each year's premium; where payment has ceased, bonuses should be granted upon the basis of the number of years in which the policies have been in force. Interim bonuses on the same basis for policies which become payable before the next valuation are recommended.

The directors have accepted the recommendations and have declared a bonus of Rs. 5 per thousand per annum on all with-profit policies in force on December 31, 1939, and interim bonuses at the same rate on all participating policies. The directors explain the reduction in the bonus by reference to the depreciation written off in the 1939 accounts and to new legal provisions which compel investment in giltedged with a poor yield. It is, however, pointed out that the net surplus of Rs. 2,75,310 is satisfactory. Out of this Rs. 2,19,839 has been appropriated for payment of bonus at rates recommended by the Actuary; Rs. 24,427 is to be carried to Shareholders' Account leaving Rs. 31,044 to be carried forward.

Asiatic of Bangalore

A progressive life office whose record has been consistently good in spite of its restricted range is the Asiatic Government Security Life Assurance Company, Limited. The Bangalore office has always been distinguished for sound and efficient management. Expansion of business has latterly been affected by the War, and in this respect, the Company has met with the setback reported by many other companies. The 1940 report states that new business resulted in the issue of 1297 policies for Rs. 17,14,500 of which Rs. 9.000, was re-insured. Premium income for the year showed only moderate increase at Rs. 5,74,566/10/3 and the addition to the Life Fund from the year's surplus is nearly Rs. 2 lakhs. This will give as much satisfaction as the notable fall in the expense ratio for the year shown at lower 34.4 per cent against 36.86 per cent in 1939. A slight increase in the yield on the Funds reported by this office is of less import that the limited number of claims presented. The total outgo under claims by death and maturity was Rs. 12,79,32/15/0 and after provision for depreciation, tax and all expenses, the Fund receives an addition of nearly Rs. 2 lakhs. The slow growth of business of the Bangalore office is a reminder of the strenuous competition for business in Mysore where the State offers rival attractions. The sound position of this office is discernible more than ever in the balance-sheet which points to prudent and effective management.

THE post-war reconstruction committee foreshadowed by the Commerce Member a few months ago has started work with unusual expedition. And the reports of the first meeting show that the Government's ideas of the work of the Committee are by no means identical with those of the press which was quick to comment on the proposal when it was first made. Not that the two sets of ideas are conflicting and contradictory. But there is a difference in emphasis which in matters of this kind is, indeed, a large and material difference. So far as I am concerned, at any rate, I am more or less incapable of regarding post-war economic reconstruction as anything other than a matter of adjusting the national economic system to such shifts in production and demand as the cessation of hostilities may cause. That, of course, has both its internal and its external aspect. Internally, the machinery of production and consumption has to be geared to the needs of national economic progress in the long view. Externally, we have to re-organise the system of our economic relations with the rest of the world, largely from the point of view of our conditions and requirements, and in part, with a view to help the world, of which we are a part, to get on to the normal conditions. This is what reconstruction naturally conveys to the ordinary economist and businessman. But Governments, especially those who have played an active part in the war, either as belligerents or as suppliers, have other preoccupations. The volume of goods and services which the Government of India buys or has contracted to buy runs at any time into several crores. Knowledge of when the war will come to an end would be very handy in fixing the term of contracts entered into by the Government for war supplies. But in the absence of such knowledge, the conclusion of peace will find the Government with considerable quantities of things which are no longer wanted; and more will be coming in performance of contracts entered into previously. It is only in respect of the subordinate services of clerks and chaprassis that Government is in a position to provide for termination of service at the end of the war. Others are supposed to have the power to drive hard bargains with the Government; and the authorities must be prepared to receive and pay for goods which all of a sudden cease to be needed.

That naturally is the primary preoccupation of the Government, so far as these post-war problems are concerned. Next to it comes the question of promises made to certain classes of workers and certain industries that they will not find the authorities to be guilty of a low kind of opportunism. Then there is the general interest of the Government in the avoidance of crisis of any kind. Major upsets in economic life have their repercussions over the widest spheres. Fall in revenue, social discontent and even the spectre of revolution are all associated with widespread economic distress. The Government's attitude to post-war reconstruction may have a different starting point. But it converges at the same point as the attitude of economists and businessmen.

Nevertheless, Governments are never known to follow up any position to its logical conclusion. This is particularly true of a government of officials. And in this case, there is the additional argument that practically nothing can be done in respect of the wider economic problems, as we have not the faintest glimpse of the shape of things to come. If the Committee gives more attention to the issues to which it can give concrete form, no one can grumble. Its first meeting shows that the idea is to start with the practical problems. The Committee prefers to call itself a Co-ordination Committee and create a new committee for each of the main divisions of its task, viz., labour and demobilisation, disposal and contracts, public works and purchase, and trade, international trade policy and agricultural developments. The four divisions will be found to be somewhat disheartening, inasmuch as the public will expect the last one to have a number of sub-committees and the first three to be dealt with by one or two committees of a predominantly official character.

It must, of course, be recognised, though the official committee does not seem to recognise it, that questions of trade, industry and agriculture are matters for expert enquiry at a late stage, rather than for official investigation at present. We shall leave this aside for the present. But in respect of the first three, it seems to me obvious that what may be called the liquidation of the Supply Department

must be distinguished from the task of instituting public works and government purchases which will reduce the impact of peace on the internal economic life of the country. Once this distinction is seen, it will be readily recognised that disposals and contracts form the work of official liquidators drawn from the departments closely connected with it. To dispose of unwanted stores in the conditions which will prevail after the war, the hammer, and not the brains of experienced officials, is the more servieeable instrument. Likewise, the solution to the problem of finding new employment for discharged labour and demobilised recruits depends on what is done in regard to public works and in regard to trade and industry. In all this, nothing is gained by imagining large questions of policy in what are mere administrative matters; and, what is worse, there is real danger in viewing questions of policy as executive tasks to be done in the routine way.

Both these dangers appear to be quite real. Separate committees for disposals and contracts and labour and demobilisation do suggest an exaggeration of their importanee, though I must say that, in this, I am speaking subject to correction. But my point will become clear when you consider the question of public works and government purchases. It is obvious that public works are expected to provide relief for discharged labour and for the glut of certain goods caused by the disappearance of the demand on war account. But what sort of co-ordination can there be in public works programme, if the matter is to be considered only by an inter-departmental Committee, in which the provincial governments will have no manner of representation? Here, I say, is a question of policy reduced to the position of a departmental question confined within the flaps of an official file neatly bound in red tape. One would think that, while a ponderous problem like post-war reconstruction may be simplified by eschewing the more complicated parts of it, what is attempted should not be unduly simplified. I cannot help suspecting that the Central Government finds it difficult to resist the temptation to ignore the Provinces altogether and to forget that there was ever such a thing in India as provincial autonomy.

Indifference to the part of the Provinces is all the more surprising in view of the following culled from the report of the proceedings of the first meeting of the Commttee.

> It is not necessary to labour the point that acceleration, or, contrariwise, the decline, of public works expenditure, and/or expenditure by Government departments generally, can powerfully influence the labour market and the economic situation generally. It is, therefore, a matter of great importance to arrive at an agreed public works policy, the object of which would be to accelerate public works as the various demands for war purpose taper off. It will be obvious that different types of public works will give very different types of employment, direct and indirect, according to the types of labour, materials etc. involved and investigations of these aspects of the matter will be required before an adequate policy can be evolved. It will also be necessary to take into account the possible acceleration of e.g., housing projects and of considering ways and means of stimulating private capital construction as fully as possible.

The link between public works and labour is clearly recognised; but in framing a public works programme, the authorities have no thought for the Provinces!

In regard to the fourth Committee which is to deal with post-war problems

of a truly economic nature, it is interesting to note that the whole problem is viewed from the angle of tariffs and consumer's interest and the like, a kind of jargon that has begun to sound strangely archaic in modern ears. Here is a first rate question of policy which is in danger of being prejudiced long before it comes up for consideration by official *obiter dicta*. It is tempting to write on this question, how it is linked inextricably to all our aspirations in the economic sphere, to our vital need for the most comprehensive planning we can devise, how we cannot afford to let it be viewed as a matter of convenience for this importer or that. But I refrain from doing so, as I have dealt with all these aspects more than once in these columns.

Journalism in India has been a chaotic growth, sometimes more weeds than crop, and always with an overgrowth of erotic plants which encumbers the natural flora of the land. And a journalist of deserved eminence is therefore a rarity. But Sir C. Y. Chintamani whose death was reported early in the week was one of those rarities which must put heart into the struggling members of a forbidding profession. In fact, when you think of it, law is the only profession in India which has dangled dazzling prices for young aspirants. It was in law that the well qualified Indian found himself rising to the heights for which his qualities fitted him. The great lawyers therefore were prominent in the public life of the country and lived fuller lives than any other class of Indians. But the case of journalists was far different. In the first place, it is idle to suggest that the foreign journalist cannot give a few points to the average Indian journalist. Secondly, the conditions of Indian journalism, both as a business and as a profession, are such that the foreigner has the advantage. Thirdly, Indian journalism by the very nature of its tasks comes into clash with established authority. And all this must suffice to explain why so few journalists in India rose to a widely acknowledged eminence. There were many, no doubt, on whom a sort of fugitive greatness descended, by virtue of their clash with the Government. There were others who could have acquired —and some did—the blue riband of bland toadyism. But to achieve distinction in the pursuit of a healthy middle course calls for rare qualities in an even rarer combination.

Sir Chintamani, in spite of his association with the Liberals in his later days, may justly be said to have followed that middle course in which what mattered was his efficiency as a journalist and his public spirit as a politician. Neither can be in doubt. His record as a journalist must rank higher for the reason that, unlike others who strayed into journalism without the advantage of a higher education and remained content with the adventitious importance which a virtually official position gave them, Sir Chintamani got over his handicap by laborious study of whatever was of importance to his work. Without being a scholar, Sir C. Y. Chintamani was well read and informed. Without being a Congressman, he was sincerely nationalist, without being polished, he was charming. Sir Chintamani was a man of warm affections; and for decades he had a place in the public life of the U.P. which the provinces will be hard put to fill.

Simla, July 2.

ARRANGEMENTS are briskly proceeding for the constitution of the various committees announced by the Government of India in connection with post-war economic reconstruction. The Commerce Member, Sir Ramaswami Mudaliar, has already proceeded on a lengthy tour and will utilise the occasion to discuss the subject with economists and industrialists. It is understood that Dr. Gregory, the Economic Adviser, is also proceeding to Lahore and some other provincial centres with the same object in view. Invitations have already been issued to leading Indian Universities to suggest suitable names for the proposed consultative committee of economists. The constitution of the four planning committees has also been tentatively fixed, and as soon as the consent of the members invited to serve on these bodies has been secured, a formal Government order will follow. Though no definite date has been fixed for the preliminary meetings of these various committees, it is expected that they would have begun their work before the Central Legislature is due to meet for its autumn session. Very probably these various planning committees will appoint a number of sub-committees for the examination of particular problems and the submission of suitable recommendations. It is the hope of the Commerce Member that, in the same manner as Indian scientists have come forward enthusiastically to help in industrial research, the large body of Indian economists also will give the benefit of their advice and assistance in collecting materials and organising plans for successfully meeting the problems of post-war reconstruction.

* * *

Sir R. K. Shanmukham Chetti who has been appointed by the Government of India as the head of their Purchasing Organisation in the United States is expect to leave India before the third week of July. The expert staff necessary for his work is being arranged for him in London through the Indian Stores Department. In connection with his work, a new section for regulating the purchase arrangements on the financial side is being created in the Supply Department. An officer with the rank of an Accountant-General will be appointed as the head of this section. It is understood that the "lease and lend" arrangements now operating between the United States and the United Kingdom will benefit India also. It is proposed that the cost of all goods and materials bought in America by the Indian Purchasing Mission will be debited to the account of the United Kingdom to enable the Government of India to settle accounts directly with the latter in the same way as purchases made hitherto in the United Kingdom. No official information is yet available regarding the appointment of Mr. Ahuja as the Indian Trade Commissioner in Canada. Evidently the usual preliminaries in settling details with the Government of Canada through the British Government in London are responsible for the delay.

* * *

Details are not yet available of the agreement reached between the Government of India's delegation and the Burma Government. The assurance, however, has been forthcoming that India's vital interests have been adequately secured. Particular attention has been called to the statement made by the Burma Premier that the two Governments will act in close co-operation to achieve the objects of the agreement and will freely consult each other on points of difficulty that may arise. It is regarded as certain that a joint board will be set up with the authority of the two Governments to make a detailed study of the immigration question, for it raises complicated problems upon which even Mr. Baxter in his report did not feel competent to express a definite opinion. Of far greater importance from the Indian point of view is the need to ensure that the large Indian population settled in Burma gets fair and equitable treatment. It would appear from reports current here that Sir Girja Shanker has not agreed to anything which would endanger the legitimate interests of Indians who can claim to be permanent settlers in Burma. Good news has also come from Ceylon that the Board of Ministers after their recent conference with the Governor may soon endeavour to re-open negotiations with the Government of India after seeing the agreement entered into between the Government of India and the Government of Burma.

* * *

The final agenda is now available for the meeting of the Transport Advisory Council which is to begin on Monday next. Owing to the importance of the meeting, all the four provinces where the normal constitution is now working, are sending their Ministers as delegates. Other provinces are being represented by Advisers or heads of Departments. The principal business of the meeting is to correlate the development and use of road, rail and inland water transport and find possible methods of furthering them in order to make the fullest use of available facilities. Owing to the difficulties and complications created by the war, this have become urgently necessary. As regards the Motor Vehicles Act the meeting will consider certain amendments to remove existing defects and also discuss generally the working of Chapter 4 of the Act which relates to the control of transport vehicles. Another important question to be considered is the possibility of more complete reciprocal arrangements than now exist for the exemption from dual taxation under the Provincial Motor Vehicles Taxation Acts of vehicles moved from one province to another. The agenda includes also a number of proposals for the adequate maintenance of roads. As this is the first meeting of the Council after the outbreak of war, great importance is attached to these discussions between the representatives of the Government of India and those of the provincial Governments.

* * *

It is understood that the Governor-General's announcement extending the life of the Central Legislature is now imminent. The delay has largely been due to the fact that the problem of the Provincial Legislatures whose term also is due to expire, has been linked with it. A number of parties—Governors, Ministries, the Secretary of State and others—had to be consulted. Apparently it has now been decided to apply a uniform policy and postpone elections for the present. The Central Legislature will not be able to meet before November but during the next few weeks a number of committees including the two Standing Finance Committees and the Public Accounts Committee, will meet. Of particular importance is the first meeting of the Defence Committee which will meet late in July. As a result of the welcome which public opinion in this country has given to this Defence Committee of the Central Legislature, there is no a proposal to have a committee of ten Princes representing the Chamber of Princes also as an adjunct to the Defence Advisory Committee to work on similar lines.

(From Our Correspondent)

Bombay, July 2.

IF the riot situation attracts more interest among newspaper readers than the differences between Mr. K. M. Munshi and the Mahatma, the reason is not far to seek. The displays of violence are calculated to reduce interest in paper controversies and the very disturbing conditions through which Bombay is passing have made it necessary for some to suggest extended cinema sessions with more and brighter talkies particularly as the release of several films had been displayed. A pleasant form of escape no doubt for many but not without value as demonstrating that in the film industry there is neither Hindu nor Muslim. The sporadic stabbing incidents have again impelled businessmen to ask questions as to the efficiency of the administration. Under the auspices of the Indian Merchants Chamber a meeting of both Hindu and Muslim businessmen was held last week. The meeting was widely advertised and well attended, and its resolution asking the Governor to take immediate and effective steps to put a stop to the riots and to see that law and order are restored in the city was a reminder of acute dissatisfaction. A swift recovery in all markets was on the cards last week, but improvement was once again prejudiced by the untoward incidents. There were pleas for mutual tolerance and co-operation in re-establishing a friendly atmosphere by the elimination of bitter language in the press. Another resolution drew the attention of the Government to the effect of continued unrest in the industries co-operating in the war effort. The resolution gave expression to the view that the prosperity of the City based on co-operation would disappear if the present situation continued.

The States Ministers meeting has not created any special flutter in political circles here. The Princes' notions of their own importance may be readily communicated to their ministers, but the Government of India is known to be unwilling to set up any advisory council on which the leading politicians are unrepresented. Politicians here do not attach much importance to the appeal for a political truce simply because it comes from the States which are doing so much for the war effort. While Sir Akbar Hydari's claim that Indian States are valiantly shouldering additional expenditure arising from the war to show that Indian States are imposing additional taxation like British India. Discussions relating to the definition of expenditure chargeable to the civil list of the Rulers are known to have progressed in view of the Chamber of Princes' expression of opinion on the subject. Though the views of the committee considering the subject will not bind the princely order it is expected that more rulers will find it advantageous to separate their household expenditure from public expenditure.

The Servants of India Society has lately been busy and important decisions were taken as regards the continuance of the Duyan Prakash under Mr. S. G. Vaze as Editor. An important visitor was Sir B. Rama Rau who spoke about the position of Indians in South Africa. Recent improvement in inter-racial relations was commented upon, and a caution was sounded against Indians making common cause with the Bantu races. The United front was not at all advisable in the opinion of Sir R. Rama Rau because the coloured people were fated to remain subordinate for eternity and it would be a mistake for Indians to identify themselves with the natives as their own chances of climbing up would be spoilt. He argued that war and the revival of Marshal Smuts authority would lead to an easing of the position and if one goes by the relaxation of rules in favour of Indian visitors the Union Government is no longer stern and unbending. He added that Britons in South Africa greatly impressed by Indian's help in the war would help Indians in the future, and there was reason to look forward to closer relations with the Union. While the Servants of India society's doings are of small import the Poona meeting of Bombay Liberals last week-end has been treated as very important. The Liberals' views on the deadlock and the war situation have been reiterated by Sir V. N. Chandavarkar. The Liberals want to co-operate with the war effort even if it is inspired by officialdom but on certain conditions. There has been a demand for a national government drawn from the main elements in Indian public life. The Liberals' offer is based on the resolutions of the April conference which have been incontinently rejected by the Secretary of State.

The Indian Merchants Chamber has lately addressed a letter to the Fact Finding Committee (now in Bengal) on the subject of help to the handloom industry. The Chamber records its opinion that a definite line of demarcation should not be drawn as regards the yarns used by mills and weavers. It is urged that such demarcation would indicate a conflict of interests which is not justified by the circumstances and which should be avoided. It is pointed out that it would be difficult to secure proper enforcement of restrictions on the use of yarns by handlooms and mills respectively. It is stressed that the handloom industry possesses exceptional strength and has existed in the fall of mill competition. In the manufacture of coarse cloth the handloom can always hold its own. It is further pointed out that in regard to the finer types of goods handloom production can face any challenge on account of its superior designs which are in general. The handloom weaver has an advantage in having local markets and his knowledge of local preferences stands him in good stead in making and selling quality fabrics. The Chamber adverts to the existence of difficulties, and suggests that Government should give assistance to enable the handloom industry to make use of its natural advantages. It is urged that cottage industries deserve special encouragement at present and help should be given through the Industries Department, and through the formation of co-operative agencies. The Chamber refers also to the possibility of selling handloom goods in foreign markets. Artistic goods will sell readily in foreign centres if the Trade Commissioner does special sales promotion work. Exhibits, classified and arranged, should be provided and designs and patterns in request among foreign customers should be forwarded.

There has been in the Bombay press a detailed reference to the very grudging and limited assistance given by the Government of India to the sponsors of the new shipbuilding yard. It has been pointed out that press comments in depending entirely on press messages published last year have gone astray in suggesting that Government had given some kind of help. Mr. Walchand has been at pains to correct misapprehensions as to the promise of importation facilities in connection with special steels needed for bulls. Priority certificates and the help of the British Purchase mission in the U. S. A. are yet to come because the Government of India has declined to give priority licenses on the ground that the company's actual programme is not known and there was no assurance that ships would be ready by the end of 1942. It has also been pointed out that no facilities regarding railways were afforded and the Scindia Steam Co., spent its own money for a railway siding that has not yet been got ready.

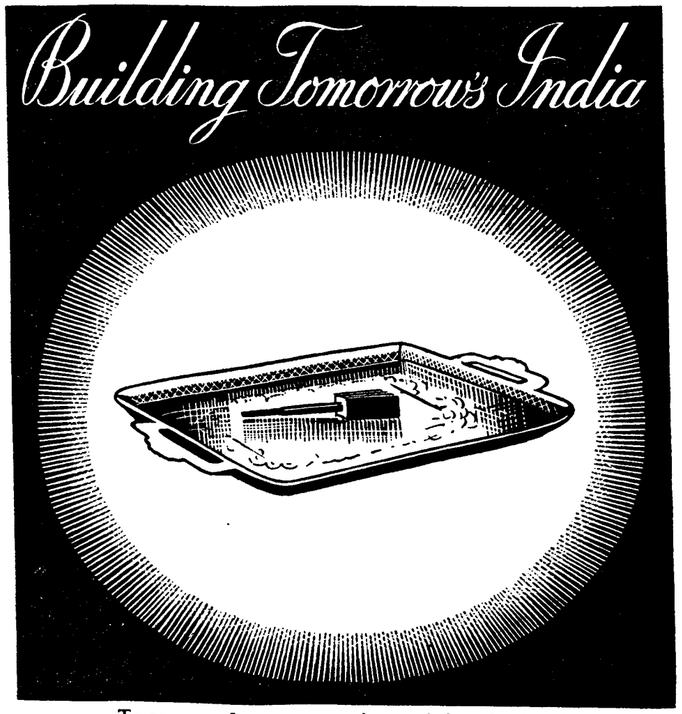
W. G. GROUNDWATER, *General Manager.*

(Continued from page 3)

place of the rupee counterparts thus surrendered by the Reserve Bank, the Bank has been given **ad hoc** Treasury Bills. This information enables us to ascertain the amount of rupee counterparts, which the Reserve Bank may now be holding either as rupee counterparts or in the form of loans into which some of the rupee counterparts were converted recently. On March 21, rupee securities in the issue department stood at Rs. 49.62 crores. The return of the Reserve Bank of March 21 is that on the eve of the transactions that were put through in connection with sterling debt redemption. On June 27, rupee counterparts in the issue department stood at Rs. 91.32 crores. That is to say, between March 21 and June 27, there has been a rise of Rs. 41.70 crores in the Reserve Bank's holdings of rupee securities in the issue department. We cannot be far wrong if we presume that this rise is entirely accounted for by rupee counterparts. Out of its holdings of Rs. 41.70 crores in rupee counterparts, the Bank has handed over Rs. 24.16 crores to the Government for cancellation. The balance in the hands of the Bank is, therefore, Rs. 17.54 crores. A good part of the holdings thus left in the hands of the Reserve Bank must now be in the form of 3 per cent loans. The Reserve Bank should find no difficulty in slowly unloading these securities on the market.

This question must be viewed in conjunction with the proposals which we have put forward in the editorial section to-day for the raising of rupee funds for the further redemption of India sterling stocks. We find, with gratification not unmixed with concern, that all our suggestions made at the beginning of the war in connection with a scheme for the redemption of sterling stocks are being accepted, one by one, in slow, leisurely stages. The latest suggestion accepted is that it were better to give Treasury Bills to the Reserve Bank rather than rupee counterparts. We are not without hope that some of the suggestions we have put forward this week will, in due course, prove acceptable to the Government. What we would like to urge is that the belated and piecemeal fashion in which our first suggestions were accepted by the Government was responsible for sterling debt redemption proving more costly than it need have been. We can only hope that there will be quicker response to our present suggestions.



There was slightly more business passing in the exchange market more export bills and more remittances.

Banks were sellers of T. T. at 1s. 5 15/16d., for ready up to six months forward; and banks were buyers of T.T. at 1s. 6d., for the same delivery.

Banks were buyers of three months' D.A. bills at 1s. 6 7/32d., for three months and 1s. 6 9/32d., for the fourth month.

Interbank call money quoted ½ percent; all lenders.

Firms' money for call and short quoted ¼ percent; and for one to four month deposits ½ percent.

To prepare for tomorrow the myriad tools of Industry beat and clang today.

It is on the spanner, the screwdriver, the wrench, the hammer—that Industrial Progress depends.

In every tool and instrument rendering service in the cause of Progress—it is the strength of steel which gives them the dependability they must possess.

THE CHIEF COMMERCIAL MANAGER,

NORTH WESTERN RAILWAY, LAHORE

Jute and Jute Manufactures

(From Our Correspondent)

Calcutta, July 3.

AGREEMENT has now been reached on the matter of Loose Jute Standards for the coming season and the revised specifications have now been circularised by the Mills Committee to all their members. While the specifications are not ideal, they have been accepted by selling interests as the best solution of the difficulty likely to be extracted from the Mills and they have been accepted with every intention of endeavouring to work them, provided individual mills afford support. But it must be recognised that without that support, maintenance of the standards cannot be hoped for. In this connection, the Mills Committee circular to their members is regrettably unemphatic. Instead of frankly admitting that last year's deliveries averaged practically a grade higher than the official standards, and that to all intents and purposes Mills should be prepared to accept the equivalent of an Old Crop Bottom as a New Crop Middle, this aspect of the situation is mentioned in the most fortuitous manner and in the most milk and water phraseology.

It is also much to be regretted that no suggestion is made to Buyers that they should limit their purchase of Bottom numbers at least during the earlier months the season. The whole scheme could easily be wrecked by business being transacted in any volume in too low an assortment. Already there have been reports of offers of New Crop in assortments of 50-50 or 60-40 Middles and Bottoms. These are doubtless due to doubt in the minds of sellers that the Mills are really sincere in propounding the specifications of the new standards. Meanwhile such subversives offerings are being withheld by most brokers while they endeavour to impress on sellers the necessity to limit early offerings of Bottoms to 15 per cent.

What is more important than the fixation of standards is to devise means whereby they shall be adhered to. We pointed out last week how the standards in themselves contained the germ of automatic enhancement by the mere fact of the percentage of cuttings specified for Tops and Middles being defined as the maximum instead of the average. Another weak point is the widening of the specified margin between a Middle and a Bottom by the introduction of a colour qualification in the former. Stabilisation of the standards will not be easy and every practical means towards this end should be encouraged. The Mills appear to have accepted the principle of Standard Sample Boxes being prepared, but only " in the course of the current season ". There seems no adequate reason why standard samples should not be prepared immediately. Imports at the very beginning of a new season do not provide quality which can be set up as a standard which can be maintained for more than a few weeks. The colour of first washings is high and cuttings are almost non-existent. It is for the later arrivals, representing the great bulk of the crop, that standard samples are required, and to make these, old crop jute would be much more suitable. There must be in Mill Godowns jute of every conceivable description from which standard samples could be prepared, and we fail to see why they should not be so prepared and prepared immediately, if they are to be of any value in ensuring that the standards now laid down be adhered to. It is particularly desirable that such samples be prepared officially by, or with the approval of, the Mills Committee, for it is only too apparent that many individual mills are still imbued with the recollection of old season deliveries and will take no little persuasion to accept the newly specified standards as correct, if they turn out something like a grade below last year's.

The first of the Preliminary Forecast figures have been issued and show to date a prospective area sown of 46 percent, or rather more than 7 annas, of last year. The Preliminary figures of course deal only with area and not with out-turn. A somewhat curious foot-note is added to the batch of figures issued today, to the effect that the area figures for new crop represent the actual licensed acreage which is one third of the acreage recorded in 1940 under the Bengal Jute Regulation Act, with minor modifications." Against these are placed last year Final Forecast acreage figures, and in relation to these the New Crop acreage works out to almost eight annas, a very different thing to one third. One is left wondering whether the area recorded under the B. J. R. Act was very much larger than that shown in the Final Forecast. If the note is to be taken literally it would appear to indicate that the Forecast acreage on these particular districts was out by something like 33 percent. But the note raises another point. The trade is not particularly interested in the acreage licensed but in the acreage actually sown. The note would almost suggest that the licensed acreage had never been checked to see whether in practice it had been adhered to. We take leave to doubt if the licensed area and the area actually sown are in all cases identical, and it is in the latter figure that the trade is interested.

Very litle falls to be reported in Export Jute this week. There has been almost no demand for shipment and the sudden rise in rates as a result of the advance in Fatka, has put Mill buyers out of the market completely. A sale was recorded of Lightnings (old crop) for storage at Rs. 20 under the Septr Fatka quotation, while New Crop Firsts could be bought for August at Rs. 4 and for Septr shipment at Rs. 5 under Sept. Fatka. Nominal quotations for Old Crop are Rs. 56 for Firsts and Rs. 48 Lightnings. A few sales of Cuttings were reported to Mills at Rs. 20 to Rs. 21 for superior Narayanganj and at Rs. 14-9 for Tossa Cuttings. The Futures Market has been somewhat hysterical for no very apparent reason. The Bulls have been rampant and rushed the price almost without pause from Rs. 64-8 up to Rs. 74. There has been a slight relapse since then and the Forecast figures seem to be rather larger than they had been gambling on, with the result that the rate has dropped to Rs. 68-8 at the close. It is wild, unreasoning movments such as those of the past week that bring the jute trade into disrepute abroad and add force to the Mills' reiterated demand that the Fatka market should be closed as a menace to the trade itself and a discredit to the industry in the eyes of its customers in the world markets.

The Fatka ramp was naturally reflected in the prices asked for Loose Jute with the result that business has been on a small scale. A fair quantity of " X " Bottoms were taken up at from Rs. 6-4 to Rs. 6-12. European standard Bottoms sold at Rs. 8-8. Buyers are chary of New Crop at the price now asked which is on the basis of Rs. 13-8, Rs. 11-8 and Rs. 9-8 for Indian Jat Tops, Middles and Bottoms. Conditions in the Mofussil have not been so bad as speculators have tried to make out. In some limited areas there has been damage by flooding but rivers which were high are again subsiding . In the majority of the districts the crop is growing well and the proportion of immature cuttin go is little if any greater than usual.

Demand in the Fabrics section has been distinctly on the light side and there can be little doubt that the level which prices have reached is checking business, buyers only being prepared to place the most urgent requirements at current rates. Delay in telegrams is also a contributory factor to lighter demand on such an uncertain market, for cabled indications may be very wide of the mark before an order comes along. The firmnes of Jute lent some spurious support to Hessians temporarily, but even this was not sufficient to maintain prices and rates are back to where they started.

JUTE

Calcutta, July 3.

TO the difficulty of chronicling contradictory movements in the jute market must be added that of unsaying much of what was said last week. The bull movement has not been maintained and quotations in the Futures market undoubtedly reflect a reversal of optimism. In spite of the hopes engendered by what appears to be disinterested advice as regards the Bengal Government's duty to secure a price well above the Rs. 60 per bale fixed last year, there has been a flattening out on Wednesday. The real cause of damping of original ardour must, however, be the political news obtainable after a day's break in which telegraphic delay played its part.

The jute market which strengthened continuously until Tuesday experienced a reaction when it was known that Japan was unable to make up her mind while the war news by itself was confusing if not depressing. The result is an abatement of ardour among bazar speculators who rejoiced as soon as the September Futures quotation jumped to Rs. 70 and over. The highest touched during the week was on Wednesday when Futures rose to Rs. 72-12 and reacted to Rs. 69-6 not long afterwards. The close was somewhat better but the fall of Rs. 3 in a day has shown that the market's nerves are hardly strong. The general tendency must be described as irregular since the stock exchange has been affected with a passing mood of self-examination. The appearance of preliminary forecast for a few districts merely indicated that restriction was an accomplished fact. There was nothing to generate enthusiasm though it might be urged that communal inquest in East Bengal and flood damage in the northern part of Eastern Bengal were factors making for a further rise in prices. It is somewhat surprising that information about the progress of the new crop has been scanty. No details are available as to the harm done by rain and excessive river levels but mofussil markets strengthened quickly in the wake of Calcutta and prices went up by Re. 1 per maund within a week at most places. It has been noted on Wednesday that the futures market is ruling strong around Rs. 70. The quotation for Ready is hardly known but the discount must be fairly large as before. The lack of interest in loose jute on the part of mills and shippers alike reflects the gloomier feeling that has replaced the easy optimism of a few days ago. The flatness of hessian has blanketed enthusiasm completely and the only reassuring fact is that there is no selling pressure. Sellers of jute who are asking Rs. 7-12 for District Bottoms per maund and Rs. 8-8 for Jat are hardly in a defeatist mood at present. Old crop is tightly held and new crop which attracts the attention of buyers in an increasing measure is not likely to be thrust down the throats of mills when there is all the talk of what the Government should do to jute prices when restriction of acreage is such an outstanding success. The feeling persists that mills will be willing buyers once it is known that the Bengal Government will not wobble. Prices for loose jute, apparently, went up with a rush on Monday when Indian Jat Tops were quoting at Rs. 13-8 per maund, Rs. 11-8 for Middles and Rs. 9-8 for Bottoms. There was not much business after the advance and business in pucca bales was more than ever restricted. Quotations for Continental Firsts at Rs. 57 and Dundee Daisee at Rs. 63 per bale showed that the market had firmed up very rapidly. The subsequent reaction may be viewed as slight and wholly natural by some willing to go by the current indications of weather damage. But the fall in hessian where buyers are again scarce will have a damaging effect on jute and prices today indicate that the trend is downward.

PRELIMINARY JUTE FORECAST, 1941
ESTIMATED AREA UNDER JUTE IN ACRES

	1940	1941
Cooch Behar	45,100*	38,600
Pabna	1,80,000	74,700
Dacca	3,93,700	1,44,750
Dinajpur	1,49,700	71,000
Chittagong	250	300
Jalpaiguri	74,700	33,450

*Revised.

Name of Districts

Or Province	Last Year (A)	This Year (B)
Noakhali	90,700	38,850
Rangpur	3,68,000	1,94,300
Darjeeling	1,600	1,800
24-Parganas	45,000	26,900
Nadia	90,000	56,250
Bogra	1,58,700	57,700

A:—These figures are taken from last Year's Final forecast. (b) These figures represent the actual licensed acreage which is one-third of the acreage recorded in 1940. Under the Regulation Act with minor modification.

JUTE MANUFACTURES

Calcutta, July 3.

NOTHING is wanting to make one deduce that the anticipated reaction came quickly in the wake of a heavy rise. From Wednesday last prices of jute manufactures advanced continuously mainly because sellers declined to do business. It was reported on Saturday that the market became very firm as jute had hardened suddenly. It is true that until Monday there was no striking change in rates simply because dealers were disinclined to follow the rise. Monday, however, saw a change in sentiment and prices surged forward. Nine Porters Ready went up from Rs. 19-4 to Rs. 20-4 and Eleven Porters went up to Rs. 25 from Rs. 24-10. While the recovery in 11 porters last week was slower, the subsequent rise too has been small, suggesting that interest in the latter has shrunk rapidly. Speculative buying of the near positions has reduced the gap between prices for spot and forward delivery. Sellers have on most days shown little interest and the change that is best measured by Monday's quotations is not confined to Nine Porters. A certain amount of interest in Eleven Porters for August/September delivery has been shown latterly though the rate eased on Wednesday to Rs. 23-8 after having been as high as Rs. 24-8. The dull opening on Wednesday coincided with a fall in the Jute futures market combined with depressed sentiment on the stock exchange to push down prices. A week ago it was possible to describe the closing tone as firm, because jute was definitely firmer with Firsts up by Rs. 5.

Restricted sales on the part of mills accounted for the quick rise in the fabrics market last week. Export demand has hardly emerged and the U. S. stock figures for May are not likely to stimulate enthusiasm. The high stability of prices for Heavy Goods at present might lead to a different view but it is generally known that there has been good demand over a week for both spot and forward goods. Latterly activity has died down and prices have been just maintained despite the sharp drop in Nine Porters by 8 annas on Wednesday. B. Twills Ready sold at Rs. 38-6 and earlier in the week B. Twills for October/March shipment were taken at Rs. 36-8. Liverpool Twills for October/December shipment were wanted at Rs. 41 while the rate for ready delivery was Rs. 41-8. Cornsacks at Rs. 38 and B. Twills at Rs. 38 after being done on Monday at Rs. 37-12 show that the fall in hessian has not touched Heavy goods. Sentiment as one may say after the sudden drop is more or less mixed. The jute market, however, is expected to stage a quick recovery and rates today suggest that the market weather has again shifted. The alternation of rise and fall is not peculiar to the jute and hessian market. The stock exchange is in for a dull pause, and the cotton market is in for a bad spell. The steadiness in wheat and seeds may, however, promote a steadier feeling and the only question to consider is the ability and willingness of mills to pay higher prices for raw jute when export demand is admittedly poor and new war orders too do not look like coming in a lump.

COTTON

Calcutta, July 3.

THE cotton market in Bombay has experienced what appears to be a severe jolt. The official announcement that precipitated a slump in New York came on Saturday. It was discovered by many that prices could not rise unchecked merely on the strength of weevil damage in some States. A week ago the market rose sharply. Broach July/August went up by Rs. 10-8 on Friday. Interest in the 1942 crop broadened considerably and the higher premium for the April/May contract showed that buying orders accumulated as soon as all markets showed improvement. A steady rise in Oomras was a feature of the past week, but the intervention of profit-taking prejudiced subsequent improvement. The market since Monday has been definitely irregular and that in spite of the report that if the Khandesh crop is not likely to do very well the Broach crop is going to have the benefit of a good monsoon. The U. S. Administration's views on the prices to be paid for textiles, oil and similar indigenous materials have brought New York prices down. There has been a temporary recovery after a sharp fall in the New York Futures market. Though spot was over 15 cents on most days of the week the outlook was described as unsettled. The reaction in Broach this week has been as sharp as the break in New York. A fall of over Rs. 10 took place on Monday when April/May dropped to Rs. 270. Selling pressure was manifest before the holiday when rates for both July/August and April/May contracts had eased off rapidly. Considering the bad

bent of selling, Oomras and Bengals held up very well. War news had its own effect on cotton this week. The general presumption that the market in New York will be nervous is borne out by the absence of any recovery in rates on Wednesday. In spite of the fact that covering invariably appeared in Bombay after the decline it will require great self-assurance to predict a prompt recovery.

The fall this week may seem strange in view of the firmness in the piecegoods market but the reaction was inevitable in view of the fall in share prices. There is no longer any sign of a war boom and the dry weather has come to an end. Broach April/May will probably decline though the prevailing scarcity of contracts will hold up July/August. The developments in the U.S.A. will also continue to exercise an adverse influence. A hectic rise cannot be expected there though the Senate may pronounce against price control. Bombay has latterly been hesitant on a new view of the war situation though it is still expected that Japanese demand, particularly for spot cotton will not fall, and some hope is placed in Viscount Kano's remarks to *Reuter*. The Bombay cotton market, however, has demonstrated that medium and short staple varieties will not decline as abruptly as Broach, as mills will provide support at every stage mainly because of fears of a short crop and the Japanese will take some styles.

PIECEGOODS

Calcutta, July 3.

THERE is not much to add to what was said about the brisk buying of goods. It has been reported from both Bombay and Ahmedabad that demand for mill goods, which are on the average at least 25 per cent above last year's prices, has broadened of late. Prices have risen again towards the end of June. Buoyant conditions have been reported from all important consuming centres. The progress of the monsoon should in the opinion of the market stimulate sales. In spite of recent fluctuations there is nothing to pull down Japanese goods which are none too plentiful. Quite recently the prices of some standard lines have been raised and this will put an end to apprehensions that the late fall in raw cotton will lead to a fall in the piecegoods. It is known that the price of yarn has gone up by over Re. 1 per 2 lbs. for medium counts and South Indian mills which have sold forward are on velvet.

There is a belief that shipping space will be more freely available for textile exports, and the preparations made in Bombay for an export drive suggest that wartime opportunities will not be neglected. The absence of any demand for Lancashire goods points to the chronic shortage of supplies. Lately there has been more interest in Indian prints and shirtings because of a fear that prices may rise and imported supplies will be even more scanty. Interest in indigenous prints and crepes is said to have extended at Bombay. Some forward business has been reported and the interest shown by Calcutta in mill goods has supported such improvement as has taken place. The piecegoods market is likely to strengthen as mills are likely to get larger war orders and can count also on successful representations concerning difficulties in getting stores and spares. In spite of complaints from handloom weavers in the south there is not likely to be any change in yarn prices. The fall in cotton is not likely to affect the prices of goods as purchasing power is expected to be higher this year.

GOLD

Calcutta, July 3.

THE bullion market has been more or less stagnant. Demand in Calcutta is smaller than ever, and the restricted turnover reported in Bombay has been a persistent feature of market reports this week too. The fluctuations every day have been limited to one pice only mainly under the influence of petty orders for buying or selling as the case may be. The rate for Ready had been virtually unchanged at Rs. 42-2-6 per tola in Bombay for some days while the Calcutta price has been steady at Rs. 42-5 per tola. The absence of export demand remains a feature on Monday at Rs. 42-4 per tola. As the price was still above export parity there cannot be any demand for arbitrage investment demand is governed largely by war news but the slip back in share prices is not likely to lead to any big change in the demand for gold or silver. Buying will develop only when the outlook is much clearer. The current lack for enthusiasm is wholly understandable. The rates for the July and August settlements have been anchored round the spot rate of Rs. 42-3-9 which is slightly above the level to which gold receded in the previous week. The reduced premium for sovereigns since last month has proved that the market is inactive.

SILVER

Calcutta, July 3.

A VERY slight rise in silver hardly indicates any revival of demand. Rates in Calcutta and Bombay have risen lately to a somewhat unexpected degree. The small rise on Monday was independent of week-end developments. The change in prices must be put down to the nervousness induced by renewed fears concerning riots and preventive arrests. The market has been dull and narrow in Bombay on all days and the absence of any premium for forward delivery assuredly reflects the belief that no change will come when supplies are large and London and New York prices are unchanged over a long period. The rate for Ready improved to over Rs. 63 per 100 tolas early in the week and stands at Rs. 63-1 at the time of writing, but forward rates receded on Monday and since with the nearness of the July settlement. There is nothing to raise the interest of operators who cannot trust to the small occasional demand to keep prices ahead. Silver is now more or less a neglected metal and the poor turnover reported on most days alongside of fairly large stocks has shown that trade demand alone cannot galvanise a dull market into activity.

The lack of fresh incentives to large-scale business is regretted and the rate for August delivery Rs. 62-14 per 100 tolas if it shows a small change is below the best touched in the week. The absence of demand and steady prices in London discourage Bombay which may adopt the view that the fall in cotton must be, in the long run, injurious to silver. The market has on most days been dull as ditchwater. Rates have moved within one anna and the rise and fall with a steady tone as usual is a sign of purely professional activity. As has been remarked gold too has been dormant when the share market has been fairly active. The brokers have necessarily restricted their own commitments.

WHEAT

Calcutta, July 3.

THE wheat market has more than demonstrated its confidence. Prices this week, without recording any big rise, have shown that changes in up-country stocks exercise little influence on sentiment. At a time when fluctuations are the rule, the wheat market preserves a solid front. At the end of last week it was apparent that the largeness of the exportable surplus in other countries or the U. S. proposal to limit the rise in commodity prices would not lead to any scaling down. Though demand for wheat and flour remains moderate the general tendency has been firmer largely in sympathy with the rice market. The latterly easy feeling at Karachi is attributed to up-country advices but the undertone is essentially bullish. If the war lengthens, as is likely, the demand for wheat must increase. The probable rise in war demand will offset any increase in imports against which a duty is operative. The rates at Karachi Rs. 31-6 for Choice White Ready show no marked change as compared with last week, but the premium for September has disappeared. Demand in Calcutta has kept prices steady and Ready is now Rs. 4-9 as against Rs. 4-8-6 last week. September delivery is higher at Rs. 4-12-6. The appearance of speculative selling has been reported after the indications of weakness may disappear. Moffusil advices last week showed again that holders of stocks were not eager to sell and this alone should contribute to early revival of firmness. Spot demand has supported prices in Karachi once again and the war may still make food grains the preferred commodities.

AIR CONDITIONING & REFRIGERATION PLANT
By J. & E. HALL, Ltd., Dartford, England.
Single Compressors for Refrigerating and Air Conditioning Duties, of sizes ranging from 1,500 cubic inches to over 3,000,000 cubic inches, per minute, swept volume, eliminating the necessity of incorporating multiple units, which are not always economical in initial and running costs.
Complete Air Conditioning, Cold Storage, and Cooling Plants for every industrial purpose, incorporating all refrigerants employed in commercial practice.
Current contracts in India include one of the largest Air Conditioning undertakings in the World—the cooling of the Nundydroog Gold Mine in Mysore.

Stock Markets to-day and to-morrow

MARKETS HESITANT : PRICES EASE

LAST week the market was strongly influenced by political factors, but this week it has been almost overwhelmed by them. In the early days of the week, it seemed probable that the market would continue their upward trend. In the later dealings, however, the tendency was arrested and the week closes with the prevailing tendency distinctly better. Some hesitancy has been shown during the last three days in connection with Japan's official declaration of policy towards the Russo-German war which came only to bewilder and mislead. In all markets rumours are particularly rife and at one time a story was current that Japan had declared war on Russia, while, earlier, local prophets urged that Japan had joined Britain. When the political outlook is obscure there is no incentive to invest and the pressure is towards greater liquidity rather than otherwise. This explains the fact that the tendency of nearly all markets is downwards though it is pleasing to note that there has been no panic and little forced selling. With politics still liable to affect the outlook there is little incentive either to investment or speculation. In the meantime, the market remains a prey to the activities of speculators who are most prone to the influence of day-to-day developments and hour-to-hour advices.

* * *

The results of the *Rohtas Industries, Limited* for the year ended October 31, 1940, are quite satisfactory. This is the first occasion when all the three factories, namely, cement, paper, and chemicals worked during a complete financial year. The net profit, before providing for depreciation, amounts to Rs. 18,61,036 as compared with Rs. 12,87,847 in the previous year. This is the highest profit made by the Company in all its career. The profit would have been still higher but for the fact the competition in the Cement industry continued to be severe during the period under review to some extent affecting the profits of the Company. Out of the profit of Rs. 18,61,036 a sum of Rs. 4,50,000 has been transferred to General Reserve against only Rs. 50,000 in the previous year and Rs. 1,00,000 against Rs. 75,000 to reserve for Income-tax and Super-tax. The provision for depreciation and reserve for contingencies is higher at Rs. 8,77,411 against Rs. 6,01,942. In spite of the increase in the profit, the Directors seem to be conservative in the declaration of dividend, which is maintained at Rs. 1 per share. The amount carried forward is lower at Rs. 51,518 against Rs. 1,03,584 brought in.

* * *

The negotiations carried on between the Dalmia group and the Associated Cement Company have resulted in an agreement based on a system of regulated sales, a percentage of the total sales quota being assigned to both the groups in accordance with their manufacturing capacity. The Directors state in their report "that the quota system, while being feasible, was also conductive to the best interest of the entire trade and the groups themselves. Fixation of quota had been objective throughout, and we are glad that we have been able to achieve it." The working of the new arrangement, which came into force on January 1, 1941, encourages the hope that the Cement factory will certainly be reflected in much better results in the coming years. The work of the other units, too, will be all the more encouraging. As the Company consists of four different factories engaged in different industries, the profit of one factory, if it is meagre, may be compensated for by better profits in the other factories. The prospects for the current year may, therefore, be considered quite favourable by the fact that the combination of four major industries will remain as before a balancing factor.

* * *

The rubber industry has done better during the last year owing to the fact that warlike activities depend far more upon motor transport than the case some years back. Taking into account the decision by the International Rubber Regulation Committee to maintain a higher quota it seems reasonable to assume that we shall see no serious fall in the price of the raw commodity. The position in the industry at present should be considered good and the price of the commodity is quoting at a high level of 13½d. per lb. which has latterly influenced the share market. Political fears have, however, reduced business in the rubber share market to small dimensions despite the fact that most dividend announcements this year have been satisfactory. *Cochin Malabar Estates, Limited*, a prominent member of the Peirce, Leslie group, records a sharp advance in earnings for the year ended 28th February, 1941. The net profit, before providing for taxation and depreciation, is Rs. 3,18,470 as compared with Rs. 1,86,316 for the previous year. The rise in profit has been due to the higher average price realised as also the larger crop. The crop was 1,292,185 lbs. as against 1,103,790 lbs. in 1940 and the average selling price was 7.43 annas per lb. as against 6.40 annas per lb. The amount of depreciation stands at Rs. 7,288 (Rs. 8,510). A sum of Rs. 50,000 (nil) has been transferred to General Reserve, while the provision for Taxation is shown as Rs. 20,000 (nil). The directors have declared a final dividend of 20 per cent, making 30 per cent for the year, while the dividend for the last year was only half of this.

The shares of this Company, on the announcement of the final dividend, shot up to Rs. 8-2 from Rs. 6-12. At the present price around Rs. 7-12 c.d. the shares are decidedly attractive, the yield on the shares working to more than 11 per cent, tax-free.

* * *

The observations of Mr. R. H. Parker at the annual meeting of the *Bombay Telephone Company, Limited* supplement the comments and extracts from the annual report which appeared here. The very satisfactory results reported in spite of an increase in taxation afforded a pleasant background for a review that touched briefly on differences in rates and expansion in revenue. The offer made by the Government to purchase the shares explains the Board's decision not to recommend any dividend. The views of the Bombay Shareholders' Association were endorsed, and Mr. Parker expressed gratitude for the recommendation made by the Association to the shareholders who were offered a fair price for their Telephone shares. Mr. Parker mentioned that more than 65 per cent had already signified assent and he hoped that more shareholders would soon write to say that they took the Government's offer, so that the price offered was paid and the shareholders could think about reinvesting the money. An admirable piece of advice for which all shareholders must be grateful. The Company's career may be said to be coming to an end but the address of Mr. Parker invests the last meeting with extra importance, more as he has clearly indicated that a majority are now prepared for the transfer of the Company as a going concern on the terms offered by the Government of India which will have a larger Telephone department within the Posts and Telegraphs Department.

'Watch-dog'

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, July 4.

THE course of prices this week has been rather perplexing. Some hesitancy has been shown during the last three days, when markets awaited with trepidation the news of Japan's official declaration of policy towards the Russo-German war. This news has led to some selling pressure and by comparison with the previous week prices have tended to ease rather than to improve. The close to-day is comparatively firm and has left markets little if anything below the levels at which they stood last week.

The giltedged section presented a very steady appearance and prices remained more or less unchanged. 3½ per cent Paper continued to be steady at Rs. 96. Among other loans, 4 per cent 1960/70 changed hands at Rs. 109/12/0; 5 per cent 1945/55 at Rs. 111/4; 3½ per cent 1947/50 at Rs. 102/13 and 3 per cent Defence Bonds at Rs. 101/14. Provincial loans met with small business, 3 per cent *U. P.* 1944 being done at Rs. 106/14 and 3 percent *Punjab* 1952 at Rs. 98/7.

Conditions in the money market show no change. The average rate of accepted tenders has fallen by a pie to annas thirteen and pies nine per cent per annum against annas thirteen and pies ten per cent per annum in the previous week.

Among Debentures, business was done in 5¼ per cent (1938/50) *Rohtas Industries* at Rs. 102 and 4½ per cent (1936/86) *Clive Buildings* at Rs. 102/12. Port Trust and musical issues remained nominally unchanged. Prices of Preference shares have again very firm. Among Jute shares, *Hukumchand* were marked at Rs. 138; *Calcutta Jute at* Rs. 111; *Hastings* at Rs. 136; *Hooghly* at Rs. 20 c. d. and *Lawrence* at Rs. 149. In the Engineering section, *Steel Corporation* were marked up to Rs. 120/8 and *Indian Standard Wegon* at Rs. 162. Among Cotton mill shares, *New Victoria* met with good business at Rs. 5/15, closing slightly lower at Rs. 5/10. In the Miscellaneous section, *Orient Paper* were slightly better at Rs. 106/8 and *Titaghur Paper* 2nd preferences at Rs. 117.

Bank shares continued to be firm, *Imperial Bank* fully paids being done at Rs. 1,588 and the contributories at Rs. 392. *Reserve Bank* changed hands at Rs. 101/8 x. d.

Cotton shares have been strong throughout the week under review. *Elgin* had buyers up to Rs. 22/12, the closing level being slightly lower at Rs. 22/4. *Kesoram* were done at Rs. 7/8 x. d; *Cawnpore Textiles* up to Rs. 7/12 and *New Victoria* at Rs. 2/11. *Muir* changed hands at Rs. 273/8.

Coal shares have been fairly steady although business was on the small side. *Bengal*, which were done lower at Rs. 348 during the last week, have improved slightly during the week to close better at Rs. 357. There were sellers of *New Beerbhoom* at varying rates following the announcement of a reduction in the dividend from 10 per cent to 7½ per cent per annum for the half-year ended 31st March, 1941. The closing price was Rs. 14/14 after being done higher 15/3. *Burrakur* were in some demand at Rs. 13; *Equitable* at Rs. 34/4; *Standard* at Rs. 20 and *Bhalgora* at Rs. 4/9. *Lukurka* were closed at Rs. 10/12 and *Raneegunge* at Rs. 24/7.

Jute shares have been extremely steady owing to the continued strength of the commodity market, and in one or two cases prices have been marked up. *Anglo-India* met with good buying enquiry at Rs. 350. *Budge-Budge* have slightly improved to Rs. 382 as compared with Rs. 377 in the previous week. *Howrah*, after touching Rs. 54-1, closed at Rs. 53-6. *Hukumchand* were maintained at Rs. 12-4. *Kamarhatty* were slightly lower at Rs. 512, while *India* were better at Rs. 350. *Naskarpara* were Rs. 18-2; *National* Rs. 24; *Nuddea* Rs. 62-12; *Soorah* Rs. 10-12 and *Waverley* Rs. 3-6.

Enquiry in the Tea section continues to broaden but sellers remain scarce. *Choonabhutti* were marked higher at Rs. 427-8; *Banarhat* at Rs. 392; *Patrakola* at Rs. 925 and *Ledo* at Rs. 206-9. Among the lower priced shares, *Dufflaghur* were placed at Rs. 13-12; *Ethelbari* at Rs. 11-4; *Jutlibari* at Rs. 15-4 and *Tongani* at Rs. 4-6. *East India* were higher at Rs. 10-4.

In Sugar shares an easier tendency has been noticeable during the week and prices are quoted lower. *Champarun* fetched Rs. 14-8; *New Savan* Rs. 7-11 and *Samastipore* Rs. 7-10. *Buland* were a good feature at Rs. 17-8; *Raza* at Rs. 17-2 and *Murree Brewery* at Rs. 14-14.

Among public utilities, *Agra* had buyers at Rs. 139; *Benares* at Rs. 14-4 x.d. and *Mirzapur* at Rs. 4-7.

In the Engineering section, the improvement in prices, witnessed during last week, has not been maintained during the week under review owing to some selling pressure. *Indian Iron*, after touching Rs. 33-2, closed today at Rs. 31-13. *Steel Corporation* were done lower at Rs. 19-13 as compared with Rs. 20-10 in the previous week. *Burn & Co.* were done at Rs. 397. There has been a strong buying enquiry in *Indian Steel and Wire Products* contributories at Rs. 8. *Hukumchand* steel ordinaries were slightly marked down at Rs. 12-15 x.d., while the deferreds were steady at Rs. 2-6. *Britannia .Engineering* were Rs. 10-10 c.d. and *National Iron* at Rs. 8-6. *Kumardhubi* were dull at Rs. 4-4 and *Saran* at Rs. 6-6.

Enquiry in the Miscellaneous section continued. *Dalmia Cement* have been in demand at Rs. 12-8. *British India Corporation* maintained their last week's level of Rs. 4-4. *Ganges Rope* after a long time came to business at Rs. 257-8. *British Burmah Petroleum* were done at Rs. 3-11; *Borooah Timber* at Rs. 17; *Assam Saws* at Rs. 3-7 and *Dunlop Rubber* at Rs. 40-12. *Rohtas Industries* were in some enquiry following the publication of good results for the year ended 31st October, 1940. The dividend has been maintained at Re. 1 per share. Among Paper shares, *Titaghur Paper* were marked down to Rs. 18-14 c.d. *Mysore Paper* were, however, steady at Rs. 14-14. In the Shipping group, *India General Navigation* were better at Rs. 87-8. Among Mining shares, *Burma Corporation* were unchanged at Rs. 4-12, while *Indian Copper*, after being done higher at Rs. 2-6, closed at Rs. 2-3. *Consolidated Tin* were done at Rs. 2-10 and *Tavoy Tin* at Rs. 1-2. Among others *Indian Cables* were in demand at Rs. 21.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, July 3.

Money.—Call money continued to be quoted at ¼ per cent.

Exchange Market.—The rupee-sterling exchange was as usual steady, Banks selling T.T. at 1s. 5 15/16d. and buying three months' bills at 1s. 6 7/32d.

Securities.—The securities market showed no change in prices, 3½ per cent. Paper closing steady at Rs. 96-1. Among other loans, 1960/70 and 1945/55 continued to be in good demand, the closing prices being slightly higher at Rs. 109-8 and Rs. 111-8 respectively. 1948/52 were at Rs. 97-10; 1951/54 at Rs. 99-15; 1963/65 at Rs. 95-1; 1947/50 at Rs. 102-13; 1955/60 at Rs. 113-2 and 3 per cent 1946 *Defence Loan* at Rs. 101-14.

Shares.—The rise in prices in the local share market at the close of last week proved only temporary. During the year under review, prices receded on some profit-taking but only with the news of German advance in Russia did the market react and half the gains were wiped out. However, towards the close of the week there was some emergence of demand on signs that Russia was resisting with all her might and that Britain is safe from invasion. The closing prices in all cases were slightly lower than in the previous week.

Textiles.—There was a good demand for cotton mill shares on speculative support. *Bombay Dyeing*, after touching Rs. 1,147-8, closed at Rs. 1,133-12. *Central India* were slightly marked down at Rs. 323 against Rs. 326; *Century* at Rs. 433 against Rs. 438; *Gokak* at Rs. 219-8 against Rs. 222-8; *Kohinoor* at Rs. 457-8 against Rs. 459-8 and *Swadeshi* at Rs. 325-8 against Rs. 335. *New Great Eastern* (new Rs. 100 shares) changed hands at Rs. 229. In the cash list, *Ahmedabad Advance* were at Rs. 282-8; *Sholapoor* at Rs. 3,045 and *E. D. Sassoon, Limited*, at Re. 1-15-3.

Hydro-electrics.—Business in this section was dull. *Tata Power* closed slightly lower at Rs. 1,642-8, while *Andhra Valley* were unchanged at Rs. 1,650 and *Tata Hydro* at Rs. 179.

Steels.—Steel shares opened the week with *Tata* deferreds at Rs. 2,033-12 and the ordinaries at Rs. 386. These rates were not, however, maintained towards the close of the week owing to some profit-taking, the ordinaries closing at Rs. 384 and the deferreds at Rs. 2,010.

Banks and Insurance.—There was small change in prices of Bank shares with *Imperial Bank* fully paids at Rs. 1,583-12; contributories at Rs. 392-12; *Bank of Baroda* at Rs. 111; *Bank of India* at Rs. 146; *Central Bank* at Rs. 45-4 and *Reserve Bank* at Rs. 105-12.

In the Insurance section, *New India* were steady at Rs. 46. *India Mercantile* were marked at Rs. 66 x.d. and *Oriental* at Rs. 4,230.

Miscellaneous.—Bombay-Burma Trading have shown a drop of about Rs. 13 during the week to close at Rs. 510. *Belapur Sugar* were a shade easier at Rs. 211. *Associated Cement* were done at Rs. 143; *Tata Chemicals* at Rs. 12-13; *Scindia Steam* at Rs. 20-12; *Wimco* at Rs. 191-4; *Shivrajpur Syndicate* at Rs. 30-4; *Premier Construction* at Rs. 93-8; *Indian Iron* at Rs. 31-12 and *Steel Corporation* at Rs. 19-12.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, July 3.

There is nothing to report during the week, prices in the local market remaining unchanged. Cotton mill shares were in fair demand. Rubber shares were slightly easier on profit-taking, while Tea shares were in for some good support. Sugar shares were again a dull market.

Securities.—Business in this section was moderate and 3½ per cent Paper ruled steady at Rs. 96. 4 per cent 1960/70 Loan met with business at Rs. 109-12 and 5 per cent 1945/55 at Rs. 111-4. 3 per cent 1963/65 remain unchanged at Rs. 95. Among Provincial Loans, 3 per cent 1952 and 1953 *Madras Loans* were done at Rs. 98-10. Among State Loans, *Mysore Loans* were difficult to obtain in the absence of sellers at reasonable prices. The 3½ per cent *Travancore Loan* was absorbed at Rs. 104-8.

Mills.—Local shares improved in sympathy with the Bombay market. *Buckingham & Carnatic* were slightly higher at Rs. 248; *Cambodia* at Rs. 9-4 and *Madura* at Rs. 38-4. *Sitaram* were steady at Rs. 54. *Kothari Textiles* ordinaries changed hands at Rs. 12-2. *Gokak* came in for business at Rs. 218 July; *Kohinoor* at Rs. 430 cash and *E. D. Sasson* at Rs. 2. *Mettur Industries* attracted more interest on the news of an increase in capital, new shares being offered to existing proprietors.

Plantations.—There was a good turnover in this section. *Cochin Malabars* met with good demand following the declaration of a final dividend of 20 per cent, making 30 per cent for the year as compared with only 15 per cent in the previous year. The price, which was quoting around Rs. 6-12 last week, has advanced during the week to close at Rs. 8-2 c.d. The closing price was, however, slightly easier at Rs. 7-12 c.d. owing to profit-taking. Among Tea shares, *Chembra Peak* were slightly higher at Rs. 3-9, while *Peermade* were an active market at Rs. 28-8 x.d.

Sugars.—Mysore Sugar were done at Rs. 53-8 on renewed rumours of a bonus issue. *Travancore Sugars* were dull at Rs. 13-12. *United Breweries* were at Rs. 91-2 and *Jeypore Sugar* at Rs. 10-4.

Miscellaneous.—Mysore Chemicals have improved to Rs. 17-8 on rumours of very good profits for a half-year period, while *Mysore Paper* are steady at Rs. 15-2. Business was done in *Singareni Colliery* at Rs. 10.

LONDON STOCK EXCHANGE

The Stock Exchange has been subject to conflicting influences of late. The general tendency may be described as irregular in view of the obscure situation in Europe and the sudden changes in the Cabinet. The giltedged market has always been impassive and war news has caused very little change. The strength of the market is borne out by the fractional rises on Thursday in an otherwise dull market. Old Consols is over 81 as mentioned last week and new War Loan is at a premium of a full point. The current levels are well above the minima. The only change calling for comment is a small fall in India 3½ per cent stock.

Strengthen may be put down to profit-taking on the calculation that the future course of prices will be unpredictable. The improvement in rubbers is belated suggesting that thte Far Eastern situation is regarded as slightly clearer in spite of forces of the warning given by the Philippines to Japanese shipping. The leading industrials have been lower, but good features have been proved by motor shares and stores shares. The mining market has been a depressed area although no great change in prices can be referred to. The rise in Home Rails has been halted and the leading stocks have fallen back during the week.

NEW YORK STOCK EXCHANGE

Wall Street just before the holiday has had a bad spell. The attack of jitters could not be due to the enormous appropriations bill signed by Mr. Roosevelt on the House Committee's reflections on the defects in planning and executing defence preparations. The irregular opening and the downward trend in prices every day can only be indicative of the unsettlement produced by news from Europe. The new European war has, according to many observers, been responsible for the view that aid to Britain must increase at once but differences in the Administration as to the need for entering the war on the side of Britain are likely to precipitate doubts and fears relating to the Administration's views on defence and foreign affairs. The improvement in corporation earnings by as much as 17.5 per cent in the first quarter of 1941 compared with last year was not confined to armament and other manufacturing concerns. The first quarter's profit statements must cheer up stock markets, but it is not doing so because taxes are taking off a big slice and sales figures show that certain companies have lost ground.

Retail sales have gone up and commodity markets are in fine fettle in spite of the fear of price control. Business may be shaping well: yet the leading issues have suffered in the course of dull and limited dealings. *U. S. Steel* had yielded to 55¼ and *General Motors* common fell back to 37 3/8. After a dull opening on most days prices have gone down and *Anaconda Copper* has declined to £27 though copper mining is an industry that should gain much if strategic reserves are going to be built up by the U. S. Government for its defence programme.

ROHTAS INDUSTRIES LIMITED

(*Half-yearly Meeting, 16th July,* 1941 *at* 11 *A.M.*)

Audited accounts for the half-year ended 30th April, 1940:—

After providing Rs. 3,00,000 for Depreciation, there is a balance at the credit of Profit and Loss Account of Rs. 6,58,081-12-7 from which they recommend:—

	Rs.	As.	P.
Dividend of Rs. 10 per share ..	4,00,000	0	0
Provision for Commission to Directors and Staff	7,000	0	0
Carry forward	2,51,081	12	7

The big reduction in despatches during this half-year has been caused by a scarcity of tonnage for the export trade, in which the Company have been large participants for many years, and an acute shortage of wagons affecting deliveries to inland consumers.

Managing Agents:—Messrs. Andrew Yule & Co., Ltd.

Authorised, Issued and Subscribed Capital—Rs. 40,00,000 in 40,000 shares of Rs. 100 each, fully paid up.

(*Annual Meeting 19th July,* 1941 *at* 11 *a.m. at Calicut*)

Audited accounts for the year ended 28th February, 1941:—

The net profit for the year after providing for depreciation was Rs. 3,11,181-13-5. Adding the balance brought forward from last year of Rs. 2,34,670-1-0 there is a total of Rs. 5,45,851-14-5. After paying the interim dividend of 7½ per cent. for 1939/40, final dividend of 7½ per cent. and Cumulative Preference dividend for 1939/40 of Rs. 1,13,276-12-7, there is a balance of Rs. 4,32,575-1-10. Out of this amount two interim dividends of 5 per cent. each for 1940/41 (paid on 9/9/1940 and 6/1/1941) were paid absorbing Rs. 71,313-1-11, leaving a balance of Rs. 3,61,261-15-11. A sum of Rs. 50,000 has been transferred to General Reserve and Rs. 20,000 to Taxation Reserve, leaving an available balance of Rs. 2,91,261-15-11. Out of this amount the directors recommend the payment of a final dividend of 20 per cent, free of income-tax, absorbing Rs. 1,43,081-6-5 asd a balance of Rs. 1,48,180-9-9 to carry forward.

A sum of Rs. 20,000 has been reserved against Income-tax and Excess Profits Tax on the profits of Pudukad Estate.

The acreage of the properties was as follows:—

Mature Rubber	3,818.21	acres
1938 Replanted area (budded)	73.92	„
1939 New clearing (partially budded) ..	224.60	„
1941 Replanted area	71.00	„
Reserve, buildings, etc.	2,656.93	„
	6,844.66	„

The Mature area contains 10 acres of pollarded rubber which has been interplanted in 1940.

Rubber.—The crop of 1,292,185 lbs. was harvested at a cost of 3.13 annas per lb. f.o.b. and realised an average price (sales and valuation) of 7.43 annas per lb. as compared with 6.40 annas per lb. in the previous year.

The *estimated crop* for 1941/42 is 1,240,000 lbs. at an f.o.b. cost of 21.94 cents (5.51 annas) per lb.

The Company has been granted a provisinal export quota allotment 1941 of 60 per cent (691,974 lbs.). The directors have not been advised so far of the final export quota.

Pepper.—Cwts. 19/1/1 were harvested and valued at Rs. 250.

Pukukad Estate suffered considerable damage from a cyclone in May, 1940 and 71 acres of the worst damaged rubber have had to be cut out and are being replanted with budded rubber.

Managing Agents & Secretaries.—Messrs. Peirce, Leslie & Co., Ld.

Synopsis of the balance sheet as at 28th February, 1941:—

COMPANY MEETING

BOMBAY TELEPHONE COMPANY MEETING

Address by the Chairman

THE HON'BLE MR. R. H. PARKER

The Nineteenth Ordinary General Meeting of the Bombay Telephone Company, Limited was held in the Conference Hall, Electric House, Fort, Bombay, on Friday, the 27th June, with the Hon'ble Mr. R. H. Parker in the Chair. Moving the adoption of the Directors' Report and Audited Accounts for the year ended 31st December 1940, the Chairman said:—

Ladies & Gentlemen,

I rise to move the adoption of the Directors' Report and Accounts for the year ending 31st December 1940 which have been in your hands for some days and which with your permission I will take as read.

During the year your Directors accepted with regret the resignation of Mr. A. K. G. Hogg on his transfer to Calcutta. We welcome here at our Annual General Meeting Mr. J. M. B. Gibbons who has been appointed to fill the vacancy thus created.

Profit and Loss Account

The net profit amounted to Rs. 30,46,572 as against Rs. 28,56,449 in respect of the year 1939.

The percentage of working expenses for 1940 was 27.4 as against 26.37 in 1939.

The increase in profits must be regarded as highly satisfactory but it is overshadowed by the necessity of increasing our Reserve for Income-tax, Super-tax and Excess Profits tax from Rs. 6,00,000 to Rs. 8,50,000 involving an appropriation under this head out of the year's profit of a sum of Rs. 2,50,000.

Expansion.

Expansion continued during the year but as you will see from the Directors' Report, it was less than in the previous year.

Our new alternative Message Rate scale of charge for Residential Lines has been found useful by a number of subscribers, the increase in the number of lines working between the 1st January 1940 and the 31st December 1940 being 477 lines. I may remind you that the scale is an installation fee of Rs. 10, a monthly rental of Rs. 8 and a charge of one anna per call, there being no charge for calls received. This, for any one who does not want to make as many as four calls per day, is cheaper than the flat rate basis of charges of Rs. 45 a quarter.

Appropriation of Profit.

We have made the usual provision for bonus to staff. An Interim Dividend has already been paid and there remains a balance available of Rs. 13,24,179.

As you are aware, your Directors do not propose to recommend the payment of any further dividend pending the final disposal of the offer to purchase the shares by The Government Telephones Board Limited.

Government's Option to Purchase.

You will remember that I told you at the last Annual General Meeting that Government were actively considering the question of making an offer to purchase the undertaking before the year 1943 when their first option under the License arises. Instead of offering to purchase the undertaking Government have, as you are aware, made an offer to buy the shares and that offer has been communicated to all Shareholders.

A Meeting of Shareholders was held on the 27th of May when I laid before the Meeting a Statement relating to this offer. At that Meeting the President and Secretary of the Bombay Shareholders' Association were present by invitation and they informed the Shareholders that they had come to the conclusion that the offer was one which ought to be accepted. The Association have since issued a Statement in the Press in which they say:—

> "The Committee of the Association have since carefully considered all aspects of the case and the correspondence which passed between the Company and the Association as well as what transpired at the interview between the representatives of the Association and the Chairman and Managing Director of the Company and have come to the decision that having regard to all the circumstances of the case, the offer in one which it is in the interest of Shareholders to accept."

As you know, your Directors concur with that opinion and I think we as Shareholders ought to express our gratitude to the Committee of the Bombay Shareholders' Association for the trouble they have taken to examine the matter.

So far the holders of 65.1 per cent of the shares have sent their acceptances. A further 9.9 per cent is required to make the offer effective and I suggest that those of us who have accepted should urge other Shareholders to send in their acceptancesquickly so that we may all receive the purchase price and be able to reinvest it instead of losing interest as we are doing now.

Staff.

I feel sure you will join with me in an expression of our appreciation of the work done by the staff during the last year.

I referred at the last Annual General Meeting to the special problems which the War had brought. These continued in a more active form and I think we can congratulate Mr. Bromham, our Secretary & Chief Engineer and the Engineering Staff for the successful way they have dealt with them.

Our Joint Secretary, Mr. Iyer, and all the Secretarial staff have had a very great deal of extra work to do in connection with the offer to Shareholders.

I now formally move:—

> "That the Directors' Report and the Accounts for the year ending 31st December, 1940 be and the same are hereby received and adopted."

After the motion has been seconded, I will endeavour to answer any questions which Shareholders may care to task relating to the Report and Accounts.

The resolution having been duly seconded the Chairman put it to the Meeting and declared it carried upon a show of hands.

A poll, having been demanded, was taken. The Chairman announced the result of the poll and declared the resolution carried.

Mr. Tricumdas Gordhandas Khattau, Mr. Vithaldas Damodher Govindjee and Mr. J. M. B. Gibbons were re-elected Directors and Messrs. A. F. Ferguson & Co. and Messrs. S. B. Billimoria & Co. were re-appointed Auditors of the Company.

HUKUMCHAND JUTE MILLS, LTD.

5½% 2nd Mortgage Debentures: 1st Redemption.

NOTICE is hereby given that at the drawing of Debentures held on Monday, the 30th day of June, 1941, at the Registered Office of the Company, at No. 4, Clive Ghat Street, Calcutta, the following Debentures were drawn in accordance with the provision of Clause 5 of the Trust Deed, dated the 24th day of April, 1939, in the presence of Mr. Saurendra Mohan Basu, Notary Public of No. 9, Old Post Office Street, Calcutta, for redemption at par on the 15th day of July, 1941, from which date, all interest thereon will cease:—

Lot No. A.—84, 12, 126, 139, 130, 119, 74, 81, 108, 38, 129, 75, 138, 101 and 52.

Lot No. B.—217, 182, 186, 161, 276, 289, 216, 170, 203, 201, 159, 287, 200, 281 and 193.

The holders of these Debentures are requested to present them at the Registered Office of the Company on or after the 15th day of July, 1941, for payment with all the Coupons dated subsequent to that date; otherwise the amount of the missing Coupons will be deducted from the principal to be repaid.

By Order of the Board,
Ramdutt Ramkissendass,
Managing Agents.

4, Clive Street,
Calcutta, 2nd July, 1941.

THE COCHIN MALABAR ESTATES LTD.

NOTICE

NOTICE is hereby given that the Eleventh Annual General Meeting of this Company will be held at the office of Peirce, Leslie & Co., Ltd., Calicut on Saturday, 19th July 1941 at 11 A.M. for the following purposes viz:—

To receive and consider the Balance Sheet and Working and Profit and Loss Account to 28th February, 1941 and the Reports of the Directors and Auditors.

To declare a Dividend.

To elect a Director.

To appoint Auditors for the ensuing year and fix their remuneration.

In accordance with the Company's Articles of Association the Transfer Books will be closed from the 4th July to 22nd July 1941 both days inclusive.

By Order of the Board,
PEIRCE, LESLIE & CO., LTD.
Mg. Agents and Secretaries.

Calcutta,
9th June 1941.

IS IT NOT WISE TO INSURE NOW ?

With an uncertain future ahead Conservation and Consolidation of resources are the prime needs every individual should assiduously strive after.

If you already have Life Insurance, hold on to it. Don't allow it to lapse. If you haven't go in for it right now. A Life Policy gives an inestimable protection and it will cost you less now than later. It is cent per cent true that to be forewarned is to be forearmed.

Write to us for further particulars or advice.

WORLD OF INDIAN FINANCE

Friday Evening.

THERE has been further emphasis on and strengthening of cheap money conditions. Interbank call money is ½ per cent in Calcutta, ¼ per cent in Bombay, all lenders and no borrowers. On July 8, the amount of three months' Central Treasury Bills on offer was Rs. 2 crores; and applications exceeded the offered amount by only Rs. 12½ lakhs. All the same, there is no change in the average rate of accepted tenders which remains at annas thirteen and pies nine per cent per anuum. The offer for next week is again Rs. 2 crores. Sales of tap bills from July 3 to July 7 made poor showing at Rs. 21¾ lakhs as compared with Rs. 58¼ lakhs in the corresponding period last week. Tap bills continue to be on offer, the rate being unchanged at Rs. 99-13-0. With reference to the smaller tenders submitted on July 8 and the poorer sales of tap bills, it may, once again, be emphasised that sales of bills and applications on the tender day have less to do with actual conditions in the money market than with the size and volume of Treasury Bills maturing in the particular week. While Treasury Bill sales of this week are, thus considered, no index of money market conditions, other indices point to the full onset of the slack money season. The deposits of member banks with the Reserve Bank have risen from Rs. 30.35 crores on June 27 to Rs. 32.63 crores on July 4. Government finances, too, are in excellent condition. There is a sharp rise in Central Treasury balances with the Reserve Bank from Rs. 5.27 crores to Rs. 12.17 crores. Burma Government deposits have improved from Rs. 2.34 crores to Rs. 2.41 crores; and those of other Governments from Rs. 4.69 crores to Rs. 5.03 crores. The Imperial Bank also has strengthened its cash position from Rs. 13.90 crores to Rs. 14.25 crores.

The statement of the Reserve Bank for the issue department for the week ended July 4 does not show any material change. The only point of interest is that the return of rupee coin from the public to the currency is still persistent. Rupee coin held in the issue department has risen from Rs. 36.57 crores to Rs. 36.81 crores. Changes of a substantial nature and of far-reaching significance have, however, taken place in the Reserve Bank return for the banking department. Foreign balances have sharply shot up from Rs. 37.06 crores to Rs. 46.48 crores. A rise of Rs. 8½ crores must, presumably, be connected with payments made by the British Government in respect of war commitments or war orders. Such a payment is, of course, nothing more than the Government of India reimbursing for expenses which they had already incurred and paid for on behalf of or as the agents of the British Government. Such reimbursement is, however, of great value as adding further strength to the already strong ways and means position of the Central Government.

This substantial addition to foreign balances is to be welcomed also from the point of view of the speeding up of the schedule for taking on hand the second instalment of the sterling debt redemption plan. On the basis of surplus sterling resources in the hands of the Reserve Bank as revealed in the Reserve Bank returns during June, we showed how it was possible to tackle, now and here, the redemption of 3½ per cent India non-terminable sterling stock. The first Bank return in July accounts for an addition of Rs. 8½ crores to the sterling resources available for sterling debt repayment. We would, therefore, urge that there is every case for taking immediately the necessary steps for completing the redemption of 3½ per cent sterling stock in the course of the next month or two.

As a result of this increase in foreign balances, and as confirming the view that this increase must be due to inter-governmental transactions, the deposits of the Central Government with the Reserve Bank have risen by nearly Rs. 7 crores. But the position in this regard is not so easy of understanding as there is an increase in ways and means advances from Rs. 15 lakhs to Rs. 4 crores. That is to say, there is a rise of Rs. 8½ crores in foreign balances and of Rs. 3.85 crores in ways and means advances. In the ordinary course, Central Treasury deposits with the Bank must reveal a rise of the order of Rs. 12½ crores. Actually, however, the increase in Central Treasury deposits is slightly less than Rs. 7 crores. Now the question is: What has happened to the balance of Rs. 5½ crores? It is quite possible that the rather unusually large shrinkage in Reserve Bank's investments from Rs. 8.4 crores to Rs. 5.28 crores throws some light on this question. It is not unlikely that among the investments of the Reserve Bank were securities which the

TREASURY BILLS

India

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills were opened on Tuesday, July 8, 1941. Total amount offered was Rs. 2 crores, 12 lakhs and 50 thousand. Tenders at Rs. 99-12-9 per cent and above were accepted in full and those at Rs. 99-12-6 per cent were allotted approximately 97 per cent. Lower tenders were rejected. Total amount accepted was Rs. 2 crores ,the average rate of accepted tenders being annas thirteen and pies nine per cent per annum.

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills will be received on Tuesday July 13, 1941. Successful tenderers should make payment on Friday, July 18, 1941. Other conditions are as usual.

Three months' Intermediates will be sold from July 9 to July 14, 1941 at Rs. 99-13-0 per cent subject to the conditions previously announced (*viz.* sales can be stopped at any time without previous notice if Government think it necessary).

Three months Intermediates sold from July 3 to 7, 1941, amonted to Rs. 21,75,000.

During the week ended July 4, 1941, Government of India Treasury Bills for Rs. 8,62,50,000 were sold in favour of the Issue Department of the Reserve Bank of India.

EAST INDIAN RAILWAY

TENDER NOTICES

Annual Contract item costing over Rs. 10,000.

Sealed tenders are invited for the following and will be received in the General Manager's office, 105, Clive, Street, Calcutta up to 12 o'clock (noon) on 11-8-41.

Tender No. S/SP/702/Gb10/61/63/C for Cane Baskets of sizes.

Tender form with full particulars can be had from the office of the Controller of Stores, Calcutta on payment of Rs. 2, per copy to the Treasurer, East Indian Railway, Calcutta, and on production of his receipt when applying for the same. Firms outside Calcutta may, however remit the amount direct to the Controller of Stores by money order. No refund is permissible.

Sealed tender delivered by hand should be presented in the General Manager,s office for registration and then put into the tender box outside the Deputy General Manager's (Works) room by the tenderer or his representative.

The General Manager, E. I. Railway, Calcutta, invites tenders for the supply of wooden handles suitable for Axes Felling, Pick Axes, Brushes carriage washing (2 sizes), Hammers (4 sizes) Phowrahs, Ram Pinch Bars, Shovels, and Ballast Rakes.

Tender Forms are obtainable from the Office of the Controller of Stores on payment of Rs. 2 per copy, Drg. No. 13867 from Dy. Chief Mechanical Engineer, E. I. Rly., Lillooah, @ Rs. 1-8, per copy, and the rest of drawings from the Chief Engineer, E. I. Rly., Calcutta, @ Rs. 1, per copy. No refund of this payment is permissable.

Closing date . . . 25th August, 1941.

R. E. MARRIOTT,
General Manager.

Finance Abroad

Friday Morning.

THE prospect of an enormous deficit after the eleventh year of deficit has not upset the U. S. treasury. An increase of 5,100 million dollars in expenditure over revenue in the fiscal year ended last Monday shows that all earlier forecasts have been under-estimates. Defence expenditure alone totalled 6 billions in 1940-41 and the defence budget for the current year is 15½ billions. No wonder then that appropriation bills for 10 billions have been signed and a budget total of 22.2 billions means that the 3½ billions raised by new taxation would bring a total revenue of 12½ millions, but that would entail a deficit of 9.7 billions. One may infer that the earlier estimates of 8 billions and 10 billions as the upper limit of defence expenditure are inaccurate. At the end of last year a former Under Secretary of the Treasury discussed the budgetary problem and advocated increase in surtax in addition to lowering of the exemption limit and the abolition of tax exemption for all types of securities. Mr. Morgenthau who suggested four years ago that the best way to tackle the budget deficit was by means of reduction in expenditure is not likely to subscribe to the same opinion now. The problem for the Treasury is by no means simple in spite of the excess reserves of United States banks and the volume of investible money. The alarming deficit forecast did not interfere either with the celebration of July 4th or the decision to extend or abrogate the principle of hemisphere defence.

The financial basis of a new type of foreign policy is already there and the second year of the defence programme is not going to lead to any extraordinary or unforeseen difficulties. Taxation was increased last year and a further increase is inevitable. U. S. public opinion is prepared but the effect of successive additions to the tax burden may be felt by industries making consumer goods. There is, however, the fact that corporation earnings for the first quarter of 1941 disclose a further increase after the general rise in 1940. Though the rise is not uniform, on the basis of reports prepared by a representative groups one may conclude that a large net addition to national income will result from the defence programme involving as it does an estimated outlay of over ten billions and the shipbuilding, shipping and other industries will feel the pressure of immediate Government requirements as the Administration is credited with a desire to supplement the initial appropriation of 7 billion with another billion under the Lend and Lease Act of March. The Administration retains the power to add up to 3 billions to the currency and the financing of expansion in the defence industsies presents no special problems. But the rise in prices in evidence since March indicates that the inflationary implications of such enormous expenditure as in 1941-42 will have to be very carefully watched. American opinion, it may be recognised, is impressed by the success of British policy in holding prices down while incomes are rising along with taxation and the supply of goods and services are restricted.

The actual nature of the increases in Federal taxes are not as yet known, but one may guess that modification of inheritance taxes would be a feature of the programme. The levelling up of the legacy duty has been frequently recommended and this may not be the only feature. A Federal sales tax has been widely approved and the regulation of private expenditure possible under this may make it wholly acceptable even to those who are likely to resent any encroachment on the field of taxation reserved for the States. There is a natural transition from this to the subject of prepayment of taxes recommended by the U.S. treasury in order to keep in hand adequate funds for financial defence expansion. The idea has been commended by Professor Keynes to Britain where voluntary payment in advance for instance of the Excess Profits tax is already in vogue. The practice has been recommended as regards E. P. T. by leading commercial organisations in India to their members and there is really no bar to such payments once the appropriation for tax is made. The grant of rebates for advance payments will be generally deprecated, and it is better to await details of the U. S. scheme before describing or discussing its value. But there is Mr. Keynes's hearty approval.

High success has been claimed for both the National war savings movement and the war weapons week movement. Lord Mottistone announced that £395 millions had been brought through the newer savings campaign and the large sum raised by weapons weeks has demonstrated that Government can raise a sum greatly in excess of what is regarded as Britain's net annual savings. The national war savings has yet to be introduced into India, but the idea of a weapons week has caught on. In Bengal it has been decided to hold one in Asansol and Rs. 1 lakh has been prescribed as the minimum desired.

That London has plenty of money is proved by the facilities with which Treasury Bills are raised. Applications for £75 million in 3 months hills last week came down to £153 millions and the rate wanted by lenders was over 1 per cent. The syndicate got a smaller quota as applications from a special quarter, evidently the Public Departments were favoured. With the fall in the unemployed in June to 368,000 that is to say less than half the comparable total for June 1940, the demands on the Unemployment Insurance Fund are likely to be limited and Treasury Bills will be freely absorbed.

There has been no change in discount or exchange rates. The dollar is held at the control level and the New York rate is 4.03½ as before. While there has been talk of conversations between the Soviet Government and Mr. Lawrence Cadbury who is associated with the British mission to Moscow nothing is as yet known about the kind or cost of the help to be given to Russia. Soviet attaches are probably seeing things in London not shown to others, but the expressions of discontent with production of munitions and war machines in Britain preclude any active assistance unless it be advice on aircraft manufacture. The Ministry of Supply after the change last week has come in for spirited criticism. And the difficulty of sending supplies through Vladivostock from the U.S.A. is readily recognised. As for Britain the announcement by Mr. Ilsley the Canadian Minister of Finance that a very large sum of Canadian dollars totalling 325 millions. probably as much as 400 millions representing the adverse balance would be turned over to Britain for purchases of war materials should give great satisfaction. Canada will get the benefit of the Lease and Lend Act and passes on the benefit of the April agreement to Britain.

Bankers' deposits with the Bank of England are shown in the latest available return as £164 million out of total Other Deposits of £182 millions. The reduction in the Proportion to 16.75 per cent will hardly excite comment at present when the Bank has little gold and does on with few Bills. The most arresting feature is the rise in the already large note circulation to £643 millions. The 500 million mark was passed in 1939 and the 600 million mark was passed early this year.

Soviet war finance is not distinguished by unusual features. The only messages we have had indicate that the Soviet is embarking on large scale borrowing. There was enthusiastic reception in Moscow to the first war loan and the Government has decided to increase taxation by levying an import on the private incomes of peasants. A recent decree imposes also a graduated surcharge on the income tax. Persons exempt from military service for any reason are called upon to pay higher taxes, and peasant families can escape the 100 per cent increase in the tax on their private earnings by pointing to the fact that two or more members are serving with the Army.

An item of special interest to the financial world is a message describing Newfoundland's surplus budget. Dominion status was withdrawn in 1933 merely as the island could not pay interest punctually. The future was mortgaged to the bondholder, and the subordinate status was emphasised by the bureaucracy in control. As change for the better should come after the announcement though Newfoundland may not care to ask for constitutional concessions in wartime. The Commissioner of Finance announced that the surplus of 1.6 million dollars was due to better employment mainly on the Canadian and U. S. defence bases. Imports improved last year and the timber industry was active, but of its small surplus Newfoundland is making a gift of 500,000 dollars for purchasing a fighter squadron manned by Newfoundlanders. An interest 2 free loan of 2 million dollars has been promised to Britain for war purposes. The loan is to be repaid

Shedding Debtor Status

WHILE India, in the course of this war, may hope to be free of the major portion of the sterling debt raised by her Government, the process of the lightening of her foreign commitments is of much earlier origin and inspired by a variety of causes from time to time. The problem of the foreign obligations of India has always excited bitter controversy in nationalist circles; and it has been felt that to such obligations is largely attributable that widespread and firm hold which the Britishers have over Indian Industry and business. We are not, in this context, concerned with the views and conclusions of nationalist India; what we seek to point out is that, without the public being fully aware of it, India has been steadily and substantially improving her position from the status of a debtor country. It will be an eye-opener to most people to know of the enormous progress that has been made by India in shedding her status as a debtor to foreign interests. At this stage, we shall content ourselves with indicating the broad developments that are of interest from the point of view of the study of the reduction of India's foreign obligations.

In the 'twenties, and especially in the closing years, there was considerable repatriation from India of investments and funds held by foreigners. And such repatriation was connected with political fears about the future of India on account of the intensity and ramifications of the civil disobedience movement. During this period, there was a frenzied flight from the rupee and, in such flight, both foreigners and nationals participated. British investors were greatly worried as to the safety and stability of the political and economic conditions of India once the then-discussed reforms were put into effect. They were so convinced that the new regime with an Indian Finance Minister would bring chaos into India's financial administration, such of their investments which were realisable were so realised and the proceeds transferred to Britain. At the same time, the prosperous members among Indian nationals such as business magnates and ruling princes were deeply panicky about the stability of India's future; they, too, considered it the better part of prudence to have some of their funds deposited and some investmnts made in foreign countries. If political turmoil should follow the creation of a reformed India as they feared, they felt that they would be secure because of the neat little nest-egg they had shrewdly provided for in London or in some secure refuge of capital.

In the panic-inspired flight from the rupee, there have thus been two different aspects, the first being a repatriation of capital invested by Britons, and the second being a transfer of investments by Indian nationals from rupee into sterling. Taking both these developments together, the funds that should have left India in that period and for that cause, could not have been less than £75 million. Accurate estimates as regards international movements of capital so far as India is concerned are not possible as the statistics relevant to such a study are maintained in the most primitive form. Our estimate of £75 million is based upon a general appreciation of the volume of Reverse Councils sold during that period and a comparison of this position with the remittance record of earlier years.

The next phase in India's foreign movement of capital is in the second and third years of the 'thirties. From 1928 onwards, the policy of deflation was in relentless force as that was the only way by which the eighteenpence ratio could have been maintained in the conditions then prevalent. As a consequence, there were repeated doses of contraction of currency. As a result of this, and also with a view to underline and emphasise the deflationary influences and operations, the floating debt in the hands of the public was on the large side; and it may be truly described as a period of frantic short-term borrowing at frenzied rates. Treasury Bill outstandings in the hands of the public used to be Rs. 50 crores, Rs. 60 crores and sometimes even higher than Rs. 70 crores at any one time. Interest as high as 7 or 8 percent was being paid for three months' accommodation. In relation to the capacity of the Indian money market as it then was, Rs. 30 crores might be considered the maximum amount of Treasury Bills which it could digest. Anything over this amount was accounted for by funds which exchange banks borrowed from their head offices and invested temporarily in rupee Treasury Bills.

There was also a general apprehension that the agitation against the eighteenpence ratio might finally result in the abandonment of this ratio. And so it came about that, in respect of the London funds being utilised for investment in rupee Treasury Bills, the banks in India had to fix up the exchange for the return of money to London at the same time as they settled the exchange for bringing down the funds. That is to say, the funds invested on behalf of London in rupee Treasury Bills represented two exchange transactions simultaneously executed, namely, sale of T.T. for the ready position and purchase of T.T. for three months forward position. On the basis of such an arrangement, London funds seeking investment in rupee Treasury Bills amounted, on some occasions, to as much as £30 million.

With the abandonment of the gold standard by British in September 1931, the rupee was, as in duty bound, delinked from gold; and the Government could take a respite in their persistent pursuit of a deflationary policy. 1932 saw a considerable amount of reflation of currency. In the result, money conditions became easier; the floating debt was steadily reduced; and the interest paid for short-term borrowing experienced a sensational decline. The yields available on rupee Treasury Bills were no longer attractive for London funds. In 1932 and 1933, funds aggregating Rs. 40 crores or £30 million representing London investments in Treasury Bills here disappeared altogether as a factor in the Indian money market. In subsequent years, London has not shown any worthwhile revival of interest in investing in short-term bills in India, so that we can say that the short-term capital market in India is today entirely dependant upon its own resources and wholly free from foreign funds or from funds that may take wings and fly.

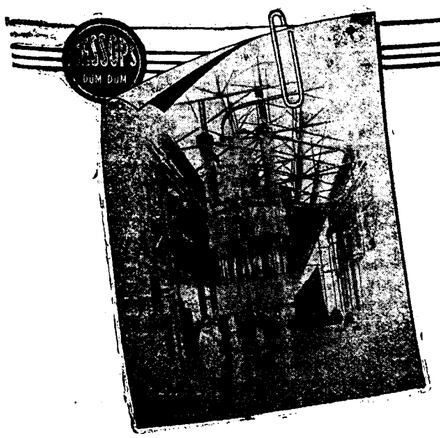
The third phase in this study pertains to British investments made on the long view, and is thus more or less allied to the first phase which we have discussed. The main difference between the third and first phases is that the urge to repatriate capital in the closing years of the 'twenties was fear of political turmoil, while the urge in the latter period is what we may call general business

considerations. The estates of two Clive Street magnates, who died in Britain, were called upon to pay death duties for big amounts; and, mainly to find the funds necessary for the death duties and generally in the process of a gradual liquidation of their interests in India, large-scale repatriation of capital to London was effected; and our estimate is that the amounts involved must have been of the order of £30 million to £40 million. At the same time, other Clive Street magnates who have retired from India have also joined in the movement to reduce their stake in this country. This process of the liquidation of the realisable investments on the part of those who had made big fortunes in India and retired, began early in the 'thirties and tapered off towards the middle of the decade.

In this context, we should explain, in some detail, the state of affairs in this regard. British houses in India, who are generally interested as managing agents of various companies, have two kinds of stake in their business. The first refers to the funds necessary for the business purposes of the firm itself. The second represents investments which each managing house has made in the shares of each of the concerns under its wing so as to stabilise and strengthen its control in each concern. That is to say, let us suppose that Firm AB & Company are the managing agents of M & Co., N & Co., O & Co., P & Co., and so on. AB & Company maintain funds of their own so as to be able to discharge their obligations to the various concerns under their charge as well as to finance various business enterprises which they run as departmental activities. So far as the funds employed in these respects are concerned, there has been no change.

At the same time, AB & Company used to take up and hold and keep holding, say, 25 percent or 30 percent or 35 percent of the shares in each of the concerns, M & Co., N & Co., O & Co., and so on. What happened in the early half of the 'thirties is that AB & Company reduced their holdings in M & Co., N & Co., and so on from 25 percent or 40 percent to 10 percent or 15 percent. Taking these two developments together, namely, repatriation of realisable investments on the part of British business magnates on their retirement from India, and the reduction in the proportion of shares held for securing and maintaining control, the amount involved in the transfer of ownership from British to Indian interests might have been of the order of Rs. 100 crores or £75 million.

The fourth phase in capital movement is the transfer of capital by Indians from this country to foreign countries. We have already referred to a movement of this kind in which the vested interests were mostly concerned and for which fear of India's political future was mainly responsible. We now refer to the transfer of capital by Indians inspired by genuine business considerations. There were two important circumstances which impelled a transfer of investments from rupee securities to sterling securities; and, in a few cases, to dollar securities. Big investment institutions like the Oriental Life Assurance Company were attracted by the relatively lower prices at which India's sterling stocks could be bought, on some occasions, as compared with the corresponding rupee stock. There have been many periods during which 3½ percent India sterling stock was quoting many points lower than 3½ percent India Rupee paper. Such opportunities were availed of by many of our investment institutions.



Another factor which put a premium on sterling investment was the legal provision which enabled the holders of sterling securities to escape the Indian tax provided they kept the income of those investments in London. Many of the people in the higher grades of Indian super-tax found it more profitable to hold investments in sterling securities and retain in London the income from such investments. Between these two categories of investors who acquired sterling securities, there should have been a transfer of capital from India for anything like Rs. 40 crores or £30 million.

The fifth stage is the liquidation of the Government of India's sterling debt of which a big-sized first instalment has been put through and the stage is set for the second.

While a transfer of capital from India has been effected in various ways and for various reasons in the past decade and a half, mention must also be made of two other factors related to this discussion. In the first place ,investment of fresh capital by Britishers has ceased to be an important factor for nearly two decades. In the early years of British business connections with India, and up to the beginning of the 'twenties, a good part of the profits and earnings of British business houses in India were put back in the further expansion of business or in the initiation of new business by them. British business houses have been chary alike of expansion and of new enterprises in the last twenty years; and it may be said that their profits and earnings are now being remitted in entirety to their country.

In the second place, there have been considerable purchases of various classes of shares and stocks by Indians mainly as a result of the increased activity of our stock exchanges. In such concerns as Burma Corporation or Indian Copper, the change of ownership from British to Indian interests is substantial. By the same token, the shares of Indian Iron and Steel Company are now held by a far larger proportion of Indians. In the case of the Steel Corporation, India has been buying the convertible preference shares; and thus has been effected a more or less complete transfer of ownership in respect of the stocks represented by the preference shares. A similar change has been taking place in the debenture capital of Tata Iron and Steel Company. The Tata Hydro-Electric group had also raised large sums by way of sterling debentures. In all these cases, liability in sterling has been replaced by liability in rupee. Taking all circumstances into account, the amount involved in the change of ownership through stock exchange activities may be of the order of Rs. 30 crores or £22½ million.

In sum, all the foreign obligations, which India will have to reckon with on the termination of the war, may be

a fourth of the original sterling debt of the Government of India *plus* the capital amounts invested by business houses in their firms and the reduced holdings they have in the shares of the various companies which belong to their group.

In terms of the recurrent interest charges and other earnings which have to be remitted annually from India to Britain, the altered debtor status of India may mean that the strain on our exchange is reduced by well over £20 million a year.

Indian Banking Progress

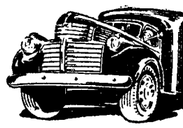
THE publication in the weekly statements of the Reserve Bank of the figures relating to scheduled banks, while it, no doubt, throws light on the state of Banking in India, has not reduced the importance of the statistical tables published annually by the Government. To judge the progress of banking in India and the soundness of the foundations of a structure that is growing more and more vast, the figures relating to the deposits of scheduled banks are but insufficient. The more elaborate statistics furnished by the Department of Commercial Intelligence enable us not only to gauge the pace and direction of progress, but also to test the strength of banking in India by the state of its weakest links. The latest publication affords the comforting assurance that, while banking has, no doubt, had its difficulties during the year, the growth of banking as such is being well-maintained.

Exchange banks as compared with the position at the end of 1930 have attracted no great volume of new deposits in India. Total deposits of eighteen exchange banks operating in India were £50.4 millions at the end of 1938. The capital and reserves of exchange banks show a considerable change as between 1929 and 1938; but that has not affected their business. The reduction in their cash balances as between 1937 and 1938 may even point to a higher proportion of advances. It has been noted that Exchange Banks adhere to a lower cash ratio (10 per cent. in 1938) than the Imperial Bank which maintained at the end of 1938 a ratio of 11 per cent.

The exchange banks' position can be more readily judged by the statement that they held 24 per cent. of the total bank deposits. The exchange banks fall into two groups, one with over 25 per cent. of their deposits in India and numbering five with total reserves in excess of paid-up capital and having deposits in India of Rs. 28.34 crores as compared with total deposits of Rs. 38.86 crores held by the thirteen other exchange banks, which are merely agencies of big banks doing business abroad. In the case of the first group, the cash balances held in India were substantially larger than the cash balances held abroad. Even in the case of the second group, the cash balances held in India were larger at the end of 1938 than the balances held out of India. These figures suggest that the financing of foreign trade does not tend to be a separate and distinctive feature of the exchange banks which have since 1930 lost ground as compared with Indian jointstock banks. Deposits in India in 1938 showed a decrease in the case of the eighteen exchange banks which held over Rs. 67.2 crores. As between 1936 and 1938 the actual proportion of deposits in exchange banks to the total has fallen.

The major Indian jointstock banks could claim a total of over Rs. 100 crores in 1937; but their number has varied from year to year. Banks with a paid-up capital and reserve of Rs. 5 lakhs and over reporting in 1938 held deposits of over Rs. 98 crores and their total capital and reserves exceeded Rs. 13.14 crores. The cash balances of these jointstock banks including their balances with the Reserve Bank of India at the end of 1938 exceeded Rs. 4 crores, that is to say were over 14 per cent. of liabilities. Banking conditons in 1938 were not altogether favourable. Slack demand for funds tended to drive down the proportion of Advances to total resources, and the reduction in cash balances as compared with 1937 is explicable also in terms of a decline of Rs. 2 crores in total deposits despite an increase of four in the number of reporting banks. The reduced profitability of banking can be judged also from the rise in Investments from Rs. 37.6 crores to Rs. 41.71 crores at the end of 1938. The fall in Advances and the rise in Investments is also traceable to the South Indian banking crisis, of which the prefatory note published with the statistics makes in regard to bank failures. As many as 19 out of 77 bank failures reported in 1938 were those of Madras banks, and failures were numerous also in Cochin, Mysore and Travancore. It is not difficult to connect the setback under Deposits etc., with the developments of the year; nor is it unjustified to record that the smaller banks numbering 120 with capital and reserve between Rs. 1 lakh and Rs. 5 lakhs had to battle strenuously for preserving their own position. In spite of an increase of twelve in the number of reporting banks, their total deposits rose slowly from Rs. 8.29 crores in 1937 to Rs. 8.71 crores at the end of 1938.

The small fall in the cash balances of the non-scheduled banks is cancelled out by the slight increase in advances and bills. Students of Indian banking would, however, bestow more attention on the actual increase in the number of scheduled banks and of jointstock banks with a capital and reserve exceeding Rs. 1 lakh. The actual growth of banking must also be measured by the increase in the number of co-operative banks and the larger deposits received by them. While clearing house statistics, showing a marked fall in 1938 as compared with 1937, afford a reliable index of decline in banking activity, the actual increase in the number of banks and branches indicates that the seeds of further progress were also being sown in this difficult year. The total number of Indian jointstock banks and their branches at the end of 1938 came to 2,235. The branches of the Imperial Bank in addition to three Head Offices numbered 154 and the 19 Exchange Banks claimed 82 offices. A satisfactory growth and distribution of branches has long been a factor in banking progress, though the average branch experiences some difficulty in attracting a sufficient total under deposits.



The statistics also indicate what has long been plain, that the Imperial Bank's progress is independent of local and temporary circumstances. The capital and reserves continued to rise in 1938 and total deposits advanced to Rs. 81.51 crores. Total liabilities rose by Rs. 47 lakhs to Rs. 93.4 crores and cash balances totalling Rs. 8.99 crores showed a striking fall as compared with 1937. The cash ratio is, however, reasonably high at 11 per cent. in the case of the Imperial Bank. The fall in this case is due to an exceptional rise under Advances. The total Advances of jointstock banks fell during 1938 while those of the Imperial Bank increased. The increase under Advances in the case of the Imperial Bank is reflected also in the fall under Investments (lower at Rs. 43.73 crores as compared with Rs. 47.64 crores). The banking failures of the period did not, of course, affect the Imperial Bank of India which held 29 per cent. of the total bank deposits as against 38 per cent. belonging to the jointstock banks.

The main pattern of Indian banking has been well settled and the events of 1938 could have little effect either on total deposits or the bank dividends which have acquired a high degree of stability, illustrating incidentally that banking business is far more secure and remunerative for the shareholders concerned than participation in the majority of industrial enterprises. The subsequent changes in the world of banking up to the end of June this year indeed bear out all the deductions that can be drawn from the statistical tables. Deposits have advanced more rapidly than loans; the Imperial Bank alone now claims over Rs. 100 crores and exchange banks have, to some extent, lost ground owing to the decline in oversea trade, precipitated by the war and the resulting controls. While the cash ratio in India is on the average high, particularly for non-scheduled banks, as compared with Britain, the security imparted by the steady rise over long periods in Scheduled Banks' balances with the Reserve Bank is a contributory factor in the growth of confidence, conclusively proved by the fact that last summer confidence in the paper currency was sapped by events in Europe while there was no shock to the banking system.

The Indian banking system has undergone during the depression period a vast number of changes conducive to rapid growth. Legislation such as is contemplated may not be a wholly favourable factor as is imagined and the original, vital impulse to reform from within may suffer.

India's Foreign Trade

THERE can be little by way of pointed comment on the May trade returns. What was surmised from the rise in customs revenue in May over April is now confirmed by the increase in the value of total imports to Rs. 17.78 crores from Rs. 16.96 crores in April. A pronounced increase in re-exports also emerges as a feature of the month. But the seaborne trade accounts of British India afford otherwise little information beyond the increase in exports over the previous month by as much as Rs. 2.43 crores. A comparison with the corresponding total for May 1940 may lead to the inference that exports have suffered a severe fall, but it must be pointed out here that intergovernmental transactions involving large purchases of Indian produce and manufactures do not enter into the total return under merchandise exports. The existence or actuality of such transactions must be presumed from the Reserve Bank returns which occasionally disclose sudden and large influx of sterling. Total merchandise exports, if they are lower than the total under imports, cannot be taken as conclusive evidence of an adverse balance of trade. It may not be generally known that shipping shortage, postal and cable delay as also licensing procedure are among the disturbing factors that make short-term trends uncertain. It has been frequently urged that the usual inferences based merely on a month's figures can have no value, and an excess of retained imports, such as is shown in May, hardly means that India's foreign trade position is becoming worse. A gap of nearly Rs. 7½ crores between imports and exports disclosed in the two months totals may have been more than bridged by the enormous purchases made in India by the Eastern Group and the Ministry of Supply through their agents. On the other hand, some satisfaction must be derived from the increase in imports, pointing, as it does to an increase of essential imports in spite of the war. The increase in imports during May is largely due to the enlarged imports of raw cotton and mineral oils. The increase under wool must be beneficial to the Indian wollen industry which has been further assured of indispensable imports by the Australian representative on the new Supply Council. A disturbing feature, if one may say so, is the considerable fall in imports of grain and flour. In view of the advance in prices the actual quantities must be much smaller than is indicated by the fall of nearly 30 per cent in value. The decline must be attributed to the reduction in imports of Burma rice. It may be noted in passing that a fall of Rs. 64.77 lakhs is shown under imports of rice not in the husk. But it is noteworthy that total imports from Burma have declined by Rs. 12.4 lakhs presumably on account of the increase in imports of mineral oil. An increase in imports from the British Empire occurred in spite of a further reduction in imports from Britain. The intake of goods from Canada, Australia and Kenya Colony showed a substantial increase. A similar increase in imports from the U.S.A. and Japan is another feature that evokes attention, indicating that the increase in exports to these two countries is accompanied by an increase in purchases by India. The expansion is inevitable in view of the disappearances of trade with Europe and may be of more than temporary advantage.

Sugar Production

The increase of production in provinces other than Bihar and U. P. is referred to in the second memorandum on sugar production in India. The latest estimate of total production for 1940-41 is 10.8 lakhs tons, showing an increase of 0.7 lakhs tons on the first estimate but a fall of 1.59 lakhs tons as compared with 1939-40. Owing to a rise in the percentage of recovery in Bihar and U. P. mills the average percentage will be as high as 9.9 per cent. As fully mature cane alone would be crushed in a restricted season, the total production of Bihar and U. P. factories is put at 7.6 lakhs tons. A 25 per cent increase in sugar production for the 1940-41 season as compared with 1939-40 is expected in the case of factories outside, the two provinces referred to Production is estimated at 3.27 lakhs tons against 2.6 lakhs tons in 1939-40 whereas production in Bihar and U. P. would be less by 2.25 lakhs tons. The material increase in production outside the Provinces where Sugar Control Acts are in force is due to the coming into operation of four new factories. But the actual increase as compared with 1939-40 is only two, as a total of 146 factories have reported as against 145 in the last season and one factory did not report. The larger working season of the 44 factories working outside Bihar and the U. P. was again a contributory factor in the increase of production. The total quantity of cane crushed is estimated at 11.1 million tons and the average percentage of recovery is estimated as compared with 9.45 per cent in 1939-40. Only Bombay claims a recovery percentage in excess of 10 and the nine Bengal mills with an average of 8.56 per cent come far below mills in other Provinces. The annual production of sugar in Burma where only three factories exist is given as 29.200 tons only. This naturally suggests that exports to Burma from India can increase if tariff and other concessions are available. The trade treaty of April, while affording a guarantee of protection to domestic sugar producers, contained a promise in favour of Indian shippers of sugar who need not be unduly hampered by the existence of an excise duty.

Larger Exports to America

The fall recovery in the U.S.A. is a fact according to the report of the Indian Government's Trade Commissioner in New York for the last quarter of 1940. Industrial production advanced and incomes increased. The defence programme began to loom large and steel output jumped to 96.3 per cent of capacity. Consumption industries, too, did well, and prices generally rose under the stimulus of increased purchasing power and enlarged employment. An increase in imports, particularly, during December was an outstanding feature. Increased imports of raw materials were inescapable under the arms programme, but unexpectedly imports of finished manufactures into the U.S.A. declined. The actual experience of India as an exporting country in the U.S.A. during 1940 was relatively favourable owing to the keener demand for raw materials. Total imports from India compared with the last quarter of 1939 showed a striking increase, but trade in November was slack as compared with October, or December. Increases were noticed under imports of jute, hessian, raw cotton, myrobalans, manganese and chrome ores, cashewnuts as well as mica and rubber as compared with imports in the preceding quarter and also the period following the outbreak of war. The increase bears out the conclusions expressed in the Meek-Gregory report though it may be noted that imports of shellac decreased. During this period shipping conditions, losses at sea, postal and cable delays and other extraneous factors came to influence trade trends which were unsettled in some measure by the defence programme. Imports of sacking for cotton decreased but imports of jute and hessian showed increases. A further fall in imports of carpet wool despite rising prices was disclosed. A welcome feature was the enlarged demand for Indian short staple cotton wanted mainly for making cotton blankets sold in the South. A recovery in myrobalans and kid skins owing to reduced shipments from China were features of trade during the quarter. A small reduction in tea imports due to the high prices asked by India has been referred to though it has been pointed out that U. S. demand is good and stocks with merchants are light. A very big increase under mica stands out as proving the correctness of Mr. Malik's remarks in the annual report published last month. The advance in manganese prices favoured supplying countries like India. The reduction under titanium ores and pigiron as also shellac and karaya gum showed that there were exceptions to the expansive trend which benefited also from the increase of interest in the U. S. market on the part of Indian merchants. Importers in Canada and the U.S.A. also manifested interest in a wide range of Indian products from brassware to wool. The statistics provided in the report indicate that U. K. competition in jute manufactures has shrunk alongside of the increase in U. S. demand for Indian goods while Russian competition in manganese had also dwindled. It is, however, noteworthy that India provides a very small part of the rubber imported by the U.S.A. whose total imports high in the third quarter of 1940 went up considerably again in the months of October to December.

Textile Industry's Progress

FOR those desirous of ascertaining the progress of the cotton textile industry in India the latest annual mill statement issued by the Bombay Mill-owners Association is still the best guide. The mill statement discloses that the number of cotton mills in India, at the end of August 1940 was 388 as against 389 at the end of August 1939. The figure, however, does not take into account the 34 mills in course of erection or recently registered. The outstanding features of the latest statement are first that the progress of the industry has been continuous since 1937 and secondly the decline in the number of mills in Bombay City and presidency, apparent since 1936 has been made good by the additions to mills in other parts of India. The number of mills in Bombay Island fell further to 65 with a resulting reduction of over a million spindles and 2,000 looms. The mills in the Province numbered 138; but their spindleage was only 31.73 millions against a total spindleage of 27.409 millions for mills in Bombay city. The average Bombay mill is, therefore, larger owing to the earlier adoption of rationalisation. The total number of looms, too, in the Province outside Bombay City was barely 8,000, more than the number returned by the 65 mills in the Island. It is evident that development of the industry in the Province has come to an end for the number of mills has decreased since 1936; and if productive capacity has not altered much, there is little doubt that the 203 mills in Bombay City and Presidency with about 60 per cent of the total spindles in India and 67 per cent of the looms are not likely to increase in importance. It is certainly noteworthy that the number of mills in Madras and Bengal, where as many as 20 mills have been registered or are in course of erection, continue to increase. Judged purely by standing equipment, Madras and the U. P. are, after Bombay and Ahmedabad, the main sources of textile production. It is again interesting to find that loomage in the 26 mills working in the U.P. was much greater than that for the 47 mills working in Madras. The employment figures, however, show that the textile operatives in the Madras Presidency are nearly double in number compared with the total given for the U.P.

The total number of workers in the mill industry on an average last year is said to be 430,165. In regard to raw cotton consumption, Madras consumes over 545,256 bales as compared with 524,284 bales Ahmedabad mills. Next to Bombay the former province is the most important consumer. Total mill consumption last year 1939-40 is estimated at over 3.6 million bales of which a little less than half was taken by Bombay City and Province. Among the States only Hyderabad and Mysore claim a place, though Rajputana possesses 6 mills. The progress statement shows that the, total number of operatives in India declined by about 12,000 last year and cotton consumption, too, fell by 113 lakhs of bales from the record level attained in the previous year. The decline is accounted for by the reduction of over 2 lakhs bales in the consumption of Bombay mills. The textile strike explains the reduction in consumption adequately, and reference may be made at this stage to the indications of recovery in the period after August 1940, Double shift working was resumed in many

"Sign of Safety"
wherever you see it!

The sharp edges of Goodyear's famous All-Weather tread resist skidding in any direction.
Wherever you drive—on country road, mountain trail, or city street—you see this tyre imprint more often than that of any other tyre.
It's "the sign of safety"—the imprint left by Goodyear tyres—the imprint of the famous All-Weather tread with its sharp-edged, diamond shaped blocks.
Throughout the world, Goodyear tyres have earned their reputation for safety, for long, trouble-free mileage, and for outstanding value.
Whatever your requirements may be, there's a Goodyear tyre to satisfy your needs and to suit your purse!

mills after August 1940 when the mill industry experienced the stimulus of war supply orders and overseas demand. Employment increased and the ill effects of the strike had practically disappeared. Sir V. N. Chandavarkar, it may be remembered, assessed the future as favourable and described also the improvement in prices. It is, therefore, likely that a recovery in employment and cotton consumption will have taken place in 1940-41.

Bombay Mutual: 1940 Report

Points in the annual report and accounts were fully discussed by Mr. U. S. Desai, the Chairman of the Bombay Mutual Life Assurance Society, at the annual meeting in Bombay last Saturday. In spite of the contraction in new business for 1940, the report of the society illustrates in every feature the observations made as regards the progress of Indian insurance in wartime. The report states that total business procured in 1940 resulted in the issue of 9,644 new policies assuring in the aggregate a sum of Rs. 151.32 lakhs with an annual premium of Rs. 8.07 lakhs. Total assurances in force at the end of 1940 amounted to over Rs. 11.9 crores of which over Rs. 23 lakhs was re-insured. Total premium income rose to Rs. 57,58,840-10. The revenue account shows an investment income of Rs. 8.54 lakhs. A rather unusual feature of the account is that the appreciation in the value of securities is shown as a receipt after providing for the transfer of Rs. 1 lakh to Investment Reserve. The addition of Rs. 4.16 lakhs nearly under this head explains in some measure the very large addition made to the Society's funds. The Life Fund stands at over Rs. 208.63 lakhs as compared with Rs. 164.64 lakhs at the beginning of the year. Total claims paid accounted for Rs. 10.78 lakhs and surrender took Rs. 1.39 lakhs. A very considerable fall in the expense ratio may be regarded as one of the achievements to which Mr. Desai rightly drew attention. The ratio has dropped to 22.83 per cent showing that this old Bombay office enjoys great advantages in regard to administration. The reduction in the lapse ratio is equally noteworthy, but it is of smaller importance than the falling yield on investments to Mr. Desai drew attention. The major features are common to all reports issued this year and the balance sheet appended to the Bombay Mutual report presents no special features. A considerable increase under house property is shown owing to the construction of the new premises in Calcutta. The increase in policy loans is understandable, and these in addition to the other advances, total Rs. 39.74 lakhs nearly. Stock exchange securities belonging to the Society are shown as 1.44 crores, of which the Indian Government securities valued as on December 31 alone account for Rs. 61.311 lakhs, and other approved securities are shown as Rs. 44.5 lakhs. A reasonable proportion of debentures and preference shares is held by the Society explaining incidentally why the average yield for 1940 on the Investments is as high as 4.43 per cent. Revenue items shown in the balance sheet amount to Rs. 5 lakhs nearly and cash balances exceed Rs. 6 lakhs. These are adequate as compared with liabilities in respect of unpaid claims, outstanding expenses and premium deposits. The classified summary shows that the book value and market value of the assets agree, and it may be inferred that with more than half the existing assets in giltedged, the Society has both conformed to the law and adhered to its traditional policy of diversified investments.

Punjab Soil Problems

It is known that the irrigation development has produced a crop of problems in the Punjab. These are analysed in a special article in the *Indian Journal of Agricultural Science* by Messrs. McKenzie Taylor and Mehta. Salt formation and waterlogging are among the more serious of the disadvantages due to the extension of the canal system in the nineteenth century. The recurring rise in the water table has been dealt with by the evolution of a drainage system in the past five years for instance in the Upper Chenab Canal Area. But monsoon water is not the only trouble. There is seepage, and investigations already conducted have shown that if seepage can be prevented, these watertable could be stabilised. Though waterlogging has been less extensive than was feared at one time it is not an easy question to deal with. It is mainly because alkaline soils are impermeable that the rise in the watertable has been checked. Hence a soil survey to determine where the crust is not of requisite thickness to resist waterlogging has been proposed. A soil survey is again essential to determine the extent to which the soil has been spoilt through the formation of salts. This again is a consequence of the spread of irrigation, but it is doubted whether it can be attributed entirely to a rise in the watertable. Geologists have gone into this question like engineers, and it is now thought that the sodium sulphate in the alluvium of the Punjab is deposited from a solution of mixed salts at a temperature of 3°C. That saline efflorescence represents a serious danger may be inferred from the fact, established after detailed enquiry by revenue officials, that 25,000 acres go out of cultivation every year owing to accumulation of salts in the soil. The estimate does not appear high but the true reason for such deterioration is still under investigation. In both irrigated and unirrigated land various experiments have been carried out. It has been ascertained that the cultivation of rice does not lead to the formation of salt whereas the cultivation of cotton does. If irrigation supply is limited up to a period, the progress of salt formation is not arrested, but if it is sufficient to counter-balance transpiration and evaporation, the salt zone does not spread upwards. That the water supply per field tends to fall with the spread of irrigation has been established, and the extension of the area served by particular canals necessarily results in the formation of salts and deterioration of the soil.

Reclamation and experiments have shown that if rice is cultivated in the initial stages of irrigation, there is less danger of saline efflorescence. At the beginning of new projects rice must be tried as the crop, but in the case of the older areas, the introduction of modular outlets is advised. To check any increase in alkaline soils, rice cultivation is an obvious remedy and the heavy flushing prior to transplantation has the effect of washing out salt from the soil. It will be said this is a highly desirable remedy on every count in a period when India's supplies of rice are upset by the difficulty of getting imports on the usual scale from Burma. Rice should be followed by a leguminous crop in order to deal with salinity in the soil. Recent experiments have also indicated that heavy crops of wheat in an irrigated area are a danger signal pointing to the accumulation of salt, and the land in most cases has gone out of use in the next season. The irrigation engineer can still do much for the farmer if he studies soil science in addition to his own science.

Burmah-Shell as Employer

Burmah-Shell has long ranked among the pioneers in industrial welfare in India. The labour force of twelve hundred employed at Budge-Budge have enjoyed the benefits of enlightened administration. Ten years ago, the Company appointed a Labour Officer to pick men for jobs and to hear complaints. The appointment was a proof of Burmah-Shell's interest in Indian labour which has benefitted since the management decided to put a special officer to help and advise the Company's workers. Welfare at Budge-Budge means such tangible things as sick leave and a voice in the selection of holidays with pay. Workers' delegates confer now and then with the Labour Officer. Routine benefits such as the dispensary and doctor are in the scheme of welfare sponsored by Burmah-Shell which includes provision for games out of hours. Adult education through night classes is no new departure; but the Provident Fund, to which all workers are admitted, represents a very important gain. The Labour Officer is the guardian of the workers' interests. A complete system of records helps to bring in new methods in personnel administration. The old undesirable system of jobbers dealing with recruits has given place to selection from a waiting list of suitable candidates. That is as helpful and hopeful a feature as can be looked for in any welfare department's work, voluntarily undertaken as in this case and cheerfully carried out for the good of the men.

Rising Prices in War

The May number of the League of Nations *Monthly Bulletin of Statistics* gives detailed figures regarding the trend of prices in a large number of countries since the beginning of the war. Apart from Germany, wholesale prices in all European countries for which indices are available had risen more than 30% by the end of the first quarter of 1941. In the United Kingdom and Sweden, the rise was in the neighbourhood of 50%, in Norway and Switzerland, about 60% and in Denmark it reached 80%. In Germany, where price control has been particularly severe, the official index numbers of wholesale prices show an increase of 5% only.

As regards non-European countries, the index numbers of Mexica remained practically stable; the general level of wholesale prices increased in the United States by 8%, in South Africa, Canada, Chile, Argentina, India, the Netherlands Indies and Japan by about 20%, in Peru by 30%, Egypt 40% and Palestine 50%. The increase in retail prices lagged, as a rule, behind that of wholesale prices; in many cases, it was only half of the latter.

Obstacles to trade, heavy increases in the cost of transport and a rise in the price of certain raw materials have resulted in a growing dispersion of prices as between domestic and imported goods and as between raw materials and finished products. The following examples show the percentage increase, between August 1939 and March 1941, in the figures for the latter being shown in brackets; Bulgaria 64 (37); Denmark 105 (65); Spain upto December 1940, 32 (20); Norway 84 (27); Sweden 105 (export prices 38); Switzerland 95 (34). The disparity of price movements as between agricultural products, raw materials and finished products was insignificant in Germany; it was likewise small in Canada as regards import and export prices or raw materials and finished products. In Argentina, the prices of agricultural products, which constitute the bulk of the country's exports, were severely affected by the loss of European markets; they dropped by 15% between August 1939 and January 1941, whereas non-agricultural goods went up 28% during the same period.

Quotations for staple commodities on the United States markets advanced markedly as from the middle of March 1941 the rise in the next two months often equalling and in some cases exceeding the rise in the previous 18 months as is shown below:—

Per cent increase between.—31st August 39 and 28th February, 1941, Cotton 24, Hides 21, Rubber 15, Cottonseed oil 14, Tin 5, Lead 12. 28th February and 15th May, 141, Cotton 22, Hides 14, Rubber 19, Cottonseed oil 6', Tin 2, Lead 4: 31st August, '39 and 28th Feb., 1941. Wheat 22 Maize 38, Lard 4, Pork 22, Sugar 8, Cocoa 45, Cogee 14, 28th February, 1941 and 15th May, 1941, Wheat 18, Maize 17, Lard 55, Pork 12, Sugar 8, Cocoa 25, Covee 20.

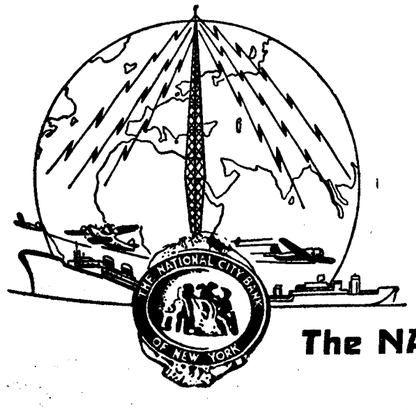
Clive Street Gossip

"I must have liberty
Withal, as large a charter as the wind
To blow on whom I please."
—(As You Like It).



Do Governments deserve all the power they have and the power they can get? Quite a big question to ask, one which raises problems which not all the scientific knowledge at the service of man will enable one to answer. But I cannot help this question raising itself suddenly in my mind, as I see the piecemeal, almost slipshod, way in which vital problems are tackled not only in this country, but abroad. How often, are well thought out plans of reform given little consideration and turned down by officials whose competence to study these questions is in almost inverse proportion to the power which they wield. Of course, the most outstanding instance of purblind indifference to constructive criticism and wholesome advice is the record of the National Government in Britain in the years prior to this war. Who amongst those who constituted the Government of Great Britain can now pretend that every sign of the menace of Nazis which now tries to overpower Great Britain, was not clearly visible years ago? Who can contend that, even if they were not able to see the signs aright, there were not others incessantly dinning into their ears the imperative need to rearm Britain to the full extent of her power? Here is Mr. Churchill to-day facing the consequences of other people's indifference to his own advice. Now, all that is history. What concerns us is, why are the eardrums of Governments as a rule, muffled against wholesome advice, and their hearts sealed against their genuine well-wishers? Is it in the very nature of governments as such to suffer from such defects? What prevents governments from giving careful and full consideration to plans and proposals which bear on them the stamp of sound bases in fact, unexceptionable objectives, careful thought and practicable proposals?

I do not presume to know the answer. Perhaps, Governments too, like other sections of mankind are like marionettes with the strings in the hands of some malevolent fate. The story is told of a highly competent astrologer who, when he was confronted with a prophecy of his that had gone wrong, could only groan that it was fated to be and that Destiny could not have her way except by blinding his eyes to the most obvious features of the horoscope. Governments are not half as competent or veracious or modest. They invent new excuses even in the face of the most contrary facts. And the world has yet to wait for the example of a government that owns its errors and encourages its successors to follow its example. Thoughts like these are for me inescapable, when, in my own experience, I have come across more than one instance of governments putting their hands to belated and piecemeal measures of reform which are, for that reason, infructuous, when they could have adopted well thought out and comprehensive plans of action which were presented to them far earlier than the development of critical conditions.

Apparently, the proverb about a stitch in time refers in the opinion of governments only to the tailor's job and has no wider metaphorical significance. Take the problem of jute in Bengal to-day. A more tractable problem of such dimensions and affecting the fate of so many millions, it were hard to imagine. Nature has given this province and a few outlying districts an altogether rare monopoly of an essential commodity. The area, in which it is cultivated, is not spread all over the province but is centred only in a few districts. The industry that utilises the raw material in production was confined in large part—how unfortunate it is no longer true—to the lower reaches of the Hooghly. The bulk of the consumers are abroad and such manufacturers as were outside this country could have been thus either easily contacted or controlled. And yet, this commodity and this industry have been allowed to suffer vicissitudes whose repercussions are all over the province of Bengal and by no means confined to it. It has its bearing on the Central Budget, on the finances of the whole country and on the mechanism of our international trade and foreign echange. Here is a case in which there was every provocation and every incentive to careful and constructive effort. More than twelve years ago, when the affairs of jute fell into a critical position, I was instrumental, along with many others, in bringing about a conference, the aim of which was to concentrate the attention of the Government and the public on the immense possibilities of careful planning of the questions connected with jute.

A compact plan was adumbrated at length in the editorial columns of *Indian Finance* under the heading "Planning of Bengal's Jute." All the measures adopted by the Government, which are now matters of controversy, less for their potentialities of good than for the complications they have created, were therein fully considered. Compulsory restriction of jute, minimum price for the

raw material, restriction on new mills and regulation of production, all these which, since then, under various sets of circumstances, the Government and the industry have been obliged to adopt, were then thought out and given in an extremely cohesive and coherent plan. Compulsory restriction of the crop which, at no time, could have been a threat to the interest of the industry, the jute mill owners have of late had to swallow, as if it were a bitter pill forced down their throats by an unsympathetic physician. Minimum price for jute, which would have been quite feasible, had the Government of Bengal taken timely and comprehensive action according to the plan which included a proposal for a cess on jute exports and its capitalisation in the form of a loan, now bristles with difficulties. It remains just a feeble gesture to the electorate, a pious wish which the Government cannot implement with action and which, therefore, suffices only to bring scandal at the most and derision at the least.

It is not difficult to see that with problems like that of jute which has so many different phases and in which a wide variety of interests is involved, it is no use trying to tinker, with partial and half-hearted measures. Nor is it helpful to view the problem from the political angle or to import any kind of sloppy sentiment into it. What I mean is, a sudden upsurge of sympathy for the cultivator on hearing the news that the price of jute has slumped to a new low level is no advantage in solving the problem thus raised. A Government communique feelingly worded can no more take relief to hard-pressed cultivators than hard words can break bones. And yet this is really what the Government of Bengal had done in this regard. There is little realisation that the announcement of a minimum price for jute will not work the miracle. It may be that to save their face the authorities may be able, now and then, to give practical effect to their intentions by arriving at some understanding with the jute mills. But it is not on the goodwill of the consumers that the scheme can rest. If jute is to have a minimum price, there has to be control over jute acreage. And if the acreage is to be regulated, there has to be more complete knowledge of the markets and an ability to adjust the programme to changes in circumstance. And what is more, the Government have also to secure the resources with which they can afford relief to the market when the market needs it. The whole system of marketing is to be made more scientific; facilities for storing have to be afforded; warehouses, which are indispensable for scientific marketing of agricultural products, have to be built. And it is in consideration of these that the plan I referred to contained provisions for a cess and the capitalisation of its proceeds in the shape of a loan to be utilised for building warehouses and for enabling the Government to hold the stocks if such an extreme measure should become necessary for the enforcement of the minimum price. When the plan was first announced, it attracted some attention not only from the public, but also from men of position and power. But nothing ultimately came out of it. Though the Jute Mills Association had their trouble with new mills, though the producers of the raw material had their difficulties, the bogy of conflict between the interests of the two was assiduously kept up and the idea that a solution for the difficulties of all sections of the trade and industry could be found in a comprehensive plan was never accepted cordially. And the result is that, as each trouble becomes severe, the section of the trade, which is affected, seeks a temporary palliative and suffers a reaction worse than the original complaint. After all, in the matter of reduction of acreage and minimum price, the Government of Bengal are in as had a mess as they ever were.

In this respect, there is one important circumstance which no one should forget or ignore, namely, that the responsibility for cold-shouldering the scheme for planned jute and for inaugurating half-baked measures does not belong to the same system of government. When the plan was first published in the columns of this journal, the old dyarchic government was in power. And it was the new system of responsible government under provincial autonomy that brought in the measures regarding minimum price. My point, therefore, holds that there is something in governments as such which prevents them from giving adequate consideration to schemes emanating from non-official sources, however, sound they may be.

Another outstanding instance in point is that of the scheme for the repatriation of our sterling debt. It was not long ago that I devoted the whole of this section to showing the difference between accepting the scheme put forward by *Indian Finance* wholly, wholeheartedly and in time, and being driven to adopting it part by part. There is hardly any need to traverse the same ground, though I must say, that compared with the position of jute in Bengal, the repatriation of the sterling debt leaves no room for regret and what regret there is room for is less keen. Because, on the whole, the scheme has acquired, in the process of its piecemeal operation, a unity which normally one could not hope for. When I set my own experiences in this regard side by side with the most outstanding instance of government's unresponsiveness to constructive public opinion, namely, the failure to secure adequate rearmament in Britain, I feel that it is not so much in the nature of the personnel of government as in its character as an institution, that the best of schemes can hope for nothing but a cold douche at the hands of the authorities. The phenomenon is academically as interesting as in practical life it is momentous. I would so much love to subject it to such close examination as I am capable of. But, at the same time, I venture to throw the suggestion that every constitution should have a statutory provision for a Minister without portfolio, whose duty it will be to examine schemes emanating from non-official sources and obtain the criticisms of the departments concerned thereon. Perhaps, you do not think much of this suggestion of mine but it is at least a safeguard against sheer indifference.

The launching of the *Travancore* on Monday afternoon is one of those events, the significance of which one need not wait for the efflux of time to appreciate in full. The *Travancore* is a unit of the Royal Indian Navy. She was built in a Calcutta shipping yard which has been commissioned to build more. "It is a direct contribution to the war," as Mr. Haddow said, "of which we in Calcutta have every reason to be proud." The launching of the *Travancore* and the building of more such ships in a Calcutta yard is a reminder that the significance of the recent events in Vizagapatam has to be sought elsewhere than in the new yard being a pioneer effort. Though a shipping yard is not an altogether new thing, the launching of the *Travancore* opens a new chapter. The occasion was celebrated with the pomp and gaiety appropriate to it. The luncheon was weighty, well-attended. And Vice-Admiral Sir Herbert Fitz-Herbert in a speech which was extremely pointed and apposite, impressed the gathering with the importance of the step now taken.

"The launching at which we have assisted to-day marks an extremely important moment in the history of the R. I. N. It is the begin-

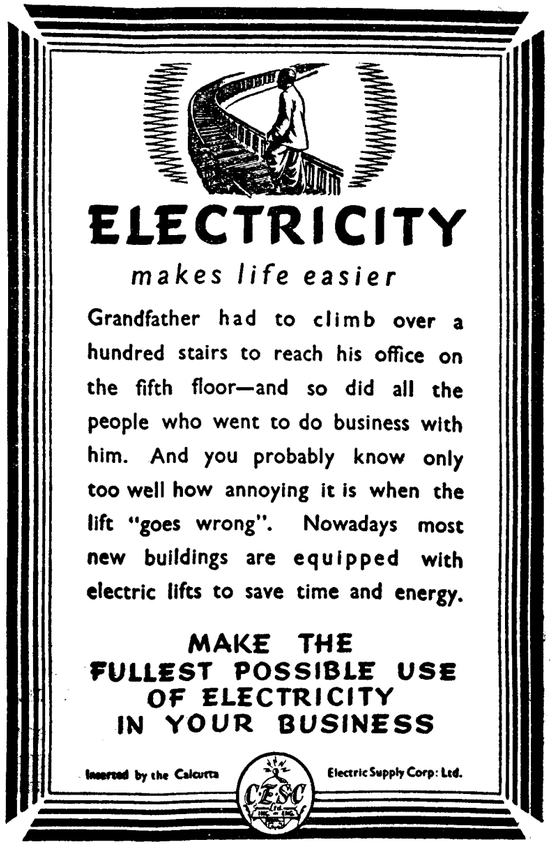
(From Our Correspondent)

Simla, July 9.

Military reasons are believed to be responsible for the transfer of General Auchinleck to the Middle East and appointment of General Wavell as Commander-in-chief in India. It is not good for prolonged and extensive war operations that the responsibility for leading them should be committed to one man for an indefinite period. The strain on General Wavell has been so great during the last twelve months that it was decided to give him a change of scene and entrust the Middle Eastern Command to a new General. It was probably for the same reason that General Auchinleck was sent to India, but though there had never been any doubt that General Auchinleck would have to go back to an actual theatre of war, it was thought that local arrangements would be made for filling the post of Commander-in Chief in India. The appointment of General Wavell shows that recent war developments have necessitated the appointment of a first class General with experience of the present war in the East as Commander-in-Chief in India, for the forces in this country have to be prepared to meet any possible aggression both from the east and the west.

* * *

Simla is once again agog with political speculations regarding the reconstruction of the Central Government's Executive—though a guarded official denial has also been issued. The appointment of Sir Mahomed Zafrullah to the Federal Court did not come as a surprise, for it has been well-known that the Law and Supply Member had a preference for the judicial line. At one time his name was being mentioned for the Privy Council Judgeship, but the final choice went in favour of Mr. M. R. Jayakar, who has since resigned. It seemed doubtful whether the Viceroy would agree to relieve Sir M. Zafrullah as Member of Government owing to the importance of his work as head of the Supply Department, but as expansion plans for the Viceroy's Council were already under consideration it was probably thought advisable to make the change. It is believed that Sir M. Zafrullah intends to hand over charge and go on leave in the last week of August. As there had been for some time a demand that owing to the importance of industrialisation, both for meeting war needs and also for economic reconstruction after the war, a prominent industrialist should be included in the Viceroy's Cabinet, it is proposed to appoint Sir Homi Modi as Supply Member. It is generally regarded as a good choice, for besides being an able parliamentarian he has unrivalled experience of the working of Indian industries. For the Law Membership the intention is to appoint Sir Sultan Ahmed who was not many years ago an officiating Member of Government holding the Commerce and Railway portfolios.



* * *

These are primarily in the nature of administrative changes without any political significance. It was never looked upon as a wise decision to link the Law and Supply portfolios under one Member. The present decision to have two separate Members removes only an administrative anomaly in the interests of both the Departments concerned. But at the moment there are widely current reports that further additions to the Viceroy's Council are possible—if not now, at least in October. For some months past there has been severe criticism in the British Press on the subject of the Government's policy in India—of "masterly inactivity" as "*the Economist*" has called it. This London paper has frankly written: "One thing at least the Viceroy can do, as he waits for Indian intransigence to wear down; and that is to set his own house in order". The efficiency of the Central Government's constitution as a war administration has been questioned. In the opinion of "*the Economist*" it has been allowed "to rust and languish". It is believed here that the growing strength of British opinion is forcing the authorities to make a new move. There is so far no indication of any desire to approach the Congress and the Muslim League for a settlement. Nor is there any sign of accepting the Sapru scheme in its entirety, but as has been generally anticipated, there is a move to have a Council with a non-official Indian majority. The portfolios now held by Indian members may be as soon as possible split up to provide for new members like Dr. Ambedkar, Mr. Aney and one or two others. As Sir Girja Shankar Bajpai may be selected for the important position of India's High Commissioner in America, that may give another vacancy to non-officials. There are reports that Mr. E. Raghavendra Rau who is now in the India Office, may be brought to India as one of the new members. Another interesting report is that in view of the fact that the previous Commander-in-Chief, General Auchinleck, had no objection to the association of an Indian Defence Member with his Department, the Viceroy may invite Sir Akbar Hydari to take charge of this work. It is very difficult to say how finally the scheme will shape itself. Much depends on the actual nature of these proposals when they finally emerge, and the attitude taken up by Sir T. B. Sapru and his followers of the Bombay Conference. In this connection the new Reforms Commissioner, Mr. Hodson, is expected to meet Sir T. B. Sapru within the next few days. It is hoped that General Wavell, the new Commander-in-Chief, will take the same liberal view as his predecessor and show his readiness to work with an Indian Defence Member if one were appointed.

* * *

It is of no small importance that the Members of the Viceroy's Council have, according to Press reports, decided to impose a fairly big cut in their own salaries. This may be only with a view to prevent any big drain on the Central Exchequer as a result of the Council's expansion. In any case, as the beginning of an economy drive, if it so proves in course of time, the examples set by the Members of Government is bound to be welcomed. It is possible for other officers of the Government of India—especially those in the grade of Secretaries—to follow the example, for there can be no question that compared with the scale of salaries observed by Provincial Governments in their Secretariats that at the Centre has been on far too lavish a scale. The suggestion has been made that a useful lead can come from the Viceroy and Governors in respect of curtailment of expenditure from the peacetime scale to what is now absolutely necessary. It is pointed out that instead of waiting for the end of the war for proceeding with economy plans, a wise beginning can now be made in order to release as much money

Gateway of India

(From Our Correspondent)

Bombay, July 9.

IN view of the inclement weather and the prolonged disturbances in the city there is not much interest in politics. Little or no attention has been paid to the discreet reports of an early expansion of the Viceroy's Council. The mention of Sir Homi Mody as a possible Supply Member has not caused excitement since only a businessman can fill the bill. Though rumours can never pass for the truth there may be some alarm in Hindu circles over the choice of Dr. Ambedkar, a convert to the two-nation theory. It may however please Bombay to learn that two representatives from the Province will be taken into the Central Government. But orthodox Hindus who know something of the down stand made by Dr. Ambedkar at the time of the Poona pact are not at all happy about the possible selection of a Scheduled Caste leader. It may be urged that a Hindu who has seceded from the Congress, for instance, Mr. K. M. Munshi, would be a better choice, failing acceptance of office by such an obvious candidate as Mr. Jayakar whose resignation from the Judicial Committee has been reported recently. Without expressing disappointment Bombay circles have not reacted favourably to the selection of Sir Zafrulla Khan to be a Judge of the Federal Court. The fact that Sir John Beaumont attended a session of the Federal Court as the senior most Chief Justice of Indian High Courts gave him a special claim. A 'silk' and an experienced Judge he would have given more satisfaction to the Bench and Bar alike in all parts of India. There cannot be any footling pleas against his election to the Federal Court on the score of his not being an Indian Muslim. The press said little against his selection to officiate on an earlier occasion, and Sir John Beaumont who has been what is called a strong Judge, would have been just right for the Federal Court, particularly as the present Chief Justice has never been a lawyer in active practice, but is an academic jurist up from the Civil Service.

For about a week conversation has turned round the weather, from necessity rather than choice, one must add. Railway and postal communications were undependable over a week and the most welcome sight for citizens this week-end were the milk cans and baskets of green stuffs. There was the usual price-rigging by the shopkeepers when supplies failed for a few days owing to the floods in districts served by the B. B. and C. I. Railway. Weather has been clearer after the weekend but train services on the G. I. P. are not completely restored yet. Duplicate trains and the use of the G. I. P. route by others have been common. And the continued blocking of the Bhor Ghat is responsible for unusual delay in the running of trains from Madras. A very considerable rise in prices has been reported from the mofusil. Water supply is sufficient, but many districts have little water left for irrigation. The drought in the Deccan Districts is yet unbroken while the flood damage in districts like Surat is grievous. Surat town owing to its proximity to the sea suffered extensive damage and boats were used to rescue people. The river Tapti has risen and the heavy rain in Gujarat has been accompanied by floods in Baroda where the Government has adopted numerous precautions.

The fixation of prices in the U. S. A. for cotton and cotton goods provoked the landslide in the Bombay market described last week. There has been since a rally, but it is now realised that U. S. prices would be subject to control and Indian prices would have to fall in line with world prices. In April last it was apparent when Mr. Leon Henderson, who serves on the council of the Office of Production management, limited the rise in the price of combed yarn. There were protests, and in June, he came down more heavily by announcing that maxima should be 15 per cent under current prices. This ruling was regarded as objectionable by the cotton markets in the U. S. A. who were aware of Congress's suspicion of price control and could also argue that the Administration was still committed to farm relief. In a recent resolution Congress has upheld its opinion that farm incomes must rise further, and this must ultimately help cotton. But an advance in prices for manufactured goods in general demand will surely follow any rise in raw cotton and the recent rise is regarded as essentially due to speculators' action. Mr. Henderson's announcement about 'ceilings' for prices of manufactured goods some of which are wanted for the defence programme was approved by the Administration immediately. If the advance in cotton has been definitively checked, Indian markets must take it as a warning. And the hessian market must take to heart the fact that cotton bags may become cheaper and more popular if sacking is too high. Indian cotton developments will be governed hereafter by the monsoon which should assist the progress of the crop in nearly all the tracts.

After two years of activity workers in the cause of adult education in Bombay have paused to survey the results. It is generally said that the drive launched by men, and women too, to instruct adult illiterates has borne fruit. More than thirty thousand adults have shed their ignorance, and it has been distinctly encouraging to find that women exhibit great interest in the classes. Even Muslim women have shown unusual interest and taken the annual test held after the year of study. Instruction does not cease after the year of teaching, for attempts are made to secure some interest in letters. This alone lies behind the 80 per cent success now claimed for the adult literacy movement. There were over four thousand pupils in the post-literacy classes that are designed to prevent relapse into illiteracy, but more classes will have to be started if the campaign is to be considered as efficient as can be. The absence of suitable books retards the growth of literacy among adults; and the gulf between the spoken and written versions of the same Indian language is regarded as an obstacle by some who urge that a few and simple rules would make a language familiar to the adult pupil for whom school is just a part time interest.

In view of the Bengal Government's statement on rice supplies in the Province there has been renewed discussion on the rise in prices in Bombay. Prices have risen rather sharply of late and the only crumb of comfort forthcoming is a report that the Government of India is going to coordinate road, rail and sea transport in order to level down prices. Conferences have taken place between a visiting officer and the Grain Merchants Association. There has also been a suggestion that the Transport Advisory Council should consider and make recommendations. There is a report to the effect that Government is considering a scheme by which ships will be chartered by Government for carriage of rice from Burma. Suggestions have been lately advanced in regard to the development of transport in country craft. Monsoon seas will, however, interfere with carriage by country vessels. Profiteering in tinned provisions has been commented upon rather fiercely, and complaints have been made as regards the big rise in the prices of dry fruits. The importers are few and prices can be run up by agreement. Government has been exposed to the fell tactics of the profiteers in this case but that is because recent orders have made a big hole in local supplies. There is, however, no point in discussing this as the difficulties in regard to milk and vegetables are experienced by the poor and middle class who are more inconvenienced by the rains that still pour.

There have been many company meetings particularly of insurance companies in the last week. At the New India Assurance meeting Sir Chunilal Mehta described the main problems of the marine insurer. The possibility of a shrinkage of marine business was referred to by the Chairman of the company in assessing prospects for the immediate future. The expansion in new life business was touched upon and policyholders will note with satisfaction the assurance that expenses of management will be strictly limited. The company had experienced favourable conditions in all branches and further progress was assured by the satisfactory working of all departments.

ning of a large ship-building programme, the completion of which will mark a definite achievement on India's part as far as the naval war effort is concerned.....India's naval activities are not confined to local naval defence alone as was the original intention. To-day, ships of the R. I. N. are actively engaged in waters far removed from the actual coasts of this sub-continent.

"Some of the ships are assisting the Royal Navy to fight that great battle, the Batte of the Atlantic, others have been and are extremely busy in the Red Sea. In this connection, it is a matter of interest and pride to know that the first ship to enter Massawa after its capture was H. M. I. S. *Hindusthan*.

'Let us look to the future for a moment. The programme of India's ship-building is a large one. Not only have we to build the hulls, but we have now to provide the propelling and auxiliary machinery for the latter part of our programme. This is an entirely new departure and one that will exercise the talent, organisation and ability of all the firms who will be concerned."

Of the ability of the firms concerned, particularly of Macneills the *Travancore* is ample witness. All strength to their elbow. Macneills have been commissioned to make more vessels for the Indian Navy; and one may be sure that the job will be done well and thoroughly and to time.

'EAVESDROPPER'

(*Continued from page* 47)

Government purchased for cancellation. If this theory is correct, it means that, in addition to securities for Rs. 24.16 crores which the Government purchased recently from the issue department of the Reserve Bank for cancellation and for which *ad hoc* Treasury Bills were issued to the Bank, the Government have also bought from the Banking Department securities for slightly less than Rs. 3¼ crores and cancelled them. Most probably, the Government had to have recourse to a ways and means advance from the Reserve Bank for making payment for the securities thus taken over and cancelled. This might have been done in the early part of the last week.

Just towards the close, however, the Bank must have received intimation from London of the sterling payment made by the British Government to the credit of the Indian Treasury. As intimation in respect of such payment was received late on Friday, there might not have been time enough to make adjustments on the basis of the repayment of ways and means advances for Rs. 3.85 crores taken early in the week. If the line of reasoning we have adopted in explanation of the important and considerable changes in this week's Bank return turns out to be correct, it follows that the Central Government will have no difficulty, from their large cash balance of over Rs. 12 crores, to pay in full the ways and means advances due to the Bank. We, therefore, expect that the next return of the Reserve Bank will show complete liquidation of the ways and means advance made by the Reserve Bank to the Central Government.

As arising from the changes which have taken place from time to time in the composition of the rupee debt of the Government of India as well as in the total outstandings in respect of the various loans comprising the debt, we have a special request to make to the Government. It is part of the essential statistical material provided in the "Investor's Supplement" of *Indian Finance* to maintain a complete list of the various government securities and of the total amounts of each stock. From the manner in which changes have been made over the past twenty months, it is not possible to claim any manner of accuracy or even near-accuracy for the figures that we give regarding Government of India securities. While we know that our figures are inaccurate in regard to a number of securities, we cannot discontinue this section. We are thus left in the embarrassing position of continuing to give tables which we know to be wrong. Sir Jeremy Raisman can come to our help and enable us to present to the public accurate tables. Now that all the operations that had to be carried out in India as an offshoot of the redemption of various sterling securities have been more or less completed, Sir Jeremy Raisman should be able to issue a table giving the present position of the rupee and sterling debt of the Indian Government. There can be no question of public policy involved in the disclosure of the information we ask for. On the other hand, delay in supplying the information has the effect of the public having to be content with what every one knows to be misleading information. In making this request, we have every confidence that Sir Jeremy will see his way to accede to it, as it has been our pleasant experience that, with him as the Finance Member, no reasonable demand for information has been turned down.

There was more business passing in the exchange market with more export bills and more remittances.

Banks were sellers of T. T. at 1s. 5 15/16d., for ready up to six months forward; and banks were buyers of T.T. at 1s. 6d., for the same delivery.

Banks were buyers of three months' D.A. bills at 1s. 6 7/32 d., for three months and 1s. 6 9/32d., for the fourth month.

Interbank call money quoted ½ per cent; all lenders.

Firms' money for call and short quoted ¾ per cent; and for one to four months deposits ½ per cent.

(*Continued from page* 49)

after the end of the war and the first instalment is to be advanced immediately.

The armistice terms offered to General Dentz make mention of Syria becoming again a member of the sterling area. If the Free French get control there will probably be no objection to Syria and Lebanon trading with the British Empire. The terms according to an Italian source have been peremptorily rejected by Vichy but mediation and the military situation may make General Dentz use his discretion against the dictates of Vichy. If an armistice comes the blocking of Syrian assets would end, and efforts would be made to conclude payments agreement as with the French Congo with Syria and Lebanon. Syria does not offer much scope for trade but the Dominions' food surplus should find a ready market in a country that has been drained of foodstuffs, fuel and almost all consumable goods.

G. I. P. RAILWAY

MILEAGE COUPON TICKETS

FOR

COMMERCIAL FIRMS & TRADERS

With effect from 1st June 1941, a new series of Mercantile Mileage Coupon books has been introduced on this Railway. Each Book contains coupons of the following denominations:

28 coupons of 50 miles each.
20 „ 25 „ „
50 „ 10 „ „
100 „ 5 „ „
100 „ 1 mile „

These may be used any time within SIX MONTHS from the date of issue of each book and are valid for use on the G.I.P., B.B. & C.I., N.W., E.I., E.B., N.S., M. & S.M., Mewer State, Mysore State and S. I. Railways.

PRICE OF COUPON BOOKS

First Class .... Rs. 297-8 per book
Second Class .... Rs. 148-12 per book

Full particulars about these time and money saving Coupons can be obtained on application to:—

The Chief Traffic Manager, G. I. P. Ry., Victoria Terminus.

Station Superintendent, Victoria Terminus.

Station Master, Poona.

Divl. Traffic Manager:— Bombay, Sholapur, Nagpur, Jubbulpore and Jhansi.

Jute and Jute Manufactures

(From Our Correspondent)

WE have had occasion in the past to animadvert on the value of the Jute Forecasts, but the Preliminary Forecast for season 1941-42, the figures of which have just been issued, almost defies criticism. One can only join Alice in Wonderland in the exclamation—curiouser and curiouser. For the figures published make no pretence to be a Forecast at all. Whether the Consolidated Forecast, due in a few days, will throw any more light on the subject remains to be seen. In the first place, the manner in which the figures were presented was peculiar. The first batch of figures were issued without comment. With the second batch was appended a note to the effect that the figures for the coming season were the acreage licensed under the Bengal Jute Regulation Act with minor modifications. From the third batch of figures onwards the Director apparently took courage and published an additional column showing the acreage recorded under the B. J. R. Act for the remaining Bengal Districts. It might have been useful for the trade of course if he had gone a step further and published yet another column showing the acreage **actually sown** this season, but this he modestly refrained from doing. Hence, we submit, the figures issued are of no value whatever as a Forecast or an estimate of acreage, or indeed anything else. For we flatly refuse to believe that the acreage actually sown coincides so closely with the acreage licensed as to be covered by "minor modifications". Why incomplete details of the "recorded" acreage were published at all it is difficult to understand. Unless it were to prove that the faint praise which we bestowed upon last years Forecast figures, when we congratulated the Director on having made a better shot at it than for several years before, was undeserved. For the "recorded' figures of acreage make the revised acreage figures in last years Final Forecast look pretty silly. The record, as we have said, is not complete, but in not a few cases the "recorded" acreage is more than double the Final Forecast figure. The record applies of course only to Bengal, for which the estimate last year was around 36 lakhs of acres. But the incomplete "recorded" acreage would appear to have been in the region of 49 lakhs of acres or more than 50 percent greater overhead than the trade was asked to accept as the Director's estimate. What is one to make of that? Candidly we cannot believe that the Director was so far out in his estimate. For one thing his arithmetic is unimpeachable. The Licensed acreage published is in practically all cases almost exactly one third of the "recorded" acreage. Also, in last season's conditions, such an acreage as that "recorded" would have yielded a crop far beyond the most optimistic out-turn ever suggested by the most pessimistic Bear. The Forecast estimate was generally considered a bit on the low side, but not to that extent. Nor do the arrivals, plus trade estimates of the balance of Old Crop still to be marketed, indicate that the acreage sown last year could have actually been anything approaching the figure so generously "recorded" by Government for the purpose of licensing sowings for the New Crop. We prefer to believe that the Government "recorders" were much too credulous in accepting the acreage figures given to them by cultivators. We pointed out at the time that the "record" was not made till the crop had been completely harvested, so that the "recorder" had little chance to check whatever figure was given to him by individual cultivators, who in the circumstances were unlikely to offer an underestimate.

For what they are worth, and that as we have indicated is in our opinion very little, the figures published suggest an acreage sown rather over eight annas of last year, 22,12,600 acres against 43,24,000. In estimating yield, consideration will have to be given to a certain amount of damage by floods in a number of Eastern Districts coupled with less favourable growing conditions generally than prevailed last season. We are inclined to think some of the reports of the growing crop unduly pessimistic. Conditions have improved recently though a spell of sunny weather would be of immense benefit almost everywhere. Low land crop yield will be under normal due to immature cutting, but the mid and high land crop is progressing well and gives every prospect of a satisfactory yield. Arrivals of Old Crop Jute during June were exceptionally heavy totalling 6,37,000 B-s against 1,04,000 a year ago. This brings the estimated total arrivals for the season ended 30th June 1941 to 94,60,000 bales as against 100,31,000 Bales during season 1939-40.

The Export Jute market has ruled dull and featureless until today when the allotment of some freight for Dundee caused a slight flutter. Not much fresh business was placed however, partly because the easy tone of Fatka caused buyers to hesitate in placing their orders. A sale of Dundee Daisee assortment was reported at Rs. 52 but little else. Old Crop Firsts for shipment are quoted at Rs. 47 and Lightnings at Rs. 39. Some business with local Mills has been put though on the basis of Rs. 52 for Firsts and Rs. 46 for Lightnings and some small sales of Cuttings have also been reported. The Futures market has been in the doldrums. The Forecast figures were apparently not at all to the liking of the speculative element and from a high point of Rs. 69-12 at the end of last week the rate rapidly declined to Rs. 61-8. There was a slight recovery after that to Rs. 64-12 but with Mills showing no inclination to support the Loose Jute market, depression again set in and the closing rate is around Rs. 60-8.

As indicated, Mills have shown little interest in Loose Jute. Some small sales of New Crop Weedings have been recorded for quick shipment at Rs. 10-12 for Medium and Rs. 8-12 for Low, European District, and later at four annas less. Indian Jat Weedings also sold at Rs. 12 and Rs. 10 for Good and Medium. Indian Jat Tops, Middles and Bottoms are offered at Rs. 11-8, Rs. 9-8 and Rs. 7-8 without finding takers. Ideas concerning the new standards are still somewhat confused and in any case such samples as are coming forward at the moment are not of a type to constitute a standard which could be maintained for more than a few weeks. At the close business is reported in Old Crop Indian Jat Cross Bottoms at Rs. 5-8 with sellers over.

There has only been a meagre turn-over in the Fabrics section during the week and prices have eased somewhat. Forward demand is conspicuous by its absence and in any case Mills are unwilling to sell at the lower levels now quoted. Business has been almost entirely confined to the ready and near positions. Nine porters have eased from Rs. 19-4 to Rs. 18-8 with business recorded at Rs. 18-12 July and Rs. 18-8 August. Eleven porters have ruled rather steadier with sales recorded at Rs. 23-12 to Rs. 24 for ready and July, at Rs. 22-8 Septr, at Rs. 21-8 Octr and at Rs. 20-10 Oct-Dec. Heavy Goods have ruled fairly steady with only slight declines, business also confined to near shipment.

THE CHIEF COMMERCIAL MANAGER, NORTH WESTERN RAILWAY, LAHORE

JUTE

Calcutta, July 10.

THE jute market has passed through unusual vicissitudes if one can judge from the abrupt changes in prices. Sentiment has been affected by crop news and revised calculations as regards the 1941 crop. It is now freely admitted that acreage this year will exceed all previous estimates as the area recorded in 1940 is substantially in excess of the forecast figures published. While a variety of deductions are quickly drawn as to the Bengal Government's duty to the jute market or rather the bulls, who have been trapped, there is no reason to believe that the violent see-sawing of prices in the futures market will upset the trade.

Quotations for loose jute came down before the week-end when Tops, Middles and Bottoms for Indian Jat were quoting Rs. 12, Rs. 10 and Rs. 8 respectively. The close approximation to official minima indicated that the peak of whatever advance was desirable had been reached. But buyers did not manifest much interest in the new crop, and as for old crop, no buying was reported in spite of the lower prices asked. The tone was definitely dull then, but this week it has been dismal.

The oscillations of the Future's market which plunged downward after touching Rs. 74-10 early last week are of limited interest, except for the fact that pucca bales have lost interest. Without any broadening either of mill buying or export demand prices have moved irregularly again this week. On reopening this week quotations for loose jute fell by four annas per maund owing to the dramatic fall in September futures from an opening level of Rs. 64-12 per bale to Rs. 61-12 on Monday. There has been a recovery in Futures owing to covering but the jute market is definitely easier. If the decline in the manufactures market influenced jute adversely the hessian market latterly has helped to restore poise. Demand has shrunk and new crop Jat is now quoting Rs. 11.12 for Tops Rs. 9-12 for Middles and Rs. 7-12 for Bottoms. Old crop Jat Bottoms were on offer at Rs. 7-12 without attracting buyers. On every day the condition of the market has been described as idle and depressed so that too much attention should not be paid to the recovery in Futures, which has not held at all to judge by the rise and fall on Wednesday when rumours supplied the usual corrective. Business since the end of last week has been smaller than ever, and the reported introduction of a new taxation measure designed for raw jute is hardly likely to send prices up.

The continuance of a 45 hour week in the mills and the agreement concerning grades and marks are admittedly favourable factors. The Bengal market is of course the mainstary for jute but with extra-mill consumption as low as 3 per cent of an ordinary year's crop and rival fibres coming ahead, the outlook for jute is by no means clear. The wisdom of restriction is plain enough but a fear persists that artificial maxima will deal a blow to the export trade from which it will find it hard to recover. The jute market to-day is again the sport of rumours and is not likely to show impressive form.

JUTE MANUFACTURES

Calcutta, July 10.

THE rise and fall in the prices strikes the average observer as of less importance than ever. It is generally known that demand has failed to revive and by the week-end it was plain as a pikestaff that the downtrend referred to last week would continue. Quotations were scaled down on Saturday to Rs. 23-10 for 11 Porters and Rs. 19 for Nine Porters. Even Heavy Goods were affected by the prevailing easiness. The usual week-end recovery failed to materialise as the langour of the jute market overpowered the equally speculative manufactures market. Though the gap between spot and near delivery is again narrower, it hardly means that there is any big increase in demand for July shipment. The flatness of the hessian market, where lucky holders of contracts have on most days appeared as eager sellers, has been demonstrated this week.

The fluctuations in raw jute futures before the week-end predetermined the trend in both markets. But the opening on Monday was steady enough and 11 Porters were maintained at Rs. 23-12. The rate for Ready came down soon after to Rs. 23-8 and Nine Porters too receded to Rs. 18-12. Demand was slacker than before, and the appearance of second-hand sellers was enough to pull prices down. There was, however, no trace of the reaction on the next day when the rally in raw jute gingered up the hessian market. Sellers were reserved and business was restricted. Eleven Porters recovered slightly to Rs. 23-14 and closed better at Rs. 24. There was however no improvement in 9 porters which quoted at Rs. 18-8 with Re. 1 less for the successive delivery months. A small rise has taken place on Wednesday in spite of odd sales by Mills. A very mild improvement in export demand infused life into Heavy Goods. Cornsacks for July shipment sold at Rs. 37-4 and B. Twills were quoting at Rs. 37-4. Very limited improvement has since been reported as regards Heavy Goods; Liverpool Twills stand at Rs. 41 for July shipment and Cornsacks are up to Rs. 37-10. Except in regard to 11 porters which have risen to Rs. 24 there has been no change worth mention during the last six days. Nine Porters are lower on balance though the rates for distant deliveries are unaltered. There has not been anything to suggest that trade interest has emerged and only recently has there been small business passing in Heavy Goods.

Steadiness at the decline may seem a convenient description, but the sharp fall in cotton may affect prices. There are again rumours which neutralise the good effect of news from the U.S.A. The hessian market is also exposed to the full influence of the jute futures market. It has, however, derived some advantage from the Associated mills' decision to make no change in working hours and to work for all the weeks in a month. The decision has announced in the same terms as those used some six weeks ago. The speculative rise in hessian has not impressed the mills which in spite of the drag in U. S. consumption have reason to hope for demand from the new belligerent, Russia. It is recalled that total Indian exports in a year to Russia before 1913 used to total nearly Rs. 2 crores in value on an average. The main constituents of the export trade then were hessian and tea. Even though very limited assistance may be furnished by India to Russia means will be found to revive a trade which has been dormant. To-day's prices reflect an irregular tendency after two days of dull and steady conditions. Quotations at present are: 9 Porters Ready Rs. 18-8 August Rs. 17-10 September Rs. 17-2 October December Rs. 16-4 and January-March Rs. 15-6. Quotation for 11 Porters stand at Rs. 23-8, Rs. 22-14, Rs. 22-6, Rs. 20-10 and Rs. 19 for the same delivery months.

COTTON

Calcutta, July 10.

A LATE rise and a quick fall emerge as the main features after a study of a week's movements in the Bombay Cotton Market. Reviews for the present continue to emphasise the rise in internal consumption and the progress of the monsoon after the late start. Last week's slump will not recur in the opinion of most but the irregularity noticed on Wednesday may persist. A variety of rumours continue to plague the market. The concentration of Japanese shipping in the Pacific is not likely to help in increasing Indian cotton exports and the selling of Japanese houses on Wednesday showed that the Bombay market is vulnerable. In spite of considerable activity in the spot market, stimulated by the heavy rains and interruption of traffic, the rates for all hedge contracts have come down. There is still the price ceiling controversy in the U. S. A. to prejudice further recovery. There has been a smart rise in New York for Middling spot and Futures have risen latterly to 15.13 cents for July. Though the current belief is that New York will not go down as farm relief is an article of the Democratic faith, there is nothing to warrant the belief that Bombay rates will recover in the same fashion as New York prices.

The outlook for Oomras is unsettled by Far Eastern news again and whatever the khellawallas may do they will not play the role of bulls. The spread between the July-August and April-May contracts has not widened as compared with the last week but the close on Wednesday at Rs. 266-8 and the slightly higher opening on Thursday suggests that recovery will be brief and unsubstantial depending mainly on the share market as it does. There does not seem to be any room for optimism unless it be due to the emergence of a belief that the Broach crop will suffer on account of a heavy monsoon. Bombay reports continue to stress the need for light commitments and emphasise the need for caution. There has been so often reaction and recovery that it is now more difficult to predict the course of the market. Profit-taking has often been in evidence but prices over a week disclose no considerable change. This may sustain the impression that the market will keep steady but latterly the demand for piecegoods has failed to improve as before. The disturbance in the raw cotton market is readily ascribed to speculation and purchases of piecegoods for forward delivery have been reduced. The rates on Thursday in a quiet market disclosed some improvement with Broach July-August at Rs. 247 and April-May at Rs. 248-12. Oomra July stood at Rs. 206½ and December-January quoted at Rs. 213½. Bengal July at Rs. 151 and December-January at Rs. 155½ were quotations received to-day.

PIECEGOODS

Calcutta, July 10.

A WEEK ago it looks as if the demand for piecegoods would witness further expansion. But quieter conditions have been reported and the fall in raw cotton last week has checked fresh purchases. The producers of yarn who have sold for a year ahead are differently placed. The decline on Japanese goods has reveted against on the question of prices again. Up-country merchants evince some reluctance to buy afresh and a slight reduction in rates to tempt buyers has led to the opinion that it is better to wait for sometime until the political and cotton situation are clearer. The further advance in prices of Lancashire goods can have no bearing on local goods. There is, however, a belief that without any increase in Japanese shipments the demand for Indian goods must increase. Calcutta would appear to share this belief but the reaction in cotton has had unfavourable repercussions. Weak holders have liquidated in a hurry and the fall in cotton has led to the holding off all new buying. There is no inclination to follow the rise in prices recorded during June. A moderate turnover in bread and butter lines has been reported, but the main features has been the emergence of the seasonal demand for cold weather styles. The restricted supply of the standard types has brought out some buying earlier than usual, and those who could provide the goods wanted had their chance and took it. The sales of Japanese goods for near delivery reported of late cannot help to stimulate demand. Interest in fancy goods has not yet responded to the changes in supply caused by the failure of imports from Britain. Fresh business in yarn has hardly appeared as rates have come down consequent on the usual profit taking. Until the cotton market is stable there is not much likelihood of better demand for yarn or piecegoods. Old orders have been satisfied, but Bombay reports smaller clearances and the traffic hold-up is likely to cause some delay. In spite of the usual talk of a boom in Ahmedabad there has not been any brisk buying of late. If other markets remain steady the demand for textile manufactures should revive strongly and quickly too. And the recent recession in prices may help rather than hamper this.

GOLD

Calcutta, July 10.

THERE has been a very slight decline in gold prices from the highest levels touched during this week. Yet a comparison with last week shows that gold has risen almost exceptionally in Bombay. The riots, floods and war news gave some sort of a stimulus to dealings in gold. Turnover in Bombay has failed to show any improvement and the very limited business put through in Calcutta shows that conditions are vastly different as compared with last year. The slight rise to Rs. 42-5 per tola last week has been maintained, and a very small premium is asked for both first and second settlement. Prices in Calcutta have been slightly lower, but a higher premium is paid for gold sovereigns which have risen to Rs. 28-11 per coin while the Bombay price is Rs. 28-9.

SILVER

Calcutta, July 10.

THE absence of any change in the London and New York quotations for silver is not paralleled by similar stability in India. Rates have fluctuated in sympathy with war news, and it has been, noted that since Thursday last, the major trend is upward. Outside interest however remains small, and the daily offtake in Bombay has not shown any increase as yet. The rise before the week-end was obviously shortlived and the very limited inquiry forthcoming in a market where stocks exceed 20,000 bars at present was responsible for an immediate decline. Prices for both Ready and Settlement have hovered round the level of Rs. 63 per 100 tolas. The rise in gold has hardly been reflected in the silver market. Dealings in Bombay have also been affected by the virtual isolation of the city for some days. The difference between Ready and Settlement rates does not encourage forward business. The market has been summed up as quietly steady almost every day.

Prices in Calcutta have as usual risen more smartly than in Bombay and a difference of 6 annas per 100 tolas in favour of Calcutta shows that local demand is fairly brisk. War news can stimulate fresh interest in bullion however flat London might be with demand just balancing the production put on the market by Empire producers of base metals. The contraction of speculative interest in silver this year has been remarkable. It must be due to the fact that the rise in 1939 was quickly broken and it was demonstrated that the authorities would not allow silver to enjoy a runaway boom of its own.

WHEAT

Calcutta, July 10.

IT has been said that the war is now the major factor in all markets. Some markets refuse to follow the trend of producing centres, and that is why wheat prices are higher after a week. The progress of the monsoon may not have any great effect on the markets. The usual bearish tendency has hardly appeared of late. The expansion in inter-provincial trade has led to renewed firmness in North Indian markets. At Karachi prices have held well and Choice White Ready quoted at Rs. 31-15-6 on Wednesday. September delivery quoted at Rs. 32-8-6 which means that after the week-end the general tendency has been steady. Trading has peen scanty, but the slight decline in Karachi is hardly discernible in Calcutta where Cawnpore Ready is up to Rs. 4-10 and the price for September delivery is 3 annas higher. Prices for the next crop are invariably higher and the present steadiness must continue owing to the shortage of rice and the steady buying of flour in all centres. The absence of any change in Bombay and oversea markets confirms many in the view that wheat cannot go down this year even if forward trading in most seeds has bees suspended in Bombay. The decline in linseed has had singularly little effect on wheat in Bombay. The dullness reported from Karachi may be temporary as export demand to the Near East may increase after the conclusion of an armistice in Syria and freight will be found for wheat.

(*Continued from page 62*)

as possible for Defence measures. It was only recently a circular letter was addressed to Colonial Governments by the Secretary of State for the Colonies urging the need for national economy. Nothing can be a greater influence on the individual citizen in observing frugality as a war measure than the correct example set by the Central Government in the matter of salaries and allowances.

* * *

The effect of the war on the Central Government's finances was clearly seen when the Standing Finance Committee of the Imperial Council of Agricultural Research met this week. Owing to the reduction in the income from the duty on agricultural produce (as exports have considerably fallen) the committee found that it had not sufficient money for financing new schemes of research. It recommended that owing to the fall in income only one new agricultural research scheme should be approved. This is hardly a satisfactory state of affairs. Agricultural research is of such great national importance that it should not be held up for want of necessary funds—after all only a few lakhs of rupees. It cannot be difficult for the Central Government to find the necessary money to make up for the fall in income from the agricultural produce duty owing to the war. This only emphasises all the more the urgent need to revise the Central Government's expenditure and adopt every possible measure of economy for finding sufficient funds for meeting essential expenditure. As the present Viceroy has from the day of his arrival in this country been taking keen personal interest in agricultural development, it cannot be a matter of satisfaction to him that for want of a few lakhs valuable research schemes which can materially assist the agriculturist population have to be held up indefinitely.

* * *

Since his return to Simla after his successful conclusion of his negotiations with the Government of Burma, Sir G. S. Bajpai has been engaged in consulting the Viceroy and his other colleagues. It is also likely that he may summon a meeting of the Standing Emigration Committee in order to acquaint them with the details of the agreement and take their advice. In the meantime good news has come from Ceylon, for it is reported that an invitation has come from the Government of Ceylon asking the Government of India to send a delegation to Ceylon for resuming the negotiations. Evidently the good offices of the Ceylon Governor and the influence of the examples set by the Government of Burma have had some influence on the mind of the Ceylon Ministry. There is little use in sending a delegation to Ceylon—though the advantage of having talks on the soil of Ceylon itself is realised—if the attitude of the Ceylon Ministry towards the Indian community continues to be the same as it was at the time of the New Delhi conference last year, but if their views have changed and they are now prepared to accept the reasonableness of the question taken up by the Government of India, a delegation from India headed by Sir G. S. Bajpai may be able to do something. At present however it is difficult to say whether the Ceylon Government's attitude has changed sufficiently for accepting the invitation in a spirit of hopefulness.

* * *

I learn from inquiries that the Government of India are carefully considering the representations received regarding the proposed Income Tax Act in Bikaner. This Act, as has been pointed out in these representations, levies income tax not only on income accrued in the Bikaner State but also outside. The tax is said to be leviable not only on the subjects of Bikaner State who normally reside and carry on business in the State territory but also on other persons who may technically be said to be resident in the State. There is little doubt that if this law comes into operation in the Bikaner State, it would mean considerable loss of revenue to the British Indian exchequer. There is also the danger that other State in Rajputana may follow the example of Bikaner and enact silimar laws. It is not yet known that steps the Government of India are taking in this connection to protect the interests of British India, but the subject in all its aspects is receiving the attention of the Finance Department. As the Prime Minister of Bikaner has come to Simla with his staff, it is expected that the matter will be fully discussed for removing the threatened difficulties.

TATA IRON AND STEEL DIVIDENDS

ONCE again the tendency in all markets is a portent of acute indecision. Prices eased on little at the end of last week and after opening in a hesitant mood on Monday presented a firmer though uneasy front to an assortment of conflicting war rumours. The earlier German radio claim that German troops had reached the Stalin Line and had broken it at several points created profound uneasiness. The Moscow *communique* stating that the Russians were holding the Germans on all fronts and were counter-attacking in several sectors infused much-needed strength. In later dealings, however, the tendency was arrested and prices recorded slight gains. The rise in prices is more than sympathetic and the main factor inducing a recovery in the market has been supplemented this week by the announcement of the increase in the dividends on both the ordinary and deferred shares of the Tata Iron and Steel Company, Limited. A careful analysis of the variations in share values as also the nature of scrips dealt in, both in Calcutta and Bombay markets, reveals that activity during the week was mostly speculative. There is still an undercurrent of nervousness which affects the confidence of all operators. It is, therefore, hardly possible to say anything definite about the market outlook. Anyhow, the market has survived the rumours of the week reasonably well.

* * *

For some time past all markets have been entertaining high expectations of the dividends of the *Tata Iron & Steel Company, Limited* in respect of the earnings for the year ended 31st March, 1941. The dividends, as recommended by the directors, have now been announced (1) on the First Preference Shares at 9 per share, less income-tax; (2) on the Second Preference Shares at Rs. 7 per share, less income-tax; (3) on the Ordinary Shares at Rs. 29 per share and (4) on the Deferred Shares at Rs. 172-10-0 per share.

	Dividend per share.			
Year ended March.	First Pref. (Rs. 150)	Second Pref. (Rs. 100)	Ordy. (Rs. 75)	Defd. (Rs. 30)
1936	9/0	17/ 8	6/0	7/ 8/-
1937	9/0	15/ 2	10/0	36/ 3/6
1938	9/0	20/10	15/8	75/11/3
1939	9/0	22/ 2	18/0	98/10/5
1940	9/0	7/ 8	25/0	143/14/7
1941	9/0	7/ 8	29/0	172/10/0

The dividends on both the ordinary and deferred shares have certainly been above average market expectations since most Bombay operators were expecting only Rs. 26 per share on the Ordinary Shares and Rs. 165 per share on the deferred shares. It would not be possible to increase substantially the dividends on the ordinary and deferred shares without any further improvement in earnings. All preference arrears have been cleared 2 years ago. The Company is, however, working at full capacity. From the outset of the war the Company has been in close touch with the Government of India regarding materials required by them. The full benefit of the additions to plant during 1939/40 would have been felt only during 1940/41 which means that the increase in earnings on account of the higher rate of production and consequent reduction in costs will quite probably be greater in the year 1941/42. The accounts and balance-sheet for the year under review are not yet available. It is needless to add that it will make interesting reading.

* * *

One of the newly started paper mills that is able to report a striking increase in earnings is the *Orient Paper Mills, Limited*. The Company has been able to report very satisfactory progress during the past four half-years. The earnings for the half-year ended 31st March, 1941 are the highest in the history of the Company, that is to say, the Company has made nearly double the profit earned in the half-year ended 30th September, 1940. Specialising in the production of kraft paper, the Company enjoys a marked advantage. The directors, in the last half-yearly report stated that they were contemplating the manufacture of certain varieties of papers which have so far not been made at all in India and disclosed that negotiations were in progress in connection with the projected extension of the range of production. The directors are glad to report an improvement during the half-year under review in both the outturn and the quality of the goods in spite of the difficult experience with regard to the supply of chemicals and store and the consequent rise in their costs of production.

The net profit for the half-year under review amounts to Rs. 8,42,290 as compared with only Rs. 4,62,893 in the previous half-year. Though the amount set aside to depreciation stands at the same figure of Rs. 3,00,000, a sum of Rs. 2,27,000 has been provided during the half-year for the value of machinery discarded. After payment of dividends on both the old and new Preference Shares, a maiden dividend of annas eight per share has been declared on the ordinary shares. The amount carried forward is the big sum of Rs. 2,03,278 as against Rs. 21,155 brought in.

The price of the ordinary shares has already touched a high of Rs. 12-10. Even at the present price of roundabout Rs. 12½, the shares should be considered rather attractive. The old and new Preference Shares are also attractive at the present levels of Rs. 106½ and Rs. 107 respectively.

* * *

Though not exactly a new Company, the *Bengal Jute Company, Limited* is issuing its first report this year. The director's report that net profit after providing for depreciation to the tune of Rs. 93,437-4-3 is Rs. 37,630-10-4. It must be stated that the profit figure would be considerably larger but for the necessity of providing Rs. 82,313-10-3 for expenses, commissions and other charges; and the labour difficulties experienced immediately after the mills was taken over decidedly handicapped the Company in its first year. Work was suspended for over a month, and the report for the period ended December 31st, 1940 has also to be read in the light of developments in the world of jute and hessian. The accounts show that the half-yearly preference dividend is more than covered and the fact is given due weight in the current valuation of the 5½ per cent redeemable Cumulative Preference Shares standing at Rs. 110½. The balance sheet discloses that stocks of jute and goods and stores are substantial and this must be considered in any attemped evaluation of results for the second half-year.

* * *

When Sir Chunilal Mehta addressed the annual meeting of the *New India Assurance Company, Limited* last week, he had certainly the advantage of drawing attention to the best results reported by the Company in its history. The 1940 report shows that New India Assurance Company has been able to pay a higher dividend to its shareholders because substantial transfers could be made from the underwriting surplus in several departments.

Every department makes a good showing and Reserves have been built on most substantial basis. The most notable achievement is in the Life Department despite a small contraction in new business secured in 1940 because the expense ratio is shown as low as 23.8 per cent. and the addition to Life Funds is as much as Rs. 46 lakhs, both to be reckoned sensational achievements. I must desist, however, from a fuller analysis of the 1940 accounts of the New India as *Eavesdropper* claims it as his prerogative and purposes to tackle it next week.

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, July 11.

BUSINESS on the Calcutta Stock Exchange has been rather quiet during the week, the prices being steadier for most of the week with a slightly easier tendency towards the close to-day. Jute shares accounted for a satisfactory turnover. Engineering shares were a shade easier all round. Coal shares were a dull market and only a small volume of business was put through. Cotton shares ruled steady with prices showing little or no change. For Tea shares there is still a keen investment demand, though the volume of business was slightly on a smaller scale during the week. Sugar shares were somewhat an active market and prices have again improved.

Giltedged securities have been very steady and the price of 3½ per cent. Paper remained unaltered at Rs. 96. Among other loans, 3½ per cent. 1947/50 met with business at Rs. 102-15; 3½ per cent. 1954/59 at Rs. 102-11; 3 per cent. 1946 *Defence Bonds* at Rs. 101-15; 4 per cent. 1960/70 at Rs. 109-10 and 5 per cent. 1945/55 at Rs. 111-10. Provincial Loans met with good business, 3 per cent. *Punjab* 1952 being done at Rs. 98-6; 3 per cent. *Punjab* 1958 at Rs. 95-10; 3 per cent. *U. P.* 1961/66 at Rs. 94-10; 3 per cent. *U. P.* 1952 at Rs.98-6 and 1944 at Rs. 105-12.

Money conditions showed no change. The average rate of accepted tenders remains unchanged at annas thirteen and pies nine per cent. per annum.

Debenture issues attracted some attention during the week and business was slightly on a larger scale as compared with the previous week. 4 per cent. (1913/43) *Calcutta Port Trust* changed hands at Rs. 103-12; 5 per cent. (1916/64) *Calcutta Port Trust* at Rs. 109 and 3½ per cent. 1965 *Calcutta Improvement Trust* at Rs. 99-4. 3¼ per cent (1956/66) *Howrah Bridge* were transacted at Rs. 98-12. Among Industrials, 5¼ per cent. *Rohtas Industries* were done at Rs. 103-12 and 5 per cent. (1937/47) *Star Paper* at Rs. 103.

Preference Shares remained very firm. Among Jute shares, *Gourepore* met with business at Rs. 153; *Anglo-India* at Rs. 170; *Waverley* at Rs. 59-12; *Kinnison* at Rs. 180 and *Hastings* at Rs. 135. *Soorah*, after being done higher at Rs. 136, closed a shade easier at Rs. 132. Engineering shares met with good buyers. *Burn and Co.*, 6 per cent. preferences were done at Rs. 148 and 7 per cent. preferences at Rs. 173. *Steel Corporation* were a shade easier at Rs. 120, after being done lower at Rs. 119. *New Victoria* were steady at Rs. 5-10. In the Miscellaneous section, *Orient Paper* new preferences were marked at Rs. 106-8; old preferences at Rs. 108 c.d. and *Dalmia Cement* at Rs. 115.

Bank shares were steady with *Imperial Bank* fully paids at Rs. 1,596 c.d.; *Central Bank* at Rs. 44-12 and *Reserve Bank* at Rs. 103 x.d.

Among Railway shares, *Howrah-Amta* changed hands at Rs. 96; *Arrah-Sasaram* at Rs. 64; *Mayurbhanj* at Rs. 74-8 and *Bankura-Damoodar* at Rs. 95.

Fairly active conditions were noticeable in the Cotton section. Although in some cases the highest levels touched were not maintained in full, the general undertone has been remarkably steady. *Dunbar*, after touching a low of Rs. 217, improved to Rs. 229, but closed at Rs. 222-8. *Kesoram* were in good enquiry at Rs. 7-11; *New Victoria* up to Rs. 2-12; *Cawnpore Textile* at Rs. 7-11; *Elgin* at Rs. 22-4 and *Bowreah* at Rs. 275. *Bengal Nagpur* met with demand and the price advanced from Rs. 14-12 to Rs. 15-6 to close at the same level.

Business in Coal shares have not been on a large scale and the undertone has been fairly steady. *Bengal* showed a slight improvement to Rs. 358. *Burrakur* were taken at Rs. 12-12; *Dhemo Main* at Rs. 12-10; *Hurriladih* at Rs. 12-7; *Pench Valley* at Rs. 32-6 and *Rewa* at Rs. 21-1. Among the lower-priced shares, *South Karanpura* were marked at Rs. 4-4; *Churulia* at Rs. 1-8 and *Talcher* at Rs. 1-11.

Enquiry for Tea shares continued to in evidence and prices were well maintained. Business took place in *Betjan* at Rs. 27-4; *Sarugaon* at Rs. 10-6; *Tezpore* at Rs. 7-10; *Bishnauth* at Rs. 26-4; *North Western Cachar* at Rs. 218 and *Central Cachar* at Rs. 57. *Patrakola*, after opening at Rs. 910. registered a rise of about 10 points to close at Rs. 920.

Sugar shares met with good buying during the week-end and an all round rise in prices has been recorded. *Buland* were placed at Rs. 17-4; *Champarun* at Rs. 15-6; *New Savan* at Rs. 8-8; *Murree Brewery* at Rs. 14-4; *Raza* at Rs. 17-8 and *Samastipore* at Rs. 8-9. Other prices showed no material change, *Ramnuggar Cane* being done at Rs. 8-8.

There are no changes to report in the Utilities section. *Mozafferpore Electric* were marked at Rs. 12-12; *Rawalpindi Electric* at Rs. 26-8; *Shahjahanpur Electric* at Rs. 6-8 and *Patna Electric* at Rs. 16-10.

In the Engineering section, *Indian Iron and Steel Corporation* met with a moderate turnover. *Indian Iron* opened slightly lower at Rs. 31-4 on Monday. The price, after improving to Rs. 31-12 in mid-week, declined again to Rs. 31-3. Towards the close to-day the price again advanced and closed at Rs. 32-3 after touching Rs. 32-5. *Steel Corporation* were done upto Rs. 20-1, the closing price to-day being slightly easier at Rs. 19-15. *Burn and Co.*, were dealt in at Rs. 396-8; *Hukumchand ordinaries* at Rs. 12-12; *Kumardhubi* ordinaries at Rs. 4-4 and *Britannia Engineering* at Rs. 10-6. *Braithwaite* were crossed at Rs. 9-4.

In the Miscellaneous section, paper shares recorded good business. *Titaghur Paper* ordinaries had buyers at Rs. 18 x.d., and the preferred ordinaries at Rs. 5-8 x.d. *Orient Paper* were in good demand following the declaration of a maiden dividend of Annas 8 per share for the half-year ended 31st March, 1941. The price after improving to Rs. 12-10, closed a shade easier to-day at Rs. 12-8 c.d. *India Paper Pulp* were done at Rs. 146; *Shree Gopal Paper* at Rs. 11-2 and *Mysore Paper* at Rs. 14-12. Among Mining shares, *Burma Corporation* were slightly steadier at Rs. 4-10 and *Indian Copper* at Rs. 2-3. Among other shares, *Bararee Coke* were again a good feature at Rs. 23-10. *British India Corporation* were unchanged at Rs. 4-6. *Dalmia Cement* came in for business at Rs. 12-12. *Alkali Chemical* were better at Rs. 17-8. *Frank Ross* were in some demand, being done higher at Rs. 5-7. *Indian Cable* were higher at Rs. 21-4. *Assam Saws* were at Rs. 3-4 and *Borooah Timber* at Rs. 16-12. *Karanpura Development* were marked higher at Rs. 8-8.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, July 10.

Money: Conditions in the money market still remain unchanged, the rate for call money being quoted at ¼ per cent.

Exchange Market:—Banks were selling T. T. at 1s. 5 15-16d. and buying three months' bills at 1s. 6 7-32d.

Securities: Steady conditions continued to prevail in this section throughout the week under review. 3½ per cent India sterling stock ruled a shade quieter at £99¾, while, locally, 3½ per cent Rupee Paper remained unchanged at Rs. 96. Among terminable loans, 1948/52 Loan changed hands at Rs. 97-10; 1941 at Rs. 100-6; 1951/54 at Rs. 99-15; 1963/65 at Rs. 95-1; 1947/50 at Rs. 102-14; 1960/70 at Rs. 109-8; 1955/60 at Rs. 113-6; 1945/55 at Rs. 111-9 and 1946 *Defence Bonds* at Rs. 101-15.

Shares: The forward section of the local share market remained closed on Monday owing to settlements. On Tuesday, the market presented a cheerful outlook and prices advanced on good buying, the firmness of the cotton market helping the bullish sentiment. In mid-week a slight reaction set in and prices slightly declined owing to some profit-taking. Towards the close of the week, however, prices again advanced on some support and registered substantial gains. Steel shares, after opening lower, showed good appreciation at the close on the announcement of higher dividends on both the ordinary and deferred shares. Mill shares were a steady feature and were the centre of speculative activity.

Textiles: This section continued to meet with good demand throughout the week under review. *Bombay Dyeing*, after opening at Rs. 1,142-8, gradually advanced to close at Rs. 1,157-8. Other speculative counters like *Kohinoors Centuries*, *Central Indias* were prominent and showed good rises the closing rates of these shares being higher at Rs. 458-8; Rs. 441 and Rs. 332-8 respectively. *Colaba* were slightly higher at Rs. 187-8; *Gokak* at Rs. 233; *Simplex* at Rs. 134 and *Swadeshi* at Rs. 334. Dealings in *New Great* (Rs. 100 shares) took place, the closing rate being Rs. 243. In the cash list, *Sholapoor* were done at Rs. 3,250 and *Vishnu* at Rs. 1,317-8.

Hydro-electrics: Utility shares were more or less unchanged with the exception of *Tata Power* in which there was some enquiry and were done upto Rs. 1,655. *Andhra Valley* were lower at Rs. 1,665, while *Tata Hydro* were unchanged at Rs. 180.

Steels: Steel shares opened the week with *Tata* ordinaries at Rs. 386-8 and the deferreds at Rs. 2,031-4. The deferreds gradually advanced and touched Rs. 2,035 in mid-week, but at this level there was some profit-taking and the shares touched a low of Rs. 2,010. Towards the close of the week, the firmness of the cotton market coupled with the announcement of an increase in the dividends from Rs. 25 to Rs. 29 on the ordinary shares and from Rs. 143-14-7 to Rs. 172-10 on the deferred shares revived bullish support and the prices advanced. In spite of profit-taking at the higher levels, the shares were well absorbed, the ordinaries closing at Rs. 390 and the deferreds at Rs. 2,047-8.

Banks & Insurance: Bank shares were steady with *Central Bank* at Rs. 45; *Imperial Bank* fully paids at Rs. 1,582-8; contributaries at Rs. 393-12; *Bank of India* at Rs. 145-8 and *Reserve Bank* at Rs. 105-12.

In the Insurance section, *New India* were a feature and were done higher at Rs. 46-4.

Miscellaneous: *Bombay-Burmah Trading*, after opening at Rs. 495, declined to Rs. 447-8 in mid-week, but improved again to close at the opening level. *Bombay Steam* were done at Rs. 324; *Bombay Telephone* at Rs. 85-8; *Bombay Tram* at Rs. 135-8; *Scindia Steam* at Rs. 20-14 and *Shivrajpur Syndicate* at Rs. 31-8. *Associated Cement* were maintained at Rs. 144. *Belapur Sugar* were slightly better at Rs. 213. *Premier Construction* were unchanged at Rs. 93-8. *Wimco* were on offer at Rs. 190, while *Tata Chemicals* were marked at Rs. 12-12.

LONDON STOCK EXCHANGE

The stock exchange has shown greatly improved form with the firmness of gilts still the outstanding feature. The rise in old Consols to 83¼ will naturally claim attention though the decline since to 82½ will have to be recorded. East India 3½ per cent stock has been unaltered at 99¾ over a week. The firmness of both War loan and Conversion loan well over par has shown that British investors retain great confidence in the Funds. A lift in the leading Industrials is of more interest than the ups and downs in Japanese Bonds which were pressed for sale on fears of Japanese intervention in the Pacific. In a rising oil market good features were presented by *Burma* and *Anglo-Iranian*. The big jump in the quotation for the latter must be certainly ascribed to cheerful news from the Middle East. *Shell's* return to favour is attested by the recent rise and some buying of *Anglo-Egyptians* has been reported more than once. What looks like a revival in *Mexican Eagle* adds interest to dealings in the oil market where Attock (now 36-3) continues to show steadiness.

The flatness of Home Rails is in contrast to the well-spread rise in Home Industrials. Investment demand definitely expanded for such issues as *Imperial Tobacco* and *Associated Portland Cement*. A further rise in E.M.I.'s betokened speculative interest, proved also by the subsequent decline. The hardening of old favourites like *Dunlop Rubber and Pand* Deferred Stock shows a broadening of demand for established dividend-payers. The ascent of *Ford Motor* to par after a long period in which the stock stood below £1 might be referred to as proving enlarged interest on the part of investors. Textile shares showed no change except for renewed interest in *Celanese* Preferences, but the pernial popularity of *Woolworth* indicated that markets are in good heart.

The stock exchange has again acquired fresh confidence from the R. A. F. offensive in Europe and the indications of the U. S. Government's friendliness. Prices have risen on an increase of buying of industrials in addition to gold mining shares. Interest in developing mines is said to have increased on indications of buying from the Cape. The exception to the ruling firmness of copper mining shares is provided by *Rio Tinto* which has receded to £5½.

NEW YORK STOCK EXCHANGE

Wall Street has been in a cheerful mood after the news of the biggest deficit ever came through. The national holiday proved as expected a remarkable tone. The rise of over 3 points in *U. S. Steel* is memorable in many respects, and the Administration's policy is obviously to the taste of a market which has put up the leading industrials. The rise in the stock market despite the fears of new taxation is supported by the firmness of commodity markets. The opening on most days was steady, and Wall Street has certainly reflected the optimistic mood of the nation which does not worry over much about the results of sending troops to Iceland. Business has not broadened greatly but the improvement in the industrial situation despite the defeat over the President's proposal to take over plants which refuse to accept conciliation under Federal auspices can be measured by the promise given by the United Mineworkers Union to the Government. The coal industry is safe, and labour trouble in all other industries will be more easily dealt with. Estimates of higher earnings for the second quarter underline the recent rises in *U. S. Nickel* and *General Motors* which stood on Thursday at 39⅞ on Wednesday. A slight fall in *Steel Common* indicated profit-taking. The rise in minings will attract some interest. *Anaconda Copper* was up to 29¼ and the oil share market too developed cheerfulness alongside of minings. The general tendency is higher and this certainly contrasts with the reaction, sentimental and other, recorded in the previous week.

THE BOROOAH TIMBER CO., LTD.

NOTICE

is hereby given that the Twenty-second Ordinary General Meeting of the above-named Company will be held at the Registered Office, No. 12, Mission Row, Calcutta, on Monday the 28th July 1941, at 11 a.m., for the purpose of receiving and considering the Directors' Report, the Statement of Accounts and Balance Sheet for the year ended 31st March, 1941 and to transact any other ordinary business of the Company.

Electric Companies, report that the revenue from energy sales (subject to adjustment) for June, 1941, compared with the corresponding period of the previous year was as follows:—

Tata Hydro-Electric Power Supply Co., Ltd., for June 1940, Rs. 3,57,381, for June 1941 Rs. 3,03,210.

Andhra Valley Power Supply Co., Ltd., for June 1940, Rs. 2,95,911 for June 1941 Rs. 4,43,112.

Tata Power Co., Ltd., for June 1940, Rs. 6,30,087, for June 1941, Rs. 7,36,206.

MARKET POINTERS

Stabilising Jute Prices:

IN order to raise funds to the extent of about 50 lakhs of rupees for the purpose of financing the carrying out of measures for the stabilisation of jute prices, improvement of marketing and for furthering the interests of jute-growers as well as of the industry as a whole, the Government of Bengal will introduce, during the ensuing session of the Assembly, a bill entitled "The Bengal Raw Jute Taxation Bill 1941."

It is felt that the money required for the purpose cannot be found out of ordinary revenues and hence the necessity of this new taxation measure.

It is estimated that a tax on the purchase of raw jute, by the jute mills and shippers, at the rate of two annas per maund will yield a gross revenue of about 50 lakhs of rupees in a normal year, and this will serve the purpose for which the measure is being introduced.

In the course of its passage from the grower to the ultimate consumer in Bengal, jute passes through several hands and is subjected to a series of sales and purchases. But it is the intention of the bill to tax only one such sale and purchase and not all.

For practical reasons and for administrative convenience, it is proposed to tax only what may be called the "final" transaction. That is to say, to impose and collect the tax at the stage either where it is delivered to a jute mill to be used in the manufacture of jute goods or where it is delivered to the shipper in the form of "pucca" bales for supply to consumers overseas. In such case it will be more convenient to collect the tax from the final purchaser in Bengal, that is, the jute mill owner or the shipper and it will also be easier to detect and prevent evasions of the tax.

* * *

Indian Cotton For U.S:

India was by far the most important single source of supply of cotton of 1⅛ inch and under to the United States and was able to increase her shipments of cotton despite the cotton surplus in that country, says the Indian Government Trade Commissioner, New York, in his report for the last quarter of 1940.

He adds that imports from India during the period increased by $6,515,905 to $22,480,041. Jute, jute butts, jute bags, burlap, raw cotton myrobalans, kid skins dry and wet, cashew nuts, mica, manganese ores, chrome ores and rubber contributed to the increase in shipments.

* * *

Kolar Mines' Output:

The total output of the four Kolar Companies for June was 68,437 tons current ore crushed, obtained 23,584 fine ozs. 8,610 tons of old tailings treated obtained 356 fine ozs. Total 23,940 fine ozs. compared with 23,408 fine ozs. in April and 20,504 ounces in May.

Total gold returns from Kolar Gold mines for the month of June were 23,940 fine ounces as against 20,504 fine ounces for the previous month. Current ore treated totalled 68,437 tons and Old Tailings treated were 8,610 tons.

Details of returns were as follows:

Mysore: 7,267 fine ounces, Champion Reef, 5,851, fine ounces, Ooregum, 4,507 fine ounces, Nundydroog, 6,355 fine ounces.

Carry forward	14,159	9,740	13,290	16,859

* Dividend at 6 per cent. for the period from 1st May, 1940 to 31st December, 1940 (paid in January, 1941).

(*Meeting 22nd July, 1941 at 3-30 p.m.*)

Audited accounts for the year ended 31st December, 1940:—

The Revenue Account shows a profit for the year of Rs. 1,25,815-12-8 as compared with Rs. 1,18,189-0-2 for the year 1939. After deducting:—

	Rs.	As.	P.
Income Tax and Super Tax	29,725	6	9
Dividends previously forfeited paid during the year	171	8	7
Total ..	29,896	15	4

there is a nett profit of Rs. 95,918-13-4 which, with the sum of Rs. 9,739-11-0 brought forward from the previous year, gives a balance of Rs. 1,05,658-8-4 at credit of Profit and Loss Account.

The directors recommend that the available balance should be disposed of thus:—

	Rs.	As.	P.
Dividend at 6 per cent. free of Income Tax on the Preference Share Capital from 1st May 1940, to 31st December, 1940 (paid in January, 1941)	24,000	0	0
Pay a dividend of 7½ per cent. free of Income Tax on the Ordinary Share Capital for the year 1940	67,500	0	0
Carry forward	14,158	8	4
Total ..	1,05,658	8	4

General.—The supply of electricity was satisfactorily maintained during the year, and the number of units sold continued to increase.

Since the close of the year, however, the Company's progress suffered a severe setback as a consequence of the communal rioting which broke out in mid-March and which resulted in some loss of life, extensive damage to property and the suspension of normal trading activities in the town for some time. This state of affairs had immediate repercussions on the demand on the Company's system and from mid-March to the end of May the units sold were approximately 20 per cent. less than for the corresponding period in 1940. There has been a steady improvement in the position during the last few weeks and it is hoped normal progress will be resumed before long.

Prospects for the continued expansion of the Company's business are considered to be good.

Plant.—The new Steam Turbo Alternator Station was put into commission on the 18th January, 1941 and has operated satisfactorily since that date. During January, 1941, the new High Tension Transmission System and the five new Rotary Substations were also put into commission. Work proceeds on reorganisation of the D.C. Distribution System, and will be completed during the current year

Managing Agents:—Messrs. Octavius Steel & Co., Ltd.

Authorised Capital—Rs. 20,00,000 in 1,40,000 Ordy. and 60,000 Cum. Pref., both of Rs. 10 each. Issued and Subscribed—Rs. 15,00,000 in 85,000 Ordy. and 60,000 Pref., both fully paid up.

SHRI AMBICA MILLS LIMITED

Audited accounts for the year ended 31st December, 1940:—

	Rs.	As.	P.
The result of the Company's working is a profit for the year of	8,77,069	5	6
Add Balance of profit carried forward from the last year's account	12,394	2	1
Total ..	8,89,463	7	7

The directors have already provided in the accounts of the year Depreciation:—

	Rs.	As.	P.	Rs.	As.	P.
On Buildings Rs. 43,500						
On Machinery Rs. 3,81,500	4,25,000	0	0			
				4,25,000	0	0
Balance for disposal				4,64,463	7	7

During the year under report the demand for cloth was very poor till the end of August, 1940. Because of the poor demand of cloth the price gradually went down since the commencement of the year till August, 1940 whereas on account of the upward trend in prices of stores, colours, chemicals etc., the cost of production increased. The directors hope that the result of the Company's working, in view of the circumstances prevailing during the year under report as stated above, will be found satisfactory.

The directors propose to appropriate the balance amount of Rs. 4,64,463-7-7 as under:—

	Rs.	As.	P.
Dividend on 6,500 five per cent Income-Tax free Redeemable Preference Shares of Rs. 100/- each for the year ending 31st Dec. 1940 ..	32,500	0	0
To be carried to Reserve Fund	3,00,000	0	0
To be carried to Income Tax Reserve Fund ..	1,00,000	0	0
To be carried to Machinery Renewal Fund ..	25,000	0	0
To be carried forward to next year's Profit & Loss Account	6,963	7	7
Total ..	4,64,463	7	7

The Mills with 54,324 spindles and 1,342 looms worked during the year. This includes 3,060 spindles, which have been added during the year. During the year orders were placed for Stentering machine, Gassing machine and 30 Looms. The first two items were received and installed during the accounting period. The looms, that were ordered, have arrived during the current year and the directors hope to run the same during the course of this year.

The working of the *Shri Jagdish Mills, Limited* has resulted in a profit of Rs. 1,26,843-1-8 and the directors hope the working result will be found satisfactory considering the circumstances mentioned in that Report.

In view of the fact that the Capital Bonus Share is to be given to the Ordinary Shareholders, the directors have decided that no dividend should be given to the Ordinary Shareholders for the accounting year. The directors have already convened an Extra-Ordinary General Meeting of the Company to pass the necessary resolutions for increase of Capital and sanctioning of the Capital Bonus.

In order to strengthen the position of the Company the Agents have voluntarily given up Rs. 72,526-8-0 out of the total amount of their Commission for the year ending 31st December, 1940. This amount does not include commission from 11th October, 1940 to 31st December, 1940.

Managing Agents:—Messrs. Harivallabhdas Kalidas & Co.

Synopsis of the Balance Sheet as at 31st December, 1940:—

BANK PROFITS

BANK OF INDIA ,LIMITED

The transaction of the past six months have resulted in a profit of Rs. 11,63,524-6-1 from which sum has to be deducted Rs. 1,50,000/- for Income Tax and Super Tax, leaving a net profit of Rs. 10,13,524-6-1 for the half year ended 30th June 1941. To this amount has to be added Rs. 8,98,784-7-11 brought forward from the last account making a total of Rs. 19,12,308-14-0.

This sum the Directors have disposed of as follows:—

In payment of an ad-interim dividend at the rate of eleven per cent per annum (Rs. 2/12/- per share) free of Income Tax on the Paid Up Capital of Rupees One Crore for the half year ended 30th June 1941 which will absorb Rs. 5,50,000/-; carried forward to the next account Rs. 13,62,308-14-0.

PUNJAB NATIONAL BANK, LIMITED

The working of the Bank for the half-year, which ended on 30-6-1941, has resulted in a net profit (subject to audit) of a sum of Rs. 4,76,675-4-1, (Rupees Four Lacs, Seventy six thosand, six hundred, seventy five, annas four and pie one only).

INDIAN BANK, LIMITED

Subject to audit of accounts, the net profit of the *Indian Bank, Limited*, Madras, for the half-year ended 30th June, 1941, is Rs. 3,45,144-12-3, the gross income and the expenditure on account of depositors' interest, management expenses, etc. for the period being Rs. 12,98,359-1-7 and Rs. 9,53,214-4-4 respectively. The above net profit together with the balance of Rs. 26,994-14-3 carried forward from the last year's account amounts to Rs. 3,72,139-10-6 which is available for disposal.

FORTHCOMING MEETINGS

Rohtas Industries Ld.—Meeting, 30th July, 1941 at 4 p.m., at Dalmianagar. Transfer Books closed from the 21st to the 30th July, 1941. *Final dividends proposed As. 8 per Ordinary Share and Rs. 4 per Preference Share, making Re. 1 per Ordinary Share and Rs. 9 per Preference Share for the whole year.*

Dacca Electric Supply Co., Ld.—Meeting, 22nd July, 1941 at 3-30 p.m. Transfer Books closed from the 14th to the 22nd July, 1941. *Dividends proposed 7½ per cent. on the Ordinary Shares and 6 per cent. on the Preference Shares (for the period from 1st May, 1940 to the 31st December, 1940).*

Bisra Stone Lime, Co., Ld.—Meeting, 6th August, 1941 at 11 a.m. Transfer Books closed from the 23rd July to the 6th August, 1941. *Dividend proposed Rs. 2¾ per share.*

Kodala, Limited.—Meeting, 25th July, 1941 at 12-15 p.m. Transfer Books closed from the 12th to the 25th July, 1941. *Final dividend proposed 10 per cent, making 15 per cent for the year.*

Sone Valley Portland Cement Co., Ld.—Meeting, 17th July, 1941 at 1 p.m. Transfer Books cosed from the 10th to the 17th July, 1941.

New Beerbhoom Coal Co., Ld.—Meeting, 18th July, 1941 at 12 noon. Transfer Books closed from the 10th to the 18th July, 1941. *Dividends proposed 7½ and 7 per cent per annum on the Ordinary and Preference Shares respectively.*

Great Eastern Hotel, Limited.—Meeting, 14th July, 1941 at 12 noon. Transfer Books closed from the 8th to the 14th July, 1941. *Dividend proposed 9 per cent.*

Tata Iron & Steel Co., Ltd.—Transfer Books of this Company will be closed from the 21st July to the 18th August, 1941.

Bengal Coal Co., Ltd.—Meeting, 16th July, 1941 at 11 a.m. Transfer Books closed from the 2nd to the 16th July, 1941. *Dividend proposed Rs. 10 per share.*

DIVIDENDS DECLARED

**Mandra Bhon Railway Co., Ld.*—4 per cent. per annum, ad-interim dividend for the half-year ended 31st March, 1941.

**Sialkot Narowal Railway Co., Ld.*—4½ per cent. per annum, *ad-interim* dividend, for the half-year ended 31st March, 1941.

NEW COMPANY FLOTATIONS

India Jute Balings Ld.—Director: Mr. Fulchand Sarangi. Business: Spinners, weavers, manfacturers, balers and pressers of jute and jute cuttings. Capital: Rs. 5,00,000. Regd. Office: 68, Nalini Sett Road, Calcutta.

Industrial Chemical Corporation, Ld.—Director: Mr. Anandilal Poddar. Business: To deal in pharmaceutical, medicinal and chemical preparations. Capital: Rs. 5,00,000. Regd. Office: 5, Dalhousie Square, Calcutta.

Indian Stores Supply Co., Ld: Director: Mr. Kishenlal Poddar. Business: To carry on the business of store suppliers and general contractors. Capital: Rs. 5,00,000. Regd. Office: 5, Dalhousie Square, Calcutta.

Company Meeting

NEW INDIA ASSURANCE COMPANY

SATISFACTORY BUSINESS IN ALL BRANCHES

Sir Chunilal Mehta's Review

Addressing the Annual General Meeting of the New India Assurance Co. Ltd. on June 30th Sir Chunilal V. Mehta K.C.S.I. Chairman of the Co mpany, said:

"THE report, audited statements of accounts and balance sheet for the year ended December 31, 1940, have been in your hands for some time and I propose, with your consent, to take them as read.

"Since we last met, three Directors—Sir Vithal Chandravarkar, Mr. Dinshaw Cawasjee and Mr. Jayantilal R. Mehta—have joined the Board as the representatives of life policyholders of the company. As you are aware, the Insurance Act of 1938 lays down that not less than a fourth of the whole number of the directors of a company incorporated in India, and transacting life Assurance, shall be elected by its life-policy-holders. Actually, the formality of a meeting of our policy-holders was not necessary as the application from gentlemen prepared to accept office did not exceed the number of directors to be elected and, therefore, in accordance with the rules of the Act, those applying were deemed to have been elected. We welcome these gentlemen as directors of our company.

"In reviewing the results of each of our departments, I shall follow the order of appearance in the accounts before you.

I am glad again to be able to point to a very satisfactory year in our fire department; in fact, we have had the most profitable year in our experience both as regards the volume of profit and the percentage it bears to premium income, and this, in spite of a larger premium reserve being called for following an increase in the business of the department.

SURPLUS FOR YEAR

The surplus for the year amounted to Rs. 11,02,557 equal to 30.3 per cent. of the premiums. We have considered it advisable to incorporate a sum of Rs. 2,00,000 as the additional reserve, leaving Rs. 9,02,357 for the transfer to profit and loss account. A fall in the claims ratio to 35.4 per cent. as compared with 41.1 per cent. for the preceding year accounted only in part for the improvement in profit the fall in the commission cost of the business being largely responsible, which is the outcome of a full year's working since the introduction of the Insurance Act.

The premium income in the accident department—which, to conform with an amendment of the Insurance Act you will find described by the word "Miscellaneous"—shows, I regret, a fall on the previous year's figure although of not serious proportions. The reduction is due almost entirely to the loss of some overseas business as a result of the war.

The profit for the year amounted to Rs. 3,58,214, being 30.8 per cent. of the premium income. This, as in the fire department constitutes a record for us and follows a series of satisfactory years in this department. From the year's profit a sum of Rs. 60,000 has been added to the departmental reserve, leaving Rs. 2,98,214 for transfer to the profit and loss account.

The marine department reflects the immediate effect of war more than any other section of our business. Although, since hostilities commenced, there has been some reduction in the aggregate value of ships and cargoes insured on the market owing to a large volume of shipping being brought under Government control, and to the scheme of the British Government under which private shippers may, in certain circumstances, obtain Government protection against war risks, yet premium income now much exceeds that of pre-war days. This is due in greater part to the high war risk premiums which must be charged to cover the heavy losses at sea from enemy action and, to an extent, to the surcharges of premium levied to cover the additional marine perils arising from navigation under the restrictions imposed by war.

As it appears, however, that an increasing amount of shipping and cargo space will be required by Government for the prosecution of the war, it is to be expected that, in spite of high and possibly still higher rates of premium, there will in time be a setback in the volume of premium income.

It will be observed that some improvement is shown in our marine account. The marine fund has, as a result of the year's operations, increased in amount and in its ratio to the premium income. This is so far satisfictory, but it is yet too early to state definitely that there will be an ultimate profit as, owing to the war, claims generally take a longer time to reach settlement.

In the circumstance we have decided to carry forward in the marine fund the balance remaining in the account for 1938 and previous years.

In our life assurance department, the amount of the sums assured under policies issued during the year was Rs. 1,43,44,721. Of this amount Rs. 7,34,500 was reassured.

In addressing you last year, I referred to the falling off in new life business since the outbreak of war and the serious degree to which it was affected by the development of the war situation in May and June of last year. Business brightened up somewhat when, towards the end of the year, uneasiness had to some extent subsided. Nevertheless business is still much less buoyant that it had been prior to the outbreak of war and our company has readily joined in a scheme of collective propaganda and advertising throughout the country designed to restore the position by allaying nervousness which is reflected in a general hesitancy to take up life assurance.

It is not only in the field of new business that we—and other companies also-are suffering. The lapsing and surrender of policies is still too common and the demand for policy loans—which in a number of cases amounts to a virtual surrender of policies—has not decreased. Apart from the difficulty of maintaining our life business as a growing force, we are faced with the added problem of finding suitable outlets for the investment of our life fund at a remunerative rate of interest.

To offset these various factors we have taken all possible steps to keep our expenses of securing and managing the business at the lowest level and I am pleased in this connection to state that the ratio of commission and expenses to premium income has been brought down to 23.8 per cent. from 26.2 per cent. for the preceding year.

A valuation of the assets and liabilities of the department for a period of 4¾ years ended 31st December 1940 is now under preparation and the results will be published within a short time.

I will now pass on to the balance sheet. Our investments are valued at or below cost. As at the close of the year—and also as at this date—the book values are in the aggregate below the market values. In the general department, which invested the bulk of its funds when the prices of securities were much lower than they are to-day, the excess of market values over book values represents a substantial sum. The position in the life department, in which the investments are of more recent origin, is naturally not so strong but is, nevertheless, satisfactory in that, after writing back the provision of Rs. 2,07,903 made last year for depreciation of investments, there is still a not inconsiderable excess of market values over book values.

Whilst, apart from the growth in figures disclosed by the balance sheet there are no outstanding changes to be referred to, there are one or two items to which I think I should draw your attention.

The general reserve has been increased to Rs. 2,50,000 by the addition of Rs. 1,25,000 from the profits of the year. It is our intention, as circumstances permit, further to add to this reserve.

Another matter I shall refer to in connection with the balance sheet is the substantial amounts shown with bankers, particularly in our general department. These amounts are much in excess of the customary funds we have with banks. The reason for this rather unusual, but temporary, feature in our accounts was our decision during the year to realise, and repatriate the proceeds of certain of our sterling and other overseas investments. At the same time we felt that the investment outlook was unsettled and, therefore, we deferred reinvesting these monies. I may say that such of these funds as are not required to be kept liquid for our day-to-day requirements have now been invested.

With six months of the current year practically gone you will expect me to have something to say about our immediate prospects, and how we are affected by current conditions.

SATISFACTORY BUSINESS

I am pleased to say that so far this year our business has proceeded satisfactorily. This, of course, needs to be qualified by the difficulty, which I have already explained, in again bringing our life business to an expanding basis, but whilst the unsettled conditions brought about by the war remain, we cannot look for an early return of the progress which we would normally expect in this department. The protection acorded by life assurance should, one might have thought, be more widely sought when times are unsettled. Yet we find the anomaly of the individual showing reluctance to ensure the economic welfare of his own future and of his dependents by effecting suitable life assurance, whilst those of the business community seek insurance protection to the fullest possible extent so far as their material possessions are concerned. I believe it is not sufficiently realised that here, as in many other countries, the value of life assurance in the economic life of the people is regarded by the respective Governments as of considerable importance. As evidence of this, premiums up to a substantial limit, are exempt from income tax, and a large proportion of the profits of the business returned to policy-holders in the form of bonuses is also exempted from tax. This concession, in view of the prevailing high rate of taxation, is a valuable one and adds considerable investment merits to a life policy apart from the financial protection it gives in the event of death during the currency of the policy.

The war has brought new industries to India and an expansion in those that existed. This is to the good of Indian insurance and of our company in particular. We have secured our share of the additional insurance business which is thus made available and will take steps to see that we continue to obtain an appropriate share of any further growth of business in India. Our fire and accident departments are chiefly benefiting from this development in industry. Shipping is now so closely a concern of governments that business in our marine department must, I think, be affected; but this is a factor over which we have no control.

Apart from the loss of business which we derived from centres now in enemy occupation which will, of course, have some effect on our future premium income, I think I can now state that all losses suffered, or which we may suffer, as a direct result of the war have been written off or otherwise provided for. This has been achieved without any serious effect on the company as you will observe from the accounts, which show a very successful year's trading and a further substantial strengthening of our resources.

I will now ask you to turn to the profit and loss appropriation account. The balance transferred thereto from the profit and loss account is Rs. 13,96,787. After giving effect to the transfer to which I have already referred, and providing Rs. 4,75 000 for taxation there remains Rs. 9 84,394-9-0 for disposal. From this your directors recommend the payment of a tax-free dividend of Rs. 1-8-0 per share, squalling 10 per cent. on our capital,

(Continued on page 78)

Bombay Mutual Life Assurance Society,
LIMITED

Speech delivered by Mr. U. S. Desai, M.A., Chairman, the Bombay Mutual Life Assurance Society Ltd., at the 69th Ordinary General Meeting of the Policyholders held on the 28th June, 1941.

Gentlemen,

I rise once again to address you on the working of your Society for the period ending 31st December, 1940. The Report and Accounts covering that period have already been circulated to you and with your permission I shall take them as read.

Before dealing with our own activities, I hope you will allow me to make one or two observations on the background against which our business has been conducted. We were, since 1928, in for a period of halcyon prosperity but we are now in the throes of an international cataclysm. The war embracing three Continents has naturally had its effect on us as an insurance company, which thrives on the peace and plenty of the nation. Now-a-days circumstances are changing rapidly and we have to move fast to keep abreast of the times. Looking to the uncertainty prevailing now, I doubt whether we shall ever be able to return to the old ways of thinking and doing business.

NEW BUSINESS

Gentlemen, on the last occasion while reporting our increased new business I envisaged the deleterious effects that war would have on it, though I fondly hoped that my prophecy would prove wrong. But the continuance of war has dispelled this hope. The circumstances created by the war have handicapped our development and progress, in the direction of securing new sums assured, which have recorded a fall from Rs. 2 Crores 7 lakhs in 1939 to Rs. 1 Crore 51 lakhs in 1940. This depletion in the volume of new business is mainly due to the general uncertainty and sharp rise in the index of the cost of living which have caused the people to defer their insurance plans. I may, however, inform you that the business done so far in this year has remained at a satisfactory level and if this progress is maintained through the remaining months, I shall be able to report a progressive year. The premium income during the period covered by the report amounted to Rs. 57,58,849-10-0 and the life fund stood at the close of the year at Rs. 2,08,63,463-12-1. The expense ratio, you will be glad to learn, has shown a record drop from 27.61 per cent. in 1939 to 22.83 per cent. in 1940. Taking into account the abnormal conditions under which we are working, I am sure you will regard this result as very satisfactory.

LAPSES

It is refreshing to observe that during the year under report the percentage of lapses, the bane of life insurance business, showed a slight fall from 6.85 per cent. in 1939 to 6.29 per cent. in 1940. This improvement in the lapse ratio is mainly due to our deliberate policy of careful selection of lives and constant service whereby we encourage the policyholders to keep their contracts in force.

INVESTMENTS

Turning to our accounts it will be noticed that during the period under report, we have been able to add a sum of Rs. 44,51,910-15-11 to our investments, bringing the grand total to Rs. 2,09,92,168-14-3.

Gentlemen, the present era of low interest rates emerged originally from the crisis of September, 1931 when sterling left the gold standard and virtually became a managed currency. Since then, a number of factors, notably the continuance of Government's policy for cheap money, combined with rapidly growing funds have rendered the problem of life insurance investments an increasingly difficult one. Large scale refunding operations have been carried out and although a fair amount of borrowing has taken place, the terms naturally favoured the borrower more than the lender. The position has been further aggravated by the provisions of the Insurance Act of 1938, restricting the field of investment still further. So far as we can see our investments are well chosen to stand the strain of the future but so far as the yield is concerned they must suffer their share of general impoverishment. The net rate of interest has fallen from 4.91 per cent. in 1939 to 4.43 per cent. in 1940. I may add here that this drop in yield is, to some extent due to the large sums spent on our Calcutta building which obviously cannot yield anything while the building is under construction.

Gentlemen, I can at this stage put no date to the conclusion of war but I do look forward with full confidence to the day, which let us hope is not far distant, when we shall be able to resume our normal activities and the Society will play its part in the post-war economic reconstruction. Life Insurance has been integrated into the economic structure of the modern world and at will remain as an indispensable necessity for the average man. In affording life insurance protection on mutual principle we shall in fact provide the "Social Security"—a service of greatest order to the community. In the meantime, we must remain content to keep the Society, as far as we can, in the healthy position that it is in to-day. I must reiterate that reasonable hope and confidence are indispensable to the prosperity of our undertaking and I hope that the essential sanity of the insuring public in India will enable us to get along.

CLAIMS BY DEATH

Of the outstanding claims by death and maturity as shown in the Annual Report, a sum of Rs. 3,44,882-2-0 has since been paid and claims amounting to Rs. 2,88,808-14-8 have been passed for payment and are awaiting proof of title. A mortality investigation of lives insured with the Society is being made by our Actuary and from the information so far gathered I can say that the results are going to be favourable.

BUILDINGS AT CALCUTTA AND MADRAS

The foundation stone of the Society's building at Calcutta was laid in November last by Sir N. N. Sirkar, K.C.S.I., ex-Law Member of the Government of India. The construction of the building is in progress and it is expected to be ready for occupation next year. Besides giving the Society a good advertisement and prestige in Bengal, this building is expected to bring in a handsome income by way of rent. We have also acquired a building, known as the Christian College Building, situated in a prominent business locality in the City of Madras, at a cost of Rs. 2,85,000/-.

GENERAL

Mr. J. M. Cordeiro, the Secretary of the Society, retired on the 31st of March of this year, after 12 years of meritorious service. His abilities and business acumen are too well known to you to need elaboration. In him, we found an able administrator and valued colleague. We wish him a very happy life during his retirement.

To the Acting Secretary and Staff, we owe our appreciation for their good work and devotion to duty. In recognition of their services we recommend the payment of one month's salary as bonus to such members as have served for 12 months and half a month's salary to those who have served for six months or more and who are now and who were in the Society's service on the 31st December, 1940.

I cannot close without paying a warm tribute to our Chief Agents, Agents and Field workers for the splendid way in which they have worked during these days fraught with difficulties, and I am confident, that they will as usual, bring their entire and united energies to further the interest and prestige of this Mutual Institution of which we are proud to be the servants.

Gentlemen, now I beg to move that the Directors' Report, the Audited Revenue Account and the Balance Sheet for the year ended 31st December, 1940, be approved and adopted.

(Continued from page 77)

and which will absorb Rs. 7,12,105-8-0. The sum of Rs. 2,72,289-1-0 will remain to be carried forward to next account.

Before moving the adoption of the report and accounts. I wish to express our appreciation of the work of the General Manager and the Officers and others who work under him. I wish also to record our thanks to our Agents and connections for the valued support they have given to the company.

And now, gentlemen, I propose that the Directors' report and the audited accounts and balance sheet for the year December 31, 1940, be approved and adopted.

The directors' report was adopted. A dividend at the rate of Rs. 1-8 per share, free of tax, was declared. Sir Chunilal Mehta, Mr. A. D. Shroff, Mr. Kasturbhai Lalbhai and Sir H. P. Mody were re-elected director.

THE DACCA ELECTRIC SUPPLY CO., LTD.

The Annual Ordinary General Meeting of the Shareholders will be held at the Registered Office of the Company, No. 14, Old Court House Street, Calcutta, on Tuesday, the 22nd day of July 1941, at 3-30 p.m. for the following purposes:—

(1) To receive and pass the Directors' Report and the audited Accounts for the year ended 31st December, 1940.
(2) To declare a dividend,
(3) To elect a Director in place of the retiring Director.
(4) To elect Auditors for the ensuing year, and to fix their remuneration.
(5) To transact any other business that may be brought forward.

The Share Register of the Company will be closed from 14th July, 1941 to 22nd July 1941, both days inclusive.

OCTAVIUS STEEL & CO. LTD.,
Managing Agents.

Calcutta, 4th July, 1941.

THE MANDRA BHON RAILWAY COMPANY, LTD.

NOTICE.

NOTICE is hereby given that an Adinterim dividend for the half-year ended 31st March 1941, at the rate of 4% per annum less Income Tax has been made payable at the Chartered Bank of India, Australia & China, Bombay, on and after the 22nd July 1941 to those Shareholders whose names stand on the Company's Register on the 5th July 1941 to whom Dividend Warrants will be posted.

Intimation of any change of address should be given to the undersigned immediately.

The Transfer Books of the Company will be closed from Monday, the 7th July to Monday, the 21st July 1941, both days inclusive.

By Order of the Board,
KILLICK, NIXON & Co.,
Agents.

Home Street, Fort,
Bombay, 26th June 1941.

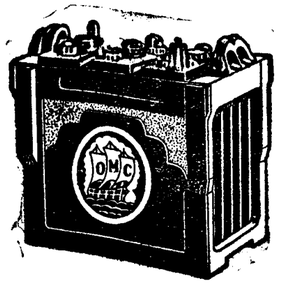
IS IT NOT WISE TO INSURE NOW ?



With an uncertain future ahead Conservation and Consolidation of resources are the prime needs every individual should assiduously strive after.

If you already have Life Insurance, hold on to it. Don't allow it to lapse. If you haven't go in for it right now. A Life Policy gives an inestimable protection and it will cost you less now than later. It is cent per cent true that to be forewarned is to be forearmed.

Write to us for further particulars or advice.

WORLD OF INDIAN FINANCE

Friday evening.

CONDITIONS in the money market are unchanged, with short credits in plentiful supply and with interbank call money quoting nominally ¼ per cent in Bombay, ½ per cent in Calcutta and ¾ per cent in Madras. As we had explained at some length in a recent issue, all these rates are, in the present circumstances, highly fictitious, for, no business passes which may be said to provide a basis for testing the rates. While these rates are thus purely nominal, the vogue of maintaining a difference between the rate in one centre and that in another persists. The lowest nominal rate is for Bombay and the highest for Madras. Is there any special significance in the maintenance of such differences in the nominal rates? Can we read in these variations any comment on the status and liveliness of the short loan market in the respective centres? That is to say, does the call money rate of ¼ per cent for Bombay indicate that the Western Capital has a livelier short loan market, with a greater turnover, with larger supplies and with keener bidding? Conversely, does a call money rate of ¾ per cent for Madras mean that the southern capital has a comparatively sluggish and restricted call money market?

We think that the answer to these questions is in the affirmative. For various reasons, the call money market in business put through in short credits in Hornby Road is many times more than the corresponding business in Calcutta. Call money is an important facet of the Bombay money market not only as between banks, but as between banks and the bigger operators in giltedged securities. There are about half a dozen firms of giltedged dealers in Bombay who finance a good part of their holdings by securing loans from banks on call money basis. The rate which they pay for such advances is slightly higher than the interbank call money rate; but the loans are strictly on call money footing so far as the right of the bank to call back the money or the right of the borrower to repay the money is concerned. We have known conditions in Bombay when funds put out by banks to giltedged operators on call money basis had been as much as Rs.1 crore at any one time. The call money market in Bombay is thus more broad-based. The funds in supply in the call money market in Bombay are also considerably higher. It has been the general experience that Indian joint stock banks are generally lenders in the short credit market and exchange banks are more often borrowers than lenders. It was particularly so in the days when the Mail day was a strenuous weekly feature. Over the past many years, exchange banks have come to depend upon their Indian deposits for their Indian business. They are, therefore, more often obliged to supplement their resources by loans taken through the call loan market. The two leading Indian joint stock banks, which have their headquarters in Bombay, are always lenders of call money for substantial amounts. The Bank of Baroda has Bombay as its main centre of activity; and this Bank also figures quite prominently as a lender of short credits. It can, therefore, be said that supplies in Bombay call money market are always of larger dimensions than in the other two centres. It is because of the greater resources and the more widespread character of the Bombay short loan market, that the call money rate quoted in Hornby Road has been less than that of the Eastern and Southern capitals.

The call money market in Calcutta was, once upon a time, fed copiously by the investment trusts associated with Sir David Yule. The Calcutta Discount Company used to be the most dominant factor in the Calcutta money market. In those days, the call money rate in Calcutta was invariably lower than that in Bombay. This powerful factor has, however, been withdrawn from the Calcutta short credits market in recent years. The result is that the turnover in interbank call money in this centre is now on a more modest scale. The range of the market also is narrowed to banking circles, though it must be added that public bodies like the Calcutta Corporation, Port Trust and Improvement Trust have played an important part in this market.

The call money market in Madras is extremely limited in range and has none too plentiful a supply of resources. This analysis may be said to confirm the call money rate of any one centre being an index of the status and range of that particular market.

The amount of tender Treasury Bills on offer on July 15 was Rs. 2 crores and the applications showed a welcome increase to Rs. 3,85½ lakhs which compares

with Rs. 2,12¼ lakhs on July 8. Though the applications were definitely on the large side, bidding does not appear to have been keen, as the average rate of accepted tenders is only 1 pie lower at annas 13 and pies 8 per cent per annum. Three months intermediate Treasury Bills sold between July 9 and July 15 at Rs. 8¾ lakhs make poor showing. No definite conclusion as to the state of the money market can be drawn from this week's sales of tap bills or the average rate of tender bills. In fact, this only serves to confirm the view propounded recently in these columns that sales of Treasury Bills are more dependent upon Treasury Bill maturities than on money market conditions.

The returns of the Reserve Bank for the week ended July 11, both for the banking and issue departments present somewhat difficult conundrums for solution. Let us first take the statement for the banking department. As foreshadowed in this column last week, ways and means advances show a big decline from Rs. 4 crores to Rs. 12 lakhs. And this perhaps, confirms the view which we put forward that the sterling receipts which were included in the returns for July 4 must have arrived at the last moment. The Central Government repaid ways and means advances of nearly Rs. 4 crores and has yet managed to increase their deposits with the Reserve Bank by nearly Rs. 2 crores from Rs. 12.17 crores to Rs. 14.11 crores. The ways and means position of the Government must have thus shown a betterment of at least Rs. 6 crores. Most probably, the bulk of this betterment is accounted for by the heavy subscriptions received for the second defence loan in the week ended July 5. A press communique gives the total subscriptions of that week as Rs. 5.28 crores.

While the week ended July 5 must be considered the best week from the point of view of subscriptions received for the second defence loan, it has to be considered whether there were any special circumstances which are responsible for such large subscriptions. It may be asked if such satisfactory results are due to support from special quarters. There are reasons to think that the heavy subscriptions in the week ended July 5 may be largely due to the support given by the Reserve Bank and the Imperial Bank. It will be recalled that investments in the Reserve Bank's banking department showed, in the week ended July 4, an unusually sharp decline from Rs. 8.44 crores to Rs. 5.28 crores.

The explanation, which we offered for such a drastic reduction in the investment portfolio, was that the Reserve Bank should have held, amongst its investments, securities which the Government purchased for cancellation. The same view is taken by the Financial Correspondent of the *Indian Express* whose weekly article appearing on Sundays is one of the most masterly reviews of the Indian money market. He advances four possible explanations and is inclined to our theory as the most likely. If it is true that the Reserve Bank had handed over nearly Rs. 3 crores of securities from its investment portfolio to the Government for cancellation, it stands to reason that the Bank would have liked to bring up its portfolio to what it considers its norm. Studying the weekly returns of the Reserve Bank over a period of months, it may be said that the policy of the Bank has been to maintain an investment portfolio of roundabout Rs. 8 crores. While losing Rs. 3 crores of securities owing to the purchase by the Government for cancellation, the Reserve Bank must have bought Rs. 3 crores of Second Defence Loan as the most eligible security from the point of view of its investment policy. It also seems likely that the Imperial Bank has likewise taken a big slice of the Second Defence Loan in the same week. In the week ended July 11, Government securities held by the Imperial Bank have risen from Rs. 59.34 crores to Rs. 61.84 crores. It will, thus, be seen that, between the Imperial Bank and the Reserve Bank, the entire amount of subscriptions to the Second Defence Loan in the week ended July 5 is accounted for.

This leads us to the next question: Is there any special significance to be attached to the Reserve Bank and the Imperial Bank taking such large parcels of the second defence loan at this juncture? For our part, we think that this is, perhaps, an indication of the decision of the Goversmest to close the list for the Second Defence Loan in the next week or two. It is not unlikely that the Second Defence Loan is closed, so as to enable the Government to devise more fruitful types of defence loan. In this connection, we would strongly urge on Sir Jeremy Raisman to give careful consideration to the proposals which we outlined in detail two weeks ago. The Defence Loan will be in the form of a 3 per cent 12—17 year loan issued at par or at a small discount. We would like the Government to give a trial to our plan of the simultaneous issue of loans of differing maturities so that investors can subscribe according to individual preferences. Be this as it may, it is clear that the large-scale subscriptions of the Reserve Bank and the Imperial Bank for the Second Defence Loan will have the effect of accelerating the flow of subscriptions from banks and other investment institutions. In the case of the first defence Loan there was a last minute rush in the belief that the Second Defence Loan would not be as favourable. Those who took up the First Defence Loan are now happy at the substantial premium which the first loan has gone to. A similar last minute rush might well account for anything like Rs. 10 crores to Rs. 15 crores being subscribed for the Second Defence Loan before the list is closed. If this proves to be the case, the problem of the Third Defence Loan will be greatly simplified.

To return to the statements of the Reserve Bank. Deposits of banks show a sharp decline from Rs. 32.63 crores to Rs. 28.63 crores. A good part of this is accounted for by the reduction in the cash balance of the Imperial Bank. Foreign balances in the banking department have declined from Rs. 46.48 crores to Rs. 43.01 crores. This decline is connected with the transfer of sterling securities from the banking department to the issue depatment. In the issue department, sterling securities have risen from Rs. 118.80 crores to Rs. 121.65 crores. This addition to sterling securities in the issue department has not been allowed to cause an expansion of currency. Rupee securities in the issue department are correspondingly reduced from Rs. 91.32 crores to Rs. 88.47 crores.

While we consider that the explanation we have given for this week's increase in investments in the Reserve Bank's banking department is the most likely one, there is also another view to which we should make a brief reference. In the banking department, there is a reduction in foreign balances and an almost corresponding increase in investments; and in the issue department, there is an increase in sterling assets and a decrease in rupee securities. This may mean nothing more than that the Reserve Bank has transferred some of the dated securities from the issue depatment to the banking department, so as to enable it to sell them as suitable opportunity presents itself. If this view is to be accepted, it follows that, of the Rs. 5.28 crores subscribed to the Second Defence Loan, nearly half is accounted for by the Imperial Bank and the rest by other outside investors. Our main argument as regards the significance of these large subscriptions to the closure of the list of the Second Defence Loan remains unaffected.

The Exchange market has been steady, with some bills showing

Banks were sellers of T. T. at 1s. 5 15/16d., for ready up to six months forward; and banks were buyers of T. T. at 1s. 6d., for the same delivery.

Banks were buyers of three months D. A. bills at 1s. 6 7/32d., for three months and 1s. 6 9/32d., for the fourth month.

Interbank call money quoted ½ per cent., no borrowers.

Firms' money for call and short quoted ½ per cent; and for one to four months deposits ½ per cent.

50	„	10 „	„
100	„	5 „	„
100	„	1 mile	„

These may be used any time within SIX MONTHS from the date of issue of each book and are valid for use on the G.I.P., B.B. & C.I., N.W., E.I., E.B., N.S., M. & S.M., Mewer State, Mysore State and S. I. Railways.

PRICE OF COUPON BOOKS

First Class .... Rs. 297-8 per book

Second Class .... Rs. 148-12 per book

Full particulars about these time and money saving Coupons can be obtained on application to:—

The Chief Traffic Manager, G. I. P. Ry., Victoria Terminus.

Station Superintendent, Victoria Terminus.

Station Master, Poona.

Divl. Traffic Manager:— Bombay, Sholapur, Nagpur, Jubbulpore and Jhansi.

Finance Abroad

Friday Morning.

IF one can be guided by the news available in the ninety-eighth week of the war it might be fairly said that all is quiet on the financial front as money rates and exchange rates are unchanged over a week. It is known that a lot of belt-tightening is being done in various countries and that New Zealand does not yield to Australia in regard to her readiness to shoulder additional taxation. The gargantuan appropriations of the U.S. Treasury for the defence Services strike a familiar chord and all that we know at present is that taxes for 1941-42 are expected to provide over 3½ billions. Except for the new baby bond scheme launched in May little has been published about new defence issues in the U.S.A. The budget problem need hardly be discussed again except to indicate that the latest available issue of the National City Bank's monthly letter puts the deficit at around ten billions with a ten per cent margin for error. Normal revenue is expected to increase by 948 millions and the Treasury had prepared a plan for making the middle class pay more. Congress is known to favour an increase in income tax and if the rates proposed by the Treasury differ from those recommended by Congress the tax on the highest income over 1 million dollars per annum will be over 70 per cent. It is, however, realised that tax of 78.8 per cent on an income of 5 million dollars is about the limit in taxation. National income is said to be rising and a total of 75 billions and a national budget of 19 billions do not look very much out of focus. The estimates of the committee of 1935-36 on U.S. national income give a total of 59 billions and a normal federal revenue of 1214 millions. It has, however, been suggested that taxtion should be so adjusted as not to choke saving but tax measures have to be judged, first, as revenue producers and only then as checks on private spending. A number of federal excises are favoured for certain reasons, but administrative and other difficulties will limit the increase under Federal excises. A general sales tax is also suitable but for the fact that it will fall heavily on the poor. It may be repeated again that retrenchment in civilian expenditure is scarcely possible, but farm parity payments and soil conservation expenditure can well be deferred especially as cotton and wheat have gone up.

There are four types of defence bond on sale since May. They will not differ from the baby bonds only recently lanched with Mr. Roosevelt as the first buyer. The first series E will take the place of the baby bonds, but will be sold only to individuals and in yearly amounts of not more than 5,000 dollars. They will be sold at 75 per cent of maturity value in denominations as low as S. 25 and will be non-transferable. They may be redeemed by the Treasury on an accelerating scale of values and yield about 2.9 per cent if held to maturity in ten years. They are designed chiefly for persons of small incomes. The next series is also a discount bond but available to any purchaser including corporations, trustees, pension funds etc. as also individuals in yearly amount not exceeding 50,000 dollars or in the combined aggregate with series G. bonds. Purchasable at 74 per cent of face value and in denominations as low as 100 dollars the yield is about 2.53 per cent if held to maturity in 12 years. Non-transferable and redeemable by the Treasury at graduated rates. The series G bonds are interest-bearing instead of discount bonds meant for investors desious of current income. Yearly amounts are similar to series F and interest payable is 2½ per cent, payable twice a year by cheque with redemption values of principle scaled at less than par in order to encourage the holding of the bonds till maturity. Postal savings stamps are also in issue for sums as low as 10 cents and yield no interest since they are meant to be accumulated and converted into savings bonds at an advantageous rate. They are intended to reach the smallest savers. All the four types listed are meant for individuals, mostly small savers. They are not meant for dealers in securities.

It has been said in this connexion that the yield of over 2½ per cent will tempt buyers and the date fixed for redemption distinguishes them from the Liberty Bonds issued in Wilson's time. It has been urged that additions to wages this year must be speedily diverted into the savings bonds. The National City Bank's further comments are of greater interest. The campaign to sell the new issues will be vigorous, but without high pressure tactics. Banks and savings and loan associations have offered their services to the Treasury to act as agents alongside of the postal system. One must wait to see how the Americans do the necessary boosting for the savings bonds, but it may fairly be said that things will not be done in the leisurely, old-fashioned way seen in India. The special officer who has been asked to tackle the subject of saving in relation to the defence issues may put up sugestions, but it requires a vast knowledge of psychology and prevailing prejudices to stimulate the buying by individuals of Defence bonds. It is no good talking in India at any rate about a savings drive when the cost of living has gone up and saving looks like a mug's game compared with buying and lying up provisions for a year as advised.

The interest aroused by the transfer of Mr. Oliver Lyttelton to Cairo must have increased since the debates in Parliament on the work of the Supply ministry. It is now presumed that Mr. Bevin will be shoved out and the only Minister sure to keep his place is Sir Andrew Duncan. The production muddle persists and not all the stories of successful industrial concentration will make one admit that everything by way of industrial organisation for war purposes has panned out. A pretty large allowance of salt is evidently needed in taking the achievements of British factories, for the acute dissatisfaction expressed by serving officers who are M.P.'s shows that Lord Beaverbrook has not performed all the miracles attributed to him.

That response to the savings campaign continues good proves that the nation is better than its leaders. This response is of higher interest than the news that 75 million of Treasury Bills was sold at 1 per cent. Plymouth and Portsmouth have put up outsize contributions for the War Weapons Week showing that after having taken it, they are going to give it back. Both are naval but Plymouth's contribution is probably made up of the contributions of Stonehouse and Devonport in addition to its own. The contributions should impress those who are soon to launch savings weeks in order to help the British war saying movement in India. Even the increase in subscriptions to the Defence Loan reported this month may not hold, if a sustained effort is not made to encourage the investor.

Little is known about the exact nature of happenings in Iceland. The replacement of British troops by U.S. trops and the partial evacuation of the former are known as also the criticism of these proceedings by Isolationists. The exchange of letters between Herr Jonasson and President Roosevelt does not mean that the earlier decision taken by the Althing as regards the separation from Denmark (with which country Iceland was connected since 1918) and entry into the British Commonwealth will be abrogated. A temporary occupation for limited purposes is envisaged by Washington. Iceland is a sovereign state and provision was made in the pact of 1918 as regards revised terms for the act of Union adopted in 1918 and the exchange of Ministers confirmed the world in its view that Iceland was not a colony. Iceland used to give the King of Denmark the sum of 60,000 kronur per annum for his Civil List but that must have stopped. Iceland has its note issue under the State Bank and has the Rural Bank of Iceland as also a Fish-

No Change in Ratio

SINCE last week, there have been recurrent rumours, in market circles, that the rupee-sterling exchange ratio will be raised from 1s. 6d., to 1s. 8d., or even 1s. 10d. We have also received many enquiries whether there is any foundation for these rumours. The ratio has occasioned such bitter controversy over the past twentytwo years that the very suggestion that there might be a change causes widespread excitement not unmixed with misgivings. We may say at once that, in our view, these rumours about the impending change in the rupee--sterling ratio are entirely groundless; and that there can be no justification for any change being effected in the present circumstances. Reports, however vague and however unauthoritative, of likely alteration in the exchange value of the rupee have the effect of unsettling markets and obliging banks and like interests to observe extra caution in their exchange transactions. It is, therefore, of the utmost importance that these rumours must be nipped in the bud.

The considerations, on the basis of which reports of a higher ratio have been built, pertain largely to the colossal accumulation of sterling balances in the hands of the Reserve Bank. It is argued that India's ability to add to her sterling resources as much as £150 million or so in less than two years is convincing evidence of the undervaluation of the rupee. If we remember right, one of the highest financial authorities in the country mentioned, somewhat casually, that, except for exchange control, the rupee would have risen much higher; and it was sought to make out that the public should gratefully appreciate this action on the part of the Government whom they had been charging with Machiavelian bias in favour of a higher ratio. Remarks of this nature may have played some part in fostering the impression that the proper ratio in present circumstances is much over 1s. 6d. and that the maintenance of the eighteenpence level is due to the benignity of the Government.

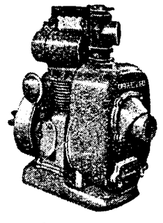
While it is true that the Reserve Bank has been piling up sterling balances on an unusually large scale, this result is not due to the functioning of normal trade. Most of the acquired sterling assets can be traced to inter-governmental transactions between India and Britain. All these transactions are directly connected with the present war. That is to say, the accumulation of sterling assets is more or less entirely connected with war conditions. And if such a situation has been brought about by the abnormal developments arising from a war, will it be prudent or justifiable to alter the ratio in response to what is admittedly an unusual or abnormal state of affairs?

We have, as a matter of fact, a situation in which we accumulate sterling with reference to inter-governmental transactions and we lose sterling, though only occasionally, with respect to the transactions arising out of *bona fide* business. Exchange should be considered particularly strong in relation to the admitted fact of the Reserve Bank increasing its sterling balances on a substantial scale. But exchange has also been known to be weak in relation to the balance of exchange transactions effected in banking circles.

In this connection, we may recall the developments which took place in the Indian exchange market in the last week of March and the first week of April last. In the closing days of March, a disruption of the sterling rate was apprehended. Owing to the continued difficulty of securing shipping space, export bills were few and far between; on the other hand, private remittances were on a fairly substantial scale. Thus, there were abundant buyers of sterling and very few sellers of sterling. In the result, it looked as though, for want of cover, the rupee rate would break down. In such circumstances, the Reserve Bank suggested, in the first instance, that it would support the rupee by coming out as sellers of sterling at 1s. 5 29/32d. On this being made known to the exchange bankers, they decided that they would let the exchange rate slip down to 1s. 5 7/8d. This threatened action on the part of banks forced the Reserve Bank to realise the need for a bolder policy. Finally, the Reserve Bank made it known to all banks that it would control sterling at 1s. 5 31/32d. If the Reserve Bank had not come out as sellers of Reverse Councils at 1s. 5 31/32d. by the end of March the rupee-sterling exchange rate would have crashed at that time.

We wish to draw special attention to the fact that the usual practice is for the Reserve Bank to sell Reverse Councils at the statutory lower point. The statutory lower point is 1s. 5 49/64d. That the Reserve Bank had to adopt the extraordinary procedure of coming out as sellers of Reverse Councils at a rate higher than the statutory lower point is final and conclusive proof of the inherent weakness of the rupee-sterling exchange. Since then, we have this anomalous phenomenon of the Reserve Bank selling sterling with one hand for small amounts and acquiring sterling with the other for big amounts: and also of the difference between the selling rate and the buying rate being reduced to 1/32d. This is the truest index of the abnormal state of the exchange market; and to effect a change in the exchange ratio in this inter-play of abnormal forces, will be the height of folly. We are in a position to affirm that Sir Jeremy Raisman will not be a party to a measure so obviously untenable.

In the past, the demand for a higher ratio has come from British nterests; and Indian interests have always been asking for a lower ratio. It is a simple axiom that a higher ratio for a country retards its exports and facilitates its imports. British interests strenuously fought for a higher ratio because their main concern was to import manufactured goods to this country. The position is now changed. It is true that Britain is still desirous of maintaining her exports to India. But it is a matter of life and death significance to Britain that she is able to buy the maximum amount of war material and other supplies from India; and the successful prosecution of the war in the Middle East and the Far East is largely dependent upon the speed and adequacy of supplies secured from India.



Britain is, therefore, interested in India not as a seller of her goods, but as a buyer of Indian goods. In this position of being obliged to buy large quantities of various commodities from India, Britain will be the first to realise that a higher ratio would prove greatly detrimental to her. Put briefly, it is now as much Britain's concern as India's concern to resist any raising of the ratio. We may, therefore, conclude that there is neither reason nor justification for change in the rupee-sterling exchange rate.

Protection Defended

TO the ordinary student of Indian affairs, "discriminating protection" may seem just another cliche on which people spend little thought. But the consequences of a policy whose origin must be traced to the observations of Lord Selborne's committee on India's fiscal autonomy have been vast and far-reaching. The policy may even be said to antedate 1923 when the Legislative Assembly accepted the main recommendations of the Fiscal Commission, but it is convenient to trace the course of fiscal policy from the acceptance of the Commission's views. Since many of us continue to regard the present war as something in the nature of a watershed in regard to both political and industrial developments, it is certainly an opportune moment for the appearance of a solid (in the best sense of the term) work on Indian fiscal policy. The treatise of Professor Adarkar of the Allahabad University (published by Kitabastan, Allahabad, Rs. 15) is distinguished from similar works describing the many changes in the Indian tariff by a critical analysis of Indian industrial development, more particularly under the protective regime. Tariff reformers in Britain in the past were fond of discussing the many merits, as revealed by working, of protection in European countries. Now that the tariff reform is since 1932 the major factor in British fiscal policy, there is little need and there never was much good—to argue the case out to the foreigner. It is mainly for convincing the scepties at home that Mr. Adarkar embarked on a task, not at all easy, but carried through to a successful conclusion as a glance at his new book will indicate.

What is discriminating protection? The policy was summed up in the phrase of the late Lala Harkishen Lal as a witness before the Fiscal Commission, and the oft-quoted saying "Nurse the baby, protect the child, and free the adult," is also ascribed to the Lala. The book more than reflects the faith in industrial development cherished by generations of Indian students of economics. While one or two have been distinctly critical and are not afraid to link the limited progress made by certain Indian industries to the demonstrable defects of any policy opposed to free trade, Mr. Adarkar is definitely among the vast majority who urge that fiscal advantages must be afforded to Indian industries so that national prosperity emerges and who attribute the weak spots in national economy to the lack of such protection. That these views are popular is undoubted, but their soundness has never ceased to be questioned. It is a job to the taste of Professor Adarkar who succeeds in demolishing the familiar arguments as to the burden on the consumer, the growth of cartels and the repercussions on Central revenues. It is not as though Protection has to be commended to the Indian public at large; Professor Adarkar's task is the narrower, but more essential, one of showing that discriminating protection granted after elaborate and prolonged investigation is not full-blooded protection, because the triple formula relating to inherent natural advantages, the indispensability of tarff benefits and ability to stand on its own legs, has often militated against deserving applicants before the Tariff Board. In the preliminary review of fiscal policy, in relation to economic theory, of course, an attempt is made to disengage the several stands of protectionist thought in India. Professor Adarkar stands in a tradition that goes back to Ranade, and academic critics of Protection are best answered by another professor who can point to the growth of employment induced by industrial progress and its reactions on the general well-being whenever attempts are made to befog the untutored mind by passionate references to the welfare of the rural masses and the inordinate sacrifices of the Indian taxpayer on the altar of protection. The first part of the treatise answers comprehensively, clearly, and in detail, all the timeworn objections of the prejudiced critic. The burden of protection has been small; a much heavier burden would be shouldered cheerfully if industrial advance is guaranteed under sympathetic administration.

It is hardly necessary to restate the case for protection. The protectionist wins hands down if it comes to an application of the classic arguments relating to the infant industry, high wages or full employment and the home market. The application of these doctrines is wholly warranted by the limited progress made by India even under the shelter of new tariffs. There have been pleas, year after year, for a liberalisation of fiscal policy, for a change both in the constitution and functions of the Tariff Board, and assurances have also been sought as to the continuance of benefits to deserving industries, set up primarily to meet wartime needs. Assurances have been conveyed to one or two industries, but there is, as yet, no declaration as to fiscal policy after the war. While the Professor in his critical analysis has no doubts as to the course that postwar policy must take, one must enter a caveat at this stage as to the possible effects on India's foreign trade. Though these effects are possible rather than probable, and their actually unpredictable nature may be held a bar to such a reference, it must be pointed out that a further development, or rather increase in the output, of the jute and cotton mill industries will not provide a complete solution for the surplus of commodities. And restrictionism in regard to commercial crops has no peculiar virtue, and an expansion of food crops is still far from certain. Be that as it may, the main points emphasised by the latest reviewer of Indian fiscal policy can never be viewed as inappropriate or inopportune. Orthodox economic doctorine has shed its rigidity; and the probable consequences of protection are different from those too readily forecast by Free Traders. Objections to increases in indirect taxation have figured among the average Free Trader's distribution, and in this connection, one may refer to the strange and ingenuous letter in the *Statesman* of one describing himself as a Tariff Reformer. The unfavourable effects on the revenue are often exaggerated, for as Professor Adarkar points out, there is no place for revenue considerations in tariff policy.

It may, indeed, be urged that new sources and subjects emerge when protective tariffs are in force and the Tariff Board has, in adjusting tariff inequalities, never overlooked the just claims of the Central Board of Revenue.

The fear that vested interests will necessarily oppose the scaling down of tariffs has been often referred to by the opponents of Protection. The fear has no basis whatsoever, according to Professor Adarkar who refers to the safeguards in the Constitution and the presence of an impartial and authoritative tribunal like the Tariff Board. The robust economic nationalism of the work is likely to win new adherents to the doctrines orginally associated with List and Carey. This is not the least of the virtues of a work that is strong on exposing the theoretical foundations in tracing the development of protectionist policy. Yet the policy has never been complete or thorough, and it is only necessary to examine the dilution of Indian steel protection by the principle of Imperial preference to realise that the steel duties were in force for only ten years between 1924 and 1934 and also that protection is superfluous for an industry that has demonstrated its efficiency in war as in peace. Professor Adarkar has rightly dwelt at length on the fiscal developments since the Ottawa Pact, involving as they do a breach of the promise made to the Indian peoples that Indian industry will benefit. Protection has been given late and reluctantly and deserving cases have been overlooked. The glass industry is a case in point, and it has been stressed in this connection that the alien producer of soda ash is likely to obtain unjustified advantages under the refund scheme, combining as it does the principle of preference to British and Colonial imports with that of giving limited help to Indian glass makers.

For those who want to know what has happened in the leading industries until last year, no survey can touch the very complete account given by Professor Adarkar. It is true that certain non-protected industries do not come within the scope of his work, but the circumstances in the industries which qualified for protection and those which failed are described, carefully, and an attempt is made to show how far or where the Government failed to create the satisfactory conditions for development. Theorists will note with satisfaction that Professor Adarkar relates the obvious shortcomings of *laissez faire* which revived unexpectedly between 1934 and 1939 with the handicaps created for the sugar industry. On the last subject the views expressed are decidedly original, for the scheme of minimum prices for cane is assailed, and it is sought to show that the protection of the sugar mill is incompatible with statutory regulation of cane prices. But he recognises that progress in the sugar industry has been both rapid and substantial. To those who point to the success of Java and Hawaii he cites two facts; first, that Java took fifty years to attain extraordinary success in field and factory, and secondly, that the climatic and soil differences are great. It is important to note that in regard to sugar protection, he recognises the validity of views expressed by the spokesmen of the industry as regards the modification of control legislation and also the necessity for conserving the mature industry of U.P. and Bihar.

The task of the reviewer in this case is rendered difficult by the mass of information that Professor Adarkar has pressed into his substantial volume, but all students will be grateful for an adequate, well-documented and illuminating survey of the protectionist regime which alone has justified the claim that India is among the most important industrial countries of the world to-day. He has shown, what is always necessary, that the works of the Protectionist are greater than his faith. He has rightly concluded that the growth of subsidiary industries like tinplate and wire nail manufacture at Tatanagar is one of the benefits of protection. He has not overlooked the fact that the sun shines on the just and the unjust and has asserted that the match industry has received from the Tariff Board what it is not entitled to. He has also admitted that in regard to the redress of tariff inequalities, the Tariff Board has interpreted its functions in a narrow spirit and failed to encourage Indian enterprise. But the main conclusion that emerges from his analysis of successive reports reflects great credit on the Inlian Tariff Board, which, in the view of all qualified observers, has been the chief factor in industrial development after the Great War. High praise is due to Professor Adarkar even for stressing what has long been obvious, for official apologists, in alliance with alien interests occasionally try to belittle the advantages of the work carried out by the Tariff Board which stands vindicated by the precise and careful appraisal of an independent critic.

Policies and Prices

WHEN Admiral Emory S. Land inangurated a new passenger and freight service to South Africa one knows that U. S. shipping would acquire an increasingly important position. The depletion of U. K. shipping and the projected addition of 5 million tons within three years indicates that after the war the U. S. A. would attain full parity in mercantile tonnage with Britain. With a number of other European countries having lost their ships, for instance, Norway, Greece, France and Holland, the absolute importance of U. S. shipping in the post-war world would be greater and one must therefore look upon the U. S. building programme, revised frequently and constantly working up to new dimensions and objectives, as a dynamic tool in economic expansion. Whatever be the present nature, scope and inplications of Anglo-American co-operation, the dissatisfaction expressed with the working of Lease and Lend by certain American papers shows that the U. S. A. retains the fear that the U. K. will not be content to take a back seat despite the exhaustion induced by the war and would try to meet her debtor status by an export drive. The defence programme includes the building of fast tankers with the aid of subsides. These tankers will aid the U. S. Navy in time of war and also monopolise in time of peace the carrying of oil across the Atlantic which means less work for British Oil Companies. While those who stress that American non-belligerency is ultimately the most favourable factor may be right; the setting up a smelter for Bolivian tin like the curtailment of rubber imports suggests that imports into U. S. A. except those from Latin America will be controlled strictly in the immediate future. It is true there will be purchases of strategic materials for stock-piles, but the U. S. A. has her own plans and problems. The agreement with Vichy as regards oil exports to North Africa may suggest that the need for phosphates and potash is more pressing than the desire to assist in the British blockade. Meanwhile it has been reported that the immediate problem for the U. S. Government is to control the rise in prices. Mr. Leon Henderson's views on the question of price control, if unacceptable to the most powerful lobby, that of the Farm Bureau are gradually receiving more attention according to a recent cable sent by Mr. Bliven to the *Manchester Guardian* The dangers of a runaway rise in all markets are clearly foreseen and the orgy of spendnig on the Navy which will get over 2 billion dollars the Army has to be restrained with an eye on the consequence. A less obvious remedy is to encourage the civilian industries and encourage the consumption of capital goods, a rise in civilian consumption particularly after the setback noticed in 1940, is advocated. Those who want the suspension of wage and labour standards are not at all anxious to discourage normal spending, and the state of full employment is naturally viewed as one of full consumption.

The Second Armistice

The recognition of Syria and Lebanon has been entrusted to General Catroux whose name has become more prominent since the Armistice terms were accepted by the Vichy Government's representative after the figurative washing of the hands by Admiral Darlan who has other uses for the Syrian debacle. It was evident from the hurried scurry of the French naval units into Alexandretta that Vichy had little strength left. But the Turkish Government's peremptory attitude indicated that the Admiral would soon come to regret the loss of Alexandretta more than the loss of Adalia. The indications of strain between Vichy and Turkey precluded the despatch of German reinforcements while British mastery of the Levant neutralised the German control of the Cyclades and the Dodecanese. The surrender in Syria is more notable than the acquisition of the French Congo and the Cameroons. They form no small part of the French Colonial Empire, possess the strategic advantages for which Napoleon III schemed and strove. The treaty of 1936 is in abeyance and the belated attempts at conciliation after the dose of repression had failed have not satisfied Syrian nationalists who since the death of Dr. Shah Bandar have lacked a leader of eminence. The Armistice signed on Saturday at Acre puts an end to the somewhat slow struggle in which the main incident was the German raid on Damascus. Though the overworked American adjective "terrific" has been clapped to the Indian troops serving in Syria, it is justly recognised that the Indian troops have made an important contribution to the restoration of British power in the Middle East. First in Africa and then in the Middle East serving Indian troops have assisted in repulsing the Axis and its tools. The actual terms of the armistice are not known but one may readily imagine that the present High Commissioner and General Verdillac will be replaced by representatives of General de Gaulle. Within a year of its establishment the Petain regime has seen the Empire broken more than once, and one may conclude from the plans of the Nazis that territorial demands will come from another quarter. Small satisfaction can be expected from any addition of the Walloon province of the Belgium Kingdom since they will not make good the loss of Alsace-Lorraine. The Nazis have hardly shown their hands yet but their inability to help in Syria strengthens the position of Vichy to some extent, because Vichy can show this failure and declare that colloboration has not yielded results while the detested Free French have risen in the world's estimation. That is but one aspect of the matter. The purely formal nature of the Turco-German pact has been demonstrated, for if Von Papen had any pull at Ankara Turkey should be a non-belligerent by now, not a neutral. Germany's Balkan scheme has miscarried in another way as the pincer move-

ment by way of Libya cannot be executed, even to give relief to Italy in East Africa, and the hopes of passing beyond the Black Sea have apparently ended with the abortive raids on Sebastopol.

Training for War Industries

The Sargent Committee's main recommendations have borne fruit. Technical training at selected centres began last August and the sixteen approved schools now offer extended facilities. An increase in the number of trainees to 15,000 men by the end of March 1942 is contemplated. These centres need special staff and therefore a hundred technical instructors are to be brought out from England. The Government has made the necessary arrangements and the imported instructors will, through contact with the teaching staff at the training centres, introduce the skill and special experience available in Britain. The imported instructors themselves are to have a short course to familiarise them with Indian conditions. The Central Government has undertaken responsibility for the cost of the training, and the salaries of the hundred instructors. Of the 15,000 men to be trained in war time as many as 7,000 will be fitters. Provision has been made for training 2,500 turners and 1,500 machinists. Electricians, blacksmiths, tin and coppersmiths as also welders, moulders and draughtsmen will be trained for the new jobs created in ordnance factories and elsewhere. At present about 6,000 men are under training in eight centres and 6,000 more will be absorbed in the 107 additional centres. The co-operation of private enterprise has made possible the rapid augmentation of skilled manpower. Local and native technicians come within the scope of the National Service Tribunals set up for each province. Additional supply of candidates for training is obtained through selection of likely candidates. A promise to take up such employment as is offered after training is given by each candidate but no promise of employment is given by Government. Stipends and fares are paid by Government which arranges also for the medical examination of candidates sent up by the technical recruiting officers.

The longest period of training at the training centres is one year only, but shorter intensive courses are given for enabling trainees to pass the standard trade tests. Existing workshops and institutions are being rapidly adapted to serve as training centres, and many firms have agreed to take no fee for training men needed not for their employment but for Government work. The Central Government pays Rs. 7 per head to meet the cost of additional equipment or instruction. It has been stated that the firms and workshops which are already well equipped and staffed offer double advantage to the Government since the grant-in-aid is not asked and the only service required is the inspection by the Regional Inspectors. Last month it was stated that the training centres and the National Service Tribunals were linked, and also that the ultimate decision as to the use of the trainees rests with the Tribunals. Additional classes for instructors in the engineering trade have been opened in the past six months; and it is only necessary to scan the details of the scheme described early this month to see that the demands on the existing trained man power are actually limited by the provision of the Government. It is realised that firms engaged on war work would suffer if their men changed over to Government employment, and the best way to meet the situation was to select and train new men quickly. The addition of 15,000 men to the existing body of skilled craftsmen may not have a determinant effect on wage standards but their demobilisation will raise a problem not only for the individuals concerned but for all those in permanent civilian employment.

Italy in Difficulties

The long tenure of the ministry of finance of Count Volpi induced many to think that the totalitarrian regime in Italy would retain its earlier triumphs and add to them. But in the last two years vast changes have taken place; and within a year of the war the finances had suffered as much as the Navy. The scarcity of raw materials including coal was not solved by the periodical pacts made with German delegations. The lack of ground defenses and air raid shelters in Italian towns is currently referred to in the complaints put about by the by the German towns. Germany was prepared for war. Italy was not, this view is expressed widely, more so in view of the failures in Libya and Greece. Germany has given help; but the three-fold expansion as compared with 1937 in Italy's exports carries with it a danger. She cannot attract tourists now; hence the steady rise in merchandise exports, of which the less pleasant aspect is the privation at home leading to demonstrations the Fascist regime. The export of artisans and agricultural labourers has been common since 1938 and the latest estimate of 300,000 workers in Germany, is no advantageous exchange for Italy, which is now in the grip of German officers and technicians, with the exception (of sulphur and mercury of which Spain can provide plenty) there are no war materials at Italy's disposal. One does not know about Albanian's oil except that the Royal Navy got well into the Adriatic and did a tidy job in April. Croatia may be an appanage of the house of Savoy but one may cast doubt on the material contributions of the assasins regime. Italy must then dree her weird—rather weird if one looks upon the tale of deficits since 1930. Mussolini made the lira look other currencies in the face but that did not produce revenue which suffered from the experiments in autarchy forced by the events of 1936. An average annual deficit of £140 million was hardly a favourable factor, and the net addition to Italy's national debt between 1936 and 1940 was of the order of £850 millions. The last year witnessed a deficit of about £65 millions for which nothing was done, and the war is said to have raised expenditure by 72.5 million lire that is to say by another £780 million nearly. If the cost of the war were added to the piled up deficits of the preceeding ten years, one knows how hard Italy has been hit. Trade with the Balkans will not compensate for the loss of the American market, and the devices adopted *a la Allemand* to deal with prices, the capital market and commodity stocks have revealed the sorry plight of Italy while proving fairly effective in a fashion. But Italy has only the funding agreement with Franco to fall back upon. Dividends of companies may be limited to 7 per cent and excess profits neatly skimmed off but the gap between revenue and expenditure widens. There is no rival borrower but the State has to pay five per cent as against the 7 per cent available on industrials. A new tax appeared and the yield on equities was forced down to 5.3 per cent. New war loans came out mainly because there is limit to short term borrowing. Germany, it is known, has controlled money and prices efficiently: the subjugated nations have paid, and paid dearly, for German victories but Italy has no victories to point to, and no subjects either to help to meet the cost of the war.

New uses for Shellac

Reference to the help given by the Indian Lac Research Institute to plastics manufacture and of mouldings has been made in a review of the last annual report. During the last six months the Institute has taken steps to establish the manufacture of shellac moulding powders on a firm basis by close contact with the existing bakelite firms directly and through a conference held in April. The question of making shellac powders for moulding is now being examined. Nitrocellulose lacquers with a shellac base have been well received and the success of experiments carried out to encourage the use of shellac in composite paints has been demonstrated by the acceptance of such new compounds for automobile finishing and other uses. The shellac compounds have struggled in recent years against nitrocellulose varnishes in the furniture and allied trades; and the emergence of satisfactory new compounds with a large admixture of shellac should help to increase the consumption of shellac. The high price of shellac at present will not retard its adaptation to various other uses. It is known that for paints and varnishes alike shellac remains an essential ingredient. Apart from the new type lacquers made with nitrocellulose there has been another opening for shellac. The distillation of kiri, a cheap by-product of shellac manufacture, has led to the evolving of baking varnishes useful for enamelling cycle frames and similar articles. Shellac has found application in textile manufactures for rubberised and oil-dressed fabrics require the addition of shellac. New composition switches, bottle caps, etc., made with shellac as an ingredient have been found satisfactory. Research work in London has reinforced the work carried on here for extending the uses of shellac. Further progress may be expected to follow the forthcoming meeting of the Lac Cess Committee in Calcutta.

Japanese Rumblings

The reported concentration of all Japanese shipping in the Pacific, on orders from the Government, has not satisfied those who were content to go by the official announcement that Japan was watching and waiting. The Japanese press reactions to the occupation of Iceland and the possible despatch of aid to Russia through the Far East may be generally regarded as a positive indication of unfriendliness. Associated with this, in point of time at any rate, are extensive changes in the Army command. Though the latter might be taken to mean disappointment with the performance of certain Generals in the field it is not difficult to connect it with such actions as the removal of a cargo of wolfram and undisguised opposition to the precautions adopted by authorities in the Philippines. The rather melancholy celebrations in connection with the fourth anniversary of the China Incident must have reminded Japan that the Monroe Doctrine for East Asia has failed to find acceptance except by the Axis. This may account for the new dictum that American aid to other countries (more particularly China) is a menace. Against this must be set the Chinese claim that China is fighting, for herself and for others too, against an aggressor and the avowed ally of aggressors. This view finds more backing than ever in the U.S.A. and Dr. Quo Tai Chi's trip along the Burma Road and his happiness over the decision to connect Burma by rail with Yunnan are necessarily more pleasing to those who do not regret the end of appeasement in the Far East than to Japan which might have thought that the pact of September would have made Britain weaken. There have been anxious reminders at Tokyo to the nation that economic mobilisation is not at an end and more belt-tightening is wanted

for a country that has been hit recently by heavy floods.

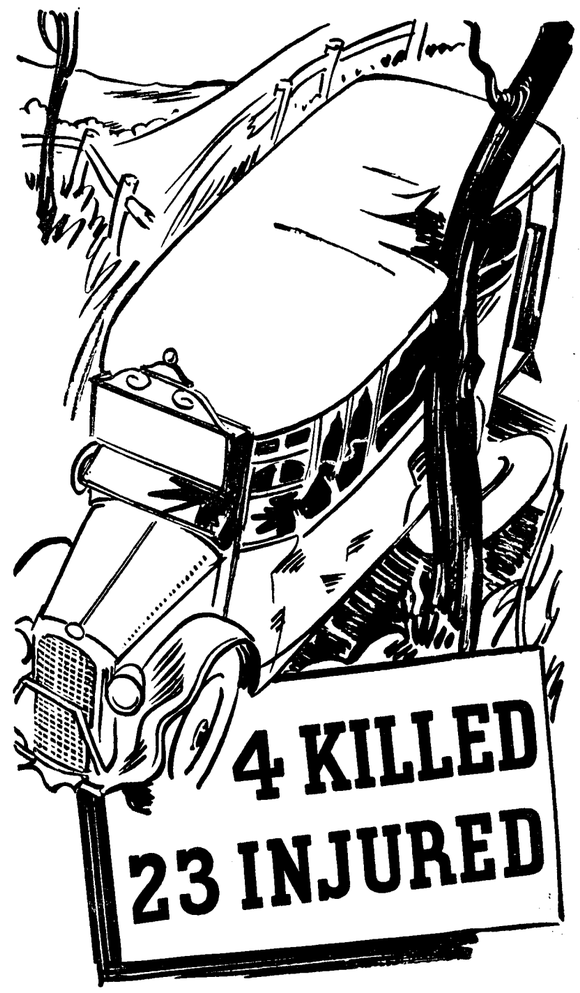
Though Japan's immediate intentions may remain obscure the concentration of troops in Hainan and South China implies a desire to force a decision against Chungking. Little has been heard of Wong's friends in Chungking and their eagerness to throw over the Communists with whom Marshal Chiang had quarrelled. It is no longer possible to treat China's internal differences as an advantage waiting to be exploited at Japan's convenience. Some months ago it would have been correct to say that the trouble with the Communists would be a source of annoyance to China, particularly after Moscow's neutrality pact with Japan. But it is no longer so as the trouble-makers are out, and Russia's war with the Axis has led to a reunited front in Chungking. If the repeated bombing of the British Embassy in Chungking is a sign of Japanese displeasure, nothing special will follow. The Dutch Indies too are on guard and the recent proposal in the People's Council or compulsory military service shows that the Governor-General is taking ample precautions. The end of the war is not in sight and 'the parallel policy in the Pacific' represents an immovable obstacle to Japan's ambitions. The special mission failed to coerce the authorities in Batavia and the enlarged buying of tin and rubber by the U.S.A. in the Far East will leave little for Japan. That is not likely to make Japan happier after her failure at Batavia. It is, however, difficult to connect such disappointments with any desire to take a sudden plunge on the Axis side. It may be that Japan had a hand in the trouble reported between Peru and Ecuador but the trouble may cease quickly as many mediators are at work. While Japan's professions of peaceful preparations belie her traditional bellicosity the violence of the ultra-Imperialist press suggests that Mr. Matsuoka is getting more important than the Premier at home. But all comment and inferences may be rendered incorrect by the intervention of the Throne which can and will be influenced by the Premier. A welter of rumours has followed the appearance this week of cables suggestive of a widening of the gulf between Japan and the Anglo-Saxon Powers whose ostentatious sympathy for China might be responsible for the unfriendly tone of the Japanese press. But the military preparations in Japan and China may have a more serious purpose and Vichy's failure in Syria may lead to another demonstration, for which the stage is set, in Indo-China.

Manure and Power Too

A new source of power is being sought in India. Mouldering heaps of village rubbish are expected to release gas to be used as power. Experiments in this connection are in progress at the Imperial Agricultural Research Institute in New Delhi. Fermentation is common enough wherever farm waste and litter are heaped up. The main idea is to discover if gas for power can be produced from heaps primarily intended for manure. Anacrobic fermentation is the method considered suitable for extracting gases that can be used for lighting, heat and power with suitable modifications. The other advantage offered by the methods of fermentation is that storage of farmyard manure will be more easy and convenient and manure-pits will not be a source of annoyance. In the last year, the Institute started experiments on this subject. Others by the latest annual report are in regard to gur manufacture. Activated carbon wanted for gur manufacture was produced in quantity at the Institute. This is expected to help makers of jaggery. Seed distribution, like the control of pests and diseases is among the routine functions discharged by the Institute, which examined soil surveys and soil maps, prepared under its auspices. The Institute was interested in animal husbandry and forwarded orders from several Colonies for pedigree cattle. It is known that humped cattle have been imported into Jamaica in the last century and the revival of interest is not hard to explain. The Kenya Veterinary Department sent an order for three young bulls and the inquiry from Costa Rica showed that Latin America is desirous of securing Indian stock for breeding. It is considered that the best types of milch cattle are sure to attract oversea buyers and the sales of superfluous young bulls will strengthen the Indian breeding industry.

Jupiter Insurance

It is widely realised that the handicaps of wartime limit the progress of Indian insurance companies. Where their older and stronger British rivals have felt the blast, it is only to be expected that Indian companies, denied protection at home, will experience difficulties. This explains adequately the very limited progress made in certain branches by that old and well-known office, the Jupiter General Insurance Company which reports at the same time improved business figures and larger funds in the marine and accident branches. The report presented at the recent annual meeting discloses that premium revenue in the fire branch amounted to Rs. 8.87 lakhs and the loss ratio was as low as 29.48 for the year. Total expenses took Rs. 3.95 lakhs equal to 44.52 percent of the year's premiums. The underwriting surplus accounts for a contribution of Rs. 1.59 lakhs to the profit and loss account. The setback in the fire branch is ascribed to the termination of business in the U. S. A. and the fall in the Fire Fund which stands at over 72 percent of the premiums is also explained.



It is not without interest to note that a considerable portion of both fire and marine business is obtained outside India. Total premiums in the marine branch amounted to Rs. 5.88 lakhs and total claims took only Rs. 1.06 lakhs equal to 18.03 percent of the year's premiums. The expense ratio in this branch has been successfully reduced to 22.29 percent. The sum of Rs. 2.07 lakhs has been transferred to the profit and loss account, and the Marine Fund has been considerably strengthened as it is up from Rs. 2.5 lakhs to Rs. 4 lakhs. By comparison, the business in the accident branch was indifferent. Premiums for the year are shown as Rs. 2,11,501-1-11. The interest on the accident fund provided Rs. 3,348-7-9 and after meeting the year's claims and expenses which absorb over 95 percent of the year's premiums, the sum of Rs. 11,258-8-1 is transferred to the profit and loss account. The Fund is left unchanged at Rs. 120,000. The Life department reports scarcely any improvement, but the position has certainly been consolidated as the total business in force exceeds Rs. 1 crore and the funds are on a strong basis. The revenue account shows premium receipts of Rs. 5.68 lakhs nearly, and investment income of Rs. 72,493-11-9. The new business for 1940 is returned at Rs. 20.86 lakhs. Claims took Rs. 3.33 lakhs and total expenses came to about Rs. 2 lakhs. The year's surplus has been reinforced by an appropriation from Investment Reserve and another from the profit and loss account and the result is reflected happily in the rise in the life fund from Rs. 19 lakhs to over Rs. 21 lakhs. There is a transfer of Rs. 1,31,200-15-10 from the profit and loss account which is also called upon to meet a special appropriation of Rs. 85,000 for taxation reserve out of the sum of Rs. 2,68,320-6-8 at credit of that account. The dividends on the ordinary and preference shares are maintained at 5 percent and 6½ percent free of tax respectively, and the carry-forward is Rs. 25,094-13-8. The changes in the Board and management deserve mention in view of the prospects outlined in the Directors' report. The company's age and standing should lead to a marked recovery this year, and this view finds support in the balance-sheet which shows that the investments are well-chosen and diversified. Cash balances total over Rs. 7.92 lakhs and the life branch's balance-sheet shows that over Rs. 8½ lakhs are in approved securities while policy loans amount to Rs. 2,52,278-. The absence of entries under mortgages and house property will presumably excite favourable comment as the company continues to retain fully liquid assets apart from the trifling investment in the subsidiary Kaiser-i-Hind Insurance company.

In spite of all that H. G. Wells has written about the world war, its havoc and its aftermath, people have not resigned themselvs to the idea of a paralysing chaos in the post war world. Politically, H. G. Wells himself started his famous, if somewhat fatuous, discourse on the Rights of Man. And I am sure, there are small groups of intellectuals in every country whose brain cells are almost bursting with thoughts of how to make this war the last war in history, how to foil the enemies of human freedom outside the ranks of the Nazis. Not all the horrors of modern warfare, nor the potentialities of this war for spreading over the whole world could prevent us from labouring hard at the blueprints of the world we want. The man who fell from the top of the skyscraper is said to have told the tenant in the second floor, as he was obeying the law of gravity: "When I come and tell you the story of my escape, you won't believe it." Optimism dies hard. Does not the old *Sloka* enjoin on us endless enterprise, as if we are immune from age and death, and immediate *dharma*, as if death were at the doorstep? It is all a practical implication of *karmayoga;* and we in India must give the world the lead in the matter of peering through the clouds banked heavily on the horizon into the sunshine beyond. Let Japan come into the fray, if she chooses; let the Battle of the Pacific be added to the Battle of the Atlantic and both overlap into the seas and bays of the Indian Ocean. But when peace comes, as come it must, we will not be found lacking in ideas of what to make of it.

Government and public are alike in this attitude. The former has appointed an inter-Departmental Committee, which, as I showed last week, is the parent body of other committees. The Federation of Indian Chambers, reputedly the counterpart of the Congress in the economic sphere, tries its hand at parallel government, of ideas, I mean. The Federation, I understand, is driven to this extremism of non-co-operation and direct action by the decision of the Government to keep its committees strictly official. There is, of course, the sop in the shape of a few non-official advisers. If the Federation acts in time to disable the aspirants to these positions from accepting the Government nominations, it would be well and good. But delay has its dangers. The Federation, I hear, is in a fighting mood. And it will carry on its investigations into post-war economic reconstruction independently.

There is every reason to welcome such action on the part of the Federation. For, as I showed, when I wrote last on this subject, the Departmental Committee is apt to look at the problem from a narrowly official viewpoint. And this was never so much at variance as now with the view which the people's representatives may take on questions of policy. The Federation has in the present condition of the country a dual capacity. It is the mouthpiece of the people, so far as the national economic aspirations are concerned. It is a federal organisation of all the chambers of commerce and industry within the country. It owes definite duties to its constituents, regarded not as geographical units, but as units composed of this industry and that. Both these capacities imply certain tasks for the Federation; and it is idle to expect that the Departmental Committee will fulfill its tasks with or without the co-operation of non-official elements. I am not sorry that the Government have decided to make the Committee a purely official one and have thus forced the Federation to conduct its own enquiry. An enquiry by the Federation must, in the nature of things, be different alike from that of the Departmental Committee and from that of, say, the National Planning Committee. For, the latter is bound to go off at a tangent and confuse the issue by an undue widening of the scope of the enquiry. The danger of such diffusion must be avoided if concrete results are to be obtained. Not that I am against treating post-war economic reconstruction as an opportunity for creating an economic structure with a broader base. But to let a premature obtrusion of such objectives is to prejudice the prospects of the enquiry. I shall therefore try, if only as a wholesome mental discipline, to put myself in the position of one of the bosses of the Federation and chalk out the lines of this enquiry from that standpoint.

As I have hinted more than once, "post-war economic reconstruction" is a term which can be stretched to include highly debatable questions of long term policy as well as giving to the interests which have profited by the war and which, for that reason, stand to lose by peace, an amount of help which they neither need nor deserve. If it is not to be narrowed down too severely to the mere liquidation of the Supply Department and the establishments created for meeting Government orders on account of the war, if, on the other hand, it is not to be widened to include radical alterations in the very structure of economic society or a thorough overhaul of production and distribution, the scope of the question has to be clearly defined at the start. The federation, I think, would be well advised to define the purpose of post-war economic reconstruction as, firstly, to reduce the impact of sudden and drastic changes in the economic situation, both at home and abroad, on the economic position and immediate prospects of the nation as a whole and of a large number of individuals and classes; and, secondly, to prevent these upsets from disorganising the national economy, neutralising such industrial and economic progress as will have been made during the war, and rendering the nation less unfit to realise its economic aspirations and aims. Whatever is germane to these two purposes must be understood to come within the scope of any plan for post-war economic reconstruction. It may be thought that fitness for future progress is more important than the elimination or mitigation of immediate suffering. The Federation may well even commit the error, if it puts emphasis on its representative character. But, if ultimate progress is to be rendered easy, undue hardships as a result of peace must be avoided. For, obviously, you cannot take another jump forward unless you have recovered and steadied yourself after the staggering impact of peace. If we are to make real progress, it is essential that the gains made during the war—I am not of course referring to what are called, war profits—should not prove to be temporary and illusory.

If the two purposes mentioned above are borne in mind, then there will be general agreement that for the purpose of study in advance the post-war economic problems are best regarded as falling into the following divisions: 1. Social problems; 2. Industrial problems; 3. Agricultural problems; 4. Problems of foreign trade 5. Technical problems concerning government and the management in each industry; 6. Problems of public finance, national currency and credit and foreign exchange; and 7. Problem of international co-operation.

The relative importance of these problems to the broad national interest must be clearly understood. Administrative problems have to be distinguished from broad questions of policy, and temporary expedients from the requirements of long-range policy. But the necessity of viewing all the various problems as but so many facets of one unitary problem should never be missed. From the practical point of view, the order in which these problems will have to be tackled, is of some importance. But it will naturally depend on their urgency which, again, depends on how and in what form each problem emerges from the chaotic conditions of the future.

It is of the highest importance that the Federation should set up the machinery for continuous study of the problems and for clarification of the issues while a similar effort is also being made under government auspices. In as much as the official committee is certain to concentrate its attention on matters which concern the government directly, the Federation may usefully give more of its attention to the broader economic problems concerning Indian industry and the national economy.

These problems have to be considered both from the national standpoint and the standpoint of the interests represented in th Federation. Bearing in mind that the order in which these problems actually emerge for solution may be different from the list I gave above, I will vary the order and deal with them. The technical problems of the Government and of the managements in each industry naturally come first. It is clear that the Government will carry out this task as a purely administrative matter. But the disposal of plant and machinery and stores acquired for war has its bearing on the working of industry. The Federation should aim at the preparation of an inventory of such goods and ensure that their members are fully appraised of its nature. In so far as such goods can help the inauguration of new productive effort, steps should be taken before hand to avail of such help. There is a similar problem in regard to skilled labour and technicians. An effort may be made by the Federation to prepare a census of technical labour now engaged in war effort and likely to be discharged on the declaration of peace. Under this head, I must say that it is of equal importance that the Federation should insist that research and other scientific organisations instituted during the war are not disbanded on peace. The question of transforming them so as to serve the permanent interests of national industry has to be considered from now in consultation with scientists like Sir S. S. Bhatnagar.

Next in the order, both logically and chronologically, come the social problems which must be divided broadly between those which impinge on larger questions of economic or trade policy and those which can be solved by administrative action. An instance of the former is the suffering that may be caused among a large class of industrial labour or large numbers of agricultural producers by changes in demand. An instance of the latter is the unemployment of government servants in war work, producers for supply of war orders (not munitions).

The latter can be met by adjustments in the capital programme of governments, public bodies and business corporations. A few years ago, the League of Nations pleaded for the formulation of public works programmes in advance, as a handy weapon with which to fight a cyclical depression when it comes. The work that is needed in this respect is of the same kind. If the Federation institutes an Economic Enquiry section, it can be directed to examine the projects that have been considered by the various authorities and correlate them for the purpose of studying their effect on post-war employment. This study may form the basis of further studies of great importance to the various industries comprised in the Federation.

As for the hardships among agricultural producers and industrial labour, they have to be studied as part of industrial and agricultural problems. But some provision for emergency relief has to be made. If reduction of production can bring relief, the machinery for effecting such reduction is to be thought out in advance.

Problems of Foreign Exchange are apt to become more pressing on the onset of peace. In the present position, it is difficult to form any idea of the kind of problems with which we may be faced. But the Federation can provide for a continuous study of the changes in prices and costs in India and as far as possible, abroad.

Agricultural and Industrial problems are inextricably linked with questions of foreign trade policy. But it is necessary to study them on different hypothesis. This is the sphere in which questions of policy, in the sense of matters in which the nation has to make up its mind and make clear its preferences instead of allowing the Government to confront it with a *fait accompli*, figure so largely. But economic questions are not matters for unrestricted choice for the nation. And the Federation particularly cannot afford to run after ideals that appeal to the people. For them, the test is immediate profits or profitability after a reasonably long time. I would suggest, therefore, that the Federation should direct an enquiry to be made into the increase in the consumption of industrial raw materials in indigenous industry and consider its future in reference to two different and equally likely contingencies (1) the feasibility of increased self-sufficiency and (2) the resumption of the old channels of exports in part if not wholly. In the former case, the possibilities of further utilisation in indigenous industry and the scope for increased consumption of industrial products must be appraised. In the case of cotton, the lines of this enquiry are well marked and must be carefully pursued. New uses for short staples and increased production of long staples must be provided for. In the latter case, of resumption of old channels of exports, provision has to be made for the offtake of more foreign goods, mostly of a competitive kind. That is more strictly, a problem of foreign trade. And what is more important, these questions are closely related to the schemes of national economic planning which India has to formulate and follow. I reserve these questions, of necessity, for examination in a later issue.

(From Our Correspondent)

Simla, July 15.

IT has not come as a surprise to any one conversant with the trend of official feeling that another year's extension has been given to the Central Legislature. For obvious reasons, the Government cannot contemplate the idea of a general election. The same view is bound to be taken of the Provincial Legislatures also, though in this case an amendment of the Government of India Act is necessary. No Provincial Government is understood to have raised any objection to an extension of the term of the Provincial Legislatures which is normally due to expire next year. This question is also causing some concern in certain political circles; for, as is well-known, both the Muslim League and the Hindu Sabha have been asking for a general election. In official circles there does not appear to be any enthusiasm for the idea of having non-official Advisers in the non-Ministry provinces, for they apparently feel that, while neither administratively nor politically do they stand to gain by experimenting with non-official Advisers, especially after the sad experience which they have had of interim Ministries, there is every danger of further complications with important political bodies like the Muslim League and the Hindu Sabha. They seem to be so completely satisfied with the Adviser regime that there is no disposition to think of any big change.

* * *

Speculation on these lines has been proceeding in Simla, though it remains to be seen how far it is borne out by the actual announcement. There have been several members of the Central Legislature in Simla this week for the meeting of the Emigration Committee and other business. It is clear from their talk that they are far from satisfied with these meagre proposals which do not come up to the demands of the Bombay Conference. The Congress scheme of a National Government envisaged a complete transfer of power to a Cabinet of Indian representatives who commanded the confidence of the elected members to the Viceroy's discretion but it also insisted that though the Cabinet may be technically responsible to the Viceroy, it should by its character and composition be responsive not only to the legislature but to the bulk of Indian opinion. The complaint is that expansion of the Council on the lines proposed does not fulfil this expectation. Even more important is the complaint that the European members who are still to be retained will have all the vital portfolios in their hands—Finance, Home, Defence and even Communications. It is particularly asked why at least the Finance portfolIio should not be transferred to an Indian nonofficial, as admittedly the Provincial Finance Ministers have been a conspicuous success.

A two day meeting of the Standing Emigration Committee concluded to-day after examining the draft Indo-Burma Agreement and the correspondence which has passed between the Government of Ceylon and the Government of India. There are undoubtedly features in the Indo-Burma Agreement which have not given complete satisfaction, but these are regarded as purely minor compared to the importance of having a friendly agreement between the two countries in the interests of the large Indian community in Burma. The labours of Sir Girja Shankar Bajpai have been greatly appreciated, for it is due to his skill and tactfulness that an agreement which in essential respects is consistent with the rights and claims of the Indian community has been secured. Those resident Indians who have been in Burma for at least seven years in the aggregate during the last ten years will be free to go to India and return without any restrictions. This removes any undesirable results due to the ambiguity in the Government of Burma Act according to which any Indian coming to India from Burma even for a short visit and desiring to return to Burma is liable to be treated as a new immigrant. It is understood that the further emigration of unskilled labour to Burma is to be prohibited except as may be arranged between the two Governments. This prohibition need not be regretted, for if Burma is made to feel the importance of Indian labour in the interests of her own development, it would undoubtedly improve Burma's attitude towards this country. As regards skilled labour and others a system of passports on payment of fees ranging between 5 Rs. and 20 Rs. generally has been agreed upon. As the fees have to be paid by the employers importing skilled workers from India it is not expected to affect adversely the workers themselves. It has been revealed that this agreement has generally been accepted as fair by representatives of the Indian community in Burma. Its future depends on the spirit in which it is worked, and particularly on the relations which develop between the Indian community and others in Burma.

* * *

The members of the Standing Emigration Committe are reported to have agreed with the Government of India that the invitation from the Government of Ceylon should be accepted. There seems to be some ground for believing that recent events, particularly the successful couclusion of the Indo-Burma agreement, have brought about a change in the attitude of the Ceylon Ministers. It is difficult to say whether in the actual talks they will show themselves sufficiently responsive to the Indian case, but taking all circumstances into consideration it has been considered advisable to accept the Ceylon Government's invitation. As Sir G. S. Bajpai has important engagements this month, particularly the I.M.S. Recruitment Conference and the meeting of the Governing Body of the Imperial Council of Agricultural Research, he will not be able to leave India before the beginning of August. As soon as he returns from Ceylon, he will be free to proceed to America to take up the High Commissionership which he is reported to have already accepted. The task in Ceylon is bound to be even more difficult than the Indo-Burma negotiations, but there is reason to think that Sir Girja Shanker will be able to make a success of this mission also and make a present of another important agreement before he lays down office.

* * *

It is understood that the Government of India have made an application to the Governing Body of the International Sugar Convention for permission to export Indian Sugar. The permission is likely to be granted, but it is not yet known what exactly will be the quantity which will be allowed for export this year. Last year permission was obtained for exporting 2,00,000 tons of Indian sugar, but owing to price and shipping difficulties, the proposal had to be abandoned. It is hoped that at least this year these difficulties will be successfully surmounted. According to reports from Australia, the problem of surplus sugar is facing that country also, but the Government of the Australian Commonwealth has only recently adopted a big plan for the manufacture of power alcohol from surplus sugar, molasses and other products to augment its petrol supply.

* * *

One important decision taken at last week's meeting of the Transport Advisory Council was that Provincial Governments individually or in association in convenient groups should consider the establishment of Boards of Transport consisting of the representatives of the Governments concerned, Railways and Transport authorities for effecting coordination in the distribution and use of existing facilities.

Bombay, July 16.

IF cotton market tremors and interruptions to railway traffic have loomed large this week too, one must be reconciled to the inevitable. The Far Eastern medley had come to exert great influence on the cotton market even before the last weekend. The maintenance of New York prices following the first Bureau forecast revealing the smallest area recorded under cotton in that country has not operated to restore confidence in Bombay. It has been reported that the U.S. acreage is just around 25 million. In 1933 the area was over 40 million acres and the success of the Roosevelt programme can be measured by the steady decline in acreage. The yield per acre has during this period shown increase, but this year's weather and pest damage lies behind the belief that cotton will not go down. It is now assumed that the progress of the crop, as measured by the monthly Bureau reports will influence prices continuously. It is argued that prices must stay up, and with the New York spot quotation over 16 cents per lb. the 1929 price level has certainly been passed. There is no longer much concern over the price ceiling controversy. Mr. Leon Henderson's views may not determine the views of Mr. Jesse Jones who is sure to be sympathetic to the Southern farmer. It is urged that cloth prices will be controlled by the Price Boss, but that cotton will not be touched. The U.S. Treasury has in the past paid for farm relief, there may be a feeling now that the textile manufacturer should pay a little more. The recent advance in price suggests that Congress is averse to the taxation of 15 cents as the maximum for 15/16 in staple.

The steady demand for spot cotton in Bombay suggests that Bombay follows New York in one respect. But as regards futures the irregularity suggests that Japanese demand or its cessation will be the biggest factor. It is feared that if war comes to the Far East the price of cotton may slump by 50 rupees per bale. The professional dealer is reluctant to take an optimistic view in spite of the anticipated increase in mill consumption. But there has been considerable buying of late by Japanese houses, and it is feared that locally pessimism has been overdone. It is, however, believed that damage to the 1942 crop cannot be large and the Oomra crop is expected to be more or less normal.

There has been little to remind the busy man that Sir Chimanlal Setalvad is still a politician. One knew that he depreciated the Easter conference, but it is now alone learnt that he is a supporter of Mr. Munshi. With such a formidable advocate, Mr. Munshi can disregard his own critics in the Congress. Sir Chimanlal in defending Mr. Munshi has attacked Congress for its inconsistency, but he has not let off Mr. Munshi either. He fears that Mr. Munshi in his fear of the riots in certain cities has overlooked the fact that the dictators are a bigger danger to India. Mr. Munshi is advised to work for communal unity instead of trying to start any new movement of his own which will exacerbate Muslims. Sir Chimanlal unfortunately has chosen to arraign the Congress Ministers and has said same harsh things about the high Command. He has repeated the charge that Muslims were not given a square deal by the Congress Ministries and has added that Mr. Munshi as Minister was most intolerant of opposition. This means that Mr. Munshi is not likely to welcome the support of the Liberal Knight. The most surprising conclusion to which the latter works up is that democracy is a failure in India and is unsuited to Indian conditions. Composite cabinets appear to be the remedy, and Mr. Munshi has been asked to work for a rapprochment between the two major communities.

The only political event of note is the local conference organised by municipal employees when Dr. Ambedkar described the nature and causes of the awakening among the depressed classes. He told the meeting at the Cowasji Jehangir Hall that ten years ago the scheduled castes had no leadership, no consciousness and were neglected by both Government and Congress. He declared that within ten years a great change had taken place because the scheduled castes had combined and organised. He asked the municipal workers to strengthen their union and improve their conditions of life membership in the Union had risen from 800 to 5,000 and the union had obtained substantial benefits for the workers. Dr. Ambedkar asked the municipal menials to get registered as voters because political power was essential for the uplift of their caste. Certain grievances were referred to and a plea for housing facilities was made by Mr. D. V. Pradhan.

A report issued recently by the Industries Department describes the possibilities of establishing the pottery industry in Bombay. It is known that there is a good demand for both glazed and unglazed ware. It is urged that either as a cottage industry or a large scale enterprise pottery is likely to pay handsomely. It is pointed out that every village has a potter and there are at least 58,000 persons making earthen vessels. But organised manufacture is rare and Bombay is said to import over 21¼ lakhs worth of pottery in a year. The local pottery does not come outside the village market and the present value of imports indicates the vast scope for pottery. The Government's special officer has stated that several places offer facilities. Small industrial units can thrive if run without excessive expenditure. It has been noted that cheap red glazed ware can be produced in Bassein. There is a large demand for teapots, milk jugs and other vessels. Mangalore tiles can also be made of local clays in various places according to the report which states that the Panch Mahals District is suited for the manufacture of fire-bricks, pickle jars, mortars and pestles, small pots etc. Several spots in the Belgium district are suited for the manufacture of red glazed ware and Honavar in the Kanara District is recommended for the production of china clay. It is added that in Ratnagiri the red clay of Jalgaon can be adopted to the production of cheap glazed ware and for roofing tiles. As regards white glazed ware the essential china clay is lacking, but the expert investigator believes that a large scale enterprise can carry on with imported china clay.

In view of the monsoon breakdown Bombay exhibits great faith in the pleas for coordination of transport made by the Transport Advisory Council. The delegates who went to Simla last week were impressed by the need for coordination and improvement. It is not enough to know that the railways will restore normal running soon. The shortage of provisions has rightly excited alarm and if press notes have not poured out it is recalled that the I.R.T.D.A. raised the question. M. Noel Paton drew attention quite early to the need for encouraging road transport in wartime. The Transport Advisory Council's view that interprovincial motor transport should be encouraged by association of provincial representatives with a new Board finds support in the recommendations of the I.R.T.D.A. which urged that the motor transport interest should not be neglected. Complaints as regards local bodies' control of roads were echoed at the meeting last week but that calls for another form of intervention in the interests of road transport. Purmatic tyres for animal-drawn vehicles should be made the subject of fresh experiments according to a resolution adopted, last week. Amendments to the Motor Vehicles Act were suggested and the draft of the Highway Code was also considered at the meeting last week.

What is being done to-day in Cyprus, a former Turkish possession, was described by Sir Stephen Murphy formerly a judge of the Bombay High Court. Sir Stephen has spent four years in the island which is the British base in the Levant. He told an interviewer that many German Jews had taken refuge there as a man with £20 only could get down if his passport was in order. There were also a lot of Italian fugitives in addition to Germans who came *via* Italy until Italy joined the war. When Italy entered the war, Jews could not hope to get into Cyprus. Cyprus and its maidens have been often praised but the mules and muleteers have not lacked eulogists. Sir Stephen Murphy said that mules and muleteers from Cyprus had done much in the Libyan campaign. Rifle regiments too had been raised, and Greeks and Turks alike showed their loyalty to the British cause. He declared that air raids would not do much harm to the few towns. There could not be much danger in the hills, and the islanders were not at all rattled by the advance of the Nazis into the Balkans.

ing Trade Bank established in 1930. The National Bank held over 70 million kronur and the only feature calling for notice is the mortgage department kept by the National Bank of Iceland. The monetary unit is the krona which since 1925 has been taken to be less than a shilling in value. The exchange value of the krona has fluctuated, not because of the adverse balance of trade, but through the island's limited resources and a population of just over 100,000. Iceland has a national debt of which the bulk was held outside, but the State held substantial assets, mainly because it had no army or navy. Root crops and hay supplement codfishing and the catches of the herring fleet. One may assume that Britain must have displaced Denmark in the import trade of Iceland but Spain used to be the biggest buyer of Iceland's exports which included hides and skins, tallow, fish-oil etc. and Britain came only second.

It may be mentioned that in April, 1939 the Icelandic currency was devalued by 22 per cent and the rate of exchange was fixed at 27 kronur to the pound, after which the National Government of the ex-Premier Hermann Jonasson came in. In September 1939 a law was passed to the effect that if the dollar-sterling rate fell below 4.15 the value of the krona was to be adjusted to the dollar. This certainly implies that Iceland is at present outside the sterling area and as trade as small there is not likely to be any payment agreement. Mention must be made also of the Icelandic Government's gold reserve of 2.8 million kronur for a note issue of barely 14 million kronur at the end of 1939.

The stolidity of the exchange market in the face of developments in Japan may well call for comment. The yen has been certainly firm for Banks ask Rs. 81½ for 100 yen by T.T. or D.D. and buying T.T. at Rs. 77½ Banks are buyers of 60 days' sight bills at Rs. 76½ per 100 yen and this will suggest that financial circles in India knew that Prince Konoye was sure to come back. This deprives one of any chance of talking about what would happen to the Japanese currency (for which the gold backing has been drastically reduced more than four years ago) should Japan get mixed up in a war on the wrong side and the yen is cut off from both dollar and sterling. The rate in London for T.T. on Kobe stands at 14 to 14½ d. per yen and there is no likelihood of any change in this rate though Japanese bonds may be sold by nervous investors.

A notification under the Defence of India rules restricts certain financial dealings. Payments outside the sterling area or other transactions by means of a bill of exchange or promissory note or acknowledgment of debt by anyone within the sterling area to anyone outside are subject to certain restrictions. Exemptions may be granted by the Reserve Bank of India in certain cases. Infringement of the rule is made punishable by a maximum term of five years' imprisonment or with fine or both. Another new rule issued under the Defence regulations provides for the grant of permission by the Reserve Bank for payment to persons outside the sterling area through a blocked account. This is the first mention in India of the blocked account, but one must guess that the Reserve Bank is merely acting for the Bank of England as local agent. The sterling area as defined in the latest order excludes Canada, Newfoundland and Hong-Kong as also protectorates and protected states in addition to certain territories that may be included by notification. The order applies to all residents who have been in British India since September 3rd 1939 within the sterling area, except where the Reserve Bank makes an exception.

NO. 2. TIN MAKING

The Kerosene tin plays many important roles in India. After serving as the principal receptacle for Kerosene, it is used again and again for a multitude of purposes.

Burmah-Shell manufacture their own Kerosene tins. A daily output of 80,000 four gallon tins and 7,500 one gallon tins is average and thousands of tons of Indian-made tinplate are used annually. The tins made by Burmah-Shell are well-known throughout India for their strength and non-rusting qualities.

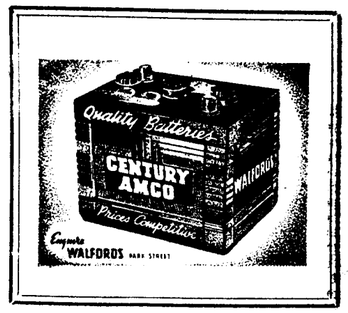
Jute and Jute Manufactures

(From Our Correspondent)

Calcutta, July 17.

THE Jute trade has been favoured with two statements by Govt. in the last week. The first, issued almost simultaneously with the Consolidated Forecast statement, purported to be an explanation of that document, though in good sooth it leaves us little wiser than before. The statement opens by admitting that the old system of estimating the acreage under jute was open to criticism and that the new "recorded" figures confirmed that previously estimates were too low. This is partially true, as estimates in the past have almost invariably been proved by outturn to have been underestimates. But last year it was generally accepted by the trade that the Director had made the best shot at it for many years past, and every indication, as the season has proceeded, points to the Direector's estimate having been pretty near the mark though still a little on the low side. The "recorded" figure propounded by Govt. however suggests that the Director's estimate was no less that 33 per cent. short, and we are asked to accept this "recorded" figure as the only authoritative one. With all due respect, we prefer to back the Director's estimate as having been nearer the mark than the "recorded" figure. The old system of estimating may have had its shortcomings, but how many of the "recorders" had the remotest claim to qualification as land surveyors which alone would invest them with competence to conduct and check a field-to-field survey? Govt. proceeds to claim that the effective area from which jute was actually harvested was less than the "recorded" area. This is perhaps an endeavour to explain away the difficulty that arises from the fact that the "recorded" acreage, divided into the estimated out-turn in bales from Bengal, gives a yield of less than 2.2 bales per acres. Now though there may be doubts about acreage, yield is a matter which can be definitely checked by sampling, and the accepted yields for 100% out-turn vary in the different sections of Bengal from 3.2 to 3.7 bales per acre. These estimates of yield have never been seriously contested by the trade. According to the area of the difierent sections, the average 100% yield for Bengal is as near as may be 3.6 bales per acre. Last year crop may not have been a full 100% one, but it was well grown with comparatively little damage. But the "record" asks us to believe that the yield was only 2.2 bales per acre, or little more than 60% of a full crop. This is in the face of known facts to say the least of it.

Government then takes great exception to the suggestion that the "licensed" acreage is arrived at by dividing the "recorded" acreage by 3, though the Consolidated Forecast statement said that this was so. No, Govt. explains, the licensed acreage was obtained by totalling the area in each district for which licenses were issued. A very subtle and delicate distinction. For it seems to us that if licenses were issued in all cases for one third of the area recorded, then the total of such licenses would amount to exactly one third of the total recorded acreage. We do not claim to understand Einstein, but that seems clear enough to us. Government is emphatic on the point that the acreage actually sown is not greater than the acreage licensed, though they admit that the checking is not yet complete. We regret we are still numbered amongs those of little faith.



About the only definite point which emerges from the lengthy explanation is that some 7,000 acres irrevocably damaged by the cyclone in Backerganj district have already been excluded from the figures.

The second statement was from the Chief Minister, in which he deplored the recent decline in the price of jute by Rs. 15. Apparently he had viewed with equanimity the previous rise in the price of Fatka—not, let it be emphasised, of Jute—by more than Rs. 25 without any adequate reason except the exploitation of speculators. It would appear that these gentlemen are benefactors when they are Bulling the market and only become "exploiters" when Bearing it. Actually, as a result of this Fatka ramp, the market still stands about Rs. 10 per bale higher than it did a couple of months ago and cultivators look like getting very full prices for their crop, even if the market falls still further. For the lower standards of the grades, which it is to be the earnest endeavour of the trade to maintain this season, must be taken into consideration when making any comparison of prices. The Premier also mentioned the proposed tax on Raw Jute. This commodity will soon be rivalling petrol as everybody's goose, and we should like to see the principles of the Bill much more clearly defined before the collection of the Tax commences. What is consistently ignored is that the price factor is the paramount one in world demand for jute and jute goods, and every added burden is a club handed to substitute fibres wherewith to beat that demand out of existence.

A pointer in this direction is provided in the American consumption figures for the month of June, which while being 20 lakhs yards better than last month and the same as June last year, make definitely disappointing showing when the sharp upward curve in trade generally in U. S. A. is considered. Reports from the other side confirm that the high level of price of jute fabrics is checking consumption. Consumption for the first six months of the year is 33.50 crores yards as compared with 30.30 for the same period last year. Stocks at the end of June were 22.10 crores compared with 29.40 crores a year ago.

Total Mill production in June was down to 88,446 tons compared with 93,830 tons in May, due to fewer working days. Mill total production during the season ended 30th June indicates a consumption of 55 lakhs bales of jute during that period.

Some dissatisfaction has been caused in the Export Jute market by preference being given in freight allotments to old unshipped 1940 contracts overriding the quota agreement. The market has not been active but has fluctuated a good deal in sympathy with Fatka. Rs. 50/8 was paid for shipment Firsts, an unduly high rate unless Godown delivery option was included. Mills have purchased moderate quantities of Firsts from Rs. 52/- down to Rs. 50/- and up to Rs. 52/- again. The Satta for Mill Firsts is around Rs. 10/- below Fatka, while shipment Satta is from Rs. 12/- to Rs. 13/-. New Crop is scarcely mentioned yet except nominally at Rs. 5/- under Fatka for Aug./Sept. shipment. Fatka has ruled rather erratic, from Rs. 62/- up to Rs. 63/4, down to Rs. 58/12, back to over Rs. 66/- and closing at Rs. 63/8.

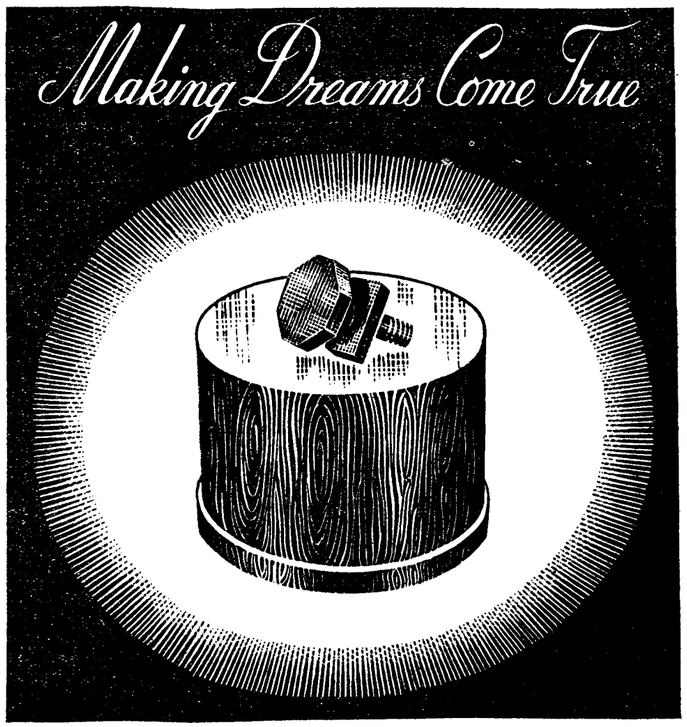
JUTE

Calcutta, July 17.

There is always something brewing in the jute market. There was a strong rally yesterday after a relapse, and the past week has witnessed just those changes which support the charge that the market is both votatile and misleading. The position is more than ever confusing on account of the paucity of transactions, but one may mention here that interest in new crop has broadened and the old agreement with the mills as regards minima is likely to be the main sustaining factor. There has been a rise of 4 annas per maund in quotations so that all may say that the asking prices in the case of new crop are around the statutory levels. One may link this recovery with the Press note on the acreage returns. The press note issued last Saturday said nothing about the disturbing effects of the acreage estimates on prices but sought to show that the licensed area is based on last year's recorded area and also that no attempt should be made to connect last year's forecast with this year's estimate because the Act of 1940 has made a big difference. The press note is an answer to the critics who said that the forecast was funny because of its three columns and also complained that 50 per cent restriction would mean a big rise in supplies. That the figures depressed the futures market has been plain enough from the pleas made in the press for the prompt intervention of the Ministry. Intervention has come through a Prime Ministerial statement first in the form of advice to growers and breathing all sorts of penalties for those in an imaginary conspiracy to push down jute prices. It is clear that the Premier will have none of the seasonal decline seen when the crop comes into the market. It is noteworthy that the new sales tax with an estimated yield of Rs. 50 lakhs is recommended by the Premier as a weapon designed to help the jute grower. It is an answer to those businessmen who say that the tax is not proper or well-conceived. That is beside the point, so far as the Premier is concerned and it is not far-fetched to attribute the rapid rise in Futures on Wednesday to the Bengal Premier's statement. It looked as if Futures would not go above Rs. 60 this month. There has been a spirited rally to make most observers eat their own words. The speedy improvement must also be put down to the continued rise in hessian prices after the resumption of buying last week. There was a decline early in this week but the recovery since has been quick and strong. Without any broadening of interest the difference between new crop and old crop has narrowed. But mills which have an order on hand for 30 million sandbags do not show any interest in loose jute.

JUTE MANUFACTURES



Calcutta, July 17.

The hessian market continues to attract speculators. The warbag order of 30 millions came in time to restore confidence, and the rise in the share market was communicated immediately to the hessian market last Friday. Reports of the 'cease fire' orders in Syria stimulated enthusiasm and the hours decision too had pleased the mills. It is not surprising to find that rates have gone up rapidly in the last few days, but regressive influences are again likely to prevail owing to the uncertain outlook in the Far East. Today's news must restrain any further rise. The absence of any desire to sell has driven up rates. Actually trade demand is dormant, and it is only a firmly held faith in the report that shipping space will be made available for hessian shipments, that makes one cling to the view that prices will keep up. While raw jute has gone up to Rs. 64-12 for September delivery there is not likely to be any big change in the hessian market. But today's rise in 9 porters to Rs. 19/13 from Wednesday's closing price of Rs. 19/12 conveys a clear warning against excessive optimism. The danger of following up the rise must be borne home to the sellers who decline to let the bears of last week cover. It will not be surprising if the hessian market comes back to Saturday's levels with quotations of Rs. 18/14 for Nine Porters and Rs. 24 Eleven Porters. The rise in Heavy Goods will however stand and the steadiness that has characterised the hessian market at a time when the jute market has been unsettled supports such a view at present. There is however one feature to which attention may be drawn. The difference between rates for future delivery and spot goods shows that interest converges on July delivery and also that a fall in raw jute prices is anticipated. With mills showing little or no interest in raw jute, and export demand virtually absent in spite of the reported scarcity of raw jute in Dundee, there is not much good in hoping for a quick rise in hessian. There is, however, the chief Minister's statement on jute prices. Indeed the rise on Wednesday would suggest that speculators are guided entirely by the Ministerial assurance. It has been reported that business in ready goods and for August delivery took place at the advance. The dullness in raw jute where prices asked on Wednesday were 8 annas below the new familiar minima of Rs. 12, 10 and 8 for Tops Middles and Bottoms has not hampered dealings in hessian. The rise in Heavy goods has been more or less independent. B. Twills were quoted at Rs. 38 on consecutive days for July shipment and Cornsacks at Rs. 38/4 show a rise on the week. Liverpool Twills are quoting Rs. 41/12. There is not much business passing today, but a rise in Eleven Porters attests prevailing steadiness in one section. Small speculative buying of Eleven Porters has been noticed again as 9 Porters are up to Rs. 19/13 and 11 Porters to Rs. 24/14, but rates have come down again.

COTTON

Calcutta, July 17.

The cotton market has had its own quota of fluctuations. Profit-taking has pulled futures down on more than one day and Calcutta buying has been more than once countered by Bombay selling. The ultimate course of prices in Bombay is still far from settled. Crop news has been meagre but there is a belief that monsoon damage to the Broach crop has been exaggerated. Buying was noticed on Tuesday when the steadiness of spot was reflected in the futures market. A considerable rise in Broach April/May since then is due largely to the bull element which pins faith to New York. Profit-taking supervened as on Monday and the close was dull. The previously existing difference between April and July contracts has apparently widened, and in spite of unsettling news from Tokyo the cotton market has moved up on Thursday after the setback reported on Wednesday. The major trend is still upwards but the obscurity of Japan's intentions must always act as a restraining factor. The important point to note is that a bear position exists, for covering at the advance has been reported more than once. The steadiness of the seeds market at the higher levels, noticed since the end of last week, has led to an extension of support. The firmness of New Orleans and New York is based on the first Burueau report which envisages a crop below 11 million bales. The steady advance in American markets can have no bearing as it may encourage straddle selling. But such dealings are not at all likely in view of exchange control. There is also the firmness of the share market to sustain the bulls who can use their gains to square up their own position. The market was firm and active on Monday and it is described as steady today. What happened towards the end of last week when prices had risen may recur but that is a small risk even when outside buyers are numerous. Even if the interest of option dealers is large the danger of a reaction after the rise is not necessarily greater. But with the revival of acute apprehensions concerning Japan's attitude to the war there is not much likelihood of a further rise. Stagnation would anyhow be preferred to a decline and the rise of 10 rupees in the Broach April/May contract over the past week suggests that the gain is important enough to be retained. Over a week the market has given indications of strength but political uncertainties must hamper any future advance.

Modest bolts and nuts of steel, translate ambitious blue prints into imposing edifices.

Discreetly imbedded at vital points, these steel pigmies create giants of industry.

ALWAYS—EVERYWHERE—STEEL FOR STRENGTH

ISSUED BY THE TATA IRON & STEEL CO., LTD. HEAD SALES OFFICE : 102A, CLIVE STREET, CALCUTTA.

T. N. 1738

PIECEGOODS

Calcutta, July 18.

The further advance in cotton prices despite successive fluctuations is likely to keep the piecegoods market on a very even keel. Irregularity occasionally noticed in the cotton market and talk of price control in the United States are not likely to influence the goods market because it is considered certain that any aggression in the Far East will help the Indian mill industry. Rumours still play a great part and the dislocation of communications in the western province has been to some extent a depressing feature. The fluctuations in Calcutta have had no parallel in Bombay where the steadiness of prices is an impressive feature. The changes in Tokyo are likely to leave a decisive impression on both yarn and goods for the time being. Speculative ativity is likely to be gingered up by such rumours as tenl to pull cotton prices down. It is certain that forward trade will soon became brisk. The strikes in Cawnpore are again an important factor in the piecegoods market. Any reduction in supply is likely to send up prices. The early termination of the strike in Cawnpore may not upset the advance anticipated at present. It has been reported from Bombay that the quotations for the standard lines have been raised again though mofussil demand has not broadened. Clearances are still limited but more interest has been latterly displayed in printed and fancy goods. The prevailing firmness of Japanese goods has been favourable to local goods. The extreme scarcity for English piecegoods has driven prices up again. The yarn market remains steady though dull. On the yarn exchange prices have recovered quickly from the setback referred to last week.

GOLD

Calcutta, July 18.

The flatness of the gold market on most days has been obvious enough. The lack of buying support at the most trifling advance has been even more pronounced than the absence of selling pressure. Fluctuations have necessarily been narrow when dealings have been colourless. And only stray enquiry has been reported during this track even after the revival of speculation concerning Japan's warlike tension. The rise on Friday last has evidently not held, for prices receded quickly on Saturday. On Monday the rate for ready gold improved to Rs. 42/4 per tola which is the highest reported this week. The difference as between ready and settlement rates continue to be trifling, and the reduced premium for soverings in Bombay reflect scanty interest so far shown in billion. Gold prices in Calcutta have evidently receded when compare with the last week and the current quotations are a few annas lower than the Bombay rates. But the rate for soverieigns is still higher than the Bombay rate.

SILVER

Calcutta, July 19.

The very slight fall in the London price for silver last Thursday has rad no great effect on the Bombay silver market. The utter stagnation of the New York market is much more important than the identity of forward and ready prices in London. The extremely limited demand for such silver as has been offered by producers has been refered to in the daily cables and this may go towards explaining the minute fall by ⅛th of a penny. During the week as a whole the down trend in the silver market was obvious enough. Ready silver in Bombay was maintained at Rs. 63/- for hundred tolas and a very slight rise in prices for settlement has been reported only to-day. The reduction in local prices for silver has not contributed to any increase in dealings. The daily offtake has fallen and outside demand in spite of the rumours that arises is not likely to emerge very quickly. The feature that necessarily will claim interest is a small rise in the Bombay quotation for both July and Augst settlement. One can see the effect of rumours as also the influence of the cotton and other markets in to-day's quotations for silver in a dull but steady market.

WHEAT

Calcutta, July 17.

There has been little or no change in the general condition of wheat markets in India. The conference in Washington as regards the disposal of the world's wheat supplies, presumably after the war, can have little influence on current prices which must be strongly affected by the shipping position. The recent ban on rice exports from Arakan must have a decisive influence on grain prices in general so that it may be said that comparisons between imports and exports at the major ports are unimportant as compared with the steady demand reported for flour both in Karachi and Calcutta. Prices in the Punjab market, and also at Hapur, have been firmly held. The Calcutta price is virtually unchanged at Rs. 4/9 per maund, and the September position is quoted slightly lower on the past week at Rs. 4/12/3. Prices in Karachi indicate that the undertone was firm. Choice White Ready is quoting 31/13 per candy and September is higher at Rs. 32/7. The strength of the gram market and the continued demand for flour are favourable factors as before. The prevailing nervousness, which led in the recent past to extensive buying for stock, may help to maintain prices. In Chicago and London prices have moved downwards very slightly owing to news in Europe. But Karachi shows an advance on the last week.

EASTERN GROUP-SLEEPER CONTROL

Tender No. 1/42-43.

Sealed tenders are invited and will be opened at 3 p.m. (Calcutta time) on the 25th August 1941 for the supply of the following standard track sawn first class sal sleepers. Full particulars may be obtained from the undersigned on payment of Rs. 5/- (Rupees five) (being the cost of tender documents) to the Chief Auditor, B. N.Railway House, Kidderpore whose receipt for the amount must be produced before such documents can be issued. This sum will not be refunded.

	Nos.
Broad Gauge (9′×10″×5″)	10,00,000
Metre Gauge (6′×8″×4½″)	7,49,000
Narrow Gauge (5′×7″×4½″)	1,81,000
Light Narrow Gauge (5′×6″×4″)	30,000

Sleeper Control Officer,
C. F. GILBERT,
Eastern Group.

Stock Markets to-day and to-morrow

MARKETS STEADIER DESPITE RUMOURS

The impression, recorded here a week ago, that market sentiment had changed for the better has been strengthened during the present week. Markets are still sensitive to political events and rumours which have discouraged speculative quarters. And this was made evident yesterday by the way in which a promising rally in the local market was nipped in the bud by the news of the resignation of the Japanese Cabinet and the demands made by Japan on Vichy to surrender naval and other bases in Indo-China. The tendency, however, in almost every section has been upward though the movements of prices have been irregular and within narrow limits. Before any appreciable recovery can take place a further stimulus will obviously be required, and the Calcutta market, therefore, remains for the present in a state of uncertainty.

* * *

The commodity markets generally showed signs of returning confidence this week and some raw materials such as jute, cotton, and steel attracted speculative buying. With a few exceptions, which were subject to special influences, most prices advanced, and the gains too, compared with the preceeding week, are generally rather higher. Jute shares are the main centre of present attraction in the local market. There has been good enquiry for Anglo-India, Kamarhatty, Kanknarrah and India. Among the 10/- rupee shares there have been numerous buyers for Howrah, Adamjee, Agarpara and Birla. Cotton mill shares have been in good favour because of the huge Government orders coupled with the export demand. Stimulated by hopes of cotton mills earning substantial profits and the growing possibility of Japan being involved in the war there has been a sudden spurt in these shares. It should not, however, be forgotten that when Japan is involved in the Russo-German conflict, war will be nearer India. There should, therefore, be selective buying in cotton mill shares. Broadly speaking, Steel shares must enjoy a better war equity than mill shares. Looking to the present working of the Tata Iron & Steel Company, Limited the profits for the current year are expected to be substantially higher than in the previous year. Steel shares are admittedly attractive even at the current prices.

* * *

The general decline in the earnings of five jute companies under the management of Andrew Yule & Company, Limited for the half-year ended 31st May, 1941 has not affected to any extent the distribution to shareholders. The dividends in the case of all the companies, given under, have been maintained at the levels of the previous half-year. The aggregate profit of the five companies is Rs. 15,13,005 as compared with Rs. 23,97,804 in the previous half-year. It has been found necessary to allocate a sum of Rs. 3,48,877 as the provision for E. P. T., Income-tax and Super-tax, the amount provided in the previous half-year being as much as Rs. 11,25,000. The total amount on account of ordinary dividends is Rs. 6,27,660. It is satisfactory to note that the amount distributed is 41.48 percent of the total earnings even when there is a decline in total earnings of 58.5 percent.

Lothian	1,80,954	2,68,162
Orient	2,80,954	5,68,952
Total ..	15,13,005	23,97,804

DIVIDEND PER SHARE

(*Half-year ended*)

	31-5-1941	30-11-1940.
Caledonian	12½	12½
Cheviot	6	6
Delta	15	15
Lothian	6	6
Orient	6	6

The hessian market has been active during the last few days owing to the release of shipping space. But this improvement can help only in the future. Jute mills are reporting a slight decline in profits for the past half-year owing to the generally difficult trading conditions. The prospects for the current half-year are distinctly encouraging and it would not be difficult to maintain dividends.

* * *

The slight decline in the earnings of the *India Paper Pulp Company, Limited* for the half-year ended 31st March, 1941 is not at all surprising. But it is noteworthy that the sales position continues to be satisfactory. The small increase in the selling prices of qualties of paper manufactured by the mill was not, however, quiet sufficient to offset higher costs which were mainly due to the increasing prices of imported stores and chemicals.

The net profit, before providing for taxation and depreciation, is Rs. 4,21,752 as against Rs. 4,45,434 in the previous half-year. The amount set aside to depreciation and to provision for taxation stand at the same figures of the last half-year of Rs. 1,25,000 and Rs. 1,50,000 respectively. A sum of Rs. 25,000 (same) has also been transferred to Reserve. The dividend is maintained at Rs. 3½ per share. The amount carried forward is slightly higher at Rs. 85,564 against Rs. 68,812 brought in. There has been a sustained demand for the papers manufactured by the company and selling prices have been raised. The shares at the present price of around Rs. 148 are distinctly attractive, the yield on the shares working out to more than 4.7 percent, tax free. A sound industrial with a moderate and stable yield has great attractions at all times.

* * *

The Bombay Suburban Electric Supply Limited has continued to make satisfactory progress. The earnings for the year ended 31st March, 1941 stand around the same level as in recent years. The improvement in the net profit would perhaps have been more pronounced but for the severe cyclone experienced in Bombay in the month of October last which caused serious damage in the area served by the company. The net profit for the year is Rs. 3,63,045 as against Rs. 3,63,748 in the previous year. A sum of Rs. 1,42,160 against Rs. 1,41,748 has been set aside to depreciation, while Rs. 5,000 against Rs. 20,000 has been written off promotion expenditure. The provision for taxation is Rs. 57,451 against Rs. 40,904, while the appropriation to Workmen's Compensation Reserve is unchanged at Rs. 600. The final dividend of Rs. 4 per share makes, with the interim dividend of Rs. 3 per share already paid, Rs. 7 per share for the whole year. Owing to the restriction imposed on lighting in connection with Air Raid Precautions there is every likelihood that earnings for the current year may show a small decline.

* * *

An increase of 3 percent from 6 percent to 9 percent for the year ended 31st March, 1941 has been announced by the *Great Eastern Hotel, Limited*. The net profit for the year under report shows an increase of Rs. 92,607 over the figure for the previous year at Rs. 3,09,206. The allocation to funds including depreciation is higher at Rs. 1,41,716 against Rs. 1,12,284 while the provision for Taxation is at Rs. 62,000 against Rs. 42,000. The amount carried forward is Rs. 10,526 against Rs. 7,409.

'WATCH-DOG.'

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, July 18.

The local Stock Exchange remains in a constructive mood and every small decline in quotations is tempting buyers. During the last three days there have been a slight rally in prices following the news of the Anglo-Russian Pact, the Syrian Armistice Convention and the American occupation of Iceland. Today, however, prices are a shade easier on receipt of the news that Japan is pressing Vichy to surrender naval and other bases in Indo-China. At present, however, operators are adopting a cautious attitude pending developments in the war situation.

Sellers are very scarce for all Government issues with business difficult to put through. The price of 3½ per cent Paper remains unchanged at Rs. 96. Among other loans, 3 per cent Paper met with business at Rs. 82-7 s.l.; 3 per cent 1963/65 at Rs. 95-1-6; 3½ per cent 1947/50 at Rs. 103-2; 4 per cent 1960/70 at Rs. 110 and 5 per cent 1945/55 at Rs. 111-11.

Conditions in the money market remain unchanged and the average rate of accepted tenders is one pie less at annas thirteen and pies eight per cent per annum as compared with annas thirteen and pies nine per cent per annum.

Preference Shares met with good business. For Jute shares there has been a strong enquiry, *Gourepore* being done at Rs. 152; *Hastings* at Rs. 137-8; *Hukumchand* at Rs. 140; *Rameshwar* at Rs. 12-14; *Lansdowne* at Rs. 137 and *Reliance* at Rs. 180. Cotton shares attracted little attention, *Kesoram* being crossed at Rs. 140. *New Victoria* were done higher at Rs. 6-5. In the Engineering section, *Kumardhubi* were a feature, the price gradually improving to close at Rs. 140. *Steel Corporation* showed no change at Rs. 119-8. In the Miscellaneous section, *Rohtas Industries* were done at Rs. 154; *Orient Paper* old preferences at Rs. 108 c.d.; *Alkali & Chemical* at Rs. 122 and *Dalmia Cement* at Rs. 117. There were buyers of *Purtabpore Sugar* at Rs. 16-12; *Cawnpore* at Rs. 175 and *South Behar Sugar* at Rs. 156 c.d.

There is little change in Port Trust and Municipal issues. 5 per cent 1946 *Calcutta Port Trust* were transacted at Rs. 108-12 and 5½ per cent 1950 *Calcutta Municipal* at Rs. 117-4. The demand for Industrial debentures remains unabated. 5¼ per cent *Rohtas Industries* met with good enquiry and closed at Rs. 104-8; 5½ per cent *Dalmia Cement* at Rs. 104-8 and 5 per cent *Star Paper* at Rs. 104-8. 4½ per cent *Lansdowne Jute* came to business at Rs. 107-8.

There have been good buyers of Railway shares, *Mayurbhanj* being done at Rs. 76; *Shahdara (Delhi) Saharanpur* at Rs. 165; *Delhri Rohtas* at Rs. 10-12; *Katakhal-Lala Bazar* at Rs. 95 and *Baraset-Basirhat* at Rs. 42.

Among Bank shares, *Central Bank* were higher at Rs. 46 and *Imperial Bank* fully paids at Rs. 1,608. *Reserve Bank* met with business at Rs. 103-8.

Cotton shares were fairly active and prices in some cases have been marked up in spite of the news of the strike in some of the mills at Cawnpore. *Dunbar* were an active counter. The price, after opening at Rs. 230 on Monday, gradually improved to Rs. 241-8, but closed at the time of writing around Rs. 233. *Cawnpore* fetched Rs. 8-3; *New Victoria* up to Rs. 3-3; *Elgin* Rs. 23-6 and *Kesoram* Rs. 6-15. *Bengal Nagpur* closed at Rs. 16-8 after touching a low of Rs. 16.

Coal shares showed no material change in prices as business in this section continues to be dull. *Amalgamated* were done at Rs. 24-4; *Bengal* at Rs. 354 x.d.; *Burrakur* at Rs. 13-4; *Dhemo Main* at Rs. 13-2; *Talcher* at Rs. 1-10 and *West Jamuria* at Rs. 29. *Bhalgora*, however, showed some improvement to finish around Rs. 5-3. *Deoli* were done up to Rs. 10-13, the closing price being Rs. 10-10.

In sympathy with the rise in hessian prices, Jute shares have been in good demand and prices in all shares have advanced. The interest has again been concentrated on such shares as Anglo-India, India, Adamjee, Agarpara, Howrah, Nuddea and Megna. *Howrah* touched at one time Rs. 54-14, but at the time of writing the price quoted at Rs. 53-12. *Anglo-India* closed at Rs. 354; *India* at Rs. 353; *Adamjee* at Rs. 27-2; *Agarpara* at Rs. 30-12; *Megna* at Rs. 46; *Kamarhatty* at Rs. 515 and *Kanknarrah* at Rs. 424. Among the lower-priced shares, *Craig* were done at Rs. 2-3; *Presidency* at Rs. 5-7 and *Waverley* at Rs. 3-12.

Tea shares continued to meet with selective buying. *Bishnauth* were quoted around Rs. 26-4 s.l.; *Hantapara* at Rs. 382; *Hattikhira* at Rs. 19-12; *Huldibari* at Rs. 21-4; *Loobah* at Rs. 4-14; *New Samanbagh* at Rs. 24; *Tezpore* at Rs. 8-2 and *Tukvar* at Rs. 11-10 x.d.

There was a fair offtake in Sugar shares. *Carew* met with good turnover and the rate closed higher at Rs. 11-5. Among others, *Cawnpore* changed hands at Rs. 19-8; *Champarun* at Rs. 15-12; *New Savan* at Rs. 9-6; *Raza* at Rs. 18-4 and *Ramnugger Cane* at Rs. 9-8.

Among Public Utilities, *Bareilly* were higher at Rs. 12-14; *Benares* at Rs. 14-8 and *Mirzapur* at Rs. 4-10. *Patna*, however, were lower at Rs. 17 as against Rs. 17-10 in the previous week. *Upper Ganges* remained unchanged at Rs. 12-2.

In the Engineering section, *Indian Iron*, after opening at Rs. 32, touched Rs. 32-12 in mid-week, but closed at Rs. 32-2. *Steel Corporation* after touching a level of Rs. 20-6, closed at Rs. 19-15. *Burn & Co.* improved to Rs. 403-8 and *Hukumchand Steel* to Rs. 14-9. *Indian Galvanizing* met with business at Rs. 29-5; *Arthur Butler* at Rs. 12; *Kumardhubi* at Rs. 4-7; *Britannia Engineering* at Rs. 10-6; *Saran* at Rs. 6-2 and *National Iron* at Rs. 9-4. *Indian Standard Wagon* had buyers at Rs. 64-8 and *Indian Steel Wire Products* at Rs. 55.

In the Miscellaneous section, Paper shares continued to meet with steady demand, *Orient Paper* closing higher at Rs. 13-9. *India Pulp* were done at Rs. 148. This Company has maintained the dividend at Rs. 3½ per share for the half-year ended 31st March, 1941. *Mysore Paper* were Rs. 15-6; *Titaghur Paper* ordinaries at Rs. 18-10 and the preferred ordinaries at Rs. 5-10. Mining shares showed no change, *Burma Corporation* changing hands at Rs. 4-9; *Indian Copper* at Rs. 2-4; *Consolidated Tin* at Rs. 2-13 and *Tavoy Tin* at Re. 1. *Dalmia Cement* were better at Rs. 13 and *Alkali and Chemical* at Rs. 18-2. *Bararee Coke* continued to be a good feature, being done higher at Rs. 24-1. *B. I. C.* were Rs. 4-9; *British Ceylon Corporation* Rs. 4; *Dunlop Rubber* Rs. 41; *Indian Cable* Rs. 23-4 and *Indian Rubber Manufacturers* Rs. 29-8. *Rohtas Industries* met with some buying, being done at Rs. 22-4. *Calcutta Steam* were a shade easier at Rs. 195, showing a drop of Rs. 5 over the previous level. *Midnapore Zemindary* were quoted at Rs. 72 and *Britannia Biscuit* at Rs. 10-6.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, July 17.

Money.—Call money continued to be quoted at ¼ per cent.

Exchange Market.—Banks were selling T.T. at 1s. 5 15/16d. and buying three months' bills at 1s. 6 7/32d.

Securities.—The securities market ruled steady throughout the week under report and the turnover was as usual restricted. 3½ per cent Paper hovered around Rs. 96. 1948/52 changed hands at Rs. 97-12; 1951/54 at Rs. 99-14; 1963/65 at Rs. 95-1; 1947/50 at Rs. 103; 1960/70 at Rs. 109-14; 1955/60 at Rs. 113-8; 1945/55 at Rs. 111-10 and 3 per cent 1946 *Defence Bonds* at Rs. 101-15.

Shares.—The local share market was fairly steady throughout the week with moderate buying. The Anglo-Russian Pact had an encouraging effect and prices, after opening firm on Monday, gradually improved. There was a general improvement in the sentiment and the upward trend continued to be in evidence on Tuesday. But, on Wednesday, prices slightly declined on some profit-taking as sellers predominated. Towards the close of the week, however, a steady tone prevailed again and prices firmed up on active and impressive buying. Steel and Textile shares showed a good rise in prices. The sentiment continues to be more bullish than otherwise.

Textiles.—Cotton mill shares maintained their strength with prices closing slightly above those prevailing a week ago. *Bombay Dyeing*, after opening at Rs. 1,167-8, touched Rs. 1,166 in mid-week, but closed higher at Rs. 1,180. *Century*, *Central India* and *Simplex* were active counters, being done higher at Rs. 451; Rs. 254 and Rs. 143 respectively. *Colaba* closed higher at Rs. 198-8; *Gokak* at Rs. 234-8; *Kohinoor* at Rs. 463 and *Swadeshi* at Rs. 340. *Ahmedabad Advance* were higher at Rs. 307-8; *Sholapur* at Rs. 3,250 and *Vishnu* at Rs. 1,337-8. Even *Tata Mills* have moved up to Rs. 20.

Hydro-electrics.—There was continued investment enquiry in *Tata Power* with a very few sellers in evidence. The rate closed at Rs. 1,660. There was little change in prices of other shares, *Andhra Valley* being done at Rs. 1,670 and *Tata Hydro* at Rs. 181-8. *Ajmer Electric* came to business at Rs. 12-4 and *Bombay Suburban Electric at* Rs. 175-10.

Steels.—The declaration of handsome dividends by the *Tata Iron & Steel Company, Limited* was a source of very great satisfaction to the market and business during the week was on a somewhat larger scale. *Tata* ordinaries opened on Monday at Rs. 393-8 and deferreds at Rs. 2,078-12. On Tuesday, the deferreds improved to Rs. 2,080, while the ordinaries were done at Rs. 393. From Wednesday onwards prices registered a gradual improvement, the deferreds closing higher at Rs. 2,095. The ordinaries, however, showed a little variation to close better at Rs. 394-8. The first preferences were transacted at Rs. 221-14 and the second preferences at Rs. 155-12.

Banks & Insurance.—*Central Bank* were done at Rs. 45-10; *Imperial Bank* fully paids at Rs. 1,583-12; *Contributories* at Rs. 390; *Bank of India* at Rs. 146-8 and *Reserve Bank* at Rs. 106-12.

In the Insurance section, *New India Assurance* were a shade easier at Rs. 45-8 owing to some profit-taking.

Miscellaneous.—*Associated Cement* met with continued enquiry on rumours that this year's dividend may be higher. *Bombay Burma Trading* fluctuated between Rs. 520-4 and Rs. 508-12, the closing rate being Rs. 516-4. The news from the Far East, which was disquieting, was mainly responsible for preventing the shares in the general upward trend of the market. *Belapur Sugar* were dealt in at Rs. 223; *Bombay Trams* at Rs. 132-8; *Bombay Telephone* at Rs. 85-8; *Shivrajpur Syndicate* at Rs. 31-12 and *Premier Construction* at Rs. 96. *Scindia Steam* were slightly higher at Rs. 21-10, while *Wimco* were nominally quoted at Rs. 192. *Indian Iron* changed hands at Rs. 32-4 and *Alcock* at Rs. 562-8.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, July 17.

Active conditions were witnessed in the local market during the week under report. Cotton mill shares recorded further gains. Rubber shares met with substantial buying, while Tea shares were in good demand with prices touching higher levels.

Securities: Government securities have shown a firmer tendency although the volume of business in the local market remains restricted. 3½ per cent Paper ruled steady at Rs. 96. Among dated loans, 3 per cent 1963/65 came to business at Rs. 95/3 and 3½ per cent 1949/52 rupee counterpart at Rs. 102/9. The market for Provincial Loans is very firm with scrip in short supply. State Loans showed small change in prices.

Mills: *Buckingham & Carnatic* met with good buyers during the week and the price has shown a rise of about 12 points to close at Rs. 260. Bearing in mind that the Company has been the receipient of very large order from the Government, the shares even at the current price afford good scope for capital appreciation. *Mettur Industries*, on the announcement of a dividend of 9 per cent, recorded a sharp to Rs. 185 c.d.c.r., and the Company, it is reported, are offering shares to existing shareholders in the ratio of 7 new shares of Rs. 110 each for every 8 shares held. The shares still look rising. *Madura* were slightly higher at Rs. 38/8 and *Vasanta* at Rs. 126/4.

Utilities: *South Madras Electric* ordinaries were a firm market at Rs. 13/6. *Cochin State* Power were taken at Rs. 8/12.

Plantations: Rubber shares met with good buying, *Cochin Malabar* being done further higher at Rs. 8/2 c.d. *Thirumbadi* remained unchanged at Rs. 1/13 c.d. *Kalpetta* changed hands at Rs. 20 and *Malankara* at Rs. 36/8. Tea shares met with good investment support and prices recorded sharp gains. *Chembra* were marked up to Rs. 3/13. *Periakaramalai* have advanced to Rs. 18/4 and *Peermade* to Rs. 29. The directors of the *Highland Produce Company, Limited* have issued a circular to the shareholders announcing their intention to issue 20,000 shares of Rs. 10 each at a premium of Rs. 15 per share with a view to finance the purchase of the Karimkulam Tea Estate at a cost of Rs. 5 lakhs. The rights to existing shareholders are only open until the close of the 18th July, in the meantime the market for the old shares has dropped down to Rs. 27 sellers.

Sugars: *Mysore Sugar* were unchanged at Rs. 53. *Travancore Sugars* had buyers at Rs. 13/12 with possible sellers at Rs. 14. *Deccan Sugar* big shares were crossed at Rs. 175.

Miscellaneous: *Mysore Chemicals* were in good demand at Rs. 17/10. It is rumoured that the Company is going to submit its accounts for 9 months ended 30th June, 1941 very shortly and the several quarters estimate that the dividend will be annas twelve per share. *Mysore Paper* were done Rs. 14/12. This Company, it is also rumoured, is likely to pay a dividend of 5 per cent after making a substantial allocation to depreciation. *Andhra Cement* came to business at Rs. 77; *Mettur Chemicals* at Rs. 10/2 and *Mysore Stoneware Pipes* at Rs. 7/14.

LONDON STOCK EXCHANGE

So slight is the decline in the quotations for giltedged in London that one might well say that the market is impervious to rumours. The fractional fall in the Funds cannot be associated with the anxious speculation concerning Japan's intention, reflected again in the pressure to sell Japanese bonds. The actual change over a week is most obvious in the case of old Consols, now standing at 82, but the decline in 3½ per cent Indian stock has scarcely been taken note of in Indian markets. The recession in certain leading Home Industries is of a different order for falls in *Ikeys* and *Levor* certainly point to the spread of pessimism in an unexpected manner. The outstanding firmness of oil shares which have risen further during the week must naturally claim attention though quotations have shaded off except in the case of *Mexican Eagle* and *Royal Dutch* which is up to £18½ despite the tremors in the Far East.

The reactionary tendency in Home Rails has reflected the swift growth of bearish sentiment. While London Transport stocks are unchanged on the week the fall in *Brums* and *G. W.* ordinary is quite pronounced. While the Anglo-Soviet pact helped to restore tone after the week-end the irregular tendency noticed in mid-week must be put down to fears of a desperate move in the Far East. A mild rise in tea shares, which began unnoticed, has apparently petered out, and the rise in gold mining shares can hardly be measured, as the only Indian share stands at 18/9 for each 10 shilling share. The revival of interest in the 'jungle' issues must not be put down to the company meetings this year or to the extension of investment interest, mainly because of the identity between South African and West African taxation of mining companies but Cape support specially to the mining finance issues might have increased. In spite of the Far Eastern medley interest in tin and rubber shares has extended, and it may be pointed out that in Calcutta there has been in recent weeks quite a revival in *Consolidated Tin*. The maintenance of the interim on H. & S. bank shares on the London register at £2½ per share did not prevent a decline in the price to £80. The revival of Provincial buying of textile and brewery issues has been referred to recently and rubber shares too have been well held this week with quotations tending upwards. *Anglo-Dutch* (£1) stock is up to 16/3 and Rubber Trust (£1) is quoting 27/6.

The best features of the week have been the relative firmness of gilts and the support given to select industrials. *Ford Motor* is definitely over par and tobacco issues reflect increasing firmness. The irregularity noticed elsewhere should disappear on the receipt of good news, since it has been quite plain this year that resistive power is now much greater than anticipated.

NEW YORK STOCK EXCHANGE

The main feature is not the firm opening or the hesitancy developed during dealings, but the irregular price trend on Wall Street not unusual after an advance. The market leaders have lost ground apparently on a revised estimate of industrial prospects under higher taxation. The quotation for the 10-dollar shares of *G.M.C.* has receded to 39 and the repeated falls in *U. S. Steel* Common show that quarterly earnings do not make difference on Wall Street. The recession may be temporary, but the regular working of diastole and systole proves that Wall Street is averse to any continuous rise until the political and business situation are clearer. *U. S. Steel* has dropped to $57⅜ after touching a summer high of 59¼ last week. Daily turnover remains restricted and the rival attractions of the commodity markets have evidently retarded any extension of interest. The market has been variously called steady, dull and irregular, but the latest indications are that the changes in Japan will influence a quick recovery on Wall Street. The biggest fall has been in *Anaconda Copper* now $28¼ and *International Nickel* has declined in sympathy with other mining issues. It must be stated that Wall Street, if not subject to quick changes of moods, has lost its former sensitivity as the pressure of investible funds has no bearing on the stock market.

THE NEW MANBHOOM COAL CO., LTD.

NOTICE.

A Dividend at the rate of 30% per annum for the half year ended 31st March 1941, has been declared payable at once.

OCTAVIUS STEEL & CO., LTD.
Managing Agents.
Calcutta, 11th July 1941.

Kunchunpore:—(16th) 15 C.T.
Moheema (Ord.):—(16th) 12-8.
Sapoi:—(16th) 11.
Singell:—(11th) 70, 71.
Sonai River:—(14th) 16-12, 17.
Tezpore:—(10th) 7-8, 7-10; (11th) 7-4, (7-12 s.l.) 7-6, 7-10, 7-14, 7-8, 7-12, 8; (14th) 7-12, 8; (15th) 7-8 s.l., 7-14, 8; (16th) 7-12, 8, 7-14, 8-2.
Tezpore (Pref.):—(11th) 13-12.
Tirrihannah:—(10th) 3-12.
Tongani:—(15th) 4-11, 4-12, 4-12, 4-14.
Tukvar:—(11th) 12-4 c.d.; (16th) 11-10 x.d.

SUGARS :
Badrampore:—(11th) 7-6, 7-10, 7-12, 8; (14th) 6-12 s.l. 7-4; (15th) 7-8 s.l., 7-14, 8, 8-4, 7-15, 8-3; (16th) 8-1, 7-15, 8-2.
Buland:—(10th) 17-4; (11th) 17-6, 17-10; (15th) 17-8.
Carew & Co.:—(11th) 10, 10-2, 10-6, 10-3, 10-7, 10-1, 10-5; (12th) 10-2, 10-6, 10-7; (14th) 10-4, 10-6, 10-7, 10-11, (10-6, 10-9 s.ls.) 10-14, 11-2, 10-12, 11; (15th) 10-12, 11, (10-12 s.l.) 10-13, 11-1, 11-2, 11-4; (16th) 11-4, 11-1, 11-5, 10-14, 11, 10-15, 11-5.
Carew & Co. (Pref.):—(10th) 121-8 s.l.; (11th) 121, 122; (12th) 122.
Cawnpore (Pref.):—(11th) 175, 176; (16th) 175.
Champarun:—(10th) 15, 15-2, 15-6; (11th) 15-2, 15-6, 15-4, 15-8; (12th) 15-4; (14th) 15-4, 15-5, 15-9; (15th) 15-6, 15-8, 15-12; (16th) 15-12, 16, 15-9.
Dyer Meakin Brewery:—(16th) 7, 7-4, 6-15.
Murree Brewery:—(10th) 14, 14-4; (14th) 14; (15th) 14, 14-8.
New Savan:—(10th) 9-4, 9-8, 9-12, 9-6, 9-10; (11th) 9, 9-4, 9-6, 9-10; (14th) 9-5, 9-9, 9-2, 9-8; (15th) 9-4, 9-8, 9-2, 9-6; (16th) 9-4, 9-8, (9-10 s.l.), 9-7.
Purtabpore:—(14th) 6-8; (15th) 7-4, 7-6.
Purtabpore:—(Pref.):—(16th) 16-8, 16-12.
Ramnugger Cane & Sugar:—(10th) 8-8; (16th) 9-8.
Ramnugger Cane & Sugar (Pref.):—(16th) 125.
Raza:—(11th) 17-14, 18-2, 17-12; (15th) 18; (16th) 18, 18-4.
Samastipore:—(10th) 8-6, 8-8, 8-9; (11th) 8-4, 8-6, 8-10, 8-12, 8-13; (12th) 8-9, 8-10; (14th) 8-7, 8-11; (15th) 8-11, 8-12; (16th) 8-9, 8-8.
Shree Sitaram:—(11th) 8-8.
South Behar (Pref.):—(10th) 155; (15th) 156 c.d.
Shree Krishna Gyanodaya:—(14th) 11-14, 12-2.

PAPER MILLS :
India Paper Pulp:—(16th) 148.
Mysore:—(10th) 14-12; (14th) 14-13, 15-1,; (15th) 14-14; (16th) 14-15, 15-3.
Orient:—(10th 12-5 c.d., (11th) 22-8 s.l., 12-5; (12th) 12-11, 12-7; (14th) 12-8, 12-12, 13-1 c.d.; (15th 13-2, 13-6, 13-4, 13-5, 13-14, 13-8, 13-12, 13-13 (14 s.l.), 13-4 c.d.; (16th) 13-2, 13-8, 13-5, 13-9, 13-3 c.d.
Orient (Old Pref.):—(10th) 108 c.d.; (14th) 107-8, 108-10 c.d.; (16th) 108 c.d.
Shree Gopal:—(10th) 11-3, 11-7; (11th) 11-4, 11-8; (14th) 11-6, 11-10, 11-8, 11-5; (16th) 11-10, 11-11 11-12, 12-2, 12, 12-4, 12-5, 12-7.
Star:—(10th) 10-12, 11, x.d.; (14th) 11; (15th) 11-2 s.l., 10-12, 10-14, 11-2; (16th) 10-14, 11-2, 11, 11-6, 11-5.
Titaghur Paper (Pref.):—(10th) 5-4, 5-8 x.d.; (11th) 5-5; (12th) 5-4 s.l., 5-8; (16th) 5-10.
Titaghur Paper (ord.):—(10th) 18-2, 18-6, 18-7, 18-1 x.d.; (11th) 18 s.o.l., 18-3, 18-2, 10-4, 18-8; (12th) 18-8 s.l., 18-3, 18-7, 18-2 (14th) 18-4, 18-2, 18-6, 18-10; (15th) 18-5, 18-6, 18-10, 18-4; (16th) 18-4, 18-6, 18-10.
Titaghur (1st Pref.):—(10th) 197 x.d., s.o.l. (14th) 8-8.
Titaghur:—(2nd Pref.):—(15th) 116.

ENGINEERINGS :
Arthur Butler:—(11th) 11-8, 11-12; (16th) 12, C.T.
Britannia Building & Iron:—(11th) 8-4, 8-8; (14th) 8-8.
Britannia Engineering:—(11th) 10-6, 10-8 c.d.; (16th) 10-8 s.l., x.d., 10-4, x.d.
Braithwaite & Co.:—(10th) 9-4 C.T.; (15th) 9-6 C.T. 9-4, 9-8.
Burn & Co.:—(10th) 396-8; (11th) 397, 398, 400, 402; (12th) 402-8; (14th) 398-8 s.l. 403 (402, 404 s.ls.); (15th) 403, 402; (16th) 40218 s.l. 402, 403.
Hukumchand Steel (Defd):—(15th) 2-4, 2-3; (16th) 2-5, 2-7, 2-9.
Hukumchand Steel (Ord.):—(15th) 12-12; (11th) 13-2, 13-4, 13-3; (12th) 13-13; (14th) 13-12, 14, 14-1, (14 14-2 s.ls.); (15th) 14-2, 14-4, 14-6, 14-10; (16th) 14-4, 14-8, 14-6.
Indian Galvanizing:—(12th) 29-9; (14th) 29-2, 29-4, 29-8; (15th) 29-4.
Indian Iron & Steel:—(10th) 31-12, 31-13, 31-14, 32-2, 31-15, 32-3, 31-14; (11th) 32-3, 32-7, 32-4, 32-8, 32-1, 32-5, 32-9, 32-7; (12th) 32-3, 32-2, 32-6, 31-15, 32-4, 32; (14th) 32, 32-4, 32-8, 31-15, 32-3, 32-7, 32-11, 32-8; (15th) 32-8, 32-10, 32-7, 32-4; (16th) 32-8, 32-12, 32-5, 32-9, 32-4, 32-6.
Indian Malleable Castings (Ord.):—(15th) 7-8, 7-12.
Indian Steel & Wire Products:—(10th) 55-8; (14th) 55; (10th) 55-10, 55.
Indian Steel and Wire Products (Pref.):—(15th) 36-12.
Indian Steel & Wire Products (Defd.):—(10th) 36-8; (14th) 36-6, 36-10; (16th) 37-4 s.l.
Indian Steel & Wire Products (Conty.):—(11th) 8-6.
Kumardhubi Engineering:—(15th) 4-4, 4-6, 4-3, 4-5; (16th) 4-4, 4-5.
Kumardhubi Engineering (Pref.):—(16th) 134, 136, 137, (135 s.l.).
Marshalls:—(10th) 1-15, 2-1; (11th) 2-1; (12th) 2; (14th) 2-2; (15th) 2-1, 2-2; (16th) 2.
National Iron & Steel:—(12th) 8-10, 8-14; (14th) 8-12, 9 C.T. 9-1; (15th) 9-7; (16th) 9-3, 9-7.
Saran Engineering:—(16th) 6-2.
Steel Corporation (Ord.):—(10th) 19-12, 19-13, 19-14, 19-15; (11th) 20-2, 20-3, 20-7, 20-1, (20, s.o.l.), 20-5, 20, 20-4, 20-7, 20-11, 20-3, 20-7, 20-4; (12th) 20-2, 20, 20-5, 19-14, 20-15, 20-3, 20; (14th) 20, 20-4, 20-1, 19-15, (20-3, 20-7, s.ls.), 20-2, 20-6, 20-5, 20-2; (15th) 20-3, 20-4, 20-5, 20-9, 20-8, 20-2; (16th) 20-2, 20-6 (20-1, 20-5) 20-2.
Steel Corporation (Pref.):—(10th) 119 s.o.l., 120; (11th) 121 s.l.,; (15th) 120 (121 s.l.), (16th) 119-8.

MISCELLANEOUS :
Associated Hotels:—(14th) 4-2; (15th) 4-2.
Associated Hotels (Pref.):—(14th) 89-8; (16th) 90, 91.
Balmer Lawrie:—(11th) 318 C.T., 320 s.l., 318, 320.
Barauree Coke:—(10th) 23-10; (11th) 23-4, 23-8, 23-12; (14th) 23-10, 23-15; (16th) 23-7, 23-8, 23-12, 24.
Britannia Biscuits:—(16th) 10, 10-4.
British Ceylon Corporation:—(10th) 4-1; (11th) 4-1; (15th) 3-14; (16th) 4-1, 4-3, 3-14, 4.
B. I. Corporation:—(10th) 4-4, 4-6 (4 s.l.); (11th) 4-4, 4-6, 4-5, 4-7; (12th) 4-6, 4-8, 4-7, 4-8; (14th) 4-7, 4-9, 4-8, 4-10, 4-6, 4-10; (15th) 3-14; (16th) 4-7, 4-9.
Calcutta Trams:—(11th) 14-4, 14-8, 14-14, 15-2.
Calcutta Silk Mfg.:—(15th) 9-12, 10, 9-14, 10-2, 10-9; (16th) 10-14, 11-2, 10-15, 11-3, 11, 11-4.
Calcutta Silk Mfg. (Pref.):—(16th) 110, 111, 112-8.
Dunlop Rubber:—(10th) 40-4, 40-8; (11th) 40-4, 40-8; (12th) 40-8, 40-12; (14th) 40-2, 40-6 s.o.l., 40-8, 40-12; (15th) 40-12; (16th) 41.
Firpo Ltd.:—(10th) 8-14; (11th) 8-2, 8, 8-4.
Indian Cables:—(10th) 21, 21-4; (14th) 21-, 21-4; (15th) 21-13, 21-18, 21-6, 21-10, 21-14, 21-8; (16th) 22-12, 22-4, 22-6, 22-13.
Ivan Jones:—(16th) 2-1, 2-3.
Indian Rubber Mfg.:—(11th) 28-8, 28-12; (15th) 29-5, 29-9, 29-8.
Macfarlane (Defd.):—(11th) 1-10, 1-12.
Publicity Society:—(14th) 7-12, 8, 8 C.T.

(Annual Meeting 24th July, 1941 at 5 p.m.).

Audited Accounts for the year ended 31st March, 1941:—

The operations of the Company during the year have resulted in a profit of Rs. 2,20,885 and to this has been added a sum of Rs. 5,000 transferred from the General Reserve Fund which has been applied to the reduction of Promotion Expenditure. After further providing for taxation and an appropriation to Workmen's Compensation Reserve, a balance of Rs. 1,62,834 is carried to the Balance Sheet.

Adding to this sum the amount of Rs. 6,079 brought forward from last year's accounts, a total of Rs. 1,68,913 is available for distribution, out of which Rs. 72,251 has been disbursed in paying an Ad-Interim dividend at the rate of Rs. 3 per share, free of income-tax, which was declared by the directors in December last.

This leaves a balance of Rs. 96,662 for disposal.

It is accordingly recommended that the balance available should be applied as follows:—

	Rs.
To payment of a dividend for the second half-year ended 31st March, 1941 of Rs. 4 per share proportionate to the amounts called up (making 7 per cent for the year), free of Income tax	96,335
Balance to be carried forward	327
Total ..	96,662

New Connections.—During the year the number of consumers connected to the mains increased by 728 to a total of 8,442.

Energy Purchased.—The number of units purchased from the Bulk Suppliers was 7.2 per cent in excess of the figure for the previous year.

The sales of energy for General Lights & Fans purposes have not progressed as well as in the past due to the restrictions rendered necessary to comply with Air Raid Precaution measures.

Motive Power consumption also showed no marked progress until towards the latter part of the year when the demand improved considerably. The Hattersley Mill, Ghatkopar, was connected to the supply in February and has been making inreasing use of eletricity. Negotiations for further demands are in hand.

Distribution.—The High Tension and Low Tension Distribution Systems have been efficiently maintained and thereof have been undertaken as necessary to meet increasing demands for supply.

Cyclone.—A particularly severe Cyclone was experienced in Bombay on the 15th/16th October, 1940, which resulted in widespread dislocation of supply throughout the Company's lincensed area, due to damage caused by trees and branches falling on the overhead lines. Most of the interruptions were repaired within 24 hours, but on account of the very extensive area served by the Company it took four days before normal conditions could be completely restored. No damage was, however, caused to the underground system or to Sub-station buildings or plant.

New Receiving Station.—In order to improve the factor of safety of the 11 K. V. distributing network, and to provide better facilities for the future expansion of the Company's business, a scheme has been prepared to receive energy purchased from the Bulk Suppliers at a new control station Santa Cruz. The greater portion of the cables, switchgear, etc., required for this work has already been received.

Agents.—Messrs. Killick, Nixon & Co.

Authorised Capital—Rs. 50,00,000 in 50,000 shares of Rs. 100 each. Issued—Rs. 26,44,500 in 25,445 shares. Subscribed—Rs. 24,31,975 in 17,944 shares of Rs. 100, fully paid and 8,501 shares of Rs. 100, Rs. 75 called up.

Synopsis of the balance sheet as at 31st March, 1941:—

Liabilities:—	Rs.	Assets:—	Rs.
Capital paid up ..	24,31,975	Fixed Capital Expenditure ..	29,70,649

Carry forward ..	22,686	20,505	2,241	8,688

(Annual Meeting 27th July, 1941 at 10 a.m. at Kushtia).

Audited accounts for the year ended 31st December, 1940 :—

During the period under report, the Profit and Loss account shows a profit of Rs. 3,88,779-5-8, which with the amount of Rs. 20,505-5-10 brought forward from last year's account, makes a total of Rs. 4,09,284-11-6. After deducting Rs. 2,04,499-6-7 as depreciation on buildings and machinery etc., there remains an available balance of Rs. 2,04,785-4-11 for appropriation which amount, subject to confirmation, the directors propose to deal with as under:—

	Rs. As. P.
To declare a dividend at the rate of Rs. 7½ per cent on the paid up Capital (free of taxes) ..	1,04,998 14 0
To transfer to Debenture Redemption Account ..	38,075 0 0
To transfer to Dividend Equilisation Fund ..	21,000 0 0
To transfer to General Reserve Fund	18,025 0 0
To carry forward to next years' account ..	22,686 6 11
Total ..	2,04,785 4 11

The general strike of the operatives in the Mill No. 1, which lasted for about three months, had an adverse effect on the income of the Company during the year under report. Besides, various factors, directly and indirectly attributable to war, increased the cost of production. During the greater part of the year, the prices of manufactured goods continued to decline and off-take remained very poor on account of low purchasing capacity of the people. It was towards the close of the year that the tone of the market slightly improved and became steady. Considering the facts stated above, the financial result achieved during the year under report, may be considered satisfactory.

Redemption of the First Issue of Debenture Loan.—A further payment of remaining 75 bonds of the first issue, amounting to Rs. 75,000 had been made during the year under the terms of the Trust Deed. The first issue of the Debenture Loan of Rs. 5,00,000 has been fully redeemed.

Machinery and Buildings.—There was no addition to the factory building and the machinery of the Mill No. 1 except one Generator Room during the year.

The managing agents and the selling agents have foregone out of their commission Rs. 26,247-3-0 and Rs. 3,821-7-9 respectively towards the redemption of the Debenture Loan during the year.

Managing Agents.—Messrs. Chakravarti, Sons & Co.

Authorised Capital—Rs. 15,00,000 in 1,20,000 Ordy. of Rs. 10 and 12,000 Ordy. of Rs. 25 each. Issued and Subscribed—Rs. 13,99,985 in 11,759 Ordy. of Rs. 25 each and 1,10,661 Ordy. of Rs. 10 both fully paid up. Debenture Capital—Rs. 8,50,000 in 850 bonds of Rs. 1,000 each, repayable at par by nearly instalment of Rs. 1,25,000, commencing from 31st December, 1943 and ending on 31st December, 1949, with the option of redemption at any time after 31st December, 1943.

Synopsis of the Balance Sheet as at 31st December, 1940 :—

*Includes arrears of dividends for two years and 3 months.
**Arrears of dividend at 5½ per cent per annum on the Preference Shares from the date of Allotment to 31st December, 1937.

(Half-yearly Meeting 1st August, 1941 at 4 p.m.).

Audited accounts for the half-year ended 31st March, 1941:—

After payment of interest, Debenture interest, managing agents' remuneration and commission, setting aside depreciation on block, debiting the value of machinery discarded and taking into account the balance of the previous half-year, the combined Revenue and Profit & Loss account shows a net profit of Rs. 3,36,445-5-0, which the directors propose to dispose of as under:—

	Rs.	As.	P.
Dividend on 10,000 old Preference Shares at 5½% per annum free of Income-tax	27,500	0	0
Dividend on 10,000 new Preference Shares all fully paid @ 5½% per annum, free of Income-Tax ..	1,016	15	6
Dividend on 2,09,300 Ordinary Shares each fully paid @ Rs. 0-8-0 per share, free of Income-tax	1,04,650	0	0
Balance to be carried forward	2,03,278	5	6

The difficulties with regard to the supply of chemicals and stores have been intensified and there has been a considerable rise in their cost.

Managing Agents:—Messrs. Birla Brothers, Ltd.

Authorised Capital—Rs. 1,00,00,000 in 5,00,000 Ordy. of Rs. 10 and 50,000 5½% cum. Pref. of Rs. 100 each. Issued and Subscribed —Rs. 40,93,000 in 2,09, 300 Ordy. and 20,000 Pref., both fully paid-up. Less calls in arrear Rs. 4,000.

(Annual Meeting 28th July, 1941 at 11 a.m.).

Audited accounts for the year ended 31st March, 1941:—

After providing for all charges and placing Rs. 40,000 to General Reserve and making adequate provision for Taxation, the amount at the credit of the Profit and Loss Account is Rs. 1,12,748-13-10 including Rs. 20,235-14-10 brought forward from the previous year, which the directors recommend be disposed of as under:—

	Rs.	As.	P.
Payment of a dividend at the rate of 12% per annum, free of income-tax	96,000	0	0
Carrying forward to next year	16,748	13	10
Total ..	1,12,748	13	10

Mayurbhanj Forest: Forest working has been satisfactory. Owing to scarcity of mature trees the outturn has been reduced. Average prices for Broad Gauge sleepers were slightly higher than the previous year and orders for our full output were received and completed. Metre Gauge sleeper orders were small and prices considerably lower, which, together with the fact that most of the virgin areas have already been worked out, accounts for the reduced profit.

Managing Agents:—Messrs. Martin & Co.

VIZAGAPATAM ELECTRIC SUPPLY CORPORATION, LTD.

Audited accounts for the year ended 31st March, 1941:—

Profit and Loss Account.—The directors have provided Rs. 18,294-0-0 as against a sum of Rs. 10,747-0-0 which they provided last year towards depreciation. They had to do this as per the orders of the Government. This huge amount considerably affected the profits for this year. The directors have provided Rs. 2,000-0-0 towards the reserve for Bad and Doubtful debts, Rs. 6,050-0-0 towards Income-tax and Super-tax and Rs. 286-13-0 towards interest payable on consumers' deposits amounts. They paid to the Government a sum of Rs. 8,422-3-11 as against Rs. 7,879-10-2 in last year towards the Madras Electricity Tax. But inspite of all these heavy payments, they could make a net saving of Rs. 24,199-1-7 which they recommend for declaration as dividends. They recommend a dividend of 7 per cent on the Paid-Up Ordinary Share Capital to the ordinary shareholders, free of Incometax, and 6½ per cent on the Paid-Up Preference Share Capital, subject to Incometax, to the Preference shareholders as was done last year. The balance still left over is carried to the Dividend Equalisation Fund.

The directors have collected all the outstandings from the *Anakaplle Electric Supply Corporation* and all the advances from their suppliers. They did not, hoverver, receive any further dividends from the *Travancore National & Quilon Bank Ltd.*, (under liquidation) since the last report.

General.—As per the Government orders issued from time to time and the previous committments consenting to the same, they had to reduce the rates considerably in certain tariffs from October, 1940. But they are glad to report that the progress made during the year under report has counterbalanced these adverse conditions.

Messrs. The *Scindia Steam Naviation Co., Ltd., have* established their Ship-Building Yard within the area of the Company's supply. The Chief Engineer for Electricity to the Government of Madras, though he conceded the rights to take up the supply, on some pretext or other decided to take the supply directly by the Government after the directors called for further capital and invested some funds in the purchase of materials etc. They obtained legal opinion, but before taking the matter to arbitration and other proceedings, they made representation to the Government to permit them to take up the load. They hope that the Government will not deny them their legitimate rights and force them to seek relief in other ways. If the supply to the Ship Yard is taken up by them the directors hope to considerably increase their load factor and gain proporationately.

Managing Agents.—The Andhra Engineering Co., Ltd.

IMPERIAL BANK OF INDIA

The Directors of the *Imperial Bank of India* at the Meeting of the Central Board held at Bombay on Monday, the 14th instant, declared a dividend to shareholders for the half-year ended 30th June, at the rate of 12 per cent per annum, payable on and after the 21st July, 1941.

The profits available, including Rs. 38,60,600 brought forward from the previous half-year, amounted approximately to Rs. 80,71,600 which sum was disposed of as follows:—

		Rs.
I.	Payment of a Dividend of 12 per cent per annum Free of Income Tax ..	33,75,000
II.	Transferred to Pension Funds	1,34,700
	Carried forward to next half-year	45,61,900
	Total ..	80,71,600

The average rate for Demand Loans during the half-year was 3½ per cent.

CENTRAL BANK OF INDIA, LIMITED

The net profit of the *Central Bank of India, Ltd.*, for the half-year ended 30th June, 1941, subject to audit, including the amount brought forward from last year's accounts, amounts to Rs. 21,08,145 which the Directors have resolved to dispose of as follows:—

	Rs.	As.	P.
To pay an ad-interim dividend at the rate of 6 per cent per annum, free of income tax for the half year ended 30th June 1941	5,04,396	0	0
To carry forward to next half year's account ..	16,03,749	0	0
Total ..	21,08,145	0	0

PUNJAB AND SIND BANK, LIMITED

The working of the half-year ending with 30-6-41, after defraying all expenses, showed the profit amount at disposal to be Rs. 98,351-15-3 including the balance brought forward Rs. 26,066-8-6.

It is proposed to set apart Rs. 40,000 for addition to Bank Reserves (in addition to Rs. 14,000 separately credited, making a total of Rs. 54,000) Rs. 29,001 for ad interim dividend to the shareholders at 15 per cent p.a.; Rs. 3,445-11-6 for Bank Staff Beneficent Fund in addition to separate depreciation for Furniture and Reference Books. The balance which will be carried forward to the next half-year will amount to Rs. 23,165-11-0.

HONGKONG AND SHANGHAI BANKING CORPORATION

The following telegram has been received by the Hongkong and Shanghai Banking Corporation, Calcutta, from their Head Office in Hongkong:—

Interim dividend of £2-10-0 per share payable 11th August subject to deduction of Income-tax.

FORTHCOMING MEETINGS

Vol. XXVIII. No. 4 SATURDAY, JULY 26, 1941 Price Re. 1

IS IT NOT WISE TO INSURE NOW ?

With an uncertain future ahead Conservation and Consolidation of resources are the prime needs every individual should assiduously strive after.

If you already have Life Insurance, hold on to it. Don't allow it to lapse. If you haven't go in for it right now. A Life Policy gives an inestimable protection and it will cost you less now than later. It is cent per cent true that to be forewarned is to be forearmed.

Write to us for further particulars or advice.

WORLD OF INDIAN FINANCE

Friday evening.

INTER-BANK call money rates are unchanged, ¼ per cent in Bombay, ½ per cent in Calcutta and ¾ per cent in Madras. All these rates continue to be nominal; and, if we can use such expressions as more nominal and less nominal, there is every reason to think that these rates will prove even more nominal in the coming weeks. Last week, sale of tap bills was discontinued. From next week, the weekly offer of tender bills is reduced from Rs. 2 crores to Rs. 1 crore. The drain of funds from the market to Govment coffers will, therefore, be Rs. 1 crore per week from next week onwards. Treasury Bill maturities, however, are over Rs. 14½ crores in August, which works out to a weekly average of Rs. 3½ crores. In simple terms, the market will be paying out to the Government Rs. 1 crore per week against the sale of fresh Treasury Bills, while it will be receiving Rs. 3½ crores against maturing Treasury Bills. The inflow into the market will thus exceed the outflow by Rs. 2½ crores per week. If short credits are in plethoric supply today, they will be in super-plethoric supply from the next week.

By the same token, bidding for the smaller offer of Treasury Bills will be very keen, though a percipitous fall in the average discount rate is not to be expected. On the tender day this week, applications came to Rs. 4,17½ lakhs while the offer was Rs. 2 crores. Herein is to be found evidence of the revival of lively bidding. With the offered amount reduced to Rs. 1 crore, there will be a far bigger scramble; and applicants, fearing that they will secure only a small allotment, will apply for much more than their actual requirements. This will again cause an artificial bloating of the tenders received. The average rate of accepted tenders this week was annas 13 and pies 3 per cent as against annas 13 and pies 8 last week. With the more lively bidding at next week's auction, the average rate may slip down to roundabout annas 12. Below that level, there will be operating a kind of what may be called natural resisting force. The significance of last week's suspension of tap bills and of the reduction of tender bills as from next week is discussed in the editorial section, and, in this context, it may be emphasised that, while cheap money sentiment will receive further emphasis and reinforcement, the steadiness in the giltedged market, which has remained unshaken amidst the alarums in Indo-China, will be likewise more firmly established. With the reduction in the sale of Treasury Bills, a headier flow of subscriptions to the second defence loan may be predicted as the direct and immediate result. Such large subscriptions are all the more likely as the general expectation is that the list for the second defence loan may be closed very shortly: and that the third defence loan will be a medium-term loan, which may not prove equally attactive to banking circles.

The weekly returns of the Reserve Bank do not call for any special comment. In the banking department, deposits of all the Governments have shown increases; those of the Central Government from Rs. 14.11 crores to Rs. 14.94 crores; those of the Burma Government from Rs. 2.19 crores to Rs. 2.60 crores; and those of other governments from Rs. 4.47 crores to Rs. 4.49 crores. Deposits of member banks as well as miscellaneous deposits have risen from Rs. 28.63 crores to Rs. 30.02 crores and from 2.63 crores to Rs. 2.94 crores respectively. As a result of these changes, and as a result of slight declines in foreign balances and in investments on the assets side, notes held in the banking department show a sharp rise from Rs. 13.52 crores to Rs. 16.84 crores. The decline in foreign balances from Rs. 37.41 crores to Rs. 37.06 crores is, perhaps, to be interpreted as evidence of the calls which continue to be made on the Reserve Bank for sale of Reverse Councils. In the issue department, rupee coin shows a fairly appreciable rise from Rs. 36.57 crores to Rs. 37.01 crores. Among the consequences of the unsettling news from the Far East, it may be said that scare about rupee coin is not one of them.

The report of the Reserve Bank of India for the year ended June 30, 1941 has just been received. A telegraphic summary of the results of the Banks' working in 1940-41 has, also been published in the papers. The most outstanding and the most gratifying feature of the results is that the net profit has shown a tremendously big bulge. At Rs. 2,79.16 lakhs, 1940-41 must be considered a record year for the Reserve Bank from the point of view of its profits. After providing for dividend, the surplus payable to the Central Government is Rs. 2,61.76 lakhs, as compared with Rs. 20.54 lakhs in the half-year ended June 30, 1940; Rs. 5 lakhs in the year ended December 1939; Rs. 20.95 lakhs in the year ended December 1938; Rs. 10.41 lakhs in the year ended December 1937; and Rs. 35.9 lakhs in the year ended December 1936. This surplus of Rs. 2,61.76 lakhs compares with the estimate of Rs. 117 lakhs which was the amount anticipated by Sir Jeremy Raisman when he outlined his budget proposals last February. There is, thus, a windfall of Rs. 1½ crores for the Finance Member. He would have done equally well under the head profits from subsidiary coinage.

The record profits of the Reserve Bank during 1940-41 are due to three important

(Continued from page 143)

factors: (1) the sterling securities held by the Reserve Bank were throughout the year at a high level; (2) the rupee securities were suddenly increased by the end of March last in connection with the operations arising from the redemption of the sterling debt; and (3) greater income from the activities of the public debt department. As on July 5, 1940, sterling securities held in the issue department were Rs. 131½ crores. Further additions to sterling securities were effected in January 1941. Throughout February and until March 21, they stood at Rs. 140½ crores. In the week ended March 28, sterling securities were reduced to Rs. 102¼ crores, on account of the sterling payments made to the holders of the dated India sterling stocks. Since then, however, additions have been made from time to time so that, by July 4, sterling securities in the issue department had risen to Rs. 118¾ crores. It will be seen that sterling securities in the issue department in 1940-41 should have been at the average level of Rs. 120 crores. Compared with the average holdings in sterling securities in 1939-40, those in 1940-41 must have been higher by anything like Rs. 40 crores. This means clearly a profit of Rs. 40 lakhs, assuming that the additional sterling balances have all been invested only in British Treasury Bills. Foreign balances have all been invested only in British Treasury Bills. Foreign balances in the banking department also show an average increase of Rs. 20 crores. This gives a further additional profit of Rs. 20 lakhs, assuming again that the investments were mostly in British Treasury Bills.

As regards rupee securities, the big change was in the last week of March, when nearly Rs. 40 crores of Government of India securities were added to the issue department. These securities were in the form of rupee counterparts of the sterling loans redeemed. That is to say, the Reserve Bank was earning on these rupee securities an average of anything like 3½ per cent per annum. While the securities were in the form of sterling securities, the return was only 1 per cent. When the sterling securities were handed over by the Bank to the Government and the Bank received rupee securities in their place, its income from the new securities was on the basis of 3½ per cent. Subsequently these rupee securities have been replaced by **ad hoc** Treasury Bills. But this transfer into **ad hoc** Treasury Bills was effected only after the closing date of the balance-sheet of the Bank. For at least three months, the Reserve Bank must have been earning an additional 2½ per cent interest on a total amount of Rs. 40 crores. This works out to nearly Rs. 25 lakhs.

As regards the increased profit from the Public Debt Department, the main source of the increased revenue is the large-scale transactions which the Reserve Bank has handled both in London and in India in connection with the repayment of sterling debt, and the bigger amounts realised by sales of defence loans.

There has been more activity in the exchange market. Export bills have made a fair showing, mainly on gunny account. Remittance enquiry has also been noticed on a small scale.

Banks were sellers of T.T. at 1s. 5 15/16d., for ready upto six months forward; and banks were buyers of T.T. at 1s. 6d., for the same delivery.

Banks were buyers of three months R.A. bills at 1s. 6 7/32d., for three months and 1s. 6 9/32d., for the fourth month.

Inter-bank call money quoted ½ per cent, no borrowers.

Firms' money for call and short quoted ¼ per cent; and for one to four months deposits ½ per cent.

Finance Abroad

Friday Morning.

THERE is so little to say about financial developments as contrasted with political developments abroad that a weekly commentary has little usefulness. The little that is said in a curt cable about the plenitude of funds seeking investment in British Treasury Bills as 147 millions were offered for the tender of £70 millions only at a tiny fraction over 1 per cent possesses little significance as compared with the changes in the Bank of England Return issued last Thursday. There is a fall in Bankers' deposits as Banks had more outlets for money besides Bills last week and a rise in Government securities. A further rise in note circulation to £651 million is disclosed and the reduced holding of Bills indicates that the clearing banks should have plenty of funds. The absence of any change in discount and exchange rates at a time when other markets cannot help registering the unpleasant effects of developments in the Far East renders comment sterile at this stage, and one must be necessarily content with describing the neglect of British Funds and the falling away in Japanese Bonds on the London Stock Exchange. But there is plenty of headline views. The presumption that the R.F.C. would make a loan to Britain on the security of shares and securities acquired previously under the vesting orders has been fulfilled. One might conclude that Sir Edward Peacock and Professor Keynes have succeeded at Washington and there is no need to sell the assets of British nationals to private investment corporations. The money is to be used for paying off outstanding bills for materials bought before the Lease and Lend Act and the British Companies whose investments in subsidiary and other concerns in the U.S.A. had been taken over can deduce that there will be no hurried sale. The loan is just an ordinary bank loan but bears interest at the singularly favourable rate of 3 per cent and is payable after 15 years with provision for an extension of 5 years provided that 2/3rds of the capital is repaid at the end of 15 years. If one goes by the terms offered for first class debentures of 20 years' life in New York over the past year the terms are not unusually favourable, but the average investor would argue that there is a difference between Texaco raising money at 3 per cent. and the British Treasury getting what look like a long term loan at 3 per cent. The goodwill of the U. S. Treasury has made the loan possible according to Sir Chas. Kingsley Wood. Congress has empowered the R. F. C. to grant a loan of 425 million dollars mainly to avoid forced selling of securities. The collateral consists of securities of 61 Corporations listed on the New York Stock Exchange worth 205 millions and 46 unlisted securities worth 115 millions and the capital of British owned insurance companies in the States apart from the claim to the annual underwriting profits of British Insurance Companies. The total of 500 million dollars worth of securities put up as collateral security for this transaction shows that the R.F.C. has stretched a point in favour of the borrower.

The guarantee that control and management will be unaffected by the transaction implies that there is no such thing as a receivership clause distinguishing this transaction from any debenture arranged by mortgage of assets, for default is unimaginable under the agreement. The vesting orders are treated as sufficient evidence of title, and the companies involved have no say in the pledging of their assets. The securities are to be lodged with the Federal Reserve Board as in the case of other loans made by the R. F. C. The interest and dividends earned on these securities are put at 86 million dollars per annum so that the 3 per cent payable on the loan or 425 million is covered many times over, and the excess over interest will be applied towards repayment of principal. It is assumed that the entire loan will be paid off in 15 years. That is to be given in instalments of 100 millions a month in order to meet obligations falling due in the near future.

Washington has no reason to feel displeased for the transaction is wholly in accord with American policy in 1941. A common aim binds the Union and the British Commonwealth and the stock markets have reason to feel pleased as the threat overhanging Wall Street since April last when Mr. Gifford went over to sell investment trusts' assets in the U.S.A. The justification for the three vesting orders will be found in the advantageous terms secured by the Treasury. Morgan or Dillon Read would not have given better terms than the R.F.C. which can certainly afford to give loans as relief expenditure and farm payments will have disappeared this year. The resolve to keep the insurance and other concerns going is that the future is not prejudiced by the loan. The gainer is the British Government; the losers are the British Companies whose assets were taken over in exchange for sterling. Liquidation is ruled out by the terms of the loan and the financial statemanship that has produced the agreement will ensure the smooth working of the British Purchase Mission and the Supply Council. There was a very strong team of diplomats and economists including Sir A. Salter and Professor Hall at Washington to get the agreement shaped on proper lines.

The U. S. Government's desire to make over 100 tankers to Britain argues a similar success in convincing the Americans that requisitioned vessels not a new building programme is what is wanted. The U. S. tanker fleet will be reduced by half after the transfer but one must assume that the tankers will be on charter just as the 48 Norwegian vessels re-assigned to Britain are. This means that Mr. Ickes will soon place over 70 tankers at the disposal of Britain for service from the West Indies and the Gulf of Mexico. U. S. convoys will be available for such tankers up to the Irish coast and this along with the possible transfer of 75 more tankers will give relief to Britain which cannot complain against the release of the French tankers and the grant of oil supplies for French Colonies.

While the Chinese and Japanese currencies are quoted at last week's rates and the Hong Kong dollar is virtually uneffected by the developments in the Far East nothing can be said with advantage about Far Eastern events. The tightening up of regulations in the U. S. A. against exports to Japan and purchases of new mined gold from Japan were only to be expected. The restrictions will account with Japan's economic vulnerability, but it will be mistake to regard mere sanctions as having particular force at present. There is, however, the assurance that the U. S. A. will support the **status quo** and Mr. Sumner Welles' prompt condemnation of Japan and the implicit depreciation of Vichy's climb-down shown that the breach between Japan and the U.S.A. is complete. It is not necessary to indicate how far the acquisition of naval bases will help the South Seas drive. The departure of Mr. Ohashi does not argue that the drive is off for Japan is generally credited with ulterior motives. One of the consequences will be that Indians in Saigon will have less chance of getting their blocked balances and the difficulties of remittance to India will greatly increase. Mention must be made here of the proposed payment of 6 million piastres by Thailand to Indo-China for the value of assets located in territory assigned this year after the little war of January/February. Six million piastres cannot be much; in happier times it would be about £3 millions and the agreement can only be taken as evidence of amity between Thailand and the neighbour. As there are valuable teak forests in the districts ceded by Indo-China compensation was to be expected and the efforts of Japan have promoted accord in the matter of compensation. The acquisition of additional forests is a matter of interest to the Anglo-Thai Corporation, which has a big position in the timlier trade of Siam, but the short cable makes no mention of the exchange rate fixed between the piastre and the baht. There is a distinct possibility of both currencies getting into the yen bloc and being connected with the dollar rather than sterling as there is an agreement already in force.

LLOYDS BANK

LIMITED

(Incorporated in England.)

1677

Safety

In times of uncertainty, safety of capital should be the investor's chief concern.

A FIXED DEPOSIT ACCOUNT or SAVINGS BANK ACCOUNT with Lloyds Bank gives complete security of capital.

INTEREST is allowed at rates which can be ascertained on application.

Third Defence Loan

We have good reason to think that the Government may be coming out with their Third Defence Loan in the course of August. In our last week's review of the money market, we examined the Reserve Bank and the Imperial Bank returns for the week ended July 11, and came to the conclusion that the Government might be shortly closing the list for the Second Defence Loan. Our main contention was that the substantial subscriptions of over Rs. 5¼ crores received for the second defence loan in the week ended July 5, taken in conjunction with the big rise in the investment portfolio of the Imperial Bank during the week ended July 11, was evidence that the Imperial Bank might be expecting the list for the second defence loan to close in a week or two; that the third defence loan might not be as favourable; and that, therefore, it would be profitable to subscribe for as much as it needed of the second defence loan. We also attached special significance to the sharp jump in the investments held by the Reserve Bank in the banking department, though, in this case, an equally satisfactory alternative explanation was possible. What we may call confirmatory evidence for our last week's conclusions is forthcoming this week.

The Treasury Bills *communique* of this week contains the announcement that the weekly offer of tender bills will be reduced from Rs. 2 crores to Rs. 1 crore. It may also be recalled that last week's *communique* announced the suspension of the sale of tap bills. On the present basis, the Government will be seeking from the market only Rs. 1 crore per week in the form of Treasury Bills. On the other hand, Treasury Bill maturities continue to be on the large side. The funds which the Central Government will have to provide for the repayment of maturing Treasury Bills in August will be as much as Rs. 14.66 crores. During September, Treasury Bill maturities amount to Rs. 14.87 crores. Confining ourselves to August, the average weekly Treasury Bill maturities will be Rs. 3½ crores. Against which the Government propose to borrow only Rs. 1 crore by sale of fresh Treasury Bills. On balance, the money market will, in respect of Treasury Bill transactions, be adding to its cash resources at the rate of Rs. 2½ crores per week in the course of August. Interbank call money is in plethoric supply. An addition to banks' cash on the scale to be expected in August must further underline and emphasise cheap money conditions.

We admit that it is possible to offer a perfectly cogent explanation for the reduced Treasury Bill borrowing, without attempting to read too much significance in this action of the Central Treasury. As on July 18, the deposits maintained by the Central Government with the Reserve Bank stood at the high watermark of Rs. 14.94 crores. This is as comfortable a cash position as the Government have known only on few occasions in recent months. With no ways and means advances due to the Reserve Bank and with cash at Rs. 15 crores, the Government may well claim that there is no need to continue to borrow on Treasury Bills on an unduly large scale.

The Government may further argue that it is quite likely that at the end of July or early in August, they may be in receipt of another large payment from the British Government. It has been noticed, in recent months, that inter-governmental transactions as between Britain and India are being settled either at the end of the month or at the beginning of the following month. Thus, between May 23 and May 30, Government's deposits with the Reserve Bank shot up from Rs. 6.10 crores to Rs. 12.68 crores; and confirmation that this jump was due to inter-governmental transactions was provided by the sharp increase in foreign balances held in the banking department from Rs. 31.87 crores to Rs. 40.30 crores. The same development was repeated in the week ended July 4. Between June 27 and July 4, Central Government's deposits with the Reserve Bank rose from Rs. 5.27 crores to Rs. 12.17 crores, while foreign balances showed an even higher increase from Rs. 37.06 crores to Rs. 46.48 crores. If a large sterling receipt is recorded at the end of this month, Central Government's deposits may jump over the Rs. 20 crore mark. In such circumstances, the reduction in Treasury Bill borrowings need have no other meaning than that it is directly due to the extremely comfortable cash position of the Central Treasury.

We have thus three circumstances whose significance may be that the second defence loan will be withdrawn early in August and that the third defence loan may be placed on the market later in August. These three circumstances are: (a) recent heavy subscriptions for the second defence loan and the recent sharp rise in Imperial Bank's investments; (b) last week's suspension of tap bills; and (c) this week's reduction of the weekly offer of tender bills from Rs 2 crores to Rs 1 crore. But we have also shown that these developments can be reasonably explained as due to factors which need not have a bearing on any new defence loan.

We consider that the most important ground on the basis of which we may shortly expect some new development in the plan of defence borrowings, is that the maturing loan of this year, which is the 3 per cent 1941 loan, is to be paid off on September 15. The amount outstanding on this loan is Rs 10.67 crores. In these times when political upsets may occur any moment and unsettle giltedged markets, it would not be advisable to postpone to the eleventh hour the arrangements necessary for securing the funds for the repayment of the maturing loan. There are only seven weeks now within which the plan for the conversion loan has to be made and executed. That the Government should have, at this particular juncture, adopted measures whose effect will be to pile up cash resources in banking circles, may be said to be important corroborative evidence for the view that the conversion loan will be put through in the course of August.

For a Government which has borrowed Rs. 65 crores through defence loans so far, the providing of Rs. 10½ crores for the maturing loan may not seem a formidable proposition, especially as the cash balance of the Central Government at the beginning of August would be well over Rs. 20 crores. If the intention of the Government was to make the payment for the 3 per cent 1941 loan from the surplus cash balances; that is to say, if the Government had hoped to meet the commitments on the maturing loan without having recourse to a new defence loan, it is reasonable to infer that the scale of borrowings from Treasury Bills would not have been reduced and the financial authorities would have liked to maintain and keep maintaining, until the middle of September, their present comfortable cash position. Viewed in this light, the reduction in tender bills to Rs. 1 crore is in the nature of final and conclusive testimony that the market is definitely to be prepared for the third defence loan.

We had indicated, in the last issue of *Indian Finance*, that the general expectation with respect to the new loan was that it would be a 3 per cent 12—17 year loan, issued at par or at a small discount, a 3 per cent 1943-48, for instance. While the Government are thus considering the best plan for the third instalment of the defence loan, we may be permitted to restate our proposals, which, we believe, are greatly strengthened by the experiences of the last twenty-two months in the giltedged market as well as in relation to the progress of the defence loans. Our proposals, which we commend to the careful attention of the Finance Member, are as follows:

(1) There should be a simultaneous issue of three types of loans.

(2) They are: a 2 per cent 1944-46 loan at per; a 2½ per cent 1947-52 loan at par; and a 3 per cent 1953-58 loan also at par.

(3) The total amount of the loan issue should be limited to, say, Rs. 30 crores. That is to say, the list will be closed as soon as it is known that the subscriptions received in the aggregate for the three loans have reached Rs. 30 crores.

(4) The lists for the loans will remain open for a limited period. We suggest that it would suffice if the lists are open for a week at the most.

(5) The holders of the 3 per cent 1941 loan must be given the option to convert into any of the new loans; some special inducement may be offered for facilitating as much conversion from the 3 per cent loan into the new loan as possible.

More Power and Pledges

The launching of a new campaign of protest in the subjugated countries shows that the new Hitlerian order has scarcely been established even after a year of strenuous and unscrupulous effort. Bondage may be hoarse, but it is not mute, and the first overt sign of encouragement has kindled a campaign that helps the R.A.F. in its nightly excursions. The occasional notes in the press about Nazi acquisition of assets in Belgian and Czech companies showed that Nazi aggression has its business side as well. The literature of protest against Germany well may be unknown; but German rule within a year has shown all its unpleasant aspects, and the conquered countries are springing to attention with the signing of the Anglo-Soviet Pact. The efforts made by the fugitive governments in London, first to demonstrate the correctitude of their position, and secondly, to establish an understanding with Russia have given an auspicious start for the "victory" campaign that began on July 20. It is essential to remember that the rebellion against German conquest may succeed rapidly, especially, as the German people are showing signs of discontent. It is true that Germany has obtained a hold over selfish and unscrupulous minorities, which with their press and party organisations, accord some sort of cooperation. But the nations, as a whole, particularly Norway, are far from accepting the Nazi-sponsored parties, and the presence of the Reich's representatives in Norway and Holland show that no great confidence is placed in the indigenous Fascist parties.

Harrowing stories from Poland or Czechie are not unusual, but what is more important for us to remember is that the soil is particularly good for the campaign that got off with a flying start on

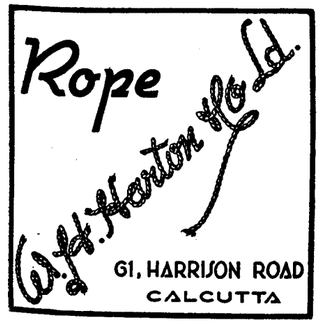
ESTABLISHED 1919
Head Office: BOMBAY *Calcutta Branch:* 9, CLIVE ST.

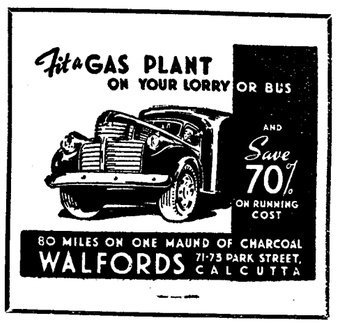
Sunday with a goodwill message from Mr. Churchill. Passive resistance has been the peculiar weapon of the Czechs as *Der Neue Tag* of Prague has complained that 'the passive resistance and deliberate stirring up of feeling against Germany is obviously done by those in leading positions in offices, schools and public departments. The worst of all are the Legionaries who do everything to sabotage German-Czech collaboration and their number is considerable within the German nation.'

That the unceasing attacks on the Ruhr compel the German heavy industries to rely both on Czech factories and labour is known, and reference to the social boycott of families of men who go to work in Germany shows that the National Unity Party employs familiar methods. It may be taken as certain that the winer of discontent became sharper with the efforts made to raise national consciousness and defeat, the intentions of the Germans. Neither improverishment nor cruel administration have induced the Poles to work for the Germans; for in February the German-controlled news agency reproached Poles for their unwillingness to take part in any public work although the authorities allow and even encourage them to do so. Those who showed unwillingness to co-operate became obnoxious. In the Corridor, the German majority suffer from unpopularity, for a Poznan paper declared in January that cases of insult and listening-in to enemy broadcasts reflected the deep-seated opposition to German laws in the Eastern Provinces. As wireless sets belonging to Poles had been confiscated, the Poles were not above using those of their German lodgers according to a Bromberg newspaper. Hatred smouldered both in the provinces incorporated in the Reich and the Government-General for a Swedish newspaper's correspondent wrote in April from Berlin that "a Government spokesman explained that the German Government made no secret of the fact that the Poles were dissatisfied with their country being occupied." Polsih workmen had joined in the demonstrations and the Reich spokesman's reference to "criminal elements who had been set free by the Polish Government" was accompanied by another to the heavy losses among the S.S.



The Czechs are not alone in entertaining visions of the restoration of the old democratic order and refusing to abandon hope. For the Poles who have suffered worst have displayed hatred in most places instead of resignation. The Danes too in spite of their swift surrender have not acquired any affection for blind hatred of the Fuehrer and the German army of occupation prevailed in political, commercial and military circles. Every reference to Denmark's dark days was depreciatory of Germany according to a North Schleswig newspaper which plaintively spoke of the unpopularity of Denmark's own Nazis. The Germans, according to the same source, had come to realise that many people in Scandinavia stood in the way of the New Order because people in Denmark had difficulty in freeing themselves from English sympathies; understanding with the West, particularly with England, is deep-rooted and strong. The opposition of the press in occupied Denmark, like the reluctance to take up work in German factories, may well excite surprise but it has been referred to more than once in the German press. Thus the *Hamburger Fremdenblatt* has recorded the fact that the Danish press openly opposes the German protective occupation and Denmark's adherence to the new European order. Broadcasts and articles illustrate the undying unpopularity of those organising parties to work with the Germans for Denmark retains of those organising parties to work with the Germans for Denmark retains complete unswerving faith in an Allied victory. The organs of the Danish Nazis admit that pro-British Danes are in a majority, and these upheld the action of the Danish envoy at Washington in assigning Greenland to the U.S.A.

That Quisling had shot his bolt has been proved more than once, for, allegiance to King Haakon has been offered afresh by hardy sailors who cross the North Sea in open boats: some have gone round the world to reach Bombay. The complete identity of views between King and people has driven the German commander to confess that, with the exception of Quisling's Nasjional Samling party, all other organisations and the representatives of big business and industries remain, now as before, pro-English and consequently anti-German. The same view is responsible for the slanging of the Quisling paper *Fritt Folk* which again admits that an agent wearing the party badge is not welcomed by his customers. The raid in the Lofoten islands in April had the expected effect of stiffening opposition, and the German commander ordered that caution and restraint should be exercised. The puppet government's own commissars have conceded that the Norwegian nation is difficult to manage and very stubborn. More revealing is the admission not long ago of the German News Agency quoting Lunde of the Nasjional Samling party that there are still people who have confidence in England. The Quislings remain obscure and distrusted. Tradesmen, hotelkeepers and others have indicated that Germans are not wanted as customers and Herr Terboven's sneering reference in a speech on Monday to "English sickness" conveys an idea of the magnitude of opposition.



After the vindication of King Leopold, the Belgian nation has not shown signs of meek submission. The German-controlled press abounds in references to the sabotage and passive resistance throughout the country. The thinly disguised hostility paralysed the adaptation of the Belgian economy to the New Order, said *Le Nouveau Journal* which is a Nazi sheet. The success of British arms is hopefully awaited. The Belgian Ministers' statements and proclamations from London have not been overlooked. The attempts made to encourage the Flemish autonomists have not yielded great results, for a pro-Nazi leader like Declereq announced early this year that "an English wind is still blowing over Belgium and must be stopped." The complaint was reinforced by another in a Rexist paper about the singing of the British and French national anthems in restaurants and the toasting of Mr. Churchill. More important is a later admission that pro-British elements are becoming increasingly audacious. It is known that the flares put out in the Low countries guide the R.A.F. bombers to their targets and the chalking of the letters R.A.F. in Belgian towns, about which there was a plaintive protest, formed a happy prelude to the 'V' campaign. The schools too have shown no signs of toeing the Nazi line, and Catholic schools in particular encouraged in cramming pupils with Anglo-mania to which the students at Ghent are apparently susceptible. The Nazi-sponsored labour party in Belgium has met with no more encouragement than the Rexist group. More serious is convert opposition of all property owners who have set their hopes on a British victory and want no truck with any new order. Even; the unemployed blame the New Order. More serious was the opposition of Civil Servants: reluctance on the part of burgomasters to deliver potatoes, grain and livestock supplies illustrated the policy of passive resistance.

Equally pronounced was the hostility of the Dutch people. The German paper in Holland has then referred to the anti-German attitude and another has admitted that Britain's defeat alone will reconcile them to German rule. Insulting behaviour to the troops is not the only part of the story. There is a strong anti-Nazi section of the press; and this can be deduced from the attack the German-controlled papers which argue that many papers are activated by one hope explicable solely by one word—England. The boycott of German business firms provoked a threat from Dr. Fishboch and the risk taken in listening-in to London broadcasts has proved that patriotism often overrides prudence.

The successes of General de Gaulle have kept alive opposition to the Vichy Government whose policy of collaboration is driving many into Spain for a new route to the Free French forces and, more, to British broadcasts. The most cursory survey of conquered Europe will show that looting has not taken away hope. Impressment for work in German factories, the rationing of their own foodstocks and the merciless tricks with the currency have not choked hope in the Netherlands, Denmark and Norway. Even the countries overrun earlier have shown no sign of working with Germany, and the ambitious schemes of Hitler, propounded only last July after the swift surrender at Compiegne, have gone wrong. The soil for British propaganda has not become sterile and the vigorous co-operation with Russia in her own war with the Nazis has strengthened not only the claims of the peoples waiting for deliverance but also the chances of a British victory. The repeated attacks on Ploesti must have shown to Rumania, as also to Germany, that oil is precious and liable to swift destruction while the smashing attacks on the Ruhr and industrial towns farther afield have proved that victory in the air is nearer than ever. It is not surprising that the conquered countries have plucked up courage after the solemn renewal of Britain's pledge to the Czech and other nations.

Editorial Notes

Industries in 1940-41

THE absence of figures relating to the production of certain industries makes it difficult to ascertain the exact trend of industrial production. From the available statistics and the advance in prices, evident since the beginning of 1941, one may legitimately conclude that production and prices were subject to distinct influences. But there is a third factor, the changes in foreign trade to which any advance in prices or production may be directly linked. All that can be said here is that except for jute manufactures, and to a smaller extent coal, the production indices for 1940-41 point to a wholly satisfactory position in the leading Indian industries. Reference must be made to the strking recovery in textile production particularly after April 1940. The monthly figures for all the succeeding months disclose an increase on the 1939-40 totals. Total production for 1940-41 is put at 4,258.6 million yards as against 4,012.4 million yards in the previous year. The total is only slightly below the record set up in 1938-39. The decline in total imports from 579.1 million yards in 1939-40 to 447 million yards in 1940-41 was doubtless responsible for the increase in textile production in India which is reflected again in the advance in Indian exports to 390.1 million yards from 221.3 million yards, as also by the rise in imports of foreign cotton last year.

The striking increase in mill consumption of cotton in India bears witness to the increased activity of the mills. Total consumption is put at 3,297,000 bales showing a rise of 266,000 bales on 1939-40. The fall in raw cotton exports reveals what is by now a familiar feature of the export trade. The fall of 178,000 tons in the total production of jute mills is again a measure of the deterioration in India's export trade. That the curtailed production of the mills had little effect on stocks and led to great difficulties in the jute market last year is generally known, but the final figures now available prove that the decline in production is directly traceable to the fall in exports by jute manufactures by as much as 158,000 tons last year. There is, however, the view that the fall is an indication of the success of the mills in adjusting production to demand. But the major factor in the Jute position is the calamitous fall in shipments of raw jute which at 244,000 tons were hardly half of the exports made in 1939-40.

If the two textile industries disclose a rather patchy position the remarkable though indefinite rise in pig iron output put at 1,837,600 tons for 1939-40 against 1,575,600 tons in 1938-39 conveys a different impression. This total must be related to the figures available until August 1940. There was a striking increase in August, and one may infer from the figures available for five months that total output must be over 2 million tons. The equally pronounced increase in steel production up to August 1940 is another arresting feature of industrial development in 1940-41. The monthly totals indeed suggest that production must have risen by 25 per cent. in 1940-41 so that the total must be considerably higher than the 1,070,400 tons returned for 1939-40. It is again noteworthy that available data lead to the conclusion that the production of finished steel including semis except blooms, billets and slabs advanced more than proportionately. Imports into India of both the unprotected varieties of steel fell away during 1940-41 but this decline alone does not explain the increase in indigenous production. The expansion of war demand and of exports too provides sufficient reason for the increase, to which the rise in steel prices but not in pig iron prices, must have contributed.

The increase in sugar production to over 1 million tons was described in the analysis of the second memorandum. This increase is connected with the steep fall in imports. As for the other industries the production of collieries is known to have risen continuously during 1940 and the total for January alone was over 2,25 million tons. Raisings for the year should therefore exceed 26 million tons as compared with 25 million tons in 1939-40. A slight fall in exports of coal explains the difficulties of the trade for which the further decline in imports cannot afford satisfaction. The stagnation of prices, despite the indisputable rise in industrial consumption, was apparently the major problem for the coal mining industry which encountered as usual freight and other difficulties. The high stability of tea production (returned as 385.33 million lbs.) illustrates the virtues of regulated production, carefully adjusted prices which on the whole rose during 1940 and an expanding market though seaborne exports fell by 10 million lbs. But tea remains the most important single item in India's exports. Increased production and exports of wheat flour, like the enlarged production of paper and the drastic reduction in imports of cement and sulphate of ammonia as compared with 1939-40, are certainly clues to the higher activity and correspondingly increased production of several industries. But the most satisfactory indication is the increase in the use of electric energy. Total energy must have registered a notable increase after the rise reported in 1939-40. Over two-thirds of the electricity sold is used by industries, and the total consumption for eleven months of 1940-41 exceeded the total of 1.25 million units sold in 1939-40, while total power generated and sold up to February undoubtedly was in excess of the total for 1939-40. There is indeed much to suggest that most industries were both busy and prosperous and if statistics of employments were available or figures for factory construction as in Britain one can look for a corresponding increase in the number of those in gainful occupations.

Burma's Victory

While the Government of India will readily welcome the Indo-Burma Agreement concluded by its nominees and even parade it as the achievement of its diplomacy of patience and goodwill, the public and the commercial organisations are hardly likely to feel that India's legitimate interests have been adequately safeguarded. India has never been so strong as to deny or so selfish as to be oblivious of, the place of give-and-take in agreements of this kind. But when the upshot of the negotiations is the acceptance of the Baxter report, with little or no modification thereof, it is difficult to avoid the feeling that the agreement is but a tame surrender to Burmese claims. That the agreement safeguards the rights of the Indian minority (of whom 40 per cent were born in Burma) may be conceded, but it distorts the nature of previous intercourse with Burma. It may almost lead to the conclusion that the previously existing degree of 'penetration' was unwarranted and the terms are actually an endorsement of error and prejudice. That it allays Burman apprehensions may seem a virtue to the Governments, but opinion in India will certainly take note of the fact that the draft follows closely the report of Mr. Baxter, which was at hand, but not considered at the time of the trade treaty negotiations. The new regulations issued under the agreement end the era of limited intercourse. The Indian is an alien in Burma and if no quota is set for immigrants, the actual procedure will certainly discourage entry. It may be argued that one of the purposes of Separation and consequent autonomy has been served, and it may also be argued that the ban on immigration is similar to that placed on emigration to Malaya and Ceylon. That Mr. Baxter's recommendations have been accepted is perhaps the most surprising thing. The Indian delegation, entirely official and wholly complaisant, accepted the views propounded by Mr. Baxter and accepted by U. Sair's ministry. It must, however, be observed that Mr. Baxter has admitted that no conclusion is possible as to the volume of Indian immigration or to the effects on employment except in Rangoon Port. The admissions that Indians are ready to take lower wages than Burmans, that Port Trust workers are badly housed and ill-clothed as also that the seasonal immigration engenders discontent do not readily accord with the recommendations governing entry into Burma. Conditions laid down as regards Burma domicile are not unusual; but the essential bar to the acquisition of citizen rights in the case of workers is now accompanied by the formulation of terms for permits obtainable only on payment. The creation of a Board and the enactment of legislation in Burma are foreshadowed; so it is hardly necessary to canvass the possibility of changes. The agreement is final and finite; its nature and scope may be indicated by the condition laid down as regards acceptance by all immigrants in the future and the formidable penalties for unlawful entry. The selection of suitable citizens from among holders of 'A'' permits is envisaged, but one may deduce that such eligible will be few. The regulation of immigration by land is not in shape yet, and the best that can be said is that the Provinces will offer co-operation. The economic questions raised

by the Baxter report and the new agreement are, in the main, concerned with costs of farming. Anything which puts up the price of labour must lead to higher costs and *ergo* to higher prices for rice, if an actual fall in rice production does not occur. It is, perhaps, with the easy assurance born of recent developments in the rice trade that the curtailment of Indian labour is readily approved. As to the probable benefits accruing to Indians who have lived for seven years and over in Burma in terms of wages and labour conditions only the future can give the answer. A reduced supply of labour may excite competition particularly in wartime and influence wage rates though not the rate of employment. The actual labouring population in Burma of Indian origin must be under half a million so that natural increase in Burma's population may operate against the favourable effects arising from restrictions on immigration. It is well to be prepared against disappointment since the immobility of wage and other conditions is as striking as the immobility of labour in nearly all cases.

Indian immigration may be a special problem and special methods may be needed to deal with it in Burma though the lesson will not be lost on Ceylon which has five Bills against one. Moreover the agreement which closes the one surviving avenue for surplus agricultural labour in India, which struck to seasonal work, particularly, during harvests, does not mention the question of relief to the class effected. That perhaps is viewed as a problem for the Madras government which has to face the question of increasing pressure in the rural areas. To enlarge the existing labour reserve will have its own effect on the cost of living and wages. The remote but most unsatisfactory result of the agreement must be sought in South India. The superficial quality accorded to Indians who will take to passports and visas like Americans cannot blind one to the fact that, except for the domiciled Indian minority, whose rights have not been respected at all times, no class comes out well after the acceptance of the Burman demand by the Indian delegation. Disappointment in India will, however, be tempered by the feeling that local opinion must have been prepared for the various and far-reaching changes contained in the agreement signed at Rangoon by Sir G. S. Bajpai, Mr. Bozman and Mr. Hutchings on behalf of this country.

Agricultural Income-tax for Bengal

When the report of the Floud Commission was published last year it was obvious that action would be deferred on the proposals. The actual task of examining the practicability of the recommendations was entrusted to Mr. C. W. Gurner whose report submitted in July last has been published recently. The Floud Commission approved a scheme for buying the Zemindars out if need be at a cost of Rs. 12 crores so that the State and the cultivator stood in direct relation and the chain of subinfendation was broken, maybe without compensation at every stage. A less contentious proposal, approved by the majority of the Floud Commission, was that for an agricultural income tax. Mr. Gurner has reviewed the report for the Bengal Government, and his advice to go slow will accord with the Ministry's present policy, especially, as the Tenancy Act of 1939, the last in a series of enactments designed to raise the cultivator up, has given satisfaction. Mr. Gurner has questioned the accuracy of all estimates made in the first volume of the Floud Commission's report and has stated that the prospect of financial profit is illusory unless the compulsory purchase is carried out in such a manner as to prejudice the likelihood of its becoming law. On legal and financial grounds alike, the report, according to Mr. Gurner, can not be the basis of action. The latter of course, are more weighty in some eyes and in this connexion, Mr. Gurner suggests that if the State took over the estate of the landlords the tenants would use their political power against the landlord, and the resultant depreciation of assets would create fresh problems, particularly, if annual collections fell below the optimum of 90 per cent. Mr. Gurner does not use this as the clinching argument, and he admits that the programme can be carried out by stages as a carefully designed experiment; when the ultimate proprietor is bought out, the intermidiate interests can wait, and purchase can be tried as regards all rights except in regard to the sharing of the produce when sub-letting is practised at the last level. Even then Mr. Gurner is against acquisition of *Khas* lands from proprietors and he has advised that compensation if paid must be on the basis of the higher limit set by the commission. The consequence must be unpalatable to the taxpayer as also the tenants, and in the case of charitable and religious trusts, the most generous terms should be given.

The alternative remedy suggested by the Commission was the imposition of an agricultural incometax. The proposal, in the view of Mr. Gurner, might be acquiesced in and the recent mention in the local press on the subject of an agricultural income tax under active consideration shows that Mr. Gurner's report has not been unfruitful. If the scheme of State purchase is deferred the tax may not meet with excessive opposition, particularly, if a suitable exemption limit e.g. Rs. 2,000 is set and assessment is made on nett incomes. If the tax is to be temporary, it can only be a prelude to State purchase, and the concessions and conditions recommended are without point. But if the income tax is to be incorporated into the revenue system, landlords would be entitled to expect government help in realising their dues so that they can pay the new tax. Mr. Gurner indeed suggests that such a bargain could be struck. There would naturally be opposition to an agricultural income tax from tea planters but experience in Assam suggests that this could be got over. The main conclusions are that caution is essential in propounding plans for agrarian reform, that State purchase would be expensive and difficult besides inviting the hostility of aggrieved nterests and that an agricultural income tax carefully adjusted would help either as a preliminary to State purchase or better still as a tax for financing agricultural improvement, and its value otherwise in promoting stability of rents would also be considerable. The tax would, of course, be criticised but other Provinces have adopted it and Bengal has certainly reason to look for new sources of revenue; for the sales tax, the petrol tax and the proposed jute tax fall on sections of the community other than landholders.

East Indian Railway

AN APPEAL FOR CO-OPERATION

About 75% of consignments are tendered for booking at the Howrah Goods Sheds after 2 P.M. each day. This concentration of transactions within a limited period of the working day leads to delays in the issue of Railway Receipts and inevitably a material proportion is carried over for issue the following morning.

Late booking on Saturday's in particular means many despatchers are not able to send for Receipts till Monday although the Receipt Issue Section works throughout Sundays.

The *Black-out* is an additional reason for consignors to tender goods earlier in the day.

PLEASE BOOK EARLY IN THE DAY.

More receipts can then be issued on the day of booking. Consignors in turn will be able to send receipts to consignees more quickly. Carts will be released before it gets too dark.

Gulf Trade

Trade between India and the Middle East has hardly been affected by the war, and it was pointed out here that trade with Arabia, Iraq and Iran increased to some extent in 1940-41. The nature and composition of trade with the Middle East in recent years can hardly be analysed, but a recent analysis of the trade of Muscat in 1939-40 shows that imports valued about Rs. 46.5 lakhs must have been in excess of exports as in previous years. The total exports valued Rs. 34.56 lakhs showed an increase on 1938-39. Of the total imports over half came in steamers and the rest by sailing vessels. The principal imports were cereals, coffee, sugar and textiles. India obtained a bigger share of the trade in rice owing to merchants ordering larger supplies. The value of textile imports fell from Rs. 13.7 lakhs to Rs. 9.24 lakhs owing to the existence of unsold stocks and the increase of prices. India provides about 60 per cent of the imports of Muscat as imports even in 1939-40 were valued at Rs. 28 lakhs nearly out of a total of Rs. 46.7 lakhs. The share of Japan

also fell but takings of Java sugar showed an increase over 1938-39. European countries have little or no trade with Muscat; and Iraq, Iran and Aden provide little. It might be said that India is absolutely dominant in the import trade and is likely to strengthen her position as she took more from Muscat in 1939-40 Total exports from Muscat to India rose from Rs. 16.71 lakhs to over Rs. 20.63 lakhs. The most gratifying feature of the trade during 1939-40 is the fact that India got a substantial share in the cement imports though Japan led in the imports of piecegoods in spite of the considerable decrease adverted to. The Muscat tariff is simplicity itself, but in February 1940 the Sultan decided to enhance duties with the result that tea pays 10 per cent *ad valorem* and piecegoods, like coffee, are subject to a duty of 7½ per cent. The highest rate of duty charged 75 per cent is on opium. Trade was apparently not hampered by the rise in duties or the increase in freights. Dates constitute the chief export but other fruits, wool and hair, dry fish, cotton are also among the exports from Muscat and Gwadur. One can review the trade of Koweit in this connection. Here, too, India figures as the principal source of imports. The trade statistics for 1939-40 show that there was a rise in imports as compared with 1938-39 while exports fell. The value of total imports by sea amounted to Rs. 72.48 lakhs as against Rs. 68.3 lakhs. Trade with the Persian Coast, Arabia and Iraq was not inconsiderable, but India was obviously the main source of imports. Total imports from India rose to Rs. 32.5 lakhs from Rs. 31.21 lakhs in 1938-39. Exports to India fell from Rs. 7,64,890 to Rs. 4,60,941 in 1939-40. The figures convey no idea of the items entering into this branch of the Gulf trade. According to a note in the *Trade Journal* there is an indirect tax of 5 per cent *ad valorem* on imports but British subjects pay only 4 per cent on articles imported by them. This privilege may explain the dominance of India in the import trade though Koweit like Muscat relies for foodstuffs and essential stimulants on India.

Supply Successes

That India is better equipped for war effort now than in the last war was not the only fact brought out in the broadcast talk given by Sir M. Zafrulla Khan last week. But there were defects and difficulties in his opinion and the progress made in the twenty months of the war is determined by the existence of retaining factors. Sir Mahommed Zafrulla also emphasised the fact that new industries could not rise from the ground because the plant, labour and tools cannot be procured easily or immediately while existing enterprises could not launch out on their new lines because they would be knocked cold after the war ended. There was again the usual reason that quick results had to be obtained and pioneering in wartime is not what is wanted. These reasons may underline the whole attitude towards industrial projects like the aircraft and motor factory. Though misgivings have been allayed by the statement of Mr. A. V. Ramanathan in reply to questions put in the Mysore Legislature, not all will agree with the view that "' war value " comes first. The war production problem, in the eyes of the outgoing Supply Member, was one of expanding output beyond the peacetime limits, and to achieve it without any great increase in equipment or skilled labour. A rapid and temporary increase, over a specified field, not one of continuous and systematic expansion of industry was demanded, according to the Supply Member whose revelations will only confirm critics in their view that wartime opportunities have been missed because of the narrow view taken by the Government of India of potentialities. The increase of 33 1/3 per cent in steel output is not likely to be taken as impressive in official eyes when compared with the extraordinary increase in shell production. But the expansion in production from ordnance factories and railway workshops etc., cannot be treated as conclusive evidence of the progress in the engineering and munitions establishments.

That the official policy is one of treating industrial progress as subordinate to war effort is fully proved by the Supply Member's broadcast. It is hardly necessary to describe this phase of industrial expansion in any terms except those employed by the Supply Member who said that shell production was spread over a wide field and many railway workshops and toolrooms were engaged in war work. A start had been made in regard to machine tools and fiftyfour firms have been licensed to manufacture machine tools. How difficult is the question of tool production is revealed by the fact that even in the U.S.A. there are difficulties. India is for the first time producing about 400 tools per month for general purposes. Exports of 600,000 shells and 150 million rounds of small arms ammunition overseas from India were also referred to as being among the feats performed by the Ordnance factories. Other achievements described were the provision of nearly 200,000 tons of structural steel for war purposes. India's single cable company is responsible for an output of 34,400 miles of tinned copper wire in addition to 16,000 miles of telephone wire. While war production has been stepped up with the help of the engineering industry, which has undertaken ship-building for the R.I.N., the many branches of civilian industry working on war orders deserve and receive commendation.

According to the Supply Member, certain fabrics produced by cotton mills are completely turned over to Government. The entire capacity of the woolen industry and a large part of that of the hosiery industry are devoted to the satisfaction of war demand. Sir Mahommed mentioned that 324 million yards of woolen cloth are needed for the Army this year. The bill for tents is put at Rs. 6½ crores and that for blankets at Rs. 1½ crores. Expansion of the nine army clothing factories has been claimed as another achievement and the thirty thousand tailors making five million garments who are turning out uniforms are recruits for the home front. It was pointed out that Madras had the distinction of producing more uniform clothing than other circles. Three million pairs of boots a year in addition to harness and saddlery come from the leather industry. The workers employed at the Government Harness and Saddlery factory have gone up from 2000 to 12,000 and two hundred outside firms are producing leather goods. Timber is in keen demand, and the Supply Member declared that half a million tons would be taken in this year alone. All of which goes to prove that the production of consumer's goods on an abnormal scale is still the sole achievement of the Supply Department.

E. F. U. Progress in 1940

Without reporting any striking increase in business or revenue the Eastern Federal Union Insurance Company's position has improved over the past year. The 1940 report and accounts issued before the recent annual meeting disclose that business in the marine branch rose to an appreciable extent. The result is also seen in the enhanced Marine Fund, now standing at Rs. 60,969-6-7 as against Rs. 25,480-2-3. Total premiums in the Marine Branch amounted to Rs. 3,48,112-2-11 and claims took Rs. 1,41,281-8-8 indicating a loss ratio of about 42 per cent. The underwriting surplus provides for a transfer of Rs. 44,584-5-9 to the Profit and Loss account. The premium in the Fire branch amounted to Rs. 4,46,201-8-5 showing a small decline on the previous year. Claims took Rs. 1,89,503-14-9 and after providing for expenses totalling Rs. 1,17,976-0-2 and commissions amounting to Rs. 96,306-11-10 the Fire branch provides Rs. 39,722-9-4. The Fund is maintained at the end 1939 level at Rs. 1,78,480-9. In the Accident branch the premiums totalling Rs. 1,26,640-14-1 showed a welcome increase on the previous year. Claims showed a marked fall as compared with 1939 and after providing for taxation and writing off bad debts this branch also yields Rs. 20,738-15-9 to the Profit and Loss account. The Fund for unexpired risks also receives an addition from the year's revenue.

The outstanding feature in the Life branch is the very high average value of the 422 proposals received last year assuring Rs. 6,65,250 on the whole. The business actually completed was for Rs. 5,12,000, a total showing a rise of over Rs. 1 lakh on the previous year. Total premiums amounted to Rs. 89,757-10 and the claims and surrenders took only Rs. 5,243-4. After providing for commissions and expenses the year's premium and investment receipts, etc., permit an addition of nearly half a lakh to the Life Fund. The new department has certainly made good and Mr. Siddiqi's satisfaction will be shared by those who like to dwell on the solid foundation laid for future progress. The balance-sheet, which shows a paid-up capital of Rs. 10,59,575 and Reserves totalling Rs. 67,678-4-4 in addition to the various Funds, indicates that the assets are well-distributed in safe investments with over Rs. 7½ lakhs in approved securities. Over Rs. 3. 2 lakhs are in debentures and preference shares of joint-stock companies; and like every general insurance company, the E. F. U. holds large cash balances shown in the latest balance-sheet at Rs. 6,44,933-9-2. The Profit and Loss account shows that investment receipts for the year amounted to Rs. 37,270-3-10. After the amounts brought in from the Marine, Fire and Accident branches the total receipts are raised to Rs. 1,42,917-2-11. After providing for expenses not charged to other accounts, taxation and fluctuation the balance of Rs. 94,284-9-10 is applied towards the cancellation of the adverse balance carried down from 1939. This wiping out of organisation expenses, etc., represents a very important achievement for a company now on the threshold of maturity. This is as noteworthy as the addition of Rs. 97,083-7-1 to the Funds, though the total investments of the company shows an increase of over Rs. 2 lakhs compared with 1939. When Mr. Siddiqi discussed the results and described the rise in over-all expenses he referred to the striking improvement in the Accident branch and the satisfactory progress shown by the Marine branch. Mr. Siddiqi's claim that the company is strongly placed is also proved by the first quinquennial valuation of the company disclosing as it does a surplus. The Life branch has shown signs of springing to vigorous life, though the Chairman declared that the compulsory deposits required by law will reduce the yield on investments belonging to the Fund and some kind of relief must be made available to young companies.

THE stalemate of twenty long months has ended. The Viceroy chose to retrace a step or two to enable resumption of the game. Other moves have been taken; and the game regains a little of its excitement, a great deal of interest and some of its innate potentialities of development. For me, that of itself is enough. Not to shy at the mixed metaphor, the stalemate was bringing on Government and people alike a sort of creeping paralysis which has no end but death, death alike for the Congress and the League, for the parties and for the Government. Something was needed to shake off this atrophy. Congressmen were becoming increasingly restive. The country was having a grave sense of disquiet, induced as well by the spread of the war from abroad as of communal rioting within. The communities were flying farther apart. Unable to hold ourselves together, incapable of bringing pressure on the Government to create better conditions at home, we could hardly think of how to acquit ourselves in the present international situation. From all sides came the question, "What is the Congress doing?" There was a note of despair and disgust, anguish and anger, all over the country. The most faithful of Gandhiji's folowers were found to leave the fold. Surely, something was brewing. And while all eyes were fixed on the Congress, the Viceroy has sprung on the country what, in fact, if not in intention or effect, is a surprise. He has gone back to an earlier announcement, in which he said that the expansion of the Council would not be left to depend on the action of the political parties, but would be proceeded with. This announcement had for a long period been reduced to a dead letter. Mr. Amery carefully forgot it altogether. He evaded the unwelcome reminder of it which the non-party leaders' conference gave him. And at every opportunity afforded by convenient questioners in the House of Commons he effected a fresh underlining of the terms of the August declaration of the Viceroy. But now, as if all of a sudden the plans for the expansion of the Council have been proceeded with and brought to a successful conclusion. The new team has been announced. The parties and the public are slowly trying to clarify their reactions to what has happened. The task of defining the attitude to it is yet to be essayed, except in one notable instance, that of Mr. Jinnah. Mr. Jinnah, of course, has an easy task. For Mahatma Gandhi, there are complicated questions of policy, of principle, of consultation with colleagues, of obedience to a higher authority in the organisation to which he belongs. But for Mr. Jinnah, the insidious erosion of power in the party which has been brought about should suffice to seal his mind against the events in Simla. Otherwise, there is no violent reaction to what has happened.

Yet there is no doubting its significance. And, as in most cases, its significance is derived from what has gone before and conditioned by what it can lead to. The former is important; because you cannot obviously judge the latest development except in relation to a possible alternative; and alternatives are always limited by prevalent conditions and the immediate past. But we cannot be content with a certain course of action merely because none other was feasible. We have to judge a contemporary event by what had happened before and what we want to see happening in the future. If it is generally agreed that in the conditions obtaining in the country a week ago, nothing indeed was possible, except a dangerously radical overhaul of the Congress, and that the political deadlock was death to the country as much as lock-up for Congressmen, the initial feeling of relief that something has been done is by no means irrational. That is why I started with saying that it is enough for me that the stalemate has been ended and movement is again possible on both sides.

It will hardly do to talk in terms of chess which can only be an analogy of limited parallelism with politics. The question that haunted us all these twenty long months is: How can Indian Nationalism, whether represented by the Congress under Mahatma or by some other agency, become a powerful and constructive force? As things stood, no heartening answer to this question was possible. The Congress had had a series of triumphs. It had captured the popular imagination. It had impressed the Government with its hold on the people. It had won the

elections, manned governments, demonstrated its administrative ability. It had done all that. But the last lap found it lame, or virtually so. Or rather, if you would be charitable, it was virtually maimed and forced to withdraw into its ethical or ideological retreat of non-violence. Whatever it is, the Congress could no longer be counted as the active agent for winning India's freedom. It could not coerce the Government. It would hardly face the Muslim League which, in the language of chess, was the pawn with which the Government checked the Congress to the point of bringing about a stalemate. It is true that the Government bound themselves to do certain things, if the Congress and the League would compose their differences. But the League improved on the Congress principle and chose to non-cooperate alike with the Congress and the Government. The worst features of a triangular tuzzle were then in evidence. It was clear then that to reduce the angularities of the Indian political problem, one of the angles had to be knocked off. The Congress was by no means equal to the task of overpowering or winning over the League. Nor, for the matter of that, was the Government, though, in one sense and to some extent, the League was its creation. The attitude of the League, if not the League itself, was a huge obstacle in the way of any kind of movement. It stood in the way of the Congress imposing its will on the Government. And no less did it stand in the way of the Government making up with the Congress.

So long as the Government had no reason to long for an Indian Government at the Centre, these conditions were not found to be irksome. The Government could even gloat over the discomfiture of the parties in general and the Congress in particular. But such conditions have a natural limit of time. Even if there were no war abroad, even if Germany were suffering crushing defeats at the hands of her opponents, even if the Axis had no partner in the Far East, the sands of the stalemate would still run out. But none of the conditions I mentioned is satisfied. The stalemate was getting intolerably stale; and man's love of freshness was getting the upper hand. The war drums are rending the eardrums. To the Battle of the Atlantic has been added the Battle of the Arctic; and the turn of the Pacific and the Indian Ocean is not far off. Britain's allies begin, not unnaturally, to argue, that, if Britain imposes a handicap on herself, it is a handicap on them as well. Leave questions of principle aside. If Britain will not bring the full might of India into play in this war, with what face can she ask her allies and associates to give of their best?

Considerations like these strengthen the time factor in ending the stalemate. But the basic problem was to get out

of the vicious triangle. And the obvious way out was to circumvent the Congress and the League alike. There are as good Muslims outside the League as inside it and good nationalists outside the Congress. Get them together into the Council. The country does not need to be told why something better was not done. The Congress knows why it should acquiesce in it. And if leadership in the League does not know better than to oppose the move, the indiscretion may well prove the League's salvation. And last but not least, the new Council is not likely to burke the fact that it is only second best.

The expansion of the Council is no matter for regret. Our first instinct has not led us wrong. It is no crushing reverse for Indian nationalism. It is no surrender to its enemies within the country. It is no sabotage on the part of the politicians who have agreed to join the Council. It is wriggling out of a difficult position, for the Government, for the parties and for public men. But is it a matter for jubilation? Is it another milestone in the path to freedom? Is it the assurance that the country wants, that the unity and integrity of the country will be ensured and furthered?

Though I am full of hope, I refrain from being dogmatic. I shall be content with examining the potentialities of the situation resulting from the Viceroy's action. If you agree with me that nothing could have been done in the conditions obtaining a week ago towards what has been very expressively termed nation-building, then the test of the present position is whether it can—whether it will is another matter—enable all men of goodwill to put their hands to the work. Now what is the requisite of nation-building? The growth of a party intensely patriotic and severely practical, which will neither pick up the crumbs of power nor ask for the moon, which will make the most of the British connection but will not indulge in the stupid claptrap of divine dispensation, which will deal fairly with other groups, but will not let them stand between the people and their rightful destinies, which will have an unexceptionable ethics of its own, but not one that suggests suicide on a communal or national scale. The Congress, which could have been such a party, if its leadership had been circumspect and energetic, now needs more or less radical transformation before it can take on this role. It is like a tank stuck in the marshes. Some one has to provide a hard, if uneven, surface for it to crawl over and come into action. Some one has to put new spirit into its crew, give it a new technique, new objectives. The Muslim League went all out for negative gains and won what I may say a Pyrrhic victory in a war of attrition.

The present Council composed as it is of dissentient members of the League and nationalists with Congress sympathies must be capable of providing for the League an honourable retreat from Pakistan and obstructionism and for the Congress a bridge for constructive work, if not co-operation with the Government. I draw a distinction between constructive work and co-operation, because I believe that, while the Congress is engaged in the very difficult and delicate task of revising its creed and reforming its internal organisation—that is, the kind of revision and

NO. 3. THE UP-COUNTRY DEPOT

The problem of ensuring a regular supply of Kerosene throughout India is very considerable. Of major importance in the smooth-running organization is the up-country Depot. Each of these Depots stores sufficient quantities of Kerosene to meet any possible demand from the area it serves.

It is due to the large number of Depots situated at selected points that Burmah-Shell is able to supply Kerosene to the people of India with machine-like regularity.

Burmah-Shell has sunk vast capital in this important link in the chain of distribution which starts at the Company's Seaport Installations and ends in 600,000 villages.

(From Our Correspondent)

Simla, July 22.

IT was only this morning that the Viceroy's final scheme for the expansion of the Central Government's Cabinet was made known to the public. The original proposal was only to have five new appointments—Sir Sultan Ahmed for Law, Sir Akbar Hydari for Information, Mr. Aney for the Education and Overseas portfolio (in place of Sir G. S. Bajpai proceeding as Agent General to the United States) and Mr. E. Raghavendra Rau for Civil Defence. Evidently, it was thought that the inclusion of Sir Sultan Ahmed and Sir Akbar Hydari would not only be sufficient to satisfy the Muslim community but owing to the eminence of these individuals even Mr. Jinnah could not raise any objection to these names as unrepresentative. Unexpected opposition came however from the Punjab Ministerialists who insisted on a Punjab Muslim being included. This agitation caused a eleventh hour decision to appoint two more—Sir Firoze Khan Noon for Labour and Mr. N. R. Sarker for the Education, Health and Lands portfolio (excluding the Indians Overseas Department which will be in the hands of Mr. Aney). The new Cabinet will consist of 13 members including the Viceroy and the Commander-in-Chief. It is not, however, expected that the new Cabinet will be able to assemble in its full strength before the latter half of October.

* * *

Some portfolios like Law and Supply, or Commerce and Labour, have had to be split up for administrative reasons as the combination of two big Departments under one member was not a satisfactory arrangement—specially owing to the increased work caused by the war. Certain new Departments like Information and Civil Defence (which includes A.R.P., essential supplies for the civil population, prevention of panic, etc.) have also had to be created by reason of the war emergency. The bifurcation of the Education Department was evidently due to the last-minute decision to include two more members—as a matter of fact there was no proposal to have even a separate Labour portfolio for some time to come. The scheme has also some political significance as it is an attempt to implement the August offer, viz., expansion of the Council by the appointment of representative Indians so as to provide a non-official majority. In other words, it was to be expansion, not on party lines, but by the inclusion of non-party men. It is claimed in official circles that the Viceroy has selected really representative non-officials of the highest standing.

* * *

In effect, it introduces a sort of dyarchy for the Central Government. Some important Departments like the Political Department, External Affairs, Defence Co-ordination, Reforms, etc., are already in the hands of the Governor-General and so outside the sphere of the Central Government's administration. The four European members of the Viceroy's Council (including the Commander-in-Chief) have the monopoly of the major Departments which really form the backbone of the Central Government—Defence, Finance, Home and Communications. One of the main complaints against the new expansion scheme is that the key portfolios have all been concentrated in the hands of European officials. It is asked, for instance, why the Finance portfolio cannot be given to Mr. N. R. Sarker, who has already achieved distinction as a provincial Finance Minister. There is also some surprise that the Communications portfolio, which, it was understood at the time of the negotiations last year with leaders of political parties, would be given to an Indian non-official, has not been given to an Indian member either in whole or in part. So far as the Indian side of the Executive Council is concerned, the effect of the new proposals is that the three portfolios now administered by three Indian members will hereafter be administered by six Indians and that two comparatively minor portfolios—Information and Civil Defence—have been created for the inclusion of two more Indian members. It is not a very satisfactory arrangement from the point of view of the Indian members so far as the distribution of portfolios is concerned.

* * *

From the official point of view, the changes in the Viceroy's Council giving an overwhelming majority of seats to Indian non-officials form a striking departure from past traditions. Whatever may be said of the portfolios held actually by the Indian members, there is one way in which they can make effective use of their majority and try to make a beginning in Cabinet Government. At present there are only two Indian non-officials as against five officials including the Viceroy in the Viceroy's Council, but as in future they will be eight in number, they can join together under the leadership of one of their senior colleagues, like Sir Akbar Hydari—holding the position of Premier for the Indian section if not for the whole council—decide on a common programme and policy for the whole Government and fight for its acceptance. As they enjoy a majority, they are in a position to enforce it, but if they are overruled by the Viceroy, it is open to them to resign in a body. Unfortunately the Viceroy's Council has not for some years been working as a single Cabinet, for in practice, though there is no warrant for it in the Government of India Act, each Member has been acting as an independent head for his particular Department. A new convention, more in consonance with the spirit of the Government of India Act itself, can be initiated by the Indian non-official members by insisting that the Governor-General-in-Council should work as a single Cabinet following majority decisions on all questions of policy and holding itself responsible collectively for the entire field of the Government of India's administration and not as hitherto each member holding himself individually responsible for his particular Department and nothing more.

* * *

The selection of Sir G. S. Bajpai for the Agent Generalship in the United States has given great satisfaction. An eloquent speaker, a fine scholar, a distinguished administrator—he is not the man who can fail to make an impression anywhere. He can get many things done on behalf of India and try particularly to stimulate greater interest in America in Indian affairs and promote better understanding between the two countries. He is expected to reach the United States some time in October.

COSSIPUR - - CALCUTTA

(From Our Correspondent)

Bombay, July 23.

BOMBAY feels bucked by the news that the mill industry is going all out to satisfy war demands. A quantity of 300 million yards in a year for 6½ crores of rupees; that takes some doing. Many think that Sir Mahomed Zafrulla's broadcast represents the first attempt to publicise the war effort of Indian industry. Donations are ticked off and gifts are boosted every now and then but the continuous strain on both employer and worker deserves special acknowledgement. Before Mr. Churchill describes production achievements and lapses in Britain the Supply Member has let us know what has been happening in India. The fourfold and forty fold increases adverted to by the Supply Member give us a measure of wartime expansion. But many will like to see the correct and full right to know what has been going on and the assurance that handloom and powerloom alike benefit from orders for woollen goods is a reminder that both sections of the industry in the U. P. have gained much through the war. Leather, hosiery and other civilian industries are working overtime for the armies in the field. But the public wants a regular supply of news about the quantities ordered and despatched as also the extent of orders coming from the Eastern Group. The Council has not had enough publicity, and criticisms are still heard as to the limited scope of functions of the Indian representatives.

The railways are glad to report that normal running has been restored on all lines. The Bombay-Poona section gave most trouble but the G. I. P. preserved communications with the help of alternative routes. How quickly the trouble has been got over is now widely known, and the railway's defence that the rise in prices is not due to their inability to stand up to present requirements has been readily accepted. There are, however, a few who think that Bombay would have been vastly better off during the monsoon if the roads were quite fit for traffic. It has been pointed out that concrete roads were hardly touched by the floods in the Ghats. The Bombay-Poona and Bombay-Nasik roads in parts were absolutely serviceable, and a motorist has suggested that if the entire stretch of the roads were modernised, the breakdown of railway traffic owing to unforeseen causes could be easily dealt with. A letter in the papers shows attention to the news for improvement and regular repairs. The argument that money and men for such purposes cannot be had is rejected on the score that roads are vital in wartime. It is urged that sections of the two important roads are in bad condition and the sand concrete sections only bring home the need for improvement. There has been considerable agitation in the last few months as regards road transport. The railways are encumbered by military traffic and delay in delivery of food supplies is said to be among the reasons for the profiteering reported in Bombay.

War has not affected the progress of the Asian Assurance Co. At the annual meeting last week Mr. G. N. Rajpal, the Chairman of the company, reported that reported that despite a fall in new business the company's position was quite satisfactory. Mr. Rajpal who represents the policyholders, referred to the cooption of Mr. de Heredia the son of a former Managing Director to the Board of the company and the department of Mr. Jamnadas Mehta, the former chairman, after the adoption of a resolution by the Board. The most satisfactory feature disclosed by the report is the net appreciation in the value of investments belonging of the company. Discussing the classified summary of assets, Mr. Rajpal mentioned that all the debentures and preference shares held by the company had gone up in value. The Asian Assurance Co. is paying a dividend of 6 per cent on its shares and the Bombay office, with its assets carefully husbanded and a safe record of steady if limited progress, can count on keeping up the rate of progress.

A feature of some importance to all local markets is the improved demand for sugar. It has been claimed that prices have risen by about one rupee per maund as Java sugar went up by Rs. 1-9 per cwt. Improved prices for African sugar have been put down to the bullish sentiment ruling at present. It is known that demand in Cawnpore has revived suddenly, and substantially too, as Bombay started buying on a big scale. Forward trade turned brisk and this may become brisker if the anticipation of a reduction in the area under cane is fulfilled. Much of the improvement in Bombay is attributed to expansion in re-exports. Java is a free seller at parity rates and her readiness to make an agreement with Japan showed that supplies are large. As supplies in the main ports are limited, there is a possibility that Bombay will be called up on to sell more sugar in the near future, and this will help to keep prices steady at the rise, particularly, as the daily offtake exceeds daily arrivals. The firmness of cotton, seeds and wheat assisted in the advance in sugar rates. The brighter tone in markets must owe something to the withdrawal of the curfew order. For about two months the city was distraught and gloomy, and the quenching of the final embers of strife was delayed by the dangerous leaflets given away by misguided men. Both Ahmedabad and Bombay must have lost substantially on account of the riots and many do not know how to present and press claims for compensation.

(Continued from page 157)

reform necessary for its co-operating with the British Government—it can resume its constructive work by returning to office in the Provinces. Every organisation in India is suffering from a sort of **mesalliance.** The Congress is a composite unit of practical nationalists and idealists with ethereal concepts of non-violent internationalism. The League has a few extremist advocates of Pakisthan and a large body which asks for no more than safeguards for the minorities. The Government is a mix-up of reckless diehards and men with a sense of enlightened selfishness. A bifurcation is as inevitable as it is indispensable. The President of the Muslim League has suffered the mortification of seeing the most distinguished of his followers walk into the Defence Council. The diehards in the Government have had to acquiesce in a non-official majority in the Central Cabinet. The Congress, too, must suffer a few of its contingents to go and man the provincial governments with or without some manner of fresh understanding with the co-operators of the Muslim League.

It is up to the new members of the Viceroy's Council to bring about this result. On their ability to do this and to work on the Council as a compact majority with a sense of collective responsibility depends their usefulness to the country. Will they do it, one may ask. Looking into the personnel of the new Council, I see no reason for discouragement. There is hardly any among them who would let his job survive rude shocks to his sense of national self-respect. After all, who are the new councillors? Mr. Aney, an altogether rare type of Congressman, who has never accepted the Congress policy wholesale, but who neither went over to the opposite camp nor indulged in the cheap sensation of vitriolic attacks against the High Command; Mr. Nalini Ranjan Sarker, a man of acknowledged and indisputable ability, with an inborn love for concrete work, an eye for opportunity for service as for self development and a genius for keeping his links with opposing groups so as to conserve his usefulness; Sir Homi Mody, an embodiment of big business, with an outlook and an understanding in keeping with its aims and aspirations, Sir Akbar Hydari, a Minister of the modern type emerging from the States which are now in the transition from the medieval to modern age, Sir Sultan Ahmed, an eminent lawyer and a flower of Muslim culture. None of them hankered either for the emoluments or for the glamour of high office. They have been keenly alive to the parlous state of our politics and of our country. Some of them have bemoaned the misguided zeal of their co-religionists for secession. Others there are who have been alive to the sad deflection of nationalist energy and enthusiasm. And a few have viewed with concern the waste of opportunity for economic development. The only need is for them to learn to work together, to mingle discretion with zeal, to temper firmness with tact, to impress the British Government that, Viceroy, they have to be reckoned with as the trustees of the people.

For a fairly long period Burmah-Shell has striven to encourage originality in Indian commercial art and the most practical expression of the desire to reward local talent came early this year when the Art in Industry Exhibition was arranged in Calcutta. The exhibits were drawn from all parts of this country, and in spite of the tendency to ignore the rules, the wide range of exhibits and the strong streak of imagination shown in most sections must have gratified the sponsors, particularly, Burmah Shell which has striven to impress on local artists the value of an authentic native tradition. The souvenir now published presents the Exhibition on a miniature scale for many besides the dilettanti and I should say that the judges, the competitors and the Organising Secretary have very good reason to feel pleased. Jute and Jute Manufactures

(From Our Correspondent)

Calcutta, 24th July.

THE reluctance of the Jute Mills Committee to exercise their powers to increase working hours as a check on the periodical "ramps" which are occurring in the Fabrics market is somewhat disquieting. Again during the past week there have been heavy speculative operations which have pushed prices up to quite unjustifiable levels. Undoubtedly these movements in most cases start as a result of overseas demand though this is not infrequently smothered and lost sight of in the rush of purely speculative buying which the short stock position makes possible. But the mere fact that overseas demand is there at all at anything like present price levels provides sufficient justification for an increase in working hours in order to meet that demand at price levels which cannot be stigmatised as "ransom rates." For it must be remembered that Mills are not benefitting, except indirectly in the forward positions, in the unduly high ready prices which are periodically recorded. These fancy rates go to Bazar holders of goods, but the stigma of holding up the world to ransom in the price of jute goods is nevertheless thrown on the Mills. Moreover, as we have repeated *ad nauseam*, the main virtue of jute goods' lies, or ought to lie, in their cheapness and any departure from this virtue lets in competitive fabrics or fibres. It is therefore shortsighted policy to permit jute goods prices to soar to unjustifiable levels when the Mills have the controlling factor in their hands in the shape of reserve production which can be called upon at any moment to redress the balance of the market. Recent market movements clearly indicate that stocks of jute goods have been permitted to drop to unduly attenuated proportions, to such an extent that when any surplus freight becomes available, as has been the case just recently, the way is paved for a speculative ramp. It has been credibly reported in the past week that freight for gunnies was going abegging for lack of ready goods to fill it, and this at a time of general freight scarcity, and when mill godowns are supposed to be full of goods awaiting shipment! There is something far wrong for a situation like that to arise and the obvious remedy is for mills to be prepared to carry larger stocks of goods, not only that any surplus freight may be readily filled. but also as a salutary check on excessive Bazar speculation.

It has been argued that longer working hours would mean a greater consumption of jute and a consequent further rise in the price of raw material. But we do not believe that such a rise would necessarily follow. Jute Fatka, regrettable as it may be, still exerts a strong influence on mofussil jute markets, but Fatka is itself greatly influenced by movements in the Fabrics market. Therefore it is more likely that any tendency to higher jute prices due to an increase in Mill consumption would be counteracted by the influence of a lower level of fabrics prices. Statistics show that there is ample jute for all probable requirements. Mills' stock of raw material must average over 7 months consumption. Mill stocks of jute at 30th June 1940 amounted to 20 lakhs of bales. Their purchases during the season just closed are estimated to total 70 lakhs of bales, giving them a total of 90 lakhs of bales out of which they have consumed 55 lakhs of bales, leaving them at 30th June 1941 with 35 lakhs of bales in stock. Outside of Mill stocks, there are estimated to be 15 lakhs of bales in Calcutta bazar and presshouse godowns. There is still a balance carry-over from last crop estimated at fully 30 lakhs of bales upcountry, while the most pessimistic estimates of the New Crop do not put the yield at less than 60 lakhs of bales. There is therefore a visible marketable supply of over 100 lakhs of bales. Export demand so long as war conditions continue is not likely to exceed 12 lakhs of bales. Mills working a steady 45 hours consume 60 lakhs, working 50 hours 66 lakhs, or working 54 hours 72 lakhs of bales. So that even if mill working hours were increased to 54 per week the total world consumption of raw jute would not, in present circumstances, exceed 85 lakhs of bales before 30th June next year, leaving mills still with 35 lakhs of bales in their godowns at that date and unsold stocks to the extent of at least another 15 lakhs of bales in India. Obviously there is no shortage of raw material to deter mills from increasing their working hours, nor is there any logical reason to apprehend a rise in the price of jute if mills decided so to do. Rather do we suggest that the price of jute would subside in sympathy with the price of fabrics, and there is scope for such a decline without depriving the cultivator of a very handsome return on his crop.

Comment on the proposed Jute Taxation Bill crystallizes round the point that much more concrete schemes for the absorption of the proposed taxation are desirable before the Bill is enacted. Merely to hand Government a packet of shekels wherewith to prop up a rickety market, as they attempted to do in June 1940 and which 50,000 bale baby they are still holding, is not considered a reasonable demand. Not to mention that the enactment would result in handing a premium of two annas per maund to Mills situated outside Bengal for we do not see how the impost could be collected on their consumption.

Where, today, steel serves the mighty warmachines of the world, tomorrow it will be the strength of steel which carries the cargoes of peace-time. Now steel fills a thousand holds with cargoes of destruction. Tomorrow it will hoist food and sustenance aboard, to be carried surely and securely to the four corners of a war-weary world.

To withstand the immense strain imposed on them, the smallest of details in modern structures are made of steel.

JUTE

Calcutta, July 24.

THE jute market has had a fairly quiet week. Loose jute has been fairly steady as mills are said to have bought Old Crop Jat at Rs. 8 and paid Rs. 8/12 for European Bottoms. New Crop was quoted at Rs. 12/4 for Tops and prices asked on Wednesday went up by 4 annas per maund for the three main descriptions without buyers showing any inclination to follow the rise. Pucca bales for August shipment were in moderate demand, and the steady rise in Futures since the weekend explains the rise in Dundee Tossa to Rs. 55 per bale. The firmness of both jute and hessian until Wednesday indicated that mills would emerge as buyers, but the market has reacted since owing to the disturbing news from the Far East. The only transactions reported as between mills was the buying of outport Tossa at Rs. 39 per bale and this shows that old crop will long act as a deadweight. Since the appearance of the Bengal Premier's statement last week and the hardening of a general belief that Jute prices must keep up in sympathy with the general upterend in commodity markets little has been heard of the possibility of jute prices being upset by a buyers' strike. That the mills are not at all eager to force hessian prices has been long known but the bazaar has pushed up prices to new higher levels. The closing in the Futures market was higher at Rs. 64-8, on Saturday Between Thursday and Saturday the market remained fully steady though business was sparse. Occasionally dealings in Bottoms were reported, but the advance in September futures from Rs. 63 to Rs. 64-8 did not interest mills. It might be argued that hessian has gone up, but the reason furnished is hardly convincing. For it is not export demand but speculative buying that had lifted 9 porters over Rs. 20 and 11 porters over Rs. 25. The current firmness of Heavy Goods is based only partly on the rise in the rates for fabrics. The daily reports dwelt on the reserve of sellers, while emphasising the paucity of buying, and the changes apparent since Wednesday show that every hectic week is followed by an idle week.

The market showed signs of weakening on Wednesday when Futures came down from Rs. 67-6 to Rs. 65-2. The fall in the share market must have an adverse effect, and fluctuations must necessarily increase checking thereby any increase in mill buying. The natural result must be a decline in speculative activity for profit-taking has come and gone. This may not hamper immediate recovery as the undertone must be strengthened. The reluctance of the market to see new crop go up to giddy heights cannot be deduced therefrom. Most would prefer to see how the market shapes, for the weakening of the monsoon will influence crop reports, and the next estimate will certainly push prices down. As mills consumed 55 lakhs of bales in the past year there must be a good deal of jute and that must be added to the new crop though the latter may come on the market slowly. For the moment interest in the new crop is small and the decline in Futures has made prediction as to prices difficult.

JUTE MANUFACTURES

Calcutta, July 24.

When Nine Porters advanced on Monday to Rs. 20 for Ready and Rs. 19/2 for August delivery it looked as if hessian would show exemplary firmness. Sellers were disinclined to sell at the advance and the weekend had evidently led to a revision of ideas as to the course of prices. Business prior to the weekend was small and 11 Porters at Rs. 25 and 9 Porters at Rs. 19/14 were the closing rates on Saturday. Business on Friday was on the small side for profit-taking on the previous day induced lassitude. On Friday 9 Porters stood at Rs. 19/12 while 11 Porters had risen to Rs. 25 owing to sellers having raised their limits. The undertone was described as firm, though raw jute showed only a slight rise that day. The next day witnessed an increase of buying interest in 11 porters for July and August delivery. Buyers' limits were lower and the closing rates were Rs. 25 for July Rs. 24/4 for September Rs. 22/2 for October/December and Rs. 20/4 for January/March delivery. The curtailment of business owing to the rise in prices was again a feature, and it is scarcely necessary to contrast this with the extensive profit-taking reported on Wednesday. The upward trend was in evidence on Tuesday as Nine Porters rose to Rs. 21/2 and 11 Porters to Rs. 26/2 from Rs. 25/8 and Rs. 21/4 was offered for 11 Porters for January/March shipment. The closing of Jute Futures at Rs. 67/8 must have contributed to the rise, and the subsequent reaction must in part be due to the fall in Futures to Rs. 65/2. There was a pause in buying in the wake of profit-taking, and rates for both Nine Porters and Eleven Porters receded. The close of dealings saw Nine Porters down to Rs. 20/8. Though these rates show certainly considerable gains on the previous week the impaired tone was obviius. The further reaction noticed on Thursday was inevitable on any reading of the day's news.

Sellers predominate at present in both jute and hessian and the price trend is both unsettled and uncertain. Jute has come down to Rs. 63-14 and Nine Porters at Rs. 20/2 and 11 Porters at Rs. 25 are quotations denoting an easier tendency. The rates for forward delivery too are lower in consequence and the narrowness of the margins between July, August and September delivery may be due to the end of month feeling and also the diversion of interest to near deliveries. Export demand has been dull and the recession in Heavy Goods also to-day illustrates what has been said previously about the danger of a rapid rise in manufactures. It has been reported that Cornsacks have come down to Rs. 39/6 from Rs. 40 and B. Twills have receded to Rs. 38/12 from Rs. 39/8. The rates for August shipment certainly went up earlier in the week but profit-taking on Wednesday and the general easiness in all markets were responsible for the fall to-day. Even then quotations for jute manufactures show a measure of improvement, greatest in the case of Heavy Goods. The uptrend in cereals, sugar etc. may contribute to a quick recovery without waiting for a positive lead from shippers.

COTTON

Calcutta, July 24.

The descent of cotton prices on Wednesday undoubtedly reflected the nervousness generated by news from Tokyo. The Bombay cotton market took a bad knock after showing a steady rise over a week. The rate for Broach April, May came down to Rs. 291/12 from Rs. 303. Though it will be urged that the market has gone up on many days it is feared that news the Far East will precipitate selling and the spectacular rise in Oomras will be checked once for all.

The profit-taking on Tuesday was a signal to the bulls who still go by the Bureau estimate of a smallish crop. Until Wednesday the trend was upward and the New York cable don't favour short position in any commodity was a tonic for the Bombay bulls. Bears were driven to cover as soon as it was learnt that New York had gone up again. Wheat and linseed too have gone up said others; that was another bullish factor and occasional realisation had no effect on the trend up to Tuesday. The steady rise in New York futures has been followed by hedging but Wall Street's firmness was communicated rapidly to the Cotton market. But the mid-week reaction in Bombay is more serious than expected as Broach July/August has dropped to Rs. 264 and the lower trend in other markets must affect prices again. The steadiness of New York with Spot over 17 cents can have little effect at present in Bombay unless it be that New York gives direct support on the belief that Japan will not act as an ally of the Axis against Russia.

The recession in Oomras is less than expected and prices on a down-wards drift show that the restriction scheme referred to by the Indian Central Cotton Committee will induce mills to ake Oomro. Much relief cannot be expected from the export organisation approved last week.

PIECEGOODS

Calcutta, July 24.

The undertone has remained strong and the advance in cotton prices has been discounted. The revival of upcountry buying reported from Bombay shows that piecegoods will be little affected by bad news from Europe or Japan. Increased activity in snot goods owing to the rise in rates and the difficulty of getting forward orders has been reported, and dealers looking forward to expansion of demand, having regard to limited stocks in the mofussil, will probably be reluctant to sell.

The decline of imports envisaged on account of Japan's military activity will help to keep prices up and the pressure on home supplies must increase. Mills are not eager sellers at present the increased demand for yarn with forward prices well ahead shows that handloom weavers are expected to make good the temporary shortage. Yarns of all grades have been bought even though prices had improved after the reaction earlier this month.

The limited supply of British goods has led to increased sales for standard lines will be hard to get and prices in India are rising. Only limited business has been reported in Japanese goods and the concentration of shipping may interfere with August-October shipments. It has been reported that speculative buying has influenced prices in Bombay. Grey goods have risen and Dhoties are in keen demand. The keener buying of fancies has been stimulated by the slight rise in rates or voiles and prints. The moderate demand for Japanese goods shows that dealers are not anxious to place orders ahead particularly as replacement rates are firmer than ever. It is now surmised that export demand will broaden and holders of stocks will not be ready to dispose of goods in the event of prices going up further.

Stock Markets to-day and to-morrow

RALLY FOLLOWS REACTION

THE week's dealings both in Calcutta and Bombay markets, though by no means favourable, have not been devoid of interest. On Monday and Tuesday there was a definite improvement in prices followed by a decline though renewed buying led to a satisfactory rally. The pace during the close of the week was again set by the developments in international politics. The fate of markets is so governed by political considerations that the news of Vichy's surrender to Japan caused an immediate reaction on Wednesday and prices closed in most sections below the best levels of the week. The position is now beginning to take some sort of shape and the tone of the market today indeed suggests that the course of prices is now upwards. It is, however, impossible to forecast the trend of events since a renewed political alarm might easily precipitate another landslide.

* * *

All the leading commodity markets wear a depressed appearance this week. In view of the prevailing political uncertainties it is not at all surprising that the commodity markets followed the same course as the stock markets. The following are the highest and lowest levels touched during the week:—

SHARE PRICES

	Lowest 24-7-41 Rs.	As.	Highest 22-7-1941 Rs.	As.
Tata Iron (defd.)	2,050	0	2,121	8

Bengal July	160	8	170	0

* * *

The net profit of the *Bararee Coke Company, Limited* for the half-year ended 31st March, 1941, reveals an increase of about Rs. 1,37,132 over the figure for the previous half-year. This is the highest profit made by the Company since its inception. The net profit, before providing for taxation and depreciation, is Rs. 3,24,643 against Rs. 1,87,511 in the previous half-year. The amount of depreciation stands at Rs. 18,031 against Rs. 17,257 while the provision for Taxation amounts to Rs. 1,56,000 against Rs. 66,850. The dividend declared at 11 per cent is the highest recorded by the Company as compared with only 9 per cent in the previous half-year. The amount carried forward is slightly higher at Rs. 58,753 against Rs. 40,141 brought in.

On the announcement of the increase in the dividend the shares of the Company have already risen to Rs. 26-8 from Rs. 20-14. In view of the sound financial position of the Company and the satisfactory earnings record the shares have admittedly scope for further capital appreciation. The yield on the shares at the current price of around Rs. 26-2 works to more than 8.3 per cent, tax-free.

* * *

An increase in raisings as well as in despatches coupled with the absence of labour trouble has enabled the *New Manbhoom Coal Company, Limited* to report a big increase in the earnings for the half-year ended 31st March, 1941. The net profit, before providing for Taxation and depreciation, is nearly double the profit earned in the previous half-year at Rs. 88,203 as compared with Rs. 49,798 for the half-year ended 30th September, 1940. The sum set aside for depreciation is Rs. 16,793 as against Rs. 16,348, while the sum placed to Taxation Reserve is higher at Rs. 17,000 against Rs. 9,000. The big increase in the provision for taxation has hampered any increase in the distribution and the directors have maintained the dividend at 30 per cent per annum.

Development of the new area of 13 and 14 seems to the South of the 200-ft. upthrow fault has continued to make further progress. Output from No. 7 pit has steadily increased during the last half-year and is capable of further expansion as the development of 11 seam proceeds. Prospects for the current half-year may be considered to be good. Full despatches are being maintained to the Indian Iron & Steel Co., Ltd. The shares, quoting now around Rs. 39-12 x. d., look like going up as the Company has secured new contracts with the State Railways which will keep all pits fully occupied.

* * *

The earnings of the *Reliance Firebrick & Pottery Company (India), Ltd.*, for the half-year ended 28th February, 1941 are the best for the past five years, the net profit, before providing for taxation and depreciation, being Rs. 70,064 as compared with only Rs. 39,574 in the previous half-year. The rise in the profit would have been more pronounced but for the difficulty in securing sea freight which adversely affected certain deliveries. The amount set aside for depreciation is Rs. 35,000 against Rs. 33,352, while the allocation to Reserve for bad debts stands at Rs. 7,500 against Rs. 2,500. A sum of Rs. 10,000 has also been provided for Taxation, while no provision was made in the previous half-year. The directors seem to be conservative in the declaration of the dividend. It is not out of place to mention here that when a profit of Rs. 66,532 was made for the half-year ended 28th February, 1938, the directors declared a dividend of annas six per share, whereas they have recommended only a dividend of annas four per share for the half-year under review even when the profit is higher than in the period given above. The dividend declared now should, however, be considered rather satisfactory as no dividend has been declared since August, 1938. The amount carried forward is substantially higher at Rs. 10,772 against Rs. 8,158 brought in.

Sales were satisfactory and the Works were fairly and fully employed. The shares are now quoting higher at Rs. 10¼ C. D.

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, July 25.

Business in the local Stock Exchange, especially during the close of the week, has been uninteresting and rather disappointing, last week's strength having disappeared under the influence of adverse political news. Prices during the last three days have been fluctuating in an irregular manner. The steady rise in prices, witnessed in the early part of the week, lost its momentum and prices continued to drift following the confirmation of the news of Vichy's surrender to Japan. Prices are likely to be unduly sensitive until there is some evidence of reviving confidence.

Government securities have shown a steadier appearance, sellers being continued to be scarce. The price of 3½ per cent Paper remained unchanged during the major portion of the week at Rs. 96, but at the close the price was a shade easier at Rs. 95-15. Among other loans, 3 per cent 1963/65 came to business at Rs. 95-2; 4 per cent 1960/70 at Rs. 110-6; 1945/55 at Rs. 111-10; 1955/60 at Rs. 113-10; 3 per cent 1946 Defence Loan at Rs. 102-2 and 1949/52 at Rs. 99-12. Provincial Loans met with good business, 4 per cent 1948 *Punjab* being done at Rs. 105-12; 3 per cent 1952 *Punjab* at Rs. 99 and 3 per cent *N. W. F. P.* at Rs. 98-2.

Conditions in the money market showed no change a:ll the average rate of accepted tenders is again five pies lower at annas thirteen and pies three per cent per annum as compared with annas thirteen and pies eight per cent per annum in the previous week.

Port Trust and Municipal debentures showed little variations in prices, 4 per cent 1943 *Rangoon Port Trust* being done at Rs. 103-4. Among Industrial debentures, 5¼ per cent *Rohtas Industries* came to business at Rs. 104-10; 2½ per cent 1941/50 *Ramnugger Cane* at Rs. 100 and 4½ per cent *Bengal Paper* at Rs. 105-8. Preference Shares met with good business and prices are slightly higher than in the previous week. For Jute shares, there has been a good enquiry, *Auckland* being done at Rs. 149; *Bally* at Rs. 165; *Kamarhatty* and *Kankinarrah* at Rs. 157 and *Reliance* at Rs. 175. Cotton shares attracted little attention, *New Victoria* being done at 6-9. *Muir Mills* after a long time were transacted at Rs. 75. *Kesoram* have further improved to Rs. 142. In the Engineering section, there were buyers of *Steel Corporation* at Rs. 120-8 and *Burn & Co.*, 6 per cent preferences at Rs. 148. *Indian Standard Wagon* met with business at Rs. 167. *Kumardhubi* were slightly higher at Rs. 142-8. In the Miscellaneous section, *Rohtas Industries* were in demand at Rs. 153 c.d. *Dunlop Rubber* 2nd preferences closed higher at Rs. 121-8, while *Dalmia Cement* were done at Rs. 119-8; *Bengal Assam Steamship* at Rs. 107; *Titaghur Paper* 1st preference at Rs. 200 and 2nd preferences at Rs. 117.

There were buyers of *Cawnpore Sugar* at Rs. 122 and *Purtabpore Sugar* at Rs. 16-8. Among Tea shares, business took place in *Patrakola* at Rs. 154-8.

Railway shares met with only limited turnover during the week.

Among Bank shares, *Imperial Bank* fully paids were done at Rs. 1,562 c.d.; contributories at Rs. 387 x.d. and *Reserve Bank* at Rs. 103-12.

Cotton shares were fairly active. Towards the close of the week prices showed a drop of few points in sympathy with the raw commodity. *Dunbar*, after being done higher at Rs. 241½ in mid-week, declined to Rs. 236, but are now quoting at Rs. 237. *Kesoram* were lower at Rs. 7-15; *New Victoria* at Rs. 3-8, the highest level touched during the week being 3-11. *Cawnpore Textiles* were Rs. 8-5; *Bengal Nagpur* Rs. 16-2; *Bowreah* Rs. 282 and *Elgin* Rs. 23-4.

Trading in the Coal section was relatively small when compared with the other sections. *Bengal* were marked up to Rs. 360, but closed at Rs. 359 after touching a low of Rs. 356. *Central Kurkend* were marked at Rs. 14-12; *Amalgamated* at Rs. 25-4; *Equitable* at Rs. 35-12; *Dhemo Main* at Rs. 13-12; *Raneegunge* at Rs. 26-6 and *Union* at Rs. 30-8. *New Manbhoom* were in good enquiry, being done at Rs. 39-12 x.d. The Company has maintained the dividend at 30 per cent per annum for the half-year ended 31st March, 1941. Among the lower-priced shares. *Bhalgora* were at Rs. 5; *Burra Dhemo* at Rs. 4-2 and *Churulia* at Rs. 1-10.

In the Jute section, the rise in prices witnessed in the early part of the week, proved to be shortlived and prices have been marked slightly easier to-day. *Howrah* are now quoting lower at Rs. 54. *Anglo-India* touched a high of Rs. 362; *Kamarhatty* Rs. 529; *Kankinarrah* Rs. 432-8; *India* Rs. 372 and *Reliance* Rs. 58-12. Towards the close of the week, however, these shares were a shade easier, closing at Rs. 345; Rs. 516; Rs. 427-8; Rs. 358 and Rs. 58-8 respectively. Among others, *Clive* met with business at Rs. 25; *Bengal Jute* at Rs. 16-13; *Birla* at Rs. 29-5; *Hukumchand* at Rs. 12-2; *Nuddea* at Rs. 67 and *Megna* at Rs. 45-13.

Tea shares met with a fair volume of business and enquiry continued unabated. *Sonai River* were done at Rs. 17; *Dhunseri* at Rs. 2-10; *Tezpore* at Rs. 8 and *Tongani* at Rs. 5-12. Among the higher-priced shares, *Banarhat* were marked at Rs. 423; *New Cinnatolliah* at Rs. 432-8; *Hantapara* at Rs. 385; *Manabarrie* at Rs. 226-8 and *Gungaram* at Rs. 380 s.l.

In Sugar shares, *Balrampore* fetched Rs. 8-6; *Buland* Rs. 17-12; *Murree Brewery* Rs. 14-8; *Raza* Rs. 18-7; *Samastipore* Rs. 8-12 and *New Savan* Rs. 9. *Carew* declined to Rs. 10-12 from Rs. 11-5. *Punjab Sugar* came in for business at Rs. 16-8 and *Dyer Meakin Brewery* at Rs. 7-10.

Among Public utilities, there is nothing important to report as prices remain unchanged.

In the Engineering section, *Indian Iron* and *Steel Corporation* recorded a sharp rise in prices to Rs. 33-3 and 20-6 in mid-week, but at these levels the shares met with some selling pressure on receipt of the news of Japan's ultimatum to Indo-China and they touched a low of Rs. 31-7 and Rs. 19-7 respectively. The tendency is slightly better to-day and prices have improved, *IndianIron* closing at Rs. 31-15 and *Steel Corporation* at Rs. 19-12. *Burn & Co.*, were a firm counter at Rs. 403-8, the highest level touched being Rs. 407-8. *Hukumchand Steel* closed at Rs. 14; *Indian Standard Wagon* at Rs. 65; *Indian Steel Wire Products* ordinaries at Rs. 56; deferreds at Rs. 36-12 and *Indian Malleable Castings* ordinaries at Rs. 8-3. *Kumardhubi* showed no change at Rs. 4-4 and *Arthur Butler* at Rs. 12. *Marshalls* were better at Rs. 2-3.

In the Miscellaneous section, Mining shares were a steady counter. *Burma Corporation* changed hands at Rs. 4-9; *Indian Copper* at Rs. 2-2 x.d.; *Consolidated Tin* at Rs. 2-8 and *Tavoy Tin* at Rs. 1-3. Among Cement shares, *Dalmia* met with good business, the price having improved to Rs. 13-4, while the deferreds were steady at Rs. 2-13. Paper shares were better, the best features being *Titaghur Paper*, which improved to Rs. 19-2 and *Orient* to Rs. 13-12. There were enquiries for *Mysore Paper* at Rs. 15-4;*India Pulp* at Rs. 148-8 and *Shree Gopal* at Rs. 12-6. Shipping shares were unchanged, *I. G. N. quoting* at Rs. 89 and *Port Shipping* at Rs. 17-2. Among others, *Alkali & Chemical* have shown a rise of Rs. 1 to close at Rs. 19. *Bararee Coke*, on the announcement of the increase in the dividend from 9 per cent to 11 per cent for the half-pear ended 31st March, 1941, have spurted to Rs. 26-8. The closing level is slightly lower at Rs. 25-12 owing to profit-taking. *B. I. C.* were Rs. 4-11; *Indian Rubber Manufacturers* Rs. 28-4 and *Indian Cable* Rs. 23-11. *Midnapore Zemindary* were on offer at Rs. 73-8 following the announcement of a reduction in the dividend from 5 per cent to 3 per cent for the year ended April, 1941.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, July 24.

Money: Call money continues to be quoted at ¼ per cent.

Exchange Market: Banks are selling T. T. at 1s. 5 15/16d. and buying three months' bills at 1s. 6 7/32d.

Securities: Following the quiet London advices, the local securities market ruled featureless, activity being much curtailed owing to the uncertainties in the Far East. 3½ per cent Paper continued to be steady at Rs. 96. 1948/52 Loan were unchanged at Rs. 97-12; 1951/54 at Rs. 99-14; 1963/65 at Rs. 95-1; 1947/50 at Rs. 103; 1955/60 at Rs. 113-8 and 3 per cent 1946 *Defence Bonds* at Rs. 101-14. 1960/70 were, however, slightly higher at Rs. 110.

Shares: Prices in the local share market opened higher on Monday and continued to advance on Tuesday following a sharp rise in commodity markets, higher levels being touched in all sections of the market. On Wednesday, however, profit-taking appeared which imparated an easier tendency to the market and prices at the close of the week were slightly marked down. The market remains closed to-day owing to the death of a Member.

Textiles: Mill shares opened higher in sympathy with higher cotton prices. Among the speculative counters, *Bombay Dyeing*, after opening at Rs. 1,171-4 gradually declined during the close of the week following the sharp desline in cotton prices. The shares finally closed at Rs. 1,152-8, showing a drop of about Rs. 30 over the previous week. *Central India* were also lower at Rs. 357; *Century* at Rs. 450 and *Colaba* at Rs. 19g. *Kohinoor* declined from Rs. 463 to Rs. 454-8; *Gokak* from Rs. 234-8 to Rs. 231; New Great from Rs. 245-8 to Rs. 243 and *Swadeshi* from Rs. 340 to Rs. 338. In the Cash list, *Ahmedabad Advance* were, however, slightly higher at Rs. 312-8 and *Vishnu* at Rs. 1,340. *Sholapur* remained unchanged at Rs. 3,250.

Hydro-electrics: The shares in this section were exceptionally firm owing to some investment demand, as the dividend season is fast approaching. *Andhra Valley* have spurted to Rs. 1,700, while *Tata Power* were a shade lower at Rs. 1,650. *Tata Hydro* were slightly better at Rs. 183.

Steels: Steel shares met with continued support. *Tata* ordinaries opened on Monday at Rs. 395-8 and the *deferreds* at Rs. 2,090. They touched a high of Rs. 395-8 and Rs. 2,121-4 in mid-week, but, as usual, these levels attracted profit-taking which resulted in the rates closing at Rs. 389-8 and Rs. 2,067-8 respectively.

Banks & Insurance: Among Bank shares, *Bank of Baroda* were done at Rs. 112; *Bank of India* at Rs. 14 6/4; *Central Bank* at Rs. 45-4; *Imperial Bank* fully paids at Rs. 1,553-12; contributories at Rs. 382-8; *Reserve Bank* at Rs. 103-12 and *Union Bank* at Rs. 610.

In the Insurance section, *New India* were a dull market at Rs. 45.

Misuellaneous: *Associated Cement* ruled firm at Rs. 148 on reports of an incease in the price of cement varying from Rs. 1 to Rs. 10 per ton depending on the areas to be supplied. *Belapur Sugar* continued to be steady in spite of the reported strike in the mills. *Bombay Burma Trading*, after opening higher at Rs. 511-4, gradually declined to close at Rs. 492-8 following the uncertainties in the Far East. *Shivrajpur Syndicate* were better at Rs. 32. *Indian Iron* came in for business at Rs. 32; *Steel Corporation* at Rs. 20; *Premier Construction* at Rs. 96-8 and *Alcock Ashdown* at Rs. 565. *Tata Chemicals* were steady at Rs. 12-14, while Wimco have improved slightly to Rs.8 and *Scindia Steam* to Rs. 21-12.

LONDON STOCK EXCHANGE

The London Stock Exchange has not shed its equanimity yet, for prices have been maintained in most sections and the Far Eastern developments without causing a reactionary tendency have only restrained activity. British Funds have not encountered as much support as usual and the qotation for old War loan has declined to 104⅞. The only Indian loan quoted was the 3½ per cent irredeemable at the former level of 99¾ and later at 99½. The main change is the small fall in old Consols to 82 early in the week and later to 81¾ but this has hardly touched the 4% Funding and other issues. New war loan is still over par and the giltedged market is superior to temporary influences. The Home Rail market almost exceptionallly has strengthened and a late rise in *G. W. R.* has certainly been gratifying. The maintenance of the *London Transport* issues at last week's levels shows that semi-gilt issues are holding their own very well.

The rising tendency in Home Industrials has been checked this week for many of the leading issues have receded this week. But individual gains as in *Woolworth* 5sh. shares attest the firm undertone to which all cables refer. Firm spots among brewery issues and iron and steels too are not lacking, and the leaders e.g. *I. C. I.*, *Dunlop Rubber* and *Lever Bros.*, have not yielded. The fall in *Indian Iron* is readily explained, and the deline in *Burma Corporation* must also be put down to the fall in Indian markets, though the reduction in the price of *Indian Copper* must be due to their going ex.

The easiness of Oil shares after the firmness in evidence until Tuesday this week cannot be wholly due to profit-taking. Here again *Mexican Eagle* is an exception, and the current quotation of 8/9 shows that the 4 peso shares are now adjudged to be worth more than their break-up value.

The mining market was idle on most days and reviving interest in Diamonds was of little moment. The leading industrials were usually supported and textiles alone were slack. The dividend disappointment led to a fall in *Courtaulds'* ordinary stock despite the higher prices available for rayon yarn, but the rise in *P. & O.* Deferred shares and the gain in *International Nickel* are of obvious importance. Fluctuations have not always been downward and Cape support for Kaffirs accounted for the rise in *East Rand Prop.* 5sh. shares to 41/10½. The relapse in Japanese issues has been referred to, but the improvement in Chinese Bonds was equally marked. Planting shares were depressed and the heaviness of the share market contrasts with the present price of rubber around 13½d. per lb.

NEW YORK STOCK EXCHANGE

Wall Street has developed commendable firmness since the news of the R. F. C. loan to Britain appeared. Even earlier a firmer tone was noticed, and the strong opening on most days showed that the progress of the Administration's measures and the rise in commodity prices were more than substaining factors. The rise in *U. S. Steel* to over 59½ belongs to the week's developments, and the decline and recovery since show that wider support is forthcoming. The blue chips are certainly in the foreground and *Anaconda Copper has* become a firm favourite as the price has risen continuously to open at $29 3/8 on Thursday.

General Motors, *Anaconda* and *U. S. Steel* show noteworthy gains on the week judged by Thursday's quotations.

MARKET POINTERS

Extension of Import Control.

In view of the ncreasing necessity for conserving exchange in respect of countries outside the sterling area and also reducing adverse balance of trade with certain countries, particularly Japan, the Government of India issued a further notification extending the existing system of import control to a number of other commodities, **viz.** cotton, twist and yarn, ribbons, artificial silk and staple fibre yarn, cotton piecegoods, and fents and mixed, and coral. The full list appears in the **Gazette of India.**

Imports from China will also be subjected to the same restrictions as those from other foreign countries outside the sterling area; but imports of goods produced and manufactured in China that have been imported into Burma across the Burma-China land frontier will be allowed freely and an open general licence for this purpose is being published in the **Gazette of India.**

Also, in the **Gazette of India,** a notification is being published under section 4 of the Indian Traffic Act raising a alternative specific duties on artificial silk manufacturers not of British maufacture, import tariff schedule items 48 (1), (B), 48 (5) (B) (II), from five annas to seven annas per square yard. and item 48 (5) (A) (II) from four annas to five and half annas per square yard.

* * *

Purchase of Telephones:

With reference to the offer made by the Government Telephone Board, Limited to the shareholders of the **Madras Telephone Company Limited** to purchase all the shares at the price of Rs. 15-8, per share, it is understood that even if the present scheme does not go through on on account of seventyfive per cent of the shareholders not accepting the offer, the Government Telephone Board Limited will purchase such shares as are offered for sale to them unconditionally at the same price.

The Oriental Telephone and Electric Company Limited, which holds more than fifty per cent of the shares, has agreed to sell their holding unconditionally to the Government Telephone Board Limited and it is understood that these as well as certain other shares similarly offered will be purchased by the Government Telephone Board Limited, which will thus secure practical control of the company.

IMPERIAL BANK OF INDIA

NOTICE.

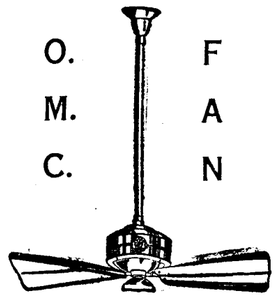
IS IT NOT WISE TO INSURE NOW ?



With an uncertain future ahead Conservation and Consolidation of resources are the prime needs every individual should assiduously strive after.

If you already have Life Insurance, hold on to it. Don't allow it to lapse. If you haven't go in for it right now. A Life Policy gives an inestimable protection and it will cost you less now than later. It is cent per cent true that to be forewarned is to be forearmed.

Write to us for further particulars or advice.

WORLD OF INDIAN FINANCE

Friday evening.

AS was to be expected, short credits have been literally a drug in the market. Even term deposits have lost their recent appeal to banks. Bankers may oblige their select clients by accepting deposits for three months or more. Money for shorter periods is simply not wanted. The strengthening of cheap money sentiment is reflected in the various returns of the week. On the Treasury Bill tender day, applications came to Rs. 2,27½ lakhs against Rs. 1 crore on offer. The average rate of accepted tenders shows a sharp decline to annas 11 and pies 9 per cent per annum as compared with annas 13 and pies 3 in the previous week. The offer of tender bills of the next week remains unchanged at Rs. 1 crore. The Bengal Government have asked for Rs. 75 lakhs worth of Treasury Bills from the market, the tender day being today. In view of current money conditions, it may well be that the Bengal Government are able to secure their three months' accommodation on terms almost idential with those of the Central Government. That is to say, the average discount on Bengal Treasury Bills may turn out to be annas 12; and, if this expectation is fulfilled, it will turn out to be the narrowest gap between the Central Treasury Bill rate and the Provincial Treasury Bill rate. It may be added that the bidding for the Bengal Treasury Bills on June 30 was quite keen, and the rate which the local government secured was comparatively satisfactory.

The statement of the Reserve Bank in the banking department for the week ended July 25 shows appreciable rises under the various heads of deposits. The Central Government's deposits have risen from Rs. 14.94 crores to Rs. 17.11 crores; those of the Burma Government from Rs. 2.60 crores to Rs. 3.28 crores; those of other governments from Rs. 4.98 crores to Rs. 6.21 crores; and those of scheduled banks from Rs. 30.02 crores to Rs. 30.61 crores. Even miscellaneous deposits have risen from Rs. 2.94 crores to Rs. 3.36 crores. With the other items on the assets side showing only slight changes, notes held in the banking department are substantially higher at Rs. 19.17 crores as against Rs. 16.84 crores on July 18. The statement of the issue department calls for no comment except in regard to rupee coin which is again higher at Rs. 37.65 crores against Rs. 37.01 crores. The statement of the Imperial Bank for the week ended July 25 shows an increase in investments from Rs. 63.39 crores to Rs. 63.84 crores, and a decrease in advances from Rs. 35.87 crores to Rs. 35.53 crores. Imperial Bank's cash at Rs. 12.69 crores compares with Rs. 13.11 crores on July 18.

The following **communique** was issued last week-end from Simla:

"It is notified for general information that, with effect from August 1, 1941, the prices at which the three per cent loan 1949-52 announced in the Government of India, Finance Department notification No. D 486-B/41 dated the 25th January 1941, will be issued are as follows:

Issue price on any date from 1st August, 1941 to the 9th August 1941, Rs. 100-0-0;

From 11th August 1941 to the 16th August 1941 Rs. 100-0-9;

From 25th August to 30th August Rs. 100-2-3.

Thereafter the loan will be issued at prices increasing by 9 pies percent weekly until further notice."

As, in our issue of last Saturday, we had discussed the prospects of a new rupee loan, we have received numerous enquiries from our readers as to whether the Simla **communique** of July 26 is to be interpreted as the final decision of the Government to carry on with the 3 per cent 1949-52 loan for the time being. That is to say, is all the speculation of **Indian Finance** regarding the imminent new loan just idle speculation? The first impression we gathered from the Simla notification would have led us to answer this question in the affirmative. A more detailed consideration of the several factors in the present situation however suggests that the early issue of a third defence loan is not unlikely. So far as this particular notification is concerned, no more than routine significance need be attached to it. For, the list for the second defence loan opened on February 1; and the half-yearly interest was payable on August 1. As this is a loan available indefinitely through the tap, it is necessary to indicate the prices as from August 1 for each successive week. In simple terms, the indication of the issue price for week after week is necessitated by the fact of this loan being a loan available on tap. It is not to be thought that, because this announcement is issued at this particular juncture, it is to be interpreted as a kind of hint to the market that all speculations about a new loan are groundless; and that the purpose of the Government is to retain the 3 per cent 1949-52 loan as the main plank in defence borrowing. The drastic reduction in the amount now asked from the market in the form of Treasury Bills seems to us to be a measure designed to let the short-term funds to accumulate in the money market. Treasury Bills maturities in August are heavy; and, if the Government had no such ulterior motive, they would have continued sales of Treasury Bills on the basis of Rs. 2 crores per week in the form of tender bills and on the basis of the continuance of sales of intermediate Treasury Bills.

There are other reasons, too, why immediate attention should be paid to devising such plans and types of loans as will secure subscriptions on a far heavier scale than have been the case in respect of the first defence loan or the second defence loan. His Excellency Lord Linlithgow made a significant reference to the defence loan in the course of a speech he made yesterday at Madras. He disclosed the

TREASURY BILLS

India

Tenders for Rs. 1 crore of three months' Government of India Treasury Bills were opened on Tuesday July 29, 1941. Total amount offered was Rs. 2 crores, 27 lakhs and 75 thousand. Tenders at Rs. 99-13-3 per cent were accepted in full and those at Rs. 99-13-0 per cent were alloted, approximately 72 per cent. Lower tenders were rejected. Total amount accepted was Rs. 1 crore, the average rate of accepted tenders being annas eleven and pies nine per cent per annum.

Tenders for **Rs. 1 crore of three months' Government of India Treasury Bills will be received on Tuesday August 5, 1941. Succeessful tenders should make payment on Friday, August 8, 1941. Other conditions are as usual.

During the week ended July 25, 1941. Government of India Treasury Bills for Rs. 1,09,00,000 were sold in favour of the Issue Department of the Reserve Bank of India.

Bengal

Tenders for Rs. 75 lakhs of three months' Government of Bengal Treasury Bills will be received at the offices of the Reserve Bank of India at Calcutta and Bombay up to 1 p.m. (Stanadard time) on Friday, August 1, 1941.

Successfull tenderers will be required to make payment and take up their bills on Monday, August 4, 1941.

Finance Abroad

Friday Morning.

IN the absence of any decisive change in market conditions one can only refer to the stability or rather stagnation that is still the main feature of all financial centres. Yet it would be a mistake to imagine that stagnation is the outstanding mark of wartime finance: we certainly live in stirring times, and President Roosevelt's late warning against endemic inflation is easily the biggest event of the week. Its bearing on U.S. finance is obvious, particularly, as cotton and wheat look like rising. The message to Congress is a warning to a body apt to look kindly on the upswing of commodity prices. His argument that inflationary increases in the prices are threatening to undermine our defence efforts, and his request for powers to establish ceilings for prices and rents was accompanied by an emphatic warning. We face inflation unless we act decisively without delay, said the President who has no desire for Coolidge prosperity in a crisis.

President Roosevelt's message contained a request for authorisation for 'the purchase of materials and commodities where necessary to ensure price stability and for powers to deal more extensively with excesses in the field of instalment credit.' This is not the first time that a plea has been heard of the control of consumer's credit purchase. The sale of durable goods may suffer, but consumers should lay off and go in for the defence bonds rather than hire purchase agreements. Yet a time of rising prices presents a temptation to the average householder to get his car, radio or vacuum cleaner before prices go up. The curtailed output of the automobile industry is one way of tackling the problem, and higher taxation, especially, through a purchase tax is another way. But rising prices must stimulate buying of goods and it is only stability of prices that will induce the average citizen to abstain from purchasing luxuries which he fears may become too expensive while his own income may not keep step. Price control is certain, for the President has reinforced the arguments addressed last month by Mr. Leon Henderson of the O.P.M. The mild rise in the U.S. stock markets does not presage a boom but the seeds of inflation had been sown last year itself by the enormous defence budget. Successive increaes, which have raised spending to the pitch of 30 million dollars per day, are not likely to arrest the main trend, and the prolonged ease of money conditions may engender a fatalistic attitude. But the Administration has to meet this year an enormous deficit after raising taxes by 3½ billions and realises also that stable prices and industrial peace go together. The latter is perhaps the most cogent reason for control, and Congress, with its large Democratic majority, is likely to say ditto to the President's words. Price control may have a bearish effect in India despite the fact that straddle business in cotton is discouraged since the past week.

The London money market shows curiously few signs of change. The dip in the Treasury Bill rate to 19 sh. 11.84 d. per cent on Friday last was due to the increase in the volume of applications. The fall in the rate coincided with a lower allotment for the market. A coming dearth of bills is forecast, and the disappointment of brokers may lead to heavier applications and a further drop in the rate. The drop in the Treasury Bill rate last week was not unexpected, for even in June, the market's interest in Treasuries grew suddenly. The reference to the increase in bankers' deposits easing short money conditions is a little obscure. Evidently it means that discount houses had no need to turn to the Bank. Or it is meant to stress the more important fact that Banks' deposits with the Bank of England have risen latterly and they may be disinclined to give short loans unless it be through their own Treasury deposit receipts of which 300 to 400 millions are in issue. Be that as it may, the last available Bank of England Return discloses a very important fact that should be recorded. An increase in Bullion to £2.9 million is shown. Whence or how this increase came can only be the subject of informed conjecture, but it must be noted that the increase has nothing to do with the freezing of Japanese assets. Japanese banks are not told to wait for their gold in Ottawa after the war, and the only thing that must excite interest in connection with the freezing order is in regard to the interest payable on Japan's external debt. It is quite obvious that the order is a shock for British bondholders and the Stock Exchange read the situation aright by lowering the prices for Japanese loans on most days. The freezing order, if it impounds trade debts, makes default inevitable under the retaliatory order, and Captain Eden who traversed the Far Eastern crisis said little that affords confort for the poor bondholder. Japanese municipal obligations have been rightly popular with the British investor. Here too the Japanese Banks in London were punctilious about coupon payments and it must be said that Japan's record as a borrower is as good as that of Finland. The shock to the foreign bond market will upset Chinese loans for the customs is under Japanese control and no payments can be expected since the anticipated rupture of commercial relations will intensify Japan's monopolistic ambitions and the main result will be the utter exclusion of Britain and America from the Far East. That the A.B.C.D. front has a plentiful armoury does not make one blind to the fact that Japan can impound a greater volume of assets than the U.S.A. or Britain and the ultimate results alone can be unpleasant for Japan. She can ignore the immediate results and the promptitude of reprisals on the part of Admiral Toyoda and Mr. Ogura suggests that Japan was prepared for the worst, a decisive disapproval of the agreement made with Vichy for the joint defence of Indo-China. Subsequent developments are confusing, but the presence of Japanese cruisers in Saigon and Camranh Bay naturally excites fresh suspicion as to the action meditated.

Boom in the Offing

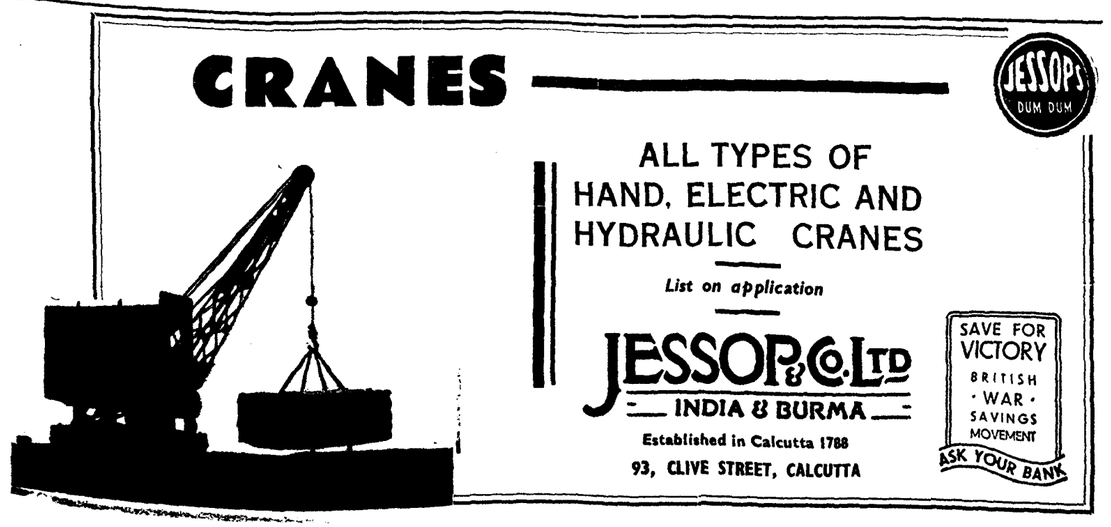
THE seventh quarter of the present war appears to give more or less reliable signs of a higher tempo of business activity both in India and abroad. When war broke out in September 1939, few people had the temerity to attempt a forecast of its effects on world economy. Its immediate effect on each national economy had perforce to be examined; and there were, no doubt, many who tried to make the best of a bad job. But in the conditions of modern times, with war becoming more completely totalitarian and a multiplicity of controls being a stark necessity, the old methods of gauging the effects of war on the economic life of a country were worse than useless. Who in India would have foreseen the complete collapse of France in the middle of 1940, not to speak of the subjugation of the whole of Western Europe by the Nazi hordes? And, again, even coming to more recent times, who could have foreseen the outbreak of actual hostilities on such a vast scale between Germany and Russia? Even now, the war has by no means emptied its bag of tricks and surprises. At the two ends of Europe and Asia lie the two notorious sympathisers of Nazi aims, Spain and Japan, who are yet to come into the ring. Over the Atlantic remains the most powerful nation of the modern world, the U.S.A., still hovering on the verge of war, but ready to plunge in as soon as more effective action becomes feasible or necessary. The effects of a further spread of the threatre of war and the range of hostilities are not, perhaps, difficult to determine. What followed the collapse of France and the extension of war into the Mediterranean may also be expected to flow from the addition of Japan and the U. S. A. to the number of active belligerent nations of the present time. Any reading of the general economic situation can be valid only to the extent that the expected trends can be altogether independent of the developments of the war that are still in prospect. For, the experience of the past two years should serve as a warning against entertaining expectations that may be belied by the spread of the war to one region or another.

It is for this reason that the present position of business activity in India and in countries like the U.S.A. may be deemed to be different from that at any earlier stage in the development of the present war. The outstanding facts at the present moment are such that, if there had been no war, business prophets would have little or no hesitation in predicting the development of a major boom before long. As we shall show in greater detail at a later stage, commodity prices have staged, during the last two, three months, a significant recovery. The outlook for industry, never sombre, has of late become positively bright and the improvement is reflected in all round rise in prices in the stock markets. In America, the effects of a larger demand on industry for purposes of defence are only recently beginning to be felt. But there is no mistaking either the upward trend that has so far obtained or the possibilities of further improvement in the future. Even in a country like Britain, where the war is imposing a terrific strain on the people as a whole, the reviewer in the *Spectator* feels impelled to observe: "So strong are the forces making for recovery that the performance of the stock markets is a good deal better than the war news. In fact, it becomes clearer every day that the technical defences of the market are now so formidable that nothing short of the most dismaying developments on the war front is likely to bring any serious or lasting set-back in prices."

If we project the trends of the immediate past into the future, the resulting picture is, no doubt, a boom. But the question will have to be faced whether we can reasonably expect such boom conditions to arise when another belligerent might mean the loss of more markets and when a fresh national emergency might upset all calculations by effecting a fresh distortion of the shape of the national economy. Such a question has lost most of its point during the twenty months of the war. The economic system that we have to-day is one that calls for little of further change in the outlines of our economic life. Lost markets have been cut, like dead wood, from the economic system. The process of adjustment to new conditions, painful as it has been, has been gone through. For our purpose, it should suffice to examine the position in India, Britain and the U.S.A. Only Britain's position is unique in that she has to wage the war both on the military and on the economic front. But the changes that an *ad hoc* totalitarianism requires of her for the sake of the war have all been effected. The main principles of adjustment, in the matter of reorganisation of industry, redistribution of labour, skilled and unskilled, elimination of luxuries, reduction of civilian consumption of necessaries, augmentation of savings, maintenance of exports, all these have been nearly completed in the first one year and a half of the war. And what is more important, the passage of the Lease and Lend Bill in the U.S.A. and its implementation by the American Administration have given Britain just the relief that she needed. The sources of unsoundness have, to that extent, been sterilised. The position in the U.S.A. is different, in that the pressure of a large defence programme is beginning to be felt only now. The question of priorities is being faced for the first time; and the automobile industry decided only two months ago to cut its production of new models in order to accommodate the defence programme. But American economy is unique in that such restriction as may be effected for the sake of defence is made up many times by the expansion in other spheres for the same purpose. The more significant fact is that, for the first time during the last ten years, the authorities have begun to talk of an expansion of agricultural production. The U. S. A. has also started to hoard commodities against contingencies. Restriction is relaxed; and in some cases expansion is enjoined. Sales of chain stores are increasing under the pressure of war profits. There is no reason, therefore, to apprehend that the war or its possible spread in the future will have a restrictive effect on American business.

India stands midway between the U.S.A. and Britain. Or, perhaps, it would be more accurate to say that Indian economy during the war partakes of the features of the national economy of the two countries. Our agriculture suffered the restrictive effects of loss of foreign markets, the same as British industry had to suffer a reduction of output through shortage of labour, or lack of markets. But India, like the U.S.A., has the benefit of having to make large supplies to Britain. Expansion of industrial output has thus gone hand in hand with agricultural restriction in some commodities. From the point of view of business prospects, what is important is that, while agricultural restriction has come to a halt, industrial expansion has no limits and we have even arrived at the stage when even agriculture can experience expansion in some respects.

Prices and demand, in so far as it can be considered distinct from prices, are the determinants of boom conditions. The setback in prices which occurred early in 1940 would, if it persisted, no doubt, act as a serious obstacle to the improvement of the business outlook. And it is, therefore, of interest to note that June saw the rise of the wholesale price index above the previous highest level in the present war. As against 137 recorded for December 1939, the figure for June 1941 was as high as 138. It is only to be expected that this increase is not common to all the constituent index numbers. Commodities like raw cotton, jute, sugar and oilseeds are still well below the levels of December 1939. But there is no mistaking the generally upward trend of prices. Nor can it be contended that the rise is due to inflationary factors. It is only natural that the rise should be far more in the case of manufactured commodities. But taking a comprehensive view of the position, the recovery of prices without any undue help from the monetary factor suggests that, from the first quarter of the current year, the basic conditions were quite healthy.



The month of July has seen even further progress on these lines. The following table giving prices at the beginning and at the end of the month for leading scrips and for commodities will show the ground gained during this period.

It is significant that the improvement in the prices of commodities is more evenly shared. The basic problem of our national economy, *viz.*, that of increasing the consumption of raw material in indigenous industry is, of course, still there. But under pressure of war, the gap between total production and internal consumption is being reduced. While formerly, it was the fashion to argue that no conceivable increase in industrial output can provide adequate employment or reduce our dependence on foreign markets, we are now witnessing to-day the process of expansion of our industries which with slightly favourable conditions in the post-war period can provide a solution of this moot problem.

The trend of prices on the stock markets shows an increasing appreciation of the outlook for Indian industry. It is hardly necessary to prove this point in the case of each and every industry. The position of the jute industry is unquestionably sound. The cotton mills have nearly maximised their production; and besides meeting the large orders of the Supply Department, are winning new markets abroad. Of paper, there is wellnigh famine in the country. Not only existing mills are expanding their output, but, so far as we know, new ones are being planned. The sugar industry will find itself free and will find it possible to export to adjacent foreign markets. In such conditions, the stimulus to production afforded by the Supply Department is bound to engender that spirit of optimism in the business class which ensures that the objective conditions favourable for a boom will be availed of.

Editorial Notes

War and Industries

THE most recent claims of the Supply Department are naturally more interesting than the old statement that in the first full year of war the Department distributed Rs. 56 crores worth of orders. It is now said that orders to the value of Rs. 1 crore are being placed every day, and the altered tempo of war production, can be inferred from the expansion in the value and size of orders. The steel control order issued last week can also be regarded as a pendant to the existing regulations regarding imports priorities and the use of machine tools etc. The expanding requirements of the Supply Department explain the order, which is designed not to make India lose her footing in the export trade, but to reduce civilian cumsumption by leaving dealers with very limited stocks. As in the case of aluminium and the non-ferrous metals imports will be strictly controlled, and all available supplies will be concentrated with the important difference that a part of domestic steel production will go into consumption in well-defined channels. The vast increase in munitions output alone makes this control inevitable and the manufacture of acid steel from scrap undertaken recently to meet war requirements is again a reminder of the influence of the Supply Department on industrial progress. The rapid enlargement of India's defence requirements and liabilities to the Eastern Group countries underlie the expansion in several industries. It is argued that, if progress in textiles, footwear etc. ap pears marked, while the production of capital goods is delayed, India gains to the extent that production in the textile industry can be reduced at will after the war ends whereas an immediate expansion in new heavy industries followed by the resumption of foreign competition cannot but have unfortunate consequences.

Ordnance stores made in India have displaced imports and the Supply Department, if it has acted as a buying agency has also interested suppliers in producing new articles to satisfy war demand. India's is now making nearly 499 new articles and imports have been displaced by indigenous production. Everybody knows that lenses to light guns and lorry bodies for the army are being made in India, and the only complaint that may occur to some is that the Department is still functioning without a long-range policy. The big increase in the output of several industries during 1940-41 must therefore owe much to the Department's activities. It has been noted that 30 new types of fabrics are being produced in Indian mills while the Indian woollen industry's output has surpassed expectations. India is the sole source of tents and supplies waterproof duck and canvas, superior to the imported product, to the Defence services in India and abroad. Engineering stores are now drawn from local establishments and over 280 new items are being manufactured in order to meet war requirements. It is widely known that in the first year of war the entire range of production such as that of medical stores was analysed and developed successfully. New types of lubricants for aircraft and drugs evolved as substitues for imports of German origin are sufficiently well-known and the Department's constant efforts to stimulate production of stoves, cookers using patent fuel etc. have shown that not only provisions but cooking implements have received attention. It has been reported that the manufacture of cigarettes and biscuits in India has increased considerably and canned vegetables too have been produced at the instance of the Supply Department. Progressive expansion of the range of miscellaneous industries in India can certainly be expected in view of present indications. And the lightness of commitments in the case of established enterprises shows that a post-war slump will not cause great concern to most industries while the holding up of building and other programmes during the currency of the war will prove an advantage to the older major industries should they lose their share in export markets and meet with renewed competition at home after the war.

Working Class Expenditure.

The rise in the cost of living in Bombay was checked in June as the index remained the same as in May. It must be noted here that it is the working class index to which reference is made. The index at 122 shows a rise of 11 points compared with June 1940. Though the index was unchanged the index for food articles rose as also that for fuel and lighting. The prices of rice, wheat millet remained more or less unchanged in June and the advance in the price of salt, milk, etc. explains the rise in the food index from 138 to 139. The general index in Ahmedabad rose by one point during May as in Bombay. While the cost of living index in Bombay has risen continuously from the last quarter of 1940, in the case of Ahmedabad the index remained stationary until May. In Sholapur the cost of living index was unchanged, and the uneven character of movements during May is brought out by the fall reported from Madras and Jubbulpore. The cost of living index was unchanged in Nagpur, but all the five centres report a steady rise since 1940. The movements of the index numbers over a year show that the percentile rise is greatest in Bombay as wholesale prices, particularly of foodstuffs have risen since the beginning of 1941; wholesale prices index for May 1941 indeed shows a gain of 5 points on that for May 1940. The general presumption that much labour unrest is due to the rise in prices and the resulting rise in the cost of living is strengthened by the revival of an agitation for an enhanced dearness allowance. The indications of prosperity in selected industries at individual centres lend some support to the view that the workers have a prima facie case, and most of the seven disputes reported in Bombay and the twelve in Ahmedabad in the *Labour Gazette* turned on the satisfaction of a demand for a cost of living bonus. The actual effect of the riots on the working class cannot have been great, but in Ahmedabad the work in the mills suffered owing to the exodus of workers from the city in May. Those who returned by June 10th were reinstated and the Textile Labour Association issued leaflets asking millhands to come back from their villages. Night shift working was stopped in many mills in Ahmedabad while the curfew order in Bombay must have reduced the number of mills (returned at the beginning of June as 58) working at night.

Threats from Spain

Towards the end of last week the British Government gave an answer to the rather unexpected outburst of General Franco expressive of hostility to the democracies in general and concerned with a formulation of Spain's grievances. Mr. Eden's reply, sketched in the background of Anglo-Spanish relations since the close of the Civil War, indicated that Franco's grievances, real or fancied, did not warrant the attack on Britain and the U.S.A. General Franco's speech on July 17th was offensive in more than one sense and proved that Spain was again non-belligerent. The loan of 2½ millions given in April has been apparently forgotten and contraband control alone is remembered. Navicerts for oil from the U.S.A., inspite of this unusual and suspicious increase in Spaninsh imports in 1940, were granted and the United States showed friendliness by giving an assurance that wheat from the New World would be available. The Anglo-Spanish payments agreement made last March put old debts outside current trade and the exchange of mercury for foodstuffs, made possible under a subsequent agreement, was again a mark of special favour. The revival of anti-Russian prejudice in Spain following the Anglo-Russian seems so surprising that one must attribute Franco's attack to outside inspiration. General Franco's speech has been answered; but the extensive precautions adopted Gibraltar by Lord Gort show that Spain's unfriendly attitude is taken seriously. The departure of the old time Generals, Aranda, deLlano and Munoz Grande like the ascendancy of Senor Suner, who has married the sister of Franco's wife shows that more than in September last, Spain's unfriendliness is, far from being at the ebb. Ambitions in Morocco may have revived after the easy acquisition of Tangier where the convention of 1925 is temporarily in abeyance as the British Foreign Office has emphasised. Spain's desire for empire has always been the opportunity of other Powers, and it is not difficult to link the attack on the non-interventionist democracies with Spain's desire to further the interventionist Axis aims in North Africa. It is generally believed that the hostility conveyed by Franco's speech may alter the United States' views as to the control of the Azores and the Cape Verde Islands in time of war with a threat overhanging the New World. Portugal will be entitled to criticise Spain for creating a difficult and delicate situation. Mr. Eden's statement without breathing any threats gave the world the assurance that Spain cannot expect anything more when the attack has so much importance to ideological affinities. It may become difficult for a bellicose Spain to touch the bumper wheat crop of the Argentine, if the U. S. A. endorses the view that Spain cannot denounce the democracies and expect them to countenance her efforts to draw supplies from America. Recent developments in Bolevia, Goata Rica, Mexico, Argentine, and other countries show that Hispanoz American countries do not cherish distrust of the democracies while their attitude to Germany is the reverse of cordial. This certainly strengthens the position of Britain which has treated Spain as leniently as she treated Italy until March 1940.

Syrian Prospects

The Convention of twenty-two articles that put an end to the Allied campaign in Syria is being put into effect by the Commission of Control. According to the *Daily Telegraph's* correspondent in Beirut the Vichy Government's representatives destroyed every document before leaving Beirut. The resumption of trade is provided for in the armistice convention and Palestine has sent by road supplies which were welcomed in Syria. A complete survey of the assets has to be undertaken but the Commission may not find it easy to put a value on the railways, posts and telegraph and telephone systems. The formal entry of General de Gaulle is not going to make the appraisal easier as the Vichy Government's representatives will make trouble. The position in the Lebanon is said to have improved, and Beirut is supposed to be livelier than for some time past. The actual future of the territories must remain undecided; for, the Syrian campaign has not put an end to the danger from the Germans embattled in the Balkans. A sidelight on the administration of General Dentz is the order issued by the Control Commission for the declaration of Stocks acquired by purchase from the French Army of the Levant. Unauthorised and corrupt sales by the officers must be deduced as the supplies should not have been dissipated by sales to private parties.

The Lebanese government is said to be pro-British and the Premier indeed asked that Lebanon should be allowed to choose neutrality in case Britain and France were at war. General Dentz refused to oblige and this is supposed to have widened the gulf between the French and Lebaneese. The desire for independence persists according to a special correspondent of *The Times* who says that local opinion is divided. It is realised that independence, without the means of effectual defence, is not advantageous. The identity of British and Free French views in June on the question of Syria's future makes it certain that Syria and Lebanon will be persuaded to accept the protection of a Power which will interfere as little as possible with internal affairs. It has been asserted that Syria and Lebanon must have a period of good administration before obtaining full self government. The release of forzen assets in London will make possible the resumption of trade; but for some time Syria and Lebanon will look to Palestine. *The Times* Correspondent has stated that General Catroux with the assistance of the British is energetically tackling the problem of supplies. Apparently, Syria and Lebanon are well-stocked; and it is to a large extent a problem of placing sufficient quantities of commodities on the market to compel local speculators to disgorge their stocks. The statement may not accord easily with the tales of impoverishment and denuded supplies appearing in the British and Egyptian press, but it is right to insist that hoarding can produce scarcity. Anyway the distribution of local stocks will help Syria and Lebanon to become self-sufficient and many may be tempted to argue that undue dependence on outside supplies will delay the acceptance of the demand for independence.

Nothing is known of the provincial arrangements for the Syria Currency its equivalent in sterling. But it is likely that part of the Levant will become a market for Indian manufacturers once order is restored and Syria is linked to the sterling bloc.

Germany's Losses

The Ruhr and southern Germany have been regularly raided by the R.A.F. Germany's own air offensive has been timid and halting by comparison with the spirited summer campaign of the R.A.F. which got its master plan ready when the Battle of Britain was raging.

The damage done to the war industries must be as great as that done to the selected objective in occupied countries. The Rumanian oilfields and ports have been smashed by the Soviet air force as Ploesti is considered just a name. According to an Istanbul message, the huge Unirea refinery at Ploesti has been hit and millions of gallons lost. The piping and the oilwells have been damaged. The Unirea plant belonging to the Phoenix oil Co. used to produce high grade lubricants. It is believed that for the next three months Rumanian oil output without any Russian attacks will be reduced by one third. It is now known that King Carol built up a reserve of 2 million gallons of petrol. This was taken by the Germans who must have drawn on it for their Russian campaign. The hoard will not help much in a long drawn-out campaign and the Germans according to recent messages have a big problem, that of getting a new source able to give 2 million tons of oil to replace the losses at home and in Rumania. There are other problems thrown up by the Russian campaign. First and foremost is that of replacing the enormous masses of material used up in the past five weeks. The withdrawal of Russian forces, which have not hesitated to destroy their own crops and all forms of wealth makes capture and looting difficult. The Russians have gone nearer to their bases while the Germans are strung out on a line of lozeangers sticking into enemy territory. Raids over Moscow do not give relief to the Germans who cannot expect much out of the Galician oilfield when their Rumanian reserve has been cancelled out. The problem of replacement becomes more difficult as industrial centres have been seriously damaged. Coventration of a new type has been resorted to Wing-Commander Fraser has pointed out recently that Grebqburg, a suburb of Cologne, was attacked because it handles a marshalling yard dealing with all traffic south of Cologne. The R.A.F. hit the main connections and the north bound departure line was bombed. Damage in Cologne proper has been heavy according to German sources and the raids generate discontent and dislocate production. The continuous, repeated raids on the Ruhr and the yard at Hamm not far off have been more effective than hoped, as the Germans have to start on a scheme of industrial transference in the midst of war with the risk of sabotage increasing. Though industrial location in Germany does not interest us, the undue concentration in the Ruhr has proved a handicap. The strip of territory forty miles long and 10 miles wide running from Hamm in the east to the Rhine in the west is a continuous industrial area selected specially for attack. Losses at the main ports have been heavy and the shipping destroyed from the air has been about half the total losses is a week supplementing the toil taken on the high seas. The heavier bombers visiting the German towns do more damage particularly as they enjoy effective fighter protection. The new Boemgs used for the raids on Breast have shown that U.S. planes are invaluable in both the Coastal and the Bomber Command.

The Neutral's Lot

Though Zurich is a great financial centre and Swiss francs are in great demand at higher rates the economic and other difficulties of Switzerland are little known. The position of a neutral is doubly difficult as Switzerland is surrounded by the Axis countries and an article of Dr. Schutz in the *Spectator* of May 2 makes it plain that the transit agreements with the Axis powers were of limited value. The Swiss chartered 15 Greek ships but there was trouble with Italy and the ships had to go to Lisbon. Extortionate charges for transport were levied by the Reich for taking cut goods from German ships in neutral ports. And the Swiss have put up with unexampled difficulties in regard to fuel, oil and coal. Dependance on the Reich is seen to be unpleasant and precarious. Electricity for the railways helps much and barter trade alone keeps the industries going. The blockade of Europe accentuates the shortage of materials. Rationing of essentials and scarce goods is accepted. Foodstuffs, fats, soap and leather goods are rationed. Certain imports such as sugar have been taken over by the Government. Steep rises in prices on account of rationing, for example a three or fourfold increase of boots and shoes in stores, are being checked by public opinion and the authorities. The cost of living has risen consistently and only rents stand at pre-war level. Defence expenditure has risen for the Swiss Army has to mount guard with improved equipment. The sum spent and proposed to be spent until the end of this year will reach the enormous total of 2.8 milliards of francs of which only a fraction can be secured through taxation such as the emergency tax for embodying the Army. Agriculture has, however, received a stimulus for the virtues of self-sufficiency are apparent and the Wahlen programme for ploughing up all available land is expected to make Switzerland independent of imports in the next three or four years. About 100,000 more men are to go back to the land and the peasants are helping readily while the Army too tries to release agricultural workers from military service. Voluntary co-operation is more important than official direction and autarchy is not regarded as an official ideal. The working of old iron and coal mines, the use of low grade, the increased production of artificial silk, the new power stations projected on the upper Rhine and the Aar all attest the efficiency of democracy and its watchfulness. Peasants and workers are united in preparing and planning. Dr. Schutz has declared with truth, the nation stands united in the defence of its liberty.

Nalanda Year Book.

The appearance of the Nalanda Yearbook (Rs. 3 Nalanda Press, Calcutta) is a reminder of the increasing thirst for information manifested by all classes. The size and diversity of Indian provinces makes the possession of some work of reference essential. The Nalanda Yearbook while adhering to the traditional arrangement in regard to material and form has given a good deal of economic information as regards crops and occupations. Information as regards government and politics is plentiful and the Nalanda Yearbook presents a directory of legislators in the Provinces in addition to the usual personal notes against celebrities, and also an international who's who providing a place for Major Quisling and the Ex-Grand Mufti of Jerusalem as also for Dr. Chaim Weizmann and Mr. Wendell Willkie. Industrial and commercial intelligence can never be regarded as superfluous, but the Year Book's figures in certain cases do not appear to be as up-to-date as desired. Sports have statistics and a chronology of their own and these too are to be found. The Nalanda Press has certainly done a good job in putting out a work with relatively few mistakes and containing a special note on small industries by Mr. S. C. Mitter of Recovery Plan fame.

Half-yearly Bank Statements

The brief but illuminative survey of the war made by the Directors of the Imperial Bank of India gains in interest from the similarity of conclusions reached in the Reserve Bank report. The statement published in *Indian Finance* today is significant for more than one reason. The expansion in business cannot be measured by the profit figure but the topping of the 100 crores mark as regards Deposits like the attainment of parity between Reserve and capital last year is definitely a landmark in the Imperial Bank's carrier. The remarkable achievements of the past year lead to the Director's decision to strengthen the carry-forward and refrain from adding to the Reserves. The half-year's profit of over Rs. 42.11 lakhs is applied towards the interim dividend and the usual allocation to Pension Fund, but the carry-forward is up by Rs. 6 lakhs compared with the position as at end of June. The profit for the first half of 1941 shows a fall of over Rs. 2.58 lakhs and the reason is to be

REPORT OF THE AUDITORS

TO THE SHAREHOLDERS
OF THE IMPERIAL BANK OF INDIA.

We, the undersigned Auditors of the Imperial Bank of India, elected under Section 53(1) of Schedule II of the Imperial Bank of India Act 1920, do hereby report to the Shareholders upon the Balance Sheet and Accounts of the Bank as at 30th June 1941.

We have examined the above Balance Sheet with the Accounts and Vouchers relating thereto of the Central Office and of the Local Head Offices and with the Returns submitted and certified by the Branch Agents, which Returns are incorporated in the above Balance Sheet, and report that where we have called for explanations and information from the Central Board such information and explanations have been given and have been satisfactory. In our opinion, the Balance Sheet is a full and fair Balance Sheet containing the particulars prescribed by the Imperial Bank of India Act 1920, and the Bye-Laws of the Bank, and is properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs according to the best of our information and the explanations given to us, and as shown by the Books of the Bank.

The audit of the Local Head Offices at Calcutta, Bombay and Madras, has been carried out by Mr. James Orr, Sir Shapurji Billimoria and Mr. C. Gill respectively.

JAMES ORR,
S. B. BILLIMORIA,
C. GILL,
} *Auditors.*

Calcutta, 25th July 1941.

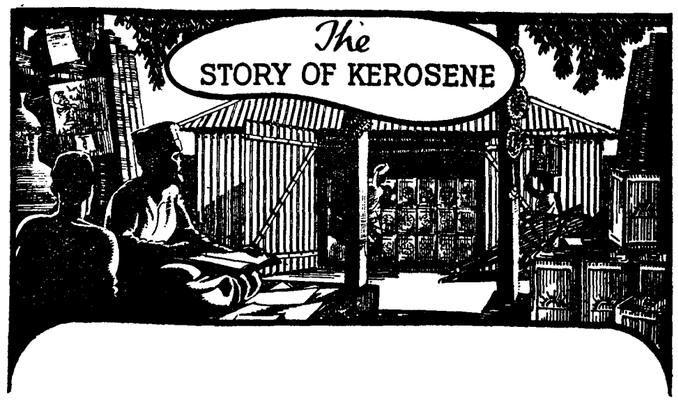
GOVERNMENT OF INDIA

DEPARTMENT OF SUPPLY.

NOTICE.

Applications for Export Licences.

Applications for export licences for articles named in Part 'C' of the Schedule to the Government of India, Department of Commerce Notification No. 91-C.W. (6)/41, dated the 14th June, 1941, should be addressed to:—



(A) The Director General, Supply, Department of Supply, New Delhi, in respect of:

3. Carbonised coconut shell.
4. Chemicals and Chemical preparations.
5. Drugs and medicines.
6. Any medicinal preparation containing any one or more of the drugs or medicines specified in item 5 or Part 'C' whether in bulk or in any other form etc.
7. Sera.
8. Dyestuffs.
9. Graphite.
11. Instruments, Apparatus and Appliances, and parts thereof, the following:—
    - (viii) Photographic plates and films used in X-ray photography.
    - (ix) Surgical and Veterinary instruments apparatus and appliances, including cotton wool and lint.
14. Manila rope.
16. Textiles.
17. Vehicles (excluding old scrap parts), the following:—
    - (ii) Motor cars, motor cycles and motor omnibuses, vans and lorries and parts thereof (excluding rubber tyres and tubes).
18. Wood preservatives.
19. Wood and timber.

(B) The Director General, Munitions Production, Department of Supply, 6, Esplanade East, Calcutta, in respect of:

1. Abrasives, manufactured, including grinding wheels.
2. Belting for machinery.
9. Graphite crucibles.
10. Hydraulic packing.
11. Instruments, Apparatus and Appliances, and parts thereof, the following:—
    - (i) Electric-fans and accessories.
    - (ii) Electric wires and cables (including telegraph and telephone wires) and accessories.
    - (iii) Telegraph and telephone instruments and apparatus.
    - (iv) Electrical insulating materials of all sorts.
    - (v) Accumulators and dry cells.
    - (vi) Electric lamps.
    - (vii) Electric lighting accessories and fittings.
    - (x) Wireless instruments and parts thereof.
12. Machinery and millwork, including parts thereof, and leather manufactures which are component parts of power-operated machinery but excluding:—
    - (i) Machine tools of any description, and
    - (ii) parts of machinery and millwork and leather manufactures which are component parts of power-operated machinery which—
        - (a) if of foreign manufacture, are being returned to the manufacturers as defective, or
        - (b) if of Indian manufacture, are supplied to any country in the British Empire.
13. Machine tools of all descriptions and parts thereof.
15. Metals and ores.
17. Vehicles (excluding old scrap parts), the following:—
    - (i) Aircraft and parts of aircrafts.

2. This supersedes all previous Notices on the subject.

NO. 4. THE AGENT

Probably the most important link in the chain of Kerosene distribution is the Agent. He is responsible for distribution throughout the area that he covers. It is an essential part of his duties to ensure that every dealer in his district is regularly supplied and where necessary he must arrange for hawkers and bottle-wallahs. Burmah-Shell Kerosene Agents are merchants of high standing and they are respected throughout India for the valuable part they play in the life of the community.

Through their own staff of Inspectors, Burmah-Shell keep watch to ensure that all the links in the chain of distribution—which starts at the Company's Installation and ends in 600,000 villages—are functioning with efficiency.

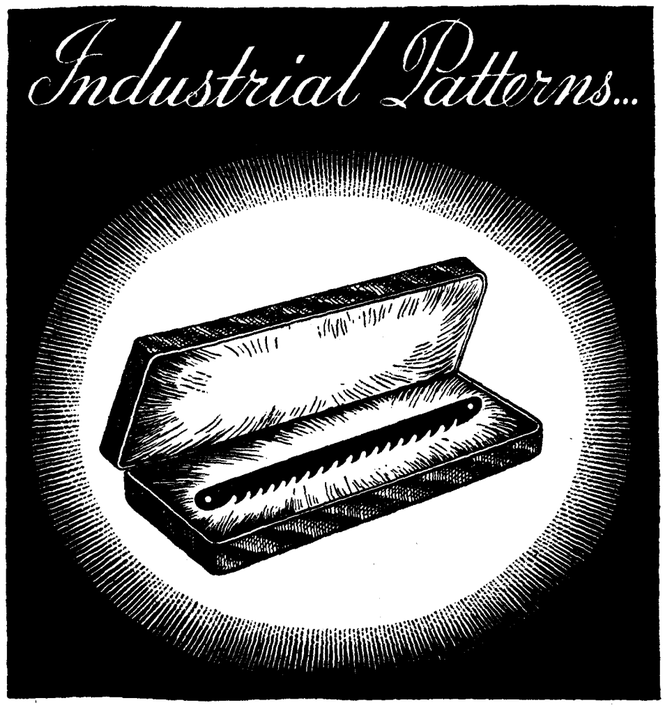
found in the balance-sheet appearing to-day. The increase of over Rs. 20 crores in Investments attests the reduced demand for funds and the fall in Advances as compared with the balance-sheet as at end of June 1940 shows that there has been reduced scope for the funds at the disposal of the Bank.



The increase in cash and bank balances is a mark of the general expensive trend noted with Indian banking world. The impressive rise in Deposits is another characteristic of banking progress in India showing that the Imperial Bank which claims an increase of over Rs. 16 crores in Deposits between July 1940 and June 1941 enjoys in full measure the benefits of leadership. The Directors in commenting on the fall in Loans, Credits and Bills discounted, noteworthy like the absence of sterling bills, indicate that the bank has no reason to feel disappointed as demand was up to pre-war standards. The heavy rise in Deposits will indicate that the Bank which preserves a cash ratio of over 14 per cent retains in a marked degree the confidence of the public which will rest content with the maintenance of half-yearly profits around the 40 lakh mark while the fairly high dividend must satisfy shareholders.

Equally satisfactory from every point of view is the half yearly statement of the Bank of India. The seventieth report of the Directors shows that this Bank has the further advantage of an increase in profits for the first half of 1941. The unequal conditions have not disturbed in this case the essentially favourable trend in regard to turnover and profits alike. The net profit is returned as Rs. 10.13, 524-6-1 as against Rs. 9,65,102-2 for the first half of 1940. Though comparisons have no special value, at least in the case of a bank so sound and well-established as the Bank of India, the changes disclosed in the balance-sheet may be taken as proof of uninterrupted progress. There is the rise of over Rs. 3.22 crores under Deposits, suggesting that the Bank of India shares in full the limited benefits of wartime prosperity and the growth of the banking habit.

The disposition of the profits shows no departure from past practice, and the only point in the balance-sheet that requires special mention here is that the Bank of India can show an important increase under Advances. This may well be regarded as exceptional but not altogether exceptional having regard to the age, record and connexions of the Bank. The rise of over Rs. 2 crores under Advances adequately explains the rise in profits while the reduction in interest and discount paid by the Bank shows that a minor advantage accrued to the Bank from the abundance of deposits. The increase of Investments this year show that only part of the rise in Deposits was absorbed by the increase in Advances. The other change to which reference may be made is the fall in the cash and bank balances, but the essential difference between conditions during the last summer and this affords an explanation for this. Despite the reduction the ratio of cash to Deposits is as high as 18.3 per cent. The liquid position, like the concentration of interests, has helped the Bank of India to more than hold its own this year as everyone will agree.

Progress In The U. P.

The rehabilitation of the co-operative movement in most provinces has not proceeded at the same pace as in the U. P. The most arresting feature of the statistical progress of the movement in the U. P. is the increase in membership. The foundation has been rightly strengthened at the outset. The limited increase under societies and funds reflects a measure of hesitation, but the sound lines on which to Department has worked under Mr. R. L. Chaturvedi I.C.S. the Registrar make it certain that no setback will follow. The increase under non-credit societies undoubtedly reflects the enthusiasm with which sugar cane societies have been developed. The rise in capital and resources in the case of non-credit societies shows that the U. P. department has made a welcome departure, and the special grants made for the development of special societies have evidently been attended with happy results. The expansion on the non-agricultural side will excite approval, and the increase in the membership of the average village society implies that self-help, to which Sir Maurice Hallett drew attention lately, is not altogether lacking. If co-operative banks have not progressed so rapidly as jointstock banks in recent years the dead hand of the past must be blamed. Reform has been slow, but the steady rise in the percentage or recoveries since 1935 has helped, and primary societies too have benefited as they have been able to draw more freely on the 70 banks and banking unions of the U. P. It is only in regard to land mortgage banks that the U. P. department cannot report progress. The use made of advice tendered by the Agricultural Credit Dept. of the Reserve Bank is shown by the growth of village banks. The woollen weaving societies had a good year and war supply orders subsequently should have stabilised progress in this field of co-operative endeavour. The latest report suggests that the Department is a window looking out on many fields of rural activity and what adult education gained and how depressed class uplift benefited may be read in the U. P. report though the Department there feels handicapped by the absence of an apex Bank.

Shaping and cutting materials to his purpose, man must use tools of dependable strength and toughness.

In this sphere the hammer, the screw-driver, the slender saw-blade render vital service times without number.

It is the strength of steel, which gives these tools the reliability they possess.

OPINION in regard to the Executive Council is slowly taking shape. It would be obviously too much to say that there is alround support for it; every issue of every daily in India will nail it to the counter. There are not only statements and resolutions denouncing the action taken by the invitees to the Central Cabinet, but there are also leading articles which condemn the action of the Viceroy. But it is not this kind of overt action that is the clue to the attitude of the public. Besides, one can hardly overlook the fact that there is no talk anywhere of fighting the move now taken by the Viceroy. Of course, we in this country know no alternative to support, except condemnation in long-winded statements to the Press. When we have condemned a certain action of the Government with well-chosen words, which are more discreet than courageous, we have done our part. That is the attitude not only of journalists, in whom it is more understandable, but also of active politicians whose pretensions to shaping the destinies of the nation are never impaired by a sense of modesty. Nevertheless, there are a few groups, from the Gandhian Congress at one end to the Forward Bloc at the other, who do talk of fighting unpopular measures with varying degrees of determination behind it. Even these groups have not so far said a word about fighting the new Council. Gandhiji's eyes are still fixed on freedom of speech in the cause of non-violence. A secondary point is the national demand. Gandhiji is, therefore, content with saying that these remain unaffected. He has nothing more to add. Mr. Jinnah has decided on disciplinary action against these members of the Muslim League who have agreed to join the Cabinet and the Defence Advisory Council. There is no proposal to oppose the formation of the new Cabinet or otherwise to defeat the purposes for which the Cabinet has been formed. Comment in the nationalist and quasi-nationalist press runs along the grooves of established thought. If you take the major points of the Congress creed, you can always get a stock of words sufficient for a thundering leading article in denunciation of the Government. And leader-writers, who have a personal grudge against one or more of the persons chosen for the new Cabinet, are at an even greater advantage.

—

But what is important is whether or not the country looks upon the success of the Viceroy in getting together a number of important public men to agree to serve in the new Cabinet as a reverse for Indian nationalism, one which affects the cause adversely and is therefore to be deplored, even if it were impossible to compensate the reverse by a victory in some other respect. I have carefully read all the statements and articles on this question, and I am sure that nobody regrets what has happened. During the last twenty years in which Gandhian modes of thought have so firmly gripped the public mind, India has shed the stupid old habit of regarding every instalment of reform as the nation's salvation. We have learned to resist the insidious poison about the superiority of the bird in the hand to the bird in the bush and their proportionate values. We have learned to preserve a degree of serenity in the face alike of adverse and of favourable developments. It would be idle, therefore, to expect those who view the new Cabinet more or less favourably to go into raptures over it or to shout their approval from the housetops. That there is no virulent opposition should suffice to show what the public is prepared to give the new Cabinet a chance and wait for results.

—

That attitude is the result of an instinctive appreciation of the facts of the situation in the country during the last one year and more. In fact, there are large numbers of intelligent people who would have liked some of the prominent men to strive for the formation of a Central Cabinet like what we have just now, not indeed, as one which answers the needs or aspirations of the country, but as one which the Government would be ready to concede and which, at the same time, could raise the nationalist movement from the morass into which it had fallen. The original aim of the Non-party Leaders' Conference, too, was not far different. Though certain demands like a fully Indian cabinet and equality of India's status with other Dominions were also

made by the Conference, the basic idea was that the lack of an agreement between the Congress and the League should not stand in the way of the Indianisation of the Viceroy's Executive Council to the fullest extent possible. The Conference could not, of course, put it in the abject terms which a session of the National Liberal Federation would probably not have shied at. There were other elements in the Congress which had extremist traditions, associations and affinities. But the basic idea was the same. And there can be no better proof of it than that at the meeting at Poona, most of the important speakers were found to be highly lukewarm in their condemnation of the Viceroy's action. While the main resolutions condemned the move, nearly every speaker dwelt on the importance of the redistribution of portfolios. Objection is far from being rooted in principle. And discussion of details is the best evidence of acceptance of a scheme in its essence.

The attitude of the non-party leaders is a combination of the feelings of the public at large and the inclinations of the majority of Congressmen. The British Government had during the last two years incapacitated itself for dealing with organised groups. And the only way open to it of allaying the vague sense of resentment which the public was visibly feeling, was to constitute a Council like the present. Past commitments of particular political groups may require a show of opposition as the minimum necessary for face-saving. And in the case of Mr. Jinnah this minimum may amount to disciplinary action against trusted followers of Muslim potentates and leaders who enjoy the suffrage of Muslim masses recorded formally at the pooling booths. But there, the whole "opposition" must stop, in the spirit, as I said, of giving the new Council a chance and waiting for results.

I have, perhaps, given the reader the impression that I am unreservedly and unconditionally in favour of the new Council. If I have, I contend the blame is not mine. For, from the beginning I have emphasised the reservations and the conditions. If there were a shred of hope that the Congress could, on the one hand, overcome the mental resistance of the Government to a wholly National Government and on the other, strengthen its hands either by an understanding with the League or a more convincing exposure of its pretensions, I would be the last to be overjoyed by the present development. But there is no room for such hope. On the other hand, there is room for hope that with a predominantly non-official Indian Government at the Centre, forces may be released that will serve to create the solidarity and ensure the security of the country. It is the generation and augmentation of these forces that form the sole task of the new Cabinet or, at any rate, of the Indian majority in it.

I do not know if all the Indian Councillors recognise that the public looks on them as being on trial. It is not improbable that some of them regard themselves as glorified officials rather than Ministers of State. Why, even the Congress Ministers, during their short tenure of office were infected with a suicidal zeal for improved routine of administration. While they should have devoted themselves to the cultivation of a genuine nationalist spirit in all sections of the community, they tinkered with disconnected measures of reform; and when they left office, their official successors had no difficulty in wiping out most of those reforms on grounds of legal defects. Some of the new councillors may not bring a better attitude to bear on their work. They may either enjoy the

EASTERN GROUP-SLEEPER CONTROL

Tender No. 1/42-43.

Sealed tenders are invited and will be opened at 3 p.m. (Calcutta time) on the 25th August 1941 for the supply of the following standard track sawn first class sal sleepers. Full particulars may be obtained from the undersigned on payment of Rs. 5/- (Rupees five) (being the cost of tender documents) to the Chief Auditor, B. N.Railway House, Kidderpore whose receipt for the amount must be produced before such documents can be issued. This sum will not be refunded.

	Nos.
Broad Gauge (9'×10"×5")	10,00,000

bracing effects of the high attitude of their position or throw themselves heart and soul into the discharge of their narrow official duties. But it is not by the achievements in their respective departments that the public will judge the new Councillors.

Last week, I defined the primary requirement of the nation as the growth of a party which will not ask for the moon and which will not, while refusing to be satisfied with the crumbs of power, neglect the opportunities of making the country stronger against internal and external enemies and against the more dangerous ineptitudes in the national character. I, for one, will judge the new Council by its ability to bring such a party into being and help its growth. But what are the concrete steps which we can reasonably expect the new Councillors to take to secure this object? For my part, I have no hesitation in saying that these steps are: the revival of provincial autonomy in the Provinces in which it is now suspended, redistribution of portfolios in the Central Council, observance of the principle of collective responsibility and the promotion, by every suitable means and under the auspices of the Indian Members of the Council, of understanding among the Indian parties in general and the Congress and the Muslim League in particular.

I think I have given these items, in the order not of importance, but of priority. There are many, I know, who would put collective responsibility and redistribution of portfolios above everything else. The non-party leaders' conference spoke only of these two items. But a little thought will show that redistribution of portfolios depends entirely on the pleasure of the Secretary of State and the Viceroy, while a premature assertion of collective responsibility, even if it were possible, might well take us back to the stalemate conditions of a fortnight ago. These two items, like the promotion of understanding among the parties are conditioned by the growth of a spirit of co-operation and comradeship among the new Councillors. We have no reason to be sure of such spirit. The utmost that we can hope for is that it will grow in the first two, three months of work in the new Council. But there cannot be much difference of opinion on the question of revival of provincial autonomy. It is true, not all the new Councillors are in love with the Congress. But it should not be difficult for men like Mr. Aney and Mr. Nalini Ranjan Sarker to persuade their colleagues that it is the principle of representative government that matters and they cannot be happy over the indefinite continuance of Advisers' government in the majority of provinces. The attitude of the Congress is, of course, an important factor. But I have no doubt that Mr. Aney with his hold on leading Congressmen and Mr. Sarker with his nimble brain will be more than equal to the task of getting the Congress to make appropriate changes in policy.

A predominantly Indian Government in the Centre and popular ministries in the Provinces will give the nation a good start towards the realisation of its aspirations, and the Government an incalculable help in their war effort. It will be something more than a return to the conditions before the resignation of the Congress ministries; for, at that time the Central Cabinet had an official majority. Once provincial autonomy is revived, the way will be paved for the Indian Members to bring the principles of collective responsibility, and, precedent to it, the principle of decision by majority, into actual working. Redistribution of portfolios will, in the new conditions, appear to be a minor change to which the British Government can have no objection; and what is equally important, it will cease to have for the Indian public the importance which it now seems to possess. For what matters, so far as the Central Government is concerned, is that the national will must prevail in all departments of vital importance. And the presence of an Indian Member has never of itself been a sufficient guarantee for the purpose. What India wants is a National Government at the Centre. And the conditions in which the British Government are prepared to contemplate its installation are those laid down *ad nauseam* by Mr. Amery in his speeches in Parliament. The only alternative to the sudden inauguration of a national government in the wake of a sudden agreement between the Congress and the League is its gradual evolution and gradual establishment from precedent to precedent. First, the creation of a majority of non-officials in the Council, then, the acceptance of the principle of decision by majority, to be followed by a redistribution of portfolios and probably a further reduction of the official element—all this, I say, against a background of close co-operation among the autonomous ministries *inter se* and between them and the Centre, improved understanding between Muslim League leaders and Congress leaders—not leader, in either case—till one fine morning we have a band of indisputably representative leaders ready to man the Central Cabinet and bring in Dominion Status *de facto*, leaving it to Parliament to catch up with its statutes the actual development of affairs in India. That is how I would like to envisage the course of events in the next three, four months; and I am sure the average Britisher will be only too glad to see the vexed Indian problem solved in this way. Such developments, far from being a hindrance to the war effort, would be an incalculable help. Far from adding to the worries of the British Cabinet, they would put heart into them and give them the assurance that another great aggregation of peoples is putting forth its best efforts to crush Hitler and wipe Nazism off the face of the earth. It is up to the new Executive Council to appraise its tasks in this light and to devote itself to their accomplishment. There is no time to lose.

Bombay, July 30.

THE first repercussions in political circles to the near appointments made last week are not altogther favourable, but Bombay may take the same view as the non-party leaders' conference and approve without agreeing to the expansion of the Viceroy's Executive Council. This view will prevail against that expressed recently by Sir Cowasji Jehangir to the effect that an expansion of the Executive Council would not help the war effort if the moral support of the Congress and the League were lacking. Sir Cowasji Jehangir's appeal for tolerance will be commended, but his refusal to attempt the Poona Conference has naturally excited surprise. The compromise, for which he pleaded has not come, but the non-party leaders' goodwill should have been appreciated. Sir Cowasji's claim that he associated himself openly with the Government's war effort is borne out by his acceptance of a place on the new advisory committee. The creation of a new committee is widely welcomed as a step forward as India's responsibilities for defence have increased the association in Indians with the Department must increase. The non-official majority in the Executive Council should help more than the Defence Advisory Committee to help Indians influence defence policy though the C-in-C in wartime may overrule even the Viceroy by a threat of resignation. The representation given to non-party politicians may be easily neutralised by a rigid outlook in the Defence Department, but Sir Archibald Wavell has shown that he is as responsive to the times as his predecessor, and some will consider it right that a military man should be in charge of Defence. If Earl Kitchener had not passed out it is quite likely that he would have been Mr. Lloyd George's Secretary of State for war, until 1918 at any rate.

The violent break in cotton prices was the direct result of the freezing order issued on Saturday. The Reserve Bank informed all banks that transactions should cease and assets should be impounded. The instructions issued made reference to subjects of the Japanese Empire including the Mandated Marshall and Caroline Islands and the subject Empire of Manchukuo. All accounts shall be blocked, ran the order, but exemption was granted as regards their obligations of Banks under confirmed credits opened prior to July 26th on behalf of Japanese nationals and Banks may also pay cheques or accept bills provided they are presented by residents who became holders for value on or before July 26th. Non-Japanese customers of Japanese Banks are not affected by the order. The first effects were seen in Bombay on Saturday when the order was regarded as bringing trade to a standstill. The news that existing trade treaties had been denounced naturally accentuated depression in market circles. The freezing of assets is the usual precursor of more drastic measures. About 40 firms and 3 banks—the Bank of Taiwan, the Mitsui Bank and the Yokohoma Specie Bank all scheduled Banks are affected by the order. As they employ over 1000 Indians the order is certainly no contribution to the good of the public. Total Japanese assets in India inclusive of buildings and fixed assets are valued at Rs. 3 crores of which more than 2 crores are held in Bombay where Japanese business is well-established. The embargo on remittances and the ban on transfers to accounts of non-resident Japanese without the permission of the Reserve Bank was communicated to all dealers in foreign exchange. Japanese balances in India are not large. The cotton market was not so stoical as the banking community. Broach fell by Rs. 19 and Oomra suffered more as the rate per candy fell by Rs. 45. It is known that there will be no export market for Oomras hereafter. The market holds about 250,000 bales of which 150,000 bales have not been delivered after sale and 50,000 bales purchased by Indian firms for shipment. Many contracts have been concelled almost abruptly because payment cannot be made by Japan. For the past nine months Indian exports have been made on a cash and carry basis and little money is due to Indian shippers while amounts due from 1938-39 have also been paid off gradually. It is said that only about Rs. 20,00,000 is due on the old accounts.

The sharp rise in yarn and piecegoods shows that what is poison for the cotton market is meat for the other market. Cotton yarn and Goods rose by 10 per cent and rayon yarn went up by 25 per cent as supplies from Japan cannot be had and the rayon mills in India are likely to suffer severely if imports of yarn fail. Their stocks are scanty and the demand frequently made for rayon manufacture in India through special encouragement will gather in volume. The position as regards shipping is obscure. Ships have been cleared as usual but the procedure is uncertain. It is feared that vessels may be detained as in South Africa but it is more likely that the policy adopted by the U.S.A., will be copied in India. The end of appeasement has come sooner than expected and the most surprising thing was that the yen-sterling and the yen-rupee exchange were unchanged on Saturday. There will not be quotations now that payments are to be made into blocked accounts at the rate ruling on July 26th and payments by Japanese Banks in respect of contracts made before July 26 alone are possible.

The Bombay presidency having faced floods is now organising relief. The Gujerat districts suffered most and the Deccan least. Bombay has not forgotten that Malabar too has suffered severely this year and a meeting held last week heard details. A harrowing picture was drawn, but it is not likely to create a deep impression when the Government has allotted only Rs. 5 lakhs for relief expenditure and expect the public to pay the rest as in the past. Villages near the rivers have suffered most but that is not going to induce the public to respond quickly. The Committee has talked much about the need for fresh seed and new crops and the importance of road repairs has been stressed it is urged that non-official agencies are busy and local officials have not been unmindful of the serious losses. As relief cannot satisfy areas which have lost crores the Bombay Government will have to think of other things besides flag days. Perhaps a holiday for collectors for the various war funds will release the flow of charity for purposes nearer home and it is only proper that citizens should resolutely say that Gujerat and Kerala must come before War Gifts or Red Cross contributions. The Mayor has promised his support and speakers at the meeting last week did not forget to mention the Congress Committee's relief work in Surat. The war has upset communications and put up the prices of timber and building materials. Government does not know what is needed, and the 31 members of the relief committee are a chorus without a leader, though there are plenty of well-known names.

(Continued from page 191)

information that total subscriptions received so far for the defence loans are Rs. 69 crores. Then he added:

"I make no secret of the fact that even the All-India total falls far short of what is required. The Government of India needs at least Rs. 100 crores a year, Rs. 2 crores a week, from different defence loans to meet expenditure on Indian war measures and the proper financing of war supplies operations in India. The cost of war supplies made by India to His Majesty's Government is repaid in sterling, but the actual payments to suppliers in India have to be made in rupees for which a large volume of loan money is required. Larger than we are getting at present."

That is to say, the Viceroy wants subscriptions for the defence loan on the basis of Rs. 100 crores a year or roughly Rs. 2 crores a week. Before we examine the Viceroy's estimates, we may say at once that the present plan of issuing loans through the tap can, under no circumstances, rope in anything of the order of Rs. 100 crores a year. With special efforts from various quarters, with Ruling Princes responding generously and with the inclusion of interest-free loans and savings certificates, the total of the defence loans has come to Rs. 69 crores in a period of nearly two years. The maximum capacity as thus disclosed is Rs. 35 crores a year. It is a tall order to make the Indian giltedged market produce treble this amount. For our part, we believe that it can produce amount. But the plan of the loans and the technique of handling the market have to be more adroitly fashioned and more confidently executed. We stand by our plan of a series of loans, each series to contain different types, and the limitation of the amount to be secured from each series and the time for which the lists are to be opened.

C. N. MUKERJEE,
Managing Director.

We should now like to examine the statement of the Viceroy that the defence loans are required in connection with the proper financing of war supplies operations in India. The Viceroy says; "The cost of war supplies made by India to His Majesty's Government and to Allied Governments is repaid in sterling, but the actual payments to suppliers in India have to be made in rupees for which a volume of loan money is required—larger than we are getting at present." It is true that the Government of India make out payments in rupees in respect of the purchases which they make on account of the British Government. It is also true that the Indian Government are reimbursed in sterling. The proper process of the transfer of sterling reimbursements into rupees is already known to the Finance Member and the Reserve Bank and has been in actual operation for these twenty and odd months. The surplus sterling assets, as they go on accumulating in the banking department of the Reserve Bank, are transferred, from time to time, to the issue department which is thus enabled to create additional currency thereagainst. The new currency thus created sets off the rupee payments made earlier by the Indian Government in regard their purchases on behalf of the British Government. A critical study of the returns of the Reserve Bank since the beginning of the war will clearly prove that the growing-up sterling securities in London have been recurrently utilised for expansion of currency in India. There have been various changes in the holdings of sterling securities in the issue department, the most substantial changes being accounted for by the sterling debt redemption scheme. In broad terms, however, the position is that sterling securities in the issue department stood at Rs. 59.50 crores on September 1, 1939. The latest figure is Rs. 121.65 crores. The net increase in sterling securities between September 1, 1939 and July 25, 1941 is, therefore, Rs. 62.15 crores.

In fact, the additional currency created against sterling securities is very much more than this as sterling securities would have stood to-day at much higher than Rs. 121.65 crores if a large parcel of these securities had not been handed over to the Government for payment to holders of the dated India sterling stocks. Rupee securities in the issue department, which stood at Rs. 37.39 crores on September 1, 1939, are Rs. 88.47 crores on July 25, 1941. There has thus been additional currency of Rs. 51.08 crores created against rupee securities. A good part of this additional currency had really been affected against sterling securities but is now revealed as under rupee securities because of the creation of **ad hoc** Treasury Bills against the sterling securities delivered to the Government. In other words we can trace additional currency for Rs. 113 crores in the returns of the Reserve Bank. This is the method by which the operations arising from purchases for the British Government were squared. And this is the proper method. To meet this position, it will not be the proper thing to raise more loans in India than necessary.

The real fact of the matter is that we do require, at any rate we shall be shortly requiring, to raise substantial sums from rupee loans in India. But the requirement for such large sums from loans arises from the opportunity which India has now got for replacing sterling debt by rupee debt, for getting rid of the external debt and substituting internal debt in its place. If the need for a rupee loan for Rs. 100 crores is viewed in relation to the extinction of the external debt, the problem bears a different complexion altogether. The essence of this problem is that, by the very process of liquidating the external debt, India's credit is placed in the highest standard. India, with such a high credit, should have no difficulty in placing new loans for Rs. 100 and executing those plans on the most favourable terms.

In view of the vagueness of the Viceroy's observations in regard to defence loans, it would be helping the campaign of defence loans if Sir Jeremy Raisman gives a full statement as to his intentions and objectives with regard to defence borrowings. We understand that an Establishment Officer of the Government of India is visiting all the provincial capitals with a view to intensify defence loan campaigns. We suppose that the Government do not mean this as a joke. If they are serious about a fruitful campaign for defence loans, let them entrust the task to someone who knows the money market and the giltedged market. What possible contact the Establishment Officer can have with defence loans passes our understanding.

There has been some activity in the exchange market. Export bills have made a fair showing, mainly on gunny account. Remittance enquiry has also been noticed on a small scale.

Banks were sellers of T.T. at 1s. 5 15/16d., for ready upto six months forward; and banks were buyers of T.T. at 1s. 6d., for the same delivery.

Banks were buyers of three months R.A. bills at 1s. 6 7/32d., for three months and 1s. 6 9/32d., for the fourth month.

Inter-bank call money quoted 1/2 per cent, no borrowers.

Firms' money for call and short quoted 1/4 per cent; and for one to four months deposits 1/2 per cent.

Chairman's Speech—

JUPITER GENERAL INSURANCE CO.'S MEETING

RISE IN MARINE PREMIUMS FOR 1940

Improvement in Life Business

At the Annual Meeting of the Jupiter General Issurance Co., Ltd., held on July 21st the Chairman Seth Dharamsey Muiraj Khatau. reviewed the results. Addressing the Shareholders he said:—

Gentlemen,

The Report and Accounts of the Company have been in your hands for some time, and I shall, with your permission, take them as read.

You will have noted that the premium income in the Fire Department of Rs. 8,86,994-3-7 is about two lakhs of Rupees less than that for the year 1939, and about four lakhs of Rupees less than that for the year 1938. The chief reason for the fall in the Fire income is due to the curtailment of our activities in the United Staes of America. Our net premium revenue in the United States for the 3 years 1937, 1938 and 1939 was Rs. 6,76,763-7-7, Rs. 4,99,103-11-9 and Rs. 3,19,596-1-9 respectively. This source of revenue is now no longer available to us as we have decided to withdraw from America as from the 31st December 1939. As I explained to you at our last meeting, our American business was discontinued as the result of a detailed investigation which definitely showed that the business was not remunerative to the Company. Due to our withdrawal from America we had to return a sum of Rs. 3,68,246-9-7 being the pro-rata premium to the American business, and we have now no liabilities in this regard. If we had paid the entire amount from our Fire Fund, the Fire Fund would have stood at approximately Rs. 5,60,000. We have hoowever been able to pay a part of the return portfolio from the current year's revenues and have thus strengthened the Fire Fund. A further Additional Reserve of Rs. 70,830-9-0 in the Fire Department has thus been created.

The question of replacing the American portfolio with suitable foreign business has been engaging the attention of your Board of Directors but due to the war it has not been possible to obtain a remunerative portfolio from foreign countries. The Directors have therefore decided not to replace this business by a foreign portfolio for the present but to depend upon the normal expansion of the Company's business activities in India, and the results of the six months' working during the current year have shown considerable improvement in our business as compared to the previous two years. I expect that the progress made so far will continue during the rest of the year and we shall be able to show better results in our report for the year 1941.

The losses and claims paid work out at 29.48% of the premium income. The expenses of management etc. come to 44.52%, showing a very welcome reduction as compared to 61.45% for the year 1939 and 59.26% for the year 1938. We have been able to show this reduction in the management expenses etc. due to the introduction of the new legislaion and the Tariff Reforms introduced by the various insurance Association in India. The surplus for the year amounted to 25% of the premium income which, you will agree with me, will be considered very satisfactory. The Fire Fund has been kept at Rs. 6,30,000 equal to 71.02% of the premium income. A sum of Rs. 1,59,059-11-1 has been transferred to the Profit & Loss Account.

The net premium income of Rs. 5,88,196-3-6 in the Marine Department shows the considerable progress made by the Company during the year under report. This increase is chiefly due to the War Risks premiums. At the same time the Company has taken this opportunity to expand its marine organisation. The claim ratio works out at 18.03% and the expenses of management 22.29% of the premium income. It is yet too early to state definitely whether there will be any further claims in respect of the businens transacted in the year 1940, but the Directors feel that they are justified in transferring an amount of Rs. 2,06,591-10-4 to the Profit and Looss Account from the Marine Account, as about half this amount relates to profits earned from business secured in 1938 and earlier. The Marine Fund has been kept at Rs. 4,00,000/- which is equal to 68.00% of the premium income.

The net premium income in the Accident Department shows a decrease as compared to the premium incomes in the previous two years. The main reason for the fall in business is due to the fact that due to adverse claim experience we have stopped writing certain classes of business commenced in the year 1938. The expenses of management show a decrease of about 8%, as compared to the years 1938 and 1939. This is mainly due to the introduction of the new Insurance Act and the reforms introduced by the various Insurance Associations.

In the Life Department during the year under report 976 policies were issued agreegating to an amount of Rs. 20,86,000/-, the premium income thereon being Rs. 1,18,365-3-0. Claims by death amounted to Rs. 1,27,385-5-0. and that by Maturity Rs. 2,69,627/-. You will notice that claims by Death were larger than that of the previous years. This is due to normal increase in death claims with lapse of time. Claims by Maturity have also shown a sharp upward trend, but this amount of Rs. 2,69,627/- includes a sum of Rs. 2,18,546/- being the total of two policies which matured for payment in 1940. Actual premiums received during the year under report, after deducting reinsurance premiums. amounted to Rs. 5,67,548-9-6, which is Rs. 30,000/- more than last year. Due to war conditions and general nervousness felt by the insuring public towards the middle of last year lapses were above normal; and there were many surrenders. This accounts for the small increase in the renewal premium income of the Company during the year under report. One of the common features of the insurance companies transacting life assurance business has been a fall in their business during the year under review. It will therefore be noted with satisfaction that we have been able to shiw an increase of about three lakhs of rupees over the business done during the previous year.

A Valuation of the Assets and Liabilities of the Life Department for a period of 3 years ending with 31st December 1940 is now under preparation and the result will be published in a short time. The Directors have on the advice of the Consulting Actuary transferred a sum of Rs. 1,31,200-15-10 to the Life Fund with a view to strengthen it and now it stands at Rs. 21,00,101.

During the current year the Company has decided to pursue a policy of progressive expansion in our Life business, and you will be glad to know that during the first 6 months of the current year we have written about twice the business as we wrote for the corresponding period in 1940. I expect that during the remaining 6 months of the year we will be able to show at least the same rate of progress and the business written by us during the whole year will be double that of last year. This was an additional reason why the Directors considered it desirable to strengthen the Life Fund.

You will notice that a sum of Rs. 1,36,656-8-4 has been written off as loss on realisation. A major portion of this loss was incurred on the sale of our American securities, and has been carried on in the Balance Sheet since the year 1938. I reproduce the figures showing the Book values and the Market values of our American investments as on 31st December 1938 and 1939:

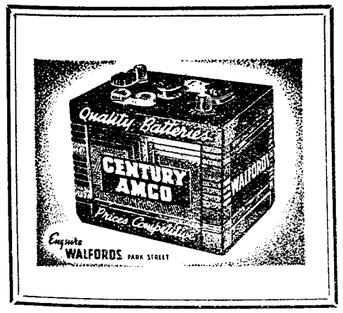
1938:				
Book value	Rs.	20,23,942	14	6
Market value	,,	19,48,149	0	0
Deficit	Rs.	75,793	14	6
1939:				
Book value	Rs.	19,78,150	0	9
Market vaue	,,	18,81,789	2	6
Deficit	Rs.	96,360	14	3

A provision in the Investment Reserve existed for this loss and the Directors have therefore transferred a sum of Rs. 80,000/- from the Investment Reserve to meet this loss on realisation. I may mention here that no credit in the Revenue Accounts has yet been taken for the increase in the rupee value of our American securities due to appreciations of the American Dollar.

During the current year we have been obliged to bring a portion of our American investments to India due to some of our securities becoming vested in the Government of India under their notification. We have thus realised a portion of the appreciation in the rupee value of our American securities and the result thereof will be shown in our next Annual Accounts.

I shall now pass on to the Balance Sheet. Our investments in the Life Department are valued at market rates as on 31-12-1940, and during the last 6 months there has been an appreciation in the market values of these securities. In the General Department the values are shown at Book cost. The market value of these investments is Rs. 85,761-10-1 over the book value as on 31st December 1940, which will be cinsidered satisfactory.

In the year 1940 two new Branches of the Company have been opened at Secunderabad (Deccan) and at Delhi. Six of our Branches were visited either by the Managing Agents or by the Manager of the Company.



I refer to the shareholders' desire expressed in the General Meeting which was held in 1938 that the Directors should consider the question of reducing the uncalled liability of the shareholders. The Directors have taken legal opinion on this point, and they are advised that the question should be deferred as the procedure is difficult. Under the Indian Companies Act consent of every creditor is required before the Company can reduce its share capital. In the case of insurance companies every policyholder is a contingent creditor, and it would be necessary to obtain the consent from each of them before any such reduction can be made. A composite insurance company like ourselves has a very large number of policyholders, both General and life, and it would be almost impracticable to obtain their consent. Section 59 of the Indian Companies Act makes it compulsory on the company to provide the full amount of contingent claims. No discretion is left to the court to do away with the provisions of section 59. The Directors have therefore decided to defer consideration of reduction in the capital of the Company for the present.

I explained to you in my speech last year that prior to 1940 our Company had reinsurance treaties with various continental companies. It then became necessary to replace these treaties by similar treaties with British companies. A certain amount of the Company's funds were thus locked up, being balances held by insurance companies situated in enemy countries. The actual amount as on 31-12-1939 was about Rs. 15,000/- and after making up our accounts for the year 1940 we find that the total amount thus locked up is Rs. 18,857-2-3 which is small having regard to our business with these companies.

I take this opportunity of thanking all our clients, the Officials and the Staff both at Head Office and Branches, and all our Agents and Brokers, both in India and abroad, and our field workers engaged in our Life business for their loyal services to the Company.

And now, gentlemes, I beg to move:—

That the Directors' Report, Audited Revenue Accounts, Profit & Loss Account and the Balance Sheet for the year ended 31st December 1940, which have been circulated to the shareholders, be and are hereby approved and adopted.

Jute and Jute Manufactures

(From Our Correspondent)

Calcutta, 3st July.

IT is satisfactory to be able to record that, for the first time on record, a series of samples prepared by the Jute Dealers Association from various representative districts, has been approved by the Indian Jute Mills Committee as conforming to the specifications laid down for the standards of jute to be purchased by Mills during the season for ordinary mill purpose. It is to be hoped that this evidence of co-operation between the principal buying element and the selling side is only the precursor of similar joint action in matters relative to the raw material. The samples have been on view to all interested parties and have generally gained approval. It is the intention that fresh samples shall be prepared and displayed as the season advances and the character of the jute develops and becomes more definite with the idea that such samples should be permanently on view as a guide, not only to sellers and buyers, but to arbitrators who may be called upon to adjudicate in disputes.

Now that the samples have been accepted as conforming to the standards laid down, the next thing is to ensure that these standards are not departed from. An opinion pretty generally held is that one of the ways in which stability of standards could be maintained, or would certainly go a long way towards attaining that end, is the abolition of private settlements and the submission of all disputes to arbitration. It is understood that this is one of the recommendations put forward by the standards sub-committee to the Mills Committe, and as it receives the backing of all the sellers' association and of quite a fair proportion of the mills, it is likely that a trial will be given to this scheme as an experimental measure at least. As a necessary corollary, it is recommended that all purchases by mills should be strictly according to the guarantees laid down and that mills should so regulate their purchases as not to demand too large a percentage of the lowest number early in the season. While it is not expected that the compulsory reference of all disputes to arbitration will result in overwhelming the tribunal with work, at the same time modification of the present system of arbitration may be found desirable. For instance arbitrations could in many cases be more conveniently held at Mills, while much redundant correspondence could be eliminated and decisions speeded up, by the general use of Joint Submission forms. It is to be hoped to that the range of standards samples which it is intended to maintain will receive official recognition as the standards by which arbitrators are to be guided.

The Raw Jute Taxation Bill has been under fire in the Assembly already and has now been referred to a Select Committee. According to the Finance Minister, the regulation of jute sowings this year has cost Government over 36 lakhs of rupees. If all they have to show for that expenditure is the "recorded" figure of acreage announced in the Preliminary Jute Forecast, we cannot concede that it has been money well spent. Government may be satisfied, but the trade also is satisfied—that the figure recorded by Government is further from the truth than that previously recorded by the Agricultural Dept. The result achieved does not appear to be much recommendation to entrust Government with another 50 lakhs to spend on such undefined schemes as "stabilisation of jute prices' at reasonable economic levels." Government have already got 25 lakhs of rupees tied up in their last year's effort at stabilising jute prices and the trade would be interested to know what are their intentions regarding the liquidation of that ill-advised essay. An opportunity presented itself not long ago, when Fatka soared to Rs. 75, of making a start at least to clear their holdings without loss, but the chance was missed and it scarcely seems likely to return in the near future, while all the time such jute from the crop before last becomes less and less attractive to potential buyers. It is to be hoped that the Select Committee will be very definite on the point that "stabilisation" is not to be attempted again in any such fashion.

The Crisis in the Pacific has had considerable effect on markets during the past week and the course of prices has been much swayed by rumours, some of the most incredible description. Generally nervous conditions have prevailed. In Export jute, with no more immediate freight showing, there has been little to record. Firsts for shipment were brought at Rs. 52 and Outport Tossa assortment at Rs. 49. Some Old Crop Dundee Daisee 2-3 for Aug.-Sep. shipment was recorded at Rs. 51-8, which was at Rs.8-8 below Fatka. Mills have brought moderately Firsts and Lightnings at Rs. 52 and Rs. 42 and later at one rupee less, while Outport Tossa 4's were taken at Rs. 35 with sellers over. Fatka has fluctuated according to the news of the day, starting from Rs. 64-4, touching Rs. 65-2 as the highest of the week, dropping to Rs. 58-12 as the lowest and subsequently hovering around Rs. 61 to close at Rs. 62-12.

CALCUTTA

Loose jute New Crop prices still fail to attract Mill buyers at Rs. 12, Rs. 10, and Rs. 8 for Indian Jat Tops, Middles and Bottoms. Only small sales of Tops, for early shipment to secure colour, have been recorded at rates from Rs. 12-4 to Rs. 13-8 according to quality and marks. Even Old crop has not been dealt in to any great extent though Rs. 8-10 is reported for European Bottoms with Indian Jat offering at Rs. 7-12 and District at Rs. 7-4. Conditions in the Mofussil have been favourable for the growing crop which continues to make good progress. Imports are still limited in quantity owing to the recent stoppage of cutting, and prices are far above Calcutta parity. Quality seen so far is on the whole satisfactory.

Heavy Goods have been the strongest feature of the Fabrics market during the week, Liverpools and Cornsacks having been freely dealt in. A demand for ready 8 oz. hessian kept that position firm but the turnover in hessians was not extensive. Sales of nine porters were recorded at Rs. 20-8 to Rs. 20-12 ready, at Rs. 18 and Rs. 18-8 Aug.-Oct. and at Rs. 17-8 Oct.-Dec. In elevens, Rs. 22-4 to Rs.22 for Oct.-Dec., Rs. 20-4 to Rs. 20 for Jan-March and Rs. 19-4 for April-June were the most notable sales reported. Cornsacks were dealt in at Rs. 40 July, at Rs. 39-4 August, at Rs. 39-4 to Rs. 39-8 Aug.-Sep., at Rs. 39 September and at Rs. 38 to Rs. 38-8 Oct.-Dec. Liverpools sold at Rs. 44 Sept., at Rs. 43-8 Oct. and at Rs. 42-8 Novr. "B" Twills varied from Rs. 38-8 to Rs. 37-8 and back to Rs. 38 in the Oct.-Dec. position. Other sales include Woolpacks at Rs. 1-12-6 August and Oct. and at Rs. 1-11-6 Oct.-Dec., and Cubans at Rs. 52 to Rs. 52-8 October. Market closes steady at the following quotations:—

	Ready	Aug.	Sept.	Oct./ Dec.	Jan./ Mar.
9 porters	20/4	19/12	19/4	17/8	16/8
11 porters	24/8	24/6	24/-	22/4	20/4
"B" Twills	38/14	38/14	38/8	38/-	37/10
Cornsacks	40/-	40/-	39/12	39/-	38/6
Liverpools	44/12	44/12	44/8	43/4	42/4
Heavy Cees	36/8	36/8	36/8	36/8	36/8

JUTE

Calcutta, July 31.

Before the weekend the jute market reacted unfavourably to the news from the Far East. It was only natural that developments were viewed as unfavourable and the steadiness apparent on Friday was absent on Saturday. On Friday September Firsts closed at Rs. 63-12 after opening at Rs. 64-4 but the small fluctuations was proof of an impaired tone. Apart from speculation concerning an extension of mills' working hours and the need to increase stocks, there was the fact that the crop reports were more than ever encouraging and the substantial carry-over from the 1940 crop indicated that supplies despite drastic crop restriction would be in excess of demand. The dormant bearish feeling was responsible for the neglect of Loose Jute on most days. Asking prices for the new crop were maintained at Rs. 12 Rs. 10 and Rs. 8 but apart from a limited interest in Tossa on the part of balers nothing was reported. Transactions in old crop at Rs. 49 and Rs. 52 for First 2/3 and Outport Tossa 2/3 indicated that export demand was not altogether absent but actual business was as slight as before.

The steadiness of hessian has kept jute on an even keel on most days of the week under review. The manufactures market has been the main crop because political intelligence remains disturbing and Mr. Churchill's speech on Tuesday has apparently not livened up Indian market. Saturday saw the jute market in the doldrums as Futures dropped to Rs. 62 and Loose jute was more than ever neglected. The fall in the manufactures market, after the decline earlier in the week, had a depressing effect. Monday, however, provided no opportunities for a revision of news as Futures fell again to Rs. 60. The raw jute market was more than ever hesitant and irregular and small business with Mills in Outport Tossa 4 at Rs. 35 per bale accorded no comfort. The lack of interest on the part of mills had to be set against maintenance of prices at the official mimina for new crop. The pronounced easiness of the loose jute market reminded many that the jute outlook, in spite of the firmness produced by Ministerial assurances, was far from clear. There was a certain amount of recovery on Tuesday, as some interest was shown in high grade Tossa for export while balers evinced some interest in Jat Tossa. Dealings in Firsts at Rs. 52 and Lightnings at Rs. 42 were indicative of a resurgence of interest in Pucca Bales, but the steadiness was, in the main, the consequence of the refusal of the hessian market to go down. The freezing order and the impending breach of the commercial treaties with Japan did not cause the acute misgivings originally anticipated. Raw jute was definitely steadier as Futures also showed recovery with September rising to Rs. 61-8. Similar improvement was not discernible on Wednesday when the jute market turned quieter for lack of support. The reported scaling down of 4 annas per maund in the case of New Crop was evidence of fresh fears. The apprehension that shippers would hold off led to a small fall in Firsts but Mills were buyers at Rs. 51 for Firsts and Rs. 41 for Lightnings. The small decline in Futures betokened reduced interest but the onset of firmness in the hessian market led to a slight change for the better in the jute market towards the close of dealings. Prices today in the Futures market were Rs. 61-2 for September delivery in spite of limited business and the slow rise in hessian has steadied Jute.

JUTE MANUFACTURES

Calcutta, July 31.

The jute manufactures market has displayed astonishing poise in the face of unpromising developments abroad. The initial reaction to the Far Eastern news was unfavourable. but the tone is definitely different from that noted last Friday. It is possible to say that the hessian market has retained its balance and even the prospect of losing an important export market has not rattled the supporters of hessian. Prior to the weekend holiday the hessian market certainly showed signs of an easier feeling as Nine Porters quoting Rs. 20-6 on Thursday had dropped to Rs. 20-2 on Saturday. The resumption of profit-taking by secondhand sellers last week pointed to an impaired tone. There was a late improvement on Friday when Eleven Porters stood at Rs. 25 for August shipment and the rate for September was Rs. 24-8. There was similar improvement in 9 porters which were up to Rs. 20-8 and Heavy Goods developed a steadier tendency with Cornsacks taken up to Rs. 40 and B. Twills at Rs. 38-8 for October shipment.

There was the usual reaction on Saturday in the wake of the orders for the freezing of Japanese assets. There was a sharp break in 11 porters which dropped to Rs. 24-10 for July though August fell to Rs. 24-6 only and distants showed little change. The drop in 9 porters to Rs. 20-2 was accentuated by the fall in Jute Futcres. The absence of buying suupport led to lower quotations all round and Heavy Goods did not show former immunity as B. Twills sold at Rs. 38 for October-December shipment and the quotation for Cornsacks (August shipment came down to Rs. 39-8).

The last week was craracterised by irregular movements, and the change since in the direction of steadiness has been welcomed. The maintenance of prices at the decline undoubtedly points to a change of sentiment: despite the lack of export inquiry the fabrics market appears to be in fine fettle though the recession in hessian near futures shows that the reserve of sellers developed after the reduction of rates on Monday. The late improvement in prices on Tuesday has reinforced the belief that the undertone was steadier. Nine Porters Ready rose to Rs. 20-4 with similar improvement for goods for Delivery and Heavy Goods turned steadier with B. Twills October/December taken up at Rs. 38 while the quotation for August shipment was Rs. 38-8. Liverpool Twills at Rs. 44-4 and Cornsacks at Rs. 39-10, were rates received during the day. The tone at the close changed as 11 porters weakened slightly and rates for October and January delivery came down slightly. The next day saw no change in rates, though the feeling was better and sellers raised their limits. Rates were at first inclined to ease but the absence of demand led to a curious change with sellers holding off. In a dull market 9 porters stood at Rs. 20-4 for July and Rs. 19-4, Rs. 18-4. Rs. 17-b and Rs. 16-4 for Auguest, September, October/December and January/March delivery. Heavy Goods were rather quiet owing to the contraction of inquiry and the rates for August shipment remained unaltered. The prices for 11 porters were maintained at Tuesday's levels after a brief decline. The quietness of both jute and hessian is understandable and not much hope is entertained of a prompt recovery at present. 9 porters has however advanced to Rs. 20-6 for ready and Rs. 19-8 for August. 11 Porters are higher at Rs. 24-7 for Ready and Rs. 24-4 for August. Heavy Goods show a small rise with Cornsacks at Rs. 39-12.

COTTON

Calcutta, July 31.

The Bombay market has passed through a troubled week. The vicissitudes are not of its making, and the tone on Friday last was indeed described as better than before, though the extensive selling of commission houses and the liquidation of contracts indicated unusual nervousness. Prices at the close on Friday showed a very slight gain in the case of Broach though Oomra had fallen. The next day's slump was sensational. Broach July-August after opening at Rs. 255-8 slumped to Rs. 243-8 and the rate for the 1942 contrart fell from Rs. 282 to 272-8. The unusual fall in the case of Oomra from Rs. 221-4 to Rs. 197-8 showed that the freezing order was regarded as a serious danger to the export trade. Liquidation by Japanese houses, stop-loss selling and late realisation by the lucky few pushed rates down though New York was steady with Future showing again a rising tendency.

The big fall in cotton prices past weekend disproved the earlier conclusion that prices would remain steady as outside support was increasing and New York was giving up after the fall in the middle of the week. Whatever be the state of spot demand the cotton market took a bad knock when the freezing order was announced on Saturday. The lack of rain in Gujaret and the Dholleras tract cannot be a big factor though the increase in mill demand envisaged in most quarters at present should help greatly the staple varieties. The main problem is presented by Oomra which was absorbed by Japan freely and for which no market can be had owing to the war.

The interest shown by mills in foreign cotton does not angur well for Indian cotton but all lalculatiins are belied by the indications of steadiness at the decline. The resumption of buying by offices and extensive covering have been reported. Oomras like Broach have shown recovery only to react immediately and Broach April/May closed at Rs. 276 on Monday showing trat the 300 peak had been definitely left behind. Speculative selling has been countered on more than one day by the outside jobbers but New York's irregularity may reduce enthusiasm. The sharp rise in Futures in New York has revived talk of price ceilings. The check given to Brazil's exports and the season movements in New Orleans show that the small crop of 1941 is not going to be taken up to dizzy levels. The President's remarks on inflation will repress bulls enthusiasm and Tuesday saw something like a reaction after a small advance. A faint hope that it would all blow over led to speculative buying with Oomra December/January rising to Rs. 265-8 and Broach April/May to Rs. 288. The closing rates were lower owing to the reaction following jobbers' selling. The renewed firmness of New York did not rouse enthusiasm but the market has drawn some strength from the wheat and oilseeds market as in the recent past. Selling by shippers forced a reaction on Wednesday when Broach fell back after a small rise. The closing rate was Rs. 246 for July/August and Rs. 278-8 for April/May. The Sewri Room rates were lower in the case of Broach and higher for Bengal and Oomra. The belief that the U.-S. Government would not sell its stock of 6 million bales has kept up American cotton market, but Mr. Roosevelt's remarks on defence expenditure at 30 millions per diem and price control may lead to a change of sentiment soon. The Bombay market is flat to-day as rates are definitely lower and the general tone shows no improvement. Bengal, Dec./Jan. opened at Rs. 142-8 and Oomras Dec./Jan. at Rs. 191-4. Broach July/August opened at Rs. 239 and April/May stood at Rs. 270-4.

MISRA HOSIERY

MILLS

CAWNPORE

Telegrams : MISRA, Cawnpore Telephone : 2336 Cawnpore

THE MISRA HOSIERY MILLS have, from the commencement of the war, been "on active service." Working day and night, the mills have been supplying essential requirements of the Army in the knitting line.

MISRA HOSIERY cater to the requirements of the general population and comprise socks, stockings, undervests, sports shirts, interlock underwear and outerwear, for men, women and children.

Production 8,000 Articles, daily.

PIECEGOODS

Calcutta, July 31.

The sensational jump in yarn prices by as much as 10 per cent on Saturday was the direct and immediate result of the freezing order. The notice of termination as regards the existing commercial treaties given by Sir Robert Craigie in Tokyo gingered up enthusiasm and the pronounced lift in rayon prices left the cotton manufactures market no option but to follow. The pressure in mills' production and the eagerness of dealers to stock cannot account for the sharp rise in prices. The passion for textile shares, now so obvious, is only another aspect of piecegoods market activity. The fall in raw cotton values can have little effect on prices which are likely to harden owing to the scarcity of imported goods and the improved prospects in Colonial market.

Unsatisfied demand was referred to last week as a factor leading to increased firmness, and the current rumours about Japanese shipping and trade are not likely to encourage trade, particularly as payments will be blocked. The extensive buying reported in both Bombay and Calcutta of late originates from the feeling that commodity prices are on the upgrade and prices of mill goods must rise. The irregularity in raw cotton will not touch yarn prices as holders of stocks have very clear views and know that mills have got a lot of other work. The Madras quotations for all types of yarn show big gains over a month and the Bombay market too adheres to the opinion that higher prices for cloth and yarn are unavoidable. In spite of limited offtake the prices for standard lines had risen slightly until last week and the moderate demand and united clearances referred to last week can have no bearing. Last week it was noticed that the better types of goods secured higher prices owing to a rise in the prices of Japanese goods. Mr. Eden's speech in the commons does not suggest that reconciliation and normal commercial intercourse are possible as in the past. The stimulus given to the piecegoods market in the last week has been substantial and more than import control and the higher duties on rayon goods now in force. the week's political news has influenced the market. The mills are in for a busy time but they have the loomage and extensive double shift working, as also the end of the Cawnpore strike, should help to satisfy all demands though dislocation and delay will have its natural effect on prices now and in the near future.

GOLD

Calcutta, July 31.

The decline in gold prices towards the end of last week must have come as a surprise. The news from the Far East has lowered the price from Rs. 42-2 to Rs. 42-1 in Bombay. The small improvement recorded on Wednesday reflects the prolonged dullness of the market. On Monday the rate in Bombay fell to Rs. 41-11-6 for Ready and the improvement since is based on revised views as to the market trend. London is unchanged and the resumption of buying in Bombay has not yet pushed prices up to last week's levels. In Calcutta also the rate for Ready is lower at Rs. 42 per tola, and sovereigns are quoting Rs. 28-9-9 as compared with Rs. 28-7 in Bombay. The gold market has not developed strength after the upset recorded on Saturday. The limited interest shown in bullion is not surprising but the decline should stimulate export demand. The closing rates in a dull market on Wednesday were Rs. 42-1 for Ready with Rs. 42-1-6 for First Settlement and Rs. 42-1-3 for Second Settlement. The difference in rates between the markets is still small and the market in Bombay this week has shown few signs for springing to activity, as rates to-day stand at Rs. 42-0-9 and Rs. 42-1-3 for both settlements.

SILVER

Calcutta, July 31.

Silver is still quoted at 23¼d. per ounce in London and New York too is unchanged. Bombay has flurtuated narrowly this week. Saturday saw a small rise, followed by a swift decline in sympathy with gold, which was ordered by brokers generally in a dull market compared with Saturday's rates of Rs. 63-1-6 Rs. 63-1-6 and Rs. 63-3 the closing rates on Wednesday disclose no improvement as they stood at Rs. 62-14 for Ready, Rs. 62-15 for August and Rs. 62-15-6 for September settlement, noticed on Monday when gold showed marked recovery has not held, for Ready has dropped from Rs. 63-2 to close lower on Tuesday at Rs. 62-15-6 though the opening rate on that day was Rs. 62-14 per 100 tolas. The market has lacked incentive to keep buying and the narrow movements do not disclose fresh features. The drop in gold shows that war news does not have the anticipated effect nowadays and a comparison with last week shows that the small decline in gold and the smaller decline in silver are not significant like the fall in cotton and the setback in wheat. The market on Thursday was quieter with Ready at Rs. 62-13 and Rs. 62-13 and Rs. 62-6 for the two settlements.

WHEAT

Calcutta, July 31.

The wheat market has responded to the news from Japan in gallant and unmistakable fashion. The delay in the rainfall in North India is not a restraining factor and the talk of price control and restricted dealings at Hapur, may not be of much importance. Larger stocks and local declines are not likely to affect the main trend. For successive weeks the price of wheat has risen, though there is a possibility that Far Eastern developments would enlarge Australian shipments to India. The restricted demand for flour is not of much importasce at present because the outlook is wholly favourable nor is the talk of price control in the U.S.A. The Calcutta market has kept step with Karachi and the price of Rs. 4-15 per maund for Ready after the rise to Rs. 5 before the weekend and Rs. 5-0-6 for September shows that the tone is quietly firm still. The recession in Karachi, however, suggests that a continued advance such as took place throughout July cannot be expected now. The quotation for Choice White before the week end was Rs. 34-4 per candy, it has dropped to Rs. 33-5 and the rate for September delivery too has declined from Rs. 34-12 to Rs. 33-15. The tone is steady. In Calcutta the rate has come down slightly to Rs. 4-15 from Rs. 5 at the end of last week. The unsettled tone of the cotton market explains the small decline in Karachi. The world wheat situation is not likely to affect Indian prices, for the rise in the seeds market has lifted. Bombay prices, and the war is still looked upon as a favourable factor which may help in a revival of exports.

TATA IRON AND STEEL ACCOUNTS

The news regarding the freezing of Japanese assets in the British Empire and the United States of America has been received with gratitude by the Indian Textile industry, which has long been asking for a prohibitive import duty to curb Japanese competition. There has, therefore, been a very strong demand for Cotton shares both in the Bombay and Calcutta markets. After cotton mill shares mention must be made of *Tata Steel* shares which are the cynosure in the Bombay share market. In the whole range of Indian Stock Exchange securities, pride of place must go to the deferred shares as the darling and favourite of the speculator. At the current price the market valuation of the share is more than 70 times the nominal value. In a day's transactions gyrations in the price over a range of rupees Rs. 40 are not uncommon. The present price is just over Rs. 2,130. One may argue that a share so widely and regularly fluctuating in value could not interest the *bona-fide* investor. For, it has been the experience that, kicked down to the bottom, the soaring quality of these shares, is undoubted. In view of the industrial importance of steel and the increasing war requirements it is rather surprising that so little attention is at present being paid to steel shares. From all of which it can be gathered that the declaration of higher dividends of the *Tata Iron & Steel Company, Limited* is of immense significance. Interest should certainly grow rapidly after the appearance of the report and accounts analysed below:—

THE accounts of the *Tata Iron and Steel Company, Limited* for the year ended March 31, 1941, were awaited with great interest ever since the dividends were known. The report and accounts, now to hand, reveal highly satisfactory results which are exceptional both from the point of view of earnings and output. The substantial increase in earnings by more than Rs. 1,84 lakhs, before providing for taxation, and after the payment of increased freight rates on raw materials as well as finished goods, reflects great credit on the management. The shareholders, however, have not been greatly benefited through the huge increase in earnings. For, the E. P. T. has made it necessary for a considerably larger amount to be allocated to Reserve for Taxation.

The net profit, before providing for taxation and depreciation, amounts to Rs. 7,07,84,521 as compared with only Rs. 5,23,19,096 for 1939-40, Rs. 4,39,81,093 for 1938-39, Rs. 3,69,89,340 for 1937-38 and Rs. 2,56,81,171 for 1936-37. It will thus be seen that earnings are nearly thrice the amount for 1936-37. Out of the earnings for the year, a sum of Rs. 2,45,00,000 as against Rs. 1,35,00,000 has been provided for Taxation. The sum set aside to Depreciation on Block and Collieries is Rs. 1,50,00,000, while the amount set aside in the previous year was only one-third of this. The amount of Rs. 150 lakhs provided during the year is no more than what is required for the very large plant erected with a gross block expenditure of over Rs. 29 crores, particularly when the reduced provision of the last year is taken into account. There has, however, been a reduction in the allocation to Reserve Fund from Rs. 80,00,000 to Rs. 75,00,000. After all these appropriations, it has been possible to increase the dividend on ordinary shares from Rs. 25 to Rs. 29 per share and on deferred shares from Rs. 143-14-7 to Rs. 172-10-0 per share. The amount carried forward is lower at Rs. 11,99,171 against Rs. 16,33,917 brought in.

Coming to the balance-sheet, there is a slight decrease in the net block from Rs. 15,16,77,789 to Rs. 15,15,97,707 as well as in Stock-in-Trade from Rs. 2.28 crores to Rs. 1.84 crores. Outstandings are higher at Rs. 1.93 crores as against Rs. 1.39 crores, while investments show an increase of about Rs. 39 lakhs to Rs. 1,22,71,491. Cash and other balances stand at Rs. 2.17 crores, showing an increase of Rs. 85 lakhs over the previous year. Assets earmarked against Employee's Accounts show a substantial increase at Rs. 1,25 lakhs against Rs. 1,07 lakhs in the previous year.

On the Liabilities side, the General Reserve stands at Rs. 2.11 crores against Rs. 1.36 crores. Depreciation Fund Account shows an increase at Rs. 14.06 crores against Rs. 12.78 crores, while Other funds are Rs. 2.91 crores, against Rs. 2.83 crores. Sundry liabilities amount to Rs. 9.87 crores against Rs. 8.63 crores.

During the year under report, the Company co-operated with Government to its utmost capacity in the furtherance of the war effort. A rapidly increasing proportion of the Company's output was taken up by Government for war and urgent civil requirements. Prices of such supplies were regulated in accordance with the terms of the arrangement entered into with the Government at the beginning of the war. As a result of the purchase of a very large proportion of the Company's production, there was an acute shortage of steel for ordinary commercial purposes. The Company's prices for such materials were raised to a small extent during the year to meet the constantly increasing costs of raw materials and stores, but the bazar prices rose to very high levels owing to the extremely limited stocks of steel available with dealers. Measures are under contemplation by Government with a view to remedy this state of affairs.

The efficiency of the plant was maintained at a high pitch despite the difficulties caused by the war, particularly in the receipt of machinery and stores from abroad. The assistance of Government has been readily given to enable the Company to import such plant and materials from abroad as were urgently needed.

Giving an idea of the operations during the financial year, the directors state that production and sales have exceeded those of the previous year in all the departments. The erection of the new steel-making plant, forming part of the current programme of expansion of the Works, has been completed. This plant will produce steel by an entirely new process which will not only enable steel to be made more rapidly than by other processes, but will also enable acid steel to be produced for the first time out of purely Indian materials. In spite of the delays occasioned by the war, the plant is expected to be in operation before the expiry of the current year.

The report also refers to the installation of two electric steel furnaces which were purchased from the *Indian Steel Rolling Mills* from Negapatam. These furnaces were proved invaluable in turning out special quality steel for supply to Government. Besides this, work on the plant for manufacturing wheels, tyres and axles is in progress. When this plant, which is nearing completion, comes into operation, it will be possible to manufacture in India component parts required for railway locomotives. According to the report, labour conditions were satisfactory. The working arrangements with the *Steel Corporation of Bengal* and the *Indian Steel Rolling Mills* also worked satisfac-

Company Meeting

CALCUTTA ELECTRIC SUPPLY CORPORATION, LIMITED

The Forty-fourth annual general meeting of the Calcutta Electric Supply Corporation, Ltd. was held on May 28th, 1941, at the company's London office, Victoria House, Vernon Place, Bloomsbury Square, London, W.C.

The Rt. Hon. Lord Meston of Agra and Dunottar, K.C.S.I., the chairman of the company, presided and briefly referred to the review of the company's operations, which had already been circulated to stockholders. He added that the board had invested £100,000 in Defence Bonds.

The circulated review was as follows:—

The Directors regret that this Annual Meeting has had to take place rather later than usual. But owing to the difficulties in the transit of mails, the accounts from India did not reach us till about six weeks later than usual, and the Annual Meeting could not be held either.

Again we have to record a satisfactory year of continued progress. Had the year continued throughout as it began, our output would have reached a very high figure indeed. But there were fluctuations in the power load, now the main feature of our supply, mainly in the latter part of the year, which slowed down the earlier advance, and upset the promise of what looked like being a record year in the Company's operations. Even so, the number of units sold in 1940 was no less than 54,242,315 in excess of that sold in the previous year.

Domestic consumption showed an increase, but the proportionate increase was not up to that of previous years. Our power load however advanced very considerably, and would have been even greater but for changes in the working hours of the jute mills. The mills were working 60 hours a week up to April, 1940, when they went back to 54. The hours were further reduced to 45 per week in August, and in the last four months of the year the mills were also shut down completely for one week in each month. This short time has been continued up to the present.

We are indebted to the jute industry for their consideration in closing their day's work at 5 p.m. during the winter months, a measure which assisted us considerably in meeting the heavy peak load in the evening. But for this we should have had to face a peak load higher by something like 30,000 k.w. As it was, the peak load reached 137,000 k.w. last cold weather. Apart from the jute mills there was a very marked increase in consumption by other industries.

The new super-station at Mulajore was in full operation during the year, and, while operating to give supply to the demands in its neighbourhood, gave through the medium of the interconnectors, relief to the older station at Cossipore of an appreciable portion of its load. The advantage to the system in possessing a station with modern up-to-date plant, such as we have at Mulajore, is borne out by the fact that on the whole system the cost of coal per unit generated fell by approximately 8 per cent. This, together with the lower price we had to pay for our coal, brought down our Fuel Bill by something like £15,000, and that notwithstanding the large increase in the number of units generated.

The third generating set, to which reference was made at our meeting last year, we had hoped to see in commission in the latter half of this year, but this is now doubtful. Even with this set we shall be hard pressed to meet the demands that we foresee will be made upon us during the coming winter. It will be realised that under present conditions it is difficult, if not impossible, to obtain new plant or even the finance to purchase it, and it is therefore not unlikely that we may have to recommission for a period the old Bhatpara Station, which was shut down as a source of generation when the machinery at Mulajore got into full swing.

Turning to the Revenue Account, it will be seen that our receipts have gone up just over £100,000, the increase being mainly from the power load. On the expenditure side there is an increase of £64,000, which is mainly made up by an increase in the provision for depreciation of just under £60,000. The new station at Mulajore is primarily responsible for the increase, not only by all the expense of staff and incidents of the station, but also because, having been in full operation since the beginning of last year, its depreciation must be taken into account.

With increasing taxation both in the United Kingdom and India, our provision for Income Tax has had to be materially increased, and with a further increase indicated in India, a still further amount will have to be set aside in the accounts for the current year. We continue to pay the Preference Dividend, for reasons which were explained fully last year, at the full 5 per cent. Our auditors, are not, however, content with the legal opinion on which we follow this course, and, following on their protestations, we are taking steps to secure a judicial decision as to the correct interpretation of the Article which governs this dividend. Meanwhile, the payment of the full 5 per cent., free of tax, means, with the higher income tax in this country, an addition of £8,000 to the expenditure of 1940. There remains, after the reservation of Income Tax, the payment of the Preference Dividend and of the Interim Dividend which you received last November, a sum of £214,000 as the divisible profits for 1940. Of this the Directors have deemed it prudent to set aside a sum of £75,000 as a War Contingencies Reserve. It must be recognised that a good deal of the new demands upon our system are of a temporary character, arising out of war conditions, and not likely to subsist to the same extent after the war; and further, when our plant is being run, as it is as present, more hardly and more continuously, and with lesser facilities for overhaul, very considerable repairs and measures of maintenance will be called for when normal conditions are restored. It is in recognition of these issues that we propose to set up this Reserve, and make this provision.

As to the dividend on the Ordinary Stock, we propose, having regard to the increased rate of income tax, 3 per cent. free of tax. Our Retiring Gratuity Fund calls for a smaller contribution than last year, and we propose a contribution of £4,000. We propose no appropriation to the General Reserve.

Such is a brief account of the year. It has not been an easy one either for the Directors or for the staff in India. Administration, both in London and Calcutta, has been rather complicated owing to war conditions. Delay and irregularity in the mails, not to speak of lost mails and lost supplies (we lost plant to the value of nearly £10,000, all of which had to be replaced), made communications between us and the Agent in India more difficult, but Mr. Gladding, our new Agent in Calcutta, and his staff have responded nobly to the difficulties,

(Continued from page 217)

ily. Government has also extended the period of protection, which expired on March 31, 1941, for a further period of one year, owing to the practical difficulties of revising duties during the war. Owing to the stoppage of imports caused by the war this extension of the protection has no practical signiflcance so far as this Company is concerned.

The directors have not given any details n their report regarding the *communique* they issued sometime back about the scheme under which the deferred shares of the Company will be extinguished by the issue of additional ordinary shares in their place. It appears that the scheme is not likely to come into force pending the sanction of the Bombay High Court.

The prospects for the current year need hardly be described. The Company has now reached a stage when it can be almost certain of a fairly high level of earnings being maintained. On a conservative estimate, it seems justiflable to expect that there will be an increase in proflt for 1941-42 over those for 1940-41. I may now try to estimate what the grose proflt of the Company is likely to be. Even assuming that the dividends will be maintained during the current year, the total amount required to pay the dividends on all classes of shares will be Rs. 2,42 lakhs. For the year under report the directors have provided Rs. 2,45,00,000 for Taxation. During the current year, the provision must be higher as there will be an increase in earnings following the larger tonnage of steel required for war purposes. It will, therefore, set apart a sum of Rs. 3,00,00,000 for this purpose. It is well-known that plants, factories and collieries of the Company must have to work at full pressure to meet the enormous requirements. Any provision for depreciation for the year must, therefore, be higher. I feel that a sum of about Rs. 2,00,00,000 may be considered adequate. If a scheme for the conversion of deferred shares into ordinary shares, agreeable to both classes of shareholders is approved, it will be necessary to issue new ordinary capital to the extent of Rs. 2 crores. With the latest allocation of Rs. 75,00,000, the General Reserve stands at a figure of more than the required amount. It will not be also possible to provide a larger sum than the one set apart for the past year owing to the larger transfers needed for Taxation and Depreciation. I, therefore, believe that a transfer of the same amount of Rs. 75,00,000 will be considered satisfactory. I give below my estimates as formed and fashioned by the calculations I have discussed above:—

Dividends	..	2,42,27,267
Taxation	..	3,00,00,000
Depreciation	..	2,00,00,000
General Reserve	..	75,00,000
		8,17,27,267
Bonus to Employees	..	50,00,000
		8,67,27,267

(Continued on page 240)

and we are indebted to them for fine service during trying circumstances. Labour troubles we have had, but they were smoothly got over. The work, too, has been carried on with a staff reduced in numbers. Eight of the Calcutta European staff have joined the forces, and three of the London Office, including Mr. Thompson, our Secretary, are engaged on National Service.

The report and accounts were unanimously adopted.

A vote of thanks to the Chairman, Directors and staff at home and abroad terminated the meeting.

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, August 1.

Prices in the local Stock Exchange remained more or less unchanged throughout a major portion of the week, tendency towards the close being upward. In the absence of notable demand from genuine operators business is inclined to contract. The market sticks to its cautious policy and such small movements in prices as have occured are mainly due to more or less accidental causes. Both sellers and buyers are reluctant to enter into new commitments owing to the political uncertainties. The turnover everyday, however, continues to be satisfactory.

Government securities continued to be a steady market and prices have been moving within narrow limits. 3½ per cent Paper closed around Rs. 96. Among other loans, 1948/52 Loan changed hands at Rs. 97-12; 1936/65 at Rs. 95-5; 1949/52 at Rs. 99-14; 1945/55 at Rs. 111-10; 1960/70 at Rs. 110-3 and 3 per cent 1946 *Defence Bonds* at Rs. 101-14. Business in Provincial Loans was on a small scale, 3 per cent *U.P.* 1961 66 being done at Rs. 95 and 3 per cent *U. P.* 1949 at Rs. 99-8. Conditions in the money market showed no change and the average rate of accepted tenders is lower this week at 11 annas 9 pies per cent per annum as compared with 13 annas 8 pies per cent per annum.

Debenture issues met with restricted business during the week, 3½ per cent 1965 *Calcutta Improvement Trust* being one at Rs. 99; 4½ per cent 1936/86 *Clive Buildings* at Rs. 102; 3½ per cent 1961/66 *Rangoon Municipal* at Rs. 100-5 and 4 per cent 1951 *Calcutta Port Trust* at Rs. 97-12

Preference Shares met with a larger volume of business owing to the predominence of sellers. Among Jute shares, *Hastings* were done at Rs. 141 and *Hooghly* at Rs. 19-11. *Hukumchand* were higher at Rs. 146; *Chitavalsah* at Rs. 146; *Waverley* at Rs. 63 and *Craig* at Rs. 63. There has been a good enquiry in Cotton shares. *Bowreah* 'B' preferences were at Rs. 93 and *New Victoria* at Rs. 3-13. In the Engineering section, *Burn & Co.*, 6 per cent preferences were Rs. 148-8, while *Indian Stadard Wagon* were steady at Rs. 166 and *Steel Corporation* at Rs. 120. *Kumardhubi* were slightly lower at Rs. 141. Among others, *Carew* were done at Rs. 120; *Rohtas Industries* at Rs. 160 and *Midnapore Zemindary* at Rs. 146 c.d. There was some enquiry for *Darjeeling Himalayan Railway* at Rs. 171.

Among Railway shares, *Shahdara (Delhi) Saharanpur* came to business at Rs. 171-8.

Bank shares continued to be firm, *Imperial Bank* fully paids being done at Rs. 1,556 c.d.; contributories at Rs. 383 x.d. and *Reserve Bank* at Rs. 106

The demand for Cotton shares continues with buyers in predominence. *Dunbar* and *New Victoria* have been almost the outstanding features with business done upto Rs. 253 and Rs. 4-2, the closing prices being easier at Rs. 250 and Rs. 4 respectively. *Kesoram* have been in steady enquiry, being done higher at Rs. 8-12. *Muir* met with good demand and the price, after opening at Rs. 310 on Monday, has improved and the shares are now quoting around Rs. 323-8. *Bengal Nagpur* were again done higher at Rs. 17; *Cawnpore Textiles* at Rs. 9 and *Elgin* at Rs. 25-6.

Coal shares were well maintained although business was rather on a small scale. *Bengal* have improved again to Rs. 346 as against the last week's level of Rs. 356. *Bhulanbararee* were in good enquiry during the week, being done higher at Rs. 13-12. *Bokaro & Ramgur* were done at Rs. 15-4; *Burrakur* at Rs. 14-1; *Central Kurkend* at Rs. 15-2 and *Raneegunge* at Rs. 37-4. *West Jamuria* and *Dhemo Main*, after being done higher at Rs. 29-4 and Rs. 12-14, closed a shade easier at Rs. 29 and Rs. 12-8 respectively. *Hurriladih* remained, however, steady at Rs. 13-2 and *Equitable* at Rs. 35-14. Among the lower-priced shares, *Ghusick & Muslia* were at Rs. 4-6; *Talcher* at Rs. 1-7; *Samla* at Rs. 2-2 and *Bengal Bhatdee* at Rs. 2-8.

Prices of Jute shares have been extremely firm with an upward tendency. *Howrah* were marked upto Rs. 55-12 (s.l.) but closed at Rs. 55-4 after touching a low of Rs. 53-6 during the course of the week. *Anglo-India* were steady at Rs. 355; *Kamarhatty* at Rs. 520; *Kankinarrah* at Rs. 427-8; *India* at Rs. 363; *Kelvin* at Rs. 504 and *Champdany* at Rs. 174. *Megna* continued to improve to Rs. 46-12 from Rs. 45-13. *Nuddea* were quoting at Rs. 66-8; *Reliance* at Rs. 57-10; *Hukumchand* at Rs. 12-10; *Adamjee* at Rs. 27-2; *Birla* at Rs. 29-2; *National* at Rs. 24 and *Naskarpara* at Rs. 18-4. Among the lower-priced shares, *Craig* were done at Rs. 2; *Waverley* at Rs. 3-8 and *Presidency* at Rs. 5-10.

Tea shares continued to meet with good buyers with few sellers in evidence. *Betjan* improved to Rs. 29-4; *Dauracherra* were taken up at Rs. 12-12; *Hattikhira* at Rs. 20-8; *Hasimara* at Rs. 45; *Sapoi* at Rs. 11-12; *Ethelbari* at Rs. 11-12 and *East India* at Rs. 10-2. Among the higher-priced shares, *Banarhat* changed hands at Rs. 329. *Namburnadi* were crossed at Rs. 6-2, while there were enquiries in *Arcuttipore* at Rs. 13; *Dhunseri* at Rs. 3 and *Eastern Cachar* at Rs. 9-4.

Sugar shares were well maintained. *Carew* were a feature, the price having improved to Rs. 12-7. *Cawnpore* fetched Rs. 21; *Balrampore* Rs. 9-12 and *Purtabpore* Rs. 9-4. A larger turnover took place in *New Savan*. The price, after opening at Rs. 9-6 closed at the highest level of Rs. 10-6. *Ryam* were done at Rs. 20-8; *Raza* at Rs. 18-12 and *Samastipore Central* at Rs. 9-2. *Champarun*, after opening at Rs. 15-4, gradually improved to Rs. 16-5 at which level there was some profit-taking as a result the price declined to Rs. 14-12. Towards the close, however, the price gradually improved and are now quoting higher at Rs. 16-2. *Buland* were marked at 12 and *Ramnugger Cane* at Rs. 9-12.

In the Public Utilities section, *Cuttack Elec* came to business at Rs. 11-6; *Jubbulpore* at Rs. 16-4; *Agra* at Rs. 140 and *Mirzapore* at Rs. 5-1.

In the Public Utilities section, *Cuttack Steel Corporation* showed no material changes during the week, the closing prices being slightly better at Rs. 32-3 and Rs. 20 as compared with Rs. 31-15 and Rs. 19-12 respectively in the previous week. *Burn & Co.*, were in strong demand and the price has spurted to Rs. 413. *Britannia Building* were done at Rs. 9-10; *Britannia Engineering* at Rs. 10-14; *Saran Engineering* at Rs. 5-15 and *Indian Steel Wire Products* ordinaries at Rs. 56-8. *Hukumchand* ordinaries have been in good demand at Rs. 14-7. *National Iron* were quoting around Rs. 9-8; *Marshalls* at Rs. 2-3; *Braithwaite* at Rs. 9-6 and *Steel Products* at Rs. 5-8.

The main features in the Miscellaneous section have been the rise in *Bararee Coke* to Rs. 26-8 and *Indian Cable* to Rs. 25-15. *Dunlop Rubber* were slightly higher at Rs. 41-12; *Indian Wood Products* at Rs. 27-12 and *B. I. C.* at Rs. 4-13. *Calcutta Trams* changed hands at Rs. 15-13. *Rohtas Industries* were steady at Rs. 22-4. Mining shares continued to be steady. *Burma Corporation* being done at Rs. 4-4; *Indian Copper* at Rs. 2-1 and *Karanpura Development* at Rs. 9-1. Among Cement and Chemical shares, *Dalmia* ordinaries were done at Rs. 12-12; *Alkali & Chemical* shares at Rs. 19-2; *Bengal Aerating Gas* at Rs. 68; *Frank Ross* at Rs. 5-12 and *Bengal Chemical* at Rs. 405. Paper shares have been an active counter. *Orient* met with continued enquiry and the price has spurted to Rs. 16 from Rs. 13-9. Similiarly, *Titaghur Paper* have shown a rise from Rs. 18-15 to Rs. 19-13. *India Paper Pulp*, however, closed a shade easier at Rs. 148-8 after being done higher at Rs. 151. Among others, *I. G. N.* were lower at Rs. 84-8. *Assam Saws* were better at Rs. 4-2, while *Midnapore Zemindary* were lower at Rs. 70-8. *British Burma Petroleum* were at Rs 3-7; *Tidewater Oil* at Rs. 16-9 and *Humayan Properties* ordinaries at Rs. 6-4. *Britannia Biscuits* met with good demand at Rs. 10-12 following the announcement of a dividend of 5 per cent per annum for the year ended 31st March, 1941 as against nil in the previous half-year.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, July 31.

Money: The money market continued to be easy, the rate for interbank call money being quoted at ¼ per cent.

Exchange Market: Banks are selling T.T. at 1s. 5 15/16d. and buying three months' bills at 1s. 6 7/32d.

Securities: The securities market continues to remain very dull and uninteresting. A falling off in general activity was in evidence and the prices were more or less unchanged. 3½ per cent Paper were done at Rs. 96, while 1948/52 Loan changed hands at Rs. 97-12; 1951/54 at Rs. 99-13; 1963/65 at Rs. 95-1; 1947/50 at Rs. 103; 1960/70 at Rs. 110-3; 1955/60 at Rs. 113-8; 1945/55 at Rs. 111-10 and 3 per cent *Defence Bonds* at Rs. 101-11.

Shares: Prices in the local share market, after opening steady, gradually advanced on continued support in the absence of selling pressure. The steady flow of demand was marked in almost all scrips as a result prices registerd sharp improvement. Steel shares met with good speculative support, and Textiles, likewise, advanced in the absence of sellers and in sympathy with higher prices in the piecegoods market.

Textiles: Cotton mill shares were steady throughout the week owing to special interest shown by the operators and the trend was upward owing to the feeling that the possibility of Japan entering the war would cut out all imports of piecegoods from Japan. *Bombay Dyeing*, after opening at Rs. 1,176-4 touched Rs. 1,172-8 in mid-week owing to profit-taking, but again gained ground and advanced to close at Rs. 1,200. *Century* moved up sharply to Rs. 490 from Rs. 450 as the Company is likely to issue one bonus share for every two shares held. *Central India* were marked higher at Rs. 367; *Colaba* at Rs. 202; *Cokak* at Rs. 245; *Kohinoor* at Rs. 480 and *Swadeshi* at Rs. 350. In the cash list, *Ahmedabad Advance* were higher at Rs. 335; *Sholapoor* at Rs. 3,610 and *Vishnu* at Rs. 1,337-8.

30th August,	1939	94.54	81.44	106.7	103.11	102.95	97.73	100.57

Hydro-electrics: The shares in this group continued to meet with investment support. *Tata Power* have shown a rise of about Rs. 5 to close at Rs. 1,655, while *Andhra Valley* have shown a drop of 25 points, closing at Rs. 1,675. *Tata Hydro* were, however, unchanged at Rs. 182-4.

Steels: Steel shares continued to meet with good speculative support during the week following the publication of an excellent report for the year ended 31st March, 1941. *Tata* ordinaries opened the week at Rs. 389 and deferreds at Rs. 2,077-8. The deferreds were done up to Rs. 2,082-8, but declined to Rs. 2,073-12 in mid-week on disturbing news from the Russian Front as well as the Far East. Towards the close of the week, however, the shares met with strong support following the publication of the report and the price suddenly spurted to Rs. 2,130 at which level they closed. The ordinaries, however, improved by only 10 points and closed at Rs. 399. The first and second preference shares were done at Rs. 221-4 and Rs. 156-8 respectively.

Banks & Insurance: Among Bank shares, *Central Bank* were quoted at Rs. 45-12; *Imperial Bank* fully paids at Rs. 1,556-4; contributories at Rs. 381-4; *Bank of India* at Rs. 142-12 and *Reserve Bank* at Rs. 104.

In the Insurance section, *New India* changed hands at Rs. 45.

Miscellaneous: *Bombay-Burma Trading* were the only counter that suffered sharply due to the tension in the Far East. The price has fallen further to Rs. 472-8 from Rs. 492. *Belapur Sugar* were done at Rs. 234; *Bombay Steam* at Rs. 327-8 and *Scindia Steam* at Rs. 21-7. *Indian Iron* on several days came to business at Rs. 31-12; *Alcock Ashdown* at Rs. 566-4 and *Premier Construction* at Rs. 98-8. *Associated Cement* continued to be steady, closing slightly higher at Rs. 149-8.

LONDON STOCK EXCHANGE

It is by no means certain that the London Stock exchange has shown complete recovery from the distemper produced by uncertainty. And in spite of the corrective supplied by the Premier's speech the confusion produced by Far Eastern developments has naturally prejudiced swift improvement and the decline in Foreign Bonds had its own effect on giltedged. The most arresting feature is the decline in in old Consols to 81½ and equally marked is the fall in India irredeemable to 99 on Thursday. The improvement on Thursday in new War loan was offset by the fall in Conversion loan and the depression in giltedged, in evidence until Wednesday, affected dealings generally. The market was dull and irregular following the renewed slump in Far Eastern issues followed by a marked recovery since the improvement on Thursday was by every token considerable. The cheerfulness of Home Industrials is not a new feature, but on most days, the market was irregular. If specialities showed improvement, particularly Ford Motor up to 21×7½ the general sentiment was on most days scarcely optimistic and the limited support forthcoming was responsible for the declines reported. There has, however, been striking improvement on Thursday when the leaders like *Imps* and *Vickers* have made headway.

The rise on Wall Street has hardly been reflected so far in London and the interruption in improvement caused by uncertainty makes precise prediction difficult. The brightness of shipping issues suggests that the disappearance of Japanese competition will help British Companies, particularly P. & O. deferred shares have risen. The slow improvement in textiles, particularly, Coats (£ 1) shares proves that the 425 million credit has imparted some stability to leading industrials, particularly, the Thread Trust. A late rise in the mining market furnished evidence of greated support. The advance in *Tintos* points to speculative buying but the fall in Nundydroog shows that Indian gold shares lack a following. The firmness of the oil share market has invited comment. Though the leading issues are slightly lower on the week the recovery has been most marked in the section. The further advance in *Mex-Eagle* shows that interest keeps growing, and the smart rise in *Shell* to 48.9 has certainly been a feature of dealings. The prompt rise in Home Rails shows that this depressed area has cast off its gloom as even LNER Defd. has risen. The swift rally in Home Rails points to an improved undertone and further changes in all sections may be favourable than otherwise.

NEW YORK STOCK EXCHANGE

The quiet opening on Thursday may be said to belie the improvement reported on Wall Street which has displayed comparative steadiness with prices tending to rise. The rise in *U. S. Steel* Common to 60⅜ on Wednesday well be hailed as a satisfactory feature. The continued rise in the leaders *U. S. Steel* (now 59¼) *Anaconda Copper* (now 29¼) and *General Motors* (now 39¼) is indicative of improved tone despite the perplexities introduced by European developments. It has been stated that Wall Street opened quietly firm on most days and the reaction on opening on Thursday was slight. The rise on Monday gave a good start with *U. S. Steel* rising from 58½ to 59¾ and even the anti-inflationary message cannot have extended repercussions for the New York market is helped by the loan of 425 millions given by the R. F. C. Sir Kingsley Wood's speech on the Emergency (financial powers) Bill indicated that only good would follow from the suspension of liquidation of British investments in the U. S. A. The co-operation of Britain in the Pacific has reassured the stock market which has not reacted to the fall in cotton.

THE VELLAMALAI TEA CO., LTD.

NOTICE

NOTICE is hereby given that the Seventeenth Annual General Meeting of this Company will be held at "Glenview", Coonoor on Friday, 8th August 1941 at 10-30 A.M. for the following purposes, viz:—

COMPANY REPORTS

RESERVE BANK OF INDIA

Audited accounts for the year ended 30th June, 1941:—

After payment of expenses of administration and provision for sundry liabilities and contingencies,

	Rs.	As.	P.
The net profit amounts to	2,79,26,447	3	3
Of this amount, the sum of Rs. 17,50,000, will be utilised for payment to shareholders of a dividend at the rate of 3½ per cent, per annum being the cumulative rate fixed by the Central Government in accordance with section 47 of the Reserve Bank of India Act, 1934			
leaving a surplus of	2,61,76,447	3	3

for payment to the Central Government in accordance with the said section.

The increased profits are due to an increase in the Bank's assets. corresponding to an increase in its note issue liabilities as a result of expansion of currency, and to the fact that some of them were held in the form of securities yielding a higher rate of interest.

The total balances of the following loans as on the 30th June, 1941, were as under:—

	Rs.	As.	P.
3% Defence Bonds, 1946	45,14,31,000	0	0
3% Loan, 1949-52 (Second Defence Loan) ..	18,34,70,000	0	0
3 Year Interest Free Defence Bonds ..	2,41,63,000	0	0
Total ..	65,90,64,000	0	0

A comparision of this balance sheet with that on the 30th June, 1940 calls for the following observations. The total of the balance sheet of the *Issue Department* has risen from Rs. 258.83 crores to Rs. 291.34 crores owing to the rise in note circulation as a result of the increased currency requirements of the country under the influence of war conditions and the fillip provided by them to trade and industry. On the liabilities side, the total note circulation has shown an increase from Rs. 247.74 crores to Rs. 278.27 crores. On the assets side, it will be seen that the item of "Gold held in India" has risen from Rs. 41.54 crores to Rs. 44.41 crores, this being due to transfer of the gold held outside India to this country during the year. This transfer was effected shortly after the 30th June, 1940 by exchanging gold held in India by the Reserve Bank on behalf of the British Government with that held by the latter in London on behalf of the Reserve Bank. The total gold holding of the Bank have remained unchanged.

The value of sterling securities held in the Issue Department has fallen from Rs. 131.50 crores to Rs. 118.80 crores. This reduction is to be attributed to the Government scheme for the repatriation of the sterling debt under which the Reserve Bank in March, 1941 effected a reduction in the balance of sterling securities to the extent of Rs. 38 crores against a corresponding increase in the balance of rupee securities by taking over a considerable portion of the counterpart rupee securities created by the Government.

"Rupee Coin" which item includes also the one-rupee notes of the Government of India issued during the year has shown a slight rise from Rs. 33.32 crores to Rs. 36.81 crores.

A large rise has occurred in the rupee securities in tre Issue Department which have increased from Rs. 49.60 crores to Rs. 91.32 crores which is due principally to the operations connected with the repatriation of sterling debt. By an amendment to the Reserve Bank of India Act (Reserve Bank of India Amendment) Ordinance, 1941 which came into force on the 8th February, 1941, the previous limitation on the maximum holdings of rupee securities in the Issue Department has been removed.

The total of the balance sheet of the *Banking Department* has increased from Rs. 45.09 crores to Rs. 67.31 crores dring the year due mainly to the increased deposits of Governments and the scheduled banks with the Bank.

For reasons already mentioned, bankers' deposits with the Reserve Bank have shown a rise from Rs. 20.98 crores to Rs. 30.98 crores. Throughout the year under review these deposits have been consistently higher than in the previous year.

On the assets side "Balances held abroad" were higher at Rs. 47.33 crores as compared with Rs. 20.20 crores as on the 30th June, 1940. Under the influence of war conditions and the increasing purchases of raw materials for war by His Majesty's Government in India, sterling has tended to accumulate with the Bank. Since the beginning of the year the Reserve Bank added steadily to its holdings of "Balances held abroad" until they reached Rs. 78.35 crores on the 21st March, 1940 but fell thereafter in connection with the operations relating to the repatriation scheme.

Owing to the easy monetary conditions prevailing, "Bills Discounted" and "Other Loans and Advances," during the year have been on a smaller scale than in the previous year. "Loans and Advances to Governments," however, have been slightly larger, especially during the months of March and April 1941, owing to the increase in the ways and means advances of the Central Government for financing repatriation.

Governor: Sir James B. Taylor.

BANKING DEPARTMENT

Synopsis of the Balance Sheet as at 30th June, 1941:—

Audited accounts for the year ended 31st March, 1941:—

The disposable profits for the year are as under:—

	Rs.	As.	P.
Net profits, after providing for income-tax, super-tax and Excess Profits Tax and after setting aside a sum of Rs. 1,40, 00,000 on account of depreciation on block other than Collieries, and a sum of Rs. 10,00,000 on account of depreciation on Collieries block, amount to	3,53,78,625	0	0
Amount brought forward from last year's account	16,33,917	0	0
Add—Income-tax deducted from dividends on Preference Shares (1939-40)	8,83,382	0	0
The amount available is thus	3,78,95,924	0	0
Out of this, the Directors have transferred ..	75,00,000	0	0
to the Reserve Fund, which leaves a balance of ..	3,03,95,924	0	0
The Directors have determined to dispose of this amount as follows:—			
Payment of Rs. 9 per share on First Preference Shares	4,50,000	0	0
Payment of Rs. 7-8-0 per share on Second Preference Shares	52,03,642	0	0
Payment of Rs. 29 per share on Ordinary Shares ..	1,01,50,000	0	0

	Rs.	As.	P.
Payment of Rs. 172-10-0 per share on Deferred Shares	84,15,625	0	0
Bonus to Employees	49,77,486	0	0
Carry forward	11,99,171	0	0
Total ..	3,03,95,924	0	0

For the reasons mentioned in the Chairman's Speech, Rs. 50 lakhs only were carried to Depreciation last year. This year Rs. 150 lakhs have been provided. This sum is no more than what is required for the very large plant with a gross block expenditure of over Rs. 29 crores, particularly when the reduced provision of the last year is taken into account. Rs. 75 lakhs have been transferred to the Reserve Found.

During the year under review the Company co-operated with Government to its utmost capacity in the furtherance of the war effort. In spite of the very heavy demands on its staff, 74 employees have been permitted to take up special work in connection with the war and have already joined duty. These include seven employees from Jamshedpur who have been selected under the Bevin Scheme and have left for special training in England.

At the request of the Government, the Company has undertaken to train mechanics for the Indian Air Force Reserve and war technicians for the Army Ordnance Corps. On the 31st March 1941, there were 100 Air Force mechanics and 45 war technicians on the rolls of the Institute at Jamshedpur.

The manufacture of bullet proof armour plate steel has been successfully developed and such steel is being made for the requirements of armoured vehicles in India. Special steel have also been developed for armour piercing bullets and shells, for machine guns as well as for ride and machine gun magazines and for drawing into telegraph wire.

Research has been successfully pursued in connection with the welding of chrome molybdenum steel required for aircraft.

The advice and assistance of the Company's experts has been fully placed at the disposal of Government in connection with their own problems in the manufacture of special steels. As a result of its activities, particularly since the war, the Company is now in a position to manufacture a large variety of special steels which had so far been imported.

A rapidly increasing proportion of the Company's output during the year was taken up by Government for war and urgent civil reqirements. Prices for such supplies were regulated in accordance with the terms of the arrangement entered into with the Government at the beginning of the war, to which reference was made in the last year's report. As a result of the purchase by Government of a very large proportion of the Company's production there was an actue shortage of steel for ordinary commercial purposes. The Company's prices for such materials were raised to a small extent during the year to meet the constantly increasing costs of raw materials and stores, but the bazar prices rose to very high levels owing to the extremely limited stocks of steel available with dealers. Measures are under contemplation by Government with a view to remedy this state of affairs.

The efficiency of the plant was maintained at high pitch in spite of difficulties caused by the war, particularly in the receipt of machinery and stores from abrod. The assistance of Government has been readily given to enable the Company to import such plant and materials from abroad as were urgently needed.

An elaborate aid raid precautions scheme has been systematically worked out during the year with the assistance and advice of Government experts.

The Directors regret, that, under instructions from Government, they are unable to give figures of the actual production and sales of different products as usual. It may be stated, however, that they exceed those of the previous year in all the departments. For the same reason statistical statements usually appended to the Reporthave been omitted.

The third battery of Simon-Carves Coke Ovens, which was completed during the year, was heated up in April, 1940, and the first oven was pushed in June, 1940. The Koppers Coke Ovens were shut down on the 1st September 1940, after having been in operation for 24 years.

During the year work was started on the erection of the new steel-making plant forming part of the current programme of expansion of the Works. This plant will produce steel by an entirely new process developed at Jamshedpur which will not only enable steel to be made more rapidly than by other processes but will also enable acid steel to be produced for the first time out of purely Indian materials. In spite of the delays occasioned by the war, the plant is expected to be in operation before the expiry of the current year.

The two waterless gas holders, referred to in the last year's report, have been erected and the larger of them, namely, the blast furnace gas holder was put into use and has been working satisfactorily, since September, 1940.

Two electric steel furnaces were puchased from the Negapatam *Steel Rolling Mills* and installed at the Steel Melting Shop No. 1 hitherto known as the Open Hearth Plant. These furnaces have proved invaluable in turning out special quality steel for supply to Government.

A separate fondry for producing ingot moulds and tools has been installed and brought into operation from January, 1941.

An electrode making plant for the manufacture of welding electrodes was put into operation from December, 1940.

A well-equipped workshop for the training of "C" class apprentices has been erected and brought into operation from July, 1940. Apprentices undergoing training for war purpose under the Government scheme are also being trained in this workshop.

There was a record production of tools at the Agrico factory.

Besides the new steel-making plant mentioned above, work on the plant for manufacturing wheels, tyres and axles is in progress. When this plant, which is nearing completion, comes into operation, it will be possible to manufacture in India practically all the component parts required for railway locomotives.

Although work on the billet mill mentioned in the last year's report is in progress priority has been given to the other more urgent works mentioned above.

COLLIERIES:—The work of underground sand-stowing has been continued at Sijua, Malkera and Jamadoba collieries and the special ropeway at Digwadih colliery for conveying sand is nearing completion. Arrangement has been made for acquiring the rights of operation over a suitable sand bank in the Damodar River for supplies of sand for stowing purpose.

MANAGING AGENTS: Messrs. Tata sons, Limited.

Authorised and Issued Capital—Rs. 10,52,12,500 in 3,50,000 Ordy. of Rs. 75 each; 48,750 Defd. of Rs. 30 each; 50,000 6% Cum. Pref. of Rs. 150 each and 7,00,000 7½% Cum. Pref. of Rs. 100 each. Subscribed and called up—Rs. 10,47,15,224 in 3,50,000 Ordy; 48,750 Defd; 50,000 First Pref. and 6,93,819 Second Pref; all fully paid up plus Rs. 97,569 the amount on forfeited shares and Rs. 23,255 being part payments received on forfeited shares from shareholders against calls and instalments against decrees kept in suspense.

Synopsis of the balance sheet as at 31st March, 1941:—

Amount brought forward from previous half-year ..	23,521	8	11
Total ..	25,581	3	2

There is an available balance of Rs. 94,931-3-10 which it is proposed to deal with as follows:—

	Rs.	As.	P.
Place to Taxation Reserve	17,000	0	0
Pay a dividend at the rate of 30% per annum ..	45,000	0	0
Carry forward to next half-year	32,931	3	10
Total ..	94,931	3	10

Development—Development of the new area of 13 and 14 seams to the South of the 200 ft. upthrow fault has continued to make further progress. Output from No. 7 Pit has steadily increased during the last half-year and is capable of further expansion as the development of 11 seam proceeds.

Raisings—The raisings during the period amounted to 94,317 tons and despatches to 86,179 tons. No labour trouble was experienced and the supply of labour was satisfactory.

Prospects—Prospects for the half-year ending 30th September, 1941 may be considered to be good. Full despatches are being maintained to the *Indian Iron and Steel Co., Ltd.*, and new contracts with the State Railways have been secured which will keep all pits fully occupied.

Managing Agents.—Messrs. Octavius Steel & Co. Ltd.

Authorised, Issued and Subscribed Capital—Rs. 3,00,000 in 15,000 shares of Rs. 10 each, fully paid up.

(Continued from page 218)

The gross profit, according to these calculations, may be reasonably placed in the neighbourhood of Rs. 8,70,00,000. I believe, that the Company may easily earn this amount during the current year too and prospets may, therefore, be considered good. Unless something unforeseen happens, Indian investors must be drawn more and more powerfully to *Tata* ordinaries and deferreds. I adhere to the view that the stage is definitely set for a considerable rise in both these stocks.

* * *

At the annual meeting of the *Calcutta Electric Supply Corporation* in London Lord Meston, the Chairman referred to the further increase in domestic consumption while the consumption of energy for industrial purposes fluctuated erratically after the 8 per cent increase recorded in 1939. The net increase in consmption during 1940 was as much 59.2 million units showing that the advance recorded in 1929 has been followed by another in 1940. The continued expansion of consumption is also reflected in the revenue figures. The further increase in expenditure is a sign of the times, but this is lower than the addition of £100,000 to the year's receipts. The Chairman dwelt with satisfaction on the smooth working of the new Mulajore station in spite of the absence of the third generating set, and the high efficiency of this part of the essential city's services in war time will look keen satisfaction. The Corporation has the advantage of retaining the older Bhatpara station as a standby.

The full accounts are not available, but the slight reduction in the divisible profits for 1940 is obviously the result of enhanced taxation at home and in India. The absence of any settlement with the Preference shareholders was referred to again by the Chairman who mentioned that the decision of the Courts on their right to 5 per cent free of tax at all times would be awaited. The addition to Depreciation Reserve made last year from the increased profits reported for 1939 has been supplemented by the creation of a War Contingencies Reserve with an initial appropriation of £75,000. It is certainly to be expected that the extra wear and tear in war time has to be provided against. Some may draw attention to the increased provision for Depreciation which is mainly responsible for the increase in expenditure made in the year's accounts and argue that the need for a special Reserve is questionable though the absence of any addition to General Reserve this year justifies it. That, however, is a point on which the Board's views must be final and the main points which emerge are that the Mulajore station has helped to push down working expenses despite the larger output of power, mainly through fuel economy. The very substantial additions to taxation bar an increase in dividend and the three per cent final recommended still makes C.E.S.C. shares a very sound holding for any investor. The Corporation's record is one of unusual stability in earnings, and at previous meetings the dividend policy has been carefully explained and the statements have been as reassuring to the citizens of Calcutta as to the shareholders. It is not necessary to explain that the Corporation which has over £2 millions in Reserves is very strongly placed and the reduction in yield does not alter the investment status.

'Watch-Dog'

MARKET POINTERS

Rise in Piecegoods Prices :

The rise in the price of piecegoods, markin, dhoties, lungis, saris and shirtings, since the outbreak of the war has been viewed by the Government of Bengal with grave concern. By about the middle of July the price of most of these goods rose by 70 to 80 per cent on the pre-war level of prices. The principal reasons for increasing in price have been increase in the price of cotton, mill stores and dyes and heavy demand of cotton goods for war purposes. Although the increase in price by then was serious, Government refrained from taking any action as they were not satisfied that this was due to any appreciable extent of profiteering, states a 'communique' issued on Thursday evening.

The 'communique' adds:

"From about the middle of July the position has very seriously worsened due to the activities of the Fatka market. The excuse for this has been the increasing tension in the Far East. Government are informed that the whole-salers are now hoarding stocks both of Indian and Japanese made goods, and that fictitious sales are being arranged to raise the price higher and higher. The price of Amchap Markin for instance which was selling at Rs. 13/- only on July 15 has risen to Rs. 16/12 now. The price of Dhoti No. 800 has risen from Rs. 3/- to 3/8 during the same time.

Government are not prepared to tolerate this manipulation of prices by the Fatka market and are determined to use all the powers at their disposal to put down profiteering with a firm hand. Importers and wholesalers are hereby advised not to hoard their stocks, but to release them so as to maintain an even flow of supplies to retailers. Government will watch the situation for a few days. If this advice goes unheeded they will be compelled to step in and fix a price for common varieties of cloth used in Bengal and prevent any hoarding of stocks."

MUTTRA ELECTRIC SUPPLY COMPANY, LTD.

NOTICE

is hereby given that the Twenty-ninth Ordinary General Meeting of the abovenamed Company will be held at the Registered Office, No. 12, Mission Row, Calcutta, on Tuesday the 19th August, 1941 at 11-0 a.m., for the purpose of receiving and considering the Directors' Report, the Statement of Accounts and Balance Sheet for the half-year ended 31st March, 1941, and to transact any other Ordinary business of the Company.

WORLD OF INDIAN FINANCE

Friday evening.

WITH Treasury Bills maturities exceeding weekly sales of Treasury Bills, short credits continue to be in super-abundant supply, with no takers for call money and with bankers reluctant to accept term deposits except in the case of renewals. Interbank call money is quoting ¼ percent in Bombay, ½ percent in Calcutta and ¼ percent in Madras, all the rates being purely nominal. The pressure of surplus funds has caused a steep decline in the Central Treaury Bill rate. On August 5, tenders for Rs. 1 crore of three months Treasury Bills were opened; total applications came to Rs. 3,33½ lakhs. The average rate of accepted tenders was annans 9 and pies 4 percent per annum as compared with annas 11 and pies 9 on July 29. It was, however, a relief to banking circles that the Bengal Government came on the market on August 1 for Rs. 75 lakhs of three months Treasury Bills. But for the Bengal Government's emergence as a borrower on the short loan market, the average discount rate in respect of Central Treasury Bills sold by tender on August 5 might have shown an even more pronounced fall. The Bengal Treasury Bills were keenly bid for, the total applications being Rs. 1.22 crores. The average rate of accepted tenders was annas 13 percent per annum which compares with annas 11 and pies 9 being the average discount in respect of Central Treasury Bills on July 29. The gap between the Central Treasury Bill rate and the Provincial Treasury Bill rate has thus been narrowed down to annas 1 and pies 3 percent per annum. This is a satisfactory development; and it may not be long before the discrepancy between the various bill rates becomes negligible.

The statements of the Reserve Bank for the week ended August 1 bear the impress of large sterling receipts from the British Government. These sterling receipts have now become a regular feature either at the end of the month or early in the following month. The payments received by the Indian Government in London on the present occasion seem to be on the large side. Foreign balances held by the Reserve Bank in the banking department have risen from Rs. 43.18 crores to Rs. 44.55 crores. The increase is thus nearly Rs. 1½ crores. The increase would have been of the order of Rs. 11½ crores except for the fact that sterling received from the British Government has been directly lodged in the issue department. In all previous instances of sterling receipts as a result of inter-governmental transactions, the procedure was to allow these funds to swell the balances held abroad in the banking department. If, on the present occasion, the same procedure had been followed, the effect would have been to bring up foreign balances to Rs. 54.55 crores. Correspondingly, in the banking department, the deposits of the Central Government would have been shown at Rs. 28.81 crores instead of the present figure of Rs. 18.81 crores. The Government must have, presumably, thought that a cash balance of Rs. 18.81 crores is more than sufficient for present requirements; and that it was not desirable to utilise the sterling balances received in the week ended August 1 for expanding Government's cash balances. On the other hand, the extremely confortable ways and means position of the Central Government makes it possible for them to utilise the sterling balances for reducing the volume of *ad hoc* Treasury Bills held by the Reserve Bank in the issue department. While sterling securities in the issue department as on August 1 have risen from Rs. 121.65 crores to Rs. 131.63 crores, the Government of India rupee securities have declined from Rs. 88.47 crores to Rs. 78.49 crores. The increase in sterling securities held in the issue department has thus not been allowed to cause any expansion of currency. This process of expanding sterling securities and reducing *ad hoc* securities is a correct step in so far as, should the occasion again arise for withdrawing sterling securities from the issue department for the next instalment of the sterling debt redemption, it will be possible to make up for this withdrawal by temporary increases in the holdings of *ad hoc* Treasury Bills. For the same reason, in the week ended July 11, sterling securities were increased by Rs. 3 crores; and *ad hoc* Treasury Bills for a corresponding amount were extinguished.

These and other measures taken in recent weeks have the important effect of achieving smooth re-adjustments in currency reserves and in the ways and means plans after the

Friday Morning.

DEFEATING inflation is now considered as important as beating the Nazi. Between this week and the last further indications have been vouchsafed of the intention of Washington. Mr. Leon Henderson's views find greater favour though Congress is bent on modifying the various ceilings for instance one of 130 cents per bushel is wanted for wheat. Meanwhile the Administration is concentrating on economic defence. A new board to guide Federal agencies in economic defence has been added to the *ad hoc* agencies. One might say that the first Roosevelt experiment is being repeated and the justification for adding to offices and powers must be found in the crisis that overhangs the U.S.A. The President's Cabinet will be strongly represented in the new Board and the Board will tender advice on the work to be done or the powers required. One may conclude that the O.P.M. and the Advisory Board will have a superior authority to bow to. A point mentioned for the first time, is that the Board will advise the President on the steps to be taken to protect the trade position of the U.S.A. and expedite the establishment of same international relationships. With the view now gaining ground that the war cannot last very long the U.S.A. may concur and the desire to help Russia beat back invasion with the help of imported war material mainly 'extras' is reflected in the decision to unfreeze Russian orders. The Neutrality Act of 1939 is again circumvented by Executive action. The unfreezing of orders implies a determination to forward supplies by way of the Far East, particularly as Russia can pay promptly in gold if needed. The Washington correspondent of *The Times* deduces that Japanese interference would not be tolerated and U.S. ships preceeding in convoy are inevitable.

The note signed last Saturday at Washington is perhaps more important than the Russo-Polish agreement or arrangements as between the other Governments in exile. The doubts expressed about Japan's readiness to act in the Far East arise not only from the stern warnings addressed in connexion with Thailand but through the resolve to send on essential goods including oil-drilling equipment to Russia. It has been stated that unfulfilled orders to the value of 50 million dollars will be satisfied since Russia is like Britain and China engaged in a war against the aggressor. The U.S. developments have to be considered first since the U.S.A. is assisting in the British blockade plans. Dr. Dalton's testimony in the Commons on the point will satisfy all who have said that practice may not accord with intentions in the case of sanctions against Japan. Mr. R. K. Law's reply in the Commons to the Member for Derby indicated that the U.S.A. was prepared to cut off oil supplies to Japan. The orders promulgated this week as regards the immediate extension of export control imply a determination to cut off the essential fuel supplies. It is evident that Mexico is ready to act with the Democracies and doubts concerning Venezuela have not been heard of late. There is little doubt that British and late. The only problem that really excites attention in the U.S.A. is the rise in the coast of living. Mr. Leon Henderson took the stand to say that Price Control must come soon because of the strongest and most pronounced increase in the cost of living. In his evidence before the Banking Committee of the Lower House he argued that Government should have powers to repress the inflationary urge. He submitted that prices was near the 1929 levels and were likely to go up to the 1919 peaks. The result, he argued, might be disastrous and the Bill under discussion in Congress puts upper limits for commodities and break the rise in prices. The main factor must be extra budgetary expenditure on arms. It has been noted that in the month of July the U.S. government's outlay on defence totalled 1,000 million dollars. The expenditure is described as equal to the amount netted by the defence bonds campaign for the first three months. The surprising thing is that the amount is small for the four new series offered to the public since May started with the President's special blessings and their limited success will probably force the Treasury to touch the money market directly. It is not likely that the signs of incipient inflation would have led to tightness for the Federal Reserve Rate is unchanged at 1 per cent and the Banks have enormous accumulations of deposits. Other events in the U.S.A. are indicative not only of the Administration's growing power but of its resolve to aid the democracies. Reference may be made to the embargo on oil exports except under special license. Japanese ships may use American ports by agreement and keep up payments but trade is not likely to revive because the U.S.A. is set against making goods available for Japan. The ban on oil is similar to the ban on shipments of manganese from India. The introduction of petrol rationing in a novel form through the closure of 100,000 filling stations in the Eastern States has been reported, but Mr. Ickes' admission that the Federal Government had no authority to enforce the restriction of consumption shows that the U.S.A. is handicapped to some extent by the Constitution.

The most important events of the week are hardly reflected in the money and exchange market. One is not in a position to say if the yen is still quoting at 23.48 cents in New York. Most people are apt to imagine that nothing has happened though the suspension of quotations in Bombay for the yen must prove that the freezing order has taken effect. In spite of present calculations as to the consequences such as the probable default on Japan's sterling loans totalling over £83 millions there is no place for misgiving because some optimists think of the Bank Manager's forecast. The suspension of quotations for the Shanghai dollar may seem surprising since the rate appears in cables from London but the freezing order is in force. The freezing order will obviously militate against the development of banking connexions with China in the near future and their being out off from the clearing house though it will not affect the inclusion of Chinese banks in the Reserve Bank's schedule. The most important event of the week falls due for consideration. The inclusion of Hong-Kong in the sterling area was a natural consequence of the freezing orders promulgated against Japan and China. That Japan has engaged in reprisals is of no consequence to the student who must however state that the addition of Hong-Kong to the sterling area will enable Britain to retain certain Far Eastern connexions. There has been a reference to the deliberate expropriation in Japan of certain British interests including the great Liverpoil house of Butterfield and Swire.

The recovery in Hong-Kong and Shanghai Bank shares reflects the views of the London market as to the entry of Hong-Kong into the sterling area. The dollar long kept out owing to the special currency ordinances of the Colony which had to consider Far Eastern trade rather than allegiance to London. The dollar has long been quoted at 1st 4d and the devaluations of September 1936 did not touch the Hong-Kong currency. While the Shanghai dollar has continuously depreciated, the Hong-Kong currency has always been steady. One of the direct effects of the changes made in Hong-Kong must be the modification of import control in India and other countries. The modification will naturally help China's foreign trade and Hong-Kong's prosperity too should revive. The admission of the Hong-Kong dollar into the sterling area is not to be measured by any changes in the Bombay rate which is Rs. 85¼-81½ for T.T. on Hong-Kong per 100 dollars. The London rate must be therefore unchanged after the introduction of new regulations in the Colony and the Leased territory.

The blockade of Canton and the freezing order (at China's own request) explain the sharp decline in the Chinese currency which has fallen by ½d in London. Over this week the Shanghai dollar is quoting below 3d and the break in the rate shows that freezing implies the withdrawal of British support for the Chinese Stablisation Fund. The market is not likely to interpret this weakness as unusual but the suspension of payments and remittances means that the freezing order operates in Hong-Kong against both China and Japan. Hong-Kong may get a useful addition to the holdings of foreign assets but Chinese banks are likely to gain to some extent because they would not be called upon to pay out except for limited remittances at discretion.

ATTENTION

At every branch of Lloyds Bank you will meet with ready attention for any business or personal problem that modern banking service can help to solve.

LLOYDS BANK
LIMITED.
(Incorporated in England.)

(Continued from page 243)

colossal changes that had to take place at the time when sterling payments were made to the holders of the dated sterling loans.

We now turn to the more routine details of the Reserve Bank returns. In the banking department, the Central Treasury deposits have risen from Rs. 17.11 crores to Rs. 18.81 while those of Burma Government and other governments have fallen from Rs. 3.28 crores to Rs. 2.58 crores and from Rs. 6.21 crores to Rs. 5.92 crores respectively. Scheduled bank's deposits also show a slight fall from Rs. 30.60 crires to Rs. 30.45 crores. Investments show a shrinkage from Rs. 8 crores to Rs. 7.62 crores. In the issue department, active notes in circulation in India are nearly Rs. 1 crore higher at Rs. 255.23 crores. Rupee coin continues to show a steady increase; and the latest figure is Rs. 38.13 crores.

The statement of the Imperial Bank for the week ended August 1 establishes another new record for deposits at Rs. 103.91 crores. Most of the other changes are of a minor character, the main feature of note being the increase in cash from Rs. 12.69 crores to Rs. 13.64 crores.

In our issue of July 12, we had made a request that the authorities should make available to the public an accurate and up-to-date statement of the present position of the rupee and sterling debt to the Central Government. Thanks to the courtesy of the Reserve Bank of India, which we greatly appreciate, we are in a position to publish a statement showing the outstandings of the Government of India's rupee loans, including the rupee counterparts created as a result of repatriation, as on June 30, 1941. The figures have not yet been scrutinised and passed by the Accountant-General, Central Revenues, who alone is competent to issue an authoritative return. While absolute accuracy is not claimed for them, they are, the Reserve Bank informs us, approximately correct. We also publish estimates of the sterling loans; but we are asked to state that they have been compiled by the Reserve Bank for its own use and not in exercise of any agency function on behalf of the Givernment of India. These estimates, while approximately correct, must not be deemed authoritative.

The exchange market has borne a lively appearance, thanks to arbitrage transactions in gold. The freezing order on Japanese financial operations has had the effect of eliminating what was a persistent bearish influence on exchange. Japanese banks have frequently been buyers of sterling for large parcels. With these remittances stopped, a steadier feeling has prevailed in the exchange market.

Banks were sellers of T.T. at 1s. 5 15/16d., for ready up to six months forward; and banks were buyers of T. T. at 1s. 6d., for the same delivery.

Banks were buyers of three months D. A. bills at 1s. 67/32d., for three moths and 1s. 6 9/32d. for the fourth month.

Interbank call money quoted ½ percent with no borrowers.

Firms' money for call and short quoted ¼ percent; and ½ percent for one to four months deposits.

BRAITHWAITE
BOMBAY PIPELINE

THE TANSA PIPE LINE.

Running over a distance of 110 miles, the Tansa Pipe Line conveys 90 million gallons of water per day for the city of Bombay. Designed and laid out by Messrs Braithwaite & Co., (India) Ltd. a total of 90,000 tons of steel were required for the completion of the work and due to the very high pressure that the line can bear it has been known as "the Longest Boiler Barrel on Earth"

Savings Week

In Britain War Savings Weeks have played an important part in the raising of the colossal finance required for the prosecution of the war. Savings weeks have been planned and conducted in every centre, big and small, and energetic drive, tireless zeal of the local citizens and emulation between one centre and another have all resulted in War Defence Certificates yielding the Government funds in far greater abundance than could have been otherwise secured. Apart from the utility of the Savings Week, from the point of view of providing the sinews of war, another equally important purpose is served by the observation of such weeks. With Britain's industrial machine increasingly diverted to the production of war weapons, it has become a matter of prime importance that the general population should reduce to the minimum their purchases of articles of consumption. Rationing has had to be extended over a wide field. Prices have been kept under control. Supplies of essential commodities have been organised and directed under Government auspices, so that there can be no charge or complaint of favouritism in the distribution or availability of essential goods. For a country, which has to depend for most of its raw materials on imports from abroad, and in whose case success in the war is determined by industrial output reaching the maximum, savings have to be recurrently drained from the hands of the population into the coffers of the Government. Without such a drain, the general population might set up a demand for consumption goods which would cause serious complications in the plan of rationing and the scheme of price control. Such periodical diversion of savings from the people to the Government is all the more necessary as individual incomes have greatly risen. The per capita income is much higher, due to the very conditions of the war; due to these same conditions, per capita expenditure is to be curtailed as much as possible. In other words, per capita savings must be accumulating on a considerable scale since war began. Institutional and affluent investors may be trusted to employ their spare funds, as they accumulate, in defence loans and other ways which will ultimately help war financing. It is the middle class population whose savings have to be brought within the operation and activity of savings weeks.

Attempts are being made to introduce the war savings week in India. An influential organisation has been set up in Bengal to plan a campaign of this kind. The Calcutta and District National Defence and Savings Week Committee was brought into being recently, with Sir Henry Richardson as Chairman and Mr. R. R. Haddow as Vice-Chairman. The Savings Week will commence on November 29 and end on December 6. We welcome the inauguration of the Savings Week in this Province. We feel confident that there is more work cut out for this Committee; and that, if the campaign and publicity are fashioned and conducted on sound lines, it should be possible to mobilise considerable support for the Government of India's defence borrowing. There are various directions in which the Committee propose to arouse enthusiasm and zeal and capture support. We shall confine ourselves to the financial side of the project and to a discussion of the best methods and the most suitable objectives for ensuring the maximum success from the financial point if view.

We understand that the present aim of the Committee is to raise Rs. 2 crores during the Savings Week. May we suggest that an objective of Rs. 2 crores as the total collections from Bengal in a week celebrated with pomp and pageantry makes most unimpressive showing? We believe that it should be possible to mobilise Rs. 20 crores from Bengal in the Savings Week, and we shall be able to prove that Rs. 20 crores is well within the capacity of the Province to put out.

Those who are content with the objective of Rs. 2 crores, presumably, have the middle class in their minds. It is in this regard that we would like the Committee to have a clear understanding of the categories of savings that they should tackle. We consider that there are three different categories to be taken into account. In the first place, there are the bigger investors in the shape of banks, insurance companies, investment institutions, joint stock companies with spare funds and private individuals including those who have made big fortunes from war business. It should not be difficult to make a list of the names that will come under this head. The list may not include more than 500 parties to be tackled. But this will be the most fruitful and most substantial source for investment in defence loans. If properly approached, Clive Street banks and business-houses should find it no tall order to subscribe Rs. 15 crores for the defence loan. In the second place, there is the middle class population. The appeal to it is through the Defence Savings Certificates. Through press campaign and through personal canvassing by an army of keen young people fully trained in suitable sales talk, sales of Defence Certificates among the middle classes during that week must rope in Rs. 3 crores to Rs. 4 crores. Thirdly, there is the industrial labour. We are not sure whether any worth-while subscriptions can be expected from this class. Wages have not been increased to any great extent; and rice and other commodities entering into the budget of the poorer classes have gone up in prices rather steeply in recent months. So far as industrial labour is concerned, we do not, for our part, anticipate much of sales of defence certificates; but work in this section of the people and in the various areas where the workers live will be of great propaganda value. It is for propaganda value rather than for results in terms of collection, that we should include industrial labour in the activities connected with the Savings Week.

It will be seen that, in our ideas of the planning of the Savings Week in Bengal, we have necessarily to give a wider interpretation of the war savings. A more correct description would, perhaps, be an Investment Week. It is no use applying to Indian conditions plans and programmes that have served well in Britain, unless we are prepared to make such changes and modifications as are necessitated by the peculiar conditions prevalent in India. A Savings Week in Britain has meaning firstly, because the middle classes in that country are in a position to accumulate in the aggregate a considerable amount of savings, and secondly, the essential need of the moment in Britain is to keep draining savings from the hands of the consumers. The middle class savings in India, on the other hand, have not the same importance. The Defence Certificates have been on sale for nearly a year; and all that these Certificates have fetched so far is Rs. 3 crores. In the light of this figure, it is idle to pretend that there is any strong middle class movement in India. Nor have the Indian middle classes benefited from the war in the way in which the middle classes in Britain have done. If the Savings Week is to be inaugurated in India, it has to take note of this important difference between Britain and India. If the Savings Week in India covers only the middle classes, the results will not be worth-while. From this point of view, it should be possible to appreciate why we would like to plan the Savings Week in Bengal more as an Investment Week.

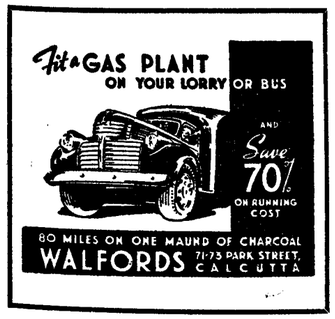
The Committee, as at present planned, propose to celebrate the Savings Week fourteen weeks from now. Influential men both from the British and Indian communities are serving on the Committee; various schemes devised by men who are enterprising and who are full of energy and enthusiasm, are to be put through in connection with the Savings Week. We cannot help feeling that all this labour and effort, all this scheming and planning can be worth-while only if we set out to secure an amount which will be really and substantially useful to the Government.

In a speech at Madras the Viceroy said that the Government required from Defence Loans Rs. 100 crores in a year, or Rs. 2 crores per week. If the Viceroy expects Rs. 100 crores a year from All-India, what should be considered the share which Bengal should take up? From the experience of the distribution of new loan subscriptions in recent years, we think that, if All-India is to provide Rs. 100 crores, Bengal's share is Rs. 40 crores. If this Province is to provide Rs. 40 crores in a year, let us all make a gigantic effort to secure half that amount at least in the Savings Week.

Banking in Wartime

MOST students of Indian economics agree that the essential strength of India's banking system has been unimpaired by the war. Progress has not been checked in the least, and the inherent vitality of the system was demonstrated last summer when confidence was sorely affected. More definite evidence of the extent and direction of this progress are now made available by the tables in the new publication issued by the Reserve Bank relating to banks in India in the years 1939 and 1940. The publication is a continuation of that prepared formerly by the Department of Commercial Intelligence. The statistical imperfections of the old record still persist; for the indigenous banker is left out, and until the scale or volume of his operations is measured with more or less accuracy, a serious lacuna will exist.

The new publication, in adhering to the old order of compilation, apart from putting in Burma's statistics, has made a few changes and chronicles facts of more than limited interest such as the modification of the rules relating to the admission of banks to the second schedule. The banking companies whose balance-sheets showed a paid-up capital and reserves of Rs. 5 lakhs were treated as eligible until May 1940 when the rule was changed and Rs. 5 lakhs was put up as the lower limit for the exchangeable value of the capital and assets of any bank applying for inclusion. The book value is not treated as a sufficient qualification; a preliminary evaluation of capital and reserves and examination of banks is held desirable, and the Reserve Bank co-operates with the Government in determining the suitability of applicants. Out of six applicants in 1940 only three were included in the second schedule. At the end of 1940 there were 62 scheduled banks in India and Burma inclusive of 20 exchange banks. At the end of 1940 there were 2074 offices and branches of banks of which 390 belonged to the Imperial Bank; 101 to the Exchange Banks and 857 to the Scheduled Banks. At the end of 1940 there were 17 banks with capital and reserves exceeding Rs. 5 lakhs which had not applied for inclusion in the Second Schedule mainly because they are domiciled in States and have no branches in British India. A notable instance is the Bank of Mysore, which is a non-Scheduled Bank. These however constitute a minority of the non-scheduled banks which are classed as companies having capital and reserves of Rs. 50,000 or over. Evidently non-scheduled banks have made some headway as the total number of their offices increased in 1940 to 718 from 673 in 1939. Though their number is quite large, the total deposits of 400 non-scheduled banks amounted to Rs. 263 lakhs only at the end of 1939. There must, of course, be non-scheduled banks with capital and reserves below Rs. 50,000 and their share of total deposits can only be guessed.



The growth of deposits has always been regarded as the most satisfactory test of banking development. But the banking map provided by the Reserve Bank suggests that large tracts of country are untouched by the branches of the Scheduled Banks. The preponderance of non-scheduled banks in Bengal and Madras is brought out in another map which shows that the sparsity of non-scheduled banks in Bombay is as arresting a feature of the map as the number of banks on the West Coast of Madras. Charts illustrating the growth of note circulation merely support the conclusions drawn early this year as to the maintenance of cheap money and the limited improvement in commodity prices, indicating that the earlier manifestations of inflationary tendencies had been curbed. A rise of about Rs. 50 crores during 1939 and 1940 in the active note circulation, was accompanied by several other changes in the Reserve Bank's position as shown in the usual returns. The reduction in rupee coin during the first half of 1940 like the accumulation of sterling securities and Scheduled Bank's balances during the second half belongs to financial history. Their effects have been noted more than once, and it is only necessary to look at the recent progress of jointstock banks to ascertain the main trends which help to make Indian banking progress sound and orderly.

The expansionary trend is, as may be expected, most marked in the case of the Imperial Bank whose total deposits advanced from Rs. 81.51 crores at the end of 1938 to Rs. 96.03 crores at the end of 1940. The regular additions to Reserves raised them to parity with the paid-up capital by the end of 1940. The fall in advances after the remarkable increase recorded in 1939 must be attributed to slack trade. The increase in investments by nearly Rs. 10 crores during 1940 can also be explained by reference to the reduced demand for funds, while the sharp rise in cash balances indicates that the Imperial Bank like all other banks felt it desirable to retain a wide margin. The rapid expansion of deposits is more than reflected in the higher proportion of cash held by banks in India. While advances fell by over 20 percent, banks felt impelled to raise their cash ratio from 10.19 percent to 20.7 percent at the end of 1940. The increase is assuredly a sign of sound and cautious management, indicating also that the Imperial Bank has been copied by others including the non-scheduled banks though the total of 605 banks brought into the tables could only show a cash ratio of 7.8 per cent at the end of 1940.

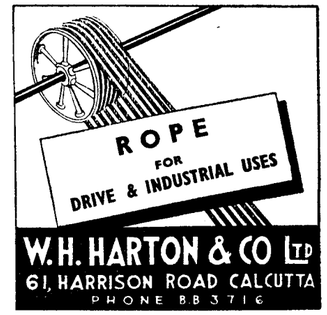
The number of exchange banks doing business in India had risen from 18 in 1939 to 20 at the end of 1940 when one was added and the total number of offices rose to 101 from 99 at the end of 1939 which must be compared with the 93 at the end of 1938. The five banks claiming more than 25 percent of deposits from their Indian business had total deposits of Rs. 35.45 crores indicating an increase of over Rs. 5 crores during 1940. The total, however, is below the total deposits of Rs. 38.86 crores at the end of 1938 and this may be taken as evidence of the limited progress made since 1930 by the Exchange banks which have felt the main effects of the contraction in foreign trade during the dpression and the war. The 15 other Exchange Banks had total deposits in India of nearly Rs. 50.12 crores and cash balances alone came to over Rs. 11.93 crores.

There is, however, a curious discrepancy to which attention must be drawn. The table gives total deposits of £35.57 millions out of India and Burma for the five exchange banks doing a considerable portion of their business in India and Burma and Rs. 35.45 crores as their total for deposits held in India. The figures suggest that there has been a mistake since the balance-sheet total for the Chartered Bank, the biggest of these Exchange Banks, is in excess of the total given in the table. The total deposits of the leading Eastern Exchange Banks must therefore be greatly in excess of the total of £69 millions or so given in the table and one must assume that the total for the deposits of the five leading Exchange banks must be wrong. Attention may be drawn at this stage to the substantial rise in deposits referred to by Mr. V. A. Granthan and Sir Charles Innes at the meetings of the Chartered Bank and Mercantile Bank this year. The presence of a mistake is certainly deducible from the general tables which give the latest balance-sheet figures along with number of branches for each bank without indicating the total deposits obtained in India by the respective banks. It is again suggestive that bullion is lumped along with the cash in hand and with Baskers in the case of exchange banks which have specialised in the export of gold in recent years.

Such facts are of limited interest as compared with the rise in total deposits in the case of scheduled banks in 1939 and 1940. Demand liabilities have again risen while time liabilities have fallen and the cash balances are nearly two and a half times more in proportion to deposits. Added to the total for the co-operative banks and the non-scheduled banks reporting in 1940 the total deposits have risen in 1939 and 1940 by over Rs. 43 crores, though the class A and class B co-operative banks' progress cannot be measured accurately owing to the difference in accounting years. The co-operative Banks' low cash ratio is, perhaps, likely to militate against any actual rise in deposits. The most important feature, however, is the progress made by the Big Five. The increase in deposits is most pronounced in the case of the Imperial Bank and the Bank of India as also the Bengal Central Bank, but if percentage rise alone counts the first place must go to the Indian Bank whose deposits rose by over 30 percent in 1940. The most significant feature of the past two years is that the Indian jointstock banks have attracted the additional funds in much the same proportion as the Imperial Bank and the balance has been restored as compared with 1938, though the increase in the number of banks and branches makes all comparisons invalid to some extent. To the 41 scheduled banks in India, must added the two scheduled banks one in Maymyo and the other in Akyab. A point that will attract considerable notice is that the two banks held total deposits of Rs. 32.3 lakhs only so that the rate of progress in Burma appears to be negligible while their cash balances appear exiguows compared with the very substantial capital, reserves and cash held by the Indian scheduled banks. It is apparent that Indian jointstock and exchange banks furnish services to Burma which are supplementary to those given by indigenous bankers. The figures now available throw light on the wartime progress of Indian banking despite the setback recorded under advances in the busy season of 1940. And figures available since as regards the two new additions to the list of scheduled banks and the addition of 34 new offices in the first quarter of 1941 show that conditions remain favourable to the growth of deposits. The additions to the supply of investible funds possible through the uninterrupted growth of deposits must be advantageous to the Government which has been a regular borrower since June 1940.

Editorial Notes

Trade in June



HIGH stability continues to distinguish the foreign trade of India, and the June returns, in spite of the obvious limitations of all conclusions drawn in wartime, confirm the opinion that distinct improvement can be expected. The total value of exports during the month was below that of imports; but the caution given previously against the exclusion from intergovernmental transactions as also the fact that very considerable improvement is discernible over the first quarter of 1941-42 militate against pessimism. Total value of exports returned as Rs. 15.68 crores was below imports valued at Rs. 17.6 crores and the setback in re-exports recorded in June made retained imports exceed Indian exports as in the previous months. At first sight the settled trend owing to the unfavourable balance of trade appears inauspicious; but nothing is known of treasure exports nor of the payments in sterling received on Indian account. The higher average value of imports should certainly lead to the conclusion that imports have fallen by comparison with 1940-41 and comparisons made as regards exports should not omit to take note of the war orders of the Eastern Group. The high degree of resilience long evident in the import trade helps to stabilise the customs revenue over budget estimates and this will be welcomed, particularly, at a time when import control has been extended. It is apparent that a very considerable rise in Indian exports has taken place since April, suggesting that the freight problem is no longer acute. And as has been observed, the fall of about Rs. 3.2 crores under exports or the rise of about Rs. 7 crores under imports on the basis of comparisons with the first quarter of 1940-41 have no special significance at present, for the differences in conditions have to be considered, and it is possible that the improvement in trade turnover during June is the result of the upward movement in prices. The June returns show an increase under imports of provisions, oilmanstores, spices and liquors as also tobacco; but imports of grain, pulse and flour show a fall as against June 1940. The main change in the raw materials group is an increase under cotton and wool suggestive of a further advance in textile activity in India. The increase under oils must be ascribed to the increase in imports of oil from Burma and Iran. The only change of importance under imports is the increase under vehicles. The increase is duly reflected in the increased value of imports drawn from the U. S. A. and Canada in June. The increase under cotton and other yarns is naturally reflected in the enhanced value of imports from Japan. The total value of imports drawn from Japan in the first quarter of 1941-42 is as much as Rs. 7.18 crores suggesting incidentally that imports have been running at a higher level than in 1940-41 for the pressure of events alone should have led to extensive buying for stock.

The increasing importance of the U.S.A. in India's import and export trade is reflected in the June returns which show that exports valued at Rs. 3.56 crores exceeded imports valued at Rs. 3.32 crores. The decline under total exports valued in the first quarter was Rs. 40.94 crores and is shared between the British Empire and foreign countries. But the first quarter which witnessed a striking increase in exports to the U.S.A. saw also a fall in exports to China. While imports from Japan for the first quarter were valued at Rs. 7.18 crores the total exports to that country showing a small improvement over 1940-41 were valued at only Rs. 2.12 crores. The falling away under exports of raw cotton this year may suggest that Japan is the main factor in India's cotton trade. But the very substantial rise in imports of cotton during the same period indicates that Indian mills can assist the cotton-grower in many ways. Trade in the first quarter, while it indicates the reduced volume of exports of oilseeds, coal, cotton and jute, discloses marked improvement under grains, resins and lac as also under grain and flour. The big increase under exports of the latter may have a bearing on the advance of prices during and after June. Textile exports, too, have shown continuous improvement while the fall under jute manufactures in the first quarter may suggest that foreign buyers are disinclined to follow the rise in Calcutta prices.

Canada's Trade in 1940

Though the total trade turnover as below the record attained in 1939, the foreign trade of Canada in the year 1940 was marked by substantial improvement as compared with 1939 which saw a considerable decline after the increase recorded in 1937. The advance in mining output naturally contributed to the increase in foreign trade reported last year. Merchandise exports valued 1,178,954,000 dollars showed an increase of 7 per cent on 1939 but, allowing for the rise in prices, the net increase was 15 per cent. Exports of agricultural produce from Canada which were valued at 218,264,000 dollars showed only a small increase, for, the earlier increase in wheat exports tailed off. The improvement under animal products is obviously due to the increase in the exports of fish to the U.S.A. and of bacon and cheese to Britain. Canada has taken the place of Denmark and Holland, and once more the Dominion gains at the expense of Europe. The outstanding feature of the trade returns is the big increase shown under exports of fibres and textile. The increase is attributed to the sendings of cotton fabrics to the U.K. Total textile exports valued at 21,571,000 dollars were unimportant as compared with wood and pulp. A very rapid improvement followed events in Europe, and Canada's shipments of newsprint, pulp, planks and boards to the U.S.A. and Britain rose by 43 per cent to a record level in 1940. Total export of forest products valued 348,007,000 dollars indicated that agriculture and mining are not so important for the export trade as timber and pulp. The failure of Scandinavian exports led to the sensational expansion described. Equally arresting was the improvement disclosed under exports of iron and iron manufactures through the expansion in exports of pig iron and mechanised equipment to Britain and automobiles and machinary to the Empire. It is clear that the increase in foreign trade was not concentrated in the wood and pulp group for Canada's shipments of non-ferrous metals rose in spite of the fall of Norway. The U.S.A. increased her purchases of strategic metals while Britain took the place of European countries which bought heavily early in 1939. It is noteworthy that export of non-ferrous metals valued 194,712,000 dollars were more important than the iron and steel group and the increase of 15 per cent under non-ferrous minerals to 35,754,000 dollars indeed shows that iron and steel and manufactures thereof are not of vast importance. The latter increase shows that the development of oilfields in Alberta and the increased development of building minerals were aspects of mining development in Canada last year. Canada is now an important producer of mercury so that Italy and Spain may be ignored.

The exports of war minerals including minerals were mainly responsible for the increase in exports, and under imports, too, the war was the decisive factor. For, the war was responsible for the increase of 44 per cent in Canada's imports in 1940 to the total value of 1,081,938,000 dollars. The value of rubber imported last year trebled and imports of iron and steel manufactures valued 298,900,000 dollars rose by over 60 per cent. Imports of non-ferrous metals including aluminium and tin and electrical apparatus rose by 69 per cent and imports of oil and coal advanced by over 20 per cent while imports of chemicals rose by 19 per cent. It is clear that intensification in mining and industrial activity account for the greater part of the increase in Canadian imports for the striking rise in imports of cotton and wool show that the increase in textile exports necessitated larger imports of raw materials. Increased purchases of aircraft, munitions and scientific equipment were again recorded, but that was nothing compared with the increase under certain luxuries like refrigerators. Trade with Britain rose by 79,956,000 dollars and with the Empire by 45,153,000 dollars. The volume of exports to South Africa and India almost doubled and Empire countries took the place of Europe and Japan, exports to which were halved. Increased exports to Latin

America were a feature of the year. The main increases in imports were due to enlarged offtake of raw materials like wool and jute but the U.K. shared in the increase in exports though her proportion of Canada's import trade fell. The U.S.A., on the other hand, provided as much as 69 per cent of Canada's imports as the absolute increase of 247,330,000 dollars also shows. The merchandise surplus was reinforced by exports of gold valued 203 million dollars and the increase under the latter item offsets to a certain extent the reduced balance of trade in Canada's favour. A comparison with production and trade figures for 1929 indeed proves that Canada is more strongly placed than ever. If the automobile industry is relatively stagnant, one must look at the larger steel output, the newsprint production (well over 2 million tons in 1940) and the increase in petroleum and gold production. The enlarged output of agriculture since 1929 is reflected also in the growth of orchards and root crops in Canada. The biggest change is the fact that Canada imports less than she used to and has no more an unfavourable balance of trade as in 1929. The era of development with the aid of foreign capital ended and Canada's industrial maturity is to be measured in the big increase in automobile output recorded since 1929. The trend since the close of 1940 remains essentially favourable and the total estimated investment of 700 millions in the Dominion war effort may be easily surpassed this year as the Empire looks to Canada for many manufactures including machinary.

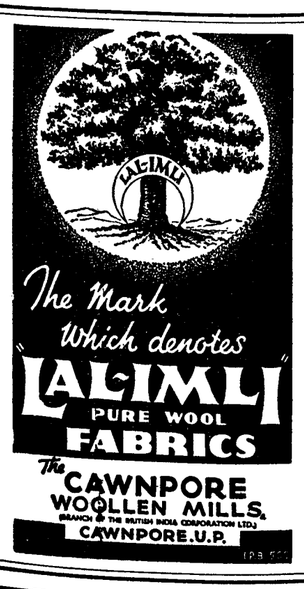
Malaya's Minerals

Far Eastern developments must naturally rivet interest on Malaya's progress, and in one respect at least, Malaya is far ahead of India. The mineral production of Malaya is not very varied but it includes tin and tungsten which are essentials in wartime. The very considerable progress made by Malaya since the last war has put her ahead of India and Burma. In a recent analysis of mineral production made by Sir L. L. Fermor it has been stated that the average value of Malaya's mineral output has risen from £9.2 million to £13.43 million, the average for the years 1934-38. Tin slice remains the most important item, for Malaya remains the world's leading producer, and the annual value of tin alone exceeds £11.15 million showing a rise of 27 per cent over the value between 1914 and 1918. The total production of other minerals, valued at £2.67 million, reveals an increase of 420 per cent as compared with 1914-18 and a further point deserving mention here is that the output of new minerals is remarkably stable and does not fluctuate like tin which under quota restrictions has fallen and risen. Iron ore, bauxite, manganese, wolfram and ilmenite are getting more attention. Iron ore totalling over 1.4 million tons in 1939 was obtained in Kelantan, Trengganu and Johore, mainly by Japanese companies which had acquired concessions. Manganese from Trengganu and Johore and bauxite from Johore were developed by Japanese interests. It is obvious that dependence on Malaya for Iron ores (1.94 million tons were exported in 1934) has made Japan vulnerable in another way. The stoppage of mineral exports from Malaya is certain and the restiveness of Chinese labour in 1939 was due mainly to the existence of Japanese concessions. The coal output of Malaya has, in recent years, increased. The Batu Arang field in Selangor is the most important. Though the quality of Malayan coal is low, the coalfields are of help to other mining industries which are not wholly assured of hydel power. The most important war mineral produced in Malaya is tungsten. The output had risen from 857 tons to 1,373 tons in 1939. The scheelite deposits at Kramat Pulai in Perak are of great importance while the other deposits in Kedah and Trengganu are a valuable addition to the wolfram found in Lower Burma. The tungsten is certainly more important than Malaya's gold output of 35,505 ounces in 1939.

Tin is obtained in the F.M.S. and Selangor and smelted in the Straits Settlements which treat about a third of the world's tin output. With the international committe keeping the quota at 130 per cent of the standard, it may be presumed that tin is being turned into dollars for the benefit of the Empire as the U.S.A. is the principal market for tin. Japan has been a small buyer for tin, but the average exports of 29,649 tons of Manganese have been taken by Japan alone ilmenite from the *Amang* dumps near the tin mines is another source of dollar exchange for titanium carbide can be had only from ilmenite. Japanese companies have developed bauxite (exports to Japan in 1939 totalled 84,387 tons) but they are not likely to keep either the tin companies they controlled or the iron ores they commanded. Japan may also lose her bauxite imports from Britain in the Dutch Indies. Exports of phosphate of lime for Japan are not likely to continue and Malaya may keep all her war minerals for other buyers. The tin production of Malaya like that of rubber may be both controlled and diverted. Like mica from India and wolfram from Burma, the tin from the Malayan fields is a weapon in the democracies' armoury. And denial of access to iron, manganese and bauxite may be a vital part of the economic sanctions for which all are prepared.

West Australia's Handicap

Gold production in certain parts of the world has suffered a setback owing to the war. This may seem surprising in view of the present price of gold, but the absence of progress in Western Australia supports the view. Many years were to pass before the first discovery in 1848 was turned to account, and it was only after the Kalgoorlie deposits were located that gold mining became a major industry. For a long period Western Australia provided half the gold output of Australia. Production declined after the exhaustion of the richer deposits and the increase in mining costs. Profits were affected by the last war and many mines were abandoned since then owing to various difficulties. Production fell from 2 million ounces in 1903 to 377,176 ounces in 1929 and the trend was reversed only after 1930. The depreciation of the Australian currency and the high price of gold stimulated recovery. Oversea capital was attracted again and improved methods led to a rapid expansion of output. The total output in 1939 rose to over 1.2 million ounces valued over £A11.7 million and only Federal taxation reduced the income of the mining companies. The decline during 1940 has been followed by a further decline and the mining returns for the first quarter of 1941 show that Western Australia cannot keep up. The difficulty caused by the lack of manpower is one of many. Prospecting has come to a standstill, and labour shortage has been accentuated by the internment of aliens. Drought has also played a part in the setback given to prospecting. But the three



major factors responsible for the decline in gold output are the increases taxation, the limitation of equipment and the actual reduction of mining operations. The sterling companies are subject to a profits tax of 100 per cent and have certainly no desire to continue development. It is not only the de Bernales group which would welcome a transfer of offices to Australia despite the commonwealth tax on gold. Mining equipment is hard to obtain owing to the war and this in combination with other factors has accounted for shutdowns. In May 1940 the Lancefield output in the case of the Emu gold Mine at Leonora has been affected by the inflow of water; but normal work may be resumed. With the exception of the Gold Mines of Kalgoorlie, which shows an increase, all the larger mines report reduced output. Though output may not fall away further, the call-up may introduce other difficulties. Should the profits tax be revised, there may be an increase, but as things stand the West Australian mines cannot make headway in spite of gold selling at 8 gns.-£A10.65 per ounce. A study of the production satisfies for the leading Westralian companies discloses that a company like Lake view and Star has suffered in terms of output as much as Wiluna. In the case of Great Boulder and Boulder Perseverance the fall is equally pronounced. Companies incorporated in Australia do not report any very large reduction in output and nearly all companies are crushing lower grade are assaying 5.38 dwt. per ton. This implies that the outlook is by no means unfavourable for many companies retain large are reserves and can count on resumption of full production when the war ends.

Indian Life Of Karachi

For the year ended December 1940 the Indian life Assurance Co., reports an increase in the new business. This will alone confer interest on the 1940 report and account which show that new business resulted in the issue of 1,702 policies for over Rs. 36.4 lakhs. The total assurances in force at end of 1940 exceeded Rs. 2.5 lakhs, and investment receipts of over 4.81 lakhs The Company experienced an increase in claims by death and maturities and this, like the increase in the lapse ratio, is perhaps the only mark of adverse circumstances engendered by the war. The total expenses of management, may be expected, show a small increase but the year's surplus receipts have provided an addition of over Rs. 3.68 lakhs to the Life Fund which stands at Rs. 97.33 lakhs. The directors have naturally expressed satisfaction with this addition to the Fund and the pact that the expense ratio remains under last year's level indicates one other source of improvement. The balance sheet certainly reflects that the position attained by the Indian Life Assurance Co., Limited in relation to the total business of 2.5 crores is unusually strong as the Company had securities that are valued at over Rs. 113 lakhs. The balancesheet proves that the company's investment policy remains demonstrably sound. The only item out of the total assets of Rs. 139.28 lakhs that will not be regarded as wholly liquid are loans and mortgages totalling Rs. 19.81 lakhs and house property valued over Rs. 11.4 lakhs. The latest balancesheet again indicates that the company in spite of the difficult conditions reported last year has a very substantial margin between the book value and the market value of the securities held in the Life Fund.It is in no conventional manner that one praises once again the way in which ILACO's assets are distributed. This old Karachi company certainly has the enviable distinction of retaining substantial reserves in support of a small paid-up capital, a part from the contingent liabilities of the shareholders. The age and successful working of the Company are reflected in the dividend of 25 per cent recommended. The classified summary of assets shows that the cash balances are not large but this will excite little interest as compared with the large interval reserve retained by the company's holding of such stocks as the 4 per cent 1960-70 loan.

Indian Income-tax

The appearance of another treatise on the Indian Income-tax Act (published by the Indian Press, Allahabad, Rs. 6) may well

W. G. GROUNDWATER, *General Manager.*

lead one to examine the special features of Mr. B. N. Das Gupta's work, now in its second edition. It is meant primarily for the accountant and the businessman, and is thus to be distinguished from the commentaries that have so far appeared. The eighth edition of the Manual is regarded as inadequate and assessees may, therefore, turn with advantage to a work which is thorough, original in many way and always reliable. In addition to a chapter on Hints to Assessees, there are forms for the drafting of appeals and petitions and tables relating to Stamp and Court fees in different provinces. The author, who is a Reader in the Lucknow University, has preserved the arrangement of the first Edition in which Part I was meant for the assessee and Part II for the administering authority. The amended act is commented upon in the usual manner, and in order to elucidate points. The author's own opinions on many questions are interesting, and copious extracts from judgements are provided and it is certainly interesting to record that he approves of an agricultural income-tax where the income exceeds Rs. 1 lakh per annum. The book contains copious illustrations and advice to assessees while making it plain that the citizen's duty is to pay and seek loopholes of escape only where possible. The changes in the law are described clearly and comprehensively, and high praise is due to Mr. Das Gupta, who is looking at things as an accountant rather than as a lawyer, from overloading his text with citations of cases. The Rules made under the Act form the subject of an Appendix and they throw much light on points of interest to assessees, for whom, rather than for the Courts, the book is meant. It should therefore receive attention from a party of the public which is apt to ignore enactments, and even test cases, forgetting that ignorance of the revenue law is no more an excuse than ignorance of the criminal law.

Wheat Supplies and Prices

The world wheat position is still the subject of discussion but an air of unreality clings to the Washington Conference which cannot produce any agreement similar to that of 1933 because the conditions are radically different owing to the war. The withdrawal of Russia as a possible exporter does not introduce complications. For the short supply noted early this year can have only slight bearing on the World wheat position since a note in the *Economist* emphasised the super-abundance of supplies, the prospects of a large crop in the Argentine and the U. S. carryover accentuating the bearishness of the outlook. Price movements since have brought out the invalidity of all earlier conclusions. The European situation in conjunction with the blockade has led to a rise in consuming markets, and India, which is not an exporting country in most years, has been a little out of the general movement until July. If the rise in the U.S.A. is obviously the result of a general upswing in commodity prices, the anticipated reduction in Australia's crop and the acute demand for grain in European countries have influenced world prices favourably. It is certainly correct to point out that apprehensions of a decline in prices owing to the surplus in the last year's crop have no basis at present. The weight of the Canadian crop has not checked the continued rise in Chicago where the dream of a dollar per bushel has been realised fairly early. It is only correct to point out that Indian prices have kept step and whatever be the estimates as to the adequacy of Europe's supplies, there can be no halt to the rise in Indian prices because of the rice position and the shipping difficulty. The rise may be limited and regulated, but it

NORTH WESTERN RAILWAY

Applications are invited from Muslim candidates for the post of a temporary Electrical Draughtsman in Class II grade I (Rs. 100-10/2-120) in the office of Superintendent, Mechanical Workshops, N. W. Railway, Moghalpura. In addition the names of five candidates for the posts of Mechanical and Electrical Draughtsmen will be registered on a waiting list for further vacancies which may occur, but all names will be removed from this waiting list on 22nd September 1942. The age limit will be 30 years on 22nd September 1941. Applicants must possess an Engineering Diploma or degree of a recognised Engineering School, College or University. The last date for receipt of applications is 7th September 1941. Full details will be furnished on receipt of a stamped envelope only (without letter) bearing in block letters the address of the applicant. This envelope should be submitted to the General Manager, N. W. Railway, Headquarters Office, Lahore and superscribed in the top left hand corner "Vacancy for a Mechanical / Electrical Draughtsman."

GENERAL MANAGER,
LAHORE.

East Indian Railway

AN APPEAL FOR CO-OPERATION

About 75% of consignments are tendered for booking at the Howrah Goods Sheds after 2 P.M. each day. This concentration of transactions within a limited period of the working day leads to delays in the issue of Railway Receipts and inevitably a material proportion is carried over for issue the following morning.

Late booking on Saturday's in particular means many despatchers are not able to send for Receipts till Monday although the Receipt Issue Section works throughout Sundays.

The *Black-out* is an additional reason for consignors to tender goods earlier in the day.

PLEASE BOOK EARLY IN THE DAY.

More receipts can then be issued on the day of booking. Consignors in turn will be able to send receipts to consignees more quickly. Carts will be released before it gets too dark.

is not easy to predict a swift recession despite the periodical press notes and the proclaimed intentions of the U. S. Administration. The scrappy nature of 1939-41 statistics makes all calculations defective, but the reduction in exports from the U. S. A., Canada and the Argentine in 1940-41 need not be given undue importance as the Lease and Lend Act makes large purchases by the U. K. possible. Though the Argentine is an alternative source, neither Canada nor the U. S. A. will be overlooked by Britain which cannot count on any great gain from the doubling of the arable area at home. There is, however, the fact that Australia stands to lose some of her Far Eastern markets and the stability of London prices, in contradistinction to the rise recorded at Chicago and Karachi, may sustain the argument that the main importer has so far seen no reason to pay higher prices. If the present carryover, estimated at 600 million bushels, is smaller than the 1400 million bushels recorded last year, there is the fact that European demand is an uncertain quantity and price control in the U. S. A. may affect the price structure. The outlook is not so clear and cheerful as imagined, though Indian markets are not likely to be depressed by calculations as to the surplus available from the heavy crops of 1938-40 when the reduced sowings and slow progress of the monsoon appear a decisive argument in favour of higher prices while the food-hoarding movement has naturally encouraged the rise in prices recorded since June.

Prices in Sweden

Parts of Europe may well belong to the Dark Continent; for, little is known of happenings except in the belligerent countries and the weal and woes of neutrals are ignored. It may be that neutrals belonging as they do to a minority must suffer like all minorities, but the occasional glimpses of stagnation, obtainable at present, show that neutrals are getting reconciled to their difficulties, and their efforts at adjustment are of high importance. It is possible to state that the difficulties experienced in Switzerland are not unique. Equally interesting are the conditions in Sweden, where industry is producing substitutes rapidly, as imported raw materials cannot be had, and industrialists are making concerted efforts to evolve a new type of autarchy, as trade with Germany alone is possible. Sweden has experienced the rise in prices for which she had prepared herself by passing control legislation in May 1939; and fluctuations in exchange rates, without influencing price trends, have been overpowered by shortages developing throughout 1940. Dependence on the German market had its inevitable effect on prices of various imports and its effect on costs and prices in Sweden. The rise in freights was one of several factors tending to put up prices. Official control has not been wholly successful and coal and cotton for instance have risen continuously owing to the shipping scarcity and delays up to the end of March 1940 the prices of Swedish imports unchecked and the cessation of trade with Western Europe accentuated the upward trend. The trade agreement with Germany made in January 1940 while it ensured the maintenance of specified imports at prices around the prewar level for some time had to be modified in July 1940. The stoppage of trade with most parts of Europe led to a fall of 45 per cent in Sweden's imports and the resulting shortage enhanced the prices of textiles, chemicals etc. imported from Germany. Though the prices level was stable over fairly long intervals, the sharp rises in Baltic freight rates could not affect prices. The loss of export markets naturally determined the trend of prices for Sweden's exports. It may be assumed however that a fall over 40 per cent in the volume of total exports could not leave prices unaffected. There was a steady rise until March 1940 after which the prices of exports declined owing to obvious reasons. Sweden's prosperity was irreparably damaged and the fixation of export prices by agreement e.g. for iron ore did not help Sweden. Import control has been practised in order to iron out the catastrophic effects of the contraction of imports. The Federation of Swedish industries has cooperated in order to prevent the rise in prices getting out of hand and most companies submitted for approval the prices they were prepared to pay for freight material. Price Boards became the rule in all trades and Sweden's policy in this case illustrates what can be accomplished by intelligent prevision.

The relation between the structure of costs and prices was under constant examination and where sales had fallen special concessions have been shown to manufacturers. Price agreements and sales quotas have become general. The consumption of copper and tin, for instance, have been restricted by agreement while import cartels have been developed for the sake of superior bargaining power. Coal imported from Germany is pooled and distributed, and voluntary rationing is practised as imported fertilisers. The development of producer gas as also of charcoal is one of the features of Swedish economy owing to the high taxation of combustible oil and the difficulty of getting supplies, the consumption has gone down, and many industries like householders are using firewood. The rise in fuel costs accounts for a sharp rise in iron and steel and manufactures thereof, while the development of charcoal pig iron is one of the results of the coal shortage. The rise in metal prices was checked latterly by the regulation of consumption, but the prices of manufactures rose after every restriction. Big increase in the prices of textiles and leather were inevitable. But Sweden benefited until March 1940 from the enlarged demand at higher prices for pulp and paper. The rise in prices was most pronounced until December, but stabilisation was attempted after March 1940 and the loss of markets, as also the reduction of incomes at home owing to higher taxation, kept prices down. Tight money and reduced profits helped to keep prices down in the majority of cases; but the shortage of commodities became the principal factor after June. The intervention of the Food Commission in the matter of food and feeding stuffs shows that neutrals have been forced to adopt measures similar to those enforced by the totalitarian countries. The Riksdag sanctioned in the autumn of 1939 higher prices for wheat and rye and the Government also started to buy up grain reserves. The price of grain and flour was stabilised by the summer of 1940 and the late rise in the case of dairy produce and meat show that the cost of living and the supply position were under scrutiny. Farmers benefited through the rise in prices though the agricultural worker's wages also had risen, and Government therefore decided in July 1940 to limit the rise in prices. A poor harvest got the better of official control and cereals, milk and butter etc. rose uninterruptedly. Home supplies of meat and bacon were adequate but the potato crop was insufficient and Sweden had limited supplies of margarine. It has been deduced that the contraction in foreign trade, as also the higher prices paid to Germany, underlies the rise in prices which put up the index for consumption goods by 32 points in 1940. This indicates how far the cost of living has risen. If Sweden has escaped inflation she has not escaped rationing and price control, and the reduced prosperity of the country is reflected in the continuous repatriation of capital last year.

DISCUSSIONS on post-war economic reconstruction are of late more in vogue than at the beginning of the war. The uncertainties of the war no longer seem to warn us off the path which normally angels would fear to tread. The Government of India whose motto, it has been said, should be "too late," has in this matter been only too keen on being too early. People who normally do not look beyond their nose want to extend their vision to the ends of time and space. I do not know how the fascination of this topic has grown during the last few months. Everyone, and I do not exclude myself, seems to think that some amount of preparation can be done from now to withstand the onslaught of post-war economic problems. I see no reason to quarrel with it. At any rate, we in India could do a great deal if we work towards the minimisation of our dependence on the rest of the world. And for my part, I have taken care that whatever proposals I have to make do not posit too much about the conditions of world economy or international trade. And I may be permitted to remind the reader that, in the main, the preparation for post-war economic problems that I have recommended is largely a matter of internal development which impinges comparatively little on the outside world. But big as this country is, India cannot be an isolated unit in the whole world. There is more need now than ever to have some idea of the changes that this war is imposing on the belligerent powers and on the neutrals, big and small. It is idle to hope that we shall be able to become aware of or appraise all the changes till some time after the war. More changes must happen in what remains of the present war. Such changes as have already happened may not by now have completed the process. And the conditions to which the present is obviously no more than a transition are in the lap of the future. The difficulty of envisaging all these changes and their ultimate upshot is, of course, there. But it constitutes no valid argument against an attempt to gauge the trends so far as they are visible to-day.

There are certainly a few rays of light which illumine certain spots in the dark landscape of world economy to-day. And these rays of light also serve to light up, however dimly, the contiguous areas. But it must not be forgotten that in an effort of this kind, it is far more important to detect a major trend than to amass a multitude of facts about details. For these facts lend themselves to, and are liable to alteration, through changes in economic policy in the different conditions of the postwar period. For the matter of that, even what may be called major trends are impeded and are sought to be reversed by governments and by private interests. It is the success or failure of such efforts that provides the criterion for judging whether a trend of the war period is a major one or a minor one. Economics, no less than politics, has its counter-revolution. The major trends of economic history are resisted; they are no more free from such conscious resistance than the major trends in the political sphere. The Industrial Revolution did not meet with a wholehearted and all-round approbation. If we remember this simple fact, then we shall realise that in this apparently hopeless attempt at writing a critical history of contemporary events in the economic sphere, we have the means of minimising the risk of being laughed at by the future. For, we shall separate the major trend from the minor not by any arbitrary standards but by estimating the chances of reversal by deliberate effort.

Perhaps, it would be helpful to illustrate this point in relation to the last war. Not all the changes that happened during the course of the war actually came to stay. Normal production, sources of supply and direction of exports suffered drastic changes. New productive activities were set afoot both in the belligerent and in neutral countries under the presssure of immediate need caused either by the requirements of war or by the inaccessability of the usual sources of supply. The extent to which these changes would be stabilised could not have been predicted during the course of the war. How far Lancashire, for instance, could succeed in regaining lost markets or to what extent Japan would be able to regain her newly won trade in cotton textiles depended on the play of competition in the post-war years and the efficacy of the political moves which each country

was in a position to take in furtherance of its trade. But there could be no doubt that the distribution of productive activity in cotton textiles and the markets therefor would be seriously altered. And given the fact that Lancashire was to share the cotton textile trade with others, certain other consequential changes could be reasonably looked forward to. The same could be said of the developments in Europe in regard to sugar and wheat. Producers, old and new, were certainly in for fluctuations of fortune. But nothing in post-war times could possibly alter the fact that new producers had come into the field of a wide range of important consumer's goods, that the new producers would not readily quit the field in favour of the old, that the anxiety of each country to maintain its new industries would lead to increased competition, to protective measures of various kinds, to dumping and then finally to that vast breakdown of the old economic system which the world chose to call the great depression. All these developments were in embryonic form in the changes which occurred during the last war. The re-distribution of productive activity was the major trend, so far as the last war was concerned.

It is worthwhile attempting to detect a similar trend in the developments that have so far occurred in the present war. We do not know how long the war may continue. Whether the war proves a long or a short one, two years are surely a short period for any trend to grow strong and perpetuate itself. But to the extent that the main features of war economy were foreseen well ahead of the war and that some of the belligerents had actually geared their economic machinery to war purposes, the present trends, whatever they may be, may be said to have originated earlier than the outbreak of war. The most powerful factor in the economic conditions of the present war period is the pressure towards substitutes; and, if, during the progress of the war the position of these substitutes is strengthened, we have reason to believe that the return to natural products will experience more or less the same kind of difficulties which the return to free trade experienced in the period after the last war.

Now, the average man has the same attitude to substitutes as the free trader had to the war industries of the last war. Both are, in a sense, equally unnatural. A protected industry was to the free traders of those days a monstrosity, a hot house plant which cannot survive exposure to the winds of post-war free trade. In the same way we can argue now: Why should Germany or any other country refuse to take natural raw material once the war is over and the commodities are made available to it on the same terms as to other nations? But we have no greater reason to be sure of our ground than the free-trader was during the last war. At that time, he ignored the fact that round these protected industries of the war period grew up a number of powerful interests, that the position of these industries was interlocked with that of other productive activities, that, though in the calculations of the free trader, the abandonment of these industries would cost less than their " artificial " maintenance, the abandonment raised social problems from which government and public alike would naturally shrink. I have an idea that the position of the ersatz industries, at any rate in the Continent of Europe, would not be dissimilar to the position of the protected industries in the last war.

In fact, my main purpose in to-day's gossip is to draw attention to the fact that these ersatz industries, artificial as they are, are being more closely woven into the web of more than one national economy in Europe. We were told some time ago that the war was no longer Hitler's war, but that German industrialists were up to the neck in it, that, little by little, they had got themselves completely involved in it and that they could no longer afford to be indifferent to its upshot. It is not difficult to imagine the process by which Hitler passed on his interest in victory to the industrialists. At the start of his career, Hitler was but a tool in the hands of the big industrialists. But he gradually wrought his emancipation with the aid of his personal following; and an ambitious man like Hitler must have gradually reversed the position. The Fascist re-organisation of German industry involved a degree of preparedness for war; and since war meant economic blockade and inaccessibility of raw materials, German industry could not complain against the enthusiasm for ersatz. But what deprives German industrialists of all choice in the matter of supporting Hitler and his war is the extent to which the reorganisation of plant, machinery and industrial structure as a whole for the purpose of ersatz production and ersatz utilisation has gone forward. German industry crosses the Rubicon the moment a return to old conditions becomes prohibitively costly. Only recently it was learned that the change over had gone so far that German industry had to swim or sink with ersatz.

The large place assigned to ersatz in one country cannot it is true constitute a major trend in world economy. But it must be remembered that economic life in the whole of the European Continent is dominated by the needs of Germany. In this war of life and death for her, Germany has to make the most of whatsoever is within her reach. The Democracies had client states in Europe; and they shaped their internal politics and their foreign policy. But Germany had client states more in an economic than in a political sense. Even before the outbreak of war, she had given more than one twist to the economy of her smaller neighbours. And now that war has thrown them into her hands, she might endeavour to make the twist more lasting.

Typical of these efforts and most far-reaching of them all is the attempt to draw France closely to herself in the economic more than in the political sphere. The story is told at length in the special article which the *Statesman* published on Monday last under arrangement with the London *Times*. Briefly Europe has been denied access to the rest of the world. It is ringed round by the British Navy. And French industry cannot resume work unless it consents to utilise German material, which is wholly or partly artificial. The price to be paid for the supply of such material for industry cannot be grudged. Its return in employment, in the revival of tolerable conditions of living cannot be overlooked. And it is no wonder that France which would not have considered other inducements is readily succumbing to this bait.

"Sign of Safety"

wherever you see it!

The sharp edges of Goodyear's famous All-Weather tread resist skidding in any direction.

Wherever you drive—on country road, mountain trail, or city street—you see this tyre imprint more often than that of any other tyre.

It's "the sign of safety"—the imprint left by Goodyear tyres—the imprint of the famous All-Weather tread with its sharp-edged, diamond shaped blocks.

Throughout the world, Goodyear tyres have earned their reputation for safety, for long, trouble-free mileage, and for outstanding value.

Whatever your requirements may be, there's a Goodyear tyre to satisfy your needs and to suit your purse!

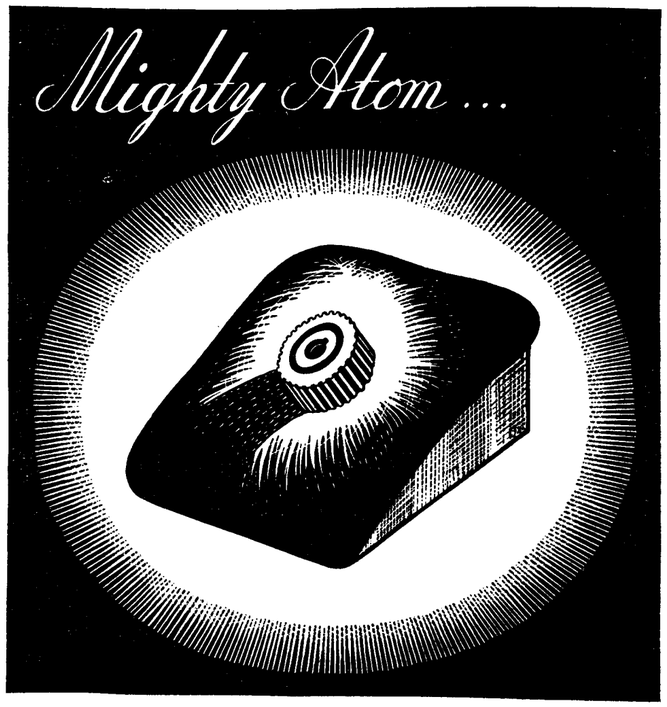
(From Our Correspondent)

Simla, August 6

EVEN political questions, have receded for the time being to the background owing to the growing seriousness of the new developments in the Far East. It was an interesting coincidence that at the time of these very moves, the Japanese thrust into Indo-China and the prompt retaliatory action taken by Britain and the United States—the first meeting of the newly constituted Defence Committee of the Central Legislature took place in Simla. It would appear that the new Commander-in-Chief, General Wavell, took the members of the Committee fully into his confidence and explained to them all the possible developments in the war situation and the measures that were being taken to safeguard India's defences. The proceedings of this two-day meeting of the Defence Committee are being kept confidential, but there is little doubt that the contact which the Commander-in-Chief has established with leading members of the Central Legislature will prove useful. It is expected that as soon as the Viceroy returns from his monsoon tour, he will summon the first meeting of the National Defence Council and have discussions with them on war problems. In the meantime the members of the Defence Committee will be taken round by Army authorities to visit certain important military centres in the country for inspecting the progress of Defence expansion. It is also likely that a number of Ruling Princes may be invited to visit the war areas and see the work of their troops in the field.



* * *

One result of the week's developments is the complete cessation of Indo-Japanese trade. Several representations are reported to have been made to the Government of India on the subject soliciting their immediate attention to certain aspects of their problem which has arisen. From South India has come a plea that as the Japanese market is now closed to them, arrangements should be made to get adequate supplies of dyestuffs from America or manufacture them locally to help both the handloom industry and the factories. It is stated that in one small centre alone in the Tinnevelly District, over 10,000 people will be thrown out of employment if owing to want of dyestuffs the work has to be closed down. In a statement Mr. Dewan Mehra, Secretary of the Textile Manufacturers Association in Amritsar, says that the industry in the Punjab has already been crippled owing to restriction in imports and the abnormal rise in prices caused by speculation. He says that about six big factories in Amritsar have been obliged to work on single shift from August 1, thereby throwing out of employment nearly 1,000 workers, and he fears that ultimately 50,000 workers would be affected. His suggestion is that the Government themselves should undertake the manufacture of these yarns—like mercerised cotton yarn, staple fibre yarn, woollen and artificial silk yarn, hitherto imported from Japan. It would appear that the whole problem arising from the present suspension of Indo-Japanese trade is being carefully examined by the Commerce Department.

* * *

A fairly difficult situation has arisen in connection with the Indo-Burma agreement. At the urgent request of the Viceroy, who is now in Madras, Sir G.S. Bajpai, the Overseas Member, has proceeded to Madras with his Joint Secretary. The all party meeting of protest which was recently held in Madras was in itself strong evidence of the intense public feeling on the subject. This was followed by an influential deputation to the Viceroy which presented him with a detailed memorandum. The official view still is that the Madras protest is based on misunderstanding and unjustified apprehensions. There seems to be a hope in official circles that after the discussions which Sir G. S. Bajpai proposes to have with the members of the Madras committee, the agreement will be understood in the proper perspective and judged in the right spirit as a compromise measure. As a matter of fact the Government of India does not appear to have anticipated this strong volume of protest from the south. The present trouble is partly due to the secretive attitude of the Government of India in the past. If the Baxter Commission's report had been published as soon as it was available, it would have enabled the public to study its recommendations in detail and offer its own views. Again, it was a mistake on the part of the Government of India to have refused to associate non-officials with the Bajpai delegation to Burma. Though Sir

(From Our Correspondent)

Bombay, August 6.

THE second quarterly meeting of the Indian Merchants Chamber held last week reflected the uneasiness of the business community. It will be recalled that delegates from the Chamber put searching questions to the Finance Member and extracted an assurance or rather announcement that India was not shouldering new burdens because Iraq was under the control of the C-in-C in India. That information was satisfactory and it is to the credit of the Indian Merchants Chamber that it ascertained early, how the land lay. The same critical spirit marked Mr. Ghia's speech on Wednesday last. The doubts about war aims, still unknown, showed that even more than the lack of any promise about India's political destiny, the business community feels depressed by the stale statement that victory is the one and only aim. In his review of political questions Mr. Ghia touched on the absence of any declaration such as is demanded by the Congress and Liberal parties and referred to the non-voluntary war effort in progress. Millions in this country without being given a right to choose for themselves, had been forced, said Mr. Ghai, to give men and resources to support a democratic government which had not given them democracy and which had put Pandit Jawaharlal Nehru in Jail. Mr. Ghia ranged himself with South Indian leaders against the Indo-Burma Immigration agreement and argued that it should not be ratified till the commercial community and the public expressed their views as to its effects on established rights, position and interests in Burma. A dissentient note was struck by Mr. Noble who declined to accept the President's views on the 'enforced' co-operation of millions in the war effort. Indians had been talking for nearly two years about their attitude to the war and could not put out a fortunate formula that would allow of cooperation with the Government in winning the war. Mr. Noble praised the Indian troops serving overseas and regretted that the Indian Chamber had not given any impetus to the furtherance of the war effort in India.

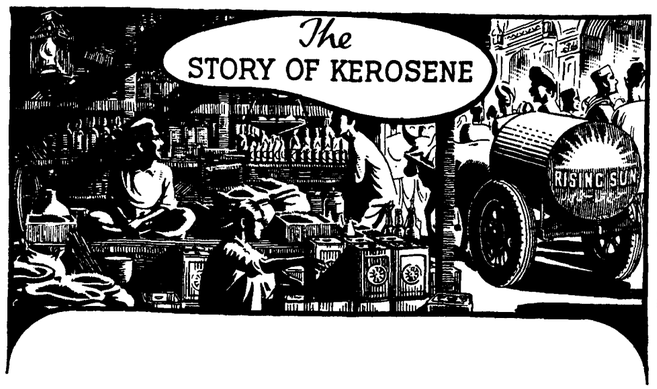
The acceptance of a post in the Executive Council by Sir H. P. Mody rendered changes in the Central Bank's directorate inevitable. It was announced last week that Mr. Haridas Madhavdas, a Director, has been appointed Chairman of the Central Bank of India. He will take charge in August. Another important change is the elevation of Mr. H. C. Captain to the Managing Directorship with effect from August 6. The changes were well received locally, and Mr. Captain's promotion, it is felt, is a well-merited tribute on the part of his colleagues to his skilled conduct of affairs in wartime. Mr. Captain was designated General Manager last year in order to indicate that his position with the Central Bank of India corresponded to that of the principal executive officers of the Big fiive in Britain and the formal accession to the Board shows that the best bank directors are to be found among serving and retired officials. Britiish practice has undoubtedly influenced the selection of Mr. Captain by his colleagues. It is evident that no new Director need be elected in place of Sir A. Hydari and the Banks' directorate suffers the mimimum disturbance. Mr Haridas Madhavdas is well-known in the cotton trade and has long been a member of the Board. He has been connected with the C. B. I. for about ten years. A past Vice-president of the East India Cotton Association, he has figured in the Indo-Japanese trade pact talks. As the senior partner of Amersey & Company and Madhavdas Amersey & Company, he is prominent in the list of cotton buyers and is also a director of many jointstock companies.

The meetings of lights railways this year have certainly been more interesting than other company meetings. In view of the State purchase of the Tapti Valley Railway Company, and the possible acquisition of the Ahmedabad-Prantej line with in a few years, the Chairman had to make detailed statements. A similar statement was made by Mr. Lowndes recently at the Guzerat Railway Company meeting. The most interesting disclosure was that the company had arranged to build a rail-car drawn by petrol at an approximate cost of Rs. 28,000 for operation on the Godhra—Lunawada section of the railway managed by the company. The new car will be different from the Diesel engined rail cars already employed by many railways because it will be got ready in India. The railcar will provide a faster and more frequent service in direct competition with motor traffic along the line. The net profit for the half year added to the sum brought down left Rs. 1, 82,610 for disposal. After declaring a dividend of 4¼ per cent and providing for taxation the Board had recommended the retention of Rs. 35,895 in the books as carry forward. Resolutions to this effect were adopted at the meeting over which Mr. Lowndes presided.

The boom in Cawnpore towards the end of July left Bombay with no option but to follow the rise. The gradual releases of quota by the Syndicate have hardly satisfied the buyers who have been snapping up sugar and sugar shares too to judge by the uniform rise. Sugar up to August delivery was in keen demand and prices of First Crystal in Cawnpore have crossed the Rs. 10 mark. Heavy forward buying has been reported and the domination of bulls has convinced dealers that sugar must keep rising. The brisk demand for imported sugar in Bombay reflected the pressure on home supplies. The prices of Java and African sugar has risen swiftly by Re.. 1 per cwt. The further rise attests the keener demand for reexport and bookings up to October have been reported. Sugar in bond fetched higher prices and dealers have been preparing to replace their sales by getting Deshi sugar. Buying for September delivery has been reported and only the release of a further quota caused a reaction after early firmness of prices. The tendency latterly is hardening and railway delay as also the deficiency of stocks are likely to push prices up again. The daily offtake is in excess of arrivals, and stocks estimated at 25,500 bags leave no room for doubt about the impending rise in the sugar market. There have been no warnings and communiques from the Director of Imformation for the Bombay Government has enough on its hands as regards maintaining a schedule of maximum prices for imported rice.

While other members have eagerly spoken about their aim to please every body by taking up jobs in the Executive Council. Sir H. P. Mody has spoken only once. The occasion was a dinner given by Mr. Dumasia of the **Times of India** who served on the Central Assembly along with Sir Homi and the speeches made by Sir Homi Mody and Sir Homi Mehta were pleasing without being informal: The new Supply Member spoke of the expansion of the Council without saying anything about his own desires. With an experience of 30 years of Indian politics, Sir Homi Mody said his own career was a matter of happy accidents. Not all in public life share Sir Homi's admiration of tolerance as an essential virtue and his argument that communal and other cleavages in India made tolerance essential will not win universal support. Yet his own tolerance makes his acceptance of office intelligible and Sir Homi Mody's own denial of the view of the expansion scheme as an instalment of appeasement shows that he knows what the major political parties are out for and the

Viceroy can only hope to convince a few that an Indian majority in the Executive Council is a boon. Sir Homi conceded that expansion was not without political importance because Indian opinion would have better means of expression and the opposition parties would be secretly pleased with this feature of improvement. Sir Homi Mody hoped that this modest advance would lead to the solution of the problem of Indian intransigence which faced the British Government. The new Supply Member described his object as the simple one of beating the enemy and making this country safe. The second object was described as one of advancing the country's interest though the country did not expect much out of the new Councillors. Admiration for Britain and her ways of life and thought was expressed by Sir Homi who emphasised that it was as much India's interest as it was her duty to help in defeating the enemy of civilisation.

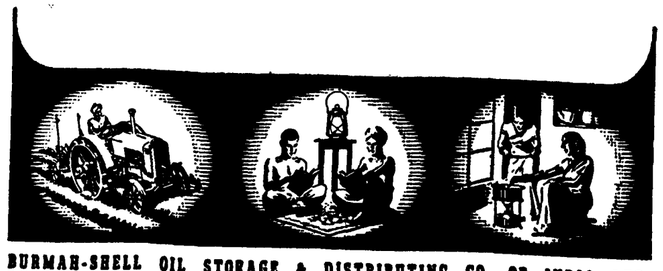


(Continued from Page 257)

The progress of ersatz, then, no longer depends wholly on German perversity. Once war has broken out, its necessities cause a certain course of events. Not only do Germany and her victims lack access to raw materials, but others have to be denied the same. The U.S.A., Britain and the Dutch East Indies have had to stop supply of oil to Japan. Why, even in our own country petrol rationing has given a fillip to producer gas. In South India, I hear buses as a rule run on charcoal gas; and the difference in costs being so large, I doubt if the buswallahs will take petrol if it is offered to them. The important thing to remember is that what is done under compulsion at one time may be done out of choice thereafter. The process of adaptation is universal. In spite of all that there is to be said against it, ersatz has come to stay, not because it will be preferred by itself, but because of the interlocking of ersatz with the structure of national economies.

What, then, will the future be like? I am not, of course, very enthusiastic about providing an answer. But I believe that I can set up certain lines of thought. To me, it is of the greatest importance that the necessity for ersatz is at the moment confined to Western Europe. The developments in India and the East to-day are more like the developments in Western Europe during the last war. We are setting up infant industries and we shall probably be rocking the cradle after the war is over. But so far as Western Europe is concerned, it is possible to view ersatz and the consequential changes as another step forward on the road from free-trade to self-sufficiency. Western Europe has to have a far greater degree of political and economic cohesion; and may be, we are witnessing the process to-day.

But outside Europe, there is little or no pressure towards ersatz. On the other hand, the pressure is towards an increasing consumption of raw material in industry. The U.S.A., the U.S.S.R., and the British Empire form vast stores of raw materials. While the U.S.A. may regret the loss of European markets, the other two can well proceed to reorganise their economic structure and trade relations so as to create higher levels of prosperity on a basis of self-sufficiency. If the last war helped war by a legacy of irritants both in the economic and in the political sphere, the present war may well serve peace by a loosening of economic bonds and a weakening of economic rivalries.



'EAVESDROPPER'

NO. 5. THE DEALER

To most of India's four hundred million people the strength or weakness of the monsoon is a matter of vital importance; many of the essentials of life depend upon it; the regular supply of Kerosene is however never in doubt.

The Burmah-Shell system of distributing Kerosene guarantees that supplies will always be available to everyone. If a village has even one shop, Burmah-Shell Kerosene will be on sale. The past decades have brought the confidence that—happen what may—regular and ample supplies of Kerosene will be available to every Indian, no matter whether he resides in the cities of India or in the most distant village.

Jute and Jute Manufactures

(From Our Correspondent)

Calcutta August 7,

With the July Mill Stock figures before them, the Mills Committee considered the question of working hours this week and, much to the relief of the Bazar, decided to let matters run as they are for the time being. That is, the general policy up to the end of the year is to be 45 hour working per week with no closed week. This decision in existing circumstances has all the appearance of deliberately playing into the hands of the Bazar speculators. For what do the stock figures show? Admittedly hessian stocks, after allowance for goods held on Government account, show a rise of 117 lakhs as a result of July shipments not totalling so much as was at one time expected. But the total stock of hessian cloth at 2,055 lakhs yards is scarcely more than a month's production, not much of a margin to have in hand in case of urgent requirements coming on the market. The most disquieting factor is that the stock of 8oz/40, the standard gambling counter of the Hessian Bazar, is reduced to 73 lakhs of yards, surely the lowest figure on record. This is a reduction of 26 lakhs since the previous month. At this rate of progress the stocks of 8oz/40 look like being completely wiped out in another 3 months. Is it any wonder that there are violent repercussions in the Fabrics market when any material overseas demand or Government enquiry or more generous freight allotments encourage the speculative element to resume operations? One may submit that the policy pursued by the Mills Committee has resulted in so contracted a stock position as to create almost ideal conditions for a corner and a squeeze if any bold gambler bethought himself to take advantage of the situation. Overseas buyers of ready hessians would be held to ransom for their requirements and the stigma of these "get-rich-quick" manipulations would be applied to the Calcutta Jute Industry indiscriminately, while in actual fact the Mills would be reaping little, if any benefit. It should be remembered that Calcutta's best customer by far for hessian goods is the U.S.A. who are helping the war effort generously in all the theatres of action under the Lease and Lend Bill. It therefore seems unfortunate that the Mills should be placed in such an equivocal position with such a reserve of production in hand as they have. Admittedly it is within the power of the Committee to increase that production on immediate notice, but as matters stand the position is so acute that the horse would be gone before the stable door could be shut. For the reluctance of the Committee to contemplate a longer, and therefore safer stock position indicates that only the actual materealisation of such a squeeze as we have visualised, would spur them into the necessary action. Fabrics prices, we insist, are already unduly high if a long view be taken for the ultimate welfare of the Industry, but that view seems to be obscured by the attraction of immediate profits.

To return to the stock figures, Sacking stocks are only fractionally higher by 32 lakhs yards and are actually lower in tonnage than a month ago. Here again the position for near at hand goods is so tight that prices are gradually being forced to ever higher levels.

The Select Committee of the Assembly dealt swiftly with the Raw Jute Taxation Bill and it is to be hoped that suitable safeguards havev been inserted to curb the limits which some Ministerial imagination might attribute to the ingenuously vague phrase "stabilisation of Jute prices."

In the Fabrics section demand for Hessians has been light due to a lack of overseas demand, which has undoubtedly been checked by the hgh level of prices ruling. Mills were not sellers except in the further forward positions and full rates had to be paid for any near requirements. In nine porters the only important transactions recorded were at Rs. 20 for ready and August and at Rs. 16-8 for April-June. Eleven porters accounted for rather more activity at Rs. 25-2 to Rs. 25-8 ready and August, at Rs. 24-8 October-March and at Rs. 20 April-June. The closing in hessians is quiet. Heavy Goods, particularly Twills, were in steady demand and constituted the greater part of the weeks business. "B" Twills sold at Rs. 39 to Rs. 40 August, at Rs. 38-8 Septr., and at Rs. 38-8 to Rs. 39 October-December. Cornsacks changed hands at Rs. 41 August, at Rs. 40 to Rs. 40-8 August-Septr., and at Rs. 39-8 Octr.-Decr. Liverpool Twills were recorded at Rs. 45-8 to Rs. 46 August, at Rs.44-4 Septr. and at Rs. 43 January-March. Other sales include Woolpacks at Rs.1-13 for August and October and Cuban Sugars at Rs. 53 Novr. It is to be remarked that while Hessian prices are barely maintained, Heavy Goods rates have registered a rise. Closing quotations are:—

9 porters August Rs. 19-12, Sept. Rs. 19, Oct.-Dec. Rs. 17-8 Jan.-March Rs. 16-8.
11 porters Aug. Rs. 24-14 Sept. Rs. 24-6, Oct.-Dec. Rs. 22-4 Jan.-March Rs. 20-4.
"B" Twills Aug. Rs. 39-8 Sept. Rs. 39-2, Oct.-Dec. Rs. 38-12 Jan-March Rs. 38-4.
Cornsacks Aug. Rs. 40-12 Sept. Rs. 40-10 Oct.-Dec. Rs. 39-12 Jan.-March Rs. 39
Liverpools Aug. Rs. 45-6 Sept. Rs. 45-2, Oct.-Dec. Rs. 44 Jan.-March Rs. 43
Heavy Cees Aug. Rs. 36-12 Sep. Rs. 36-12 Oct.-Dec. Rs. 36-12 Jan.-Mar. Rs. 36-12.

THE MISRA HOSIERY MILLS have, from the commencement of the war, been "on active service." Working day and night, the mills have been supplying essential requirements of the Army in the knitting line.

MISRA HOSIERY cater to the requirements of the general population and comprise socks, stockings, undervests, sports shirts, interlock underwear and outerwear, for men, women and children.

Production 8,000 Articles, daily.

JUTE

Calcutta, August 7.

RATHER steady conditions have been noticeable in the raw jute market during the past week. The tendency towards the close has been sligatly easier. Mills have not been interested buyers and there is some apprehension regarding the possibility of an appreciable drop in the exports of jute and jute manufactures in the event of fresh complications in the Far Eastern situation. While it is difficult to take a hopeful view of the situation in the Pacific, the latest reports indicate that the tension in Thailand has eased slightly. So long as the uncertainty in the Far East continues, it is useless to expect for an early improvement in prices. The decision by the Indian Jute Mills Association to work mills 45 hours per week throughout the month has, therefore, not had any effect on the market.

In the loose jute section, there has not been much business passing. Sellers were at one time anxious for business but towards the close they are more reserved. Mills are buying only sparingly. New crop, supervised Top and Middle were done at Rs. 13 and 11 per maund respectively. Earlier in the week, Indian Tops, Middles and Bottoms were done at Rs. 12, Rs. 10, and Rs. 8 respectively.

In the pucca bales section, shippers and balers have not been active. Export demand has been very poor. Some business was done with mills in Firsts and Lightnings at Rs. 51 and Rs. 41 per bale respectively.

After the earlier firmness, the futures market has been easier and the close is below the best levels for the week. From Rs. 60 there was a rise in the quotation to Rs. 64/2. The easier tone of the hessian market has been responsible for the quiet close. Markets are closed today on account of the death of Dr. Tagore. The quotation in the morning was Rs. 62/2.

JUTE MANUFACTURES

Calcutta, August 7.

With the continued fears regarding the Far Eastern situation, the jute manufactures market has moved downward in the absence of buyers. There is, however, some resistance to selling pressure and the close has been steady at the lower levels. It is generally believed that unless there is a definite worsening in the situation, there will not be any appreciable drop in prices as most of the stocks are held by the bazar and it is expected that there will be a sudden increase in shipments if there are no adverse developments.

The Indian Jute Mills Association has decided that mills should work 45 hours per week during September throughout the month.

9 porters ready were Rs. 19/12, September Rs. 19/2, October-December Rs. 17/12, and January-March Rs. 16/12. Earlier in the week, 9 porters ready were quoting Rs. 20/12.

In the heavy goods section, firmer conditions were noticeable in mid-week. An easier tendency is noticeable towards the close. B twills sold on the basis of Rs. 39/6, Liverpool twills Rs. 39/6, and Cornsacks Rs. 40/8.

Total reported stocks of manufactured goods as at

	30th June Yds.	Tons.
Hessian Cloth & Bags*	26,69,34,155	66,797
Less sandbags on Government Account	7,31,02,963	
	19,38,31,192	
Sacking Cloth & Bags ..	17,67,79,366	78,313
	31st July Yds.	Tons.
Hessian Cloth & Bags*	28,15,57,967	69,715
Less sandbags on Government Account	7,59,95,380	
	20,55,62,587	
Sacking Cloth & Bags	17,99,11,935	76,166

These figures include the returns of Gagalbhai in addition to those of members. The returns of Maheswari Devi and Katihar have not been received and are excluded.

*Out of the total July hessian stock 73,10,782 yds. weighing 1,633 tons represent 8 oz. 40" cloth. The corresponding figures for June were 99,12,685 yds. weighing 2,204 tons.

COTTON

Calcutta, August 7.

The Bombay raw cotton market has been slightly better during the past week. The easier Far Eastern situation has led to some speculative buying which has resulted in a slight increase in prices alround. The outlook, however, is considered to be gloomy so far as the short staple varieties are concerned. For, even if there are no fresh complications in the war situation in the near future fresh trade with Japan will be considerably restricted on account of the freezing order and the freight problem seems to be even more difficult. That is the reason why there has not been any appreciable improvement in Oomra prices inspite of the reports regarding unfavourable weather conditions in the cotton growing tracts. Broach April-May closed at Rs. 270/4, July-August at Rs. 234, Oomra December-January at Rs. 203 and Bengal December-January at Rs. 153/4

The strength of the New York market cannot be of any help to Bombay as straddle operations cannot be conducted freely in the absence of exchange facilities.

The New York market has been rather quiet during the past week and prices have been fluctuating within narrow limits. The reports regarling price control have gained strength. It is, however, believed that only the prices of cotton manufactures will be curtailed and there will be greater lattitude for a rise in cotton prices. The quotation for October was 16.68 cents and December 16.87 cents. Earlier in the week a definitely easier tendency was noticeable.

LEADERSHIP THROUGH QUALITY

Now successfully made from Bamboo Pulp with such exquisite finish and strength, the quality of Rhino Kraft is widely acknowledged as the best.

PIECEGOODS

Calcutta, August 7.

It should be remembered that there was a sharp jump in both piecegoods and yarn prices as soon as the order regarding the freezing of Japanese assets in India was announced. In spite of the slump in the raw cotton market there was a scramble for buying and holders were inclined to keep back for better prices. There was a regular boom in the yarn market and as it was generally believed that there would be a scarcity of indigenous goods there was good consumer buying. The easier situation in the Far East, however, has had a sobering influence and speculators have been inclined to cash their profits. There cannot be any appreciable decline in values as with mills busy on war orders, and the possibility of a sharp decline in Japanese imports on account of import restrictions and the freezing order it would be impossible to meet the entire Indian demand.

GOLD

Calcutta, August 7.

The Bombay gold market has been rather irregular and the small gains have been lost towards the close. It would be remembered that last week there was a setback in prices on reports regarding the possibility of U. S. intervention in the Eastern conflict. As the situation improved, arbitrageurs entered the market and the quotation for gold ready improved to Rs. 42/3. The close has been quiet at Rs. 42/1/6 for ready; Rs. 42/2 Second settlement.

The London price for gold has remained unchanged at 168S.

SILVER

Calcutta, August 7.

The Bombay silver market has been uninteresting during the period under review. Very little business has been passing. As demand has been satisfied, prices have been fluctuating and in very narrow limits. Indian Mint silver Ready and First Settlement Rs. 62/13, and Second Settlement Rs. 62/14/6.

The London market has been quietly steady. There was some demand earlier in the week and the quotation improved to 23½d. As producers' selling was enough to satisfy demand there was no need for the Government of India to come out as a seller. The quotation towards the close is slightly lower at 23 7/16d., both for spot and forward.

WHEAT

Calcutta, August 7.

The easier tone in the Karachi wheat market has given place to a definitely firmer tone this week and the ground lost has been completely recovered. The weakness of the wheat markets earlier in the week was due to the favourable weather conditions in the wheat growing districts and the weakness of the cotton market. Choice White ready closed at Rs. 34/5/6, September at Rs. 34/10/6. and November at Rs. 35/10. There has been good consumer buying during the past few days.

The local market has been steadier in sympathy with the Karachi market and the seeds markets. Cawnpore and Punjab ready were Rs. 4/15/6 and September Rs. 5/2.

(Continued from page 258)

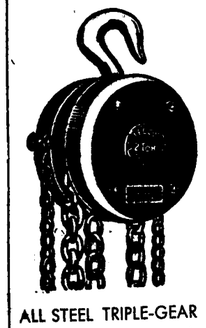
Girija Shanker kept in touch with a representative Indian committee in Rangoon, the presence of one or two leading Indian non-officials would have been of great value.

* * *

No prospect of any substantial change in the terms of the agreement in the near future is possible according to informed quarters here. The extreme demands originally put forward by the Burma Ministry in the course of the negotiations have shown that the latter's attitude towards the Indian community in Burma is unfortunate in many ways. If the Burma Ministry refuses further to climb down and allow modifications in the agreement, the only alternative is to prepare for a complete breach in the relations between India and Burma, as has already happened in the case of Ceylon, and leave the Government of Burma free to go forward with their anti-Indian measures. In the view of official circles here this would prove more harmful to the interests of the Indian community than any restriction in the agreement. In view of the present situation in the Far East it is futile to expect that the Secretary of State or even the Governor of Burma, whatever his statutory obligations may be, would come to India's aid in this matter against the Burma Ministry and precipitate a political crisis on the Indian issue alone. So it is argued that though the present agreement contains many vexatious restrictions and introduces for the first time a passport system, the better procedure would be to see that the terms of the agreement are properly worked in a genuine spirit of goodwill and utilise the earliest opportunity to lessen the scale of passport charges and remove the rigour of certain other restrictions to which objection has been taken.

* * *

It is understood that, partly owing to these complications in connection with the Indo-Burma agreement and partly owing to the postponement of the Indo-Ceylon talks, Sir Shanker will not be able to proceed to America before October. No clear indications are yet available regarding the present attitude of the Ceylon Ministers. Though it is presumed from their invitation to the Government of India that they are anxious to find a mutually satisfactory basis, there has been no public evodence of any radical change in their views. As Sir Girja Shanker has already had to meet Ministers, he is not likely to be over obliging dealing with the Ceylon Ministers. It has been suggested that he should take one or two Indian non-officials as members of his delegation to Ceylon, but it is by no means easy to break down the old conventions of the Government of India.



* * *

As generally anticipated the patrol rationing scheme comes into force next week. The main object is to create a substantial oil reserve as a necessary safeguard against any possible future contingency. It is admitted that present supplies are adequate to meet the country's normal needs, but as one cannot say what possible situation may arise in the near future, as a result of greater war needs, interruption in communications or anything of the kind, the need not only for building up strong reserves but also for enforcing economy in public use is being stressed. Very careful note is being made of the objections voiced against the scheme, but the official attitude at present is to watch and see how the scheme actually works and make such improvements later as are found necessary from experience. In the meantime, the importance of the manufacture of power alcohol from molasses etc. is receiving great attention.

* * *

As the offices of the Government of India intend to move down to New Delhi a few days earlier than last year, an earlier date has also been fixed for the autumn session of the Central Legislature. The Central Assembly will commence its session in the last week of October and have about fourteen sittings. There is apparently no intention to bring forward any Supplementary Finance Bill, for, in the first place, the Finance Member is not faced with any serious dislocation in the revenue position to necessitate any interim proposals, and, in the second place it is considered that the new Cabinet, which is not expected to be in its full strength before the middle of October, should review the financial position. No controversial measure is likely to be introduced during the coming session but as there are already a number of amending Bills waiting to be introduced, the work will be fairly heavy.

For 22 years every one of the winning cars in the 500-mile track-race at Indianapolis (U.S.A.) has been fitted with Firestone Tyres. The winning average rose from 88 m. p. h. in 1920 to 117 m. p. h. in 1938, with even greater safety for the man behind the wheel. Champion race-drivers take no more risks than they must. Their demand for safety at rising speeds has developed such devices as 4-wheel brakes, driving mirrors, safety glass, streamlining, light-weight pistons, and

SWIFT RISE IN INDUSTRIALS

THERE has almost been an unbroken rise in share values since the beginning of the Russo-German war and the increasing volume of business in several sections bears testimony to the returning confidence in the several markets. The *Indian Finance* Daily Index for all-shares is now at the highest level for the recovery period at 124.64. This consistent improvement in prices has led to the general impression that there will be a boom in values following the advance in prices and that the longer the war lasts the better the outlook for Indian industries. On this account the gains have been most pronounced in the case of shares of companies in new industries. Thus, chemical shares, paper shares and electrical equipment shares have received a greater amount of attention. The jump in *Indian Cable* from Rs. 24-4 to Rs. 30-2 is mainly due to the reports regarding the increasing output and hopes of a higher dividend than anticipated.

The crop of good reports due to be published during the next one or two months should have a stimulating effect. There is already considerable speculation regarding the dividend of *Burn & Co.*, for 1940/41 and the shares are in strong request at Rs. 412. It is believed that the final dividend of the *Indian Iron and Steel Company, Limited* for the year ended March, 1941 will be announced at an early date, while the report of the *Steel Corporation of Bengal* showing the earnings figures for the first year of full working should prove an agreeable surprise to market circles.

Taking all factors into consideration it can thus be safely said that markets are well set for a further rise. The only snag is the fear of Japanese entry into war which may bring the world-wide conflict nearer our shores. In this respect, however, we have a reassuring statement from the British authorities that the war will not come near enough to our shores.

* * *

The improved conditions in the Jute industry have been fully reflected in the earnings of the *Kamarhatty* and *Kankinarrah* companies for the half-year ended June, 1941 though the earnings figures of the two companies in the Andrew Yule group for the same period cannot be viewed as quite satisfactory. The increased provision for taxation, however, has deprived the shareholders of any share in the increased earnings in the case of the companies in the Jardine Skinner group. While the ordinary dividends have been maintained at the previous levels in the case of others the *New Central Jute Mills Company, Limited* has increased the ordinary distribution from Rs. 8 to Rs. 10 per share.

But for the uncertainty about the situation in the Pacific and the difficulties regarding freight it would be possible to take a more optimistic view. For, the Jute industry will be hard hit in the event of a disturbance in the shipping position in the East. Fortunately, the latest reports indicate that the tension has eased considerably and a clash can yet be averted. The strength of jute shares is perhaps due to revival of hopes in this regard.

* * *

The decision of the Indian Jute Mills Association to work mills 45 hours per week during September without the "closed week" has been taken after taking into consideration the fact that shipments for July had not increased according to expectations and that stocks have increased. It is, however, hopeful to note that the position will be re-examined at the end of the current month, and if the shipping position warrants, the Committee will declare that mills shall go on to work such longer hours as may be decided but for a period of not less than two months.

The net profit of the *Kankinarrah Company, Limited* for the six months ended June, 1941 is Rs. 8,84,019 against Rs. 5,76,286. Out of this amount Rs. 3,69,961 is provided for taxation against Rs. 1,85,937 previously. The allocation to Taxation Reserve also is higher at Rs. 1 lakh against Rs. 50,000. The dividend on the ordinary shares has been maintained at Rs. 12-8 per share.

The *Kamarhatty Company, Limited* for the same period reports a net profit of Rs. 8,80,974 against Rs. 5,86,398 for the previous half-year. The provision for taxation is Rs. 3,46,041 against Rs. 1,94,326. The ordinary dividend has been maintained at Rs. 15 per share.

The *New Central Jute Mills Company, Limited* has been able to earn a net profit, before providing for taxation, of Rs. 3,83,498 (Rs. 3,08,466). After providing Rs. 1,54,447 (Rs. 1,25,000) for taxation the ordinary dividend recommended is higher at Rs. 10 per share against Rs. 8 per share on the former occasion.

* * *

The progress of the *Britannia Biscuit Company, Limited* during the past few years cannot be properly measured by the return to shareholders. The policy of expansion adopted by the directors in recent years has been very helpful to the company and at the present moment sales are nearly double in value than in 1937. But for the abnormal rise in the value of raw materials it would have been possible for the company to earn higher profits and distribute a larger sum to shareholders.

The increase in sales from Rs. 10,65,366 to Rs. 12,49,564 in the half-year ended March, 1941 has resulted in an increase in the net profit to Rs. 1,02,192 from Rs. 59,683 for the previous half-year. After providing for taxation Rs. 37,783 against Rs. 24,584 and Rs. 51,650 (nil) to Contingent Reserve the ordinary dividend is 2½ per cent (nil).

The allocation to Contingency Reserve is due to the need for funds for effecting further extensions to the Company's factory in Calcutta. Substantial contracts have been received from Government and all plants at both the Calcutta and Bombay factories will be fully occupied during the current half-year.

* * *

Two tea companies under the management of Messrs. Peirce, Leslie & Co., Ltd. have done very well during the year ended March, 1941 and the earnings of both the companies are at the highest level for sometime.

Periakaramalai Tea and Produce Company Limited has earned a net profit, before providing for taxation and depreciation, of Rs. 3,53,553 against Rs. 3,20,064. The sum of Rs. 47,571 is charged to depreciation against Rs. 43,221 while Rs. 60,000 against Rs. 35,000 is provided for taxation. There is an allocation of Rs. 10,000 to Staff Pension Fund in addition. The final dividend of 7½ per cent, recommended, with the interim dividends of 10 per cent already paid makes 17½ per cent for the whole year. The shares presently quoting Rs. 18-14 cum dividend afford a return of 7.3 per cent which should be considered very satisfactory.

Vellamalai Tea Company Limited, a sister company, has done very well during the last three years. The net profit before providing for taxation and depreciation is Rs. 1,40,269 (Rs. 1,15,994), the provision on account of taxation being Rs. 16,000 (Rs. 12,000) and depreciation Rs. 18,335 (Rs. 17,903). The sum of Rs. 5,000 is transferred to Staff Pension Fund. The dividend is higher at 6 per cent against 5 per cent. The shares quoting around par (Rs. 15-4 c.d.) have good possibilities.

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, August 8.

THE week under review is short of two working days, markets being closed yesterday on account of 'Rakhi Poornima' and to-day in respect of the memory of Dr. Rabindranath Tagore. During the short period, however, a steady tone has been noticeable in the several sections of the Calcutta Stock Exchange and a larger amount of business has been recorded. The general sentiment is inclined to be hopeful and it is expected that if there are no fresh complications in the Far Eastern situation there will be a further improvement in values especially as the outlook for the several industries is considered very satisfactory at the moment. The important features of the week are the rises in Calcutta Tramways and Indian Cables to Rs. 18-8 and Rs. 28-15 respectively from Rs. 15-5 and Rs. 25-15 respectively at the end of last week. The results of the Burn & Co., for the year ended April 1941 are eagerly awaited and it is confidently expected that a higher dividend will be declared.

The giltedged securities section has continued firm and quotations, where changed, are in sellers favour. With the continuance of easy money conditions and the rumours regarding the possibility of a new loan the strength of the giltedged market should continue to be in evidence. 3½ per cent Paper is steady at Rs. 96 and 3 per cent Paper at Rs. 82-5. Among terminable loans, 3 per cent 1963/65 were Rs. 95-2, 3 per cent Defence Bonds Rs. 101-11, 2¾ per cent 1948/52 Rs. 97-11, 3½ per cent 1947-50 Rs. 103-5, 4 per cent 1943 Rs. 104, 5 per cent 1945/55 Rs. 111-8 and 4½ per cent 1955/60 Rs. 113-12. Among provincial loans, 3 per cent Madras 1952 were done at Rs. 99-10 and 5 per cent U. P. 1944 Rs. 106-12. During the last two weeks there has been a sharp decline in the average discount on treasury bills to nine annas and nine pies per cent per annum from thirteen annas and three pies per cent per annum two weeks back. Money is unlendable.

Among public bodies' debentures, 3½ per cent *Rangoon Municipal* debentures were done at Rs. 100-8, 4 per cent *Calcutta Port Trust* 1951 at Rs. 97-12 and 6 per cent *Calcutta Port Trust* 1925 at Rs. 120. Business continues to be restricted owing to the absence of sellers. Among industrial debentures, 4½ per cent *Associated Hotels* were dealt in Rs. 100-8.

A smaller volume of business has been passing in preference shares but quotations have been well maintained. First class jute mills preference shares continue to be in good request, *Agarpara* being done at Rs. 159, *Alliance* at Rs. 178-8, *Bally* at Rs. 167-8, *Birla* at Rs. 134, *Chitavalsah* at Rs. 146, *Hastings* at Rs. 141, *Hukumchand* at Rs. 145, *New Central* at Rs. 179, and *Soorah* at Rs. 140. The rise in *Soorah* to Rs. 140 is significant. Among other sections, *Steel Corporation* were higher at Rs. 122 while *Indian Standard Wagon* were Rs. 159, *Alkali and Chemical* Rs. 122, *Dunlop Rubber* Second preferences Rs. 122 and *Humayan Properties* Rs. 10-12.

There has been very little doing in railway shares, the only transaction recorded during the week being in *Arrah Sasaram* at Rs 69.

Cotton shares have not been quite active though the high levels registered at the end of last week have been maintained. *Bowreah* were Rs. 302, *Cawnpore Textiles* Rs. 8-14, *Muir Mills* Rs. 319, *Elgin Mills* Rs. 25-2 and *New Victoria* Rs. 3-15.

Jute shares have been more active and a greater volume of business has been passing at higher rates. The decision of the Indian Jute Mills Association has had a rather encouraging effect on the market. Mills are to work 45 hours per week throughout the month of September and there will be no closed week. The position will, however, be re-examined before the end of the current month and if the shipping position warrants it, the Committee will declare that mills shall go on to such longer hours as may be decided but for a period of not less than two months. The Committee also wish it to be known that unless any extraordinary circumstances arise, it may be generally taken that the working hours will not less than 45 per week from now until the end of 1941. *Adamjee* are quoting Rs. 26-14, *Agarpara* Rs. 30 ex-dividend, *Anglo-India* Rs. 354, *Bally* Rs. 240, *Birla* Rs. 26-12, *Clive* Rs. 27, *Howrah* Rs. 56-4, *Hukumchand* Rs. 12-4, *Kamarhatty* Rs. 525, *Kankinarrah* Rs. 422, *National* Rs. 24-4, *Reliance* Rs. 58-14 and *Waverley* Rs. 3-9.

In the Engineering section, *Braithwaite & Co.* are higher at Rs. 10-5. *Britannia Engineering* have been in good request at Rs. 11-8. *Burn & Co.* have been in good request in anticipation of a higher dividend at Rs. 414. *Indian Iron* are higher at Rs. 32-2. *Indian Malleable Castings* deferreds have changed hands in good numbers at Rs. 2-14. *Indian Stadard Wagon* were Rs. 69, *Kumardhubi Engineering* Rs. 5-13 and *National Iron and Steel* Rs. 9-5. *Steel Corporation* were steady at Rs. 20.

Among utilities, *Agra Electric* changed hands at Rs. 142 and *Benares Electric* at Rs. 15-3.

Sugar shares have continued in favour. *Balrampore* have been bought upto Rs. 10-3, *Champarun* to Rs. 16-10, *New Savan* to Rs. 10-8, *Purtabpore* to Rs. 11 and *Ramnugger Cane & Sugar* to Rs. 10-2.

The increase in the export quota for the current season from 95 per cent to 100 per cent has led to increased buying of tea shares. *Banarhat* were Rs. 437-8, *Dauracherra* Rs. 13, *Hasimara* Rs. 46-6, *Sapoi* Rs. 12 and *Sarugaon* Rs. 10-8.

In the miscellaneous section, *Burma Corporation* and *Indian Copper Corporation* have been rather sticky with the quotations at Rs. 4-6 and Rs. 2-2 respectively. *B. I. Corporation* were steady at Rs. 4-13 and *Balmer Lawrie* at Rs. 329, *British Ceylon Corporation* were higher at Rs. 4-14. *Calcutta Trams* were Rs. 18-1, *Dunlop Rubber* Rs. 41-8 and *Indian Wood Products* Rs. 27-12. *Indian Cable* have recorded a sudden rise from Rs. 24 to Rs. 30. There has been some profit-taking and the quotation is slightly higher at Rs. 28-8. The sudden rise in the quotation is due to the reports regarding satisfactory working of the company and the hopes of a substantial dividend for the year ended March, 1941. *Indian Rubber Manufacturers* were Rs. 30-2, *Dunlop Rubber* Rs. 41-8 and *Publicity Society* Rs. 8. Paper shares have been firm with *India Paper Pulp* at Rs. 153-8, *Mysore Paper* at Rs. 17, *Shree Gopal Paper* at Rs. 13-2, *Orient Paper* at Rs. 14-3 and *Titaghur Paper* 'A' and 'B' ordinaries at Rs. 19-8. *Alkali and Chemical* were Rs. 19-6, *Dalmia Cement* Rs. 13-4 and *Assam Saw Mills* Rs. 4-2.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, August 8.

Money: The rate for call money continued to be quoted at ¼ per cent.

Securities: There was little or no change in giltedged values during the week and the market maintained a steady tone throughout. 3½ per cent Paper was done at Rs. 96, while 1948/52 Loan changed hands at Rs. 97-12; 1951/54 at Rs. 99-13; 1963/65 at Rs. 95-1; 1947/50 at Rs. 103-1; 1960/70 at Rs. 110-4; 1955/60 at Rs. 113-8; 1945/55 at Rs. 111-7 and 1946 *Defence Bonds* at Rs. 101-13.

Shares: The local share market opened steady on Monday and prices began to advance on all-round buying in the absence of any major developments on the war front. Higher levels were touched on Tuesday, but profit-taking marred further progress, and the market assumed a somewhat quiet tone, following the rumours of the possibility of price control of manufactured goods, especially, textiles. The closing levels were, however, the highest for the week. The market remained closed on Wednesday and Thursday owing to Bank holidays. The market is also closed to-day owing to Rabindranath Tagore's death. Mill shares were again in favour. Steel shares also were marked up in the absence of selling pressure.

Textiles: Owing to encouraging advices from cloth and yarn markets, mill shares met with good support during the week. *Bombay Dyeing* closed higher at Rs. 1,222-8 as against Rs. 1,176-4 in the previous week; *Central India* at Rs. 374 against Rs. 367; *Century* at Rs. 499-8 against 490; *Colaba* at Rs. 208 against Rs. 202; *Gokak* at Rs. 245 and *Svadeshi* at Rs. 364 against Rs. 350. *Kohinoor* were, however, slightly lower at Rs. 477-8 against Rs. 480. In the Cash list, *Ahmedabad Advance* were done at Rs. 340; *Vishnu* at Rs. 1,337-8 and *Sholapoor* at Rs. 3,250.

Hydro-electrics: This section met with good investment support and prices have shown a good rise. *Andhra Valley* improved to Rs. 1,730 from Rs. 1,675; *Tata Power* to Rs. 1,715 from Rs. 1,655 and *Tata Hydro* to Rs. 189 from Rs. 182--4.

Steels: Steel shares met with continued demand, *Tata* ordinaries opening at Rs. 400 and deferreds at Rs. 2,132-8. Towards the close of dealings on Tuesday the shares met with strong support, the ordinaries closing higher at Rs. 405 and deferreds at Rs. 2,153-12.

Banks & Insurance: Bank shares were steady, *Bank of India* being done at Rs. 142-8; *Central Bank* at Rs. 48-8; *Imperial Bank* fully paids at Rs. 1,567-8; contributories at Rs. 381-4 and *Reserve Bank* at Rs. 106.

In the Insurance section, *New India* were done at Rs. 46-12.

Miscellaneous: *Wimco* shares were an active counter during the week owing to reports that the retail price of matches has been put up 33 per cent. Owing to the tremendous rise in the cost of potassium chlorate as the stock of this article is meagre, the future is not very bright for the company though the company might be able to make good profits on the matches manufactured with the existing stocks. *Associated Cement* were marked up further to Rs. 154 from Rs. 149-8 and *Scindia Steam* to Rs. 22-10 from Rs. 21-7. *Tata Oil* met with good enquiry at Rs. 35-8 following the rumours that this company has put up the sale prices of its products. *Belapur Sugar* were higher at Rs. 235-8; *Premier Construction* at Rs. 104-8 and *Shivrajpur Syndicate* at Rs. 33-12. *Tata Chemicals* were steady at Rs. 14-12. *Indian Iron* came to business at Rs. 32-2 and *Steel Corporation* at Rs. 20-2.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, August 8.

The local market was fairly active during the week under report. Cotton mill shares continued to meet with good demand. Planting issues also secured good support.

Securities: Price movements in the securities market continued to be on a narrow scale, 3½ per cent Paper closing at Rs. 96. 3 per cent 1963/65 were done at Rs. 95-7; 4 per cent 1960/70 at Rs. 110-7 and 5 per cent 1945/55 at Rs. 111-5.

Mills: Mill shares continued to be in active demand. *Buckingham & Carnatic* closed at Rs. 281. *Vasanta* were the most prominent at Rs. 136. *Madura* were slightly higher at Rs. 45; *Coimbatore* at Rs. 121-8 and *Sitaram* at Rs. 70. Among Bombay shares, *Bombay Dyeing* came to business at Rs. 1,203-8 (Aug.); *E. D. Sassoon Limited* Rs. 2-8 and *Gokak* at Rs. 231-8

Utilities: *South Madras Electric* ordinaries were a steady market at Rs. 13-8. *Ellore Electric* met with business at Rs. 6-10 and *Nellore Power* at Rs. 6-8.

Sugars: *Mysore Sugar* were unchanged at Rs. 54, while *Deccan Sugar* big shares had buyers at Rs. 212 and small shares at Rs. 50-12. *Murree Brewery* were crossed at Rs. 15-4.

Miscellaneous: *Mysore Chemicals* were a firm feature at Rs. 18-8. *Mysore Paper* met with improved buying and the price was marked up at Rs. 17-6. *Andhra Cement* were placed at Rs. 91 and *Amrutanjan* Preferences at Rs. 96. *Tata Chemicals* met with business at Rs. 15. *Orient Paper* came in for transactions at Rs. 13-8 x.d.; *Howrah* at Rs. 56-8 and *Bararee Coke* at Rs. 27. *Indian Steel Rolling Mills* ordinaries were steady at Rs. 7-9 and *Brunton Engineering* were slightly higher at Rs. 10-10.

LONDON STOCK EXCHANGE

The conclusion of the Russo-Polish Agreement and the more hopeful view taken regarding the war situation have been responsible for the active tone of the London Stock Exchange during the past week. The reports regarding the possibility of a new government loan also have had an encouraging influence on the market. Industrials have been in good request, Oils especially being in good favour. Among India loans, 3½ per cent Sterling Paper were 98¾. Among British Funds, 2½ per cent Consols were 81½, 3½ per cent. Conversion 106⅝, 3½ per cent. War Loan 105⅛ and 3 per cent. War Loan 101⅜.

Among other sections, Tea issues are easier in spite of the announcement of the increase in the export quota while Rubber issues have remained steady. Minings have been very well supported with East Rand Proprietories and Spring Mines marked higher. The easing of the tension in the Far East has resulted in an appreciable rise in *Burmah Oil* to 56s. 10½d. Home Rails have been irregular.

KAMARHATTY COMPANY, LIMITED.

NOTICE.

NOTICE is hereby given that the One Hundred and Twenty-seventh Ordinary General Meeting of Shareholders will be held at the Registered Office of the Company, No. 4, Clive Row, Calcutta, at 12-5 P.M. on Friday, 29th August, 1941, for the following purposes:—

Ramnugger Cane & Sugar:—(31st) 918, 9-12; (1st) 9-6, 9-8, 9-12, 10-2, 11; (4th) 9-6, 9-10, 9.12, 10-1; (6th) 10-3, 10-2.
Raza:—(31st) 18-8, 18-12; (2nd) 19, 19-4, 19-1, 19-5; (4th) 18-15, 19, 19-4; (5th) 18.13, 19-2.
Ryam:—(31st) 20-8 C.T.
Samastipore:—(31st) 9-3, 9-7, 9-2; (1st) 9-4, 9-5, 9-6, 9-7, 9-8, 9-12, 9-13, 10.2, 9-11; (2nd) 9-10, 9-14; (4th) 9-15, 9.11; (5th) 9-10, 10, 9-9, 9-11; (6th) 9-5, 9-6, 9.7.

ENGINEERINGS :

Arthur Butler (ordy.):—(1st) 11-12.
Arthur Butler (Pref.):—(6th) 14-4.
Braithwaite:—(5th) 9-8, 9.12, 9-14; (6th) 9-9, 9-13, 9-10, 9-15, 10-4, 10-1, 10-5.
Britannia Building and Iron:—(31st) 9.8, 9-12, 9-13, 9-10; (1st) 9-10, 9-15; (2nd) 10-4; (5th) 10-3, 10-5, 10.9, 10-6, 10-10 10-4; (6th) 10-4.
Britannia Engineering:—(31st) 10-10, 10-14; (2nd) 10-12, 11, 11-7, 11-8, 11-12; (4th) 11-8, 11.9, 11-13, 11-10, 11-14; (5th) 11-8, 11-12, 11-10, 11-14; (6th) 11-8.
British India Electrical Construction:—(6th) 8-6.
Burn & Co.:—(31st) 408 (410 s.l.) 409, 411.8, 407, 414, 412, 413; (1st) 410, 412-8, 413; (2nd) 410, 412, s.ls.; (4th) 413, 416, 418, 419, (420 s.l.); (5th) 418, 419, 420; (6th) 417-8, 420, 414.
Hukumchand Steel:—(31st) 14-1, 14-2, 14-5, 14-6, 14-7; (1st) 14-6, 13-14 (14.2 s.l.); (4th) 13-14, 13-15, 13-14; (5th) 14, 14-2, 14-6, 14.4; (6th) 14-6, 14-4.
Indian Galvanizing:—(31st) 29, 28-14 (30 s.o.l.); (5th) 29-2.
Indian Iron & Steel:—(31st) 31-8, (31-15 s.l.) 31-10, 31-14, 32-4, 32-3; (1st) 32, 31.15, 32-1, 31-15; (2nd) 32-1, 32-2, 32-6, 32-3, 32.7, (32-8 32-12 s.o.l.) 32-2; (4th) 32-2, 32-6, 31.15, 32-5, 32-13 s.l., 32-1, 32-2; (5th) 32, 32-4, 31-15, 32-10, 32-5; (6th) 32-3, 31-15, 32-6, 32-2.
Indian Malleable Castings (ordy.):—(1st) 8.4; (5th) 8-10, 8.14.
Indian Malleable Castings (Defd.):—(31st) 2-10, 2-12; (2nd) 2-11, 2-13; (4th) 2-12, 2-14; (6th) 2-12, 2-13, 2-14.
Indian Standard Wagon:—(31st) 65-8, s.l. 65; (1st) 65-4; (4th) 66, 65-8, 67; (6th) 69.
Indian Steel and Wire Products (ordy.):—(31st) 56, 56-8; (1st) 56-12; (4th) 56-4, 56-12, 56-14, 57; (5th) 58, 57, 57-8; (6th) 57-12, 57.8, 58.
Indian Steel and Wire Products (Defd.):—(31st) 37-4; (4th) 37-4; (6th) 37-8, 37-12, 38-4.
Kumardhubi Pref.:—(5th) 142; (6th) 144, 145, 146.
Kumardhubi Engineering ordy.:—(1st) 4-8; (2nd) 4-5; (5th) 4-5, 4-10, 4-12, 5.1, 5-5, 5-3, 5-6, 5-4, 5-8; (6th) 5-8, 5-1, 5-2, 5.6, 5-10, 5-3, 5-5, 5-13.
Marshalls:—(31st) 2-1, 2.3; (1st) 2-3; (2nd) 2-2, 2-4; (5th) 2-2, 2-4, 2-3, 2-5; (6th) 2-3, 2-4, 2-6, 2-8, 2-5, 2-7.
National Iron & Steel:—(31st) 9-2, 9-4, 9-8; (1st) 917; (6th) 9-4, 9-5.
Saran Engineering:—(31st) 6-2, 6-4, 5-15; (1st) 6.1; (5th) 6-4, 6-2.
Steel Corporation:—(31st) 19-9,, 19-10, 19-11, 19-15, 20; (1st) 20, 20-4, 20-6, 19-15, 20-2, 19-14; (2nd) 20 20-1, 20.5, 20-2, 20-6, 20; (4th) 20, 20-4, 19-14, 20; (5th) 19-15, 19-14, 20-1, 20-5, 20-1; (6th) 20, 20-5, 20.6, 20, 20-4, 20.
Steel Corporation (Pref.):—(1st) 120, 120-8, 121-8, 120-12; (2nd) 120; (5th) 121, 122.
Steel Products:—(31st) 5-6, 5-8.

MININGS :

Burma Corporation:—(1st) 4.2, 4-4, 4-6, 4-3, 4-5, 4-4; (1st) 4-4, 4-3, 4-5, 4-7, (4-4 s.l.) 4-4; (2nd) 4-4; (3rd) 4-4, 4.5; (4th) 4-4, 4-5; (5th) 4-6, 4-8, 4-5, 4-7, 4-6; (6th) 4-6, 4.7, 4-4 4-5.
Consolidated Tin:—(5th) 2-6, 2-3; (6th) 2-4.
Indian Copper:—(31st) 2-1; (1st) 2-1, 2-2, 2-4, 2-1; (2nd) 2-1, 2-2; (3rd) 2.2, 2-3, 2-2; (4th) 2-2, 2-3, 2-2; (5th) 2-2; (6th) 2-2.
Karanpura Development:—(6th) 9, 9-4.
Rhodesia Copper:—(6th) As. 13.
Tavoy Tin:—(1st) 1.

CEMENTS :

Bengal Potteries:—(1st) 9-6.
Dalmia Cement:—(31st) 12.12; (1st) 13-1 s.l.; (4th) 13-2; (5th) 13-1, 13-5, 13-6; (6th) 13-4.
Dalmia Cement (Defd.):—(31st) 2-13; (1st) 2-10 s.o.l. 3; (5th) 2-15; (6th) 2-13, 2-15, 3-1, 2-14.
Dalmia Cement (Pref.):—(31st) 119 s.o.l.
Reliance Fire Bricks:—(1st) 10-2, 10-4, 10-8.

CHEMICALS :

Alkali and Chemical:—(31st) 19, 19-4, 19-2 18-10 s.l.); (5th) 18-12 s.o.l.; (2nd) 19-4; (4th) 19, 19-12, 19-6.
Alkali and Chemical (Pref.):—(31st) 120 s.l. 119, 120 s.l.; (6th) 122.
Bengal Aerating:—(31st) 68; (1st) 67, 69, 70; (2nd) 69, 70, 71; (4th) 71, 73; (5th) 71, 72; (6th) 71, 72.
Frank Ross:—(31st) 5.12; (1st) 5-12, 5-14.

ELECTRICALS AND TELEPHONES :—

Agra:—(4th) 142.
Benares:—(5th) 14-15, 15-3.
Bhagalpore:—(1st) 10-8, 10-12.
Cuttack Electric:—(31st).
Mirzapore:—(5th) 5-4, 5-8.

OILS:—

British Burma Petrolum (31st) 3-9; (4th) 3-6, 3-10; (6th) 3-5, 3.8.
Indo-Burma Petroleum (Pref.):—(31st) 119; (6th) 118, 119-8, 120-8, 121.
Tide Water:—(31st) 16-9 s.l.

MARKET POINTERS

Indian Jute Mills Association

AT their meeting on Tuesday the Committee gave consideration to the question of working hours and having regard to the fact that shipments for July had not been up to expectation and that stocks had increased, they decided that for the month of September there should be no closed week and that the working hours should continue at 45 per week. The position will, however, be re-examined before the end of the current monh and if the shipping position warrants it, the Committee will declare that mills shall go on to such longer hours as may be decided but for a period of not less than two months.

The Committee also wish to be known that unless any extraordinary circumstances arise, it may be generally taken that the working hours will be not less than 45 per week and that there will be no closed week from now on until the end of 1941.

A further statement of the Committee's position in this matter is being prepared for general circulation.

* * *

Indian Tea Export:

It is notified that the Central Government has altered the Indian export allotment to tea for the financial year 1941-42 as declared in the notification of the Government of India dated the 31st May, 1941, to 383,242,916 pounds avoirdupois, being one hundred per cent of India's standard export figure.

* * *

Increase in Imports:

Trade statistics for the first quarter of the current financial year indicate an increase in the value of imports from Rs. 45,07,97963 in the first quarter ended June 1940 to Rs. 52,34,73,403. On the other hand exports of Indian merchandise declined from Rs. 54,80,10,137 to Rs. 40,94,34,180 in value during the same periods of 1940 and 1941. This indicates an increase by Rs. 720 lakhs in imports in 3 months from April to June, 1941, and a decrease in exports in the same period by Rs. 1,385 lakhs.

* * *

Price Control:

It is understood that an inter-provincial conference is shortly to be convened under the auspices of the Central Government with the object of reviewing the price level of goods affected by the stoppage of Indo-Japanese trade and considering the advisability of imposing price control as and where needed and feasible.

* * *

World Production of Gold:

According to the June issue of the Monthly Bulletin of Statistics of the League of Nations, the world production of gold continued its upward trend in 1940 and reached a new record level. The approximate total for the year was 40.2 million fine ounces or nearly double the production of ten years before.

The Union of South Africa remains by far the most important producer with 14 million ounces followed by Canada with 5.3 million ounces and the United States with 4.8 million ounces. Production in the U.S.S.R. remains uncertain owing to lack of recent official data; it may be assumed to occupy the fourth rank in world production and to have attained its highest level in 1936.

Whereas output in the Union of South Africa has increased without interruption durng the last few years, with the result that it was nearly one-third larger in 1941 than in 1931, the increase in certain other countries has been even more pronounced. Thus, during the last ten years, production in North America nearly doubled; in South America, Oceania and, probably, Asia it nearly trebled. The development was still more spectacular in some of the minor producing countries, e.g. various African territories (including Tanganyika and Kenya), Chile, the Phillipines, the Fiji Islands and New Guinea. The aggregate contribution of these secondary producers to the world total tends to become more and more important.

While stocks of non-ferrous metals in the United States have tended to diminish during the last few months, stocks of rubber in that country have increased uninterruptedly since the beginning of 1940; between February 1940 and March 1941, they nearly trebled.

THE CENTRAL BANK OF INDIA, LIMITED.

NOTICE.

NOTICE is hereby given that the Transfer Books of the above Bank will be closed from FRIDAY the 8th August 1941, to SATURDAY the 23rd August 1941, (both days inclusive).

Audited accounts for the half-year ended 30th June, 1941 :—

After transferring Rs. 2,600 to Insurance Fund, providing Rs. 1,54,447 for Taxation and making adjustments, the results for the half-year show a profit of Rs. 2,29,051-8-3. After bringing forward the balance from the last account and transferring Rs. 85,000 to Dividend Equalization Reserve, there remains at the credit of the Profit and Loss Account a sum of Rs. 2,66,978-9-9, which the directors recommend be applied as follows:—

	Rs.	As.	P.
Dividends on Preference shares at Rs. 3-8 per share ..	49,000	0	0
and on Ordinary shares at Rs. 10 per share ..	1,05,000	0	0

the balance Rs. Rs. 1,12,978-9-9 to be carried forward.

Managing Agents.—Messrs. Andrew Yule & Co., Ltd.

Authorised, Issued and Subscribed Capital—Rs. 24,10,000 in 10,500 Ordy. and 14,000 7% Cum. Pref., both of Rs. 100 each, fully paid up.

(*Half-yearly meeting 20th August, 1941 at 11 a.m.*)

Audited accounts for the half-year ended 30th June, 1941 :—

	Rs.	As.	P.
After providing Rs. 41,315-2-2 for Depreciation and reserving Rs. 37,782-12-0 for Income Tax and Excess Profits Tax, the Profit and Loss Account shows a net profit for the half-year of	64,408	12	11
To this must be added the amount brought forward from the last half-year of	80,038	8	5
Making a total of	1,44,442	5	4
which it is proposed to deal with as follows:—			
To payment of Dividend on Preference Shares ..	618	0	0
To payment of Dividend at 5 per cent per annum on Ordinary Shares	33,363	12	0
To Contingent Reserve	51,649	10	0
To carry forward the balance of	58,810	15	4
Total ..	1,44,442	5	4

The demand for biscuits has shown a satisfactory increase and is reflected in a substantial rise in sales to Rs. 12,49,563-10-0 as against Rs. 9,52,544-3-4 for the corresponding period last year.

In view of present abnormal conditions, the fact that the Company is carrying heavy stocks of raw materials purchased at current high prices and money will be required in the near future for extensions to the Company's factory in Calcutta, the Directors recommend that, after paying Dividends on Preference Shares and 5 per cent. per annum on Ordinary Shares, the sum of Rs. 51,649-10-0 should be transferred to Contingent Reserve.

Substantial contracts have been received from Government and all plants at both the Calcutta and Bombay factories will be fully occupied for the current half-year ending September, 1941:—

Secretary.—Mr. A. P. Chanda.

Capital Authorised—Rs. 20,00,000 in 2,00,000 Shares of Rs. 10 each. Issued and Subscribed—Rs. 13,50,000 in 1,33,455 Ordy. of Rs. 10 and 1,545 8% Cum. Pref., both fully paid up.

Synopsis of the Balance Sheet as at 31st March, 1941:—

Liabilities:—	Rs.	Assets:—	Rs.
Capital paid up ..	13,50,000	Gross Block ..	21,10,416
