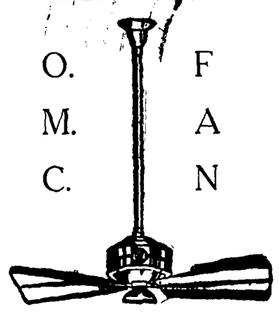
ISSUED WEEKLY

Vol. XXVIII. No. 20 SATURDAY, NOVEMBER 15, 1941 Price Re. 1

Insure and Increase Nation's Strength

Financial Independence of the individual is the measure of Nation's financial strength.



In this hour of world turmoil, all Life Insurance Policy-holders should take stock of their insurance cover and ascertain just how strongly they are fortified against the unpredictable that lies ahead.

And, those individuals who have not yet made provision for their protection need do so without delay and thereby contribute towards Nation's strength.

Be advised and write to-day to

WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

Easy conditions have continued to prevail in the money market, with interbank call money quoting ¼ per cent in Bombay and ½ percent in Calcutta. There are no borrowers at these rates, and there are plentiful lenders. This is rather surprising as treasury bill maturities during the current month are only Rs. 1 crore per week, while treasury bill sales are being effected both by tender and through the tap. It may be said that treasury bill sales will be exceeding treasury bill maturities by something like Rs. 2 crores per week in the course of November. That is to say, if the offer on the tender day remains at Rs. 2 crores and intermediate treasury bills continue to be sold. At the threshold of the current month, the Central Government thus find themselves with an assured surplus of at least Rs. 8 crores on balance in respect of treasury bill transactions during the month. It is also to be remembered that the Calcutta Savings Week will be inaugurated at the end of the month; and, from reports to hand, there are good reasons to believe that the realisations from the second defence loan on the first day of the week would be anything of the order of Rs. 5 crores. In other words, a betterment of the ways and means position by Rs. 13 crores is assured during November.

At the end of October, deposits of the Central Treasury with the Reserve Bank stood at the comfortable level of Rs. 22½ crores. In view of this opulence and in view of the prospect of considerable accession of cash balances during the course of the month, the Government have, quite properly, decided to allow a cut to take place in their deposits with the Reserve Bank, by withdrawal of rupee securities from the issue department. Rupee securities in the issue department have declined from Rs. 68.48 crores on October 31, to Rs. 60.48 crores on November 7. That is to say, rupee securities, presumably in the form of stocks created in connection with the sterling debt redemption scheme, have been taken over by the Government. This would have resulted in a contraction of currency for Rs. 8 crores if it were not for the transfer of sterling securities for Rs. 12 crores from the banking department to the issue department. In simple terms, there has been currency expansion for Rs. 12 crores against sterling securities and currency contraction for Rs. 8 crores against rupee securities. In the result, there has been a net expansion of Rs. 4 crores. As a consequence, active note circulation in India has registered a rise of nearly Rs. 5 crores to a new record of Rs. 279.95 crores.

These transactions are reflected in the banking department in the sense and to the extent that deposits of the Central Government have declined from Rs. 22.47 crores to Rs. 11.41 crores, and foreign balances from Rs. 75.41 crores to Rs. 64.38 crores. With the present addition to sterling securities in the issue department, the total is Rs. 167.66 crores, which compares with Rs. 140.50 crores on the eve of the execution of the sterling debt redemption plan. So far as foreign balances in the banking department are concerned, the figure on November 7 was Rs. 64.38 crores as against Rs. 78.35 crores on March 26. One may be sure that, with the receipt of sterling payments from the Treasury by the end of the current month, foreign balances will be well near the level of March 26.

With cash balances standing at Rs. 11.41 crores as on November 7, the Central Treasury is well able to look forward to a smooth functioning of the ways and means machinery, thanks to the substantial receipts expected from treasury bill transactions and from the Calcutta Savings Week. In this connection, we have to consider how far conditions in the money market will be affected by such a large drain both in respect of treasury bills and the defence loan. From this point of view, it is quite on the cards that the deposits maintained by scheduled banks with the Reserve Bank (which stood at Rs. 47.87 crores on November 7) may decline to somewhere near Rs. 40 crores by the end of November: It must be added, however, that the present scale of disbursements by the Government of India in respect of war orders and war commitments is such that the outgo from the coffers of banks may be more than made up by the release of funds in respect of war supplies. There is no ground, therefore, for supposing that there will be any undue hardening in money market rates. It is possible that short credits will be slightly more usuable; and this is a development that will be welcomed by banks.

An important feature of the financing of war industries and war supplies is that a good part of the funds required for these purposes is being found without recourse to assistance from banks. This causes what we may call a geometrical progression in the deposits of banks as against an arithmetical progression in advances made by banks.

Total amount accepted was Rs. 2 crores the average rate of accepted tenders being -|12|2 per cent. per annum.

Tenders for Rs. 2,00,00,000 of three months' Government of India Treasury Bills will be received on Tuesday November 18, 1941. Successful tenderers should make payment on Friday November 21, 1941. Other conditions are as usual.

Three months' Intermediates will be sold from November 12, 1941 to November 17, 1941 at Rs. 99-13-0 per cent subject to the conditions previously announced (viz., sales can be stopped at any time without previous notice if Government think it necessary).

Three months' Intermediates sold from November 5, 1941, to November 10, 1941, amounted to Rs. 1,36,75,000.

During the week ended November 7, 1941, Government of India Treasury Bills for Rs. 1,31,00,000 were sold in favour of the Issue Department of the Reserve Bank of India.

Finance Abroad

Thursday Morning.

WITH gold and silver ruling at fairly high prices since last week it might be fairly said that Indian markets are reacting in familiar fashion to war news. The importance of chances of a war in the Pacific is coming to be appreciated at any rate in Shanghai where a sharp slump in the stock market followed the news that U.S. marines were leaving China. The more important effects of the U. S. decision can hardly be seen in the measures taken by the Municipal Council (an anomalous but sovereign hybrid) to control a runaway rise in prices that threatens Shanghai's existence. If the French Concession has adopted the same measures, it must be due to the fact that in one respect at least geography is stronger than the divisions in Europe.

While Shanghai cables have received prominence in the press little has appeared to warrant the belief that there is any currency muddle over there. The Shanghai dollar rules steady, and whatever may be the upsetting effect of reports concerning the reinforcement of Japanese forces in Indo-China, it is apparent that the Chinese currency will be quite steady. Similar steadiness has characterised the Hong-Kong dollar which is quoting over 15d and is maintained in the Indian markets around Rs. 84½ for 100 dollars. The rate naturally reflects the pristine strength of the Hong-kong dollar, and if there is a relatively wide spread margin of Rs. 3¾ between the buying and selling rate for T.T. on Hong-Kong per 100 dollars the position should be rectified after the entry of Hong-Kong into the sterling area and the expansion of trade between India and Britain's Far Eastern colony. There has been quite recently mention of Hongkong taking Indian cotton and yarn instead of looking to Japan or Northern China. The importance of developing trade in textiles and increasing the internal consumption of cotton will be readily conceded. Hong-Kong may be hereafter linked more with the British Empire than with China. The main changes that may folow such a development are reduced fear of Japan and it is worthy of note that the present price of H. & S. Bank reflects a calmer frame of mind than was in evidence six months ago. If the field of choice for General Tojo has been restricted by Mr. Churchill's frank speech at the Mansion House there is no sign that Japan has warlike designs, even on the Burma Road. It is not known for some months what is the value of imports received in Rangoon and sent along to Lashio and thence into China. The figures must certainly show an increase on the last year as Russia is no longer a supplier of China's requirements by way of the old Silk Road. The Chinese government is said to have made independent efforts to connect the western province of Szechuan with Yunnan by a new road similar in nature and purpose to the Burma-Yunnan Road. The highway's importance is based on the fact that China can develop for the war, the riches of the Far West. It has been said that 30 million tons of iron ore and 200 million tons of coal await exploitation. A new Development Company with a capital of 70 million dollars has been formed by the Chungking Government. It is not only in Manchukuo that the technique of State aided companies is understood. The ultimate gains must be immense and for the immediate purpose of fighting Japan the advantage must be necessarily great, especially, as northern China's minerals have passed into Japanese control.

Though there has been a brief mention of negotiations concerning the Chinese customs loans it is clear that Sir O. Niemeyer has gone to China as the agent of the Treasury and not as the representative of the Council of Foreign Bondholders with which he is largely identified. The results of the mission are as yet unknown and they must recede naturally when General Mcgruder's mission has gone on from China to Burma to make another round tour of countries lying athwart Japan's southward push.

After the rise in Bank's deposits with the Bank of England there has been naturally a drop towards the end of October. Government securities are larger at the end of October while bullion is lower. The main feature is the rise in note circulation to over 699 millions. It is not hard to discover points of resemblance between the Reserve Bank statement and the Bank of England Returns in recent weeks. The Government's own deposits are reasonably large and the common pointer to inflationary influences is the expansion of currency, though there is a possibility and reduced velocity might in both cases offset the increase in total notes in circulation.

The dangers of inflation have often been referred to, particularly, by the authorities in the U.S.A. The Government may be prepared to spend not 45 but 58 billions but the public must not think of spending on the same lavish scale. A novel scheme credited to Mr. H. A. Wallace is that of forcing the people to buy savings stamps whenever articles e.g., consumption are bought. A schedule is to be drawn up and the use of luxuries is to be discouraged by imposing as a condition the purchase of a very large number of stamps. Congressmen are said to be thinking about trying this on the dog. that is to say the U.S. consumer. The idea attributed to Mr. Wallace shows that the Vice-President is not merely content to preside over the Senate and be groomed for the Presidency.

The other reference this week to the perils of inflation is in a letter from President to the Chairman of the Ways and Means Committee. There is a hint of additional taxation as a means of restraining individual expenditure and the reply of Mr. Doughton to the suggestion is more encouraging than may be imagined. Taxation is not frowned upon and the Congress which has voted for the Administration proposed amendments to the Neutrality Act of 1939 is not likely to coldshoulder revenue bills when they come. There is obviously need for more money for the U.S.A. has a new commitment in respect of Russia. M. Stalin has been promised by the State Department an interest free loan of 1000 million dollars repayable five years after the end of the war. In making the offer the U.S. President has referred to the desirability of selling such raw materials and articles as the U.S.A. may stand in need of and mentioned that the purchase money would be credited to Russia. Recent efforts to ship machine tools under special priority certificates are connected with the programme of all-out assistance for Russia.

Autobiographies are evidently dangerous for Noel Coward has again come into the news as having been mulcted in fine and costs for a breach of the Defence (finance) Regulations. That is the penalty of ignorance and unbusinesslike habits which were pleaded by the author of Bitter Sweet. U.S. securities may be sweet but failing to register as directed is more than ever bitter. That is by no means severe compared with the experience of the Northern farmer who believed in Proputty. and did not disclose the existence of his dollar securities.

The successful maintenance of exchange rates at the former level deprives one of chances of making any reference to the possibility of changes. The possibility of a declaration of war against Finland will lead inevitably to the depreciation of the Finnmark which was sadly affected by the war of 1939-40. Finland's refusal to accept the U.S. suggestion to drop out of the war will bring on her head the penalties of being cut off from all capitals except Berlin. There may be a chance to get hold of Suez Canal shares from the lucky Germans who have screwed them out of French sellers in return for their own money but the money will be lacking. Small consolation will be provided by the suspension of interest payments to the U.S.A. Finland still has a powerful friend in Mr. Hoover but she can't win out against the State Department which must be displeased by the chilling announcement from Helsinki that the war will go on because Finland is permanently allied with Germany against Russia.

The remarkable achievements of Weapons Weeks in Britain were described by Mr. Humphreys when he outlined the plans of the special organisation that has undertaken to make Calcutta and District realise that thrift is the essential virtue in wartime. Mr. Humphreys and Mr. Sen have only recently corrected a misapprehension as to the object of the committee. Buying defence savings stamps can be done over the counter at any Post Office. The committee is not concerned with applications and remittances. During the forthcoming Defence and Savings Week there will be certain temporary collecting stalls staffed by Post Office officials at which certificates can be purchased. There is also the Bengal Defence Savings Bureau at 14, Old Court House Street for the sale of savings certificates. The temporary stalls like the Savings Bureau will receive donations to war funds.

Furore Against Income-Tax

The administration of the Income-tax Law has of late come in for bitter, though still far from fierce, criticism in Indian commercial circles. Though it is true that no tax is quite popular and that direct taxes as a rule cause some heart' burning, there are certain features of present position which call for immediate consideration of the complaints and, not only redress of particular grievances but also a revision of basic principles of administration, where such revision appears to be necessary. It is difficult to pronounce with any confidence on the merits of the various issues that have been thrown up, as if all of a sudden, for consideration. But it is quite a different thing to recognise the depth of feeling behind the present unrest, the reality of the grounds for misgivings which are widely felt, the scope that certain aspects of the administration afford for injustice and unfairness and the wisdom of allaying feelings before the present deep dissatisfaction develops into a fierce resentment.

We have been careful, it will be noticed, not to prejudge the merits of the issues that are specifically brought up before the higher authorities and before the bar of public opinion. That is a task which it is in the fitness of things we should defer to a later occasion. But at the moment, it is more important to note that the present agitation is far from being stage-managed or got up by a few interested parties. One might think that the report about the assessment of as much as Rs. 36 lakhs on one individual fanned the flames of agitation. But at best, it is but incidental. No assessment, however high, or however zealous in the interest of the Exchequer it may be, can by itself persuade nearly all the commercial bodies in the city of Calcutta to combine together to pass a weighty resolution on this subject. For it was a joint meeting of the representatives of the Calcutta Gunny Trades Association, Jute Balers Association, East India Jute Association, Calcutta Hessian Exchange, Swadeshi Piecegoods Association, Indian Produce Association, Marwari Association, Marwari Chamber of merce, Moslem Chamber of Commerce, Bengal National Chamber of Commerce and the Indian Chamber of Commerce that passed the resolution requesting "the Government of India to protect the interests of the Indian mercantile community against such irregular and oppressive enforcement of the income-tax law and particularly against the racial discrimination practised in respect thereof."

The resolution quoted above characterises the administration of the income-tax law as irregular and oppressive and as being open to a charge of racial discrimination. Doubtless, the authorities will have a great deal to say in answer to this charge; and it would be unfair to take account of defence merely by speculating on what it would be like. But the idea that racial discrimination is being practised can at the worst be a misinterpretation of intent. For the facts which give rise to such a feeling are apparently above question. The genesis of this discrimination would seem to lie in the creation of the Central branch which, as a matter of plain fact, has been dealing only with cases of Indian assessees for months. We do not believe that it can be the intention of the authorities to separate cases on the basis of the nationality of the assessees. This must be an accident; but its fortuitous character is naturally questioned when non-Indian cases fail to be added to the Indian for a long time. The Indian commercial community cannot overlook the fact that the fact of segregation has not been altered; and when it makes that fact known to the public, the public naturally feels that the arrangement made was not accidental but was part of some plan to which the authorities mean to adhere.

It is worth while recalling here that the creation of the Central branch was a result of an amendment of the law providing for the appointment of Commissioners of Income-tax "not more than three in all, each to discharge, without reference to area, and to the exclusion of any Commissioner appointed for any area, the functions of a Commissioner in respect of any cases or classes of cases assigned to him by the Central Board of Revenue." The Act itself is silent on the points as to what kind or kinds of cases are to be dealt with by the new commissioners of income-tax. But in a speech in the Assembly Sir James Grigg indicated that the object of the alteration was "to enable a certain amount of co-ordination work to be done at headquarters, and not in relation to any territorial jurisdiction of the existing Commissioners." It is felt that what has since been done goes far beyond the declared intention of the change which the legislature authorised. The Central Commissioner of Income-tax is stationed not at the headquarters, but here in Calcutta, and the work he does is not of co-ordination, but of assessment to the extent it has been withdrawn from the jurisdiction to which it normally would belong. The Commissioner is thus instrumental for increasing the severity—and severity can be quite legal—of the administration and for a probably unintended and apparent invidiousness.

Changes in the machinery and the spirit of the administration in a matter like assessment of income-tax inevitably lead to hardships and serious misgivings. It cannot be denied that if the normal procedure and the usual machinery are superseded, the aim is to tighten control and render administration more vigorous. Such action can be defended on the ground that evasion is suspected to have been going on for some time and that the officers, who would be dealing with such cases in the normal course, are believed by the higher authorities to be incompetent or corrupt or both. But it is well to re-examine a few basic ideas in this matter. About corruption, one can hardly say anything. But evasion is on a different footing. It would be an impossible kind of puritanism in civic obligations to equate the milder varieties of evasion with theft or burglary.

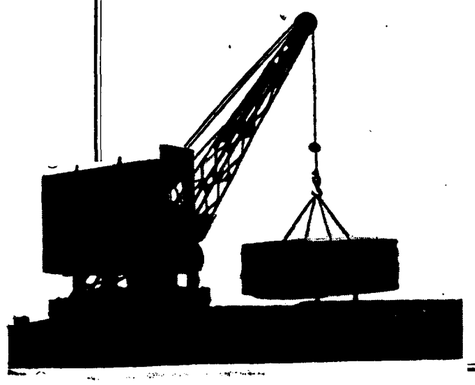
But income-tax officials can take such a view whether out of laudable zeal to serve the State or out of a mere desire for preferment. Evasion of income-tax can no doubt become a menace to the State, as, for instance, in the U.S.A., if the danger is not attended. But to this Scylla, there is the Charybdis of making normal political obligation a nightmare to important sections of society. In the case on hand, the transfer of picked cases from the hands of the usual authorities to a Commissioner is calculated to cause inopportune rigour of administration. It may also cause a sudden change in the methods of assessment of income, of scrutiny of accounts, of acceptance and appraisement of evidence. And while the new methods may have been well conceived, the justice of their application depends solely on the ability of the assessees to conform at short notice to the new requirements. An illuminating instance of how new methods may not fit easily is afforded by the report that respectable Hindu ladies are asked to state whether they are members of a particular exchange. When transfers involve a re-examination of cases **de novo** irrespective of the progress made already the assessee can justly feel aggrieved. Demands for new types of accounts and re-opening of questions deemed to be settled cause a great drain of human patience which is a highly limited quantity.

the bitterness felt by the commercial community against the administration of income-tax. A healing balm is clearly called for and never was delay more dangerous. But it is not merely a question of tact and sympathy in administration. For what with the E.P.T. added on to the income-tax and the overlapping of the spheres of enquiry and what with the obvious exigencies of war finance added to the Government's concern for State revenue, the desire to close the loopholes for evasion of income-tax is quite natural. But it should not be forgotten that the highest legal authorities have never questioned the view that income-tax law should be interpreted whenever there is doubt in favour of the assessee. Likewise, the officer, who deals with the case in the first instance makes the enquiries, looks into the accounts and examines the party concerned, is more competent to judge the facts of the case than the higher authorities. If it is a sound principle for the judiciary that on questions of fact, the lower court is normally the better judge, it is an equally sound principle for the administraton of the income-tax act as well. The exertion of authority from on high may well militate against that sympathetic administration without which income-tax may well become a remorseless imposition. We hope to devote more attention and, if necessary, a special supplement, to the issues which have now come to the fore.

The Function of State Railways of India—I

BEGINNINGS OF STATE POLICY TOWARDS RAILWAYS—INDIA AND ELSEWHERE

We publish below the first instalment of a special study of "The Function of State Railways in Indian National Economy" carried out by Mr. T. A. Ramunujam M.A. (Hons.). The problem has at the moment a topical importance as well in the recent decision of the Government of India to acquire the B.N.W. and R. and K. Railways.—EDITOR, I. F.



Special features of Indian Railway Origin.

It was ninety years ago, in 1849, that the first sod of an Indian Railway was turned. The earliest proposals for constructing railways in India were made five years previous to this. Just as in the case of co-operation and several other movements in India, so also in respect of railway communication, the initiative came from the top, the Government and not from below, the people. The first proposals for railway construction in India were submitted in 1844 to the East India Company in England by a British company headed by Mr. R. M. Stephenson, who later became Chief Engineer of the East Indian Railway, one of the two earliest Railway Companies of India. Unlike Britain, the United States of America, Germany and several other advanced countries of the World, railway construction in India was not the result of indigenous enterprise of capital. No railway service, on the part of the Indian peoples, traders and industrialists were so uncertain that even the enterprising promoters of railway companies in Britain insisted on a guarantee of interest from the Government. The Government did not, in that period, regard the railways as commercial concerns which should be self-supporting. Lord Dalhousie, for instance, who was largely responsible for giving the real fillip to railway construction in India said:—"After reading everything that I have seen written on the subject, and conversing, since I have been to India, with everybody who was able to give an opinion worth having on the question of railways in India, I have come to the conclusion that no one can safely say whether railways in this country will pay or not."

In another Minute written in 1853 he expressed the hope that the Indian railways would in the end be so far remunerative as to reduce the State of the onus of the guarantee. Should it prove otherwise, he maintained that a payment of a part of it might be "cheerfully borne" in view of the indirect advantages to be derived from railway transport. Among these were the increased facilities they afforded in the general administration of the country and in the greater mobility they gave to military forces. From the earliest times, therefore, a large mileage of unproductive lines were constructed for military and famine protective reasons. The line taken by the Government of India in the earlier days was that in the initial stages of railway development in the country such as India there are many arguments for paying more attention to the development of communicaions than to making the railway pay.

Those of Britain.

Britain, which is the birth place of steam railways, and, in fact, of all railways, is the one major country in the world which owes its railways entirely to private enterprise. It is true that the railways of the United States of America are also owned and operated by private corporations. But there is the difference that while the pioneers of American railway enterprise were given by the State free grants of the necessary lands, the British companies had to buy their lands from extortionate owners at unconscionably high prices. This accounts, in part, for the fact that the British railways were among the most highly capitalised in the world. At the close of 1843, ten years before the first Indian railway was opened, about 2050 miles of railway have been constructed and opened. The money for the construction of all these had, up till then, been chiefly found by groups of merchants in Liverpool and other large cities, who had hoped to derive benefit to their general business from the increased facilities of inter-communication, as well as a good return for their investment in the railway itself. Another feature of the British railways that distinguishes them from Indian railways is that they were begun towards the end of that very important stage in British economic history that is compendiously described as the industrial revolution. It may be held that it is a somewhat moot point as to which was cause and which was effect. However, coming later than many of those inventions which really revolutionised industrial production, it is apt to con-

clude that the railways were the result rather than the cause, in the first instance, of that movement. A third difference that strikes one when comparing the beginnings of railways in India and of those in Britain is the absence in the latter country of what are called "strategic" railways. Largely perhaps due to its insular position, there were no important military requirements compelling the construction of railways, which considering the traffic they would draw, would never pay. Further the British railways present a striking contrast to those of India in the opposition they encountered, in their earlier years, from rival transport agencies, namely, the canal companies and coach proprietors; often, this resistance had to be overcome by liberal bribes or by the purchase of their stock at ridiculously high prices. Even the trustees of roads maintained by income from toll-gates or turnpikes had, in many instances, to be compensated by the railway companies. To take one example: in 1838 the Edinburgh and Glasgow Railway Company had to pay £25,000 to the various trustees between the two cities.

Of American Railways.

The American railways are, like those of Britain, owned and operated by jointstock companies. The earlier ones were given land for the track freely by the Government. Besides, they gave the railway companies large acres of land on either side of the railway line so that the companies might sell them to settlers. All this encouragement was deemed to be necessary because they were taking a risk in investing large sums of capital in comparatively undeveloped areas. Large areas of territory were brougt under cultivation through immigration; and such an immigation was made possible by an adequate system of railway communications. It will be noticed in the Section on the contracts made by the Government of India with the early private railway companies that they were very much more generous in their terms. And this was so not because it was expected to bring large areas of fresh land under cultivation, but because of very different reasons.

Of Continental Railways.

The attitude of States in the continent of Europe towards their railways was wholly different from that of Britain and the United States of America. The latter was a negative or rather a passive policy. The former was something positive. In most of the European countries it was either State enterprise or private enterprise heavily subsidised and minutely controlled by the State. In France, for instance, the Government guaranteed the payment of interest on a substantial part of railway capital; the Government provided the land, constructed the permanent way, built stations, and leased them all to the companies; all that remained for the companies was to lay the rails and provide the rolling stock. This was necessary because France was a country containing only a few big towns and large centres of population; and there were many routes which were clearly expected to prove unprofitable. So the Government wisely made a distinction between these routes, called the "new system," and the earlier and more profitable ones, called the "old system"; and laid down different terms for the companies working then. While exercising a very close supervision over all aspects of railway operation, the French State, by granting concessions to private companies, had secured the construction, as far as possible by private capital, of a complete system of railways. In Germany the Government's attitude was even more "positive." In the pre-war period each State of the German Empire had its own railway system. The States used them not only for increasing their military efficiency but also for implementing their national fiscal policy, especially by forbidding low import rates, which may have the effect of neutralising their protective duties. They were also, quite often, compelled to grant low export rates. Mr. Winston Churchill told the Dundee Chamber of Commerce in December, 1918, that: "railways in private hands must be used for immediate direct profit; but it might pay the State to run railways at a loss to develop industries and agriculture. Germany was the one important country which in the 19th century and later systematically and deliberately put this view into practice. Except in the general sense that improved and new means of communication would naturally aid the development of agriculture and industries, it was not the policy of the Government of India, to use the railway system for stimulating the exports of the country or checking the imports. Losses in railway management were not due to the adoption of any such policy.

WARTIME INVESTMENT

WAR and its consequent economic crisis are not uncommon occurrences. But they are only passing phases in the history of mankind. They cannot affect LIFE INSURANCE POLICY under any stress of fluctuation. For its stability of value, convertibility into cash, suitability of borrowing, prospect of yield, exemption from income-tax and special estate value Life Insurance excels any other investment in WARTIME.

Editorial Notes

A half-year in Foreign Trade

The figures relating to British India's foreign trade in the first half of 1941-42 call for special notice. The increase under imports of food, drink and tobacco in this period as compared with the first half of the preceding year is as much as Rs. 2.73 crores. There has been an increase under all heads except fish excluding canned fish. The arresting feature in the period is the increase of Rs. 4.91 crores in the value of raw cotton imported into India. It is clear that the increase is connected with the expansion of imports from Kenya Colony as also Egypt this year. The increase is probably due in part to a rise in the average value per unit of import, but the major factor must be the increased demand for foreign cotton among India's mills. The increase should have led to a rise in the collections from the duty on raw cotton. It might be claimed that the doubling of the duty in 1939 has not prejudiced the textile industry whose interest in foreign cotton should grow alongside the expansion of the export trade in cotton manufactures. The chief item in the import, table at present is oils, vegetable, animal and mineral. The last class must obviously account for the increase of over Rs. 61 lakhs in the value of imports as compared with the first half of 1940-41. If the increase in imports has been occasioned by pronounced increases under raw cotton and mineral oils, little concern will be expressed by students of India's foreign trade. There is the usual contemporaneous expansion in the imports of manufactures. Over the six months ended September, increases have been noticed under dyestuffs, colours, drugs and chemicals as also metals. If the last is a symptom of the war effort, the very limited improvement in the value of imports under paper, machinery and millwork etc., marks an actual shortage of supplies. Perhaps the **piece de resistance** is the increase under vehicles excluding locomotives. The increase of Rs. 4.51 crores points to an increase both in number and average value and indicates also how rapidly India's trade with Canada and the U.S.A. has grown. The increase of Rs. 51.4 lakhs under cotton manufactures is bound up with the increase of nearly Rs. 3 crores in the value of imports of Japanese origin. Since the total imports in September were valued over Rs. 113 lakhs it is apparent that the freezing order has not extinguished commerce and if supplies based on old indents have been coming in it makes it difficult for us to see why prices should rise well in advance. The increase of Rs. 11.94 crores in the value of imports as between April and September shows that the shipping difficulty has not upset India's foreign trade to any extent.

The recurring improvement in exports indeed suggests that the shipping position is gradually improving. On the export side, the surprise is the further increase in the value of tea exports. Total exports valued over Rs. 14.88 crores under tea, form one of the most important items. The fall under cotton, namely, Rs. 1.6 crores is less than expected, but this again may be due to the upswing in commodity prices this summer. The table affords little support to the familiar conclusion that industrial expansion in wartime normally finds expression in the increasing percentage of manufactured exports. The increase of Rs. 1.08 crores in the total value of manufactured exports is inconsiderable as compared with the rise of Rs. 2.57 crores under grain and flour. There is, however, the striking increase in exports of cotton yarns and manufactures. As compared with the first half of 1940-41, the value of India's exports rose by Rs. 5.34 crores. This certainly overshadows the increase under rubber manufactures, paper and and metals. The increase is reflected again in the growth of trade with British East Africa. A welcome feature is the reappearance of the value figure against Italian East Africa. With the expulsion of the Italians from Addis Ababa, trade possibilities had to be considered. The only European countries with which trade is maintained are apparently Spain and Switzerland. There appears to have been a contraction of both imports and exports in the case of Spain while the increase under imports from Switzerland must be due to the costliness of such imports as can be had from a country still on the gold standard. The increase in the value of imports is largely due to the sharp rise in the value of imports from America. Total imports in the first half of 1941-42 are shown as Rs. 19.9 crores as against Rs. 12.4 crores for the corresponding period of 1940-41. The increase is accompanied by an equally rapid increase in the value of exports to the U.S.A. shown as Rs. 22.69 crores as against Rs. 12.6 crores in the first half of 1940-41. The increase is both healthy and rapid, suggesting that the possibilities outlined by the Meek-Gregory Mission have been exploited to the full. Imports from Britain and the Empire have risen by over Rs. 10.7 crores, while India's exports to the Empire have risen by less than Rs. 6 crores. There has been, as may be expected, a fall in the value of exports to Britain probably through a fall under jute and jute manufactures, though it must be mentioned here that the value of exports either of jute or jute manufactures is not given in the monthly accounts published by the Department of Commercial Intelligence.

Promoting safety in Mines

In the second year of its existence the Coal Mines Stowing Board carried on the good work of checking underground fires in both the Jharia and Ranigunge fields. The report issued last month referred to the progress made in arresting the Kasunda and Jharia fires and in the grant of assistance to four firms already engaged in the task of suppressing fires. The promulgation of the draft rules governing the grant of essential assistance belongs also to the second year. It may be recalled that towards the end of last year

some dissatisfaction was expressed concerning the Board's proposals in this regard. The Board has decided to consider all requests for assistance by selecting such cases with the help of a small committee of experts. It is mentioned in the report that sixty-eight applications were received within the first three months of 1941. Additional staff to examine and report on the means of dealing with fire damage was secured and the Board's own revenue collected through an excise duty payable on consignments of coal by rail helped to keep things going. With a revenue of less than Rs. 10 lakhs the Board certainly did a great deal of useful work, illustrating once again that sandstowing is neither pointless nor expensive. The photographs in the report make it clear that the opinions expressed by the Coal Mines Committee have a strong basis. Now that the Board is prepared to provide both assistance and advice private mining companies will find the task of fighting fires below the surface lightened. Many collieries have taken advantage of the Board's offer to provide materials at pithead free of cost. No orders for compulsory stowing were issued last year indicating again that the principle of voluntary stowing on the basis of the cess levied from May, 1939 is accepted generally. The progress of protective works in the Kasunda and Pathardih areas is the main justification of the Board's existence. The danger near the railway line is known to have receded. In its third year the Board will doubtless have to consider more applications for loans etc. from collieries desirous of carrying out sand-stowing, and its scope of usefulness will naturally widen. As the Board contains representatives of the mining industry and the Mines Department, its representative character has been recognised quite early. The Board's recurring expenditure absorbs only a relatively small part of the annual income, and it appears worth mentioning that towards the end of the year, a substantial sum lay to the Board's credit.

Working Hours in Mills

In its effects on labour conditions and standards war often turns out to produce the opposite of what was originally assumed. If one were to go by the prompt exemption given by the Bengal Government to both cotton and jute mills in the Presidency to work more than 54 hours per week it may be plausibly said that it is a step backwards. But due regard must be had to the circumstances that led to the suspension of the rules under the Indian Factories Act. Since the Provincial Government's discretion is limited by Central legislation it may be said without reserve that the decision has the implicit sanction of the Government of India. It is the Government of India which is interested in the prompt execution of the sandbag orders both for its own purposes and those of the British Government. The 54 hour week is in abeyance in Bengal's jute mills in accordance with the decision of the Committee announced last week with reference to the provision of 11.56 crores yards of hessian for Government's requirements. The hours for working in cotton mills were extended earlier in order to enable mills to satisfy the demand for cloth. Such an extension of hours has also been allowed in Bombay where not all mills have as yet embarked on double shift working, and it might be reasonably contended that the addition to working hours should be tried only after double shifts are the rule. The concentration of the jute industry makes it relatively easy to secure an addition to the usual working week. If the main recommendation of the Whitley Commission is now swept aside, the Indian worker retains all the other advantages secured since 1934 by legislation. The Workmen's Compensation Act and the Payment of Wages Act ensure important advantages, and the local Government, in permitting authorised infringement of the rules governing hours in cotton mills and jute mills, has not permitted any other encroachment on the worker's rights. Whatever might happen in Europe the Indian worker still retains his rights and privileges and a Government which pays promptly an additional allowance for low-paid railway employees is not likely to miss the importance of carefully restricting the extension of working hours. In all the major industries except cotton and jute the old principle of a 54 hour week is adhered to, and the usual overtime allowances are retained where it is desired to secure any increase in output desired for the nonce. The careful adjustment of the hours rule to prevailing conditions marks the Bengal Government which must have noted in this connexion the views of the jute mill industry on the question of higher prices for hessian. Since August the jute mill industry has been altogether free from labour trouble, and one may argue that the addition to hours of work bringing in its wake higher wages will be welcomed. The cold weather should be a mitigating factor in this case as also of cotton mills.

Health in Wartime

India in the war period has enjoyed, all things considered, reasonably good health. That appears to be the main conclusion of the 1940 report of the Public Health Commissioner. The report, published last week, in stressing the reduced prevalence of common epidemics utters warnings against defective or late treatment. A suggestion made as regards setting up Provincial and regional laboratories to help improved diagnosis was referred to in our New Delhi letter last week. There is also reason to presume that the standard of diagnosis requires raising through other means, and the support of the Central Advisory Board of Health should lead to the early acceptance of Colonel Cotter's suggestions. If India has escaped any visitation of nature and the annual mortality figures were unaffected by the war, there is no reason to argue that conditions are wholly satisfactory. The Commissioner has pointed to the incidence of tuberculosis to make out his point that over-crowding is a cause of disease. The observations connected with the lack of town planning and the survival of slums are addressed as much to the Municipalities concerned as the Governments which may claim that all progress is held up by the war.

If India has taken precautions against that dangerous immigrant, Yellow Jack, there is the mortifying fact that malaria control measures have suffered through neglect. The representatives of the Rocke feller Foundation have complained that local co-operation is inadequate and in Madras at any rate, it has been felt that the policy as regards the study and control of malaria has been reversed. It is clear that, if the Provinces delay or dawdle, a much greater setback in the field of public health is likely to occur. The suggestions of the Advisory Board may not be accepted or carried out, but there is admittedly justification for the view that it is only by Central direction that Provinces can be made to do their work. The fact brought out in the report, that railway workers suffer less than other classes of the population, is one to consider deeply. The same facilities, immediate and reasonably adequate for treatment must be secured. That the prison population enjoys better health than the law abiding sections may not be an inducement to crime. But it is admittedly a reflection on the administration. The continued prevalence of epidemics, the drain on the medical profession's personnel through the war like the high cost and scarcity of medicines, are obviously retarding factors of which due note must be taken in assessing what harm has been done up till now. The Commissioner's report cannot be made to yield the same conclusion as the favourable mortality experience of Indian life insurance companies in the past year. If the Government of India showed more interest in a probable disease, like Yellow fever coming through air traffic, rather than in actual ailments, it did not fail to record the recommendations of the Advisory Board on such subjects, as compulsory inoculation against cholera. A more serious omission is the absence of any reference to the question of nutrition. That the low expectation of life and reduced vitality are governed by defective or insufficient nutrition is accepted. That the Government of India has so far failed to indicate the proper line of diet reform or the correct balancing of diets can be inferred from the lack of mention of the subject. Though the Indian Research Fund has financed investigations and made known much useful data, the actual work of spreading right knowledge about food has been ignored. That nutrition suffers in wartime is widely known and the prevailing prices like the temporary shortages, arising in part from the purchases of the Central Provision Office, may have been the cause of much avoidable suffering. The Government of India's responsibility for such conditions is unacknowledged, and it would be perhaps correct to say that India's health was, subject to various qualifications and by local standards satisfactory. If millions have not perished through the war, the high death rate is as effective as war.

Australia's Industries

Conditions in Australia have remained satisfactory according to the latest monthly letter a Bank, the Dominion's national income bids fair to rise to £1,000 million and this should help to pay for the war. The tendency to make libaral use of bank credit is one based upon a desire to maintain the standard of living. Overseas trade has been well maintained, and financial conditions support the expansion of industrial enterprise. The metal industries are busy, and it is only in the pastoral districts and dairy industry that there was shaking of heads over the adverse weather. The secondary industries in New South Wales were stated to be doing well and employment generally showed an increase. The stock-raising industry in Queensland was reported to be in a healthy condition and interest shown in flax growing corresponded to efforts made in the South to try the new crop. The State looks forward to a balanced budget, according to the Governor, who pointed to the fall in unemployment and the advance in the basic wage to £4-9 per week as evidence of continued prosperity. In South Australia the agricultural situation was better than in New South Wales or Victoria. The seasonal outlook is said to have improved in September. The barley crop has been held for sale. The building trade was busy and the demand for labour in all industries was keen. The State budget for 1941-42 provides for a small surplus as revenue has kept rising. There have been

concessions to taxpayers. In Western Australia the flax crop and the dairy-making business were flourishing. The break in the drought helped agriculture, and the decrease in all livestock except pigs showed that the State had practised concentration. Flax appears to have made headway in Tasmania where mills already established are processing the 1940-41 crop. The quantity of current supplied to both the Hobart and Launceston Areas has shown since 1940 a significant increase. The woollen industry claims a larger proportion of the clip than ever. The wool industry is prepared for the postwar changes. An enquiry into the situation has been undertaken. Australia exports wool and tops. It has been reported that woollen mills including scouring plants total 96 with the largest number of the total distributed in Victoria. It is believed that owing to heavy Government orders and brisk export trade, the offtake of raw wool by Australia's own mills will attain record propositions. The current year's clip should not be hard to sell, and arrangements have been made for the appraisement of two million bales before the end of the year.

The improved industrial situation explains the improved tone of the stock exchange. It has been noted that leading shares and bonds alike have risen since August. The shares of less well-known companies secured considerable attention among investors who appear to show greater faith in the profit-earning capacity of smaller companies in the war period. The trend of prices has certainly favoured the holders, and in spite of restricted turnover, it has been apparent since August that prices will keep rising. The leader in the uptrend has been Broken Hill Pty. which in spite of rather abrupt mention of nationalisation, appears to be branching out in many directions. It was stated at the annual meeting that the company had developed a bullet-proof steel making Australia independent incidentally of certain expensive alloys now hard to get. It has been said that the Government would save half a million through the B.P.H. achievement.

Australia's efforts to produce aluminium have naturally attracted as much attention as the local production of aircraftt. The Government is known to be ready for an expenditure of £11½ million for [illegible] equipment to get the aluminium plant going. Australia's intention to use local bauxite is in line with the decisions to develop iron and steel. With copper and magnesium available it is expected that the commonwealth would become self-sufficient as regards this essential metal. The Australian Aluminium Company's new works, were recently producing sheets out of imported ingots.

In spite of the fall in wheat production in 1940-41, conditions must be taken as satisfactory. The fact that the last harvest yielded 82.64 million bushels with an average yield of only 6.64 bushels per acre has not upset the belief that the commonwealth has fewer problems.

U. S. Survey

The warnings given against inflation by the authorities in the U.S.A. confer interest on the analysis of business conditions in August. Credit was abundant; while bank reserves fell the currency in circulation increased. The concurrent rise in prices presented a problem for which the regulation of consumer credit was deemed adequate. Bank deposits rose, and their reserves with the F.R.B. naturally increased. The Treasury was a ready borrower, and between the rise in reserve requirements and the enlarged offtake of funds by the Treasury, the excess reserves had melted to the lowest point noted since December 1939. The reduction in gold imports throughout this year implied that less bank money would flow out under that head. Business activity stimulated the circulation. The increase under coin and notes up to the denomination of 20 dollars showed that retail trade was brisk. The Government borrowing programme led to the new type of tax anticipation deposits. The procedure under which the Government takes deposits from its citizens before the taxes fall due has been described previously. Banks have helped the new type of Treasury borrowing and the result was a fall in usual borrowings through Treasury Bills. With one of the familiar outlets closed in part, U.S. banks were driven to increase Advance. In spite of the increased purchases of securities, the banks increased their loans by 169 million dollars in August. The continued facility of obtaining money, if it has helped the companies engaged on defence production, led to the feeling that wages and prices alike would keep rising. The rise in giltedged sustained that feeling though a restraining factor was the drop in company earnings during the second half of 1941. The drop, however, furnished evidence of higher prices and wages as also of higher liability for taxation. Net profits of 511 corporations for the first half of 1941 show an increase of 22 per cent on the profits returned for the first half of the previous year. The improvement is not confined to the iron and steel, rubber and other industries connected with the defence programme. The improvement supported the rise in loans since banks would become more responsive to requests in a period of rising profits. Railroads again benefited substantially and in spite of subsequent statements about replacement and renewals as also excessive demands on the carrying capacity, it was clear that they enjoyed the best profitable period since 1930. The profit record can be referred to disprove the report that Hollywood is in the grip of a depression or that the automobile industry, which faces as from next month a severe cut in outbut. experienced quite satisfactory conditions in the first half of 1941. There is, however, the outstanding fact that industrial production generally rose to 162 percent of the 1935-39 average and the U.S.A which claimed that 213 furnaces were in blast was headed for a rise in steel output thhough production was not up to cent per cent of capacity, estimated at 86 million tons per annum by the American Iron and Steel Institute.

Shree Yuvraj Sugar Mills, Ltd.

Readers will not miss the outstanding points of the prospectus published to-day. Such good wine as that offered by Shree Yuvraj Jammu and Kashmir Sugar Mills hardly needs any bush. Little hesitation will, therefore, be experienced in commending either the Preference or ordinary shares of a company, both privileged and promising. The industrial possibilities of Kashmir and Jammu perhaps the largest of Indian states, have not been widely appreciated. That they are great must be inferred from the testimony of Sir Louis Dane when he discussed the chances of setting up various industries with the help of hydro-electric power in the State. The flotation is, therefore, to be welcomed by those who look forward to the progress of Kashmir under its present Ruler and his Prime Minister. The concessions secured by the promoters attest the interest of the Maharaja's Government in the success of the company whose shares are now offered for subscription. Investors should not omit to take note of the fiscal and other advantages, assured for a term of five years and liable to renewal for a further term. The importation of plant and also raw materials for

A copy of this Prospectus has been filed with the Registrar of Joint Stock Companies, Jammu and Kashmir State and with the Registrar of Joint Stock Companies, Bengal.

SHREE YUVRAJ JAMMU & KASHMIR SUGAR MILLS, LIMITED

(Liability of the Members is Limited) (INCORPORATED UNDER THE JAMMU AND KASHMIR COMPANIES ACT XI OF SAMVAT 1977)

AUTHORISED CAPITAL Rs. 25,00,000

Divided into 5,000 Six per cent Cumulative Preference Shares of Rs. 100 each, 1,98,500 Ordinary Shares of Rs. 10 each and 15,000 Founder Shares of Re. 1 each
Present Issue 5,000 Six per Cumulative Prefernce Shares of Rs. 100 each, Issued @ a premium of Re. 1 each and 1,00,000 Ordinary Shares of Rs. 10 each which are offered for public subscription

15,000 Founders Shares of Re. 1|- each are to be issued to Messrs. Karam Chand Thapar & Bros. Ltd., credited as fully paid up with a view to reimburse them for the expenses incurred and in consideration of the services rendered by them in connection with this Kashmir Sugar Mills project.

In terms of Clause 2 of the Agreement with His Highness' Government of Jammu and Kashmir, 49 per cent of each of Ordinary and Preference Share Capital, issued as above, reserved for subscription by the State subjects of Jammu & Kashmir State for a period of 3 months, after the date of issue of this Prospectus. In case the State subjects do not take up the full 49 per cent of the Ordinary and Preference Share Capital, referred to above, reserved for them, the balance of 49 per cent remaining unsubscribed within the aforesaid period would be issued to the applicants, other than State Subjects.

The Company is also issuing in addition to the Share Capital mentioned above 1,000 5 per cent Mortgage Debentures of Rs. 500|- each.

These Debentures will be secured by a Trust Deed constituting, a first charge on the lands, buildings and machinery of the Company, and with a floating charge on all other assets (both present and future) of the Company, but not its stocks or stores, either present or future, of raw materials, sugar, sugar products, molasses and other bye-products, chemicals and other stores, and shall be redeemable after 7 years from the date of their issue with option to the Company to redeem them at any time after 5 years from the date of their issue on giving 3 calendar months' notice of its intention so to do. The debentures are being issued at a premium of 1 per cent. The Debentures would be bearer bonds and carry interest at 5 per cent per annum, the interest being payable half-yearly.

THE FULL ISSUE OF DEBENTURES AS ALSO OF THE ORDINARY AND PREFERENCE SHARES CAPITAL HAVE BEEN UNDERWRITTEN.

RIGHT IN RESPECT OF PREFERENCE, ORDINARY AND FOUNDER SHARES

The Articles provide that the Preference Shares shall have the right to a Preferential Cumulative Dividend (income tax free) at 6 per cent per annum on the capital for the time being paid thereon and shall have the further right to participate in the profits available for dividend to the extent of 20 per cent of the surplus of such profits remaining after payment of 12 per cent dividend each on Ordinary and Founder shares for that year, but so that the dividend payable on Preference Shares shall not in respect of any one year exceed the maximum 8 per cent inclusive of 6 per cent Preferential Cumulative Dividend. The said Preference Shares shall further confer the right in winding up to the payment of arrears of Preferential fixed dividend, whether declared or not upto the commencement of winding up, and the amount of capital paid up, in priority to the Ordinary and Founders Shares but shall not confer any further right to participate in the profits or assets of the Company. The Ordinary and Founder Shares shall rank *pari passu* for dividend purposes and rights in winding up.

The right of voting in the General Meeting is 'one' vote for every Ordinary and Founder's Shares, the Preference Share having no voting right.

PROSPECTUS

I. *Objects of the Company.*—The Company has been formed for the purposes set out in the Memorandum of Association and in particular with the object of establishing and carrying on business of manufacturing sugar and all its by-products and cultivation and development of sugar cane.

Jammu and Kashmir State under the present rule and administration offers great scope for the development of natural resources of the State. Development in the Sugar industry in the Indian States has perhaps been slow compared to that in British India as the result of the lead given by the Industrialists in India but the recognition even though late of the possibilities has its own advantages.

The Government of His Highness the Maharaja Bahadur of Jammu and Kashmir State has been pleased to grant a number of concessions to the Company. The details will appear from the Agreement but the more important ones are enumerated hereunder:—

(*a*) That the import duty on British Indian Sugar shall be maintained for a period of 5 years from the date Company's sugar factory starts working, at a level of -|8|- per maund higher than the rate of excise duty to be imposed on the sugar manufactured at Company's factory.

(*b*) That at no time the excise duty on the sugar manufactured by the factory shall exceed the import duty on Indian sugar.

(*c*) That the import duty on foreign sugar other than Indian sugar shall in the minimum be maintained at the same level as is from time to time in force in British India.

(*d*) That the State Government shall allow the Company to import from British India into their territory free of customs duty, machinery, plant and other equipment required for the proposed Sugar Factory.

(*e*) Exemption from payment of customs and octroi duty for a period of 10 years, in the first instance, on imports of raw materials, as detailed in the Agreement, required for the bona fide use of the Factory.

The State Government will review the position with regard to concession (*a*) at the expiry of 5 years in the light of the conditions then prevailing and may, if necessary, extend the period by another 5 years.

Most of the sugar in the State comes from the Western United Provinces. The difference of -|8|- per maund between the Excise and Import duty together with the manufacturing profit, and other advantages assures the possibilities of a reasonable profit for the Company in the very initial stages. It is expected that within 5 years the factory will be thoroughly established and if circumstances remain normal the withdrawal of the advantages of -|8|- per maund between Excise and Import duty may not in any way be expected to affect the earning capacity of the Mills.

The factory site will be close to Ranbirsinghpura on the Sialkot Jammu Line, N.-W. Railway which is near to the sugar cane area, irrigated by the canal system. The Government of His Highness, the Maharaja Bahadur of Jammu and Kashmir has very kindly agreed to acquire lands for the factory and seed experimental farms under the State Land Acquisition Act, on application by the Company.

II. *Agreement with His Highness's Government of Jammu and Kashmir State.*—His Highness's Government of Jammu and Kashmir State has entered into an agreement with Messrs. Karam Chand Thapar & Bros., Ltd., in which very important concessions have been given by the State Government. The details of the important concessions granted will appear from the paragraph hereinabove referred to.

III. *Factory.*—It is intended to erect a Sugar Factory of latest design by either purchasing the plant of an existing Sugar Mill in India or by procuring the plant from overseas. Negotiations are in progress for acquiring a plant. It is intended to acquire a plant which will have the crushing capacity of at least 500 tons per day and will enable the factory to manufacture 1½ lacs maunds of sugar per annum.

IV. *Cane Prospects.*—The cane price as fixed in the agreement with His Highness's Government is 0-4-6 ex. field and 0-4-9 ex. factory gate. The land of Tahsil Sri Ranbirsinghpura, which is suited for sugar cane growing, is expected to be sufficient to meet the requirements of the factory. This area is very fertile and well irrigated and the company will be able to improve the quality of the cane with the assistance of the State Agriculture and Revenue Departments and with the researches in its own seed and experimental farms.

V. *Estimated Capital Cost.*—It is estimated that the present investment in machinery, plant, buildings, land etc., will be approximately Rs. 15 lakhs. The balance capital of Rs. 5 lakhs shall be sufficient as working capital of the Company.

VI. *Estimated Profits.*—Taking into consideration the present price as prevailing in United Provinces and Punjab, the Company on a production of 1½ lakhs maunds sugar expects to earn a really remunerative profit, after allowing for taxes, depreciation, interest on debentures and all other charges.

VII. *Preliminary Expenses.*—Messrs. Karam Chand Thapar & Bros. Ltd., are the promoters of the Company. The expenses of formation and reigstration of the Company and the other preliminary expenses exclusive of underwriting commission on sales of shares and debentures are estimated to be not more than Rs. 7,500.

VIII. *Minimum Subscription.*—The minimum subscription upon which the Company shall proceed to allotment is 10,000 Ordinary Shares of the nominal value of Rs. 10|- each. Applications have already been promised or received from the Directors, Managing Agents and their friends for the whole issue of Preference and Ordinary Shares offered to the British Indian subjects in accordance with the Prospectus (i.e., 51 per cent of the present issue of Preference and Ordinary Share Capital).

IX. *Contracts.*—The following Agreements will be entered into by the Company:

(*a*) Agreement with Messrs. Karam Chand Thapar & Bros. (Jammu & Kashmir) Ltd., for appointment as Managing Agents of the Company, the terms of which are referred to in this Prospectus under the head 'Managing Agents'.

(*b*) Agreement with Messrs. Karam Chand Thapar & Bros., Ltd., Calcutta, being an agreement for reimbursement of all expenses incurred and for services rendered by them, by an allotment of 15,000 shares of Re. 1 each credited as fully paid up.

X. *Qualifications and Remunerations of Directors.*—The qualification of a Director other than an Ex-officio Director or a Director appointed by special qualifications, is the holding in his own name or jointly with any other person whether as beneficiary or as Trustee, Ordinary Shares of the Company of the nominal value of Rs. 10,000. The remuneration of each Director for his services as such shall be Rs. 50 for each meeting of the Directors attended, first class travelling expenses and an allowance of Rs. 20 per day for the days spent for attending the Directors' Meeting.

The Managing Agents are entitled to nominate one-third of the total number of Directors for the time being. They will be Ex-Officio Directors.

XI. *Managing Agents.*—Messrs. Karam Chand Thapar & Bros. (Jammu & Kashmir) Ltd., have been appointed as first Managing Agents of the Company from the date of the incorporation of the Company. They (or their successors or assigns) shall be entitled to remain and continue in the said office (unless it be resigned by them) for twenty-five years from the date of incorporation of the Company and thereafter until they be removed therefrom by an Extraordinary Resolution of the members of the Company entitled to vote, passed at an Extraordinary General Meeting to be convened for the express purpose and of which meeting six months' notice shall be given to each member at his address on the register of members and not by advertisement and at which meeting not less than half the number of holders of both Ordinary and Founder's Shares of the Company for the time being issued (such holders being duly entitled to vote) shall be present and not less than 50 per cent., of the paid-up Ordinary and Founder's Share Capital of the Company for the time being, be represented.

The Managing Agents shall be entitled to the following remunerations:—

1. An Office allowance of Rs. 1,000|- per mensem.
2. A Commission of 10 per cent on the net profits of the Company calculated after allowing all the usual charges, interest on loans, and advances, repairs and outgoings, but before charging any depreciation in respect of assets of the Company and without any deduction in respect of Income Tax, Super Tax or any other tax or duty on income revenue or for expenditures on capital account or on account of any sum, set aside, in each year out of the profits, for Reserves or Reserve Fund.
3. A Commission of 1 per cent on all sales relating to the business of the Company.

The said office allowance payable to the Managing Agents shall be exclusive of and shall not include any remuneration, salaries or wages which shall become payable to the Managers, Secretaries, Agents, Clerks, Servants, Workmen, Brokers, Bankers, Solicitors, Auditors, Engineers, Experts or other officers or employees who may be employed by the said Managing Agents for carrying on and conducting the business of the Company nor any rents, taxes, costs, postages, printing or stationery or other office incidentals and expenses of manufacture all of which remuneration and salaries, wages, costs, charges and expenses shall be borne and paid by the Company.

XII. *Interest of Directors.*—Mr. Karam Chand Thapar is the Managing Director of Messrs. Karam Chand Thapar & Bros., Ltd., and Mr. Brij Mohan Thapar is the Managing Director of Karam Chand Thapar & Bros. (Jammu & Kashmir) Ltd., and are interested accordingly.

XIII. *Underwriting Arrangements and Commission.*—The underwriting arrangement has been concluded with Messrs. Mugneeram Bangur & Co., well-known Share & Stock Brokers and Member, The Calcutta Stock Exchange Association, Ltd., of 7, Lyons Range, Calcutta. The underwriting commission payable to the underwriters is 2½ per cent in respect of Ordinary Shares and 2 per cent on the nominal value of Preference Shares and Debentures.

The entire issue of Share Capital and the debentures has been underwritten by the Underwriters.

XIV. Copies of Memorandum and Articles of Association of the Company and the agreements, referred to above, can be inspected at any time during usual business hours at the Registered Office of the Company or at the Office of the Solicitors of the Company, Messrs. Dutt & Sen, 6, Old Post Office Street, Calcutta.

A copy of the Company's Memorandum of Association is attached.

XV. *Application for Shares.*—The amounts payable in respect of Preference and Ordinary Shares and Debentures are as follows:

	per share.
(1) Preference Shares on application	Rs. 51
(2) Preference Shares on allotment	„ 50
(3) Ordinary Shares on application	„ 5
(4) Ordinary Shares on allotment	„ 5
(5) Debentures on application—	per Debenture.
full amount i.e.,	„ 505

Applications for Ordinary and Preference Shares and Debentures are to be made on the forms which may be obtained at the Registered Office of the Company or from the Head Office of Messrs. Karam Chand Thapar & Bros. Ltd., and its various Branches, or from the Lahore Head Office and the Calcutta, Jammu and Srinagar Branches of the Punjab National Bank Ltd., or from the Head Office and Branches of the Jammu & Kashmir Bank Ltd. or from the Office of Messrs. Mugneeram Bangur & Co., the Underwriters. Applications are are to be sent to the Registered Office or deposited with the above stated offices of Company's Bankers together with the remittance of the amount payable on application. In case where no allotment is made, the deposit will be returned in full and where the number applied for, the balance of deposits will be applied toward the amount the number of shares alloted is less than remaining payable on the shares alloted.

The shares will be issued subject to the Memorandum and Articles of Association of the Company. A copy of same can be inspected during usual business hours at the Registered Office of the Company or at the Office of the Solicitors of the Company, Messrs. Dutt & Sen, 6, Old Post Office Street, Calcutta.

XVI. For the purposes of subscribers from British India the following further particulars as required by Section 277B of the Indian Companies Act VII of 1913 are given below:

(*a*) The objects of the Company are those specified in the Memorandum of Association a copy whereof is annexed to this Prospectus.

(*b*) The Instrument constituting the Company is the Memorandum of Association and the Articles of Association of the Company and the same can be inspected at the places mentioned in para XIV of the within Prospectus.

(*c*) The Company was incorporated on 4th October, 1941, in Jammu and Samvat 1977, which may also be Kashmir Companies Act XI of Sambat 1977 which may also be inspected at the places mentioned in any place of business in British India so far.

(*d*) The Company has not established para XIV of the Prospectus.

My last week's Gossip on economists and economic studies in India should remind us that the provision for purposive economic research in this country is woefully poor. Economic research, let us remember, is the concern equally of a number of different factors—the Government, the business community, the public, the universities and the academic bodies and, last but not least, the politicians and the political bodies. All these are equally interested in the progress of economic studies, though, of course, in the use they may make of their results, there is a vast difference. These two, equal interest in the progress of research and different motives in the utilisation of the results, are the principal factors determining its fate. If economic studies are to be pursued on sound, constructive lines, we must know firstly, what are the existing conditions, the strong points and the weak points therein, secondly where the various interests clash so far as our purpose is concerned, and where they converge and thirdly, how we can minimise the conflict and make the most of the agreement.

The Committee of Economists will sooner or later find themselves face to face with their own inadequacies and the unsatisfactory nature of economic intelligence in the country; that is, if they are inclined to take their work seriously and if they are allowed to apply themselves to the problems which the Inter-Departmental Committee has been asked to tackle. If all the present talk of post-war economic reconstruction is not mere eye wash, then the Government must recognise that the Committee's work is far from being clear-out, that its job is to carry on a continuous enquiry into a certain set of problems from a particular angle of vision, to form ideas which shall by no means be rigid or final. For, the Committee are dealing with a number of variables. It is their relation and not the quantity of each factor that is important. If it is "demobilisation" of industrial or technical labour recruited for war purposes, it is not as if there is only one solution to it. You can suggest some system of pension for it, make the pensions the first charge on the revenues of the State and leave the taxpayer to pray for relief through the demise of the pensioners. If you look at it that way, neither is the problem a problem, nor the suggestion a solution. The problem arises from the possibility of finding new work for them in other lines of productive activity appropriate to peacetime and helpful to the organic growth of the national economic system. What are the different kinds of industries into which demobilised labour can conveniently and profitably fit? How do such industries, again, fit into the structure of Indian industry as a whole? What is the place of such an industrial structure in the national economy? And what sort of relation will this economic system bear to world economy? There is a process of judging each measure by its relation to the total scheme and bringing the requirements of the totality to bear on the details. It is the need for such a process that makes of every little task a truly economic problem. Otherwise, an nth rate accountant could be asked to count the costs of each measure and submit his estimates to some underling of the Finance Department. If the task of the Committee is to find the different sets of conditions in which demobilisation will cause the least hardship to the persons concerned and to the State, then an economic problem can be said to exist. I say, different sets of conditions, because there is no use thinking of only one set of conditions when events may prove those conditions to be, in practice impossible of attainment. Our national economy is to-day in a state of flux. It will be much more so as the war goes on and peace finally dawns on the world. In the immediate post-war years every national economy will be misshapen, but it will press on every other and tend to distort it. It is in this universal distortion of natural shapes that, post-war reconstruction will have to pass through its first phase.

Let us consider another vital circumstance which is relevant to this question. In the immediate post-war years, India will be in the first flush of democratic self-government. Post-war economic reconstruction, which is now viewed as one of liquidating the Supply Department and the commitments it has entered into, will be looked upon by the representative governments as a problem of the national economy and the amelioration of conditions of life for the masses. We should know what a National Government will say to mere routine plans of pensioning off the technicians, disposing of war industries by bringing them under the hammer, writing off surplus stocks and throwing new private industry to the wolves of international competition in days of dumping and depreciated currencies. Such

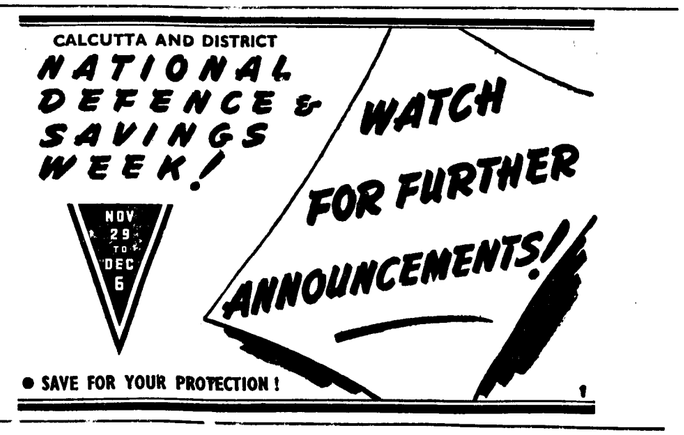
schemes will find their way straight to the W.P.B. Perhaps, officials of the present regime—even the present regime is not altogether the old one—will refuse to consider such a prospect or be dismayed by it. But the Committee of Economists ought to consider itself quite differently placed. They would be setting a poor value on their academic reputation if they give the imprimatur of their approval to schemes which the changes in world economy will render useless or which will not be worth a moment's consideration at the hands of an enlightened national government.

Any scheme of post-war reconstruction, therefore, must reckon with the most disconcerting changes in world economy and with the objectives which any representative government in this country will naturally set before itself. There are, therefore, two broad divisions into which the study of post-war economic problems, from a scientific and national point of view as distinct from the limited, official one, may be said to fall. One is the relation between our national economy and that of the rest of the world. What sort of shape will world economy as such take in the course of the war? What place will the resources, aims and efforts of other nations assign to this country? What share of the total productive effort will be ours? There is another way of looking at it. The interest which foreign countries will feel in our economy is quite different from the interest we feel in it. Theirs is limited by the fact that they look at this country as a source of the goods they need and as a market for goods of which they have or may have a surplus.

Foreign countries cannot be interested to the same extent as we are in the provision of the necessaries and comforts of life for all sections of our population. It is true that an improvement in the standard of life and of living in this country might mean some amount of demand for foreign goods. But that works out in quite a different direction from that of meeting the just demands of the newly enfranchised masses of this country. There is thus a large sector of the national economy which is predominantly our own interest and in which foreigners are interested only indirectly and to a small extent. There is the smaller, but not for that reason the less important sector in which India and the rest of the world are closely bound up together. The two sectors are not unconnected. It is not as if the larger can monopolise our attention or that we can do what we please in the other. In national economic life many things are inter-connected; and if the strength of a chain lies in the weakest link then, it is the weakest link that calls for the greatest care. Any way the distinction between these two sectors is important for bringing about a certain kind of division of labour among the economists.

If this division is made, then we can expect each group to specialise on the problems appropriate to its sphere and concentrate in particular on the factors most liable to change during the stress and strain of the war period. The economic relations of India to the outer world in a period in which a representative and autonomous government is vigorously pursuing the ideal of a basic standard of living for the whole poulation is a subject by itself. Likewise the vast schemes and projects that would be needed to realise this ideal with a minimum of reliance on a world which is chaotic, whimsical, indifferent and at times even hostile world form a separate study by themselves.

SE—38



Now, what provision have we in this country for the continuous application on the part of competent men to the problems thus suggested? Economic study, even like the peasant in India, leads a hand-to-mouth existence. If the ratio problem is to the fore, we employ some hastily collected data and shout ourselves hoarse in denunciation of the government. If it is protection, we take advantage of the fact that no whip need be issued to send the whole country into one lobby. But we have left far behind the stage when we can determine our course of action merely in terms of opposition to the government. Considering the large number of strictly internal political and social problems, we must recognise that there is need for a well-endowed Institute of Sociology with a highly competent Director at its head and a large trained staff who will pursue these problems patiently, and in a highly detached and scientific spirit. As I said at the start, all the factors in the national life are equally interested in it. But because of this, the cause of social studies in India has been allowed to go by default. We cannot neglect it any longer except at our peril. The physical sciences have progressed in the face of neglect and opposition. But the social sciences cannot. I would so much like to see the Congress, the Federation of Indian Chambers and the Government, Central and Provincial, joining together to found and endow liberally a truly autonomous Institute of Sociology in India with special responsibilities in respect of study of the economic problems I have indicated. Every pie spent on such an Institute will return thousandfold to the country.

The pleasantest of portmortems is the auditing of accounts after a good night's work in aid of a good cause. The American Colony have certainly done Calcutta proud in making people fork out cheerfully Rs. 60,000 the proceeds of the jolly show that took place last Saturday at the Town Hall. One certainly expected something remarkable, but the organisers must have been agreeably surprised by the response of many classes of citizens to the welcome departure in entertainment, brisk, informal and heart-warming. The effect of streamlined publicity is the sum in the community chest. If a small colony, by no means alien, can produce a substantial sum in aid of the city's firefighting equipment, little need be said about what things can be hoped for when there is a repeat performance. But the Tamasha was unique in many ways and the response was an acknowledgment of what the U.S.A. is doing for countries standing up to aggression and has incidentally forged very strong links of both sentiment and business in this trying period. It is but proper to recognise that the colony's first effort in practical citizenship has done much to show that many things need to be done for making Calcutta capable of dealing with the danger from the air. The American Tamasha was in its way a singnal to citizens to remember that they have to prepare and it would not do to stop with tendering thanks to the organisers of the most varied and peppy show that thrilled Calcutta.

'EAVESDROPPER'.

A Banker's Suggestions

Economic essays from the pen of a banker are rather unusual for the literary banker is as yet unknown in India. It is therefore with high pleasure that one turns to the little volume entitled Economic Problems and Suggestions. Coming as breaks in the routine of a banker's life their writing must have given Mr. K. N. Dalal of the Nath Bank something of a busman's holiday. Their earlier appearance in the daily press and elsewhere should have interested many who will find that in addressing himself to the questions of the day, Mr. Dalal shows the marks of a keen and lively mind. A robust faith in small banks distinguishes many papers and the banking history of Bengal is elucidated. He shares the opinion of many that industrial banks are needed in India and can show many reasons for his opinion. Most of the papers deal with Bengal, and they go far to prove that finance, commerce and industry are not neglected in this Province by its natives. The suggestion made by Mr. Dalal in his final paper deserves to be commended. A federation or association of stock exchanges will be as much to the interest of the investor as the broker.

New Delhi, Nov. 12.

IMPORTANT developments which may well prove a turning-point in our political history have been taking place in New Delhi. It was at one time feared that as the new Indian Members of Government had no common aims or points of affinity,—in fact, some of them met for the first time here—it might take them some time to adopt a common policy and work together. The first two weeks of the Assembly session have brought the pleasant disclosure that the new Indian Members are pulling together admirably and exercising a remarkable influence on the Government's policy as a whole. The assurances given by Mr. Aney as Overseas Member on the subject of the Indo-Burma Agreement in the Assembly last week may be looked upon as the first fruits of the new policy and is also viewed as a direct result of the Indian majority in the Viceroy's Council. The position is so uncertain that one cannot say anything definitely about the prospects of success so far as the Government of India's efforts to modify the Agreement are concerned. But in Assembly circles it is regarded as no small gain that the introduction of the Order-in-Council has been indefinitely postponed and that the Government of India has agreed to reopen negotiations with the Burma Government for modifying the Agreement to satisfy Indian opinion. It is understood that as soon as the Premier of Burma returns from his European tour, consultations for sending another delegation to Burma will begin. Mr. Aney has been successful in persuading the Government of India to reconsider the issues involved in the Agreement in the light of public criticism and thereby inducing the Secretary of State also to defer for the present the issue of the Order-in-Council, but it remains to be seen how far Mr. Aney will be successful in his negotiations with the Burma Government.

One does not know yet how Mahatma Gandhi will react to the proposals now being made to him for resumption of parliamentary work. Nor is it known what will be the policy advocated by Pundit Jawaharlal Nehru and Maulana A. K. Azad. Still it is the view of Mr. C. Rajagopalachari and others that nothing short of the complete transfer of power at the Centre envisaged by the Poona resolution within the limits of the present constitution would satisfy the Congress. If a settlement is reached regarding the Centre there can be no difficulty in restarting the Ministries in the provinces on a similar basis, but if this settlement is not possible some other solution will have to be found for the provincial problem. No party is anxious to consider the Official Adviser system in the provinces. For reasons which are obvious, the appointment of non-official Advisers would only increase the difficulties without in any way assisting the resumption of constitutional government. It would appear that a formula has been suggested by certain important Congress leaders themselves which may be helpful as a temporary measure. It is suggested that the Congress party though it is in a majority, should allow the Opposition group or groups to form a Ministry on the understanding that though the members of the Congress party would be free to exercise their constitutional rights as elected members of the Legislature, they would not use their numerical strength to vote down the Ministry. There have been successful minortiy Ministries both in this country and in England. If there is mutual trust and goodwill this formula may help to bring about better understanding and pave the way for the summoning of Legislatures and the formation of Ministries. The reasons for the Congress refusal to accept office are clear. Unless their objections are removed they will not accept office, but it is urged by Congressmen themselves that rather than go on with official Advisers they might usefully have Ministries formed by Opposition groups. Several other formulas are also being discussed.

Important assurances were given by the Finance Member in his closing speech on the Income Tax Amending Bill. Referring to the hardships and difficulties of assessees who were subjects of Indian States, he said that the Government of India would do their best to pursue the subject and put these troublesome matters on a satisfactory basis. In the meantime the States Ministers who are now here in New Delhi are also considering questions raised by the amending Bill and may make future representations to the Government of India. They are not satisfied with the present arrangement giving relief for double income tax, not on a *pro rata* basis as they want, but on the basis of the lower of the two rates of income tax if the rate levied by the State is different from that of British India. According to lobby comment the amending Bill which was passed by the Assembly this week, though a good measure and in more than one way an improvement on the existing position, leaves many difficulties untouched. In the course of his speech Sir Vithal Chandavarkar suggested to the Finance Member that the Central Board of Revenue and the State authorities should sit together and provide machinery for settling all their difficulties and adjusting differences of opinion.

Another interesting taxation problem which the States Ministers are now considering is the proposed legislation in Bengal for taxing agricultural incomes. It appears Rulers of Indian States have considerable landed properties in Bengal. Apparently they have no objection to the taxation of property which belongs to Rulers personally, but they claim on various grounds that property owned by the States in British India should be free from this kind of taxation. Representations are understood to have been made to the Government of India on the subject. As a sub-committee has been appointed by the States Ministers to deal with this specific issue, they are expected to take up the matter with the authorities here and in Bengal for a satisfactory adjustment of their rival claims.

HILLL-BIRD.

NORTH WESTERN RAILWAY

Applications are invited for the posts of 4 temporary Surveyors in Class I Grade 2, Rs. 65-5-2 years 85 in the Headquarters Office at Lahore. In addition 5 men will be selected and placed on a waiting list for further vacancies which may occur but all names will be removed from this waiting list on 22nd December, 1942. The age limit will be 18 to 30 years and for those who have served or are serving this administration or are acquainted with Revenue Law and Procedure, the age limit can be raised to 40 years on 22nd December, 1942. Applicants must possess a degree from a recognized Engineering School, College or University and should be fully qualified overseers. The last date for receipt of applications is 15th December, 1941. Full details will be furnished on receipt of a stamped envelope only (without letter) bearing in block letters the address of the applicant. This envelope should be submitted to the General Manager, N. W. Railway, Head-quarters Office, Lahore, and superscribed in the top left hand corner "Vacancies of Surveyors."

General Manager, Lahore.

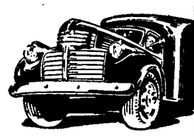
(From Our Correspondent)

Bombay, Nov. 12.

WHILE the cotton market remains reflective and reluctant, the piecegoods market continues to show improvement in response to brisk demand for export. It is clear that cotton cannot enjoy a long respite when the Far Eastern outlook is murky. Naturally, the pessimists have an occasional field day, and recent price movements go far to explain how they gain. The advance followed by a reaction is a mark of the uncertain temper of operators. Caution induces too prompt profit-taking, necessitated also by the fact that past losses have to be made good. Re-entry is not always feasible, and the technical position appears to crackle. The nervousness displayed by U.S. markets in spite of repeated statements the crop will be just 11 million bales and mill consumption is running high leads to the presumption that over there too is uncertainty. Though the current calculation is in favour of a smaller Oomra crop, it is patent that there will be a glut. For the time being the October chill is a potent factor in keeping Oomra prices up. There is, however, the depressing effect of crop arrivals, as early picking has begun, and stock figures are being examined with an eye on price trends. In spite of hopes of enlarged mill consumption, the Bombay cotton market is not animated by the hope that cotton prices will bump forward. There are too many adverse features in the market landscape to promote bullish fervour. The lift in bullion is, in most eyes, a retarding factor, so far as the main commodity markets are concerned.

From Deoli and Delhi, the interest of many a loyal cricket fan has drifted to the Brabourne stadium. The pros may stay out and the princes may indulge in a little patter but the championship is the main topic of town talk. Bombay's team have been going great guns and the two outstandings batsmen of Sunday's game are the idols of the populace. The follow on by the Western India states showed that Bombay could force the pace at any time and interest in the tournament has never been keener. There is not much hope of the States elbowing Bombay out of this year's final and the men would have gone off to the Pentangular are coming to think that the Ranji Trophy is a more useful competition.



In addition to exiting sources of power, Bombay may count on electrical energy from Mysore. A press report from Bangalore states that the Government of India in according sanction to the Jog project have laid down that an agreed quantity of water should be let down the River Sharavati from October 1, of each year to February 15, of the next year and that electric power up to a maximum of 5,000 E.P.H. would be supplied if required to the Government of Bombay. Since the Government of Madras will help the Mysore Government by land acquisition proceedings in Coondapoor Taluq and the river Sharavati flows into the sea through North Kanara, both Provinces are interested in the scheme. The Jog project which will be financed by a total expenditure of Rs. 280.5 lakhs in the first stage is the last of the big schemes drawn up in Sir Mirza Ismail's term. The construction of the usual dam will take up the first stage and the provision of power will start after the third stage is over.

The Corporation's finances are not exactly shaping well. A disturbing note was struck by the Municipal Commissioner last week when he adverted to the possibility of a deficit of Rs.10 lakhs or so in the coming year. It can be readily met by drawing on the free balancess but the draft on a somewhat tenuous reserve will occasion anxiety. The city's revenue does not seem to extend at the same rate as expenditure. Over a period of 10 years, it is noticed that expenditure has risen by Rs.61 lakhs. The city's income has risen by Rs.43 lakhs. The true remedy is an increase in taxation, but the property tax is high and the idea of new town duties is repellent. Government, which grudges help for the financing of compulsory education, is not likely to assign a larger share of the tobacco tax. It might be claimed that the city should have a share of the electricity duty, which according to Mr. Noel Paton, is being used by Government to the detriment of industry merely to produce money lost through Prohibition. To adopt this view is easy but comparisons made with Madras and Bengal have no application in view of the fact that industrial energy in Bombay is as cheap as can be and the duty looks high only in relation to the price paid by the consumer and is not higher than what is paid elsewhere. Retrenchment has been favoured widely on many grounds, but the possibility of a setback in local educational progress cannot be ignored by the City Council which has chosen a lady secretary for the post of Special secretary to the Schools Committee to help it with her experience of social work. The additional responsibility thrown by the merger of the Improvement Trust with the Corporation requires a strengthening of the revenue position but property owners worried by A.R.P. expenses are not likely to respond to the suggestion that they should pay more by way of rates.

Great interest attaches to the report that Tata Sons Ltd., will be responsible for another departure in the financial sphere. Their original flotation, the Investment Corporation of India, Ltd. was the subject of special mention three years ago in the financial press of London as the type of institution required in India to examine and sponsor new issues. It is understood that the Investment Corporation is likely to back a company formed for the support of small industries. It is to be distinguished from an industrial bank, a sort of mongrel financing agency long suspect in business circles. The proposed industrial corporation will have a capital of Rs. 1 crore. The preference capital will be limited to Rs. 10 lakhs and the public response to the forthcoming issue should be quite satisfactory, as it is understood that part of the issue has been taken up by the principal promoters. Representatives of the Hyderabad and Baroda Governments will probably find a place on the Board which is strong in more than one sense.

Since the Bombay Government evinced no desire to follow the schemes adumbrated by the Industrial Survey Committee, it seems appropriate that private enterprise should come to the rescue. There is a belief that a number of worth-while schemes lie to hand, and the existence of an institution able to go into the technical and financial aspects of propositions will help in their fruition Schemes, recommended by the Scientific and Industrial Research Committee will obtain a proper share of the new company's attention, and important new ventures in which the capital may have to be advanced will not be ignored. The registration of the company referred to cannot be delayed long, and the usual flotation will be a welcome break for the investor at a time when eligible new issues are singularly scanty.

Tit Bits of Industrial Activity

Bombay Scheme

The influence of Mysore will probably explain the attempts of Bombay to make use of power alcohol from the Deccan sugar factories. It is reported that a scheme is taking shape after the conference held recently when it was suggested that appropriate legislation might be enacted. The Department of Industries is well posted with the details of manufacture and the public would like to see a local supply of alcohol augment imported petrol. It is known that in actual use the mixed fuel is O.K. and if power alcohol can be produced at 6½ annas per gallon there can be no objection on the score of cost. Since European countries have worked successfully with power alcohol, it seems quite feasible to carry out manufacture with the enormous supply of molasses. It is believed that 60 million gallons of power alcohol could be manufactured in India and the terrors of rationing would vanish. The suggestion has been widely supported and the Bombay plan for a distillery will be followed with interest. There are old-established sugar companies that have the resources to launch on this branch of production.

Pacific Locomotives

The successful building of nine Pacific type locomotives for the A.B. Railway at Ajmer has been reported. Most of the parts were locally produced and the YB engines for the metre gauge and tender in working order is said to be 87.9 tons and the engines produced in the B.B. & C.I. shops have several new features. The coal capacity of the tender has been increased and the design of the piston valves etc. is peculiar to Ajmer. All motion parts are lubricated by oil and other parts are either greased or fitted with oil-treated asbestos. The new locomotives have been made with changes desired by the A.B. Railway. Some of them have been delivered and are already in service. The building of broad gauge locomotives has yet to be undertaken in India but the conditions for a successful start are here according to a small expert committee which reported on the feasibility of Indian railways producing their own locomotives.

Benzol Plant

Recent numbers of the Tisco Review have contained a description of a benzol plant. The recovery of oil from coke-oven gases has long been viewed as an encouraging possibility. It is not unfamiliar to India where the distillation of benzol from the iron and steel plants has been successfully carried out. Since toluene the basis of Tnt is recovered in conjunction with benzene the importance of this type of chemical engineering will be grasped. The process is essentially one of recovering oil from coke-oven gas by solution in mineral oil. The hydrocarbons including benzene and toluene are taken out of the gas by the absorber in a counterflow absorption tower. Steam is used to secure the stripping of the oil. The distillation process is said to call for running of the plant before the best working conditions can be ascertained. The paper read in December last before the Society of Chemists dealt with the technical aspects of setting up and running a benzol plant. According to Mr. K. Bose the successful operation of the plant is comparatively simple although considerable testing and arrangement may be necessary before the conditions are found that give the highest efficiency of recovery with the least expenditure on steam, cooling water and wash oil.

Australian-built Freight Ships

The first keel has been laid of the first standard 9,000 tons merchant vessel to be built as part of the programme of the Australian Shipbuilding Board. The Board's programme calls for the construction in five years of 60 cargo ships. The Board began to function in March. The keels of five more vessels will be laid before the end of the year, and two ore-carrying steamers are now under construction in South Australia. The naval programme calls for the construction of more than 50 ships. The Board is establishing new marine engine works in two States, and is extending facilities for such operations in a third. It is estimated that more than 15,000 men will be engaged in the naval and merchant ship programmes when shipyards and other works are operating at full capacity. The value of the necessary new machine tools is estimated at 500,000 dollars.

ELECTRICITY

makes life easier

Grandfather had to climb over a hundred stairs to reach his office on the fifth floor—and so did all the people who went to do business with him. And you probably know only too well how annoying it is when the lift "goes wrong". Nowadays most new buildings are equipped with electric lifts to save time and energy.

A Resume of Commodity Markets

The week under review is devoid of any important developments in the commodity markets. The raw cotton, linseed and wheat markets have continued firm while the raw jute and hessian markets have been on the downward trend. Political developments have not had any influence on the markets and greater attention is being paid to internal factors. The strength of the wheat market in the face of the reports regarding the possibility of extension of price control to the Punjab and the ability of Australian shippers to import wheat at below Calcutta prices is mainly due to the belief that there cannot be any appreciable decline in prices for foodstuffs and that with the good export buying, there will be no surplus wheat left. The jute market is easier towards the close on reports that there would be an increase in the area under the crop for the next season to double the area under the crop for the current season and that the announcement to this effect can shortly be expected. The jute manufacturer's market is easier in the absence of any oversieas enquiry.

The fact that the major portion of the ground gained in the bullion market has been lost indicates that the rise in gold prices at the end of last week was mainly speculative. Quotations have been receding gradually and it looks as if a further decline in prices to around the export parity prices is inevitable.

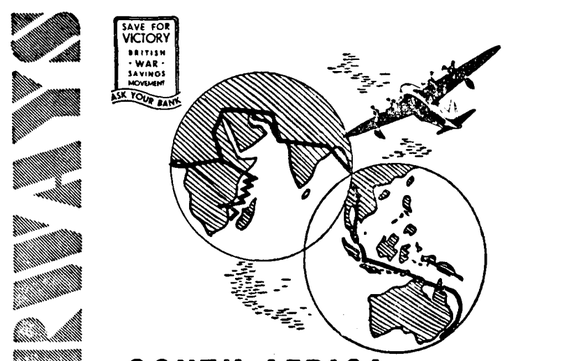
Jute

A generally firm tendency was noticeable in the raw jute market in the major portion of the week under review. There was fairly good buying by mills and it was generally expected that in the absence of any announcement regarding the Government's policy of restriction for the next season, it would be impossible to prevent a further improvement in values. Mills are, however, trying to keep down prices for it is against their interests to allow any appreciable rise in prices for jute, as it would cut into their margin of profit. There are rumours that the Government would make an early announcement regarding the acreage for the next season but what the Bengal Government does remains to be seen.

Jute Manufactures

The hessian market was quietly steady in the early days of the week. But in the absence of any outside buying, sellers have been keen to do business and tired liquidation has brought about a fall in prices. The disappointing U.S. consumption figures also have had a discouraging effect. The consumption at 63 million yards is the same as compared to the corresponding period last year but represents a decline of 8 million yards over the corresponding figure last year. The higher figure for last year was due to the fears about a big rise in prices. Taking into consideration the higher level of prices at the moment, and the high rate of industrial activity, it can only be said that consumers have deliberately abstained from buying more than what is necessary for immediate requirements. This explanation seems plausible as with the U. S. Government's efforts to keep down prices below the "ceiling" and the easier freight situation, it would certainly be in the consumer's interest to buy in as small quantities as possible. It may be reasonable, therefore, to presume that buying has been only deferred and not diverted.

By a decree published on the 5th October, 1941, the Argentine Government have fixed maximum prices for the sale of new canvas bags for the field corps, reports the special correspondent of the Indian Central Jute Committee from Buenos Aires. Another official disposition forbids the use of canvas lighter than 12 oz. for the baling of Tobacco, in order to leave the utmost available quantity of the lighter weights for the manufacture of bags for grains and seeds. The maxima fixed are about 12 per cent. lower than the market quotations of October 3.



The maximum prices fixed for bags of 8½ oz. canvas also apply to those made of canvas of between 8 and 9 oz.; and the prices fixed for bags of 10 oz. canvas apply also to those of 9½ oz. canvas. The prices of other sizes of bags are to be adjusted on the above basis in accordance with their sizes and the quality of the material used.

Piecegoods

The piecegoods market has been helped by the strength of the raw cotton market. Prices have been gradually moving up in spite of the restricted turnover. Dealers are slowly realising that it would be impossible to satisfy demand for internal consumption, from the Defence services and the overseas markets.

Linseed

The easier freight position, greater export buying and the strength of the other seeds and grain markets have been responsible for the firmer tone of the Linseed market. In Calcutta, a quotation as high as Rs. 6-8-6 was touched and the same is only slightly lawn towards the close at Rs. 6-8 in sympathy with the jute market.

BAK 19

(*Continued from page* 859)

On the weekly treasury bill tender day, applications amounted to Rs. 3,34½ lakhs against Rs. 2 crores on offer. The average rate of accepted tenders was annas 12 and pies 2 per cent per annum as compared with annas 10 and pies 11 last week. Sales of intermediate bills amounted to Rs. 1,36¾ lakhs as against Rs. 2,11½ lakhs. A further rise in the average treasury bill discount rate is not unlikely. The Madras Government are coming on the market for Rs. 50 lakhs of three months bills on November 17. They should be able to get their accommodation between 12½ annas and 13 annas per cent.

The position with regard to the admission of banks to the Clearing House requires clarification and regularising. Such regularising is all the more necessary and important as the Reserve Bank is a kind of godfather if also a mentor of scheduled banks. In the twenties, the Clearing Banks' Association was dominated by the exchange banks; and Indian banks received none too sympathetic a treatment when applying for membership of the Clearing House. For years and years, the Punjab National Bank was kept out of the clearing in Calcutta, Bombay and Karachi, though this Bank had been admitted to Lahore clearing. It was only when questions were put in the Council of State with regard to this scandal, that Sir Basil Blackett intervened personally and saw to it that the Punjab National Bank was forthwith admitted to the Clearing House. In fact, he is reported to have telegraphically instructed the Imperial Bank to arrange for the Punjab National Bank being admitted to the Clearing House double-quick as he was anxious to answer, when the question came up in the Council of State, that the Bank had already been given this facility. While admission to the Clearing House in those distant years was difficult, there intervened a period during which all and sundry were accepted for sub-membership. In the Calcutta Clearing, there are a few non-scheduled banks who enjoy the privilege of membership. It appears that the attitude of the Clearing House Committee has again stiffened. One of the reasons adduced is that space in the Clearing House is restricted. This is too frivolous a ground to be urged seriously. The real question is whether or not a scheduled bank is entitled to be automatically given the right to join the clearing. This is a right which the Reserve Bank should, as a matter of duty, secure for the scheduled banks. The scheduled banks are obliged to keep compulsory deposits with the Reserve Benk. They are pulled up by the Reserve Bank about this, that and the other. In return, what are the privileges which they may be said to enjoy? None, so long as the interpretation of the relevant sections of the Act is on the present lines. The least which the Reserve Bank can and ought to do to the scheduled banks is to place, on an automatic footing, their right to membership of the Clearing House. It is beside the point for the Clearing House Committee to trot out considerations with respect to financial standing or financial transactions. Will the non-scheduled banks now admitted to the clearing, be able to pass such tests? The fact that a particular bank is on the Reserve Bank schedule and that its books are open to the Reserve Bank at any time is sufficient warrant to justify the claim on the part of scheduled banks for the inherent right of membership of the clearing house.

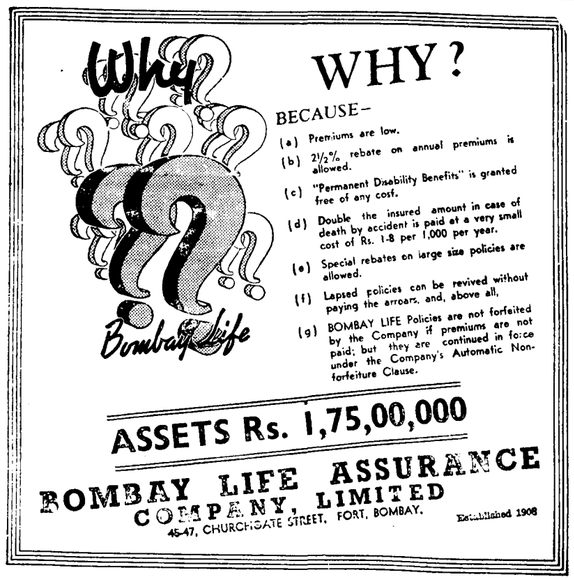
The exchange market has been very steady during the week with a fair amount of business passing.

Banks were sellers of T.T. on London Ready up to six months forward at 1s. 5 31 32d., and banks were buyers of T.T. on London Ready up to six months forward at 1s. 6 1|32d.

D.A. sight bills quoted 1s. 6 9|32d., for three and four months.

Interbank call money remains unchanged at ½ per cent lenders.

Firms' money for call and short is ¼ per cent and from one to four months deposits ½ percent.



INDIAN TEA LICENSING COMMITTEE

NOTICE

Due to the recent increase in the Indian export allotment the Licensing Committee has issued a further allotment of export quota amounting to 6.83 per cent. of estates' crop bases. Individual tea estates will be advised as to the amount of their final export quota as promptly as possible.

The Licensing Committee's Export Quota Transfer Register is now closed and will re-open for the registration of transfers on the 24th November, 1941.

Jute and Jute Manufactures

(By our Correspondent)

Calcutta, Nov. 13.

THE Fatka markets have come into the lime-light again with the publication of a memorandum by the Bengal Chamber of Commerce on the result of their examination of Professor Todd's interim report on the subject. The general conclusion is that in the opinion of the Chamber and its connected Associations any scheme for Futures markets is not an essential part of the organisation of the Jute Trade and that these markets have a peculiarly undesirable influence on the trading markets under war conditions. It cannot be gainsaid that for very many years the industry managed to get along quite well without the adventitious aid of the Fatkas. In fact it was not until the Marwari element became predominant in all sections of the trade that the Fatkas were introduced. There can be little doubt that a properly constituted Futures market in the raw material might find a useful place in the industry provided always it were utilised in the proper way and really functioned as a Futures market. The difficulty would be to persuade the Mills, who would, or ought to be the main operators in any such market, to take advantage of it. Without the support and encouragement of this most important and influential section of the trade, there can be little hope of a Futures market, however carefully constituted on paper, ever being much better than a gambling pit.

It was agreed, when Professor Todd's report was first published, that one feature would be of immediate value, quite apart from the Futures Market scheme. That was the institution of "standard boxes" as samples for reference by all connected with the trade and more particularly for the guidance of arbitrators. This of course is also closely linked with the vexed question of Loose Jute standards and their stabilisation. It was hoped that, with the revision of the specifications of the standards by the Mills Committee, immediate steps would be taken to fix these visually by the exhibition of approved samples. A reasonably auspicious start was made when the Calcutta Jute Dealers Association prepared a range of samples early in this season and had them aproved by the Mills Committee as complying with their interpretation of the specifications laid down. But these samples were made up from early jute and it was recognised that they would have to be replaced within a month or so with a fresh range showing the characteristics of the more mature crop. Such a range was accordingly prepared by the C.J.D.A. early in September and was exhibited to the Mills Committee with a view to getting their imprimatur. This unfortunately was not forthcoming. Apparently the Mills Committee could not agree amongst themselves whether or not the samples were right, and finally, after much delay, they merely declined to commit themselves on the subject. No constructive criticism of the samples one way or the other. Not exactly what might be called co-operation, which the Mills Committee had been lustily calling for in repeated circulars to all concerned. As a matter of fact almost simultaneously a fresh circular was issued calling for co-operation, but the subject was the type and shape and size of box in which the samples were to be exhibited, where and when they were to be displayed, and who was to bear the cost. And so far as is known that is how the matter stands now. Meanwhile there are complaints that so called "Standards" are taking their usual course, that is upwards, which is almost inevitable when there is no official yardstick, so to speak, with which to curb the rapacity of a Buyer who wants to get something more than he has paid for. There is supposed to be in existence a Standards Sub-committee to which it would seem the logical policy to refer all matters connected with standards. This sub-committee consists of representatives of all sections of the trade, fully competent to decide not only what shape and size a standard box ought to be but also competent to prepare and insert standard samples inside these boxes. Why the whole matter is not handed over to that sub-committee to get on with is something of a mystery. Unless it is that the Mills Committee is reluctant to delegate authority in a matter concerning which they prefer to reserve to themselves the final decision. But when even they themselves cannot make up their communal mind, as has been evidenced above, co-operation scarcely seems possible.

American consumption of hessian cloth for the month of October was 63 million yards, the same figure as the previous month but 8 million less than the 71 million consumed last October. The only satisfactory feature is that the consumption has kept as a steady level for the past 4 months, though in view of the vastly increased tempo of production of all kinds in the U.S.A. the quota of hessians seems much lower than might have been looked for. There can be little doubt that the recent high price level must be largely accountable. Spot stocks were at the low level of 92 million yards but afloat was well up at 150 million, making a total of 242 million against 261 at the same time last year. Mill production figures have also appeared but a strict comparison is not possible owing to variation in working hours. Total production amounted to 100,927 tons. Hessian 18½ crores, Sacking 11½ crores.

Today defence begins at the Blast Furnace. Armament factories are transforming hundreds of tons of steel into weapons of war.

When peace returns once more these giants of war time will again become strongholds of industrial prosperity.

ALWAYS . . . EVERYWHERE . . .
STEEL FOR STRENGTH

To withstand the immense strain imposed on them, the smallest of details in modern structures are made of steel.

TATA STEEL

Issued by THE TATA IRON & STEEL Co., Ltd. Head Sales Office: 102A, Clive St., CALCUTTA

JUTE

Calcutta, Nov. 13.

The jute market has been quite steady throughout the week. It would be remembered that at the end of last week a rather firm tendency was in evidence on the announcement that the number of mill working hours would be increased from 54 hours per week to 60 per week with immediate effect. Mill buying has been on a greater scale and sellers have not been quite keen to do business. As such prices have been maintained at the higher levels. The futures market was very steady till Wednesday and a quotation as high as Rs. 69-2 was touched. With the easier tone of the hessian market prices to-day are below the highest levels for the week.

The Bengal Chamber of Commerce has issued a memorandum on Prof. Todd's interim report on the futures markets, both for jute and hessian, and has come to the conclusion that for the duration of the war there is no need for the existence of any futures markets. While it is completely opposed to the existence of a hessian futures market, it is of the opinion that the consideration of a reformed jute futures market would be taken after the war.

In the loose jute section, sellers have not been quite anxious to do business and prices are inclined to be higher. There was some profit-taking at the higher levels but quotations have been well held. Indian Jat Tops, Middles and Bottoms were done at Rs. 15-12, 13-12 and Rs. 10-4 respectively.

In the pucca bales section quotations were higher in sympathy with the futures market. Dundee Tossa 2|3 were done at Rs. 76 per bale.

In the futures market steady conditions prevailed in the market throughout the week and a quotation as high as Rs. 69-2 was touched. Selling at the higher levels has resulted in a decline in the quotation in to-day's session to Rs. 67-12.

JUTE MANUFACTURES

Calcutta, Nov. 13.

The publication of the disappointing stock and consumption figures and the absence of any outside buying have been responsible for the dull tone of the jute manufactures market during the past week. There has been some selling during last week and quotations are at the lowest levels for the week. 9 Porters ready are quoting Rs. 22-2, December Rs. 21-2, January|March, Rs. 19-12 and April|June, Rs. 18-4. The decline is most pronounced in the quotations for the near positions. 11 Porters ready are Rs. 26-14, December Rs. 26-2, January|March Rs. 24 and April|June Rs. 22-4.

In the heavy goods section there has been very little doing. Quotations were marked higher in sympathy with the strength of the jute market but are a shade easier towards the close with the weakness of the hessian market. B Twills for November shipment sold on the basis of Rs. 38-10, Liverpool Twills for the same position Rs. 64-8, Cornsacks Rs. 40 and A Twills Rs. 47-8.

The American stock and consumption figures for the month of October, as remarked above, are very disappointing. There is a sharp decline in consumption over the figures for the corresponding period last year. There is no change as compared to the figure for the previous month. The consumption for October was 63 million yards against the same figure for the previous month and 71 million yards for the corresponding period last year.

The easier position is reflected in the higher stocks afloat, being 150 million yards against 103 million yards. Stocks spot are lower at 92 million yards.

GOLD

Calcutta, Nov. 13.

The earlier firmness of the bullion markets has not been maintained. There was some panic regarding the war situation at the time of last writing. On account of the rush for buying gold for hoarding purposes prices were forced higher. There has been a sagging tendency and quotations are now at the lowest levels for the week. Gold is quoting Rs. 43-6 for all the positions.

The London price is unchanged at 168s.

SILVER

Calcutta, Nov. 12.

The silver market has been very uninteresting and prices have been fluctuating in very narrow limits. The volume of business has been on a very small scale. But for the strength of the raw cotton market values would perhaps have been marked lower. Indian Mint Silver ready are quoting Rs. 63-1, First Settlement Rs. 62-14 and Second Settlement Rs. 62-14.

In the London market, the quotations for both spot and forward are pegged around 23½d. Trade demand has been met by official selling.

COTTON

Calcutta, Nov. 13.

There was heavy bull buying early in the week and a substantial rise in prices was recorded. The strength of the cloth market and the decision that cotton mills should be exempt from the operation of the Indian Factories Act were the main encouraging factors. In some quarters the view was held that the sharp rise in prices was more speculative than genuine. The fact that prices have remained more or less unchanged, in spite of the passing of the bill by the Senate to rearm merchantmen and the uncertainty regarding the Far Eastern situation, suggests that the technical position is not quite unhealthy Broach April|May are quoting Rs. 241-4, Bengal December|January Rs. 146-12, March Rs. 150-4, and Oomra March Rs. 195-4.

In New York, an easier tone was noticeable earlier in the week on the passing of the bill by the Senate for rearming merchantmen but during the latter half of the week a firmer tendency has been noticeable and the quotations are higher with December at 16.26 cents and March at 16.45 cents.

WHEAT

Calcutta, Nov. 13.

The reports that price control will be extended to Punjab with a maximum price of Rs.4-6 and that all-India control is being planned have prevented any rise in prices being possible. Quotations have been fluctuating in narrow limits. In spite of the excellent crop prospects and the large arrivals it is generally felt that prices will in the long run continue to be higher. There is no tendency to sell short. Good export buying continues to be in evidence. The quotations for new crop are slightly lower as it is reported that Australian shippers have been able to give quotations. Choice White ready are quoting Rs.42-12-6, January Rs. 42-13-6 and July Rs. 37-8.

In the Calcutta market firm conditions continue to be in evidence with Cawnpore ready at Rs. 5-11-6 and May at Rs. 5-2-9. The values for flour and flour products have been well maintained. It is reported that Australian descriptions have been quoted around the equivalent of Rs. 5-10 but dealers here seem to be confident that it will not be possible to get early shipments.

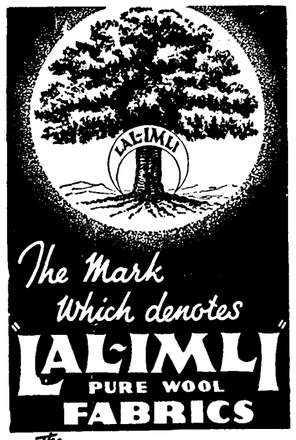
secured for the new company. Since Kashmir is one of the few States with a regular customs tariff this advantage too will be valuable. In the fertile, irrigated tract adjoining the N.W.R. the Company has the necessary cane area and the freight advantage both as regards cane and sugar will ensure profitable running of the factory. With a crushing capacity of 500 tons or over per diem there should be annual production of at least 150,000 maunds. The State departments are expected to help in many ways, while the company has the assurance that cane will be had at reasonable prices. These constitute the main advantages of a company, which in trying to till the virgin soil of Jammu should have a poweful appeal. The company intends to invest Rs. 15 lakhs of the capital in fixed assets and retain Rs. 5 lakhs as working capital. The computation of profits on an estimated around production of 150,000 maunds of sugar is not difficult, though allowance must be made for the differential advantages accruing from the location of the factory in tthe Happy Valley. It is clear that with the debenture and Preference capital fairly distributed, the new issue will secure for the ordinary shareholders reasonably large dividends from an early stage. The managing agency terms are of the usual type. The promoters in the first instance are the firm of Lala K. C. Thapar whose diversified industrial interests have gained for his companies more than the usual following on the stock exchanges. It is certain that the flotation will impress all investors, now that the Indian sugar industry's position is getting better and sugar prices are not likely to go down. These circumstances naturally confer high interest on the Shree Yuvraj Sugar Mills, Ltd., whose ordinary shares available at par should be snapped up at a time when really worthwhile new investments are extremely scarce.

The fact that so shrewd an operator and investor as Mugneeram Bangur has underwritten the whole of the ordinary, preference and debenture capital is an assurance to the investing public that the shares of this Company are on a par with giltedged securities.

CAST IRON PIPES



For Gas and Sewage Mains the superiority of Cast Iron Pipes over all other forms of piping remains unchallenged. Impervious to rust and the corrosive effects of gases and chemicals, Cast Iron Pipes have almost a limitless life, which makes them the most durable and dependable of all underground conveyors. Engineers know that by specifying Cast Iron Mains they are safeguarding a city's vital services against risks of sudden breakdowns and expensive replacement costs.

Bird-Heilgers Jute Group to Issue Bonus Shares

Easily the most important event of the week is the announcement regarding the issue of bonus shares in the case of certain companies belonging to the Bird-Heilgers Group of jute companies. In view of the encouraging prospects for the jute industry the Directors have decided to issue bonus shares.

The Kinnison and Lawrence Jute Mill companies are to issue one ordinary share free to shareholders for every share held while the Dalhousie, Northbrook, Naihati, Standard and Union are to issue one share free to the holders for every two shares held.

The financial structure of the first two companies which issue bonus shares, as on 31st March, 1941 was as follows:—

The *Kinnison Jute Mills Company, Limited* had a paid-up capital of Rs. 30 lakhs divided equally into ordinary and preference shares of Rs. 100 each. Total reserves were Rs. 44,31,116. The net block was valued at Rs. 18,66,317. By the issue of bonus shares, an ordinary share for every ordinary share held free reserves of Rs. 15 lakhs will have to be capitalised. It will be seen that the financial position is very strong. There has naturally been a jump in the quotation for the shares from Rs. 628 to over Rs. 800 cum-rights.

The *Lawrence Jute Company, Limited,* is also very well placed. As on 31st March, 1941, the net block amounted to Rs. 14,19,554 against a total paid-up capital of Rs. 25,00,000 of which Rs. 10 lakhs was held in ordinary shares of Rs. 100 each. Total reserves were Rs. 23,46,997, while investments were Rs. 17,23,938. The total paid-up capital as a result of the bonus issue will be increased to Rs. 35 lakhs. The position of the other companies will be discussed in these columns next week.

* * * *

As regards the results of the Bird-Heilgers group of companies for the half-year ended September 1941, the Directors of Auckland have been able to recommend a dividend of Rs. 4 per share against Rs. 2-8 per share, Clive As. 14 against As. 12 per share, Dalhousie Rs. 10 against Rs. 7-8, Kinnison Rs. 16 against Rs. 12-8, Lansdowne Rs. 3 against Re. 1, Lawrence Rs. 12-8 against Rs. 10, Naihati Rs. 8 against Rs. 6, Northbrook Re. 1 against As. 8, Standard Rs. 10 against Rs. 7 and Union Rs. 10 against Rs. 7.

The spate of excellent earnings figures and bonus shares has naturally had an encouraging effect on the values of other jute shares and substantial rises in prices have been recorded.

In the short space of three weeks a further order for sixty-two million sandbags has been received by the Indian Jute Mills Association through the Government of India. Delivery will be in equal monthly instalments—twelve million between January and March, 1942, and fifty million between April and September, 1942. The price fixed is Rs. 12-4 per hundred bags f.a.s. or f.o.r.

The same conditions regarding specification, insurance and storing apply to this order as to the previous ones, and allocation to individual mills will follow.

These bags will not be rot-proofed.

* * * *

The more important jute companies to publish their balance-sheets for the half-year ended September, 1941, confirm the impressions reached in these colums last week. Both the Howrah and Reliance Mills have been able to report, perhaps, the highest level of earnings in the post-war period. The net profit, before providing for taxation and depreciation, is also the highest for the war period. The relatively cheaper prices for jute and the increase in the volume of production have been mainly responsible for the big rise in earnings. The net profit, before providing for taxation and depreciation, for the six months ended September, 1941, is Rs. 27,26,087 against Rs. 8,98,923 for the previous half-year. Most of the increase in earnings is naturally taken up by the provision for taxation. But even such a small surplus, small in relation to total earnings, has not been fully utilised in declaring a dividend to the ordinary shareholders. Thus, after providing for taxation Rs. 19,00,000 against Rs. 3,51,534 on the former occasion, it is proposed to transfer Rs. 1 lakh to Depreciation Account and a similar sum to Replacement and Renewals Reserve. The ordinary dividend has been increased to Rs. 2 per share from 1-12 per share. After the publication of the results there has naturally been a rise in the quotation for the shares to Rs. 64 cum-dividend but even at the higher level the yield on the basis of the latest dividend is over 6.45 per cent tax-free.

* * * *

The increase in the earnings of the *Reliance Jute Mills Company, Limited* is not equally pronounced. The improvement is, nevertheless, substantial. The net profit, before providing for taxation and depreciation, is Rs. 13,39,745 against Rs. 5,34,313 for the previous six months. The sum of Rs. 8 lakhs against Rs. 2,07,723 has been provided for taxation while a further sum of Rs. 1.5 lakhs is to be transferred to Replacements and Renewals Reserve. The ordinary dividend is to be the same as in the case of Howrah.

* * * *

In spite of the numerous difficulties which the *Scindia Steam Navigation Company, Limited* had to face during the year ended June, 1941, it has been possible to report a substantial increase in earnings for the year over those for the previous year. The increase in operating costs was more than offset by the increase in basic freights. Thus, the net profit for 1940-41, before providing for taxation and depreciation, is Rs. 82,98,519 against Rs. 38,19,445 for 1939-40. The earnings would be even higher but for the substantial provision for bad and doubtful debts of Rs. 6 lakhs. After providing Rs. 19,00,000 (Rs. 12,35,278) for depreciation the provision for taxation is very much higher at Rs. 44 lakhs against Rs. 9 lakhs only. The sum of Rs. 60,000 is to be allocated to a newly-created Staff Amelioration Fund. As the new shares issued are eligible for dividend for the whole year it has not been possible to increase the ordinary dividend and bonus which have been maintained at Rs. 1 and four annas per share respectively. The amount carried forward is considerably higher at Rs. 11,83,385 against Rs. 89,838 brought in.

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, Nov. 14.

THERE has been considerable activity on the Calcutta Stock Exchange during the past week. The excellent earnings reports published by important jute companies and the announcement regarding the issue of bonus shares by the Bird and Heilgers group of companies have had an encouraging effect and prices have been marked higher alround. Developments in the war situation also were not quite unsatisfactory. As the Bombay market also was inclined to be firm there was a broadening of interest and prices have been marked higher alround. The developments during the week have been particularly favourable to jute shares. While the shares affected by the bonus issue were in keen demand the other shares also were marked higher sympathetically, *National* being marked at Rs. 27-8, *Indian Iron* at Rs. 34-10 and *Equitable* at Rs. 39. There has been some profit-taking during the last two days, but the sentiment is cheerful and the technical position of the markets is sound. After the recent substantial rise in prices profit-taking is only natural and has been fully absorbed.

Giltedged securities continue steady with the quotations maintained around last levels. Business passing is on a very restricted scale. 3½ per cent. Paper was done at Rs. 96, and 3 per cent. Paper at Rs. 82-8. Among terminable loans, 3 per cent. Defence Bonds were done at Rs. 102, 3 per cent. 1963-65 at Rs. 96-6, 4 per cent. 1960-70 at Rs. 110-12 and 5 per cent. 1945-55 at Rs. 111-2. Money conditions have continued easy though there has been a further rise in the treasury bill rate. There are strong rumours that the lists for the Second Defence Loan may be closed early and that a new loan issued on less favourable terms to investors.

Business in fixed interest securities has been as usual restricted. 3 per cent. *Calcutta Port Trust* debentures were done at Rs. 98-8, 3 per cent. *Calcutta Improvement Trust* debentures at Rs. 95-4 and *Dalhousie Properties* debentures at Rs. 102-8. There is keen demand for preference shares, but sellers are not prepared to part with their holdings. *Anglo-India* were done at Rs. 180; *Clive* A' preference shares at Rs. 156 and *Lansdowne* at Rs. 150-8. Among other sections, *Burrakur* were done at Rs. 157-8, *Alkali and Chemical* at Rs. 120-8, *B. I. Corporation* at Rs. 184 and *Titaghur* Second preferences at Rs. 118-8. *Steel Corporation* preferences had no sellers as it has been announced that the arrears of dividend are to be paid along with the usual half-yearly dividend.

In the Cotton section firm conditions have continued to prevail. With the encouraging reports from the cloth markets and the firmer tone of the other sections there has been a further rise in prices for cotton shares. *Cawnpore Textiles* are quoting at Rs. 10-4, *Dunbar* at Rs. 272, *Elgin* at Rs. 30-4 and *New Victoria* at Rs. 5-2.

Coal shares also have been in enquiry during the week and higher prices have been recorded. Closing prices are only slightly below the best levels for the week. *Bengal* were done at Rs. 404, *Bhalgora* at Rs. 5-10, *Burrakur* at Rs. 15-2, *Bokaro and Ramgur* at Rs. 19-14, *Equitable* at Rs. 39, *Central Kurkend* at Rs. 16-4, *New Beerbhoom* at Rs. 19 and *West Jamuria at* Rs. 32-6. The rise in *Bokaro and Ramgur* is significant.

The announcement regarding the bonus issue by the Bird and Heilgers group of companies and the publication of excellent eernings reports have had a stimulating effect on the market and all round rise in prices has been recorded. The improvement in prices is naturally most pronounced in the case of the shares affected by the bonus issue. The latest order for 62 million sandbags has been announced too late to have any effect on market prices in to-day's session. The continuance of longer working hours in the New Year naturally ensures the prospects for jute companies. *Adamjee* are quoting Rs. 32, *Agarpara* Rs. 35-3, *Anglo-India* Rs. 410-8, *Champdany* Rs. 215, *Clive* Rs. 29-10, *Howrah* Rs. 63-2, *Hukumchand* Rs. 15-10, *Kamarhatty* Rs. 583, *Kanknarrah* Rs. 478-8, *.Northbrook* Rs. 48-8, *.National* Rs. 27-8 and *Standard* Rs. 385.

In the Engineering section also active conditions have been noticeable with *Indian Iron* being done as high as Rs. 34-10 in the week. The quotation is now around Rs. 34-4. *Steel Corporation* also have been firm around Rs. 20-12. *Burn & Co.* were quoted Rs. 400 ex-dividend. *Braithwaite & Co.* were done at Rs. 10, *Indian Steel and Wire Products* ordinaries at Rs. 59-2, *Jessop & Co.* at Rs. 20-12 and *Kumardhubi Engineering* at Rs. 6-2.

Sugar shares have been firm with *Buland* and *Raza* quoted further higher at Rs. 25-8. *Cawnpore* were Rs. 24-12, *Carew* Rs. 12-12 and *Purtabpore* at Rs. 11-2.

Tea shares have been in greater enquiry with *.Hasimara* at .Rs. 49, *.Baradighi* at Rs. 50-12, *Hattikhira* at Rs. 23-8, *Patrakola* at Rs. 1,030-8 and *New Chumta* at Rs. 45-4.

In the miscellaneous section, both *Burma Corporation* and *Indian Corporation* have remained unchanged at Rs. 4-9 and Rs. 2-3 respectively. *B. I. Corporation* have been in good request being done at Rs. 5-4. *Dunlop Rubber* were higher at Rs. 42-12, *Publicity Society* at Rs. 11-8, and *Indo-Burma Petroleum* at Rs. 102. Paper shares have been keenly bought with *Titaghur Paper* 'A' and 'B' shares quoting at one time as high as Rs. 24. *India Paper Pulp* .were done at Rs. .164, *Bengal Paper* at Rs. 151 and *Orient Paper* at Rs. 17. Among others *Dalmia Cement* were done at Rs. 14-12 and *Assam Saws* at Rs. 4-7.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, Nov. 13.

Money.—Money is easy, the rate for call money being quoted at ¼ per cent.

Securities.—There is nothing fresh to report in the securities market, the same dull and featureless conditions continuing to prevail during the week under report. 3½ per cent Paper was quoted at Rs. 96. 1948-52 were marked at Rs. 98-2; 1951-54 at Rs. 99-13; 1963-65 at Rs. 95; 1947-50 at Rs. 103-4; 1960-70 at Rs. 110-15; 1955-60 at Rs. 114-13; 1945-55 at Rs. 111-2 and 1946 *Defence Bonds* at Rs. 102.

Shares.—Interrupted by holidays on Monday and Tuesday, the local share market has not shown any pronounced trend even towards the close of the week. It might be stated that prices on Wednesday and at the close to-day were more or less maintained all round. Textiles were easily the most popular group. *Tata Steels* were steady in the absence of sellers.

Textiles.—Textile shares continued to be in the forefront with heavy buying all round following the notification allowing cotton, spinning and weaving factories, for a period of six months, to work six days a week for 60 hours instead of 54 hours. *Bombay Dyeing*, after being done higher at Rs. 1,422-8, closed a shade easier at Rs. 1,420. *Central India* were, however, slightly higher at Rs. .451; *.Colaba.* at .Rs. .251; *.Gokak.* at Rs. 286-8; *New Great* at Rs. 370 and *Svadeshi* at Rs. 497. *Century* .were .maintained at Rs. 485; *Kohinoor* at Rs. 582 and *Phoenix* at Rs. 475. In the cash list, *E. D. Sassoon* were better at Rs. 3-4. *Indore Malwa* were higher at Rs. 251; while *Model Nagpur* were slightly lower at Rs. 238-12. *Vishnu, Western India* and *Ahmedabad Advance* were unchanged at last week's rates.

Hydro-Electrics.—This section was quietly steady, *.Andhra .Valley* .being .quoted at Rs. 1,765; *Tata Power* at Rs. 1,797-8 and *Tata Hydro* at Rs. 190.

Steels.—Steel shares showed no change during the week. Operators are adopting a cautious attitude as the difference between forward and cash prices is widening. *Tata* ordinaries were at Rs. 410-8 and deferreds at Rs. 2,187-8.

Banks and Insurance.—Bank shares were steady. *.Bank of Baroda.* being done at Rs. 118; *Bank of India* at Rs. 149; *Imperial Bank* fully paids at Rs. 1,625; contributories at Rs. 400-10 and *Reserve Bank* at Rs. 108-12.

In the Insurance section, *New India* were higher at Rs. 55, the other shares remaining unchanged.

Miscellaneous: Associated Cement met with consistent buying by investors owing to posiwar possibilities of improved consumption. Even now, it is reported, that consumption is higher than what it was last year during the same period. The Transfer Books of the Company are closed from the 21st November to the 12th December, 1941. *Bombay-Burma Trading* moved up from Rs. 538-12 to Rs. 552-8. *.Bombay Steam* .were done slightly higher at Rs. 480 and *Scindia Steam* at Rs. 28-12. *Shivrajpur Syndicate* were unchanged at Rs. 48; *Premier Construction* at Rs. 122-8 and *Tata Oil* at Rs. 64-8. *Indian Iron* came to business at Rs. 34-3; *Steel Corporation* at Rs. 20-14 and *Port Canning* at Rs. 94. *Belapur Sugar* have shed a few points to close at Rs. 253-8. *Tata Chemicals* were steady at Rs. 16-12, while *Western India Match* were done upto Rs. 226-8.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, Nov. 13.

The local share market continued to be active and buoyant during the week under review. Mill shares met with keen buyers, while Planting issues remained steady.

Securities.—Little change has again been witnessed in this section with 3½ per cent Paper quoting around Rs. 96. 4 per cent 1960-70 came in for business at Rs. 110-10. Among State Loans, 5 per cent *Cochin Loan* were taken up at Rs. 104-9. Provincial Loans continued to be steady around last week's levels.

Mills.—This section entirely dominated the business of the market. *Buckingham and Carnatic* have shown nearly a rise of fifteen points, being done higher at Rs. 319. *Cambodia* have further improved from Rs. 13-10 to Rs. 14-12. *Mettur Industries* were also higher at Rs. 212; *Pankaja* at Rs. 166; *Coimbatore Spinning* at Rs. 177 and *Madura* at Rs. 48; *Sitaram,* after touching a level of Rs. 109-8, closed easier at Rs. 108.

Utilities: South Madras Electric ordinaries were dull at Rs. 15-2 c.d. following the reduction in the interim dividend. *South Arcot* were done at Rs. 102; *Cochin State Power* at Rs. 8-15 and *Karaikkal* at Rs. 47-4. *Madras* and *Rangoon Telephones* were quoted at Rs. 14-10 and Rs. 11-12 respectively.

Miscellaneous: Mysore Paper were marked at Rs. 18 while *Mysore Chemicals* were a little lower at Rs. 17-12. *Mysore Match* saw business at Rs. 9.2. Among Calcutta shares, *Gourepore* were transacted at Rs. 760; *Dalmia Cement* ordinaries at Rs. 14-6; *Steel Corporation* at Rs. 20-9 and *Orient Paper* ordinaries at Rs. 16-8.

Plantations.—This section was not so active as in recent weeks as the attention of the operators was mainly diverted to the textile shares. *Midland* changed hands at Rs. 8-4; *Rajagiri* at Rs. 9-3; *Kalpetta* at Rs. 24-4; *Coorg* at Rs. 38 and *Udayagiri* at Rs. 8-4. *Velliamuttam* were marked at Rs. 23-14. In the Tea section, *Chembra Peak* had buyers at Rs. 5-12; *Mlamally* ordinaries at Rs. 26-14 and *Highland Produce* new ordinaries at Rs. 29.

Sugars.—Only a limited business was done in this section. *Mysore Sugar* were wanted at Rs. 54 with no sellers in evidence. *Deccan Sugar* big shares met with good buying enquiry, being done higher at Rs. 240. *Travancore Sugars* were fairly steady at Rs. 16.

Bank: Bank of Mysore had good buyers at Rs. 291. *Bank of India* came in for business at Rs. 149-8 and *National Bank of India* stock (12½ pound paid-up) at 35-8-9 pounds.

THE GANGES MANUFACTURING CO., LTD.

NOTICE

Is hereby given that the 52nd Ordinary General Meeting of the Shareholders of the above Company will be held at the Registered Office of the Company, No. 2, Fairlie Place, Calcutta, on Thursday, the 4th day of December, 1941, at 12-30 p.m.

AGENDA

(1) To receive and approve the Report of the Directors for the half-year ended 30th September, 1941.
(2) To receive and pass the Company's Audited Profit and Loss Account for the half-year ended and Balance Sheet as at the 30th September, 1941.

(*Annual meeting* 31*st December*, 1941 *at* 11 *a.m. at Rangoon*)

Audited accounts for the year ended 30*th June*, 1941:—

The year's operations resulted in a profit of Rs. 52,46,295 as compared with Rs. 68,12,359 for the preceding twelve months, but the comparison is misleading unless account is taken of the transfer of Rs. 10,00,000 from General Reserve to Taxation Reserve in the accounts under review in order to supplement the provision made for taxation in the accounts for 1939-40. The profits for that period were arrived at after providing for taxation at the rate which then obtained, but they fall to be assessed during the fiscal year 1941-42 at the higher rate prescribed by the Finance Act, 1941. Similarly provision for 1940-41 has been made at the current rate of taxation as prescribed by the same enactment, but the profits will ultimately be assessed during the fiscal year 1942-43 at the rate to be imposed by the Finance Act, 1942.

Although operations were again dominated by the war and the bulk of the revenue earned was attributable to the capacity of India to absorb silver and to wide demand for lead, in which the offtake by H. M. Ministry of Supply was an important factor, progress was made in regard to the disposal of other products. Substantial shipments of copper matte were made and, since the close of the period, a contact has been arranged for the sale of a considerable tonnage of nickel speiss.

On the other hand, shipments of zinc concentrates have been curtailed.

Despite the inevitable increase in operating expenditure due to the advance in the landed cost of essential supplies at Namtu, all departments have maintained a high level of efficiency.

Accounts:—The Trading Account discloses a profit of Rs. 1,17,64,823. After providing for Depreciation and Taxation and Net Profit carried to Appropriation Account is Rs. 52,46,295.

	Rs.
The Net Profit of	52,46,295
added to the balance brought forward from the preceding year	38,07,120
leaves a distributable profit of	90,53,415
which has been appropriated as follows:—	
Dividend No. 34 .. .. Rs. 29,62,244	
Dividend No. 35 .. .. „ 25,39,067	
	55,01,311
leaving a balance to be carried forward of	35,52,104

Since the close of the Accounts, Dividend No. 36 of 3 annas per share, amounting to Rs. 25,39,067, was paid on September, 1941.

Ores Reserves.—The ore reserves remaining in the Mine at 30th June, 1941 are estimated at 3,130,199 tons assaying 15.1 ozs. Ag, 19.5 per cent. Ph., 12.1 per cent. Zn., and 0.84 per cent. Cu. compared with 3,411,192 tons assaying 15.7 ozs. Ag., 20.4 per cent. Pb., 12.6 per cent. Zn., and 0.90 per cent. Cu., at 30th June 1940.

Chairman.—Mr. P. E. Marmion.

ALKALI & CHEMICAL CORPORATION OF INDIA, LIMITED

Audited accounts for the year ended 30th June, 1941:—

The total subscribed and paid up capital of the Company has increased during the year from Rs.52,69,000 to Rs.91,96,440, the 4,34,000 Ordinary Shares held by the *Imperial Chemical Industries (India) Ltd.* and their nominees, which were shown as paid up as to Rs. 5 in the last Balance Sheet, being now fully paid, whilst 1,75,644 Ordinary Shares have been subscribed for by Preference Shareholders under their option, up to the 30th June, 1941.

The accounts cover a year's working of the Calcutta Factory and a year of construction of the Punjab Factory. The Company's Calcutta Factory has worked satisfactorily throughout the year. The products manufactured have continued to be satisfactory and no difficulty has been experienced in disposing of them. Construction of the Punjab Factory has continued in spite of increasing difficulty in obtaining early delivery of plant and engineering supplies.

After provision has been made for Depreciation and Obsolescence the accounts disclose a net profit of Rs. 2,09,749 against which the Directors have allocated the following:—

	Rs.
Income and Super-Tax Reserve	35,000
Loss brought forward from last year	39,546
Preliminary Expenses	38,311
Brokerage	18,409
Preference Dividend for the quarter, 1st April to to 30th June, 1941	38,750
Leaving an unappropriated balance of which they recommend should be carried forward. ..	39,733

In addition to the amount provided by the Directors against payment of Preference Dividend and the balance carried forward, sufficient profits have been made during the first quarter of the Company's financial year commencing on the 1st July, 1941, to pay the Preference Dividend in respect of that period and the Directors recommend payment of a dividend of 5 per cent per annum, free of Indian Income Tax, on the Preference shares in respect of the half-year ending 30th September, 1941.

Secretaries:—The Imperial Chemical Industries (India) Ltd.

Authorised Capital—Rs. 5,00,00,000 *in* 33,50,000 *Ordy. of Rs.* 10 *and* 1,65,000 5 *per cent. Cum. Pref. of Rs.* 100. *Issued and Subscribed—Rs.* 91,96,440 *in* 6,09,644 *Ordy. and* 31,000 *Pref., both fully paid up.*

Synopsis of the balance sheet as at 30th June, 1941:—

(*Half-yearly meeting* 1*st December*, 1941 *at* 3 *P.M.*)

Audited accounts for the half-year ended 30*th September*, 1941:—

	Rs.	A.	P.
After writing off for Depreciation Rs. 2,00,000, the accounts show a profit of	14,36,838	6	5
To which has to be added the balance brought forward from the last account, namely ..	44,242	2	0
giving a total of	14,81,080	8	5
From this is deducted the amount set aside as a Reserve for Taxation	11,00,000	0	0
leaving a balance for disposal of	3,81,080	8	5

The directors recommend that this should be dealt with as follows:—			
To paying the dividend on the Preference Shares for the half-year ended 30th September, 1941 at Rs. 3-8 per share (i.e. 7 per cent. per annum) free of Income-Tax	49,000	0	0
To paying a dividend on the Ordinary Shares at Rs. 17-8 per share (i.e. 35 per cent. per annum) free of Income-Tax	2,45,000	0	0
To carry forward	87,080	8	5
Total ..	3,81,080	8	5

The Company's mills continued to work 45 hours weekly until the end of August when, on account of more orders for sand-bags being received by the Indian Jute Mills Association, working hours were increased to 50 with effect from September last; it was subsequently decided in view of the stock position and improved shipping prospects that the hours of work be further enhanced to 54 hours per week as from October 13th.

In America, the industry's chief market, consumption of hessians during most of the period under review was quite well maintained and a good demand has existed for the replenishment of stocks which had become reduced on that side owing to the scarcity of shipment space available for jute goods from India.

The Official restriction of this season's jute crop encouraged speculative operations which have recently had the effect of forcing prices of the manufactured article, in conjunction with the raw material, to dangerously high levels.

The general outlook in these critical times must be regarded as uncertain.

Managing Agents.—Messrs. Kettlewell Bullen & Co. Ltd.

Authorised, Issued and Subscribed capital—Rs. 28,00,000 in 14,000 *Ordy. and* 14,000 *Pref., both of Rs.* 100 *each, fully paid up.*

$ Includes Rs. 45,000 transferred from Dividend Equalisation Fund.

(*Annual meeting, 18th November, 1941 at 4 P.M. at Bombay*)

Audited accounts for the year ended 30th June, 1941:—

After providing for depreciation the sum of Rs. 5,84,262 and for taxation the amount of Rs. 2,00,000 and after partically writing off the loss on the Town Class steamers amounting to Rs. 99,998-6-5, the net profits of the Company during the year under review, including the balance of Rs. 18,072-7-8 brought forward from the previous year, amount to Rs. 3,17,290-12-1. The directors have sanctioned the sum of Rs. 22,500 as Bonus to the staff out of the above amount, which leaves a balance of Rs. 2,94,790-12-1 available for distribution.

The directors recommend that this balance available for distribution be disposed of as under:—

	Rs.	A.	P.
A dividend of Rs. 15 per Preference share for the year, less Income Tax	90,000	0	0
A dividend of Rs. 10 per Ordinary share or at the rate of 4 per cent for the year, free of Income Tax	1,80,000	0	0
Balance to be carried forward	24,790	12	1
Total ..	2,94,790	12	1

All the ships of the Company, which had been commandeered by the Government of India, when the war broke out, continued to remain with the Government during the year under review. Not a single ship has yet been released by the Government. The Company could not, therefore, do anything to revive the regular maintenance of its different cargo and passenger services which had been seriously disorganised and in many cases completely discontinued since the outbreak of the war.

The costs of operations have been going up. The Company has tried to meet these by such economies as it was possible to effect. The rates of charter have substantially increased. The amount to be paid by way of both marine and war risk were increased during the year under report and this has also increased the cost of insurance. These values were further increased at the end of the financial year with the result that it would substantially increase the cost of insurance during the coming year. The cost of coal has also increased. The adverse effect of these increases has been mitigated by the rise in the rates of freight as well as by a small increase in the rates of passage fares. The large number of voyages performed by the *s.s. Chandravati* this year as compared with the number of voyages performed last year should also be set off against the adverse effect of the factors mentioned above. The working of the Company has, therefore, during the year under review shown better results than those of the previous year.

The amount for which the marine insurance cover is taken out by the Company for its Fleet comes to 10,36,710 and the fleet of the Company other than what is commandeered by the Government has been insured for 1,55,899 for marine risk for the current year.

The amount for which the War risk cover is taken out by the Company for its Fleet come to ₹ 10,15,990. The steamers of the Company other than those commandeered by the Government are at present insured for 1,18,437 against War risk.

Managing Agents.—Messrs. Narottam Morarjee & Co.

Authorised, Issued and Subscribed capital—Rs. 60,00,000 *in* 18,000 *Ordy. and* 6,000 6 *per cent cum. Pref., both of Rs.* 250 *each, fully paid up.*

(*Annual meeting 1st December*, 1941 *at* 4 *P.M. at Bombay*)

Audited accounts for the year ended 30th June, 1941:—

After providing a sum of Rs. 19,00,000 for depreciation and the sum of Rs. 44,00,000 for taxation, the net profits of the Company during the year under review, including the balance of Rs. 89,838-1-2 brought forward from the previous year, amount to Rs. 21,48,357-2-11.

The balance available for disposal is 21,48,357-2-11 and the directors recommend that the same should be disposed of as under:—

	Rs.	A.	P.
Dividend on 14,83,978 shares at the rate of Re. 1 per share (free of income-tax) ..	14,83,978	0	0
Bonus on 14,83,978 shares at the rate of As. 4 per share (free of income-tax) ..	3,70,994	8	0
Bonus to Staff	60,000	0	0
Staff Amelioration Fund	50,000	0	0
Balance to be carried forward	1,83,384	10	11
	21,48,357	2	11

The most outstanding event in the working of the Company during the year under report was the requisitioning by the Government of India of a large number of its steamers. Not only did this policy of requisition seriously affect the position of the Company in the carriage of rice from Burma to India but it also made the Company progressively a large undercarrier in that trade. The cargo carried by the Company from Burma ports witnessed a fall of over 2,60,000 tons as compared with the quantity which the Company carried in the previous year. It could not carry even its own quota and its progressive undercarriage in this most important trade on the coast exceeded 60,000 tons. The Directors would like to contrast this unfortunate position of the Company with the special facilities provided for the B.I. and the Asiatic Companies by the British Ministry of War Transport to enable them to maintain their position and even to secure a larger share than their quota in this trade. The British Ministry of War Transport gave these British shipping companies steamers after steamers which enabled them to have more than 107 sailings of these steamers during the year under review from Burma Ports. It is, however, strange justice or deliberate injustice that, while the Government of India virtually compelled the Company to hand over four of its steamers by requisitioning them to the British Ministry of War Transport during the most busy part of the year, it could not secure a single steamer from that Ministry for the Company—while that Ministry was giving steamers after steamers to the British shipping companies even when the company undertook to run them on account of that Ministry.

The Company had to face the rising cost of operations during the year under review. In addition to the allowances, a further allowance of Rs. 27 per month was granted to all the Officers and Engineers of the steamers of the Company with effect from 1st January, 1941. An additional war risk allowance varying from 25 to 50 per cent. over pre-war wages had to be sanctioned to the crew of the requisitioned ships according to the limits within which they plied. The wage bill of the Floating Staff has, therefore, gone up by over Rs. 6,50,000 during the current year and it will increase still further in the year to come. The price of coal has risen over 25 per cent. The Bills for stores and victualling charges have gone up by over Rs. 2,20,000. Although the actual cost of insurance has risen by Rs. 13,00,000 it does not give the correct picture. The war risk over the requisitioned vessels has been carried by the Government but the Company does not know how it will affect the rates at which compensation would be paid for the requisitioned ships. The insured value of the whole fleet has been further increased by 25 per cent. both for marine and war risks. The rate of premium for marine risk for the coming year has risen by over 26 per cent. The rate of war risk has gone up by 50 per cent from the 2nd June and it is difficult to say whether that rate will be maintained in the coming year. The marine insurance alone will increase the cost in the next year by nearly five lacs of rupees, while if no further ships of the Company are requisitioned and if the present war risk is maintained the additional burden that will be imposed on the Company will exceed 11 lacs of rupees.

The adverse effects of the factors mentioned above were mitigated by the increase in the basic rate of freight, which stood at the end of last year at Rs. 17 and Rs. 18 from 1st December; Rs. 18-8 from 1st March and Rs. 21-8 from 1st June, 1941. Moreover, the rates obtained for the carriage of salt and coal helped considerably in improving the economic working of the Company. Even the basic rate of Rs. 21-8 for the carriage of rice from Rangoon to Bombay, a voyage of 12 days which came into operation only from 1st June, the Directors would like to point out, compares very unfavourably with the rate of Rs. 31 fixed for the carriage of salt by the Ministry of War. Transport from the West Coast ports to Calcutta—a voyage of 12 days and with the rate of Rs. 25 fixed by the Ministry of War Transport and the Colombo Bunkering Pool for the carriage of coal from Calcutta to Colombo—a voyage of 6 days. While the result of the working of the Company may be on the whole considered satisfactory under the circumstances in which the directors have to work, the Directors would like to remember that the profits shown in the Balance Sheet have been arrived at without providing for the additional depreciation, which it is essential, should be based on the replacement cost of the vessels. This would necessitate the provision of an additional sum of at least rupees 25 lacs for the two years of the war which, it will be realised, is impossible to find from the working results of the Company. The uncertainties of the future and the factors mentioned above the Directors think, provide the correct criteria for judging properly the working results of the Company.

Howrah:—(7th) 60-2; (8th) 60-12, 60-14, 61-6, 60-12; (10th) 62-6 61-9, 62-8, 62-5, 62-6, 62-4, 61-6, 61-7, 62-3,

62-2, 61-8 (61-9 s.l.) 61-10, 62-12, 62-4; (4th) 64-4, 64-6, 64-3, 64, 64-4, 63-8, 63-4, 63-14; (12th) 63-14, 64-6, 63-13, 64-5, 63-12, 63-4, 63-6, 63-14, 64-6, 63-2, 63-8.

Hukumchand:—(10th) 15-14 (15-8 s.l.); (11th) 15-10; (12th) 15-4, 15-9 (15-7 s.l.).

Hukumchand Pref.:—(7th) 162, (12th) 163-8 s.l.

India:—(7th) 414 s.l., 407, 409-8, 408, 410-8, 416; (10th) 414, 415, 420, 422, 424, 426, 418-8, 421, 424-8, 416, 418, 419, 423, 425-8; (11th) 420, 425 (418 s.l.) 423, 418, 426, 427, 427-8, 429-8, 416, 418-8, 419, 420, 421, 422, 421-8, 424-8, 424; (12th) 422, 423 (425 s.l.) 425, 428, 424, 427, 429-7, 427-8, (432 s.l.) 425, 428-8, 426.

Kamarhatty:—(7th) 540, 548; (8th) 547, 547, 550, 547 (10th) 560, 562, 563, 564, 567, 575, 583, 578; (11th) 586 s.l., 590, 593, 596, 588, 586, 591; (12th) 591, 590, 593, 596, 586, 588, 587, 587 (592, 595 s.l.) 585, 592.

Kanknarrah:—(7th) 447-8 s.l.; (10th) 457, 466, 465, 477-8, 472, 481-8; (11th) 481, 475 (470 s.l.); (12th) 476 s.l., 480, 482.

Kelvin:—(10th) 568, 584, 585; (11th) 585, 591, 586, 589; (12th) 583.

Kinnison:—(10th) 833, 880, 787, 797, 850, 854, 835, 820, 817, 815, 818, 823 (820 s.l. C.T.) 812 s.l., 795; (11th) 815 (814 s.l.) 813, 816, 800, 804, 803, 805; (12th) 810 s.l., 810, 804, 800.

Lansdowne:—(7th) 173 s.l.; (10th) 176, 177; (11th) 182, 181, 180.

Lawrence:—(7th) 446-8; (10th) 618, 592, 605, 608, 595, 597-8, 585, 598, 595, 584; (11th) 595, 600, 690; (12th) 585, 590, 588, 583, 586.

Lawrence:—(10th) 618, 592, 605, 608, 595, 597-8, 585, 598, 595, 584; (11th) 595, 600, 690; (12th) 585. 590, 588, 583, 586.

Megna:—(7th) 59-14, 60-8; (10th) 60-8, 60-12 (61-8, 62 s.l.); (10th) 60-8, 60-12, 61-8, 62; (11th) 60, 60-8, 60-4 (61-2, 60 s.ls.) 61-8; (12th) 61, 60-12, 61-4, 61-2.

Naihati:—(8th) 339 s.l.; (10th) 421; (11th) 418 s.l.

National:—(7th) 25-8, 25-6, 25-4, 25-11, 26, 26-2; (8th) 25-13 (25-12 C.T.); (10th) 26-12, 27, 26-10 (26-4 s.l.), 26-9, 26-8, 26-4, 27-2; (11th) 27-8, 27-2, 27-3, 27-7, 27-6, 27-10, 27-14, 27-12, 27-4; (12th) 27-4, 27-8, 27-10, 27-3, 27-7, 27-11, 27-5 (27-14 s.l.), 27-6, 27-12.

Naskarpara:—(7th) 20-4, 20-5; (10th) 20-14, 21-2, 21-7, 20-13; (11th) 21, 21-4; (12th) 21.

Nellimarla:—(7th) 13-8, 13-9; (10th) 14-4, 14-6, 14-10, 14-12, 15; (11th) 14-14, 15, 15-4, 14-12, 14-10 C.T., 14-13, 15-1, 15-5, 15, 15-4, 15-2, 15-6; (12th) 15 s.l., 15, 15-4, 15-3, 15-2, 15-6, 14-14, 14-13.

New Central:—(10th) 355, 365, 367, 369, 370, 375, 372, 377; (11th) 380, 383, 379; (377 s.l.), 378, 380 s.l.; (12th) 379-8 s.l., 377, 380, 379, 375.

Northbrook:—(7th) 41-6; (8th) 41-8; (10th) 49-8, 50, 50-8, 51, 51-8, 40-13 (52 s.l.), 44-12, 49-2, 49-4; (11th) 50, 50-8. 49-8, 50-8, 50-4, 50-12; (12th) (12th) 49-7, 48-12.

Nuddea:—(7th) 71, 71-8; (8th) 70-8; (10th) 73, 73-8, 71-2; (11th) 71 s.o.l., 73-8, 73, 74 (74, 74-8 s.l.), 72-8; (12th) 72-4, 72-12, 72, 72-8, 72.

Orient:—(7th) 220; (8th) 222; (10th) 233, 234 (231, 233-8 s.ls.) 236; (11th) 234 (233, 231 s.l.), 232; (12th) 234-8, 230, 229, 227, 232, 229.

Presidency:—(7th) 6-2, 6-6, 6-3, 6-7; (8th) 6-2, 6-6, 6-5; (10th) 6-6, 6-10, 6-7, 6-11, 6-12, 6-5. 6-6; (11th) 6-7, 6-11, 6-8, 6-12, 6-6, 6-10, (6-7 s.l.) 6-3, 6-4, 6-9, 6-13, 6-10, 6-11; (12th) 6-7, 6-11, 6-6, 6-10, 6-9 (6-6 s.l.) 6-12.

Waverley:—(10th) 4-6, 4-8, 4-4, 4-3, 4-5, 4-7, 4-9,; (11th) 4-5, 4-6, 4-8; (12th) 4-6.

Rameshwara:—(8th) 10; (10th) 10, 10-4, 10-5, 10-7, 10-11, 10-6, 10-10, 10-12; (11th) 10-8, 10-12, 11, 10-9, 10-15, 10-4; (12th) 10-5, 10-9, 10-6, 10-10, 10-4, 10-8.

Reliance:—(7th) 62, 62-8; (10th) 63-6, 63-8, 64, 64-12, 64-8; (11th) 64-8, 65, 65-8. 65-4, 64-6, 64-10; (12th) 65, 65-4, 65-12, 65-6.

Soorah:—(10th) 13-14, 14, 14-4, 14-8; (12th) 14-6 s.l.

Standard:—(10th) 408, 407, 405, 425, 427-8, 409, 411, 425, 410, 420, 422-8, 415 (419 406 s.ls.); (11th) 408, 410-8, 411, 405, 402, 416 s.l., 407, 403; (12th) 404, 402-8, 405(404-8, 406-8, 402, 399.

Union:—(10th) 595, 598 605, 600, 602, 595, 597-8, 593 (600 o.l.) 585: (11th) 603, 575, 595 s.l.; (12th) 575, 579.

TEAS:

Amluckie:—(7th) 80. 81.

Basmatia:—(11th) 15-12, 16, 15-10.

Barduar Tea and Timber:—(11th) 4-6, 4-8.

Bateli:—(11th) 6-10; (12th) 6-6, 6-8.

Betjan:—(11th) 33-12; (12th) 33-12.

Bhatkawa:—(7th) 59 C.T.

Bishnauth:—(10th) 28-12, 29; (11th) 28-12, 28-14, 29-2.

Borpukhuri:—(10th) 12, 12-4.

Carron:—(7th) 750; (11th) 825, 829-8.

Dauracherra:—(8th) 14-2. 14-6; (10th) 14-6, 14-8; (11th) 14-6.

Dhunseri:—(11th) 3-1.

Dhunseri (Pref.):—(12th) 4-6, 4-7, 4-9.

Dilaram:—(7th) 140 C.T.

Dhelakhat:—(8th) 27-4, 27-8.

Dufflaghur:—(12th) 14-7.

East India:—(11th) 10-4, 10-8; (12th) 10, 10-4.

Ethelbari:—(10th) 12-8, 12-12; (12th) 12-8.

Gielle:—(11th) 12-12, 13.

Gillapukuri:—(12th) 22-4.

Gungaram:—(12th) 430.

Grob 'B':—(12th) 8-12.

Hansoua:—(8th) 12-4, 12-8; (12th) 12-6, 12-10.

Hattikhira:—(8th) 22-14; (11th) 23, 23-4.

Hasimara:—(12th) 48-8.

Hoograiuli:—(8th) 17-8.

Iringmara:—(7th) 70.

Lackatoorah:—(12th) 19 s.o.l.

Loobah:—(10th) 6-6; (12th) 6-5, 6-6, 6-10.

Murphulani (Pref. ordy.):—(9th) 10; (10th) 10, 10-4.

New Terai:—(10th) 12-6, 12-10; (12th) 12-8, 12-14, 12-14.

Pahargoomiah:—(10th) 284 C.T.

Patrakola:—(7th) 1,005; (11th) 1,005 C.T., 1,020-8.

Rajabhat:—(7th) 39-4, 39-8.

Rajnagar:—(10th) 9-2, 9-6, 9-10; (12th) 8-9. 8-12.

Ranicherra:—(7th) 12-4, 12-8.

Rutema:—(10th) 10-12, 11.

Rajgarh:—(7th) 39-4, 39-8; (11th) 12-8, 12-12.

Rajnagar:—(7th) 9.

Sarugaon:—(10th) 10-8. 10-12; (11th) 10-14, 10-8; (12th) 10-8, 10-12.

Teloijan:—(10th) 8-5, 8-9.

Tezpore:—(11th) 8-8, 8-12; (12th) 8-12, 9.

SUGARS:

Belsund:—(7th) 4-13, 5-1; (12th) 5-2, 5-6, 5-3, 5-7.

Buland:—(11th) 24-12 s.l., 25; (12th) 5-2, 5-6, 5-3, 5-7.

Balrampur:—(11th) 10-4.

Champarun:—(7th) 19-15, 20, 20-4, 20-6; (10th) 20-3, 20-2, 20-4, 20-8, 20-2; (12th) 19-12 s.l., 20-2, 20-6, 20-1, 20-5, 20, 20-4.

Carew & Co.:—(7th) 13-2 (12-8 s.l.) (10th) 12-14, 12-15, 13, 13-4; (11th) 12-14, 13, 13-4; (12th) 13-4 s.l.

Cawnpore:—(7th) 25-8, 25-12; (10th) 25-12, 26, 25-10 C.T.; (11th) 25-12 s.l., 25-4, 25-9; (12th) 25-3, 25, 25-4, 25-6, 25-10.

Gaya:—(10th) 110 C.T.

Murree Breweries:—(7th) 18; (8th) 18-4, 18-8; (10th) 18 s.l., 18-8.

ISSUED WEEKLY

Vol. XXVIII. No. 22 SATURDAY, NOVEMBER 22, 1941 Price Re. 1

Insure and Increase Nation's Strength

Financial Independence of the individual is the measure of Nation's financial strength.

In this hour of world turmoil, all Life Insurance Policy-holders should take stock of their insurance cover and ascertain just how strongly they are fortified against the unpredictable that lies ahead.

And, those individuals who have not yet made provision for their protection need do so without delay and thereby contribute towards Nation's strength.

Be advised and write to-day to.

WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

There is no change to report in money market conditions, interbank call money being in plentiful supply and quoting nominally ¼ per cent in Bombay and ½ per cent in Calcutta. If the money market were behaving according to norm, November should see the beginning of a brisker demand for money and a hardening tendency in money rates. Far from there being any sign of an improving demand for trade financing, banks have to report a reduction in total advances. Between October 3 and November 7, advances made by scheduled banks in India have declined from Rs. 109.74 crores to Rs. 104.18 crores. Bills discounted by member banks show a rise of Rs. 1 crore. But, on balance, funds availed of from banks for trade purposes have gone down since October. Nor are there indications that there will be any early change from the present state of affairs.

It is, therefore, surprising that the applications on the weekly treasury bills tender day were only Rs. 34 lakhs in excess of the amount of Rs. 2 crores offered. Compared to the total applications received in the last week, this week's figure records a fall of Rs. 1 crore. Considering that bidding was not keen, the average rate of accepted tenders at 13 annas per cent per annum must be considered reasonable. This compares with annas 12 and pies 2 November 11. Sales of tap bills have amounted to the satisfactory total of Rs. 112½ lakhs. At the unchanged rate of Rs. 99-13-9 intermediate bills continue to be sold.

That the credit of the Madras Government is rated high in banking circles, is again proved by the extremely favourable rate at which the Southern Presidency has been able to secure its three months accommodation for Rs. 50 lakhs. The average rate of accepted tenders is annas 13 and pie 1, which is only 1 pie higher than the Central treasury bills rate. A difference of 1 pie is the smallest disparity so far recorded between Central Treasury Bill rate and Provincial Treasury Bill rate. It is also significant that applications in the case of Madras treasury bills were as much as Rs. 1.26 crores.

The returns of the Reserve Bank for the week ended November 14, disclose a further repetition of the operations of the previous week. Sterling securities in the issue department have again been added to by Rs. 9 crores. This is offset partly by the withdrawal of rupee securities for Rs. 4 crores. Net expansion of currency is, therefore, Rs. 5 crores. In the week ended November 7, sterling securities in the issue department rose by Rs. 12 crores as against which rupee securities were withdrawn for Rs. 8 crores, resulting in a net currency expansion of Rs. 4 crores. There has, thus, been a total expansion of currency for Rs. 9 crores in the first fortnight of November. Thanks to these operations, active note circulation in India registers a new high record of Rs. 282.90 crores as compared with Rs. 279.95 crores on November 7, and Rs. 274.09 crores on October 31. To the extent that rupee securities have been withdrawn for Rs. 4 crores from the issue department, the Central Government's cash balance receives a substantial cut. The deposits maintained by the Government of India with the Reserve Bank stood at Rs. 8.82 crores on November 14, comparing with Rs. 11.41 crores on November 7, and Rs. 22.47 crores on October 31. That the Government could withdraw as much as Rs. 12 crores of rupee securities from the issue department; that, in other words, the Government could afford a cut of Rs. 12 crores in their cash balance, is a measure of the comfortable ways and means position which they enjoy. The present cash balance of Rs. 8.82 crores is more than adequate for all requirements as treasury bill maturities in the remaining weeks of November are on the small side while, treasury bill sales are being effected by tender on the basis of Rs. 2 crores per week as well as through the tap. It is not unlikely, however, that the offer may be reduced or tap closed. As a result of the transfer of sterling securities to the issue department, foreign balances in the banking department have registered a fall from Rs. 64.38 crores to Rs. 58.45 crores.

As has been pointed out in recent weeks in these columns, the aim of the authorities is obviously to bring down the level of rupee securities in the issue department to that which prevailed on the eve of the execution of the scheme for the repayment of sterling debt. Rupee securities in the issue department as on November 14 were Rs. 46.48 crores, comparing with Rs. 49.62 crores on March 21. With the large-scale sterling payment which the Government will be receiving by the end of this month, the restoration of rupee securities in the issue department to the level of March 21 may be taken as certain. Both from the point of view of the swollen size of sterling securities and the reduction of rupee securities in the issue department, the stage is aptly set for the carrying out of the redemption of 3½ per cent India sterling stock.

Exchange continued steady during this week also with a fair amount of business passing.

Banks were sellers of T.T. on London for Ready up to six months forward at 1s. 5 31-32d., and banks were buyers of T.T. on London for Ready up to six months forward at 1s. 6 1-32d.

D. A. sight bills quoted 1s. 6 9-32d., for three and four months.

Interbank call money remains at ¼ per cent, lenders.

Firms' [illegible] for call and short is ¼ per cent, and ½ per cent from one to [illegible] months deposits.

Finance Abroad

Thursday Morning.

THERE has been little or no movement in exchange rates over a month. Conditions have been stabilised over a wide front and the fact that in spite of renewed uncertainties the yen is still quoting 14d. reveals the artificiality or amenability to control that seems the outstanding feature of financial conditions during the war. The position in London is said to be more easy than ever. The usual brief cable discussing money conditions last week suggested that call money could be had at ¾ per cent because there was a lot of money. More suggestion of plethoric conditions is the drop in the Treasury Bill rate to below 61 per cent. The volume of applications for the weekly offer of 75 million sterling at 163 million was again on the high side and the market quota was lower than before. The keenness of Banks to take up Treasury Bills may be satisfied in the way of providing a larger volume of Treasury deposits, as shown this week when 50 million will be put up. The regular weekly addition to the floating debt and the corresponding discharge of bills can hardly be calculated with certainty, but in view of periodic increases in Treasury deposits it is clear that part of the increase in note circulation is being readily diverted to the Treasury through the Clearing Banks. The year-end statements of Banks will show how much of the war effort is being financed by the Big Five. The demand for funds from industry in a time of crushing taxation can hardly be great, but there is always the fact that firms engaged on War work would be naturally disposed to keep larger cash balances with banks to meet additional demand for wages. The wage-earner's share of the national income, in spite of the memorandum on Wage Policy issued in July must have risen. The principle to which Government is committed is one of frozen wage standards. That principle excites opposition in Britain as in America and the token strike on the Cydeside is more than a sign of the times. The muffled echo in Scotland of the exchanges between the U. M. W. and the White House is certainly a measure of the dissatisfaction prevailing against Mr. Bevin who has failed to meet the now familiar demand to socialise the war. The resurgence of the shop stewards movement in this war shows that dilution has not proceeded very far. The way in which Mr. Churchill meets the Clydesiders' grievance will be as much a test as that arising from Russia's need for ample assistance in the immediate future.

The change in the bullion reserve of the Bank of England like the rise in the note circulation to over 700 pounds million last week was one that was not unanticipated. While it may be convenient to emphasise the vast difference between the reserve held by the Bank of England and that held by the Issue Department of the Reserve Bank it must be stated here that the Exchange Equalisation Account must still hold vast assets. The various payments agreements as also the device of partial blocking of assets employed in the past year must have necessarily reduced normal demands on the reserve of assets held by the Treasury but the withdrawal of gold in recent weeks from the Bank suggests that some gold has been given to the Account, presumably in return for Treasury Bills. The process is by no means unfamiliar, but in the absence of material particulars little can be said by way of comment.

The sharp recovery in Bankers' deposits with the Bank of England is an indication of more than usually easy conditions in the last week. This plentitude is again a bull point for giltedged. Both War Loan and Conversion Loan stand high and changes in Old Consols betrayed only temporary easing. Whatever be the scepticism as to the fate of Shell's continental assets the present price flatters the yield. While Shell's greater negotiability may explain part of the premium the steady ascent in Anglo-Iranian shares last week to over 2 pounds per 1 pound stock shows that the Stock Exchange has recognised that the Middle Eastern outlook is clearing up. The latest report of an advance into Libya may indeed stimulate a recovery of dimensions. This may be attended with favourable consequences in India where a new savings drive is ready to start.

The Far Eastern currencies are feeling little of the strain occasioned by the non-possumus oration characteristic of the Premier. Not many are aware of the fact that Gen. Tojo dislikes the Business Families. It is no longer a job of turning from Mitsui to Sumitano for a Finance Minister. The Army men, of whom the Premier is typical are too much impressed by fascist technique to think of the effects. The only statement attributed to the leading Japanese financial paper the *Chugai Shogyo* indeed suggests that on foreign issues there is complete unanimity. The reference of General Tojo and the Foreign Minister to the freezing order of July shows that the blow went home. Their recrimination is of little consequence when the current calculations of the A. B. C. D. front take no note whatsoever of Japan's aircraft carriers or her new bases in the Marshall and Caroline Islands. There has been no further reference to reprisals after the temporary closure and reopening of the Pearl River. This is not the first time that Japan has interfered with navigation in Chinese waters. It is now assumed that the blockade has developed several leaks and the reinforcement of Hong Kong garrison by a Canadian Contingent has served to tell the Chinese who their friends in adversity are.

It is hardly possible to say whether border clashes will affect the Thai Currency. A word about the baht would appear to be in order. Though the exchange on Bangkok was said to be around the old level of 2 shillings to the baht it is to be remarked here that the present widely accepted mode is one of quoting the rate by way of Singapore. The rate given indeed suggests that the baht has appreciated rather quickly but it may also be due to the fact that the Strait dollar and the baht are taken as nearly equivalent. The Straits dollar is however worth 25 5|32d. and the rupee is therefore worth much less than a dollar. The Straits currency is quoted at Rs. 155-158 per 100 dollars at a rate that is given over a long period. The point seems rather obscure but may be easily settled if only exchange rates on Bangkok are published along with other quotations in the newspapers.

There has been little or no mention of developments in Europe after the reports that the Nazis flooded Lisbon with franc notes and that they were also avid buyers of Suez Canal shares. It has been suggested that if a fair-sized block of Suez Canal shares could be had India should get them because she has as much interest in the Canal as Britain which appoints official salaried Directors (Lord Hankey was one and Sir Ian Malcolm is another) and has now more or less exclusive control over both Canal dues and higher strategy. If a part of India's sterling balances could be used for getting Suez shares, public opinion in India would certainly be impressed.

A point to which reference must be made here is the high price of gold. The Bombay rate for gold is definitely over Rs. 43 per tola. A difference of over 1 Re. as compared with the rupee equivalent of the London price of gold suggests once again that demand for hoarding has driven up the price. The uncertainties of the war are by no means greater than in the past year and it is queer that without any change in the rupee-dollar rate gold has gone up of its own accord. It has been explained since that in Rangoon there has been an even more pronounced rise. The rate per tola there is said to be Rs. 65 or so presumably owing to the local short supply. Export and import alike are forbidden under the defence regulations hence the big jump in the price of gold. The phenomenon has been described in the *Indian Express* and explained. Calcutta and Bombay prices are more or less in line but the Rangoon price shown that some king of control or official intervention is desirable.

The difficulty of making any forecast about coming events does not deter one from saying that the response to the Defence loans will get better and better. The total raised up to last week exceeds Rs. 96 crores. Bengal has retained an enviable primacy in regard to the amount of money invested in Defence loans. That explains why there is a widely held belief that the Calcutta and District Savings Week should be a resounding success. The report that Liverpool raised 8.4 million sterling in a single Warship Week proves how practical a form civil pride can take. The report that that great Liberal family, the Holts provided 1 million sterling for the total raised in Liverpool's Warship Week indicates how the opulent citizen should support the good cause with which pockets and patriotism are alike identified.

War-time Expansion

The course of prices and of currency circulation since the outbreak of war is a matter of great concern alike for the authorities and for the public at large. For nearly three weeks in succession, the weekly statements of the Reserve Bank have registered a notable increase in circulation; and a scrutiny of the figures suggests that the root cause of this phenomenon, namely the increase in the foreign balances, continues unabated. Likewise, the Calcutta index of wholesale prices for all commodities has been almost consistently on the upward trend throughout the current calendar year. There have been, it is true, notable breaks, one in February and the other in September. And the significance of the latter may be deemed to have been enhanced by its coincidence with a fall of two points in the cost of living index for the city of Bombay. These breaks cannot, however, obscure or detract from the main upward trend of prices during the second year of the war. For, October has made up for the loss of the earlier month, so far as wholesale prices are concerned; and the temper of the markets leaves little room for doubt that we are living in times when retail prices run well ahead of wholesale prices.

The time has, therefore, arrived when the position regarding currency and prices should be examined carefully with a view to revising, if necessary, some of the basic principles on which currency and credit and price control are to be administered. In this connection, it must be remembered there are two disparate, though by no means unconnected pictures, which we have to study separately, and then correlate as best as we can. There is first the picture of the changes that have occurred in the monetary factor, of which the fluctuations in the figures of the Bank's weekly statements is but a part. The other is the movement of prices both wholesale and retail.

Taking the first to begin with, the point to note is that "notes in circulation" stands in the latest statement of the Reserve Bank at over Rs. 302 crores as against Rs. 182.1 crores on September 1, 1939, the date of the outbreak of war in Europe. To this increase of 120 crores, we have to add an amount of about Rs. 12 crores representing the "rupee coin" provided by the Government. One cannot, however, rush to the conclusion that these two amounts together represent the addition to the total amount of the medium of circulation in the country. Nor can we have any precise idea of the percentage increase which it represents. For the amount of silver rupees in circulation has always been a sort of sealed book to the authorities and to the students of finance and currency. Since Queen Victoria coins have long ceased to be legal tender, there had been, presumably a return of defunct coins from circulation. But quite apart from these uncertain factors, there is the known fact that Banks' balances with the Reserve Bank which stood at the beginning of the war at Rs. 26.91 crores are now at the level of Rs. 47.63 crores. One has also to take into account the increase in time liabilities of scheduled banks from a weekly average of Rs. 106 crores in 1939-40 to the vicinity of Rs. 110 crores in October last. The weekly cash balance has also risen during the same period from a little over Rs. 7 crores to well over Rs. 10 crores. It may be readily conceded, therefore, that a substantial fraction of the increase in "Notes in Circulation" has not had its impact on prices.

Nevertheless, the increase in prices has been almost alarming. We pointed out on an earlier occasion that comparison with the last war has been facilitated by the fact that in September 1939 the Calcutta wholesale index stood at 100, the base year being July 1914. The index number for October stands at 151. The Bombay cost of living index reached 131 in August as against 106 at the beginning of the war; and the coincidence of the phenomena of increasing currency and rising prices makes more than a prima facie case for a charge of inflation.

But it is necessary to remember that changes in prices in uncontrolled conditions should be attributed either to changes in the monetary factor or to changes in other economic circumstances. In the present situation, there is hardly a single commodity which is priced higher without experiencing an excess of demand over supply. And when this is true of articles entering into working class consumption, any suggestion that purely inflationary factors have been at work would be hardly tenable. The essence of inflation lies in additions to currency being made without any corresponding addition to the total volume of goods and services. It would be wrong to suggest that such additions to production have not been made as a result of the war expenditure of the Government both on their own behalf and on behalf of other governments. There could be no inflow of sterling into the coffers of the Reserve Bank—and that is what causes the increase in circulation—unless India provides goods and services for foreign countries to pay for.

Nevertheless, what is not inflation from a strictly scientific point of view may be so from a broadly social point of view. When money flows into the country as a result of the export of goods and services on war account, it is bound to have an inflationary effect, if at the same time there is no increase in the volume of goods produced and exchanged within the country. And, if, at the same time, there is demand from abroad for some of the consumers' goods produced at home, then the monetary and the non-monetary factors combine to accentuate the rise in prices.

It is this position that has to be tackled. The source of this inflation cannot be sterilised except at a serious loss to the nation. But it is up to the authorities to prevent our foreign balances, as they have, indeed, been doing, from having their full effect on circulation. The more potent and beneficial antidote to inflation lies in that stimulus to productive activity which a liberal credit policy can provide. Now that increase in circulation is to some extent unavoidable, and prices are bound to rise even for purely non-monetary causes, both alike suggest the wisdom of increased productive activity. The country must, as the phrase goes, grow up to currency.

Doubtless, the policy of stimulating productive activity by a liberal credit policy will tend to accentuate the evil it is meant to remedy. But it will be readily realised on a little reflection that in the conditions that will obtain during the present war, it would be futile to try to avoid additions to currency. And, if such additions are unavoidable, the ordinary means of preventing them from having an inflationary effect on prices is to get back the money from active circulation through the increase of Government borrowing both in long term loans and in Treasury Bills for short periods. These palliatives will, no doubt, have to be resorted to. But the process of growing up to currency is advisable alike from the short and from the long view of the national economic interest.

The war effort as well as the requirements of the national economy require an outburst of fresh productive activity on a large scale. But strangely enough, there has been nothing to suggest that such expansion is afoot. It is only during the last two weeks that one heard of any notable new flotations. While talks of industrial boom may not be glibly indulged in, there is reason to think that caution in the matter of new enterprise has been somewhat overdone. But considering the problem on hand as one of providing an antidote for inflation, it is far more important to stimulate productive activity over the whole country than to work up a fever of new enterprise in the great industrial cities.

The Function of State Railways of India—II

EARLIER STATE POLICY

Indian railway history may be said to begin in 1844, for the first proposals were made in that year. Actual construction began five years later. The first lines were opened in 1833; that year Lord Dalhousie in his famous Minute had approved of the need for and the desirability of giving definite sanction and stimulus to the construction of trunk lines by "guaranteed companies" incorporated in England. The earliest contracts with the "guaranteed companies" were those between the Secretary of State for India and The East Indian Railway Company, and the Great Indian Peninsula Railway Company, dated August 1849. These two at once were the earliest and the most important among the "guaranteed companies," and the following were the main conditions of the contracts with them:—

1. Land was provided by the Government free of cost, for all works, on a lease for 99 years.
2. Interest at 5 per cent per annum to be paid to the Company, by the Government, on Capital paid into the Treasury, for 99 years.
3. Gross receipts to be paid into the Government Treasury.
4. A reserve fund to be set up for making good deterioration; the first charge on the nett profits of the line being the repayment of interest to Government. The accumulated interest on debt was to bear simple interest at the rate of 5 per cent per anum; and when the profits were larger than the amount payable under the guarantee, one half was to be applied firstly towards payment of interest on the debt and then towards the liquidation of the debt itself. When the debt and interest had been paid off, the company was to take the whole of the surplus nett receipts.
5. The Government had the option of buying the lines within six months after the first 25 years or first 50 years, the sum to be paid to the Company being the full amount of the value of capital stock and all shares, calculated on the mean market value in London during the preceding three years.
6. At the expiration of 99 years, the land and works to become the property of Government, the rolling stock and other movable property being paid for at a fair value.
7. It was open to the Company to surrender the line after completion, on giving six months' notice, when the Government would pay back the capital outlay.
8. Instead of repaying capital directly the Government was empowered to commute this into annuities for the remainder of the term of 99 years, if the purchase was made earlier.
9. Full control and superintendance was reserved for the Government over the Company's servants, and free access was to be had to all books, papers and accounts.
10. An unpaid Government Director, with power to veto, was to be appointed.
11. The Government reserved the power to determine the speed, number and times of running trains, to approve the fares leviable, and to ask for a reduction of these when the line paid over 10 per cent.
12. The expenditure of the Company to be laid before the Government for approval and sanction.
13. The Government would fix the rates to be followed and had power to change or extend.
14. Free carriage of mails and postal servants, and carriage of goods, troops and military stores at reduced rates.

It was under this system of guarantee and control that the great trunk lines of India were constructed, and this system held the field till 1869. At first there were only two companies, but within a decade several others were formed and by 1869, there were as many as eleven companies. The terms of the contracts with these companies were essentially the same as with the East Indian Railway Company pointed out above; only the rate of the guaranteed interest on the capital differed in the various cases, 5, 4½, and 4¼ per cent, according to the market rates prevailing when the various contracts were made.

This system, which was in full swing between 1853 and 1869 was, as later events clearly proved, far too onerous from the point of view of the Indian tax-payer. The evils inherent in this system of guarantee and control became apparent by the year 1869, when Lord Lawrence recorded a most lucid Minute in favour of abandoning this policy and urging the adoption of direct State construction. There was absolutely no risk to the shareholders, because the interest was guaranteed by the Government. They had their five per cent (in the case of two companies, and slightly less in the case of others) whatever happened. As early as April 1861, it was pointed out by Mr. S. Laing, the Finance Member of the Viceroy's Council that the guaranteed system was proving uneconomic from the point of view of the Government. The Management was non-resident, and the data as to primary cost and likely traffic being so uncertain, the companies looked almost exclusively to the guarantee. The element of truth in the belief that in commercial matters company management must be held to be much more efficient and economical than that of a Government vanished entirely when the real company was 6,000 miles away and when the guarantee was absolute. There was no incentive to examine minutely the productivity of the outlay on the works. It is not difficult to show how year after year the Government had to pay, under the terms of these contracts, heavy sums of money to the companies. The whole profit, under these contracts, would go to the companies, and the whole loss to the Government. Looking at these contracts and the heavy expenses the Government had to incur, from this distance of time and in comparison with experience in other countries like Spain and Brazil, it is natural to feel that the Secretaries of State have been far too liberal in their terms to the railway companies. At that time, however, it was felt that this was the only way of attracting British capital and enterprise. It is not possible, and it is certainly of no immediate or practical utility, to prove that they were wrong in coming to that conclusion. In a historical and comparative study, however, it may be necessary to mention briefly the

reasonable criticisms that were levelled against the experiment.

The fundamental objection to absolute guarantees, in connection with newly-laid railways, was that they tended to weaken the ordinary motives to efficient management and superintendence; and some disclosures, in 1867, as to the state of the works on the Great Indian Peninsula line strengthened the apprehensions on such grounds. After the first few years of experience the Government of India themselves began to doubt whether their power of control over the guaranteed companies secured the greatest possible economy in construction. To repeat, it was rightly urged that the companies had only to supply the capital and to receive their interest from the Government, whatever be the outlay and whatever be the result of their undertakings.

This led to the serious evil of extravagantly-constructed lines; it was pointed out that the average cost of Indian railways, single line, had up to 1869 reached about Rs. 170,000 per mile, while their average income was about 3 per cent, leaving the remaining 2 per cent to be borne by the tax-payer. And this happened in spite of the fact that the early railways naturally occupied the best fields for such enterprise, traversing very populous and rich regions. A further reason why this system led to unnecessarily heavy expense was in the multiplicity of agencies involved. Within six years from the opening of the first line, there had been formed under guarantee of interest, eight companies for the construction of about 5,000 miles of railway. So many different agencies naturally led to heavier expenses and more complex machinery than if the Government themselves had taken the whole initiative and accepted working also. Further, the inevitable competition among these different companies for materials and ships naturally tended to raise both prices and the freight charges.

THE DISTINGUISHED SERVICE ORDER, established in 1886, is bestowed on Commissioned Officers of the Royal Navy, the Army, the Royal Marines and the Royal Air Force whose services have been marked by special mention in despatches for "distinguished services under fire, or under conditions equivalent to service in actual combat with the enemy." The badge consists of a gold cross, enamelled white, edged gold. The ribbon is red, with blue edges.

Cost of Living Changes.

For the first time in many months the cost of living in industrial centres fell; during September, the Bombay working class index dropped by two points to 129. The September index was, however, 17 points above that for September 1940. A decisive change has apparently taken place in the second year of war. The change accounts for the happenings in the world of labour and also the concessions obtainable on occasions. The recession in September suggests that the uptrend has been arrested. The principal factor was a quite marked fall in the prices of foodstuffs. Bombay labour benefited also through a fall in the cost of fuel and lighting. Rent has long been a constant item, but the miscellaneous index moved upwards again as also that for clothing. The most important change in the cost of living namely the fall under food articles, has followed the grant of an additional dearness allowance by the Millowner's Association. The position in Ahmedabad in September cannot be discussed but the conditions in August resembled those in Bombay since the prices of most foodstuffs advanced reflecting again the rise in wholesale prices by four points in August. In the case of clothing alone, the Ahmedabad index remained stationary. The general index at 92 was four points above that for July and 14 points above that for August 1940. Since the base year is 1927, as against 1933-34 base adopted for Bombay, the index shows no advance on that for the base year but the essential trend was unfavourable from the point of view of the worker as a consumer.

The rise of two points in the case of the Sholapur index supports the inference that prices have been moving to the disadvantage of the working class. The price of clothing rose in this textile manufacturing centre also and the familiar chart makes it clear that until August the curve was rising, so much so that the Sholapur index was fully ten points above that for August 1940. Similar movements have been reported from other centres for which a working class cost of living index is prepared. It may be marked that the index for Nagpur rose by three points in August to stand at 80. A contrary movement has been reported by Jubbulpore owing to a decline in the prices of food, though the cost of clothing was higher there too. The cost of living index for Madras advanced by two points to 115. The base year in this case is the year ended June 1936 so that it might be argued that the rise over a quinquennium is decidedly moderate. Comparisons made on the basis of percentage variations up to August 1941 as compared with the averages of 1935 however indicate that the increase is well over 30 percent in the case of the five principal working class centres indicating clearly that the price situation needed watching in the terms of the resolution adopted by the third Price Control Conference.

Inter-Imperial Trade

The trade returns for September give more than an indication of the vast changes wrought by the war and still proceeding. The profound influence on the direction of trade cannot be discussed without reference to the changes in the value of imports and exports. Such changes as are ascertainable by reference to the latest seaborne trade accounts include a rise under fruits and vegetables, grain pulse and flour, liquors, provisions and oilmanstores and spices. The increase of Rs. 19.72 lakhs under sugar may seem surprising, but is probably due to the increase of imports generally from Java. The increase must be attributed in part to the pronounced expansion of re-exports, frequently referred to in market reports which declared that stocks of Java and sugar in Bombay were drawn upon to satisfy demands for prompt shipment. The increase in imports of coal in the first half of 1941-42 may seem surprising particularly as India's coal exports have fallen during the same period while the movement may not be directly linked with the increase of nearly Rs. 12 lakhs in the value of India's imports from South Africa. The further increase in the value of oil imports can only be explained by reference to the growth of imports from Burma since April 1941. In spite of temporary fluctuations the value of imports has risen from Rs. 15.31 crores in the first half of 1940-41 to Rs. 18.14 crores in the six months ended September. The expansion of exports to Burma during the same period appears limited, but due regard must be had to the striking increase, by as much as Rs. 5.34 crores, in the Indian exports of cotton yarn and fabrics after April. The Burma tariff has presumably assisted this expansion. There is, however, the fact that India takes more from Burma by way of rice, oil and timber than she sells to her, and the September trade returns will suggest to some that the balance is more than ever unfavourable.

The consistent growth of India's trade with the Colonial Empire in wartime is illustrated by the latest available figures. Imports from Aden, Ceylon and Malaya show a striking increase as compared with the previous year. Imports from British Borneo have fallen while imports from Hongkong have risen, to judge once again by the declared value of seaborne imports. More striking, and probably of lasting value, is the increase to be noted under imports from South Africa Rs. 11.6 lakhs; Canada 1.71 crores; Australia R. 1.74 crores. At a time when imports from Britain have dropped by Rs. 2 crores, import from the Dominions, excepting New Zealand, have shown a continuous increase. The simultaneous expansion of Indian exports to the Dominions suggests that a fresh orientation of foreign trade is taking place. Imports to Aden also, have risen very sharply and Ceylon has bought more like the Straits Settlements. Except for Hong-kong and New Zealand all the British possessions in the list bought more from India this year. In the case of Australia, exports thereto valued

Rs. 4.84 crores clearly exceed imports valued Rs. 2.9 crores. Even New Zealand has bought more than she has sold to India and in the case of South Africa, the growing intimacy of trade connections is proved by the fact that the value of exports in the first half of 1941-42 to the Union exceeded the value of exports to Canada. The growth of trade with the Empire explains why the totals under the value of both exports and imports shows a marked increase on 1940-41 despite the fact that imports from Britain like exports to that country have declined since the last year. These developments cumulative in their results will probably call for more extended notice at a later date.

Work for Tea

It is clear from the annual report of the International Tea Market Expansion Board that the war has checked the valuable propaganda efforts of the Board both in Europe and America. The Swedish campaign had to be liquidated; connections with the Low Countries severed and work in the U.S.A. curtailed drastically on account of the need to conserve dollars. If tea imports into U.S.A. have risen during the last year, it is sufficient testimony to the special efforts made in conjunction with the trade to develop the U.S. market. Work in East Africa was carried further, but the shortage of tea supplies had an adverse effect on the campaign in Egypt. That the U.S. market repays cultivation is attested by the advance in total imports to over 100 million lbs. It is clear that there are still chances of recovering the second largest export market in the world for tea to the permanent advantage of tea producers in India and elsewhere. Of the work accomplished last year, Sir Alfred Pickford, a former sheriff of Calcutta writes hopefully, and expects that the U.S. campaign would be put on a new basis after September 1941. He records that tea imports, as disclosed in statistics, were satisfactory in 1940. The army authorities co-operated with voluntary agencies in organising the service of tea cars at the front. Service with the B.E.F. and the Canadian Contingent came within the scope of the tea car system. This will probably have further consequences for the spread of the tea habit in Canada whose total imports amounted to 40.2 million lbs. in 1940 when the per capita consumption was 3.8 lbs. The report indicates that the U.K. with a per capita consumption of 9.9 lbs. in 1939 remains the biggest market for Indian tea. Changes in taxation cannot have reduced the quantity of tea taken, and even rationing has evidently led to no absolute decline. The decrease in Australian imports from 51.1 million lbs. in 1939 to 45.9 million lbs. is unexpected but the Commonwealth with per capita consumption of 7 lbs. in 1940 is second only to the U.K. Irregularity is characteristic of the consumption trend in South Africa, but it is believed that the native population can be impressed by advertising in the Bantu press. Work on the Rand was pursued deligently to convince native labour that tea is the true cure for mid-day fatigue. The work was extended in 1939 to Northern Rhodesia where tea is now served to workers in one of the large copper mines. Conditions in the copper belt should certainly change for the better if the tea drinking habit gains ground and incidentally prove advantageous to the non-regulating producers like Nyasaland.

Compensation Scheme

The promulgation of the war injuries Ordinance represents a concession to employers who indicated several times that was risks could not be covered by the Workmen's Compensation Act of 1923 which could apply only to the ordinary hazards met with in course of employment. In September 1938, steps were taken in Britain to relieve employers of liability for injury caused by enemy action. The employers' organisation in India were, therefore, on firm ground in asking for special legislation. The result of repeated representations in this regard is the Ordinance issued in July. Under Section 4 of the Ordinance no compensation or damages would be payable under the Workmen's Compensation Act. A subsection gives the injured the power to make a claim as regards any war injury under the terms of the scheme for relief, prepared at the instance of the Central Government. Section two defines the terms used, and Section three empowers the Government to make schemes for relief. Civil defence volunteers, like persons gainfully occupied, are covered by the schemes referred to, and relief may take the form of temporary allowance, a pension or grants for artificial limbs or surgical appliances. Power to vary the terms of any award made as compensation is reserved by subsection 6 of Section 3 in the Ordinance. This, like the previous section authorising Government to alter or rescind any scheme appears to defeat the main purpose, but is probably put in to discourage vain litigation. The common law liability of an employer, as distinct from that imposed by the Workmen's Compensation Act, is also abrogated by the Ordinance which, by letting the employer know that if his man is injured in A.R.P. work he will not be liable, is likely to discourage interference on his part with recruitment for civil defence purposes. The only responsibility cast on the employer is that of giving correct information as to earnings in accordance with any note issued in connection with a claim for compensation. There is the usual penalty for false declarations, and Section 7 retains the usual prohibition against assignments or charges. The Ordinance of 1941 should be welcomed as settling doubts and anxietes natural in wartime and prolonged by delay on the part of Government in taking due notice of observations on the subject at the annual meetings of the Associated Chambers.

Russia's Industrial Advance

Not long ago **Fortune** essayed an appraisal of industrial progress under the three Soviet plans. The progress made in the past twelve years naturally has a direct bearing on her ability to keep on fighting even after the loss of the plants in the Ukraine and the Donetz basin. Though it has been established that progress in Soviet oil production has been limited in the years since 1938, the present output is more than double that attained in 1928. In spite of the fact that the actual increase has fallen short of the control figures it is clear that Russia's pig irons output too is more than double that of 1928. More striking success has attended the second plan in the field of steel production. Russia is now second only to Germany among European producers of steel. Between 1933-37, it is known that steel production trebled and the actual increase in the time of M. Lazar Kaganovitch indeed surpassed the most optimistic estimates. Production since 1937 is said to have risen only slightly. In regard to rolled steel the pace of progress has slackened after the remarkable advance made in accordance with the second plan. Since coal supports the growth of all industry, it is essential to look at the growth of output. It is estimated that output rose by 81 per cent in the first period of planning. A further increment of 99 per cent was obtained under the second plan, and the subsequent increase under the third plan, is of the order of 29 per cent. Progress up to 1939 in other branches of industry was uneven. In regard to locomotives, tractors, motors and trucks the increase since 1937 is highly problematical, but in view of the larger share of national income, assigned for expenditure on defence there must have been an increase in the output of factories that, on a general estimate, can be turned over to the production of tanks and armoured vehicles. Soviet Russia's power production is said to have risen substantially during the currency of the first two plans. But the blowing up of the Dnieperstroy dam makes it difficult to say how much of the additional capacity is retained. In regard to machine tools it is known that Russia's output increased in a marked manner after 1933

and this branch of industry, dispersed in the Urals will help in the recovery rendered necessary by the loss of the Ukraine. The expansion of Russian industrial regions was followed by a trade drive during the second plan. Asiatic markets were captured to the detriment of Britain and Japan. Sugar and cotton goods of Russian origin became common in Central Asia and beyond. By comparison with the grandiose totals set before the production engineers the increase under timber, cement paper may appear modest, but in each case, it can be proved that the output of 1928 has been doubled under the impetus of planning. There is nothing to suggest that Russia has not enough freight cars at present. Substantial rises have been recorded between 1928 and 1937 but there is a possibility of a fall of 14 per cent in total output by 1939. This must be allowed for in any evaluation of Russia's power to build up new foci of resistance in the Volga valley and the Urals.

Egyptian Example

Though nothing has come out of Mr. G.V. Deshmukh's motion in the Assembly asking the Indian Government to remember the difficulties of the Indian cotton grower, it is realised that the fall in prices has been braked by the discussion. And the tepid assurance of the Commerce Member last month has made many argue that money will go into cotton as an investment. It is the sort of argument heard four years ago when there was an unprecedented slump in Indian cotton markets. It is realised at present that, however rapidly mill consumption might grow, there will be a surplus, mainly, of short staple cotton. Britain can take barely half of the quantity she was taking in the preceding three years and the loss of Far Eastern markets together with the news that Britain has finished buying Indian cotton must press heavily on the cotton-gower.

Much has been heard of the attempts made by other cotton-growing countries to deal with wartime difficulties. It is recalled, for instance that the demand for fibres in Europe has fallen off on account of the war, and Egypt, owing to the break with Italy, has difficulty in getting textile imports in addition to the difficulties in selling her cotton. Cotton is and has been the country's principal crop. It is the chief export and, as a cartogram in the **Economist** two years ago indicated Egypt is as much the slave of cotton as of the Nile. The readjustment of Egyptian agriculture has been admittedly difficult; but considerable success has been attained first through the British Government's readiness to help and secondly, through the Egyptian Government's own policy. The policy of the past two years has been reviewed by the advocates of Indian cotton-growers and described as worthy of adoption. It is one of stabilising prices, and controlling dealings. In September, 1939, the Egyptian Government embarked on price control and trade control. The improvement in prices, arising from British military expenditure, produced little benefit because imports became difficult and expensive. Import control followed and the Egyptian Government came out with export subsidies. Then followed a series of measures designed to help the agriculturist. The cotton futures market in Alexandria was placed under control when minimum prices were introduced in

Save for Your Protection

CALCUTTA AND DISTRICT
NATIONAL DEFENCE AND SAVINGS WEEK
NOV 29 TO DEC 6

HOW TO BUY DEFENCE SAVINGS CERTIFICATES

Defence Savings Certificates, each costing Rs. 10/-, can be purchased at Post Offices and through Scheduled Banks by cash or cheque.

If you cannot afford to invest Rs. 10/- immediately you can buy Defence Savings Stamps which cost only As. 4 each. You will also be given a Defence Savings Card on which you can append the Stamps. When you have Stamps to the value of Rs. 10/- you can exchange them at the Post Office for a Defence Savings Certificate.

Save for YOUR Protection! Purchase Defence Savings Certificates and thereby put your money in the safest hands, and remember you may withdraw it any time you wish. It is better to allow your money to remain in the safest custody as long as the dangers and difficulties of war continue.

DON'T HOARD IT—INVEST IT!

ASSAM BENGAL CEMENT COMPANY

UNIQUE ADVANTAGES, NATURAL AND OTHER

ESTIMATE OF PROFITS AND PROSPECTS OF SHARES

"By Eavesdropper"

The Assam Bengal Cement Company Limited, the opening ceremony of whose factory was performed by His Excellency Sir Robert Reid, Governor of Assam, early this week, makes its debut as a producer of Portland Cement with unique natural and other advantages. I was at Chnatak, the site of the factory, a day ahead of the opening ceremony; and I had ample time to see for myself every department of this modern cement works and to study on the spot the facts and figures pertaining to the facilities of production and the opportunities for marketing in this area. I have no doubt in my mind that the child of to-day will be the prodigy of to-morrow.

This is a bold statement to make with respect to an industry in which overproduction was a nightmare till a few months ago and with respect to which the commanding position is held by the mammoth concern, the Associated Cement Companies of India. The understanding arrived at recently between the Associated Cement Companies and the Dalmia group of Cement Companies makes the combine even more formidable. A new cement manufacturing company has, thus, to start its career with the most powerful and best organised groups against it. He will be a foolhardy man, indeed, who ventures to start a new cement company in India, the odds against him being so terrifying.

Not only are the resources of the Associated Cement companies overwhelming, but the well-spread network of factories and the far-flung sales organisation are such as should scare away all newcomers.

The promoters of the Assam Cement Company, as tried and experienced businessmen, had paid due heed to the forces that they would have to contend against. If, in spite of these, the promoters have not only succeeded in securing all the capital they needed and in completing the factory amid all the difficulties of a war with regard to the securing of machinery, but claimed unique profit-earning capacity for their new concern, it is because the Assam Cement Company has five distinctive advantages, of such a striking character, that, in what may be called their territory, they will soon be able to command a more or less monopolistic position.

In the first place, while the Associated Cement Companies have established factories at important strategic centres, north, south and west, their organisation does not include a factory in the vicinity of Eastern Bengal and Assam. The nearest factory to Calcutta and the areas east of Calcutta is the one in Bihar. It may thus be said that the Assam Cement Company will cater to an area to which the Associated Cement Companies and their associates could supply cement only after the transport of the product over fairly long distances.

In the second place, the Assam Cement Company has secured a lease for lime deposits in Sylhet. For nearly 200 years, Sylhet Lime has been famous as the highest quality lime in India. In fact Sylhet Lime was being exported, a hundred years ago, to the Near East and the Middle East. Pointing out that Sylhet Lime has been famous for many years and its manufactures attracted business enterprise as early as the 18th century, Sir Robert Reid said:

> "An early member of the Civil Service, Mr. Robert Lindsey, Collector of Sylhet, in 1778, was quick to see profits to be made out of it and there being no bar then to the Collector engaging in trade, to make a handsome fortune thereby.
>
> But, perhaps, the best known name in connection with lime was that of Inglis. There was George, whose monument, containing a record of his manifold virtues, stands just across the river from here. Sylhet certainly seems to have agreed with him, as he resided in the district for 56 years before he died at the age of 76 in 1850.
>
> His son, Harry, buried at Cherrapunji, was even more successful and enjoyed by methods not altogether reputable a monopoly which eventurally had to be broken. And many another, Indian and European, has sunk money in and taken money out of the limestone quarries of these hills."

In the third place, not only is the lime of a high quality, but it can be landed at the works on the most economical basis For this purpose, Gillanders, Arbuthnot & Company are setting up an aerial ropeway by which limestone could be delivered at the cheapest transportation cost across the eleven miles from the lime quarry to the works.

In the fourth place, the Company will be getting its coal, another important ingredient in the manufacture of cement, at a cheaper cost than is the case with regard to any other cement manufacturing company. It is well-known to geologists that the Khasi Hills contain enormous quantities of high-class coking coal. These coal mines have not been so far tapped as they are not easily accessible and the means of communication between the mines and the consuming markets are of the most primitive kind. The Assam Bengal Cement Company, however, has secured a coal mine which is within fifty miles of the factory and from which coal could be transported by water. And, as everybody knows, water transport is the cheapest means of communication. The Company will thus be getting its coal at no more cost than raising charges and on the lowest basis of freightage.

In the fifth place, the means of communication for the manufactured product from the factory to the various consuming markets is no less favourable. Chhatak, the site of the factory, is situated on the Surma river. Chhatak represents the northernmost point upto which the Surma is navigable throughout he year. The Surma provides links for Chnatak, through various tributaries and canals, with the high seas and with such important centres as Calcutta and Chittagong. The Assam Cement Company will be serving its areas at a freight-cost which will be a third or fourth of any of its competitors. In the case of a bulk commodity like cement, freight costs are an all-important factor. One may go so far as to say that, even if the Assam Cement Company had only this particular advantage of landing its manufactured product at the consuming centres at a fraction of the freight of the other companies, this new enterprise may be said to be assured of complete success; so outstanding for a cement company is a favourable freight position.

If I am asked to say what is the most favourable feature of the Assam Bengal Cement Company, I would point to the auspicious connection of Sardar Bahadur Sardar Indra Singh with this project. It is common to describe a lucky man as one of whom one might say that whatever he touches turns to gold. I do not know of another industrialist in India to whom this description can be so aptly applied. I need only recall the circumstances pertaining to the Indian Steel and Wire Products Limited. This is a Company which was started in Bombay in 1920, and in the underwriting of whose original capital I played some part. The managing agency of the Company at that time were a combine of the late Sir Lallubhai Samaidas, Mr. Walchand Hirachand and Mr. Kapadia. The capital was Rs. 25 lakhs which was readily subscribed for. This was one of the subsidiary concerns which was encouraged and helped in various ways by the Tata Iron and Steel Company. The factory was constructed adjacent to the Tata Works in Jamshedpur. Under the original managing agency, the project did not prosper; and, in fact, a debenture loan of Rs. 6 lakhs had to be taken from the Bihar Government under the Aid-to-Industries Act. Even after this assistance from the Bihar Government, the Company did not do well. As debenture-holders, the Government sold the properties; and Sardar Indra Singh bought them for something like Rs. 4 lakhs.

Soon after he took over the concern, the import duty on the classes of goods he manufactured was removed. This raised a pretty serious conundrum; but the Tariff Board came to his assistance. Since then, the Indian Steel and Wire Products has not looked back. It has grown from strength to strength. The concern was worked by Indra Singh as a Proprietory proposition. It was made into a Limited Company in 1935; and the public were offered the opportunity to participate in the shares. Lucky are those—extravagantly lucky—who availed themselves of the opportunity. For, this concern which was bought by Sardar Indra Singh for about Rs. 4 lakhs, is to-day making annually profit of Rs. 55 lakhs; Ordinary shares now quoting Rs. 59; and a deferred share of Rs. 2-8 is interesting investor even at the giddy height of Rs. 38; the dividends paid are 45 per cent on ordinary shares and 135 per cent on deferred shares.

On the present valuation of the shares, the concern, which was bought for Rs. 4 lakhs fifteen years ago, is to-day worth at least fifty times that amount.

Equally lucky has been Sardar Indra Singh in his other enterprises. He bought a controlling interest in the Khandesh Spinning and Weaving Mills from the famous Mooljee Jaithas of Bombay. Through this purchase, Sardar Indra Singh is now the owner of a cotton mill in Bombay and another in Madras, and cotton presses all over the Western and Southern presidencies and the Central Provinces. It is a significant coincidence that the boom in the cotton mill industry synchronises with the emergence of Sardar Indra Singh as a cotton millowner.

While sugar has been tasting pretty bitter to many industralists, the sugar concern of Mr. Indra Singh in Lucknow is enjoying a sweet career.

By the same token, the Assam Bengal Cement Co., which would have been pronounced a foolhardy venture in the conditions at its inception has already begun to appeal to stock exchange interests. At the beginning, Sardar Indra Singh had to take up the bulk of shares as the investing public showed nothing like an avid interest. The shares are now over Rs. 13; and, as I will show later, it will not be long before the present premium is more than doubled. Assam Bengal Cement Company is fortunate, then, in belonging to Sardar Indra Singh's group. At this point, it is interesting to mention that, starting as a contractor—and a contractor in a small way in Jamshedpur—Sardar Indra Singh has developed and organised his industrial activities in such a fashion that the only province, in British India where he has not some interest or other, is Sind.

It now remains for me to examine the capital structure of the Company and estimate its profit-earning capacity. The ordinary capital is Rs. 33 lakhs and, in addition, debentures for Rs. 25 lakhs have been issued. The detailed output of the cement factory will be 250 tons. On the present production cost of the Company, and on the basis of a selling price which is lower than that of the selling price of the cement of the Associated Companies, the profit per ton, allowing for depreciation and like charges, is Rs. 12. On 250 tons a day, the daily profit is Rs. 3,000. This works out to Rs. 9 lakhs per year. After paying debenture interest and providing for taxes, no less than Rs. 5 lakhs should be available for distribution as dividend on ordinary shares. The Company must thus be in a position to pay a dividend of 15 per cent.

The next question is: When will the profit-earning capacity on this basis start? The answer is simple. This scale of profit is being made from now on. Manufacture of cement as such started in the factory three months ago. The works are now in complete working order and producing more or less to full capacity. The Government's Test Certificate proves that the Assam Bengal Cement complies with British standard specifications for ordinary Portland Cement both physically and chemically. In simple terms, cement of the right quality is now being produced in the expected quantity. No selling problem is presented as the Company is able to quote a competitive rate and enjoys a ready made market. In fine the Company should be able to pay a handsome dividend on the working of 1942.

If such are the dividend prospects, what should be the market rating of the Assam Bengal Cement ordinary shares? There is every reason to think that the ordinary share will be quoting nearer Rs. 20 than the present price of Rs. 13; and once the full facts are known, the upward trend must manifest itself in strident style.

I have said that Chhatak affords excellent transport facilities for the raw materials and the finished product of the cement factory. For human transport, however, Chhatak is a most trying journey. We were a party of ten bound for the Tuesday festivities. We made a jolly crowd and, on that account, did not feel the trying journey. The locomotion we had to uttilise was of sorts. The broad gauge section of E.B.R. took us to Goalundo. The seven hours steamer trip thence to Chandpur was the brightest spot. The scenery was superb, the air crisp and cold and the food excellent. And as we lazily surveyed the vast expanse of water, the problem of problems for Bengal, the ubiquity of the hyacinth, thrust itself on us again and again. If there was water everywhere, there was the blue-flowered hyacinth too here, there and all over.

And, curiously, one of our party was Mr. George Morgan whom lekend connects with the spread of hyacinth in East Bengal and Assam. As usual with legends, new and newer features came to be added in the recital. And I must, once and for all, give the quietus to the story that Mr. Morgan imported the plant from Australia: he has never been in Australia. The true story is this: Mrs. Morgan (this happened forty years ago) was attracted by the blue flowers of the hyacinth while staying in Calcutta; and, to her Dacca home, she took six pots of the plant. These six plants are the father and mother of the unending expanses of hyacinth over river and rivulet, over tanks and marshes tthroughout East Bengal and Assam.

From Chandpur to Sylhet Bazar is a night's journey by A.-B. Railway.: Tea at Sylhet and off by a car over the ricketiest and narrowest road. Even for this mercy, we had to be thankful for, in monsoon months, the road is sunk under water. Within the 22 miles of the road, we crossed the Surma thrice—it is the most serpentine of rivers in India. At two places, we crossed the river, car and all, by ferry. At the third, a motor boat brought us to the border of the factory site. The last stage of the journey was by a trolley.

We were glad to be installed in our rooms—all the gladder because, in what was once the paradise of wild beasts and the heaven of wild birds, the Company has put up a town with all modern amenities, sanitary and everything complete.

In the town raised as by the wand of the magician, the hosts accommodated nearly fifty guests and entertained them in luxurious style. The Great Eastern Hotel was in charge of the catering; and took care to bring up everything from Calcutta including maunds and maunds of ice.

That the organisation, which, on the business side, the Company has been creating, must be hundred per cent efficient is borne out by the unanimous testimony of the guests that every detail of the arrangement was just perfect.

The return journey was a scream. It had started to drizzle. There was a hold-up at the ferry. Our car carried a distinguished load: Mr. Elkins of Gillanders Arbuthnot and Mrs. Elkins; Mr. Hughes, Collector of Mymensingh; and Eavesdropper.

It was good we had with us a gentleman connectted with feeder railways and another holding an impressive government job. For one thing, we had to detain the train till Mr. and Mrs. J. C. Mukerjee reached the station. This was comparatively easy. The next problem was stupendous. The engine did not appear particularly keen on pulling our load. We had an official of Asea Electric with us who lent a hand at making the unwilling engine go. Even so, we arrived at Kulaura to find that we had missed the connection. The director of the feeder railway and the collector of Mymensingh set to work, aided and abetted by the lady and Mr. Mukerjee. Telegraphic exchanges took place between the marooned passengers and the far-off Operating Superintendent of the Railway. We asked for a special engine to be arranged for conveying our coach in time for the steamer at Chandpur. Nothing doing—was the answer. What about an alternative route?—was the next suggestion. It was not till 2 in the night, and only after the company had continuously fortified itself with spirits for the hard task, that the plan of the alternative route was agreed to. So, we were on the move at last—only to find that, right up to lunch time, we had to observe a compulsory fast. Not even tea could be had during that arid journey.

The rest of the journey was uneventful except for a tense suspense all the time if, at the next change we would again miss the connection or if, in the next stage of the journey, our instructions for food or berths would have reached in time.

None of these instructions had gone the right way. Above all, stranded passengers have a way of coming together and getting intimate which is impossible in months of continuously peaceful travellng. And as we bade goodbye to each other at Sealdah, we had all the feeling of a rich friendship fostered and strengthened by the common lot of marooned passengers.

Governor Opens Cement Factory in Assam

Unique day in the History of the Province

In formally opening the cement factory of the Assam Bengal Cement Company at Chhatak on the 18th instant, His Excellency Sir Robert Reid, Governor of Assam said:

"This is a unique day in the history of Assam, for it marks the inauguration of the first modern, large-sized industrial plant that has ever been set going in the province and it is a personal pleasure to me to be able to open this factory before the end of my term of office. The first negotiations were going on soon after I joined in Assam and it is a great pleasure to see them brought to completion. It has been known that the Khasi Hills own immense deposits of limestone and they have, indeed, been worked for many years for the manufacture of lime, to the great profit of manufacturers Sylhet lime has been famous for many years and its manufacturers attracted business enterprise in the 18th century.

"An early member of the Civil Service, Mr. Robert Lindsay, Collector of Sylhet in 1778 was quick to see profits to be made out of it and there being no bar then to the Colector engaging in trade, to make a handsome fortune thereby. But perhaps the best known name in connexion with lime was that of Inglis. There was George, whose monument, containing a record of his manifold virtues, stands just across the river from here. Sylhet certainly seems to have agreed with him, as he resided in the district for 56 years before he died at the age of 76 in 1850. His son, Harry, buried at Cherrapunji, was even more successful and enjoyed by methods not altogether reputable a monopoly which eventually had to be broken. And many another, Indian and European, has sunk money in and taken money out of the limestone quarries of these hills.

"Cement now follows lime in lineal succession and the Assam Bengal Cement Company has seen how admirably this locality is suited by nature with its unlimited limestone and immense deposits of coal close at hand for manufacture of that commodity. I feel sure that these works will bring prosperity to the neighbourhood, if not indirectly to the whole province, while manufacture within our boundaries of an article that hitherto has, I understand, been brought all the way by Sea from Okha or Sind to Chittagong and thence by rail to its various distributing centres, must mean some benefit to the general consumer.

"Manufacture of cement close to where its main ingredient, limestone, is quarried and close to where one of the chief necessities for its manufacture, coal, is mined, should spell advantage both to the producer and the consumer. Who knows also whether this great factory here may not help to redress the balance of nature in this district where living, owing to natural conditions is so precarious?

CALL TO INVESTORS

"The Directors have had great difficulties, arising out of war conditions, to contend with, though to some extent—the fact they got their main portion of their plant delivered just in time—they have been exceedingly lucky. But the ropeway, an essential link to production has had to be sought elsewhere and though that is far from completed it says much for the determination and zeal of the management that they have been able to open business as soon as they have, I imagine they have had many months of anxiety and perhaps despair.

"I cannot help recording one note of regret and that is so little of Assam money has been invested in this enterprise in spite of the fact that this was made easy for them by reservation of as much as Rs. 7,00,000 of the authorized capital of Rs. 50 lakhs for *bona fide residents of Assam.* Perhaps the people of Assam are not very industrially minded, though they certainly have the habit of investment in tea and, of course, this is the first industrial concern of any size that has been started in the province, or perhaps it is only a native caution, but it is a real pity that there is no Assam capital in it so that at least we could say that the factory was in part our own.

"It is very gratifying to see how much attention is being paid by the management to the welfare of their workers. Not only is there the well-equipped hospital at Chhatak itself which Lady Reid opened in 1940 but there are subsidiary hospitals both at the limestone quarries and at the collieries. The Chhatak Hospital, in fact, was completed before the factory was anything like ready. In this the company have shown themselves to be both benevolent and farsighted: while having proper regard for the welfare of their employees, they realize that the employees who are well looked after are more content and give better work than those who are not.

"Finally I desire to thank the management for their lavish hospitality, to congratulate them on the results they have achieved and to wish them all success in future."

PREMIER'S SPEECH

Addressing the gathering. Sir Mohammed Saadulla, Premier of Assam, said that his first acquaintance of Chhatak was 24 years ago when the place was a jungle, full of *shikar.* People came to kill ferocious tigers and he must congratulate the Directors for having started to kill quite a different variety of things. They had killed the rank unproductive growth of the jungles and in its place had erected magnicent buildings wherein were housed hundreds of thousands of rupees worth of productive machinery. They had destroyed unsightly landscape and razed to the ground hillocks 1,500 feet in height over an area of about 100 acres.

They had thus eradicated the insanitary condition of the country and installed not only sanitary conditions but also equipped the institution with a fine hospital which bore the name of an indefatigable worker in the cause of humanity; Lady Reid. To finish this stupendous task and construct the factory, the management had engaged a large number of labourers and used a huge quantity of machinery and materials. This was an achievement of which any industrial magnet could be proud and which had served to cast away the lethargy of the people of the countryside, showing them that time was money and that a continuous 24-hour productive industry could be organized if there was enthusiasm, foresight and imagination.

Sir Saadulla referred to the ability of the Chairman of the Board of Directors who had so successfully started so many industries in the country, and said that with such a man at the head, the Company need have no fears whatever as to the success of the venture. He gave a message of hope and faith to the Company—hope for the promoters in the shape of dividends: for the people of Assam in the shape of cheaper cement and for the Government of Assam in the shape of very welcome royalties to the extent of about Rs. 1,50,000 to the provincial exchequer for quarrying limestone and raising coal. He expressed faith in the success of the venture in which the promoters had to surmount many difficulties.

Chairman's Speech

In welcoming His Excellency and the guests, Sardar Bahadur Sardar Indra Singh, Chairman of the Board of Directors, said:—

Your Excellency and Lady Reid. Maharaja Sahib, Ladies and Gentlemen.

It is a special privilege of mine to extend to you on behalf of the Assam Bengal Cement Co., Ltd., a very cordial welcome to this function. We are particularly beholden to Your Excellency for your kindness in making time amidst your onerous and multifarious engagements to grace this occasion with your presence and formally inaugurate our manufacturing Works to-day. This gives us one more proof of the sincere sympathy and personal interest which Your Excellency has always evinced in the gradual growth and welfare of this Company. Indeed, we owe a deep debt of gratitude to Your Excellency and Lady Reid as well as the Ministers and individual officers of the Government of Assam who have uniformly rendered every possible assistance to us in the course of the erection of this factory.

It is difficult for one to visualise that this place which is now studded with humming workshops was no better than a mere wilderness a little more than three years ago. The Assam Bengal Cement Co., Ltd. was incorporated in December, 1937 and the Limestone quarries at Komorrah in the Khasi Hills were acquired by them in November, 1938. The present factory site however was not acquired till April, 1939. Meanwhile orders had been placed for necessary manufacturing plant, the bulk of which was received in this country before the declaration of war with Germany. Though for some time we were under a handicap in not having obtained a portion of the machinery, some of which reached India on the eve of the war but could not be landed due to the outbreak of hostilities the deficiency was made good by strenuous efforts on the part of the Management in getting duplicates of the missing parts manufactured in India. Our effort in this behalf were crowned with success with the result that we are in the happy position to-day to welcome this distinguished gathering to the formal opening of one of the most efficient factories for the manufacture of Portland Cement in India. The promoters of this Company were attracted to this part of the country because of the exceptionally high quality of the limestone available in the Khasi Hills and the proximity of suitable coal deposits, a lease for which also we were fortunate enough to secure through Your Excellency's good offices. Most favourably situated as the factory is in point of the two important raw materials needed for a manufactory of this kind, the natural facilities which the present factory site also enjoys with regard to transport and distribution are not so inconsiderable. Above all, the unfailing sympathy and support which we have been fortunate enough to secure from the Government and the people of Assam, have made the success of our venture fully assured. The test manufacture of Portland cement was started in the middle of July last, and the factory has been in full and continuous operation ever since. Before we could venture to invite such a distinguished gathering to the present function and offer our product confidently to the market, we armed ourselves with test certificates in respect of representative samples of our product from the Government Test House in Calcutta as well as private laboratories of reputed analysts. I am in a position to announce to-day that the analysts' tests bespeak a very high quality of the cement produced by our factory which not merely satisfies the British Standard Specifications but can be claimed to be equal, if not superior, in quality to some of the best Portland cement manufactured in India or abroad.

The present plant has a capacity of manufacturing 250 tons of cement per 24 hours, but this capacity is capable of being doubled, if not more, with the addition of necessary equipment. Although we can now continue to manufacture cement up to the present maximum capacity of our plant, facilities will be enhanced with the completion of the Ropeway connecting Komorrah with the Factory, which is in course of erection. The present arrangements are only a passing phase which will be removed in the near future by the installation of the Ropeway.

It may interest you all to know that we employ in the factory 630 hands to-day of whom 500 are labourers of different grades and 130 are officers. Our staff in the limestone quarries at Komorrah numbers 412 and those employed in our Collieries, which are in the process of development, number 466. Out of our total monthly expenditure on establishment, a large portion is mostly being distributed among the inhabitants of the province of Assam which naturally supplies the bulk of our staff. I venture to make the claim that our Company have not overlooked the legitimate interests of labour, while building up this second largest organised manufacturing industry in Assam. Besides allowing wages on fairly liberal scales the Company have been making earnest efforts to provide the necessary amenities and minimum creature comforts for their labour force. As a token of our sincere efforts in this direction, we may point to the Hospital which bears the honoured name of Lady Amy Reid who was pleased to open it in April, 1940. This hospital can well make the claim of being one of the best equipped of its kind in the province of Assam, and has proved a source of relief, not merely to the staff of the factory, but also to the people at large who resort to it even from long distance. Likewise the Company have been at pains to provide their quarries at Komorrah and the Collieries at Borshore with efficient medical equipment for the benefit, not merely of their staff, but also of suffering humanity generally in their immediate neighbourhood. Your Excellency need not be reminded how backward these two areas are in point of communication, public health activities and educational facilities, and how primitive a large section of the people inhabiting these areas is. It is a matter of great satisfaction to us that while developing the economic resources of these backward areas, our company have incidentally been able to contribute towards the general uplift of the people of the neighbourhood. Already better clothing and better living conditions are being appreciated by the people of these areas, and a general improvement in their economic condition is noticeable. It is our ambition to run this industry with the willing and loyal co-operation of our staff, whose all-round welfare will be our constant endeavour to promote.

We sincerely entertain the hope that this industrial concern will be a standing example of what success can be achieved in the field of economic development of the country, by joint efforts of the people and the Government. But not only does this venture represent the gratifying result of co-operation between the people and the Government, it is also a joint endeavour in which British India and Indian India have mingled their resources for the establishment of a basic industry of great importance. While the promoters of the Company belong to British India, they have, on the one hand, indented upon the Khasi States for raw materials, and on the other, they count among their valued financial supporters the enterprising Ruler of Mayurbhanj, a progressive State in Eastern India, to whom I desire to accord a special welcome on this his second visit of these Works.

I think I have said enough to give you an idea of what has been achieved and I shall now respectfully request Your Excellency to be pleased to inaugurate the manufacturing works of the Assam Bengal Cement Co., Ltd.

Fully Equipped & up-to-date Cement Works

Chhatak's Historic Background

A fully-equipped, up-to-date cement factory, the first of its kind in Assam manufacturing Portland Cement of the best possible quality to meet the ever-growing demands of Assam and Bengal as also of the rest of India, was opened by His Excellency Sir Robert Reid, Governor of Assam, on the 18th November last at Chhatak, on the bank of the River Surma, a little over 21 miles from Sylhet, Assam. The factory built by the Assam Bengal Cement Company, Limited, is now in full operation and the products have already been placed on the market. From the various analytical reports in hand showing the results of analysis made both in the Company's laboratory equipped on modern lines as well as by outside agencies it can be safely claimed that the quality of the products, popularly known as "Diamond-brand Cement" is in noway inferior to that of any of the superior quality of Cement now available in the market.

Chhatak has an historic background and this part of Assam possesses a most important strategic port from where shipping was made of limestone, oranges and other materials to the countries in the Far and Middle East. As far back as the 18th century foreigners used to visit this port for collection of indigenous materials as the River Surma being navigable throughout the year is directly connected through various tributaries with the high seas.

The site at Chhatak is an admirable one. The surveyors were faced with a gigantic task in locating a site which had to be in close proximity to the raw materials and at the same time affording easy and cheap transport facilities.

The company has an area of several hundred bighas which is the nearest point possible to the limestone deposits, near to a large coalfield and the last point which is navigable to river steamers at all seasons. No craft can ply above Chhatak except, of course, during the monsoon period but even then it is difficult owing to the raging torrents and strong currents which sweep down from the hills.

Only in a few places throughout the length and breadth of India are located such huge deposits of limestone, which is of great extent and of uniform quality, as is at the company's quarries at the foot of the Khasia Hills. The limestone is of a very high standard and most suitable for conversion into the highest grade cement. The quarries are but ten miles from the factory. The quantity available can be regarded as practically inexhaustible and is sure to last so far as can be judged by experts for at least 200 years. Clay is obtained at the factory site, while the coal is located at the company's own fields which lie above 34 miles away but to which access is afforded by rivers.

The company have special advantages as regards transport facilities for carry at a rate cheaper than any other concern situated in the adjacent provinces, the finished products to the all important consuming centres in Bengal and Assam also for despatch by direct water route to Calcutta and Chittagong from where the same can be exported to all parts of India. The saving in transportation charges alone enables the company to offer more favourable terms than any other competing concerns in these two provinces or by outside manufacturers and is bound to result in the increase in consumption of cement in these areas.

It is esimated from the available statistics that the local consumptiontion in East Bengal and Assam is over 13,000 tons of cement per month and the consumption is increasing. The new factory is more conveniently situated than any factory so far established to supply these markets.

Complete and modern machinery necessary for the plant has been received from Continental manufacturers who have had many years' experience with cement-making machinery. Owing to the outbreak of war, however, certain small parts were unable to be delivered, but these were manufactured in India. The capacity of the plant is 250 tons per day with the provision to increase the same to 500 tons per day and again to 750 tons.

Is there ample scope for the establishment of an up-to-date cement factory with an estimated producing capacity of 250 tons per day, with a provision to increase the output to 50 tons per day? This was the initial question which was asked when the scheme was first mooted. After careful enquiries it was found that the following table was itself sufficient proof. The figures in tons:

	Indian Manufacture.	Foreign Imports	Indian Consumptions.
1914	945	1,50,530	1,51,475
1915	38,672	80,543	1,19,215
1918	84,344	20,016	1,04,307
1920	91,253	1,18,507	2,09,760
1922	1,51,336	1,09,924	2,61,260
1924	2,63,746	88,416	3,52,162
1926	3,88,006	54,800	4,42,806
1927	4,77,742	69,000	5,46,742
1928	5,57,953	74,700	6,32,653
*1930	5,63,929	68,000	6,31,929
1930-31	5,70,180	64,000	6,34,180
1931-32	5,82,963	58,500	6,41,463
1932-33	5,85,923	60,800	6,46,723
1934-35	7,47,818	49,100	7,96,918
1935-36	8,86,267	42,900	9,29,167
1936-37	11,50,000	27,500	11,77,000

* 1930 saw the inception of the Cement Marketing Company of India Limited.

The great rise in Indian manufactured cement and the increase in the consumption of this important material in this country is clearly evident from the figures. Practically all buildings which are being erected throughout the length and breadth of this sub-continent are of re-inforced concrete. The demand for Portland cement of the best possible quality, such as will be manufactured in the course of a few months at Chhatak grows monthly.

Raw Materials

Has the new project sufficient raw materials? Are these raw materials in abundance? Are they in close proximity to the works? Is the cost of the transportation of these essentials great? These were but few of the many other important questions which confronted the surveyors and which have been satisfactorily answered in the Chhatak site.

The site itself was formerly jungle. Hills of a height of over 1,500 feet were met. These were levelled after one and a half years of strenuous labour in order to give the area a uniform height which is now approximately four feet above the highest level reached by monsoon flooding. Some twenty or thirty feet had to be taken off the tops of several hills and the clay utilized to build a three-quarter mile long embankof the works—the kiln and the storage house.

Incidentally the distance from the river-bank to the termination of the aerial ropeway which will bring the limestone from the quarries is over 2,000 yards and the factory is situated in an area containing some 216 bighas or nearly 71 acres. Along this embankment runs a light railway line which branches into a network suitable to serving the entire factory. Months of arduous work was expended in building the embankment which is strengthened by hundreds of tons of stones taken from the bed of the higher reaches of the Surma.

The transformation from a wild and dense jungle, inhabited by wild animals, to a hive of industry has taken but two years. Adjoining the factory over 50 acres of land has been acquired from the Government of Assam where there are hills and staff quarters, etc. The lay-out of the new factory has been arranged so as to receive the raw material at one end and for the finished product to emerge from the other at the river bank ready for transportation.

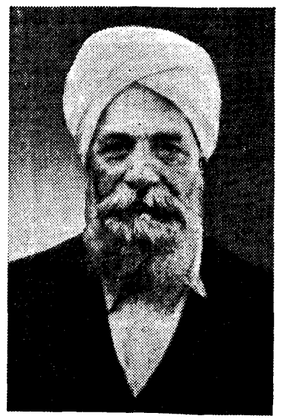
Limestone

The limestone is excavated from the Jaintia and Khasi Hills quarries. The quarries have been installed with the latest types of pneumatic appliances for operation in an efficient manner and at a lower cost than would have been the case if older methods were to be employed.

The quarries which have been installed at Komorrah are also fitted up with suitable workshops for maintaining machinery and truck lines. The power house and the quarry are served with electric power generated by Diesel engines which enable work to be continued, if necessary, during night time.

During the last two years the company have succeeded in transporting large quantities of limestone from quarries to the Factory and they now hold a very large stock of limestone at the factory site.

Incidentally it may be of interest to mention that these quarries have been worked for years, in a very minute way, by local villagers who burn the limestone in primitive kilns—kindled by reeds and rushes which are obtained from nearby swamps and river-banks. The quarries are practically inexhaustible.



The limestone will be conveyed to the factory by aerial ropeway which extends for ten miles over very rough jungle country and many water courses. It will also be possible to bring the rock to Chhatak by river but this will only be permissible during the monsoon season.

Collieries

The coal comes by river-craft from the company's fields which are nearly 40 miles away. The company have taken a mining lease for one square mile containing first-class coal and have located at present two seams, one of five feet six inches, and the other of three feet six inches. Further borings may assist the company to discover more and thicker seams. The working of these seams is simple—being more or less in the quarry method—having therefore, no trouble regarding pumping. The company intend to acquire two further square miles, adjoining the present area. The one square mile already under mining operations has been estimated by experts to contain something over 4,000,000 tons of coal, suitable for producing the necessary heat with the minimum of waste in a factory such as the Chhatak Cement Works. The collieries are giving the expected output. Arrangements for transport of coal have also been made and coal from the Company's own mines is now daily transported to the factory.

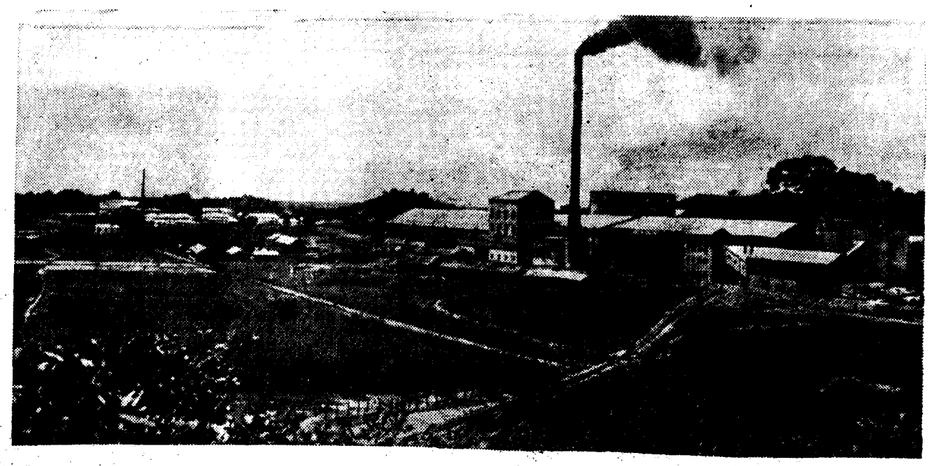
Ropeway

Considerable progress has also been made towards the construction of the Ropeway from Kommorah to the Factory covering a distance of nearly 10 miles.

CHAIRMAN

Sirdar Bahadur Sardar Indra Singh, Director, the Indian Steel & Wire Products Ltd. etc.

The Process



The clay which is obtainable at the factory site is of unlimited quantity and is of good quality being comparatively free from stones, etc. Clay layers are in very large quantities—most of which are at the factory itself. This material, combined with the limestone, can be used directly with the exception, of course, of washing.

The limestone is brought direct to a hammer crusher which reduces the rock from large pieces down to the size of a walnut. The crusher is designed to stand satisfactorily the shocks and vibrations to which it is exposed through the hammer action of the beaters, the shaft being carried in bearings, the lower part of the case being made particularly strong and of cast steel entirely. In the crushing chamber, there rotates a strong square shaft of steel on which a system of beaters are carried.

Each system consists of two cast pieces with arms cast on. The beaters, made of tough hard steel in one piece with their journals, are carried in between the arms in exchangeable bushes. The beaters swing in their bearings and consequently can give way should either the stone not break up immediately or should any metal parts have penetrated into the crushing chamber.

After passing such an obstacle the beater once again regains its position most favourable for strong striking action. The beaters, loosely suspended when not in operation, assume a radial position through centrifugal forces as soon as the shaft is revolving. They strike through a gate at the material with successive hammering and elastic blows. The large pieces are kept back by the feed gate and are gradually crushed down by the beaters. They cannot be handled as a whole immediately, so that overloading and risk of breakages are avoided.

In this manner, the beaters reduce the large lumps piece by piece, the smaller pieces dropping into the crushing chamber where they are exposed to the full action of the beaters. The crushed material leaves the crusher through slots in an outlet grate after it has been disintegrated by the beaters to a fineness to which the slots of the grate have been adjusted. The width of the slot can be altered at any time through a special device. It is therefore not necessary to provide for different grates when different finenesses are required. The output of the hammer crusher is approximately 60 tons per hour.

This panormic view of the entire factory with residential quarters and the Power House from the "Magazine Tilla"—(Copyright Photo by S. K. Mukherjee).

The crushed limestone is then conveyed to the storage hall to eventually join the clay as it comes from the washing mill, to be ground together in the wet mill.

Washing Mill

The washing mill, which has been installed consists of a circular tank, 20 feet high with an internal diameter of 19 feet eight inches. They clay, which is brought by trucks, is thoroughly washed and churned up by a revolving arm driven by electric motors. In the tank there is a stirring device driven by a bevel gear of cast steel and by a fast and loose pulley. The stirring device consists of rake-frames, the tines of which are adjustable and the number of which is in every case to be adapted to the material handled. In special cases the installation of dragging chains and stirring the material at the bottom advances the washing process.

The washed clay, then known as slurry, leaves the washing tank through respective apertures provided with grates. Above the washing tanks there is a supporting framework connected to a running stage. The supporting framework is provided for holding the gear, the neck-bearing and the running stage of the washing mill. The plant is capable of washing ten tons of clay per hour.

Wet Raw Mill

The clay slurry and the crushed limestone are mixed in proper proportions inside the wet mill—the slurry being conveyed by pipes and forced along by compressed air, while the crushed limestone is run into the drum by grab crane.

The wet raw mill grinds and mixes the clay and limestone into raw slurry silos. The whole process of grinding—consisting of coarse, grit and fine grinding—is done in the one mill.

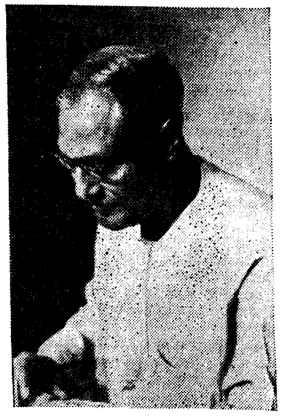
Automatic Mixing

There are four slurry tanks, or silos as they are known. Each silo has an internal diameter of 30 feet and rise to a height of 80 feet. Special mixing devices are also contained in the silos. The mixture is examined by experts and the necessary correcting done before it is forced through pipes to the automatic mixer.

In modern engineering, compressed air is widely used for the intimate mixing of water with materials of different specific weights. In the cement industry especially, this method of mixing has been well received and in most cases has replaced mechanical devices. The automatic slurry mixture at the Chhatak works is remarkable so far as that the different tanks of the mixing plant are automatically and alternately charged with air having a certain starting pressure, up to a final pressure, which can be carefully regulated. This patent distributing apparatus, combined with valves which it effectuates, and fitted into compressed air piping from the air vessel to the slurry tanks, charges these with compressed air, one after the other.

After a certain maximum of pressure has been attained in the closed air vessel, the distributing apparatus opens an automatic valve in the piping leading to the first slurry silo, whereupon compressed air flows into the latter from the air vessel. After the pressure of the air vessel has fallen to a certain minimum, the distributing apparatus automatically shuts off the valve, thus finishing the mixing of the first chamber.

Modern Laboratory



As is the case with all cement works—the Chhatak factory is equipped with a modern laboratory. In this laboratory all raw materials, limestone, clay and coal are thoroughly tested by efficient experts working with the most modern appliances. During the various stages of the manufacture of the cement, the experts constantly watch the raw materials and various mixtures, testing and correcting wherever necessary.

Mr. George Morgan, C.I.E., M.L.A., Director, Bird's Investment Ltd., etc.

As Chhatak is away from industrial centres and is the first technical enterprise of its kind in the Province, the Company deemed it desirable to provide a modern workshop for the maintenance and repair of all machinery. In the workshop there is sufficient machinery to deal with any emergency. It is equipped with the latest types of machinery—including foundary—electric and gas welding outfit—and various other machine tools. There is also a carriage department which "vets" bogies which run on the narrow gauge railway.

Hospitals

A modern well-equipped hospital, which is the first of the amenities which a factory must provide, has been erected in the works area. This was officially opened by Lady Reid, wife of His Excellency, Sir Robert Reid, Governor of Assam, on April 4, before a large gathering.

"A very important part which this building is to play is in helping the local inhabitants who are not employees of the Company, said Lady Reid. who added that there was no doubt that it would be of the very greatest value to the district and the whole of the Surma Valley would have cause to be grateful to the Company for their enlightened, and altruistic outlook.

The hospital is situated on a hill overlooking the factory. Built entirely of reinforced concerete and finished in a pleasing white colour, the building contains modern surgical and clinical appliances. There is a maternity ward, a female ward, a male ward and an operating theatre together with an outdoor department, which will deal with minor injuries and illnesses among the workers. A dispensary, private examination room and the medical officers' rooms are also contained in the building. The rooms are cool and airy and are installed with modern hygienic arrangements.

As this is the only hospital in the area, the company intend, in the near future, to obtain sanction from the Government to treat recommended patients, in addition to their own employees.

In addition to this fully equipped hospital at Chhatak, known as Lady Amy Reid. Hospital the Company have also opened two hospitals—one at the Collieries and the other at the Quarries, and these hospitals are under capable Medical Officers and staff. Those who are familiar with the local conditions of the Collieries and Quarries will appreciate that to combat the epidemic forms of illness prevailing in these two areas, is no ordinary job. The management are, however, very glad to state that conditions at Komorrah are under control and elaborate medical assistance has been provided at the Collieries for the improvement of the health of the miners and workers.

Amenities for Staff

This enterprising company are to closely guard the interests of its employees. In addition to the splendidly equipped residential quarters, which have been designed in a picturesque manner which is common to buildings in Assam, a primary school and a club-house are being completed.

The primary school will be under the guidance of a suitable staff and will cater for the employees' children.

The club-house will contain a reading-room and a room for concerts, etc., while a tennis court and a badminton court are being laid out nearby.

THE COMPANY'S ROPEWAY

The Ropeway under construction for the Assam Bengal Cement Co., Ltd. is a Monocable Ropeway. With this system a single endless Rope serves both to sustain and transport the loads. The Loading Station is siuated close to the Limestone Quarries at the foot of the Khasi and Jantia Hills. The next Station is the Divide Station, which is situated on the bank of the Sonai River, a distance of 1.7 miles from the Loading Station. The second Section of the Ropeway runs from the Divide Station to the Unloading Station situated at the Cement Company's Factory at Chhatak, a distance of 8.5 miles from the Divide Station.

The Loading Station at the Komorrah Quarries includes Transfer Gear to enable Ropeway Buckets arriving from the Quarries on a Tramway to be transferred to the Ropeway. The Limestone is thus carried from the Quarry face to the Factory in the same Buckets.

The Tension Gear for the first Section, that is to say from the Komorrah Quarries to the Divide Station, is incorporated in the Komorrah Station.

The Divide Station is equipped with a Diesel Engine, which drives the first Section of the Ropeway and assists in driving the empty side Rope of the second Section. This Station also contains the Tension Gear for the second Section.

The Unloading Station at the Factory consists of an Electric Motor for driving the Second Section of the Ropeway and separate Unloading Gantry Sidings for Limestone, Coal and General Merchandise. On arrival at this Station, Buckets containing Limestone automatically tip their contents into a Hopper which in turn feeds the Factory. The Electric Motor at this Station is synchronised with the Diesel Engine at the Divide Station so that, although the two Sections of the Ropeway can be worked independently, they are primarily designed to work together at the same speed.

The ultimate capacity of the Ropeway is 66 tons per hour, but in the initial stages it is being equipped to handle only 50 tons per hour, which will be sufficient for the Factory's present requirements.

In addition to transporting Limestone between the Komorrah Quarries and the Cement Company's Factory, arrangements have also been concluded between the Assam Bengal Cement Co. Ltd. and the Cherra-Chhatak Ropeway Co. Ltd. whereby this Ropeway will also carry Coal and General Merchandise for the latter Company. The Cherra-Chhatak Ropeway at present passes close to the Cement Company's Terminal Station at Komorrah and arrangements are being made to link up the two Ropeways at this point. When this Link-Up Ropeway is completed a direct link will exist between Cherrapunji and any Station in India, via the two Ropeways, River Steamers and Railways. It will thus be seen that, apart from fulfilling its principle function, the new Ropeway now being erected by the Assam Bengal Cement Co. Ltd. will benefit the District by providing a new and reliable means of transport between the Khasi and Jantia Hills and the Plains of India.

Mr. K. L. Dutt, Proprietor Messrs. J. C. Dutt & Co., Ltd., Director, Messrs. Nasco Ltd., etc.

Sir Baldev Singh, M.L.A., (Punjab), Director, The Indian Steel & Wire Products Ltd., etc.

POWER STATION.

The steam generating plant comprises three water tube boilers of Messrs. John Thompson's make, and the current generating machinery consists of one 2400 kw., STAL turbo-alternator and a standby unit of Messrs. Belliss & Morcom's steam engine type having an output of 600 kw. The turbo-alternator, which is of the latest design, is built on the radial flow double rotation principle, invented by he famous Dr. Ljungstrom of Sweden. It is claimed to be the most efficient turbo-alternator constructed up to the present time. His Excellency, Sir Robert Neil Reid took special interest in this turbo-alternator and was amazed to find that a machine capable of developing 3000 h.p., and running at 3000 r.p.m., was so well balanced that a two anna coin could be balanced edgeways on a thermometer casing and remain there without showing any vibration at all.

The switchgear controlling the turbo-alternator is of Messrs. Asea Electric Ltd.'s make, and this Firm was also responsible for the installation of the turbo-alternator and the spray cooling system.

The Power House is very well laid out and ample space has been provided for future extensions, and the cleanness and neatness of the whole Power Station is evidence of the excellent care taken by the Assam Bengal Cement Company in erecting this important machinery. Their foresight in obtaining the very best machinery available and erecting it in an efficient manner will, certainly, show results in good economy in this important department of the Cement Works.

It is significant that the Assam Bengal Cement Company erected an up-to-date hospital even when the factory was under construction. The Lady Amy Reid Hospital is named after the wife of the Governor of Assam, who was graciously pleased to perform the opening ceremony on the 4th April, 1940. It would be rather interesting to reproduce a portion of the speech delivered by Lady Amy Reid on this occasion:

> "Had we been living in the bad old days when medical science was occupied entirely with the curative side of its work, the Factory would have put up first and set in running order, and after that, as the need arose, a Hospital would have had to be built in which damaged human lives would have been repaired as far as possible.
>
> It is a significant fact, and a splendid augury for the future, that here the first building to be opened is the Hospital and Dispensary, even before the Factory is working. I consider that in doing this the Company has shown itself to be in the forefront of Industrial enterprise. "In the final Report on 'Industrial Health and Efficiency' of 1918, it is written that it is the worker's individual health, mental development and moral well-being which alone can guarantee effectual labour, not only in social relationship between master and man, and between man and man, but as regards the physiological basis of labour. The worker's capital is his health and capacity to work. If that be impaired his outlook is jeopardised, and he may easily become a prey to disease and a liability (rather than an asset), to the State. The public health, including that of the worker, depends therefore all the time upon removing the occasion and cause of physical in efficiency and not waiting for the advent of disease. It must be something positive, the conservation of health and physical fitness."

The cement produced by the Assam Bengal Cement Company is marketed as Diamond Brand Cement. The Test Certificate given by the Government Test House, Alipore, Calcutta, makes it clear that the Diamond Brand is equal to the best.

The sample was drawn by the Physicist of the office on November 2, 1941, at the company's Chhatak factory from two bags of cement one of which was packed in his presence from Silo No. 3 and another from Silo No. 4.

Certifying that the sample complies with B. S. Specification No. 12-1940 for Ordinary Portland Cement both physically and chemically the Test Certificate among other particulars gives the following data:

	Results obtained	Requirement of B. S. Specification No. 12—1940
3.—Tensile Strength (Cement and Standard Sand Mortar).		
1 day (average of 6 briquettes) Lbs. per sq.inch		Not less than - lbs. per sq. inch.
8 days Ditto	474	Not less than 300 lbs per sq. inch.
7 days Ditto	656	Not less than 375 lbs.per sq. inch.
4.—Compressive Strength (Cement and Standard Sand Mortar).		
1 day (average of 8 cubes) Lbs. per sq. inch		Not less than lbs. per sq. inch.
3 days Ditto		Not less than lbs. per sq. inch.
7 days Ditto		Not less than lbs per sq. inch.
5.—Setting Time.		
(a) for normal setting cement		
Initial	119 minutes	Not less than 30 mins.
Final	2 hrs. 48 mins.	Not more than 10 hours
(b) for quick setting cement		
Initial		Not less than 5 mins.
Final		Not more than 30 mins.

order to check a fall. Compulsory insurance against war risks under a Government scheme came in its turn, and the Government offered a guarantee of higher loans up to 85 per cent. to cotton growers. The Egyptian Parliament set up a committee to watch the cotton situation and help the Government to maintain the prices both of cotton and cotton seed. Facilities for shipment were obtained through the Government which made arrangements with underwriters for cover against war risks. Government decided to buy in the market at fixed prices both cotton and cotton seed. A special department under the Ministry of Finance took over the control of the entire trade and started to finance the crop mainly through the semi-governmental Agricultural Credit Bank which was expected to take and sell their crop and pay them 90 per cent. of the price immediately upon receipt of the cotton the balance to be paid on completion of the sale. Similar measures were adopted in 1940 and the Government did for the wheatgrower what had been done to protect the cotton-grower by enabling them to hold off sales by grauting loans against the crop. A further measure was adopted to postpone forced sales of land and small landholders obtained relief through the reduction of tax.

Though the British Government agreed to take the cotton usually taken by Germany, Czecho-Slovakia and Poland, the improvement in the cottongrower's position was temporary, because an important market was lost through Italy's entry into the war. Exports fell and stocks rose in July 1940 by 20 per cent. as compared with the previous July. Shipment and delivery difficulties accentuated anxiety and the 1940-41 crop problem appeared to become insoluble. The British Government came to the rescue with a promise in August 1940 to buy the entire crop and take over 700,000 tons of cotton seed. The price agreed upon was relatively high and a further promise was made that whatever profit was made from the disposal of the crop would be shared between Britain and the Egyptian grower while, if any loss arose, it would be borne entirely by the British Government. Britain took three-fourths of the 1940-41 crop though exports were actually half of the quantity bought. A sum of about £25 million was paid out for the 780,000 bales taken by Britain. Crop control was enforced as much by the difficulty of export as the scarcity of fertilisers. But Britain was on the scene early as a guarantor for half the Egyptian cotton crop. Export control similar to that practised in Egypt has been adopted in Burma to help the Burmese agriculturist, and suggestions that the Indian Government, which deplores the consequences of the freezing order, should help the cotton market continue to find wide support.

Jute for Leather

A new use for jute is likely to emerge from experiments connected with an invention for treating jute waste. The high price of leather stimulates the use of substitutes. Jute, cotton waste, etc., may be treated by a process akin to tanning for making synthetic leather. Rubber, starch and gelatine enter into the process which seeks to find new uses for fibrous wastes. Size and colour can be varied by the manufacturer using the new process which is described in the October bulletin of the Central Jute Committee. It is understood that a patent has been taken out in Britain. It is claimed that the chemically treated fibre bound by gelatine and starch takes polish like leather and can be pressed and finished in the same way.

Clive Street Gossip

"I must have liberty
Withal, as large a charter as the wind
To blow on whom I please."
—(As You Like it.)

Yesterday's news of the British and Empire offensive, taken together with the state of fighting on the Eastern front generally, and around Moscow in particular, clearly suggests that yet another of the numerous phases into which this war has to pass has begun. To lay understanding, these distinguishable phases have great importance. When the relative strength of the forces is so largely a matter of cold calculation of resources and equipment, which are naturally kept secret and when the plans of the respective High Commands are not understandable till they have been actually put into operation, one has to look for what, for want of a more expressive word, may be called the inner dialectic of the war itself. After all, the plans and preparations of men and mice are in the longer perspective of history subordinate to the dialectic of history. And there is none so sagacious as could take into full account the distant repercussions of his mighty actions. When the immediate results are so enchanting, the distant vision becomes a sort of blindness. He that would rend the oak, it is said, dreamed not of the rebound. So may it be with Hitler. Those who, out of self-interest or bias or out of a deeper understanding of historic forces, feel convinced that in the long run Hitler cannot win and that the cosmic purpose is not Nordic glory, can only look, not at the day-to-day accounts of the fighting, the number of planes and pilots lost or destroyed, the towns that were won or evacuated, but to this dialectic of things, which presents events not as fortuitous happenings but with an inner logic of their own.

Hitler has had a long enough innings; and though he may be fresh and the wicket sound, he may still be run out. And he does indulge in unwary running between the wickets, induced in large part by careful placing. The war against Russia was one such; and I can think of no better description of the present than in terms of that tense moment, when the ball has been flung by the hand of an expert fieldsman towards an alert wicket-keeper and the batsman is straining every nerve to reach the crease. My simile, I flatter myself, is not inapt. Taking Moscow before the winter is very much like completing in time this reckless run. It now seems fairly certain that Moscow will not fall and will hold out well into the Spring. Expert opinion is of this view. The Russians who have been at every stage putting a far higher value on their forces than on their territory will get the respite necessary for reorganising and raising their equipment and effectiveness. Except for tanks, all the other war potentials, they have safely tucked away behind the Volga. And the more the Germans press on in the south the more they are certain to encounter the combined forces of Britain and Russia in and about the Caucasus.

A drive through North Africa remained an attractive alternative for the German forces should they find the East too well-guarded. It is this alternative course that has now been closed by the British offensive in Libya. In his last statement in the House of Commons, Mr. Churchill has stated plainly that the objective is not any territory but the destruction of the enemy forces in Africa. If the enemy forces in Africa should be annihilated and the Russians should be ready to continue the fight at as great cost to the Germans as hitherto, then the great counter-offensive of which the Allies have been speaking so long is by no means a distant hope.

Not even the unusual weather clouded the opening ceremony at Belur of the new factory of National Screw and Wire Products. The Company associated with this new venture in the engineering line is too well-known to need any introduction. Mr. N. N. Rakhit who is common to both Boards welcomed the guests of the evening headed by Sir Guthrie Russell. The Director-General of Munitions Production struck an informal note in complimenting the pioneers. The management in describing the objects and achievements up till now of the Company rightly laid stress on screw production being part of the war effort. A direct result of the first factory's going into production will be the mitigation of India's dependence for the essential though humble screws. The plant is rather austere in lay-out, but the motors and machines are more than up to standard. There is lots of elbow room and that appears an advantage. The national importance of Indian-made screws occurs to the least ardent protagonist of Swadeshi. Many congratulations are, therefore, showered on those responsible for the Belur enterprise.

The difficulty of getting the requisite automatic machines was not the only obstacle encountered. The special steel wanted for screw manufacture had to be

provided on the spot. Government's assistance was forthcoming in regard to getting plant and certain machines and parts in the hands of European firms were made available. The statement may be easily made the text of a homily on Indo-British or governmental-private co-operation, but I refrain, except for pointing out, along with Mr. Rakhit, that the enterprise owes even more to the active encouragement of Sir Guthrie Russell. The appearance of various Control orders may savour of interference, if not intolerance, but the Director-General of Munitions Production is, according to Mr. Rakhit's feeling testimony, the inspirer of many promising ventures.

I have been asked what is the kind of enquiries that I had in mind when I pleaded last week for an Institute of Sociology. Some, there are, who believe that a Bureau of Economic Studies should suffice for our purpose. Others are nervous about the probable consequences of mixing up economic and political studies, the idea being that the latter are not as objective as the former. I may say that this idea of a well-endowed Institute of Sociology has been a pet idea of mine for a long time; and if I give expression to it now, it is because I feel I am every day having fresh proof that our stock of ideas for social bettterment remains woefully poor. A natural question to ask in this context is, how have such ideas been produced and laid in stock in the past? That is, in so far as the need for such ideas was felt and the need was consciously met. So far as the Government is concerned, you will agree there never was any intention of serving the whole population. Its standards are bound to be less severe than those which the representative governments of the future or even the Government in its present form will have to conform to in the post-war period. Such projects as the Government felt called upon to embark on were limited in scope. Enquiry in regard to them was of a more or less technical character. A large hydro-electric project or irrigation project, or a scheme of capital expenditure in the Railways could be enquired into by the departments concerned with the assistance of experts at home or from abroad. And the same may be said of private industry.

It is only when a popular government is installed with a general direction that the standard of living should be raised to a certain level within a certain period of time or when an irresponsible government has to preserve order in the internal economy in the face of the liquidation of the war effort and the tremendous disturbances from abroad, that you feel that economic problems are a confused tangle, that each strand has to be isolated and followed and its relations to others more clearly understood. There was no need felt till recently for the kind of light that a large body of full-time research workers throw on problems of national importance. No one wanted to have the actualities and potentialities of our national economy mapped out in full and in the greatest detail. People were content to move freely in the areas with which they were familiar. They did not even worry about their topography.

But now the position is different. Even in those areas in which we have till now thought we know every inch of ground, we dare not take one step in any direction, because we have to know its repercussions. We cannot increase or cut down cotton or cotton mill production without knowing the effects of that action in other spheres. And when you deal with the standard of life in the whole country, you are on even more unsure ground. "Standard of life" is quite a compact phrase. It is very serviceable for an electioneering speech. But deal with it with a view to take it up, and you feel the need for knowledge of facts, for the discovery of

their inter-relations, their possible interactions and all the rest of it. If wishes were horses, you have enough goodwill in the country to make a prince of every peasant. But love of the masses is nothing, if it is not backed up by knowledge of purposeful action. The need for such knowledge, the kind of knowledge that is serviceable for purposeful action, is felt now for the first time. And the nature of the knowledge is such that no official committee, no body of experts, no chambers of commerce, Associated or Federated, will serve our purpose.

But why a ponderous sociology and not a simple economics? That question, I am aware, still remains to be answered. It will, I know, be readily granted that a large part of the solution of our economic problem is to be sought in the political field. The beloved old idea that our political subjection is the cause of our economic backwardness, though far from untrue, is but a part of the truth. As a half-truth, it is dangerous to purposive action. After all, when Dominion Status heaves in sight, we must become conscious that it is not so much that our political subjection is the cause of many of our ills, but it has tended to cover up a multitude of our own sins, as individuals, as communities and as a people. When even in the political sphere, the power of a foreign government is not the whole of our political problem, how can our subjection be the sole cause of our economic backwardness? Conversely, how can the withdrawal of foreign authority be in itself a solution of our political problem? Now, if you are to appreciate the need for well-directed and carefully correlated sociological studies, you must recognise the truth of the following propositions: (1) that the presence of the foreign government though, doubtless, the most important of the obstacles in our path, is not the whole of our political problem; (2) that Swaraj, however achieved, and however organised, will leave us a big bunch of quite knotty problems which can be solved only by patient study and the slow processes of education and propaganda; (3) that national freedom must be even less of a help for the solution of our economic problem than of our political problem; (4) that in the economic field there is even greater need for patient study, education and propaganda and consistent application to particular problems than in the sphere of politics; and (5) that the studies for which this analysis points to the need are closely related and should not be viewed as altogether unconnected compartments.

If you take the problem of our progress as a people as whole, then you will recognise that the worst blunder one can possibly make is to confuse the logical with the chronological sequence. If you attribute economic backwardness to political subjection, you are bound to overlook the fact that it is only an economically progressive people that can fight for its political rights. Progress is not a piece of machinery which you can assemble when, in good time, you have gathered together all the necessary parts. It is an organic growth or development. There is no use looking to only one side of life. Let us establish an organisation which will not be handicapped by the old ideas of separation of economics from politics but will devote itself to separate branches of study of social importance without forgetting that all these branches are from the same parent body.

(From Our Correspondent)

Bombay, Nov. 19.

Not even the reports of labour trouble connected with double shifts and extension hours can reduce the city's interest in textile shares. It is now clear that the stock exchange boom will be concentrated in the textile section. Optimism will be further nourished by the recent recovery in raw cotton. Western India's investors have indeed shown an unequivocal preference for mill shares. The piecegoods market continues to support such optimism. Reports of fresh openings, in Iran particularly, stimulate the feeling that the textile industry can have, and hold, new markets after the war. The shrinkage of imported supplies furnishes another reason for the firmness of prices. If demand remains moderate, the market wears more than ever a healthy look. Export demand is a factor in the further improvement recorded in the first half of November. There are reports that export trade will be subject to control through licenses, and some will welcome the system as a check to precipitate buying at unduly high prices by oversea traders who have connections with Indian mills. With no prospect of any decline in prices, the dealers in Indian cloth are in a position to take advantage of the rise in the rates for Japanese goods. Up-country markets are latterly taking note of the active conditions in Bombay, and it is expected that demand will develop on a broad scale quite soon.

Much interest has been excited by the views of Mr. M. H. Ismail on the prospects in Iran. There is a certainty of rapid increase in exports owing to the virtual disappearance of German and Russian goods. The abolition of the State Monopolies, is a favourable factor. The acute shortage of goods, like the revision of the rate for sterling in rials in September should indeed create a demand for Indian materials and manufactures. Iranian traders are said to be keen on developing trade with India despite present obstacles like the lack of freight. There is, however, the hope that communication between Quetta and Meshed will be soon established. It is certainly to the interest of India to see the growth of British influence in South Persia.

A despatch from Delhi this week indicated that help to Iran has taken the form of opening up new routes from Iraq and India in order to obtain direct connection with Soviet territory. The increasing importance of Basra was certainly predicted by many, but not many have learnt to place value on the diversion or loop line on the railway route from Istanbul to Baghdad. Iran's need like Iraq's for materials and manufactures should grow with the discouragement of Japanese products in countries under Allied Suzerainty. Iran has in the past been one of the best export markets for Indian tea and merchants may buy more freely at the Calcutta Sales. It is clear that Iran's demand for sugar will be more than temporary but there is the question whether India can compete with Java here or in any other market. There is the possibility that India's substantial oil imports can be turned into a bargaining counter but that may not suit the British book. Indian mill goods are likely to find a big market and India can count on regular supplies of wool, skins and furs from the Middle East. There is no reason why grain and flour too cannot be provided by India as in recent months. Iran's trade connections being fluid on account of the changes effected this year, there may not be sudden expansion especially as shipping facilities are restricted. Germany's share of the Iranian market may fall to India only by degrees, but it should be a considerable advantage to India if she can retain an export trade in metals, hardware, cutlery, glass etc. It is believed that trade conditions in backward Iran are not vastly different from those obtaining in India and the mass-produced goods of Soviet origin can be duplicated by India. In spite of the appeal of Captain Lyttelton for curtailing imports into the Middle East and enchancing local production it is doubtful if Iran can make use of his advice whatever Egypt may have already done. It is, however, clear that India's trade with Iraq and Iran may be dominated by military considerations for sometime. Military transports will have precedence over freighters, and the assurance of large supplies from the U.S. for Russia may introduce another element of strain.

Though it may not sound exactly like a voice in the wilderness, it is not at all certain that Mr. M. C. Ghia's appeal to both Congress and Muslim league for a return to parliamentary activity will find prompt response. At the last meeting of the Indian Merchants Chamber he made yet another plea for the restoration of prewar conditions of political life, a plea tempered by the reference to the necessities of the war as also an injunction to Britain to provide a declaration concerning Dominion status. More interest attaches to his scepticism concerning the wartime progress of Indian industry. He declared that self-sufficiency remained remote and regretted that Government had not done anything to establish the key industries required by the planning programme. He urged that the disposal of commodity surpluses was dependent on the development of indigenous industries. Mr. Ghia's reference to united front, war effort and the right to mould our destiny were attained to the pitch of the non-party leaders' statement on the deadlock and indicated also that the merchants of Bombay are not for continuous ploughing of the sands.

The first contribution to the Indo-Ceylon pact controversy was made here by Mr. Aziz last week. He declared that the conditions laid in the agreement for domicile were unsatisfactory and asked that they should be modified. Restrictions on free movement and the acquisition of domicile indeed suggested that citizenship would be a favour sparingly conferred by Ceylon. The residence test originally proposed had not been accepted by the Ceylon Government and it was a surprise to Mr. Aziz to find that the Bagpai mission had not insisted on the 5 years residence qualification as the only acceptable condition. Equality of citizenship had been an original demand of Indians settled in Ceylon, being based on the assurance given at the time of migration. He declared that the Ceylon Indian Congress wanted fresh negotiations and a more satisfactory agreement and pointed to Gandhiji's observation that no decision should be taken until the conditions for the domicile test were altered.

Olympus

New Delhi, Nov. 19.

The Assembly session came to a close to-day—not in a blaze of glory for the new Indian Members of the Viceroy's Council as was expected but in an atmosphere of disappointment and uncertainty. It was widely anticipated that the debate on Mr. N. M. Joshi's resolution on the release of political prisoners would elicit an important announcement from the Government—there was undoubtedly some justification for the anticipation as only last week Mr. Aney asked for the postponement of the debate to enable the Government to be ready with their reply. Unfortunately consultations with the Secretary of State on the one side and Provincial Governments on the other for giving effect to the new policy of conciliation urged by the Indian Members could not be concluded in time. It was not therefore possible for the Government Member to go beyond a promise that the question will be sympathetically considered and an announcement made as soon as possible. The Assembly session has not ended with that feeling of satisfaction which an official announcement of the Government's decision to release political prisoners would have evoked, but the debate has certainly not dashed the hopes which the last few days have raised in the public mind. There is every reason to think that in the course of the next few days an announcement embodying in some measure the new policy urged by the Indian Members will be made, and that this will be followed by important political meetings for a review of the position. On the other hand there is little doubt that if the considered advice given by the Indian Members is rejected owing to any wrong move by the Secretary of State, it will result in the resignation of some or all of them.

* * * *

The tragic death of Mr. L. C. Buss this morning has cast a gloom over Assembly circles. As the Leader of the European Group in the Assembly, he commanded great respect and used his influence, both official members, to bring about better understanding. He was undoubtedly one of the best party leaders which the Assembly has had. During the current session itself the leading part, which he played in securing an agreed formula on the subject of the Indo-Burma Agreement, despite the recalcitrance of some of the younger members of his Group, is gratefully remembered by his colleagues in the Assembly. His speech yesterday on the non-official resolution recommending the release of political prisoners was wise and timely. He speech showed a liberal and friendly spirit which deeply impressed the House.

* * * *

Both the Income-tax Act Amending Bill and the Excess Profits Tax Act Amending Bill were passed to-day by the Council of State. The view expressed by representatives of the business community like, Mr. Shantidas Askuran was that though these Bills effected many improvements, there were still a number of shortcomings. For instance there is a general feeling that appeals to the High Court should be allowed and though the Finance Member opposed an amendment to that effect during the current session, the Government should take an early opportunity to effect this improvement. Objection was raised to clause ten of the Excess Profits Tax Amending Bill, as at present worded, that unless it was made strictly avoidance of the tax liability, it would the sole object was proved to be the avoidance of the tax liability. It would in practice be found to be too sweeping in its scope and entail great unfairness in working. There was also a general desire that the benefit of the new concessions, such as those allowed in clauses 8 and 9 should have retrospective effect. One speaker said that if they were not made operative from 1st September, 1939, it would be tantamount to the levy of a higher rate of tax for the period from 1st September, 1939 to 31st March, 1941. The same claim was made with reference to the Income-Tax Act Amending Bill to the effect that the benefitt of the amendment regarding depreciation should be allowed from 1st April, 1940. There was also objection to the imposition of a fee of Rs. 25 on applications to the Commissioner as it was felt that it might in practice prove to be a penalty and that the unrestricted right of making applications which existed before 1939 was really sound in principle

* * * *

One whole day was taken by the Assembly to discuss the Indo-Ceylon proposals. It would have helped the House if the two non-official delegates, Sir Mirza Ismail and Mr. T. R. Venkatrama Sastri had been nominated to the Assembly to take part in the discussions, but this was probably not practicable. An excellent lead was, however, given to the House by the Overseas Member, Mr. Aney by his promise that the would keep an open mind and that he would not commit the country in any way before fully consulting the Assembly and other interests concerned. As he instructed official members to take no part in the voting or even in the discussions, he was able to give a free hand to the elected members to shape the resolution of the House as they thought best. The resolution ultimately passed without a division, takes good care to avoid any aspersion on anybody and also any harsh expressions in stating its case, but it has brought out clearly what should be done to make the proposed agreement acceptable. The resolution demands that Indians in Ceylon on the prescribed date of agreement as also those who had been resident in Ceylon within a specified period before the date of the agreement should have full rights of citizenship with freedom of entry and no regional or occupational restrictions of any kind. It further stipulates that for the future provisions should be made for entry and occupations so that the trade interests of Indians were safeguarded and that unskilled labourers permitted to emigrate were assured of freedom of movement, choice of employment and opportunity to acquire full citizenship rights.

* * * *

The appointment of Sir John Dill as the next Governor of Bombay has been received with some surprise in Assembly circles. His professional eminence is not questioned; in fact, it is considered surprising that he should have cared to accept it. Still the question is two fold-first, whether it would not be better to select for Governorships men drawn from public life who have had political experience, and secondly, whether the time has not come for selecting suitable Indians for future Governorships. The general surmise is that early next year Lord Linlithgow may go on leave to Europe. The present Governor of Bombay, Sir Roger Lumley, is expected to officiate as Viceroy handing over the Governorship to Sir John Dill. An announcement is shortly expected regarding the Assam Governorship which is falling vacant early next year.

Tit Bits of Industrial Activity

Pyrethrum in India is not an exotic. Experiments have shown that the source of Pyrethrin thrives in this country. It is no longer necessary to look to Japan for this weapon against the mosquito. Trials in the Punjab and Kashmir have proved that the plant does well. In other hilly districts promising results have been obtained. Elsewhere it has failed because the dry climate and well-drained, light soil needed for this plant cannot be had. Samples analysed at the Agricultural Research Institute have not been however as satisfactory as those procured from Kenya. But the Pyrethrin content is adequate and prospects of cultivation, if assured of adequacy of seed, may be taken as bright. Kenya has banned the export of seed but there is a chance of getting seed from America. The possibility of growing the plant in India has been referred to many times last year to show that India can be self-sufficient in respect of one more article. Provided the flowers are graded and examined in relation to the content of the insecticide there is a chance of going ahead with the new crop in many Provinces.

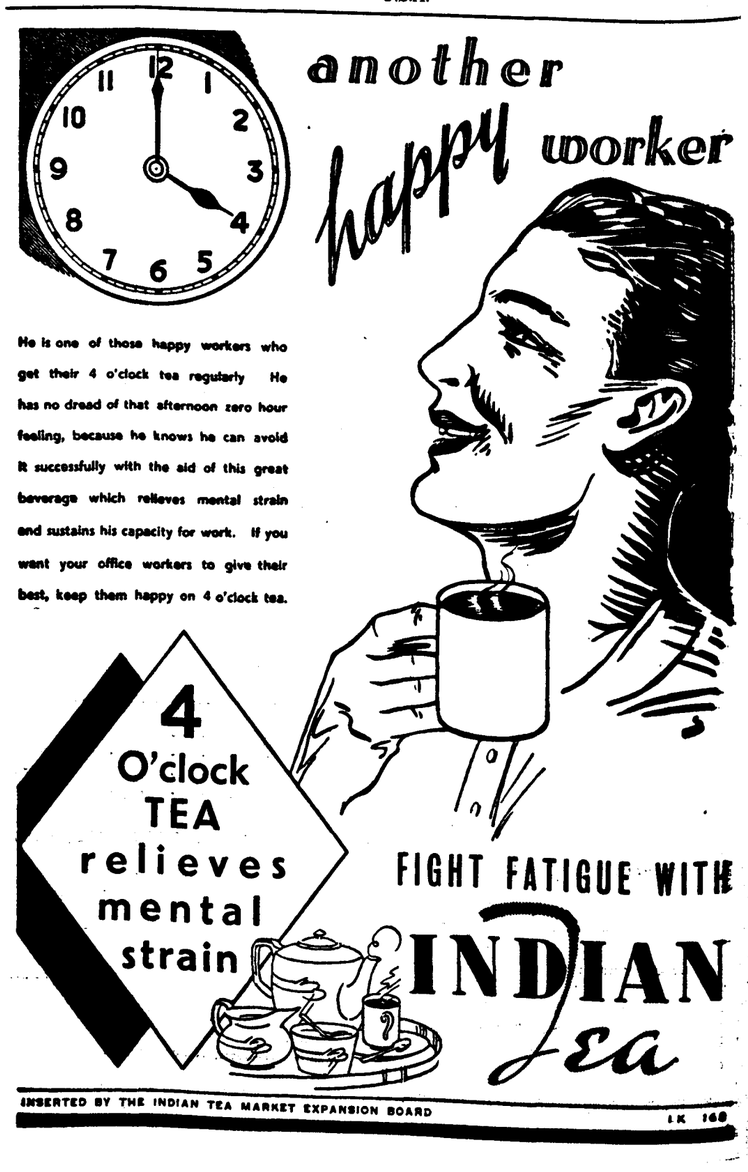
SANDPAPER MANUFACTURE

The construction of machines capable of making sandpaper was referred to by a Bombay newspaper recently. Imported machinery has been used successfully till now, but it is possible to produce locally such machinery at a lower cost. Sandpaper is made from sand and glue pasted on paper and cut into lengths. Machines for glueing, sanding and cutting are required for the job, and only small motors are wanted to drive the machines while the sandpaper is cut into strips by another machine operated by hand. The stamping and shearing machinery has to be attached. It has been reported that a machine is being built in Bombay for making sandpaper and is likely to prove successful as being simple and efficient. The plant has an estimated output of 10,000 pieces of 12 ins. by 10 ins. paper in a working day of eight hours.

DUTY ON TINPLATE

It is reported than an application to the Government of India made by the Associated Chambers for the lowering of the import duty on tinplate has been turned down. The application made on behalf of the tin manufacturing industry in India asked for a reduction of the existing protective duty for the duration. The Bengal Chamber of Commerce has been informed that a lower duty is not justified. The present high price of tinplate has reduced the incidence of the duty. Tinplate may be classed with the unprotected iron and steel materials imported, and the existing specific duty may be viewed as a revenue duty, according to the Government's reply which also points out that a reduction in import duty will not remedy the shortage of tinplate.

USE FOR LINSEED STRAW



More than one reference has been made in recent months to the possibility of using linseed straw for making fibre. The U. P. Government is said to be interested in experiments which will confer some value on the million tons of straw now used as fuel in India. Indian linseed is different from the European variety which produces both flax and oilseed but some sort of fibre can be extracted from the straw. The shortage of flax explains the experiments conducted by the H. B. Institute to show that linseed straw can be used for making rope twine, thread and cottonised fibre. The straw can be used also for paper manufacture, and further experiments, as regards bleaching and softening the linseed straw fibre, are said to be in progress.

LABOUR ENQUIRY

Labour conditions in jute presses are to be investigated by a special officer appointed by the Bengal Government. The trade associations concerned had been informed that the Government proposed to undertake an enquiry in persons in Calcutta and Howrah also upcountry centres. The enquiry is distinct from that usually made by a court of enquiry appointed to investigate a trade dispute. The Bengal Chamber was satisfied that only an investigation for the purpose of suggesting improvements could be undertaken, and the Special Officer's report will be made available to employers who would be called to discuss the recommendations of the report with Government which has appointed Mr. A. D. Khan, I.C.S., to make the enquiry.

RECORD SHOE PRODUCTION

The latest available report of Mr. M. S. Malik refers to the concern expressed in the U.S.A. concerning further supplies of shellac. The report speaks of heavy demand for karaya gum. Indian karaya gum finds an expanding market in the U.S.A. at the expense of locust bean gum normally imported from Italy, France, Malta, Cyprus and the U.K. The report bears witness to the higher activity in the U.S. and Canadian shoe industry. The offtake of Indian goatskins is likely to increase since the Department of Commerce estimated that more than 462 million pairs of shoes will be produced in North America during the current year. The estimated output will be a record showing an outstanding increase on the 1940 output of 443.4 million pairs. It is believed that Canada will produce as many as 30 million pairs in 1941 while the U.S.A. is sure to produce over 443 millions. The rising national income will increase the use of shoeleather as also of tea. Trade circles report increased tea consumption since distributors' stock has fallen. Indian tea is sure to benefit from the increased demand for tea in the U.S.A.

Resume of Commodity Markets

Except for the continued strength of the gold and wheat markets, there are no outstanding features to be recorded in the commodity markets during the past week. The announcement regarding the further order for 62 million sandbogs to be delivered in the first nine months of next year had an encouraging effect on both the jute and manufactures market, but the improvement in values in these markets was only shortlived. The realisation that there would in any case be an increase in the area under the jute crop for the next season has brought about a reaction in values in the jute market while the absence of any large overseas buying and the readiness of mills to sell for forward positions have suppressed values in the hessian market. Only the strength of the raw cotton market has been puzzling to a certain extent. In view of the serious situation in the Far East and the likelihood of there being no early relaxation in the economic blockade against Japan, the market would generally have recorded a fall in prices. For, in any case, the increase in Indian mill consumption cannot displace exports to Japan, thereby causing some genuine anxiety that it may not be possible to keep up prices. At the moment, however, the encouraging reports from the cloth markets and the unfavourable reports regarding the condition of the crop in the cotton districts have imparted strength to the markets.

It was generally expected that the upward movement in prices for wheat would be limited as it was reported that the Central Government were contemplating the extension of price control to the Punjab. The shortage of wagon supplies, the reports regarding large scale buying and movement of wheat to the Middle East have naturally had an encouraging influence on the market and values are substantially higher.

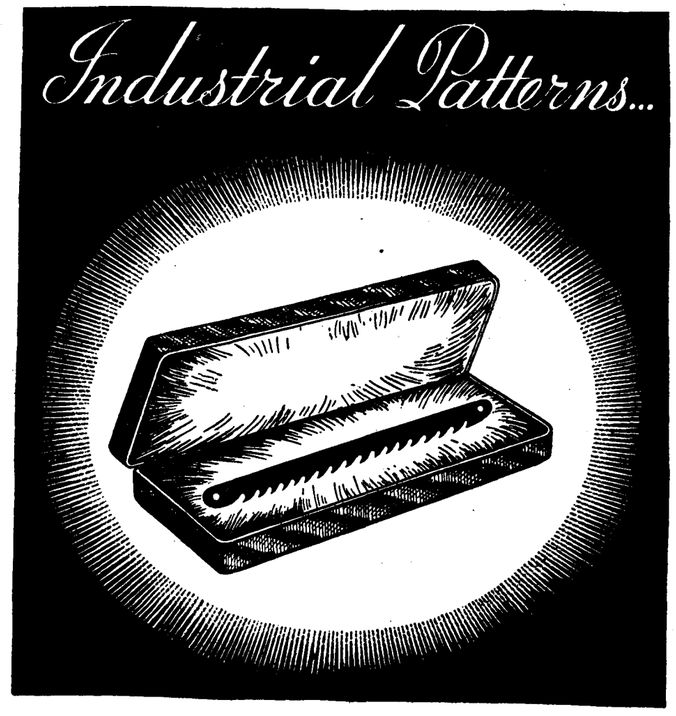
Jute

The futures market recorded a rise in the quotation to Rs. 70-4 soon after the announcement for sandbags. Mills also bought loose jute to a certain extent. But the higher level of prices has not been well held as, with the increase of arrivals and the withdrawal of support by mills, prices have receded. The undertone, however, continues satisfactory.

Export buying continues to be limited on account of the difficulty in shipments. But a large quantity of jute is reported to have been purchased on behalf of Russia in midweek. Already a big consignment of jute has been delivered to Russia by the new route from India through Iran to the Russian border.

With the likelihood of mills continuing to work 60 hours per week well into the next year, it can be expected that the consumption on acount of mills will be very nearly 75 lakhs bales. Combined with exports of about 5 lakhs bales, there will be a reduction in the carry forward to the next season by about 20 lakhs bales as the trade estimates of the current year's crop are about 60 lakhs bales. The carryover to the next season may not, therefore, be more than 15 lakhs bales. On the basis of the present consumption, it is, therefore, necessary to have an increase in the area of the crop for next season to at least half of the area for 1939-40.

The suggestion to double the area under the crop for 1941-42 is based on the assumption that an ample reserve of the raw material should be available. How far the Government will be able to do it without affecting the price structure remains to be seen.



Jute Manufactures

The jute manufactures market has been absolutely uninteresting. There was a slight rally in prices on the announcement of the new order for sandbags but prices have not been well held. The lack of enquiry and the fall in shipments during the month have been mainly responsible for the apathetic tone of the market. As remarked last week, the lull in the market is to be explained by the decision of American consumers to defer buying.

The new order for 62 million sandbags has been placed with the Indian Jute Mills Association through the Government of India. Delivery is to be in the first instance for twelve million sandbags in equal instalments from January to April, 1942 and fifty million also in equal instalments from May to September, 1942. The price is the same as for previous orders.

Piecegoods

The continued reserve of manufacturers has forced buyers to come into the market. With the increase in costs of manufacture and the rising demand for indigenous products, it is generally feared that it will not be possible to induce manufacturers to lower their limits. Consequently, a greater volume of business has been passing in Indian styles especially for the popular descriptions. Business in dyed varieties has been restricted on account of the difficulty in getting supplies of dye stuffs, chemicals and the anticipations of a further shrinkage in supplies. No business has been possible with Japan. In the yarn market, dull conditions were noticeable in the early part of the week but there has been a sudden burst of activity and prices have been forced up very much higher.

Jute and Jute Manufactures

(By our Correspondent)

Calcutta, Nov. 20.

THE East India Jute Association has wasted no time in issuing its protest to the Bengal Chamber memorandum published last week, but in its haste it has not paused to make sure its arguments for its continued existence were altogether convincing. For instance we do not think that Professor Todd's report went out of its way to disprove the claim of the Chamber Jute interests that the Jute Futures market was unnecessary. What the report demonstrated was how such a market, properly constituted, could be utilised by the Jute Mills, (by far the largest purchasing element in the trade), if they were drastically to alter their present methods of business. The fundamental principle of the Mills has always been to cover their forward sales of goods by purchases of actual jute, and with ample storing accommodation, they have almost always carried half a year's stock or more raw material. Professor Todd's scheme merely pointed out how, by utilising a Futures market, the Mills could cover their sales without buying actual jute, or by buying for further forward delivery that they can in the actual loose jute market. If it is Mills' considered opinion that their present methods suit them best, then the Futures market is of little use to them. What is however incontrovertible is that a Futures market in which the largest purchasing element takes no part must of necessity fail to reflect, except perhaps indirectly, the real course of trading markets; and with its legitimate activities still further curtailed by a limited export business, the only element left in the Futures market is the purely speculative element.

The E.I.J.A. claims that it brings into the market a large number of competitive buyers with large financial resources. We have of course heard of not a few of these competitive buyers leaving their financial resources behind in Royal Exchange Place. But that apart, as practically no delivery is either given given or taken in Fatka transactions, it follows that these competitive buyers must sooner or later become competitive sellers, so that their influence cannot always be "Bullish" as the protest seems to convey. Then the E.I.J.A. brings in the Board of Control as a justification for its continued existence. But we fear that the "control" exercised by the Board is of the sketchiest. It meets once a fortnight to fix a clearing rate and so consider any other matters brought before it. But unless complaints are made to the Board regarding malpractises in the Fatka market, the Board has practically no power to interfere or to correct abuses. Finally it is edifying to find the E.I.J.A. taking credit for safeguarding the interests of the cultivator. This is not how the E.I.J.A. has been frequently stigmatised by the Government it is addressing. But this altruistic safeguarding of the interests of the cultivator has become a stock claim whenever any aspect of the industry is being discussed nowadays, so much so that before long we shall not be surprised to hear a wail from the cultivators —save us from our friends.

Another matter which has aroused considerable interest and caused the circulation of many and varied rumours, is the discussion which has been going on between the Central and the Bengal Governments regarding the extent of restriction to be imposed on the Jute Crop next year. Without any official confirmation so far, the figure seems to vary between two-thirds and three-fourths of the registered acreage of last season. It is known that the Mills favour the latter figure so that there may be no shortage of raw material during a period when demands look like being heavy and may become heavier. With the orders already placed by Government departments, 60-hour working is practically assured up to September of next year. On this basis, Mills' requirements of jute up to 30th June 1942 will be in the region of 75 lakhs of bales. That is to say, the whole of the current crop should be absorbed and a considerable proportion of the carry-over from last crop, without making any allowance for jute to be exported. In fact it looks as if Mills would inevitably enter the next season with reduced stocks of raw material, a position they will probably wish to rectify without delay. Moreover as much of the increased production is of hessian, a shortage of quality jute seems likely to be acute. Mills will therefore be praying not only for a large crop but for a good quality crop, and it would seem a very dangerous policy in the circumstances for the Bengal Govt. to legislate for anything but an ample margin of the raw material.

About the only feature of interest in the Export Jute side was the placing of an order for 17,000 Bales for Russia on the basis of Rs. 62 for Firsts, Rs. 53 for Lightnings and Rs. 58 for Outport Tossa. The prices are very much "cut" and it seems doubtful if the deliveries will be recognisable as what they purport to be. Some Dundee Tossa was reported at Rs. 76 and Rs. 76-8. Mills have made purchases of Free from Samla special Firsts at from Rs. 74 to Rs. 77, of Dundee Daisee at Rs. 65 to Rs. 67, of Outport Daisee at Rs. 57 and of Outport Tossa 4s at Rs. 50. On the announcement of further Sandbag orders practically ensuring that Mills would continue on 60 hour working up to September, the Fatka market firmed up rapidly from Rs. 66-8 to Rs. 70-4 and has since been hovering between Rs. 69-8 and Rs. 68 to close quiet at Rs. 68-4.

MANUFACTURED TO THE HIGHEST STANDARDS OF QUALITY

The Rhino has been chosen as our Trade Mark to illustrate the toughness and strength of our Kraft Paper. This paper, manufactured from Indian Bamboo pulp, is as good as can be made.

We also make other types of POSTERS, WRAPPINGS, PRINTINGS, MANILLA etc.

JUTE

Calcutta, Nov. 20.

THE new order for sandbags towards the close of last week had an encouraging effect on the market and the quotation in the Futures market improved to Rs. 70-4 on speculative buying and the hope that mills will be obliged to work longer working hours for the major part of 1942. Mills also bought in appreciable quantities. But selling at the higher levels has brought about a fall in prices. The easier tone of the hessian market also has contributed to a certain extent. As pointed out on earlier occasions it looks as if there will not be any important fluctuations in prices with the present buying policy of mills.

In the loose jute section mills bought in fair quantities earlier in the week, Indian District Tossa Middles were purchased from Rs. 13-8 to Rs. 14-8 and Bottoms from Rs. 12-8 to Rs. 11-8 according to districts. Indian Jat Tossa Middles were done at Rs. 17-8 per maund.

Not much of business was done earlier in the week. During the last two days some business has been reported done for Russia in Firsts, Lightnings and Tossa 2-3 at Rs. 62, Rs. 53 and Rs. 58 per bale respectively.

In the Futures market, after earlier firmness there has been a drop in the quotation to Rs. 68-4 in to-day's session. The undertone is quiet.

JUTE MANUFACTURES

Calcutta, Nov. 20.

The jute manufactures market was inclined to be firmer on the announcement of the new order for sandbags and there was a firming up in the rates alround. But the continued absence of buying enquiry and the readiness of mills to sell for the forward positions has curbed speculative activity and there has since been a decline in the rates. The undertone, however, continues steady. 9 porters ready are quoting Rs. 22, December Rs. 21 January|March Rs. 19-10 and April|June Rs. 18-6. 11 porters ready are Rs. 26-8 December Rs. 25-12, January|March Rs. 24 and April|June Rs. 22-6.

In the heavy goods section there has been very little doing. B. Twills for November shipment sold on the basis of Rs. 38-4, Heavy Cees Rs. 37-8, Cornsacks Rs. 39-4, Liverpool Twills Rs. 45-8 and A. Twills Rs. 47.

B. M. BHARGAVA, *Secretary.*

A further order for sixty-two million sandbags has been received by the Indian Jute Mills Association through the Government of India. Delivery will be in equal monthly instalments—twelve million between January and March 1942, and fifty million between April and September 1942. The price fixed is Rs. 12-4 per hundred bags f.a.s. or f.o.r.

The same conditions regarding specification, insurance and storing, apply to this order as to the previous ones, and allocation to individual mills will follow.

These bags will not be rot-proofed.

COTTON

Calcutta, Nov. 20.

The Bombay raw cotton market has been rather uninteresting and if there was any firming up in prices on occasions it was only due to the strength of the gold and linseed markets. Some jobbers' selling at the higher levels has reduced the gains. There is some resistance to selling pressure at the lower levels. The strength of the markets in spite of the uncertainty regarding the future outlook is surprising. It is true that the reports regarding unfavourable weather conditions in the cotton districts have had an encouraging effect but, while there might be an improvement in the statistical position, the total crop will still be in excess of mill consumption and exports. Broach April|May are quoting Rs. 238-8, Oomra December|January Rs. 202, March Rs. 194, Bengal December-January Rs. 143 and March Rs. 147-8.

The New York market has been uninteresting. There has been some hedge selling on account of the widespread strikes in the U.S.A. The latest beareau report has not had any effects on the market. December are quoting 16.10 cents and March 16.34 cents. against 16.26 cents and 16.45 cents at the time of last writing.

GOLD

Calcutta, Nov. 20.

The demand for gold has continued to be in evidence. A rise in prices was again recorded earlier in the week, the quotation for ready being at one time as high as Rs. 44. There has been good demand for sovereigns especially. During the last two days there has been some selling and there has been a recession in prices, but closing quotations are higher on balance. Gold ready are quoting Rs. 43-11-6, First Settlement Rs. 43-11 and Second Settlement Rs. 43-10-6.

The London price has remained unchanged at 168 sh.

SILVER

Calcutta, Nov. 20.

In spite of the strength of the gold market there has been no activity in the silver market. Quotations have been fluctuating in very narrow limits. Indian Mint Silver ready are quoting Rs. 63-1, First Settlements Rs. 62-15 and Second Settlement Rs. 62-14-6. The report that a new agreement has been concluded between Mexico and the United States regarding the purchase of newly-mined silver should have encouraging effect on values. The London market has been rather interesting and quotations for both spot and forward are unchanged at 23¾d.

WHEAT

Calcutta, Nov. 20.

There has been a further rise in prices in the wheat market during the past week. Continual export buying and the report that large quantities have already been despatched to the Middle East have been responsible for the smart rise in prices. But for the fears regarding price control a further rise in prices would have been recorded. Large quantities of wheat have already been despatched to Iran. Choice White ready are quoting Rs. 44-6-6, November Rs. 44-6-6, January Rs. 44 and July Rs. 30-6.

There has been a firming up in prices in the Calcutta market also. There is a shortage of wagon supply and this has caused a fall in arrivals in every centre. The quotation for Cawnpore ready is Rs. 5-14, and May Rs. 5-5-3. There has been some selling at the higher levels, the highest quotation for the week being Rs. 5-5-6.

IN THE CALCUTTA & DISTRICT

NATIONAL DEFENCE AND SAVINGS WEEK

Every citizen of Calcutta should buy at least one Defence Savings Certificates to protect himself, and to help towars Victory. Thus Calcutta will give a lead to India

Buy a Savings Certificate a Day in the Week

Vol. XXVIII. No 21 SATURDAY, NOVEMBER 22, 1941 Price Re. 1

Stock Markets to-day and to-morrow

Improved Outlook for Sugar Shares

It was pointed out on the last occasion that a fresh order for sandbags was announced after the close of dealings on Friday last week. There was, therefore, no possibility of discussing if the announcement would have any effect on prices. In Saturday's short-session there was naturally considerable buying and substantial rises in prices were recorded. The bullish fervour continued to be in evidence in both Calcutta and Bombay till Wednesday this week. Only during the last two days there has been some profit taking which, however, has been fully absorbed.

The feature of the week is the sharp rise in the quotation for *Agarpara* ordinary shares from Rs. 35-8 to Rs. 44 on reports that there would be a dividend of Rs. 1-8 per share for the half-year ended September, 1941 and that there would also be a bonus issue of one share for every share held. The quotation has been maintained at the higher levels.

* * * *

Last week I commented on the bonus shares to be issued by some of the jute companies belonging to the Bird & Heilgers group. It was not possible to examine the financial position of all the companies affected by the bonus issue on account of the lack of space. As a result of the capitalisation of reserves, the capital structure of the companies will be as given in the next column.

* * * *

As mentioned last week, Kinnison and Lawrence are to issue one bonus share for every share held while the other companies are to issue one share for every two shares held.

The new shares issued do not rank for any dividend declared in respect of the half-year ending September, 1941, but otherwise rank for dividend and in all other respects *pari passu* with the existing ordinary shares of the Company. The bonus shares are to be issued to shareholders as on December 20, 1941.

The strong financial position of the companies declaring the bonus issues will be evident from the fact that while available resources are over Rs. 1,84 lakhs the amount capitalised is only Rs. 54.5 lakhs.

* * * *

The results of the two companies belonging to the Mackinnon Mackenzie group for the half-year ended September, 1941, reflect in full measure the prosperous conditions in the industry. While it has been possible for the *Megna Mills Co., Ltd.* to declare a dividend of 5 per cent. on account of the smaller amount of paid-up capital, it has not been possible for the *India Jute Company, Limited* to increase the dividend for the period to any marked extent. The anticipations of the market regarding the ability of the *Megna Mills Company, Limited* to declare a higher dividend have, therefore, been fully justified and the recent rise in prices is viewed as legitimate.

The net profit of the Megna Mills for the half-year before providing for taxation and depreciation is Rs. 10,83,487 against Rs. 5,06,,718 for the previous half-year. The amount set aside to depreciation is Rs. 1,43,295 against Rs. 46,963 while the allocation to Contingency and Suspense account is the same at Rs. 2 lakhs. The provision for taxation is considerably higher at Rs. 6,16,345 against Rs. 1,00,000. The dividend has been doubled to 5 percent.

Out of the total issue of 61,239 ordinary shares 40,840 shares are held by the *India Jute Company, Limited*. Any increase in the buying of Megna shares should therefore result in a sharp appreciation in values in the case of India too.

The net profit of the *India Jute Company, Limited* for the same period before providing for taxation is Rs. 10,14,369 against Rs. 3,99,942 for the previous half-year. The provision for depreciation is lower at Rs. 50,000 against Rs. 75,000 while the transfer to Taxation Reserve is considerably higher at Rs. 5,56,214 against Rs. 2,10,000. There is an allocation of Rs. 75,000 to Contingency and Suspense in addition. The dividend on the ordinary shares is higher at 3¾ percent against 2½ percent while that on the deferred shares has been increased from 2½ per cent to 3 percent.

In lakhs of Rupees)

Name	Present Paid-up Capital Rs.	Increased Paid-up Capit l as a result of bonus issue Rs.	Amount capitalised Rs.	Total Relerves as on 31-8-1941 Rs.
Dalhousie	30.00	37.50	7.50	22.68
Kinnison	30.00	45.00	15·00	44.81
Lawrenee	25.00	35.00	10.00	28.47
Naihati	17.50	22.50	5.00	32.85
Northbrook	23.00	27.00	4.00	16.61
Standard	23 00	30.00	7.00	15.51
Union	18.00	24.00	6.00	28.76

In view of the difficult conditions experienced by the sugar industry only last season, it could not have been expected that there would be such a sharp recovery in earnings. The results of six important companies published during the week make an excellent showing, the aggregate profit for 1940-41 being Rs. 32,01,884 against Rs. 14,15,935 for 1939-40. The results of the Begg Sutherland Group, especially deserve notice. The improved results, which the accounts now presented by the Board disclose, are due to a high standard of efficiency being maintained in manufacture and the treatment of canes with a higher sugar value.

* * * *

The accounts of the *Champarun Sugar Company* for the year ended June, 1941 must be deemed satisfactory. On account of the sharp rise in earnings it has been possible to increase the ordinary dividend from 2½ per cent to 15 per cent. The net profit before providing for taxation is Rs. 7,99,517 against Rs. 2,52,994 for 1939-40. The amount set aside to depreciation is the same at Rs. 1,37,500 while the provision for taxation is Rs. 1,74,074 (Rs. 28,000). There is an allocation of Rs. 1,32,039 to General Reserve in addition. The dividend is Rs. 1-8 per share against As. 4 per share. Even after these large appropriations the amount carried forward is substantially higher at Rs. 1,90,897 against Rs. 1,04,994 brought in.

* * * *

The two companies under the Govan Brothers management have done very well. Both the Raza and Buland companies have declared a higher dividend of 15 per cent. and a bonus of 2½ per cent. in addition. The rise in the quotation for the shares to over Rs. 27 cum-dividend is quite understandable.

Watch-Dog.

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, Nov. 21.

RATHER active conditions have been noticeable on the Calcutta Stock Exchange during the past week. The announcement of a fresh order for sandbags earlier in the week was responsible for the fresh rise in prices early this week. The strength of the Bombay market also was helpful. The sentiment has been cheerful and a substantial rise in prices has been recorded all round. Jute shares have not been very active though transactions have continued to be on a large scale. Coal shares have been in greater request while in the Engineering section both Indian Irons and Steel Corporations have been marked higher substantially. During the last two days there has been some profit-taking at the higher levels. This has resulted in a slight recession in rates but the undertone in all sections is steady.

The giltedged securities section has continued steady with the quotations maintained at last levels. Business has continued on a restricted scale. In view of the hardening in money conditions and the increased activity in other sections not much attention has been paid to this section by operators. 3½ per cent. Paper is unchanged at Rs. 96 and 3 per cent. Paper at Rs. 82-10. Among terminable loans, 3 per cent. 1963|65 were done at Rs. 95, 3½ per cent. 1947|50 at Rs. 102-4, 4 per cent. 1960|70 at Rs. 111, 4½ per cent. 1955|60 at Rs. 114-13 and 5 per cent. 1945|55 at Rs. 111. 3 per cent. 1951 issues have been done at Rs. 99-10. Money conditions during the week have shown a tendency to harden and there has been a rise in the treasury bills rate from twelve annas and two pies per cent per annum to thirteen annas per cent per annum.

Among fixed interest securities not much business has been passing. There have been practically no transactions in public bodies debentures. Among preference shares *Bowreah* 'B' preferences were at Rs. 111-8, *Albion* at Rs. 171 *Lansdowne* at Rs. 149, *Lothian* at Rs. 172 and *Waverley* at Rs. 75-8. Among others, *Kumardhubi* were done at Rs. 153, *Jessop* at Rs. 122 and *Purtabpore* at Rs. 21.

Having regard to the activity in other sections and the strength of textile issues in the Bombay market it should be said that cotton shares in the Calcutta market have not been quite active. *Cawnpore Textiles* were Rs. 10-5, *Elgin* Rs. 30-8, *Bowreah* Rs. 408-8, *Kesoram* Rs. 10-8 and *New Victoria* Rs. 5-4.

Coal shares have been firmer in sympathy with the rest of the market. The brighter industrial outlook and the possibility of an increase in the despatches have been mainly responsible for the rise in the popular shares. *Bengal* have been noted higher at Rs. 415. *Burrakur* were done at Rs. 15-9, *Central Kurkend* at Rs. 16-4 and *Dhemo Main* at Rs. 15. *Equitable* are more than a point higher at Rs. 40-8 while *Raneegunge* were Rs. 31-10 and *West Jamuria* Rs. 33-8. There has been a sharp rise in the quotation for *Burra Dhemo* to Rs. 6-12.

In the jute section also moderate rise in prices have been recorded. The new order for sandbags and the publication of further encouraging reports by jute companies have pushed up values. The rise in *Agarpara* is significant. There has been a jump in the quotation from Rs. 35 to Rs. 44 on the rumours of a bonus issue. *Adamjee* are quoting Rs. 33-12, *Anglo-India* Rs. 402-8 ex-dividend, *Bally* Rs. 281-8, *Howrah* Rs. 64, *Gourepore* Rs. 773 *ex-dividend*, *National* Rs. 28-12, *Nuddea* Rs. 71-2 ex-dividend, *Reliance* Rs. 66 and *Union* Rs. 555.

In the Engineering section Indian Irons and Steel Corporations have been in good request and the quotations were at one time marked as high as Rs. 36-12 and Rs. 22-6 respectively. There has been some profit-taking at the higher levels and the quotations at the time of writing are around Rs. 36-2 and Rs. 22-3 respectively. *Braithwaite & Co.* were done at Rs. 10-11, *Burn & Co.* at Rs. 407-8, *Indian Galvanizing* at Rs. 32, *Kumardhubi Engineering* Rs. 6-4 and *Saran Engineering* Rs. 6-8. There is a hardening tendency in the rates for *Jessop & Co.* shares and it is quite likely that there will be an appreciation in the quotation before long.

On the publication of excellent earnings figures by important sugar companies there has been a good rise in prices. *Balrampore* are one and a half points higher at Rs. 13-11. *Carew & Co.* were Rs. 12-14, *Champarun* Rs. 22, *New Savan* Rs. 13-12 ex-dividend, *Ryam* Rs. 28-8 and *Samastipore* Rs. 11-2. A small lot of *Cawnpore* was done at Rs. 27-4.

In the Tea section also firmer conditions have been noticeable and a longer list of transactions has been recorded. *Baradighi* were done at Rs. 51-8, *Bishnauth* at Rs. 30-10, *Hattikhira* at Rs. 24-12, *Huldibari* at Rs. 26-9 and *Tongani* at Rs. 7-2.

In the miscellaneous section *Burma Corporation* and *Indian Copper* have been marked higher at Rs. 5 and Rs. 2-6 respectively. *B. I. Corporation* were done earlier in the week as high as Rs. 5-8 but there has been a recession towards the close to Rs. 5-2. *Dunlop* have been in good favour and the quotation is three points higher at Rs. 46-2. *Aluminium Corporation* were done at Rs. 14-8, *Borooah Timber* at Rs. 19-12 and *Midnapore Zemindary* at Rs. 87. Paper shares have been more active with *Bengal Paper* at Rs. 169-8, *Orient Paper* at Rs. 18-11, *Shree Gopal Paper* at Rs. 16-3 and *Titaghur Paper* at Rs. 24-14.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, Nov. 20.

Money.—Dull conditions continued to prevail in the money market, the rate for call money being quoted at ¼ per cent.

Securities.—There has been no special feature in the giltedged market which continues to be steady with a limited turnover. The price of 3½ per cent Paper remains unchanged at Rs. 96. Among dated-bonds, 1960|70 were slightly better at Rs. 111, while 1945|55 were on offer at Rs. 111. 1948|52 were unchanged at Rs. 98-2; 1951|54 at Rs. 99-13; 1963|65 at Rs. 95; 1947|50 at Rs. 103-4; 1955|60 at Rs. 114-13 and 3 per cent 1946 *Defence Bonds* at Rs. 102.

Shares.—Taking the week as a whole, share values have recorded a substantial rise on aggressive buying, despite occasional setbacks in the course of the week. The general sentiment remains bullish while investment support is improving. As in the past three weeks, Textiles led the market and Steels, after staging a very good rise, slightly declined, as the week drew to a close, owing to some profit-taking. In the miscellaneous section, *Bombay Burma Trading* and *Associated Cement* have shown further improvement in prices.

Textiles.—Buyers continued to dominate the market with the result that there has been a substantial rise in prices. Business in this section is, however, more of a speculative nature than of investment, because of the wide difference between the forward and cash prices. *Bombay Dyeing*, after opening at Rs. 1,433-12, showed a gradual advance to close at Rs. 1,450, showing a rise of 30 points over the previous week. *Gokak* have improved to Rs. 315 from Rs. 286, while *Simplex* were in demand at Rs. 218. *Central India* in the previous week; *Century* at Rs. 497-8 against Rs. 485; *Colaba* at Rs. 263 against Rs. 251; *Kohinoor* at Rs. 602 against Rs. 582 and *Phoenix* at Rs. 500 against Rs. 475. In the cash section, *Bombay Dyeing* are quoting at Rs. 1,307-8; *Central India* at Rs. 387; *Century* at Rs. 444; *Gokak* at Rs. 237; *Kohinoor* at Rs. 504; *New Great* at Rs. 285 and *Simplex* at Rs. 159. *E. D. Sassoon* are a shade easier at Rs. 3-2. *Indore Malwa* are higher at Rs. 305.

Hydro-electrics.—Prices in this section have also shown slight improvement in sympathy with the other sections. *Andhra Valley* were at Rs. 1,770 and *Tata Power* at Rs. 1,825 but *Tata Hydro* have remained unchanged at Rs. 190.

Steels.—Steel shares moved up considerably owing to continuous speculative support and the absence of selling pressure. *Tata* ordinaries opened higher at Rs. 424-8 and deferreds at Rs. 2,272-8. The continued strength of Textiles and *U. S. Steels* took up prices of Tata shares further to their week's best of Rs. 431 for the ordinaries and Rs. 2,335 for the deferreds on Wednesday. Towards the close to-day, however, there was some scattered selling with the result that the ordinaries closed a shade easier at Rs. 427 and the deferreds at Rs. 2,310.

Banks, Insurance & Railways.—Bank shares were steady, *Bank of Baroda* being quoted at Rs. 119; *Imperial Bank* fully paids at Rs. 1,625; contributories at Rs. 402-8; *Bank of India* at Rs. 149-8; *Central Bank* at Rs. 55 and *Reserve Bank* at Rs. 109-12.

Among Railway shares, there was enquiry for *Ahmedabad Prantej* at Rs. 883-12.

In the Insurance section, *New India* came to business at 59-8.

Miscellaneous.—There was speculative buying in *Bombay Burma Trading* and *Associated Cement* which appreciated to Rs. 587-12 and Rs. 180, the closing rates being slightly lower at Rs. 577-12 and 179 respectively. *Belapur Sugar* were marked higher at Rs. 271 as compared with Rs. 253-8 and *Tata Chemicals* at Rs. 19-4 against only Rs. 16-12 in the previous week. *Shivrajpur Syndicate* closed at Rs. 49 and *Tata Oil* at Rs. 69-12. *Scindia Steam* were steady at Rs. 28-14, while *Bombay Steam* showed a rise of Rs. 12½ to close at Rs. 492-8. *Alcock Ashdown* were done at Rs. 600; *Indian Iron* at Rs. 35-15; *Steel Corporation* at Rs. 21-1. *Wimco* showed no change, closing at Rs. 226-4.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, Nov. 20.

The local market continued to be steady during the week and further advances were recorded in the Textile section. Planting issues met with a good turnover, while among Sugar shares *Travancore Sugars* had keen buyers.

Securities:—Government securities continued to be steady with 3½ per cent Paper quoting at Rs. 96. 3 per cent 1963|65 changed hands at Rs. 95-3. Among State Loans, 3½ per cent 1951|58 *Mysore Loan* were transacted at Rs. 108-5. Provincial Loans were unchanged, 3 per cent 1952 *Madras* being quoted at Rs. 99-5 and 1953 at Rs. 99-4.

Mills.—Mill shares opened higher and advanced further in sympathy with the Bombay market. *Cambodia* have further improved from Rs. 14-12 to Rs. 15-2, closing a shade easier at Rs. 14-15. *Bangalore Woollen* were done higher at Rs. 310; *Vasanta* at Rs. 202 and *Sri Ranga Vilas* at Rs. 110. *Buckingham & Carnatic* were at Rs. 320 and *Coimbatore* at Rs. 138. *Pankaja* were higher at Rs. 205-8 as against Rs. 166 in the previous week; *Mettur Industries* at Rs. 230 against Rs. 212 and *Madura* at Rs. 52 against Rs. 48. *Mysore Silk Filatures* came in for business at Rs. 10-1; *Mysore Spun Silk* at Rs. 12-10 and *Kothari Textiles* at Rs. 16-8.

Utilities.—A small volume of business was only possible in this section during the week. *Cochin State Power* were done at Rs. 9 and *Kumbakanam Electric* at Rs. 11-12. *South Madras Electric* ordinaries were unchanged at Rs. 15-2 c.d.

Plantations.—This section met with good buyers during the week and slight rise in prices of all shares was recorded. *Cochin Malabar* closed higher at Rs. 9-11; *Udayagiri* at Rs. 8-12; *Midland* at Rs. 10-6; *Be Be* at Rs. 9-5; *Tropical Plantations* at Rs. 24; *Vaikundam* at Rs. 12-4 and *Peninsular Plantations* at Rs. 5-2. Among Tea shares, *Chembra Peak* were higher at Rs. 6-3-6; *Vellamalai* at Rs. 20-4; *Devashola* at Rs. 9-10 and *United Nilgiri* at Rs. 155.

Sugars.—*Travancore Sugars* met with keen buying and the price has moved upto Rs. 17-7 as against Rs. 16 in the previous week. *Deccan Sugar* small shares were done at Rs. 62; *Ramnugger Cane* at Rs. 10-10 and *New Savan* at Rs. 14-10 c.d.

Miscellaneous.—*Mysore Paper* ruled steady at Rs. 18. *Mysore Chemicals* were dull at Rs. 18 x.d. while *Mettur Chemicals* deferreds were done at Rs. 3-11. *Indian Steel Rolling Mills* preferences were unchanged at Rs. 12-4. *Andhra Cement* ordinaries were in some demand, being done slightly higher at Rs. 96, while the preferences have risen to Rs. 132-8. *Assam Bengal Cement* were crossed at Rs. 14-1 and *Dalmia Cement* deferreds at Rs. 3-7. *Brunton Engineering*, after being done higher at Rs. 17, closed slightly lower at Rs. 16-13-6.

THE CHAMPDANY JUTE COMPANY, LIMITED.

Notice is hereby given that the thirty-seventh ordinary general meeting of the Champdany Jute Company, Limited, will be held at the Registered Office of the Company, 1, Clive Street, Calcutta, on Tuesday, 16th December, 1941, at 11-30 a.m., for the following purposes:—

(1) To receive and pass the Directors' Report and Audited Accounts for the half-year ended 30th September, 1941.

(2) To declare a dividend.

(3) To elect a Director.

(4) To transact any other competent business that may be brought forward.

The Share Register of the Company will be closed from 5th December to 16th December, 1941, both days inclusive.

By Order of the Board,
JAMES FINLAY & CO., LTD.,
Managing Agents.

1, Clive Street, Calcutta,
21st November, 1941.

LONDON STOCK EXCHANGE

Firmer conditions have been noticeable on the London Stock Exchange during the latter half of the week. The British offensive in North Africa has had an encouraging influence on the market. While giltedged securities have not been affected industrials have been marked higher, especially Oils. Among Giltedged securities, 2½ per cent. Consols were 82, 3½ per cent. Conversion 106½, 3½ per cent. War Loan 104½ and 3 per cent. War Loan 101¼. 3½ per cent India Sterling Paper were done at £99¼.

Among other sections, firmer conditions have been noticeable and a larger volume of business has been transferred. Both Tea and Rubber issues were a shade better. Among Minings, *Rio Tintos* were £7¾. Oil shares, as remarked above, have been very firm. *Anglo-Iranian* were considerably higher at 44s. *Mexican Eagle* have derived encouragement from the settlement of the oil dispute between Mexico and the United States. Home Rails are better.

NEW YORK STOCK EXCHANGE

The tension in the far Eastern situation and the wide spread strikes in industries have been responsible for the irregular tone of Wall Street during the past few days. *U. S. Steel* were $51½, *Anaconda Copper* $26½ and *General Motors* $36⅞.

THE ALKALI & CHEMICAL CORPORATION OF INDIA, LTD.

PREFERENCE SHARES

Notice is hereby given that the Share Transfer Books and Register of Members of the Company will be closed from the 1st to the 15th December, 1941, both days inclusive. This applies to Preference Shares only.

By Order,
IMPERIAL CHEMICAL INDUSTRIES (INDIA) LTD.,
Secretaries.

Calcutta,
14th November, 1941.

(*Annual meeting, 5th December, 1941 at 11 a.m. at Cawnpore*)

Audited accounts for the year ended 30th June, 1941:—

		Rs.	A.	P.
The results for the period show a profit of ..		3,73,327	6	11
from which has been deducted:—	Rs.	A.	P.	
Depreciation	1,00,000	0	0	
Debit Balance brought forward from the previous year ..	3,64,265	11	2	4,64,265 11 2
Leaving at debit of Profit and Loss Account ..				90,938 4 3

The Balrampur Factory commenced crushing on the 23rd December, 1940, and continued until the 12th April, 1941. The Tulsipur Factory commenced crushing on the 5th January, 1941 and continued until the 28th March, 1941.

The improved results, which the accounts now presented disclose, are due to a high standard of efficiency being maintained in manufacture and the treatment of canes with a higher sugar value. At the commencement of the period covered by this report, the Company was carrying alarmingly heavy stocks of sugar, a position which was shared by most of the concerns situated in the United Provinces and Bihar and these did not begin to move off in any considerable quantity until last May. Since then, however, there has been a greatly improved demand; the entire stock of 1939-40 sugar has now been disposed of 75 per cent of last season's production has now been sold. The situation as regards the Company is, therefore, much healthier than it was a year ago and with a severely regulated output for the ensuing season in the United Provinces and Bihar, it is hoped, that some substantial advance towards equilibrium as between production and domestic consumption will be attained by the opening of the 1942-43 season.

For the coming season, the United Provinces and Bihar Governments have limited the out-turn of sugar to 5,75,000 tons based on a crushing season of 80 days. The minimum rate for cane has been fixed at five annas per maund.

Stocks of sugar have been valued at under selling rates.

*Includes Bonus of 2½ per cent.

†Subject to the payment of a donation of Rs. 12,500 to the Viceroy's War Purposes Fund.

(*Annual meeting, 24th November, 1941 at 10-30 a.m. at Rampur*)

Audited accounts for the year ended 30th June, 1941:—

The Revenue for the year was Rs. 14,84,556-7-6 and after providing Rs. 7,33,258-13-5 for Excise and Rs. 93,740-13-7 for Depreciation there remains a balance of Rs. 6,57,556-12-6. The carry forward from last year was Rs. 58,820-5-5, which added to the balance for the current year, makes a total of Rs. 7,16,377-1-11 available. From this the directors have set aside the following:—

	Rs.	A.	P.
To Reserve Fund	2,00,000	0	0
To Dividend Equalisation Fund	1,50,000	0	0
To Labour Bonus Fund	20,000	0	0
To Employees' Welfare Fund	5,000	0	0
To Cultivators' Welfare Fund	5,000	0	0

leaving Rs. 3,36,377-1-11 out of which the directors recommend a dividend of 15 per cent per annum *plus* a bonus of 2½ per cent per annum which will absorb Rs. 2,62,500. This leaves a balance of Rs. 73,877-1-11 to be carried forward out of which the directors recommend a donation of Rs. 12,500 to the Viceroy's War Purposes Fund.

Crushing operations commenced on 3rd December, 1940, and terminated on 21st April, 1941, being 140 days against 128 days of last year. The amount of cane crushed was 35.9 lakhs maunds. The Factory worked very satisfactorily, the average recovery being 9.77 per cent as against 9.54 per cent in 1939-40. No cane purchases were made under the standard rates laid down by the Government of the United Provinces and Bihar. In fact, the Company paid six pies per maund of cane more to local cultivators than was paid in the United Provinces.

The sugar produced by the Company has maintained its high standard in the market.

Leaving a debit of Profit and Loss Account ..		45,882	0	11

The Factory commenced crushing on the 1st January, 1941, and continued until the 25th April, 1941. During this period, operations were suspended for 14 days owing to a labour strike.

For the coming season, the United Provinces and Bihar Governments have lmiited the out-turn of sugar to 5,75,000 tons, based on a crushing season of 80 days. The minimum rate for cane has been fixed at five annas per maund.

THE DALHOUSIE JUTE COMPANY, LIMITED

Notice is hereby given that an Extra-ordinary General Meeting of the above-named Company will be held at the Registered Office of the Company, Chartered Bank Buildings, Calcutta, on Saturday, the 29th day of December, 1941, at 11-15 o'clock in the forenoon for the purpose of considering and, if thought fit, of passing, with or without modification, the following resolutions:—

As an Ordinary Resolution

1. That the authorised capital of the Company be increased to Rs. 37,50,000 by the creation of 7,500 additional Ordinary shares of Rs. 100 each which additional shares shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but shall otherwise rank for dividend and in all other respects *pari pasu* with the existing Ordinary shares of the Company.

As a Special Resolution

2. That the Articles of Association of the Company be altered by deleting Article 150 thereof and by substituting the following new Articles—

Dividend in specie

150. Any General Meeting declaring a dividend may resolve that such dividend be paid wholly or in part by the distribution of specific assets, and in particular of paid-up shares, debentures or debenture-stock of the Company, or paid-up shares, debentures or debenture-stock of any other company, or in any one or more of such ways.

Capitalisation of Reserves

150A. Any General Meeting may resolve that any moneys, investments or other assets forming part of the undivided profits of the Company standing to the credit of the Reserve or any other Fund or in the hands of the Company and available for dividend (or representing premiums received on the issue of shares and standing to the credit of the share premium account) be capitalised and distributed amongst such of the shareholders as would be entitled to receive the same if distributed by way of dividend and in the same proportions on the footing that they become entitled thereto as capital and that all or any part of such capitalised fund be applied on behalf of such shareholders in paying up in full any unissued shares, debentures or debenture-stock of the Company which shall be distributed accordingly or in or towards payment of the uncalled liability on any issued shares, and that such distribution or payment shall be accepted by such shareholders in full satisfaction of their interest in the said capitalised sum.

Fractional Certificates

150B. For the purpose of giving effect to any resolution under the two last preceding Articles the Directors may settle any difficulty which may arise in regard to the distribution as they think expedient and in particular may issue fractional certificates, and may fix the value for distribution of any specific assets, and may determine that cash payments shall be made to any members upon the footing of the value so fixed in order to adjust the rights of all parties and may vest any such cash or specific assets in trustees upon such trusts for the persons entitled to the dividend or capitalised fund as may seem expedient to the Directors. Where requisite a proper contract shall be filed in accordance with Section 104 of the Act, and the Directors may appoint any person to sign such contract on behalf of the persons entitled to the dividend or capitalised fund, and such appointment shall be effective.

As an Ordinary Resolution

3. That it is desirable to capitalise a sum of Rs. 7,50,000 being part of the undivided profits of the Company and accordingly that the said sum of Rs. 7,50,000 be capitalised and that this amount be used as a capital bonus which shall be applied on behalf of the persons who are on the 20th day of December, 1941, holders of the 15,000 issued Ordinary shares of the Company of Rs. 100 each in payment in full for 7,500 additional Ordinary shares of Rs. 100 each and that such 7,500 additional Ordinary shares credited as fully paid, which shall not confer the right to share in any dividend declared in respect of the half-year of the Company, ending on the 30th day of September, 1941, but otherwise shall rank for dividend and in all other respects *pari passu* with the issued Ordinary shares of the Company, shall be accordingly allotted to such persons respectively in the proportion of one of such 7,500 additional Ordinary shares for two of the said 15,000 issued Ordinary shares held on the said 20th day of December, 1941, by such persons respectively, and that the additional Ordinary shares so distributed shall be treated for all purposes as an increase of the nominal amount of the capital of the Company held by each shareholder and not as income.

That pursuant to the above resolution and in satisfaction of the said special capital bonus the Directors be and they are hereby directed to allot and distribute 7,500 additional Ordinary shares credited as fully paid amongst the persons who are on the 20th day of December, 1941, holders of the issued Ordinary shares of the Company in proportion to the issued Ordinary shares held by them respectively with full power to the Directors to make such provision by the issue of fractional certificates or otherwise as they think expedient in the case of fractions.

That the draft of the Agreement providing for the allotment of the said additional shares in satisfaction of the said capital bonus submitted to this Meeting and signed in the margin by the Chairman thereof by way of identification be and the same is hereby approved and that the Directors be authorised to affix the Seal of the Company to duplicate engrossments of such Agreement as and when the same shall have been signed on behalf of the members holding Ordinary shares in the Company on the 20th day of December, 1941, by some person to be appointed by the Directors in that behalf under Article 150B of the Articles of Association of the Company.

As above indicated Resolution No. 2 will be proposed as a Special Resolution.

By Order of the Board,
BIRD & CO.,
Managing Agents.

Dated Calcutta,
8th day of November, 1941.

THE KINNISON JUTE MILLS COMPANY, LIMITED

Notice is hereby given that an Extra-ordinary General Meeting of the above-named Company will be held at the Registered Office of the Company, Chartered Bank Buildings, Calcutta, on Saturday, the 20th day of December, 1941, at 11-0 o'clock in the forenoon for the purpose of considering and, if thought fit, of passing, with or without modification the following resolutions:—

As an Ordinary Resolution

1. That the authorised capital of the Company be increased to Rs. 45,00,000 by the creation of 15,000 additional Ordinary shares of Rs. 100 each which additional shares shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but shall otherwise rank for dividend and in all other respects *pari passu* with the existing Ordinary shares of the Company.

As a Special Resolution

2. That the Articles of Association of the Company be altered by adding the words "or any other" between the words "Reserve" and "Fund" in the third line of Article 166.

As an Ordinary Resolution

3. That it is desirable to capitalise a sum of Rs. 15,00,000 being part of the undivided profits of the Company and accordingly that the said sum of Rs. 15,00,000 be capitalised and that this amount be used as a capital bonus which shall be applied on behalf of the persons who are on the 20th day of December, 1941, holders of the 15,000 issued Ordinary shares of the Company of Rs. 100 each in payment in full for 15,000 additional Ordinary shares of Rs. 100 each and that such 15,000 additional Ordinary shares credited as fully paid, which shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but otherwise shall rank for dividend and in all other respects *pari passu* with the issued Ordinary shares of the Company, shall be accordingly allotted to such persons respectively in the proportion of one of such additional Ordinary shares for each one of the said 15,000 issued Ordinary shares held on the said 20th day of December, 1941, by such persons respectively, and that the additional Ordinary shares so distributed shall be treated for all purposes as an increase of the nominal amount of the capital of the Company held by each shareholder and not as income.

That pursuant to the above resolution and in satisfaction of the said special capital bonus the Directors be and they are hereby directed to allot and distribute 15,000 additional Ordinary shares credited as fully paid amongst the persons who are on the 20th day of December, 1941, holders of the 15,000 issued Ordinary shares of the Company in proportion to the issued Ordinary shares held by them respectively.

That the draft of the Agreement providnig for the allotment of the said additional shares in satisfaction of the said capital bonus submitted to this Meeting and signed in the margin by the Chairman thereof by way of identification be and the same is hereby approved and that the Direcors be authorised to affix the Seal of the Company to duplicate engrossments of such Agreement as and when the same shall have been signed on behalf of the members holding Ordinary shares in the Company on the 20th day of December, 1941, by some person to be appointed by the Directors in that behalf under Article 167 of the Articles of Association of the Company.

As above indicated Resolution No. 2 will be proposed as a Special Resolution.

By Order of the Board,
F. W. HEILGERS & CO.,
Managing Agents.

Calcutta, 8th day of November, 1941.

THE LAWRENCE JUTE COMPANY, LIMITED

Notice is hereby given that an Extra-ordinary General Meeting of the above-named Company will be held at the Registered Office of the Company, Chartered Bank Buildings, Calcutta, on Saturday, the 20th day of December, 1941, at 12-0 o'clock noon for the purpose of considering and, if thought fit, of passing, with or without modification, the following resolutions:—

As an Ordinary Resolution

1. That the authorised capital of the Company be increased to Rs. 35,00,000 by the creation of 10,000 additional Ordinary shares of Rs. 100 each which additional Ordinary shares shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but shall otherwise rank for dividend and in all other respects *pari passu* with the existing Ordinary shares of the Company.

As a Special Resolution

2. That the Articles of Association of the Company be altered by deleting Article 150 thereof and by substituting the following new Articles:—

Dividend in specie

150. Any General Meeting declaring a dividend may resolve that such dividend be paid wholly or in part by the distribution of specific assets, and in particular of paid-up shares, debentures or debenture-stock of the Company or paid-up shares, debentures or debenture-stock of any other company, or in any one or more of such ways.

Capitalisation of Reserves

150A. Any General Meeting may resolve that any moneys, investments or other assets forming part of the undivided profits of the Company standing to the credit of the Reserve or any other Fund or in the hands of the Company and available for dividend (or representing premiums received on the issue of shares and standing to the credit of the share premium account) be capitalised and distributed amongst such of the shareholders as would be entitled to receive the same if distributed by way of dividend and in the same proportions on the footing that they become entitled thereto as capital and that all or any part of such capitalised fund be applied on behalf of such shareholders in paying up in full any unissued shares, debentures or debenture-stock of the Company which shall be distributed accordingly or in or towards payment of the uncalled liability on any issued shares, and that such distribution or payment shall be accepted by such shareholders in full satisfaction of their interest in the said capitalised sum.

Fractional Certificates

150B. For the purpose of giving effect to any resolution under the two last preceding Articles the Directors may settle any difficulty which may arise in regard to the distribution as they think expedient and in particular may issue fractional certificates, and may fix the value for distribution of any specific assets, and may determine that cash payments shall be made to any members upon the footing of the

value so fixed in order to adjust the rights of all parties and may vest any such cash or specific assets in trustees upon such trusts for the persons entitled to the dividend or capitalised fund as may seem expedient to the Directors. Where requisite a proper contract shall be filed in accordance with Section 104 of the Act, and the Directors may appoint any person to sign such contract on behalf of the persons entitled to the dividend or capitalised fund, and such appointmet shall be effective.

As an Ordinary Resolution

3. That it is desirable to capitalise a sum of Rs. 10,00,000 being part of the undivided profits of the Company and accordingly that the said sum of Rs. 10,00,000 be capitalised and that this amount be used as a capital bonus which shall be applied on behalf of the persons who are on the 20th day of December, 1941, holders of the 10,000 issued Ordinary shares of the Company of Rs. 100 each in payment in full for 10,000 additional Ordinary shares of Rs. 100 each and that such 10,000 additional Ordinary shares credited as fully paid, which shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but otherwise shall rank for dividend and in all other respects *pari passu* with the issued Ordinary shares of the Company, shall be accordingly allotted to such persons respectively in the proportion of one of such 10,000 additional Ordinary shares for one of the said 10,000 issued Ordinary shares held on the said 20th day of December, 1941, by such persons respectively, and that the additional Ordinary shares so distributed shall be treated for all purposes as an increase of the nominal amount of the capital of the Company held by each shareholder and not as income.

That pursuant to the above resolution and in satisfaction of the said special capital bonus the Directors be and they are hereby directed to allot and distribute 10,000 additional Ordinary shares credited as fully paid amongst the persons who are on the 20th day of December, 1941, holders of the issued Ordinary shares of the Company in proportion to the issued Ordinary shares held by them respectively.

That the draft of the Agreement providing for the allotment of the said additional shares in satisfaction of the said capital bonus submitted to this Meeting and signed in the margin by the Chairman thereof by way of identification be and the same is hereby approved and that the Directors be authorised to affix the Seal of the Company to duplicate engrossments of such Agreement as and when the same shall have been signed on behalf of the members holding Ordinary shares in the Company on the 20th day of December, 1941, by some person to be appointed by the Directors in that behalf under Article 150B of the Articles of Association of the Company.

As above indicated Resolution No. 2 will be proposed as a Special Resolution.

By Order of the Board,
BIRD & CO.,
Managing Agents.

The Share Transfer Registers of the Company will be closed from 1st December to 20th December, 1941, both days included.

By order of the Directors,
BIRD & CO.,
Managing Agents.

Chartered Bank Buildings,
Calcutta, 8th November, 1941.

THE NORTHBROOK JUTE COMPANY, LIMITED

Notice is hereby given that an Extra-ordinary General Meeting of the above-named Company will be held at the Registered Office of the Company, Chartered Bank Buildings, Calcutta, on Saturday, the 20th day of December, 1941, at 11-45 o'clock in the forenoon for the purpose of considering and, if thought fit, of passing, with or without modification, the following resolutions:—

As an Ordinary Resolution

1. That the authorised capital of the Company be increased to Rs. 27,00,000 by the creation of 40,000 additional Ordinary shares of Rs. 10 each which additional shares shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but shall otherwise rank for dividend and in all other respects *pari passu* with the existing Ordinary shares of the Company.

As a Special Resolution

2. That the Articles of Association of the Company be altered by deleting Article 150 thereof and by substituting the following new Articles:—

Dividend in specie

150. Any General Meeting declaring a dividend may resolve that such dividend be paid wholly or in part by the distribution of specific assets, and in particular of paid-up shares, debentures or debenture-stock of the Company, or paid-up shares, debentures or debenture-stock of any other company, or in any one or more of such ways.

Capitalisation of Reserves

150A. Any General Meeting may resolve that any moneys, investments or other assets forming part of the undivided profits of the Company standing to the credit of the Reserve or any other Fund or in the hands of the Company and available for dividend (or representing premiums received on the issue of shares and standing to the credit of the share premium account) be capitalised and distributed amongst such of the shareholders as would be entitled to receive the same if distributed by way of dividend and in the same proportions on the footing that they become entitled thereto as capital and that all or any part of such capitalised fund be applied on behalf of such shareholders in paying up in full any unissued shares, debentures or debenture-stock of the Company which shall be distributed accordingly or in or towards payment of the uncalled liability on any issued shares, and that such distribution or payment shall be accepted by such shareholders in full satisfaction of their interest in the said capitalised sum.

Fractional Certificates

150B. For the purpose of giving effect to any resolution under the two last preceding Articles the Directors may settle any difficulty which may arise in regard regard to the distribution as they think expedient and in particular may issue fractional certificates, and may fix the value for distribution of any specific assets, and may determine that cash payments shall be made to any members upon the footing of the value so fixed in order to adjust the rights of all parties and may vest any such cash or specific assets, in trustees upon such trusts for the sons entitled to the dividend or capitalised fund as may seem expedient to the Directors. Where requisite a proper contract shall be filed in accordance with Section 104 of the Act, and the Directors may appoint any person to sign such contract on behalf of the persons entitled to the dividend or capitalised fund, and such appointment shall be effective.

As an Ordinary Resolution

3. That it is desirable to capitalise a sum of Rs. 4,00,000 being part of the undivided profits of the Company and accordingly that the said sum of Rs. 4,00,000 be capitalised and that this amount be used as a capital bonus which shall be applied on behalf of the persons who are on the 20th day of December, 1941, holders of the 80,000 issued Ordinary shares of the Company of Rs. 10 each in payment in full for 40,000 additional Ordinary shares of Rs. 10 each and that such 40,000 additional Ordinary shares credited as fully paid, which shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but otherwise shall rank for dividend and in all other respects *pari passu* with the issued Ordinary shares of the Company, shall be accordingly allotted to such persons respectively in the proportion of one of such 40,000 additional Ordinary shares for two of the said 80,000 issued Ordinary shares held on the said 20th day of December, 1941, by such persons respectively, and that the additional Ordinary shares so distributed shall be treated for all purposes as an increase of the nominal amount of the capital of the Company held by each shareholder and not as income.

That pursuant to the above resolution and in satisfaction of the said special capital bonus the Directors be and they are hereby directed to allot and distribute 40,000 additional Ordinary shares credited as fully paid amongst the persons who are on the 20th day of December, 1941, holders of the issued Ordinary shares of the Company in proportion to the issued Ordinary shares held by them respectively with full power to the Directors to make such provision by the issue of fractional certificates or otherwise as they think expedient in the case of fractions.

That the draft of the Agreement providing for the allotment of the said additional shares in satisfaction of the said capital bonus submitted to this Meeting and signed in the margin by the Chairman thereof by way of identification be and the same is hereby approved and that the Directors be authorised to affix the Seal of the Company to duplicate engrossments of such Agreement as and when the same shall have been signed on behalf of the members holding Ordinary shares in the Company on the 20th day of December, 1941, by some person to be appointed by the Directors in that behalf under Article 150B of the Articles of Association of the Company.

As above indicated Resolution No. 2 will be proposed as a Special Resolution.

By Order of the Board,
BIRD & CO.,
Managing Agents.

Dated Calcutta,
8th day of November, 1941.

THE STANDARD JUTE COMPANY, LIMITED

Notice is hereby given that the Ninety-second Ordinary General Meeting of The Standard Jute Company, Limited, will be held at the Registered Office of the Company, Chartered Bank Buildings, Calcutta, at 12-10 p.m., on Saturday, the 20th day of December, 1941, for the purpose of receiving the Directors' Report, passing the Audited Accounts for the half-year ended 30th September, 1941, declaring the Dividends recommended by the Directors and for transacting any other ordinary business of the Company.

The Share Transfer Registers of the Company will be closed from 1st December to 20th December, 1941, both days included.

By order of the Directors,
BIRD & CO.,
Managing Agents.

Chartered Bank Buildings,
Calcutta, 8th November, 1941.

THE STANDARD JUTE COMPANY, LIMITED

Notice is hereby given that an Extra-ordinary General Meeting of the above-named Company will be held at the Registered Office of the Company, Chartered Bank Buildings, Calcutta, on Saturday, the 20th day of December, 1941, at 12-15 o'clock in the afternoon for the purpose of considering and, if thought fit, of passing, with or without modification, the following resolutions:—

As an Ordinary Resolution

1. That the authorised capital of the Company be increased to Rs. 30,00,000 by the creation of 7,000 additional Ordinary shares of Rs. 100 each which additional shares shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but shall otherwise rank for dividend and in all other respects *pari passu* with the existing Ordinary shares of the Company.

As a Special Resolution

2. That the Articles of Association of the Company be altered by deleting Article 150 thereof and by substituting the following new Articles:—

Dividend in specie

150. Any General Meeting declaring a dividend may resolve that such dividend be paid wholly or in part by the distribution of specific assets, and in particular of paid-up shares, debentures or debenture-stock of the Company, or paid-up shares, debentures or debenture-stock of any other company, or in any one or more of such ways.

Capitalisation of Reserves

150A. Any General Meeting may resolve that any moneys, investments or other assets forming part of the undivided profits of the Company standing to the credit of the Reserve or any other Fund or in the hands of the Company and available for dividend (or representing premiums received on the issue of shares and standing to the credit of the share premium account) be capitalised and distributed amongst such of the shareholders as would be entitled to receive the same if distributed by way of dividend and in the same proportions on the footing that they become entitled thereto as capital and that all or any part of such capitalised fund be applied on behalf of such shareholders in paying up in full any unissued shares, debentures or debenture-stock of the Company which shall be distributed accordingly or in or towards payment of the uncalled liability on any issued shares, and that such distribution or payment shall be accepted by such shareholders in full satisfaction of their interest in the said capitalised sum.

Fractional Certificates

150B. For the purpose of giving effect to any resolution under the two last preceding Articles the Directors may settle any difficulty which may arise in regard to the distribution as they think expedient and in particular may issue fractional certificates, and may fix the value for distribution of any specific assets, and may determine that cash payments shall be

made to any members upon the footing of the value so fixed in order to adjust the rights of all parties and may vest any such cash or specific assets in trustees upon such trusts for the sons entitled to the dividend or capitalised fund as may seem expedient to the Directors. Where requisite a proper contract shall be filed in accordance with Section 104 of the Act, and the directors may appoint any person to sign such contract on behalf of the persons entitled to the dividend or capitalised fund, and such appointment shall be effective.

As an Ordinary Resolution

3. That it is desirable to capitalise a sum of Rs. 7,00,000 being part of the undivided profits of the Company and accordingly that the said sum of Rs. 7,00,000 be capitalised and that this amount be used as a capital bonus which shall be applied on behalf of the persons who are on the 20th day of December, 1941, holders of the 14,000 issued Ordinary shares of the Company of Rs. 100 each in payment in full for 7,000 additional Ordinary shares of Rs. 100 each and that such 7,000 additional Ordinary shares credited as fully paid, which shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but otherwise shall rank for dividend and in all other respects *pari passu* with the issued Ordinary shares of the Company, shall be accordingly allotted to such persons respectively in the proportion of one of such 7,000 additional Ordinary shares for two of the said, 14,000 issued Ordinary shares held on the said 20th day of December, 1941, by such persons respectively, and that the additional Ordinary shares so distributed shall be treated for all purposes as an increase of the nominal amount of the capital of the Company held by each shareholder and not as income.

That pursuant to the above resolution and in satisfaction of the said special capital bonus the Directors be and they are hereby directed to allot and distribute 7,000 additional Ordinary shares credited as fully paid amongst the persons who are on the 20th day of December, 1941, holders of the issued Ordinary shares of the Company in proportion to the issued Ordinary shares held by them respectively with full power to the Directors to make such provision by the issue of fractional certificates or otherwise as they think expedient in the case of fractions.

That the draft of the Agreement providing for the allotment of the said additional shares in satisfaction of the said capital bonus submitted to this Meeting and signed in the margin by the Chairman thereof by way of identification be and the same is hereby approved and that the Directors be authorised to affix the Seal of the Company to duplicate engrossments of such Agreement as and when the same shall have been signed on behalf of the members holding Ordinary shares in the Company on the 20th day of December, 1941, by some person to be appointed by the Directors in that behalf under Article 150B of the Articles of Association of the Company.

As above indicated Resolution No. 2 will be proposed as a Special Resolution.

By Order of the Board,
BIRD & CO.,
Managing Agents.

Dated Calcutta,
8th day of November, 1941.

UNION JUTE COMPANY, LIMITED

Notice is hereby given that an Extraordinary General Meeting of the abovenamed Company will be held at the Registered Office of the Company, Chartered Bank Buildings, Calcutta, on Saturday, the 20th day of December, 1941, at 12-30 o'clock in the afternoon for the purpose of considering and if thought fit, of passing, with or without modification, the following resolutions:—

As an Ordinary Resolution

1. That the authorised capital of the Company be increased to Rs. 24,00,000 by the creation of 6,000 additional Ordinary shares of Rs. 100 each which additional shares shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but shall otherwise rank for dividend and in all other respects *pari passu* with the existing Ordinary shares of the Company.

As a Special Resolution

2. That the Articles of Association of the Company be altered by deleting Article 150 thereof and by substituting the following new Articles:—

Dividend in specie

150. Any General Meeting declaring a dividend may resolve that such dividend be paid wholly or in part by the distribution of specific assets, and in particular of paid-up shares, debentures or debenture-stock of the Company, or paid-up shares, debentures or debenture-stock of any other company, or in any one or more of such ways.

Capitalisation of Reserves

150A. Any General Meeting may resolve that any moneys, investments or other assets forming part of the undivided profits of the Company standing to the credit of the Reserve or any other Fund or in the hands of the Company and available for dividend (or representing premiums received on the issue of shares and standing to the credit of the share premium account) be capitalised and distributed amongst such of the shareholders as would be entitled to receive the same if distributed by way of dividend and in the same proportions on the footing that they become entitled thereto as capital and that all or any part of such capitalised fund be applied on behalf of such shareholders in paying up in full any unissued shares, debentures or debenture-stock of the Company which shall be distributed accordingly or in or towards payment of the uncalled liability on any issued shares, and that such distribution or payment shall be accepted by such shareholders in full satisfaction of their interest in the said capitalised sum.

Fractional Certificates

150B. For the purpose of giving effect to any resolution under the two last preceding Articles the Directors may settle any difficulty which may arise in regard to the distribution as they think expedient and in particular may issue fractional certificates, and may fix the value for distribution of any specific assets, and may determine that cash payments shall be made to any members upon the footing of the value so fixed in order to adjust the rights of all parties and may vest any such cash or specific assets in trustees upon such trusts for the persons entitled to the dividend or capitalised fund as may seem expedient to the Directors. Where requisite a proper contract shall be filed in accordance with Section 104 of the Act, and the Directors may appoint any person to sign such contract on behalf of the persons entitled to the dividend or capitalised fund, and such appointment shall be effective.

As an Ordinary Resolution

3. That it is desirable to capitalise a sum of Rs. 6,00,000 being part of the undivided profits of the Company and accordingly that the said sum of Rs. 6,00,000 be capitalised and that this amount be used as a capital bonus which shall be applied on behalf of the persons who are on the 20th day of December, 1941, holders of the 12,000 issued Ordinary shares of the Company of Rs. 100 each in payment in full for 6,000 additional Ordinary shares of Rs. 10 each and that such 6,000 additional Ordinary shares credited as fully paid, which shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but otherwise shall rank for dividend and in all other respects *pari passu* with the issued Ordinary shares of the Company, shall be accordingly allotted to such persons respectively in the proportion of one of such 6,000 additional Ordinary shares for two of the said 12,000 issued Ordinary shares held on the said 20th day of December, 1941, by such persons respectively, and that the additional Ordinary shares so distributed shall be treated for all purposes as an increase of the nominal amount of the capital of the Company held by each shareholder and not as income.

That pursuant to the above resolution and in satisfaction of the said special capital bonus the Directors and they are hereby directed to allot and distribute 6,000 additional Ordinary shares credited as fully paid amongst the persons who are on the 20th day of December, 1941, holders of the issued Ordinary shares of the Company in proportion to the issued Ordinary shares held by them respectively with full power to the Directors to make such provision by the issue of fractional certificates or otherwise as they think expedient in the case of fractions.

That the draft of the Agreement providing for the allotment of the said additional shares in satisfaction of the said capital bonus submitted to this Meeting and signed in the margin by the Chairman thereof by way of identification be and the same is hereby approved and that the Directors be authorised to affix the Seal of the Company to duplicate engrossments of such Agreement as and when the same shall have been signed on behalf of the members holding Ordinary shares in the Company on the 20th day of December, 1941, by some person to be appointed by the Directors in that behalf under Article 150B of the Articles of Association of the Company.

As above indicated Resolution No. 2 will be proposed as a Special Resolution.

By Order of the Board,
BIRD & CO.,
Managing Agents.

Dated Calcutta,
8th day of November, 1941.

(*Annual meeting 5th December, 1941 at 10 a.m. at Cawnpore*)

Audited accounts for the year ended 30th June, 1941:—

The results for the period, after providing for income-tax, show a profit of Rs. 2,37,982-12-3. From this is deducted Depreciation Rs. 35,000 and debit balance brought from previous year Rs. 12,796-1-4, leaving a balance of Rs. 1,90,186-10-11 to be carried forward.

The Factory commenced crushing on the 16th December, 1940 and continued until the 25th April, 1941.

It is regretted that no distribution to shareholders is possible on this occasion. The Company's liability to Excess Profits Tax, after deducting Income-tax and Super-tax thereon, may reach a sum of Rs. 1,20,000. This is till undetermined as no assessment has been made and no reservation has, therefore, been provided on this account. Moreover, allocations to the Debenture Sinking Fund are now in arrears by rupees one lakh.

Managing Agents.—Messrs. Begg, Sutherland & Co., Ld.

Authorised Capital—Rs. 25,00,000 in 2,50,000 shares Rs. 10 each. Issued and Subscribed—Rs. 11,99,000 in 1,19,900 shares, fully paid-up.

Insure and Increase Nation's Strength

Financial Independence of the individual is the measure of Nation's financial strength.

In this hour of world turmoil, all Life Insurance Policy-holders should take stock of their insurance cover and ascertain just how strongly they are fortified against the unpredictable that lies ahead.

And, those individuals who have not yet made provision for their protection need do so without delay and thereby contribute towards Nation's strength.

WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

The closing week of November has felt in the air the nip and bite of the cold weather, but records not the slightest trace or promise of cold weather finance. Short credits continue to be in super-abundant supply, with inter-bank call money being purely nominal. In relation to the conditions prevailing in the money market and also in relation to the high level of cash balances maintained by scheduled banks with the Reserve Bank, the increase recorded this week in the average rate of accepted tender treasury bills from annas 13 to annas 13 and pies 10 per cent per annum is difficult to explain. The real explanation is that the treasury bill market in India has been allowed to remain a narrow and restricted market. For the past few years, it has been the policy of exchange banks to refrain, as far as possible, from drawing on London. That is to say, the investments, advances, and cash balances of exchange banks have been entirely based upon the deposits which they secure in India. In the earlier years, however, a good part of short-term investments in India and trade advances in India was being financed by loans taken from the head offices. With the changing of the old order, exchange banks have taken definitely a back seat both in the treasury bill market and in the short loan market. It has thus happened that exchange banks are oftener borrowers in the short loan market than lenders. By the same token, all the exchange banks put together make far less contribution towards treasury bills than does the Imperial Bank on the one hand or the Indian joint stock banks on the other. It may be said, in broad terms, that anything like 35 to 40 per cent of the floating debt in the hands of the public is held in the portfolio of the Imperial Bank. An equal proportion is contributed by the Indian banks. The holdings of exchange banks in treasury bills must be less than a fourth of the total. The keenness of bidding at treasury bill auctions is thus largely dependent upon the Imperial Bank and the Indian banks. The outside public as such are hardly interested in treasury bills.

Considering that applications on Tuesday for tender treasury bills were only Rs. 75 lakhs in excess of the Rs. 2 crores on offer; considering that sales of tap bills in the earlier days produced only Rs. 47 lakhs; and considering, above all, the extremely comfortable ways and means position of the Government, the weekly offer of tender bills has been reduced from Rs. 2 crores to Rs. 1 crore. Sales of intermediate bills, however, are to be continued. With the tap rate at Rs. 99-12-9 being more favourable to banks, it is not unlikely that sales of intermediate treasury bills during the current week will make better showing than in the last week. It has to be added, however, that there is a counter-attraction on December 1, when tenders are to be received for Rs. 1 crore of Bengal treasury bills. It means that, next week, so far as tender bills are concerned, the reduction in the weekly offer of Central Government bills from Rs. 2 crores to Rs. 1 crore is offset by the Bengal Government entering the market as short-term borrowers.

The return of the Reserve Bank in the issue department for the week ended November 21 does not disclose any material changes. Sterling securities and rupee securities are unaltered at Rs. 176.65 crores and Rs. 56.48 crores respectively. Rupee coin records a small drop of Rs. ½ crore to Rs. 37.09 crores. On the liabilities side, active note circulation in India touches another high record at Rs. 285.40 crores as compared with Rs. 282.90 crores on November 14. This increase in active note circulation in India has not, however, been accompanied by any worth-while rise in the total note issue. This has been possible by allowing notes held in the banking department to decline from Rs. 12.20 crores to Rs. 9.52 crores. The Reserve Bank return for the banking department shows only minor changes. Which means that the week has been free from any major financial operations on the part of the Government. Central Treasury's deposits have declined from Rs. 8.82 crores to Rs. 8.40 crores while Burma Government's deposits have risen from Rs. 2.55 crores to Rs. 2.72 crores and other Government accounts from Rs. 4.30 crores to Rs. 5.14 crores. Deposits of member banks show a small increase and stand at Rs. 46.87 crores. There is a rather sharp decline in miscellaneous deposits from Rs. 4.94 crores to Rs. 3.28 crores. On the assets side, as already pointed out, notes show a substantial decline. Foreign balances have increased from Rs. 58.45 crores to Rs. 59.68 crores. This addition to foreign balances must, presumably, be connected with purchases of sterling from the open market. Ways and means advances made to Governments, which stood at Rs. 36 lakhs on November 14 have been entirely liquidated.

It is extremely satisfactory that, despite the cut of Rs. 8 crores during November in the Central Government's cash balances on account of the withdrawal of rupee securities from the Issue Department of the Reserve Bank, the cash balance of the Central Treasury stands as high as Rs. 8.40 crores in the fourth week of the month. The next bank return or the one after it will, no doubt, record substantial receipts of sterling from the British Government. If the payment on this occasion is as much as has been the case in the last two months, Central Government's deposits with the Reserve Bank may well exceed Rs. 25 crores. This should enable the Government to withdraw more rupee securities from the issue department and bring the level of rupee securities held as currency reserve to below Rs. 50 crores. At the same time, foreign balances in the banking department may touch the Rs. 75 crore mark. Reduction from this level is sure to take place through transfer of sterling securities from the banking to the issue department. Judging from the present cash balance of the Central Government, it seems probable that the ways and means position during the closing days of November will be tackled

TREASURY BILLS

India

Tenders for Rs. 2,00,00,000 of three month' Government of India Treasury Bills were opened on Tuesday, November 25, 1941. Total amount offered was Rs. 2,74,50,000. Tenders at Rs. 99-12-9 per cent and above were accepted in full and those at Rs. 99-12-6 per cent were allotted approximately 73 per cent. Lower tenders were rejected. Total amount accepted was Rs. 2 crores, the average rate of accepted tenders being -|13|10 per cent per annum.

Tenders for Rs. 1,00,00,000 (Rupees one crore) of three months' Government of India Treasury Bills will be received on Tuesday, December 2, 1941. Successful tenderers should make payment on Friday, December 5, 1941. Others conditions are as usual.

Three months' Intermediates will be sold from November 26, 1941 to December 1, 1941 at Rs. 99-12-9 per cent subject to the conditions previously announced (viz. sales can be stopped at any time without previous notice if Government think it necessary).

Three months' Intermediates sold from November 19, 1941 to November 24, 1941 amounted to Rs. 47,00,000 (Rupees 47 lakhs).

During the week ended November 21, 1941. Government of India Treasury Bills for Rs. 3,52,00,000 were sold in favour of the Issue Department of the Reserve Bank of India.

Bengal

Tenders for Rs. 1,00,000|- of three months' Government of Bengal Treasury Bills will be received at the offices of the Reserve Bank of India at Calcutta and Bombay up to 1 P.M. (Standard time) on Monday the 1st December, 1941.

Successful tenderers will be required to make payment and take up their bills on Wednesday the 3rd December 1941.

Finance Abroad

Thursday Morning.

No surprise will be occasioned by the absence of any changes so far in exchange rates. The New York quotation at 4.03¾ for sterling still stands above the London rate indicating complete stability in contrast to the conditions prevailing last year when free sterling became a source of anxiety. The importance of such stability cannot be gainsaid in spite of the fact that U. S. supplies to Britain are altogether independent of normal commercial transactions. There is, however, a significant admission that the easy conditions of November have been broken. The recovery to over 1 per cent in the Treasury Bill rate, like the fall in the total volume of applications (reflected duly in a higher market quota) for tender bills is a mark of more active conditions in the money market with banks turning also buyers of bills on offer.

That is only to be expected when year-end considerations may find banks purchasers of early maturing bills and uninterested in longer paper. The cable last week bore witness to the restoration of what may be termed pristine, normal conditions in London in that something like seasonal stringency developed. The discount rates may be unchanged, but one pointer to less slack conditions is furnished by the reduction in the volume of Treasury deposits asked for this week. This has been cut drastically to £15 millions which would leave Banks with more money for the acceptance of commercial bills or to take up Treasury bills at the next tender.

The temporary stringency has not by any means influenced movements in the giltedged market. British funds have displayed accustomed strength over a week and a striking feature has been that Conversion Twos have recovered the usual interest payment and are quoting at 99 15|16 ex. One might naturally expect from the further advance in Home Industrials that giltedged would show some signs of yielding but nothing has appeared so far to show that the Funds ever droop. The sagging of foreign bonds may lead even to a diversion of support.

Not much is known about the progress of 2½ per cent 1951-54 bonds at present. Institutional support must be large at all times, and there should be nothing of the flatness that characterises the Government securities market in India. There has been no further excitement in the bullion market but all things considered, gold and silver are high. When due regard is had to the fact that sterling is showing exceptional steadiness, with rates for all European and American currencies unchanged over a long period, one must ascribe the present exceptional premium for sovereigns to an undercurrent of nervousness, conditioned probably by the imminence of Far Eastern developments. Speculative activity is said to have subsided last week, but many in India still continue to think of gold as the best hedge against the depreciation of other investments. The relative freedom enjoyed by the bullion market is more than ever mirrored in fluctuations indicative of excited speculative dealings. Whether there is at all justification, when there is an air of normality in most walks of commercial life, may well be asked. There is, however, a legitimate presumption that usual action by the Reserve Bank will restrain the silver market. There is also the fact that the U. S. agreement with Mexico for purchase of newly mined silver as before 1938 is not exactly favourable for U. S. mines which have not got the support of the Act of 1934 at present.

The agreement signed by Senor Suarez this month is said to have settled the oil-fields controversy and made arrangements for the financing of a new highway. The dissatisfaction of Mr. Farrish of Standard of New Jersey indicates that the compensations terms for expropriated oil companies must be vague and inadequate. This protest is a reminder of the fact that the Administration cannot count on the approval of individual companies. Meanwhile, there has appeared a report to the effect that Mexico wants to reorganise oil production and increase it by the beginning of 1942. The recent U. S. loan is meant to increase Mexico's production and improve communications. If the companies are not jubilant, it may be that Mexico has had the best of the bargain. Mexican Eagles, in a rising oil market appear heavy. That too is suggestive of rather unsatisfactory terms. The Dutch representative in Washington can probably do little, for it must be remembered that the Eagle Company is registred in Amsterdam, proclaiming incidentally its affiliation to Royal Dutch. There is as yet no sign of the peso gaining in value.

High interest naturally attaches to the increase in the Bank of England's holding of bullion. The drop in securities like the drop in note and coin implies that money has flown out of the Bank. Bankers' deposits still stand at a high figure to judge by the Return issued on November 20. The drop in the Proportion is to be expected when the note circulation keeps rising and there is also a likelihood of further expansion before the Christmas and New Year holidays though both days may be removed from the list of Bank holidays.

There are as yet few open signs of Japan's greatest crisis. That, one thought, referred to the great earthquakes of 1923, but General Tojo has something else in his mind. Mr. Kurusu's mission has hardly succeeded and reinforcements to troops in Indo-China have produced the impression that the Japanese are again stalking an imaginary foe.

If the Shanghai dollar is maintained at last levels, there is little doubt that the yen has depreciated. In fact, after the freezing order came into force there was a fall in New York. General Tojo's calculation that Japan has lost 400 million yen whereas the Powers opposed to her have lost 1,800 million yen does not imply that Japan's currency has gained. Without any market for her newly-mined gold, with debts and taxation alike rising continuously, there is little doubt that she is exposed to severe strains. A dose of appeasement, such as Mr. Kurusu may profound on instructions may quite suit her but that is not at all under consideration in Washington. The economic vulnerability of Japan is now the favourite theme of special correspondents but not many care to note that in Indo-China she has a very promising asset. If Vichy joins the Axis, Japan can call the tune in Indo-China. This fear lies at the bottom of Thailand's nervousness, manifested in the announcement this week that a departure from absolute neutrality may be soon forced on that country.

(*Continued from page* 971)

smoothly without any recourse to ways and means advances from the central banking institution.

The return of the Imperial Bank for the week ended November 21 shows a decline in cash balances from Rs. 27.01 crores to Rs. 25.91 crores. This is due largely to the big slice of treasury bills which the Imperial Bank has taken, as a result of which investments have expanded from Rs. 62.05 crores to Rs. 63.98 crores.

The exchange market has maintained a steady tone, with business in export bills and in remittances being on a satisfactory scale.

Banks were sellers of T.T. on London for Ready up to six months forward at 1s. 5 31-32 d., and banks were buyers of T.T. on London for Ready up to six months forward at 1s. 6 1-32d.

D.A. sight bills quoted 1s. 6 9-32d., for three and four months.

Inter-bank call money is unchanged at ½ per cent, no borrowers.

Firms' money for call and short quoted ½ per cent and one to four months' deposits ½ per cent.

Indian Insurance during the War

The latest report on Insurance in India has for various reasons a value usually denied, and not without reason, to routine official publications. The experiences of Indian insurance during the war, its adjustments to the conditions stipulated in and created by the provisions of the Insurance Act and the place which life insurance occupies in the process by which this country accumulates and employs capital in this highly formative period of our national economic development, these are questions on which only a synoptic picture painted by one as competent as the present Superintendent of Insurance can throw light. The interest of the public-spirited citizen starts with a curosity about the comparative tables of new business, premium income etc. to a study of the progress of Indian Insurance as such and its role in the essential processes of saving and investment. When to these are added the remarks and observations of Mr. Thomas on such important problems as amalgamation and absorption among, or with, the small companies, it will be realised that this year's publication deserves much more than a customary notice.

It is comforting to note in the first place that the initial disturbance caused by the coincidence of the war and the new Act have been followed by a high degree of stability and the interruption of progress is now generally recognised to be temporary. If conclusive evidence cannot be provided as yet on points of high interest on an insurance company's shareholders, it is but just to place on record that the recovery in new business characteristic of the last year, at least in the case of some major companies is not divorced from public recognition of the unquestioned advantages of insurance in wartime. It is clear from the last edition of the Indian Insurance Year Book (the twenty-sixth edition has been issued this month at an enhanced price) that war conditions by themselves exerted a decisive influence towards the end of 1939 and available indications as to the future at the year-end were of an unfavourable nature. It is clear then that the recession in new business reported by Indian life offices whose aggregate new business in 1939 amounted to Rs. 45.96 crores as against Rs. 46.68 crores in the preceding year was a result of the war. If they held up better in every other respect credit is certainly due to the management concerned. Their own case for early relaxation of statutory restrictions was strengthened in consequence and the recent legislative amendments made after the usual representation are in the nature of a reward for having successfully stood up to the strenuous conditions of the last two years. The fall in the number of total policies issued to 300,000 from 322,000 in 1938 is itself a clear indication that the Act in the first half-year of its working was felt to be a handicap. But as Indian companies were responsible for 289,000 policies assuring in the aggregate Rs. 42.5 crores and yielding premium totalling Rs. 2.74 crores they may be said to continue to their full share of business available as they had Rs. 215 crores of business against Rs. 204 crores in the previous year.

The decline in total business in force like the fall in the number of policies issued up to 1939 is suggestive of a high lapse ratio and too many surrenders. While it is common to refer to such changes as part of the damage done by the war, it is but right to state here that steps have been taken to correct the adverse trend manifest during the first year of war by stressing, aptly and often, that insurance retains its many inherent advantages as an investment and that there is no occasion for misgivings as to the adequacy or safety of insurance companies' resources. The advance in revenue and funds during 1939 was more or less normal. The annual income of Indian life offices rose to Rs. 14.83 crores: the net addition of Rs. 70 lakhs must be put down to the growth of funds and business. The fact that total life assurance funds in 1939 rose by Rs. 5.1 crores to stand at Rs. 56.31 crores confers importance as the changes in the total assets and income reviewed by the Year Book. The oversea business of Indian insurers in 1939 yielded business totalling Rs. 8.45 crores with a premium income of Rs. 19 lakhs. The main changes revealed by tabulation are a rise in the average value of the life policy issued by Indian companies together with a drop in the annual premium payable per thousand. That the average premium per policy has gone up slightly does not obscure the fact that Indian offices are getting a better class of life proposal from younger proponents. In this respect war may have a favourable effect by promoting more careful selection of policyholders by insurers.

The usual analysis of the revenue accounts, while recording a fall in the number of insurers, bears witness to a rise in premium revenue to Rs. 12.18 crores and a rise of Rs. 6 lakhs only in investment income. Owing to the fall of the rate of interest there was not the same rapid rise in premium or other revenue while the normal increase under claims like the unexpected increase in surrenders cast a heavier responsibility on offices, labouring in most cases under the higher expense ratio, enforced in the majority of cases by the necessity to comply with the new law. That total expenses absorbed Rs. 4.04 crores as against Rs. 3.65 crores serves to show the magnitude of the other achievements. In spite of larger transfers to investment, depreciation and other funds, the Indian companies made an addition of Rs. 5.1 crores to their life funds in 1939.

The fall in the average rate of interest earned on the funds to 4.68 per cent. the lowest level for the quinquennium 1935-39 is illustrative of another major result of the war. The change in the average expense ratio from 41.1 to 41.8 per cent., the ruling rate in the case of all but a dozen big companies, was only slight, and this may be cited to prove that the new law has not led to any drastic increase; but that the fall in new business has raised the proportion of procuration and other costs in the case of all Indian companies from 31.7 to 33.2 per cent. Be that as it may, the reflections of Mr. Thomas, the Superintendent of Insurance, on the subjects of expense ratio and valuations etc. deserve particular mention. They indicate again that the comments on the returns compiled by the new Department are not of a routine nature. Progress as many fear has been perhaps retarded in the past by a high expense ratio. Though the current stability of investment values obviates anxiety as to their possible depreciation, it is obvious that the fall in the yield on the funds will have to be met mainly by certain essential adjustments. The inability of many insurers to show a surplus after the usual valuation can only proceed from the fact that the administration has been too expensive. The fall in interest earned to 4.68 per cent. in 1939 reinforces the usual warning in this regard. With Government able to get its new loan requirements at 3 per cent., life insurance companies, which keep about 70 per cent. of their total assets in stock exchange securities, cannot expect anything like a recovery in yield. Though many companies have latterly evinced a desire to strengthen their position, some have not as yet altered their interest and expense bases and it is to these that the Superintendent has addressed his warning. Perhaps amalgamation of companies, a remedy that he is inclined to favour, albeit cautiously and with qualifications may lead to the rectification of the defects. Insurers of recent origin have experienced difficulty in making deposits and secured concessions; but they have no right to expect special treatment in regard to reserves and or to be allowed to pay bonus when it is not justified. The right policy, in Mr. Thomas' view, in place of the amalgamation movement in evidence, is one for big companies to absorb weaker concerns. If the policyholders of the latter can benefit without disadvantage to the policyholders of the larger, sound concern, it will be to the benefit of Indian insurance as a whole. One may expect that the suggestion will receive prompt consideration, particularly, as the Department has not given undiscriminating support to proposals for amalgamation.

The growth of funds by over Rs. 5 crores may be taken as the most reassuring feature of Indian insurance after the first four months of war. If the further addition in the subsequent year has been affected to any extent, it must be put down to the war. The level of Rs. 5 crores per annum by way of addition to existing investments with just 300,000 new policyholders will strike many as depressing. For a country with a population of 388 millions where the first few months of war produced a striking economic recovery after a period of stagnation, the 1939 figures may seem disconcertingly small. The remedy for such a situation is economic progress rather than education. The latter is of small importance when it is a small, mainly urban class to which life insurance appeals. The appeal to the masses can be made only when the standard of living, like the national income, has progressed to the point at which net annual additions to national capital acquire importance. It is not intended, however, to belittle the contribution of insurance to savings. It is certain that a larger volume of funds passes into insurance than into new companies. Company registration statistics indicate that only a small proportion of new money goes into financial or industrial enterprises, old or new. The legitimate deduction is that bank deposits and insurance premiums alike exceed the subscriptions for new shares. The investor has not the same significance as the policyholder who provides regular addition to the savings. These routine savings buttress the giltedged market, maintain the rate of interest at a level favourable to Government and other borrowers, and by putting industrials on a relatively high yield basis stimulate the stock exchanges. It will be seen that the shareholder of jute and cotton companies owes something to the man who discharges his duty to his family and country by taking out an insurance policy and maintaining regular premium payments. There is besides the other service performed by Indian insurance for Indian industry and finance. The classified summary of assets at the end of 1939 showed that Indian companies which had invested Rs. 36.98 crores in Indian Government securities held shares valued Rs. 4.72 crores. Much of the investment must be necessarily in the form of preference shares, but the point to stress here is that this item exceeded in value the total of Rs. 4.69 crores shown under Land and House property.

The Function of State Railways of India—III

GUARANTEES TO RAILWAYS

It is interesting to review early records which show the operating ratio of the Indian railways in those early years; for it reveals how little influence it has on the power of the railways to earn profits on the capital investments. The operating ratio may be low and favourable, yet the volume of traffic may be so small as to prevent the accumulation of sufficient revenue to cover more than the interest on fixed charges. "Hence with an over-capitalised line even an operating ratio as low as 60 per cent may not necessarily bring in a dividend." It appears as if this was the situation on the Indian railways in the first period of their development.

It is worthwhile to notice briefly the experience of other countries where, as in India, the Government did not think it advisable to construct and operate railways themselves. In Brazil, the Government, in granting concessions to private companies, originally guaranteed a percentage—generally from 5 to 7 per cent—on a fixed capital outlay. But the system proved a costly failure in that country as well. For, though some of the lines did so well as to make no demands on the guarantee of the Government, "many were constructed with the apparent intention of living upon it entirely". Some of the railways did not even earn their working expenses; but many more went on from year to year, just covering their expenses, and earning nothing more to repay to the Government the advances under the guarantee. It appears that the very terms of these guarantees indirectly created an unfortunate conflict of interest as between the Government and the Companies; in the case of some railways, working expenses were made to bear as much for maintenance and renewals as the Government engineers could be induced to sanction. Gradually, the Government replaced the guarantee system by a scheme of State ownership.

In Spain, to take another instance the Government emphatically decided against the guarantee system, and preferred a scheme of subventions to the companies. According to the Railway Law of November 23, 1877 the complete plan of a full railway system for Spain was laid down. The Law provided for a railway system which connected all the main centres of the country, arranged for the fixing of maximum tariffs for each line, subjected every railway to the inspection of the Government engineers, and provided for subvention by the State. All the lines were revertible to the State, normally after 99 years; but the State was given the option to take over any railway, after a minimum period marked in each concession, in exchange for conpensation based on the average receipts for the preceding five years. An interesting, if somewhat blunt, description of the attitude of the Spanish Government, in those early years of railway development in the world, is given by George Higgin, a competent railway engineer. Writing in 1885 he pointed out that "As regards railways John Bull had formed the opinion that the proper form of State aid should be by a guarantee of interest, whilst the Spanish Government had come to the conclusion that as regards themselves this was not a convenient form. The Spanish Ministers argued that it would be impossible for them to find out when a line was paying more than the guaranteed interest, that the system lent itself to abuses which they could not check, and that as a matter of fact, any guarantee given by them would be perpetual, as the companies would so arrange their accounts as to show invariably an interest smaller than the guaranteed; they considered it preferable, therefore to pay a lump sum down by way of subvention, and to have done, once for all,with the business; the system however, was not according to John Bull's ideas, and as one was as proud and self-opinionated as the other, neither would give way; the result was that no English capital went to Spain for railway purposes. John Bull considered that he was punishing Spain by buttoning up his pockets, but as a matter of fact he punished himself also. The capital he refused to give, was found in France and Belgium, and to France and Belgium, went all the orders for railway material.

Considering that the requirements of the agricultural population of France, which was spread evenly over almost the whole country, could not be met adequately by the earlier private joint-stock companies who had obtained the rights of railway construction and operation from the Government at first, the terms the latter offered to the companies appear to be quite a wise bargain. By about 1857, four years after the opening of the first lines in India, the Government of France has entered into uniform agreements regarding the working of the French railway companies, namely The Nord, The Est, The Ouest, The Paris-Orleans, the Paris-Lyon-Mediterranee and The Midi. According to these agreements ("Cahier des charges") the Government obtained the control over the railways which was at least as complete as that which the contracts with the guaranteed companies gave to the Government of India. It was only in the case of the Midi that interest on the capital was guaranteed. The gauge, the maximum gradients, the minimum radius of the curves, conditions as to fencing, the speed and time of transit of all trains, in all these, the last word was to be with the Minister of Public Works. The duration of the concession was for 99 years and there was the option to purchase earlier under certain terms. As regards lines which were not expected to yield a profit, though nevertheless required in the general interest of national progress, the Government of France entered into fresh "Conventions" with the six old concessionaires for working them. For the construction of these lines, called the "new system" whose accounts were to be kept separate from those of the earlier profitable lines comprising the "old system" subsidies were given by the State. Interest at 4 per cent. and sinking fund contribution calculated at the same rate on the capital invested in the "new system" were guaranteed by the State for 50 years from 1865, subject to the following conditions. The net profits on the capital invested in the "new system" was, if sufficient, to be employed for paying interest on that capital. If not sufficient, the amount required to be made up from any surplus that might remain over after the net earnings of the "old system" had reached a certain specified sum, which was to be reserved as profits on that system. In case the money available from these two sources was not enough to pay the 4 per cent., guaranteed as interest, the State was to supply the difference. Any advance made in this manner by the State was to be repaid with simple interest at 4 per cent., as soon as the net profits of the "new system" together with any surplus that might remain over and above the reserved profits on the "old system" were more than sufficient to provide the 4 per cent. on the capital of the "new system". When all loans, due to the State in this manner, were wiped off, the companies were allowed to retain the whole earnings and the net profits were increased up to a further point. Any excess remaining above this point was to be shared equally between the Government and the companies. In case the advances made by the State had not been liquidated at the expiration of the concession, the amount still owing was to be deducted from the payment to be made to the Company for the purchase of the rolling-stock and other movable property which the State was bound to take over at a valuation.

The system of guarantees, begun in 1849 under Lord Dalhousie, was continued till 1869, when, at the end of Lord Lawrence's tenure as Viceroy, its burdensome nature was realised. His plea that the future lines should, so far as was consistent with actual and implied engagement with existing companies, be carried out by the Government itself, was accepted; and during the next ten years all extensions to the railway system were carried out wholly and directly by the Government of India. Among the lines constructed or begun by State agency and from State capital between 1869 and 1880 were Indus Valley, Punjab Northern, Rajputana-Malwa, Northern Bengal, Rangoon and Irrawaddy, and Tirhoot. The history of the development of Indian railways during this period and under this system may be deduced from the fact that of the total railway mileage at the end of 1879 namely 2,175 miles (nearly a fourth) had been directly constructed by the States and the rest by Companies.

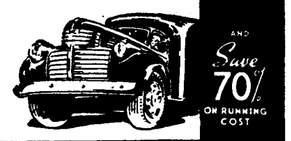
Indo-Burmese Trade

A minor recession under both exports and imports is disclosed in the trade returns of Burma for August. These figures, however, disclose striking improvement on August 1940 when the export trade particularly was in a bad way. The normal export surplus is reported by Burma in spite of the fact that imports since April have been running at a high level. The most significant feature is the rise in the average monthly trade turnover to a height unattained since 1939. The recovery peak was passed in 1939 and further improvement is apparent. It may be surmised that the second year of war has been much more favourable to Burma's trade than the first. A further difference between India and Burma emerges also in the fact that Burma's exports in 1941 have expanded more rapidly than imports. The total value of imports in August is returned as Rs. 2.36 crores and the total value of exports including re-exports was Rs. 5.28 crores. The most arresting feature of August was a fall in imports of cotton yarn and twist after progressive improvement in the nine previous months. Exports to India valued Rs. 2.29 crores exceeded as usual the imports valued Rs. 4 crores. These figures confirm the popular view that more than half of Burma's trade is with India as in the pre-Separation period. They may be said to strengthen the claim of the Indian Community in Burma for early notification of the unratified immigration agreement negotiated by Sir G. S. Bajpai and severely criticised by the Central Assembly.



The total trade with India in August shows an increase of Rs. 76.4 lakhs on August 1940. In the five months ended August, Burma's exports to India rose by only Rs. 47 lakhs whereas imports from India rose by as much as Rs. 105 crores. Notwithstanding the fact that there is a large excess of exports from Burma it may be claimed that the trade pact signed this year has operated to India's manifest advantage.

India has provided more than half the imports as in the past, and Burma's tariffs have not restrained the expansion of imports from India arising from the war. It may be added that imports from India have risen by 22.1 per cent whereas total trade with India has increased by 7.8 per cent, and imports generally have risen by 16.5 per cent. The figures illustrate the comment that reciprocal advantages secured in the trade agreement this year will stabilise India's position as Burma's Supplier No. 1. The progressive improvement in regard to piecegoods and coal imports may be cited to show that India's share of Burma's imports is now larger. The August returns disclose increases under Burma's imports of chemicals, drugs, paper, footwear and soap. It may be urged that this increase as compared with August 1940 resounds to the advantage of India. The increase recorded under vehicles, machinery etc. clearly points to an expansion of takings from U.S.A. The Burma Trade Journal does not contain the usual table relating to the direction of trade so that no figures can be furnished in support. The increase under exports to India appears limited as compared with the increase of exports to foreign countries between April and August 1941 as compared with the corresponding period of 1940-41.

After-War Reconstruction

The session of the I.L.O. at New York attracted the Lord Privy Seal as a visitor. Whether he wanted to see the achievements of the U.S. industrial machine or to formulate the familiar promises to nations ground down by aggression, he must have seen that the desire for a New Order animates others besides Hitler. The task of social reconstruction appears immense in prospect and the acting director's report has dealt largely with the place of the I.L.O. in guiding reconstruction work. Four years ago the emphasis was on recovery after the slump; to-day it is on social reconstruction after the war. The I.L.O. is not directly concerned with the restoration of material structures and plants; it is interested mainly in social policy directed towards reconstruction. The press summary of the report presented by Mr. E. J. Phelan (the disciple and biographer of Albert Thomas indicates that he will let grip rather than grope towards its opportunities. He has argued that the importance of social objectives will not diminish despite prevailing fears on social policy because of its importance for defence and also because it will be one of the major issues settled by the war. It is only to be expected that the report refers approvingly to the Atlantic Charter and its acceptance of the desire for 'fullest collaboration in the economic field with the object of securing for all improved labour standards economic advancement and social security.' Economic security will be promoted by democracy—that is an assumption implicit in the report which urges that conscious policy will be directed towards this end. Though India's representation at the conference did not answer expectations it is coming to be recognised that the wartime conference of the I.L.O. is important not for its report or the addresses made or for drafting new conventions but for indicating that a supra-national organisation exists to undertake the essential work of advising on post-war reconstruction. Mr. Phelan has made the suggestion that peoples, not governments, should instruct the I.L.O. to take up the work of securing social justice. The agenda of reconstruction may cover in the opinion of the Ag. Director, the elimination of unemployment, the further development of vocational training, the improvement of social insurance and the acceptance of a minimum living wage.

The mandate desiderated goes much farther than the evaporative idealism of the Anglo-American declaration. While President Roosevelt's declaration concerning succour to the victims of aggression has resounded for a week before Armistice Day little has been heard about an official endorsement of a new policy propounded for peace time by the I.L.O. Director. Housing, emigration and industrial peace will remain questions of prime importance after the war but the conference committed itself to few positive declarations on the score of post-war policy. But U. S. statesmen energetically approved the notion of linking the survival of democracy with economic, or rather, social advance. The departure of Mr. Winant from the I.L.O., has not

lessened U.S. interest in the I.L.O., for the work done by the fugitives from Geneva is of high importance for Latin America which has special problems, both of agriculture and industry.

Developing India's Fisheries

Fisheries, which have often been grouped with agriculture by chance rather than design, are not likely to benefit greatly through the war. There is, however, no reason why they should not, because fish is an important part of the food in the tropics. It is quite likely that Russia's herring requirements in war will be as large as ever, and the decay of the Scandinavian fishing industry may create an opportunity for others. It has been suggested recently in *Indian Farming* that fisheries, the third most important industry of India ranking after agriculture and livestock deserve attention. It is urged that nutritional defects in India can be largely rectified by the addition of the protein and fats derived from fish, known to be rich also in Vitamin A. Limited encouragement has been available through schemes designed to improve the shore fisheries. Bombay has done a little, mainly on account of steps taken two years ago by the Ministry to introduce trawlers and improve or rather accelerate marketing. The effect of such improvements can be seen in the enlarged supply of fish available for Bombay. The other stimulus given by the war was to encourage the production of shark lever and other oils in place of Norweigian cod liver oil. Madras like Bombay is said to have gained through the local extraction of oil. But large scale improvement is contingent on the adoption of deep sea trawling methods. It is urged that old fashioned methods entail poor yields and the only way of bringing up the catches to European standards is to go farther out and use the seine net. The use of powered craft in place of sailing boats may be called for, but this should not be impossible. The cultivation of fish in inland waters is a problem different from that of modifying radically the methods employed by the fishermen of coastal regions. Cold storage and rapid transport will have to be provided at the same time in order to dispose of the larger catches obtained by trawlers. Motor launches used for carrying fish in Bombay have demonstrated their value. A point stressed in this connection is that industries will spring up to use the wastes and fish meal will prove an invaluable manure. Another industry which should gain considerably is the canning industry. The way in which Japanese craft has finished in distant waters, and developed a large canning industry provides an important lesson. Refrigerated transport will automatically extend the market and the surplus will be taken care of by the canner in any event, reducing waste at the point of preliminary distribution. It has been urged again that results from trawlers have been quite favourable that India should adopt them generally for fishing at sea. First cost is not viewed as an obstacle nor is the lack of shipbuilding yards, able to make and float such craft, considered a bar to their adoption.

Trade with the U. S. A.

Discussion of prevailing trade trends cannot stop with mention of the increase of exports to the British Empire. Available evidence points to the strengthening of connections with U.S.A. Though a certain part of trade will be affected by the application of varied modes of transfer under the scheme of American assistance to the Allies, the major fact in war conditions is the increasing dependence of India on the U.S.A. Whether it be a question of machinery, steel, drugs or rubber goods, the importer however ready to give first refusal to Britain at present cannot ignore the U.S.A. the only neutral in a position to sell and ship goods. The adoption of licensing procedure in order to secure priority for U.S. requirements has by no means

militated against the consistent growth of Indian exports which one is entitled to expect. The coincidence in regard to imports will indicate that import control, tightened up only in June, will not retard the mutual exchange of goods that alone will stabilise wartime conditions. It is only necessary to recall the circumstances of the last war to see that this rapid growth has a safe precedent and it may even be urged that an increase in imports of U.S. origin implies a rise in purchasing power, for the country must be richer to pay for U. S. manufactures. The outstanding feature of India's seaborne trade in the six months ended is the rise in exports from Rs. 12.4 crores during the first half of 1940-41 to Rs. 19.9 crores. The increase is a significant measure of India's readiness to turn from the U.K. to the U.S.A. for manufactures. Though this may prejudice the barter terms of trade from the U.S. angle, it may be claimed that this advance signifies that the rise in exports generally during 1940 will be followed by a similar increase this year. It is clear that the increase in India's imports of vehicles as compared with the first half of 1940-41 resounds largely to the advantage of the U.S.A. Whether it was an anticipation of curtailed automobile output in the U.S.A. that stimulated such an increase or India's pressing war requirements, we need not pause to consider.

The really significant factor in the growth of imports from the U.S.A. this year is that it has taken place notwithstanding exchange difficulties and inadequate shipping facilities. Imports of U.S. cotton may be small and the small increase in India's imports of oil would have yielded little gain to the U.S.A. It is, however, certain that an increasing proposition of chemicals, drugs and medicines, cutlery, hardware and implements, machinery metals, iron and steel as also rubber and textile manufactures must be obtained from the U.S.A. since imports of all the categories mentioned show a marked increase as compared with the first half of 1940-41. The main movement is illustrated also by the fact that imports from the U.S.A. have risen in the first half of 1941-42 by Rs. 7¼ crores while the total value of imports has risen by Rs. 21.47 crores but the more illuminating fact to cite in this connection is that the U.S.A. claims Rs. 7½ crores out of the total of Rs. 10.6 crores, the increase in the value of imports in April to September as compared with the first half of 1940-41. The increase of Rs. 1.95 crores in the value of imports from Japan recorded in the September trade returns will be viewed as of temporary interest for commercial relations have been seriously dislocated by the freezing order of July and the evacuation of Japanese nationals ordered in October. The increase in imports from China must also be treated as of the same nature, though it may be argued that the depreciation of the Chinese dollar as also the formation of the ABCD front will confer certain advantages.

Molasses for Cattle

The casual mention of the report that the I.C.A.R. has discovered a method of using bagasse in combination with molasses as cattlefeed is not the first mention of what has long been recognised, that molasses can be used for other things besides alcohol manufacture. An article in Future by Upton Close last year showed that molasses had become important in the U. S. stock-rising industry. Two million cattle in the south-west feed on molasses, and like it, since it has a sugar content of more than 50 per cent. It is fattening and mixed with chopped stalks, pulp and grass makes excellent fodder. In drought areas, where there is no grass, cattle eat molasses straight from feeding stations kept by the S. W. Sugar and Molasses Company. Three years ago one of the outlets for Cuban molasses was closed by the discovery of a process for distilling alcohol from coal and natural gas. A partner went to the west, saw the scarcity of grazing stuff and told a cowboy that half-starved calves would take no molasses. They had something to go upon. In Scandinavia silage is mixed with molasses. California, too, had used it, and it was learnt that molasses as cattle-feed was not unknown in Britain. Tankers were used to bring molasses to Gulf ports, tank-trucks took them to the waterholes on the ranges and special troughs completed the job of distribution. Though cattlemen pooh-poohed the notion of giving sweet stuff, it was extensively tried in the 1939 drought. It was also learnt that steers put on weight if they got cow candy, and a further advantage presented to ranchers was the increase in fertility. Herds grew in a striking manner and cows were given a chance to dry up if calves showed a liking for molasses. In the first experimental year, the cattlefeed business became a half million dollar affair. Many ranches started to mix molasses with other feed, and 700,000 cattle were fed over 4 million gallons of molasses. In the next autumn over two million cattle were brought on to molasses which have to be procured from Mexico and Porto Rico in addition to Cuba. Texas has led the way because big ranchers could be convinced easily that molasses with grain and grass is a good diet. Citrus-growers have also been taught that peel and pulp added to molasses is good for cattle. The result is a new use for stuff formerly thrown away as waste. Oyster shells too are ground and flavoured with molasses in order to provide bone-building additional diet. Molasses can turn much waste matter into palatable roughage. Straw from maize cut by a chopper provided the base for molasses-feed: it put up the weight of calves on the New Mexico-Texas border. Containing a trace of sulphur, molasses is good for cattle. It increases thirst; animals take more water and naturally put on flesh. It has been learnt that the right remedy for cattle that have eaten the dangerous loco weed which pro-

TRANSPORT
a vital link in war

Where, to-day, steel serves the mighty war machines of the world, to-morrow it will be the strength of steel which carries the cargoes of peace-time. Now steel fills a thousand holds with cargoes of destruction. To-morrow it will hoist food and sustenance abroad, to be carried surely and securely to the four corners of a war-weary world.

ALWAYS—EVERYWHERE
STEEL FOR STRENGTH

TATA STEEL

To withstand the immense strain imposed on them, the smallest of details in modern structures are made of steel.

Issued by THE TATA IRON & STEEL Co., Ltd. Head Sales Office : 102, Clive St., CALCUTTA

duces insanity and death is molasses. Again research in Texas had followed the suggestion and there is now a prospect of additional grazing area being opened up in the cattle country. The help given to sugar planters is not less important than the service provided to cattlemen in the dry States. The lessons of American experience will have to be considered in relation to the molasses problem in India.

Middle Eastern Prospects

The growth of imports from Iran during the first half of 1941-42 from Rs. 1.59 crores to Rs. 2.02 crores is a development adequately explained by events in the Middle East as is also the expansion of imports from Iraq from Rs. 7½ lakhs to Rs. 32.23 lakhs. The parallel growth of exports from India indicates commercial ties with countries allied to Britain at present. The fall during this period in imports from Arabia is offset by a rise in exports to that country. The increase in the value of Indian exports to Iran which is Rs. 33.07 lakhs as against Rs. 15.97 lakhs in the first half of 1940-41 may seem meagre in view of the glittering handouts published but at the same time it is certain that a great deal of trade on Government account has not entered into the returns. The recovery in Iran's exports to India is perhaps a more noteworthy feature showing that under Mohammad Riza things are shaping well.

At the conclusion of the analysis of trade returns particular mention must be made of the fact that the value of total exports at Rs. 105.73 crores is definitely in excess of merchandise imports during the first half of 1941-42 into India valued Rs. 100.76 crores. The favourable balance of barely Rs. 5 crores may seem small to those who think of bonus but do not reflect that an enormous quantity of trade flows outside the normal channels of trade. The familiar warnings were oft ignored in connection with the emergence of an adverse balance of trade in the first few months of this fiscal year, and attempts were made also to establish the latent weakness of the rupee. The prophets of gloom are certainly belied by the swift growth of exports in the second quarter though the recent expansion in the value of Indian exports may owe something to the upswing in prices that began in June.

Cotton Statistics

A clue to the state of the textile industry as also the bullish conditions prevailing in the cotton market in July is furnished by the official publication dealing with raw cotton statistics. The increase in mill comsumption reflected in textile production is clearly reflected also in the takings of Provinces in which mills are located. For instance imports of cotton into Bengal in the eleven months ended July, 1941, exceeded 1 million maunds as compared with about 425,000 maunds in the eleven months ended July, 1940. Equally pronounced is the increase in cotton imports into the U. P. whose own exports fell by comparison with the past year. The inter-provincial trade figures show that the price-level stimulated both imports and exports in the case of Bombay and Karachi. The increase of over 2 million maunds equal to about 400,000 bales in the quantities recorded may however be taken to indicate a vulnerable statistical position. It is clear that after the freezing order the export outlook has become very uncertain and the Indian cotton-grower has to accept the fact that crop movement will produce a fall in prices.

The increase in arrivals and exports recorded in the case of Madras is not large as compared with other provinces, but coastal trade is probably left out and seaborne imports of foreign cotton also do not come into calculation. Though Assam may be dismissed as a negligible quantity it is only in the case of two provinces that exports of cotton exceed imports. Since Karachi and Bombay are export centres this excess of imports is explained and the large takings of the U. P. from the Punjab are proved by statistics. The actual share of locally-grown cotton entering into U. P. trade appears to be small, while the decline in exports by rail and steamer from the 10 blocks of the U. P. up to July suggests that even if U. P. mills did not increase their takings of local cotton, larger quantities were obtained from the C. P., Central India and Bombay.

ART
in Industry
EXHIBITION
1942

The entries for the Art in Industry Exhibition, 1942, will be accepted at the Government School of Art, Calcutta between 5th and 24th January, 1942.

The exhibition is divided into twelve sections, each section carrying prizes amounting to Rs. 450/-. The donors of these prizes are :

H. E. The Governor of Bengal ; Bata Shoe Co. Ltd. ; Bengal Chemical & Pharmaceutical Works Ltd. ; Burmah-Shell Oil Storage & Distributing Co. of India Ltd. ; Cement Marketing Co. ; Dunlop Rubber Co. (India) Ltd. ; Metal Box Co. of India Ltd. ; Railway Board ; Tata Iron & Steel Co. Ltd. ; Indian Tea Market Expansion Board ; Mahalaxmi Cotton Mills Ltd. ; Ananda Bazar Patrika and Hindusthan Standard.

An additional prize of Rs. 500/- is being donated by **Mr. Bhabani Churn Law** for the entry in which any of the Indian Classical Art forms is best employed. The Prospectus and particulars can be had from the sponsors and any of the donors.

BOMBAY · CALCUTTA

Language, it is often said, is meant to conceal, not to express thought. But words have a way of betraying thoughts which is sometimes highly disconcerting. Modern Psychology denies that there is anything like a slip of the tongue. When you intend one word and say another, it is only an indication that the idea which was in some corner of your mind elbowed others out and fought its way to expression. I am thinking at the moment of the consistency with which the expression, "war effort" has been used in all references to India's relation to the war. Technically, India is as much a belligerent as Britain or Canada or Australia. There, they talk of the prosecution of the war. But here no one thinks in terms of participation in the war. The Congress took umbrage at India being declared a belligerent without so much as a farce of a consultation of the Legislature. But the Congress is blamed less for its opposition to belligerency than its opposition to the war effort. And the reformist sections in the Congress do not feel called upon to consider anything more than helping the Government in the war effort. The spread of the war to the frontiers of India may abolish the distinction. We, too, may find ourselves talking about, and engaged in, the active prosecution of the war. But at the moment the distinction is there. It has been made, and consistently adhered to.

It is more than I can say whether the word was coined to fit the special status and conditions of India. But it seems to betray an anxiety that there should be no direct participation in the war, but that India's task should be limited to making a certain kind of "effort." The nature and scope of that effort will be determined from time to time according to the course and vicissitudes of the war. Let no one run away with the idea that the honours of saving the Empire in a moment of peril are available to India. It is not as if India is free to raise all the manpower she can and make all the munitions she is fitted by Nature to make and march her armies over three Continents in defence of freedom and civilisation. No such role will be assigned to India. She is expected rather to exert herself along certain lines and make available to Britain the kind or kinds of help she may find herself in need of.

Am I reading too much into what might after all be a fortuitous coinage of new words? No. The term war effort does imply all that. If in peacetime you must be, as the older generations of congressmen loved to call it, hewers of wood and drawers of water, in wartime, you must be sappers and miners, not soldiers or pilots. This reading of the new position had been made instinctively by all Indians even at the outbreak of the war. The public was insistent in its demand that this time India should look to her own security while she is helping the Empire, that war industries should not be limited to those which can fill the gaps in British production or make up the shortages felt by the British Supply Ministry. We ought to be able to make tanks, aeroplanes, warships guns and all the rest of it for ourselves. The business community was more concerned about being left to nurse war orphans in the industrial sphere. But the Government, while it was prepared to allay the fears of the industrialists, was hardly disposed to meet the popular demand for increasing security by more complete industrialisation. Their concern was not war or security or preparedness, but war effort.

And the nature and scope and pace of the war effort were determined and set by the British Government at home. If France fell and a lot of war material was lost in Belgium, the problem may have put on a different complexion. But the subjective attitude in which it is regarded remains the same. The whole of the Empire had to strain itself to raise the level of production. But Canada is divided by te vast exoanse of the Atlantic infested by Axis submarines. So get the Eastern Empire countries together, speed up production of war supplies, keep a large reserve of productive capacity; but don't lose the peace before you have won the war. That has been the psychology of the war effort all along. That is why the Eastern Group Conference met in India in an atmosphere of public distrust and even hostility. For my part, though I have never under-rated the force of this psychology, I have trusted to the pressure of events, rather than the appeal of arguments, to guide the work of the Eastern Group Council and bring about better understanding, better co-ordination among the members of the Eastern Group. In the Annual Special Number which 'Indian Finance' will be issuing shortly, there will be some evidence to confirm my view- I am still as optimistic as ever that the Eastern Group Council

will, in spite of innumerable obstacles, do well in war and do even better in peace.

But Britain's attitude to India's place in the war would still seem to be radically vitiated. In the political sphere ,all the good work which Rajaji, the philosopher-statesman from the South, is doing in Delhi and Wardha counts for nothing in the eyes of Mr. Amery, who talks of the release of political prisoners as if it were not a major question of policy, but a matter of administrative detail. "The Times" may thunder, but Mr. Amery is unruffled. Mental inertia calls for a new statics and a new dynamics probably. But that is another matter. In the industrial sphere, the same old ideas persist. It is thought to be far more important that the interests of the British export trades should be shielded from now than that the Empire should be fully prepared to meet any challenge from any part of the world. When the Roger Mission came out to India, it was freely said in this country that in the eyes of the Mission, Britain's post-war trade was not less important than adequate supplies from India. The Mission's mission was not less to guard against loss of markets than to ensure supplies. The incompatibility of these two aims is obvious, apart from its unfairness to a country like India. But that both these aims have been kept in mind will be clear from the following extract from the "British Railway Gazette":

"Mr. Guy Locock, Director of the Federation of British Industries, has just returned from his visit to India as a member of the Ministry of Supply Mission to that country, and as delegate to the Eastern Group Conference, New Delhi. The recommendations of the Mission are naturally confidential, but Mr. Locock has no doubt that their effect on war production in the Eastern Group is likely to be considerable. As Board of Trade representative on the Mission, he was entrusted with the task of appraising future effects on British Industry of the war production expansion now being undertaken, always keeping in mind the necessity for giving priority to vital war needs. There can be no doubt that the present war, like its 1914-18 predecessor, will accelerate industrialisation in India and other Eastern countries. At the same time Mr. Locock holds the view that no steps have been taken to expand production as a result of the Mission's visit which are not essential for war purposes, and that on the whole post-war interests of British industry are not likely to suffer so greatly as was at one time expected. Nevertheless, there can be no doubt that increased industrial production has to be anticipated in the post-war period in India, to a greater extent in Australia, and to a smaller extent in South Africa and many peacetime problems will arise for the British exporter, once replenishment demands are met".

The above has been carefully worded. Nevertheless the cat is peering out of the bag, through this sentence: "No steps have been taken to expand production as a result of the Mission's visit which are not essential for war purposes". With a slightly different sequence, it would probably be a more correct description of the position—as a result of the Mission's visit, no steps have been taken to expand production, which are not essential for war purposes.

Mr. Locock and his colleagues may have served the F.B.I. well, the F.B.I. of a future time. But they can't be so certain that they have served their nation and the Empire as well. India, too, has a Federation of Industries with a future to be guarded and ensured, territory and soil to be rendered secure. And we cannot be content with a war effort, the nature and scope of which is determined with reference to "the post-war interests of British industry".

The appointment of Mr. Deshmukh as Deputy Governor of the Reserve Bank, announced some time ago and taking effect from now, has met with hearty approbation among those who have clear ideas of the qualities needed for this position of responsibility. Such happy choice is none too common in this country, where jobbery is helped as much by ignorance of the qualities needed as by selfishness or favouritism in circles that count. It is only slowly that we are acquiring the discipline which alone can ensure that, in these days when power over the destinies of important public institutions is divided between a Government on the eve of abdication and non-officials new to public responsibilities, important offices will be filled by men of the requisite calibre and experience. Mr. Deshmukh belongs to the I.C.S. and has the varied administrative experience which this Service provides for its abler members. There is no claim too tall for the I.C.S. to make on its behalf; and the public attitude to it is shaped by the old cliches about the bureaucracy and the low value which some of its members seem to attach to modesty. But, whether or not the European members of the I.C.S. were so omniscient as the Government would have us believe, some of its Indian members have preserved that tradition of study, assimilation of experience and application to given tasks, which it would be idle for others tc pretend to. Mr. Deshmukh takes up his present position after a considerably long period of patient study of the problems he will have to deal with. He has an elegant and urbane personality whic reveals its charms after the breakdown of the initial reserve natural to all persons of refined sensibilities.

Blood-letting, in the most modern, approved manner, provided certainly a thrill for those who went to hear Dr. J. B. Grant lecture on blood transfusion to a keen audience on Tuesday at Firpo's. Blood banks have certainly come to acquire greater significance for mankind than blood-baths of which the casualty lists are not the only reminders. I should certainly add my little inconspicuous tribute to the Doctor's lecture, addressed to Calcutta's citizens for the cause of the wounded who may perish through haemorrhage. It was certainly a revelation to many in Tuesday's audience to hear that dry plasma offers certain distinct advantages. Storage is one of them, and if dry blood is only half in volume its despatch to the theatre of war is facilitated. The medical profession has ere now taken keen interest in creating a Blood bank. The spread of war in the Middle East has made it even more necessary. There was an appeal for voluntary donors of blood, all the more necessary as a local reserve must be held against that unpleasant contingency, an air raid. Arrangements for drying human blood have been set in train and the appeal for donations of blood from donors aged between 18 and 60 followed the description of what has been done already in Bengal.

It might be certainly said that in blood and treasure alike the contribution of Bengal to this war is immense and significant. The more familiar form of support to the war has been ungrudgingly given by the Province which still leads in the matter of subscriptions to the Defence loans. One may expect that in regard to saving for the war a more inspiring lead will be given soon during the Defence and Savings Week. For those who can afford neither gifts nor even the luxury of thrift there is one way of showing sympathy, to make a deposit in the Blood bank. Not so enervating or tiresome as it seems, because Dr. Grant has told us, and Dr. L. E. Napier showed us actually how it is done.

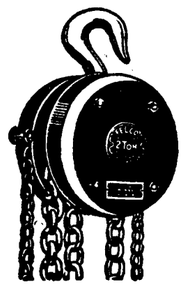
(From Our Correspondent)

New Delhi, Nov. 25.

THE close of the autumn session of the Central Legislature has provided opportunity to review the position in the light of recent political developments. There is great satisfaction in Assembly circles at the manner in which the new expanded Council has been working. Unfortunately one or two important members like Mr. N. R. Sarker, who was expected to play a great part in shaping the new policy, have been ill, but generally speaking an excellent beginning has been made. It appears that the Viceroy is convening meetings of his Council as is necessary—even daily sometimes—and keeping the Members fully informed. Not only have the eight Indian Members been able to work together in substantial agreement among themselves but it is generally believed that the European official members, particularly the Commander-in-chief, have been co-operating with their Indian colleagues in the latter's attempt to secure a new atmosphere in the country by conciliatory measures. It is largely due to the anxiety of the Viceroy to give the fullest facilities to the new Indian Members that the latter are now able to emerge from the last session of the Central Legislature with a definite feeling of satisfaction regarding the new relationship established between the Government and non-official members.



* * * *

A rumour that the Communications Member, Sir Andrew Clow, will proceed on leave sometime in January is again afloat. The official announcement made this week that the Government of India has decided to acquire both the B.N.W. Railway and the Rohilkhand and Kumaon Railway has evoked appreciative comments on Sir Andrew's policy in the important matter. During his tenure of office the decision was taken to acquire as many as four company-managed Railways for the State—the Assam Bengal Railway, the B.B. and C.I. Railway, the B.N.W. Railway and the R. and K. Railway. As it is too early to forget the resistance which some of his predecessors put up against non-official proposals for purchasing the remaining company-managed Railways, this is no small achievement to the credit of Sir Andrew Clow. It was during his term also that the big scheme for acquiring the three privately-owned telephone companies in the country, so that the entire telephone system may come under Government control, was successfully pushed through—though in the case of Madras the consent from the necessary percentage of shareholders has not yet been obtained. There are still three big Railways under company management—the South Indian Railway, the Madras and Southern Mahratta Railway and the Bengal Nagpur Railway. In the case of the former two notice of purchase can only be given in 1945, and in the case of the last, in 1950. A suggestion has, however, been made that instead of waiting for the date of option to arrive the Government of India would do well to formulate a scheme similar to that adopted in the case of telephone companies and acquire the shares of these companies for the State even though the management may continue in the hands of the present companies. At present the Government have enough assets to purchase the shares by voluntary arrangement, but one cannot say what the position will be in 1945 or 1950. If, as is rumoured Sir Andrew Clow, is leaving the Government of India early next year to take up a Governorship it will be for his successor to consider the feasibility of this scheme or any alternative.

From the point of view of Indianisation also Sir Andrew Clow has shown himself liberal. Both the Secretary and the Deputy Secretary of his Department are Indians—a record which no other Department can show. In fact his Secretary Mr. S. N. Roy, is the only Indian Secretary in the whole of the Government of India. For the Financial Commissionership of the Railway Board which, consequent on the transfer of Mr. B. M. Staig to the Army Department, fell

(From Our Correspondent)

Bombay, November 26.

THE reconstitution of the Rural Development Board shows that the Adviser regime is not wholly retrograde. A new committee of officials and non-officials has been set up after the old one went out in June, 1941. There will be no sub-committees and some of the old members have a place as of right and the President of the Bombay Cooperative Institute as also the Chairman of the Provincial Bank has been nominated. Representations of various District development boards have secured recognition. The other nominees include Sir P. Thakurdas and Prof. Kale of Poona. It is believed that a Board of 65 members will be too unwieldy to be effective and real power may be concentrated in the Secretarial complement. The purely advisory functions vested in the Board do not promise much progress. A three-year term and monthly meetings will not promote real, infor mal consultations. As the first meeting will take place only in January, little enthusiasm has been generated by the report that rural development will be directed by a popular body advising numerous heads of departments.

The announcement will produce no greater impression than the other about the plans for improving marketing in this Presidency. The report that decisions will be soon taken suggests that there is some delay in putting the marketing department on a new basis. Ten special societies are to be started alongside of the Provincial Co-operative Marketing society which will have a capital of Rs. 1 lakh to be started in December as a model for others. The establishment of regulated markets is under consideration and a new price intelligence service is to be got up. The cotton and produce markets are not rattled by the news that middlemen are to be bypassed by new arrangements. Changes in conditions for export staples are to be studied in accordance with a proposal made at the recent marketing officers' conference. Standardisation, grading and other improvements are to be incorporated into the export trade in agricultural commodities. The scrutiny of packing under the Agmark scheme will be undertaken in order to prevent lapses such as have been noticed of late by the marketing staff.

It was only to be expected that the shareholders of Tata Chemicals too would approve the Board's proposals presented at the extraordinary meeting. The report that the plant will be working by January has stimulated interest in the shares which have gone up as confidently expected. At the meeting referred to, Mr. J. R. D. Tata has no need to whip up optimism. He set out the facts, told the shareholders that it would take some time before the plant would get going, that the usual teething troubles were expected before capacity production was reached. Normal operating results could, however, be expected before the end of the next year, according to the Chairman who cautioned the shareholders present against too rosy a view of profit possibilities in the immediate future. The caution is both timely and expedient but the share market is not likely to be impressed. The issue of 4 per cent convertible debentures for Rs. 35 lakhs was approved by the meeting. It is known that the issue will be public and underwriting will be arranged with the Investment Corporation of India. Shareholders will receive special preference as expected and the fact that Bombay Telephone debentures etc. will be retired will naturally bring on a large amount of institutional support for the anticipated issue.

No excitement has been created by the news that Sir John Dill will be the next Governor. A retired soldier will be as good as the back-bencher with social advantages who is usually pitched upon. A soldier may get on quite-well with the Advisers but the appointment runs counter to the rule that parliamentary experience is wanted in the days of autonomy. There is the usual smug story about what Sir John Dill has done and what his predecessor has achieved. It is clear that nobody here will try his hand at ministry-making. A soldier may give the move to local war effort but nobody will urge that getting A.R.P. work done is the main job of the Governor. That Mr. Eden liked and admired Sir John Dill is quoted in the Governor-Delegate's favour at present. There is no blinking the fact that there is some unexpressed dissatisfaction with the idea of a Field-marshal as Governor. The politicians deplore the appointment and the city has shown that much as it likes the idea of Sir Roger Lumley's staying on for a period, it is not bucked up by the news that a General off the active list is to be sent out to govern Bombay.

The strike in the G.I.P. workshops of the stay-in sort in certain places has come to an end. The workers last week decided that the best thing is to go back. The dearness allowance for which a claim was put in cannot materialise at once. The strike was a surprise as it was known that the Federation was on the job of negotiating an increase in wages. The men at Parel and Matunga did not wait for the leaders' word and the stay-in strikes led to a notice from the authorities about a lock-up. Work was resumed on Tuesday last; so all is well that ends well. There is, however, a fear that this kind of thing will affect war production as the workshops have been doing a good deal of work for the Defence Department.

More Tests with Shellac

A technical paper issued by the London Shellac Bureau sums up the results of work with plasticisers used along with shellac. No single agent can be recommended and the choice is notably governed by the property desired in the shellac film. If it is maintenance of resistance to water certain agents may be selected; when flexibility or resistance to hydro-carbons is required, other plasticisers may be taken. The general behaviour of plasticisers has been examined, and those which are incompatible with shellac e.g. castor oil were found to be least effective. Mixtures of low-boiling solvents when used for preparing varnishes were more satisfactory. It was learnt that in the case of the monester plasticisers in vogue the aromatic phethalets increased the water resistance of the film better than the alephatic ones.

Cane and Gur in the Punjab

According to the review of agriculture in the Punjab in 1940-41 prepared by the Director of Agriculture, the sugarcane crop acquired greater importance, though the acreage was not the largest on record. According to the official estimate there was an increase in area owing to favourable climatic conditions at sowing time and also the high prices obtained for gur in recent years. The area was about 550,000 acres showing a rise of 31 per cent on the previous year. The total production of gur in the Province was 470,400 tons or 48 percent more than in the previous year, the average yield in 1940-41 being 24 maunds per acre. It is believed that 75 per cent of the cane grown in the Punjab consists of improved Coimbatore varieties noted for high yield. It is, therefore, likely that the actual production of both cane and gur last year exceeded the official estimates.

Indian Spruce for Planes

Indian timber finds application in the manufacture of aircraft. Indian spruce has recently been found suitable for construction. During the last war only long faultless spars were wanted and it was pointed out they could not be had in India from either spruce or fir. But since short length are coming to be used Indian timbers of the right quality are recommended following an investigation by the Civil Aviation Directorate and the Forest Research Institute. Improved methods of lamination and building up have contributed also to the adoption of Indian timber. Laminated wood propellors, of wood other than Andaman padauk made at the Dehra Dun Institute have been reported on as satisfactory. The investigation made at the instance of the authorities opens up a new field for Indian timber in wartime. What was said about the unsuitability of Indian wood has to be revised since Indian wood up to aircraft quality has been found to possess the strength and weight of Sitka spruce.

Coal for War Work

Increased allotment of wagons for coal loading in the Bengal and Bihar fields has not given adequate relief. In August despite an increase of over 10,000 wagons there were murmurs against delays. A new procedure has since been evolved to meet the claims of industries engaged on war work. A recommendation from the Chief Mining Engineer secures priority for applications for coal wagons. This may be found possible as the railways have indicated that some priority procedure would be necessary in the busy season. Part of the difficulty referred to by the Bengal Chamber not long ago springs from the fact that the railways have had to use more coal and consequently more wagons for their own purposes owing to the heavy traffic and have only lately found time to build up stocks of coal. The winter may witness an increase in demand for coal accompanied by an increase in despatches too for individual consumers.

Empire Orders for Tea

Empire Governments have of late became large buyers of Indian tea. Orders have been placed naturally through the Eastern Group Supply Council. South Africa is said to have ordered 450,000 lbs. Previous orders received from Australia one for 543,200 lbs. and another for 735,890 lbs. have been completed. A further order for 1,363,600 lbs. has an increase according to the September trade returns and the additional 10 per cent permitted in regard to exports of tea should lead to an increase in shipments in the future, apart from the certainty of large orders from Empire Countries. India may also look forward to increased offtake in both the U.S.A. and Canada.

New Market for Coal, Tobacco etc.

The Trade Commissioner at Alexandria states in his most recent report that Indian coal has appeared in the market despite difficulties anticipated when the question of import arose. Indian coal is likely to find markets west of Suez while the war is on. Samples of Indian tobacco have been furnished to Egyptian merchants who are showing interest in flue-cured Virginia. Sample bales for factories have been requested so that tobacco manufacturers might make thorough examination.

Egypt has in recent years taken large quantities of timber, but Indian woods have made little headway. It has been suggested that information concerning the properties and uses of Indian timber should be disseminated as Egypt has taken Canadian, Brazilian and even Australian timber. Since Indian timber has found markets in Iraq and Arabia, it should not be hard to find a new market in Egypt. A more pleasing prospect has been opened up for makers of drugs and chemicals. Indian pharmaceutical preparations have appeared, and the prevailing shortage indicates that they will sell well. The Trade Commissioner stresses the advantage of securing a good name for Indian products now that government and importers are ready to take their requirements from India.

(*Continued from page 986*)

vacant, he chose a distinguished Indian official of the Indian Accounts and Audit Service, Mr. T. S. Sankara Iyer, who was about to retire. As a result there are now two Indians on the Railway Board. Again when the Chairmanship of the Bombay Port Trust fell vacant he took care to appoint another Indian, Sir Rama Rau. In dealing with the issues raised by the De Souza Report he has shown that he is firm and fair. Still there is little doubt that if the Communications Portfolio is handed over to an Indian Member in the forthcoming changes it will serve to meet at least one big complaint against the expansion scheme—viz. that the key portfolios are all in the hands of European officials.

* * *

It is understood that very soon the Viceroy's Council will take up the question of additional taxation proposals in the next Budget. The Standing Finance Committee for Railways is meeting in New Delhi on the 15th December to consider the preliminary figures for the Railway Budget. The rapid rise in Railway earnings has surpassed all expectations. During the first days of November alone the increase as compared with the previous year is nearly Rs. 3|4 crore. The first seven months of the year disclosed an increase of nearly Rs. 10 crores over last year's figures. With this huge increase in the earnings, which the Railway Member had not evidently anticipated in his last Budget, it is hardly likely that he will come forward with any further proposals for increasing either rates or fares. On the other hand, number of representations have been made to Railway authorities in the interests of trade and also of the consumer some concessions should now be allowed by Railway authorities. Only this week, representatives of the match industry have been meeting officials of the Government of India to urge the need for some concessions in Railway facilities. It remains to be seen to what extent the Railway Member is prepared to go to meet these claims and assist Indian manufacturers.

There has been a good deal of speculation among Assembly members regarding further taxation proposals. At one time it was rumoured that the Finance Member might think of enhancing the salt tax, but it is now anticipated that the new Indian Members of Government will try to avoid an unpopular measure like this for raising more money in view of the fact that the Congress party is expected to attend the next session and take part in the proccedings. It is suggested that the Government will probably propose a further increase in the Exces Profits Tax—say to 75 per cent. In this connection there has been a good deal of complaint from the representatives of the business community in the two Houses regarding the delay in assessment and collection. According to them a sum of nearly Rs. 20 crores is outstanding (covering not only the last year but the two previous years) owing to the delay in making assessments. This figure may be exaggerated, but there is some force in the argument that if the Income Tax and Excess Profits Tax authorities speed up their procedure and collect all the outstanding dues there will be no necessity for imposing additional taxation. The fact is that the revenue position generally is favourable, but the rapid increase in Defence charges cannot be overlooked by the Finance Member in framing his Budget proposals for the coming year. At present Defence charges come to about Rs. 25 lakhs per day, but it may even be double this amount next year if the war spreads nearer to India.

Hill-Bird.

CALCUTTA AND DISTRICT

NATIONAL DEFENCE AND SAVINGS WEEK

NOV 29 TO DEC 6

TICKETS. Booking Plans and Programmes of Events at WHITEAWAYS and HEADWARDS—for details see announcement in Personal Column on the front page to-day.

Everyday except Friday there will be Tank Demonstrations on the maidan, south of the C. F. C. ground, at 5-0 p.m. Tanks will be seen traversing over obstacles, etc.

MOUNTED DISPLAY, Sunday 10-30 a.m. on the Brigade Parade Ground Something never before seen in Calcutta! Come and see the unusual sight of Horses and Motor cycles combining in Figure Rides, jumping bush fences and going over moving jumps! Many other thrills including the Governor's Bodyguard demonstrating a Musical Ride with jumping and a full charge.

PHYSICAL TRAINING AND GYMNASTIC DISPLAY, Monday 3-0 p.m. Mohammedan Sporting Ground; among other amazing sights you will see the grand spectacle of 1,400 Indian School Boys performing Drill at one time! A British Military Regiment will demonstrate Arms Drill (with rifles) to the full accompaniment of Drums and Military Bands. hand to hand fighting also will be shown, etc.

FIREWORKS DISPLAY—on the Brigade Parade Ground on Tuesday at 7-0 p.m. The Latest thrills in Set Pieces which are truly wonderful and every other conceivable display with thousands of Fireworks, will be preceded by a Military Band Concert from 6 to 7 p.m.

MILITARY PAGEANT, Fort William, on Wednesday, Thursday and Friday. A full pageant, with model villages—village life in 1805 and in 1941; parades of costumes through the ages—featured in a most unusual way—a surprising spectacle indeed as the figures come through the Red Flames of Light! Full Bands, Bugles, Fifes and Drums.

AERIAL DISPLAY on the Brigade Parade Ground, Friday at 3-0 p.m. See a village bombed by the Indian Air Force; A. R. P., Fire Brigade, St; John's Ambulance, etc., in full action. Anti-Aircraft Guns and Heavy Machine Guns and Rifle-firing throughout the entire display. H. E. the Governor of Bengal and the Premier will introduce H. E. General Sir Archibald Wavell, the Commander-in-Chief, who will speak to the Assembly at 5-25 p.m.

Call at the Information Bureau, 14, Old Court House Street, for advice and help. No obligation!

SAVE FOR YOUR PROTECTION!

PROGRAMME OF EVENTS

7—8 p.m. MILITARY PAGEANT within Fort William Seats Rs. 5, Re. 1

Jute and Jute Manufactures

(By our Correspondent)

Calcutta, 27th November.

It has now been officially announced that the Bengal Government has decided to regulate the 1942-43 Jute Crop to two-thirds of the recorded 1940 acreage. That is just twice the acreage licensed this year. The "recorded" acreage of 1940 was 49.4 lakhs of acres, though this figure was much in excess of that estimated by the Director of Agriculture and was generally considered by the trade to be an inflated figure. But if this is the basis on which the licensing is to proceed it will appear that something over 33 lakhs of acres will be licensed. On the old fashioned calculation of 3 bales per acre (which incidentally was often as near or nearer to the truth than much more scientific calculations), this acreage in a normal year would yield just on a crore of bales. We pointed out last week that Mills up to 30th June, 1942, would consume 75 lakhs of bales, that is, they would absorb the whole of the current crop plus an appreciable portion of the carry-over from last year. It is difficult to put a figure on what quantity will be exported, but with shipping prospects fairly good and Dundee very short of jute, the export figure may yet prove to be considerable. It is pretty obvious therefore that by 30th June, 1942, there will be very little jute to spare. Any carry-over looks like being in Mill godowns—what is left over from what they carried into this season. The present prospects of Mills working are that they will at least commence next season still working 60 hours per week. And there is no justification for presuming that they will not continue at that level. Sixty-hour working means that Mills will require at least 80 lakhs of bales for season 1942-43. That would leave only 20 lakhs of bales for export and contingencies, an uncomfortably narrow margin. One of the contingencies is that Mills might be called upon to produce even larger quantities of goods than 60 hour working will provide. Another is unfavourable weather either at sowing time or during the growth of the crop. Unfavourable weather conditions have before now reduced a crop by 25 per cent. It consequently appears that the Bengal Government in budgetting for a crop of not more than crore of bales is taking a grave risk. The industry generally were in favour of three-fourths of the 1940 acreage being permitted, and this would at least leave some margin of safety. If the Government fears that an excess of jute might depress prices to the detriment of the cultivators, surely some bargain could have been made with the Mills in the nature of a minimum price level as a *quid pro quo* for a larger licensed acreage. But no suggestion that this has even been discussed has reached the market-place.

There have been various rumours current, with what foundation it is impossible to say. One was that all holdings of not more than ten bighas would be free from sowing restriction. As a 10 bigha minimum would, to the best of our belief, cover the major portion of the jute acreage of Bengal, it is doubtful if there is any truth in this. Another rumour was that the "recorded" acreage was to be revised to 52 lakhs of acres.

A piquant situation has arisen over the application of the Raw Jute Taxation Act. When the Bill was under discussion in the Assembly, the leader of the European Group (who was also the Chairman of the Jute Mills Association) speaking on behalf of the Mills as the largest buyers of jute and also on behalf of Jute Shippers, accepted the principle of the Bill and said there would be no opposition to it from his Group. Incidentally, no other jute interests except those mentioned above, seem to have been consulted in the matter at all. It is quite possible that it was on the strength of this acceptance, that the Minister in charge of the Bill subsequently assured the House that the onus of this taxation would *not* fall on the cultivator. Now that the Act has come into force, the Mills inform their suppliers that they propose to collect the tax by deducting two annas per maund from sellers' invoices, and that the standard form of contract is being altered to cover this levy. Such ready acquiescence in the principle of the Tax ought at the time to have aroused suspicion, as altruism has never been the Mills' most outstanding characteristic. It would now appear that the idea of passing on the tax was already in the mind of the spokesman while he posed as the guardian of the interests of the cultivator. Whether the Minister in charge will be embarrassed by this discarding of the poshteen, remains to be seen, but it will be surprising if the matter is not heard of again in the session now commencing. The position now is that the Seller to the Mill will endeavour to cover himself by adding two annas to his selling price. If he fails to secure this two annas, he will most certainly endeavour to pass it back through his fariahs and beparies upcountry to the cultivator. So in the last resort the raiyat is likely to pay for any benefit he may derive from Jute Regulation schemes.

The Export Jute market has been dull and featureless, prices merely fluctuating nominally to match Fatka. Even with Mills there has been little trade in pucca bales beyond some few lots of Dundee Daisee at from Rs. 65 to Rs. 66-8, and of Outport Tossa Fours at Rs. 51. Fatka movements have been within narrow limits. Rs. 69-8 was touched at the end of the week since when the quotation has run between Rs. 68-8 and Rs. 67. The Far Eastern situation brought the rate down to Rs. 66-10 but at the close the quotation is again around Rs. 67.

The turnover in Loose Jute has not been large and has been confined mainly to Tossa of which Mills have bought Indian District at Rs. 13-8 to Rs. 13-12 for Mids and at Rs. 10-8 to Rs. 10-12 for Bots. Jat Tossa Bats. also sold at Rs. 11 and Rs. 11-4. Balers bought Tossa Tops at Rs. 21 Jat and Rs. 19 District, also Jat Tossa Mids at Rs. 17 and Rs. 17-8. European packing sold at Rs. 15 and Rs. 11 Mids and Bots. in low assortment while higher rates are quoted for high assortment. Bots alone could be got at a considerable discount. Old Crop X Bots fetched Rs. 7-8. Imports into mofussil centres are restricted and the yield is steadily deteriorating, Top quality now becoming very scarce.

The Fabrics market has not been active though prices are well maintained. Covering still goes on for near hessian, the December rate for elevens having moved from Rs. 25-12 to Rs. 26 and back to Rs. 25-10. Some forward sales, mainly to the Bazar, were recorded at Rs. 24 January-March, Rs. 22-8 and Rs. 22-10 April-June and Rs. 21-8 July-September. Nine porters were rather neglected. In Heavy Goods also the usual near covering has been going on at market rates and some forward sales were reported.

JUTE

Calcutta, Nov. 27.

The decision of the Government of Bengal to increase the acreage to two-thirds of the area in 1940 registered under the Bengal Jute Regulation Act and the worsening of the Far Eastern situation have naturally had a discouraging effect on the markets and the quotation in to-day's session is at the lowest levels for the week. The decision of the Government of Bengal to double the area under the crop for the next season has not come as a complete surprise to the market as it was generally expected that with the high rate of working by jute mills and the necessity to keep reserve of raw material, there would be an increase in the area to at least eight annas of the 1939-40 area. The decision has come about earlier than was expected and the earlier reports also have been confirmed.

Mills have been buying loose jute in fair quantities. Indian District Tossa and Bottom were done at Rs. 10-8 to Rs. 11 according to districts and Indian Jat Tossa Bottoms at Rs. 11-4 per maund. There were buyers of Indian jat Tossa Midles at Rs. 17 per maund.

Not much business has been done in the pucca bales section and quotations as such have been fluctuating in sympathy with the futures market. Mills did some business in Outport Tossa 4's at Rs. 51 per bale.

The jute futures market was inclined to be firmer earlier in the week and a quotation as high as Rs. 69-8 was touched. There has since been a decline to Rs. 66-8 today on account of the reasons mentioned above.

JUTE MANUFACTURES

Calcutta, Nov. 27.

The jute manufactures market has been easier throughout the week in the absence of any fresh buying interest. Shipments also have not been quite satisfactory. Speculative activity has been on the low side. Quotations as such were fluctuating in narrow limits till Wednesday. The decline in the jute market on Thursday caused a decline in prices for hessian also. The reports regarding the seriousness of the Far Eastern situation have had a discouraging influence on Thursday. Closing quotations are at the lowest levels for the week. 9 porters ready are quoting Rs. 21-8, December Rs. 21. January|March Rs. 19-8 and April|June Rs. 18-4. 11 porters ready are Rs. 26. December Rs. 25-8, January|March Rs. 23-12 and April|June Rs. 22-4.

In the heavy goods section, B Twills for November shipment sold on the basis of Rs. 38, Heavy Cees Rs. 37, Liverpool Twills Rs. 44-12, A Twills Rs. 46-8 and Cornsacks Rs. 39.

COTTON

Calcutta, Nov. 27.

The Bombay cotton market was inclined to be firmer in the week in sympathy with the strength of the Bombay Stock Exchange and the strength of the gold market. Also, an optimistic view was taken of the Japanese Ambassador's mission to Washington. But the deterioration in the Far Eastern situation and the breakdown in the U.S. Japanese negotiations have resulted in a decline in values during the last two days. There is no panic, however, and it is yet hoped that a war in the Far East can be averted. There is no change in prices to be recorded in to-day's session. The opening was rather easy but a steadier feeling was noticeable in the afternoon. Broach April|May were quoting Rs. 237-4, Oomra Dec.|Jan. Rs. 197-8, March Rs. 188-8, Bengal December|January Rs. 142 and March Rs. 145. The quotations at the time of last writing were Rs. 238-8, Rs. 202, Rs. 194, Rs. 143 and Rs. 147-8 respectively.

In the New York market, rather quiet conditions have been noticeable. The anxiety regarding the political situation and the lull in textile business have had a restraining influence. December were quoting 15.95 cents and March 16.27 cents against 16.10 cents and 16.34 cents.

GOLD

Calcutta, Nov. 27.

There has been a sudden rise in prices in the Bombay gold market during the past two days. The concern regarding the political situation has resulted in a sudden rise in prices. There has been good buying of ready gold and sovereigns especially. Gold ready are quoting Rs. 44-10, First settlement Rs. 44-9-6 and Second settlement Rs. 44-7-6 against Rs. 43-11-6, 43-11 and 43-10-6 respectively at the end of last week. It is noteworthy that the discount for second settlement has widened.

The London price has remained unchanged at 168s.

SILVER

Calcutta, Nov. 27.

There is no appreciable change in prices in the silver market on the other hand and prices are only slightly higher on balance Indian Mint Silver ready were quoting Rs. 63-0-6, First settlement Rs. 62-15-6 and Second settlement Rs. 62-15. There has not been any appreciable increase in buying.

The London market has been dull and featureless and the quotation for spot and forward is unchanged at 23½d.

WHEAT

Calcutta, Nov. 27.

The Karachi wheat market has been rather irregular during the past week. There has been some selling at the higher levels. During the last two days a firmer tendency has been noticeable and the quotations are only slightly lower on balance. Choice White ready were Rs. 44, January Rs. 44, and July Rs. 37-13. The quotations at the end of last week were Rs. 44-6-6, Rs. 44 and Rs. 37-6.

In the Calcutta market also easier conditions have been noticeable. On speculative buying there has been some selling at the higher levels. The quotation for May position came down to Rs. 5-3-3 but there has since been a rise to Rs. 5-4.

HUKUMCHAND JUTE PAYS ARREARS OF DIVIDENDS

STOCK exchanges, both in Calcutta and Bombay, were inclined to be firm earlier in the week. Business was on quite a substantial scale in both centres and even with the Far Eastern situation the upward movement was not checked. In mid-week, however, there was some profit-taking and the reports regarding the breakdown of the U. S.-Japanese negotiations caused some selling in the early hours of Wednesday's session. There was no panic, however, and the market still seems to be inclined to the view that a clash in the Far East can yet be averted. There is a general air of expectancy in all sections.

Among the outstanding features of the week are the rises in price for Cotton Textiles, Indian Galvanzings and Dunlop Rubbers. The improvement in the quotation from Rs. 46 to Rs. 54 was quite unexpected. There were no sellers and only after the rapid advance in prices there has been a slight recession. The sudden rise in prices is not quite explainable. Perhaps the company has been successful in its representation to the Board of Referees in getting a higher standard of profit.

* * * *

It was rather surprising to learn earlier in the week that the *Hukumchand Jute Mills Limited* was to pay arrears of dividend on the preference shares. For, it was never expected that it would be possible for the company to pay any arrears of dividend unless the debit balance was completely wiped off and the balance sheet position became more healthy. It was on account of these reasons that there were frequently rumours regarding the possibility of a capital reconstruction scheme.

The accounts for the half-year ended September, 1941 reveal that the company has been able to report an improvement in earnings, the net profit before providing for depreciation and taxation, being Rs. 11,94,224. The provision for taxation is Rs. 4 lakhs while the amount set aside to depreciation is Rs. 3.5 lakhs. The sum of Rs. 50,000 has been written off Debenture issue expenses. The debit balance carried forward is lower at Rs. 16,24,905 against Rs. 17,89,129 bought in.

Having regard to the performance of the other companies the earnings figures of Hukumchand Jute cannot be considered quite satisfactory. With a smaller number of looms the Howrah Mills Company Ltd. has been able to earn a profit of Rs. 27.26 lakhs against Rs. 12.24 lakhs by the Hukumchand which has a greater number of loomage in respect of both hessian and sacking. With nearly half the number of looms Kinnison has been able to earn higher profits.

The action of the directors in recommending the payment of arrears of dividends is perhaps a prelude to the announcement of some capital reconstruction scheme for otherwise with the possibility of a further increase in taxation it cannot be expected that it will be possible to wipe of the debit balance at an early date.

On account of the reduction in the stocks of jute the balance sheet presents a more neat appearance.

* * * *

The results of the Bird and Heilgers group of companies for the half-year ended September, 1941 after the announcement regarding the bonus issue by some of the companies in the group have gained more than ordinary significance. The results, now available, justify fully the action of the directors.

The aggregate profit for the groups for the half-year, before providing for depreciation and taxation, is Rs. 96,27,798 against Rs. 36,33,103 for the previous half-year. The earnings are thus nearly thrice those for the half-year ended March, 1941. As in the case of other companies most of the increase in profits is taken up by the increase in the provision for taxation, the total provision being Rs. 64,50,401 against Rs. 13,41,011. The amount set aside to depreciation is actually lower at Rs. 6,93,520 (Rs.8,55,857) while the allocation to other funds show an increase of nearly Rs. 5 lakhs at Rs. 6,71,868. The increase in the amount paid to ordinary shareholders by way of higher dividends is only about Rs. 2.5 lakhs, the total amount being Rs. 11,54,000 against Rs. 9,05,000.

* * * *

Outstanding among the results of the groups are those of Kinnison and Union Jute Companies.

The net profit before providing for depreciation and taxation of the *Kinnison Jute Mills Company, Limited,* is Rs. 14,82,207 against Rs. 4,21,924 for the previous six months. The provision for taxation is Rs. 9,64,441 against Rs. 1,30,767 for the previous six months while the amount set aside to depreciation is Rs. 65,266 (Rs. 67,898). There is a transfer of Rs. 50,000 to Welfare Reserve and Rs. 1,00,000 to General Reserve. The ordinary dividend is Rs. 16 per share against Rs. 12-8 per share.

* * * *

The net profit of the *Union Jute Company, Limited* for the same period is Rs. 13,54,314 against Rs. 6,30,540 for the previous half-year. The provision for taxation is substantially higher at Rs. 9,43,004 (Rs. 3,05,786) while the amount set aside to depreciation is Rs. 77,734 (Rs. 86,207). The sum of Rs. 1 lakh, the same as previously, is transferred to General Reserve while there is an allocation of Rs. 50,000 to the Welfare Reserve in addition.

The ordinary dividend is considerably higher at Rs. 15 per share against Rs. 10 per share.

* * * *

The Champdany Jute Company, Limited has done well. The net profit, before providing for taxation and depreciation, is Rs. 10,96,142 against Rs. 5,34,231 for the previous half-year. The amount set aside to depreciation is Rs. 5.5 lakhs against only Rs. 50,000. The dividend as such is only slightly higher at Rs. 6 per share against Rs. 5 per share.

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, Nov. 28.

THE Calcutta Stock Exchange was inclined to be firm for the most part of the week and new high levels were touched earlier in the week. The encouraging earnings reports and the bright outlook for cotton textile shares have resulted in an increase in the volume of turnover. At the higher levels there was some selling and prices were slightly lower and the news regarding the breakdown in the U. S. Japanese negotiations on Wednesday was expected to have a discouraging effect on all markets. As a matter of fact there was some initial selling on Wednesday but in the absence of any fresh developments prices have slightly recovered. In to-day's session slightly steadier conditions are noticeable. It is generally expected that the war in the Far East can yet be avoided. The future of stock exchange values is mainly dependent on Japan's next move. Operators and investors alike are awaiting further developments.

In the giltedged securities section steady conditions have been noticeable in spite of the further increase in the Treasury bills rate to thirteen annas ten pies per cent from thirteen annas per cent per annum last week. 3½ per cent. Paper has remained unchanged at Rs. 96 with 3 per cent. Paper at Rs. 82-12. Among terminable loans, 2¾ per cent. 1948|52 were done at Rs. 97-14, 4 per cent. 1960|70 at Rs. 111-2, 4½ per cent 1955|60 at Rs. 114-13 and 5 per cent. 1945|55 at Rs. 111. 3 per cent. Second Defence Loan were done at Rs. 99-11.

Among fixed interest securities not much business has been passing owing to the scarcity of sellers. On reports that there would be a payment of the arrears of dividend for at least two half-years there has been a rise in the quotation for *Hukumchand* preferences to Rs. 165. Such an early payment of the arrears of dividend was never expected by the market. *Hastings* were done at Rs. 151, *Rameshwara* at Rs. 14-14, *Howrah* 'A' preferences at Rs. 174, *Kanknarrah* at Rs. 157-8 and *Lothian* at Rs. 174. Among others, *New Victoria* preferences have been frequently dealt in at Rs. 7-15. *B. I. Corporation* preferences changed hands at Rs. 184-8, *Rohtas Industries* at Rs. 170 and *Dunlop Rubber* First preferences at Rs. 158. No business has been possible in public bodies debentures. 3¼ per cent *Howrah Bridge* debentures were done at Rs. 100-5. Among industrial debentures, *Dalmia Cement* debentures were done at Rs. 105 and *Titaghur Paper* 4¼ per cent. debentures at Rs. 101.

Cotton shares have been in the lime light during the past few days. There has been a strong rise in the quotation for *Basanti* and *Kesoram*. From Rs. 5 earlier in the week *Basanti* are now quoting Rs. 8. *Dunbar* were done at Rs. 294. *Elgin* have no sellers at Rs. 33. *Cawnpore Textiles* have been steady around Rs. 10-2 with *New Victoria* at Rs. 5-5.

Coal shares also are firmer on the satisfactory tender results. There has also been increased demand and the rise in prices for coal in recent weeks has been more than seasonal. *Bengal* were done at Rs. 409-8, *Burrakur* at Rs. 14-12, *Equitable* at Rs. 40, *Rewa* at Rs. 26-8 ex-dividend and *West Jamuria* at Rs. 33-6.

Jute shares have not been quite firm and a slight decline in values is to be recorded. Only there has been an abrupt rise in prices for *Hukumchand* on the reports that there is to be a dividend on the preference shares. It now appears from the balance-sheet that it will be a long time before any dividend on the ordinary shares will be paid as there is still a debit of over Rs. 16 lakhs in the profit and loss account. *Anglo-India* were done at Rs. 399, *Champdany* at Rs. 207, *Gourepore* at Rs. 772, *Megna* at Rs. 69-8, *Nuddea* at Rs. 70 and *Reliance* at Rs. 66.

In the Engineering section, *Indian Iron* and *Steel Corporation* were at one time done as high as Rs. 37-2 and Rs. 22-10 respectively. Profit-taking at the higher levels and the anxiety regarding the Far Eastern situation resulted in a setback in the quotations to Rs. 35-10 and Rs. 21-15 respectively. There has since been a recovery to Rs. 36-4 and Rs. 22-4. The undertone is steady. *Braithwaite* are quoting Rs. 10-10, *Bhartia Steel* Rs. 17-10, *Kumardhubi Engineering* Rs. 7 and *National Iron and Steel* Rs. 13-10. In anticipation of a higher dividend there has been a good rise in the quotation for *Indian Galvanizing* to Rs. 35.

Sugar shares have continued firm with the reports that there would be export of Indian sugar. *Champarun* are further higher at Rs. 23 with *Buland* and *Raza* at Rs. 27-12 and Rs. 28-12 cum-dividend respectively. *Ramnugger Cane and Sugar* are more than a point higher at Rs. 12-2 while *Carew & Co.* were done at Rs. 13-7, *Samastipore* at Rs. 12-4 and *New Savan* at Rs. 14-4.

There has been a longer list of transactions in Tea shares and a good rise in prices is to be recorded. *Hasimara* were done at Rs. 49-8, *Hattikhira* at Rs. 25-4, *Bishnauth* at Rs. 31-8, *Sonai River* at Rs. 22-4 and *Tezpore* at Rs. 9-6.

In the miscellaneous section, the rise in *Burma Corporation* to Rs. 5 has not been well held and the quotation is now around Rs. 4-10. *Indian Copper Corporation* were done at Rs. 2-7 after being higher at Rs. 2-11. *B. I. Corporation* have been very firm in sympathy with the Cotton section and are nearly a point higher at Rs. 5-14. *Indian Wood Products* have been in good request with the quotation marked higher at Rs. 31-12. There has been a sensational rise in *Dunlop Rubber* to Rs. 54. The quotation at the time of last writing was only Rs. 46-2. At the higher levels there has been some profit-taking and the quotation is now around Rs. 52. Paper shares were very firm in anticipation of good dividends by all companies. *Titaghur Paper* were done as high as Rs. 25. The quotation is now around Rs. 23-14. *India Paper Pulp* are now quoting Rs. 180, *Shree Gopal Paper* Rs. 18, *Orient Paper* Rs. 19-13, *Mysore Paper* Rs. 19-6 and *Star Paper* Rs. 17-6. Among others, *Borooah Timber* were done at Rs. 19-6 and *Midnapore Zemindary* at Rs. 77.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, Nov. 27.

Money.—Money continues to be easy, the rate for call money being quoted at ¼ per cent (lenders).

Securities.—The securities market was devoid of any interest and prices in all cases remained practically stagnant at their last week's levels. 3½ per cent Paper ruled steady at Rs. 96. 1948|52 were unchanged at Rs. 98; 1951|54 at Rs. 99-12; 1963|65 at Rs. 95; 1947|50 at Rs. 103-4; 1960|70 at Rs. 111; 1955|60 at Rs. 114-13; 1945|55 at Rs. 110-13 and 1946 *Defence Bonds* at Rs. 102.

Shares.—Compared with the last week, activity in the local share market during the week was somewhat on a reduced scale. The announcement of the capture of Sidi Omar and Bardia by the British troops and the continued resistance by the Russians on the Moscow front were responsible for the bullish feeling in the early part of the week. Prices advanced on persistent buying on both Monday and Tuesday. But, on Wednesday, prices suffered a slight setback owing to the paucity of buyers. Today prices opened lower owing to the reports that U. S. and Japan have failed to find a formula for a peaceful settlement of their differences. At lower levels, however, buyers appeared and prices improved, the closing levels to-day being the highest for the week.

Textiles.—In cotton mill shares there was an all round appreciation in rates. Rumours about the possibility of a general strike in Ahmedabad, a desire among the operators to take their profits and low cotton prices caused a slight decline in mid-week. At the close of the week, however, support was forthcoming and prices were pushed up. *Bombay Dyeing*, after touching a high of Rs. 1,462-8, fell back to Rs. 1,451-4, but again closed at Rs. 1,462-8 as against Rs. 1,450 in the previous week. *Gokak* were prominent and, due to paucity of sellers, moved up to Rs. 352 from Rs. 315. *Svadeshi* were done higher at Rs. 558; *Century* at Rs. 515; *Central India* at Rs. 486; *Colaba* at Rs. 266-8; *Kohinoor* at Rs. 613; *New Great* at Rs. 386 and *Simplex* at Rs. 232. In the Cash list, *Sholapoor* met with good demand, being done higher at Rs. 7,250. *E. D. Sassoon* Defd. were marked higher at Rs. 3-11; *Indore Malwa* at Rs. 302; *Khatau Makanji* at Rs. 345 and *Luxmi Cotton* at Rs. 802-8.

Hydro-electrics.—In this group, *Tata Power* were in better demand around Rs. 1,830, while *Andhra Valley* were done slightly lower at Rs. 1,755. *Tata Hydro* were dull at Rs. 190.

Steels.—Steel shares moved in sympathy with mill shares. *Tata* ordinaries opened slightly higher at Rs. 428 and deferreds at Rs. 2,307-8. Despite profit-taking in mid-week the shares improved at the close on good support, the ordinaries finally closing at Rs. 432 and the deferreds at Rs. 2,330 as compared with Rs. 427 and Rs. 2,310 respectively in the previous week.

Banks & Insurance.—*Bank of Baroda* were steady at Rs. 118-8; *Bank of India* at Rs. 150; *Imperial Bank* fully paids at Rs. 1,630; contributories at Rs. 406-4 and *Reserve Bank* at Rs. 114.

In the Insurance section, *New India Assurance* improved from Rs. 59-8 to Rs. 60-2.

Miscellaneous.—*Associated Cement* were very steady at Rs. 180 on rumours of an increase in the price of cement. *Bombay-Burmah Trading*, despite the break in the negotiations between U.S.A. and Japan, met with good buying and the shares have shot up to Rs. 610. Though the *Belapur Company, Limited* has, it is reported, declared a lower dividend share prices have been well held on the rumours of better working in the current year. The quotation was higher at Rs. 292 against Rs. 271 in the previous week and Rs. 253-8 a fortnight ago. The dividend, when declared, is payable on or after the 19th January, 1942. *Alcock Ashdown* changed hands at Rs. 687-8; *Indian Iron* at Rs. 36-2; *Steel Corporation* at Rs. 22-1 and *Premier Construction* at Rs. 137-8. *Shivrajpur Syndicate* were slightly higher at Rs. 54, while *Tata Oil* were a shade easier at Rs. 69. *Tata Chemicals* and *Wimco* showed no changes, the closing levels being Rs. 19-9 and Rs. 226-14 respectively.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, Nov. 28.

The local market continued steady during the week under report. Despite profit-taking most of the mill shares were well absorbed. Planting issues and Sugar shares were in good demand.

Securities.—The securities market continued to be dull and featureless with 3½ per cent Paper quoting at Rs. 96-3 per cent 1963|65 met with business at Rs. 95-1 and 4 per cent 1960|70 at Rs. 111-5. State Loans were difficult to obtain, 3 per cent 1956|61 *Mysore Loan* changing hands at Rs. 105-9. 3½ per cent *Travancore Loan* were in enquiry at Rs. 105-2.

Mills.—Buying in this section was selective during the week. *Buckingham & Carnatic* met with some profit-taking with the result the price has declined from Rs. 320 to Rs. 312. Similarly, *Cambodia* were marked down at Rs. 15 and *Madura* at Rs. 53-12. *Coimbatore Spinning* were done at Rs. 143; *Janardhana* at 87; *Ranga Vilas* at Rs. 105 and *Palni Andavar* at Rs. 93-8. *Radhakrishna* were an active market and a steady rise in price from Rs. 274 to Rs. 300 was witnessed during the week. Among Bombay shares, *E.D.S.U.* deferreds came in for business at Rs. 3-6-6; *Indian Bleaching* at Rs. 236-4 December, and *Century* at Rs. 505 December.

Utilities.—Very little business was practicable in this section. *Gudivada Electric* had buyers at Rs. 89-8 c.d.; *Nellore Power* at Rs. 7-12 and *West Ramnad* at Rs. 8-9. *South Madras Electric* were in good enquiry with very little scrip on offer.

Plantations.—Planting issues registered a good improvement, both in values and in turnover. *Tropical Plantations* were placed at Rs. 26-14; *Kalpetta* at Rs. 28-4; *Udayagiri* at Rs. 10-4; *Velliamuttam* at Rs. 26-4; *Midland* at Rs. 10-2; *Rajagiri* at Rs. 10-6 and *Cochin Malabar* at Rs. 9-10. In the Tea section, *Chembra Peak* continued to be a popular counter, being done at Rs. 6-4. *Nilgiri Neerugundi* had buyers at Rs. 3 and *Devashola* at Rs. 10-4.

Sugars.—Sugar Shares had a fair turnover. *Deccan Sugar* small shares were done at Rs. 63; *Travancore Sugars* were in good enquiry at Rs. 17-10. Among Calcutta shares, *Balrampore* were transacted at Rs. 13-10; *Purtabpore* at Rs. 13-8 and *New Savan* at Rs. 14-12.

Miscellaneous.—Mysore Paper were in good request during the week and the price has advanced from Rs. 18 to Rs. 19-4 following the directors' proposal to declare a dividend at the ensuing meeting to be held on the 20th December, 1941. *Mettur Chemicals* were done at Rs. 17-4; *Mysore Match* at Rs. 9-8 and *Mysore Tobaccos* at Rs. 12-8. *Andhra Cement*, after being done higher at Rs. 100, closed a shade easier at Rs. 98. *Indian Steel Rolling Mills* ordinaries were better at Rs. 8-11. *Brunton Engineering* found ready buyers up to Rs. 11-4.

LONDON STOCK EXCHANGE

The London Stock Exchange was firmer earlier in the week on the favourable reports regarding the British offensive in Libya. Giltedged securities also showed a tendency to improve but in mid-week there has been some selling though quotations are still higher on balance. 2½ per cent. Consols were 82 5|16, 3½ per cent. Conversion 106½, 3½ per cent. War Loan 104 9|16 and 3 per cent. War Loan 101 3|8. 3½ per cent. India Sterling Paper were 99 3|8.

Among other sections, Tea shares were firmer while Rubber issues were not affected by the tension in the Far Eastern situation. Kaffirs were well held while Industrials were considerably higher. Oils were favourably affected by the publication of the *Anglo-Iranian* report. *Mexican Eagles* continued firm. Home Rails were easier.

NEW YORK STOCK EXCHANGE

Wall Street has been irregular during the past week and the slight improvement in prices noticeable earlier in the week has not been held. There is considerable anxiety regarding the progress of the U.S.-Japanese negotiations. Otherwise, the settlement of the coal dispute should have had an encouraging effect on the market. *U. S. Steel* were $51½; *Anaconda Copper* $26¾ and *General Motors* $26½.

HUKUMCHAND JUTE MILLS, LTD.

NOTICE

is hereby given that the Forty-fourth half-yearly General Meeting of the Shareholders will be held at the Registered Office of the Company, 4, Clive Ghat Street, Calcutta, on Tuesday, the 16th December, 1941, at 4-30 p.m. for the following purposes:—

(Half-yearly meeting, 16th December, 1941 at 11-30 a.m.)

Audited accounts for the half-year ended 30th September, 1941:—

	Rs.	A..P.
After providing Rs. 1,92,981-12-8 for Depreciation on Block and Rs. 5,50,000 for Taxation, the accounts show a profit of ..	3,52,160	8 11
Add balance brought forward from last half-year	63,531	14 6
or an amount available of	4,15,692	7 5
which the directors recommend should be dealt with as follows:—		
Payment of Dividend of Rs. 6 per share ..	3,54,984	0 0
Leaving a balance to be carried forward of ..	60,708	7 5

Working Hours.—During the half-year the Mills worked 45 hours per week till the end of August and thereafter 50 hours per week. Since then, however, in view of additional Government orders and having regard to the improved shipping position to the U.S.A., the hours of work were increased on 13th October to 54 per week and subsequently to 60 from the week commencing 3rd November.

Jute.—The Company continues to maintain an adequate supply of raw material at an average price which compares favourably with current markt rates.

Manufactured Goods.—Prices have continued to show a steady increase and have now reached what may be regarded as being unduly high levels. Drastic restriction of this season's jute crop, which has encouraged speculation both in gunnies and the raw material, is primarily responsible for the rise. The previous shortage of shipping space to the U.S.A. appears for the moment to have been overcome and, on the whole, stocks of goods held by the mills are lower than for some time. *Immediate prospects are favourable*, but the position is largely controlled by any developments which may take place in the international situation, and, until the existing tension in the Far East ceases, *future prospects of the indusry must continue to be uncertain.*

Managing Agents.—Messrs. James Finlay & Co., Ltd.

Authorised Capital—Rs. 60,00,000 *in* 60,000 *shares of Rs.* 100 *each. Issued and Subscribed—Rs.* 59.16,400 *in* 59,164 *shares, fully paid up.*

BIRDS INVESTMENTS LIMITED

Audited accounts for the year ended 30th September, 1941:—

After transferring the sum of Rs. 50,000 to Reserve, the Profit and Loss Account shows a credit balance of Rs. 1,76,064-7-8 which includes Rs. 66,645-7-5 brought forward from last year *plus* an amount of Rs. 1,953-2-0 being the Income Tax Surcharge of 1|12th which fell to be deducted from the dividends in addition to the standard rate of 30 pies already provided for.

The directors propose to dispose of the balance at credit of Profit and Loss Account as follows:—

	Rs.	A..P.
In paying a dividend on the Preference Shares at the rate of 5½ per cent. per annum, less Income Tax	87,083	5 4
In paying a dividend on the Ordinary Shares at the rate of 3½ per cent. per annum, less Income Tax	27,708	5 4
In carrying forward	61,272	13 0
Total ..	1,76,064	7 8

Capital Reserve Account.—There is a balance at credit of this account amounting to the sum of Rs. 2,93,632-10-9. The corresponding amount at the credit of this account at 30th September, 1940, was Rs. 2,89,587-6-11. In accordance with Article 76 of the Company's Articles of Association, all capital profits and losses on investments, which have been completely realised, have been carried to the Capital Reserve Account.

Investments.—The Company's portfolio is representative of investments which are quoted on the Calcutta Stock Exchange, with the exception of certain shares costing Rs. 6,49,733-5-9 for which no quotations are available and the shares costing Rs. 2,128-11-1 which are quoted on London Stock Exchange. The market value of the investments for which quotations are available exceeded the book value at 30th September, 1941, by Rs. 6,03,936-1-6. In the opinion of the Directors the value of the investments for which quotations are not available is not less than their cost price.

Secretaries.—Messrs. Lovelock & Lewis.

Authorised Capital—Rs. 1,00,00,000 *in* 5,00,000 *Ordy. of Rs.* 10 *and* 50,000 5½ *per cent Cum. Pref. Rs.* 100 *each. Issued and Subscribed—Rs.* 30,00,000 *in* 2,00,000 *Ordy. of Rs.* 10 *each, Rs.* 5 *per share called up and* 20,000 *Pref., of Rs.* 100 *each, fully paid up.*

*Includes a Bonus of 1¼ per cent.
†Includes a Bonus of 2½ per cent.
‡Subject to the payment of a donation of Rs. 12,500 for the Viceroy's War Purposes Fund.

Audited accounts for the year ended 31st May, 1941:—

The Revenue for the year was Rs. 5,40,108-8-0 and after providing Rs. 7,84,893-4-11 for Excise, and Rs. 1,09,230-2-4 for Depreciation, there remains a balance of Rs. 6,45,985-0-9. The carry forward from last year was Rs. 81,459-11-5 which added to the balance for the current year makes a total of Rs. 7,27,444-12-2 available. From this the directors have set aside the following:—

	Rs.	A.	P.
To Reserve Fund	2,00,000	0	0
To Dividend Equalisation Fund ..	1,00,000	0	0
To Labour Bonus Fund	20,000	0	0
To Employees' Welfare Fund	5,000	0	0
To Cultivators' Welfare Fund	5,000	0	0

leaving Rs. 3,97,444-12-2 out of which the directors recommend a dividend at the rate of 15 per cent per annum *plus* a bonus of 2½ per cent which will absorb Rs. 3,15,000-0-0, leaving a balance of Rs. 82,444-12-2 to be carried forward, out of which the directors recommend a donation of Rs. 12,500-0-0 to the Viceroy's War Purposes Fund.

Crushing operations commenced on 1st December, 1940 and terminated on 1st May, 1941, being 152 days working as against 142 days of last year.The amount of cane crushed was 37 lacs maunds, and the average recovery was 10.115 per cent as against 10.175 per cent in 1939-40. No cane purchases were made under the standard rates laid down by the Governments of the United Provinces and Bihar. In fact the company paid six pies per maund of cane more to local cultivators than was paid in the U. P.

The sugar produced by the Company is of first class quality and has achieved an exceptional reputation in the sugar market.

Managing Agents.—Messrs. Govan Bros. (Rampur) Ltd.

Authorised Capital—Rs. 25,00,000 *in* 2,50,000 *shares of Rs.* 10 *each. Issued, Subscribed and called up—Rs.* 18,00,000 *in* 1,80,000 *shares, fully paid up.*

Kodala:—(24th) 22-4, 22-8, 22-12; (25th) 23-8, 23-12, 24; (26th) 24-12, 25.
Kalacherra:—(24th) 100, 101; (26th) 101-8, 102-8.
Kallinugger and Khoreel:—(24th) 87, 88, 89, 90.
Kornafuli:—(26th) 19-4, 19-6, 20, 20-4.
Kunchunpore:—(25th) 18.
Ledo:—(20th) 232.
Longview:—(21st) 14-4, 14-8, 15, 15-4, 15-8, 15-12.
Loobah:—(20th) 7; (22nd) 7, 7-4, 7-2; (24th) 7-2, 7-6, 7-8; (25th) 7-6, 7-10, 7-14, 8-2, 7-12, 8; (26th) 7-12, 8-4, 8-8.
Margaret's Hope:—(24th) 9-12, 10; (25th) 10-10.
Manabarrie:—(25th) 267, 269.
Moheema:—(22nd) 10-4, 10-8; (24th) 10-4, 10-6, 10-10.
Murphulani:—(20th) 7-4, 7-8; (24th) 7-8, 7-12.
Murphulani (Prefd. Ordy.):—(21st) 11; (26th) 11-4, 11-8.
Naga Hills:—(22nd) 16.
Nagri Farm:—(20th) 24, 24-4; (25th) 24 C.T.
Namburnadi:—(20th) 7-4, 7-6, 7-10; (21st) 7-3, 7-4, 7-8, 7-9; (24th) 7-14, 7-6, 7-8; (25th) 7-12, 8, 8-4, 7-14, 8-2 (7-8 s.o.l.); (26th) 8, 8-2, 8-3, 8-4, 8-8.
New Cinnatolliah:—(25th) 500.
New Samanbagh:—(21st) 31, 31-4, 31-2; (24th) 31-4, 31-8, 31-12; (25th) 31-12.
New Terai:—(20th) 15-2, 14-12, 15, 15-4; (21st) 15-4; (22nd) 15, 15-4; (26th) 15-6, 15-10 c.d.
North Western Cachar:—(21st) 270, 272, 278, 280; (26th) 280, 281-8.
Oodaleah:—(26th) 8-4.
Pashok:—(24th) 16, 16-4.
Patrakola:—(22nd) 1,050, 1,055-8: (24th) 1,070, 1,075-8 o.l., 1,077-8, 1,078.
Patrakola (Pref.):—(25th) 157, 158.
Pathemara:—(24th) 10-15, 11-3; (25th) 10-12 s.l.; (26th) 11-6, 11-10.
Putinbarrie:—(20th) 144, 145.
Pussimbing:—(22nd) 8-14, 9-2; (24th) 8-12, 9, 8-14, 9-2, 9-4.; (25th) 8-12; (26th) 8-12, 9, 9-4 (9-8 C.T.).
Rajabhat:—(26th) 41-8.
Rajgarh:—(20th) 13, 13-4; (26th) 13-12, 14, 14-4.
Rajnagar:—(20th) 9-12, 10, 10-4; (21st) 10-8, 10-5, 10-9, 10-2, 10-6, 10-10, 10; (22nd) 10-4, 10-8; (24th) 10-8, 10-12.
Ranicherra:—(22nd) 14, 14-4; (24th) 14, 14-4, 14-7, 14-8, 14-6, 14-10; (25th) 14-4, 14-8 (15 C.T.).
Roopacherra:—(26th) 10-4, 10-8.
Rutema:—(24th) 13, 13-4; (25th) 13-4, 13-8; (26th) 13, 13-4, 13-8.
Sapoi:—(25th) 12-14, 13-2, 13, 13-4.
Sarugaon:—(20th) 11-9, 11-13, 11-10, 11-14; (21st) 11-7, 11-11, 10-10, 10-14, 12, 12-1; (22nd) 12, 12-4; (24th) 12-2, 12-6.
Singell:—(22nd) 77, 79; (25th) 86, 87.
Tengpani:—(24th) 23, 23-4, 23-2.
Teen Ali:—(21st) 16-9.
Teesta Valley:—(25th) 29-8 C.T.
Teliapara:—(21st) 506.
Teloijan:—(20th) 9-5; (22nd) 9, 9-4, 9-8; (24th) 9-2, 9-6, 9-6, 9-8; (25th) 9-8; (26th) 9-8.
Tezpore:—(21st) 8-14, 9-2, 9-6, 8-12, 9-4, 9-8; (24th) 9, 9-4, 9-8, 9-6, 9-10; (25th) 9-8, 9-12; (26th) 9-7, 9-11, 9-12.
Tongani:—(20th) 7, 7-2.

Tukvar:—(21st) 13-10, 13-14; (24th) 13-12, 14-12, 15; (25th) 14-8; (26th) 14, 15, 15-4.
Tyroon:—(20th) 16-4, 16-8, 16-12.

SUGARS:

Balrampur:—(20th) 12, 12-12, 13, 12-10, 12-13, 13-1, 13-5, 12-15, 13-6, 13-10, 13-4, 13-12, 13-11; (21st) 13, 13-4, 13-2, 13-6, 13-7, 13-9, 13-4, 13-8; (22nd) 13-4, 13-8, 13-10; (24th) 13-2, 13-4, 13-8; (25th) 12-14 s.l., 13-2, 13-6 (13 s.l.), 13-4, 13-8, 13-10; (26th) 13-6, 13-8 (13 s.o.l.), 13-4 o.l., 13-14, 13-12, 14.
Belsund:—(20th) 6, 6-6, 6-7, 6-8, 6-12, 6-13, 6-10, 6-14; (21st) 6-12, 7, 7-2; (24th) 7-4, 7-8; (25th) 7-4, 7-8, 7-6, 7-10.
Bharat Sugar:—(24th) 11-6, 11-10 s.ls.; (25th) 11-13, 12-1, 11-12; (26th) 12.
Buland:—(20th) 27-8; (24th) 27-8; (25th) 27-4, 27-8, 27-12, 27-11, 27-15 c.d.; (26th) 27-6, 27-12.
Carew & Co.:—(20th) 13, 13-4, 12-14; (21st) 13, 13-4, 12-14 (21st s.l.), 13-5; (22nd) 13-2, 13-4, 13-8 (13-6, 13-10 s.ls.); (24th) 13-8, 13-2, 13; (25th) 12-14, 13-2, 13-6; (26th) 13-2, 13-4, 13-6, 13-3, 13-7, 13-11, 13-8, 13-12, 33-14.
Cawnpore:—(20th) 27-4 s.l.; (21st) 26-14; (26th) 27, 27-2.
Champarun:—(20th) 22-4, 22-3, 22-7, 22; (21st) 22-8 s.l., 23-3, 22-2, 22-4; (24th) 22-10, 22-14; (25th) 23-6, 23-10, 23, 23-4, 23-3, 23-8, 23-9; (26th) 23-8, 23-6, 23-10, 23-9 (23-10 o.l.).
Dyer Meakin Brewery:—(21st) 11-2.
New Savan:—(20th) 13-14, 14, 13-12 x.l.; (21st) 14-2, 14-4, 14-3 x.d.; (22nd) 14-8; (24th) 14-6, 14-10, 14-9, 14-11, 14-4.
Purtabpore:—(20th) 11-6, 11-14, 12; (21st) 11-14, 12-2, 12-4, 12-8 (11-8 C.T.) 12-8, 12-12, 12-6, 12-10; (22nd) 12-6, 12-8, 12-12; (24th) 12-10 s.l., 12-14, 12-12, 13, 13-1, 13-4; (25th) 13, 13-4, 13-8, 13-6, 13-9; (26th) 13-8, 13-5, 13-9, 13-13.
Purtubpore (Pref.):—(20th) 21 C.T.
Ramnugger Cane and Sugar:—(20th) 11-1, 10-12, 11-2; (21st) 10-14 (11-2 s.l.), 11, 11-4, 10-15, 11-3, 11-5, 11-8, 11-2, 11-6, 11-10; (22nd) 11-6, 11-9, 11-12, 12-3, 11-14, 12-2, 11-11, 11-13, 12-1; (24th) 11-14, 11-15, 12-3, 11-13, 12, 12-4, 10-2, 12-6, 2-8; (25th) 11-13, 12-1 (11-8 s.l.), 11-14, 12-2, 11-12, 12 (26th) 11-12, 12, 11-12, 12, 11-13, 12, 12-2.
Ryam:—((20th) 11-1, 10-12, 11-2.
Raza:—(21st) 27-9, 27-12, 28; (22nd) 27-14; (24th) 28-4, 28-10, 28-12 c.d.; (26th) 28-8, 28-7 c.d.
Samastipore:—(20th) 11-1, 11-5, 11-9, 11-3, 11-7, 11-2, 11-6, 11-10, 11-4, 11-11, 11-12, 11-2; (21st) 11-7, 11-11 (11-4 s.l.), 11-6, 11-10; (22nd) 11-12; (24th) 11-8,11-9, 11-12; (25th) 11-14, 12-2, 11-8, 11-12, 11-6, 11-12, 12; (26th) 11-14, 12-2, 12, 12-4, 12-5.
South Behar:—(24th) 18-4 C.T.
Shree Sitaram:—(24th) 14.

ENGINEERINGS:

Arthur Butler:—(21st) 13-6, 13-8; (26th) 14, 13-14, 14-5.
Bhartia Electric Steel:—(22nd) 17-4 x. right; (24th) 17-5, 17-4, 17-8, 17-10, 17-11; (25th) 17-7, 17-11; (26th) 17-12. 17-13.
Braithwaite & Co.:—(20th) 10-7, 10-11; (21st) 10-5, 10-9, 10-6, 10-10, 10-12 C.T.; (24th) 10-8, 10-14; (25th) 10-14, 10-7, 10-11; (26th) 10-8, 10-12.
Britannia Building and Iron:—(20th) 12-12; (21st) 12-14, 13-2, 13-4; (24th) 12-13, 13-2. 13-6; (25th) 13-2; (26th) 13-7, 13-5. 13-9, 13.
Britannia Engineering:—(20th) 13-4, 13-8; (21st) 13-8, 13-12, 13-6, 13-10, 13-14; (24th) 13-10, 13-14; (25th) 13-10, 13-14, 13-12; (26th) 13-10, 13-14, 13-12, 14.
Burn & Co.:—(20th) 403, 405-8, 402, 401-8; (21st) 408-8 s.l., 403, 408, 404; (22nd) 407-8, 409, 411; (24th) 406, 410 C.T.; (25th) 412, 414 s.ls., 415.
Hooghly Banking:—(24th) 32-0 o.l.
Indian Galvanising:—(20th) 32; (24th) 35, 35-4; (25th) 35-4; (26th) 35-8 s.l. C.T.
Indian Iron and Steel:—(20th) 36-3, 36-4, 36-8, 35-12, 36-3, 36-7, 36, 36-2, 36-8, 35-12, 36-3, 36-7, 36, 36-4, 36-6, 35-13, 36-2; (21st) 35-12, 36, 36-4, 36-1, 36-5, 36-2, 36-6, 35-14, 36-2; (22nd) 36-12, 37, 37-4, 37-8, 37-5, 37-9, 37-2, 37-6, 37-10 (36-14 s.l.). 36-13, 36-14, 36-15, 37-2; (24th) 36-13, 36-14, 37-2 (36-4, 36-2 s.l.), 36-11 (36-9 s.o.l.), 36-12, 37, 37-4, 37-1, 36-14; (28th) 36-14, 37-1, 37-5, 37-2, 37, 36-9, 36-12, 36-14, 36-10, 36-15, 37-3, 36-12; (26th) 36-13, 37-1, 37-4, 36-12, 37-5, 36-9, 36-13, 36-10, 36-7, 36-6, 36-8.
Indian Standard Wagon:—(24th) 65-8.
Indian Standard Wagon (Pref.):—(24th) 165, 166; (25th) 165.
Indian Malleable Castings (Defd.):—(20th) 2-15; (26th) 2-15.
Indian Steel and Wire Products (ordy.):—(22nd) 59, 59-6 s.l.; (25th) 59-8.
Indian Steel and Wire Products (Defd.):—(20th) 38 s.l., 37-10; (21st) 37-10, 37-14, 38; (24th) 38-1, 38-5, 38-6, 38-4, 38-8: (25th) 38 s.l., 38-8.
Jessop & Co.:—(20th) 21-2, 21; (21st) 20-14; (24th) 20-14, 21-2; (25th) 21 C.T.; (26th) 21-4.
Jessop & Co. (Pref.):—(20th) 122, 123 s.o.l.; (21st) 122 C.T., 123.
Kumardhubi Engineering:—(20th) 6-5, 6-9, 6-4; (21st) 6-4, 6-10; (22nd) 6-5, 6-7, 6-11, 6-8, 6-12; (24th) 6-8, 6-10, 6-14, 6-9, 6-11, 6-15; (25th) 6-10, 6-14, 6-11, 6-12, 7, 6-9, 6-13, 7-1; (26th) 6-11, 6-15, 6-13, 7-1 (6-10 s.l.), 6-12, 7, (7-2 s.l.).
Kumardhubi Engineering (Pref.):—(21st) 152, 153; (24th) 155 s.l.; (25th) 171.
Marshalls:—(20th) 2-8, 2-9, 2-11; (21st) 2-11; (24th) 2-9; (25th) 2-9, 2-10, 2-12, 2-11, 2-8; (26th) 2-9, 2-11, 2-10, 2-12, 2-15.
National Iron & Steel:—(20th) 12-14, 13, 13-4; (21st) 12-15, 13-4, 13-9, 13-10; (24th) 13-6, 13-10, 13-14, 13-4, 13-5; (25th) 13-5, 13-3, 13-4; (26th) 13-13 c.d.
Saran Engineering:—(20th) 6-5, 6-6, 6-10, 6-14, 6-8; (21st) 6-9; (24th) 6-10, 6-14; (25th) 7, 7-4, 7-8, 7-2, 7-6; (26th) 7-4, 7-8, 7-2, 7-5, 7-9, 7-3, 7-7.
Steel Corporation:—(20th) 22-1, 22-5, 22-2, 21-11, 21-12, 21-10 (22 s.l.), 22-5, 22-2, 22-6, 22-4, 22-2; (21st) 21-15, 22, 22-4, 22-6, 22-5 (22 s.l.), 21-14, 22-2, 22-6, 22; (22nd) 22-6, 22-8, 22-12, 22-11, 22-15, 22-12, 23 (22-11, 22-5 s.ls) 23-10, 22-10; (24th) 22-3, 22-4, 22-8, 22-9, 22-1, 22-6 (22-0 s.ls.), 22-9, 22-13, s.o.ls., 22-6, 22-7, 22-11, 22-5, 22-4, 22-6; (25th) 22-6, 22-10 (22-2 s.l.) 22-4, 22-5, 22-11, 22-6, 22-4, 22-5; (26th) 22-8, 22-9, 22-7, 22-11, 22-10, 22-14, 23 (22-11, 22-15 s.l.), 22-15, 22-1, 22-3, 22-2, 22-3.
Steel Corporation (Perf.):—(20th) 125-8, 124, 125, 124-8 c.d.; (21st) 123-8 C.T. (123 s.l.); (24th) 124, 125 c.d.
Steel Products:—(21st) 5-14.

MININGS:

Burma Corporation:—(20th) 4-10, 4-11, 4-13, 5, 4-14, 4-15, 5-2, 4-14; (21st) 4-14. 5-2, 4-13, 4-15, 5, 5-4, 4-12. 5; (22nd) 5, 5-4, 4-15, 5-1, 5; (24th), 4-14, 5-2, 5-1, 4-14; (25th) 4-15, 5 C.T., 4-14, 5, 4-13, 4-12, 4-13; (26th) 4-13, 4-11 (410 s.t.), 4-12, 4-14, 4-12.
Consolidated Tin:—(20th) 2-7, 2-9; (21st) 2-12. 2-9, 2-6; (22nd) 2-11, 2-13, 2-10; (24th) 2-14, 2-10; (25th) 2-10, 2-12; (26th) 2-12, 2-13.
Indian Copper:—(20th) 2-4, 2-7, 2-6, 2-6, 2-8, 2-9, 2-7; (21st) 2-7, 2-9, 2-6, 2-8, 2-10, 2-8: (22nd) 2-9, 2-11, 2-10, 2-12, 2-8, 2-10, 2-8; (26th) 2-9, 2-11, 2-8, 2-9; (24th) 2-8, 2-10, 2-12, 2-9, 2-11, 2-9: (25th) 2-9, 2-11 (2-10, 2-12 s.ls.), 2-10, 2-8.
Rhodesia Copper:—(20th) As. 13, 15, 14; (21st) As. 15, 1-1: (22nd) 1-2; (24th) 1-1; (25th) As. 14, 15; (26th) As. 14, 1-1, As. 15, 1.
Tavoy Tin:—(20th) 1-1; (21st) 1-2, 1-4, 1-1; (25th) 1-5; (26th) 1-2. 1-5.
Karanpura Development:—(24th) 9-12; (25th) 10.

CEMENTS:

Assam Bengal Cement:—(20th) 14-2, 14-3, 14-4 14-8, 15-2. 15, 15-4; (21st) 14-5, 14-6 (14 s.l.), 14-10, 14-14 14-8 (14-12), (22nd) 15,

Calcutta Branch: 9, CLIVE ST.

(24th) 15-12, 16, 16-2, 16-1; (25th) 16 o.l., 16-7, 16-8, 16-12, 16-5, 16-9, 16-4; (26th) 16-11, 16-8, 16-12, 16-14.

WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

Short credits have continued to be in plentiful supply and the rates for inter-bank call money are just as nominal as ever. In our last week's review of the money market, we had referred to the satisfactory subscriptions for the Defence Loan which were expected during the Calcutta Savings Week, and pointed out that the banks were so chokeful of cash that the heavy subscriptions for the defence Loan might not make much of a difference to money market sentiment or money rates. Up to the time of going to press, the realisations for the Defence Loan are slightly over Rs.9 crores; so big a drain, however, has left the money market totally unconcerned. Tomorrow is the closing day for the Savings Week; and there is every reason to think that the contribution of Calcutta will pass the Rs.10 crore mark. This is a gratifying achievement and the Eastern Capital has every reason to congratulate itself not only on this result but on having been in time to take so large a slice of the second defence loan before the list may close. It may be taken as certain that Bombay may not like to be left lagging in this regard. The Western Capital will, ere long, inaugurate a savings week of its own. It should be possible to raise for the defence loan an amount equal to Calcutta's contribution. It is doubtful, however, if, at the time Bombay decides to have a week for mobilising savings, the second defence loan will continue to be available.

During the current week, the Bengal Government were the first to come on the market for Treasury Bills for Rs. 1 crore. Bidding was quite keen, as is shown by total applications, being nearly Rs. 2½ crores. But the rate at which the Bengal Government secured their three months' accommodation could by no means be considered favourable. The average rate of accepted tenders was annas 15 pies 4 per cent. per annum as compared with annas 13 and pies 10 being the average discount rate of Central Treasury Bills issued on the following day. That is to say, there is a disparity of 1½ annas between the Bengal Treasury Bills rate and the Central Treasury Bills rate. In the case of Madras Provincial Treasury Bills issued on November 17, the difference was only 1 pie compared with the Central Treasury Bills rate of that week. This seems to suggest that banks weigh the credit of the Madras Government higher than that of the Bengal Government. As we have repeatedly pointed out, there is no justification for such invidious distinction in the case of bills that are repayable in three months.

So far as the Government of India Treasury Bills are concerned, applications were quite satisfactory at Rs. 2.64 crores against Rs. 1 crore on offer. The average rate at annas 15 and pies 10 shows no change on the previous week. The offer of tender bills for the next week remains unchanged at Rs. 1 crore. Sales of tap bills are to continue at the same rate as last week. Sales of intermediate Treasury Bills between November 26 and December 1 make poor showing at Rs. 18¼ lakhs.

The returns of the Reserve Bank for the week ended November 28 show a further expansion of currency by Rs. 4 crores through transfer of sterling securities to the issue department, presumably from the banking department. We have used the word "presumably" advisedly. For, foreign balances held in the banking department do not show any corresponding decrease. On the other hand, foreign balances show a slight rise at Rs. 59.83 crores. It seems extremely probable that the Reserve Bank has purchased quite a considerable parcel of sterling from the open market during the week ended November 28. In relation to the appearance of export bills in the exchange market, this inference seems to be justified. Sterling securities in the issue department have risen from Rs. 176.65 crores to Rs. 180.65 crores. As a result, gross note circulation has expanded from Rs. 314.64 crores to 319.14 crores. Active note circulation in India at Rs. 287.77 crores establishes a new record. Notes in the banking department show a good rise from Rs. 9.52 crores to Rs. 11.72 crores. In the banking department the balances of Central Government, Burma Government, Provincial Governments, Scheduled banks and under the head 'miscellaneous' have all shown increases.

The next week's statement of the Reserve Bank should show substantial receipts of sterling payments by the Indian Government from the British Government. The Central Government finished the month of November with a comfortable cash balance of Rs. 8½ crores; if the payment by the British Government in respect of November is as much as in the last two months Central Government deposits with the Reserve Bank may be

Finance Abroad

Thursday Morning.

Remarkable sangfroid in the face of disturbing news from the Far East may be said to mark the financial centres this week. If Shanghai has developed nerves again, it must be put down to the inability of the motley group of capitalists there to adopt the optimism that is characteristic of Sir Victor Sassoon. Very valuable advice as to the way things were going in the Far East was indeed given by him through the Bombay press. The purport of that advice was that Japan would not enter the war on behalf of the Axis, and there was no reason to give way to prevailing apprehensions. This advice has not been lost on London. A report from London on Wednesdnay referred to the recovery in both Japanese and Chinese Bonds in spite of agitation over the delay in the Washington talks caused by Japan's reluctance to give a straight answer. The 10 per cent. fall in the value of stocks and shares on the Shanghai market may not be connected with any change in the value of the Chinese dollar which is now very firmly held around 3 3-16d. The fall may be due to the hurried evacuation of foreign investors selling out in a hurry their investments in local Companies. The quick recovery in Japanese Bonds show that London jobbers are not upset by the news that there is a wide gulf between the Japanese and American viewpoints. Last week's main feature was the rise in the Boxer Loan. That was not due to hopes of interest payments being resumed. There is a very clear and absolute distinction to be drawn as between Chinese and Japanese loans. The Chinese, reluctant borrowers, have become reluctant in the matter of repayment because the war has made a mess of China's trade and industry and made it impossible to procure the requisite foreign exchange. The Boxer loan which is not covered by any special revenue provision made by the Chinese Government is evidently higher than the other loans outstanding on account of a belief that the Chinese Government may resume interest payment earlier in its case.

The rising trend in Home Industrials augurs well for the British investor. Over a long period Industrials has been widely favoured. Motor shares are now as much in the limelight as after the Morris Motors dividend was announced. The comparative sluggishness of Wall Street, in spite of rising profits, will naturally force attention on prospects elsewhere. Compared with New York the market in London shows far more encouraging form. The industrial leaders are continuously firm, and the big bulge in Dunlop Rubber finds a parallel in India where Dunlop shares staged a sensational rise last week.

The outstanding improvement in Hong-Kong and Shanghai Bank shares is not wholly based on calculations of the current half-year's dividend. The improvement proceeds from the view that a "modus vivendi" will be reached by Mr. Kurusu who is apparently waiting in Washington for fresh instructions. The Indian markets do not for the present take a cheerful view but this gloom is not to be seen in the money and exchange market. There is not much to go upon either way except to reaffirm that the prognosis is favourable. The London money market responded gallantly to news from Libya and has not reacted after the news of the recent reverse came through. The Funds are firm as ever. Old Consols at £82½ do not look cheap and the only long the 4 per cent. Funding loan was quoting on Wednesday at £114⅜.

Though the end of the year draws near the clearing banks have been freely buying bills, said a message dated Saturday. The volume of applications for the weekly offering of tender was much larger than usual at 175 million sterling against 75 million in three months' bills of a little over 1 per cent. The increase may be due to the fall in treasury deposits but the offer for this week in the case of six month deposits at 1⅛ per cent. has been raised substantially from 15 million to 50 million this time. The importance of these deposits for short term borrowing cannot be underrated, and providing as they do a welcome outlet for the swollen deposits of jointstock banks, they are a valuable addition to the portfolio of bills.

The note circulation in Britain which has risen further to 710 million stg. is perhaps the clearest indication of the state of full employment and adequate war production to which Britain is working up in the third year of war. As a past Chancellor, Mr. Churchill traversed the greater part of the field connected with labour, production etc. in his speech dealing with the call-up of women for national service. The speech illuminates several aspects of war finance and indicates clearly that men and women are always more important then money. It also makes it plain that Britain has not made as yet a war effort on the scale of Germany. Though Britain holds a margin (as demonstrated by a detailed comparison made this year in a Chatham House publication) the Germans keep the lead owing to their intensive preparation of 6½ years and more.

The advance in industrial output and the restraint of wages are features of the British economy. The setting aside of larger savings in October for subscriptions to war loans has been interpreted favourably, and Lord Kindersley's work is now coming to be appreciated. When oversea receipts fall away (the Argentine Railways are not likely to produce regular dividends) the saving at home is even more important. Mr. Norman said not long ago that Britain must save as much as 5 millions per day to pay for the war. Revenue receipts in the last few months are said to have risen but the Libyan offensive will take up more money than anticipated. There may be no difficulty about imports from the U.S.A. but Britain is having a very large adverse balance of trade while normal export trade has shrunk considerably. That the duty of the taxpayer at this juncture to refrain from spending except on essentials is borne out. Foreigners already impressed by the remarkable efforts made to bring over civilian establishments to war production dwell on the effort made to ensure coal and transport for industry in order to make sure that delay does not occur.

The Bank of England has apparently lost gold last week, gained more deposits and enlarged its holding of Government securities. The Proportion had fallen away last Thursday to 10.44 per cent. But that may be viewed as an extraneous development for, the clearing Banks which have deposited larger balances with the Bank have not extended credit unduly. The Bank has also strictly limited its advances and discounts. If public deposits have fallen the advances too are on the small side and only comforting conclusions can be drawn from the rise in note circulation to a new high. The exchange market in London is far from active. There is, however, the impression of great stability as present Control rates have been held for a long time and the extension of Lease and Lend to China, Turkey and other countries relieves Britain of sundry obligations.

Mention should be made here of the successful conversion operations of the Australian Government. The business of replacing 4 per cent. loans by 3½ per cent. loan must have been accomplished by November 15th. The fruition of the scheme which follows the successful conversion in London during July of certain 4 per cent. loans proves incidentially that Mr. Curtin and his associates are not regarded as wild men. The last loan of 100 million raised at home was meant to pay off the 4 per cent. due in November. The thing has gone off without a hitch, and it may be fairly said that Australia like India has made the most of her wartime chances.

Rights of Scheduled Banks

It was less than a month ago—to be exact, in our issue of November 15, in the "World of Finance" section—that we urged the imperative necessity for the clarification and regularising of the position with regard to the admission of banks to the clearing house associations. Our comment on November 15 was provoked by a recent decision of the Calcutta Clearing House Association; and we revert to the theme, this week, because of a most unjustifiable attitude taken by the Bombay Clearing House Association and by the vehement protests which such an attitude has evoked from the institutions affected. It is no use retorting that the institutions so affected are bound to protest and that it should be dismissed as emanating from interested parties. The issue involved in this controversy is simple and straightforward and pertains to what we have called the inherent right of scheduled banks. The Reserve Bank of India is the guardian of the rights of scheduled banks; and, in our view, it is less a matter as between the banks left out and the clearing house associations than one between the Reserve Bank as the bankers' bank and the clearing house associations.

During the past twenty years, the clearing house associations in India have passed through vicissitudes not unlike those of the House of Lords in Great Britain. The House of Lords had been maintained as a close preserve for the high and mighty. When the Labour Party came to office, however, some of the plebians were graciously allowed to join the aristocratic caucus through the process of their being made Peers. Labour in power was a short-lived affair; and the House of Lords is once again a closed ring. In the case of the clearing houses in India, the aristocracy amongst the Indian banks, namely, the exchange banks and foreign banks more or less monopolised the clearing houses and were none too friendly when applications from Indian banks came up for consideration. The strong action taken by Sir Basil Blackett on the question put in the Council of State with reference to the admission of the Punjab National Bank to the clearing house was responsible for a changed attitude on the part of clearing house associations. There followed an interregnum during which banks were admitted to membership in as haphazard a fashion as they were kept out in the earlier period in a capricious spirit. The pendulum now swings to the other extreme; and increasing disabilities are being imposed on new entrants.

The position in this regard was set out in detail in our issue of November 15; and as the last month's decision of the Bombay Clearing House Association underlines and emphasises the validity of the case put forward by us, we give below the relevant extract from our issue of November 15:

> In the twenties, the Clearing Banks' Association was dominated by the exchange banks; and Indian banks received none too sympathetic a treatment when applying for membership of the Clearing House. For year and years, the Punjab National Bank was kept out of the clearing in Calcutta, Bombay and Karachi, though this Bank was admitted to Lahore clearing. It was only when questions were put in the Council of State with regard to this scandal, that Sir Basil Blackett intervened personally and saw to it that the Punjab National Bank was forthwith admitted to the Clearing House. In fact, he is reported to have telegraphically instructed the Imperial Bank to arrange for the Punjab National being admitted to the Clearing House double-quick as he was anxious to answer, when the question came up in the Council of State, that the Bank had already been given this facility. While admission to the Clearing House in those distant years was difficult, there intervened a period during which all and sundry were accepted for sub-membership. In the Calcutta Clearing, there are a few non-scheduled banks who enjoy the privilege of membership. It appears that the attitude of the Clearing House Committee has again stiffened. One of the reasons adduced is that space in the Clearing House is restricted. This is too frivolous a ground to be urged seriously. The real question is whether or not a scheduled bank is entitled to be automatically given the right to join the clearing. This is a right which the Reserve Bank, as a matter of duty, should secure for the scheduled banks.
>
> So far as the Calcutta Clearing House Association is concerned, it did not go into the broad question of the future policy which the Association should adopt with respect to applications for membership. The Association had before it an application for membership from a Bengal bank; and, in the circular that was sent out to the Association members, the Secretary pointed out that, under the rules, the bank in question was entitled to be made a member; but he provided the sting in the tail by adding that, in connection with the application, it was necessary to take into account the fact that space in the clearing house was restricted. This application was later followed by another from a bank to say 'no' to whom would have resulted in awkward repercussions. So, the plea of restriction of space was not urged at the last minute. On the other hand, some old records were unearthed and, contrary to his own observation in the circular that the rules of the Association entitled the bank to the right of membership, the Secretary persuaded the Committee to throw out the application. This decision thus pertains to the right of an individual bank; and the smaller banks are so situated that they dare not protest against the action of the puissant banks, however high-handed such action may be.
>
> The issue raised by the Bombay Clearing House Association is one which affects all those scheduled banks who have branches in Bombay and have not yet been fortunate enough to be made members of the Clearing House. We understand that a special meeting of the members of the Bombay Clearing House was held about the middle of November to consider the future policy to be followed with respect to applications for membership from the point of view of the following considerations: (1) whether a limited membership was desirable with a view to ensure efficient working of the Clearing House, (2) whether applicants for membership should, in the first instance, be treated as sub-members to enable members to be in a position to know whether the number of cheques justified the applicant's entry into the Clearing House before casting their votes in favour or against, and (3) whether a minimum number of cheques must be cleared before an application for full membership could be entertained and circulated for a ballot.
>
> The outcome of the special meeting was the adoption of the following two resolutions:
>
> 1. The membership of the Clearing House be limited to 30; and
> 2. A minimum number of 175 cheques must be cleared on an average daily before an application for full membership can be entertained.
>
> The minimum limit as regards the cheques to be cleared every day is to be a criterion only for new members. So far as the existing members are concerned, they will not be affected by this provision. In this respect, it differs from the proposal that was brought last August when the suggestion was that the existing members of the Clearing House should also be subjected to the test of the clause for minimum cheques.
>
> The existing membership of the Bombay Clearing House is 30. This means that there will be no vacancy unless one of the existing members closed its doors or defaulted from the schedule or violated the rules of the Clearing House. As was pointed out at the protest meeting held by the sub-members of the Bombay Clearing House, the banks, not being individuals, are not subject to death or retirement or old age. It may be, therefore, taken as certain that the chances of vacancy are next to nothing. That is to say, there is no prospect of a "have-not" ever becoming a "have" and the "haves" will hug tight their possession.
>
> One can understand the criterion of a minimum number of cheques. But even this is unfair in a country where we are still in the process of the smaller banks gathering strength and resources slowly but steadily. Equally is this criterion unfair in the sense and to the extent that a bank, opening a new branch at a centre, will take some time before its daily turnover will reach the minimum stipulated.
>
> The only equitable and correct criterion is whether the bank in question is on the schedule of the Reserve Bank or not. There must be some significance as well as some right attached to a bank being on the schedule. Judging from our six years' experience, we may confidently say that, so far, scheduled banks have not derived one single tangible benefit from their status as members of the Reserve Bank system. As we pointed out on an earlier occasion, the scheduled banks are obliged to keep compulsory deposits with the Reserve Bank; and they may be pulled up about this, that and the other. In return, what are the privileges which they may be said to enjoy? None, so long as the interpretation of the relevant sections of the Act is on the present lines. The least which the Reserve Bank can and ought to do to scheduled banks is to place, on an automatic footing, their right to membership of the Clearing House.
>
> It is disingenuous to bring in the criterion of financial stability. When it is a question of foreign banks seeking admission to the Clearing House, they have been able to secure this privilege with the utmost ease. Banks from Japan, Portugal, Holland and France have been welcomed to the Clearing House with open arms, and we are yet to hear that, in their case, the Clearing House has at any time considered the question of how far the stability of those banks has been affected by the havoc caused by the war in some of the countries in which they do business. Can it be taken as certain, for instance, that banks operating in China or Japan have their assets intact to the full value? It is only only with respect to the poor Indian banks that frivolous objections are raised. It is time the Reserve Bank puts its foot down and says clearly to the Clearing House Associations that it is the guardian particularly of the Indian banks and that it will not allow the rights of Indian banks to be unlawfully withheld by a combination of foreign interests. And if the Reserve Bank cannot see its way to enforce strong action, Sir Jeremy Raisman must intervene now as did Sir Basil Blackett in the 1926 scandal.

The Function of State Railways of India—IV

NEW COMPANIES AND CONTRACTS

During this period 1869 to 1880 the policy of direct State construction was obviously in high favour and that of guaranteed company enterprise was accepted to be unnecessarily onerous. One would, therefore, expect that, under that provision in the contracts with the guaranteed companies which enabled the Government to acquire their lines, by giving six months' notice, after the first 25 years, prompt action would have been taken at the suitable time.

Under this provision it was possible for the Government to acquire the Great Indian and Madras Railways Company in 1874, and the Bombay-Baroda and the Madras Railways in 1880. But the Secreary of State for India took a step in 1869 which appears to be utterly inconsistent and nearly inexplicable; in 1869, without reference to the Government of India, he entered into negotiations with the companies for giving up this right of purchase in 1874 (extending the life of the companies for a second 25 years). This was in return for a certain concession on their part; it was that in lieu of the provision in the contracts that half of any surplus profits of the company was to be applied in repayment of sums advanced by the Government under the guarantee of interest, half of the surplus profits for each half-year should be the property of the Government. In other words, surplus profits of the company over and above 5 per cent. was to be equally divided between the Company and the State. According to the original contract, it is well to recall, in the event of the amount which had been advanced by the Government for the guaranteed interest being repaid with interest, the whole of the net profit was to go to the companies. In return for this concession on the part of the companies concerned (first, the Great Indian Peninsular and later with the Bombay-Bardoda Railway and the Madras Railway), the Secretary of State agreed to forego the arrears due by the companies for guaranteed interest advanced year by year with the tax-payers money, and to extend the life of the Companies for another 25 years.

The Secretary of State arranged to keep no accounts of guaranteed interest as against the companies and to cancel the past debt which was accumulating at an unusual rate. As soon as the Government of India came to know of these intentions of the "Home Government" they sent an able and forcibly-worded Despatch pointing out their objections to such a course. It was urged that the concession by the companies in respect of the share of the surplus over 5 per cent. was an extremely dubious gain, while, on the other hand, the relinquishment of the arrears of interest and of the right to acquire the railways after the first 25 years would mean a heavy loss to the Government. But this reasoned protest came too late, and the Secretary of State had the new contracts on the above lines with the three companies.

Subsequent events proved that the worst fears of the Government of India were well-founded; they sought to it that the contracts were not renewed at the end of the second 25 years and the three companies were purchased in 1900, 1905 and 1907 respectively. For many years these companies represented a loss to the Government, because payment of interest had to be made at 5 per cent. which was much higher than the prevailing market rate. As late as 1900, when two of the old companies still remained, the Government of India remarked; "the expenditure side of the Government is further heavily weighted by the terms of the contract of the guaranteed railways. Under these contracts payment of interest has to be made at a higher rate than is now necessary, and the calculation of the surplus profits has to be made at 22 pence to the rupee while the current rate of exchange is neared 1¼ pence. Until these contracts terminate, the State is unable to obtain any advantage from cheaper money or from the improved credit of the country or from a favourable exchange. . . . ."

The new terms to the three companies were in all these three cases a serious loss to the Government. But what the Government or the taxpayer lost the shareholders of the Company gained. When traffic receipts covered interest the State got little. The loss on the Madras Railway outweighed income from other lines. It was a strange arrangement by which if any Company earned less than the interest charges the loss fell entirely on the Government. If it earned more, it got more than a moiety of the surplus.

The companies really got more than a moiety of the surplus because in calculating the surplus, the interest paid in England was converted into rupees at the rate of exchange mentioned

in the contracts, namely 1s. 10d. per rupee, the actual rate of exchange which prevailed in that year was 1s. 4⅛d. The entire loss due to this difference fell on the Government. In fact, looking at those figures and circumstances of the later Sixties and the earlier Seventies of the last century from this distance, with all the knowledge of subsequent events which we possess and which the men who determined the policies then did not possess and could not naturally foresee easily, it seems as though the fates themselves united to create a national economic loss to India and to make the position of the shareholders of the Companies in Britain fairly secure. At the time the Secretary of State for India and the companies started negotiating for the postponement of State purchase by another 25 years (in 1896) and, in fact, up till the year 1874 when only the first company could have been bought, the average rate of sterling exchange on the rupee was slightly above 1s. 10d. The contract was modified and renewed, and the rate of exchange for calculation of the interest was fixed in the contract as 1s. 10d. and from that year it began to grow less and less! Similarly it was fixed in the contracts that the rate of interest to be guaranteed was to be 5 per cent. However, from 1870 for 20 years, the Government found that they could get loans each year at a rate which never exceeded 4 per cent.

Several famine, a frequent and dreaded visitor in the India of the nineteenth century, was particularly devastating in the years 1874 to 1879 when there was a succession of serious cases. The Famine Commission, which reported the next year, emphasised the urgent need for a rapid development of railway communication so that produce may move easily and quickly from areas where there was a surplus to the comparatively needy tracts. It became clear that the progress which was being made in the direct State construction of Railways was inadequate to meet the requirements of the country as estimated by the Commission. At the same time, the guaranteed private company on the old lines was obnoxious. They remarked apropos of this difficulty: "that there would be manifest advantages in giving free scope to the extension of railways by private enterprise, if it were possible; and though the original form of guarantee has been condemned it may not be impossible to find some substitute which shall be free from its defects, and may secure the investment of capital in these undertakings without involving the Government in financial or other liabilities of an objectionable nature. Another period of construction by British companies was begun in 1881 when the Bengal Central Railway Company was formed; this and two others, namely, the Bengal and North-western and Rohilkund and Kumaon, which were started in 1882, had no guarantee of interest from the Government. Three others, namely, the Southern Maharatta in 1882, the Indian Midland in 1885, and the Bengal Nagpur in 1887, were given a guarantee of interest but on now (and more favourable to the State) terms. Of the first group of three, the Bengal Central was a failure from the outset; its terms had to be altered to one of guarantee. Finally it was purchased by the State and merged in the Eastern Bengal Railway with effect from July 1, 1905. (2) As for the other two companies, namely, the Rohilkund and Kumaon and the Bengal and North-western, it is true that they did not have any guarantee of interest or any direct subsidy from the Government; but they were strengthened, through direct sharing of profits and through reduction of expenses by the fact that the working of certain State Railways was entrusted to them, the Tirhoot Railway to the former company and the Lucknow-Bareilly Railway to the latter. The second group of three companies is important because they mark a new development, namely, the introduction of modified guaranteed terms. These railways were definitely declared to be the property of the State; only, the capital was supplied by the companies and they were to work the railway till the end of the first 25 years from their respective dates, when the Government could determine the contract or at subsequent intervals often years; when so determined the companies were to be paid back at par the capital provided by them. The contract with the Southern Mahratta Railway Company dated June 1, 1882, was the prototype of subsequent agreements with the other two, except for two differences. One is that the guaranteed rate of interest in respect of the Southern-Maharatta was 4 per cent. for the first seven years and 3½ per cent. subsequently in regard to the other two it was 4 per cent. The other difference is less striking, though quite important and naturally it is generally not mentioned in the brief appendix to the annual reports by the Railway Board where a short summary of the history of Indian Railways is given. In the contracts with all these "New Guaranteed" companies it was provided that a fourth share of the net earnings was to go to them, and the remaining three-fourths to the Government. It is important to notice that the contract with the Southern Mahratta Company did not provide for the gross earnings being first charged for guaranteed interest on capital by the Government. They had to secure this out of the three-fourths' share of the net earnings on the railways that was allotted to them. This over-generous arrangement was abandoned in the agreement with the subsequent new guaranteed companies. (1) In their contracts it was stipulated that new earnings should be arrived at only after charging the gross earnings with the interest paid by the State to the company. The explanation for this distinction that was made it is probably found in the fact that, at that time, the Southern Mahratta lines were viewed as essentially "famine-protection" lines that could not be expected to be productive of adequate revenue. It will be seen that experience of about three decades had enabled the State to obtain from the companies terms which were vastly more favourable to them than were those of the earliest contracts. Of course, writers to-day with a background of ideas like these, that the railways of Britain were developed without the State as representing the tax-payer subsidising them in any way, that those of the Continent were deliberately and successfully used for implementing national economic policies that the Government in India had no such deliberate objective, and that while they evinced an active interest in the promotion of railways they did not zealously exert themselves to build up any of the industries required to supply the materials demanded by the railways—may say that terms similar to these ought to have been and could have been obtained even from the first companies. But then the pioneers, Lord Dalhousie for instance, could not anticipate, with any degree of certainty how the millions of the people in the sub-continent would react to this development; and further there was, as is only to be expected, an anxiety to introduce the railways in view of their undoubted value for general administrative and military purposes.

Wold Trade, 1938-41

The appearance of a specially compressed statistical survey of world trade by countries between 1938-41 is proof of the value of the League of Nations monthly bulletin of statistics. If many entries do not appear it is clear that the League's Intelligence Section is not at fault. The unit used to express changes in volume and value are new gold dollars, the Roosevelt, not the Hoover dollar. Treasure is omitted and only merchandise exports are considered. The main changes are seen in the moving averages. The quarterly average for Canada in 1940 was 270 million dollars as against 223 in 1939 and 238 in 1938.

The further advance in Canadian exports is assuredly reflected in the rise of the average in the first quarter to 226 millions and in the second quarter to 388. Wartime prosperity in the U.S.A. may be summed up by saying that the 1940 average was 948 millions as against 781 in the preceding year. The average for the first quarter of 1941 was 967 showing a small fall on the final quarter of 1940. The difficulties of Latin American countries in the face of the blockade are adequately reflected in the fall under exports reported in 1940 by Argentina whose trade has apparently shown some recovery after April, 1941. Brazil's export trade was seriously affected and the improvement reported by Chile in the first half of 1940 was not maintained. In spite of Venezuela claiming a fairly large share of the world's oil output, there was a considerable fall in exports. In the case of India the general average is up from 150 millions in 1939 to 158 in 1940. It is clear that earlier boom conditions have cancelled out the depression that followed the fall of France. The tremendous changes of the war have not affected China which reported almost exceptionally a small increase in export trade. The rise in N. E. I. exports was explained in connection with an analysis of economic changes arising from the rape of the Netherlands. The shrinkage in U. K. export trade is a consequence of the war. The 1940 average at 417 millions showed a fall on the previous years average of 491 which again was lower than the average of 575 million dollars returned for 1938. In the case of Australia and New Zealand the general averages indicate that something like pre-war stability is maintained. The tremendous contraction in European trade makes the fall of over 25 per cent. in Sweden's exports last year intelligible. A small increase in 1940 is revealed in the case of Switzerland but more careful scrutiny indicates that the improvement occurred in the last quarter of 1940 and has been followed subsequently by a decline.

An important neutral whose foreign trade failed to respond to wartime opportunities was Japan. It is clear that Japan's export trade had shrunk in 1940 to proportions below those of 1939. The lapse of the commercial treaty of 1911 with the U.S.A. introduced special complications and by the third quarter it was obvious that export trade generally had declined. The most striking featues to mention here is the increase in U. S. imports under the direct stimulus of the defence programme. The improvement continued into the current year and in this too she provides a contrast to Japan whose imports shrank steadily after the first quarter of 1940. The adverse experience of Europe is illustrated by the fall last year in Sweden's imports as also those of Switzerland and Turkey. The U. K. alone increased her imports substantially by using her external assets and overseas investments for payment.

Foreign Trade in October

A striking increase in exports during October will naturally support optimism as to the course of foreign trade this year. It is not the additional day alone that accounts for an increase from Rs. 22.7 crores in September to Rs. 26,42 crores in October. The higher value of Indian merchandise exports is an admission of a rise in the price level and of enlarged offtake by the U.S.A., Canada, Burma and other countries in October. The rise in customs revenue in October was governed by the increase in imports which rose from Rs. 15.72 crores in September to Rs. 17.06 crores in October. The increase reflects not only the ability of oversea suppliers to help India with the goods required, but also testifies to the advance in prices that is the most pronounced feature of the third year of war. The most hopeful factor in the situation is that Indian exports have risen consistently since April. The irregular trend in imports does not imply that imports have fallen away. But exports and re-exports alike show a notable increase in the preceding year. Before the second year of war had come, the trade outlook was markedly depressed. The prompt recovery recorded in 1941-42 is, however, a measure of India's ability to win new markets in place of those lost. Exports have risen continuously since April to October—this is more than enough to correct the temporarily adverse balance of trade disclosed in the first two months of the current fiscal year. The total under retained imports according to the general summary of trade is Rs. 108.4 crores while the value of exports in the same period amounts to Rs. 132.15 crores. There may be a larger increase under imports than exports this year but it is clear from the continued accumulation of sterling balances that transactions on Government account are responsible for a portion of export trade not recorded in the usual way. The balance of trade in India's favour for the seven months is as much as Rs. 23.7 crores. There is a promise of further improvement so that it may be expected that India which cannot get treasure can shed her debtor status.

Larger Exports of Tea

The main changes in foreign trade during October are on the export side. As compared with October, 1940, there emerged a large increase in exports of grain, pulse, and flour. The increase is clearly reflected in the growth of Indian exports to Iran this year. The further increase under tea is a feature of exceptional importance giving an auspicious start to the new season and conveying an assurance that an addition of 10 per cent. to the export quota will have no unfavourable results. The increase in the Food and Drink group as compared with October last is as much as Rs. 3.98 crores. The increase under raw materials appears to be limited though India's own imports are tending to be larger. Except for increases under raw jute, hides and skins and seeds no fresh features are to be found. In the seven months ended October there has actually been a decline under seeds, raw cotton, rubber, oilcake and timber but the exports, to judge by values alone of jute, wool, hides and skins registered an increase, must be attributed to the expansion of India's. Trade with the Empire and the U.S.A. By comparison with the seven months of the last year, there was a striking improvement under gums, resins and lac as also cotton manufactures. As against the increase under jute there was a small drop in hessian and sacking as the total exports for the seven months ended October, 1941, were valued at Rs. 29.42 crores as against Rs. 31.23 crores in 1940-41. The increase of Rs. 6.78 crores under total exports of manufactures should be compared with the advance of Rs. 1.03 crores under raw material exports. The increase is both significant and reassuring, though it will appear that cotton textiles is still the chief contributor to the increase noted under exports of manufactures.

Fewer Strikes

In spite of current adverse indications, it must be said that the bases of industrial peace have been definitely strengthened in wartime. That the improvement follows from Government's active interest in promoting concord where differences are revealed is only to be expected. Statistics of industrial disputes in the year 1940 shows that strikes fell in number from 406 in 1939 to 322 in 1940. The number of workers involved and the number of days lost through stoppage of work, showed increases in 1939. It must however be qualified by the statement that the number of workers in industries rose in 1940 from 2,611,623 to 2,727,972; the net addition to industrial employment being 116,439. The actual increase in employment during what is regarded a good year for Indian industries may seem quite moderate, but the increase has to be measured by the rise in wages paid by industries, the increase of double shifts as also ordinary overtime working in industrial establishments. That there were cases of friction arising from increased activity may be inferred from the fact that many of the disputes turned on wages or bonuses. In 166 or 52.5 per cent. of the total strikes, the strikers gained concessions.

The cotton and jute mill industry accounted for 62.2 per cent. of the strikes. 73.2 per cent. of the workers involved and 79.8 per cent. of the total loss of working days namely 7,577,000 in 1940. Reference must be made to the Court of Enquiry consisting of Sir B. N. Rao, Sir S. A. Khan and Mr. R. Hughes to enquire into the claims of the Railwaymen's Federation for a dearness allowance. The report issued in January was followed by the grant of a special allowance to low-paid employees on State Railways. The enactment of the Trade Disputes Act in Bombay extended the scope of conciliation. As many as 65 disputes were settled by conciliation as recommended by the Act of 1938. It is clear from the strike statistics that the great textile strike of March-April, 1940 following the failure of conciliation is responsible for the increase recorded under the number of workers affected by strikes. The Bombay mill strike alone threw 156,598 men out of work and resulted in the loss of 4,510,768 working days. The Industrial Court decided two claims for dearness allowance besides hearing 35 applications dealing with differences between employers and workers and in the C. P. a court of enquiry went into the question of a dearness allowance.

The most serious of the strikes reported from Bengal was the Calcutta scavengers' strike which was settled after a promise of dearness allowance. The tabular statement reveals that more workmen were affected in Bengal than Bombay. The actual number of industrial workers and establishments affected by strikes was larger in the former province but fewer

persons were affected by strikes. There was no strike in the Frontier Province which reported that only 1,195 persons were engaged in factories, the total for India in relation to the establishments classed as factories being 1,844,423. That flimsy reasons are often assigned by strikers may be concluded from the fact that 150 out of the total of 322 strikes were unsuccessful.

Co-operaton in Baroda

Not many will be aware that Baroda has a statistical abstract fashioned on the usual lines, but more convenient to refer to, in that an adequate commentary is used to elucidate charts. The comprehensive tables provided in the abstract can be more readily examined by reference to the introduction, which in dealing with the figures for 1939-40 makes mention of progress in the last of the ten years covered by the abstract. Baroda gets about 39 percent of her total revenue equal to Rs. 95 lakhs from land. Customs has been an important source of revenue, and as pointed out in the comments on the last Budget, the railway contributes about 10 percent of the State revenue. It is characterstic of the Gaekwar's administration that education took for many years a larger share of the revenue than an Army. The increase under the latter head in recent years will not therefore occasion misgivings. The total revenue of Rs. 245 lakhs in 1939-40 was below the expenditure of Rs. 250 lakhs but the position has altered since. It is known that expenditure since 1935-36 has been continuously rising. If expenditure under several heads has been stationary, while military expenditure has leapt forward, the reason is not far to seek. The only item to show a fall since the accession to the musnud of the present Gaekwar is Palace expenditure which is below Rs. 27 lakhs per annum.

Though Baroda does not lead India in the matter of education, the statistics have a special interest. The total number of 291,000 scholars in the 2,377 educational institutions of the State included 112,000 girls. Amreli District is described as backward but the other three are above average. The State spent Rs. 38.36 lakhs on education spending as much as 57 per cent of this total on primary schools and 4.5 percent on technical schools. Baroda is unique in being able to report a continuous increase in the number and membership of co-operative societies. An increase in the percentage of recoveries marked the year 1939-40 when returns were made by 1,297 societies claiming 65,920 members. The total reserves stood at Rs. 17.64 lakhs, and the loans, deposits and share capital alike showed an increase. The contrast with British India is emphasised also by the successful operaton of the four agricultural banks of the State. The co-operative movement had at its command over Rs. 10 crores in working funds and nearly Rs. 2 crores came from non-members by way of loans and deposits. Recoveries exceeded the fresh loans made during the year and the Government's assistance to the societies amounted in the State in 1939-40 to Rs. 107,802 only. The vitality of the movement is indicated by the continuous increase in deposits from members while the deposits from banks and non-members have declined. Share capital of the societies registered, like the deposits of members, has increased more than proportionately, and this at Rs. 1.2 crores shows that the first line of defence against claims is definitely strong. Loans due at the end of the year 1939-40 amounted to Rs. 6.6 crores indicating that over a third of the funds were lodged in quick assets. By comparison the agricultural banks, half of whose capital has been put up by the Government have been stagnant. Their position is secured by the fairly high proportion of advances made to co-operative societies.

EAST INDIAN RAILWAY
DEMURRAGE AND WHARFAGE CHARGES ON SUNDAYS, GOOD FRIDAY AND CHRISTMAS DAY.
It is hereby notified that with effect from the 1st January, 1942, the following important changes will be introduced in regard to the calculation of free-time, and wharfage and demurrage charges:—
(a) At all stations on the East Indian Railway, Sundays, Good Friday and Christmas Day will not be treated as "dies non" in computing free-time and demurrage charges on wagon load consignments of goods traffic (including coal, coke and patent fuel and military traffic) required to be unloaded by consignee.
(b) At all sidings on the East Indian Railway, Sundays, Good Friday and Christmas Day will not be treated as "dies non" in computing free-time and demurrage charges on all wagons placed for loading *and* unloading.
(c) At certain important stations on the East Indian Railway, Sundays, Good Friday and Christmas Day will not be treated as "dies non" in computing free-time and wharfage charges on inward consignments awaiting delivery. These stations will be open as usual for delivery of consignments on such days. Particulars of the stations in question may be had from all stations or on reference to the Divisional Superintendent concerned or to the undersigned.
(d) All stations, other than referred to in (c) will be open on Sundays, Good Friday and Christmas Day for the unloading of goods traffic (including coal, coke and patent fuel and military traffic) in wagon loads, which are required to be unloaded by consignees, so that wagons may be released without demurrage charges being incurred.
(e) At all stations, other than referred to in (c), Sundays, Good Friday and Christmas Day will only be treated as "dies non" on inward consignments awaiting delivery where the usual free-time includes these days, but not otherwise.
(f) The free-time allowed for unloading wagons containing coal, coke and patent fuel will be reduced from ten hours of daylight to nine.
(g) The wharfage rate on consignments of coal, coke and patent fuel left on East Indian Railway premises above 48 hours after mid-night of the day on which unloaded at destination, will be enhanced from 2 annas 3 pies per ton to 6 annas 10 pies per ton or part of a ton per day or part thereof.
CHIEF COMMERCIAL MANAGER.

Sisal in America

Flax has emerged as a rival to jute in New Zealand says a note in the latest bulletin of the Indian Jute Committee. Wool pack may be produced to local requirements and there is a likelihood of 50 per cent. of the Dominion clip going into new improved flax packs. Reports that Germany is growing more flax and jute than ever appear in the bulletin which states that the acreage rose in 1940 in both Germany and the protectorate of Bohemia and Moravia. The main interest of the bulletin lies, however, in the note on sisal. It is disclosed that exports

from Mexico in recent months have shown a progressive increase. Cordage exports too were higher and the principal buyer was the U.S.A. Sisal is now firmly established in both Central America and East Africa and the fibre has a variety of uses that make it a rival of jute. The U.S.A. has been a ready buyer of Mexican sisal fibre and twine, rope, cloth and bags. Uruguay, Argentina and Canada took small quantities and six other American countries were among buyers of cordage. The increase in July, as compared with June, of Mexican sisal exports is noteworthy for several reasons. Brazil is also trying sisal in the State of Sao Paulo. Reports that cultivation is extending rapidly find support in the growth of plantations. Nano estates are turning over to sisal and a decorticating machine acquired by the State has been installed on one of the plantations. Rope and twine-makers are said to take about 120 tons of sisal. Large quantities are still imported, mainly from Africa but the local fibre, reported to be sound and lasting, will probably challenge the imported product. According to an extract in the "Jute Review" the ropes manufactured from Sao Paulo fibre are of excellent and lasting quality. It is easily and mechanically prepared, acid is quoted at present at 3,000 reis per kilo. Cuba too is a producer of sisal, growing in addition henequen, the fibre typical of San Salvador. Total fibre production per annum is estimated at 25 to 35 million lbs. The area under fibre is reported to be about 32,000—37,000 acres, most of the cultivation being controlled by the three largest producers. Quinquennial average of exports was over 20.6 million lbs. with a value of 875,278 dollars. The U.S.A. took 76 per cent of Cuba's exports and Germany ranked second. In 1940 more than 96 per cent of exports went to the U.S.A. Twine cordage and rope exports from Cuba to the value of 545,977 dollars were taken almost entirely by the U.S.A. Sisal can be treated to acquire the appearance of flax according to recent reports which refer to boiling and treatment with a solution of sodium carbonate the fibre being subjected to further treatment and processing. The extension of sisal cultivation in Central America accompanied by increased purchases by the U.S.A. is of some importance to Bengal. In spite of reports that the U.S.A. may raise the 'ceiling' for hessian, there is much to be said for the view that unduly high prices for jute manufactures will choke off demand. The increased use of rival fibres including cotton in the U.S.A. is therefore a danger to exports of jute manufactures from India. The fall in world consumption of jute to 73.6 lakhs bales in 1940-41 (July-June) should always be considered in relation to the ruling price level.

The Growth of INDIA'S Sterling WAR SAVINGS

It is fascinating to watch the steady rise in India's sterling War Savings, through the British War Savings Movement. Total investments now exceed one million pounds.

South Africa's Decision

South Africa has been slow to adopt import control but shipping difficulties and the need to develop local sources of supply have been responsible for measures adopted latterly to restrict imports. Secondary industries which have made progress in the first two years of war are sure to benefit from the establishment of an Import and Export Control Board. The Union Government's announcement in August was followed by the promulgation of regulations on September 10. It was stated that as from September 15, no goods other than certain specified exemptions which include goods despatched before September 15, or in transit personal effects, fresh fruit and vegetables from the Portugese territory of Mozambique and goods grown, produced or manufactured in any part of the British Commonwealth excepting Canada and Newfoundland may be imported into the Union or Southwest Africa except under permit issued by the Secretary for Commerce and Industries. It was also announced that until further notice no permit for certain specified articles will be issued unless such articles are produced in any part of the British Commonwealth other than Canada or Newfoundland. Where an importer has to produce a recommendation in the country of supply, the Controller of Imports and Exports will be prepared to issue a certificate of essentiality in order to facilitate the obtaining of essential requirements for the war effort or the maintenance of the life of the community. The export regulations provide that no permits will be required for Northern Ireland, Canada, India, Australia, New Zealand or any British Colony, protectorate or territory. The appearance of these regulations will obviously result in a check to the Union's imports from non-sterling countries. That South Africa endowed with ample means of payment is adopting the control system adopted by other parts of the Empire earlier will occasion some surprise. The mining industries will probably get whatever they want, control or no control, but the non-essential imports will have to come from the Empire. This will create fresh opportunities for India which in the seven months ended October exported goods to the value of Rs. 3.71 crores as compared with Rs. 1.83 crores in the corresponding period of 1940-41. Imports from the Union have risen by Rs. 22.4 lakhs to stand at Rs. 65.54 lakhs at the end of October.

War Production

Mr. Churchill's plea for additional workers and troops confers interest on the most recent estimate of what has been achieved in the third quarter of 1941. Industrial concentration, with which Mr. Lyttelton is largely identified, had produced results. The results of the new drive for intensified production are reflected in the statement that output of

The Company that pioneered other fields of industry in India once again leads the way. To meet Indian Railway requirements Wheels, Tyres and Axles are now being manufactured in the Steel Works at JAMSHEDPUR.

TATA STEEL

Issued by The Tata Iron & Steel Co. Ltd. Head Sales Office: 102A, Clive Street, Calcutta. TSL. 2071

tanks and other materials between July and September was equal to the entire output of 1940. In the last week of September a more vigorous effort was noticed. The further advance in production promised by Lord Beaverbrook after the Moscow talks will entail additional coal output. Efforts were made, in August when stocks were comparatively high, to extend production and supplement reserves. Power production depends ultimately on coal and improved transport facilities will ensure speedier delivery while the early assignment of additional workers will enable output to be increased in order to meet anticipated demand. The coal industry has had 40.000 trucks as reserve. It is now certain that in spite of reduced supplies of scrap and virgin metal there is every chance of steel production being as high as 13 million tons. This will ensure that munitions output does not suffer while the complete absence of non-essential activity is a guarantee that war requirements will be met. Blast furnaces are said to be well stocked in spite of restricted imports of U.S. scrap. If imports have ceased oversea requirements are more readily met and there is no need to produce exports merely for earning foreign exchange.

The closing down of redundant factories has released about one-fifth of the men previously employed for war work. By the limitation for supplies about 4,000 factories employing nearly three-quarters of a million men are affected. Saving in both labour and factory space has been obtained in consequence. Compared with September the number of unemployed fell by 417,000 and the decrease too represents a net addition to employment. The addition to the rents of industry accounts for the increase in the membership of Unions belonging to the T.U.C. The total at the end of 1940 was over 5 millions and there should have been a further increase since. These assumptions are supported by a recent report that new factories for the third year when a lot must be done (to use the Premier's words) are ready. The Government is known to have kept the building industry busy giving employment to 200,000 men and paying out during the summer as much as one million sterling per diem. The reduction of enemy air activity facilitated work on both fortifications and factories and improvement in civil defence measures has proceeded alongside. With the Nazis stuck in Russia there is little likelihood of a winter aerial offensive on the 1940 scale. Steps have been taken to guard against stoppage due to failure of transport or supply of coal. The third winter shoul witness a rapid increase in the output of goods destined for Russia and the Middle East. The Premier's speech on Tuesday indicates that the men will be procured for the production programme. It is no reflection on the U.S.A. that in the second year of the defence programme meagre results have been obtained. An article in the "Economist" not long ago suggested that the Administration was as much responsible as industry for the qualified failure recorded last year. Estimates of aero-engine production in the States have been raised to 5,000 per month, but the latest strike at the Bell factory shows that labour is an unknown quantity as in the past.

BOMBAY · CALCUTTA

For a visitor, Jamshedpur is more than an education. It is an inspiration. It is an uplifting influence. It cheers the spirit, heartens the outlook and comforts one's self-respect. It is one of the few justifications for national pride that we Indians can experience. It marks the co-ordination of all-round activity, the triumph of success and the completeness and comprehensiveness of achievement. I have visited Jamshedpur at more or less regular intervals since 1917; and, every time, I feel that the Company has passed another important milestone. I was in Jamshedpur last week-end in connection with the opening ceremony of the wheels, tyres and axles plant of the Tata Iron and Steel Company. The new works were declared open, as was meet and proper, by Sir Guthrie Russell who reflected the feelings of the visitors when he said: "I always enjoy my visits to Jamshedpur—the only trouble is that these are never long enough. When one comes here, one sees something going on all the time, something new every time, and every time I go away encouraged with the feeling that, in Jamshedpur, we have one of our great nerve centres of production. In fact. I might go further and say that the steel industry is the heart of India's great war effort on the munitions production side." The last time I visited the steel works was in January; and it took more than eight hours to see what has been done in these ten months. Before I discuss the new developments, however, I must first deal with the business on hand, that is, the new works for the manufacture of wheels, tyres and axles, for railways.

That, planning the entire works after the war started and placing the orders for machinery during war conditions, the whole programme has been fulfilled according to schedule and, while we looked on after the opening ceremony, the wheels and tyres were actually manufactured before our eyes, is a feat of initiative, enterprise, expertness and organisation fully worth of the Yankee—spirited General Manager, Mr. Joe Ghandy. The total outlay on this plant is about Rs. 64 lakhs; and it is designed with a productive capacity just adequate to meet the entire requirements of the Indian Railways in respect of wheels, tyres and axles. As Sir Guthrie rightly pointed out, India is today producing guns, shells, amunitions, armoured fighting vehicles, etc; but, in order to do this, she must have an efficient and up-to-date transport system. After all, transport is essential to all war production. The new enterprise goes a long way to safeguarding the transport position in India. The wheel, tyre and axle plant now erected in Jamshedpur is thus as much a contribution towards the prosecution of war on the part of the Tatas, as their supply of hundreds of thousands of tons of steel and structural parts and of a growing range and volume of special steels such as for armoured plate required for the manufacture of armoured vehicles, shell proofing, armour-piercing shot, helmets, gun platforms and carriages, rifle and machine-gun magazines and anti-aircraft bullet clips. While, by making available domestic supply of wheels, tyres and axles, the Tatas have given timely relief to the pressure that has been thrown on rolling stock for military, industrial and civil purposes on a scale unprecedented in history, the new plant will make India, during peacetimes, self-sufficient with respect to one of the largest items in the mechanical section of the Railway Budget.

In bringing to completion a project of this kind during wartime conditions, the Tatas have had to overcome a number of difficulties. One of the most important was the availability of acid steel which is basic to the wheel, tyre and axle project. It is in this respect that the research activities of the Tata Iron and Steel Company have been of signal service. Thanks to the efforts of the metallurgical department and other staff, the Tatas have now developed a new process for the manufacture of acid steel and are now erecting a plant incorporating this process. The acid steel plant is expected to come into operation in a month or two. This new steel plant will have, on the one hand, the effect of increasing the total steel production of the Company and, on the other, of providing that particular kind of steel which is of basic importance to the manufacture of wheels, tyres and axles.

Another difficulty confronting the Tatas was the difficulty of securing experts. The production of wheels, tyres and axles is a highly specialised business and it was found unavoidable to import two or three technical men from abroad. None could be had from Britain or America. It was to Australia that Tatas turned for help and it was Australia that stretched its

hands across the seas and came to their rescue. Mr. Ghandy has acknowledged this help in graceful terms; and as his words refer to a remarkable development in Eastern group collaboration the following passage deserves to be reproduced in full:

> "The Commonwealth Steel Company has not only trained two of our Officers in the methods of manufacture of wheels, tyres and axles, but also loaned to us the services of Mr. F. M. Gaussen, one of their senior executive officers and of Mr. R. F. Mordue, one of their best technical men. I take this occasion to acknowledge publicly the gratitude not only of the Steel Company, but also of this country, to the Commonwealth Steel Company and through it to Australia for this gesture of practical assistance, which is of vital importance to the war effort of India. This co-operation may be said to represent the first fruits of the labours of the Eastern Group Supply Council and mark the beginning of a new era which will witness the visits of Indians to Australia and of Australians to India for the purpose of interchange of ideas and the rise of a wider spirit of collaboration between the two countries in the realms of education, industry and commerce."

When I was in Jamshedpur last January, the two electric furnaces, which the Steel Company bought from the Negapatam Works, had reached full production; and they are now of the greatest value in the manufacture of various kinds of higher class alloy steels. The plant for the manufacture of armour plate was then just being laid out; and it has made such progress that it is in a position to supply the entire quantity of armour plate required in the adjacent government factory for turning out armoured cars. More. The Tatas will now be able to supply armour plate to Britain should the latter be in need. In the making of various alloy steels and in the completion of the new process for acid steel, the laboratory, which has been planned on elaborate lines and which I have seen for the first time during this visit, has more than justified itself. As I was conducted through the laboratory by Mr. Jol Wacha Ghandy the thought struck me that while the works were dealing with to-day it was the laboratory that planned for to-morrow. Highly trained scientists in large numbers are now engaged in research work; and one cannot help feeling that it will do a lot of good to Indian industrial expansion if every industry can organise research on the lines and on the scale planned in Jamshedpur.

I was also taken round the Benzol factory; and I have to be very discreet indeed about what I say on the production here. The Benzol factory has been set up at the cost of the Government; and the Steel Company supplies the gas and works the factory as the agents of the Government. The Benzol factory has fulfilled all expectations; and has proved of the greatest value in the manufacture of munitions in India.

Production in every department is being pushed up and, though the actual figures could not be given, the output of Tatas works to-day is very much more than what those who planned the factory years ago could have thought possible in their most sanguine moments. With the production of acid steel from January or February, it may be safely predicted that the output in Jamshedpur will exceed the estimate announced at the time when expansions were taken on hand four years ago.

But if I am asked to say what is the remarkable achievement in Jamshedpur in the last five years, I would point to the total avoidance of waste of any kind and to the complete utilisation of what was once waste for the present manufacture of various by-products. By utilising the gases for further heating, a considerable saving in the total consumption of coal has been effected. Saving in this regard may mean anything like three-fourths of a million tons of coal. This kind of economy has extended to every possible sphere.

At the outset, I said that a visit to Jamshedpur is an education and an inspiration. I must not forget to add that, while the fellows in the steel town take it seriously while they are at work, they enter into their play with thorough abandon and gusto. In simple terms, Jamshedpur is as much entertainment and frolic as education and edification. I was in the hands of Mr. Phiroz Kutar and his wife and the only complaint I had to make is that their hospitality was more than what my person could endure. From dawn to midnight, I was taken from one plant to another or from one function to another. The day was strenuous and the night a scream.

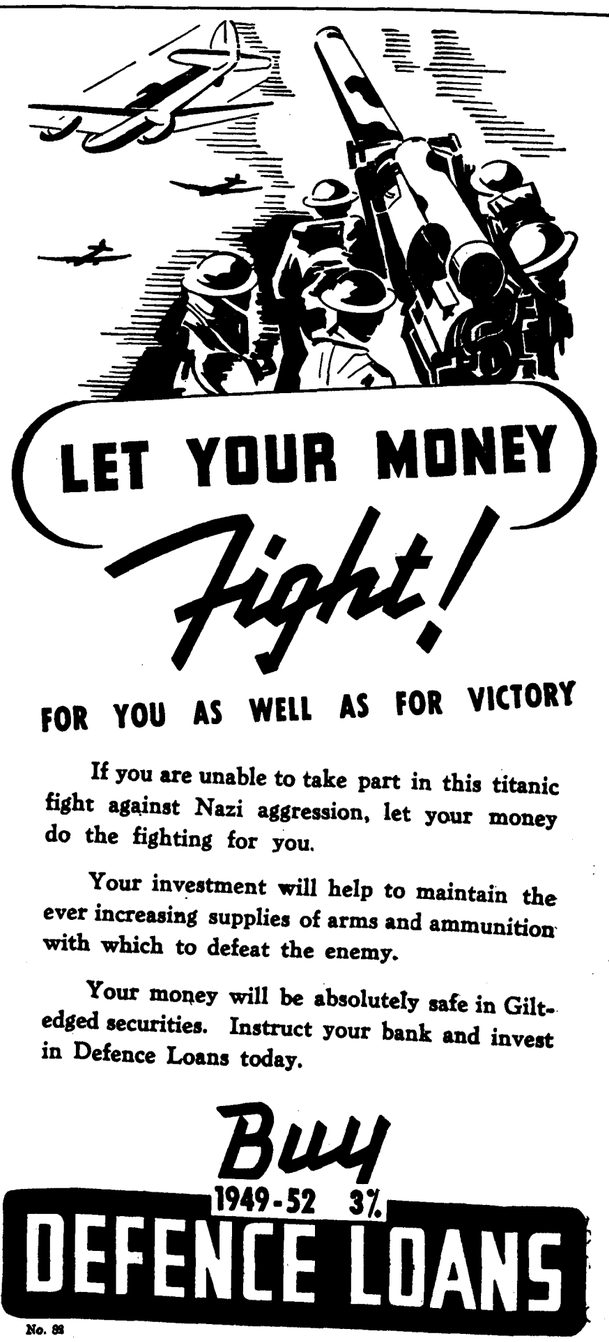
(From Our Correspondent)

New Delhi, December 3.

New Delhi is having a busy week as the Viceroy and many Members of Government are due to leave within the next few days on their December tour and will not be returning to headquarters for at least a month. To-morrow's meeting of the Viceroy's Council is expected to consider the final instructions from the Secretary of State and the replies received from the Provincial Governments on the proposal for releasing political prisoners. The delay is said to be due to prolonged discussions over details, such as the categories of political prisoners who can be safely released. No clear idea is yet available of the future course of events following the release of political prisoners, but one important development which is generally anticipated is that the Congress High Command will permit the Congress party to attend the coming Budget session of the Central Legislature and take full part in its proceedings. The new Indian Members of Government appear to be anxious that the coming Budget statement and taxation proposals for the coming year should bear the imprint of the popular policy which they seek to pursue. It is safe to presume—though at the moment it is difficult to say how the Far Eastern situation will develop—that though additional taxation cannot be avoided it will not be on so large a scale as it was last year. From talk going on here it may be assumed that the three underlying principles will be—taxation of war profits, taken in its widest sense, to the maximum extent possible, strict economy measures and a wise loan policy to finance war expenditure.



* * * *

The Standing Finance Committee for Railways is meeting a fortnight hence to consider the capital programme. The purchase of the two new railways alone, the B. N. W. Sailway and the R. and K. Railway will alone absorb over Rs. 17 crores. The works programme though it will have to be severely limited owing to war needs is expected to cost over Rs. 10 crores. There is likely to be little difficulty in finding the money as the Railways have been enjoying unprecedented prosperity. The latest statement of the Railway Board shows that the earnings up to 20th November last are Rs. 10.81 crores more than last year. The Railway surplus is expected to be not less than Rs. 20 crores during the current year. Apart from the increased benefit to general revenues which this big surplus will bring, it will facilitate considerably the policy of purchasing company managed Railways which Sir Andrew Clow has been vigorously pursuing. The old question whether the losses on strategic Railways should not hereafter be included in the Defence Budget appears to have been discussed at some length by the Public Accounts Committee at its last meeting. In its report the committee refers to the present system according to which the interest on the capital at charge of these lines together with the losses on their working are borne by general revenues being deducted from the contribution that the Railways make to general revenues each year and says; "In view of the fact that the Defence Budget is no longer a contract budget and that it will make no ultimate difference to the incidence of this expenditure whether it is included in the civil or the defence side of the Budget, we agree that that there is no necessity to change the present procedure with regard to the accounting of these charges, at any rate during the war."

* * * *

There are striking disclosures in the October trade figures which the Commerce Department issued to-day. The increase in the value of Indian merchandise exported from this country during the month was nearly Rs. 12 crores more than that of October last year. The countries which are mainly responsible for increased purchases are the United Kingdom which has nearly doubled its purchases, Canada and Australia which between them have bought five times more than last year, and the United States. Imports into India also have increased by over Rs. 4 crores—chiefly from the United Kingdom and the United States. Taking the seven months together one finds that the balance of trade is still in India's favour to the extent of Rs. 15 crores during these seven months which is certainly not a low figure under present war conditions. Exports of Indian merchandise during the month totalled over Rs. 26½ crores a figure

(From Our Correspondent)

December, Dec. 3.

The local press which has reviewed at some length proposals, supported or inspired officially, to limit the membership of the Bombay clearing house to 30 has recorded a further development. Banks affected by the decision have lost no time in protesting. The clearing house facilities, once conceded, cannot be withdrawn, that is one of the arguments used. The big guns of the Bombay clearing house decided only last month that small banks have no place in the clearing house. It was said that small mofussil banks with Bombay branches were ineligible and decided that applications for membership would be considered only if an applicant had to its credit at least 175 cheques a day for clearing. Non-members naturally think that it is a move to make this a close preserve. Arguments adduced in support such as the difficulty of procuring deposits of Rs. 1 lakh in case anything happens to a clearing bank, and another bank is affected thereby, hinge on the relative strength and weakness of members. The theoretical equality which clearing banks may be disposed to claim is denied by implication. It is clear that if this decision, recent but taken after mature consideration, is maintained, a number of scheduled banks cannot hope to obtain at any time membership. In view of what has been said in *Indian Finance* about the privilege of membership and the qualifications prescribed, it is certainly open to say that every Scheduled Bank with a statutory deposit with the Reserve Bank can insist that there is no place for a caste system among banks. Existing members are not likely to drop out; so there is no reason for taking in new members. Heartburning occasioned by this decision has not led to the despatch of a memorandum recording disapproval but a meeting held on Friday took the view that the Reserve Bank should hear what the banks affected have to say about the matter.

The local Government's decision to set up a transport board is the subject of appreciative comment. The Board will settle questions as to priority, and the grievances expressed in summer may not recur. A special officer came and saw; the transport advisory council gave its support and Bombay's plea that some new impartial agency that will make the fullest use of available resources for transport in the Province was heard. Though the G.I.F. is able to handle 30 per cent more traffic than in the last year the growth of traffic in wartime has created difficulties. In view of difficulties experienced as regards locomotives the G.I.P. has only recently added 22 engines for goods services and increased also the number of runs for previously existing engines. Improvements to goods yards at Bhusaval, Dhond and Itarsi should contribute to an improvement in the transport situation. In Bombay too a new shed has been put up at Wadi Bunder. The assurance that adequate coal supplies will be available for firms engaged on war work has reduced fears as to defective and deficient transport. Though the press in India has pointed more than once to American policy and practice in regard to accumulation, as a reserve, of both coaching stock and wagons not many care to note that transport has been a serious bottleneck. Inland waterways similar to those in the U.S.A. do not exist in India. The railroad companies have also the profit stimulus and the ability to get materials and stores whereas the Indian railways cannot expand services or facilities.

The share market is again the subject of criticism. Dealings in forward shares gave rise to a complaint that there was unduly wide difference between the cash price and the forward rate for certain scrips. The Bombay Government was apprised of the views of private investors and the Government in turn forwarded the representation for consideration by the Board of the Stock Exchange. After discussing the matter for two hours the Directors concluded that the trouble springs from the absence of free forward dealings. If the Exchange resumed dealings as in the past there would be no place for complaints. It was, however, admitted that the war justified the restrictions in force. Brokers were asked to indicate how the difference should be reduced in the case of particular securities. The matter has already been discussed in the press and some are disposed to say that it is all due to the boom in equities. The Board has not shown its hand but more will be heard of it soon as the few forward scrips dealt in regularly are fluctuating more frequently and brokers are perhaps as much exposed to trouble as their clients.

After Mr. Hydari's recent visit to Bombay doubts and difficulties as to the Bombay's share of orders from the Eastern Group should have passed. Mr. Hydari is known to have visited individual factories and met Indian businessmen to learn their views as to the industrial side of the war effort. The Bombay business community reminded of large orders for mills had a pleasant surprise last when it was made known that supply orders valued Rs. 536 lakhs nearly were distributed in the months of July to September. The British Government accounted for only a small part of the purchases. The local advisory Committee has been told fairly often that Bombay is getting its full share of war orders. No grievance has been made about it, as in Madras, and it is certainly pleasing to find that several new lines of production are being developed in Bombay. Mr. H. F. Knight told the Supply Advisory Committee that milk bottles, ginger flypaper and cane circlets for mosquito-nets were wanted and supplies had been arranged for.

The appearance of reports to the effect that Indian life offices have agreed to suspend bonus declaration for the duration of the war have not caused so far any head-shaking. It is believed that the Government has indicated to the Special Advisory Committee that it is expedient to conserve resources and adopt the no-bonus policy of British offices. They may certainly be able to pay better bonuses after the war. The majority of companies faced by diminishing surpluses are likely to endorse the suggestion particularly as Government is prepared to help by further amendments of the Insurance Act. Certain restrictions as to managers, legal advisers and agents are likely to be put into the law and doubts as to the way police-holders' directors should be elected will also be cleared up satisfactorily.

An appeal for trained nurses was made last week by Lady Lumley. The annual conference of nurses at a hospital induced Lady Lumley to tell the members that the value of nursing was recognised and the status of the nurse had risen in consequence. There were speeches voicing a demand for post-graduate training and improved standards. There was complaint as to the inadequacy of nursing staff in several hospitals at present. The grave deficiency of trained nurses was described and only if the training and other facilities are extended can there be hope of a steady flow of recruits. A resolution asking for a central register was approved by the National Council of Women. This too will be acceptable to trained nurses who regret that their work, essential in both war and peace, is not put alongside of other professional work. In a way this would help to improve conditions and prospects for nurses.

The cloth market has developed a brisk, buoyant tone. The improvement follows a moderate rise in prices, stimulated to some extent by the reduction in the existing stocks of Japanese goods. The revival of up-country buying and the maintenance of export demand on a limited scale sustain the belief that mill goods will find ready sale. Dealers manifest greater interest and prices are above the August peak in the case of most standard lines. The rise in rates for Japanese goods has led to brisk buying of Indian shirting and coating fabrics. The high price of British goods constitutes a further advantage for Indian manufacturers who report that Madras has bought freely both white and coloured goods. Forward rates look like hardening and labour trouble here or in Ahmedabad will not make much difference either way. Ahmedabad prices have risen during the last week of November as Calcutta and the Punjab have bought freely. Oversea markets are also keen buyers and goods for ready delivery have found ready takers. The onset of winter finds the market livening up definitely and this helps the share market to extend continued support to mill shares generally.

(Continued from page 1034)

which has never been reached since the war began. Imports also were well over Rs. 17 crores during the month, which is certainly one of the peak figures for the war period.

* * * *

No further reply of any importance is understood to have been received by the Government of India on the subject of the Burma or Ceylon restrictions. As the members of the Standing Emigration Committee have been informed that another meeting will be held in the third week of January, the Government of India expect to have evidently some definite reply from the Secretary of State by that time with reference to Burma. The Ceylon negotiations will drag on as the Ceylon Ministers have to consult the State Council and also consider the modifications suggested by the Government of India in the light of the Emigration Committee's discussions. It is expected here that if the international situation permits it another delegation may have to go on behalf of the Government of India to Rangoon to reopen certain questions with the Burma Ministry. For the benefit of the two Governments the Secretary of State may interpret the constitutional position regarding the re-entry clause, but as regards other matters, he may agree to give an opportunity to the two Governments to confer again and come to an agreed settlement. For the present, therefore, the issue of the Order-in-Council will have to be postponed.

Hill-Bird.

(*Continued from page* 1019)

anything between Rs. 25 crores and Rs. 30 crores. This comfortable position would most probably be availed of by the Government to withdraw rupee securities on quite a substantial scale from the issue department. That is to say, there will be further transfer of sterling securities from the banking department to the issue department; and a part of this expansion will be offset by the return of rupee securities to the Government. It must not be forgotten also that the cash balances of the Central Government during the present week have received very substantial replenishment from the satisfactory progress of the Calcutta Savings Week.

The exchange market has been fully steady. There have been worthwhile bills both for sterling and dollars. The market is steadier in Bombay than in Calcutta as is usual this time of the year.

Banks were sellers of T.T. on London for Ready up to six months forward at 1s. 5 31-32 d., and banks were buyers of T.T. on London for Ready up to six months forward at 1s. 6 1-32d.

D.A. sight bills quoted 1s. 6 9-32d., for three and four months.

Inter-bank call money is unchanged at ½ per cent. no borrowers.

Firms' money for call and short quoted ½ per cent. and one to four months' deposits ½ per cent.

Resume of Commodity Markets

The tension in the Far East has had naturally a discouraging effect on the main commodity markets in earlier weeks, and in the jute and jute manufactures markets especially a substantial decline in values was recorded again during the week ended Thursday. Genuine buying was postponed pending further developments. No important change in prices occurred till Tuesday. During the last three days there has been a sudden burst of activity, especially, in the Bombay markets. The continued strength of the bullion and seeds markets there caused a renewal of speculative buying as soon as it was known that the U. S.-Japanese negotiations were to be resumed and an actual outbreak of hostilities could yet be averted. The quotation in the raw cotton market is at the highest level for the week.

In spite of the announcement that the Government of India have asked the Ministry of Food to refrain from buying wheat at higher levels till the end of the year, wheat prices are now at the highest levels for the year. Operators are reserved but still iclined to the view that owing to the need for exports from this country there will be an actual shortage of the commodity before the new crop is available.

The consistent buying in the gold and silver markets along with the strength of the other markets is not quite understandable. Gold prices are more than two points higher on balance while silver prices are a point higher notwithstanding the usual selling from the "special source". The rise in prices seems to be more of an inflationary character for with the continued uncertainty regarding the Far Eastern situation, the smart rally in the raw cotton market cannot be satisfactorily explained in any other way.

Jute

Operators in Calcutta seem to take a more pessimistic view regarding the Far Eastern situation. There was a sharp break in values in both the jute and jute manufactures market early in the week. As jute is more of an export commodity, it is not surprising that operators were frightened as the only road open to shippers is the Pacific route and if hostilities were to break out in this area also, there will be a virtual cessation of exports. The amount for internal consumption is only about 20 percent of the total production. As the absence of fresh mill buying and the less satisfactory nature of shipments are depressing factors speculative activity has been at an ebb. There has also been considerable bull liquidation. There was a slight rally in mid-week with the higher prices in the other markets but the higher prices have not been maintained and values at the time of writing are around the lowest levels for the week. The latest reports regarding the Far Eastern situation, however, are hopeful and if after all the United States prove to be successful in bringing about a peaceful settlement with Japan, a moderate recovery in values may be expected.

Cotton

Surprisingly enough there was no break in prices in the Bombay raw cotton market in the early days of the week when fears regarding an actual outbreak of hostilities in the Far East were somewhat acute. Broach April-May fluctuated only around Rs. 237 what time there was a drop of more than four points in the jute futures market in Calcutta. With the continued strength of gold and seeds market the reports regarding the resumption of the U. S., Japanese talks on Tuesday caused a smart rise in values and the quotations on Wednesday were at the highest level for the week. In view of the fact that there would a complete cessation of cotton exports in the event of an actual break with Japan, the strength of the cotton market would seem rather paradoxical. But the difficulty in getting supplies on account of the shortage of wagons and the consistent buying by mills for long-staple varieties combined with encouraging reports from the cloth market have served to push up values. There has been a sharp recovery and mill buying has emerged.

Linseed

The British Government have been obliged to increase their tender prices in order to induce holders to part with their stocks but in spite of the higher values offered sellers have not been in a mood to part with their holdings. If any quantity had been tendered it was only slightly above the offered price. There is a general feeing that there will be an increase in the rate of exports before long and that it will be possible for shippers to get a higher average price.

Wheat

Under normal circumstances events in the Pacific and the announcement to the effect that the British Ministry of Food has refrained from buying Indian wheat until such time that prices were restored to normal levels should have had a discouraging effect on wheat values. The Karachi wheat market continued firm in the early part of the week as it was generally felt that it would be impossible to avoid Indian wheat in view of the nearness of India to the theatres of war in the Middle East. When there was a big rise in the cotton market on Tuesday, the Punjab commission houses and Bombay operators also got busy and quotations for ready wheat were pushed up as high as Rs. 46-12. In upcountry centres, the same tendency is entailed and stocks are being held for higher levels. The technical position of the market seems to be quite sound and it remains to be seen what the next move of the Government of India would be to bring down the prices for wheat to more normal levels.

Jute Manufactures

Contrary to the reports current in the market earlier in the week that the local stock figures at the end of November would show a substantial increase in hessian stocks, the actual figures now obtainable indicate that hessian stocks at nearly 14 crores yards are only 12 lakhs yards higher than the figure at the end of October this year. Total stocks of hessian cloth and bags were 28.92 crores yards against 25.38 crores yards at the end of the previous month. Stocks on Government account were 11.92 crores yards against 11.5 crores yards. There is a welcome decline in stocks of sacking cloth and bags which are 1.4 crores yards lower at 16.31 crores yards. There is usually a seasonal increase in consumption from now on and it may therefore be expected that there will be further reduction in stocks of sacking cloth and bags in the coming months if shipments also continue to be satisfactory.

Jute and Jute Manufactures

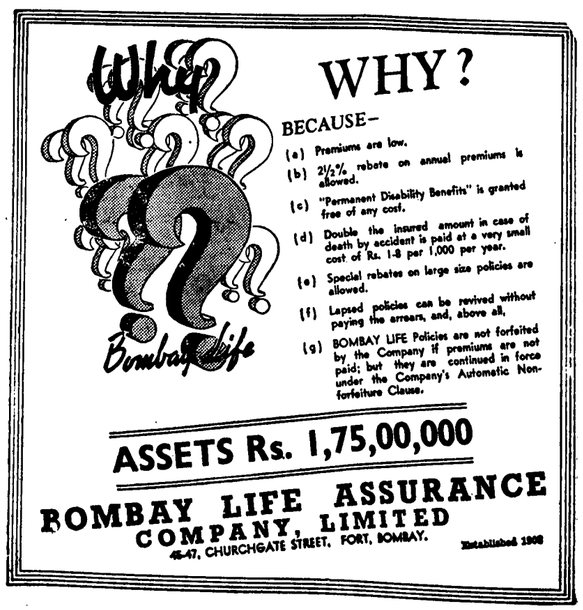
(By our Correspondent)

Calcutta, Dec. 4.

The Indian Jute Mills Association has issued a long, laboured, but unconvincing *apologia* for the attitude it has taken up towards the payment of the Raw Jute tax, on which comment was made last week. But it does not alter the fact that, having on behalf of the Industry, accepted the principle of the taxation in the Assembly, it is now taking every precaution to avoid having to pay any of it out of its own pocket. Jute Shippers are not in such a happy position by reason of the fact that so much of their production is at present being sold to Mills. So they cannot very well insist, as the Mills propose to do, on deducting the two annas tax off the Seller's invoice. The Seller in that case has a very good protest that there is no guarantee that the jute he sells to the Baler|Shipper will ultimately be exported, and so become liable to tax.

It has now been notified in the Calcutta Gazette that the extent of regulation of the 1942 Jute Crop in Bengal will be in the proportion of 10 to 16 of the 1940 "recorded" area. This reduces the Bengal area to be licensed to under 31 lakhs of acres, envisaging a crop from Bengal of something like 93 lakhs of bales, provided conditions are favourable. What the neighbouring Provinces will produce is an uncertain factor. Nothing further has been heard of the negotiations which were supposed to be going on between Bengal and Assam to bring the latter Province into line in the matter of regulation. In 1940 the outside Provinces were credited with an area under jute of 7.3 lakhs acres. In 1941 this fell to just under 6 lakhs. Current prices, if maintained, will doubtless act as an incentive to sowings, but the yield from these areas is generally inferior to that of Bengal not only in quality but in weight per acre. So it is scarcely safe to count on more than about 12 lakhs of bales from outside, which added to 93 from Bengal shows a total prospect of 105 lakhs of bales. It can only be reiterated that this figure seems to leave a dangerously narrow margin for contingencies.

The Central Jute Committee has published estimates of World consumption of Jute over a period of 5 years, the periods coinciding with the Jute Season, that is July to June. The figures are arrived at by two methods of calculation, but differ only very slightly. They are:—1936|37, 123-123.8. 1937|38, 109.5-109.3. 1938|39, 107.3-107.8. 1939|40, 109.8-108-6. 1940|41, 75.2-73.6. These are all in lakhs of bales of 400 lbs. each, and the Committee does not claim complete accuracy for the 1940|41 figures. It will be noticed that even during the period which covered the first 9 months of the War, the year's consumption was around 109 lakhs of bales. It has also been pointed out that Calcutta Mills alone next season may require as much as 80 lakhs of bales, while such countries of the world with which communications are still open are hungry for jute if shipping space were available. With the U.S.A. coming on to the production stage of a ship a day, it may be hoped that freight may be more freely available in the future, so export demand may call for a considerable quantity despite many consuming countries being closed to supplies. Whether that quantity will be available seems to depend largely on Providence, as the Bengal Government's attitude apparently is to ensure that there will be no surplus. Meanwhile reports continue to come in from places as far apart as Brazil and Manchukuo of Government encouragement for the cultivation of fibres to displace jute.



The only item of importance in the Export Jute market during the last week was the placing of an order for shipment to Spain of some 25,000 bales, but the business appears to be contingent on freight becoming available within 3 months. The prices reported were Rs. 66-12 for Firsts and Rs. 57-12 for Lightnings. Otherwise business has been almost negligible. Even with Mills very little has been reported beyond some more Outport Tossa 4s. at Rs. 51 and some odd lots of Dundee Daisee at two rupees under Fatka. The general tendency of the Futures market has been downwards, influenced by the tense political situation in the Far East and the consequent lack of demand for either raw material or manufactured goods. From a high point of Rs. 67-12 in the end of the week the price declined steadily to Rs. 63-4, after which there was a recovery to Rs. 65-8, followed by a further drop to close at Rs. 63-12.

Loose Jute also has attracted but little interest from Mills, even at marked down prices. European packing has been reported at rates varying from Rs. 14-12 basis Middles in high assortment to as low as Rs. 14 in low assortment. A limited business was done in Indian Jat Bottoms at Rs. 10 to Rs. 9-12 while supervised Jat Tossa Bottoms were recorded at Rs. 11-8. Jungli Tossa sold at Rs. 12-12 Mids. and Rs. 9-12 Bots. For Balers quality Tossa Middles Rs. 17-8 to Rs. 18 was paid for Indian District. Mofussil prices have not come down commensurately with Calcutta for imports are falling off and demand continues steady. The estimated arrivals of jute into Calcutta during November were 8,67,000 bales as against 9,58,000 bales last year. This brings the total arrivals to date for the season to 32,98,000 B|s against 35,70,000 B|s last year.

The Fabrics section has been equally affected by the uncertainty of the situation in the Far East and buyers seem to have withdrawn almost entirely for the time being. Prices consequently record an all-round drop with only a limited miscellaneous business passing. Ready nine porters have been marked down from Rs. 21-6 to Rs. 19-8. December from Rs. 21 to Rs. 19-8. January|March from Rs. 19-6 to Rs. 18-6 and April|June from Rs. 18-4 to Rs. 17-4. Eleven porters show similar recessions, Ready from Rs. 26-2 to Rs. 24, December from Rs. 25-8 to Rs. 23-12, January|March from Rs. 23-10 to Rs. 22-10 and April|June from Rs. 22-4 to Rs. 21-4. The same downward tendency is reflected in Heavy Goods rates, ready "Bs" from Rs. 38-4 to Rs. 37-10, December from Rs. 38 to Rs. 37-6, January|March from Rs. 37-12 to Rs. 37 and April|June from Rs. 37-4 to Rs. 36-8. Liverpool Twills show a similar decline, ready from Rs. 44-10 to Rs. 43-6, December from Rs. 44-4 to Rs. 43-2, January|March from Rs. 43-12 to Rs. 42-12 and April|June from Rs. 43-4 to Rs. 42-8. Small sales of Woolpacks have been reported at Rs. 1-13-6 to Rs. 1-13 for January|March shipment and a sale of December "E" bags is recorded at Rs. 31.

Indian Cotton Annual

The appearance of the familiar cotton annual (issued by Gandhi & Co.) is a reminder that the old cotton year ended in August and we are on the threshold of very important developments. Many things have been laid under contribution in this Annual which certainly retains its title to be regarded as the complete vademecum for students of the cotton industry. The transformation of the outlook came in July, and it is no surprise to find that the compiler of the Annual displays a distinct inclination to regard the mills' position as improving. The Supply Department's work and the May Conference are touched upon, and readers will find that Dr. Matthai's appreciative foreward is a just evaluation of a handy and reliable guide to happenings in India's cotton industry.

WHY?

BECAUSE—

(a) Premiums are low.
(b) 2½% rebate on annual premiums is allowed.
(c) "Permanent Disability Benefits" is granted free of any cost.
(d) Double the insured amount in case of death by accident is paid at a very small cost of Rs. 1-8 per 1,000 per year.
(e) Special rebates on large size policies are allowed.
(f) Lapsed policies can be revived without paying the arrears, and, above all,
(g) BOMBAY LIFE Policies are not forfeited by the Company if premiums are not paid; but they are continued in force under the Company's Autometic Non-forfeiture Clause.

ASSETS Rs. 1,75,00,000

JUTE

Calcutta, December 4.

THERE was considerable anxiety regarding the Far Eastern situation early in the week on the reports that there had been a breakdown in the negotiations between the United States and Japan for the conclusion of a peaceful settlement. Mills also were disinterested buyers in the market. Absolutely no business has been done for export. With the resumption of U. S. Japanese negotiations and the strength of the other markets a slightly firmer tendency was noticeable on Wednesday and the quotation recovered from Rs. 63-4 to Rs. 65-4. In to-day's session, however, there has been a decline in the quotation to Rs. 63-14. The outlook is uncertain.

Last week is was reported that the Government of Bengal had decided to increase the area under the crop to the two-thirds of the area registered in 1940 under the Bengal Jute Regulation Act. It has now been officially announced that the area under the crop for the next season is to five-eights of the area registered in 1940.

In the loose jute section rather quiet conditions have been noticeable with a very small volume of business passing. The lowest levels for the week were touched on Tuesday. Sellers have been eager to do business. Indian Jat Middles were done at Rs. 13-4 per maund.

In the pucca bales section no business has been done and quotations have been fluctuating in sympathy with the futures market.

The futures market was inclined to be rather weak till Tuesday. The anxiety regarding the war situation and the fears about the possibility of a clash in the Pacific resulted in a decline in the quotation to Rs. 68-4 per bale. In yesterday's session there was a recovery to Rs. 65-4. Rather quiet conditions are noticeable in to-day's session and the quotation is around Rs. 63-14.

JUTE MANUFACTURES

Calcutta, December 4.

THE jute manufactures market registered a sudden fall in prices with the deterioiation in the Far Eastern situation. There was tired bull liquidation, with the fall in shipments and overseas buyers inclined to await further developments. 9 Porters ready were marked as low as Rs. 19-2 from Rs. 21 at the time of last writing. There has been little recovery in prices from the lower levels. The undertone is weak. The more hopeful view regarding the Pacific situation caused a rally but it has not been well held. 9 Porters December are quoting Rs. 19-6, January-March Rs. 18-6 and April-June Rs. 17. 11 Porters ready are Rs. 24 January-March Rs. 22-10 and April-June Rs. 21-6.

In the heavy goods section very little business has been passing and quotations have been marked lower in sympathy with other sections. "B" Twills for December shipment sold on the basis of Rs. 37-10, Heavy Cees Rs. 36-8, Liverpool Twills Rs. 43-4, "A" Twills Rs. 47 and Cornsacks Rs. 36-8.

COTTON

THE Bombay raw cotton market was inclined to be quiet but steady early on the week as the Far Eastern situation had a restraining influence. Mill buying for spot, especially for long staples, continued good. During the latter half of the week, however, the continued strength of the seeds and bullion markets and the resumption of the U. S. Japanese negotiations have resulted in a sharp rise in prices. Broach April-May are thirteen points higher at Rs. 250. Bengal December-January were Rs. 151-12 against Rs. 143, Oomra December-January Rs. 213-8 against Rs. 197-8 and March Rs. 201 against Rs. 188-8.

Sellers of foreign growths are rather reserved with the uncertainty regarding the future of imports.

The New York market also has been affected by the Pacific situation. Prices were fluctuating irregularly in the earlier part of the week. A firmer tone has been noticeable towards the close. December were 16.31 cents and March 16.60 cents.

GOLD

Calcutta, December 4.

THE Bombay gold market has been very active and there has been a substantial rise in prices on speculative buying by option dealers. The abrupt rise in prices for gold is not quite understandable as other markets have remained steady. There has been a widening in the discount for forward positions. Buying has been confined mainly to ready position. Gold ready are quoting Rs. 46-8, First Settlement Rs. 46-8 and Second Settlement Rs. 46-7.

The London price for gold has remained unchanged at 168s.

SILVER

Calcutta, December 4.

THE Silver market was inclined to be steady in the earlier part of the period under report and there was no appreciable rise in prices with the reports regarding selling fronm the "special source." The further rise in gold prices, on Wednesday, however, has caused speculative activity in the silver market also and closing quotations are at the highest levels for the week. Indian Mint Silver ready are quoting Rs. 64-9, First Settlement Rs. 64-9, and Second Settlement Rs. 64-10. The quotations at the end of last week were Rs. 63-2-6. First settlement Rs. 62-15-6 and Second settlement Rs. 62-15.

The London market has been dull and featureless and the quotation for both spot and forward has remained unchanged at 23½d.

WHEAT

Calcutta, December 4.

THE reports to the effect that the Government of India have requested the British Ministry of Food to refrain from buying Indian wheat kept down prices but the continued strength of the other markets and the more hopeful view regarding the Pacific situation caused a jump in prices on Wednesday and closing quotations are at the highest levels for the week. There has been heavy short-covering and speculative buying. Choice white ready were Rs. 46-2, January Rs. 46 and July Rs. 39-8 against Rs. 44, Rs. 44 and Rs. 37-13 respectively.

In the Calcutta market also new high levels have been recorded. Cawnpore ready are quoting Rs. 6-7 and May Rs. 5-7-3.

Stock Markets to-day and to-morrow

INDIAN IRON AND STEEL ACCOUNTS

THE continued uncertainty regarding the Far Eastern situation has naturally had a restraining influence on the stock markets in both Bombay and Calcutta. Usually, there would have been panicky selling. On this occasion there was only a precautionary marking down in prices and the reports regarding the resumption of the U.S.-Jap talks in midweek, therefore, caused a slight rally. The latest reports regarding the Far Eastern situation, however, are not quite encouraging and values are again at the lowest levels for the week. Whether there will be an actual outbreak of hostilities will be definitely known in a few days. Calcutta seems to be more apprehensive of a Japanese attack than the Western Capital.

* * * *

Commenting on the last occasion on the results of the *Indian Iron and Steel Company, Limited*, for the year ended March, 1940, I pointed that with the higher rate of working it would be possible for the company to report a higher level of earnings, above Rs. 1 crore, for the year ended March, 1941 and that in such a case it would be possible to increase the dividend to shareholders. My anticipations in this regard have been substantially correct for, as our readers are already aware, the total dividend for 1940-41 is higher at Rs. 2-4 per share against Rs. 2 per share. And the accounts now available reveal that earnings for the year have been well over Rs. 1 crore.

Production was running at a high level throughout the year. The production for the Hirapur No. 2 Furnace constituted a record on a furnace lining for the plant. The company's products have been mainly taken up for war supply purposes and the diminution of trade with Japan, which has since come to a standstill, was compensated by the offtake of the surplus pig iron by other markets. There has been no material change in prices.

Total sales were higher at Rs. 5,31 lakhs against Rs. 5,02 lakhs in 1939-40. There is an appreciable increase in works-in-progress at the end of the year. But for the sharp increase in the cost of raw materials purchased the earnings for 1940-41 would perhaps have been even higher. Freight and insurance charges are slightly lower at Rs. 76.08 lakhs.

The net profit, before providing for taxation and depreciation, for the year ended March, 1941 is Rs. 1,04,37,098 against Rs. 78,67,058 for the previous year. The amount set aside to depreciation is Rs. 14,00,000 against Rs. 13,00,000 while the provision for taxation is Rs. 28 lakhs against Rs. 14 lakhs. The sum of Rs. 1,09,213 was written off Parsundi and Talgora Colliery property on the last occasion. On this occasion the sum of Rs. 3 lakhs has been transferred to a newly created Debenture Sinking Fund. The amount carried forward to the next accounts is higher at Rs. 6,01,939 against Rs. 4,53,614 brought in.

As regards the prospects for the current year, it should be said, that they are quite satisfactory. The share of Steel Corporation's earnings should be reflected in the next accounts.

Coming to the balancesheet, the Reserves of the company now amount to Rs. 2,13,93,618 as against Rs. 1,80,09,066 for the previous year. The increase is principally due to the provision of Rs. 28 lakhs made this year for taxation. Since the close of the year under review the Company's liability to taxation for the year 1938-39 has been assessed and payment made under protest. The decision of the High Court in the Company's appeal in respect of 1938-39 assessment was not favourable and having obtained leave to appeal to the Privy Council, the Company's solicitors are at present engaged in drawing up the brief for the Appellate Court in England.

* * * *

The account of the *Elgin Mills Company, Limited* and the *Cawnpore Textiles, Limited* for the half-year ended September, 1941, as covering a period of hectic rise in prices for cotton textiles, make interesting reading. There has been a substantial rise in earnings in the case of both companies and the ordinary dividends have been increased.

The improvement in the net profit of the *Cawnpore Textiles, Limited* for the half-year is more pronounced. The figure before providing for taxation and depreciation is Rs. 4,99,668 against Rs. 1,86,049 for the previous half-year. The amount set aside to depreciation is higher at Rs. 75,000 against Rs. 50,000 while the provision for taxation is the considerable sum of Rs. 2,64,000 against Rs. 31,000. The transfer to General Reserve is Rs. 50,000 against Rs. 30,000 while the allocation to Debenture Sinking Fund is Rs. 6,250 against Rs. 11,250. The dividend has been increased to five annas per share from three annas per share formerly. Even after the increased distributions the amount carried forward is higher by Rs. 16,000 at Rs. 53,034. The return on the shares quoting around Rs. 10-4 cum-dividend is over 6.25 per cent tax-free.

* * * *

The company repaid the 7 per cent mortgage debentures amounting to Rs. 2.5 lakhs in April, 1941. The balance at credit of the 7 per cent Second Mortgage Debenture Fund of Rs. 73,496 has been transferred to the General Reserve Fund.

* * * *

The *Elgin Mills Company, Limited* has earned a net profit, before providing for taxation, for the same half-year, of Rs. 18,96,925 against Rs. 10,25,051 for the previous half-year. The amount set aside to depreciation is Rs. 2,50,000 against Rs. 2 lakhs while the provision for taxation is Rs. 11,30,000 against Rs. 4,75,000. The allocation to Debenture Sinking Fund is the same at Rs. 25,000 while the transfer to General Reserve is Rs. 1,49,910 against Rs. 1 lakh. The dividend recommended by directors is Re. 1 per share against As. 12 per share. It will be noted that almost the whole of the increase in earnings has been taken up by the higher provision for taxation.

* * * *

On the last occasion I pointed out that Elgin Ordinary shares were undervalued in relation to Cawnpore Textiles and that there was much scope for rise in prices. The quotation then was around Rs. 19-10. There has since been an appreciation in the value to Rs. 33 cum-dividend.

* * * *

Thanks to the vastly improved conditions in the jute industry the *Rameshwara Jute Mills Limited* has found it possible to repay all the arrears of dividends on the preference shares. The shares are quoting Rs. 14-12 cum-dividend.

The arrears of dividend for five half-years ended March, 1941 and the dividend for the half-year ended September, 1941 amounts to Rs. 1 4|5 per share. As the net price is Rs. 12 there is scope for appreciation.

WATCH-DOG.

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, December 5.

Developments in the Far Eastern situation have been the dominating influence on the stock markets during the past week. There is naturally considerable anxiety regarding the outcome of the U-S-Jap negotiations. The news earlier in the week that there had been a break down in the talks between the two countries had a discouraging influence and prices were marked down alround. The resumption of the talks in mid-week had a stimulating effect but there has been a setback in to-day's on the reports that a rupture in diplomatic relations between the United States and Japan is imminent. Markets have closed to-day at 1-30 p.m. on account of the Calcutta Savings Week. The undertone in the several sections is uncertain and there is a marked dimunition in the volume of business. Pending a clearing up of the situation in the Pacific there cannot be any recovery in prices.

The giltedged securities section has not been in any way affected by the developments in the international situation. Quotations have been maintained around last levels. Business passing is on a very restricted scale. 3½ per cent Paper is unchanged at Rs. 96. Among terminable loans, 3 per cent 1963-65 were done at Rs. 94-15, 3 per cent 1951-54 at Rs. 99-13, 3 per cent Second Defence Loan at Rs. 99-13, 3½ per cent 1947-50 at Rs. 103, 4 per cent 1960-70 at Rs. 113 and 4 per cent 1943 at Rs. 103-8. Among provincial loans, 3 per cent 1958 Punjab bonds were done at Rs. 99-1, 4 per cent Punjab bonds 1948 at Rs. 105-10 and 4 per cent U. P. bonds 1944 at Rs. 105.

Among fixed interest securities, business in public bodies debentures has been very restricted. 3 per cent *Calcutta Port Trust* 1951 were done at Rs. 99-4. Among industrial debentures, *Dalmia Cement* were Rs. 106-8 and 6 per cent *Humayan Properties* Rs. 107. Interest in first class preference issues has been sustained but business has not been possible owing to the scarcity of offerings. *Albion* were Rs. 173, *Clive* Rs. 147-12, *Hastings* Rs. 147 ex-dividend, *Hukumchand* Rs. 167 cum-dividend and *Howrah* "A" preference Rs. 166 ex-dividend. Among other sections, *Dalmia Cement* were Rs. 125, *Burn & Co.* Rs. 151, *B. I. Corporation* Rs. 186, *Dunlop Rubber* Rs. 120 and *Rohtas Industries* Rs. 169.

In the Cotton Section, rather firm conditions have been noticeable but the rise in prices could not be pronounced on account of the weakness of other sections. The feature of the week is the rise in *New Victoria* ordinary and preference shares on reports that dividends would be paid on these shares. *Basanti* have remained unchanged while *Cawnpore Textiles* are slightly higher at Rs. 10-4. *Dunbar* have been marked up at Rs. 296 with *Elgin* at Rs. 33.

There has been slightly more enquiry for Coal shares with the rise in prices for coal. *Bengal* were Rs. 406, *Bokaro and Ramgur* Rs. 18-8, *Equitable* Rs. 39-8, *New Beerbhoom* Rs. 18-15, and *West Jamuria* Rs. 31-12. Among the speculative counters, *Talcher* were higher at Rs. 2-11, *Bhalgora* at Rs. 6 *Burra Dhemo* Rs. 6-5 and *Ghusick and Muslia* at Rs. 5-10.

In spite of the publication of excellent earnings figures for some more companies the Jute section has been rather quiet on account of the weakness of the jute and jute manufactures markets. *Adamjee* changed hands at Rs. 32-14. *Agarpara* were nearly three points lower at Rs. 41-4. *Anglo-India* were dealt in at Rs. 389, *Champdany* at Rs. 206, *Clive* at Rs. 28-2, *Fort Gloster* at Rs. 625, *Gourepore* at Rs. 770 and *Howrah* at Rs. 59-10 ex-dividend. *Megna* were Rs. 67, *National* Rs. 27-14 and *Nuddea* Rs. 70. *Reliance* were Rs. 62-8.

In the Engineering section, rather weak conditions have been noticeable with *Indian Iron* and *Steel Corporation* at Rs. 35-10 and Rs. 21-10 respectively. Earlier in the week the quotations were higher at Rs. 37-2 and Rs. 22-4 respectively. *Burn & Co.* were Rs. 402, *Jessop* Rs. 21, *Kumardhubi Engineering* Rs. 6-8 and *Saran Engineering* Rs. 7. After the setback in the quotations earlier in the week there was a recovery on Wednesday and Thursday but in to-day's session the quotation is again lower at Rs. 35-10.

Sugar shares have continued firm with *Balrampore* at Rs. 14-4, *Buland* at Rs. 30-12, *Carew & Co.* at Rs. 14-4, *Raza* at Rs. 29-12 and *Cawnpore* at Rs. 27-12.

Interest in Tea shares has not been sustained. *Jutlibari* were done at Rs. 18-4, *New Samanbagh* at Rs. 32-8, *Sonai River* at Rs. 22-8 and *Tezpore* at Rs. 9.

In the miscellaneous section, *Burma Corporation* and *Indian Copper Corporation* have been noted at Rs. 4-12 and Rs. 2-9 respectively. *B. I. Corporation* have remained steady at Rs. 5-14 while *Indian Cable* are appreciably lower at Rs. 24-12. The accounts of this company are eagerly awaited, *Indian Wood Products* were steady at Rs. 31-4 while *Dunlop Rubber* were easier at Rs. 51-8. *Paper* shares were very firm earlier in the week but there has been a recession in prices during the latter half of the week. *Titaghur Paper* "A" and "B" shares were Rs. 23-12, *Mysore Paper* Rs. 19-4, *India Paper Pulp* Rs. 174 and *Shree Gopal Paper* Rs. 17-11. *Assam Saws* were Rs. 4-6, *Bengal Timber* Rs. 207 and *Publicity Society* Rs. 11-12.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, December 5.

Money.—The rate for call money continued to be quoted at ¼ per cent.

Exchange Market.—Banks were selling T.T. at 1s. 5 31|32d. and buying three months' bills at 1s. 6 9|32d.

Securities.—There was practically no change to report in this section. Prices were unchanged and the volume of business continued to be meagre. 3½ per cent Paper remained stagnant at Rs. 96. 1948-52 were done at Rs. 98-2; 1951-54 at Rs. 99-12; 1963-65 at Rs. 95; 1947-50 at Rs. 103-13; 1960-70 at Rs. 111-2; 1955-60 at Rs. 114-13; 1945-55 at Rs. 110-12 and 1946 Defence Bonds at Rs. 102.

Shares.—Activity in the local share market continued to be restricted during the week under report. Early in the week share values were marked down on general liquidation following the developments in the Far East. In mid-week, however, prices improved all round on speculative support, showing substantial gains. At higher levels profit-taking appeared with the result that prices declined imparting a weak tone to the market. Towards the close of the week prices again showed a tendency to move up, the closing prices being the highest levels for the week.

Textiles.—This section, after a small setback, moved up again on good support. Speculative issues experienced moderate fluctuations. *Bombay Dyeing,* after opening at Rs. 1,450, showed a gain of about 40 points to close at Rs. 1,487-8. *Central India* were an outstanding feature, having improved from Rs. 480 to Rs. 513. *Kohinoor* met with good buying and closed higher at Rs. 629. *Century* were done at Rs. 530; *Colaba* at Rs. 318; *Gokak* at Rs. 385; *New Great* at Rs. 410; *Simplex* at Rs. 272 and *Swadeshi* at Rs. 564. In the cash list, E. D. *Sassoon* were higher at Rs. 4-2; *Indore Malwa* at Rs. 333 and *Luxmi Cotton* at Rs. 848-12. *Sholapoor, Vishnu* and *Western India Spinning* were unchanged at Rs. 7,120, Rs. 1,800 and Rs. 2,080 respectively.

Hydro-electrics.—*Andhra Valley* continued to be steady at Rs. 1,755, while *Tata Power* recorded a small rise to Rs. 1,830. *Tata Hydro* were a dull market at Rs. 190.

Steels.—Steel shares moved narrowly during the week and the closing prices showed a small loss on balance as compared with the previous week. *Tata* ordinaries and deferreds, after opening at Rs. 427 and Rs. 2,290, met with heavy liquidation following the developments in the Far East. The ordinaries declined to 423 and the deferreds to Rs. 2,267-8. Towards the close of the week there was a small improvement in prices, the ordinaries finally closing at Rs. 433-8 and the deferreds at Rs. 2,332-8. *Tata Steel* first preferences came in for business at Rs. 211-4 and Second preferences at Rs. 155-12.

Banks, Insurance and Railways.—Bank shares showed a small change in prices, *Bank of Baroda* being marked at Rs. 118; *Bank of India* at Rs. 150, *Central* Bank at Rs. 54; *Imperial Bank* fully paids at Rs. 1,632-8; *Contributories* at Rs. 406-4; *Reserve Bank* at Rs. 114 and *Union Bank* at Rs. 7-7-6.

In the Insurance section, *New India* showed a small decline from Rs. 59-12 to Rs. 58-8, while other shares remained nominal.

Among Railway shares, *Central Provinces* met with some buying at Rs. 109.

Miscellaneous.—There was some profit-taking in *Associated Cement,* which after touching a low of Rs. 177-8, closed better at Rs. 178-8. Following the uncertainties in the Far East *Bombay Burmah Trading* declined to Rs. 585 which touched a high of Rs. 610 at one time. The closing rate was slightly better at Rs. 586-4. *Belapur Sugar,* after opening at Rs. 294, improved to Rs. 334 in mid-week, but again closed lower at Rs. 327 owing to profit-taking. *Scindia Steam* were maintained at Rs. 27-2; *Tata Oil* at Rs. 66-8 and *Wimco* at Rs. 227. *Indian Iron* came to business at Rs. 36; *Steel Corporation* at Rs. 22 and *Premier Construction* at Rs. 137. *Shivrajpur Syndicate* attracted good attention, the price having improved to Rs. 54. *Tata Chemicals* were slightly marked down from Rs. 19-4 to Rs. 18-6.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, December 4.

The local market was fairly active during the week with planting issues having a good turnover. Selective buying continued to be in evidence in the Textile section. Sugars were maintained.

Securities.—Prices remained unchanged in the local securities market, 3½ per cent Paper being steady at Rs. 96. 4 per cent 1960|70 were done at Rs. 111-5. State Loans met with good support, 3 per cent *Mysore Loan* being done at Rs. 105-12. Provincial Loans were unchanged.

Mills.—Prices were well maintained in this section. *Buckingham and Carnatic* improved slightly to Rs. 314-8, while *Cambodia* were steady at Rs. 15. *Vasanta* were done at Rs. 200; *Janardhana* at Rs. 86; *Ranga Vilas* at Rs. 102; *Rajalakshmi* at Rs. 134-8; *Palani Andavar* at Rs. 100 and *Mysore Spun Silk* at Rs. 13-6.

Utilities.—Business in this section was limited owing to scarcity of sellers. *Cochin State Power* were dealt in at Rs. 9-1 c.d. *South Madras Electric* 5½ per cent Debentures were crossed at Rs. 110-8.

Plantations.—Planting issues were inclined to be easier towards the close of the week with buyers waiting for lower levels. *Kalpetta* closed slightly easier at Rs. 28-1; *Midland* at Rs. 10-1; *Tropical Plantations at* Rs. 27-4; *Manalur* at Rs. 4-6 and *Rajagiri* at Rs. 10. *Vaikundam,* after touching a low of Rs. 14-4, closed slightly higher at Rs. 15-4. *Thamarapally* were in good demand following the declaration of an interim dividend of 7½ per cent, payable on or after the 20th December, 1941. *Nellithanam* were also in good enquiry at Rs. 12-4 c.d. on the announcement of an interim dividend of 6¼ per cent, payable on or after the 8th December, 1941. In the Tea section, *Chembra Peak* were maintained at Rs. 6-2. *Kalasa* were marked at Rs. 9-10; *Highland Produce* at Rs. 31-8 and *Devon* preferences at Rs. 136-8.

Sugars.—*Travancore Sugars* had sellers at Rs. 15-12 c.d. *Deccan Sugar* small shares were maintained at Rs. 63. *India Sugar* attracted some attention at Rs. 12-8 and *United Breweries* at Rs. 118-4.

Miscellaneous.—Paper shares were in good request. *Mysore Paper* were done higher at Rs. 19-8 c.d. *Orient* came in for business at Rs. 18-14; *Shree Gopal* at Rs. 17-8 and *Star* at Rs. 17. *Mysore Chemicals and Fertilisers* have improved to Rs. 19-14. *Mettur Chemical* ordinaries were steady at Rs. 18-4, while the deferreds were done higher at Rs. 6-4 as compared with Rs. 5-11 in the previous week. *Indian Steel Rolling Mills ordinaries* were on offer at Rs. 8-8. *Andhra Cement* preferences changed hands at Rs. 139-8 c.d.

BOMBAY TELEPHONE COMPANY, LIMITED

NOTICE is hereby given that the DEBENTURE STOCK TRANSFER BOOKS and the REGISTER OF DEBENTURE STOCKHOLDERS of the Company will be closed from the 18th day of December, 1941 to the 31st day of December, 1941, both days inclusive, for preparation of Interest Warrants.

P. V. R. IYER,
Joint Secretary.

Bombay, 1st December, 1941.

THE CENTRAL PROVINCES RAILWAYS COMPANY, LIMITED

NOTICE is hereby given that the Thirty-Second Ordinary General Meeting of the Central Provinces Railways Company, Limited, will be held on Thursday, the 18th day of December, 1941, at 4-30 p.m., at the Registered Office of the Company, Home Street, Fort, Bombay, to transact the following business:—

1st.—To adopt the Directors' Report and Audited Statement of Accounts made up to 30th September, 1941.

(*Annual meeting, 19th December, 1941 at 11 a.m.*)

Audited accounts for the year ended 31st March, 1941:—

Capital Structure.—During the year under review, of the 4 per cent Convertible Second Mortgage Debenture Stock outstanding, £2,112 Debentures were converted, in accordance with the terms of issue, into 1,408 Ordinary shares of Rs. 10 each, which rank for dividend from 1st April, 1941.

Excluding the Participating Income Debentures, the total Ordinary Share Capital and Debenture Account is now as follows:—

	Rs.	A.	P.
Ordinary Share Capital	2,53,89,960	0	0
Debentures	2,05,07,786	0	0
Total ..	4,58,97,476	0	0

Accounts.—For the year 1940-41 the gross profits amounted to Rs. 1,25,55,428.

After making provision for Debenture interest, labour benefit schemes, depreciation and other appropriations and all charges for the year and reserving a sum of Rs. 28 lakhs for income- and super-tax liability and adding Rs. 4,53,614 brought forward from last year, there is available a sum of	63,11,512	0	0
From which is to be deducted the amount of the first interim dividend of 12 annas per share declared on 25th March, 1941	19,03,191	0	0
Leaving a balance of	44,08,321	0	0
As already advised the Directors have declared a further interim dividend of Rs. 1-8 per share amounting to ..	38,06,382	0	0
Leaving a balance of	6,01,939	0	0

which amount the Directors recommend to be carried forward.

The procedure adopted by the Board in distributing in the form of a second interim dividend what would have been their recommendation of the final dividend follows last year's practice which met with the approval at the last Annual General Meeting.

Works and Production.—As the Directors are precluded from publishing the production figures, they are unable to present a comparative resume of the year's working, but throughout the year the plant operations were satisfactory. At Hirapur No. 1 Furnace continues to yield good operation results, while No. 2 Furnace has to date achieved a record production on a furnace lining or the plant. The new Coke Oven Battery at Hirapur is giving satisfactory results and Coke Ovens at Kulti have maintained their average production.

The General Castings shops and Pipe Foundries at Kulti were busy throughout the year. The Sleeper Shops were not so fully occupied. The Machine Shop was exceptionally busy throughout.

Due to electrical trouble at the Power House the output of the subsidiary Company, *The Eastern Light Castings Company, Limited,* was considerably restricted.

Sales.—The Company's products have been mainly taken up for war supply purposes and the diminition of trade with Japan, which has since come to a standstill, was compensated by the off-take of the surplus pig iron by other markets. There has been no material change in prices.

The Company's collieries maintained a satisfactory output throughout the year.

Plant.—All the plant, including that installed in connection with extension, operated satisfactorily throughout the year, with the exception of the electrical unit in Kulti. The Power House at Kulti was damaged by a lighting discharge during the 1940 monsoons, resulting in some of the generators being put out of commission for varying periods. Apart from this, there has been no serious interruptions of power supply. The matter is engaging the attention of the Board.

Labour.—There was no serious labour trouble throughout the year, with the exception of a lightning strike at the Hirapur Coke Ovens in October, 1940, which spread to the Blast Furnaces. The strike was obviously engineered by outside elements and was of short duration.

An extra food allowance of one anna per rupee of wages earned for workmen earning up to Rs. 50 per month was sanctioned from April, 1940. Total cost of this allowance for the year amounted to Rs. 3,22,680.

The workmen received additional wages for three weeks under the Extra Wages Benefit Scheme in accordance with the rate of dividend paid on the year's working.

The Board further sanctioned one week's wages to all workmen on the Company's register on 23rd September, 1941 as a special payment.

(*Half-yearly meeting,* 20*th December,* 1941 *at* 11-25 *a.m.*)

Audited accounts for the half-year ended 30*th September,* 1941:—

The accounts show a profit of Rs.9,25,646-6-2. After providing Rs. 6,28,468-0-0 for taxation (including Excess Profits Tax), Rs. 1,32,739-0-0 for depreciation and placing Rs. 30,000-0-0 to Welfare Reserve, there is an available balance at credit of Profit and Loss Account of Rs. 1,37,130-6-0 which including Rs. 2,690-15-10 brought forward from last half-year.

The directors propose to dispose of this as follows:—

	Rs.	A.	P.
In paying a Dividend on the Preferences Shares at the rate of Rs. 7 per cent per annum, without any deduction for Income-tax paid by the Company	35,000	0	0
In paying a Dividend on the Ordinary Share of Rs. 4 per share, without any deduction for Income-tax paid by the Company ..	80,000	0	0
In carrying forward	22,130	6	0
Total ..	1,37,130	6	0

The directors would draw the particular attention to a very large sum which it has been necessary to reserve in this half-year for taxation. The main portion of this is on account of Excess Profits Tax, but in recent years Income-tax and Super-tax have also become an increasing burden. It has been the custom in this Company to pay dividends after the deduction of tax and in 1922 a "tax free" dividend of 10 per cent represented profits amounting to 11.46 per cent before the deduction of Income-tax and Super-tax. In 1941-42 a "tax free" dividend of 10 per cent represented profits amounting to 14.12 per cent before the deduction of Income-tax and Super-tax. This is apart altogether from the sums which have to be paid in Excess Profits Tax. It will, therefore, be seen that, disregarding entirely the incidence of Excess Profits Tax, the maintenance of a "tax free" dividend of 10 per cent would have necessitated an increase between 1922 and 1941 of 23.2 per cent in the profits for distribution. The directors have recommended an increased dividend this half-year, but they trust shareholders will realise that the maintenance of dividends payable after the deduction of tax necessitates increasingly large profits.

That portion of the profits which the Taxation Authorities regard as excess profits suffers a total taxation of 74½ per cent, including Income-tax, Super-tax and Excess Profits Tax, which leaves a very small surplus for setting aside necessary reserves. In certain companies where there is no standard period in which a reasonable profit was made, this taxation bears most unfairly.

In the past a portion of the Company's Reserve has been expended in the purchase of fixed assets and in order to make it clear to shareholders that part of the Reserve may be no longer liquid and therefore no longer available in an emergency a new account has been opened and designated. "Capital Fund." The sum of Rs. 16,00,000 has been transferred from the Reserve to this new account, which although in the nature of a fixed capital account, still represents reserves built up by the Company.

The final jute forecast of 54,22,555 bales indicates that the Bengal Government has been successful in the restriction policy which was embarked upon last season. Prices have appreciated considerably, but in view of the large stocks carried over from the previous season, there appears to be sufficient jute available for this year's requirements.

In accordance with the working time agreement, the Mill worked 45 hours weekly until the end of August and 50 hours weekly from the 1st of September to the end of the period under review.

There has been a gratifying increase in the demand for hessian, while stocks have been maintained at reasonable levels. Hours were, therefore, increased to 54 hours a week as from 13th October.

The price of heavy goods has not increased to the same extent as hessian; moreover, there has been an increase in stocks and a continued lack of business from the Far East. The position, however, may be considered satisfactory in the meantime.

The future will continue to be governed by the volume of goods which the Company is able to ship. This depends upon the exigencies of war which are impossible to predict.

Managing Agents.—Messrs. Bird & Co.

ISSUED WEEKLY

Vol. XXVIII. No. 24 SATURDAY, DECEMBER 13, 1941 Price Re. 1

Insure and Increase Nation's Strength

Financial Independence of the individual is the measure of Nation's financial strength.

In this hour of world turmoil, all Life Insurance Policy-holders should take stock of their insurance cover and ascertain just how strongly they are fortified against the unpredictable that lies ahead.

And, those individuals who have not yet made provision for their protection need do so without delay and thereby contribute towards Nation's strength.

Be advised and write to-day to

WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

CONDITIONS in the interbank call money market show a marked change with the rate quoting ¾ percent in Bombay and 1 percent in Calcutta. Other indices of the money market also point to the same conclusion. Sales of intermediate Treasury Bills between December 3 and December 8, amounted only to Rs. 52 lakhs. On the weekly tender day, applications came to only Rs. 1,23¾ lakhs against Rs. 1 crore on offer. The average rate of accepted tenders has sharply risen to annas 15 and pies 11 per cent per annum as compared with annas 13 and pies 10. Considering the poor interest shown by the market for Treasury Bills as is revealed by the total absence of keen bidding and considering that sales of tap bills are not yielding much, it is difficult to understand why sales of intermediate Treasury Bills are being continued. This is all the more inexplicable as the Government's cash position is extremely comfortable. So comfortable indeed, that it has been found possible to withdraw another lot of Rs. 10 crores of rupee securities from the issue department of the Reserve Bank. We do not think any useful purpose is served by fashioning Treasury Bills policy and operations in such a way as to cause a steep rise in the discount rate while, at the same time, the Government are not receiving any large funds from such sales. There is no justification for the continuance of intermediate Treasury Bills. We must also make a suggestion as regards the tender Treasury Bills. From the way in which the Reserve Bank seems to be anxious to get the full quota of the amount for which tenders are invited, the market justifiably draws the inference that what the bank authorities are keen on, is not the rate, but the securing of the specified amount. So far as we remember, the Reserve Bank has not, within the past few months, rejected applications in such a way as to result in the Government securing only a partial amount of the weekly offer. One of the most effective weapons in the hands of the Government is to reject unsuitable tenders and thereby give a clear indication to the market that they are prepared to take three months accommodation from the market only if the rate is suitable. The present system of accepting tenders without regard to the rate but with due regard only to the securing of the total, is unscientific; and, what is worse, is unbecoming of a Government whose credit is so high not only at home but abroad. The Government as well as the Reserve Bank authorities have always suffered from self-diffidence about the credit of the Indian Government. This self-diffidence in respect to loans is responsible for the investor always getting a larger yield on a new loan than is warranted by the intrinsically high credit which India enjoys. Why should this self-diffidence extend to even short-term borrowings? This week's discount rate of annas 15 and pies 11 compares with annas 12 paid by banks for three months deposits. That is to say, the credit of the Indian Government is lower than of any decent bank. It is time the weapon of rejecting unsuitable tenders is used effectively and scientifically.

And the Government can well afford to do it. The returns of the Reserve Bank for the week ended December 5, show receipts for the Indian Government from the British Government of anything like Rs. 20 crores.

Foreign balances held in the banking department have increased to Rs. 64.44 from Rs. 59.83 crores. In the issue department, sterling securities have gone up by Rs. 17 crores to Rs. 197.63 crores. The total increase in sterling assets is thus 21½ crores of which it is not unlikely that, say, Rs. 1½ crores is accounted for by purchases of sterling made by the Reserve Bank in the open market. That is to say, the month-end settlement as between the Indian Government and the British Government must have resulted in the Indian Government getting Rs. 20 crores at the end of November. The cash balance of the Central Government as on December 5, shows a rise from Rs. 8.49 crores to Rs. 15.87 crores. Actually, the figure would have been Rs. 25.87 crores if it were not for the fact that rupee securities for this amount have been withdrawn from the issue department. Rupee securities in the issue department now stand at Rs. 46.49 crores, as compared with Rs. 49.62 crores on the eve of the operations connected with the repayment of the dated sterling loans. There has thus been an expansion of Rs. 17 crores against sterling securities and a contraction of Rs. 10 crores against rupee securities. The result is a net expansion of Rs. 7 crores. Active note circulation reached a new record at Rs. 294.87 crores as compared with Rs. 287.77 crores on December 5. The Government started the month of December with a cash balance well above Rs. 15 crores; and, by the end of the month, another substantial replenishment will take place as a result of payments by the British Government. In this process, sterling balances are piling up on an embarrassingly large scale and it is difficult to understand why a further instalment of sterling debt repatriated is not being taken on hand.

The statement of the Reserve Bank in the banking department shows decreases in deposits under two heads. Central Government's deposits alone have increased from Rs. 8.49 crores to Rs. 15.87 crores. Those of Burma have decreased from Rs. 3.23 crores to Rs. 2.79 crores. Those of Provincial Governments from Rs. 5.36 crores to Rs. 4.62 crores; those of banks from Rs. 47.71 crores to Rs. 42.68 crores; and miscellaneous deposits from Rs. 4.30 crores to Rs. 3.27 crores. Notes held in the banking department have declined from Rs. 11.72 crores to Rs. 9.78 crores.

The statement of the Imperial Bank for the week ended December 5, shows cash balance at Rs. 23.96 crores as against Rs. 24.01 crores. Deposits are higher at Rs. 108.77 crores, in spite of the disbursements which the bank should have made as agents of the Reserve Bank at the beginning of the month.

The exchange market has been very steady. Bills have made good showing. Transactions in discount bills were particularly large. Owing to the complications in the mail route to London, banks have raised their bill rate. The immediate future is difficult to understand as it will take sometime before we know how far shipping services between America and India will be affected by the latest developments in the Pacific.

TREASURY BILLS
India

Tenders for Rs. 1,00,00,000 of three months' Government of India Treasury Bills were opened on Tuesday, December 9, 1941. Total amount offered was Rs. 1,23,75,000. Tenders at Rs. 99-12-3 per cent and above were accepted in full and those at Rs. 99-12-0 per cent were allotted approximately 79 per cent. Total amount accepted was Rs. 1 crore, the average rate of accepted tenders being -|15|11 per cent per annum.

Tenders for Rs. 1,00,00,000 of three months' Government of India Treasury Bills will be received on Tuesday, December 16, 1941. Successful tenderers should make payment on Friday, December 19, 1941. Other conditions are as usual.

Three months' Intermediates will be sold from December 10, 1941 to December 15, 1941 at Rs. 99-12-3 per cent subject to the conditions previously announced (viz. sales can be stopped at any time without previous notice if Government think it necessary).

Three months' Intermediates sold from December 3, 1941 to December 8, 1941 amounted to Rs. 52,00,000.

During the week ended December 5, 1941, Government of India Treasury Bills for Rs. 3,38,50,000, were sold in favour of the Issue Department of the Reserve Bank of India.

Finance Abroad

Thursday Morning.

It is of a piece with the staggering intelligence reaching this week that the only change of consequence to record here is the further advance in bullion. But this is a local, although not temporary phenomenon for which the true explanation must be sought in the survival of the hoarding instinct. The fillip given to silver and gold is not due to any rise in New York prices for either gold or silver as yet. There has been no change in exchange rates so far except for the disappearance of the familiar entry against T.T. from London on Kobe. The 14d. rate will not be quoted; for Japan has declared war. The Chinese dollar is unaltered and the most recent of measures adopted to protect and advance China's interests is the issue of regulations designed to let China get value for her exports. A press note issued last week stated that in order to enable China to control her foreign exchange and to ensure that the proceeds of imports from China reach the hands of *bona-fide* Chinese exporters the Government of India is introducing rules whereby import licenses granted for imports will be valid only if payment for the goods concerned is made in a manner which has the approval of the Reserve Bank of India. The rules came into force on December 1st, and Import Controllers have been asked to give particulars of the system to those who ask.

The rule will be regarded as the converse of that adopted last year to get full value in dollars for certain specified exports from the dollar area. The rule has been introduced to make sure that Free China gets as much foreign exchange as possible because China's currency has depreciated first through currency rivalries in North China and secondly through the contraction of exports alongside of the spread of the Sino-Japanese war since 1939.

The effect of the war on the Bombay market except for the rise in the rate for call loans appears to be negligible. The Hong-Kong dollar is another Far Eastern currency whose value in London is unaltered. The London quotation is still 15 1|32d. per dollar while Indian banks continue to sell telegraphic transfers on Hong-Kong at Rs. 85¼ per 100 dollars. This appears the proper place for mention of amendments to the Colony's Ordinances whereby the head office of the Hong-Kong and Shanghai Banking Corporation has been transferred to Singapore. It was a measure of prudence enforced by the war clouds in the Far East. The quotation for the Bank stock in London was £79; this week it has come down to £64.

The financial developments of the new war period lie outside the fully air-conditioned exchange market. The calamitous fall in Royal Dutch and the leading rubber shares is a measure of the loss to British investors. A rubber slump is on hand, not because of buna or neoprene, but because of the treacherous Japanese. Royal Dutch has weakened to £20 from £25½ the rate on Monday afternoon. Though no landing in the Dutch East Indies has been reported the corporation is singularly vulnerable. Shell has important associations with Royal Dutch in the Dutch Indies; hence the drop in the London quotation for Shell shares. It must be said that Burmah Oil stock has held up very well but one cannot forbear to point out the merits of Trinidad oil shares at the moment when the leading oil shares do not command the confidence of investors. The slump in Anglo-Dutch Plantations of Java illustrates the fact that it is not Malayan shares alone that are slumping. It is unusual to see Anglo-Dutch below par but there it is. Recovery is out of the question and the British investor who has seen the jump in Home Industrials after August will take a nasty knock this week. The war means the complete cessation of interest payments by Japan in London. It is known that Japan owes about 85 million sterling to British bondholders who are again unwilling victims on the altar of aggression.

The loss and confusion arising from the war is by no means peculiar to Bombay which may complain that cotton has gone down and all commodities have slumped in consequence. The point has to be grasped when the cry that India is experiencing special trade and other difficulties on account of the war goes up again. A political twist may be readily given to such an argument. So one must compare London rates for oil and rubber shares and generally all Eastern shares to realise how much is at stake for the investor. The giltedged market alone has preserved its aplomb this week. Nobody goes for Celanese, Grout or Courtauld in the belief that Japanese competition is at an end. In that respect the Indian investor who ignores mill shares resolutely at present has a counterpart in Britain.

The Philippines which are involved in the war produce something more than Manila hemp. Gold is but one of the minerals for Philippine iron ore has gone to Japan's smelters. The new world war finds the Islands in the thick of the fight as in the Spanish-American war. The Philippine peso valued 50 cents has always been a stable currency. The Islands get more than two-thirds of their imports from the U.S.A. which is also the main market for sugar and hemp. Economic ties have latterly modified the craving for independence. The peso, by the way, may be said to have depreciated to the extent of 41 per cent as compared with its 1929 gold value. The peso stood in December last at 49.82 cents, very nearly half a dollar, its nominal value. As the Philippines export gold in addition to tobacco, pearls, copra the islands are very well-placed. The bulk of the export trade is with the U.S.A. and Japan's share has fallen steadily in recent years, particularly under cotton goods. The export taxes recall Malaya, but Philippine imports into U.S.A. should have been subject this year to quotas operative from 1941-44 reducing by 5 per cent each year the Philippines, share of the U. S. market, obviously designed to reduce competition with U.S. producers of sugar and tobacco. Those who want tariffs on Philippine produce would let the islands break away in 1944, when Congress will decide the future relations of the U.S.A. with the Islands.

The islands of Hawaii, and Oahu particularly have been the main targets of Japanese aircraft. Pearl Harbour and the nearby Diamond Head Military Reservation are not yet famous like Waikiki beach. The U.S. fleet has long been based on Pearl Harbour but its ability like that of Singapore to ward off the surprise attack has been in question. The self-governing Territory sends a delegate to the U.S. Congress who does not vote. Of course he would have plumped up for war because if war is bad for the pineapple juice business and the tourist trade the local Japs in Oahu especially are thrusters and therefore unpopular. Cane sugar and pedigree stock have put the U.S. insular possessions on the map long ago. The Japanese covet Hawaii as much as the Dutch Indies but President Roosevelt who said that Guam, Wake and other islands might fall said nothing about Hawaii whose principal danger arises from its specialised agriculture and its undue dependence on imported foodstuffs. The islands are small, rich and paid more Federal taxes than 17 States to the U.S. Government in 1939.

Some importance must be attributed to the issue or orders by the Australian Government curtailing imports from the sterling area. The extension of import control to all areas save New Zealand and certain colonies in the Pacific will at once raise questions as to the course of Indo-Australian trade. That the order follows the outbreak of war in the Pacific and the Commonwealth's realisation that she must do more than any part of the Empire to ensure victory will be appreciated. Mr. Keane's explanation of the rules in force since December 8 will be therefore accepted. Britain may be able to send the 2,500 goods mentioned but Australia should not buy them—that is the theory accepted by the British Government too. The saving is small—but it points to the preaching of the New Frugality. It is not intended to encourage local industry and Imperial preference is untouched. Information relating to the modified system of control will be obtainable from the Australian Trade Commissioner's Office. The Dominion's desire to pay for the A. I. F. by cutting down cosmetics and canned goods of various sorts—even if they are of Empire origin—is the forerunner of the belt-tightening needed everywhere for the attainment of victory.

The First Shock

The declaration of war by Japan against the United States and Britain has, it is true, been long expected; but the hypocritical moves of Tokyo had the effect of lulling the world into the belief that a last minute patch-up was not unlikely. The negotiations which were being conducted by a special emissary of Japan with the White House were marked by an atmosphere more friendly than one could have thought possible under conditions in which Hitler was goading Tokyo to urgent action. Thus, while the active belligerency of Japan was a contingency for which the world had been preparing itself, everyone was taken aback by Japan's declaration of war at this particular juncture. It may be for this reason that the markets, particularly in India, took an exceptionally gloomy view of the effects of the Far Eastern flare-up.

War against Japan has been hanging like a Damocles' Sword for months and months. During all this period, India knew that Japan as an enemy would be of more direct concern to this country than the earlier entrants into this war. In other words, the tone and temper of the various markets in India in the last few months had been definitely influenced by the factor that, at no distant date war might come to the very door, if not to the very precincts, of India. This circumstance needs to be carefully taken note of. For, in spite of this fear in the background of the likelihood of India and Japan being ranged on opposite sides, stock exchanges and commodity markets in this country had been advancing from strength to strength until the end of November. The extremely panicky conditions which have been prevailing since the opening of hostilities with Japan, must be considered, from this point of view, as a reaction in which sentiment, and not reason, has played an important part.

An idea of the landslide in prices can be gathered from the following comparative figures. On the eve of the war with Japan, jute futures were quoting Rs. 63-14; the war declaration caused a sharp decline to Rs. 53-10. In such conditions, the East India Jute Association authorities had to step in and fix the minimum price at Rs. 56. 9 porters hessian fell from Rs. 19-12 to Rs. 15-12 the exchange authorities intervened in this case also and fixed Rs. 15-8 as the minimum price for February delivery. Raw cotton Broach declined from Rs. 250 for April-May to Rs. 220. Indian Irons had a serious setback from Rs. 35-12 to 32-4; Steel Corporations from Rs. 21-12 to Rs. 19-4; and Howrahs from Rs. 59-12 to Rs. 56-8. The Bombay stock exchange has suffered from an even worse attack of jitters. Tata Steel deferreds fell steeply from Rs. 2.305 to Rs. 1,895. Tata Steel ordinaries from Rs. 470 to Rs. 315; Central Indias from Rs. 509 to Rs. 424; and Bombay Burmas from Rs. 576-12 to Rs. 387-8.

This is not the first shock of an acute kind which the markets have experienced in the course of this war. The collapse of France was accompanied by equally panicky markets. The behaviour of the markets in the days following the fall of France needs to be closely studied in this extent as affording important guidance. On the surrender of France jute suffered a severe setback from Rs. 73-2 to Rs. 60 per bale; 9 porters ready from Rs. 15-2 to Rs. 11-9; raw cotton Broach from Rs. 242½ to Rs. 164-4; Howrahs from Rs. 55-6 to Rs. 51; Indian Irons from Rs. 35-10 to Rs. 24-8; and Steel Corporation from Rs. 20-4 to Rs. 13-8. The All-India price indices of "Indian Finance" declined from 119.24 on 14-5-40 to 13.56 on May 20, 1940. The Calcutta Stock Exchange authorities decided to close the market for nearly two months. Even after the market was reopened, there was only restricted trading for some time. On the Bombay Stock Exchange forward trading was suspended for a long time.

By the suspension of trading and by the fixation of minimum prices, the authorities controlling the various markets provided ways and means to keep the panic in check. With the gradual resumption of trading and with correct appreciation of the collapse of France in its proper setting, confidence revived in course of time; and in the substantial price increase that took place thereafter, the nightmare of France was entirely forgotten.

The markets in India behaved differently when Russia was invaded by Germany. The All-India share index rose from 116.06 on May 31, 1941 to 120.64 on June 23, 1941. Jute futures advanced in strident style from Rs. 39-12 to Rs. 64-8. Cotton Broach from Rs. 230 to Rs. 262; Howrahs from Rs. 52-10 to Rs. 54-8; Indian Irons from Rs. 30-4 to Rs. 33-6. Steel Corporation from Rs. 18-7 to Rs. 21. It is thus clear that the declaration of war by Germany on Russia was construed as a bullish factor by the markets.

Why should a different construction be put upon the war now declared by Japan against Britain and the United States? At the very outset we may say that the only conditions under which the war with Japan can be a profoundly, even a devastatingly, bearish factor for Indian markets, are an attack by air on Calcutta or any particular industrial centre near about; and, thereafter, the conversion of India into an actual theatre of war. Thus viewed, the question we have to examine is whether there is any prospect of war coming to India itself. The initial emphasis taken by Japan in slavishly apeing Hitlerian technique is seen in the simultaneous attack at fourteen different points:

1. The International Settlement in Shanghai has been occupied;
2. Hongkong has been blockaded;
3. Thailand has been invaded; and a air attack was launched on Bangkok.
4. An invasion is being attempted on North Malaya;
5. There is both aerial and naval attack on Singapore;
6. There has been bombing over Borneo in Duch East Indies;
7. Landings are being attempted in Luzon in the Phillipines and Nauru has been attacked by air;
8. Guam is being occupied;
9. Four attempts have been made so far to land in Wake Island;
10. Midway Island has been attacked;
11. There have been raids over Honolulu;
12. There have also been raids over Hawaii;
13. Pearl Harbour has also been included in this wild aggressive sweep;
14. Offensive against China is being intensified.

To sustain this many-sided campaign, whose emphasis, as one can gather, is towards the East rather than the West, Japan's naval and air force will be fully strained. To the extent that Britain and the United States have been taken by surprise by the beginning of hostilities in the Pacific at this particular juncture, Japan must be able to score considerable naval successes. It is equally important from the point of view of Japan that these successes must be maintained and retained. The determination of the A B C D powers to mobilise and marshal their full strength and resources is not the determination of braggart foes. The setback at the outset is admitted; the ability to win back the lost ground can be claimed with the utmost confidence by the United States acting in full concert with Britain, Dutch East Indies and China.

Let us not forget also that Russia is now in a most advanced position to cause serious embarrassment to Japan from

the North and the West. A series of bombing raids by the northern section of the Soviet army will make quick work of the timber-built towns of Japan. Stalin is not quickly provoked to action; but, when he acts, he acts deliberately and effectively. He will not miss the opportunity to avenge the Russo-Japanese war of 1905.

The conclusion of this analysis is clear. As President Roosevelt said with characteristic candour, initial reverses for the Allies are inevitable; this is mostly because of the treacherous and infamous manner in which Japan took the offensive. But the Democracies and other Allies have it fully in their power to rid the Pacific of the menace of Japanese aggression and ambition. In any case, Japan has enough to engage her in the Pacific and she will let the Bay of Bengal alone.

And, after all is said and done, what is there in India that should be considered worth-while by Japan for a costly attempt at invasion? Malaya and the Dutch East Indies are enough valuable prizes from the point of view of oil, and tin, rubber and tea and a host of other materials valuable alike for war and peace. Only after Japan manages to gorge and digest the Dutch East Indies, Malaya, will she have any appetite for poor far-off India. In simple terms, the idea that Japan will be soon over here is too far-fetched in the light of the realities of the present war moves.

If India becomes a theatre of war, we do not pretend to be able to gauge the future of markets or of prices. All of us will be in the same boat. The owner of a giltedged stock is not going to be in a better position than the depositor in a bank. That is a contingency in which it is impossible to predict what values will be like.

Our case however is that there is but a remote possibility of India being dragged into the status of a war theatre. If our reasoning and estimates of war prospects prove correct, the declaration of war by Japan is not a bear, but a bull, factor for Indian markets. Imports from foreign countries in the first two years of the war have been greatly restricted. There was, however, the regular shipping between America and India. This route is now more or less closed. That is to say, India will have to depend entirely upon her own resources and her own manufactures hereafter. More. India will have to supply increasing quantities to the neighbouring countries, particularly the Middle East, Egypt and Africa. This opens immense possibilities for our staple commodities as well as for such manufacturing industries as cotton, cement, sugar, chemicals etc. As for the jute industry, the reduction in exports to America should be largely made good by the increased demand that will arise in countries like Malaya and Burma, Russia and China.

To sum up. The outcome of this war with Japan may mean one of two things. Either a ten-rupee note is worth rupees ten or it is worth nothing. The conditions in which the ten rupee note will be worth nothing need not be considered by us, as we refuse to believe that Japan can win against this formidable combination of America, Britain, the Empire, China, Dutch East Indies and Russia. If, then, the rupees ten note is worth rupees ten, the markets are bound to recover from the present overdone panic and will soon be marching to greater strength and sentiment and greater rise in prices.

DISTANCES AND DIFFICULTIES

While Russia stands still, perhaps undecided, the hour of decision in the Far East approaches. Its coming has been hastened by the Tokyo declaration on Monday. Two more countries are at war with Japan in addition to China. That is definitely an understatement, for many countries in Central and South America have joined the U. S. A. in its indictment of Japan. The countries in alliance with Britain, including the Free French Committee have endorsed the British Government's declaration in turn. War in the Pacific has come sooner perhaps than expected though its inevitability seemed to increase after the reopening of the Burma Road on October 17th, 1940.

It is not necessary to analyse recent events to assess possibilities. That the inherent advantages of a surprise attack would assist Japan were not generally recognised even though the curious character of the capitulation of Bangkok is admitted to be a point in Japan's favour by many. The military operations have taken a local character. Crossing Burma and pursuit into Thailand form the subjects of communiques and the miseries of immigrant Asiatics in the cities of Hongkong and Singapore have been multiplied by a new form of death from the skies.

These dramatic developments in British possessions and the self-governing territories under the star-spangled banner do not concern us. What Japan can accomplish when two million soldiers are bogged down in China can only be decided by time and Providence. What happens to the Philippines in 1846 when the Tydings-Mcduffie Act lapses is of lesser interest than what the Jap farmer in Davao is up to.

It is clear that in spite of much that has been written the area actually involved in hostilities is only a minor segment of the Far East. If Holland is involved as a member of the A.B.C.D. front like the protected princes of Malaya and Borneo, the Portugese are out. Whether the concession in Timor granted in 1940 to Japan to run air services has any bearing on subsequent developments or no it is not possible to assume that the Japanese in striking south imagined that all the Powers associated with the Washington treaty of 1922 would oppose her unanimously.

For the second time Japan is involved in a world war. Last time she quickly thought of taking over Kiaochow and the German lease in Shantung. The 21 demands framed by the Marquis Okuma were as much the consequence of Allied preoccupations in Europe as of China's helplessness. Japan's action in 1941 follows a different pattern but it must be emphasised here that the Japanese borrowed something more than

the constitution in 1878 from Prussia. While condemnation is not our purpose it is noteworthy that things were in a very unsatisfactory condition up to the actual declaration of war. There was that running sore, China. If Indo-China proved an easy victim and Thailand a half-hearted accomplice the Dutch Indies refused more than once to enter the co-prosperity sphere. The South Seas scheme had to lie in abeyance, and the Japanese government could get nothing more than a neutrality agreement in April out of Moscow even after the Chinese communists had rebelled.

The rupture of commercial relations with the U.S.A. like the various embargoes for instance of aviation, fuel, scrap and alloys enforced against Japan revealed to Japan that all the vulnerable points were known in advance and could be attacked. The freezing order, if it made silk scarce for the New World, shut Japan out of her best markets.

The last imperial rescript like the Diet's prompt approval of Tojo's policy removes doubts as to the existence of any scepticism at home among the battered remnants of the party that Hara built up. The outbreak of war came before the conference of parties and projects planned by the Japanese Government. The fighting services called the tune as in 1931 and 1937. The forward march against many focal points began at once. Twice lucky, the army fancied it could get away with it a third time. But economics and geography have to be read. Staff officers, in spite of their fondness for geopolitics, are notoriously impatient. If they have said nothing about kodo and showa it means the Army has dropped its ideological false front and shows the close crop, again the German cut.

That the fifth decade of Japanese expansion has been trickier and more expensive than the previous ones has been long recognised. By comparison with Hopei-Chapar the empire of Korea was picked up effortlessly, and Formosa was taken easily enough. Conquests in China, as distinguished from the four provinces made up to provide an empire for Pu Yi, were made at an intolerable cost. Japan's latest military Budget is the grimmest reminder of the price of empire, taxation and debt. Prices have risen quite sharply after 1940 and the cost of living has risen. The instability of politics at home with Admiral following General and soon giving place to a prince with a railway engineer well in front is the result of a precarious home front. The perpetual farm crisis has not been solved by the Chinese war and the glory of empire for the five millions with the colours has been an empty dream. When Mr. Tojo spoke angrily of the results of the freezing order he provided evidence as to Japan's desperate need of both markets and materials.

Basically Japan, that tight little island, has always been ready to take over any empire. The strong invitation to Indo-China last September merely revealed that lack of scruple was a distinctive feature of Japanese policy. Emigration seems difficult as compared with conquest, and it is the failure of the last campaign in South China that has made Japan go off the deep end. The islands picked up at Versailles are handy for many reasons. Yap, as many suspect, has been fortified primarily to frighten the U.S.A. which has been naturally suspicious after the withdrawal of Japan from the naval conference in London in December 1935.

The most common maps show that it is over 4,800 miles from Kobe to Frisco and over 3380 miles from Yokohama to Honolulu. Japan proper is distant but the U.S. Pacific fleet is powerful. If its bases in Honolulu (2100 miles from Frisco) and Manila have been vigorously attacked, there is nothing at all to signify that they are going to be abandoned like the Channel Islands. One must regard the attack on the Philippines and Hong Kong as a diversion in spite of the fact that the British Colony is exposed to what one may call cross-fire from Formosa and Hainan. The danger to Victoria came not only from the nearness to Canton but from the unexpected failure of Japan's offensive this year against the south. The major result of the war may well be an accession of prosperity to Macao which is the chief port near the Canton River in contrast to the blockaded British Colony.

Another port has also been subjected to attack. Singapore guards the entry from the China Seas into the Indian ocean. Its value is not sentimental for 9 million sterling have been spent on the base which protects the British and Dutch Indies and confers great advantages on Australia. If the Japanese have chosen to attack it when tackling the British navy as also Admiral Hart's forces, the decision must be largely governed by a desire to take advantage of discontent in the Dutch Indies as in the Philippines against the ruling race.

When Mr. Kobayashi failed and Mr. Yoshizawa failed again to make the Dutch Indies Government ignore the orders of the Queen and her ministers in London, it was apparent that Japan was stuck. When the U.S. fleet was ordered to stay on indefinitely in Pearl Harbour last May, it was readily inferred that Japan was the suspect. So far the Dutch Indies have been inviolate. But if as is reported a landing has been attempted in North Borneo it is at once a blow at British oil interests associated with Dutch and a real threat to the oil supplies of the Dominions and India. The Dutch Indies produced before the war about one fourth of the world's tin. Banka and Billiton are magic names, and the Japs who are unsatisfied with the small output of Indo-China aspire to take over the Dutch Indies as a going concern. Oil, tin, rubber—these are the magnets for Japan, as for the U.S.A. If the Far East provides the world's largest consumer with all the tin and rubber she wants one can really see what is the real force behind Open Door doctrines.

The contribution that China may make to the common cause must necessarily remain conjectural. She has no navy and no aircraft ready to help Britain and America. Japan however has no ally and her dependence on the Philippines for iron ore, fibre, palm oil and copra has been as patent as her need of Malaya's rubber and minerals. The construction of imports from all but the yen bloc goes far to prove that Sumatra's oil and rubber are more than even needed to keep the war machine going. Nearly all that has been said may be summed up in the statement that Japan, if she has a million tons from various synthetic fuels, must import three quarters of her oil while opposed to her is the world's leading oil producer, leading steel producer, leading copper producer and leading coal producer. The U.S.A. produces more than the whole of Europe in such things as automobiles and aircraft. That simple statement determines for all time the differences in war potential. Previous estimates of the U.S.A.'s economic strength referred to bottlenecks and shortages. In the October issue of the National City Bank's Letter is the plain but significant statement that the supply position can support the defence programme. With 3 million men more employed this year by June, mainly on defence work, the U.S. defence programme is always being revised and enlarged. The war with

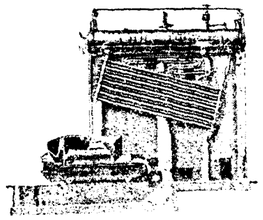
Japan entirely popular with the 79th Congress except for Mr. Rankin—should lead to a sensational and sweeping rise in output. San Diego and Puget Sound are not the only available bases. Canada is joined to the United States in defence matters. Mr. King is a frequent visitor to Washington. The road to Alaska may still be a project but the U.S.A. has done many things with Nome besides raising vegetables there. Since Russia is not ranged with the Allies against Japan who finds Mr. Matsuoka's pact her best bet it is hard to say whether those huge hives Osaka and Tokyo will be bombed. If Vladivostok were the base it is clear that Moji and all ports would be bombed like Brest and Cherbourg. So often have revelations been made of Japan's feet of clay that one must refrain from citing over again the things she is lacking in. That the S. M. R.'s affiliates have not succeeded rapidly is again taken as an axiom. There is, however, the stronger fact that Hawaii which produces sugar and pineapples has been the main target for Japanese aircraft. It was known even two years ago that six aircraft carriers were in commission and that 45,000 tonners were actually building. The Japanese infantry mass is not supposed to be very good but that is only newspapermen's opinion. The navy has never met a real foe so far and may shed its laurels. There is, however, the fact that the Japanese are fighting with the New World. Old markets are gone: there can be no cotton from Peru or Brazil, no oil from Ecuador or Mexico can be hoped for. The U.S.A. may lack nickel or antimony: it can be got for the asking. Japan with an indifference air force has a two-front war in hand as China is fighting on and America's best ally is China's geography. The western provinces, revitalised and impatient of aggression, are still better than the islands and peninsulas under foreign rule. One might say something about the magic of patriotism, but that will suit the Japanese who must be reckoned among the world's most fiery and misguided patriots.

I.M.S.M

THE INDIAN MERITORIOUS SERVICE MEDAL dates from 1888, and it ultimately supplants the Long Service and Good Conduct Medals. One side of the Medal, which is suspended from a scroll by a red ribbon, bears a bust of the reigning sovereign, while on the other a wreath of lotus leaves encloses a wreath of palms. Between the wreaths is written "For Meritorious Service."

I.O.M

THE INDIAN ORDER OF MERIT was instituted in 1837 as an award for bravery. It carries with it an increase of 1/3 of the pay of the recipient which, in the event of his death, is continued to his widow for three years. The decoration, which is divided into three classes, takes the form of an eight-pointed star, in gold, silver and gold, or silver, according to the class, and is suspended from a dark blue ribbon with red edges.



I.D.S.M

THE INDIAN DISTINGUISHED SERVICE MEDAL was introduced in 1907, and may be conferred not only by the King-Emperor, but by the Viceroy. Suspended by a broad red ribbon with blue edges, the medal bears a portrait bust of the reigning Sovereign, backed by a laurel wreath encircling the words "For Distinguished Service."

Cost of living in many lands

Studies of the movement of the cost of living have a perennial interest. In the League of Nations bulletin for July one will find an analysis of changes consequent on the war. Appropriate comparison with the trend of wholesale prices will lead one to modify many earlier conclusions. The choice of June, 1939, as the base, is governed by the desire to compare the position at end-June, 1941 to show to what extent prices have risen in various countries. Where the cost of living has not risen to the same extent the hardship due to the war must be slight. In the case of New Zealand, for example, the cost of living has risen slowly and gently after the end of 1939. In the Netherlands Indies again prices rose after September, 1939, while the cost of living rose only towards the last quarter of 1940. The U.S.A. presents a different case. The cost of living index was almost stationary until the second quarter of 1941 while prices had risen earlier. Japan is different in that the cost of living had been outstripped even during 1940 by the progressive advance in prices. A marked but slow rise under both prices and cost of living characterises Canada. The only country in which prices and cost of living have gone up very sharply since 1939 is China. The change is a measure of the depreciation of China's currency. The adverse experience of Palestine where the Arab is apparently at a disadvantage is reflected in the zigzag movement of both prices and cost of living.

Much happier is the position of Australia where prices had risen in 1940 to a greater extent than the cost of living for which the Wage Boards there had made the essential adjustments. The graph relating to India proves that in 1940 the price-level was fluctuating while the cost of living which had risen after October, 1939 had become virtually static. The charts make it plain that no country has been able to escape the war's effects altogether. In neutral Switzerland prices have steadily risen by as much as 75 per cent and the cost of living had gone up by over 25 per cent in two years. Portugal has been distinctly luckier than Sweden where the cost of living had risen by about 37 per cent and prices had risen by 55 percent. The experience of Britain where the cost of living rose without jerks while prices had risen more sharply is indicative of the virtues of control. From the movements referred to one may say that Argentina has been luckier than most but due regard must be had to the fall in export trade in her case. A point to note here is that Burma's experience has been similar to India as the average general index of the cost of living for Rangoon rose by five points from 102 in September 1939 to 117 in April 1941. In the case of Germany the Nazis had apparently kept things under control. It is only in 1941 that prices have been reported as rising and even then the index for May is only six points above the average for 1939. The rise is largely due to the higher cost of clothing, and effective rent control as also food rationing had modified the changes incidental to a free economy. In Britain the general index rose by 17 points in 1940 while in neutral Switzerland where too control and rationing are familiar there is a reported rise of 10 points showing that the war is not the sole factor.

Control Modified

The latest available issue of the "Indian Trade Journal" refers to additions to export prohibitions. By an amendment to the Schedule is added export of vessels for inland and harbour navigation such as launches, boats, barges and dredgers and component parts and equipment thereof. The additions to part of the Schedule take the form of insertions of potassium chloride and the substitution in place of item 19 under wood and timber the description of Coniferous timber namely pinus longifolia (Chir) pinus excelsa (Kail) spruce, fir and deodar; plywood and other laminated wood, also chests, boxes, crates and other containers made therefrom when exported empty and parts thereof including shooks. And the Commerce Department notification of November 29 referred to in the Journal announces that in place of item 15 A in Part C there shall be this item—Manufactured Articles not specified elsewhere made wholly or mainly of any of the metals or alloys including containers of other goods specified in Part C of the Schedule. The insertion of a new item in Part D also is notified. Containers made wholly or mainly of any of the metals or alloys specified in item 15 of Part C when in use as containers of goods not specified in the said part. The procedure as regards exports of all metal manufactures has been tightened up further. The Journal contains information relating to the adoption of import and export control as from August 1, by the Government of the Anglo-Egyptian Sudan. Interesting details as to the import restrictions in force in Ceylon are also available. An Order has been issued prohibiting imports from all sources except under license of silver bullion iron and steel as also manufactures thereof including railway materials.

The total prohibition of certain imports is also referred to. Aerated and mineral waters, cakes, cedar, cream, frozen fish, poultry and game, salt, excluding rock salt, liquors, rum, vegetables, sparkling wines, tinned soups, precious and semi-precious stones, vacuum cleaners and dry shavers, wooden furniture, carpets and rugs, handkerchiefs and scarves, coir manufactures, gloves, stationery compendiums, certain paper and cardboard manufactures, certain small arms, fireworks, matches, perfumed spirits with certain exceptions, christmas crackers, articles of solid gold, silver etc. excepting gold and silver wire and thread, lacquered ware, manufactured ivory and tortoise shell, gold coin and bullion are the items put down among prohibited imports. Imports of other goods are subject to license.

Relief To Cotton Mills

A recent press report to the effect that special consideration was to be shown by the Central Board of Revenue in calculating depreciation allowance for cotton mills engaged in war work confers importance on the memorandum presented last month by the Bombay Millowners Association. The Association raised the question in July last when its representatives met Mr. J. F. Sheehy and asked whether extra allowance would be made under the Indian Income-tax for abnormal user. The request was not conceded but a promise was made that representations would be considered. The representation submitted on November 4 recalled that the Director-General of Supply had assured mills that the cost of alterations made by mills in order to fulfil Supply Department orders would be allowed for purposes of incometax, surtax and Excess Profits Tax as a revenue expense in the year it was incurred and further that re-alteration would also be regarded as a revenue expense. It was urged that the assurance was not enough because the E.P.T. might be taken off and in that event, the cost of alteration to plant might not become allowable. It was, therefore, necessary in the opinion of the Association, that the cost of reconversion if incurred, within a period of twelve months, should be allowed. Ordinary looms turned over to produce canvas would be worked to destruction. Additional relief was essential. It was suggested by the Committee that the present written down value of plant worked to destruction should be allowed to be written off completely during the period the Excess Profits Tax was in operation and if complete setting off was not possible an extension of one year was necessary. In regard to the claim for extra depreciation allowance the Committee argued that by running machinery at abnormal speed, working double shifts of the hours instead of nine hours, and working triple shifts and working in heavier goods for which the plant was not originally designed, the existing scale of depreciation was inadequate. Wear and tear had to be allowed for, and the high cost of replacing wornout machinery had also to be considered. In addition to a higher rate of depreciation it was suggested that the mills should be allowed half the replacement cost of such machinery as a charge against profits. It was concluded that Section 26 (3A) of the Excess Profits Tax gave the authority power to make an allowance in computing profits for any chargeable accounting period owing to any postponement, suspension, as a consequence of the present hostilities, of renewals or repairs. The Committee suggested that if the number of hours worked arose from 10 to 18, the addition of 60 per cent to the normal rate and, if hours exceeded, a further addition would be necessary.

Wagon-loading figures

Railway earnings have been steadily mounting high. This is another aspect of the immense contribution which the Railways are making in wartime. How great it is was apparent from Sir Andrew Clow's speech last month when he detailed the war effort of the Railways. To dispense with materials and stock has been necessary when three large workshops have been given over to munitions production. New railway military units are to be raised and the transport of permanent way materials overseas has been enforced by the war. Railway earnings from April 1st to October 20th amounted to Rs. 66.92 crores. This exceeded the actuals of the same period of 1940-41 by Rs. 9.26 crores and was Rs. 16.02 crores more than the railway revenue reported in the compar-

C. N. MUKERJEE,
Managing Director.

able period of 1939-40. At the same time working expenses have risen by Rs. 1.55 crores and this will show that the increase in the past six and half months is Rs. 8.7 crores.

The most striking feature of the tabular analysis of earnings is that gross earnings on the East Indian Railway have risen rather late, but unmistakably. The total up to the 20th was Rs. 14.31 crores as against Rs. 12.96 crores in 1940-41. The improvement in earnings, as previously pointed out, is least in the case of the A. B. Railway and greatest in the case of the G.I.P. Wagon loading figures do not convey a clear idea of the progressive rise in earnings. It must however be recorded that the total under broad gauge wagons up to October showed an increase of 4.69 percent on the previous year. In the case of the metre gauge wagons the total up to October 20, was 1,311,973 showing a smaller increase of 1.89 per cent. The cumulative totals indicate that the increase in traffic is more or less confined to oilseeds, cotton and miscellaneous goods. The increase under coal and coke is as small as 0.1 per cent and in the case of metre gauge wagons there occurred a fall of 6.51 per cent. Recent assurances as to coal wagons for supplies would appear more than ever necessary to make war production proceed without interruption or shortage of coal supplies. War work will serve as a title to 29 days stock of coal in the case of firms qualified to obtain certificates which would procure quick provision of wagons. The wagon loading figures suggest that there has been less movement of grains and pulses than in the past year. The reduction under Home line stores and materials reflects credit on the railways which have provided wagons for other pressing purposes so that the actual increase in military traffic is obscured.

The Shopkeeper's lot

A minor and perhaps unintended consequence of the drive for industrial concentration in association with rationing is the vanishing of the small shop. Many who read about shopping under raids in Britain will probably be surprised to find that more shops have been forced out of business by State interference than enemy action. The effect on the machinery or retail distribution after the war can only be guessed. As to the destruction of the savings of elderly people who chose to retire to shop-keeping there can be no doubt. Nobody knows how many have gone out of business. Charles Madge, one of the founders of Mass-observations thinks that no department can tell how many shops existed before the war, and none can answer how many have closed down. He is, however, prepared to say that 17 per cent of 19,000 shops in Glasgow had closed down; the percentage for the first half of 1941 being as much as 8. By the end of this year there would be around 75 percent of the 1939 total. Analysing this disappearance, he notes that so far grocers have suffered little, butchers and butlers too very little. In the case of fruiterers and green-grocers the fall is heavy, and so too with dairy men and fishmongers. Confectioners and fried fish shops have had a bad year, to judge by the number of closed shops. Clothes rationing should have taken a heavy toll of non-food shops by now, he argues. Newsagents, chemists and hairdressers have become fewer but the small general shop has carried on in most cases. The specialised dealer in hardware, cycle and wireless accessories has also been hard hit. War has brought employment and adversity to the shopkeeping class as a whole to judge by Madge's remarks. The exception is provided by licensed victuallers who actually increased in number in 1940.

What the results are may be guessed from Madge's inquiries in Slough. This new town in the Home Countries has long been prosperous and unisolated. Here too the shopkeepers complained that profits had fallen by 20 per cent while turnover was unchanged. Shortage and uncertainty of supplies was one reason given. The blackout was also upsetting. The purchase tax was, like rationing, a source of extra work without corresponding gain. Vandeliveries and staff had suffered through the war but the major trouble was the reduced margin of profit. Wholesale prices and other costs, such as paper bags, had gone up while retail prices had not kept step. Multiple stores and wholesalers were criticised along with Government departments by shopkeepers generally. The curtailment of consumption led to reduction of retail trade but Government has not done much to help the shopkeeper in Britain. The superior efficiency of the multiple stores may help them against the small shopkeeper who has to keep on answering the Ministry of Food and the Board of Trade while his customers dwindle. If the shopkeeper as a class, with a standard of living above that of the artisan, suffers at present unnecessarily the results in regard to saving and capital must be reckoned with. It does little good to say that a shop with its stock can be sold, the lease let and the money put into defence bonds. That solution is a little less than fair to an honest and energetic class. Though India may not witness such developments, one of the results of the present war must be the elimination of the small shop in larger towns. The small grocer, like the small garage, has no future and if rationing has not crept in yet the practice of price control is sure to force up costs and slice profits. The weakest will choose the way out, and one may find in the new suburbs, fewer shops and more houses, assuming that a new boom does get under way.

Reduction in Building

The fall in building activity in many countries is a significant feature of the diversion of production. From September 1939 at any rate countries have reported a steady fall in building permits. And control orders, as in South Africa, restricting

"Worry and fear retard human initiative and efficiency, probably more than any other factor. Personal attainment and vocational efficiency are impossible when a person is living under the shadow of fear and anxiety. Life Insurance mitigates these evils and reduces the uncertainly which attaches to our economic affairs due to the risk of premature death."

labour and materials have reduced since the number of residential buildings. Occasionally the trend has been reversed owing to the increase of buildings for commerce and industry. The League of Nations bulletin for August discolses for instance that there has been in Canada a great increase in building activity from April, whereas the previous trend was unfavourable. The great increase in factory construction during 1940 more than offset the fall in residential construction in South Africa, there was early this year quite a sharp rise in building permits. The absolute increase as compared with 1929 is hardly apparent in the case of Australia where residential construction has been falling from May last. In the case of Belgium the fall in building activity preceded the Nazi invasion. The recovery since September 1940 indeed suggests that the Nazis have for their own purposes helped Belgium to pick up the broken threads of industry.

Most significant of the changes conditioned by the defence programme is the flow and ebb of building activity in the 37 States east of the Rockies. The total average for 1940 was only 67.4 per cent of the total for 1929. But due importance must be attached to the striking rise after November 1940 in the value of buildings put up for industry and commerce. Until May 1941 the private building industry was exceptionally busy, but steps have been taken thereafter to make sure of essential materials for the defence programme, even if it be to the detriment of the building industry. Acivity in non-defence industry, said the September letter of the National City Bank of New York, was slackening. The change was expected in September when the priority procedure was beginning to show results. Building, however, may not be affected greatly; for, in many cases the adaptation to armament production of existing factories and equipment which were built to make peacetime goods was impracticable or so difficult and costly that it has been more efficient to build new factories and instal new machinery especially for armaments. The countries actually involved in war show a great fall in private building notably France. The depression in Palestine and scarcity of materials in neutrals like Switzerland explain the dramatic decrease in new construction. The largest fall in building is reported by Finland where reconstruction needs were met only after the summer.

Australian Programme

Australia's borrowing programme in November covered the conversion of 70 million of 4 per cent securities maturing on November 15th. At least 30 million was sought for war purposes. The loan for 100 million issued on October 7th for the first time was issued in two parts at par and made available in two separate forms at the option of the subscriber, the short term loan bearing interest at 2½ per cent and maturing in 1945-46 and the longer dated stock bearing interest at 3¼ per cent and maturing in 1950-57. The loan list was to close on November 15th after a new government had taken over the federal Centre. Australia also expects to raise quite a respectable total in 1941-42 through compulsory loans credited to revenue. The increase of over 70 million in expenditure despite an increase of about 20 million in ordinary revenue will entail borrowing in addition to the forced saving referred to. The new borrowing programme is independent of the conversion referred. It is now clear that the 30 million must be supplemented by another 100 million at least. All estimates will be rendered incorrect by the march of events. Full employment, the rise in prices and bank credit—these are unimportant as compared with the Japanese advance into and beyond Thailand. A full, all-in war effort will be needed, and rationing introduced this year as regards clothes, will and must become, comprehensive. Heavier taxation than that envisaged by Mr. Fadden may be soon viewed as unavoidable. Though any increase in direct taxation may be distasteful to the wage-earners (newly subject to income-tax) it has been held that at least to discourage consumption in a period of rising prices, fresh taxation is needed while there is not much to be said for borrowing easily from the Commonwealth Bank. That industry can stand taxation is admitted. Business conditions in Victoria are said to be better especially in the heavy industries and machine tool production. The agricultural situation was said to be better in New South Wales after rain in September. A surplus budget was presented even after concessions to the taxpayer, mainly on account of the extension of income-tax, expected to produce 7 million. Conditions in the Queensland sugar industry were known to be improving and the lifting of the British penalty duty on sugar over 99 per cent polarisation was welcomed as the higher grade sugar allowed lessens the danger of deterioration through long storage period. Cotton-growing has been subsidised, and Queensland expects to get in 30.000 bales next year. Tobacco-growing is favoured and preparations for planting in October had begun earlier. The peanut industry had found a new outlet for shells. Tests were made by the Sydney Fire Brigade with foam powder made from peanut shells and vines which was used for extinguishing fires. These are likely to lead to a new use for 1.000 tons of shells while the vine is likely to be used, as before, for feeding stock.

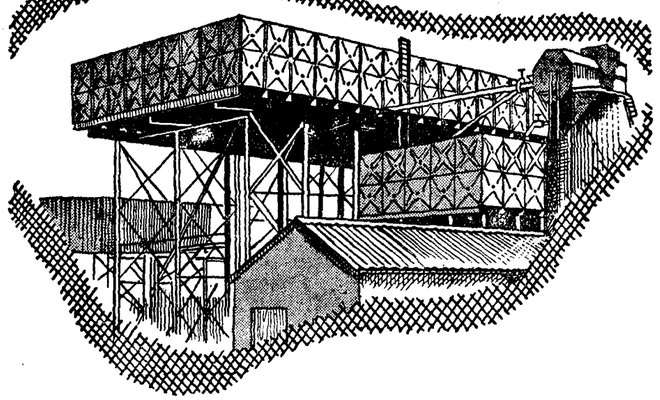
Extension of Service

Proposals outlined last fortnight by Mr. Bevin have been formally introduced in the Commons by Mr. Churchill. His speech on Tuesday is important for several reasons. Apart from his own estimate of British and German resources and efforts the duration of the war there is more than one reference to war production in terms of manpower. The Nazis can draft industrial conscripts from the occupied countries for Germany's own factories. Britain, which has lost so far only a very small part of her population through the enemy landing in the Channel Islands, has to adopt totalitarian policy for something more than the abolition of unemployment. The successive falls in the number of workless have not eased the labour situation this winter when mining like munitions-making will claim more. National service for unmarried women estimated to number 1,602,000 appears the solution. Though the registration and transfer of male workers have not been free from defects, Mr. Bevin has indicated that he will follow the same methods in putting women on to war work. It is clear that the drive for woman-power is viewed mainly as a convenient solution of labour difficulties. More than a million men have been taken into munitions factories but there is acute need for staff for the new factories that have been set up this year.

Mr. Churchill has observed that more toil and sweat are needed. He has explained that in the 27th month of war production is limited to some extent by population. In his own words "the seriousness of what is required must not be underrated. The population of Great Britain to-day is about 46¾ millions. Of these 33¼—16 million men and 17¼ million women—are between 14 and 65 years of age." In regard to female employment, the fact that large numbers are already occupied does not prevent the application of the National Service Act which is essentially a non-party measure and whose regular amendment has not been disapproved of so far. There are, according to Mr. Churchill, a million more on munitions work than at the end of 1918 and he claims that there are more women on war jobs in the 27th month than in the 48th month of the last war. Rising output to which U. S. assistance has contributed demands additional labour. The Premier's statement that efforts will be made to bring within the scope of national service males between 18½ and 50 is more than a pendant to the Cabinet's proposals.



It seemed last week as if the extension of national service to women alone was under consideration. It is now clear that the Premier, who thinks that Mr. Bevin cannot present the case effectively, wants more workers, and that quickly. The registration of boys and girls between 16 and 18 is also proposed. Picking jobs for them is the Government's work and their own prior efforts with voluntary organisations will be furthered. The enlistment of nearly 1.7 million men in the Home Guard has not reduced the need for new recruits, and the lowering of the age for military service, together with the retraction of the pledge that men under 20 would not be sent overseas is expected to provide more recruits for the fighting forces. If casualties have not so far reduced the total available population it is clear, from Mr. Churchill's reference to the well-armed enemy that the key to successful war production is the enlargement of the labour supply at home. Conscription of women between the ages of 20 and 30 (for non-combatant duties including civil defence) is a means to this end. Other methods are to be tried for getting 2¾ million more men for service by raising the upper limit from 41 to 51. In the third year of war, as Mr. Churchill reflected a lot has to be done to get on to the fourth year when Britain can hope to get all the munitions she wants.

A Valuable Textbook

The revised edition of the work on Indian Economics published by the Oxford University Press more than answers public and professional expectations. The second volume is the joint production of Professors Jathar and Beri of the Education Department whose teaching experience furnishes perhaps the best qualification to provide a textbook, comprehensive, clear and complete. The sixth edition of the second volume (price Rs. 6) is an attempt to put in their proper setting the most recent developments. An evaluation of recent departures in the industrial field has been provided, and such happenings in the world of industry and finance as the projects with which Mr. Walchand Hirachand is identified are analysed to give balance and distinctive character to the wartime survey. Nearly all the chapters have been modified to incorporate the latest data. The result is somewhat breath-taking and leaves the reviewer almost powerless to refer to omissions though certain conclusions are naturally to be examined in the light of developments like the freezing order applicable to Japanese assets in India and the large orders for sandbags received by the Indian Jute Mills Association this year.

As a textbook, which has withstood the demands of many types of university examinees, the work of Messrs. Jathar and Beri has indeed conspicuous merits. An inornate style is perhaps inescapable when the object is to purvey the maximum information in a limited number of pages, but the general reader who wants something like Theodore Morison's **Economic Transition in India** will have to turn to something else. A small complaint may perhaps be voiced in regard to the absence of any direct reference to industrial finance in any of the chapters. There may also be a justifiable criticism of the rather vague, voluble statements made in connection with shipbuilding enterprise. But it is a great service to students of Indian economics that the authors have not been content with providing a standard text book, but take care to make it comprehensive and up-to-date.

Jupiter In Madras

Among the events in the insurance world of which due note must be taken some time or other is the formal opening of Jupiter's own offices in Madras. The Chairman, Mr. D. M. Khatau, could not make the trip, but many important guests attended, and set speeches were the order of the day. The Jupiter is emphatically Seth Lalji Nararainji's creation, and twenty-one years of growth have certainly raised it to major status with total funds exceeding Rs. 58 lakhs. The Jupiter now has representatives in all large towns and in oversea centres like Rangoon and London. The new building in Madras also stands as an investment of which the Company may be proud. The speech of Mr. Satyamurti in discussing opportunities contained a reference to reinsurance. He asked that a concern should be started soon in the interests of Indian companies themselves. There was much else that would meet with ready support, and the appeal for a 'poor man's policy' would certainly suggest that insurance has so far not reached the masses. Mr. T. T. Krishnamachari, who represents the South Indian Chamber in the Madras Assembly, associated himself with the tribute to Seth Lalji Narainji, and asked all present to remember him as a nation-builder. It is no accident that Jupiter's founder laid prompt emphasis on nationalism. Indian unity can only flourish through such emphasis which at the same time reduces provincial differences. The Company has a life department started in 1928 but that is almost overshadowed by the Marine and Accident branches of the Company. Jupiter has long been the second largest composite office in India and last year's results, accompanied by changes in the Board, pointed to an accession of vitality which must be welcomed when there is growing support for Indian insurance companies as a class, support which is both deserved and necessary.

NORTH WESTERN RAILWAY

Tender No. 212-S|I. Code word "ATTACK". Tenders are invited on a rupee basis for purchase by the North Western Railway of Broom Goa. Tenders must reach office of the General Manager, N. W. Railway, Lahore, not later than 14-00 hours on Wednesday the 14th January, 1942 and will be opened in office of the Controller of Stores, N. W. Railway, Lahore, at 11-00 A.M. on the following working day. Tender forms and other relative documents can be seen at and obtained from office of the Controller of Stores on and from 6th December, 1941. The sale price of the tender is Re. 1|- local and Rs. 1-8 Muffasil.

And so the Pacific has lost its title to the name! That is one's first thought on hearing of Japan's declaration of war on the United States and Britain. I do not know who christened the ocean that lies between Asia and the Americas. Nor do I know whether the name expressed a hope or recorded a fact as it was at that time. But certain it is that the Pacific had been pacifist for millenia. It has taken centuries of scientific progress and technical invention to make this ocean a scene of warfare. Europe had her cockpits. Asiatic peoples have carried on internecine warfare with philosophic unconcern for the developments of world politics. The Western nations have scoured the seas for colonies and settlements. The Americas were peopled and developed by the European nations in co-operation, unplanned and even unconscious. Britain sent her children as far as New Zealand and Australia and ringed round the empty spaces of a continent for the benefit of her own kith and kin. But the Pacific was as unpromising as ever as a theatre of war.

Now all that is a matter of history. Within the last few days we have heard of the bombardment of places as far apart as Singapore and San Francisco. A long line of islands studding the Pacific blue have been attacked at the same time. The islands of the Malay Archipelago have been attacked as well. Peoples in all stages of civilisation from primitive savagery to the most scientific modernism have been affected. Powers, great and small, vast empires and little principalities, little isles and huge aggregations of land on this planet, are all equally involved. In this tragedy of human civilisation, Japan it was that recited the prologue, when she attacked Manchuria in 1932. Hitler and Mussolini sang the chorus. And Japan has worked up the climax by declaring war on the Democracies.

As President Roosevelt said, it will be not only a long war but a hard war. About its final upshot, one need say little. For in this matter of victory for humanity, faith and reason are one. They are almost indistinguishable. For my part, I have never thought otherwise than that I have the strongest grounds for looking forward to the victory of the Democracies and, yes, of Democracy, too. But the course of the war often calls for faith. That is inevitable, war being what it is. There is little use in a layman pitting his mind against the unknowns and the imponderables in which modern warfare abounds. It is the human aspect that to-day is most arresting. With the entry of Japan into the war, and this time against the U.S.A., the world sees its first world war. The last war was so called by courtesy. Except for the Emden's escape into the Indian and the Pacific Oceans, this part of the world remained singularly unaffected. All the great powers outside the Continent of Europe were arrayed against Germany and Austria. With Britain, the U.S.A., Russia and Japan ranged against Germany, the war was confined to Europe and the Mediterranean seaboard; and only the Atlantic was subject to the dangers of mines and submarines. When the war was won, Russia disqualified herself for a share in the spoils alike by the change-over to Communism and by her separate and earlier peace. Japan remained to take her share of mandated territories which whetted her appetite for more and encouraged her in her rivalry with the world-wide British Empire and the land of the almighty dollar.

It is given to Japan to bring the problems of the Pacific to a head. Till the rise of Japan as a world power—and that was not so long ago—problems of the Pacific were mostly problems from anthropologists, ethnologists and students of unfamiliar and obscure sciences. How the Polynesians acquired negroid features is typical of the problems which engaged the attentions of academicians in the West. But the root of the difficulty in this problem is not unrelated to the problems of the Pacific now facing the world as a whole. It would appear that it was the wide expanses of the Pacific that argued against the possibility of mixture of racial types at any early stage of history. The Pacific ocean is the largest division of what geologists and geographers would call the hydrosphere. The distance between Yokohama and San Francisco is about half as great again as that from New York to Southampton; similarly the distance between Cape Horn and Sydney is greater than that from Buenos Aires to Cape Town by fully a half. The Atlantic became a lake, at once dividing and connecting peoples of European descent, not only

because it was smaller than the Pacific, but there were historic forces as well working towards the discovery and settlement of the Americas. No such forces were present to take Asiatics across the Pacific. The Eastern peoples have followed the course of the sun from the East to West. From China, the cradle of civilisation, the movement was westward. From the great central tableland of Asia and Europe, the nomadic peoples of ancient times flowed in all directions. Indians went out and colonised the islands that lie in the border between the Indian and the Pacific oceans; but no farther east. The Arabs traded with countries as far as China; but even their gifted seamen never thought of crossing the Pacific.

The Pacific problem appeared when the British Empire neared the limits of its innate impulse to expansion and the U.S. found its Pacific seaboard not less important than the Atlantic. When Japan emerged as a modern state, she threatened the interests of the European powers in general and of Britain in particular. At first China provided a common hunting ground; and the conflict of interests was resolved in common victimisation. The problem was not quite a Pacific problem. For the fight was confined to the Eastern seaboard of Asia. Technical progress had not been sufficiently far-reaching to make the Pacific ocean an appropriate scene of warfare. And so far as the eastern coast of Asia was concerned, there was a fair balance of sea power in that part of the world. This balance. Japan upset in her favour when in 1894 she eliminated the Chinese Navy as a factor in the Far East. She then turned her attention to Russia with whom she was in serious rivalry for the control of Korea; and in 1904-05 the issue was decided; and the Russian navy went the way of the Chinese. Great Britain found it expedient to conclude an alliance with Japan in order to safeguard her possessions. The British naval forces in the far east were reduced to a mere squadron. And Germany and the U.S.A. started strengthening their bases.

The war of 1914-18 not only annihilated the former but gave Japan the mandated territories which set her on the path of rivalry and hostility to the U. S. A. Under the Treaty of Versailles, the former German islands north of the Ecuador passed into the custody of Japan. And thereafter came the Washinton Conference which, in fact, restrained the naval growth of Britain and the U. S. A. but gave ample scope for the development of the Japanese Navy. Till Great Britain started to fortify Singapore as a naval base, the Japanese and the U. S. navies were the only factors in the Pacific situation. And both were endeavouring, the former determinedly and the latter with considerable trepidation, to solve the problems connected with what is known as "radius of fleet action." The development of naval bases in the Pacific and of aircraft and of aircraft carriers is in large part a solution of those problems. And that is how the Pacific, so long hostile to war, suddenly became the scene of naval and aerial warfare between nations of all continents.

Match point

Don't keep your Gold Flake to yourself! That's one of the rules of the game, if you wish it to be a love game. Remember how popular they are with women nowadays. It's the flavour of the really fine Virginia tobaccos of which Wills's Gold Flake are made that appeals to the ladies as much as to you. So, if you want to be the court favourite, be generous with your Gold Flake.

WILLS'S GOLD FLAKE

is the man's cigarette that women like

GF—262

What is the issue at stake? Is it naval supremacy in the Pacific? If it were, both Japan and the U.S.A. would have endeavoured to postpone the final clash. The widening of the radius of fleet action was a condition of the war and not by any means its cause. It is easy to account for the war by pointing to Japan's sympathies with the Axis and the exhortation of Germany and Italy to Japan to declare war on the democracies. But no nation sheds blood to demonstrate fraternal feelings. And Japan, unlike Italy, has programmes of her own. If and when Russia also comes into the war against Japan, the cosmic significance of the war in the Pacific would become unmistakable. Take the lands that skirt the Indian ocean and the lands on the Pacific seaboard of Asia; and consider for a moment what the fortunes of this large mass of humanity will be like in the new dispensations for which the foremost nations of the world are now fighting to the finish. A few years ago when Mr. Harold Butler toured over the whole of the Far East, the trained eyes of the head of the I.L.O. were opened to one aspect of the world economic problem which other Europeans had assiduously trained themselves to ignore. Here are large masses of humanity which are ruled by small bands of European colonists much like herds of elephants by the little son of a mahout. The rival groups of colonists had some how adjusted their rival claims and had settled down to an exploitation of the lands with a view to finding raw material for European and American industry. The system worked well, and met the immediate needs of its authors. But how about the future. The war and its economic consequences had wholly upset the colonial dispensation of an earlier period. The tropical and semi-tropical countries of the Far East needed some kind of economic reconstruction and progress. Mr. Butler applied his mind to it and provided a number of useful ideas, that is, useful to any political authority able and willing to utilise them. But where was such authority to be found?

The Pacific problem in the long view, is less a problem of radius of fleet action than a problem of finding the authority which will put its hands to this task of developing, politically and economically this part of the world, which was once among the cradles of civilisation and which to-day threatens to become its grave. Japan considers herself as the natural heir to this authority. But the grounds on which she puts forward this claim are, a navy which is yet to meet its real test, an alliance that may any day turn out to be a blunder, an industrial and economic development that conceals a number of serious flaws and an impetuosity in foreign policy that never goes with genuine or sound success. It is often said that Japan's position is similar to Great Britain's and that geography assigns her a similar destiny. But the fourth dimension is clean forgotten. History does not repeat its doings of the stone age in the age of aluminum and aircraft. When the American navy and air force move into action, there will be nothing to suggest the remotest similarity to the Spanish Armada. And Britain did not start her imperial career with carving a wide dependency out of the Low Countries and bits of Northern France and Northwestern Germany. Nations are not made by study of history and geography. Japan may aim at an Empire like the Persian and look to her writs running from Vladivostok to Aden, but not a career like Britain's.

It is no use then trying to see the future of Japan through a fallacious parallelism between her position and Britain's. The plain fact is there, that Japan looks to snatching a vast Empire in the face of opposition from four-fifths of the human race. Neitsche was a German, and we have not learned to think of the Japanese as a race of supermen who are more than equal to that feat. Whether we look at the Pacific problem as one of naval and aerial strategy or as a problem of shaping the destinies of the largest masses of humanity, it is difficult to believe that Japan would be chosen to solve it. And so far as this problem is concerned, Hitler and Mussolini are rank outsiders. It may suit them to have other preoccupations for the British and American navies. And how they wish they could add here the Russian Army as well! The weakest point in Hitler's plans is its lack of outline is the details are excellent. If, then, the Fascist forces have little to do with their ally of the Far East, the latter will be left to face not only Britain and the U.S.A. but Russia and China as well. It is one thing to fish in troubled waters and quite another to stir the oceans for a bigger haul.

This year's successful exhibition naturally called for another effort. Art in Industry is again the subject, and the sponsor once more is Burmah-Shell. Competitors have been told about the classes, the form of entries and the rules through the press. The response should indeed be larger in February next despite the war. Dunlops and the Metal Box Co. are among the donors of prizes for meritorious work. The artist in India has seldom a chance to show what he is doing. The Exhibition, if it is restricted in scope and object, at least is better than the local salons organised here and there, now as in the past. The field of commercial art may offer a modest reward but it is as good as any other field. That is why the designing entrants should all make a note of the forthcoming Calcutta Exhibition. The Exhibition has certainly secured late but influential support from the Government of India which is going to give two prizes for posters, one calling for recruits to the I.A.F., the other asking for more men for A.R.P. services. The type, size, etc., have not been notified but the fact, that apart from individual and corporate patrons of art, Government has unbent to take note of Art in Industry will not be lost on those who acclaimed the Exhibition opened in the School of Art by the Premier of Bengal and suggested that it should become a regular cold weather event for Calcutta.

(From Our Correspondent)

New Delhi, Dec. 9.

EVEN to New Delhi the news that Japan had declared hostilities came with dramatic suddenness on Monday morning. It was only the previous night that the Viceroy left New Delhi on his winter tour, but he was fully aware, at the time of his departure, that war in the Far East was imminent. According to reports in official circles His Excellency has no intention of departing from his Calcutta Programme. If necessary he may hold a meeting of his Executive Council in Calcutta, but as the Government of India has been fully prepared for the present contingency there is no occasion for any special arrangements or urgent consultations as a result of Japan's aggression. Defence authorities express themselves amply satisfied with the military precautions taken at Singapore and other strategic centres in the Far East. The fact, however, that the war has actually come to India's door and that of enemy attacks, both by sea and air, though they may be only sporadic, have now to be guarded against, entails a big responsibility. The coming weeks will therefore see further intensification of the war effort—particularly on the civil defence side which is now under the direction of an Indian Member, Dr. E. Raghavendra Rau. Reinforcements from this country in men and material have now to follow on a much vaster scale both to the eastern and western theatres of war.

* * * *

The effect on our seaborne trade is bound to be felt in the coming weeks. So far as Japan is concerned, the trade had already come to a standstill. There were no exports at all to Japan in October—and imports from Japan totalled only Rs. 15 lakhs in value during the month as against Rs. 165 lakhs in October last year. But owing to the outbreak of these hostilities, trade with neighbouring countries like Australia, New Zealand, Hongkong etc., which for some time had been rapidly increasing their purchases from India may to some extent be affected. The Pacific route for trade with the United States will also not be available to the same extent as before. One serious factor which the Government of India is anxiously considering is the rise in prices of foodstuffs and other commodities. Definite action has been taken in the case of wheat, but there are essential commodities also requiring the Government's attention. The rise in prices is partly due to the insufficiency of wagon supply and partly to speculative tendencies. So far as the former at least is concerned the Railway authorities can do something to ease the position and arrange for better and quicker facilities for the movement of goods. Already there are reports that owing to the outbreak of war with Japan it may be necessary to restrict the supply of petrol to the public even further.

* * * *

One prominent question which the present critical phase in the war situation bringing India practically within the war zone has raised is undoubtedly the effect which it will have on the political situation. The New Indian Members of Government appear to be more than ever convinced that instead of the present Adviser regime in six provinces there should be popular Ministries. The formula which they are commending to the public is a coalition arrangement for the war period which for the present at least will keep aside party differences. Much depends upon the move which the Congress Working Committee will decide to take at its meeting on the 19th December. As I have previously indicated the Congress will not probably object even to minority Ministries in the provinces as preferable to official Advisers, but the prospect of a Congress-Muslim League agreement seems to be as far off as ever. The view of Mr. C. Rajagopalachari and other Congress leaders is understood to be that before the Provincial question can be settled, there should be established a responsible National Government at the Centre. Unfortunately the influence of certain well-known die-hards in the British Cabinet has been delaying a decision on bold lines which will appeal to the country, but according to reports from London there is the possibility of another political move in the near future. It is being freely hinted that if the Congress would agree to give wholehearted cooperation in the war effort, the British Government would for their part agree to two important changes—the appointment of an Indian Defence Member and also the complete Indianisation of the Viceroy's Council. The possibility of another declaration in Parliament which will meet the Sapru Conference's demand for a time limit for the grant of Dominion Status is also mentioned. It is understood to be the view of the new Indian Members of Government that as all Satyagraha prisoners have been released and no further action is proposed to be taken against those who are only guilty of symbolic offences, Mahatma Gandhi has gained his point as regards free speech and should rest satisfied.

* * * *

The meeting of the Cotton Textiles Advisory Council last week in New Delhi attracted considerable attention. It was attended not only by the Supply Member but also by the Commerce Member and the Finance Member. As a result of the discussions it has been agreed that a minimum percentage of the capacity of all mills should be placed at the disposal of the Supply Department. The question of producing standard cloth at reasonable prices for the poor people was also discussed at great length. According to the scheme suggested which will be finally considered at another meeting next month, every mill will produce standard cloth up to a percentage fixed by the Government. Its sale will be through shops managed and run by the mills themselves though the place of location of these shops will be decided by the Government in consultation with the textile panel. Legislation is proposed to make it compulsory for each mill to produce the necessary percentage of standard cloth, open the number of shops prescribed on the basis of the loomage and sell it at prescribed prices. There is considerable satisfaction at the success of these discussions. The Government of India are anxious, in view of the state of the cloth market to have production started as early as possible and have the cloth on sale.

* * * *

It is understood that the Government of India are considering a proposal to amend section 202 of the Government of India Act. This has been necessitated by certain developments in the Federal Court which have disclosed a lacuana in the Act. It appears that as a case concerning the Ahmadyya community is coming up before the Federal Court, one of the judges, Sir M. Zafrulla who is a member of the commuity has expressed his unwillingness to sit on the Bench hearing it. There appears to be no provision in the Act to arrange for temporary vacancies of this nature. It is therefore likely that the present provision of the Act may be suitably amended in order to provide the necessary authority for making temporary appointments even in cases where no permanent vacancy has occurred. As this has to be done by Parliament, it may take some time.

Gateway of India

(From Our Correspondent)

Bombay, Dec. 10.

There have been more frequent appeals for volunteers for A.R.P. work. To see what has been accomplished after argument and pleading it is intended to carry out a house to house survey. Last week Mr. D. Symington expressed a wish that examination of progress made should precede the compulsion contemplated. The Government of India is going to bear half the cost of the proposed survey. The Bombay Government interested in seeing that householders are prepared, wants to see that safety accommodation is not absent in any premises. Every street and lane should have firefighters and watchers and it is desired that the parts should be equipped with stirrup pumps. Particular houses will be picked for stationing watchers. It is quite likely that compulsion may be applied in order to get 100,000 men needed at present and each house may be asked to supply one able-bodied man. The Corporation has hardly evinced any inclination to accept new and large duties. So. the Home Department carries on with the work of instruction and experiment. In working class areas each tenement will be called upon to give a few men but it remains to be seen if those working overtime or double shifts can spare the time or possess the energy wanted for the arduous business of fire-watching. Property-owners may have to face a new levy if new schemes are to be applied and enforced. The police have enough to do as it is, and insurance bodies are likely to ask if A.R.P. requirements are complied with more keenly than before cover is taken out for premises in the city. Commodity stock insurance rates are certain to rise and the property-owner is now sure to express dissatisfaction.

Millowners in Bombay decided last week that their workpeople are entitled to a bonus of 12½ per cent for 1941 in view of the war and their own rising profits. All cotton mill workers in Bombay engaged in the mills this year are eligible. In accordance with this decision millowners are going to pay out about Rs. 1 crore to about 200,000 men on February 21, 1942. Last week the textile workers learnt with pleasure that men on the muster roll as permanent and budlee workers in mills which are members of the Association are going to get a war bonus if they are in service on February 21 of the mills. Budlee workers who have worked for less than 75 days in 1941 are excluded from the benefit of the decision. The mill-owners committee decided that the bonus should be calculated on the basis of wages without considering the dearness allowance. But maternity benefits paid to women who were on statutory leave during 1941 will be treated as part and parcel of wages earned in calculating the war bonus payable to them. This is another way of helping the woman worker who does not draw equal wages and has in some cases to support others besides herself.

Recent obituaries include that of Mr. Samuel Fuchsmann. He was the manager of the Dyes department of the I.C.I. in Bombay. A heart attack accounted for his death last week. A Swiss he came to Bombay in 1922 and joined a German firm. When the I. G. Farben-industries took over, he became Joint General Manager and retired in 1938. His vast knowledge of the trade led to his return to India at the special request of the I.C.I. when they were anxious to develop the trade on their own account. The dye market in the city was closed in his memory and the office and godowns of the I.C.I. were also closed. The Swiss colony turned out in strength to attend the funeral last Wednesday. A condolence meeting of the European and Indian staff was held to show respect to Mr. Fuchsmann whose family is in Switzerland.

The emergence of the strike threat in Akola last week did not detract from the value of the decision announced in Nagpur. The recommendations of the Textile Labour Committee, asking for the restoration of the wage-level of 1931-32 and the retention of the previously granted allowance for mill workers in the C. P. and Berar, have been accepted by the management of the Empress mills. A notice issued last week refers to the need for carrying out the payment of extra wages because Government has decided that mills should pay at old rates. Workers have been asked not to resort to any strike ; that is a condition of acceptance by the Empress mills which point out that they pay the highest wages and at great expense provide other amenities. They have been advised to work peacefully and regularly. The Model Mills have followed suit. The grant of a regularity bonus in order to curb absenteeism was favoured by the C. P. Government. This will amount to Rs. 18 per annum and this too has retrospective effect as from June 1st this year.

In view of suggestions frequently made for helping handloom weavers, the Industries Department has been asked to help in securing orders from the Supply Department. The Government has sanctioned a sum of Rs. 3.78 lakhs to District Co-operative Associations to undertake contracts and Rs. 4 lakhs have been made available for the purchase of yarn. The Supply Department is expected to put out work for handloom weavers because they are in a bad way. It has been said that 8.400 looms are ready for the jobs on hand and the handloom industry is equipped to produce cloth valued Rs. 75 lakhs in a single year. The Industries Department intends to give a loan of Rs. 2,225 per each unit of 50 loans devoted to work for the Supply Department. The Textile Expert and Designer of the Industries Department will also be deputed to supervise the making of cloth for supply purpose. Production supervisors would be assigned for each Weavers' Society engaged in making cloth for supply orders.

The outbreak of war found markets prepared but apprehensive. The round-up of Japanese citizens was a cheap thrill for the City police. The Deputy Controller of Enemy firms had been asked to act in time. The offices of about 20 firms were sealed under the Defence Rules following the declaration of war. A number of radio sets were seized and the consular staff is under surveillance. As trade was at a stand-still, long before the war broke out, the staff had been reduced already. Those in employ went round to the office of the Controller of enemy firms. It is believed that only 300 Indians were engaged in Japanese offices as compared with 1,00 in July. Many of them were under notice prior to discharge . The repercussions of the war must be sought beyond the houses of the 300 men who stand to lose their jobs. Japanese supplies cannot be had—that means a jump in the price of chemicals, electrical goods and many articles of daily use. The artificial silk industry takes a knock-out blow. This year has been very bad for the industry ever since the import duty on art silk yarn was raised. The mills cannot have imported yarn after the available stocks are used up. So what is meat for cotton mills is poison for the art silk mills here. Many think that the majority will close down in four months or so.

Resume of Commodity Markets

THE outbreak of hostilities in the Far East has naturally come as a shock to operators in most of the commodity markets. For, till the actual declaration of war by Japan on the United States and Britain it was fondly expected that it would still be possible to avert a catastrophe and that peace in the Pacific would be maintained at any cost. Thus operators in the several markets had been completely mistaken and the abrupt rise in prices in the bullion markets last week was perhaps the first pointer to the seriousness of the Far Eastern situation. The self-complacency of operators will be evident from the fact that the price control order regarding wheat promulgated towards the close of last week did not have any effect on the Karachi wheat market.

On Monday this week, the news regarding the entry of Japan into the war came as a nasty surprise to the several markets. The cutting off of the Pacific route affects mostly the export commodities like short staple cotton, jute, hessian and oilseeds. Only recently with the improvement in the freight position it was possible to increase the volume of exports to countries in the East. The dislocation to shipping should thus result in a considerable decline in exports at least temporarily. It is not surprising, therefore, that there was a slump in values in the jute, jute manufactures, cotton, wheat and the oilseeds markets.

Jute manufactures will be affected most because the United States is an important customer. Also Malaya, Australia and New Zealand are our best consumers of heavy goods at the present moment. A reduction in jute exports will naturally mean a decline in jute consumption and it is highly doubtful if the increase in orders for sandbags will make good the short-fall in respect of exports.

There has been a runaway rise in prices in both the gold and silver markets. Speculative buying and demand for hoarding purposes caused a rise in the quotation for gold ready to as high as Rs. 49-6, the highest level for the war period. Only some selling at the higher levels has resulted in a decline to Rs. 47-8. The silver market did not follow the rise in prices in the gold market completely in the early stages, but in mid-week Indian Mint Silver was pushed to Rs. 67-13 in spite of the heavy selling from official sources. There has only been a slight setback to Rs. 66-8.

Jute

The fears that the dangers in the Pacific shipping route would cause a substantial reduction in shipments and that the safety of Calcutta was threatened by the new enemy have caused a sharp break in prices in the jute futures market. The quotation came down to Rs. 53-10, a decline of more than ten points in a week. Only the reports regarding the fixation of minimum prices caused a recovery in prices. On Tuesday, the Committee of the East India Jute Association actually fixed a minimum price of Rs. 56 per bale. In the short covering that followed, the quotation improved to Rs. 60-4 though only to recede to Rs. 58-12. There is no reason to suppose that there will be a big reduction in mill consumption on account of the fresh developments for the possible increase in orders for, sandbag orders may offset any decline in consumption for ordinary purposes.

Cotton

There was a break in the quotation for Broach April-May by thirty points to Rs. 220. There was a subsequent recovery to Rs. 230 and the quotation is now around Rs. 225. The whole of Indian cotton is now to be consumed by Indian mills for cotton exports to Japan have been completely cut off and with the present difficulties it will be useless to expect any increase in shipments to the United Kingdom. It has already been pointed out on earlier occasions that there is no fear regarding the consumption of long staple varieties as with the present rate of mill consumption a shortage in respect of these varieties is actually to be feared. The problem will be regarding the disposal of short-staple varieties. But for the reports regarding unfavourable weather conditions the decline in prices for Oomra and Bengal would perhaps have been more pronounced.

Piecegoods

The complete cessation of cotton imports into this country will tax to a certain extent the capacity of the Indian cotton textile industry. The industry is now forced to spin yarn and weave cloth to meet completely the requirements of the Indian and overseas markets. Even with the reduced imports of yarn considerable difficulty was experienced in recent months. It is needless to point out that with the complete stoppage of yarn imports the difficulty will be even greater. There has naturally been a rise in prices for both piecegoods and yarn and dealers have been anxious to replace their stocks.

Wheat

The import duty on wheat is removed and wholesale transactions above Rs. 4-6 are prohibited. In fixing this level the government has kept in view that in August 1939, the price of wheat stood at Rs. 2-2 and in April 1940 and 1941 Rs. 3-3. The maximum price fixed by Government is thus 110 per cent over the pre-war level. It remains to be seen whether in view of the latest developments it will be possible to bring in supplies of wheat from Australia to Karachi and Calcutta.

The control of prices has been extended to retail sales as well by all the provincial governments.

Tit Bits of Industrial Activity

Work for Tea

After the annual meeting of the Indian Tea market Expansion Board it was decided to allot Rs. 23.21 lacs on tea propaganda in India. Mr. Graham recorded his opinion that war made certain things difficult. Advertising for instance had become harder, but at the same time sales resistance had weakened, notably in Britain and the U.S.A. The Board set apart Rs. 2.34.000 for expenditure on tea cars. The appropriation is Rs. 1 lakh more than that made in 1940-41 Mr. Graham held that a larger grant was justified in this case. The concentration of work in urban centres was approved and the Board will launch its campaign in two more towns in South India. The annual grant for press and other publicity has also been raised. Estimated expenditure will be Rs. 3,20,000 more than that in the preceding year.

Shortstaple Cotton For Army

Increased use of shortstaple cotton has been foreshadowed in recent reports. There have been suggestions that specifications will be modified to alter the basic quality and extend thereby the use of Indian shortstaple cotton. The change may come also out of a desire to get large supplies more speedily. Mass production of textiles will naturally extend the scope for Indian cotton. As the life of Army clothing is limited, it is felt desirable that cheaper materials can be used without detriment. In place of numerals dyes myrabolans and katch are used for khaki cloth. By altering the width allowed Government can count on larger supplies for the army. It is felt also that India's surplus of 900,000 bales of shortstaple cotton must be used at home. The Technical Adviser will help Government and there is a likelihood of early decision concerning the changes regarding types, quality and widths.

Jute For Plastics

A wide field for jute in conjunction with plastics is likely to be opened up. Moulding factories have already tried jute waste successfully. A press note issued last month said that new uses for jute cloth were being sought. Jute waste for the manufacture of cheap laminated board may be acceptable, and it is suggested that for certain proofed materials, jute fibre treated with shellac solutions may be adopted. The Director of the Nankum Institute is known to be in touch with the Central Jute Committee. The application of synthetic plastics is said to be under investigation and a detailed scheme may be arranged after consultation with the Board of Scientific and Industrial Research.

Improving India's Wool

Handloom weavers have obtained the benefit of orders for blankets. They are likely to benefit further from plans to develop wool production. With 43 million sheep India is said to produce about 86 million lbs. of virgin wool. Total value of wool and woollen goods exported by India is said to be Rs. 38.5 lakhs per annum. Exports have been affected by the war, but there has been increased demand at home for a large quantity of low grade wool is absorbed for blanket making. For fabrics needed for Army use better wool is needed. Northern India's production is limited and improved breeds alone will produce a suitable fleece. The I.C.A.R. has approved schemes, and efforts will be made to test the quality of the clip in a special laboratory, working in touch with the industry, which has been provided by the Bombay University. Village shearing and grading centres have been set up in the Frontier to help shepherds make sure of better wool from their herds. The I.C.A.R. has again recommended that better wool is needed for the textile industry, and the sheep-breeding and other schemes entitled to special consideration.

Glass Pioneer

One of the first fruits of the Swadeshi movement, the Ogale Glass works is now in its twenty-fifth year. The silver jubilee of this company started with a capital of Rs. 2,000 shows that progress can be made without protection. The Paisa Fund and help of the Raja of Aundh lie behind the company's achievements. The factory in Aundh employs 1,500 men and the manufacture of lanterns and enamelling are adjuncts to glass manufacture which took root during the last war. The present war has witnessed even more rapid development of the truely swadeshi glass works at Ogalewadi. Many Princes sent goodwill messages to the Directors. The glass factory has benefitted from war orders for lanterns. The Ogales have set up branch factories in Nagpur, Bangalore and Colombo. It is intended to open a branch in Travancore also.

Coal Exports

In addition to his other duties, the Chief Mining Engineer is now arranging the supply of coal on behalf of His Majesty's Government both to the Far East and Middle East. He is also arranging the supply of coal for railway consumption in the Middle East countries and for supplies to Allied Governments. From the outbreak of war up to the end of September, 1941, the Chief Mining Engineer had arranged the supply of almost a million tons of coal to these authorities.

Textile Production

Between September 1940 and May 1941 the output of both yarn and cloth from Indian mills is known to have risen substantially. Fluctuations since then will not affect the major expansive trend. The increase will restore faith in India's ability to clothe herself and use as large a proportion of her cotton as possible. The increase recorded in May 1941 as compared with May 1940 when output rose to 121 million lbs. of yarn and woven goods to 83 million lbs. illuminates the general trend most clearly: .In the nine months of the cotton year 1940-41 the yarn spun amounted to 1064 million lbs. and the woven goods amounted to 773 million lbs. as against 900 and odd million lbs. and 654 million lbs. respectively in the corresponding period of 1939-40. The increase since April in Indian mill production is even more marked, but the subsequent months witnessed a reversal. In view of the extension of hours in mills including mills in Delhi and Ajmere-Merwara under the sanction of Government there should be a further increase in mill output.

ENDURANCE
The IRON PILLAR
The famous Iron Pillar of Delhi, which bears a Sanskrit inscription dating back to A. D. 300, has successfully withstood the ravages of time. Likewise, we claim that our STEEL Equipment, even if it may not last for centuries, does definitely last for much more than a life time.
Important, too, are other advantages . . . Steel Equipment is insect, fire and burglar-proof. It will not warp. Each unit remains for years in the same condition as when originally purchased. The first installation cost is the last. May we quote for your individual requirements?

Arguing Still

A memorandum submitted last month to the Government of India by those sponsoring the motor factory scheme is more concerned with showing the errors in the Government's argument that to set up a motor industry in wartime is impossible than with demonstrating the advantages to be obtained by India. Since the Mysore Government withdrew the support once promised on the score that the terms were too onerous and that the arrangement with the American company was of such a nature that real control in the interest of those assisting substantially would be scarcely possible, there have been long-range exchanges in connection with the motor scheme. It was often pointed out that the Studebaker company would replace Chrysler as the godfather, that Okha and the Baroda Government would take the place of Bangalore and the Mysore Government so that the promoters felt confident about the fruition of their scheme. The questions asked in the Commons like the cold, formal answers illustrated the negative attitude of the Government, said the promoters over and over again. A further attempt to convince Government that to help the motor factory scheme is the duty of a Government bent on making the most of existing opportunities and resources may not carry the promoters far, but its propaganda value is unquestionable. It has been argued that essential supplies can be had under the Lease and Lend Act; that no question of dollar exchange can arise when U.S. goodwill is more than abundant. If only Government can be persuaded to alter its opinion, there will be no trouble either about labour or its training. The memorandum makes one point. It is emphasised that a plant for assembling imported parts is not contemplated by the promoters who state that the factory will be at optimum efficiency in three years, and such parts as are had from abroad then will be inconsiderable. No new models or types are under consideration so that the Indian factory could be entrusted with Government orders on the reckoning that spare parts of local manufacture could be had when required. It has been suggested that specimen designs have passed the scrutiny of the military authorities and a factory located in Bombay will answer the Government's needs. The major point in the memorandum is a plea that the new factory is essential for the country's war effort. This is a point on which Indian or even Bombay opinion will not be unanimous. To locate a new factory and conduct it may not be at all convenient in view of new orders issued in order to reduce Bombay's vulnerability. That facilities may be granted by the Central Government in regard to imports and artisans is recognised, but the approach of war to India's shores may indicate to the Bombay Government, which deals with labour and other questions, the enormous difficulty of startnig in a crowded city a new factory whose capital cost incidentally is sure to exceed estimates. A revival of controversy will not help the industrialists concerned, and the proposed transfer to Bombay is likely to make the Baroda Government, which is probably still with the promoters, think that it is a mistake to take a hand in the scheme.

The only Authoritative and Indispensable Annual Reference Book and Directory for the Indian CottonTextile Industry

The Indian Cotton Textile Industry—
(1941 Annual)

Extra from the Foreword by
Dr. John Mutthai, C.I.E.

The Indian Cotton Textile Industry Annual published by Messrs. Gandhi & Co. is now recognised as a leading work of reference on matters relating to the industry, and the appearance of the 1941 volume will therefore be welcomed by all those interested in the industry.

150 Pages: Rs. 3 Foreign Edition Sh. 9

Chief Features:

★ Retrospects and Prospects of the Post-war Cotton Textile Industry, during the War-period.
★ "The Cotton Industry at a Glance" giving 15 authoritative and up-to-date Statistical Tables relating to the Industry.
★ Latest Tariff on Piecegoods and Yarn. (Incorporating the Indo-British Trade Agreement, 1939, changes made in 1940 and 1941.)
★ Cultivation, Export and Import of Raw Cotton.
Position of the Industry.
★ Present Financial and Economic Capital and Dividend Statement of Cotton Mills.
★ Future of the handloom Industry.
Scope of Export of Piecegoods, during the War.
★ Complete and up-to-date list of Cotton Mills working in India, with names and addresses of Managing Agents. Number of spindles, looms, etc.

Index and Bibliography.

To be had of:
MESSRS. GANDHI & CO. *(Publishers).*
14-1 Old China Bazar Street, *Calcutta* (India).

To withstand the immense strain imposed on them, the smallest of details in modern structures are made of steel.

DEPENDS UPON THE STRENGTH OF STEEL

To the people of yesterday how amazing and unbelievable would appear the concrete fact that man, today, spans the sky-ways of the world. And, whether or not the heavens echo the menacing roar of bombers, or the hum of aerial argosies, it is the strength of steel which has given man his wings. It is the dependable, tested strength of this metal which has linked step to step in this scientific triumph of modern civilization.

In the years that lie ahead it is this same power which will be the basis of man's greater achievements—his higher success.

Always—Everywhere—Steel for Strength

Jute and Jute Manufactures

(By our Correspondent)

Calcutta Dec. 11.

THE Board of Control of the East India Jute Association is to be commended for taking such prompt steps to stop the rot which had set in on the declaration of War by Japan, due to panicky selling in the Fatka market. In the end of the week the quotation had been ruling around Rs. 63-12 to Rs. 64 but the War news on Monday brought the rate down with a rush to Rs. 56-4 and on Tuesday morning the market opened at Rs. 53-10. The Board called a meeting for that afternoon when the first question discussed was a proposal to suspend all Futures transactions for a period of 3 months. This was not accepted by a majority of members, who were however agreeable to the fixation of a minimum price, below which no transactions in the Fatka market should be permitted. After discussion as to what such minimum price should be, a rate of Rs. 56 was agreed upon, this being based on actual business does that day with Mills in First marks at Rs. 56-8. The Government representative present at the meeting gave notice that Government would look with disfavour on the fixation of any minimum rate lower than Rs. 60 and held out a thinly veiled threat that if a lower rate was fixed, Government reserved the right to reconsider the acreage to be licensed for the coming crop. Some doubt was expressed as to what particular Government was expressing its views, for the general belief was that no Government, or at least no Ministry, existed in Bengal at that moment, and there was no guarantee that the views of a new Ministry would necessarily coincide with those of the old Ministry on the subject of Jute and the Jute Crop. However it was agreed that, as the meeting had been called, not by the Government, but by the Board in the interests of the trade, the views of the trade should prevail, and the minimum rate of Rs. 56 was almost unanimously accepted, this rate to be reviewed from time to time as circumstances dictated. The effect in restoring confidence was immediate as the quotation in the Futures market promptly rose to Rs. 58-12, and the following day Rs. 60-8 was touched. Although thereafter there was a recession to Rs. 58-4, the closing is again firmer at Rs. 59-8.

The reaction in the Hessian market was also salutary. There is no authority in that market analogous to the Board of Control to deal with such emergencies, and though there was some talk of the Mills entering into a "Gentlemen's Agreement" not to sell under stated rates, this would not have affected Bazar dealings. With the fixation of the minimum price for Jute Fatka however, the Hessian Fatka rate, which had sagged to Rs. 14-10, immediately recovered to Rs. 15-8. So the effect was achieved indirectly, aided no doubt by the fact that the holdings of Bazar dealers were on the average considerably higher than the rates to which quotations had dropped, so operators were glad enough to take advantage of any sort of ladder whereby to climb out of the slough.

The published Mill Stock figures as at the end of November make very satisfactory reading considering the extended hours worked. Net Hessian stocks for commercial purposes, that is excluding stocks held on Government account, only show an unimportant increase of 11½ lakhs of yards. Government stocks are up by over 40 lakhs yards. But it is the Sacking figures which give greatest cause for satisfaction. It was feared that with the longer working hours, sacking stocks would tend to increase. But with shipments above expectations, combined presumably with some further switch over of sacking looms on to narrow hessian and sandbag cloth, Heavy Goods stocks actually show a decline of no less that 142 lakhs yards. As Mill production figures for last month are not yet available, it is not yet possible to form an opinion as to which factor has been predominant in producing this result.

Export Jute has not been much in evidence during the past week. Tenders were called for for a quantity for shipment to Russia, but as freight is not yet forthcoming for the last order placed, nothing came of the enquiry. Mills have taken only a small interest. Beyond the sales of Firsts referred to above, there were further transactions reported in picked marks at as high as Rs. 62-8 for New Crop and Rs. 60 for Old Crop. Some Dundee Daisee was recorded at Rs. 53 and at Rs. 53-8, also some special Lightnings at Rs. 60. At the close some small sales of Outport Tossa 4s have been reported at Rs. 40 and Rs. 39. The movements of the Futures market have already been commented on.

In the Loose Jute market very little has been recorded. Buyers generally have been holding aloof till the position clarifies, and though sellers have been pressing for sales and prices have been heavily discounted, very little business has resulted. Indian Jat which had been quoted on the basis of Rs. 13 for Middles, was offered as low as Rs. 12 without tempting buyers, though at the close there has been some recovery of confidence and the rate quoted is now Rs. 12-8. A small sale of Northern Bengal Middles was reported at Rs. 12-8 and some Old Crops Cross Bottoms changed hands at Rs. 6-12. European packing was at one time quoted as low as Rs. 13-8 Middles and Rs. 9-12 Bottoms but, these rates are no longer on offer. The reaction in Mofussil markets has not been by any means so marked as in Calcutta, nor have imports increased. Prices have receded a little due to Beparies clearing their holdings, but these gentlemen will be chary of bringing in more jute till conditions settle down again. Also the Paddy harvest is in full swing, which always tends to curtail imports.

Business in the Fabrics section has been on a very limited scale, buyers naturally in the circumstances prevailing, being very shy. Prices have been heavily marked down in all directions but only small turnover has resulted. Small sales of nine porters have been recorded at from Rs. 19 down to Rs. 16 for ready and December, while January|March position sold from Rs. 17 to Rs. 15-4. At the end of the week sales of elevens were reported at Rs. 21-8 April|June and at Rs. 20-8 July|September, while near goods have changed hands at rates from Rs. 23-8 to Rs. 20. Some Wheat bags were reported at Rs. 25-12 January. Before the crash, Mills sold "B" Twills and Heavy Cees at Rs. 36 for April|June delivery and at Rs. 37-6 January. But since then December "B's" have been recorded at Rs. 35-4 and Rs. 35 and could now be bought at Rs. 34-8. Cornsacks sold at Rs. 38 to Rs. 37 for January but are now fully a rupee lower in value. Liverpools sold at from Rs. 43-4 to Rs. 40-12 for ready and December. Closing rates on a quiet and uncertain market are as follows:—

	Decr.	January March	April June
9 porters ..	15 14	15 10	14 14
11 porters ..	19 14	19 4	18 8
"B" Twills ..	34 6	34 2	33 8
Cornsacks ..	36 4	35 8	34 12
Liverpools ..	40 4	39 13	39 4
Heavy Cees ..	33 8	33 10	33 4

JUTE

Calcutta, Dec. 11.

The outbreak of hostilities in the Far East has naturally had a discouraging effect on all the commodity markets. There was heavy selling in the jute futures market in mid-week and a quotation as low as Rs. 53-10 was recorded. There was considerable speculative selling and it was generally feared that it would be impossible to maintain the rates of exports of jute manufactures with the dangers in the Pacific route. Only later consideration that greater quantities of sandbags will be required for defence purposes even within the country and the fixation of minimum prices in the jute futures market have resulted in a recovery in prices. Speculative buying and short covering pushed up the quotation to Rs. 60-4, but the discouraging developments in the Pacific war situation on Wednesday have resulted again in a decline in the quotation to Rs. 58-12. The undertone is quiet.

In the loose jute section, sellers are pressing for business and only a very small volume of business has been reported. Indian Jat, Middles were done as low as Rs. 12 per maund. There was later a recovery of Rs. 12-8 per maund. Old crop Cross Bottoms were done at Rs. 6-12 per maund.

In the pucca bales section, shippers have not been taking any interest in the market. After the fixation of the minimum prices, mills bought Firsts and Dundee Daisee 2|3 at Rs. 56-8 and Rs. 53-8 per bale respectively. Business was also done in a private mark special lightning grade at Rs. 60 per bale.

In the jute market there was a drop in the quotation to Rs. 53-10 from Rs. 63-14 at the time of last writing. Later there was a recovery to Rs. 60-4. The quotation at the time of writing is around Rs. 58-12.

JUTE MANUFACTURES

Calcutta, Dec. 11.

Similar conditions have been noticeable in the jute manufactures market but the decline in prices on balance is more pronounced. The fears regarding the future of exports have been the main reason for the drop in values. But for the fixation of the minimum price for 9 porters hessian February|March at Rs. 15-8 in the futures market the decline in prices would have been even greater. Mills production will not suffer on account of the increased demand for sandbags but fabrics for ordinary consumption will not have a wide market. 9 porters ready are quoting Rs. 16-4, January|March Rs. 15-12 and April|June Rs. 15-6. There has been particularly heavy selling of 11 porters. The quotation for ready is Rs. 20-4, January Rs. 20-4, January|March Rs. 19-4 and April|June Rs. 18-12. There is a decline of three points for 9 porters while for 11 porters it is as much as four points

In the heavy goods section quotations are naturally lower with the fall in jute prices. B twills for December shipment sold on the basis of Rs. 35-8, Cornsacks Rs. 56-8, Liverpool twills Rs. 40-4 and A Twills Rs. 43.

COTTON

Calcutta, Dec. 11.

As the rise in raw cotton prices in the Bombay market was mainly in sympathy with the gold market, there was naturally heavy selling when it was known that there was an actual outbreak of hostilities between Japan, United States and Britain. Broach April|May came down to Rs. 220 from Rs. 250 and only short covering at the higher levels caused a recovery to Rs. 230. Some selling at the higher levels has been responsible for the decline in prices again to Rs. 225. Mill buying has been satisfactory and an appreciable break in prices for staple varieties is expected. There has been a narrowing in the premium for Bengal May position over December|January and widening in the discount for Oomrah March over December|January. Broach April|May are quoting Rs. 225, Bengal December|January Rs. 137-8, May Rs. 143-4 and Oomra December|January Rs. 191 and March Rs. 177-8.

In the New York market there has been a sharp break in values. Even at the time of last writing, there was considerable anxiety regarding the Far Eastern situation. There has been heavy selling and the quotation for December has come down to 16 cents from 16.31 cents and March 16.60 cents from 16.90.

GOLD

Calcutta, Dec. 11.

Even at the time of last writing there was a good rise in prices on fears regarding the possibility of complications in the Pacific situation. At that time it was generally felt that the rise in prices was not falsified as it was expected that Japan would not enter the war. The expectations of the operators in the bullion markets have, therefore, been fully justified. Soon after the outbreak of hostilities in the Far Eastern situation, there was a jump in the quotation for gold ready as high as Rs. 49-6. There has been some selling at the higher levels and the quotation has come down to Rs. 47-12. The undertone is firm. Gold ready are quoting Rs. 47-14, First settlement Rs. 47-13 and Second settlement Rs. 47-12.

SILVER

Calcutta, Dec. 11.

In sympathy with the gold market silver prices moved higher in spite of the selling from special source. Indian mint silver ready were quoting higher at Rs. 67-13. But heavy selling at the higher levels has brought about a substantial reaction in values. The quotations are now for Indian Mint Silver ready at Rs. 65-15, First settlement Rs. 65-13 and Second settlement Rs. 66.

There have been no important change in prices in the London market and the quotation for both spot and forward is unchanged at 23½d.

WHEAT

Calcutta, Dec. 11.

The announcement by the Government of India that the all India maximum price has been fixed at Rs. 4-6, Lyallpur did not have any appreciable effect on prices early in the week. But the extension of control to retail prices as well and the outbreak of the Japanese war have resulted in a decline in prices. Choice white ready are quoting Rs. 45-8, January Rs. 45 and March 44-15. New crop for July position was quoted Rs. 38-12. The quotations at the time of last writing were Rs. 46-2, Rs. 46, Rs. 46 and Rs. 39-8 respectively.

In the local market also similar conditions have been noticeable. Cawnpore ready are quoting Rs. 6-8 and May Rs. 5-4-3.

(Continued from page 1089)

The raw cotton market has naturally reacted. Prices moved adversely after the freezing order and as exports since were restricted to previously accepted orders, the position has been regularised. Broach fell by Rs. 20 and Oomras for which the main market has always been Japan dropped by Rs. 16 per bale on Monday. All commodity markets slumped while bullion prices soared. Silver went up again and gold was bought readily by speculators. Yarn prices, particularly of merceris'd yarns, shot up. Staple fibre yarns were snapped up with dealers bidding at an advance of six annas per lb. Indian yarns, strange to say, fell in price, in sympathy doubtless with cotton. The brisk rise in sugar is attributed generally to the belief that Java will not be a ready seller to the ports. Prices rose by eight annas per maund as compared with last week because re-exports are likely to increase and home supplies will command a bigger market. The share market, closed for settlement on Monday, felt only the back wash of Monday's excitement. Mill shares lost their spell and sellers of miscellaneous scrips predominated. The inter-market leaders slumped and the shares of companies operating in Burma and Siam were pressed for sale. The cash section suffered pretty severely when it was known that Steels were falling on the new Exchange. Soon it was known that marine insurance rates for the Pacific had been raised substantially on Monday.

The activity of the bullion market offers small consolation to investors. If the giltedged market is unperturbed, there is not much to look at except at the lucky bulls who knew that sales at 62¼ per 100 tolas of .916 fineness would not hurt the market. Demand is growing and Bombay stocks are not large. Import is ruled out. So quick buying forced rates up. Selling in the gold market has been small because demand is smaller after last week's rise. Occasional buying has been reported but arrivals have been small and local stocks are by no means large. There is general recognition that the crisis must lead to a rise in bullion. The deflation of prices in the case of wheat and foodstuffs is not at all viewed as a bad thing. Recovery in cotton is still anticipated by some who argue that crop movement will not check any pick-up in prices after the bad news and its effects are allowed for.

Mr. T. S. Kennedy's successor as sheriff this time is Mr. M. R. A. Baig. He has been an active member of the 'Woil' group and has on occasions toned down the acerbities of communal debate. He is one of the youngest men selected for the honorary post.

Stock Markets to-day and to-morrow

PANICKY SELLING: FIXATION OF MINIMUM PRICES FOR LEADING COUNTERS

THE news that Japan had declared war on the United States and Britain came as a complete surprise to everybody on Monday this week. Even at the end of last week there was considerable anxiety regarding the Pacific situation but it was never at any time expected that the Japanese would enter the war so early. There was heavy selling on Monday. Indian Irons came down to Rs. 32 from Rs. 35-10, Steel Corporations from Rs. 21-12 to Rs. 19-4, Howrahs from Rs. 59-12 to Rs. 56-8, Burma Corporations from Rs. 4-14 to Rs. 3-12 and Indian Copper Corporations from Rs. 2-10 to Rs. 2. True, with the fixation of minimum prices for these five counters at the lower levels, above-mentioned, panicky selling has been arrested. In Bombay also there has been a decline in prices. Tata deferreds are nearly 400 points at Rs. 1,895. Bombay Dyeings also have shed about 150 points at Rs. 1,895. Bombay Burmahs were nearly 300 points lower at Rs. 300 at one time. There is considerable anxiety regarding the future and only if there are encouraging developments it will be possible to record any improvement in values.

Speculative selling has been prevented to a certain extent by the fixation of minimum prices for the leading counters and the strict observance of regulations regarding deliveries. But it is to be noted that the decline in prices for other counters is more pronounced. The higher-priced jute shares are lower by nearly 100 points in places. The entry of Japan has brought the war very near to the frontiers of India but it is to be expected that with the joint efforts of the United States and Britain our security will not be directly threatened. It should be possible to take a clearer view after two weeks. The question is discussed at length in an editorial in the main issue.

* * * *

With a further increase in the total volume of sales, the earnings of the *Titaghur Paper Mills Company, Limited* for the half-year ended September 1941 have improved further. The increase in sales, however, is not on the same scale as on the last occasion. But for the strike which lasted from September 26, to 7, 1941, earnings would have been higher. The net profit, before providing for taxation and depreciation, is Rs. 42,21,210 against Rs. 37,65,913 for the previous half-year. The whole part of the increase in earnings, however, is taken up by the higher provision for taxation, being Rs. 24,30,000 (Rs. 19,20,000). The amount set aside to depreciation is lower at Rs. 4,11,681 (Rs. 4,84,981). The sum of Rs. 1,62,448 is written off Investments against Rs. 1,02,923 transferred to Bad Debts Reserve on the last occasion. Rs. 1 lakh, the same as previously, has been transferred to General Reserve and Rs. 1,50,000 (same) to Reserve for Revaluation of Stocks and Stores. The Debenture Redemption Reserve again receives Rs. 1.5 lakhs. Allocation to other funds is Rs. 90,000. As the whole increase in earnings has been absorbed by the higher provision for taxation it has not been possible to increase the distribution to ordinary shareholders. The dividend and bonus have been maintained at eight annas and four annas per share respectively. Light is thrown on prospects by the observations in the report to the effect that increasing demands have been made on the mills for large tonnages of paper by Government and the Army. In the general interests of the war effort, priority has been given to these demands. Costs continue to rise on account of the general increase in the prices of coal, materials of all kinds, chemicals, machinery, spare parts, etc., and difficulties are being experienced in obtaining adequate supplies of certain chemicals and other items vitally necessary for the production of pulp and paper.

As it was generally expected that there would be an increase in the dividend on the ordinary shares there has been a setback in the quotation for the shares to Rs. 21. The decline has been aggravated by the developments in the war situation during the week.

* * * *

But for the difficulty in obtaining supplies of wagons it should have been possible for the collieries situated in the Central Provinces to report a higher level of earnings. Full advantage could not be taken of the heavy demand for C. P. coal on this account.

The Amalgamated Coalfields, Limited has reported higher level of profit in the half-year ended September, 1941 in spite of the reduction in despatches. The net profit, before providing for taxation, is Rs. 200,058 against Rs. 1,55,247. The amount set aside to depreciation is Rs. 54,709 against Rs. 57,398 while the provision for taxation is considerably higher at Rs. 48,437 against Rs. 12,178.

The Directors have again decided against the bonus. The dividend however is maintained at 7½ per cent. The amount carried forward is higher at Rs. 16,185 against Rs. 7,397 brought in.

* * * *

The Pench Valley Coal Company, Limited has certainly done well in the half-year ended August 1941. The net profit, before providing for taxation, is considerably higher at Rs. 1,08,273 against Rs. 71,119. The provision for depreciation is Rs. 14,513 (Rs. 16,186) while the allocation to Taxation Reserve is Rs. 26,838 (Rs. 22,434). The dividend has been maintained at 8¾ per cent. The amount carried forward is Rs. 3788 against Rs. 4,773 brought in. On the last occasion the sum of Rs. 15,000 was transferred from Reserve for Contingencies.

* * * *

Thanks to the enlarged scope for activities of the company there has been a jump in the earnings of the *Publicity Society of India, Limited* in the year ended July 1941. The net profit, before providing for taxation and depreciation, is more than twice the figure for 1939-40, the amount being Rs. 83,323 against only Rs. 38,220 for the previous year. The amount of Rs. 7,575 (Rs. 9,215) has been written off furniture and fixtures while the provision for taxation is Rs. 35,500 (Rs. 7,500). The amount written off bad and doubtful debts is Rs. 2,276 against Rs. 2,317.

The dividend has been doubled to Rs. 1-4 per share from annas 10 per share. Though recently there has been a setback on account of the general fall the quotation rose to nearly Rs. 12 not long ago.

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, Dec. 1.

THE outbreak of war in the Pacific has naturally resulted in a sharp setback in prices in the several sections on the Calcutta Stock Exchange. It will be remembered that even at the time of last writing an easier feeling was noticeable with the anxiety regarding the Pacific situation. On Monday it was known that Japan had declared war against the United States and Britain. There was a heavy spate of selling in the first hour and quotations for all popular counters were marked down substantially. The Committee of the Calcutta Stock Exchange came to the rescue. Minimum prices for five speculative counters were fixed and a heavy penalty is to be paid by those operators who do not abide by the restrictions. The minimum prices are: Indian Irons Rs. 32-4, Steel Corporations Rs. 19-4, Burma Corporations Rs. 3-12, Howrahs Rs. 56-8 and Indian Coppers Rs. 2. Quotations for the counters for which minimum prices have been fixed are fluctuating around the minimum levels but there has been heavy selling for other counters and big declines in prices have been recorded. High-priced jute shares are as much as 60 points lower on balance. With the slightly encouraging news regarding the war situation a steadier feeling was noticeable early in to-day's session. Pending a clearing up of the situation, however, it cannot be expected that there will be any recovery in prices.

In the giltedged securities section, after a long time there has been a fall in prices with the uncertainty regarding the future and the increase in money rates. The panic in the market will be evident from the fact that applications for treasury bills were very low during the week. And there has been a jump in the treasury bills rate. 3½ per cent. Paper are quoting nearly two points lower at Rs. 94-4. Terminable loans also are lower. 2¾ per cent. 1948|52 were Rs. 97-12, 3 per cent. 1951|54 Rs. 99-8, 3½ per cent. 1947|50 Rs. 102-12, 4 per cent. 1960|70 Rs. 113 and 5 per cent. 1945|55 Rs. 109. There have been no transactions in provincial loans.

No transactions have been recorded in public bodies' debentures. The only transaction in industrial debentures was in *Dalmia Cement* at Rs. 104-12. Not many transactions have been recorded in preference shares. *New Victoria* preferences were lower at Rs. 9-6. *Dalmia Cement* were Rs. 120, *Soorah* Rs. 149, *Bowreah* Rs. 114-8 and *Alkali* Rs. 124-8 ex-dividend. National were Rs. 174 ex-dividend.

In the Cotton section, *Dunbar* are nearly 30 points lower at Rs. 265. *Basanti* were Rs. 6, *Kesoram* Rs. 10-8 after being lower at Rs. 9-14 and *New Victoria* Rs. 6-3. This company is paying a dividend of eight annas per share on the ordinary shares for the year ended October, 1941.

Coal shares also have been affected. On account of the extension of the war zone to the Pacific it is feared that exports will be considerably affected. *Bengal* are lower at Rs. 378, *Bokaro and Ramgur* at Rs. 16-6, *Burrakur* at Rs. 13-8, *Dhemo Main* at Rs. 13-14, *Equitable* at Rs. 38 and *Standard* at Rs. 21-14.

Jute shares have suffered a sharp decline as there is anxiety regarding the future of exports. Thanks to the fixation of a minimum price, *Howrah* are quoting around Rs. 56-8 but there has been a substantial decline in prices for other counters. *Anglo-India* are nearly fifty points lower at Rs. 341. *Adamjee* were nearly two points lower at Rs. 31. *Champdany* were Rs. 183 against Rs. 206, *Clive* Rs. 24 against Rs. 28-2, *Gourepore* Rs. 695 against Rs. 770, *Megna* Rs. 59 against Rs. 67, *Nuddea* Rs. 63 against Rs. 70 and *Reliance* Rs. 56 against Rs. 62-8.

In the Engineering section, *Indian Iron* and *Steel Corporation* were marked at Rs. 32 and Rs. 19-4 respectively. A further decline in prices was prevented by the fixation of minimum prices at these levels. The quotations in to-day's session are around Rs. 32-10 and Rs. 19-10 respectively. *Burn & Co.* are forty points lower at Rs. 363. *Jessop* have not been very much affected, the quotation being around Rs. 20. *Braithwaite* were Rs. 9-12, *Bhartia Electric Steel* Rs. 15, *National Iron and Steel* Rs. 10-4 and *Kumardhubi Engineering* Rs. 5.

Not much business has been passing in Sugar shares. *Carew & Co.* were Rs. 2-8, *Champarun* Rs. 20-12, *Purtabpore* Rs. 12-8 and *Ramnugger Cane and Sugar* Rs. 12-8.

Tea shares have been out of favour. *Hattikhira* were Rs. 23, *Hansqua* Rs. 11-12 and *Dimakusi* Rs. 32-4.

In the miscellaneous section, *Burma Corporation* and *Indian Copper* were around Rs. 3-14 and Rs. 2 respectively. *B. I. Corporation* were Rs. 5-6, *Indian Cable* Rs. 21-8, *Aluminium Corporation* Rs. 12, *Alkali and Chemical* Rs. 20-8, *Assam Saws* Rs. 3-13 and *Borooah Timber* Rs. 17-4. Paper shares also are lower with *Titaghur Paper* at Rs. 21-8, *Bengal Paper* at Rs. 139, *India Paper Pulp* at Rs. 168, *Orient Paper* at Rs. 17 and *Shree Gopal Paper* at Rs. 14-11.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, Dec. 11.

Money.—A slight demand for funds has been noticeable throughout the week, the rate for call money having improved from ¼ to ¾ per cent.

Exchange Market.—Banks were selling T. T. at 1s. 5 31|32d. and buying three months' bills at 1s. 6 5|16d.

Securities.—The declaration of war by Japan as well as by Germany and Italy on Great Britain and America has ben responsible for a sharp setback in prices in this section. There were more sellers than buyers with the result that all securities were marked down heavily. 3½ per cent Paper closed with sellers at Rs. 95-2. 1948|52 were done lower at Rs. 97-12 as against Rs. 98-2 in the previous week; 1951|54 at Rs. 99-8 against Rs. 99-12; 1963|65 at Rs. 94-10 against Rs. 95; 1947|50 at Rs. 102-12 against Rs. 103-13; 1960|70 at Rs. 109-12 against Rs. 111-2; 1955|60 at Rs. 114 against Rs. 114-13; 1945|55 at Rs. 109 against Rs. 110-12 and 1946 *Defence Bonds* at Rs. 101-10 against Rs. 102.

Shares. The forward section of the local Stock Exchange remained closed on Monday owing to *Valan*. On the news of the declaration of war by Japan in the Far East prices opened substantially lower on Tuesday owing to heavy liquidation in almost all scrips. At the lower levels there was some short-covering and attempts to stage a rally were made, but the market lacked confidence. Towards the close of the week prices again sagged heavily owing to the scarcity of buyers. Sellers again dominated the market following the announcement that Germany, Italy and Japan have signed a military alliance against the United States and Great Britain. The closing tone was weak.

Textiles.—Prices in this section declined owing to heavy unloading. *Bombay Dyeing*, after opening at Rs. 1,380, touched a low of Rs. 1,275, but closed better at Rs. 1,315 as against Rs. 1,487-8 in the previous week; *Central India* were done lower at Rs. 424; *Century* Rs. 454; *Colaba* at Rs. 230; *Gokak* at Rs. 341; *Kohinoor* at Rs. 564; *New Great* at Rs. 335; *Simplex* at Rs. 230 and *Swadeshi* at Rs. 448. In the cash list, *Sholapoor* were at Rs. 6,760; *Vishnu* at Rs. 7,790 and *Western India Spinning* at Rs. 2,080. The wide disparity between cash and forward prices has narowed down considerably possibly owing to the elimination of weak holders.

Steels.—The market for steel shares developed a sagging tendency followed by a wave of selling by nervous holders. *Tata* ordinaries opened at Rs. 383 and were done as low as Rs. 300. Towards the close of the week the market recovered a great deal owing to short covering, the closing price being better at Rs. 360. The deferreds closed at Rs. 1,895, showing a drop of nearly 440 points over the previous week.

Banks.—This section ruled steady with *Bank of Baroda* at Rs. 118-12; *Bank of India* at Rs. 145; *Central Bank* at Rs. 50-4; *Imperial Bank* fully paids at Rs. 1,615; contributories at Rs. 406-4; *Reserve Bank* at Rs. 109-8 and *Union Bank* at Rs. 7-7-9.

Miscellaneous.—Associated Cement opened lower Rs. 168 against the previous close of Rs. 178-8. This level was, however, maintained towards the close of the week, in spite of nervous unloading, following the recommendation of a dividend of Rs. 6 per share as against Rs. 5 in the previous year. *Bombay-Burmah* Trading fluctuated between Rs. 300 and Rs. 402-8, the closing price being Rs. 387-8. *Belapur Sugar* lost about Rs. 15 to close at Rs. 318. *Indian Radio* ordinaries were marked at Rs. 430 and the deferreds at Rs. 370. A scheme for capitalising Rs. 27,00,000 out of the reserve fund of this Company was adopted at the extraordinary general meeting held during the course of last week. The issue of bonus shares to be called 'B' shares amounted to additional distribution of profits and therefore half the number of shares would go to the ordinary shareholders and the remaining half, namely, 13,500 shares, would go to the holders of deferred shares. *Alcock Ashdown* were unchanged at Rs. 685, while *Indian Iron* were done lower at Rs. 32; *Steel Corporation* at Rs. 19 and *Premier Construction* at Rs. 123. *Scindia Steam* were also lower at Rs. 23-7; *Tata Oil* at Rs. 59-8; *Tata Chemicals* at Rs. 17-4 and *Shivrajpur Syndicate* at Rs. 41.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, 11th Dec. 1941.

The local market displayed accentuated nervousness during the week following the declaration of war by Japan, Germany and Italy on the U. S. and Great Britain. Sellers predominated in all sections with buyers increasingly reluctant to operate.

Securities: This section was weak and rather nervous during the week. 3½ per cent Paper was marked down as low as Rs.94; closing slightly better at Rs.94-4. 4 per cent 1955-60 at Rs. 114-8. The State and Pro- 1960-70 were quoted at Rs. 110-6 and 4½ per vincial Loans continued to meet with good enquiries with no sellers in evidence. 3 per cent 1952 *Madras* changed hands at Rs. 99-5 s.l.

Mills: Textiles had a weak tendency and almost all shares lost several points. *Buckingham & Carnatic* were marked down at Rs. 300; *Bangalore Woollen* at Rs. 310 and *Cambodia* at Rs. 14. *Radhakrishna* met with business at Rs.297; *Ranga Vilas* at Rs. 107; *Sitaram* at Rs. 108; *Coimbatore Murugan* at Rs. 135 and *Mysore Spun Silk* at Rs. 13-6.

Utilities: Only a small business was done in this section. *South Madras Electric* ordinaries were in request at Rs.14-10, while the 2nd preferences were done at Rs. 13-10. *Chengleput Eelctric* were crossed at Rs. 20-2 c. d. and *Salem-Erode* at Rs. 13-10.

Plantations: Planting issues met with a restricted turnover as little buying interest was shown. *Cochin Malabar* closed at Rs. 9-4; *Coorg* at Rs. 38-8; *Midland* at Rs. 9-14; *Vaikundam* at Rs. 14-12; *Ayer Manis* ordinaries at Rs. 11-12 s. l. and the preferences at Rs. 103. In the Tea section, enquiry still continued for *Peermade, Peria Karamalai* and *Nilgiri Neerugundi* at Rs. 33-8, 20-8 and Rs. 3 respectively. *Devaihola* had buyers at Rs. 10-4 and *Kalasa* at Rs. 9-10.

Sugars: Travancore Sugars met with selling pressure during the week following the reduction in the dividend from 10 per cent to 7½ per cent. The closing price was Rs. 15-14 c. d. *Deccan Sugars* small shares were unchanged at Rs. 62-8 and *Mysore Sugar* at Rs. 54. *E. I. D.* ordinaries after a long time came in for business at Rs. 24s.

Banks: *Indian Overseas Bank* were done slightly lower at Rs. 103, while *Palai Central Bank* were done at Rs. 15-4 and *Bank of Hindustan* at Rs. 33.

Miscellaneous: *Mysore Paper*, which were done as high as Rs. 19-8 c. d. last week, declined during the week to close at Rs. 18 c. d. in spite of the announcement of a dividend of 5 per cent for the year ended 30th September, 1941. *Mysore Chemicals & Fertilisers* were slightly lower at Rs. 19; *Spencer* ordinaries at Rs. 7-8 and preferences at Rs. 11-6. *Indian Steel Rolling Mills* Ordinaries were a shade easier at Rs. 8. *Mysore Lamps* and *Amrutanjan* Preferences came in for business at Rs. 12-14 and Rs. 100 x.d.

LONDON STOCK EXCHANGE

The war in the Pacific and the loss of 'Prince of Wales' and 'Repulse' came as a shock to the markets. Prices were substantially marked down and quotations for Industrials especially were lower. Issues with Eastern interests were the worst sufferers. Giltedged securities are not very much lower on balance. 3½ per cent. India Sterling Paper were 99¾. Among British Funds, 2½ per cent. Consols were 81⅝, 3½ per cent. Conversion 99⅞, 3½ per cent. War Loan 104½ and 3 per cent. War Loan 101¼.

Tea issues has not been very much affected but Rubber issues are weak. Minings are not very much changed though Oils are very much lower, there being a sharp drop in *Anglo-Iranian* and *Royal Dutch*.

NEW YORK STOCK EXCHANGE

There has been a sharp break in prices on Wall Street with the involvement of the United States in the war. The atmosphere is gloomy. *U. S. Steel* were $48⅞, *Anaconda Copper* $23 and *General Motors* $33¼.

(Half-yearly meeting, 19th December, 1941, at 12-30 P.M.)

Audited accounts for the half-year ending 31st October, 1941:—

After transferring Rs. 2,450 to Insurance Fund, providing Rs. 2,50,000 for Taxation and making sundry adjustments, the results for the half-year show a profit of Rs. 1,66,140-8-5. After bringing forward the balance from the last account and transferring Rs. 75,000 to Dividend Equalization Reserve, there remains at the credit of the Profit and Loss Account a sum of Rs. 1,54,224-0-5 which the Directors recommend be applied as follows:—

	Rs.	A.	P.
Dividends on Preference Shares at Rs. 3-8-0 per share	31,500	0	0
And on Ordinary Shares at Rs. 6 per share ..	72,000	0	0

the balance Rs. 50,724-0-5 to be carried forward.

During the period under review the mills worked 45 hours per week up to 30th August, 1941, 50 hours per week from 1st September, 1941 to 11th October, 1941 and thereafter, 54 hours per week. This was all in accordance with the Indian Jute Mills Association agreement.

Managing Agents.—Messrs. Andrew Yule & Co., Ltd.

Authorised, Issued and Subscribed Capital—Rs. 21,00,000 *in* 12,000 *Ordy. and* 9,000 7 *per cent Cum. Pref., both of Rs.* 100 *each, fully paid-up.*

Synopsis of the balance sheet as at 31st October, 1941:—

Managing Agents.

Chartered Bank Buildings,
Calcutta, 8th November, 1941.

THE DALHOUSIE JUTE COMPANY, LIMITED

Notice is hereby given that an Extra-ordinary General Meeting of the above-named Company will be held at the Registered Office of the Company, Chartered Bank Buildings, Calcutta, on Saturday, the 20th day of December, 1941, at 11-15 o'clock in the forenoon for the purpose of considering and, if thought fit, of passing, with or without modification, the following resolutions:—

As an Ordinary Resolution

1. That the authorised capital of the Company be increased to Rs. 37,50,000 by the creation of 7,500 additional Ordinary shares of Rs. 100 each which additional shares shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but shall otherwise rank for dividend and in all other respects *pari pasu* with the existing Ordinary shares of the Company.

As a Special Resolution

2. That the Articles of Association of the Company be altered by deleting Article 150 thereof and by substituting the following new Articles—

Dividend in specie

150. Any General Meeting declaring a dividend may resolve that such dividend be paid wholly or in part by the distribution of specific assets, and in particular of paid-up shares, debentures or debenture-stock of the Company, or paid-up shares, debentures or debenture-stock of any other company, or in any one or more of such ways.

Capitalisation of Reserves

150A. Any General Meeting may re-resolve that any moneys, investments or other assets forming part of the undivided profits of the Company standing to the credit of the Reserve or any other Fund or in the hands of the Company and available for dividend (or representing premiums received on the issue of shares and standing to the credit of the share premium account) be capitalised and distributed amongst such of the shareholders as would be entitled to receive the same if distributed by way of dividend and in the same proportions on the footing that they become entitled thereto as capital and that all or any part of such capitalised fund be applied on behalf of such shareholders in paying up in full any unissued shares, debentures or debenture-stock of the Company which shall be distributed accordingly or in or towards payment of the uncalled liability on any issued shares, and that such distribution or payment shall be accepted by such shareholders in full satisfaction of their interest in the said capitalised sum.

Fractional Certificates

150B. For the purpose of giving effect to any resolution under the two last preceding Articles the Directors may settle any difficulty which may arise in regard to the distribution as they think expedient and in particular may issue fractional certificates, and may fix the value for distribution of any specific assets, and may determine that cash payments shall be made to any members upon the footing of the value so fixed in order to adjust the rights of all parties and may vest any such cash or specific assets in trustees upon such trusts for the persons entitled to the dividend or capitalised fund as may seem expedient to the Directors. Where requisite a proper contract shall be filed in accordance with Section 104 of the Act, and the Directors may appoint any person to sign such contract on behalf of the persons entitled to the dividend or capitalised fund, and such appointment shall be effective.

As an Ordinary Resolution

3. That it is desirable to capitalise a sum of Rs. 7,50,000 being part of the undivided profits of the Company and accordingly that the said sum of Rs. 7,50,000 be capitalised and that this amount be used as a capital bonus which shall be applied on behalf of the persons who are on the 20th day of December, 1941, holders of the 15,000 issued Ordinary shares of the Company of Rs. 100 each in payment in full for 7,500 additional Ordinary shares of Rs. 100 each and that such 7,500 additional Ordinary shares credited as fully paid, which shall not confer the right to share in any dividend declared in respect of the half-year of the Company, ending on the 30th day of September, 1941, but otherwise shall rank for dividend and in all other respects *pari passu* with the issued Ordinary shares of the Company, shall be accordingly allotted to such persons respectively in the proportion of one of such 7,500 additional Ordinary shares for two of the said 15,000 issued Ordinary shares held on the said 20th day of December, 1941, by such persons respectively, and that the additional Ordinary shares so distributed shall be treated for all purposes as an increase of the nominal amount of the capital of the Company held by each shareholder and not as income.

That pursuant to the above resolution and in satisfaction of the said special capital bonus the Directors be and they are hereby directed to allot and distribute 7,500 additional Ordinary shares credited as fully paid amongst the persons who are on the 20th day of December, 1941, holders of the issued Ordinary shares of the Company in proportion to the issued Ordinary shares held by them respectively with full power to the Directors to make such provision by the issue of fractional certificates or otherwise as they think expedient in the case of fractions.

That the draft of the Agreement providing for the allotment of the said additional shares in satisfaction of the said capital bonus submitted to this Meeting and signed in the margin by the Chairman thereof by way of identification be and the same is hereby approved and that the Directors be authorised to affix the Seal of the Company to duplicate engrossments of such Agreement as and when the same shall have been signed on behalf of the members holding Ordinary shares in the Company on the 20th day of December, 1941, by some person to be appointed by the Directors in that behalf under Article 150B of the Articles of Association of the Company.

As above indicated Resolution No. 2 will be proposed as a Special Resolution.

By Order of the Board,
BIRD & CO.,
Managing Agents.

Dated Calcutta,
8th day of November, 1941.

THE KINNISON JUTE MILLS COMPANY, LIMITED

Notice is hereby given that an Extra-ordinary General Meeting of the above-named Company will be held at the Registered Office of the Company, Chartered Bank Buildings, Calcutta, on Saturday, the 20th day of December, 1941, at 11-0 o'clock in the forenoon for the purpose of considering and, if thought fit, of passing, with or without modification the following resolutions:—

As an Ordinary Resolution

1. That the authorised capital of the Company be increased to Rs. 45,00,000 by the creation of 15,000 additional Ordinary shares of Rs. 100 each which additional shares shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but shall otherwise rank for dividend and in all other respects *pari passu* with the existing Ordinary shares of the Company.

As a Special Resolution

2. That the Articles of Association of the Company be altered by adding the words "or any other" between the words "Reserve" and "Fund" in the third line of Article 166.

As an Ordinary Resolution

3. That it is desirable to capitalise a sum of Rs. 15,00,000 being part of the undivided profits of the Company and accordingly that the said sum of Rs. 15,00,000 be capitalised and that this amount be used as a capital bonus which shall be applied on behalf of the persons who are on the 20th day of December, 1941, holders of the 15,000 issued Ordinary shares of the Company of Rs. 100 each in payment in full for 15,000 additional Ordinary shares of Rs. 100 each and that such 15,000 additional Ordinary shares credited as fully paid, which shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but otherwise shall rank for dividend and in all other respects *pari passu* with the issued Ordinary shares of the Company, shall be accordingly allotted to such persons respectively in the proportion of one of such additional Ordinary shares for each one of the said 15,000 issued Ordinary shares held on the said 20th day of December, 1941, by such persons respectively, and that the additional Ordinary shares so distributed shall be treated for all purposes as an increase of the nominal amount of the capital of the Company held by each shareholder and not as income.

That pursuant to the above resolution and in satisfaction of the said special capital bonus the Directors be and they are hereby directed to allot and distribute 15,000 additional Ordinary shares credited as fully paid amongst the persons who are on the 20th day of December, 1941, holders of the 15,000 issued Ordinary shares of the Company in proportion to the issued Ordinary shares held by them respectively.

That the draft of the Agreement providnig for the allotment of the said additional shares in satisfaction of the said capital bonus submitted to this Meeting and signed in the margin by the Chairman thereof by way of identification be and the same is hereby approved and that the Direcors be authorised to affix the Seal of the Company to duplicate engrossments of such Agreement as and when the same shall have been signed on behalf of the members holding Ordinary shares in the Company on the 20th day of December, 1941, by some person to be appointed by the Directors in that behalf under Article 167 of the Articles of Association of the Company.

As above indicated Resolution No. 2 will be proposed as a Special Resolution.

By Order of the Board,
F. W. HEILGERS & CO.,
Managing Agents.

Calcutta, 8th day of November, 1941.

Calcutta, 8th November, 1941.

THE LAWRENCE JUTE COMPANY, LIMITED

Notice is hereby given that an Extra-ordinary General Meeting of the above-named Company will be held at the Registered Office of the Company, Chartered Bank Buildings, Calcutta, on Saturday, the 20th day of December, 1941, at 12-0 o'clock noon for the purpose of considering and, if thought fit, of passing, with or without modification, the following resolutions:—

As an Ordinary Resolution

1. That the authorised capital of the Company be increased to Rs. 35,00,000 by the creation of 10,000 additional Ordinary shares of Rs. 100 each which additional Ordinary shares shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but shall otherwise rank for dividend and in all other respects *pari passu* with the existing Ordinary shares of the Company.

As a Special Resolution

2. That the Articles of Association of the Company be altered by deleting Article 150 thereof and by substituting the following new Articles:—

Dividend in specie

150. Any General Meeting declaring a dividend may resolve that such dividend be paid wholly or in part by the distribution of specific assets, and in particular of paid-up shares, debentures or debenture-stock of the Company or paid-up shares, debentures or debenture-stock of any other company, or in any one or more of such ways.

Capitalisation of Reserves

150A. Any General Meeting may resolve that any moneys, investments or other assets forming part of the undivided profits of the Company standing to the credit of the Reserve or any other Fund or in the hands of the Company and available for dividend (or representing premiums received on the issue of shares and standing to the credit of the share premium account) be capitalised and distributed amongst such of the shareholders as would be entitled to receive the same if distributed by way of dividend and in the same proportions on the footing that they become entitled thereto as capital and that all or any part of such capitalised fund be applied on behalf of such shareholders in paying up in full any unissued shares, debentures or debenture-stock of the Company which shall be distributed accordingly or in or towards payment of the uncalled liability on any issued shares, and that such distribution or payment shall be accepted by such shareholders in full satisfaction of their interest in the said capitalised sum.

Fractional Certificates

150B. For the purpose of giving effect to any resolution under the two last preceding Articles the Directors may settle any difficulty which may arise in regard to the distribution as they think expedient and in particular may issue fractional certificates, and may fix the value for distribution of any specific assets, and may determine that cash payments shall be made to any members upon the footing of the

value so fixed in order to adjust the rights of all parties and may vest any such cash or specific assets in trustees upon such trusts for the persons entitled to the dividend or capitalised fund as may seem expedient to the Directors. Where requisite a proper contract shall be filed in accordance with Section 104 of the Act, and the Directors may appoint any person to sign such contract on behalf of the persons entitled to the dividend or capitalised fund, and such appointmet shall be effective.

As an Ordinary Resolution

3. That it is desirable to capitalise a sum of Rs. 10,00,000 being part of the undivided profits of the Company and accordingly that the said sum of Rs. 10,00,000 be capitalised and that this amount be used as a capital bonus which shall be applied on behalf of the persons who are on the 20th day of December, 1941, holders of the 10,000 issued Ordinary shares of the Company of Rs. 100 each in payment in full for 10,000 additional Ordinary shares of Rs. 100 each and that such 10,000 additional Ordinary shares credited as fully paid, which shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but otherwise shall rank for dividend and in all other respects *pari passu* with the issued Ordinary shares of the Company, shall be accordingly allotted to such persons respectively in the proportion of one of such 10,000 additional Ordinary shares for one of the said 10,000 issued Ordinary shares held on the said 20th day of December, 1941, by such persons respectively, and that the additional Ordinary shares so distributed shall be treated for all purposes as an increase of the nominal amount of the capital of the Company held by each shareholder and not as income.

That pursuant to the above resolution and in satisfaction of the said special capital bonus the Directors be and they are hereby directed to allot and distribute 10,000 additional Ordinary shares credited as fully paid amongst the persons who are on the 20th day of December, 1941, holders of the issued Ordinary shares of the Company in proportion to the issued Ordinary shares held by them respectively.

That the draft of the Agreement providing for the allotment of the said additional shares in satisfaction of the said capital bonus submitted to this Meeting and signed in the margin by the Chairman thereof by way of identification be and the same is hereby approved and that the Directors be authorised to affix the Seal of the Company to duplicate engrossments of such Agreement as and when the same shall have been signed on behalf of the members holding Ordinary shares in the Company on the 20th day of December, 1941, by some person to be appointed by the Directors in that behalf under Article 150B of the Articles of Association of the Company.

As above indicated Resolution No. 2 will be proposed as a Special Resolution.

By Order of the Board,
BIRD & CO.,
Managing Agents.

Dated Calcutta,
8th day of November, 1941.

THE NAIHATI JUTE MILLS COMPANY, LIMITED

Notice is hereby given that the Seventy-third Ordinary General Meeting of The Naihati Jute Mills Company, Limited, will be held at the Registered Office of the Company, Chartered Bank Buildings, Calcutta, at 10-30 a.m., on Saturday, the 20th day of December, 1941, for the purpose of receiving the Directors' Report, passing the Audited Accounts for the half-year ended 30th September, 1941, declaring the Dividends recommended by the Directors and for transacting any other ordinary business of the Company.

The Share Transfer Registers of the Company will be closed from 1st December to 20th December, 1941, both days included.

By order of the Directors,
F. W. HEILGERS & CO.,
Managing Agents.

Chartered Bank Buildings,
Calcutta, 8th November, 1941.

THE NAIHATI JUTE MILLS COMPANY, LIMITED

Notice is hereby given that an Extra-ordinary General Meeting of the above-named Company will be held at the Registered Office of the Company, Chartered Bank Buildings, Calcutta, on Saturday, the 20th day of December, 1941, at 10-40 o'clock in the forenoon for the purpose of considering and, if thought fit, of passing, with or without modification, the following resolutions:—

As an Ordinary Resolution

1. That the authorised capital of the Company be increased to Rs. 25,00,000 by the creation of 5,000 additional Ordinary shares of Rs. 100 each which additional shares shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but shall otherwise rank for dividend and in all other respects *pari passu* with the existing Ordinary shares of the Company.

As a Special Resolution

2. That the Articles of Association of the Company be altered by adding the words "or any other" between the words "Reserve" and "Fund" in the third line of Article 166.

As an Ordinary Resolution

3. That it is desirable to capitalise a sum of Rs. 5,00,000 being part of the undivided profits of the Company and accordingly that the said sum of Rs. 5,00,000 be capitalised and that this amount be used as a capital bonus which shall be applied on behalf of the persons who are on the 20th day of December, 1941, holders of the 10,000 issued Ordinary shares of the Company of Rs. 100 each in payment in full for 5,000 additional Ordinary shares of Rs. 100 each and that such 5,000 additional Ordinary shares credited as fully paid, which shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but otherwise shall rank for dividend and in all other respects *pari passu* with the issued Ordinary shares of the Company, shall be accordingly alloted to such persons respectively in the proportion of one of such additional Ordinary share for two of the said 10,000 issued Ordinary shares held on the said 20th day of December, 1941, by such persons respectively, and that the additional Ordinary shares so distributed shall be treated for all purposes as an increase of the nominal amount of the capital of the Company held by each shareholder and not as income.

That pursuant to the above resolution and in satisfaction of the said special capital bonus the Directors be and they are hereby directed to allot and distribute 5,000 additional Ordinary shares credited as fully paid amongst the persons who are on the 20th day of December, 1941, holders of the 10,000 issued Ordinary shares of the Company in proportion to the issued Ordinary shares held by them respectively with full power to the Directors to make such provision by the issue of fractional certificates or otherwise as they think expedient in the case of fractions.

That the draft of the Agreement providing for the allotment of the said additional shares in satisfaction of the said capital bonus submitted to this Meeting and signed in the margin by the Chairman thereof by way of identification be and the same is hereby approved and that the Directors be authorised to affix the Seal of the Company to duplicate engrossments of such Agreement as and when the same shall have been signed on behalf of the members holding Ordinary shares in the Company on the 20th day of December, 1941, by some person to be appointed by the Directors in that behalf under Article 167 of the Articles of Association of the Company.

As above indicated Resolution No. 2 will be proposed as a Special Resolution.

By Order of the Board,
F. W. HEILGERS & CO.,
Managing Agents.

Dated Calcutta,
8th day of November, 1941.

THE NORTHBROOK JUTE COMPANY, LIMITED

Notice is hereby given that the Sixty-sixth Ordinary General Meeting of The Northbrook Jute Company, Limited, will be held at the Registered Office of the Company, Chartered Bank Buildings, Calcutta, at 11-40 a.m., on Saturday, the 20th December, 1941, for the purpose of receiving the Directors' Report, passing the Audited Accounts for the half-year ended 30th September, 1941, declaring the Dividends recommended by the Directors and for transacting any other ordinary business of the Company.

The Share Transfer Registers of the Company will be closed from 1st December to 20th December, 1941, both days included.

By order of the Directors,
BIRD & CO.,
Managing Agents.

Chartered Bank Buildings,
Calcutta, 8th November, 1941.

THE NORTHBROOK JUTE COMPANY, LIMITED

Notice is hereby given that an Extra-ordinary General Meeting of the above-named Company will be held at the Registered Office of the Company, Chartered Bank Buildings, Calcutta, on Saturday, the 20th day of December, 1941, at 11-45 o'clock in the forenoon for the purpose of considering and, if thought fit, of passing, with or without modification, the following resolutions:—

As an Ordinary Resolution

1. That the authorised capital of the Company be increased to Rs. 27,00,000 by the creation of 40,000 additional Ordinary shares of Rs. 10 each which additional shares shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but shall otherwise rank for dividend and in all other respects *pari passu* with the existing Ordinary shares of the Company.

As a Special Resolution

2. That the Articles of Association of the Company be altered by deleting Article 150 thereof and by substituting the following new Articles:—

Dividend in specie

150. Any General Meeting declaring a dividend may resolve that such dividend be paid wholly or in part by the distribution of specific assets, and in particular of paid-up shares, debentures or debenture-stock of the Company, or paid-up shares, debentures or debenture-stock of any other company, or in any one or more of such ways.

Capitalisation of Reserves

150A. Any General Meeting may resolve that any moneys, investments or other assets forming part of the undivided profits of the Company standing to the credit of the Reserve or any other Fund or in the hands of the Company and available for dividend (or representing premiums received on the issue of shares and standing to the credit of the share premium account) be capitalised and distributed amongst such of the shareholders as would be entitled to receive the same if distributed by way of dividend and in the same proportions on the footing that they become entitled thereto as capital and that all or any part of such capitalised fund be applied on behalf of such shareholders in paying up in full any unissued shares, debentures or debenture-stock of the Company which shall be distributed accordingly or in or towards payment of the uncalled liability on any issued shares, and that such distribution or payment shall be accepted by such shareholders in full satisfaction of their interest in the said capitalised sum.

Fractional Certificates

150B. For the purpose of giving effect to any resolution under the two last preceding Articles the Directors may settle any difficulty which may arise in regard regard to the distribution as they think expedient and in particular may issue fractional certificates, and may fix the value for distribution of any specific assets, and may determine that cash payments shall be made to any members upon the footing of the value so fixed in order to adjust the rights of all parties and may vest any such cash or specific assets in trustees upon such trusts for the sons entitled to the dividend or capitalised fund as may seem expedient to the Directors. Where requisite a proper contract shall be filed in accordance with Section 104 of the Act, and the Directors may appoint any person to sign such contract on behalf of the persons entitled to the dividend or capitalised fund, and such appointment shall be effective.

As an Ordinary Resolution

3. That it is desirable to capitalise a sum of Rs. 4,00,000 being part of the undivided profits of the Company and accordingly that the said sum of Rs. 4,00,000 be capitalised and that this amount be used as a capital bonus which shall be applied on behalf of the persons who are on the 20th day of December, 1941, holders of the 80,000 issued Ordinary shares of the Company of Rs. 10 each in payment in full for 40,000 additional Ordinary shares of Rs. 10 each and that such 40,000 additional Ordinary shares credited as fully paid, which shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but otherwise shall rank for dividend and in all other respects *pari passu* with the issued Ordinary shares of the Company, shall be accordingly allotted to such persons respectively in the proportion of one of such 40,000 additional Ordinary shares for two of the said 80,000 issued Ordinary shares held on the said 20th day of December, 1941, by such persons respectively, and that the additional Ordinary shares so distributed shall be treated for all purposes as an increase of the nominal amount of the capital of the Company held by each shareholder and not as income.

That pursuant to the above resolution and in satisfaction of the said special capital bonus the Directors be and they are hereby directed to allot and distribute 40,000 additional Ordinary shares credited as fully paid amongst the persons who are on the 20th day of December, 1941, holders of the issued Ordinary shares of the Company in proportion to the issued Ordinary shares held by them respectively with full power to the Directors to make such provision by the issue of fractional certificates or otherwise as they think expedient in the case of fractions.

That the draft of the Agreement providing for the allotment of the said additional shares in satisfaction of the said capital bonus submitted to this Meeting and signed in the margin by the Chairman thereof by way of identification be and the same is hereby approved and that the Directors be authorised to affix the Seal of the Company to duplicate engrossments of such Agreement as and when the same shall have been signed on behalf of the members holding Ordinary shares in the Company on the 20th day of December, 1941, by some person to be appointed by the Directors in that behalf under Article 150B of the Articles of Association of the Company.

As above indicated Resolution No. 2 will be proposed as a Special Resolution.

By Order of the Board,
BIRD & CO.,
Managing Agents.

Dated Calcutta,
8th day of November, 1941.

THE STANDARD JUTE COMPANY, LIMITED

Notice is hereby given that the Ninety-second Ordinary General Meeting of The Standard Jute Company, Limited, will be held at the Registered Office of the Company, Chartered Bank Buildings, Calcutta, at 12-10 p.m., on Saturday, the 20th day of December, 1941, for the purpose of receiving the Directors' Report, passing the Audited Accounts for the half-year ended 30th September, 1941, declaring the Dividends recommended by the Directors and for transacting any other ordinary business of the Company.

The Share Transfer Registers of the Company will be closed from 1st December to 20th December, 1941, both days included.

By order of the Directors,
BIRD & CO.,
Managing Agents.

Chartered Bank Buildings,
Calcutta, 8th November, 1941.

THE STANDARD JUTE COMPANY, LIMITED

Notice is hereby given that an Extra-ordinary General Meeting of the above-named Company will be held at the Registered Office of the Company, Chartered Bank Buildings, Calcutta, on Saturday, the 20th day of December, 1941, at 12-15 o'clock in the afternoon for the purpose of considering and, if thought fit, of passing, with or without modification, the following resolutions:—

As an Ordinary Resolution

1. That the authorised capital of the Company be increased to Rs. 30,00,000 by the creation of 7,000 additional Ordinary shares of Rs. 100 each which additional shares shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but shall otherwise rank for dividend and in all other respects *pari passu* with the existing Ordinary shares of the Company.

As a Special Resolution

2. That the Articles of Association of the Company be altered by deleting Article 150 thereof and by substituting the following new Articles:—

Dividend in specie

150. Any General Meeting declaring a dividend may resolve that such dividend be paid wholly or in part by the distribution of specific assets, and in particular of paid-up shares, debentures or debenture-stock of the Company, or paid-up shares, debentures or debenture-stock of any other company, or in any one or more of such ways.

Capitalisation of Reserves

150A. Any General Meeting may resolve that any moneys, investments or other assets forming part of the undivided profits of the Company standing to the credit of the Reserve or any other Fund or in the hands of the Company and available for dividend (or representing premiums received on the issue of shares and standing to the credit of the share premium account) be capitalised and distributed amongst such of the shareholders as would be entitled to receive the same if distributed by way of dividend and in the same proportions on the footing that they become entitled thereto as capital and that all or any part of such capitalised fund be applied on behalf of such shareholders in paying up in full any unissued shares, debentures or debenture-stock of the Company which shall be distributed accordingly or in or towards payment of the uncalled liability on any issued shares, and that such distribution or payment shall be accepted by such shareholders in full satisfaction of their interest in the said capitalised sum.

Fractional Certificates

150B. For the purpose of giving effect to any resolution under the two last preceding Articles the Directors may settle any difficulty which may arise in regard to the distribution as they think expedient and in particular may issue fractional certificates, and may fix the value for distribution of any specific assets, and may determine that cash payments shall be

made to any members upon the footing of the value so fixed in order to adjust the rights of all parties and may vest any such cash or specific assets in trustees upon such trusts for the sons entitled to the dividend or capitalised fund as may seem expedient to the Directors. Where requisite a proper contract shall be filed in accordance with Section 104 of the Act, and the directors may appoint any person to sign such contract on behalf of the persons entitled to the dividend or capitalised fund, and such appointment shall be effective.

As an Ordinary Resolution

3. That it is desirable to capitalise a sum of Rs. 7,00,000 being part of the undivided profits of the Company and accordingly that the said sum of Rs. 7,00,000 be capitalised and that this amount be used as a capital bonus which shall be applied on behalf of the persons who are on the 20th day of December, 1941, holders of the 14,000 issued Ordinary shares of the Company of Rs. 100 each in payment in full for 7,000 additional Ordinary shares of Rs. 100 each and that such 7,000 additional Ordinary shares credited as fully paid, which shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but otherwise shall rank for dividend and in all other respects *pari passu* with the issued Ordinary shares of the Company, shall be accordingly allotted to such persons respectively in the proportion of one of such 7,000 additional Ordinary shares for two of the said, 14,000 issued Ordinary shares held on the said 20th day of December, 1941, by such persons respectively, and that the additional Ordinary shares so distributed shall be treated for all purposes as an increase of the nominal amount of the capital of the Company held by each shareholder and not as income.

That pursuant to the above resolution and in satisfaction of the said special capital bonus the Directors be and they are hereby directed to allot and distribute 7,000 additional Ordinary shares credited as fully paid amongst the persons who are on the 20th day of December, 1941, holders of the issued Ordinary shares of the Company in proportion to the issued Ordinary shares held by them respectively with full power to the Directors to make such provision by the issue of fractional certificates or otherwise as they think expedient in the case of fractions.

That the draft of the Agreement providing for the allotment of the said additional shares in satisfaction of the said capital bonus submitted to this Meeting and signed in the margin by the Chairman thereof by way of identification be and the same is hereby approved and that the Directors be authorised to affix the Seal of the Company to duplicate engrossments of such Agreement as and when the same shall have been signed on behalf of the members holding Ordinary shares in the Company on the 20th day of December, 1941, by some person to be appointed by the Directors in that behalf under Article 150B of the Articles of Association of the Company.

As above indicated Resolution No. 2 will be proposed as a Special Resolution.

By Order of the Board,
BIRD & CO.,
Managing Agents.

Dated Calcutta,
8th day of November, 1941.

UNION JUTE COMPANY, LIMITED

Notice is hereby given that an Extraordinary General Meeting of the above-named Company will be held at the Registered Office of the Company, Chartered Bank Buildings, Calcutta, on Saturday, the 20th day of December, 1941, at 12-30 o'clock in the afternoon for the purpose of considering and if thought fit, of passing, with or without modification, the following resolutions:—

As an Ordinary Resolution

1. That the authorised capital of the Company be increased to Rs. 24,00,000 by the creation of 6,000 additional Ordinary shares of Rs. 100 each which additional shares shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but shall otherwise rank for dividend and in all other respects *pari passu* with the existing Ordinary shares of the Company.

As a Special Resolution

2. That the Articles of Association of the Company be altered by deleting Article 150 thereof and by substituting the following new Articles:—

Dividend in specie

150. Any General Meeting declaring a dividend may resolve that such dividend be paid wholly or in part by the distribution of specific assets, and in particular of paid-up shares, debentures or debenture-stock of the Company, or paid-up shares, debentures or debenture-stock of any other company, or in any one or more of such ways.

Capitalisation of Reserves

150A. Any General Meeting may resolve that any moneys, investments or other assets forming part of the undivided profits of the Company standing to the credit of the Reserve or any other Fund or in the hands of the Company and available for dividend (or representing premiums received on the issue of shares and standing to the credit of the share premium account) be capitalised and distributed amongst such of the shareholders as would be entitled to receive the same if distributed by way of dividend and in the same proportions on the footing that they become entitled thereto as capital and that all or any part of such capitalised fund be applied on behalf of such shareholders in paying up in full any unissued shares, debentures or debenture-stock of the Company which shall be distributed accordingly or in or towards payment of the uncalled liability on any issued shares, and that such distribution or payment shall be accepted by such shareholders in full satisfaction of their interest in the said capitalised sum.

Fractional Certificates

150B. For the purpose of giving effect to any resolution under the two last preceding Articles the Directors may settle any difficulty which may arise in regard to the distribution as they think expedient and in particular may issue fractional certificates, and may fix the value for distribution of any specific assets, and may determine that cash payments shall be made to any members upon the footing of the value so fixed in order to adjust the rights of all parties and may vest any such cash or specific assets in trustees upon such trusts for the persons entitled to the dividend or capitalised fund as may seem expedient to the Directors. Where requisite a proper contract shall be filed in accordance with Section 104 of the Act, and the Directors may appoint any person to sign such contract on behalf of the persons entitled to the dividend or capitalised fund, and such appointment shall be effective.

As an Ordinary Resolution

3. That it is desirable to capitalise a sum of Rs. 6,00,000 being part of the undivided profits of the Company and accordingly that the said sum of Rs. 6,00,000 be capitalised and that this amount be used as a capital bonus which shall be applied on behalf of the persons who are on the 20th day of December, 1941, holders of the 12,000 issued Ordinary shares of the Company of Rs. 100 each in payment in full for 6,000 additional Ordinary shares of Rs. 10 each and that such 6,000 additional Ordinary shares credited as fully paid, which shall not confer the right to share in any dividend declared in respect of the half-year of the Company ending on the 30th day of September, 1941, but otherwise shall rank for dividend and in all other respects *pari passu* with the issued Ordinary shares of the Company, shall be accordingly allotted to such persons respectively in the proportion of one of such 6,000 additional Ordinary shares for two of the said 12,000 issued Ordinary shares held on the said 20th day of December, 1941, by such persons respectively, and that the additional Ordinary shares so distributed shall be treated for all purposes as an increase of the nominal amount of the capital of the Company held by each shareholder and not as income.

That pursuant to the above resolution and in satisfaction of the said special capital bonus the Directors and they are hereby directed to allot and distribute 6,000 additional Ordinary shares credited as fully paid amongst the persons who are on the 20th day of December, 1941, holders of the issued Ordinary shares of the Company in proportion to the issued Ordinary shares held by them respectively with full power to the Directors to make such provision by the issue of fractional certificates or otherwise as they think expedient in the case of fractions.

That the draft of the Agreement providing for the allotment of the said additional shares in satisfaction of the said capital bonus submitted to this Meeting and signed in the margin by the Chairman thereof by way of identification be and the same is hereby approved and that the Directors be authorised to affix the Seal of the Company to duplicate engrossments of such Agreement as and when the same shall have been signed on behalf of the members holding Ordinary shares in the Company on the 20th day of December, 1941, by some person to be appointed by the Directors in that behalf under Article 150B of the Articles of Association of the Company.

As above indicated Resolution No. 2 will be proposed as a Special Resolution.

MARKET POINTERS

Export of Rubber and Tin from Malay

The Federated Malay States is to raise the war export duties on rubber and tin to become effective from January next.

Resolutions will be proposed in the Federal Council on December 11 which, if passed, will raise the war export duty on rubber from five per cent. to seven and a half *ad valorem* and the duty on tin ore from five to six per cent. *ad valorem.*

* * * *

Indian Sugar for U. K. and Mid-East

India will be exporting a fairly heavy quantity of sugar to the U. K. and the Middle East in the coming months. The Indian Sugar Mills Association have been advised by the Government of India that they have secured special permission, as a result of protracted negotiations, from the International Sugar Council for the export of Indian sugar overseas, not exceeding 2,00,000 tons during the present calendar year.

The Indian Sugar Syndicate, have invited offers from member mills. The prospect of Indian sugar export is welcomed in the market and forward prices have registered a big jump since last evening.

* * * *

Indian Radio and Cable Communications Co., Ltd.

A scheme for capitalising Rs. 27,00,000 out of the reserve funds of the Indian Radio and Cable Communications Co., Ltd., Bombay, was adopted at the meetings of the ordinary and deferred shareholders and at the extraordinary general meeting of the company on Tuesday.

State Railways' Earnings

The total approximate gross earnings of all State-owned railways for the ten days ending November 20, 1941, amount to Rs. 3,48,00,000, says a Press *communique*. This is Rs. 44,00,000 more than the approximate gross earnings for the corresponding period of the previous year, and Rs. 34,00,000 more than the actuals for the corresponding period of 1940-41.

The total approximate gross earnings from April to November 20, 1941, amount to Rs. 77,68,00,000. This is Rs. 10,81,00,000 or 16.2 per cent. more than the actuals for the previous year.

* * * *

G. I. P. Railway

The approximate traffic returns of the G.I.P. Railways for the period ended November 20 were Rs. 59,79,000 against Rs. 46,21,000 for the Corresponding period of 1940. The up-to-date earnings for 1941 were Rs. 12,93,55,000 against Rs. 9,90,51,000 for the corresponding period of 1940.

ISSUED WEEKLY

Vol. XXVIII. No. 25 SATURDAY, DECEMBER 20, 1941 Price Re. 1

Insure and Increase Nation's Strength

Financial Independence of the individual is the measure of Nation's financial strength.

In this hour of world turmoil, all Life Insurance Policy-holders should take stock of their insurance cover and ascertain just how strongly they are fortified against the unpredictable that lies ahead.

And, those individuals who have not yet made provision for their protection need do so without delay and thereby contribute towards Nation's strength.

Be advised and write to-day to

WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

INTERBANK call money continues easy in Calcutta, though a shade steadier feeling is manifest. The quotable rate in Clive Street is ½ per cent, but there are only a few borrowers at this rate. In Hornby Road, after remaining glued to ¼ per cent (lenders) for months and months, interbank call rate has been stepped up to ½ per cent, though it cannot be said that there are any large takers even at this higher rate. The maintenance of cheaper money conditions is somewhat at variance with the other developments and indices in the money market. There is nothing like keen bidding for tender treasury bills; the average discount rate is nearly Re. 1; and sales of tap bills make poor showing. Deposits of member banks with the Reserve Bank show a sharp decline from Rs. 42½ crores to Rs. 31 1|3 crores. The possible explanation for such a fall in the deposits of scheduled banks is that banks find themselves obliged to pay out considerable sums in respect of the travelling and other charges caused by the great exodus which is taking place from the cities. It is also likely that, in times of emergency such as the present, banks find it more prudent to carry more cash in their till.

It may be added that one of the manifestations of the panic engendered by the proximity of war to India is frenzied buying of gold and silver, with the result that gold is now quoting Rs. 51 per tola, the gold sovereign Rs. 34-8 and silver Rs. 69 per 100 tolas. Purchases of the precious metals, presumably for hoarding, must have meant a corresponding drain on banks' deposits. In the week ended December 5, deposits of banks with the Reserve Bank fell from Rs. 47 1|3 crores to Rs. 42½ crores—and this was probably connected with the substantial subscriptions which flowed into the second defence loan during the Calcutta Savings Week. Thus, between November 28 and December 12, deposits of member banks with the Reserve Bank have shrunk by Rs. 10 crores, half because of defence loan subscriptions and half because of the critical conditions created by the Japanese threat to Burma. In spite of such a big cut in the cash balances of the banks, no visible change has occurred in money market sentiment or money market rates. „ ,

---

It is satisfactory that, despite such adverse developments, the Central Government have been able to secure Rs. 1 crore of tender treasury bills at the average discount rate of annas fifteen and pies 9 per cent per annum, which shows a slight reduction of pies two. As was to be expected in these circumstances, sales of intermediate treasury bills between December 10 and December 15, amounted only to Rs. 44¾ lakhs. In the light of such poor sales of tap bills, we may repeat our question as to what use is served by continuing the sales of intermediate treasury bills. Moreover, the ways and means position of the Central Treasury is exceptionally comfortable—so comfortable, indeed, that, on the top of the withdrawal of rupee securities from the issue department for Rs. 10 crores in the week ended December 5, there has been a further withdrawal of Rs. 5 crores in the week ended December 12. In all, there has been a total withdrawal of rupee securities for Rs. 15 crores in the fortnight under review. To the extent that rupee securities are withdrawn from the issue department, there is a corresponding cut in the cash balance of the Central Government. In other words, the cash position of the Central Treasury has been so satisfactory that it was possible to carry through operations which have had the effect of reducing cash by so large a sum as Rs. 15 crores. In spite of such cut, the deposits of the Central Govt. with the Reserve Bank on December 12, stood at the comfortable level of Rs. 12.93 crores. In less than three weeks from this date, the Central Treasury will receive further substantial replenishment through the payment made by the British Government against war supplies. It will thus be seen that the present as well as prospective cash position of the Government of India can be described as exceptionally affluent; and it is difficult to see why the Reserve Bank authorities should think that there is any need for maintaining sale of treasury bills through the tap.

The cash balances of the Central Government are so satisfactory in the middle of the month because the sterling payments received by the Indian Government from the British Government on November adjustments have been exceptionally heavy. It was pointed out, in last week's review of the money market, that the receipts in this regard in the week ended December 5 were of the order of Rs. 20 crores. There are reasons to think that another instalment has been received in the week ended December 12. Sterling securities in the issue department have risen from Rs. 197.63 crores on December 5 to Rs. 209.62 crores on December 12. That is to say, the increase in sterling securities in the issue department is Rs. 12 crores. Foreign balances in the banking department have declined from Rs. 64.44 crores to Rs. 57.51 crores. That is, the decline in foreign balances is only Rs. 7 crores in spite of the transfer of Rs. 12 crores to the issue department. The balance of Rs. 5 crores represents, possibly, further sterling receipts from the British Treasury. Or it may be that a good part of this Rs. 5 crores is on account of inter-governmental transactions and a smaller part represents sterling purchased by the Reserve Bank in the open market. Be this as it may, it seems reasonable to infer that the upward curve in the British Government's payments to the Indian Government is specially pronounced in respect of November transactions.

As we have pointed out, there has been an increase of Rs. 12 crores in the sterling securities held in the issue department. This would have meant currency expansion for Rs. 12 crores, but for the withdrawal of rupee securities for Rs. 5 crores. The latter operation amounts to currency contraction for Rs. 5 crores. In the result, there has been expansion of currency for a net amount of Rs. 7 crores. This follows expansion for a similar amount in the previous week.

Active note circulation has, as a consequence, leapt up to Rs. 299.83 crores, showing a rise of nearly Rs. 5 crores. There has been a substantial increase in active note circulation in Burma also from Rs. 20.32

TREASURY BILLS

India

Tenders for Rs. 1,00,00,000 of three months' Government of India Treasury Bills were opened on Tuesday, December 16, 1941. Total amount offered was Rs. 1,58,75,000. Tenders at Rs. 99-12-3 per cent were accepted in full and those at Rs. 99-12-0 per cent were allotted approximately 63 per cent. Lower tenders were rejected. Total amount accepted was Rs. 1 crore, the average rate of accepted tenders being As. 15-9 per cent per annum.

Tenders for Rs. 1,00,00,000 of three months' Government of India Treasury Bills will be received on Monday, December 22, 1941. Successful tenderers should make payment on Tuesday December 23, 1941. Other conditions are as usual.

Three months' Intermediates will be sold from December 17, 1941 to December 20, 1941 at Rs. 99-12-3 per cent subject to the conditions previously announced (viz. sales can be stopped at any time without previous notice if Government think it necessary).

Three months' Intermediates sold from December 10, 1941 to December 15, 1941 amounted to Rs. 44,75,000.

During the week ended December 12, 1941 Government of India Treasury Bills for Rs. 93,00,000 were sold in favour of the Issue Department of the Reserve Bank of India.

Finance Abroad

Thursday Morning.

The London money market is said to have passed through a normal week according to a cable published on Sunday. Comfortable credit conditions are said to have prevailed and the amazing sangfroid of London was demonstrated over again though Banks manifested smaller interest in bills. The call rate is said to have been ¾ per cent but a significant pointer to altered conditions was the abrupt jump of the Treasury Bill rate in London. The rate reported last week when applications for the usual 75 million tender totalled 156 million sterling was over 22 sh. per cent. The Government will as before take Bank deposits. This week it is to be 60 millions while 28 million will be paid out on six-month notes maturing before the Christmas holidays.

The most important conclusions to be drawn from the last available Bank return is that the expansion of the feduciary issue by another 50 million came none too soon. The total note issue according to last Thursday's return is over 726.6 millions. It is not very far from the revised statutory maximum of 780 millions. The note issue is now 200 millions over that at the outbreak of war. Last week's return bears witness to a reduction of Bankers' deposits while bullion too has fallen slightly. The notes and coin held by the Bank of England continues to increase. This item contributes to the strengthening of the usual proportion. Rediscounts have latterly risen; perhaps outside quarters turn to the Bank for assistance with the approach of the New Year.

The foreign exchange market appears to bear up remarkably well. Rates over a week stand unaltered. The control has kept European currencies quite steady. With the declaration of war by four countries now allied to the Axis their currencies, which have already been cut from their moorings in London, will be linked only to the Reichsmark. Nothing is known about the arrangements contemplated under the new Berlin pact of November. If one knows what the mark is worth in pesetas one can learn how it stands in relation to sterling. These things are unknown just as the very considerable depreciation of Iran's currency was unknown until it was learnt that the correct way was to give a rate on or off so many points. from the nominal rate.

There is one more currency which is out from the sterling bloc perhaps for good. Thailand is apparently a loyal friend of Japan to judge from the new pact defended warmly by the Premier. That means she is going to help Japan's schemes and connive at the taking over of British banks and their assets by the Japanese forces. Her neutrality has been shed quite suddenly in spite of assurances given at the time of the 10 million credit given to the Yokohama Specie Bank. In regard to this control of banks and branches it is clear that the Japanese who are acting from Shanghai to Singapore are likely to appropriate temporarily much more than Britain can get by striking directly at Formosa. Owing to the orders issued in July the position was very much as though war had come.

The closure of the Japanese banks in India has not been followed by any notice to indicate that their names will be removed from the list of Scheduled Banks. There has in fact been no order at all after the war broke out as regards transfer of funds or cessation of trade except one adding Shanghai to the list of enemy-occupied places.

Steps had certainly been taken in July to curtail trade, and the only recent reference in the Press was to Mr. Morgenthau's order that all Japanese banks in the U.S.A. should be closed and their property taken over.

The diplomats have not evidently left yet and arrangements for the Swiss Legation to look after the belligerents' interests are just concluded. Financial developments when war has spread swiftly to the East will have to be deemed secondary. The jump in Britain's war expenditure to 11¾ million per diem is generally taken as a mark of a grimmer and more expensive phase of the struggle now in its third year. With America involved lease and lend assistance on the projected scale is ruled out. Higher expenditure and larger production must perforce come in Britain. Mr. Roosevelt thinks in terms of a long and difficult war. The last King-Hall newsletter has confirmed the belief that Japan is equipped for the war having laid in stocks well ahead. To grasp the true measure of the naval and other chances in the Pacific one has no need to speak of financial factors or results. That British investors who have almost lost 300 millions in rubber and 50 millions in tin mines will take a more cheerful view after the operations in Kedah are over is not at all easy to say. What the princes are doing and what they can do to safeguard or salvage the properties is not known. The tremendous fall in rubber and tin shares has been the subject of various remarks. In Calcutta the shares of sterling companies like Tavoy Tin Dredging have been offered freely for sale merely because the properties are in the south of Lower Burma. The diversion of interest to Nigerian shares has been spoken as a feature introducing some relief in the gloom. Malaya's vulnerability has surprised those who had been reassured by General Wavell's visit. The yen bloc has widened but the distance of Hong-Kong and the Philippines has made it more than ever certain that Japan will not win easily. The occupation of Portuguese Timor has helped to procure an aerodrome to replace Kota Bahru lost to the Japanese early in the war.

The appearance on Tuesday of a detailed statement issued by the Indian Bank showing that assets and liabilities in the four Malaya branches are quite small is the overt sign of the responsibility showed by South Indian banks which have close ties with Burma and Malaya. The statement published in the Madras papers shows that at the end of November deposits of these branches were well covered by deposits with Exchange banks. This statement has the merit of convincing shareholders and all concerned. It is an example of essential, clear, and brief publicity provided at a time when such information will have great effect.

The U.S.A. and Britain are said to have frozen Thai assets totalling over 19 million sterling in value to retaliate against the Thai Government's action. The importance of this decision lies in its uniqueness. There have been no other orders in spite of rumours in India to the effect that transfers of currency from Empire countries will be prohibited on account of the war. With the entry of the U.S.A. into the war as a full ally no question will arise as to exchange. Barter will become the rule and book-keeping just a formality. Old laws are atrogated by new circumstances and the U.S.A. may give out of its vast store of gold what she likes to those who ask for it. Last month the U.S. Treasury Secretary stated that after the war the U.S.A. will be a free lender and would not keep huge stocks of barren metal because she owes a duty to the world. The assurance is quite enough for those who think that the Atlantic Charter will be implemented. The U.S. currency continues to be quoted at old rates though bullion prices in India keep rising. The Treasury price is still 35 dollars per ounce and there is hardly any need for the frantic rush noticed here to collar gold coin. Calcutta quotes Rs. 34-8 for a small piece with St. George's effigy. If silver has gone up it must be partly due to the fact that the New York price this month has risen slightly to stand at 35 1-8 cents per ounce last week.

The suspension of air mail services will in probability lead to a small rise in the dollar-rupee exchange. The extent of depreciation may be small but it will naturally affect trade with that country particularly as shipping services are uncertain. There has been little or no mention of Japanese vessels preying on merchantmen. When war was declared suddenly no system of convoys had come into being. The U.S.A. which has not got used to the notion of a two-front war has not given so far any sign of worry over strategic materials far fewer in number than in 1917 when pro-German feeling in the Middle West to be reckoned with. A possible result of the Anglo-American alliance is an offer to sell silver to India. Nevada Congressmen would only be too glad if the U.S.A. makes a deal with India as soon as an opportunity offers. Such a deal would bring the Bombay price in line with New York's and the Government of India must be prepared to suspend the silver duty like the wheat duty in view of more pressing considerations.

The Viceroy's Speech

The address of the Viceroy to the Associated Chambers of Commerce was naturally devoted to the three great questions which, apart from the war by itself and its vicissitudes, monopolise the attention of the whole country. The audience to which the speech was directly addressed was interested primarily in the progress of supply both as business and as war effort. It is interested, too, in the repercussions of war expenditure on a large scale on prices as a whole and on the cost of living in particular. There is, inescapably, in the background of all this what it is usual to describe as the larger political problem of the country. It is well that His Excellency did not allow himself to be distracted by other issues which one would think are entitled to the notice of the head of the Government in a context like this.

Of the three issues mentioned, the repercussions of war expenditure on the price structure may be deemed to stand on a separate footing, if only because it has comparatively less to do with political problems bearing on the relations between the United Kingdom and this country. The problems raised by the additions to the volume of currency necessitated by the scale and mode of war expenditure lend themselves to being tackled as purely economic problems. It was not long ago that we examined at length this question of inflationary factors during the war; and our readers will not miss the extent to which our views have struck sympathetic chords in the mind of His Excellency the Viceroy. We are glad to note that Lord Linlithgow recognises the importance of tackling the rise in prices, by itself and as a manifestation of the inflationary forces released by war expenditure. It is only when this distinction is made and the problem is attacked from both sides that unconscionable increase in costs of living can be prevented and the social injustices and the social dangers which they create can be adequately provided for.

The Viceroy naturally thinks of stimulation of the flow of savings into Defence loans as a means of hitting two birds with one stone. On the one hand, it is a means of helping the financing of the war. On the other, it is a means of relieving the pressure of new purchasing power on the slender fabric of prices in India. There is everything to be said for such a course. But it is obvious that its efficacy in solving the problem of prices should not be exaggerated. The Viceroy sets little store by any direct attack on prices through the methods of price control. "The ramifications of the problem are complex, possible counter measures are beset with administrative difficulties." All this is true. But the scope for anti-profiteering measures is there, especially in the remote villages where the war is regarded by the unscrupulous as but a heaven-sent opportunity for squeezing the ignorant poor. Relief of pressure on prices must however be sought through encouragement of investment in Defence Saving Certificates and Post Office Defence Savings Bank, a measure, which, we may recall with pardonable pride, was advocated in the series of articles on "Planned Economy during the war" which we published at the outbreak of the war.

But, here, as in most other sound suggestions, it is important not to exaggerate the contribution which a suggestion of this kind can make to the solution of the problem on hand. It must not be forgotten that in India, the unit of social life is not the individual but the family. Every individual gainfully occupied is in a concentric circle of relatives and dependents, immediate and remote. Their claims are heeded to or are ignored according to one's earnings. It is idle to think that all increases in income are available for investment in savings or for expenditure in raising the standard of living. The pressure of purchasing power on prices arises in large part through its dispersion among relatives and dependants; and considering that such dispersion is mostly like a sprinkling of water on parched sands, it is idle to expect that the price problem can be tackled by the familiar methods of stimulation of savings or control of prices.

The Viceroy has the crux of the problem when he says that "the encouragement and stimulus of increased production, where feasible is the most obvious, the most effective and the most generally acceptable course of action". But he dismisses it on the ground that "unfortunately its scope is in present circumstances strictly limited and other and more drastic action may often become necessary." It is, indeed, unfortunate that this course of action is deemed to have a limited scope. On the other hand, there is good ground for urging that, of all the measures suggested for preventing the vicious spiral, the stimulation of production is the only remedy that can stand up to all the strain that the exigencies of financial administration during the war can possibly impose on the price structure.

To examine this proposition, it is probably necessary to take note of the ways in which inflation has been brought about and kept in check. As His Excellency remarked, war expenditure to-day is at the level of Rs. 20 crores a month. As a large part of this is incurred on account of His Majesty's Government, the inflationary forces originate in the London Branch of the Reserve Bank of India. The process of repatriating our sterling loans and replacing them with rupee loans has helped the Government to take back in the form of new rupee loans a large part of the war profits of individuals and business corporations. But the rate at which sterling securities are increasing shows that though this process will afford considerable relief, the problem of war inflation as such will not be solved by this method. When the proportion of the India Government's expenditure to total war expenditure increases, the value of repatriation of sterling debt as a solution of inflation is bound to decrease. In such circumstances, Government and industry alike can avoid liability to pay higher and higher wages, only if steps are taken to increase the supplies of the necessaries of life for which the increasing purchasing power will set up increasing demand. A minimum of such increase is bound to take place even in the absence of special measures. But if large allotments for co-operative banks and co-operative credit societies are made with a view to ensure increased production of foodstuffs and clothing, the stability of prices is bound to receive cumulative benefit.

It is in this sense that we urged, when we wrote last on this subject, that the aim must be to help the country to grow up to the currency. There can be no better opportunity than the present for stimulating, on a country wide basis, as distinct from the process of an industrial boom, the production of the necessaries of life. The Viceroy has been careful to observe, the cotton textile industry "whose capacity which all of us at one time have thought to be inexhaustible is beginning to feel the strain of the demands placed upon it". Likewise, it may be said of rice that the position in Burma has forced the Imperial Council of Agriculture to plan an increase in the acreage under rice. It is just these conditions that will enable workers in rural areas, with a little help from co-operative societies, to augment the production of the necessaries and comforts of life.

Such a programme of expansion can, however, be pursued only by popular ministries; and it is only a transfer of power at the centre that will take Indian industry into those spheres of production, from which, it has been so far kept at arm's length. One cannot help feeling that there is a general reluctance to extend to civilian supplies the methods by which the supply of war requisities has been expanded. The handicaps which political policy imposes on the economic are only slowly emerging to view. The manifest inadequacy of the war effort for meeting the dangers that threaten us, the lop-sided character of the industrial development from the point of view of development of our war potential, the difficulty of offsetting inflationary influences by stimulation of production in a country of such resources—all these are there. Official discussions are quite sound within the unstated limits of acceptable policies in the political sphere. It will be some time before the inhibitions created by undue anxiety for the post-war interests of British industry will be overcome. And if it coincides with that liberality of political outlook, for which the Briton has intellectual understanding but little of emotional sympathy, the solution of our war problems may well be the solution of the problem of war as well.

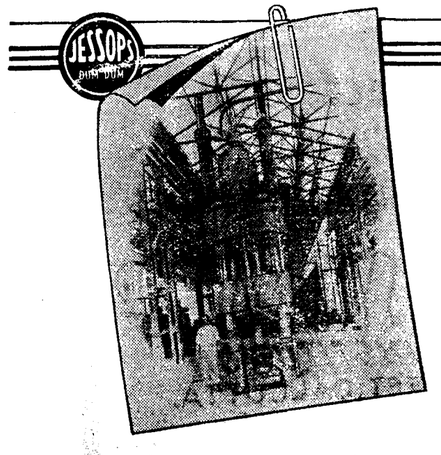
The Function of State Railways of India—V

NEW COMPANIES AND CONTRACTS

By T. V. Ramanujam

A study of the financial record indicates that the operating ratio, during the last quarter of the 19th century, never exceeded 52 per cent and was usually less than 50 per cent also that the percentage of net railway earnings to capital outlay varied from 6.17 to 4.65; that in spite of these factors operating in every year, from the commencement of the railways in 1853 up till 1900, the State had to pay out of the revenues from general taxation a substantial sum varying from Rs. 266 lakhs to Rs. 11 lakhs—to meet the deficit from railway operation. It may be concluded that during all these years (and later too) the shareholders of the companies incorporated in Britain were regularly and unfailingly given their stipulated interest on the capital supplied by them; and it may be added that they also secured substantial payments as their share of "surplus profit" while in fact there was, all the railways being taken together, no surplus at all to the Government but a deficit. A just appreciation of the changes in policy and results that appeared later, of the present position and of the future trends is possible only if these facts are not overlooked.

The development of early Indian railways has been discussed at some length naturally and deliberately. Even a brief examination of the results of railway operation in Britain, the United States of America and Germany will show that the position was very different there. It was seen that it was all unaided private enterprise in Britain; in fact, they had to grapple with the serious opposition of ignorant as well as interested parties. Every company without any exception was given a free grant of the necessary land in India. But in Britain the railway projectors of the early years had to pay over Rs. 100,000 a mile for land. Such handicaps notwithstanding, the railways developed rapidly in Britain and by the time the first proposals for railways in India were made in 1844 Britain was covered with a net work of lines; in all there were at that time 2,320½ miles of railway. The various parts of Lancashire were connected and these were linked with York and Leeds and Carlisle and Newcastle; and with these those of Birmingham, Rugby and London; by this time London was connected with Bristol, Exeter, Southampton, Brighton, and Norwich. While the pioneers of Indian railways were assailed with doubts and difference for what at that time must have appeared good and sufficient reasons, whether railways would be "catching" in India, their **confreres** in Britain were quite optimistic. In a sense events justified both; the railways did mean a heavy loss to the Indian Government for nearly the first five decades. In Britain they developed rapidly and without any expense to the Government. At the time the first railway, the Stockton and Darlington, was being constructed, George Stephenson told his son, "I venture to tell you that I think you will live to see the day when railways will supersede almost all other methods of conveyance in this country—when mail-coaches will go by railways and railroads will become the great highway for the king and all his subjects". Events completely justified him. When Robert Stephenson died in 1859 there were 10,000 miles of line opened in Britain; by 1900, it was more than doubled. There will be occasion to mention the intense competition among the very large number of railway companies that existed in Britain in the 19th century. The few facts given, a table below indicate that they were comparatively efficient and successful.



BRITISH RAILWAYS

Year	Proportion of working expenses to total receipts.	Proportion of net receipts to total paid-up capital.
1870	48	4.41
1875	54	4.45
1880	51	4.38
1885	53	4.02
1890	54	4.10
1895	56	3.80
1900	62	3.41

The mileage of railways in the United Kingdom was 6,635 in 1850, 10,410 in 1860, 15,310 in 1870, 17,935 in 1880, 20,073 in 1890, and 21,855 in 1900. In the United States of America where the Government did not find it necessary to guarantee the interest on the capital of railway companies, there was quite a rapid development of railways. The operating ratio was higher than that of Indian railways and also of railways in Britain, and the percentage return on capital varied from 3 to 5, during the corresponding period. In Germany and railway age began in 1835 when a line, four miles in length, was constructed from Nuremberg to Furth. By 1850 the aggregate mileage was 3,633. How it was steadily increasing afterwards is seen in the subjoined figures.

Year	Total mileage
1875	17.488
1880	21.028
1890	**26.136**
1900	**31.049**

In that country, as in India, the Government considered the railways to be an important means of attaining military efficiency. This objective, however, was not attained by guaranteeing the interest on capital of private railway companies, but generally by direct State construction and management. Prussia which, in the last quarter of the 19th century, was the world's principal laboratory for the study of the problems of railway nationalisation, attempted with much success to run the State railways without putting a strain upon the general tax-payer. In India the railway-user and the general tax-payer were both obliged to share the annual

loss of the railways. The table below indicates that Prussia found the State railways a striking financial success.

Year	per cent of net receipts	per cent of State's net gain
1895	6.57	1.60
1896	6.96	1.51
1897	6.94	1.73
1898	6.85	1.64
1899	7.03	1.82
1900	6.87	1.89

In the contracts with the earlier guaranteed companies as well as in those with the companies formed in 1881 and later there was a provision reserving to the Government the right of terminating the contracts and purchasing the companies at an intermediate date after the first 25 years or any other stipulated period. It was the policy of the Government (except in the cases mentioned above, when the purchase of some of the old guaranteed lines was postponed in order to secure to the Government a share in surplus profits) to use in some way or other at the earliest possible date this right of terminating the contracts of the various companies. The form in which the price of the purchase was paid varied in the different cases; in the case of some companies it was cash; for some it was India Stock, and for others it was wholly or in part in Annuities. To take an instance; the contract with the East Indian Railway Company was terminated in 1879. The value of the company's shares was fixed at £125 per £100. The purchase price, therefore, came to be £32,750,000. This sum was converted into a terminable annuity of £1,473,750 payable annually till February 1953. In this manner the East Indian Railway system became the property of the State. A new contract was entered into, according to which the share-holders of the East Indian Railway Company representing £6,550,000, i.e., one-fifth of the purchase price, agreed to postpone their annuity and, in place of it, to accept new terms. Under these, the management of the company was entrusted to these "deferred annuitants". They were guaranteed 4 per cent on the capital plus a certain share of the surplus profits. By surplus profits was meant so much of the gross receipts as remained after meeting working expenses, annuity sinking fund payments and interest on loan capital. Of this surplus profits the company was entitled to one-fifth, and under the later contract of 1900 to one-fifteenth.

In this manner the State acquired or retained the ownership of many railways, but the management was mostly in the hands of companies. It is this that constitutes the essential difference between the old and the new companies as the old companies were owners and the new companies were not owners but merely managed the undertakings. The East Indian Railway Company was the earliest and the most important of the guaranteed companies and though the process of the extrusion of the private investor was carried further in the case of that Railway, the East Indian position was practically typical of the whole situation.

War and Trade

Effects of the extension of war on India's trade may not be great or permanent except perhaps for cotton. Japan has in recent years taken less than she sold. In the year 1940-41 her exports to India were valued at Rs. 9 crores only. Last year witnessed a marked fall in cotton exports, and the actual effects for Japan's war economy may be more serious; for Japan, as is generally known, got essentials like manganese, pig-iron and mica from India. Lead and zinc may be had from friendly countries, but there is no chance of getting Indian manganese, chromite and other minerals for alloys. Japan's loss of her share of the market for hardware, chemicals, etc., will represent a serious loss. It is difficult to indicate what is her share as the seaborne trade accounts are published in a very concise form from February 1940. The export trade to Japan has languished in recent months owing to the freezing order issued on July 25. The October trade returns give the value of Indian exports to Japan in the seven months ended October as Rs. 4.59 crores as against Rs. 4.87 crores in the corresponding period of the previous year. The decline is small, but a point to note here is that exports to Japan in October, when total exports showed an increase of Rs. 12 crores nearly over October 1940, were nil —there being a blank entry as against Italian East Africa. Total imports from Japan in the seven months ended October were valued Rs. 11.74 crores as against Rs. 10.29 crores in the same period of 1940. Imports in October were valued Rs. 14.48 lakhs. The cessation of Japanese imports should help India's trade with Afghanistan, Iran and Iraq. The displacement of Japanese textiles by Indian goods is quite certain in view of the opportunities opened up this year. The decline under wool and silk goods as also other yarns and textile goods that is sure to follow the outbreak of war with Japan may also be advantageous to Indian mills. The woollen industry may get wool from Australia as Japan did and develop rapidly. The increase in the value of imports in 1941-42 may be void of significance, but the fall under cotton, yarns and manufactures will certainly suggest that, in one section at least, Japan has lost ground rapidly in this year. As the millowner's association bulletin does not provide the usual analysis of textile imports into India it is hard to say how much Japan has provided under the head of textile manufactures this year. In the past she held a virtual monopoly of rayon and had successfully elbowed Germany out in regard to woollen goods; even shawls, the German speciality being provided in large numbers after 1935 by Japan. Hardship may arise through deficient supply of machinery, paper and pasteboard as also electrical goods and apparatus. This will be magnified when complaints regarding rising costs are heard.

Jute Problems

In the annual report of the Indian Central Jute Committee a place is found for all the developments that touch the grower as well as the manufacturer of jute. Its record of work in 1940-41 is more than encouraging, and the fourth year more than fulfilled the anticipations of men who had been taught to hope for great things from the fuller, formal review published last year. The difficulties in the export trade were reflected in the statistical position at the end of the year. The war boom had been pricked earlier but the fall in May last, showed that in spite of high activity in the mills, it was possible for prices to slump. At the beginning of 1940-41 the stocks of both jute and jute manufactures were small and short-time working—like minimum prices for jute and hessian was essentially the result of an unforeseen reaction. The Central Jute Committee can preserve a detached attitude in surveying developments that are finding a precise parallel at the present moment. In regard to the reduction of hours decided upon last year and modified since, one may say that the mills still busy on war orders may not find it easy to cut hours. Minimum prices without Governmental co-operation or to be precise inter-governmental co-operation may not have the desired effect. Experience last year underlines the many melancholy arguments against artificial interference. But it is not suggested that the policy failed or faltered, for the many merits were demonstrated after the Delhi Agreement of December last. With the prospect of a two-thirds crop next year not one-third as promised the outlook for raw jute will be viewed as depressing. The market takes a definitely gloomy view and some sort of intervention to check the defeatism rampant may be called for. The new Ministry may have its own policy as regards jute and hessian, and it is not for the Jute Committee which records abstractedly the sharp fall in total consumption of jute to about 73 lakh of bales in 1940-41 to indicate the how and why. The restraint of speculation is a familiar remedy propounded in many quarters. That the futures quotation has not slumped may be due to another of those Gentlemen's Agreements which may not hold when the price of hessian goes down further to the bare official minimum of 1940. Last year was characterised by maladjustments, is the opinion expressed in the report which thinks that crop restriction will be the main issue, not the stability of the industry. One must, however, urge that it is the other way about, for complications have arisen. They are not likely to be resolved by the second marketing report promised or even the abolition of futures trading completely. The report, however, makes it plain that fertilisers are good for jute, and Dacca experiments sufficed to show that stem-rot could be controlled by the use of potash fertilisers alone or in combination with lime or phosphate.

Cotton Statistics

The cotton year ends in August and the latest available volume relating to raw cotton statistics makes possible certain conclusions as to the trend of consumption. If Assam, Sind and Baluchistan and the Frontier are dismissed summarily, it is clear that imports into the Punjab and the U. P. have increased at the same rate. The internal trade statistics clearly reflect the trend of consumption for instance in Bengal where rail and riverborne imports of cotton grown in Bengal itself have advanced from 173,099 maunds to 216,193 maunds. The total for imports into the U. P. established once again that the importance of Cawnpore which has grown more rapidly than any city in India between 1931 and 1941 is primarily due to its mill industry. Imports from Cawnpore rose in September, 1940—August, 1941 by over three times. Bengal's imports from the C. P. and Berar showed a striking increase in 1940-41 as striking as the increase in Bengal's takings of U. P. cotton as also Madras cotton. Bihar and Orissa are unimportant from the point of view of the cotton trade. The U. P. which obtained less cotton than in the previous year from the ten specified blocks enormously increased its consumption of Punjab cotton. The total takings according to the statistics published are 2,119,883 maunds as against 1,090,481 maunds. That increase will be described as a measure of the improvement in the textile industry of Cawnpore which alone drew 1,479,318 maunds of cotton between September, 1940, and August, 1941. Evidence of greater activity in the Punjab Mills is furnished by the increase in consumption of homegrown cotton. Unlike Bengal the Punjab mills can count on a large supply of both long and medium staple types. The curtailment of seaborne exports by way of Karachi is a development independent of the increase in mill consumption both at home and in Bombay. Sind's own cotton crop acquires increasing importance and this will be treated as reassuring to those who argue often that India should not be importing foreign cotton. Sind now provides nearly a third of the cotton entering into the trade. The mills in C. P. apparently took small quantities of Bombay and Madras cotton because they could obtain from the Nizam's territory fairly large quantities. Here again the import totals point to increased con-

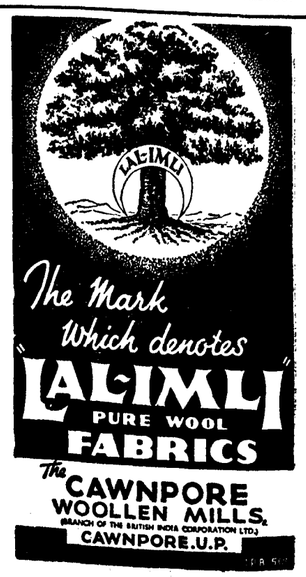
sumption. The reduction in imports of U. P. cotton into Bombay is readily explained by reference to increased demand at home. The enlargement of imports from the C. P. and Madras shows that other sources were available. The reduction in imports from Gujarat suggests that Broach cotton was in rather short supply. The total imports exceeding 12 million maunds make Bombay first as consumer and exporter. The figures immediately suggest that Bombay alone can rank with Liverpool and New York as a cotton market at any time. As the total coastwise imports are not given the statistics may suggest that Madras imports only a small quantity of Bombay cotton although imports through certain ports constitute over 30 per cent. of total arrivals. Total takings have risen to 2,262,801 maunds as against 2,072,931 maunds in the previous year. Mysore took more cotton from Madras than from Bombay as may be imagined and also a fairly large quantity from Hyderabad. The trend of consumption in the States generally was irregular, as no increase is disclosed at all under imports into Central India and Mysore.



America's Decision

Within a week great changes have taken place. U. S. policy is no longer sicklied over with the pale cast of thought, and Herr Hitler only anticipated Congress' unanimous decision by a very short interval. The arrangements for 168 hour week are yet to come but the idea of a 7 million army of men from 19 to 24 will require an enormous mass of equipment. The U. S. A.'s economic strength is not what it was when Mr. Hitch wrote a little book describing how rich and powerful the friend of Britain was. An enormous number of defence production agencies have arisen and the prophetic assurance in September of the **New Republic** that a declaration of war was inescapable and should be made as early as possible, is of high interest. The new powers vested in the President are comparable to those assumed by Governors on the Pacific slope already. The progress of operations clearly suggests that the U. S. A. has not been given a chance to show she is a great Power. Surprise alone cannot account for the loss of the Arizona and the Oklahoma and the inquiry into events at Pearl Harbour promised on Tuesday by the President will help to settle how much of the confusion and weakness arose from Fifth column activity. There have been circumstantial reports as to Japanese machinations in Hawaii and Manila. That Thailand has been a Fifth columnist will be readily recognised at present when the Japanese are pouring into Malaya because of their control of Thailand and Indo-China. One can see that a violent revulsion of feeling from pacifism to martial ardour must come. Mr. Knox's revelations in Washington will have the necessary effect as the nature and extent of the totalitarian menace comes to be recognised early after the appearance of Imperial Headquarters as a source of communiques.

The U .S. A.'s entry into the war will not follow the pattern of April 1917 for the ad hoc agencies and the Draft are already there. It was possible to go to work last week with a vote of credit for 10,000 millions as compared with Britain's Supplementary vote for 100 million sterling. The extension of conscription earlier after its adoption will have its own effect on employment. It may be possible to give the automobile factories orders for 12½ billions for aircraft and tank production to compensate for the curtailed output but the workmen may have to come. The labour leaders have condemned the aggressor but the U. S. A. will have to resort to industrial conscription. Straw votes may have shown that the people were ready for war but the Federal Government will have to turn the men in the W.P.A., C.C.C. and the A.Y.C. on to factories where the clamour for a closed shop has not died down.

Silk Substitute

The cessation of trade with the Far East confers added importance on most of silk substitutes. The development of nylon in U. S. A. is typical of many synthetic substances. The basic patents on Fibre 66 now called nylon were taken out by du Pont Nemours in 1937 after research covering nearly ten years. The investigation is of high value at a time when silk cannot be had from Japan and private stocks have already been commandeered both in U. S. A. and Canada for defence purposes. The commercial production of nylon began in Wilmington early in 1938 and in October a special eight million dollar plant was set up near Seaford, Del. Even before this plant started production of yarn in December 1939 original plans were modified to double capacity. The Seaford plant was rated to produce eight million lbs annually in the spring of 1941 and 1800 people were then employed. In October 1940 plans for a second plant were drawn up. This was said to be building in August at Martinsville, Va. Cost was put at 11 million dollars and production was expected at the end of 1941. When complete it will employ about 1000 people. Du Pont is said to have spent about 28 million dollars on nylon till now. This investment will result in giving employment to 2,000 people and yield 16 million lbs. Within two years it has ceased to be a freak or novelty. Nylon hosiery sold well in May 1940 since when 20 percent of full-fashioned women's hose was made of nylon. It is expected to provide soon 40 percent of women's hosiery, and the amount of silk displaced must be considerable. Nylon differs from other fibres because it is not made of cellulose. To say that air, coal and water contribute to its making is to indicate its difference from artificial wool or artificial silk made of casein of cellulose. The chief mark of Nylon is elasticity; that is why it is preferred for hose. As much as 80 per cent. of existing nylon output goes into hosiery. The synthetic is also strong and tough; it has been successfully used for parachutes, sewing thread, tennis rackets, fishing lines, surgical sutures, electric wire insulation and bristles for a variety of brushes. According to American papers it is being increasingly used for underwear, dress goods, neckties, waterproof fabrics and similar goods. Du Pont, long supposed to be the big shot of munitions-making, has to his credit nylon as well as cellophane which, though invented in France, caught on only when Du Pont developed a moisture-proof type. Du Pont led off in the dyestuff business in a big way after 1917. The result of Du Pont enterprise and investment is that 95 per cent. of the dyes used in America are of domestic origin and a very valuable export trade too has been built up. Other Du Pont achievements are neoprene—the rubber substitute—and the invention this year of Fibre D. intended to be a substitute for carpet and upholstery wools hitherto imported by the U.S.A. It has been said that du Ponts now think of munition as a side-line because 40 per cent. of their total sales come from products unknown ten years ago, all obtained through research and pioneering as in the case of nylon.

Dependent Japan

In spite of a fairly recent estimate by the **Economist** as to Japan's reserves of raw materials as also Dr. Dalton's warning that economic warfare cannot work wonders because Japan has built up stocks ahead, there have been fairly familiar arguments as to Japan's economic vulnerability. War materials are said to be in short supply. Though no stocks for fourteen months may be held, as suggested by Colonel Knox, it is asserted that the fighting services will use them up rapidly. In Malaya it is felt that mechanised warfare must be making a heavy demand on Japan's supplies. The stocks in Singapore are held to meet only British naval requirements. One must assume that they are well guarded. Indo-China and Siam can provide little. In 1939, Japan consumed 4,680,000 tons of oil and synthetic fuels provided little to supplement it. The yen bloc could not provide any oil but China's coal reserves are large and the Japanese may still count on distillation of oil from coal. The fact that 82 per cent of the oil imports in 1939 came from the U. S. A. suggests that Japan was more than usually dependent on U. S. oil and goodwill. It is known that after various restrictive orders applied by the U. S. A. the Japanese kept on fighting in China. Supplies from British Borneo and the Dutch Indies must have increased, but these sources are also closed now. The N. E. I. produce eight million tons and the local refineries are equipped to produce aviation fuel. Here again one must not be misled by estimates of Japan's inferior resources. The absence of any attack on Sumatra so far suggests that the Imperial troops in Malaya and not the oilfields of the Dutch are deemed the more suitable targets. That Malaya's minerals including tungsten and bauxite excite Japan's avarice has long been known. The iron ore of Johoe which has been withheld in recent years as much by the Chinese miners' reluctance as the British Government's unwillingness to countenance aggression has been a useful addition to the supply of Chinese and Phillipine ore. That the object is control of the iron mines may be inferred from the fact that Japan cannot get pig-iron from either the U. S. A. or India, formerly her principal suppliers. Scrap cannot be looked for since the U. S. A. prohibited shipments last October. Nearly three-fourths of manganese wanted must be had through imports and in this respect too the Phillipines are not unimportant in Japanese eyes. It is in regard to nickel, molybdenum, etc., that Japan's position is very bad as also in regard to fibres. The deficiency in regard to the latter must not be exaggerated because staple fibre has established itself as a substitute. The shipbuilding industry will, however, fare worse than the spinning mills for subsidies cannot be had as before and the carriage of other countries' goods is also impossible for the Japanese who had a large share of the trade of the Orient.

Shipping Needs

In spite of the successes scored by Britain in the battle of the Atlantic, there remains a real need for ships. Admiral Sir Lionel Preston said not long ago that not beer but ships alone made work and life possible for Britain. The U. S. shipbuilding programme may not be what it was in September but Admiral Land's statements have made familiar the idea of a progressive increase in 1942. The maximum envisaged in the first quarter of 1943 is 220 ships aggregating 2,270,000 tons. This new fleet will have to be built more quickly than in 1917-18 because the U.S.A. is at war in two oceans. There may be no pressing need for a bridge to Europe, but Russia's need will govern the situation. The total tonnage of six million tons or so figuring in the Maritime Commission's programme cannot be enough on a close view. Meanwhile there will be additions to the naval building programme. During the first eight months of 1941 as many as 213 vessels were put in commission and 436 ships were put on the stocks. The total programme as at end—September covered 968 ships with a total tonnage of 2,222,460 as the Navy alone had over 2,831 ships of all descriptions in accordance with the two-ocean Navy programme of the Administration. The U.S.A. however needs all it can get. Hence action proposed against French ships similar to that taken previously against Axis ships sheltering in American ports. A Swedish liner, fit to be used as an ice-breaker, has been taken over under promise of compensation. It is clear from this recent action that the U.S.A.'s need of ships is not at all limited to tankers wanted to serve the bases and fleet in the Pacific. Normal export trade cannot be neglected merely because of lease and lend for civilian supplies have to be provided for South America which is the concern of the U.S.A. as Europe is practically cut off from the New World.

Amended Programme

About five months ago the U.S.A. decided in favour of extending patrols and the occupation of Iceland to provide against the contingency of a war with Germany. Production was taken to be the means of victory and the ship-building programme like the aircraft plans were adapted frequently to changing needs, first of the Allies, secondly of the U.S.A. It is now recognised that the OPM schedule of four thousand planes per month will be realised sooner than expected to have an aero-engine output of 5,000 per month. The curtailment of operations in the automobile industry by over 40 per cent. as from this month will help materially. The Moscow talks in August resulted in a decision to speed up production. More recently has come the declaration of war followed by arguments in favour of no holidays, no shut-downs for factories on defence work. The estimate of 50,000 per annum under aircraft alone shows that in 1942 parity will be certainly possible for Britain. If aircraft supplies for the Allies put at 2,000 to 2,400 per month are diverted in part to the Far East it will be with the purpose of helping China and the Dutch Indies, members of the commonfront. Under tanks the results envisaged are not equally favourable. It is hoped to attain only one-third of the planned output by this month. M. Stalin has made his request early but the question now is what would an American expeditionary force need. It is known that General Marshall last year tried out certain ideas in the realm of mobilisation and transport of troops. The annual manoeuvres were also guided by the thought of real action in the near future. That means the U.S.A. is not caught unprepared. The Burke-Wadsworth law had put millions into the Army. Brigadier Hershey expects to raise an army of seven millions if men between 19 and 24 are subject to military service. This total will not be needed if the Far East alone requires attention. But seven European countries are at war with the U.S.A. and the anti-Comintern front, based anew on the tank and dive-bomber, has to be fought all the way. The Two-Ocean navy is no longer an ideal but an achievement. Senator Walsh has asked for a 30 per cent. increase in tonnage to raise the total by 900,000 tons. Seven or eight 45,000 ton battleships, 27 cruisers and 80 submarines in addition to aircraft carriers are covered

"THE GREAT CAUSE IN WHICH WE LABOUR"

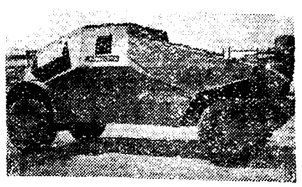
"I trust that when our common effort is crowned with success, the contribution of the Tata Iron and Steel Company will be deemed to be worthy of the great cause in which we all labour."—J. R. D. TATA,

(Chairman, The Tata Iron & Steel Co., Ltd.)

VICEROY'S TRIBUTE
TO
JAMSHEDPUR WORKERS

WHEN HIS EXCELLENCY THE VICEROY ADDRESSED THE EMPLOYEES OF THE TATA IRON AND STEEL COMPANY'S WORKS AT JAMSHEDPUR, ON FRIDAY, DECEMBER 12th, 1941, HE SAID:

Ladies and Gentlemen,—



I am most grateful to you for the welcome which you have given me, and for this opportunity of seeing that great work which is being done in Jamshedpur. Iron and Steel are the pass-words of to-day: they will open the gates to India's future industrial prosperity, and they will win us the victory which must be won, if safety and prosperity are ever to be tasted. I have been intensely interested by what I have seen during this short visit. You have reason to be proud of your membership of the largest steel-producing unit of the British Empire, and proud of the work you are doing. I have been greatly encouraged to see that work, and to see that it is good. I have seen it through the eyes not only of your Viceroy, but of one who knows from personal experience what is the point of view of the soldier in the front line. In the last war, as in the present one, the aggressors started with a big material advantage in munitions and equipment. It is a disheartening experience for the soldier when his guns can only reply with one shell against every hundred fired by the enemy's guns; or when he has to face a hundred enemy tanks with ten. But, if the soldier knows, as we knew in the last war, that there is a tremendous effort going forward in the munitions factories at home to give him as quickly as possible the weapons he needs, he can and will hold on until those weapons are in his hands. It is up to you to see that the tools which you send the soldier are good, that he gets them quickly, and in such numbers as not merely to restore the balance, but to give him an overwhelming superiority, so that he can finish the job once and for all.

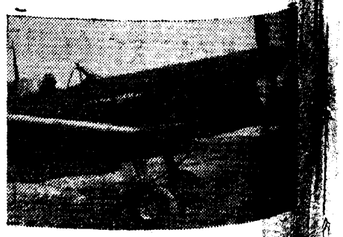
In the Great War of 1914—18 this country sent overseas hundreds of thousands of tons of steel, which were used in our campaigns in Mesopotamia, Palestine and East Africa. In this war already about a milion tons of your finished and semi-finished steel products—rails, structural sections, plates, sheets and bars—have been supplied for war requirements, and large quantities of your pig-iron have found their way even to Great Britain.

His Excellency the Viceroy

The stress of modern warfare calls for special qualities in steel, and it is in the production of special steel that this Company has shown imagination, foresight and energy of the highest order. Your Control and Research Laboratories are the finest of their kind in the Empire, and, as a result of their work, there is flowing from Jamshedpur,—from this Steel Works and from the other closely associated factories in this area—in a steady and ever-increasing stream, a great variety of special alloy steels, high speed steels for machine tools, bullet proof armour plate and many other essentials for the armies and factories of to-day—from steel helmets to stainless steel for surgical instruments; and from tin-plate and barbed wire to that special cable which is the answer to Hitler's secret weapon, the magnetic mine.

Brengun Carrier presented by Jamshedpur.

You have kept in the forefront of new developments and processes. As evidence of this I have seen to-day the armour plating of splendid quality, which is rolled and treated in your Works, being made into the bodies of fighting vehicles in the East Indian Railway Workshops. I shall be keenly interested to learn of the results of the bold and courageous experiment on which you are also engaged, whereby, for the first time, acid steel will be made direct from Indian raw materials. The new plant for this purpose will add to the growing number of your products, which, before the war, had to be imported from abroad. You are leading the way in showing that India can and should rely more and more on her own treasure-house of material resources and the skill of her own workmen to make her strong and prosperous.



Yours is the task to forge the shield as well as the spear-head of your armies in their mortal struggle. But you are not content with that. After your long day's work, you look to the defence of your own homes and workshops. The importance of air-raid precautions in a place like this needs no emphasis from me. My own eyes can testify to the energy and enthusiasm which you have brought to this voluntary work and the progress which you have achieved in the organization, recruitment and training of A.R.P. workers and Civic Guards. I warmly congratulate you all—staff and management alike. It has been a fine effort, and an example and inspiration to many other parts of India.

Very generous gifts in money too for war purposese have come from Jamshedpur-Golmuri. Three fighter planes of the Royal Air Force carry the name of your district, and you have given 14 armoured "carriers" to the Indian Army. Your investments in War Funds have exceeded half a crore of rupees, and your Publicity Committee has been doing most valuable work.

All of you, I can see, are determined to fight this fight out to the limit of your powers, and all of you are determined which side will win. We shall win this war—but there is a stern task before us yet. How soon we shall win it depends on the skill and the perseverance of you, and of men and women like you. Never be content with your effort; never let it flag; then victory will soon be ours, and Jamshedpur will be free to turn to the great part she is bound to play in the reconstruction of a peace-time world.

Your works in Iron and Steel hold the industrial future and the present safety of India in your hands. That is a great trust and a great responsibility, but readiness in every man and woman among you will, I know, prove equal to it.

The soldier who looks to you for your powerful co-operation will not ask in vain. He stands in the front line of battle, and you are standing at his shoulder, and it is the strength you give which will drive the sword-arm forward, carrying destruction to all our enemies.

The 3rd Spitfire donated by the workers and residents of Jamshedpur-Golmuri.

Information of use to the enemy might be given by a picture of the Steel Company's peace time efforts. This space is given to the British War Savings Movement.

SAVE FOR VICTORY BRITISH WAR SAVINGS MOVEMENT ASK YOUR BANK

by the programme and the cost may exceed 300 million dollars in the Senator's opinion. Nor must it be forgotten that America has responsibilities under the Monroe Doctrine. They are to be met by the modified programme. In spite of the lack of smooth success in the first year of the defence programme, inaugurated with the increase in Naval Estimates in May, 1940, the U.S.A. has now few doubts as to dealing with supply problems. The first vote of credit for ten billions suggests the scale and tempo of war effort. If aluminium production is to be multiplied two and a half times to 1,500 millions lbs. in a year there will be no difficulties as to aircraft production, originally estimated to cost over twelve and a half millions by the Office of Production Management.

Bengal Inquiries

The Bengal Board of Economic Enquiry is not less assiduous in examining the farmer's lot and propounding remedies than any similar organisation. Not many are aware that the Agricultural Debtors' Act owes much to the recommendations of the Board. Jute, fisheries and consolidation of holdings were subjects on which the Board's advice was sought in the past. The third term of the Board was marked by an expansion of membership owing to the addition of two officials. As an industrial survey committee began work, the Board's functions were naturally restricted to investigations into family budgets, the feasibility of establishing warehouses for produce, and that hardy perennial the unemployment of middle class youths. A further enquiry into the average yield and cost of cultivation of the principal crops in Bengal was begun at the instance of Government. From the annual report, it may be learnt that enquiry into the working class cost of living is progressing. At least 2 per cent of industrial labourers subject to a minimum of thousand from each of five selected zones in the Province and the simultaneous collection of price statistics and on the basis of the data so collected to construct a cost of living index for each zone. The enquiry was subsequently entrusted to the Indian Statistical Institutes as agent of the committee.

The examination into the question of licensed warehouses for agricultural produce was governed by the series of recommendations concerning help for agriculture, particularly from banks. The enquiry will determine both the value and practicability of setting up warehouses and would outline also plans for their establishment and working. In regard to make class unemployment the enquiry is proposed not merely to collect data, but to profound remedies. The use of honorary student volunteers for collecting information is a successful departure from previous practice and the system will be applied to all municipal areas except Calcutta and Howrah. Union boards will be called upon to provide information as to rural areas. Perhaps the most ambitious enquiry proposed is in regard to the economic condition of the rural and urban population with special relevance to agriculturists and agricultural labourers which, too, will help to assess the nature and extent of unemployment. Exploratory work is said to have begun and the results may throw more light than the 1941 census on the economic progress achieved in recent years. The enquiry will be universally welcomed as supplementing the information already collected, and one may venture to hope that the census records will be turned over to the Board for its own use to ascertain how far unemployment is urban in character or peculiar to the middle class. The date relating to payment of income-tax will help to settle conclusions as to taxable capacity and also indicate the margin available for additional taxation such as an inheritance tax or a tax on agricultural incomes which has not been ruled out as impossible or inexpedient.

A strange destiny seems to impose on me the task of agitating for the redress of grievances with respect to membership of banks in the clearing house associations in India. If I remember right, it was in 1926 that I found myself in the self-constituted role of advocate for the admission of the Punjab National Bank in the clearing houses of Bombay, Calcutta and Karachi. I had no manner of association with the Punjab National Bank at that time; but I knew it was one of the "big five" in India. Its speciality was branch-banking but it had offended one of the mighty members in the Exchange Banks group; and this bank succeeded, for years, in punishing the Punjab National by keeping it out of the clearing house. In those days, the foreign banks had supreme sway over the working of the clearing houses; and repeated attempts on the part of the Punjab National Bank ended in failure. When I came to know of the circumstances of the injustice meted out to a leading Indian bank. I took up the question in the columns of a dailv paper with which I was then associated.

It was a happy coincidence that the late Sir Pheroz Sethna, who was the Chairman of the Central Bank of India and who was a member of the Council of State, was then on a visit to Calcutta. I discussed this matter with him and drew his attention to my article. With the zest and energy which characterised every one of his actions, he "fired off" a number of questions with particular reference to my article and forwarded them to the Secretary of the Council of State. Sir Basil Blackett was then the Finance Member; and, as soon as the questions came to his notice, he telegraphically instructed the Imperial Bank that the Punjab National Bank should be made a member of the clearing houses concerned without any delay; and he added that he wished to be able to answer the questions in the Council of State that the Punjab National Bank had already been given the facilities. It may be said that this was the first and most significant rebuff which the exchange bank interests in the clearing house associations received. The Punjab National Bank episode had a chastening effect on the members of the various clearing house associations in the country and, for a long time, there were no cases reported of deliberate injustice to Indian banks.

The next occasion in which I was destined to play a part in connection with clearing house associations was during the discussion, by the joint select committee of the Reserve Bank of India Bill. In the original draft of the Bill, there was no mention whatsoever of clearing house associations. It was obvious, however, that the direction of clearing houses must be the responsibility of the Reserve Bank. I, therefore, suggested to some of my friends in the select committee that, in the section which confers power on the Reserve Bank to make regulations, a sub-section should be added to the following effect: "the regulation of clearing houses for the scheduled banks".

Though, under section 58 (2) (p) of its Act, the Reserve Bank is authorised to frame rules for the regulation of the clearing houses for the scheduled banks, no such rules have so far been framed by the Reserve Bank. Whether such regulations should be framed in pursuance of section 58 (2) (p), was considered by the Reserve Bank in 1935; but the decision then arrived at was that the Reserve Bank should, for the time being, merely assume the direction of the clearing in each centre on the lines laid down in the various agreements which had been reached with the local clearing house associations. The intention was that the framing of definite regulations should be deferred until such time as practical working experience had been obtained. An important point to note in this connection is that the direction of the clearing in each centre has been assumed as the definite responsibility of the Reserve Bank. It has also to be added that, when the Reserve Bank authorities were discussing this question with the various clearing house associations, the Reserve Bank made it clear that all scheduled banks who were prepared to comply with reasonable conditions in connection with the clearing should be eligible for membership. In other words, the Reserve Bank felt, firstly, that it is responsible for directing the clearing house on right lines; and, secondly, that scheduled banks were automatically entitled to the right of membership to the clearing house. While the clearing house associations were appraised of this opinion of the Reserve Bank, instructions were also issued to the managers of the banking offices of the Reserve Bank that such should be their attitude when questions

for new membership came up for consideration.

To the credit of the Reserve Bank it must be said that the stand which they took up at the commencement in regard to the rights of scheduled banks for membership of clearing houses, was inspired by a correct appreciation of its obligations to member banks. Some of the clearing houses, especially Madras, objected to the general proposition of all scheduled banks being automatically admitted to the membership of clearing houses. In the light of such objections, the Reserve Bank modified its original attitude and informed all clearing houses that, although the Reserve Bank considered that any bank with sufficient resources to qualify inclusion in the second schedule to the Reserve Bank Act should ordinarily be entitled to become a member of the local clearing house association, the Reserve Bank did not insist on this point in view of the fact that the Reserve Bank would assume no responsibility with regard to the clearing apart from their own share therein. In a Central Office letter addressed to the Bombay office in 1935, the hope was expressed that "no scheduled bank will be excluded which wishes to join."

It was unfortunate that the Reserve Bank, in its modified attitude, decided not to insist on this point. First thoughts are always the best. First impulses are always correct. The original standpoint taken by the Reserve Bank was the only correct attitude in accord with the obligations which the bank owes to the scheduled banks. If the Reserve Bank had put its foot down when the Madras clearing house and a few others objected, and made it clear that, as the institution responsible for directing the affairs of the clearing house, the Reserve Bank would insist on the scheduled banks enjoying the privilege of automatic admission to clearing house membership, the present controversy which has taken an ugly turn in Bombay and will soon do so in Calcutta, would have been avoided.

Again, in fairness to the Reserve Bank, I must admit that its managers on the clearing house have always exercised their votes in accordance with the original instructions. In fact, this question came up for consideration again in 1939, in connection with the application of certain scheduled banks in Calcutta for admission to the Calcutta clearing houses; and the following policy was laid down for the guidance of managers.

> Membership of the clearing house is not meant as a token of status. At the same time we have an obligation to see that any scheduled bank which is prepared to conform to the regulations and to settle its claims promptly is given clearing facilities, not necessarily as an original member (as this might give an undue preponderance to the smaller institutions) but possibly as a sub-member. If we therefore feel convinced that any scheduled bank is deserving of such facilities, we might undertake the responsibility of acting as their clearing agent with suitable guarantee (e.g., in respect of their minimum balance with us).

I wish to draw special attention to the recognition on the part of the Reserve Bank that "we have an obligaion to see that any scheduled bank which is prepared to conform to the regulations and to settle its claims promptly, is given clearing facilities". The present position is, therefore, that, as the Reserve Bank has not framed any regulation under section 58 (2) (p), the clearing houses in all the centres where the Reserve Bank supervises the work, namely, Bombay, Calcutta, Delhi, Madras, Rangoon, Lahore and Karachi, continue to be autonomous bodies having their own rules for the admission of new members as also for the conduct of business by the clearing subject to the Reserve Bank's instructions to its own managers to see that deserving scheduled banks are admitted as members or as sub-members as far as possible. That the present position is most unsatisfactory and that vested interests in the clearing house are capable of arbitrary decisions towards new applications, the Manager of the Reserve Bank being powerless to see that deserving scheduled banks are admitted, are clearly brought out by the recent developments in the Bombay and Calcutta clearing houses. The attention of the Central Board of the Reserve Bank has been forcibly drawn to the happenings in Bombay as the Western Capital has quite an aggressive style of making its representations and securing a hearing. The facts disclosed in a study of the affairs of the Bombay clearing house are that the total number of members was 30, there being also 21 sub-members; that, of the members, 17 were exchange banks, 11 joint stock banks, the remaining two being the Reserve Bank and the Imperial Bank; that of the nine members of the house who cleared less than 150 cheques a day on an average, eight were exchange banks; that the membership included three Japanese banks; that the banks whose position in the clearing house was not justified by the number of cheques cleared by them were unwilling to leave the house; and that the effect of the November resolutions of the Bombay clearing house association would be that the question of the admission of scheduled banks which are at present clamouring for full membership is postponed until vacancies arise. Fortunately, three vacancies immediately arise as a result of the three Japanese banks forfeiting membership. But this is not the main point. The chief consideration, which we should never allow ourselves to forget or overlook in this discussion, is the inherent right of a scheduled bank to full membership of the clearing house if it is in a position to fulfil reasonable conditions laid down. From this point of view, any limit to the total membership of the clearing house association is an infringement of the right of a scheduled bank. Equally is the application of any criterion of cheques cleared per day an infringement of such a right.

It is only in recent discussions that the question of congestion and overcrowding has been brought to the foreground. It is pointed out that, as the time element is of the greatest importance in the successful functioning of the clearing house machinery, there must be some manner of restriction in the number of component bank making up the clearing house. By way of stressing the case for a restriction in the number of members, the argument is advanced that, in important financial centres such as London and New York, the optimum number of members for a clearing house is regarded as lying beween ten and twenty. We are informed that there are only eleven members in the London clearing house; and that, in the New York clearing house, the number has been reduced progressively from 68 in 1870, and 49 in 1910 to 19 in September 1941. I shall readily admit the figures in connection with London and New York. But, may I ask, what is the total number of cheques passed as among the eleven members of the London clearing house or among the nineteen members of the New York clearing house? All the 30 members and 21 sub-members of the Bombay clearing house, would still be clearing less cheques in a day than does, for example, the Midland Bank or Lloyds Bank in London or the National City Bank or the Chase Bank in New York. The relevant consideration in connection with congestion from the point of view of a clearing house is not the number of members, but the total number of cheques handled among the members in each clearing. From this point of view, there can be no relevance in the suggestion for an upper limit to the number of members in a clearing house association.

Let me sum up the case:

1. At the beginning, the Reserve Bank realised clearly its obligation to secure the admission of scheduled banks to the clearing who undertook to comply with the stipulated conditions.
2. This position was slightly modified later but instructions were given to the Reserve Bank managers that they should see that scheduled banks are given clearing facilities as far as possible.
3. The present vested interests in the clearing houses are predominantly non-Indian; and many of them will not be entitled to membership if the criterion of daily cheques cleared is applied to them. Yet, it is they that would sit tight on what they have got and deny to others what they are entitled to.

(*From Our Correspondent*)

New Delhi, Dec. 16.

There have been meetings, almost daily, of such members of the Viceroy's Council as are in New Delhi owing to the numerous problems, political, economic and financial which the sudden outbreak of hostilities in the Far East which has brought to the forefront. It appears to have been suggested by the Indian Members now here that there should be as soon as possible a full meeting of the Council at Calcutta to review the situation. An emergent session of the Central Legislature has been suggested, but more important than these small gestures, however, valuable in themselves, is the need for a big political move which is sufficiently impressive at this juncture. Though the Viceroy gave no indication of any such move in the near future, there is reason to believe that some Indian Members have taken up the question of summoning a Leaders Conference consisting of the Members of the Viceroy's Council. Premiers and ex-Premiers, of conferences and leaders of parties to find a way out of the deadlock. As the Congress Working Committee is shortly due to meet, the Viceroy may be inclined to wait and see what happens at that meeting—in any case, it will be known in a few days to what extent the Viceroy is able to respond to this suggestion.

* * * *

The problem of rising prices is the most serious one at the moment. The Commerce Member, Sir Ramaswami Mudaliar, has been continuing to stay in New Delhi to attend to this question, but it raises so many issues that something more than mere Departmental action is necessary. The difficulties experienced in the case of the control of wheat prices may be looked upon as a useful warning for the future. As rationing may become necessary for many essential commodities if war conditions develop, as they are threatening to do, for an indefinite period which may continue for years, efficient organisational arrangements are necessary. It is even more necessary that the Communications Department should pay greater attention to the question of transport facilities and determine a longterm policy for assisting the quick movement in sufficient quantities of essential commodities. Those who are urging the need for an urgent session of the Central Legislature are not only thinking of Defence measures to meet the threatened hostilities as a result of Japan's entry into the war but also of the many civil problems like the adequate supply of essential commodities at reasonable prices, the prevention of panic and demoralisation and the urgency of civil defence measures.

* * * *

Several members of the Assembly are now here in connection with the meetings of the Standing Finance Committee and the Standing Finance Committee Railways. They are not surprised at the Viceroy's revelation in Calcutta that Defence expenditure has mounted upto Rs. 20 crores per month in fact they expect that it will be much more next year. There has been a good deal of talk among them on the possible taxation proposals which the new expanded Council will have to bring up for the next Budget and that is the reason why they are urging bold political measures for bringing back popular ministries in the provinces and reorganising the Centre as a National Coalition Government, for they feel that if large sacrifices are expected of the public, only a popularly controlled administration can with any propriety ask for it. The war situation in the Far East is bound to have far-reaching results so far as the Central Government's finances are concerned. The last few days have shown a noticeable fall in Railway earnings as compared with the previous months of the current financial year. The last ten days of November yielded only Rs. 18 lakhs more than the actuals for the corresponding period of the previous year—rather low compared with the big increase totalling nearly Rs. 10 crores which the first seven months showed. The coming weeks may not be more remunerative than these closing days of November owing to heavy military requirements. It appears that owing to this uncertainty it was not possible for Railway authorities to give any forecast of the year's surplus to the Standing Finance Committee for Railways yesterday. The committee approved of the purchase of the B.N.W. Railway and the R. & K. Railway for Rs. 16.34 crores and also sanctioned an expenditure of over Rs. 12 crores on open line works. Two other Railways are also to be purchased during the coming year—the Tapti Valley Railway and the Mirpurkhas-Khadro Railway for about Rs. 13 lakhs. The Railway authorities have decided to undertake no new construction during the coming year.

* * * *

The financial position of the Central Government as revealed by the October figures shows no new features. As compared with last year the month's revenue has increased by Rs. 2.12 crores—largely on account of increased income-tax collections. The increase during the seven months, has come up to nearly Rs. 15 crores, but the fact that the seven months have brought only Rs. 54 crores as against the Budget estimate of Rs. 106 crores for the whole year shows that unless income tax and excess profits tax collections go up at a faster rate, the year's total revenue may not be much in excess of the Budget estimate. Expenditure during the month has risen by nearly Rs. 2½ crores—a crore and a half under the head of Defence services and another crore under other charges. During these seven months expenditure has gone up by nearly Rs. 19 crores as compared with last year. Though a good portion of the Defence expenditure has to be met from loans, further taxation on a fairly large scale seems inevitable. Defence loan receipts from April to October totalled Rs. 33 crores which can be hardly be looked upon as sufficient for meeting the present heavy scale of Defence expenditure.

* * *

Not many items of importance came up before the Standing Finance Committee which concluded its work on Tuesday. The committee is reported to have been told that there was a possibility of the continuance of the protection to the handloom weaving industry of another Rs. 5 lakhs for 1942-43. One lakh to the sericulture industry and five lakhs for the benefit of cottage and small scale woollen industries were also approved by the committee. Sanction has also been given for the employment of a fulltime Secretary, with a nucleus staff, for dealing with the Secretariat work of the Reconstruction Committees. A sum of one lakh has been provided for affording shipping facilities for Indian pilgrims and for keeping down the pilgrim fare to levels which would not be prohibitive for the poorer classes of pilgrims. There is a good deal of feeling in Assembly circles that instead of utilising the services of the committee for generally scrutinising the finance policy of the Government of India—particularly war and supply finance—and submitting all big schemes for their approval, as is done in the case of the Railway Finance Committee, only minor items are submitted to the Standing Finance Committee.

* * *

Interesting particulars are given in the Income-tax Report for 1939-40 which was issued on Monday last, that being the first year of the working of the new Act. As compared with the previous year, the increase in collections was half a crore in income-tax and, nearly one and a half crores in super-tax. The number of assessees has fallen from 290,242 in 1935-36 to 267,216 in 1939-40. Assessees with an income of over Rs. 50,000 per year were only 1971 in that year. The Central Board of Revenue's summary of the previous year's trade conditions reveals the effect of the continued depression in many parts of the country. The report says that in Madras the year was not characterised by any striking economic prosperity compared with its predecessors. In Bombay the recession in trade and business which began in the latter part of 1937-38 continued during the year under review. In Bengal jute and piecegoods fared very badly and adversely affected the revenue of several districts, and due to heavy unabsorbed depreciation very little revenue was derived from steamship companies. In the United Provinces also it is said that selling prices did not keep pace with the prices of raw materials, and in the Punjab there were famine conditions in certain areas. Altogether it was a lean year for trade, which had its effect on the income-tax collections.

Information is now available that the Viceroy has not agreed to the holding of a special session of the Central Assembly for discussing the war situation.

(From Our Correspondent)

Bombay, Dec. 17.

Even before Pandit Nehru reached this place, the atmosphere here was surcharged. A late manifest came with the picketing of the Pentangular metal. A fairly original point of view was that adopted by Mr. K. M. Munshi who in indicating his variance with the Mahatma has made it plain that the war is too big and near for politics to come first. The problems it will create and has created are many. Ideals and realities have alike changed rapidly. Readjustment is called for and Mr. Munshi thinks that it is unwise to withdraw from spheres of power and influence. No attitude or policy can be treated as permanent. A realistic attitude is needed. Mr. C. R.'s words at Lucknow find an echo in Mr. Munshi's acknowledgment of the value of compromise. Not as an end but as a means. Joint struggle may produce unity according to Mr. Munshi who thinks now that favourable influences will emerge out of the present war. If India undertakes to fight on the strength of her own resources and strength, she will be able to forge a link of power. New situations, he concludes, demand new experiments and it may yet be given to India to carve out a bold international future. As. Mr. Munshi is out of the Congress, his statement may not attract great attention but many think that his advocacy of a new policy will bear fruit soon.

The most depressed area is the stock exchange. It was only to be expected after the announcement that no minimum prices were to be fixed. Mr. K. P. R. Shroff may be said to have helped bears but he has helped to abolish the spread between cash and forward rates. Steel shares have suffered as severely as the shares of the Bombay-Burmah Trading Corporation whose Chairman told shareholders that the assets in Thailand now under enemy occupation now amount to over Rs. 28 lakhs. The assurance that the bears in Burma will be retained conveys little comfort when the safety of properties in Java is at stake. The slump in textile shares is due to the fall in cotton. What the Board of the Exchange intends to do in order to protect the investor from a series of disasters remains to be seen. It has been recorded that Tata Steel deferreds have fallen by Rs. 700 in a week. Contrast this with the further rise in bullion with gold coin rising to an unheard of premium. There may be a similar rise in the black market often referred to. It seems in London, too, that articles of real gold are not valued at 8 guineas an ounce. A considerable premium for gold was paid by buyers anxious to allow the metal and not at all impressed by the Bank's buying price or the fixing. It is permissible to suggest that Bombay must be influenced by a swift rise in the black market elsewhere. It is now clear that what happened in Rangoon may be repeated. A contributory factor has been the small daily influx and the very moderate stocks held locally.

A direct result of the war is the convulsive rise in prices of foodstuffs. The Government, of course, claim to watch the situation. Wheat control is quoted as an example of prudent and courageous policy. Meanwhile the public exhibits an uncertain temper. Food riots in South India have not escaped mention in the press. The new Controller of prices, K. B. Dalal, has discussed the situation. The reluctance of shops to sell goods pending further rise in prices has not been overlooked. The recovery in the seeds market has imparted some firmness to grains. Profiteering however is viewed askance and Government has promised to make transport facilities to foodstuffs. The Transport Board will put up its own suggestions and imported foodstuffs will soon be available at lower rates. The rice position will improve when 400,000 bags from Burma are landed in January. Present stocks around 450,000 bags are reasonably large, and if it is made known that regular large supplies are coming dealers will sell at the old rates. As wheat stocks here are low, the effectiveness of price control is questioned. Dealers are not ready to sell and it remains to be seen what Government will do in order to help the consumer get what he wants. Sugar has risen by a rupee per maund after war broke out. Stocks are known to be large but reexports are likely to be large and the difficulty of Java may prove the opportunity for Indian sugar mills. Potatoes are an exception as the price has come down. U. P. supplies are coming through as usual and onions from Nasik and other places are not scarce. If standard cloth comes the poorer classes will be happy to know that price control would help them to get their dress at a reasonable price. Mills will be asked to open their own shops and Government may also undertake to distribute cloth. Mention should be made of the tendency for cloth

Tit Bits of Industrial Activity

Dry Cell Manufacture

A bulletin on drycell battery manufacture describes progress of a compartively young industry. The only factory that could produce high grade dry cells was a branch of a British firm though many other factories produced cells of somewhat inferior quality. Almost all the factories used imported maaterials and were regarded as assembly plants. With a view to help produce local material and improve production research began in 1935 and since then a great deal of technical assistance has been made available particularly to factories which cannot pursue experiments independently. The industry is now regarded as particularly promising because of difficulties in the way of importers. The improvements made possible by research should help local manufacturers who may ascertain the results of investigations described in the technical bulletin which describes processes, plant commonly used. and special equipment designed by the investigators.

Potatoes in Mysore

Mysore as one of the important areas suited for potato growing leads all other states. The area under potato in the State averages 6 to 8 thousand acres and the average annual production is estimated to be 20,000 tons. It is the principal exporter to Ceylon which takes over 40,000 maunds in a year. As imports from Europe and Burma are hard to get in wartime the potato grower in Mysore has special opportunities. Internment camps are viewed as good customers while the Army is an exceptionally good buyer. Dehydrated potatoes are in keen demand and Mysore has begun the drying manufacture already. Farmers are also told that potatoes pay better than other crops. They have been also told that the oval type is preferred. Two crops are grown in Mysore and cultivators have been informed that seed for the Ricket type can be had locally from Bangalore merchants.

Air Services

In the year ended June 1941 the Indian National Airways operated its Karachi-Delhi mail service and maintained the Delhi-Calcutta passenger service. Arrangements were made to procure twin-engine Douglas aircraft but they were not available though the necessary staff was trained in time largely at Government expense but with a certain amount of tons to the company. Surplus staff will be retained without loss to the Company though the Air Transport Scheme has failed. The Directors state that the older Beechcraft are not entirely suited to India and twin-engined planes are being sought for the I .N. A. services. The Empire Air Service entails some work for the company which has allocated Rs. 35,000 to Development account out of the profit of Rs. 47,732-2-5. When British Overseas Airways launches its ambitious scheme for a fast service from Karachi I. N. A. should benefit greatly.

Surgical Instruments

India is the main source of supplies of surgical instruments for the Eastern Group. Indian firms and Indian departments provide practically a hundred percent of the hospital equipment and 98 percent of the orthopaedic instruments and appliances. Expansion is contemplated. The goal is five million instruments and appliances within twelve months. The Medical Stores Department is the principal patron. It bought through a single indent 6700 mills of textiles for sandbags. India produces 120,000 lbs. of cotton wool and 16,000 lbs. of lint per month. It is easy to say where it all goes. Government factories produce enormous quantities of field dressings aided by private enterprise. In the Madras medical depot alone there is provision for producing one million such dressings per month. In addition to bandages and dressings. India produces scientific and medical glassware also neutral glass ampoules produced successfully in India during the war period. Rubber goods for hospitals are now procured locally. Hot water bottles, waterproof sheeing etc. are being made in India for some time. The Medical Stores Department work is responsible for the striking progress. Twentyfive years ago an instruments factory was set up in Bombay. Other factories have since sprung up in Lahore and Sialkot.

Sugar Exports

In addition to reports that Java may be made to export as usual there have been other pointers to the improved sugar position. Fresh stocks with central sugar factories in India at the end of October had dropped to 8.4 million maunds as compared with 10.2 million maunds at the end of October 1940. The existence of abnormal demand in Burma may also be referred to in spite of the introduction of restrictions less the Burma Government. A far more important benefit accrues from the relaxation of the clauses of the international agreement. The Indian Government procured permission for the export of 200,000 tons of sugar. The U. K. and the Middle East have been mentioned as possible buyers. Bombay and Cawnpore

(*Continued on page* 1150)

Resume of Commodity Markets

THE discouraging news regarding the Far Eastern situation earlier in the week and the wide publication given to the reports regarding the bombing of Rangoon on Wednesday have caused a further sharp decline in prices in the several markets during the period under review. But for the timely action by the Indian Jute Mills Association in fixing minimum prices there would have been a complete collapse in values in the hessian market. The important feature of the week is the further substantial rise in prices in the gold market. Silver prices also have been marked higher in sympathy and closing quotations are only slightly below the highest levels for the week.

One interesting point to be noted in this connection is the fact that while it has been necessary to impose minimum prices in the case of export commodities it has been necessary to fix maximum prices for staple commodities like wheat. Also, it is significant to note that the rise in prices for silver has come about in spite of the official selling in the Bombay market. There has been heavy buying of ready silver and the premium for ready position over first settlement is as much as Rs. 4 per 100 tolas.

Jute

There is practically no business in the futures market and quotations are nominally quoting around Rs. 57-8 per bale. Mills have not been doing any business in the loose jute and pucca bales sections and it cannot be expected that they will resume buying jute in any large quantities until they are able to sell freely forward their production of manufactured goods at above the minimum prices agreed to between the mills.

Jute Manufactures

The difficulties regarding shipping and the anxiety of holders to dispose of their entire holdings at whatever price they will fetch created a very difficult situation in the jute manufactures market. The members of the Indian Jute Mills Association, therefore, passed unanimously a bye-law on Tuesday fixing minimum prices for manufactured goods. Since the announcement by the I. J. M. A. a slightly better feeling is noticeable though there are still second-hand sellers eager to clear their stocks. It will be remembered that at the end of 1939 mills came to a similar understanding and by completely abstaining from selling succeeded in correcting the technical position of the market.

Having regard to the developments in the international situation, the Committee of the Indian Jute Mills Association at a special meeting held on Tuesday unanimously passed the undernoted bye-law:

"It is to be noted as a bye-law of the Association that member mills must not sell their manufactured goods below the following minimum prices:—

40 ins. 8 oz. basis for all 9 porter fabrics, Rs. 15-8 per 100 yards, ready and December, 1941 deliveries; Rs. 15 for all forward deliveries January onwards.

40 ins. 10½ oz. basis for all 11 porter fabrics, Rs. 19-8 ready and December, 1941 deliveries; Rs. 19 for all forward deliveries January onwards.

"This applies for A B makes: C makes will be at two annas and D makes at four annas less than those given above.

"For standard sacking goods, a minimum price equivalent to Rs. 350 per ton for all deliveries.

"In respect of fabrics other than standard, member mills are given discretion in their sale at prices on a parity with the minimum prices given above.

"This bye-law will subsist until cancelled by the Committee in meeting."

Cotton

The cotton market has resisted selling pressure much better than expectations. The abrupt rise in prices for bullion and the hopes that there would be a complete stoppage of cotton imports have been responsible for the slight improvement during the last three days. It is argued that with the necessity for a further increase in production mills will be obliged to use Indian cotton as much as possible and that this might possibly reduce to a great extent the carryover from this season's crop.

Wheat

There is a deadlock in the wheat markets in the different centres. With the institution of control of prices, both wholesale and retail, holders are not in a position to demand a higher price. As such they are refusing to part with their holdings. If this position continues to be in evidence for any length of time, it is feared that mills will experience a heavy shortage of wheat supplies. That is the reason why release of flour is being done with great caution.

Jute and Jute Manufactures

(By our Correspondent)

Calcutta, 18th December.

It is pleasing to be able to record that at long last some progress can be reported in the matter of establishing Standard Sample Boxes for the different grades of Loose Jute. The matter has now been handed to the Standards Sub-Committee to deal with, as should have been done in the first instance, for this was a compact, ready-made committee on which all interests connected with the raw material were represented. Already the basis of the scheme has been given shape and it is to be hoped that no unnecessary stumbling blocks or delays will be met with so that this very essential adjunct to the maintenance of stable standards may be established at the earliest possible moment.

American consumption figures for November are distinctly disappointing despite the fact that this season of the year normally shows some falling off. It might reasonably have been expected that the quickening tempo of industrial production in the U. S. A. would have negatived this seasonal tendency, but such is not the case. Consumption shows a drop from the previous month of no less than 10 million yards and is the poorest offtake for November in the past five years. It is even 4 million yards below the corresponding month last year. This would appear to bear out the contention that interests opposed to jute fabrics are successfully making headway in their crusade, materially assisted, of course, by Calcutta itself in its efforts at hara-kiri by uncontrolled bazar speculation in the recent past. Afloat stocks show an increase again, reflecting the more ample supply of freight which has been available, and presumably the spot stocks will show a return to more normal dimensions in the coming months.

November production returns from the Mills show a further increase, due to the longer hours worked, to almost 109,000 tons. This is an advance of 8,000 tons on the October figures. But an examination of the proportions of Hessians and Sacking goods produced reveals the fact that some further internal adjustment has been possible in the matter of switching hessian cloth on to narrow sacking looms. While the Hessian cloth produced in November is up by nearly 11 per cent, the percentage increase in Sacking is only about half that. But this switching must have now reached its limit and it remains to be seen how the offtake of Heavy Goods will balance the increased production. Comparing the production figures with the stock figures at the end of November, we find that while Hessian stocks, excluding goods held on Government account, represented less than 3 weeks of current production, Sacking stocks were equivalent to over 5 weeks production. While there is nothing in this position to worry about at the moment, it is a factor which will have to be watched, more particularly as shipping is certain to be affected by the extension of hostilities in the Far East. Any closing down of sacking looms is to be avoided if at all possible for this immediately throws a mill's consumption of jute out of balance. Already there are reports of accumulating cuttings which is reflected in the sharp drop in the market value of these.

The indirect stabilisation of fabrics prices which was effected by the fixation of a minimum rate in Jute Fatka showed signs of weakening, when the Mills Committee stepped in and fixed minimum rates for fabrics also. This will doubtless prove effective in preventing any serious crash in prices, for the Bazar is not unduly heavily stocked with forward goods and will be glad to support the Mills' movement to save their own skins. The premium on near goods has, of course, disappeared, but there has been sufficient revival in demand for near goods to suggest that what holdings there are will be taken care of without difficulty. The minimum prices fixed are for nine porters, Rs. 15-8 December, Rs. 15 January and onwards. In elevens Rs. 19-8 and Rs. 19 respectively, and for standard Heavy goods, Rs. 350 per ton. The effect on the market of the fixation of minimum prices, combined with some recrudescence of demand, has been quite marked. A comparison of the lowest rates touched by standard goods and the closing rates may be of interest. 9 Porters, Rs. 14-14 and Rs. 15-14. 11 Porters, Rs. 18-14 and Rs. 20-8. "B" Twills, Rs. 33-8 and Rs. 35-8. Cornsacks, Rs. 36-8 and Rs. 37-8. Liverpools, Rs. 39 and Rs. 40. Heavy Cees, Rs. 32-4 and Rs. 34-4. These prices are for the near position. April-June delivery is standing just about the minimum levels.

The only item of interest in the Export Jute market has been the placing of an order for Russia to the extent of 17,000 bales, and it must be candidly admitted that there are unpleasant features in the transaction. At a time when First marks for general shipment were being quoted at around Rs. 54, this business was closed on the basis of Rs. 49 and it is common talk that some of it has since been covered at Rs. 45. Comment is superfluous, except that such juggling with supplies for a hard pressed Ally in War time, leaves a nasty taste in the mouth. Local Mills have again shown only a very limited interest in pucca bales. Prices of high quality jute are well maintained but common quality can be had at a discount. Heart marks were reported at from Rs. 40 to Rs. 37-8. The steadier tone in the Futures noted last week was not maintained. After the clearing rate for December settlement was fixed last Friday by the Board of Control at Rs. 59-4, the quotation gradually subsided till it touched the minimum of Rs. 56, when transactions automatically ceased. There is a nominal quotation for March settlement somewhere between Rs. 57 and Rs. 58, but it is very nominal.

Loose Jute has been an exceedingly dull market with Mills completely disinterested. Prices have been again marked back without attracting buyers and European packing could be got at Rs. 13-8 and Rs. 9 for a low assortment of Middles and Bottoms. Indian Jat Middles are nominally Rs. 12, but unsaleable at that. Some European Tossa Middles are reported at Rs. 14-8, while Balers have bought Indian Jat Tossa Mids at declining rates from Rs. 16 down to Rs. 15-4. Mofussil markets are nominally easier, but imports are scarce and there seems no anxiety so far to liquidate holdings, except on the part of Marwari dealers.

The stabilisation of the Fabrics market has been commented on above. Some covering was done when prices were at a discount and a cheerful feature is that demand has continued, though not extensively, but sufficiently to raise rates well over the minima in the near position. Among the sales recorded were 9 Porters at Rs. 13-8 to Rs. 14, April-June, eleven porters at Rs. 19-8 January and January-March Rs. 18 March and Rs. 17, July-September. In Heavy Goods, "B" Twills at Rs. 35, Cornsacks at Rs. 36-12 and Rs. 37, Heavy Cees at Rs. 32-8 and Cuban Sugars at Rs. 48, all for December shipment. The closing tone is distinctly steadier.

4. The whole position needs to be reconsidered so as, on the one hand, to free the clearing house associations from the domination of vested interests and, on the other hand, to create conditions in which the Reserve Bank will be able to discharge its obligations to the scheduled banks to secure for them clearing house membership.

5. Under the Reserve Bank Act, the direction of the clearing house is the responsibility of the Reserve Bank; and under the Act it may devise rules and regulations for the clearing house.

6. The time has arrived when the Reserve Bank should discharge its statutory duty of laying down rules which will guarantee the due rights of scheduled banks.

Before I conclude this discussion, I must make it clear that there should be no arbitrary division of scheduled banks as members or sub-members. All scheduled banks must automatically become full members. If it is found necessary to distinguish between members and sub-members, let such division be effected in terms of the average daily turnover. To say that a bank must be on probation as a sub-member before it can acquire the right to be a member, is to cut at the root of the right which, I maintain, is inherent in a scheduled bank.

In any case, the rules regarding sub-members must be greatly liberalised. Instead of a sub-member being associated with this or that or the other member bank, the best solution would be for the Reserve Bank undertaking to be the clearing member for all sub-members. Another grievance of sub-members which should be removed immediately is the requirement imposed on sub-members to print on their cheques the names of the members through whom they clear. There are various other details in regard to which sub-members are put to unnecessary hardship but I am not disposed to discuss them as my contention is that the least that the Reserve Bank can and ought to do for scheduled banks is to place, on an automatic footing, the right of the scheduled banks for membership of the clearing house.

Eavesdropper.

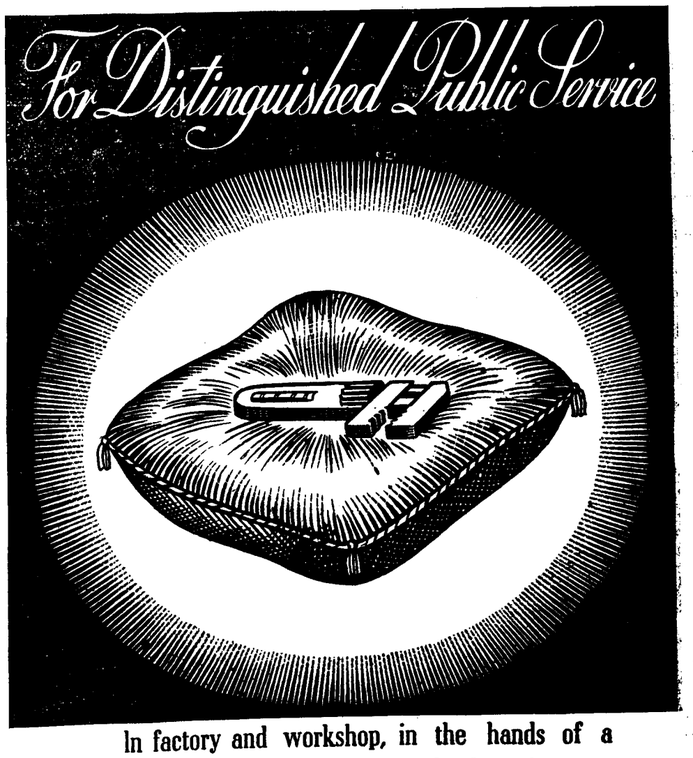
(*Continued from page* 1127)

crores to Rs. 21.11 crores. With the extension of hostilities to Southern Burma, more demand for currency was to be expected; and, if the war enters a more acute phase, there should be further rapid expansion in active note circulation. In addition, the demand for subsidiary coinage should assume colossal proportions. Notes held in the banking department of the Reserve Bank are more or less unchanged at Rs. 9.95 crores.

The exchange market has been hesitant and business turnover on the small side, what with the uncertainty about the war situation and about freight. The undertone, however, continues steady.

Banks were sellers of T.T. on London for Ready up to six months forward at 1s. 5 31|32d., and banks were buyers of T.T. on London for Ready up to six months forward at 1s. 6 1|32d.

D. A. sight bills quoted 1s. 6 9|32d., for three months and 1s. 6 11|32d., for four months.



Interbank call money is unchanged at ½ per cent no borrowers.

Firms' money for call and short quoted ¼ per cent and one to four months deposits ½ per cent.

(*Continued from page* 1145)

prices to drop owing to the lack of forward buying. It is recognised that people here are luckier than in Madras where the poor have been ground down to enrich tradesmen. The President of the Madras Chamber of Commerce took notice of this problem and condemned the profiteer as a public menace.

The vote is now a liability. Fire-watching goes with the sufferage because of a scheme launched by Government to get men for A.R.P. services. Voters in the city and suburbs are liable to be called up. If they cannot serve substitutes will have to be provided, such is the demand for efficient and able-bodied males. Occupiers of houses have to keep sandbags and buckets of water. Inspection of premises will be carried out as soon as the necessary notification is issued. Government will issue sandbags. Special measures will be taken at least to see that demands on the Fire Brigade and auxiliary services is as limited as possible. Property-owners are not exactly cheered because they fear extra taxation is coming. Getting a lakh of men for work at night must involve expenditure. Tenants will inevitably be asked to pay more by way of rent. Compulsion has come because Bombay is crowded and contains combustible material. The A.R.P. authorities cannot but have recourse to special measures to make sure of men. Patriotism and civic spirit will be called into play and the immigrant will not be envied just because he can escape the new duties thrust on the citizen.

In factory and workshop, in the hands of a million workmen, this humble tool plays its part. Men have learnt to depend upon it. It is as vital to the workman as to the gigantic machine he controls.

Steel—the metal of mighty strength—is always used because it means strength and reliability.

ALWAYS—EVERYWHERE—STEEL FOR STRENGTH

(Continued from page 1146)

prices have in the last month ruled exceptionally firm in view of export prospects. According to recent reports the Sugar Syndicate has asked member mills to tender for oversea exports. India has a chance to revert to her old position as an exporter of sugar. The Philippines, Hawaii, Formosa and possibly Java are likely to produce and export much less sugar than in the past.

Coal Conservation

Pleas for conserving India's quality coal reserve have been heard since 1935. They found an echo in Mr. Gee's study of certain Indian coals. The subscribers to the view that a shortage is likely to occur even if consumption of coking and gas coals is reduced mainly because most of the blast furnaces are designed to run on quality coking coal and many other industries depend only on coal of the best grade. The use of inferior types of coal is advocated on the score of conservation. Washing may become necessary and economically possible. The clearing plants will in turn provide a certain amount of fuel for generating power for local industries. The other suggestion is made in connection with the preparation of smokeless fuel and by-products for which sugar exists. Most coals would be acceptable if the ash content is lowered. Reference is made to the experiments made by Low Temperature Carbonisation, Limited, on certain Damodar coals which have been ascertained to be suitable for treating by the coalite process. By-product in the form of motor spirit is likely to be valuable, but the industry will have to turn to Government for special encouragement. This is viewed as more practicable by Mr. Gee than hydrogenation plants which might find the sulphur content of Indian coal an obstacle. Moreover India is fairly close to many oil producing countries and her own production is not likely to fall away suddenly.

Dairy Products

New products and trades have come into being as a result of the war. India has become an exporter of butter and cheese mainly for the use of forces serving abroad at present. During the last war cows were shipped to Mesopotamia: now it is condensed milk or dry milk, cheese or butter. The manufacturer of these milk products has received help from the Director of Dairy Research. The Supply Department manifested quite early special interest in condensed milk. The Military Forms Department began to make it at Lahore and further experimental work is in progress at the Bangalore Dairy Institute. The production of butter has risen from 20,000 lbs. to about 50,000 lbs. because of the increase in demand. Attempts are being made to raise the quality of butter. India which used to import in a year about 9,000 to 10,000 cwt. of cheese valued Rs. 7½ lakhs has now turned her attention. At Allahabad the Dairy Institute is now trying to make Indian Cheddar; if there is Canadian and American Cheddar, why not Indian? The Military farms department intends to do this cheese-making in a big way. But it is ghee that is still the prime need of Indian troops. The detection of adulteration is one of the jobs related to the provision of more and better ghee. Dairy plant is also being made in Bombay.

JUTE

Calcutta, December 18.

WITH mills keeping out of the market completely and the panic in the other markets the jute market has naturally been very weak during the past week. Activity in the jute futures market is at a standstill and quotations are mostly nominal as business cannot be done below the minimum price of Rs. 56 per bale. In the other sections sellers are very keen to do business and are prepared to discount prices substantially. The decision of the mills not to sell manufactured goods below the fixed minimum prices should have an encouraging effect on the markets. Even otherwise, as was pointed out on the last occasion, there is no fear of any large drop in the consumption of jute, now that exports of the manufactured goods have been seriously affected, as sandbags will be required in large quantities and this should keep the mills busy.

In the loose jute section mills have been buying very sparingly. Indian Jat Tossa Middles were sold at Rs. 15-12 per maund. Earlier in the week Indian Jat Middles were nominally quoted at Rs. 12-4 per maund.

In the pucca bales section not much business has been passing. Shippers have taken no interest in the market and sellers are prepared to discount rates for ready shipment. Outport Tossa 4's were done at Rs. 40 per bale.

There has been a further decline in the quotations in the jute futures market. From Rs. 60-8 at the time of last writing there has been a decline to below Rs. 57. The quotations are fluctuating around that level during the last three days with very little business passing.

JUTE MANUFACTURES

Calcutta, December 18.

THE important feature of the week is the decision by the Indian Jute Mills Association in the passing of a bye-law fixing minimum prices below which mills are not permitted to sell. Earlier in the week there was considerable panic in the market and holders were very anxious to dispose of their stocks. But for the timely action by the Indian Jute Mills Association values would perhaps have been hammered down further. A steadier feeling is noticeable in the market during the past three days, but business is on a very restricted scale. 9 Porters ready are quoting Rs. 15-12, January-March Rs. 15-4, and April-June Rs. 14-12. 11 Porters ready are Rs. 19-12, January Rs. 19-4, January-March Rs. 19 and April-June Rs. 18-8.

In the heavy goods section easier conditions have been noticeable and quotations are fluctuating around the minimum levels.

The U. S. stock and consumption figures for the month of November, reveal that there has again been a drop in the consumption figure and that shipments have again declined.

COTTON

Calcutta, December 18.

ORDINARILY, there should have been a slump in cotton values. However, with the continued strength of the gold market operators in the Bombay raw cotton market have taken a bullish view and quotations at the time of writing are at the highest levels for the week. The continued encouraging reports from the cloth markets and the strength of staple commodities have led jobbers to think that values will be well held. Broach April-May are quoting Rs. 235-4, Bengal December-January Rs. 145, March Rs. 148-8, Oomra December-January Rs. 201-4 and March Rs. 186. The quotation for Broach and Oomra varieties are substantially higher.

Business in imported varieties is becoming difficult that it is feared that henceforth it would be impossible to get sufficient imports of foreign cotton. A substantial premium is offered by buyers for these varieties.

After the initial setback in prices, the New York market has been more active during the past week and a good rise in values has been recorded. The increase in the rate of industrial activity should lead to a large rise in cotton consumption, but there are fears of price control. The quotation for March was 16.80 cents and May 16.96 cents against 16.0 cents and 16.60 cents respectively.

GOLD

Calcutta, December 18.

THERE is considerable panicky buying in the gold market and a further substantial rise in prices has been recorded. The quotations are at the highest levels for all time. There is great demand for ready gold. The buying has been mainly for hoarding purposes. Sovereigns especially were in keen demand. Gold ready are quoting Rs. 50-2, First Settlement Rs. 49-10 and Second Settlement Rs. 49-10. The quotations at the end of last week were Rs. 47-14, Rs. 47-13 and Rs. 47-12 respectively.

SILVER

Calcutta, December 18.

IN spite of the free selling by the Government of India for the forward positions the quotations in the silver market have been marked higher considerably in sympathy with the gold market. There is a substantial premium for spot position which is again mainly due to buying for hoarding purposes. Indian Mint Silver ready are quoting Rs. 70-12, First Settlement Rs. 67-5 and Second Settlement Rs. 67-6. The quotations at the end of last week were ready Rs. 66-8, First Settlement Rs. 65-5 and Second Settlement Rs. 65-7.

In spite of the activity on the Bombay market there has been no change in prices in the London market, quotations for both spot and forward being 23½d. Small demand was officially satisfied.

WHEAT

Calcutta, December 18.

WITH the institution of control of prices, both wholesale and retail, business in the several markets in the country has been disorganised. Quotations are around maximum prices, but the undertone in all sections is firm and holders are not quite prepared to part with their holdings. It was expected that the shipping position would improve and that imports of Australian wheat would ease the position considerably. The war in the Far East, however, has considerably altered the position and with the increased army requirements the export factor is still of considerable significance.

"Worry and fear retard human initiative and efficiency, probably more than any other factor. Personal attainment and vocational efficiency are impossible when a person is living under the shadow of fear and anxiety. Life Insurance mitigates these evils and reduces the uncertainly which attaches to our economic affairs due to the risk of premature death."

Stock Markets to-day and to-morrow

MINIMUM PRICES FOR EQUITIES IN BOMBAY AND CALCUTTA

To observations made here must be added remarks that can little support optimism for it must be confessed that markets both in Calcutta and Bombay, have experienced panicky selling and a sharp drop in prices has been recorded in all sections. Conditions similar to those witnessed at the time France was overrun were noticeable in both the centres fairly early in the week and it was found necessary by the committees of the two stock exchanges to recommend the fixation of minimum prices for nearly all equities. This prompt action by the authorities concerned has had a steadying influence on the values, but business is on a very restricted scale and quotations in most cases nominal.

The alarm and confusion in the markets will be evident from the fact that the quotation for gold and silver earlier in the week touched new record high levels. Demand has been mostly for ready gold, obviously for hoarding, and a substantial premium is in evidence for ready over first settlement.

In Calcutta, there was heavy selling in the first hour itself on Monday's session and the committee had to order closure of the market at 1 p.m. Minimum prices were then fixed for all equities.

The Bombay market remained closed on both Tuesday and Wednesday. It reopened yesterday, but no business was reported. The Governing Body of the Association has recommended the fixation of minimum prices for both forward and cash scrips. For such action sanction has to be accorded. A request to this effect has been made to the Bombay Government.

It may be remarked that there is a complete lack of confidence in the future condition of the market, as the initial successes of the Japanese have evidently made a big impression. So also was the position when Italy entered in 1940 and the decline in prices in Bombay was more pronounced than in Calcutta as the leaders were hammered.

* * *

The net profit of the Bararee Coke Company, Limited for the year ended September, 1941, has been maintained at the high level of the previous half-year, and if it were not for the higher provision for taxation it would have been possible to recommend the same dividend. The amount set aside to depreciation is Rs. 17,644 against Rs. 18,031 while the provision for taxation is Rs. 1,7[illegible]500 against Rs. 1,56,000. The dividend is lower at 10 per cent against 11 per cent. The amount carried forward is, however, higher at Rs. 69,494 against Rs. 58,752 brought in.

* * *

The Bareilly Electricity Supply Company, Limited has done very well during the last three half years. There has been a substantial increase in the number of units sold. But for an increase in working expenses the net even profit for the half-year ended June, 1941 should have been even higher. The net profit before providing for taxation for the half-year is Rs. 1,08,121 against Rs. 64,864 for the corresponding period in 1940. The amount set aside to depreciation is Rs. 26,545 while the allocation to General Reserve is Rs. 15,000 and that to Reserve for Gratuity Fund Rs. 5,000. The Reserve for taxation is Rs. 32,343. The dividend is higher at 3 per cent against 2½ per cent. The amount carried forward is also higher at Rs. 11,576 against Rs. 6,343 brought in.

* * *

Thanks to an improvement in the export trade on account of the easier freight position the *Bengal Coal Company, Limited* has been able to report a substantial rise in earnings for the half-year ended October, 1941, though they have not reverted to the level of the corresponding period in 1940. The acute wagon shortage apparently prevented any increase in despatches for internal consumption.

The net profit before providing for taxation and depreciation for the half-year is Rs. 14,96,550 against Rs. 6,84,368 for the previous half-year. The greater part of the increase in earnings is taken up by the provision for taxation. It has, however, been possible to pay a bonus of Rs. 2 per share besides the usual dividend. The amount set aside to depreciation is unchanged at Rs. 3 lakhs while the provision for taxation is Rs. 7 lakhs (nil). The dividend and bonus amount to Rs. 12 per share against the dividend of Rs. 10 per share on the former occasion.

Raisings were 7,77,598 tons against 8,23,202 tons and 8,77,926 tons in the preceding half-years. Despatches, which include purchased coal as usual, were 10,56,137 tons against 8,63,681 tons in the half-year ended 30th April, 1941, and 11,26,628 tons in the half-year ended 31st October, 1940.

* * *

The first balance sheet of the *Maheshwari Devi Jute Mills, Limited*, since it became a public limited liability company, makes a very good showing. The net profit before providing for taxation and depreciation is as much as *Rs. 5,40,165.* The amount set aside to depreciation is Rs. 2,15,345 and the transfer to Reserve for taxation Rs. 1,85,000. The dividend on the ordinary shares is Rs. 15 per share. The amount carried forward is Rs. 10,670. During the period under review the company has been turned into a public company and it is proposed to arrange for its shares being quoted on the stock exchange. The results achieved during the year are satisfactory especially because the Directors have been able to provide depreciation to the extent of the written-down value of the assets. The prospects for the next year are reasonable in spite of the fears rife in the hessian market at present.

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, December 19.

As there was regular panicky selling in the several sections on the Calcutta Stock Exchange early in the week, it was found necessary on Monday this week to close the Stock Exchange at 1 p.m. and take up the consideration of the fixation of minimum prices for all equities. The fixation of minimum prices for the five leading counters last week did not have the desired effect. There was heavy selling for other counters. As a result of the meeting of the Committee on Monday afternoon, it was decided that minimum prices should be fixed for all counters with the exception of giltedged securities, railways, preferences and debentures. The delivery regulations also have been tightened considerably. The action taken by the Committee has had a slightly steadying effect, but business passing is on a very small scale and there are very few buyers above the minimum rates. Unless there is any improvement in the position in the war situation in the Far East, it is idle to expect that there will be sustained recovery in prices.

The giltedged securities section has been very weak and there has been a further decline in the rates. There have been heavy withdrawals from the banks and as such it has not been possible to give any support to the market. Also, there is a tendency on the part of small investors to realise investments. 3½ per cent Paper is quoting two points lower at Rs. 92-2, 3 per cent Paper were Rs. 79-12, 3 per cent 1963-65 Rs. 92-11, 3½ per cent 1947-50 Rs. 99-8, 4 per cent 1960-70 Rs. 108, 5 per cent 1945-55 Rs. 108-2 and 3 per cent Defence bonds Rs. 100-13. Provincial loans also have been marked lower in sympathy with 3 per cent 1952 issues quoting Rs. 97-8.

Practically no business has been passing in public bodies' debentures. Among industrial debentures, 5½ per cent *Carew & Co.* debentures were crossed at Rs. 105-8. Preference issues have been marked lower though the turnover has been on a very small scale. *Bowreah* "B" preferences were noted at Rs. 90 and *New Victoria* preferences at Rs. 8-4. Among jute mills preferences, *Hastings* were Rs. 144, *Lansdowne* Rs. 135 cum-dividend, and *National* Rs. 174. *Steel Corporation* also were lower at Rs. 117-8.

Cotton shares are weak with *Basanti* at Rs. 5-3, *Bengal Nagpur* at Rs. 18-4, *Dunbar* at Rs. 238, *Kesoram* at Rs. 9-5 and *New Victoria* at Rs. 5-12.

Coal shares are not very much lower on balance with *Bengal* at Rs. 370, *Bokaro and Ramgur* at Rs. 16-8, *Dhemo Main* at Rs. 13, *Mundulpoor* at Rs. 10, *New Beerbhoom* at Rs. 16-13, *Standard* at Rs. 21-14 and *West Jamuria* at Rs. 30-4 small lot.

The jute section has been the worst hit and a further all-round decline in prices is to be recorded. Only at the lower levels there as been a slight recovery. *Anglo-India* are quoting Rs. 330, *Belvedere* Rs. 380, *Dalhousie* Rs. 326, *Gourepore* Rs. 681, *Kanknarrah* Rs. 388, *National* Rs. 22-9 and *Reliance* Rs. 54.

In the Engineering section, quotations for *Indian Iron* and *Steel Corporation* are nominally around Rs. 32 and Rs. 19-4 respectively. But it is reported that outside the Stock Exchange business in these two counters has been reported at considerably below the minimum prices. *Bhartia Electric Steel* were Rs. 14-13, *Jessop* Rs. 18, *National Iron and Steel* Rs. 9-12 and *Steel Products* Rs. 4-12.

In the Sugar section, *Balrampur* were Rs. 12-8, *Champarun* Rs. 19-5, *Murree Brewery* Rs. 16 and *New Savan* Rs. 12-2.

In the Tea Section, *Hattikhira* Rs. 23, *Patrakola* Rs. 1,000 and *Teesta Valley* Rs. 29-8. Transactions have been considerably on a smaller scale.

In the miscellaneous section, *Burma Corporation* were Rs. 3-12, and *Consolidated Tin* Rs. 2. *B. I. Corporation* were Rs. 5, *Indian Cable* Rs. 23-14 and *Indian Wood Products* Rs. 28-10. *Rohtas Industries* changed hands at Rs. 24-12. *Dunlop Rubber* have lost nearly eight points at Rs. 41. Among Paper shares, *Titaghur Paper* were Rs. 19-13, *Orient Paper* Rs. 15-8 and *Shree Gopal Paper* Rs. 14-2.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, December 19.

Money.—Call money is steady being quoted at ¾ per cent.

Exchange Market.—There has been no change in the rates.

Securities.—With the sharp rise in bullion prices and the lack of confidence in the future of markets there has naturally been a decline in prices for both non-terminable and terminable loans. Markets were closed on Tuesday and Wednesday. No minimum prices have been fixed for government securities. 3½ per cent Paper were quoted at Rs. 93 on Monday. Yesterday the market was officially open but no business was transacted.

Shares.—In spite of the fact that the President of the Stock Exchange announced sometime back that no measures would be adopted to prevent speculative selling it has been found necessary this week to fix minimum prices for the leading counters. The Governing Body of the Stock Exchange have passed the following resolution:—

"That Government be approached for necessary sanction under Rule 90 (A) (6) (IV) to fix the rates shown against the securities in the acompanying list below which sales or purchases in any security shall not be made."

Minimum prices fixed for 1942 January settlement: Bombay Dyeings Rs. 1,150. Central India Ordy. Rs. 350, Century Rs. 370, Colaba Land Rs. 180, Finlay Rs. 200, Gokak Rs. 240, Kohinoor Rs. 470, Morarjee Goculdas Rs. 450, Mysore Rs. 160, New Great Ordy. Rs. 275, Phoenix Rs. 450, Simplex Rs. 200, Swadeshi Ordy. Rs. 365, Swan Rs. 215, Andhra Valley Ordy. Rs. 1,670; Bombay Electric Tram Ordy. Rs. 140, Tata Hydro Ordy. Rs. 170, Tata Power Ordy. Rs. 1,650, Bombay Steam Navigation Ordy. Rs. 285, Tata Steel Ordy. Rs. 300, Tata Steel Defd. Rs. 1,600, Alcock Ashdown & Co., Ld., Rs. 600, Associated Cement Rs. 150 c.d., Belapur Sugar Rs. 240 c.d., Bombay Burmah (old) Rs. 300 c.d., Indian Bleaching Rs. 175, Premier Construction Rs. 105, and Shivrajpur Rs. 30.

Minimum prices for cash:—

Bombay Dyeings Rs. 1,100, Central India Ordy. Rs. 330, Century Rs. 350, Colaba Land Rs. 170, Finlay Rs. 190, Gokak Rs. 220, Kohinoor Rs. 445, Morarjee Goculdas Rs. 425, Mysore Rs. 155, New Great Ordy. Rs. 260, Phoenix Rs. 425, Simplex Rs. 180, Swadeshi Ordy. Rs. 350, Swan Rs. 200, Andhra Valley Ordy. Rs. 1,650, Bombay Electric Tram Ordy. Rs. 135, Tata Hydro Ordy. Rs. 165, Tata Power Ordy. Rs. 1,580, Bombay Steam Navigation Ordy. Rs. 270, Tata Steel Ordy. Rs. 285, Tata Steel Defd. Rs. 1,525, Alcock Ashdown & Co., Ld. Rs. 575, Associated Cement Rs. 145 c.d., Belapur Sugar Rs. 225 c.d., Bombay Burmah (old) Rs. 285 c.d., Indian Bleaching Rs. 165, Premier Construction Rs. 100, and Shivarajpur Rs. 28.

It will be noted from the above that it is proposed to fix levels which are substantially below the quotations ruling at the end of last week. The minimum price for Tata Steel deferred is nearly three hundred points lower than the quotation at the time of last writing.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, December 19.

Similar conditions have been noticeable on the Madras Stock Exchange. With speculative selling all-round decline in prices has been recorded.

Giltedged securities are lower with 3½ per cent Paper at Rs. 92, 3 per cent 1963-65 Rs. 93, 4 per cent 1960-70 at Rs. 108 and 5 per cent 1945-55 at Rs. 108.

Textiles.—There has been heavy selling and even the popular counters have been substantially marked down. *Buckingham and Carnatic* were Rs. 285, *Cambodia* Rs. 12 and *Mettur Industries* Rs. 182.

Plantations.—This section has not been very much affected though in sympathy with the weak tone of the other sections lower quotations have been recorded. *Peermade* were quoting Rs. 33 against Rs. 33-8, *Cochin Malabar* Rs. 8-14 against Rs. 9-4, *Periakaramalai Tea* Rs. 20-8 and *Thirumbadi* Rs. 2-14.

Sugars.—*Mysore Sugar* were unchanged at Rs. 54. *Travancore Sugars* also were unchanged at Rs. 15-14.

Miscellaneous.—*Mysore Paper* are lower at Rs. 18, *Mysore Chemicals* at Rs. 18-4 and *Spencer* ordinary shares at Rs. 6-14.

Audited accounts for the half-year ended 30th September, 1941:—

Accounts.—After allowing for taxation including Excess Profits Tax, etc., there is a balance of Rs. 17,91,209-15-3. There has been set aside for Depreciation Rs. 4,11,681-4-3 and a sum of Rs. 1,62,448-9-0 has been written off Investments to reduce short-term holdings to their par value.

Transfers have been made to—

	Rs.
General Reserve	1,00,000
Reserve for Revaluation of Stocks and Stores ..	1,50,000
Debenture Redemption Reserve ..	2,50,000
Reserve for Labour Quarters and Welfare ..	50,000
Indian Workers and Indian Staff Pension Funds	40,000

The balance remaining after giving effect to these transfers is Rs. 6,27,080-2-0 which, together with Rs. 1,63,245-7-7 brought forward from last half-year, gives a total of Rs. 7,90,325-9-7.

It is proposed that the balance available for distribution be disposed of as follows:—

	Rs.	A.	P.
In paying a Dividend on 1st Preference Shares at the rate of 8 per cent per annum, without any deduction for Income-tax paid by the Company	46,000	0	0
In paying a Dividend on 2nd Preference Shares at the rate of 5 per cent per annum, without any deduction for Income-tax paid by the Company	37,500	0	0
In paying a Dividend on Preferred Ordinary Shares at the rate of 10 per cent per annum, without any deduction for Income-tax paid by the Company	21,875	0	0
In paying a Dividend on "A" and "B" Ordinary Shares at the rate of As. 8 per share, without any deduction for Income-tax paid by the Company	3,50,150	0	0
In paying a Bonus on "A" and "B" Ordinary Shares at As. 4 per share, without any deduction for Income-tax paid by the Company	1,75,075	0	0
In carrying forward	1,59,725	9	7
Total ..	7,90,325	9	7

Commercial Products, Ltd., has been formed as a subsidiary of Titaghur Paper Mills Co., Ltd., to handle the sales of the Company which are subject to tax under the Bengal Finance (Sales-tax) Act, 1941, and the Company has been registered as a dealer under the Act.

During the period under review the mills have continued to work at maximum capacity, but a strike of the labour at No. 2 Mill, Kankinara, from the 26th September to the 7th October, seriously curtailed the production of pulp and paper at that mill. Those responsible for this trouble took it upon themselves to stop the machinery and plant of the mill and prevented the loyal workers from carrying out their duties. The Directors would point out that the workers of the Company are relatively well paid, that their wages were never reduced notwithstanding the difficult times through which the Company passed during the slump many years ago, and that the establishment of the Workers' Pension Fund and the Co-operative Credit Societies at the mills has proved to be of great benefit to all employees of the Company. Every worker with an unbroken record of loyal service is eligible for a pension according to the provisions of the scheme.

Increasing demands have been made on the mills for large tonnages of paper by Government and the Army. In the general interests of the war effort, priority has been given to these demands. It is now apparent that there is a considerable shortage of paper in this country and it is incumbent on all consumers and users of paper to economise in every direction possible.

Costs continue to rise on account of the general increase in the prices of coal, materials, of all kinds, chemicals, machinery, spare parts, etc., and difficulties are being experienced in obtaining adequate supplies of certain chemicals and other items vitally necessary for the production of pulp and paper.

It has been considered prudent to increase the Reserve for Revaluation of Stocks and Stores by a further Rs. 1,50,000 in view of the increasingly heavy stocks of stores and raw materials and the slump in stock values which must be expected ultimately.

Managing Agents.—Messrs. F. W. Heilgers & Co.

Authorised, Issued and Subscribed Capital—Rs. 65,89,000 in 3,50,000 "A" Ordy., 3,50,300 "B" Ordy., both of Rs. 5 each, 1,75,000 Preferred Ordy. of Rs. 2½ each, 15,000 5 per cent Cum. Pref. of Rs. 100 and 11,500 8 per cent Cum. Pref. of Rs. 100, all fully paid up.

THE BELAPUR COMPANY, LIMITED

Audited accounts for the year ended 30th September, 1941:—

There is a net profit, after charging Rs. 42,223-14-11 for Depreciation of Rs. 6,69,883-8-2 and which together with the balance brought forward from last year's Profit and Loss Account of Rs. 33,756-4-9, leaves an amount of Rs. 7,03,639-12-11. To this has to be added the sum of Rs. 1,25,000 from the Reserve against Investments, making a total of Rs. 8,28,639-12-11 which the Directors propose to dispose of as follows:—

	Rs.	A.	P.
(1) Dividend at Rs. 7 per share, free of income-tax, on the shares of the Company as at 1st December, 1941	5,26,372	0	0
(2) Reserve for Income-tax, Super-tax and Excess Profits Tax	2,60,000	0	0
(3) Reserve for Crop Insurance Fund ..	15,000	0	0
Balance to be carried forward to next year	27,267	12	11
Total ..	8,28,639	12	11

The Old Factory which had again to be put into commission after a thorough overhaul, worked during the season and towards its end the building and machinery were sold.

The few remaining essential parts for the New Factory arrived during the current year, but too late to permit of the plant being worked last season. The finishing touches are now being put to the plant, and crushing is expected to commence about the middle of next month.

It is to be regretted that very considerable trouble was experienced with Labour. A lightning strike was declared by the Balapur Kamgar Union on the 27th May last. The demands put forward being of an unreasonable nature, the directors had no option, but to refuse to consider same. Work was resumed on the 1st August, and this lengthy stoppage resulted in the crushing season being curtailed; an area of some 400 acres of cane, which would ordinarily have been crushed, had to be left standing in the fields, with a consequent loss in sugar production. The loss to which the Company was put is substantial, but in an endeavour to maintain the standard of efficiency which has been shown in the past, the Directors had no option, but to face the situation in the manner they did.

The growing cane on the 30th September, 1941 was 5,147 acres 35 gunthas. The crop has undoubtedly suffered as a result of the strike, but everything possible has been done in an endeavour to maintain an average outturn.

Managing Agents.—Messrs. W. H. Brady & Co., Ltd.

Authorised Capital—Rs. 40,00,000. *Issued and Subscribed—Rs.* 37,59,800 *in* 75,916 *shares of Rs.* 50 *each.*

Synopsis of the Balance Sheet as at 30th September, 1941:—

Liabilities			*Assets*	
		Rs.		Rs.
Capital paid up ..		37,59,800	Gross Block ..	63,05,912
Reserves ..		18,05,143*	Depreciation ..	27,20,350
Current debts ..		11,98,287		
Carry forward ..		27,268	Net Block ..	35,35,562
			Stores & Spare Gear	4,71,650
			Tools & Implements	4,465
			Stocks ..	14,010
			Crop-in-Progress ..	11,72,507
			Outstandings ..	2,93,627
			Investments ..	11,70,861
			Cash Balances ..	1,27,236
Total ..		67,90,098	Total ..	67,90,098
			Total liquid assets ..	32,54,536

*Includes Provision for taxation—Rs. 8,27,643.

BIRLA JUTE MANUFACTURING CO., LTD.

Audited accounts for the half-year ended 30th September, 1941:—

The accounts show a profit of Rs. 15,54,263-7-2. After providing Rs. 10,93,400-15-1 for Commission, Depreciation, Taxes, etc., and transferring Rs. 1,00,000 to Reserve fund and making sundry adjustments there is a balance of Rs. 3,79,773-15-5 at credit of Profit and Loss Account.

The Directors recommend:—

	Rs.	A.	P.
Dividends on 23,642 Preference Shares at 7½ per cent per annum, less income-tax ..	70,187	3	0
Dividends on 2,43,360 Ordinary Shares at 25 per cent per annum (or Re. 1-4 per share)	3,04,200	0	0
The balance to be carried forward	5,386	12	5
Total ..	3,79,773	15	5

It is gratifying to note that the results of the past half-year are better, but, due to the fact that a large amount has to be provided for taxation, additional benefit does not go to the shareholders.

‡ Arrears of Dividend on Preference Shares Rs 10,38,000. Depreciation Fund Included Rs. 12,77,54,965 (a) Bearer bonds of Rs. 500 each issued at par in July, 1938, repayable as per tunes at any time after 30th June 1938, on 3 months' notice. The date for repayment was extended to 30th June, 1958, with option redemption in whole or in part at par on January, 1946, or thereafter after 30th June 1948 and the rate of interest reduced to 5 per cent per annum tax free. (b) Issued at par on January, 1936, repayable at par on 31st December, 1944. (c) Shares numbered 1-6,000 have priority over any class of share regarding repayment of capital. For dividend purposes both classes of preference shares, rank equally. (d) Issued at par on 13th November, 1922, redeemable at par on 31st December, 1941. Option redemption in whole or in part on any interest date (e) After 5 per cent. on the ordinary Shares eligible for one half of the surplus profits Ordinary Shares rank before the deferred Shares in respect of repayment of Capital. After deferred Shares eligible for one half of the surplus profits as dividend equally (f) Issued in December, 1936 at 98 per cent. redeemable by operation of sinking fund of 1½% per annum. Commencing in 1941 Option redemption in whole or in part at par on 31st December, 1936 repayable at par 31st December, 1961. Option of redemption 31st December, 1966. (h) Issued at par on 31st December, 1936 repayable at par 31st December, 1961. Option redemption. In whole or in part at 5 per cent. premium on any interest date after 31st December. 1943 after six month's notice. Option to holders for conversion into fully paid ordinary Shares at £1-10s. of Convertible Stock upto and including 1943. Converted ordinary Shares rank for dividend in the following year after conversion. Interest is paid at 4 per cent. in respect of year on which option was exercised (j) After 3 percent on ordinary Shares eligible for half of the surplus profits (k) 4½ per cent guaranteed convertible registered mortgage debentures (unconditionally guaranteed as to principal and interest by the Indian Iron & Steel Co., Ltd.) Issued at par in May, 1937, repayable at par on 1st January 1967, option redemption in whole or in part at 2 per cent premium on six months' notice on any interest date after 1st January, 1947. Option to holders of Rs. 10/- each. (l) Entitled to a non-cumulative dividend of 25 per cent. per annum, after the dividend on preference shares and 3 per cent. on ordinary shares (m) Redeemable at par on any interest date after 1944 with the option of redemption after 1940. (n) Includes 1 per cent being arrears for 1937-38.

Vol. XXVIII. No. 26 SATURDAY, DECEMBER 27, 1941 Price Re. 1

SECRETARIAT LIBRARY 31 JAN 1942 GOVERNMENT

Insure and Increase Nation's Strength

Financial Independence of the individual is the measure of Nation's financial strength.

In this hour of world turmoil, all Life Insurance Policy-holders should take stock of their insurance cover and ascertain just how strongly they are fortified against the unpredictable that lies ahead.

And, those individuals who have not yet made provision for their protection need do so without delay and thereby contribute towards Nation's strength.

Be advised and write to-day to

NATIONAL INSURANCE COMPANY,
LIMITED.

Editorial Comments

Progress of Co-operation

Five years ago appeared the first report of the Agricultural Credit Department of the Reserve Bank of India, on the problem which the Legislature committed to our central banking institution as its special care. The creation of this department is the first manifestation of the Bank's recognition of its obligations in this regard. And the publication of this annual report remains so far the only concrete result of the activities of this Department. On a problem like co-operation in India, one must be on guard against commenting glibly on other people's sins of omission. The problem has long been a kind of Sphinx's riddle, with the difference that those who fail to solve it have nothing to fear. The solution of this problem was not one of the purposes for which the Reserve Bank was first contemplated by the Government. But once the Legislature commended it to the Bank's special care, one is entitled to expect that as each year passes, there will be some distinct, though not appreciable, progress made towards its solution. At the moment, one can note nothing more than the difference which the new publication show between the free reporting of a public institution and the bald and colourless tables and statements of an official blue-book.

The Review of the co-operative movement in India in 1939-40 has thus certain distinct merits. The year chosen is appropriate for several reasons. One can judge the impact of the war, apparent already in the fillip to consumers' co-operative societies, more easily in later surveys: one can also see what the efforts in the recent past towards rehabilitation of the movement have procured so far. If one can judge by the slow and small rise in the capital resources behind the movement, there is hardly any justification for the smug foreword of Sir Manilal Nanavati.

As to past accounts of co-operation in India, of which there are many, no reference is made at all because it seeks to interest a very narrow circle of students, who are specially interested in the statistics of the movement. It is, of course, a great improvement as has been mentioned, on the official publication presenting statistical tables relating to the co-operative movement in India, a movement 37 years old, but essentially immature compared with Ireland or Denmark. The Reserve Bank's publication by analysis and tabulation of recommendations made by committees of inquiry which have investigated the setbacks suffered by the movement has made it possible for one desirous of knowledge to get it from a clear, carefully compiled book of 80 pages. That certainly is not the sole merit of the publication, which seeks to show that the popular ministries which succeeded the Transferred Halves of the depression period evinced a desire to control credit and revive co-operation. One cannot, however, draw much comfort from it. In there is also the admission that the agriculturist benefited by debt relief legislation is less inclined to avail hismelf of the slow, more exacting benefits of co-operative finance. There is a similar mixed showing in other respects, too. If the report stresses the movement's independence of state initiative or State funds there is also the abject helplessness of societies in the face of the Department. Handloom weavers have of late received the benefits of Supply Department orders; but the real credit goes, as in Bombay, to the Industries Department and not the co-operative agency. That weaver's co-operative societies are strong at present is not at all surprising when jail industries are flourishing and convict labour constitutes a menace to free workmen.

There is indeed much in the review to suggest that the present is a period of consolidation. But it is too early to count the chicken. The statistics show that the total number of societies in 1939-40 rose to 137.000 while the working capital improved to Rs. 107.1 crores and the membership to 6,080,000. Much of this was achieved by the Ministers' efforts, but the vital impulse has been assuredly lacking in the Adviser regime and the report can only underline the familiar yet melancholy conclusion that the organisation of agricultural credit falls short of admitted requirements. The 118,744 societies with 4,100,000 members and working funds of Rs. 30.5 crores had by no means the ability or the skill to finance or develop agriculture because the individual society's capital is small and deposits more often come from co-operative central banks which endanger autonomy. It is frankly admitted that reserves are slender, and in some cases, illusory. The regular flow of deposits has hardly begun and in many cases the urban depositor has only replaced the village Mahajan. The proportion of overdue debts at the end of 1939-40 was nearly ha'f out of the total loaned funds of Rs. 23.14 crores. This again masks the true position which is admittedly bad in the C.P. and the U.P. If the Punjab and Madras are excluded, the co-operative movement would appear as a crazy pavement, cracked at vital points, and scarcely worth mending. If repayments in 1939-40 at Rs. 7.96 crores exceeded fresh advances totalling Rs. 7.44 crores the actual margin is 2 per cent and it is not known how much of the fresh advances were old debts disguised under new contracts.

The co-operative movement's ability to provide fresh capital has constantly shrunk; because new money, in spite of unusually low rates of interest outside, is not attracted to the movement. The remedy, one might urge, lies in devising links beween commercial banks and agricultural credit or in the establishment of agricultural mortgage corporations bigger and better than the anaemic land mortgage banks of official creation. The liquidation figures are depressing in the extreme. The expansion in societies and members can only be evaluated in the light of what follows. The debt legislation enacted in several provinces is said to have created difficulties. It is not only in the Punjab that the co-operative society is a fully protected creditor. There is the overriding consideration that there must be adjustment of debt in relation to ability to repay and if freezing of debts has in some cases followed it is the fortune of war.

The imposing array of figures relating to banks and banking unions should indicate that the movement with its working capital of Rs. 29.21 crores (of which the share capital came to Rs. 2.65 crores and the reserve and other funds to Rs. 4.2 crores) is not to be overlooked in any examination of how capital is maintained and enhanced in India. The gross figures naturally conceal the defects in management and policy. Not all the 600 banks are solvent or stable, and the excessive proportion of advances (as much as 90 per cent of borrowed funds) is proof of vulunerability.

The apex banks are in better condition, and if it were not for the lack of provincial banks in the U. P. and Orissa one might say that the co-operative pyramid is standing firm, at least at the top, if not the base. The eight banks enjoying latterly remittance facilities similar to those accorded to Scheduled Banks controlled Rs. 13.41 crores and obtained only Rs. 6 lakhs by way of loans from government. A strict examination would probably reveal dead wood among the assets. The cash ratio is at 3.8 per cent is also disappointingly low, and if produce loans totalling Rs. 31.5 lakhs are considered one might deduce that the bare fringe of produce finance has been touched so far in spite of persistent preaching and protracted discussion.

Neither the statistics nor the remarks contained in the Review furnish any evidence of improvement in the innate capacity of the movement to vitalise itself or of the progress of plans to infuse life into its palsied limbs. Official comment has from the beginning of British rule been content with exhorting co-operation to lift itself by its bootstraps. Five years of the Reserve Bank's solicitude for co-operation should suffice to show that the problem of its progress is bound up more closely with the problem of economic regeneration and reconstruction in India. Much depends, obviously, on the economic conditions and political status of India after the war; and reviews which should normally occasion more or less passionate comment are only to be perused with a measure of mental detachment.

Risk of Invasion

Mr. Churchill's hurried visit to Washington is the true measure of the gravity of the Far Eastern situation. If Mr. Amery talked at random about the strength of Singapore and the light tasks falling on the Indian navy others have better knowledge of the period to which it is exposed. The disaster of December 10, when two capital ships went down to Japanese bombers still dogs the British defence of Malaya. It is now clear that the downward swoop on Malaya has led to the loss of both north-east and north-west Malaya. If the Dindings are held other parts of the Straits Settlements have fallen quickly enough to Japanese attack. The fine port of Penang may even be equipped for naval operations. It is clear that four of the Malay states have been overrun whether the railway junction of Gemas leading to the south and hence to Singapore will be reached is uncertain. What the situation has created in Australia may be guessed from the demand for special representation for the Commonwealth alongside of the Resident Minister connected with the War Cabinet and also from the swift promotion to Lieutenant-General's rank of Major-General Laverack. The Australian defenders of the southern part of Malaya have certainly a big task since the enemy is bold and resourceful and can make use of the Thai navy (not to be despised at all) also in the smooth waters of the Gulf of Siam. It has been learnt that not long ago the Japanese had set afoot plans to link Siam's railway with the Indo-China system. A direct object of this scheme was to link Bangkok with Hanoi so that control of Malaya's railway would become easy and facilitate invasion by land of Lower Burma. The more important result of such direct extension, first of Indo-China's railway and later of Thailand's system which is connected with Malaya is to make possible the execution of the Kra canal. It is known that Japanese engineers had plans to cut the 20 or 30 miles of land below Victoria Point. The early capture of the southern corner of Burma makes it certain that the Japanese may well make an effort at canal-cutting.

Mechanised forces must contain excavators and dredgers and the gravel of the isthmus may not be refractory for the engineers. The Japanese are also credited with a desire to run a railway up north to touch the Burma railway leading from Rangoon to Mandalay. The purpose is plain enough. The plan seeks to make a direct thrust at the Burma-Yunnan road and make maximum use of Indo-China and Thailand in the Japanese strategy. Vichy's neutrality does not imply that the railway from Haiphong towards China will not be completely under Japanese control. The Japanese are decidedly afraid of Singapore. If they cannot reduce it by main force they are prepared to use other routes towards Burma which is an oil-producing country, and hence more valuable than Malaya in Japanese eyes. It would be enough to deprive Britain and U.S.A. of essential tin and rubber supplies and march forward into Burma. It has been said in the past that Britain has often forgotten the railway, the road and the war in turning down China's claim for British assistance. There is now a danger that in placing undue faith in Singapore and the fleet the British may make a similar mistake. It is, however, beside the point to exaggerate the peril to India at present. Sir A. Wavell gave an assurance at a press conference last week that adequate forces are available to meet any threat, and the Burma Government has said openly and often that Burma is prepared.

Employer's Responsibility

The industrial achievements of two years have been summed up variously and frequently but not with such conciseness as by Sir A. R. Dalal in his address last week to the Employers' Federation of India. Supply Department orders worth Rs. 20 crores are coming every month and this cannot but have stimulated Indian industry. We know that a large number of articles not previously manufactured in India are now being made here and a large volume is also being exported. A number of new minor industries have sprung up, but the difficulty of securing machinery, machine tools and many of the raw materials has placed a severe handicap on the expansion of Indian industries. It is not for its just realisation of recent achievement that men will pause to read over again Sir A. R. Dalal's unpretentious survey. It is for the indication that India's businessmen are looking beyond the evils of the present. If Sir A. R. Dalal's complaint regarding fiscal policy has a familiar ring, there was justification for the reiteration of the argument that industrial development will not prejudice India's export trade. Official views are slow to change, and it is always opportune to show that neither exports nor imports will fall merely because protected industries are growing up.

The Viceroy's reference to the perils of inflation found an echo in Sir A. R. Dalal's mention of the difficulty experienced by employers to link up every advance in the cost of living with wage rates. The War Injuries Ordinance has obviously met with approval. The other piece of legislation mentioned was the Mines Maternity Benefit Act prohibiting the employment in mines of a woman during four weeks following delivery and for payment of maternity benefit to her for four weeks before and for four weeks after delivery. The question of compulsory holiday with pay is still under discussion but points of disagreement have apparently emerged after the publication of the draft Bill. It is to be hoped that Central legislation may be enacted, and the forthcoming conference of provincial representatives with the Labour Member proceded by an informal meeting as Sir Ardeshir suggests should help to produce similarity of views on sickness insurance and industrial fatigue, produced by the extension of working hours permitted, for instance, in cotton mills. If the establishment of an industrial council still seems a remote ideal it is well to recall that the Chairman repeated Mr. S. K. Sinha's suggestion for the co-ordination of labour Legislation of an inter-provincial council under Section 135 of the Government of India. It is noteworthy that there is no trace of the polemical element in the very judicious and balanced survey. The question of industrial peace found hardly any mention for the war makes it necessary to seek unity in the face of difficulty and disagreement. Labour leaders who are naturally sympathisers of Russia have found it easy to advocate full co-operation with the war effort. And voluntary payment of bonus as, for instance, by the Bombay mills will blunt the edge of arguments against the provision of a due share of war prosperity for labour by employers. The loyal acceptance of awards by conciliators and tribunals inquiring into labour disputes has made it unnecessary for Sir A. B. Dalal to discuss what is possible and acceptable and what is not. The fact that strikes are noticeably less frequent and numerous this year may be taken to support Sir Ardeshir's avoidance of any mention in his speech of employer's relations with workpeople except for insisting on the duty to work and perhaps save, also for victory.

Cotton Outlook

Bombay thinks cotton and feels cotton now as much as ever. The form of the cotton market is the best guide to the Bombay situation. Interest therefore attaches to the address of Sir Purshottamdas Thakurdas to the members of the East India Cotton Association. Futures trading, unitary control and clearing arrangements are not subjects of special importance. It is the duty to help the cotton-grower. Though Mr. G. V. Deshmukh's resolution was negatived by the Central Assembly last month, it is necessary to remember that cotton, in Sir Purshottamdas' phrase, is an orphan and entitled to all possible help. That wagons are made available, so that ready cotton can be delivered and a premium secured, was mentioned by the Chairman in order to show that the Bombay Government has persuaded the railways to provide wagons or to encourage road transport for the time being. As regards the cotton outlook, he was commendably brief. U.S. mill consumption like the price controlling controversy has ceased to impress the market. The fact that interest in the Broach contract has widened further may be taken to mean that the market is really keen on staple cotton needed for making cloth needed for India and many export markets too at present.

Sir P. Thakurdas has assured the cotton-grower that demand for staple cotton will continue so long as mills are busy. In regard to fair and short staple varieties the position is recognised to be different. The loss of trade with Japan must be reckoned with. It was, therefore, salutary advice that he gave. Food grains are preferable to cotton. Crop restriction should be the guiding policy and it will be otherwise beneficial in increasing the food supply. Sir Purshottamdas endorsed the view that the way to help the cotton-grower is to make him reduce the area and grow other crops, if this can be done without any loss to the tax-payer. The example set by the Bengal Government in regard to jute is always present in one's mind, particularly, in view of the reference to early and successful propaganda. The cotton grower should be in a position to reduce next year's acreage. Soil conservation, processing difficulties and similar arguments may not convince him. If present prices are not characteristic of a slump it should be remembered that market weather is temporary and largely artificial. It is essential to remember that a large part of India's cotton crop will hereafter have no market, mainly because of the war, and the best thing to do is to grow food crops. Where long staple cotton can be grown as in Sind and the Punjab an extension of acreage will be viewed as desirable. Sir P. Thakurdas has given his reading of

To withstand the immense strain imposed on them, the smallest of details in modern structures are made of steel.

Across the seven seas the floating fortresses churn their way. Immense, imposing structures dedicated to protection and, when necessary, attack and destruction. In them is concentrated the marine art and invention of generations.

But where to-day those Gleaming banks of guns throw their shadows across the ocean, to-morrow the happy keel of cargoboat and merchantman will cleave the seas.

Just as to-day Steel serves with its strength, to defend the battleship to give it invincible might; to-morrow, Steel will give dependability to the argosies of men, giving wings to the narrow bows as they cleave the waters.

Always—Everywhere—Steel for Strength

the situation in unambiguous language. He has indicated also that a change from cotton to food grains will not hurt either the grower or the country and has said that if necessary any direct encouragement should be given in the shape of a small bounty.

Self-Sufficiency Nearer

The Indian Medical Stores Department bought locally from Indian concerns in 1940-41 as much as Rs. 104,44,287 worth of goods as against Rs. 24,51,798 in 1939-40. The enormous increase in purchases is a result of the war. The Medical Stores Department having lost oversea suppliers immediately turned to its own depots, and Indian companies as well to provide the goods needed. As many as 350 items are made at the depots out of local raw materials. Special dressings are also made at these factories. Production has expanded rapidly as all available plants and products are being harnessed to the manufacture of drugs. Depots turn freely to local supplier and preferential terms have been offered as the usual objections are held to be of no consequence. Local manufacture has been directly stimulated as a result. Many articles difficult to make and get are being turned out locally. It is not surprising to hear that chloroform, lysol and amyl nitrate are among the new products of Indian origin. Their manufacture has been occasioned by the war and marketing is a problem that does not arise at all. Ether needed as an anasthetic is being produced at the rate of 15,000 lbs. a month. Progress may be measured by comparison with the pre-war output of 1,500 lbs. a month. What the Director General of Medical Services, Sir Gordon Jolly I.M.S., has accomplished is not to be found in the recruitment figures for the military medical services but in the new, unusual items made for hospitals in India. The manufacture of caffeine citras has begun. The wonder is that India which grows both tea and coffee did not produce the article sold by Dutch and German firms. Tea waste is sold by planters and cheap caffeine is available for medical requirements. The making of pot. permanganate, the all-purpose cleanser, has begun on a large scale. Indian manganese, creosote from wood distillation plants and nikethamide, a derivative of nicotinic acid, enter into its making. Indian starch has led to the making of Indian glucose on a large scale. It is only in respect of alkaloids that progress has been limited. Strychnine is India's monopoly and emetine hydrochlor, is now being produced successfully. Atropine has been recently taken up and a trial order has been given. Making ethyl chloride did not present as much difficulty as the making of the necessary glass containers, provided finally by a Calcutta firm. The urgent demand for morphine has been satisfied again by local production successful in a few months.

The best indication of progress is the rather sweeping statement that India produces in a year about 175,000 gallons of tinctures, extracts etc. This enlarged output, tested for purity and potency at the instance of the Department itself, owes much to the policy of the Medical Stores Department. Indian medicinal plants have been drawn upon to provide essential drugs once it was known that therapeutic action was identical. Hydnocarpus trees have been grown in Indian and a specific

East Indian Railway

TENDER NOTICE

Special item costing over Rs. 5000|- Class I Contract.

Sealed tenders are invited for the following and will be received in the Controller of Store's Office, East Indian Railway, 105 Clive Street, Calcutta, up to 12 o'clock noon on 5.2.42.

Tender No. S|Gb2|594|B for the supply of Wick holders with Sockets 'Barton' type ⅜ inch with 8 inch long wick.

Tender forms with full particulars can be had from the Office of the Controller of Stores, East Indian Railway, Calcutta, and on production of his receipt when applying for the same.

Firms outside Calcutta, however, remit the amount to the Controller of Stores direct by Money-Order. Once this document is issued, no refund is permissible.

for leprosy is available to the leprosy clinics. The Madras Medical Depot houses the largest factory in the East for the extraction of the ethyl esters of the oil. Incidentally its cost has been greatly reduced. In regard to other oils the Medical Stores department has been a large and ready buyer. Sandalwood oil is a long-established Indian speciality, but of other essential oils production has been scanty and sporadic. Eucalyptus oil of Indian provenance, if it is not up to B.P. standard, is not unacceptable to the Dept. which is buying large quantities. Many other oils are and will be in demand for medical purposes what may be called a novelty is shark liver oil valued for its vitamin A. present to a greater extent than in cold liver oil. The 80 year old industry on the West coast has sprung to life again and is likely to develop as an export trade may be built up.

Canning Progress

The canning industry has received a fillip through the war. Suggestions for its further development are frequently made. One such is that of the Agricultural Marketing Adviser asking for a trial of a mobile cannery with the plant installed on large sailing or power driven boats. It is not generally known that Indian fishermen at present are handicapped by the fact that migratory fish develop irregular habits in Indian waters. The shoals do not come at the same time every year and it is not easy to carry the catch to a cannery on shore in time to avoid damage. Hence the idea of a mobile cannery should catch on. India was importing canned fish worth over Rs. 10 lakhs every year. Supplies came from Britain, Canada, Norway and Japan. Nearly all these sources have dried up, and the Indian canning industry is therefore presented with a valuable opportunity. In regard to the canning of fish Madras certainly has been a pioneer. The Government opened a small experimental factory in Malabar in 1911. It was ascertained that besides sardines packed in oil pomfret, salmon and prawns could be canned. The Chalayam factory however, was not flourishing at any time and its sale in 1933 to a private party alone helped to put it later on its feet. It has since been re-equipped and the canning of fruits and vegetables is also being carried on. Small lots of sardines and mackerel have been prepared. Two other canning factories in Bezwada and Bombay dealing with fruit mainly so far have made efforts of late to can fish also. The catches of Indian fishermen total over 2 million maunds and 60 per cent. consists of fishes adopted to canning. Mackerel leads, but many other Indian fishes can go into tins and help fishermen over the idle spells to which they are condemned. Canning deserves encouragement also in view of prospects opened up in the U.S.A. for Indian shrimp. The rupture of commercial relations with Japan should create a market for crab and prawns exported from India. The major difficulty however, will arise from the inadequacy of tin plate for manufacturing the necessary cans. Here too U. S. assistance in time should lead to a solution of the difficulty that may arise. Refrigerated transport may be unnecessary if points on the coast are equipped with canning plants. A more important consideration at present is that canned goods may prove more acceptable to troops serving overseas.

Malaya's Danger

There have been significant references to rubber in the last few days. The absence of dealings in London like the non-appearance of spot and forward quotations in the paper may suggest that the market is hibernating. It would however be a mistake to imagine that rubber's importance has fallen off on that or any account. The war in the Far East has raised its importance greatly for the threat to Malaya and the Dutch Indies is in the first place, a threat to natural rubber production. The U.S.A. which consumes normally half the world production of rubber of a million tons or so, is greatly interested in places beyond the Philippines, because that country imports two strategic materials namely rubber and tin from the British and Dutch Colonies. It has been said by the "Manchester Guardian" recently that of 21 war essentials which the U.S.A. lacks, 12 come from the new war zone, and in the case of seven of them, it has supplied more than 70 per cent. of her imports. Britain's own dependence is equally marked and that is why the economic aspect of the war has to be considered. Japan's own dependence has been lessened, to a considerable extent, by easy infiltration into Indo-China and Thailand. Rice, tin and rubber like timber will be provided by Thailand, now ranged against the A.B.C.D. powers in alliance with Japan. There is no need to believe that the tin mines of Perak are lost but the production must suffer seriously. If the price of tin is unchanged and tin shares even in Calcutta are weighed down by unusual gloom it is to be ascribed to the difficulty of telling just how and when the Japanese invasion will be halted.

There is also the consideration that export trade on which Malaya depends to a high degree will be dislocated by the war. The sudden outbreak of war means perhaps the loss of some cargoes 'en route' to Britain and America. There is also the possibility that Japan's new merchant liners may be converted into commerce raiders. Trade with Canada the U.S.A. and Australia will certainly become difficult for Britain and the Empire. The mention of enemy submarines off the Pacific coastboard acquires ominous significance for U.S. defence production. The "Manchester Guardian" concluded that even if shipping losses are small traffic is bound to fall. This calculation certainly guides the Calcutta hessian market in its appraisal of current prospects for the gunny trade. Reference may also be made here to the serious danger to Singapore's trade. Singapore a free port serves a far wider hinterland than Malaya. It is not only the naval base that is at stake but the vast trade of the port typified by the existence of many Chinese multimillionaries. A great shrinkage of trade must be anticipated and one can directly relate the jump in the prices of imported goods locally to the sweep of war to the Straits of Malacca.

Gold Production In Mysore

The annual production of gold in Mysore amounted to 28924.709 ounces and that of silver to 23298.45 ounces. The total value was £2,445,705 and the total demand under the new excise duty on gold was Rs. 20,10,256. The report issued by the Mysore Government contains details as to the nature of the Kolar mines. The deepest working on the Kolar field is said to be 8,866 feet vertically below the field datum (2,967.21 feet above the Madras sea level) and the rock temperature in the Ooregaum mine at the 91 level, 8,532 feet vertically below the field datum is 137.5 degrees. In the mills attention is paid to the provision of cool air at all working points and electric or air-driven fans are in general use. There was no case of heat extension during 1940 says the Chief Inspector of Mines. The erection of the Gifford shaft winder in the champion mine which is one of the largest winders in the world was completed. The mining industry employed 29,035 persons. The strike last year resulted in no damage to person or property. The total number of accidents reported during the year was 246. The fifty-year old Kolar mines which Wilfred Blunt saw in Lord Ripon's time are among the most famous deep-level workings in the world. Their gold production is by no means at an end if dividends declared in 1941 have not been up to expectations.

G. M. And N. D. C.

Many things are keyed up to the war effort nowadays. The demands of A. R. P. have also to be considered. The National Defence Council has begun its tour of industrial establishments which have become important in the country's war effort already. The newsreels made the Viceroy's visit to the Sewri plant of General Motors (India), the subject of a special short dealing with the manufacture of lorries for war use. The result on audiences was both pleasing and correct. A smaller, more select audience was confronted more recently with the assembling plant which employs 3,000 workmen and turns out a hundred vehicles per diem. It has been claimed that the score of National Defence Councillors saw Chevrolet vehicles of various types being got ready for the various theatres of war. Shell production is a new interest of the Corporation which in America turns out aero engines including Pratt-Whitneys and Allisons in addition to machineguns for the defence programme. Being on war work the factory has to guard against unpleasant contingencies. The staff is well up in A. R. P. work as the visitors learnt through the demonstration provided on the spot. It is self-contained, because it has its own shelters and equipment. The safety of workmen and plant alike is the first concern of the G. M. plan for preparedness.

Another Christmas, the third of its kind in succession, is soon to dawn on a world at sixes and sevens. Hardly a country left which may be deemed an oasis of peace. All the continents, both the hemispheres, and all the oceans are sucked in into the maelstrom of modern warfare. Countries that have seen the worst, though hardly the end, of the ravages of war; and countries which live in grim expectation of them—there is no third category worth speaking of. In what spirit will such a world welcome the season of cheer and goodwill? And yet it would be either hypocritical or suicidal to cherish feelings of goodwill to those agents of evil who have brought war and pestilence on the people of this hapless planet. You may wish them well in the next world. But so far as life on earth is concerned, there is, for the moment at least, an end to all hopes of warring people living side by side in peace and prosperity. Between the extinction of the enemy and allowing him to extinguish you there is hardly any half way house worth speaking of. The world as it is to-day augurs loudly and effectively against peace and goodwill as we have thought of them so long.

And Chirstmas is a season closely associated with feelings of goodwill. In that sense, more than any other, the world was never more un-Christian than it is to-day. Never before in the long life of this planet, did Mars gain such complete ascendency over earth, over land and water and the air around. The world war, of which we heard so much in the past is to-day a grim reality. And whom shall we reserve our goodwill for? Praying for the sinner is a religious idea. The man who prays gets a feeling of exaltation. He hardly stops to think whether the sinner may not be in the right. Indeed, religion attaches more value to the idea of reclaiming the fallen, than to stabilising the good. For the prodigal is the fatted calf. There is more rejoicing in Heaven when a sinner is reclaimed. That is all very well. But its application to the political world is by no means easy. We do apply it in a crude way. When the war broke out the democratic peoples fondly clung to the notion that the war is of the dictators' making and that the people were not behind it. They were un-Christian enough to call cures on the heads of Hitler; but in a devoutly christian spirit they prayed for the peoples of Germany. That distinction between rulers and ruled, the last two years of the war have all but proved to be an illusion. I was talking once to an eminent professor now in Government service. He was toying with the old distinction and pleading for better treatment of the German people after the war is over. But I pointed out to him, "well sir, it was the Kaiser twenty and odd years ago It is Hitler to-day. It may be another Hitler tomorrow. But the German people is the common factor". "Yes", he said "yes, Germany is a mad dog let loose on the world". I was only putting forth a point of view. I always remember Burke's warning against incriminating whole peoples. Nevertheless there is a great deal of truth in the argument that the German people is the common factor in all the great wars of the last half a century.

Shall we, as Maurice Maeterlinck said during the last war, shut the gates of mercy on the German people. The question is at any rate premature and practically unimportant. But it is not without relevance to the mental calm and composure appropriate to this season of goodwill. Whom shall we reserve our goodwill for?

Why, for the forces of goodwill, of course. No matter on what side they may be found. Good and evil alike have their active and inert aspects. Not all the goodwill in the world exerts itself in action. And if all the evil-minded were active they would have long ago won the battle against good. A world war may be viewed as the clash between the active elements in both good and evil, though it is also true that neither side is wholly good or wholly evil. The complexities of any objective situation always confound those who are unduly ethical in their attitude to life. The dilemma of the Congress is a case in point. But the good old prayer that all the worlds may be happy, inane as it may seem, provides a pleasant idea.

Never did the ordinary individual stand more in need of the prayers of the devout. The last war taught us to give more reverence to the unknown soldier than to the world-famous general. But when this war is over, the tributes will probably be reserved for the unknown civilian who stuck to his post, not in a trench, or behind barbed wires, but in the farm and factory. The man who continues to turn the lathe, while the deafening bombs burst all around is not less of a hero than his compatriot who

enlisted months ago, steeled his heart againt all the trials and dangers of warfare and faced them without flinching. It is the unknown civilian that will come out with flying colours, whether in the camp of the victor or that of the vanquished.

Do we see in this process the path to permanent peace? If popular adoration turns from the general to the soldier, from the soldier to the worker in the munitions factories and from him in turn to the farmer that wrests morsels of food from a soil which has been a stranger to crop of any kind, can we hope that at some day in the future national heroes will come out of the ranks of peacetime statesmen? It is not altogether a fond hope. That some of the national heroes of the past had little to do with war is no argument in this respect, for the taint of war has ever lain thick upon nationalism. Even those famous statesmen, who apparently had little to do with war, had engaged in predatory operations of various kinds. To loot another country without spending an ounce of ammunition is not quite an uncommon achievement in history. Many a popular politician has asked for such a course. Many a statesman can claim to have done it. But what I am thinking of at the moment is the kind of statesmen who will strike the golden mean between being aggressive and inviting aggression, exploitation of others and being exploited, between degrading poverty and demoralising riches.

Of such statesmen, the world has crying need. A world, in which there is both India and Germany as they are to-day, is a world of which peace can be a tenant at will of the God of War. The strength for large scale aggression on one side, the weakness that makes a country a prize for the victor—that is the basis of war. Of course the roots of war may be traced in different directions. They may be economic, political or crudely biological. Modern psychology has a lot to say about the mentality of dictators who are war mongers and of the men who follow them. Allied to it, but at the same time distinct from it, is the large educational problem of teaching men to be good and nations to be neighbourly. But it is idle to hope for an intelligent attack on the problem of war so long as large masses of humanity lack the power and the will to direct their social destinies. To the peace front that democracies must envisage, it is the so-called backward nations that have to make the largest contribution. Time was when it was thought that the war to end war could be won by the armed democracies and that peace and prosperity could be offered as on a plate to countries like India and China. That stage is long past. New democracies have to be constituted and armed if the war is to be won. That is the somewhat bitter truth that is dawning on the minds of British and American statesmen.

War and peace alike have to be won by democracies new and old. It is not an accident that the war started in China and promises or threatens to end in India. It is not a development without significance that the best minds in India are divided between co-operation in the war effort and dignified aloofness from it on the basis of non-violence. It is not mere ignorance that makes the ordinary working classes look with dismay on the clash between two foreign Imperialisms on their own soil. It may be that the Indian's is no real dilemma; a little thought may show that he ought to identify himself with the

"The British nation is stirred and moved as it never has been at any time in its eventful, famous history, and it is not hackneyed speech to say they mean to conquer or die."

WINSTON CHURCHHILL.

But they cannot conquer by will-power alone. They need machines, medical stores, munitions and an enormous amount of equally important equipment. We may not be in a position to give our lives, but we can all contribute at least some small regular monthly sum to the

EAST INDIA FUND FOR BRITISH WAR SERVICES

Send through Bank, Club or Employer, or direct to Hony. Treasurer, EAST INDIA FUND, IMPERIAL BANK OF INDIA. (Space kindly donated by the Imperial Bank of India).

Democracies. But the fact that India is the scene of the clash between two Empires shows that India is the precarious pivot of peace.

To say, as British politicians have often said, that India is the arsenal of the Empire, is only to present the converse, if I may say so, of the proposition that India is the pivot of peace. It is also a confirmation of the view I expressed earlier that the backward countries have to win the war and safeguard the peace thereafter. Indian cannot fulfil her responsibilities unless her status and power increase in proportion to her obligations. To view the Indian political problem as a matter of bargain between Britain and India is to miss the significance of developments in world politics. To urge that India is divided is to overlook the strength of social forces and to give undue importance to ephemeral parties and whimsical leaders. It is the peace front that matters; and there can be no peace which is not quite a desert of Fascist making, unless all peace-loving nations go to the war and win it too.

Japan, when she attacks India, aims at the Achilles' heel of democracy and peace. The cause of peace has suffered during the post war years from two serious defects. One is the refusal of political democracy to recognise its kinship to the economic democracy of communist Russia. The other is its failure to realise the place of the backward countries in the fight for peace. The war is purging democracy of both these evils. Russia is an ally of Britain and America. So is China. India alone is still a camp follower, not recalcitrant perhaps, but certainly sullen. She has to be an enthusiastic ally, if this war is to be won, not for this country or that, but for Peace. It is the peace front that matters. And there can be no better thought for this Christmas than that all goodwill be reserved for the forces of goodwill.

The segregation of smokers in railway compartments is not unknown, yet those who do not enjoy the company of smokers know not what they miss in avoiding the pleasant fumes of tobacco. The smoke of the burning weed like all smoke is bad for germs, and therefore definitely good for the human.

Smoke kills quickly. Incense has the best effect and smouldering cardboard has its points. But tobacco smoke, which is incidental to the smoker's enjoyment of his pipe, cigar or cigarette is also a good germicide. Somebody has discovered that tobacco smoke when present in a concentration of one-thirtieth of an ounce in 80 cubic metres of air produced an observable effect on germs. A room five feet by nine feet and 10 feet high contains 680 cubic metres of air: one or two cigarettes will knock out the germs that may be harboured. This little gleaning of science should strengthen the reputation of tobacco, already famed as a stimulant.

Stock Markets to-day and to-morrow

QUIET CLOSE FOR THE YEAR

FOLLOWING the fixation of minimum prices for equities in both Bombay and Calcutta share markets by the authorities in the two different centres a steadier feeling is noticeable and with a slightly larger volume of business available of late buyers have been in evidence for some counters even above the fixed minimum prices.

The Calcutta Stock Exchange closed for the Christmas and New Year holidays on Saturday last and will reopen on January 2, 1942. There were good buyers for jute shares towards the end of the week.

The Government of Bombay have given the necessary permission to the governing body of the Bombay Stock Exchange for the fixation of minimum prices. The governing body has to give once more an undertaking that all outstanding business on forward account will be liquidated within the next six months and that no forward trading could be allowed thereafter for the duration of the war. The Government has again reserved to itself the right of reviewing the present minimum rates after a week.

* * *

Speaking at the annual general meeting of the shareholders of the Indian Iron and Steel Company, Limited, held on December 19, 1941, the Chairman drew attention to the satisfactory progress made by the company. A progressively increasing quantity of the Company's products was absorbed by supplies required for war purposes. Prices have been 'pegged' for all practical purposes and all efforts were directed towards economies in costs, said the chairman. The Works of the Steel Corporation of Bengal, he added, are now working to their production plan and offtake of iron by them has correspondingly increased. Additional revenue received from the Steel Corporation on account of supplies of gas, power and water and sundry services appears under the head "sundry income." The report of the Steel Corporation of Bengal, Ltd., for the year 1941, will be of considerable interest to the company and it is hoped that it will come up to expectations.

* * * *

The earnings of the *Birla Jute Manufacturing Company, Ltd.*, for the half-year ended September, 1941, shows a substantial increase over the figures for the previous half-year and but for the substantially higher provision for taxation, it would have been possible to declare a higher dividend on the ordinary shares.

The net profit before providing for taxation for the half-year is Rs. 12,43,599 against Rs. 8,27,231 for the previous half-year. The amount provided for taxation is Rs. 7,70,000 against Rs. 3,50,000 while Rs. 1 lakh is transferred to General Reserve against Rs. 1,10,000 to depreciation on the previous occasion. The ordinary dividend has been maintained at Rs. 1-4 per share. At the present quotation of around Rs. 31, the return is over 8 per cent tax free.

* * * *

At the extraordinary meeting held early this month, it was decided that 25,000 cumulative preference shares of Rs. 10 each and 25,000 ordinary shares of Rs. 10 each should be issued at par to shareholders registered as on December 6, 1941. These shares will be first offered in the ratio of one ordinary share to one preference share and of one preference share for every ordinary share held by the existing shareholders. The whole issue has been under-written. The cumulative preference shares carry interest at 6 per cent per annum, free of British Indian income-tax with preferential rights for the fixed dividend and for return of capital in a winding up.

* * * *

As a result of the recent bout of selling, there has been a decline in "Indian Finance" All-Share index from 138.34 on December 4, 1941 to 123.81 on December 16, 1941. The biggest decline in prices was recorded in Tuesday's session last week. It will be remembered that as a result of the heavy selling on Monday last week, it was found necessary by the Committee of the Stock Exchange to close the market and fix minimum prices for all shares except Government securities, bank shares, preferences and debentures.

In the Bombay market cotton shares record a decline of over 40 points at 153.64 and engineering shares nearly 100 points at 271.14.

* * * *

The improved conditions in Indian industry generally are clearly reflected in the earnings figures of 291 companies which published their accounts during the current year. The aggregate profit, before providing for taxation and depreciation, is Rs. 34.67 crores against Rs. 25.53 crores for the same number of companies in 1940 and Rs. 19.28 crores in 1939. A goodly portion of the increase is naturally taken up by the higher provision for taxation. The distribution to shareholders is not very much higher.

The increase in earnings is most pronounced in the case of engineering and miscellaneous companies. Twelve engineering companies earned Rs. 9.22 crores in 1940-41 against Rs. 6.82 crores in 1939-40 and Rs. 5.58 crores in 1938-39. Forty-four miscellaneous companies earned Rs. 11.53 crores in 1940-41 against Rs. 6.76 crores in 1939-40 and Rs. 6.43 crores in 1938-39. Jute companies also have done very well, all things considered.

WATCH-DOG.

THE NEW MANBHOOM COAL CO., LTD.

A Dividend at the rate of 20 per cent per annum for the half-year ended 30th September 1941 has been declared payable at once.

	Rs.	A.	P.
Dividend of Rs. 10 per share	4,00,000	0	0
Bonus of Rs. 2 per share	80,000	0	0
Provision for Commission to Directors and staff	7,800	0	0
Carry forward	2,66,831	13	3

Raisings were 7,77,598 tons against 8,23,202 tons and 8,77,926 tons in the preceding half-year.

Despatches, which include purchased coal as usual, were 10,56,137 tons against 8,63,681 tons in the half-year ended 30th April, 1941 and 11,26,628 tons in the half-year ended 31st October, 1940.

There was an improvement in the shipping position during the half-year which enabled the Company to increase despatches on that account, but the acute shortage of wagons referred to in the last report continued. This latter position continued to affect deliveries to inland consumers, and there appears to be little likelihood of an immediate improvement.

GOVERNMENT OF INDIA

FINANCE DEPARTMENT

NOTIFICATION

New Delhi, 24 Dec. 1941.

Whereas the Central Government is of opinion that it is expedient for the purpose of strengthening its financial position to transfer to itself certain foreign securities:

Now, therefore, in exercise of the powers conferred by Sub-Rule (3) of Rule 94 of the Defence of India Rules the Central Government is pleased to make the following order, namely—

All securities of the descriptions specified in the first column of the Schedule hereto annexed, other than those to which the provisions of the said Rule do not apply by virtue of Sub-Rule (6) thereof, are hereby transferred to the Central Government at the prices specified in the corresponding entries in the second column of the said Schedule.

SCHEDULE

Description and acquisition price of securities.

Description of Securities. (Column 1)	Price per security of £100 nominal. (Column 2) Rs. As.
India 2½% Stock	1,041 10
India 3% Stock	1,210 12

C. E. JONES,
Secy. to the Govt. of India.

INSTRUCTIONS TO OWNERS OF SECURITIES TRANSFERRED TO THE CENTRAL GOVERNMENT BY THE CENTRAL GOVERNMENT NOTIFICATION No. D/7175-B/41

Dated, the 24th December, 1941.

The following instructions are issued by the Reserve Bank of India under Sub-rule 4(b) of the Defence of India Rules for the guidance of the owners of the securities transferred to the Central Government under their Notification No. D/7175-B 41 dated the 24th December 1941, hereinafter referred to as the Vesting Order.

The term "Owner" as defined in Rule 94(1) (ii) of the Defence of India Rules includes, in relation to any security, any person who has the power to sell or transfer a security, or who has the custody thereof, or who receives, whether on his own behalf or on behalf of any other person, dividends or interest thereon, or who has any interest therein.

2. Owners of the securities affected by the Vesting Order are required to make, or to arrange to make, delivery of the securities forthwith in the following manner. Holders are required to declare that the transactions do not constitute trading with the enemy, that no part of the proceeds will be made available to the enemy and that since the outbreak of war the coupons and the relative bonds or stock certificates have not been the property of an enemy.

(A) SECURITIES HELD IN INDIA

(i) Stock Certificates to bearer (bearer bonds).—If held in India the certificate and all coupons belonging thereto must be delivered to the Public Debt Office of the Reserve Bank of India in Bombay or Calcutta either by registered post or personally or through a Bank or a Broker. Coupons which fell due for payment before the date of the Vesting Order must be detached.

(ii) Inscribed Stock.—A transfer in blank executed by the person in whose name the stock is inscribed should be lodged with the Public Debt Office of the Reserve Bank of India in Bombay or Calcutta.

(iii) Registered Stock.—The registered certificate together with a transfer in bank duly executed by the registered holder should be lodged with the Public Debt Office of the Reserve Bank of India in Bombay or Calcutta.

(B) SECURITIES HELD IN THE UNITED KINGDOM.

If the securities are held in the United Kingdom the holders declare to the Public Debt Office the name of the loan, the amount of the stock, the form in which it is held and the full name and business address of the United Kingdom agents in whose custody it is held. They must instruct their agents by DLT cable to make delivery of the stock and all the necessary documents to the Bank of England in accordance with such procedure as the Bank of England may prescribe in this behalf. The cost of the DLT cable will be borne by the Reserve Bank of India. The cable must be shown before issue to the Pubilc Debt Office of the Reserve Bank, which will give a serial number tho the holding under which the agent should be instructed to surrender it to the Bank of England.

3. The owners of the securities to which the Central Government order mentioned above relates must surrender the securities against the cash payment in rupees.

4. The transfer forms and registered certificates deilvered in accordance with paragraph 2(A) (ii) and (iii) above will be sent by air-mail to the Bank of England for verification and no payment will be made until the Bank of England telegraphs that they are complete and in order. Provided the delivery of the requisite documents is found on scrutiny to be complete and in order, payment in respect of documents handed in on or before the 9th February 1942 will be made on the 2nd March 1942 and payment in respect of the documents handed in after the 9th February will be made 3-weeks after delivery. Payment will be made to the owner or to the Bank or approved Broker duly authorised by him in this behalf. Allowance has been made in the price fixed for each scrutiny in the Vesting Order for the period that must elapse between the date of the Vesting Order and the first due date of payment. This price represents capital payment and is not subject to income-tax. All transactions will be put through at the standard rate of 1-6d. per rupee.

5. Brokerage will be paid by the Reserve Bank of India to Banks and Brokers in India who lodge documents with the Reserve Bank of India, irrespective of where the securities are deposited, at the rate of ⅛% of the nominal value of the securities delivered in good order converted at 1-6d. to the rupee. No commission will be charged by the Reserve Bank of India on the cash payment in rupees in exchange for the securities acquired.

6. Any further information that holders of the vested securities may require may be obtained from the Bombay or Calcutta Office of the Reserve Bank.

J. B. TAYLOR,
Governor.

RESERVE BANK OF INDIA,
CALCUTTA.
24th December, 1941.

INDIAN'S FREEDOM FROM FOREIGN DEBT

THE new year present given by Sir Jeremy Raisman to India is the freedom of this country from foreign debt. Almost from the beginning of the actual administration by Britain in India, the latter has been a debtor country so far as foreign indebtedness is concerned. The removal, now promised, of the thraldom of sterling debt is thus a most notable landmark in India's finances under British rule.

Readers of *Indian Finance* were told, as early as November, 1939, that such a prospect was in sight if the war should go on for two or three years. The full details of the how and when of sterling debt repayment were furnished in a series of articles which appeared in *Indian Finance* in the closing months of 1939; and the developments which have taken place since then have been mainly on the lines forecast in these columns.

The announcement, published in to-day's issue, may be said to be the last and final stage of the sterling debt repatriation. There have been three stages in this programme. The first pertains to the purchase of sterling securities made by the Indian Government from the open market in London and sales through the tap in India of rupee counterparts. By this method, sterling loans for about £30 millions were paid off.

During the second stage, the good offices of the British Treasury were secured for compulsory payment to holders of the dated India sterling stocks. The amount actually paid off in London in pursuance of this scheme was £75 millions.

The present decision refers to what are usually called non-terminable loans. They are non-terminable in the sense that there is no definite date of maturity. They are terminable, however, by the Government of India giving notice of a year. These loans have been of three types, 2½ per cent, 3 per cent and 3½ per cent.

The present proposal is to pay off immediately the 2½ per cent. and 3 per cent. loans and to give one year's notice for the repayment of the 3½ per cent. loan.

The total nominal amount outstanding in respect of the 2½ per cent. loan is £11.04 millions; and that in respect of 3 per cent. loan £70.68 millions. The latest quotations for these two loans are £81¼ and £90 respectively. It is at these rates that the holders are to receive payment. The securities are to be delivered by February 9, 1942; and it is hoped that payment subject to good delivery will be made on or about March 2, 1942.

So far as the 3½ per cent. loan is concerned, the repayment is to be made on January 5, 1943. The amount outstanding in respect of this loan is £78.71 millions.

The Government *communique* states that the amount of sterling loans covered by the present decision is approximately £158 millions.

Thus, since the war began India has paid or will be paying off sterling loans over £250 millions.

The release of funds to the extent of £250 millions has been an important factor in the cheap defence borrowing plans of the British Government. The holders of these loans have all been those who sought a long-term investment. That is to say, the funds which such holders received on the redemption of the Indian loans have necessarily to be reinvested in long-term giltedged securities quoting on the London market. India has thus helped to keep alive a sustained buying enquiry for British funds. The giltedged market has thus been rendered powerful support by the maintenance of steady prices; and this has facilitated issue of defence loans on the basis of 2½ per cent to 3 per cent.

India has been acknowledged as a most important factor in the supply of war materials and other requirements to Britain, more especially to the countries generally described as belonging to the Eastern Group. Outstanding as is India's contribution in this regard, we should think that what India has done for the economic front in Britain is even of more strategic value.

We congratulate Sir Jeremy Raisman on the unique record which he will enjoy in India's financial history as having once and for all ended the thraldom of foreign debt. We must also thank him for the full use which he has made of the opportunity—we appreciate his action all the more because a similar opportunity in the last war was wantonly neglected.

We are, however, at a loss to understand why the plan of giving one year's notice to 3½ per cent loan has been adopted. The Indian Government have already built up such strong sterling resources and are adding to them at such fast pace that it should not be difficult to repay all these loans by March, 1942. A more detailed study of this and other questions will appear in the next issue.

THE MANDRA-BHON RAILWAY COMPANY LIMITED.

NOTICE.

Notice is hereby given that the Twenty-ninth Ordinary General Meeting of the Mandra-Bhon Railway Company, Limited, will be held on Thursday, the 15th day of January, 1942, at 4-15 p.m. at the Registered Office of the Company, Home Street, Fort, Bombay, to transact the following buisness:—

1. **To adopt the Directors' Report and Audited Statement of Accounts made up to 30th September, 1941.**
2. **To declare a Dividend.**
3. **To elect Directors in the place of Mr. Ambalal Sarabhai and Mr. R. Giles, who retire rotation, but are eligible and offer themselves for re-election.**
4. **To appoint Auditors for the current year and fix their remuneration.**

The Transfer Books of the Company will be closed from Tuesday, the 23rd December, 1941, to Thursday, the 15th January, 1942 both days inclusive.
