Indian Finance

ISSUED WEEKLY

SECRETARIAT LIBRARY 30 SEP 1941

Vol. XXVIII. No. 13 FRIDAY, SEPTEMBER 26, 1941 Price Re. 1

Insure and Increase Nation's Strength

Financial Independence of the individual is the measure of Nation's financial strength.

In this hour of world turmoil, all Life Insurance Policy-holders should take stock of their insurance cover and ascertain just how strongly they are fortified against the unpredictable that lies ahead.

And, those individuals who have not yet made provision for their protection need do so without delay and thereby contribute towards Nation's strength.

Be advised and write to-day to

WORLD OF INDIAN FINANCE

Calcutta, Thursday evening.

INTER-BANK call money continues in plethoric supply, the nominal rate being ¼ per cent in Bombay, ½ per cent in Calcutta and ¾ per cent in Madras. Cash is piling up with banks, thanks to the substantial disbursements by the Government in respect of war supply orders. During the current week, an additional factor contributed to the swelling of cash balances of banks as payment was made by the Central Government on the maturing of the 3 per cent 1941 loan. The amount thus paid on September 15, was slightly over Rs. 2 crores. The deposits of scheduled banks with the Reserve Bank have risen from Rs. 45.42 crores on September 12, to Rs. 48.16 crores on September 19. The amount involved in the payment of the 3 per cent 1941 loan was not calculated to cause any special strain on the ways and means machinery of the Government. As on September 12, the Central Government's deposits with the Reserve Bank stood at Rs. 8.59 crores. Except for a considerable payment in respect of war commitments, the Central Government could have managed to pay out the maturing loan without recourse to ways and means advances from the Reserve Bank. The figures disclose, however, that the Government might have had to meet anything like Rs. 2 crores in respect of war commitments. The result is that, on the assets side in the banking department, ways and means advances have risen from Rs. 26 lakhs to Rs. 2.05 crores. That is to say, the Government might have taken a loan from the Reserve Bank for an amount between Rs. 1¾ crores and Rs. 2 crores. Cash balances with the Central Treasury as on September 19 stood at the fairly comfortable figure of Rs. 6.95 crores. The deposits of the Burma Government and the Provincial Governments have shown substantial improvement from Rs. 1.90 crores and Rs. 3.90 crores to Rs. 2.74 crores and Rs. 4.26 crores respectively. Foreign balances in the banking department show a small rise from Rs. 51.99 crores to Rs. 52.23 crores. Investments still stand at the high altitude of roundabout Rs. 9½ crores.

Owing to the Poojah Holidays the issue of Indian Finance due to appear on October 4th will appear on October 6th.

Editor I. F.

The statement of the Reserve Bank in the issue department creates another high record for active note circulation in India, which has now reached the figure of Rs. 266 crores. On the assets side, the only change is under the head rupee coin which records the continuing return of rupee coin from circulation. The latest figure is Rs. 39.33 crores as compared with Rs. 38.87 crores.

The statement of the Imperial Bank for the week ended September 19, creates another high record in respect of deposits. The Imperial Bank's deposits as on September 19, are Rs. 105.44 crores. Investments and advances show only minor changes while cash balances have shown further increases from Rs. 26.81 crores to Rs. 27.47 crores.

The plethoric conditions in the money market do not justify the increase in the average rate of accepted tenders in this week's auction of Treasury Bills. Against Rs. 2 crores on offer, applications amounted to Rs. 3,79½ lakhs. The average discount is annas 10 and pies 4 per cent per annum as compared with annas 9 and pies 8 on September 16. The discount of annas 10 and pies 4 cannot be considered as onerous; at the same time, it is necessary to point out the lack of accord between the movement in Treasury Bill rates and the conditions in the money market in recent weeks. If only the Reserve Bank authorities reject a portion of the tenders as unsuitable, the recent rise in the Treasury Bill rate can be arrested. It may be that the stage has not yet been reached when the Government can provide the necessary gesture that would stem the rising trend. Considering that since the Treasury Bills auction on September 2, the discount rate has risen uninterruptedly week after week, the assertion of a firm Treasury Bills policy cannot now be postponed

TREASURY BILLS

India

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills were opened on Tuesday, September 23, 1941. Total amount offered was Rs. 3 crores, 79 lakhs and 50 thousand. Tenders at Rs. 99-13-6 per cent and above were accepted in full and those at Rs. 99-13-3 per cent were allotted approximately 36 per cent. Lower tenders were rejected. Total amount accepted was Rs. 2 crores, the average rate of accepted tenders being annas ten and pies four per cent per annum.

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills will be received on Wednesday, October 1, 1941. Successful tenders should make payment on Friday, October 3, 1941. Other conditions are as usual.

During the week ended September 19, 1941. Government of India Treasury Bills for Rs. 4,05,00,000 were sold in favour of the Issue Department of the Reserve Bank of India.

Capital paid up . . . Rs. 39,90,000
Reserve Fund . . . „ 10,00,000
Dividend Equilization Fund „ 60,000
Deposits on 31-12-1940 . . „ 1,96,72,000

Chairman:
M. S. CAPTAIN, Esq.

Directors:

Lachmandas Harkhchand Daga, Esq., K. R. P. Shroff Esq., Vithaldas Kanji, Esq., B. N. Karanjia Esq., Ramdeo Anandilal Podar, Esq., Haridas Madhavadas, Esq., Dinshaw D. Romer, Esq.

CURRENT DEPOSIT ACCOUNTS opened and interest allowed at 1 per cent. per annum on daily balances up to Rs. 100,000.

FIXED DEPOSITS for long and short periods received on favourable terms.

SAVINGS BANK ACCOUNTS interest allowed up to Rs. 10,000 at 1½ per cent. per annum on minimum monthly balances. Withdrawals allowed twice a week. Operations by cheques allowed.

Advances made on approved securities All kinds of Banking business transacted.

B. M. BHARGAVA, *Secretary.*

(Continued from page 579)

indefinitely. The amount of tender bills on offer for next week is Rs. 2 crores. As Tuesday is a holiday, tenders are receivable on Wednesday. Successful tenderers are to make payment on Friday as usual.

Now that the 3 per cent. 1941 loan has been paid off, it remains to be seen what amount of the funds released in banking circles on account of redemption would seek reinvestment in government securities. In this connection, it is interesting that possibilities of investment are so restricted that the Central Bank, taking this as a typical institution, has subscribed for more than Rs. 5 crores of the defence loans. It was Sir Sorabji Pochkhanawalla's claim that, with regard to every new loan, his bank held the supreme place next to the Imperial Bank. With regard to the recent defence loans, Mr. Captain, the successor of Sir Sorabji, has not only maintained the standard but greatly improved on it.

The exchange market has been very steady with substantial business both in respect of export bills and remittances.

Banks were sellers of T.T. at 1s. 5 15/16d., for ready up to six months; and banks were buyers of T.T. at 1s. 6d., for the same delivery.

Banks were buyers of three months' D.A. bills at 1s. 6 7/32d., for three months; and 1s. 6 9/32d., for the fourth month.

Inter-bank call money is unchanged at ½ per cent.

Firms' money for call and short is quoted ¼ per cent and ½ per cent for one to four months.

STERLING appears distinctly strong in terms of the rupee to judge by ruling quotations over a week. As regards foreign currencies the Control rates in London have been maintained over such a long period that one may speak of them as rates for the duration. It is only necessary to have a look at the course of exchange rates in 1940 to realise that such changes as have taken place in the value of the rupee in terms of the dollar are so small as to be inconspicuous. In the case of sterling too the average value for 1940 is identical with the present quotation of 4.03½ dollars but the position of the dollar itself underwent a change in that it depreciated in terms of Swiss francs towards the end of the year with the result that the Swiss franc was equal to 23.21 cents in April. A word may be said here about the Rial which stood at 5.882 cents throughout the year 1940 and afterwards too showing that Iran's currency was extremely steady. The Mexican currency was on the average equal to 18.55 cents in 1940. Marked recovery has taken place since then as the peso had risen to 20.54 cents by April. The peso may now be taken as equal to a shilling and the last Bombay quotation for T. T. on Mexico is Rs. 67.27 for 100 pesos. The very considerable improvement in the Mexican currency will have a stronger prop in the loan promised by the U.S.A. on the understanding that some compensation will be paid by the Mexican Government to the expropriated oil companies. Mexican Eagles crossed the ten shilling mark sometime ago, and have certainly showed the same form as other oil shares though it is a case of goodbye to Amatlan and Poza Rica. The 4 peso shares should be taken at 4 shillings for the par value and if the latest quotation shows that the shares stand at a substantial premium it shows that faith often gets the better of judgment in financial matters.

Reference may be made here to the appreciation of the baht in recent months. As it was equal to 36.9 cents in April as against the average of 35.15 cents for 1940 the improvement naturally seems fairly striking. There may have been since then a change though it is difficult to know what is the quotation in India for the baht. Since T. T. on Bangkok is often quoted by way of Singapore through a new cross-rate it is not easy to know what the rate is though the present writer seems to remember it as being around Rs. 125 for 100 baht showing incidentally that the baht was a little below its former value of 2 shillings. All that one hears now about Thailand is a sentence or two taken out of Bangkok radio announcer's views on military preparations and Thailand's readiness to stanl up to anything and anybody. One has apparently heard the last about the concessions extracted by Japan what time Thailand was talking frantically about neutrality. It is hard to say what will happen if Thailand gets mixed up in any way since the baht, a paper currency, will take a bad knock as the Government held last August only 1 million baht in silver; 87 million in gold and 107 million baht in foreign assets, not a very large backing for a pure paper currency.

The possibility of grave changes in the Far East has apparently not affected financial markets but for a very slight drop in the rate for T. T. on Shanghai. The Chinese dollar stands between 2-27/32 and 3-3/16d. at present and does not seem likely to depreciate in view of the promise of adequate assistance for the Chinese Stabilisation Fund and the abolition of the black market in Hongkong. One does not know whether the money changers in Shanghai will co-operate and something more than a cleansing of the Temple will have to take place in Shanghai in order to get rid of the habit of selling one currency for another. Over the whole of last year the average value of the Shanghai dollar was 6 cents. so that its subsequent depreciation does not seem arresting at all.

Switzerland is likely to feel the blockade more than ever. The difficulties of that important neutral have been reflected in the budget and foreign trade on that country. Britain has decided to withdraw facilities for the passage of blockaded industrial material so in consequence of that country's commercial agreement with Germany. Being without a seaport of her own, Switzerland has to depend on the good offices of other Powers. There has been the usual gloss on the British Government's decision. The Government is said to appreciate Switzerland's difficulties and will give facilities within reasonable limits for the import into Switzerland of foodstuffs, fodder and certain other goods exclusively destined for domestic consumption. The decision is not called retaliation and it is said that the Swiss will understand.

The remarks of M. Maisky on Russia's need for Allied assistance have cast into the shade Mr. Moregenthau's statement concerning U. S. help to Russia and its cost. His statement has proved that the forecast made here was correct. Cash and carry was the only possible principle for the U.S.A. to adopt in this case and the taking of gold in exchange for war equipment will make up for the decline in gold imports recorded this year. The fall of Kiev is not likely to influence U.S. policy, for American opinion is unlikely to change merely because the Soviet Union thinks the Atlantic Charter sound policy. The British Government may be ready, as Mr. Alexander said, to help to the end but that is not going to let U. S. republicans think again of helping Russia. The British warning to Finland may even have unexpected effects on U.S. public opinion. Mr. Stettinius counts more than any witness in urging that Lease and Lend should apply to Russia.

The U.S. dread of inflation has led to the adoption of a resolution by the F. R. B. concerning an increase in bank reserves. Member Banks are asked to help by lodging additional reserves with the F.R.B. as from November 1st. An increase of one-seventh up to the statutory limit in reserve requirements will reduce the amount of money available to industry. Higher taxation for which the 3,553.4 million dollar Bill approved on Saturday by Mr. Roosevelt provides and larger reserves may make banks less willing lenders, and help to reverse a trend, noted in April, for advances of commercial banks in the U.S.A. to increase. The actual effect on credit may be small but one of the efforts would be a fall in Treasury balances with the Federal Reserve Banks. The excess reserves are likly to drop to 4 billion dollars from 5.2 billions and the withdrawal of funds will be advantageous to the Administration.

It is more important to know where India stands in relation to the U.S. programme. Dr. Grady's visit to this country has been followed with interest and the possibility of enlarged offtake of strategic raw materials has been mentioned. The sources of the Philiphines the Dutch Indies are available like those of the British Empire and Dr. Grady's enumeration indicated that the Eastern Group has useful allies. Dr. Grady suggested that manganese and mica should be provided by India in the quantities desired. He emphasised the need for maximum effort and condemned complacency. He indicated that the U.S.A. would buy freely the raw materials it wants in order to put the defence programme through.

The Ex-Shah has begun his travels. His property in Iran is forfeit to the nation but he will reach the Argentine with a tidy sum of 5 million sterling. He has certainly feathered his nest in the fifteen years of misrule. The new cabinet is not likely to bother about the deposed monarch as he has given up his property in Iran and sticks to his caches in America. The Mejlis has not had its way, but the ex-Shah's property in Britain is sure to be blocked.

The Future of Gold

THE place of gold in the second world war, while it will, no doubt, form the subject of many new publications in post-war times, seems to attract but little attention while the war is on. Now and again, we hear of changes in the foreign exchanges, such as the linking of the guilder to sterling, of movements of gold such as Mr. Morgenthau referred to in connection with supplies to Russia. We hear, too, of speculation about the fate of the gold reserves of the Bank of France, of America's action in blocking the assets of European countries which have fallen under the Nazi yoke. But all these reports have more of political rather than economic or financial significance. The pre-war picture of the position of gold remains essentially unaltered. That picture is one of America experiencing an unceasing influx of gold. The one-way traffic still continues in a metal which is meant to be distributed all over the world and to keep shifting from place to place so as to keep the equilibrium of trade among the nations. The U.S.A. has no relief from the problem of regulating this impact of gold on her internal currency and credit. That problem is even more complicated to-day, now that America has to multiply her productive activity in order to discharge her functions as an arsenal of democracy. The latest report that another effort at the prevention of inflation has been made by the Federal Reserve Board and that the reserve requirements of member banks are to be increased to the present statutory limit is almost reminiscent of the days before September 1939.

The question, therefore, necessarily suggests itself: What sort of gold problem will the post-war world have to face? So far as the war period is concerned, there is a fair certainty that the problem will not be allowed as such to obtrude into the picture. For the world to-day is not a collection of disparate nation-states trading amongst themselves on a more or less business basis. On the other hand, it is sharply divided into two opposing groups, one of which is bound up with Britain and the other associated with Nazi Germany in varying degrees of subservience. Nazi Germany has solved the gold problem by a practical and effective denial of it. Economic totalitarianism enables the authorities to dispense with the gold backing for a token currency. Political power is ample compensation for popular confidence and when payments had to be made abroad, Dr. Schacht's jugglery stood the Nazis in good stead. The position cannot be far different in the countries which Germany has conquered or occupied. Of the currency system in the occupied countries, there is little exact or reliable information. But all reports are agreed that the currency is under the control of the Nazis and no compunction is felt in the matter of additions to paper currency. After all, a plunder economy has no need for gold, though it may well have a use for it, if it should by some chance become available. The Nazi machinery of war needs no gold, either as fuel or as lubricant. And with no neutrals outside the lands under her control to trade with, Germany can go on or meet her doom without ever feeling the pinch for gold.

Britain's position is only slightly different. For, while the exchange problem, no doubt, remains with all its intricacies, complexities and urgency, the basis of American aid to Britain has been changed from the curt cash-and-carry basis of old. The idea that the war is Britain's affair and that for every material sent to Britain payment must be satisfactorily provided for is dead. The Lease and Lend Bill prescribes a few conditions to be satisfied. But who can doubt that payment will not be allowed to stand in the way of urgent aid being despatched overseas? And when the U.S.A. has a similar attitude to other democracies, the anti-Nazi camp, too, is bound to enjoy a fair degree of freedom from worry about gold. Soviet Russia would, however, seem to be differently placed. It has been announced more than once that supplies to Russia will not be under the Lease and Lend Bill. As mentioned earlier, Mr. Morgenthau has made it clear that Russia has shipped to the U.S.A. the gold necessary for payment for the supplies made to her. If it is remembered that Russia is not only a totalitarian nation which can do without the usual gold backing to internal currency, but is a producer of gold—her gold production is a sixth of the total world production—it will be realised that Russia is no more likely to be obstructed by lack of gold in the prosecution of the war than any other antagonist of Nazi Germany.

If, then, war affords a respite from the gold problem, in the sense that but for the war there might have been gold scares of some kind or other, is it not also true that the war is postponing the evil day when the gold problem will be on us with all its pent-up force? It is easy to contrast what is happening now with what might have happened in regard to gold, if the war had not occurred or developed in the way it has. The gold scares of the pre-war period would have occurred and/or the nations would have continued in their efforts to minimise their requirements of gold by eliminating the elements of uncertainty from their foreign trade and thus keeping the foreign exchange problem far more tractable than it would otherwise be. As it is, the war has cushioned the effects of the maldistribution of gold on national and world economy, and at the same time serves to accentuate the maldistribution. The war period is thus laying up a prodigious problem in regard to gold.

It is not of mere academic interest to speculate on the lines on which this problem may be solved in the post-war period. Obviously, there are two ways in which large-scale problems are solved, one, by the application of power which is necessarily political and, two, by the interplay of natural forces which always attempt to reach a new equilibrium. Experience teaches us that usually it is neither the one nor the other wholly, or rather, that political power and its employment also form one of the natural forces which have to be reckoned with. In this context, the fact that a highly disproportionate stock of the world's gold has been acquired, willingly or otherwise, and held by the U.S.A. is by far the most important. The power that has stood so resolutely between the other precious metal and its certain doom is by no means likely to suffer revolutionary changes calculated to deprive gold of its importance. And mankind, too, is not so revolutionary that it can achieve radical changes in the monetary system overnight. While one may thus rule out any drastic changes, the narrow scope within which practical changes may be sought must be recognised. The U.S.A. did not acquire its present gold stock for a song and will not part with it for a similar intangible or inconsiderable value. Gold can move out of the country only in settlement of temporary or more or less permanent adverse balance of payments. If the last war transformed the U.S.A. from a debtor to a creditor country, and a creditor that, far from lending out more money only absorbs more gold, the present war is not likely to set an opposite tendency in motion. The transactions between the U.S.A. and the rest of the world during this war are not such as to create debts for America which she can settle by the export of gold. On the other hand, not only the one-way traffic will be continued, but every point on the road may well be like a valve which permits only influx but no efflux. Though scarcity is a necessary condition of value, the world cannot be persuaded to attach value to things it cannot possibly get.

The basis of any solution of the gold problem will, therefore, have to be the grant of credits on a large scale. But this idea will, in the conditions that we can foresee, create more problems than it can solve. For credits call for repayment. And even before the stage of repayment, it is important to remember, that loans represent capital and that every international loan involves not so much a movement of gold as the movement of capital goods. If all the capital goods that each such loan represents are acquired from the lending country, then the effect of such a loan on the distribution of gold will be altogether inconsiderable. It will thus be seen that redistribution of gold is to be effected, not merely by the grant of American credits on a large scale, but by the distribution amongst a number of countries of the work of producing the capital goods represented by the loans. It is here that the international co-operation mentioned in the Atlantic Charter is of the greatest importance. The process might be viewed in this way: that credits are granted to the undeveloped or devastated areas of the world, that the work of producing the capital goods is distributed over a number of industrial countries and that thus the arteries of world trade will again be cleared.

It is not easy to envisage the circuit of gold, of credit and of goods in the conditions referred to above. But it may be said that the circuit will be smooth and even complete, in the sense that America can realise the interest on her loans, only if war debts and reparations do not reappear in any form to distort and mutilate world economy. There is also another condition, namely, that loans are directly made to the needy countries without the creation of middlemen in international finance. International co-operation must be free of the taint of conjoint imperialism which we have good reason to apprehend.

How the power of the U.S.A. and her associates will be exerted, it is too early to say. But it is certain that the movement towards obviating the need for gold will not die with the war and will continue in times of peace. For this movement is far older than the war. Dating from the Genoa Conference and the appeal for minimising the monetary use of gold, it has progressed slowly and surely. First, we had the gold exchange standard, then the lower reserve ratios and later a fluid ratio. The depression forced on the majority of nations not only the system of exchange controls, but also the system of quotas, bilateral trade pacts and international barter. The growth of totalitarian tendencies has relieved governments of the fear of loss of confidence in the currency. Though we are assuredly a long way from the dethronement of gold, gold is no longer the absolute monarch of national or world economy. Lack of gold has lost its terrors for the majority of nations; and failure to achieve better distribution of gold might well seal its fate as a monetary metal.

Hands Across The Atlantic

FEW books in our time have excited such profound interest as *Union Now*. Interest is fast developing into influence. There is a movement behind the book, and Mr. Streit has retired from his profession to propagate his ideas. A following for the new federal gospel has been gained. It has been said that eight million Americans endorse his ideas, and the new federal idea has gained amazing currency in Britain too. Mr. Streit's second book deals as much with the immediate future as the postwar period, and it must certainly have caused him acute disappointment to find that the mid-Atlentic declaration issued in August falls far short of his ambitious, but quite precise, plans for a new world order. The plans are set out in the 260 pages of *Union Now With Britain* (Jonathan Cape 7/6 net). They are meant as much for the peoples as for the rulers. Notable at once as a perfervid plea for Anglo-American unity and for the banishment of war the book takes its place with the outstanding books on politics.

The formative period of American history furnishes Mr. Streit with precise parallels and pulverising arguments and one realises with difficulty that *Union Now With Britain* is set out like an engineer's plan to scale, with the names of men for new offices coming off pat enough. Written in a style that is slightly hysterical (this is an individual's opinion) the new book is likely to have been boomed not only by the usual claque but by study groups that must have got their teeth into it by now. It is only fair to Mr. Streit to add that his latest book will add greatly to his reputation and those who had read the Penguin Special *The Case for Federal Union* are likely to appreciate not only the progress of Mr. Streit's own ideas but also the thorough, practical nature of his appendices, and his anxiety to meet difficult questions proves the sound, sincere nature of his quest in a world where he has evidently found no peace.

Nearly two and a half years lie between the date of publication of *Union Now* and that entitled *Union Now With Britain*. But that is an epoch in which kingdoms have crumbled and humanity has had another fiery ordeal, an epoch which does not seem to have neared its end. It is therefore, right to take Mr. Streit's latest work as a practical plan as well for winning the war as for securing peace. The ultimate objective is laudable and the means advocated is a new federation of which the members would be the U.S.A. and the British Commonwealth. With a total population of 200 millions the new Union would present a solid front against totalitarianism, win the war and keep the peace too. For a beginning the U.K. and the Dominions would unite with the U.S.A. The entry of Eire, too, is recommended since one more non-belligerent can be induced to act with the Union. Pending the usual Convention the establishment of an inter-Continental Congress appears desirable. Each member is to send one representative *plus* another for each five million inhabitants. The U.S.A. would have in consequence a clear majority. Until direct election can be arranged nominations by the President would seem proper in Mr. Streit's eyes though the U.S. Congress would have to approve in the last instance. To the average citizen of the U.S.A. the super-federation would perhaps appear superfluous but Mr. Streit piles up argument on argument to show that intervention in this war is inescapable and the best way to prepare for it is to get the Federal Union going.

Greatly impressed by the success and happy outcome of the American Revolution, Mr. Streit asks merely for an external projection of the federal idea. He is able to discover unusual merits in the Act of Confederation preceding the U.S. Constitution, and even the delegation of U.S. sovereignty to a new set of plenipotentiaries does not strike him as improper, for it would be one way of avoiding crisis government and the one-man show that the U.S.A. so heartily dislikes. The inter-Continental Congress would handle foreign relations, stabilise a common currency, provide for common citizenship and supervise communications. Residual and unspecified powers would vest in the federating units and the internal constitution and government alike of each State would be unaffected. Britain could retain its monarchy and Eire could keep Dublin Castle vacant though the Dominions may be under Governor-Generals. A Bill of Rights corresponding to the Declaration of Independence would have to be provided. Civil liberties would have a statutory basis and some of the differences between the American and British constitutions would disappear. The new *Union* would have a single executive board. Mr. Streit would like a revival of the Roman Consulate and names the first two Consuls, Messrs Roosevelt and Churchill. Annual elections probably do not come into the scheme of things, for Mr. Streit is engaged mainly in showing that the U.S.A. is in danger and has a duty to help Britain and keep out the war by overthrowing aggressive Fascism. The Act of Union which would secure all these objects is a plain man's proposal.

It is urged in this connection that the U.S. Congress can pass a resolution approving the Union Now proposal because vast powers would be retained by the U.S. legislature and such powers as are to be surrendered inhere in the Executive branch. Anyway, it would avoid giving up a lot of authority in the inevitable emergency period. Union

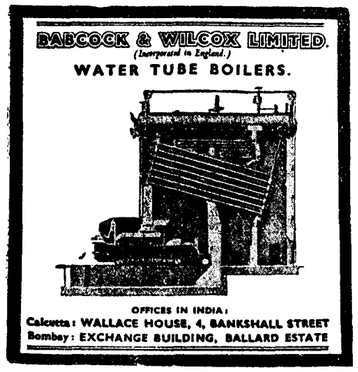
Now should help in bottling up the New Order. An Anglo-American Commonwealth would be the right answer to the New Order which would crack. It is perhaps because of a consciousness of the difficulties that the original members of the Union are to be seven instead of fifteen. It is singular that the Swiss Confederation is not mentioned and the Kingdom of Sweden is regarded as ineligible. In most eyes they are perhaps more energetic, more willing worshippers at the democratic shrine than the American and British Commonwealths. One cannot discover the reasons for their exclusion except the fact that they are within reach of Hitler and have not the linguistic and cultural affinities to which Mr. Streit attaches great importance.

The Union is advocated on the grounds that it is the prelude to victory. Occupied countries would be inspired to successful rebellion, and Hitler would have no chance of making peace with any country at war. There is little doubt that the defection of France makes Mr. Streit insistent on the question of unity; but his own view that Union now will bring the end of the war nearer and help to put through a negotiated peace on America's own terms is likely to command few adherents. The gulf between Germany and the U.S.A. is steadily widening, and so far, there is nothing to suggest that mutual distrust latent as between the Axis partners would lead to the conclusion of peace on the new commonwealth's terms.

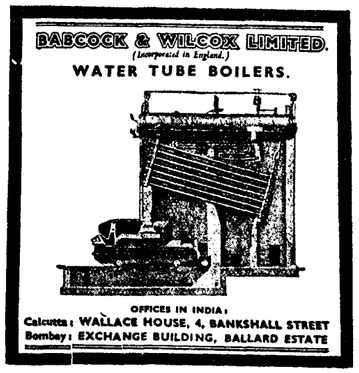
This is an altogether hopeful view. There is little to suggest that that blockade has weakened the German military machine, and failures in the Middle East are offset by fresh successes for the Axis in Europe. There is naturally something unreal if not unnatural about the scheme for voluntary liquidation of sovereignty. All the theorising based on the anonymous papers in the *Federalist* and even the impressive foreword by Madison, Washington and Lincoln do not affect the main impression produced by the plan for union. The difficulties and prejudices in the way of making the Dominions join Britain in amalgamating with America are great and lasting. The book, however, gives the Americans a notion of the remarkable job done by the Founding Fathers and will quicken interest notably in the life story of the U.S. constitution. It is doubtful if the political parties in Congress will pay attention to the scheme and the U.S. Government, though it might be bound by the Atlantic Charter, would certainly scout the idea of a peace on the terms of no annexations, no indemnities, no mandatory changes of government. Getting the Convention elected is a minor matter compared with winning the war. and events since the book was written, have demonstrated what can be done and what cannot by American assistance. Union can come only after victory and this is the fact that the book blinks. We can have Anglo-American collaboration for all time in every possible way but the re-conciliation of differences between the American way and the English way may appear insuperable.

Mr. Streit's case. in the main, rests on America's desire for something better than the Versailles settlement and the Geneva fiasco. To prevent a postwar mess if not for any other reason the U.S. should act not only by producing munitions for victory. but by producing the organisation that will make the most of victory. To linger at the altar of dabble and dawdle. to use Mr. Streit's effective phrase, is neither prudent nor courageous, and the U.S.A. could or should prefer to act on behalf of the new Union instead of the British Empire at war. It will be one way of showing that Democracy is efficient and resourceful. Union Now would, in Mr. Streit's opinion, settle all doubt about the limits to U.S. assistance to Democracy which must be preserved at all costs in the New World. Union must precede military action in Europe and much is said about Mr. Churchill's offer to France in June last.



In vigorously pleading for re-establishment of world trade on a new basis of unrestricted raw materials for all nations, the plan gets near the German idea of living space, but the major idea here is one of developing Anglo-American economic co-operation for specific purposes such as giving essential rubber and tin to the U.S.A. though the Axis Powers would not be treated as pariahs if they submitted in time. Union is recommended to the U.S.A. as better than an entangling alliance.

The success of the original union of the thirteen states under the Constitution of 1786, has made the U.S.A. the hope and inspiration of the greater part of the world. Mr. Streit is content to point to the hope that will never die and asks the U.S.A. to keep faith with that part of the trusting world by retaining its own faith in the things that have made the Republic great.



The resolute opponent can certainly put up a case against the arguments for Union Now. Apart from the fear that Europe may again become the graveyard of American ideals, there is the ever-present argument of the high tariff man in the States. Vested interests will certainly make a determined stand against proposals to scrap tariffs and buy and sell to the U.K. as the member of a bigger union. U.S. agriculture may benebt, but the cotton and other textile industries will take a knock. More upsetting would be the effect on industries in the U.S.A. The capital and labour involved would be damaged beyond repair, and the U.S.A. just cannot take a plunge into Free Trade barely ten years after trying out the Hawley-Smoot tariff. the highest in history. What about the effect of Union Now on Britain? British cars just cannot be sold afainst the Detroit product, and Mr. Mckenna will go down to history as the father of an extinct industry. The British may not relish the notion of union with a U.S. majority even against all the blandishments of total assistance in the war. Industries facing extinction would leave the U.K. in the position of a derelict unfinished suburb abandoned by a bankrupt speculative builder. and it is very doubtful if the Dominions with their tariff-built industries will consent to become just importers of U.S. mass-produced goods. The U.S. manufacturer may turn out the right goods at the lowest possible price, but Australians believe in tariffs because it keeps wages up. The Labour Party would not consent to the Union project if it comes to a matter of lowering the standard of living.

It is uncertain whether the Union will persuade Europe and Latin America to lower trade barriers, and the naive belief in the virtues of Free Trade may make Union Now unworkable and ridiculous. What the average Briton will say to the American Streit can hardly be guessed but the British Government's reluctance to discuss war aims and commit itself about the kind of peace contemplated can only be interpreted as an aversion to a Union that will subordinate the larger commonwealth to the more compact United States. Mr. Streit presumably is wrong in thinkink that Eire would accept the Union. Mr. de Valera may have lived and worked in the States, but he is not likely to look at the proposal when the partition stands and Irish-Americans are likely to say ditto. The various racial minorities of the U.S.A. are likely to unite in protest and compromise the success of American political institutions. There is above all the danger that Union Now may leave a Briton frustrated, impotent and unable to help in the tasks of reconstruction to which all the advocates of Federal Union look forward. The bargain made last year for bases against destroyers showed that co-operation can only be on the basis of reciprocity and Englishmen may be induced to resent an American offer of protection against Hitler. It certainly looks like rubbing them up the wrong way. The psychological effect on Europe may not be great. European reactions to the declaration from the middle of the Atlantic indicated that Hitler is not nervous about the U.S.A.'s views on annexations and European nations' resurgence. Federalism as such has ceased to attract the world. The late Sir George Parkin and others argued in favour of Imperial Federation but the Empire did not bestow a second thought. The units of the seven-member league may calculate that all the power will flow into the Federal Union controlled by a new Consulate and they may well ask where their own Tribunes are. The positive military advantages of union as distinguished from the lease-lend programme, appear to be slight and nebulous. The provision made in the act of union for the entry of such nations as Germany when they mend their behaviour is not at all going to help Europe and is likely to develop an anti-American bias that may be injurious to U.S. prestige, particularly, in Latin-America. What about Britain's colonies may be asked by the U.S. citizen ,who is sure to object to pay for a war with Hitler, waged by the Union blindly suspicious of Imperialism of any brand. The Union Now project despite all attempts at simplification leaves too many loose ends. The future of the Free French colonies (virtually part of the British Empire at present) the well-being of the Dutch Indies and the advancement of backward parts, peopled by coloured races, of the respective Empires (including Porto Rico) are again tasks omitted discreetly from the agenda of Union Now. And Mr. Streit's ideas on India may well alienate Indians and Britons alike.

One is tempted to put question after question, indicating that the stimulus to thought is considerable. It is quite clear that Mr. Streit in dealing with concrete proposals cannot get round all objections. In setting out the implications of Federalism and indicating America's stake in Europe, particularly, in the survival of Britain, the book (published in America by Harpers) did well to show the U.S.A. has to plan like the belligerents for war and peace. That the Administration has done its best to do the same thing may not weigh with the average Federalist though in a symposium on Federal Union edited by Mr. Chaning-Pearce (Cape 1940) special reference is made to the place of India, assuming thereby that the special treatment will not be eternal. There is nothing to indicate that if most Indian politicians cannot stomach federation, the idea of world union and peace is objectionable, provided that entry on equal terms is vouchsafed. *Union Now With Britain* finds no place in its index for India that may not be a defect in American or British eyes but must be mentioned here. The Federal Unon will have to do many things after peace, one of them would be to deal with the Indian claim for independence on a footing of full equality. To get out of India is the last thing that Britain would think of not only because of the economic available advantages for a big prosperous super-state, but because India is large, populous and has claims to consideration as against the Dominions. No union or federal project can get round the question by ignoring it and his major promise in the elaborate argument for union is essentially an unproved assumption that the U.S.A. and Britain are both ripe for Federal Union. The two countries may be taught to believe that like any other thing. Mr. Streit however is not likely to succeed quickly in convincing two nations whose leaders are content to give vague voluble promises to be fulfilled at an indefinite date and to retain all possible advantages, to make the best of two worlds in a somewhat unusual sense.

Editorial Notes

Sugar Production

THE second memorandum on sugar production in India discloses that the previous estimate of 10.82 lakhs tons has been raised to 10.95 lakhs tons. The decrease as compared with 1939-40 when total output amounted to 12.42 lakhs tons is of the order of 12 per cent. During the 1940-41 season as many as 148 factories were at work owing to the addition to factories in the Frontier Province, Madras and Kapurthula State. Out of the total 163 sugar factories 14 were idle and one was a small experimental unit. The decrease in output last season November 1940-May 1941 was mainly due to the shorter season as U.P. and Bihar factories on an average worked for 100 days (many worked for only 80 days) but other factories, unhampered by rules regarding restriction of output, worked as usual, 11 factories starting work in October. As in the first memorandum, the Director of the Institute of Sugar-Techonology adverts to the increase of production in areas outside the U.P. and Bihar. Their share of India's sugar production rose from 2.6 lakhs tons in 1939-40 to 3.36 lakhs tons in 1940-41. A more encouraging feature was the increase in the percentage of recovery over the assumed average of 9.6 per cent the average for the U.P. and Bihar factories in 1940-41 being as high as 9.8 per cent. The decrease in the quantity of cane crushed by factories is not reflected in the average for the 43 mills outside the U.P. and Bihar. The production of sugar in these two provinces fell, as a result of restriction of working, by 22.6 per cent as compared with the preceding year. The fall of 1.46 lakhs tons in output had little or no effect on prices during the 1940-41 season but the last few months have seen a strong revival in the sugar market.

The production of sugar from *gur* increased substantially during 1941 as 14 refineries including cane factories melted as much as 91,500 tons of *gur* though the average rate of recovery is computed to be 54.2 per cent as against 58.26 per cent in 1940. The substantial increase in both sugar and molasses output indicates that the sugar production of the 6 refineries in the U.P. increased on account of the short-fall in sugar produced direct from cane. The actual increase in 1941 in sugar produced from *gur* is put at 20,000 tons and this increase may have helped individual companies. The provincial contributions to sugar production in recent years have necessarily fluctuated but an arresting feature is the increase both in the quantity of cane treated and sugar produced by the 8 factories reporting from Bombay. The surprising fall in the percentage of recovery for Bombay sugarmills will not appear important as compared with the increase in sugar and molasses produced. The increase in the recovery percentage for India as a whole occurred in spite of a fall in the percentage for both Bombay and Bengal factories. A larger quantity of cane was crushed by the 9 factories of Bengal and Assam which produced 52,000 tons of sugar in 1940-41 and had apparently recovered from the setback recorded in the previous year. The average percentage of recovery in Indian sugar factories rose to 9.87 in 1940-41 and the recovery of molasses increased correspondingly. Though cane and sugar production fell off by comparison with 1939-40 the quantity of molasses fell by 80,000 tons only to 424,600 tons in 1940-41. While sugar production in India fell by 12 per cent, the output of the 3 mills in Burma advanced from 27,700 tons to 39,300 tons in 1940-41 despite a fall in the recovery percentage to 9.84. The increase suggests that scope for Indian sugar is less extensive than imagined immediately after the publication of the terms of the Indo-Burma Trade Pact. In spite of the fact that the recovery percentage of mills for Bombay, Bengal and Indian States was lower. The total number of factories having a recovery above 10 per cent. in 1940-41 was much higher than in 1939-40. The steady increase in the last four years indicates that their efficiency is by no means lower than those of rivals in other provinces, and the increase in the recovery percentage to the highest level attained in the ten years from 1931-32 was due mainly to the improvement reported by Bihar and U.P. Mills.

Allied Shipping Strength

An article by a shipping correspondent in the *Times* (reproduced in the *Statesman*) has shown what Britain can expect from the U.S.A. by way of ships. There has been since Admiral Emory Land's optimistic estimate of shipbuilding output for the next two years little to show that there is a crying need for ships. The substantial decrease in losses at sea during July and August promises immediate relief as compared with the proximate aid of the U.S. Maritime Commission. Major Sunde's speech describing how much Norwegian tonnage had been made available to Britain furnished evidence of substantial reinforcements during the war for the mercantile marine. More recently figures have been made available of the Allied tonnage available to Britain together with the losses due to enemy action. Britain has at her command 187 warships manned by 14,730 officers and men in addition to her own navy. The 1670 merchant ships with a displacement of 7.25 million tons represent an even more important asset in view of the losses of over 4.6 million tons of shipping by the end of June. The Allies too had lost 334 ships totalling nearly 1½ million tons; but the total losses inclusive of neutral tonnage were greatly below the German claim to have destroyed 12.4 million tons of shipping. The figures are supported by independent evidence as to the Dutch shipping that escaped capture. According to figures released recently by Mr. A. V. Alexander three-quarters of Holland's fleet totalling 3 million tons was saved. Out of Greek tonnage totalling 1¾ million tons fully a million was saved. Out of France's total tonnage of 3 million tons 400,000 tons have been obtained; out of the Belgian mercantile fleet of 400,000 tons, 200,000 tons have been saved. Out of Poland's fleet of 100,000 tons practically the whole has been saved. Out of Allied ships with a total of 13 million tons over 7 millions have been taken over for use during the war. This implies also that Germany got about six million tons to reinforce her original fleet of 4½ million tons. There was Italy's merchant fleet of 3½ million tons at hand but the necessary subtraction must be made. Capture, sinking and scuttling must account for 4 million tons, even of this a proportion is operated under the British flag. There have been during the course of the second year substantial losses for the Axis at sea and the Mediterranean convoys have found the Fleet Air Arm more formidable than in November. It is obvious that with losses running higher than ever in recent months the total tonnage available to the Axis must be below the 7¼ million tons made available by friendly nations in alliance with Britain at present. The war at sea has virtually ended with the sinking of the *Bismarck* and such exploits as a lucky attack on a convoy in the Atlantic cannot recur with the strengthening of U.S. patrols and the adoption of the convoy

system for U.S. cargoes up to Iceland. It is likely that supplies, not the shipping necessary, are viewed as a difficulty by the Expediters headed by Mr. Harry Hopkins.

All About the Soybean

The soya bean has certainly been popularised by the Germans in Europe. Rumania and other countries have been persuaded to grow the bean which is valuable for its oil which is evidently the prime substitute for the vegetable fats denied to Germany by the British blockade. Quotations might still refer to Dalny beans but the Soya bean has ceased to be a native of Manchukuo. What place the soya bean (as Americans call it after it became popular in the States) occupies in agriculture today is described by Dr. Burns in his article in the current issue of *Indian Farming*. According to an American authority, the soya bean has 52 uses and finds application in industries as far removed as plastics, paints and explosives. The green plant is used as fodder. From the Far East its cultivation has spread swiftly to Europe and America. Argentina is trying it out, so is South Africa; and Australia, like India, is experimenting with its cultivation. Germany has always been the chief customer for Manchuria's crop, equal to 35 per cent of world production in most years. The crop is hard and well suited to the prairies of Asia and America alike. That is why U. S. production has shot up in 1939 to over 2 million tons and the more versatile soya bean tended to displace the groundnut in world commerce. Trials in England with the soya bean have yielded no definite results, but Germany went ahead with the soya bean as a mixed crop. The British Empire is dependent on imports which until 1935 were free of duty in Britain. The nutritive value of the bean has been boosted by faddists as well as scientists; but the Coonoor laboratory came to the conclusion that the soya bean is not better than the pulses already in common use. While nothing need be said about the difficulty of making the bean familiar, it must be said that the higher fat content and hence higher caloric value confer advantages on the soya bean as a hard-scale ration. The experiment points to the desirability of encouraging its cultivation and devising new recipes. The plant does well in various parts of India, doing best on rich soils with moderately deep cultivation with the help of farm manure. It generally succeeds a kharf crop sown in and, being rain-fed, is independent of watering except in the Punjab and Sind. The yield per acre is estimated at 500 to 1000 lbs per acre.

Owing to the rise in prices witnessed after 1939 cultivation may become profitable, but the soyabean has yet to win a market in India. There are no industries to buy up the beans either for flour or oil. Dr. Burns argues that the only way of popularising the crop is to show the cultivator that the soyabean is a suitable money crop. As it is, it is doubtful whether its cultivation will extend at the expense of cotton and groundnut. Dr. Burns' article presents nearly all the facts required about soya beans and urges that, where ordinary pulses are lacking, the soya bean can be grown with advantage especially in an altitude over 5000 feet and in areas liable to waterlogging. The article indicates the advantages of the soya bean as a useful crop but does not exhibit the rhapsodic fervour of lucky experiments who ask that soya coffee should go with cake and soya biscuts.

Changes In Dutch Indies

Reference was made to the changes in the trade of the Dutch Indies introduced by the war. The growth of trade with America and Japan and the contraction of trade with Europe were certainly foreseeable developments. The stimulus to local industry was again, in the nature of things, predictable and one may refer to impending changes. The lack of markets for sugar in the Far East may well lead to a fall in Java's sugar production and a corresponding increase in local foodstuffs rendered inevitable by the establishment of Japanese supremacy in Indo-China. The picture of economic life in the Dutch colonies drawn by the President of the Javasche Bank deals with the past year, and the adaptability developed since April 1940 is regarded as a point in favour of Dutch administration. The transfer of the principal commercial and financial institutions to Java has certainly made for stability of a high order, and the Dutch Indies, now on guard against aggression, have helped in the Allies' war effort in many ways besides providing dollars out of sales of tin and rubber. Until April 1940 trade with the British Empire languished but after the Government of Holland was established on English soil, the Dutch Indies guilder was linked to sterling—the first hard currency to join the group. The severance of ties with Holland influenced the growth of trade with Britain but the main feature of this difficult transition period was the evolution of appropriate machinery. As the President of the Javasche Bank observes "A line of conduct had to be fixed with regard to the Netherlands guilder in view of various current financial agreements based upon this currency." Far-reaching steps had to be taken in regard to the jurisdictional position of those Indian firms which had their seats in Holland and also with regard to the position of their directors. Special attention had to be given to the finances of the Netherlands Indies Government in view of a sharp rise in expenses which had to be expected. Emergency decrees settled financial relations and safeguarded vital interests, at least for the time being. New committees were set up. The most important was the N.E.I. foreign exchange control and the Committee for legal trade in wartime. The exchange control was set up to protect the N.E.I. guilder and the committee for legal trade took care to protect the interests of the mother country. The transfer of many companies and arrangements for their management from the head offices in Batavia had to be made. The committee controls the activities of corporations in the Indies and the acts of representatives of persons in occupied Holland. It looks after the interests of people in occupied Holland and ensures at the same time that there is no trade with enemy-occupied Holland. A central bureau for reinsurance of life risks was set up to protect policyholders of Dutch companies. The committee took over important German assets in the Indies. The N.E.I. Government has resorted to higher taxation and decided to postpone redemption of debt. A revaluation of gold held by the Javasche Bank, the issue of bank notes, a monetary agreement with Britain and a payments agreement (now suspended) with Japan followed. The control of both exports and imports was resorted to for the usual reasons. More important was the plan for the establishment of important industries with the help of the Government. Shipping ordinances were enforced and ships were requisitioned. Then came the introduction, in the beginning of 1942 of the so-called priority arrangements with reference to important export products. National service with provision for exempted persons and arrangements for compulsory civilian service had to be made after May 1940 and the Governor-General of the Indies still enjoying public co-operation, was able to take quick and effective steps. Export trade was in a bad way except for increased demand for rubber and quinine as also enlarged foreign buying of tin and oil products. The demand for coffee and copra was poor and shipping

difficulties too had unexpected results for tropical agriculture. The progress of local industries however provided an encouraging feature and in spite of the natural reluctance of capital private investment was stimulated by special measures among which was a bill providing for a fund of ten million guilders and permitting certain tax adjustments.

Substitutes for Petrol

SUBSTITUTES for petrol claim attention more than ever on the score of rationing. The admixture of power alcohol is recommended strangely on the score of economy and reference is made to the departure in policy in Australia. Admitting the necessity for rationing, the advocates of alternative fuels urge that their suggestions must be considered. The installation of producer gas equipment on motor vehicles is recommended by some who point to the example set by the Madras Government. It is pointed out in this connection that charcoal gas enables the bus-owner to become independent of rations altogether and keep his vehicle on the route for which the vehicle is licensed. No specific relief in regard to taxation, either local or provincial, has so far been promised, and the only encouragement held out to users of producer gas is that the Forest department's policy will be adjusted to ensure ample and regular supplies of charcoal. A bare promise in a Government Order does not count for much; the initial cost and the recurring adjustment of producer gas equipment must be set against the simplicity of using power alcohol in a mixture. Distillation from coal is urged by a few scientists who are impressed by German achievements in this field and refer with awe to the Bergius and Fischer-Tropsch processes. The actual quantity of liquid fuel that can be had in India from turning coal into oil is the subject of conjecture and whatever be said by coal-mining experts on the need to try low temperature carbonisation, the sacrifice of revenue involved will appear unacceptable. A few years ago the entire subject was reviewed by a special Committee in Britain which indicated that a country with the largest coal output in Europe could not make herself independent of imported oil. The case is different as regards power alcohol. An annual estimated output of 4¼ lakhs tons of molasses furnishes the raw material for the distilleries. The requisite legislation is waiting to be put into force and it seems surprising why Upper India should not adopt the policy, apparently successful in Mysore, of compelling petrol users to take a prescribed quantity of alcohol.

The familiar arguments have been repeated with skill and emphasis in a communication addressed recently to the Government of India by the Committee of the Federated Chambers. It has been pointed out that reduction of transport facilities entailed by petrol rationing will prejudice agriculture and industry alike. The argument has greater force owing to the contemplated reduction of train services in a desire to save the locomotives and rolling stock on certain railway systems. The Federated Chamber like its member bodies has therefore entered a plea for the early issue of licenses for the manufacture of power alcohol and arrangements with the oil companies for its compulsory admixture. The communication has received a large measure of public support on the ground that the distillation of power alcohol will help to solve the molasses problem of the sugar industry. Apart from a few small outlets, there is no large demand for molasses that can be converted into 24 million gallons of power alcohol. The manufacture of power alcohol apart from its value as a cushion against the transport difficulties arising from rationing, will help to stabilise the sugar industry, the second largest and one of the oldest industries in India. There is besides the saving of Rs. 65 lakhs to the country arising from a reduction of petrol imports. The usual excise could be applied to power alcohol

BENGAL NAGPUR AND EAST INDIAN RAILWAY
IMPORTANT NOTICE REGARDING INCREASED CHARGES ON COAL TRAFFIC
It is notified for general information that the period during which the increased charges are to be levied at the rate of 20% of total freight charges will be from 1st December 1941 to 30th April 1942 and not from 1st November 1941 to 31st March 1942 as Previously notified. The rate of 15% will apply up to 30th November 1941 and again from 1st May 1942.

BHARTIA ELECTRIC STEEL CO., LTD.
42, SHIBTOLLA STREET, CALCUTTA
NOTICE
Patrons and Customers are hereby informed that by a special resolution dated the 28th day of August, 1941 the name of HUKUMCHAND ELECTRIC STEEL CO., LTD. has been changed to BHARTIA ELECTRIC STEEL CO., LTD. The change of name has been duly sanctioned by the Government of Bengal. This change of name does not involve any change in the administrative or technical staff (including European staff) which will continue as formerly to render the best possible services to all our customers.
BHARTIA CO., LTD.
Dated Calcutta, the 22nd Sept. 1941 *Managing Agents.*

and there is no bar to the adoption of legislation for the mixture of power alcohol. The local manufacture of distillation plant can be attempted and import, too, cannot be viewed as impossible in view of facilities obtainable through Anglo-American co-operation.

Vague Apprehensions

The growth of the rubber industry in India can be measured by the statistics of consumption of raw rubber in India. According to the house organ of the Bata Shoe Co., consumption of rubber, for the current year is estimated at 15,000 tons. It was as low as 121 tons in 1929, but rose rapidly after 1932 to 3,188 tons in 1935. The growth of the footwear industry by then had raised rubber consumption and development since of the shoe and other rubber using industries explains the further increase in consumption. It has been said that there are not less than 47 rubber factories which produce in addition to shoes and tyres all sorts of goods and consume yearly 12,000 tons of rubber. Since the Indian rubber quota is 12,500 tons and the International Committee permits production in excess of the quota there can be no reason for apprehending scarcity of rubber in India. It has, however, been suggested that by 1943 scarcity may develop as consumption is expected to increase to 20,000 tons while the quota may be left unchanged. It might be pointed out in this connexion that the Rubber Regulation Committee is sure to raise the basic quota as was done when the international agreement was renewed for another term.

The Batanagar paper suggests that restriction of rubber cultivation in India in accordance with the international agreement is strange, particularly when internal consumption is rising. It must be pointed out that India can count on supplies from Burma; yet Indian producers, who have recorded their disapproval of uncouponed rubber imports from Burma which do not come within the quota and confer advantages on the Burma planter when selling rubber to the Indian market may be inclined to object. It is however strange to find the paper which presumably speaks for the consumer saying that there may not be enough rubber. The International Committee is sure to take note of the progress of the rubber-using industries in India by the time the next quota is fixed. If a higher quota is allotted, Indian estates can produce 15,000 tons without effort since budgrafting raises the average yield per acre. Though this has not been adopted extensively, most estates retain reserve acreage and the anticipated increase can be surely met. Further, there is the possibility of an appreciable decline in exports after the war. Exports of raw rubber have increased owing to the war and any fall under this head will release an additional quantity for Indian consumption. It has been suggested that if all the millions of India walked on rubber shoes 48,000 tons of rubber would be needed, and if the tyre industry's increasing requirements are also allowed for, consumption must show a staggering increase. The remedy propounded is the uncontrolled development of rubber cultivation, which is hardly advisable in the circumstances. Restriction may appear to be in the interests of planters, but manufacturers have no reason to regard rubber supplies as inadequate or rubber prices as too high. India, with Ceylon and Burma at hand to provide additional supplies, has little reason to expand the area under rubber, and planters who have benefited from the Scheme in operation for the past nine years will answer the alarmistic arguments put forth on the basis of the increase in consumption which must be largely due to the war.

Supplies Under Lease & Lend

Steel is not the only commodity subject to Lease-Lend procedure at present. The control procedure has been varied in regard to civil aircraft. Private importers have to get in touch with the Director of Civil Aviation before placing orders for imported aircraft. Another commodity coming within the Lease-Lend programme is oil. Petrol and kerosene oil are excluded but lubricating oils and allied products such as tetra ethyl lead, tinplate, drum sheets, finished steel products generally and drilling, refining and distribution equipment. New procedure for getting imports from the U.S.A. has been outlined in a recent press note. Oil companies have to tell the Petroleum Dept. in London and the Supply Department in India what they want for satisfying the requirements of (1) the Government and (2) private consumers. The estimates will be checked and forwarded through the Supply Department to the Indian Purchasing Mission in the U.S.A. Licenses for imports are to be issued as before by the Commerce Department to companies centralising their indents in advance and also for importers who have been in the habit of importing direct from the U.S.A. The quantities licensed will have to be procured by payment in the ordinary manner and will not therefore come under Lease and Lend rules. The main purpose of the new procedure is to consolidate indents of importers through consultation with the Petroleum Department and get oil through a single requisition. The Petroleum Department will be the single directive agency procuring supplies; and purchases of supplies for which dollars have to be paid will have to be approved and an undertaking that licenses will be used only on approved purchases must be given. The companies furnishing indents will have to pay the Petroleum Dept. at current prices for material released on Lease and Lend. It is added that the Petroleum Dept. will keep accounts for each Empire country. It may be assumed that Canada must, however, be outside these arrangements. In the case of India the disposal of the proceeds will be the subject of general arrangements between the Treasury and the Government of India. The press note suggests that oil supplies of certain types will have to be paid for as usual, the purchase price going to the British Government which benefits first through the Lease and Lend act and secondly through the bulk purchases in America. The third advantage is, however, the most obvious since payments of private importers in dollars can be applied for other purposes in the U.S.A., and to that extent, dollar exchange can be conserved.

Canadian Stability

Industrial production in the Dominions is known to have expanded considerably as a result of the war. The statistics compiled by the League of Nations in the monthly bulletin for May afford proof of such expansion. In Canada there was the usual recession in the first quarter of 1941 but the index average for 1940 was far higher than the index for the opening month. The index of general industrial production rose in September to 149 from 124 in January in 1940, and the index stood at 145 in January 1941. The progress of Canadian industry last year assuredly can be measured by the advance of 11 points. The index of production in the adjacent country, the U.S.A. rose by 14 points to 125 and the further advance recorded in the first quarter finds no parallel in Canada. The expansion in Canada's export trade, particularly, in steel, automobiles, and paper and pulp has often been described and how much production has kept step with war demand is illustrated by the rise in Canada's production of pig iron and steel last year. The average for 1940, was more than 50 per cent above the 1939 average and in the case of steel ingots too the increase was well over 40 percent. Production had increased to 188,000 metric tons by December and a new heigh was touched in March 1941 when steel ingot production rose to 199,000 metric tons. Comparison with India can hardly be possible though iron and steel production is known to have increased in India owing to the war. The production of coal showed a striking increase in Canada as the monthly average was over a million metric tons as against 903,000 tons in 1939. An increase of over 10 percent in the production of oil stands out as a remarkable feature. In the New World new oil producers are progressing rapidly and the increase in Argentina's output last year is far more important than the recovery in Mexico's production. The cement industry in Canada underwent remarkable expansion with output exceeding 156,000 tons in July with a further increase to 175,000 tons in October. The sharp decline in winter is an interesting and intelligible feature. The absence of figures relating to fertiliser output rules out any conclusions as regards minor industries but the reduction in Canada's exports of copper carries with it a suggestion of increasing domestic consumption. In the wake of rising production the Canadian price level also rose; the monthly average for 1940 being eight points above that for 1939 though prices during the year were distinguished by the same stability as is indicated by the gentle rise of four points only in the cost of living, with the index rising from 86 in March to 89 in December and staying there in the succeeding four months. The Canadian indices of production, prices and cost of living showed no tendency to swing swiftly away from the opening level of 1940.

United Iron and Engineering

Quite contrary to expectations, there has not been any boom in company flotations since the beginning of the war. It has not been possible to take advantage of the emergent conditions in industry on account of the difficulties in getting new machinery, import licenses and shipping space. The few good propositions that have been placed before the public have met with overwhelming response.

The prospectus of the first engineering company to be started since the beginning of the war is published elsewhere in this issue. The United Iron and Engineering Works, Limited has been singularly lucky in being able to purchase a completely equipped works with uptodate plant in production from the vendors who are the managing agents. The works have been inspected by Government inspection staff and declared eligible to handle war supply orders. Already several large war orders have been received and it is reported that the margin of profit on these orders is considerable. The estimates given in the prospectus make it possible for a substantial dividend to be paid to shareholders from the earnings for the very first year of working. On the basis of single shift working the monthly earnings, before providing for depreciation and taxation, are estimated at Rs. 1.22 lakhs. It need hardly be emphasised that the works will be obliged to work day and night and the earnings will therefore be considerably higher.

The authorised capital is Rs. 15 lakhs in ordinary shares of Rs. 10 each. 6,200 shares have been already subscribed for while 50,190 shares are to be allotted to the vendors in consideration for the sale of the works to the Company. The remaining 93,160 shares are being issued to the public at a premium of Rs. 2-8 per share. The enthusiastic reception accorded to the ordinary shares of Jessop and Company, the present quotation for the shares around Rs. 19-4, brings forth clearly the popularity enjoyed by engineering shares in India. The premium at which United Iron shares are issued should, therefore, be considered purely nominal.

OBJECTS:

The Company has been formed generally for purposes set out in its Memorandum of Association and particularly for purposes of carrying on the trade or industry of iron and steel founders, mechanical engineers manufactures of machinery and implements of all kinds, rerollers and tool-makers.

Amongst the industries which have received a powerful impetus from the war, the engineering industry is the most fortunately placed.

If India, already a granary, has now become, in the conditions of the present war, the arsenal of what has come to be called the Eastern Group of the Empire, all engineering firms have been pressed into service and every one of them is working to full capacity. Considerable expansion has been effected in most of the existing factories. Even so, the orders that are being placed by the War Supply Department are far in excess of the capacity of the existing plants. The Government are prepared to provide resonable facilities to such engineering firms as are in a position or will be in a position to take on hand and execute war orders.

But, both in the expansion of existing plant and in the installation of new factories, the main difficulty, which may be described as an almost insuperable difficulty, is that of securing new machinery. Even where machinery can be secured from foreign manufacturers, the obtaining of import license and shipping freight have been onerous handicaps.

THE UNITED IRON AND ENGINEERING WORKS LIMITED is fortunate in securing from the vendors a completely laid out engineering workshop, able to cope not only with a large variety of the orders that may be expected in connexion with the war, but with the supply of machinery, implements and tools for which there should be increasing demand in the country after the war, thanks to the accelerated progress of Indian industries under the stimulus of war.

The factory which has been acquired by the Company is situated in Trachand Ganguli Street, Belur, and is approached directly from the Grand Trunk Road. The factory is situated in freehold land of 11 bighas.

The Works have been satisfactorily laid out and it has already been inspected by the Government inspection staff. It has now been recognized that the plant is in a position to handle Government orders and, as will appear from a later paragraph, the Company has already on hand considerable Government orders.

The scheme of plant installation marks a departure from that of most other factories in India. The planning of the plant is in accordance with the American system, providing for precision in production, safety of the workers, and minimising of damage to machinery. Although this has cost a little more at the outset, it has been proved that it is economical in the long run.

We give below brief details of the more important departments of the factory.

WATER-PROOFING:

Water-proofing with rubber latex has been successfully demonstrated in our factory. As a result of a large number of experiments carried out in our research branch, we have established twenty different processes of proofing of various grades of textiles. In this branch of work, we enjoy a complete monopoly; and we have been favoured with orders from the Government sufficient to keep our plant fully engaged.

OIL-DRESSED FABRICS:

Proofing of oil-dressed factrics is another specialty which has been made possible by the efforts conducted by this Company. The oil-dressed fabrics that we will be producing are fully taken up by the Government.

CHAIN-MAKING:

This is another new venture to India; and our chain-making plant has now passed the experimental stage and is in full working order. Here, also, whatever we are in a position to produce is but a fraction of the Government's requirements. This is an industry whose peace-time possibilities are no less striking than in war-time.

MACHINERY AND TOOLS SECTION:

The demand for machine tools in India may be said to be almost unlimited. While this Company will be undertaking the manufacture of a large number of various machine tools, it will give special attention to the manufacture of such machinery and tools for which the demand from the Government is enormous.

RE-ROLLING MILL:

We have installed a Re-rolling Mill whose capacity is five tons of rod in one shift per day. The demand for the products of a re-rolling mill has been greatly accelerated since by far the greater proportion of the manufactures in the steel factories of India is required for the Government. The establishment of a re-rolling mills in our factory is especially well-timed as a communique issued by the Government early in September imposes handicaps on re-rolling mills started on or after September 1, 1941. The Government are concerned about the available scrap metal which constitutes the raw material for re-rolling mills. The available supply is scarcely enough to enable the existing mills to carry on their normal business. In these circumstances, the Government feel that they may be called upon to regulate the supply of scrap metal to re-rolling mills and other users. If and when such measures are taken the re-rolling mills started on or after September 1, 1941, will not have their claims recognized for a share of scrap metal. This Company is fortunate in having installed its re-rolling mill before September, 1941.

Details of capacity, expected output, likely cost of production and sale prices cannot be given for each section as we are forbidden from disclosing such information during wartime. In broad terms, however, we may point out that, in our estimation, the Company expects, on the basis of one shift working, to earn a profit of Rs. 41,000 per month from the machine shop; Rs. 11,000 per month from the re-rolling mill; Rs. 24,800 per month from the Foundry; Rs. 18,500 per month from hard rubber; Rs. 25,500 per month from latex-proofing; Rs. 3,000 per month from chain-making; Rs. 4,000 per month from machine tools. Our estimates show a monthly proffit of Rs. 1,22,000 which does not, however, provide for depreciation of machinery or taxes.

For the same reason, we are precluded from giving details of the orders that have been placed by the War Supply Department. We have, therefore, to content ourselves with saying that the margin of profit on the orders already accepted is expected to be Rs. 60,000. Further orders are being booked; and the preliminary estimates show that, on the basis of our tenders, the margin of profit may be over Rs. 1,00,000.

In the description of the various activities in which the Company is in a position to engage itself, we have given only the more important sections. The works are planned on the basis of a general engineering factory; and, with slight alternations here and additions there, the workshop will be able to cope with most of the work that we will be able to secure.

The works have been so planned as to be ready and alble to cope the engineeing requirements of normal times, once war orders cease to flow. In fact, building construction has been held up during the last two years to high prices of building materials, particularly iron and steel. A boom in building is expected soon after the war is over, and plenty of work for an engineering works may be confidently looked for. Moreover, Indian industry has expanded in strident style in these two years; and the supply of machinery, implements and tools for Indian industry will open up new possibilities for an engineering company.

The Company has paid Rs. 5,01,889 as the price for the land, building, machinery and stores and stocks and this is the price based on the Valuation Report made by Messrs. Ghose and Saha, High Court Valuers. The company has good reasons to think that this is a satisfactory bargain. Prices of machinery since the purchase was made have gone up enormously; and stores, spare parts and stocks have risen in prices even higher. Not only have prices been enhanced very sharply but many of the categories of machinery as well as of stocks will not now be obtainable at any price. No payment has been made to the vendors as promotion money. They have been paid no more than the price arrived at the valuers.

The vendors were requested to complete the installation of plant and the erection of machinery according to plan so that the offer of shares to the public could be made only after the works have reached the production stage in the more important sections. The works have now reached the production stage.

Shares must be considered to have an exceptionally attractive value in the case of an engineering company completely and scientifically laid out and in a working condition from the time the public issue of shares is being made.

The encouraging prospects for Engineering Companies are forcibly brought out by the high level of prices at which ordinary Shares of established engineering companies are quoted at the present moment. The position will be clear from the table given below:—

Name.	Paid-up per share.	Market Quotation.	Last Dividend.
	Rs.	Rs.	%
Alcock & Ashdown	100	580	15
Burn & Co.	100	438	30
Braithwaite & Co.	7	9½	8.93
Indian Galvanizing	10	31	20
Saran Engineering	2	6½	12½

AGREEMENTS:

The following agreements have been entered into by or on behalf of the Company:—

1. An agreement between the Company of the one part and Messrs. United Trading Corporation of the other part being the Agreement under which the Company has agreed to acquire the buildings, machinery and stores referred to elsewhere in this prospectus.

2. An agreement between the Company of the one part and Messrs. United Trading Corporation of the other part for the appointment of Messrs. United Trading Corporation as managing agents, the terms of which are referred to elsewhere in this prospectus.

APPOINTMENT OF MANAGING AGENTS AND THEIR REMUNERATION:

The Articles of Association provide that the first managing agents of the Company shall be the United Trading Corporation for a period of 20 years certain computed from the date of the incorporation of the Company. The remuneration of the managing agents as such shall be:

1. A commission at the rate of 15 per cent calculated on the net annual profit of the company as defined in Section 87 C (3) of the Act with a minimum of Rs. 15,000 (Rupees Fifteen Thousand) per year in the absence or inadequacy of profits in any year.

2. Subject to sanction of special resolution an office allowance at the rate of Rs. 1,500 (Rupees one thousand and five hundred) per mensem payable monthly on the first day of each month.

VENDORS' AGREEMENT:

The vendors' agreement, which was executed by the Company on April 15, 1941, provides for the sale by the vendors and for the purchase by the Company of the property of the vendors at 6, Tarachand Ganguli Street, Belur, together with land, factories, houses, outhouses, buildings, sheds, electric installations, fixed plant and machinery and other fixture together with stock in trade, movable plant and machinery on the said premises. The amount payable to the vendors is Rs. 5,01,889; and this amount has been paid by the allotment of 50,190 fully paid up shares to the vendors and/or their nominees. The price payable by the Company has been fixed on the basis of the valuation report by Messrs. Ghose and Saha, High Court Valuers.

Below is given a summary of the Valuation Report:—

1-B, Old Post Office Street,
Calcutta, April 11, 1941.

REPORT ON VALUATION:
Re: The United Iron & Engineering Works Limited at Belur.

Under instructions from Mr. J. C. Bose, Chief Engineer, THE UNITED IRON & ENGINEERING WORKS LIMITED, I have valued the land, buildings and machineries of the above Company.

The land is a very valuable one as a factory site, being very near to the Grand Trunk Road and also the River Hooghli. It will be very difficult, at the present moment, to get land which is so suitable for a factory site.

The building is planned well and admits of maximum efficiency and smoothest functioning.

The machineries are particularly valuable as it is next to impossible to secure many of these machineries at any cost at the present moment.

I value the land at Rs. 93,458 (Rupees Ninety-three thousand four hundred and fifty-eight) only, the structures at Rs. 1,60,386 (Rupees One lakh sixty thousand three hundred and eighty-six only) and the machineries, stock, etc., at Rs. 2,48,045 (Rupees Two lakhs forty-eight thousand and forty-five).

The total valuation is thus Rs. 5,01,889 (Rupees Five lakhs one thousand and eighty-nine only).

The details of valuation are annexed herewith.

Sd/-. T. K. Ghose,
B.Sc. (Glasgow), C.P.E., A.M.I.E. (Ind.).
Chartered Engineer (India),
In the approved list of the Registrar O.S.,
High Court, Calcutta.

At the time when the vendors' agreement was executed, the directors requested the vendors to complete the erection of the works, the Company undedrtaking to pay the vendors the actual expenditure incurred by the vendors on the basis of final bills submitted by them in respect of the expenses incurred subsequent to the adoption of the vendors' agreement. The Directors have been of the view that the issue of shares to the public should be made only after the factory has reached the production stage in the more important sections. The works are now in working order in all but one or two sections.

INTEREST OF DIRECTORS.

Mr. N. C. Sanyal is a partner in the firm of Messrs. United Trading Corporation who are the vendors, promoters and managing agents of the Company. Mr. K. N. Dalal is the Managing Director of the Nath Bank Ltd., which is one of the bankers of the Company and also one of the bankers of the Managing Agents.

MINIMUM SUBSCRIPTION:

The minimum subscription on which the Directors may proceed to allotment in respect of the present offer of shares to the public is 5,000 shares.

DIRECTORS' QUALIFICATIONS & REMUNERATION:

Unless otherwise determined by a General Meeting the qualifications of Director (other than an ex-officio Director) shall be the holding of 500 shares of the Company of the value of Rs. 5,000 in his own name solely or jointly with another or others and whether beneficially or as a trustee for another or others or otherwise howsoever. A Director may act before acquiring his qualification (if any) but shall in any case acquire his qualification (if any) within two months of being appointed a Director.

Each Director shall as from the date of his appointment be entitled to be paid out of the funds of the Company by way of remuneration for his service the sum of Rs. 16/- for every meeting of the directors he attends. The Directors may allow and pay to any Director, who for the time being is resident out of the place at which any meeting of the Directors may be held and who shall come to that place for the purpose of attending such meeting, such sum at the directors may consider fair and reasonable for his expenses in connexion with his attending at the meeting in addition to his remuneration as above specified.

PRELIMINARY EXPENSES:

The preliminary expenses are estimated not to exceed Rs. 10,000 exclusive of stamp duties, brokerage and underwriting commission.

VOTING POWER:

On a show of hand, every member entitled to vote and present in person or represented under a power of attorney by a person (who is not a member of the Company) shall have one vote and upon a poll every member present in person or by proxy shall have one vote for every share held by him.

RESTRICTIONS ON RIGHT TO TRANSFER AND VOTE:

The directors may decline to register any transfer of shares upon which the Company has a lien and in the case of shares not fully paid up may refuse to register a transfer to a transferee of whom they do not approve.

No transfer shall be made to an infant or person of unsound mind.

No member may vote, act as a proxy or be reckoned in quorum whilst any call or other sum shall be due and payable to the Company in respect of any of the share of the Company.

POWERS OF DIRECTORS:

No restrictions are imposed by the Articles of Association on the Directors' powers of management and the control of the Company's affairs is vested in the Directors. The powers of the directors are, however, subject to any regulations not being inconsistent with the Articles of Association or Indian Companies Act, which may be made by the Company in General Meeting.

DOCUMENTS:

Copies of the Memorandum and Articles of Association of the Company and the agreements referred to above can be inspected, at the registered office of the Company or at the office of the Company's solicitors.

A copy of the Company's Memorandum is printed in the fold of this Pospectus and forms part of it.

APPLICATION FOR SHARES:

Application for shares should be made on the form accompanying this prospectus or which may be obtained at the Registered Office of the Company and sent to the Managing Agents or to the Company's bankers together with a remittance of the amount payable. Where no allotments are made the deposit will be returned in full; where the number of shares allotted is less than the number of shares applied for the balance of the deposit after providing for payment in full on the shares allotted will be returned.

COMMISSION:

The Articles of Association provide that the amount of commission shall not exceed 10 per cent of the issue price of the shares.

BROKERAGE:

The directors have decided to pay a brokerage of two and a half per cent (that is, four annas per share) of the nominal value of each share on allotments made in respect of applications bearing the stamp of any recognised firm of brokers.

CERTIFICATES:

Certificates will be ready for delivery in exchange for allotment letters within three months of allotment.

Copies of the Prospectus and forms of application for Ordinary shares may be obtained from the Registered Office of the Company's Brokers or Bankers.

Auditors Certificate under section 93/1/A of Indian Companies Act VII of 1913.

19th September, 1941.

We understand that an agreement has been entered into between the Company on the one part and the United Trading Corporation on the other part under which the company has agreed to acquire the Buildings, Machinery, Stores, etc. The vendors have at the request of the company now brought the factory into production stage to give effect to the above agreement.

We beg to report that the United Iron & Engineering Works Ltd., have not yet commenced carrying on business.

THE Pujas are come and the holiday spirit will soon reach its highest pitch. The trek has started to home or holiday resort. And even those, whom circumstance ties to their place in the city, may experience a vicarious satisfaction that the Moloch of work takes less toll of human energy and happiness than usually. The thought that there is less of set teeth and tense nerves or taut muscles is itself a balm to the agonies of the human spirit. Over the greater part of the world man toils hard, aye, and woman, too, for negative satisfactions, to keep the wolf from the door or the more dreaded invader from the frontier, to succour friendly peoples in distress, or to foil the fell conspirators against the community of Man. For them, a week's holiday spells utter ruin; and relaxation must wait for the still distant day of peace. The fortunate man, who has no thought for the hapless, is a pitiable brute. But holidays originate in the religious sentiment of thanksgiving for nature's bounties and, even in a rational age, is linked to the limitless potentialities of the human spirit through the cultured use of leisure. The Pujas in Bengal have a blend of the ingenuous old and the cultured new. With the greetings of the season go inevitably the prayers of Puja time, in the true Hindu spirit, that all the worlds be happy, and not any dear fragment of them.

The theme of my gossip during the last two weeks has been the shift in the basis of economic organisation among civilised peoples from an implicit and unconscious internationalism to a comparatively explicit and deliberate nationalism. This shift is generally overlooked altogether, or its importance to the future economic policy is sought to be diminished by attributing it to some strange perversity inherent in the State. From the time the Economic Section of the League of Nations put its hand to the task of post-war economic reconstruction, the truth about this shift has been obscured by a smoke screen of false and irrelevant issues. But economic policy continued to be shaped by the inexorable trends of the time. And it was not till Mr. J. M. Keynes drew attention to the inroads that science had made into the geographical division of labour, that some check was administered to this vicious tendency to regard economic nationalism as a piece of perversity or as an aberration of economic consciousness. But economic nationalism is still in as great danger as ever of losing what respectability it has. When peace comes, the victorious nations will find it only too easy to sweep away all that they have disliked. The ghost of Versailles may restrain them where political boundaries are concerned. But in dealing with economic boundaries, especially in the case of undeveloped countries like India, they will have a freehand; for, they will argue, with every plausibility, that peace will prove fragile, if the quantum of free trade falls below a certain minimum. The Atlantic charter contains clear hints of the danger that I have now indicated. Politically, so far as India is concerned, it is as if such a declaration were never made. But economically, it portends free trade, an open door for the inrush of international capital and all the rest of it. Though the charter refers to the removal of want, there is no indication that each nation will be free to attempt this prodigious problem of removing want from the lives of its people. On the other hand, the statement is positive that international co-operation will be sought for the solution of this problem.

So far as India is concerned, it is of the utmost importance that the legitimacy of policies of economic nationalism should be fully recognised. Whatever may be the nature of political changes here or abroad, the nature of our economic problem will remain unchanged. It is essentially a problem of finding food, clothing and shelter for a population of 400 millions, of creating the capital equipment necessary for the production of these goods and of providing for the renovation of such capital while it is in the process of depreciation. That problem is big enough in itself; and nothing is gained by regarding it as part of an even bigger world problem. Its solution has to be sought along the lines of the most careful organisation of local resources. If the development of a certain line of productive activity is to be determined, not by its relation to other productive efforts within the

country, but by quite extraneous standards which appeal to international capital, then this country can never hope to minimise want in the lives of its inhabitants. Such political freedom as India may win may be deprived of all practical significance if India is to abide by international conventions in the economic sphere which restrict her freedom of action.

There should therefore be widespread appreciation of the facts of modern economic life and of the issues involved. It is up to us in India to emphasise the importance of economic nationalism. *Indian Finance* has never wearied of stressing the inadequacy of free trade for bringing about optimum production. From the time of its inception, *Indian Finance* has consistently exposed the pretensions of economic internationalism. Formerly, it was only the policy of discriminating protection that was attacked. But in the post-war period it will be the whole basis of our economic development that will be threatened. For no Indian Government can afford to tackle economic development in India according to the principles that are beloved of the internationalists. It cannot afford to ask the people to be content with this industry and that, and wait for progress in good time. It will have to convince the people that not an acre of land is allowed to lie fallow if it can be helped, that the yield per acre is raised to the highest possible level, that all the industries necessary for raising agricultural production are being established and developed, that agricultural raw materials are utilised to the utmost in indigenous industry and that foreign trade is confined to goods where differential natural advantages are indestructible.

Once you are ready to apply this criterion to both sides of foreign trade, you are safe from the charge of being selfish. It is not as if imports are taboo for yourself but that you will force on others what they can manufacture for themselves. In fact, the principle that exchange between nations is to be confined to goods, in the production of which Nature still ordains some sort of geographical division of labour, is one that can apply to all nations alike. It can therefore form a stable and just basis of a world economic policy. Let us see how it compares with the rival principle of free trade. For all its trappings of economic rationalism, free trade means no more than that temporary differential advantages should be afforded the utmost free play and given the longest run. It insists that any change therein should be accomplished at the greatest possible cost to new producers as well as old and to the whole structure of national and world economy. If historical accidents of the past had made Lancashire the supplier of cotton goods to India, who is herself a producer of raw cotton, and if India, naturally recognising the absurdity of it, sets about organising a cotton textile industry of her own, the process of change rationally conceived is quite simple. If you leave the ordinary political factors out, it is simply a question of Britain making up her mind to restrict the production of cotton goods and turning her attention to the changes in her national economy which the cut in exports and in national income necessitates. Of course, it is easy to jump to the conclusion that a fall in the standard of living should be inevitable. And then one can proceed to argue very calmly that no nation will acquiesce in it, that every nation will fight against changes that threaten its standard of living, that life is after all a fight, that a regularisation of it in accordance with free trade is better than allowing economic nationalism to precipitate ill-will among nations and peoples.

It is not possible in this context to deal with all the issues suggested. Perhaps a fall in the standard of living

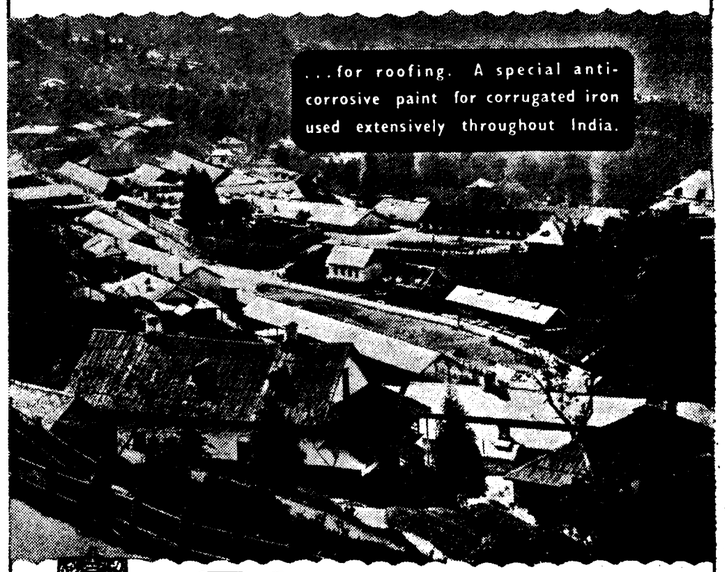
D. F. SANDERS, *General Manager.*

would be found difficult to avoid. But that it would be only temporary, there can be no question. I may perhaps remind my readers that a few months ago, I argued at some length that the economic consequences to Britain of India's swaraj would by no means be adverse to the former country. But here I am concerned primarily with the question, how far organisation of each nation's economic life rendered easier by the acceptance of the principle of confining foreign trade to goods the geographical distribution of which is more or less rigidly determined by Nature. The point I seek to emphasise most is that free trade, while it is powerless to prevent changes in the international distribution of productive activity, is quite capable of prolonging and maximising the agonies of the transition. A frank acceptance of economic nationalism would have enabled Britain to face up to the tasks of readjustment. She would have tried to make more of her cornfields instead of waiting for a world war to force her to it. She would have waited to see whether the capital needs of industrial development in India could not more than offset the loss in the export of consumer's goods. But faith in free trade, sustained and reinforced by consciousness of political power, rules out such a course of action till the most natural changes come to light, not with normal labour pains, but by the Caesarian operations of two successive world wars. For, what free trade did was to delay and frustrate the birth of inescapable change. And while it is delayed the organisation of the national economy in each case becomes a matter of makeshifts and expedients which are harmful to one and all. Organisation is possible only on national lines, for the beneficent Unseen Hand is not only unseen, but non-existent. But the implications of such national organisation are devoutly shirked.

The most potent argument for economic nationalism in the future is that it alone can afford the necessary facilities for organisation. The world will have its hands full with prodigious economic problems when the war will be over. Whole populations will find themselves houseless. Industries will have lost a great part of their plant and machinery. The earth in most places will have been scorched and singed. Roads will have been cut up with aweful craters, bridges demolished. To invoke the power of the Unseen Hand to effect the repair would be unutterable and, I for one believe, impossible folly. The advanced industrial nations with their impressive record of whole-hearted popular co-operation in the years of the war will probably be able to solve their problems by a similar exhuberance of popular enthusiasm. After all, those who slaved to die would slave all the more incessantly and willingly in order to live. But countries like India have in a sense an even more difficult task to accomplish. They will have to think out their plans, to improve them in detail and in scope; to carry out popular education suited to their aims and to get the people to put their shoulder to the wheel. To wait on changes in international economic policies is to allow every worthy movement to grow cold.



But the question still remains, is each nation to mind its own affairs? Is there no sphere in which economic relations among the nations are legitimate, inevitable and profitable to all. I have been careful to say at every stage that the advance of science has not done away with geographical division of labour altogether, that there are goods in the production of which differential natural advantages are indestructible, that the international exchange of such goods will and must continue to be effected. It is one thing to recognise this fact and provide for it. It is quite another to say that because the American steel industry has to get tungsten from China and manganese from India, Indian raw cotton must go to Osaka or Liverpool and come back to its home before its producer can use it to clothe himself. Somtime ago, I read a book in which there was a graphic representation of how each industry derives its necessary raw materials from all parts of the earth's surface. It was a very naive argument for free trade. But the trouble is, it said nothing of the quantities involved or of their value relative

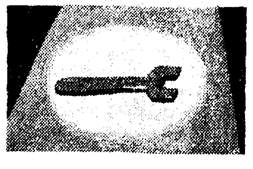
Simla, Sept. 22

SO acute is the accommodation problem in New Delhi that the Government of India's plans for moving down from Simla have had to be revised. A large construction programme, costing nearly half a crore of Rupees was undertaken this summer to add both to residential and office accommodation in New Delhi, but as evidently many of the buildings are not yet ready, it has been decided to keep the Army offices in Simla till the end of October. The Civil offices will have to complete their move before the third week of October as they have to be ready for the Assembly session commencing on the 27th of that month. Among the first offices to move will be the Eastern Group Council followed a few days later by the Supply Department. In addition to the difficulty caused by the lack of sufficient accommodation in New Delhi, the authorities have also to consider the difficulty of Railways to provide sufficient rolling stock all at once for transporting the Government's huge staff and records. Owing to petrol rationing the cost of going by road has gone up so much that most of the officers and their staff have to rely entirely on Railways. As Railways have to give priority to military requirements—and already there is evidence to show that traffic, both civil and military, has so greatly increased in the country that the shortage of rolling stock is beginning to be felt—it will not be quite easy for the Railway authorities to meet the unusually big demand this year for going down to the plains.

* * *

There is reason to hope that the experience of this year will help to make the Government of India take a more rational view of the summer problem and arrange accordingly. There has been so large a growth in the establishment—of the Government of India's offices that the Government quarters now available in New Delhi, including the buildings put up this year, are not sufficient for even one third of the number. Obviously it will be a foolish policy to undertake permanent construction for all this number, for it is largely temporary establishment for war work. It is now the Government's policy to put up temporary structures, use all the Princes' houses available in New Delhi and also employ their extraordinary powers for requisitioning private buildings for official use. This however can be no satisfactory remedy for the problem of congestion. One useful step has been taken by transferring certain large sections of the Supply Department to Calcutta and by the proposed transfer of some more to Bombay, but it is quite evident now that the time has come for more drastic steps. Both in the interests of economy and of official and public convenience, it would be a good thing if the Simla exodus is stopped from next year. Early this year there were rumours to the effect that owing to the seriousness of the war situation and the accommodation problem in Simla, the Government of India might decide to spend the summer this year in New Delhi. Actually a sum of Rs. 2 lakhs was spent in fitting up certain buildings with summer conveniences in the expectation that the Simla move would be given up, but they finally decided to move in greater numbers than before. The warning was given by the authorities that if the situation necessitated it, those going to Simla might be required to return to New Delhi at short notice but actually the Simla season threatens to be longer than any previous one. If the Simla exodus is finally stopped the buildings available in Simla can be utilised for locating permanently throughout the year certain less important Departments—as is already being done to some extent—and thereby relieving the pressure on New Delhi. At least as a measure of war economy the costly luxury of taking the whole of the Government of India to Simla for five or six months every year should be given up. Those Departments which are now permanently located in New Delhi—for want of summer accommodation in Simla have in no way suffered as a result of their summer stay on the plains.

* * *



A cautious warning has already been issued by the Railway authorities that it may be necessary to curtail services. Before the war a number of concession schemes were devised in order to attract more traffic—particularly owing to the competition from road transport. Now the problem owing to the war is to limit the traffic in order to lessen the pressure on Railways. There are clear indications that before long many of these concessions, which have been popular with the public and have considerably stimulated railway travel, will be withdrawn by all Railways. Even the number of train services will have to be reduced. During the last war the reduction went up to as much as 25 per cent, but though that stage has not yet been reached during the present war,

Across the seven seas the floating fortresses churn their way. Immense, imposing structures dedicated to protection and, when necessary, attack and destruction. In them is concentrated the marine art and invention of generations. But where today those Gleaming banks of guns throw their shadows across the ocean, tomorrow the happy keel of cargoboat and merchantman will cleave the seas.

Just as today Steel serves with its strength, to defend the battleship to give it invincible might; tomorrow, Steel will give dependability to the argosies of men, giving wings to the narrow bows as they cleave the waters.

To withstand the immense strain imposed on them, the smallest of details in modern structures are made of steel.

Bombay, September 23.

WHILE the renewed steadiness exhibited by the cotton market has impressed many reviving latent enthusiasm among speculators some are disposed to take note of the swift reaction in the share market. While all remember the warning given last month by Mr. K. R. P. Shroff at the annual meeting of the Brokers' Association not a few fail to go by his advice to avoid overbuying and support the war effort in every way. The big bulge in share values suggests that the share market is ripe for a reaction. It is possible to say that in spite of good company reports as for instance from the hydro-electric group the pace has been far too hot and a cooling off will do good to the small fry who have already ventured out of their depth. The Far Eastern outlook is now regarded as disturbing; so quickly does market opinion veer to the other side. The crop too is just in the ground yet reports of favourable weather compel people to sit up. One may guess that the news of scarcity in many districts given in the Crop and Season report buoys up certain operators who think that there will not be a big surplus. The technical position too is against those who may like to go in for short selling at present on a view of the enormous carry-over from the cotton year ended August 31st. An addition of 1 million bales from the last cotton year and an assured loss of the biggest export market must encourage the bears who think that fancy prices are being paid for cotton merely on the strength of reports of mill activity due to the war. There is, however, the fact that until cotton moves into the market next year contracts will be scarce. So some observers argue. Others still think that commercial intercourse with Japan will revive because Japan cannot afford to get mixed up in the war.

The annual meeting of the Indian Chemical Manufacturers Association took place last Friday. The retiring president reviewed the progress of the industry in the past three years. He stated that several heavy chemicals were now being manufactured in India, and he hoped that India would some day be independent of imported supplies. He regretted that the manufacture of fertilities had not made much progress. He announced that in regard to drugs and pharmaceuticals and some proprietory medicines too progress and production had to some extent been satisfactory. Mr. Amin went on to speak of the probable change of attitude that should be adopted by importing interests. He suggested that the Government might lay down a rule that goods produced in India should bear a clear mark of origin while those imported and packed or bottled in India should bear a different distinguishing mark. As regards the manufacture of sera and vaccines he regretted that Governments indifference had contributed to the penetration of Australian and East African manufactures into the Indian market. Mr. Amin's well-known views on excise policy explain the prompt adoption of a resolution calling for the framing of uniform excise regulations and another asking for permission to manufacture opium alkaloids. Another resolution passed by the Association urged that the medical stores depots should not become too active competitors with private enterprise. Special facilities for new lines have been asked for by Indian manufacturers who are not likely to get much change out of Government. Requests for freight concessions and the abolition of import duty on raw drugs naturally figured among the resolutions adopted last week and even more familiar was one for the issue of import licenses for plant and machinary immediately wanted by Indian manufacturers. Dr. J. N. Ray was among the guests and an even more important guest was Dr. Jivraj Mehta who made a separate speech supporting the claims of the drug and chemical industry to special attention.

Now that cotton mills have made additional grants by way of dearness allowance local silk and art silk mills grouped in their own association have decided to follow suit. They propose to pay an allowance on the familiar sliding scale principle so that the allowance is adjusted to the cost of living. The allowance for workers will work out to 0-2-9 per day when the index is between 129 and 133 and for every two points more the allowance will be raised by one pice per day. The allowance is payable as from August. Millhands have certainly no reason to grouse but the Industrial Court proceedings reveal dissatisfaction with what is described as playing off. The workers' advocates have lodged something more than a formal protest.

Bombay is to have a transport board according to certain reports. The Board will advise on the most effectual means of using available resources and the proposal will perhaps lead to a revival of water transport. The present position is regarded as disturbing, and commercial bodies will welcome the creation of a new board that will alleviate the congestion experienced acutely in the past three months. A special officer has finished his job of surveying the problem in time of war and the Transport Advisory Council's resolution has evidently borne early fruit. The Transport Advisory Council will perhaps help to get the bus system into better shape since the railways are likely to curtail services owing to pressure on rolling stock during the war and the difficulty of getting locomotives.

The Rotarians seldom find time for politics but they had a stiff dose when a past Governor Sir F. E. James made them sit down to a political luncheon. Discussing the changes likely to come after the war in India Sir Frederick assured this audience that a high destiny awaited this country. India would have a seat at the peace conference because India's war effort was substantial and she had shown that she was willing to take on the job of helping others besides herself. He added that if India had defences adequate to her size, her importance would increase, and the best means of gaining self-sufficiency in defence was through industrial development. He was sure that India would have a big place in a new regional federation in relations with Britain and America. The relationship would come without prejudice to the claim for self-government. Because India had to meet bigger defence problems quickly and efficiently, India must retain an interest in other countries where her outer frontiers lay. All this was said to show that co-operation in the war was expedient and proper. It is not likely to alter the politician's own view of what is happening in India during the war.

(Continued from page 597)

to the necessaries and comforts enjoyed by the vast majority of people in the countries concerned. In fact, if you look up the publications of the League of Nations in its earlier years, you would find that for their authors, international trade was the only index of prosperity. The idea that an increase in world production could be consistent with a decline in international trade hardly entered their minds. For them, world trade and international trade meant the same thing; and whenever the latter showed a decline, they set up the most piteous wails. It is only after the great depression that this habit of exclusive reliance on international trade was slowly got over. I sometimes pride myself on having siezed the significance and reality of these distinctions earlier than most eminent economists in the West.

'EAVESDROPPER'

Tit-Bits of Industrial Technique

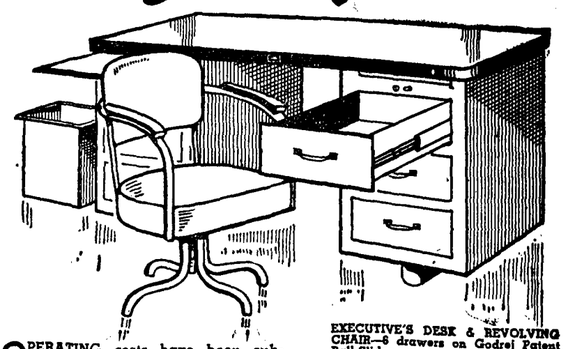
ORDNANCE factories have expanded according to plan after the outbreak of war. The Chatfield report provided for specialised industrial expansion at the same time as India's defence was improved. The manufacture of high explosives was recommended, and an important stage in the march towards explosives manufacture was reached with the acceptance test for a nitric acid plant, recently installed. Plant for the expansion of factories specialising in cordite manufacture and ammunition filling has been installed in accordance with the expansion scheme. In conjunction with the Eastern Group projects the Indian defence expansion schemes have gone on. Toluene for nitration is being made in India at a newly-erected plant, but the nitration plant itself will take some time to be ready. India can expect successful production of smoke and anti-tank grenades, incendiary bombs and shrapnel mines in the near future. Another stimulus to sericulture will be given by orders for parachutes and statictutes.

Industrial Corporation for Hyderabad

According to a recent report the Nizam has sanctioned the scheme for financing industrial development. The new corporation will be the main agency for expansion. It is believed that after it gets going it will attempt the manufacture of chemicals (sulphuric acid and its by-products) sheet glass and glass ware, starch, casein and plastics. The new company will probably obtain half its capital effortlessly as the Nizam's government is said to have agreed to take up half the shares as and when required subject to a maximum of Rs. 80 lakhs at the rate of Rs. 15 lakhs per annum. The Government has given an undertaking that rival enterprises will not be allowed for a period of 10 years after the war. An officer of the Finance Department will probably be deputed to America to negotiate for the purchase of necessary machinery. Much interest has been excited in Hyderabad by the report that the Government will go beyond the Industrial Trust to offer special advantages to a new corporation.

Home-made Surgical Instruments

The demand for drugs and chemical from the D.G. of the Medical Service has kept many concerns going. Those which are making surgical instruments have also been favoured with large orders hence the progress of the industry in wartime. It is now possible to manufacture in India nearly 75 per cent of the requirements of the Army and Civilian departments. Surgical rubber goods of local manufacture have become almost the rule in hospitals at present. As regards drugs 292 drugs and other items previously imported are now being manufactured in India.

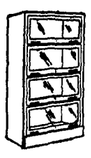


Progress in Steel-Making

Reviewing the progress of steel manufacture in India a recent press note says. The manufacture of steel by the electric process has made some progress and manufacturers of hardware and cutlery have recovered orders from the Government. One firm is contemplating the erection of a billet mill for rolling billets suitable for several types of forgings as well as in ingot mould foundry to increase the output of castings. Tatas have installed a new A blast furnace one of the largest and most up-to-date in the world with a daily production of 1,700 tons. It is expected that the furnace will raise annual pig iron production capacity to 1,250,000 tons. This firm alone is making 50,000 tools of varied types for the Army every month. More electric furnaces have been installed and certain firms have got ready a plan for a hoop and strip mill for the conversion of tube strip into welded tubes. The Mysore Iron and Steel Works faced by war extra demand has ordered additional plant for extending the rolling mill.

Reduced Railway Services

The curtailment of railway services has been foreshadowed in a recent press note dealing with the increase in traffic and railway responsibilities. The withdrawal or non-issue of concession tickets and other facilities by certain Railways is again the result of sudden increase in traffic. Strict economy in the use of rolling stock has been forced on the railways by the growth of traffic. Orders for locomotives placed in 1937 have not been fulfilled and execution is likely to be delayed further. The delay may appear an argument in favour of local manufacture of locomotives at Kancharapara and Ajmeer as recommended by the special officers deputed by the Railway Board. There is however the fact that plant etc., cannot be procured and the Railways must learn to do without. The Railways in the first two years of war carried on but in the third year, with the Middle East getting more important they are facing unusual difficulties. It is possible that in order to meet exigent demands certain passenger services will be cut, but this again may prove unwelcome in view of the reduction in road transport services entailed by petrol rationing. The railways' difficulties and their duty to second the war effort are generally recognised, and complaints will, therefore, be few and unimportant.



LOWER OFFICE COSTS!
the Godrej way

OPERATING costs have been substantially reduced in offices as well as in factories by the Time Study systems devised by Charles Bedaux and other efficiency engineers. Godrej have recently developed this important branch of engineering as a new contribution to efficiency in India.

Chairs which give correct posture for desk-work or typing, with support exactly where it is needed—desks and tables with ideal writing surfaces, drawers that slide at a touch and lock automatically, securing their contents against theft or fire—bookcases that really preserve their contents—all these lower office costs by offering you *maximum office efficiency at minimum cost.*

EXECUTIVE'S DESK & REVOLVING CHAIR—6 drawers on Godrej Patent Ball-Slides—automatic locking. Extension Slides to desk top, which is covered with linoleum: finished in stove-enamel, with chromium fittings.

PATENT STEEL BOOKCASE slide-in shutters with locks.

TYPIST'S CHAIR—adjustable back and seat.

Godrej Steel Furniture is rust-proofed and attractively finished in hard-baked enamel or heavy chromium plate. Every piece is light enough to move about and has ample strength because of Godrej patent methods of construction and fully mechanized production. Godrej offer a complete range of steel articles for every office purpose.

Jute and Jute Manufactures

(From Our Correspondent)

WE remarked last week that few in the trade were disposed to place too much faith in the Final Jute Forecast, the figures of which have just been issued, by reason of the widely held belief that the acreage figures on which the Forecast is based are far from reliable. But now that we have all the figures before us, an examination may be of interest even though the analysis cannot be described as conclusive. The first point which strikes one is the extremely conservative figure of yield which the Director has permitted himself. It may be said at once that, judging by the jute whch has been seen up to now, there is nothing to suggest a poorly grown crop. There is plenty of lengthy fibre of good body amongst the imports, about as much as in any normal season. One is left wondering therefore if the Director is endeavouring to counteract a known overestimate in area by a conservative estimate in yield. On the other hand, in every case, so far as Bengal is concerned, the "Final" acreage is less than the "licensed" acreage. And in the case of districts which are known to have suffered important damage such as Backerganj, Noakhali and Tipperah, the reduction from the "Licensed" acreage is very considerable, presumably representing area on which the jute sown has been completely lost. Having it within his power therefore to adjust overestimated acreage by revision of the figures of area in the Final Forecast, there should be no reason for the Director to play off yield against acreage, and the extremly scanty yield which approaches normal is West Bengal, which comprises the Daisee districts, and where harvesting is little more than begun. The normal 100 per cent. out-turn for West Bengal is reckoned as 3.2 bales per acre and in his Forecast the Director allows 2.98. With this we shall not quarrel. But when we turn to some of the other sections it is a rather different picture, and as a matter of acadamic interest we quote against the different sections the normal yield and the yield estimated for the current crop. Northern Bengal, normal yield per acre 3.5 bales, this year 2.74. Eastern Bengal, normal 3.7 bales, this year 2.7. Assam normal 3.5 bales, this year 2.2. Bihar normal 3.3 bales, this year 1.77. Cooch Behar, though of small extent, is only credited with 1.1 bales per acre though the normal should be similar to Northern Bengal, viz. 3.5 bales. We have heard nothing from this district to account for such a drastically curtailed out-turn. Assam and Bihar, where there has been no restriction, are permitted slight increases in area over those estimated in the Prelinminary figures. But in both cases and particularly in Assam, the area is a very long way short of that estimated last year. This is rather difficult to accept. The Bengal Government tried to bring Assam into line with Bengal in the matter of crop regulation but Assam could only promise co-operation from next year. Therefore, knowing that Bengal, next door, was to be practising restriction this year with a view to raising the price of jute, it would be surprising if the Assam cultivator has been so altruistic as to limit his jute crop to help his Bengal neighbour. Much the same applies to Purnea, the principal Bihar jute growing district, which is contiguous to Bengal.

To sum up, the Director estimates an out-turn of, in round figures, 54,22,000 B/s from 21,32,000 acres in all the jute growing provinces, showing a yield of slightly over 2.5 bales per acre. The area is some 80,000 acres less than shown in the preliminary, East Bengal accounting for practically the whole of the shortage, **viz.** 74,000 acres, distributed amongst the districts of Mymensingh, Tipperah, Backerganj and Noakhali, the last three having suffered considerable damage from floods. But from any point of view the estimates do not inspire confidence, as we have pointed out above. One is inclined to have more faith in the old-fashioned principle of calculating 3 bales to the acre, and if one accepts the figure of 21 lakhs of acres as approximately correct, lack any other guide, a probable out-turn of around 63 lakhs of bales may not be so far out at 30th June next year.

Even the official figure of 54 lakhs of bales has had a depressing effect on the speculative elements in the market and the Fatka rate steadily declined as each batch of figures emerged until it broke Rs. 70. The issue of the figures had a definitely restraining influence on business too, and only a very limited turnover has been reported, either in Baled or Loose Jute. The Export market has been idle and the only business recorded with Mills was in a small quantity of Dundee Lightning grade at from Rs. 105 to Rs. 108. From a high point of Rs. 76 the Futures quotation steadily declined to under Rs. 68, closing slightly better at Rs. 68-10. Loose Jute quotations have been lowered by a rupee all round without attracting buyers to any extent. At the end of the week Indian Jat sellers were asking Rs. 17, Rs. 15 and Rs. 12 for Tops, Middles and Bottoms. These are now offered at Rs. 16, Rs. 14 and Rs. 11 without business resulting. District Jute is on offer at one rupee under these rates. A small business was reported in supervised marks on the basis of Rs. 15-4 and Rs. 12-4, Mids and Bottoms and this basis could now be discounted by eight annas. Last week some business was put through in Jat and District Tossa Mids at Rs. 18 and Rs. 15-8 respectively.

The decline in prices in Calcutta has by no means been reflected in the Mofussil markets where prices are exceedingly difficult to break. Any attempt to reduce means a diminution of imports and not infrequently an increase in the already heavy moisture content. Beparis are certainly feeding the upcountry markets skilfully and the dealer's lot is by no means a happy one just now.

A Resume of Commodity Markets

EXCEPT for the strength of the jute manufactures market a generally subdued feeling has been noticeable in the several commodity markets during the past week. The jute market was the victim of some most surprising rumours while in the raw cotton market there was a sharp reaction on reports regarding the standstill in the U.S.-Japanese talke and the possibility of fresh complications in the Pacific situation. The wheat market has been rather uninteresting, and prices have been fluctuating narrowly on fears of price control and the reports that there will be a reduction in the import duty. It has been announced that the Government of India are considering a reduction in the import duty on wheat and that an early announcement will be made to that effect.

Another important development during the week is the decision by the Burma Government to assume control of the cotton crop with a view to insuring against the collapse of cotton prices. As most of the Burmese cotton was exported to Japan and other countries it is considered that the most practicable and most certain way of achieving this result is for Government to buy the whole cotton crop, sell as much thereof as it can at the best prices obtainable, and hold the remainder until markets can be found.

Jute:

The easier tone of mofussil markets, the publication of the final forecast figures and the rumours regarding the possibility of an increase in the acreage under the crop for the next season have been mainly responsible for the fall in prices to as low as Rs. 68-14. There was a slight recovery to Rs. 71-6 towards the close.

It is now reported that a meeting was held between the members of the Jute Advisory Committee and the Bengal Government and the question of increasing the acreage under the crop was considered. The Special Officer for Jute seems to have put forward the plea that their should be an increase in the area in the next season, so that the yield for 1942-43 might be 110 lakhs bales. The argument for an increase in the crop is the anticipation of a big increase in consumption with the cessation of hostilities. On this assumption mill consumption was expected to be around 70 lakhs bales and exports 30 lakhs bales. The representatives of the Indian Jute Mills Association also seem to have supported the Special Officer in his suggestion.

There was naturally considerable opposition from the representatives of growers who insisted that the next crop should be the same as this year's and said that they would not be agreeable to any increase in the area unless the Bengal Government were prepared to buy the whole crop at a minimum price.

The plea put forward by the Special Officer at this stage that the crop for the next season should be a bigger one has been viewed with suspicion by those interested in the welfare of the growers. Nobody can anticipate with any reasonable degree of accuracy the duration of the war period. There seems to be no justification for the consideration of an increase in the area under the crop for the next season at this stage as sowings begin only in February every year. Moreover, the argument that there should be an increase in the size of the crop for the next season on the assumption that there would be an early termination of the war, while the indications are that the war would be rather prolonged, does not seem to hold water. If it was found necessary that reserve stocks should be built up the suggestion for an increase in the size of the crop should have been made in time for the sowings for the next season. The move for an increase in the area under the crop at the present moment has been viewed with suspicion. It is pointed out that it is a clever move on the part of the vested interests to push down prices for jute which are now rather high.

Cotton:

The Bombay raw cotton market has been decidedly weak and there has been heavy selling. The drop in Oomra is very pronounced. The weakness of the New York market as well as the reports regarding the possibility of a conflict in the Far Eastern situation have been mainly responsible for the fall in prices. The understone is weak. There is a drop in Broach April-May by nearly 25 points over the week.

Wheat:

The persistent rumours regarding the possibility of a reduction in the import duty on wheat have proved correct as it has now been announced that the Government of India are considering a reduction in the duty and that an early announcement will be made to the effect. This has had a discouraging market in prices in the Calcutta market. Already large imports are arriving from U. P. The Karachi market has been irregular but there is no appreciable change in prices. There has been good export buying.

Tea:

At Sale No. 60, this week, offerings consisted of 22,152 chests of leaf tea for export, 9,558 chests of black tea, 2,678 chests of green tea and 13,419 chests of dust for internal consumption.

The range of selection on the table for Export teas was very good, particularly from the Assam District, and considering the time of the year, the quality was well represented. The market ruled firm to dearer for teas, the prices of which were in the neighbourhood of a rupee, but irregularity, especially in B.O.P's above this price, was noticeable.

Internal teas of good black appearance were dearer by about two pice and demand was strong. Dusts ruled bery firm.

It is understood that the next sale will be held on the Sept. 30, and the offerings for Export will be in the neighbourhood of 17,000 packages: freight for export has been plenty and this explains the reason why the tea sales would be continued during the Pujas this year.

"The British nation is stirred and moved as it never has been at any time in its [eventful, famous history, and it is not hackneyed speech to say they mean to conquer or die."

WINSTON CHURCHHILL.

But they cannot conquer by will-power alone. They need machines, medical stores, munitions and an enormous amount of equally important equipment. We may not be in a position to give our lives, but we can all contribute at least some small regular monthly sum to the

EAST INDIA FUND FOR BRITISH WAR SERVICES

Send through Bank, Club or Employer, or direct to Hony. Treasurer, EAST INDIA FUND, IMPERIAL BANK OF INDIA. (Space kindly donated by the Imperial Bank of India).

JUTE

Calcutta, Sept. 24.

THERE has been a rather sharp decline in the raw jute market during the past week. The publication of the further instalments of the final jute crop forecast figures has only confirmed the earlier fears of operators regarding the size of the crop for the current season. The reports that there was a possibility of an increase in the acreage under the crop for the next season also had a discouraging effect.

It is reported that a meeting was held yesterday to consider this and that there was considerable opposition from the representatives of growers. There has been some buying in today's session and the quotation in the futures market is higher at Rs. 70/10. The lowest level for the week was touched yesterday at Rs. 68/12.

Export demand is very poor and mill buying for the most part of the week was very disappointing.

In the loose jute section, an all round decline in prices has been recorded. Up country markets have been easier and with bearish estimates regarding the crop, sellers have been anxious to do business. Indian Jat Middles and Bottoms have come down from Rs. 15 and Rs. 12 per maund to Rs. 14 and Rs. 11 respectively. Ordinary business was done in Mesta Middles and Bottoms at Rs. 13/10 and Rs. 10/10 per maund.

The pucca bales section has been rather dull. Shippers have not been active. Mills are reported to have bought Dundee Lightnings 2/3 at Rs. 108 per bale and Dundee Daisee 2/3 at Rs. 79 per bale.

The future's market has been quiet throughout the week and as pointed above the lowest quotations for the week were touched yesterday. After being lower at Rs. 68/14 there has been a recovery to Rs. 70/10 to-day. The quotation at the end of last week was Rs. 74/14.

JUTE MANUFACTURES

Calcutta, Sept. 24.

In spite of the weakness of the raw jute market the jute manufactures market has been rather firm during the past week. There was some selling on report of the fall of Kiev but markets have again recovered. There has been some covering for the near positions. The rise in the quotation for Ready and October is very pronounced. 9 Porters Ready are quoting Rs. 23, October Rs. 22, November-December Rs. 20/8 and January-March Rs. 19/8. 11 Porters Ready were Rs. 28/7, October Rs. 27/10, November-December Rs. 26 and January-March Rs. 24.

In the heavy goods section there has been a substantial fall in prices with the weakness of the jute market. B. Twill for September shipment are quoting Rs. 41/12, Liverpool Twills Rs. 49/8, A. Twills Rs. 52/-, Cornsacks Rs. 43/12 and Heavy Cees Rs. 40/8.

COTTON

Calcutta, Sept. 24.

The reports' regarding the possibility of a Russo-Japanese clash have been mainly responsible for the sharp decline in values during the last two days. Even earlier in the week, an irregular tendency was in evidence with the weakness of the New York market. There was no heavy speculative selling however as it was evident that open positions had been covered. With the favourable crop outlook the fears regarding a possible cessation of exports to Japan have naturally had an encouraging effect. Some buying by Bengal on account of Lancashire manufacturers has been reported. Broach April-May are quoting Rs. 249/4, Oomra December-January Rs. 190 and Bengal December-January Rs. 154 against Rs. 269/12, Rs. 208 and Rs. 162 respectively last week.

The troubled Far Eastern situation and the reports regarding a standstill in the U. S.-Japanese negotiations has been responsible for a sharp decline in values. There has been heavy hedge selling. The abrupt decline in values, however, is not fully understandable as the whole crop will be taken up by American mills. The export subsidy for 1942 for Canada has become effective, Government owned loan cotton will be available at 13.25 percent. In New York October closed at 16.62 cents and December at 16.84 cents against 17.60 percent and 17.80 cents at the end of last week.

PIECEGOODS

Calcutta, Sept. 24.

The piecegoods market continues steady in spite of the easier tone of the raw cotton market. The demand on account of the Poojah festivities has been satisfactory. Mills have not been keen to do business. The fears of fresh trouble in the Eastern situation has had a stimulating effect. Business in Japanese goods has been of a retail character. There is not much interest in the Lancashire goods section.

GOLD

Calcutta, Sept. 24.

The uncertain war situation has resulted in a firming up of prices in the Bombay gold market. There has been some buying for hoarding. The quotation is now at Rs. 42/5/6 for all positions. Soveregins are quoted at Rs. 28/9/6.

The London price for gold has remained unchanged at 168s.

SILVER

Calcutta, Sept. 24.

The silver market has been quite steady during the past week. Quotations were fluctuating in narrow limits during the major portion of the period under review. With the uncertainty regarding the Far Eastern situation a firmer tendency has been in evidence and quotation for the forward positions are higher. Indian Mint Silver ready are quoting Rs. 63/-. First settlement Rs. 63/0/6 and Second Settlement Rs. 63/1.

Quotations in the London silver market have remained unchanged at 23¼d. and 23-7/16d. for spot and forward respectively. Small trade demand has been satisfied by selling from official sources.

WHEAT

Calcutta, Sept. 24.

Considerable speculative selling on account of the September settlement and the reports regarding favourable weather conditions in the wheat districts were possible for a sharp decline in values last week. There were also fears regarding price control. Meanwhile exports to the Middle East continue to be sent in large quantities and there is still considerable speculation regarding the rate at which exports will continue. There has been recovery during the last two days. Choice white ready are now quoting Rs. 40/8, September Rs. 40/8 and November Rs. 41/2, There has been some selling in upcountry centres. Opinion regarding the immediate trend of values, however, is undecided.

There has been slightly more activity in the Calcutta market during the past few days. No improvement in prices could be recorded as arrivals from U.P. have been on a large scale. Closing prices are lower on balance and are only slightly higher than the lowest level for the week. Cawnpore ready are now quoting Rs. 5/7/6, September Rs. 5/8 and May Rs. 5/. There is good demand for flour and flour products. Enquiry from Burma also has revived.

(Continued from page 598)

it is difficult to say how the war needs of the future will affect the present railway facilities available to the public. The gross unwisdom of the Government's policy in refusing to start the locomotive industry in this country and to devevlop Railway workshops so as to make the Railways self-sufficient in the matter of their rolling stock requirements is now being clearly seen. The lessons of the last war were so obvious that this refusal to promote Railway industries stands in glaring contrast to what has been, and is being done—in other countries. Even now something can be done to meet the needs of Railways if the Government of India can take up the question of manufacture seriously as one of essential importance for the community and act with the same zeal as Dominion Governments like Australia have done. Unfortunately even the modest proposals of the Locomotive Manufacture Inquiry Committee have been for the present shelved on the ground that they can only be taken up after the war.

MYSORE SUGAR MAINTAINS DIVIDEND

THE discouraging news from the Eastern European front and the reports regarding the pause in the U.S.-Japanese negotiations brought about a decline in shares prices early in the week. But support at the lower levels caused a slight recovery towards the close. The outlook is uncertain but there is, so far, no disposition to liquidate holdings. The tone in several sections on the Calcutta Stock Exchange was evidently cheerful and there was not the usual pre-holiday lassitude in evidence.

* * *

The accounts of the *Dalmia Cement Company, Limited* for the year ended December, 1940, just published, make a satisfactory showing. Thanks to a large increase in sales it has been possible to report a rise in earnings for the year over 1939. The improvement in earnings would perhaps have been greater but for the keen competition prevailing in the industry till November, 1940 and the higher freight charges ruling since March last.

The net profit, before providing for taxation and depreciation, for 1940 is Rs. 10,48,821 against Rs. 7,93,601 for the previous year. The sum set aside to depreciation is Rs. 6,29,921 against Rs. 3,85,926. Rs. 7,690 has been written off debenture issue expenses, brokerage etc. while Rs. 5,000 is allocated to Reserve for Contingencies. The transfer to General Reserve is Rs. 2 lakhs against Rs. 50,000 while the provision for taxation is lower at Rs. 25,000 against Rs. 80,000. The amount carried forward is lower at Rs. 45,799 against Rs. 94,758 brought in.

The consumption of cement in 1941 is regarded as higher than expected but Government control of steel may, to some extent, have an upsetting influence. It is satisfactory to note that there is a large demand for exports and the factories at ports are very busy. In spite of the fears regarding a further increase in freight charges and the rising prices of stores and material the directors are optimistic of the results for the current year. Accordingly, it has been decided to pay interim dividends of Rs. 3 per share on the preference shares and As. 8 per share on the ordinary shares in respect of the year ending December 1941.

The conclusion of the sales agreement with the *Associated Cement Companies Ltd.* has considerably improved the position of the company. Under this agreement the marketing will be conducted by a common selling organisation a percentage of the sales being assigned to both the groups in accordance with the manufacturing capacity of each.

There has been a rise in the quotations for both ordinary and preference shares to Rs. 14-12 and Rs. 126 respectively. The preference shares appear to be more attractive as they participate in profits after a dividend of 10 per cent is paid on the ordinary shares.

* * *

The important feature of the week is the announcement that *Jessop & Company* is to be converted from a private limited liability company to a public limited liability company. The company has been reported as quite busy on war orders and the earnings for the last two years should have been exceptionally satisfactory.

It is understood that the capital of the Company will be Rs. 50 lakhs. It is excepted that Rs. 20 lakhs will be offered for subscription, Rs. 10 lakhs being in preference shares of Rs. 100 each and Rs. 10 lakhs in ordinary shares of Rs. 10 each. The issue has been underwritten by Messrs. Place, Siddons & Gough at an issue price of Rs. 103 per preference share and Rs. 16 per ordinary share. The shares in their turn will be placed in the market at 105 and Rs. 16-12 respectively.

There was naturally considerable eagerness to get hold of the shares and in unofficial transactions on the first two days the quotations reported were as high as Rs. 116 and Rs. 19-4 respectively for the preference and ordinary shares. The preference shares carry the claim to a cumulative dividend of 5 per cent tax-free. Considering the fact that five per cent tax free preference shares are quoting above Rs. 120 there is further scope for improvement in the prices at which dealings are likely to occur. As for the ordinary shares a substantial dividend can be expected to be paid in the first year and the shares may be quoting before long nearer Rs. 25.

* * *

In spite of the fact that crushing was at the same level in the last accounting period as in 1939-40, the earnings of the *Mysore Sugar Company Limited* for the year ended June, 1941 show an appreciable decline over those for the previous year. This was perhaps due to the lower average prices realised and a higher price paid to cane growers.

The net profit, before providing for depreciation and taxation, is Rs. 15,49,854 against Rs. 29,53,023 for 1939-40. The provision for taxation is Rs. 2,05,000 (Rs. 6,50,000) while the amount set aside to depreciation is Rs. 3,70,176 (Rs. 3,52,487). The allocation to Dividend Equalisation Fund is lower at Rs. 2.5 lakhs (Rs. 5 lakhs) while two new funds are created, the Cane Stabilisation Fund receiving a sum of Rs. 2.5 lakhs and the Workmen's Compensation Fund Rs. 20,000. The dividend and bonus on the ordinary shares has been maintained at 20 per cent. The amount carried forward is higher at Rs. 83,319.

Even at the reduced level of earnings the ordinary dividend is covered more than twice.

The policy of the directors in respect of the dividend distribution is not quite clear and, as has been pointed out on previous occasions, has been unduly conservative. The balance-sheet, more than ever, presents a strong position. The debentures are due to be redeemed by the end of this year and there is a redemption fund of Rs. 8 lakhs available for the purpose. So far no notice has been given to debentureholders regarding redemption.

There has been a suggestion in certain quarters that one bonus share should be issued free to the shareholders for every share held and actually a resolution recommending a bonus issue will be moved at the annual meeting next month. But any decision in this regard can be made only with the consent of the Mysore Government who are reported to be the biggest shareholders. Anyway, the shares are worth more than giltedged and the yield can be reckoned only on that basis.

* * *

The redemption of some of the outstanding debentures by itself should confer interest on the year's results, reviewed by the Chairman of the *Indian Copper Corporation* in a statement circulated to the shareholders and published in this issue. Those who follow the course of share prices will certainly note with interest that after the usual allocation for depreciation the Company had £156,115-15-2 at its disposal, a sum which more than covers the 12½ per cent. dividend paid last month. The statement concerning ore reserves is distinctly reassuring, and Sir Godfrey Fell's statements concerning stocks of blister copper and forward purchases of zinc on behalf of the Corporation are calculated to build up confidence in the Corporation's prospects. The Corporation's importance continues to grow, and its services in providing copper and yellow metal cannot be too highly rated. The changes in the prices of the Corporation's products have necessarily been advantageous to shareholders who should make light of the increased working expenses entailed in part by the development work on the Badia

(Continued on page 609)

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, September 25.

ON reports regarding the fall of Kiev and the rapid march of Germans towards east a slightly easier feeling was noticeable on the Calcutta Stock Exchange early in the week. There was some realisation. The reports regarding the possibility of further complications in the Far Eastern situation also tended to have a discouraging effect. But apart from the slight recession in prices there has been no reversal of the trend. There has even been a small recovery towards the close. The usual holiday feeling has not been in evidence and business passing has been on a fairly large scale. Markets will remain closed from September 25, 1941 to October 8, 1941, both days inclusive. The speculative counters have been rather subdued during the week but there has been some selective buying of issues and substantial rises in prices have been recorded. The important development during the week is the announcement that Jessop and Company will be converted in to a public limited liability company from a private limited liability company. In unofficial transactions there was keen demand for both the ordinary and preference shares and a substantial rise in the quotations has been reported.

Giltedged securities have been steady with not much business passing. Sellers have been scarce. 3½ per cent. Paper has remained steady at Rs. 96, and 3 per cent. Government Paper at Rs. 82-10. Among terminable loans, 3 per cent. 1963-65 were dealt in at Rs. 95-4, 3 per cent. Defence loan 1949-52 at Rs. 99-14, 3 per cent. Defence Bonds 1946 at Rs. 102-2, 3 per cent. 1951-54 at Rs. 99-15, 3½ per cent. 1947-50 at Rs. 103-5, 4 per cent. 1960-70 at Rs. 110-10, 4½ per cent. 1950-55 at Rs. 111-13 and 5 per cent. 1945-55 at Rs. 111-6. There has not been much business in provincial loans. 4 per cent. *Punjab Bonds* 1948 were done at Rs. 106 and 3 per cent. *North-West Frontier Provinces* 1952 at Rs. 98-4.

Public bodies' debentures have continued to be in good request with no sellers offering. 3½ per cent. *Howrah Bridge* debentures were done at Rs. 100-6 and 3½ per cent. *Rangoon Municipal* debentures at Rs. 101. 4 per cent. *Calcutta Port Trust* debentures 1942 changed hands at Rs. 101 and 4 per cent. *Calcutta Municipal* debentures 1940-57 at Rs. 108-4. Among industrial debentures, 5½ per cent. *Dalhousie Properties* were Rs. 102.

Transactions in preference shares also have been on a restricted scale. Only a small number of transactions have been recorded in first class jute mills preference shares. *Anglo-India* were done at Rs. 178. *Birla* at Rs. 139, *Howrah* Seven per cent preference shares at Rs. 177, *Komarhatty* at Rs. 157, *Lansdowne* at Rs. 150 and *Rameshwara* at Rs. 14-2. *Craig* and *Waverley* have been noted higher at Rs. 68. *Hukumchand* preferences were done at Rs. 145-8 and *Hastings* at Rs. 151. Among other sections, *Burrakur* were noted at Rs. 154, *B. I. Corporation* at Rs. 183. *Kumardhubi Engineering* at Rs. 145, *Titaghur Paper* First perferences at Rs. 208 and *Burn & Co.* First perferences at Rs. 174.

Bank shares are slightly easier with *Imperial Bank* fully paids at Rs. 1601-8 and contributories at Rs. 399. *Central Bank* were Rs. 48-8 and *Reserve Bank* Rs. 110.

Cotton shares have been uninteresting with *Bengal-Nagpur* at Rs. 16-12, *Bowreah* at Rs. 340, *Cawnpore Textiles* at Rs. 9-3, *Dunbar* at Rs. 250, *Elgin Mills* at Rs. 26-1 and *New Victoria* at Rs. 4-5.

Coal shares also have been lacking in feature, *Bengal* being quoted at Rs. 382, *Amalgamated* at Rs. 27-8, *Bhulanbararee* at Rs. 13-14, *Burrakur* at Rs. 14-14, *Equitable* at Rs. 37-14, *New Beerbhoom* at Rs. 17-12, *Raneegunge* at Rs. 30 and *West Jamuria* at Rs. 32. *Central Kurkend* have been well held at Rs. 16-2. The accounts for the half-year ended June, 1941 have been published and it is reported that they make satisfactory showing.

Jute shares have been steady around last levels. *Howrah* are quoted around Rs. 57, *Agarpara* at Rs. 32-15, *Alliance* at Rs. 332, *Anglo-India* at Rs. 374, *Bally* at Rs. 254, *Kamarhatty* at Rs. 520, *Nellimarla* at Rs. 12-10 *Nuddea* at Rs. 70-8, *Reliance* at Rs. 59-4 and *Soorah* at Rs. 12. The strength of the jute manufactures market and the increase in shipments have considerably improved the outlook for jute shares but the uncertainty regarding the Pacific situation has had a restraining influence.

Engineering shares have been in good request. *Indian Iron* were temporarily lower at Rs. 34-10 cum-dividend. They have since recovered to Rs. 35-2 cum-dividend. The quotation ex-dividend is Rs. 33-10. *Steel Corporation* have been sticky around Rs. 20-8. *Bhartia Electric Steel* are nearly two points higher at Rs. 16-14 on encouraging reports regarding the working for the current year. Quite a sensation was caused in the Stock Exchange on the announcement that *Jessop & Company* was to be converted into a public limited liability company. Dealings in the shares were begun, unofficially, at Rs. 16-12 and there has since been a rise in the quotation to Rs. 19-4. *Indian Standard Wagon* were done at Rs. 67-8 ex-dividend and *Kumardhubi Engineering* at Rs. 5-13. *National Iron and Steel* were Rs. 9-4.

Sugar shares have been firm with *Basti* at Rs. 326-8, *Cawnpore* at Rs. 24, *Buland* and *Raza* at Rs. 21-14, *New Savan* at Rs. 11-12 and *Samastipore* at Rs. 10-4.

Tea shares, have been in good request, *Bishnauth* being Rs. 28-6, *Hattikhira* Rs. 22-4. *Nagri Farm* Rs. 22-12 and *Sapoi* Rs. 12-8.

In the miscellaneous section, *Burma Corporation* and *Indian Copper Corporation* were done at Rs. 4-9 and Rs. 2-4 respectively. *Alkali and Chemical Corporation* were Rs. 4-12, *Dunlop Rubber* Rs. 41-8, *Indian Wood Products* Rs. 29-4 and *Rohtas Industries* Rs. 24-8. There has been a further rise in the quotation for *Publicity Society* to Rs. 11. Paper shares are steady with *Bengal Paper* at Rs. 145, *India Paper Pulp* at Rs. 162, *Orient Paper* at Rs. 16-4 and *Titaghur Paper* 'A' and 'B' ordinary shares are Rs. 22-4. Among Timber shares, *Assam Saws* were Rs. 4-3 and *Borooah Timber* Rs. 18-12.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, September 24.

Money: Call money continued to be quoted at ¼ per cent.

Securities: Little or no change has been noticed in prices of giltedged securities, the same quiet conditions continuing throughout the week under review. 3½ per cent Paper ruled unchanged at Rs. 96. Among the short and long-dated issues, business was done in 1948-52 Loan at Rs. 97-14; 1951-54 at Rs. 99-13; 1963-65 at Rs. 95; 1947-50 at Rs. 103-4; 1960-70 at Rs. 110-9; 1955-60 at Rs. 114-4 and 1945-55 at Rs. 111-5.

Shares: In contrast to last two or three weeks all shares in the local share market witnessed a slight seback in prices owing to general liquidation. The fall of Kiev, the lack of fresh incentive to buying and also the fears of the fall of Leningrad had a bearish effect which resulted in a steady decline in quotations in most cases. At the low levels, however, there was good support and prices recovered to a certain extent. Price movements in *Tata Steels* were confined to narrow limits, while Mill shares, it may be said, presented a rather steady outlook.

Textiles: Despite unfavourable political news, mill shares maintained their prices, but trading was somewhat cautious. In the early part of the week there was some selling pressure owing to the weakness in cotton prices, but towards the close of the week, however, prices showed moderate improvements on receipt of more encouraging reports from cloth markets in Bombay and Ahmedabad due to enquiries from the main consuming centres. *Bombay Dyeing*, after opening at Rs. 1,277-8, touched a low of Rs. 1,262-8. but improved towards the close to Rs. 1,276-4 as compared with Rs. 1,302 in the previous week. On rumours about payment of interim dividend, *Kohinoor* met with good support, being done higher at Rs. 510. At this level, however, there was slight profit-taking. the closing price being Rs. 504-8. *Central India* were Rs. 380; *Century* Rs. 522; *Colaba* Rs. 206-8; *Gokak* Rs. 249-8; *Simplex* Rs. 147-8 and *Svadeshi* Rs. 405. In the cash list, *Ahmedabad Advance* were in demand at Rs. 343-12 following the announcement of an increase in the dividend from Rs. 8 to Rs. 10 per share for the year ended 30th June, 1941. *Sholapoor* were done at Rs. 4,150 and *Vishnu* at Rs. 1,422-8.

Hydro-electrics: The rise in prices, witnessed last week, continued due to persistent investment demand, *Tata Power* closing at Rs. 1,790 and *Tata Hydro* at Rs. 191.

Steels: Steel shares opened on Monday with *Tata* ordinaries at Rs. 399 and deferreds at Rs. 2.090. On Tuesday, the shares met with some selling pressure on reports of adverse political news which caused a drop in prices, the ordinaries being done lower at Rs. 393 and the deferreds at Rs. 2.077-2. Towards the close to-day prices have shown slight improvement, the deferreds closing better at Rs. 2,082-8 while the ordinaries remained unchanged at Rs. 393.

Banks: *Central Bank* came in for business at Rs. 48-6; *Imperial Bank* fully paids at Rs. 1,615; contributories at Rs. 398-12; *Bank of India* at Rs. 145-12 and *Reserve Bank* at Rs. 111-4.

Miscellaneous: *Bombay-Burma Trading*, after opening higher at Rs. 518-12 touched a low of Rs. 510, but closed better at Rs. 512. The new shares changed hands at Rs. 176. There was good enquiry in *Associated Cement*, *Belapur Sugar* and *Alcock Ashdown* at Rs. 151-1; Rs. 249-8 and Rs. 632-8 respectively. *Shivrajpur Syndicate* were a shade easier at Rs. 40. *Scindia Steam* were slightly marked down at Rs. 25-9; *Indian Iron* at Rs. 33-10 x.d. and *Premier Construction* at Rs. 117.

MADRAS STOCK EXCHANGE

(*From Our Correspondent*)

Madras, September 24.

The local market continued to be steady during the week under review. Rubber and Tea shares met with good support. Sugars have shown slight improvement in prices.

Securities: Government securities remained unchanged, business being restricted throughout the week under review. 3½ per cent Paper were Rs. 96 and 5 per cent 1945-55 at Rs. 111-5. Provincial Loans were firm. Among State Loans, *Mysore Loans* were in good enquiry, holders showing disinclination to sell in most cases. The 5 per cent 1955 Loan met with business at Rs. 127-8.

Mills: Mill shares maintained their last week's prices. *Cambodia* were done at Rs. 10-14; *Pankaja* at Rs. 119-8; *Coimbatore Cotton* at Rs. 126-4 and *Janardhana* at Rs. 51-4. Among Bombay shares, *Kohinoor* came in for business at Rs. 513-8 Oct; *Central India* at Rs. 382-8 Oct., and *Century* at Rs. 518-4 Oct.

Utilities: The turnover in this section has been comparatively small owing to the lack of sellers. *South Madras Electric* were unchanged at Rs. 14-8. *Cochin State Power* were quoted at Rs. 8-13; *Karaikkal* at Rs. 41 c.d. and *South Arcot* at Rs. 101.

Plantations: Rubber and Tea shares continued to be popular. *Rajagiri*, on the announcement of a dividend of 5 per cent for the year ended 30th June, 1941, were in demand at Rs. 8-15 c.d. *Cochin Malabar* have improved further to Rs. 9-6 c.d; *Kalpetta* to Rs. 25-2 c.d., and *Midland* at Rs. 10-8 x.d; *Udayagiri* at Rs. 8-8 and *Velliamuttam* at Rs. 24-8. Among Tea shares, *Chembra Peak* changed hands at Rs. 5-8 x.d; *Ouchterlony Valley* at Rs. 3-4; *Peermade* at Rs. 30-12 and *Nilgiri Neerugundi* at Rs. 2-9.

Sugars: *Mysore Sugar* were in good request, being done higher at Rs. 57-4. *Jeypore Sugar* ordinaries were also higher at Rs. 13-8. *Dyer Meakin Breweries* were transacted at Rs. 10-10 and *Deccan Sugar* big shares at Rs. 227.

Banks: *Indian Bank* met with investment demand at Rs. 141; *Indian Overseas Bank* at Rs. 119-8 and *Bank of Mysore* at Rs. 285. *Bank of India* changed hands at Rs. 149-8 and *Reserve Bank* at Rs. 110.

Miscellaneous: *Mysore Chemicals and Fertilisers* showed no change at Rs. 18-6. while *Mettur Chemicals* were done at Rs. 12-12 and *Alkali and Chemical* at Rs. 20-14. *India Nut*, after a long time, came in for transaction at Rs. 1-9. *Indian Steel Rolling Mills* preferences were dull at Rs. 12-4. *Brunton Engineering* were in support at Rs. 11-2 x.d. *Mysore Paper*, after being done lower at Rs. 17-15, closed slightly better at Rs. 18-4.

LONDON STOCK EXCHANGE

An easier feeling was noticeable on the London Stock Exchange with the discouraging developments in the war situation. There has been a recovery towards close and most of the lost ground has been recovered. Giltedged securities have rallied and closing quotations are around the levels at the time of last writing. 2½ per cent. Consols were 82½, 3½ per cent. Conversion 105¾, 3½ per cent. War Loan 106 1/16 and 3 per cent. War Loan 100¾. Among Indian loans, 3½ per cent. Sterling Paper was quoted at 99¾.

Among other sections, Rubber and Tea issues have been marked higher slightly while minings have been irregular. Oils have been reactionary. *Anglo-Iranian* were below 40s. They recovered towards the close to 42s. 6d. Home Rails have been uninteresting.

NEW YORK STOCK EXCHANGE

For several weeks in successon there has been little change in prices. Operators are awaiting further developments. The recent attacks on the Neutrality Act have had a restraining influence. *U.S. Steel* were $57¼, *Anaconda Copper* $28¼ and *General Motors* $41.

THE SURAT ELECTRICITY CO., LTD.

NOTICE

NOTICE is hereby given that an adinterim dividend for the half-year ended 30th June, 1941, on the Preference Shares at the prescribed rate of interest free of Income Tax, and on the Ordinary Shares at Rs. 3/- per share, free of Income Tax, proportionate to the amount called up, has been made payable at the Chartered Bank of India, Australia & China, Bombay, on and after the 14th October, 1941, to those Shareholders whose names stand on the Company's Register on the 27th September, 1941, to whom dividend warrants will be posted.

Wimber & E. K. O'Dowd, M. E. Danger and and W. T. McNaught, F. W. L. Danger.

INDIAN COPPER CORPORATION

SATISFACTORY YEAR'S OPERATIONS.

SIR GODFREY FELL'S STATEMENT.

The seventeenth ordinary general meeting of the Indian Copper Corporation, Ltd., was held on July 17 at Motcombe House, near Shaftesbury, Dorset, Sir Godfrey Fell, K.C.I.E., C.S.I. (Chairman and managing director), presiding.

The followoing is the statement of the Chairman, which had been circulated with the report and accounts and was taken as read:—

THE ACCOUNTS.

The few debentures outstanding at the close of 1939 were duly redeemed in July, 1940. Members were informed at the last annual general meeting that 60,000 shares, then still available, had been placed on the market during 1940 at a price of 3s. 5½d. each, the entire authorised capital being thus issued. The general reserve has been credited with the premium, £4,258, on the 60,000 shares issued during the year. This reserve now stands at £181,556, and it is not proposed to make any further allocation to it on this occasion.

PROFIT AND LOSS ACCOUNT

The profit and loss account shows a higher scale of expenditure on mining and milling. This is due to the increase in the price of zinc and of all stores, the lower grade of ore mined, and the inclusion for the first time of all development and breaking charges in the Badia mine as a revenue charge.

On the other side of the account, net proceeds of sales and adjustment of stocks on hand show an increase of £184,708, reflecting higher prices obtained for the company's products. It is, however, the board's policy to keep the prices at which yellow metal is sold to the dealers at a reasonable figure, while discouraging so far as practicable any unreasonable increase in the retail sales price to the consumer.

With the loss of the Continental markets, receipts from the sale of kyanite show a further inevitable decline.

DIVIDEND OF 12½ PER CENT.

Including the sum of £32,059 carried forward from the previous year's accounts and a profit of £7,089 on the sale of an investment, and after allocating £40,000 to depreciation reserve and a similar sum to income tax reserve, there is an available balance of £156,115 15s. 2d. The directors propose to pay a dividend of 12½ per cent., which will absorb £112,500 gross and will permit of the carry-forward being increased by £11,000 to £43,615 15s. 2d.

In order to economise in the use of paper and to reduce printing charges, it has been decided not to publish extracts from the general manager's report, which, as usual, is very full and informative. Also, for reasons briefly stated in the directors' report, details of the year's operations are not being made public. The directors are confident that shareholders will appreciate the necessity for reticence under present conditions, and will be content to judge the results of the year's operations by the figures given in the accounts. These results could not have been attained without much exceptionally hard work on the part of Mr. Mackilligin, your general manager, who has shown administrative ability of the highest order, and of his staff, to all of whom the directors' thanks are due.

Their thanks are also due to Messrs. Gillanders Arbuthnot and Co., the corporation's selling agents, not only for the efficient manner in which they have handled the sales of the corporation's products, but also for much valuable help freely given in other directions.

The report and accounts were adopted and the dividend recommended was declared.

The retiring director, Mr. Robert Annan, M.Inst.M.M., was re-elected, and Messrs. Turquand Youngs McAuliffe and Co. reappointed auditors.

THE CALCUTTA TRAMWAYS COMPANY, LTD.

The Annual General Meeting of the Calcutta Tramways Company Limited was held on the 22nd July, 1941 at 1, Queen Victoria Street, London, E.C.4., Sir Geoffrey R. Clarke, C.S.I. O.B.E., the Chairman, presiding. The Chairman's Statement, reviewing the Company's affairs, which had been circulated with the Annual Report was taken as read and was as follows:

The delay in presenting the Report and Accounts this year has been due to the longer time it has taken to send and receive Mails, to and from India owing to the War conditions.

The Revenue Account for the year to the 31st December, 1940, shows a profit on the working of the undertaking of £107,372, an increase of £4,074 over the profits of the preceding year.

The increase in the Operating Expenses in Calcutta, amounting to £9,206 is mainly due to War Allowances granted to labour in March, 1940 to meet the rising cost of living, a reference to which was made at the General Meeting held in June, 1940.

The final result after deducting the Fixed Charges is a balance of £66,642, including £24,892 brought forward from last year, available for dividend on the Ordinary Shares. An Interim Dividend of 2½ per cent. was paid in November, 1940 and it is now proposed to pay a final dividend of 3 per cent. making 5½ per cent. for the year, which together will absorb £38,500 leaving a balance of £28,142 to be carried forward to next year.

CAPITAL EXPENDITURE AND EXTENSIONS

During the past three years £245,612 has been expended on Extensions to the Tramway system, the reorganisation of the Workshops at Nonapuker, the purchase of land and preliminary work for new Depots at Ballygunge and Howrah, additional Sub-stations and the provision of additional improved Rolling Stock. Other expenditure has also been incurred in order to provide for the efficient and economic running of the system and the greater convenience and comfort of the travelling public, and much of this is, at present, unproductive.

With the opening of the new Howrah Bridge, which is being made available for tramway traffic, and of the Ballygunge Extension as soon as the new road has been completed by the Calcutta Improvement Trust, the Company will have to face considerable capital outlay in 1942. The new Depots at Howrah and Ballygunge will be built in the meantime, and a good deal of additional rolling stock will be needed for the extended services. The details of this, and the estimates of future expenditure are constantly under review by the Board and by Mr. Purssell, our Agent in Calcutta, and it is anticipated that the money required for all the projects now contemplated, can be met out of the Company's current financial resources.

When the programme has been completed the Company will not only possess a greatly improved undertaking but will be able to render greater and better service to the citizens of Calcutta.

On the 2nd March this year, the new Extension on the Upper Circular Road running from Rajabazar to the Barrackpore Bridge at Shambazar was opened to traffic, and the large traffic already carried proves that this Extension fills a public want and will be a profitable addition to the Company's system.

The conduct of an undertaking such as this has not been easy under present conditions. The difficulty of obtaining delivery and effecting shipment of essential stores from this side has been great and in consequence, a large amount of additional work has been thrown on the London Staff. Mr. Purssell, the Company's Agent, and his staff in Calcutta, both European and Indian, have had to meet and have overcome innumerable difficulties and the thanks of the shareholders are due to them for the success which has followed their efforts.

The Company's relations with the Municipal and other Authorities in Calcutta remain excellent, and the Directors would like to acknowledge the very valuable assistance and co-operation so readily afforded by the Authorities.

(Continued from page 605)

Mine. The slightly higher dividend has stimulated investment interest in the shares which are certainly over the level at which the new shares were issued during 1940. Shareholders will applaud the addition of the premiums to the Corporation's Reserve which stands at £181,556 in the latest balance sheet.

* * *

Those who are well-satisfied with the admirable service provided by the *Calcutta Tramways Company* will have little need to think about the stability of the Company's finances as measured by the usual standards. But there is certainly reason to welcome the statement of Sir G. R. Clarke (whose name is familiar as that of a famous Director-General of Posts and Telegraphs) dealing with the company's affairs in the past year. War conditions have had little effect on the revenue for 1940 which shows a small but welcome increase. The dividend for the year is maintained, and in the event, this must be viewed as encouraging. Prospects can be taken as assured in the light of Sir Geoffrey's remarks on capital expenditure. Further outlay, which the company can meet without difficultly is foreshadowed and the beneficial results on revenue have certainly been anticipated on the Calcutta Stock Exchange. The undertaking's efficiency has been demonstrated over a long period, and the new Rajabazar-Shambazar link has been a profitable addition. The vote of thanks to the staff in India was accompanied by a reference to the cordial relations subsisting between the Company and the Calcutta Corporation as also other authorities, indicating once again that the Company's service satisfies the public and its representatives in every respect.

'WATCH-DOG.

THE NELLIMARLA JUTE MILLS CO., LTD.

NOTICE is hereby given that dividends at the rate of 6 per cent per annum, free of Income Tax, on the Preference Shares for the two half-years ended 30th June, and of 5 per cent per annum on the Ordinary Shares for the half-year ended 30th June, 1941, have been declared payable at once to the Registered Shareholders, Where standing instructions as to the disposal of dividends have already been registered, Warrants will be sent accordingly.

COMPANY REPORTS

DALMIA CEMENT LIMITED

	Year ended December		
	1940	1939	1938
	Rs.	Rs.	Rs.
Net profit	10,48,821	7,93,602	4,77,212
Allocation to funds including depreciation	8,62,779	4,35,926	1,77,335
Provision for taxation	25,000	80,000	..
Dividend amount	2,10,000	2,10,000	2,72,795
Dividend % Ordy.	Nil	Nil	Nil
Dividend % Pref.	6	6	6
Dividend % Defd.	Nil	Nil	Nil
Carry forward	45,799	94,758	27,082

(Annual meeting 18th October, 1941 at 4 p.m. at Dalmianagar.)

After paying all overhead charges and interest charges the revenue profit amounts to Rs. 10,25,962-12-1 and after making provision for depreciation there remains a sum of Rs. 3,86,041-9-11 to which is added Rs. 94,757-10-10 being last year's balance, making Rs. 4,80,799-4-9 available for distribution which the Directors recommend to be distributed as follows:—

Dividend on 35,000 Preference Shares at Rs. 6 per share	2,10,000	0 0
Transferred to General Reserve	2,00,000	0 0
Transferred to Reserve for Income-Tax and Super-Tax	25,000	0 0

This leaves a balance of Rs. 45,799-4-9 to be carried forward.

During the year under report, competition was severe and prices of Cement dropped throughout the country specially in South India to abnormally low levels. A satisfactory agreement between the Group and A.C.C. has since been arrived at, under which marketing will be conducted by a common selling organisation, a percentage of sales being assigned to both the Groups, in accordance with the manufacturing capacity of each.

The consumption of cement in 1941 is higher than what was expected but Government control of steel may, to some extent, affect it. There is, however, continued and steady demand from outside India and the factories situated at port are very busy. Though due to enhanced prices of raw materials and machinery parts and increased freightage the manufacturing cost also has risen, but judging from the present year's working the prospects appear to be bright and the Directors have pleasure to declare interim dividends of Rs. 3 per preference share and As. 8 per ordinary share for the year ending 31st December, 1941 payable on or after 31st October, 1941 to those shareholders whose names appear in the books on 18th October, 1941.

Managing Agents:—Messrs. Dalmia Jain & Co., Ltd.

Authorised Capital—Rs. 5,00,00,000 in 2,40,000 6% Cum. Pref. of Rs. 100; 25,00,000 Ordy. of Rs. 10 and 10,00,000 Defd. of Re. 1. Issued and Subscribed—Rs. 1,00,00,000 on 35,000 Pref., 6,00,000 Ordy. and 5,00,000 Defd., all fully paid up—less calls in arrears Rs. 5,054. Debenture Capital—Rs. 33,30,000 in 5½% taxable bearer bonds of Rs. 500, repayable at par on 30-9-1947, with the option of redemption, in whole or part, at 102 per cent at any time after 3 months' notice.

	2,70,000	0	0
	1,03,300	0	0
Of this sum the Directors recommend the following appropriation:—			
Payment of Final Dividends, free of Income-Tax, for the half-year ended 30th June, 1941:—			
On Preference Share @ Rs. 2-8 per share 25,000	0	0	
On Ordinary Share @ Rs. 6-8 per share 65,000	0	0	
	90,000	0	0
To be carried forward	13,300	0	0
Total ..	1,03,300	0	0

During the first four months of the year under report, July to October, 1940, the cloth and yarn markets remained dull, but from November demand began to increase and the mills were put on double shift. There was a further all round improvement in conditions from January, 1941. However, the riots which broke out in Ahmedabad from the middle of April last caused a temporary setback.

The amount paid by way of Dearness Allowance came to Rs. 57,898 for the year.

For the Urban Immovable Property Tax the Company had to pay Rs. 15,632.

The Managing Agents—Messrs. Tata Sons Ltd. have charged their commission at 10 per cent on profits instead of the minimum of Rs. 50,000.

Against the interest due on the Tata Mills debentures for the year 1940 a sum of Rs. 11,400 was received during the year at the rate of Rs. 12 per debenture, less income tax.

The *Tata Mills* debentures as well as the deposit with Messrs. The Tata Mills Ltd., of Rs. 2,50,000 (the latter secured by a second charge jointly in favour of this Company and Messrs. *Svadeshi Mills Co., Ltd.* and The *Central India Spg., Wvg., & Mfg., Co., Ltd.* on liquid assets of the Company) were due for repayment on 31st December, 1940. The Tata Mills, Ltd., approached the debentureholders with a request to extend the period of repayment of the debentures by one year. As it was believed to be in the interest of all concerned in view of the conditions created by the War, their request was acceded to. Similarly the repayment of the deposit was extended by one year, secured by the Managing Agents' guarantee covering the period of extension.

Managing Agents:—Messrs. Tata Sons., Limited.

Authorised, Issued and Subscribed Capital—Rs. 20,00,000 in 10,000 Ordy. and 10,000 5% Cum. Pref., both of Rs. 100 each, fully paid up.

Synopsis of the Balance Sheet as at 30th June, 1941:—

Liabilities:—	Rs.	Assets:—	Rs.
Capital paid up ..	20,00,000	Block ..	46,39,169
Reserves ..	53,95,901	Stores & spares ..	4,78,356

		Total liquid assets ..	3,23,075

BENGAL AERATING GAS FACTORY, LIMITED

Audited accounts for the half-year ended 30th June, 1941:—

After providing Rs. 10,000-8-0 for depreciation and Rs. 10,000-0-0 for taxation, the profit for the period is Rs. 21,182-1-6. Adding to this the balance of Rs. 7,886-1-11 brought forward, there is at credit of Profit and Loss Account the sum of Rs. 28,563-3-5 which the Directors recommend be applied as follows:—

	Rs.	as.	p.
Dividend at Rs. 2-8 per share for the half-year ..	16,250	0	0
Carry forward	12,318	3	5
	28,568	3	5

Sale proceeds for the half-year show a substantial improvement as a result of the operation of the recently concluded price agreement between Calcutta Factories.

Managing Agents:—Messrs. Andrew Yule & Co., Ltd.

Authorised, Issued and Subscribed Capital—Rs. 6,50,000 in 6,500 Shares of Rs. 100 each, fully paid up.

Synopsis of the Balance Sheet as at 30th June, 1941:—

Hukumchand Steel:—(17th) 14-14; (18th) 15-2, 15-4, 15-8, 15-3, 15-7; (19th) 15, 15-4, 15-2; (22nd) 14-14, 14-13, 14-12, 15-4, 15-7.
Indian Galvanising:—(19th) 31-4, 31-8, (31-9 s.l.); (23rd) 31-8.
Indian Iron & Steel:—(17th) 35-9, 35-10, 36, 35-8, 35-12 (30-14 s.l.) 35-7, 35-11, 35-9, 35-13, (35-11 s.l.) 35-12, 36, 35-10, 35-14, (36-2 s.l.) 35-7, 35-11, 35-8, 35-12, 35-6, 35-7; (19th) 35-3, 35-7, 35-2, 35-6, 35-9 (35-4 s.l.) 35-5, 35-4, 35-8, 34-15, 35-2, 35-6, 35-1; (22nd) 34-12, 35, 35-4, 34-11, 34-15, 34-9, 34-10, 34-14, 34-14; (23rd) 34-14, 35, 35-4, 35-2, 35-6 c.d. 35-3, 35-7, 34-15, 35-3, 35-2, 35-6, 34-14 c.d. 34-13 c.d. 35 c.d.
Indian Malleable Castings (ord.):—(19th) 8-6, 8-10; (23rd) 8 C.T.
Indian Malleable Castings (Defd.):—(18th) 3-1, 3-3, 3, 3-2, 3-4; (19th) 2-15, 3; (22nd) 2-15, 3-1, 2-14.
Indian Steel & Wire Products:—(17th) 61 s.l. 60-14, 60-6, 60-8 (60-8 s.l.) 61 c.d.; (19th) 60-10, 61-6, 61-8 c.d.; (22nd) 58, x.d. o.l., 57 x.d.; (23rd) 57-6 x.d.
Indian Steel and Wire Products (Defd.):—(17th) 41 s.l. 40-8, 40-12 c.d.; (18th) 40-10, 40-14, 40-8, 40-12, 41, 40-14, 41-2, 41-6, 41, 41-4 c.d.; (19th) 40-12, 41, 41-4, 41-8 c.d.; (22nd) 37-12 x.d. (37-8 x.d. o.l.)
Kumardhubi Engineering:—(17th) 5-11, 5-12; (18th) 5-15, 5-13; (19th) 5-13, 6-1, 6-2.
Marshalls:—(17th) 2-7, 2-8, 2-10, 2-9, 2-11, 2-8; (18th) 2-8 c.t. 2-10, 2-8; (19th 2-7, 2-9, 2-10; (22nd) 2-7, 2-9; (23rd) 2-7, 2-9, 2-6, 2-8, 2-7.
National Iron & Steel:—(17th) 9-8; (18th) 9-2, 9-8, 9-10, 9-8, 9-12; (19th) 9-4, 9-9, 9-10; (22nd) 9-4, 9-8, (9-6 9-8 s.ls.) 9-1, 9-2, 9-7.
Saran Engineering:—(18th) 6-8, 6-12; (19th) 6-10; (22nd) 6-7, 6-11, 6-12 (6-8 s.l.)
Steel Corporation:—(17th) 20-9, 20-10, 20-8, 20-12 (20-10 s.l.) 20-13, 21-1, 20-10, 20-14, 20-9, 20-11, 20-15; (18th) 21-6, 21-10, 21-4, 21-8, 21-1, 21-7, 21-4, 21-2, 20-13, 20-12, 20-15, 21-3, 20-15; (19th) 20-11, 20-12, 21, 20-10, 21-14, 21-4, 21-2, 20-13, 20-12, 20-11, 20-9, 20-13, 20-10; (22nd) 20-5, 20-7, 20-11, 20-5, 20-6, 20-10, 20-8, 20-3, 20-5, 20-7, 20-11, 20-4, 20-6; (23rd) 20-6, 20-3, 20-4, 20-7, 20-11, 20-8, 20-12, 20-2, 20-3.
Steel Corporation (Pref.):—(18th) 121-8, 123; (19th) 122; (22nd) 121, 122 o.l. 122-8.
Steel Products:—(17th) 6-12; (19th) 6-10.

MISCELLENEOUS

Aluminium Corporation:—(17th) 14, 14-4, 14-2, 14-6; (18th) 14-4, 14-6, 14-1, 14-5 (13-12 s.l.) 13-15, 14; (19th) 14-1, 14-4, 14-6; (22nd) 13-14, 14-2, 14, 14-4; (23rd) 13-11, 13-12, 14, 14-1, 14-2.
Aluminium Corporation (New Pref.):—(22nd) 114-8.
Aluminium Corporation (Pref.):—(17th) 127, 128; (18th) 128, 125; (19th) 128, 129.
Associated Hotels:—(18th) 3-14, 4.
Associated Hotels (Pref.):—(18th) 100; (19th) 101; (23rd) 100 C.T.

WORLD OF INDIAN FINANCE

Friday Evening.

THE money market has been overshadowed by the holidays, and the few working days of this week have been sandwiched between the Durga Puja on the one side and the Luxmi Puja on the other. Those who could afford it have taken a longer recess with the result that even the working days were visibly marked by holiday sentiment. Conditions in the money market remain unchanged, with interbank call money in plentiful supply and no demand at ¼ percent in Bombay, ½ percent in Calcutta and ¾ percent in Madras. In the exchange market, however, there has been definitely more activity, with more business passing and with the undertone fully steady. The freight position particularly with regard to America, has greatly improved and this has brought more business to the exchange market. Both exports and imports have expanded so far as the United States are concerned. For many of the categories of goods which we cannot get from Britain, we are obliged to have recourse to America; and, in spite of the severe restrictions as regards imports from the United States, the import trade from that country has steadily expanded. Exports to America have been well maintained. While, in the years before the war, India used to export very much more than her imports from America, the present position is that our imports from the United States are beginning to exceed our exports. The rupee-dollar exchange market has thus become an important factor, though it is under strict control and severe restrictions.

Banks have accumulated cash balances on a steady scale. In the week ended September 19, deposits of member banks with the Reserve Bank jumped from Rs. 45.42 crores to Rs. 48.16 crores. In the following week, the rising trend was maintained, the latest figure being Rs. 49.16 crores. The Imperial Bank also has been strengthening its cash position week after week. On September 12, the Imperial Bank's cash was Rs. 26.81 crores; on September 19, Rs. 27.47 crores; and on September 26, it was Rs. 29.32 crores. The increase in the cash balance of the Imperial Bank since August 1 is over Rs. 15½ crores.

In relation to the comfortable cash position of the banks, a further increase recorded this week in the average rate of accepted tenders on the Treasury Bill day is difinitely incongruous. Applications reached the high watermark of Rs. 4.04 crores against Rs. 2 crores on offer. In spite of such keen bidding, the average discount rate has risen from annas 10 and pies 4 percent per annum to annas 10 and pies 9. The swelling cash balances in banking circles are reflected in the results for Bengal Government Treasury Bills. Tenders were invited for Rs. 75 lakhs. Applications came to the stupendous total of Rs. 2.85 crores. At no time had Provincial Treasury Bill applications been so large, and bidding so keen, as at this week's offer of Bengal Treasury Bills. It is also noteworthy that the average rate of accepted tenders with respect to Bengal Treasury Bills was annas 11 and pies 11 percent. This rate is higher than the Central Treasury Bill rate by slightly over 1 anna. The further narrowing of the gap between the Central Treasury Bills and the Provincial Treasury Bills is to be welcomed. At the same time, the large applications received lead one to infer that the Treasury Bills could have been secured on more favourable terms if the monetary authorities had so desired. The Central Provinces are inviting tenders on October 6 for Rs. 40 lakhs of three months Treasury Bills. The statement of the Reserve Bank in the banking department for the week ended September 26 shows increase under deposits of all governments as well as those of scheduled banks. Central Government's deposits have risen from Rs. 6.95 crores to Rs. 7.66 crores; those of the Burma Government from 2.74 crores to Rs. 3.25 crores; those of other governments from Rs. 4.26 crores to Rs. 4.86 crores; those of banks from Rs. 48.16 crores to Rs. 49.16 crores. On the assets side, ways and means advances have risen from Rs. 2.05 crores to Rs. 5.51 crores.

Next Phase of War Effort

By all tokens, India's war effort will shortly enter, even if it has not done so already, a new phase. The visit of Dr. Grady to India, the work of the Standing Committee of the Eastern Group Conference, the arrival of Mr. Duff Cooper in India during the course of his roving mission in the Far East, all these suggest clearly that the nature and scope of the war effort in India will have to undergo revision before long. And it is imperative that both India and Britain should make a final effort to overcome their inhibition about what this country should do for the success of democracy in the present war. When the war broke out, it was assumed without any serious examination that India's role in the present war would be substantially the same as in the last. To the extent that the situation seemed to call for change in the direction of giving India greater responsibilities, Britain seemed to be all the more determined that she would not allow herself to be stampeded into any course of action that would tend to increase India's status as an industrial nation. It was not till the surrender of France and the large scale loss of war material in Belgium brought the British Government face to face with a new situation that the need for revision of old ideas and plans was at all recognised. But the changes that actually resulted are altogether inconsiderable. We cannot suppose that the development of India's capacity to manufacture the various kinds of material required by modern warfare found favour. Rather there was a notable enthusiasm for the idea that India should continue as the supplier of raw material and of certain classes of manufactured goods for civilian consumption.

Official policy as such has not changed during the last one year and more, though the element of surprise in the actual developments of the war during this period is not less than in events of the middle of 1940. It is true that the scope of the war effort has been widened beyond the limits of the original intentions of the authorities. This is inevitable; for when the course of the war and the change in the circumstances relating to it tend to restrict the lines of goods that can be imported from abroad, production plans have to be appropriately expanded. But it is one thing to make new goods under pressure of circumstance. It is quite another to approach the whole question from the point of view of feasibility, and not mere expediency. Such expansion of scope as may have occurred during the last one year can hardly be deemed to be an evidence of circumspection in the authors of the plan.

It is this undue restriction of the scope of the war effort in India that now calls for a change. The reasons behind it are, of course, numerous. Perhaps, the most powerful is the vague attitude of intolerance of industrial progress in India. A new industry, in this country, while it, no doubt, is a help during the war, will as certainly be a hindrance in peace. That attitude is natural; and to that extent it is also defensible. It is futile to ask that such an attitude should be abandoned. Even the war and all the dangers it portends will not by themselves constitute a sufficiently strong argument for a change. It is quite understandable that at the beginning of the war, and much more so at the time of France's surrender, the British did not consider that the war could be won by the development of India's resources in men and material. Those were the days of the blitzkrieg. And no one could believe that, if Germany was really capable of carrying out her ambitious plans of conquest, she would wait and give Britain time to develop the resources of this country. Either Britain was equal to stemming the tide of Nazi conquest on the strength of her own resources or she was not. The inevitably slow development of India's potentialities would in neither case make a serious difference to the issue of the struggle. The reluctance in these circumstances to make the most of India was quite reasonable.

It is precisely here that the last one year and more has worked the most significant changes. The defeat of the *Luftwaffe* in its attempts on Britain, Hitler's postponement *sine die* of invasion of Britain, the entry of Russia into the war and the occupation by Germany of valuable tracts of Russian territory and her inability at the same time to make further progress—these are bound to bring about a more extended and wide-spread stalemate than what was supposed to obtain in the last quarter of 1939. The question of invading the Continent while yet Russia is keeping Germany fully engaged on the Eastern front is fully discussed in the British press. And Mr. Churchill's remarks on the subject in his review of the war show clearly that the difficulties in the way of launching a counter-attack are not easily resolved, not to speak of the risks, which cannot be accurately assessed. Meanwhile, Russia's need for help is becoming more and more apparent. M. Maisky was quite frank in announcing the need for more tanks; and at the three power conference in Moscow the Russian spokesmen were quite clear that Russia's needs for tanks will require not one week or two but many weeks.

The position is that even if Russia should succeed in doing very much more than can be reasonably expected of her, the final onslaught on Germany would still leave a number of problems both of men and of material. There is at the same time the risk that the check on the Eastern front might lead Germany to try another thrust lower South. With the establishment of a common front between Britain and the Soviet and with the potentialities of the war developing a harrowing stalemate in the absence of adequate resources for an overwhelming counter-offensive, the immense importance of India for the requisites of final triumph is becoming increasingly obvious. The expanded Central Cabinet will soon be meeting in full force; and we trust that its first task will be to assess the new situation and secure those alterations of economic and political policy that the situation clearly calls for.

Insurance Companies' Investments

No important piece of legislation has been immune from criticism from the time of enactment, and it is no surprise to find that the Insurance Act of 1939, has frequently been subjected to critical comment. While the consensus of opinion is broadly in favour of the Act, individual sections are viewed as distinctly disadvantageous and the element of inelasticity imported by statutory safeguard produces a disagreeable impression. One has in mind the section that deals with the way in which the reserves should be invested.

Difficulties revealed in the recent past have given validity to the plea that specific directions as to the manner of investment are uncalled for, and such relaxation as is to be permitted in making the statutory deposits need not be the only concession available under further amendments to the Act. The continued growth of insurance in India in spite of the difficulties occasioned by the war allied to the soundness and stability of most companies makes it difficult to provide a justification for the stringent provisons of the law. The Commerce Department has received several representations in connection with the modification of section 27. The last, if one remembers aright, was put up by the U. P. Chamber of Commerce and the arguments adduced in this connection were by no means unfamiliar. There was the usual reference to the existence of foreign rivals in the insurance field, and it was argued that, competitive power of Indian companies was impaired through the application of section 27. Somehow the last does not seem convincing but the other grounds on which the amendment of section 27, was advocated with a view to removing restrictions are assuredly sound. The experience of the past year indeed suggests that the stability of market values in the case of Government securities is illusory and the low yield effectively destroys bonus prospects that in the past served to stimulate consistent expansion of new business. It has been often said that restrictions imposed for the purpose of safeguarding the policyholders' interests operate to their detriment in respect of bonus declaration. Many leading companies have already been compelled to reduce the bonus payable to participating policyholders.

While it is universally recognised that the first duty of a company is to procure absolute safety in regard to funds held by them, they are required, in the words of an approved maxim, to invest to the greatest benefit and with the greatest security, on behalf of their policyholders. The highest possible return must be obtained consistent with security and this view is endorsed by Mr. Byramjee Hormusjee, the present President of the Indian Life Office Association. He naturally inclines to the view that security of capital must be an over-riding consideration but his views on the working of Section 27 are identical with those expressed by the U. P. Chamber of Commerce in its recent memorandum. He has drawn attention to the absence of legislative restrictions in Britain and has queried whether the admirable distribution of assets to which the balance sheets of British life offices uniformly testify is not due to the absence of rigid provisions. The contrast with the amended Indian Insurance Act is obvious and whatever the difference in circumstances it is deducible from experience that compulsory investment of as much as 55 per cent. of the funds would hamper insurance companies. On the basis of comparisons with Britain, it has been established that British companies have since 1922 lightened their holdings of Government securities, and the total percentage of British, Indian, Colonial and Foreign Government stocks held by British life offices was only 29 per cent. in 1937. The most significant increase is under Debentures, Preference and other stocks belonging to the companies. The suggestion that hardly a third of the Funds is lodged in giltedged may not represent the existing position after the generous response to Defence Loans last year; but it is correct to say that high authorities have expressed the view that preference shares are far more suitable for insurance companies than Government stocks.

The fact that British offices have maintained the proportion of investment in local and municipal stocks is presumably due to the fact that some Home Corporation loans were reasonably remunerative but the steady decline in giltedged assets as between 1933 and 1937 (the years selected by Mr. Hormusjee in his analysis) can only fortify the general argument that British experience is conclusively against the investment of as much as 25 per cent. in Government securities and 30 per cent. either Government or approved securities. It is worth considering in this connexion that a very small portion of the assets of U. S. insurance companies is in Government securties. It cannot be merely due to the absence of Federal regulation and the diversity of practice in the Commonwealth. The weight of experience as also of recognised authorities is against lodging such a high percentage as 55 in Government securities and the 3 per cent. basis of giltedged is undoubtedly calculated to depress the yield. It has been proved that giltedged securities fluctuate as often and as much as other active securities. The fact that Indian companies held in the form of Government securities as much as 52.54 per cent. of their total assets in 1939 (while allowing for the fact that a considerable percentage is due to a single large company) argues peculiar vulnerability. The advantages of industrial stocks and mortgages on account of the higher yield need hardly be pointed out in the context. The yield is decidedly higher and the majority of companies which have reported in successive years a fall in the over-all yield on their investments will assuredly endorse the plea that compulsory investment in Government securities fetters their choice of alternative and more eligible investments. It is highly doubtful whether policyholders approve such restrictions, and it may be suggested that their representatives, elected by them to the Boards, should devise a suitable petition asking for the removal of restrictions of doubtful value. The average commentator scrutinising reports and accounts of life insurance companies is tempted to express hearty approval of a large sized holding of Government securities without reflecting on its effects on the net interest yield. The higher taxation entailed by the war suggests that a falling yield will force companies to be a little more venturesome and it is well that Mr. Hormusjee has indicated how far from satisfactory Government securities are as investments.

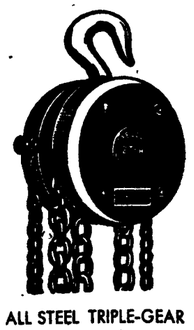
Indian Materials for U. S. A.

ENCOURAGING deductions can be assuredly drawn from Dr. Grady's talks to pressmen in India. This special economic investigator has been deputed by the President to pick up facts, and as the representative of the Federal Loan Agency, he can even pick out creditworthy clients for his office. The visit has been rapid, but purposeful, and the impressions summed up in Bombay sometime ago have been reinforced by observations in Calcutta. The main problem is one of pooling raw materials, and Dr. Grady's references to mica have kindled the hope that the outlook for mica may be taken as bright. The grant of contracts for the production of raw materials has been foreshadowed and it may be said that in view of special efforts to relax export control in the case of mica the defence materials are likely to meet with good demand. Dr. Grady's views on the success of his mission like his tribute to the war effort of India may not be altogether conventional. The question of Pacific defence like that of the Two-Ocean Navy is not completely solved, and Dr. Grady's recent reference to the wealth of the tropical colonies was accompanied by another to the state of preparedness. The three bases Sourbaya, Cavite and Singapore are the keys to defence beyond the Indian Ocean and the bridge to America is guarded by Pearl Harbour. The possibility of increasing supplies of certain materials for U. S. requirements, if need be, by extending financial aid to increase production. The mention of contracts for supplies indicates that the U. S. A. will benefit in many ways. The demand for minerals from Burma and Malaya must certainly increase, but the actual measure of improvement will be regulated by the progress of defence expansion in the U. S. A. The three minerals likely to receive special attention are mica, tungsten and tin. Manganese can be had from many sources nearer than India, and the U. S. A. may prefer to take as much as possible from South America at present. There are very sound reasons for showing preference to Latin America and it is only such minerals as cannot be had from the Central and South American republics that will have to be obtained in the East. Dr. Grady's mission being of a special character has nothing to do with trade between India and the U. S. A. and whatever he said about the probability of enlarged demand for strategic materials must be read in conjunction with reports about curtailed production in many civilian industries including America's largest, the automobile industry. Dr. Grady's estimate of the capacity of the Eastern territories to stand up to aggression is in the opinion of some observers more optimistic than just, but his views on industrial co-operation and the progress of arms manufauture in India are of more interest than the commonplace remarks of members of the Eastern Group Supply Council. For Dr. Grady has seen Malaya, the Dutch Indies and other territories and has also seen what has been happening in his own country since May 1940 when the defence programme was mooted and a very large appropriation was made immediately.

Wartime Changes

While students of the monthly trade returns discuss frequently the changes in the balance of trade and the composition of foreign trade, not many pay attention to the quantitative aspect. There is, of course, the difficulty associated with wartime in regard to statistics but the far-reaching changes evident in recent months lead one to the view that the deterioration in export trade was quite pronounced until the end of 1940-41. That war orders have helped to increase the balance of trade and promote the strength of the rupee exchange is freely admitted; but the actual course of fluctuations in regard to the quantum of trade suggest that the improvement in exports was definitively arrested in April, 1940 and the late recovery in January was temporary. The quantum of India's imports also has been lower since May, 1940 and this fact must be considered in assessing the improvement in the balance of trade during the years 1939-41. The increase in 1939-40 as compared with 1936-37 may not appear great, but it must be noted here that only eight months of the war period are covered, while imports were on the downgrade except for a brief recovery in December. No reference need be made here to the adverse balance of trade that appeared in March since it is obvious that the trade figures convey an incorrect impression of what has been happening in regard to Government purchases of goods in India and transactions in treasure. The contraction of foreign trade is, however, established by a look at the changes in the quantum of trade as compared with the position before the outbreak of the war. The decline in imports is, in the main, a consequence of the decline in exports, and whatever relief is afforded by industrial development at home cannot make up for the perpetual difficulties occasioned by high prices for imports. One of the most noteworthy changes of the war period has been the disparate rise in the prices of imports and exports. It is true that in the last three months compensatory influences have been at work, but until the end of March, it was clear that India was getting less in return for her exports than before the war. If one ignores the changes in total value and thinks merely of the quantities of goods involved and their prices it was only in the short-lived boom of 1939 that India benefited. The percentage of changes in the index for the barter terms of trade were favourable only up to December, 1940 and the ratio between export and import prices was upset as early as March, 1940. The first quarter of 1941 witnessed no improvement, and the merits of the rise in commodity prices propelled by a variety of factors since June are as manifest, in some ways, as the disadvantages.



Help for Russia

Help to Russia is now the main item on the Allied agenda, and the U. S. A. has been asked to give a hand. The success of the German offensive in the Ukraine made an appeal for help inevitable, and it is no surprise to learn

that Russia is ready to undo many things to qualify for U. S. aid. Formal endorsement of the Atlantic Charter though with a significant emphasis in the consistency of its application, and recognition of the Allied governments in exile was to be expected after the *modus vivendi* with Poland was reached. The mere fact that Russia is now in the anti-fascist front has produced a big impression, and the Moscow talks, now concluded, may well prove the turning-point of the war between Germany and Russia. As the Premier admitted in his review of the war situation, it is hardly correct to say that the Germans have failed. They have reached Poltava, the site of a famous battle where Peter I defeated the Swedish King Charles XII in July, 1709; but there is always the possibility that Hitler may suffer the fate of the dashing Charles XII. The town with a population of 82,000 had many woollen mills and a wool fair is still held there. Being the capital of a fertile district of Little Russia it has definite importance for the Germans who are trying to bypass the Crimea. The capture of Poltava does not mean that the industrial wealth of the Donetz basin is lost and the retention of Odessa, in spite of repeated attacks by Roumanian troops shows that the entire Ukraine is not lost. The Germans have little chance of applying their solution for the Ukraine question during the coming winter. The additional squadrons of the R. A. F. now serving in Russia may interfere with the progress of the offensive against the last-mentioned objective, Moscow. Admittedly, the Germans have obtained part of the resources of the Ukraine but the coveted oil fields are still far away, and a new core of resistance may be organised beyond the Caucasus.

Mr. Churchill's review in stressing air attacks on Germany proper did not overlook the trouble facing Germans in the Occupied Countries. The earlier despatch of assistance from the U. S. A. is not altogether dependent on the modification of the Neutrality Act but the Administration is not apparently prepared to apply the Lease and Lend formula. Aid to Russia thus forms part of the British war effort and the Premier has told the nation that sacrifices must be made to keep Russian resistance going. Like Chatham, the Premier may think of the dearly won victories of European allies as his own; yet the lack of an army on the Continental scale is necessarily a reason for thinking of Russian victories against Germany as part of Britain's successful resistance to Germany. The Russian war machine has been sorely tried and the want of tanks was first openly referred to by the Russian Ambassador in London. The response to the appeal in the Midlands was striking enough; but the territory lost has to be recovered before it can be said that Russia has beaten back invasion. Soviet air raids have however begun in time to redress the balance and the presence of Major-General Chaney in Moscow means that he would provide Russia with lessons drawn from both British and American experience, particularly useful when "the enemy's only shortage is in the air" according to Mr. Churchill.

Tobacco in Madras

To the note on tobacco cultivation in India, published three years ago, must be added the report issued by the marketing officer in Madras last month. That province leads the rest of India in tobacco cultivation with 273,000 acres under the crop. The principal outlet in the past has been the export trade and the United Kingdom has long been the main market. The war has brought no decisive changes but the volume of exports except to the U. K. and Empire countries has naturally fallen. The increase in exports since 1934-35 with the annual value topping the crore mark, has proved that the trade has developed through the adoption of Virginia types in the main tobacco-growing districts. The growth of imports, mainly from the U. S. A. during the period when exports of unmanufactured tobacco from India have increased, can be easily explained on the ground that numerous flourishing tobacco factories have taken root. As the marketing report shows clearly the U. K. has taken an increasing proportion of Madras tobacco while exports to Japan have fallen. The growth of the tobacco industry as distinguished from tobacco-growing is probably the result of tariff advantages; and the absence of any large or important Indian interests may be explained on a variety of grounds. The Madras report, which shows that exports have risen by over 30 per cent. within five years, stresses the advantages of extending and improving tobacco cultivation. Grading and curing are not altogether satisfactory, and certain suggestions, made so far back as 1936, have not borne fruit. The slip-back in exports of Indian tobacco to Britain in 1939 was occasioned by a falling off in quality; hence the need for improvement. The actual work of development of tobacco cultivation owes much to British enterprise, and it is not surprising that as against the Agricultural Department, the cigarette manufacturer has done more useful and lasting work. Proposals for legislation as regards the maintenance of quality in exports of tobacco have been made, but the Madras Government, which singled out tobacco for taxation did not evince much interest in keeping for Madras tobacco its reputation through the grading and certificate procedure recommended by the trade and allied interests. It is worth adding that as against other commercial crops Indian tobacco's prospects are not impaired by the war and the extension of cultivation in suitable tracts will meet with few obstacles. Encouragement may now seem difficult as the Japanese market has been lost, but cigarettes and tobacco in all forms should be in demand in neighbouring countries including Burma. Obviously, the development of cigarette manufacture offers bigger possibilities, and the growth of the smoking habit among all classes appears the most considerable advantage that can be obtained at present.

U. S. Saving & Borrowing

THE success of defence savings plans has been touched upon by the British war savings movement which has assumed responsibility for securing contributions from individuals and buying Defence loans for them. The cessation of sales of 3 per cent. defence bonds long sold on tap by the Treasury found the movement prepared to deal with the change as the Secretary's letter to the Press indicated. How the U. S. A. is trying to put over its borrowing programme is naturally a matter of interest for U. S. defence and the present war are inextricably linked since the third term for Mr. Roosevelt began in January. There was a quick start for the new defence borrowing starting in May; but collections for three months came to just a billion dollars. This is not exactly encouraging but due regard must be had to the fact that on June 2 the U. S. Treasury obtained money for the new 2½ per cent. 1956-58 bonds. In particular districts, the sale of defence savings bonds was helped by plans for employees to pay for bonds by deductions from wages. The Secretary of the Treasury stated on June 19 that the adoption of salary deduction plans means that thousands of working people are starting systematic, regular buying of stamps and bonds. Total sales in May came to 442 million dollars but the totals for the succeeding months were lower. As described in this journal not long ago, the U. S. defence bonds are of various types and terms too are different. It has been reported that sales in the City and State of New York sales were exceptionally long and two types of bonds were favoured by executors of trusts. The sales of bonds through post offices have become familiar to the U. S. A. and the average citizen is in direct contact with the Federal borrower. The existence of an upper limit for sales of defence savings bonds has excluded the money market which turned promptly to Treasury notes and new issues made on behalf of the Reconstruction Finance Corporation. The banks evidently helped their clients to buy bonds, for excess reserves fell by 670 million dollars in the month ended June 28 the decrease being most pronounced in New York city. As the Federal Government had obtained money through a new loan there was a sharp increase in Government balances arising partly through tax collections. An increased outflow of funds to other parts of the country was noted in June indicating that the tendency for bank Advances in the U. S. A. to increase steadily persisted. It has been recorded that New York banks have financed other centres which have sold Government securities in return for cash. Up to the middle of 1940 the U. S. Government was not at all a heavy borrower but the steady increase in Treasury balances since the beginning of 1941 attests the loss of funds by Banks in return for new obligations. The slackness of money conditions may be mirrored in the high prices paid for the new Treasury issue. The new taxable 2½ per cent 1956-58 bonds rose to 104 during June but the outflow of funds and the withdrawals of currency introduced another factor. Loans to the stock exchange were naturally lower reflecting the reduced turnover on Wall Street but the average Banks increased its holding of Treasury bills and Government securities at the same time as it increased its advances to industry and agriculture. The increase does not suggest that credit was tight and the enormous reserves of banks in the second Federal Reserve District were reduced to the lowest level since December, 1939. More recently there has been a decision to increase reserve requirements and reduce the excess reserves of U. S. banks. The decision sprang from a deep seated fear of inflation and the Federal Reserve Board intends to attract to itself a larger proportion of the funds that have been made available to industry and trade, which requires additional funds owing to the further decline in new issue activity as also the Government, still the principal borrower.

Income Tax Made Easy

OF commentaries on the Indian Income-tax Act as amended in 1939 there are many, and each has a particular purpose and specific merits. Many have been noticed in these columns during the past year and the latest to hand is the Treatise on Indian Income Tax law published by Mr. Doodhmal (Rs. 4: Published by the Author, Empire Terrace, Lamington Road, Bombay 7) The language is severely practical and precise, and the brevity of the notes on the sections of the Act appears to be a distinct advantage. So far as the average assessee is concerned case law is of little or no importance, and the reviewer leans to the opinion that a layman has to be considered as much as the lawyer in providing a new text-book on income tax. The existing rates of income tax and super-tax along with the surcharge thereon are set out in Chapter II. The succeeding chapter attempts to define what is regarded as the most sticky clause in the new law and succeeds in bringing out who has got to pay tax though not why. The author upholds the view that the main changes introduced by the new law are in the direction of improving yield and reducing avoidance. There is no place for marginal relief, thanks to the slab system and the retention of the exemption limit of Rs. 2,000 per annum still saves a great part of the middle class from the sweep of the tax-gather's net. A variety of concrete cases are provided to show how much is payable and these along with the reckoners already provided by the prevision and skill of Mr. Doodhmal will indicate the whole duty of the tax-payer in war and peace alike.

THANKS to the Puja holidays and the consequent upset of the routine of this office, I have no qualms in continuing my gossip on the old theme of world economic policy. As I have been at pains to point out, there has been among economists of international standing no clear ideas about what a world policy in economic matters really involves. They have been accustomed to think in terms of international free trade. And it is not always they remember the pre-suppositions behind their advocacy of free trade. When facts go far past them, they hop behind, unconsciously and unwillingly. The result is mental confusion. They look at the question of alterations in international trade from the standpoint of their own nation. They make a few grudging concessions to others. Where their own national monopolies are threatened, they declare their readiness to take into partnership one or two of their more formidable rivals. Just as in the political sphere, the imperialist nations talk of condominion and international administration of colonies, they are prepared in the economic sphere to envisage international capitalism. All this is adequate explanation of the vague talk of removal of want, which Mr. Churchill and Mr. Roosevelt have indulged in their vaunted charter of the Atlantic. But world economy is still an uncharted ocean; and those who would navigate it must have an economic policy which is fully seaworthy.

I have in the last few weeks tried to show that in the present phase of world economy, there has been a very pronounced shift from internationalism to nationalism and that both national and world economic policies have to take note of this fact. In fact, one might go further and say that the internationalism of the earlier periods has no evolutionary significance. For in the periods before science secured any notable advance in productive technique, man was not an agent, but just a factor of production. Once human societies start to shape their economic fortunes with a degree of confidence in their power to do it, they take account not only of the existing facts, but of their ability to alter them to their liking. There is a marked disinclination to allow matters of vital importance to be the plaything of external forces. If the cotton-grower is told that the uneconomic price for his product is due to world factors which form a long chain of causes to produce this among various other effects, he naturally asks whether his nominees in the Government of the country cannot do better than to expose him to the impersonal tyranny of world factors. After all, he has a vote. He has a share, however small, in the sovereignty of his nation. And within limits, he has ideas, too. He uses his vote. Or rather, others, anticipating this effective use of the vote try to placate him in advance. The Government passes a whole series of measures which have their repercussions on the finances of the State and the soundness of the national economy. To say that such measures have so often been a failure is no answer to the contention that the State can and must protect the economic life of the average citizen from such cruel vicissitudes. Economic nationalism is the offspring of technical progress and political democracy. In the fascist nations, preparation for war has the same effect as the clamour of the electorate.

The earlier internationalism was not volitional in the way that the economic nationalism of the last decade has been. And in matters affecting human societies the volitional element is the important element. But, you might ask, will economic nationalism command the force and power necessary to fulfill itself? In international politics, every country is nationalist, no doubt. But the nationalism of China has not the same force as the nationalism of Japan or Germany or the U.S.A. In the economic sphere, too, while all countries may be equally nationalistic, the economic nationalism of one country cannot have equal force with that of every other country. If Britain and the U.S.A. pull in the direction of internationalism, all the rest of the world will not be able to counteract it. They will be able to argue that it was the autarchy of the Fascist nations that brought about the war and that internationalism is no less necessary in the economic, than in the political, sphere. All these arguments will have force and are bound to tell, even apart from their soundness or unsoundness.

FOREIGN EXCHANGE

It will be useful to see, therefore, what changes the political sphere has to show while in the economic, there has been this shift from internationalism to nationalism. It is not so strange as it might seem at first that there is no parallelism between the changes in the two spheres. For, as every one knows, the trend in world politics is inevitably towards internationalism of some sort. From whatever standpoint you may look at it, the world is bound to become one. The collapse of ancient Empires is no proof that vast political aggregations are impossible. Vast political units rest not only on the capacities of the ruling class, or whatever the dominant part of the organism may be, and the inertia of the subject populations, but also on the extent of technical progress. It is, of course, absurd to suggest that, if a warlike nation like say, Nazi Germany, conquers the world, it will be able to keep it ever after in subjection, simply because they can quell a rebellion in the remotest corners of the world in a few hours. Far more is involved in government and politics than mere bombs and planes. If the world is ever to become one political unit, it can only be through the progressive integration of humanity as a single social organism. That may be far away in the future. We may be pushed back many a time in our journey along that road. But that integration is not through mere conquest. The limbs and organs of world society have to go through the necessary evolutionary processes before they can be capable of real co-operation. I can see I have digressed somewhat. What I want to emphasise is that the trend in politics is always and inevitably towards larger units, except of course in the case of Empires which had never been genuinely unitary. It is unreasonable, therefore, to expect similar trends in politics and economics.

During the period in which the world witnessed the onset of economic nationalism, sentiment in favour of internationalism in politics has appreciably gained in strength. Not only the older imperialist nations talk of world peace and world economic policies, but even Germany and Japan speak of the new order which they want to see established in Europe and Asia. All the nations directly or indirectly engaged in the present war want to see the establishment of some international authority which, unlike the late League of Nations would be capable of nipping the danger of war in the bud. But it is not by these professions, or even yearnings, that one ought to judge the prevalent trends. Internationalism in politics is a sentiment even if it is a merely in-

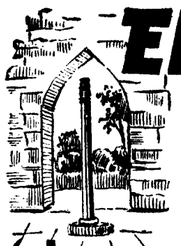
1-2, OLD COURT HOUSE CORNER, CAL.

(From Our Correspondent)

Bombay, Oct. 2.

THE beginning of a new month sees markets local livening up. The cotton market has cheered up on news that mill consumption in July was 22.3 per cent. ahead of last year. Progressive improvement has been recorded over the eleven months ended July and the present scarcity of textile supplies argues that there is considerable scope for increased consumption. There is a belief that consumption can increase further before the new crop gets into the market. That is a hope nourished to some extent by the report that the U. S. A. may not go too far in curbing the rise in prices. The fall in cotton prices locally has been decisively assisted and the simultaneous improvement in the piecegoods markets indicates that *Moorat* business is likely to be of fairly large proportions. The disturbed political outlook may not hold up business indefinitely and the increase in local stocks reported over August was accompanied by an improvement under sales and exported. Prices have steadied up and buyers generally have taken the view that a change is not likely. Ruling quotations are higher on July and bulk lines have encountered fair demand. Unabated demand continues for fancy goods and dealers have sold ahead despite a further rise in rates. The reduction in supplies of Japanese goods has doubtless been of assistance to dealers and reports from other centres engender an optimistic feeling and there is every likelihood of prices being well held, particularly, as steady demand has been noted for Indian goods despite a poor monsoon.



There have been several important company meetings over the past fortnight. The Tata-Hydro meeting has come and gone and shareholders were encouraged by the assurance that earnings of the Company and the two associated concerns are likely to run at a high level during the war. Mr. J. R. D. Tata's statements at the meetings were firm, clear and exact; no wonder that people here call them models. They are interesting too for the light thrown on wartime activity of Bombay mills. The repayment of the loan by the Tata Power Co., and the redemption of its own debentures were landmarks of the year reviewed by the Chairman who said that sales of energy rose by 33 million units to a new record in 1940. At the Andhra valley meeting it was stated that sales of energy in the year ended June 30 had risen by 50 million units over the total for the previous year, and the Chairman described the outlook as definitely bright. Revenue was helped to some extent by the reduction in debt and interest charges. Share-holders were told that in spite of concessions to consumers the revenue earned by the company was rising. Dividend on the ordinary shares at the rate of 7½ per cent. was approved and the retiring Directors were re-elected by general consent.

The city had its novelty show in the A. R. P. exhibition held at a local cinema. There was another appeal for volunteers, this time from Mr. Symington, a Joint-Secretary to Government. The citizens were reminded of their duties in wartime and they were told that the fire risk was great in Bombay. There was no place for political prejudice because the proper protection of property was the object and he declared that non-co-operation with A. R. P. would turn out to be a dangerous absurdity. He said that Congressmen should ask themselves where their duty lay in regard to victims of bombing and fires generated by enemy bombing. Bombay had to help itself, and he asked the citizens to learn what to do if war came to India.

The Bombay Medical Council is nowadays very active, and the last meeting was very long. The Surgeon-General presided and a case of professional misconduct was inquired into. The finding of the Council was in favour of the practitioner against whom allegations were made. The subject of professional ethics was discussed and the code was amended in order to permit medical practitioners to be associated as Directors, shareholders or technical advisers of limited liability companies manufacturing articles other than those with a concealed formula, provided their names did not appear in any publication other than the prospectus, the memoranda, the articles of association or the annual report. The Government was requested in a resolution adopted last week to get certain clauses of the Medical Practitioners Act amended in order to counteract the possibility of practitioners with registrable qualifications failing to register either with the Council or the Board of Indian systems.

The All-India manufacturers organisation may be new but it is certainly vigorous in putting forth its point of view. At the second meeting of the Central Committee there was a discussion connected with the pressing problems of smaller industries. Mr. Amritlal Ojha asked that industrialists should be *enrapport* with Government for the full and proper use of available resources. He hoped that the organisation would serve Indian interests during the war. Mr. Ojha congratulated Sir M. Visweswarayya on reaching the age of 81. As everybody knows Bombay is the province of Sir Visweswarayya's adoption, and it was here that he attained eminence as an engineer before he left for Mysore. His birthday was celebrated with due eclat and tributes in which the Mayor joined were paid at a recent public meeting. His work for the Manufacturers' Association has rightly evoked gratitude and Mr. A. L. Ojha's tribute was pitched in the right manner.

ENDURANCE

The **IRON PILLAR**

The famous Iron Pillar of Delhi, which bears a Sanskrit inscription dating back to A. D. 300, has successfully withstood the ravages of time. Likewise, we claim that our STEEL Equipment, even if it may not last for centuries, does definitely last for much more than a life time.

Important, too, are other advantages . . . Steel Equipment is insect, fire and burglar-proof. It will not warp. Each unit remains for years in the same condition as when originally purchased. The first installation cost is the last. May we quote for your individual requirements?

Jute and Jute Manufactures

Calcutta, 1st October.

A SOMEWHAT cryptic notice appeared in the public press a few days ago with regard to working hours in Jute Mills. No authority is quoted, but it almost looks as if the conscience of the Mills Association Committee were pricking them. It is stated that the question of working hours may again be considered in the light of the September stock figures. One would assume that there was no "may" about it. The ramp in the ready hessian position has reached such dimensions as to make such consideration obligatory, and an immediate increase to 54 hours per week is nothing less than what is to be expected in the circumstances. It is reported that hessian shipments in September amount to 117%, that is, considerably more than production, so that a drop in the stock figures is to be looked for. Freight space has been in more ample supply and we have again had the anomalous position of some 20 crores of hessians in Mill Godowns and a marked shortage of goods to fill the freight which is available. How can this be accounted for? There can be only two reasons; either the goods in godowns are not the type required for shipment, which is improbable, except in the matter of 8 oz./40, production of which it has been the deliberate policy of the Mills to curtail, till the supply is quite inadequate to maintain a stable market. Alternatively, the goods in Mill godowns belong to parties who are deliberately refraining from selling because they can see a "corner" and are holding consumers up to ransom for the goods they require, notable amongst these consumers being the U.S.A. This is Calcutta's gesture in response to the liberal Lease and Lend policy of the U.S.A. and it seems time that the Mills were taking some more drastic action about it.

The truth of the matter is that it would be extremely difficult to discover who were the owners of much of the hessians in Mill godowns. In most cases the stocks represent goods bought by speculators, who have no interest in where the goods are shipped to or indeed whether they are ever shipped at all. The goods are paid for against Delivery Order and these delivery orders simply become gambling counters in the Bazar. And any shortage of these gambling counters, as there is at present, means that prices can be boosted about to the gamblers' hearts content, quite regardless of the actual market conditions. It was announced some time ago that "ceiling" prices had been fixed for New York spot goods which corresponded to Rs. 21/8 for 9 porters and Rs. 28/- for elevens. Such distant control means nothing to the Bazar. They have cheerfully forced prices here within the past few days to Rs. 26/8 for nines and Rs. 30/4 for elevens. It is suggested in the Press Note referred to above that, should there be any advance in prices here beyond the "ceiling" limits, the Govt. of the U.S.A. might have to request the Govt. of India to prevent a further "unreasonable rise". The remedy does not seem to lie there. We cannot see how any sort of maximum price could be enforced in present circumstances. The situation has been created by the deliberate policy of the Mills themselves and the only possible solution lies in the hands of the Mills, by making more goods available to stabilise a market which is obviously distorted by the policy recently followed.

LET YOUR MONEY
— Fight! —
FOR YOU AS WELL AS FOR VICTORY

If you are unable to take part in this titanic fight against Nazi aggression, let your money do the fighting for you.

Your investment will help to maintain the ever increasing supplies of arms and ammunition with which to defeat the enemy.

Your money will be absolutely safe in Gilt-edged securities. Instruct your bank and invest in Defence Loans today.

sincere profession. Nationalism has taken giant strides forward during the last ten years. And the fact that it gained ground both in the political and in the economic sphere at about the same time is helpful for those who want to prejudice the case of economic nationalism. In reality, what the world wants to-day is that in politics internationalism should give way to nationalism. The trends thus have to be in the opposite direction.

Many institutions in South India have been nourished by the unique combination of opulence and generosity typified by the Raja of Chettinad. Last week-end in the auspicious navarathri there took place that significant even in the Indian's life, the *shastiabdapoorthe*. The occasion evoked the familiar tribute and the conventional eulogy, but the least elaborate of these like the present note will qualify for sincerity. There were junketings at his own place and elsewhere, and the representatives of the public assembled at the sacred university town to do him honour. The South has only to look round to see the memorials of a lifetime's generosity of a practising philanthropist but all parts of India must learn how oriental, or to be precise, Indian, learning has obtained notice proportioned to its importance. During the war too he has let his munificence flow in many channels and India has reason to regard with gratitude one who has been a proper steward of great wealth because he has made wise use of great possessions.

'EAVESDROPPER'

(Continued from page 631)

Presumably, the Central Treasury must have taken a ways and means loan of of Rs. 3½ crores in the hope that, on the receipt of the usual monthly payment of the British Government, the ways and means advance would be liquidated. The next return of the Reserve Bank should show a liquidation of the ways and means advance; a considerable rise in sterling assets; and, possibly, a sharp rise in the cash balances of the Central Government.

Stock Markets to-day and to-morrow

IMPROVED COTTON MILL EARNINGS

STOCK markets have shown remarkable resistance to bad news from the Eastern European front. The fall of Kiev and the rapid advance of the Germans in the Ukraine had a discouraging effect and with the sharp break in raw cotton prices there was some selling on the Bombay Stock Exchange. The successful conclusion to the Moscow Conference and the encouraging statement made by Mr. Churchill have, however, been encouraging and most of the lost ground has been recovered. The undertone is steady though the tendency of operators during the past two days is to await further developments. The Calcutta Stock Exchange is closed on account of the Puja holidays and will reopen on October 9, 1941.

* * *

Further details regarding the issue of Jessop and Company shares are now available. The authorised capital of the company is Rs. 1 crore, Rs. 15 lakhs in 5 per cent. cumulative preference shares of Rs. 100 each and Rs. 85 lakhs in ordinary shares of Rs. 10 each. Prior to the flotation, the issued capital consisted of 510,000 ordinary shares of Rs. 10 each, all privately held. Of these, 50,000 shares have been offered for sale and completely absorbed. There was also an issue of Rs. 10 lakhs in preference shares of Rs. 100 each so that the total issued capital is Rs. 61 lakhs. Our readers are aware that the ordinary shares were placed in the market at Rs. 16-12 and the preference shares at Rs. 105. The rush for buying has been such that it has resulted in a jump in the quotations for the shares to Rs. 19-4 and Rs. 116 respectively.

The earnings figures for the last three accounting years are very satisfactory. The net profit, before providing for taxation and depreciation, for the year ended October, 1940 was Rs. 12,89,307 against Rs. 9,44,390 for the previous year. The dividend has been maintained during the past three years at 12½ per cent. per annum tax-free. The company is very busy on war orders and it is expected that the earnings for the year ending October, 1941 would show a substantial increase over those for the previous year.. There is, therefore, the chance of a substantial dividend being paid on the ordinary shares in a few months time as already eleven months of the current accounting period have been completed.

Even on the basis of the last dividend the yield on the ordinary shares is over 6.25 per cent. tax-free. As there is a possibility of a higher dividend for 1940-41 it need hardly be emphasised that there is scope for further appreciation.

* * *

Thanks to the greatly improved conditions in the jute industry, it has been possible for the Begg Dunlop group of jute companies to report a substantial increase in earnings for the half-year ended July 1941. This increase in earnings has enabled the directors to recommend a larger distribution to the ordinary shareholders. The aggregate profit for the three companies in the group for the half-year is Rs. 18.21.649 against only Rs. 5.94.580 for the six months ended January 1941.

The accounts of the *Alliance Jute Mills. Limited* in particular make very satisfactory showing. A large increase in sales together with lower working expenses has resulted in an appreciably higher level of earnings. The net profit. before providing for taxation and depreciation. is Rs. 11,09,044 against Rs. 4,07,770 for the previous half-year. The big sum of Rs. 2.5 lakhs (nil) is set aside to depreciation while the provision for taxation is considerably higher at Rs. 6 lakhs (Rs. 2 lakhs). There is no allocation to General Reserve against Rs. 1 lakh on the former occasion. The ordinary dividend has been increased to Rs. 12-8 per share from Rs. 7-8 per share.

The quotation for the ordinary shares has risen by nearly a hundred points during the past few months and the improvement seems to be justified in view of the latest dividend distribution. . The preference shares are quoting around Rs. 126 cum-dividend and afford scope for appreciation.

Only after a series of drastic capital reduction schemes it has been possible for the Craig and Waverley Jute Mills to pay any dividend on the ordinary shares.

* * *

Further testimony to the improved conditions in the cotton textile industry is borne by the results of two important companies published this week.

Of the two companies, the Khatau Makanji Spinning and Weaving Company, Limited and the Central India Spinning & Weaving Company, Limited., the figures of the former make more impressive showing. The accounts of both companies relate to the year ended June 1941. The net profit, before providing for taxation and depreciation of the *Khatau Makanji Spinning & Weaving Company Limited* for 1940-41 is Rs. 10,30.282 against Rs. 4,38,983 for 1939-40. The provision for depreciation is Rs. 5.80,000 (Rs. 2,60,000). The ordinary dividend is higher at Rs. 10 per share against Rs. 6 per share. The sum of Rs. 1,90,947 (subject to provision for taxation) is carried forward against Rs. 164 brought in.

* * *

The strikes in the mills of the *Central India Spinning Weaving and Manufacturing Company, Limited* from May 1, to June 18, 1941, have cut into the earnings for the year ended June 1941. The net profit, before providing for taxation and depreciation, is Rs. 14,18,929 against Rs. 11,45.581 for the previous year. The provision for depreciation is Rs. 4 lakhs (Rs. 3.5 lakhs). Taxation Rs. 2.5 lakhs (Rs. 1.4 lakhs) and General Reserve Rs. 50.000 (nil). There was an allocation of Rs. 25,000 to Investment Reserve Account on the former occasion. The ordinary dividend is higher at Rs. 10 per share against Rs. 4 per share.

* * *

The accounts of the Bird group of coal companies have been published. As a result of the increase in despatches and the higher level of prices towards the close of the last half-year, on account of the demand for shipment coal for the Middle East, some companies have been able to report a higher level of earnings. But it has not been possible to increase the dividend in the case of the bigger companies. Bhulanbararee Coal Company has returned to the dividend list with a payment on the ordinary shares of 1¼ per cent.

Burrakur Coal Company Limited has been able to earn a higher level of profit for the half-year ended June, 1941. The net profit before providing for taxation and depreciation, is Rs. 4.41,690 against Rs. 3,16,253 for the previous half-year. After setting aside Rs. 1,14,820 against Rs. 1,10,796 for depreciation and Rs. 90.000 against Rs. 68,350 for taxation, the dividend has been maintained at 3 1/8 per cent. It has again been necessary to transfer Rs. 20,000 from the Dividend Equalisation Reserve.

The directors have again uttered a warning against the possibility of a reduction in dividends with a further increase in taxation. The low level of profit for the standard period will make it it difficult for the present rates of dividends to be maintained even though profits may increase.

WATCH-DOG.

The Week in the Exchanges

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Friday Evening.

Money:—Call money continues to be quoted at ¼ per cent. lenders.

Exchange Market:—The Exchange market is firmer with a greater number of bills offering.

Securities:—The giltedged securities section is very steady with only a small volume of business passing. Quotations are more or less unchanged. 3½ per cent. Paper is sticky around Rs. 96. Among terminable loans, 2¾ per cent. 1948-52 were done at Rs. 97-14, 3 per cent. 1951-54 at Rs. 99-13, 3½ per cent. 1947-50 at Rs. 103-4, 4 per cent. 1960-70 at Rs. 110-8 and 4½ per cent. 1955-60 at Rs. 114-10.

Shares:—After earlier weakness there was a moderate recovery in mid-week on the successful conclusion to the Moscow Conference and the encouraging statement by Mr. Churchill. Tata Steels recovered while Textiles showed cosiderable strength with *New Great* and *Century* prominent. Towards the close an easier feeling was noticable as operators were inclined to await further developments.

Textiles:—In spite of the easier feeling towards the close, closing prices are considerably higher on balance. Good enquiry from the cloth markets and the encouraging results of cotton mills have been mainly responsible for the improved sentiment. Another company to increase the dividend distribution for the year ended June. 1941 is the Khatau Makanji Spinning and Weaving Company Limited. The ordinary dividend is higher at Rs. 10 per share against Rs. 6 per share for 1939-40. *Bombay Dyeing* were Rs. 1,312-8, *Central India* Rs. 396, *Gokak*, Rs. 257, *Kohinoor* Rs. 529 and *Simplex* Rs. 153-12. *Century* are nearly sixty points higher at Rs. 582 while *New Great* new shares were Rs. 333.

On account of the Puja holidays the Calcutta Stock Exchange remains closed and will reopen on October 9, 1941.

Hydro-Electrics:—*Andhra Valley* were firmer at Rs. 1,805. *Tata Power* at Rs. 1,855 and *Tata-Hydro* at Rs. 191-8. At the annual meeting of the shareholders of the Tata Power Company Limited the Chairman remarked that a considerable reduction in interest charges had been effected and that the possibility of a revision of the profit-sharing agreement with the sister company was being explored. The higher dividend has been recommended on account of the encouraging prospects for the current year but he warned shareholders against any undue optimism as the new agreement with the B. B. & C. I. Railway, which will come into effect from the beginning of the next year, was at considerably lower rates and will affect earnings.

Steels:—With few sellers offering there has been a good recovery in the quotations for Tata deferreds and ordinaries but some selling at the higher levels has caused quotations to close below the best levels for the week. *Tata* deferreds were Rs. 2137-8 and ordinaries Rs. 402 against Rs. 2,082-8 and Rs. 393 at the time of last writing.

Miscellaneous:—The popular shares are marked higher in this section though *Alcock Ashdown* have been irregular with the quotation at Rs. 628-12. *Belapur Sugar* were Rs. 251-8, *Associated Cement* Rs. 155. *Bombay Burmah Trading* Rs. 526-4 and *Scindia Steam* Rs. 25-14. *Indian Bleaching* were Rs. 144-8 and *Shivrajpur Syndicate* Rs. 41-8.

MADRAS STOCK EXCHANGE

(*From Our Correspondent*)

Friday Evening.

The local market has been rather steady. The tone towards the close was rather easy but rates were well maintained. Textiles have been very firm while Teas and Rubbers have been well supported. Sugar shares have remained steady.

Securities:—Business in this section has been rather restricted. 3½ per cent. Paper has remained steady at Rs. 96 while 5 per cent. 1945-55 were done at Rs. 11-5.

Mills:—Textile issues have been firm with *Buckingham* ordinaries at Rs. 279 and *Cambodia Mills* at Rs. 10-10. *Sitaram Spinning* were Rs. 80. and *Mettur Industries* Rs. 176. The publication of the report of the *Kothari Textiles Limited* for the year ended June, 1941 should have an encouraging effect on the market. A maiden dividend of six per cent is to be paid on the ordinary shares.

Sugars:—Sugar shares have not been very active. There is some dissatisfaction with the maintenance of the dividend for the year ended June, 1941 by the *Mysore Sugar Company Limited*. *Travancore Sugars* were Rs. 15-14 and *Deccan Sugar* Rs. 54.

Utilities:—*South Madras Electric* were Rs. 14-14, and *South Arcot Electric* Rs. 101.

Miscellaneous:—*Mysore Chemicals* were unchanged at Rs. 18-2, and *Mettur Chemicals* at Rs. 13-2. *Spencer* ordinary shares were Rs. 6 and *Indian Steel Rolling Mills* Rs. 8-8. *Mysore Paper* were Rs. 17-2.

Plantings:—Rubber and Tea shares have remained steady with *Cottanad* Rs. 7-12, *Rajagiri Rubber* Rs. 9-6 cum-dividend, *Cochin Malabar* Rs. 8-6 and *Midland Rubber* Rs. 8-2. *Tropical Plantations* were Rs. 21-8.

THE SALEM-ERODE ELECTRICITY DISTRIBUTION CO., LTD.

A dividend of 6¼% free of Income Tax for the year ended 31st March 1941 has been declared payable at once.

ISSUED WEEKLY

Vol. XXVIII. No. 15 SATURDAY, OCTOBER 11, 1941 Price Re. 1

Insure and Increase Nation's Strength

Financial Independence of the individual is the measure of Nation's financial strength.

In this hour of world turmoil, all Life Insurance Policy-holders should take stock of their insurance cover and ascertain just how strongly they are fortified against the unpredictable that lies ahead.

And, those individuals who have not yet made provision for their protection need do so without delay and thereby contribute towards Nation's strength.

Be advised and write to-day to

NATIONAL INSURANCE COMPANY,
LIMITED.

WORLD OF INDIAN FINANCE

Friday evening.

JUDGED by the routine criteria, the present phase of the money market may well be described as the peak of the slack season. This is not exactly true to form, as October witnesses quite a heady flow of jute from the mofussil after harvesting. In relation to crop movements, October should thus be accounting for a considerable despatch of funds from Calcutta to the districts in respect of jute. Short credits have been in abundant supply, with no takers at all. Banks continue to be uninterested in term deposits except in the case of renewals. Cash in the hands of banks is piling up; and the deposits maintained by scheduled banks with the Reserve Bank have never reached the Rs. 50 crore mark. After a gradual stepping up in recent weeks, the Treasury Bill rate has experienced a check in its upward rise. This fact is all the more significant as the Central Government's short term borrowings are in addition to those of two provinces which borrowed on Treasury Bills last week and of another province which will be coming on the market on Monday next. On October 2, the Bengal Government secured Rs. 75 lakhs of three months bills from the market; on October 6, the Central Provinces Government placed Treasury Bills for Rs. 40 lakhs; and on October 7, the total amount secured through Central Treasury Bills was Rs. 2 crores. Between October 2 and October 7, the market was thus asked to put up Rs. 3.15 crores for the Government of India and the provincial governments. On October 13, the Madras Government are inviting tenders for Rs. 50 lakhs of three months' bills. October 14 will be the usual tender day for Central Treasury Bills. In spite of this rather heavy demand on the short loan market, the average rate of accepted tenders on September 7 in respect of Government of India Treasury Bills was lower at annas ten and pies seven per cent per annum as compared with annas ten and pies nine per cent. The decline as such is only slight; but its significance lies in the arresting of the recent steady rise in the discount rate. Another important development to which we should invite attention is the unusually keen bidding for the Rs. 40 lakhs of C.P. Treasury Bills. Against Rs. 40 lakhs on offer, applications came to Rs. 1,55¼ lakhs. It is also highly significant that the average discount rate of these bills was only annas eleven and pies three per cent per annum as compared with annas ten and pies seven which was the rate on the following day for Central Treasury Bills.

The gap between Central Treasury Bills and provincial Treasury Bills was thus reduced this week to eight pies. It may be safely predicted that the Madras Government which enjoys the highest credit among the provincial governments will be able to secure its Rs. 50 lakhs of Treasury Bills next week on even more strikingly favourable terms. For our part, we shall not be surprised if the next week's results prove to be a record with respect to the narrowing of disparity between the rate of Central Treasury Bills and provincial Treasury Bills.

As anticipated, the returns of the Reserve Bank, issued this week, which are for the week ended October 3, disclose the receipt of substantial sterling payments in respect of transactions between the Indian Government and the British Government. Foreign balances held in the banking department have risen from Rs. 52.55 crores to Rs. 60.37 crores or by nearly Rs. 8 crores. Sterling securities held in the Issue Department also show an increase of Rs. 7 crores from Rs. 136.63 crores to Rs. 143.63 crores. It will thus appear that the sterling payment received from the British Government in the present occasion is as much as Rs. 15 crores. So large a payment has enabled the Central Government to repay ways and means advances of nearly Rs. 5½ crores; to increase their deposits with the Reserve Bank to Rs. 11.90 crores; and to provide for the considerable disbursements incidental to the beginning of the month. The Central Government thus start the current month with a comfortable ways and means position. The loan taken from the Reserve Bank has been repaid. The deposits maintained by the Government with the Reserve Bank are nearly Rs. 12 crores. It is interesting to compare this position with that at the beginning of September as a result of similar inter-governmental transactions pertaining to August. Between August 29 and September 5, the Central Government repaid a ways and means advance of Rs. 5 crores but increased their cash balance only by Rs. 2¾ crores to Rs. 8¾ crores. The cash position of the Central Treasury at the beginning of October is thus better than in the beginning of September by Rs. 3¾ crores.

A close study of the changes in the Reserve Bank returns over the past months in connection with the large sterling receipts from the British Government makes it clear that the money payments are now steadily becoming higher and higher. This month's receipt of Rs. 15 crores is a record. Herein may be found evidence of the increasing part that India is playing in war supplies to Britain and in contributions towards the war in the Near East.

These rising sterling receipts have made it possible for the Reserve Bank to restore the sterling securities in the Issue Department to the level at which they stood prior to the colossal payments made in March-April towards the redemption of the dated India sterling stocks. On March 21, sterling securities in the issue department stood at Rs. 140.50 crores. They fell to Rs. 102.24 crores on March 28. There

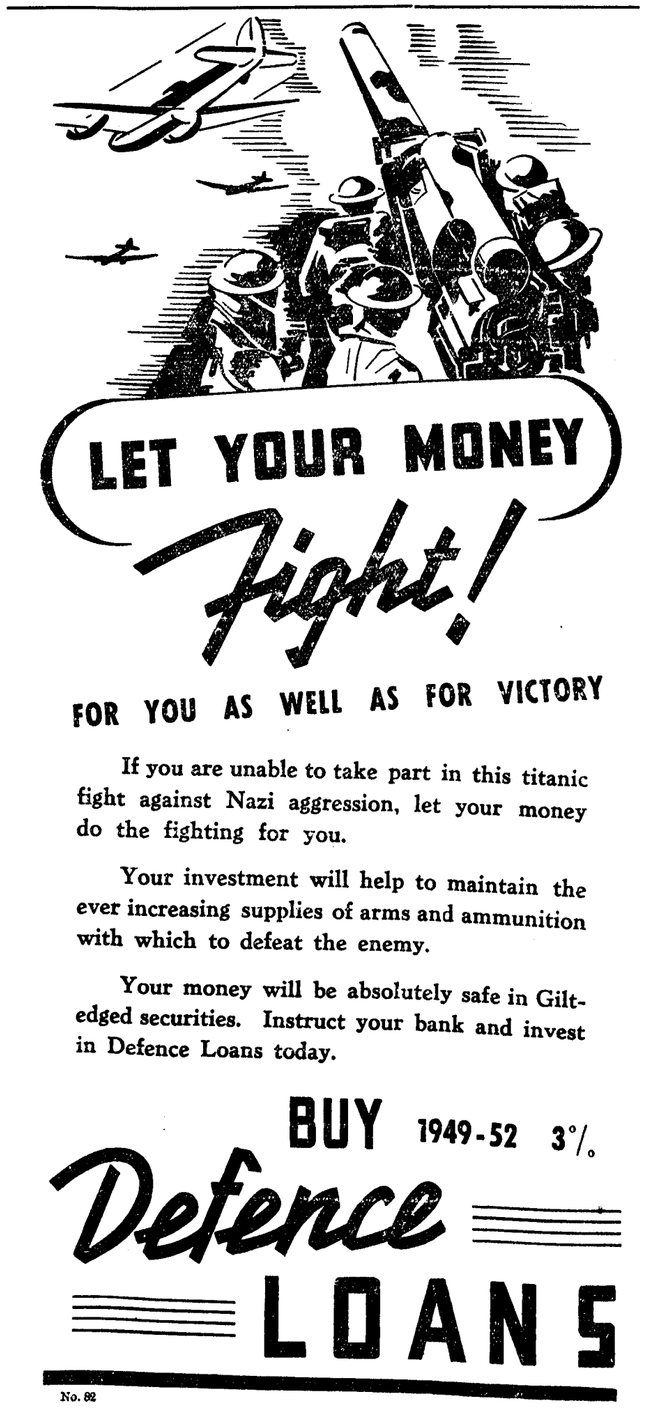
TREASURY BILLS

India

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills were opened on Tuesday October 7, 1941. Total amount offered was Rs. 4 crores and 8 lakhs. Tenders at Rs. 99-13-6 per cent were accepted in full and those at Rs. 99-13-3 per cent were alloted approximately 35 per cent. Lower tenders were rejected. Total amount accepted was Rs. 2 crores, the average rate of accepted tenders being annas ten and pies seven per cent per annum.

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills will be received on Tuesday, October 14, 1941. Successful tenderers should make payment on Friday, October, 17, 1941. Other conditions are as usual.

During the week ended October 3, 1941. Government of India Treasury Bills for Rs. 3,72,25,000 were sold in favour of the Issue Department of the Reserve Bank of India.



Madras

Tenders for Rs. 50 lakhs of three months' Government of Madras Treasury Bills will be will be received at the office of the Reserve Bank of India at Calcutta, Bombay and Madras up to 1 p.m. (Standard time) on Monday, October 13, 1941.

Successful tenderers will be required to make payment and take up their bills on Wednesday October 15, 1941.

C. P. and Berar

Tenders for Rs. 40 lakhs of three months' Government of Central Province and Berrar Treasury Bills were opened on Monday, October 6, 1941. The total amount offered was Rs. 1 crore, 55 lakhs and 25 thousand. Tenders at Rs. 99-13-3 per cent were accepted in full and those at Rs. 99-13-0 per cent were alloted approximately 22 per cent. Lower tenders were rejected. The total amount accepted was Rs. 40 lakhs, the average rate of accepted tenlers being annas eleven and pies three per cent per annum.

Finance Abroad

Thursday Evening.

WHILE commentators never fail to take note of changes of annas four in the rupee price of one hundred dollars, it is hardly beside the purpose to dwell on the meaning of such changes. A keener demand for dollars for remittance has however been referred to more than once and the existence of control rates mentioned as a stabilising influence. As far as can be discerned there has been no change in exchange rates in London over the past fortnight. The weakest of the currencies quoted is the Chinese dollar which has apparently found its true level, and Anglo-American co-operation has been forthcoming to prevent the exchange from reflecting the effects of the fighting in Hunan. The movements in the bullion market during the period covered by the review are unrelated to any positive movements in exchange rates but must be attributed to the nervousness engendered by war news. It is worth reflecting that the London Stock Exchange has developed some irregularity since the determined offensive of the Nazis against the Crimea now viewed not as a diversion but as a move against the oilfields lying beyond the Black Sea began. The ability of control rates for giltedged to remain unchanged is not in doubt but the oil share market has evidently been upset by the reports that the Germans checked at Leningrad have picked on new objectives and may resort to new tactics.

It is certain that financial developments of the past month such as the appreciation of the rial or the admission of Syria and Lebanon into the sterling area of relatively little importance at present as compared with the possibility of a Japanese move against the democracies or of an Allied campaign in and beyond Georgia. The sale of silver to Abyssinia for minting Maria Theresa dollars reported last month was not unusual or unexpected, and one of the consequences of the abolition of slavery contemplated by the Emperor of Abyssinia must be a demand for coin for payment of wages. What relation the Abyssinian currency will bear to the rupee is not known but one must assume that the new dollar like the rupee will have a value independent of its metallic content.

Among the changes introduced by the new *regime* in Iran are the revision of the sterling-rial exchange. The pound-sterling is now worth 140 rials as against 174 rials previously and the appreciation of the rial is also reflected in a change in the dollar value of the rial. The dollar is now declared by decree to be equal to 35 rials as against 45 rials previously. It was indicated subsequently that difficulty would be experienced in maintaining the rial at the new rate of 140 to the pound and discussions would follow. The new rate means that more money would have to be spent by the Allies in Iran for many payments will have to be made locally to contractors and transport men but the rate might fall quickly as more and more rials are bought in exchange for sterling. The new rate might not have any effect on Iran's imports and the retention of large sterling balances by the Iranian Government, referred to in a *Reuter* message from Teheran, argues the ability of the new Government to maintain the new rate. The withdrawal of rigid restrictions on dealings in foreign currencies is also envisaged, and it has been forecast that alongside of increasing Allied expenditure in Iran, that country will buy more freely from countries within the sterling group in order to qualify for assistance. The abolition of trade monopolies has been forecast and the liquidation of a variety of controls will leave Iran very much like Egypt or Iraq.

The main point of interest in the message lies in its revelation of the depreciation of the rial in recent months. It is evident that the observations on Iran's currency and exchange based on the usual works of reference were wide of the mark. That the rate had slumped from 80.56 the original par of exchange, to the rate of 174 to the pound is a measure of the difficulties experienced by Iran after the war came to Syria and Iraq though the difficulties are partly due to failure of crops, the discredit into which the Riza Shah regime had fallen must have been responsible for the fall in the external value of the rial. The depreciation might be partly due also to the rise in note circulation recorded over 1940. It is unfortunate that the increase after August, 1940 can hardly be measured by reference to the Geneva bulletin of statistics. The bulletin does not yield any information as to the extent of gold and silver reserves after August. All that is known is that Iran had 311 million rials in gold and 359 million rials in silver in August, 1940. Not very enlightening, but the average value of the rial in 1940 affords a clue to the position of the Iranian currency; the average value until May, 1941 was 5.882 cents the same as that for 1940.

Britain has started her new borrowing programme in a week after the Commons had approved the second vote of credit submitted this year for £1000 millions as the sale of 2½ per cent. 1951 bonds starts on Friday. With only £146 millions left out of the last vote, the Government had to approach the Commons for additional money. War expenditure up to £1000 millions more has been approved. It is the Government that must devise the means for no private member can put up any financial proposal. It has been stated that with war expenditure running at £13 millions per diem, the position is not so happy as in September when the daily war bill was only £11 millions or in June the war claimed only £10¾ milions. The Chancellor told the House that the £1000 millions voted last week would see Britain through to the end of the year. The Chancellor's speech furnished details of the cost of the war. He revealed that the first two years have taken £7018 millions. Of this vast total, nearly equal to the pre-war National Debt, the proportion furnished by revenue was as much as 40 per cent.

The Chancellor's claim that taxation has not been shirked is borne out by the figure relating to the cost of the war. The real cost may be lower since wages and prices have risen inevitably since September, 1939 and the Government's various controls have contributed, as described in the reports of the Select Committee on Public Expenditure, to a certain amount of extravagance and waste. The actual share of loan expenditure must be smaller than 60 per cent. since Sir Kingsley Wood adverted to the fact that £1000 millions had come from small savers. The proportion of war expenditure raised by the additions to the floating debt in non-official hands was as low as 26 per cent. The qualification suggests that the public departments may have taken off an undisclosed percentage of the floating debt. There is, however, the fact that war outlay has increased swiftly since 1940, not merely owing to the War Damage Bill but an account of operations on a bigger scale in many theatres. The 3 per cent. war has saved something but the Chancellor's claim that defence loans on tap had succeeded completely is hardly borne out by the fact that a 2½ per cent issue has come in its place though the old issue will be retained for the sake of convenience to a certain class of investors, who will get the old Defence Bonds as agreed. The Government's achievement in keeping down the rate of interest is paralleled by the comparable low cost of borrowing in India when the 100 crore mark should soon be reached in the case of the defence loans.

Following the Administration's resolve to check Nazi attacks on the high seas and to increase food supplies to Britain, Mr. Wickard said last week that half a billion dollars worth of foodstuffs had been shipped from the U. S. A.

The Moscow talks ended last week prove that the U. S. A. has a big stake in the victory of the Powers that have lined up behind the Atlantic declaration. The enormous shipping programme is one facet of the war effort. Its financial implications of the foreign policy of the third term have been explained by Mr. Harold Smith. He is evidently not worried like his predecessor, Mr. Lewis Douglas, either about the spending or the ways of getting the money. Explaining the cost of defence, he admitted that 18 per cent. of the national income would be spent on defence. The increase from 8 to 18 per cent. in a year is significant; reasons given are faster defence construction, higher prices of some items and new appropriations. Stating that the war costs in Britain took away 40 per cent of the national income, he said that Germany took off 50 per cent. of the national income for the war. He added that U. S. national income was rising and an adequate margin was left for civilian purposes.

The soothing syrup of Mr. Smith's statement came after the Secretary to the Treasury had dropped a brick by saying that he favoured the limitation of dividends. Mr. Morgenthau's opinion that any return above 6 per cent. should be taken off by the State because the shareholder did not deserve it upset the nerves of Wall Street. Mr. Smith's forecast that defence spending would reach 2000 millions in the spring of 1942, has definite consequences and those who have followed Dr. Grady's statements in India will note that the U. S. defence programme will benefit some sections of India's export trade. Mr. Smith's prediction that defence outlay in 1941-42 (the U.S. fiscal year ends in June) would reach 18 billions which would not surprise those who have followed U. S. development including the recent grant of $1250 millions for enlarging U. S. steel production by as much as 10 million tons.

Industrial Profits in War Time

TRENDS of business activity are notoriously obscure in times of war, when military considerations rule out economic intelligence. But the need to gauge the trends often changes in inverse proportion to our ability to do it. While at other times and in other countries the public may be content with the satisfaction that the purposes of war are adequately met, in India, we have to satisfy ourselves as frequently as may be possible that the bases of the national economy are not being impaired by the shocks imparted by the war. This anxiety, natural enough in any war, is particularly keen in this, when agriculture is known to have been hard hit by the loss of foreign markets. Stories of war profits can kindle an easy optimism; but they have to take their place in a map of the national economy accurately drawn to scale. The benefits of war orders are unevenly distributed over numerous lines of productive activity; and profits made in a war contract for shoes or tents are apt to destroy one's sense of proportion if they are not properly related to industrial profits as a whole during the war period and, what is perhaps even more important, changes in industrial profits are not seen as part of the vicissitudes of the national income.

It were idle to speculate on the net effect of the war on our national economy and our national income. The changes that are being wrought are of too wide a scope. But it is certainly possible to impart a degree of precision to the general notions of profits derived by Indian industry from the present war conditions. In the absence of statistics of industrial production, one is thrown on profits as the only index of the business trends. And even here there are obvious difficulties of making the data complete.

A study of the trend of profits in reports published during the nine months ended 30th September, 1941, brings out in a striking manner the unequal development of Indian industries in war time. In the first quarter of the year under review the Jute industry was activated and the greater part of the increase in earnings was due to the receipt of large government orders. In the first place, until the end of April, 1941, the trend of cumulative earnings was upward as compared with the previous years and from April onward there was a progressive decrease month after month. It is only necessary to glance at the usual tables relating to cumulative earnings of companies published from time to time in the *Investor's Supplement* to ascertain that industrial profits in India have not by any means advanced strongly as a result of the war. The increase in the profits was not spread over a wide field and the incidence of higher earnings within a single industry has not been evenly distributed. In order to show clearly the increase in profits, the figures have been compiled before providing for taxation and depreciation, since the E.P.T. necessitated larger provision for taxation in nearly all cases. The changes are discussed in order to show that profits in several big industries, including Jute and Coal, declined in comparison with 1940. The companies which show any striking increase in profits, are those which are engaged on war work and have defence contracts. The iron and steel and cotton industries have naturally not looked back since the outbreak of war, but their good fortune was hardly shared by the other industries which have an equally big place in the war effort.

It is only necessary to cite the case of Jute. After the initial spell of rising profits until the first quarter of 1941, jute mills had in due course to resign themselves to lower levels of profits. The export position was adversely affected, for two reasons, namely, lack of shipping facilities and the failure of American consumption figures to reach the 1939-40 level. This is assuredly reflected in the lower production of jute goods except in July and August, 1940. Production during all other months of the 1940-41 season was lower than in the corresponding months of the 1939-40 season. The average monthly production in 1940-41 was lower at 81,999 tons as compared with 1,05,264 tons in 1939-40. As a result of this and the altered conditions, to which statutory minimum prices made their contribution, there had naturally been a decline in earnings over those reported in 1939. Thus, till the end of April, 1941, the reports of 22 companies disclose a profit of Rs. 88.91 lakhs against Rs. 48.87 lakhs in the corresponding period of 1940 and or an increase of 81.93 per cent. But the addition of 20 other jute mill companies to these figures converts the increase in profits into a decrease. Thus for 42 companies reporting up to the end of May, 1941 the aggregate profit of Rs. 1.82 crores was returned as against Rs. 2 crores in 1940. Against the increase in the figures for 1941 by 81.93 per cent. over those for 1940 there was a decrease of 8.77 per cent. in the more recent period. This adverse trend was accentuated as the months went by and at the end of July, 1941, there was a decrease of 37.78 per cent. on the usual basis of comparison, and an improvement occured by the end of the last month, when the decrease was only 23.43 per cent. Unsatisfactory American consumption and lower export of jute manufactures were, however, offset to an appreciable extent by the large order for sandbags and sundry goods placed by His Majesty's Government in August. The Jute industry can, however, hope to maintain the level of profits on the scale of the early months of the war period, following the decision of the Indian Jute Mills Association to increase the number of working hours from 50 to 54 hours per week. In the light of the stock position, the better shipping prospects and a higher level of production mill earnings can be expected to run at high levels.

By far the largest contribution by industries in India to the national war effort is that made by the iron and steel and cotton industries. The expansion of ammunition production within the country and the stimulus given to industrial activity by war conditions have created a strong demand for all products of the iron and steel industry. Thus, 10 companies alone till the end of September, 1941, report an aggregate profit of Rs. 7.80 crores as against Rs. 5.66 crores in the corresponding period of 1940 and Rs. 4.69 crores in 1939.

Owing to the war orders, cotton mills have had to make adjustments to their machinery, their spread-over and hours of work. The industry in the two or three years prior to the outbreak of war had a lean time. With the outbreak of war the gloom turned atonce into glorious prosperity. Thus, 18 representative companies were able to show for the nine months ended September, 1939, an aggregate profit of Rs. 1.70 crores. With internal trade improving, the market was ready for absorbing large supplies. Prices went up, resulting in enhanced profits for the mills. Thus, the same number of companies for the same period in 1941, made a profit of Rs. 2.26 crores against only Rs. 1.58 crores in 1940. The war and the consequent curtailment of imports give the industry a great opportunity to earn good profits in the coming months.

The coal industry has not derived any advantage from the presence of war conditions. If anything, the problem of wagon shortage has now assumed greater importance. In fact, it may be said without qualification that important coal companies have been finding it hard to maintain their earnings even at the level of the year 1939. The higher costs of production which are due in the main to the rise in prices of stores, higher freight rates and wages, have cut into profits. The opportunity afforded to develop the Far Eastern markets was also lost on account of the shipping difficulties. From the balance sheets of 39 coal companies published from 1st January to 30th September, 1941 it may be deduced that the aggregate profit was Rs. 74 lakhs against Rs. 87 lakhs in 1940 and Rs. 82 lakhs in 1939. The main factor

determining the market position for coal has been the acute shortage of railway transport which is likely to prove even more severe in the near future despite the postponement of the levy of the seasonal surcharge.

The sugar industry passed through a major crisis in 1940. Burdened with a heavy accumulation of surplus stocks, cut off from the export markets and faced with an internal market of small proportions, the industry was in an unenviable position. When the Provincial Governments assumed a closer control over the production and marketing of sugar, towards the end of 1940, the adverse position was to some extent set right and the tide turned in the industry's favour. The reports of five companies show a net profit of Rs. 28.30 lakhs against Rs. 19.23 lakhs in 1940 and Rs. 19.44 lakhs in 1939. Despatches of sugar from factories have been particularly heavy since June, 1941. The conditions of the industry cannot be expected to improve to any great extent as the surplus stocks with factories, it is reported, are not likely to be liquidated by the end of the season 1940-41 and restriction of output may, in consequence, also be necessary during the season 1941-42.

On the basis of 1940-41 reports it may be declared that the position of the tea industry remains satisfactory. The earnings of tea companies during 1940 were more or less maintained at the level of the corresponding period of the previous year. It may be stated that 11 companies show an aggregate profit of Rs. 17.18 lakhs against Rs. 18.33 lakhs in 1939 and Rs. 12.92 lakhs in 1938.

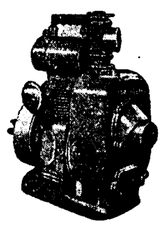
The income of most public utility companies showed only a small increase. Thus, 20 companies were able to show a profit of Rs. 1.53 crores against Rs. 1.47 crores in 1940 and Rs. 1.50 crores in 1939.

The paper, chemical and other miscellaneous industries, unhindered by foreign competition, show a good rise in earnings which is bound to become more pronounced. The reports of 39 companies disclose an aggerate profit of Rs. 6.15 crores in 1941 against Rs. 4.64 crores in 1940 and Rs. 4.63 crores in 1939.

A chain index of industrial profits from a miscellaneous collection of reports during the nine months can hardly be provided. It is, however, clear that the failure of profits to rise alongside of output was marked in several cases, and the improvement in earnings was noticeable only in those industries which are related directly to the war effort. A study of industrial profits thus amounts to a warning against facile assumption about the trends of business activity. War orders are more in the nature of public works during a slump than of an expansion of demand which heralds the onset of a natural revival. It may well be that war profit is to be reckoned not in terms of current national income, but in terms of those changes in the bases of our national economy and of our industrial equipment and organisation which make for genuine progress in the future.

India's Rice Supplies

LITTLE has escaped the attention of the staff that produced the report on the marketing of rice in India and Burma. The publication issued this week discusses and dockets everything connected with rice. lets the reader quickly grasp where India stands in regard to her single largest crop and tells him also how far available statistics can be relied upon. Though the report enters a caveat against existing statistics of production particularly those relating to Bengal, its main interest lies in its description of the statistical position of India as a rice producer. Burma is the world's biggest exporter, but India has a larger acreage under rice than any other country. The average for the year 1927-37 has always been over 70 million acres and the output of rice is 31 per cent. of world production. Only China has a bigger outturn, claiming as she does 34 per cent. of the world crop mainly owing to the higher average yield per acre in that country, Cartograms make familiar the deductions from statistical tables. Indo-China has been a big exporter, but imports into India from that country have shrunk swiftly since 1935. Rice is the pillar of tropical agriculture, and the fact that India imports on an average 1½ to 2½ million tons of rice per annum shows that not only is the trade relationship with Burma regulated by Burma's rice exports but that India, which exports small quantities of rice, is not self-sufficient. Production naturally fluctuates from season to season and the higher total of 30.9 million tons for 1937 came after a lean year. The average for the decade ending 1936-37 is declared to be 29 million tons.



The acreage under rice is said to cover 18 per cent. of India's total cultivated area and is equal to 36 per cent. of the area under food grains. Bengal accounted in 1938-39 for about 27.5 per cent. of India's rice crop as the area under rice in Bengal exceeds 21 million acres in most years. Though Madras has a strong interest in the crop, as might be inferred from the agitation launched seven years for the imposition of a protective duty, the decennial average of the area under rice amounts to barely 11 million acres as against 21 million acres for Bengal. It might be said here that as the demand for rice is inelastic, the acreage figures show little change over long periods. The area under rice in India has never been less than 72 million acres and has seldom exceeded 79 million acres. The actual crop coming on the market is a little over 40 per cent. of India's total production because over 5 per cent. is kept for seed and 44 per cent. is retained for domestic consumption including barter. It is this fact which accounts for the exceedingly high proportion of hand-pounded rice, said to be as much as 73 per cent. entering into a consumption. Over 9 per cent. passes by way of wages etc., paid in kind and it is noteworthy that a larger proportion of the Madras crop comes on the market. This may be due to the more highly developed trade organisation as also the old well-established import and export trade. There is besides a fairly stable milling industry in districts where rice cultivation is concentrated, and one of the conclusions to be drawn from the report is that the average yield in Madras is higher because rice forms the main irrigated crop. There is, nevertheless, a striking difference between yields in India and in certain rice-growing countries like Italy and Japan. Since the finer varieties of rice are invariably sold for cash, the total value

of rice sold in a year must exceed Rs. 120 crores, and the extraordinary range of prices as between centres, months and qualities only reflects the truth that uniformity and simplicity are altogether lacking.

It has been said that India grows about 4,000 of the 7,000 recognised types of the botanical specimen rice and the absence of uniform standards, grades etc., has led to very pronounced variations in quality and price. Futures markets are absent, except in Burma, and the seasonal variations together with the premium obtainable by the grower who holds off from selling after harvest are only to be expected. It is only proper to add that the information relating to the crop is of more interest than the study of marketing organisation and the report which classifies and analyses the qualities grown, and mentions in passing the efforts made in Bengal before the outbreak of the war to raise the price level for paddy and rice is more valuable for the facts compiled than the familiar recommendations. Burma sells nearly half her surplus of rice to India and the link between Bengal and Madras markets will remain despite the reported decision of the Burma Government to control rice exports and go into business as a monopolist shipper on a big scale. How far India's dependence on imports for a part of her supplies can be justified or removed is outside the scope of inquiry; but it is generally admitted that there is scope for improvement in cultivation. Certain well-recognised varieties enter into the export trade which absorbs hardly 1 per cent. of production and the British West Indies, like Mauritius, look to Bengal for supplies. As 5.7 per cent. of the year's crop, equal to 1.61 million tons, is kept for seed not more than 4.75 per cent. is used for making parched rice and other edible products. Little except in Sind is used for feeding livestock and it is believed that about 90 per cent of the crop is consumed as food. The per capita consumption for India is returned as 181 lbs. per annum, but it is as high as 344 lbs. in Bengal.

Three main types are recognised by the average consumer and his taste determines both price and production in certain cases. It is noteworthy that Bold types, of which over 63 per cent. is parboiled, accounts for about 60 per cent. of India's total production, and the difference in price as between raw rice and parboiled is not altogether due to the variation in the conversion ratio. Parboiled rice keeps better, and its consumption has increased during the past 20 years. And many mills have at present plants for parboiling. It is only recently that a preference for hand pounded rice has emerged. A certain quantity of broken rice is taken off and the poorer classes have come to accept it as part of their diet. Burma's total production of 4.7 million tons leaves over 3 million tons equal to 65 per cent. of the annual production for export. Since exports to Germany absorbed only 5 per cent. on an average, it is clear that Burma's rice trade has suffered little on account of the war and larger exports to Japan and Hong Kong in the past year must have provided adequate compensation. The milling industry is more developed and the steam drying plants like the self-contained units using paddy husk as fuel, and incidentally asking lower hulling charges, are distinguishable from the mills in South India relying on oil engines.

It is plain that the existence of a large number of types acceptable to limited classes of consumers is responsible for the wide spread of prices. The report disclaims that there is any such thing as an average price for rice; for there are no standards of equality and the grower selling by sample at a small market does not know what exactly the middleman skims off. Traders and their agents get in touch early with growers and the existing price records, except for Burma, are characterised by unreliability; seasonal fluctuation in prices can hardly be avoided, but here again provincial variations stand out. The fluctuations in paddy prices are pronounced, particularly, in Madras, and better marketing can only be directed towards the correction of unduly wide differences. Differences based on quality should persist and if premiums for fine rice are constant the grower, remote from market intelligence, will know where he stands.

There is a well accepted difference in favour of old paddy and rice in most provinces, but there is no correct and acceptable ratio as between paddy and rice prices. Suggestions for the standardisation of quality by means of grading and marking are put forth and the absence of a futures market is not regretted. The report states that dealings in Small Mills Specials in Rangoon accentuate bearishness when the crop comes on the market and has not the stabilising influence of a proper futures market and adds 'Its operations should therefore be examined by the local Government with a view either to its improvement or abolition.' In describing the preparation of rice for the market the report throws out a suggestion that South India should try the automatic or self-contained sheller already popular in Bombay and the C.P. The eastern and northern provinces have hitherto shown little or no interest in this type of milling equipment in spite of its relatively high efficiency in the way of less breakage of grain and recovery of bran without wastage as compared with the huller system. It is mentioned that the higher cost of the automatic plant is offset by its larger capacity and higher efficiency in working.

A chain of intermediaries is not wanting in the rice trade. Beyond and outside the mills, too, there are middlemen and it has been noticed that only 6.8 per cent. of the marketable surplus is actually sold by the grower. In certain Madras districts there is something like a self protective organisation for growers in certain districts at any rate. The relative scarcity of regulated and organised markets has been a handicap and the variety of charges, defective weighment etc., are yet to be eliminated. In Bihar, and Orissa, too, co-operative *golas* have provided a solution but have not striven to ensure purity and quality.

The trade in Burma is differently organised and the jungle broker is no creature of fiction. The passage from the thrashing floor to the steam mill means a rake-off for several persons who, however, ensure the regular movement of supplies at a moderate charge. Mills will find it hard to get on without the broker as also the shipper. A distinctive feature is that half the year's crop is handled by the moneylender who takes his dues in paddy. Remedial changes cannot be effected in a hurry, but the report's careful and incisive description of chaotic conditions will at once stimulate the movement for reform. Classification, grading, market news etc., are obvious lines of approach and work done in Dehra Dun, which is famed for its special fragrant rice, provides an inspiring example to all co-operative organisations in India. Storage would facilitate sale at the proper time and procure the premium desired for quality. Existing facilities in villages are far from satisfactory, and if rice suffers less than wheat from weevil damage, it is not free from insect attack though the incidence of damage varies from Province to Province. Bulk storage is recommended and ferroconcrete underground bins appear as suitable for rice as for wheat. The chances of grower who is too often tempted to sell in a hurry.

Editorial Notes

Seaborne Trade in August

THE principal changes disclosed by the trade returns of British India for August are a striking advance under exports and equally striking fall under imports. While it is necessary to remember that in wartime monthly variations are largely void of significance, it is noteworthy that the headway made by the export trade in recent months points to the resilience developed by Indian economy. Total exports for August were valued at Rs. 21.69 crores as against Rs. 20.34 crores in July. How far this increase is due to a rise in average values is difficult to say, but it must be presumed that the advance in commodity prices over the previous months or two is duly reflected in the increase in the higher value of India's exports in August. The contraction in imports like the increase in re-exports has led to a very remarkable increase in the export surplus. It may be admitted that the adverse trend apparent in the returns for the first quarter has been decisively reversed since July. And most hopeful conclusions may be drawn if one were so inclined, but it is essential to remember that the trade returns for the coming months may be subject to a variety of influences.

A comparison with the total for the corresponding month of 1940-41 may suggest that vast improvement has been recorded this year owing to the growth of India's trade with the British Empire and the U. S. A. The monthly changes over the five months for which figures are available indicate that until July imports were distinctly large, though here again, the price factor must be considered and the quantum of trade also taken into account. The steady increase since June proceeds partly from the rise in prices, but a rise of as much as 40 per cent. as between June and August cannot be due wholly to the improvement in commodity prices. Towards the end of July it was argued in these columns that a boom was in the offing. The August trade figures disclosing a rise of 5½ crores in the favourable balance of trade certainly supports the inference then drawn. Due regard must be had to the fact that the increase in August under exports is substantially higher than the increase in imports as compared with the figures for August 1939 and 1940. The progressive totals for the five months, however, encourage the belief that the gap between retained imports and exports is quite small; but it must be noted at the same time that the total exceeds that for August 1939 as also that for 1940 August. Total imports for the five months ended August valued at Rs. 84.95 crores exceed the exports valued Rs. 82.98 crores but mention must be made here of the big increase in re-exports as also the inter-Government transactions which do not come into the monthly trade accounts. The steady accumulation of sterling balances on the part of the Reserve Bank certainly suggests that a good part of India's exports is taken on Government account.

The increase under imports during the five months ended August over the two preceding years points to the marked increase in values. The advance in prices of all imports is seen under liquors, sugar, kerosene, cotton and silk. Even more pronounced is the rise under matches, coaltar dyes and other dyes as also in the prices of piecegoods of all descriptions. One may naturally expect that the enhanced prices of both yarn and piecegoods will be given due weight in the forthcoming discussions at the price control conference. The higher value of domestic and imported cotton is again a relevant factor, and it may be justly said that the two tables relating to declared values per unit of principal exports and imports afford conclusive evidence of how the rise in prices in other countries operates on the price level. The fillip given to the export trade may be temporary but that too has a bearing on the price structure and it is worth pointing out that except in the case of teakwood, and groundnuts the average prices of all exports were considerably over the prices in August of the two preceding years.

The revival of trade with Russia is indicated by the August returns. Total exports valued 12.78 lakhs afford proof of the possibilities in the war situation as also the fact that apart from Turkey in Europe Russia is the only European country with which trade is possible. The August returns show that there is a chance of export trade with Russia recovering to the proportions of 1913 when Russia was an important customer for jute manufactures and tea taking something like 2 crores' worth of Indian exports on the whole.

Bombay Port in 1940-41

ALONE of the Indian ports Bombay is able to report a large increase in revenue during 1940-41. The Bombay port trust administration report refers to a rise in revenue despite a fall in trade. Total receipts for the year amounted to Rs. 265.45 lakhs and total expenditure amounted to Rs. 229.31 lakhs. The ratio of working expenses to revenue was considerably lower at 47.39 per cent. and along with the rise in receipts imparted additional strength to the Port Trust's financial position. Appropriations from the Revenue Reserve Fund totalling Rs. 41 lakhs to other funds leave it fairly high at Rs. 108.9 lakhs as Rs. 36.14 lakhs have been added on 1940-41 account and the excellent earnings position led the Trustees to make concessions involving Rs. 5.51 lakhs to trade. It is certainly noteworthy that while the railways have been compelled to levy a fairly high surcharge and restrict the traffic facilities the Bombay port trust finds it possible to adhere to its former policy of providing relief to trade.

The increase in railway traffic during the year must have naturally assisted the port trust, but the increase in receipts is largely due to the further advance under ground rents and godown charges. Pilotage receipts were lower as compared with the previous year, but dock charges particularly dry dock income showed an increase.

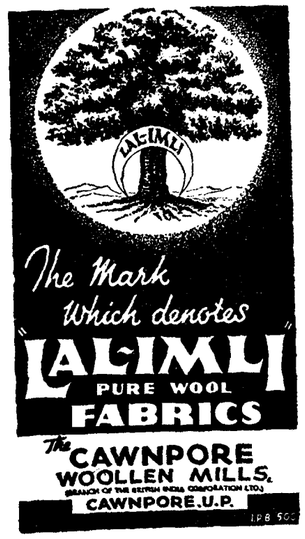
The Trust had to provide debt charges of Rs. 105.96 lakhs in 1939-40. This, like the fall in the percentage of working expenses, has been a favourable factor, but the major factor was the rise of Rs. 23 lakhs in revenue receipts.

The Port Trust had at the end of the year a total debt of Rs. 17.07 crores, of which Rs. 4.27 crores was due to Government and the balance on debenture loans. As against total capital expenditure of Rs. 23.27 crores, the Trust had a debt of Rs. 17.03 crores only, the difference being due to debt repayments. The Port Trust held over Rs. 6.53 crores in sinking and other Funds. The Port Trust owed money at 6 per cent. on three sterling debenture loans only as the Government had reduced the rate of interest on debts due to it. The three sterling loans total a little over Rs. 213 lakhs; but as they mature only in 1952, conversion or repatriation in the immediate future may not be easy. The cyclone of October did not cause much loss to the port trust though country craft in the harbour suffered severely. Capital expenditure during 1940-41 was substantially below previous estimate and dredging, too, was less than in the previous year. The increased activity in the harbour described by the Chairman as mainly due to the war led to an increase in the labour force. At the end of the year, the Port Trust employed 11,248 persons including casual labour. A dearness allowance of Rs. 3 per month to employees getting less than Rs. 60 was granted by the Port Trust which also increased its grant to the employees' welfare fund. The accounts which help to show the changes over the last five years indicate that the contraction in trade affected imports more than exports. The tonnage figures are not available, but it is known the trade of the port fell by 1.5 per cent. in value. That trade shrank is also proved by the fact that traffic at the warehouses also fell in comparison with the last year, while the increase in receipts and deliveries at the Hazardous Goods warehouse clearly shows that the war has helped Bombay in other ways.

Work for Indian Cotton



THE new arrangement with the Stores Department, under which the technological laboratory of the Indian Central Cotton Committee is used as the official testing-house, has conferred additional importance on the Matunga laboratory which reports that in the year ended May, 1941 there was a very large increase in the number of samples tested. As many were furnished in accordance with the directions of the Stores Department, it may be regarded as a contribution to Bombay's war effort. The addition of a ginning section enabled the laboratory to carry out work on six different varieties of cotton kappas. The report states that as many as 426 samples were furnished by the Agricultural Departments. The exceptionally large increase in the number of cloth and yarn samples occurred through the disposition of Government orders. Hyderabad, Indore, Baroda and Bikaner were among the States from which samples of cotton were received, and as may be expected, the largest number of samples spun came from Bombay, with the Punjab ranking second. The installation of cooling plant in the spinning room resulted in work at a higher speed, except when work was stopped on account of repairs to the floor. Over a thousand test reports were issued during 1940-41, as many mills and firms furnished samples in connection with Government's requirements. Eight samples came from Uganda and the absence of any difference as between the varieties grown on either side of the Nile, was ascertained.

The development of cultivation of long staple cottons in Bengal led to the submission of samples of 2896 from seven different localities. The samples generally maintained their good performance of last year, and it was found that the Murshidabad sample gave better performance than the standard PA 289f grown at Lyallpur while the samples from Comilla, Naogaon, Mymensingh and Dacca gave practically the same test as the standard cotton. The report will encourage the belief that Bengal

Dated Calcutta, the 22nd Sept. 1941

mills can obtain a larger supply of superior cotton from within the Province, and the interest evinced since 1937 by the Bengal Mill-owners Association is responsible for the extension of cotton cultivation in suitable tracts. As usual, the main trade varieties were examined and their quality and performance were ascertained. Samples came from the East India Cotton Association and the Millowners Association in Coimbatore. The testing house was kept busy on an examination of fabrics, yarns, absorbent cotton etc. Physico-Chemical and chemical tests had to be added to the usual physical tests. The textile industry benefited inasmuch as mills learnt how defects arose and could be corrected. The laboratory started work on coir yarns provided by the Agricultural Marketing Adviser and a special report is said to be under preparation. The report speaks of the successful cultivation of Upland cotton in Assam. The staple length of this imported variety exceeds that of most Indian cottons. Fibre properties were also discovered to be superior, and if cotton cultivation extends in the hill tracts of Assam, the supply of long staple cotton for Bengal mills will be naturally larger. Technological investigation formed part of the year's work and the results of experimental tests were correlated with those obtained in mills; and another example of industrial co-operation was vouchsafed by efforts to produce filter cloth for sugar mills. With the help of the Bombay Municipality, road surfaces made with cotton fabric were examined and a new departure was attempted in using cotton bagging for cotton bales in place of hessian cloth. Work on linters was continued and the 39 samples tested yielded a formula that would help to determine alpha cellulose content from the results of its mechanical analysis.

Caustic Soda Supplies

THE August bulletin of the Bombay Millowners' Association details the efforts made by the Association to make sure of supplies of caustic soda. Early in August the Association was acquainted with the difficulties experienced by cotton mills in getting adequate supplies of caustic soda which was required to a considerable extent in the production of khaki and other coloured goods. An enquiry made of I. C. I. (India) elicited the information that they had previously laid stocks of this chemical in Bombay and had made arrangements with their suppliers for regular and adequate supplies to come forward, and that it was then their opinion that it was unnecessary for Bombay mills to place orders with the I. C. I. for shipments. It was understood that supplies were made to the mills on the basis of their 1940 purchases from the I. C. I. and also that further supplies would be made available on that basis until the reserve stock position had been restored to normal. Supplies were understood to be in transit, and

it was hoped that all demands made on the I. C. I. would be met in two to three months' time. The export rationing of heavy chemicals adopted in Britain, however, alters the outlook. The export ration of caustic soda allotted in Britain is inadequate to meet the normal demands of the Indian market *plus* the additional quantity referred to for the manufacture of goods ordered by the Government. It was indicated that owing to the very uncertainty regarding the extent of supplies the I. C. I. felt bound to reserve the stocks on hand primarily for firms engaged on Government work. It was also indicated that it would not be possible for the I. C. I. to supply individual orders for caustic soda unless they were satisfied that the material was wanted for the execution of Government orders. It was further indicated that the I. C. I. had made representations to the India Government and hoped that a larger export quota of caustic soda would be made available. The representation of the I. C. I. has evidently borne fruit, for the bulletin speaks of Government having referred the matter to the British Government with a view to ensuring the necessary shipping arrangements. The bulletin in this connection refers to the importance of the representation made by the Association to the Commerce Department on August 5. The Committee recorded there in their opinion that the Government should consider favourably the representation addressed by the I. C. I. in order that the mill industry could make adequate supplies of piecegoods. It was pointed out that the demand for raw cotton depended on the production of piecegoods. It was remarked that a number of export markets for cotton had been lost and trade with the Far East had been peremptorily curtailed. It was added that the mill industry would have to increase its production of manufactures of which a large proportion would have to be coloured goods in the production of which caustic soda was essential. It is satisfactory to record that the representation has produced an impression as the matter has since been referred to His Majesty's Government.

Changes of Australia

THE brief but uneasy period of office for Mr. Fadden as Premier of Australia came to an end last week when the Labour Party obtained a majority in the Australian House of Representatives for its no-confidence motion. By 36 votes to 33, the resolution of Mr. Curtin was carried and Mr. Fadden resigned. The reflections provoked by the withdrawal of Mr. Menzies were various. The press abroad exaggerated his importance and concluded that Mr. Menzies was second only to Mr. Churchill as a leader of Empire. The Australian Labour party has put him in his place and his successor too has realised that the old combination of the

United and Country Parties cannot always work against Labour. The recovery of Australian Labour will not excite surprise. It was the Great Depression that threw labour into temporary discredit and recovery of prestige of late was hastened by the breach with the group identified with Communism. Mr. Fadden's fall has been variously explained but his precarious coalition could not last. With the departure of Sir Earle Page for London the Country Party was leaderless, and memories of the breach between Mr. Menzies and Sir Earle Page should certainly have promoted confusion within fusion. It may not be out of place to mention that similar and perhaps more important changes have taken place in South Africa when General Hertzog the Union's Premier for about fifteen years is out of public life and Field Marshal Smuts is again dominant. Canada like Australia has had a general election but the vast Liberal majority is always there to keep Mr. Mackenzie King in power.

The victory of Australian Labour does not imply any threat to the united war effort to which the Commonwealth is pledged. The Labour Party however has recorded its disapproval of threats to the standard of living when the rich were not called upon to put forth their proper share and freezing wages did not seem right when the Government contemplated the institution of compulsory saving before it had raised taxation to the proper limit. Mr. Fadden did not ask for a dissolution and it is certainly open to Mr. Curtin to ask for one if his opponents carry a division against him. That he has accepted Lord Gowries' invitation and formed his Cabinet demonstrates Labour's willingness and ability to govern. It may be presumed that with its long experience of office, the Federal Labour party will succeed in preserving the social legislation that has been a feature of democracy in the Dominion. The Australian Budget is likely to have a different shape and a sharp rise in the income tax may be apprehended by British and Dominions companies. Capitalism if it does not fear the nationalisation of Broken Hill Proprietary at present, will certainly have to look out for less borrowing from the banks and more taxation. The Labour Party is decided about a more energetic war effort and did not agree about the precise method.

The new cabinet has in Mr. Evatt an attorney-general who is also Minister of External Affairs. While Mr. Evatt's judicial experience may make him better for the job than Mr. Hughes the combination of posts is certainly unusual. It is, however, pertinent to recall that Mr. Menzies was Attorney-General before he became Premier, and it is apparent that Mr. Curtin's principal lieutenant will be the retired judge of the High Court of Australia. Mr. Curtin's victory has been followed by the report that Mr. Duff Cooper is going to Australia soon for the new Cabinet may formulate its own views on Far Eastern developments, and Britain must be prepared, not for a change in policy but in learning for the benefit of the British Cabinet, the opinions that Mr. Bruce and Sir E. Page cannot put forth with any semblance of authority. For over ten years the Labour Party has been out of office and its distrust of coalitions limited its co-operation to the war advisory council set up last year. Mr. Curtin has within a year of the last general election demonstrated that the party grouping was undependable and the majority of three that Mr. Curtin commands will probably be larger after the election due in two years.

New Zealand's War Expenditure

NEW ZEALAND is known to be spending as much as her sister Dominions. In spite of the difficulties facing farmers, the Dominion Finance Minister has provided for £38 million more of war expenditure for 1941-42. The Budget presented in July did not increase taxation and did not cut the social services but increased certain benefits; it was, therefore, acceptable to the New Zealand legislature, which admitting the necessity for paying for the war effort, concentrated on making as few changes as possible. The Dominion has gained slightly from the reduction in expenditure charged to Consolidated Fund. The Budget discloses that last year's surplus of £117 million would help to reduce expenditure this year. Sundry savings had been effected, and by keeping war expenditure separate, the Dominion has made the tax-payer feel the burden of the present as little as possible. The cost of the war for New Zealand this year was put at £70 million nearly of which £31 million sterling would be raised in England and used for the cost of maintaining New Zealand troops serving overseas. The increase of about £40 millions in expenditure as compared with 1940-41 is to be met partly by internal borrowing. The Minister hoped to get £3 millions from savings certificates and £10 millions from other borrowing. The New Zealand Government also contemplated borrowing £10 millions for national development, a term which covers all plans designed to increase the output of primary and secondary industries. The Social Security Fund with receipts of £40 millions is assigned to meet several services and the main item leaving the Consolidated Fund of £39 millions out of the reckoning is war expenditure aggregating £70 millions. The total expenditure was put at £118 millions. Out of this, £63 millions is to be met by tax revenue. The share of war expenditure borne by taxation will be small. Only £18.8 million out of £70.4 million is chargeable to war expenditure and would come from taxation whereas £26 millions would have to be raised by loans at home. Though the Government has refrained from increasing taxation, high enough with a flat rate of 2sh. in the pound, leviable on wages and salaries, the Opposition argued that the Budget was lenient towards industry. The New Zealand Budget in relying on loans from the British Government, gives a hint of weakness, but the Government can defend itself by pointing to the fact that the war effort alone costs more than the normal expenditure of the Dominion and with export trade askew and farmers worrying over the future, there is argument for getting the most from borrowing, particularly as the Dominion's credit status is higher than in 1938.

3⅛% INTEREST FREE OF INCOME TAX

How does a Defence Savings Certificate grow in Value?
The value of a Rs. 10 Certificate increases year by year until it is worth Rs. 13-9 in 10 years.

Do I pay Income Tax on this increase?
Not an anna.

Where do I buy Defence Savings Certificates?
At any Post Office doing Savings Bank work or at any Savings Depot.

How do I buy Defence Savings Certificates?
You can buy them in any multiple of Rs. 10 up to the limit allowed to each individual, *viz.*, Rs. 5,000.

Can I buy Defence Savings Certificates by instalments?
Yes. You can buy As. 4, As. 8, or Re. 1 Defence Savings Stamps and stick them on a card, which is supplied free when you buy your stamps, at the Post Office or Depot.

Suppose I'm ill, or want my Savings urgently?
You can apply, at any time, for repayment of your Defence Savings Certificates.

In every sphere of life a situation is growing that seems to paralyse one's capacity for thought. Wherever one may turn, one is confronted with some stumbling-block or other to progress. Time was when a certain amount of placid confidence was possible for detached observers about the course of the war. Time was, too, when it was reasonable to hope that the great powers would approach economic problems of the postwar period in a liberal and realistic spirit free from racial or national egotism. And now and again, there were turns of events in India which were a mild antidote to the pessimism engendered by the policies of the Government and the great parties. In all these, there has been serious deterioration. It is not given to everybody to shape the destinies of nations. But it is given to many to spend careful and anxious thought on problems of national and international importance, to exert what influence they can on the general stock of ideas possessed by the public and to improve the chances of progress being made instead of regress. But in times like the present, initiative in matters of public policy gets centred all too exclusively in the hands of the Government and those who are already in possession of leadership. The premier who has a large majority may feel obliged in a time of war to invite the leader of the opposition to a share of power and of responsibility. But, once this sort of national government is formed, public criticism is at a tremendous disadvantage. Even in the great self-governing countries, the man who questions it frowned upon. And even were he to get a hearing, any new idea is necessarily at a discount; the wheels of authority move on. The position is far worse in a country like India. And if you agree that what happens in India is not without its bearing on the wider world problem, the pessimism that springs from India extends to the rest of the world. Really, the week that now draws to a close is a cheerless week even for the dark age through which the world is now passing.

The progress of the human race is, indeed, a vague term and an unhelpful idea. It is ideated in terms of some pet notion or other. Macaulay thought of it in terms of the mileage of the world's railways. Hitler thinks in terms of German conquest and the extinction of the Jews and other inferior races. Mahatma Gandhi in terms of non-violence. And at every stage in human history there have been authors of various kinds of Utopias. The wit of man is not yet equal to devising the best that man can achieve or can be heir to. Many things, and many values of life, to which we are still utter strangers, have to be evolved, appreciated and woven into the web of man's individual and social life before the claims of stability and progress can be equally met. That time may be far, or may be nearer than we suppose. But every age has its concrete problems for the solution of which it, or rather a part of humanity of the time, has to strive. Every age has ideals which it works for with a view, if not to its immediate realisation, at least to bringing the realisation nearer for future generations. The task of the publicist is to watch the vicissitudes of the contemporary ideals and their relation to the ultimate hopes of humanity so far as they can be clarified at each stage. It is in this spirit that I for one would look at every problem as it comes up on the headlines of the dailies or supplies the theme for a leading article. To me the Hindu-Muslim problem in India or even the internal discord in the Muslim League is related through the freedom of India to that equality of development among the various races which alone can provide peace and prosperity to the human race. If it is the industrial development of India, there is something low and unspeakably humiliating in viewing it merely as a matter of loaves and fishes for this race or that. It has importance only in so far as it can put an end to that criminal waste of resources, of which the starvation of millions in this country is by no means the only baneful effect. Some day, the race as such has to enter into the inheritance which God and Nature have meant for it, an inheritance which, whether it is spiritual or broadly hedonistic, must appeal far more than all the strife and misery with which human life to-day is so largely filled.

It is on the way to this inheritance that all the obstacles lie strewn pell-

mell, Mr. Amery's statements, Mr. Jinnah's outbursts and Gandhiji's idealism, Russia's weakness and America's delays. Over and above all lies the unpardonable mental inertia of the great powers, the inertia that unfits them for grasping the significance of great events when they occur. I may be thought to have prated without point. But if you look at the more arresting items of news in the dailies during the last two, three days, you will perhaps see my point. I have been writing for weeks on this problem of postwar economic reconstruction and the essential difference between this problem of the last war and those that this war will leave behind. But here is the Trade Convention in the U.S.A. at which the chief speakers were Lord Halifax and Mr. Sumner Welles, harping on the same strings, without any thought of the extent to which the burden of the present war has shifted to shoulders other than those of Britain and the U.S.A. There was the usual unctuous cant about Anglo-American co-operation, the restoration of the old channels of international trade and all the rest of it. In the broad path that leads to the world's commonweal, Lord Halifax can see only three beacon-lights, the Atlantic Charter, of no very reputable associations in this country at any rate, the announcement about British Lease and Lend goods an announcement born of American apprehension and "the resolution adopted on September 29 by the Governments of the United Kingdom and the Dominions with the free governments of nine European countries and the U.S.S.R." There is a world outside Europe and the English-speaking countries; but the latter has no thought for them.

Post-war economic reconstruction is not perhaps a pressing problem. But what of the use that is made of India in this struggle for democracy and civilisation? Or of the incentive to India to put forth her best effort? There is less reason now than ever before to suppose that Hitlerism can be overthrown without India playing a much larger part in the war than she has hitherto played. The course of fighting in the Eastern Front has been going steadily against the Russians during all these months. I am not one of those who believe that Russia will surrender as France did. But what is important to the final upshot of the war is not whether Russians continue resistance on a more or less guerilla basis or not, but whether the defeat of the Russian armies and the German advance will or will not give Hitler a tremendous access of strength. On this point, there is now little difference of opinion. The courage and stubbornness of Russian resistance have won universal admiration and praise. But they cannot alter the fact that the Germans can enter into effective occupation of the whole of the Ukraine, as things look now. I have heard it suggested that Germany may have plans for a political constitution for Ukraine which will exploit its historic differences with Russia in the German interest. In any case, if the Russians do not force a severe setback on the German army in the battle that is now going on, the Germans will find little difficulty in settling in the Ukraine and making the most of the vast industrial resources and equipment of this area. None of the foreign observers seems to have the least confidence that Russia will be able to foil Germany in this fourth offensive. A week ago, it was possible to think of Timoshenko's counter-attacks, of Budenny's successive escapes from encirclement, of Odessa's heroic defence and of the brilliant sallies of the garrison in Leningrad. One could see signs that German might was finding itself quite unequal to the task it had taken on itself. And with a little optimism one could envisage an impressive counter-attack by the combined forces of the three commanders. But Hitler's speech and the launching of the fourth offensive seem to have altered the look of things. The gigantic pincer movement is closing in on Marshal Timoshenko. Perhaps in the absence of cabled reports of comments in the British Press, one could continue to entertain the hope that Russian strategy, which had many surprises in the past for its opponents, might have some more in store for them. The pessimistic tone of British comment is becoming more and more pronounced.

Even more significant is the comment in Commander King Hall's news report, published in yesterday's *Statesman*. Commander King-Hall regards as silly all talk of landing an expeditionary force in the West. He recognises "We cannot have a big army, a big navy, a big air force, a big civil defence corps, a big war industry.....". He foresees the fall of the whole of the Ukraine into German hands and the consequent across of strength to Hitler. According to him, the German aims are firstly to destroy the Russian armies and then to get to oil. He argues, therefore, "We must concentrate our forces at a decisive point and that is clearly the Middle East." If the Russians have to retreat to the line of the Volga and if the decisive point is in the Middle East and the squeeze is to come about in 1943, how is the final onslaught on Hitlerism to be made without making more of India than the Government have till now been doing? The News Letter referred to is no doubt a fearless reading of the situation as it is. But one cannot help feeling that in outlining the plan of the counter-offensive, it leaves a big hole in the argument. It is almost like saying that the cat can be belled at this point, and not another!

The missing link in the argument is, to my mind, a proper use of India in the battle for civilisation. Of course, India can be used either as a pawn or as a free agent. The latter alternative has no appeal for the authorities. Only the former is held too rigidly. What help can be procured from a subservient India will, it is thought, suffice. And the changes in the fortunes of the war leave the attitude of the authorities unchanged. But is it not plain for all to see that, if the fall of France called for important changes in the nature and scope of the war effort in India, a reverse for Russia will necessitate a radical change in the whole position of India *vis a vis* the war? And yet two, three days after Hitler launched the terrific fourth offensive on the Eastern Front, Mr. Amery stands up in the House of Commons to say that the Punjab Premier's statement on Mr. Churchill's interpretation of the Atlantic Charter means nothing to him or to his policy. And when Col. Wedgwood asked whether it is not about time that something vital to the war is done with 400 millions of people, no answer was vouchsafed. And before this, there was the dogmatic assertion that the manufacture of internal combustion engines in India is not a practicable propositon. That is, on the day on which von Leeb was pressing hard on Timoshenko, the Secretary of State for India solemnly declares in the House of Commons that, neither politically nor industrially, could India give more help in the war against Hitler. In the face of such reports, it is hard to repress pessimism; and there never was greater need for buoyant optimism.

Central Indian States are understood to have progressed. It has been stated that various concessions have been obtained by the sponsors of the new bank. Subsidies are a likely means of assistance and the management of State treasuries may be entrusted. Participation in the proposed issue of shares and long term deposits are mentioned as appropriate means of helping the new bank. Representatives of the States are likely to find a place on the proposed bank which is known to com-

(Continued from page 651)

were small withdrawals thereafter, but the process of adding to the sterling securities in the issue department was resumed almost from the beginning. Thanks to these transfers of sterling securities from the banking department to the issue department, the holding of such securities on October 3 was Rs. 143.63 crores, comparing with Rs. 140.50 crores on March 21. Actually, sterling securities in the issue department to-day are over Rs. 3 crores higher than on the eve of the sterling payments for the dated redemption scheme. In the banking department, too, sterling balances have been piling up. On March 26, foreign balances were Rs. 78.35 crores. They fell to Rs. 28.73 crores by April 25. Since then, there have been steady additions. The latest figure is Rs. 60.37 crores. Taking the banking and issue departments together, sterling securities are less by only Rs. 15 crores as compared with the total at the end of March.

In addition to three per cent savings bonds, the British Government were raising funds for the war, till recently, from the national defence 2½ per cent 1944-48 bonds and from the national defence 3 per cent 1954-58 bonds. Both were available on tap; and they were discontinued a month ago. Commenting on this at the time, we advanced the view that, in accord with their policy of reducing the interest on defence loans as low as possible, the next instalment in the defence borrowing progamme would be a 2½ per cent medium term loan. As from yesterday, a 2½ per cent 1949-51 issue of National War Bonds at par has been made available on tap. The payment of 2½ per cent for what virtually amounts to a ten year loan is the most triumphant token and symbol of the efficiency and effectiveness of Britain's economic weapons in this war. The lesson which this new issue has for India and the full implications of the increased sterling resources of the Reserve Bank need to be studied in full detail; and we hope to deal with this important question in the next issue.

The exchange market has been steady but rather quiet. Business in dollar bills has been active but export bills in sterling were on the small side. The rates are unchanged; but there is a misgiving in the background that the situation may again a rise when, with respect to purely market transactions, sales of sterling may fall short of purchases of sterling.

TENDER NOTICE

Special Items costing over Rs. 500/- Class I Contract.

Sealed Tenders are invited for the following and will be received in the Controller of Stores' Office, 105, Clive Street, Calcutta up to 12 O'clock noon on the 31st October 1941.

Tender No. S/SP/653 & 703/FI/539/B for the supply of Latrine Pans.

Tender forms with full particulars can be had from the Office of the Controller of Stores, E.I.Railway, Calcutta on payment of Rs. 2/- per copy, and Drawing may be purchased from the Office of the Chief Engineer,Calcutta @ Re. 1/-per copy. These amounts should be deposited with the Treasurer, E. I. Railway, Calcutta and on production of his receipt Tended forms and Drawings may be had from the respective offices.

Firms outside Calcutta may, however, remit the amount to the Controller of Stores, direct by money order. No refund is permissible after payment.

(From Our Correspondent)

Bombay, October 8.

THE commendable firmness displayed by the piecegoods market is admittedly different from the easiness shown by the cotton market in the first week or so. The fall in cotton may be contrasted at times with the steadiness shown by U. S. markets and the sudden change in sentiment is not to be attributed to the backwash of the monsoon. Cotton mills which should ordinarily give good support are not eager to buy cotton and the selling of speculators has put a different complexion on the cotton outlook. The reaction may be expected. The piecegoods market keeps its end up because seasonal demand has appeared in time. Japanese goods are not high in relation to Indian goods but demand for the latter has broadened. The dearth of British goods is responsible for very slow movement and prices are more than ever firm. The fall in cotton prices has not led to any change in the prices of mill goods. Clearances of late have been fairly brisk. There is a certain amount of export trade and war orders are there to keep mills busy. Standard lines are likely to be quoted at higher prices particularly bleached goods. Good demand for dhoties has been noted and prints have been cleared easily enough. The fluctuations in Japanese goods have led to a tapering off in demand and in this case the fall in cotton has made buyers look askance at current rates.

The National Democratic Union in other Provinces may be hibernating but in Bombay this lost cause is attracting unusual attention. Politicians of the retired rather than the retiring type will come to Bombay for the forthcoming Presidency Conference. The Standing Committee will also hold a meeting at the same time and the non-party men, as distinguished from the non-party leaders who have a separate show, will say their set pieces over again. The meeting will be presided over by Sir Homi Mehta who is now rightly prominent as the Chairman of the War Gifts Fund, having succeeded Sir H.P. Mody in that office. Mr. M.N. Roy will provide all the ginger that is wanted by the neo-democrats and the Union will try to cash in on the alliance of Britain with Russia. A slight amount of reclaim will not do the Union harm and it is a pity the N. D. C. has taken place before the Union held its conference, presumably, to give suggestions for the intensification of India's war effort. The Labour men have also stolen part of its thunder by putting out a new manifest.

A former Minister Mr. L. M. Patel was available to preside over the proceedings of the Conference of local boards which concluded its session on Sunday. A large number of resolutions were adopted and many ran true to type. One asked for adequate financial assistance for the introduction of free and compulsory education either by liberal grants-in-aid or authorising the levy of a compulsory cess. Demands for education in citizenship, for conciliation of differences among communities and parties were somewhat unusual. The Conference expressed disappointment concerning the failure of Government to give effect to the proposals of the Kale Committee and protested also against such measures as would make local boards unpopular through the levy of additional taxation. Reform, reorganisation and the grant of greater responsibility were asked for in other resolutions which asked for greater power or local Boards to do good. The Local Self-government Institute as an advisory body should be consulted when Government proposed to act against any local authority—that was the suggestion made in another resolution.

The absence of proper representatives for India on the Middle East War Council seems surprising to political circles in Bombay. Though it has been said that the Council is Capt. Lyttelton's creation and is concerned with non-military purposes, the perpetual assumption that India has vast and vague responsibilities in connection with the Middle East does imply that means should have been found to give the C-in-C in India a say in the arrangements described last week in London. The addition of two diplomats and the High Commissioner in Palestine makes the Council quasi-diplomatic, but it is surprising that no place has been found as yet for General Catroux. The fact that supply is one of its major concerns will explain its connection with the Eastern Group Council in New Delhi but many would have liked the Viceroy to have a say in the disposition of territories won for Britain by Indian forces. The new Council has apparently been set up because Egypt and the Canal have been secured by Indian troops, and if its object is to dissociate India from concerning herself with such subjects as the future of Palestine, Muslim leaders in India will have an answer. It is desired to keep Iran out of the Middle East because Russia is mixed up with Britain there and to restrict the Soviet Union's interests while stimulating Russian residence to Germany in the West.

Much interest has been roused by the report that arrangements are taking shape for the flotation of a bank to safeguard and develop Indian States. It is said that banks with an authorised capital of Rs. 2 crores will be started soon with the object of financing the economic development of the States. The promoters have been promised the co-operation of several princes in Western India and Central India where banking facilities are known to be poor. It is known that the Maharaja of Dewas (Junior) has evinced great interest in the setting up of a bank that will serve and further the interests of small States in India. If the bank is set up, it will present another aspect of the pooling of sovereignty that has been officially recommended in recent years. Their mineral and material resources are not negligible and it is certainly correct to say that while major States have special ties with existing banks, the minor principalities have been altogether neglected. States in the Eastern Agency are known to be interested in the proposal and negotiations for linking the Eastern Group States with

Tit-Bits of Industrial Activity

Leather Industry in the U.P.

The leather industry in the United Provinces is the subject of one of the new bulletins issued by the Industries Department. The Government has taken steps to ensure the primacy of the U. P. by helping development in the four branches of the trade, the flaying of hides and skins, preservation and curing, manufacture of leather and the manufacture of leather goods. The U. P. has a substantial export trade in leather and leather goods, and India's share of world leather production amounting to something between 25 and 33 per cent. and its value was over Rs. 10 crores. Tanning methods are being improved also by the provision of special classes. Cawnpore provides training for the men needed to staff the industry. The industry has benefited greatly from the war. Up to June, 1941, the value of orders for Army needs given by the Supply Department totalled Rs. 190 lakhs, and the Controller of Supplies U. P. stated in his report to the War Committee that in regard to Army boots, a most important part of the soldiers equipment, the U. P. can claim to possess without fear of contradiction the largest producing unit in the British Empire.

Power Alcohol in use

In view of the appeals from various organisations asking for special encouragement to power alcohol, the report of Dr. N. G. Chatterjee of the H. B. Institute submitted to the U. P. Government will doubtless provide new arguments for the advocates of power alcohol. According to the latest issue of *Travancore Information* the U. P. official studied the running of vehicles belonging to the State Transport Department and reached the conclusion that except for a slight increase in consumption, the power alcohol used on a bus was equal to petrol. The petrol —alcohol mixture adopted for use on vehicles not run either on Diesel Oil or charcoal gas yielded extremely favourable results. There was no difference in running and driving was perfectly smooth. The officer has stated that the Travancore Department has demonstrated the following points regarding the use of rectified (specially denatured) spirit as a motor fuel. Rectified spirit as such and without admixture with any large proportion of petrol can be used with success as a motor fuel. The only change that need be made is to adopt the largest size of jet, the smallest metering rod, adjust the floating level almost to the point of flooding and to advance the ignition by about fifteen degrees. The fuel consumption is found to increase by 40 per cent. When mixed with petrol in the proportion of one to four, the mileage obtained from the mixed fuel may be about 10 per cent. less than that obtained from petrol. The condition of the engine was unaffected by the mixture of fuel and it has been stated that the State Department which uses four lakhs gallons of petrol has since the mixing of one part of spirit to four parts of petrol came into vogue, found a use for all the available surplus spirit. Only one kind of mixed fuel is being used, and Dr. Chatterjee has said that on a trip from Trivandrum to Nagercoil, he could not detect any difference in the behaviour of the engine.

Rescue Stations

A new committee came into being in 1939, with the amendments to Mines Act and various notifications amending the regulations. That was the Rescue Stations whose first report dealing with the eleven months ended March, 1940 shows that humanity and efficiency go together. A small excise duty is levied for the support of the rescue stations in the Raniganj and Jharia fields, and collections at the rate of 1½ pies per ton on coal and coke as from May 1, 1939, brought the Committee Rs. 80,249-4-9 in its first year. The two stations are being erected with more than usual care in regard to site and lay-out. Each station has a rescue van and has a lamp room for charging electric safety lamps and storing a hundred flame safety lamps. Rescue apparatus including gas masks is kept ready and the men to be trained in rescue work are considered in the lecture room, the bath and dressing room as also the training gallery already provided in each station. The equipment for both the stations has been obtained locally and through orders placed in Calcutta.

A Resume of Commodity Markets

DURING the latter half of this week commodity markets have been overshadowed by the developments in the war situation. The fresh German successes and the reports from Moscow that the position is rather grave have had a depressing effect and a sharp decline in prices has been recorded all round. The fall in prices in the raw cotton market especially is pronounced.

The important development during the week is the decision by the Committee of the Indian Jute Mills Association that working hours should be increased to 54 hours per week from 50 per week as from Monday next. This decision had a stimulating effect on the jute futures market while it had a discouraging effect on the jute manufactures market. The gains in the jute futures market, however, have been lost.

The wheat market has not been in any way affected by the reduction in the import duty to two annas from Rs. 1/8 per cwt formerly. The higher parity prices for Australian wheat and the difficulties in transportation still make it difficult for any large imports of Australian wheat to be landed in this country. Meanwhile, there is good export buying and the steadiness of the market is bound to be in evidence so long as the export demand persists.

There is much concern regarding the decision of the Burma Government to control exports of rice. Nearly 50 per cent of the rice trade of Burma is controlled by Indian merchants and it is feared that the present move is calculated to eliminate Indian interests from the trade. A meeting of prominent business interests in the trade was convened recently and it was decided that adequate representation to the Government of Burma should be made.

Jute;

There was little activity in the raw jute market on account of the holidays and sellers were anxious to do business. The decision to increase production, therefore, had an encouraging influence. This would mean additional consumption of 50,000 bales per month. At present it is proposed that mills should work 54 hours per week to the end of the year.

Speaking at the meeting of the members of the I.J.M.A. this week, the Chairman referred to the raw material position and said that as far as it was possible to forecast, stocks and visible supplies of jute should be ample to meet all likely remands for the current year still leaving reasonable stocks at the end of June next year. So far as the Government's restriction policy for 1942-43 was concerned he emphasised the desirability of ensuring that ample supplies should be available in the next season.

Jute Manufactures:

The jute manufactures was very active in the earlier days of the period. With a large increase in shipments and with a scarcity of ready goods, bulls had the upper hand. Only the decision to increase working hours has checked the rise in prices and there has been an appreciable decline in the last two days.

Hessian stocks at the end of September show a marked decline and at the lower level represent only about 1¼ months consumption.

Defending the policy of the Committe of the I.J.M.A., the Chairman said that the August figures gave them no valid reason for recommending a change. "But when the figures for September became available to me, I thought it advisable in the best interests of the Industry to expedite the usual routine meeting of the Committee in order that any change in the working hours which they might consider necessary, should be announced at the same time as the stock figures were published.

"I think most of you are aware that the Committee view with some concern the recent unwarranted rise in prices of hessians for near deliveries—these high prices are dangerous and it has all long been your Committee's policy so to adjust supply to demand that as far as possible prices should be maintained at a reasonable level. I sincerely trust that the action I hope we shall take to-day will have such an effect. If it is the intention of the Committee that these working hours should obtain at least until the end of the current year, in fact it would hardly be possible otherwise since one month's notice is required for any decrease. I can assure you, however, that the position will continue to be watched very closely and any change upward or downward, which the situation may warrant, will have the careful consideration of the Committee."

On this occasion, however, it has been proved that the bazar has been correct. If only there had been an increase in working hours to 54 per week from the beginning of September much of the artificial rise in prices could have been prevented.

BENGAL NAGPUR AND EAST INDIAN RAILWAY

IMPORTANT NOTICE REGARDING INCREASED CHARGES ON COAL TRAFFIC

It is notified for general information that the period during which the increased charges are to be levied at the rate of 20% of total freight charges will be from 1st December 1941 to 30th April 1942 and not from 1st November 1941 to 31st March 1942 as Previously notified. The rate of 15% will apply up to 30th November 1941 and again from 1st May 1942.

Tender No. 2/42-43

Sealed tenders are invited and will be opend at 3 p.m. (Bengal time) on the 7th November 1941 for the supply of the following quantities of miscellaneous timbers. Full particulars may be obtained from the undersigned on payment first of Rs. 5/- (Rupees five) being the cost of tender documents, to the Chief Auditor, B. N. Railway House, Kidderpore, whose receipt for the amount must be produced before such documents can be issued. This sum will not be refunded.

1. 800 tons C. P. Teak squares measuring 14' & up × 10" × 10" & up with an average cubical content of not less than 15 cft. for each parcel offered for inspection with the following specification:—

"The C. P. Teak squares (Tectona Grandis) should be straight and out of winding with faces squares to one another with not more than 25% sapwood and wane across the width for any face free from rot, serious heart shakes and cracks, split ends, large knots and other defects. It should be ready for immediate conversion into scantlings."

2. Delivery and rates—Rates must be quoted per ton of 50 cft. f.o.r. loading stations.

Supply may be made as follows:

266 tons during December 1941.
266 tons during January 1942.
268 tons during February 1942.

800 tons.

3. 1000 tons Indigenous timber squares measuring 12' & up × 14" ×14" & up with an average cubical content of not less than 27 cubic feet for each parcel offered for inspection and may be of the following species.

Gurjan
Tavoy
Hollong.

"They should be good colour, mill sawn, free from knots, shakes and other defects."

4. Delivery and rate:—Rates must be quoted per ton of 50 cft. f.o.r. loading stations. Supplies must commence from December 1941 at the rate of 100 tons monthly.

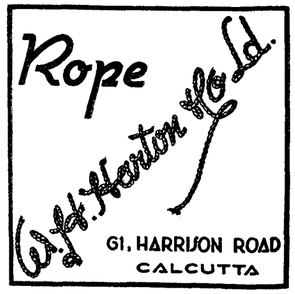
Kidderpore, Calcutta,
Dated 6-10-1941.

Jute and Jute Manufactures

Calcutta, 9th October.



As was forecast in these columns last week, the Jute Mills Committee have been forced by the stock position to increase working hours to 54 per week which is the limit permissible under the Factories Act for single shift working. As things have turned out, it is a pity that they did not listen to strong recommendations at the end of August, when the 50 hour working was decided on, not to make two bites of the cherry, but to go the whole hog to 54 hours. We might then have been spared the scandalous ramp which has since taken place in the ready Hessian market, and which has reflected little credit on the Industry at large. The Mills Committee profess to have a policy though it is difficult for the outsider to see what it is, unless a policy of systematically shutting the door after the horse is gone. A reduction of 5 crores in the Hessian stocks, bringing them down to 1577 lakhs, coupled with a reduction of 8 oz/40 stocks to 54 lakhs, does not make for comfort or stability, particularly with shipping prospects for October fairly promising and a probable shortage in production due to the Ramzan during this month.

The reduction in Heavy Goods is only 20 lakhs, and with demand for these running light at the moment it has been suggested that stocks of these may become topheavy. But if one looks to the future it must be obvious that a reserve of stocks of Gunny bags is most desirable. After the war there is bound to be a tremendous demand for containers for distribution of foodstuffs and other commodities to the devasted and starving countries of Europe. Where are these containers to come from if not from Calcutta? Already stocks of foodstuffs are being built up in England and America for prompt distribution at the end of the War. Facilities for bulk handling anywhere on the Atlantic seaboard of Europe must have been pretty well smashed up in bombing raids. And in any case containers for interior distribution will be essential. We would suggest that the Mills Association should get in touch with the appropriate authorities so that a suitable policy for the accumulation of the necessary reserve of bags should be formulated without delay. For the requisite reserve could not be built up in a matter of a few months. It is a question which calls for a long view. And at the same time it would resolve the problem of any embarrassing accumulation of Heavy Goods.

The decision to abolish, as a temporary experimental measure, all private or amicable settlements under Mill Jute contracts, was brought into force this week and seems to have upset Sellers to some extent. It does not appear to be fully realised that this measure does not constitute any real change in the terms of the contract, but merely a strict enforcement of the terms as they already exist. The only new points are options granted to Buyers in the event of Awards allowing 50% or more of the market difference between grades or a moisture content in excess of 3% over that permissible. The Buyer will now in such instances have the option of accepting the tender with the allowance awarded, or of rejecting and cancelling or of claiming a fresh tender. Sellers seem to feel that they will be put at a disadvantage in not being allowed, for instance, to settle minor moisture claims privately. On the other hand, the measure is likely to eliminate anything in the way of frivolous claims which have very often been preferred in the past, presumably on the principle that there is no harm in trying. Also, if the scheme has the effect of causing Sellers to be more careful in purchasing or shipping wet jute, it will be very salutary.

It is believed that the Bengal Government a few days ago discussed the question of the regulation of next years Jute crop, but with what result is not yet known. At a meeting of various interests in the trade towards the end of September, a note prepared by the Special Officer, Jute, was discussed, but the views expressed varied so widely as to be scarcely helpful. The Jute Mills considered it prudent to license not less than 75% of the recorded area. Other interests favoured 66% while those supposed to represent the cultivators wanted restriction maintained at 33%. As we have pointed out above, a strong demand is to be expected for jute goods as soon as hostilities cease and it would be catastrophic for the industry if it were caught short of raw material. The Chairman of the Mills Association pointed out at a recent meeting that there was ample jute in sight at present for all immediate requirements, though the present price level would almost indicate famine conditions. If we are to have prices like the present when there is plenty of jute in sight, where would they soar to if there were a real shortage? And it should never be lost sight of that price is an important factor if jute is to retain its popularity as a container for the world's goods. A safe margin of reserve stock of raw material is therefore of paramount importance to the trade if it is to be prepared for all contingencies. And it should not be beyond the statesmanship of the different sections to arrive at a **modus vivendi** whereby prices could be maintained at a level to ensure the cultivator a proper return for his labour.

The Export Jute market has been somewhat shaken by the news that in future all jute purchases for the U. K. will be made by the Jute Controller, who will become the sole importer, to ensure equitable distribution of raw material to spinners. Dundee is not surprised at the step, but it will cramp the style of shippers here, as purchases will almost inevitably be concentrated in the hands of a representative of the Jute Controller. The reaction has been distinctly bearish, Futures having dropped some Rs. 5 since the news was made known. Not a great deal has been reported for shipment other than private marks.

JUTE

Calcutta, October 9.

The jute market has been rather inactive during the fortnight under review. The absence of any buying earlier in the period was responsible for the narrow movement in prices. Sellers were anxious to do business in the absence of mills buying. Imports were also arriving in larger quantities in mofussil centres. On the announcement of an increase in mill working hours to 54 per week, from 50 per week, a firmer feeling was noticeable and the quotation in the futures market was marked higher at Rs. 77-12. But with the deterioration in the war situation, and the weakness of the jute manufactures market, there has been a drop in the quotation to Rs. 72-6 to-day.

In the loose jute section, mills were buying only in small quantities earlier in the period under review. Prior to the announcement about the increase in working hours, there was increased buying and prices showed a slight improvement. Indian Jat Tops, Middles and Bottoms were Rs. 16-12, Rs. 14-12, and Rs. 11-12 per maund respectively. Business was reported in the supervised marks at eight annas over these rates.

In the pucca bales section, shippers have not been inactive. Balers are reported to have done business with mills in Firsts 2-3 at Rs. 2 per bale about ruling futures rates. Some business was done in old crop Firsts 2-3 at Rs. 5-4 per bale below futures rates.

In the futures market quotations were fluctuating in narrow limits in the absence of any speculative activity. The improvement in the quotation to Rs. 77-12, on the announcement regarding the increase in working hours has not been maintained. The quotations are at the lowest levels for the week at Rs. 72-6.

JUTE MANUFACTURES

Calcutta, October 9.

Prior to the decision of the Committee of the Indian Jute Mills Association to increase the number of working hours to 54 per week from 50 per week, rather active conditions were noticeable in the hessian market. With the large increase in shipments and the reserve of sellers there was considerable business for near covering. 9 porters ready were at one time as high as Rs. 26-8, and 11 porters ready Rs. 30-4. There was a shortage of ready goods. Only the free selling by mills and the increase in working hours have resulted in an appreciable decline in values. 9 porters ready are Rs. 24-6, November Rs. 22-4, December Rs. 21 and January/March Rs. 19-8. 11 porters ready are Rs. 27-12, November Rs. 26-8, December Rs. 25-4, and January/March Rs. 23-4.

The increase in the number of working hours to 54 per week is to come into effect from next Monday and will be in force till the end of the year.

In the heavy goods section there has been little activity and quotations are sharply lower towards the close. B. Twills for October shipment were Rs. 40-4, Heavy Cees Rs. 39-4, Liverpool Twills Rs. 48, A Twills Rs. 52-8 and Cornsacks Rs. 42.

The local stock figures for September are very encouraging. There is a sharp decline in hessian stocks for ordinary consumption to 15.77 crores yards from 20.73 crores yards at the end of August. Stocks of sandbags on Government account were 9.5 crore yards against 8.10 crores yards. Sacking cloth and bags show no appreciable change at 17.19 crores yards. Out of the total September hessian stocks, 54.15 lakhs yards weighing 1,225 tons represent 40" × 80 oz. cloth. The corresponding figures for August were 1.01 crores yards weighing 2.255 tons.

COTTON

Calcutta, October 9.

The deterioration in the war situation, and the favourable reports regarding weather conditions together with the absence of any export buying, have been mainly responsible for the decline in cotton prices in the Bombay market. It is being increasingly realised that with the unfavourable stock position, the favourable crop prospects and the poor export outlook, it will not be possible to dispose of the surplus stocks of cotton. It is expected that shipments to the United Kingdom will improve but whether the increase will be of any appreciable dimensions remains to be seen. Broach April/May are quoting Rs. 219, Oomrah December/January Rs. 170-8, March Rs. 165-8, Bengal December-January Rs. 137 and March Rs. 137-12.

The earlier firmness of the New York market has not been maintained. The earlier recovery was due to the unfavourable crop reports and replactment buying from New Orleans. Towards the close there has been considerable hedge-selling. October were 16.99 cents, December 17.16 cents and March 17.37 cents.

PIECEGOODS

Calcutta, October 9.

Owing to the Puja holidays, the piecegoods market has been inactive. Not much of business has been passing. Replacement costs are so high that buyers are not inclined to commit themselves. Neither are mills anxious to do fresh business as they are already sold as far ahead as June 1942. Business in the Lancashire and Japanese goods section has been confined mainly to ready lots. Bombay and Ahmedabad mills report some business in the popular styles.

In spite of the weakness of the raw cotton market, the yarn market has been rather firm. Replacement business has not been quite satisfactory. Spinners also are not prepared to sell freely as they have already large orders on hand.

GOLD

Calcutta, October 9.

The Bombay gold market is absolutely uninteresting and quotations are more or less unchanged. Gold Ready is quoting at a premium of six pies over first settlement. Second settlement is quoting at the same level as Ready. Gold Ready are Rs. 42-3, First Settlement Rs. 42-2-6 and Second Settlement Rs. 42-3.

SILVER

Calcutta, October 9.

After earlier easiness the Bombay silver market is firmer on good buying for spot. That is the reason why after a considerable time the quotation for Ready is at a premium over First and Second settlements, the quotation being Rs. 63, Rs. 62-15, and Rs. 62-15 for Ready, First and Second Settlements respectively.

The London market has been uninteresting. Small trade buying has been satisfied by official selling at fixed rates. The quotation for spot is 23½d. and forward 23 7/16d.

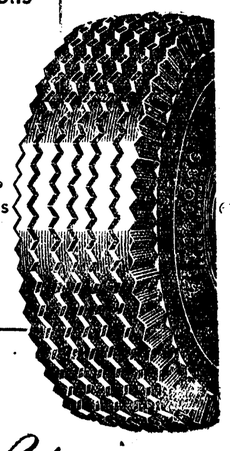
Improvements in tyres, as in cars, are developed from race-track records. For 22 years, since 1919, the most gruelling of all motor races—the 500-mile classic at Indianapolis, U.S.A., has been won on Firestone Tyres. The experience of America's leading racing drivers, whose lives depend year by year on their tyres, has enabled Firestone to build safer tyres for them—and for you.

The 500-Mile *All-Out* Race at Indianapolis



Increased Tyre-safety year by year brings increased speeds.

Your car travels at higher speeds in greater safety today because race-drivers at Indianapolis have proved the value of:—

4-wheel brakes . . . driving mirrors . . . safety-glass . . . streamlining . . . light-weight pistons . . . and

FIRESTONE "*DE LUXE CHAMPION*" TYRES *with the "gear-grip" tread — 3456 sharp angles to prevent skidding and make braking positive; and with Gum-Dipped, Safety-lock cord to prevent blowouts and reduce wear.*

Stock Markets to-day and to-morrow

INCREASE IN JUTE MILL WORKING HOURS

TILL Tuesday this week the Bombay Stock Exchange was rather firm and share prices generally were well maintained. During the past two days, however, a weaker tendency has been noticeable and a substantial decline in prices has been recorded. Operators are naturally concerned ever the latest development in the war situation. There has been some bull liquidation. The Bombay market is closed to-day on account of settlement.

The reopening on the Calcutta Stock Exchange on Thursday after the long spell of holidays was under none too auspicious circumstances. With a smaller volume of business the market did not disclose any decisive trend. In to-day's session, however, a definitely weaker tendency has been noticeable and *Indian Iron* and *Steel Corporation* have been pushed down to Rs. 22/9 and Rs. 19/11 respectively. Various rumours are being circulated. There is anxiety regarding Japanese entry into war. The defence exercises in Northern India, and North-Western India like the news of fresh German successes have given rise to rumours regarding the possibility of fresh heavy taxation. Even the proposed amendments to the Income Tax and Excess Profits Tax Acts have been viewed with anxiety for any stiffening of the provision of the revenue acts will mean a heavier draft on earnings.

Thus with the confused war situation and fears regarding fresh taxation it cannot be expected that there will be any increase in activity in the immediate future.

* * *

On rumours that there will be no increase in the dividend of *Burn & Company, Limited* for the year ended April, 1941 there has been a drop in the quotation to Rs. 410. The accounts are due to be published shortly and pending the receipt of the accounts nothing can be said definitely. It may very well be that there has been a substantial increase in earnings and the directors have been conservative in making any increase in the ordinary dividend. Even on the basis of the last dividend the yield is over 7.25 per cent tax free.

* * *

An important development of the week is the decision by the Committee of the Indian Jute Mills Association to increase the number of mills' working hours from 50 per week to 54 per week as from Monday next week. The increased working hours are to be in force till the end of the year.

This increase in working hours from 50 hours to 54 hours per week within a short time fully signifies the improvement that has taken place in the freight situation. There has been a speculative rise in prices in the hessian market for sometime and owing to the scarcity of ready goods sellers were inclined to show reserve. The increase in working hours has not, therefore, come as a surprise to the market. Thus the jute industry has got back into its stride. Prices for jute manufactures are now quoting at very high levels while jute is relatively cheaper. With a larger amount of production on longer working week and a greater margin of profit, jute mills can, therefore, report a very high level of earnings. Jute shares have obviously some scope for appreciation.

* * *

Having regard to the existing conditions in the jute industry, the earnings of the *Naskarpara Jute Mills Company, Limited* for the half year ended April, 1941 should be considered rather satisfactory. The net profit before providing for taxation for the six months is Rs. 2,05,391 against Rs. 3,13,486 for the previous half-year. The sum set aside to depreciation is Rs. 56,581 (Rs. 58,622) while the provision for taxation is Rs. 60,000 (Rs. 1,75,000). The dividend has been maintained at twelve annas per share. Around Rs. 20/8 cum dividend the return on the share is fairly substantial at 7.5 per cent taxfree.

* * *

The *Sendra Coal Company, Limited* has been able to report a substantial improvement in earnings for the half-year ended June 1941. The net profit before providing for taxation and depreciation is Rs. 83,191 against Rs. 42,051. The increase in earnings has been mainly due to the reduction in working expenses. It has, however, been not possible to increase the dividend. The provision for depreciation is Rs. 7,249 against Rs. 6,749. The provision for taxation is Rs. 46,500 (Rs. 7,000). The dividend has been maintained at 3¾ per cent.

The incidence of the Excess Profits Tax is rather heavy owing to the low level of profits for the standard period in the case of the company. A claim for the revision of the company's standard profit has been made.

Higher provision for taxation has again prevented an increase in the dividend of the *Standard Coal Company, Limited* for the same half-year. The net profit before providing for depreciation and taxation is Rs. 82,914 (Rs. 72,930) while the amount set aside for depreciation is Rs. 28,127 (Rs. 25,687). The allocation to Reserve for Taxation is Rs. 20,000 (Rs. 10,000). The dividend has been maintained at 5 per cent.

* * *

It is understood that the *Publicity Society of India, Limited* has made very good progress during the year ended July 1941. The recent improvement in the quotation for the share to Rs. 11 from Rs. 7/12 was in anticipation of a higher dividend. It is now reported that the dividend for 1940 41 can be as much as Rs. 1/4 per share. The prospects for the current year are described as being better. The yield even on the basis of the dividend for 1939-40 is over 6 percent taxfree.

* * *

"Indian Finance" Daily Index of Stocks and Shares, published every week in the "Investor's Supplement," reveals that there has been a rise in the All-shares Index since September 8, 1941 and that the highest level was touched on September 17, 1941 at 130.14. On the fall of Kiev and the rapid march of the Germans towards Crimea there was a decline to 128.82. The lost ground was completely recovered by October 7, 1941 and the All-share Index stood at 129.92. It is, therefore, clear that the recent rise in prices is well-founded and that markets are not quite vulnerable to adverse political news. There has been a reaction during the last two days on unfavourable war news but it can be expected that if there is no further deterioration in the situation prices will be held at least at the lower levels.

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, October 10.

THE Calcutta Stock Exchange re-opened for business yesterday morning after the long Puja holidays. But for the sudden worsening in the war situation in the Eastern Front it was generally expected that the re-opening would be in a rather cheerful manner and there would be a large accumulation of orders. It was however, been not the case and operators were inclined to be rather reserved throughout yesterday's session. Business passing was on a small scale. The tone this morning in the several sections is further easier and Indian Irons and Steel Corporations have been marked lower at Rs. 32-13 and Rs. 19-14 respectively. Markets will close earlier to-day on account of the death of Mr. Jhunjhunwala.

Very little business has been passing in the giltedged securities section but the undertone is firm and quotations are unchanged. 3½ per cent. Paper is quoting Rs. 96 and 3 per cent. Paper Rs. 82-11. Among terminable loans, 3 per cent. Defence Bonds were Rs. 102, 3 per cent. 1963-65 Rs. 95-2, 3½ per cent. 1947-50 Rs. 103-5, 4 per cent. 1943 Rs. 103-14, 4 per cent. 1960-70 Rs. 110-8 and 4½ per cent. 1955-60 Rs. 114-9. 5 per cent. 1945-55 were Rs. 111-5. Easy money conditions continue to prevail and there has been a slight decline in the treasury bills rate in spite of the offer of treasury bills by provincial governments.

There has been no business in public bodies or industrial debentures but first class preference shares have been in good request. *Adamjee* were done at Rs. 162-8, *Howrah* 'A' preferences Rs. 173. *Kamarhatty* Rs. 156-8. *Hukumchand* Rs. 154-8 and *Waverley* Rs. 72. *Dunlop Rubber* First preferences were Rs. 157, *Dalmia Cement* Rs. 137, *Steel Corporation* Rs. 124 and *Titaghur Paper* Second Preferences Rs. 118.

Cotton shares have been well held with *Cawnpore Textiles* at Rs. 9-11, *Bowreah* at Rs. 352, *Dunbar* at Rs. 252-8, *Elgin Mills* at Rs. 27-8 and *Kesoram* at Rs. 8-11.

Coal shares have been uninteresting with *Amalgamated* at Rs. 27-4, *Bengal* at Rs. 384, *Pench Valley* at Rs. 34-12, *Roneegunge* at Rs. 31-8 and *Union* at Rs. 32-14.

Jute shares have been fully steady in spite of the weakness of the jute and jute manufactures markets. *Howrah* changed hands at Rs. 57-4. *Alliance* were Rs. 346, *Anglo-India* Rs. 383, *Bengal Jute* Rs. 18-14, *Clive* Rs. 28-14, *Fort Gloster* Rs. 570, *Hukumchand* Rs. 13-10, *Kamarhatty* Rs. 522, *Naskarpara* Rs. 20-8, *Rameshwara* Rs. 9-14 and *Soorah* Rs. 12-8. The accounts of the Naskarpara Jute Mills Company Limited for the half-year ended April, 1941 have been published and they make satisfactory showing. The dividend has been maintained at twelve annas per share.

In the Engineering section, Indian Irons and Steel Corporations were slightly easier around Rs. 33-2 and Rs. 20-2 throughout the whole of yesterday's session. There has been a decline to Rs. 32-12 and Rs. 19-14 respectively this morning. *Burn & Co.* were Rs. 410. *Jessop & Company* continue to be in good demand with the quotation higher at Rs. 20-8. There has been also good buying of *Braithwaite & Co.* around Rs. 9-12. *Bhartia Steel* were Rs. 17-14, *Indian Galvanizing* Rs. 31-8, *National Iron and Steel* Rs. 9-8 and *Saran Engineering* Rs. 7.

Sugar shares have been steady with *Buland* and *Raza* at Rs. 22-4. *Champarun* were dealt in at Rs. 17-6 and *Cawnpore* at Rs. 24-9.

Tea shares have been in good request with *Bishnauth* at Rs. 28-4, *Hantapara* at Rs. 405, *Hasimara* at Rs. 48-4, *Patrakola* at Rs. 955 and *Teloijan* Rs. 8-8.

In the miscellaneous section, *Burma Corporation* and *Indian Copper Corporation* were Rs. 4-10 and Rs. 2-4 respectively. *B.I. Corporation* were Rs. 4-12, *Bararee Coke* were higher at Rs. 28-8, *Calcutta Safe Deposit* at Rs. 7-15, *Calcutta Trams* at Rs. 17-8, *Indian Cables* at Rs. 27-12 and *Indian Rubber Manufacturers* at Rs. 29-9. *India Paper Pulp* were Rs. 160, *Titaghur Paper* Rs. 22-8, *Orient Paper* Rs. 16-6 and *Star Paper* Rs. 14. *Midnapore Zemindary* were Rs. 72-8 and *Borooah Timber* Rs. 19-6.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, October 9.

Money: The rate for call money is quoted at ¼ per cent (lenders).

Securities: Giltedged securities continued to be steady throughout the week under review with price movements negligible. 3½ per cent Paper was steady at Rs. 96. 1948-52 Loan changed hands as Rs. 97-14; 1951-54 at Rs. 99-13; 1963-65 at Rs. 95; 1947-50 at Rs. 103-4; 1960-70 at Rs. 110-8; 1955-60 at Rs. 114-10; 1945-55 at Rs. 111-4 and 3 per cent 1946 *Defence Bonds* at Rs. 102.

Shares: The local share market, after opening steady on Monday, met with a slight setback in prices on Tuesday following the reports of unfavourable developments in the war situation. The weakness in cotton and other commodities also damped the enthusiasm of operators and prices declined slightly all round. At lower levels, there was some support from speculators with the result that prices showed some improvement on Wednesday. This improvement has, however, been short-lived, and towards the close to-day prices have again declined on reports that the Germans were claiming big successes and that quite large Russian forces might become encircled.

Textiles: Cotton mill shares, after opening higher, developed a sagging tendency due to the weak foreign advices and the weak local commodity markets. *Bombay Dyeing*, after opening at Rs. 1,342-8, gradually declined to close at Rs. 1,303-12, showing a drop of about 10 points over the previous week. *Central India* were done lower at Rs. 408½; *Century* at Rs. 453; *Colaba* at Rs. 213½; *Gokak* at Rs. 255; *Kohinoor* at Rs. 528½; *New Great* at Rs. 338 and *Svadeshi* at Rs. 414. In the cash list, *Sholapoor* were, higher at Rs. 5,150, while *Vishu* were slightly marked down at Rs. 1,490.

Hydro-electrics: The shares in this section met with good enquiry following the news that the companies were doing exceedingly well owing to the good demand for energy from the mills. *Tata Power* closed slightly higher at Rs. 1,825, while *Andhra Valley* were unchanged at Rs.1,800. Tata Hydro, after touching Rs. 197-8, closed easier at Rs. 193 on profit-taking.

Steels: Steel shares were in good request during the major portion of the week under review. The widening of the difference between the rates for forward settlement and cash settlement suggests that a larger number of bargains in these shares is for forward delivery. The ordinaries have moved up to Rs. 409-8 and the deferreds up to Rs. 2,155. Towards the close today, however, prices have been marked down following the reports that the Russian position on the Eastern Front is worsening. The ordinaries finally closed at Rs. 404-8 and the deferreds at Rs. 2,130.

Banks: Bank shares met with good investment demand, *Bank of India* being done at Rs. 148; *Central Bank* at Rs. 50-2; *Imperial Bank* fully paids at Rs.1,610; contributories at Rs. 397-8 and *Reserve Bank* at Rs. 108-12.

Miscellaneous: *Bombay Burmah Trading*, after opening at Rs. 538-12, touched a high of Rs. 550 in mid-week, but closed again lower at Rs. 535 on selling pressure. *Associated Cement*, after being done higher at Rs. 163 on reports of a higher dividend, closed easier at Rs. 159 owing to prompt profit-taking. *Belapur Sugar* were more or less unchanged at Rs. 252. *Shivrajpur Syndicate* closed slightly lower at Rs. 48-8 and *Premier Construction* at Rs. 127-8, the highest levels touched for the week being Rs. 50 and Rs. 132 respectively. *Scindia Steam* were done at Rs. 26-14; *Tata Oil* at Rs. 62 and *Tata Chemicals* at Rs. 15-2. *Wimco* were a shade better at Rs. 217-8.

MADRAS STOCK EXCHANGE

(*From Our Correspondent*)

Madras Oct. 9.

The local market exhibited an active tendency during the week with good enquiry in all the sections. Planting issues were the principal feature, while Mill shares received good support.

Securities: There is little or nothing to report in this section, 3½ per cent Paper quoting at Rs. 96-0-3. 3 per cent 1951-54 came in for business at Rs. 99-13-6. State Loans met with good enquiry, 4 per cent *Mysore Loan* being done at Rs. 115-9 and the 3½ per cent *Cochin Loan* at Rs. 105. Business in Provincial Loans was not possible owing to the lack of sellers.

Mills:—*Buckingham & Carnatic* continued to be a popular counter at Rs. 279 as well as *Cambodia* at Rs. 10-10. *Madura* were on offer at Rs. 43-8 without attracting buyers. *Coimbatore Spinning* were in demand at Rs. 83 c.d. following the announcement of a dividend of 12 per cent for the year 1940. Among Bombay shares, *Kohinoor* changed hands locally at Rs. 541 (Nov.) and *Simplex* at Rs. 160-4 (Nov.)

Utilities: *South Madras Electric* ordinaries met with good support at Rs. 14-12. *Cochin State Power* changed hands at Rs.8-14; *South Madras Electric* 4½% Debentures at Rs. 102-4 and *Gudivada Electric* at Rs. 88-8 c.d.

Plantations: This section continued to be an active market. Among Rubber shares, *Cochin Malabar* were marked higher at Rs. 9-2 and *Coorg* at Rs.36--. *Rajagiri* and *Midland* were two of the most popular scrips of the market and recorded sharp rises to Rs. 9-9c.d. and Rs. 8-2 respectively. *Velliamuttam* were done at Rs. 24-10; *Udayagiri* at Rs. 8-7 c.d. and *Kalpetta* at Rs. 24. Among Tea shares, *Highland Produce* preferences came in for business at Rs. 11; while the ordinaries were done at Rs. 28-12. *Peermade* were Rs. 30-12 and *Peria Karamalai* Rs. 18-12.

Sugars: *Mysore Sugar* were taken up at Rs. 54-12 c.d. *Daccan Sugar* small shares have been a fine feature at Rs.54. This company, it is reported, is erecting a Cane Crushing Machinery and the prospects are, therefore, considered to be good.

Miscellaneous: *Mysore Chemicals* were unchanged at Rs. 18-2. *Mysore Lamps* were in good demand at Rs. 12 c.d. following the declaration of an interim dividend of As. 4 per share. *Singareni Collieries* were done at Rs. 11; *Indian Steel Rolling Mills* ordinaries at Rs. 8-2 and *Spencer* ordinaries at Rs. 6-1. *Andhra Cement* were a dull market at Rs. 88.

LONDON STOCK EXCHANGE

After earlier firmness the London Stock Exchange is rather subdued during the past two days. The discouraging news from the Eastern front has had a restraining influence. Giltedged securities also are, weaker. The British Government have issued new national defence bonds bearing interest at 2½ per cent. with a longer maturity date. 2½ per cent. Consols were 82¼, 3½ per cent. Conversion 106 1-16, 3½ per cent. War Loan 106, and 3 per cent. War Loan 101 1-16. 3½ per cent. Sterling Paper was quoted at 99.

Among other sections greater attention has been paid to Rubber and Tea issues. Oils firmed up on the conclusion of the Anglo-Russian Alliance. Both Burmah Oil and Anglo-Iranian were marked higher. There has been nome profit-taking towards the close. The maintenance of the interim dividend by Burmah Oil has had a cheering effect on the market. Kaffirs have been supported to a certain extent. Home Rails have been easy.

NEW YORK STOCK EXCHANGE

Since the slump in prices on Wall Street on the announcement by Mr. Morgenthau that excess profits would be heavily taxed the volume of business has been on a very small scale. The developments in the Russian are situation also have had a discouraging influence. *U.S. Steel* were $55 3-8, *Anaconda Copper* $26 and *General Motors* $40.

MARKET POINTERS

Scheme of price control

The view that any scheme of price-control, if at all necessary should apply to cheaper quality cloth was expresed by the Marwari Chamber of Commerce in course of a communication to the Government of India. In the opinion of the Committee, the rise in prices of Indian mill products came as a relief to the Indian Mills, which had been hit hard by the depression that set in since 1929. Due to shrinkage in Japanese imports and total stoppage of U. K. and European supply, Indian mills were called upon to meet the increasing demand of the civil population. The Committee further pointed out that owing to the demand of the new export market in Eastern Group Countries as also of the Supply Department, there had been a further rise in prices of piece-goods. In the opinion of the Committee, the Indian Mills should be encouraged to expand the production and induce to utilize the short-staple cotton now lying idle owing to closing of foreign markets, particularly Japan, so that the needs of the poor and the middle class people might be met. The Committee while appreciating the difficulties of the mills, inasmuch as prices of mills stores etc., had risen abnomally, did not think them insurmountable provided Government rendered the necessary assistance.

BURN & COMPANY, LIMITED NOTICE

The Forty-Seventh Ordinary General Meeting of the Shareholders of Burn & Co., Ltd., will be held on Wednesday the Fifth day of November, 1941, at Eleven O'clock in the forenoon at the Registered Office, 12, Mission Row, Calcutta, to transact the following business:—

(1) To receive and adopt the Directors' Report and Audited Balance Sheet and Profit and Loss Account for the year ended 30th April, 1941, and to declare a dividend.

(2) To elect a Director in place of Sir Josna Ghosal who retires and is eligible for re-election.

(3) To appoint Auditors for the current year and to fix their remuneration.

(4) As special business, to consider and, if thought fit, to pass the following resolution, which will be proposed as a Special Resolution, viz:—

'That the Directors be and they are hereby authorised to make such donations from the Company's assets for War and charitable purposes as they may from time to time in their sole discretion think fit.'

By Order of the Board,
BURN & CO.,
Managing Agents.

Calcutta,
11th October, 1941.

Note.—If the Dividend as recommended by the Directors is passed at the meeting, it will be paid on or after 5th November, 1941, to those Shareholders whose names are on the 29th October, 1941.

The Committee also suggested that yarns should be supplied to the weavers at a reasonable rate, so that the many thousands of handlooms might be utilized in coping with the increasing demand.

* * *

Sugar Control Board:

A meeting of the U. P. and Bihar Sugar Control Board was held recently at the Secretariat. It is understood discussion centred round the production of the quota of sugar for two provinces, the minimum price of sugarcane and improvement in some sugar factories. After prolonged discussion the questions are reported to have been referred to the Sugar Commissioner who fill make the final decision. It is also understood that some rules framed by the U.P. Government regarding holiday and leave for labour came for discussion before the Board, but after careful examination these were placed on the agenda for the next meeting. Though no decision was arrived at about the minimum price of sugarcane, it is stated the price of sugarcane will be fixed at five annas per maund, growers demanding six annas. It is believed in the year 1941/42 the season will be very short.

* * *

Jute Mills Working Hours:

In the light of the stock position and the better shipping prospects, the Committee of Indian Jute Mills' Association, at a special meeting held on Monday morning, decided to enhance the working hours of its member mills from 50 to 54 per week with effect from October, 13,

A special meeting of the member mills was held on Tuesday to consider and pass the requisite resolution on the decision of the Committee.

A press communique, announcing the decision of the Committee states:—

"The Committee of the Indian Jute Mills' Association have on a number of occasions defended their policy as regards working hours and have made known generally that whenever shipping and trading prospects warranted it, they would not hesitate to take immediate action in the way of increasing hours to such level as was deemed best in the light of their close and continued study and survey of the industry's trading position.

Following upon the recent increase in hours to 50 per week from the 1st September—which more than covered the demands of Government for war orders—the Committee at a special meeting held on the 6th October, unanimously decided, in the light of the stock position and the better shipping prospects, that the hours of work should be further enhanced to 54 per week, this to take effect from next Monday, the 13th October.

* * *

Indian Tea:

The Indian Tea Association announce that it has been decided to increase the internal consumption quota allotted to signatories to the scheme for the restriction of sales of tea on the internal market, from 15 per cent to 17 per cent of each signatory estate's crop basis.

(*Annual meeting 15th October, 1941 at 4 p.m. at Bangalore*).

Audited accounts for the year ended 30th June, 1941:—

The accounts show a net profit of Rs. 9,54,677-15-4 after setting apart sums needed for Depreciation, Interest on Debentures and provision for Income and Super-tax, and also alloting Rs. 20,000 to Workmen's Compensation Fund, newly created with a view to meet claims arising under the Workmen's Compensation Act. This net profit together with the balance of Rs. 64,497-4-1 brought forward from the last year's Profit and Loss Account, makes a total of Rs. 10,19,175-3-5. The directors propose to dispose of this amount as follows:—

	Rs.	As.	P.
To declare a dividend of 10% together with a bonus of 10%, free of Income-Tax ..	4,35,856	0	0
To Dividend Equalisation Fund ..	2,50,000	0	0
To Cane Price Stabilisation Fund	2,50,000	0	0
To carry forward	83,319	3	5
Total ..	10,19,175	3	5

The directors have considered it desirable to create a Cane Price Stabilisation Fund, to be drawn upon if necessary, to ensure to cane growers a reasonable price in years when sugar prices are low.

The Factory commenced crushing of cane on the 6th August, 1940 and continued milling till the end May, 1941, when it was closed down for the annual overhaul.

3,12,923 tons of cane were crushed during the year. Almost the entire quantity of sugar produced had been sold during the year.

The Distillery at Mandya continued to work steadily and satisfactorily. The question of extending the power alcohol plant is being actively pursued.

Secretary:—Mr. H. N. Pallegar.

Authorised capital—Rs. 25,00,000 in 2,50,000 shares of Rs. 10 each Issued and subscribed—Rs. 21,79,280, in 2,17,928 shares, fully paid up. Debenture capital—Rs. 8,00,480 in 6% debentures and the balance in 4% debentures.

(*Annual meeting 16th October, 1941 at 4 p.m. at Bombay*).

Audited accounts for the year ended 30th June, 1941:—

The profit for the year is ..		14,18,909 0 0
Balance brought forward from the accounts of the previous year ..		12,641 0 0
		14,31,550 0 0
Less—Amount paid as Ad-Interim Dividends, free of Income-Tax, for the half-year ended 31st December 1940:—		
On Preference Shares @ Rs. 12-8 per share ..	1,25,000 0 0	
On Ordinary Shares @ Rs. 4 per share ..	1,87,500 0 0	3,12,500 0 0
		11,19,050 0 0
From this sum the Directors have carried to:—		
Depreciation Fund Account ..	1,25,000 0 0	
Reserves Fund Account ..	50,000 0 0	
Provision for Taxes Account ..	2,50,000 0 0	7,00,000 0 0
Leaving a balance available for disposal		4,19,050 0 0

Of this sum, the Directors recommend the following appropriation:
Payment of Final Dividends, free of Income-Tax, for the half-year ended 30th June, 1941:—

On Preference Shares @ Rs. 12-8 per share ..	1,25,000 0 0	
On ordinary Shares @ Rs. 6 per share ..	2,81,250 0 0	4,06,250 0 0
Balance to be carried forward		12,800 0 0
		4,19,050 0 0

Trade conditions during the first four months of the Company's financial year were not satisfactory, but trade began to revive in November, 1940. This improvement continued during the months that followed and prices were well maintained. It was unfortunate that the Company could not take full advantage of the higher prices ruling in the market during the second half of the year, as, in spite of dear food allowance, restoration of wage cut and the grant of a war bonus. The strike which began on 1st May continued till 18th June, 1941 and reduced the profits for the year.

The amount paid by way of Dearness Allowance and included in the item of Wages and Salaries is Rs. 1,79,845 for the year.

Against the interest due on the Debentures of *The Tata Mills Limited*, for the year 1940, a sum of Rs. 33,250 was received during the year at the rate of Rs. 12 per Debenture, less income tax.

The Tata Mills Debentures as well as the deposit of Rs. 2,50,000 with The Tata Mills, *Limited* (the latter secured by a second charge jointly in favour of this Company and the *Ahmedabad Advance Mills Limited* and the *Svadeshi Mills Company, Limited* on the liquid assets of the Company) were due for repayment on 31st December, 1940. The Tata Mills Limited approached the Debenture holders with a request to extend the period of repayment of the Debentures by one year. As it was considered to be in the interest of all concerned, in view of the conditions created by the war, their request was acceded to. Similarly the repayment of the deposit was extended by one year, secured by the Managing Agents' guarantee covering the period of extension.

Managing Agents:—Messrs. Tata Sons Ltd.

Authorised, issued and subscribed capital—Rs. 96,87,500 in 46,875 ordy and 10,000 570 Cum. Pref., both of Rs. 100 each, fully paid up.

Synopsis of the balance sheet as at 30th June, 1941:—

(*Half-yearly meeting, 27th October*, 1941 *at* 11-45 *a.m.*)

Audited accounts for the half-year ended 30th June, 1941:—

Accounts:—The Profit and Loss Account, after transferring Rs. 20,000 from Equalisation of Dividend Reserve and providing Rs. 1,14,820-8-3 for Depreciation and Rs. 90,000 for Taxation, and including Rs. 5,911-2-4 brought forward from last half-year, shows an available balance of Rs. 2,62,781-1-4 which the directors propose to dispose of as follows:—

	Rs.	As.	P.
In paying a Dividend on the Preference Shares of 7 per cent per annum, free of Income-Tax	80,493	0	0
In paying a Dividend on the Ordinary Shares at the rate of 6¾ per cent per annum, free of Income-Tax	1,42,070	0	0
In carrying forward	40,218	1	4
Total ..	2,62,781	1	4

Market:—The market remained steady throughout the half-year with a tendency towards a slight rise in prices at the end of the period owing to the demand for shipment of coal for the Middle East. Throughout the half-year the main factor determining the market position, has been the acute shortage of railway transport, which is likely to prove even more severe in the near future.

Colliery:—The mines and machinery were maintained in good order.

Loyabad Coke Plant:—During the half-year 40,622 tons were manufactured and 40,535 tons despatched as against 42,955 tons manufactured and 42,287 tons despatched during the previous half year.

Deliveries to the steel industry were continued during the half-year, but the future position is uncertain.

Saltore Colliery:—Boring to the Sanctoria seam has begun and it is hoped to find an area which may be workable at a later date.

Taxation:—As mentioned in the Directors' Report for the previous half-year the incidence of Taxation is imposing an increasingly heavy burden on this Company, and in the half-year under review it has been necessary to increase the provision for Taxation as compared with last half-year. Companies with a low level of profits during the standard years may be severely affected by Excess Profits Tax, and in view of the possibility of further increases in the level of Taxation, this Company in common with others similarly situated will find it difficult to maintain its present rates of dividends, even though profits may increase.

Managing Agents:—Messrs Bird & Co.

Authorised capital—Rs. 1,00,00,000 in 5,00,000 ordy. of Rs. 10 and 50,000 7% Cum. Pref. of Rs. 100. Issued and subscribed—Rs. 68,46,040 in 4,54,624 ordy. and 22,998 Pref., both fully paid up.

(*Half-yearly Meeting*, 27*th October*, 1941 *at* 10-45 *a.m.*)

Audited accounts for the half-year ended 30th June, 1941:—

As mentioned in the Directors' Report for last half-year this Company is seriously affected by the incidence of Excess Profits Tax owing to the low level of profits made during the standard years. A claim for the revision of the Company's standard profits has been made, but no progress has been made with hearing of the claim and it is not known when the question will be decided. In spite, therefore, of an increase in the revenue profit, the sum available for distribution shows little change owing to the necessity for increased provision for taxation. Although the raisings during the half-year have increased, there is little increase in the profit available for dividend, while the Company's assets have been depleted to the extent of the extra coal raised. Moreover, the attention of shareholders is drawn to the fact that owing to the continued rise in the level of taxation, it is likely to prove increasingly difficult for this Company to maintain its present level of dividend, which is distributed after payment of Income Tax and Companies' Super Tax.

The Profit and Loss Account, after making provision of Rs. 46,500 for Taxation, providing Rs. 7,249 for Depreciation and including the sum of Rs. 1,944-13-11 brought forward from last half-year, shows an available balance of Rs. 31,386-15-10 which the directors propose to dispose of as follows:—

In paying a dividend at the rate of 7½ per cent, per annum, free of Income Tax ..	30,000	0	0
In carrying forward	1,386	15	10

Managing Agents:—Messrs. F. W. Heilgers & Co.

ISSUED WEEKLY

Vol. XXVIII. No. 16 SATURDAY, OCTOBER 18, 194 Price Re. 1

Insure and Increase Nation's Strength

Financial Independence of the individual is the measure of Nation's financial strength.

In this hour of world turmoil, all Life Insurance Policy-holders should take stock of their insurance cover and ascertain just how strongly they are fortified against the unpredictable that lies ahead.

And, those individuals who have not yet made provision for their protection need do so without delay and thereby contribute towards Nation's strength.

Be advised and write to-day to

NATIONAL INSURANCE COMPANY, LIMITED.

NORTH WESTERN RAILWAY

Tenders will be received up to 2 P.M. on 10th November 1941 for the purchase of cotton, woollen and mixed cloth cuttings available for removal from 15th November 1941 to 14th November 1942. Tender forms containing full particulars and conditions of sale can be obtained on payment of Rs. 5/- per set (plus annas eight for postage from outstations buyers) on application to Controller of stores, N. W. Railway, Lahore.

AMERICAN WAR EFFORT IN CALCUTTA

Contributions to the progamme of the American Tamasha to be held at the Town Hall on November the 8th in order to raise funds for the purchase of a fire engine for Calcutta Fire Brigade have already exceeded Rs. 16,000. This amount, which represents a record for any war time charity programme in Calcutta, has been collected pricipally by the ladies of the American Colony, and clearly reflects the sympathy with which Calcutta views this American contribution to the War Effort.

WORLD OF INDIAN FINANCE

Friday Evening.

THE extremely slack conditions in the money market are reflected in this week's Treasury Bill results. Tender bills on offer were Rs. 2 crores; and applications came to Rs. 5,18¾ lakhs. The average rate of accepted tenders is 1 pie lower at annas 10 and pies 6 per cent per annum. The offer for next week is Rs. 2 crores. While tenders were received on Tuesday for Central Treasury Bills, the Madras Government were on the market on Monday for Rs. 50 lakhs of three months bills. Applications at Rs. 1,80½ lakhs provide welcome evidence of the greater interest which money market interests are now taking in Provincial Treasury Bills. The average rate of the Madras bills was annas 11 per cent compared with annas 10 and pies 6 being the discount rate of the Central Treasury Bills.

Comfortable credit conditions are also reflected in the return of the Reserve Bank and of the Imperial Bank. Active note circulation has set up a new high record at Rs. 2,72.38 crores. The deposits of the Central Government with the Reserve Bank have risen sharply from Rs. 11.90 crores to Rs. 18.60 crores, presumably due to further receipts from the British Government. The deposits of the Burma Government and of the Provincial Governments disclose slight variations. The Imperial Bank has again built up an all-time record for deposits at Rs. 106.36 crores. The cash balances of banks are slightly above Rs. 30 crores. While the Imperial Bank's investments are higher by Rs. 70 lakhs, advances are lower by Rs. ½ crore.

The most noteworthy feature of the Bank returns is the sharp rise in Central Government deposits and foreign balances in the banking department of the Reserve Bank, following a similar big increase in the week ended October 3. There is one common cause for the rise recorded under these two heads; and that is that further payments were received in the week ended October 10 from the British Government. As foreign balances have risen from Rs. 60.37 crores to Rs. 68.95 crores, it may be inferred that sterling receipts that week were of the order of Rs. 8½ crores. This is in addition to the Rs. 15 crores disclosed as sterling receipts in the returns for the previous week. The usual monthly settlement of intergovernmental transactions has thus been made, on the present occasion, in two instalments; and the total has reached the unusually high figure of Rs. 23½ crores. If sterling payments by the British Government in future months should be on the scale recorded this month, India may be faced with a very embarrassing position. The adjustments that have to be made in the composition of the assets of the Reserve Bank are now Rs. 11.57 crores; and the large payments that are being made by the Indian Government in India on account of the British Government are calculated to cause such a strain on the notes held in the banking department that large-scale transfer of sterling securities from the banking department to the issue department will have to be effected in the course of this month. It will thus be seen that the following are the monthly recurrent features:

1. The end of the month accounts for a substantial payment in sterling from the British Government to the Indian Government.

2. This causes a big rise both in foreign balances and in Central Government's deposits in the banking department of the Reserve Bank.

3. This causes a reduction in the notes held in the banking department.

4. Further inroads on the notes held in the banking department are caused by the heavy payments which the Indian Government have to make in the course of each month as agents of and on behalf of the British Government.

5. This position has to be rectified by transfer of sterling securities from the banking department to the issue

Eastern Group-Sleeper Control

Tender No. 2/42-43

Sealed tenders are invited and will be opend at 3 p.m. (Bengal time) on the 7th November 1941 for the supply of the following quantities of miscellaneous timbers. Full particulars may be obtained from the undersigned on payment first of Rs. 5/- (Rupees five) being the cost of tender documents, to the Chief Auditor, B. N. Railway House, Kidderpore, whose receipt for the amount must be produced before such documents can be issued. This sum will not be refunded.

1. 800 tons C. P. Teak squares measuring 14' & up × 10" × 10" & up with an average cubical content of not less than 15 cft. for each parcel offered for inspection with the following specification:—

"The C. P. Teak squares (Tectona Grandis) should be straight and out of winding with faces squares to one another with not more than 25% sapwood and wane across the width for any face free from rot, serious heart shakes and cracks, split ends, large knots and other defects. It should be ready for immediate conversion into scantlings."

2. Delivery and rates—Rates must be quoted per ton of 50 cft. f.o.r. loading stations.

Supply may be made as follows:

266 tons during December 1941.
266 tons during January 1942.
268 tons during February 1942.

800 tons.

3. 1000 tons Indigenous timber squares measuring 12' & up × 14" ×14" & up with an average cubical content of not less than 27 cubic feet for each parcel offered for inspection and may be of the following species.

Gurjan
Tavoy
Hollong.

"They should be good colour, mill sawn, free from knots, shakes and other defects."

4. Delivery and rate:—Rates must be quoted per ton of 50 cft. f.o.r. loading stations. Supplies must commence from December 1941 at the rate of 100 tons monthly.

C. F. GILBERT,
Sleeper Control Officer,
Eastern Group.

B. N. RAILWAY HOUSE,
Kidderpore, Calcutta,
Dated 6-10-1941.

Finance Abroad

Thursday Evening.

No change of importance has taken place as yet in London. Last week there was eager buying of Treasury Bills on the tender day as the total applications amounted to £161 millions and the rate was barely two farthings over the conventional rate of 1 percent. The market got a quota of 32 percent and this reduction in the amount of Treasury deposits asked for this week should probably lead to keener competition for Bills on Friday from clearing banks. Only £60 million against £75 last week will be taken in 1⅛ percent deposits this week and this form of short-term borrowing has evidently been reduced to give a fillip to institutional buying of the new 1941-51 bonds. It is certainly auspicious that the Russian reverses have not led to any change in market weather. The discount for fine trade bills have so long been quoting at 1 1/16 percent as the upper limit that the convention is to take the Treasury Bill rate as identical with that on three months fine bills. It is necessary to remember that successive additions to the note circulation in Britain without leading to any large increase in prices leave more money for investment. With the long-term outlook obscure and the demand for taxes etc. urgent enough, the money market keeps more funds than in peace. There is no 'bad' money and there is not any export of capital. So short-term rates appear to be pegged for the duration and banks have been free lenders over a long while for short periods at 1 percent.

The main consequence of cheap money is the firmness of the Funds. The firmness may not be entirely due to Treasury control or the absence of suitable investments but to such factors as the good start given to the Treasury's new borrowing plan. A good start was certainly looked for in this case for Mr. Montagu Norman puts Britain's requirements of savings at £5 millions per diem. He said recently that if the nation spent £13 million per diem on the war the saver would have to provide as much as £5 millions. It seems as though a quarter of the national income would have to be earmarked for any scheme which yields over £1800 millions in a year. If the volume of saving rose to that extent the budgetary gap would not be completely bridged for it is apparent that tax revenue cannot in any circumstances give more than £1500 millions. The problem of financing the war would, however, be solved to the extent that an estimated outlay of £4500 millions in 1941-42 will not create anxiety and much can still be done by expanding the short-term debt as in the first year of war. There is however, the stubborn fact that 2½ percent will not tempt buyers of bonds to keep on saving and saving must be forced in the sense that normal outlets for expenditure must be closed and saving canalised.

Financial control in the last two years has largely succeeded in getting this done, and it is correct to say that with rationing in force, expenditure on winter clothing will be less and the cut in the petrol ration will have closed another way of spending money. Deferred wages are in practice and when the manpower question is fully dealt with both the amount of wages and the amount of savings will increase. There is hardly any need to dilate on the point that Britain can take the rise in war expenditure in her stride. She has reason to believe that the rise in national expenditure last month can be got over and other things such as supply, help to Russian and defence plans for the Far East are more pressing and important.

The U.S. Government remains committed to Lease and Lend and is willing to send supplies to Iran for facilitating British help to Russia. Russia's back door must be opened in time and it is satisfactory to record that Iran's re-organisation is nearly complete.

The success of Mr. Curtin with the new £100 million loan was only to be expected. The previous Treasurer had settled things and Mr. Curtin can certainly flatter himself that the Australian investor is not rattled by the advent of a Labour Government. There is besides the fact that Australia's maturing 4 percent loans were converted during July into a long-term 3½ percent loan through the good offices of London. This should have been a bull point for the issue floated this week. Australia's efforts to increase borrowing out of savings are in line with Labour's policy. Last year the Commonwealth had to put up £170 millions for war expenditure and expenditure for 1941-42 was put at £250 millions equal to over a quarter of the national income. Tax revenue cannot provide even £200 millions and the Commonwealth, which severely limited borrowing in 1940-41 has every justification for encouraging subscriptions to the loan that helps to pay for Australia's war. As the Dominion has not been able to secure uniformity in taxation in the States, the volume of subscriptions will naturally vary, but there is the satisfaction that as promised by Mr. Fadden, the Commonwealth Government will spend £190 millions at home out of the total war outlay of £250 millions. There is no likelihood of retrenchment and the social services will be unimpaired. But the Labour leaders are sober responsible men, vastly different from Mr. Lang who pulled down Australia's credit in the old days. There is also the fact that in 1941-42 the Commonwealth will not be spending more on civil expenditure. All new spending will be concentrated on the war effort and the new government can be trusted to get more backing than Mr. Menzies from the various States. As total expenditure for 1941-42 promises to be double that for 1938-39, the scope for increases in taxation was narrow; hence borrowing was inescapable.

The Anglo-American financial mission to China have reached Chungking before the dollar appreciated locally in Shanghai. The brief cable suggested that the appreciation led to a scramble for U.S. dollars and that it was partly due to the free offerings of U.S. dollars to local traders. The eagerness of Shanghai holders to get rid of Chinese dollars may suggest that if those who ought to know have reason to stick to the Chinese currency the black market, which makes money-changing a local industry, has different views, for the nonce. A temporarily reduced supply of U.S. dollar notes is assigned as the reason for the drop in the unofficial rate to 34 Chinese dollars from 24 dollars per U.S. dollar. The temporary overvaluation of the U.S. currency had unusual results, for it forced up share and commodity prices and was attended by a rise in retail prices. The situation may be due to local factors other than the inevitable fall in export trade. There is the stark fact that Shanghai cannot get enough U.S. dollars in return for goods for Shanghai is ringed round by the Japanese who have shown their hand in Hankow and elsewhere. The inability to sell Chinese dollar at official rates indicates clearly the need to place more foreign currency at the disposal of Nationalist China. The exchange market *emeute* had no effect on the London quotation for the Chinese dollar.

Wall Street may have been left high and dry by the proposal emanating from the Treasury that dividends should be limited and all Treasury feels no responsibility to the stock excess profits taken off in taxation but the U.S. Treasury feels no responsibility to the stock market and the President thinks only of paying for his anti-Nazi foreign policy. Leasing and lending take away more money than ever and the latest statement reinforces the view that the programme of $5,985 million in addition to the original allotment of $7 billions does not represent the limit of assistance. It was indicated by President Roosevelt on Tuesday that the average rate of assistance had been at the rate of $700 millions per month. It is but right to remark that the U.S.A. has had something in return for British purchases in wartime have totalled $5000 millions and a good part of the present exports had been paid for in cash.

With the conclusion of the Moscow talks interest converges on what Russia and Britain mean to do in order to fulfil promises. Mr. Harriman has not spoken to the President who has, however, indicated that it is O.K. by the Administration. The necessity of giving help at once is stressed hard by the British press which is ahead of the Government. The danger to Kharkov remains real but the Russians who lost Dnieperstroy without a qualm retain a second line of defence in the Urals. If the Germans put the first line of industrial defence out of action the winter will help Russia to get second wind. According to the *Economist* the Ural region produces one-fifth of its steel. Magnetagoresk is the centre of heavy industry here, producing 65 percent of Russia's rolled metal; at Sverdlovsk, Novolagil and Chelvabrinsk there are plants producing machinery and machine tools. The rich deposits in Makniknya mountains and coal from the Kuzbass and Karaganda districts in West Siberia make the Urals a potential line of defence. In West Siberia the Russians have great mineral resources but have so far scratched only the surface. But it is believed that they hope to produce in 1942 over 35 percent of the Union's output of iron and steel and rolled metal. The Urals and their resources were made known to the Anglo-American delegates who must have also learnt that additional production in the Urals must be built up on the basis of imported plant and tools from the older industrial systems of Britain and America.

3½ per cent Sterling Stock

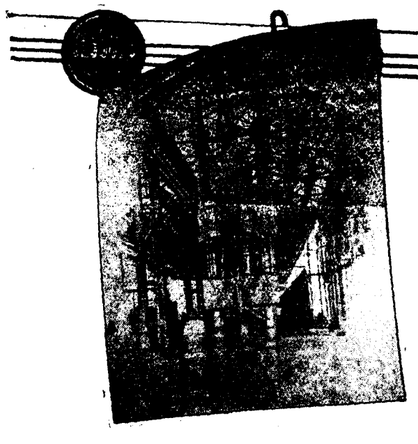
THE time is fast approaching when the repayment of 3½ percent India sterling stock must be taken on hand. In fact, the Government could have comfortably redeemed this loan in September if they were so minded. For reasons which have not been disclosed, the financial authorities do not seem to be in any special hurry to tackle the repayment of 3½ per cent sterling stock. Recent developments, however, are calculated to force the hands of the Finance Member in this respect. The principle of redeeming sterling loans as opportunity occurs, and of securing the good offices of the British Government for redeeming the loans before the dates of maturity, has already been accepted and acted upon. The repayment of 3½ percent India sterling stock will, therefore, mean the logical extension of this principle.

When the dated India sterling stocks were redeemed, the original estimate of the amount involved in the operation was £90 million or Rs. 120 crores. All but £12¾ million of these loans has been redeemed. The compulsory repayment for the dated sterling stocks could apply only to holders in Britain and in India. The unredeemed balance of £12¾ million represents, presumably, holders who are not affected by defence rules issued in England or in India. Of the amount that has been repaid, a small proportion of the holders accepted rupee counterparts in lieu of sterling stocks surrendered. Taken all in all, it may be said that payments in sterling made by the Government in respect of the redemption of the dated sterling stocks were approximately £70 million.

Accumulation of sterling balances, which has been a marked feature of India's finances since the war began, made it possible for the Central Government to undertake such a large commitment in sterling and to discharge this commitment with the utmost smoothness.

These sterling payments were made in March and April this year; and, since then, the Reserve Bank has been acquiring sterling on such a substantial scale that the sterling balances now held by the Bank are almost equal to the balances on the eve of the transactions connected with the repayment of the dated sterling stocks.

During the past eight or nine months, there has been a gradual increase in the amounts received by the Indian Government from the British Government in respect of what may be generally described as inter-governmental transactions. The procedure adopted has been for the British Treasury to make payments in sterling at the end of each month. These monthly receipts were of the order of Rs. 10 crores. During the current months, however, there has been a sudden spurt; and it is curious that the Reserve Bank returns issued last week as well as this week bear the impress of large-sized payments in sterling. In the week ended October 3, the Reserve Bank statements recorded a receipt of Rs. 15 crores from the British Government. In the week ended October 10, foreign balances held in the banking department show a further rise from Rs. 60.37 crores to Rs. 68.95 crores. Sterling receipts in the last week were thus over Rs. 8½ crores. That is to say, the settlement of the September transactions between the Indian Government and the British Govrnment has involved the payment of Rs. 23½ *crores in sterling.*



It may be that special circumstances have contributed to bring up the September total to the high figure of Rs. 23½ crores. But it is clear that supplies made by the Indian Government in connection with the war have recently been so accelerated that the monthly settlements hereafter will mean payments in sterling of anything like Rs. 20 crores.

Even on the basis of figures for sterling securities as disclosed in the returns of October 10, the Reserve Bank is in a position to undertake the repayment of 3½ per cent India sterling stock without the least strain. On March 21, that is, prior to the payments made to the holders of sterling stocks, sterling securities in the issue department of the Reserve Bank stood at Rs. 140.50 crores. The corresponding figure on October 10 is Rs. 143.63 crores. That is to say, sterling assets in the issue department are now higher by Rs. 3 crores as compared with the position on the eve of the repayment of the sterling loans. In the banking department, while foreign balances stood at Rs. 28.73 crores after the depletion caused by the large sterling payments, foreign balances on October 10 are Rs. 68.95 crores. This compares with Rs. 78.35 crores as on March 21. Foreign balances in the banking department are, therefore, only Rs. 10 crores lower as compared with March 21. Taking the banking and issue departments together, it may be said that the sterling assets of the Reserve Bank as on October 10 are only Rs. 7 crores lower as compared with the position before payment was made to holders of sterling stocks. And it may be taken as certain that the Reserve Bank returns issued in the first week of November will show that this difference has been more than made up.

In relation to the sterling assets which the Reserve Bank owned in March, the Finance Member decided to undertake the commitment of £90 million in sterling payments. Actually, the payments that had to be made in sterling were £70 million. The position in regard to the 3½ per cent India sterling stock is that the total amount of the loan is £78.7 million; of this amount, such investors in India as hold 3½ per cent India sterling stock will, no doubt, accept payment in rupees. In broad terms, it may be stated that the total sterling payments involved in the repayment of 3½ per cent sterling stock will in no case exceed £70 million. This is a commitment which can be undertaken with perfect comfort in relation to the existing sterling balances of the Reserve Bank.

If sterling accumulations in October and in November turn out to be as large as those of September, the hands of the Government may well be forced in this matter. Should there be an increase in sterling balances by an amount of Rs. 40 crores in this and the next month, the Finance Member could not very well postpone the tackling of the repayment of 3½ per cent non-terminable sterling stock.

Our view then, is that the repayment of 3½ per cent sterling stock is inevitable before the end of 1941. The corollary to this is the replacement of the redeemed sterling loan by rupee loans. The manner, timing, and plans of such rupee loans will be considered in a subsequent issue.

Europe in the Shadows

THE difficulty of making positive statements about Europe to-day is not diminished by such statements as come from the representatives of the Governments in exile. While the formal statement of Britain's postwar aims in regard to Europe has been followed by repeated assurances to the effect that restoration is the main aim it is clear that the actual sufferings of the conquered countries have greatly increased. The scope of German oppression has not shrunk and Hitler's new order in effect represents the exaltation of theft. The bewildering paucity of details concerning the operations of the robber economy leaves much to the imagination. While it is clear that Rumania, Hungary and Bulgaria have chosen to throw their lot in with the Axis powers, the Occupied countries, in the main, have maintained a defiant attitude. Even little Denmark has indicated complete disapproval of the local Nazis, and as for the Czechs, the happenings of the past month such as the dissolution of the Sokol movement furnish proof of the unvanquished and troubled spirit of a proud nation.

The battle with Russia has necessarily accentuated Germany's dependence on the occupied countries and the withdrawal of garrisons has stimulated the movement for resistance. Not long ago a correspondent in the *Spectator* indicated that forty million Frenchmen were silently helping the Allies and were not endorsing the policy of the Vichy Government. It was argued that there was more sympathy than is currently known with the Free French movement and the flight of young men to Britain was actively assisted nearly always. It was even argued that small landing parties could count on local help and it was concluded that the unworthy attitude of Vichy did not accord with the French nation's sympathy with the Allied cause. That is certainly hopeful for General de Gaulle's Committee which waits for official recognition by the U.S.A. and can carry on thereafter a more vigorous campaign. If France remains numb with pain and misery, the process of exploitation has been hastened by the price which Marshal Petain's defeatist regime has paid. The iron ore of Lorraine has been added to that of the Ruhr and Luxemburg and the rating of steel capacity has gone up to over 50 million tons in consequence. The bifurcation of France into the industrial north under German control and the agricultural south under Vichy has underlined the possibility of expansion and illustrated also the purpose of the daylight sweeps by the R.A.F. that began in summer. While it is said frequently that the scarcity of raw materials will reduce the volume of effective assistance, there is the fact that in regard to aluminium, copper and other materials like phosphates, the Germans are getting a good deal from North Africa through France and Spain. The conquests of the Nazis this year must

help to add to the supplies of non-ferrous metals; Yugoslavia and Greece have mineral resources now added to the Nazis' ill-gotten hoard and such supplies of chrome and nickel as can be had will be more than ever valuable. Little may be known about the terms of the new commercial treaty with Switzerland but the impression that the Nazis had the best of the bargain is well-founded. Germany may be using up rapidly her precious stocks and leaving more and more to synthetic substitutes but there remains the fact that by spending 50 percent of her national income, she is getting the most out of her early start. The war machine has not cracked, as foolishly forecast on the basis of statistics in isolation, and the blockade has remained, as Mr. Dingle Foot confessed recently, only one of several weapons and not the most effective either. It is clear that the Nazis have long ago geared their war machine to the Russian campaign and the spoils of 1940 have been applied towards a new programme of aggression.

No analysis of Nazi resources can fail to take account of the fact that from January 1933 there has been one increasing purpose through the course of German policy. Comparisons of available resources and possible effort by the respective war economies of Britain and Germany such as that made in a recent publication of Chatham House should not miss the fact that Germany intended to spend as much as 70 billions in 1941. The increased scale of war expenditure in Britain this year finds a close parallel in Germany where arms production has evidently risen through the acquisition of new resources in the Balkans. A new fever of requisitioning in the Occupied Countries has crept in, in place of the old method of devious payments in new paper currency and in spite of current calculations, the ship-building and aircraft industries have not been put out of action. Prisoners of war and involuntary emigrants have replaced the men combed out of factories and the most vigorous bombing has not apparently interfered with armament production. There is nothing like the shortage confidently anticipated as regards lead, copper, nickel and above all oil. Oil experts take a different view since August and it is only the fact that Russia is matched against Germany that makes it possible for one to say that Britain is not fighting Europe as a whole. Turkey may have cleverly got round Dr. Clodius but the fact that she signed a treaty promising exchange of goods sticks out. Rehabilitation in Belgium has proceeded far and stories of sabotage encouraged by the V campaign must be treated with reserve. A highly industrialised country like Sweden has shown this year a distinctly respectful attitude towards Germany by consenting to the passage of German troops across her territory in July. If Northern France like West Germany has been regularly strafed by British bombers little has been done to suppress activity in the new plants shifted to the Polish territory incorporated in Germany.

Germany's success in curbing inflation and keeping down the cost of borrowing in a year which saw a net addition of 34 billion marks to the public debt is no inconsiderable achievement. Dogmatism is as dangerous as defeatism but any evaluation of Germany's present assets must not ignore the indemnities collected by the Huns. The infiltration of German capital and enterprise has proceeded far in the subjugated countries as also territories within the German sphere of influence. The burden of finding money has been eased, partially at any rate, by flooding Holland and Belgium with new notes. The hardships of the subjects is no concern of the Germans who have extended also the clearing arrangement to accumulate balances for their own use and delay payment for imports from the occupied countries. While consumption at home is severely regulated and purchasing power reduced to the point of eliminating domestic pets the advantage to the Government, which gets through trade the goods required and chooses the methods or postpones the payment at will is obvious. The trade arrangements of the Occupied Countries are in the hands of Germany which has ordained that payments for trade with the Occupied Countries should be made through special accounts in the Reichsbank. It is believed that payments for trade between the Occupied areas and Italy, Switzerland, Sweden and Finland are made through Berlin. Berlin's plan for a new collective clearing house for Europe's trade has been carried out in part. Germany is the stronger party in all such pacts and if the last trade mission to Ankara did not get all the chrome wanted, Turkey agreed to buy German machinery and armaments and to that extent placated the Germanophile Army groups.

The decline in European trade noticed over the year ended April 1941 is a measure of Germany's success in attracting goods to herself, and it is now generally believed that the Nazi agricultural programme in regard to potatoes and beet has gone through. Europe has enough food if the Nazis let her have it particularly as more grain from Poland and the Balkans will be available. The Danish and Dutch systems of farming have been profoundly modified to suit German needs and vegetable fats will be taken from France where more oilseeds and olives are being cultivated to order.

The pronouncements of American politicians on the food situation have ceased to attract attention, but the Nazis realised long before the Allies did that food is a potent weapon. When Denmark lost a big part of her livestock, she lost more than a means of living, and if Norway carries on a subterranean campaign she has to surrender over half the yield of the fisheries to Germany. If it is not yet clear that Germany is the centre of the European economic system, the goal desiderated by Dr. Funk more than once, the Reich's living space has been expanded at the expense of other nations. Rationing such as is practised in neutral Switzerland and non-belligerent Spain is an acknowledgement of the impoverishment occasioned by Germany's ambitious career. That Italy is facing a bleak winter and the peasants express aversion to a prolonged war does not mean that she is prepared to give up her ally. Mr. Churchill's Christmas broadcast failed decisively, for the German hold is tighter, and Germany has found a way of taking sides with the Serbs while Italy plays up to the Croats.

The economic re-organisation of Europe has been carried out under the stress of war. Its swift though partial success is a timely indication of the dangers of a disciplined and powerful nation taking to arms. To legalise plunder in a dozen ways and to dub other nations besides the Jews as sub-human is to claim a privileged position and Germany has since June last treated the inhabitants of every Occupied Country as chattels, ready to move them on to work elsewhere or to dock their unemployment pay as in Holland merely to force them to take unacceptable jobs elsewhere. The very idea of regimentation and planning has been discredited by the purposes to which it has been put and the U.S.A. clinging to the Old Freedoms has rejected peremptorily the new deal for Europe propounded by the Nazis. Herr Darre indicated that Germany is not unafraid to serve the U.S.A. in much the same way as European countries; and this apprehension both explains and justifies the policy underlying the Lease and Lend Act. The U.S.A. is not prepared to see Europe artificially isolated by a new economic experiment which cuts Britain's historic connections with the Continent going back to the days when the Greeks of Massilia took Cornish tin. The U.S. Government in pledging aid to the democracies is against the revolutionary ardour of the Nazis, reflected in the passion for promoting self-sufficiency in Europe and menacing U.S. trade everywhere. It has been justly pointed out that there can be no compromise on the economic issue since German domination means the elbowing out of the U.S.A. in Central and South America and the cutting off of supplies for U.S. industries followed by the loss of markets. When the U.S. Government is bent on paying out billions for defence, it is at the same time, defending the highest standard of living in history to use a phrase of Mr. Herbert C. Hoover.

Editorial Notes

Rising Prices

THE further addition to the dearness allowance made by the Bombay Millowners' Association is an admission that the cost of living index was moving against the working class. The index for August showed a rise of 17 points on that for August 1940. The rise in August was due largely to the rise in the index for food, only fish being cheaper in comparison with July. The higher prices payable for Kerosene and matches led to a rise in fuel and lighting index and the current prices of piecegoods are reflected in the rise of six points in the index for the clothing group. The August index was 111 (base 1933-34); but it indicates at the same time that the advance in the prices of piecegoods has been exaggerated since the working class, at any rate in Bombay, gain to the extent that higher wages are obtained effortlessly. The cost of living indices for other cities did not remain unchanged. Higher wholesale prices in Bombay implied higher prices in Ahmedabad where the cost of living index rose by five points in July and was nine points above that for July 1940. The index shows that the cost of living was lower than in the base year 1926-27 but the sharp rise must have produced hardship. It is noteworthy that the largest percentage increase occured in the case of clothing. The rise in the main textile centres suggests that replacement costs are uniformly against dealers. As in Bombay, the rise in the cost of living began before March. In Sholapur, too, the working classes index rose and stood 8 points over the index for July 1940. In the case of clothing the index rose slightly and only the food index rose by four points. Here too the cost of living index at 88 for July was lower than that for the average of the base year (February 1927-January 1928 equal to 100). Variation in the cost of living index of other cities indicate that the working class had to pay higher prices for good and conventional necessaries. Jubbulpore, Nagpur and Madras reported that industrial workers had to pay more in July for their food, clothing and lighting as also miscellaneous articles. The tabulation of the numbers in the *Bombay Labour Gazette* shows that the increase was least in the case of Sholapur and highest in the case of Jubbulpore as between July 1940 and July 1941. The adverse movement in the cost of living index was due to a rise of 13 points in wholesale prices in Bombay. The poor monsoon is likely to accentuate the rise in prices recorded until August and reports of scarcity in the Deccan districts underline the gloomy prognostications drawn from the rise in prices, considerable and continuous since June last.

Gold Production in 1940

The absence of any figures relating to the Frenuh Empire, Japan, Abyssinia, several Central American countries as also the U.S.S.R. and minor producers in Europe does not detract from the value of the 1940 statistics of gold production. The figures are available in the June bulletin of monthly statistics published by the League and Nations. The figures bear out what was said about the increased production and absorption of gold as also the fact that there is more than enough gold to go round. More gold comes from Africa than any other Continent because South Africa remains far and away the biggest producer. It is known that production in 1941, is rising, and the gold mining industry is going to break its own records. The South African budget has not evidently affected production, as output for 1940, rose in response to the rise in price following the war. The increase is as much as 37,837 kilogrammes representing an increase of over 9 percent on the previous year. To the increase in world production some contribution was made by the Belgian Congo. Production in the case of the Congo rose from 17,070 kilogrammes to 17,600 kilogrammes. The increase in output reported by Southern Rhodesia and the Gold Coast is relatively small. There is, however, the indication that the setback, recorded in 1939, by the Gold Coast was wholly temporary. The increase in gold output claimed by Canada and the U.S.A. is not unexpected. The steady rise in Canadian output indeed suggests that Canada like South Africa has a very flourishing mining industry. In Central America the main producer is Mexico which reported a fairly considerable rise in output last year. The importance of the Philippines as a source of gold is established by the figures which show that there has been a rapid rise in output since 1931. The islands have now something besides sugar, copra and hemp. Further the Phillipines' iron ore like gold is bound to promote prosperity.

The reduced yield of gold from India's mines may be due to the excise duty clapped by the Mysore Government. The total output in 1940 fell from 98,000 kilogrammes to 9000 kilogrammes. The figures indicate that the present price of gold has not led to any increase in Indian production which has fallen away in the last three years. The reduced dividends paid by the Kolar mining companies are also explained by the fall in output during 1940. Burma produces little or nothing, but Malaya's mineral production includes a certain amount of gold. The figures indicate that Rumania's gold output fell but the 4067 kilogrammes mentioned relate to gold bought by the National Bank. Though the quantity was lower than that bought in 1939, there is nothing to show that the gold production of Germany's tool or victim fell. Yugoslavia's output for 1940 is not known and the statistics provide only an approximate estimate of Russia's gold production. The total for the U.S.S.R. is put at 122,000 kilogrammes showing that Russia still remains the fourth largest producer of gold accounting for about 10 percent of world production. The fall in Australia's gold output can be accounted for by reference to the difficulties encountered by West Australian mines as regards taxation, wages, plant etc. It is noteworthy that the Fiji Islands produced 3600 k.g. of gold in 1940 reporting a further addition to the Empire's available resources. The further rise in the world output from 1.2 million k.g. to 1.25 million k.g. has benefited the British Commonwealth most. It is noteworthy that the Axis countries have at best had a total output below 700 k.g., and as for Japan, it is believed that its output cannot have exceeded the 1939 estimate of 26,000 k.g. Moreover, she has lost that only market for gold—the U.S.A. The average price of gold expressed in sterling and dollars was unchanged over the last year; but the price in Swiss francs per kilogrammes fell from 4887 francs to 4871 francs revealing plainly that both sterling and dollar had depreciated in terms of Europe's soundest currency.

Hyderabad Budget

Sir Akbar Hydari has left Hyderabad finances on a very strong basis, as may be inferred from the budget for Fasli 1351. The budget estimates provide for total expenditure of Rs. 913.77 lakhs against total receipts of Rs. 915.73 lakhs. The fall under revenue as compared with the current year is offset by the fall in expenditure. The smallness of the surplus is due to the poor monsoon and the demands of certain spending departments arising from the war. There is no proposal for taxation, and the constitutional reforms will start

without the unpopularity entailed by new taxes. The Hyderabad Budget once again shows that the curtailment of expenditure and advance planning of spending departments is attended by valuable results. Fluctuations in revenue when accompanied by stabilised expenditure are of little consequence, and the latest Budget for the fiscal year commencing on October 22 shows that with a large revenue balance of as much as Rs. 85.57 lakhs the State is very strongly placed to meet the demand for intensified war effort. The recent 3 per cent loan should also have helped the State to obtain an additional reserve and the new industrial development plans like the scheme for a bank should go through smoothly. The decision to delay introduction of an incime-tax is definitely an achievement of the first order. While taxation in British India keeps rising and there are frequent, cries for relief the major States are apparently also to carry on without change. The main heads of Hyderabad revenue are land revenue (Rs. 274 lakhs.) Customs (Rs. 120 lakhs) Excise (Rs. 171 lakhs); in each case there is likely to be a fall as compared with the revenue in the present year.

The provision for extraordinary non-recurring expenditure from accumulated surpluses has helped Hyderabad to keep the allotment for capital heads at Rs. 100.36 lakhs. Though comparison with the Revised Estimates suggests that the revenue has shrunk rather quickly the State's financial position must at any time be measured by the amplitude of the Reserves totalling over 31 crores against a public debt of 9.66 crores only. The Budget reveals that the Government is actively interested in the resuscitation of the gold-mining industry as special provision has been made for prospecting. The value of the State purchase of the Railway is demonstrated once again by the fact that this source provides a normal income of Rs. 135 lakhs in a year. On the assumption that this important asset has cost Rs. 18½ crores to the State the yield is well over 6½ per cent.

Canadian Prosperity

It is not difficult to ascertain how Canada is going to pay for the war. Mr. Ilsley has increased taxation, adopted measures to check consumption and promote saving. The result is that Canadian revenue in April 1941 was nearly double what it was in April 1940. The improvement under Federal excises was remarkable, but more so was the yield under income-tax due in part to the growth of revenue. The latter is assuredly sustained by the expansion of exports. Canadian exports in April were valued 116.93 million dollars as against 83.56 millions in April 1940. Canada's increased imports in April (106.27 millions as against 85.98 millions) were due in part to increased industrial production. The general index rose between April and May by 6 points to stand at 155 and the average level was 38 per cent above that of a year ago. In spite of the slowing down in the automotive industry keener demand for iron and steel, reflected in production equal to 132 per cent of capacity, was an important feature. The timber and pulp industry responded to the expansion in exports.

The most significant pointer to prosperity is the advance of 44 per cent in the pay roll index for April as compared with a year ago. The increase was more marked in the manufacturing industries than in trade. Canadian industrial activity may be measured again in the rise of the general index from 132 to 155 in five months. Minor indicators like cheque clearclearings and bank advances attest the forward movement. More significant is the strong rise in the earnings of both the Canadian Pacific and National Railways. The rise in the note circulation of the Bank of Canada reflects the higher tempo of business activity and the increase in cash balances as compared with the position a year ago is a familiar feature of wartime activity. The delayed movement of the wheat crop this year helped Canadian farmers where cash income in the first quarter was better than in any period since 1929 largely as a result of higher receipts from the sale of wheat and heavy marketing of livestock at high prices. But farm costs too were rising and real income was only 90.5 per cent of what it was in 1926. What is however important is that farm purchasing power rose swiftly after the fall in the preceding quarter and the diversification of Canadian farmer's trade through the demand for bacon, cheese etc. from the U.K. has helped to put the farmer in a better position than at any time since March 1936. Crop conditions in the spring were pronounced to be favourable and the burden of the carry-over hardly touched the level of wheat prices which have naturally followed the trend in the U.S.A. It has been noted that the level of wholesale prices in Canada rose by over a point in spite of the absence of any change in the prices of farm products until this April. The reduction of the area under wheat this year is in line with the Dominion Government's policy and the indifferent rainfall in parts of the wheat belt may help to keep prices from dropping after the carrying out of the big order for 120 million bushels placed by the British Government.

Electricity in Travancore

The advent of hydro-electric power in Travancore as from March 1940 confers special interest on the latest report of the State's Electricity Department. Many towns, and

BHARTIA ELECTRIC STEEL CO., LTD.
42, SHIBTOLLA STREET, CALCUTTA
NOTICE

Patrons and Customers are hereby informed that by a special resolution dated the 28th day of August, 1941 the name of HUKUMCHAND ELECTRIC STEEL CO., LTD. has been changed to BHARTIA ELECTRIC STEEL CO., LTD. The change of name has been duly sanctioned by the Government of Bengal. This change of name does not involve any change in the administrative or technical staff (including European staff) which will continue as formerly to render the best possible service to all our customers.

BHARTIA CO., LTD.
Managing Agents.

Dated Calcutta, the 22nd Sept. 1941

companies too, have now changed over to the hydro-electric system. The extension of the telephone services now linked with the British Indian system also belongs to the M.E. 1115. The Pallivasal project was finished and the supply of power began last year. Power is transmitted at 6000 volts and the transmission system consists of 134 miles of 66 K.V. double circuit lines carried on steel towards connecting the generating station with five major substations at Kothamangalam, Alwaye, Pallam, Mavelikara and Kundara besides 26 miles of 33 K.V. single circuit line connecting Alleppey with Mavelikara. The main distribution comprises 130 miles of 11 K.V. single circuit and 8⅔ miles of double circuit lines covering a large portion of North and Central Travancore. All the municipal towns coming within the network of the Pallivasal supply were provided with low tension distribution. The total power generated during the five months of year 1115 amounted to 33.6 million units and except for minor disturbances in the early stages the supply was uninterrupted. Rural extension began at the same time as the supply to the eight municipalities began. The capital cost excluding interest charges amounted at the end of the year to Rs. 138.2 lakhs. The operating results for the first five months show that working expenses and interest exceeded revenue by Rs. 187,258 which deficit is met from the Electrical Reserve Fund. The deficit was due to the fact that it was not possible to connect important loads during the year. The progress of industry and the development of war supplies from Travancore must have increased the demand for energy and the State can count also on effective adequate power for the broadcasting scheme under consideration. Preliminary expenditure under the latter head amounted to Rs. 24,610 according to the adminstration reports. Industrial enterprises including two cotton mills turned to hydroelectric power now provided by the Pallivasal project and the K.D.H.P. Company's independent station at Munnar took power wanted as from April 15th 1940. The concurrent development of new sources which would take electrical energy was not overlooked. Experimental pumping for land reclamation projects, for lift irrigation and sugarcane crushing were tried with success and in certain cases the tariff was adjusted to encourage the use of electricity. A new plan for enabling private buyers to buy machinery using electric power on the hire purchase plan was taken up. A far more important development is the possibility of an aluminium smelter plant near Alwaye being put up in the State by the Aluminium Production Company of India. The Government of Travancore have agreed to provide the maximum power available from the Pallivasal Project and extension work was under preparation last year. A special Electrical Adviser was obtained by the State which had agreed to supply by July 1941 as much as 4500 k.w. of firm power. The agreement is of interest to British India which looks forward to the development of indigenous aluminium production in the near future.

Jobs for University Men

A large number of candidates for employment turned to the Calcutta University Appointments Board for assistance in 1940-41. The report recently issued shows that the Board continues to enjoy the co-operation of commer-

ELECTRICITY
makes life easier

Many people do not realize what a great difference a tall standard lamp, with a 100-watt bulb, can make to their health and comfort. In fact, most of us "put up with" bulbs of lower wattage when in fact the more powerful bulbs cost no more—or negligibly more—in current, although they save our eyes by giving so much more light. For reading, sewing, drawing and other pursuits demanding concentration, powerful light is essential if you are to avoid eye-ache and ill-health.

cial and industrial houses, and also draws attention to the fact that the University cannot produce as yet the number of technically qualified men needed for certain branches of industry that have expanded in consequence of the war. The latest report indicates also that the special Careers Lectures are bearing fruit, as efforts have been made to interest the jute and tea industries in the employment of University graduates. A scheme was placed before the Bengal Chamber of Commerce, and the first result was to let two Assam colleges respond to a request from a leading firm for two graduates who would prove suitable for its supervisory staff. The Board has asked the University to make a beginning as regards textile chemistry and for providing special instruction in branches of study connected with air conditioning. The report says that the industry has got very great scope in a tropical country. The Calcutta University has made provision for the teaching of such special subjects as lubrication, refrigeration and air-conditioning and definite syllabus have been prepared and received the sanction of the Government. Requests from the Government for providing suitable recruits for the Indian Air Force required naturally immediate attention and the Board furnished evidence for its belief that Bengali students had a special liking for the Air Force. A special Committee was appointed and the preliminary examination undertaken by the Board was of assistance to the candidates as also the recruiting authorities. This aspect of the Board's work, at a time when the armed forces of the Crown are being rapidly expanded, should attract further attention and the Board has hardly need to demonstrate its usefulness.

(Continued from page 695)

department and creating currency thereagainst.

6. In the latter half of the month, the Government are obliged to have recourse to ways and means advances from the Reserve Bank in order that they may cope with the large payments about to be made in connection with the war.

7. These ways and means advances are repaid out of the sterling receipts from the British Government at the end of the month.

And the process starts over again almost in the order in which we have stated. This has had the effect of initiating the continued process of currency expansion against sterling securities. There is a limit beyond which this process cannot be continued. The prospect of such a limit is in sight if payments in sterling from the British Government in the coming months prove to be as substantial as those for September.

The exchange market has been quietly steady, with business on a modest scale.

Banks were sellers of T. T. on London Ready up to 6 months forward at 1s. 5 31/32d, and banks were buyers of T. T. on London ready up to six months forward at 1s. 6 1/32d.

D.A. sight bills quoted 1s. 6 9/32d., for the third and fourth months.

Interbank call money remains unchanged at ¼ per cent.

Firms' money for call and short is quoted ¼ per cent and ½ per cent for one to four months.

EAST INDIAN RAILWAY

TENDER NOICE

The General Manager, East Indian Railway, invites sealed tenders for conversion of 472 tons of Scrap C & W white metal into an equivalent quantity of new white metal to I.R.S. Specification No. N 10-35 except in regard to impurities. Tender No. S/SP/701/Gb4/464/C with full particulars is available for sale from Controller of Stores' Office at Rs. 2/- per copy.

Opening date 12-11-41 at 12 O'clock noon.

"I must have liberty
Withal, as large a charter as the wind
To blow on whom I please."
—(*As You Like It*).

ANOTHER Price Control Conference has met at Delhi during the week. And, if we can judge by the speech of the Commerce Member in opening the session, the authorities are alive to the seriousness of the present position and are contemplating active measures to check the evil of soaring prices. Sir Ramaswami was naturally concerned to answer the charges that are made against the Government in respect of price control. These charges. however unfair they may be, are, to some extent, inevitable. For, when the Government is the principal beneficiary of any scheme of price control, it is naturally suspected of manipulating the machinery in its own interest. Sir Ramaswami has adduced sound arguments in proof of the Government's bona fides. But the fact remains that, though the war is in its third year, the problem of price control in the broad public interest has been taken up only now. The earlier conferences took a rather lofty and detached view of the question. And the Government's interest as a buyer of various kinds of materials was at times too obtrusive.

It must be said in fairness to the authorities that the evil of soaring prices also played a game of hide-and-seek. When the war broke out, there were frantic attempts on the part of petty traders and large scale speculators alike to catch time by the forelock and to make their profits before even the first shot was fired across the frontiers. It was a most unedifying orgy of selfishness. The authorities, too, displayed more zeal than discretion. The ordinance on prices was immediately availed of to launch prosecutions against a number of quite respectable men on charges of profiteering. An atmosphere of wholesome horror was probably sought to be created. But the means adopted were certainly questionable. In any case, fears of soaring prices proved soon to be somewhat overwrought. For petty traders and shopkeepers had been terrorised into just ways of dealing with their clientele. The larger speculators withdrew into their shell. And the general background of business conditions was made more sombre by the E. P. T. With the dawn of 1940 prices actually started on a downward trend; and there were many who thought that the Price Control Conference could only play the role of Don Quixote and tilt with windmills. In such circumstances, it was thought that the object of price control was only to secure unduly favourable terms for the Government of India and for those on whose behalf the Government was buying in this country. But the fact is that, so far as the Government is concerned, the dangers of profiteering lie not so much in the rise in the general price levels as in the capacity of industrialists and the contractors of war orders to get stiff terms on a variety of grounds. And this danger is better combated by the vigilance of the controllers of supplies and the regulation of conditions of supply of certain essential commodities than by price control ordinarily understood. To quote a concrete instance, the ordinance in respect of iron and steel does more to ensure supplies at reasonable cost to the Government than any fiat about the price of rice or wheat.

Price control has obviously two facets, one which affects the large body of consumers in the country, or rather if you prefer the economic abstraction, the consumer, and the other, the prevention of the kind of profiteering which victimises the Government in the first instance. The two do not represent by any means two water-tight compartments. For there is no such thing as Government apart from the taxpayers. And in a country in which indirect taxes form so large a part of public revenue, the consumer and the taxpayer may be deemed to be one and the same. What the Government lose on account of profiteering ultimately cuts into the pockets of the consumer; and since Government have to buy for war purposes many articles of ordinary consumption, the dangers to which the consumers are exposed also threaten the Government. Nevertheless, the fourth dimension does make a difference. Time and political sentiment may enable the average Indian to be somewhat indifferent to the losses of the Government on account of profiteering. And by the same token, he may resent conditions in which Government safeguard their own interest by the machinery of the

Supply Department, while leaving the consumer to his fate.

All these fears were naturally in abeyance when the price system seemed to have resisted the infection of war fever. I think the public did live too long in this feeling of false security; and it is only during the last few weeks that we have become keenly aware of the danger. Unless you are in the happy position of having every personal requirement of yours bought by somebody else, it can't escape your notice that the prices of all necessaries of life have been going up by leaps and bounds and will soon get well ahead of the means of many a middle class man. A pair of dhoties which you bought not a month ago at say Rs. 3-8 or Rs. 4 has now a rupee or two added to its price label. A maund of rice is shown in your grocer's bill with an addition in price of nearly 30 per cent. And so on and so forth. With Divali so near, with neighbouring foreign markets crying aloud for Indian cloth, with the home market virtually clear of foreign rivals, with war orders mounting up, cotton goods naturally head the list of offenders against the poor consumer.

It is as a social problem, the problem of living for the masses, that the Conference at Delhi is concerned with price control. For the problem, as it affects the purchases of Government on war account, must now be deemed to be of a more or less administrative character. For the broad principles of this control are by now well-established. The principle of limiting profits and granting contracts after scrutiny of costs has been put into force. It is not for me to say whether it has produced all the results that were expected of it. But the alternatives to this procedure would take us into wide realms of controversy and conjecture and such imperfections as there are must be capable of being eliminated by more rigorous administrative checks. It is only the problem of price control as it affects the masses that is far more complicated and is of far greater moment.

Here it is necessary that there should be clearer ideas about the nature of the problem and the background of general economic conditions against which it has to be viewed. The first point to note—and one which I find has not been mentioned in any of the discussions on the subject—is that, curiously enough, the wholesale price index for all commodities returned on the eve of the present war to the same level as on the eve of the last war. The base for the official wholesale index is July 1914 =100. And during the period April to August 1939 the index stood virtually steady at 100. I mention this point not merely to bring out this curious coincidence but also the fact that it is easy to compare the rate of rise in prices during the last war and the rate at the present time. During the last war, the index reached its peak of 201 in the year 1920; and the average annual index of the period was 112 in 1915 and for the following years 128, 145, 178, 196 and 201 respectively. The bulk of the rise in the last war came about only after its end, while at the present time the end of the second year of war has seen a rise to over 150.

It is not possible to institute a detailed comparison between the two, as the index figures for groups of commodities are not available. But it may be fairly ventured that the incidence of the rise in prices is more severe on the masses at the present time than during the last war. For it seems fairly clear that this time "war profits," such as they are, are not evenly distributed over all parts of the country or over all classes of the population. There is nothing like that demand for India's export staples which made the agriculturist seem, at least for the moment, a richer individual than he used to be. The growers of raw cotton or groundnuts are not realising a higher price for their products what time they are called upon to pay more for food, fuel and clothing.

The rise in prices during the last war was so distinctly inflationary that a fair guess might be made that the consumer loses no more in higher prices than what he gained for his product. That, of course, is only in the case of consumers who are also producers. But other consumers are not entitled to any consideration. That, however, is by the way. What I am concerned to stress is that, though there may be an element of inflation in the present rise in prices—for, after all, the increase in note and rupee circulation is as much as 100 crores since the outbreak of war—there are genuine economic causes behind the rise in the prices of most of the necessaries. Take the case of food. The rise in the price of rice is due in the first instance to the cessation of imports from Burma. And now the Burma Government's monopoly of rice exports from that country is a major factor in the rice market. Which means that we shall not know exactly where we stand. In the case of cotton manufactures a variety of causes have operated towards the same end. First, the disappearance of imports, then war orders and thirdly export demand, all these have increased demand so much that a rise in price is inevitable. At the same time, the hardships of this rise are accentuated by the fall in the purchasing power of the masses, by the difficulties of the growers of certain commodities like groundnuts. There is thus an unusual mix-up of genuine economic causes with what may be called the inflationary cause. The result is that economic conditions are extremely complex and the problem of price control highly complicated.

The Price Control Conference will fail of its task, if it is unduly ambitious either about the scope of its attempts or about what I may call the economic justice of the measures that it may adopt. The objective must be limited at the present stage to the protection of the consumer. It is no use asking whether in another view he is not also a producer, whether it is just that only certain commodities should have price limits set to them and not others, whether producers have not the right to make the most of the present conditions without being guilty of the grosser kinds of profiteering. All these questions may be debated on endlessly. But nothing can be said against the justice of limiting a further rise in the already inflated cost of living. So far as the working classes and the lower middle classes are concerned, it would perhaps suffice if the price of foodstuffs and of clothing are protected against unconscionable increases. Some ideas have already been formed about the control of the price of cloth. Sir Ramaswami Mudaliar has referred to the proposal to fix the price of standard cloth, by which is meant the cloth which is most needed by the masses. Cloth woven with yarns of 20 and below is believed to be most in demand. It is not clear why in a country, in which even the middle classes have lower standards of living than the working classes in foreign countries, the lower middle classes should be exposed to an uncontrolled rise in prices. For my part, I would prefer to see standard cloth defined as dhooties woven with yarn of 40's and below. It ought to include also plain shirting cloth of similar coarse texture. And the handloom weaver, who not only belongs to the working classes but is also a consumer of mill-made yarn, should have protection against high prices of yarn and shortage of supply of it. It can hardly be that the mill industry will be hit by this kind of protection for the consumer. For the mills produce 500 different varieties of cloth; and though demand will naturally gravitate to some extent to the protected varieties, there will be a wide field in which the laws of economics can have free play. The cotton textile industry cannot afford to forget that this is the first chance it has had ever since its inception to repay the help which the consumer has given to it for more than three decades.

The position in regard to food is more complicated. But at least in regard to rice, it should be possible for the Government of India by acting in consultation with the Government of Burma to regulate prices and make up shortage whenever and wherever it is felt. Above all, it is necessary that petty traders who create an atmosphere of scarcity and start inflating prices must have a wholesome fear of the law against profiteering.

(From Our Correspondent)

Simla, Oocober 14.

IT is difficult to assess the work of the National Defence Council which met for three days last week under the presidency of the Viceroy. Owing partly to the seal of secrecy placed over the proceedings, and partly to the hurried character of the conference itself, the public interest attaching to it has been comparatively little. So far as the members themselves are concerned, elaborate arrangements had been made to supply them with as much information as possible. Memoranda dealing with various aspects of India's war organisation had been previously prepared and supplied to the members in order to give them an idea of the complexity and the magnitude of the problems which the war had thrown on the country. This was supplemented by detailed addresses by Sir Homi Modi, the Supply Member, the Commander-in-Chief, the Chief of General Staff and other principal staff officers. Full scope was also given to the members to put questions to the officers concerned, to make suggestions and to explain their views, but though apparently there have been no undue restrictions placed on the subjects discussed or the freedom of the members to speak as they like, the practical usefulness of these discussions can only be judged in the future. If all that the conference succeeds in achieving is to keep its members informed of certain details of military policy and organisation which are not generally available to the public. It is hardly likely to enthuse the public, but if it has real opportunities of influencing the Government's Defence policy and shows, in actual result, its efforts to nationalise and galvanise this policy from the popular point of view, the advantage will be great indeed.

* * *

As the next meeting is due to be held early in December the interval can be utilised by the members to think out better and more effective ways for making use of the Council. One suggestion which has been made is that the Council should form subcommittees to study particular subjects in detail and make recommendations to the general body. For instance, a committee can be formed to suggest ways for economising Defence expenditure. It would also be useful to have another committee to consider the starting and development of new industries necessary, directly or indirectly, for the war effort. The example of Australia, to which Sir Bertram Stevens has repeatedly drawn attention in his recent speeches and statements, has a direct bearing on this question. An effort is reported to have been made by one of two members to persuade the Viceroy and his advisers that the present opportunity can be usefully exploited for founding the automobile industry in India. If as a result of the Council's advocacy this important industry is situated on a firm basis, it may serve as an auspicious start for the Council's work.

* * *

Certain interesting facts may be gathered from the seaborne trade figures for August which was issued last week. The United Kingdom's purchases of Indian merchandise show considerable improvement—an increase of over Rs. 3 crores in value during this one month alone as compared with the previous year. Another Empire country which has practically doubled its purchases from India is Australia. Taking all Empire countries together the total of exports has increased during the month to over Rs. 16¼ crores from only Rs. 9 crores in August last year. As regards exports to foreign countries, the position is practically the same as it was last year. Out of Rs. 5½ crores worth of Indian merchandise exported in August last nearly Rs. 2½ crores went to United States. Imports from Empire countries have risen during the month by over Rs. 3½ crores, but despite the large increase in India's purchases from the United States, the total of imports from foreign countries is just about Rs. 4¾ crores. So far as August is concerned India's exports of merchandise exceeded its imports by over Rs. 7½ crores, but taking the five months, April to August, one finds that imports have exceeded exports by nearly Rs. 2 crores. With the exception of one single month (January 1940 when India's exports went up to Rs. 23¼ crores), never since the war began has there been any month with a bigger export figure than August this year. Owing to strict import control and other factors the total of imports has been lowest in August during the current financial year in fact more than four crores less than the July figure.

THE
VC
THE VICTORIA CROSS, the highest decoration in the British Empire, is the symbol of supreme courage and self-sacrifice, and is worn before all other orders and medals. Instituted by Queen Victoria in 1856, it is the most highly-prized decoration which it is possible for any officer or man of the fighting services (and, in certain circumstances, civilians) to obtain. Of bronze, with a crimson ribbon, the Victoria Cross is awarded for signal acts of valour in the presence of the enemy.

(From Our Correspondent)

Bombay October 15

THE war publicity committee has broken new ground by arranging for a public lecture by an officer recently returned from Syria. The lecture was not the usual purdah function and a large audience sat down gladly to hear about the performance of Indian troops. It was told that Indian troops distinguished themselves in desert warfare and individual feats of gallantry were described in order to stimulate interest in what is happening abroad. Major Middleton Stewart's lecture was followed as usual by remarks from the chair. Sir C. H. Setalvad was concerned to point out that war was coming nearer to India's frontiers. He appealed for closer cooperation with the Government's work for defence, and added that if the war effort failed, Indian aspirations whether for independence, dominion status or pakistan would go in vain. The chairman's forcible remarks recalled observations made at the recent conference organised by the National Democratic Union.

Before the price control conference meets the Supply Department will be acquainted with the position as regards textile supplies. Those who go by reports that in distant Nairobi the prices of Indian piecegoods have risen by 50 to 60 per cent are not tired of pointing to the mass of war orders and the inadequacy of civilian supplies. As for the Supply Department, it is mainly concerned with prompt execution of orders given. There was a conference with the advisory panel set up in May. Millowners' representatives were there, and the Supply Member, who has asked the textile purchases office to be moved on to Bombay as from this week, explained what Government expects at present of the textile industry. The war demands a steady flow of supplies, but mills have many difficulties in providing them and they were asked as to how improvement can be effected. It was suggested that if all the cotton mills were to co-operate with Government in executing war orders at stated prices there would be no problem. The panel put forward the suppliers' view and no conclusion was reached at Monday's meeting, Brigadier Wood and his colleagues should be able to persuade millowners to give precedence more than ever to war orders and the Honorary Technical Adviser, Sir Fred Stones and millowners' representatives attended along with Mr. T. Maloney of the Textile Purchases Directorate.

The piecegoods market which looked like being on a good wicket suddenly developed nervousness. The fear of price control or the report that control of the textile industry would be attempted seems to lie at the bottom of the sudden change in sentiment. The bearish feeling in the cotton market accentuates the unsettlement produced by rumours now rife. Dealers also point to the fall in the value of Japanese goods though in this case, as in the case of Lancashire goods fresh supplies are unprocurable for obvious reasons. The piecegoods trade has at various times been sensitive to rumours, and the Supply Member's recent discussions, therefore, gave rise to the suspicion that prices of cotton goods would be selected for control. Mill goods generally are lower in prices and it seems as if Moorat business will be disappointing in view of the uncertainty over prices. Calcutta dealers who had bought previously emerged as sellers, and it is only in the case of better types of bleached goods and fancies that the undertone is steady. The standard lines are quoted at lower rates and war news too has of late undermined optimism which is likely to recede further in view of demands heard frequently in Madras that Government should put yarn prices down in order to limit the rise in prices. In spite of the report that Government will issue orders in 1942 for the same quantity of goods as in 1941 the market here is facing both ways. Instructions to mills to reserve 25 per cent of production equipment for the war supplies as suggested in Calcutta are not viewed as an advantage at present.

Rice merchants have registered disappointment in connexion with the plans of the Burma Government to monopolise the rice trade. The conference held last week was truly representative of Indian commercial interests. It was stated that the Burma ricegrower's interests would not be neglected by Indian merchants who merely asked that their long-standing business should not be wound up by an arbitrary fiat. Resolutions approved by the conference detailed the grievances and asked for early revision of the Burma Government's decision to become the sole buyer of rice on f.o.b. terms and shipper on c.i.f. terms. The proposed interference with the normal flow of trade is resented on many grounds and the various Associations of Indian Merchants have told the Rice Controller flatly that they will not consent to their elimination. Many speeches, full, forceful and fluent, were made and the support promised by the Federation of Indian Chambers of Commerce has put the claim on a very firm footing.

A Resume of Commodity Markets

THE anxiety regarding the outcome of the Price Control Conference, the deterioration in the war situation and the various rumours regarding the fixation of maximum prices and the ban on exports of certain staple commodities have naturally had a restraining influence and prices tended to fluctuate irregularly in a rather downward course. But having regard to the smallness of the volume of business passing and the seriousness of the war situation the behaviour of the markets should be considered quite satisfactory.

One significant feature of the week's trading is the absence of activity in the bullion market. Usually, there would have been a rush for buying for hoarding purposes. It will be remembered that in the middle of last year there was a sensational rise in prices in both the silver and gold markets. No such nervous buying is in evidence in the markets at the present moment.

Speaking at the Price Control Conference in Delhi on Thursday, the Commerce Member said that the need for control of prices was greater than ever. Following the 'freezing' order there has been a rapid rise in prices not only for cloth but also for other articles. In the earlier two conferences it was agreed that the agriculturist should be allowed to get a price which was more than normal having regard to the lean years he experienced before the outbreak of the war. But the stage had been reached at which it was necessary that the consumers' interests should be protected. The decision of the Price Control Conference in this regard should be interesting.

Jute:—

The improvement in prices following the announcement of the increase in mills working hours has been short-lived. There have been various rumours regarding the possibility of the fixation of maximum prices for jute manufactures which should tend to have a restraining on jute prices as well. There is also considerable speculation regarding the Government's restriction policy for 1942-43. The statement made by the Bengal Premier that no decision has been reached regarding the next season's acreage has not had any effect on the market. The latest developments in the Far Eastern situation also should be regarded as unfavourable to the market as the truculent attitude of Japan might bring the war nearer to the shores of India and will affect the supply routes in the Pacific.

Jute Manufactures:—

In the absence of enquiry and with the increase in the number of working hours the hessian market was inclined to be easier. The rumours regarding the possibility of fixation of maximum prices for hessians have been the main disturbing influence. It is reported that the United States Government have approached the Indian Government and asked for the fixation of maximum prices around the 'ceiling' fixed in the U.S.A. There have also been complaints regarding the shipment of goods to the United States. The good enquiry for light hessian cloth and the reports regarding a new order for narrow hessian cloth have resulted in a slight rally in prices towards the close. The United States consumption figures for September indicate that the slight decline in the figure for August was only temporary for in the previous month there was some rush for buying with the fears regarding the Far Eastern situation. The easier freight position is also reflected by the substantial increase in stocks afloat.

Cotton:—

The Bombay raw cotton market was rather weak till Wednesday. In Thursday's session there has been a sudden return to activity and all the lost ground has been regained. But whether the late rally in prices will be maintained in view of the latest crisis in the Far Eastern situation remains to be seen.

Piecegoods:—

The piecegoods market has been rather inactive with the erratic tone of the raw material market and the inclination of buyers to await the outcome of the Price Control Conference. Referring to the problem of controlling the prices of manufactured goods as well as primary products the Commerce Member said that it had assumed importance at the moment as in June, July and the following months, particularly after the 'freezing' order with reference to Japan, prices had a strong tendency to rise sharply. "But the problem of control or regulation of manufactured goods like the textile goods" he added "was very different from the problem in relation to primary products. To attempt to regulate the price of even one of the 500 varieties of cloth produced in India by various mills was a task which was beyond the realm of possibility. That did not mean that something could not be done in order to ensure that the poorest among us could get clothing at reasonable prices.

"One remedy considered during the last war was the production of a "standard cloth" made out of yarn below 20's and to be sold at a fixed price. Could that remedy be applied at the present moment? Or had we advanced so far in "civilization" that standard cloth would be anathema to the poorer classes? In any case the suggestion had been made that standard cloth or a few varieties of standard cloth might be put on the market. If the suggestion was approved by the conference, questions such as provincial and states governments buying the cloth at fixed prices and disposing of them to the poorer classes would have to be considered at the conference."

The control of prices of yarn, said the Commerce Member, was an equally complicated question. In order to assist the conference in discussing the questions relating to textile goods, he had asked presidents of a number of millowners Associations to attend the conference.

Jute and Jute Manufactures

Calcutta, October 16.

THE statement to the Press by the Bengal Premier a few days ago on the subject of the regulation of the Jute crop for the coming year was by no means helpful. It amounted merely to an assurance that no decision had yet been taken by Government as to the fixation of Jute acreage. When the subject is known to be under discussion it is impossible to suppress interest in it, and so long as no decision is arrived at, such interest must of necessity be speculative. It is obvious therefore that the quickest way to suppress mischievous rumours and to put a stop to speculative market movements engendered thereby is to come to a decision on the subject. We venture to suggest that the Government has as much data before it now as it is likely to have two or three months hence, and no purpose is served by delaying a decision. It is to be hoped however that Government will take the long view in this matter. We have stressed the point that an ample supply of the raw material is of paramount importance to the welfare of the Jute Industry, and consequently to the welfare of Bengal, even if it should be considered necessary or desirable to support the price artificially at an adequate level to secure to the cultivator a proper return. Any shortage of jute at a time when it might be urgently needed would be a catastrophe both for the trade and for the Province. Also it has to be borne in mind that Providence not seldom adopts the role of Crop-Restrictor without regard to what temporal governments may be doing in the matter. A margin of safety is therefore essential and the Government might well take for their motto in this matter—better to be safe than sorry.

Mills are now working 54 hours per week and while this is fixed only up to 31st December for the present, the presumption is that 54 hour working will continue right up to the end of the season, 30th June 1942. On that basis Mills consumption will work out to just about 70 lakhs of bales during the working season 1941-42. Mills carried in an adequate stock into this season and if they purchase their full years requirements, they will carry out the same volume of stock. What the export markets will absorb it is not so easy to estimate. It might be more accurate to say—what shipping space will be available for export jute, but the immediate prospects in this direction are not so gloomy. With freight available, export might absorb 20 lakhs of bales, so we have to look to the current crop *plus* the carry-over to provide say 90 lakhs of bales. The Chairman of the Mills Association gave us the assurance that there was ample jute in sight for all probable requirements and this view is generally accepted as correct. But at the same time the 30th June 1942 may see us with very little stock of jute beyond what may be held in Mill godowns. That is why we submit that Government ought to take a liberal view in deciding on the acreage to be licensed for the coming year. The cultivator is on velvet at the moment and there is no immediate sign of any serious break in prices of raw jute. What speculative decline there has been, whether due to the Ministers' indecision in the matter of jute acreage or from other causes, has been confined almost wholly to the speculative market, the Fatka, and has been reflected only to a very minor degree in the mofussil. So *pace* the Premier, it has not been to the detriment of the cultivator. All the same, a prompt decision in this matter, whatever figure is decided upon, is likely to do less harm than a prolonged period of suspense.

Following on the adoption of 54 hour working, the Fabrics market has received another shake on reports of impending fixation of maximum prices for hessians. It has been sticking out for some time that the U.S.A. after fixing ceiling prices for New York spot goods, would not be regarding with equanimity the soaring rates recorded recently for ready hessians in Calcutta. It would now appear that the Govt. of India has been approached with a view to controlling hessian prices here in relation to the ceiling prices in New York, and it is understood that discussions are to take place in Delhi on the subject next week. The Bazar has it that the controlled basis will be Rs. 17-8 for 8oz.-40. This, while much below the rate even now ruling and a drastic cut from the peak level recently registered, would show mills at Rs. 800 per ton a satisfactory margin of profit even if jute prices were no lower than at present. It is also on record that Australia has been voicing dissatisfaction at the ransom rates she has been asked to pay for Calcutta goods on occasion recently. If the U.S.A. is to be accommodated, it would not be unreasonable that Commonwealth markets should also receive consideration, and it would be satisfactory to know that the whole position, including the suggestion put forward in these columns last week regarding a pool of goods for post-hostilities distribution of foodstuffs etc, would be reviewed by the Central Government in consultation with representatives of the Industry.

In the Export Jute market there has been little demand for public marks, though enquiry for private marks and Tossa continues. A considerable trade in pucca bales has been put through with mills, first at Rs. 72 for First marks and later at Rs. 70. Lightnings sold at Rs. 62 and Rs. 63. The Futures quotation has been erratic and tending lower. The highest point was Rs. 72 near the opening, then hovering on either side of Rs. 70 for a bit, it finally dipped to Rs. 67-4 to close at Rs. 68-8.

Business in Loose Jute has not been extensive, with sellers always in evidence. European packing has sold at Rs. 17-8, Rs. 15-8 and Rs. 12-8 for Tops, Middles and Bottoms with sellers over at the close. Indian District Middles alone sold at Rs. 13-8 but later business was done in assortment at eight annas less.

JUTE

Calcutta, October 16.

The weakness of the jute manufactures market, the deterioration in the war situation and the report that henceforth imports to the United Kingdom will be through the jute controller have been responsible for the downward tendency of the jute market. Mills have been buying in very small quantities and more jute has been coming into the market. Shippers have been uninterested buyers and quotations as such have been fluctuating in narrow limits.

In the loose jute section sellers have been anxious to do business and there has been a further decline in prices. Mills have been buying only in small quantities. Holders are even prepared to discount prices. Quotations are nearly one point lower. Indian Jat, Tops, Middles and Bottoms were done at Rs. 16, Rs. 14 and Rs. 11 respectively against Rs. 16/12, Rs. 14/12 and Rs. 11/12. District jat is available at twelve annas lower. Balers are reported to have bought Tossa varieties at varying rates.

In the pucca bales section shippers have not been interested buyers. Mills are reported to have bought new crop Firsts and Lightnings at Rs. 70 and Rs. 62 per bale respectively.

In the futures market a rather downward tendency has been noticeable and closing quotations are nearly four points lower on balance. The quotation is only slightly higher than the lowest level for the week at Rs. 68/12.

JUTE MANUFACTURES

Calcutta, October 16.

The jute manufacturers market has been uninteresting during the past week. There has been a regular decline in prices. The anxiety regarding the war situation and the rumours regarding the possibility of fixation of maximum prices by jute mills had a depressing influence and the lowest levels for the week were touched on Thursday. There has been a slight recovery towards the close on reports regarding the receipt of an order for narrow hessian cloth. 9 porters ready are now quoting Rs. 23, November Rs. 21/4, December Rs. 20/4 and January-March Rs. 18/4. The quotations at the time of writing last were Rs. 24/6, Rs. 22/4, Rs. 21 and Rs. 19/8 respectively. It will be noticed that the decline in the quotation is more pronounced for the near positions. 11 porters ready are Rs. 27/2, November Rs. 25/14, December Rs. 24/10 and January-March Rs. 22/8.

In the heavy goods section a very small volume of business has been passing and quotations are appreciably lower. B Twills for October shipment sold on the basis of Rs. 38, Heavy Cees Rs. 38, Liverpool twills Rs. 47, A twills Rs. 50 and Cornsacks Rs. 41.

The U. S. stock and consumption figures for September should be considered rather encouraging. Consumption for last month shows an increase of 3 million yards over the figure for the previous month and the corresponding month last year at 63 million yards.

The easier shipping position is reflected in the stocks afloat which are substantially higher at 103 million yards against 72 million yards in the previous month. Stocks spots are lower at 110 million yards against 126 million yards.

As a result of an increase in the number of working hours production during the month of September is higher.

COTTON

Calcutta, October 16.

The Bombay raw cotton market has been very weak and a further substantial fall in prices has been recorded. The absence of any large mill buying and export buying together with the fears regarding the possibility of a conflict in the Far Eastern situation were depressing factors. The New York market also was erratic. Mills are not keen to enter the market at the present moment as they are carrying sufficient stocks. As far as exports are concerned, there is no possibility of an improvement in exports with the present economic blockade against Japan.

Broach April-May are quoting Rs. 211/12, Oomra December-January Rs. 161/8, March Rs. 165 Bengal December-January Rs. 136 and March Rs. 136.

The New York market has been rather erratic. The publication of the Bureau estimates indicating a higher yield have had a discouraging influence. Closing quotations are only slightly higher than the lowest quotations for the week. In New York, October were 16.62 cents and December 16.84 cents. The Bureau report issued on October 8, 1941, estimated the crop at 11,061,000 bales against the September estimate of 10,710,000 bales.

GOLD

Calcutta, October 16.

The Bombay gold market was inclined to be firmer in mid-week. With the deterioration in the war situation the quotation was marked higher at Rs. 42/3/6 but in the absence of any arbitrage business, prices have again been marked down. Gold ready closed at Rs. 42/2/9 and first and second settlements at Rs. 42/3.

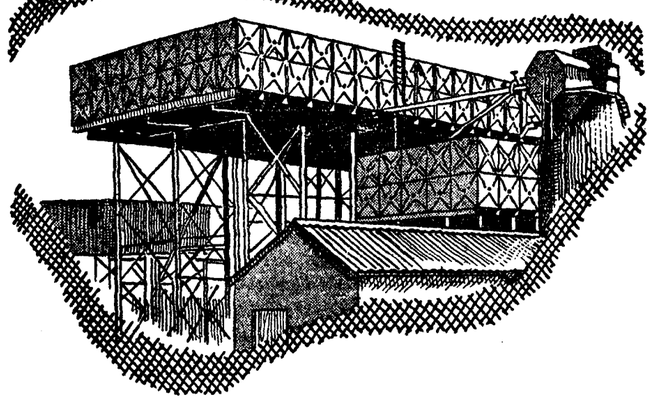
The London price is unchanged at 168s.

SILVER

Calcutta, October 16.

The silver market has been rather weak. Though quotations for ready position have been maintained at previous levels, there is a decline in the quotations for forward positions. Even the firmer tone of the gold market was not helpful. Indian Mint Silver ready are quoting Rs. 63, First settlement Rs. 62/13 and Second settlement Rs. 62/13 against Rs. 63, Rs. 62/15, and Rs. 62/5 respectively.

In the London market there has been very little doing and quotations have remained unchanged at 23¾d. for spot and Rs. 23 7/16d., forward. Small trade buying has been satisfied by official selling.



WHEAT

Calcutta, October 16.

After earlier weakness a firmer tone has been noticeable in the Karachi wheat market during the last three days. Resumption of export buying and greater mill buying have been mainly responsible for the improvement in values. The earlier weakness was due to bull liquidation and the report that the Government were arranging for import of wheat from Australia. Greater interest has been shown in new crop positions and the rise in the quotations for July position is more than proportionate. Choice White Ready are quoting Rs. 40/7, November Rs. 40/6/6, January Rs. 40/7 and July Rs. 34/7/6.

With the larger arrivals from U. P. the Calcutta market is easier, Cawnpore ready being Rs. 5/3 and May Rs. 4/13/6.

BURN & COMPANY RESULTS

The developments during the week have obviously been discouraging in the opinion of the stock market.

The sudden deterioration in the war situation in Europe and the resignation of the Japanese Cabinet have caused much anxiety. There has also been keen speculation regarding the possibility of fresh taxation. Writing on the last occasion it was remarked that a weaker tone was noticeable, and there has been some realisation. The continued advance of the Germans caused a further recession in values. The rumours that there will be no increase in taxation at an early date caused a reversal of the trend for some time. In Thursday's session Indian Irons and Steel Corporations improved to Rs. 32-6 and Rs. 19-11 respectively but the resignation of the Japanese Cabinet and the change of the Russian capital to Kazan have caused a relapse in the markets. Indian Irons and Steel Corporations were quoted at Rs. 31-11 and Rs. 19-4 on Friday morning. Surprisingly enough there has been a slight recovery to Rs. 31-14 and Rs. 19-8 respectively in the afternoon. While there is still genuine anxiety regarding the outcome of the present war situation, it is quite satisfactory to note that there has been no panicky selling.

* * *

The shares of *Jessop and Company* are listed on the Calcutta Stock Exchange as from this week. Initial official transactions began at Rs. 20-8 for the ordinary shares and at Rs. 116 for the preference shares. There was good buying of both the shares. The preference shares are higher at Rs. 119-8. The ordinary shares should be quoting much higher but for the general weakness of the market.

* * *

Last week there were fears that there would be Government control of the cotton textile industry. Considerable difficulty was being experienced by the Government regarding the supply of war orders. It is satisfactory to note that as the result of several meetings between the recently appointed panel of all-India millowners and Supply Department representatives, a satisfactory decision has been reached concerning the immediate requirements of Government for war supplies. As regards the long-term policy and the requirements of war supplies for 1942, the panel members have undertaken to assist the Government up to the limits of their respective manufacturing capacities.

* * *

As usual, the *Bally Jute Company, Limited* has come out first with its balance-sheet for the half-year ended September, 1941. Thanks to the vastly improved conditions in the industry, and a larger volume of sales, it has been possible to report a substantial rise in earnings. The net profit, before providing for taxation and depreciation, is the highest for any half-year since the war began, being Rs. 10,27,473 against Rs. 2,96,769 for the previous six months and Rs. 9,38,074 for the corresponding period in 1940. Owing to the large provision for taxation it has, however, been not possible to recommend a substantial increase in the ordinary dividend. After allocating Rs. 6,60,000 (Rs. 25,000) to Taxation and Special Reserve and setting aside Rs. 70,000 (same) to depreciation, the dividend is higher at Rs. 10 per share against Rs. 8 per share. The amount carried forward is higher at Rs. 87,458 against Rs. 59,984 brought in. The shares at present quoting around Rs. 256 afford the very attractive yield of over 7.75 per cent. tax-free.

* * *

The reduction in the ordinary dividend of *Burn and Company, Limited* for the year ended April, 1941, has come as a great surprise to the market. For, it was generally expected that with large war orders forthcoming it would be possible to report a higher level of earnings and secure an increase in the ordinary dividend. But owing to difficulties in obtaining imported materials to complete the jobs, the annual turnover was smaller than in the previous year.

It is satisfactory to note, however, that the order-book is in a very good state and works-in-progress at the end of the year were considerably higher at Rs. 100.80 lakhs against Rs. 54.27 lakhs at the end of 1939-40. On this count alone the prospects for the current year must be regarded as satisfactory.

The net profit, before providing for depreciation and taxation, is appreciably lower at Rs. 28,02,155 against Rs. 37,51,443 for 1939-40. Owing to the increase in taxation, it has been necessary to provide the same amount for taxation, the provision on this account being Rs. 13,35,670 (Rs. 13,05,071). The The amount set aside to depreciation is lower at Rs. 3,36,708 (Rs. 4,08,905). There is no allocation in respect of Works Reconstruction Scheme. The allocation in this regard last year was Rs. 5 lakhs. The dividend on the ordinary shares is lower at Rs. 25 per share against Rs. 30 per share. The amount carried forward is smaller at Rs. 1,00,517 against Rs. 2,01,739 brought in. According to the report the multifarious resources of the company's workshops are being increasingly utilised by the Government for the outturn of essential war supplies.

The works at Ranigunj have been very busy during the whole year, principally in supplying material for key industries of vital importance. Demand for other products was satisfactory. A scheme of remodelling a portion of the Jubbulpore Works has been taken in hand.

The ordinary shares, which are at present quoting around Rs. 410 *cum-dividend*, should be considered attractive as the return even with the lower dividend is over 6.25 per cent. tax-free.

* * *

As a result of a larger number of working hours, it has been possible for the *Chitavalsah Jute Mills Company, Limited* to report a big increase in earnings for the half-year ended June, 1941. Against the permissible weekly working hours under the Indian Jute Mills Association's Working Agreement, namely 45 hours, the mills worked 54 hours per week thus continuing to make up the time lost during the strike of 1939.

The net profit of Rs. 4,81,195 for the half-year has enabled the debit balance of Rs. 4,86,651 brought in from the last accounts to be reduced substantially, the debit balance at the end of June, 1941 being Rs. 5,457 only.

The arrears of dividend on the 7 per cent. cumulative preference shares are to be paid from July 1, 1937. As the prospects for the current half-year are taken as satisfactory it will be possible to pay off the entire arrears of dividend. There has naturally been a jump in the quotation for the preference shares to Rs. 152. There is further scope for appreciation as the shares are much better than Hukumchand 7 per cent. shares standing at the same level.

WATCH-DOG.

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, October 17.

WITH the Germans near the walls of Moscow and the fears regarding taxation a rather weak tendency was noticeable in the several sections on the Calcutta Stock Exchange till Wednesday evening. In Thursday's session a firmer tone was noticeable on reports that there was to be no early increase in taxation. But the late rally has been only short-lived for with the reports regarding the shifting of the Russian capital to Kazan and the resignation of the Japanese Cabinet there has been some selling and quotations are around the lowest levels for the week. The situation in the Eastern Front is rather grave and the attitude of Japan has been menacing. Operators and investors alike are naturally anxious to lighten their commitments. There is general anxiety regarding the war situation and only if there are favourable developments can any material improvement in values be expected. There has been no panicky selling so far.

In spite of the weakness of the other sections the giltedged securities section has remained rather steady and quotations are more or less unchanged. Among non-terminable loans, 3 per cent. Paper were done at Rs. 82-9 and 3½ per cent. Paper at Rs. 96. Among terminable issues, 3 per cent. Defence Bonds were Rs. 102, 4 per cent. 1960-70 Rs. 110-8, 5 per cent. 1945-55 Rs. 111-4 and 4½ per cent. 1955-60 Rs. 114-10. Easy money conditions continue to prevail and there has been a decline in the treasury bills rate from ten annas seven pies per cent per annum to ten annas six pies per cent per annum.

Business in fixed interest securities is restricted on account of the scarcity of offerings. Among public bodies' debentures, 3 per cent. *Calcutta Municipal* debentures 1956 were done at Rs. 106-12. Among industrial debentures, 5¼ per cent. *Rohtas Industries* debentures were noted at Rs. 106-2. Jute Mills preferences have been in keen demand. *Bally* preferences were done at Rs. 170, *Birla* at Rs. 140, Adamjee at Rs. 163, *Howrah* at Rs. 173. *Kankinarrah* at Rs. 156-8 and *Hukumchand* at Rs. 155. *B. I. Corporation* were dealt in at Rs. 182-8. *Jessop & Company* are higher at Rs. 120 while *Steel Corporation* have been steady at Rs. 124.

Cotton shares have remained unchanged. There would have been an improvement in the values for the shares but for the uncertainty regarding the war situation. The news regarding the conclusion of a satisfactory agreement between the millowners and the Supply Department should prove to be favourable to the industry. It was feared that the Government would take over control of the industry if they failed to reach any agreement with the millowners. *Cawnpore Textiles* are quoting Rs. 9-12, *Bowreah* Rs. 340, *Elgin* Rs. 27, *Kesoram* Rs. 8-8 and *Mohini Mills* Rs. 16.

Jute shares have been rather uninteresting and quotations have been fluctuating in narrow limits. The weakness of the jute manufactures market has not been helpful. *Howrah* are quoting Rs. 56-14, *Adamjee* Rs. 28-4, *Alliance* Rs. 343, *Anglo-India* Rs. 382, *Clive* Rs. 28-7, *Hukumchand* Rs. 13-3, *Kamarhatty* Rs. 520, *National* Rs. 24-12 and *Nuddea* Rs. 70. The accounts of the Bally Jute Company Limited for the half-year ended September, 1941 are very satisfactory and there has been an increase in the ordinary dividend from Rs. 8 to Rs. 10 per share.

In the Engineering section, a rather downward tendency was noticeable till Wednesday. From Rs. 32-12 there was a decline to Rs. 31-14. There was a subsequent recovery to Rs. 32-6 but selling this morning has again brought down the rate to Rs. 31-10. *Steel Corporation* also are ten annas lower at Rs. 19-4. *Burn & Co.*, on the other hand, have remained quiet being quoted at Rs. 420-8 throughout the period. *Bhartia Electric Steel* were Rs. 17-9, *Braithwaite & Co.* Rs. 9-14 and *Kumardhubi Engineering* Rs. 5-9.

Sugar shares are easier with *Cawnpore* quoting Rs. 23-12, *Carew & Co.* Rs. 12, *New Savan* Rs. 11-8 and *Ramnugger* Rs. 10-4. *Raza* and *Buland* are steady at Rs. 22-4.

Tea shares have continued firm and the popular shares have been absorbed. *Bhatkawa* were Rs. 54, *Hansqua* Rs. 12, *Hantapara* Rs. 414, *Hasimara* Rs. 48-8, *Hattikhira* Rs. 22-13 and *Kalacherra* Rs. 82. *Patrakola* were higher at Rs. 990.

In the miscellaneous section, *Burma Corporation and Indian Copper Corporation* were dealt in at Rs. 4-9 and Rs. 2-4 respectively. *B.I. Corporation* were Rs. 4-14, *Bararee Coke* Rs. 28, *Dunlop Rubber* Rs. 41-12, and *Aluminium Corporation* Rs. 12-10. Among Paper shares, *Titaghur Paper* were Rs. 21-14, *India Paper Pulp* Rs. 153, *Orient Paper* Rs. 15-8, *Mysore Paper* Rs. 17-7 and *Shree Gopal Paper* Rs. 14-8. *Borooah Timber* were steady at Rs. 19-4 and *Ruby General Insurance* at Rs. 9-10.

Towards the close of the week, however, prices were marked up as Textile shares were again favoured by operators. *Bombay Dyeing*, after opening at Rs. 1,280, showed a rise of about 25 points to close at Rs. 1,305. *Central India* met with business at Rs. 402; *Century* at 450; *Colaba* at Rs. 212; *Gokak* at Rs. 254; *Kohinoor* at Rs. 522; *New Great* at Rs. 340 and *Swadeshi* at Rs. 414. In the Cash list, *Khatau Makanji* were done at Rs. 223-12; *Sholapoor* at Rs. 5,150 and *Vishnu* at Rs. 1,490.

Hydro-electrics: Andhra Valley closed at Rs. 1,780 as against with Rs. 1,800 in the previous week and *Tata Power* at Rs. 1,770 against Rs. 1,820. *Tata Hydro* were unchanged at Rs. 193.

Steels: With operators focussing their attention on textile shares and with demand for steel shares in the local market slack, the turnover in this section was limited and prices moved within a narrow range. *Tata* ordinaries and deferreds, after opening at Rs. 392 and Rs. 2,048-8, closed at Rs. 399 and Rs. 2.095 respectively.

Banks: Bank shares were remarkably steady, *Bank of India* being done at Rs. 148-8; *Central Bank* at Rs. 50; *Imperial Bank* fully paids at Rs. 1,607-8; contributories at Rs. 400 and *Reserve Bank* at Rs. 108-8.

Miscellaneous: Bombay Burmah Trading, after being done lower at Rs. 516, closed better at Rs. 530. There was some speculative enquiry for forward delivery in *Associated Cement* and the price ruled steady at Rs. 160. *Belapur Sugar* were done 251-8 and *Shivrajpur Syndicate* at Rs. 45-4; *Premier Construction* at Rs. 127; *Indian Iron* at Rs. 32-5 and *Steel Corporation* at Rs. 19-11. *Scindia Steam* were a dull counter on news that the directors of the Company have decided only to maintain the dividend for the year ended 30th June, 1941. *Tata Oil* were unchanged at Rs. 62 and *Tata Chemicals* at Rs. 51. *Wimco* have shown a slight rise in the price to Rs. 220.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, October 16.

Money: Call money continued to be quoted at ¼ per cent.

Securities: Business in the securities market continues to be restricted. Prices remain practically unchanged, 3½ per cent Paper being done at Rs. 96. 1948-52 were quoted at Rs. 97-14; 1951-54 at Rs. 99-13; 1963-65 at Rs. 95; 1947-50 at Rs. 103-4; 1960-70 at Rs. 110-8; 1945-55 at Rs. 111-4 and 3 per cent 1946 *Defence Bonds* at Rs. 102.

Shares: This has been a week of political events. The market was in a constructive mood on good buying by speculators and investors till last Saturday. On Tuesday this week, however, the market opened hesitant on reports that the Russian position was rather serious. Consequently, there was liquidation which brought about a decline in values. Prices on Wednesday, however, developed a rising tendency on some support and the absence of sellers and there were good gains towards the close. With realisation appearing at higher levels active security prices again developed a reactionary tendency and receded to about the opening levels. The closing tone was definitely easy on further reports that the German pressure on Moscow was becoming more intense coupled with the news of the resignation of the Japanese Cabinet.

Textiles: The weakness of raw cotton and developments on the Russian war front caused prices to recede to some extent at the opening.

MADRAS STOCK EXCHANGE

(*From Our Correspondent*)

Madras, October 16.

The local market was generally steady though prices in some sections were slightly marked down. Business in cotton mill shares was on a reduced scale, while planting issues had a fair turnover.

Securities: Giltedged securities have remained very firm, 3½ per cent Paper changing hands at Rs. 96-4 s.l. 3 per cent Paper came in for business at Rs. 82-12 and 4 per cent 1960-70 at Rs. 110-12. No business took place in State Loans owing to the absence of sellers. Among Provincial Loans, 3 per cent 1953 *Madras* were done at Rs. 99-4.

Mills: In the absence of sellers *Buckingham & Carnatic* remained unchanged at 279 and *Madura* at Rs. 43-8. *Vasania* were a good feature at Rs. 138-8. *New Victoria* were crossed at Rs. 4-3-6 and *Kohinoor* at Rs. 511-4 Nov. Two weeks back it was mistakenly given that *Kothari Textiles, Limited* had declared a maiden dividend of six per cent for the year ended June, 1941. In fact, the maiden dividend of 5 per cent. was declared for the period ended June, 1940.

Utilities: The shares in this section were in general demand throughout the week under report. *South Madras Electric* ordinaries were slightly higher at Rs. 14-12, while the 4½ per cent Debentures were done at Rs. 101-12. *Kumbakonam Electric* were done at Rs. 11-8; *Salem-Erode* at Rs. 13 c.d. and *West Coast* preferences at Rs. 10-9.

Plantations:—The demand for Rubber shares continued to be in evidence resulting in a heavy turnover. *Tropical Plantations* were constantly changing hands at Rs. 22-2. *Midland* were marked at Rs. 8 x.d. *Kalpetta* and *Velliamuttam* had buyers at Rs. 24-8, while *Ayer Manis* preferences were on offer at Rs. 101. *Cochin Malabar* were, however, slightly lower at Rs. 8-12 c.d. Among Tea shares, *Peermade* Tea were wanted at Rs. 30-12 with no sellers in evidence. *Peria Karamalai* and *Highland Produce* were in good enquiry at Rs. 18-12 c.d. and Rs. 29-12 c.d. on the declaration of the dividends of 5 and 10 per cent respectively which are the same as last year. *Chembra Peak* were unchanged at Rs. 5-5.

Sugars: Mysore Sugar showed no change at Rs. 52-8. *Deccan Sugar* big shares were placed at Rs. 225.

Banks: Indian Bank small shares were in good demand and advanced to Rs. 57. There was some enquiry for *Central Bank*, changing hands at Rs. 49-8. *Reserve Bank* met with business at Rs. 108.

Miscellaneous: Mysore Chemicals were a dull market at Rs. 18-2 as the dividend of 6 per cent per annum, declared for the year ended 30th June, 1941, is not up to market expectations. But the report is decidedly impressive. *Singareni Collieries* were marked higher at Rs. 11-4. *Mysore Paper* were unchanged at Rs. 17-12, while *Orient Paper* changed hands at Rs. 16-1. *Andhra Cement* came in for attention at Rs. 89. *Mysore Tobaccos* were marked at Rs. 11-14 and *Mysore Lamp* at 12 c.d.

LONDON STOCK EXCHANGE

The latest developments in the war situation have had a discouraging influence. Earlier in the week a rather iregular tendency was noticeable. Oils were the exception being firm on the expropriation discussions. During the last two days, however, all the ground gained has been lost and *Anglo-Iranian* particularly are weak. Among giltedged securities, 3½ per cent. India Sterling Paper is unchanged at 99 but British funds are lower with 2½ per cent. Consols quoting 82 1-8, 3½ per cent. Conversion 105 15-16, 3 per cent. War Loan 101¼ and 4 per cent. Victory Bonds 113¼.

Among other sections, Tea shares have been barely steady while Rubber issues are lower with the fears regarding the Far Eastern situation. Kaffirs are slightly easier while Oils after earlier firmness have been marked down on selling. *Anglo-Iranian* were 38s 6d. *Mexican Eagle* are again quoting at the former levels. Home Rails are weak.

NEW YORK STOCK EXCHANGE

Wall Street has been dull and uninteresting. Operators and investors alike are watching developments. *U.S. Steel* were $51 5-8 *Anaconda Copper* $25 1-8 and *General Motors* $39¼.

THE NUDDEA MILLS COMPANY LIMITED

NOTICE

Notice is hereby given that the Half-yearly General Meeting of Shareholders will be held at the Registered Office of the Company, No. 2, Fairlie Place, Calcutta, on Tuesday, 18th November 1941 at 12-5 p.m., for the following purposes:—

(1) To receive and consider the Directors' Report and the accounts for the half-year ended 30th September 1941.

(2) To declare a Dividend.

COMPANY REPORTS

AHMADPUR-KATWA RAILWAY COMPANY, LIMITED

..	Year ended March. 1941	1940	1939	1938
	Rs.	Rs.	Rs.	Rs.
Gross receipts ..	1,12,603	1,17,788	1,06,449	99,394
Working expenses including Commission, etc. ..	1,42,734	1,37,331	1,25,321	1,22,398
Net profit	—30,131	—19,543	—18,872	—23,004
Amount received from Govt. ..	76,118	70,456	69,783	74,492
Dividend amount ..	47,769	50,912	50,912	51,488
Dividend %	3½*	3½*	3½*	3½*

*Dividend on receipt of amount from Guarantor.

(*Annual Meeting held 17th October*, 1941).

Audited accounts for the year ended 31st March, 1941:—

The gross earnings for the year amounted to Rs. 1,12,324, while the working expenses totalled to Rs. 1,14,106 as compared with Rs. 1,17,455 and Rs. 1,13,913 respectively for the previous year. The net loss of Rs. 1,782 has been carried as a charge against Net Revenue Account.

Under the Net Revenue Account, after crediting interest accrued on investment and allowing interest payable on debentures and temporary loans, etc., there is a deficit of Rs. 15,778 which, added to the amount required for guaranteed interest at 3½ per cent., calls for a total subsidy of Rs. 76,118 to be recovered from the Government of India in terms of the agreement with the Secretary of State. Out of this sum an advance of Rs. 39,000 has already been received and a balance of Rs. 37,118 is still due; on realisation of this balance from the Government, warrants for the distribution of a 3½ per cent. dividend to shareholders (less Income Tax thereon) will be issued.

Working Expenses:—Compared with the previous year, the total working expenses show a net increase of Rs. 193 only.

Coaching:—The receipts under this head amounted to Rs. 84,932 for the carriage of 233,551 passengers as compared with Rs. 86,785 and 239,196 passengers for the previous year. The feeder bus service from Ganuties helped as before in contributing to the traffic earnings.

Goods:—Earnings from this source totalled Rs. 25,315 for 498,126 maunds of goods as against Rs. 29,415 for 583,243 maunds last year.

The fall in both Goods and Coaching earnings may be attributed to failure of crops.

Managing Agents:—Messrs. McLeod & Co., Ltd.

Authorised and Issued Capital—Rs. 17,25,000 in 17,250 Shares of Rs. 100 each. Subscribed—Rs. 17,24,000 in 17,240 Shares, fully paid up.

Synopsis of the balance sheet as at 31st March, 1941:—

Liabilities	Rs.	Assets	Rs.
Capital paid up ..	17,24,000	Fixed Capital Expenditure ..	21,18,858
3½% Mort. Debentures ..	3,00,000	Outstandings ..	41,651
Reserve ..	11,183	Investments ..	21,000
Current debts ..	1,94,342	Cash & other balances ..	48,016
Total ..	22,29,525	Total ..	22,29,525
		Total liquid assets ..	1,10,667

(*Annual Meeting held 17th October*, 1941).

Audited accounts for the year ended 31st March, 1941:—

The gross earnings for the year amounted to Rs. 1,28,998 and working expenses to Rs. 1,52,219 as compared with Rs. 1,25,870 and Rs. 1,53,244 respectively for the previous year. The net loss of Rs. 23,221 has been carried as a charge against Net Revenue Account.

Under the Net Revenue Account, the net loss, together with the interest payable on debentures and overdraft, etc. amounts to Rs. 44,567 which, added to the amount required for guaranteed interest at 3¼ per cent, calls for a total subsidy of Rs. 1,63,567 from the Government of India in terms of the Agreement with the Secretary of State. Out of this sum an advance of Rs. 80,000 has already been received and the balance of Rs. 83,567 is still due.

Working Expenses:—Compared with the previous year, the total working expenses show a net decrease of Rs. 1,025.

Coaching:—The receipts under this head amounted to Rs. 74,373 for the carriage of 146,242 passengers as compared with Rs. 71,640 and 139,612 passengers for the previous year.

Goods:—The earnings from this source totalled Rs. 51,944 for 677,859 maunds of goods as against Rs. 52,166 for 745,937 maunds of goods for the previous year.

Managing Agents:—Messrs. McLeod & Co., Ltd.

Authorised Capital—Rs. 35,00,000 in 35,000 Shares of Rs. 100 each. Issued and Subscribed—Rs. 34,00,000 in 34,000 Shares, fully paid up.

Synopsis of the balance sheet as at 31st March, 1941:—

* Dividend on receipt of amount from Guarantor.

(*Annual Meeting held 17th October*, 1941.

Audited accounts for the year ended 31st March, 1941:—

The Gross earnings for the year amounted to Rs. 1,34,025 and working expenses to Rs. 1,37,551 as compared with Rs. 1,32,781 and Rs. 1,36,699 respectively for the previous year. The net loss of Rs. 3,526 has been carried as a charge against Net Revenue Account.

Under the Net Revenue Account, after crediting the interest accrued on the loan of Rs. 75,000 to *Ahmadpur Katwa Railway* and deducting the net loss together with interest on temporary and debenture loans, there is a deficit of Rs. 14,300 which, added to the amount required for guaranteed interest at 3½ per cent., calls for a total subsidy of Rs. 76,600 to be recovered from the Government of India in terms of the Agreement with the Secretary of State. Out of this sum an advance of Rs. 39,700 has already been received and the balance of Rs. 36,900 is still due. Warrant for the distribution of a 3½ per cent. dividend to Shareholders (less Income Tax) will be issued as soon as the amount is recovered.

Working Expenses:—Compared with the previous year the total working expenses show a net increase of Rs. 852 only.

Coaching:—The receipts under this head amounted to Rs. 1,01,261 for the carriage of 239,664 passengers for the previous year. The feeder bus service from Natunhat helped as before in contributing to the traffic earnings.

Goods:—Earnings from this source totalled Rs. 26,997 for 596,445 maunds of goods as against Rs. 29,249 for 640,578 maunds last year.

Managing Agents:—Messrs. McLeod & Co., Ltd.

Authorised Capital—Rs. 18,00,000 in 18,000 Shares of Rs. 100 each. Issued and Subscribed—Rs. 17,80,000 in 17,800 Shares, fully paid up.

(*Annual Meeting held 15th October*, 1941).

Audited accounts for the year ended 31st March, 1941:—

The balance of Net Earnings on 31st March, 1941, was Rs. 3,18,828 arrived at as follows:—

Balance from previous year		1,53,827
Revenue for the year	4,42,688	
Expenditure for the year	1,86,826	
		2,55,862
		4,09,689
Deduct:—Interim Dividend paid during the year ended 31st March, 1941 @ 2½% on Preference Shares, less Income Tax		90,861
Net Revenue available on 31st March, 1941		3,18,828

The Directors recommend that the amount at credit of Net Revenue Account be disposed of as follows:—

Final Dividend of 2½% on Preference Shares, less Income Tax	86,589
Dividend of 2½% on Ordinary Shares	43,750
Contingencies Reserve	30,000
Carry forward ..	1,58,489
Total ..	3,18,828

Gross Earnings again showed a slight decline of Rs. 2,459 as compared with the previous year, the decline being due to the falling off of Traffic in rice, sugar flour, stone and cement.

Coaching Traffic was slightly better and recorded an increase of Rs. 11,506, but unfortunately this was not sufficient to offset the loss on the Goods Traffic.

Working Expenses were lower at Rs. 9,08,345, as compared with Rs. 9,09,840 last year.

The programme for the replacement and renewal of Rolling Stock was suspended in January, 1941, after a sum of Rs. 23,164 had been expended during the financial year under review. In conformity with the practice adopted last year, it was decided to include this total in Working Expenses for the year, preserving the special Reserve of Rs. 65,000 intact. In all 40 new Wagons were constructed for the Main Line and 15 Wagons for the Extensions. These are all now in service.

There is every expectation of this competion being substantially reduced as a result of the recently introduced Petrol restrictions, but on the other hand, Buses and Lorries are probably to be allowed to carry an additional load of 5 cwts. each on the Hill Cart Road. If, however, this increase in weight coincides with a reduction in the number of Round Trips from two to one per 24 hours, which the directors hope will be the case, the Railway will still benefit to some extent, and every effort will, of course, be made to offer increased facilities to the Public during the coming months, with a view to attracting a larger share of the Traffic to the Railway.

Managing Agents:—Messrs. Gillanders Arbuthnot & Co.

Authorised, Issued and Subscribed Capital—Rs. 61,25,000 in 17,500 Ordy. and 43,750 5% Cum. Pref., both of Rs. 100 each, fully paid up.

Synopsis of the balance sheet as at 31st March, 1941:—

(*Annual Meeting 30th October*, 1941 *at* 3-30 *p.m.*).

Audited accounts for the year ended 31st March, 1941:—

The net earnings for the year amounted to Rs. 3,11,579 as compared with Rs. 2,67,507 for the previous year. The increase was due partly to the effect of the Surcharge on Coaching and Goods Traffic and partly to the improvement in the export of Sugar Cane which, it is hoped, will be maintained.

During the year an Interim Dividend at the rate of Rs. 2-4-0 per share, less Re. 0-6-1⅛ being the quivalent of the current rate of Income Tax, was paid. The amount available for final distribution is Rs. 2,10,071-5-5. The directors now recommend the payment of a final dividend at the rate of Rs. 2-4-0 per share, subject to a similar deduction for Income Tax, making Rs. 4-8-0 per share for the year, which will absorb Rs. 1,46,250 and leave, after payment of the managing agents' commission, a balance of Rs. 55,726-11-5 to be carried forward.

Managing Agents:—Messrs. Gillanders Arbuthnot & Co.

Authorised, Issued and Subscribed Capital—Rs. 65,00,000 in 65,000 Shares of Rs. 100 each, fully paid up.

* Dividend on receipt of amount from Guarantor.

(*Annual Meeting held 17th October*, 1941).

Audited accounts for the year ended 31st March, 1941:—

The gross earnings for the year amounted to Rs. 1,63,716 against Rs. 1,55,982 for the previous year and the working expenses to Rs. 1,60,821 against Rs. 2,01,003 for the previous year. The balance of Rs. 2,895 has been carried to Net Revenue Account.

Under the Net Revenue Account, after allowing for interest, etc. on Debentures and other loans, there is a deficit of Rs. 17,785 which, added to the amount required for guaranteed interest at 3½ per cent. on the total subscribed share capital of Rs. 19,50,000, calls for a total subsidy of Rs. 86,035; as, however, Rs. 10,500 of this guaranteed interest is due to the Government of India on their portion of the subscribed capital, the net balance (together with Income Tax on their share of interest) to be recovered from them in terms of the agreement with the Secretary of State will be Rs. 77,723. Out of this sum an advance of Rs. 38,624 has already been received and the balance of Rs. 39,099 is still due. On realisation of the balance from the Government, warrants for the distribution of a 3½ per cent. dividend to Shareholders (less Income Tax thereon) will be issued.

Working Expenses.—Compared with the previous year, the total working expenses show a net decrease of Rs. 40,182 which is mainly due to the expenditure being kept down to bare essentials.

Coaching.—The receipts under this head amounted to Rs. 1,31,249 for the carriage of 925,233 passengers as compared with Rs. 1,23,372 and 877,099 passengers for the previous year.

Goods.—Earnings from this source amounted to Rs. 28,472 for 688,964 maunds of goods as against Rs. 27,430 for 664,494 maunds for the corresponding period last year.

*Managing Agents*s—Messrs. McLeod & Co., Ltd.

* Dividend on receipt of amount from Guarantor.

(*Annual Meeting held 17th October*, 1941).

Audited accounts for the year ended 31st March, 1941:—

The gross earnings for the year amounted to Rs. 64,269 as against Rs.53,565 for the previous year; the Working Expenses, which under the agreement with the Working amount to 50 per cent. of gross earnings, are retained by the *Assam Bengal Railway* and the balance, being the like amount of Rs. 32,134, is carried to Net Revenue Account.

Under this account, after including sundry petty receipts and interest on temporary investment and allowing for Debenture Interest and other charges, there is a surplus of Rs. 6,065 which, to make up the sum of Rs. 31,189 required to meet the guaranteed interest at the rate of 3½ per cent on the Share Capital of Rs. 8,91,100, calls for a total subsidy of Rs. 25,124 to be recovered from the Government of India in terms of the Agreement with the Secretary of State. As, however, the Secretary of State has refused to allow Super Tax as an item of working expenses and the Reserve Funds, which partly contributed towards this expenditure in previous years, has been depleted, the company is only able to recommend payment of a dividend at Rs. 3-1-0 per share (less Income Tax) for the year ending 31st March, 1941.

Warrants for the distribution of the dividend will be issued as soon as the necessary funds are received from the Government through the Assam Bengal Railway.

Coaching.—The receipts under this head amounted to Rs. 51,540 for the carriage of 279,682 passengers as compared with Rs. 42,723 and 228,288 passengers for the previous year.

Goods.—Earnings from this source totalled Rs. 12,521 for 14,385 tons of goods as against Rs. 10,806 and 11,315 tons for the previous year.

Managing Agents:—Messrs. McLeod & Co. Ltd.

(*Annual Meeting 30th October*, 1941 *at* 4 *p.m*).

Audited accounts for the year ended 31st March, 1941:—

The Company's share of net earnings for the year amounted to Rs. 6,22,310/- as compared with Rs. 5,82,906/- for the previous year, the increase being entirely due to better Passenger Traffic consequent on the increased prosperity of the Jute Market during the previous year.

During the year interim dividends at the rates of Rs. 1-12-0 and Rs. 2/- per Share, less Re. 0-4-8 7/8 and 0-5-5 being the equivalent of the current rate of Income Tax, on the guarantee and Rebate Shares respectively were paid. The amount available for final distribution on 31st March, 1941 was Rs. 2,91,430-7-4. The directors now propose to pay final dividends at the rates of Rs. 2-12-0 and Rs. 2-8-0 respectively per share, subject to similar deductions of Income Tax, on the Guarantee and Rebate Shares, making a total for the year of Rs. 4-8-0 on both Classes of Shares, representing a distribution of Rs. 1,73,250/- and Rs. 57,500/- respectively on the Guarantee and Rebate Shares and leaving, after payment of the Managing Agents' Commission, a total balance of Rs. 49,789-13-4 to be carried forward. Of this balance the sum of Rs. 38,240-13-6 is applicable to the Guarantee Share Capital and Rs. 11,548-15-10 to the Rebate Share Capital.

(*Annual Meeting 30th October*, 1941 *at* 4-30 *p.m.*).

Audited accounts for the year ended 31st March, 1941:—

The net earnings for the year amounted to Rs. 4,76,555 as compared with Rs. 4,55,143 for the previous year. The increase was due almost entirely to better Passenger Traffic, local Traffic being chiefly responsible. Since the close of the year there has been some falling off in Coaching Earnings but, as Goods Earnings are being well maintained the future prospects are not unsatisfactory.

During the year an interim dividend at the rate of Rs. 2-4-0 per share, less Rs. 0-6-1 1/8 being the equivalent of the current rate of Income Tax, was paid. The amount available for final distribution is Rs. 3,46,635-2-2. The directors now recommend payment of a final dividend at the rate of Rs. 2-8-0 per share, subject to a similar deduction of Income Tax, making a total of Rs. 4-12-0 per share for the year, thus absorbing Rs. 2,37,500/- and leaving after payment of the Managing Agents' Commission Rs. 1,00,115-2-2 to be carried forward.

Managing Agents:—Messrs. Gillanders Arbuthnot & Co.

Authorised Capital—Rs. 1,10,00,000 in 1,10,000 Shares of Rs. 100 each. Issued and Subscribed—Rs. 95,00,000 in 95,000 Shares, fully paid up.

TEZPORE BALIPARA TRAMWAY CO., LTD.

Audited accounts for the half-year ended 31st March, 1941:—

The result of the half-year's working shows, after providing for Debenture interest, income-tax and commission to the local agents and staff, a credit balance of Rs. 16,487-12-3 to which must be added the balance carried forward from the previous half-year amounting to Rs. 2,474-8-8, making a total at the credit of Profit and Loss Account of Rs. 18,962-4-11, which the directors propose should be dealt with as follows:—

Transfer to Replacements and Renewals Account ..	16,000 0 0
Transfer to Staff Superannuation Fund	229 8 0
Carry forward	2,732 12 11
Total ..	18,962 4 11

Expenditure is on a par with the corresponding period in 1939-40 and is slightly higher than the half-year ended the 30th September, 1940. Earnings show a decrease of Rs. 3,740 when compared to the corresponding period in 1940. Coaching and Sundries showed an improvement, but goods earnings were less. This is accounted for under the main headings of Coal, Manure, Iron and Steel and Tea. There is still a great deal of expenditure to be incurred under instructions from the Railway Board of the Government of India and it is probable that a new Locomotive will be purchased before the end of 1941. This, therefore, justifies the heavy allocation to Repairs and Renewals Account.

Managing Agents:—Messrs. McLeod & Co., Ltd.

Authorised, Issued and Subscribed Capital—Rs. 4,00,000 in 1,750 Ordy. and 2,250 6% Pref., both of Rs. 100 each, fully paid up.

Synopsis of the balance sheet as at 31st March, 1941:—

Indian Finance
ISSUED WEEKLY

Vol. XXVIII. No. 17 SATURDAY, OCTOBER 25, 1941 Price Re. 1

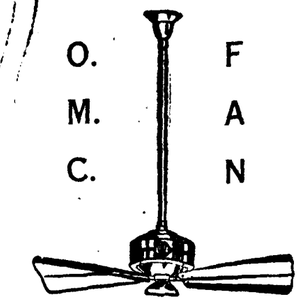
Insure and Increase Nation's Strength

Financial Independence of the individual is the measure of Nation's financial strength.

In this hour of world turmoil, all Life Insurance Policy-holders should take stock of their insurance cover and ascertain just how strongly they are fortified against the unpredictable that lies ahead.

And, those individuals who have not yet made provision for their protection need do so without delay and thereby contribute towards Nation's strength.

Be advised and write to-day to



NATIONAL INSURANCE COMPANY, LIMITED.

WORLD OF INDIAN FINANCE

Friday Evening.

MONEY is easy with interbank call quoting at ½ per cent. The market must be said to continue in the easy conditions which have characterised it for an appreciably long time. But, obviously, the experiences of a week seriously cut up by holidays cannot be fully reliable as a clue to coming trends. For such latent trends as there may have been have little chance to manifest themselves. But one need not look in vain for straws in the wind that betoken the approach of the busy season. Without falling into the error of exaggerating its significance, one may note that fractional rise in Treasury Bill discounts from ten annas six pies per annum to ten annas eight pies per annum and the fall in the total amount of applications from Rs. 5.19 crores last week to Rs. 4.42 crores this week. But evidence on the point of change from the slack conditions of the last few weeks must be pronounced to be of a mixed kind.

SERVICE

Branches in the East:
CALCUTTA, 101-1, Clive Street and 37, Chowringhee, DARJEELING, BOMBAY, Hornby Rd. and Princess St., RANGOON, 45, Phayre St. and 75, China St., KARACHI, RAWALPINDI, MURREE, AMRITSAR, LAHORE, DELHI, NEW DELHI, SIMLA, PESHAWAR CANTT., PESHAWAR CITY, SRINAGAR, GULMARG.

The statement of the Reserve Bank of India for the week ended October 17 is remarkable for the way in which it bears out the prognosis of official and currency transactions made in these columns last week. It may be recalled here that we pointed out last week that the receipt of large amounts in London on account of inter-Governmental transactions necessitates a series of transactions on the part of the Government of India and the Reserve Bank of India in respect of Government balances and the securities in reserves. We pointed out at the time that the payment of large sums in sterling to the Government of India causes in the first place, a rise in the balances held abroad and in Government's deposits in the Banking Department. But, when the Government of India has to make payments on behalf of the British Government, reduction in the notes held in the banking department is caused. This position, it was pointed out, has to be rectified by transfer of sterling from the banking department to the issue department and creating currency thereagainst. The fall in Government's deposits might continue to the point of the Government being obliged to go in for a ways and means advance.

The process thus sketched has, it would appear, taken place during the week on a small scale. For balances held abroad have been brought down to Rs. 59.23 crores from the level of Rs. 68.95 crores in the previous week. At the same time, sterling securities in the issue department have been increased from Rs. 143.63 crores to Rs. 155.67 crores. But total notes issued have risen by less than Rs. 4 crores from Rs. 303.15 crores to Rs. 306.88 crores. For, while the notes held in the banking department have gone up from Rs. 11.57 crores to Rs. 13.21 crores, rupee securities have been brought down from the level of Rs. 76.51 crores to Rs. 68.46 crores. It only remains to note that the balances of the Central Government with the Reserve Bank have fallen from Rs. 18.6 crores to Rs. 12.27 crores. It will be seen from the above account that the adjustments necessitated by the increase in the foreign balances in the banking department have been made during the week so as to distribute the effects over a number of different heads.

The exchange market has been quite steady during the week.

Banks were sellers of T. T. on London Ready up to six months forward at 1s. 5 31/32d., and banks were buyers of T.T. on London Ready up to sir months forward at 1s. 6 1/32d.

D.A. sight bills quoted 1s. 6 9/32d., for three and four months.

Interbank call money is still unchanged at ½ per cent.

Firms' money for call and short is ½ per cent and ½ per cent for one to four months.

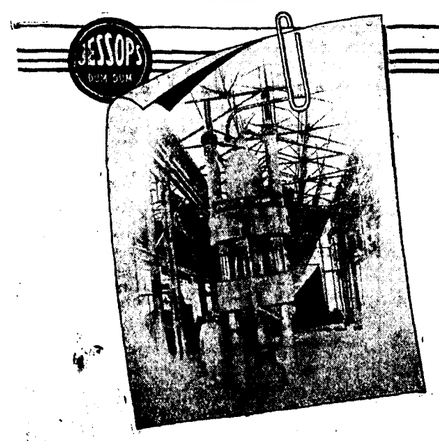
Editorial Comments

After Two Years

"EAVESDROPPER" is in the enviable position of being able to quote at length his writings of more than two years ago, less to parade the proven correctness of his views than to take advantage of the present context of world politics to urge the policies which, at the time they were first put forth, hardly met with serious consideration. On August 19, 1939, two weeks before the present war broke out, "Eavesdropper" devoted his gossip on two successive weeks to bring out the indifference of Government and people in this country to the course of world events, the pathetic faith in the good fortune of India in the matter of escaping from the horrors and ravages of war and the assumption in the minds of most people that the course of this war should run very much on the lines of the last. The "Gossip" of August 19, 1939 is reproduced without a single alteration, so far as it refers to the problems which are now our primary concern; and the reader will, doubtless, note the clarity with which it was foreseen that this war would prove to be no respector of neutrality. The writer had a definite inkling of the manner in which the mobile machinery of Nazi warfare has since rolled over innumerable political frontiers. And this inkling of the future, which bore striking contrast to the placidity of Government and the political parties, naturally suggested what then seemed to many ludicrous—the immediate creation of a two million army in India.

That was two weeks before the war broke out in Europe. Even if the proposal had been put forward two weeks after, that is, after Poland had been neatly carved up, it would have met with no better reception. For the tendency, so far as we could see at the time, was to consider the suggestion not from the point of view of what was needed, or even what was possible with the available resources, but in relation to the "achievements" of an unimaginative and unenterprising past. "Do you know," we in the office of *Indian Finance* were asked, "what it costs to equip and maintain a soldier in the conditions of modern warfare"? Obviously, there were a few things, which the questioner could be asked whether he knew. But what mattered was not the honours of the debate, but the establishment of certain modes of thought in the minds of men who mattered. It is usual in commercial circles and in books modelled on Smiles' to say that it is easy to find a hundred and one reasons why a thing can't be done, but there is always one conclusive reason why it should be done. But to this day, it is doubtful if the conclusive reason has been grasped by those who matter. It is only in the last one year that one sees a hopeful note struck in official statements about what India can do in the manufacture of the requisites of modern warfare. But even to-day, Mr. Amery feels little compunction and even less mortification in standing up in the House of Commons and declaring that "the manufacture of internal combustion engines in India is not a practical proposition, so far as this war is concerned." The grounds on which you can argue against the manufacture of internal combustion engines, the establishment of an automobile industry, the opening up of additional shipyards, in fact, almost everything except the raising of foodstuffs or the weaving of clothing—the grounds are legion. But behind all these arguments there is the stark necessity for making these things; and necessity is far more inventive than official obstructionists.



But no one considered the question in this light. It was thought that the Chatfield Report marked the utmost limits of army expenditure in India, that the size of the army must be determined by our ability to find the equipment, that our production of the equipment must be limited by wishful thinking about the war and greedy thoughts about postwar economy. Wishful thinking, because people were so eager to assume that the tide of modern warfare would not touch the frontiers of India; and greedy thoughts about postwar economy, because behind the planning of the war effort in India there lay Britain's anxiety that she should not be driven by the war to establish new centres of industrial production in India. To this has to be added the other fear that a large Indian army may prove to be a political danger as well. It is to these dangers and the certainty of war extending slowly to the borders of India, that "Eavesdropper" made pointed reference in this gossip of more than two years ago. And at that time, it received little or no consideration, because its wisdom was determined by political prejudice and economic jealousy, and its feasibility was judged in relation to the pittance of new taxes that were alone thought to be possible.

Two years and more of actual warfare with all its tale of reverses and disappointments have done little to alter the attitude of Government or public to the proposals then outlined. But it may be said that the old complacency is no longer there. It is no longer assumed that the war will remain an affair of the European nations, that the German Army will go on from victory to victory but only to perish in the fire of the British blockade, that the

Back the Defence Loans — Dictators Buy Defence Loans — Share India Strong

Empire's battles will be fought by other nations and other races and that India need do no more than act as a sort of field kitchen to the Allied armies. That complacency was not a little strengthened by the notion which was widely prevalent till very recently, that in modern warfare men do not matter. It is true machines count more than men and that to march forward ill-equipped men into the field of battle is to provide fodder for the enemy's cannon. But like all truths newly perceived, it was exaggerated and the incentive to exaggeration lay ready in the established antipathy to Indian industrialisation and militarisation.

The truth is beginning to be seen in proper proportion and perspective. It is now realised that, if mechanisation is so important, it only means, not that you can war with imported robots, but that you have to raise a large mechanised army. At the end of the most terrific battles in history which have raged for three miles over a 1500 mile front, Germany hardly seems to be lacking in men or machinery. That Germany has lost two million men on the Eastern front and a proportionate number of planes and tanks has made no difference to the question of a British attack in the west. An expedition to the Continent is still described as "madness", as "courting disaster," and the like. If the position in the west is so far from encouraging, how can we view the position in the Far East? With Japan ready to play the role of Italy in the East, with Germany ready to attack the Caucusus and burst through towards the East, it would be idle to deny the gravity of the situation. Men do matter; and when equipment can be had only by going full steam ahead with India's industrialisation, there is no use looking for an alternative; for, the alternative is a triumph for the enemy. When British politicians talk of lack of manpower, they seem to miss the humiliation of it! Two precious years have been wasted. Should Britain waste more by sniffing at India's freedom and India's industrialisation?

U. S. Defence and Borrowing

In this dark period of human history men turn westward and news from America is followed with eager interest in distant lands. Yet the news of U. S. defence programme or what is described as economic armament, either direct or in aid of Britain, tends to be scrappy and discontinuous and there is more a tendency to follow the changes in U. S. opinion concerning the war or to watch the technique of Presidential leadership. It is perhaps advisable to concentrate on the fiscal and economic aspects first on ascertaining how far America can help herself and Britain in the immediate future and secondly, on learning how the Republic stands to gain or lose therefrom. It is not without interest to follow the events of this year. The first signs indeed appeared before the third inauguration ceremony. The Budget message, it may be recalled, appeared before the usual report on the state of the Union to Congress and it is possible to relate the entire fiscal policy to the Budget message of January 6, which detailed how the U. S. A. had to prepare against the dangers. The message foreshadowed important changes such as the abolition of the limit to the Federal Public debt, hinted at a vast increase in revenue by as much as 23 percent in 1941-42 and indicated clearly that the U.S.A. should not worry over a deficit of 9.2 billions.

It is not difficult to relate the clear calculations and confident promises of the Budget message to the assumptions made a fortnight ago by the Director of the Budget. Mr. Harold Smith expected that the enormous spending would not trouble the U. S. A. and if the U. S. A. starts to spend over 62 percent of the Budget expenditure (Mr. Roosevelt's estimate) it would not be spending even 20 percent of the national income. The Director of the Budget expressed his own view that America could pay on a new scale without difficulty and the U. S. Congress' calm acceptance of the revenue proposals showed how far the U. S. A. is prepared to pay out billions for defence. Seven months ago U. S. defence orders and their relation to industry were discussed. The main conclusion reached was that U. S. industry would benefit to an unusual degree and the possibility of frequent revision of the tentative limits set by the Office of Production Management, set up in January 1941 by the President, was also mentioned. Since then, changes have been many and quick. The steady rise in industrial production is assuredly reflected in the rise in the Federal Reserve Bank's index of industrial production to 156 in June. As compared with the spring of 1940, there has been a rise of 40 per cent in industrial activity. This quickening suggests immediately that the fiscal programme is justified by the probable rise in national income. It is certain that the estimate of 75 billions for 1940 will be surprised this year owing to the rise in output. It has been remarked that steel output for the first half of 1941 has been as much as 98 percent of ratio capacity as on December 31, 1940. The increase in manufacturing activity has been most pronounced in the field of durable goods, showing incidentally that the trends noticed in the analysis of profit statements for the past year are still operative. There has been since the spring, a rise in output of textiles and other non-durable goods and this increase was viewed askance, particularly, as the price level was rising until July.

These general statements, however, have no bearing on the budgetary problem. The appropriations to defence exceed the President's initial estimate of 18 billion dollars. There are, besides, the two large appropriations exceeding 12 billion dollars under the Lease and Lend Act (introduced into Congress only two days after the Budget message was published) and the defence programme is now directed to many objects outside the original scheme of a Two-Ocean navy. How Federal spending has grown and will grow does not appear to be a disturbing prospect for U. S. citizens who hope that if the programme costs more than the 25 billion dollars spent on the last war when twenty months of warfare and assistance to the Allies took up 35 billion dollars all told no harm will follow. And the success in paying for the first war through the five Liberty Loans suggests at once that borrowing on a vast scale will present no problems for the Treasury first because the average rate of interest had come down by 1936 to 2¼ percent as compared with an average of 4¼ percent on the loans floated for the last war, and secondly because, the new revenue laws have provided for the additional interest charges in advance by increase to taxation. It may be remarked here that the Administration laid down its policy last year when the two Revenue Acts were incorporated into the tax system and an excess profits tax taking off 25 percent of the unusual profits showed to the citizens how industry was going to pay its contribution for national defence. The curtailment of civil expenditure began last year but the Social Security Scheme is untouched and farm relief is still on the Democratic programme as Congress has deferred to the Farm Bloc this year. The original appropriations up to June 1942 contemplated by the President covered 28.48 billions inclusive of expenditure for the year ending June 1942, but the figure excludes Lease-Lend appropriations.

How the defence programme has contributed to a rise in bank advances has been explained elsewhere in describing the continued fall in excess reserves held by U. S. banks. That armament has produced, in Mr. Eccles' phrase, the climate required for economic progress is widely recognised while the current strength of giltedged issues has shown that the stock market in recent months is not without its points. After a year of activity over a wide field, the defence effort was appraised as definitely a stimulus and it was conceded that factory employment as a whole, had risen in a year by 24 percent. The concurrent increase in production and employment has a bearing on the fiscal programme. The former permits the curtailment of relief expenditure and the postponement of public works expenditure. Both these objects come within the scope of the Administration's programme since the intensification of public works is viewed as one of the incidents of industrial demobilisation. The advance of monies through the special agencies to private corporations for additions to plant capacity is part of a special type of reflationary finance in the U. S. A. Instances have been reported from both the aluminium and steel industries of such resort to special loans from the R. F. C. in the last two months. The actual increase in debt is only limited by the raising of the upper mark to 65 billions from 49 billions, but that can be nothing more than a fiscal monitor. The growth of debt has not alarmed U. S. opinion because it is considered frankly impossible to raise more than a fraction of defence expenditure by taxes. The President spoke of the will to defence, and the means to defend. Only the most intrepid Isolationist will ask against whom defence is necessary at present, and the July Budget and the subsequent tax allowing for an additional revenue of over 3½ billions demonstrated that the U. S. Government was willing to check the growth of profits as also private civilian consumption by new taxation. The new levies, while restricting opportunities for State and local taxes, have been widely recommended as good revenue producers. Last year's new taxes did not preclude fresh taxation because last year's defence appropriations totalled over 16.9 billion dollars. The grant of emergency powers implied a corresponding willingness to submit to taxation and the new levies on cinema tickets etc., showed that the federal tax system had been broadened. The Treasury procedure is known to have improved greatly after the Budget and Accounting Act of 1921 and the special Assistant Secretary of the Treasury charged with the examination of fiscal proposals, has simplified the work for the Treasury. That the Treasury can borrow up to a third of its total debt requirements through additions to the floating debt as much as a third of the anticipated requirements is admitted on all hands. The issue of 2 percent treasury deposit bonds, maturing in 12 years, to banks carrying the Federal Government's deposits, was a recent variation of the usual borrowing procedure.

The gloomiest observers have so far recorded only tempered disapproval of the borrowing plans of the Treasury this year. The success of the issues floated in the last War and the experience of debt repayment can hardly be repeated. But it has been urged that the addition to public debt, made since the savings bonds appeared in May, cannot be burdensome because the greater part of the new debt represents additions to plant and output and further that the service of new unproductive debt is not financed through regressive or saving-increasing taxation during a period of relatively full employment. The maintenance of existing tax standards with its readjustments of burdens during a period of slack employment is postulated by the Administration, and the restraint of inflation already attempted shows that the expansion of public debt presents few dangers.

The effects of increased expenditure can be seen in other U.S. industries besides aircraft and shipbuilding. The general presumption is that with a national income in excess of the fairly common estimate of 90 billions, nearly 50 percent more than the income in 1938, the U.S.A. has the ability to stand up to borrowing and except for the difficulties encountered in regard to production solved partly through a new mediation board. The absence of competitive new issues over a long period, has been helpful to the Treasury, and the fact that the Government raised nearly 22 billion dollars during the last war suggests that earlier success in one respect that the success may be repeated. The price of security is only the additional interest payable and it is certainly suggestive that Dr. Leland of Chicago University concluded his analysis of federal debt problems by saying that debt retirement at the moment is not a problem. It must however, be noted that heavier taxation, at the approach of full employment and limit of momentary expansion, has appeared and there is hardly any danger of an indefinite increase in the public debt.

Burma's Trade

A SUBSTANTIAL improvement in trade turnover during July 1941 as compared with July 1940 is disclosed by the monthly trade returns for Burma. The total for the month of July 1941, is higher, owing to an increase under all imports excepting coal and paper and an increase in all exports save tobacco and mineral oils. The July total under imports was in advance of the total for any previous month, but there is no reason to believe that there has been a striking increase in exports. The monthly average in 1941-42 however is well above that for any of the months of 1940-41 and the rise in the trade Index to a hundred and ten points, a level above the average for the base period 1926-29 is certainly noteworthy. The July returns testify to the continued growth of yarn and twist imports into Burma, the total value of imports being over Rs. 20.16 lakhs while the takings of the piece-goods still the chief import into this market valued Rs. 51.4 lakhs were also considerably larger than in July last. The value of exports to India is shown at Rs. 2.46 crores while the value of imports from India came to Rs. 1.65 crores. Total exports to India including re-exports from April to July are shown at Rs. 11.36 crores as against Rs. 11.42 crores in the corresponding period of 1940-41. Exports to other countries have improved considerably since 1940-41, since total exports are up to Rs. 13.95 crores from Rs. 8.07 crores for the first four months of 1940-41. This recovery in Burma's trade with foreign countries proves that Burma's foreign trade has a greater resilence than imagined. Total imports from India at Rs. 6.04 crores were in advance of imports during April to July 1940 and were also considerably in excess of imports from foreign countries valued at Rs. 3.92 crores. These figures indicate that half of Burma's trade is still with India, and the increase in imports since April furnishes proof of the advantages arising from the new trade pact. It may be added that the increase under imports has taken place at a time when exports to India have fallen. The increase under rice exports in July as compared with July 1940, indicates however, that no great change has come over Burma's trade which is hampered by restrictions. And the actual fall under exports in July as compared with June and May will show that it is only under imports that there has been consistent improvement. Present indications are, in the main, favourable and the fall in the export surplus during July promises to be temporary. The increase in imports from other countries during and before July, shows that total imports for a full year are likely to exceed the Rs. 29.55 crores returned for 1940-41. The figures available up to July show that in spite of the fall under mineral oil as also hides and skins, the export trade is definitely looking up. An increase of nearly Rs. 5 crores is to be noted in the value of exports as between April and July. Exports of base metals and manufactures thereof are singularly stable for over a year. The increase in re-exports of machinery, apparatus and vehicles may be attributed to the growth of trade along the road to Kunming. The improvement in Burma's imports has contributed to the growth of revenue which for the four months April to July is Rs. 2.15 crores while the Budget estimate for 1941-42 is Rs. 4.06 crores.

Rice Control

Indian merchants, to judge by the many protests and memoranda that have appeared, view with alarm the scheme of rice control propounded by the Burma Government. The ostensible objects of the scheme are disregarded and the scheme is largely regarded as one meant to drive Indian interests out of the rice trade. The Burma Government claims that it has been impelled to act because foreign markets may be lost and shipping facilities become more restricted than ever and also because importing markets, e.g., Malaya, have already taken to control. There is also the usual claim that the rice-grower's interests are to be protected. The loss of certain markets in the Far East may be taken as inescapables. Burma is not likely to send large supplies to Japan as in 1940 and this apprehension at any rate is well-founded. There is the assurance that too plentiful supplies would lower prices and the Burmese cultivator has no reason to think that other markets are as safe and profitable as the Indian market where there is no import duty and the trade is well organised at both ends. The scheme of control may in reality be a means to discourage the speculation deprecated in the recent report on the marketing of rice, and also to defeat the moneylender who is too often a co-partener in the crop. The conference in Bombay which asked for public support expressed the opinion that the Burmese ricegrower deserved and would get a square deal from Indian merchants. That assurance may not weigh greatly with the Burma Government which may argue that the current discussions on price control will lead to the concentration of imports in official hands as in 1918-19. If India were to adopt the regulation of imported supplies and disribution, either to augment supplies or to keep down prices, the Burma control scheme would be unassailable. As that seems improbable the Indian merchant has no strong ground in asking that trade with India should be free as before. There is, however, the seasonal depression and the Burma Government's remedy is probably one presaging crop restriction. The price-raising policy that lies behind the scheme inferrable from the decline recorded since July in Rangoon is essentially similar to that adopted by Bengal in regard to jute, and the Indian merchant who deplores export control is in the position of the foreign spinner who says that raw jute is excessively high and extremely scarce. The lack of agreement between the Indian interests and the Burma Government as to the object and method alike suggests that revision is called for and it must be observed in passing that if Burma's policy leads to the maintenance of prices around the Indian price level the Indian agriculturist will definitely welcome the control of exports from Burma. Imports from Burma may be essential to meet a shortage but they should never, as in the past, prejudice the stability of prices in India. If seasonal fluctuations in Burma terminate, it may be expected that stocks at the Indian ports may be more or less constant and the level of prices less variable. If one looks mainly to the interests of the ricegrower in India (who may welcome the withdrawal of Burma rice from the market: this is more likely than dumping of the crop by the Rice Controller) it may be said that the Burma scheme is definitely an advantage but one must also look at the agricultural investments of the Indian community in Burma, and the danger that they may be forced to part with their property on some pretext or other is by no means illusory.

New Treasury Devices

The U. S. Treasury has come to have a pious horror of inflation especially as higher prices lead to labour troubles. The indications until July were all in favour of inflation, and the race between prices and wages was hardly checked owing to the fact that the cost of living rose by about 4 per cent in the large cities. Banks too were lending freely, and the loans and investments of banks within the F. R. system stood on July 23 at a new high figure of 28.646 billions or 4.2 billion dollars over the peak of 1929. The growth of credit cannot be separated from the increased holdings of Goverment securities. Another reason for the increase in loans must be sought in the defence programme. Public expenditure must have inflationary effects, and before the Revenue Bill appeared, it was evidently imagined that war orders spelt prosperity on the coolidge scales. The trend of manufacturing profits encouraged this belief and if it were not for the increase under personal and instalment credit loans which had risen by 280 millions in a year, many would be disposed to argue that bank credit was irrigating a wide field of industry. There is also the possibility that subscribers were taking up the new defence bonds, on sale since May, with borrowed money.

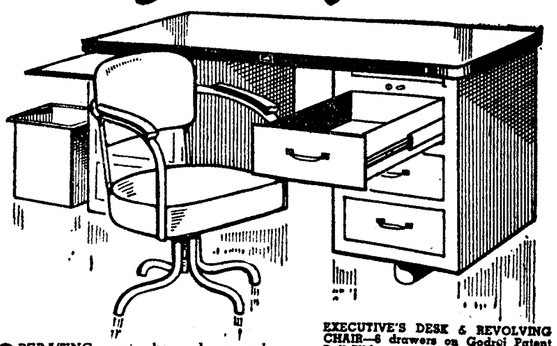
The fall in excess reserves of banks in the U. S. A. over a fairly long period reflected the rise in trade demand for money. Despite the increase in deposits, part of it is due to bank loans; the demand for advances has outstripped expectations. A contributory, factor has been the reduction in U. S. imports of gold. The banks, however, have regarded the development as not favourable to the nation because their first duty is to finance the increase in defence production and ask others than banks to take up new Government loans. Government's need for money remains great and repayment of taxes by special Treasury notes was recommended in July by Secretary Morgenthau. The two series of notes dated August 1st were made available for purchase by the public enabling the tax-payer to do his payment by buying a special type of security. The two types of notes could be used for paying personal income tax, corporation tax and excess profits at any time after three months from the date of issue but not before January 1942.

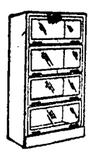


The question of prepayment of existing taxes naturally attracted attention before the additional revenue measures were introduced and the sale of notes at par and accrued interest was decided upon. Notes of the denomination of 25,50 and 100 dollars are available for any individual buyer in a year for series 1. The other series offered 0.48 per cent. The return on the 1st series of the new notes is as high as 1.92 per cent. per annum when used in payment of taxes; if not so used, only the purchase price is recoverable. While Banks have been encouraged to help in selling the tax notes it has been noted that one of the effects will be to regulate the flow of Treasury balances into the Reserve Banks and induce the investor or tax-payer to make payments in favour of Government by the new notes of 100, 1000, 10,000 and 100,000 dollar tax receipts which would procure for them something like half per cent. per annum. As the Commodity Credit Corp. borrowed 400 millions on its four year notes at 1¼ per cent. the actual yield on the tax receipts is not at all bad. Short term loans free of tax yield something like 1/3 per cent. and the banks like their clients might turn to prepayment receipts as a patriotic and profitable form of investment. The inflationary influence of the period are hardly discernible in regard to new issues which were less than the average for the period since September, 1939 and the demand for long tern Treasury obligations was keener. As a result of the pressure of new money which flowed into weekly treasury bills in July the yield was between 0.087 per cent. and 0.098 per cent. only.

Kathiawar Industries

Kathiawar is regarded so often as a backward peninsula with a multitude of princelings that one knows little of its industries, particularly, those on a small scale working for limited markets. Compared with Guzerat, long known as the garden of India, Kathiawar may seem stagnant, but due note must be taken of the metal workers in Bhavnagar and the gold thread and printing workers of Jamnagar. Nawanagar like Junagadh had at one time a flourishing industry for dyeing and printing cotton fabrics but this like other local industries decayed in the last century. The cotton crop, giving its name to Dholleras one of the leading types of Indian cotton, however, provides work for many gins and presses, the first of which was established in 1866 at Wadhwan. Bhavnagar claims the largest number of ginning factories at present; but Baroda has also many presses in its Kathiawar territory. The steam press started at Bhavnagar by Volkart Bros. was the first of many, and the export trade by sea and by land is dependent on the local gins and presses. It is reported that there were eight cotton mills, apart from one being erected at Jamnagar last year, but details regarding the equipment of three mills in Morvi, Wankaner and Wadhwan are lacking. The textile industry here is small and slow compared with that of Bombay and Ahmedabad. The existence of numerous small weaving factories recalls Malabar, and the *Khadi* of these small establishments enjoyed more than local fame.

Mr. Trivedi's survey of Kathiawar's industries (published last year by the Guzerat Research society) refers to the interest taken by a few princes in the industrial development of their states. In Morvi the late Ruler encouraged the pottery industry and the two factories produced large quantities of domestic ware. None of the three glass factories had made good, but that at Morvi should have benefited to some extent from war conditions. The increase in the local supply of oilseeds has led to the growth of many mills. Cement is, of course, the only major industry associated with Kathiawar. There are two factories, one at Porbandar and another at Dwarka, taken over later by the Okha Cement Company. Salt was for long the chief item of Kathiawar's exports, for the seaboard is singularly favourable to the making of brine salt. The tax system of India stunted the growth of the industry, and it was only after the additional import duty was levied in 1931, that exports by sea received a fillip. The Dhrangadhra salt works used to sell salt to the Bombay Government until the latter terminated the contract. Production has risen, however, as Bengal has taken an increasing quantity of Kathiawar's salt since 1928. Baroda like the maritime states has an interest in the salt industry and the Okha Salt works is one of the pillars of the nascent heavy chemical industry of Western India. Another outlet for chemicals is the match industry which has languished in recent years. Tin-making, or rather metal-box factories, have made their appearance in Kathiawar but have made little headway. The customs agreement of 1936 made with the Maritime States, has removed the spur to industrial development according to some observers who point also to the failure of the local metal vessel makers to hold their own in modern times. The manufacture of indigenous pharmaceuticals has been attempted with success but more important is the Shakti Alkali Works of Dhrangadhra manufacturing at present sodium carbonate and other important products. Until recent years when the management passed into energetic hands, the works were indifferently run, but the advantages of ample supplies of salt and, limestone have impressed many who point to the success of the Pioneer Magnesia Works and of the undertaking now interested in making bromine at Mithapur. The other industries of Kathiawar are too small and scattered to attract notice though it is believed that official encouragement will help the hand-loom industry to stage a come-back. It has been urged that the fishing industry like the building of country craft associated with Veraval will flourish on the basis of natural advantages but present indications are hardly favourable.

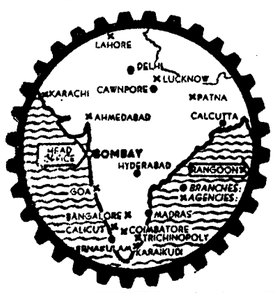


LOWER OFFICE COSTS!
the *Godrej* way

EXECUTIVE'S DESK & REVOLVING CHAIR—6 drawers on Godrej Patent Ball-Slides—automatic locking. Extension Slides to desk top, which is covered with linoleum; finished in stove-enamel, with chromium fittings.

OPERATING costs have been substantially reduced in offices as well as in factories by the Time Study systems devised by Charles Bedaux and other efficiency engineers. Godrej have recently developed this important branch of engineering as a new contribution to efficiency in India.

Chairs which give correct posture for desk-work or typing, with support exactly where it is needed—desks and tables with ideal writing surfaces, drawers that slide at a touch and lock automatically, securing their contents against theft or fire—bookcases that really preserve their contents—all these lower office costs by offering you *maximum office efficiency at minimum cost.*



PATENT STEEL BOOKCASE slide-in shutters with locks.

TYPIST'S CHAIR—adjustable back and seat.

Godrej Steel Furniture is rust-proofed and attractively finished in hard-baked enamel or heavy chromium plate. Every piece is light enough to move about and has ample strength because of Godrej patent methods of construction and fully mechanized production. Godrej offer a complete range of steel articles for every office purpose.

Clive Street Gossip

"I must have liberty
Withal, as large a charter as the wind
To blow on whom I please."
—(As You Like It).

J. M. KEYNES, when he published his *Essays in Persuasion*, a collection of his writings over a long period called them "the Croakings of a Cassandra". He is a proved prophet; and how sad he is! In a similar spirit, I reproduce here my "Gossip" of August 19, 1939:

For all that is happening around us in India, peace may be expected to reign for the next hundred years; on this earth, the best of all worlds, there can be no war; much less can there be war in India, the best of all countries on earth. In hushed and mysterious whispers, we hear of doings and goings-on in the Defence Department of the Government of India so as to bring the country in line from the point of view of war-preparedness. What these preparations are, is a hidden secret and profound mystery. We do not see any sign or token. Some of the cities such as Karachi, Calcutta and Bombay are desirous to show that they are forward and up to the mark; and they talk of A.R.P. and so forth. But it is all talk, nothing but talk. As for the general public, they continue to be in the age-long state of torpor, apathy, inertia and wilful ignorance. Our leaders, who ought to know better, pass resolutions and proclaim ultimata in the blissful feeling that, for the sake of India, the world is standing still. The general idea seems to be that India need not worry much if there be a war among the great European powers. India can and must keep out of war, is the slogan of our politicians. It is all right if India can keep out of war. But will she be allowed to keep out of war? Even if we, in the exercise of our intrepidity and independence, refuse to follow Britain in a war which is of Britain's making, can we be so sure that somebody else or some other cause might not drag India into a war whether she likes it or no?

For generations, Holland has advertised her status as a neutral state. She is trembling to-day lest, at any moment, she should be invaded by Hitler because she just fits Hitler's plans as a jumping-off base for a German onslaught on Britain. For six centuries, Switzerland has been universally recognised as a neutral state. Can she claim that immunity in the next war?' If Britain is involved in a war with Germany, who knows that Afghanistan may not choose to strengthen her German ally by causing trouble to Britain through India? What we have to dread on the frontier is nothing half so serious as what may be in store in the Far East. All present indications make it abundantly clear that not much love is lost between Japan and Britain. What could give greater pleasure to Japan than to be able to annoy Britain by hitting her through Burma and India? And Japan has perfected her strategic position from which she could hit certainly Burma and probably India if she chooses and when it may be necessary. The strengthening of fortifications in Hainan Island is not calculated to ease the minds of Burmans or Indians. In brief, there is little warrant for the delusion that, in the next war, India will be the one safety spot.

If people will understand the world developments aright and the context and responsibilities of India in relation to such developments, the present apathy and unpreparedness of the Government, of the leaders and of the general public can be considered as nothing but the highest folly and total blindness to imminent danger. What is standing in the way of India preparing herself adequately for self-defence? The creed of non-violence has acted as a kind of dope and opiate. The pride and privilege that India has a new message to deliver to the world will be of little avail when enemy hordes descend from the frontier or when bombs rain on the cities and factories from Japanese planes. Our leaders have their gaze intently fixed on the political scene. More than anything, they understand political bargaining. We won't enter a war in which Britain is engaged unless Britain comes to a political understanding with us, is the sum and substance of their attitude towards war or war-preparedness. As for the Britishers in India, they have lived for decades and decades in such utter contentment with a policy of drift, of following the lines of least resistance, that it is beyond them to adopt an attitude or frame a policy different from what has been all these years. From the earliest times of British rule in India, the policy has been to place all reliance on the British element in the Army and to treat the Indian element as nothing more than supplementary. The thought of an Indian army has always conjured up for them the fears that such an army might, one day, turn

against the Britishers and rid India of them. Those fears are as vividly held to-day as ever. It is not the overwhelming necessity of the present but the craven fear of the future, that continues to determine the attitude and policy of Britishers as regards the raising of an Indian army. If only our British mentors could, in fundamentals, analyse the problem of Britain and the Empire and the security of both, they should have no difficulty in realising that, should India have to-day, two million sepoys trained and equipped, Australia and New Zealand need not feel helpless and unprotected; Mr. Neville Chamberlain need not confess his total impotence in the face of all the threats and wanton humiliations inflicted by Japan; Palestine and Egypt can be assured of such strength, mobilised with such speed, that Italy dare not entertain the hope that she could squeeze out Britain from the Suez Canal territory and from the Mediterranean by shock tactics directed from the Adriatic to the north, Libya to the west and Abyssinia to the south. Two million sepoys in India would have made all the difference to Britain's strength in the far-flung strategic points of the Empire. As it is, India had to send nearly 10,000 troops last year to Palestine. Has the army sent from this country made for peace in Palestine? Nothing of the kind. India sent recently 7,000 troops to Egypt. Does this guarantee that Egypt is now invulnerable? Nothing of the kind. With the recent addition, the army in Egypt compares unfavourably with the Italian army massed in Libya and Ethiopia. India sent, only the other day, 7,000 troops to Singapore. Does this provide an effective answer to Japan's challenge? Nothing of the kind. Not in such homeopathic doses can Britain prove for an adequate army strength in key-points like Singapore and the Suez. There is urgent and imperative need for a total review of the Empire defence policy and plans.

If I am asked to say what is the problem of the hour from the point of view of India as well as that of Britain and the Empire, my answer will be terse

(From Our Correspondent)

Bombay, October 21.

TO the average citizen of Bombay the reports that the railways are turning away traffic does not occasion surprise, and the publicity that has reinforced the appeal to keep wagons moving has created an enormous fund of goodwill that will help the railways to demonstrate their capacity and reveal their limitations. It is realised that there is not much use grumbling about the withdrawal of privileges. That rolling stock is deficient, that locomotives are not enough may be reiterated, but few here would care to look at old figures to ascertain what the railways can do or cannot when traffic keeps growing. That is because the Agent and General Manager of the G. I. P. Railway explained how the Indian railways were standing up to wartime exigencies. The recent lecture to the Rotary Club reduces the problem to its essentials and furnishes also facts and figures that can be employed with advantage in showing that the railways are efficient and skilled. Mr. Cuffe said that if wagons are not numerous enough nothing can be done about it for as he pointed out, to provide 30 per cent more by way of wagons would involve an outlay of Rs. 15 crores, not a sound investment even if the money could be had. Mr. Cuffe explained that wagon shortage may arise from a deficiency under power, staff, yards or any other reason. Shunting and marshalling facilities cannot be shaped at will and the ability of terminals to deal with additional traffic is also limited. Besides there are difficulties regarding labour and space at all times. Mr. Cuffe referred also to the capacity of lines to carry additional wagons. How the war has led to unusual pressure was explained by Mr. Cuffe who said that troop trains and supply trains were responsible. Prisoners of war and ambulance specials led to a new demand for carrying space, and it was pointed out that more stock was needed for moving a Division than in the last war. Wartime industrial activity stimulates railborne traffic like military operations and movements. Mills and factories ask for more materials and more fuel too for munitions production. As for civilian industry, the lack of coastal shipping necessitates a turning aside to the railways. New depots have to be prepared for the use of the Army and the railways have to transport the necessary material. Mr. Cuffe stated that a large volume of coal and cement has to be carried by rail because coastal steamers are scarce. Moreover many ports have deteriorated and the major ports are called upon to act as the outlets for traffic from all parts of India. Because the Deccan is the training ground for India's army, the G. I. P. has to play a great part in the transport effort. Mr. Cuffe cited figures to show that by August 1941 the G. I. P. had broken its own records set up since October 1940. Traffic had actually risen by 32.5 per cent between August 1940 and August 1941 and in the case of goods traffic, the increase was as large as 54 per cent. That the best use is made of existing engines and staff was indicated by Mr. Cuffe who explained how additional repair facilities had to be provided at running sheds. Borrowing of engines and transfer had been attempted and the impressment into service of overage locomotives had begun. It was stated that marshalling yards at Itarsi, Poona and Dhond are being improved and terminal facilities are being extended. Even the essential statistical organisation has been speeded up to let the railways take on the job of hastening war work. During the past twelve months railways have joined to act together and time is saved by diversion of trains and a lot of train mileage has been saved.

The appointment of Mr. E. W. Perry as Dewan of Kolhapur was announced last week. It was stated that Mr. Perry, who is Commissioner at Poona, has been chosen to put the new Executive Council on its feet. The change may presage a minority administration or not, but Mr. Perry is regarded as a happy choice because he has ample executive and secretariat experience. The retirement of Rao Bahadur Surve shows that the links with the old regime are broken and some hope that the succession question will soon be settled. The press here has stopped talking about it, but it must surely be known to Colonel Gaisford that the Mahratta principalities are not at all happy about the unconscionable delay and the Kurundwadi installation must have served as an opportunity to learn the views of influential Marathas.

WHY?

BECAUSE—

(a) Premiums are low.
(b) 2½% rebate on annual premiums is allowed.
(c) "Permanent Disability Benefits" is granted free of any cost.
(d) Double the insured amount in case of death by accident is paid at a very small cost of Rs. 1-8 per 1,000 per year.
(e) Special rebates on large size policies are allowed.
(f) Lapsed policies can be revived without paying the arrears, and, above all,
(g) BOMBAY LIFE Policies are not forfeited by the Company if premiums are not paid; but they are continued in force under the Company's Automatic Non-forfeiture Clause.

ASSETS Rs. 1,75,00,000

and simple: Raise an Indian army of two million without any delay, and, whatever is necessary to see that this is accomplished within the shortest possible time, must be done; everything else pales into insignificance. India is the only country in the Empire in which an ambitious project of this nature can be successfully taken on hand. Neither in Britain itself, nor in South Africa nor in Australia, much less in New Zealand, could an army be mobilised which can come anywhere near the two million mark. Men and material are available in India. The equipment and the expenditure of such an Indian army will be very much less than would be the case in the training of an army in any other country. Within six months, given co-operation and full determination to achieve results, my dream of a two million Indian army may be translated into a concrete fact. India needs such an army because the menace from across the frontier and the menace of Japan are real and imminent.

If India practises democracy and wishes to remain an important unit in the world democracy, it is to her interest to strengthen the hands of Britain. For, whatever our differences with Britain may be, we must gratefully own that Britain is the bulwark of democracy and that the future of world democracy is bound up with the strength and stability of Britain. I am not one of those who would like to see India remain in her present role of a subordinate and despised member of the British Empire. She must not cease her efforts till she secures an honourable place in the Empire. But, while striving for this, and while relaxing towards this end, India must also realise that, in the convulsions of the world to-day, she has to add her own strength to that of Britain for the cause of democracy. Britain, too, must, in her own interest, in defence of herself and that of the Empire, take all such steps as are necessary to enable India to be a unique and proud member of the Empire.

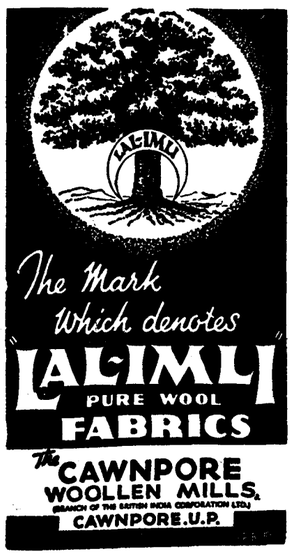
FREE OF INCOME TAX

How does a Defence Savings Certificate grow in Value ?
The value of a Rs. 10 Certificate increases year by year until it is worth Rs. 13-9 in 10 years.

Do I pay Income Tax on this increase ?
Not an anna.

Where do I buy Defence Savings Certificates ?
At any Post Office doing Savings Bank work or at any Savings Depot.



How do I buy Defence Savings Certificates ?
You can buy them in any multiple of Rs. 10 up to the limit allowed to each individual, viz., Rs. 5,000.

Can I buy Defence Savings Certificates by instalments ?
Yes. You can buy As. 4, As. 8, or Re. 1 Defence Savings Stamps and stick them on a card, which is supplied free when you buy your stamps, at the Post Office or Depot.

Suppose I'm ill, or want my Savings urgently ?
You can apply, at any time, for repayment of your Defence Savings Certificates.

Tit-Bits of Industrial Activity

Supplies Under Lease-Lend

A recent press note explained how imports of agricultural, road-making and hauling machinery are to be procured from the U.S.A. The application of the lease-lend procedure as from September is laid down in order to help British exports and if they cannot be had to procure them as essential supplies available under the lease-lend programme. The Director of Engineering or the Controllers of Supplies will have to be approached in the first instance, and the indent put up by any department must be covered by an acceptance from the Directorate-General of Munitions Production. Indents are to be bumper and supplies obtained for each quarter through the American Purchase Section of the Supply Department Supplementary import indents can be directly made in the U.S.A. on behalf of the Government. Private imports on licence will continue as before and the lease-lend procedure applies as in the case of oil only to governmental or quasi-governmental requirements.

Crepe Kraft

An indigenous source of supply of crepe kraft paper has been established. The paper made of bamboo pulp will displace imports. Large monthly output of this paper which has a variety of uses is expected. Though it has not the same tensile strength as the American or European paper, it is quite suitable. Tests for ascertaining its suitability for anti-gas pathways and stretcher covers are said to be in progress at present.

Casein Factories

The Bihar Industries Department is said to have drawn up a scheme for the manufacture of casein and factories are likely to be started. Three districts Patna, Bhagalpur and Darbhanga are said to offer suitable conditions and the scheme has been examined in its various aspects. A capital expenditure of Rs. 1 lakh is involved and the factories will give a new fillip to the plastic industry which can count on ample supplies of inferior types of lac.

U. P. Industries

A highly compressed statistical analysis of industrial progress in the U. P. has been issued by the officer in charge of the Commercial Intelligence section of the Department of Industries and Commerce. It is a handy booklet that reproduces the essentials available in the commercial directory by the Provincial Government this year. The increase in factories as between 1922 and 1939 was as much as 370. The labour force referred to was more than double and the U. P. had also 2½ million workers in cottage industries. The figures leave out of account the wartime stimulus and describe only the activity of the mill industry in the year 1938-39. The U. P. has reduced in the recent past its imports of foreign and Indian piecegoods while increasing its own exports. The U. P. is known as the main provider of hosiery, and in sugar too, its 70 factories account for over 6½ lakhs tons of sugar which is the chief export of the Province which also produced 2,177,000 maunds of jaggery. The tanning and leather trades gave employment to 125,000 workers and the cottage workers alone produced in a year over Rs. 51.6 lakhs worth of goods.

New Uses For Kamla

Kamla powder derived from the fruit of a plant growing in Orissa, Bengal, Bombay and the U. P. has a special value at present owing to the scarcity of dyestuffs. In the past, Amritsar exported the powder to silk weavers in the South. The U. P. Industries Department's recent bulletin speaks of its varied applications as a colouring material for food and drink. Its constituents have been found insoluble and harmless. Purged by sieving, the powder yields roiteria for admixture with a water-soluble derivative for colouring vegetable ghee and oils to shades of yellow colour. Beverages can be treated likewise but sweetmeats are not exactly suited.

Delhi Conference

Our Jute Correspondent writes:—

No definite news has yet come through from Delhi where representatives of the Jute Mills Association are discussing with the Government of India the question of controlling hessian prices in conjunction with the ceiling rates fixed for New York spot goods. It is understood that there is reluctance on the part of the Industry to fix maximum prices without a *quid pro quo* in the matter of a guarantee of adequate supplies of the raw material. And the lines on which the discussions are proceeding are reported to be that the Industry is prepared to take steps to ensure that the U.S.A. get their requirements at reasonable prices provided that the Govt. of India will bring pressure to bear on the Bengal Govt. so to adjust the latter's jute crop regulation scheme that there is no possibility of a shortage of the raw material in the next season. With the recollection of the recent "ramp" in ready hessians fresh in mind, when it cannot be said by their most ardent supporters that any effort at control of market prices within the industry was signally successful, it is not easy to understand what guarantee the Jute Mill representatives can put forward of greater success in this respect in face of any future "Bull" speculative movement. Doubtless the fact that Mills are now working 54 hours per week will have a deterrent effect on the gambling element, but at the same time it must be borne in mind that this is the limit of working hours under the Factories Act for single shift working, so that the Mills have no further margin in hand to counteract a speculative upward movement without recourse to double shift working—a course they would be very reluctant to adopt.

Meanwhile we have been experiencing here what has been described as a "Headlines" market. Operators have been largely influenced by the political and War news as it comes through, and the combined effect of continued German pressure in Russia and a renewal of the threatening attitude on the part of Japan, has been a mainly bearish tendency in all markets. This has been most marked in the Heavy Goods section of the Fabrics market where all descriptions have been sharply marked down.

IT'S A FACT—

that unemployment, illness and accident are the bugeys of the future. You can nullify their possible effect by having a reserve sum at your disposal to tide you over the period when your monthly income ceases to exist. Vol. XXVIII. No. 17 SATURDAY, OCTOBER 25, 1941. Price Re.1

Stock Markets to-day and to-morrow

WAR ORDERS AND INDIAN INDUSTRIES

STOCK exchanges, both in Calcutta and Bombay, have remained closed during most part of the week on account of the *Diwali* and *Id* festivals. But during the short period in which markets remained open there was no suggestion of weakness, and business continued to be normal. In fact, with the continued stubborn resistance of the Russians there was a slight rally. There is, however, considerable anxiety regarding the German drive towards the Caucasus and the bellicose attitude of Japan. But for the uncertainty regarding the Far Eastern situation, it would be reasonable to look for an early improvement in values.

Since 1937, the month of November has marked a period of active trading and recovery. It was in November 1940, that the second recovery movement since the war had its origin. Thanks to the ability of the Britisher to survive the 'Battle for Britain' of 1940, and the additional importance to this country as a result of the Eastern Group Supply Conference confidence was restored in the markets. There has been a heady flow of orders since June 1940.

Contracts exceeding Rs. 164 crores in value have been placed in India by the Department of Supply during the first two years of the war. For the period September 1939, to March 1940, the value of purchases exceeded Rs. 29 crores. From April 1940 to March 1941, the value of contracts totalled nearly Rs. 76 crores. For the five months ended August 1941, contracts placed exceeded Rs. 59 crores in value. Thus while for the first period the average value of contracts placed was Rs. 4.2 crores and for the second period Rs. 6.33 crores, it was as much as Rs. 11.8 crores for the third period. There has been a considerable acceleration in exports from this country as a result of the Russo-German war, especially after the Anglo-Soviet joint action in Iran. This is evident from the fact that payments received from the British Treasury to the Indian Government in this month on account of September purchases amount to the huge total of Rs. 23 crores.

Textiles head the list of articles purchased up to now. As has been pointed out on earlier occasions, the cotton textile industry is working to full capacity and the problem at the moment is how to produce enough. For sometime there were fears regarding Government control of industry. There is no longer any room for these fears as a satisfactory agreement has been reached between the All-India panel of millowners and the Supply Department representatives. As for price control, it has been only proposed that there would be fixation of limits for "Standard Cloth" varieties.

* * *

The fears regarding the possibility of fixation of prices for jute manufactures has naturally had a restraining influenue on prices for jute shares. It is reported that at the request of the United States the Government of India have decided to go into the question of fixing maximum prices for hessians. A conference of jute interests and Government representatives was held for this purpose on Tuesday this week. Nothing is definitely known yet regarding the outcome of the conference. Operators are naturally awaiting further developments. Both the hessian and jute futures markets registered a sharp decline in prices towards the end of last week. While the reaction in the jute futures market was rather pronounced, on the theory that the fixation of prices for hessians would mean fixation of prices for jute as well, there was a tendency to resist selling pressure in the hessian market, on account of the tightness of the spot position and good shipments.

* * *

The past year was a relatively good one for *Cawnpore Electric Supply Corporation*. Although the company did not receive the full benefit from the plant recently installed, because the generating set shipped in latter part of 1939 is not yet in service, sales of electricity showed a satisfactory increase, receipts from sales of current and other sources rising from £248,284 in 1939 to £276,900. Despite a consistent rise in production and other costs net profit for the year ended December 31st, 1940 was £42,487 compared with £33,019 in 1939, these figures being arrived at after allowing £35,000 depreciation in 1940 and £32,000 in 1939, and £12,505 for debenture sinking fund in 1940 against £12,102 in 1939. Final ordinary dividend is 7 per cent. again making 10 per cent. the total paid for many years. Nothing is put to reserve and the carry forward is £16,358, or over twice the amount of £7,871 brought in. In the following table are summarised the gross revenues, net profits, and earnings and dividends on the ordinary shares for the past five years:—

Year	Gross Revenue	Net Profit*	Ord. Earned	Shares Paid
	£	£	%	%
1936 ..	219,658	34,647	10.4	10
1937 ..	227,990	49,056	20.3	10
1938 ..	232,098	48,329	20.0	10
1939 ..	248,284	33,019	9.5	10
1940 ..	276,900	42,487	18.5	10

*After depreciation: £50,000 in 1936; £35,000 in 1937 and 1938; £32,000 in 1939; £35,000 in 1940; and debenture sinking fund: £12,102 in 1939 and £12,505 in 1940.

Issued capital at the date of the last balance sheet was £400,000, divided equally into cumulative 7 per cent. £1 preference and £1 ordinary shares. On July 16th, last, however, 118,500 new ordinary shares were placed on the London Stock Exchange at 25s. 3d. a share, which, after 3d. per share brokerage realised a net sum of £148,125. This money is to be used to finance the large-scale additions which have been made since 1939 to the company's fixed assets, which at December 31st, last amounted to £1,176,512, an increase on the year of £119,663. British Treasury consent to the new issue took almost a year to obtain—application was first made in August 1940 and consent was not given until June 30th, 1941.

At December 31st, 1940, liquid assets totalled £254,750 compared with current liabilities, including final dividends, of £119,374. Reserves then aggregated £607,530, of which £403,095 was for depreciation and renewals, £24,435 debenture redemption and £180,000 general. Debenture stock at 4½ per cent. interest has been reduced to £288,000 by operation of the sinking fund. Electricity is supplied by the company over an area with an approximate population of 1,150,000 persons. The local Authorities can purchase the undertaking on August 22nd, 1946, or in any subsequent ten-year period. Operation of a 3½ mile tramway system was abandoned and the trams ceased to run in May, 1933.

* * *

The old-established and well-known *Bank of Behar* has no need to worry about breath-taking expansion. The solid foundations of the past are there, and as one of the few Scheduled Banks in Behar, it enjoys more than local fame. The sixtieth report of the Directors for the half year ending June 30th recalls that profits have been stabilised and the Bank's position remains unaffected by the war. The profit for the half-year amounted to Rs. 50,160-13-5 and this sum added to the sum brought down from 1940 has been appropriated to the payment of dividends, free of tax, on the Preference, the Ordinary and the Deferred shares of the Bank. The report bears witness to healthy progress since the gross profit for the first half of 1941 exceeds Rs. 3 lakhs and the opening of a new pay-office at Raxaul has strengthened its con-

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, Oct. 24.

THE Calcutta Stock Exchange has remained closed during most part of the week under review on account of the *Divali* and *Id* festivals. Prior to the holidays markets were uninteresting and operators were inclined to await further developments. Business passing was on a very small scale. On reopening this morning after the long holidays there has been no marked expansion in business and quotations are mostly unchanged. There is still a holiday feeling in evidence and there has been no accumulation of orders. The war situation is as confused as ever and there is a general tendency to await developments.

The giltedged securities section has continued steady in spite of the uncertain tone of the other sections. There has been a slight hardening in money conditions. The Treasury Bills rate has increased to ten annas and eight pies per cent per annum from ten annas and six pies per cent per annum last week. 3½ per cent. Paper is quoting Rs. 96, 3 per cent. Defence Bonds 1946 Rs. 102, and 3½ per cent. 1947-50 Rs. 103-6.

As the Calcutta and Bombay Stock Exchanges were closed on account of the "Divali" and "Id" holidays the share tables do not appear in this issue.

—Ed. I. F.

Jute shares were rather hesitant pending the decisions of the Delhi Conference. It is now reported that no definite decisions were reached regarding the fixation of maximum prices. *Howrah* are quoting around Rs. 56-14. Coal shares have been quiet while Cotton shares have been uninteresting with *Elgin* quoting Rs. 26-14. In the Engineering section, *Indian Iron* and *Steel Corporation* are slightly higher at Rs. 32-3 and Rs. 19-8 respectively. There is, however, not much business passing among Sugar shares. *Champarun* are higher at Rs. 18-8. In the miscellaneous section *B. I. Corporation* were Rs. 4-11 and *Indian Cables* Rs. 27-14. *Titaghur Paper* were Rs. 22.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, Oct. 23.

Opening after the *Diwali* and *Id* holidays, the local share market displayed a firm attitude. Cotton mill shares were in fair demand, while planting issues continued to meet with good enquiries.

Securities: Prices continue unchanged in this section with 3½ per cent Paper quoting at Rs. 96-3 s.l., 3 per cent 1963-65 came in for business at Rs. 95-2 s.l. Among State Loans, there was restricted business, 3 per cent 1956-61 *Mysore Loan* being done at Rs. 104-15 and 4 per cent 1953-63 at Rs. 115-10. Provincial Loans attracted little attention, 3 per cent 1959 *Madras* changing hands at Rs. 97-7.

Mills: *Buckingham & Carnatic* and *Cambodia* continued to be steady at Rs. 279 and Rs. 10-10 respectively in the absence of sellers. It appears as though operators are inclined to view the current levels as rather fully-priced and are waiting for slight setback. *Pankaja* were available at Rs. 123; *Vasanta* at Rs.139 and *Madura* at Rs. 43-8.

Utilities: This section met with good investment demand, *South Madras Electric* ordinaries being done slightly higher at Rs. 15. Other shares were more or less unchanged.

Plantations: The outlook for planting issues continues to be good and from the crop particulars now available it is evident that planting companies are having a good period. *Cochin Malabar* changed hands at Rs. 9 c.d; *Malankara* at Rs. 42-8; *Udayagiri* at Rs. 8-2 x.d. and *Ayer Manis* preferences at Rs. 101. Among Tea shades, *Peria Karamalai* were absorbed at Rs. 19-4; *Chembra Peak* at Rs. 5-6 and *Nilgiri Neerugundi* at Rs. 2-9-6.

Sugars: *Mysore Sugar* were a dull market at Rs. 54-12. At the annual general meeting held last week, the proposal to increase the capital from Rs. 25 lakhs to Rs. 50 lakhs was thrown out since the Government exercised right to veto. *Travancore Sugars* were placed at Rs. 16-2.

Banks: *Bank of Mysore* after a long time came to business at Rs. 287. *Indian Bank* small shares met with good enquiry, being done higher at Rs. 62.

Miscellaneous: *Mysore Paper* were slightly better at Rs. 17-15. *Mysore Chemicals* came up for business at Rs. 18-4; *Mysore Matches* at Rs. 10-4 and *Spencer 'B'* preferences at Rs. 10-1. *Indian Steel Rolling Mills* ordinaries were dull at Rs. 8-2.

LONDON STOCK EXCHANGE

The London Stock Exchange has remained steady during the past week and moderate gains have been recorded. Giltedged securities are slightly better with 3½ per cent. Sterling Paper at 99¼. Among British funds, 2½ per cent. Consols were 82 5-8, 3½ per cent. Conversion Loan 106 7-16, 3½ per cent. War Loan 106½ and 3 per cent. War Loan 101 3-8.

Among other sections, Tea and Rubber issues are easier while Kaffirs are a shade better. Among Oil issues, *Anglo-Iranian* are lower. Among industrials, *Courtaulds* were higher in anticipation of an announcement regarding Viscose holdings.

NEW YORK STOCK EXCHANGE

Wall Street is uninteresting and there has not been any important change in prices for the major portion of the week. Towards the close a firmer tone has been noticeable, *General Motors*, being $39 7-8 *U. S. Steel* $ 53 1-8 and *Anaconda Copper* $26 7-8.

(Continued from Page 761)

nexions in North Bihar. The total deposits as shown in the latest balance-sheet as at June 30th, 1941 amount to Rs. 116.22 lakhs. The paid-up capital of Rs. 12.88 lakhs is supported by a Reserve Fund of Rs. 6.30,000 in addition to a Contingency Reserve of Rs. 50,000. The high proportion of Advances viz., Rs. 95.84 lakhs to total Resources of Rs. 143 lakhs is calculated to show that the Bank is happily placed in spite of the reports that trade demand for funds is slack. The degree of liquidity preserved by the retention of cash balances totalling Rs. 22.32 lakhs is assuredly proof that the Bank, which retains so far a limited interest in securities, has kept its first line of defence in very good condition. The dividends declared are amply covered by the profit for the half-year, and the addition made since 1940 to the Reserve Fund indicates that the Board pursues a policy at once generous and prudent.

BURMAH OIL PROFITS

(*By* R. Gordon Cummings.)

WHEN dealing with the results of *Burmah Oil Company* for the year 1939, I wound up my comments by saying: "The future must essentially remain obscure while the war continues, but taking into account the pooling arrangements made in India and Burma the trading profits of the group may suffer little diminution this year.... Where the earnings will suffer will be in a reduction in dividends from the large holdings in other oil concerns."

The accounts for the year ending December 31st, 1940 fully confirm this forecast. Trading profits actually rose by £840,000 to £2,768,233, but dividends from investments fell by more than 50 per cent, from £2,384,997 to £1,000,441. Commenting briefly on the year's working the Directors point out that, under war conditions, they cannot say too much. They do indicate, however, that the products of the group and the large and efficient organisation are proving of increasing value to the war efforts of India and Burma. Investment income could not be fully compensated by trading results of the operating subsidiaries.

After allowing for the various expenses, including an undisclosed amount for depreciation, the net profit for 1940 was £2,545, 612, or £890,000 below that of 1939. The dividend is again made up to 15 per cent, by a final payment of 10 per cent. But this time there is no bonus, which was 6 per cent. for both 1938 and 1939. The reduced distribution is fully covered by earnings. The Directors have transferred £250,000, the same as in 1939, to general reserve. They have also allocated £400,000 to taxation reserve, with the object of creating a fund to meet any exceptional increases in taxation. After these allocations and meeting all dividends the balance to carry forward is reduced by £464,865 to £236,536.

In the following table are summarised the profit and loss figures for the three years ending December 31st, 1940.

Year ended Dec. 31	1938 £	1939 £	1940 £
Trading Profits ..	2,149,533	1,928,328	2,768,233
Dividends, etc. ..	2,658,341	2,386,033	1,001,265
Total Income ..	£4,807,874	£4,314,361	£3,769,498
Less-Staff fund, fees, etc.	226,510	207,395	149,158
Income Tax ..	731,813	673,051	1,074,728
Net Profit ..	£3,849,551	£3,433,915	£2,545,612
To General Reserve ..	100,000	250,000	250,000
To Fields Reserve ..	500,000	*Nil*	*Nil*
To Taxation Reserve ..	*Nil*	*Nil*	400,000
Preference Divs. ..	300,000	300,000	300,000
Ordinary Divs. ..	2,884,668	2,884,668	2,060,477
Surplus (+) or Deficiency (−) ..	+64,883	− 753	− 464,865

It is worth recalling that in 1939, following the separation of Burma from India, the Company altered its methods of administration. Separate subsidiary companies were formed to take over and operate major functions in the two countries. All the necessary operating assets were consequently transferred to the new subsidiaries. Except, however, for giving corporate form and territorial identification to these trading operations of the group there has been no change in policy. *Burma Oil* holds all the capital of the operating companies, the financial policies of which continue along the old conservative lines of pre-diversification.

As the Directors now give a consolidated balance-sheet comparisons with previous years can be continued. The consolidated figures show that the conservative financial policy, for so long such an outstanding feature of the Company's administration, is fully maintained. Comparison of the 1940 balance-sheet figures with those of 1939 shows, however, two interesting and significant changes. Holdings of miscellaneous investments, which include the big holding of Anglo-Iranian Oil shares, have fallen by more than £3,000,000, from £15,085,586 to £11,971,796. As a compensating factor investments in British and Indian Government stocks have risen by almost the same amount, from £4,282,576 to £7,269,008. There is no official comment on these changes, which may relate to the liquidation of certain associated interests.

The following figures, which have been adjusted to take account of the final appropriations, summarise the balance-sheets for the past three years ending December 31st, 1940:—

Assets	1938 £	1939 £	1940 £
Property, etc.	1,299,410	1,250,781	1,149,115
Sub. and Assoc. Cos.	2,705,607	2,669,642	2,967,190
Miscellaneous investments	15,131,163	15,085,586	11,971,796
Liquid Assets, including giltedged investments	7,727,790	8,314,560	11,972,642
TOTAL ..	£26,863,970	£27,320,563	£28,060,743
Liabilities:	1938 £	1939 £	1940 £
Capital issued	17,736,513	17,736,513	17,736,513
Creditors, etc.	3,218,399	3,384,212	3,893,364
Reserves	5,206,904	5,498,443	6,194,330
Profit & Loss Balance	702,154	701,401	236,536
TOTAL ..	£26,863,970	£27,320,563	£28,060,743

Reserves at December 31st, 1940 were made up of Fire and Marine Insurance Accounts, £2,244,330; Fields Expenditure Equalisation Reserve £1,500,000; General Reserve £1,350,000; and Taxation Reserve £1,100,000. But these reserves do not represent the full strength of the Company's resources. Of its large holdings of £5,342,985 Ordinary stock in Anglo-Iranian Oil and £1,200,000 Ordinary stock in Shell Transport and Trading Company, Burma Oil values its Anglo-Iranian investment at par. Therefore, even at the depressed level ruling to-day this is worth almost twice its balance-sheet figure. Together the two investments in outside oil companies are currently valued in the market at over £12,000,000. Two years ago these investments had a market worth approaching £30,000,000.

Other assets include a controlling interest in Assam Oil Company, a fifty per cent. interest in Burma-Shell Oil Storage and Distributing Co., of India and a controlling interest in the Tinplate Co., of India. On top of this the operating subsidiaries own extensive refineries, tank storage plant, tank ships and pipe-lines. The issued capital of £17,736,513 is divided into £250,000 6 per cent. Cumulative First Preference stock, £750,000 6 per cent. Cumulative Second Preference stock, £3,000,000 8 per cent. Preference stock and £13,736,513 Ordinary stock.

For another year the future must remain somewhat obscure. Not on account, however, of the Company's own trading operations, but rather because of the continuing uncertainty which must face the oil companies in which it has such large share holdings. Bound up as they are so largely with European trade it is impossible to foreshadow the immediate earning capacity of the Anglo-Iranian and the Shell groups. But taking account of the sound foundations on which these companies—and *Burmah Oil*—have been built up holders of the *Burmah* Ordinary stock should not sell.

BRITISH COMPANIES IN INDIA

(BY R. GORDON CUMMINGS)

SEVERAL factors were responsible for a further sharp reduction in the profits of *Madras Electric Supply Corporation* during the year ended December, 31st, 1940. The Electricity Tax and the lower tariff imposed by the Madras Government—operative for the whole year against part only in 1939—cut into gross revenues. In addition the cost of generation and distribution was greater due to increased price of fuel and higher rates of wages. The outcome was that, although gross revenue expanded by £4,587 to the new high record of £293,618, net profit fell sharply to £48,496, from £58,628 in 1939 and £85,981 in 1938. The past year's net figure was arrived at after again allowing £50,000 for depreciation and renewals. Following a reduction last November in the interim ordinary dividend from 2 per cent. tax free to 1½ per cent. tax free, the final distribution is cut from 4 per cent. to 2½ per cent. both tax free. Total divdend for the year 1940 is therefore 4 per cent. compared with 6 per cent. for 1939 and 8 per cent. for many years previously, all tax free. Nothing, as in 1939, is put to reserves and the carry forward is £281 lower at £41,330. Board of Trade units sold last year increased by 5.8 per cent. from 48,839,809 to 51,455,882: the number of consumers connected went up by 6.3 per cent.

Here are comparative revenue figures for the last six years ended December 31st, 1940. The table shows gross revenues, net profits, and earnings and tax free dividends on the ordinary shares:—

Year	Gross Revenue	Net Profit	Ord. Shares Earned	Ord. Shares Paid
	£	£	%	%
1935 ..	271,338	91,619	11.1	8
1936 ..	271,363	85,597	10.2	8
1937 ..	276,411	85,607	10.2	8
1938 ..	292,652	85,981	10.2	8
1939 ..	289,031	58,628	5.7	6
1940 ..	293,618	48,496	4.0	4

In each of the first four of the above years £10,000 was transferred from profits to investment reserve.

Issued capital is £1,050,000, divided into 451,800 cumulative £1 free of tax 5½ per per cent. preference shares and 598,200 £1 ordinary shares. There is outstanding £100,000 4½ per cent debenture stock, redeemable October, 1948. The balance sheet of December 31st, 1940 showed a net increase of £14,818 to £1,660,835 in capital expenditure, with investments remaining unchanged at £102,740 and liquid assets totalling £218,584 compared with current liabilities, including deposits and final dividends, of £129,558. Total reserves of £661,271 were made up of £509,635 for depreciation and renewals, £68,657 share premiums and £82,979 general reserve. The Company supplies electricity to the City of Madras and district. The undertaking can be purchased by the Local Authorities in August, 1947 or every ten years thereafter. All the ordinary shares of Madras Electric Tramways are owned by the Company. Results of the tramway company for 1940 showed a loss of £2,134 and it was impossible to pay even the preference dividend.

James Finlay & Company

The report of this important company for the year ended December 31st, 1940 is interesting in several ways. First, trading profits are more than trebled. Second, investment income is by far the highest for at least a decade. Third, practically all the increase in earnings is absorbed by taxation. Trading profits were £221,507 compared with £68,493 in 1939; investment income was £298,853 compared with £263,967; and taxation provision was 3½ times greater at £250,000 against £65,000. Total dividend on the ordinary capital is easily maintained at the 12½ per cent. rate paid for each of the three previous years. Earnings were 16.6 per cent, an increase of 1.7 per cent. Last year's dividend was paid as two interims—5 per cent. and 7½ per cent. After providing the usual £30,000 for the preference dividend and allocating £15,000 for writing down buildings and machinery, as in 1939 and 1938, the balance to carry forward is £309,955, an increase of £15,974 on the amount brought forward from 1939.

Trading profits, investment income and net profits for the last five years ended December 31st, 1940 are summarised in the following table:—

Year	Trading Profit	Investment Income	Net Profit
	£	£	£
1936 ..	7,185	224,502	181,004
1937 ..	19,474	232,206	229,971
1938 ..	34,740	264,214	243,323
1939 ..	68,493	263,967	240,403
1940 ..	221,507	298,853	248,474

After deduction of the preference dividend and allowance for income tax, earnings on the ordinary capital for these years were: 1936, 10.1 per cent.; 1937, 13.6 per cent.; 1938, 14.8 per cent.; 1939, 14.9 per cent.; and 1940, 16.6 per cent. Dividend for 1936 was 10 per cent. and for each of the other years 12½ per cent.

Issued capital is £2,000,000 divided into £500,000 in £1 cumulative 6 per cent. preference units and £1,500,000 in £1 ordinary stock units. The balance sheet of December 31st, 1940 shows total assets of £6,058,987 —land, buildings, machinery, etc., £201,058; shares in subsidiary companies, £710,510 and advances thereto £363,067; general investments. £3,828,187; and liquid assets, £956,165. Current liabilities, including final dividends, banking deposits and bank overdrafts, totalled £1,522,524. Total reserves were unchanged at £2,226,508. The value of the investments, including those in subsidiaries, was, however, estimated at £5,014,549, a surplus of £475,852 on the balance-sheet valuation. Taking the investments at market values, including reserves and surplus, and allowing for the preference capital, the break-up value of the £1,500,000 ordinary capital at December 31 last was therefore £4,512,315, or 60s. per £1 unit. The current market price is only 52s. 6d.

Principal interests of the company are in India and Ceylon, where it has large investments in jute mills, cotton presses and cotton mills. In addition it acts as agent for tea and other plantation companies, steamship, insurance and other concerns, and carries on business as merchant bankers. Included amongst the large interests are the four tea companies whose latest results will be reviewed next week.

COMPANY MEETING

CAWNPORE ELECTRIC SUPPLY CORPORATION LIMITED

The annual ordinary general meeting of the Cawnpore Electric Supply Corporation, Ltd. was held in London on August 14th last. Mr. K. A. Scott-Moncrieff, Chairman of the company, presiding.

In a statement commenting upon the work of the year ended on December 31, 1940, the Cchairman observed—

During the year under review, there was a satisfactory increase in our sale of electricity. The revenue from that source, amounting to £276,899, was £28,616 more than we received in 1939, while generating and distributing costs increased by only £5,853. On the other hanl, there was an increase of £5,358 on General Charges, and after bringing into account other sundry expenses and receipts, we carry to Profit and Loss £96,692, which is £16,872 better than the 1939 figure.

In the Profit and Loss Account a sum of £35,000 has been placed to Depreciation and Renewals Account, which now stands at £403,095, and in addition to the £12,000 of Debenture Stock cancelled in 1940, we have reserved £12,504 19s. 0d. to meet Sinking Fund requirements on 1st January, 1941. Having regard to the income tax recoverable from payments of Debenture interest and of dividends, a sum of £5,000 is considered sufficient provision for income tax, to which account that sum has been transferred.

The Board recommend once more payment of a final dividend of 7 per cent. on the Ordinary Shares of the Company, leaving a balance of £16,358 to be carried forward.

To finance the provision of additional plant and mains, the principal item of which is a new boiler ordered prior to the outbreak of War, application was made to the Treasury in August, 1940, for permission to raise £150,000 of new capital, and after prolonged negotiations the consent of the Treasury was obtained on 30th June, 1941.

The terms we were then able to arrange were more favourable than those obtainable in August, 1940, and on which our original application for sanction to issue was based. As any change for the worse in the War situation would have been immediately reflected in the Money Market, and moreover as the permission to issue was subject to the condition that the period of validity of Letters of Renunciation must not exceed six weeks, we took the opportunity of placing on July 16th, on the London Stock Exchange, 118,500 Ordinary Shares at 25s. 3d. per share, which, after paying 3d. per share brokerage, realized £148,125. These 118,500 shares formed part of the 347,986 Ordinary Shares authorized by the Articles of Association and were issuable on such terms and conditions as the Directors think proper.

These new shares will rank for dividend in the 1941 Accounts and in view of this and of the general rise in running expenses, it is prudent to have the proposed increase in the amount carried forward.

During the year under review, and during this year up to date, we have not obtained the full benefit of the plant recently provided (we spent £121,094 in 1940), one reason being that the Generating Set shipped in the latter part of 1939 is not yet in service. Our sale of electricity this year shows a satisfactory increase, but costs also are rising. Though it would be unwise to make any forecast of the future, I can say that up to the present, progress in 1941 is satisfactory.

In conclusion I would pay tribute to the good service rendered to the Company by our Agents, and by our staff in Cawnpore, to whom our thanks are due for the satisfactory results shown in our 1940 Accounts.

The directors' report and statement of accounts were unanimously adopted, and Mr. S. H. Taylor, V.D., who retired from the board by rotation, was re-elected.

A cordial vote of thanks was passed to the Chairman and Directors, and to the Agents and staff in Cawnpore.

(Annual meeting 5th November, 1941 at 11 a.m.)

Audited accounts for the year ended 30th April, 1941:—

After providing for depreciation, Income, Super and Excess Profit taxes and all other charges for the year, the accounts show a profit of Rs. 11,29,777-7-4. Adding the balance brought forward of Rs. 2,01,739-7-11 there is a total of Rs. 13,31,516-15-3. Out of this amount interest on Preference Shares up to 31st December, 1940 was paid, leaving a balance of Rs. 12,10,850-4-7. From this sum payment has to be reserved for interest, free of Indian income-tax, on the undernoted Preference Shares for four months ended 30th April, 1941:—

	Rs.
1st Issue of 7% Preference ..	14,000 0 0
2nd „ „ 7% „ ..	16,333 5 4
3rd „ „ 6% „ ..	30,000 0 0

There is an available balance of Rs. 11,50,516-15-3 from which the directors recommend a dividend of Rs. 25 per share, free of Indian income-tax, leaving a balance of Rs. 1,00,516-15-3 to be carried forward.

Howrah Iron Works:—Although all the shops maintained a fairly continuous production throughout the period, the completed turnover has been smaller than the previous year, owing to difficulty in obtaing imported materials to complete jobs. This is reflected in a large increase in the Work-in-progress account as compard with last year.

There was particularly heavy pressure on the Machine shops. Rolling stock orders were not plentiful and the Structural Shops experienced delays owing to scarcity of steel supplies.

The multifarious resources of the workshops are being increasingly utilised by the Government for outturn of essential war supplies. No. effort is being spared to expedite the supplies or to undertake new experimental work.

Pottery Works:—The Works at Raniganj have been very busy during the whole year, principally in supplying material for key industries of vital importance. Demand for other products was satisfactory. A scheme of remodelling a portion of the Jubbulpore Works has been taken in hand.

Managing Agents:—Messrs. Burn & Co.

Authorised, Issued and Subscribed Capital—Rs. 70,00,000 in 6,000 7% 1st Pref. of Rs. 100; 7,000 2nd Pref. of Rs. 100; 15,000 6% Pref. of Rs. 100 and 42,000 Ordy. of Rs. 100, all fully paid up.

Synopsis of the Balance Sheet as at 30th April, 1941:—

CHITAVALSAH JUTE MILLS CO., LTD.

Audited accounts for the half-year ended 30th June, 1941:—

Including the balance brought forward from last half-year and providing for interest, Debenture interest, commission, etc., the account shows a debit balance of Rs. 5,456-13-1, which is carried forward.

Although the permissible weekly working hours under the Indian Jute Mills Association Working Time Agreement were 45 only, these Mills worked 54 hours per week, thus continuing to make up the time lost during the strike of 1939.

Managing Agents:—Messrs. McLeod & Co., Ltd.

MARKET POINTERS

Maximum Prices for Hessian:

STRONG opposition to the reported move for fixing maximum prices for gunnies exported to the United States of America, is conveyed in a communication addressed by the Indian Chamber of Commerce, Calcutta, to the Government of India.

The chamber states that in the interests of the industry and the ultimate consumer in America, the American Government have fixed maximum prices for the sale of hessian in that country with effect from Aug. 16.

"The American authorities referred in this connexion to the wholly unjustifiable increase in the margin between what importers pay for hessian and what they sell it for an America. The Government of India, it is understood, have now taken up the question and have also convened a conference of jute interests at Delhi on Oct. 21 to consider this question."

The chamber adds that while it has nothing to say against the action taken by the American Government to control prices of hessian in that country in the interests of the American industries and consumers, it fails to see any reason why the Government of India should fix maximum prices of an export commodity in this country "for the benefit of American buyers and at the cost of Indian trading interests and the large number of jute growers."

The maximum price fixed by the American Government is approximately 15 per cent. above the prices prevalent in the Calcutta market and the Chamber, therefore, feels no action is called for on behalf of the Government of India.

Fixing of maximum prices for hessians will, according to the chamber, be detrimental to the interests of the large mass of jute growers also, as it will be necessary for maximum prices of raw jute also to be fixed. The chamber, therefore, oppose any action on the part of Government of India for fixing maximum prices for hessian.

* * *

Indian Sea Customs Revenue:

According to returns received in the Department of Commercial Intelligence and Statistics the total gross Indian sea customs revenue, including land customs but excluding salt revenue, collected in British India during the month of September, 1941, amounted to Rs. 3,51 lakhs as compared with Rs. 3,16 lakhs in August, 1941. and Rs. 3,60 lakhs in September 1940. The total gross central excise duties on motor spirit, kerosene, sugar, matches etc., amounted to Rs. 1,17 lakhs in September, 1941 as compared with Rs. 1,11 lakhs in August, 1941, and Rs. 57 lakhs in September, 1940. The grand total of gross customs and central excise revenues realised in the six months ended September 1941, was Rs. 28.03 lakhs as compared with Rs. 23.99 lakhs during the same period last year. Of this amount, import duties accounted for Rs. 20,16 lakhs, export duties for Rs. 1,56 lakhs, land customs and miscellaneous for Rs. 31 lakhs and central excise duties for Rs. 5,99 lakhs.

* * *

Cotton Consumption:

The following statement of Indian Cotton (pressed and unpressed) consumed in mills in India has been issued by the Indian Central Cotton Committee. It is based on returns made under the Indian Cotton Cess Act, 1923, by mills in British India and on voluntary returns from mills in Indian States. The figures are given an bales of 400 lbs. net. They represent the consumption during August 1941, August 1940, since September 1940, and during the corresponding period last year.

British India: 264,053, 223,633, 2,957, 798, 2,462,063: Indian States: 58,768, 48,323, 622,412, 556,698: Total India: 322,821, 271,956, 3,580,320, 3,018,761.

Owing to corrections which have sometimes to be made in the figures previously published, the progressive totals shown in these statistics do not necessarily represent the sum of the latest month's figures and the progressive totals published in the preceding month.

* * * *

Sale Price Of Sugar:

The Indian Sugar Syndicate is reported to have raised its member mills' minimum selling prices of sugar by another annna per maund. The basic prices remained unchanged. As the price increase had been announced early, the Syndicate's sales office in Cawnpore alone accounted for the sale of about 150,000 bags during the last two days. The sales were not related to any genuine consumers' demand, and was made mostly by selling agents on their own account.

* * *

Burma Rice Crop Forecast:

In view of the decision of the Government of Burma, recently announced, to control the export of next year's rice crop, special interest attaches to the first forecast of the rice crop for 1941-42 now published.

The area likely to mature is estimated at 12,503,200 acres which is 61,300 acres above last year's final figures. The area destroyed this year is estimated at 147,800 acres, which is 66,600 acres above the estimate last year. This is mainly due to floods, insufficient middle rains, and insect pests in certain areas.

* * *

Bombay Burmah Trading Co:

At a meeting of the directors of the Bombay Burmah Trading Corporation, Ltd., held in Bombay last week, it was resolved to recommend the declaration of a dividend of 16 per cent. free of income tax, for the year ended May 31.

* * *

Rise In Railway Earnings:

The total approximate gross earnings of all State-owned railways for the period (ten days) ended September 30 (18th period) amount to Rs. 342 lakhs. This is Rs. 40 lakhs more than the approximate gross earnings for the corresponding period in the previous year, or Rs. 31 lakhs more than the actuals for the corresponding period of 1940-41. The total approximate gross earnings for April 1 to September 30, amount to Rs. 60.11 crores. This is Rs. 8,39 crores more than the actuals for the previous year.

* * *

G. I. P. Railway:

The approximate traffic returns of the G. I. P. Railway for the 10 days ending October 10, 1941, amounted to Rs. 53,41,000, while the actual earnings for the corresponding period of last year came to Rs. 44,55,000.

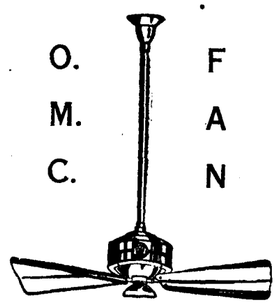
ISSUED WEEKLY

Vol. XXVIII. No. 18 SATURDAY, NOVEMBER, 1, 1941 Price Re. 1

Insure and Increase Nation's Strength

Financial Independence of the individual is the measure of Nation's financial strength.



In this hour of world turmoil, all Life Insurance Policy-holders should take stock of their insurance cover and ascertain just how strongly they are fortified against the unpredictable that lies ahead.

And, those individuals who have not yet made provision for their protection need do so without delay and thereby contribute towards Nation's strength.

Be advised and write to-day to

WORLD OF INDIAN FINANCE

Calcutta,

Friday Evening.

INTERBANK call money continues to be quoted at ¼ percent in Bombay and ½ percent in Calcutta, the rates being purely nominal. Banks are not keen takers of term deposits, and are prepared to oblige to the extent of accepting renewals of deposits. On October 10, the deposits maintained by member banks with the Reserve Bank were Rs. 49.66 crores. By October 24, there has been a decline in banks' balances with the Reserve Bank by nearly Rs. 5 crores to Rs. 44.83 crores. This fall in banks' balances might suggest that banks might be willing to be less indifferent to new deposits. This has, however, not been the case. It is quite likely that the falling trend in bank's deposits has continued as, in addition to the Rs. 2 crores per week of tender Treasury Bills, the Government of India have recommenced sale of tap bills. Judging from the applications of this week's Treasury Bills tender day there is reason to believe that sales of intermediate bills this week may prove to be quite satisfactory. In addition, the Bengal Government are coming on the market to-day, for Treasury Bills for Rs. 1¼ crores. The outflow of funds from the money market in receipt of Treasury Bills during the current week may thus be well over Rs. 4 crores. This is bound to have an effect on the cash balances maintained by the scheduled banks with the Reserve Bank as well as on the sentiment, if not the rates, in the money market.

It must not be forgotten, however, that the disbursements now being made by the Central Government on account of war supplies and Allied commitments, are increasing by leaps and bounds. A good part of the funds in respect of such payments must find its way into the coffers of banks. We may, therefore, assume that there is an actual possibility of considerable reinforcements to the balances of banks. From this point of view, the drain caused by the increased sales of Treasury Bills will not be felt.

The Government are equally comfortably placed as regards their cash position. As on October 24, the Central Government's balances with the Reserve Bank were Rs. 10.65 crores. This shows a decline of Rs. 1½ crores as compared with last week. It has, however, to be remembered in this connection that, after the usual monthly receipt of sterling payment from the British Government, the Indian Government found their ways and means position was exceptionally stronger, that they could cancel *ad hoc* securities for Rs. 8 crores in the week ended October 17. During that week, there was an addition of Rs. 12 crores, to the sterling securities held in the issue department of the Reserve Bank; and, in the ordinary course, this would have meant currency expansion for Rs. 12 crores. The financial authorities, however, decided on reducing *ad hoc* securities by Rs. 8 crores so that the actual expansion was only Rs. 4 crores. To the extent that *ad hoc* Treasury Bills for Rs. 8 crores were reduced, this must have caused a corresponding cut in the cash balances of the Central Government. That is to say, after losing Rs. 8 crores by this operation, the Central Government have a cash balance of over Rs. 10½ crores in the penultimate week of this month. The bank returns for October 31 (failing which the bank returns for the following) should show a considerable increase in Government's cash balances on account of sterling receipts from the British Treasury. The present cash position of the Central Government is so satisfactory that they may not have to seek recourse to ways and means advances from the Reserve Bank during this month. In earlier months, pending the receipt of sterling payments from the British Government, the Central Treasury was finding it necessary to avail itself of ways and means advances towards the closing days of the month. It is quite on the cards that the ways and means position in October is tided over without such ways and means borrowing.

The exchange market has been more active. There has been a good showing of export bills both in sterling and in dollars. Remittance enquiry also has been fairly appreciable. The freight position is definitely more encouraging.

Banks were sellers of T. T. on London Ready up to six months forward at 1s. 5 31/32d., and banks were buyers of T. T. on London Ready up to six months forward at 1s. 6 1/32d.

D. A. sight bills quoted 1s. 6 9/32d., for three and four months.

Interbank call money still continues unchanged at ½ percent.

Firms' money for call and short is ¼ percent and ½ percent from one to four months deposits.

TREASURY BILLS

India

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills were opened on Wednesday, the 29th October, 1941. Total amount offered was Rs. 4 crores, 33 lakhs and 75 thousand. Tenders at Rs. 99-13-6 per cent were accepted in full and those at Rs. 99-13-3 per cent were allotted approximately 20 per cent. Lower tenders were rejected. Total amount accepted was Rs. 2 crores, the average rate of accepted tenders being aanas ten and pies three per cent. per annum.

Tenders for Rs. 2 crores of three months' Government of India Treasury Bills will be received on Tuesday, the 4th November, 1941. Successful tenders should make payment on Friday, the 7th November, 1941. Other conditions are as usual.

Three months' Intermediates will be sold from the 20th October, 1941 to the 3rd November, 1941 at Rs. 99-13-9 per cent subject to the conditions previously announced (viz. sales can be stopped at any time without previous notice if Government think it necessary).

During the week ended the 24th October, 1941 Government of India Treasury Bills for Rs. 1,37,50,000 were sold in favour of the Issue Department of the Reserve Bank of India.

Bengal

Tenders for Rs. 1 crore and 25 lakhs of three months' Government of Bengal Treasury Bills will be received at the Reserve Bank of India at Calcutta and Bombay up to 1 p.m. (Standard time) on Friday, October 31, 1941.

Successful tenderers will be required to make payment and take up their bills on Monday, November 3, 1941.

IN THE CALCUTTA & DISTRICT

NATIONAL DEFENCE AND SAVINGS WEEK

Every citizen of Calcutta should buy at least one Defence Savings Certificates to protect himself, and to help towards Victory. Thus Calcutta will give a lead to India.

Buy a Savings Certificate a Day in the Week.

HOW TO BUY DEFENCE SAVINGS CERTIFICATES

Defence Savings Certificates each costing Rs. 10/- are sold at Post Offices and through Scheduled Banks.

If you cannot afford to invest Rs. 10/- immediately you can buy Defence Savings Stamps which cost only As. 4 each. When you have Stamps to the value of Rs. 10/- you can exchange them at the Post Office for a Defence Savings Certificate.

NOV 29 TO DEC 6

BUY A SAVING CERTIFICATE A DAY IN THE WEEK

Space given by the Imperial Bank of India.

Finance Abroad

Thursday Evening.

THE interest of all has naturally drifted to the Don Basin where great events are in the making. It is hardly possible to relate events in the financial sphere to war developments unless it be to emphasise what is self-evident, that President Roosevelt's last speech has had the desired effect in London, and Indian centres too have reacted favourably. The enlarged demand, as from this week, for bank deposits taken for six months at 1⅛ percent has been reported in a Reuter cable which said that a temporary stringency had developed in the money market last week with the result that total applications for last Friday's tender of Treasury Bills had declined to £148 million against the usual issue of £75 million, one of the consequences being a quota of 38 per cent in favour of the market. The rate showed little or no change and it is this fact that stands out after reviewing developments. Competition for Treasury Bills might not be so keen as in September when bills maturing in December would have been sought by banks, but the main change, in the direction of additional war expenditure, has scarcely caused a ripple. It is known that savings have been stimulated considerably and the last estimate that Britain was saving at the rate of £10½ million per week on an average showed that the investor's response was definitely improving before the 2½ per cent war bonds came. There has been since a new effort to bring out money by holding a Warship Week and it is not the dockyard towns that are taking the lead in this respect. A very large sum was forthcoming on the day it was started and the campaign has its lessons for those connected with a Savings and Defence week in Calcutta. Great things are hoped in the light of the spurt in subscriptions to the Defence loans during October. The importance of encouraging saving and defeating inflation at the same time has been universally recognised, and the experience of Britain has merely to be copied. Since no emergency budget appeared in September in Britain it is generally assumed that the Treasury is on an easy wicket. It has been calculated that the total expenditure for 1941-42 would not be over £4500 million and the Chancellor would not have to take any steps to augment revenue before April 1942. It has been stated that revenue receipts for the first half were fairly high at £737,000,000 and it is presumed that the total revenue for 1941-42 would be in excess of the estimate of £1786 million since tax receipts show a striking rise in the final quarter.

The curb on higher wages remains and even if production in the sphere of heavy industry keeps rising, there may be no change in prices or the cost of living. The taxation of war profits has reached its peak, and it is only in regard to the refund provision that there will be anxiety, though income tax at 10sh in peacetime should provide the money for paying back the companies' share of E.P.T. It is this belief which explains the lift in Home Industrials over a fairly long period just as the reduction in losses at sea accounts for the renewed popularity of shipping shares. Since it is belived that there won't be bottlenecks in the sphere of fuel and transport on the scale noticed last year, there is good support for the view that Industry, because of higher production greater economy can stand a fresh dose of taxation. Conditions in the third quarter appeared quite satisfactory to a foreign journalist like Oswald Dutch who summed up by saying that war production compared with the position a year ago showed an increase of 400 percent revealing incidentally that the losses caused by the Battle of Britain were completely wiped out.

Not long ago an assurance was given by the Chinese Stabilisation Board that supplies of foreign currency would be made available on the stipulated terms to importers. Apart from the presence of the Niemeyer-Cochrane mission in China, there is the fact that the last exchange crisis in Shanghai was brief. There is every sign that U.S. help for China would increase, and the Senate which has raised the second Lease-Lend appropriation to over 6 billion dollars is sure to encourage the Administration in its policy of greater assistance to China. The looting of Foochar may impel foreign interests to make China's cause their own and help China to gain more money through trade. Dr. Grady's mission covered the investigation of China's mineral supplies and if the arming of U.S. merchantmen comes, the transport of antimony, tungsten and other minerals should not present any problems.

The resumption of diplomatic relations with Mexico will not surprise those who knew that Mexico's anti-fascist policy would bring its reward. Further, it was awkward to leave British interests, as from 1938 in the charge of the Norwegian Minister, when the Norwegian Government itself was in exile. The British Government's decision was largely influenced by the fact that the fanatical Cardenas has been replaced by General Camacho who has initiated the swing to the right. The results of the restoration of cordial relations after Senor Padilla's statement that normal diplomatic intercourse was possible can be seen in the rise in Mexican Eagles to 12sh, and over. Evidently the speculator thinks that Mexicean Eagle with its Canadian interests and large tanker holdings has still got live assets in Mexico though it would be too much to expect the hands of the clock to be put back. What the change means to Mexico's currency can hardly be seen at present, but appreciation is quite likely though it must not be forgotten that Venezuela, which is in a better position than Mexico, felt obliged to devalue her currency slightly in April.

The most interesting development of the week remains to be described. A report that the Nazis are selling French bank notes in Lisbon has appeared, and the usual comment has been made. Whether it is the cost of occupation that is being converted into foreign currency in a neutral capital or private loot is not known, but it is quite likely that the Nazis who are shooting hostages out of hand are, not likely to show any great regard for property rights. A partiality for sterling has been manifested by the holders of france notes and the rate mentioned in the report was 600 to the pound showing that depreciation since the summer has been rapid and large in the case of the French currency. The Germans are evidently in a hurry to get as much as they can before the franc depreciates further and it is possible to compete the external value since the franc is not quoted in New York though the average value for 1940 is returned as 2.082 cents showing that the franc until the establishment of the Vichy regime was quite steady.

The entry of stolen notes into India has been guarded against by a Reserve Bank notification issued in September. A subsequent notificaton was referred to in a press meassage a fortnight ago: It dealt with the subject of remittance of dividends and profits accruing to foreign older of assets in India and remittance there of was prohibited. That seemed the purport of the notification which made mention of the fact that foreign currency in limited quantities would be made available for essential purposes but not for the transmission of earnings on the oversea, or to be precise, Indian investments of foreigners. The language suggests that the peremptory blocking of dividends and interest is contemplated, and it is merely an extension change control, as hitherto practised. Sterling countries are unaffected, and it seems likely that only U.S. firms or firms owned outright by U.S. firms will have to keep their money in rupees in India. Film renters are sure to be hit, and the freezing for the duration may have unexpected repercussions though nothing positive can be said, as it is not known how much money in India belongs to U.S. and Canadian firms who are affected by the order. The export of capital or currency has been permitted in the case of Haj pilgrims this year also. There is no ban on the removal of gold and a notification issued this week states that a second class passenger to Jeddah can take Rs. 1,100 plus ten sovereigns while a first-class passenger can take Rs. 2,200 plus 30 gold sovereigns.

The War and Next Budget

WITH the beginning of November, the budget for the new financial year begins to loom larger in the mental horizon of the Finance Department and those who are likely to be affected by the financial plans of the Central Government. The consideration of the next budget by the Finance Department is, of course, good grist for the speculators' mill. And the market begins to buzz with rumours of likely changes in taxation. The introduction of the Excess Profits Tax in 1940 set up a precedent in favour of such measures of new taxation being introduced well ahead of the regular budget for the new financial year. One might, perhaps, go earlier in our financial history and refer to the emergency budget of Sir George Schuster when a highly disquieting deterioration in Central finances was sought to be arrested by timely measures of retrenchment and or new taxation. The expenditure caused by the present war may be deemed to have had effects on the Central budget not dissimilar to those of the Great Depression of the early 'thirties. And if budgetary equilibrium is being too rudely upset by an alarming increase in expenditure on account of the war, an immediate increase in the excess profits tax could be considered a legitimate step for the Finance Member to take.

It is probably on considerations like these that the prospects of an increase in the E. P. T. are being used by speculators to agitate the markets. While rumours of this kind have certainly an air of plausibility, proposals of new taxation must be viewed against the background provided by the anticipations of the budget for the current year and the actuals both of expenditure and of revenue as they have been experienced during the last six, seven months. The difficulty of forming an estimate is, of course, obvious. The public, inclusive of careful financial publicists, have no means of forming an idea of the demands which the war, with all the uncertainties of its future course, is making on the Central Exchequer. But this uncertainty cannot be allowed either to render the known facts hazy or to distort them out of shape or setting. For the fact remains that, so far as the revenue side of the budget is concerned, the actuals for the last six, seven months afford ample grounds for justification. In none of the main heads of Central revenue is there cause to fear a setback. The gross earnings of State-owned railways during the period April 1, to September 30 are fully Rs. 8.39 crores over the actuals for the corresponding period of the previous year. Even customs revenue, which for the last two decades has been notoriously unreliable and which, in the conditions of the war, can be relied on to cause awkward disappointments, has so far made a good showing. The Central excises are also known to have shown appreciable increases. The total of gross customs and Central excise revenues in the six months ended September 1941 was Rs. 28.03 crores as compared with Rs. 23.99 crores during the same period in the previous year. The excess profits tax must also show a considerable increase, though probably, the difficulty of administering it may have led to delay in actual realisations. Besides these items of revenue, one has also to take note of the fact that subsidiary coinage during the current year has been on the increase and that the issue of one-rupee notes as Treasury notes rather than bank notes has afforded welcome relief to the ways and means position.

The article on the form, time and manner of the rupee loans, promised in our issue a fortnight ago will appear in INDIAN FINANCE of Nov. 8. It is regretted that owing to the pressure of work caused by the change of office, the article could not be made ready for this issue.

This improvement in revenue can, however, be but a fraction of the possible increases in expenditure on account of the war. But it is well to remember that army expenditure in India is being incurred on a basis in which the Finance Member will not feel called upon to provide for the whole or even any substantial part of it from current revenue. There are understandings with His Majesty's Government under which certain items of expenditure are liable to be debited to the British Treasury. The incidence of expenditure on the annual budget, so far as India is concerned,

is far less than in the case of other countries. It is not incumbent on us, as it is on Britain or other belligerents, to take elaborate precautions against leaving an unfair share of the burden of war expenditure on future generations In any case, such deficit as war expenditure may cause in Central finances on the basis of current revenues can only be a fraction of the total budget, which is in striking contrast to the state of affairs in Britain, for instance. where the normal budget of the country is a fraction of the deficits that are now being incurred. It would, therefore, be neither financial levity nor laxity to refrain from effecting increases in taxation to provide for the threatened disequilibrium of Central finances.

All the considerations cited above will however leave the position of an increase in the excess profits tax more or less unaffected. For the taxation of excess profits during war time is based on broadly social, rather than purely financial, grounds. It is now accepted all the world over as being dictated by any conception of social justice. And here in India at the present moment the absence of an increase on the present 66⅔ per cent rate of the E.P.T. may be construed, and will, in fact, act, as a bull point in the stock markets leading to a wholly unhealthy boom.

There is much to be said therefore for increasing the present rate of the E.P.T. from 66 2/3 per cent to 75 per cent which compares well with the 100 per cent in other countries. But it is necessary that the administration of the E.P.T. should be suffused with a new sympathy with the assessee. The experience so far gained shows that the hardships of the tax depend less on the rate levied than in the spirit in which the assessable income is calculated. The need for sympathy would be all the greater when the rate of taxation is raised.

Life Insurance in India

As a subject of current or topical interest, life insurance has long been in the forefront, thanks to the Insurance Act and the demand for its revision. But it is rarely that we are reminded of the need to study is growth as part of India's economic development. Dr. Ray's recent treatise on the subject (Allied Publishers, Bombay, Rs. 6-12) not only reminds us of the need but meets it. The reader will not fail to be struck by the historical chapter which relates the practice or habit of insurance to certain precepts of Manu. The appearance of this book, which covers the entire field satisfactorily, has been hailed with satisfaction by Sir Chunilal Mehta in an encomiastic foreword, referring more particularly to the author's analysis of weaknesses in conduct and control of life insurance business.

Judged as a doctoral thesis which has won the usual Ph.D., for its author the work certainly stands out. It is the first complete and adequate treatment of a subject on which information is scattered and difficult to obtain. This alone will prompt many to agree with the author's conclusions on certain contentious points; but these are few and far removed from the survey that is his primary concern. Dr. Ray's first effort is more than praiseworthy for its orderly arrangement, and if a bare summary has not been attempted in any chapter, the table of contents serves a dual purpose.

It is the historical chapter that is sure to interest the layman, while men in insurance offices are likely to bestow most attention on Chapter XI dealing with the problem of selection, retention and re-insurance. The historical chapter indicates clearly that British companies had entered the insurance field in the days of John Company. The Universal Life Assurance Co., was one of the first entrants and its business extending from 1836 was taken over by the North British and Mercantile in 1901 although the latter Company's life business in India dates from 1864. The Colonial Insurance Co., was also among the pioneers and its Indian business was taken over by its successor, the Standard

THE INDIAN BANK, LIMITED, begs to announce that it is starting its Branch in CALCUTTA at No. 8, LYONS RANGE and that the Branch will begin to function from 10th November, 1941. From that date, the services which the Bank can render with its net-work of Branches throughout South India, a Branch in Bombay, and Branches overseas in Colombo, Rangoon, Singapore and Ipoh, will be made available to the public through its Calcutta Office and the Bank requests the citizens and the commercial public of Calcutta to give the Branch their support and encouragement.

N. GOPALA IYER
Secretary.

Life. The Commercial Union and Royal came rather late by comparison and the Liverpool, London and Globe worked originally through Forbes, Forbes and Campbell & Co. A common feature of the British offices was their disinclination to accept any but British lives. Local companies did the same, and many came to grief owing to grave mistakes before 1870 when there was crisis similar to that recorded in Britain. It is their failure to survive that accounts for the interest in life insurance shown by the men who started the Bombay Mutual and the Oriental Life Assurance Companies. The career of these offices illustrates clearly the limited progress made up to the period when the *Swadeshi* cult came in to sustain Indian enterprise. Dr. Ray's treatise, which is marked by a healthy partiality for sound management, does not fail to take note of the fact that in the period immediately preceding the enactment of the Insurance Act of 1912 there was a crop of mushroom companies. As to the sound companies established in the period of enthusiasm, there are many. National, Bharat, Hindusthan and United India are definitely among the leaders, and it is not surprising that the Great War interfered little with their growth. Dr. Ray's opinion that the mortality experience taking India as a belligerent country was extremely favourable and no untoward increase was noticeable deserves to be set down here as illustrative of why the record of 1939-40 has been singularly favourable for Indian life offices. In its effect on bonus rates, the last war had much the same effect as the present, and it is only in regard to the entry of new foreign offices into the Indian field after the war that history is not likely to repeat itself or in the matter of a higher return on new money.

Many of the existing Indian offices are in a position to meet the challenge of foreign rivals, and if the rate of mortality among insurance companies in India at certain times has been rather high, few will regret the disappearance of puny infants which by their survival might have retarded the development of modern systems of insurance. The growth of life insurance up to the present stands out as a deliberate refutation of views expressed by the Government of India in 1870 deprecating the establishment of a State-controlled life insurance company on the ground, that vital statistics were incomplete and otherwise defective, that the people were unprepared and the Government could not afford to take a loss. We have travelled farther away from the prejudiced nescience of the 19th century when the convinced pioneers had to establish new enterprises with honorary office-holders. They adopted also ample precautions in the interest of policyholders as is proved by the Articles of Association in the case of the Oriental Life Assurance Co. The amalgamation movement among the young life offices in recent years has strengthened relatively the junior Indian offices.

The period covered by Dr. Ray does not take into account the wartime developments referred to in reports and at company meetings. But it is certainly to the credit of Indian insurance that as between 1920 and 1938 the number of new policies issued in India rose from 28,046 to 298,478 while the total number of policies in force rose during the same period to 1,239,567 assuring in the aggregate over Rs. 203.7 crores. The existence of postal insurance fund has apparently hampered the legitimate expansion of Indian companies. If its bonus rates are low the premium rates paid by Government servants are low. It is argued that the utility of such a fund is not denied; but by increasing the limit of acceptance on any one life, the Government of India is encroaching on the legitimate field of business of Indian insurance companies.

Consistent expansion in regard to business and revenue outside India alike distinguishes the years between 1928 and 1938. The competition prevailing at home did not prevent Indian insurance offices from developing overseas connections, particularly, as the average value of a policy issued outside India is much higher showing that the advantage the British offices possess in respect of the average value of policies inures to Indian offices also. The existence of such strong rivals explains the growth of a corporate spirit. That the spirit inspired much useful activity before the Insurance Act of 1938 was passed cannot be gainsaid. The first annual conference of Indian life offices was held in 1928 and Sir N. B. Saklatvala of the New India Assurance Co., gave the lead in the matter of resolutions concerning revision of agency terms and the lowering of the expense ratio as also the suppression of rebating. The good work then begun has been carried on, and between whiles, Indian insurance interests have ventilated their grievances, particularly, the lack of protection. The adaptability of Indian life insurance companies had been demonstrated before the outbreak of the present war, and it is clear that life insurance companies are on a different footing compared with their position, say in 1918, when they were called upon to take part of the loss caused by the Spanish influenza epidemic. The outlook is assessed as reasonably bright, and this judgment will be found to reinforce the observations of many concerning the value of life insurance against the uncertainties peculiar to the war period.

A very impressive array of advantage confronts the inquirer desirous of learning the social and individual value of insurance. Its reactions on saving are wholly favourable, and as a minor corrective of the inequitable distribution of wealth it has its points. What India owes to the pooling of savings can be seen in the appreciable development of industries after 1920 (though in this case, more value attaches to the tariff advantages conceded in many cases) and is duly reflected also in the increased investments of Companies in shares etc. The importance of securing a wide distribution of insurance companies' assets is incidentally brought out by a consideration of the relations between the interest rate and the investment of funds. If general insurance companies eschew mortgages and policy loans, it is clear that life offices must take care to combine profitability with safety of capital. In their formative period Indian life offices restricted their investments to government securities, but by 1937 companies had realised the value of obtaining additional safety through an increased holding of government securities. The position of companies established between 1921 and 1927 is not, however, satisfactory. Far too small a proportion as at the end of 1937 was invested in approved securities and the well-meant checks of section 27 of the Insurance Act were obviously designed to prevent the keeping of too large a percentage of the assets in the form of mortgages on house property which, in spite of their manifest merits, are apt to get frozen. It is, however, to the credit of Indian insurance companies that they have paid for their funds between the years 1913 and 1928. Compared with British and American offices, the Indian life offices enjoyed a differential advantage varying from 1 to 2 per cent. The retention of this advantage would certainly be welcome and those who plead for a relaxation of legislative restraints imposed on the investment of life assurance funds should argue that on the basis of past experience Indian offices must obtain an adequate yield in relation to premiums paid.

The remarkable changes of the past twenty-five years do not readily lend themselves to compressed statistical statement. The chronicler of Indian insurance cannot put up the usual summary found in the prefatory note to the Indian Insurance Year Book as a substitute for the historical analysis provided by Dr. Ray who has to be congratulated on producing a clear, workmanlike account of a business living and growing rapidly to maturity in India. There is much to interest the student of finance and of sociology too while the legal aspects of insurance are adequately dealt with. Suggestions for reform are incidental and often tentative; it is perhaps just as well that the blight of cocksureness has not descended on this part of Dr. Ray's thesis.

Rising Output

THE recent report that U. S. steel production by the middle of October was equal to the record output of over 66 million tons attained last year confers interest on all figures connected with industrial development. The fact that steel production in 1941 has averaged over 98 per cent. of capacity, may be taken as illustrative of the advance in output called for by the defence programme. Not even the strike declared by the United Mine workers whose former leader, Mr. Philip Murray, has evidently been discarded in favour of the fighting Welshman, Mr. John Lewis will affect steel output which should come up to the expectations of Mr. Walter Tower who was looking forward to a total output of over 85 million tons in 1941. It is known that production was running at record levels since the beginning of the year after 1940 had witnessed a remarkable expansion of output. The view that U.S. defence production is nearing the peak has been expressed by a visiting delegation which has promptly registered approval of the great things being done to increase supplies to Britain. The main charges that have come over American industry in the past year can be readily discerned from a perusal of the statistics obtainable since the defence programme was accepted as inevitable; there has been a steady rise under both pigiron and steel. It is noteworthy that only in February did the output of ingots and castings fall below 6 million tons per month, and the expansion since May should be considerable. It was clear that the increase registered in April was in part conditioned by Britain's requirements and the revision of the Steel Control order in Britain during May was a recognition of the pressing need for scrap at home and the need for leaving America to make the best use of all available scrap.

That Belgium's industry has been reorganised and made to produce increased quantities for the figure in the June monthly bulletin of statistics. Production of both pigiron and steel in Belgium benefit of the conqueror is also revealed by the has staged a remarkable recovery after October. The enormous increase in U. S. production of copper right up to April illustrates clearly what has long been accepted; that the U. S. A. which is responsible for over 60 per cent. of copper production sets the pace for consumption and naturally prices too. The increase began in October after stocks had been perceptibly cut into during September. Chilean production which is complementary to that of the U. S. A. has risen consistently after August, 1940 and Mexico too has reported an increase in copper output though the trend in this case as in that of Peru has been irregular. It is, however, surprising that no figure can be had about the share of Rhodesia or the Belgian Congo, which reported an increase in its production often during 1940. The production of lead like all other metals increased steeply in the U. S. A. The figures prove that the U. S. A. is the biggest producer and user of all metals except perhaps gold, though in this case, the stocks are so large as to overwhelm current production. Mexican production of lead showed a pronounced increase and a feature of the past year was the strong rise in zinc production. In regard to cement the production trend in the U. S. A. was favourable until the end of 1940 and was decisively reversed in January since the Administration began to concentrate on defence to the prejudice of some sectors of civilian industry. The figures throw some light on what Germany must have got in Yugoslavia by way of lead and copper and indicate that the increase under iron and ferro-alloys in Spain could not have been absorbed entirely by that country.

Census Figures

As there will be no final report of the usual type after the census of 1941, comments have appeared rather early on the totals published two weeks ago. Since Burma has been separated from India, the population is well below the 400 million mark which pessimists thought would be topped within a decade of the last census. The total population of India including the States is returned as 388.8 million according to the census of Feb.-March. The rate of increase between the two censuses of 1931 and 1941 is well over 12 percent, a rate of growth that points to the operation of dysgemic influences at many points. One may conclude that the recent decision of the I.C.A.R. to promote rice cultivation was governed by such considerations as the natural increase of the population and the need to stop the extension of *reh* in the regularly irrigated tracts of Upper India. The 1941 figures as compared with Colonel Russell's estimate issued on the basis of 1937, shows that a high birth rate exists alongside of a high death-rate and widespread increase of preventible disease. Studies in the relation of poverty to health in India are altogether lacking; but it is certain that in the lower income groups both the birth-rate and the death-rate are higher, the Census report afforded some information about the quality as distinct from the quantity of the population. Such evidence as we have goes to show that quality is in inverse proportion to quantity. At the moment it should suffice to note that the increase in population would be a matter not for alarm, but panic except that there is still some scope for the expansion of food crops. But the population problem in India is a problem of limiting quantity by raising quality; the increase in the total population, in itself no matter for gratification, is also the resultant of a number of distressing features like a high birth rate, a high death rate and the existence at all times of a number of preventible diseases. In his speech at the statistical conference last year, Mr. Yeatts, the Census Commissioner, envisaged the census as a means of giving every kind of information that is desirable about the population of the country. But even if that be too high an ideal, it is time that both objectives can be attained only by educational and economic progress.

Punjab Banks

The progress of banking in the Punjab in the past ten years is reviewed by Mr. S. P. Vermani, a Director of the Reserve Bank, in the journal of the Institute of Bankers. He states that the Province has made appreciable progress in commercial banking on Western lines during the last decade, particularly since 1935. The number of joint stock banks registered and working in the Punjab has risen from 17 in 1929, to 41 in 1941. There are in addition to these the branches of the leading Indian banks and the exchange banks. Banking expansion can be judged readily by the increase in the number of total offices from 41 in 1929 to 125 in 1941. The decade has been comparatively free from bank failures though the closing down of the People's Bank of Northern India was a distressing event. Mr. Vermani states that at present there are four scheduled banks which together hold 83 per cent of the total deposits of the Punjab banks as against 17 per cent. held by the non-scheduled banks. Of the four scheduled banks, the Punjab National Bank with total deposits exceeding Rs. 8 crores and a network of 69 branches spread throughout India has long been classed among the Big Five of India. The four scheduled banks confine their activities mainly to the Punjab and 65 of the 94 branches are located in the home province. Their balance sheets for the past six years reflected the growth of deposits to nearly Rs. 11 crores at the end of 1940 simultaneously with the increase in offices from 68 to 91. There has been no similar increase in capital and resources, but one of the significant changes of the period is the rise in the cash ratio. The distribution of assets in the war period reflects greater caution in the midst of uncertain conditions, while the slacker demand for money after 1939 obviously accounts for the fall in the percentage of Advances to Deposits from 56.6 per cent. at the end of 1939, to 47.1 per cent. at the end of 1940. The fall under immovable property from Rs. 1.05 crores at the end of 1939 to Rs. 1.01 crores testifies to the provision of the usual depreciation, and what is more, the actual proportion of this item to total assets is lower than in the past. It may, however, be argued that to keep as much as 9.2 per cent. of assets in immovable property is unusual for banks.

Mr. Vermani recalls the recommendation of the Provincial Banking Enquiry Committee in favour of a cash ratio of 15 percent. He is decidedly critical about the high percentage of Advances in the case of the non-sheduled banks, but qualifies the observation by referring to the high proportion of loans against commodity stocks. The higher rates of interest obtaining in the Punjab make banking relatively profitable. This may serve to explain how the 37 non-

scheduled banks having capital and reserves of Rs. 50,000 or thereabouts carry on, having attracted larger deposits in the last year exceeding Rs. 241 lakhs and increased their cash ratio (made up only of cash in hand) in a marked manner as is proved by formal analysis. The spread of banking has not led to any appreciable increase in the use of cheques in the Punjab as may also be inferred from the long-term nature of advances in many cases. The actual position of the non-scheduled banks is better than expected and the smaller scheduled banks reporting last year claimed an increase in the cash ratio to 14.6 percent while their total deposits were lower by comparison with the preceding year. The figures indicate once again that the crisis of last year was not one that took the banks in its sweep. It was a hoarding movement due mainly to lack of faith in paper currency and was indeed reversed as swiftly as it began. Rapid as it is, the development of banking has not been even and it is not surprising that 100 out of 200 towns in the Punjab are still without banking facilities. Mr. Vermani declares that while the cheque habit has not become popular, it cannot be said that development has been on the right lines, and in the case of individual banks, there are defects of structure and policy calling for rectification. Present conditions are, however, favourable for reform, voluntary or through legislation, and in one Province, at any rate, the tradition and practice alike are distinctly in favour of rapid banking development, provided a system of licensed warehouses which will make the grant of credits easy is adopted.

Baroda Budget

Reference must be made to the achievement of Baroda in not enhancing taxation despite the rise in expenditure. The Budget presented last month to the Assembly, referred to the possibility that land revenue estimated at Rs. 95 lakhs would not yield additional revenue largely on account of the floods. The increase in Army expenditure entailed by the war accounts for the rise under the head Miscellaneous by Rs. 6 lakhs over the sum fixed by the Government of Baroda Act but the essential soundness of Baroda's financial position is reflected in the rise of expenditure on the education, agriculture, medical and other departments benefit through increased allotments in the 1941-42 budget and the strength of Baroda's financial position is reflected in the substantial sum accruing from non-tax revenue. The State Railway is expected to provide net receipts of Rs. 22 lakhs and the Electricity Department is expected to provide Rs. 3 lakhs. The State's investments are expected to give Rs. 19 lakhs in interest. It has long been clear that the State adheres to its policy of developing local resources with surplus funds but the war prevents extensive capital expenditure. The Dewan explained that after the war is over the installation of a steam turbine electrical plant for Baroda district would be duly taken up. He added that the first instalment of the Vijapur scheme of electrically driven tube wells is already under operation and the Umra project is reported to be progressing. The progress of Baroda industries was touched upon by the Dewan who mentioned the rise in the production of textile and cement factories and said that the plant of the Tata Chemicals would be in commission before the end of the year. The Baroda Budget shows that the State, in spite of the fall in customs revenue and the need for land revenue remissions is able to meet the limited increase in expenditure because of its policy of pruning expenditure and meeting additional outlay on beneficial objects through the special trusts to which the Dewan referred.

RAILWAY DEPARTMENT.
(Railway Board).

NOTICE.

TENDER FOR THE SUPPLY OF COAL TO THE NORTH WESTERN, EASTERN BENGAL, GREAT INDIAN PENINSULA, EAST INDIAN, ASSAM BENGAL AND BOMBAY BARODA & CENTRAL INDIA RAILWAYS AND TO THE BENGAL NAGPUR, BENGAL AND NORTH WESTERN, JODHPUR, MADRAS AND SOUTHERN MAHRATTA. ROHILKHUND AND KUMAYUN AND SOUTH INDIAN RAILWAYS DURING THE YEAR 1942-43.

Tenders are invited for the supply of the following quantities of coal for the above Railways during the period 1st April 1942 to 31st March 1943:—

	Tons.
1. Steam Coal, by Rail from Bengal, Bihar, Central Provinces, Central India, Orissa, Singareni and Assam Coal-fields ..	52,14,000
2. Coke Breeze	5,100
3. Soft Coke for Workshop purposes	7,600
4. Hard Coke	4,700
5. Screened Rubble Coal (for Power House) ..	10,000
6. Slack Coal, size not exceeding 1/2" Cube ..	5,600
Slack Coal, size 1" to 1¼"	6,400
—do— size 1/16" to 1"	**28,000

** This quantity is to be delivered during April and May 1942 in equal quantities.

Forms of Tender, Specifications and Instructions to Tenderers may be obtained from the Office of the Chief Mining Engineer, Railway Board, No. 1, Council House Street, Calcutta, on payment of Re. 1/- for each set.

The successful Tenderers will be required to execute an Agreement (paying the Stamp Duty thereon) on a Form provided by the Company-Managed Railways, if so desired.

The Agent and General Managers of the Company-Managed Railways do not bind themselves to accept the lowest or any Tender or to assign any reason for non-acceptance of Tenders; they reserve the right to accept any Tender wholly or in part.

Tenders should be deposited in the Tender Box kept in the Office of the Chief Mining Engineer, Railway Board, before 11-00 a.m. (Bengal time) on Saturday the 15th November 1941 and they will be opened at 11-15 a.m. in the presence of Tenderers on the same day.

J. R. Harrison.
Chief Mining Engineer, Railway Board.

Soil Erosion

The place of forestry in farming is widely recognised, but not clearly understood as to how wood serves the agriculturist in many ways, at all times. The average man knows that when forests provide fuel, there is a distinct saving in cowdung which can be used as manure and that if more manure is applied, crop production becomes easier. But there is need for more precise ideas such as have been given by Mr. S. H. Howard of the Indian Forest Service in this month's *Indian Farming*. Cultivation in forest clearings has been advantageous to agriculturists, and Mr. Howard points out that the rich crops on virgin clearings have helped many villagers to move away from poverty-stricken conditions. The greatest service is, however, in connection with checking soil erosion. The latter problem has emerged in Northern U.P. and the Punjab too, and soil erosion as a concomitant of flood or otherwise in the U. P. has its origin in the denudation of submontane forests in the Himalayas. Deforested hillsides have increased the speed of mountain torrents and the ravines of Etawah District are described as the result of the increased drainage of the Jumna. The dangers of continued deforestation have been underlined by experience in the U. P. and elsewhere too the dangers of flood have increased in the wake of deforestation of the catchment areas. That vegetation slows down the flow of rivers running in mountainous regions has been proved many times, and the danger of flood farther down is increased by bare valleys near the source, apart from the fact that thousands of tons of soil are washed away and lost. How the prodigal use of forest wealth has left the wind free to toss dust into areas once rich and cultivated is proved by the sad experience of the Middle Western farmer in the U. S. A. who is paying for the recklessness of a previous generation. Mr. Howard describes how more than 200 square miles of rich soil have been lost through the action of the Jumna and Chambal rivers and how these dreadful ravines are extending and nearby villages are overwhelmed. That forests are worth keeping and tending is proved by the grazing rights granted to villages and the supplementing of fodder like manure is not to be ignored when cattle wealth is embarrassing. It is, however, as a preventive of erosion that forests are valuable, and their power in keeping moisture and regulating rainfall, if not generally recognised, is one more advantage. In parts of Europe, including Britain, a regular afforestation policy has been pursued, mainly to arrest soil erosion, and in the high level catchment areas in certain parts of Europe neither the State nor the private landowner has the power to fell trees. Mr. Howard argues that in a country like India with different types of climate the danger of erosion is greater. Forests conserve and promote the fertility of the soil and agriculture cannot afford to forget the vast influence of the forests. He concludes that the abuse of land culture which after all is the farmer's job will bring in its train as terrible a punishment as has overtaken those who dwelt in the ravine lands of Etawah, where it may be remembered there once flourished a forest of *Sals*.

Russia's Job

Comparisons have been frequently made as to the scale of defence expenditure by the major Powers. Little has been said, however, about Russia's expenditure because Russian statistics were generally taken as unreliable. Such statistics as are available indicate that Russsia had a great deal of leeway to make up after the first Plan of 1928 had gone through. Russia's national income in 1934 judged by that available for each inhabitant was not better

than that of Japan or Italy, and the aggregate income, in 1934 at any rate, was not larger than that of Britain. This by itself conveys nothing for two more Plans have gone through, and a low standard of living such as obtained in Russia would render it easy to spend more and more on war effort. It is known that investment in the last decade has been large and continuous and the progress of heavy industry forms a suitable postscript to the economic history of the Soviet. The best test of Russian economy was its ability to move forward from the chaos of the Tsarist period to the control figures of the planning period and the large investments, at least since 1932, were made from the current addition to means. War industries were rapidly and diligently developed. It has been said that two million workers were absorbed by the chemical and metal working industries, and it is not surprising that only Germany led Russia in respect of steel production. The foundations for defence economy were laid before 1937 and the dispersion of industrial units to the Urals and beyond was guided largely by defence considerations. It is known that after the pact of August 1929 the Soviet Union increased its defence expenditure primarily because the war made Russia extracautions. And the rise in national income, computed to be as much as 40 per cent in the field of industry between 1937 and 1940, justified it. A recent estimate puts the national income of the Soviet Union at a figure equal to £7,880 million, and the defence outlay for 1941 taken to be £2,000 million, indeed suggests that there is scope for a considerable increase under the latter head. How much of the increased outlay of recent years has gone into the expansion of defence industries is not known but it may be assumed that the approximate trebling of defence expenditure as between 1938 and 1941 would not have been unfruitful; the optimum regarding tank production must be traced to this. On the basis of comparisons with Britain and Germany it may be said that Russia's defence expenditure, up to the outbreak of war, kept step with the increased expenditure of other Powers. The cost of the brief Russo-Finnish war probably accounts for the jump in expenditure during 1940 but the increase since then shows that Russia by reserving over 20 per cent of the national income for defence expenditure in 1941 adopted an essential precaution. Whether Russia had put by large stocks of tin, rubber and other imported materials is not known but Russia's ability to stand up to attack after the loss of the Donetz basin must not be taken as assured in spite of the general belief that the reserves in the trials are large. Russia's need for foreign assistance is now taken as axiomatic and the early adoption of the Lease-Lend procedure by Britain springs from the belief that Russian defence production remains considerably below that of her adversary. Mr. Bevin's call to Britain to raise output by 20 to 30 per cent underlines the belief that some part of Russia's industrial equipment must have suffered and defence production must fall. The provision of money is by no means enough and Russia more than any other country has reason to feel that she must spend at present as much as Britain for bare national survival.

LET YOUR MONEY —Fight!—

FOR YOU AS WELL AS FOR VICTORY

If you are unable to take part in this titanic fight against Nazi aggression, let your money do the fighting for you.

Your investment will help to maintain the ever increasing supplies of arms and ammunition with which to defeat the enemy.

Your money will be absolutely safe in Gilt-edged securities. Instruct your bank and invest in Defence Loans today.

Australia's Record

The political changes of the war period in Australia are to be seen in the rise of Labour to power in the Federal Government. The men who made the headlines are now in the War Advisory Council which is the opposite number of the National Defence Council set up in India. The economic changes are not so obvious as the change of ministry or the abrupt transfer of independent votes to the Labour side, but they are more than ever important. It has been often pointed out in India that Australia's exemple in regard to war and secondary industries alike has special value for India and the first two years helped Australia to make the most of the opportunities while spending more and more on the war. It is known that the Budget presented in June provides for a much larger outlay of which a large part will be spent at home. The changes in progress are not to be measured in the increase of 7.2 percent under employment as between August 1939 and May 1941. The addition of 153,000 workers to the ranks of industry does not indicate that the number of factory workers for munitions production increased by 333.3 percent. The total increase for organised industry is 20.3 percent while the increase under other employment covering civil production is only 2.7 percent. Labour has been diverted to war industry, and apart from the absorption of the unemployed, there has been a net addition to the number of workers from those not normally engaged in industry and commerce. It is believed that the addition to employment will account for the probable increase in national income to £1000 million in 1941-42. It is generally assumed that income must have risen to the extent of 17 to 20 percent in the case of Australia as a result of the war from the previous level of 800 to 850 millions. Part of the increase may proceed from the rise in prices and wages. It is assumed that the war has brought about an addition of £150 million to wages, of which £50 million was to be attributed to the revision of wage contracts owing to the rise in prices, and £100 million was on account of the flow of new workers into gainful occupations, the increase of over-time working, and special bonuses for skill etc. The basic wage in the six capital cities has risen from £3-19 per week to £4-6 per week showing that the federal standard wage has risen by 9 percent. Though this standard wage is only an approximation to the current rates it is clear that the worker has got betimes the higher wages he is entitled to on account of the rise in prices. It has been said that the Commonwealth price index for certain imports had gone up by 35 percent while the general index covering domestic products had also risen by 14 percent. The Commonwealth has evidently succeeded in slowing up the rise in prices and prices of locally produced goods as a class advanced by 5 percent only by June 1941 as compared with June 1939. Retail prices had risen by 9 percent only after 22 months of war and the attempts to regulate civilian spending, for instance through the rationing of clothes, came thereafter. As compared with 1939-40 when exports rose sharply trade in 1940-41 was hardly booming. The total for exports and imports alike in 1940-41 was well above the prewar level and Australia had contracts with the British Government which lie outside the purview of the trade figures. She figures also as an exporter of gold as in the past. The U.K. has been a substantial buyer of the wool and wheat surpluses and the primary producer has few problems. The rise in note circulation by £21.8 million corresponds to the movement in incomes, prices and wages. After twenty months of war a rise of 40 percent in note circulation is not unexpected and the parallel movement in respect of Bank deposits indicates how the ground has been held. As in other countries Bank deposits have risen and advances have fallen away in Australia: the banking strength is clearly reflected in the rise of £54.1 million in cash and liquid assets, a condition which makes for comfortable credit conditions while the Government, too, can make extended use of bank credit if desired. Wartime developments have been of material assistance to the industries of Victoria and New South Wales where farm labour is reported to be scarce and defence orders have produced prosperity for manufacturers of clothing, footwear, brushware and even furniture. Garages have been roped into the manufacture of components of defence equipment and the fall in car registrations over the year shows how certain features are reproduced in Australia.

Hindusthan's Record

The familiar story of successful and prosperous business told by the annual report and accounts of the Hindusthan Co-operative Insurance Society, Ltd. for the year 1940, gains in interest from the fact that in contrast with the general trend, there was an increase in new business in respect of the volume of proposals received and in the higher average value of the proposals. The new business figures at Rs. 2,82,86,878 with an annual premium increase of Rs. 13,89,784 are definitely reassuring, in view of the difficult conditions arising out of the war. The brilliance of past achievements is also maintained by the 1940 revenue account which discloses that total premium revenue has risen to over Rs. 84.59 lakhs against Rs. 46.53 lakhs for the eight working months of 1939 while interest receipts less tax have kept step by rising to Rs. 12.13 lakhs as compared with Rs. 7.01 lakhs in the eight month period covered by the last report. The remarkable addition of over Rs. 46 lakhs to the Life Fund is a major achievement of the year surpassing the record of all previous years. This addition, so considerable and so prompt, puts Hindusthan more than ever in the van of Indian insurance. Remarkable as it seems, this is not the main feature of the latest accounts which show that claims by death and maturity totalling Rs. 24,49,430 and surrenders totalling Rs. 2,39,561 absorbed less than Rs. 27 lakhs out of a total income of over Rs. 96.7 lakhs. The decline in the expense ratio to the new low level of 26.3 per cent. redounds to the credit of a company long marked out by energetic and progressive management.

The wholly satisfactory nature of the results rendered the task of the Chairman, Kumar K. C. Mullick, pleasant enough at the annual meeting held last month. In this survey of the Company's progress last year he dwelt on the virtues of protection by insurance and remarked that the possible depreciation of investments would not prejudice the interests of the policyholders. There is hardly any need to stress on the merits of life insurance as a form of investment at present when suitable investments are scarce and the rate of return is low in most cases. In assessing the outlook, he made particular mention of the inevitable decline in bonus rates forced by the prolonged cheap money conditions. Describing the Society's investment policy as broad-based and satisfying the twin canons of safety and profitably, he expressed the hope that the valuation due on December 31. 1941, would permit the declaration of bonus at rates which will bear satisfactory comparison with those of sister life offices.

The Chairman referred to the New Alipore Scheme with which the Society is identified. Apart from the benefits of such development to the city of Calcutta, the promotion of building development either directly or indirectly through assistance to buyers would bring substantial profits to the Society. Very satisfactory response was reported by the Chairman who observed that the public had again demonstrated its confidence in the success of land development schemes under the auspices of the Hindusthan. In a formal review the balance-sheet and the changes between the year under review and its predecessor call for attention. In the case of the Hindusthan balance-sheet the considerable increase in the holding of gilt-edged securities, testifies to the Society's adherence to the policy of recent years. The total is over Rs. 142 lakhs under gilt-edged assets alone. The value of house properties at cost is returned at Rs. 53.43 lakhs and landed properties are valued at Rs. 61.62 lakhs. On the other side, the Life Fund, exclusive of the fund held to meet claims on provident endowment policies is shown at Rs. 3,55,80,557-4-11. The Contingency Reserve of Rs. 1 lakh and the large Investment Reserve of Rs. 13,92,500 indicate the ultimate strength of the investment position. The cash balances totalling over Rs. 30 lakhs also show how generously outstanding claims amounting to Rs. 12.51 lakhs

THE decision of the Imperial Council of Agricultural Research to increase the production of rice in India by increasing the acreage under improved seed is the first sign of rationalisation of India's national economy. Such a proposal a few years ago would have given rise to no end of controversy. It would have been the signal for a whole army of economists and businessmen to rush into the arena, armed to the teeth with facts and figures. A picture of languishing trade would be assiduously conjured up; and in the confusion no decision would be arrived at; and action would be out of the question. But here we are deciding within the twinkling of an eye in favour of increasing the production of rice; and the decision, I am sure, meets with approval, where ever it has attracted notice.

To my mind, the increase in the production of foodgrains which has now been decided on is most symptomatic of the new era which is now dawning for our national economy. Two years ago, the country was looking wistfully to a National Planning Committee of somewhat questionable competency and a number of Congress governments in the Provinces with avowedly uncertain tenure of office to co-operate and bring about a new economic regime. Among many others, I too, took a great deal of trouble to think out the economic problem in India in all its aspects, and the *National Planning Supplement* of *Indian Finance* devoted an unusually long leading article, long enough to constitute a booklet by itself, to pointing out the "Essentials of Economic Planning". In that article, the basic principles were laid down clearly; and it was suggested that the aim of economic planning in India should be not to cut into the import trade or embark on measures calculated to set up widening ripples of disturbance over wide areas of national and international economy, but to swell the volume of goods and services produced and exchanged within the country and within each distinguishable locality. The application of this principle to each specific problem was made clear.

As against this Supplement, there was the National Planning Committee, which appointed a number of sub-committees, as, indeed, it should, issued a number of questionnaires and drew up interim reports at various stages. It would be unfair to comment on the Committee's labours, because the Committee never had a chance to pursue them with energy or enthusiasm. Within a year of its formation, the Congress Governments which appointed it went out of office. War had broken out in Europe. The national economy was subjected to the strains and stimuli of war conditions; and it was idle to hope that any authority would have the chance to work out its plans of economic development. Great harm and great good might alike be done to our national economy by the war; but not by Governments or ministers or officials or their advisers; for Nature and History had taken charge. The National Planning Committee continued to function like some of the refugee governments. But its work had lost all significance; and since the very basis on which they were asked to enquire into the question had been undermined, the Committee became moribund.

But, as I said earlier, Nature and History had taken charge of India's economic planning. And Nature does not work through Committees. She does not hold debates in legislative Assemblies nor circulate papers among the various Chambers of Commerce and other interests. She manifests herself primarily in historical forces which bring about each step as it was contemplated by Nature. India's national economy will, as a result of these steps which are forced on her by Nature and History, become more and more in consonance with the resources with which Nature has endowed this country. The devious pathways of discriminating protection, of fair selling price, of countervailing duties and the like are now given up. It is no longer a question of an industry satisfying the conditions laid down by the Fiscal Commission of two decades ago. It has to satisfy only one condition—immediate dire need. The war sets up such need for a wide variety of things; and the need is met in a manner which is essentially automatic. What has been said of industry is also true of agriculture. It is as true of cutting down production as of increasing it, of expanding old industries as of establishing new ones. For Nature is busy making up for lost time, that is, time lost by men in infructuous and futile deliberation.

EASTERN GROUP-SLEEPER CONTROL

Tender No. 3/42-43

Sealed tenders are invited and will be opened at 3 p.m. (Bengal time) on the 21st November 1941 for the supply of 1,04,683 (One lakh four thousand six hundred and eighty three only) special size sawn sal and/or pyinkado and teak sleepers. Full particulars may be obtained from the undersigned on payment first of Rs. 5 (Rupees five), being the cost of tender documents, to the Chief Auditor, B. N. Railway House, Kidderpore whose receipt for the amount must be produced before such documents can be issued. This sum will not be refunded.

C. F. GILBERT,
Sleeper Control Officer,
Eastern Group.

B. N. Railway House,
Kidderpore, Calcutta,
Dated 22-8-1941.

The increase in rice production which has now been decided on is of a piece with the increase in cotton mill production, in iron and steel, in woollen manufactures and a hundred different lines of productive activity. It follows directly from the war which forces the hands of the Government of Burma in the matter of acquiring a monopoly of the export trade in rice, which sends up the price of rice in India, raises the spectre of grain riots, the sort of spectre that was in 1918 a stark reality, and drives the authorities in India towards increase of rice production. Doubtless, there are intricate problems raised by an increase in rice production in India. Unless we are to have a closed market for rice in the post-war period in which case the price will be maintained by a relatively high level of internal demand—rice growers will be faced with a severe depression and ruinously low prices. It is a long time since the production of rice was confined to the tropical countries. Japan's colonies on the Asiatic mainland and practically the whole of the Mediterranean seaboard started to grow rice; and these lands will soon after the war be raising bumper crops. And as for Burma, though a combination of abnormal circumstances may have forced her Government to regulate the export trade through a state monopoly of it, she will not readily acquiesce in India's self-sufficiency in the matter of rice. Indo-Burmese relations, never very cordial, will acquire a new bitterness. Disturbance of Indo-Burma trade will have its obvious repercussions on Indian industry and exports. All that is there, in the offing. And a handful of perplexing social problems, considering that rice, which is usually imported from Burma, is of the cheaper variety and caters to the needs of the poorer classes. But then, as I said, Nature does not hold consultations with economic experts and commercial representatives.

Does that mean that these edicts of Nature will leave us an economic chaos with which we poor men will have to struggle when the war is over? This is by far the most important aspect of the question. And here it is equally easy to be unduly alarmistic or unduly optimistic. The inter-departmental committee for post-war economic reconstruction and its various offshoots are the result of the alarmistic attitude of the Government of India. Though I would be the last to deprecate caution in these matters, I prefer on the whole to be optimistic, especially when reflection shows optimism to be well-grounded. I believe that what is happening to Indian economy during the war period is very much like what a wise well-wisher of the country would like to see happening to this country. The shape which the national economy is taking under the hammer blows of the war is not unlike the shape which a national planning committee would seek to give it through a five-year or a seven-year plan.

Why a NATIONAL DEFENCE AND SAVINGS WEEK

● This Special Week is set aside for the purpose of obtaining as large sales as possible of Defence Savings Certificates and Stamps. Already thanks to the preliminary publicity and interest taken, the sales have been greatly stimulated. Let us follow the lead of the many cities in the British Isles, where amounts far exceeding all expectations were raised within the seven days.

Money is required not only for the successful prosecution of the war but also for manifold humanitarian purposes—to succour the wounded to assist the blinded, to help the crippled and disabled, to aid the homeless and to protect your *own* hearth and home. You can help this noble cause, your *own* cause, by purchasing Defence Savings Certificates.

Save for *your* Protection! Purchase Defence Savings Certificates and thereby put your money in the safest hands. It is better to allow the money to remain in the safest custody as long as the dangers and difficulties of war continue.

By hoarding your money and valuables, you get no return from them; moreover you invite the risk of dacoits and thieves! By investing it in the safest form, in Defence Savings Certificates, you remain free from the worries and risks of hoarding, and at the same time increase your income. Remember you may withdraw it any time you wish.

NOV 29 TO DEC 6

Buy your INDIA DEFENCE LOANS AND *particularly* DEFENCE SAVINGS CERTIFICATES & STAMPS *during* the NATIONAL DEFENCE & SAVINGS WEEK

At any rate, I claim to see in what is happening to-day in our national economy the workings of an unseen hand along the lines we indicated in our *National Planning Supplement*. Let me restate the main principles indicated in that Supplement. The main point was that, whatever we may do or may not do in those sectors of our economic life which impinge on international trade and world economy, we ought to aim at a vast increase in the volume of goods produced and exchanged in what may be called the spheres of our rural economy. In fact, the distinction was clearly made between what may be called the modernised part of our economic system, comprising the large-scale industries, the import trades, the export trades, the great transport systems, the machinery of finance and the like, and the backward or uneconomic part comprising those lines of productive activity which do not reach beyond the confines of a village or a district, the large masses of people who produce, in some primitive way, for inadequate, own consumption. This distinction is important because the measures that are called for by the two divisions are altogether different. In a system of economic planning, for which resources are adequate the two divisions can be equally served by one common plan. If we can compel the adoption of some system of collectivist farming, if we can produce tractors by tens of thousands, if we can lay down roads as we choose and open up markets, if we can change railway rates, if we had absolute power over currency and credit, then, we may not have to plan for these two divisions of our economic society separately. But as we are situated to-day, the difference is inevitable. We have to attack the problem on these two different fronts. Of course, we shall do our best for industrial development, establish new industries, fill the gaps in our industrial structure and provide for Indian industry the invaluable basis of capacity to produce producer's goods. But we shall not wait for prosperity to percolate from the top; for, that is a process which, besides being slow, is also unreliable. And what is more, it is apt to provoke the hostility of the poorer classes and open the craters of internal revolution. We said, therefore, that the enrichment of the rural economy should be pursued separately from large-scale industrialisation.

Now, this news that rice production in India is to be increased, because the war has forced on the Government of Burma a monopoly of the export trade and India is faced with a shortage of rice, fills me with hope. For the war is doing what I wanted the National planning authorities to do, to speed up industrialisation and develop the rural economy at the same time. The problem of industrialisation in India is capable of being regarded as falling into a few important divisions; (1) filling the gaps in our industrial structure, that is, reducing the dependence of existing industries on foreign sources of supply for certain raw materials, (2) development of key industries, that is industries without which the large scale factory production of consumer's goods cannot be done economically, (3) establishment of industries which are essential for the defence of the country and which at the same time are capable of meeting peace-time requirements, (this would have to be stated *vice versa* if it were peace-time) and (4) the training of a large personnel capable of looking after the technical work of a highly industrialised country, I need not trouble to point out that the war is looking to all these, though, no doubt, there are certain difficulties in respect of some of them.

It is, however, about the enrichment of rural economy that I had my doubts. But here, too, the war has given a great fillip to a number of cottage industries. War orders have given employment on a large scale to handloom weavers and village artisans of different classes. And more than all this, it is doing a great deal to cure the essential unsoundness of the position of the Indian agriculturist, especially the classes who were till recently catering to the foreign markets. Take the case of the grower of cotton or groundnuts. His position, particularly that of the groundnut grower, is extremely hard. I would be the last to overlook his hardships. But if, through the war, he is made to rely on internal industry rather than a whimsical or malevolent importer of a foreign country, I would not count the pains of the transition as too high a price for securing this wholesome change.

The best part of the war's work for our economic development and particularly for our rural economy lies in teaching India—and necessity seems to be the only way of teaching peoples and governments—to rely on her own soil for the production of the foodstuffs she needs. With the separation of Burma, India ceased, for all practical purposes, to be a grain-exporting country. Punjab wheat found its way out of the country now and again; but in the total picture it was an insignificant detail. Otherwise, import of rice from Burma was the most important feature of our food position. Time was when increased production of rice in India would have meant, not better feeding of the people at home, but red ruin for the rice-grower. That position has gone. But we would not have thought of growing more rice. If, as the I.C.A.R. proposes, we increase the production of rice, and if rural India gets what I may call pockets of prosperity created by war orders, then that enrichment of rural India, for which I had pleaded in our *National Planning Supplement*, will soon become a reality and the war will have proved the best Planning Committee we could ever ask for.

(From Our Correspondent)

New Delhi, October 28.

DRAMATIC political developments have followed the beginning of the Assembly session. It was wellknown that Mr. Jinnah had something up his sleeve, but his difficulty was that he had in his party men of different temperaments. Some of the senior members of his party were not quite convinced of the wisdom of Mr. Jinnah's proposal to boycott the session as a protest against the expansion of the Viceroy's Council without the League's support. For days consultations went on in New Delhi, as a result of which the decision was taken finally yesterday by the party to absent themselves for the entire period of the session. Mr. Jinnah has his eye on Muslim opinion and knows that a dramatic gesture of this kind showing the strength, discipline and sense of sacrifice of the party will capture the imagination of the Muslim electorate. His desire was also to show to the British Government and to the world that the new Muslim members did not represent his community. Deep political strategy underlies Mr. Jinnah's decision, for he is closely following the methods of the Congress to build up the party's strength in the country and try to influence the Government's policy. As reports had been current in Simla itself that Mr. Jinnah was maturing big plans to show his party's resentment, it did not come as a surprise to any section of the Assembly, official or non-official, that under Mr. Jinnah's directions, the party has walked out of the Assembly.

* * *

According to the latest figures available, the members of the two major parties, the Congress and the Muslim League, who have boycotted the Assembly, number 66. As the number of Indian elected members in the Assembly is less than a hundred, this large abstention destroys completely the representative character of the Assembly. With less than thirty members to represent the electorate in a House in which officials, nominated non-officials and the European group alone comprise nearly fifty, it is impossible to claim that the non-official view is properly represented. The official answer is that they are helpless in the matter and that if elected members choose to absent themselves and refuse to shoulder their responsibilities as elected members, the Government cannot be blamed for the consequences. The view taken by the new members of the Viceroy's Council is that, instead of strengthening their hands to enable them to act according to the wishes of the people's representatives, the Opposition parties had deliberately walked out of the Legislature and thereby added to their difficulties. They say that they did not accept office in any party spirit and are actuated by the honest intention of acting up to the best interests of the country. The only Opposition party now left in the Assembly are the Congress Nationalists numbering eleven. They are in a particularly difficult position partly they are in so small a minority that they cannot hope to make any great impression and partly because their former leader, Mr. Aney, is now on the Treasury Bench, a fact which they cannot but bear in mind when they rise to criticise the Government's policy.

* * *

The first two days of the Assembly session have brought to the forefront certain broad issues. The first concerns the Government, for the fast growing deterioration in the country's politics as seen in the boycott of the Assembly itself, is such that the Government cannot any longer afford to be indifferent to it. One suggestion which I have heard in the Assembly lobbies is that the Viceroy should immediately consult his Indian Members and evolve a plan for bringing leaders together. The new Indian Members of Government are reported to be anxious to do whatever is possible for them to end the political deadlock but unless the Viceroy takes the initiative and does something at once, the situation may deteriorate so rapidly that the new Members who have joined with the hope of doing something, may eventually feel so discouraged that they may hand in their resignations. The second issue which has arisen concerns the demand for the true spirit of collective responsibility among the members of the Viceroy's Council. In these two days there has been nothing to show that any new conventions on these lines will be set up. The objection raised by Mr. Aney, as Leader of the House, to the admission of adjournment motions to discuss Mr. Churchill's recent statement on India and the inadequacy of the "expansion" scheme has provoked much adverse comment in the lobbies. Some of Mr. Aney's supporters themselves felt that he should not have stood in the way of free and full debates on these subjects.

* * *

As even the first meeting of the expanded Council has not yet been held, it is difficult to say how the future, so far as the working of the Government of India is concerned, will shape itself. The Indian Members have to meet, pool their ideas and see how far they can pull together and also how far they can take the Viceroy with them. Certain first impressions are undoubtedly favourable. Sir Homi Mody's answers to interpellations on the Supply Department yesterday showed both sympathy and strength. On the subject of high prices he gave the categorical assurance that the Supply Department's operations were not in any way responsible for the rise in prices which were really due to the lag between supply and demand. He also gave an assurance that his Department utilised its opportunities in full to start new industries. Sir Ramaswami Mudaliar's speech in reply to the debate on the difficulties of cotton-growers was also helpful. He assured the House that the Government of India were taking adequate measures to help the Indian agriculturist and appealed to the other parties concerned the Provincial Governments, the textile industry and the cotton-growers themselves to co-operate with the Government of India in their measures to deal with the situation. Of great importance also is the speech of Mr. N. R. Sarker at the Marketing Conference. In his speech the new Member approached the problem in a practical spirit and laid great stress on the need for ensuring that the primary producer got a better price for his articles and the consumer a better quality. It was good to find that he attached the greatest importance to measures for increasing the prosperity of the ryots. His speech has created an excellent impression as he is in charge of the Agriculture portfolio and can do a great deal for advancing agricultural research by wise direction and the pursuit of an energetic policy.

* * *

As a result of last minute discussions among party leaders it has been decided for the present to postpone the debate on Sir A. H. Ghaznavi's resolution on the Indo-Burma Agreement. Though the motion was formally moved to-day the actual debate will be taken up on an official day next week. It is wellknown that before Sir G. S. Bajpai handed over charge, he made certain representations to the Secretary of State for certain important modifications in the text of the agreement. To these representations there has been apparently no reply yet from Whitehall. Now that Mr. Aney has taken up the portfolio, he has also been reviewing the question in the light of recent developments. Probably he will bring up the matter for dicussion at the first full meeting of the Viceroy's expanded Council this week. Mr. Aney's efforts are intended to secure a compromise formula which will be acceptable to both sections of the House, but until the attitude of the Secretary of State is known, nothing can be said.

Bombay, October 27.

THE fillip given to the cloth market by the Diwali festival must have worn off before the riots broke out. The disturbances reported during the past week were fortunately on a limited scale, and the city is again normal. The Government of Bombay may well flatter itself that the situation was mastered speedily and police experience was successfully applied to control lawless elements. Riots, of course, are unusual and the city has learnt to forget them. But the recurrence of trouble after four months suggests that there is a link between the rioter and the politician: the former is too ready to demonstrate while the latter may even desist from spouting. The connexion may seem obscure, but it is undoubtedly a menace to public life. The improvement in markets is governed largely by sentiment, and if this were to veer round, the city will face a crisis, as many recognise readily enough. It has been said that the cloth market has suffered to some extent from the disturbances, and removal of the threat of price control has not led to any check on the drooping tendency of prices of grey goods. The limited supplies of imported goods have, however, contributed to a distinctly steadier tendency in the piecegoods market where the depression may prove to be temporary.

Last week the Bombay Port Trust decided to inform the Government of India in reply to their reference that advertisements for posts under the Port Trust would in future contain a provision that as regards certificates of competency in case of masters, mates and engineers the certificates issued under the Indian Merchant Shipping Act of 1923 would be treated as equal to the B.O.T. certificates recognised by the Merchant Shipping Act of 1894. The concession may lead to an increase of employment for qualified Indians, and now that a new Chairman is going to take over, the policy in regard to appointments and promotions is likely to change. The meeting last week sanctioned various estimates for expenditure in the current year. It is clear that the Port Trust is called upon, to take up with the Railways, the strain of increasing traffic, but the estimates approved last week had no connexion with major improvements but covered mainly repairs and renewals. The renewal of cargo crane roller paths in Prince's Dock, the removal of return water pipes in Victoria Dock and a grant for metalling the wharf and concreting the landing stage at Jamnagar Bunder were sanctioned as also another for building two pilot boats of Moulmein teak in the P.T. Workshops.

The annual review of municipal administration deplores as usual the defects in working. In all the three divisions the municipalities were not up to their work and councillors displayed little civic spirit. The comments on personal ambitions and party factions indicate that 1939-40 was hardly marked by progress, and the withdrawal of the Congress Ministry may account in some measure for the deterioration. The 129 municipalities whose activities form the subject of animadversion are said to have let principles suffer in the prosecution of private purposes. There are the usual strictures on lapses in procedure and Government has again recorded its opinion that the financial position of many municipalities is unsatisfactory and many of them experienced trouble. The root cause is the large amount of rates in arrear and the reluctance of Councils to embark on the collection of all dues outstanding. The avoidance of payment by Councillors is one more cause for the persistence of arrears, and it appears to be a problem, the tackling of the defaulting Councillor. The amendment of the law on the lines of legislation enacted in Madras would appear to be the most suitable remedy. It is only in regard to public health that the municipalities were lucky but the improvement was not due to better sanitation and more effective treatment of epidemics. Perhaps the succeeding year has reversed the previous tendency in the matter of public health and mofussil towns have to struggle in their own way. The recurrence of embezzlements forms the subject of acidulous mention, but it is obvious that until the suggestions for reform propounded by the Kale Committee are carried out there can be no appreciable improvement.

The entry of one more type of Indian-made cycles into the market when the vehicles are in short supply and prices have skyrocketed as a consequence of petrol rationing deserves to be chronicled here. In Kalbadevi Road there was opened this week the show-room of Hind Cycles, Ltd. The production stage having been reached in spite of delays engendered by the war, the Worli factory is now able to deliver a useful product for India's roads. Dealers have expressed satisfaction with the new machines made here, and a local report states that the Supply Department has reported favourably on the quality of the cycles. The Director-General of Supply when he was here recently had an opportunity to ride a Hind Cycle, and expressed his pleasure concerning the *Swadeshi* bicycle from Worli.

Steamship companies have said little to supplement the Delhi statement relating to the facilities available next month and in December too for Indian pilgrims to Mecca. Now that old controversies have been stilled, there is evidently little cause for dissatisfaction with the proposed arrangements. The fact that at least one sailing from Calcutta has been arranged will inspire satisfaction. No dates have been assigned and would-be Haji will have to reach the port of sailing well in advance of the sailing date. Since a larger number of pilgrims will be carried this season it has been said that no special sailing will be arranged in order to meet a last minute rush at any of the ports. The rates have been left untouched and the promise of usual facilities redounds as much to the credit of the shipping company running the Haj line as the Government which is able to take advantage of more settled conditions in the Middle East. Good response is expected and the early modification of rules concerning taking money out of India will give the Muslim pilgrim a chance to make use of present opportunities. And the usual recrimination and amimadversion may not be forthcoming this year, from unsuccessful applicants for a fifty-fifty share in the traffic because it is known that a full measure of prosperity has been obtained by the Indian Company.

The Silk and Art Silk Mills Association has been putting forth vigorous representations this year in order to draw attention to the difficulties of the industry. The mills have assuredly been hit by the cessation of commercial intercourse with Japan. There is no likelihood of getting anything from Free China, because the U. S. A. and Britain will have first claim on Chinese silk for their defence production. The attempts made in Canada and elsewhere to conserve all local supplies may not be required in India which produces silk on a small scale, but there is a danger that prices will rise too rapidly after the big advance in July. The Department of Commerce has been notified that it is not to the interest of the country to see prices go up far too high. The silk mills have informed Government that India should refrain from exporting, now that the possibility of import has been removed. It has been stressed that indigenous supplies totalling 2 million lb. per annum cannot satisfy an estimated demand of 4 million lbs. It has been also urged that the export of raw silk should be banned so that existing mills can have a guarantee of at least part of the necessary raw material. Exports to the sterling bloc should be treated as exports to other countries because fancy prices are offered for Indian silk and there is a real danger of Indian mills being forced out of production. A plea made in the letter to Government relates to the opening up of supplies from China by way of the Burma Road.

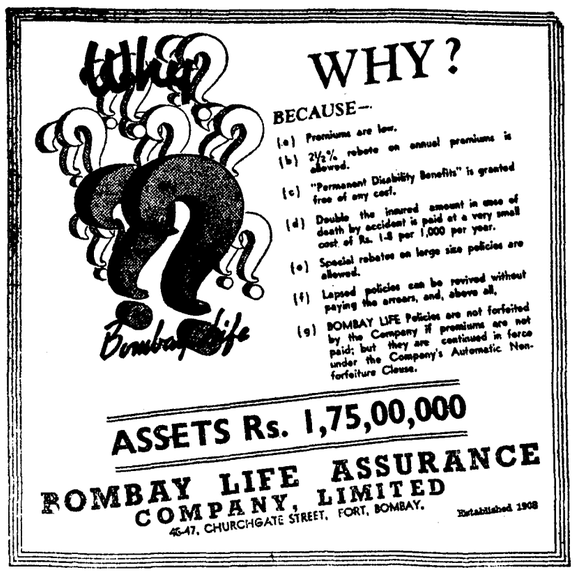
The seasonal interest in cricket has revived and contributions to the pentangular controversy have appeared. It is widely recognised that there may be an appeal to Gandhiji and Congress too may put a veto on communal cricket. The provincial tournament rightly excites more interest at present and the work of the selection committee is being followed keenly. There is a chance that new talent may be given a trial as there will be a trial match before the other match with the Western India States takes place. Certain oldsters are regarded as the inevitable choice but the coming match with a Hindu representative eleven will decide the inclusion of certain promising newcomers. The deciding factor in their case may be the ability to bowl a fast ball, for it is recognised that the Bombay team has batsmen and wicketkeepers but needs the man who can open and bowl a score of overs at a stretch, maintaining both spin and pace. The selection committee will have to see whether there is any one better than the average change bowler among the aspirants for a place in the team put up for the inter-provincial tournament.

(Continued from Page 781)

and sundry creditors totalling Rs. 9.7 lakhs are covered.

The annual report also refers to the retention of the brilliant services of Mr. N. R. Sarker in an advisory capacity as President of the Organisation, but as is generally known Mr. Sarker has become a member of the Executive Council of His Excellency the Viceroy, severing his connection with the Society. No review of Hindusthan's working would be complete, without placing on record his signal services to the Hindusthan which have contributed so largely to its present success. The efficient management and progressive record of the company also bespeak the administrative ability of its Secretary and Chief Executive Officer, Mr. N. Datta and we have no doubt, that under his wise guidance the Society will continue to win fresh laurels.

Increased Production



Industrial activity in India is apparently stabilised after showing a considerable measure of fluctuations in 1940-41 though the fluctuations are likely to have been seasonal and inseparable from normal conditions. Whether any specific stimulus has been imparted by the rise in prices apparent after June can hardly be inferred from the advance in the monthly output of cotton manufactures in June and July. The recovery in textile production after the setback recorded in May was evidently independent of the riots and floods in Bombay. A considerable improvement was certainly recorded in the first quarter which showed an increase of 35 million yards on the output for the first quarter of 1940-41. A further increase in output was reported in July which witnessed an increase in double shift working and the utilisation of hitherto idle equipment. Though textile imports in the first quarter of 1941-42 were around the level of the previous year it is clear that developments generally have favoured the textile industry which has gained also from the moderate expansion in re-exports and exports. It is perhaps in the sphere of prices that improvement is most marked, the average price of cotton manufactures of all types showing a rise of about 35 percent on the previous month. The quickening of mill activity can be readily measured by the rise in consumption of Indian cotton by mills which have taken 136,000 bales more in the first quarter of 1941-42 than in the corresponding period of last year.

The growth of imports of raw cotton this year reflects the increase in mill production and must be connected with the large quantities of war orders both, available and probable. By comparison the jute industry was depressed, but it is necessary to remember that the 19½ million bag order came after the summer, and no conclusion can be drawn from the falling off in output during June. The stock position and the decline in exports over a quarter have to be considered, and the best pointer to the altered position of the jute industry is the decision made in September in favour of an increase in mills' working hours to 54 per week. The improvement in prices if hessian took place in response to a moderate increase in export demand and the further advance in prices during July is disclosed by the rise of five points in the average for jute manufactures. It will not escape notice that the rise in hessian is by no means as great as the rise in the case of cotton manufactures over a twelve-month period.

THE MISRA HOSIERY MILLS have, from the commencement of the war, been "on active service." Working day and night, the mills have been supplying essential requirements of the Army in the knitting line.

MISRA HOSIERY cater to the requirements of the general population and comprise socks, stockings, undervests, sports shirts, interlock underwear and outerwear, for men, women and children.

Production 8,000 Articles, daily.

A Resume of Commodity Markets

THE inconclusive session of the third All-India Price Control Conference has in fact acted as a stimulant to the several commodity markets. With the exception of the raw jute market a generally firm tone has been noticeable everywhere and a substantial rise in prices has been recorded. It was generally expected that there would be some form of general control of prices but it has been found, in the opinion of the government, that the situation is not quite serious and does not call for any immediate action. Control of prices on an All-India basis has been dismissed as impracticable. There have been a series of other conferences during the past few days to consider the other problems. Thus, it was decided that the sum of about £ 100,000 collected for the relief of groundnut growers should be best utilised in research for the better cultivation of the groundnut crop. At the meeting of jute interests and government representatives, mills clearly pointed out that they would not be agreeable to any fixation of maximum prices but that they would give an undertaking that there would be no undue rise in prices for hessians and that the United States would be enabled to buy their goods within the maximum prices fixed in that country if there was no excessive restriction of the jute crop for the next season. On this news the jute market recovered but there has since been a setback and quotations are at the lowest levels for the week.

The important feature of the week is the announcement of a new order for 10 crores sandbags to be delivered in ten equal monthly instalments beginning from next year. The last two orders were for 45 million bags for the Government of India and 150 million bags for the British Government, the latter quantity being rot-proofed. The hint earlier that mills would work for 54 hours a week for a longer period was probably in anticipation of this order.

There has been considerable resentment regarding the proceedings at the recent International Sugar Conference as nothing was definitely known regarding India's position in the matter of exports. The present agreement is due to expire in March, 1942 and under this agreement this country is forbidden to export sugar even to the neighbouring countries. It is now reported that the International Sugar Committee have addressed the Govt. of India regarding their intention to continue to be signatories to the International Sugar Convention. In the event of the Indian Government deciding to continue as signatories of the Agreement it is regarded as likely that there might be relaxation of the provisions relating to the ban on export of sugar.

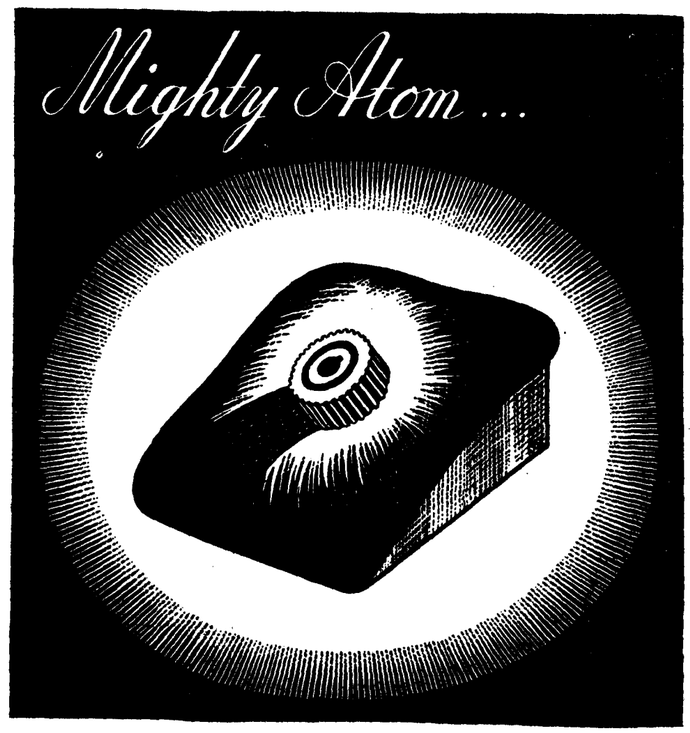
Jute:

After earlier firmness an easier feeling is noticeable Even the recovery on the announcement of the new order for sandbags has been short-lived. Mills are showing no interest in the market and sellers are keen to do business. With a comfortable stock position and the hopes that there will be no excessive restriction of the acreage under the crop for the next season, mills are in no hurry to purchase their requirements. According to the October bulletin of the Indian Central Jute Committee there has been a heavy increase in stocks of jute mills at the end of June, 1941. Stocks of raw jute with Indian mills at the end of last season were 46.63 lakhs bales against 19.92 lakhs at the end of 1939-40 and 21.36 lakhs bales at the end of 1938-39.

Jute Manufactures:

The decision of the mills at the Delhi conference last week has had a steadying influence on the jute manufactures market. On account of the tight spot position a good premium is available for ready stocks but for forward deliveries prices are below the maximum levels fixed in the United States. The new order for 10 crores sandbags has had an encouraging effect on the market, but there has been only a slight increase in values. The new order for bags are not to be rot-proofed and has been placed with the Indian Jute Mills Association at a price of Rs. 12-4 per 100 bags.

Regarding the position of hessian stocks in the overseas market the following extracts from the bulletin of the Indian Central Jute Committee are of interest.



"The shortage of bags is being much felt in the U.S.A. and the Government has requested all used-bag dealers to furnish relevant statistical information concerning the available supply of used textile bags suitable for use in the national defence programme. The Government is also trying to solve the question of the shortage of jute partially by substituting cotton goods for jute goods. Sandbags for which jute had a monopoly are also being replaced by osnaburg.

The report from the Argentine also does not give a happier picture. The stocks of jute goods have gone lower and the supply condition has not improved."

Linseed:

In sympathy with the other markets a firmer tone is noticeable and a moderate rise in prices has been recorded. The easier freight position has revived hopes regarding the possibility of an increase in exports.

Mighty Atom ...

Only a cog—yet equally important in delicate mechanisms and giant machinery. The progress of industry depends upon such vital parts as these. For strength and reliability we turn to steel, of which these vital parts are made.

ISSUED BY THE TATA IRON & STEEL CO., LTD. HEAD SALES OFFICE : 102A, CLIVE STREET, CALCUTTA.

Jute and Jute Manufactures

(By our Correspondent)

Calcutta, 30th October.

TWO points seem to have been stressed by the Shipping interests at the recent discussions at Delhi on the subject of the proposed fixation of maximum prices on hessians. These were, first, that the jobber in the New York spot market was equally ready, if not more so, to take advantage of any shortage of ready goods, as his confrere in the Calcutta market. So that if there were a beam in the one eye, there was certainly a mote in the other. The second point was that the consumers in the U.S.A. have of late years played largely into the hands of the New York jobbers and the Calcutta Bazar by taking a short view of their requirements and relying to a great extent on spot and ready goods. There have been times certainly when such a policy must have paid them, but by no means always. Time was when the large consumers in the States would place a very considerable percentage of their prospective requirements as much as a year ahead. It is difficult to understand why, for in a normal market, forward goods are always procurable at a discount—sometimes at a very substantial discount. During the recent "ramp," goods for less than six months forward were frequently obtainable at more than five rupees less than the near price. Further, it is only natural that the spot and near positions should be more susceptible to speculative fluctuations than further forward positions. It is perhaps therefore to some extent due to this tendency to rely on the spot and near markets and to refrain from taking a lower view, which gives rise to the complaint lately voiced by an authority in the New York Burlap trade that "no element in the American market could with assurance make stable plans for the sale of jute goods under the conditions prevailing in the trade for the past two decades. The business has been a pure gamble." Without disputing that there is more than a substratum of truth in that remark, it may be suggested that the American consumers might minimise the gamble by taking a longer view, and by placing their orders further ahead, particularly when hessians are at a normal or subnormal level of price. We do not suggest that this is applicable to present conditions, but the remark quoted above referred to a period covering the last 20 years. But even the present moment January-March 9 porters are quoted at five rupees under, and 11 porters Rs. 4-4 under the ready prices. And that is only 4 months ahead.

The dilemma in which Shippers frequently find themselves was also emphasised. When they sold for export they had the option of covering for the month of delivery and standing the chance of having to pay for the goods against delivery-order and having to hold them for an indefinite time till shipping space became available; or of holding off covering till they could see the prospect of freight and then perhaps being caught in a short market.

The result of the discussions appears to have been inconclusive except that there seems no immediate prospect of any control of prices, while the Chairman of the Jute Mills Association made it clear that, so far as the Mills could control the situation, there would always be ample goods available for the American market at reasonable prices, provided Jute Crop control was so regulated as to provide a sufficient supply of raw material—also at reasonable prices. And who could say fairer than that?

One interesting point emerged in the course of the discussions and that was that the Commerce Member had not read Professor Todd's report on the Futures markets. It is understood that immediate steps have been taken to remedy this defect in his education.

Jute has been a declining market in all sections. The primary weakness has been in Fatka, where from a high of Rs. 68-8 at the end of last week, the quotation dropped at one time to Rs. 64 though closing somewhat steadier as Rs. 65-4. It is sometimes difficult to gauge these movements which seem to depend largely on the interpretation the Bazar operators put upon the War news. And it is far from easy to judge how they will read the Headlines. Neither for shipment nor for Mills has the demand for pucca bales been extensive. For shipment, Old Crop Outport Firsts and Lightnings were reported at Rs. 58 and Rs. 48. Out-port Tossa 2-3 sold at Rs. 62-8, and for December shipment Dundee Daisee 2-3 were reported at Rs. 62-12 and Dundee Tossa 4s. at Rs. 62 and Rs. 61-8. A small steady business continues with Mills in Firsts, Old Crop about Re. 1 below Fatka and New Crop about Re. 1 above. Dundee Daisee 2-3 sold at Rs. 64 and Out-port Tossa 2-3 at Rs. 61 to Mills.

Loose Jute business has been confined almost wholly to European packing in which a fair quantity was done at Rs. 16-12, Rs. 14-12 and Rs. 11-12 for Tops, Middles and Bottoms with business possible at four annas less at the close. Jat Tossa Middles were taken at Rs. 16-8 to Rs 16 according ta marks. Indian sellers of white jute find it almost impossible to interest buyers even on the basis of Rs. 13-4 for Jat Middles. It is probably selling into Fatka by such dealers against their holdings which is responsible for a good deal of the weakness in that market.

The mofussil, though somewhat easier, lags well behind Calcutta in the decline, with imports smaller and quality deteriorating. A more cheerful feature however is that the condition of recent arrivals is definitely better.

Fabrics markets have ruled fairly steady and show little change over the week. Demand in Hessians has been confined mainly to near at hand for both local and overseas covering. Sales of 9 porters have ranged around Rs. 23 for ready and Rs. 17-10 for Jan-March is reported. Elevens sold at Rs. 26-14 to Rs. 26-6 ready and Rs. 25-14 to Rs. 25-8 Nov. Rs. 22-8 was also reported for January-March. Rather more interest has been evinced in Heavy Goods than of late and sales were recorded in "B" Twills at Rs. 39 to Rs.38-8 for Octr. and Nov. and at Rs. 37-12 Jan-March. Liverpools sold at Rs. 46 Nov. Rs. 45 Dec. and Rs. 44-8 Jan.-Feb. Cornsacks fetched Rs. 40-4 ready, and Rs. 40 to Rs. 39-12 Nov. Heavy Cees sold at Rs. 38 October. Market closed quiet but fairly steady in tone,

9 porters Rs. 23-2 Ready, Rs. 21-4 Nov., Rs. 20 Decr., Rs. 18-4 Jan.-March, Rs. 17-4 April-June. 11 porters Rs. 26-6 Ready, Rs. 25-8 Nov., Rs. 24-6 Decr., Rs. 22-2 Jan.-March, Rs. 20-14 April-June. "B" Twills Rs. 38-10 Ready, Rs. 38-8 Novr., Rs. 38-6 Decr. Rs. 38-2 Jan-March, Rs. 37-8 April-June. Cornsacks Rs. 40 Ready, Rs. 40 Nov., Rs. 39-10 Decr., Rs. 39 Jan-March, Rs. 38-8 April-June. Liverpools Rs. 46-12 Ready, Rs. 46-4 Nov., Rs. 45-8 Decr., Rs44-8 Jan-March, Rs. 463-12 April-June. Heavy Cees Rs. 37-8 Ready, Rs. 37-12 Nov., Rs. 37-12 Decr., Rs. 37-8 Jan-March, Rs. 37 April-June.

JUTE

Calcutta, October 30.

After earlier firmness the raw jute market was inclined to be rather quiet. Mills were disinterested buyers and with the eagerness of sellers to do business quotations were naturally pushed down. The earlier strength of the markets was due to the reports that no definite decisions were reached at the Delhi Conference regarding fixation of maximum prices for hessians which meant in turn that there would be no limitation of prices for jute as well. However, the realisation that in their efforts to keep down prices for jute manufactures mills will not pay higher prices for jute has been responsible for a downward trend in values in mid-week. Only the reports regarding the placing of a new oder for sandbags have had an encouraging effect and the question at the time of writing is higher than the lowest levels for the week though lower on balance.

The placing of the new order for sandbags for 10 crores bags means that mills will continue to work 54 hours per week even after the beginning of the new year.

In the loose jute section sellers have been keen to do business. In the absence of any large mill buying quotations were naturally marked lower. Indian Jat Middles and Bottoms were done at Rs. 13/4 and Rs. 10/4 respectively. Quotations are slightly higher at the close.

In the pucca bales section shippers have done some small business. Dundee Daisee 2/3 and Tossa 4's are done at Rs. 62/12 and Rs. 61/8 respectively for December shipment.

In the futures market as remarked above after being higher at Rs. 68/8 there was a drop in the quotation to Rs. 65/4. There has been a slight recovery towards the close to Rs. 66/4.

JUTE MANUFACTURES

Calcutta, October 30.

Operators in the jute manufactures market were relieved earlier in the week on the news that no decision was reached at the Delhi Conference regarding the fixation of maximum prices. But the news that the mills had given an undertaking that there would be no undue rise in prices prevented any speculative rise. Quotations were fluctuating in narrow limits. Only the report regarding the placing of a new order for 10 crores sandbags has had an encouarging effect. The order is to be delivered in ten equal monthly instalments from January, 1942 to October, 1942. 9 Porters ready are quoting Rs. 23/2, November Rs. 21/4, December Rs. 20/2 and January-March Rs. 18/6. 11 Porters ready are Rs. 26/4, November Rs. 25/8, December Rs. 24/4 and January- March Rs. 22/4.

In the heavy goods section there is very little interest and business passing has been on a very small scale. B Twills for October shipment sold on the basis of Rs. 38/10, Liverpool Twills Rs. 47, A Twills Rs. 49 and Cornsacks Rs. 40/2.

COTTON

Calcutta, October 30.

The Bombay raw cotton market has been rather firm during the past week and a substantial rise in prices has been recorded. Mills have shown greater interest in the market. With the increased activity in the indigenous mill industry and the strength of the cloth market there has been good buying by commission houses and jobbers. The reports regarding the border clashes between Japan and Russia had a slightly discouraging effect but when it was known that the incidents were no more than of local importance there was a rally. Closing quotations are at the highest levels for the week. Broach April-May are quoting Rs. 230/8, Oomra December-January Rs. 193/8, March Rs. 185/8 Bengal December-January Rs. 148/8 and March Rs. 150/8.

The New York market has been fluctuating in narrow limits. There was a decline in prices on hedge selling. Towards the close a steadier tendency has been noticeable on improved trade demand. The quotation for December was 16.15 cents and March 16.44 cents.

GOLD

Calcutta, October 30.

The gold market was rather uninteresting for the most part of the week. Quotations were fluctuating in narrow limits with very little of business passing. Towards the close, however, a firmer tone has been noticeable and quotations are at the highest levels for the week. Gold ready are quoting Rs. 42/3/3, First Settlement Rs. 42/3/6 and Second Settlement Rs. 42/3/6.

The London price for gold remained unchanged at 168s.

SILVER

Calcutta, October 30.

Scarcity of ready supplies and buying during the Diwali holidays have been responsible for the rise in the quotations for ready. Closing quotations are at the highest levels for the week. The improvement is pronounced particularly in the quotation for the forward positions. Indian Mint Silver ready are quoting Rs. 63/1/6, First Settlement Rs. 62/14/6 and Second Settlement Rs. 62/13/6. Quotations at the end of last week were Rs. 63/0/6, Rs. 62/11/6 and Rs. 62/10/9 respectively.

There has been little of interest in the London market. Quotations for both spot and forward have remained unchanged at 23⅛d. throughout the week. Small trade buying has been satisfied by official selling.

PIECEGOODS

Calcutta, October 30.

The piecegoods market has been firmer during the past week with the reserve of sellers. The statement by the Commerce Member that there would be no general control of prices has had an encouraging effect. Hitherto, there has been a suggestion only for the fixation of maximum prices for 'standard cloth' varieties. Mills have not been keen to do business though most of the business has been on account of Ahmedabad mills. In the Japanese goods section there has been no activity and most of the business has seen of a retail character.

WHEAT

Calcutta, October 30.

The Karachi Wheat market has been firm throughout the week and closing quotations are at the highest level for the week. There is general expectation that there will be large scale buying by the Government for export to the Middle East. The decision at the Price Control Conference that there should be no control of prices on an all-India basis has also been an encouraging factor. There has been good export buying on most days of the week. Only towards the close exporters have shown much less interest with the appreciation in values. Choice White ready were Rs. 42/10, November Rs. 42/10 and January Rs. 42/13.

The local market also is firmer in sympathy with other markets. The rise in prices would perhaps have been more pronounced but for the encouraging prospects for the Bengal rice crop. Cawnpore ready were Rs. 5/10 and May Rs. 5/2/3.

Investor's Supplement

Vol. XXVIII. No. 18 SATURDAY, NOVEMBER 1, 1941. Price Re.1

Stock Markets to-day and to-morrow

NEW ORDER FOR SANDBAGS

Re-opening after the long holidays a rather firm tendency has been in evidence on the Calcutta Stock Exchange. With the increase in the volume of business prices have been marked higher all-round.

* * *

Cotton shares have commanded good attention. Jute shares have been firmer on the announcement of the new order for sandbags. Engineering and Sugar shares also have been in request. The war situation does not seem to have any terror for the operators at the present moment. It was first feared that there would be immediate complication in the Far Eastern situation. Fortunately, there has been no suggestion hitherto of any early break of hostilities in the Pacific. In Europe there has been no appreciable change in the situation. Barring any untoward developments the upward movement in prices should continue to be in evidence.

* * *

The new order for 10 crores sandbags, to be delivered in ten equal monthly instalments from January, 1942 to October, 1942 should have an encouraging effect on the market. There was a suggestion earlier in the week that mills might work 54 hours per week for a longer period than was at first planned. With the fresh order for sandbags it is now almost certain that mills will continue to work 54 hours per week even in the New Year. Already, the effects of the increased hours of working have been reflected in the earnings of Anglo-India Jute Mills Company, Limited and Hastings Mill Limited for the latest half-year.

* * *

The net profit of the *Anglo-India Jute Mills Company, Limited* for the six months ended September, 1941 is more than three times the earnings for the previous half year. A larger volume of sales, higher prices and lower production costs have been responsible for the sharp rise in earnings. The net profit for the latest half year is Rs. 17,66,753 against Rs. 5,73,354 for the previous half year. The provision for taxation, including excess profits tax, has naturally taken the bulk of the increase in earnings, the provision in this regard being Rs. 9 lakhs against Rs. 25,000. After providing for depreciation Rs. 1,50,000 (nil) the dividend on the ordinary shares is higher at Rs. 12-8 against Rs. 10 per share. The amount carried forward is not very much changed at Rs. 1,41,130.

On the basis of the latest dividend the return is more than 6.4 per cent. tax-free with the quotation for shares around Rs. 388.

* * *

The increase in earnings of the *Hastings Mills Limited* for the half year ended August, 1941 has enabled the directors to pay off the arrears of dividends on the preference shares for two half years ended February, 1938. But for the substantially higher provisions for taxation it would have been possible to pay off a greater portion of the arrears of dividends. The net profit for the half year is Rs. 5,67,030 against Rs. 2,77,317. The provision for depreciation is higher at Rs. 1,06,847 (Rs. 77, 888) while the provision for taxation is Rs. 2,90,000 (Rs. 71,015). The arrears of dividend on the preference shares for two half years ended February, 1938 are to be paid. The shares at Rs. 153 cum-dividend are cheap indeed. There has been an appreciation in the quotation since I last recommended the shares from Rs. 137-8 to Rs. 153.

* * *

There has been good demand for cotton mill shares during the past three weeks. *Elgin* have recorded a rise of nearly three points to Rs. 29-8. On the Bombay Stock Exchange there has been considerable activity and substantial gains have been recorded.

* * *

The results of the *Delhi Cloth and General Mills Limited* for the year ended June, 1941 bear testimony to the improved conditions in the industry. Profits for the year under mention are nearly double the earnings for the previous year (1939-40). The net profit, before providing for taxations is Rs. 68,98,930 against Rs. 35,83,666 for 1939-40. The provision for taxation is Rs. 30,00,000 (Rs. 9, 50,000) while the amount set aside to depreciation is Rs. 15,00,000 (Rs. 7, 50,000). The allocation to General Reserve is Rs. 9 lakhs (Rs. 7,50,000). The dividend on the ordinary shares is higher at Rs. 2 per share against Rs. 1-12 per share. A bonus of eight annas per share is to be paid in addition.

* * *

The company is expanding its activities and with the brighter prospects for the current year earnings should be much more.

Owing to very heavy consumption in the company's factories of hydrochloric and sulphuric acids and their steadily increasing prices in the market, it has been decided to put up a factory which, it is hoped, will be ready in a short time and will help the company in getting acids of uniform quality at a very much lower cost.

Efforts are also being made to produce various chemicals, including many required in the mills. It is hoped that this will become a profitable line.

* * *

"Indian Finance" Daily Index, published every week in the "Investor's Supplement", reveals that the figure for All-shares at 130.58 on October 27, 1941 is standing at the highest level for the war period. Commenting on the setback in the index figure at the end of September when the third major German offensive against Russia began it was pointed out that there was no suggestion of an appreciable setback in prices and that given continued stubborn resistance the upward trend would be resumed. The reason for the recent rise in the All-share Index is the strength of the Cotton, Jute and Engineering shares. The index for cotton shares, Bombay, shows a rise of over five points at 165.92 while that for engineering shares is higher by four points. The re-opening after the long holidays in both the stock exchanges in Calcutta and Bombay, as pointed out above, has been very firm and there has been a further rise in the index for All-shares.

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, October 31.

THE period under review is again a short-working week on account of holidays. But during the short period in which markets have remained open a firm tone has been noticeable. In the absence of any important change in the war situation there has been greater fresh buying. There has been good enquiry for Cotton, Jute and Engineering shares and substantial rises in prices have been recorded. The undertone in the several sections is firm. Given the continuance of the present conditions a further rise in prices is not unlikely.

The giltedged securities section has been steady though business passing has been on a restricted scale. Quotations are more or less unchanged. 3½ per cent. Paper is quoting at Rs. 96 and 3 per cent. Paper at Rs. 82-12. Among terminable loans, 3 per cent. Defence Bonds were Rs. 102-2, 3 per cent. 1963-65 Rs. 95-3, 4 per cent. 1960-70 Rs. 110-7 and 5 per cent. 1945-55 Rs. 111-4. There have been few transactions in provincial loans. Money conditions have continued easy and there has been a slight decrease in the treasury bills rate from ten annas and eight pies per cent per annum last week to ten annas and three pies per cent annum this week.

Bank shares have been firm with *Imperial Bank* fully paids at Rs. 1,610 and contributories at Rs. 400. *Central Bank* are firm at Rs. 50-8-and *Reserve Bank* at Rs. 108-8.

Business in public bodies' debentures has been restricted on account of the scarcity of sellers. 4 per cent. *Calcutta Municipal* debentures were done at Rs. 108-5. Among preference shares, *Cheviot* were done at Rs. 171. *Dalmia Cement* were Rs. 127 ex-dividend, *Jessop* Rs. 120-3, and *Steel Corporation* Rs. 122. *Associated Hotels* were done at Rs. 100, *Orient Paper* at Rs. 115 and *Carew & Co.* at 140-8.

Cotton shares have been very active. There is almost a famine for cloth at the present moment. With the mills busily engaged on war orders and with the prospect of further large orders being received in 1942 there has been very good demand for the popular shares. *Elgin* have been marked higher at Rs. 29-8. *Cawnpore Textiles* are quoting Rs. 10-1, *Dunbar* Rs. 250-8, *Kesoram* Rs. 8-14 and *New Victoria* Rs. 4-9.

Coal shares are not very much higher. There is considerable shortage of coal and unless the present shortage of wagons is relieved a very difficult position would be created. It is on account of the difficulty in obtaining wagon supplies that there has been a fall in coal despatches. *Bengal* are quoting Rs. 381, *Bokaro and Ramgur* Rs. 14-14, *Dhemo Main* Rs. 12-14, *Raneegunge* Rs. 31-4, *Standard* Rs. 22-12 ex-dividend and *West Jamuria* Rs. 31-8.

Jute shares have been marked higher on the publication of encouraging reports by important jute companies. The latest order for 10 crores sandbags should also have a stimulating effect. *Howrah* are quoting Rs. 58-8, *Anglo-India* Rs. 388, *Alliance* Rs. 333-8, *Clive* Rs. 28-12, *India* Rs. 406, *Gourepore* Rs. 746, *Kamarhatty* Rs. 525, *Reliance* Rs. 61-12, *Soorah* Rs. 12-2 and *Waverley* Rs. 4-2. The rise in prices in the case of *India* and *Megna* especially are pronounced. The accounts of the *Anglo-India Jute Mills Company Limited* for the half-year ended September, 1941 make very good showing. The ordinary dividend has been increased to Rs. 12-8 per share from Rs. 10 per share.

In the Engineering section a firmer tone has been in evidence during the last three days. *Indian Iron* and *Steel Corporation* are higher at Rs. 32-9 and Rs. 20 respectively. The disappointment with the results of the Burn & Co. Limited for the year ended April, 1941 was responsible for the decline in the quotation to Rs. 408 but the realisation that there would be an improvement in the earnings for the current year has caused a recovery to Rs. 422-8. There has been good buying of *Bhartia Electric Steel Company* ordinary shares and the quotation is now Rs. 16-12 ex-rights. *Braithwaite & Co.* were Rs. 10-8. *Jessop & Co.* Rs. 20-13 and *National Iron and Steel* Rs. 10-8.

Sugar shares have been in good demand and there has been an all round improvement in values. The declaration of a dividend of 10 per cent. by the *New Savan Gur and Refining Company* for the year ended May, 1941 has had an encouraging effect on the market. *Cawnpore* were Rs. 25-9, *Carew & Co.* Rs. 14-8, *Champarun* Rs. 10-8, *Purtabpore* Rs. 11 and *Raza* Rs. 22-11..... ....

Tea shares have been better on investment demand. *Baradighi* were Rs. 48-12, *New Samanbagh* Rs. 28-8 *Patrakola* Rs. 990 and *Soom* Rs. 15-4.

In the Miscellaneous section, *B. I. Corparation* were Rs. 4-12. *Burma Corporation* and *Indian Copper Corporation* were unchanged at Rs. 4-7 and Rs. 2-6 respectively. *Bararee Coke* were Rs. 28-12, *Alkali and Chemical* Rs. 20-8, *Indian Cables* Rs. 29-4 and *Rohtas Industries* Rs. 23-8. Paper shares have been in good request with *Titaghur* A and B shares at Rs. 22-13. *India Paper Pulp* were Rs. 160, *Mysore Paper* Rs. 18 and *Orient Paper* Rs. 16-3. Timber shares have been firm with *Borooah Timber* at Rs. 19-8, *Assam Saws* at Rs. 4-2 and *Bengal Timber* at Rs. 192.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, October 30.

Money: The rate for call money continued to be quoted at ¼ per cent (lenders).

Exchange Market: Banks are selling T.T. at 1s. 5 31-32d. and buying three months' bills at 1s. 6 9-32d.

Securities: Giltedged securities have been remarkably steady with a slight improvement in turnover, 3½ per cent Paper being done at Rs. 96. 1948-52 changed hands at Rs. 97-14; 1951-54 at 99-13; 1963-65 at Rs. 95; 1947-50 at 103-3; 1960-70 at Rs. 110-10; 1955-60 at 114-12; 1945-55 at Rs. 111-3 and 3 per cent 1946 *Defence Bonds* at Rs. 102.

Shares: The local share market, after opening steady on Monday, developed a rising tendency on all-round buying and prices recorded sharp improvements. Profit-taking was well absorbed and a general rise in prices was noticeable up to Wednesday. The closing tone of the market to-day is, however, a shade quieter following the news that German troops have made a further advance towards Moscow and are trying to menace the capital from several points. Mill shares were marked up, while Steel shares were steady despite selling pressure.

Textiles: It was in the textile section that a marked rise was witnessed. Prices showed a good advance on continued buying following the reports of Russo-Japanese border clashes. *Bombay Dyeings* were a bright feature. After opening at Rs. 1,356-4, the price gradually advanced to Rs. 1,395 at which level there was some profit-taking. the closing price being slightly easier at Rs. 1,376-4. *Kohinoor* improved to Rs. 561 and *Century* to Rs. 472, both finally closing at Rs. 555-8 and Rs. 469 respectively. *Central India* closed at Rs. 409; *Colaba* at; 220; *Gokak* at Rs. 263; *New Great* at Rs. 347; *Simplex* at Rs. 162 and *Svadeshi* at Rs. 430. In the cash list, *Vishnu* were slightly lower at Rs. 1,490, while *Western India* were unchanged at Rs. 1,475.

Hydro-electrics: Prices in this section remained more or less unchanged, *Andhra Valley* being done at Rs. 1,765; *Tata Power* at Rs. 1,775 and *Tata Hydro* at Rs. 193.

Steels: Steel shares were slightly steady in the absence of sellers. *Tata* ordinaries opened at Rs. 401 moving ahead soon and deferreds at Rs. 2,127-8. The deferreds too met with good support and gradually moved up, closing higher at Rs. 2,185. The ordinaries, after opening at Rs. 401, touched a high of Rs. 409, but closed a shade easier at Rs. 408.

Banks: Bank shares were steady. *Bank of India* being done at Rs. 148; *Imperial Bank* fully paids at Rs. 1,610; contributories at 400; *Reserve Bank* at Rs. 109 and *Central Bank* at Rs. 50-14.

Miscellaneous: *Bombay Burma Trading* moved up in sympathy with other shares, closing finally at Rs. 536-4. *Associated Cement* were slightly higher at Rs. 162-8. *Premier Construction* were unchanged at Rs. 128-8 and *Alcock Ashdown* at Rs. 627-8. *Belapur Sugar* were, however, a shade lower at Rs. 258-8. *Indian Iron* were done at Rs. 32-9; *Steel Corporation* at Rs. 20; *Scindia Steam* at Rs. 27-1; *Tata Oil* at Rs. 62; *Tata Chemicals* at Rs. 15-12 and *Wimco* at Rs. 221-4. *New India Assurance* were better at Rs. 54-8.

MADRAS STOCK EXCHANGE

(*From Our Correspondent*)

Madras, October 30.

The local market developed a more buoyant tone with large enquiries from outside markets for nearly all textile shares. Planting issues met with moderate support and prices ruled steady. Public utilities had fair demand.

Securities: The gilt-edged market continued in its dull course with prices stagnant around last week's close. 3½ per cent paper ruled steady at Rs. 96, while 3 per cent 1951-54 changed hands at Rs. 99-14. State Loans met with restricted business owing to the lack of sellers. Provincial loans met with a fair turnover, 3 per cent 1952 *Madras* being done at Rs. 99-10 and 1953 at Rs. 99-4 s.l.

Mills: Mill shares were an active market during the week owing to the large enquiries from outside markets and substantial advance in prices has been recorded. *Bangalore Woollen* were marked higher at Rs. 273 and *Cambodia* at Rs. 11-2; *Vasanta* at Rs. 142-8; *Pankaja* at Rs. 122-8 and *Sitaram* at 87. *Buckingham & Carnatic* were, however, steady at Rs. 279.

Utilities: *South Madras Electric* ordinaries had good buyers at Rs. 15 c.d. *Salem-Erode* came in for transaction at Rs. 13-8; *Gudivada* at Rs. 89 c.d. and *Cochin State Power* at Rs. 8-14.

Plantations: Rubber shares were steady but there was only a moderate turnover. *Cochin Malabar* met with good buying at Rs. 9-2 c.d. following the announcement of an interim dividend of 7½ per cent compared with only 5 per cent a year ago. *Kalpetta* were higher at Rs. 24 and *Thirumbadi* at Rs. 2-3. *Woodland* were at Rs. 8-6 c.d. Tea shares had good enquiries though little scrip was on offer. *Peria Karamalai* were absorbed at Rs. 19-4; *Chembra Peak* at Rs. 5-7 and *Peermade* at Rs. 31.

Sugars: *Mysore Sugar* were on offer at Rs. 53-8. *Travancore Sugars* were slightly marked down at Rs. 15-10 as against Rs. 16-2 in the previous week.

Banks: *Indian Bank* big shares were wanted at Rs. 145. *Indian Overseas Bank* were marked at Rs. 105.

Miscellaneous: *Mysore Paper* met with fair business, closing slightly higher at Rs. 17-8. *Mysore Chemicals* were at Rs. 18-4 c.d. *Mettur Chemicals* ordinaries changed hands at Rs. 13-4 c.r. and the deferreds at Rs. 3-8-6 c.r. *Spencer* ordinaries were transacted at Rs. 6 and '*A*' preferences at Rs. 11. *India Jute* were crossed at Rs. 386; *Cawnpore Tannery* at Rs. 10-8 and *Associated Cement* at Rs. 155 cash.

LONDON STOCK EXCHANGE

Markets on the London Stock Exchange have been quietly steady during the past week. In mid-week a slightly easier tendency was noticeable with the uncertainty regarding the war situation but the close has been more active. Giltedged securities are a shade easier on balance, 2½ per cent. Consols being 82 3-8, 3½ per cent. Conversion 106½, 5½ per cent. War Loan 104 15-16 and 3 per cent. War Loan 101 5-16d. 3½ per cent. India Sterling Stock were 99½.

Among other sections, Tea and Rubber issues have been easier while Kaffirs have been steady. Oil issues have been irregular. Towards the close *Anglo-Iranian* and *Venezuela* are higher. Home Rails are steady.

NEW YORK STOCK EXCHANGE

Wall Street has been irregular and business passing has been on a small sale. *U.S. Steel* are $53¾, *Anaconda Copper* $26 3-8 and *General Motors* $38 7-8.

ANGLO-INDIA JUTE MILLS CO., LD.

Notice is hereby given that the Share Transfer books of the Company will be closed from 7th to 18th November 1941, both days inclusive.

By Order of the Board of Directors.
DUNCAN BROTHERS & Co., Ld.
Managing Agents.

BRITISH COMPANIES IN INDIA

(*By* R. GORDON CUMMINGS)

Finlay Tea Companies:

Good results are the order of the day with the four giant tea producers of the James Finlay group. But, as with the managing company, bigger taxation demands have cut into the improved profits. In one case only—*Anglo-American Direct Tea Trading*—is, however, the net figure below that of the year ended November 30th, 1939. Tea exports for the financial period ended November 30th, 1940 remained under control and the major portion of the crops available for export was sold under contract to the British Ministry of Food on the basis of the average secured by the individual estates during the seasons 1936, 1937 and 1938, adjusted to an Eastern port basis, plus 1d. and 1¼d. per lb. in the case of India and Ceylon respectively, towards meeting increased costs of production.

Tea crop of *Consolidated Tea and Lands* was 18,962, 352 lbs., against 18,189,379 lbs. for the year ended November 30th, 1939, rubber harvested was 881,152 lbs., against 705,558 lbs., and the number of coconuts produced was 4,066,668, compared with 3,722,-091. Rubber realised an average of 12¾d. per lb., against 10⅜d. After providing £150,000 for taxation and £45,000 for depreciation, net profit was £196,829, compared with £158,208 for 1938-39. Dividend on the £1,200,000 ordinary capital has been maintained at 10 per cent. and £139,345 is carried forward, against £140,516 brought in. Planted area of the estates—in Sylhet, Assam, Dooars, Darjeeling and Ceylon—is 36,079 acres.

Crops of *Amalgamated Tea Estates* were 6,824,720 lbs. tea, 213,443 lbs. rubber and 2,182,029 coconuts, compared with 6,437,488 lbs., 187,380 lbs., and 2,258,369, respectively in 1938-39. Rubber realised an average of 11⅜d. per lb., against 10d. Allowing £48,000 for taxation and £22,000 for depreciation, net profit was £98,448, compared with £51,424 in the previous year. Ordinary dividend has been maintained at 7 per cent. leaving £97,072, against £86,593 to carry forward. Planted area of the Darjeeling, Assam, Sylhet, South Indian and Ceylon estates is 16,369 acres.

Anglo-American Direct Tea Trading reports crops of 9,081,000 (8,741,000) lbs. tea 555,000 (541,000) lbs. rubber, 5,760 (7,283) cwts. coffee, 952 (1,700) cwts. cocoa and 11,602 (30,042) lbs. cardamoms. Rubber realised 11¾d. (9½d.) per lb. Net profit, after allowing £15,000 for taxation and £33,000 for depreciation, was £79,822, a reduction of £5,855 on the 1938-39 figure of £85,677. Dividend on the £662,370 ordinary capital has been maintained at 7½ per cent. and the carry forward is £144 higher at £86,241. The estates, situated in India and Ceylon, have an area of 23,198 acres.

A slight fall in the tea crop is shown in the *Kanan Devan Hills Produce* report, the outturn being 14,828,075 lbs., against 15,357,196 lbs. for the previous twelve months. Net profit, after deducting £105,000 for taxation and £45,000 for depreciation, was £161,110 which went against £140,794 in 1938-39. Dividend on the £750,000 ordinary capital was again made up to 17½ per cent. and the carry forward was £96,533 against £99,673 brought in. The company owns 29,902 acres in Travancore and Assam.

Dividend %	15	15	15	15
Carry forward	553	3,741	2,690	4,442

Audited accounts for the year ended 30th June, 1941:—

The accounts show a profit of Rs. 39,953-9-7. To this has to be added Rs. 3,741-6-0 brought forward from last year's accounts, making in all Rs. 43,694-15-7.

The directors hope that the result of the year's working will be considered satisfactory.

The Directors propose that the profits be disposed of as follows:—		
Dividend for the year ended 30th June, 1941 at 15 per cent, free of Income-tax	23,640	0 0
Depreciation on Plant and Machinery—		
Kunyara Rs. 1,731 6 3

		Total liquid assets ..	2,39,643

DELHI CLOTH & GENERAL MILLS CO., LTD.

Audited accounts for the year ending 30th June, 1941:—

The profits for the year together with the balance brought forward from last year and certain adjustments amount to Rs. 71,28,370-2-8 which the directors propose to dispose of as under:—

Dividend on Ordinary Shares of the face value of Rs. 25/- each @ Rs. 2/- per share, and Bonus @ Rs. -/8/- per share, free of Income Tax ..	12,36,317	8 0
Proportionate dividend and Bonus on Ordinary Shares of Rs. 2/8/- each, free of Income Tax ..	10,000	0 0
Proportionate dividend and Bonus on partly paid-up Ordinary Shares, free of Income Tax ..	176	13 3
Dividend on Preference Shares at 4½%, free of Income Tax	90,000	0 0
Income Tax & Excess Profit Tax ..	30,00,000	0 0
Charity	1,25,000	0 0
Depreciation	15,00,000	0 0
Reserve	9,00,000	0 0
Carried forward	2,66,875	13 5
Grand Total ..	71,28,370	2 8

At first sight the profits no doubt look to be very much higher than what they have been ever before and will tempt everybody into the belief that a very much bigger dividend ought to be available to the shareholders. But in this connection the directors have to make it clear that while the profits are nominally higher by 93% the actual money left to them, after paying the taxes to the Government, will be no more than 50% in excess of what was left to them last year.

The profits are very much less than the profits made by certain mills which are either wholly or to a very great extent supplying their goods to the Government. The profits shown now include the profits from two sugar mills and even the profits made on the tent business, orders for which are placed with them on the same basis as with any other contractor who has nothing to do with a cotton mill or has ever had anything to do with tailoring etc. It will thus be seen that profits on supplies to the Government are on a very much lower basis than those of many other concerns. The demand from the Government is steadily increasing.

The directors have also been able to build up a small export trade which they find, at the moment, to be satisfactory.

The immediate outlook for cotton mills is not too bad, but there is a great shortage of cloth in the country, and if early steps are not taken by the Government and the Industry to considerably increase the production of yarn and cloth, the effect on the poor masses will certainly be very serious and much suffering is bound to be caused.

Last year the directors purchased a sugar factory at Barhni and the results achieved by the factory during the year under report have been quite satisfactory.

The Sugar factory at Daurala has also done well. At great expense and trouble, it has been possible for the directors to meet certain requirements of the Army in such articles as were never before made in the country, and every effort is being made to produce various kinds of superior sugars which until recently, and even now, are being imported. As a matter of fact, there is hardly any kind of sugar left which the directors do not make there.

Although, by the efforts of the U.P. and Bihar Governments and the Indian Sugar Syndicate Ltd., the chaotic conditions in which the industry in Bihar and U.P. found itself last year, have been to a considerable extent removed, the Industry is still moving in a vicious circle, and that until and unless redical steps are taken, the Industry is in a very great danger of losing most of its markets to sugar factories situated either in the Indian States or in provinces other than these two. The result would obviously be to the detriment not only of the less efficient and weaker factories in these two provinces but also of the factories well situated, efficient and financially strong. The policy now being followed by the two Governments of U.P & Bihar, if not changed, may permanetly weaken even the strong factories in these two provinces. They hope that they will take steps before it is too late towards removing these difficulties.

It is surprising that while huge quantities of molasses are almost running to waste or are unsaleable, neither the Central Government nor the governments of U. P. & Bihar have done anything substantial to facilitate the conversion of this into much needed commodity, power alcohol. It is really a tragedy that the U. P. Government are making money, to which in fairness they are not entitled, out of manufacture and sale of power alcohol made in a small factory in U.P.

The tent business is on a downward scale.

Due to very heavy consumption in their own factories of hydrochloric and sulphuric acids and their steadily increasing prices in the market, the directors decided to put up a factory of their own which, they hope, will be ready in a short time and will help them in getting acids of uniform quality at a very much lower cost than what they have been buying at.

They are also making efforts to produce various chemicals, including many required in the Mills.

During the year, at the instance of the Government, the directors started a garment factory, in which they tailor cloth given to them by the Government. They are seriously considering the question of closing the factory, which has so far resulted in a loss.

Agents:—Messrs. Shankar Lall Bharat Ram & Co.

Authorised Capital—Rs. 1,50,00,000 in 5,15,000 Ordy. of Rs. 25; 50,000 Ordy. of Rs. 2½ and 80,000 4½% Cum. Pref. of Rs. 25. ISSUED WEEKLY

SECRETARIAT LI... 8 NOV 19... GOVERNMENT

Vol. XXVIII. No. 19 SATURDAY, NOVEMBER 8, 1941 Price Re. 1

Insure and Increase Nation's Strength

Financial Independence of the individual is the measure of Nation's financial strength.

In this hour of world turmoil, all Life Insurance Policy-holders should take stock of their insurance cover and ascertain just how strongly they are fortified against the unpredictable that lies ahead.

And, those individuals who have not yet made provision for their protection need do so without delay and thereby contribute towards Nation's strength.

Be advised and write to-day to

WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

Short credits go abegging and none so poor as to touch them. The nominal rates for interbank call money continue to be ¼ per cent in Bombay and ½ per cent in Calcutta. It is evident that considerable disbursements have been made by the Government in respect of war requirements; and these have more than offset the rather large drain of funds into Treasury Bills. On the weekly Treasury Bill tender day, the amount on offer was Rs. 2 crores; and applications were nearly Rs. 4 crores. The average discount rate was annas 10 and pies 11 per cent, which compares with annas 10 and pies 3 last week. The rise of 8 pies in the average rate of accepted tenders must not be considered insignificant as, between October 13 and November 3, tap bills sold came to as much as Rs. 2,11½ lakhs. It has also to be added that, on 21st October, the Bengal Government took off Rs. 1¼ crores from the market through their three months bills. Applications received in respect of Bengal bills amounted to Rs. 1,67½ lakhs. The average rate of accepted tenders was annas 12 and pies 5 per cent per annum, which compared with annas 10 and pies 11 on the Central Treasury bills. The payment for last week's tender bills was made on 31st October. Thus, between 30th October, and 3rd November, total sales of Treasury Bills, Central and Provincial, tender and tap, came to Rs. 5.37 crores. While the market was thus denuded of nearly Rs. 5½ crores against the Treasury Bills it took up, the inflow through Treasury Bills maturities during this period was only Rs. 1 crore. On balance, the market was a loser of nearly Rs. 4½ crores in respect of Treasury Bill transactions. In spite of such heavy outgo, the cash balances of the scheduled banks with the Reserve Bank have shown a considerable rise; the Treasury Bill rate has not shown any worthwhile increase; and conditions in the short loan market are not in the least affected. The likely explanation for this development is that heavy disbursements should have been made by the Government in connection with war orders.

The statement of the Reserve Bank for the banking department for the week ended 21st October provides confirmation for this theory. On the assets side, foreign balances have shot up by nearly Rs. 15 crores from Rs. 60.54 crores to Rs. 75.41 crores. It is reasonable to infer that the sterling payments received from the British Government during the last week of October must have been of the order of Rs. 15 crores. The deposits of the Central Government with the Reserve Bank also reflect the effect of these sterling payments. Cash maintained by the Government of India with the Central Banking institution has risen by nearly Rs. 12 crores from Rs. 10.65 crores to Rs. 22.47 crores. There is thus a difference of Rs 3 crores to be accounted for. In addition, the excess of Treasury Bill sales over Treasury Bill maturities has also to be accounted for. Taking both these factors into account, and the further fact that sales of 3 per cent 1963-65 loan through the tap are reported to be very satisfactory, the conclusion is obvious that, in the last week of October, the central government should have paid out between Rs. 5 crores and Rs. 7 crores against war supplies. This may be the explanation for the sudden spurt of Rs. 6 crores in the deposits of scheduled banks from Rs. 44.83 crores to Rs. 50.81 crores. Burma Government's deposits are also higher by Rs. 3.01 crores comparing with Rs. 2.28 crores on 24th October. As a result of these changes, notes held in the banking department of the Reserve Bank have risen from Rs. 10.25 crores to Rs. 13.94 crores. Due to the increase in notes held in the banking department, active note circulation in India records a setback from Rs. 277.01 crores to Rs. 274.09 crores. On the assets side, the only change of importance is the substantial addition to rupee coins held in the issue department, the increase being from Rs. 37.90 crores to Rs. 38.84 crores.

It will be recalled that the September payments of the British Government to the Indian Government were received in two instalments and were disclosed in two consecutive returns of the Reserve Bank. While the sterling payment of Rs. 15 crores is recorded in the bank returns of 31st October, it is quite likely that the statements of the Reserve Bank for the first week of November will reveal further sterling receipts. Should this prove to be the case, Central Government's balances with the Reserve Bank must stand at such a high level that the Finance Member might decide on utilising a moiety for the withdrawal of dated stocks from the Government of India securities held in the issue department. This question is discussed at some length in the editorial section; and the point to emphasise in this context is that, thanks to the satisfactory progress of the defence loan and substantial sales of the tap loans, the Government of India have had a most comfortable ways and means position in spite of the increased military expenditure and in spite of the heavy obligations which they have been discharging as agents of the British Government with respect to the conduct of war and other war commitments. The position must progressively improve in the course of November as Treasury Bill maturities are only Rs. 4 crores while the weekly offer continues on the basis of Rs. 2 crores and intermediate Treasury Bills continue to be available on tap.

The Government may have a definite purpose in thus strengthening their cash position. This may be in preparation for the obligations in India that will arise on the announcement of the decision to redeem 3½ per cent India sterling stock There is also the likelihood of the 2½ per cent India sterling stock being tackled at the same time. The 2½ per cent loan is for a total of 11 million sterling. This is held by some departments of the British Government; and the redemption of this loan will be a simple and straightforward transaction. If the Government decide on redeeming the 2½ per cent loan as well as the 3½ per cent loan, the total amount that will thus be involved in these two transactions will be nearly 90 million sterling. It is quite possible that the redemption of sterling debt is now due any moment and may be announced in the immediate future. If so, the comfortable cash position and the availability of a large sized ways and means advance would prove of great value.

The return of the Imperial Bank of India for the week ended 31st October, established a new record for deposits at Rs. 108.91 crores. In the course of Octo-

ber, the increase in deposits is over Rs. 3 crores.

The exchange market has been steady with more business passing in dollar bills than sterling bills. Remittance enquiry has been on the fair side.

Banks were sellers of T.T. on London Ready up to six months forward at 1s. 5 31-32d., and banks were buyers of T.T. on London Ready up to six months forward at 1s. 6 1-32d.

D. A. sight bills quoted 1s. 6 9-32d., for three and four months.

Interbank call money still continues unchanged at ½ per cent.

Firms' money for call and short is ¼ per cent and ½ per cent from one to four months deposits.

ANNOUNCEMENT

INDIAN BANK LTD.

Head Office: **MADRAS**

Authorised Capital	**Rs.**	**60,00,000**
Issued & Subscribed Capital	**Rs.**	**47,92,800**
Called and Paid-up Capital	**Rs.**	**12,79,280**
Reserve Fund	**Rs.**	**16,00,000**
Deposits as on 30th June 1941	**Rs.**	**6,60,26,357**

THE INDIAN BANK, LIMITED, begs to announce that it is starting its Branch in **CALCUTTA at No. 8, LYONS RANGE** and that the Branch will begin to function from 10th November, 1941. From that date, the services which the Bank can render with its net-work of Branches throughout South India, a Branch in Bombay, and Branches overseas in Colombo, Rangoon, Singapore and Ipoh, will be made available to the public through its Calcutta Office and the Bank requests the citizens and the commercial public of Calcutta to give the Branch their support and encouragement.

N. GOPALA IYER
Secretary.

Finance Abroad

Thursday Morning.

Without any alteration in rates, the foreign exchanges are evidently steadier than usual. There may be cnanges in the rate for sterling in the Shanghai free market, but we must remain ignorant of such developments unless to be deduced that the advice given to British citizens, particularly women, to leave Shanghai has led to the cessation of what may be termed extra-legal activities. The absence of any change in either sterling or dollar rates for the rupee makes it difficult to make any statement concerning the influence of war developments on the financial centres. There is, however, the abrupt rise in bullion to warrant the belief that the war has the usual and determinate effect on the hoarders. Bombay has reported a sharp rise in both gold and silver and the rate for gold sovereigns has improved to Rs. 29. and was two annas higher in Calcutta. The heavy turnover —20,000 tolas and 1.500 sovereigns in a day's dealings—testifies to an atatack of nerves that will seem surprising but is not unknown in Bombay where the ebb of confidence is clearly demonstrated by the rush for gold. By comparison with the sudden demand for gold. how well above the export parity, there is little that seems worth chronicling.

A fall in bullion held by the Bank of England towards the end of October, like the further rise in Britain's note circulation to a new record of 693.3 million dollars will be interpreted as a sign of inflation, and some may choose to view the rise in Bank's deposits with the Bank of England as the mark of excessive deposits occasioned by orgiastic spending. On the other hand, the maintenance of the Proporation at over 20 per cent by the end of October may be taken as a sign of strength and the till money at 36.9 million pounds was large enough in relation to the total circulation. The essential healthiness of conditions in London can only be inferred from the increase in savings reported in October. If the signs point to there being too much money about, there is the fact that the consumer can put a little more into edible things. It is known that Britain's reserves of rationed commodities have increased and there is no need to go slow on sugar and fats this winter. Lord Woolton's confident assertion has been supported by a detailed analysis of the increase in reserves possible through American supplies.

The fact that the Ministry of Food has developed greater interest in Indian oilseeds may be cited to show that rations will not be short. More impressive evidence has been provided to show that if war expenditure has risen to 13 million dollars per diem in October the Exchequer returns showed that revenue was coming in. The first week's sales of 2½ per cent. Defence Bonds totalling over 34 million dollars are decidedly encouraging from the Treasury's point of view. More encouraging from the point of view of the market is the amount of money that is coming to the London stock exchange. The rise in Home Industrials during the autumn is better than expected. Compared with the heaviness of the Foreign bond market where Japanese bonds keep slumping leading Industrials have been bright. New York, too, has developed a more hopeful attitude and this helps London in the sense that the financial front gets stronger. The rise in Indian stocks based on the assumption that more repatriation is on the tapis has put a glow into the giltedged market and more hopeful from the point of view of British funds is the news that in a single week in October over pound 11 millions came from the rank and file of savers. This fact has been referred to in order to show that if the note circulation responds to the rise in incomes particularly wages and salaries there is the will and ability to keep on saving. The figures clearly indicate how in the third year of war after the huge rise in the debt, the investor is prepared to put his money out for the nation's business of fighting the Nazi because that business will pay better than any other. The initial response to the 2½ per cent. issue must be deemed very good. It may be urged that the quotation for old censors is a little low compared with the issue terms of the new bonds but there is the fact that War Loan at 105 seems cheaper to many investors.

The Control has held the European currencies for over a year and the Far Eastern currencies alone have changed in value between then and now while the free sterling problem was settled satisfacorily not long after it appeared. The Hongkong dollar is unchanged at last week's level at 1s. 3 1-32d. The rupee price of the Hongkong dollar is therefore unchanged, and the prospect, more fancied than real it must be said, of devaluation (recommended in the case by the Chinese for certain reasons of their own) has not affected its value. There is hardly any need to mark down its value, for the Hongkong dollar has long been the strongest of the Empire currencies, and its value was left untouched when sterling depreciated. The Colonial currency enjoys a large backing, and if its value were altered to help the Chinese who are still prone to fly into the Hongkong dollar, the change might be prejudicial to the foreign trade on which the Colony thrives.

LLOYDS BANK
LIMITED
(Incorporated in England.)

1677

Strength

Lloyds Bank has attained to the position of being one of the largest and strongest banking institutions in the world by its reputation for efficiency, thoroughness and financial stability.

The fame conferred on Mr. Noel Coward by his conviction under the Defence Finance Regulations is similar to that conferred on Mr. George Arliss already. Ignorance, advanced in this case by defence counsel, did not save Mr. Coward who was saked to pay 200 pounds as fine and 200 pounds in costs. The prompt punishment of the celebrity who has done valuable work abroad against Hitler shows that the prosecutions undertaken in India, particularly, for taking out of gold are inspired by the same desire to preserve the right kind of wealth for the national effort.

Mr. Fadden's budget has been amended by his successors. The new Federal Treasurer has raised the estimate of war expenditure and the Labour party in spite of withering criticism, has got its proposals through. Though it is known that the present war has taken more by way of men and money than the last, the desire for a cent per cent war effort is there and Mr. Jack Curtin gave an assurance that the change of Government implies no change in war and Imperial policy, towards which were reiterated by Sir Earle Page subsequently in London. The example of Australia has been adopted by British Malaya which has gone in for a higher income-tax and clapped a 12 per cent tax on company profits. For this colony depended on customs revenue particularly export duties on tin and rubber. That the authorities and the people are prepared to shoulder new burdens is demonstrated by Britain's friendship with the countries menaced by Japan. The voluntary loan made by the colony is of a piece with the gift made by Malaya's semi-independent princes. The Governor of the Straits Settlements was the channel of the last contribution. The importance of the gift is underlined by statements that Malaya is ready to meet aggression from any quarter.

From the estimates made of Russia's ability to fight on after the possible loss of Moscow and Rostov, one may conclude that the industrial wealth of the Urals and Siberia must be considerable. In fact, Siberia is potentially the better source of supplies, and the enormous size and varied mineral resources afford a guarantee of adequate defence production. Gold is not the only precious metal since platinus osmiridium and radium are met with in Siberia. It is only in the far West that there is the conjunction of coal and iron but elsewhere ample deposits of magnesite are known to occur. Mica is one of the rarer minerals reported from Siberia which has few industries and a scanty population but the country can be developed rapidly. There is agriculture and livestock in sufficiency and barley and leather have been long among the exports from Omsk. But there is no engineering industry as in the Urals. And this may prove a handicap.

3½% Sterling Paper: & Rupee Loans

In our discussion, on October 18, of the imminence of the redemption of 3½ percent sterling paper, we pointed out that the corollary to this was the replacement of the redeemed sterling loan by rupee debt; and, at the same time, we promised that the manner, timing and plans of such rupee loans would be discussed in a subsequent issue. For reasons beyond our control, this consideration has been delayed. Meantime, as forecast in our first article, the sterling payment received at the end of October by the Indan Government from the British Treasury (amounting to over Rs. 15 crores) has had the effect of bringing the total of sterling securities in the banking and issue departments of the Reserve Bank to a figure which is Rs. 8 crores in excess of the position before payment was made to holders of dated sterling stocks in the latter half of March. This means that, if, on October 18, we were driven to the conclusion that the hands of the Government would be forced, to undertake the redemption of 3½ percent India sterling stock, still greater is the urge the Finance Member must feel to-day to tackle this question as early as possible.

Before we examine the proposals for the new loans to be issued in the future, it will be helpful, for a better understanding of the question, if we deal, in brief,with the ways in which rupee finance was provided for in the earlier instances of sterling debt redemption. Sterling debt redemption falls under two heads: In the first place, the Indian authorities were buying India sterling securities in the open market in London and, cancelling them, were selling rupee counterparts in the Indian market through the tap. In broad terms, it may be said that the total of sterling loans thus redeemed was 24 million sterling and the rupee counterparts created amounted to Rs. 32 crores.

The second stage of sterling debt redemption is connected with the scheme announced last February by which, through the good offices of the British Government, what may be described as compulsory repayment of the debt sterling loans was put into effect. The total amount of sterling loans involved in this operation was 90 million sterling of which, however, 12¾ million sterling still remains unredeemed, representing, presumably, holders who are not affected by defence rules issued in England or India. The sterling securities redeemed in pursuance of the compulsory redemption scheme were thus of the order of 77¼ million sterling. This represents Rs. 103 crores as the amount involved at the Indian end of the transactions.

In the first instance, the position in India was adjusted as to half by issue of rupee counterparts and as to the other half by cutting into the cash balances of the Central Government and securing a ways and means advance for Rs. 16 crores from the central banking institution. The ways and means advance was liquidated in due course; and the depleted cash balance of the Treasury was likewise reimbursed. This has been possible because of the satisfactory sales of the second defence loan which has been kept available on tap.

A subsequent operation in this regard was the scheme to convert the rupee counterparts into either 3 percent 1951-54 loan or 3 percent 1963-65 loan. As a result of this conversion, which mostly affected the holdings of the Reserve Bank and of the Government, the Government were left with the larger proportion of one or the other of these 3 per cent loans. We understand that the 3 percent 1963-65 loan in particular, and the 3 percent 1951-54 loan, both of which were being sold by the Reserve Bank from time to time according as conditions are favourable in the giltedged market, have been in good demand in recent weeks; and that the realisations from these sales have been quite considerable. What with the favourable progress of the second defence loan and the satisfactory sales of the converted loans, the cash position of the Government has shown such improvement as to make possible the reduction of the Government of India securities in the issue department of the Reserve Bank.

On the eve of the transactions connected with the redemption of the dated India sterling loans, that is to say, on March 21, Government of India rupee securities stood at Rs. 49.62 crores in the issue department. With the substitution of rupee counterparts for sterling securities, Government of India securities held in the issue department rose to Rs. 91.32 crores by April 18. Since then, however, whenever the swelling cash balances of the Central Government allowed it, there have been withdrawals of rupee securities from the issue department. The latest figure, as on October 31, for rupee securities in the issue department is Rs. 68.46 crores. In other words, the Government have been able to take back from the Reserve Bank Rs. 23 crores out of the Rs. 42 crores of rupee loans which the Government created and handed over to the Bank in connection with the consequential operations that arose in India as a result of the sterling debt redemption in March.

There are reasons to think that, in the course of a month, it may not be difficult for the Government to take back further rupee securities from the Reserve Bank and restore the total of Government of India rupee securities held in the issue department to the level that prevailed in March. One of the important reasons which we have in mind in this respect is the satisfactory sale of the second defence loan which we expect during the Savings Week proposed to be celebrated in Calcutta at the end of November. It is reported that the promises already received for subscriptions to the defence loan are substantial, and, if the leading men who are connected with the successful functioning of the Week go about their business on right lines, it should be possible to announce a total of Rs. 20 crores as the accomplishment of the Savings Week in Calcutta. There is, besides, the normal progress being achieved in regard to the sale of the defence loan. By the middle of December, then, it is quite on the cards that the full implications of the obligations arising in India from the March redemption of sterling loans would have been finally solved and settled.

In simple terms, the Finance Member should be able to tackle, in December, the conversion of 3½ percent India sterling stock with the sterling resources at a higher level than on the last occasion, and with as many avenues open to him to arrange for rupee finance.

This is a very important point which needs to be stressed. The total amount of 3½ percent sterling stock is 78¾ million. It is known that quite a fair proportion of 3½ percent is held by investment institutions in India. And it may be assumed that the Indian holders would elect to accept 3½ percent India rupee paper in exchange. It follows that the amount of 3½ percent sterling paper, for which rupee finance will have to be arranged, will be between 65 million sterling and 70 million or approximately Rs. 90 crores. Thus, both from the point of view of sterling required and rupee finance to be provided, the redemption of 3½ percent sterling stock is comparatively a simpler problem.

As for rupee finance, the problem set for us is that Rs. 90 crores has to be found. As on the former occasion, anything like Rs. 35 crores can be secured by recourse to ways and means advance and by drawing on cash balances. The balance should be provided, in the first instance, by the issue of 'ad hoc' Treasury Bills to the Reserve Bank. This will mean a withdrawal of sterling securities from the issue department and a corresponding addition of 'ad hoc' Treasury Bills.

The next stage is the gradual liquidation of these 'ad hoc' Treasury Bills from the proceeds of loans or Treasury Bills issued to the public.

We wish to deal with Treasury Bills first. Our complaint is that nothing so far has been done by the Government or by the Reserve Bank to create a Treasury Bill market in India; and our contention is that the present time is most opportune for the creation of such a market. If the Treasury Bill market in India could be looked upon not as an avenue for short investments by banks, but as the provider of what is essentially a money market instrument, the capacity of the Indian market for Treasury Bills may be increased fourfold. Analysing the position with regard to Treasury Bill outstandings over a number of years, it may be said that the floating debt in the hands of the public has been on an average Rs. 30 crores at any one time. That is, the capacity of the Indian market for Treasury Bills is of the order of Rs. 30 crores. We maintain that it should be possible to increase the capacity of this market to Rs. 100 crores. It is urgent and imperative to initiate an enquiry as to how the Treasury Bill market in India is to be widened, strengthened and made more lively.

Active note circulation in India has risen, since the war began, from Rs. 172.37 crores on September 1, 1939, to Rs. 274.09 crores on October 31, 1941. Active note circulation has thus risen by well over Rs. 100 crores in these two years. Rupee coin in the hands of the public has also increased considerably. Rupee coin held in the issue department on September 1, 1939 was Rs. 75.87 crores. The latest figure is Rs. 38.84 crores. The outflow of coin from Currency into the hands of the public is thus Rs. 36 crores. We have to add to this the one rupee notes which the Government handed over to the Reserve Bank at the time of the panic for coins. We believe that rupee notes for Rs. 12 crores were thus delivered to the Reserve Bank. Circulation of one rupee coins and one rupee notes has thus risen by nearly Rs. 50 crores. Taking paper notes and silver notes, circulation in India has risen by Rs. 150 crores since the war began.

Deposits of scheduled banks have also shown considerable expansion. Demand liabilities, which stood at Rs. 141.40 crores on September 1, 1939, are now Rs. 225.84 crores. There is thus an increase of nearly Rs. 85 crores. Time liabilities show a small increase of Rs. 2 crores.

In other words, active note circulation has gone up enormously; and deposits of banks have risen in a striking manner. Yet, the capacity of the Indian market for Treasury Bills has stood at the same level. It stands to reason that, with money in bigger circulation and with deposits piling up with banks, the conditions are most favourable for the tackling of the problem for the creation of a Treasury Bill market.

Equally favourable conditions may be said to prevail with respect to the creation of a general bill market. The Government are now buying anything like Rs. 20 crores of supplies per month from the markets in respect of war requirements. Between the time of supply and the time of payment, intervals of varying lengths are bound to occur. Banks are now doing considerable business in the financing of dealers and contractors supplying the Government. If this matter be suitably dealt with, there will be readily available first-class trade bills for an aggregate of Rs. 20 crores to Rs. 30 crores at any one time. Such a favourable opportunity for the creation of a market for trade bills had never occurred before, and this opportunity should not be missed.

Our first suggestion is, therefore, that, without any delay, an investigation should be made and suitable steps should be taken for so expanding and strengthening the Indian Treasury Bill market as to make it possible for the Government to increase their short-term borrowing from the present average level of Rs. 30 crores to Rs. 100 crores.

If this suggestion is acted upon, most of the finance required in India in connection with the redemption of 3½ percent sterling stock, will have been provided for. We have no doubt in our mind that a Treasury Bill market in India is definitely practical politics in the conditions prevalent today; and that, once such a marekt is brought into being, the conversion of sterling stock into rupee debt will have been achieved on the most scientific basis and on the most economical arrangement. Where we are now paying 3½ percent on our sterling debt, the rupee debt incurred thereagainst, which would be in the form of Treasury Bills, would be costing only one percent. A saving of 2½ percent means the lightening of the interest burden by over Rs. 2 crores per year.

In any case, the second defence loan should be withdrawn by the middle of December at the latest. Just as the first defence loan is now quoting at a premium of nearly Rs. 2, so would the second defence loan be commanding a good premium after its withdrawal. There are two reasons why we suggest that the second defence loan should be closed. The first is that it is not desirable to borrow unwieldy amounts through one single type of loan, as it will be, indeed, a hard day of reckoning when its eventual redemption has to be taken up by a future Finance Minister. The second, and by far the more important, reason is that we are firmly persuaded that, so far as India is concerned, this war is definitely a 2½ percent war. With all the credit that India enjoyed at the beginning of the war, and which she has further strengthened and improved by the various loan operations since then, this country has reached a stage when to pay more than 2½ percent for Goverment loans

is wanton infliction of loss on the taxpayer. We suggest the list of the second defence loan remaining open till the middle of December as promises have been given by important business houses and banks in Calcutta to take substantial slices of this loan during the Savings Week. The time for withdrawing the second defence loan is the closing of the Savings Week in Calcutta.

We should also suggest the stoppage of the sales of 3 percent 1951-54 and 1963-65 loans through the tap. The Government are unnecessarily giving unduly favourable terms to the buyers of these securities.

After the withdrawal of the second defence loan, and the cessation of the sales of the 3 percent loans on tap, we would suggest the institution of the three types of defence loans, namely, a 2 percent five-eight year loan; a 2½ percent eight-fifteen year loan; and a 3 percent sixteen—twenty-five year loan. Giving three types of loans planned on these lines means catering to varied preferences and tastes. Above all, this will be the final and conclusive vindication of our case that, for India, this is a 2½ percent war. We have never wavered in this faith and we have every confidence that events more than even the policy of the Government would justify our faith.

THE DISTINGUISHED SERVICE ORDER, dating from 1886, consists of a gold cross enamelled in white and edged with gold, suspended round the neck by a blue-edged red ribbon. It can be won by officers of the Royal Navy, the Army, the Royal Marines, and the Royal Air Force, who have received special mention in despatches for "distinguished services under fire, or under conditions equivalent to service in actual combat."

Editorial Notes

Trade in September

A very considerable increase in the value of exports stands out as the main feature of the trade returns of British India for September. The increase of imports as compared with August and Sepember, 1940 is presumably due to the price factor. In view of the large increase in re-exports during September little attention need be paid to the increase of Rs. 1.46 crores in the value of imports. It is certainly a mark of the trade recovery in progress that as against retained imports valued Rs. 13.54 crores there were merchandise exports valued Rs. 22.72 crores. The big increase in exports during the second quarter of 1941-42 may be connected with Middle Eastern developments, but part of it must be due to the improvement in commodity prices. The summary totals for the first half of the present year will engender a measure of optimism as to the course of India's foreign trade. Exports are higher by over Rs. 7 crores as compared with the first half of 1940-41. The improvement is more marked if a comparison is made with the first half of 1939-40. The parallel movement in the case of imports suggests that the price factor determines such increase as has been noticed up till now and also that the import control practised as from June 1940 has not affected the value of total imports. The total value of imports from April to September 1941 is as much as Rs. 100.76 crores against a total of Rs. 79.35 crores indicating that in regard to certain classes of imports there has been modification and relaxation of import control.

The increase in imports of raw materials during September occurred alongside of a very moderate rise in imports of foodstuffs. The principal factor was the rise in raw cotton imports. The only other noteworthy change is the rise in imports of oils, mineral, vegetable and animal. The rise under oils and rubber is readily accounted for but the rise under vehicles which show a strong increase as compared with September 1940 will take some explaining. Reference may be made here to the sharp fall in imports of cotton yarn and piecegoods. The decrease in September does not imply that imports in the first half of the year fell away suddenly. In point of fact there is an increase under the value of grey and bleached goods as compared with the first half of 1940 but the higher average price per unit indicates that there was no increase in yardage. The shortage of cloth reflected in higher prices over the country is readily explained. It is the rise in prices that accounts for a rise of Rs. 98 lakhs under imports of manufactures as compared with September 1940. The greater part of the increase is due to imports of vehicles and drugs, chemicals metals etc. as also silk, wool and other goods. Exports of jute and jute manufactures showed up well in September. Here again the price factor is operative. More significant is the testimony available as regards the expansion of India's export trade in manufactures. As compared with September 1940 when the total was Rs. 6.73 crores, the total for September is over Rs. 10.17 crores. The movement is due to the consistent increase under hides and skins tanned or dressed as also leather and cotton yarns and manufactures. The increase under exports of raw materials in September shown at Rs. 2.2 crores is hardly as impressive.

Helping Iran

The opening up of Iran has not been completed by the acceptance of Anglo-Soviet terms by the Shah and his new Cabinet. The danger to the Caucasus requires the extension of Iran's railway system and the making of transit from the Gulf to the Caspian both rapid and safe. There is also the need to secure adequate facility of communication from Iraq and Turkey through Iran. It may be recalled that one of the columns marching on Southern Iran entered by way of Iraq. To extend and improve internal communications is the object of British railway engineers who reached Iran before the Moscow talks were over. Turkey has a close interest, for like Iran she is dependent on Basra as a port and looks to the Gulf for supplies from the Allies. If the war reaches the Caucasus, Turkey may become the prisoner of the Levant and improvements to Alexandretta will help little when the Black Sea is dominated by a hostile Power. There is also the urgent need of the Allies to rush up supplies to Russia. The winter will probably prevent the use of any route other than that through Iran. Iran's single-track railway is manifestly not equal to the job of transporting imported supplies. Turkey is having a through service to Baghdad by way of Syria but this is not wholly safe when the Italians hold the Dodecanese and Germans are in the Cyclades. A line towards the interior connecting with an existing branch west of Mosul is contemplated. The journey from Basra to Ankara would be shortened if the line passes not by way of Aleppo but from Mardin. There is even more urgent need for Iran to get connected with the Russian railway system. If Tabriz in the north is connected with Teheran the link would be provided because there is already communication between the Caucasus and Iranian Azerbaijan. The opening of a line from Teheran to Kazvin in the north-west last year put Iran in touch with the outposts of Russia. There is, however, greater need to establish railway communication with Turkey and help Turkey to link Anatolia to the Caucasus in another way.

The position in the Middle East is full of disturbing possibilities after the German break-through to Crimea. Whether the Nazi stops with Rostov or not there is clearly a need to rush supplies to Russia through the Middle East and the railways of Iran, Iraq and Turkey must be fused into one for the purpose of pushing Allied supplies onward. Whether there will be a new line between Baluchistan and Iran enabling India to send supplies beyond the Caspian is not known. The N.W.R. extension stops short of the frontier and it is the gap between the Duzdap extension and the Merv-Krasnovodsk line that requires attention. Existing road facilities are regarded as unsatisfactory and it is also realised that to put a new adequate road from Baluchistan to Meshed which can be taken as a *point d'apphi* for both Iran and Russia, will take many months. Improvement appears likely in view of the news that America is interested in the subject of communications between Iran and India.

NORTH WESTERN RAILWAY

Tender No. 212-S|6 Code word "ASIDE". Tenders are invited on a rupee basis for purchase by the North Western Railway of wick holder Bartons No. 1. Tenders must reach office of the General Manager, N. W. Railway, Lahore not later than 14.00 hours on Wednesday the 17th December, 1941, and will be opened in office of the Controller of Stores, N. W. Railway, Lahore, at 11.00 A.M. on the following working day. Tender forms and other relative documents can be seen at and obtained from office of the Controller of Stores on and from 4th November, 1941. The sale price of the tender is Re. 1 local and Re. 1-8 Muffasil.

The Railways' Appeal

Various statements obviously inspired by a desire to communicate expert knowledge have appeared in connection with the appeal to keep wagons moving. After Mr. Cuffe's elaborate review of the Indian Railways' work in wartime little can be said about the strain on carrying capacity. The strain is certainly there; and the reasons are many. The precise methods of dealing with it have to be settled by the railway administrations. As the N.W. and G.I.P. railways handle the bulk of wartime traffic, it is those railways that are mainly identified with the new plea for fully economical use of wagons. How the quicker turn-round of wagons can be secured has already been investigated on behalf of the railways by a small expert committee in 1940 but in implementing its recommendations, the co-operation of traders and railway users is essential. The seasonal wagon shortage is one of the marks of the cold weather, and the railways have prepared against it by launching their appeal. It has been pointed out that commerce and industry benefit by more effectual and quicker use of wagons. The payment of demurrage is by no means an advantage to the railways because some other customer loses the benefit of the railways' service, particularly, when it is acutely needed. Part of the difficulty arises from the curtailment of coastal shipping and the very limited scope for river transport. The diversion of cement and coal traffic to the railways has been referred to by Mr. Cuffe who has shown how the war affects railways in throwing new burdens. The burdens are likely to increase in number and weight as the war nears India, and the explanations given by railway officers at conferences to members of the business community in the last month or two acquire added importance in view of the need to man and guard the outer frontiers of India.

That quicker handling of wagons will also enable the railways to save money for their customers by speedier deliveries and more rapid turnover of working capital has been stressed in this connection. What is more important is that, the railways perform a national service by sending the food and equipment required for Indian troops overseas; and it is up to every trader to second their effort. If the railways gain through the war in the matter of additional revenue part of the increase is absorbed by higher working expenses. Until August the wagon-loading figures, reflected in internal trade figures also, hardly kept step with the growth of railway revenue receipts and the new stimulus to make the most of wagon capacity came after the demands made on the railways in connection with Allied intervention in Iran. The shrinkage of foreign trade has not lessened the need for effective use of transport. Public opinion has not been slow in recognising the validity of the arguments produced to support the "keep wagons moving" appeal. The shortage of power and rolling stock including wagons added force to the appeal. Renewals and replacements are rendered difficult by the war, while there is also the need to save both money and material for the war effort. It is, therefore, a very cogent appeal that has come from the railways, which as an asset of the nation, are entitled to support from every quarter.

Germany Takes the Strain

The Swedish press has often proved a source of information concerning German problems and achievements in wartime. An estimate of Professor Gustav Cassel of the difficulties against which Germany is contending at present acquires special importance on account of Professor Cassel's own reputation and his use of the data provided by the Deutsche Bank. The national income in Germany has risen and both employment and wages have responded to wartime stimuli. Longer hours and more woman-power are common features of factories in wartime. The State, too, has made the most of its opportunities for sharing the increase in incomes. The tax on wages is said to have yielded 12.5 percent more in 1940-41 than in the preceding year after allowing for the change in rates. Income-tax yielded 73 percent more in the second quarter of 1941 than during the corresponding period of 1939. Though the real increase is only 50 per cent, it shows how much of current revenue goes into the war effort. The restrictions on consumption make taxation possible and also leave an ample margin of savings. It is known that official savings funds held deposits of 33 billion marks at the end of 1940 as against 22 billions eighteen months before. This means that the small savers had made up their contribution to national capital by 50 percent while commercial banks have reported a sharp rise in deposits. These features suggest that what has happened in Britain has been reproduced to scale in Germany where State control has been more familiar and more pervasive. The national debt had risen by 40.2 billions to stand at 89.7 billion reichsmarks in April 1940. The increase in debt was divided bewteen the funded and the floating debt but Treasury Bills for longer terms than usual were not apparently a cheap form of borrowing.

The addition to debt is considerably in excess of the total revenue for 1940-41 returned as 27.2 billion marks besides the indemnities and contributions forthcoming from Occupied Countries. The enormous

Space given by the Imperial Bank of India.

additions to debt caused no great strain, for the limitation of dividends and the control of new issues left the field open for the State which kept down the cost of borrowing to around 3½ percent as against the average of five percent in the case of Italy. There has been, however, a change since April as the eight years of Nazi rule had left many scars but heal slowly. It is known that Germany is forced to take back workers out of the Army and appeals for Italy's assistance by way of men replacing casualties have appeared after August. The R.A.F. attacks demand restoration and repairs. But Germany has been compelled to curtail all building and only temporary constructions can be put in place of durable buildings. The scarcity of material at the time when currency and credit are unduly large, shows that Germany is again on the brink of an inflation crisis. Even with the help of foreign industrial conscripts, the Germans have encountered difficulties and control of the foreign trade and assets of the Occupied Countries has not provided a solution for the shortages of raw materials.

The picture provided by Professor Cassel has evidently left out the costs, human and material, of the four and half months of war against Russia. How much stocks must have been cut into, and how much damage has been caused to manpower, including the armed forces, can only be conjectured. The perennial scarcity of goods has, however, produced the symptoms of inflation. The rise in note issue carries its own warning. Since there is no longer any possibility of getting goods out of subject nations the Germans are confronted with real scarcity. The prolongation of the war will accentuate it and the German Government may be driven to copy Helferiuch's methods of loans and more loans and paying interest out in fiat money. Professor Cassel argues that such an enormous effort as has been demanded of the German economy during the war cannot be endured in the long run. The continuation of the war will, in any case, expose the stability of the German currency to very serious strains. A conclusion which is more hopeful than expected for those who still argue that only internal revolution can produce the downfall of the Nazi regime.

Lease and Lend Explained

How the Lease and Lend Act will be actually applied remains to be seen but the procedure adopted in regard to imports of oil, tractors and aircraft to mention only a few of the items subject to Lease-Lend procedure suggests that the Indian Government is aware of the U.S. Government's intentions. But the ultimate responsibility is Washington's, as Sir Homi Mody emphasised during question time in the Assembly last week. The Supply Department's most imperative recommendations and endorsements on any indent cannot weigh against the local appraisal and India was in the same position as other privileged applicants according to the Supply Member who stated that America's own needs for any material must override the requests for assistance from the British Empire for munitions and articles essential for the war effort. The scope of lease and lend will in practice be restricted only by the U.S. Government's own views on the subject of pressing local requirements as regards oil, steel and machinery. The new word 'essentiality' was used as regards supplies from the U.S. under lease and lend rules. The U.S. can, however, be trusted to hold the scales even as between the Dominions and India. And now that Britain and Russia as also China are asking more vigorously for U.S. help, there is likely to be a steady shelving of requests from the Empire. That postponement or refusal is unavoidable is realised by all including the Supply Member who argued that the Lease and Lend Act being an act of Congress, its working must be left to the discretion of the U.S. executive. Another soft answer made clear the scope of the Eastern Group Council's work, what the Council is and how it works was described early this year by Mr. Hydari in a broadcast speech, but there has been a half-concealed fear that the Dominions are stealing a march on India through the co-operation or connivance of the Council. That the fear is ill-founded has been made clear by Sir Homi Mody who said that proposals for the establishment of new factories in India partly or wholly for the purposes of His Majesty's Government had been encouraged and supported by the Council which retained also the liberty to help in establishing new industries in India for specific purposes. That the new munitions factory programme is in full blast is widely known but how much of it is due to the British Chairman of the Eastern Group Council is hardly known. Sir Homi Mody's answer suggests that the Roger mission's report rather than the representations of individual countries guides the Council's activities which is as much as can be hoped for.

Suppressing Avoidance

The two revenue bills coming up for consideration this month by the Central legislature are not tax measures, but are rather designed to make clear and correct defects in the Income-tax Act of 1939 and the Excess Profits Tax Act of 1940. The

GOVERNMENT OF INDIA

RAILWAY DEPARTMENT

(Railway Board)

NOTICE

TENDER FOR THE SUPPLY OF COAL TO THE NORTH WESTERN, EASTERN BENGAL, GREAT INDIAN PENINSULA, EAST INDIAN, ASSAM BENGAL AND BOMBAY BARODA AND CENTRAL INDIA RAILWAYS AND TO THE BENGAL NAGPUR, BENGAL AND NORTH WESTERN, JODHPUR, MADRAS AND SOUTHERN MAHRATTA. ROHILKHUND AND KUMAYUN AND SOUTH INDIAN RAILWAYS DURING THE YEAR 1942-43.

Tenders are invited for the supply of the following quantities of coal for the above Railways during the period 1st April, 1942 to 31st March, 1943:—

	Tons.
1. Steam Coal, by Rail from Bengal, Bihar, Central Provinces, Central India, Orissa, Singareni and Assam Coalfields	52,14,000
2. Coke Breeze ..	5,100
3. Soft Coke for Workshop purposes ..	7,600
4. Hard Coke	4,700
5. Screened Rubble Coal (for Power House) ..	10,000
6. Slack Coal, size not exceeding 1|2 in. Cube	5,600
Slack Coal, size 1 in. to 1 3|4 in. ..	6,400
Slack Coal, size 1|16 in. to 1 in.	**28,000

**This quantity is ot be delivered during April and May, 1942 in equal quantities.

Forms of Tender, Specifications and Instructions to Tenderers may be obtained from the Office of the Chief Mining Engineer, Railway Board, No. 1, Council House Street, Calcutta, on payment of Re. 1|- for each set.

The successful Tenderers will be required to execute an Agreement (paying the Stamp Duty thereon) on a Form provided by the Company-Managed Railways, if so desired.

The Agent and General Managers of the Company-Managed Railways do not bind themselves to accept the lowest or any Tender or to assign any reason for non-acceptance of Tenders; they reserve the right to accept any Tender wholly or in part.

Tenders should be deposited in the Tender Box kept in the Office of the Chief Mining Engineer, Railway Board, before 11-00 a.m. (Bengal time) on Saturday the 15th November, 1941 and they will be opened at 11-15 a.m. in the presence of Tenderers on the same day.

J. R. HARRISON,

Chief Mining Engineer, Railway Board.

main amendments to the first Act have aim at the rectification of the position arising from the enactment of income-tax law in the Sates purporting to assess income obtained outside the State on the lines of the British Indian law. Relief was certainly demanded by the situation under which natives of Bikaner were called upon to pay tax on profits originating in British India. Relief and reciprocity are to be obtained by the proposed amendments. The proposed change will certainly be welcomed by the Indian Chamber of Commerce which was the first to draw attention to the inequity arising from the Bikaner income tax law. The amendment to the E. P. T. Act has as its object the grant of authority to the assessing officer to disallow expenses and charges and bring within the scope of taxation incomes that might otherwise escape. It has been strenuously argued that no assessing authority can be a judge of what is necessary or not in the interests of another business. It has been pointed out already in the press that if a taxing officer were to be invested with functions which more properly belong to an appellate authority there is no knowing who might be made liable. There is also another change proposed. The existing act prohibits or deems void all fictitious transactions conducted with a view to evade the excess profits tax and bring such assessees under the levy. There is clearly justification for the ban on bogus transactions but the addition to the section contemplated at present seeks to put an end to all transactions carried out with a view to escape tax. Judicial pronouncements have been quoted to support the view that avoidance of tax by legitimate means is no offence, and it has adlso been said that to deprive the assessee of normal means of defence against the rapacity of the revenue authorities is unfair. There is, however, something to be said for the view that the yield of the excess profits tax should be raised by attracting the greatest number of assessess. The measures adopted by Sir John Simon in 1938 against the avoidance of taxation can be referred to in order to show that the citizen has only duties in regard to the payment of taxes, old or new. The ingenuity of the rich or their legal advisers cannot be allowed to prevent the flow of revenue which is acutely needed and will be spent more to their advantage than of less fortunate citizens.

The U. S. A. Drifts

The landing of U.S. troops in Iceland and the establishment of a naval patrol in what are European waters has apparently been the limit of U.S. intervention in European affairs. But the consequences of such intervention are hardly to be left out of consideration, and the sinking of one more unit of the U.S. fleet has evidently produced an impression greater than the sinking of the *Kearney*. The U.S. Government has discovered that before the Neutrality Act of 1939 can be amended to provide for the arming of merchantmen and their entry into combat zones there will be a recurrence of unpleasant incidents at sea. How the U.S.A. will move is a matter for the Congress which has yet to approve the proposed amendments to the Neutrality Act, but has in the meantime conveyed its approval of the second appropriation under the Lease and Lend Act. The importance of taking prompt and proper action has been stressed by the President in interviews and conferences and the Secretary of State has denounced again as piracy the unprovoked attacks on U.S. shipping. It is to be hoped that the President's mention of the Nazi's plans for Latin America would drive the hardened isolationist out of his shell. Their late attempt to whip up opinion against the President is hardly reflected in the rather crabbed language of Senator Taft but their defeat is more than ever certain after the mobilisation of opinion against the strikes that threaten defence productions. The history of 1937 looks like repeating itself after the military protection ordered for an aircraft factory. That Mr. Lewis is again up against the Administration only means that he is not satisfied with Little Steel's acceptance of labour Unions as necessary evils. The importance of the labour trouble cannot be denied, for it is realised a year after the defence programme was introduced that production had gone off at half cock. In spite of all attempts to dramatise the draft and subsequent measures there is the unacceptable fact that the U.S. Government had not turned the country into the arsenal of democracy. One could understand that immediate aid to the Soviet Union would be limited by the small advance in U.S. defence production. It was clear from the fact that until the Moscow talks took place the U.S.A. was prepared to sell goods only against gold, and only after the Boston-Archangel route is opened up can there be a steady stream of supplies. The threatened strikes on both the Atlantic and Pacific seaboard will probably be dealt with under the emergency powers. The C.I.O. is not strong enough to win out as Murray, Hillman and other leaders are not with Mr. Lewis who cannot use the S.W.O.C. to bludgeon an entire movement.

Turkey Stands Out

It is difficult to look beyond the assurances and statements that Turkey has enough faith in the justice of the Allied cause to resist German pressure. The commercial agreement though it spoilt German hopes of early deliveries of chrome ore contained clauses that showed that Dr. Clodius had had his own way in many things. The commercial agreement certainly goes farther than the non-aggression pact of June because it ensures German commercial supremacy in and beyond the Balkans. The Republic day broadcast, if it has renewed hopes of Turkey's firm neutrality, has illustrated the peculiar danger to which Turkey lies exposed. If one hears little of troop concentrations in Bulgaria at present there is nothing to suggest that the new clients of the Axis are friendly to Turkey. If Ismet Ineunu remains convicted of the virtues of neutrality there are defeatists at home who think that the virtues of Prussian army schools make German influence innocuous. Elements in the Turkish Army still look to Germany for inspiration and the writings of a solitary deputy like M. Yaltchin may not always reflect the National Assembly's views. It has been recorded that in August the Turks allowed an armed Italian tanker to pass from the Black Sea through the Dardenelles. An unfavourable construction was put upon this action of the guardian of the Straits but explanations were also forthcoming. It is, however, open to observers to argue that Turkey's attitude towards Anglo-Soviet action in Iran was quite correct and the more spirited action taken in Syria previously was endorsed tacitly by Turkey. It may be also stated that as a signatory of the Saadabad pact of 1937, the Turkish Government stands behind the Middle Eastern bloc of which Egypt is a member. It may be added that Iran, Iraq and Egypt are more or less under British supervision and the Turkish Government, which should be aware of the Afghan Government's prompt expulsion of Axis nationals, would have been appraised of the fact that the foreign policy of the other Saadabad powers is also controlled. If the Muslim League resolution said nothing about Turkey's attitude on such developments as the eclipse of Iran's independence, there is little doubt that Turkey has not disapproved, and the reiteration of neutrality and the resolve to protect it at all costs as recently as Thursday last, puts an end to discussions concerning how Turkey would act if Russia for some reason or other becomes ineffective in and around the Black Sea.

New Work for Sugar Mills

The only news given out in connection with off-season work for sugar mills was as regards the manufacture of ambulance stretchers. There is, however, a possibility that the dehydration of potatoes would be taken by sugar mills. The Sugar Mills Association is known to have been approached since tests have been carried out in the drying of potatoes. It is established that 10 tons of green potatoes yield 1 ton of dry slices as the peel and moisture disappear. The cost of necessary equipment is said to be cheap and a forced draft tunnel is proved to be the most efficient. Washed and peeled potatoes have to be trimmed and washed over again before slicing. The processing of potatoes has been favoured on the ground that large orders can be obtained at present. The demonstration provided at Lyallpur has impressed many who urge that a chance to put up two tunnels, a multi-vane fan to drive hot air and a tray of netting needed. Dry potatoes should not be confused with fried chips for the finished dehydrated product is meant for cooking in boiling water and after one and a half hours should be like the freshly boiled potatoes.

Central American Fibre

Henequen is a fibre that is among the latest rivals of jute. El Salvador is the main source of the fibre which is exported in the form of bags and of other manufactures. Native handicrafts take a small quantity for cordage and other purposes but the four and a half million lbs. of fibre from El Salvador are mainly used for bagging coffee. A bag factory opened in 1932 and a law was passed in 1933 demanding that shipments of coffee should be made in henequen bags. The export trade in the fibre has suffered considerably through the war owing to the loss of Germany, the chief market. But Central American republics have manifested of late great interest in henequen bags and El Salvador promises to supply the entire needs of Costa Rica and other countries growing and shipping coffee. It is believed that total production of the bag factory will be stepped up from 1,200,000 bags to 3½ million bags within this year and the factory will incidentally leave little fibre for exports to the U.S.A. which though she has in recent years reduced her takings of henequen still remains the biggest market for this fibre. The Central American fibre does not seem, however, a potential danger like the jute grown in Brazil.

Sir Ramaswami Mudaliar has, I would say, made history by his appointment of economists to advise the Inter-departmental committee on post-war economic reconstruction. I know it has attracted little attention and evoked even less enthusiasm in the country. But on the fact of it, it is a step of great importance and, intrinsically too, as I shall show presently, it is important. But committees as a rule, alike in self-governing and in subject countries, are viewed as only one of the many ways open to Government of shelving inconvenient questions. And this tendency is stronger in a country like India than in any other. Nevertheless, the idea of associating academic economists as a body—it must not be forgotten that individual economists have often figured in Tariff Boards and other enquiries of an economic nature—with official committees entrusted with clear-cut practical problems is in many ways a revolutionary one, for the placid conditions of this country.

I am not thinking so much of what the present committee may do as of what it means to the future. What are the potentialities of this step? There is, of course, the larger question how far academic economists can give direction to the practical policies of the administration. That they can throw some light on the problems confronting the administration or make observations with a bearing on such problems can hardly be questioned. But the nature of economic science, as economists like Mr. Robbins have expounded it, precludes its professors from pronouncing on the ends to be pursued. And since economic problems as they concern a government have more to do with the choice of ends than with the selection of means, the usefulness of the academic economist is definitely limited by his scientific disinterestedness. Nevertheless, professional economists have in modern times devoted themselves so much to particular problems of the national economic life, that it would be a grievous waste of knowledge and talent not to try to avail of their help in the solution of such problems. Even in the most practical problems, the academic economist has the advantage that he has developed the habit of scientific disinterestedness which, once acquired, persists thereafter. There is a great deal that the economists can say to good purpose. Has not Mr. Keynes had the last word on the financing of the war? The old idea that the scientist is a professor and a professor, a forgetful and unpractical being, must be given up for good. The scientist does pull his weight for his country; and the economist can do the same. People, of course, think in this connection of Mr. Roosevelt's Brain Trust; but the Brain Trust concerned itself as much with ends as with means; and in regard to the former, it is the voice of American big business that ultimately prevailed. In a country like Britain, the economists have always been able to exert their legitimate influence on practical policy.

The first question suggested by the meeting of the economists at Delhi is, whether conditions in India can attain similarity with those of Britain. In answering this question, one must bear clearly in mind the distinction that I have made between the study of economics as a body of scientific knowledge and the study, with such a background, of the specific economic problems which a nation is confronted with. In both these lines, Indian economists have had to labour under serious handicaps; and it would be no reflection on them or on their calibre to say that in attainments they do not compare very favourably with economists abroad. The rise of economists of authority is not less a national economic problem in India to-day than the growth of large scale industry or the rationalisation of our agriculture. Few people have given thought to it as a problem. I must not be misunderstood as casting any unfair aspersions on the ability of our economists. There are certainly men who can prove themselves equal to any problem on hand. But it is not ability, so much as attainments and achievements that I am now concerned with. For a committee of the kind that is now required to assist the Inter-Departmental Committee, you want economists who have already devoted years of specialised study to particular problems and who have already so established their name that the officials will have to think twice, thrice before they challenge them. It would be idle to claim that we have economists of that type and status. We have scientists amongst us who are as tall in the world of science as any abroad. We cannot say the same thing of our economists, though as good men have gone into the field of economics as into physics or chemistry or botany.

It is worth while looking into the reasons; for it will help us not only in the matter of academic distinctions, but also in the development of our national economy in the future. Let me trace historically the development of economic studies in India. In the early days,

Ranade, Gokhale and Kale (the last mentioned is happily still with us) were really pioneers in what has been termed somewhat unscientifically, Indian Economics. They had the vision and the courage to differ from the views on free trade and laissez faire which the economists of leading industrial nations, particularly Britain, believed in as the alpha and omega of economic thought and palmed off on the rest of the world as a body of economic laws and doctrines of indisputable validity. I am not sure that they were quite masters of all those refinements of economic laws which one associates wih Marshall Keynes, Pigou and others. But all science is systematised common sense; and economics very much more so than other sciences. Ranade and his school had abundant common sense, saw through the free trade game and stood up for what was at once true economics and true patriotism. At that time too, attempts to study specific problems were not lacking. Men like Dadabhoy Naoroji and R. C. Dutt devoted themselves to the survey of economic conditions; and it is no small credit to the former that his book still provides the starting point of enquiries into national income. But all these, Ranade's protectionism and Dadabhoy's estimates of national income were coloured by nationalist patriotism, though patriotism can hardly be said to have vitiated their reasoning or their conclusions. Its result is to be seen rather in the pronounced nationalist bias of later generations of economists in India. It was thought that the louder the cry for protection the keener is one's economic acumen. The reaction against this excessive nationalism is only a few years old; and in so far as it is a mere reaction, it is even more uncritical than the earlier tendency. But the unpopularity of anti-protectionist views made it incumbent on its sponsors to study more closely the merits of each case. The tradition of detailed, objective study is but a recent growth. It has to grow stronger before it can cure the two chief evils from which economic studies in India have suffered, that of excessive generalisation and that of getting lost in insignificant details. I am glad to say that the tradition is growing strong, thanks to the infusion of young blood, men who have taken their courses in foreign universities quite seriously and put their stay abroad to good use.

But it would be dangerous to exaggerate the progress so far made. What has been achieved is the ability to keep nationalist motives and enthusiasms in their place and to embark on a patient survey of existing conditions and to amass facts. This by no means is all. To rear a race of competent and authoritative economists, we require first, the appropriate personnel with the necessary training and secondly, the organisations which alone can help economists to carry out their enquiries and to bring them to a useful conclusion. In all walks of life, we have to ask ourselves the question, how are the workers recruited? Or—and this is perhaps a more correct way of putting it—how do our economists come into this branch of scientific study? Put

Match point

Don't keep your Gold Flake to yourself! That's one of the rules of the game, if you wish it to be a love game. Remember how popular they are with women nowadays. It's the flavour of the really fine Virginia tobaccos of which Wills's Gold Flake are made that appeals to the ladies as much as to you. So, if you want to be the court favourite, be generous with your Gold Flake.
WILLS'S GOLD FLAKE

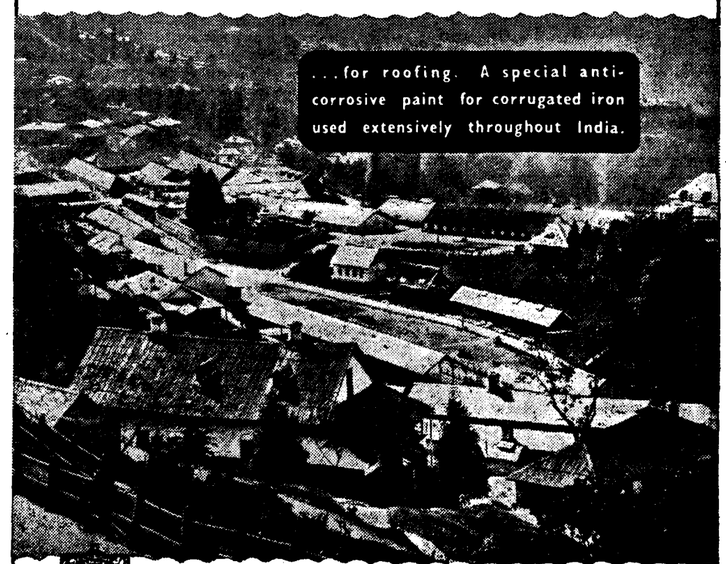
the question in this form and you will find that there is much to be desired. Keynes, Pigou, Hawtrey are economists of high order; but their knowledge of higher mathematics is as high. Here in India, there are very few economists who can follow the various formalae in Keynes's Treatise on Money or his later works. The truth is that in most universities, the mathematics expected of students of economics is of the matriculation standard. This handicap is not easily overcome and persists to the end of one's career. As for study of the facts of economic life, there is no country where conditions are more difficult for the economist. Official statistics are meagre and none too reliable. The country is too wide for personal or non-official investigation. Important business activities are under the control of foreigners who used to view these enquiries askance and who even to-day are not very eager to help.



With a thick mist lying over the economic landscape, it is no wonder that the stature of economists in India is somewhat stunted. We need to change the environment in which our economists have to live and grow to the full height they are capable of. The more I think of this problem, the more I feel that economics should no longer be a subject of undergraduate study. In view of its national importance, it should be made a post-graduate study with a preliminary examination calling for a comparatively high degree of proficiency in mathematics and the physical sciences. History and politics may be appropriately mingled in the curriculum of economics in the post-graduate study. My views may seem somewhat quixotic; but I believe that of all the sciences, economics is really the most intricate and the most exacting.

The shortcomings of Indian economists, let me emphasise are no argument for calling in foreign economists whenever any important problem comes up for consideration. For, our principal difficulty is not so much an unsure grasp of higher economics as inadequate mastery of the facts of the situation at home. In the latter, the foreign economist, however high his academic attainments may be, has no manner of advantage. On the other hand, he may be said to suffer from positive disadvantages which the Indian economist does not share with him. And what is more, the practice of entrusting foreigners with economic enquiries in this country deprives our economists of valuable opportunities of improving their knowledge and intensifying their acquaintance with our national economic problems. The role of the foreign economist is that of an adviser and consultant. If we were to examine an intricate scheme for exchange equalisationtion, we should certainly gain by listening to a few foreign economists or representatives of the Bank of England or the Federal Reserve Board. But here, too, the direction of the enquiry cannot be left in foreign hands. It used to be said in former days that the worst drain that India has suffered from British rule is the drain of administrative experience. But this danger has nowhere been greater than in official economic enquiries. I doubt if we can claim to have another economist, besides Dr. John Matthai, with the same close and first hand knowledge of conditions in Indian industry. That is due mainly to his having been in the Tariff Board for a long period. No wonder he was not persona grata with the authorities at the end of his official career! Similar opportunities have to be afforded to a number of other economists, if they are not to stagnate in economic pedagogy.

I welcome the appointment of the Committee of Economists, not so much for what they are or what they can achieve now, as for what they can grow into and what they can, in the long run, enable us to achieve. I have no illusions about what is immediately possible. Some may succumb to the first attack of self-importance which a summons to Delhi naturally induces. Some may be tempted by the opportunities for an official career which unfortunately has more attractions for some of our professors than advancement in the academic field. The Committee as a whole is not in a particularly favourable position to influence policy. It is a consultative body. The initiative for its meeting rests in other hands than its own. Nevertheless, there are distinct opportunities. Official papers with some valuable statistics and information of other kinds have to go the round among the Committee members, who will be enabled thereby to overcome one of the most dangerous of their shortcomings. The committee may thus be the means of bridging the dangerous gap between a priori theory and empirical knowledge which is the greatest obstacle in the path of our effective economic planning.

NEW DELHI, Nov. 5.

It has been an extremely busy week both for the new Members of Government and the non-official leaders of the Legislature. The Viceroy's Council has been meeting every alternate day and will meet again tomorrow to review the debate in the Legislature on the Indo-Burma Agreement. Credit is due to the new Indian Members, particularly Mr. Aney, for coming to a satisfactory settlement of the Burma question. Both sides have shown a frank, accommodating spirit. The new Indian Members of Government have recognised the strength of feeling in the country against the terms of the proposed Agreement and have undertaken to bring all the pressure that they can to induce the Secretary of State to postpone the issue of the Order-in-Council and in the meantime try to secure suitable modifications. This is a substantial gain, for at one time the fear was that the Government of India, having already ratified the Agreement on the advice of the Standing Emigration Committee would take up the position that no major modification was possible. On the other hand, the non-official leaders, who at the invitation of Mr. Aney met at his residence and reviewed the position, have agreed to put forward an all-parties amendment which, while objecting to the present terms of the Agreement, and requesting the Secretary of State not to implement it without satisfactory modifications, has carefully avoided anything in the nature of a direct censure of the Government of India. This has made it possible for the Assembly to pass the resolution without opposition from the Government.

* * * *

It is now for Mr. Aney, as Overseas member, to take up the question with the Secretary of State on the strength of the resolution passed in the Assembly and satisfy Indian opinion. So far as the Burma Indian delegation is concerned, it has made its position abundantly clear if the Agreement cannot be suitably modified, they would rather do without an Agreement altogether and face the risk of legislation by the Burma Government than consent to the present Agreement. It is apparently realised by the new Indian Members of the Government that the public regards this issue as so vital that their political future depends upon it. It is hardly likely that the Viceroy will go against the advice tendered by the Indian majority in his Council, but if the Secretary of State overrules the Government of India's objection and has the Order-in-Council issued without securing such changes, as will satisfy Indian opinion, it is bound to lead to a crisis in New Delhi. Some at least of the Indian Members would prefer to render their resignations rather than agree to face the public as helpless instruments of a policy with which they do not agree. Men like Mr. Aney have been repeatedly telling their friends that they accepted seats in the Viceroy's Council not out of any desire for jobs but in the hope of influencing the Government's policy and thereby of being of some service to the country. If they are not in a position to influence the Government's policy, they would be quite prepared to hand in their resignations to the Viceroy.

* * * *

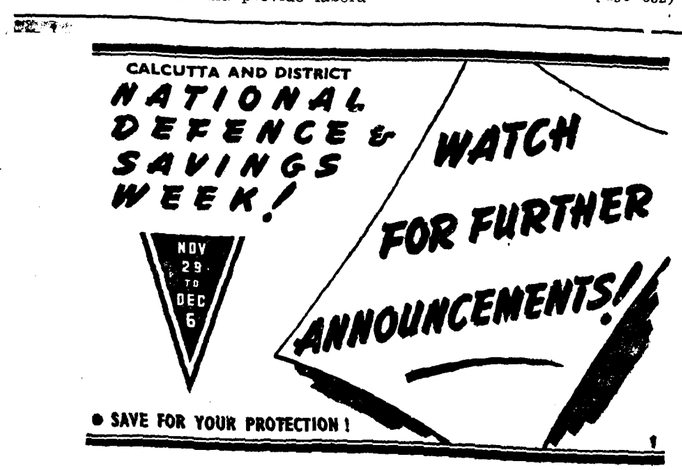
Another triumph of the new Indian Members of Government is the reported decision to acquire the B. and N. W. Railway and the Rohilkhand Kumaon Railway. The Government of India's proposals will be discussed this week by the Central Advisory Council for Railways after which the Government's final decision will be announced. The Bengal and North-Western Railway which has a route mileage of 125 miles is owned by a company subsidised by the Government of India. The Rohilkhand and Kumaon which is simiarly owned has a route mileage of 259 miles. As both are profitable lines, it has been respectfully urged in the Assembly that they should be acquired by the State when the time for exercising the usual option arrives. The capital at charge of the Bengal and North-Western Railway is over Rs. 10 crores and that of the Rohilkhand and Kumaon Railway over Rs. 2½ crores. There is little doubt that the Central Advisory Council for Railways will approve of the suggestion for purchase and welcome the decision of the Government of India to take over these two Railways for State management.

* * * *

A great deal of interest is evinced in Assembly circles in the Bill of Sir Frederick James limiting to a maximum of Rs. 50 per annum the amount payable in respect of any person by way of tax on professions etc. It is understood that those concerned have in great detail the objections raised by the Governments of Bombay and Bengal. In order to meet these objections certain changes are to be made in the Bill when the measure comes up for the second reading. It is expected that so far as the Bengal Municipal Act and the Calcutta Corporation Act are concerned exemption will be given by a suitable amendment of the Bill. As regards the objection from Bombay it is proposed to make clear that the Bill will not apply to cesses, duties and fees. In view of these changes, which remove some of the main objections Sir Frederick may find his task lightened when consideration of clauses is taken up.

* * * *

In his annual report for the year 1940 published today the Public Health Commissioner refers to an important proposal that Governments should provide laboratories for the diagnosis of infectious disease sent either by a medical practitioner or by a Government medical officer. The plan which has been recommended by the Central Board of Public Health provides for a central laboratory for each province or State capable of dealing with the highest type of diagnostic work and research, for regional laboratories for groups of districts and for laboratories in individual districts.



* * * *

Reports of a number of select committees have been presented this week to the Central Assembly. The Bill amending the Code of Civil Procedure which is intended to enable the Federal Court itself to devise the procedure regulating the presentation of appeals to the court has been suitably revised with the addition of a commencement clause in order to give time for the framing of the necessary rules. The select committee on the Income Tax Bill has added a new subsection in order to provide relief from the hardship which would be felt if income accruing in an Indian State and once taken into account for rate purposes in the year of accrual were again to be taken into account for rate purposes in the year of remittance into British India. The Finance Member is understood to have informed the committee that the States would ordinarily accept the British Indian determination of the amount of income arising in British India. In the minute of dissent appended to the report it is pointed out that if the accrual basis in the case of income from an Indian States given up, as is purported to be done by the Bill, then there is no reason why such income should be grossed up for rate purposes in the year of accrual. So far as changes made by the Bill regarding assessments are concerned it has been suggested by the Select Committee that their operation should not take place before 31st May 1943.

* * * *

Important consultations are understood to be going on between the Sind Government and the Government of India regarding the revisio of the programme of the repayment of the Sukkur Barrage

FOR HOUR TO HOUR NEWS READ The Telegraph

(From Our Correspondent)

Bombay, November 5.

The withdrawal of the curfew order as from Monday is generally taken to mean that the danger of further disturbances in the city is past. The Commissioner of Police withdrew the order on the restoration of normal conditions over a week. One hopes that it will receive as much publicity in the British press as the disturbances. The total number of preventive arrests made since 22nd October is as high as 500 but the local magistracy may take time to dispose of the cases in the usual order. The Commissioner has allowed that part of his order concerning the carrying of weapons to stand. The ban is thus retained to prevent the revival of stabbing which appears to have become the type of outrage most in vogue. A new attempt to regulate the vulner ability of the city or to determine industrial location seems to be behind an order recently promulgated by the Government of Bombay. A very large number of areas are listed as requiring the special attention of Government in that no new factory employing 200 or more workers shall be erected or extended for the purpose of carrying on any manufacturing process or working any plant except with the permission of the Home Department. The order is obviously governed by a desire to limit Government's own liability for air raid precautions as is evident from another part of the order which states that Government will impose conditions as to lay-out, construction and materials used in the case of factory extensions or construction. The object is to reduce the inherent vulnerability and to afford better protection to the persons using the factory or resorting to it. Should mills in the city or Ahmedabad contemplate extensions, their expenditure is likely to be larger than anticipated because of the recent order.

If the cotton market seems to show slow response to the good news from America as regards higher parity and raised ceilings, the piecegoods market, as expected last week, has shown signs of renewed vitality. A definitely healthier tone has been reported of late, though goods are still slow in moving. Mill goods find buyers at prices quoted and the rise in the prices of available Japanese goods has been a sustaining factor. It is realised that forward orders placed in the past are not likely to be carried out and dealers in imported goods are coming to understand that contracts are cancelled. There is naturally reluctance to sell at prices ruling last month and the cheaper grades are higher on the week. In the case of bleached goods the improvement is equally pronounced and prints too have gone up owing to keener demand. The acute scarcity of Lancashire goods, the enormous rise in replacement prices and the prevailing disposition to limit takings of all imported goods have favoured Indian mills which can count on improved enquiry from consuming markets. Though prices do not show any arresting increase, it is pointed out in trade circles that the absence of price control and the realisation that no standard cloth can be turned out at controlled prices are enough to keep values from dropping in sympathy with fluctuations in raw cotton. The current partiality for textile shares is largely explained by the report that the export trade is brisk. A larger demand for shirtings and fancies at remunerative prices has been reported. An increased demand for canvas in heavier weights has been referred to in recent reports which agree that it is easier to sell the lighter grades of piecegoods than the usual greys and whites.

The formal presentation of badges and crests to newly embodied units of the Air Force both in Peshawar and Lucknow naturally interested Bombay which expects that its own squadrons would receive a similar honour. It is reported that a squadron purchased out of the money raised by the War Gifts fund and a delegation representing the Committee of the Fund will be in Peshawar on November 7 to make a formal presentation of the squadron to the Defence Department. The Governor of Bombay will proceed for the function and Sir Homi Mehta will be among the representatives of the city attending on behalf of the Committee that collected Rs. 30 lakhs for making the gift of a complete squadron for the I.A.F. Mr. H. C. Captain, Sir S. B. Billimoria and Mr. Ramnivas Ramnarain will be among the visitors to Peshawar. There will be a mofussil contingent and there is a possibility that Sir Homi Mody, who was until recently the Chairman of the War Gifts Fund, will find it convenient to attend the ceremony. Names have been already given to the twenty aircraft and as many as six are credited to Bombay city. The Parsi Community has to its credit at least three machines the same as those donated by the Turf Club. One is named after the house of Tata, and the familiar combination of Bombay and Tata will be a reminder of prowess in the industrial field.

Bombay has certainly been impressed by the details of the Indore State budget presented last month. The Maharaja is said to have sanctioned the Estimates which provide for a total expenditure of Rs. 121.11 lakhs against revenue receipts of Rs. 121.94 lakhs. The expenditure not charged to revenue amounting to Rs. 1.75 lakhs will be offset by receipts from other sources totalling Rs. 1.86 lakhs. A surplus is thus achieved in spite of the difficulties of wartime and the necessity for remission of land revenue. The Standing Committee has approved the estimates and due note was taken of changes under various heads. Apart from fact that the State retains a large surplus of assets the increase in administrative expenditure is interpreed as a mark of progress. The enhanced pay and additional recruitment to the constabulary are called for by the increase in the population of the State. The Holkar's policy of adding regularly to the appropriations for the nation building departments is proved by the latest budget. The Education Department is a beneficiary and the donation from the Privy Purse for rural education like the provision made for a Technical Institute at Indore is a happy augury for the progress of education. Donations from the Privy Purse figure also in the revenue allotted for the Medical and rural development departments. The Army department faces reorganisation and rising expenditure has to be adjusted also in view of the numbers on oversea service. The increase of Rs. 2½ lakhs in army expenditure is understandable and the total at Rs. 13.17 lakhs is not very large as compared with the expenditure of Rs. 11.03 lakhs on Education. The improvement of Indore city is one of the main objects of the capital expenditure in the year. The creation of a revenue fund is no new departure in State finance, because the maintenance of a standard expenditure over a period of five years will call for a margin of additional revenue. The year's surplus will go into the reserve and future unallocated surpluses will also be credited to the Revenue Reserve.

The Indian evacuees from Japan have attracted much sympathy and the press has published reports of individual hardships arising from the freezing order. Since the Comerce Member said last week little or nothing about the losses of Indians resident in Japan for business purposes, the press reports will serve to show how badly the Indians have fared in the Anglo-Japanese exchanges. It is believed that there are 125 Indians in Japan in addition to a few who have elected to remain for good. The freezing order applying to Indians as from August 2, permitted them not to take more than 500 yen out of the assets. Commercial transactions involving more than 20 yen also had to be sanctioned by the Finance Ministry. The freedom of movement of all foreigners was restricted and it has been pointed out that Indians were given facilities duly applied for much more readily. Merchants realised early in August that there was no hope of business connections being restored and marking time was the job of the Indians until September 16, when word went round that the facilities given by Britain to Japanese subjects would be made available. As the majority of Indians lived in

Kobe, the Indians lost no time in arranging for their journey home. But the facility promised as regards taking money out for fares etc. was modified and the evacuees could not get more than 200 yen out of their frozen assets. This meant that the party that came home was nearly destitute, though the evacuees had in the aggregate left behind assets to the extent of Rs. 60 to Rs. 75 lakhs. Like the native population of Japan, the Indians suffered from the rationing enforced by the war and the shortage of rice etc. had become chronic. The Indian who described his experiences admitted there was little by way of protest from a docile and intensely patriotic population that was prepared for sacrifice and would not hinder the Government.

The visit of Mr. C. Rajagopalachari last week found Mr. Kher at liberty. The South Indians here had an opportunity to entertain the two ex-Premiers and a dinner at Matunga attracted a large number of guests like the reception earlier. A tribute to the work of South Indians in Bombay was paid by Mr. Kher who said that the school was what it should be. Mr. C. Rajagopalachari asked Madrasis to forget provincial differences and live in Bombay as permanent citizens of Bombay. He recalled that in jail the inhabitants of the various provinces shed their differences and developed the understanding that made for harmony. Mr. K. S. Ramachandra Iyer was largely responsible for the dinner given at the school to the Congress leaders who were feted more than once by the admiring crowd that gathered at Matunga. The Madras leader received on his return from Wardha a special reception at Dadar and what followed at the Victoria Terminius was a postscript.

The wage dispute in Ahmedabad has dragged on for over a month. Settlement seems remote after the breakdown of the conciliation proceedings. The Labour Association asked for arbitration but the millowners obviously adhere to their old view that an increase in wages is not justified. The authority given to Seth Chimanlal Parekh to negotiate on some other basis may induce the Textile Labour Association to modify its view and pul on a new formula. The negotiations antedate the breakdown of conciliation proceedings but a fresh effort will again be made. Mill agents cling to the view that Ahmedabad wages are too high compared with those ruling in other centres and argue that an increment will deprive them of ability to compete.

(*Continued from* page 830)

debt which commences from the next financial year. The Premier of Sind, Mr. Allah Bux, met the Finance Member more than once and submitted his Government's case for consideration It is understood that in response to a request from the Government of India the Sind Government is preparing a detailed representation with a request to expediate the decision as the time has come to prepare the budget for the coming year. It appeals that the Sind Government have already paid Rs. 30 lakhs in advance on the Barrage debt account this year and propose to make another substantial payment before the end of the year. The total payment towards the debt is expected to reach Rs. 2 crores this year. The Sind claim is that owing to their present financial position they should not be called upon to pay anything more than the revenue actually collected in the Barrage area and that the rate of interest should also be lowered in accordance with present market conditions. It is likely that there will be a further conference between the Sind Premier and the Finance Member when the former comes to New Delhi for the meeting of the National Defence Council early next month.

HILL-BIRD.

(*Continued from page* 833)

stances the increasing mill consumption is the only hope of the ryot. The order exempting mills from the operation of the Indian Factories Act has, therefore, had an encouraging effect. The last minute efforts of Japan to bring about a peaceful settlement also have had a sustaining influence.

"Sign of Safety"

wherever you see it!

The sharp edges of Goodyear's famous All-Weather tread resist skidding in any direction.

Wherever you drive—on country road, mountain trail, or city street—you see this tyre imprint more often than that of any other tyre.

It's "the sign of safety"—the imprint left by Goodyear tyres—the imprint of the famous All-Weather tread with its sharp-edged, diamond shaped blocks.

Throughout the world, Goodyear tyres have earned their reputation for safety, for long, trouble-free mileage, and for outstanding value.

Whatever your requirements may be, there's a Goodyear tyre to satisfy your needs and to suit your purse!

A Resume of Commodity Markets

In view of the anxiety regarding the Russo-German war situation and the continued tension in the Far East, markets would have been rather subdued under normal circumstances. But some important developments during the week have had a stimulating effect on the raw cotton, jute and jute manufactures markets. Thus, the behaviour of the bullion and commodity markets during the past week would seem rather paradoxical. There has been heavy buying of gold and a rise of more than one point is recorded on balance. On the announcement of the order that cotton mills will not come under the operation of the Indian Factories Act, for the period of the emergency, there has been good speculative buying and closing prices, are at the highest levels of the week. Earlier in the week operators were undecided and values tended to sag as there was much concern regarding the Far Eastern situation.

The jute market was inclined to be likewise. Till Monday a rather weak tone was in evidence and sellers were pressing for business in the absence of any large scale buying by mills. Only the announcement of a large order for hessian cloth for over 11 crores yards and the decision to increase the number of working hours from 54 to 60 per week brought about a late rally which, however, has not been fully sustained.

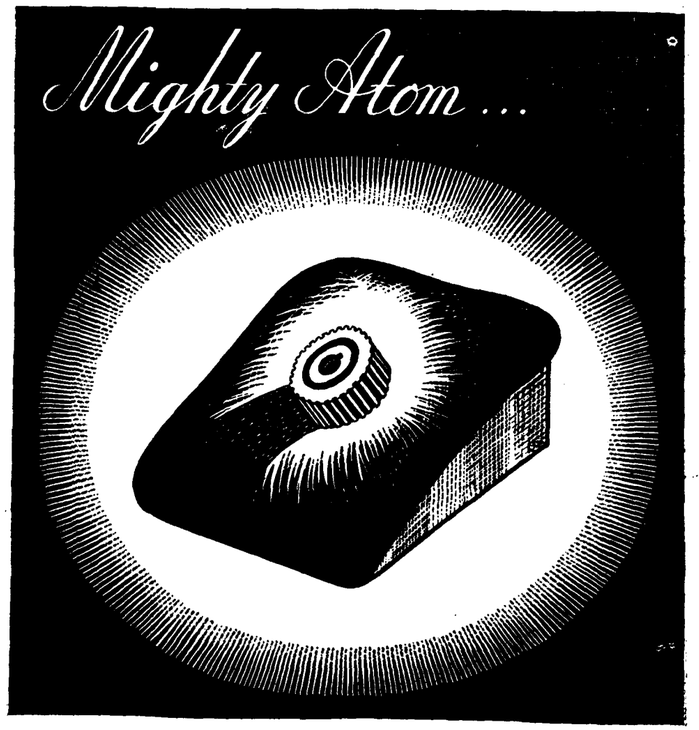
Another important feature of the week is the announcement by the Government of India regarding the decision to control wheat prices. The Press note issued in this connection points out that the proceedings of the All-India Price Control Conference have been misunderstood and emphasises that it has never been the intention of the Government to abandon price control. As, since the Conference, there has been a consistent rise in wheat values it has been decided to fix the maximum price at Rs. 4-6 (Lyallpur). The fixation of a maximum price has naturally had a check on prices for near positions. But continued enquiry for the forward positions has caused a rise in quotations for new crop.

JUTE:

Prior to the placing of the new war orders for various types of hessian cloth, the raw jute market was rather weak. Mills were not buying in any large quantities and it was generally felt that there would be an increase in the yield of the crop for the next season. Arrivals into the mofussil centres were coming in larger quantities. The decision to increase the number of working hours from 54 to 60 hours per week immediately had an encouraging effect and the quotation improved to Rs. 67-12 in the futures market but the rise in prices has not been sustained. It looks as if there will not be any very important price fluctuations in the jute market in the near future. According to the present programme, it is expected that mills will be obliged to work 60 hours per week till March next year.

JUTE MANUFACTURES:

The hessian market was uninteresting earlier in the week. The quotation for the new positions were maintained only on account of the tightness of the spot position and the satisfactory shipments. The new orders for hessian cloth for 11.56 crores yds. caused a firming up in rates but the decision to increase working hours prevented any appreciable rise in prices. Speaking at the special meeting of the member mills of the Indian Jute Mills Association, the Chairman remarked: "The large order for hessian, which I received and placed on all mills on Tuesday evening last, necessitated an urgent review of the working hours position and a special meeting of the Committee was called for Wednesday. At that meeting a sufficient percentage of the Association membership signed the necessary requisition for an extension of working hours to 60 per week, and the Committee then unanimously decided to recommend it for your acceptance. It will be clearly understood that this imposes no limit of time for which 60 hours per week will be worked, and a decrease can only be made with one month's notice. It is my opinion that provided shipments and demand continue satisfactory, it may be possible to work these hours up to the end of March there is no finality about this, and the position will still continue to have the very careful and constant consideration of the Committee. Government's sanction has been sought and obtained for the 60 hour week."



On a former occasion, mills worked 60 hours per week when the large order for 50 crores sandbags was received.

The increase in working hours recently has been effected only with the placing of war orders. The ability of mills to control prices in the absence of maximum prices is, therefore, strictly limited. If there happens to be any 'ramp' on the hessian market the hands of mills will be completely tied and it will not be possible to work double shift on account of the many difficult problems involved.

COTTON:

The position of cotton growers is daily growing more difficult. With the likelihood of a large carry-forward from this season and the favourable prospects for the next season's crop it is feared that it would be difficult to maintain prices in the absence

Jute and Jute Manufactures

(By our Correspondent)

Calcutta, Novr. 6.

QUITE a marked change has come over the complexion of the different sections of the market in the last few days, consequent on the placing of further Government orders for early shipment. Last week an order for 10 crores of Sandbags was placed, but as the delivery was spread over January to October, the market was scarcely affected. The new order this week for cloth however was required to be filled between November and March and as the quantity was 11½ crores yards and actually more, in terms of a good deal of wide cloth, the position immediately required review as it was beyond the capacity of Mills to tackle the order on present working hours in their well-sold position for the near months. The question was immediately dealt with by the Mills Committee and today the Mills in general meeting have confirmed the resolution to work 60 hour working will continue up to the end of March at least. As the present 54 hour working is the limit under the Factory Act regulations, a special dispensation will have to be obtained from the Bengal Government for the relaxation of the Factory Act in this respect, as has already been done in the case of Cotton Mills. It is hoped that this relaxation can be secured in time to work a full day on Saturday.

In this connection too it is expected that Government will be pressed to make an early announcement for their decision regarding Jute regulation for next season, also that the quota decided upon should be adequate for all probable requirements of the trade. It is believed that the figure Government have in mind is two thirds of the 1940-41 area, or roughly 10½ annas of the last crop. This would appear to leave little enough margin to allow for any intervention of Providence, and the trade would feel more comfortable if a twelve anna figure were fixed.

The Order for early shipment cloth came almost simultaneously with the issue of the 31st October Stock figures and the two combined had an immediate bullish effect on the near hessian market. When it became obvious however that the Mills would be forced to increase working hours, the bullish feeling transferred itself from the fabrics side to the raw material and there was quite a burst of activity on the Jute market. This was shortlived however, though quite a large turnover was recorded while it lasted. Mills having secured themselves against their additional immediate requirements are again inclined to pause, particularly as the fabrics side has relapsed for the time being into a state of suspended animation. Even the near hessian covering demand which had been sustaining the market recently seems to have dried up, and as the extra working will produce a large quantity of Heavy Goods for which no immediate outlet can be seen, the tendency at the moment is one of "wait and see".

The October Stock figures are instructive, indicating continued satisfactory shipping conditions. Stocks of Sandbags on Government account show a marked increase, but stocks of trade goods in hessian are down by no less than 238 lakhs yards at the low figure of 13.39 crores. Sackings show an increase of 27 lakhs yards and it seems almost inevitable that this will continue to increase as the offtake in Heavy Goods is likely to remain restricted. All the more reason why the Mills should seriously consider whether something could not be done about the proposal to form a pool of bags against the certainty of large quantities of containers being necessary for distribution purposes immediately hostilities cease. It may seem optimistic to look that far ahead at the moment but such a pool, to be of any use, could not be accumulated in a few weeks or even a few months. For the requirements, when they are wanted, will be immense, and will be wanted, quickly.

Some light has been thrown on the matter in which the Raw Jute Control for the U.K. will work. Offers will be sent as usual to merchants in the U.K. from Calcutta, and the Control will buy all U.K. requirements from such merchants in competition. The merchants will then furnish the names of the shippers for whom they have sold and freight will be allotted these shippers pro rata their sales. Business has already commenced on these lines, and while full details are not available, it is understood tha the Control has been able to purchase very much cheaper than the rates at which independent sales had been recently put through. Export demand has been mainly in Tossa and Daisee grades. Quite a considerable business has again been done with local Mills. Earlier sales included Old Crop Lightnings at from Rs. 61 down to Rs. 57 and Old Crop Firsts at Rs. 64. On the turn however New Crop Firsts were freely bought at Rs. 69 to Rs. 71 and Special and Free from Samla Firsts at prices ranging from Rs. 71 to Rs. 75. The Futures quotation continued to decline from Rs. 64-8 till Rs. 62-12 was touched, after which there was a sharp reaction up to Rs. 67-12, later easing off to close at Rs. 65-4.

In Loose Jute the demand has concentrated largely on European packing and prices have been considerably discounted for low assortment, 20|60|20 and 10|60|30 assortments of Tops, Middles and Bottoms continue to command Rs. 16-8, Rs. 14-8 and Rs. 11, but Bots alone have sold at Rs. 10 and even Mids and Bots at Rs. 14 and Rs. 10. Supervised Tops and Mids were reported at Rs. 16 and Rs. 14 but Indian Jat has proved almost unsaleable even offered down to Rs. 12-12 basis Mids. Some Indian District Tossa Mids sold at Rs. 13-4 and Bottoms at from Rs. 11 down to Rs. 10. Estimated arrivals of Jute up to the end of October are 24,36,000 B|s against 26,12,000 at the same date last year. Arrivals during the month of October were behind at 7,77,000 B|s against 9,34,000 in October 1940.

The feature of the Fabrics market was the sharp rise in hessian prices on the announcement of the new war order and the equally sharp relapse when mills decided to work 60 hours. Nine porters moved from Rs. 23 to Rs. 24 and back to Rs. 23-4 in the ready position and elevens from Rs. 26-2 to Rs. 27-12 and back to Rs. 27-4. Comparatively little was done beyond the near position, but sales were reported in Jan|Feb nines at Rs. 19-6, and in Jan|March elevens at Rs. 23. Heavy Goods have not been in much request but sales of "B" Twills were recorded at Rs. 38-12 to Rs. 39-8 to Rs. 39 for ready, Liverpools at Rs. 47 to Rs. 47-8 Nov., Rs. 46 Dec. and Rs. 45 Jan. Cornsacks sold at Rs. 40-8 and Woolpacks at Rs. 2 both for Nov.

JUTE

Calcutta, Nov. 6.

The raw jute market was inclined to be rather weak early in the period under review in the absence of any buying and with the increase in arrivals into mofussil centres. Sellers were anxious to do business and prepared to discount rates. There was however considerable apprehension regarding the supplies of jute for the next season. With a comfortable stock position mills have been in no hurry to replenish their stocks. Only the announcement towards the close that there will be a further increase in working hours from 54 to 60 per week has resulted in a late rally, the quotation towards the close on Wednesday was Rs. 66-10 after being higher at Rs. 67-12. In to-day's session an easier tone is noticeable with the Futures quotation at Rs. 66.

In the loose jute section not much business was passing in the earlier days of the week and sellers were pressing for business. Indian Jat Middles and Bottoms were done at Rs. 12-12 and Rs. 9-12. Closing quotations are slightly higher. Mills have bought in greater quantities on Wednesday. European Bottoms were done at Rs. 10 per maund. Supervised Tops and Middles were done at Rs. 16 and Rs. 14 per bale.

In the pucca bales section no business has been done for export. During the last two days mills are reported to have done some business. New crop Firsts 2|3 were done at Rs. 10 per bale.

In the futures market, as remarked above, after earlier weakness, a firmer tone is noticeable, and closing quotations, while considerably higher on balance, are only slightly below the highest levels for the week.

JUTE MANUFACTURES

Calcutta, Novr. 6.

The jute manufactures market has continued steady throughout the week on near covering business. Shipments have been satisfactory. The announcement of new orders from the Government of India have naturally had an encouraging effect and but for the increase in the number of working hours to 60 per week, the improvement in values would perhaps have been more pronounced. 9 porters ready are quoting Rs. 23, December Rs. 22-12, January|March, Rs. 19-6 and April|June Rs. 18-4. 11 porters ready were Rs. 27 and December Rs. 25-12.

Orders have been placed with the Indian Jute Mills Association for various types of hessian cloth of a total yardage of 11.56 crores yards. The Committee at a special meeting held yesterday decided to increase the working hours from 54 to 60 per week with immediate effect; and members of the Association will be asked to sanction this at a special meeting of the Association which has been called for this afternoon. Application has been made to the Government of Bengal for the necessary exemption from the Factories Act.

The heavy goods section has been uninteresting. B twills for November shipment sold on the basis of Rs. 39-4, Liverpool twills for the same position Rs. 47, Cornsacks Rs. 40-8 and A twills Rs. 47-8.

GOLD

Calcutta, Nov. 6.

There has been a sharp rise in prices in the bullion market. Gold prices are higher on heavy demand for actual gold and sovereigns. The fears regarding the war situation have been mainly responsible for the rise in values. Gold ready were quoting Rs. 43-9, First settlement Rs. 43-8-6 and Second settlement Rs. 43-8-6 towards the close on Wednesday. There has been a further rise in prices to-day and the quotation is the same for all three positions at Rs. 43-14-6. The quotations at the time of last writing were Rs. 42-3-3, Rs. 42-3-6 and Rs. 42-3-6 respectively.

The London price has remained unchanged at 168s.

SILVER

Calcutta, Nov. 6.

There has not been any appreciable change in the prices in the silver market. Quotations are more or less steady. Perhaps the fears that the Government of India would come out as sellers have checked any speculative rise in values. Indian mint silver ready are quoting Rs. 63-0-9, First settlement Rs. 62-14, and Second settlement Rs. 62-14.

COTTON

Calcutta, Nov. 6.

The decision of the Government to exempt cotton mills from conforming to the regulations of the Indian factories Act and the strength of the bullion markets have been responsible for the firmness in the raw cotton market during the past week. Normally the political situation should have had a discouraging effect but option dealers' buying has pushed up values. Broach April|May are quoting Rs. 232-12, Omra December|January Rs. 195-12, March Rs. 186-12, Bengal December|January Rs. 147 and March Rs. 149|8.

The New York market has not been quite active and the quotations are even lower on balance. December was quoting 16.10 cents and March 16.28 cents.

WHEAT

Calcutta, Novr. 6.

The announcement regarding the Government's decision to control wheat prices has prevented any rise in values for the near positions but the continued buying by exporters has resulted in a rise in quotations for New Crop. Choice White ready were Rs. 42-1, November Rs. 42-1 and July Rs. 38-7. Announcing their decision as to what maximum prices of wheat should be for purposes of price control, the Government of India state that they would fix it at Rs. 4-6. They, however, make it clear that they have not yet worked out detailed plans for action to keep the price of wheat within a level which is not excessive. A Press Note issued in this connection states that the price of wheat after a temporary check on the news of the recent reduction of the import duty, has again shown a tendency to rise steeply, and market reports indicate that this is partly due to a widespread impression that the conclusion reached at the recent Price Control Conference was against interference with this upward movement. This impression, says the Note, is not correct. There was general agreement as to the need for action when the price should reach an excessive level but not as to what would constitute such a level. The latest published quotations (Lyllapur) before the Conference was Rs. 4-3-1 per maund.

There has been no change in the local market and quotations are more or less unchanged at Rs. 5-10 and 5-11-9 for ready and May positions.

Further Increase In Jute Mill Working Hours

THE receipt of new war orders by the Jute Mills Association and the consequent increase in mill working hours, as also the previous announcement that cotton mills in Bengal will be exempt from the operation of the Indian Factories Act, have had a distinctly encouraging effect on the Calcutta Stock Exchange. There has been good buying of both cotton and jute mill shares and a substantial rise in prices has been recorded. With cotton mills and engineering companies working day and night, while jute mills are busy on war orders, it need hardly be emphasised that prospects for major industrial equities are very encouraging. But for the element of uncertainty arising from the war a further rise in prices would perhaps have been recorded this week. A pointer to the industrial outlook is already available.

That the Steel Corporation of Bengal Limited is doing very well is evident from the fact that the directors have found it possible to declare not only the usual half yearly dividend on the preference shares but also the arrears of dividends amounting to 2 per cent up to May 31, 1940. The arrears of dividend on preferences have thus been wiped out in full.

* * * *

In a week which is full of satisfactory developments for the jute industry the publication of encouraging results of important jute mill companies for the half-year ended September, 1941 should be taken as reassuring to investors. The impression conveyed by the results of *Anglo-India Jute Company, Limited* for the same accounting period, published only last week, has been fully confirmed since.

The aggregate profit of the five companies, For Gloster, Fort William, Gourepore, Khardah and Nuddea, for the six months covered by the latest reports is nearly two and a half times the figure for the previous six months. The total profit, before providing for taxation and depreciation, is Rs. 70,79,301 against Rs. 29,64,289 for the previous half-year. It will be noted from the table given here that the earnings figures make a uniformly good showing.

Net Profit before providing for taxation and depreciation

	Half-year ended 30-9-41	Half-year ended 31-3-41
	Rs.	Rs.
Fort Gloster ..	16,36,838	6,98,159
Gourepore ..	16,82,250	6,95,186
Fort William ..	8,62,211	2,76,600
Khardah ..	15,84,274	6,81,900
Nuddea ..	13,13,728	6,12,444
	70,79,301	29,64,289

Ordinary dividends have been increased in all cases except one. The increase in dividends, however, is not altogether pronounced on account of the need for a higher provision for taxation. Only the *Gourepore Company* has been able to pay an ordinary dividend of Rs. 30 per share against Rs. 17-8 per share previously.

* * * *

The net profit, before providing for taxation and depreciation in the case of the *Gourepore Company, Limited* for the half-year ended September, 1941 is Rs. 16,82,250 against Rs. 6,95,186 for the previous half-year. After providing the substantial sum of Rs. 9,00,000 (Rs. 2,25,000) for taxation the ordinary dividend, as pointed above, is substantially higher at Rs. 30 per share. The recent sharp rise in the quotation for the shares, therefore, appears fully justified. At the present quotation around Rs. 740 *cum*-dividend the yield is satisfactory, being over 8.1 per cent tax-free.

* * * *

The Fort Gloster Jute Manufacturing Company, Limited for the same half-year has been able to report equally good results, but the need for a more than a proportionately greater provision for taxation has prevented any big increase in the ordinary dividend. The net profit, before providing for taxation, is Rs. 16,36,838 against Rs. 6,98,159. The provision for taxation alone is Rs. 11 lakhs (.2.75 lakhs) while the amount set aside to depreciation is unchanged at Rs. 2 lakhs. The ordinary dividend has been increased from Rs. 12-8 to Rs. 17-8 per share. The amount carried forward is considerably lower at Rs. 2,68,242 against Rs. 3,81,880 brought in.

It was chronicled in these notes that only last week an order for 10 crores sandbags had been placed and the quantity was to be delivered in the equal monthly instalments beginning from the New Year. Another order for various types of hessian cloth totalling over 11.25 crores yards (delivery November to March) has necessitated an increase in the number of mills working hours from 54 hours to 60 per week. With a larger margin of profit and the further increase in working hours earnings of Jute companies should run at the highest level for the war period. As a matter of fact the earnings of the five jute companies, discussed previously, are the highest for the war period.

* * * *

Orders have been placed by the Government of India with the Indian Jute Mills Association for various types of hessian cloth of a total yardage of 11,56,25,000.

The Committee of the Association at a special meeting held yesterday decided to increase the working hours from 54 to 60 per week with immediate effect: and members of the Association will be asked to sanction this at a special meeting of the Association which was called for on Friday.

Application was made to the Government of Bengal for the necessary exemption from the Factories Act. Sanction has already been obtained from the Bengal Government.

* * * *

Wartime difficulties have again been responsible for the low level of earnings of the *Burma Corporation, Limited*. The bulk of the revenue earned was attributable to the capacity of India to absorb silver and to a wide demand for lead, in which the offtake of H.M. Ministry of Supply was an important factor. It would have been possible to report a higher level of earnings but for the increase in working expenses mainly on account of the higher landed cost of stores.

The net profit, before providing for taxation and depreciation, for the year ended June 1941 is Rs. 1,23,23,506 as against Rs. 1,38,76,929. The provision for depreciation is Rs. 4,72,150 (Rs. 5,39,104) and taxation Rs. 66,05,061 (Rs. 65,25,466). The dividend of six annas per share is lower compared to seven annas per share for 1939-40.

(Continued on Page, 839)

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, November 7.

FIRMER conditions have been noticeable on the Calcutta Stock Exchange during the latter half of the week under review. The fresh order for hessian cloth and the decision to increase further production from cotton mills have been mainly responsible for the strength of the markets. Markets were closed yesterday on account of the death of a member and are again closed to-day after 2 p.m. for the same reason. Earlier in the week, markets rather undecided and business passing was not quite brisk. Operators were inclined to await further developments. In spite of the serious war situation the developments mentioned above have brought about a substantial rise in values during the last two days. In to-day's short session business passing has been on a larger scale.

Giltedged securities have been steady and business is again been on a restricted scale. There has been an increase in the treasury bills rate on account of the resumption of the sale of intermediates. 3½ per cent. Paper was unchanged at Rs. 96. Among terminable loans, 3 per cent. 1963|65 were Rs. 95-3, 3½ per cent. 1954|59 Rs. 102|15, 4 per cent. 1960|70 Rs. 110-8 and 5 per cent. 1945|55 Rs. 111-5.

Among fixed-interest securities there has again been good demand for the tax-free preference shares but sellers are reluctant to part with their holdings. *Hastings* preferences were done at Rs. 152, *Lothian* at Rs. 167 and *Chitavalsah* at Rs. 158. *Dalmia Cement* preference were Rs. 128-8, *Kumardhubi Engineering* Rs. 147 and *Steel Corporation* Rs. 122. *B. I. Corporation* were Rs. 183, *Rohtas Industrie* Rs. 170 and *Humayan Properties* Rs. 10-8. As remarked at the beginning, there has been greater enquiry for cotton textile issues. *Cawnpore Textiles* were Rs. 10-1, *Dunbar* Rs. 251-8 and *New Victoria* Rs. 4-10. The rise in prices on the Calcutta Stock Exchange has not been so pronounced as in the Bombay market.

In the Coal section there has not been much activity but prices are higher, *Bengal* having ten points higher at Rs. 392. *Bokaro and Ramgur* were Rs. 51-8, *Burrakur* Rs. 14-12, *Central Kurkend* Rs. 15-10, *Dhemo Main* Rs. 13-6, *Raneegunge* Rs. 32-2 and *West Jamuria* Rs. 32-9.

In the jute section prices have been marked higher all round on the announcement of new orders for hessian cloth and the increase in the number of working hours to 60 hours per week from 54 hours per week. *Howrah* are nearly one and a half points higher at Rs. 60. *Anglo-India* are unchanged at Rs. 384. *Alliance* have registered a rise of ten points to Rs. 345. *Clive* were Rs. 29-4, *Fort Gloster* Rs. 584, *Fort William* Rs. 284, *Gourepore* Rs. 749, *National* Rs. 25-12, *Nellimarla* Rs. 13 and *Rameshwara* Rs. 9-14.

In the Engineering section, prices have been marked higher in sympathy with the strength of the other sections. *Indian Iron* are nearly one point higher at Rs. 33-7. *Steel Corporation* have registered a rise to Rs. 29-7. It has been announced by the directors that the arrears of dividend amounting to 2 per cent. will be paid on the preference shares. *Braithwaite & Co.* were Rs. 16-10, *Bhartia Electric Steel* Rs. 17-6 ex-rights, *Burn & Co.* Rs. 418 cum-dividend, *Indian Standard Wagon* Rs. 63-12 and *Jessop & Co.* Rs. 21.

Sugar shares have continued firm and *Raza* and *Buland* have been quoted at new high levels being around Rs. 24-2. *Cawnpore Sugar* were Rs. 24-10, *Carew & Co.*, Rs. 13 and *New Savan* Rs. 14-1. *Champarun* were Rs. 20-4.

The increase in the quota by another ten per cent has improved the prospects for tea companies. *Hasimara* were Rs. 48-4, *Hattikhira* Rs. 22-12, *Patrakola* Rs. 1,003 and *Teliapara* Rs. 485.

In the miscellaneous section, *Burma Corporation* and *Indian Copper Corporation* were done at Rs. 4-8 and Rs. 2-3 respectively. *B. I. Corporation* are higher at Rs. 5, *Dunlop Rubber* at Rs. 42-6, *Bararee Coke* at Rs. 29-1, *Indian Wood Products* at Rs. 29-4 and *Publicity Society* at Rs. 10-14. Paper shares have been firm with *Titaghur Paper* at Rs. 22-15, *India Paper Pulp* at Rs. 164 and *Orient Paper* at Rs. 16-10. *Dalmia Cement* were Rs. 14-4 and *Alkali and Chemical* Rs. 20-2.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, Novr. 6.

Money.—Conditions in the money market remained unchanged over a week, the rate for call money being still quoted at ¼ per cent (lenders).

Exchange Market.—Banks are selling T.T. at 1s. 5 31|32d. and buying three months' billls at 1s. 6 9|32d.

Securities.—Throughout the week Government securities showed little or no change in prices and 3½ per cent Paper was practically pegged around Rs. 96. Medium and short-dated loans were however inclined to be on offer at slightly lower rates. 1948|52 and 1951|54 changed hands at Rs. 97-14; 1963|65 at Rs. 95; 1947|50 at Rs. 103-3; 1960|70 at Rs. 110-12; 1950|60 at Rs. 114-12; 1945|55 at Rs. 111-3 and 1946 *Defence Bonds* at Rs. 102.

Shares.—The local share market maintained a cheerful tone during the major portion of the week owing to continued bull support and prices improved all round on the good industrial outlook. Towards the close today, however, there was a mild setback due mainly to profit-taking. Textiles were as active as ever. Steels have also had a favourable week largely owing to the strength of Textiles.

Textiles.—The rise in prices, witnessed last week, continued to be in evidence during the week under report. A large number of transactions has been recorded. Taking the forward scrips first of all,, *Bombay Dyeing* was the cynosure of speculators and investors alike following the rumours of a bonus issue. The shares appreciated substantially from Rs. 1,376-4 to Rs. 1,421-4, the closing price today being slightly easier at Rs. 1,410 owing to some profit-taking. Other mill shares followed suit and good gains were recorded, *Central India* being done at Rs. 424; *Century* at Rs. 480; *Colaba* at Rs. 226; *Gokak* at Rs. 278-8; *Kohinoor* at Rs. 572; *New Great* at Rs. 360 and *Svadeshi* at Rs. 453. In the cash list, *E. D. Sassoon* Deferred were done at Rs. 3-1-6; *Indore Malwa* at Rs. 221; *Minerva* at Rs. 122 and *Model Nagpur* at Rs. 215-4.

Hydro-electrics.—There was considerable investment enquiry in this section, but prices showed small change. *Tata Power* showed a rise of about 20 points over the previous week to close at Rs. 1,795, while *Andhra Valley* remained unchanged at Rs. 1,765-8 and *Tata Hydro* at Rs. 193.

Steels.—In sympathy with the rise in textiles Steel shares met with good buying and were marked up, *Tata* ordinaries and deferreds touching at one time Rs. 414 and Rs. 2,197-8. This rise in prices was, however, shortlived and prices declined towards the close on renewed profit-taking, the ordinaries closing at Rs. 410 and the deferreds at Rs. 2,190.

Banks and Railways.—Among Bank shares, *Bank of India* were steady at Rs. 147-12; *Imperial Bank* fully paids at Rs. 1,622-8 and contributories at Rs. 400-10. *Central Bank* were slightly higher at Rs. 51-4.

Railway shares showed no important change.

Miscellaneous...Bombay .Burma .Trading old shares, after opening at Rs. 525, gradually advanced during the course of the week, closing finally at Rs. 538-12, while the new shares were changed hands at Rs. 173-12. *Associated Cement*, closing at Rs. 165-12, are at their highest for the week. *Shivrajpur .Syndicate* were steady at Rs. 48-4; *Scindia .Steam* .at .Rs. .27-15; *Tata Oil* at Rs. 63 and *Tata Chemicals* at Rs. 15-13. *Indian Iron* came in for business at Rs. 33-3; *Steel Corporation* at Rs. 20-7 and *Premier Construction* at Rs. 123-8. *Belapur Sugar* were slightly marked higher at Rs. 263 and *Wimco* at Rs. 225-12.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, Novr. 6.

The local market continued to be active with Textiles again in keen demand during the week under report. Rubber shares encountered good support with prices firming up.

Securities.—There is nothing fresh to report in the local giltedged market, the price of 3½ per cent Paper hovering around Rs. 96-0-9. 3 per cent 1951|54 came to business at Rs. 99-13. Among State Loans, 4 p.c. *Mysore* were in good request at Rs. 116-2. 3½ per cent *Travancore Loan* had good buyers at the current price with sellers unwilling to meet the market. Provincial Loans were firm.

Mills.—The rise in Textiles in the Bombay market imparted firmness to local mill shares generally and prices improved substantially. The shares of the Coimbatore group were an active counter, *Cambodia* being done higher at Rs. 13-4. *Vasanta* had no sellers even at Rs. 157. *Coimbatore Spinning* improved to Rs. 92. *Madura* were marked at Rs. 47; *Mettur Industries* at Rs. 200; *Ranga Vilas* at Rs. 76, being definitely over par for the first time in many years, and *Jamardhana* at Rs. 54.

Utilities.—Fairly active conditions were in evidence in this section. *South Madras Electric* were done at Rs. 15 *cum* the interim dividend of 3 per cent. *Cochin State Power* were transacted at Rs. 8-13-6; *Ellore Electric* at Rs. 7-8 and *West Coast* at Rs. 10-4.

Plantations.—Rubber shares were more or less maintained at last week's rates, Cochin .Malabar being done at Rs. 9-2 x.d; *Vaikundam* at Rs. 11; .*Kalpetta* at Rs. 24-4; .*Midland* at Rs. 7-12-6 and *Nilambur* at Rs. 13. Among Tea shares, *Chembra Peak* met with good investment at Rs. 5-12. *Peria Karamalai* were taken up at Rs. 19-12.

Sugars.—*Mysore Sugar* showed no change at Rs. 54 x.d. The report for the *Travancore Sugars and Chemicals, Limited* is due and is awaited with interest in the market.

Miscellaneous.—Mysore Chemicals were dull at Rs. 18-2. *Mysore Paper* improved to Rs. 18, while *Mysore Match* were a shade easier at Rs. 9-15. *Indian Steel Rolling Mills* were done preferences at Rs. 12-4 and *Andhra Cement* preferences at Rs. 127-8.

LONDON STOCK EXCHANGE

The London Stock Exchange has been quietly steady during the past week. Towards the close there has been a slightly firmer tendency, Diamonds and Textiles being marked higher . Giltedged securities are slightly easier with 2½ per cent. Consols quoting 82¼, 3½ per cent. Conversion 106½, 3¼ per cent. War Loan 104 11|16 and 3 per cent. War Loan 101¼. 3½ per cent. India Sterling Stock were quoted 99⅜.

Among other sections, Tea issues were higher on the announcement of the increase in the quota by 10 per cent. Rubber issues were unchanged. Kaffirs met with some support. Oils have been rather irregular. Among Diamonds, *De Beers* have registered a rise to 177s. 6d. Home Rails have been firmer.

NEW YORK STOCK EXCHANGE

Wall Street has been narrowly irregular and prices are slightly lower on balance. *U. S. Steel* were $53⅛, *General Motors* $38⅞ and *Anaconda Copper* $26⅝.

(Continued from page 837)

The increase in the rates of income-tax have necessitated a larger provision for taxation. It has been found necessary to transfer Rs. 10 lakhs from General Reserve towards additional provision for taxation on the earnings for 1940-41.

The increase in ore reserves is more pronounced on this occasion, total ore reserves at the end of the year being 3,130,199 tons against 3,411,192 at the end of 1939-40 and 3,607,945 tons at the end of 1938-39.

With the present rate of extraction the life of the mines can be still reckoned around 10 years. This should go far towards stabilising the investment status of Burma Corporation shares.

The accounts of the *Alkali and Chemical Corporation of India Limited* for the year ended June, 1941 cover a year's working of the Calcutta Factory and a year of construction in the case of the Punjab Factory. The net profit for the year should be considered rather satisfactory, being Rs. 2,83,379. After providing for depreciation Rs. 73,630, writing Rs. 38,310 off preliminary expenses and Rs. 8,409 off brokerage the sum of Rs. 35,000 is provided for taxation. The amount carried forward is Rs. 39,732 against a debit balance of Rs. 39,546 brought in.

The total subscribed and paid-up capital of the Company has increased during the year from Rs. 52,69,000 to Rs. 91,96,400 the 4,34,000 Ordinary Shares held by Imperial Chemical Industries (India) Ltd. and their nominees which were shown as paid-up as to Rs. 5 in the last Balance Sheet being now fully paid, whilst 1,75,644 Ordinary Shares have been subscribed for by Preference Shareholders under their option up to the 30th June, 1941.

WATCH-DOG.

(Half-yearly meeting 18th November, 1941, at noon)

Audited accounts for the half-year ended 30th September, 1941 :—

These show a profit on Revenue Account of Rs. 17.15,227-12-4. On transfer of this sum to Profit and Loss Account and after reserving Rs. 9,00,000 for Taxation (including Excess Profits Tax) there is a balance at credit of that account of Rs. 10,02,894-4-2. Of this the directors have transferred Rs. 1,50,000 to Depreciation and now recommend that the following dividends be paid, free of income-tax:—

	Rs.	A.	P.
On Preference Shares a the rate of 7 per cent. per annum (Rs|. 3-8-0 per share) ..	96,677	0	0
On Ordinary Shares at the rate of 25 per cent. per annum (Rs. 12-8-0 per share) ..	6,15,087	8	0
Total Rs. .	7,11,764	8	0

leaving a balance of Rs. 1,41,129-12-2 to be carried forward.

Under the Indian Jute Mills Association's supplementary agreement working hours remained at 45 per week until the end of August when the trade position warranted an increase to 50 hours per week. The Company's mills were permitted to make up time lost during a short strike in November, 1939 and consequently worked 54 hurs weekly during April and part of May. In July, work was interrupted by a strike of weavers which lasted for 2½ weeks and only part of the time lost has been made up during the half-year under review.

Prospects for the current half-year are satisfactory.

(Half-yearly meeting 25th November, 1941 at 3-30 p.m.)

Audited accounts for the half-year ended 31st July, 1941 :—

After transfering Rs. 4,203 to Insurance Reserve, Rs. 1,06,847 to Depreciation, providing Rs. 2,90,000 for Taxation and making sundry adjustments the results for the half-year show a profit of Rs. 1,70,183-5-7.

After bringing forward the balance of Rs. 93,620-6-5 from the last account there remains at the credit of the Profit and Loss Account the sum of Rs. 2,63,803-12-0 which the Directors recommend be applied as follows:—

Dividends on Preference shares for the half-years ending

	Rs.	A.	P.
31st August, 1937 at Rs. 3 per share ..	75,000	0	0
and 28th February, 1938 at Rs. 3 per share	75,000	0	0

the balance of Rs. 1,13,803-12-0 to be carried forward.

In accordance with the Indian Jute Mills Association agreement the mills have worked 45 hours per week and were closed for one week in the month of March, 1941.

Managing Agents.—Messrs. Andrew Yule & Co., Ltd.

Carry forward ..	24,463	25,017	23,624	—93,296

*Includes Rs. 1,10,000 provision for Taxation.

(Annual meeting 13th November, 1941 at 12 noon)

Audited accounts for the year ended 31st May, 1941 :—

A cane crushing License was granted by the Government of Behar and arrangements for the provision of finance having been made, the factory was enabled to crush 18,28,113 maunds of cane and produce 1,78,909 maunds of sugar. The average price paid for cane including cess amounted to As. 5-6.76 pies per maund landed on the carrier, compared with an average price of As. 9-10.6 pies per maund in the previous season. At the close of the accounts this entire production together with a part of the previous season's production remained unsold, since when, however the latter has been entirely sold together with a proportion of this season's production.

After providing for excise, depreciation and a Special Reserve of Rs. 50,000 and valuing sugar stocks at contract and|or market rates less a provision for deterioration due to climatic conditions, there is a profit of Rs. 1,09,446-1-8 for the year.

Adding to this the credit balance of Rs. 25,017-1-8 brought forward from the last account, there is a balance at credit of Profit and Loss account of Rs. 1,34,463-3-4 which the directors recommend should be applied as follows:—

	Rs.	A.	P.
Dividend of 10 per cent	1,10,000	0	0
Carry forward	24,463	3	4
	1,34,463	3	4

The financial adjustment between the Indian Sugar Syndicate Ltd., and its members is at present the subject of arbitration proceedings and the extent of the Company's liability to the Syndicate is still uncertain.

The factory worked satisfactorily throughout the season and is in good order and condition.

The prospects for season 1941-42 are obscure. The amount of sugar likely to be carried forward into next season is large and the Provincial Governments have not yet announced cane prices or the conditions under which factories will operate. Considerable reductions in the area planted under cane are, however, reported.

Managing Agents.—Messrs. Andrew Yule & Co., Ltd.

MARKET POINTERS

Controlling Wheat Prices:

Announcing their decision as to what the maximum price of wheat should be for purposes of price control, the Government of India state that they would fix it at Rs. 4-3. They however, make it clear that they have not yet worked out detailed plans for action to keep the price of wheat within a level which is not excessive.

A Press Note issued in this connexion states that the price of wheat after a temporary check on the news of the recent reduction of the import duty, has again shown a tendency to rise steeply, and market reports indicate that this is partly due to a widespread impression that the conclusion reached at the recent Price Control Conference was against interference with this upward movement. This impression, says the Note, is not correct. There was general agreement as to what would constitute such a level. The latest published quotation (Lyallpur, ready) before the conference was Rs. 4-3-1 per maund.

A **Calcutta Gazette Extraordinary** states: Whereas a public emergency has arisen in connexion with the production of cloth, the Governor has exempted for six months the following factories from the provisions of section 34 of the said Factories Act (hours of work), namely: All cotton spinning and weaving mills and factories.

India's Tea Quota Raised:

The Government of India has been informed that the International Tea Control Board has increased India's tea quota by 10 per cent. The Government of India has accordingly asked the Tea Licensing Board to work out details of allotment so that the necessary notification may be published in the Gazette of India.

* * * *

U. P. Cotton Crop:

The area under cotton in the U.P. is second forecast of cotton crop for 1941. The estimated outturn based on the reports of reporters is estimated at 68 per cent. of the normal, the average for the last ten years being 70 per cent. The condition of the crop is reported to be fair and cotton bolls have begun to appear although their condition is generally unsatisfactory.

State-Owned Railway Earnings:

The total approximate gross earnings of all state-owned railways for the period of 10 days ended October 20, 1941, amounted to Rs. 319 lakhs. This is Rs. 37 lakhs more than the approximate gross earnings for the corresponding period of 1940-41.

The approximate gross earnings from April 1 to October 20, 1941 amount to Rs .66.92 crores. This is Rs. 9.26 crores more than the actuals for the previous year.

* * * *

B.B. & C.I. Railway:

The approximate traffic returns of the B.B. and C.I. Railway for the period ended October 10 amounted to Rs. 38,48,000, an increase of Rs. 4,01,000 over the returns for the corresponding period of last year.

INDIAN JUTE MILLS ASSOCIATION

Orders have been placed by the Government of India with the Indian Jute Mills Association for various types of hessian cloth to a total yardage of 11,56,25,000.

The Committee at a special meeting recently held decided in view of this to increase the working hours from 54 to 60 per week with immediate effect; and members of the Association will be asked to sanction this at a special meeting of the Association which has been called for. morrow afternoon.

Application has been made to the Government of Bengal for the necessary exemption from the Factories Act.

THE RELIANCE JUTE MILLS CO., LTD.

NOTICE

is hereby given that the Seventieth Half-yearly Ordinary General Meeting of Shareholders will be held at the Registered Office of the Company, No. 4, Clive Row, Calcutta, on Friday, the 28th November, 1941, at 12-5 p.m., for the following purposes:—

(1) To receive the Directors' and Auditors' Reports and pass the Accounts for the half-year ended 30th September, 1941.

(2) To declare Dividends.

(3) To transact any other business that may be brought before the meeting.

On application, Dividend Warrants will be made out in favour of Shareholders whose names are in the Company's Books on the 13th November, 1941, or their Attorneys authorised to receive them. Holders of Scrip under blank transfer are reminded to send in their shares for registration in the Books of the Company as soon as possible, but not later than Thursday, the 13th November, 1941.

To facilitate the issue of Dividend Warrants, Shareholders are requested to insert share numbers and the nature of the shares held by them in their applications.

The Share Transfer Register of the Company will be closed from Friday, the 14th November, 1941, to Friday, the 28th November, 1941, both days inclusive.

By order of the Directors,
JARDINE, SKINNER & CO.,
Managing Agents.

Calcutta, 31st October, 1941.

HOWRAH MILLS COMPANY, LIMITED
