Nineteen jute companies earned Rs. 1.72 crores out of which Rs. 1.07 crores or 61.86 per cent is provided for taxation; Rs. 28.65 lakhs or 16.62 per cent. for reserves and depreciation and Rs. 36.49 lakhs or 21.16 per cent to dividend. The share-holder in jute companies has been able to get something more because of their intrinsically strong financial position. Taxation takes as much as 61.86 per cent of earnings, not because the earnings for the standard period are low, but on account of the big bulge in earnings in 1941 owing to the boom in exports and higher prices for goods with a relatively low level of price for the raw material. Iron and steel companies have not been very much affected as the growth in earnings has been gradual and the incidence of E.P.T. has not been equally heavy. Thus, out of a profit of Rs. 8.22 crores for two companies only Rs. 2.73 crores or 33.21 per cent is for taxation, Rs. 2.53 crores for reserves and depreciation and Rs. 2.99 crores or 36.4 per cent for dividends, perhaps the most equitable distribution of earnings.

It is clear, from the above analysis that with the exception of the iron and steel industry, the incidence of taxation is markedly heavy and after any further increase in earnings more than proportionate increase in the provision for taxation has to be looked for. With the possibility of a further increase in taxation the investor cannot possibly look for any appreciable increase in his share of profits. Comfort is to be derived only from the fact that very considerate factors are modifying the industrial structure of India and that if we are spared the horrors of war the post-war period may find the investor and the country alike in a better position.

## INSURANCE FOR FACTORIES

For a month or so discussion has been general, if unilluminating, in respect of the factories war risks scheme. Yet the idea of compulsory insurance has been universally approved, and commercial organisations as a class have welcomed the idea of Government directly providing for war risk cover. The idea of gratuitous compensation is necessarily inappropriate, but where the April Ordinance provides for insurance for a period of two years probably many would like to see one year with a proportionate reduction of premium for cover up to April, 1942. Owing to delays of an unforeseen nature, there was extension of time last month for the first premium payment originally fixed for the 20th of May. Dates have been extended and the promulgation of the ordinance in April has been followed by the flow of premium payment only last week. Approved loss assessors have been already selected, and it is not surprising to find that those in Madras are relatively few in number. The computation of loss for payment of compensation up to 80 per cent. is however a minor matter as compared with the actual administration.

It is fortunate that valuable experience has been already gained in respect of the war risks commodity stocks scheme for which the quarterly premium is periodically revised, whereas the ½ per cent. paid as a first instalment in connection with the factories war risks scheme represents a quarterly premium, unvarying and corresponding largely to the usual payment on any insurance policy. It is remarkable that points in connection with the extension of such a scheme to immovable property as distinct from factories and plant have been left to be investigated by a separate committee in Bengal. The labours may bear fruit in the form of an extension of the factories war risks scheme. It is perhaps necessary to say something about the forms that have been sent to those concerned. The factory insurance form is distinct from the commodities insurance form, and the submission of two forms to be retained by the insurer—Government in this case—is a precaution justified by present circumstances. Where plant is separable, in respect of ownership, from premises, there may be still some doubt as to the distinct and separate liability insuring in such cases. Where the owner fails to insure either plant or premises, it is clear that a duty rests on the occupier. Where these are numerous, these will have to take out separate policies in respect of plant owned, and act as agents of the owner in respect of the building, if the owner himself does not trouble to insure.

It has been emphasised in Indian business circles that the outstanding merit of the official insurance scheme is that the basis of insurance is present value. But it is not the gross value but cost less depreciation that is taken for purposes of calculation. In the case of machinery it is obvious such written down value can by no means be equated with market value. Although the original cost is ignored implicitly it is clear that the most reliable method would be the cost of restitution of plant irrevocably damaged or destroyed. It has been pointed out that the present Indian scheme is better than the British War Damage Act which takes into account only the value as on September 1st 1939 and makes deduction for usual depreciation in fixing insurable value. Since a fresh valuation has to be made for the purpose of war risks insurance under the rules it is clear that old fire insurance policies cannot help the insured to arrive at the insurable value. The machinery has to be valued over again for the purpose by experts, and the exact quantum allowable for depreciation has also to be determined.

The war risk insurance scheme has more than one point of resemblance with the taking out of ordinary cover. The second premium has to be paid this week and the subsequent payments fall due on the first day of each quarter following until December 1, 1943. The most important concession so far offered to the insured is that premiums paid under the war risks scheme may be deducted from the income-tax returns, and even property acquired after May 29th can also be presumably brought within the purview of the scheme though the rate of 4 per cent. may appear high for a new plant which has elaborate A.R.P. arrangements of its own, particularly, if 4 per cent. is to be paid for one year instead of two years as allowed for in the case of original policies going back to April, 1942.

The position as to abandoned or disused factories is not clear. Where premises have not been in use after December 31, 1938, the owner is not obliged to insure, and unprofitable concerns are not likely to be saddled with unwarranted expense. But redundant or scrap plant may be kept on. Since small factories are excluded in the scheme it does not cover those ineligible yet willing to take out insurance. Under the war risks scheme for goods commodity stocks valued below Rs. 20,000 can be insured, and the same principle if it had been applied to small factories would have been definitely helpful. Further those places declared to be factories by a Provincial Government are also treated as ineligible to participate in insuring against war damage. Seasonal factories such as gins and presses can hardly be called upon to pay the full premium when there is no work going on, and most sugar mills working for a season that varies from year to year will also have to pay the same premium as factories working the clock round. There can, of course, be no distinction as to relative immunity to attack and the principle of uniform premium imports as much. Since the process of valuation has to be conducted after formal application, there may be delay in meeting claims which arise as between application and acceptance of the basis of valuation. Nothing can be said yet as to the degree of risk involved for factories of various types in various localities, but it is equally clear that claims will be sparse, and if no deduction in premium rates is made in the second year when written down value will be less, the 4 per cent. premium will be in reality fractionally higher.

The exclusion of small establishments where the plant may be of high value or hard to get now has been regretted on the score that small workshops engaged, for instance, in essential work in large cities may have goods not readily insurable and may have plant not easily replaceable. Some kind of protection would appear necessary in their case. Where the premises do not house plant or machinery but the number of workers is large enough to bring it within the Factorties Act, there may be no adequate motive for taking out war risk insurance. Since there is no plant or machinery although it is a factory the usual fire insurance would be deemed enough. In cases where machinery is scattered at many points as in the case of sub-stations served by a power-house distinct and separate policies cannot be taken out, and such rules as restrict insurance to plant within specified premises would appear inadequate. In the case of an electric undertaking the distributing system is as essential as the generating set, and if the former is excluded the value of insurance is correspondingly reduced.

In spite of current criticism against the lack of any stipulated date for payment on claims arising under new contracts of insurance it is clear that the factories war risk scheme has very definite implications. The policy conditions have been discussed and Government should gain. Reference will be naturally made as to its effect on disposable profits for the years 1942-44. It is clear that the majority of enterprises, already faced with rising costs and wages and saddled with liability for higher taxation, cannot find the earnings cover needed for larger distributions to proprietors. Investors will have to take due note of the fact that dividends in the majority of cases will be stabilised by the addition of war risk premium to the annual charges. Since the scheme does not extend to factories in States even where these are owned by residents in British India, it is clear that investors in concerns located in States must be viewed as bereft of advantages conferred by the compulsory insurance scheme. One must be ready to alter the customary view as to the ad-

vantages of investing in companies outside British India. There is, of course, the possibility that governments of Indian States may promulgate their own schemes, but that is unlikely. Experience is lacking and the agency non-existent. There have been pleas for bringing States into the scheme but the difficulty of appointing suitable loss assessors appears insuperable; and, anyway, the risk such as it is should be shouldered by the Government concerned and not by the Paramount power which can have little interest in enterprise from which it derives no revenue. British Indian investors surely will not fail to note that there are certain advantages attaching to their own shares. And their previous preference for the shares of companies operating outside British India will probably disappear somewhat rapidly.

### Canada Develops

Canada's index of industrial production rose by 22 per cent in the year 1941. The magnitude of achievement can be readily measured by the jump in the index from 132 at end-December 1940 to 161 at end-December 1941. The chief factor was a sensational rise in heavy and medium trades associated with iron and steel. Despite a fall under pulp and paper, food etc., the industrial index rose because of the enlargement of automobile output to 95 per cent of rated capacity and rising munitions output. The rise in output produced a rise in Canadian exports and imports as well. There was a strong rise in railway earnings as compared with 1941, and the principal gain to Government was a rise in the yield of both income-tax and excise. The Dominion Government's larger disbursements in 1941 were thus accompanied by larger tax receipts. The rise in wages was arrested towards the end of the year; yet wages were double those of 1937 in several Canadian industries with the exception of logging. The bulge in incomes was not conspicuous in farming where costs generally rose after the first half of 1941. Milk and poultry proved better for the farmer than grain. Canada's war expenditure rose faster than the Empire's and the total outlay of 1914-18 has been surpassed in the past year. War production accounts for 250 new plants set up on British and American account. Total outlay on plant construction was put at the end of 1941 at 580 million dollars and three-fourths of the original programme had gone through. New chemical industries were going full blast and output of explosives in 1941 was equal to that of the whole war period of 1914-18. Canada as an arsenal is more than ever important after the curtailment of supplies to automobile, electrical and other industries.

### Tungsten To-day

The loss of Malaya and Burma means a reduction in the Allies' tungsten supplies. This strategic metal finds wide application in electric lamp manufacture. A notable saving has been effected in costs certainly by the adoption of tungsten filaments. It is however as a constituent of steel alloys that tungsten has acquired a key position. The manufacture of hard high speed cutting steels entails the use of 15 to 20 per cent tungsten. Like molybdenum, vanadium etc., tungsten is among the essential if not rare metals. According to certain technical papers, tungsten is essential for self-hardening steels made with small amounts of chromium and manganese. This kind of special alloy is wanted for valves etc.; and in the manufacture of spring steels also tungsten is required. In the making of guns and military equipment alike tungsten plays a part and the Axis inferiority in tungsten is still listed as a handicap. Burma was one of the sources of tungsten since the southern tin mines yielded wolfram. In the new world Bolivia produces tungsten as also tin. In the Empire only Burma produced tungsten in fair quantity. What Burma produced was wolframite as distinct from scheelite produced in Malaya. The three chief minerals are scheelite from which calcium tungstate is derived. Wolframite which is an iron manganese tungstate and hubnerite which is manganese tungstate. The world production of tungsten is put at 37 million lbs. of which the U.S.A. produces as much as 4 million lbs. China is, however, responsible for over 20 per cent of the world's tungsten, and the closure of the Burma Road means a reduction of both Chinese tungsten and antimony. China was a large exporter to the U.S.A. and the next most important source was Burma which produced 6 to 8 per cent of the total. The ore is generally sent out as concentrate from which the metallic tungsten 99.9 per cent pure is taken. Nevada is reckoned the largest producer of tungsten in the States and deposits located in Idaho have almost pushed California out of the second place. In Montana the gold mines produce tungsten as a by-product and the largeness of present supplies available to the U.S.A. makes it certain that the closure of Far Eastern sources will not inconvenience the Allies greatly.

### Shipping Companies' Gain

According to a recent report from London, important decisions affecting the British shipping industry have been reached. Shipbuilding and shipping alike are under full control for two years and private owners have been faced with difficulties after the war broke out. Shipowners were required, for instance, to obtain licenses for the completion of merchant vessels under construction and for the laying down of new ships. The main purpose of such control was not to limit mercantile tonnage then building but to secure all building facilities for Government. While licenses have been issued for the construction of vessels on private account, a substantial proportion of the new tonnage is still being built on Government account. Replacements have been effected tardily and private shipowners feared that at the end of the war they would have far fewer ships while the Government would have a large fleet of modern vessels. The general rule for the disposal of Government-built ships after the war has been prescribed in a recent White Paper. The General Council of British Shipping approached the Ministry of War Transport with a request for an opportunity to buy Government ships. They wanted to make sure of adequate replacements immediately after the war. Government has not refused and the plan propounded is as follows: Shipowners who have lost tonnage through marine or war risks will be given an opportunity to buy ships built or to be built during the war on Government account. The price to be paid will be the cost of construction less depreciation at rates allowed by the Board of Inland Revenue. Delivery of such ships will not be made until after the war, but the purchaser will be able to operate the ship to which he has acquired title and he will receive a management fee for the service. Under the new arrangement ships will be offered on a rota basis in accordance with chronological order of losses and vessels built on private account hereafter will be treated as an allocation from Government-owned tonnage. The Government will be out of shipping after the war, and such control as has been imposed on freights, voyages etc., will also disappear. The ground has been prepared for putting the shipping companies back in their business, and the immediate sale of Government-owned ships will procure the realisation of one important asset as early as possible. Good vessels will not go to the breakers' yard, and shipping companies will be able to take up their business where they left off. The stock exchange will have revised its opinion of shipping shares after the plans for disposing of Government ships were known. Post-war Government competition is to be dismissed as an investor's risk.

---

### Transport Triumphs

What turns the battle of the Atlantic has taken in a year is hardly known but the British shipping position is not at all causing anxiety. Lord Leathers indicated recently that ships and ports alike were functioning well. He pointed out the improvement in dock labour and added that workers were co-operating magnificently. According to the Minister of

War Transport unauthorised stoppages were rare and the scheme for transferring dock workers from one port to another was working smoothly. As for the railways whose work had expanded greatly they had reached the peak of efficiency. Government also had its road haulage scheme, which, though in the experimental stage, was moving 70,000 tons of general traffic in addition to the country's entire meat and livestock. Britain's canals had also been reconstituted and were carrying millions of tons every month though short of labour. Coastal shipping, in spite of attacks by aircraft, surface craft, submarines and mines, was working on a bigger scale than ever. Lord Leathers pointed out that in a few days more the thousandth convoy would be leaving a Home port. On the railways daily operating conferences had become the rule, and central operating conferences had been introduced to make the most of all available routes. The confcrences were arranged by special telephones which connected the chief operating officer of each main line. Immediate decisions are reached involving all the railways. The movements of trains are allocated to routes which give the best operating conditions irrespective of commercial or other conditions. The aim is always to ensure that vital goods have the most rapid transit possible. Lord Leathers added that efforts are being made to save power by exchange of locomotives between railways. Firemen belonging to one railway are working with the drivers employed on another railway; repair staff and equipment from one railway are being made available to another to speed up the turn-round of engines. Locomotives' coal supplies are being obtained jointly, and engines are coaled irrespective of their ownership. This picture of unification and efficiency under a single Ministry deserves to be studied in relation to difficulties experienced in India from the lack of method. Services have been curtailed in Britain before winter and the "Travel less" slogan was heard earlier. But the desired result has been obtained quicker in Britain, where, the railways have bettered the fine performance of the first two years of the war.

**Industrial Cawnpore**

In Cawnpore alone it is said there are 200,000 industrial workers explaining how that City accounts for the most striking increase in population reported by any Indian city between 1931 and 1941. That is one reason why the Employers Association of Northern India continuously gains in importance. Lala Padampat Singhania's recent estimate that the number of workers should increase is directly related to the progress of industry in the city. The quality of work or workers may not be all that is desired, but they are getting better wages and in the year 1941-42 obtained Rs. 35 lakhs over the basis wages at least from the concerns which have joined the Association. The exodus of workers and their return furnished Lala Padampat with an opportunity to describe the penalties of panic. The seeds of unrest yet linger, and employers in India do not fail to argue that they have so far done their best in regard to providing grain when wanted. Since the Employers Association has attracted members who had 61,703 employees at the end of 1941-42 its annual report is of some interest. In negotiating with the local Mazdoor Sabha, in dealing with complaints direct or before the Labour Commissioner, the Association's Labour officers have performed valuable work. The Labour Bureau placed workers in jobs in woollen mills and leather factories. As many as 11,147 men got work in 1941-42 and the report records that there has been a continued increase in the demand for labour in the leather industry. While the influx of new workers has reduced the actual proportion of literate men to illiterate workers, the Bureau has no reason to feel dissatisfied. Since July last, there has been no serious strike in Cawnpore. The decline in the membership of the Mazdoor Sabha did not induce Lala Padampat to refrain from commenting on the perversions of Labour Unions. The three separate dearness allowances have been followed by bonus payments on the part of employers in Cawnpore. In regard to factory A.R.P. the members have striven to co-operate with Government, says the report reviewed at the annual meeting last week. What has been accomplished in regard to reduction of strikes etc., in the past year in Cawnpore evoked an expression of satisfaction from Mr. H. G. Misra who conceded that the conduct of workers had been more satisfactory than in the past and pleaded that employers should endeavour to encourage the welcome change in attitude.

---

**Helping Evacuees**

The official press notes meant for Indian evacuees from occupied territories have been recently supplemented by instructions from the Federation of Indian Chambers of Commerce. It is known that a special sub-committee has been set up in accordance with the decision of the Committee at its recent Bombay meeting. Representatives from Burma have been added, and the work of relief has been promoted by setting up an office in Delhi to register claims for property covered by the war risk insurance scheme in Burma and for putting up details of outstanding claims against the Government of Burma. The proposed office is now a reality and claims are being registered at Delhi. Indian merchants, who have lost property through enemy action, looting or the adoption of a policy of denial, have been asked to register claims. The procedure contemplated is independent of that advised by the Indians Overseas Department. The actual compensation may be delayed, but an authoritative body will keep the records, and pursue the matter when circumstances are favourable. The new office of the Federation intends to secure at home employment for evacuees. It will also help to secure information as to Indian residents in enemy-occupied territories. Matters relating to evacuated students and claims for pay, pension etc. will also be taken up, and matters concerning subsistence allowance and housing concessions will also be dealt with by the Central Evacuees Committee. Mr. B. K. Dadachanjee, who has been appointed Secretary, has indicated that on the question of employment for evacuees all affiliated bodies will adopt the same view as the Federation. The registration of claims etc. it has been noted, is no guarantee of success for the efforts of the committee in this behalf. Since the new committee takes over, it may be argued by some that only the moral support of the Federation and its members will be hereafter available in respect of claims duly lodged but it should be noted here, that the new committee enjoys the full support of the Federation, as of Mr. G. D. Birla's subcommittee with which Sir Muthia Chettiar is associated and will be a most useful channel for dealing with the equally new Overseas Department of the Government of India. The Relief Committee should be able to make clear the extent of losses in Burma. The inadequacy of data seems alarming, and it is only a new clearing house of claims that can tot up the entire loss of Indians which will naturally exclude the erosion of stock exchange values to which reference has been made last week.

---

**Improving Indian Wool**

The quality of Indian wool is going up. It needs to be raised steadily for India does not produce enough wool though she has 47 million sheep and has a well-developed weaving industry. Recently it has helped the war effort in many ways. Supplementing information made available in the Tariff Board report, the handbook on the quality of Indian wool prepared by the Agricultural Marketing Department breaks new ground in indicating that half the clip of East India wool is suited for fabrics, and it is unfair to dub it carpet wool. Defects of breeding, shearing and packing are universal, and the main suggestions made in the handbook to woolgrowers are to concentrate on the clip of white wool and to separate shirtings and hair. About a year ago a selected parcel of Marwar wool fetched a decent premium at Liverpool, and if only India knew, the annual value of the wool clip, now placed at Rs. 4 crores, can be a great deal more. Experiments conducted by two big mills have indicated that Northern India's wool can be spun into yarn, and the biggest surprise provided in the handbook is that most North Indian wool can be made into superior cloth, while South India, in spite of the large number of sheep, can turn out only inferior wool meant for carpets and coarse blankets.

Afghanistan like Kashmir produces a better type of wool, proving that the mountain sheep are better than the valley sheep in one respect. Since China is disabled India's chances of selling carpet wool to the U.S.A. have brightened, but the major problem here is now one of displacing former imports of merino by home production. Grading, sorting, etc. are ultimate remedies. The first and direct remedy is selective breeding. North-west India should endeavour to better the breeds and attempts to carry out this have been furthered by the war. Tht present percentage of Indian wool to world production is below 2½, and there is so far no cross-bred wool or merino wool in India though Bikaner lamb wool has been certified to be as good. The Raymond Mills carded and spun a trial assortment into worsted yarn. Lohis made of this wool have been deemed quite good in the Delhi market. When due care is taken and only one sort of wool goes into a package, the reputation of Indian wool, e.g., Rajputana wool rises. The most important thing now is to pursue the study of Indian wool and get a Wool Institute going. The complete segregation of tannery wool seems called for, on any view of present conditions. Qualities such as elasticity and crimp are not conspicuous in Indian wools and woolyolk is apt to be excessive. But the means of improvement are not wanting, and it is enough to know that they are being applied.

---

**New Agreement in Canada**

Canada has apparently effected a great change in the federal fiscal system by getting the Provinces to agree to withdraw from the field of income taxation in return for fixed benefits. In January the Minister of Finance had agreements ready for signature. Therc were nine agreements to be submitted to the Provincial legislatures. They were meant to run for the duration and a year after. Compensation on the basis of past revenue collections has been considered suitable by Quebec, Ontario, Manitoba, Alberta and British Columbia. The others have asked that their annual debt service less the yield of succession duties be met. There will also be federal subventions for needy Provinces, and supplementary grants will be made to make good the loss on the gasoline tax. In return there will be an understanding not to collect income-tax on individuals from January, 1941 or corporation tax as from September, 1941. The agreement, of which little is known, marks a new growth of Dominion influence. That the Provinces have consented readily means that Dominion unity is stronger than Provincial separatism. Since the Dominion government will pay 84¼ millions by way of compensation as arranged, the actual gain may be small, but a fully elastic source of revenue is secured. The principle of grants for Provinces has been accepted in India also and the modification of the Niemeyer Award is the only departure in principle from the old understanding as regards progressive additions to the Provinces' share of income-tax. When allegations of Central greed and Provincial weakness appear, it is well to recall the Canadian example under which the Provinces give up funds. The surrender of the right to tax and the reservation of income taxes for the Dominion Government are in line

**NORTH WESTERN RAILWAY**

Applications on prescribed forms are invited up to 14th July, 1942, for six vacancies of Apprentice Inspectors of Works of which three are reserved for Muslims and one for other minority communities, viz., Indian Christians, Parsis and Sikhs. Age should not exceed 25 years on 11th August, 1942. Only those who have passed from one of the following institutions in courses mentioned against each need apply:—

(1) Thomson College of Civil Engineering, Roorkee.
Overseer's Certificate, with 60% or higher marks.

(2) The Government School of Engineering, Punjab, Rasul.
"A" Grade Overseer's Certificate.

(3) N. E. D. Engineering College, Karachi.
1st Division Diploma.

Full details will be furnished if stamped and addressed envelope is submitted to the undersigned superscribed in left hand top corner "Particulars for Apprentice Inspectors of Works."

with various developments since Mr. King won a second general election. Most important at a time when customs and excise revenue is uncertain is the retention of a margin for direct taxation. Since India's provinces will obtain a bigger allotment out of income-tax proceeds this year as also special grants for A. R. P. outlay, there has been no sacrifice comparable to that of the Canadian Provinces. The Prairie provinces have consented and the subsidies paid to them and the Maritime provinces merely correct existing inequalities. The more important factor to consider after the agreement with the provinces is the advance in Canadian national income. That for 1941 is put at 6.200 million dollars showing a rise of 1.000 million dollars over 1940. Taxation also benefited through the expansion of income. Federal revenue for the first nine months of 1941 amounted to over 961,869,000. The rise in national income was due to the activity of war industries notably shipbuilding and aircraft. The expansion of industrial output accounts for an increase of 442 million dollars in the value of Canadian exports over the total recorded in 1940. Railway earnings rose by 26 per cent. and the trade trends showed no change on those of 1940. The Canadian war economy has since then obtained the benefit of U. S. help. Canadian exports of nickel and bauxite are of unusual importance for U. S. war industry, and the exchange of steel for other metals illustrates how co-ordination can be carried out without worrying over lease-lend.

**Australian Example**

Australia's decision to expand her war effort is in line with the increase in her war expenditure. The total for the ten months ended January was £232,948,000 a sum far larger than the budget estimate. Since Australia has received Allied troops the expenditure should have risen. Borrowing is now the established means of raising money, and the Federal Treasurer has announced the nineteenth new war loan aiming at £35 million. The loan campaign started on June 2 and the rates offered to investors are, 2½ per cent. for the short-term security and 3½ per cent. for the long-term security. Schemes of compensation to make up for the abolition of State income-tax have appeared. The Commonwealth Government should derive advantages from the withdrawal of State income-taxes. Last month legislative proposals were introduced, and the Federal Treasurer said that his object was complete control of taxation to help in meeting the demands of war. Under the compensation scheme New South Wales would receive £15.3 millions, Victoria £6.5 millions, Queensland £5,821,000, South Australia £2,361,000, West Australia £2,523,000 and Tasmania £811,000. The other financial proposal related to the grant of pensions to widows and unendowed children. The bill introduced last month will provide cover for 30,000 widows and 21,000 children. The increase in expenditure would be £1,600,000. Under the new taxation law mining companies helping war effort were badly placed now but in response to pleas the Federal Treasurer has announced that all mining companies except those engaged in gold-mining would pay 20 per cent. less in taxes. Government's request for maximum production which would curtail the life of mines during a period of high taxation lies behind the concession. The other interesting development is the implementation of

the proposal to close non-essential bank branches in order to save time and labour. The banks have agreed, and Government will get men, office equipment and premises for war work. Britain has an idea of taking out labour from financial institutions, but it is Australia which has acted first. Australia's eagerness to wage war may be measured in the response to the Liberty Loan of £35 million. Total subscriptions according to Mr. Chifley came to £48.3 million which were put up by 243,388 contributors.

**Empire Trade**

The March seaborne trade accounts show that imports from Britain and the Empire rose in value from Rs. 89.91 crores to Rs. 105.65 crores in 1941-42. The chief reason was the growth of trade with colonies and Dominions. In spite of the war the total value of imports from the Straits Settlements was nearly around the 1940-41 level and in the case of Hongkong an increase is shown. The largest increase in imports is shown by Canada and the only place from which imports fell away was Mauritius and Dependencies. Britain's own share of the total import trade was Rs. 36.65 crores out of Rs. 105.65 crores showing that her share of the import trade in India is still falling, not on account of foreign competition, but on account of demands at home on limited resources. Imports from New Zealand in 1941-42 showed a striking fall. The curtailment of luxury imports affects trade in this case, reflected also in the fall recorded last year under India's exports to New Zealand. The table concerned with the direction of trade supports the generally accepted view that trade with the neutrals is dwindling. Switzerland is apparently an exception since a rise of Rs. 50 lakhs is recorded under the value of imports from that country in the past year. Since notifications put an end to trade with Hungary last year, there has been nothing to suggest that links with Central Europe are unbroken. Tiny totals are recorded against France and Germany, perhaps on account of the release of some cargo elsewhere. The most striking feature is the decline under imports as well as exports in regard to Sweden. It is clear that trade is actively discouraged. The most remarkable change on any view is the advance in India's exports to Russia. It was said months ago, that Indian exports of tea as also hessian would benefit, and the figures recorded in the March returns are Rs. 71.12 lakhs in 1941-42 as against nil in 1940-41. They prove that Russia is a customer as also an ally. The main change under exports is the enormous increase in trade with Colonies listed as other British possessions. The value of Indian exports to colonies other than those mentioned by name rose from Rs. 4.62 crores to Rs. 10.77 crores proving incidentally that import control adopted under directions last year was not wholly injurious to Indian trade. The disappearance of Japan has given Indian exporters a big chance in Kenya duly reflected in the advance under exports to the colony last year. Exports to Ceylon also improved from Rs. 7.3 crores to Rs. 9.77 crores in 1941-42. Imports from Ceylon showed a similar increase, but the balance of trade was more than ever favourable to India.

It will not escape notice that India enjoys a larger favourable balance of trade than ever in relation to the U. K. and the Empire. The striking increase in exports to Aden and dependencies points to the revival of British prestige since May, 1941 following triumph in Iraq and Abyssinia alike. Burma and Hongkong are out of the reckoning but trade with other colonies should. To judge by the March figures the exports from India to Australia recorded a notable increase and the decline in trade with the West Indies is unimportant. How fast trade with Turkey is growing can be discerned at a glance. Exports valued at Rs. 47.64 lakhs were taken in 1941-42 and this should increase since the U. K. Commercial Corporation is now engaged in promoting trade with the Middle East and Near East. In the past year the Corporation should have stimulated trade and the present attempts to depreciate its operations can only appear ill-advised. It is enough to show that its extension to India came before the present campaign of criticism was launched. It is surprising that the same things have not been said about the Pekin Syndicate.

Speaking for myself, the American Technical Mission's preliminary report, which was released to the press on Friday morning, has fulfilled the high hopes which we were justified in building in view of the impressive credentials of Dr. Grady and his colleagues. At one stage, however, one might have been led to think that the Technical Mission might have lost a great deal of the zest and zeal with which they addressed themselves to their task when they set out from America for their visit to India.

The members of the Mission could not have derived any great encouragement from the adverse insinuations which were freely ventilated in this country even before they had set foot on it. In my view, a great disservice was done by the Indian business community by creating, in advance, unjustified prejudice about the purposes, intentions and activities of the Mission.

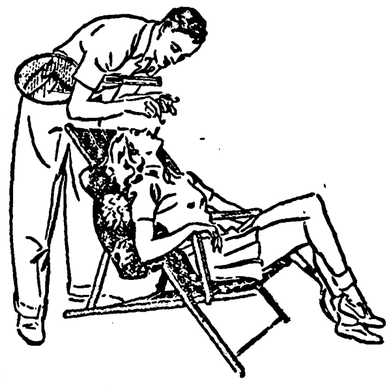
A theory was seriously put forward that a secret understanding had been arrived at between the United States and Britain; that the main purpose was to secure for America important economic advantages in India; and that Dr. Grady and his colleagues were to advise on how best American interests could secure control over Indian industries. This kind of suspicion cannot but be regarded as a reflection of an inferiority complex.

Though the clear and explicit assurances by Dr. Grady went a long way to dispel such suspicion, the American Technical Mission had to conduct its investigations in conditions not altogether marked by *friendliness and appreciation.* The press notices about the Mission when its members were on tour in India, were frigid and formal, if not positively hostile.

In such circumstances, the American Technical Mission might well have felt that gratuitous service was always thankless service; and that they need not put themselves to too much trouble in helping Indian industry with advice and assistance over rationalisation and modernisation.

It is convincing and conclusive testimony to the bonafides and single-minded purpose of the American Technical Mission that their recommendations do not show any trace of resentment which they might have rightly felt over the agitation started against them in advance.

From the beginning, "Indian Finance" refused to have any lot or part in this agitation. As one who has had to make an extensive and intensive study of almost every industry in India and who has studied the working methods and conditions in scores of mills and factories, I cannot help feeling that, in the generality of cases, Indian industrial methods left great scope for improvement and modernisation.



In this regard, it is not much use to expect assistance from the British for the simple reason that industries in Britain are themselves far from being the last word in efficiency and up-to-dateness. America undoubtedly is the model and exemplar; and Indian industry may profitably learn a great deal from the American example.

As a matter of fact, it would have paid Indian industrialists if, on their own move, they could have engaged a number of American experts to formulate plans for the modernisation of the various industries. In such circumstances, the offer of the American Government to send first-rate experts at their own expense must be welcomed in India in a spirit of utmost gratitude.

I need only add that, if we had been desirous of bringing out experts of the kind that composed the American Technical Mission, for one thing, many of them would not have been available; and, for another, the remuneration which they could justifiably demand might be a considerable amount.

We are grateful to Dr. Grady and his colleagues for placing at India's disposal their expert advice for no consideration and for no remuneration. We should be even more grateful for the speedy and favourable action which the American Government are taking with regard to the recommendation made by the American Technical Mission for making available to India essential machines, materials and personnel.

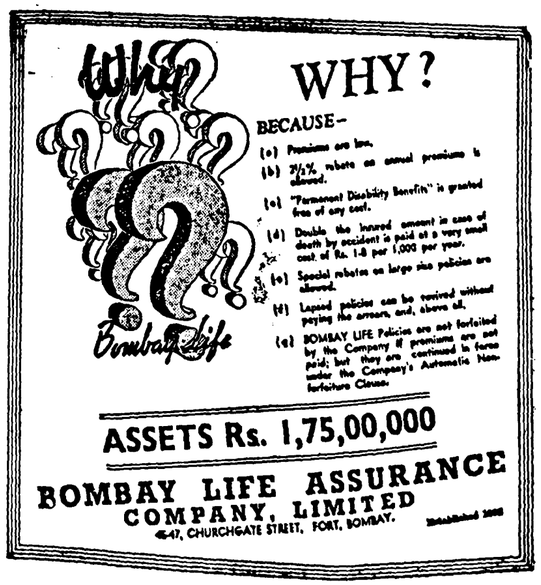
The press summary of the Mission's report points out that, during the five weeks of its stay in India, the Mission telegraphed to Washington some 35 specific requests for essential machines, materials and personnel. The following information is provided in this connection:

"These requests were sympathetically received. The Mission has, in particular, asked for the services of a number of technicians of the foreman and shop superintendant type to be employed by the Government of India in war plants for a period of one year and of two shop superintendents to be employed in the steel industry for a longer period. In addition, the Mission has asked the Government of the United States to secure without expense to the Government of India, six industrial executives to act under the direction of the Government of India as advisers to war production plant."

The main recommendations of the Mission embrace the following: A further investigation into the possibility of producing power alcohol; further measures to extend the availability of electric power, and to rationalise the use of electric power; the expansion of the steel industry; the rationalisation of plants producing munitions; concentration in respect of aircraft and ships upon repairs rather than new construction; the manufacture in India of a general purpose military radio set; measures to stimulate the production of aluminium; measures to conserve tin and rubber; adjustment in the arrangements for the treatment of timber; and the acceleration of the production of refined sulphur.



The Mission emphasises that immediate and systematic steps have to be taken to deal with the problem caused by the severe strains imposed upon the railways, ports, telegraph and telephone systems. For the efficient carrying out of these measures, the Mission has recommended to the United States Government the loan to India in an advisory capacity of an outstanding railway administrator, with two assistants who will be experts in operation and maintenance respectively.

As regards the precise governmental organisation necessary to tackle effectively the twofold problem of augmenting the production of certain peacetime commodities required for war and of coverting peacetime industry to new war production, the Mission is of the view that the right solution lies in strong centralised power vested in and exercised by the Government. While unwilling to commit itself on the exact plan of governmental organisation, the Mission makes the following suggestions:

(a) High-powered control independent of established Government agencies, on the American model;
(b) The separation of "production" and "supply" and the establishment of a new department for the former;
(c) The division of the Supply Department into two parts, one dealing with "production" and the other "supply";
(d) The establishment of a War Cabinet with a strong secretariat to control war production in all its phases. This War Cabinet should consist of members responsible for production, transportation and communications, defence and finance".

The Mission is fully satisfied with the good quality and excellent potentialities of Indian labour. "The Indian is skilful with his hands and, given satisfactory working conditions and security of employment, is dependable and industrious".

Above all, the Mission feels that a basic change in production technique is needed and mass production methods must be introduced. This will be a difficult task but the task must be undertaken. For, "the extent to which India can aid the United Nations in the equipment of a formidable Indian Army may prove an important and, perhaps, a decisive factor in the war".

A great career in commerce and politics came to an end this week as my readers should know from the very brief obituaries of Sir Ibrahim Rahimtoola, G.B.E. To the distinction that comes from having become a Grand Cross—even of the newest Order—Sir Ibrahim united that of having survived the Georgian era with his reputation more than ever secure. Of him it may be said that criticism was impossible since he was so tolerant that others grew tolerant. Many held him in esteem: some developed affection, for he brought to public life a graciousness that is, alas, missing to-day. I read that he entered the legislature in 1899. He must have been middle-aged then. Emphatically a disciple of P. M. Mehta, he saw all the constitutional changes from Cross to Hoare, and played a part so large in the life of Bombay that it might well be said that not even the Aga Khan outshone him among the members of a community at once opulent and enterprising. For the past seven years Sir Ibrahim led a very retired life, a period during which his son Mr. F. I. Rahimtoola has fulfilled the anticipations of many others besides his father, both on the Tariff Board and in the business life of Bombay. To the long period spanned by Sir Ibrahim's life belongs the most momentous changes of our time. There have been two wars and a peace, three instalments of reforms, and many political campaigns. It is the fashion to praise Sir Ibrahim for being a Moderate in the tradition of Gokhale but many would rather not. They would speak of him as a Double First—with a First in his first choice—business, and a First again in politics. Until Sir Pherozeshah died Sir Ibrahim was naturally in the background. It was later on that he made his mark on Bombay's civic and political life. On the Corporation he was indefatigable; he was even more so on the Improvement Trust to which he was appointed. Bombay must remember with special gratitude the work done on the Trust by Sir D. E. Wacha and Sir Ibrahim as popular representatives who gave efficiency and economy their proper place. In many a brush with the authorities they laid down the principle that the citizens had a right to demand of the Trust a due fulfilment of the plans entrusted to it. For ten years or over he was a severe monitor and the Trust benefited to a remarkable extent from the presence of an informed and vigilant critic. On the Corporation of course he was duly mindful of public interests. It was fortunate for the Bombay of a past generation that Sir Ibrahim like his great compeers never thought of himself as a Muslim chosen to advance his own community's interest.

His entry into public life coincided with his own withdrawal from business. The principles of an older era forbade the now-familiar mixture which does not always satisfy the strait-laced. It was after the war that Sir Ibrahim came to the fore so rapidly that many imagined that luck rather than ability underlay his rise to eminence. It was not merely a genius for co-operation but a passion for reform that sent him into the legislature, the Ministry, the Executive Council. He made a success of everything; adorned every office and laid the foundations of many an industry by his work on the Indian Fiscal Commission alone. Remarkable as were his gifts, to him alone was it vouchsafed to develop and display them. He could always steer a middle course and indicate to the most obstinate that public interests demanded a certain policy. A skimpy notice in this journal could never do justice to one whose public life began early and touched so many points. Mind and body served him well and few have looked out on the world in retirement with emotions and principles so unchanged from the emotions and principles which had touched and guided their youth. It would be an incomplete eulogy if no reference were made to his membership of the Whitley Commission or to his term as President of the Central Assembly. On the wider stage of Delhi he demonstrated that his mastery of legal and economic principles was complete. His knowledge of business and economics was altogether independent of academic instruction, and it was fitting that the best-known public document of this country should owe so much to one whose devotion to duty and truth did not blunt his genius for compromise.

(From Our Correspondent)

New Delhi, June 3.

THERE is likely to be further delay of a few days before an official announcement is made of the new appointments to the Viceroy's Council and the redistribution of portfolios. Evidently some matters are still under correspondence between London and New Delhi—it is even said that replies from one or two to whom an offer of Membership in the Council has been made, have not yet been received. In any case the official announcement is expected late next week or early in the week following. From New Delhi talks one gathers that the Viceroy's general plan is much on the same lines as the previous "expansion"—the inclusion of non-party members who are not only eminent in public life but can be looked upon as representative of certain important interests. It is now an open secret that Sir Ramaswami Mudaliar, the Commerce Member, has accepted the Viceroy's invitation to go to the War Cabinet on behalf of India and will probably be leaving this country in the second or third week of July. As the seniormost Member of the Government of India, he is the obvious choice, but it was not quite clear whether he would accept the invitation. As he has now finally agreed to go to London, a new Commerce Member has to be chosen—by no means an easy task as the Commerce portfolio is probably the most difficult and complicated one in the Government of India. I understand that the Viceroy is likely to offer the Commerce Membership to Mr. N. R. Sarker. If this materialises, the choice is bound to give great satisfaction, for not only is Mr. N. R. Sarker an experienced businessman himself but enjoys the confidence of the commercial community to a considerable degree.

* * * *

Formerly the choice of portfolios for new Members used to be made in more or less a haphazard manner. Not much attention was paid to the question whether the experience and capability of a particular Member were utilised in the best possible manner by the portfolio given to him. It was pointedly asked, for instance, whether persons like Mr. N. R. Sarker could not be used to greater public advantage by giving them portfolios more suited to their genius. I am told that the Viceroy is paying particular attention to this aspect of the problem and has, in selecting Mr. N. R. Sarker, been guided by this consideration. For the Education portfolio he is reported to be thinking of Sir A. F. Rahman or Dr. Ambedkar. The former is a distinguished educationist who is widely respected. The latter, though a politician, has also intimate experience of education. If, as is probable, an Indian Defence Membership is created, it may be offered to Sir Mahomed Usman as one of the most prominent Members of the National Defence Council. In that case the Education Membership may be given to Dr. Ambedkar. For the Information Membership the names mentioned are Sir Jogindar Singh or Sir A. F. Rahman. The Communications Membership will probably be split up, as already forecast. One portion, say the Posts and Telegraphs Department, is, it is understood, to go to Sir Sultan Ahmed the Law Member, for as there has been a longstanding complaint that the Law Member has no Administrative Department at all, this may give him sufficient work to do. The Railways may become one portfolio by itself, while the rest of the Departments—Civil Aviation, Road Transport, etc.—may be grouped into another. The name of an European non-official is still being mentioned for the Railway portfolio, but there is the consideration that the appointment of a non-official European to an important portfolio like Railways is not the way to meet the public demand for complete Indianisation. As it is not yet certain who will get the Education and the Information Memberships, one can only say that either Sir Jogindar Singh or Dr. Ambedkar will have to be given the bifurcated Communications portfolio. From such talk as I have had with Assembly Members I find that the feeling against the appointment of a non-official European is so strong that they may even prefer the appointment of an Indian official like Mr. S. N. Roy.

* * * * *

In the meantime there has also been another complication. It is believed that the Civil Defence Member, Dr. E. Raghavendra Rao, has decided to tender his resignation owing to ill-health. A suitable man has to be found for this important portfolio—a man of energy who has experience of civil defence work in other countries during the present war. The only man who can be thought of is Sir Firoze Khan Noon, who is at present Labour Member. For the Labour portfolio, which is comparatively a light one, any of the new members, like Sir Jogindar Singh or Sir A. F. Rahman, can easily be appointed. There are, however, persistent rumours that at the instance of certain non-official European leaders, the name of Mr. M. N. Roy is being considered for the Civil Defence Membership. This is evidently in pursuance of the plan to rally all communist sections in the country for the war effort. Evidently the question of including Mr. M. N. Roy is now before the authorities in Whitehall. As Sir Stafford Cripps is understood to have taken a particular liking to Mr. M. N. Roy, his selection cannot be ruled out as improbable. The name of Sir Shanmukham Chetti has for the present gone out of the picture. If and when other appointments are made for the proposed Production portfolio and also for the Home and Finance Memberships which, sooner or later, have to be transferred to non-official Indians, the names of Sir C. P. Ramaswami Iyer, Sir Shanmukham Chetti and one or two others are expected to be considered, but unless events move fast within the next few days, this can only be looked upon as a remote possibility.

* * * *

Startling revelations have been made to the public by military spokesmen on the Burma campaign. The want of air support after the fall of Rangoon was one initial difficulty, but two other points have now emerged. There were no proper land routes from India to Burma to facilitate the movement of troops and supplies. A road was under construction, but unfortunately it was not ready in time. The result was that after the fall of Rangoon the Allied troops in Burma were practically cut off from reinforcements and supplies and, for this reason, were forced to withdraw. The second fact which has been disclosed is that our troops had not been trained sufficiently for jungle warfare in Burma and resisting effectively the infiltration tactics adopted by the enemy. The Indian Army has excellently trained troops in the N.-W. Frontier who are fully acquainted with the conditions of that part of the country and are carefully trained for warfare under those conditions. Apparently such trained troops have not been made ready in sufficient numbers for warfare in the difficult geographical conditions of Burma with its thick jungles and rivers. Mechanised troops are not of much value in Burma, under present conditions, but if there had been strong bodies of troops trained for determined jungle fighting they would have been able to keep off the Japanese and fight them without experiencing any of those handicaps to which General Alexander referred. Had Burma been part of India, the present situation would probably have not arisen at all, for under a unified command the defence of Burma and India would have been properly and comprehensively planned. It is a heavy price indeed to pay for the political folly of separation.

* * * * *

The Burma Government's offices have now opened in India. The army authorities have now announced that though they have been obliged to withdraw from Burma, they are sufficiently strong in Assam and other parts of the North-East Frontier. Troops are now being trained for jungle fighting in the conditions of Burma. It may not therefore be too much to hope that very soon it may be possible for Indian troops to take the offensive and try to recover Burma. Air reinforcements are steadily pouring into this country. If at the same time land troops are available in sufficient strength who are trained for jungle warfare they can embark on a big campaign for retaking Burma and saving this country from Japanese aggression. Fortunately both Burma and Ceylon are now under the Indian Command.

* * * * *

There are reports that the Viceroy's term of office will be further extended—for the duration of the war this time—as the Churchill Cabinet is far too busy with war matters to think of these things just now and find a new man for the Indian Viceroyalty.

HILL BIRD.

THE BANK OF BARODA, Ltd.

( Incorporated in Baroda )

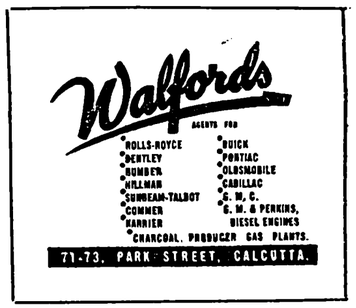
CURRENT DEPOSIT ACCOUNTS.—Interest on daily balances from Rs. 300 to Rs. 1,00,000 will be allowed at half per cent. per annum, and no sums over Rs. 1,00,000 by special arrangements. No interest which does not come to Rs. 5 per half year will be allowed.

FIXED DEPOSITS.—Received for long or short periods Terms on application.

LOANS, OVERDRAFTS AND CASH CREDITS.—The Bank grants accommodation on terms and undertakes on behalf its constituents the Safe Custody of Shares and Securities and the collection of dividends and interest thereon; it also undertakes the sale and purchase of Government Paper and all description of Stock at moderate charges. Terms on application.

SAVINGS BANK.—Deposits received and interest allowed at 1 per cent per annum.

SAVINGS BANK DEPOSIT ACCOUNTS.—Sums of Rs. 300 and over accepted at 1 per cent. by transfers from Savings Bank accounts, subject to three months' Notice on withdrawal. Rules on application.



W. G. GROUNDWATER, General Manager

# Gateway of India

(From Our Correspondent)

Bombay, June 3.

INDEPENDENT of the Motor Congress' advice to India's motorists to help in an emergency, there has been a press note drawing attention to the duty assumed by road transport interests and the possibility of an agreement on lines envisaged by the Motor Congress. It is now said that Mr. C. H. Reynolds has met the organisers of the Congress and has promised to consider their request for certain relief suggested in their resolutions. A deputation to Sir K. G. Mitchell was considered certain last week, and bus traffic after the brief strike in the City is likely to look up rather than go down. Meanwhile the blackout presents a problem to the Government which has asked motorists to help avoid accidents by driving carefully. Go slow, is the new slogan for motorists. What has been done in Britain in war must decidedly weigh with the authorities here who now ask motorists to crawl not run near a pedestrian crossing, a road junction or a roundabout. Only three simple rules are suggested to motorists as responsible citizens. Hit and run accidents are not many, but the usual precautions are being taken here.

Every day the markets here are firming up. Cotton is a little off colour but oilseeds look like going up again. Oil-millers are said to be buying upcountry and the Food Ministry thinks local prices too high. The market does not agree though supplies are getting larger of late. The recent report that the U.S.A. is going to send soap under lease-lend must give the market something to think about. The reduction in Britain's oil-seeds imports portended by the Ceylon copra contract is clinched by the news that toilet soap and laundry soap will be procured from the U.S.A. If wheat lacks the original bullish impulse, the speculators may continue to concentrate on oilseeds. This may give a chance to sellers of groundnuts in Madras though shipment may be a problem for them. For the present, the market keeps rising and the scarcity of so many foodstuffs operates to keep alive the belief that vegetable oils must be dearer, come what may.

Labour demonstrations against the Axis, and for the war effort, have helped to produce the feeling that workers are bound to help British labour fight the universal cause. Railwaymen share the feling that fascism is the eternal foe. In the mofussil, meetings were held last week to prove that Indian labour is ready to work without pause to overthrow the Axis. The G. I. P. Railwaymen's Union sponsored the meetings and every meeting wound up with a resolution asking for higher wages and a bigger dearness allowance. These meetings in a way help the national war front campaign but they are also meant to air the separate grievances of the railway workers. Their Federation gets the support it expects at this stage and the report that railways are earning one lakh a day over the 1941 average promotes the feeling that workers must get a share of the larger income produced by the war.

The award of Mr. Justice Chagla in the G. M. Assembly plant dispute has been published. Both sides put up a case and the award has been promptly given. He has ruled that the minimum wage and the annual increase proposed by the company in its classification should remain the same but the annual increments in each case should be four and the maximum wage proposed by the company should be altered accordingly. The company will pay wages at the rate of 49½ hours per week and continue to pay dearness allowance at the flat rate of seven annas a day for each worker. Mr. Justice Chagla has pointed out in his award that the Sewri plant works 45 hours per week and the men get paid for 49½ hours at present. The company has agreed not to raise the hours of work over 48 per week. And 26 working days a month will leave enough holidays to be given by mutual arrangement. As to the Company's proposal to close the plant for a week to take an inventory and grant a week's holiday without pay the award is favourable except that it says the workers should get 26 days' pay on an average in all months. The demand for a bonus equal to one month's pay has been met already and it is only in regard to the company's basically sound scheme for gratuities that alterations are recommended. Discretion is given to the Trustees of the proposed fund to decide if a man quits on account of age or ill-health. The award suggests that instead of one week as at present the worker should get two weeks' leave with pay though for the first three years of service the holiday will be limited to one week as before. For the strike period workers will under the terms of the award get three-fourths of the pay to which they are entitled instead of full pay as asked for.

Another award will come soon since Sir R. S. Broomfield will examine the BEST men's claims. The strike is at an end thanks to timely intervention by Government. Last week's strike was marred by intimidation on a big scale. Only a few vehicles took the road last week and the citizens found the heat a severe handicap even when walking on less crowded streets. The share market did not mark down Bombay Tram because the investment conditions are improving, and nobody thought revenue would be permanently affected.

The first effect of newspaper control—new style—was the rise in the price of all papers. *The Times* is now a two-anna paper because it will not cut down its features or news. The decision has been explained as due to Government's order and not due to any shortage of paper experienced locally. The vernacular papers cost an anna in nearly all cases, and the disappearance of familiar advertisements marks the coming of a new era. Many will agree that the papers that come from London are very skimpy and in fact Indian papers still employ their old format and retain the prosy language of an old era. There are many who think that if ads go out, the Gresham's law of the newspaper world will not operate and there is even a hope that readers paying higher prices will henceforth support views more than news. Organs of opinion should have a clear run since most of the papers will contain less news from the mofussil and just the cables that have been in hand or allowed to reach India. Readers have been asked to borrow copies instead of buying separate papers. *The Times* sold at two annas per copy during the last war and it is only because it wants to keep up its many market services that it has raised the price. Investors will still find the *Times* is an adequate guide to current share prices and dividend news etc. That is where the Times still leads India, not only in providing a forum for forgotten Liberals as to their own part in a Note on what is to be done to place a National Government in power.

Propaganda for changes in telephone tariffs has taken a strange form. The Chambers of Commerce do not like innovations especially if they are expensive and have said so already. But the Bombay Telephone want fewer calls and keep alive equipment in the war period. So ingenious advertisements appeared last week mainly to suggest that the message rate system has many points in its favour particularly in promoting a lower calling rate. Phone fans may be sowering in Rajputana but businessmen here think that a fixed rental and a rate per call will hit them in the pocket.

The IRTDA'S annual report dealt largely with difficulties occasioned by the war. The Chairman who presided over the annual meeting last week discussed the difficulties and asked once again for roads in rural areas. Dr. Antia remarked that it was not wise to curtail annual expenditure on roads which are still below standard. One result is that the usual rules relating to weight carried on lorries cannot be relased except in the cities of Bombay, Ahmedabad and Poona. Indifferent roads hamper transport development more than scarcity of fuel or shortage of vehicles. Reference was made to possible rationing of tyres and tubes and the only way to get the most out of roads was to spend more freely on their maintenance. Dr. Antia spoke as economist, not as engineer and quoted with approval the remarks of the Industrial Survey Committee. He admitted that

(*Continued on next page*).

# Resume of Commodity Markets

LAST week it was pointed out that the lull in the war situation had given a quietus to the food grains and that the jute and cotton markets, which were to a certain extent dependent on export trade, were looking up on hopes regarding early improvement in the freight position. It was at the same time pointed out that the problem was still one of providing adequate shipping and transport facilities and not one of finding demand, which was already there. There could not have been any material change in the position since then in the shipping position but a definitely hopeful feeling is now noticeable and the near east freight position is reported to be easier. It is not unnatural, therefore, that the jute maufactures, cotton, piecegoods and oilseeds markets have looked up.

One would have expected that there would be some improvement in prices for jute as well in view of the need for buying by mills. But unless the problem of dispensing with the surplus is satisfactorily solved and there is a reasonable prospect of the whole of the crop being consumed, there cannot be any sustained rise in values.

The Government are proceeding with their programme of effective control and several Price and Transport Boards have been established in the various provinces. It is the function of these various boards to check any undue rise in prices for essential commodities and arrange for proper supplies and transport facilities. It is expected by this means that it will be possible to prevent undue disparity in the cost of living between one centre and another.

### Jute Manufactures

The rise in the jute manufactures market is welcome but one would have wished it were more sustained. That it was mostly technical will be evident from the subsequent decline in prices. There has certainly been some demand from Bombay and Punjab and some allotment of shipping for U. K. There has also been some enquiry from the Plate. The rush for covering and buying resulted in an appreciable rise in prices, but once the demand was satisfied and covering was over, there was some profit taking. It is satisfactory to note, however, that sellers are more reserved. Demand has been good for 11 porters and heavy goods.

The local stock figures at the end of May, 1942, show a substantial increase in hessian stocks for ordinary consumption. Sacking cloth and bags for ordinary consumption also show a rise. The total of hessian stocks, exclusive of Government orders, was 29.10 crores yards against 25.27 crores yards. Sacking cloth and bags were 22.86 crores yards against 20.88 crores yards.

On Government account, sandbags at the end of May, 1942, were 12.52 crores yards and Scrim cloth 1.26 crores yards. Hessian bags and cloth and canvas were 11.07 crores yards against 8.80 crores yards. Sacking bags and cloth were 1.57 crores yards against 99.64 lakhs yards.

### Cotton

The rise in cotton in Bombay in the face of the sharp fall in prices in New York would seem rather surprising. But the strength of the stock exchange and the improving war situation, have enabled the consumer to appreciate the relative cheapness of Indian cotton. It is very difficult to get imported cotton and the price that has to be paid is fabulous. There has, therefore, been greater buying of Indian cotton. The strength of the piecegoods market has also been helpful.

### Piecegoods

After the dislocation in the piecegoods market in recent months, on account of the Japanese war, business is returning to normal. Mills have been able to resume forward selling. There was a good rise in prices all round.

The statement by Sir H. P. Mody that no fewer than 1,000 million yards of cotton textiles of various kinds will be taken from the Indian cotton industry from February 1942, to January 1943, should be encouraging to producers. The revival in exports also should be profitable.

### Wheat

With the suspension of futures business in wheat and gram no business was transacted in these two articles in Hapur during the past week. But a meeting of the dealers seems to have been held at which they expressed their dissatisfaction with the suggestion that the recent rise in prices was mainly due to speculative activity and they pointed out that price control had not been quite successful and had not brought out hoarded stocks.

One would have wished that with circumstances as they are, the area under wheat in 1941-42, showed an increase. The all-India fourth wheat forecast, however, estimated the area under the crop at 33,868,000 acres against 34,562,000 acres or a decline of 2 per cent. Fortunately, the yield is higher at 10,043,000 tons against 9,927,000 tons or an increase of 1 per cent. The condition of the crop is, on the whole, fairly good.

### Oilseeds

Oilseeds markets have been active. With the lower level of production and the good demand for export, sellers have been reserved. The British Government have not been able to get their requirements of linseed, rapeseed and groundnut at the scheduled prices.

The final all-India winter oilseeds (rapeseed, mustard and linseed) crops forecast 1941-42 indicates that there has been a sharp decline in both the area and yield of the linseed crop. The area is estimated at 3,340,000 acres against 3,619,000 acres or a decline of 8 per cent and the yield at 361,000 tons against 434,000 tons or a decrease of 17 per cent. It will be noted that the decline in the yield is more than in proportion to the decrease in the area under the crop.

The area under rapeseed and mustard is 6,208,000 acres against 6,218,000 acres or a decrease of 0.2 per cent while the yield is 1,109,000 tons against 1,103,000 tons or an increase of 0.5 per cent. The condition of the rapeseed and mustard crop is reported to be good and that of the linessed crop fair on the whole.

(Continued from previous page).

something was being done to carry out improvements and his main demand was that at least Rs. 15 lakhs more should be allotted for road maintenance this year. The Government of Bombay was praised for taking steps to encourage producer gas vehicles in the Province. The constitution of the Transport Board, the need to extend war effort, and changes in general control were dealt with at the meeting last week.

The Bombay papers made mention recently of the proposed inclusion of marine insurance policies for assignment and for subrogation as in other countries. The T. P. Act will omit reference to such insurance contracts. Only part of the request made by insurance interests has been met. Insurance companies can acquire all rights under the policy after the payment is made. English law secures them that right but Indian law is different though assignability will help in a way. The proposed change is largely due to a six-year old resolution of the Associated Chambers of Commerce which asked that U. K. legislation should be copied to the advantage of insurers in general.

(Continued from page 865)

tc notices in the papers as to the reconstruction in India of the Burma branches. Depositors have been informed that no cheques can be drawn until the whole thing gets going. What is important to note here is that the British Exchange Banks as also the Imperial Bank of India and Lloyds Bank have been able to start the accounts department in a way. It is a miracle of reconstruction, for which Indians will be duly grateful. No Indian jointstock bank has yet indicated how its Rangoon and other Burma accounts will be reconstituted or how claims will be accepted. The difference will be grasped in assessing the place of exchange banks during and after the war. How far deposits in Burma grew and how much was remitted before defeat and evacuation cannot be described. Nothing has been said yet as to the deposits made by banks and insurance offices in Burma with the Reserve Bank. Whether the office shifted from Shwebo to India is working at all and where, is not known. The office must keep track of financial questions raised by the Burmese war and advise on measures to guard against the enemy's cunning on the basis of previous experience, and also as to precautions on the Assam land frontier.

### Banking and Agriculture

The co-operative banks in Bombay are important though standing outside the commercial banking system, and their present anxiety to maintain contact with agriculture, conditions the criticisms made at the Conference in Poona held in the last week of May. It was said by Mr. R. G. Saraiya that rural credit facilities were never more necessary, and he wanted the banks to extend aid to agriculture. The speech reported in the Bombay papers dealt with price control, commodity shortages and other wartime phenomena. The banking system in India may be sound and steady, but there is strain. There has been loud comment on the rising cost of living and the ineffectiveness of official regulation. It is also recognised generally that the difficulties of the agriculturist are not likely to recede after an assurance that his crops will be saleable under a scheme of governmental purchase. His standard of living may not rise even if he adopts the grow more food plans and if he is handicapped by the lack of such elementary necessities as salt, sugar and kerosene, his co-operation will appear, to him at least unprofitable. How far banks would be affected by the difficulties of the farmer of not having cash crops to clear off debts, seems uncertain, but in this case there is the estimate of larger overdues and more frozen assets on the part of Mr. Saraiya. The co-operative banks are not likely to progress much if the old handicaps persist and cheap money will have no meaning for the countryside. The lack of true contact between the co-operative movement and the money market in India has been frequently mentioned but the true line of reform has not been indicated. A system of warehouses for produce advances has often been advocated so that produce bills are to be treated as commercial paper. Mr. Saraiya's reference to American practice in regard to preserving stability of commodity prices by means of parity payments or storage against loans will seem unusual since the burden of carrying out the policy will fall on the Provinces, and their governments are ill-placed to shoulder such burdens. The more important point to note here is that price control will limit the profitability of agriculture and therefore the expansion of the co-operative movement's funds. The condition of stagnation forecast by Mr. Saraiya has been so long established that the Reserve Bank's assistance to the Provincial Banks at any time may make little difference. Though co-operative banks may seem safe to their many depositors, and as far removed from the shocks of war as life insurance, there is little doubt that they cannot finance agriculture as they would like when their resources are limited.

### Saving Democracy

The account of speculative investment contained in "Democracy is Doomed Unless"—(Allied Publishers, Bombay, Re. 1) is both instructive and pleasing. The technique of investing against the trade cycle is indicated to advantage but nothing is said as to the present phase—whether the present war is a factor making for bulls working up to a boom or the bears who want to realise and invest in giltedged. That is the crux of the problem, not even elimination of fluctuations. As the title indicates the book is meant to examine industrial fluctuations. Much has been said about the trade cycle and the brief exposition is decidedly meant for others besides the professional student. What is however overwhelmingly important to the democrat is the abolition of unemployment. Various remedies are described, and the control of credit is approved on principle. The movements in the rate of interest do not seem to have the same value as before, and the present low rates are obviously favourable to war finance. That unemployment has been abolished by the war and there is no need for safeguards against excessive lending is tactly ignored. The analysis of the trade cycle is clear and forceful and the remedies are listed formally one is the restriction of credit to those who can benefit Margin dealings with brokers are disapproved and not for the usual reasons either. The book is little more than a pamphlet, and the author promises that a longer work is coming. Lest it be misunderstood the work reviewed is not like that of any currency crank. As for the author stability of prices, profits and wages appears to him, and to all of us, as the mark of a perfect society. The control of advances by banks seems appropriate, and if one goes by the recent control measures in Australia, the kind of remedy wanted for saving democracy is being applied already.

(Continued from page 883).

1949-52 is in demand roundabout Rs. 98-8. Present signs are propitious for giltedged; and it may not be long before the Second Defence Loan is again at par. A more optimistic feeling has prevailed in all stock exchanges; and, while good class preference shares have been in good demand, substantial gains have also been recorded in equity shares.

The closing rates are: Banks buy T.T. 1s. 5 31/32d., and banks sell T.T. London Ready to six months forward at 1s. 6 1/32d.

Banks sell three months D.A. bills for first and second months at 1s. 6 9/32d., and for the third and fourth months at 1s. 6 5/16d.

Money remains easy with interbank call money quoting ½ per cent.

Firms money for one to four months deposits quoted ½ per cent.

Banks buy T.T. New York Ready at Rs. 329½ for $100.

Banks sell T.T. New York Ready at Rs. 332¾ for $100.

# Jute and Jute Manufactures

(By Our Jute Correspondent)

Calcutta, 4th June.

Osnaburg is a name that has hitherto conveyed little to most people concerned in the Jute Industry and has certainly received even less consideration. In nine cases out of ten it would probably be dismissed as another of those places in Germany bombed by the R.A.F. But the word looms rather largely over the pages of the most recent issue of the Indian Central Jute Committee Bulletin, and it might well become a word of ill omen to the Jute trade if greater attention is not paid to it in future. Originally applied to a coarse linen fabric manufactured in the town of Osnaburg in Germany, the word has now been adopted in the U.S.A. as the trade description for a cotton fabric manufactured out of low grade cotton. Bags made of this fabric are largely used in the retail distribution trade for a variety of commodities, and the bag has this attraction, that after its term of use as a container, it can be applied by the housewife to a variety of domestic purposes. Osnaburg has long been quoted in American market reports as a competitive fabric to "Burlap" and it is to be noted that Osnaburg is almost invariably the cheaper. But there are certainly well defined lines in which the two fabrics can be used interchangeably and it is in this respect that the Jute Industry should sit up and take notice. Apparently foreseeing the possibility of a scarcity of burlap owing to the shipping position, the United States War Production Board decided to co-ordinate the Osnaburg and Burlap programme so that enough of one or the other would be available for all essential needs. To this end, and to encourage increase in the production of Osnaburgs, it was announced that the Defence Supplies Corporation would purchase 200 million yards of the fabric. Osnaburgs will be used for sand-bags, food-bags, packing, camouflage and for various other purposes, in fact for all purposes to which burlap is normally applied, and it is for this reason that the situation requires very careful watching by the Jute industry if an important section of their trade is not to be lost to them.

This is not the only danger brought about by war conditions which is instanced in the Bulletin. Negotiations have been going on with the Kraft Makers Committee in the States to find ways and means of replacing burlap and heavy duty sacks by the use of heavy duty paper bags, particularly in the shipment of agricultural and chemical products and in other lines of industry. Again, the Department of Agriculture in the U.S.A. announces a programme providing for the manufacture this year of up to 4 million cotton bale coverings. This programme is directed by the Surplus Marketing Administration which will apparently pay a subsidy of 35 cents per cover to manufacturers who make the specified patterns and who sell them to cotton producers, ginners etc. at controlled prices, raw cotton being made available to manufacturers from Government owned stocks at prices which will enable them to do so at a reasonable profit. Again, it is reported from the Argentine that, as a result of the shortage of bags, millers have been notified that they can only be supplied with 70 per cent of their normal requirements of bags; and that a large capital is to be invested in the construction of a national factory for the purpose of turning out some 30 milion cotton bags a year from locally grown cotton, while a substantial subsidy has been granted by the Government to encourage the production of cotton bags by "home" weavers, on the cottage industry principle.

It is becoming increasingly apparent therefore that the abnormal conditions arising from the war, and in particular the scarcity of freight, are creating problems for the Jute industry which will require very careful watching and most serious thought for their solution. So long as the shipping shortage persists, little tangible can be done. But one safeguard definitely can be taken even now, and that is the commencement of the creation of a "stock-pile" on the lines which we suggested last week, so that as soon as freight is available, supplies of all descriptions of jute goods may be expedited to consumers at short notice, at the same time avoiding the danger of ransom prices which would almost certainly result from a resumption of free shipment, if this precaution of the "stock-pile" reserve is not taken.

An admirable article is reproduced in the Bulletin from "Indian Farming" entitled "Hints to the Jute Grower," in which the cultivator is instructed how to avoid or eliminate faults occurring in the preparation of the fibre for market, it would certainly be most gratifying if this were taken to heart, but we very much fear that it is as bread cast upon the waters, except that it is not likely to return even after many years. There is in fact no suggestion as to how, if at all, the information is to reach the average illiterate cultivator.

We must congratulate those concerned on the appearance, at long last, of the Sample Boxes for the display of Standard Samples of Jute on the Royal Exchange. The idea is admirable. The only thing that remains now is the preparation of the samples. It is not quite clear who is to undertake this. The efforts of the Jute Dealers in that connection a year or so ago did not meet with much encouragement. And to be of any value at all the samples must have the official approval of all sections of the trade.

There is little to report in the Export Jute market, though it is on record that some enquiry has been coming forward from Dundee, mainly for Daisee at around Rs. 51 to Rs. 52. But as much of this comes through Baler-Shippers, it is not always easy to estimate what is done. L. J. A. Firsts for shipment quote nominally Rs. 48 and for Mill delivery, Rs. 51. A small business with Mills in Hearts is reported at Rs. 27.

In Loose Jute there has been a limited turn-over, mainly in Tossa, sales being reported in European packing at Rs. 10-8 Middle and Rs. 7-8 Bottoms, in Supervised marks at Rs. 10 and Rs. 7 and in Indian District at Rs. 9 and Rs. 9-4 Middles and at Rs. 7 Bottoms. Indian District Tossa Tops were also reported at Rs. 11, and Supervised White Bottoms at Rs. 6. Rumours of business in New Crop lack confirmation.

Crop prospects continue satisfactory and it is reported that cutting has actually started to a small extent in some of the earlier districts. River levels on the Jamuna side are rather above normal, but elsewhere, normal.

Earlier during the reporting period the Fabrics market ruled firm with a brisk demand, mainly for heavy goods for the country trade. This demand however seems to have been satisfied for the time being and with sellers predominating, prices all round have been sharply marked back. "B" twills which were freely dealt in from Rs. 40 to Rs. 42 ready are now back to Rs. 40-8. Liverpool Twills sold up to Rs. 43, but are now offered at Rs. 41. Covering business was reported in Cornsacks for June at Rs. 39-8 also a fair line for July-September at Rs. 38. Interest in the Hessian section has been very slender and little falls to be reported except in 45-11 oz. at from Rs. 22-8 back to Rs. 22 ready. Standard hessians have moved in sympathy, nine porters being now quoted at Rs. 14-4 after Rs. 14-12, and elevens being down from Rs. 18-12 to Rs. 18-6.

The market closes quiet and easy in the absence of demand:—

| | Ready | June | July-Sept. |
|---|---|---|---|
| | Rs. a. | Rs. a. | Rs. a. |
| 9 Porters .. | 14 4 | 14 4 | 14 4 |
| 11 Porters .. | 18 6 | 18 6 | 18 6 |

## JUTE

*Calcutta*, June 4.

RATHER dull and idle conditions have continued to prevail in the jute market during the past week. Mills and balers have been quiet and are not willing to enter into new commitments. The reports regarding the progress of the new crop continue to be satisfactory and it is expected that there will be early arrivals of the new crop. The outlook is uncertain and without any appreciable increase in exports of jute manufactures mills are not willing to lay in stocks.

In the loose jute section, business has been on a restricted scale. European Jat and District Tossa Middles were done at Rs. 10-8 and Supervised Jat Bottoms at Rs. 5-4 per maund.

In the pucca bales section shippers have not taken any interest in the market. Beyond the shipment to Russia of small quantities, reported last week, no further business has been transacted.

## JUTE MANUFACTURES

*Calcutta*, June 4.

THE jute manufactures market was definitely firmer in mid-week. Month-end covering, some business for U. K. shipment and the reports regarding the possibility of freight being available in the near future resulted in a sharp rise in values. The demand for 11 porters especially was good and the rise in prices for the same was more pronounced. There has been some selling at the close and quotations are lower than the highest levels though considerably higher on balance. 9 porters ready are quoting Rs. 14-4, June Rs. 14-4 and July-September Rs. 14-2 against Rs. 13-12, Rs. 13-12 and Rs. 13-10 respectively at the time of last writing. 11 porters ready were Rs. 18-6, June Rs. 18-6 and July-September Rs. 18-6.

In the Heavy goods section also there has been good demand. There is good business in "B" twills and Heavy Cees. Here too, as in the hessian market, closing quotations are lower. "B" twills ready sold on the basis of Rs. 41, Liverpool twills Rs. 42-8 and Cornsacks Rs. 10-8.

## GOLD

*Calcutta*, June 4.

ABSOLUTELY uninteresting conditions have been noticeable in the Bombay gold market during the past week and quotations have been fluctuating in very narrow limits. There has been a slight recovery towards the close of the week. After being lower at Rs. 48-5 gold ready is now quoting Rs. 48-12. First settlement is again one anna lower at Rs. 48-11. The quotation for sovereigns is Rs. 37-1.

## SILVER

*Calcutta*, June 4.

THE silver market was inclined to be firm early in the week as there was a scarcity of stocks in Bombay. There have been no important fluctuations in prices during the past three days. Indian Mint Silver ready is quoting Rs. 80-10 and First Settlement Rs. 77-10. Burma silver continues to be quoted at a premium of Rs. 2-8 over silver for delivery at the Calcutta mint.

In the London market absolutely uninteresting conditions have continued to prevail. The quotation for both spot and forward is unchanged at 23½d. Trade demand was met by production selling.

## COTTON

*Calcutta*, June 4.

DEFINITELY firmer conditions have been noticeable in the Bombay raw cotton market during the past week. The encouraging war news, the strength of the stock exchange and the firmness of the linseed markets have been mainly responsible for the rise in prices. There has been good buying by commission houses and profit-taking at the higher levels has been well-absorbed. The rally towards the close of the week has occurred in spite of the lower New York advices. Broach April-May were Rs. 192-12, Bengal Rs. 154 and Oomra Rs. 171-8 against Rs. 181-8, Rs. 145 and Rs. 165-8 respectively.

The New York market has not been quite active. There is a general tendency to await farm legislation developments. Quotations are substantially lower with July at 18.50 cents and October at 18.77 cents.

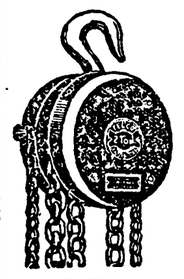
## WHEAT

*Calcutta*, June 4.

THE wheat market has continued firm. With the ban on futures business in wheat and gram, Hapur dealers have suspended futures transactions. The All-India fourth wheat forecast published during the week estimated the area and yield at 33,868,000 acres and 10,243,000 tons respectively against 34,562,000 acres and 9,927,000 tons respectively in 1940-41. There is thus a decrease of 2 per cent in area but an increase of one per cent in yield. The condition of the crop is fairly good on the whole.

## PIECEGOODS

*Calcutta*, June 4.



RATHER active conditions have been noticeable in the local piecegoods market during the past week. There has been greater demand from upcountry centres. Mills have done some business. Japanese styles continue to be in request and stocks are declining.

The yarn market also has continued firm and good business has been done in coarse and medium counts.

## BIRD & HEILGERS JUTE GROUP RESULTS

THE consistent improvement in prices on the Bombay market has led to a revival of activity on the Calcutta Stock Exchange as well. On the last occasion, I pointed out that, with the continuance of the same conditions, there was a likelihood of an improvement in values. Operators in both centres now seem to feel that with the lull in the Far Eastern situation and the encouraging news from the West the immediate outlook has improved.

There are reports that the Committee of the Calcutta Stock Exchange will consider the removal or relaxation of restrictions regarding the minimum prices at a meeting to be held for the purpose next week. It is unnecessary for me to emphasise here that any consideration of the removal of restrictions regarding trading is premature at this stage. For it is not possible to do away with minimum prices even in one section. At the moment only a few counters are quoting substantially above minimum rates.

• • • • •

The results of the Bird and Heilgers group of companies for the half-year ended March, 1942, reflect in some measure the deterioration in trading conditions in the jute industry since the beginning of the year. The directors point out that the decline in earnings for the last half-year over those for the previous six months was due to the increase in working expenses and a lower level of production on account of shortage of labour.

The aggregate profit for the group of 10 companies for the six months ended March, 1942, before providing for taxation and depreciation, is Rs. 81,90,879 against Rs. 96,27,797 for the previous six months. In spite of the lower level of earnings it has again been necessary to provide a large amount for taxation, Rs. 52,84,614 against Rs. 64,50,401 on the previous occasion. The provision for taxation works out to 64.5 per cent of earnings as against 67.0 per cent. If the directors had not considered it necessary to allocate large sums to reserves it would have been possible to avoid a big decline in dividends in the case of certain companies. In any event, an apparent decline in dividends was inevitable as the ordinary dividends had to be paid in the case of most companies on a larger capital. Bonus shares were issued to shareholders during the last half-year. The amount allocated to depreciation and reserves is Rs. 16,54,865 against Rs. 13,35,388 previously while the dividends paid absorb Rs. 14,60,034 against Rs. 18,64,750.

Regarding prospects for the current half-year the directors point out that it is more difficult than ever to forcast conditions in the future since so much depends on the course of the war. The prosperity of the industry must depend on reasonable facilities for the despatch of goods from Calcutta to the overseas markets and an adequate supply of labour.

Auckland is paying a dividend on the ordinary shares at Rs. 3-8 per share against Rs. 4 per share; Clive As. 6 against As. 14; Dalhousie Rs. 6 against Rs. 10; Kinnison Rs. 7½ against Rs. 16; Lansdowne Rs. 4½ against Rs. 6; Lawrence Rs. 10 against Rs. 12½; Naihati Rs. 4 against Rs. 8; ;Northbrook As. 10 against Re. 1; Standard Rs. 5½ against Rs. 10 and Union Rs. 9 against Rs. 15. The total capital, preference and ordinary, eligible for dividend was Rs. 3.15 crores against 2.60 crores.

The earnings of Lawrence, Naihati, Northbrook and Standard make a poor showing.

• • • • •

The net profit, before providing for taxation and taxation, of the *Kinnison Jute Mills Company, Limited* for the half-year is Rs. 13,10,584 against Rs. 14,82,207 for the previous half-year. The provision for taxation is Rs. 7,91,400 against Rs. 9,64,441 while the amount set aside to depreciation is Rs. 65,269 against Rs. 65,266. The allocation to Welfare Reserve is unchanged at Rs. 50,000. As against Rs. 1 lakh to Reserve the same amount is transferred to War Contingency Reserve. The sum of Rs. 22,752 is utilised for revaluation of investments. The ordinary dividend is Rs. 7-8 per share against Rs. 16 per share. As the ordinary capital ranking for dividend is Rs. 30 lakhs at the end of last half-year against Rs. 15 lakhs at the end of September 30, 1941, the dividend now distributed amounts to Rs. 15 per share on the original capital. The amount carried forward is Rs. 31,949 against Rs. 28,286 brought in.

• • • • •

In spite of the fact that there was no bonus issue in the case of the *Clive Mills Company, Limited*, it has not been possible to avoid a sharp decline in the ordinary dividend. Out of the net profit of Rs. 7,46,629 (Rs. 9,03,187) the sum of Rs. 5,02,578 (Rs. 6,28,998) has been provided for taxation. The same amount Rs. 64,876 has been set aside to depreciation while Rs. 15,000, as before, has been placed to Welfare Reserve. Rs. 25,000 has been transferred to War Contingency Reserve in addition. The ordinary dividend is lower at six annas per share against fourteen annas per share.

• • • • •

The accounts of the *Champdany Jute Company, Limited* for the same half-year, on the other hand, make a very satisfactory showing. The net profit, before providing for taxation and depreciation, is Rs. 13,46,614 against Rs. 10,95,142 for the previous half-year. The amount set aside to taxation is Rs. 1,93,552 against Rs. 1,92,982. The provision for taxation is Rs. 7.5 lakhs against Rs. 5.50 lakhs. In view of the uncertain outlook the directors have decided to maintain the dividend at Rs. 6 per share only. The amount carried forward is Rs. 1,08,786 against Rs. 60,708 brought in.

Regarding the prospects for the current half-year the directors remark as follows:

"Shipping facilities have recently been the subject of grave concern and while the sacking section is relatively satisfactory, the outlook generally is hardly promising. Working costs continue to increase, the result of which, in conjunction with lower price levels for manufactured goods, points to a decline in profits for the current six months. It should be noted, however, that any improvement in the shipping situation would at once be reflected in market conditions."

• • • • •

A larger crop and a higher average price realised on the sale of tea have resulted in a substantial increase in earnings of the *Teliapara Tea Co., Limited* for the year ended December, 1941. The net profit, before providing for taxation and depreciation, is Rs. 2,76,678 against Rs. 1,94,540 for 1940. The amount transferred to Taxation Reserve is Rs. 34,000 against Rs. 72,000. The final dividend of 25 per cent with the interim dividend of 10 per cent already paid makes 35 per cent for the whole year. The amount carried forward is substantially higher at Rs. 1,03,010 against Rs. 53,415 brought in.

The crop turned out from the Teliapara estate was 6,765 maunds against 6,073 maunds and the average price realised was ten annas eleven pies against nine annas eight pies per lb. On the Satchurie Estate the crop made was 3,517 maunds against 2,966 maunds and the average price realised ten annas five pies against nine annas five pies per lb.

WATCH-DOG.

# The Week in the Exchanges

## CALCUTTA STOCK EXCHANGE

*(From Our Correspondent)*

Calcutta, June 5.

THE Calcutta Stock Exchange has continued firm during the past week and there has been a definite broadening of interest in the several sections. Even on the last occasion it was remarked that sellers were rather reserved and asking for higher rates. The absence of any developments in the war situation in the East and the encouraging war news from the European front have been mainly responsible for the improved tone of the markets. Greater attention has been paid to equities and it is interesting to note that Indian Irons and Steel Corporations have recorded a substantial rise in prices. After the consistent rise in prices during the past two weeks, there has been some profit-taking and closing prices are lower than the highest levels for the week. A larger number of transactions has been recorded in other sections as well. The undertone is steady.

Giltedged securities have continued firm though there has not been any appreciable rise in prices. Money has been cheap with the treasury bills rate lower at one rupee one anna seven pies per cent per annum. 3½ per cent Paper was slightly higher at Rs. 91-5. Among terminable loans, 3 per cent Defence Bonds were Rs. 100-14, 3 per cent 1949-52 Rs. 98-8, 4 per cent 1960-70 Rs. 105-4 and 5 per cent 1945-55 Rs. 107-4. Among provincial loans, 5 per cent U. P. 1944 were Rs. 103-2.

Not much business has been reported in public bodies debentures, 6 per cent, *Calcutta Port Trust* debentures being done at Rs. 106 and 5½ per cent *Calcutta Improvement Trust* debentures Rs. 103. Among industrial debentures, 5½ per cent *Dalmia Cement* debentures were Rs. 104 and 5¼ per cent *Rohtas Industries* debentures Rs. 103-8.

First class jute mills preferences have been in greater request with *Albion* done at Rs. 125, *Auckland* at Rs. 121, *Cheviot* at Rs. 130-8, *Khardah* at Rs. 122, *Fort William* at Rs. 129 and *Northbrook* at Rs. 127. Among other shares, *Elgin Mills* preferences were noted at Rs. 150. *Indian Standard Wagon* preferences at Rs. 128 and *Steel Corporation* at Rs. 99-8 cum-dividend.

Bank shares have remained steady with *Imperial Bank* contributories quoting Rs. 378 and *Reserve Bank* Rs. 98-8.

In the Coal section, very little attention has been shown and only a slight interest has been noticeable. *Burrakur* were done at Rs. 13-8, *Ghusick and Muslia* at Rs. 4-8 and *East Indian* at Rs. 15-10 ex-dividend.

Coal shares have been in good request. It will be remembered that on the last occasion *Elgin* had buyers upto Rs. 32. The quotation is now around Rs. 32-14. *Cawnpore Textiles* are quoted Rs. 9-4. *New Victoria* also have been marked higher at Rs. 6-1 and *Kesoram* at Rs. 8-10.

In the Jute section not many transactions have been recorded in spite of the strength of the other sections. The confused outlook for the industry is still having a restraining influence. Among the few transactions recorded, *India* changed hands at Rs. 338, *National* at Rs. 21-8 and *Waverley* at Rs. 2-15.

Engineering share shave been active with Indian Irons and Steel Corporations quoting nearly two and a half points higher on balance. *Indian Iron* were noted as high as Rs. 28. Some profit-taking at the higher levels has brought down the quotation to Rs. 26-14. The quotation at the end of last week was Rs. 24-5. *Steel Corporation* are now quoting Rs. 16-14 against Rs. 15-5 at the time of last writing. *Burn & Co.*, were dealt in after a long time at Rs. 325, *Indian Galvanizing* at Rs. 32, *Indian Malleable Castings* ordinaries at Rs. 6-8, *Indian Steel and Wire Products* deferreds at Rs. 35-8 and *Marshalls* at Re. 1-15.

Sugar shares have been in good request with *Carew & Co.* at Rs. 12, *Murree Brewery* at Rs. 17-8 and *New Savan* at Rs. 14. *Champarun* were higher at Rs. 23-12, and *Samastipore* at Rs. 12-8.

Tea shares have not attracted very much attention, *Pathemara* being noted at Rs. 11-2, *Amluckie* at Rs. 77 and *Hansqua* at Rs. 11 ex-dividend.

In the Miscellaneous section, *Indian Copper Corporation* have been marked higher with the quotation at Rs. 2-4. *B. I. Corporation* were Rs. 4-12, *Bararee Coke* Rs. 27-4 and *Indian Cable* Rs. 19-8. Among Paper shares, *India Paper Pulp* were Rs. 135-8, *Orient Paper* Rs. 15-10, and *Titaghur Paper* Rs. 18-4.

## BOMBAY STOCK EXCHANGE

*(From Our Correspondent)*

Bombay, June 4.

There has been a definite improvement in sentiment in the several sections on the Bombay Stock Exchange during the past week and substantial rises in prices have been recorded. The encouraging war news and the improved outlook for industries have been mainly responsible for the higher values. The return to activity during the past two weeks indicates that there has been a complete return of confidence. Only towards the close, there has been a slightly easier tendency with profit-taking at the higher levels. The undertone in the several sections, however, is steady.

*Securities.*—Giltedged securities have been firm with 3½ per cent Paper quoting Rs. 91-4, 2¾ per cent 1948-52 Rs. 95-14, 3 per cent 1951-54 Rs. 97-8, 4 per cent 1960-70 Rs. 105-12 and 4½ per cent 1955-60 Rs. 105-12.

*Textiles.*—The strength of the piecegoods market and the receipt of large war orders from Government have had an encouraging effect on the section. The popular shares have been in request from the beginning of the period under review. *Bombay Dyeing* were nearly 100 points higher at Rs. 1,222-8, the highest quotation for the week being Rs. 1,236. *Central India* were Rs. 373 against Rs. 338 forward. *Century* were Rs. 471 cash, Kohinoor Rs. 502 forward and Rs. 496 cash.

*Steels.*—*Tata Steel* ordinaries and deferreds have recorded a sharp rise in values. The earlier rumours regarding the possibility of a reduction in the dividend for the year ended March, 1942, have not been discounted. *Tata* deferreds were Rs. 1,645 (Rs. 1, 605 cash) against Rs. 1,425 (Rs. 1,420 cash). The encouraging view taken by operators regarding the immediate future is evident from the increase in the premium for forward over cash. *Tata* ordinaries were Rs. 321 (Rs. 318 cash) against Rs. 275-8 (Rs. 273).

*Hydro-Electrics.*—This section also has been steadier with *Andhra Valley* at Rs. 1,625, *Tata Hydro* at Rs. 166 and *Tata Power* at Rs. 1,525.

*Miscellaneous.*—*Alcock Sugar* are unchanged at Rs. 472-8 while *Belapur Sugar* have been marked higher at Rs. 250. *Scindia Steam* were Rs. 21-14, *Shivrajpur Syndicate* Rs. 37 and *Bombay Tram* Rs. 131. *Associated Cement* were in great favour and were several points higher at Rs. 168.

*Includes Rs. 15,000 from Dividend Equalization Fund.

*(Half-yearly meeting, 17th June, 1942 at 10-20 a.m.)*

*Audited accounts for the half-year ended 31st March, 1942:—*

The accounts show a profit of Rs. 8,03,652-7-3. After providing Rs. 5,19,840-0-0 for taxation (including Excess Profits Tax) Rs. 43,129-0-0 for depreciation and placing Rs. 30,000-0-0 to Welfare Reserve and Rs. 25,000-0-0 to War Contingency Reserve, there is an available balance at credit of Profit and Loss Account of Rs. 2,05,231-4-2 which includes Rs. 19,547-12-11 brought forward from last half-year.

It is proposed to dispose of this sum as follows:—

| | Rs. | A. | P. |
|---|---|---|---|
| In paying a dividend on the Preference shares at the rate of Rs. 7 per cent per annum, without any deduction for income-tax paid by the company .. .. .. | 52,500 | 0 | 0 |
| In paying a dividend on the Ordinary shares of Rs. 6 per share without any deduction for income-tax paid by the company .. | 1,33,758 | 0 | 0 |
| In carrying forward .. .. .. | 18,973 | 4 | 2 |
| Total .. | 2,05,231 | 4 | 2 |

Stocks of jute have been taken at or under cost price and manufactured goods at contract rates.

As it is considered prudent to make some provision against the many risks that beset the company as a result of the spread of the war in the East, it is decided to create a War Contingency Reserve.

Full provision has been made for taxation, including the additional income-tax and super-tax resulting from the recent increase in rates, which affect not only the profits of the half-year under review, but also those of the previous half-year. It is possible that some relief with regard to Excess Profits Tax may be obtained later but the company's claims in this respect have not yet been decided by the authorities.

*(Half-yearly meeting, 17th June, 1942 at 10-10 a.m.)*

*Audited accounts for the half-year ended March 31, 1942:—*

The accounts show a profit of Rs. 12,87,832-7-0. After providing Rs. 7,91,400-8-0 for taxation (including Excess Profits Tax), Rs. 65,269-0-0 for depreciation and placing Rs. 50,000-0-0 to Welfare Reserve and Rs. 1,00,000-0-0 to War Contingency Reserve there is an available balance at credit of Profit and Loss Account of Rs. 3,09,448-9-3 which includes Rs. 28,285-10-3 brought forward from last half-year.

It is proposed to dispose of this as follows:

| | Rs. | A. | P. |
|---|---|---|---|
| In paying a dividend on the Preference shares at the rate of Rs. 7 per cent per anum without any deduction for Income Tax paid by the Company .. .. .. | 52,500 | 0 | 0 |

| | Rs. | A. | P. |
|---|---|---|---|
| In paying a dividend on the Ordinary shares of Rs. 7-8 per share without any deduction for Income Tax paid by the Company .. | 2,25,000 | 0 | 0 |
| In carrying forward .. .. .. | 31,948 | 9 | 3 |
| Total .. | 3,09,448 | 9 | 3 |

Stocks of jute have been taken at or under cost price and manufactured goods at contract rates.

As it is considered prudent to make some provision against the main risks that beset the Company as a result of the spread of the war in the East, it is decided to create a War Contingency Reserve.

Full provision has been made for taxation, including the additional Income-tax and Super-tax resulting from the recent increase in rates, which affect not only the profits of the half-year under review, but also those of the previous year.

In accordance with the working time agreement of the Indian Jute Mills Association the mills have worked 60 hours a week from the beginning of November, 1941. As from May 18, 1942, it has been decided to reduce production to 54 hours a week and to seal 10 per cent. of the looms.

The output of the mills was easily disposed of during the half-year, large quantities of goods having been taken by the U. K. Indian and Australia Governments. Shipment has, however, become more difficult and financial arrangements with buyers are also causing some anxiety. Costs have increased owing to expenditure of A.R.P. higher prices of stores, and greater War Risk Insurance premium; and results have also been adversely affected by a shortage of labour, numbers of workers having left Calcutta for places which they consider safer.

During the half-year, in common with all members of the Indian Jute Mills Association, it was agreed to grant six days' holiday with pay to workers yearly. On the reduction of working hours to 54 a week, it has been decided to grant a weekly allowance of annas 12 a worker in place of the monthly allowance of Rs. 1 mentioned in the last report.

It is difficult than ever to forecast prospects for the future since so much depends on the course of the war. The prosperity of the industry must depend on reasonable facilities for the despatch of goods from Calcutta to overseas markets and an adequate supply to labour.

Interest is paid at 4 per cent. in respect of year on which option was exercised (j) After 3 per cent on ordinary Shares eligible for half of the surplus profits (k) 4½ per cent guaranteed convertible registered mortgage debentures (unconditionally guaranteed as to principal and interest by the Indian Iron & Steel Co., Ltd.) Issued at par in May, 1937, repayable at par on 1st January 1967, option redemption in whole or in part at 2 per cent premium on six months' notice on any interest date after 1st January, 1947. Option to holders at any time upto 1st January, 1947 to convert £50 worth debentures into 40 Ordinary Shares of Rs. 10/- each. (l) Entitled to a non-cumulative dividend of 25 per cent. per annum, after the dividend on preference shares as and 8 per cent. on ordinary shares (m) Repayable after 1944 with the option of redemption after 1940. (n) Includes 1 per cent being arrears for 1937-38.

(*Continued from page* 888).

Full provision has been made for taxation including the additional Income Tax and Super Tax resulting from the recent increase in rates, which affect not only the profits of the half-year under review but also those of the previous half-year. It is possible that some relief with regard to Excess Profits Tax may be obtained later, but the Company's claims in this respect have not yet been decided by the authorities.

(*Half-yearly meeting, 17th June, 1942 at 10-45 a.m.*)

*Audited accounts for the halfyear ended 31st March, 1941:*—

The accounts show a profit of Rs. 6,86,832-0-4. After providing Rs. 4,41,446-0-0 for taxation (including Excess Profits Tax) Rs. 52,311-0-0 for depreciation and placing Rs. 30,000-0-0 to Welfare Reserve and Rs. 25,000-0-0 to War Contingency Reserve, there is an available balance at credit of Profit and Loss Account of Rs. 1,69,350-13-1, which includes Rs. 31,275-12-9 brought forward from last half-year.

It is proposed to dispose this sum as follows:—

| | Rs. | A. | P. |
|---|---|---|---|
| In paying a dividend on the Preference shares at the rate of Rs. 7 per cent per annum, without any deductio.. for income-tax paid by the company .. .. .. | 52,500 | 0 | 0 |
| In paying a dividend on the Ordinary shares of Rs. 5 per share without any deduction for income-tax paid by the company .. | 1,00,000 | 0 | 0 |
| In carry ing forward .. .. .. | 16,850 | 0 | 0 |
| Total .. | 1,69,350 | 0 | 0 |

Stocks of jute have been taken at or under cost price and manufactured goods at contract rates.

It is considered prudent to make some provision against the many risks that beset the Company as a result of the spread of the war in the East.

Full provision has been made for taxation, including the additional income-tax and super-tax resulting from the recent increase in rates which affect not only the profits of the half-year under review but also those of the previous half-year. It is possible that some relief with regard to Excess Profits Tax may be obtained later, but the Company's claims in this respect have not yet been decided by the authorities.

During the half-year, in common with all members of the Indian Jute Mills Association, it was agreed to grant six days' holiday with pay to workers yearly. On the reduction of working hours to 54 a week it has been decided to grant a weekly allowance of annas 12 a worker in place of the monthly allowance of Re. 1 mentioned in the last report.

SECRETARIAT LIBRARY 12 JUN 1942

"HELP THE COUNTRY WHILE HELPING YOURSELF"

Never before in the history of a country or an individual was the call of INSURANCE more urgent and its necessity more vital.

And this war has made it imperative.

"INSURANCE is a double blessing". It protects and provides the individual while contributing to the economic progress of the country.

NATIONAL INSURANCE COMPANY, LIMITED.

Phones: Cal. 5720, 5727 & 5728.
Branch and Agency Offices throughout
INDIA, BURMA, CEYLON, BRITISH EAST AFRICA & FEDERATED MALAY STATES.

NORTH WESTERN RAILWAY

The reduction in passenger train services on railways must result in a certain amount of discomfort and inconvenience to passengers. Passengers, however, inconvenience themselves and their fellow travellers by taking with them large packages which cannot conveniently go under the seat occupied by them. This is contrary to Rule 119 of Coaching Tariff (No. 13). The public is advised that this rule will be strictly enforced in future; so, passengers are requested in their own interest and the interests of their fellow travellers not to be selfish by taking with them in their compartments large packages as cannot go under the seat which they occupy.

IF YOU MUST TRAVEL, TRAVEL LIGHT

## WORLD OF INDIAN FINANCE

Friday Evening.

THERE has been further accentuation of easy money conditions; and, both in Calcutta and in Bombay, there is no borrower for interbank call money at the quoted rate of ¼ per cent. The current monetary conditions are fully reflected in this week's sales of treasury bills. On May 28, the amount of tender bills offered was Rs. 2 crores. This was increased to Rs. 3 crores on June 2 and again to Rs. 4 crores on June 9. Tender bills for Rs. 4 crores must, in ordinary circumstances, be considered beyond the capacity of the Indian market. The present conditions, however, are by no means ordinary; there is, almost every week, substantial currency expansion—and active note circulation has been building new records week after week. The additional currency that is being created is finding its way, in part, to banks as deposits. Banks are now overflowing with cash; and there is no longer the imperative urge to maintain the maximum cash practicable as there was immediately after Japan's entry into the war and after the fall of Rangoon. There is more confidence in banking circles about the defences of India against enemy attack. Panicky hoarding has ceased on the part of the public; and panicky devotion to liquidity has also disappeared amongst bankers. Therefore, with deposits flowing in a spate and with banks having no desire to have too large a proportion of cash, the problem of idle surplus balances is most pressing. This accounts for the applications of treasury bills on tender day reaching the colossal total of Rs. 11.36 crores. Never was keener bidding witnessed at the weekly auction of tender bills. The average discount rate has declined from Rs. 1-1-7 per cent per annum last week to annas 15 and pies 5 this week. The Reserve Bank authorities have duly taken note of the heavy applications and their effect on the discount rate; and the result is that the offer of tender bills for next week is raised to Rs. 6 crores. This is the highest weekly treasury bill offer on record in India. Judging from the increase in the cash balance of scheduled banks, and from the present extremely easy conditions in the money market, there is every reason to believe that bidding at next week's auction will prove as keen and will be reflected in a further lowering of the discount rate. Fresh sales of treasury bills last week, this week and the next, are considerably in excess of maturities; and treasury bills outstandings in the hands of the public will be nearly Rs. 60 crores by June 19.

Short-term borrowing has thus been rendered exceptionally favourable to the Central Government; and the rapidly gathering resources of the Imperial Bank have played an important part in this transformation. During the week ended June 5, deposits of the Imperial Bank stand on an all-time record figure of Rs. 131.95 crores comparing with Rs. 129.12 crores on May 29. This increase of Rs. 2¾ crores has occurred in a week when the Imperial Bank will have to make considerable disbursements on account of the Government in respect of month-early payments. The bank's investments have risen from Rs. 75.45 crores to Rs. 76.53 crores. But as loans and advances have declined from Rs. 35.78 crores to Rs. 34.28 crores, the bank's cash records the substantial rise of Rs. 3.30 crores from Rs. 27.55 crores to Rs. 30.84 crores. Between January 2, and June 5, the deposits of the Imperial Bank have risen from Rs. 109.61 crores to Rs. 131.95 crores, while cash has swollen by over Rs. 15¾ crores to Rs. 30.84 crores. This means that the Imperial Bank will continue as a potential investor on a heavy scale in treasury bills. The bank need not be unduly concerned about the maintenance of rigid pro portions of cash. For one thing, investments in Government securities, trustee securities and treasury bills are over 55 per cent of deposits. For another thing, the availability to the Imperial Bank of the currency chest facilities makes it unnecessary for it to maintain an unduly large cash balance. That is to say, even on the basis of the present figure of deposits, the Imperial Bank is in a position to subscribe for treasury bills for another Rs. 10 crores. But one may be sure that deposits will continue to increase. We do not, therefore, see any reason why, with the powerful support that the Imperial Bank is able to give, the floating debt cannot rise to Rs. 80 crores in the course of two months. We should like the Indian treasury bills market to be expanded in such a way that the Government should be able to borrow about Rs. 100 crores in the market at any one time.

The balances maintained by scheduled banks with the Reserve Bank stand at Rs. 59.12 crores as on June 5. There may be some decline recorded in the next week's return as banks will be paying on a fairly heavy scale for treasury bills sold by the Government this week. Even so, the cash position of banks suggests that treasury bills will be grabbed by them as the only investment available. In fact, conditions are propitious today for the introduction of the scheme of treasury deposits. Really speaking, treasury deposits are in the nature of six months treasury bills. But we would like to see treasury bills continue as just three months bills. In the early thirties, we have had three months bills, six months bills and nine months bills. But the correct type of treasury bills borrowing is on three months bills. For longer accommodation, the ideal method is treasury deposits. It seems to us that conditions today are propitious for launching this experiment.

There has been further expansion of currency for Rs. 5 crores against the transfer of sterling securities from the banking department to the issue department of the Reserve Bank. Sterling securities held in the issue department have risen from Rs. 251.85 crores to Rs. 256.85 crores on June 5. As a result, active note circulation in India records a rise of over Rs. 4 crores to Rs. 435.89 crores. Active note circulation in Burma is shown as Rs. 28.73 crores|. This item will, we expect, disappear in the next return of the Reserve Bank in which case rupee securities will show a corresponding reduction. While sterling securities in the issue department have risen by Rs. 5 crores, foreign balances in the banking department have declined from Rs. 66.65 crores to Rs. 63.23 crores. That is to say, the Reserve Bank has added to its sterling balances by only Rs. 1½ crores during the week. In the week ended ended May 29, payment made by the British Government to the Indian Government in respect of war commitments was shown to be Rs. 13 crores.

## TREASURY BILLS

**India**

Tenders for Rs. 4,00,00,000 (Rupees 4 crores) of three months' Government of India Treasury Bills were opened on Tuesday the 9th June, 1942. Total amount offered was Rs. 11,36,00,000 (Rupees 11 crores 36 lakhs). Tenders at Rs. 99-12-3 per cent were accepted in full and those at Rs. 99-12-0 per cent were allotted approximately 37 per cent. Lower tenders were rejected. Total amount accepted was Rs. 4 crores, the average rate of accepted tenders being Rs. 0-15-5 (Rupees nil annas fifteen and pies five per cent) per annum.

Tenders for Rs. 6,00,00,000 (Rupees 6 crores) of three months' Government of India Treasury Bills will be received on Tuesday the 16th June 1942, in Bombay up to 11 a.m. (Standard Time) and up to the close of business on Monday the 15th June, 1942, at other centres. Successful tenderers should make payment on Friday the 19th June, 1942. Other conditions are as usual.

During the week ended the 5th June, 1942, Government of India Treasury Bills for Rs. 20,72,00,000 (Rupees 20 crores 72 lakhs) were sold in favour of the Issue Department of the Reserve Bank of India.

(Continued from previous page)

We, therefore, expected that a further large receipt would be recorded in the following week. On a scrutiny of the Reserve Bank returns, we have to infer that only Rs. 1½ crores represents the addition to the sterling assets of the Reserve Bank. It follows that the inter-governmental transactions account for payment of only Rs. 15 crores to the Indian Government in respect of the settleing of accounts for May. We do not know if the next week's return of the Reserve Bank will disclose further receipts. If no such receipt is revealed it means that May payments of the British treasury are considerably smaller than the payments of the last few months. The Central Government's deposits with the Reserve Bank show a sharp decline from Rs. 14.86 crores to Rs. 8.47 crores. If, in the week ended June 12, the Indian Government receives no further payment from the British Government, it may be necessary to have recourse to ways and means advances from the Reserve Bank or to effect currency expansion against *ad hoc* treasury bills.

The exchange market remains dull and quiet.

The closing rates are: Banks buy T.T. London Ready to six months forward at 1s. 5 31/32d., and banks sell T.T. London Ready to six months forward at 1s. 6 1/32d.

Banks sell three months D.A. bills for first and second months at 1s. 6 9/32d., and for the third and fourth months at 1s. 6 5/16d.

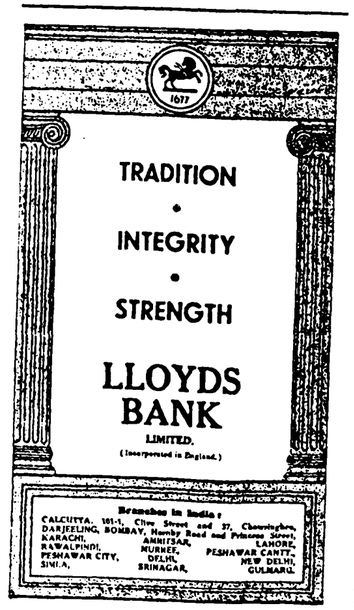
Money continues easy with interbank call quoted at ½ per cent.

Firms money for one to four months deposits quoted ½ per cent.

Banks buy T.T. New York Ready at Rs. 329½ for $100.

Banks sell T.T. New York Ready at Rs. 332¾ for $100.

# Finance Abroad



Thursday evening.

The London money market has so far shown no change. The stock exchange has certainly responded to news from the Libyan front; and Midway means much for the investor in Britain more even than the Finance Act of 1942 which went through its final reading this week. An increase in the amounts taken on six months deposit from the clearing banks in recent weeks must clearly be due to increased payments necessary on previous deposits. The average volume of short-time borrowing has not increased to the same extent as it did last year. The Government is able to get applications far in excess of the £75 millions offered week by week at two farthings or so over £1. The market's quota is seldom large and the enlarged sterling holdings of Empire banks clearly prove a factor in the competition. The last week saw hardly any change in general conditions but once again it deserves to be noted here that the London market is not showing any ill effects from the anticipated prolongation of war. Bullion prices are unaltered and exchange rates are fairly held. The same thing is true of India where buying and selling rates for four foreign currencies stand at the same level for months.

If the general impression that nothing is going to happen in the near future is correct, there should be very little to comment upon. The Bank of England's return issued last week shows no great change. Bankers' deposits are lower and the Proportion is also lower largely because of the rise in note circulation. Public deposits are larger than usual at £16 million while the total of £6.6 million for discounts and advances suggests that the market has taken some assistance of late from the Bank of England. But all this is unimportant. Financial developments mean little because the Government thinks only of production and turns on labour to essential work alone. From every angle the war supply situation is studied, only to show that the problem is not one of borrowing or taxation. Not that saving is unnecessary. Sir Kingsley Wood who spoke of the limited increase in tax revenue spoke also of the duty to save. New savings groups are being formed every day. Warships Weeks are still the rage and the savings movement has spread out beyond Britain. Progress must have been greater since the new issue of war bonds appeared in May. The Funds are firm and small savers happen to benefit in every way from the big air offensive against Germany. The only feature that seems to merit notice is the narrowing down of the free rates for pesetas in London. The official rate is not much below the voluntary rate and Franco's talk of Spain's enemies, actual or potential, does not seem to cause any jolt.

The importance of trade connections is not obscured by the war. Reports of an Anglo-American trade agreement to go into operation after the war have been common. A Madras paper claimed to publish the text of the pact, exceptionally important as proving that the Anglo-American programme of low tariffs and exchange stability is distinctive and unusual. The treaty is meant to implement the article in the Atlantic Charter. Its wording suggests that Mr. Hull is still the chief architect of U. S. policy. It is sought to prove that the pact is a direct return for the lease-lend act of March 1941 and its conditions naturally take account of Britain's altered economic circumstances. The lessons of experience should be applied to avoid reparations and other troubles. Freer trade is wanted, and the pact therefore contains a provision for allowing others to take advantage of the terms. To abolish discrimination and lower present tariffs is given as one of the objects of the joint programme. Mention is also made of a higher standard of living for backward peoples, so that the treaty marks a definite advance on the Charter which was very hazy about the economic arrangements of a democratic world. Preference and monopoly alike are threatened and yet it is argued that the treaty will injure Indian interests in some manner. The continuance of Anglo-American overlordship is envisaged by those who still fear that India's industrial immaturity will put her in a lower class.

It is not at all strange that the U. S. A. thinks of getting something back out of lease-lend expenditure. She has no duty to help in post-war reconstruction of any allied nation and sending back unused equipment after the war appears to be an elementary duty, for the U.S.A. gives food in addition to munitions and will only want to take back arms while giving food after the war to others besides the victors. Economic freedom will not be abridged by the return of supplies given for the war because the other things will not be paid for debt will not be added to other difficulties. India has no reason to fear that the new pact will hamper industrial development because her import trade will be divided by agreement and she cannot protect local industry. Some such fear lies behind the lukewarm remarks made on the scope and purpose of an agreement clearly meant to restore something more than normality. There will be no inter-allied debts to cause trouble, and India, without any overseas debt hereafter, will have no difficulty in making the most of her fiscal autonomy.

The New York markets are not exactly jubilant in the war period. A slow lift in oils is accompanied by a drag in steels though there is mention of a special agreement between Carnegie Illinois steel and another company National Steel to develop steel output further. The stock market is called slow and heavy. It cannot be lively when the Administration is still bent on trust-busting. The prosecution of the No. 1 explosives manufacturer and ten subsidiaries can only mean that Mr. Arnold dominates the economic policy in this term too. The U.S.A. may have extraordinary plans for bringing up war production and raising output in every industry for the sake of victory. The U.K. is helping her by giving lease-lend supplies of her own. A gun factory was mentioned by Mr. Stettinius as also repairs to U.S. ships in British yards. The next best will not do in regard to production, and it is not only the fastest and heaviest bombers that are wanted but also planes that will overwhelm the German air force in their numbers. Mr. Lyttleton who has seen U.S. production and capacity puts Allied aircraft production at doubt that of the Axis. They have more than caught up with the Axis. And present deficits, taxes etc, do not matter as against the swift flow of materials. Numberless stories of airfield development and plane production have appeared in recent months. The U.S.A. has certainly reached its goal sooner than expected and the Budget next month will show clearly the effects of an unprecedented increase in output and Governmental outlay.

The Germans have difficulties of a peculiar nature. Italy's discontent after two years of war is but one of many. There is labour shortage in spite of droves of alien workers. There was a bad harvest owing to the sharp winter. They want more men on the land and 12,000,000 foreigners toiled in the fields at the beginning of the year. It is believed that 600,000 more men are wanted They are now said to be taking off Dutch children for farm work. Farmers are not allowed to keep back as much food as they did and the German press is publishing lists of peasants condemned to death for killing cattle for the black market. The cattle census produced wrong answers, and farmers who have been found out are being punished very severely in some cases, according to a Swedish paper's correspondent. The major difficulty is transport. The Nazis, or rather Dr. Todt, concentrated on road-building. Railways were neglected. It is only now that the consequences of neglect are appearing. The shortage of rolling stock has not been cured by taking 50,000 French wagons and large-scale removal of rolling stock from the occupied countries. Sabotage and air raids have contributed to the steady deterioration in the transport system. The raids on the Ruhr have increased the original confusion, and it is not only now that old shortcomings are manifest.

The payment of allowances to dependents of Indian convicts in the Andamans who were not repatriated when the islands were abandoned in March has been referred to in a press note. It is unexampled generosity on the part of the Madras Government to give separation allowances in order to make good the remittances previously made. Officials have been instructed to assist dependents of those transported for life. Many worked, and made money; sent remittances to India to relatives. So the Government of Madras has offered compensation to those who will not get any money because the Indian Government could not protect the islands.

## Future of the rupee

In "Indian Finance" dated, May 23, we discussed the questions arising from the liability of the Reserve Bank of India and suggested that, with respect to Burma notes left in enemy-occupied territories, the Government of India would be justified in treating the liability on such notes as completely and finally extinguished. We also pointed out that the return of the Reserve Bank for the issue department should, therefore, shortly witness the disappearance of the head "Legal tender in Burma only" on the liabilities side. The position as outlined by us has been accepted by the Government as will be gathered from the following notification issued on June 6.

> "In view of the occupation of Burma by the enemy, it has been decided to relieve the Reserve Bank of India of its liability for the Burma note issue, and to transfer the assets held by the Reserve Bank on this account to the Government of India. The assets so transferred will be held in a suspense account, from which the value of Burma notes presented for encashment will be paid and the balance of which will be finally disposed of after the war. By an ordinance issued to-day, the Reserve Bank is prohibited from making payment except with the authorisation of the Government of India; and, in future, references to Burma notes will be omitted from the accounts of the Reserve Bank."

Before we discussed the various issues raised by the action now proposed to be taken, we should clear a grave misconception that has arisen in the minds of the public on account of this Government 'communique'. An impression has been created that the Reserve Bank will no longer convert Burma notes into Indian notes. This impression is totally erroneous. The Reserve Bank will continue, as heretofore, to receive Burma notes and issue Indian notes there against. All that has happened is that, while the Reserve Bank was till now undertaking this conversion in its capacity as the note-issuing authority for Burma and India, it will be hereafter doing so as agent of the Indian Government, who are taking over the assets held by the Reserve Bank on account of the Burma notes and who will pay from these assets the value of Burma notes presented for encashment. The free convertibility of Burma notes into Indian notes has in no way been affected, the change being more or less of a technical character pertaining to the custody of the assets and the utilisation of such assets.

The statements of the Reserve Bank, issued this week, are for the week ended June 5; and these returns are still on the old basis, that is to say, references to Burma notes still appear in the returns. As we pointed out, these returns are made as on June 5; and the ordinance regarding the Burma notes was issued on June 6. It is, therefore, to be assumed that the Reserve Bank's statements for the week ended June 5, will be the last from the point of view of the Reserve Bank being a note-issuing authority both for India and for Burma. The bank returns for the week ended June 12, which will be issued next week, must be looked upon as those of the Reserve Bank in its capacity as the Bank of Issue for India and only for India. As on June 5, legal tender in Burma was shown at Rs. 28.73 crores. In the week following, some more Burma notes might have been presented for encashment. But as the ordinance takes effect from June 6, further encashment of Burma notes will be met from the suspense account. In other words, the reduction on the liabilities side in the issue department is approximately Rs. 28¾ crores. It follows that rupee securities on the assets side will show a corresponding reduction on account of the return of 'ad hoc' treasury bills to the Government. The next return of the issue department may, therefore, show rupee securities at slightly over Rs. 120 crores as against the figure of Rs. 149.15 crores on June 5.

The removal of the responsibility of the Reserve Bank for Burma notes is a reform which conduces to greater clearness and clarification. But it is necessary to examine some of the consequences that will arise from the Reserve Bank ceasing to function as the central banking institution for Burma also.

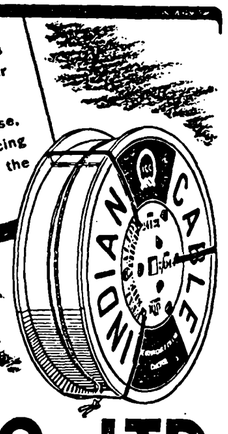
Since the separation of Burma from India, the two countries have remained as independent entities so far as foreign trade was concerned. However, from the point of view of the significance of foreign trade to foreign exchange, there was, so to say, only one entity. The rupee was a common currency to the two countries; the currency reserves were common; the central bank controlling currency and credit was the same institution; and the foreign exchange policy and operations in connection with such policy were common. This led to various interesting developments, to some of which attention was drawn in the columns of "Indian Finance" over two years ago.

The most noteworthy development was that the rupee, from the point of view of foreign exchange value, was deriving greater support from Burma's foreign trade than from India's foreign trade in merchandise. In 1938-39, the balance of trade in merchandise was Rs. 17.39 crores in favour of India and Rs. 17.72 crores in favour of Burma. The position was more or less the same in 1937-38, when India had a favourable balance of trade of Rs. 15.88 crores and Burma of Rs. 26.61 crores. So far as the Reserve Bank was concerned, the individual favourable balance of trade of India or Burma was not so important a factor as the combined total of the balance of trade of the two countries. India and Burma together had a favourable balance of trade of Rs. 43 crores in 1938-39 and Rs. 43¼ crores in 1937-38.

With Burma dropping out of India's currency picture, we have now to confine our attention to the balance of trade of India. The main point to note in this connection is that, in the years preceding the present war, India's favourable trade balance in merchandise had been showing definite signs of shrinking. If Burma had been separated from India in 1937 not only with regard to political matters, but also with regard to currency matters; that is, if the Reserve Bank had to look after the rupee as the currency of India and only of India, the maintenance of the exchange value of the rupee might have proved an extremely difficult problem in relation to the dwindling favourable trade balance of India. It was Burma's foreign trade that gave timely and substantial support.



With this support gone, what are the prospects of the Reserve Bank maintaining the exchange value of the rupee in the postwar years?

On a superficial view one may be inclined to jump to pessimistic conclusions and predict that considerable weakness is in store for the rupee. In these thirty-four months of war, various other developments have taken place whose effect is so to improve the intrinsic strength of the rupee that it should be well able to continue to maintain its strength even without the prop of Burma's substantial favourable trade balance. The international value of the rupee has been vastly reinforced in four important respects.

In the first place, the rupee in the postwar period will be completely freed from the burden of interest charges on the sterling loans of the Government of India. By the end of this year, India would have liquidated her sterling debt in full. This means that the Home Charges which this country has to find for the Secretary of State will be lighter hereafter by anything like £11 millions. It is quite possible that some of the debentures of the local public bodies will also be redeemed in due course; and the consequence is that the rupee will be further relieved from the strain imposed by the transfer of interest charges from India to Burma.

In the second place, India which has hitherto been a debtor country is emerging as a creditor country. If the war continues for some time, it is more than probable that sterling securities in our currency reserve are of the order of £200 million. All along, the transfer of interest charges from India to London has been a bear factor for the rupee. We are now in prospect of the transfer of interest charges from London to India being a bull factor for the rupee.

In the third place, the large-scale expansion, under war stimulus, of Indian industries will have the effect of this country depending very much less, in postwar years, on foreign imports. It is also to be noted that the present strategic position of India in the Eastern Group is responsible for our securing and developing export markets in this part of the world. Surely, this country must be able to retain some of the markets now being built and fostered. The postwar period must, therefore, see India less dependent upon imports and more able

India, to-day, strides forward with the champions of Democracy towards victory. Manufacturers, no less than the fighting forces, have placed all their resources at the disposal of the Empire.
The Indian Cable Co Ltd, making no compromise, and working efficiently at full capacity, are producing Cable Equipment of the highest standard to aid the Empire's total war effort.

to increase her exports. This position is certainly a greatly strengthening factor for the rupee.

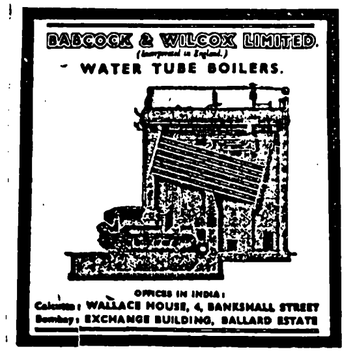
Finally, there has been going on for some time a steady transfer of holdings in stocks and shares from British to Indian ownership. British banks and British insurance companies are slowly yielding ground to Indian institutions. And it seems to us that the invisible items in the international balance sheet which till recently were heavily adverse to India will become progressively and strikingly less adverse.

In sum, the strength of the rupee both in the international and domestic sphere is well nigh impregnable. In this respect, the Indian currency has a unique status.

"BE OUR FRIENDS . . .

UNTIL WE GET INSIDE YOUR DOOR!"

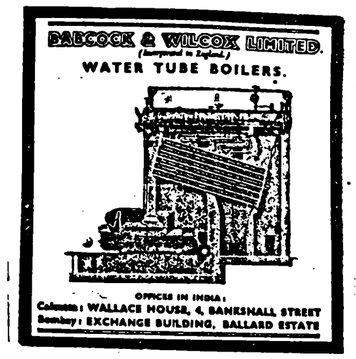
**JAPANESE 'FRIENDSHIP' IS A NEW METHOD OF MAKING WAR.** Never believe the Japanese are coming to India for our benefit. They have a new way of making war, and we must learn it quickly and beware of it. Their honeyed words, their promises on the Radio, their rumours spread by agents in our midst, all have one object only—to deceive us, weaken us, entice us to open the door to the Japanese soldier—*for his benefit!*



But instead of a welcome the Japanese soldiers will meet death in India. Aircraft and guns and troops are waiting to strike at them. Even our villager will hinder them in his crafty way. Are you ready to give *your* help in the rear? If we 380,000,000 people fight and work and use our brains together, we can never be beaten. Start today!

REMEMBER CHINA!

Remember the things the Japanese have done in China, in the name of their promise of "liberation"! It is no good giving in to the Japanese if you want to keep a whole skin and a wife who is only yours—as the Chinese found out. The only answer to Japanese "friendship" is to fight. For 5 years the Chinese have given that answer. Behind the lines of their armies their women are safe, courage is high, and they are shaping a new life for China.



BUILD INDIA'S WAR FRONT AGAINST THE JAPANESE

# Editorial Notes

### Sugar Output

The sugar situation reflected in the local shortage and the fancy prices can only be understood in the light of figures prepared with reference to the 1941-42 season. The memorandum issued last week shows how the situation has developed since November. It is estimated that the production of sugar directly from cane in 1941-42 is 798,000 tons as against 1,095,000 tons in 1940-41. The memorandum puts U.P. production at 393,000 tons; that of Bihar at 118,000 tons and that of the other parts of India at 287,000 tons. Production in other parts of India besides the U.P. showed a fall as compared with 1940-41. The main cause of reduced output is the shortage of cane. The U.P. and Bihar Governments alloted crushing quotas far in excess of available cane supplies, and finding that no good was done by that, compromised by removing all restrictions on production in February. Nevertheless, the U.P. and Bihar factories produced only 511,000 tons against 575,000 tons originally estimated. There was no change in the percentage of recovery though the Bihar factories obtained 10.3 percent as against 9.9 percent in the previous season.

The fall in total Indian sugar output in 1941-42 is not due either to the fact that three factories in the U.P. did not work this season, or that India could claim 146 factories as compared with 148 factories. There were only nine factories at work in Bengal and eleven in Madras. In the U.P. the crushing season started late and closed before April was out. The working season was shorter in all Provinces, and as many as eleven factories in the U.P. and 21 in Bihar worked less than 59 days. There were only five factories with a working period of 180 days and more. Whereas in the previous year as many as 11 mills returned a period of 180 days while only five factories continued to work after May 26, as compared with 13 in the previous season. The supply position is best measured by the fall in the quantity of cane crushed to 8.24 million tons in the 1941-42 season as against 11.29 million tons in the 1940-41 season. The quantity of molasses produced was also lower at 292,000 tons against 424,600 tons in 1940-41. In regard to sugar output in 1941-42 the statistics indicate that the Indian States with 12 mills out of 146 in India are best placed as they report production of 115,600 tons of sugar as compared with 130,300 tons in the preceding season. The ascent of sugar prices came before the season ended when stocks had been eaten into by exports. It might be fairly said that the Government should not permit exports when home output is small, and any purchase on behalf of foreign governments can be regarded as wholly prejudicial to the Indian consumer. Government's interest in exports explains the introduction of price control in April under the terms of a scheme which is not calculated to increase confidence in the ability of the Government to protect the consumer. The cane crop this year was short because of Government's previous policy. Surely the loss of Java's sugar supplies might have been envisaged at a time when Anglo-Japanese strain was acute. The Indian consumer is now paying for the mistakes of the bureaucracy, and it has been only too often asked if rationing is going to come. The quantity of sugar made from gur in 1942 is also much smaller as 12 refineries were at work as compared with 14 in 1941 because the quantity of gur melted is much smaller though the percentage of recovery in the U.P. and other Provinces as well is slightly better according to the official forcast issued last month.

### The Americas' Unity

U.S. influence in Latin America should grow after Brazil's break with the Axis and more so after Mexico's declaration of war. Efforts are being latterly made to pool resources and arrange transport. According to a Rio de Janeiro newspaper, a joint American shipping control board is contemplated at present. All States except Argentina and Chile are likely to be represented on the board. In view of the submarine menace in the Atlantic, still unchecked, the proposal seems sound. The proposed Board would arrange and co-ordinate itineraries and measures of protection for ships of Latin American States. Brazil has already begun to use the convoy system and Uruguay with characteristic alacrity in a matter affecting continental solidarity has proclaimed her intention of collaborating in any scheme for inter-American security. The Rio Conference, hardly four months old, is giving results though the Argentine Ministry of Marine announced that Argentine ships would not for the present sail in convoy. Latin American unity is hardly complete. In their relations with the Axis, the republics fall into three categories. Ten are at war with the Axis; eight have broken off relations; and two alone maintain diplomatic relations. While these differences exist within the framework of continental solidarity the organisation of an effective system of convoys affording protection to all American shipping and involving the pooling of naval resources for escort work is a delicate problem in the view of many. There is, however, Mexico's entry into the war. In the Gulf and the Caribbean alike effective naval policing should not be difficult hereafter and the imposition of alert status in the Canal Zone is, in the main, a step to safeguard Central America from the Japanese who have attacked the Aleutians as though to prove that the U.S.A. will have to defend not only its territory but a hemisphere. The unanimous declaration of war by the Congress of Mexico is, however, a guarantee that the immediate neighbour is at one with the U.S.A. in this war. Britain has promptly approved Mexico's decision, and the Atlantic Charter is a document that has been endorsed swiftly by the 27th nation.

### New Plants and Products

At the time the food planning drive began, little was said about commercial crops. In the reorientation of agriculture after the war, many new crops will have a definite place, and it is not surprising that "Indian Farming" lists many crops as suitable for India in order to secure at home things formerly imported. Since India's soils and climate are varied, the idea of self-sufficiency is not to be discouraged. Formally listed among crops worth attention is papaya—the source of papain. It is noted that Ceylon exports papain to the U.S.A. and Britain. So far no large-scale plantations have been tried for the manufacture of papain. High-yielding varieties of the fruit tree do well in India, and cultivation has been successful in Madras, Bihar, Bengal, Bombay and the U.P. The olive which is a native of Western Asia is also recommended. The ripe fruit properly salted is a sustaining food taking the place of opium without its evils. Olive oil is a valuable adjunct. Since the tree is hardy and the winter is mild, it grows in Northern India. The trouble is in regard to the fruit. Since the wild olive is found in the Frontier and the Punjab, it should be possible to get out grafted types or a hybrid. In the U.P. already many olive trees have been planted. The growth of the tung tree has been noted in India. The Empire needs tung oil, and it is necessary that India should grow the tree introduced from China thirty years ago. Hops are recommended for the Chamba and Kashmir States. In the hills where the rains are not heavy, and the winter not long or severe, the conditions are just right for hops. There is no need to import

hops if gardens could be established at home. Brewers are likely to be regular customers.

The sisal is not a new plant and its properties do not need to be advertised. For making cordage it is as good as ramie fibre which also is recommended for fertile, sandy, well-drained alluvial soils. The tuber cassava is considered quite suited to India. On the West Coast it is quite familiar and the green tops are good fodder. The cultivation of the sago palm is readily approved since supplies from Singapore and Sumatra cannot be had; we do not know how England is going to get 4.000 tons of sago. The cultivation of pistachio tree is advised in regard to Rawalpindi and Kashmir where the tree is not unfamiliar. It is a native of Asia Minor and quite common in the Middle Eastern countries. India imports the nuts from Palestine, Iran and other countries. The dhatura plant as the source of stramonium presents possibilities. Regular plantations and manufacture of the drug seem feasible. China and Europe grow liquorice, found in the sub-Himalayan tracts of the Punjab. The root is likely to help the drug trade. Since supplies of derris root from Malaya are ruled out, India should try the exotic types of the root wanted for making insecticides. There are many other plants considered good, and the present need for a new bureau to advise and report on new economic crops will be admitted.

### Australia's Plans

Rationing has extended to clothes in Australia. Last month saw the issue of coupons for the purpose. Shops were asked to reduce sales by 25 percent as compared with 1941. The coupon system is meant to cut at non-essential civilian spending. The restrictions are said to apply to men's, children's and women's clothing, also to blankets, towels, linen and footwear. When the announcement was made, there was the usual rush to get such goods from the shops with the result that there was a temporary closure of shops. The tea rationing scheme has been followed by coffee control, Government took over all the coffee on May 14 and announced that all imports must be obtained through the Government. It is not only in regard to imports that control applies. The manufacture has been prohibited of things like billiard tables, racing equipment, jewellery and musical instruments. The first state to abolish the manufacture of luxury goods is N.S.W. where there is a ban on evening dress and toys. That is because there is a plan to make Australia a big base for goods. The aim is to make her the fifth largest producer among the United Nations or, if possible, a rival for Canada for the fourth place. Approaches to make Australia self-contained have been bilateral some being made by Australia; others by the United States. The U.S.A. is showing its hustle all right in Australia by building a permanent camp for troops there within a single day. Producer-gas vehicles have been common, but it is now known that a seven-ton truck is to be run on charcoal gas. Fuel costs will be cut drastically in this case by using gas for the vehicle which is expected to take a load of 16 tons. The most important news, however, relates to the establishment of a new shipyard. A sleepy township now employs many thousands on naval orders and cargo vessel construction. The Minister for Public Works reported that it had not been easy to change the town into a great industrial centre. Water had to be taken by ship to meet the needs of an expanding population. The urge for self-sufficiency explains the desire to develop Central Australia's mica deposits. The supply plans are more ambitious after the withdrawal from E.G.C. The projected Supply Council will meet the needs of the Allies. Australia has recently set about control of foodstuffs exported for oversea troops of Australia and the Allies. It is Australia which helped to make good the rifles lost to Dunkirk according to Mr. Makin who said that previous shipments had been retralia's war effort is mirrored also in the laying up of 61.000 cars in the last year. About an eighth of the total number of cars are off the road.

### Post-war Questions

Two weeks ago there was open mention of reconstruction. New Delhi discussions apparently went out of the inter-departmental stage yet the only announcement was as regards the founding of the Excess Profits Tax for the benefit of the payers. That no conclusions can be reached when the war is on appears axiomatic. That is why the study of reconstruction as the study of current problems seems improbable if not impractical in India. Yet it has to be made for the Board of Trade had obtained last year the services of Professor Clay to go over the entire ground of Britain's current and postwar problems. More recently the Federation of British Industries has outlined its views. They do not call for notice here. If agriculture and international trade appear to be separate in the public view they hang together in the framework of the departmental committee discussions. Agriculture must be profoundly affected by the Grow More Food plans and international trade too will be altered. Whether the same pattern is to obtain after the war is evidently treated as an open question. Newspaper despatches last week have said little about the scope of discussions, and have also said little about the connection of these with the war effort. But the U.S. mission has been credited with various plans and they may independently create problems. The maintenance of reasonable railway transport facilities, even if it means cutting into the war work of railways, has been recommended by the Americans. Chronic shortage of wagons in wartime might lead to an undue emphasis on regional self-sufficiency, and prevent restoration of former interprovincial trade.

It is not known if the probable effects of a speed-up of war effort came within the purview of current discussions, but it is certain that the demands on plant and manpower made in consonance with new plans for all-out production will lead to trouble after the war. It is likely that the probable effects were canvassed but the study of wartime changes may well embrace a testing of what happens after the Grady Mission proposals go through. Lease-Lend may have a decisive effect on India's trade, and if Anglo-American cooperation enters on a new phase after the war, the old regime of preference must vanish, in which case, it might even be contended that Indian industries given special concessions in wartime would have to face U.S. competition as also British. New plans can be made strictly on the assumption that the U.S.A. wants to help India because America's own war effort will eat

up a lot, and the first task is to look upon reconstruction as a matter outside India's control. The Allied statesmen have only the vaguest of programmes, and it is doubtful if India's troubles present or future, are recognised. But ploughing a lonely furrow before the post-war problem emerges, appears to interest some, but for others who know not the size, scope or number of problems and know also that the nature of reconstruction will be determined by the length of the war, the discussions seem superfluous. Planning is out of the question, and all accounts of the war effort might well be heard by the National Defence Council alone.

The interest of Provincial Governments in post-war reconstruction has so far been slight, but it has been indicated that in Bombay at least the Government is alive to the problems of the transition to peace when surplus labour and rural distress will become common. Early this year, a conference was held for the purpose of looking over possible changes. The possible dislocation of the mill industry caused by the stoppage of war orders gave the Bombay mills a special interest in the question. The unofficial committee however concluded that it was more important to get on with the war effort than to discuss what may come hereafter. Nobody could guess the cost of the war or the results produced by the war on national finances; until that was known reconstruction seemed a remote subject. The Bombay view is obviously different from that adopted by the recent Delhi Conference in regard to postwar problems generally. The effect of the customs surcharge may be of direct advantage to secondary industry in India. The Bombay Conference may have felt that the five committees set up last June would do all the discussion needed and it was unnecessary for the millowners to discuss local problems before the war was over.

### Mills And Cotton

References to the high rate at which mill consumption of cotton has been running have been many. In the six months ended February 1942, the mills took 2,052,519 bales of Indian cotton showing an increase of 14.8 percent on the corresponding period of 1940-41. The increase as compared with 1939-40 just after the war broke out is 33 1/3 percent. In view of the large increase in imports at the same time the actual increase in consumption must be even longer. One thing is certain; mill consumption must reach the four million bale mark by the end of August. The biggest increase is naturally reported by Bombay. In the case of Madras and the U.P. the increase is equally arresting; the growth of consumption in 1941-42 being greater in these provinces though the inland trade statistics do not suggest it. The enormous increase in war orders has definitely contributed to the enormous expansion of mill consumption of cotton. The apparent exception to the general trend is Bengal where the mill consumption of cotton shows a small fall as compared with the first half of the cotton year 1940-41. The recovery reported by the C.P. is readily explained but in Bengal the fall in raw cotton taken by mills might be due to the difficulty in importing by sea as also the higher duty in force. There are obviously damaging factors at work in spite of the increase in local demand and the failure of imports. The March figures point to a recession after an advance except in Madras where mill consumption, besides being higher on March 1941 is very slightly below that recorded in February 1942. Bengal and Bombay mills have experienced the direct effect of a large-scale exodus of workers. In the case of Bengal the panic among millhands led to a reduction of mill activity. That labour trouble underlies the fall in cotton used may be inferred from the fall in the quantity of cotton taken by mills in Bombay during March. The total for India was higher than that recorded in March 1941 but below that obtaining in March. The labour and fuel problems loomed large in Mr. S.C. Ghose's review of the Bengal mill industry's position sometime ago. But in the Punjab and Delhi there has been a significant increase in mill consumption. It is quite likely that reduced imports of foreign cotton might promote a further expansion of consumption at home desirable on the ground that export markets for Indian cotton are lost through the war.

### Larger Tea Takings

At the last meeting of the Indian Tea Market Expansion Board, the U. S. tea import satistics were considered. In the six months ended December, there was a big increase in imports of black tea from India and Ceylon to a smaller extent. Imports of black tea from Japan and Formosa totalled about two million lbs. as against 49.7 million lbs. from countries which are signatories to the international tea agreement. The U. S. takings of green tea in 1941 showed a remarkable decrease though total takings of tea for the second half of 1941 revealed an increase of over 8¼ million lbs. The total at 56.12 million lbs. constitutes a record for the decade, in spite of the unprecedented fall in U. S. imports of green tea from 11.22 million lbs. in the second half of 1940 to 3.9 million lbs. in 1941. Up to the end of last year Empire tea including Indian tea made considerable progress in the U.S.A. The N.E.I. shipped larger quantities than before and what was observed from October holds good of U. S. imports. Tea from Japan was in small demand and black tea had a clear run. The work in the U.S.A in 1941 has been accompanied by decisive results though the campaign has been curtailed. The cess proceeds have been well applied in order to stimulate U. S. consumption which is now running over 100 million lbs per annum, so that India is less important than the U.S. as a consumer of tea. The Board has since decided to intensify post-war propaganda in Europe and America, for which purpose a provision of not less than Rs. 25 lakhs should be made available in its opinion. The Board's decision cuts at the case for a reduction of cess, based, in the main, on the large unexpended balances held by the Board. If money is to be expended at home and on behalf also of the N.E.I. and must also be laid aside for propaganda work after the war the duty to keep up the present rate of cess on exports devolves on the Board. Towards the end of 1941 the Board was running eleven urban campaigns, and the winter saw the tea habit well-established in North Indian towns. The campaign in Dacca also was resumed and the East Bengal rural drive was kept up. The addition of 16 more mills shows the importance of industrial work. Twelve more canteens managed by the staff of the Board have been set up in the last quarter of 1941.

It is now clear that war has brought no change in the objects or achievements of the Tea Market Expansion Board. Supplies to Britain should not be affected by Ceylon's competition, and India's tea may become even more important among her exports.

---

**Three Nations**

Three countries are covered by the latest Oxford pamphlets. The reviewer can only express astonishment at the amazing value given in return for four annas in this case. The three new additions are as usual models of elegance and exactitude of expression, and are as far removed from the indigestible, encyclopaedia article as any can wish. Professor G. N. Clark writes on Belgium and explains with subtlety and sympathy why Belgium went back on unadulterated neutrality. The Flemings and their rivals naturally loom large. The Flemish nationalists are not altogether pro-German as feared. In the last war the Germans made capital of local anti-French sentiment. The King's own part in the tragedy of 1940 has been skilfully elucidated. His Ministers are at war for Belgium's Empire is aligned with Britain. The resources of the Congo are considerable and Ruandi-Urundi taken from Tanganiyika is about the only gain for the sufferings of 1914-18. The Congo's geography is adequately explained so that we know it is possible to cross Africa by way of the Congo by rail and steamer. The Congo's Governor-General is in touch with South Africa and it is trusted that Lord Swinton in his post will promote complete co-operation between British, Free French and Belgian territories.

Sir John Pratt has long enjoyed the reputation of being an expert on the Far East. He discusses Japanese ambition in relation to Japanese achievement. Both are considerable, but Japan's besetting sin has been a blindness to others' interests. Besides being too ready to tread on others' corns, the Japanese have been at all times cunning and gullible. Sir John Pratt examines the foundations of Imperial policy and concludes that imitation of the Prussians can be carried to inordinate lengths. The companion volume on China is by Professor Roxby of Liverpool. It is definitely the outstanding pamphlet in an exceptional series. The geography and the history, the civilisation and culture of Britain's new ally are set out in a way that makes China the best known of many lands. The century of unrestricted intercourse with the west has not helped China for the opium wars are a blot on Britain and India as well. It is only the U.S.A. that has kept trade and politics apart and detached also Britain from the 20-year old alliance with Japan. The Washington pact is in every way an achievement for Mr. C. E. Hughes and Lord Balfour agreed on fundamentals, being judicial in temperament. The treaty certainly antedates China's rise as a modern nation alas interrupted by aggression. Much is said of the present war and China's plans to keep on fighting. The pamphlet is decidedly better for the Indian reader than the present mass of propaganda of dubious value.

---

**A.R.P. and Taxes**

In the bulletin of the Bombay Millowners Association for April will be found the scheme of Government for the recovery of the cost of A.R.P. in factories. The scheme was published in response to requests that the scale of relief should be modified and settled. The proposed scheme was published in response to requests that the scale of relief should be modified and settled. The proposed scheme gives business concerns the opportunity to write off A.R.P. expenses as part of revenue expenditure. They will be allowed to treat A.R.P. costs as ordinary business expenses except when the measures may have a permanent post-war commercial value. The costs defined are the costs of measures carried out under the orders of an A.R.P. Officer empowered for the purpose as also the costs of measures carried out by a firm on its own initiative but which have been subsequently approved of by an A.R.P. Officer. The A.R.P. Officer is to sanction estimates of projected expenditure, if necessary. An audited statement of costs is to be submitted for certification in any case by the A.R.P. Officer. The cost will then be allowed as revenue expenditure, and the income-tax officers will be able to ascertain what is the capital and what is the revenue part of factories' A.R.P. expenditure. An appeal within 60 days lies against an A.R.P. Officer's certificate in respect of the allowance made. The Government scheme does not allow the factory to treat the entire expenditure on precaution as money spent out of revenue. It has been urged that only 60 per cent of the estimate of the entire A.R.P. outlay can be recouped and in fact the man who could show a loss and set off all A.R.P. expenses against future profits would come off best. The Government scheme does not distinguish between factory and factory in fixing the quantum of relief and merely prescribes the certificate procedure. The biggest benefit secured is that A.R.P. may save a company from the liability to excess profits tax. The suggestion of a grant-in-aid wherever any part of the A.R.P. expenditure is not allowed has not found favour, though it has been urged that funds might come out of the war risks insurance pool.

---

**Argentina's Surplus**

Mr. Jackman's report on trade conditions in Argentina contains not only a reference to the persistent shortage of bags there but also to the conditions reported on by the Central Bank of the Republic. Argentina's balance of payments showed notable improvement in 1941 in spite of unfavourable predictions in the previous year. The heavy balance in Argentina's favour was largely due to the influx of foreign capital to the extent of 325,000,000 pesos. The influx of capital in 1939 and 1940 was 66 and 79 millions respectively. Argentina attracted much U.S. capital and also funds from countries and as one of the few neutrals in a world at war, Argentina is likely to attract more money. Much of the money invested by the U.S.A. must have come originally from Europe. Argentina has copied U.S. policy last year in regard to stabilisation of grain prices. Fixed minima have been resorted to in order to prevent a slump. Grain exports fell sharply, but prices did not give way, as the grain board broke the fall by purchases on a large scale. The improvement in the balance of trade proceeds from the large increase in Argentine exports to the United States. Other American countries also increased their offtake of Argentine exports. Exports to American countries including the U.S.A. rose by 346 million pesos in 1941 whereas exports to other countries fell from 997 million pesos to 731 million. Argentina's exchange reserve at present is much larger but she is not able to get the imports she wants mainly on account of the war. The shipping difficulty is said to be acute and the familiar lack of goods became a factor in overseas trade. Import restrictions have been given up except in the case of about 5 per cent of Argentina's imports. Export restrictions in force in other countries prejudice imports like the exchange control adopted by Argentina previously. The cost of living in the Republic is said to have risen last year and a shortage of raw materials is said to be hampering some industries. Argentina's wheat crop promises to turn out well. The report, dated April 8, says that prospects are good for the 1942 crop. The maize crop is put at 9.2 million tons against 10.24 million tons last time. A very big increase in the rice crop is reported. Argentina's wool stocks are rising and stocks at the beginning of March were higher than a month previously. Brazil is now a rival of India as a purveyor of jute yarn and cloth. The arrival of bag supplies has caused no change. Millers were asking for more bags and saying that flour could not be stored except in bags. Argentina is likely to take more cloth as a reserve of bags is to be built up in accord with the Government's decision. Having plenty of foreign exchange to pay for imports, it should not be difficult. Meanwhile the other remedy, the manufacture of cotton bags, is to be tried. Ten million pesos are to be invested in a new factory intended to use local cotton, the outturn of which in 1940-41 was 50,337 tons. The Argentine republic's credit is known to have risen, and the war period should see a reduction in her external debt though her export trade has been hit. The growth of inter-American trade should help her to do so without difficulty.

---

**Mysore Budget**

With a budget of over Rs. 5 crores every year, certainly Mysore has outstripped the minor Provinces of British India. The second largest of Indian States has a financial record that is of exceptional interest. In the war period Mysore's expenditure has risen, but the traditional surplus has been preserved in respect of the past year. The war is, however, likely to keep revenue down, and the estimates for 1942-43 submitted last week by the Dewan aim at keeping expenditure at a lower level. The Dewan expects a surplus of 1½ lakhs in 1942-43. The feature of the latest budget is not the surplus but the valiant effort to reconcile the claims of the development departments with the paramount need for economy in the war period. A revenue reserve fund to equalise expenditure in lean years has been in existence and here, too, Punjab and Hyderabad practice may be said to have influenced policy in the south. Total revenue is expected to be Rs. 474½ lakhs and total expenditure is put at Rs. 473 lakhs. The only tax proposal is to raise the income-tax on profits of companies from annas 2 to annas 2½ in every rupee. This proposal will not prejudice Mysore concerns, more so those which are making hay in the war period. The State's allotment for education is larger than ever at Rs. 64½ lakhs. After the reforms there is the usual emphasis on popular welfare; rural reconstruction, village roads, etc., are important objects of additional expenditure. Among the revenue departments, forest and income-tax have been singularly dependable, and efforts are now being made to enhance the revenue from the former while the new tax proposal will obviously put up the yield of income-tax. The excise duty on gold has been in recent years an important prop of the revenue system which, to a marked extent, is independent of taxation. Irrigation, electricity, railway and other receipts represent a return on investments so that the Mysorean's tax burden is lighter than assumed. What is called the war effort was discussed at some length by the Dewan. The industries are producing supplies needed by the Allies. Sixteen concerns are on the job of manufacturing goods wanted for the war and the Government-owned factories including the steel works are playing an important part. Mysore's food plans correspond to those of British India, and in regard to local handloom weavers, the relief measures answer to those adopted in Madras. The

BOMBAY · CALCUTTA

Most human beings derive a peculiar thrill when they are in a position to preen: "Did I not tell you so?" The equivalent of this thrill is provided to the journalist when the latter is able to pat himself on the back as a prophet whose forecasts have proved true.

Whenever he turns out to be a successful soothsayer, he seizes the occasion with both hands and rubs it into the reader with a pompous elaboration of details beginning with the invariable preamble, "as forecast in this column more than a month ago."

This cheap delight derived from the contemplation of being occasionally a truthful seer of the future, need not be grudged to the poor scribe. The scribe's lot in India, with the exception of the fortunate few who are employed in prosperous and pampered Anglo-Indian papers, is pitiful in the extreme. Recompense in terms of money is both inconsiderable and irregular. Tickled self-esteem has to make up for the deficiency in monetary emoluments.

---

Recent issues of "Indian Finance" discussed the question of the status of the debentures of the Calcutta Corporation, the Calcutta Improvement Trust, Calcutta Port Trust and the new Howrah Bridge Commissioners. The issues in this question were of grave import and calculated to have widespread repercussions.

It was brought to the forefront by the action of the Imperial Bank in circularising banks that debentures of these local bodies would not be considered eligible for inclusion among securities lodged for overdraft. The reason alleged by the Imperial Bank was that these debentures were unsaleable.

I questioned the accuracy of the statement about the saleability and the wisdom of the action in eliminating these securities from loan portfolios.

Apart from the colossal amounts involved and the large number of investors and investment insitutions affected, the effect of this ban which virtually was equivalent to a declaration that Calcutta was not safe, was to undermine civilian morale.

---

The local bodies concerned were not consulted before the Imperial Bank took action. It now appears that neither the Central Government nor the Provincial Government were consulted by the bank.

This is clear from the notification which has been issued from New Delhi last week-end.

The notification carries out the two important suggestions I had made in this column. I suggested that the Government of India should furnish their own guarantee for the debentures of all the local bodies in India and Burma during the period of the war and for one year after the war; and that, analogous to the fixation of minimum prices for central government securities and provincial government securities, minimum prices must be fixed for the debentures of the local bodies.

---

In the light of the above suggestions, the following communique, issued on Saturday, must be welcomed as providing speedy and satisfactory solution to a grave problem precipitated by the Imperial Bank:

"As apprehension has been expressed in certain quarters regarding the possible effect of the war on Indian Port Trust, Municipal and Improvement Trust Securities, it has been decided by the Central Government and the Provincial Governments acting together that they will stand behind these issues.

"They will not allow the finances of the issuing authorities to be so disorganised as a result of war developments as to prevent sufficient funds being made available for their service and payment on maturity.

"In addition, the Reserve Bank, with the approval of the Central Government, will be prepared to buy such securities in cases of proved necessity at prices which will be based on the minimum prices already fixed for Central and Provincial Government securities after allowing for the differences which normally prevailed before the present emergency between the prices of the securities in question and similar dated Government Securities."

It will be noticed that the action now proposed to be taken goes even further than my proposal. The debentures will be backed not only by the Central Government, but by the provincial government concerned. Not only will minimum prices be fixed by the Reserve Bank, but the Reserve Bank, with the approval of the Central Government, undertakes to buy such securities in cases of proved necessity. Thirdly, the minimum prices will not be fixed in relation to current quotations but in relation to the rates that prevailed before the present emergency.

---

The people of Calcutta have cause to feel extremely grateful to Sir Jeremy

Raisman for the prompt and completely satisfactory way in which he has dealt with this matter.

I take it that this guarantee is extended to the New Howrah Bridge loan too.

There still remains the question of the debentures of the Rangoon Port Trust and the Rangoon Corporation. The present notification applies only to the local bodies in India.

It is equally important that the large number of Indian investors in the Rangoon debentures must be given adequate protection.

But this is a matter in which the necessary action has to be taken by the British Government on whom has fallen all responsibility regarding Burma affairs owing to the shifting of the Burma Government from Rangoon.

What the Government of India can and must do is to make representations to the British Government and get them to give a guarantee to the Rangoon debentures under their general war risk insurance scheme.

Such a guarantee will be rightly interpreted as the symbol of determination and self-confidence on the part of the United Nations to win back whatever has been lost in Burma and the Far East.

---

I admit that the gossip to-day is very much in the nature of gratified self-esteem. Apart from the particular psychological makeup which explains and excuses such episodes in the life of a journalist, I could claim, in respect of yesterday's theme, that the matter to which I drew attention nearly three weeks ago and for which a solution was found last week-end more or less on the lines I had suggested is one which involves crores worth of debentures pertaining not only to Calcutta, but to other cities in India; and that, particularly to this city, the proposals now announced are of immense value as emphasising and underlining public morale.

That is to say, if what a journalist writes has the effect of revivifying the value of securities worth over Rs. 80 crores and revitalising the morale of the whole province, he has every reason to stress the point with pardonable pride.

---

I may be permitted to refer to another matter with pardonable pride. This question, too, involves crores. The final outcome in this matter is likewise favourable.

The question of Burma notes was raised in "Indian Finance" about the middle of last month. I shall try to explain the relevant issues in language that is readily comprehensible to the lay reader.

If you have a ten rupee note in your pocket, I would like to take it out and read what it says. The main gist of what it says is that the Governor of the Reserve Bank undertakes to pay you on demand Rs. 10. If you hold a one thousand rupee note, the Governor of the Reserve Bank promises to pay on demand one thousand rupees.

That is to say, all the holders of notes in the country can call upon the Governor to pay up the amounts stated on the currency notes. In simple terms, the Reserve Bank is in the nature of a banking institution which has received amounts on current deposit from the holders of the notes and which must pay the amounts on demand.

What does an ordinary bank do with respect to the liabilities on account of current accounts? The ordinary bank keeps assets of various kinds against the current liabilities. It keeps a *proportion* in cash, some in deposits with other banks, some in government securities and so on.

The essential point is that the banker keeps assets of a liquid kind against the liabilities in respect of current accounts.

The Reserve Bank has similarly to maintain liquid assets against the liabilities with regard to currency notes. These assets must be equal to the note liability. They consist of gold, sterling securities, silver coin and rupee securities.

Now, the Reserve Bank has been functioning both for Burma and for India. It has issued two sets of notes—Indian notes for India and Burma notes for Burma. The notes in circulation in India are about Rs. 420 crores; and the notes in circulation in Burma are about Rs. 30 crores. The total liability on notes is, thus, Rs. 450 crores.

The Reserve Bank has maintained assets for Rs. 450 crores against this note liability.

With the enemy in more or less complete possession of Burma, the question arose as to what would happen to the Burma notes that are left behind.

---

Many of the evacuees who have been returning to India have brought Burma notes and got them converted into Indian notes. The total Burma notes thus transferred into Indian notes may be about Rs. 3 crores.

Even so, Burma notes of the Reserve Bank are still in circulation in that country. So far as these notes are concerned, it is physically impossible that they can be taken out of Burma and presented to the Reserve Bank in India for conversion. It may, therefore, be definitely stated that the Reserve Bank has now been freed from the liability with respect to the Burma notes left in the enemy-occupied territories.

If the Reserve Bank has thus been absolved from the obligation of liability for Burma notes, what is to be done with the assets that the Reserve Bank had kept against the Burma note liability?

This was the question which we raised three weeks ago; and our suggestion was that the assets for Rs. 30 crores maintained against Burma note liability must be handed over to the Government of India; and that the benefit of this windfall should go to the Government and not to the Reserve Bank.

This is exactly what has now been carried out by the Government, as will be seen from the following communique issued on Saturday :

"In view of the occupation of Burma by the enemy, it has been decided to relieve the Reserve Bank of India of its liability for the Burma note issue, and to transfer the assets held by the Reserve Bank on this account to the Government of India. The assets so transferred will be held in a suspense account from which the value of Burma notes presented for encashment will be paid and the balance of which will be finally disposed of after the war. By an ordinance issued to-day, the Reserve Bank is prohibited from making payment except with the authorisation of the Government of India; and, in future, references to Burma notes will be omitted from the accounts of the Reserve Bank."

While the Government of India are hard pressed for money on account of increasing war expenditure, a windfall of Rs. 30 crores is doubly welcome.

I may get no share in the cash accruing from this windfall. But why deny me credit for pointing out that it could be done and how it should be done.

---

It is hardly necessary to examine the Honours List issued on Thursday to see if familiar names occur or recur. It is true that the war does not quicken interest in the distribution of titles, but it does not altogether divert attention away from those fortunate recipients whose claims to fame have been established afresh by the award of titles. The British list is not known, and it will not be many who would be keen on knowing who the new Peers are and why. Not so with the names here.

Now that it is almost certain that the Commerce Member is leaving India for an appointment abroad, the K.C.S.I. bestowed is in the nature of a farewell gift. I should hardly say that, because Sir Ramaswami Mudaliar is clearly marked out for even higher honours.

Businessmen are not many. Service in industry does not count for much, as against the pull with the Departments. That is all the more reason for counting the inclusion of Mr. Biren Mookerjee among the new knights of 1942 as happy and opportune. His father was the only Indian to get that ever-exclusive Royal award—the K.C.V.O. In the case of Mr. Biren Mookerjee, there was the claim to be regarded as an ex-Sheriff of Calcutta in addition to the membership of the National Defence Council. There was again the hereditary claim, besides which Mr. Biren Mookerjee as the leading Indian industrialist of Bengal plays a part in the war effort that is both practical and necessary. The City has reason to feel pleased that a leading citizen has been honoured betimes, and general satisfaction will be expressed in this case, since Mr. B. N. Mookerjee is on the Imperial Bank's Board and is likely to gather more and more distinctions with the years, in business and public life alike.

Nobody will fail to remark on the admission of Sir J. P. Srivastava to the Order of the British Empire. In his case, there is his career as an ex-Minister to shed lustre on his prowess as an industrialist. He is connected with that pattern of conservatism, the Allahabad Bank, and many companies great and small. There is already another distinction for Sir J. P. since a place in Rampur State is named after him.

In the list of Knights is to be found the name of Dr. Gregory. As Economic Adviser of Government he is associated with others besides the Commerce Department. The knighthood perhaps indicates that Dr. Gregory has passed from academic to bureaucratic life, but it also indicates that in the latter field he has more than made his mark. Sir Sydney Chapman and Sir Frederick Leith-Ross have been among the most famous civil servants known to England. It is now certain that Sir Theodore Gregory is among the best known Civil Servants in India. There are titles for Advisers, Engineers and police officials in plenty but none of them have obtained a name in any field outside administration. Dr. Gregory came to India with a reputation, and has added greatly to it by organising official research and enlightening Government as to the effects of measures like price control. His expert knowledge has clearly leavened official policy in war time, which is perhaps one reason why all criticism of financial and other measures so far has been meagre and ineffective.

*(From Our Correspondent)*

New Delhi, June 3.

An important announcement has been made today by the Government of India in pursuance of the recommendation of the Grady Mission. A War Resources Committee of the Viceroy's Council has been set up consisting of six members including the Viceroy, the Commander-in-Chief and the Members in charge of the Supply, Finance, Commerce and Communications portfolios. The committee which will meet from day to day, will deal with and coordinate problems of war production, transportation, communication, finance, rationing of goods and materials and all connected matters. This is in pursuance of the Grady Mission's recommendation that there should be a War Production Cabinet to push forward and coordinate war production work. This is no new thing, for some years ago there used to be an Economic Sub-Committee of the Viceroy's Council of which at one time Dr. Matthai was Secretary. The new War Resources Committee will have a separate Secretariat. There are at present several Boards functioning like the War Transport Board, the War Supply Board, the Economic Resources Board and so on. The activities of all these Boards will be directed and coordinated by the new Committee.

* * * * *

The Press Note issued today by the Government of India contains the welcome statement that the Governor General in Council has considered the report of the American Technical Mission and has decided to implement its recommendations to the maximum extent possible. But what is the maximum extent possible. Some of the observations made by Sir Homi Mody at his recent Press Conference have caused considerable disquiet in the public mind. The recommendations of the Grady Mission fall into two parts—technical and non-technical. It is hardly conceivable that the Government of India will reject any of the technical recommendations, for if one is to judge from the published summary, they are obviously so sound that they have to be accepted without question. Such measures as the development of water transport, improvement on more economic and scientific lines of the railway, posts and telegraph communications, the development of industries like power alcohol from molasses, the manufacture of radio sets and the provision of adequate arrangements for repairing aircraft, ships etc, which the Mission has recommended, are no new proposals. Many of them have been made in this country itself many times before—like the manufacture of power alcohol from molasses—but the Government of India did not pay the attention which these suggestions called for. A communique issued today by the Government of India creates a new office in Bombay called the Directorate General of Ship Repairs and Ship Construction, under Rear Admiral Turner, to organise and direct all work connected with ship repairs and ship construction.

* * * *

The Education Member, Mr. N. R. Sarker, has briskly concluded the arrangements for setting up the Central Food Advisory Council recently recommended by the Food Production Conference. Some time has been taken in consulting Provincial Governments and States and deciding the constitution of the Council. Though it has not been possible to provide a non-official majority, care has been taken to give fairly large representation to important non-official interests. The presidents of the Associated Chambers of Commerce and the Federation of the Indian Chambers of Commerce and Industry, representatives of wheat and rice interests like Sir Datar Singh and Mr. Momin, Prof. N. G. Ranga on behalf of agriculturists, and Sir T. Vijayaraghavachari on behalf of the States have been invited to serve on the committee. The rest will be officials like the Economic Advisor, the Vice Chairman of the Imperial Council of Agricultural Research and others. The main functions of the Advisory Council, as indicated in the course of the Food Production Conference, is to pool and disseminate information on food production and allied subjects, to plan on an all-India basis a food production drive and advise the authorities on the best and most equitable distribution of available food resources. The Council which will probably consist of 20 members under the presidentship of the Education Member will probably meet in July and outline its programme of work. Official circles here appear to be satisfied with the progress which the production drive has made in the provinces. As a matter of fact Food Production Councils are actively functioning in many of the provinces. After the Central Council has been set up to coordinate their work, even better results may be expected.

* * * * *

Some time ago the question was raised whether the Government of India would agree to take suitable action and pay adequate compensation when there are accidents caused by improper or negligent driving on the part of military drivers when discharging their military duty. The Government of India are reported to have taken the view that in the present emergency requiring a large number of military drivers "an increase in the number of accidents is inevitable." The Government of India have, however, said: "Power has been given to local military authorities to make ex gratia payments of limited amounts in cases of serious hardship without prejudice to the exemption enjoyed by the Crown in these matters. Government cannot undertake the risk of heavy claims by wealthier people, although such claims will be considered also on an ex gratia basis. "This attitude of the Government of India has provoked strong comments in many quarters. There is little doubt that the question will be raised during the next session of the Central Legislature. The Government of India's attitude is particularly surprising as His Majesty's Government in the United Kingdom has been taking a more reasonable attitude in this matter.

* * * * *

It has been officially announced by the Governor General that the term of the Central Assembly and the Council of State has been extended by another year. The Governor General has also turned down the request made by many elected members that there should be an early session of the Central Legislature. The idea, as it appears from the communique, is to have the session in the last week of October like last year. The decision to postpone any general election for the present owing to the need for concentrating public attention on the war effort is at least understandable. In the present state of the country's politics no useful purpose is likely to be served by ordering fresh elections. On the contrary they may let loose fierce political and communal controversies which are far from desirable. But is there really any justification for the decision to postpone the autumn session to October or possibly even November? Even in the last two years there were strong complaints that by putting off the autumn session in this manner a serious injustice was being done to the members of the Legislature. Especially this year there are big problems not only political but also economic like the Grady Mission's report, not to mention the growing seriousness of the problems connected with internal security. An early autumn session of the Central Legislature would have enabled the members to deal with these problems and help the Government with their advice and assistance. The Governor General's refusal—even after the public appeals made to him by important non-official members has undoubtedly caused great disappointment. It is believed that certain Indian Members of the Viceroy's Council also supported the proposal. Evidently the difficulty is partly administrative and partly political. It is not easy to arrange an early autumn session in New Delhi as there will be no residential accommodation available to the members without dispossessing officials of their present residences. Secondly it is thought that as the military situation will be far better in October, it would be better to hold the session then, instead of at a critical time like this when the Government find themselves hard pressed for time to deal with the many urgent problems which have now suddenly come crowding together.

The notice issued to the public regarding the closing of stations Matli exclusive to Badin inclusive, on the Hyderabad (Sind)—Badin branch line, which appeared in certain newspapers during the middle of April 1942 is cancelled. The Section in question will now be closed finally on 23rd September, 1942.

The dates on which the booking of traffic is to be stopped will be published later on.

*GENERAL MANAGER,*
Lahore.

*(Continued from page 909)*

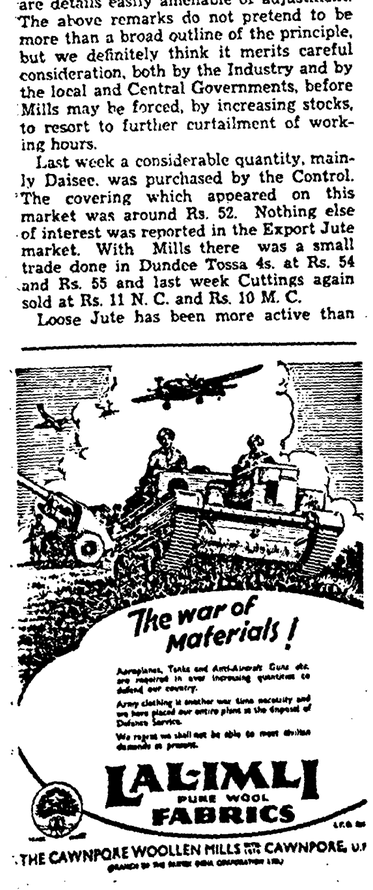
progress of Mysore's industries in the war period has apparently strengthened the position of the State in regard to its own investments. The founder of the steel works was freely praised and the technical progress at Bhadravati was mentioned. The Dewan spoke of the subsidy. The State's contribution of Rs. 19.37 lakhs seems high in his opinion and progressive reduction was advocated. Reference has been made in this connection to the increased grants made from the proceeds of income-tax to the British Indian provinces. The dispute was settled under the treaty made after the rendition of Mysore by Lord Ripon. It is important to note that it was fixed in relation to the great benefits provided to the State under direct British rule for fifty years. Mysore is now only paying for the solid benefits of rule by the Chief Commissioners and the State's revenue is admittedly large enough to stand the drain. Larger States may pay smaller contributions, but they are not so prosperous as Mysore which has not faced a deficit and retains a revenue system, both elastic and productive.

*(Continued from page 918)*

be added pro rata to the cost of the goods at the time of redemption by the Mill. Handling, storing and boating charges would also have to be adjusted so far as outside storage was concerned. But these are details easily amenable of adjustment. The above remarks do not pretend to be more than a broad outline of the principle, but we definitely think it merits careful consideration, both by the Industry and by the local and Central Governments, before Mills may be forced, by increasing stocks, to resort to further curtailment of working hours.

Last week a considerable quantity, mainly Daisee, was purchased by the Control. The covering which appeared on this market was around Rs. 52. Nothing else of interest was reported in the Export Jute market. With Mills there was a small trade done in Dundee Tossa 4s. at Rs. 54 and Rs. 55 and last week Cuttings again sold at Rs. 11 N. C. and Rs. 10 M. C.

Loose Jute has been more active than for some time past. Tossa has been in good demand, European packing Mids fetching from Rs. 10-8 to Rs. 10-12 with Bots. at Rs. 7-8 to Rs. 8-8. Supervised Tossa sold at Rs. 10, Rs. 7-4 and Rs. 5-4 for Mids., Bots. and X and Indian District Mids. fetched from Rs. 9 to Rs. 9-12, with Bots. at Rs. 7 to Rs. 7-8. European white Bots. sold at Rs. 6 and later this rate was paid for picked Indian Jat. Some further Weeding business is reported at Rs. 9-4 and Rs. 6-4 for Medium and Low and New Mehta sold at Rs. 11-12, Rs. 9-12 and Rs. 6-12 for 15th July shipment. European New Crop Jat and District is on offer at Rs. 11-8, Rs. 9-8 and Rs. 6-8 for Tops. Mids. and Bots., August-September shipment, but no business has been recorded.



Reports of the progress of the New Crop continue satisfactory though some more rain is wanted in Western and Northern districts. Daisee sowings await local rainfall. Rivers are about normal.

Estimated arrivals of jute into Calcutta during May were 1,91,000 B/s against 6,62,000 B/s in May 1941. This brings the total arrivals of jute this season up to 31st May to 56,32,000 B/s against 88,12,000 at the same point last season.

In the Fabrics section there has been a revival of demand for the country trade and a considerable turnover has been again recorded, mainly in "B" Twills at from Rs. 40 to Rs. 42 ready and Liverpools at Rs. 42 and Rs. 43. Union sewn "A" Twills sold at Rs. 46 and Rs. 47 June, and Cuban Sugars at Rs. 50 July-September. In hessian, trade has been limited to 45/11 oz. at Rs. 21-8 for 15th June and Rs. 21 for all June, with a few transactions in eleven porters for cover at Rs. 18-10.

Closing quotations are :—

| | Ready | June | July-Sept. |

**Bombay, June 9.**

No surprise has been occasioned by the announcement that Government is going to expand short-term borrowing further. The conditions are not unfavourable, and the stoppage of intermediates entailed an expanded tender issue. The rate is sure to go down because demand deposits of scheduled banks in India had gone up to Rs. 284.4 crores by the end of May and their balances with the Reserve Bank totalled nearly Rs. 54 crores. Slack conditions are certainly predicted in all bank statements, and in spite of steady buying of securities, there is not much scope for advances. Hence the bigger Treasury offer is welcomed locally. For the first time in months the average discount is less than the rate on three months' deposits. Governments' balances are not large though repayment of earlier bills will not call for much money. A bigger offer every week is certainly acceptable, and the bankers here find that in one other way at least *Indian Finance* foreshadowed official policy. A weekly offer of Rs. 6 crores at a time when stock exchange business is not substantial will not come amiss.

It is noticed that in London the acceptance of treasury deposits has increased of late. Since there is not much doing in the local bullion market at present, everybody is duly impressed by the war news and its restraining effect on the few bulls in the silver market here. The larger stock of gold has not yet forced down the price of gold but there is no local hunger for the precious metals as such. Progressive improvement in share prices has left all the Burma shares out. It is not without interest to find that B. B. Petrol is below half a crown against its par value of four shillings. They do not take much stock in oil shares as yet but Attock Oil is being tipped by the knowing.

The cotton market is not wavering at all in spite of the break in New York and the present calculations of mill output etc, deserve to be related to present prices of cloth and cotton. The market is not getting heavy orders but buyers are changing their views as to the price-level. Standard tins are definitely higher and the steady ascent of prices of imported goods has made dealers believe that you cannot have old prices back again. Cotton has gone up because wheat and seeds have gone up. Mills are getting fairly large orders at slightly better prices of late. That makes cloth merchants ready to accept the current view that the buyer will pay extra as he does for salt, matches, sugar and flour. English goods are selling at fancy prices of late and the price asked for rayon and silk goods beats the imagination. Of events financial, the major one is certainly the hardening in giltedged. The Libyan fighting has been helpful, and others besides Mr. Churchill are satisfied. The giltedged market has hardened after the weekend notification of a guarantee for trust securities but it is not the tax clause alone that puts Mysore 5 per cent at 122 when Bombay Municipal 6 per cent (1954) is quoting at Rs. 122 only. The investor has taken heart from the last notification and there is likely to be steady buying of the 4 per cent Port Trust long-dated stock standing at Rs. 101½ The Port Trust revenue should improve when traffic is speeded up. There has been a lot of delay and crowding; complaints have come and the ports have been asked to copy the wagon slogan. There are not enough lighters to take off cargo. That is the opinion of many who ponder over the Grady mission's remarks. The port pays a lot of attention to docks and does not think of lighters and barges to ship cargo in the stream itself. There are not enough tugs to get on with, this is another explanation, and somebody has asked why sailing craft cannot be used to take off and load cargo. There is a branch of shipbuilding that warrants attention at once and the Port Trust has been asked to contribute in its way from its large resources. Whether dockers will be stimulated to work harder remains to be seen.

Small industries are in the news every day. They are making camouflage nets, blankets and hats too. They are going to get orders to the value of Rs. 6.1 crores this year against Rs. 4.98 crores in 1941-42. And with all the Indian mills busy on war work under priority arrangements, there is sure to be a big demand for hand-made woollens. New liaison agency has been set up to harness small industry to the war effort. There was a conference three months ago and the Supply Department is ready to encourage small industries producing leather goods as also woollen blankets etc, wanted for the Army.

The Belgian Consulate reminds one and all that the Kingdom is still at war. Last year a treaty was signed at St. James Palace and the armed forces have fought as agreed. Belgium's freedom is to be won by the army acting with the Allies. Airmen have joined in the attack, but the trained soldiers wait for the word. There is a small navy, too, working with the Allied fleets. Belgium's Empire also is at war. The agreement of January 1941 ensured the flow of the Congo's resources, and it has been ratified by another pact signed on June 4.

In the month of May the cost of living went up again. The working class was most affected since the index went up from 138 in April to 142 in the next month. The rise does not support the view that controlled inflation is the order of the day. The rise was largely due to a sharp rise in the cost of foodstuffs in Bombay. The previous quarter saw a rise in the cost of living in the city of Ahmedabad and Sholapur. The rise is disturbing and suggests that price control is imperfect in operation. The rise in wheat and sugar since then renders it certain that price will not go down. The workers who are told that unionism is weak and they do not get enough help from them in Workmen's Compensation claims will not be pleased. The local boards of the Province displayed unusual ignorance of the statute. The returns submitted under the Act revealed a total of 2640 factories employing 674,486 workers including 2523 minors. The figures represent the sum of industrial employment in Bombay in 1940-41. It is not only the unions which do not know the law. Employers apparently do not know enough about the Act of 1923 and their liability thereunder .

The Chinese Communists certainly have got a big hand from all visiting journalists. D. F. Karaka has joined the Americans in praising China particularly for her war with Japan. The national war front's organisers got up a meeting to hear Mr. Karaka talk about his Chinese impressions. Mr. Karaka said there was a real war and a true effort in China. The Communists had made peace with the Marshal and refused to take reverses as final. China remembered everything since 1875 and just went on resisting. That was the spirit put in by the Reds and the Japs found superior equipment no advantage at all. Having reviewed the Chinese struggle he concluded that China would never yield. This is not the only assurance given of late but it proves that morale is the biggest asset of the Chinese at present. There was furious denunciation of Japan at the meeting and comment on the attitude of some who spoke up for non-violent non-cooperation.

Certain doubts raised as to war risks assurance of factories have been set at rest by a reply to the Maharashtra Chamber who has rented out a portion in which a factory is situated is the owner for the rented portion, and is liable for compulsory insurance under the April ordinance. In case he fails to take out cover the obligation for insurance for that portion of the building falls on the occupier of the factory who is entitled to receive from the owner all sums paid as premiums. It is further stated that as the owner of the building gains by being covered against war risks, it cannot be presumed that the premia paid will be passed on to the actual factory-owner. The original query referred to the possibility of rent being enhanced as a consequence of compulsory insurance. The Special Officer's reply seems to protect the occupier as against the landlord. The other doubt as regards insurable value has been dilated by all critics and the millowners association thinks that present cost of replacement is the only reasonable basis. Government should get larger premia; that is another consideration since the surplus money will go into general revenues.

# Resume of Commodity Markets

The generally improved tone of the commodity markets noticeable at the time of last writing continued to be in evidence early this week also. The encouraging news from the war fronts and the strength of the stock markets had an encouraging influence. The feature of the week is the rise in Broach July/August to above Rs. 200/-. During the last two days, however, a definitely easier feeling has been noticeable. The discouraging news from the Middle East and Russia has had a chilling effect.

Coming on top of the upward movement, the adverse war news was bound to have a discouraging influence. But the setback in prices, if any, can be only temporary for the easier eastern freight position and the more hopeful view taken regarding the future conduct of war should keep up prices.

Arrangements for checking effectively speculative rise in prices for the essential commodities are being concluded rapidly. The various provincial boards will give attention to the numerous problems of local deficiency, wagon shortage and redistribution. It is hoped that, by these measures, undue disparity in costs of living between one centre and another will be removed as far as possible.

### Jute

The raw jute market has been more lively during the past few days. It has been pointed out in these columns on more than one occasion that mills will have to enter the market sooner rather than later as stocks were very low. But larger buying during the week does not seem to have had any effect on prices, with the exception of the Tossa varieties for which sellers are reserved.

Hitherto, developments have been favourable to mills. With the likelihood of early arrivals of new crop in large quantities and of a higher quality and with exports at a standstill, mills could buy their requirements leisurely if there were no fresh complications. Only, as we said earlier, a rush for buying will result in serious transport difficulties and cause a temporary rise in prices.

### Jute Manufactures

The jute manufactures market has not been very interesting hessian, prices remaining more or less stagnant. The heavy goods section has been more active with good premiums offered for ready delivery. It is interesting to note that, while in the hessian market prices are quoting below the minima at which can mills can sell their goods, prices for sacking cloth and bags are substantially above the minima.

### Cotton

The reaction in the Bombay raw cotton during the past two days does not seem to be justified having regard to the strength of the earlier rise. Option dealers have sold heavily with the persistent weakness of the New York market and the absence of any fresh encouraging war news. However, there seems to be some resistance to selling pressure at the lower levels. The late rally towards the close indicates that the recent rise in prices was not quite speculative.

### Sugar

Considerable difficulty is experienced in getting the requirements of sugar. There cannot be any shortage of sugar for internal consumption by any criterion for total stocks available during the current season will be close on twelve lakhs tons. And the annual consumption of sugar when prices are normal is only about a million tons. Only the fixation of a low price by the control authorities has led to hoarding. The problem is also complicated by freight difficulties. It has not been possible to arrange wagon supplies. Factories have sold enormously but despatching instructions have been held up for months for lack of wagons. The quantity involved is as much as fifteen lakhs bags.

The difficulty is felt most in Bombay. At a conference recently held for the purpose it was decided that in future supplies of sugar to merchants should be made direct ex-mills. The Indian Sugar Syndicate therefore, has faded into insignificance for the time being.

### Wheat

Wheat also presents such difficulties. The problem of distribution and the need for bringing out hoards are very difficult to tackle. The fear of shortage of wheat was so great that provincial governments, sometime back, placed a ban on exports from their provinces. There is now greater coordination between the several provinces and the Wheat Commissioner for India will arrange proper distribution of wheat supplies and ensure that dealers get their quota on the basis of the past turnover. The following communique on the subject issued by the U. P. Government will make interesting reading:—

"The important dealers of the province should get into touch with the exporters of the other province in the normal manner and having concluded their transactions either apply to the Wheat Commissioner for India for an export permit or get the exporting dealers to make the necessary application.

"The Wheat Commissioner examines and checks up all such applications against the various quota alloted to the province. These quotas have been so alloted for this province that each importing dealer is assured of his supplies in accordance to his average past turnovers."

At this time of national stress, it is essential that every effort is made to conserve the supplies of paper at our disposal. We urge all business houses to see that the strictest economy is observed in the use of paper. So often one page could be made to do the work of two. Everywhere that must be done. We must save paper.

Countless maps have been traced, objectives marked and distributed — written orders issued to every command and battery — zero hour draws near.

Maps play an increasingly vital part in the preparations and the Army requires thousands of these.

Our Mills are working ceaselessly, day and night, to produce paper on which these Maps are printed

In meeting the gigantic demands of the Army, which is of vital national importance, we cannot always fill the needs of business houses with our usual promptitude.

# Jute and Jute Manufactures

(By Our Jute Correspondent)

Calcutta, June 11.

The mill stock position as revealed by the figures issued by the Association is better than might have been expected. As compared with 30th April, Stocks of commercial hessians as at 31st May had advanced by nearly 4 crores of yards. Sacking cloth and bags had increased by 2 crores yards. On Government account, Sandbags were practically unchanged but other hessian bags, cloth and canvas had increased by 2½ crores yards while there was an increase of over 50 lakhs yards in Sacking bags and cloth held on Government account. Altogether the total goods held in stock showed an increase during the month of some 27,000 tons. When it is considered that the production during May, when for over half the month Mills were still running 60 hours per week, could not have been far short of 100.000 tons (the actual figure is not yet available) the disposal in existing circumstances of over 70,000 tons of jute goods cannot be considered unsatisfactory. The quantity which can be handled by rail to Western India ports for export does not exceed 20.000 tons, and even allowing for the fact that demand for the country trade has been brisk, there must still have been a very considerable quantity shipped from the port of Calcutta, which is an encouraging feature. There is also every hope that this factor in the export trade will continue to show improvement.

We have been asked to elaborate somewhat on the "Stock-pile" scheme which has been advocated more than once of late in these columns. To emphasise the importance we attach to this idea, we would reiterate the undoubted fact that, immediately hostilities cease, there will be an urgent demand for the transfer of foodstuffs and other essential materials to the occupied, and starving, countries of the world, for under the principles of total war, the occupying of a country by the Axis is synonymous with starvation for the inhabitants of that country. It is well-known that already stocks of foodstuffs are being accumulated by the United Nations for prompt distribution to the occupied countries at the earliest moment. The shipment of such goods from the producing countries may be in the first place in bulk, but bulk handling apparatus in the ports of countries in the war zone must necessarily have suffered severe devastation from bombing, and in any case for interior distribution, vast quantities of bags and containers will be necessary. India is the principal producer of cheap containers, and it is to India that the world will look to provide them, and to provide them quickly. That is the primary idea of the "stock-pile" from which wide distribution can be made to all parts of the world without waiting for the goods to be manufactured.

The next aspect of the situation is the domestic one, as it affects Bengal and the Jute industry itself. We are faced with an ample crop of raw material in the coming season, so ample in fact that, unless some steps are taken to maintain prices at an economic level for the cultivator, there is a grave danger of a severe slump. The best way to attain this end is naturally to keep the Jute mills as fully employed as possibe which will also have the desirable result of keeping the large labour force fully employed and contented. If this can be done, the absorption of a large proportion of the crop in view will be assured. Mill stocks of raw materials are unusually low, so provided arrangements can be made to keep the machinery running well up to its capacity, a heavy offtake of jute will result. But with the shipping position as doubtful as it is at present, it is only natural that Mill Agents' first impulse will be to balance their production with the offtake for shipment. Already stocks have assumed rather ponderous proportions and while Mills fully appreciate that the demand will ultimately come for all that they can produce, they are not unnaturally reluctant to tie up unlimited finance for an indefinite period and with the added risk that their accumulated stocks may suffer damage or destruction as a result of enemy action.

It is here that we consider Government co-operation is called for. The accumulation of a "stock-pile" of fixed descriptions of standard goods should be sponsored by Government as a war measure and financed as such. We would suggest that a rate be worked out for each standard description decided on, representing the cost of raw material (at a level to satisfy the Government of Bengal that the interests of the cultivator are being safeguarded) plus manufacturing costs. Government should pay the Mills against Delivery Orders, if goods stored in Mill Godowns, or Godown Warrants, if stored outside, at the basic rate for each description. The Mill thus receives its actual outlay in the manufacture of the goods but no profit—at least no immediate profit. When however demand and shipping facilities so improve that the goods are required for export, the Mill may present a demand to Government to buy back its own goods represented by the Delivery Orders or Godown Warrants held by Government, and the Mill can then proceed to sell the goods at a profit in the open market. If Government find that demand is not being met by Mills taking back their own goods for sale, it should be permissible for Government to resell the goods after due notice to the Mill of its intention so to do. In the ordinary course this step would not be taken unless Mills were deliberately refusing to redeem their goods on a market which showed them a profit.

It may be urged that Government will be running a considerable risk of the market in a transaction of this sort, but we do not think so. The policy of the Government of Bengal with regard to maintaining an economic level for raw jute prices is presumably a permanent one and the policy of crop regulation will always be designed to that end. It is therefore highly improbable that prices of goods will slump so long as the raw material price is maintained. Also it is almost axiomatic that for some considerable period after the cessation of hostilities, the demand for jute goods will be maintained at a high level, so long as the price is not allowed to soar unduly, and the existence of the "stock-pile" will in itself act as a brake on any such tendency until the stock-pile is liquidated. The risk to be undertaken by Government is therefore negligible—it is merely required to provide the finance which it is scarcely reasonable that the Mill industry should be asked to do, and in addition Government will undertake the risk of destruction of goods by enemy action, for which they are already providing insurance facilities. It is impossible to place any estimate on the amount of finance likely to be required, which is an additional reason why this should be for Government account. But some limitation will be placed on the size of the "stock-pile" by the amount of storage space available. Mills will not be able to store a great deal more goods without encroaching on the space normally utilised for raw jute. But with the limitations on import trade and also on the export trade in raw jute in present circumstances, there must be very considerable godown accommodation available outside the actual Mills. Such godowns are suitably situated for ultimate export through the port and could without difficulty be secured at reasonable rentals, which along with insurance charges, could

(Continued on page 915)

"I can assure you that if people keep their heads and take the precautions laid down by the A. R. P. Service, casualties will not be heavy and that an air raid produces more noise and dirt than loss of life or injuries."

## JUTE

Calcutta, June 11.

The raw jute market has been more active during the past week and a larger volume of business has been reported in loose jute. Some transactions have been recorded in new crop also. With the easier freight position mills should buy on a large scale but without any serious transport difficulties internally, and the reports regarding the possibility of early new crop arrivals, there may not be any rush for buying. That is perhaps the reason that there has not been any improvement in the rates.

It is reported that cutting of the new crop has already begun in certain of the earlier districts.

In the loose jute section, new crop Medium and Low weedings were done at Rs. 9-4 and Rs. 6-4 per maund. Indian District Tossa Middles and Bottoms were done at Rs. 9-8 and Rs. 7-8 per maund respectively. There is good demand for Tossa varieties.

In the pucca bales section, not much business has been passing. Shippers have been inactive. Some small business has been reported in Dundee Tossa 4's at Rs. 54 and Rs. 55 per bale.

## JUTE MANUFACTURES

Calcutta, June 11.

The jute manufactures market has continued steady. There is not any appreciable change in prices in the hessian market but values for heavy goods have advanced further on substantial demand. Operators in the hessian market are hopeful of a further improvement in the freight position but in the present situation are not prepared to take any definite view. Business has, therefore, been mainly for near covering. The local stock figures for May did not have any effect on the market as it was expected that there would be an increase in both hessian and sacking goods. The total of hessian stocks, exclusive of government orders, are 29.10 crores yards against 25.27 crores yards. Sacking, cloth and bags, were 22.86 crores yards against 20.88 crores yards. On government account, sand-bags at the end of May 1942 were 12.42 crores yards and scrim cloth 1.28 crores yards. Hessian bags and cloth and canvas were 11.07 crores yards against 8.80 crores yards. Sacking bags and cloth were 1.57 crores yards against 99.64 lakhs yards. The figures are given below:—

### Total Reported Stocks of Manufactured Goods, exclusive of Government Orders

| Description. | 30th April, '42 | 31st May, '42 |
|---|---|---|
| Hessian Cloth and Bags— | | |
| Yards .. | 25,26,53,690 | 29,10,16,588 |
| Tons .. | 64,892 | 75,359 |
| 40 ins. 8 oz. Hessian (included in above)— | | |
| Yards .. | 1,23,67,050 | 1,59,82,097 |
| Tons .. | 2,760 | 3,570 |
| Sacking Cloth and Bags— | | |
| Yards .. | 20,87,63,845 | 22,86,95,669 |
| Tons .. | 68,774 | 96,819 |

### Total Reported Stocks of Manufactured Goods held on Government Account

| Description. | 30th April, '42 | 31st May, '42 |
|---|---|---|
| Sandbags— | | |
| Yards .. | 12,51,48,001 | 12,51,56,272 |
| Tons .. | 3,158 | 3,568 |
| Scrim Cloth— | | |
| Yards .. | 1,15,79,801 | 1,25,73,051 |
| Tons .. | 3,158 | 3,568 |
| Hessian bags and cloth & canvas— | | |
| Yards .. | 8,80,41,736 | 11,07,32,163 |
| Tons .. | 20,547 | 26,929 |
| Sacking bags & cloth— | | |
| Yards .. | 99,64,425 | 1,57,16,212 |
| Tons .. | 4,054 | 6,105 |

The May figures include the returns of Gagalbhai in addition to that of members, but the returns of Katigarh, Shree Hanuman, Naskarpara, Kedarnath and Maheswari Devi have not been received and are excluded.

In the heavy goods section, as mentioned above, there has been good demand for B. Twills and Liverpool Twills. The quotations, however, are slightly easier towards the close. B. Twills for Ready delivery sold on the basis of Rs. 41-12, Liverpool Twills Rs. 42-8 and Cornsacks Rs. 41.

## GOLD

Calcutta, June 11.

A slightly firmer tendency was noticeable in the Bombay gold market during the past week. There has been greater buying of gold for ready delivery and the premium for the same over First Settlement has improved from one anna to four annas. Gold ready were quoting Rs. 48-13 and First Settlement Rs. 48-9. One would have expected that there would be a rise in the price of soverign as well but the same is not very much changed at Rs. 37-2.

## SILVER

Calcutta, June 11.

There has been only a slight rise in the quotations in the silver market in sympathy with the gold market. Not much business has been passing. Indian Mint silver ready were quoted towards the close at Rs. 30-8 and First Settlement at Rs. 78.

There has been no change in the London silver market and the quotation for both spot and forward has remained at 23½d.

## COTTON

Calcutta, June 11.

After earlier firmness, there has been a rather sharp decline in prices in the Bombay raw cotton market during the past week. The abrupt rise in prices earlier in the week for Broach/April May to over Rs. 200, was attributed to the increased mill consumption, strength of the share market and seeds market and the generally optimistic outlook adopted by operators. In the face of the sharp fall in prices in the New York market, the strength of the Bombay market was rather surprising. The absence of encouraging war news and the selling by commission houses have, therefore, been responsible for the decline in values during the past two days. Broach July/August are now quoting Rs. 188-12, Oomra July Rs. 163-8 and Bengal July Rs. 159-8 after being higher at Rs. 202, 166-12 and Rs. 176-12 respectively.

In the New York market prices are still lower. The uncertainties regarding farm legislation and the absence of mill buying on a large scale have been responsible for the consistent decline in values during the past two weeks. The quotation for July was 17.83 cents and October 18.14 cents against 18.50 cents and 18.77 cents at the end of last week.

## WHEAT

There is nothing of importance to be recorded in the wheat market. With the control rates in force, holders are not inclined to do business. The wagon shortage also has added to the difficulties of operators in certain centres. It is hoped that with the arrangements for freer movement of wheat, hardship will not be felt to such an extent.

## PIECEGOODS

Calcutta, June 11.

The piecegoods market has continued firm during the past week. Demand from consuming centres has been satisfactory with clearances on a fairly large scale. Buyers are not inclined to buy freely at the present high levels but it is generally expected that with the liquidation of the recently acquired stocks there will be greater confidence in the strength of the price structure. Good business has been reported in standard lines. With the acute scarcity of Japanese styles prices have been continuously on the uptrend.

## TITAGHUR PAPER MAINTAINS DIVIDEND

THERE have been no important developments in the stock markets in Bombay and Calcutta during the past week. In the absence of any fresh encouraging news, operators seem to be marking time but the undertone in the several sections remains steady. Cotton and sugar shares have continued to be in demand.

The fears that the Committee of the Calcutta Stock Exchange would remove all restrictions on trading have now been set at rest. Minimum prices are now in force for Jute, Coal, Tea and Engineering shares. The decision of the Committee took effect from June 8, 1942. For cotton, sugar and miscellaneous shares, there is good demand and quotations are considerably higher than the minima that were in force till very recently.

* * * *

Thanks to the complete stoppage of imports of paper on account of the war, the *Titaghur Paper Mills Company Limited* has been gaining from strength to strength and the profits for the half-year ended March, 1942 are more than twice the earnings for the half-year ended March, 1940. They would have been still higher but for the strike in No. 1 Mill from 23rd March to 15th April, 1942. It was possible to run two machines all the time only with the loyal co-operation of a few workers and the mill assistants.

The net profit, before providing for taxation and depreciation, for the half-year is Rs. 46,03,576 against Rs. 42,21,209 for the previous six months. The increase in earnings has been more than absorbed by the higher provision for taxation which is Rs. 29,60,000 against Rs. 24,30,000. The amount set aside to depreciation is Rs. 4,36,911 against Rs. 4,08,281. The sum of Rs. 1,49,754 against Rs. 1,62,449 has been utilised for the revaluation of investments. The book-value of investments has been reduced to current minimum market rates or par value, whichever is lower. The sum of Rs. 2.5 lakhs, the same as before, has been transferred to Debenture Redemption Reserve. Rs. 1.5 lakhs (*same*) to Reserve for revaluation of stocks and stores and Rs. 90,000 (same) to other funds.

Owing to the larger provision for taxation, it has not been possible to transfer any amount to General Reserve (on the last occasion Rs. 1 lakh). After payment of the preference and the preferred ordinary dividends, the dividend on the 'A' and 'B' Ordinary shares has been maintained at eight annas per share and the bonus at four annas per share. The amount carried forward is Rs. 1,47,306 against *Rs.* 1,59,728 brought in.

Both mills of the company are now mainly employed in manufacturing supplies for Government and the Military authorities but at the same time the requirements of old customers are being attended to as far as possible.

Recently, greater interest has been shown by investors in paper shares and the quotation for Titaghur ordinary shares is now Rs. 20/- cum. dividend. At this level the yield is more than 7.5 per cent tax-free.

* * * * *

A larger crop and a higher average price realised on sales of tea have resulted in a further increase in earnings of the *Patrakola Tea Company Limited* for the year ended December, 1941. The directors, however, have not chosen to increase the dividend which is already very high. The net profit, before providing for taxation, is Rs. 14,12,143 against Rs. 12,20,429 for 1940. Taxation accounts for Rs. 3.3 lakhs against 2.25 lakhs. The final dividend of 52½ per cent, with the two interim dividends amounting to 20 per cent already paid, makes 72½ per cent for the whole year. The amount carried forward is considerably higher at Rs. 6,59,958 against Rs. 5,19,814 brought in.

The total crop for the season was 57,051 maunds against 53,634 maunds for the previous season and the average price realised was ten annas two pies per lb. against 9 annas two pies per lb.

* * * * *

Another company, belonging to the same group, to report a higher level of earnings for 1941 is the *Hantapara Tea Company, Limited.* The net profit, before providing for taxation, is Rs. 5,46,108 against Rs. 3,78,103 for 1940. The provision for taxation is Rs. 98,000 against Rs. 51,000. After maintaining the dividend at 30 per cent, the carry forward is increased by nearly Rs. 1,06,000 to Rs. 1,75,836.

The crop made from the Hantapara estate in 1941 was 14,174 maunds against 11,519 maunds in 1940 and the average price realised was 10 annas 3 pies against 10 annas per lb. The crop outturn from Dumchipara estate in the same year was 10,353 maunds against 8,498 maunds and the average price realised was 10 annas 3 pies against 10 annas per lb.

* * * *

Even with a higher level of earnings the directors of the *Singareni Collieries Limited* have not thought it advisable to pay a dividend to shareholders out of the profit for the year ended December, 1941. It has been considered advisable to create stocks of all essential stores while they are available. For this purpose, it is necessary to conserve the Company's resources in order to pay for stocks and to finance the vital development programme. The wagon position is uncertain, and it is probable that the shortage of wagons will lead to a heavy reduction in the company's earnings.

The net profit, before providing for taxation and depreciation, for 1941 is Rs. 10,28,972 against Rs. 9,54,952 for the previous year. After providing for taxation Rs. 6.4 lakhs against Rs. 5.8 lakhs, the amount carried forward is the huge sum of Rs. 4,99,192 against Rs. 1,10,220 brought in. A dividend of 5 per cent was paid on the last occasion.

Total raisings during the year were 1,212,583 tons against 1,178,945 tons in 1940. *Mining* operations at Singareni ceased on September 16, 1941 and the Registered offices of the Company have now been transferred to Kathagudium collieries.

## CALCUTTA STOCK EXCHANGE

*(From Our Correspondent)*

Calcutta, June 12.

With the easier tone of the Bombay Stock Exchange there has not been any further broadening of interest on the Calcutta Stock Exchange. Also, with the relaxation of restrictions regarding trading and the easier tone noticeable in some sections at the end of last week it could not have been expected that the upward trend would be sustained. However, there has been continued demand for Cotton and Sugar shares and a larger number of transactions has been recorded. Giltedged securities have been firm. The undertone in the several sections is satisfactory.

With the continuance of cheap money conditions, giltedged securities have remained firm. There has been good demand for short and medium-dated loans. 3½ per cent. Paper is only a shade better with the quotation at Rs. 91-10. Among terminable loans, 3 per cent. Second Defence Loan were Rs. 99, 3 per cent. Defence Bonds 1946 Rs. 101-12, 3½ per cent. 1947/50 Rs. 101-10, 4½ per cent. 1955/60 Rs. 109-14 and 5 per cent. 1945/55 Rs. 107-14. Among provincial loans, the only transaction recorded was in 5 per cent. U. P. 1944 at Rs. 103-6. Money conditions, as has been pointed out above, have continued very easy and there has been a further decline in the treasury bills rate to fifteen annas and five pies per cent per annum from one rupee one anna and seven pies per cent per annum.

Among fixed-interest securities, the recent announcement by the Government of India regarding the future of port trust, municipal and improvement trust debentures has not had any effect on prices. No transactions have been recorded in debentures during the past week. Among industrial debentures, *Titaghur Paper* debentures were Rs. 100-12, 5½ per cent. *Dalmia Cement* debentures Rs. 101 and 3 per cent. *Dhunseri Tea* debentures Rs. 100-8.

First class jute mills preference shares have continued to be in request, *Adamjee* quoting Rs. 126, *Clive* Rs. 115, *Hastings* Rs. 116-8, *Howrah* 'A' preferences Rs. 124-8 ex-dividend and *Northbrook* Rs. 129. Other transactions include *Steel Corporation* at Rs. 102 ex-dividend, *Burn & Co.*, 6 per cent. preferences at Rs. 117 and *Kumardhubi Engineering* at Rs. 147-8.

In the Cotton section, *Bengal-Nagpur* were marked higher at Rs. 19-4, *Dunbar* at Rs. 235, and *Cawnpore Textiles* at Rs. 9-12. The firmer tone of the piecegoods market has had an encouraging influence.

Coal shares have been neglected and only a few transactions have been recorded. *Bengal* were crossed at Rs. 350, *Raneegunge* at Rs. 26 and *West Jamuria* at Rs. 29.

In the Jute section also there has been very little business. Ordinary shares have not been very much in favour. *Gourepore* were Rs. 638, *National* Rs. 21-2 and *Waverley* Rs. 2-15.

In the Engineering section, *Indian Iron* and *Steel Corporation* have been fluctuating in narrow limits, the quotations being around Rs. 27 and Rs. 17 respectively. *Burn & Co.* were dealt in at Rs. 340, *Indian Malleable Castings deferreds* at Rs. 2-8 and *Kumardhubi* at Rs. 4-12.

Sugar shares have been in great request. *Champarun* were Rs. 24-12, *New Savan* Rs. 15-5, *Purtabpore* Rs. 12-12, *Ramnugger* Rs. 11-4 and *Ryam* Rs. 29-8.

Tea shares also have been neglected. *Jaybirpara* were Rs. 22 and *Grob* 'B' shares Rs. 7-2 ex-dividend.

In the *Miscellaneous* section, *Burma Corporation* were Rs. 2 and *Indian Copper Corporation* Rs. 2-1. *B.I. Corporation* were higher at Rs. 5 while *Indian Cable* were Rs. 20-1 and *Rohtas Industries* Rs. 24. Paper shares have been marked higher with *Titaghur Paper* having buyers at Rs. 19-14. *India Paper Pulp* were Rs. 140, *Mysore Paper* Rs. 17-6 and *Orient Paper* Rs. 17. *Midnapore Zemindary* were Rs. 72 and *Dalmia Cement* deferred Rs. 3-14.

## BOMBAY STOCK EXCHANGE

*(From Our Correspondent)*

Bombay, June 12.

After earlier firmness rather quiet conditions have been noticeable in the Bombay market during the past week. The new account has not opened quite well. The lack of encouraging news and the tendency of operators to cash profits have been mainly responsible for the slight decline in values towards the close. No weakness, however, has been noticeable. Giltedged securities have been very steady.

*Securities.*—Rather firm conditions have been noticeable in this section with 3½ per cent. Paper quoting Rs. 91-8, 2¾ per cent. 1948/52 Rs. 96-10, 3 per cent. 1951/54 Rs. 98, 3 per cent. 1963/65 Rs. 91-12 and 4 per cent. 1960/70 Rs. 106-9.

*Textiles.*—With the strength of the cloth market textile issues continued to be in request early in the week and further improvement in prices was recorded. Closing quotations are slightly below the highest levels for the week. *Bombay Dyeing* were Rs. 1252-8, *Central India* Rs. 379, *Century* Rs. 475, *Gokak* Rs. 264, *Kohinoor* Rs. 502 and *Svadeshi* Rs. 450. All quotations are for cash.

*Hydro-electrics.* — *Tata-Hydro* were Rs. 166, *Tata* Power Rs. 1515 and *Andhra Valley* Rs. 1615.

*Miscellaneous.*—*Alcock Ashdown* are higher at Rs. 492-8 while *Belapur Sugar* are lower Rs. 21-6, *Shivrajpur Syndicate* Rs. 36-8 and *Associated Cement* were unchanged at Rs. 168. *Tata* ordinaries were Rs. 313 and deferreds Rs. 1,615.

*Including Rs. 25,000 from Dividend Equalization Fund.

*(Half-yearly meeting, 17th June, 1942 at 10-50 a.m.)*

*The Audited accounts for the half-year ended 31st March, 1942:—*

The accounts show a profit of Rs. 6,27,288-7-2. After providing Rs. 4,07,978-0-0 for taxation (including Excess Profits Tax), Rs. 42,894-0-0 for depreciation, and placing Rs. 25,000-0-0 to Welfare Reserve and Rs. 25,000-0-0 to War Contingency Reserve, there is an available balance at credit of Profit and Loss Account of Rs. 1,44,075-8-10, which includes Rs. 17,659-1-8 brought forward from last half-year.

The Directors propose to dispose of this as follows:—

| | Rs. | As. | P. |
|---|---|---|---|
| In paying a Dividend on the Preference Shares at the rate of Rs. 6 per cent. per annum, without any deduction for Income Tax paid by the Company .. .. | 27,000 | 0 | 0 |

*(Half-yearly meeting, 23rd June, 1942 at 11-30 a.m.)*

*Audited accounts of the company for the half-year ended March 31, 1942:—*

There is a profit after providing Rs. 1,93,552-9-6 for Depreciation on Block and Rs. 7,50,000 for Taxation, a profit for the half-year of .. .. .. 4,03,062 0 0

Add balance brought forward from last half-year .. .. .. .. 60,708 7 5

or an amount available of .. .. 4,63,770 7 5

which the directors recommend should be dealt with as follows:—

| | Rs. | A. | P. |
|---|---|---|---|
| Payment of dividend of Rs. 6 per share .. | 3,54,984 | 0 | 0 |
| Leaving a balance to be carried forward of .. | 1,08,786 | 7 | 5 |
| Total .. | 4,63,770 | 7 | 5 |

Machinery & Electrical Machinery expenditure represents a balance payment for the electrical equipment of Champdany Mill.

Buildings continued to be maintained in good order and condition and are, as usual, fully covered by insurance.

*Jute.*—In view of the maintenance of a comparatively high average level of prices for raw material, despite the lack of demand, and in order to conserve the Company's cash resources, it has been deemed desirable to reduce stocks considerably.

*Working Hours.*—During the half-year the working hours were increased from 54 to 60 hours per week on November 6, in order to meet fresh demand for goods on Government accounts.

*Manufactured Goods.*—With the gradual deterioration of the Far Eastern situation culminating last December in the declaration of war by Japan, prices during the latter part of the period under review have receded steadily until a point has now been reached when spot prices for hessians are below the minimum rates fixed by the Indian Jute Mills Association. Shipping facilities have recently been the subject of grave concern, and while the sacking section is relatively satisfactory, the outlook generally is hardly promising. Working costs continue to increase, the result of which, in conjunction with lower price levels for manufactured goods, points to a decline in profits for the current six months. It should be noted, however, that any improvement in the shipping situation would at once be reflected in market conditions.

*Investments.*—The Company has continued its policy of investing surplus funds in Government of India War Loans.

*Managing Agents.*—Messrs. James Finlay & Co., Ld.

*Authorised Capital*—Rs. 60,00,000. *Issued and Subscribed*—Rs. 59,16,400 *in* 59,164 *shares of* Rs. 100, *fully paid-up.*

Synopsis of the balance as at 31st March, 1942:—

| *Liabilities.* | Rs. | *Assets.* | Rs. |

## LEDO TEA COMPANY, LIMITED

*Audited accounts for the year ended December 31, 1941:—*
The accounts show a profit on working of:—

| | Rs. | A. | P. |
|---|---|---|---|
| Ledo .. .. .. Profit | 1,41,898 | 10 | 8 |
| Nagrijuli .. .. .. „ | 55,962 | 4 | 5 |
| Total Profit | 1,97,860 | 15 | 1 |

On transfer of above to Profit and Loss Account, and after sundry adjustments including the transfer of Rs. 25,000 to Reserve Account there is a balance at credit of that account of Rs. 1,62,936-15-1.

*Dividend.*—It is proposed to pay a dividend of 15 per cent and to carry forward Rs. 65,436-15-1.

*Crop.*—The outturn and average selling prices compare with those of the previous year as under:

| | Mds. 1941 | Mds. 1940 |
|---|---|---|
| Crops .. .. .. | 6,600 | 5,530 |
| Ledo .. .. .. | 2,848 | 2,409 |
| Nagrijuli .. .. | | |
| Average selling prices per lb. | | |
| Ledo .. .. | 11 annas 3 pies | 10 annas 5 pies |
| Nagrijuli .. | 10 „ | 10 „ 9 „ 10 „ |

Planted area remains unaltered, being 666.85 acres at Ledo and 380.38 acres at Nagrijuli.

Estimates for 1942 provide for a total crop of 8,000 mds. at an outlay of Rs. 3,04,238 including inland freight and sale charges. Ledo is, however, temporarily out of production owing to requirements of the military authorities. Compensation is to be awarded to the Company for loss in profits on this account.

*Managing Agents.*—Messrs. Duncan Bros. & Co., Ld.

*Authorised Capital*—Rs. 7,25,000. *Issued and Subscribed*—Rs. 6,50,000 *in* 6,500 *shares of* Rs. 100, *fully paid-up.*

Synopsis of the balance as at 31st December, 1941:—

| *Liabilities.* | Rs. | *Assets.* | Rs. |
|---|---|---|---|
| Capital Paid up .. | 6,50,000 | Fixed Capital Expenditure .. | 5,50,000 |
| Reserves .. | 3,50,000 | Stores and supplies | 40,030 |
| Reserve for taxation | 73,827 | Outstandings .. | 1,10,126 |
| Current debts .. | 1,29,757 | Investments .. | 3,23,944 |
| Carry forward .. | 65,437 | Cash Balances .. | 2,44,921 |
| Total .. | 12,69,021 | Total .. | 12,69,021 |
| | | Total Liquid Assets | 7,19,021 |

## HANTAPARA TEA COMPANY, LIMITED

*Audited accounts for the year ended 31st December, 1941:—*
The accounts show a profit on working of:—

| | Rs. | A. | P. |
|---|---|---|---|
| Hantapara .. .. .. | 3,07,413 | 9 | 9 |
| Dunchipara .. .. .. | 2,01,772 | 14 | 2 |
| Total .. | 5,09,186 | 7 | 11 |

On transfer of above to profit and Loss Account and after sundry adjustments there is a balance at credit of that account of Rs. 5,39,836-7-3.

*Dividends.*—An interim dividend of 10 per cent on the Ordinary shares. was paid on November 25, 1941 and the dividend on the Preference shares was paid on December 30, 1941, leaving Rs. 4, 15,836-7-3 now to be dealt with. It is proposed to pay a final dividend of 20 per cent on the Ordinary shares and to carry forward Rs. 1,75,836-7-3.

*Crop.*—The outturns and the average prices compare with those of the previous year under:—

| | Mds. 1941 | Mds. 1940 |
|---|---|---|
| Crops .. .. | | |
| Hantapara .. .. | 14,174 | 11,519 |
| Dunchipara .. .. | 10,353 | 8,498 |
| Average selling prices per lb. | | |
| Hantapara .. | 10 annas 3 pies | 10 annas 0 pie |
| Dunchipara .. | 9 „ 11 „ | 9 „ 8 „ |

Planted area remains 2,427.06 acres comprising 1,265.06 acres at Hantapara and 1162 acres at Dunchipara.

Estimates for 1042 provided for a total crop of 18,650 mds. at an outlay of Rs. 8,49,299 including inland freight and sale charges.

*Managing Agents.*—Messrs. Duncan Bros & Co., Ld.

## WORLD OF INDIAN FINANCE

Friday Evening.

THE reviewer of the money market has to take note of two outstanding events this week. First, the treasury bill market has provided evidence of unusual capacity, strength and vitality. The offer of tender bills on June 9, was Rs. 4 crores; and there was such keen bidding that the Reserve Bank decided on raising the offer to Rs. 6 crores for June 16. As we remarked last week, tender bills for Rs. 6 crores should, in ordinary circumstances, be considered as overstraining a market of the capacity of the Indian treasury bill market. Far from the offer of Rs. 6 crores proving anything like a strain, the market has provided an unprecedently enthusiastic response. Applications amounted to over Rs. 14 crores. The average discount rate showed a substantial decline from annas 15 and pies 5 per cent per annum on June 9, to annas 13 and pies 8 on June 16. Bucked up by this week's lively bidding resulting in appreciably lower rates, the Reserve Bank has raised the offer of tender bills for next week to Rs. 8 crores. From current money market conditions, it looks as though even this amount will prove well within the present capacity of the market.

---

The offer of tender bills on the present scale cannot be maintained for long. But, in relation to the current cash position of banks and especially of the Imperial Bank, it may be said that the point of satiety will not be reached for some time yet. This means, that treasury bills outstandings may well touch the Rs. 75 crore mark in the course of July. The floating debt at roundabout Rs. 75 crores is not exactly a record as, in the early thirties, treasury bill outstandings stood many times at Rs. 70 crores and over. But there are two significant points of contrast between heavy treasury bills outstandings then and now. In the early thirties, that is, prior to the delinking of the rupee from gold in September 1931, the Indian money market was subjected to the most rigorous and relentless persecution of deflationery policy. High bank rate was the order of the day; currency contraction was being effected in rapid doses; stringency in the money market was deliberately inspired and fostered; treasury bills were sold for fantastic amounts and at frenzied rates. It was these high rates that induced the flow of London funds for investment in Indian treasury bills. Foreign banks reaped a rich harvest from this ample margin between the borrowing rate in London and the treasury bills rate in India. It may be said that more than 75 per cent of treasury bills in those days were taken up with funds which foreign banks brought out from London by the process of sale of ready T.T. and the purchase of three months' forward T.T. To sum up, the big-size floating debt in the years preceding September 1931, was largely made up of foreign money and raised at rates of interest exceeding 6 per cent. The position to-day is exactly the opposite. For some considerable time, foreign banks have been taking but poor interest in treasury bills in India. This is due to a variety of reasons. Firstly, they are generally disinclined to be overdrawn on London. Secondly, especially in recent months, exchange banks have experienced a mild exodus on deposits in favour of Indian institutions. Thirdly, over a period of years, the yield on rupee treasury bills has hardly been high enough to make it worth while for banks to bring out funds from London. The result is, that the present treasury bills outstandings are almost entirely through contributions from domestic sources. The proportion of foreign money in treasury bills is negligible. The treasury bill market in India may now be said to be an independent entity fed on reserves available within the country. Equally significant is the fact that the average interest payable on treasury bill outstandings is slightly less than one per cent, compared with the 6 per cent and over in the early 'thirties.

---

Another important event to note is the disappearance of Burma notes from the Reserve Bank returns. On the liabilities side in the issue department, the head "legal tender in Burma only" has been removed. This means that the Reserve Bank, from now onwards, will function as the Central Banking institution for India and only India. On account of the decision to transfer Burma notes to the Government of India, the liability is reduced by Rs. 28.73 crores. Correspondingly, on the assets side, rupee securities have been reduced from Rs. 149.15 crores to Rs. 122.29 crores. The only other feature of note in the issue department return is a rather steep decline in rupee notes from Rs. 27.44 crores to Rs. 25.56 crores. There has been a steady outflow of rupee coin in the past many months; but the demand for coin was in no way comparable to that in the days of panicky hoarding. This week's heavy outflow of coin is, therefore, rather disturbing. In this context, we may refer to the announcement of the impending issue of two rupee notes. The reasons given for the introduction of two rupee notes are not convincing. Experience in the last war of two and a half rupee notes is not encouraging. In fact, the two and a half rupee notes proved neither fish nor flesh nor good herring; and they had to be withdrawn. One cannot therefore be sure if the experiment with the two rupee notes will prove more satisfactory. But there is one important consideration. In the period between the last war and the present, great changes have taken place in the attitude of the public towards paper currency. The general public now accept notes without any hesitation and are more accustomed to carry about notes and use them in day-to-day transactions. In the panicky withdrawal of silver coin, which took place after the collapse of France, it was not the general public that raided the currency offices for shiny coins, but the rich and capitalistic classes. That preference for rupee coin is to-day not so marked among the masses, is further conclusively proved by the ease with which the Government have been able to put the one rupee notes into circulation. From all these facts, we, for our part, are prepared to agree with the Finance Member that the experiment of two rupee notes is well worth a trial. Whether these two rupee notes will be treasury notes or bank notes, has not yet been decided. But if an ordinance can make one rupee notes get the same status as one rupee silver coin, there should be no difficulty in another ordinance making each two rupee note equivalent to 2 silver coins.

---

The exchange market has been dull. Hardly any bills. Very little remittance on either side. Bankers and brokers have little to re-

(Continued on page 957)

## TREASURY BILLS

**India**

Tenders for Rs. 6,00,00,000 (Rupees 6 crores) of three months' Government of India Treasury Bills were opened on Tuesday, June 16, 1942. Total amount offered was Rs. 14,58,25,000 (Rupees 14 crores 58 lakhs 25 thousand). Tenders at Rs. 99-12-9 per cent and above were accepted in full and those at 99-12-6 per cent were allotted approximately 58 per cent. Lower tenders were rejected. Total amount accepted was Rs. 6 crores, the average rate of accepted tenders being Rs. 0-13-8 (Rupees nil annas thirteen and pies eight) per cent per annum.

Tenders for Rs. 8,00,00,000 (Rupees 8 crores) of three months' Government of India Treasury Bills will be received on Tuesday, June 23, 1942 in Bombay upto 11 a.m. (Standard Time) and upto the close of business on Monday June 22, 1942 at other centres. Successful tenderers should make payment on Friday, June 26, 1942. Other conditions are as usual.

During the week ended June 12, 1942 Government of India Treasury Bills for Rs. 73,50,000 (Rupees 73 lakhs 50 thousand) were sold in favour of the Issue Department of the Reserve Bank of India.

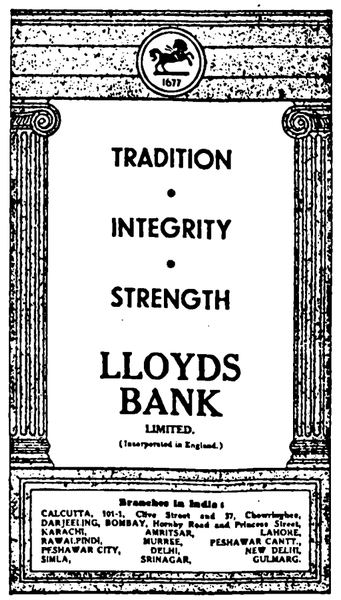
# Finance Abroad

Thursday evening.

THE taking of £60 million by way of six months' deposits and the maintenance of the regular tender issue at £75 million are a reminder of the unalterable calm of the London money market. Last week it was said again that money was plentiful at ¾ percent and competition for treasury bills was keener than before. The important factor is stabilised control so that the market has hardly any need to go to the clearing banks whose own deposits with the Bank of England have been larger of late, reflecting in the usual manner the unimpaired ease of money which makes this a two percent war for Britain. From the market angle, Libya like the last Flag Day, is nothing to consider.

The vote of credit introduced last week is a different matter. For the second time this year, the Government has asked for, and obtained, a thousand millions. The vote went through in thirteen minutes, and the explanation of Sir Henry Kingsley Wood gave complete satisfaction. Expenditure running just now at £84½ millions per week shows that the former average of £12 million a day has been beaten. In the third year, the British are spending more and do not apparently dislike it. For nothing can be too high for the recovery of the world's freedom. Parliament obviously registered approval on learning that £8,640 millions have been spent so far and also that war expenditure to date is greatly in excess of what was spent in 1914-18. The vote of credit is sufficient proof of Britain's resources and willingness. Raising the money is not likely to present difficulties for savings total £11 to £12 millions per week. There are thousands of new savings groups. Revenue is coming in promptly. Returns for six weeks showed a big rise under incometax and excise. The taxpayer's response is more than admirable. His morale is unaffected by the summer, and his readiness to sacrifice may be measured in the deliberate abstinence from travel on Bank holidays.



The vote of credit puts an end to fears as to what would go on if the war was longer than expected. The people of Britain are ready to keep on paying more, especially, the working class which has through its readiness to make sacrifices shown that Britain is not France.

The scale and pace of national savings has been doubled as compared with 1941, but there are still doubts as to the gap between effort and the available margin. The fanatics want 70 per cent of the national income. The Chancellor's appeal for bigger savings was, therefore, related to the general argument that every item of private expenditure must yield to the war. Borrowing cannot at solve the present generation of its liability to pay for the war. Of that, Professor Gustav Cassel has forcibly reminded all of us once again in discussing the place of loans in war finance to-day. The main job is to save and lend, hoping for a speedier return to normal conditions. What industry or business expands, and why, does not concern the average saver who has now only to create confidence in his own future by saving as much as regularly as possible.

The decision of Sweden to spend £180 million on a new five-year plan for her own defence may seem unconcerned with current developments but it has to be studied in relation to the policy of other neutrals like Switzerland and Turkey. Sweden has to safeguard her neutrality. She has to borrow even if trade is bad and taxation is already high. Heavy industries there, may benefit, but the social services are sure to suffer. The additional expenditure falls after two years of unusual strain. The position is not relieved by the growth of trade with Germany on whom Swedish industry has to depend for fuel. That is why the recent Anglo-Russian pact excites no critical comment in Sweden. The rise in Sweden's defence outlay may entail even the repatriation of capital invested abroad; to that extent Sweden may stand to lose, but her general position may not change greatly since the Swedish Government pursues a careful policy at all times.

The important measures taken to revive banking business in India by offices which have been transferred from Burma must have been referred to rather casually. Mention was made of notices inserted by the Exchange Banks to constituents in the press and the somewhat curt answer given to published grievances. It was not at all suggested that Indian banks had failed to give the same assistance to their own depositors who were offered, even before evacuation began, the option to transfer accounts to India and keep alive the familiar relations between banker and customer. It is now definitely known that Indian jointstock banks adopted the same measures as exchange banks without experiencing the difficulties, and their clients have been as well served, or even better, by an early assurance that the deposits made in Burma are drawable in India. The transfer of books was quick and subsequent facilities were made available much earlier. It was not implied by anyone at any time that they did not indicate to clients that accounts taken over to India from Burma would be safe and workable as before. There is clearly no uniqueness about the procedure adopted by the British exchange banks in regard to the re-establishment on Indian soil of Burma branches.

The offensive in Chekiang and Kiangwi has not been followed by any special measures to suppress China's trade and industry. The general position is unaltered by Japan's new offensive as Sir Mohamed Zafrulla Khan has reminded India. The United Nations Flag Day sufficed to convince that money or its lack is not behind the troubles of China. Her allies are ready to do their utmost. In the report of the U.S. President to Congress mention is made of the possibility that lease-lend aid may cost eight billions in a full year and may cost even more than in 1942 mainly because munitions of war did not loom large in U.S. shipments for many months. The problem, according to Mr. Roosevelt, is not financial but one of quick transport and prompt distribution. It is a critical phase, according to the President himself. In the three months ended May 1942, said the President, the Government of the U.S.A. extended aid which cost her $1,900 millions. In the fifteen months March 1941 to May 1942 the U.S.A. had provided goods and services worth $4,497 million. The total suggests that the first two appropriations are not exhausted. To date lease-lend aid has taken only 12 per cent of the outlay on the war programme. From October last Russia has been a beneficiary and thirty-five nations have so far got $2,138 millions worth of goods and services. The total immediately suggests that more than half the supplies have gone to Britain direct. Five thousand million pounds of food and medicines have been mentioned in the President's last report, and only in the recent months have military items constituted half the supplies made available by the U.S.A. The main point in the production news lies in the determination of U.S. labour to support the war programme. Mr. William Green and Mr. Philip Murray have declared that this is a workers' war; five million members of the Congress of Industrial Organisations want to win the war this year. When each American spends a dollar a day on the war it should not be hard. All-out war effort means an outlay of $130 million a day equal to a dollar a day for each inhabitant of the U.S.A. One thing is quite satisfactory. The sales of war bonds and stamps during the month of May passed the national quota and reached a total of $634 million. The target for June is $800 million, and for July and the subsequent months it will be $1,000 millions. Bigger savings began last May when the baby bonds appeared but it is only since January that things have moved in a big way. The U.S.A. does not worry about the return for lease-lend. It wants quick victory through a second front. The lease-lend agreement of February 23 signed by Lord Halifax in Washington is currently described as an Anglo-American trade pact. The principles are different and wider too and only give precision and force to the economic clauses of the Atlantic Charter. This is the *Times* gloss on the promises of reciprocity and joint planning. China has evidently made a like pact which means that the U.S.A. will recover its Far Eastern trade quicker than Britain because the U.S.A. will have a lien on China's post-war exports. Further, she will have much of Japan's share in China's trade and the net result of the war and the victory to come will be that Japan and Germany will be out and the U.S.A. will hold the top place in China's oversea trade.

## Employing War Resources

It is not difficult to see why comment so far has been hesitant in connection with the Government of India's action on the report of the Grady Mission. In the absence of much material needed for correct judgment, it is realised that criticism on the usual lines may miss the mark. The creation of a special committee within a Council (and presumably responsible to the latter) is perhaps meant to magnify the position of the Supply Member who was anxious to convince the country that reorganisation leading to the creation of a high-powered national executive was ruled out by circumstances. The announcement made last week has excited singularly little enthusiasm, though it is widely realised that the Grady Mission suggested measures incompatible with the political muddle. The muddle is none of the Executive Council's making, and the committee, it may be surmised, is but one, and hardly the most important aspect of the measures designed to implement the Grady Mission's views.

The preliminary report, a summary of which appeared two weeks ago, suggested that the assistance in regard to tools and personnel was to be made available without conditions. If the conclusion is correct, the reorganisation attempted to promote a more vigorous war effort will, to most of us, appear sufficient. The line between supply and production can never be drawn clearly and if the new committee gets the advantage of General Hutton's experience and ability at the outset, it can grapple with the problem of faster and, at the same time, larger production. The Grady Mission only indicated the direction of general advance. Its rapid survey was meant to judge the progress made so far, not at all to evaluate further possibilities. If it deemed progress limited it did not consider the motive springs of the war effort. Only last week was it indicated that the war effort is not national, in the sense, that this country is not feeling the same way about this war as China does. Why it is relatively indifferent to the peril without is not a point to be considered here, though it had to be treated as a serious factor in adjudging the suitability and practicability of the Grady Mission's recommendations. Mass production, rationalisation and a peremptory speed-up looks good to the technical experts, but the problems of administration have to be considered. Even in the U.S.A. they dare not think of a working week with more than 48 hours in wartime and the climatic, temperamental and other differences in India must be given at all times due weight.

The Grady Mission might have felt sore about the slowness and formality seen here, but it cannot fetter the freedom of India to adjust the effort to available resources. The Grady Mission might feel as enthusiastic as our own planners, but the Government, which has seen and measured the pace of development, may well believe that premature or excessive fatigue should not overtake the industrial organism. No control by extra-Governmental agencies can be acceptable to this country when irresponsibility is solidly entrenched though the reorganisation of the Communications Department under an imported chief might pass muster. The recommendation in regard to ship repairs has been carried out and a new branch has been set up at Bombay. In regard to industrial labour and training alike, measures have been adopted through the new Adviser on Labour Welfare to indicate that the war effort concerns Labour. The reluctance to adopt methods appropriate to Britain or America is not necessarily a sign of defeatism as many are prone to complain. That the means of reorganising and stimulating the war effort are appreciated by the Government will be inferred from its anxiety to develop local production of high-speed tool steel, its efforts to curtail non-essential consumption of power and its anxiety to utilise more fully available mineral resources. An old lead mine has been entrusted to the former manager of the famous Mawchi mines. According to reports efforts are made to develop tungsten from deposits in Rajputana, and it is merely a difference in the way of thinking that makes many feel that the Supply Member did not show himself quite responsive to the Grady Mission's report. Yet a consciousness of limitations might have impelled him to express dissent, modified subsequently by the creation of a Cabinet committee of the approved pattern. The problem of war production in India cannot be dissociated from other problems at once. That is, in the main, the objection to immediate and complete implementation of the first report prepared by Dr. Grady.

Few will be prepared to reject the Government of India's view that enough progress has been made to justify optimism and that ordinary measures might lead to considerable expansion. Aluminium and sulphur, power alcohol and steel—these have not been and are not overlooked. Conservation of rubber is the prime object of recent control orders. The essential difference between the U.S. industrial system and that of India was assigned as the reason for recording the view that wholesale rationalisation was ruled out at present. Factory labour is not attuned to U.S. pressure, and munitions output might actually suffer. It is clear that Dr. Grady and his colleagues were not experts in industrial psychology or acquainted with the real stimuli available in India at present. They might not know there is no philosophy of high wages and the migratory instinct has survived even among dock workers in Bombay. There has been criticism on the usual, flimsy plea that non-officials are not being consulted. We must remember that the National Defence Council alone contains enough industrialists at present to provide all the facilities for consultation. There are plenty of Advisers linked to war production and panels for every industry. What is important to grasp here is that there are independent local governments and the war effort calls for joint guidance. It is enough to know that war problems are to be separately examined in the immediate future; and nothing but a consciousness of total failure would have induced the Government of India to accept every suggestion of Dr. Grady's as wholly warranted. If India is conservative, her government is more so. High-powered control implies power, and that power has to be generated without any fuel. The analogy of bricks without straw might well be cited to indicate where the Grady point of view is at variance with known and accepted facts. Of the Government, it might well be said that it is like the pianist in the old Wild West saloon. There can be no justification for shooting. Consideration has been promised by the Governor-general and the new committee, which has yet to get its new Member for Defence, has held its first session. The crux is not supply but sympathy. It is pleasing to record that no limit for co-operation has been indicated by either side so far, and future proposals are in no wise compromised by the reluctance to stand by everything said in the Grady report. Lease-lend is far wider than anything said in any report and the appeal to Caesar might be made in Washington.

## INSTRUCTIVE COMPARISONS

In a world at war, or preoccupied with problems of bare survival, the need for statistics or knowledge may not be great. Nevertheless, many things in a puzzling world can only be understood in the light of data, compiled carefully and disinterestedly. The Economic Intelligence Service of the League has kept faith with the public and the latest edition of the Statistical Year Book, in spite of the delay in its appearance, is a sure reminder of past successes. Production, population and public finance are all embraced in a volume that is prepared to a high standard. Resources and revenue alike count for much in this war.

How many of us know that Germany's synthetic oil output is authoritatively estimated at 2¼ million tons per annum. Synthetic oil is not so scarce as believed. As the largest producer of meat, grain and potatoes in Europe, Germany's food problem in this war is inconsiderable. The maize of Roumania, the pigmeat of Yugoslavia and the butter of Denmark are alike under German control. German rations have not been so scanty as imagined.

The true antidote to propaganda is always factual knowledge. In spite of the many gaps in the tables and the singular scarcity of figures relating to Russia and Germany on most points the Year Book issued recently makes clear certain settled trends and indicates possibilities. The census figures of several countries are examined to disclose age-distribution and the disparity of sexes. The U.S. negro's lower standard of living explains the higher mortality though the negress is apparently more long-lived. The whites in America and South Africa have a longer expectation of life than the coloured population. Enough reasons can be supplied at will by anybody for such difference. To discover that the average expectation of life in India is improving steadily is to get hold of a hopeful feature.

The statistics of 1940 and 1941 do not always come into the picture but the available statistics certainly provide ample support for the conclusions reached in the World Economic Survey covering about two years of war. It is not without interest to learn the Free French govern three and a half million people in Equatorial Africa alone while there were 3.9 millions under Vichy's rule according to an estimate of December 31, 1939, in Madagascar. The information is needed to connect and correct the facts and figures presented day to day in the press. That is where the annual publication demonstrates its permanent value. To learn that the population of Guadeloupe and Martinique is only 570,000 according to the last estimate is as important as to know that the U.S. census of April 1940 showed a non-white population of over 13.45 millions. The population statistics contain estimates for Bhutan and Bahrein. The estimated population of Arabia, namely seven millions is the same as that of Afghanistan. That for China, with its varying area is given as 450 millions (a familiar, round figure) while that of Iraq is put at 8.7 millions. It is now possible to know that the Channel Islands with a population of 93,000 as shown in the 1931 census are the least important part of the territory occupied by the Nazis in Europe That the Jewish birth rate in Palestine is higher than that of Muslims is proved again by available statistics, and many a student who had discussed special statistical notes will find that the volume confirms anticipations. The territorial changes of the past two years are indicated in the footnotes. It is necessary to indicate that in 1941 Hongkong housed about 750,000 Chinese refugees and the estimate made in connection with air raid defence revealed a total population of 1,640,000 as against the estimate of 1,060,000 made in December 1939. All this would perhaps be called curious and unimportant information but statistics of petrol and rubber output are of definite topical interest. The striking rise in Egypt's oil production is, in the Allied view, as important as the advance in Iran's output in 1940. Burma produced only an eighth of the N. E. I. output; yet her supplies were more important for India. From 1935 nothing is known about Japan though the crude petroleum output of Japan and Formosa in 1940 is placed at 377,000 metric tons.

The coal production figures demonstrate the absolute supremacy of the U.S.A. at all times. Over 456 million metric tons were produced in 1940 when the output was naturally rising in response to the defence programme. Germany's innate ability to develop chemical industries has never been questioned, yet the biggest source of pyrites required for sulphur and sulphuric acid production is Spain though Yugoslavia's output is not inconsiderable. The U.S.A. is again the leader in production of pyrites and Portugal is an important producer. More important is Japan which up to 1936 enlarged successfully the quantity of sulphur (on an average 45 percent in her case) through the quantity of pyrites handled. As the head note reminds us; pyrites are mainly used in the manufacture of sulphuric acid also to a small extent for the production of pure sulphur. Further, roasted pyrites from sulphuric acid plants are employed as an iron ore. According to available statistics, Cyprus is the chief source in the British Empire and Greece had, like Italy, developed the mining of pyrites to a great extent.

Now that Yugoslav and Greek sources are in German hands, the Axis is well off but in regard to steel, Germany is a long way behind America. Japan's output in 1937 was returned as 5,811,000 metric tons. The Soviet Union's output in 1940 is put at 19.1 million tons while her pig iron output was estimated as being over 14.9 million tons. The best guide to U.S. industrial strength is the note on the production of metals like copper. In many a field the U.S. output is reinforced by the very large output of South America. The U.S.A. for instance, produced in recent years, about three times as much copper as Northern Rhodesia, and the only source apparently available to Germany at present is Yugoslavia. South Africa's copper output is rising but she is a long way behind Canada which produces more copper than either North or South Rhodesia. It is indicated clearly that Brazil is a convenient source of manganese required by U. S. steelmasters.

India is, after the Soviet Union, the largest producer of manganese in the world. Chile's importance as a supplier of iron ore besides copper ore is seldom realised, and it is only now that the importance of West Australia's iron ore is grasped.

The Year Book indicates that in regard to zinc and lead the U.S.A. is utterly independent, being the world's largest producer. The bases of enduring industrial superiority are to be discovered in the enormous resources developed in less than a century in the U.S.A. Far and away the most important metal today is aluminium. Germany is said to be the leading producer (at any rate up to 1940) but the production of North America topped hers even in 1939. It is almost astonishing to find that the price of the metal in New York went down in 1940 mainly because of larger supplies. Japan's aluminium production is inferior to that of Russia but apparently equal to that of Britain. Of chromite the U. S. A. has very little, but can count on supplies from Cuba and Guatemala. In the past the Philippines were the obvious source. Britain can count on South Africa and India. Japan's home production may not be inconsiderable, but it can hardly equal that of New Caledonia which colony has joined the Free French. The N. E. I. produced more nickel than Burma, but it was only about 1 per cent of Canada's huge production. China's tungsten supplies are not so important to-day as Portugal's exports. Among the minor producers are Nigeria and South-west Africa. The Argentine output is by no means small, and the U.S.A. has further adequate supplies in Idaho and Nevada. New Zealand like Peru must be reckoned among the sources available to the Allies but Thailand and Indo-China give Japan access to tungsten for her steel plants. Evidence of U. S. supremacy in iron and steel is found again in the large share held by the Republic in the vanadium and molybdenum production of the world. The former comes also from South-west Africa and Peru, while Korea and Turkey must be included among the minor producers. In the past Norway was a very important producer of the rarer metals and alloys.

The financial statistics are largely those provided in the other League publications. Three familiar facts come out from an analysis of the figures. Commercial Bank deposits have risen in the war period in all countries. The cheap money era has passed into the war period. Investment in new loans is the rule. The only sign of inflation in Germany was the rise in industrial shares since 1940 though the rise in the Reich's note circulation after 1939 was a sinister feature. The presentation of budget details enhances the volume of a work that seeks to bring in all data. It is only now that we can remark on Egypt's balanced budget for 1941-42 or on the South African Government's surplus. Canada's deficit like that of the United States is commonplace, but the second surplus in succession reported by Newfoundland last year is of special interest. Mexico's budget of 429.9 million pesos, fully balanced in January 1941, represented an end to the deficits. It is noteworthy that no figures after 1939 are available in respect of China. In January 1939 an attempt was made there to balance the budget at 2,850 million dollars. By then the dollar had depreciated rapidly, and it was only in the last normal year 1936-37 that the deficit was manageable. The Iranian budget of March 1941 showed a big deficit. Japan's budget of 1941-42 with its division of expenditure of ordinary and extraordinary plus special expenses provided for borrowing of 3,003.9 million yen in addition to a special issue of bonds of 3,911.1 million yen. Of higher interest is it to find that Thailand's budget prepared in January 1942 envisaged a deficit of 49 million baht. In the

previous year the Thai budget balanced; since then Japanese influence has grown though the direct cause in this case may be the rise in capital expenditure last year. She was not as well off as Finland which announced a surplus in January though capital expenditure had grown and the heavy borrowing reported in 1941 had produced difficulties. Vichy's deficit in 1942 is not well-advertised, but it is certainly large, though the present budget excludes occupation costs for which the Bank of France has been lending money regularly. The deficit for the current year is over 58.000 million francs. Receipts of 80,016 millions, together with expenses of over 138,000 millions give Vichy its second big deficit. France is apparently paying still for the war. Switzerland, too, has a deficit this year for public expenditure has risen further and war precautions in 1942 will claim 150 million francs. Neutrals are not immune from deficits or debt but war-makers evidently are not more happy. Germany's debt as on September 30, 1941, had risen in six months by 25,000 million reichsmarks nearly. The floating debt was bigger than ever and it was only the external debt which was lower.

Denmark can show a fall in debt but Belgium cannot, while the difficulties of Franco are clearly reflected in the rise of over 4,750 million pesetas in Spain's public debt in 1941. The national debt in Britain was higher again and stood at £13,314 million at the end of November 1941 In eight months alone the floating debt had risen by £1,700 millions nearly. War and debt have so often been combined that it might be said that India must be reckoned fortunate in reporting a reduction in both debt and debt service in 1941 largely because of her payments to British creditors. That is indicated clearly enough in a volume that proves how well the job has been done once again.

# HOUSE PROTECTION FIRE PARTIES

IT is the duty of all Householders to take mutual protection against FIRE from Air Raids. The newly formed organisation of HOUSE PROTECTION FIRE PARTIES is organized towards this end; the organization is not regarded as a Regular A.R.P. Service and all householders forming the organization need not enrol under the A.R.P. Services Ordinance. HOUSE-HOLDERS should group themselves into Parties of 125—to each of these Groups will be issued on loan ONE STIRRUP PUMP with equipment, subject only to the following conditions:

1. From among the Group of 125 persons not less than three and not more than six persons form a HOUSE PROTECTION FIRE PARTY; one of the members will be the LEADER.
2. The LEADER must register his name and the names of his party at the office of the local Staff Officer, Fire Parties. He will then be issued with the STIRRUP PUMP and Equipment.
3. The Pump and Equipment will be returnable by the Leader on demand.
4. The Pump and Equipment must be kept in an accessible place and be opened to inspection by an A.R.P. Officer.
5. All members of the Party must take training in the use of the Pump, and in elementary Fire-Fighting. This will be arranged by the local Staff Officer, Fire Parties, on application by the Leader, and will be held at or near the place where the Pump is kept.

SHOPS and SCHOOLS, BUSINESS HOUSES and HOSPITALS, etc., may take PUMPS and Equipment on loan under these same conditions.

WARDENS are instructed to give assistance in the formation of HOUSE PROTECTION FIRE PARTIES.

Existing Street Fire Parties will automatically become HOUSE PROTECTION FIRE PARTIES, and are then exempt from the obligations already undertaken when enrolled in the Street Fire Party Service.

The ADDRESSES OF THE OFFICES of the Local STAFF OFFICERS, FIRE PARTIES, to whom application should be made, are given below, and fuller details may be obtained from them direct, from Wardens Posts and all A.R.P. Information Bureaux. THESE OFFICERS WILL BE AT THEIR OFFICES DAILY BETWEEN 7-0 A.M. and 10-30 A.M. to register the Names of Parties and to issue STIRRUP PUMPS and EQUIPMENT.

### Progress of Eastern Federal Union

Barely three weeks ago the report and accounts of the Eastern Federal Union Insurance Company, Limited were considered and approved at the annual meeting. The company's 1941 results were discussed in an admirable manner by Mr. A. R. Siddiqui whose observations on the growth of income and funds deserve to be carefully considered in the light of new risks and new responsibilities for one and all to-day. All departments of the Company worked well in 1941 said the Chairman. Total net premium income rose to Rs. 13,70,836 while expenses were only 21 per cent of the year's revenue. The loss ratio for 1941 was distinctly lower at 37.47 per cent as against 40.1 per cent in the previous year. The underwriting surplus for 1941 is also substantially larger at 23.32 per cent. An addition to capital may be reckoned as another mark of progress in the case of a company which promises to take its place with the leading offices having already made its statutory deposit for its life branch. Total investments in the life branch at the end of 1941 amounted to Rs. 131,556-4-8 showing a rise of Rs. 50,000 on the previous year.

The report makes plain how business has developed despite difficulties. The fire department with a premium income of Rs. 6,63,262 against Rs. 4,46,201 in 1940 showed vigorous growth. Claims in the year took Rs. 2,16,484. After meeting expenses and all commissions totalling Rs. 2,72,289 nearly there is a transfer of Rs. 10,000 to additional reserve while the Fire Fund is higher at Rs. 2,65,305 at the end of 1941. Premiums in the Accident Department provided Rs. 1,45,221 and Claims took only Rs. 47,953-0-8. After transfer of Rs. 18,330-7-0 to Profit and Loss Account, the account shows the Accident Fund as equal to 40 per cent of the year's premiums. Marine premiums came to Rs. 3,48,112-2-11 and claims took Rs. 2,50,238-12. The loss ratio is up by 4 per cent as compared with the previous year but the Fund is considerably higher at Rs. 1,89,132-10-1 at the end of 1941.

The new life department made unostentatious progress. New business provided 275 policies for Rs. 5,09,250. Total premium income came to Rs. 85,440-1 and claims took Rs. 7,000 only. The Revenue Account shows that surrenders took Rs. 103-3 only while investments gave Rs. 5,815-0-3 crores. After expenses, taxes and depreciation for the year were met the Life Fund is very much higher at Rs. 131,556-4-8. In commenting on the results Mr. Siddiqui spoke of the reduced cost of procuration and also of investments with a face value of Rs. 2,10,500 in this branch. The first valuation is over and there is a small surplus to go on with. After the transfer of Rs. 67,006-4-8 from the Fire Branch revenue alone the Profit and Loss balance is substantially higher this time. Transfer to Taxation Reserve of Rs. 50,000, to Investment Reserve of Rs. 30,000 and to Bad Debt Reserve of Rs. 10,000 leaves at credit a balance of Rs. 20,693-5-4. The funds and reserves are higher so that the investments of the company are higher by Rs. 2.17 lakhs nearly. In the balance sheet the outstanding feature is the increase in paid-up capital. The chief assets are Government securities (in addition to statutory deposits) Municipal and Port Trust debentures. Policy loans are negligible but debentures and preference shares are at any time a useful stiffening from the income aspect. Cash balances are as large as Rs. 5,81,570-14-10 and revenue items more than cover all outstanding liabilities at the end of the year. The classified summary shows no mortgages, and agents' balances etc. totalling Rs. 3,68,153-15-5 seem large in relation to outstanding claims.

---

### Canadian Giant

More than a year ago reference was made to the important developments in the South promised by the plan to produce aluminium for India. It was indicated at that time that hydro-electric power was not the least of the advantages for a company that had come into being, mainly through the co-operation of Indian and Canadian interests. There was also an assurance that further Indian participation in the new enterprise would be welcomed, and the most striking feature of the past year has been the translation of objects into achievements. How much of the success is due to the association with Canadian interests will be indicated by reference to the magnitude of the operations and interests of Aluminium Ltd. The Indian company is in the nature of a subsidiary of the Canadian parent whose resources must be taken to include those of fully-owned subsidiaries. In the balance-sheet of Aluminium Ltd. appears a significant entry indicative of the Company's help to the British Government which has advanced 55 million dollars at 3 per cent repayable in 1961 under an arrangement that principal and interest will be reduced in certain circumstances. The Aluminium Co. of Canada is clearly marked out as ally of the British Government in its Empire air training and production schemes. The balance-sheet total for 1941 is 272,571,728 dollars equal to Rs. 88 crores or more. There are few corporate enterprises in the world that can show such a total and the cost of plants, less depreciation alone, is shown at 126,332,098 dollars. The value of liquid assets of Aluminium, Ltd. is as great as 116,522,966 dollars, and of this large total, as much as 48,107,141 dollars is earmarked for construction. It is clear from the latest balance-sheet that the common stock (of no par value at all) of Aluminium, Ltd., corresponds to International Nickel stock in many respects. The earning power can be gauged from the consolidated profit and loss account. For the year ended 31st December 1941 the profit was over 53.84 million dollars exclusive of investment income. Taxation alone took over 31.4 million dollars and the common stock qualified for dividends which required only 7,444,100 dollars in 1941. A dividend of over 20 per cent on the ordinary capital (which has clearly been created out of past profits) will certainly indicate the investment status of Aluminium stock. The very high gearing in this case is a definite gain to the stockholders. The six per cent redeemable preferred naturally falls into the giltedged category. Though the consolidated statement can be no guide to the final or full earning power of Aluminium, Ltd., attention must be directed to the progressive improvement in profits despite the larger provision for taxation and depreciation. Within a year the block has risen by over 41 million dollars and the current assets by about 53 millions. The balance-sheet indeed suggests that the Indian production company will have the advantage of extremely competent direction associated with almost unlimited resources. The financial record of Aluminium, Ltd. is altogether impressive. Its Indian subsidiary's future should be evaluated in the light of the standing and progress achieved by the Canadian company which controls the Aluminium Co. of Canada; also Aluminium Power. With a balance of over 39 million dollars at credit of the profit and loss account, the average stockholder may well feel that a part of current assets is almost equal to the paid-up ordinary capital while the net profit covers the preferred and common dividends two times over. That in a way is a guide to the exceptional standing of the company which is fast developing the aluminium industry in India.

### Trade Marks Law

The coming into effect of the new trade marks law for which India is obliged to the present Commerce Member is certainly an event of some importance. The appointment of Mr. Shavaksha as Registrar of Trade Marks at Bombay was also announced towards the end of the last month to indicate that the office was ready for the usual registration. Both Calcutta and Bombay are entitled to register textile trade marks, but the majority, even those from Madras, are likely to be lodged

in Bombay. The former procedure of seeking help from Chambers of Commerce is now wholly unnecessary since the rules made under the Act have been published and the advisory committees have been empanelled. Mills and merchants in Bengal have been allowed to choose Bombay, if they will. Exporters would naturally prefer Bombay at present and cotton trade marks are meant to confer protection on the exporters as well as importers. There has been some doubt as to the real purport of Section 63 of the new Act, but the prevailing view is that Bengal and the U. P. mills can choose the registry at Bombay because there are many manifest advantages. Uniformity and efficiency of administration will be incidental gains, and the concentration of textile trade marks at one place will help applicants and attorneys alike. The registration fee for each textile trade number or mark is Rs. 5 only and handloom factories using power will doubtless seek the protection of the new law. Mills have again been encouraged to hope that the law will promote fair practice and prove a sure shield against Japanese competition after the war. Even unregistered marks may be submitted for purposes of record at the new registry. The owners of trade marks should not hesitate to endorse their claims when label, number and words or device can be put in for record. Registration will be proof positive of rights vested in the proprietor. The Act gives India a modern statute meant to help industry and trade. For years, India has been rubbing along with rule of thumb practice, and legal doubts often gave advantages to the dishonest. The law has been settled by special legislation over a year ago, and the country has reason to feel that it is now equipped with an up-to-date and adequate enactment. The more expeditious and satisfactory procedure under the new law is only one of several advantages. The great advantage lies essentially in suppression of infringements, and reciprocity too can be obtained abroad for marks of Indian origin only on the strength of the new legislation.

---

**New Triple Entente**

Until last week the Anglo-Russian treaty was a well-kept secret. The treaty, signed on May 26, by M. Molotov for his country represents an attempt to create a full alliance for twenty years instead of the temporary arrangement entered into on July 12, 1941. The eight articles bring Russia within the Anglo-American group against Germany, furnish a guarantee against defection and must encourage Russia to resist successfully. The timing is as important as the terms in this case. It coincides with the Nazi offensive, and the treaty further makes open mention of the Allies' plan to open up a second front. The Swedish press recognises that Anglo-American isolation from Europe is at an end. It is recognised that the affairs of Europe are the concern of the three major powers fighting Freedom's battle. The framework of collective security is to be created afresh through the suppression of Germany. Hitler and his nation alike stand condemned in the treaty which marks a departure from the agreements executed with other governments, particularly in its being a joint agreement with the U.S.A., the terms being identical. While points as to the Baltic States must necessarily remain obscure, the treaty ensures the re-entry of Russia into the group of nations. She left the League voluntarily, and it is the Finns who at present stand out as the sharpest critics of the new treaty which says nothing about the consequences of Russian aggression. The sovietisation of the three republics had proceeded long before the Germans moved in, and the chief defect of the treaty promoted by Mr. Eden lies in its inability to bring back the status quo ante in Northern Europe. It may, however, be asked if the status quo had any virtues. It may also be asked if giving Russia a free hand in the east of Europe is not the best way of meeting the German threat to the Balkans.

The assurance of adequate help to Russia is of greater interest. Russia is entitled to lease-lend supplies ever since Mr. Harriman visited Moscow in September last, but the treaty carries the promise further. During and after the war, Russia is declared eligible for help from America and Britain. Economic ties are likely to be stronger with the U. S. A. than with Germany and in this respect the set-up will be different when Germany has been dealt with.

It is not enough to say that the war of revenge is complete with the treaty. It is absurd to talk of encirclement just because Russia is now within the alliance. The treaty is an answer and more to that made in Berlin in November last. The new treaty cannot begin or push the encirclement which can come only when a European offensive starts. The exuberance of enthusiasm should not make one miss the fact that Russia goes back on the pact of Rapallo—now twenty years old—and becomes a good European, but for a consideration. The treaty is definitely a business arrangement. Russia says nothing about communism and reserves all its hate for Germany. In return Russia is promised help for and after the war. A new scheme of inter-allied obligations is envisaged because Stalin is at last convinced that the democracies can give real, immediate help. The absence of any reference to the Far East seems amazing. The pact of April, 1941 with Japan stands though it has been said over again that relations on the Siberian border are strained and the Japanese attempts on the Aleutians are purely meant to compromise the effectiveness of U. S. help to Russia later on.

---

**Imports Into Colonies**

Import trade control in India is apparently changing alongside of new additions to the schedule and alterations to the open general licenses. The open general license is, however, retained, and only specified commodities are excluded as also imports from Canada, Newfoundland Australia and the U.K. as well. The import trade control is adjusted to the requirements of the export regulations in the U.K. and the open license does not apply to non-Empire made films as indicated recently. The more important question at present certainly relates to the general adherence of the Colonial Empire to import control. In spite of the general belief that inter-Empire trade is fostered in war time the Colonies are clearly following the direction issued last year to limit imports and save shipping space. The continuance of the rebate for another year on soda ash imported from Kenya for glass making does not imply that Kenya will allow Indian goods unrestricted entry.

The practice of discrimination between essential and non-essential imports is well established, and the Board of Trade Journal in recent months has frequently reproduced new rules concerning imports from sterling areas. In Australia the prohibition of certain imports or the adoption of quotas does not apply to goods received with reference to orders accepted before December 6 or to goods shipped prior to February 15. The regulations do not also apply to goods imported by June 30 or July 31 in the case of goods governed by quota. The licensing authority has been given discretion to show concessions such as those mentioned.

Import restrictions in force in Ceylon have been referred to in order to show that the colony is cutting out rayon and mixture scarves and applying the license procedure strictly to imports from Canada and Newfoundland as also to re-exports of such goods from other British territories. The prohibition of imports except under license applies to silk and satin manufactures other than apparel, handkerchiefs and scarves, artificial silk manufactures and all apparel of rayon, silk, wool, cotton, leather or any material other than silk or satin including hosiery, haberdashery and millinery. Import control is practised in the African colonies. Mining companies can get their equipment without trouble but on the Gold Coast all other essential imports can only be got under license. Imports of steel etc., from sterling areas like India, imports will be obtainable under license. Grenada has raised the import duty on tobacco. In Nigeria the general license issued under the Defence Regulations must help textile manufacturers in the sterling area. Under the Tariff Ordinance of 1941 the main change was the levy of a duty on knitted goods. The duties on grey goods was unchanged and the duty on Madras handkerchiefs was increased slightly. The duty on tea was left at 8d per lb. Customs duties in Nyasaland were also raised and the duty on tobacco manufactured, cigars etc. was increased. A temporary additional duty of 13⅓ percent ad valorem was imposed on piecegoods. The Southern Rhodesia Government apply licensing of imports from all parts except South Africa and adjacent territories. The regulations of December 1941 exempt only goods ordered before December 24. In the British West Indies the aim is the reduction in consumption of imported goods and the open general license is issued only for imports from the adjoining territories like British Guiana and British Honduras. Similar preference is shown by Zanibar to imports from Kenya, Uganda etc.

---

**Foreign Trade In April**

The April trade returns are immediately interesting from the point of view of those who ask that imports should be done away with. There is a steep fall in imports, though the customs revenue figures for April may not suggest it. The total value of imports in April was as low as Rs. 8.79 crores as against Rs. 16.96 crores in April last. In the three months ended April 1942 there has been a steady fall in imports. The growth of re-exports at this time reduces the volume of imports further. In the three months ended April Indian exports have also fallen, though not to the same extent. The total value of merchandise exports in April is shown as Rs. 17.62 crores. The figures show a marked improvement on the previous year, but are not likely to foster the hope that trade will grow when the freight situation is easier. The loss of many markets must be considered and due note must also be taken of the restriction of commercial crops. The April returns should only be taken as symptomatic of more rigorous import control at work though the fall under grain, sugar and spices is directly responsible for the rise in prices that still provokes anxiety.

The chief feature of the import table is a fall under grain etc to a negligible figure of Rs. 5.22 lakhs. Burma's rice and Australia's wheat are cut off, while short supplies have propelled a decline in India's own exports of foodstuffs. Sugar exports valued Rs. 10.32 lakhs constitute a noteworthy item. It conveys an idea of the new forces at work. Exports of tobacco have fallen but imports have been almost maintained as compared with April 1941. Exports of tea show a notable increase in value suggesting once again that the higher quota and higher prices alike will guarantee prosperity. The fall in coal exports is only an indication of the difficulties experienced by the coal industry. The most arresting feature is the decline in takings of cotton and all textile goods. Imports of cotton goods in April were inconsiderable and the fall in imports of machinery, metals etc. conveys an idea of the difficulties created by the war for importer and customer as well. Raw cotton imports show a big fall and the increase under oils seems almost strange, if it is not related immediately to the outstanding increase in imports from Iran.

The decline in manufactured imports may contribute to increased production at home of textile and other manufactures in India but will inevitably react on prices. The normal relation between the values of imports and exports has been disturbed again and the shrinkage in foreign trade is forcing up prices. The pressure of keener foreign demand explains the remarkable increase in exports of cotton goods. Cotton and jute manufactures together accounted for exports valued Rs. 8.71 crores in April. There are significant decreases under leather, metals and paper, pointing to the pressure of home demand. Exports of all other manufactures show a fall and imports of foreign manufactures are correspondingly lower. The war is the greatest benefactor of most Swadeshi producers. The fall under woollen goods, rubber, glass etc, is of material benefit to minor, unprotected industries.

As regards direction of trade the chief features are an increase in exports to Brittain and South Africa. Despite the war India's export trade with Austrialia appears to increase Trade with Burma, Malaya and Hongkong is clearly at an end. A new entry appears under Nigeria. Few in India may know that the colony is about half the size of India and can provide things like rubber and tin gold and cocoa which are hard to get. Trade with the Sudan appears to grow while the setback noticed under exports to the U.S.A. will be doubtless temporary Iraq appears to be taking more and more, while trade with Turkey has definitely fallen. The expansion of trade with Arabia, Syria and Iran is clearly due to the work of the UKCC. The trade returns proclaim the value of essential new connections and prove the absurdity of arguments against a State aided agency. Trade with Europe is clearly at an end, and overland trade with China such as would have survived the debacle in Burma hardly appears of any consequence. The war has brought many changes including an increase in imports from Portugese East Africa which is probably due to growth of trade with British possessions in Africa Lourenco Marques and Beira serve large areas under the Union Jack.

### New Opportunities

According to a recent note in the Financial News, exchange banks have unusual opportunities in he Middle East. Though much of the business is handled by the UKCC the presence of large armies in the Middle East certainly makes for banking business. In the Middle and the Near East alike Britain has adefinite stake at least in countering Axis moves. And the problems of Palestine and Cyprus are now of as much urgency as those of Iraq. The supply needs are not less important for instance in Abyssinia where Britain is obliged to help the Negus re-establish his authority. The Financial News refers in this connexion to the growth of business in Egypt. Banks there participate in wartime prosperity. Turkish and Syrian banks also benefit by the efforts of Britain to maintain trading regulations. The Middle East is encouraged to live of itself or trade with countries nearer. The most unusual development of the war period is the emergence of a Free French bank of issue—the Caisse Central Pour La France Libre—which is associated with the Banque de Syrie. The East African pound and the Maria Theresa thaler are familiar to Syria like any part of the Middle East. Though much business is being diverted by the efforts of the Minister of State in Cairo to extra-commercial channels—the British banks particularly Barclays (D.C. & O.) have special opportunities. It is believed that the unsettlement of colmercial relations in the Middle East will not be long-lived, and the African Empire should develop closer ties with the countries of Asia. India's trade with the Middle East is growing and the time may come when Indian banks must think of Aden and the Hadhramaut as extensions. The pilgrim trade too is not to be ignored. The British banks may well think of cultivating Africa and the Middle East. And without any competition from French banks, as in the past, the Eastern exchange banks will find some compensation for the loss of business in the Far East. The Financial News thinks that with the British Government concentrating on the economic needs of the Middle East at present there are many opportunities for developing new connections. British banks were prominent in Turkey and Iran: in Malta too the oversea banks carry on; financing exports to the island and treating many things as being equal.

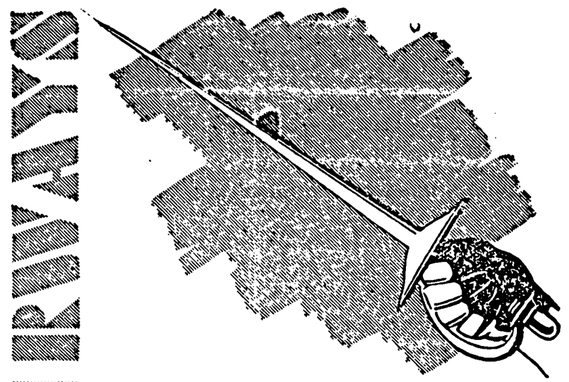
### Progress Of Life Insurance

The new business figures of most Indian life offices for 1941 are published. The totals for most companies shows no marked improvement on 1940 but in certain cases there has been admittedly recovery from the setback recorded in 1940. The lead is held by Oriental whose aggregate business for 1941 is over Rs. 8.16 crores. The second place is held by Hindusthan with Rs. 2.7 crores. The great difference is suggestive in many ways, but equally marked is the difference between the figures returned for New India which claims new business totalling Rs. 1.77 crores and has attained the third place. New India's progress has been more than commendable. Ten life offices alone report new business of over Rs. 1 crore for the year. Bombay Mutual has done very well to judge by the respectable total of Rs. 1.7 crores. Difficulties in regard to oversea business must have been experienced last year. That is why the 1941 reports of Indian life offices deserve to be examined carefully. The uncertainty concerning war risks has been disposed of so that it is possible to look for a direct increase in the volume of new business this year. National Insurance with Rs. 1.66 crores leads Empire of India with Rs. 1.34 crores only. The relative importance of insurance companies cannot be measured by comparing success in the acquisition of new business alone in a single year. The figures for Bombay Life are higher than those for Lakshmi, and United India appears to have made some recovery since the new business figures for 1941 have been reported as being over Rs. 1.17 crores.

The majority of smaller companies appear to have held their own, and Jupiter's continued recovery, leading to total life business for Rs. 44.5 lakhs, should be treated as noteworthy. One of the most arresting changes is the progress made by new companies like Metropolitan and Ruby General. These companies are clearly ahead of many older companies. The Oriental being first always naturally leads in respect of new business. Hindusthan's recent progress has been more than maintained in 1941 and Bombay Mutual's steady rise continues. In the case of the Industrial and Prudential the new business is as large as Rs. 90 lakhs. Most other companies do not seem to have made much headway. Progress or retrogression cannot be indicated in any tabular statement, but the general growth of life business can only be viewed as satisfactory, having regard to the difficulties of the year. Directors' reports in all cases continue to express satisfaction, and it is not only the Oriental's huge total that can be deemed large in relation to its standing. Since ten companies claim new business of over Rs. 1 crores in 1941 the general situation seems to have changed little. Policy, in a sense, determines the expansion in a difficult year, and cost of procuration and other relevant factors must be taken note of. What is now clear is that Indian insurance companies, still exposed to foreign competition and unsettling influences at home, made the most of their opportunities. To that extent, everybody must feel pleased, not only over the place held by individual companies in regard to assurances in force, the volume or distribution of life funds or the average rate of interest earned thereon.



### Prices Again

Prices and the cost of living staged a slow rise in April in Bombay. The result was a rise of one point in the local working class cost of living index and continued anxiety as to the efficiency of price control. Foodstuffs were dearer and kerosene oil was more expensive as also sugar. The main movement in the cost of living index is different from that recorded for Ahmedabad where the cost of living index is still below the 1926-27 base, but markedly higher than a year ago to judge by the March index of 96. The same holds good of Sholapur where food was dearer for the workers in March and soap and supari cheaper. Even the limited data available should not obscure the fact that prices have been rising and much hardship has followed. The problem of control is neither easy nor simple though criticism of traders has become general. Since the Bombay index has risen further there has been talk of improving transport and amplifying local supplies. New plans have been evolved in Calcutta for building up food reserves and the situation is clearly more amenable to treatment than in Bombay.

The most disturbing feelng engendered by the advance in the cost of living this year is its effect on industrial peace. Though only 32 disputes involving 21,545 work people were reported in March 1942 clearly some danger was foreshadowed by the big rise in prices as between March 1941 and 1942. Statistics relating o the cost of living for India's industrial workers make it plain that the jump in wholesale prices lies behind the advance in working class expenditure. In the year 1941 the general price index rose by 17 points, and has risen since. The rise is largely due to the rise in the prices of all foodstuffs and is directly due to the military reverses in the East. The pronouncement must be explained with reference to changes in supply. Additions to India's population, the pressure of demand from overseas and general uncertainty leading to hoarding must not be ignored. The situation persists over large parts of the country and questions are asked as to the effectiveness of the protection promised to the consumer.

### Holidays With Pay

The enactments of this year include one dealing with weekly holidays to be given to persons employed in shops, restaurants and theatres. It is now possible to say that benefits vouchsafed in the Bengal and Bombay acts are secured for all workers in British India. Act XVIII of 1942, is applicable only on notification by a Provincial Government and is not mandatory. Section 3 prescribes that a shop shall be closed on one day of the week and such day should be shown in a notice affixed by the shopkeeper. The weekly holiday in shops, restaurants, etc. is not available to those who work less than six days in a week or get a holiday in any other way under Section 3. The additional half-holiday is available only in case the provincial Government elects to give one to employees. Those in management or confidential positions are not eligible for such holidays. The most important clause is that which lays down that no deduction or abatement is to be made from wages. The holiday will be a real benefit to many, and relief arrangements which will have to be considered part of the business expenses will probaly increase employment. The provision for inspection under the Act recalls the usual provision. The Inspector can enter and remain in a shop or establishment, examine records which must be prduced on demand. The penalties under the Act for breach of Section 3 to Section 6 are prescribed. In the case of the first offence, the fine may go up to Rs. 25 and in the case of the second or subsequent offence, the fine may extend to Rs. 250. Rules are to be framed under Section 10 by the Provincial Government which adopts the new law. The power to exempt from, and suspend the operation of the Act, recalls the similar provision in the Bengal Shops Act introduced by Mr. Huq's first Ministry.

I have often pointed out that, great as is India's contribution to Britain's war effort in men and materials, and greater still as could have been this country's contribution if British officials in New Delhi and British non-officials could have realised in time India's strategic position in this war, as earnestly as did "Indian Finance" in the very early weeks of September 1939, the most outstanding service which this country has rendered to Britain's war front is in the financial sphere.

In the first place, India has played an important part in the maintenance of cheap money conditions in London.

When the war began, the Reserve Bank of India held sterling securities for Rs. 63.79 crores. The latest returns of the Bank show sterling securities at Rs. 320.64 crores. That is to say, sterling securities held by the Reserve Bank have increased by over Rs. 250 crores since September 1, 1939. The foreign securities of the Reserve Bank are mostly invested in British Treasury Bills. In simple terms, compared to three years ago, the Reserve Bank has increased its portfolio of British treasury bills by as much as Rs. 250 crores.

I do not think that I shall be far wrong if I suggest that India is by far the largest single subscriber for treasury bills in London. These heavy holdings of the Reserve Bank in British Treasury Bills have been of great help to the Chancellor of the Exchequer in keeping the treasury bill rate down.

Throughout this war, the British Government have been able to secure their three months' accommodation at roundabout twenty shillings. Never before in history did any government raise, during wartime, short-term accommodation at the low interest rate of one per cent.

The strict control over treasury bill discount is an important factor in the continued maintenance of cheap money in London. India may well claim her due share in the achievement, unprecedented in the annals of war, of a low treasury bill discount rate, of continued and continuing cheap money and the Bank of England rate at 2 per cent. These three developments have largely contributed to the remarkable success which has attended the subcriptions for the defence loans.

---

This brings me to the second point. In the smooth functioning of defence borrowings in Britain, India has played a notable part in a direct way too.

In the last thirty months, this country has been steadfastly continuing the policy of repatriation of sterling debt. India's sterling stocks paid off before maturity amount so far to nearly £200 million.

To the extent that investors who had holdings of these securities received cash before they were due for redemption, they must reinvest the funds in some one or other of the long-dated giltedged securities quoting in the London market. In other words, India is responsible for having released on the London market purchasing power to the extent of £200 million for trustee stocks.

These purchases account, in part, for the maintenance of giltedged prices at top levels. The persistent strength of giltedged is reflected in the low rate at which the British Government have been securing their requirements from defence loans. This has been a 2½ per cent. war for England. Which is another feature that makes this war unique. For the materialisation of a 2½ per cent. war, Britain owes not a little to India.

The full significance of this is easily understood. The progress in military strategy and technique is responsible for the Hitlerian war proving the costliest war in history. In addition, to heavy taxes which have been imposed, Britain has had to raise loans for something like £5,000 million for financing the war.

If the borrowing rate of the British Treasury in this war had been what it was in the last, the interest charges now incurred for defence loans aggregating £5,000 million would hardly have covered war loans for £5,000 million. Military technique has doubled the cost of war; and monetary technique has, so to say, halved the real cost.

---

My third point is that, in the realm of foreign exchange, India has rendered the most opportune and the most invaluable service. This question was examined in a recent issue of the "Financial News," which stresses that leaders in England must face the hard fact that her foreign exchange reserve is now negative.

Lease and lend facilities have gone a long way towards mitigating Britain's embarrassment with regard to the foreign exchange problem. But, despite lease-lend, her foreign exchange requirements, as the "Financial News" points out, are substantial and difficult to meet. The position is thus summed up by the "Financial News" (as quoted in "Capital"):

"Food and strategic materials must be imported from non-sterling countries other than the United States, and substantial cash payments are needed even in the United States, for example, for old contracts, American films, books and periodicals, and the expenses of the various British Missions in the United States.

The requirements of modest remittances to evacuated British women and children would normally be negligible; but, at present, are not negligible, and, sooner or later, Britain must consider finding much larger amounts of dollars for the full maintenance of these evacuees. It is hardly fair to expect their hosts to be burdened with heavy taxation and to continue to maintain their guests indefinitely. Yet, at present, it is difficult to see whence the necessary dollars are to be derived, as it is difficult to obtain dollars even for essential war requirements.

Admittedly, Britain can still import from sterling countries and from many non-sterling places against sterling payment, but the accumulation of foreign sterling balances might reach a point at which neutral countries and even our Allies might be increasingly reluctant to supply goods unless paid for in foreign exchange.

Already Britain's commercial dealings with neutral countries are handicapped by inability to pay in goods,

gold or dollars; hence, a position is conceivable in which the scarcity of foreign exchange might be a definite handicap to Britain's war effort."

---

That the handicap of foreign exchange has so far been greatly overcome, is due largely to the simple arrangement with India for payment in respect of war orders and war commitments of Britain. I may, as on a former occasion, explain this arrangement by a concrete illustration.

Let us say that the British Government place an order with the Indian Government for sandbags of the value of Rs. 12 crores. The Indian Government, in their turn, places the order with the Indian Jute Mills Association. In due course, the goods are shipped and the bills and shipping documents are presented to the Government of India. Payment on this bill is made from the cash balance of the Central Government.

This is duly notified to the British Treasury who instructs the Bank of England to pay the Indian Government the equivalent of Rs. 12 crores. Accordingly, the Bank of England writes to the London branch of the Reserve Bank of India advising the latter that its account with the Bank of England has been credited with £9 million being the equivalent of Rs. 12 crores.

On receipt of this letter, the Reserve Bank of India addresses a letter to the Bank of England instructing the latter to invest £9 million on its behalf in British treasury bills.

When the Bank of England makes payment to the Reserve Bank of India, the British Treasury is debited with £9 million in the Bank's books and the Reserve Bank of India is credited with a corresponding amount. When the Bank of England receives instructions to invest £9 million on behalf of the Reserve Bank, the Reserve Bank is debited with £9 million in the Bank of England's books and the British Treasury is credited with £9 million.

Thus is the status quo restored.

---

In all this arrangement, no actual payment has been made. Only four book entries are involved. And Britain has financed the sandbag order without paying out any cash and with paying only one per cent. on the treasury bills.

When the Reserve Bank finds the need, it lodges these treasury bills in the currency reserve and issues additional currency thereagainst. Thus are the Indian Government recouped.

From the point of view of Britain's financing of war orders and war commitments, no arrangement can be neater and simpler. Without having to borrow for the purpose and without having had to raid on the foreign exchange reserves, Britain has, by this arrangement, been able to make payments for anything like £400 million with respect to war orders and war commitments entrusted to the Indian Government.

Obviously, there is a limit beyond which even this simple arrangement cannot be carried. This has been realised by the "Financial News" though few in India seem to have been troubled about the imminence of such a problem.

As the "Financial News" points out, the accumulation of foreign sterling balances might reach a point at which even the Allies might be increasingly reluctant to supply goods unless they are paid for in exchange. So far as India is concerned, that point has, in my opinion, already been reached.

The accumulation of sterling balances with the Reserve Bank of India is now at a pace and on a scale which cannot be considered healthy in the interests of Indian finances.

If the Indian members of the Viceroy's Executive Council and if the leaders of economic opinion and political thoughts in this country are at all the class of people who worry their minds about financial problems, they would certainly realise that this question of rapidly accumulating balances needs to be looked into urgently and imperatively.

If India had any volition in financial matters, she must be able to say now and here; "let us go slow with the piling up of sterling assets."

Apart from the status of sterling and the value of sterling securities in the post-war period, the time-honoured saying warns us against putting all our eggs in the same basket. This advice equally applies even to a basket of sterling worth.

---

The "Financial News", which posed the problem, has furnished no solution.

The correspondent of a news agency, which supplies a weekly market review in its commercial service to private subscribers, has more self-assurance than the "Financial News" and hazards a solution.

After pointing out that, in strategy and supplies, Anglo-American co-operation is working smoothly and satisfactorily, he wonders why this co-operation is not being applied in the financial sphere also. And he suggests: "The Washington Administration could relieve any of Britain's foreign exchange shortage by a stroke."

His plea is for financial collaboration

between the United States and the United Kingdom analagous to the military and economic collaboration already in effect. One can readily see the point of view of a British City Correspondent with regard to collaboration in the financial sphere between America and Britain. But an American wag may retort that the correct name is not collaboration. It may better be described as one of give and take—Britain taking and America giving.

Which reminds me of the story in which one urchin suggests to another: "You bring fried rice and I will bring husk. Let us mix it together. We shall then together blow off the husk and together eat the fried rice."

"EAVESDROPPER."

**BEWARE OF JAPANESE WORDS!**

**THEY CLEAR THE WAY FOR JAPANESE BAYONETS**

BEWARE of the soft words of your enemy! Beware of his attempts to make you think he is invincible! Japanese soldiers do not want to be killed when they come to India, so they broadcast that they are our friends. They spread false news to alarm and confuse and weaken us. It is a new method of warfare. Japanese soldiers do not want to die when they attack India. They want to live—in our homes.

But die the Japanese invaders will, under the shock of our soldiers and bombs and guns, with you in the rear standing firm and giving all your help. This great country of 380,000,000 people CAN NEVER BE CONQUERED if we decide so!

**CHINA WAS NOT FOOLED**

The Chinese were not tricked by Japanese propaganda. For five years that formerly disunited nation has fought the Japanese magnificently and will never give in. Russia was not tricked by the Nazis who attacked her even after they had signed a Treaty of Friendship! Learn a lesson from China and Russia. Don't trust in Japanese words!

**BUILD INDIA'S WAR FRONT AGAINST THE JAPANESE**

*(From Our Correspondent)*

New Delhi, June 17.

New Delhi had another unpleasant shock this week—the death of Dr. E. Raghavendra Rao, the Civil Defence Member. Owing to his failing health he had already decided to resign and was arranging to leave for Bilaspur as soon as the doctors considered him fit to travel. Unfortunately he suddenly collapsed on Monday morning and passed away that afternoon. The loss of this distinguished Member—so soon after the tragic death of Sir Akbar Hydari—is undoubtedly a big blow to the expanded Council. Few Indians have had a more distinguished official career than Dr. E. Raghavendra Rau—able, independent and strong both in his views and his ways. His selection for the Viceroy's Council was generally acclaimed as a happy one. Unfortunately he was ill from the very day of his arrival in India and though he showed signs of improving health, had suddenly a serious attack early in May from which he never recovered. Dr. Raghavendra Rao took up his appointment with great hopes of doing something both for the new Department of Civil Defence which he was called upon to organise and for finding ways and means to end the political deadlock, but his continued illness culminating in his tragically sudden death robbed him of the opportunity.

* * * * *

Owing to many complications including also the death of a valued colleague, the Viceroy's announcement of new appointments to the Coucil has been unduly delayed. It is not yet clear what exactly are the remaining difficulties, but all that one hears is that the announcement may be ready any day. It is generally believed that Sir C. P. Ramaswami Iyer may be invited to take up the Civil Defence portfolio. Sir C. P. Ramaswami Iyer is to-day in New Delhi to see the Viceroy. If he agrees to join the Government of India one difficulty will be out of the way. The Viceroy has to satisfy many claims. Provincial and communal, but he is reported to be anxious to have first rate personalities—men with drive and energy—for important portfolios like Civil Defence. Sir C. P. Ramaswami Iyer was some years ago officiating Commerce Member and is therefore not new to the Government of India. If Sir C. P. Ramaswami Iyer accepts the Viceroy's offer, it is likely that a prominent European Civilian of Madras may take up the Travancore Dewanship. At the moment the name of Sir Shanmukham Chetti seems to have receded to the background, for if Sir C. P. Ramaswami Iyer is appointed, it is not likely that another from South India will be added. There is already Sir Mahomed Usman who is the most fancied candidate for the Defence Membership.

* * * * *

The Duke of Gloucester's visit has naturally kept official circles busy in New Delhi. The object of his visit is purely military—in fact, he has been spending nearly all his time reviewing troops and inspecting army training schemes, but it is widely assumed that His Royal Highness will also take the opportunity to discuss political questions with the Viceroy and convey his impressions to His Majesty's Government. Though some in New Delhi may be inclined to let matters drift and be content with the present progress, the Grady Report has been helpful in showing the unwisdom of an overcomplacent policy. The American Mission is said to recognise that the war effort is intimately connected with political conditions. If for instance this country is made "war mad" the effect which it will have on war production —not to mention other war effort—will be tremendous. There is reason to think that this aspect of the Indian question has been taken up by Col. Johnson in his discussions with President Roosevelt. And it is certainly hoped that the Duke of Gloucester will utilise his Indian visit to consider what should be done to secure the maximum war effort in this country particularly from the production point of view which is all important at the present time.

* * * * *

Preliminary meetings of the newly constituted War Resources Committee are going on. There is a good deal of complaint that for the Secretaryship of this important committee which is expected to organise allout war production it is intended to appoint an Army General. Even if there is no prominent industrialist or businessman whom the Government of India is prepared to consider, there is no reason, why the claims of senior Indian officials with knowledge and experience of industrial organisation, should be passed over. In fact there is Sir G. V. Bewoor himself, at present officiating Defence Secretary, who will certainly prove useful as the Secretary of a Committee like this. The constitution of the War Resources Committee has failed to arouse enthusiasm in the country—partly because of the absence of any announcement creating a separate Production portfolio and partly because the public is still unaware to what length the Govt. of India is prepared to go to give effect to the Grady recommendations. The official answer to these complaints is "Wait and see what we do." They seem to be hopeful that when the Government's decisions are fully and finally known, the public will not have much reason to complain.

* * * * *

One important question which the Grady Report has brought before the public is that of regimentation of industries on the American model. I discussed this question with certain prominent Indian industrialists. They seem to think that unless there is popularly controlled Government which knows fully and can be trusted to safeguard Indian interests, regimentation of industries on the American model, though it may have different results elsewhere is neither practicable nor desirable in this country. In their opinion the success of the Grady plan for increasing India's war production depends upon the Government's readiness to instal a National Government. The Indian Members of the Viceroy's Council are powerless to deal with constitutional questions of this kind, but they can at least insist that he War Resources Committee should have an Indian Secretary and should be so equipped as to be able to consult and profit by the advice and assistance of Indian industrialists and businessmen. It is not yet known what machinery Sir Homi Mody proposes to set up to associate the War Resources Committee with Indian industrialists.

* * * * *

The difficulties of Indian producers and industrialists were well illustrated at the conference held last week of cashew nut manufacturers. In pursuance of their war production plans the United States are anxious to have as much of cashew shell oil as India can supply. The price which the American authorities are prepared to pay is also understood to be very good from the point of view of the market. What was hitherto merely a by product largely going to waste has now become a valuable and profitable industrial product for hitherto only cashew kernels used to be exported abroad. Though the demand is there which the cashew nut producers of South India are anxious to meet, they are faced with a double difficulty. They have not got sufficient number of plants for extracting oil. And unless the Government of India is prepared to offer the Indian industry necessary facilities for installing these plants they will not be able to extract the oil. One European company is said to have certain plants for extracting this oil, but they are reported to be putting forward terms which virtually amount to a monopoly. This company wants the sole right to export the oil to the United States. As the matter is now in the Government's hands, it is hoped that a satisfactory arrangement will be entered for giving a fair return to all the parties concerned and preventing anybody being unfairly treated. It is a tragedy that though the cashew nut industry has been built up by Indian enterprise, the Indian producers and dealers are unable to take advantage of the present opportunity for developing a new market owing to the want of the requred machinery.

From Our Correspondent)

Bombay, June 17.

THE event of the week took place at Poona. It was the thirty-seventh anniversary of the Servants of India Society. The annual report speaks of many activities. The Servants joined the non-party leaders conference, they worked for Harijan uplift, ran two newspapers, and did much for urban labour. Mr. Gokhale's ideals sustain the Society, hence Pandit Kunzru disputed the Government's claim to have done the best in regard to evacuees from Burma. A big meeting took place on Friday last, and Pandit Kunzru reviewed the affairs of the nation. He was unwilling to approve the Council expansion scheme. He asked for the exclusion of officials, and declared that the war effort could win support only on one condition. The Cripps plan too was examined in detail. Mr. Kunzru summed up by saying: "As regards the present the proposals were extremely nebulous and conceded no real power to Indians". Britain had no real confidence in India as may be inferred from her being kept out of the Empire Air Training scheme. Mr. Kunzru criticised obliquely the new plan of Mr. Rajagopalachari. It seemed to him that by accepting the principle of Pakistan, we would be tackling the problem of unity at the wrong end.

The general discontent prevailing in the country certainly found expression in Dr. Kunzru's review of the situation to-day. But the Servants of India Society to-day is not obstructive at all. They are interested in A.R.P. and quite keen on civil protection measures in the countryside. According to the report of the Society, the finances are in a bad way. The deficit for 1941-42 added to the previous deficit comes to Rs. 18,000. But the Society's ventures are prospering, and this year at any rate anxiety is relieved by the unexpected rise in receipts. But this is called a windfall, and the Society therefore has asked for liberal support so that it could continue and extend its activities. The speech was careful and outspoken by turns, but the general tenor is beyond cavil. It is for others to take note of what our moderates feel. The national war front cannot be popularised by the ducal visit alone. The Poona speech is the proper answer to much official propaganda according to local observers who are amused by the heroic efforts of the organisers of the war front.

The previous forecast in the local press as to two rupee currency notes has been correct. It is presumed that the Bank will issue the notes which will not be treated as rupee coin. Government evidently likes the idea of saving on imported paper and giving the public a new denomination. Ceylon has tried two rupee notes but the experience of India in regard to two and a half rupee notes is by no means favourable. The real reason may be a desire to save silver. The Government may like to sell silver in order to replace tin. Handy and Harman's review speaks of new industrial uses for silver, and many believe that the Edward VII coins were called in for melting in order to add to the silver stocks depleted by sales. It is assumed that even if imports cannot be had the Government has a duty to sell silver in London at the price ruling there. Critics are not wanting to prove that the policy of free sales is mistaken. It is not merely the Indian speculator who objects to sales from reserves built up carefully in the past. Silver is deemed safer than sterling securities by some, and the debasement of currency, including token coins, in the war period, may well provoke fears as to the future of the rupee. It is not only in terms of sterling that the rupee must be valued. The public expect 175 grains of reasonably fine silver and what it gets at present does not seem fair. It may be argued there is no international agreement to prevent sales and the U.S. Treasury is no longer supporting silver. But the Government must remember (even if the fact has been ignored in advertisements) that Mexico is an ally of Britain in this war and it is up to the Government to buy rather than sell silver just now.

The Food Grains order applies to Bombay according to a recent notification. The idea is to hit at hoarding. Agriculturists can keep their own stocks but all others who want to keep more than twenty maunds must have a license. From July 1st, the rule will be that licenses must be got for storing wheat, millet, rice and grain. The usual monthly returns also must be made and the new procedure is to keep supplies and control. The procedure seems complicated, and the fact that the Punjab Government has so far not chosen to enforce the Order should not be ignored. The wheat market here is still rising and the jump in oilseeds last week, owing to the raising of the limit for the Ministry's purchases, has convinced mills that it will pay to buy wheat and seeds at the present prices. There is no good in looking for a fall merely because cotton has gone down. There is also the plain fact that the Punjab cannot sell all the wheat it would like because prices there are rising. Except for cotton everything seems quite firm and it is not too much to say that the press notes about civil supplies cut precious little ice. Cash may be plentiful but foodstuffs are deemed more valuable and the war news this week makes people here think that price control is not going to work. The cotton market may drop again in the wake of New York but cloth prices are firmer than ever because exports are growing in the normal fashion and Ahmedabad reports big demand.

The Government may be saved some money by the enemy occupation of the Andamans but it is going to stand a bigger loss on Baluchistan. That province is going to have the biggest deficit in its career. The revised budget puts income for 1942-43 at Rs. 22.18 lakhs and expenditure at Rs. 122.11 lakhs. Last year, too, revenue fell, and disbursements increased. This year again the same experience will put Baluchistan in the backward class. But not so backward as to be without A.R.P. and civic guards. The Government has still got to spend money on the 1935 earthquake damage, but it has cut down its usual expenditure on tribal areas. The Central Government has got to pay out rupees one crore by way of subvention this year. This is a permanent burden of the Indian taxpayer who may well say that Pakistan should be created at once and handed over to the Muslim League so that people here need not pay out eternally for the deficits of Sind and Baluchistan.

A change of some importance to Indian businessmen is the notification from Delhi that the Canteen Contractors' Syndicate is going to be taken over as a going concern. The Syndicate helps messes, canteens etc. to get supplies. It is going to be run as a separate stores department hereafter under A.H.Q. All liabilities will be discharged by the Government subject to the submission of the usual statements. The staff will be retained and dismissals can only be made by the present Managing Director. To that extent, the employees are protected. Pay and provident fund are also unaffected. The Syndicate's Articles of Association envisage the assumption of direct control by the Government in an emergency. There is a possibility that a return on invested capital will be guaranteed by arrangement, and the growing expansion of demand will probably help the Government to make a success of its new venture.

An offshoot of evacuation is a letter to the papers calling attention to some unknown hardships. Businessmen who have come back to India face a peculiar difficulty. Many in Rangoon ordered goods from India and could not take delivery because of the raids or because they could not carry on business as before. Business was given up, but money is still owing. Having returned to India their debts have to be paid, and creditors find that there is no trouble about jurisdiction or limitation. To plead that he is an evacuee is no answer to the claim made by the creditors. People who owe money ask for the notification of a moratorium. A special type of debt relief is asked for, and where cases have been filed, free legal assistance is also wanted. The Federation of Indian Chambers has been asked to take note of this new trouble of the evacuees. Insolvency proceedings are not enough, they want remedial measures—these debtors from

(Continued on page 957)

# Resume of Commodity Markets

THERE have been no important developments in the commodity markets during the past week. The jute and jute manufactures markets have been rather uninteresting while the raw cotton market has been somewhat quiet. Early in the week, there was a spurt in bullion prices but some selling at the higher levels has minimised gains. The seeds markets have been very firm and it has been difficult for the Central Government to get their requirements at scheduled rates.

There is a general tendency to take a more hopeful view regarding the future as far as freight is concerned. The recent developments in the war situation, however, have been little calculated to stimulate activity. Revival of activity in the principal export commodities can be expected only with a more hopeful war situation and a sustained increase in shipments.

The problem of meeting shortage of food grains and arranging for transport facilities is proving very difficult. In the Punjab, it has been necessary to curtail wheat exports from the province to prevent soaring prices while in Bengal maximum prices have been fixed for coarse and medium rice in consultation with the provinces of Bihar and Orissa. Coal also is offering similar difficulties. It has been decided by the Assam Government that coal miners in the province should not despatch or sell coal to anybody without permit from the Government.

### Jute

There was greater buying by mills earlier in the week but no improvement in prices took place. The policy of mills seems to be as was pointed out on an earlier occasion, to even out purchase, and there is no hurry to lay in stocks with conditions as they are. Unless mills are able to dispose of their production at remunerative prices, there cannot be any buying on a large-scale. At the present moment, mills are unable to sell standard lines of hessian because they are quoting below the minimum prices fixed by the Indian Jute Mills Association.

### Jute Manufactures

There has been very little doing in the hessian market where prices have remained more or less unchanged during the whole week. The U.S. stock and consumption figures should be rather discouraging from the market point of view. The decline in consumption in May is not anything surprising but the fall in stocks afloat indicates that the freight position is very difficult. Some shipments have been sent during the last three weeks but whether there will be any large net increase in June over May remains to be seen. Beyond some small business for near covering, there is nothing of importance to be recorded.

The statement regarding production for June shows that out of the total of 97,906 tons, 19,760 tons were on account of Government orders and the balance of 78,146 tons for ordinary purposes. That is only 20.2 per cent of the total production has been issued for Government purposes. The country is mostly dependent on exports for the consumption of jute manufactures, internal consumption still being on the small side. In the absence of any large increase in exports, it will not be possible to prevent an undue increase in local stocks.

### Cotton

The cotton industry seems to be placed in a much better position. The export markets for cotton manufactures are much nearer and there has already been an increase in the export trade to the Middle East Countries. Also Government orders are between 25 to 30 per cent of total production and, in the absence of imports, the whole of the Indian consumption has to be catered for.

But for the weakness of the stock exchange in Bombay, with the disturbing news from the Middle East, the raw cotton market would perhaps have made a better showing. It is satisfactory to note, however, that there is some resistance to selling pressure at the lower levels. The increase in the volume of business in the piecegoods market and the working of night shifts by a larger number of mills, should ultimately be reflected in higher prices.

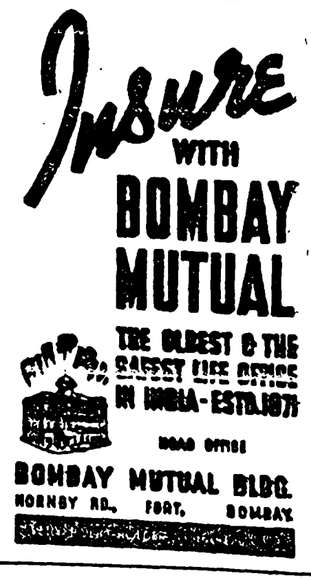
### Bullion

The bullion markets have reacted violently to the adverse developments in the Middle East. There was a sharp rise in prices for both silver and gold earlier in the week. Closing prices for gold are only slightly lower than the highest levels for the week. It seems rather surprising that operators in Bombay should feel more seriously the adverse developments in the Middle East than the threatened Japanese invasion of India that was in evidence sometime back.

In the case of silver, speculators in the Bombay market have perhaps greater reason to push up prices. For it has been announced that, following the serious drain on rupee coin, the issue of two-rupee notes is under contemplation. This is taken to mean that in the absence of silver imports from Burma and Australia, the stock position is becoming more difficult. Whether the Government of India are in a position to check a ramp in the market cannot be said definitely at the moment.

### Oilseeds

The oilseeds markets have been very firm and holders are not willing to sell at the present prices. Considerable difficulty is experienced by the Government in getting their requirements. As there are no sellers around the scheduled rates, no tenders have been called for. Instead, sellers have been asked to quote around scheduled rates and not many have been forthcoming.



### Rice

Rice is to be brought under control by the Bengal Government. It is stated that the recent rise in prices for rice has been causing concern to the Government and that it has been decided to institute control of prices even though there is no control in other provinces. The decision, it is stated, has been taken in consultation with the provinces of Assam, Bihar and Orissa. The rice problem in these four provinces should not be very difficult as nearly 53 per cent of the total Indian rice crop is grown in this part of the country and if there has been an undue rise in prices, it is more due to local shortages in the absence of transport facilities and speculative activity. It is believed that the restriction of river traffic in country boats in Bengal has prevented the free movement of rice.

The communique on the subject is given below:

"The question of bringing the price of rice under control has been under the consideration of the Government for some time past, but no action was taken so far primarily because it was considered that the cultivators who formed the majority of the population of the province should not be deprived of the benefit accruing from any rise in the price of this commodity. Another reason for not bringing the price of rice under control was that the primary price of rice was not under control in other parts of India and consequently any local action might tend to divert supplies from the province to other provinces where there was no control.

While these considerations weighed with Government in not taking any action so far Government have been viewing the recent upward tendency of the prices with great

concern. The present level of prices represents an increase of 65 per cent on the pre-war level. In the opinion of the Government, actual cultivators are not deriving much benefit from these increased prices. It is, therefore, considered that the stage has been reached when it will no longer be advisable, in the interests of the consumers, to leave the price uncontrolled. It has, therefore, been decided to fix the maximum price of coarse and medium rice at Rs. 5/12/- and Rs. 6/4/- respectively (wholesale) and Rs. 6/4/- and Rs. 6/12/- respectively retail with effect from the 1st July, 1942 vide the annexed order issued by the Chief Controller of Prices, Bengal.

This decision has been taken in consultation with the three adjoining provinces, viz., Bihar, Orissa and Assam.

There are so many varieties of rice with such diversified nomenclature that it has been found difficult to fix maximum prices of each variety by name. The terms 'coarse' and 'medium' are popular and the varieties so known easily identifiable. It is hoped that the finer varieties of rice will find their price level in accordance with the prices of controlled varieties.

(*Continued from page 955*)

without who might have escaped all this trouble by staying on in Burma.

Prohibition notifications have been modified to bring in the sale of all tonic wines under control. Licenses are needed for selling Arishtas and Asavas as well. The idea is to keep down the use of alcohol used in medicated wines. Chemists come under the Abkari Act, even in non-dry areas. The licenses have to be issued by Collectors, and excise revenue may possibly go up. The notification is of less interest than a ban on sugar exports. People here wonder whether the ban will apply to seaborne exports to Iran. The Deccan factories are not likely to be enamoured of Bombay as the sole market for their sugar at Rs. 13-10 per md. Sugar has gone off to the many States in this Province and officials are piously hoping to get sugar from the U.P. Consumers are asked to cut their own purchases, not to lay in stocks. Retail price is fixed at six annas per seer and the Government shops are said to sell at the official price. Profiteering is punishable, and the average man here wonders whether the threat is a cure for the shortage.

The usual enquiry has begun. The B.E.S.T. workers are pulling up a case for Mr. Justice Broomfield. Their counsel Mr. S. C. Joshi spoke of the need for uniformity of wages for both drivers and conductors. He explained that the present demand was for the restoration of the scales of pay in force prior to 1934 and asked further that the basic wage should be Rs. 50 instead of Rs. 40. Increments should be regularised. The judge informed the parties that his award would be enforced by the Government, and the parties should strive for agreement between themselves before he reaches his own findings.

Th honours list in Britain finds a place for A. Korda. With United Artists he is now more American than Hungarian. Many know him as the spouse of Merle Oberon and the maker of Sabu. The O.M. for Mr. John puts him in a special niche with Mr. Wilson Steer. Locally the titles are distributed among a chosen few. Mr. Madan and Mr. T. S. Kennedy, ex-Sheriff, are new Knights. The Raja of Phaltan and Mr. Raper, formerly of the G.I.P., are in the last Honours List along with Mr. J. B. Irwin, Secretary to the Governor of Bombay.

(*Continued from page 939*)

port. Money has been in superabundant supply.

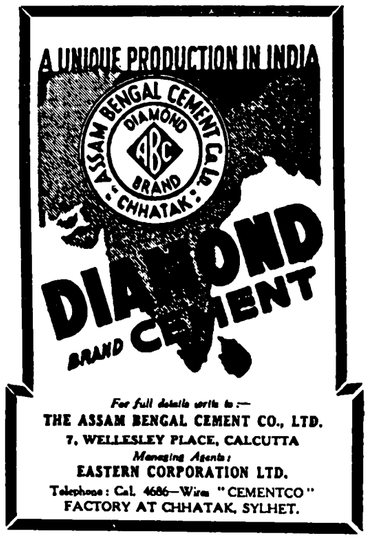
The closing rates are: Banks buy T.T. London Ready to six months forward at 1s. 5 31/32d.; banks sell T.T. London Ready to six months forward at 1s. 6 1/32d.

Banks sell three months D.A. bills for first and second months at 1s. 6 9/32d., and for the third and four months at 1s. 6 5/16d.

Money remains easy with interbank quoting ½ per cent.

Firms money for one to four months deposits is also ½ per cent.

Banks buy T.T. New York Ready at Rs. 329½ for $100.



Banks sell T.T. New York Ready at Rs. 332¾ for $100.

### Indian Goods In Africa

The Trade Commissioner at Mombasa in the report covering the period December to February refers to a number of enquiries received in his office. The enquiries are meant to indicate that in East Africa there exists openings for manufacturers and exporters. Readymade clothing is desired by importers in Mombasa. Shirts and other clothes are in demand among the natives. The Trade Commissioner remarks that such clothing hitherto imported into this country from India has found a ready market and there appears to be much wider scope in the line. Sewing thread is also required by East African merchants. Indian-made sewing thread sold readily, and India has got a chance of capturing the trade. Sheet glass for window panes was desired by a firm in Nakuru (Kenya). Addresses of Indian manufacturers were furnished. A European firm in Kisumu wanted to get in touch with manufacturers of tailors trimmings. Only the names of firms dealing in embroidery, lace and chicon were made available in the hope that such firms could export trailors trimmings. A firm in Uganda asked about manufacturers of felt hats in India. The question is receiving attention in the usual way, says the report. The enquiry about brushes from Nairobi resulted in the receipt of samples and information from India so that orders could be placed direct. Some difficulty may arise from the fact (recorded in the report) that the prices are higher than those of English brushes previously imported into East Africa. According to the report the quality of Indian brushes has attracted the attention of local merchants, and if competitive prices can be offered, there is very good scope for building up an Indian export trade.

### Insurance Problems

The "Fieldman" has produced another anniversary number that deserves notice. The Journal discusses insurance problems and asks for discriminating support to Indian insurance. The issues involved in amalgamation are discussed by Mr. S. C. Roy who advocates rationalisation. Some kind of territorial division is also recommended by Mr. Roy who pleads that a pooling arrangement will cut expenses. The expenses question is examined from many angles by Mr. H. K. Sen. The catena of High Court decisions on the Insurance Act serves to show that the law was not so complete or perfect as it seemed. Mr. Bose marshals all the cases given in the Reports in order. Administrative delay seems surprising to Mr. S. C. Mitra who asks for decentralisation. He shows that foreign offices treat Indian policyholders better in regard to loans, claims and surrenders. Proposals too are speedily disposed of by non-Indian offices. The various arguments for giving branch offices a chance to run their own show, especially, in wartime, will convince policyholders and others.

### EAST INDIAN RAILWAY TENDER NOTICE

*Special Item Costing Over Rs. 8,000/- Class I Contract.*

Sealed tenders are invited for the following and will be received in the General Manager's Office, East Indian Railway, 105, Clive Street, Calcutta, up to 11 A.M. on 20.7.42.

Tender No. S/F1/1203/B for the supply of Wheels C.I. rubber Tyred 10" dia. with 1¼" dia. wheel for axle with rubber tread 2".

Tender forms with full particulars can be had from the office of the Controller of Stores, East Indian Railway, Calcutta, on payment of Rs. 2/- per copy to the Treasurer, East Indian Railway, Calcutta, and on production of his receipt when applying for the same.

Firms outside Calcutta may, however, remit the amount to the Controller of Stores direct by Money Order. Once this document is issued, no refund is permissible.

Sealed tenders delivered by hand should be presented for registration in the General Manager's Office and then put into the Tender Box outside the Deputy General Manager's (Works) room, by the Tenderer or his representative.

R. E. MARRIOT,
*General Manager.*

# Jute and Jute Manufactures

(By Our Jute Correspondent)

Calcutta, 18th June.

A controversy has again arisen between the Mills Association and Jute Sellers on the subject of War Risk Inssurance on jute in transit between up-country stations and the Mills by river and rail. When the War Risk Insurance on Goods was instituted, the Ordinance was so explicit on the point that that the owner must insure, that Mills generally accepted the liability as theirs, as there is no shadow of doubt that ownership passes at latest when jute is handed over to a Public Carrier for despatch to a specific mill. Up to the present therefore Mills have been covering this risk under their open policies which cover jute in stock at the Mill as well as jute in transit to the Mill. This is the position which the Association now desire to alter, putting the liability for War Risk on jute in transit entirely on the shoulders of Sellers. It may be remarked in passing that by no means all Mills support their Committee in this attempt, being satisfied that the position as accepted up to now is the reasonable and equitable one.

A Mill knows that when he buys jute for a specified delivery, he will have sometime about that time to take the jute into stock and insure it against War Risk. If he is prudent, he will, as soon as he is notified of the shipment of the jute, whether on presentation of the relative documents or before, see that the shipment is covered in accordance with his legal liability as the owner of the goods. Any cover by the shipper would almost certainly result in double insurance for some period, entailing unnecessary wasteful expense. Certainly the shipper has an insurable interest, which he may, in terms of the ordinance, insure if he likes. This is the shipper's interest as an unpaid vendor from the time of the shipment of the goods till the time they are actually paid for on presentation of the documents to the Mill. This period may extend from a few days to perhaps a fortnight, depending on how promptly the Mill meets its obligations in the matter of payment. But once the goods have been paid for by the Mill, the shipper has no further insurable interest in the goods whatever.

A mill therefore when he buys jute, knows approximately what his commitments are in the matter of War Risk insurance. But if this liability with regard to jute in transit is transferred to the Seller, the latter will have great difficulty in assessing his commitments in this respect. Jute in transit by river from up-country stations may take anything from a week to two months on the way. Not only that, but it may, after it actually arrives at the Mill, lie at the Mill jetty for several weeks before unloading, during which period the Seller, if the present proposals of the Mills Association are put into force, will have to bear the War Risk insurance. A Seller, under the Ordinance, is required to keep his stocks in his baling premises covered against War Risk insurance, and this cover can be arranged to cover jute in transit both inward and outward. Supposing that a baler's premises are such that he can normally turn over their storable content in a week's working. At present insurance to cover the maximum storing capacity of his premises therefore will suffice him. But if the liability for the insurance of jute in transit is to be thrust upon him, he will have to take out cover for eight to ten times this amount in order to cover shipments in transit to Mills or lying at Mill Jetties awaiting discharge. The imposition of such a liability is, on the face of it, inequitable. There is another aspect to be considered from the Seller's point of view. War Risk insurance can only be effected for quarterly periods. If a shipment does not arrive at destination till just after the lapse of one quarterly period, it would have to be covered again for the next quarter, though the cover were only actually necessary for a few days. This liability also is inequitable, and wastefully uneconomic, particularly when the goods, after discharge, will have to be covered again by the Mill and there may thus be double insurance for the major portion of quarterly period.

A compromise proposal which has been suggested and which seems as if it might equitably fit the case is, that the shipper should hold the goods covered against War Risk for seven days after the date of the Bill of Lading, after which date the liability would devolve on the Mill. This date would approximate with that of the payment for the goods, and would cover the shipper's insurable interest as unpaid vendor, and it would also put a definite limit on the shipper's liability, which, if the present porposals of the Mills Association are put into effect, are illimitable and incalculable. Possibly a compromise on these lines will meet with mutual acceptance.

Total production of jute goods during May was returned at 98,000 tons. Of this quantity, 19,760 tons or slightly over 20 per cent was on Government account, which shows a rise from 14 per cent the previous month. The total production is just over 9000 tons less than in April, a reduction of 8½ per cent. The relative reduction will show up more in the current month, as for more than half of May the Mills were still running 60 hours per week. Hessian production on commercial account totalled 1161 lakhs of yards and Sacking 989 lakhs yards, with 10 lakhs of Convas.

The U. S. A. Stock and Consumption figures have also been issued. Consumption this month shows the usual seasonal decline which might have been expected, but did not actually materialise, last month. The figure is 490 lakhs yards in May against 680 lakhs in April and 470 lakhs in May last year. The total consumption this year for the first five months is still behind last year at 2800 lakhs against 2860 lakhs. Stock figures show a sharp decline to a total in sight of 1400 lakhs yards, 980 lakhs on spot and only 420 lakhs afloat, surely the lowest figure on record for goods afloat to the U. S. A. for many years. At the same time last year the visible stocks were 2140 lakhs of yards.

The Export Jute market has not shown much activity but it is reported that some business for one of the Allies will be placed shortly, amounting to some 8500 bales. A sale of Dundee Daisee assortment was reported at Rs. 52 for July, but this grade is now scarce and sellers are asking an advance to Rs. 53 or Rs. 54. Some inter-baler business in Dundee Tossa 4s. was recorded at Rs. 56. With Mills there has been a small miscellaneous business in Free from Samla Firsts at Rs 62 to Rs. 65, in Dundee Daisee asstmt and Dundee Tossa 4s. at Rs. 54 and Rs. 55, and in Out-port Tossa 4s. at Rs. 37. The nominal price for First marks is Rs. 47 for shipment and Rs. 52 for Mill delivery.

Business in Loose Jute has been on a more restricted scale, previous buyers' immediate requirements apparently being satisfied. Indian District Tossa has sold at Rs. 11-8 for Tops, at Rs. 9-8 to Rs. 10 for Mids and at Rs. 7-8 for Bottoms. European packed Tossa fetched Rs. 10-8 and Rs. 8 for Mids and Bots. Some supervised and picked Indian packed white Bottoms were again done at Rs. 5-12 to Rs. 6. Estimated arrivals of jute into Calcutta for the firs half of June total no more than 97,000 bales against 3,50,000 bales in the saem period last year. Total arrivals for the current season, with a fortnight to go, therefore amount to 57,30,000 bales against 91,73,000 bales at the same point last season.

Reports from the mofussil continue to record favourable weather conditions. Cutting has started to a limited extent in some districts, but are generally held back yet for lack of sufficient steeping water. Rivers are rising again however and this should be corrected before long.

The Fabrics market has ruled steady to firm with a good enquiry from the Cape coming in to reinforce the recent country demand. Hessians have again been to a large extent neglected except for a fair purchase for cover of P. D. O. goods, presumably for the Plate, at Rs. 18-8 "C" group elevens and Rs. 18-12 for A/B group. 45/11oz. continued to sell at Rs. 21-8 ready. Nine porters quote nominally Rs. 14-6 with no business reported. In Heavy goods the interest has again been largely centred in "B" Twills which have sold at Rs. 41-8 to Rs. 42-4 ready, at Rs. 41 to Rs. 41-8 June, at Rs. 40 to Rs. 40-4 July and Rs. 39-8 July/August. Liverpool Twills have also been in request at Rs. 43 to Rs. 44-4 ready and June and at Rs. 43 July/Aug. Cornsacks were recorded at Rs. 40 for July and 15th August and Woolpacks at Rs. 1-12-6 for October/December.

Closing quotations on a fully steady market are:—

| | Ready | June | July-Sept. |
|---|---|---|---|
| | Rs. a. | Rs. a. | Rs. a. |
| Heavy Cees | .. 39 0 | 38 12 | 37 12 |

## JUTE

*Calcutta*, June 18.

It was remarked at the end of last week that the raw jute market was more lively on larger buying by mills, but that there could not be any improvement in prices with the favourable reports regarding the growth of the crop. There has been less activity during the past few days. Mills seem to have satisfied their immediate requirements. In the absence of any rush for buying it is believed that there will not be any important change in prices. Any appreciable rise in prices can be possible only with a more active goods market.

In the loose jute section, as pointed out above, greater buying was noticeable earlier in the week. Supervised Jat Bottoms were done at Rs. 5-12 per maund. Indian District Tossa Middles and Bottoms were done at Rs. 9-8 and Rs. 7-8 per maund. Balers are reported to be interested in Tossa varieties.

In the pucca bales section there has been very little doing. Mills are reported to have bought Free from Samla Firsts 2/3 at Rs. 62 per bale.

## JUTE MANUFACTURES

*Calcutta*, June 18.

The jute manufactures market has been uninteresting. There has been little activity in the hessian market and quotations have been fluctuating within narrow limits. There is a general tendency to await further developments and if the freight position gets easier, there will be greater buying. 9 porters ready are quoting Rs. 14-6, June Rs. 14-6 and July/September Rs. 14-6. 11 porters ready are Rs. 18-10, June Rs. 18-10 and July/September Rs. 18-12.

The Heavy Goods section also has been easier during the latter half of the week. Demand from Punjab and Bombay has been mostly satisfied. B. twills for ready delivery sold on the basis of Rs. 41-12, Liverpool twills Rs. 44 and Cornsacks Rs. 41-4. The improvement in Liverpool twills is very pronounced.

The production figures for the month of May are given below:

Total reported production of manufactured goods by the mills in the membership of the Association and also by Gagalbhai Mills.

| Description. | Quantity. |
|---|---|
| 1. TWIST AND YARN— | |
| (a) for sale .. | 2,402 tons |
| (b) all other, including that used in sewing bags .. | 1,320 tons |
| 2. CANVAS— | 521 tons |
| | 9,95,610 yards |
| 3. GUNNY BAG (Tonnages exclude sewing twist) .. | |
| (a) Hessian .. | 3,388 tons |
| | 1,50,23,543 yards |
| | 88,04,474 number |
| (b) Sacking .. | 40,946 tons |
| | 9,43,31,664 yards |
| | 3,96,54,749 number |
| 4. GUNNY CLOTH— | |
| (a) Hessian .. | 27,591 tons |
| | 10,10,68,286 yards |
| (b) Sacking .. | 1,927 tons |
| | 45,77,838 yards |
| 5. OTHER MANUFACTURES (including ropes) .. | 151 tons |
| 6. TOTAL PRODUCTION (above figures combined)— | |
| (i) All kinds .. | 78,246 tons |
| (ii) Hessian (both as bags & cloth) | 11,60,91,809 yards |
| (iii) Sacking (both as bags & cloth) | 9,89,09,502 yards |
| (iv) Canvas (both as bags & cloth) | 9,95,610 yards |

The returns of Maheswari Devi have not been received and are excluded.

*Exclusive of all Government orders.

### Total Reported Production of Goods Manufactured on Government Account

(By the Mills in the membership of the Association and also by Gagalbhai Mills)

| | | |
|---|---|---|
| 7. | Sandbags .. | 5,880 tons<br>2,70,73,849 yards |
| 8. | Scrim Cloth .. | 2,058 tons<br>1,58,13,556 yards |
| 9. | Hessian bags and cloth and canvas | 7,662 tons<br>3,00,17,953 yards |
| 10. | Sacking bags & cloth .. | 4,160 tons<br>1,05,79,029 yards |

The returns of Maheshwari Devi have not been received and are excluded.

The U. S. stock and consumption figures for May are also available. The drop in the figure of consumption for the month is not anything surprising and at 49 million yards is higher by 2 milion yards over the corresponding month last year. The poor rate of shipments will be evident from the drop in stocks afloat to 42 million yards from 98 million yards. Stocks spot are also lower at 98 million yards. The position will be clear from the table below.

| | Stocks at the end of Month. | | | | Consumption for Month. | |
|---|---|---|---|---|---|---|
| | Spot | | Afloat | | | |
| | 1942 | 1941 | 1942 | 1941 | 1942 | 1941 |
| January ... | 161 | 170 | 107 | 149 | 43 | 57 |
| February ... | 112 | 132 | 138 | 83 | 53 | 60 |
| March ... | 154 | 123 | 116 | 64 | 65 | 67 |
| April ... | 100 | 105 | 90 | 84 | 68 | 53 |
| May ... | 98 | 98 | 42 | 116 | 49 | 47 |
| June ... | ... | 107 | ... | 114 | ... | 49 |
| July ... | ... | 121 | ... | 104 | ... | 64 |

| November ... | ... | 101 | ... | 164 | ... | 58 |
| December ... | .. | 145 | ... | 68 | ... | 75 |

## GOLD

*Calcutta*, June 18.

The deterioration in the situation in the Middle East caused a resumption of speculative buying. Large buying by a prominent operator pushed up prices. A level as high as Rs. 49-14 for gold ready was touched. There has been some selling at the higher levels and the quotation now stands at Rs. 49-3. First settlement were Rs. 49-1. Arrivals from upcountry are on a small scale and restricted to 5000 tolas a day.

## SILVER

*Calcutta*, June 18.

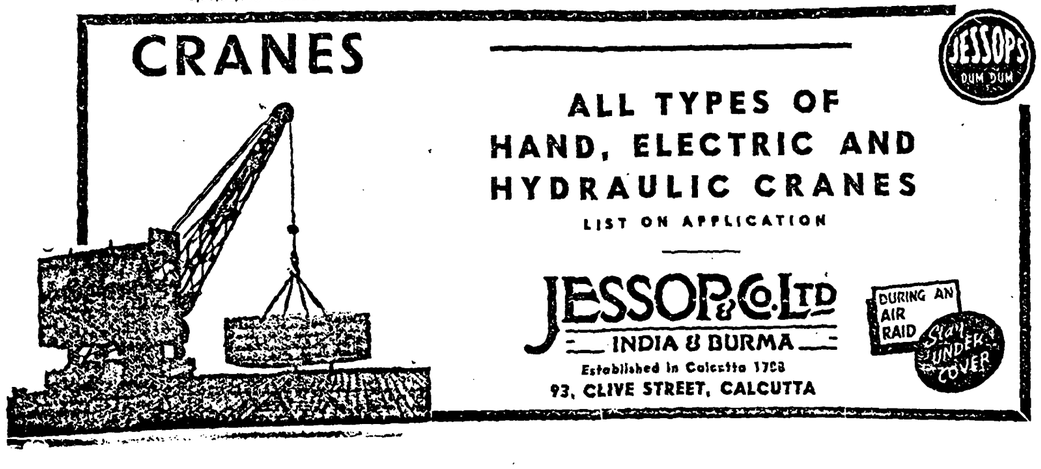
The silver market also has been firmer and there has been greater buying for First Settlement. There has not been much enquiry for spot silver. Indian Mint Silver ready were Rs. 83-8 and First Settlement Rs. 80-10. The quotations at the end of last week were Rs. 80-8 and Rs. 78 respectively.

In the London market business has been on a very small scale and demand has been satisfied by producers' selling. The quotation for both spot and forward is unchanged at 23½d.

## PIECEGOODS

*Calcutta*, June 18.

The piecegoods market has been more active during the past week. Prices have been marked higher with the increase in export trade with the Middle East countries. Demand from upcountry centres has not been brisk but with the difficulties in getting supplies, there is no tendency to sell freely. Local dealers have been able to get some supplies from Bombay.



## COTTON

*Calcutta*, June 18.

The Bombay raw cotton market has been rather uninteresting and the tendency has been irregularly downward. The firmer New York advices had an encouraging effect on the Bombay market in mid-week but with the deterioration in the war situation, markets have again turned easier. Broach April/May are quoting Rs. 183-12, Oomra July Rs. 160-8 and Bengal July Rs. 156-8. The quotations at the end of last week were Rs. 188-12, Rs. 163-8 and Rs. 159-8 respectively.

In the New York market, rather irregular conditions have been noticeable but closing prices are higher on balance.

The abrupt fall in prices during the past ten days has been due to the direct action by the U. S. Government. There has been considerable selling of loan stocks. The price ceiling has been fixed at 20 cents. Prices will, therefore, be fluctuating around these limits. July closed at 18.07 cents and October at 18.39 cents.

## EXCELLENT TEA COMPANY RESULTS

In spite of the preoccupation of the Western centre with the developments in the Middle East and Russia, the Calcutta Stock Exchange was inclined to be more cheerful. With a larger attendance and a more confident view regarding the immediate outlook a longer list of transactions has been recorded. Even the Bombay Stock Exchange, latterly, has been more cheerful. There seems to be a general feeling that the immediate danger to India is over and that with the continuance of the present conditions yet further recovery in prices can be expected. One cannot, however, take any definite view at the present moment. For, the next two or three weeks are very important for Allied strategy and the developments in this period may very well shape the course of markets.

• • • •

In common with the experience of other engineering companies, the *Indian Malleable Castings Limited* has been able to report a higher level of earnings for the year ended March, 1942. The net profit, before providing for taxation, for 1941-42, is Rs. 96,402 against Rs. 69,614 for the previous year. The amount set aside to depreciation is Rs. 30,044 against Rs. 27,794 for the previous year. The sum of Rs. 20,956 has been written off Developments Account in addition. The provision for taxation is Rs. 25,500 (Rs. 7,500). The ordinary dividend has been increased to 5 per cent from 3 per cent. The deferred shares receive the first dividend of 5 per cent. The amount carried forward is lower at Rs. 7,209 against Rs. 14,257 brought in.

The ordinary shares are entitled to receive out of the profits a fixed (tax-free) preferential dividend of 3 per cent per annum; any surplus profits available for dividend will be distributed equally between the ordinary and deferred shares.

The works have been fully occupied during the year and further extensions to the works are now under construction which will increase the productive capacity.

• • • •

The higher costs of production have perhaps been responsible for the lower level of earnings of the *Indian Rubber Manufacturers Limited* for the same year. One cannot draw any definite conclusion, however, from the profit and loss account as the same gives only the gross profit on trading. The net profit, before providing for taxation, for the year is Rs. 3,09,823 against Rs. 3,93,426 for the year 1940-41. The amount set aside to depreciation is Rs. 56,087 against Rs. 64,930. The transfer to Reserve for taxation is considerably lower at Rs. 89,424 against Rs. 1,23,728. It has been possible to maintain the dividend at 12½ per cent after reducing the allocation to General Reserve from Rs. 1 lakh to Rs. 70,000. The amount carried forward is lower at Rs. 6,117 against Rs. 14,809 brought in.

In the last year, the works have been maintained in full production capacity. Further extensions have been undertaken and these are progressing well.

• • • • •

Tea companies must be having a very busy time. There is no limit to production and there is no problem of freight as it is the job of the United Kingdom to arrange for shipping space. Tea companies have a contract with the British Ministry of Food to supply specific quantities at agreed prices. But, for exports to other countries there is no restriction. With the easier freight position, it is reported that there has been a sharp increase in prices for export tea to Australia, South Africa and other countries.

Having regard to the better conditions in the industry, the improvement in the earnings of tea companies belonging to the Mcleod group should not occasion any surprise. Four companies have been able to report an aggregate profit of Rs. 6,29,061 for 1941 against Rs. 3,71,516 for 1940. It has been possible to increase the dividends in all cases.

The net profit of the *Bhatkawa Tea Company Limited*, the best company in the group, is Rs. 2,47,941 against Rs. 1,40,276 for the year 1940. The amount transferred to Reserve for Taxation is Rs. 50,000 against Rs. 5,000 while the allocation to General Reserve is Rs. 50,000 against Rs. 20,000 on the previous occasion. The amount of Rs. 10,000, the same as before, is transferred to Reserve for Replacements and Renewals and Rs. 10,000 (same) is placed to Building and Machinery Reserve. The final dividend of 30 per cent, with the interim dividend of 10 per cent already paid, makes 40 per cent for the whole year against 35 per cent for 1940.

The increase in the earnings of the company has been due both to the larger crop turned out and the higher average price realised.

• • • •

The dependence of the jute industry, to a greater extent, on exports, at the present moment, is evident from the fact that the jute industry is now devoting only 20 per cent of the total production on war orders. For the first time since the outbreak of the war, the Indian Jue Mills Association have published separately the figures of production on government account for the month of May. Out of the total production of 97,906 tons only 19,760 tons have been utilised in government orders.

In the case of the cotton textile industry, it is expected that government orders in 1942-43 will total as much as 1,000 million yards and the capacity of the Indian industry is only 4,000 million yards. It cannot be said whether cotton mills will be able to produce this quantity this year on account of the difficulty in getting labour. The percentage of consumption on account of government orders to total production is, therefore, very much higher. There has been a revival of exports while internal demand has to be completely satisfied by Indian mills. The preference of the average investor for the shares of the well-established cotton companies is, therefore, understandable.

By this, I do mean to say that jute shares are not good. Only, the industry's prosperity is dependent on the availability of shipping space. The demand is there but there are not enough ships to carry the goods. With the first sign of improvement in the shipping position, there should, therefore, be greater demand for jute shares.

WATCH-DOG.

# The Week in the Exchanges

## CALCUTTA STOCK EXCHANGE

*(From Our Correspondent)*

*Calcutta*, June 19.

THERE has not been any sharp advance in prices on the Calcutta Stock Exchange during the past week but there has been a definite broadening of interest in several sections. Attendance on the Floor has been on a larger scale, and most operators are inclined to do business more freely. In spite of the discouraging news from abroad and the somewhat rather easier tone of the Bombay market earlier in the week operators in the local market were not inclined to change their views. It is felt that the threat of invasion of India has been averted for the time being and that with Indian industries doing very well it should be possible to stage a recovery in share prices. The undertone in several sections is steady.

The giltedged securities section has continued firm. With the continuance of easy money conditions prices have been well maintained. 3½ per cent. Paper was unchanged at Rs. 91-10, while among terminable loans, 3 per cent. Second Defence Loan were Rs. 99, 3 per cent. Defence Bonds 1946 Rs. 101-15, 3½ per cent. 1947-50 Rs. 101-8, 4 per cent. 1960/70 Rs. 106 and 5 per cent 1945/55 Rs. 108-2. Among provincial loans, 5 per cent. Punjab 1944 changed hands at Rs. 103-7.

Reserve Banks have been the only counter to be traded in among Bank shares, the quotation being around Rs. 100-8.

Among fixed interest securities, following the guarantee by the Government regarding the interest and principal of debentures issued by public bodies, there has been a firming up in prices and sellers are not prepared to dispose of their holdings. 3¼ per cent. *Howrah Bridge* debentures were Rs. 87¾. 5 per cent. *Calcutta Port Trust* debentures 1946 were done at Rs. 102-8, and *Calcutta Improvement Trust* debentures at Rs. 108. Among industrial debentures, 5¼ per cent. *Rohtas Industries* were again dealt in at Rs. 104-8 and 5½ per cent. *Dalmia Cement* debentures at Rs. 104-8.

Interest in the Coal section is still subdued, *Bengal* being noted at Rs. 359, *Ghusick and Muslia* at Rs. 4-9 and *Talcher* at Rs. 2.

In the Jute section, however, a larger number of transactions has been recorded, *Agarpara* being done at Rs. 18, *Bally* at Rs. 225, *Megna* at Rs. 58-8, *National* at Rs. 21-8, *Nellimarla* at Rs. 11-12 and *Nuddea* at Rs. 60-8.

Cotton shares have again been firm. *Bengal Nagpur* are further higher at Rs. 20-2, *Dunbar* were Rs. 247, *Kesoram* Rs. 9-8 and *Muir Mills* Rs. 310. *Cawnpore Textiles* were standing at Rs. 9-4 ex-dividend.

In the Engineering section *Indian Iron and Steel Corporation* have remained steady and quotations have been fluctuating around last levels. The close is slightly higher on balance with the quotation for *Indian Iron* at Rs. 27-6 and *Steel Corporation* at Rs. 17-6. *Bhartia Electric* ordinary shares were Rs. 14-2 and *Burn & Co., Rs.* 346. *National Iron and Steel* were Rs. 9-4 and *Steel Products* Rs. 4-8.

Sugar shares have been marked further higher in view of the encouraging outlook for the industry. *Balrampore* were Rs. 13-9, *Champarun* Rs. 24-12, *New Savan* Rs. 15-2, *Ramnugger Cane and Sugar* Rs. 11-2 and *Carew* Rs. 14. *Purtabpore* were in good request with the quotation marked higher at Rs. 13.

Tea shares have not yet returned to favour and not many transactions have been recorded. *Bishnauth* were Rs. 26-8, *Bateli* Rs. 6-12 ex-dividend and *Sarugaon* Rs. 11-4.

In the Miscellaneous section, *Burma Corporation* and *Indian Copper Corporation* were noted at Rs. 1-15 and Rs. 2-2 respectively. *B. I. Corporation* have been in very good request and bid up to Rs. 5-8. *Calcutta Trams* were Rs. 13-14 and *Indian Cable* Rs. 20-8. *Assam Saws* were Rs. 3-2, *Midnapore Zemindary* Rs. 73 and *Rohtas Industries* Rs. 24-2. *Publicity Society* were crossed at Rs. 10-8. Among Paper shares, *India Paper Pulp* were Rs. 144, *Orient Paper* Rs. 18-4, *Shree Gopal Paper* Rs. 16-10 and *Titaghur Paper* Rs. 20.

## BOMBAY STOCK EXCHANGE

*(From Our Correspondent)*

*Bombay*, June 18.

In the first three days of the period under report rather quiet conditions were noticeable on the Bombay market, but as pointed out on the last occasion, no sagging tendency was noticeable in any group. The reports that the local mills have received large Government orders and that the Russians have been able to withstand the German onslaught have had an encouraging influence on the several sections during the last few days and closing quotations are at the highest levels for the week. In view of the tendency of operators to attach greater importance to the operations in the Middle East it cannot be said however that the strength of the markets will be maintained.

*Securities.*—Giltedged securities have remained steady with 3½ per cent. Paper quoting Rs. 91-10, 3 per cent. 1949/52 Rs. 99, 3 per cent. 1946 Rs. 101-15, 3½ per cent. 1947/50 Rs. 101-10, 4 per cent 1960/70 Rs. 106-12 and 4½ per cent. 1955/60 Rs. 110-4.

*Textiles.*—The encouraging reports from the cloth market and the reports regarding the placing of further large orders with the industry have been mainly responsible for the rise in prices during the last two days. With labour more plentiful many mills are now working night shifts. *Bombay Dyeing* closed 40 points higher at Rs. 1,290. *Central India* were Rs. 387 against Rs. 379, *Century* Rs. 482 against Rs. 475 and *Kohinoor* Rs. 506 against Rs. 501. All quotations are for cash.

*Steels.*—The clarification regarding the application of the terms of the War Risks Insurance Scheme to the steel industry has had an encouraging influence on this section. *Tata Iron* ordinaries and deferreds have very nearly recovered the lost ground, being quoted at Rs. 312-8 and Rs. 1,580 respectively.

*Hydro-Electrics.*—With the continued firmness of giltedged securities hydro-electric issues have been marked higher, *Tata Hydro* being four points higher at Rs. 170, *Andhra Valley* at Rs. 1,620 against Rs. 1,615 and *Tata Power* at Rs. 1,495.

*Miscellaneous.*—*Alcock Ashdown* are unchanged at Rs. 492-8. *Belapur Sugar* were Rs. 140, *Bombay Steam* Rs. 340 and *Scindia Steam* Rs. 20-14. *Shivrajpur Syndicate* were slightly better at Rs. 37. *Associated Cement* were Rs. 169 and *New India Assurance* Rs. 49-4.

## THE TELOIJAN TEA CO., LTD.

**The Twenty-first Ordinary General Meeting of the Shareholders of The Teloijan Tea Company Limited will be held at McLeod House No. 28, Dalhousie Square, Calcutta, the Registered Office of the Company, on Tuesday, the 30th June, 1942, at 11-30 A.M., for the following purposes:—**

†Includes Bonus of 5 per cent.

*(Half-yearly meeting, 30th June, 1942 at 11 a.m.)*

*Audited accounts for the half-year ended 31st March, 1942:—*

After allowing for taxation, including Excess Profits Tax, etc., there is a balance of Rs. 17,16,800-9-2.

There has been set aside for Depreciation Rs. 4,58,866-3-4, and a sum of Rs. 1,49,753-12-0 has been written off Investments, to reduce the Company's holdings to current minimum market rates or par value, whichever is the lower.

| | Rs. | As. | P. |
|---|---|---|---|
| Transfers have been made to:— | | | |
| Reserve for Revaluation of Stocks and Stores .. | 1,50,000 | 0 | 0 |
| Debenture Redemption Reserve .. .. | 2,50,000 | 0 | 0 |
| Reserve for Labour Quarters and Welfare .. | 50,000 | 0 | 0 |
| Indian Staff Pension Funds .. .. | 40,000 | 0 | 0 |

The balance remaining after giving effect to these transfers is Rs. 6,18,180-9-10, which, together with Rs. 1,59,725-9-7 brought forward from last half-year, gives a total of Rs. 7,77,906-3-5.

The directors propose that the balances available for distribution be disposed of as follows:—

| | | | |
|---|---|---|---|
| In paying a Dividend on 1st Preference Shares at the rate of 8 per cent. per annum, without any deduction for Income Tax paid by the Company .. .. .. | 46,000 | 0 | 0 |
| In paying a Dividend on 2nd Preference Shares at the rate of 5 per cent. per annum, without any deduction for Income Tax paid by the Company .. .. .. | 37,500 | 0 | 0 |
| In paying a Dividend on Preferred Ordinary Shares at the rate of 10 per cent. per annum, without any deduction for Income Tax paid by the Company .. .. .. | 21,875 | 0 | 0 |
| In paying a Dividend on "A" and "B" Ordinary Shares at As. 8 per share, without any deduction for Income Tax paid by the Company .. | 3,50,150 | 0 | 0 |
| In paying a Bonus on "A" and "B" Ordinary Shares of As. 4 per share, without any deduction for Income Tax paid by the Company .. | 1,75,075 | 0 | 0 |
| In carrying forward .. .. .. | 1,47,309 | 3 | 5 |
| Total .. | 7,77,906 | 3 | 5 |

The results of the half-year under review have been satisfactory and the Mills continued to work at full production. Labour trouble, however, occurred at No. 1 Mill, Titaghur, beginning 23rd March and lasting till 15th April, during which time most of the departments were on strike. It was possible, however, by the loyal co-operation of a few workers and the Mill assistants, Supervisors and Apprentices to keep two machines in operation all the time.

As pointed out in the last report, the wages of the labour are relatively favourable and, in addition, the workers enjoy the benefits of a Pension scheme, Co-operative Credit Society and a Welfare Stores at which foodstuffs are sold at cost prices.

The most serious loss in connection with the strike was the tonnage of paper wanted for Government and the War effort. Both Mills of the Company are now mainly employed in manufacturing supplies for Government and the Military authorities but at the same time the directors are endeavouring to meet the requirements of the old customers.

Early in January the Company agreed with most of the other Mills to fix maximum prices of the main qualities of paper. This arrangement was brought into being for a period of six months, on an all-India basis at the principal railway distributing centres. It had the full approval and assistance of the Commerce Member, Government of India, and in their opinion it will eventually prove to be in the best interests of the paper industry and the general paper-consuming public.

Manufacturing costs continue to rise due to the increased costs of raw materials, subsidiary raw materials, etc., and also chemicals, machine clothing, machinery spares, etc., which have to be imported. War conditions have created further difficulties, especially with regard to coal supplies, notwithstanding the assistance of the Railway Transport authorities.

A further sum of Rs. 2,50,000 has been set aside against the redemption of the present Debenture issue in 1946 and the equivalent of that sum is shown as invested in 5 per cent. Loan 1945-55 and the Company's own debentures.

In view of the further increase in stocks of stores and raw materials which the Company find it necessary to carry, it has been considered prudent to increase the Reserve for Revaluation of Stocks and Stores by a further Rs. 1,50,000. This reserve has been provided against a probable slump in stock values which ultimately may be expected. Rs. 50,000 has been allocated to Reserve for Labour Quarters and Welfare, whilst a further Rs. 40,000 has been allocated to the Trust Funds for the provision of pensions to Mill employees.

*Managing Agents.*—Messrs. F. W. Heilgers & Co.

*Authorised, Issued and Subscribed Capital*—Rs. 65,89,000 *in* 3,50,000 *'A' Ordy. and* 3,50,300 *'B' Ordy., both of Rs.* 5 *each;* 1,75,000 *Prefd. Ordy. of Rs.* 2½; 11,500 *8% First Cum. Pref., of Rs.* 100 *and* 15,000 *5% Second Cum. Pref. of Rs.* 100, *all fully paid up.*

Synopsis of the balance sheet as at 31st March, 1942:—

| *Liabilities.* | Rs. | *Assets.* | Rs. |

| Dividend amount .. | 60,000 | 45,000 | 45,000 |
| Dividend % .. .. | 10 | 7½ | 7½ |
| Carry forward .. .. | 28,076 | 20,108 | 22,471 |

*Includes Rs. 51,180, being Reserve for Taxation
†Includes Rs. 16,546, being Reserve for Taxation.
‡Ineludes Rs. 9,500, being Reserve for Taxation.

*(Annual Meeting held 18th June, 1942.)*

*Audited accounts for the year ended 31st December,* 1941:—

| | | | |
|---|---|---|---|
| After charging Manager's and Staff's Commission there is a profit on the year's working of Rs. 1,69,147-2-3 from which there has been deducted provision for Income Tax | | 51,179 | 10 0 |
| | | 1,17,967 | 8 3 |
| *Add*—Balance brought forward from last year | | 20,108 | 9 0 |
| making available .. .. .. | | 1,38,076 | 1 3 |
| which the directors recommend should be disposed of as follows:— | | | |
| Payment of a Dividend of 10 per cent. for the year to 31st December, 1941 .. | 60,000 0 0 | | |
| Transfer to Reserve Account .. | 50,000 0 0 | 1,10,000 | 0 0 |
| leaving a balance to be carried forward of .. | | 28,076 | 1 3 |

It has been considered desirable to increase both the amount transferred to Reserve Account and the amount carried forward in view of the possibility of difficulties being experienced in connection with the disposal of the current season's teas.

*Weather and Crop Outturn.*—Generally droughty conditions prevailed and although the allotted crop was exceeded it was not necessary to make such large purchases of rights as during the preceding year and the actual outturn fell short of the 1940 figure by 730 maunds.

*Expenditure*—showed a decrease of Rs. 62,110, due to the smaller quantities of rights purchased, the smaller crop harvested and to reduced expenditure on buildings and machinery. The reduction in expenditure would have been greater but for the higher costs ruling for all stores, particularly tea chests.

*Estimate for* 1942.—The estimate provides for a crop of 5,592 maunds of tea and the outlay is estimated at Rs. 2,13,132/- to which certain Calcutta expenditure falls to be added. The estimated yield will be subject to adjustment, following the recent allotment of export and internal quotas.

*Secretaries and Agents.*—Messrs. James Finlay & Co., Ld.

*Authorised, Issued and Subscribed Capital—Rs.* 6,00,000 *in* 60,000 *shares of Rs.* 10 *each, fully paid up.*

*Includes Rs. 18,000 being provision for Taxation.
†Includes Rs. 16,000 being provision for Taxation.
‡Includes Rs. 4,000 being provision for Taxation.

*(Annual meeting, 30th June, 1942 at 11-30 a.m.)*

*Audited Accounts for the year ended 31st December,* 1941:—

*Accounts.*—The season's working shows a profit of Rs. 91,717-11-2. After providing for Income Tax, Taxation Reserve and allowing for the carry-forward from 1940, there remains at credit of Profit and Loss Account a balance of Rs. 81,903-8-1 with which the directors propose to deal as follows:—

| | Rs. | A. | P. |
|---|---|---|---|
| Pay a Dividend at the rate of 5 per cent. per annum .. .. .. | 29,900 | 0 | 0 |
| Transfer to Reserve .. .. .. | 30,000 | 0 | 0 |
| Carry forward .. .. .. | 22,003 | 8 | 1 |
| Total .. | 81,903 | 8 | 1 |

*Season* 1942.—The original Estimate was framed on a crop of 4,109 maunds at an all-in cost of Rs. 1,94,158. A supplementary Estimate shows an all-in cost of Rs. 2,13,014 for a crop of 5,458 maunds which is the permissible crop with present releases. It is anticipated that the crop will reach this figure.

*Managing Agents.*—Messrs. McLeod & Co., Ltd.

* Taxation Reserve.

*(Annual Meeting, 29th June, 1942 at 10 a.m.).*

*Audited accounts for the year ended 31st December,* 1941:—

The result of the season's working is a profit of Rs. 13,11,729-12-9, which has been credited to Profit and Loss Account. After sundry adjusments there is a balance at credit of that account of Rs. 16,01,957-8-11.

*Dividends.*—Dividends on the Preference Shares were paid on 1st November and 1st May and interim dividends of 10 per cent. on the Ordinary Shares on 26th November and 19th February last, leaving Rs. 12,89,957-8-11 now to be dealt with. It is proposed to pay a final dividend of 52½ per cent. on the Ordinary Shares, making 72½ per cent. for the year, and to carry forward Rs. 6,59,957-8-11.

*Managing Agents.*—Messrs. Duncan Bros. & Co., Ltd.

*Authorised, Issued and Subscribed Capital—Rs.* 24,00,000 *in* 12,000 *Ordy. and* 12,000 6% *Cum. Pref., both of Rs.* 100 *each, fully paid up.*

Synopsis of the Balance Sheet as at 31st December, 1941:—

ISSUED WEEKLY

Vol. XXIX. No. 27 SATURDAY, JUNE 27, 1942 Price Re. 1

"HELP THE COUNTRY WHILE HELPING YOURSELF"

Never before in the history of a country or an individual was the call of INSURANCE more urgent and its necessity more vital.

And this war has made it imperative.

"INSURANCE is a double blessing." It protects and provides the individual while contributing to the economic progress of the country.

## WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

There is no change to report in money market conditions. Short credits have continued in super-abundant supply; in spite of the colossal drain on account of the large-scale sales of tender treasury bills, banks are experiencing considerable piling up of cash. The extremely slack conditions in the short-loan market and the swelling cash position of banks lend apt and timely support to the ways and means position of the Central Government. The defence loan was discontinued sometime ago, and, in view of the absence of any reassuring political news from any theatre of war, the time cannot yet be considered propitious for the launching of the third defence loan. On the other hand, the scale of expenditure is daily growing bigger and bigger. In such circumstances, it is a great comfort to the Government that the present money conditions make it possible for them to borrow as much as Rs. 8 crores per week in the form of treasury bills.

---

On June 23, Rs. 8 crores of tender bills were on offer; applications amounted to Rs. 16.99 crores. This is clear evidence of exceptionally keen bidding and, as is to be expected, the average rate of accepted tenders has shown further substantial decline to annas 12 and pies 5 per cent per annum as compared with annas 13 and pies 8 on June 16. The offer for next week remains unchanged at Rs. 8 crores. Considering that deposits maintained by scheduled banks with the Reserve Bank are now over Rs. 61 crores, we may be certain that bidding at next week's auction also will be quite keen resulting in a further decline in the average discount rate. In the first week of July, total treasury bill outstandings will reach the colossal figure of Rs. 70 crores.

---

Just as currency expansion since the war began seems to be unending the increase in the deposits of the Imperial Bank is equally unending. The latest figure of Imperial Bank's deposits is Rs. 132¾ crores. This has meant that, in spite of further investments in treasury bills for Rs. 65 lakhs, the cash balance of the Bank is nearly Rs. 1 crore up at Rs. 32.20 crores. The bank is, in fact, maintaining an unduly high proportion of cash; and, from this point of view, we have to repeat that the continuance of the weekly offer of tender treasury bills at Rs. 8 crores will be greatly facilitated by the high cash ratio of the Imperial Bank and its ability to apply for large parcels of treasury bills.

---

The return of the Reserve Bank for the issue department does not disclose any change of great importance except for a rather sharp rise in rupee coin from Rs. 25.56 crores to Rs. 26.37 crores. We cannot say whether this reflects a reversal of a trend that has been persistent for a considerable time or does this reflect the delivery of rupee coin or one rupee notes for say Rs. 1 crore by the Government to the Reserve Bank? In this connection, we may refer to the decision of the Central Government to issue two rupee notes. Is it possible that these two rupee notes are to be treasury notes and not bank notes? If so, may we infer that two rupee notes for Rs. 1 crore have been handed over to the Reserve Bank by the Government? We have to add, however, that two rupee notes cannot be considered the equivalent of coin unless a special notification is issued to that effect under the Defence of India Rules.

---

The return of the Reserve Bank for the banking department for the week ended June 19, shows a sharp rise in deposits of banks from Rs. 53.53 crores to Rs. 61.13 crores. The deposits of provincial governments are also higher at Rs. 6.13 crores as compared with Rs. 5.54 crores. The Central Government's deposits are slightly higher at Rs. 4.90 crores. On the assets side, foreign balances show a drop of nearly Rs. 1 crore at Rs. 62.53 crores. The Central Government have had to borrow over Rs. 3 crores from ways and means account, the latest figure of ways and means advance being Rs. 5.30 crores.

---

The fall of Tobruk has had a depressing effect both on giltedged and equities. For over a month, Government securities were a strong market with a persistently rising tendency. The two defence loans in particular were keenly bought; the first defence loan went over the redemption price while the second defence loan nearly touched par. 3½ per cent Rupee Paper was also ruling fully steady. The securities of the local bodies staged a sensational rise after the issue of the notification providing for the guarantee by the Central Government as well as local governments concerned for debentures of local bodies. Good preference shares also showed substantial gains. This optimistic feeling spread to ordinary shares also. Sugar and Cotton shares were specially fancied. There was altogether a definitely healthier tone and a more confident outlook in stock exchanges. This has received a setback from the developments in Africa. Whether or not this will prove short-lived depends upon the outcome of the battle of Egypt.

---

The closing rates are: Banks buy T. T. London Ready to six months forward at 1s. 5 31/32d.; banks sell T. T. London Ready to six months forward at 1s. 6 1/32d.

Banks sell three months D. A. bills for first and second months at 1s. 6 9/32d., and for the third and fourth months at 1s. 6 5/16d.

Money is easy with interbank call at ½ per cent.

Firms money for one to four months deposits is also ½ per cent.

Banks buy T. T. New York Ready at Rs. 329¼ for $100.

Banks sell T. T. New York Ready at Rs. 332¼ for $100.

## TREASURY BILLS

### India

Tenders for Rs. 8,00,00,000 (Rupees 8 crores) of three months' Government of India Treasury Bills were opened on Tuesday the 23rd June, 1942. Total amount offered was Rs. 16,99,25,000 (Rupees 16 crores 9 lakhs 25 thousand). Tenders at Rs. 99-13-0 per cent and above were accepted in full and those at Rs. 99-12-9 per cent were allotted approximately 47 per cent. Lower tenders were rejected. Total amount accepted was Rs. 8 crores, the average rate of accepted tenders being Rs. 0-12-5 (Rupees nil annas twelve and pies five per cent) per annum.

Tenders for Rs. 8,00,00,000 (Rupees 8 crores) of three months' Government of India Treasury Bills will be received on Tuesday the 30th June 1942 in Bombay up to 11 a.m. (Standard Time) and up to the close of business on Monday the 29th June 1942 at other centres. Successful tenderers should make payment on Friday the 3rd July 1942. Other conditions are as usual.

During the week ended the 19th June 1942 Government of India Treasury Bills for Rs. 2,33,50,000 (Rupees 2 crores 33 lakhs 50 thousand) were sold in favour of the Issue Department of the Reserve Bank of India.

**Thursday evening.**

THE reduced volume of applications for treasury bills in London last week cannot be interpreted as a sign of the usual seasonal scarcity. Banks and discount houses have no need to make any kind of show though they might assume that only a rate of 1 per cent could be deemed adequate for short loans. It is learnt that lenders were not keen on ¾ per cent but were willing to provide funds at one per cent. The Treasury's offer of £75 million in 3 months' bills elicited applications to the extent of £124 millions—a figure well below the average of £150 to £160 million recorded week after week. There is an established dearth of bills and a plenitude of oversea funds. The market got a better quota, mainly because of reduced applications. The Treasury has reduced its six months' deposit takings to £40 million this week because the position is easier through rising revenue and the flow of savings into war funds.

The Chancellor of the Exchequer referred only last week to the work of the National Savings movement. Voluntary, democratic and effective in every way, the thousands of savings groups under their unpaid organisers work out the financial strategy based on continuous and regular saving. At the outbreak of the war, said Sir Kingsley Wood, there were 42,000 savings groups with about a million and a half members. It was claimed that the movement contained 275,000 groups and 15 million members at present. Infinitely more potent than any co-operative credit movement, the British savings groups have extended from offices and factories into the streets. Street Saving is more common than street betting, and has a more striking history. The first group did not appear until 1940 but within two years roughly 10,000 groups had made good, and four million people began to practise thrift for their own good and the achievement of victory.

There are no questions about war finance because the correct policy has been adopted. The expansion of war production is the direct aim and Mr. Norman Crump of the "Economist" argues that the Cologne raid is proof of the rectitude of British financial policy. The savings movement takes off surplus spending power and puts needed money into the war-chest. Since only two-fifths of the war bill comes from taxation at present, the scope for borrowing is large. Not long ago Lord Kindersley revealed that £1,500 million had been provided by small savers. Hundreds of collectors collect weekly subscriptions for certificates going round successfully in good and bad weather alike and even on days when streets have been subject to the attacks of the *Luftwaffe*. Weekly deductions from wages are also common as part of a gigantic thrift movement. Big savers have certainly provided much more. They do not hang back when small savers are ready to subscribe. Since the war broke out, big companies and firms have subscribed about £2,500 millions. Mr. Crump estimates that four-fifths of the total cost of this war is covered and the remaining fifth has not proved a gap large enough to cause any serious inflation.

The fighting services take £9¾ million a day according to Sir Kingsley Wood who referred to a decline of half a million in the daily bill as compared with the figure cited in March. £84½ million per week and provision up till September. They are high lights of last week's 13-minute speech. The Commons have so far voted £10½ billions i.e., £300 millions more than the 1914-18 total. War costs up till now total £8,600 million but that does not worry anybody. The third year has not created financial problems like the second which drained dollars away and left Britain no option but to sell investments. The Government has sold a few investments since but at home. Only last December was its holding of Harland and Woolf stock sold off to the public in return for cash. The fact has been referred to in the usual estimates of new issues in 1941 which consisted almost exclusively of governmental borrowing. Home Corporation were elbowed out and the Crown colonies had no chance at all. The Treasury got the benefits of monopoly *cum* cheap money and this deserves to be remembered alongside of any reference to the enthusiastic response from the British investor.

The U. S. administration has fewer problems. The navy bill was big but the Army bill was bigger. Savings bonds sales in May went up over 634 millions. This week the legislature voted money—the biggest ever and the U.S.A. has got the money and the plan for the 4½ million Army of 1943. Concentration of funds precedes in every case the concentration of war effort to which the President has openly referred. The $47 billion bill is meant to give the U.S.A. the army for the Hitlerian war because her allies are mostly to be considered as ineffective without U.S. aid. The fact that $62 billions and odd have been voted already for the war proves that the original lease-lend appropriations of $13 billions form only a part of the bigger war effort. The Administration's effort to drop the silver programme is proved by Mr. Morgenthau's formal request to the U. S. Congress for authority to sell away part of the U.S. silver stocks to the United Nations. The silver bloc in the Senate represented by Mr. McCarran woke up and said that the Treasury must keep silver as part of the currency reserves. He declared that the silver might be kept in the States for non-consumptive purposes, which means, not for minting silver certificates which are just another form of heavy dollar notes, but for the maintenance of a U.S. silver reserve. Maybe the reserve will help after the war but the Administration wants to use the silver right now for its war plants. Silver is an industrial metal and it is wanted to replace copper as a conductor of electricity. Handy and Harman's review mentioned a lot of war uses for the metal in place of tin etc., now hard to get was listed. The W.P.B. wants to use the new mined silver bought under the Act of 1934 but Senator Thomas is still there, and he and the Western Democrats will not allow the Treasury to sell off its silver and go on the exclusive gold standard. The Senator asked that gold and silver should be kept to sustain the postwar position of the U.S.A. while the Treasury wants to use up for the war the idle silver, once bought to placate the Senators from Nevada and Utah and later to help China put her currency in order.

The strength of sentiment is to be seen as proof that the U.S. Treasury will not force silver prices down. The request made on Saturday last, and turned down promptly enough, should be treated as a depressing factor. Its being negatived is in reality good for the Indian holders of silver who will be always glad to learn that there won't be a big slump as in 1935 just because the U.S.A. has suddenly changed its mind. The silver bloc will not allow any change. Even if a few millions are not spent every year to buy home-produced silver, not at 35⅛ cents per ounce but at a higher price, the U.S.A. has obligations to Mexico and will have to buy silver. If the U. S. Treasury keeps its silver and buys some more silver for war purposes, there is an assurance that the Indian Government will have no rival seller. The point deserves to be noticed here since the Government is likely to sell silver in London whenever the circumstances there demand it. If no supplies from the U.S.A. are going to come in, silver prices in India will stay up, and this week curiously enough, silver has gone up. But that may be attributed to the fall of Tobruk and not to McCarran's victory.

The *Indian Trade Journal* has cleared up one point recently by producing a notification stating that commercial relations with enemy-occupied countries including Malaya and Burma are prohibited. It has been explained that even if no special notice appears, there is a ban on trade and all relationships with British territories now in the possession of the enemy. Since the whole of Burma is enemy-occupied territory, there is a complete ban on transfers and all remittances. Burmans cannot pay insurance premia or collect dividends due. Money due in respect of Government loans held by Burman investors must be necessarily kept in a suspense account and it is quite possible that the functions of the Public Debt Office in Rangoon already have been taken over by the Government of India. The ultimate liability in this case is that of the British Government and separation relieves the Indian taxpayer of worries relating to the destruction of assets and loss of revenue at a time when money is due. The local authorities have declared their intention of paying the interest due on their debentures through the Bank.

## Extra-Budgetary Funds

With the elimination of Burma notes from the returns of the Reserve Bank as from June 6, rupee securities for nearly Rs. 26¾ crores were withdrawn from the issue department of the bank; and these are now held in a separate suspense account of the Central Government. The securities thus making up the suspense account are, we may presume, partly Government of India securities and mostly 'ad hoc' treasury bills. To the extent that the account took over treasury bills, there may be said to be no corresponding tangible asset, unless, as in the case of the Reserve Bank, the treasury bills handed over to the suspense account are being renewed as they mature. But this is unlikely. As an asset, the suspense account created in connection with Burma notes has no great significance. But this account can have great value with reference to ways and means adjustments. In so far as 'ad hoc' treasury bills have been withdrawn in this connection from the Reserve Bank, they can be re-issued to the bank as and when the Central Government find it necessary to reinforce their cash position by this method.

The creation of account against Burma notes serves as an occasion for re-examining the number, nature and utility of other extra-budgetary funds. The most significant of such funds is that constituted for the avoidance or reduction of debt. According to a convention promulgated by Sir Basil Blackett eighteen years ago, a sinking fund was created with respect to Government of India securities. In terms of a formula which had reference to the total public debt as at the close of the last financial year, a contribution was being made from current revenues towards the avoidance or reduction of debt. In the emergency budget of 1931 however, this formula was given up; and the new provision was that a lump sum of Rs. 3 crores was to be set aside each year for reduction or avoidance of debt. This lump sum arrangement continues to this day. The most legitimate and proper use to which the sums accruing in this fund could be put is for the conduct of those open market operations whose purpose is to give spirit to the giltedge market when the occasion demands it and generally, whenever there is undue sagging of prices owing to temporary causes. We are not in a position to know whether the sums left over after payment for the securities purchased from the open market are added on to the balances of the previous year and thus constituted into a growing permanent fund. But a point to note in this connection is that there is definitely a sum of Rs. 3 crores available every year for utilisation in connection with open market purchases.

In the next place, we may refer to the silver redemption fund. When, at the time of the inauguration of the Reserve Bank, the paper currency reserve and the gold standard reserve were amalgamated, it was decided to set up the silver redemption fund with total assets for Rs. 10 crores to be held in the form of sterling securities. If we remember aright, the interest on the securities is to be credited to current revenue; but the fund itself continues to be held in the form of sterling securities for Rs. 10 crores. For all practical purposes, this is more or less a dead fund. The real idea of this fund was that the purpose for which the gold standard reserve was created originally must be continued. The gold standard reserve was formed out of the profits of coinage. And, against the contingency of return of rupee coin and the necessity, in such circumstances, to write off the difference between the nominal value of the coin and the bullion value of the coin, assets for £40 million in sterling securities were accumulated in the gold standard reserve. When the gold standard reserve was merged in the issue department of the Reserve Bank, it was thought advisable to maintain a fund against the contingency originally provided for in the setting up of the gold standard reserve. From this point of view, the silver redemption fund at Rs. 10 crores serves only a token purpose.

There is, thirdly, the suspense account with regard to rupee coins. This account has also to do with the creation of the Reserve Bank. Under the Reserve Bank Act, the rupee coin to be handed over to the Bank at its inception was for a total of Rs. 50 crores. The rupee coin held in the paper currency reserve was very much more than Rs. 50 crores. The surplus over Rs. 50 crores was transferred to a suspense account from which silver has been sold from time to time. Addition to this account were made in some years by the Reserve Bank delivering rupee coin for Rs. 5 crores to the Government whenever the Bank felt that its stock of coin was much more than Rs. 50 crores. The rupee coin originally handed over to this suspense account was possibly in the neighbourhood of Rs. 40 crores.

Further additions were to the extent of Rs. 15 crores. We have no definite information regarding the amount of silver sold from this account. Nor of coin delivered to the Reserve Bank since the war began. We may, however, make a guess and hazard the estimate that the present assets in this account may be of the order of Rs. 20 crores. This is an extra-budgetary fund which is of great value to the ways and means budget.

With the creation of one rupee notes, these one rupee notes being treasury notes and not bank notes, silver notes printed from time to time and delivered to Reserve Bank are as good as a ways and means device for replenishment of the Central Government's cash resources. One rupee notes have, therefore, a welcome value as an extra-budgetary source of cash.

The Government have, besides, their investment reserve which is linked with temporary makeshifts in connection with cash balances.

Railway Reserve Fund and Railway Depreciation Fund are other extra-budgetary funds whose value would have been great in connection with open market operations if they had been maintained as separate entities. The balances in these funds are deposited with the Central Government who act as bankers to the Railways; and they have significance only in reference to the general ways and means picture of the Government of India.

The same remark applies to the accruals in the various provident funds connected with some of the government departments. Their real value is to the general ways and means budget.

Till a few years ago, the Central Government had hardly any extra-budgetary fund of importance. During the past decade and a half, various funds have been set up and increasing amounts have been credited to these funds. There are also other funds recently created like the cotton cess fund and the war risk insurance fund. The resources of all these extra budgetary funds are now in excess of Rs. 100 crores. And if these resources are not merged in the general ways and means adjustments of the Central Government but kept as separate funds, the Government of India should be able to count upon quite impressive resources for an effective and elastic open market policy. With the great improvement that has taken place in monetary technique and with the constant employment of such technique in connection with the planning of defence loans on the cheapest interest basis, there is not only a great opportunity but a continuing and imperative need for an effective and confident open market policy.

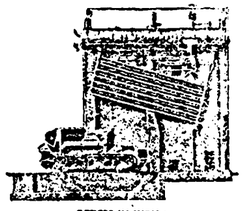
## PRICES AND PROFITS

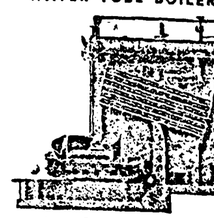
Every week brings its control order or at least the amendment of one previously made. If there is not one, there is something else, the application of some order previously made by the local government interested. Such is the pressure of demand for goods and its immediate effect on prices that one is reconciled to the measures adopted to break the vicious spiral of prices and wages, for we have seldom been allowed to forget that wages must follow prices and also reminded frequently that gold or its modern equivalent money is a factor in the peculiar set-up which has provoked the feeling in many places that price control is a failure in India. The judgment seems sweeping, on the face of it, for we have been taught that five conferences have produced unanimity of opinion and the governments of all Provinces are set on conserving supplies, regulating prices and abolishing the bottlenecks in distribution. A new official has emerged already in certain Provinces with the designation of Civil Defence Commissioner or Controller of Civil Supplies though it is certain that these can have no definite connection with the Civil Defence and Supply departments of the Central Government.

Control is carried a long way. Valiant attempts are being made to prohibit speculation under the terms of the Food Grains Control Order. But the price of wheat stays up, and the difficulties experienced in regard to sugar make it certain that black markets exist, and must grow, when control is difficult. There is nothing unusual about black markets. Abler bureaucracies, in Germany and Japan for example, have failed to suppress them as the major reason for their growth is the inequality of incomes. So long as taxation of the rich is light, there will remain the inducement for the profiteer to charge what the traffic will bear, that is to say, ignore price control and conclude bargains without reference to the requirements of the wider class of consumers. The problem appears to be acute in Madras, and has been examined from various angles, only to reach the uncomfortable conclusion that it is not possible to arrange supplies so as to provide all goods at controlled prices, mainly because the ideal of regional self-sufficiency has not been given up. Various provinces have started prohibiting the export of this or that commodity; others may still explain all difficulties in terms of wagon shortage; but many refuse to be convinced that except for an article like salt, produced under conditions of monopoly, there can be no systematic regulation of prices. Bengal, for instance, has fixed maximum prices for rice in the hope that the rise in retail prices will be checked soon and the food supply position eased. Though it is not inapt to connect price control with the 'grow more food' plans, it is certain that the limited success of the former is, in many ways, a guarantee for the success of the latter.



The requisitioning procedure and the anti-hoarding measures adopted as regards wheat in the last three months produce the impression that the end of forward trading did not mean the end of the advance in prices. Apart from the crop position and the exportable surplus, available at present there is the delay in regard to licenses and chronic shortage of wagon space. Many have argued that the problem of price control is in reality one of inland transport and felt impelled to discuss the benefits of canal navigation and road transport. But neither offers an easy remedy and the most obvious remedy, one of giving priority to specified goods has been tried without much success except perhaps in the case of salt. It is not necessary to speak about the critical position in respect of sugar that has enforced the adoption of an export ban in Bombay. Control of retail prices has been practised with indifferent results since the price fixation scheme is not getting full support and registered dealers are unable to obtain supplies. Why the Sugar Syndicate was divested of its previous functions in regard to quota releases, and not turned into a regular whole-time selling agency, is difficult to understand.

The general presumption that price-stops will not by themselves check the rise in the cost of living is warranted by Britain's experience. But in the Dominions price control has worked since all retail prices are regulated and sales taxes are a check to private hoarding. Whether rationing enters into the schemes of price control in force or not, it is manifest that the procedure adopted as regards pneumatic tyres cannot long remain isolated. The control of prices is a minor consideration under such conditions and there is no difference between the tyre rationing order and the export ban on wheat in the Punjab and that on rice in Bombay, both of which are meant to make the most of avilable supplies. More recently, the difficulties in regard to food supplies and the price-level are viewed as the consequence of purchases for oversea markets. Government or its protege like the U.K.C.C. is allowed to buy and ship without regard to immediate internal requirements. High prices ruling elsewhere act as an inducement to buy and export—such purchases having a direct effect on available wagon space at the same time as they reduce available supplies. It is certainly possible to connect sales of sugar to Government with the inability of Deccan sugar mills to sell as much as they should or could. The incompatibility of the two policies —that of satisfying various needs of the Middle East and that of keeping supplies up and prices down,—will be grasped without any reference to the amount of free purchasing power available through the cessation of coin hoarding.



Though successive increases in the deposits of scheduled banks will naturally suggest that idle money goes into banks, and not into goods, mention must be made here of the scarcity of goods caused by import control. The demand for Indian-made goods is necessarily enlarged by a local shortage of foreign goods. While private spending is not cut down to any extent, the immediate result is an enhancement of prices for locally made goods. Every rise in the prices of imports whether due to the new surcharge or higher freight, has its effect on prices of home-produced goods. No elaborate argument is needed to show that because the average value of imports is higher this year owing to the partial failure of overseas supplies the price structure in India has been radically modified. In schemes of price control in force this consideration is not ignored but altogether the fair selling price is seldom acceptable to producers (is usually modified on protest). And control is not applied to articles mainly destined for export such as tea or gunnies. It is known that Canada does not extend the control of retail prices to the purchases made by the Munitions and Supply Ministries. Agricultural products are also exempt and this will be cited to prove that there is no need to control prices of foodstuffs in India when rises and falls are due clearly to transport difficulties which are beyond the control of traders. The case for control, however, rests on other grounds, and if it has not been applied to cloth so far, it has been distinctly successful in the case of matches. What is perhaps the distinctive feature of the Canadian system of price control is the extension of the principle of representation of producers from marketing boards to a co-ordination of service.

A general rise in retail prices has been recorded this month, yet the discouragement given to shopping has not been considerable. The ideal of austerity recommended for South Africans by Mr. Sturrock does not appeal to India since the present level of consumption is low, and any contraction of previous demand may affect both business and employment. The latter consideration necessarily must be dealt with in relation to price control. Representatives of business work with the Supply Department; they are not associated with wheat and other Commissioners. That supplies are regulated by the new Commissioners has given little satisfaction since no economies or simplification has been secured in the matter of distribution. And wage increases have occurred at this time independent of the price control measures. The divergence from Dominion practice can only serve to indicate the shortcomings of Indian policy which has failed to promote saving in the sense that net sales of Defence Certificates in March are reported to have brought only Rs. 2,24,000. It appears that up to the end of March only Rs. 105.85 crores had gone into defence loans, etc. in the course of twenty-two months, and of this total, a considerable part represented conversions of the 3 per cent 1941 loan and the 5 per cent 1940-43 loan.

The argument that bank deposits have risen in the same period will be countered by reference to such facts as realisation of dollar securities and repatriation of capital. On the other hand, it may be suggested that recurring additions to currency have fomented the advance in prices and Government, because it failed to clap higher taxes at the proper time is largely responsible for the situation. The situation may, however, be due to the de-hoarding of capital. The previous deprtsion in commodity prices was precipitated by hoarding. The more recent rise is precipitated by the return of hoarded money. The theory finds some support in tthe recent improvement in share values. It is convenient, in the sense, that no estimate is possible of money drawn out of the towns by panic and now coming back. That it seeks commodity markets rather than giltedged is due, not to any general sense of insecurity, but to the belief that commodities are a good hedge (better than bullion even) against inflation and war risks. If the fear of inflation disappears, the problem of price control will be easier. The correction of inflationary tendencies appears to be largely a question of diversion and assignment of resources. For that alone work must be done for its own sake. But opportunity for private profit persists in the war period, and the contrast between the Dominions and India must be borne home to that minds of those who are always talking of what has been achieved elsewhere by the fostering government and what has not been done by the apathetic government here.

### Mill Consumption

The total consumption of Indian cotton for the eight months ended April, is known to be over 2.6 million bales. The extra-factory consumption may be ignored in this connection since the statistics include unpressed cotton as well. Total consumption in April was almost 300,000 bales in spite of the higher absenteeism reported by Bombay mills. The April figures reveal a fall in the cotton taken by Bombay mills as also Bengal mills. The mill consumption was actually lower than in April 1941 but consumption in Indian States was somewhat larger than in April last. Consumption in the eight months showed an enlargement of intake in all provinces except Bengal. Among the States, Indore shows the largest consumption at 105,695 bales for eight months. The increase is over 240,000 bales in the eight months of the cotton year 1941-42. The percentage increase is over 10 percent and the switch-over to long staple along with a drastic curtailment of short staple may be enough to balance supply with mill demand. The calculation is not without its effect on the cotton market where a spirited recovery has been seen this month. The fall in Indian exports has been followed by an enlargement of home consumption which is one reason why the last crop forecast while showing an estimated out-turn of 5,980,000 bales, against 5,903,000 bales in 1940-41 has had very little effect on Bombay prices. The increase in night shifts and the reflux of mill workers have latterly produced the impression that British India's mills will take more cotton than the 250,435 bales taken in April.

### Strikes In April

Industrial disputes in India are usually chronicled in the monthly Bombay Labour Gazette. The disputes reported in March and April suggest that the decline in strikes etc. reported last year does not hold. Much news of industrial unrest is necessarily excluded from the daily press, and one must turn to the Gazette to learn that tea labourers in two Sylhet estates struck work because they refused to volunteer for the Manipur Road Project. The disputes were settled, but they are certainly indicative of the acute unrest produced by events in Burma. Disputes in Bengal were more numerous and important, but a settlement was effected in nearly all cases. Municipalities too found employees not unprepared to strike. The usual demand for a dearness allowance figured among the causes of the strikes. The cotton mills in Delhi were affected by strikes but the Madras mill strike ended on April 6 as the management issued a notice that the Buckingham and Carnatic mills would resume work. Shortlived disputes occurred in Cawnpore mills, and only one strike was reported from the Punjab. In Bombay alone, 28 disputes involving 31,659 workers were reported in April and 250,942 working days were lost. The General Motors strike was settled in April but various mills experienced trouble over changes in shifts, demands for bonus and dearness allowance of 20 percent in one case. The stay-in strike in the G.I.P. workshops resulted from a demand for evacuation advances. In one strike dock labour was involved and the police firing led to more than local and temporary unrest though the Bombay workers resumed work on an assurance that an impartial enquiry would take place and all grievances would be redressed. The main dispute has anyway ended in favour of the employers. There were five strikes in Ahmedabad and handloom factories in Sholapur reported trouble over a demand for higher wage rates. The Thana match factory gave in to a demand for a bonus and the confectionery concern at Vile Parle was involved in a strike which continued into May though many workers had returned to duty by then.

### Reduced Revenue

The decline in British Indian customs revenue is clearly a mark of the fall in imports. As the April trade returns showed clearly seaborne imports continue to fall under the influence of fresh restrictions and the shipping shortage. The customs surcharge does not enhance the gross yield for it appears that revenue in both April and May was lower than in the corresponding months of 1941. The total sea and land customs revenue in May amounted to Rs. 2.68 crores against Rs. 3.04 crores in April and Rs. 3.84 crores in May, 1941. As noticed on previous occasions, the yield of Central excise duties has shown improvement. The total for May is shown as Rs. 95 lakhs against Rs. 84 lakhs in May, 1941. Total customs and excise revenue for April-May is Rs. 7.49 crores against Rs. 9.05 crores in the same period of 1941. Import duties provided Rs. 5.07 crores and export duties gave Rs. 44 lakhs. Central excises produced Rs. 1.77 crores. The customs revenue figures point to a decisive shrinkage in imports of cotton and other textiles, kerosene, dyestuffs, betelnuts, vehicles, silver and tin. The decline in imports is clearly a result of the extension of the war in the East though the fall under motor vehicles may seem surprising in view of th increase recorded in the value of imports in 1941-42. The customs revenue returns disclose a fall under the export duty on raw and manufactured jute as also in the excise on sugar as compared with 1941. The decline in revenue is explained, but compensation to some extent is provided by the higher yield of the duties on motor spirit, matches and kerosene. The larger revenue from import duties on tobacco, raw cotton, fuel and lubricating oils and motor spirit is indicative of the changes in foreign trade still going on.

### After the War

Ideas concerning economic arrangements after the war are not peculiar to statesmen. Mr. Wallace may talk of the common man's freedom and Mr. Soong of economic justice and political freedom in conjunction but the general outline is hazy as ever. The Federation of British Industries produced its plan of an ordered world and Lord Keynes discussed the post-war future of export trade. Neither of the reported summaries indicate any great change in structure or policy. Prewar stability is the ideal. The Atlantic Charter left things vague, and the international agreements concluded since then naturally suggest that radical changes are not envisaged. Freedom of enterprise is held desirable, and whatever may happen to the coal mines, the general opinion remains strongly in favour of the restoration of prewar freedom. The view is clearly shared by Sir G. R. Clarke who, in his presidential address to the sixtieth annual meeting of the London Chamber of Commerce asked that the maximum benefit should be obtained from whatever new conditions will prevail. He dealt with the place of private enterprise in the postwar future and went on to say that there are certain economic activities which by their nature must be monopolistic; there are others which could be made so with advantage, and in such cases, it is difficult to defend private ownership working for a profit. But concession to State ownership and control is accompanied by a warning against bureaucratic management. Sir Geoffrey has indicated that initiative, decision, etc. will call for the restoration of private enterprise, and this, he added, applies especially to international trade. In peacetime there is another reason why Government should be out of international trade. Even when private enterprises were competing for contracts abroad, national prestige was felt to be involved. If, however, in the future, said Sir Geoffrey, governments were in competition such feelings would inevitably be heightened in the most undesirable manner. He declared that the State should determine broadly the directions wherein our economic resources should be employed and should look to private enterprise to produce the desired results.

This authoritative view will certainly find support in India where the profit motive is respected and nourished. If the tradition of State management is stronger here, it is admitted that in the export trade, the interests of established shippers should be recognised. The war has led to a contraction of business, and normal recovery should be made possible after the war. That, in the main, is the case of business interests which at present object to the privileged status of the U. K. C. C. in its vast operations. The readiness to run risks is a characteristic of private business which must help in winning and keeping new markets after the war. Sir Geoffrey Clarke's views will prove acceptable to all who argue that free trade under happier conditions will make for general prosperity. The divestation of functions in the shipping and shipbuilding industry is clearly anticipated, and Government, whatever be its keenness on trade pacts and healthy competition, cannot dissent from the view that foreign trade must be left to private interests.

### Prices in Calcutta

Enquiry into the changes in wholesale prices stops with an examination of the effects of short supplies and transport difficulties. The supply position is unimportant as compared with the monetary factors at work and the tabular analysis provided in the "Indian Trade Journal" only two weeks ago, illustrates clearly the main changes noticed in Calcutta. The general index has risen from 155 in January to 169 in May. The series of index numbers constructed with the year ending July, 1914 as the base, proves that the war period has seen a great rise in prices. Prices are far above the level of December, 1939 and it is only necessary to add that the average of the general index rose by 19 points to 139 in the course of 1941. In spite of a fall under cereals and pulses, as compared with December last all foodstuffs are dearer to judge by the advance in wholesale prices. Only raw jute and cotton are below the July, 1941 level. An increase of 50 per cent. under wool and silk has been recorded since December, 1941. The increase in prices is least pronounced under metals, while hides and skins have actually receded. But that has little meaning when leather goods are costlier. No change is to be seen under building materials but other raw

materials and manufactures have risen in the wake of oilseeds etc. The main changes in Calcutta hold good of the country. If jute manufactures have gone down as compared with November, 1941, the tea index shows a strong lift in prices. The advance of twelve points in the wholesale price index during May is clearly due to a rise in the price of grain and pulse, sugar, tea, and other food articles. There has been no considerable change in the prices of raw materials during this year so that the rise in the wholesale index would have had a direct effect on the cost of living. The stability of cement, steel joists and hides are of little consequence for the wage-earner who hopes that the Defence of India Rules will save him from the profiteer. Fluctuations in hessian and shellac again are of little interest as compared with the further rise in copra prices after April. The quotation at Cochin rose by over 30 per cent. because the loss of the Philippines was by then an established fact, and the market soon came to remember that the world's largest exporter of copra was the Philippines. The equally pronounced rise under coconut oil is independent of the rise in groundnut and castor oil at the same time. What is now obvious is that kerosene oil alone has not gone up in price, but that all vegetable illuminants recommended officially have gone up. The usual chart does not at all portray the course of sugar prices after the twelfth of April. Perhaps it is imagined that the control order arrested the rise recorded in March and the matter needed no attention although the rise in Calcutta during May attested by a rise in the index number as well will suggest a different conclusion.

### Mixed Crops

What mixed cropping is and what its objects are can only be understood in relation to agriculture in areas dependent on rainfall alone. The principal of the Agricultural College, Combatore, discusses in "Indian Farming" the importance of keeping up the cultivation of millet, pulses, oilseeds and fibres in dry tracts which constitute over 80 per cent. of the total area under crops in India. Intercropping is familiar enough and scientific investigation has shown that there is a marked advantage in growing mixed crops of grain and wheat on soils where combined nitrogen is a limiting factor. The current preference for more millets in place of oilseeds should, however, be viewed as dubious since most experiments at the Cotton Breeding station, Coimbatore indicated that the mixing of pulse with jowar does not benefit either the millet or the succeeding crop of cotton. The pulse reduced the slow yield of millet though it is often suggested that the legume makes for a better fodder. Other experiments suggest that mixed crops always give the highest return. Though it has been said that mixed cropping is slovenly high authority can be cited to show that traditional practice has vast advantages. One is that it is an adequate form of insurance against crop failure. Experiments in Greece have indicated that the yields of the mixtures were much less variable than those of single crops. Mixed cropping from the average ryot's point of view leads to a saving in both land and labour. Farm accounts needs to be examined carefully to show what is the net gain under such conditions. There is, of course, the point that a crop on the ground is better than a fallow. Catch crops have their justification. From the point of view of fodder there is everything to be said for mixed cropping. Trailing crops like horsegram grown along with cotton or millet help to prevent soil erosion. In the Punjab certainly pigeon pea is regarded as protection against hot winds. Border crops act as protection against stray cattle and in most provinces the great millet has an additional use as a trap crop, for instance, in sugarcane fields. In respect of questions raised by the prevalence of mixed crops extensive research has been promised, and the main conclusion is apparently in favour of existing practice. Even in pastures a mixture is invariably preferred, and legumes in pastures act as a check on the growth of weeds. In many tropical countries the mixture of field crops is quite common, and the advent of commercial crops has generally made it necessary to conserve soil fertility by the sort of rotation obtainable under mixed cropping.

**NORTH WESTERN RAILWAY**

Tender No. 223-S/1/7, Code word "CHARGE," for miscellaneous stores are invited on a rupee basis for purchase by the N.-W. Railway of Baskets of toot and pilchle, Bath bricks, Maida, Molasses pure, Gharras, Mutts, Soorahies, Gum Arabic and Tags cotton required during 1st November, 1942 to 31st October, 1943. Tenders to reach office of General Manager by 14 hours on Tuesday, the 4th August, 1942, and will be opened in office of Controller of Stores, Lahore, at 11 hours the following day. Tender forms can be seen at and obtained from office of Controller of Stores, from 15th June, 1942. The sale price of tender is Rs. 2 plus As. 8 for 4 specifications or Rs. 2-8 for Tender with a set of specifications. As. 8 will be required for posting and packing of documents to outstation.

SAVINGS BANK DEPOSIT ACCOUNTS.—Sums of Rs. 300 and over accepted at 1 per cent. by transfers from Savings Bank accounts, subject to three months' Notice on withdrawal. Rules on application.
W. G. GROUNDWATER, General Manager

### Oriental Results

War has not apparently caused any difference to the serene majestic progress of the Oriental Life Assurance Company, Limited. As the Annual Meeting this month has shown, there is no event of equal interest to Indian insurance men, and the report presented to the shareholders is certainly of surpassing interest to policyholders as well. The new business hardly reflects the setback experienced towards the end of the year. In the last year the Company issued 37,067 policies assuring Rs. 816¼ lakhs in the aggregate. The increase over 1940 is apparent also in the higher average value of the policies issued in 1941. Sir P. Thakurdas rightly attributed the increase in new business to the disposition evinced by many to seek additional cover at present and to the strong faith developed by others in insurance as an investment. The increase of Rs. 67¼ lakhs in new business is not the only feature of the 1941 report. Premium income rose to Rs. 384 lakhs showing an increase of about Rs. 11¼ lakhs on the previous year. Claims for the year took Rs. 167.16 lakhs and added to outstanding claims are shown as responsible for an outgo of Rs. 172.11 lakhs. The Company's Chairman anticipates an increase in claims by maturity while the ratio of deaths to that anticipated by the Company has been seldom large. The Company's mortality experience should continue to be favourable despite new war risks for civilians according to the Chairman who examined the outlook after reviewing the results. The Company's total revenue was over Rs. 4.99 crores. The surplus of receipts is responsible for an addition to the Fund of over Rs. 2 crores in 1941. The most notable feature of the report is the fall in the expense ratio to 19.6 per cent. despite the need for A.R.P. expenditure and certain additional expenses. The report as usual refers to the higher value of stock exchange securities. The internal reserve held by the Company is larger than ever at Rs. 327¾ lakhs. The reduction effected last year in the proportion of terminable government securities may not be without effect on the increase over book values. As the Oriental held a lot of steriling stock prior to the repatriation scheme there is a good reason for the increase in its holding of rupee securities. The Company is clearly among the largest holders of government securities even after the change in the Articles which permit the buying of shares etc. for investment purposes. The Company has bought the new defence loan and made donations to war funds, but it is clearly conserving its resources in the war period. Though the loss by enemy action so far is negligible, the loss of business like the possible increase in claims arising in Malaya and Burma, has to be considered. Sir P. Thakurdas in his speech to the shareholders indicated that the policyholders always have the first claim to consideration and he entered a mild protest against the 'no bonus in wartime' recommendation. The Oriental Chairman's view runs counter to that of the Insurance Advisory Committee and is interesting for that reason. It is not strange doctrine at all. Efficient and strong companies can afford to pay bonus and make sure of further progress in the future. Policyholders have good reason to feel pleased with the attitude adopted by the Oriental which has retained all the advantages secured by a sound policy and vast resources. The balance-sheet is drawn as usual to convey an adequate idea of the position of the premier Indian Life office.

### Successful Scheme

The success of the Coffee Control Scheme was described at the fourth meeting of the Coffee Market Expansion Board. Prices had been maintained well above expectations and 'pool' coffee, that is to say, the crop not sold for export or internal consumption, had paid dividends to planters who had limited sales to 40 per cent. of the crop. The most important decision reached at the meeting last week relates to the surrender of the entire coffee crop this time to the pool with the result that prices and supplies for export as well as internal consumption would be regulated by the Board which asked that estates of 5 acres should also be brought into the Control Scheme. It is clear that there is a radical difference between tea restriction and coffee restriction because the free market in tea survives—and prices keep rising—and the Board in the case of coffee aims to release quotas as and when needed in the interests of the grower. Since the loss of Java it is obvious that Indian coffee has a bigger market in the Middle East but the Coffee Market Board has decided that for the current season, at any rate, no more coffee would be sold for export so long as the internal demand for coffee continues strong. Additional supplies have been promised from the pool holdings by the regular sale every month of the Board's present surplus. The effect on prices should be healthy and the coffee grower will not suffer since the return on the surplus will be larger than anticipated. The Board has not decided to fix wholesale prices. In this respect coffee will be like tea. Prices have risen in both cases this year because of the improved export demand. Coffee companies should do better than in the past and in spite of the original lack of enthusiasm for the Control Scheme, it is now realised that the Board has successfully grappled with the situation arising from the loss of European markets. Propaganda work will continue since Rs. 1½ lakhs has been allotted for India and £2,000 for work in England where tea rationing gives Indian coffee a bigger chance. A new scheme for investigation into the quality of Indian coffee will be financed by a grant of Rs. 10,000 approved by the Board which has a new Honorary Controller in Sir F. E. James. Dividends paid out of the pool sales of coffee have been large as the 1940-41 stocks were sold steadily and in the subsequent year as much as 5,800 tons had been sold to foreign markets. The U. K. alone has taken 2,840 tons of coffee in 1941-42 and the balance available is meant to satisfy India's own needs. The Board borrowed money to pay planters for the coffee taken into the pool. At the meeting the propaganda campaign like pool sales was discussed. In Britain stores and canteens are taking kindly to coffee. In India new coffee houses have been set up under the Board's auspices at Calcutta, Lucknow and Benares.

Writing immediately after the publication of the preliminary report of the American Technical Mission, I expressed the view that the report fulfilled the high hopes, which we were justified in building in view of the impressive credentials of Dr. Grady and his colleagues. It is curious that Indian industrialists have not so far committed themselves one way or another with regard to their attitude to the recommendations of Dr. Grady. To start with, the Indian industrialists were disposed to view with suspicion the activities of the American Mission; and it is difficult to say whether the report, as now published, has completely eradicated this suspicion.

Nor has the Indian press accorded anything like an enthusiastic welcome to the proposals of the Mission. So far as the general public in India are concerned, their attitude is one of apathy and indifference, as is usual with regard to questions of economic and financial import. The Government of India, on their part, have taken action which is more in the nature of damning the report with faint phrase.

It is only after this lukewarm reception accorded by the Government to the report, that the Indian public and press seem to have woken up to the great good which the adoption of Dr. Grady's proposals will do to the rationalisation and expansion of Indian industries.

While the general reception to Dr. Grady's proposals has thus been lacking in enthusiasm (due, in my opinion, to age-long inertia of outlook and aspiration on the part of every interest in this country), it is gratifying to note the correct lead given by a veteran practical economist like Sir M. Visveswarayya.

There is a special weight and authority that attaches to the views of Sir M. Visveswarayya. To him belongs the credit of inaugurating the steel industry in the Mysore State. He was responsible for laying the foundations of industry in Mysore, on which Sir Mirza Ismail has built an imposing structure. After retirement from the dewanship of Mysore, Sir M. Visveswarayya has been associated with the Tata Iron and Steel Company as a director. More than anybody else in India, he has studied the possibilities of the automobile industry in this country. Economic questions have always engaged his special study; and his views on economic planning are embodied in a thought-provoking book.

Presiding over the quarterly meeting of the All-India Manufacturers Organisation, Sir M. Visveswarayya utilised the occasion for some plain speaking with regard to the attitude of the Government, political leaders, industrial leaders and the general public towards Indian industries. He blames the Government for persistence in their time-worn traditions and old-fashioned methods to the detriment of the material interests of this country's population. Industrial leaders in India are not accustomed to take risks to the extent their compeers do in other countries, owing to the uncertainties dependent upon political subjection.

As for the general public, he points out that they have been long accustomed to crave for political and economic concessions from the Government. The Government, in their turn, appoint committees or make long enquiries and end up by granting one concession out of perhaps ten asked for. The people are not used to persevere till the remaining nine are also granted. Being accustomed to these disappointments, they have developed a defeatist mentality in such matters. This is, doubtless, the reason why, with regard to industries, the public do not give the amount of attention that the occasion demands.

The same defeatist mentality affects the industrialists also who are slow and apathetic, because their enthusiasm is damped by the Government not taking them into their confidence and by the delays and discouragements which have been their lot in their efforts to advance the cause of industry.

In such circumstances, Sir M. Visveswarayya feels that the recommendations of the Grady Mission are just the cure to the apathy and low tempo with which Indian industries are afflicted. He makes an appeal to the Indian business community to take advantage of the presence of the technicians, whom the American Government propose to send to India, to improve the business methods of leaders and managers and the working capacity of our labour population.

Sir M. Visveswarayya lays special stress on the Yankee capacity for organisation and hustle. My readers will recall that, in connection with what India can learn from American methods, I emphasised that the American way of expanding industrial establishments and setting up new ones had a unique tempo of its own.

'M. Marilo has written a pamphlet entitled 'A short war through American in-

dustrial superiority', and the following comment appears in the 'Saturday Evening Post' on M. Marilo's experience:

He (M. Marilo) has seen the American way of new plant construction, the steel frame going up while the ground was being levelled for the flood, he has seen an aluminium plant that was started in November producing aluminium in May, whereas in Europe it would have taken eighteen months to do it; he has seen heavy electrical machines made, delivered, installed and working in ninety days, whereas in Europe they would need a year; he has seen an airplane-engine factory covering fifty acres of ground, with a capacity of 1,000 engines a month, built, tooled, manned and brought to production in 193 days; he looked at a hill on what they told him was the ideal site for an electro-metallurgical plant, and it made him gloomy to think how long it would take to remove the hill; a week later he looked again and the hill was not there, but in place of it the beginning of a metallurgical plant, and he could hardly believe his eyes—'this being made possible' he remarks 'by the big power excavators which at the same time carry away the soil, the trees and the rocks'.

He adds: 'Nothing of this kind exists in Europe'.

The same point is emphasised by Sir M. Visveswarayya who, as an example of American style of speed and thoroughness, quotes the following achievement of American troops building their camp in Australia:

"The United States Army is giving Australia something to talk about by pushing on at bewildering speed the job of settling down their forces.

In less than 24 hours a paddock where sheep had been quietly browsing became a city of huts and canvas, with an army in possession and everything complete—even to the installation of electric light in each tent and building.

Carpenters, plumbers, road-builders and electricians descended on the paddock like a swarm of grasshoppers. Within the first hour they had pegged out roads and blocks, and inside four hours the framework of the buildings was up. In six hours from the start, they had a permanent water system installed, with hot and cold water laid on to the bathroom.

**"V" FOR VICTORY**

Help your country by reducing your journeys

TRAVEL ONLY WHEN YOU MUST

Only eight hours had passed when electric light was on in tents and buildings and there was a complete drainage and sanitary system. And the camp had been interlinked by radio and telephone communication.

Within 12 hours an army had moved in to occupy the camp finding their cooks waiting for them with hot meals.

By then, the carpenters, plumbers, road-builders and electricians had packed up and were on the move to the next job."

I have myself had experience of American hustle in a small way. Some ten years ago, an American Jew ran a Carnival in Calcutta. I have always taken a child's interest in carnival and circus; and I used to pay two annas at the gate and attend the carnival almost every night. As a regular visitor, I came to know the American who owned the show. We became friends and we used often to meet in the little tent which was his private parlour and hold long discussions, consuming peg after peg.

---

It was the farewell night; and old Schram and I left after eleven to celebrate his last day in Calcutta. When we returned to the site of the carnival at about 3 a.m., everything had been dismantled and packed and the packing cases put in lorries, and Schram added that they would be at the docks by early morning. He explained to me that each section of the show was in charge of a chief man with a specified number of assistants. Everything was kept in readiness to the littlest nail. He said he could set up the whole paraphernalia in six hours and dismantle it in half the time. Any of us running a similar show could not do half as well in as many days. This episode impressed me greatly at the time; and I can all the more appreciate the point and force of the incident to which Sir M. Visveswarayya has referred.

---

Between you and me, let us say it in whispers, we in India are slack and slovenly. It will do us a great deal of good if we could be taught to be prim and trim. It is in this regard that America can be our best guide and the most useful example. It is in this spirit that we have to welcome the report of Dr. Grady and insist upon his recommendations being completely implemented. Sir M. Visveswarayya's advice is most timely. This should have the effect of including in our industrialists a more correct attitude towards the outcome of the American Technical Mission.

---

An admirable selection in every way and that too by a Government which is not renowned for its choice of men for special posts is that of Mr. K. C. Mahindra. He goes to America to help the war effort. That is about the only way of saying that he leaves an important Calcutta office—how important it is when steel is the news will be realised by all. Intellectual stability social poise, the extensive cultural and business background—they are in happy blend, for Mr. Mahindra 'arrived' in Clive Street long ago and acquired early an easy dignity that does full justice to Sir R. N's training. The acceptance of the post in New York, or Washington perhaps, will give Mr. Mahindra undeniable opportunities to widen his vast, unequalled knowledge of business organisation and problems. It will give him also the chance to secure much timely help for India under the lease-lend Act and the Agent-General for India will have more than adequate reinforcement when Mr. Mahindra reaches the States. He will be marked out as the first of Indian 'con-

quistadors' for I am bold enough to predict that he will find adequate scope for his many gifts only where 'the sky is the limit.' It is the uniqueness of the choice that produces pleasure among those who can beg leave to comment on the sacrifice of authority and income that accompanies Mr. Mahindra's acceptance of a post that Sir R. K. S. Chetty filled for scarcely a year under conditions when U. S. war effort did not dominate the popular imagination to the same extent as now. Of Mr. Mahindra's appointment, one can say that, with regard to appointments by the Government of India, this is one of the rare instances of a round peg in a round hole.

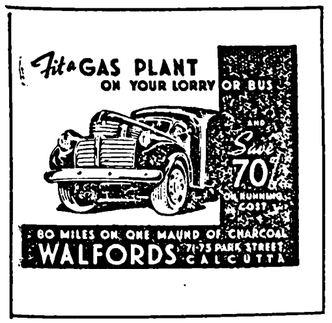
JAPANESE WORDS ARE FRIENDLY_

_THEIR AMBITIONS ARE GREAT

IN the old days, men came to battle with hatred on their lips. Not so the Japanese today! It pays today to send words ahead of armies—soft words, words that deceive, words that confuse, words that weaken. This is a new technique of warfare, very effective against the unwary. But behind those friendly words over the Radio, behind those alarming rumours that are sent like a pestilence through town and village by Japanese agents in our midst, are Japanese bayonets and Japanese ambitions thirsting for India to lower her defences. Then—well, your property is valuable to you, isn't it? The soil of India is rich, isn't it? Your wife is beautiful . . . Who would not be a Japanese soldier if he could get into India without a fight!



THE WOMEN OF CHINA KNOW

The women of China can tell you what the Japanese soldiers are like! "They will say, 'we come to liberate you'—but it is a lie," Madame Chiang Kai-Shek has told us. India's striking force is waiting to deal death to the enemy if he attacks our homeland. Are you offering all the help you can?

BUILD INDIA'S WAR FRONT AGAINST THE JAPANESE

# Gateway of India

From Our Correspondent)

Bombay, June 24.

EVIDENCE was led before Mr. Justice Broomfield by Mr. S. C. Joshi on behalf of the workers and Sir J. B. Kanga on behalf of the B. E. S. T. in the hearings that began over a week ago. Sir Robert warned both the parties that his award would be final and enforced by the Government, in any event, and that the parties should negotiate even at this stage if possible. Mr. Joshi asked for uniformity of wages for drivers and conductors and restoration of 1934 rates. The Company's counsel sought to prove the Company is not able to give the concessions asked for. Sir J. B. Kanga declared that a post-war slump had to be met, and he said the Company had to watch its spending all the time. The request for a month's pay as bonus was described as a demand for a share in profits. On one point the eminent counsel was put right by Mr. S. C. Joshi. To the suggestion that cotton mills had not paid any bonus came the swift reply that the mills in Bombay had given two months' pay in bonus only in February. The counsel described the dearness allowance given by the Tramway Co. as an example of generosity. Reference was made to the taxes paid by the Company and the Directors' right to distribute profits in the manner they desired. Heavy depreciation allocations were the rule because a bus lasted only seven years though it cost Rs. 20,000. Sir J. B. Kanga then compared the pay of motor drivers with the salaries drawn by postmen though the postmen were better educated and their duties more arduous. The Conciliator merely commented on the inaptness of the comparison between the B. E. S. T. workers and the postmen. He was also ready to show that there was no point in comparing Madras wage-rates with Bombay rates.

There was a special display last week to show that war training has given big results. The Governor went to St. Xavier's College grounds to see the weapons of war shown to the public which is told also about the way in which the fighting forces are taught to use them. Torpedoes and paravanes, field lorry workshops, etc., were produced to show what the war effort yields in terms of material. The show lasts till Thursday and large crowds turned up to see what was showing. The Governor saw the officers who ran the exhibition, saw a short film, and took tea. Local students showed much interest in the exhibition last week, and a day has been set apart for letting them turn up in large numbers this week along with their parents.

Details of the revised cotton hedge contract are not available. The meeting last week considered the changes in bye-laws required to put the new contract which will keep the forward market alive in a way. That speculation is a form of insurance is universally admitted, and the links between field and factory must therefore be retained. That forward dealings have checked the slump this year is the opinion of some who are ready to refer to the loss of export markets. Cotton-growers do not necessarily view the market and its functions in the same way as millowners who look upon forward dealings as a necessary evil but still an evil. The market has latterly lost its impulse and war news has checked activity, but there is the story of Rs. 50 crores worth of war orders for mills and the extreme firmness of yarn and cloth prices to offset all damage to sentiment caused by reverses in Libya. New York prices are high compared with the pre-war level but then they have had years of crop restriction and loans to farmers. Here not even a beginning has been made so far, though somebody has talked already about the fund raised from the additional duty on raw cotton and what could be done with it.

The local stockbrokers took the exceptional course of addressing the Directors of the Tata Iron and Steel Company in regard to dividends for 1941-42. The Association got a polite reply which gives away nothing. Prompt declaration of dividends is considered desirable by the Board but reference is made to the many burdens laid on the great company and also to other difficulties in the way of declaring higher dividends, however welcome they may be to local investors. The reply has made the local market rather keen on steel shares. The arrangements for carrying over old forward business have been made. Brokers are not forced to pay cash or make delivery of scrip. Jobbing also is going on and the jump in A. C. C. is largely put down to jobbers' readiness to run up prices on hopes of a bigger dividend. The other market factor is the definition of war risk insurance value. Fire policies and values on property placed thereunder are acceptable guides. It has been decided that neither depreciation provided in books of account nor depreciation as laid down by the income-tax authorities need necessarily constitute reasonable depreciation for the purpose of war damage insurance. Supplementary policies on new forms can also be taken out where necessary. Supplementary premiums will add to the funds available and the result will be better than the 80 per cent cover available for 4 per cent premium.

Events in Libya however provoke doubts among investors who feel that unusual facilities given to Burma companies for transfer of offices to India or Britain will not help Indian investors to develop confidence. Sir C. B. Mehta said as much only last week. The current estimates of Tisco dividends are another matter. It is generally assumed that last year's distribution will be easily maintained yet some people still argue that the second preference is better than the ordinary shares of the company. The works certainly are in the limelight after the ducal visit to Jamshedpur last Wednesday.

Last week it was made known that Mr. R. P. Masani was going to give up his post as Vice-Chancellor and devote all his time to the National War Front. He did a big job as organiser of the war anniversary here on Monday. At the last meeting of the Senate, Mr. Masani gave very good news. The trustees of Sir Dorab Tata Trust had offered and the Syndicate had accepted the gift of Rs. 2 lakhs for creating a Readership in the Chemistry Department. The new post is to develop work on pharmaceuticals and fine chemicals for which there has already been a donation of Rs. 40,000. The University is even more lucky in showing a small surplus. It gives largely by examination fees, usually getting Rs. 4.65 lakhs out of the Matriculation candidates alone. The Syndicate wants its new department of military studies pretty badly because it has set aside Rs. 26.344 for that purpose. The Syndicate declined to exempt Harijan candidates from paying examination fees. The most interesting resolution passed last week relates to the Syndicate's extending sufficient help to deserving literary societies which have been established to develop modern Indian languages. The University must do something for the Sahitya Parishats and the Hindi Prachar Sabha. The resolution will give it an opportunity to do so.

Profiteering for sugar has been a grievance for a long time. Government shops are a belated remedy for such an evil. There is an export ban and fixed retail prices, neither of which help when scanty stocks are taken up for hoarding by traders. There is also profiteering in tea. It has been asked why there is no price control. Well-known brands of tea are very expensive. Retail shops take a big profit. Big stores have taken to the game, says a letter in the Bombay papers. Groups of estates might well put out their own brands at advertised prices. The middleman is superfluous and the one thing that is needed to keep tea consumption at its present level is a reasonable price. The auction trend in Calcutta also requires to be noticed whatever be said about the need to make sales at fixed prices to the British Government. There is no need for home-grown tea to be excessively dear. That is the view expressed in a recent press note deprecating the advance in prices caused by stories of a coming shortage of tea.

# THE ORIENTAL GOVERNMENT SECURITY LIFE ASSURANCE CO., LTD.

## Effect of war on Insurance Business

### *STRONG FINANCIAL POSITION OF THE COMPANY*

*Presiding at the 67th Annual General Meeting of the Oriental Government Security Life Assurance Co., Ltd., Sir Purshottamdas Thakurdas, the Chairman, said:—*

GENTLEMEN,

I rise to address you on the results of the operations for the year ended 31st December last as disclosed in the Report and Accounts a copy of which has been in your hands for some time and may therefore, I presume, be taken as read.

The amount of New Business completed last year at 37,067 Policies assuring nearly Rs. 816¼ lakhs shows an increase of 1,303 Policies assuring nearly Rs. 67½ lakhs as compared with the New Business of 1940 and I think you will agree that this is a not unsatisfactory result considering the situation which arose towards the end of last year in the attack on Malaya by Japan and subsequently the Japanese attack on Burma which had the natural effect of causing great anxiety among the people of this country as to possible further developments and a natural hesitation on their part to enter into fresh commitments. We lost, of course, the amount of New Business which might have been completed by our Kuala Lumpur Branch during the busiest period of the year and almost to the same extent the New Business through our Rangoon Branch. The situation also affected to some extent the Proposals Received and New Business completed in India during the closing months of the year and taking all these into account you will agree with me, as I have already said, that the results of the Company's operations last year in this respect are not unsatisfactory.

The amount of the average Policy effected last year was Rs. 2,202 as against Rs. 2,094 in the previous year. This was undoubtedly due to the fact that the class of people who in the ordinary course could afford to take up only low amounts of life assurance held back on account of their anxieties as to the future while those better able to appreciate the desirability of effecting assurance even in times like the present and also better able to afford to take up assurance of larger amounts, continued to do so.

Our total Premium Income last year was Rs. 384 lakhs as compared with just over Rs. 372¾ lakhs in 1940, showing an increase of about Rs. 11¼ lakhs.

Our Net Interest Income was just over Rs. 114½ lakhs showing an increase of only about Rs. 2½ lakhs on that of the previous year and the net yield on the Life Assurance Funds was 4.10 per cent as compared with 4.34 per cent in 1940. Last year there was an increase in the Income-tax including Surcharge deducted at source of over Rs. 6 lakhs as compared with the amount deducted in 1940, which is partly accounted for by the Income-tax on the natural increase in our annual Gross Interest from Investments, partly by the increase in the Surcharge and partly due to the repatriation of Indian Sterling Loans which took place during the year. The proportion of the increase on account of the last mentioned, which amounted to nearly Rs. 2½ lakhs, is however as I shall hereafter explain, not to be considered as an absolute increase in outgo but only as a transfer into an immediate payment of Income-tax which would have had in any case to be paid subsequently on the assessment of the Company to Income-tax in respect of the assessable income of the current triennium ending 31st December next.

This process of repatriation and consequent attraction to Interest on Investments repatriated, of the provisions of the Indian Income-tax Act although it will have the effect of reducing the net yield from Interest in the increased measure of deduction of Income-tax at source, does not involve any actual loss on this account because the Company is now assessable to Income-tax on its Interest less Expenses. This method of assessment provides for the payment of Income-tax on the Total Interest Income of the Company, less such of it as is exempted from Income-tax as in the case of 5 per cent 1945-55 Loan, less Expenses, and the result of the repatriation will therefore simply mean that the greater the amount of Income-tax deducted at source from Interest the less will be the amount the Company will have to provide for subsequent payment on this and other accounts. When, as will be the case soon after the end of this year, all our Sterling Investments have been repatriated, the present method of assessment will result in the Company's receiving a refund on account of Income-tax on Interest after allowing for Expenses instead of having to pay as has been the case hitherto.

Our Claim Experience continues to be very satisfactory. The Claims by Death last year amounted to about Rs. 73¾ lakhs, just over Rs. 6 lakhs more than the Claims by Death of the previous year, while the Claims by Maturity at nearly Rs. 98½ lakhs show an increase of nearly Rs. 13¼ lakhs on those of the previous year. In the immediate future we ought to see considerable increases each year in the amount of claims paid by Maturity as and when the effect of the rapidly increasing New Business secured by the Company within the period of the last twenty years has full play, the average period of Endowment Assurance Policies issued by the Company being about 20 years.

With regard to Claims by Death, the Ratio of Actual Deaths to those Expected and provided for by the Mortality Basis adopted in the last Valuation is 48.2 per cent as compared with 46.0 per cent experienced during each of the previous two years and 49.0 per cent in 1938. It is impossible to foretell what will be the effect on the Ratio of Claims by Death in the current year and in the future due to possibilities arising out of the War, but our existing business is well distributed throughout the country and also as between urban and rural localities and such being the case, I believe we can look forward with equanimity, as far as our financial position may be affected, to the immediate future trend of our Mortality Experience.

The Expenses of Management last year worked out to a Ratio of 19.6 per cent of the Premium Income as compared with 20.6 per cent in 1940 and 22.6 per cent in 1939. It is many years since the Company has been able to show such a low Expense Ratio. It is of course mainly due to the fact that after a number of years of rapid expansion in New Business, there followed three years of practically constant New Business followed by two years of considerably reduced New Business and although the New Business last year showed an increase over that of the previous year, it was still only 80 per cent of the maximum of Rs. 10¼ crores achieved in 1936. A steady New Business will always result in a decreasing Expenses Ratio for a time, provided no unusual events occur to affect the expenses, and had the War not approached so near to this country as to make it necessary to incur outlay due to A. R. P. provisions, Special Emergency Allowances, Evacuation expenses and otherwise not anticipated even a year ago, the result was bound to have shown itself in a decreasing and ultimately fairly steady Expense Ratio. Now, however, until normality is again reached, we cannot but anticipate a possible increase in the Expense Ratio in the immediate future.

In accordance with my usual practice in recent years, I should like to make a reference to our Lapse Ratio. On the occasion of our last Annual Meeting I informed you that, so far at least as our Early Lapses at that time were concerned, the situation was showing distinct signs of improvement. This downward trend in our Lapse Ratio has been very substantially accentuated as a result of last year's operations and this applies particularly to Early Lapses though it also applies to our experience of the lapsation of business which has remained on the Books for three years or more. This, I consider, is a very satisfactory feature of our Report.

As a result of the year's operations, the Company's Funds increased to just over Rs. 29½ crores as compared with about Rs. 27½ crores at the end of the previous year.

I now come to the Balance Sheet and with reference to the comments I made last year on the extent to which it was possible to take advantage of the powers recently granted to the Directors for investment in Debentures and Preference Shares, you will note that as a result of new investments made last year, the Book Value of our Investments of this nature now amounts to Rs. 35¾ lakhs as compared with about Rs. 9½ lakhs at the end of the previous year.

The repatriation of certain Sterling Securities which took place last year had the result of converting £2,012,650 face value of the amount of our relative Total Investments in Government of India Sterling Loans into Rupee Counterparts amounting in face value to just over Rs. 268¼ lakhs.

Last year the total amount of new loans granted to Policyholders of Rs. 63½ lakhs showed a satisfactory reduction on the total amount of new loans granted during the previous year of Rs. 80 lakhs, but I am afraid that during the current year, for reasons which must be obvious to everyone, the total of our New Policy Loans is sure to show a new high record. This is not at all surprising considering the existence at the moment of quite a number of reasons why many holders of life assurance policies find it necessary to apply for loans on their security.

I may here say that, in order to ensure the least possible delay in meeting such requests, we have authorised our Branches throughout the country to advance loans on the spot upto a maximum of Rs. 500 if the Surrender Value of the Policy permits without a reference to the Head Office. If circumstances make it necessary that the extension of these powers should be given to our Branches, we shall have no hesitation in allowing them to advance loans upto the maximum required within the limit of the Surrender Value of the Policy.

The rapid advance of the Japanese invaders has resulted in their occupation within a few weeks of our Branch headquarters in Kuala Lumpur and in Rangoon and you will find shown in the Balance Sheet, in order that our Shareholders and Policyholders may know what we actually have at stake in property there, the Book Values of these properties of about Rs. 5¾ lakhs and about Rs. 4 lakhs respectively. The total value of these buildings is, as compared with the Company's average triennial profit in the past or as anticipated for the future, such that even their complete loss should have comparatively little effect on the Company's financial position.

A new item in the Balance Sheet with regard to which we have submitted an explanation is the Suspense Account which has had to be opened to meet the situation of our Kuala Lumpur Branch accounts with regard to which we have complete knowledge of all income and outgo only upto 31st October last. Our Kuala Lumpur Branch Secretary was, through a combination of circumstances over which he had no control, unable to take with him from our Kuala Lumpur Branch to our Singapore Office the books of accounts, statements and documents which would have enabled the accounts of the Branch to be completed and balanced upto 31st December last. As matters stand, as far as we can see at present, this Suspense Account will have to remain until we are again in a position to communicate with our Policyholders in Malaya, when only the matter can be cleared up.

Before passing from the Balance Sheet, I would just draw your attention to the fact that as at 31st December last our Investments in Stock Exchange Securities showed an excess in the aggregate Market Values over the aggregate Book Values of nearly Rs. 327¾ lakhs. The situation with regard to the proportion of our Investments in Terminable and Non-Terminable Loans has changed slightly as a result of our operations last year, our Investments in Terminable Loans of the Government of India or other Securities authorised under the Indian Trusts Act being 44 per cent of our Total Investments in such Securities as compared with 49 per cent at the end of the previous year. All the Securities stand in the Books at or below cost price and at or below Market Value.

At our last Annual Meeting I informed you with regard to the rotation of retirement of our Directors that the Board had decided to follow the opinion of the Advocate-General of Bombay and treat the Board as one homogeneous whole for that purpose so that the retirement of the Policyholders' Directors would commence only after the retirement in rotation of Members, Directors re-elected to the Board previous to the election of the Policyholders' Directors. Since then the Commerce Department, Government of India, after due consideration of the difficulty of interpretation of the original rules passed on this point, have altered them providing among other things that the Policyholders' Directors should retire together at least once in every three years, when only and not annually the procedure as laid down in the rules for the election of the Policyholders' Directors should be adopted. Such being the case, only one-third of the Members Directors are required to retire on this occasion and the Policyholders' Directors will all fall due to retire at such time as a Meeting of the Policyholders may be held for the election of three Policyholders' Directors not later than 30th June, 1943.

With regard to certain other questions which were raised by Policyholders on the issue as to whether the Company had power to alter the Articles of Association to take away from the Policyholders qualified under the Articles the right to vote on the election of Members, Directors, a suit has been filed against the Company subsequent to that Meeting to determine the position but that suit has not yet come up for hearing.

The year 1941 concluded for Indian Life Assurance Companies a long period of peaceful and orderly progress with the opportunity to build up reserves to meet possible future adversity such as has now come upon us in the extension of the War to the borders of our Country. Your Directors have been enabled during these peaceful years to place this Company in an unassailable position as far as we could in respect of the strength of its reserves as well as in other almost equally important respects and we feel that, having performed this essential duty to the Company's Policyholders, we can look forward without dismay to the future.

Keeping this in view, we felt that, on the outbreak of War with Japan in December last, we could, in the interests of our Policyholders in territories which were likely to be occupied by the enemy if the worst came to the worst, undertake that, provided policies remained in force upto the time when it was not feasible for Policyholders to remit further premiums to their local Branch or any other office of the Company through the compulsory withdrawal of facilities therefor, all claims by death satisfactorily proved which might take place during the period within which it was impossible to communicate with our Policyholders in territories so occupied by the enemy, would be met to the extent of the full amount of the sum assured under deduction of premiums overdue with interest thereon at the rate of 3½ per cent per annum.

These claims cannot, of course, be considered until communications are again restored but so far as we could, we let it be known amongst our Policyholders in these territories that they need have no anxiety on the score of possible repudiation of liability by the Company in the event of death taking place by reason of non-payment of their premiums through circumstances beyond their control.

We also felt that we could justifiably undertake to revive the policies of those Policyholders who applied for revival after communications were again restored on liberal terms though that does not mean that in all cases we would not require some evidence of good health. So far these undertakings apply only to our Policyholders in Malaya and in Burma. The amount of assurance existing on the lives of Policyholders in these Countries is only about 7½ per cent of the total assurances on our Books so that any extra mortality risk likely to be incurred up to the end of the War under such policies can well be met without much loss so far as business in these Countries is concerned.

We intend also to apply this Policy in the event of an invasion of India or Ceylon cutting off communication with our Policyholders in any area for a time, though, if the position becomes very serious and the whole Country is more or less involved in fighting off invasion, we might have to reconsider our attitude which has been based on an expectation of future eventualities falling very far short of this, and justifiably so, I think.

Apart from a subscription of Rs. 13½ lakhs to the Indian Second Defence Loans and one or two small contributions to War Funds at various centres, our contributions towards the prosecution of the War and towards the wastage incurred thereby have not so far been very great but one of the best ways in which I consider a Life Assurance Company can meet its obligations in this respect is to do all it can even beyond its legal obligations to assist in every possible way within reason its Policyholders who are temporarily without facilities for payment of their premiums or who are unable otherwise to communicate with the Company on account of War operations, even to the extent of diminishing the normal profits of the Company thereby and in the justifiable expectation that our Policyholders in general would agree and would be prepared to bear their share through a possible diminution of the profits of any additional outlay thereby incurred by the Company, the policy I have just referred to has been adopted.

Our Policy with regard to New Business is to continue to issue unconditional policies covering all War risks so long as no serious attack has been made on the Country but as soon as a serious attack through the medium of raids by air, sea or land develops in any area, we shall, thereafter within that area and such other areas adjoining or elsewhere as may be determined by the Directors, be prepared to issue policies at normal rates, but excluding all War risks, with an option, however, to the Policyholder to have these risks covered by payment of an extra premium at the rate of Rs. 10 per thousand assured per annum. If the situation became so bad as to involve any portion of Indian soil in a large-scale invasion, we would cease to entertain New Business from any area involved or in the opinion of the Directors likely to be shortly thereafter involved in this manner.

In pursuance of this policy of giving to our Policyholders the greatest value and the greatest service we possibly can in respect of their policies for as long as we are able, our Branch Secretaries in charge of the Company's Offices and their Staffs in Countries already occupied by the enemy as well as those in Ceylon and in areas in India which might possibly fall for a time under the occupation of the enemy have been informed that they are expected to remain at their posts to serve our Policyholders to the best of their ability until they are compelled by force of circumstances to close the Branch. Possibly the greatest service and proof of the value of their circumstances to close the Company can offer to its Policyholders at the present time in any grave emergency which may affect them is the immediate grant to them of loans.

Since in acting in accordance with this policy laid down by the Board our Officers and Staffs in such Countries have been or may be called upon to face extreme danger on account of air raids or otherwise and in the performance of their duty they may also be called upon to suffer undue hardship on account of possible disorganisation of service and food supplies, as has happened already in some places, your Directors have sanctioned payment of substantial Special War Emergency Allowances to the Officers and Staffs of Branches where circumstances existed which the Directors considered justified this treatment so as to help the employees of the Company affected to meet possible considerable additional costs of living and to encourage them to remain loyally at their posts until, in the discretion of the Branch Secretary concerned, evacuation of the Branch headquarters was justified. We have also undertaken to pay compensation to the dependents of any employee of the Company who may lose his life as a result of war operations while in active service with the Company to the extent of the equivalent of four years' salary increased to five years' salary in the case of A. R. P. personnel subject to a maximum of Rs. 10,000. This obligation has been partly covered by Insurance. I am confident that this policy and the measure in which we are trying to temper to our Staff, as far as we can, the immediate results of the War on their lives, will have the approval of you all.

In the performance of this service, our Branch Secretaries in Kuala Lumpur and Rangoon remained at their posts with such members of the staff who remained loyal to them in the face of extreme danger and hardship, to serve our Policyholders who could still communicate with them as long as possible until they were forced to close down the Branch and evacuate from its headquarters.

In this connection I wish particularly to pay a warm tribute to our Rangoon Branch Secretary Mr. R. J. Pimenta and his staff who, without exception, showed great courage and loyalty in the face of great danger and hardship in remaining in Rangoon upto the date when the City was completely evacuated, proceeding to Mandalay as best they could to endeavour to serve the interests of the Company's Policyholders still able to communicate with our Office there and ultimately being compelled to travel to India overland as refugees along with thousands of others on foot or by any means of conveyance possible to secure at the risk of permanent injury to their health.

I also wish to pay a similar tribute to Mr. Manjeri S. Siva, our Kaula Lumpur Branch Secretary, who, although deserted by a great portion of his staff at the time of the rapid advnce of the Japanese on Kuala Lumpur, remained at his post with a few members of his staff who remained loyal to their obligations of service until he was compelled to leave Kuala Lumpur for Singapore only a few hours before the Japanese entered the City.

I am particularly gratified to be able to tell you that, so far as my knowledge goes, the Company's Rangoon Branch was the last of all the Life Assurance Companies operating in Burma to evacuate from the country and I also believe that the Company's Office in Colombo is the only Office left operating in Ceylon out of all the Indian Companies which sought business there in normal times. Your Directors feel that, having for years sought for and achieved the building up of a large business from Malaya, Burma and Ceylon, the Company is in honour bound to maintain its administrative Offices in these Countries so long as communication with Policyholders is possible and so long as the Branch can be of any assistance to them in the service expected by a Policyholder from the Company with which he is insured.

The Officers and employees of the Company have shown a fine example to our Officers and Staffs elsewhere in the Organisation and I feel confident that, in the event of our Officers and Staffs in India or Ceylon being called upon to undergo similar experiences, the same courage and loyalty to the Company and to its Officials will be exhibited by them. I wish to convey the appreciation of the Board to all our Officers and Staffs wherever and under whatever circumstances they may be serving, for the excellent services rendered by them during the year and the evidences of courage and loyalty displayed under the experience or threat of bombardment or invasion. I wish to add that the Board appreciate specially the grasp and devotion to duty shown in this connection by the Manager and Officers and Staff at the Head Office.

This being the last year of the Triennial Valuation period, you may expect me to say something about the possibilities of the declaration of a bonus in due course. It goes without saying that, inspite of increases on account of a variety of reasons in the outgo of the Company, Income Tax being the greatest of these, we should be able to show a substantial amount of profit as a result of the Valuation to be made at the end of this year but whether and to what extent it would be politic to distribute that profit is a question which must be left over for decision a year hence.

(Continued on next page)

# Resume of Commodity Markets

The problem of effective price control is overshadowing other developments in the commodity markets. As has been pointed out in these columns on more than one occasion, we are faced with a shortage of essential food supplies and a surplus of export commodities. In the absence of any facilities for augmenting food supplies from countries overseas, there is a regular rigging up the grain markets and the control order has in most cases been ineffective. While the difficulties in getting freight facilities have had a depressing effect on prices for jute, jute manufactures and cotton, the difficulties in getting internal transport facilities, to ensure proper distribution, have nullified the effect of price control. It is an anomalous position that we should have plenty of certain commodities and lack of certain others. The 'grow more food' campaign and the efforts to divert acreage under cash crops to food crops have not been quite the success as it was expected to be. It is not surprising, therefore, that considerable alarm has been expressed at the recent sharp rise in prices and the firming up in the cost of living index. Unless the problem is satisfactorily solved it may lead to serious difficulties.

The jute and jute manufactures markets have been rather uninteresting while the raw cotton market has been more active and the lost ground has been completely regained. The bullion markets have been firm while the seeds markets have kept up their strength.

**Jute**

Absolutely uninteresting conditions have been noticeable in the raw jute market. In the absence of any activity in the goods market mills have not been encouraged to lay in stocks. It is reported that considerable difficulty is being experienced in getting the raw material and that press houses are not able to keep going. Packing costs have gone up. If there is anything like a return to normal activity there should be a sharp upturn in prices but at the present moment it looks as if the authorities will not allow any increase in shipments even if the freight position improves.

**Cotton**

The greater mill activity, the good demand for spot cotton and the strength of the piecegoods and seeds markets have resulted in a sharp upturn in prices in the raw cotton market. The announcement that henceforth transport of essential cotton only will be allowed should be encouraging to bulls but the authorities should keep in mind that a situation similar to the one which occurred in Bombay on the last tender day, should not be allowed to occur. It will be remembered that there was a great scarcity of contracts for Broach April/May delivery and that there was considerable disparity in prices in the city and the mofussil and that there was a scramble to bring cotton to Bombay by whatever means of transport that was available.

**Tea**

Reference was made in these columns sometime back regarding the abrupt rise in prices for teas for export to countries other than the United Kingdom. India is now the only important producer of tea among the United Nations and the whole of her outturn is needed for the Allies. The British Ministry of Food has entered into agreement with tea producers for supplies at an agreed price. In view of the difficulty experienced by other countries, it is now proposed that there should be a central pooling scheme and that the British Ministry of Food will do the purchasing for all countries. When new contracts are made, it is expected that prices will be fixed higher. In any case, they cannot be equal to the price now prevailing in Calcutta and Colombo.

**Piecegoods**

The piecegoods market has continued active. In the absence of adequate supplies, dealers are not inclined to sell freely. It is feared that the abrupt rise in prices may affect considerably working class costs of living. The manufacture of standard cloth and the distribution at fixed prices is reported to be engaging the attention of the Central Government. A conference of representatives of different associations and chambers of commerce was held with the Commerce Department, Government of Bengal, on Monday when the question of the supply of standard cloth was discussed. It is understood that the Government have asked for the names of intending dealers.

One would wish that the initiative in this respect had been taken earlier.

**Salt**

Salt is another article which is presenting considerable difficulty. Present stocks in Bengal are not expected to last more than a month. There has naturally been considerable opposition to the proposal that Bihar is allotted 40 wagons daily for the transport of salt from the producing districts in Western India. The transport of salt by sea was not undertaken hitherto, apart from other difficulties, owing to the refusal by insurance companies, to cover risk by frustration. It is now said that arrangements are being made to import salt into Bengal by sea at Government risk and that the allotment of wagons to Bihar has been cancelled as the imports into that province can be effected in the same way.

# Jute and Jute Manufactures

(By Our Jute Correspondent)

Calcutta, 25th June.

No settlement has yet been arrived at between Mills and Loose Jute Sellers in the matter of the incidence of War Risk Insurance on Jute in transit to the Mills, and it would appear that authoritative legal opinion will be necessary to reconcile varying interpretations of the terms of the existing contract, and possibly redrafting of certain clauses to eliminate dubiety as to their exact meaning. The question turns largely on the "ownership" of the goods, and the interpretation to be placed on the words "free to Buyer's Mill Siding and/or Ghat". According to the Sale of Goods Act, "ownership" passes as soon as goods are handed over to a public carrier for delivery to a named consignee. In this respect there appears to be little scope for doubt as to the ownership of loose jute shipped to Mills, for not only are the selected carriers specified in the contract, and the name of the consignee Mill stated in the Forwarding Note and Bill of Lading or Rail Receipt, but the Mills Association have a special freight agreement with certain shipping lines, to which agreement the Sellers are not parties except inasmuch as their shipments to Mills must, according to the terms of the contract, be confined to these specified shipping lines. The resulting denial of freedom to the Seller in the selecting of the method of transit to the Mills would appear to confirm the passing of ownership to the consignee mill at the time of shipment. On the other hand, Mills show a disposition to place upon the words "free to Buyer's Mill Ghat" a much more liberal interpretation than has ever before been suggested, and certainly an interpretation which is not supported by the accepted custom of the trade. Mills' suggestion is that Sellers' responsibility for the goods subsists until the goods are alongside the Mill Jetty. To a definitely limited extent this is the case, but these limitations are also specified clearly in the contract. They consist of the guarantee of quality of the goods and the guarantee of invoice weight at Buyer's Mill. But in all other respects the custom of the trade supports the view that the Seller's responsibility ceases when he has handed over the goods to the Carrier for shipment to the Mill. For instance, if the Seller obtains from the Carrying Company a Bill of Lading for 100 bales, and only 98 bales of this particular mark are delivered to the Mill, the Mill's claim for the two missing bales lies, not against the Seller, but against the Carrying Company. Again in the matter of any loss by fire or other marine risk in the course of transit to the Mill. According to the terms of the Contract, the Seller is required to cover the transit insurance for 10 per cent over the Invoice value of the goods with an Insurance Company specified by the Buyer. Again the Seller is denied any freedom of choice in the matter of where he insures, and all Mills maintain with their selected Insurance Companies, Open Covers for transit risks on Jute, against which the Seller declares each shipment, and either pays the premium to the selected Insurance Company, or deducts it from the Mill Invoice. The policy for each particular shipment is made out in the name of the Mill and not in the name of the Seller or shipper, and any claim which may arise in the course of transit is made direct by the Mill on its selected Insurer under that policy. It is quite possible that a claim may arise in transit of which the seller or shipper never hears at all. Therefore the responsibility which Mills now wish to impose on Sellers up to the point where goods are alongside the Mill Jetty does not extend, according to the existing custom of the trade, to guaranteeing delivery of the goods at destination at all. The carrier undertakes delivery and in the event of loss or damage by marine risk, the Insurance Company undertakes responsibility for the insured value of the goods lost or damaged. Another point bearing on ownership is that, if in course of transit the market value of the goods advances beyond the 10 per cent margin declared by the Seller at the time of invoicing, the responsibility for insuring any such increased value lies with, and has always been accepted by, the Buyer.

It would seem to be clear therefore that the accepted practise is that ownership passes when the goods are handed by the Shipper to the Carrier, and that in practise the words "free at Buyer's Mill Ghat" mean no more than "freight paid". Transit insurance is also paid by the Seller, but this is provided for in a separate clause of the contract, so the word "free" does not necessarily imply "covered by transit insurance". There seems nothing in the accepted custom of the trade to support the wider interpretation which Mills wish to extend to this phrase, but it would certainly be desirable to have its implications authoritatively decided, and if necessary, the contract altered so that liabilities of the parties are more clearly defined.

In support of Mills' theory regarding Sellers liability for goods up to the Mill Jetty, the argument is advanced that payment against documents is not an essential factor in the contract and is only introduced as an act of grace and as a facility for the Seller. Little weight can be attached to this argument, considering that this clause has been in effective use for at least 35 years and probably more. Moreover it must be perfectly well known to Mills that on no other terms could the volume of business now necessary to meet their requirements be carried on. Even the interval between the actual shipment of the goods and the actual payment by the Mill against documents has,

## ORIENTAL GOVT. SECURITY LIFE INSURANCE CO., LTD.

(Continued from previous page)

In previous years I referred to some changes necessary in the Insurance Act as passed and I acknowledge with pleasure that the Government of India have met the various suggestions put forward by Indian Insurance Companies in this connection to a certain extent. There is one particular subject which has been considered by the Insurance Advisory Committee during the year under report which I think of sufficient importance to deal with in some detail here. Suggestions were made that all Life Assurance Companies should, by law, be prohibited from distributing any profit under the present war conditions, and your Board's opinion in this connection was requested. After giving the matter careful consideration, your Board came to the conclusion that it was not in the interest of India's economic fabric as a whole to support such a suggestion.

As you know, it has been a continued complaint all this time that in India, life assurance per head is the lowest of all the civilized countries in the world. To compulsorily prohibit distribution of profit on life assurance policies even under the present conditions appeared to your Board to be a retrograde step which is bound to give a setback to life assurance in India that, in spite of our being informed that several Indian Insurance Companies were in favour of this suggestion, your Board felt it their duty to convey to the Government of India that they were definitely against it. I am convinced that unless life assurance is to be taken up by the Government as one of its departments, and not to be left to joint-stock enterprise as at present, such legislation would put a premium on inefficiency, want of experience or extravagance in canvassing business by Life Assurance Companies and must lead to a setback to the insurance habit in this country for years to come even after the war is over.

As you know, during the first year or two after the present war broke out, people were not only not going in for life assurance but many, unfortunately, were being misled into stopping payment of heir premium for reasons of some very shortsighted and ill-conceived rumours going round. There are sure indications that people are emerging from the shadow of this, but to make life assurance avoidably less attractive by legislative interference at this juncture would appear to me to be the surest way of giving a deliberate and uncalled for setback to our goal in this connection. For this among other reasons, your Board ventured, in spite of knowing that they were differing from other Indian Life Assurance Companies in India, to put forward their opinion frankly before the Government of India and I am glad that so far we have seen no signs of the Government of India accepting the suggestion made to them.

My reason for mentioning this is that you as Policyholders and even as Shareholders in this Company are vitally interested in this matter, besides being interested in the question from the general point of view, which must appeal to all. I may tell you that your Board came to the conclusion which I have just referred to after making enquiries of many Policyholders, and, indeed the consensus of opinion as far as I am aware was in favour of what your Board has said, and if we had expressed any other opinion than the one that we did, we felt that we would be departing from the opinions and interests, of course, of Policyholders and those interested in the growth of the life assurance habit in India. I may add that in a crisis there are other methods open to Government to afford temporary relief to a section of Life Assurance Companies whenever necessary and justified, but to prevent all companies from distributing the profits which they have earned, strikes me as being a most arbitrary suggestion calculated to level down all Life Assurance Companies working in India to conceal the defects of a few.

I have often stated in the past that a Life Assurance Policy is the best possible protection as well as the best possible investment in bad times as well as in good. By the policy we have adopted to endeavour to temper the blast of the War on our Policyholders completely exposed to it in the manner I have already explained we are endeavouring to prove that a policy with this Company is a very valuable protection and I hope that by disclosing in these remarks what the attitude of the Board is in these matters, encouragement will be given to many who are now hesitating about effecting life assurance with this Company to make up their minds at once to do so.

Before concluding, I would like again to appeal to our Agents, as I did last year, not to give way to pessimism and the belief that this is not the time to canvass for New Business but to do their best to persuade their friends and associates who are not already insured or who are under-insured as practically everybody is considering the times we are passing through, to take up a Life Assurance Policy with this Company for as much as they can possibly afford and as soon as possible. Now is the time to do this. Tomorrow or next week or next month may be too late to secure assurance without payment of an extra premium to cover War Risks in full.

Gentlemen, I have now pleasure in moving that the Directors' Report and Audited Accounts for the year 1941 be adopted.

in practice, to be largely financed through Banks. Mills must realise clearly that it is futile to start any such bogey as insisting on C.O.D. terms for their Jute supplies. They simply would not get a tithe of their requirements on such terms.

It is difficult to understand exactly why there should be all this dust raised over a matter which is intrinsically a rather minor matter so far as cost to the Mill is concerned. From the point of view of convenience, the arguments in favour of the Mills attending to the War risk insurance seem overwhelming. One important argument against any other arrangement is the same as applies to transit insurance mentioned above. Suppose the onus is placed on the Seller to insure the goods in transit against War Risk for 10 per cent over invoice value. Suppose the market advances beyond this 10 per cent margin while the goods are in transit. Then the Mill will have to cover the difference, which means that there will be two distinct covers under which the goods are insured, involving inevitable complications in the event of a claim arising. For in the case of War Risk cover, goods will be partially covered under the Seller's cover and partially under the Mills' cover. This complication does not arise in similar circumstances with the transit insurance, for the Seller declares his share in the first place under the Mill's cover and any increase which may later become necessary is effected by the Mill under the same cover.

Out of evil however may come good, and if, as a result of this controversy, certain aspects of the contract are clarified and if necessary redrafted, to put them beyond the range of dubiety, it will be all to the good.

The Export business placed for Russia in the end of last week amounted to some 8,500 bales. Covering was done on the basis of Rs. 47 for First marks, Rs. 37 for Lightnings and Rs. 49 for Output Tossa assortment. Very little else was reported. Nor have Mills been active participators and enquiries for Daisee and Tossa are now difficult to meet. Some Hearts are reported at Rs. 27.

There has been more activity in the Loose Jute section and a considerable business has been put through in Supervised Jat Bottoms at Rs. 5-12 and Rs. 6 and X and Rs. 4. The same rates were also paid for picked Indian Jat marks and good District marks also sold at Rs. 5-12 Bottoms. There are Buyers over at the higher rate for Bottoms and little desirable stuff now showing. Of X there is still plenty available. New Crop does not seem to attract buyers yet to any extent, only small loss being reported, mainly Bottoms at Rs. 6-8.

Though rain would be beneficial in most of the jute districts, the condition of the crop continues satisfactory and it is, for the most part, beyond the risk of damage from lack of rain. This is also wanted for steeping water however and the rivers being generally below normal levels, cutting is being retarded.

In the Fabrics section, interest has been again largely centred in Heavy Goods. Hessians for export are neglected and only small inter-bazar transactions are reported around Rs. 14-4 and Rs. 14-6 for 9 porters and Rs. 18-4 and Rs. 18-8 for elevens. 45/11 for the country trade sold at Rs. 21 ready. In Heavy Goods there has been quite a brisk enquiry from the Cape and Australia,, but towards the close the war news from the Middle East has put a damper on the country demand and the closing tone is quieter. An encouraging factor is the report that more outward freight is likely to be available from the port of Calcutta. Sales recorded include "B" Twills at Rs. 43 to Rs. 42 ready, at Rs. 41-8 June and Rs. 40-8 July. Liverpools at Rs. 44-8 ready and Rs. 44 July. Cornsacks at Rs. 40-4 and Rs. 40 August, Rs. 40-12 July and Rs. 39 September. Woolpacks at Rs. 1-13 July/Sep and Rs. 1-12-6 Octr./Decr. Heavy Cees at Rs. 39-4 ready.

## EAST INDIAN RAILWAY

**TENDER NOTICE**

The General Manager, East Indian Railway, invites tender for the supply of Lamps hand signal Tricolour complete with burners and reservoirs.

Tender forms at Rs. 2/- per copy are obtainable from the Controller of Stores' Office. Drg. No. P. L. 388A and C. & W. Drg. No. 7156 may be purchased from Deputy Chief Mechanical Engineer, Lillooah at the rate of Rs. 1/8/- per copy and Drg. No. E.I.R. (S) A. 2844 from Chief Engineer, Allahabad at the rate of -/8/- per copy on production of Treasurer's receipt. Firm outside Calcutta may remit the amount to the above offices by Money Order. No refund of this payment is permissible.

Closing date is 14.7.42.

R. E. MARRIOTT,
*General Manager.*

**Special Items Costing Over Rs. 8,000**
**Class I Contract**

Sealed Tenders are invited for the following and will be received in the General Manager's Office, East Indian Railway, 105, Clive Street, Calcutta, before 11 a.m. on 15th July, 1942.

Tender No S/NSP/UC/ARP/SH for the supply of Steel Helmet of sizes.

Tender forms with full particulars can remit the amount to the Controller of be had from the office of the Controller of Stores, East Indian Railway, Calcutta, and on production of his receipt when applying for the same.

Firms outside Calcutta may, however, Stores direct by Money Order. Once this document is issued, no refund is permissible.

Sealed tenders delivered by hand should be presented for registration in the General Manager's Office and then put into the Tender Box outside the Deputy General Manager's (Work) room, by the Tender or his representative.

R. E. MARRIOTT,
*General Manager.*

### JUTE

*Calcutta*, June 25.

The raw jute market has been absolutely uninteresting. With a dull hessian market mills have not been very anxious to buy raw jute. Some difficulty is reported in getting transport facilities and arrivals from the mofussil are coming in very small quantities. In spite of this, there is no hurry on the part of the mills to buy fresh stocks. As pointed out last week, unless the shipping position improves and the goods market becomes more active, it will not be possible to record any improvement in sales.

In the loose jute section, balers have been interested in District Tossa grades. Some business has been done by mills in Supervised Jat Bottoms and Cross Bottoms at Rs. 5-12 and Rs. 3-12 per maund. European medium weedings were done at Rs. 10 per maund and Meshta Middles and Bottoms at Rs. 9-4 and Rs. 6-4 per maund respectively.

In the pucca bales section, earlier in the week, some business was reported for shipment to Russia. Mills bought Hearts 2/3 at **Rs. 27 per bale.**

### JUTE MANUFACTURES

*Calcutta*, June 25.

The jute manufactures market has been dull and quiet throughout the past week. In the hessian market no fresh business was reported. Consequently quotations are lower on balance. 9 Porters ready are quoting Rs. 14-4, July Rs. 14-4 and August-September Rs. 14-4 with 11 Porters ready Rs. 18-6, June Rs. 18-8 and August-September Rs. 18-6.

In the heavy goods section, some business was reported earlier in the week and demand was again confined to "B" Twills and Liverpool Twills. 'B" Twills for ready delivery are now quoting Rs. 42, Liverpool Twills Rs. 44 and Cornsacks Rs. 41-8.

### GOLD

*Calcutta*, June 25.

The deterioration in the war situation in Libya led to a marking up of values in the gold market last week. Profit-taking at the higher levels reduced the gains. During the past few days there has again been a revival of investment buying. Gold ready are quoting Rs. 49-8 and first settlement Rs. 49-6 against Rs. 49-3 and Rs. 49-1 at the end of last week. It is interesting to note that first settlement continues to be quoted at a discount.

### SILVER

*Calcutta*, June 25.

The rise in prices in the silver market during the past week has been more pronounced. The fears regarding the scarcity of supplies and the opposition of the silver bloc in the United States to the distribution of silver to countries outside the United States have given rise to grave fears. There has been a narrowing in the discount for second settlement over ready. Indian Mint Silver ready are quoting Rs. 84-10 and Second Settlement Rs. 83-2. The quotations at the end of last week were Rs. 83-8 for ready and Rs. 80-10 for First settlement.

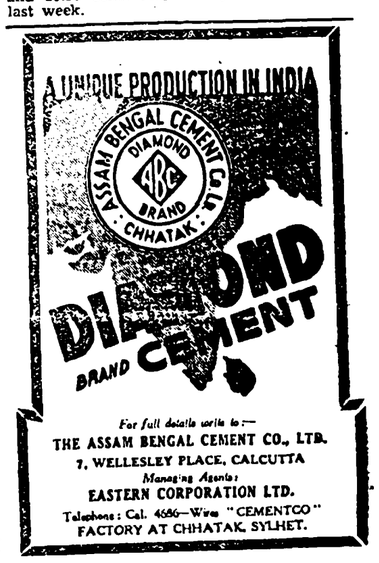
The London market has again been dull and idle. Small demand has been met by producers' selling. The quotation for both spot and ready is unchanged at 23½d.

### PIECEGOODS

*Calcutta*. June 25.

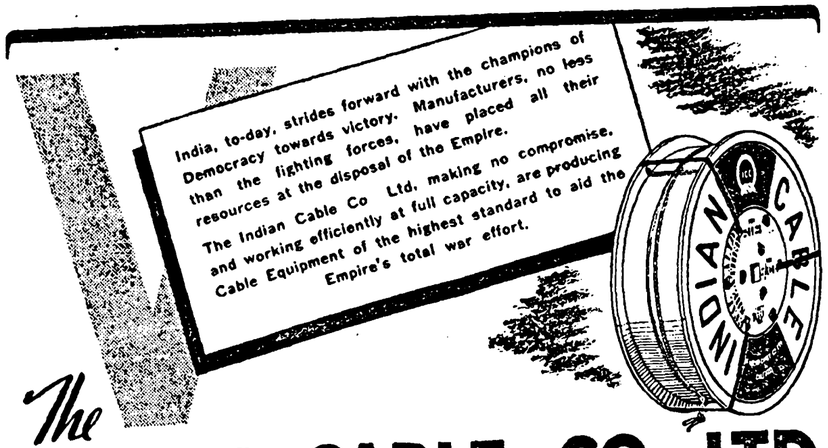
The piecegoods market has continued firm. Even though business has been on a small scale, prices have not been affected. There is considerable difficulty in getting supplies on account of transport difficulties.

As regards imported supplies, it is very difficult to get certain lines and prices have been marked very much higher.



Considerable interest has been excited by the announcement that the Government are proceeding with their decision to manufacture standard cloth.

### COTTON



*Calcutta*, June 25.

The dullness of the Bombay raw cotton market, noticeable at the time of last writing, has proved to be short-lived. The reaction in prices after the sustained rise in the quotation for Broach to Rs. 210 has been helpful to the market. With good buying of spot cotton by mills on a very good scale and imports of cotton restricted, operators have resumed buying. The strength of the seeds market also has been a helpful factor. Broach April-May were Rs. 200, Oomra July Rs. 173-4 and Bengal-July Rs. 167-4 against Rs. 183-12, Rs. 168-8 and Rs. 156-8 respectively at the end of last week.

The New York market also has been more active. Greater mill buying and hopes regarding the possibility of a compromise over Farm legislation have been responsible for the rise in values. July quoted 18.31 cents and October 18.67 cents against 18.09 cents and 18.37 cents respectively at the end of last week.

## STEEL CORPORATION DECLARES FINAL DIVIDEND

THE declaration of a final dividend of ten annas per share by the directors of the Steel *Corporation* of Bengal for the year ended December 1941, has had a tonic effect on a market which was otherwise depressed. From the low levels for the week of Rs. 26 and Rs. 16, *Indian Iron* and *Steel Corporation* are now quoting Rs. 26-12 and Rs. 16-12 respectively.

It is satisfactory to note that there has been no panicky selling during the week and that business has been smaller at the decline. Giltedged securities have perhaps been affected most. The serious reverses in Africa during the past week, though not quite unexpected, cannot be satisfactorily explained away and operators are yet attaching some importance to the possibility of immediately opening a second front which will prove to be the turning-point in the war. In a sense, markets are now at the cross-roads.

* * * *

The acute shortage of wagons has resulted in a considerable decline in despatches from collieries and it has been found necessary by the Government to force consumers to get their requirements from the nearest coal-mining centres. This diversion of demand from the usual channels has resulted in an increase in despatches from the more favourably situated collieries. It is not surprising, therefore, that the Central Provinces and Assam coal companies have benefited by the diverted demand. It would have been possible to show even better results in these cases with greater transport facilities. Increased costs of production and stores have also affected earnings adversely.

* * * *

*Rewa Coalfields Limited* is perhaps one of the few companies which have been able to report a higher level of earnings and recommend a higher dividend to shareholders. The net profit for the half-year ended December, 1941 is Rs. 3,08,776 against Rs. 2,42,036 for the previous half-year. The amount set aside to depreciation is Rs. 49,783 against Rs. 49,583 while the provision for taxation is the substantial sum of Rs. 1.5 lakhs against Rs. 81,929. The directors have, however, decided on an increase in the dividend to 8¾ per cent from 7½ per cent. The amount carried forward is naturally lower at Rs. 17,027 against Rs. 26,130 brought in.

* * * * *

The slightly higher level of despatches has not been advantageous to *Pench Valley Coal Company Limited* for the increase in earnings has been more than offset by the increase in working expenses. The net profit, before providing for taxation and depreciation, for the half-year ended February, 1942 is Rs. 1,00,070 against Rs. 1,09,272 for the previous half-year. The amount set aside to depreciation is Rs. 15,920 against Rs. 14,513 while the provision for taxation is Rs. 20,818 against Rs. 26,838. Even the payment of the lower dividend of 7½ per cent (8¾ per cent) has been possible only with the transfer of Rs. 12,000 from Contingency Reserve. The amount carried forward is the very small sum of Rs. 2,789 against Rs. 7,059 brought in.

* * * *

Owing to the acute shortage of wagons in the Bengal coalfields enquiries for Nazira Coal have been greatly in excess of the present output capacity of the colliery. Unfortunately, the wagon shortage has now spread to Assam and difficulty is being experienced in meeting normal demands. Recently, however, the Government of Assam have forbidden sales of coal to consumers without license and as such, it can be expected that the Government of Assam will try to get over transport facilities and derive the greatest advantage from the collieries in Assam. Being the largest coal company in Assam, the Nazira Coal Company can, therefore, hope for better times.

* * * *

The net profit, before providing for taxation and depreciation, for the half-year ended February 1942 is Rs. 47,816 against Rs. 37,428 for he previous half-year. The amount set aside to depreciation is Rs. 12,000 against Rs. 11,000 while the provision for taxation is Rs. 15,167 (Rs. 7,059). The dividend has been maintained at 2½ per cent.

* * * *

Yet another reminder of the prosperous conditions that existed in the jute industry is provided by the results of the *Hooghly Mills Company Limited* for the year ended March, 1942. Without any large increase in sales, it has been possible to show a higher level of profits owing to the cheaper price for the raw material. After charging Rs. 3 lakhs (Rs. 3.5 lakhs) to depreciation the sum of Rs. 9,36,207 against Rs. 4,00,000 has been provided for taxation. With a larger provision for taxation, it has not been possible to increase the ordinary dividend which has been only maintained at 50 per cent. The amount carried forward is higher at Rs. 70,850 against Rs. 56,793 brought in.

* * * *

At the time the interim dividend of six annas per share was paid by the *Steel Corporation of Bengal* for the year ended December 1941, I pointed out that the company can very well pay a larger amount by way of final dividend. The higher level of production during the year should have resulted in a large increase in earnings for the Corporation. Until the accounts are available no definite estimate regarding earnings can be made. The final dividend of ten annas per share, now recommended, makes with the interim dividend of six annas per share already paid, one rupee for the whole year.

For the maiden dividend to be as much as 10 per cent in spite of the high level of taxation speaks very much of the potential earning capacity of the Corporation. With the announcement of the dividend there has naturally been an appreciation in the quotation for the shares which are now around Rs. 16-12 cum. dividend.

Taking into consideration the assured prospects for the company, it should be said that the shares have scope for appreciation. The yield is as much as 6.25 per cent tax-free.

The directors point out that in view of the uncertainty of mails from and to the United Kingdom, the publication of the Directors' report and accounts, which are to be published simultaneously in India and England, will be delayed.

# The Week in the Exchanges

## CALCUTTA STOCK EXCHANGE

*(From Our Correspondent)*

Calcutta, June 26.

WITH the reverses in the Middle East it could hardly be expected that the Calcutta Stock Exchange would remain steady. It will be remembered that at the end of last week a definitely better feeling was noticeable and that business was done on a larger scale. During the past week, however, sentiment has been badly affected and prices have been marked lower in all sections. Only there has been no panicky selling and it is satisfactory to note that business has been on a smaller scale at the decline. Giltedged securities have been affected most. With the predominence of sellers very few transactions have been put through. There is a general tendency to await further developments.

In the giltedged securities section, as remarked above, values have been marked lower. 3½ per cent Paper has shed ten annas to Rs. 91. 3 per cent Paper was quoted at Rs. 78. 3 per cent Second Defence Loan were Rs. 99-13, 3 per cent 1963-65 Rs. 91-13 and 5 per cent 1945-55 Rs. 107-10. No transactions have been recorded in provincial loans. Conditions in the *money market* have continued easy and there has been a further decline in the treasury bills rate to twelve annas and five pies per cent per annum from thirteen annas and eight pies per cent per annum last week. With any improvement in the situation it can, therefore, be expected that giltedged securities will recover their lost ground.

Amongst fixed interest securities, 5 per cent *Calcutta Port Trust* debentures 1957-87 were done at Rs. 91-8 and 6 per cent *Calcutta Port Trust* debentures at Rs. 111-14. Among industrial debentures, 5¼ per cent *Rohtas Industries* debentures were Rs. 105, and 5½ per cent *Dalmia Cement* debentures at Rs. 105.

First class preference shares also are a shade easier with *Alliance* at Rs. 124, *Bengal* at Rs. 103, *Clive* Rs. 120, *Howrah* 7 per cent preferences Rs. 145 and *Northbrook* Rs. 129 ex-dividend. Among other sections, *Alkali and Chemical* were crossed at Rs. 117 and *Dalmia Cement* at Rs. 127-8. *Northern India Oil* were Rs. 99 and *Orient Paper* Rs. 115.

Not many transactions have been recorded in Coal shares. *Bhalgora* were noted at Rs. 4-12 and *Churulia* at Re. 1-10.

In the Jute section, fewer number of transactions have been recorded. *Agarpara* were Rs. 18-4, *India* Rs. 312 ex-dividend, *Anglo-India* Rs. 320, *Caledonian* Rs. 356, *Hukumchand* Rs. 12-14 and *National* Rs. 21-4. *Nellimarla* were Rs. 11-1 and *Rameshwara* Rs. 9-2.

In the Engineering section, *Indian Iron* and *Steel Corporation* were marked lower at Rs. 26 and Rs. 16 respectively. There has been some selling. The directors of the Steel Corporation of Bengal Limited have decided to pay a final dividend of ten annas per share in respect of the year ended December, 1941. This, with the interim dividend of six annas per share already paid, makes one rupee per share for the whole year.

In the Tea section, *Ethelbari* were noted at Rs. 11-4, *Sarugaon* at Rs. 11-4, *Jaybirpara* at Rs. 22 and *Naga Hills* at Rs. 14-4.

In the Miscellaneous section, *Burma Corporation* were Rs. 2 and *Indian Copper Corporation* Rs. 2. *B. I. Corporation* were Rs. 5-2, *Aluminium Corporation* Rs. 11-5 and *Alkali & Chemical* Rs. 19-12. Among Papers shares, *India Paper Pulp* were Rs. 147, *Orient Paper* Rs. 18-8 and *Titaghur Paper* Rs. 19-12. *Reliance Firebrick* were Rs. 11-4 and *Indian Cable* Rs. 20-8.

## BOMBAY STOCK EXCHANGE

Bombay, June 26.

It was pointed out last week that the strength of the Bombay share market could not be trusted as there was a tendency on the part of Bombay operators to attach greater importance to the developments in the Middle East. It is unnecessary to point out in this column that the British have suffered serious reverses in the Middle East during the past week and that there has naturally been a sharp decline in prices in all the sections. Textile issues also have shared in the general decline in spite of the reports that further large orders have been placed with the industry.

*Securities.*—There has been some selling in this section and in the present circumstances operators are not prepared to enter into further commitments. 3½ per cent. Paper was quoted at Rs. 91-1, 2¾ per cent. 1948/52 at Rs. 97-4, 3 per cent. 1951/54 at Rs. 98-12, 3½ per cent. 1947/50 at Rs. 102 and 5 per cent. 1945/55 at Rs. 107-10.

*Textiles.*—Textile issues were inclined to resist selling pressure earlier in the week but in sympathy with the weakness of he Steel section prices have been marked lower towards the close. *Ahmedabad Advance* were Rs. 357-8, *Bombay Dyeing* Rs. 1257-8, *Central India* Rs. 373, *Century* Rs. 465 and *Kohinoor* Rs. 489.

*Hydro-Electrics.*—There is no important change in prices to be recorded, *Tata Hydro* being noted at Rs. 169-8, *Tata Power* at Rs. 1,495 and *Andhra Valley* at Rs. 1,620.

*Steels.*—There is considerable speculation regarding the dividends of the Tata Iron and Steel Company Limited for the year ended March, 1942. In some quarters it is expected that a higher dividend will be paid but it is generally felt that there may not be any increase in the distribution to shareholders as provision for taxation, contingent expenditure and A.R.P. arrangements has to be made on a larger scale. Also, with the proposed extensions to plant the Company will possibly require greater liquid resources. *Tata* ordinaries and deferreds are quoting Rs. 299 and Rs. 1,500 against Rs. 312-8 and Rs. 1,580 respectively at the end of last week.

*Miscellaneous.*—*Alcock Ashdown* are lower at Rs. 475 with *Belapur* at Rs. 231. *Scindia Steam* were Rs. 20-6, *Bombay Tramways* Rs. 131-4, *Shivrajpur* Rs. 36-8, *Premier Construction* Rs. 118 and *New India Insurance* Rs. 69-8. A.C.C. were unchanged at Rs. 168.

### THE STEEL CORPORATION OF BENGAL, LIMITED.

**NOTICE.**

**In view of the uncertainty of mails from and to the United Kingdom the publication of the Directors' Report and the Accounts of the Steel Corporation of Bengal, Limited, for the year ended 31st December, 1941, which are to be published simultaneously in India and England, will be delayed. All possible steps are, however, being taken to have matters expedited. In order to enable shareholders to obtain payment of their dividends as soon as possible, however, the Directors have sanctioned the payment by way of an ad-interim dividend of Annas ten per share on the Ordinary shares of the Corporation ranking for dividend for the year ended 31st December, 1941, which, shareholders must understand, will be the final dividend for the year. The Transfer Books of the Corporation will be closed from 10th to 17th July, both days inclusive. Payment will be made on and after 31st July, to those members or their mandatees whose names appear in the registers on the 9th July, 1942.**

**By Order of the Board,**

**BURN & CO.,**
**Managing Agents.**

**Calcutta, 28th June, 1942.**

### THE NEW MANBHOOM COAL COMPANY, LIMITED

**NOTICE** is hereby given that the Half-yearly Ordinary General Meeting of the Shareholders will be held at the Registered Office of the Company, No. 14, Old Court House Street, Calcutta, on Monday, the 6th day of July, 1942, at 3 p.m., for the following purposes:—

(1) To receive and pass the Directors' Report and the Audited Accounts for the half-year ended 31st March, 1942.
(2) To declare a dividend.
(3) To elect Directors in place of the retiring Directors.
(4) To elect Auditors for the ensuing year, and to fix their remuneration.
(5) To transact any other business that may be brought forward.

The Share Transfer Books of the Company will be closed from the 30th June, 1942 to the 6th July, 1942, both days inclusive.

**OCTAVIUS STEEL & CO., LTD.,**

| Carry forward .. | 11,898 | 9,955 | 9,292 | 12,203 |

*(Half-yearly meeting, 7th July, 1942 at 11-30 A.M.)*

*Audited accounts for the half-year ended February 28, 1942:—*

| | Rs. | As. | P. |
|---|---|---|---|
| The balance available for appropriation after including the amount brought forward from the previous half-year is .. .. | 30,604 | 1 | 0 |
| out of which the directors recommend the payment of a dividend at the rate of 5% per annum free of income-tax absorbing .. | 18,706 | 0 | 0 |
| Leaving to be carried forward .. .. | 11,898 | 1 | 0 |

*Output.*—Raisings for the last three half-years were as follows:

| Half-year ended | | Raisings Rs. | A. P. |
|---|---|---|---|
| 28th February 1942 | .. .. | 13,260 | |
| 31st August, 1941 | .. .. | 12,711 | |
| 28th February 1941 | .. .. | 10,640 | |

*Sales.*—Owing to the acute shortage of wagons in the Bengal Coalfields enquiries for Nazira coal have been greatly in excess of the present output capacity of the colliery. Unfortunately the wagon shortage has now spread to Assam and difficulty is being experienced in meeting normal demands.

*Managing Agents.*—Messrs. Shaw Wallace & Co.

*Authorised Capital—Rs. 9,00,000 in 90,000 shares of Rs. 10 each. Issued and Subscribed—Rs. 7,48,240 in 74,824 shares, fully paid-up.*

Synopsis of the balance sheet as at 28th February, 1942:—

| *Liabilities.* | Rs. | *Assets.* | Rs. |
|---|---|---|---|
| Capital paid-up .. | 7,48,240 | Gross Block .. | 12,48,637 |
| Reserves .. | 74,393 | Depreciation .. | 9,08,637 |
| Current debts .. | 88,701 | | |
| Carry forward .. | 11,898 | Block (net) .. | 3,40,000 |
| | | Stock of Coal .. | 2,472 |
| | | Stock of Stores .. | 39,935 |
| | | Outstandings .. | 71,612 |
| | | Investments .. | 3,10,000 |
| | | Cash .. | 1,59,213 |
| Total .. | 9,23,232 | Total .. | 9,23,232 |
| | | Total Liquid Assets .. | 5,83,232 |

## REWA COALFIELDS, LIMITED

| | Half-year ended 31.12.1941 | 30.6.1941 | 31.12.1940 | 30.6.1940 |

## SOUTH KARANPURA COAL COMPANY, LIMITED

*Audited accounts for the half-year ended February 28, 1942:—*

The market remained steady throughout the half-year. Wagon supply, however, remained extremely erratic due to the acute shortage of transport facilities and this position appears liable to deteriorate further.

*Raisings and Despaches.*—During the half-year 40,709 tons were raised and 33,279 tons were despatched.

*Accounts.*—The Profit and Loss Account including the debit balance of Rs. 26,580-1-10 brought forward and after providing Rs. 25,949 for depreciation, shows a debit balance of Rs. 47,534-10-8 which is carried forward.

*Managing Agents.*—Messrs. Bird & Co.

*Authorised Capital—Rs. 30,00,000 in 3,00,000 shares of Rs. 10 each. Issued and Subscribed—Rs. 17,50,000 in 1,75,000 shares, fully paid-up.*

Synopsis of the balance sheet as at 28th February, 1942:—

| *Liabilities.* | Rs. | *Assets.* | Rs. |
|---|---|---|---|
| Capital Paid-up .. | 17,50,000 | Gross Block .. | 17,83,380 |

| Dividend amount .. | 2,500 | 6,250 | 6,250 | 12,500 |
| Dividend % .. | 2 | 5 | 5 | 10 |
| Carry forward .. | 31,094 | 30,824 | 29,863 | 29,357 |

*(Annual meeting, held 26th June, 1942)*

*Audited accounts for the year ended January 31, 1942:—*

*Accounts.*—The net profit of the Company for the year under review is Rs. 2,769-5-9. This sum, added to last year's Carry Forward figure of Rs. 30,824-8-7, makes a total of Rs. 33,593-14-4 available for distribution and it is recommended that this sum be disposed of as follows:—

| | Rs. | A. | P. |
|---|---|---|---|
| Dividend at the rate of 2% without any deduction in respect of Incometax paid by the Company | 2,500 | 0 | 0 |
| To be carried forward | 31,093 | 14 | 4 |
| Total | 33,593 | 14 | 4 |

*Raisings.*—during the year totalled 40,071 tons against 30,600 tons for 1940-41. It was not possible to take advantage of the better market towards the end of the year due to the scarcity of wagons, and a number of profitable orders for public supply have had to be cancelled on this account. Increased costs have absorbed much of the anticipated profit from orders which should have provided more satisfactory results this year.

The Company was successful in obtaining a State Railway Order for 24,000 tons Steam Coal for delivery during 1942-43 and orders have been obtained which will absorb the available slack during the present year.

*Despatches.*—These totalled 38,394 tons as compared with 28,805 tons in the preceding year.

*Market.*—Prices have improved and demand has been particularly good during the past few months. The wagon shortage is acute and there is little prospect of an early improvement.

*Managing Agents.*—Messrs. Gillanders Arbuthnot & Co.

*Authorised, Issued and Subscribed Capital—Rs. 1,25,000 in 50,000 shares of Rs. 2½ each, fully paid-up.*

Synopsis of the balance sheet as at 31st January, 1942:—

| *Liabilities.* | Rs. | *Assets.* | Rs. |
|---|---|---|---|
| Capital Paid-up | 1,25,000 | Gross Block | 8,95,951 |
| Reserves | 11,179 | Depreciation | 8,08,145 |
| Current debts | 34,666 | | |
| Carry forward | 31,094 | Block (net) | 87,806 |
| | | Stores and Spares | 33,896 |

*(Anual meeting, held 17th June, 1942)*

*Audited accounts for the year ended March 31, 1942:—*

After writing off the balance of the Development Account and allowing for Depreciation, Incometax and Excess Profits Tax, there is a balance of Rs. 34,153-15-0 available for distribution which, it is proposed, should be allocated as follows:—

| | Rs. | A. | P. |
|---|---|---|---|
| Payment of a dividend of 5 percent on the ordinary share capital of the company | 19,250 | 0 | 0 |
| Payment of a dividend of 5 percent on the deferred shares of the company | 7,700 | 0 | 0 |
| Carry forward | 7,208 | 15 | 0 |

During the year under review the Works have been fully occupied and extensions are now under construction which will further increase the Works' productive capacity.

*Managing Agents.*—Messrs. A. B. C. Coupler & Engineering Co., (India) Ld.

*Authorised Capital—Rs. 21,00,000 in 3,00,000 Ordy. of Rs. 5 and 6,00,000 Defd. of Re. 1 each. Issued and Subscribed—Rs. 5,39,000 in 77,000 Ordy. and 1,54,000 Defd., both fully paid-up.*

*Synopsis of* the balance sheet as at 31st March, 1942:—

| *Liabilities.* | Rs. | *Assets.* | Rs. |

| Dividend % | 12½ | 12½ | 10 | 10 |
| Carry forward | 6,117 | *14,809* | 15,672 | 10,624 |

*(Annual meeting, held 17th June, 1942)*

*Audited Accounts for the year ended March 31, 1942:—*

After allowing for depreciation, providing for incometax and excess profits tax and paying a 5 percent interim dividend, there is a sum of Rs. 1,07,887-6-7 as the balance of profit and loss account to which must be added Rs. 14,808-12-7 (brought forward) making a total of Rs. 1,22,696-3-2 which is recommended to be allocated as follows:—

| | Rs. | A. | P. |
|---|---|---|---|
| 1. Payment of a final dividend of 7½ per cent on the issued capital of the company | 46,578 | 12 | 0 |
| 2. General Reserve | 70,000 | 0 | 0 |
| 3. Carry forward | 6,117 | 7 | 2 |

During the year under review the Works have been maintained in full productive capacity. Further extensions have been undertaken and these are progressing well.

*Managing Agents.*—Messrs. George Spencer Moulton & Co. (India) Ltd.

*Authorised Capital—Rs. 10,00,000 in 1,00,000 Ordy. of Rs. 10 each. Issued and Subscribed—Rs. 6,21,050 in 62,105 shares, fully paid-up.*

Synopsis of the balance sheet as at 31st March, 1942:—

| *Liabilities.* | Rs. | *Assets.* | Rs. |

## BAREILLY ELECTRICITY SUPPLY COMPANY, LIMITED

*Audited accounts for the half-year ended December* 31, 1941:—

*Accounts.*—After providing for all charges including Rs. 27,897 on account of depreciation, and placing Rs. 15,000 to General Reserve and Rs. 5,000 to Reserves and Rs. 5,000 to Reserve for Contingencies, a balance of Rs. 25,214-5-9 including Rs. 11,575-12-0 brought forward from the previous half-year remains available and this it is recommended to be disposed of as follows:—

| | Rs. | A. | P. |
|---|---|---|---|
| Payment of a dividend at the rate of 6% per annum free of incometax | 18,000 | 0 | 0 |
| Carry forward to next half-year | 7,214 | 5 | 9 |
| Total | 25,214 | 5 | 9 |

During the half-year the steam plant has run satisfactorily and a maximum load of 800 k.w., was experienced.

The Distribution System was added to in several roads, streets and lanes for the purpose of affording a supply to new consumers.

The number of consumers totalled 2,541 indicating an increase of 178 since December 31, 1940.

The street lamps installed 1,791 as compared with 1,786 at December, 1940.

The total sales of the undertaking during the half-year amounted to 11,99,154 units which is an increase of 1,60,800 when compared with the total sales for the corresponding half-year of 1940.

The growth of the undertaking can be readily ascertained from the following comparative table for past five-half years:—

| *Half-year ended* | *Units sold* | *Revenue* Rs. |
|---|---|---|
| 31st December 1939 | 8,95,219 | 1,68,572 |
| 30th June, 1940 | 11,49,777 | 1,97,089 |
| 31st December 1940 | 10,38,354 | 1,85,247 |
| 30th June 1941 | 13,19,362 | 2,26,471 |
| 31st December 1941 | 11,99,154 | 2,12,639 |

*Costs & Reserves.*—The Revenue totalled Rs. 2,12,639 an increase of Rs. 27,392 when compared with the corresponding period of 1940 but working expenses have been affected by the increased cost of fuel, oil, stores and materials.

*Managing Agents.*—Messrs. Martin & Co.

*Authorised Capital*—Rs. 15,00,000 *in* 150,000 *shares of Rs.* 10. *Issued and Subscribed*—Rs. 6,00,000 *in* 60,000 *shares, fully paid up.*

Synopsis of the Balance Sheet as at 31st December, 1941:—

| *Liabilities.* | Rs. | *Assets.* | Rs. |
|---|---|---|---|
| Capital Paid up | 6,00,000 | Gross Block | 12,94,084 |
| Reserves and other funds | 2,07,500 | Depreciation | 6,14,803 |
| Current debts | 2,88,057 | Net Block | 6,79,281 |
| Carry forward | 7,214 | Stores etc. | 92,928 |
| | | Outstandings | 53,808 |
| | | Investments | 50,398 |
| | | Cash Balances | 2,26,356 |
| Total | 11,02,771 | Total | 11,02,771 |
| | | Total Liquid Assets | 4,23,490 |

## SAUGOR ELECTRICITY SUPPLY COMPANY, LIMITED

*Audited accounts for the half-year ended October* 31, 1941:—

*Accounts.*—After providing for all charges including Rs. 6,912 on account of Depreciation and writing off Rs. 10,000 against Development a credit of Rs. 9,445-2-5 including Rs. 6,469-10-3 brought forward from the previous half-year remains available and this recommended to be disposed of as follows:—

| | Rs. | A. | P. |
|---|---|---|---|
| Payment of a dividend at the rate of 4% per annum free of income-tax | 6,000 | 0 | 0 |
| Carying forward to next half-year | 3,444 | 2 | 5 |
| Total | 9,445 | 2 | 5 |

Plant has run satisfactorily and is being maintained in good condition during the half-year maximum load was 210 k.w.

Distribution system was added to for affording supply to new consumer.

Total number of consumers on December 31, 1941 was 890, an increase of 112 when compared with the total of 778 at December 31, 1940.

Total sales of the undertaking during the half-year amounted to 297,956 units, an increase of 56,023 on the total sales for the half-year amounted to 297,956 units, an increase of 56,023 on the total sales for the half-year ended December 1940. Normal development of the undertaking has been maintained as may be seen from the following comparative table of the working results for the last five half-years.

| *Half-year ended* | *Consumers* | *Units Sold* | *Revenue* (Rupees) |
|---|---|---|---|
| 31st December 1939 | 677 | 1,96,459 | 40,888 |
| 30th June 1940 | 717 | 2,15,669 | 50,678 |
| 31st December 1940 | 778 | 2,41,933 | 60,990 |
| 30th June 1941 | 790 | 2,58,001 | 65,269 |
| 31st December 1941 | 890 | 2,97,956 | 90,459 |

*Revenue & Cost.*—Revenue totalled Rs. 90,459 an increase of Rs. 29,469 over the corresponding period of 1940, but working expenses have been affected by the increased cost of fuel oil, stores and materials.

*Managing Agents.*—Messrs. Martin & Co.

*Authorised Capital—Rs.* 7,50,000 *in* 75,000 *shares of Rs.* 10. *Issued and Subscribed*—Rs. 3,00,000 *in* 30,000 *shares, fully paid up.*

Synopsis of the balance sheet as at 31st December, 1941:—

| *Liabilities.* | Rs. | *Assets.* | Rs. |
|---|---|---|---|
| Paid up capital | 3,00,000 | Gross Block | 3,82,202 |
| Reserves | 5,000 | Depreciation | 1,71,423 |
| Current debts | 1,05,103 | | |
| Carry forward | 3,445 | Net Block | 2,10,779 |
| | | Stores etc. | 39,971 |
| | | Outstandings | 33,867 |
| | | Investments | 22,867 |
| | | Cash Balances | 1,05,864 |
| Total | 4,13,548 | Total | 4,13,548 |
| | | Total Liquid Assets | 2,02,769 |

## FORTHCOMING MEETINGS

*Hooghly Mills Co., Ld.*—Meeting, 30th June, 1942 at 3 p.m. Transfer Books closed from the 24th to the 30th June, 1942. *Dividends proposed* 50 *per cent and* 10 *per cent on the Ordinary and Preference shares respectively.*

*Nazira Coal Co., Ld.*—Meeting, 7th July, 1942 at 11-30 a.m. Transfer Books closed from the 1st to the 7th July 1942. *Dividend proposed* 5 *per cent per annum.*

*Rewa Coalfields, Limited.*—Meeting, 3rd July, 1942 at noon. Transfer Books closed from the 26th June to the 3rd July, 1942. *Dividend proposed* 17½ *per cent per annum.*

*South Karanpura Coal Co., Ld.*—Meeting, 29th June, 1942 at 11 a.m. Transfer Books closed from the 15th to the 29th June, 1942. *Dividend proposed nil.*

*Titaghur Paper Mills Co., Ltd.*—Meeting, 30th June, 1942 at 11 a.m. Transfer Books closed from 15th to 30th June, 1942. *Dividends proposed As.* 8 *per 'A' and 'B' Ordinary shares together with a Bonus of As.* 4 *per share; As.* 2 *per Preferred Ordinary Share; Rs.* 4 *per 1st Preference Share and Rs.* 2½ *per 2nd Preference Share.*
