ISSUED WEEKLY

Vol. XXIX. No. 8 SATURDAY, FEBRUARY 21, 1942 Price Re. 1

## Insure and Increase Nation's Strength

Financial Independence of the individual is the measure of Nation's financial strength.

In this hour of world turmoil, all Life Insurance Policy-holders should take stock of their insurance cover and ascertain just how strongly they are fortified against the unpredictable that lies ahead.

And, those individuals who have not yet made provision for their protection need do so without delay and thereby contribute towards Nation's strength.

Be advised and write to-day to

## East Indian Railway

### TRANSPORT PROBLEMS

### THE DELAYED WAGON

If, on an average a wagon is tied up for 10 days on a single operation, the wagon can do 36 such trips in a year. If the time was reduced to 8 days it could do 45 trips in a year. Results—an increase of transport capacity of the same wagon 25%. India's main Railways are moving traffic at the rate of over 600,000 loaded wagons per month. A saving of 20% in wagon days would release capacity to the extent of 150,000 wagons per month. These are abnormal times. They call for abnormal efforts to cut out delays and WHERE THERE IS A WILL, THERE IS A WAY.

## WORLD OF INDIAN FINANCE

*Calcutta, Friday Evening.*

THERE is no change to report in the money market though the fall of Singapore has administered another cold douche to the gilt-edged market and introduced a rather quietish tendency in the exchange market. Short credits have been a case of plentiful supply and hardly any demand. Interbank call money is quoting nominally ½ per cent in Calcutta and ¼ per cent in Bombay. On the weekly Treasury Bill day, the amount on offer was Rs. 2 crores; and applications exceeded this amount by Rs. 76 lakhs. Bidding cannot, therefore, be said to be keen. Nevertheless, the average rate of accepted tenders remains unchanged at 1 per cent. For over six weeks, the average discount rate has been 1 per cent, except for one week when the rate receded by 1 pie. Sales of intermediate Treasury Bills fetched the paltry amount of Rs. 10¼ lakhs. The offer of tender bills for next week continues to be Rs. 2 crores; and the sales of tap bills are also to continue at the unchanged rate of Rs. 99-12-3.

In last week's review of the money market, it was suggested that the direct threat of war to India would appear to have greatly accelerated war expenditure. Deposits of the Central Government with the Reserve Bank have declined from Rs. 4.85 crores on February 6 to Rs. 3.39 crores on February 13. This is the lowest level for Central Government's cash balance since the Reserve Bank came into existence. So far as we remember, even when the Imperial Bank was the bankers to the Government, so low a level of Government deposits was never known. This raises the question about the agreement between the Government and the Reserve Bank whereby the former have to maintain a minimum deposit with the central banking institution. We have no knowledge as to what the minimum under the agreement is. But we should have thought that, so far as the Central Government are concerned, the conventional minimum could not be less than Rs. 5 crores. Even the present cash balance of Rs. 3.39 crores has been possible only after further recourse to ways and means advances from the Reserve Bank. The return of the Reserve Bank for February 6, showed ways and means advances at Rs. 4.01 crores. The latest figure is Rs. 7.95 crores. It may be taken as certain that further large advances will be disclosed in the bank return to be issued next week. Nor is it unlikely that, in the week following the next, similar assistance from the Reserve Bank is found necessary. For, the month-end receipt of sterling from the British Government would not be recorded earlier than the return of the Reserve Bank for the first week of March. If the Central Government's expenditure in the next fortnight should be on the scale of the last two weeks, we may see a new record in the total for ways and means advances.

To enable the Reserve Bank to lend on such a generous scale to the Government, sterling securities have to be transferred from the banking to the issue department, and the additional currency created there against has to be utilised for the purpose. With the present cash position of the Central Government, with the ways and means advances already nearly Rs. 8 crores, and with considerable war expenditure in prospect, the Government have seriously to consider whether the occasion is not opportune for their reinforcing their cash balance by either delivering rupee notes to the Reserve Bank or by issuing *ad hoc* Treasury Bills to the bank. While the Central Treasury was in affluent circumstances, it used its surplus balance for the withdrawal of rupee securities from the issue department of the Reserve Bank. Now that the ways and means machinery is causing friction, the reversing of this process suggests itself as a logical course.

The cash balances of the Government of Burma have also experienced a sharp decline from Rs. 2.79 crores to Rs. 1.25 crores. It is obvious that the strain of war expenditure on the Burma Government is equally heavy.

The Reserve Bank is presumably continuing the open market operations as is shown by the increase in investments from Rs. 12.33 crores to Rs. 13.09 crores. Foreign balances in the banking department have declined from Rs. 45.22 crores to Rs. 36.41 crores. This is due to the transfer of sterling securities to the issue department.

There has been a further expansion of currency against sterling securities in the week ended February 13. Sterling securities in the issue department have risen from Rs. 258.63 crores to Rs. 268.63 crores. This expansion of Rs. 10 crores follows a similar expansion in the first week of February. Since December 26, there has been currency expansion for Rs. 41 crores against sterling securities. Circulation of rupee coin has also gone up during this period. Rupee coin held in the issue department was only Rs. 30.07 crores on February 13, compared to Rs. 34.18 crores on December 26. That is, there has been an outflow of rupee coin for nearly Rs. 4 crores since the end of December. Active note circulation in India was Rs. 348.43 crores on February 13, as compared with Rs. 342.68 crores in the previous week. Active note circulation in Burma also has risen from Rs. 23.22 crores to Rs. 23.81 crores.

The list for the second Defence Loan has been closed, presumably, because of the anomalous position created by the market rate being nearly Rs. 4 less than the issue price. In fact, it would have been better for the giltedged market if the loan had been withdrawn two months earlier. The subscriptions for the second Defence Loan have now reached a total of nearly Rs. 60 crores. And it is not altogether satisfactory to allow a loan to reach unduly heavy dimensions as the problem of conversion at the time of its maturity may prove stupendous. In the conditions now prevailing in the giltedged market, it will be impossible to contemplate the issue of a third Defence Loan. For the time being, the best course will be to facilitate the functioning of the ways and means machinery by recourse to such devices as expansion of currency against rupee coin or against rupee securities. Even the experiment of Treasury deposits may be tried. By such means, the next three months must be tided over, as it is of paramount importance to allow funds to accumulate in the giltedged market. We have the Defence Loan on tap for two years. The springs in the giltedged market have thus been dried up. There is the important consideration that open market purchases have produced no effect whatsoever. It is, therefore, wise to refrain from causing any disturbance in the giltedged market; and the withdrawal of a loan sold through the tap has the effect of removing what has been a constant irritant.

The exchange market has been dull, but in the earlier part of the week there was remittance enquiry. There was also fair showing of bills.

Banks were sellers of T.T. on London for Ready up to six months forward at 1s. 5 31|32d., and banks were buyers of T.T. on London up to six months forward at 1s. 6 1|32d.

D.A. sight bills quoted 1s. 6 9|32d., for three months and 1s. 6 11|32d. for four months.

Dollars were Rs. 332-12.

Interbank call money remains unchanged at ½ per cent no borrowers.

Firms money for call and short quoted ¼ per cent and one to four months deposits ½ per cent.

## TREASURY BILLS

### India

Tenders for Rs. 2,00,00,000 (Rupees two crores) of three months' Government of India Treasury Bills were opened on Tuesday, February 17, 1942. Total amount offered was Rs. 2,76,00,000 (2 crores and 76 lakhs). Tenders at Rs. 99-12-3 per cent were accepted in full and those at Rs. 99-12-0 per cent were allotted approximately 72 per cent. Total amount accepted was Rs. 2 crores, the average rate of accepted tenders being Re. 1 per cent (Rupee one per cent) per annum.

Tenders for Rs. 2,00,00,000 (Rupees two crores) of three months' Government of India Treasury Bills will be received on Tuesday, February 24, 1942. Successful tenderers should make payment on Friday, February 27, 1942. Other conditions are as usual.

Three months' Intermediates will be sold from February 18 to 23, 1942 at Rs. 99-12-3 per cent subject to the conditions previously announced (viz. sales can be stopped at any time without previous notice if Government think it necessary).

Three months' Intermediates sold from February 11, 1942 to February 16, 1942 amounted to Rs. 10,25,000 (Rupees ten lakhs and twenty five thousand).

During the week ended February 13, 1942 Government of India Treasury Bills for Rs. 1,11,00,000 (Rupees one crore and eleven lakhs) were sold in favour of the Issue Department of the Reserve Bank of India.

# Finance Abroad

Thursday Morning.

It is an ill-wind that blows the bullion balloon up, and many have certainly been reminded of that when the price of gold went up to Rs. 52.8 per tola in Bombay on Monday. To find the sovereign quoted at Rs. 38 per each specimen shows that Indians are more than usually fond of St. George's effigy. For it might truly be said that the dragon of diffidence has not been slain, and even on the reckoning that West Australia's contribution to the world's gold supply is in danger at present it is surprising that the price of gold has gone up within a week by Rs. 4 per tola. In the absence of any change whatsoever in export parity and oversea quotations for gold, it is certainly shocking to find that gold commands an unnatural premium. The result is certainly disturbing for all other markets which remain prostrate while the *choksy* makes hay. If the bullion boom has not come into the news yet it is certainly a pointer to the upcountry demand for gold. The supply of gold in Bombay should have been reduced by recent buying and a recovery after the recent drop is assuredly on the cards. It is necessary to relate the hectic and enormous jump with the stationary London quotation of eight guineas per ounce. The silver market in India has firmed up in a jiffy along with the gold while the London and New York prices are unchanged at 23½ and 35⅛ cents respectively per fine ounce. Few will be inclined to see good in this heady jump in bullion prices. Though it may seem that the price is below the rate quoted in Rangoon by the middle of December, it is hardly encouraging to find that market morale is so low as to sustain a further advance in bullion prices.

On a partial view it may be viewed as a sign of unprecedented currency depreciation but for the fact that the leading currencies are still anchored soundly to the sterling and dollar levels ruling for months. There has been no change in the Swiss franc or Swedish krone which are unconnected with sterling and are currencies that are backed by extensive foreign exchange reserves and overseas balances. They are unchanged in relation to sterling at any rate. In spite of the war coming nearer the N.E.I. guilder is unchanged at 7.58|62 guilders to the pound. Even the occupation of part of Dutch territory has not touched the currency. The disappearance of the Straits dollar from the list of currencies quoted does not mean that in some islands and nearby Macao the coin is not met with. Even the Japs cannot demonetise it and it is but right to emphasise that in Portuguese Timor as in other adjacent territory the Straits currency should still be met with.

The appearance of a further notice to the effect that several foreign currencies except Iranian, Afghan and Ceylon currency are banned under the Defence Rules is a precaution taken against the Japs trying to plant stolen notes in other countries in return for other currency. It is, of course, in line with previous measures but the crowds of Indian evacuees may be prejudiced to some extent unless the Exchange Control Board at the other end has been quite helpful to the involuntary emigrants prior to embarkation. Very little is known as to the intentions of Japan. General Tojo's claim that the foundations of a greater East Asia are being well and truly laid is just rhetoric. The financial side will be uncovered soon because it is evident that Singapore will be the commercial capital of the occupied zone. How is it going to be done. The yen is not likely to invade the outer realm, and the way in which Nanking has been induced to act against the British Concessions shows that puppet regimes will be set up to do the dirty work for the Japs. What the Business families think about the new adventure is not known at all. The millionaire Viscounts may not be merged in Imperial Headquarters. They are perhaps watching the hungry guest eat his fill. The obscurity which surrounds the operations in Burma does not permit one to guess the way in which markets shape abroad. While we know that Cable and Wireless weakens because of the danger to its many installations, and Burma Oil is now quoted below both V.O.C. and Attock Oil it is surprising that the tone of raided Rangoon is unknown. There cannot be any change in the rupee-sterling rate, as quoted in Rangoon, which must surely have some link with the Chinese currency at present in spite of the freezing order. It is clear that the Chinese innings against Japan has not come to an end. If Marshal Chiang's G.C.B. is another mark of Allied assistance to China one may hope that the Rangoon rupee will be tied firmly to the Chungking dollar (one cannot speak of the Shanghai dollar at present). The Japs are likely to muscle in on insurance business first as Germany did. The help that is to be given to Russia through the appropriation of a thousand million dollars is big news at present. The Chinese have certainly got their share first and it is clear that their banking and finance are independent of maritime trade. For some years China will have no foreign trade, and won't have to think at all about her old external loans because her currency has depreciated so much that it is impossible to expect the citizen of China to pay in sterling. Price control is being practised of late to conquer the trouble due to inflation. In this critical year, an epithet clapped by Mr. Donald Nelson of W.P.B. finance is of little moment. When the U.S.A. allots 32¾ billion dollars for ships and munitions and hopes to launch 3 ships a day in order to get a fleet of 2,877 ships in record time, it is manifest that money is a minor matter. The U. S. legislation keeps on voting the money as in the form of votes of credit and the last one for 32¾ billion dollars or so proved that the production programme is not going to suffer for lack of money. The U.S.A. is not going to worry about foreign trade when the gateways to Panama are menaced. And the Aruba episode will compel the U.S.A. to make new arrangements for the watch on the Caribbean.

The depletion of the stock of dollars belonging to the British Government has not obviously affected the rates for either the U.S. or the Canadian currency. The usual ban on sending money out to China will be relaxed as the Viceroy intends to send money collected on a new flag day to China for relief purposes (compare this with the Australian ban on relief funds generally). The control will be relaxed but that is not the only way in which financial help will flow to China. The U.S.A. is clearly going to give China and Russia help before thinking about more supplies to Britain under Lease-Lend. If Britain chooses to make available supplies to the N.E.I. or China under its own defence plan that does not concern the U.S.A.

The fact that U.S. dollars are treated as local currency in Australia has only recently been made known. The A.B.D.A. front's strength lies in the enormous resources at the disposal of the U.S.A. and U.S. citizens who do not bother to change their money in advance experience no trouble at least in Australia. The Australian Liberty Loan is clearly modelled on the U.S. pattern. Mr. Curtin's appeal (for £A 35 millions) came after it was learnt that part of the money had been offered in the Commonwealth the people are again advised to spend less and save more. Half the money has come from formal opening of the list and in this respect Australia's example will not be lost on India where the total effort needed today has hardly emerged so far.

Royal Dutch has weakened on the destruction of Palembang where oil and plant worth 50 to 60 million sterling has gone up in smoke. Rubber shares in London have eased further and the firmness of giltedged is almost exceptional. The tightness of money noticed last week must have continued in spite of capital and interest payments to the market because the need for cash to pay taxes should have persisted. The raising of the tender issue to 75 million this week points to the need for borrowing more when treasury deposits are not taken. There is singularly little interest in the 3 percent war. Mr. Churchill's statement like the Straits episode and the retirement of Lord Beaverbrook are bigger things from the market angle than the Exchequer returns or the attenuated holding of bullion in the Bank of England.

Australia alone is not floating a Victory Loan. Canada wants $600 million from the investor and has got over $51 millions in a single day. There may be disagreement about conscription for oversea service but there is none about raising money. Canada's war effort is certainly bigger than even the Job done in Britain, and it is coming to be recognised that Mr. Mackenzie King who has kept domestic politics out of the war is the best collaborator the War Cabinet has had.

## Prosperous Railways

The story of the working of Indian railways, which Sir Andrew Clow unfolded in the Indian Legislative Assembly and Sir Leonard Wilson in the Council of State, is one of exceptionally heavy strain but of gratifying results. We congratulate Sir Andrew and Sir Leonard on their masterly survey of all the important events in the Railway Administration during the two and a half difficult years of war; and equally entitled to congratulation is Mr. T. S. Sankara Ayyar, the Financial Commissioner of Railways, for the lucid exposition and comparative study of figures in the Explanatory Memorandum. The Railway Budget lends itself to study from various angles; and we think it most to address ourselves this week to an examination of the budget from the point of view of its bearing on the Central Budget, which will be laid by the Finance Member before the Assembly at 5 p.m. (standard time) on Saturday next.

Even more than the Communications Member and the Chief Commissioner of Railways, the Finance Member has reason to be fully gratified with the financial results of the Railways during the three years covered in the budget. The actual net results of 1940-41 were better than those of 1939-40 by Rs. 14.13 crores, and exceeded even the revised estimate by Rs. 3.87 crores. Out of the surplus of Rs. 18.46 crores, Rs. 12.16 crores were paid to general revenues. The revised estimates had provided for a contribution of Rs. 9.96 crores from the Railways to general revenues. The general revenues have thus received Rs. 2.20 crores more than Sir Jeremy expected this time last year. On the basis of the 1940-41 estimates of the Railway Member, Sir Jeremy budgetted for a deficit of Rs. 8.42 crores in that year. To the extent that the Railways have increased their contribution by Rs. 2.20 crores, the deficit anticipated for 1940-41 is reduced to Rs. 6.22 crores.

The Finance Member has been helped by the Railways also in his ways and means budget more than he originally expected. The original estimate of the amount to be transferred to the Railway Reserve Fund was Rs. 4.63 crores. The amount transferred in the actuals of 1940-41 is Rs. 6.30 crores. The Central Government's ways and means budget has thus been strengthened to the extent of Rs. 1.73 crores. At this point, it is pertinent to remark that accretions in the Railway Reserve Fund and in the Railway Depreciation Fund are mainly book entries so far as the Railways are concerned; their real value is to the ways and means budget of the Central Government inasmuch as the amounts to the credit of Railway Reserve and Railway Depreciation Funds are to be maintained with the Central Government in the capacity of the latter as bankers of the Railways.

The Railway Depreciation Fund received an appropriation of Rs. 12.64 crores from revenue. From this, an expenditure of Rs. 7.19 crores was incurred. The actual addition during the year to the Railway Depreciation Fund is Rs. 5.45 crores. This amount is, we may add, of help to the ways and means budget. At the end of 1940-41, the Railway Depreciation Fund had an actual balance of Rs. 36.60 crores. It may, however, be recalled that the Railways had draw on this fund, in their lean years, to meet budgetary deficits. The temporary loans thus due to the Railway Depreciation Fund amounted to Rs. 30.29 crores on March 31, 1941. That is to say, while the actual balance of te Railway Depreciation Fund at the end of 1940-41 was only Rs. 36.60 crores, the nominal balance was Rs. 66.89 crores.

Railway earnings during 1941-42 have made even better showing. So satisfactory, indeed, have been the earnings, that it has been decided to make certain special adjustments against revenue—adjustments for which no provision had been made in the budget. These special adjustments have the effect of reducing the surplus. In the place, expenditure on ballast renewals, which was being charged to the depreciation fund, is now to be debited to revenue. The expenditure on this account in the revised estimates for 1941-42 is Rs. 41.82 lakhs.

Secondly, the cost of assets abandoned before 1924-25 on State-managed Railways was debited to the depreciation fund and credited to capital. It has now been decided to charge the cost of such assets to revenue. The total debit on this account in 1941-42 revised estimates is Rs. 81 lakhs. The third special item is on account of branch lines dismantled for war purposes on State-managed Railways. This transaction is, thus, explained in the Explanatory Memorandum:

> "Last year, a sum of Rs. 90 lakhs was written off the capital at charge of railways on account of that balance of the cost of dismantled lines which was not covered by the contribution accumulated up to that date in the depreciation fund on this account plus the value of, or recoveries made for, released materials. This adjustment has also been reconsidered, and it has been decided, with the approval of the Auditor-General, that the more appropriate and correct procedure is to debit the uncovered balance in respect of lines dismantled direct to revenue. This debit amounts to Rs. 221.40 lakhs."

Expenditure has, thus, been increased over the original estimate by Rs. 3.44 crores on account of these three special adjustments. In spite of such big debits to revenue, the surplus in 1941-42 revised estimates is Rs. 26.20 crores, which is Rs. 7.74 crores more than the actuals of 1940-41. Out of the surplus of Rs. 26.20 crores, the contribution to general revenues will be Rs. 19.12 crores. When, on January 28, 1941, Sir Jeremy was announcing his budget proposals, he assumed a contribution of Rs. 10.34 crores from the Railways. The Central Budget is thus helped to an additional extent of Rs. 8.78 crores from the increased contribution to the Railways. This is more than 60 per cent. of the budget deficit estimated for 1941-42.

Equally favourable are the railway results in 1941-42 from the point of view of Sir Jeremy's ways and means budget. After paying Rs. 19.12 crores for general revenues, the surplus left in the current year is Rs. 7.08 crores In the light of the decision now taken to treat the payments to general revenues as repayments of arrear contribution, it will follow logically that the portion of the surplus, which is finally left as the share of the railways, should be taken in reduction of the loan from the depreciation fund. The balance of Rs. 7.08 crores is, therefore, to be credited to the Railway Depreciation Fund. We may repeat that this is only a book entry so far as the Railways are concerned; and its real value is in providing further assistance to the ways and means budget of the Central Government. The routine transactions of the Railway Depreciation Fund provide the usual contribution to the ways and means budget. The normal contribution to the Fund in the current year will be Rs. 12.68 crores, while the net expenditure on renewals and replacements, chargeable to the Fund, is expected to be Rs. 5.12 crores. The Fund, thus, receives on balance Rs. 7.56 crores on account of routine transactions. Including repayment of the loan, the total addition to the Railway Depreciaion Fund in the current year is Rs. 14.64 crores. In other words, the contribution of the Railways to the ways and means budget is nearly Rs. 15 crores in 1941-42. The actual balance in the Railway Depreciation Fund on March 3 1,1942 will be Rs. 51.24 crores; and the normal balance Rs. 74.45 crores.

The surplus expected in 1942-43 is Rs. 27.95 crores, which compares with Rs. 262.0 crores in the revised estimates for the current year. Of the surplus of Rs. 27.95 crores, Rs. 20.13 crores is to be the contribution of the Railways to the general revenues; and Rs. 7.82 crores will be used for the repayment of loans to the Depreciation Fund. In framing his budget proposals for the next financial year, Sir Jeremy will, thus, be able to count on Rs. 20.13 crores as the contribution from the Railways as against Rs. 10.34 crores which he assumed for his 1941-42 budget proposals. He has, therefore, an additional revenue of nearly Rs. 10 crores which should go some way towards easing his budgetary difficulties.

The appropriation to the Depreciation Fund in 1942-43 will be Rs. 12.63 crores, against which must be set the charges debitable to this Fund amounting to Rs. 7 crores. Including the transfer of Rs. 7.82 crores from the surplus towards the loan taken in earlier years from Depreciation Fund, the net accretion in this Fund during the coming year is Rs. 13.45 crores. This provides a measure of the contributions made by the Railways to Sir Jeremy's ways and means budget for 1942-43.

As a result of the new arrangements by which increased contributions are being made to general revenues so as to make up for the unpaid contributions of earlier years ,the position at the end of 1942-43 will be that all the arrears would have been wiped off; and that actually the Railways would have paid Rs. 1.31 crores over and above what is due on account of arrears. In addition to the full payment of Railway debt to general revenues the loan to the depreciation fund will be reduced by March 31, 1943 to Rs. 15.39 crores.

| | 1936-37. | 1937-38. | 1938-39. | 1939-40. | 1940-41. | Estimate. 1941-42. | 1942-43. |
|---|---|---|---|---|---|---|---|
| Percentage of net traffic receipts to capital charge .. | 4.1 | 4.3 | 4.0 | 4.3 | 6.1 | 7.1 | 7.0 |
| Percentage of working expenses (including depreciation) to gross traffic receipts .. | 66.2 | 66.2 | 67.8 | 66.4 | 58.6 | 57.6 | 56.4 |
| Percentage of working expenses (including depreciation) to gross traffic receipts .. | 52.5 | 53.0 | 54.5 | 53.5 | 47.4 | 47.6 | 46.3 |

From the point of view of the bearing of the Railway Budget on the Central Budget, the figures announced by Sir Andrew Clow this week may thus be said to make excellent showing.

The financial results for 1941-43 compared with those for the previous five years provide gratifying evidence that the working expenses of the Railways have not risen in the same proportion as gross receipts. The following table is taken from the Explanatory Memorandum:—

Although the tendency for working expenses to increase—a tendency which manifested itself in 1938-39—has been accentuated wartime conditions, yet the percentage of working expenses to gross traffic receipts as from 1940-41 has gone down very sharply on account of the large increase in traffic receipts. We may agree with the view of the Railway authorities that the position of the Indian Railways as a dividend paying concern has considerably improved.

## HOPEFUL OUTLOOK FOR SUGAR

From the most recent analysis of profits of representative companies of selected industries, it was ascertained that the most healthy recovery characterised sugar companies only. The reports issued in 1941 confirmed the belief that the process of turning the corner had ended. It was a run in the straight that lay ahead for sugar companies in the race for prosperity. The advent of war in the Far East had led to a decisive change in both position and prospects. If the Central Advisory Board did not discuss anything from the investor's angle proper, its concern for the abrogation of the international sugar agreement says much for its own views as to export prospects at present. Official views do not run counter to the belief that there are other buyers besides the Government which has to send sugar from India for troops overseas. Buying in the cheapest market viz., Java, is not possible. Karachi appears a nearer port of shipment than Surabaya. It is the war that has brought this amazing change. The altered outlook was described by Mr. Peel Yates at Cawnpore quite recently. He characterised it as wholly hopeful and in endorsing that view, we are considering changes to be, as also those in progress.

When the war broke out, the first and direct result was a rise in sugar prices. The average price of imported sugar per cwt. was Rs. 13-12-5 as against Rs. 9-11-4 in December, 1940. The decline in imports started at once and it was this which compelled many to revise their views as to the probable increase in home production. In a trice it was deduced that the decline in stocks and advances in production recorded since November, would not be enough to meet the situation which was precipitated by the war. Java is now definitely in the war zone. Her ability to export is irretrievably compromised and all earlier conclusions based on the increase in Java's stocks and the advance in Java's production in 1941 are now over-ruled by events. Events are in the saddle, and production as well as prices must run the course set by the war.

It is the peculiar and wholly favourable impact of the war that distinguishes sugar from any other article produced in India. To no other industry is a Far Eastern war a friend. Between 1939 and 1941 sugar had its full share of vicissitudes like every commodity for which the demand was reduced by war. Until the end of last year, the world was definitely encumbered with a surplus of sugar. World consumption, says the recently issued World Economic Survey, fell short of production by about one million tons both in the year September, 1939 and August, 1940 and the succeeding year. The result was a definite worsening of the statistical position in many countries. The changes in India are to be disregarded in this analysis which must emphasise that stocks at the end of August 1941, exceeded 12¼ million metric tons. For this increase in stocks, Java was directly responsible as stocks there rose by 600,000 tons. As between August 1938, and August 1941, stocks in Java almost doubled to 14 million tons nearly. The increase is explained by the loss of many markets, in addition to China, though India was a ready buyer in 1939-40 her demand for Java sugar fell off until a slight recovery was in evidence last year.

Other tropical producers were in a similar position, and the development of sugar production in Argentina and Natal while large and established producers like Cuba were in difficulties was not independent of the war. If the distribution of production at present conforms to expectations, the free market in Europe is woefully shrunken. A probable limitation of supplies in the U. S. A. may even lead to a striking advance in beet sugar production in the States. A major producer like the Philippines, is out of the sugar picture. At least four sugar producers namely, Hawaii, the Philippines, Java and Formosa, are in the Pacific. Supplies from this region are virtually withdrawn from the world pool. It is in the light of this amazing and unexpected change, that the sugar position has to be examined. Sugar may not have a direct bearing on war; it may be treated as a non-essential which, of course, means that imports will perforce fall. Stocks at ports of Deshi sugar will again have a direct influence on prices, and such increase as has been recorded under re-exports means that the limited African supplies cannot exercise much influence. The rise in sugar prices is primarily due to the war, and secondly, due to the rise in world prices. Rationing does not by itself limit an advance in prices and the New York price in the one large free market in 1941 showed an advance of over 35 percent as compared with 1940. If the rise reflected the reduced supplies forthcoming from Hawaii and the Philippines what must be the position in 1942. No answer can be furnished but a guess can be made easily enough. If Indian sugar prices have risen since December, they have only kept step with world prices.

The certainty of large supplies from Cuba and the West Indies does not affect the conclusion that New York prices would have gone up. The Louisiana planter should have a voice and the blow dealt to imports from the Philippines would have encouraged already quite ambitious hopes among American producers.

Java's difficulties may lead also to a drastic reduction of sugar in order to enhance home produced food supplies. High efficiency will not be enough to secure the sugar producer a return. Most of her markets are lost and the population of 50 millions have to get on without imported rice. An agricultural revolution in Java is certainly on the cards. That, in itself, should help India to raise its own efficiency and make the most of the opportunities created by the war.

While the sugar industry faces a promising period, there is the usual fly in the ointment. There is the usual intensified agitation for higher cane prices. Deferred payments do not appear enough to the agrarian enthusiast on a sliding scale. That is a matter far removed from the appraisal of the sugar outlook which will be concerned largely with Government orders for sugar, the continuance of transport facilities, for instance, for sugar exported to Afghanistan, and the disappearance of State Monopolies in Iran and the assistance of the British Legation. The certainty of a certain amount of competition in the Middle East and African markets does not imply that India has no chance. Perhaps the most heartening fact is the existence of reserve production capacity. India with over 150 mills can produce over 1½ million tons. There may be a surplus for export. though it would be freely argued that home prospects are vastly more important than imagined.

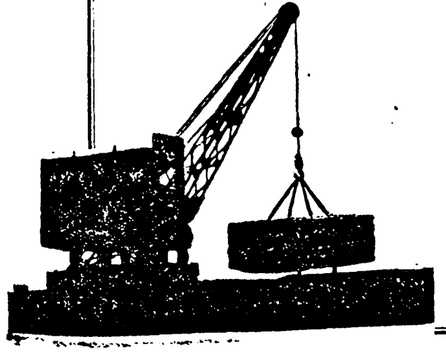
**Bengal Budget**

There have been deficits in the past as there will be in the future. If Bengal's revenue in 1942-43 is short of proposed expenditure, the force of circumstances beyond control will be recognised. In the first budget presented by the second ministry of Mr. A. K. Fazlul Huq this week there are no tax proposals. The three sales taxes—on petrol, jute and many goods except those specifically excluded—remain. They certainly add to the revenue, and explain why Dr. Mookerjee has adopted a standstill budget. Since there will be normal expansion of revenue under the Provinces' share of income-tax as under other heads, too much pessimism should not be engendered by the admission that the jute export duty will yield much less. Since the 1942 crop will be much larger (unless ordained otherwise) the jute sales tax should yield much more.

The unusual increase in extraordinary charges is primarily responsible for the deficit. A deficit of Rs. 105 lakhs as against Rs. 103 lakhs expected by Dr. Mookerjee's predecessor should be of little account. Yet the adjustment of nation-building expenditure to the exigencies of war will reduce the satisfaction inspired by the absence of taxation proposals. A very small increase in the expenditure on education, public health and industries departments only can be discerned when total expenditure shows an increase of Rs. 74.94 lakhs on the Revised Estimates. The clue to the whole position is found in the necessity for making a large increase in the sums allotted for Civil Defence.



The budget speech teemed with references to war and the task of civil defence. The increase envisaged under General Administration is as small as Rs. 1.76 lakhs as compared with the sum shown in the Revised Estimates. Debt conciliation also will call for increased expenditure in 1942-43 but then it is part of a settled policy. The budget speech showed once again that Bengal, which has seldom had a revenue surplus in preautonomy days cannot refrain from looking forward to betterment of revenue. In the past deficits have turned out to be smaller than anticipated. In 1941-42 revenue rose by Rs. 1.25 crores over the estimates. It is, of course, absurd for the taxpayer to ask for relief, and it is only possible to hope that the allocation for civil defence will be even larger than proposed at present. Since the opening balance for 1942-43 will be higher than previously estimated at Rs. 115 lakhs the ways and means position is not bad at all. If the seasons are kind this time, the Bengal deficit should be smaller than a crore—it will be less than the original gratuitous forecast of a two-crore deficit.

Total revenue is placed at Rs. 15.7 crores and this shows a rise of Rs.1.63 crores in the 1941 budget estimate and Rs.41 lakhs on the Revised Estimates of revenue in 1941-42. If total expenditure charged to revenue shows an increase at Rs. 16.75 crores as against Rs. 16.31 crores in 1941-42, the increase is inescapable. At any rate, it will be noticed that little or no capital expenditure will be undertaken while the closing balance will be reduced to Rs. 78.74 lakhs as against Rs. 114.73 lakhs at the beginning of 1942-43. To draw on free balances to meet a non-recurring deficit is accepted practice, but it may be asked why there are no proposals for adding to revenue when the deficit is repeated. The increase of Rs. 107 lakhs under the new taxes will not be enough when Excise may fail to expand as expected. To raise the employment tax to the permitted maximum of Rs. 50 is not difficult and the agricultural income-tax suggested by the Floud Commission is a useful weapon for the fiscal armoury. It is better to tax early than tax late, but the Finance Minister had little time to formulate proposals, as he admitted, having taken office in December.

The speech contained a full account of the way in which civil defence expenditure is apportioned. It has been agreed that the half and half formula cannot work. In its place came a modified formula with Bengal qualifying for interest-free loans. This, too, has been given up in favour of an arrangement that lays down that the expenditure of each financial year will be treated separately, and that it will be divided into slabs. The first slab which will be fixed at approximately 4 percent of the provincial revenue after exclusion of Adaptations and certain other receipts, will be borne entirely by the Province. The second slab of Rs. 50 lakhs will be shared equally between the Centre and the Province. Of the third slab of Rs. 50 lakhs, the Centre will have to shoulder 75 percent and 25 percent will fall on the Province. All expenditure above this point will be allocated as bet-

ween the Centre and the Province in the proportion of 87½ percent to 12½ percent. The Central Government's control of A. R. P. expenditure will be relaxed, according to Dr. Mookerjee, who observed that the list of items included in Civil Defence has been suitably enlarged and some freedom of action had been left to the Provincial Government. Bengal, it has been explained, has been treated as a special case owing to its nearness to the theatre of war, and Central grants should be larger than are due under the recent arrangement.

**Indian Insurance**

Much valuable advice to the insuring public is tendered by Mr. Sahasrabudhe, the author of **Spotlights on Indian Insurance.** Compiled on the basis of a series of insurance year books, it investigates the neglected aspects like the lapse ratio and the expense ratio. A new series of tables helps the average policyholder to see how far the well-known Indian companies satisfy the usual, accepted criteria. Written on the basis of extent material, it contains many cautions against indiscriminate choice of companies and much wholesome advice to the policyholder who does not realise that he has rights to stand up for. Managements are also advised to regulate their affairs, and the work of Mr. Sahasrabudhe has been approved by many Indian Actuaries. In his plea for efficient and economical management, it is clear that Mr. Sahasrabudhe will be joined by others who want that progress should be healthy and rapid. A suggestion of his to which attention may be drawn is that policyholders should pay for an actuary to look after their interests alongside of he Company's own actuary.

**U. S. War Production**

The appointment of Mr. Nelson to the War Production Board preceded the creation of the Ministry of Production in Britain. It is clear that the pace will be set henceforth by Washington which is not so much concerned with machinery as with materials. Departures in lease-lend policy contemplated at present, are merely designed to maximise supplies for home purposes. A recent report indicated that in 1942 alone, the U. S. A. will produce nearly three times as many weapons and war supplies as the country did in the eighteen months following the fall of France. In regard to tanks and planes, the U. S. A. will produce in 1942 as many as Hitler could manufacture in the years before 1939. War expenditure had soared from dollars 2 billion per annum to dollars 20 billion before the Production Bureau Office reported. The production of tanks and combat vehicles, according to the same Office was more than three times that of a year ago, thus giving the Army the mobility needed for offensive action. The production of guns of all types had increased at the same time by nearly five times, while the output of munitions had expanded by nearly nine times. Army plane production had also been stepped up to a point at which the U. S. A. together with Britain would be able to turn out more than the Axis countries. Most important was the reserve plant capacity kept to allow U. S. production to increase to the point at which she could seize control of the air in all areas of the world.

A big factor in the anticipated development of aircraft production is the U. S. production of aluminium. The U. S. A. and Canada are the chief producers besides Germany. Russian output is unascertained but the United States' production was in excess of Germanys' last year and it should be more so in 1942 as the U. S. A. has made sure of Dutch Guiana's bauxite amounting to a million tons in a year. The light metal is now as important as steel for the war effort. Despite the fact that over half the world output of bauxite belongs to Europe, the major development in aluminium production has been in the U. S. A. because cheap and abundant electric power is a decisive factor. The U. S. A. commands both the bauxite and power and the foundation for the aircraft side of the Victory programme had been well and truly laid last year when steps were taken to conserve aluminium supplies and extend productive plants by means of grants and loans from the Treasury.

**Japan's Shipping**

According to the recently issued World Economic Survey 1939-41, which is published by the League of Nations as the successor to the regular series for which the Economic Intelligence Service is responsible, the total gross tonnage of steam and merchant vessels belonging to Japan in 1939 amounted to 5,630,000. The progress of Japan's shipping between two wars is readily indicated by the 1913 total of 1,500,000 tons. Japan shows the greatest increase of any country under mercantile tonnage since the last war. But of the total tonnage of the world (68.5 million tons) Japan had not even a twelfth in 1939 to judge by the first cited figure and this fact must be related to the subsequent developments. The U. S. building programme of eight million tons in a year is not meant to beat Japan alone, but to bring victory to the Allies. As for Japan her dominance in the Orient may be temporary. Mr. Churchill has declared once again that punishment is inescapable, for Japan's resources are limited and strained. Yet shipping is not the difficulty that the Japanese face at present. The lack of tankers is not the problem it is assumed to be. Japan's shipping resources in spite of the doubts cast last week by a Chinese expert are considerable. The Chinese estimate was based on the demands made by the South Seas campaign. It assumed that a fleet of 1,000 ships each totalling over 1,000 tons cannot yield a total of 5,000,000 tons in shipping space. It was calculated that the expeditionary forces would take at least three million tons of cargo, and war industries in themselves would require at least two millions. The margin made available for repairs etc., cannot be less than 300,000 tons in the Chinese view. Allowance must also be made for the loss of at least 300,000 tons by Allied action after the war broke out so that the margin of freight for removing loot is more than ever scarce. But the Japanese shipping position may not be altogether independent of the naval situation. Their deep sea tonnage is now more or less coastal. Voyages are shorter, as payloads are higher and unitary control has been the rule. Fuel is not a serious problem, since both coal and oil are available to her in the occupied islands. Japan's mercantile tonnage is moreover likely to make use of shorter runs between the theatres of war and South China which, after the loss of Hongkong, presents no difficulties at all.

The Chinese view must then be conditioned by the assumption that no local stocks of food or fuel or other supplies are available to the Japanese troops. Extensive stocks may have been built up and destroyed in occupied territories, but from what had been said of looting in Penang, it is manifest that the Japanese

will try to live on the occupied countries and reduce their transport requirements to a minimum. Nevertheless, the Japanese are very weak compared with the Allies. The U.S.A. alone had over eleven million tons of shipping in 1939 and the way in which new ships are built in 100 days suggests that the Liberty Fleet of this war will come off more rapidly than imagined. In spite of the exigent demands of the Navy, the U.S. shipbuilding industry has a great part to play in war production. Japan's circumstances are different. Her production of steel is less than a tenth of the U. S. output placed at 85 million tons towards the middle of 1941. She cannot be reconditioned for her own purposes and the actual gap between Japan and the Allies should widen rapidly.

According to the most recent figures, Japan had 47 tankers with a total tonnage of 440,000 out of a total tonnage of 5.75 million which include the addition of 440,000 tons in the year 1939. That Japan has experienced difficulties in adding to her tonnage is proved by the fact that in 1938 (not a very good year) the new tonnage built was 685,000 tons. Since Japan was said to have 2,418 vessels of 100 tons and over in February, 1940 to quote a recent London estimate the difficulties of her industries in the subsequent years may have been due to inadequate tonnage as to limited production. Longer hours did not advance total industrial output as indicated on many occasions and the shortage of power was a chronic difficulty. The four year shipbuilding programme obviously could not be adhered to. There was no chance in 1940 of building a million tons because the necessary steel, say 400,000 tons, could not be procured. What could be had went for the Navy and the war industries. A bigger and better merchant marine was incompatable with the blue water policy. The point to grasp here is that in spite of traditional subsidies in recent years the heavy industries of Japan were in poor condition on account of the China Incident. The pocket battleships and the 45,000 tonners would have taken all the steel available though the Japanese might have laboured hard and got out a million tons of ships after 1940. But even then the total at present must be 6.75 million tons or so which is hardly a third of the British Empire's total tonnage. If sequestrated tonnage offsets losses at sea in recent months there is the certainty that air attack from the Indies and China too will take regular toll of Japan's ships, moving along her interior lines of communication at present. The Japanese figures will appear puny in relation to the U.S.A. shipping objectives. Already the U.S. Navy has got back two capital ships in place of those lost on the most impartial view the Japanese, for the present, are a long way off from the industrial capacity that can turn out eight million tons of shipping in a single year.

**Unprecedented Ease**

Any picture of conditions in the U. S. A. before the war with Japan broke out, is of interest in proving how America in earnest (to use Mr. Crowther's phrase) is not far removed from America in action. Industry was making more demands on banks for funds and only part of the excess reserves went into statutory deposits in the last autumn. It has been noted that in the Second Federal Reserve District alone, the funds of banks declined by a billion dollars. The outflow of money for defence production was wholly in accord with general anticipation, but in November last, there was a definite reversal of the trend since banks held larger reserves towards the end of the month. Money came into New York where easy conditions were established—more so as gold imports had fallen away steadily—and the Treasury paid out more than it took though a sharp rise was noted in the sale of defence bonds during the month. In a financial sense, at least, New York is America, and the buying of Treasury Bills by outside banks enlarged the resources of New York banks. While banks as a whole lost excess reserves through November as in the preceding months, the Treasury's short-term borrowing increased. The weekly offer of Treasury Bills was raised to 200 million dollars (though it may have been reduced since) and the interest manifested by non-metropolitan banks did not lead to any drop in the borrowing rate.

Money rates are said to have gone up in New York last November, since the banks had to make larger deposits with the Federal Reserve Board. While the Federal Reserve discount rate has long stood at 1 per cent other rates have necessarily fluctuated. In November, indeed a small rise in interest rates, on the basis of a rise in the average yield on giltedged, was noted, but this should have had no effect on the credit position since the stock exchange and acceptance business are less and less likely to make demands on the market. The parallel with Britain will be quite complete if the rates are anchored for the duration and private issues are quickly smothered. The suggestion that all securities markets should be strictly controlled, and as many as possible closed at once is known to have emanated in December from the S. E. C. The Treasury then has no rival. In November, it is reported that New York banks continued to add to their holdings of government securities and reduced their holdings of open market paper. It was certainly a portent of war conditions, to come quite soon.

The fall under bank deposits during November was accompanied by a rise in Government balances, following the diversion of funds into tax anticipation notes, defence bonds, etc. The reduction is certainly a healthy feature and the fact that the Treasury Bill rate on November 26 was only 0.267 per cent—the peak in the seasonal rise—deserves to be mentioned here. The yield on the representative 2¾ per cent tax-free 1960-65 Treasury Bonds less than two per cent. This fact must have a bearing on U. S. borrowing this year. As part of any deficit can be met by borrowing at ½ per cent the biggest deficit ever can present few terrors. When a medium term loan yields less than two per cent and ¾ per cent Treasury bonds—repayable in 1945, are quoted over par, the borrowing problem is simplified. In spite of the repeated pleas for higher taxation, it is recognised that the Federal debt would go up by leaps and bounds. The Federal Government's credit is, probably, unaffected by the war and the successful offer scheduled for December of 1,500 million of new Treasury obligations, came along without any hitch. The irregularity of Wall Street is certainly no guide to the maintenance of original, healthy conditions. The war should have made no difference to the Government as a borrower or to the banks as lenders. The special campaign to stimulate regular subscriptions to defence bonds preceded the outbreak of war—another happy, augury. Yet what Cecil de Mille did to put over Liberty loans in the last war may be repeated when publicity can count on a major industry like the films to aid and abet always.

The Indian Distinguished Service Medal was instituted in 1907 for rewarding distinguished services in the field and is awarded to Indian commissioned and non-commissioned officers and men of the regular forces, V.C.O.'s and personnel of the Indian Army Reserve, Frontier Corps, Levies, Military Police and Indian State Forces when employed under the orders of the Government of India. From 1917 onwards, non-combatants engaged on field service were also made eligible for this medal, which has on one side the effigy of the reigning Sovereign with the usual legend, and on the other a laurel wreath with the words "For Distinguished Service". The ribbon has a red centre with broad blue edges.

### NOTICE

**Machinery, spares for machinery and mill stores for the Textile Industry, other than Jute and Hemp.**

With reference to the advertisement on the above subject which has already appeared in the Press, Government have decided to introduce import control of essential mill stores with effect from the 15th March, 1942, instead of from 15th February, 1942 as appeared in the original advertisement. It will be necessary to obtain an import licence for the following essential mill stores used in the textile industries, other than jute and hemp, which arrive in India on and after the 15th of March, 1942:—

**Essential Mill Stores.**

1. **Bobbins.**
2. **Card Clothing and Card Clothing sundries.**
3. **Shuttles.**
4. **Picking Bands.**
5. **Machinery Cloths.**
6. **Roller Skins.**
7. **Pickers.**
8. **Tape and Banding for cotton, silk or wool spindle drives.**
9. **Healds and Reeds.**
10. **Loom Sundries (100m parts).**
11. **Card Cans.**
12. **Emery Fillet.**

It will be observed that an import licence is not necessary for belting, and ropes and bandings, as these have now been removed from the classification of essential mill stores.

### NORTH WESTERN RAILWAY

The public is advised that with effect from 1st March, 1942, certain concessions, detailed below, will be suspended and temporarily withdrawn. Detailed information on this subject can be obtained from any Station Master on the North Western Railway or from the Chief Commercial Manager, Lahore.

Concessions for:—

Professional Entertaining Companies, Cinema Film Producing Companies, Cricket, Football, Hockey, ball and other Sports and Athletic Teams, Polo Teams, Pigsticking Parties, Horses and Ponies for Races and Competitions, Exhibits for Exhibition and Shows, Students attending Y. W. C. A. Summer conferences, Christmas, New Year and Easter Holiday concessions, Commercial travellers' Luggage and Samples and Fox hounds belonging to hunts.

*General Manager.*

### Canada's Effort

Two years of war had sent the index of business activity in Canada to a new high level. By September, 1941, production was in excess of capacity in iron and steel as also non-ferrous metals. Chemical production, too, was in excess of capacity, and it was only in the automobile trades that any slackening after the record output of August was noticed. Paper and pulp production was little short of total plant capacity, and Government orders in most industries took up the slack caused by the seasonal factor and labour difficulties. Three years of prosperous activity for Canadian industry had raised the general composite index by 60 per cent. over the 1937 base. The result is to be noted under both employment and wages, the former rising by 26 per cent. and the latter by 29.3 per cent. Arms production has made a decisive contribution to the industrial expansion. The Empire air training scheme was one of the factors like the naval training facilities. The curtailment of civilian production came after the summer as a consequence of the unexpected expansion of the war effort.

In the two years of war ended September received orders worth 2 billion, but this total amounted to about half the total value of war orders. Canada's grain production has been reduced at the same time as her livestock production has expanded. The changes reflected in the foreign trade over a year have led to a rise of 17 per cent. in farm purchasing power but this may have fallen since owing to crop damage in the Prairie Provinces. Farmers, however, have shared in war prosperity, getting 27 per cent. of their income in 1914 from livestock and 19 per cent. from milk. If the area under wheat in 1941 has shrunk considerably the area under oats, barley, rye, and flax etc. has been almost unchanged. More grain will be used as feed and the excess of wheat supplies does not shadow the Canadian farmer's happiness. The demand for meat and dairy products is expected to help Canadian agriculture and fruit growers like Ontario's tobacco growers are better placed than ever.

Canadian industrial production as a whole was estimated to have run ahead of capacity by as 14 per cent. by August on account of overtime work. Steel output is known to have risen by 70 per cent. and mill consumption of cotton is said to have risen by 75 per cent. over the pre-war average. The production of foot wear in 1940-41 (August ending) was nearly thirty million pairs and the timber and allied industries had a fully prosperous period as newsprint output for September, 1940—August, 1941 was 3,355,000 tons while the U. S. takings were reduced and other markets took more paper and pulp than ever. Since then production has expanded. In his estimate of Canada's war effort made in October, Mr. Grant Dexter emphasised that 40 per cent. of the Dominion's income was devoted to the war effort. It is the Canadian example in regard to expenditure and saving that has influenced U. S. policy. A remarkable rise in petroleum output to over 9.9 million barrels in the year ended August, 1941 falls due for mention in any reference to the account of mining progress. A decline is to be noticed only under silver, and a vigorous search for minerals like mercury has been undertaken while the expansion of gold production is due largely to the increased output of base metals.

### North Borneo's Minerals

North Borneo may be said to rival Northern Ontario in the matter of minerals. The Japanese control of Dutch Borneo and their earlier capture of Sarawak, make it certain that the British posession has also passed under enemy control. The British North Borneo Company's charter, granted in 1881 has made it the equal of the more famous British South African Company. Like the latter it manifested great interest in minerals in the land won by Sir Alfred Dent. Subsidiary companies explored and prospected diligently and the varied minerals are extracted under the term of a local ordinance of 1927. Gold was the main attraction from the 18th century and the chartered company persevered in its own search for gold. Alluvial gold occurs frequently enough and the Segama deposits have been reported upon. Alluvial diamonds in the Labuk region made the hunt for minerals keener. Blue ground was located but discoveries have been few. Silver and lead are also among ascertained minerals, but production has been scanty. Cinnabar from which mercury is derived is the most valuable of Borneo's minerals. The local ore was found to give 25 percent Mercury and the existence of mercury deposits was proved by the occurence of hot springs. Among the rarer minerals are platinum and chromium. North Borneo's chromite deposits are proved to be of high content but only traces of platinum are found in the black sand of Banquey Island. Manganese is one of the minerals in which the British Borneo Exploration Company evinced much interest. Mining operations were affected by a court decision but later discovery showed that ore assaying 60.2 percent of manganese was to be had. Copper and copper pyrites were discovered but the resources have been undeveloped. Extensive deposits of iron ore have been reported in two or three localities. Analysis revealed 63.5 percent iron with only .052 percent of sulphur. The Japanese are, therefore, likely to be as keen on iron as on the mercury, a vital essential for munitions making. Iron pyrites are also known to occur. The old workings of tin should induce many to regard North Borneo as a wonderland. Tin sand was located by a French engineer but it is curious that the Chinese made no efforts to develop Borneo's tin. Antimony is found not only in Sarawak, but in British Borneo, but so far payable deposits have not been proved. Asbestos and talc have been found. Sands containing titanium ores have been spotted and wolfram is not unknown. Coal was discovered earlier though it is only the Labuan fields that have acquired fame. Near Sarawak coal deposits of inferior quality is found but near Cowie Harbour valuable seams have been developed. A single company took about 57,000 tons in the year. The colliery closed down in 1930 but operations may be resumed. Among the pioneers in regard to oil-drilling in British Borneo has been the Kuhara Mining Company of Japan. The drilling experiments in 1921 yielded no results and it was only the B. B. Petrol Syndicate that struck oil in the Klias Peninsula. The Dutch Colonial Petroleum Company did not overlook the existence of the field and Singapore Chinese showed great inerest. A Shell subsidiary came on the field after the success obtained in the State of Brunei. The sea and the jungle are, however, formidable obstacles to the mining enterprise which explains why such vast and varied mineral wealth has given little reward to the pioneers. There is thus little chance of Japan getting away with any or all the spoils of war though it will appear that chrome, mercury and antimony are likely to be coveted by a country deficient in minerals.

### NORTH WESTERN RAILWAY

Tender No. 212-S-2. Code word "CYCLAON." Tenders are invited on a rupee basis for purchase by the North-Western Railway of "Tin Ware" required during 1942-43. Tenders must reach office of the General Manager, North-Western Railway, Lahore, not later than 11 a.m. hours on Wednesday, the 25th March, 1942, and will be opened in office of the Controller of Stores, N.-W. Railway, Lahore, at 11 a.m. on the following working day. Tender forms and other relative documents can be seen at and obtained from office of the Controller of Stores on and from 10th February, 1942. The sale price of the tender is Rs. 5 local and Rs. 5-8, Muffasil excluding the cost of specification and drawing.

### NORTH WESTERN RAILWAY

Applications are invited on the prescribed form for one temporary vacancy of Section-holder (Binding) Grade Rs. 45—3—60 (which is reserved for Muslim) and to maintain a Waiting List of three candidates one of which is reserved for Muslims and one for members of other minority communities viz. Sikhs, Indian Christians and Parsis in the Stores Branch of this Railway. Age limit 28—35 years. Special conditions for ex-Military men. Last date for the receipt of application 21-3-1942. Full details will be furnished if a stamped and addressed envelope only (without letter) is submitted to the District Controller of Stores, N.W.R., Moghalpura superscribed on the top left hand corner "Vacancies for Section-holder Binding."

The Defence Loan borrowings of the Government of India have received a serious rebuff. The entry of Japan into the war caused a break in giltedged prices. Thanks, however, to open market operations carried out by the authorities, there was substantial recovery; but such recovery was rather unevenly distributed over the range of giltedged securities. The gain in 3½ per cent. Rupee Paper was particularly noteworthy; on the other hand, there was much leeway to be made up in a number of other securities. The second Defence Loan, for example, was quoting in the market at Rs. 2 below the price at which it was being sold through the tap. The persistence of a discount in the market quotation of the Defence Loan was already proving an extremely discouraging factor in the progress of the loan. Then came the fall of Singapore. Prices have given way on a graver scale; and the panicky conditions in the giltedged market are clearly brought out in the following table which shows the prices of leading securities on the eve of the crisis in the Far East, on the eve of the surrender of Singapore and at the close of this week:—

| | Novr. 6 1941 | Feby. 10 1941 | Feby. 19 1941 |
|---|---|---|---|
| | (In Rupees) | | |
| 3½% Paper .. | 96 | 98½ | 91¾ |
| 3% ,, .. | 82½ | 81½ | 78½ |
| 3% 1963-65 .. | 95 7/8 | 94 5/8 | 92½ |
| 2½% 1948-52 .. | 97⅛ | 97 | 94½ |
| 3% 1951-54 .. | 99¼ | 98½ | 95½ |
| 4% 1960-70 .. | 110½ | 109½ | 105½ |
| 4½% 1955-60 .. | 114½ | 112 7/8 | 110½ |
| 5% 1945-55 .. | 111½ | 108½ | 105½ |
| 3% 1946 .. | 102 | 100½ | 98½ |
| 3% 1949-52 .. | 99½ | 98 7/8 | 95½ |

In these circumstances, the continuance of the second Defence Loan on tap was a clear anomaly. At the same time, war expenditure seems to have gone up by leaps and bounds during February. The cash balance of the Central Government with the Reserve Bank registered a sharp decline in the first week of February from Rs. 20.08 crores to Rs. 4.85 crores. It must be added that a part of this fall is connected with the disbursements usual in the beginning of the month, and with the return of part of the ways and means advances taken from the central banking institution. The return of the Reserve Bank for February 13 shows Central Treasury's deposits at the lowest figure recorded, namely, Rs. 3.39 crores. Even this low cash balance has been possible only after the Government had availed themselves of a further ways and means advance of Rs. 4 crores. It is obvious that the Central Treasury is in urgent and imperative need of replenishment, not only because its present cash position is precariously low, but because the direct threat of war to India means considerably larger war expenditure in the coming weeks. The ways and means machinery of the Central Government had been working with exceptional smoothness during the first thirty months of war; all of a sudden, the machinery has begun to give trouble in various ways.

Looking to the great disparity between the issue price of the Defence Loan and its market price, the Finance Member has decided to suspend the sale of the loan. At this point, it is useful to summarise the results so far achieved through the issue of defence loans. The interest-free defence bonds have yielded Rs. 2.67 crores as on January 31. The first 3 per cent. Defence Loan produced Rs. 44.86 crores. The second 1949-52 Defence Loan has so far accounted for Rs. 58.10 crores. Defence Saving Certificates have roped in Rs. 4.67 crores. The grand total of subscriptions to all Defence Loans from June 10, 1940 to January 31, 1942 is Rs. 110.30 crores. This is quite a substantial achievement, looking to the capacity and traditions of the Indian giltedged market. The Finance Member himself had reasons to feel gratified with the results as he utilised his affluence from time to time to withdraw rupee securities from the issue department of the Reserve Bank.

Now that Sir Jeremy is confronted with his first serious conundrum in the ways and means budget, what is the best course open to him to adopt? The withdrawal of the second Defence Loan was a correct step. The sale of a loan through the tap is generally a bearish influence in the giltedged market. When everyone knows that, at a fixed issue price, the loan can be had any time for any quantity, buying pressure as such ceases to be an effective influence in the giltedged market. Those who need to buy government securities will turn to the tap as and when the need arises. To the extent that sale of a loan through the tap curbs any rise in the government securities market, the suspension of the tap loan may be said to be a favourable influence for giltedged prices. With the panic which is widespread on account of disaster following disaster in the Far East, there will not be much scope for such favourable repercussions. The second Defence Loan being out of the way, how do the Government propose to reimburse their cash position? It

will be disastrous if, in the present circumstances, the Government should think of issuing a third Defence Loan. The market has to be allowed some time for accumulating surplus funds pressing for investment. The necessity for such an interregnum is all the greater because we have had loans on tap continuously for over two years. If there were no loan available on tap for the next three or four months, it should be possible to hope for a substantial piling up of funds that must needs be invested in government securities.

There is another reason why no Defence Loan should be placed on the market in any great hurry. Every new loan has to be fashioned in relation to the price of existing securities. This means that, if the third Defence Loan is planned in relation to current giltedged conditions, it will be on the basis of an yield definitely higher than that of the last Defence Loan. Moreover, the financial authorities in India have always been devoted to the view that a loan with a more attractive yield has greater chances of success. In simple terms, a third Defence Loan planned under existing circumstances will be so attractive as compared with the second Defence Loan that the announcement of the terms of the new loan is bound to have a most depressing effect on existing securities. The giltedged market is, in all conscience, disturbed and perturbed enough; and an ill-fashioned new loan will knock the bottom out of the market. I am, therefore, clearly of the opinion that no new loan must be placed on the market till giltedged conditions are definitely propitious.

Meantime, there are two objectives which should engage the attention of the Finance Member. The first is to cope with the ways and means commitments by recourse to such other expedients as are available to him. The rupee coins held in the issue department of the Reserve Bank have sunk to the low level of Rs. 30 crores. There is every case for the Government delivering to the Reserve Bank one rupee notes and-or new rupee coins for, say, Rs. 20 crores. This should replenish Central Government's cash by Rs. 20 crores. Rupee securities in the issue department stand at the low level of Rs. 41.50 crores. This level must be considered particularly low as sterling securities now stand as high as Rs. 268.60 crores. It will be in perfect accord with financial puritanism if the Government issue **ad hoc** Treasury Bills to the Reserve Bank for Rs. 20 crores or Rs. 30 crores and utilise the additional currency so created for the strengthening of their cash posiiton. If current expenditure still continues to be in excess of revenue **plus** the resources thus secured, the system of Treasury deposits is worth a trial in India. Treasury deposits are a wartime measure introduced in Britain. The Government are now taking, from time to time, six months deposits from banks at a fixed rate of interest. It should not be difficult for the Government to secure Rs. 15 crores to Rs. 20 crores through treasury deposits in India. These funds will be of value for six months; and this period is sufficient to enable the giltedged market to straighten itself and to be replete with funds clamouring for investment.

The second objective which should interest the Finance Member is the active initiation of such steps as will enable the giltedged market to recover from the present doldrums. Monetary policy, especially Treasury Bills policy, has to be so fashioned as to emphasise and underline the Government's determination and ability to maintain cheap money. From this point of view, I would like to see the Reserve Bank rate reduced to 2 per cent. I would also like to see the Treasury Bill discount rate coming down to roundabout 10 annas.

Above all, the Finance Member will do well to take note of the extremely poor response which the Indian states have accorded to the Defence Loans. Between the Hyderabad State and the Nizam, it should not be difficult to provide Rs. 20 crores for the Defence Loan if they are properly handled. The Maharaja of Gwalior and the Maharaja of Baroda are equally full of money. There are again landed magnates like the Maharaja of Darbhanga. How to secure the full participation of these monied interests in the Defence Loan is a problem that has not so far been appreciated. Sir Osborne Smith brought in the Nizam as a powerful support to government securities in the closing years of the 'twenties when the continued doses of inflation began to spell disaster to the giltedged market. The machinery and the personal for drawing out the hoarded wealth of the Princes must be devised in time and put into action, so that the process of the revival of the giltedged market is helped from new and influential sources.

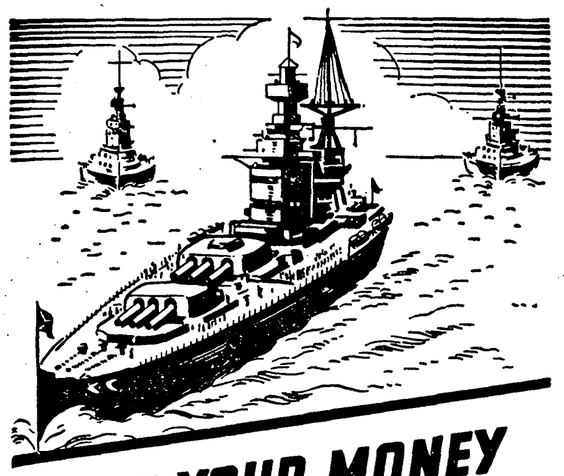
In the new effort to bring the fine arts nearer the world of business exhibitions have acquired a new importance. One is reminded of that and more on the most cursory view of the exhibits in the Art in Industry Exibition. The revised and enlarged version of the show that was sponsored once, and now again, by Burmah-Shell is certainly an event of interest. The interest may be restricted and the types not too numerous, but the beginnings of commercial as distinct from pure art can be noted. The public view, as distinct from the opening ceremony, is certainly to the taste of those who don't like the crush associated with social ceremony of any sort. The twelve sections housed in the School of Art can be conveniently seen, and the Hanging Committee has certainly done its best to put the poster display right at the entrance.



Since the special prizes offered by Government gave additional importance to this year's exhibition naturally one examined the posters with an unprejudiced eye. The fact that most were derivative certainly hits the eye. Originality and inspiration, such as comes to the artist readily in putting out appeals to reinforce normal patriotic instincts, were not conspicuous but craftsmanship certainly distinguished the exhibits. The awards have been made by the Committee of judges supported by nominees of the donors of prizes this year.

For the emergence of a new native tradition in commercial art one must necessarily wait, but the tea propaganda people certainly caught the best catch. The exhibits were more than ever suggestive of the **Indian**-ness of the beverage. There was the accent on Tea as swadeshi—altogether redolent of our soil—and tea-drinking should no longer be regarded as a habit grafted on to Indian life in imitation of the West.

Burmah-Shell's primary interest this time lay in making artists emphasise in pictorial form the organisation's services to industry. If the Calendar design represents a new departure—the composition and colour of the prize-winning exhibits proved real elegance can be achieved in selling ideas not unconnected with the prestige and tradition of individual corporations. It is, therefore, from this angle of telling the people not the specific merits of Shell products but a composite and comprehensive notion of what oil does for industry that their documentaries were designed. If that **moving** quality is not to be noticed one must perhaps wait for a poster competition under special auspices.

For obvious reasons the accent today is on civil defence, and the war poster section presented over again the texts rendered familiar by press advertising. To say so implies criticism, but one cannot help concluding that the artists could break away from the Press slogans. In a sense it detracts from the merit of the display, and for an individual sightseer at least the real interest lay in the efforts of advertising executives to break into spontaneous expression in a not altogether novel medium. One who wants to know how much artistic talent is nursed by the agencies should do well to see the catalogue. That conveys as much as anything the cooperation that is offered to the world by the commercial artist who attains security in selling his art to the agency instead of the inaccessible client.

# Olympus

*(From Our Correspondent)*

New Delhi, February, 8.

Lobby comments have been generous in their estimate of Sir Andrew Clow's work as Railway Member. The Budget statement which he presented today is probably his last one, for he, like his predecessor, Sir Thomas Stewart, has been marked out for a Governorship. Though no official announcement has yet been made, he will proceed on leave immediately after the discussions on the Railway Budget and snatch a twomonth holiday before assuming the Governorship. As large schemes are under discussion regarding further Indianisation of the Viceroy's Council—includmg among other changes the bifurcation of the Communications portfolio—a temporary arrangement may be made by making the present Communications Secretary, Mr. S. N. Roy, officiating Communications Member for a month or two. Incidentally I may mention that all the three Secretaries of the Government of India who are due to retire this year, Sir Alan Lloyd, Mr. Ogilvie and Mr. S. N. Roy, are being asked to continue as Secretaries for another year, for it is felt that in these important Departments it is desirable to retain these experienced officers.

Sir Andrew Clow has been exceptionally lucky as a Railway Member, for during his time the Railways have been enjoying unparalleled prosperity. It has been the singular good fortune of Sir Andrew Clow to announce today in the Assembly that he hopes next year to repay the entire balance of the Railway debt to general revenues. In the two years following April last, General revenues will benefit to the extent of Rs. 39.15 crores. Nearly Rs. 15 crores will be added to a total of Rs. 64¾ crores at the end of 1942-43. The amount in the Railway Reserve Fund, now standing at the figure of Rs. 6.7 crores, will not receive anything during the coming year. Lobby criticism is mainly on three grounds—firstly, it is said that with such a large surplus as Rs. 54.15 crores in the two years, the Railway Member is not justified in increasing the rates and fares again—even though it is only to the extent of only one crore—secondly, it is pointed out that there is no necessity now to swell the depreciation fund when money is urgently needed for more urgent expenditure like Defence measures and every effort should be made to lessen the burden on the taxpayer, and thirdly, it is complained that more stringent and comprehensive measures are not being taken to reduce the strain on Railway capacity and make transport available to a greater extent to meet the needs of the civil population.

The announcement of the Railway Member that the moratorium will be renewed for another year has been well received. It will be the duty of his successor to bring forward proposals next year—either a general revision of the existing Convention or merely further interim arrangements to meet the war situation only. Either the Standing Finance Committee or a separate committee may be asked to consider the question so that the proposals may be ready for discussion during the autumn session of the Central Legislature. The capital cost of the lines dismantled this year amounts to Rs. 2.19 crores. It was stated by the Chief Commissioner of Railways in the Council of State that the total mileage lifted in two years would amount to 770 necessitating the removal of 19 branch lines—mostly unremunerative. Thanks to the purchase of the four company lines—B.B. and C.I., the Assam and Bengal, the B. and N.W. and the R. and K.—the total milage of State-managed lines has risen from 17,000 miles to 24,000 miles.

According to a statement made by the Finance Member in the Assembly, the Excess Profits Tax has yielded this year up to the 31st December 1941, a sum of Rs. 3 crores. He told the House that 1955 assessments had been completed, 1215 cases were disposed of without assessment as there was no liability and 1368 were still pending. As there is a good deal of speculation regarding the likely taxation proposals which the Finance Member may have in view for the coming year, the December revenue returns are of considerable interest. The Budget estimate for the whole year under the main revenue heads is Rs. 105.88 crores, but the first nine months of the current year have yielded only Rs. 72.68 crores. As December brought in a revenue of Rs. 9.32 crores and income tax and corporation tax collections are latterly showing a big increase it is not improbable that the remaining three months of the year will bring in sufficient revenue to somewhere near Rs. 100 crores. As compared with last year there is a general increase in revenue receipts even in Customs. The only disappointing feature, taking the total for nine months, is that though the Finance Member budgetted for a return of over Rs. 40 crores under income tax and corporation tax for the whole year, the nine months have only brought just over Rs. 18 crores. Expenditure during the nine months has exceeded revenue by nearly Rs. 41 crores. The cost of Defence Services in December was very nearly Rs. 10 crores almost double the figure of the previous year's figure. The coming three months will see a rapid increase in expenditure on war both, for Defence and Civil Defence. In spite of the large contribution from Railways, the Finance Member will have to face a deficit of not less than Rs. 25 crores during the current year and much more next year.

In Assembly circles there has been a good deal of discussion on the military situation in the Far East and its possible effect on India. A long statement was made today by the new Commander-in-chief giving a fairly comprehensive account of the present position. He frankly told the Council of State: "We must be prepared for more bad news before the tide turns. We must be prepared for attacks on our shipping on the seas, and we must be prepared for attacks on this land of India from the air and by bombardment by the sea, and we may even have to face the possibility of a landing." He warned the country that the enemy would lose no opportunity for spreading panic and undermining the morale of the people. How are these threats to be faced? It was mentioned to-day in the Assembly lobbies that some members have approached the Leader of the House, Mr. Aney, with the request that he should summon a secret sitting of both the Houses for a full discussion of India's defence question and the measures necessary for protecting the civil population. There is a feeling that though the situation is serious, the Legislature is not being taken into confidence—nor even consulted on ways and means to deal with the present situation.

W. G. GROUNDWATER, General Manager

# Gateway of India

(From Our Correspondent)

Bombay, February 18.

Indian maritime labour is to benefit under a compensation scheme devised by the Government of India. The shipping companies here are not disturbed by the prospect of providing for Indian seamen the compensation given by the British Government for lascars. The rate of compensation being based as prewar rates of pay, there can be small ground for complaint. The scheme is one for war pensions and detention allowances in the case of sailors to whom the Bombay Coasting vessels Act of 1838 and the Registration of Ships Act 1841, is applicable. The damage done to seamen's kit has also to be allowed for and hence compensation is ordered under the scheme which wants to mitigate hardships to seamen. Now that vessels in Indian waters may have to face enemy action, Indian seamen require the assurance that they would get the benefit of such compensation as is made available elsewhere. The Assembly expressed approval in advance and the present profits of shipping companies may be said to justify such payment.

When it was learnt that the Government had taken off the second defence loan without a quiver, it was clear that the Government of India had submitted to the *force majure* of events abroad. When 3½ per cent Paper has dropped to Rs. 91, it is absurd to expect that subscriptions would come in for a 3 per cent 1949-52 issue. The institutional investor may have other fish to fry at present, and the best thing to be said about the loan is that it brought Rs. 60 crores in a year or so. Not bad at all, considering that the volume of national savings is very small in the country. Reverses in the field rather than financial conditions proper explain the recent lack of support. One cannot have cent per cent cooperation from the investor when the deadlock persists and a lot of doubt as to India's ultimate gain lingers. Financial circles which talk of the weight of unused money are not unmindful of the fact that defence loan has been below par and it was ridiculous to expect a buyer to pay the issue price when he could buy it cheaper outside in the market. If the Government were to abstain from borrowing for any length of time, it must be on the reckoning that enough money can be raised by Treasury Bills and Ways and Means Advances. Until the Far Eastern situation improves, nothing can be done by the Government to nurse the market. In spite of well-meant suggestions that the giltedged market must be supported when banks are forced to sell stocks for cash it is asked here why nothing has been done to stimulate subscriptions in the States. Though there is a lot of fuss made about putting a prince into the new War Council, it is complained that the princes have not pulled their weight at all. They are still going for bloodstock in a big way, and whatever be said about their gifts and donations, they have hardly shown much interest so far. It is clear that if the Finance Member likes, he can ask for a cent for cent increase in the Treaty subsidies and also for immediate investment of States funds in defence loans. The Crown Department must come down heavily in favour of such proposals, and the Princes will learn to toe the line. A little sacrifice would not hurt them, and it is surely futile to ask the man in British India to pay the piper when the principal beneficiary of British rule is the prince.

The Commissioner of Police here has gone to the Public Service Commission in Delhi. The promotion is popular, for Mr. Smith has been both able and respected as the police chief here for nine years. Though people do not forget that Sir Edward Henry left Calcutta to run the London Police, the average Police Commissioner (barring Sir Charles Tegart) does not usually get a break when over age. In the nine years he has put in here Mr. Smith has been Prohibition, the rise and fall of *Sattakhel* and the Foreigners Act in operation. Mr. Smith and the City Police have been equal to all changes. And he did very well indeed in times of communal discord. The Congress Ministry counted on his quiet, willing cooperation and the 'dry' experiment succeeded because the police helped in every way. In Mr. Smith's time the standards of the Bombay police have been raised considerably and changes noted when he was away on leave testified to the power of the master's eye.

The new bank to develop industries in the States was referred to last year as a new type of financial institution with unorthodox aims. Reference was made to the support of Central India States in addition to the Kathiawar principalities. Only last week was the formal registration gone through. Seth R. Dalmia is connected with the bank which has an authorised capital of Rs. 2 crores. The Jam Saheb as Chancellor of the Princes' Chamber is only a patron. The Board contains men from the States as well as British India. The bank will perform very mixed functions as it has been announced that it is interested in rural development and new industrial projects in the States. The regulation of inter-State tariffs and the promotion of insurance business are among the objects and purposes. It is intended to improve transport facilities and make full use of timber and fuel for the benefit of industries in the States. A very comprehensive list of aims for a bank, which, probably, expects to function as the opposite member of the Reserve Bank, without the handicap of statutory regulations.

The university is still keen on introducing military studies into the curriculum. Not even the Additional Defence Secretary's disclaimer can deter the war-minded syndicate. The students are asked to lap up everything about life in the Indian Army. A lecture was arranged in the Convocation Hall last week to teach the young idea how to shoot. Students were told all about emergency commissions and what they bring to the holders. Men in the U.T.C. were asked to take new certificates and qualify for the Officer's School. It seems a new syllabus is being got ready, and the education for leadership in war has apparently got one step further. Mr. R. P. Masani commended the lecture; he spoke about the call of the country and the duty of youths. Actual service in place of empty professions was approved of by the Vice-Chancellor who asked for organised effort.

Mr. A. B. Latthe has written to the papers criticising the Government of India's last statement in the press about the motor factory scheme. The Commerce Department's reference to the provisional offer to guarantee interest on capital has excited the curious. It is asked who got the ten-year guarantee and why. Mr. Latthe's letter confirms that point. What the Centre could not do or hesitated to do was acceptable to the Province though in the end it backed out even before the Ministry went out. Mr. Latthe makes it clear that the scheme went phut not because the Ministry and the promoters could not agree, but because the Government of India refused to give an undertaking that the import duties on cars would not be reduced for ten years to come. What was wanted was tariff advantage. This could not be given by or to the Province. There was no question then about the project being part of the war effort, and the motorcar factory scheme could not advance because the promoters could not satisfy one condition laid down for the grant of assistance from the Ministry. The thing has not been straightened out by the press note answering Pandit Nehru's remarks in Bombay last month. Mr. Latthe calls it deliberately misleading, and the promoters will soon get somebody to ask questions in the Assembly. They forced the National Defence Council to examine the position and the press campaign, of course, never stops. Reams are being written about who let down who and where. It is not recognised that America is at war and nothing can be done when they are engaged in an all-in effort.

The loss of Singapore has not upset people greatly. The work of Admiral Helfrich is being followed. What was said about the various Allied navies by Mr. Alexander six months ago is being proved by the good work done in the N.E.I. The loss of the naval base can never be made good and the Sultans, who paid subscriptions for its construction, are likely to ask for their money back because they are in occupied territory. The attack on the Indies in the 129th week of war is being followed closely because the Allies' oil position may be affected decisively. Since Java is a better base, there is a hope it will be held; only supplies are wanted for the

*(Continued on page 296)*

# Tit Bits of Industrial Activity

### Uses for Bagasse

Two officers of the Fore Research Institute have examined the possibilities of using sugarcane bagasse. The scheme sponsored by the I.C.A.R. has resulted recently in the publication of a bulletin which describes how bagasse can be turned into insulating board and pressed board. The former is in request for various purposes, and India, which has used U.S. manufactured board can make use of her own bagasse. The main use of bagasse is as fuel at present. It is urged that if large regular supplies can be had, this country can produce insulating board at least 50 per cent cheaper than foreign countries. Sugar mills will, of course, have to give up using bagasse as fuel or economise its use if the manufacture should develop. The Indian-made board is said to be quite up to expectations and the bulletin gives exhaustive details.

It is also suggested that wrapping paper can be made of bagasse. The present shortage of certain types of paper must divert attention to the bagasse which has hitherto been neglected. As a by-product it has not commanded enough attention but since it has been shown that both board and paper can come out of bagasse, commercial manufacture is clearly indicated. A group of sugar mills can easily apply their reserve funds to the execution of a project which will convert their bagasse into paper. It is believed that in spite of all attempts to raise production, the total supply of paper will fall short of requirements by 30,000 tons in a year. Admittedly, the paper situation calls for reinforcements from the bagasse side.

### Cotton Mills and War

India has got bigger orders for cloth than in the last war. That is known to everybody. Last May, it was learnt that a tenth or more of the total production would be taken up by war orders. More recently it has been learnt that the defence services will place orders for several hundred million yards of cotton goods. The orders spread over February to April, are sure to raise the total value of orders to over the present estimated total of Rs. 40 crores. The Indian mill industry's share of war orders is thus likely to increase further. As many as fifty different kinds of goods are wanted in addition to three hundred different items including canvas, tentcloth and knitted goods. The prices have been settled in consultation with the textile advisory panel. It is contemplated that 20 percent of total productive equipment in India's mills will be devoted to war orders. As an indication of the volume and value of orders, it may be mentioned that four million groundsheets will be called for during the current year. Three new firms are manufacturing and erecting plants for producing the fabric wanted. The machinery will be of local origin like the ultimate product. The old figures as to what mills can produce must be revised. India exports more cotton and cotton goods than she imports. Her imports less re-exports are inconsiderable as compared with her exports. The war with Japan has created fresh demand and opened up new markets.

### Tanks for Australia

Australia moves forward to self-sufficiency in big strides. It is proposed to set up two big factories for making tanks. The tank programme is one of the biggest industrial projects tackled in the Southern Hemisphere. Large-scale tank production proposed at present is for war purposes. Firms engaged on making tracks for machine-gun carriers will undertake the manufacture of catterpillar tracks. Gun suitable for mounting are already in production and other guns more powerful and heavier will be made in large quantities in the near future. Australian engineers intend to produce tanks in a way different from that employed elsewhere by casting the hull of the tanks in one piece. This will be done by pouring the molten metal into a huge frame and all to cool for more than 24 hours. The result is a great heavy hull. No rivets will be wanted. This will make tanks resist direct hits and the hull will be stronger than in tanks using armourplate rivetted in the usual way.

### New Packing Cases

New fibre-board cases have followed from the routine work done by the Dehra Dun Institute. Paper-making is a subject in which interest has been continuous and the Institute was called upon to devise vegetable tallow and wood dust to replace former imports from Germany. Tinplates are wanted and the suitability of bamboos had to be examined. The Air Force wanted to try out Indian bamboo in place of Japanese bamboo. Samples from Bombay were found up to the mark and an order for 5000 bamboos to the Royal Aircraft Establishment followed in order to secure actual service tests. Kashmir's walnut is wanted for rifle butts. New sources of this most valuable timber had to be located and supplies had to be tested. The cork substitute was an immediate problem, and like rubber corks, wooden corks were passed out. Parafinned pith corks were accepted by the medical department for hypodermic injection tablet tubes. A more important departure was the manufacture of fibreboard cases for corrugated kraft-liner boards for packing petrol tins etc. An order for 100,000 followed successful experiments, and arrangements are being made for the manufacture of the cases by a firm in India. Another of equal importance was the manufacture of pulp from cancelled currency notes and rags.

### Jute for Camouflage Nets

The Indian Central Jute Committee decided, on the basis of an additional sub-committee's report to investigate means of extending the wartime uses of jute. The possibility of using jute twine in place of sisal and hemp, twine in the making of camouflage nets which are at present made of hemp and sesal. The success attending experiments carried out in order to make paper out of jute cuttings, explains another decision connected with the manufacture of paper out of inferior varieties of jute. The first is more promising, since hemp and sisal imports are directly threatened by the war and more and more camouflage nets are wanted.

### Celluloid Waste

The keeness of the salvage drive can be gauged from the effort made to examine how waste celluloid can be used. The Bengal Industries Department think that with lots of waste celluloid, either as film or as scrap, India can make many things. Celluloid goes into the preparation of lacquers and the waste is still extensively used in the manufacture of ordinary cheap lacquers in the U.S.A. and many other countries. Besides, being used as a lacquer base celluloid waste can be profitably used in the manufacture of moulded articles.

### Canada's Minerals

Canada's mineral production in the twelve-months ended June 1941 recorded an increase under all heads except gypsum. The coal output rose to 17¾ million tons and gold production alone came to 5,363,180 ounces; as the output of base metals rose the production of by-products like gold and silver was larger. The importance of Canada's gold output will be seen when there is talk at present of abandoning mining operations in Western Australia, owing to the shortage of manpower. Western Australia as a high-cost producer has been handicapped in the war period and many sterling gold mining companies indicated last year that they cannot stand exceptionally heavy taxation in addition to other difficulties.

(Continued from page 295)

American troops who have taken up their stations. The Kathiawar Princes, in spite of the interest in evacuees, have not apparently seen how the war is moving towards India. It is they not the public that need rousing.

Somebody has begun to ask questions about the war risk in the case of ordinary life policies. The Commerce Member's remarks are quoted to show that life insurance must proceed as though normal conditions exist. But while some companies advertise that they will pay even if loss of life arises through war there is still some doubt as to the attitude of Indian insurance business as a whole. Group insurance for war risks is sponsored by one company and another tells people that ordinary premiums and ordinary payments will go on. A declaration, at the instance of Government and ratified by Government, is desired by some because civilians killed in war may hesitate to insure. The setback to new business is dreaded even more than claims arising from possible enemy action. The Indian Life Offices Association has not given a lead in the matter. What the advisory committee will do remains to be seen, but potential policyholders may hesitate in the interval while holders of policies in force would also like to know where they stand. No obligation would fall on the Government, and the companies, which can make a good showing in respect of 1941, can remain confident that their labours will meet with reward in the third and most difficult year of the war.

Promise of crop restriction do not appear to suit the cotton market. The market is just as much dead as the share bazar which is likely to drop its carry-forward scheme. The difficulty raised by heavy selling of Bombay-Burmah shares will certainly persist. The questions in the Assembly about the cotton market's behaviour do not show how the Government is going to buy and keep short staple cotton. The U. S. Senate may be keen on high prices, but Bombay is not going to follow New York. It has been asked why a new crop drive has begun. What is being done to encourage pulses which help the soil as also the grower. Pleas for planned farming have a new importance, at present owing to the possible shortage of cereals. If there is no demand for inferior cotton, the right treatment is abandonment of cultivation. There is good demand from mills for medium and long staple. A possible remedy is the modification of hedge contracts, and on this point, the opinion of the mill industry must be conclusve. It is strange that millowners do not appear to get a hearing when it comes to cotton. But a change must come soon for the market has to adjust itself and Western India is no longer as important as the North which has taken kindly to improved types of cotton.

# Resume of Commodity Markets

The feature of the week is the slump in prices in the jute manufactures market. The seriousness of the war situation and fresh reports regarding the actual or possible activity of enemy raiders in Bengal have had a discouraging effect on the markets. There is absolutely no shipping business. The immediate outlook for shipments is very obscure as supplies have now to be sent by the land route, to Bombay, and thence shipped to overseas markets. Those commodities which are produced mostly in Eastern India and depend on overseas markets for their sale are bound to be affected considerably and adversely.

Naturally, the jute market also has been weak. The raw cotton market was inclined to be firmer in mid-week on account of the reports regarding fresh war orders and the possibility of Government support to the market. During the last three days a slightly easier tendency has been noticeable but quotations are higher on balance.

The bullion markets were very active early in the week. There was a sharp rise in prices for gold on buying for hoarding purposes. Stocks in Bombay also were very low.

Oilseeds markets were inclined to be firmer early in the week but the close has been rather weak.

**Jute:**

The raw jute market has been dull and idle. With the slump in prices for jute manufactures, mills are not willing to buy jute in any large quantities. Sellers are keen to do business and are offering substantial discount rates without attracting buyers.

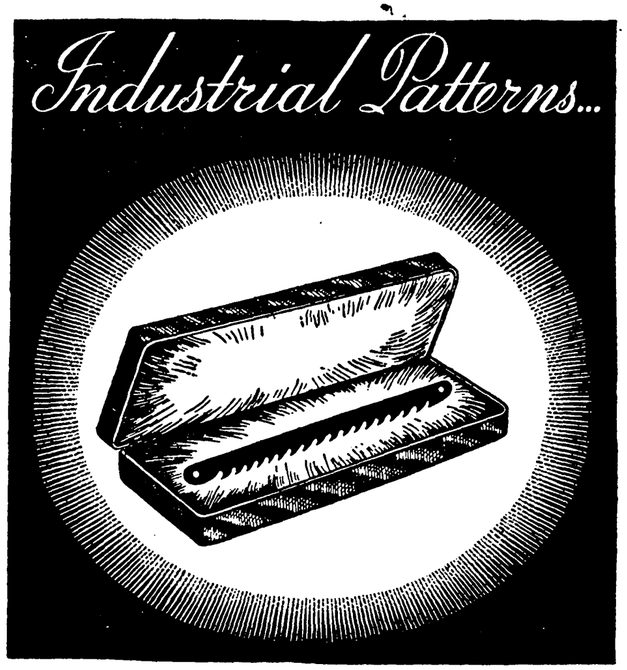
**Jute Manufactures:**

The jute manufactures market was inclined to be steady earlier in the week. The scarcity of ready goods and the hopes that shipments in February would continue at the level of January, kept up prices. Usually shipment business is done in the third week of every month. The business on this account during the week has been very disappointing, in view of the fears regarding the ability to maintain exports. In view of the decline in exports the local stock figures at the end of the month should show an increase but it may be expected that such an increase will not be very pronounced as February is a short working month.

**Cotton:**

The Bombay raw cotton market, as pointed out above, was inclined to be firmer in mid-week. The recovery following the slump in prices last week was rather surprising. Many operators have bought freely. It is learnt that the Defence Services will shortly place orders for several hundred million yards of cotton goods. In the current year about 20 per cent. of the total Indian production is expected to be taken up by Government orders.

**Sugar:**



The All-India Final Sugarcane Forecast for 1941-42 estimates the area under sugarcane at 3,466,000 acres against 4,598,000 acres or a decrease of 25 per cent. The yield in raw sugar is estimated at 3,957,000 tons against 5,794,000 tons or a decrease of 25 per cent. It would thus appear that the decline in the yield in raw sugar is more than proportionate to the decrease in the area under the crop. The condition of the crop is reported to be fairly good on the whole.

The reduction in the area under sugarcane during the last two years in succession is mainly due to the policy of restriction of production of sugar pursued by the Governments of U. P. and Bihar. Following the short crop of 1938-39 and the announcement of abnormally high minimum prices for sugarcane, there was considerable encouragement to the ryot to grow sugarcane. The high price for sugar and the large production resulted in a large accumulation of sugar stocks. The last crisis in the sugar industry could be averted only with the restriction in production and the fixation of lower prices for sugarcane.

**Tea:**

At the auctions this week of teas for export, there was a strong general enquiry, though the opening was rather hesitant. Offerings included more tea from Cachar and Sylhet. Common brokens were dearer while types suitable for Iran were in strong demand. Teas for consumption in India also were in good request, green teas, especially, being in demand at advancing rates. The better brewing qualities showed an advance of one to two annas.

The price for export quota was lower at 5 annas owing to the absence of buyers. Business in internal quota was transacted at 3 pies per lb.

Shaping and cutting materials to his purpose, man must use tools of dependable strength and toughness.

In this sphere the hammer, the screw-driver, the slender saw-blade render vital service times without number.

It is the strength of steel, which gives these tools the reliability they possess.

# Jute and Jute Manufactures

(By Our Jute Correspondent)

Calcutta, 19th February.

After having stood up fairly well for some days to the unpropitious war news from the Pacific arena, today a wave of depression, if not of defeatism, seems to have overwhelmed the markets. This is wholly due to the absence of fresh business, and the doubts about shipping being available, and is certainly accentuated by the fact of near goods having been standing at an inflated level. We have drawn attention more than once to the heavy discount quoted for deliveries only a few months ahead, quotations at which Mills could sell profitably. Obviously the ready and near prices were artificial, created merely by the temporary scarcity of goods, which scarcity in its turn was largely due to heavy Government requirements for quick shipment. The sharp fall in prices now registered therefore is not so much a market collapse as a reduction of inflated prices to more normal levels and has been brought about by the offering for sale of comparatively small quantities of ready goods by nervous holders or by shippers who see no immediate prospect of being able to ship. It is only natural, in existing circumstances, for shippers to walk varily. The situation, consequent on the fall of Singapore has still to develop. It is by no means certain that Japan has the ships to spare to invade the Indian Ocean or the Bay of Bengal to interrupt commerce. She has enormously dispersed fighting fronts to supply over long lines of ocean communications which may tax both her merchant and War ships to the utmost to supply and protect. Nor is there any immediate prospect of an invasion of India, as some sections of the commercial community seem to believe. Until Japan has secured complete command of the Pacific Ocean, which she only holds very precariously at present, if at all, any attempt at an invasion of India by sea is extremely unlikely. And as for invasion by land, the difficulties to be faced by a force of any such magnitude as to constitute a serious menace are so enormous as to rule out that also as an early probability.

Common prudence indicates a careful watching of the situation but for panic there is no occasion. We see no reason to anticipate that Allied shipping in the direction of Africa should not be enabled to pursue the even tenor of its way and news of some Allied success in the Pacific zone would undoubtedly do much to restore the confidence which is at present so sadly lacking. All is not yet lost though Singapore is temporarily lost and may take a lot of winning back. What is required at present is patience and calm confidence that success will come by the united efforts of the Allied nations. Panic is not only uncalled for, but unworthy of India.

Mill production for the month of January showed, as expected, a drop of over 10,000 tons, the causes being strikes, interruptions due to holidays and slow starting owing to the dark mornings. The strikes are happily at an end as a result of the intervention of the Bengal Premier, and all Mills are once more working. Total production was 105,318 tons, distributed over 20¼ crores yards of Hessian and 11¾ crores yards of Sacking goods. These showed reduction of 2¼ crores and 1¼ crores yards respectively from December figures, and in relation to the January stock position, showed that the reduction in hessian stocks due to shipments only amounted to 226 lakhs yards, while Sacking net shipments were actually less than production.

When the experiment was mooted of doing away with all private settlements on Loose Jute disputes and referring all such direct to arbitration, it was freely prophesied that the Tribunal would be overwhelmed with cases and that the ability of the Chamber to handle them all would be taxed beyond its capacity. Happily such has not proved to be the case. Whether it is that sellers, knowing that they would have to run the gauntlet of the Tribunal, have been more careful with the quality and condition of their deliveries, or whether Mills, knowing that disputes would be settled strictly in terms of the contract specifications, have been disinclined to submit any but cast-iron claims, may be a matter of opinion. The idea was that, by this method, standards could be more easily maintained and the vicious upward tendency in grades would be retarded, if not entirely stopped. It would appear that the results have justified the experiment and the objects aimed at have been partially, if not entirely, attained. The question now arises whether the same practice should not be applied to Pucca Bale deliveries to Mills. There can be no doubt that there is very material variation in the quality of deliveries purporting to represent the same grade mark. Offerings blatantly advertise the fact that in any grade there are, for instance, Dundee Short and Long Group standards, L. J. A. standard, Outport standard and Mill standard, all quoted at differing rates indicating varying qualities of the same grade. Leaving aside the Dundee grades which are so much more expensive as to be considered **hors concours**, there still remain at least three different types of the main grade marks quoted sufficiently close together in price as to open the way for sharp practises. It also leaves an undesirable dubiety as to what the standard of any grade actually is or should be. The abolition of private settlements on pucca bale contracts to Mills and the institution of compulsory arbitration in disputes thereon should go a long way to clearing up this dubiety. In any case it is anomalous that private settlements should be permitted on one type of packing when delivered to Mills and forbidden on another.

## JUTE

Calcutta, Feb. 19.

THERE has been practically very little doing in the raw jute market during the past week. The slump in prices for ready jute in the hessian market has had a discouraging influence. Mills are not buying in any appreciable quantities and, with business in the goods market practically at a standstill, it can be little expected that jute prices would improve. Sellers are very keen for business and are prepared to discount prices considerably.

In the loose jute market no business has been possible in lower quality jute, sellers for which are keen to do business. Mills are not taking any interest in the market. In the absence of business quotations are mostly nominal.

In the pucca bales section, shippers have been inactive. Mills bought early in the week Hearts 2|3 at Rs. 30 per bale. The export outlook is very poor and considerable discount in the rate is offered for ready shipments.

## JUTE MANUFACTURES

Calcutta, Feb. 19.

THERE has been a slump in prices in the jute manufactures market during the past few days. The firmness of the ready position at the end of last week was mainly due to the hopes that shipments would be maintained at the level of last month. Shipment enquiry during the week has been very poor and, generally shipment business is done in the third week of every month, there has been a slump in values. Quotations are around the lowest levels for the week, 9 porters ready being Rs. 18-8, March Rs. 17-12, April|June, Rs. 17 and July|September Rs. 16-4. 11 porters ready are Rs. 24-8, March Rs. 23-10, April|June Rs. 21-8 and July|September Rs. 20-8.

In the heavy goods section also business has been on a small scale. The weakness of the jute and hessian markets has resulted in a fall in prices. B Twills for ready shipment sold on the basis of Rs. 36-12, Liverpool Twills Rs. 43-8 and Cornsacks Rs. 40.

The production figures for the month of January reveal a slight decline over the figures for the month of December 1941. The lower level of production was mainly due to the strikes in several mills in January.

## COTTON

Calcutta, Feb. 19.

THE Bombay raw cotton market was inclined to be firmer in mid-week on reports that the industry would receive large war orders. It was also hoped that the Government of India would afford substantial relief to the farmer. The recovery in prices was substantial as prominent operators bought freely. During the last thre days, however, with the continued seriousnes of the Far Eastern situation there has been some selling and closing prices are considerably lower. They are, however, higher on balance. Broach April|May were Rs. 191, July|August Rs. 199-4, Oomra March Rs. 149-12, May Rs. 155-12, Bengal March Rs. 128-8 and May Rs. 132-8.

The New York market has been firmer during the past week. Mills have been buying more freely. March futures quote 18.54 cents, May 18.70 cents and July 18.82 cents against 18.26 cents, 18.36 cents and 18.49 cents respectively at the end of last week.

## GOLD

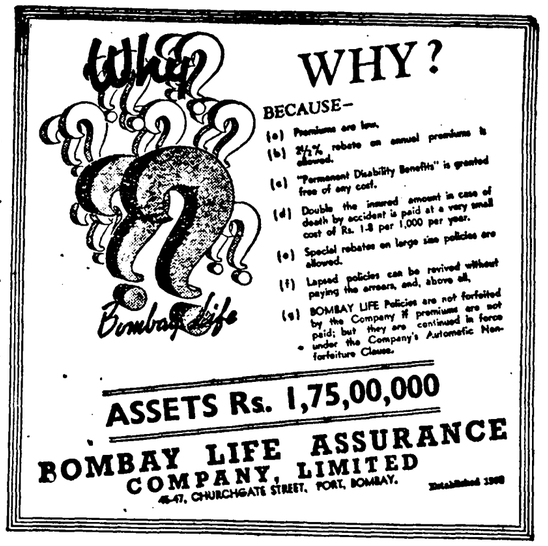
Calcutta, Feb. 19.

WITH the fall of Singapore there was naturally considerable nervousness in the several markets. In the Bombay gold market there was a scramble for buying and prices touched an all-time record. Sovereigns especially were in great demand and were done as high as Rs. 38. At the higher levels there has been some selling and quotations for ready gold and first settlement are nearly back at last week's levels. Sovereigns, however, are only slightly lower at Rs. 37-10. After being higher at Rs. 51-8 there was drop in the quotation for gold ready to Rs. 49-4. In to-day's session a firmer tendency is again noticeable with the quotation at Rs. 49-13. First settlement are quoting Rs. 48-13 against the highest level for the week of Rs. 49-8.

## SILVER

Calcutta, Feb. 19.

THE Bombay silver market has been firmer with the strength of the gold market. There has been greater buying for hoarding purposes. In yesterday's session there was good buying and Indian mint silver ready closed at Rs. 73-6 and First settlement at Rs. 65-14. In to-day's session the quotation for ready position is lower at Rs. 72-2 while First settlement is firmer at Rs. 66-2.



In the London market there has been very little doing and small demand has been satisfied officially. The quotation for both spot and forward is 23½d.

## WHEAT

Calcutta, Feb. 19.

THE Karachi wheat market has remained firm during the past week. It is generally feared that the suplies of wheat in this country will run short of requirements. Holders are not, therefore, willing to dispose of their wheat at the present levels. The enquiry from Bhavanagar and other coastal ports continues to be satisfactory. It is interesting to note that in spite of the total absence of export buying the bazar still expects that considerable purchases will be made on government account for despatch to the Middle East.

In Calcutta, many mills have been obliged to close down on account of the difficulty in getting supplies of wheat. The recent arrival of Australian wheat has not helped the situation to any great extent. Cawnpore ready are quoting Rs. 5-12 and May Rs. 5-6-6 against Rs. 5-12 and Rs. 5-4-6 respectively at the end of last week.

## SLUMP IN THE GILTEDGED MARKET

THE new minimum prices for Indian Irons, Steel Corporations, Burma Corporations and Indian Copper Corporations came into effect on Monday this week. It was a fortunate coincidence. For otherwise bears would have taken advantage of the news regarding the fall of Singapore and hammered down prices further. The coming into effect of the new minimum prices caused forced bear covering. Instead of a fresh decline in values, Indian Irons and Steel Corporations thus actually registered a rise to Rs. 23-4 and Rs. 15 respectively. This fully confirms my view, expressed in these columns last week, that the Committee of the Stock Exchange were not well advised in doing away with the original minimum prices for these counters and giving bears an opportunity to do their worst.

There is practically no business in other sections and for most of the popular counters there are no buyers anywhere near the minimum prices.

* * * *

There has been a sharp fall in giltedged values during the past few days. For sometime past a rather sagging tendency has been noticeable in the giltedged market but the downward trend has been pronounced after the fall of Singapore. 3½ per cent Rupee Paper is quoting at the lowest level for sometime. Terminable loans also have been marked down appreciably. The position in the giltedged market has deteriorated so much that the quotation for Second Defence is quoting at Rs. 4½ discount. The authorities have found it necessary to close the subscription to the Second Defence Loan which was available on tap. The position is discussed fully in "Clive Street Gossip" in the main issue.

* * * *

*The Ahmedabad-Prantej Railway Company, Limited* has benefited by the generally improved conditions in industry since the war began. The higher freight rates also have been responsible to a certain extent for the higher level of earnings. The net profit, after providing for taxation including Rs. 70,764 to meet E. P. T., for the year ended 31st December, 1941, is Rs. 3,04,819 against Rs. 3,01,505 for 1940. The sum of Rs. 10,000, the same as before, is transferred to General Reserve. The dividend and bonus have been maintained at 12 per cent, less income-tax. There has been an increase of over 95,000 in the number of passengers carried and Rs. 43,000 in Coaching receipts. Goods traffic has increased by 25,000 tons and the earnings are greater by about Rs. 80,000.

* * * *

The net profit of the *Tide Water Oil Company (India) Limited* for the half-year ended 31st October, 1941 shows a substantial increase in earnings over those for the previous half-year, the figure before providing for taxation and depreciation being Rs. 1,60,781 against Rs. 60,329 for the previous half-year. After providing for taxation Rs. 1,07,500 (Rs. 27,500) and transferring to other funds Rs. 23,231 (Rs. 3,889) the dividend has been maintained at 5 per cent.

* * * * *

Thanks to the receipt of large Government orders which necessitated working to capacity in both the Calcutta and Bombay factories, day and night, since June 1, 1941, the *Britannia Biscuit Company, Limited* is able to report a big increase in earnings in the half-year. The net profit, before providing for taxation and depreciation, for the six months, is Rs. 3,37,611 against Rs. 1,43,507 for the previous half-year. As in the case of other companies the bulk of the increase in earnings is taken up by the provision for income-tax, the allocation in this regard being as much as Rs. 1,78,033 against only Rs. 37,783 for the previous half-year. The amount set aside to depreciation is Rs. 45,768 against Rs. 41,315, while the transfer to Contingent Reserve is Rs. 48,319 against Rs. 51,650. The sum of Rs. 10,000 (nil) is transferred to Reserve for Staff Insurance and Provident Fund, while Rs. 10,500 (nil) is written off goodwill. The dividend has been maintained at 2½ per cent, but a bonus of 1¼ per cent is to be paid in addition.

Total sales during the last half-year were considerably higher at Rs. 25,76,326 against Rs. 12,49,563 in the previous half-year. The Directors point out that contracts from Government and trade demands will ensure all plant at both Calcutta and Bombay factories being fully occupied for the half-year ended March, 1942.

* * *

The increase in the total number of calls by over a million during the year has been responsible for the big increase in the earnings of the *Madras Telephone Company, Limited* in 1941. The net profit, before providing for taxation and depreciation, is Rs. 6,77,549 against Rs. 5,84,859 for 1940. The amount set aside to depreciation is Rs. 1,28,687 against Rs. 1,23,423 on the former occasion. The provision for taxation reserve is Rs. 1,94,351 against Rs. 1,44,317. The dividend recommended is considerably higher at 12½ per cent against 10 per cent. The amount carried forward is lower at Rs. 39,548 against Rs. 60,036 brought in.

As a result of the scheme announced about this time last year only the Bengal Telephone Corporation has been taken over by the Government so far. In the case of the Madras Telephone Company, Limited, the Government has not been able to secure 75 per cent of the share capital of the Company even after the Oriental Telephone Company sold off its holdings while certain shareholders of the Bombay Telephone Company have made an application to the High Court.

* * * *

The decline in the *Indian Finance* All Share Index from 121.19 on January 27, 1942 to 118.88 on February 16, 1942 does not indicate in full measure the extent of decline in prices for equities for where no quotations are available the minimum prices fixed by the Stock Exchange authorities in the two leading centres, Bombay and Calcutta, have been taken into consideration in the framing up of the index. I need hardly point out that for most of the counters there are no buyers around minimum prices. The decline in the All Share Index since the beginning of the Japanese war is appreciable, the figures on December 1, 1941 being 137.64 and on February 16, 1941, 118.88, a fall of nearly 19 points.

## CALCUTTA STOCK EXCHANGE

*(From Our Correspondent)*

Calcutta, February 20.

THE fall of Singapore has had a definitely discouraging effect on the Calcutta Stock Exchange during the past few days. Business in the several sections is now at a minimum and for most of the popular shares there are no buyers around the minimum prices. There has been a slump in prices for giltedged securities with sellers predominating the market and buyers showing no interest. If there was a rise in prices for Indian Irons and Steel Corporations on Monday it was mainly due to bear covering. There was a heavily over-sold position in these counters and the rush for covering, with the coming into effect of the minimum prices, pushed up values. There has been some selling at the higher levels. The undertone in the several sections is weak.

In the Giltedged securities section rather weak conditions have been noticeable and a further decline in prices has been recorded all round. 3½ per cent. Paper is now quoting Rs. 91-10 or one and a half points lower than the quotation at the end of last week. 3 per cent. Paper is quoting Rs. 78-14. There has been heavy selling pressure for the long-dated loans especially. 4 per cent. 1960|70 are quoting Rs. 105-10, 4½ per cent. 1955|60 Rs. 110-2 and 3 per cent 1963|65 Rs. 92-4. 2¾ per cent. 1948|52 were Rs. 94-12, 3 per cent. 1951|54 Rs. 95-14, 3 per cent. 1946 Rs. 98-12, 3 per cent. 1949|52 Rs. 95-12 and 3½ per cent. 1947|50 Rs. 98-8. 5 per cent. 1945|55 were Rs. 105-2. The announcement regarding the closing of lists for subscription to the Second Defence Loan has not come as a surprise to the market but there is general anxiety to know the terms of the new loan which it is expected that the Government will announce shortly.

Among public bodies' debentures, 5 per cent. *Calcutta Port Trust* debentures were done at *Rs. 104-12* while among industrial debentures, 5½ per cent. *Dalmia Cement* debentures changed hands at *Rs. 102-8*.

Dealings in preference shares also have been on a restricted scale. *Burrakur* preferences were noted at Rs. 146, *Gourepore* at Rs. 137, *Kinnison* at Rs. 162, *Carew* at Rs. 125 and *Kumardhubi* at Rs. 130. *Steel Corporation* were dealt in at Rs. 105.

Among Bank shares, *Reserve Bank* have been bought around par.

No transactions have been recorded in the Cotton section while in the Coal section *Equitable* were crossed at Rs. 35 and *Pench Valley* at Rs. 34-2.

In the Jute section also business has been on a very small scale. Delta changed hands at *Rs. 382-8* ex-dividend, *Gourepore* at *Rs. 654*, *National* at Rs. 21-4 and *Waverley* at Rs. 3.

In the Engineering section, *Indian Iron* and *Steel Corporation* were firmer earlier in the week on bear covering. *Indian Iron* improved to Rs. 23-4 from Rs. 20-8. Renewed selling at the higher levels has brought down the quotation to Rs. 22-8. *Steel Corporation* also improved to Rs. 15. The quotation is now lower at Rs. 14-4. Apart from transactions in these two counters no business has been transacted in other counters. *Indian Steel & Wire Products* deferreds were crossed at Rs. 35-8.

Sugar shares have been relatively steady with *Buland* at Rs. 23-4, *Champarun* at Rs. 19, *Murree Brewery* at Rs. 15-8 and *Raza* at Rs. 24-8.

Even with the publication of encouraging results by tea companies Tea shares have been out of favour and no business has been recorded during the week.

In the Miscellaneous section, *B. I. Corporation* were Rs. 4-12, *Alkali and Chemical* Rs. 20, *Assam Bengal Cement* Rs. 12-8, *Great Eastern Hotel* Rs. 182 and *Dalmia Cement* ordinary shares Rs. 13-4. *Burma Corporation* showed a tendency to improve on bear covering and London buying but the quotation is again lower at Rs. 2-1. *Indian Copper Corporation* were Rs. 1-10. *Titaghur Paper* 'A' and 'B' shares have no buyers around minimum prices while *Orient Paper* have been in enquiry at *Rs. 16*.

## BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, Feb. 19.

*Securities.*—Government securities continued weak following the discouraging reports from the Far East. A feeling of hesitancy prevailed. The easier tendency, which was noticeable during the course of last week, became accentuated during the week under report and 3½ per cent Paper showed a further drop of about one and a half points, closing at Rs. 91-12.

Terminable loans also have been marked down appreciably 1948|52 Loan being done lower at Rs. 95-4; 1951|54 at Rs. 96-0; 1963|65 at Rs. 91; 1947|50 at Rs. 98-8; 1960|70 at Rs. 105-12; 1955|60 at Rs. 110-8; 1945|55 at Rs. 105-4 and 1946 *Defence Bonds* at Rs. 98-4.

*Shares.*—A feeling of hesitancy continued to prevail in the local share market and buyers were not willing to enter into commitments. Except for some short covering business was both limited and featureless. The rapid deterioration in the Far Eastern political situation has cast a deep gloom over all markets and the few scrips, that were dealt in, had their quotations marked down further. Though the market opened fairly active on Monday owing to some demand with some gains in prices, the closing prices today are a shade easier under the influence of further adverse developments in the Far East.

The turnover in the forward section was restricted owing to the predominence of sellers at the minimum rates.

It appears that forward trading will not be resumed until a way is found to save both the brokers and clients from taking delivery of the ten shares ear-marked by the Board of Directors of the local Stock Exchange for the March settlement. Although it had been previously agreed that deliveries of outstanding forward business should be completed over a period of six months, now a section of the brokers feel that the idea is not practicable and seek a modification. It is understood that the authorities of the Exchange have asked the Government to permit them to extend deliveries in Bombay Burma shares from March to July settlement. This would ease the market of about half of the load on March settlement and enable deliveries to be completed in the other nine scrips specified by the Board.

*Textiles.*—The turnover in the forward section was restricted. *Bombay Dyeing* were a prominent feature and opened higher at Rs. 1,115, the closing price being slightly easier at Rs. 1,110. *Central India* were done at Rs. 330; *Gokak* at *Rs. 225*; *Kohinoor* at Rs. 449; *Simplex* at Rs. 180 and *Svadeshi* at Rs. 350. In the cash section, *Ahmedabad Advance* were done at Rs. 297-8; *E. D. Sassoon* at Rs. 2-4-9; *Khatau Makanji* at Rs. 205; *Podar Mills* at Rs. 185; *Sholapoor* at Rs. 5,395 and *Vishnu* at Rs. 1,435.

*Hydro-Electrics.*—*Andhra Valley* were quoted at Rs. 1,627-8; *Tata Hydro* at Rs. 162; *Tata Power* at Rs. 1,500 and *Bombay Tramways* at Rs. 128.

*Steels.*—*Tata* ordinaries and deferreds were transacted at Rs. 285 and Rs. 1,525 respectively.

It is reported that the meetings of the ordinary and Deferred Shareholders of the *Tata Iron & Steel Company, Limited*, which were to be held on the 10th and 12th February, 1942, have been adjourned by the Order of the High Court, Bombay, until further orders.

*Miscellaneous.*—*Associated Cement* were a steady feature at Rs. 159. *Belapur Sugar* were done at Rs. 218; *Tata Oil* at Rs. 48-0; *Tata Chemicals* at Rs. 13 and *Bombay Burmah* new shares at Rs. 82-8. *Premier Construction* were in enquiry at Rs. 106-8 following the increase in the dividend from Rs. 5 to Rs. 6 per share for the year 1941. *Indian Iron* changed hands at Rs. 22-2; Steel Corporation at Rs. 13-14; *Burma Corporation* at Rs. 1-11 and *Indian Copper* at Rs. 1-10.

For the moment the share market is in the doldrums. Quotations for leading counters cannot be had and even a second exchange does not mean that there is as market for popular shares like Shivrajpur Syndicate which is on any view far removed from the war zone.

## MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, Feb. 19.

The news from the Far East has been the main controlling factor of the local market during the week. Business continued to be restricted. There were isolated transactions in cotton mill shares with a slight drop in prices, while Rubber shares were in small enquiry in spite of improved prospects.

*Securities.*—Prices in this section have declined further on reports of the adverse news

(Continued on page 303)

| Carry forward .. | 20,516 | 26,917 | 28,900 | 3,696 |

*(Annual meeting held 16th February, 1942 at Bombay)*

*Audited accounts for the year ended 30th September, 1941:*

Before providing for Taxation, the profit for the year amounted to Rs. 8,99,968 after setting aside an adequate sum for depreciation and meeting all operating costs and other charges. In addition to making a full reservation for the anticipated Taxation and providing for other items the Directors have decided to place the sum of Rs. 75,000 to General Contingencies Reserve against possible shrinkage of revenue due to A.R.P. restrictions and also expenditure which may be incurred under the present uncertain conditions for such matters as A.R.P., War Risk Insurance, high cost of coal or enhanced standard of living allowance to staff.

After making these provisions, the balance carried forward to the Appropriation Account amounts to Rs. 6,49,831. An ad-interim dividend of Rs. 3 per share, free of income-tax, was declared by the directors in August, absorbing Rs. 2,62,490, leaving a sum, which with the addition of Rs. 26,925 brought forward after paying the final dividend from last year's profits, renders available a balance of Rs. 4,14,266 for disposal.

It is accordingly recommended that the balance available should be applied as follows:—

| | | | |
|---|---|---|---|
| Payment of a dividend for the half-year ended 30th September, 1941 of Rs. 4½ per share proportionate to the amounts called up, free of income-tax, making 7½ per cent for the year .. .. .. | 3,93,750 | 0 | 0 |
| Balance carried forward .. .. | 20,516 | 0 | 0 |

*Share Capital.*—To finance capital expenditure undertaken from Revenue and by means of borrowing in the year under review, the first call of Rs. 25 per share on the 25,000 Ordinary Shares issued in May, 1940 has been made payable on or before the 16th February, 1942. making the issue Rs. 75 called up.

*License.*—The Company's application for the grant of a single license to combine the conditions of its own existing licenses is still under consderation by Government. The application was made in 1935.

*Rates for Supply.*—Early in the year the directors examined the possibility of affording still more attractive terms to consumers. As a result, Tariff for general purposes (lights and fans) was reduced with effect from February, 1941. The Government Electricity Duty remains unchanged and now increases the lights and Fans Consumer's bill by an average of 38 per cent.

*Generation.*—The number of units generated was 22.5 per cent in excess of the figure of the previous year.

*Municipal Contract.*—The Company's current seven year agreement with the Ahmedabad Municipality expired on 31st January, 1942, and the Municipality, under the option provided there in, gave notice of their desire to renew it for a further period of five years from 1st February, 1942, on the same terms and conditions. A new agreement recording this renewal is being prepared.

*Agents.*—Messrs. Killick, Nixon & Co.

*Authorised Capital*—Rs. 1,50,00,000 *in* 1,50,000 *shares of Rs.* 100 *each. Issued*—*Rs.* 1,00,00,000 *in* 1,00,000 *shares. ISSUED WEEKLY

Vol. XXIX. No. 9 SATURDAY, FEBRUARY 28, 1942 Price Re. 1

## Insure and Increase Nation's Strength

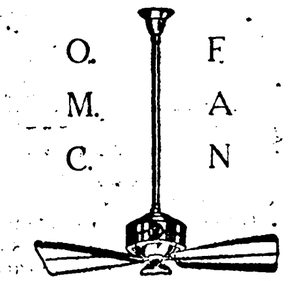
Financial Independence of the individual is the measure of Nation's financial strength.

In this hour of world turmoil, all Life Insurance Policy-holders should take stock of their insurance cover and ascertain just how strongly they are fortified against the unpredictable that lies ahead.

And, those individuals who have not yet made provision for their protection need do so without delay and thereby contribute towards Nation's strength.

Be advised and write to-day to

NATIONAL INSURANCE COMPANY, LIMITED,



7, COUNCIL HOUSE STREET, CALCUTTA.

Phone: Cal. 5726, 5727 and 5728.

Branch and Agency Offices throughout INDIA, BURMA, CEYLON, BRITISH EAST AFRICA AND FEDERATED MALAY STATES.

## NO SHAREHOLDERS

The NORWICH UNION LIFE INSURANCE SOCIETY is a Mutual Company and there are no shareholders to absorb any of the profits accruing to the business. All profits that are made are returned to the policy-holders. With Profits and the Society is run for their benefit. It is one of the very few Mutual Societies transacting business in India and is in a position to offer the very finest Life Insurance contracts at competitive rates of premium. Having been founded in 1808 the Society absorbed the Amicable Society in 1866 and thus can claim to be the OLDEST LIFE INSURANCE OFFICE in the World. The Society is represented in India by

## WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

SHORT credits have been more usable during the current week; and a fair volume of business has been reported in the interbank call money market at the quoted rate of ½ per cent in Calcutta. The steadier feeling in the money market has sprung as if from nowhere; for, the balances maintained by the scheduled banks with the Reserve Bank are over the Rs. 40 crore mark. It has, however, to be added that the cash of the Imperial Bank with the Reserve Bank accounts for 50 per cent of the total deposits of member banks. That is to say, the deposits of member banks excluding the Imperial Bank, amount to Rs. 20 crores. There is, in addition, the till money which banks maintained. This is usually roundabout Rs. 7 crores. It is quite possible that, due to the graver menace now confronting Rangoon, banks in India are anxious to maintain a higher proportion of cash in till. To strengthen the cash resources, the big banks are not unwilling to pay ½ per cent for call deposits. On this interpretation, the better demand for short funds noticeable this week is to be attributed, not to any increased trade activity, but to the general urge to reinforce cash balances.

In such acutely critical times such as the present, it is comforting to know that banks are maintaining substantial cash in their till, substantial balances with the Reserve Bank and also substantial portfolios of giltedged and other liquid securities. The public in India must feel reassured by this impressive evidence of the abundance of liquid resources maintained by banks. It may, therefore, be taken as certain that the larger banks will be able to meet with confidence any the most adverse political developments. It is some of the medium banks and a good many of the smaller institutions which will require to be sympathetically looked after. The position of the latter institutions is rendered more difficult as they happen to have more highly specialised in the expansion of branches. Immediately following the entry of Japan into the war, the medium-sized banks and the smaller banks experienced considerable withdrawals of funds. They stood up to the strain magnificently. It is fortunate that there was not one single casualty in the acute pressure of December and January. This may be taken as a gratifying indication of the essential soundness of the structure of the medium-sized banks and the smaller banks. Many of these institutions consulted us regarding their anxious problems; and we were, therefore, in a good position to know full details as regards the assets and liabilities of a good many of them as well as of the withdrawals which took place. We know of one institution which paid off as much as Rs. 3 crores in seven weeks. This was nearly 35 per cent of the deposit liabilities. The bank in question took a loan of Rs. 1 crore on its government securities so as to cope with the emergency. But it was able to recall some of the advances and liquidate fully the loan which it had taken on government securities. It is no small achivement for a bank to meet runs to the extent of 35 per cent of its deposits and yet maintain its giltedged portfolio intact and also a cash proportion of over 20 per cent. Many of the smaller banks had equally satisfactory records.

The position will be different in the case of any future crisis. It is, therefore, of great importance that the Reserve Bank should be in continuous watch over the banking situation. To keep watch over the banking institutions in India, has its own difficulties as there are three money market centres which have to be attended to. There is a banking group in Madras, another in Bombay, and a third in Calcutta. We consider that, as an emergency measure, the present system of both the Governor and the Deputy-Governor of the Reserve Bank staying together in Calcutta or in Bombay must be abandoned. If the Governor stays in Bombay, it is advisable that the Deputy-Governor stays in Calcutta. It will also be necessary for the Governor and/or the Deputy-Governor to pay visits to Madras periodically. The bankers in charge of the smaller institutions feel over-awed at the thought of approaching the high gods of the Reserve Bank. These bankers must be cured of this awe. It should be particularly the task of the Deputy-Governor to get intimately into touch with the heads of the smaller institutions in all the three money market centres. By such means he should be able to offer timely advice and provide opportune help.

The returns of the Reserve Bank for the week ended February 20, record comparatively few changes. In the issue department, active note circulation in India is higher by Rs. 1.76 crores. In the banking department, the Government of India have taken further ways and means advances for Rs. 7.36 crores. The latest figure of ways and means advances given by the Reserve Bank is Rs. 15.31 crores. The deposits maintained by the Central Government with the Reserve Bank are higher at Rs. 7.65 crores (plus Rs. 4.26 crores). Deposits of member banks show a decline of Rs. 1.85 crores to Rs. 40.69 crores. Foreign balances in the banking department are higher by Rs. 98.13 lakhs. The Treasury Bill results of the week do not call for any comment. Bidding for tender bills was poor. The average rate of accepted tenders was unchanged at 1 per cent per annum. The offer of tender bills for next week is Rs. 2 crores. Sales of tap bills make a poor showing.

In the exchange market, there was considerable business in sterling remittances. The near positions were inclined to be quiet.

Banks were sellers of T.T. on London for Ready up to six months forward at 1s. 5 31/32d., and banks were buyers of T.T. on London Ready up to six months at 1s. 6 1/32d.

D.A. sight bills quoted 1s. 6 9/32d., for three months and 1s. 6 11/32d., for four months.

Dollars were Rs. 332-12.

Firms' money for call and short quoted ¼ per cent and for one to four months deposits ½ per cent.

* ONLY cars of the above make, model and type are wanted.

* The public are warned that the dealers have been instructed to accept only cars which will not entail disproportionate expenditure for reconditioning to Army requirement. Specification of condition and equipment is available with all of the above named dealers.

Arrangements with dealers provide only for cars within each dealer's operating area. If petrol is needed to get your car to the dealer's premises, apply to the dealer concerned. If your car is located a considerable distance from the nearest dealer, address "Vehicles Directorate, Directorate General of Supply, New Delhi" when if possible, arrangements for its acceptance will be made.

## IMPORTANT

To Owners who have already sold their cars for delivery to the Defence Department.

The above prices are retrospective. You are to apply to the Dealer to whom you sold your car for additional payment on the basis of the prices now authorised and in accordance with paragraph marked with asterisk. Major reconditioning expenditure will be deducted from the amount payable.

INSERTED BY THE DEPARTMENT OF SUPPLY, GOVT. OF INDIA.

# Finance Abroad

Thursday Morning.

More than ever matters financial count for little. Policy is of more moment than money, and the singular stability of money and exchange rates is a pointer to the sterility of finance in this war. The call-up of all men fit to serve and the movement of troops are of greater significance than variations in short-term borrowing. Two years and a half of war have suffered to show that cheap money and exchange stability are not enough. Production is of vast importance but money is concerned little with production. The advent of tighter money conditions in New York towards the end of the year is as void of significance as the report that the U. S. Treasury was going to borrow a couple of billions in January and March. War effort is independent of finance, and if it were the bullion market alone that mattered. India must have gone a long way towards victory.

Such reflections are provoked by the frenzy that has put up the price of sovereign over Rs. 40. Some see most wear by silver at present and the absence of any material change in money and exchange is offset by the flood and ebb of speculative activity in the bullion market. There is, it may be recorded, no change in the price of gold and silver either in London or New York rates. Exchange rates are all held at control rates. There is no such thing as a 'free' rate after the Japs pushed into Shanghai. European currencies are unaltered and the N.E.I. guilder is apparently unshaken by the progress of hostilities. The T.T. rate on Batavia is known to be 55¾ guilders per Rs. 100 and banks buy T.T. at 57½ per Rs. 100. The war does not seem to have caused any depreciation in the N.E.I. currency which is of vast importance owing to the fact that all Dutch banks and commercial offices moved to Batavia when the Netherlands was proclaimed to be enemy-occupied territory. Of the islands Java is apparently offering the most fierce resistance, for the Indies are the home of spices, sugar, quinine and coffee, Colonial produce for which the Germans would give their eyes.

What the fighting in the Indies may produce in relation to the commodity markets can only be guessed. Tea, rubber and plantation produce will be inevitably affected like sugar. Supplies of copra from the Pacific may be upset by the war and the whale fat market like the soyabean market may register a rise. Little is known about the reactions of the Baltic Exchange to the extension of the war to the Pacific. One must assume that Manila hemp, copra and tobacco will be affected like the other commodities. Price control and freezing orders may lead to a halting of the uptrend in prices. Rubber, of course, is the key commodity and every step taken to conserve supplies and cut consumption attracts notice.

The weakening of the Eastern Exchange Bank shares inevitably attracts notice. The fall is associated with the war which puts the fortunes at the mercy of the marauder, but it does not detract from the enterprise which was in evidence when two new branches were opened in Java by the Chartered Bank. Over a wide field the Chartered serves trade and industry in the East. The last year saw developments in Iraq affect the Eastern Bank particularly. The situation since then, is different, as Iraq is now in the sterling area like Syria and Lebanon. Like the Ottoman Bank the Eastern Bank is sure to gain through the stability re-established by the Allies in the Middle East. Such stability may not be soon re-established in the Far East though the exchange banks in Upper Burma are sure to gain through the closer co-operation promised to China.

Their difficulties may be wholly unknown in London where easy money conditions obtain and Treasury Bills for 75 million sterling are taken up at 1 percent or so week after week. The renewal of Treasury borrowing against deposit receipts has been reported as from this week only. £20 million has been asked. For over a year, treasury deposits in the aggregate have averaged around 500 million and they have become a distinct element in the floating debt. It is not only the Bank of England that lends to Government; all Clearing Banks can, and do lend, and they can use the receipts for credit expansion. Since they are distinct from other Advances they do not make for profits and the Big Five naturally reported reduced profits for 1941 while they found no difficulty in maintaining dividends. But their main task is to finance war and war production. Dividends are more or less irrelevant and their full co-operation in measures for financial control generally has indicated what place they hold in helping the war effort, and much may be said about their attention to regulations and to investment in war loans.

The financial machinery is working smoothly in spite of the loss of gold and foreign exchange, and the reduction of overseas investments. It is the military machine that creaks and cracks but then the first is more or less unimportant at present. The money market and the stock exchange have not responded overtly to the speeches on both sides of the Atlantic. For the moment facts are stronger than orations but Parliament's approval of the Cabinet changes must make a difference to all markets to-day. There is nobody talking about budget changes though an increase of 500 million in over-all expenditure is forecast. The application of 50 percent of Britain's national income is regarded with express approval. The critics particularly are pleased to find that Hitler's production drive will be matched at home. Nobody bothers about the real cost of the war. If 3000 million sterling has to be borrowed in 1942-43 they will be borrowed. The limit of effort has not been reached for the goal is the mighty flood of war supplies in the fourth year. There is no longer any calculation of the gap because the policy of freezing of wages and prices alike has answered partially. Inflation has been counteracted and Australia has copied precisely the procedure adopted. Mr Curtin has adopted Britain's policy for his country's war effort and has promised again that banks and their deposits will be untouched by emergency measures.

Shipping losses and the transfer of German ships from Brest are of greater interest than U. S. measures. Though it is conceded that the U. S. A. can build any tonnage it chooses, there are many difficulties besides time. The stock exchange, particularly the oil group, has been weak of late and the direct thrust on Rangoon is likely to accentuate original apprehensions. Burma's currency may enjoy special conversion facilities at Indian joint stock banks as from January but it must be recognised that many districts are enemy-occupied territory. No Notification has appeared because Burma, originally two provinces—the first province of Lower Burma under a Chief Commissioner was constituted by Lord Dalhousie with Phayre in charge—is now one country—neither Dominion nor Colony—and separated from India whose C-in-C is responsible only for the conduct of military operations.

What guarantees there are for the banking system are not known. Is there any insurance of deposits? Highly unlikely, for a hand-to-mouth policy has been in evidence and in regard to war damage etc., the dependent Empire has been lamentably behind as compared with the Dominions. If Upper Burma benefits from the transfer of offices to Mandalay the danger to Burma is not averted. The Indian like the British investor will take a bad knock, and the current prejudice against all Burma shares is not due to postal and telegraphic delays. U. S. assistance may determine ultimately the fate of the Indies, but the short-run effects of the Japanese incursions are likely to be disastrous. The revised rates for marine insurance are the direct result. Even rates to the Persian Gulf have been enhanced and the difference drawn as between East and West Coast ports is illuminating and disturbing. Additional rates are charged for the Levant. Singapore casts a long shadow over the freight and insurance markets as from February 15 when new insurance rates came into force.

The U.S.A.'s resources and their application do not call for comment after the President's elaborate review of the situation at home and abroad. Supply is not a problem like strategy. If the British are going to tax services, the U.S.A. has had a tax for some time on phone calls and cinema tickets. Money is not the difficulty. Latin America is a willing helper and Canada is a ready co-adjutor of both Britain and the U.S.A. Whatever may be said about Germany, the Nazis even in making use of forced labour and stolen property have displayed originality and daring which the British have been asked to emulate. The Russians have to recover the Ukraine and refloat the industries of the Donetz Basin. How and when it is accomplished will determine the course of European events in 1942.

## Prices and Price Control—II

By DR. P. S. LOKANATHAN

In relation to the problems of price control in India, it is necessary to guard ourselves against the danger of condemning all price increases as undesirable or even of condemning without qualification every kind of inflation. Indian price-levels had reached such low levels that an increase therein, however secured, should be welcomed and may be justified. In the second place, the problem of price control should be split into its different aspects, for the price-levels of food and other agricultural commodities follow trends different from those of raw materials and manufactured articles. Thirdly, the objective of price control in India is and should be different from that of countries like Great Britain, which has already built up a strong and efficient industrial structure and in which the main problem is now to ensure large increase in prices. In India the objective of price control is to discriminate, to allow certain prices to go up within limits, to control certain other prices and to protect the poorer sections of the community against excessive cost of living. The money incomes of large masses of the population have not increased in proportion to the increasing prices of certain essential articles of working class consumption, and it is the duty of Government not to let those prices soar higher and higher.

The argument against price control that it flies in the face of the economic laws of supply and demand has not substance in it, as it is in the power of the community to alter both supply and demand by deliberate action. In abnormal times like the present, we cannot leave to the mechanism of price to secure an increase of supply or a diminution of demand. If prices are to be kept down, either supply must increase or demand should fall, and we cannot seek to bring about an increase in supply or a reduction in demand by putting up prices.

Further in the case of shortage of essential articles of general consumption, some form of rationing should be combined with price-fixation. Where inequalities of income exist—and they do in every country—the poor cannot afford to buy necessities when their prices rise and hence their consumption would fall very seriously. On the other hand the rich can buy up large quantities of such scarce goods leaving little for the consumption of the bulk of the population.

The need to put down profiteering also leads to price control. Owing either to a shortage of ordinary articles which cannot be increased at an adequate rate during the war or owing to increased government demand, large profits accrue to the sellers of such articles. Although by a levy of an excess profits duty, a good slice of all abnormal profits might be absorbed by Government, the burden on the poor who have to pay a high price for the articles is not lessened and hence the tax ultimately bears upon the poor. To avoid this result it is necessary to have recourse to price fixing.

Above all price control is resorted to with the object of reducing the burden of financing the war and drawing off the necessary resources for war purposes. It is often accompanied by a system of rationing and of drawing up a list of priorities, so that the available resources may be utilised for the more urgent needs. This on the whole is easier in war than in peace as the end is definite and the test simple.

In the light of the above general considerations let us examine the problem of price control in India. As soon as the war began, prices soared up on account of a lot of speculative activity, and Provincial Governments constituted Prices Advisory Committees at the instance of the Government of India with the object of fixing maximum prices of certain important articles. In regard to the fixing of the prices of imported articles the direction was given that regard should be had to import landing prices on which a certain percentage must be allowed. After the first scare subsided, conditions became less abnormal, and the threat of control was often adequate to bring down retail prices. But the problem before the Government was not one of reducing prices, but to ensure to the ryot minimum prices for his products, the prices of which sagged on account of the loss of foreign markets. Oilseeds were most affected and the Government of India's action in entering into an agreement with the United Kingdom for the purchase of groundnuts at a certain guaranteed price brought only a little relief. Raw cotton was subject to speculative activity and the prices were generally going up; but there was a sudden fall in December, 1940 and the freezing of Japanese assets has added to the difficulty of selling short staple cotton. Pulse and millets have on the whole remained steady, although since June, 1941 their prices are going up. Anyhow price problem in respect of articles of food and certain agricultural commodities has till recently at least not been how to reduce their prices but rather how to guarantee to the agriculturist certain minimum prices. The price-indices of food and other agricultural commodities in contrast to raw materials and manufactured goods have shown a downward, if irregularly moving, tendency.

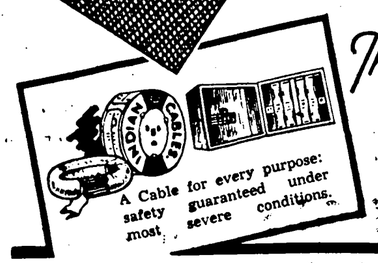
In recent months, however, on account of the high prices of wheat and rice some degree of price control has become necessary. The Government have fixed the maximum selling price of wheat in the Punjab and have appointed a wheat controller to ensure its proper enforcement. The high price of wheat affects not only civilian consumption but also affects government which is one of the largest buyers of wheat for military consumption. The price that has been fixed is apparently fair and reasonable having regard to the costs of production and the margin necessary for the ryot. In regard to rice, the position in Madras Presidency has become rather acute on account of the deterioration in the Burmese situation. Only three or four months ago it was found unprofitable to import Burmese rice, as local prices were lower than Burmese export prices. But to-day the price of rice has advanced, and has very seriously affected the condition of the working class population all over Madras. The discontent of the poor has taken a very serious turn in some towns and isolated cases of looting have been reported. Madras is not self-sufficient in the matter of rice at present and the deficiency amounts to between 5 to 10% of its needs. Although in each district there is a district price committee functioning which fixes the maximum price of rice, the difficulty in the face of a definite shortage, of enforcing the prices has become pronounced. Unless Government is able to undertake the task of distribution by opening a number of retail depots in many centres in each district, mere price fixation will not be adequate, as the comparatively rich can have a large share to themselves at the expense of the poorer sections.

It is in respect of essential manufactured articles that price control is most necessary. The prices of cotton goods have gone up to an alarming extent. The index of prices of cotton goods, which stood at 117 in August 1940, has gone up to 213 by August 1941. The increase in the price of yarn on which the handloom weaver in Madras depends has been even more alarming and thousands of weavers are left in an utterly destitute condition. Government action in both cases has been exceedingly remiss and dilatory. According to the latest available information the Millowners' Association has agreed to supply certain standard cloth woven out of 20s in sufficient quantities and to open a number of retail shops to sell them to the poorer classes. How long the scheme would take for its effective operation we cannot tell; but the case for immediate action is undeniable.

In a country as vast as India where articles are of innumerable varieties and grades, where there is no standardisation in production or in consumption and where merchants do not give bills, the enforcement of any system of price control is no easy task. Where we are dealing with imported articles prices fixing and administration are simple and fairly easy. The success of petrol-rationing indeed illustrates the fact that where Government deal with a big firm, either monopolistic or otherwise, it is easy to put through a price control scheme or a rationing scheme. But where we have to deal with a large number of unorganised traders and small shop-keepers, the administration becomes exceedingly complicated. Again Government have attained a fair degree of success in controlling supplies either by imports or exports and in the issue of priorities of various kinds of articles.

As the war continues problems of price control and rationing are bound to press increasingly for solution. In the last war the inflationary forces working abroad had their full effects on Indian economy and our prices mounted up in correspondence with Britain and other countries' price-levels. Some check to the ever increasing prices was put up when the exchange rates were pushed up. Fortunately this time the British Government have so far succeeded in their control of prices that inflationary forces are kept well under check. The indices of prices of primary commodities in Great Britain show remarkable steadiness, though latterly there is an upward trend. But it is probable that prices do go up in Britain as the war continues and will have their repercussions in India through her external trade as well as through the monetary mechanism. India's money incomes and price-levels will then move up in harmony with British prices. But the Government of India are more alive to the situation now, and it is possible that by their control of export prices, and the rationing of imports and by their influence as monopolistic buyer they can arrest the growth of prices. Still with a growing export surplus for India and increasing money incomes prices will rise, and further measures to prevent inflation must be adopted. Besides taxation and borrowing by the Government, the hoarding of wealth by the public acts as a deflationary factor. While these are useful and necessary as far as they go, what is required in this country is the increase of economic activity and of real income, thereby preventing monetary inflation. It is doubtful if Government is able to absorb all excess incomes after necessary consumption in war industries. With the Imperial Bank hundi rate at only 3%, with call money rate at ½% and ¼% and with Treasury Bill yield at less than 1%, the reign of cheap money is assured. Industrialization offers the best remedy for the use of idle funds and the Indian situation is so far different from the British that there is scope for permitting the establishment of industries of the basic kind, although from the narrow military point of view they may not be regarded as war industries. Hence a policy of industrialization has added significance in the present situation in India.

## OIL, THE WAR AND THE INDIES



The non-fulfilment of so many facile prophecies in the first two years must naturally make one reluctant to make any kind of statement merely on the basis of statistical information. In the case of oil especially one has to be more than usually circumspect, for nothing has been so swiftly demonstrated as the error of relying on the hazy assurances of neutral experts. Over a long period there has been little or no change in the relative position of oil producers in the world. Mexican production might flatter but that was neither here nor there. Despite the reported reduction in U. S. output of crude oil in the U. S. A. during the first half of 1941 the domestic oil position in the U. S. A. was unchanged owing to the contemporaneous contraction of exports. The dominance of North America in the world production of petroleum is an established fact, but it is the question as to the possible output of Rumania that is most readily framed in a war-worn world. On any view, however short, it is Rumania's oil that keeps Germany's war effort to the mark. Russian raids on Ploesti and the port of Constanza must have certainly pulled down production below the six million tons level; but Germany might have drawn more last year than the four million tons or so expected in the middle of last year. Transport by way of the Danube might have presented problems but various countries have been deprived of their normal share of petroleum for the exclusive benefit of Germany—mighty monopolist. To the average observer, the changes in the oil position are of little account as compared with stocks available for immediate consumption in Japan. There was Dr. Dalton's assurance in December that

Japan had piled up war supplies including oil before engaging the Allies in battle. There was the quite early prediction of the Economist that in spite of the fall in U. S. exports of crude oil in 1940 the Japanese were not ill-placed. It was urged that the ban on exports of aviation petrol to Japan came only in August 1941. It was remarked also that California continued to ship the pre-war quantity of petrol and lubricating oil. Mexico used to sell freely and an agreement was made with Japan in April 1940. But this is of no importance at present. Assuming that Japan's home production is only 400,000 tons, she must have saved up much from previous oil imports. The stoppage of imports from the N. E. I. which agreed not long ago to find over half the oil needed by Japan must be disregarded on the assumption that the stocks sinted Japan. What Japan has attempted by way of synthetic oil production is not known. It was asserted that hardly a quarter of the country's normal requirements could come from home production. But the Japanese had set up reserves and somebody guessed before war came to the Pacific that oil for two years of war had been set aside. The Japanese, it was noted even in July last, had prepared for a new war besides the old Incident. The Army had planned, and business interests acquiesced, as was proved by the slowing down of industrial production generally in the interest of 'stock-piles'. But all that can be said about Japan's oil stocks based in part on specific legislation meant to help her refiners, is of little importance beside the supreme fact that she is striking for the N. E. I. oil.

The Netherlands Indies are the second largest producer of oil in Asia. The Dutch Indies produced in 1940 as much as 7.8 million metric tons, nearly equal to the combined output of Iraq, Arabia, Egypt, Bahrein, India, Burma and Borneo. The total production again was fully equal to that of Europe excluding the U. S. S. R. Now these figures are old and perhaps unrelated to the exigencies of war. The output of Iran and Iraq may have actually risen. The 1941 figures will be known only later; yet it may be urged that the classified summary of oil production available in a special statistical note in the October bulletin of the League of Nations should do duty. Synthetic oil production eg. in Britain where 150,000 tons came from Billingham and the other plants is of relatively little importance though not in Germany which gets perhaps two to three million tons by hydrogenation of coal. The synthetic production in 1940 was put at 2¼ million tons. The U. S. A. claims an output of over 5.2 million metric tons of lubricating oils alone. The production of natural gasoline in 1940 exceeded 5,973.000 tons and the U. S. production of motor spirit exceeded 65.2 million tons. The output of heavy oil in 1940 was even larger at 71,819.000 tons so that the fall of 3 percent in the output of crude oil for the first half of 1941 (as noted in the World Economic Survey) could not have affected the total much. The U. S. production of kerosene incidentally exceeded 9.5 million metric tons, and the statistics disclose that the period of pro-rationing had come to an end before 1940. The tanker position, of course, cannot be disregarded, and the efforts of Mr. Ickes to cut down motoring in the Eastern States followed the diversion of tanker tonnage for the use of Britain.

Since the strategic materials of the East are in danger at present it is not necessary to emphasise U. S. superiority as much as possible gain to the Japanese. What reconditioned plants may achieve after a period can only be guessed. For the moment, it is enough to indicate that scorched earth tactics as in Palembang do not promise complete success for the enemy can, and will, use the oilfields. There is the evidence of Dr. van Mook on this point. It is not possible to discuss the limited life of Borneo's wells, when it is a question of Japan adding to the 416,000 tons of motor spirit and the 405,000 tons of heavy oil she produced in 1935. The figures for subsequent years are not available, but the table provided in the October bulletin indeed suggests that oil output in Japan rose substantially between 1930 and 1935. The new drive for self-sufficiency since that period must have augmented home oil production, and the point to emphasise here is that home output of lubricating oil at present must exceed the 243,000 tons recorded in 1935. It is, however, the oil of the N. E. I. that concerns us, not Japan's probable production. While refinery capacity and technical efficiency are vital factors even for the captors, who are not at all like the Moro or Dyak insurgents with whom the colonial administration is familiar but are well versed in the arms and science of Europe, it is certainly open to suggest that the prompt blasting of Palembang will give much trouble.

Japan gets a minute quantity of motor spirit from Formosa as from Manchuria but she may get a lot from British Borneo which exported 118,000 tons of motor spirit in 1940; 51,000 tons of kerosene and 759,000 tons of heavy oil. This is a fleabite as compared with the production of the Dutch Indies. In 1940, it is recorded that the Dutch Indies produced 165,000 tons of natural gasoline, produced 1,948,000 tons of motor spirit, 1,000,000 tons of kerosene and 2,854,000 tons of heavy oil in addition to 34,000 tons of lubricating oil. While nothing is known about India's production, it will be obvious at once that the N. E. I. is a far more important producer than Burma which is, however, a more important source of lubricating oils than the N. E. I. to judge by the figures so far available. The classified total of 1940 production will appear smaller than the 7,800,000 metric tons cited at the outset as the total annual output for the N. E. I. but the point that really concerns us is an estimate of the extent of Japan's gains in Tarakan, Borneo and Sumatra whose own oilfields are under enemy occupation. This is not the place to mention that in regard to petroleum products in 1940, the N. E. I. led Venezuela in regard to motor spirit and produced almost as much heavy oil, yet it may be noted that the very large oil production of Curacao is entirely based on Venezuelan oil and the absence of figures in the statistical note, which contains many gaps, cannot be taken to mean that Trinidad and Tobago have gone out of business. The available data suggest that Canada alone of the members of the Commonwealth has oil inadequate for war and peace. Amongst Latin American countries, Argentina is getting as important as Mexico. India's own preference for kerosene explains the peculiar composition of Burma's oil production. Yet these conclusions like the previous figures only lead to the insistent question, what will Japan make of the N. E. I. assets if she is in temporary occupation. The answer cannot be furnished by a casual reference to the very limited tanker tonnage available to Japan. The N. E. I. oil concerns others besides the Royal Dutch Corporation. It is a matter of vital interest to China which has suffered in the past from the too great willingness of American shippers to sell oil to Japan.

## Prices and Labour

The slump in commodity markets was hardly reflected in the movements of the working class cost of living index. As the *Bombay Labour Journal* indicates the rise noted in November was not arrested, and the cost of living index for December was fourteen points over that for December 1940. Food grains were dearer, and sugar as well as gur were more expensive for the average buyer. Vegetables cost more, and tea almost exceptionally turned more expensive. Fuel and kerosene were among the most costly items in December and the war in the Far East led to a rise in the cost of *supari*. For the working class in Bombay December was admittedly expensive. The introduction of severer and a modified form of price control since December is assuredly explained by the swift rise in prices. The December index at 129 (base year July-June 1933-34) proves that the working class had a substantial claim for relief. New measures such as an advisory committee on which working class representatives would put forth the views of consumers as a class followed in the wake of the familiar measures against profiteering. The control of wheat prices did not lead to any fall in the price of wheat which went up to annas 0-8-6 per paylee in December proving once again that a big time-lag exists in these cases.

The uniform rise in prices over the year 1941 leading to a higher cost of living may be said to support the case for control. The problem, of course, lends itself to no smooth or swift solution, but its existence justified the fourth price control conference. In Bombay in the case of the working class there was a rise in November and a further rise in the cost of living in December. In Ahmedabad, too, the index moved against the working class in November. The over-all increase in a year was thirteen points when the November index stood at 94 (base year August 1926—July 1927). Higher prices for grains, pulses, tea, chillies etc., forced the index upwards. Dhoties were dearer owing to the higher prices asked for the most ordinary garments. It may be readily deduced that the increase in prices was more pronounced in the second year of war than in the first. The consequences for the workers were the higher cost of living and efforts at price control, accompanied by the cost of living bonus designated dearness allowance. The mill workers and railway labour in Bombay have been so far the chief beneficiaries of steps taken to offset the advance in the cost of living in 1941. The cost of living rose more sharply in Sholapur in November. It must have risen further since. By November, the Sholapur index showed a rise of 18 points in a full year. Similar rises were reported by Nagpur and Madras. In fact, November showed a jump after a mild rise and the change in December in Bombay showed how war affects retail trade in which alone the working class is interested. In Nagpur the cost of living index rose by four points in November and in Jubbulpore by two points. If the index stood below the pre-depression base, adopted in both cases, the Madras index based on the recovery year July 1935-June 1936, shifted three points to stand at 118. On the basis of a common year, the change in the cost of living up to November appears greatest in Sholapur, but due regard must be had to the fact that in December alone the index for wholesale prices rose by 10 points in Bombay. Grains and pulses became dearer, and only *gur* was less expensive for the consumer. Others besides the working class were decisively affected by the advance. It is known that the general price index rose in 1940 by nine points. The increase must be greater in the subsequent period, to judge by the changes in the cost of living, even if it be for a limited class in selected centres.

## Trade in 1941

Such changes as are evidenced by a brief recovery in Customs revenue do not affect the main conclusions that foreign trade will diminish progressively. In spite of the fact that January-March 1941 saw a marked falling away in imports, there is reason to hold that the total value of seaborne imports in 1941 runs to Rs. 181 crores. The total for Indian exports during 1941 exceeds Rs. 219.2 crores so that the final result for 1941-42 may turn out to be better than those returned for the fiscal year 1940-41. It is necessary to emphasise that the first quarter of 1941, was marked by uncertainty. After a brisk start in January merchandise, exports went down and the smallest total for any month was recorded in March 1941. In spite of the fact that much trade does not come into the returns, it is obvious that the improvement is really based on the very good showing made under exports, after July up to December. From the point of re-exports 1941 was an exceptional year which is equal to saying that the total for retained imports is in reality smaller, and the actual balance of trade is even more favourable than it appears. The total for re-exports in 1941 exceeds Rs. 16.4 crores. It is manifest that a portion of manufactured imports were reconsigned abroad. Every month of 1941 witnessed a significant increase in re-exports. If textiles appear the principal item, the direct benefit of such re-exports must go to the Indian mill industry whose own exports have been definitely larger than imports. The remarkable increase under re-exports of sugar has again operated to the advantage of Indian manufacturers. As against the total of Rs. 68.14 lakhs worth of sugar imported between April and December, the total for re-exports is as large as Rs. 50.75 lakhs. The expansion in imports of sugar will then appear as bereft of significance and the stringency of demand leading to successive releases of quota is to be viewed as a consequence of the enlargement of re-exports.

## Surat's Industry

The gold thread industry has been examined by Mr. Trivedi who has since studied the silk-weaving industry of Surat. The investigation adds to the information relating to an ancient commercial city. If Surat is a dead port today its industries are very much alive. Silk goods are among its principal exports though the city relies entirely on imported yarn. While mixtures have come to occupy additional importance, Surat has always been fond of Japanese silk as against Indian silk. In recent years staple fibre is usurping the place of silk both for handlooms and power-looms. Changes in demand as well as supply explain the variation in production but, since the rupture with Japan, there must have come further and more decisive changes. It has been said that in a month Surat's weavers have used over 40,000 pounds of staple fibre.

The reliance on imported material distinguishes the Surat weaving industry which has to compete with imports. Annual production is valued at Rs. 70 to Rs. 80 lakhs including mixtures. While the powerloom industry has gained at the expense of the handloom, it has still provided work for about 6000 people on an average. Like every cottage industry, silk weaving is in the grip of the merchant. If piece rates are in force, the wage-level is admittedly depressed. The independent artisan is a late and unimportant survival while Surat has lost its *lungi* trade in Bengal to Madras and Japan. Conditions may improve materially owing to the difficulties which the powerlooms depending on imported rayon and staple fibre must face at present. There are 46 powerloom factories of which 23 are designated silkweaving factories. According to Mr. Trivedi Rs. 20 to Rs. 25 lakhs have been invested in the small-scale industry which has always looked to Bombay for its silk. Markets are scattered and consignments on commission are the rule. Exports abroad are not unknown, though the industry suffers from other handicaps besides lack of government assistance. After the disappearance of Italian and Japanese competition, Surat's manufactures may be said to command a larger market at home and price differences will not operate as a bar. The divergence between the sericultural industry and the silk industry emerges as usual and the right remedy is an adequate supply of spun silk yarn. The familiar conclusion that there is not enough silk in India is reinforced by any reference to the conditions created by the war. The withdrawal of the duty on rayon yarn and the enhancement of duties on rayon goods appear desirable to Mr. Trivedi who recommends a complete dyeing, bleaching and finishing plant and a lower tariff for the supply of electricity to the industry which has to cope with illiterate labour and indifferent designs.

## Cotton and Jute Manufactures

The rise in prices supported the improvement in the cotton trade and industry during

B. B—3

November. An increase of twenty million yards in the production of cotton goods in October as compared with October 1940, indicated that the mill industry was busier than ever. In the cloth market too November saw more stocks moving into consumption. A sharp fall in imports which came to five million yards only in October, showed that the mills will have to provide three hundred million yards more than in 1940-41 in addition to executing war orders though the fall under imports between April and October is fiftytwo million yards as compared with the previous year. The big bulge in exports is a reminder of the fact that exports for the seven months come to 393 million yards as compared with 183 million yards in the preceding year. Imports halved, exports doubled, and re-exports were even larger. These constitute a highly favourable background for the mills at present.

If cloth and yarn prices are not at the November peak, mills are undoubtedly helped by the depression in raw cotton, conditioned partly by an anticipated increase of 4 percent in the 1941 crop. Mill consumption of cotton has been stabilised at over 325,000 bales per month since August. While the calamitous fall in raw cotton exports after October lends support to the campaign for crop restrictions as also to the duty of checking cotton imports when India's total exports in 1941 would appear to be below two million bales the mills are likely to take 4 million bales or so. In regard to raw cotton imports, there is still a possibility that the record quantity of 1937-38 will be exceeded in 1941-42.

While trade conditions are still in favour of the mill industry the 60-hour week in force from October in jute mills is essentially a result of war orders. While demand for some months is sure to run at a high level the export outlook is hardly propitious. The advance in output after October, if it has had no determinant effect on stocks is a short run effect of the war which is responsible for the wide fluctuations in monthly exports. Though there is a likelihood of exports topping a million tons in 1941-42, the precarious price structure as from December may which the hessian market has been plunged. be said to illustrate the difficult position into The mild recovery in jute exports over the first half of 1941-42 cannot be said to continue. It is not surprising that jute prices follow hessian prices and the possibility of a further fall in jute-exports is envisaged cold-bloodedly. Whatever may be the present state of mill activity and the probability of more war orders coming in the future the peak prices for September have gone and the jute industry must be reconciled to a smaller foreign market and a reduced margin of profit. That of course does not affect the war effort of the mills, reflected once again in the generous donations made by mills and agency houses to the East India Fund. The difficulties in the trade are, however largely, due to the disappearance of middlemen who may be displaced by the mills themselves. A co-operative organisation may be mooted but for the fact that its evolution is rendered difficult by the war. The contrast between the cotton and jute mill industry should be mentioned at least for the sake of indicating that an industry which looks to foreign markets suffers from peculiar disadvantages.

### Defence Building Activity

Building activity in the U.S.A. received a definite stimulus during 1941. Whereas construction was curtailed in many countries, those not actually involved in war and capable of carrying out projects recorded a big rise in building despite the higher cost. According to the F. W. Dodge Corporation's report for October covering 37 States, contracts were awarded in October at a daily rate of 50 percent higher than in October 1940 and well above the average rate for the first three quarters of 1941. Private construction showed little change over a year but public construction despite a fall compared with September 1941 was about two times as great as in October 1941. The reason for this expansion must be sought in the defence programme. Of the total contracts distributed in October approximately one half were Government contracts for defence purposes. In New York and Northern New Jersey, the rate of contract awards was 40 percent above that for October 1941. Large scale construction for manufacturing and engineering enterprises underlay this increase since a fall in private residential building was recorded at the same time. In one respect, at least, the U.S.A. exhibited a feature familiar in wartime when all but essential repairs have to stand over. For the month of October alone defence construction accounted for over a quarter of the total value of contracts placed.

How much the Administration has contributed to building revival is readily indicated by the fact that between July 1, 1940, and October 1941, approximately 8000 million dollars was allotted for defence construction, of which 3000 million dollars was earmarked for military purposes (exclusive of military housing). The construction programme of the O.P.M. provided for an expansion of industrial facilities estimated to cost about 2½ billion dollars—a sum larger than the total private expenditure on factory construction for the years 1930-40. The defence housing programme is independent. Its total value was roughly equivalent to the value of all new residential building in 1940. More than 1½ billion has been assigned for military housing and 740 military millions were set aside for housing defence workers and community facilities. Actually less than half the money estimated had been spent but the expenditure of four billions in a year and quarter indicates how much the building and engineering trades drew from the defence programme. In the case of industrial facilities like military, housing, progress was greatest for lease-lend like conscription called for immediate execution. Government-financed factory construction had reached the half-way mark by October. A point to note is that Britain was actively interested in the U. S. factory expansion programme. The construction programme certainly lies behind

the dramatic assertion that factory employment in October 1941 was 18½ percent greater and payrolls 43 percent larger than in October 1940. Employment had been steadily rising from May 1940 and in the 18 selected industries connected with defence the total number of workers had doubled since the outbreak of the war. In spite of much current criticism and unexpressed fears the diversion of U. S. resources to war had begun earlier than imagined.

### Changes in 1941

Prices in India after the recession recorded in the first half of 1941 went up steadily, a point reinforced by the usual examination of such changes in relation to the volume of currency. In spite of changes in crops and also conditions of demand over the world as a whole, the price trend remained upward. In South Africa the general index had risen in nine months by ten points after 1940, and in Canada there was a ten percent rise over nine months ended September. Even larger changes are discernible in Argentina and the U.S.A. where the general index in September was 13 points above that for December 1940. In Chile, Costa Rica and other Republics, the price trend was essentially in line with developments in North America. In the wake of higher prices for basic commodities in the U.S.A. there came higher prices for manufactures. The latest statistical bulletin of the League of Nations indicates clearly that China was the worst sufferer in the matter of higher prices. There might have been modified exchange arrangements but Shanghai suffered from the persistent rise in prices. The further depreciation of the tael was provoked by the freezing order of July. The trend was not dissimilar in the N.E.I. where the prices of imports rose more sharply in the first half of 1941 than the prices of the exports.

On a superficial and altogether limited view, Japan might be said to have achieved stability after the serious irregularity that developed in 1940 but for the fact that we know that price control was partial and ineffective, the result being black markets even for such things as charcoal. The stimulus given to secondary industry by the failure of imports and the demands of the Army in the Middle East lies behind the progressive improvement in prices in Palestine. Alone of the European countries, Germany reports little or no change in prices. There is nothing to suggest that uncontrolled inflation had lifted prices. In the case of raw materials, the price index rose by a single point, and that only in September, and this too was offset by a slight drop in the prices of agricultural commodities in Germany. From February to September the general index rose by a single point. The decisive effects of rationing explains the absence of any change as compared with Bulgaria which apparently indulged in an orgy of price-raising after formal alliance with the Axis. Neutral Spain was no more immune from the inflationary effects of war than occupied Denmark and belligerent Hungary. Over nine months the rise in British prices in the second year of war was strictly limited. Control, as often explained, was perfected and the White Paper of July was not without its effects. In spite of the higher prices of raw materials generally, the restraint of consumption evidently limited the advance in the prices of manufactured goods. German policy in regard to prices wages etc., had come to be viewed as worthy of imitation. If the total war has taken many countries towards totalitarian methods in the direction of price control there can be only praise. Nothing is known about the war-time changes in Russia. How the blitz affected production and prices cannot be indicated except through citation of a fall after June in the oil output of the Soviet Union. The estimated monthly production fell after July and Venezuela's output came to exceed as before that of the U.S.S.R. which stepped up production in the spring and reverted to the previous level of output when war broke out.

### Taxing War Wealth

The taxation of excess profits is part of the economic arrangements of the war period. If the U.S.A. had a 50 percent levy on super-standard profits before entering the war the defence programme's demands were large and imperative. While Australia alone is credited with a desire to tax all profits above 4 percent on invested capital no country has altogether avoided the taxation of war wealth. Dividend limitation has long been part of the Nazi policy and Italy has tried a capital levy even before this war. The present levy of 66 2/3 percent on about 3,000 assesees is by no means the ultimate departure in the fiscal expedients adopted in India for the war. The recent treatise of Professor Hicks and his collaborators has explained the why and wherefore of taxation of excess profits. It is in view of the consideration that such excess profits continue to be made that the tax has to be defended. Capitalism has to depend for its existence by surrendering profits above a standard. When the floating debt amounts to over £3,000 millions and the funded debt is over £12,000 millions all sources of revenue must be tapped. Easy borrowing implies regular payment of interest. Those who make money by investing in war bonds are as much affected by direct taxation as the payer of excess profits tax. Even the promised refund of a part of the sums paid as excess profits tax does not affect the conclu-

sion that the investor pays like the taxpayer. In the future, too, both will be affected by the addition to debt and the conclusion applies *mutatis mutandis* to India. The suspension of the second defence loan is by no means a gain for the taxpayer. The tax proposals eagerly canvassed to-day will inevitably follow. When or how the repayment of debt contracted for the war will be undertaken cannot be predicted, but it seems safe to say that the excess profits tax will have to be retained. If new companies in India cannot pay more than 8 per cent as dividend without becoming liable to excess profits tax, surely the State's interest must come first, particularly, as its own assets may suffer in and through the war. Whether an independent India would throw off the burden of internal debt by a capital levy, which, in the last resort, effects only a redistribution of wealth in much the same class that will pay it, seems a question that calls at least for mention. Theoretically, and fiscally, it is quite possible. If it curtails spending power in the postwar period, it will, in a way, make available new capital in the postwar period. Part of the total war effort must be a present or post-war capital levy and the revenue departments in India must assuredly prepare for its imposition. Suitable exemption limits can be fixed and a national government will not hesitate to adopt a measure that can be recommended as correcting the present maldistribution of wealth.

**Australia's Problem**

Australia has more than once expressed concern about her security. The Labour Government's call for a new comprehensive war effort has been preceded by efforts to secure industrial resources. Supply is lastly treated as a distinct problem, and in one respect, Australia enjoys advantages. In spite of the outflow of men into military service, the war production problem does not loom large as stocks of imported goods generally had been built up before Japan entered the war. There is, however,, the fact that the exports of all primary produce in the future will be directly affected by the shipping trouble. As the last monthly letter of the Bank of Australasia puts it, 'the problems of primary production and the storage of surplus not required for home consumption will be likely to increase rather than diminish.' If the area under wheat is not going to increase in the coming season the normal crop of 160 million bushels approved of by the Minister for Commerce is likely to complicate matters In spite of a recent decision to build up emergency food stocks. In the first two years of war, Britain was a good customer and guarantees were made as regards wheat, wool and metals. Secondary industries too developed more rapidly than anticipated, and free communication led to full employment. Since the end of 1941, there has been a decisive change. In 1941 total imports into Australia were valued £108 millions and merchandise exports were valued at £107 millions. The increase in imports of raw materials for industries accounted for the small import surplus. Australia continued to enjoy the benefit of higher prices in the entire war period for all her exports including gold as illustrated by the rise in the export price index during 1941.

The reduced wheat harvest explains the fall in the total value of exports in 1941 as compared with 1940 but farmers generally did well out of wheat, meat and dairy products. Since the main regions of industrial production are far away from the Northern Territory against which alone a threat persists the chances of disturbance to production are admittedly small. The new production drive starts on the assumption that war justifies efforts to develop local production because the Japanese cannot attack the essential factories in Victoria or elsewhere. Rationing of resources for war production has limited the demands of civilian industry and the transition to war economy had begun even *before* the Far East had becoms the Near North. A reversal of the favourable trends of the past alongside of concentration on war production is looked for at present, and the changes that India has to prepare for will have a parallel in Australia where other industries besides pearl-fishing, for which Japanese divers were needed have been influenced by the war.

At this hour of grave import and much puzzlement, three acknowledged leaders of the United Nations have spoken. And the world, wistfully, scans every sentence of these utterances, so as to understand the present in a clearer perspective and visualise the future on more authoritative data.

The hardest task fell on Mr. Churchill. He could sense that the audience he was directly addressing was no longer the hysterically enthusiastic audience that it had been all these months. He could not help realising that whatever he said was being subjected to a stern, severe appraisal. This critical attitude on the part of the House of Commons is one of those sudden materialisations which occur infrequently, but which can have unexpected sequels. Mr. Churchill knew this.

"There was an apparent restlessness and impatience," observes 'Reuter's' chief Parliamentary correspondent commenting on the tense feeling at the opening of the two-day debate. The correspondent continues:

"Mr. C. R. Attlee, answering the first question as Dominions Secretary, was not cheered. Sir Stafford Cripps and the Premier himself entered the House without demonstration. One felt as though the tension of last week had gone and something else that certainly was not complacency had taken its place."

Mr. Churchill had to explain the significance of the Cabinet changes. He had to offer excuses for defects here and deficiencies there. And an old saying tells us that to excuse is to accuse.

It is in such a setting that Mr. Churchill initiated the war debate. He admitted all the reverses. He admitted the grave complications which these reverses would lead to in the immediate and near future. But, "if we look forward across the considerable period of immediate punishment through which we must make our way in consequence of the sudden onslaughts of Japan—if we look forward across that to the broad and major aspect of war, we can see very clearly that our position has been enormously improved not only in the last two years but in the last few months."

On the debit side is the immediate ordeal caused by Japan's blietz in the South Pacific and in Malaya and Burma. On the credit side are (a) the wonderful strength and power of Russia; and (b) the accession of the United States with its measureless resources to the common cause.

Accountant Churchill scans the debit, scans the credit and strikes the balance. His considered view is: "Our position has, in fact, improved beyond any measure which the most sanguine would have dared to predict." He visualises the prospect of ultimate victory, victory complete over all the foes that have fallen upon us.

For his victory over the foes, Mr. Churchill, then, reckons on the strength of his two friends, Russia and America.

From this point of view, it is a fortunate coincidence that both Stalin and Roosevelt have, simultaneously, provided their estimates of the war situation, present and prospective.

Stalin is satisfied that the initial successes of Hitler last summer were due to the element of surprise; that this element has ceased to exist; and that the German army, without such an advantage, are no longer what they were. In other words, if the Red Army could have trounced the Nazis with all the advantage which the latter possessed last year, the task before the Red Army in the coming months is surer of successful accomplishment.

Mr. Roosevelt's address was given in full in the daily press. Everyone must read it and reread it. It is a tonic to the depression induced by recent calamities.

The American President is determined—and he is confident he could continue to send supplies to China, a brave people who, for nearly five years, have withstood the Japanese assault and have destroyed hundreds of thousands of Japanese soldiers and vast quantities of Japanese war munitions.

Mr. Roosevelt is determined—and he is confident of his ability—to continue to send munitions to the British and the Russians in the Mediterranean and Persian Gulf areas; for, if he dose not, the Nazis would overrun Turkey, Syria, Iraq, Persia, Egypt and the Suez Canal, the whole coast of North Africa and the whole coast of West Africa, putting Germany within striking distance of South America.

Mr. Roosevelt is likewise resolved to protect the North Atlantic supply line to Britain and to Russia.

Mr. Roosevelt is determined, on behalf of the American people, that he would continue increasingly the policy of carrying the war to the enemy in distant lands and distant waters.

Mr. Roosevelt is determined to maintain and safeguard the four main routes of communication.

The maintenance of these vital lines requires tremendous production, by America, of planes, tanks, guns and ships to carry them. And, Mr. Roosevelt declared.

"I speak for the American people when I say that we can, and will, do that job."

Above all, the American President is confident that the United States will outbuild Japan and ultimately overwhelm her on sea, land and in the air.

Is this an idle boast? On January 6, Mr. Roosevelt set definite goals of production in 1942 for planes, tanks, guns and ships. These goals will be achieved, declared Mr. Roosevelt.

"To-night, nearly two months later and after a careful survey of the progress by Mr. Donald Nelson and though charged with responsibility for our production, I can tell you that those goals will be attained."

Let us banish all defeatism on the assurance given by the leader of a country which, since the crusade, is the only nation that has fought other people's battles in the spirit of devotion to ideals and at enormous losses to itself. The comfort for the world is the pledge of Mr. Roosevelt who concludes: "Speaking for the United States, let me say, once and for all, to the people of the world; we, Americans, have been compelled to yield ground but we will regain it."

* * * *

This week is noteworthy for the annual meetings of both the Upper India Chamber and the Indian Chamber of Commerce. The outgoing Presidents of both Chambers naturally had much to say, and it is a mark of the rising level of presidential utterances generally that it becomes difficult to pick up quickly points that require mention. For a very wide sweep and remarkable vision is characteristic of both Mr. Menzies and Sir Badridas Goenka. The former was emphatic about Fifth Columnists. But he too did not overlook the hampering effect of the deadlock. How it clogs action in many spheres has been discussed at so many places, that one may be pardoned for a bare brief reference. In the Expanded Council and the National Defence Council Mr. Menzies seeks satisfaction and he admitted that the importance of the U. P. was recognised by the selection of Sir T. P. Srivastava. Professor Ahmed Shah and the Raja of Salempur for seats on the new Council.

Last year Mr. Menzies surveyed the growth of local industries in wartime. This time he has laid stress on what has been accomplished by the forward purchase policy of the Supply Department. It is not every industrialist who concedes that the Supply Department is a factor in industrial development. Not every vested interest admits that the machinery set up by Government is helpful. For Mr Menzies the fact that the U. P. obtained Rs. 35 crores' worth of Supply orders in twentyeight months of war seems eminently satisfactory. It is altogether different from the criticisms uttered in South India about the neglect of their local industries. How much U. P. industries have benefited is indicated by Mr. Menzies' reference to the fact that the production of leather goods is thirty times the prewar output, and in the case of boots, the increase is even larger. Mr. Menzies remains confident that the demands of war on industry will not slacken. He may be said to assess the industrial outlook as wholly hopeful. He had administered at an opportune moment the corrective to much false and loose thinking. Optimism is the faith of the wise to-day, alas, always in a minority.

Though Mr. Menzies was critical of the delays and difficulties experienced as regards excess profits tax at least one suggestion of his must excite universal approval. He remarked that the method contemplated by the Act for the computation of standard capital acts as a deterrent to investment of compnies in defence bonds or loans. This must be regarded as unfortunate, for as Mr. Menzies noticed, there was introduced in the Kingdom recently a special Government loan which could be taken up by trading and manufacturing interests against their liability to excess profits and probably other taxation, and he suggested that a similar type of loan might be suitably introduced in India. Only one small claim was advanced on behalf of the assessee by Mr. Menzies who is both an accountant and industrialist. He suggested that bona fide contributions to war purposes funds should, though liable to be added back

* * * * *

If the Cawnpore speech dealt at length with many local matters, that at Calcutta was concerned with some realities and many abstractions, not unimportant either. It does not detract from the high tone and judicious arrangements of Sir Badridas' survey of affairs that he referred to civil defence as a vital concern and deplored public indifference as much as official inertia. He returned to the familiar charge of Governmental negligence of Indian interests in relation to potential key industries, and traversed the well-known arguments for inaction. While much may seem special pleading, it is well to remark that the general sentiment among Indian businessmen has been obviously affected by the studious unconcern of the Government. The complaint against deliberate limitation of transport facilities is reminiscent of the memoranda addressed in this connection by various Indan organisations which are as much obsessed by the handicaps of road transport as by the chronic wagon shortage.

The increasing importance of the Chamber afforded much pleasure to the President, who described, in passing, the efforts to secure for the Chamber a building of its own. Mr. B. M. Birla has been credited with the suggestion and the funds required are being collected. One may assume that the project will soon be translated into reality, and the Indian Chamber will have an adequate dwelling in which it will not be a tenant.

A proper postscript to the rather commonplace discussion that has gone in front is the mention of something lighter. Those who want an escape into a less oppressive world may indulge with the assurance of satisfaction in a reading of "Perversities". The author is G. L. M. and all can guess what is in store for them. Excursions into economics and essays in epigrams are available in the new collection of many choice "pieces de circonstance". Waning memory is kindled by the glow of sagacious satire, and I for one had the thrill of recapitulation which is almost equal to the pleasure of anticipation. The pleasures of a perverse mind are not great, but it would seem that one, who can glimpse unfamiliar aspects and rise above the commonplace view, can provide a new delight. It is not really perverse to suggest that the benefits of a Tariff Board enquiry are limited by the conditions precedent, and one notable piece entitled "If Lancashire were in India" runs the gauntlet of accepted official arguments. The reciprocity of the Clare-Lees-Mody pact is seen as illusory but it is enough to commend the piece without compressing the arguments. Politics, of the high sort naturally, comes into the notice of our contemporary satirist. His gentle castigations are a reminder of what has been called "The Lost Peace". His playful but distorted views of bygone events show that immunity to propaganda is about the most remarkable feature of the mind that gives us "Perversities". The stray pieces that have been put together should widen a public that lapped up "From Wrong Angles." G. I. M.'s exhilarating touch is known to my readers, and some of them I feel sure will not fail to relax—in armchairs with a copy of "Perversities" which is published by the Author, 100 Clive Street, Rs. 2. I have added the essential details to my belated eulogy and feel content.

*(From Our Correspondent)*

New Delhi, February 24.

DELAY, still more delay—that seems to be the fate of the Viceroy's new proposals for the Centre and in the provinces. The long-expected reply of Mr. Churchill to Sir T. B. Sapru proved to be only one more promise to consider the issues involved. Instead of, as expected, to examine the Viceroy's new proposals, the Sapru Conference had to reiterate its old demands. The fact appears to be that though certain tentative decisions have been reached the decision forced upon Mr. Churchill to reconstruct his Cabinet and include new personalities of the standing of Sir Stafford Cripps has for the time being delayed the announcement. Owing to these sudden developments which have intervened in British politics of the greatest importance to the Churchill Cabinet the Indian question has receded to the background for the present. Still the impression in political circles is that the announcement cannot be delayed for more than a week or two. The intention is to have a public announcement before the Commons takes up the Indian question again for debate. Few indeed are anticipating that these proposals will be sufficient to satisfy the major political parties, for all that is proposed is to establish non-official councils for Governors in section 93 provinces, reduction of the official element in the Viceroy's Council and the appointment of an Indian Defence Member.

The debate in the Assembly on the Railway Budget brought more than one important assurance from the Railway Member, Sir Andrew Clow. He has promised an inquiry into Sir A. H. Ghaznavi's allegations about corruption during the time of the exodus from Calcutta. In answer to Mr. K. C. Neogy, he also gave the assurance that the warnings given by the Acworth Committee were in his mind. A notable speech was made by Sir Henry Richardson, the new Leader of the European Group. An important suggestion made by him, which was echoed by Sir Shantidas Askuran in the Upper House, was that in devising means for meeting the increasingly difficult transport situation the Railway should "take a leaf out of the Commerce Member's book and seek the advance of non-official and business interests." There was also a reference in his speech to "the screams on all sides about wagon shortage and the necessity for setting up some transport authority." In his opinion the establishment of the Central Transport organisation was at least a year overdue. As the question of developing and co-ordinating transport resources will come up later in the week when Budget demand is taken up the Railway Member may make then a detailed statement.

The general criticism in the Assembly may be briefly summed up as follows. First and foremost was the feeling that instead of running as a business concern the Railways were fast becoming a mere revenue producing Department. There was general objection to the proposed increase in freight rates and fares. Mr. K. C. Neogy put the pointed question—if it was a prosperity Budget why were the already high rates of fares being increased? Thirdly there was strong protest against the policy of dismantling of Railways. In his speech Sir Henry Gidney referred to this question and said: "The dismantling of Railways should not proceed any further—to-day with war on the very borders of the country it is dangerous to continue the dismantling of what are called unremunerative lines, because it is most essential to have as many alternative routes as possible." Fourthly several speakers referred to the Government's neglect in not promoting industries for manufacturing locomotives and other Railway requirements. One of them placed "the entire blame for the present helpless and tragic position of our Railways and Posts and Telegraphs Departments on the Railway Board and Communications Departments". And fifthly, there was the point raised by Sir Henry Gidney with reference to the Depreciation Fund that "the arrears of so many lean years need not be paid up in such lump sums at the present moment when there are so many more urgent needs demanding funds."

A statement was made by Sir Homi to-day in the Assembly explaining the general policy of the Eastern Group Supply Council. He said that this had not been affected by recent developments, but the programme was being adjusted as for instance the transfer to India of the orders placed on Hong Kong. He added that the Council had not so far been made responsible for developing the production of guns, aircraft, tanks, and heavy armaments. Its main business was to procure by allocation Eastern Group countries a very large range of engineering stores and other manufactured goods. With reference to the Roger Mission's recommendations for the expansion of existing factories and the establishment of new ones, Sir Homi contended that the projects were not intended to make India self-sufficient but were only designed to make the best possible use of India's resources in the light of the conditions then prevailing.

In the Council of State a statement made by Sir Firoze Khan Noon has been interpreted, according to lobby talks, as meaning that the question of going to Simla this year is being reconsidered by the Government of India. It is more than probable that in view of the present war situation the Government of India may decide to give up the exodus this year.

The Standing Emigration Committee met this week and considered the position in respect of Ceylon. Owing to the present war situation the course which the Government of India is expected to take is to approach the Government of Ceylon and impress upon them the wisdom of postponing the consideration not only of the two Ordinances now before the State Council, but also of leaving the entire question of the Indo-Ceylon Agreement for settlement after the war. At the moment there are two urgent questions demanding attention. The first is the question of lifting the ban on emigration to the extent necessary in order that the Ceylon Government may be able to recruit such Indian labour as is required for urgent war purposes. The fact is that as Ceylon has been

**NORTH WESTERN RAILWAY**

Applications are invited for 30 temporary posts of journeymen in the Mechanical workshops Hoghalpura in the trades of Machinists, Toolmakers, Boilermakers, Blacksmiths, Millwrights, Fitters and Erectors in the scale 66-5-2-38- (or such pay as may be prescribed from time to time by the rules of the service applicable to their position and appointment) and for approximately 20 posts of Journeymen in the same scale in Locomotive Sheds in the trades of Fitters and Boilermakers. Of the 30 posts in workshops 16 are reserved for Muslims and 11 for Anglo Indians and Domiciled Europeans. A certain number of the 20 posts in Locomotive Sheds are also reserved for minority communities. Only those who have at least one of the following qualifications need apply:—

(a) Qualified through recognised Technical Institution.
(b) Have received a full course of practical training in Railway workshops, Arsenals, Dock Yards or in Contractors workshops of repute engaged in mechanical work, can read and write English and can read mechanical drawings.
(c) Have had at least seven years practical experience in recognised workshops as artisans, can read and write English and can read mechanical drawings.

Applications should be supported by attested copies of certificates of practical experience, academic qualifications, character and proficiency at games. Full details will be furnished if stamped and addressed envelope is submitted to General Manager, N. W. Railway, Lahore superscribed in left hand top corner "vacancy for Journeyman". The last date for the receipt of applications on the prescribed from is 23-3-42.

GENERAL MANAGER.

# Gateway of India

(From Our Correspondent)

Bombay, Feb. 25.

COMMODITY markets here look like firming up. Speculators have veered round to the view that commodities are a good hedge against inflation but the same view is not held in the share bazar. Queer contradiction, it might be said, but there is the fact that Bombay will be the big centre for India's exports. Calcutta's importance is sure to diminish, and if it were not that big shippers have offices in both places, it will be freely predicted that much loss must eventually arise. The Bombay Port Trust is sure to benefit, and it is not hard to guess that another big surplus is on the way before March ends. There may be no rebates and reliefs because A.R.P. expenditure has to be shouldered. Contractors and labour are likely to get more, and the Port Trust, which has to spend more on account of military traffic, has difficulties besides advantages. The export houses are likely to do well, but import business is sure to be sadly reduced in the near future. Tonnage statistics would illustrate this movement, though it is permissible to hope that manganese ore traffic may be diverted to Bombay from the East Coast.

The bullion market here is extraordinarily active in the unsettled period. The silver market has its independent gyrations. Silver has its votaries, and the fall of Singapore forced up the price primarily because the margin requirements have been tightened up for dealers. There has been buying up to April delivery, and the activity suggests at once that local rumours about panicky evacuation are discredited by the silver bulls. As the Reserve Bank will no longer sell silver of 916 purity local supplies are likely to be short while buying pressure persists. The U. S. Treasury evidently continues to support silver, at least for the sake of Mexico which gets a share in the market at 35 cents per ounce. Not even the large hoard at West Point is likely to pull silver down. Silver stocks in Bombay have come down rather sharply. Upcountry buying accounts for this as also the offtake of gold. Rumours about a change in the import duty are of no importance. Pure silver of 999 fineness is in keen demand. Evacuees selling valuables are not at all disappointed by the turn taken. News from the East Indies sends up both silver and sugar. The Kolar gold mines output is about the only steady source of supply for gold. The demand has not at all shrunk and people are prepared to pay fancy prices for portable pieces. Goldsmiths are sure to take a bad knock when the bullion market has livened up in this way. The craftsmen are not at all like jewellers who watch with pleasure the appreciation of their stock in trade.

The *Harijan* is not the only paper that has taken notice of the reported misbehaviour of troops in uniform. What happened about two years ago has occurred again. Men in uniform going places have not respected the rights of civilians. There is the usual story about high spirits. But the skylarking is so offensive that many people feel disgusted with the war effort that puts rowdies into uniform. It has been suggested that the police should be apprised of all incidents in which troops are in volume, and it has been further suggested that the Army authorities should make an example of offenders found guilty. The B.P.C.C. has heard these stories and asked for specific, direct evidence. If this were available some at least of the military miscreants would be brought to book. Nobody is anxious to spoil the soldiers' pleasure but their company can be highly unpleasant as complaints prove.

Instead of tourists Bombay is fated to receive evacuees this year. Instead of generous spenders, there are shoals of applicants for relief. Arrangements have been made to take in civilian evacuees. Well-to-do Chinese are in force after the loss of Singapore. There is, perhaps, a chance that many will settle here and add to the cosmopolitan character of this city. Paragraphs about the careers open to Chinese businessmen appear, and their aptitude will certainly help when textile exports to China are enlarged by supply orders. The advent of Chinese businessmen will be welcomed in a city that still looks to foreign silk supplies. Free China can send silk as also metals, and the overland traffic can support trade in a valuable commodity even if the Burma Road is not in use.

RESERVE BANK OF INDIA

SAFETY FIRST

TURN YOUR GOVERNMENT PROMISSORY NOTES INTO STOCK

Your holding of Government Securities will be safest in present conditions if converted into STOCK. The Public Debt Office will gladly exchange your Promissory Notes for Stock Certificates FREE OF CHARGE. Interest will then be paid by warrants which will be issued automatically on the interest payment dates without the necessity of personal attendance or presentation of scrip. These warrants can be made payable at any local office of the Reserve Bank or branch of Imperial Bank or Treasury of Sub-Treasury in British india, and can be sent to you or your banker direct. Stock can be re-converted into Government Promissory Notes at owner's option at any time, and to meet the convenience of the public the FEE leviable for re-conversion will be waived.

# Resume of Commodity Markets

THERE has been practically very little interest in the commodity markets during the past week. The only feature of interest is the abrupt rise in prices for sovereigns to a new high level. After the initial slump in prices in the jute manufactures market, a slightly steadier feeling is noticeable though the outlook continues to be regarded as uncertain by the trade. The raw cotton market has been fluctuating in narrow limits. In spite of the uncertain tone of the markets, the Karachi wheat market has been quite firm.

With the present confused war situation and the great difficulty in securing freight, it can be hardly expected that markets will stage any recovery. The jute and jute manufactures markets are perhaps affected most and even the Chairman of the Indian Jute Mills Association was not prepared to risk any forecast. Operators on the Bombay market seem to be hopeful that the support promised by the Government will prove to be really helpful.

**Jute:**

The jute market is absolutely dull and uninteresting. Mills are taking no interest in the market. Only very small quantities have been bought and it is regarded as unlikely that any substantial purchases on mill account will be made before conditions in the market improve.

**Jute Manufactures:**

It now appears that the shake-out in the hessian market towards the close of last week was quite inevitable. If prices had been maintained at a high level it was only on the assumption that exports would be maintained at the rate of the previous months.

But for the important part played by the industry in the country's war effort and the possibility of improvement in the shipping position, when the industry should not be caught napping with low stocks, there should have been a reduction in the number of working hours by now.

Speaking at the annual general meeting the Chairman remarked: "At the end of December the very heavy increase in the hessian stocks caused some apprehensions but on a careful examination of the position, your Committee were convinced that the increase was merely of a temporary nature due to delays in arrivals of steamers. From the information available to them, they decided that no change in the working hours was either necessary or desirable; and that decision has been amply justified by subsequent events. It is my own opinion that provided there is no deterioration in the freight position, we should be able to carry on the 60 hour working week at least until the end of June. Much may happen in the meantime, however, and my remarks must not be taken as any guarantee."

The actual value of war orders executed by the Jute mills in 1941 is Rs. 10½ crores in addition to which orders valued at Rs. 2.08 crores were placed in January this year. The three principal items have been Sandbags, Hessian Cloth and Scrim Hessian garnishing, dyed and undyed. In addition to these there have been considerable quantities of Union Jute Cotton Canvas, Jute canvas, Sacking cloth and bags and a large variety of other materials.

The American stock and consumption figures for the month of January 1942 show that it is difficult to estimate in any manner the rate of exports. The additional complications in the war situation have made the problem of securing freight even more difficult. For this reason, the improvement in shipments in January has not been to the same extent as expected, stocks afloat in January being 107 millions against 68 million yards in December 1941. There is a sharp decline in consumption to 43 million yards from 75 million yards in the previous month and 57 million yards in the corresponding month last year. It would be remembered that it was pointed on the last occasion, that the sharp increase in American consumption in December 1941 was mainly due to the fears regarding the ability to get supplies.

**Cotton:**

The Bombay raw cotton market has been rather steady and prices have ben maintained at last levels. The oversold position of the market has led to some covering. It is also expected that government support to the market would prove to be adequate. There were rumours in the market early in the week that government would come out as buyers in the market. It was even said earlier in the week that there was actual buying on Government account. It now appears that the Government have not reached any decision on the matter and that only the representatives of the trade have been consulted in this connection.

As regards trading in the new crop, the date on which it is to begin has not been fixed. The question of hedge contracts is under revision and a sub-committee has been appointed for the purpose. It is considered likely, however, that it will be possible to resume trading by May 1, 1942.

The final All-India forecast for 1941-42 estimates the area under the crop at 23,245,000 acres and the yield at 5,818,000 bales. There is an increase in the area of 2 per cent. and of 0.3 per cent. in yield as compared with the corresponding revised forecast of last year.

FRANKI COMPRESSED CONCRETE PILING

(Compressed situ using Indian Materials and employing Indian Labour)

AND

"SCREWCRETE" FOUNDATION

# Tit Bits of Industrial Activity

**Flax for India**

Flax-growing has made much progress in parts of the Empire. Fabric wanted for aircraft comes from Australasian flax according to a recent report. Though flax canvas has been displaced by cotton jute canvas, the interest in flax is not dormant. Flax grown on experimental plots has yielded fibre available for spinning on existing jute machinery. The possibility of using Indian-grown flax is being examined in view of Defence service requirements. At present, imports of flax are rendered doubly difficult by the war. If flax cultivation develops, as it should in a country which grows so much linseed, India can dispense with mixed fabrics used in place of canvas made from flax. The substitutes evolved are not unsatisfactory. A jute mill is said to have produced a union fabric which, even unproofed, has water-holding properties.

**Tools and Handles**

Tools are important and their handles too. Indian timber of the right type for handles is being sought. At Dehra Dun, work has been carried out to find which woods are good for handles. Selection and seasoning are wanted as a recent bulletin published by the Forest Research Institute indicates. Apart from one setting out specifications, there is another dealing with properties and preparation of helve and tool handle timbers. It has been established that Indian woods are almost as suitable as American hickory if the preparatory treatment is of the right type. The bulletins are meant to help manufacturers of hammers and other tools which are in demand at present on account of the war.

**Cutlery Expansion**

In the speech of Rai Bahadur R. P. Bagla to the U. P. Chamber of Commerce on Sunday will be found a reference to the progress of smaller industries. These are said to have benefitted through the Supply Department. In the U. P. particularly industries like boots and shoe manufacture and the woollen textile industry have been diverted largely to war production. The glass industry too has made headway. The war has led to the development of new industries like the preparation Several steel rolling mills have embarked on the manufacture of heavy metals... Aligarh is said to be producing locks, scissors knives etc. for the war effort, and the brass-ware industry of Moradabad is meeting to some extent the Army requirements of cutlery. It is not only in the Punjab that the manufacture of cutlery has made rapid progress. For it has been noted that Hyderabad may be a very important source of cutlery in the near future. In the Punjab production is known to have expanded rapidly but the U. P. has held its own as the home of cutlery.

**Source of Starch**

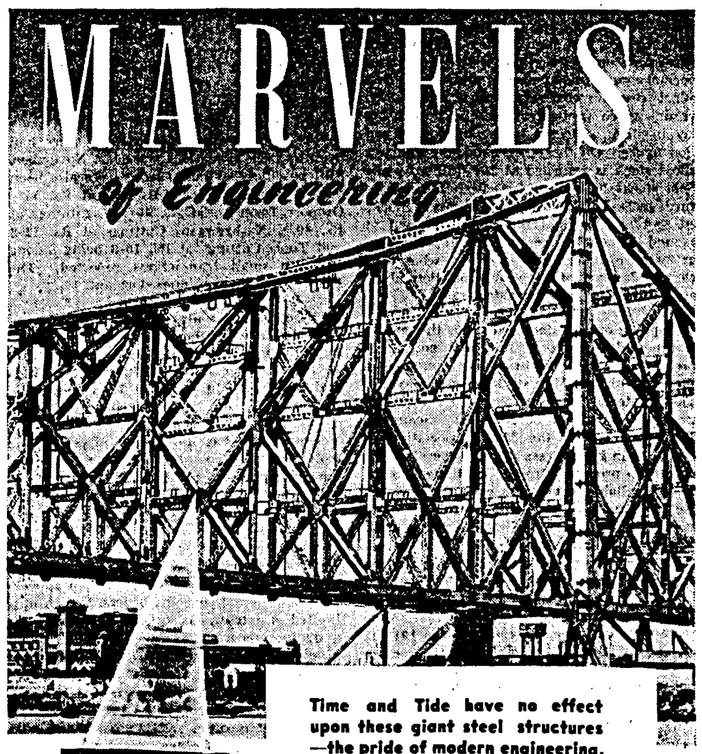
Tapicoa, grown largely in Travancore, is not to be neglected as a source of starch. According to the Dewan of Travancore, efforts has been made to discourage its consumption in the State. Tapicoa was to be displaced by fish. More recently, owing to the difficulty of getting farina, formerly imported has been opened. Tapioca starch has been found good for the sizing of textiles, and is considered next only to farina. As tapicoa cultivation is very widespread, Travancore should benefit greatly through the demand from manufacturers of starch in India. For the manufacture of the flour co-operative organisation has been recommended, but the main point is that besides maize, there is another source ready for Indian starch-makers.

**Plywood Factory**

According to *Travancore Information* the State will soon have a plywood factory. Arrangements have ben made to set up a factory. As there is an important tea-growing industry the market is at its doorstep. Reference has been made to the purchase of the machinery needed and the flotation of a company is said to be under consideration. The promoters will benefit because the State will pay half the issued capital of Rs. 10 lakhs wanted for the factory. One member of the Board will be a nominee of the Travancore Government, and the scrutiny of accounts will be one of the rights vested in the Government. The new company is to take over plant already ordered and the usual assistance as regards selection of site has been promised.

**NORTH WESTERN RAILWAY**

The public is advised that with effect from 1st March, 1942, certain concessions, detailed below, will be suspended and temporarily withdrawn. Detailed information on this subject can be obtained from any Station Master on the North Western Railway or from the Chief Commercial Manager, Lahore.



Concessions for:—

Professional Entertaining Companies, Cinema Film Producing Companies, Cricket, Football, Hockey, ball and other Sports and Athletic Teams, Polo Teams, Pigsticking Parties, Horses and Ponies for Races and Competitions, Exhibits for Exhibition and Shows, Students attending Y. W. C. A. Summer conferences, Christmas, New Year and Easter Holiday concessions, Commercial travellers' Luggage and Samples and Fox hounds belonging to hunts.

*General Manager*.

**MARVELS of Engineering**

Time and Tide have no effect upon these giant steel structures —the pride of modern engineering.

They will serve generations to come, as vital links in the chain of progress.

*To withstand the immense strain imposed on them, the smallest of details in modern structures are made of steel.*

# Jute and Jute Manufactures

(By Our Jute Correspondent)

Calcutta, 26th February.

THE U.S.A. Hessian consumption figures for January were a sharp disappointment to the trade, particularly after the improved showing in December. It was hoped that this latter figure indicated an improvement in the demand for Jute goods corresponding with the accelerated tempo in production since the entry of America into the war. Actually, what seems to have been the reason for the heavy offtake in December was rather fear on the part of processors and bag-manufacturers that shipments might be interfered with; consequently some extra stock was laid in. But when shipments continued to arrive and increased quantities were showing afloat, the urgency for carrying extra stocks diminished. So probably it would be fairer reflection of demand if the two months, December and January, were considered together. The January consumption is cabled at only 43 million yards as against 75 million in December and the January figure is almost a record "low". But combining the two months at 118 million yards, that is an average of 59 millions yards per month, something much more like a normal consumption figure is arrived at. Dec. afloat stocks were very low at 68 million yards, which probably gave the impetus to lay in stock, reflected in the high consumption figure. On the other hand, the January afloat stock is returned at 107 million, while Spot stocks have also risen from 145 million yards in December to 161 in January. Stocks on spot and in sight therefore work out at around 5 months average consumption, and in fact are almost identical with what they were in January of last year, a position which processors may consider fairly safe.

Shipping of manufactured goods this month is reported to be only fair, and not up to production level. February of course is a short month, so Mill stock figures may not show material increase, nor is it likely that working hours will be modified meantime. The Chairman of the Mills Association in fact said, in his address at the General Meeting that, provided freight continued to be made available, there was every prospect of the 60 hour working being continued up to the end of June. This brings up the question of how Mills stand for supplies of raw material. If 60 hour working continues till the end of the season, 30th June, it is calculated that Mills consumption of Jute will be around 75 lakhs of bales. At 1st July 1941, Mills were credited to be carrying into the 1941/42 season 20 lakhs of bales. Their purchases out of the current crop are estimated to be not more than 35 lakhs of bales. That is, against requirements of 75 lakhs bales, they have only covered 55 lakhs of bales, leaving them with purchases still to be made of 20 lakhs of bales to carry them up to the end of June and leaving them with empty godowns. Actually they should be carrying sufficient jute to keep the mills running into September, another 12 to 15 lakhs of bales, and even that might be considered verging on a hand-to-hand-mouth policy. Mills attitude at the moment would suggest that they are amply supplied and that nothing is further from their mind than buying any more jute. Unless our figures are very far astray, it rather looks as if there should be no little anxiety as to where the 30 to 35 lakhs of bales required to carry mills comfortably into the new season, are to come from. The drifting away to safer areas on the part of the Marwarri Jute Dealers tends to accelerate, and the attitude of Mills towards the Loose Jute market certainly affords the Dealers little encouragement to stay and pursue their business. Much as the Marwarri Jute Dealer may be maligned, he has become an essential factor in the distribution of the Jute crop and if the whole fraternity are permitted to depart, Mills may find later on that their policy of holding aloof from the market and thereby doing nothing to discourage the exodus, has been an ill-advised one. Because Dealers who depart now are very unlikely to return before the beginning of next season. Nor can Pucca Balers be relied on to provide any quantity of supplies. Many of them are also either already closed up or preparing to do so. The only apparent source of supply left will be the European mofussil balers, if they can keep their Indian staffs and assorters together, and this will leave a very restricted market indeed in which Mills can operate.

Transactions in the Pucca Bale market have been very restricted and mainly inter-baler covering. Dundee Daisee 2/3 changed hands at Rs. 53/- and Dundee Tossa 4s. at Rs. 54/- to Rs. 53/- for early shipment. A somewhat cheering feature is that some allocations of freight for jute for the U.S.A. have been made in the last few days. Previously there had been no such allocations since last November. Mill purchases of Pucca bales have also been very meagre, Dundee Tossa 4s. at Rs. 55/- Outport Tossa 4s. at Rs. 40/-, Lightnings at Rs. 40/-, Narayanganj Cuttings at Rs. 12-8 and Tossa Cuttings at Rs. 10-8 being among the few small transactions reported. The Futures market continues dormant.

Loose Jute has also been almost entirely neglected, even at the lower levels now quoting. European Tossa Bottoms were reported at Rs. 8/- and Indian District Tossa Mids and Bots at Rs. 10/- and Rs. 7-8 respectively. A sale of X mark was reported at Rs. 4-8.

Some rain has fallen in places in the mofussil and preparations for the sowing of the new crop are going ahead. Demand for old crop stocks is very attenuated and prices are consequently tending lower.

After the sharp set-back in Fabrics last week, there was some evidence of returning confidence at the week-end, and the appearance of renewed covering orders, though only limited in extent, was sufficient to cause quite a distinct recovery in quotations. February nine porters reacted from Rs. 17-10 to Rs. 18-4 and elevens from Rs. 23-8 to Rs. 24-4. March elevens sold at Rs. 23/- and Rs. 23-4. Forward enquiry continues very scarce and what there is often fails to reach the mills owing to doubts whether freight will be available when the time comes. The only transactions beyond March reported were Rs. 17 and Rs. 21-4 for April/June nines and elevens respectively. Turnover altogether has been very light and the tone at the close is again slightly easier. Heavy Goods have attracted very little attention, some small sales of February and March "B" Twills at Rs. 36/-, Salts at Rs. 32-8 and Liverpools at Rs. 43/- for March and Woolpacks at Rs. 1-14 basis May, being among the few transactions recorded. Heavy Goods also firmed up in sympathy with hessians rather than from any demand, and quotations remained fairly steady at the close in spite of lack of support.

(Continued from page 338)

placed under the command of the Commander-in-Chief in India, there are already a number of Indian troops stationed in Ceylon. The second relates to those Indians, who are anxious to leave Ceylon for short stay in India. Arrangements have to be entered into to ensure that there is no difficulty placed in their way when they wish to return to Ceylon. All these questions are reported to have been considered by the Standing Emigration Committee to enable the Government of India to address the Government of Ceylon on the subject. No reply appears to have been so far received from the Government of Ceylon to the detailed memorandum submitted last year by the Government of India suggesting certain modifications in the draft Indo-Ceylon Agreement on the basis of the discussions in the Assembly last year.

Certain important resolutions are to come within the next few days for discussion in the Central Legislature. Tomorrow the Council of State will discuss Dr. H. N. Kunzru's resolution demanding the appointment of an Indian Defence Member. It is understood that the Government will not oppose the resolution but will only not commit themselves more than to assure the House that the resolution and the debate will be forwarded to His Majesty's Government. It is likely that a resolution asking for the establishment of the automobile industry in India, of which notice has been given by several members, will come up for discussion on the next non-official day. The reply of the Finance Member to last week's debate on incometax administration has generally given satisfaction as a detailed circular has been sent to officials of the Department largely on the lines of the resolution itself. Sir Jeremy promised also to discuss with the Law Member the question of transferring the Appellate Tribunal to the Law portfolio. All that he said was that the difficulties arising from the transfer are not likely to be greater on his side than on the Law Member's.

HILL-BIRD.

**NORTH WESTERN RAILWAY**

**Closing of Section Nagrota (exclusive) to Baijnath Paprola of the Kangra Valley Railway**

The Railway line between Nagrota (exclusive) to Baijnath Paprola will be finally closed from 11th March, 1942. The booking of traffic will, therefore, be stopped as follows:—

Traffic of all descriptions from and to foreign railways. From 2nd March, 1942.

Local goods traffic. From 2nd March, 1942.

Local passengers and other coaching traffic. From 8th March, 1942.

The public is also advised that from the 11th March, 1942, the running of trains 333 Up, 331 Up and 332 Down and 334 Down between Nagrota and Baijnath Paprola will be discontinued. There will be no change in the train service between Pathankot and Nagrota. General Manager, Lahore.

## JUTE

Calcutta, Feb. 26.

THE collapse in the jute manufactures market towards the close of last week has had a discouraging influence on the jute market as well. Very little business was reported in loose jute till Wednesday. Only towards the close there has been some buying of Tossa grades by mills. The outlook is regarded as very uncertain and any increase in mill buying cannot be expected unless there is some improvement in the war situation.

In the loose jute section sellers are pressing for business. There are no buyers for lower grade jutes in spite of the substantial discount in prices. Mills bought Indian District Tossa Middles and Bottoms at Rs. 10 and Rs. 7-8 per maund respectively.

In the pucca bales section, shippers have taken no interest in the market. Only a small business has been reported in Dundee Daisee 2/3 and Tossa fours at Rs. 53 per bale for early shipment.

In the futures market there is nothing doing and no quotations are available.

## JUTE MANUFACTURES

Calcutta, Feb. 26.

THERE has been a sudden fall in prices in the jute manufactures market on nervous selling by holders and shippers. The cancellation of certain shipments and the fears regarding the ability to maintain exports in the coming months have been mainly responsible for the fall in values. There has been only a slight recovery towards the close. The fall in prices has not been surprising as prices were artificially maintained at a high level only with the shortage of ready goods and the unwillingness of holders to part with their goods. After being lower at Rs. 17-14, 9 porters ready are now quoting Rs. 18-2, March Rs. 17-10, April/June Rs. 17 and July/September Rs. 18-4. 11 porters ready are Rs. 24-2, March Rs. 23-8, April/June Rs. 21-12 and July/September Rs. 20-4.

American stock and consumption figures for the month of January 1942, make very poor showing. Commenting on the consumption figures for the month of December 1941, it was pointed out that the sharp increase in consumption was mainly in anticipation of a shortage of hessian goods and that it could not be expected that the stocks had moved into consumption. The consumption for January has been estimated at 43 million yards against 75 million yards for the previous month and 57 million yards for the corresponding month last year. The improvement in shipments during January has not been up to expectations, stocks afloat being 107 million yards against 68 million yards in the previous month. Stocks afloat in December were 164 million yards. Stocks spot are higher at 161 million yards against 145 million yards in the previous month.

In the heavy goods section, not much decline in prices is to be recorded. B Twills for February shipment sold on the basis of Rs. 37, Liverpool twills for the same position Rs. 43 and Cornsacks Rs. 39-8.

## COTTON

Calcutta, Feb. 26.

THE oversold position of the raw cotton market and the strength of the bullion markets have prevented any decline in prices in the Bombay raw cotton market during the past week. Prices have been fluctuating in narrow limits and quotations are not very much changed on balance. Broach April/May were Rs. 194, July/August Rs. 203; Oomra March Rs. 140-8, May Rs. 155-8, Bengal March Rs. 131-4 and May Rs. 135-4.

Forward trading in new cotton crop will not be resumed in Bombay on April 1, as is customary with the cotton trade, since the whole question of hedge contracts is to be reviewed by a special sub-committee in the light of conditions created by the war. It is, however, considered most likely that the trade will be able to resume forward trading in the new crop on May 1.

The New York market has continued firm and quotations are higher, May futures being 18.56 cents and July 18.68 cents.

## GOLD

Calcutta, Feb. 26.

THE Bombay gold market has again been active. The continued buying for hoarding purposes and the shortage of stocks in Bombay have been responsible for the firming up in rates. The feature of the week, however, is the sharp rise in prices for sovereigns from Rs. 37-10 at the time of last writing to Rs. 40-2 on Thursday. The scarcity of sovereigns and the unwillingness of holders to part with them are responsible for the unduly high premium. Gold ready are quoting Rs. 50-8 and First Settlement Rs. 49-8.

## SILVER

Calcutta, Feb. 26.

THERE has been an abrupt rise in prices in the Bombay silver market on nervous buying by upcountry people. Other factors also have contributed to the strength of the market. The Reserve Bank is demanding hundred percent margin against all transactions for deliveries from the mint. It is reported that the Reserve Bank may suspend sales of 916 silver. It is not surprising, therefore, that there has been a rush for covering. On Wednesday, especially, the rise in prices has been quite pronounced. Indian Mint Silver ready are quoting Rs. 78-14 and First settlement Rs. 69-6.

The London market is absolutely uninteresting. Business passing is on a very small scale. The quotation for both forward and spot is unchanged at 23½d.

## WHEAT

Calcutta Feb. 26.

BUSINESS in the Karachi wheat market and other main ports has been at a standstill. In spite of the absence of export buying, stockholders seem to be inclined to hold their stocks as with the considerable difficulty in getting imports of Australian wheat it is believed that greater interest will be shown in Indian wheat.

In the Calcutta market steady conditions have prevailed. Stocks with mills are inadequate and only a few mills are working at the present moment. Cawnpore ready were Rs. 5-12 and May. 5-7.

## NORTH WESTERN RAILWAY

The public is advised that with effect from 1st March, 1942, the issue of first and second class ordinary return be confined to distances over 100 miles. The return fares for 101 miles will, however, apply to distance from 76 to 100 miles being lower than two single journey fares.

With effect from the same date, i.e. 1st March, 1942, the issue of the following tickets will be cancelled:—

(i) Sixty day rail-cum-road return tickets of all classes from certain N.W.R. stations to Mussoorie Out Agency.

(ii) Third class rail-cum-road circular tickets from certain N.W.R. stations for journeys commencing from and terminatin at the station of issue via Hoshiarpur or via Kangra.

(iii) Inter and third class rail-cum-road tickets between Amritsar, Batala, Gurdaspur and Lahore and Dalhousie, via Kangara.

(iv) Third class rail-cum-road return tickets from Dalhousie to Hardwar.

(v) Rail-cum-road return tickets of all classes from certain stations on B. & A., B. & N. W., B.B. & C.I., E.I, G.I.P, Jodhpur and N.S. Railways and Madras to Srinagar. Return tickets from stations on the N.W. Railway to Srinagar via Rawalpindi only will, however, continue to apply.

from any station master on the N. W. Railway or from the Chief Commercial Manager, Lahore. Detailed information can be obtained

*Stock Markets to-day and to-morrow*

## RESULTS OF KOHINOOR MILLS FOR 1941

During the past week absolutely uninteresting conditions have been reported on the stock exchanges both in Calcutta and Bombay. The Bombay market was closed in the middle of the week for three days while the Calcutta market has remained closed from Thursday. A further sharp decline in the case of giltedged securities has ben recorded and the quotations for most of the loans are at the lowest levels for the war period. 3½ percent Paper is nearly nine points lower since the outbreak of the Japanese war. There has been some selling of the long-dated loans as well. With the present unsettled conditions it is not surprising at all that there is no speculation regarding budget proposals which are due to be announced on Saturday. It is generally recognised that there will be fresh taxation, and it is conceded that the new taxation measures will not have any unduly discouraging effect. But for the difficulties already evident in the borrowing programme of the government, it would be possible to take a more hopeful view.

* * * *

Next to the iron and steel industry, the cotton textile industry is perhaps the most directly benefited, among major industries, on account of the intensification of the country's war effort. With the virtual cessation of imports, the larger war orders and the increase in demand from overseas markets, the industry is unable to meet the still-expanding demand. There has naturally been a sharp rise in prices of piecegoods with considerable speculative activity and a scramble for buying by consumers ready to lay in stocks. Orders for several hundred million yards of cotton textile materials, for supply to the defence services, delivery February to April 1942, have been reported recently. Most of the items are to be produced in immense quantities and their values will run to considerable sums.

The aggregate profit of four companies published at the present moment (accounts of two companies relating to twelve months ended December 1941 and the other two companies for the six months ended December, 1941) is more than two and a half times the figure for the previous accounting period, the figure before providing for taxation and depreciation being Rs. 83,56,934 against Rs. 33,44,425. The best showing is undoubtedly made by the figures of the *Kohinoor Mills, Liimted.* The dividends to ordinary shareholders have been increased in the case of the *Madura Mills Company, Limited* and *Kohinoor Mills Company, Limited.*

The dividend of the *Dunbar Mills, Limited* has been maintained at the previous level while the *Bowreah Cotton Mills, Limited* is paying off the arrears of dividend on preference shares for five half-years.

* * * *

As pointed out already, the results of the *Kohinoor Mills Company Limited* may be regarded as exceptional. The net profit, before providing for taxation and depreciation, for the year 1941, is Rs. 43,92,729 against Rs. 11,05,762 for 1940. Two-thirds of the increase in the profits is absorbed by the higher provision for taxation, the allocation on this acount being Rs. 21,66,490 against Rs. 1,81,000 on the former occasion. On account of the fact that the mills have been working day and night, the amount set aside to depreciation is as large as Rs. 8,69,906 against Rs. 4,47,170. As the 4¼ percent debentures are due to be redeemed in May 1942, the directors have thought it necessary to transfer Rs. 4,55,000 to the Debenture Redemption Reserve. The dividend has been increased from Rs. 12 per share to Rs. 15 per share while the bonus also is higher at Rs. 12 per share. The amount carried forward is the substantial sum of Rs. 1,01,518 against Rs. 10,185 brought in.

For the same year and for the same reasons the *Madura Mills Company Limited* has done very well. It has been able to earn a net profit, before providing for taxation and depreciation, of Rs. 27,65,011 (after providing for a bonus to workers of Rs. 2,37,000) against Rs. 14,98,893 for 1940. The amount set aside to depreciation is unchanged at Rs. 5,00,000 while the provision for taxation is Rs. 4,75,000 (nil). The dividend is higher at Rs. 15 per cent against 10 per cent.

* * *

Of the two companies, Dunbar and Bowreah, the results of the latter company make a relatively better showing. The net profit for the half-year ended December, 1941, is Rs. 4,32,527 against Rs. 2,60,731 for the previous half-year. The provision for taxation is considerably higher at Rs. 2 lakhs (Rs. 40,000) while the amount set aside to depreciation is Rs. 75,000 (Rs. 50,000). The arrears of dividend on the preference shares for five half-years ended June, 1939, are to be paid. With the prospects for the current half-year assured, the remaining arrears of dividend on the preference shares should be easily cleared.

* * * *

The remarks of the Chairman at the annual meeting of the Indian Jute Mills Association are of more than usual interest. In view of the uncertain future and the disturbances to shipping in the Pacific, there is naturally much anxiety regarding the ability of mills to maintain a decent level of profits. Normally, a reduction in the number of working hours would have been effective but for the fact that the industry is at the present moment busily engaged on war orders and it is hoped that there will be an improvement in the freight position.

The remarks of the Chairman in this connection are interesting: "At the end of December the very heavy increase in the hessian stocks caused some apprehensions, but on a careful examination of the position, your Committee were convinced that the increase was merely of a temporary nature due to delays in arrivals of steamers. From the information available to them, they decided that no change in the working hours was either necessary or desirable; and that decision has been amply justified by subsequent events. It is my own opinion that provided there is no deterioration in the freight position, we should be able to carry on the 60 hour working week at least until the end of June. Much may happen in the meantime, however, and my remarks must not be taken as any guarantee."

The results of the *Alexandra Jute Mills Company, Limited* for the half-year ended December, 1941 are a reminder of the prosperous conditions in the jute industry that obtained till very recently. The net profit for the half-year is Rs. 6,05,881 against Rs. 2,92,638 for the previous half-year. The amount set aside to depreciation is Rs. 1 lakh against Rs. 50,000. The provision for taxation is Rs. 4,30,391 against Rs. 1,40,000. The transfer to Reserve is Rs. 1,00,000 (Rs. 43,973). The dividend on the ordinary shares has been mainfained at Rs. 7-8 per share.

Watch Dog.

# The Week in the Exchanges

## CALCUTTA STOCK EXCHANGE

*(From Our Correspondent)*

Calcutta, Feb. 27.

THE week under review is short-working owing to the holidays in connection with the *Satyanarayana* and *Holi* festivals. Markets are closed from Feb. 26 to Mar. 3, 1942, both days inclusive. During the short period in which markets have remained open there has been a further sharp decline in prices for giltedged securities. In equities business has again been restricted. The undertone in the several sections is weak.

There is no change in money conditions and the treasury bills rate has remained unchanged at one per cent per annum. But with the continued Japanese successes confidence in the giltedged securities section has been badly shaken and in heavy selling prices have been marked down alround. On Wednesday this week 3½ per cent. Paper was quoted at Rs. 89-12 on the Calcutta Stock Exchange. There has since been a fall to Rs. 87-4 in the Bombay market. Other loans also have been similarly marked down. The decline in the quotations for 3½ per cent. Paper is thus four points lower. Among terminable loans, 3 per cent. Defence Bonds 1946 were quoted at Rs. 96-14 on Wednesday, 3 per cent. Second Defence Loan at Rs. 95-1, 3 per cent. 1963/65 at Rs. 92, 4 per cent. 1960/70 at Rs. 104-14, 4½ per cent. 1960/70 at Rs. 104-14, and 5 per cent. 1945/55 at Rs. 103-12. Among provincial loans, 5 per cent. U. P. Bonds 1944 were noted at Rs. 102-10 and 4 per cent. Punjab Bonds at Rs. 101-8.

No transactions have been recorded in public bodies' debentures. Among industrial debentures, 5½ per cent. *Carew & Co.* were Rs. 101-8, 5½ per cent. Dalhousie *Properties* Rs. 100 and 6 per cent. *Humayan Properties* Rs. 102-8.

Among jute mill preference shares, *Alliance* were dealt in at Rs. 120, *Anglo-India* at Rs. 160, *Dalhousie* at Rs. 141, *Fort Gloster* at Rs. 159, *Gourepore* at Rs. 151, *Hukumchand* at Rs. 130, *Lansdowne* at Rs. 139 and *Soorah* at Rs. 133. Among other sections. *Dunlop Rubber* Second Preferences changed hands at Rs. 103.

In the Coal section no business has been recorded. In the Cotton section also no interest has been taken in spite of the publication of excellent earnings reports by some of the important companies.

In the Engineering section, *Indian Iron* and *Steel Corporation* are the only two counters to be traded in, the former quoting firmer at Rs. 23-12 and the latter at Rs. 14. There are rumours that a higher interim dividend for 1941/42 will be paid by the Indian Iron and Steel Company.

In the Jute section not many transactions have been recorded. *Gourepore* were Rs. 650, *Kinnison* Rs. 327, *Megna* Rs. 58, *National* Rs. 21-4 and *Gondalpara* Rs. 1,106.

Sugar shares have been quiet with *Buland* being crossed at Rs. 23-8. *Champarun* were Rs. 19 and *New Savan* Rs. 12.

Tea shares were uninteresting with *Dessai and Parbuttia* at Rs. 275 cum-dividend and *Maud Tea* at Rs. 11-4.

In the Miscellaneous section, *Burma Corporation* were Rs. 2 and *Indian Copper Corporation* Rs. 1-11. *B. I. Corporation* were Rs. 4-12. The results for the year ended December, 1941 are eagerly awaited. *Dalmia Cement* were Rs. 13-1, *Indian Cable* Rs. 19-8 and *Indian Wood Products* Rs. 27-12. Among Paper shares, *Orient Paper* continued steady at Rs. 15-12 with *Star Paper* at Rs. 13-12. No transactions were recorded in *Titaghur Paper* or other prominent Calcutta shares.

## BOMBAY STOCK EXCHANGE

*(From Our Correspondent)*

*Bombay, Feb. 26.*

*Securities.*—A feeling of hesitancy continued to prevail in this section and the easier tendency, which was noticeable during the course of last week, became accentuated during the week under report and 3½ per cent paper showed again a further drop of about four and a half points to close at Rs. 87-4. Among terminable loans, 1948/52 Loan were done lower at Rs. 93 against Rs. 95-4 in the previous week; 1951/54 at Rs. 94-8 against Rs. 96; 1963/65 at Rs. 87 against Rs. 91; 1947/50 at Rs. 96-8 against Rs. 97-8; 1960/70 at Rs. 101 against Rs. 105-12; 1955/60 at Rs. 108 against Rs. 110-8 and 1945/55 at Rs. 103-8 against Rs. 105-4 and 3 per cent 1946 *Defence Bonds* at Rs. 96-8 against Rs. 98-4.

*Shares.*—The local share market remained closed for the best part of the week following the deterioration in the Far Eastern situation and the lack of confidence among the investors. There were buyers only at much lower rates than the minima fixed for trading, and as a result prices remained nominal.

The difficulties experienced by the brokers in settling their forward account for February have been seriously hampering operations. The position has been rendered more complicated by the anxiety of banks which have advanced money against shares quoted on the stock exchange to obtain a higher margin for such advances. Brokers are reported to have said that their clients are not able to take delivery of the 10 groups of shares specified by the Board for March settlement. The banks are also unwilling to extend fresh credit facilities against shares, particularly *Bombay Burmah Trading*. They have, therefore, it is reported, again requested the Stock Exchange authorities to reconsider their decision in consultation with the Bombay Government and allow compulsory carry-forward for all scrips for a period of six months. The legal position has not been satisfactorily cleared up.

*Textiles.*—Prices were maintained at last week's levels, *Bombay Dyeing* closing at Rs. 1,100; *Central India* at Rs. 330; *Century* at Rs. 350; *Gokak* at Rs. 238; *Kohinoor* at Rs. 462 and *Svadeshi* at Rs. 381. In the cash list, *E. D. Sassoon* were steady at Rs. 2-4-6; *Sholapoor* at Rs. 5,395 and *Vishnu* at Rs. 1,435. *Podar Mills'* shares were in some demand, being slightly higher at Rs. 195. *Khatau Makanji* have shown a rise of about 15 points to close at Rs. 220.

*Hydro-Electrics.*—*Andhra Valley* were quoted at Rs. 1,600; *Tata Hydro* at Rs. 151; *Tata Power* at Rs. 1,405 and *Bombay Tramways* at Rs. 129.

*Steels.*—Steel shares showed no change in prices, *Tata* ordinaries remaining unchanged at Rs. 285, there being no dealings in the deferreds.

*Miscellaneous.*—*Associated Cement* were a steadier feature, being slightly higher at Rs. 162 as against Rs. 159 in the previous week. *Belapur Sugar* were steady at Rs. 218; *Tata Oil* at Rs. 48 and *Alcock Ashdown* at Rs. 475. *Premier Construction* continued to be in demand and were marked up at Rs. 109-10. *Scindia Steam* were at Rs. 17-1; *Wimco* at Rs. 200 and *Tata Chemicals* at Rs. 14-4.

## MADRAS STOCK EXCHANGE

*(From Our Correspondent)*

Madras, Feb. 26.

In view of the unfavourable developments in the Far East local operators continued to be cautious with the result that trading was greatly restricted. The enquiry for Planting issues was maintained, while cotton mill shares met with limited demand.

*Securities.*—This section continued to be easier owing to poor demand, 3½ per cent Paper quoting lower at Rs. 87-8. 3 per cent 1951/54 loan came in for business at Rs. 94 c.t., 3½ per cent 1947/50 at Rs. 96-14 and 4 per cent 1960/70 at Rs. 104-10. A moderate business took place in State and Provincial Loans, 3 per cent 1956/61 *Mysore Loan* being done at Rs. 102-14 and 3 per cent 1959 *Madras* at Rs. 94-2.

*Mills.*—There was good buying support for the Coimbatore group of shares, *Vasanta* being in demand at Rs. 142 cum the dividend of 12 per cent, for the year 1941. *Sri Sarada* were done at Rs. 95. There were buyers of *Rajalakshmi* at Rs. 88-8; *Mettur Industries* at Rs. 145 and *Lakshmi* at Rs. 96.

*Utilities.*—*Nellore Power* were crossed at Rs. 6-4.

*Plantations.*—Rubber shares met with fair business, *Vaikundam* being done at Rs. 11-12 and *Rajapiri* at Rs. 7-6. Among Tea shares, *Vellamalai* were done at Rs. 18-12; *United Devashola* at Rs. 9. at Rs. 9.

*Sugars.*—There was no business in this section.

*Banks.*—*Indian Bank* big shares changed hands at Rs. 98-8 and the small shares at Rs. 23-8.

*Miscellaneous.*—*Andhra Cement* continued to be steady at Rs. 77. *Mysore Chemicals* changed hands at Rs. 14-12. *Mysore Lamps* had buyers at Rs. 10-8 and *Mysore Glassware* at Rs. 10-4. *Brunton Engineering* were a shade lower at Rs. 7.

## LONDON STOCK EXCHANGE

The feature of the week is the strength of the giltedged securities section on the London Stock Exchange. The firmness of giltedged securities has been reflected in other sections as well. For the most part of the week

equities were under the shadow of developments in the Far East. It is believed that large scale investments have been made on behalf of a big trustee company. Also, it is expected, that the payment on account of the requisitioning of Indian and Canadian securities on March 23 will have a stimulating effect. 3½ per cent. India Sterling Paper was quoted at 101¾. 2½ per cent. Consols were 83 3/16, 3½ per cent. Conversion 106⅛, 3½ per cent. War Loan 105 1/16 and 3 per cent. War Loan 101¼.

Among other sections, Teas and Rubbers have very few buyers. Far Eastern issues have been marked down sharply especially with the heavy selling from investors who have been obliged to leave their places in the Far East. There has been some buying of industrials towards the close, Kaffirs and Diamonds being in demand. Home Rails have been easier as the Southern Railway higher interim dividend did not come as a surprise to the market. It is believed that the recent decline in prices for Oil shares is to a certain extent exaggerated.

## NEW YORK STOCK EXCHANGE

Wall Street has continued uninteresting and the developments in the South West Pacific continue to have a discouraging influence. A slightly firmer tone was noticeable towards the close. Rails were higher in anticipation of an increase in freight rates. *U. S. Steel* were $51⅛, *Anaconda Copper* $26⅞ and *General Motors* $33¾.

†Includes Bonus of Rs. 12 per share.
‡Includes Bonus of Rs. 6 per share.

(*Annual meeting, 5th March, 1942 at 4-30 p.m. at Bombay*)

*Audited accounts for the year ended 31st December, 1941:—*

The acounts show, that after providing Rs. 8,69,906 for depreciation, Rs. 21,66,490 for taxation and setting aside Rs. 4,55,000 for the redemption of debentures, the year's working has resulted in a net profit of Rs. 9,29,118, which , together with the amount of Rs. 10,185 brought forward from last year, makes a total of Rs. 9,39,303 which the directors recommend should be applied as follows:—

| | Rs. | A. | P. |
|---|---|---|---|
| Dividend at Rs. 15 per share, free of income-tax | 4,50,000 | 0 | 0 |
| Bonus for the year at Rs. 12 per share, free of income-tax .. .. | 3,60,000 | 0 | 0 |
| Employees' Provident Fund .. .. | 27,785 | 0 | 0 |

leaving a balance of Rs. 1,01,518 to be carried forward.

*Trade conditions.*—Various factors as the shrinkage of imports, the large increase in exports and the expanding volume of the Supply Department's requirements of cotton textiles for war purposes contributed towards a steady increase in the prices of cloth and yarn throughout the year. These improved prices coupled with the fact that the mills were extremely well bought in cotton have resulted in the very satisfactory results.

*Mortgage Debenture Loan.*—As this loan falls due for redemption on the 1st May, 1942 the directors have decided to set aside Rs. 4,55,000 to meet this payment.

*Mill Chawls.*—These continued to be fully occupied throughout the year.

*New Machinery.*—Machinery to the value of Rs. 5,64,429 was received and erected during the year.

Under the Government of India War Risk Insurance Ordinance, the Mill stocks as at 31st December, 1941, were covered for a sum of Rs. 1,14,00,000.

*Agents.*—Messrs. Killick, Nixon & Co.

*Authorised, Issued, Subscribed and Called up Capital—Rs. 30,00,000 in 30,000 shares of Rs. 100 each, fully paid up. Debenture Capital—Rs. 4,55,000 in 4¼% debentures of Rs. 100 each, repayable on 1st May, 1942.*

*Synopsis of the balance sheet as at 31st December, 1941:—*

| *Liabilities* | Rs. | *Assets* | Rs. |
|---|---|---|---|
| Capital paid up .. | 30,00,000 | Fixed Capital Expenditure .. | 52,77,933 |
| 4¼% Mort. Debentures | 4,55,000 | Stores etc., | 19,44,211 |
| Reserves .. | 35,05,000* | Stock-in-Trade .. | 84,12,284 |
| Current debts .. | 90,16,407 | Outstandings .. | 4,35,004 |
| Carry forward .. | 1,01,518 | Cash balances .. | 8,493 |
| Total | 1,60,77,925 | Total .. | 1,60,77,925 |
| | | Total liquid assets .. | 1,07,99,992 |

*Includes Rs. 12,50,000 being Premium on shares.

## COLABA LAND AND MILL COMPANY, LIMITED

| | Year ended December | | | |

| Carry forward .. | 17,767 | 10,750 | 4,693 | 5,564 |

(*Annual meeting, 2nd March, 1942 at 2-30 p.m. at Bombay*)

*Audited accounts for the year ended 31st December, 1941:—*

The working during the period under review has resulted as follows:—

| | Rs. | A. | P. |
|---|---|---|---|
| Land-Property net revenue .. .. | 1,22,290 | 3 | 4 |
| Mill Profit .. .. .. | 13,79,701 | 1 | 8 |
| | 15,01,991 | 5 | 0 |
| Deduct-amount of managing agents' commission | 1,41,743 | 9 | 10 |
| | 13,60,247 | 11 | 2 |
| Balance of profit from last year . | 10,750 | 0 | 11 |
| Net profit .. .. .. | 13,70,997 | 12 | 1 |

which the directors propose to distribute as follows:—

| | | | | | |
|---|---|---|---|---|---|
| Depreciation on buildings .. | 74,638 | 9 | 9 | | |
| Depreciation on Mill buildings, machinery etc., .. | 1,28,592 | 0 | 4 | | |
| Provision for Taxation .. | 8,30,000 | 0 | 0 | | |
| Reserve Fund .. .. | 1,00,000 | 0 | 0 | | |
| Transfer to Old Employees' Pension and Gratuity Fund | 10,000 | 0 | 0 | | |
| Dividend at Rs. 7½ per share, free of income-tax .. | 2,10,000 | 0 | 0 | 13,53,230 | 10 1 |
| Leaving to be carried forward .. | | | | 17,767 | 2 0 |

There was a marked improvement in the demand for manufactured goods throughout the year, chiefly by Government for war purposes, while the freezing of Japanese credits in July, combined with very restricted imports, brought about a strong demand for cloth and yarn for the Home and Export markets at very remunerative rates. With the entry of Japan into the war in December, however, all markets became panicky and a serious decline in prices took place, and the end of the year saw a very uncertain and nervous situation prevailing.

The revenue from Property shows some increase as compared with the previous year as all the flats were ocupied during the latter part of the year. One more plot of land was leased out during the year.

*Managing Agents.*—Messrs. W. H. Brady & Co., Ld.

*Authorised Capital—Rs. 50,00,000 in 50,000 shares of Rs. 100 each. Issued and Subscribed—Rs. 28,00,000 in 28,000 shares, fully paid up.*

Synopsis of the balance sheet as at 31st December, 1941:—

| *Liabilities.* | Rs. | *Assets.* | Rs. |

*(Half-yearly meeting, 6th March, 1942 at 11 a.m.)*

*Audited accounts for the half-year ended 30th September, 1941:—*

After providing Rs. 45,768-10-3 for depreciation and reserving Rs. 1,78,033-5-0 for Income-tax and Excess Profits Tax, the Profit and Loss Account shows a net profit of 1,13,810-9-3. To this is added the balance brought forward of Rs. 58,810-15-4, making a total of Rs. 1,72,621-8-7. The directors propose to distribute this amount as follows:—

| | Rs. | A. | P. |
|---|---|---|---|
| To payment of dividend on Preference Shares | 618 | 0 | 0 |
| To payment of dividend on Ordinary Shares at 5 per cent per annum .. .. | 33,363 | 12 | 0 |
| To payment on Ordinary Shares of Bonus at 2½ per cent per annum .. .. | 16,681 | 14 | 0 |
| To writing off Goodwill .. .. | 10,500 | 0 | 0 |
| To Reserve for Staff Insurance and Provident Fund .. .. .. | 10,000 | 0 | 0 |
| To Contingent Reserve .. .. .. | 48,319 | 0 | 0 |
| To carry forward .. .. .. | 53,138 | 14 | 7 |
| Total .. | 1,72,621 | 8 | 7 |

During this half-year the Company received substantial contracts from Government which necessitated both the Calcutta and Bombay factories working to capacity, day and night, since 1st June, 1941.

Sales to the Trade have now increased to a point where the directors are unable to satisfy full the demand.

Contracts from Government and Trade demands will ensure all plant at both the Calcutta and Bombay factories being fully ocupied for the half-year ending 31st March, 1942.

*Secretary.*—Mr. A. P. Chanda.

Synopsis of the balance sheet as at 30th September, 1941:—

†The dividend is paid from General Reserve.

*Subject to payment of bonus of Rs. 2,37,000.

*(Annual meeting, 27th March, 1942 at 4 p.m. at Tuticorin)*

*Audited accounts for the year ended 31st December, 1941:—*

After allowing for depreciation and managers' commission, the year's working shows a net profit of Rs. 25,02,010-13-10 which, after taking into account the debit carried forward from the previous trading period, leaves a balance at credit of Profit and Loss Appropriation Account of Rs. 20,45,927-7-6.

The directors recommend that a dividend of 15 per cent be paid for the year, that a bonus of one month's wages, subject to rules, be paid to workers, that Rs. 4,75,000 be placed to Taxation Reserve and that the balance be carried forward.

*Chairman.*—Mr. J. M. Doak.

ISSUED WEEKLY

SECRETARIAT LIBRARY 10 MAR 1942 GOVT. OF BENGAL

Vol. XXIX. No. 11 SATURDAY, MARCH 7, 1942 Price Re. 1

## Insure and Increase Nation's Strength

Financial Independence of the individual is the measure of Nation's financial strength.

In this hour of world turmoil, all Life Insurance Policy-holders should take stock of their insurance cover and ascertain just how strongly they are fortified against the unpredictable that lies ahead.

And, those individuals who have not yet made provision for their protection need do so without delay and thereby contribute towards Nation's strength.

Be advised and write to-day to

**NATIONAL INSURANCE COMPANY, LIMITED.**

**7, COUNCIL HOUSE STREET, CALCUTTA.**

Phone: Cal. 5726, 5727 and 5728.

Branch and Agency Offices throughout INDIA, BURMA, CEYLON, BRITISH EAST AFRICA AND FEDERATED MALAY STATES.

## NORTH WESTERN RAILWAY

Applications are invited for 2 posts of Block Maintainers (Electric) Class I grade 2 (Rs. 65-5-2-85) reserved for Muslims and to maintain a waiting list of all communities. Age limit 21 to 30 years on 1st May, 1942. Candidates should have qualified from technical institutes and colleges with at least 3 years practical training in regular workshops. Last date of receipt of applications is 9th April, 1942. For details submit stamped and addressed envelope to the General Manager, N. W. Railway superscribed in the left hand corner "Particulars of Block Maintainers."

*General Manager.*

## East Indian Railway

### TRANSPORT PROBLEMS

### NON-ESSENTIAL TRAFFIC

Railway routes and resources are being strained to the limit. More and more goods trains have to be run to move essential supplies—supplies essential not only to the *National Cause* but also to the public needs—the transport of foodstuffs, cloth, fuel, and other domestic necessities. Non-essential traffic must give way. This is the mutual concern of Producers, sellers, buyers and consumers of essential goods as well as the Railways!

We can run more goods trains only if we run less passenger trains. We must run more goods trains. That is why passenger services are being cut down.

THE PUBLIC MUST HELP BY CUTTING DOWN TRAVEL.

*TRAVEL LESS. TRAVEL ONLY WHEN YOU MUST.*

## WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

WHILE short credits were usable last week, there has developed, in the current week, a definite and increasing demand in the inter-bank call money market. The present position is that lenders are few and borrowers are many. Bombay reports a considerably keener demand for call deposits than Calcutta. The rates are ½ percent in Clive Street and ¾ percent in Hornby Road. February and March are usually the best revenue months in the year; and the tax-gatherer gets most busy under the urge to do his best before the financial year closes on March 31. It is quite possible that the steadier conditions in the money market are due to the bigger outflow of funds in the form of taxes to the Treasury. It is curious, however, that the deposits of member banks with the Reserve Bank are not affected by these tax payments. These deposits on February 27 stood at Rs. 41.12 crores as compared with Rs. 40.69 crores in the earlier week. The demand manifest in inter-bank call money market may be said to be at variance with the conclusion to be drawn from the increase of Rs. 43½ lakhs in the deposits of scheduled banks with the Reserve Bank. But, as we explained in the last week's review of the money market, the banks are now aiming at a higher proportion of cash in the till and cash deposited with the central banking institution.

Rangoon is now facing very real danger; and, apart from the political significance of the fate of Rangoon, the consequence will be felt directly in the financial world. All the more important banks operating in India have branches in Rangoon. We understand that some of them have closed their branches already and some have transferred their offices to Mandalay. The position of banks operating in Rangoon is far from enviable. A good part of the staff have left; and trade advances are not easy to collect in the chaotic conditions now prevailing. Many of the banks are also holding, in their investment portfolio, securities of the Rangoon Port Trust and Rangoon Corporation. What exactly is the standing of these securities? Some of the debentures of the public bodies of Rangoon were issued under the auspices of the Imperial Bank. We understand, however, that the Imperial Bank has definitely excluded these securities from the list of eligible stocks for advance from the bank. We wonder whether the Imperial Bank is well advised in thus excluding such securities at this stage. The Burma Government continues to function. The Burma Government must be considered to be a kind of guarantor for the securities of the Rangoon Port Trust and the Rangoon Municipality. These local bodies cannot issue debentures until and unless they have received authority from the Burma Government to issue them. To the extent that the Burma Government has the power and discretion to give this authority, these securities must be considered to be backed by the Burma Government. It is, therefore, not only an economic question, but a political question, whether the Imperial Bank can act ex-parte without consultation with the Burma Government as well as the Indian Government. The plight of banks who are now obliged to wind up their business in Burma is hard enough; let it not be made harder by decisions which affect not only the value of securities which were once valuable, but drag in what may be called constitutional issues. The plain question may be asked whether, if there were one or two air raids on Calcutta, the debentures of the Calcutta Corporation, the Calcutta Port Trust and the Calcutta Improvement Trust will be declared ineligible securities?

The Treasury Bill market has become narrower and narrower. Against the offer of tender bills for Rs. 2 crores, applications came to only Rs. 2.28 crores. The average rate of accepted tenders is higher at Rs. 1-0-10 per cent per annum. Sales of tap bills, though slightly better still make a poor showing at Rs. 35 lakhs. Tender bills offered for next week are Rs. 2 crores; and sales of tap bills are to continue.

The accentuation of the deterioration in the ways and means position of the Central Treasury is reflected in the returns of the Reserve Bank for the week eneded February 27. The Government of India have been obliged to borrow further large sums on ways and means account. The advance thus taken during the week amounts to Rs. 5.09 crores. The ways and means advances of the Reserve Bank have now reached the record high level of Rs. 20.40 crores. Thanks to this substantial replenishment by loans, the Government's deposits with the Reserve Bank are unchanged at Rs. 7.65 crores. The ways and means position is bound to receive substantial assistance in the first week of March. The payments made by the British Government to the Indian Government on account of war commitments and war supplies are now of the order of Rs. 20 crores to Rs. 25 crores per month. The next return of the Reserve Bank must, therefore, record so big a receipt on account of inter-governmental transactions as will enable the Central Government to repay a substantial portion of the ways and means advance, if not entirely to liquidate the loan. At the same time, it has to be observed that the working capital required by the Indian Government for doing what may be called the agency work of the British War Office is becoming larger and larger. During 1941-42, the contribution by His Majesty's Government to India's gross expenditure on defence services is Rs. 200 crores. During 1942-43, Britain will be contributing no less than Rs. 400 crores. There are also other sterling credits to be given to India such as the payment for war supplies provided by the Indian Government to Britain. That is to say, if the monthly turnover was Rs. 20 crores in the current year, it is likely to be double this amount in the coming year.

The ways and means budget, as announced by Sir Jeremy Raisman last Saturday, throws interesting light on this question. The Finance Member expects that the net refunds by the Secretary of State in 1942-43 will be £164 million after allowing for the repayment of the remaining undated sterling loans, and the payment of £13 million for the purchase of the Bengal and the Northwestern Railway and the Rohilkund and Kumaon Railway. The amount required for payment in connection with the 3½ percent India sterling stock is estimated at £70 million. The funds required by the Secretary of State during the year may be put at, say £20 million. This means that the total sterling payments in 1942-43 from the British Treasury are expected to be £164 million being the net refund *plus* £20 million being the Home Treasury expenditure *plus* £70 million being the

## TREASURY BILLS

### India

Tenders for Rs. 2,00,00,000 (rupees 2 crores) of three months' Government of India Treasury Bills were opened on Wednesday, the 4th March, 1942. Total amount offered was Rs. 2,28,25,000 (rupees 2 crores 28 lakhs and 25 thousand). Tenders at Rs. 99-12-0 per cent and above were accepted in full and those at Rs. 99-11-9 per cent were allotted approximately 86 per cent. Total amount accepted was Rs. 2 crores, the average rate of accepted tenders being Re. 1-0-10% (rupee one and pies ten per cent) per annum.

Tenders for Rs. 2,00,00,000 (rupees 2 crores) of three months' Government of India Treasury Bills will be received on Tuesday, the 10th March, 1942. Successful tenderers should make payment on Friday, the 13th March, 1942. Other conditions are as usual.

Three months' Intermediates will be sold from the 5th March, 1942 to the 9th March, 1942 at Rs. 99-12-0 per cent subject to the conditions previously announced (viz., sales can be stopped at any time without previous notice if Government think it necessary.

Three months' Intermediates sold from the 25th February, 1942 to the 3rd March, 1942 amounted to Rs. 35,00,000 (rupees 35 lakhs).

During the week ended the 27th February, 1942 Government of India Treasury Bills for Rs. 2,71,00,000 (rupees two crores and 71 lakhs) were sold in favour of the Issue Department of the Reserve Bank of India.

## EAST INDIA FUND

### HIS MAJESTY THE KING INSPECTS AN EAST INDIA FUND SQUADRON

**Extracts from "The Times" November 15th, 1941**

The King also inspected a number of fighter squadrons, one of these being one of the East India Fund Squadrons which took part in the Battle of Britain. This squadron has the highest total of victories of any squadron. Its full figures to date are:—

193 ENEMY MACHINES DESTROYED FOR CERTAIN.
87 ENEMY MACHINES PROBABLY DESTROYED.
86 ENEMY MACHINES DAMAGED.

The King commented on the all-Empire constitution of the Squadron in which British pilots fly side by side with men from Canada, Australia and New Zealand in Spitfires paid for by subscriptions from East India.

We now appeal for your further support to complete the purchase of a squadron of "STIRLING" Heavy Bombers. Four have already been paid for and named EAST INDIA FUND Nos. 1 to 4. Donations and monthly subscriptions may be sent to the Honorary Treasurer, East India Fund, Imperial Bank of India (any branch).

(Space kindly given by Imperial Bank of India)

# Finance Abroad

Thursday Morning.

Over the whole of February the N.E.I. currency remained unchanged, and it says much for exchange control that Banks did not trouble themselves over rates on Batavia. Since Batavia has been evacuated this week it will be absurd to quote rates on the commercial capital of the Indies hereafter. A recent development, for which the reason is unknown as yet, is the appearance of what is called a voluntary rate for Spanish currency; in addition to the official rate of 40.5 pesetas to the pound sterling there is a new quotation of 46.55 pesetas, being the rate on Madrid. It must be due to the exhaustion of the credit given in April last and the strain on the Anglo-Spanish clearing arrangement. The emergence of a free rate must be regarded as a mark of depreciation. What lies behind it can only be guessed, for Spain's pro-Axis policy is more obvious than the formal denunciation of reports concerning U-boat bases in the Canaries.

The most important of recent notifications draws attention to the danger of remittances to occupied territories. The Notification of February 14 laid down the prohibition except with special permission from the Reserve Bank of the execution of any order given by or on behalf of any person resident in Malaya or any body corporate which is incorporated under the laws of Malaya or which is under the control of any person resident therein in so far as the order requires the person to whom the order is given to make any payment or to part with any gold or securities or requires any change to be made in the persons to whose credit any sum is to stand or to whose order any gold or securities are to be sold. This certainly rules out remittances to necessitous persons in Malaya. The freezing of accounts from this end is to prevent those living in Japanese jurisdiction from acquiring any title to goods vested in refugees. The upper limit for the import of Chinese, Straits and Java notes having been fixed for all involuntary emigrants, it is perhaps considered unnecessary to allow any other kind of transaction. The departure in policy is by no means unusual, but it makes the position of the Indian in Malaya much worse. Assets held in India canot be converted to his use and forwarded. He cannot sell his property to any British subject abroad, and the savings held overseas cannot be repatriated to Malaya. The purpose is plain, but the consequences for individuals must be deplorable. The mention of securities destroys all hopes for holders of Malayan rubber shares, more popularly known as Straits rubber shares. The end of financial relations portended by the conquest of Singapore indeed is a blow to several classes of investors. Those with claims against the Malayan Government for scorched earth tactics will perhaps be referred to the Colonial Office. The outer limit of concession in India appears to be a direction to income-tax officials to refrain from any strict enquiries as to overseas income. This has led to a representation that Indians with interests in Burma are in the same plight and the Central Board of Revenue should show some sympathy.

How the exchange banks and the fugitives will fare under this 'no remittance, no transfer order' remains to be seen. No exception is made in regard to outstanding trade debts though the discretion vested in the Reserve Bank may be held to protect Indian exporters. The recent application of the doctrine of contraband to Japanese goods at sea is, of course, familiar enough. The exclusion of insurance companies etc. too has followed in due course. Meanwhile, the absence of returns from Burma in the weekly consolidated statement raises questions as to the position of scheduled banks in Burma. While the difficulties in obtaining figures are obvious, it is open to suggestion that banks incorporated in Burma should be dropped from the Schedule. It has always been known that Burma's own few banks were weak. They must have taken a very bad knock by this time, and the Reserve Bank should recognise the altered position, as has been done by permitting Indian banks with branches in Burma not to worry about the precise position of their deposits to be lodged with the Reserve Bank.

Nothing is known as to the financial developments of the last three months in Burma. It is known, however, that Indian life offices have given up looking for new business owing to unusual difficulties. Bank returns shed little light and it is certainly open to some to argue that the connection with Burma should be peremptorily severed, not because the civil government is not functioning, but because the Reserve Bank's shareholders may be prejudiced at some time. It is certainly open to suggest that the drop of Reserve Bank shares below par is an effect of the Reserve Bank retaining connection with the Burma Government. What happens to the Chinese and other exchange banks is of little interest to India, though the Burma depositor in Indian-owned banks enjoys a superior position than the depositors in other types of banks. Of course, there is the risk of his account there being frozen peremptorily and his being condemned to suffer the fate of Indian depositors in French banks in Indo-China. One is certainly going to see some remarkable developments in the field of exchange control. Hereafter it is not going to be a matter of getting permission to buy U. S. dollars for approved payments. Because exchange control in this field is virtually displaced by import assistance. The Chinese emigrants will, of course, be the principal sufferers in any drive meant to split the ABCD front. But the Front is to be mended, and Sir Otto Niemeyer's tribute to China's credit etc. was perhaps made in his capacity as a representative of His Majesty's Government and not as one connected with the Council of Foreign Bondholders.

Large assumptions and very large promises have appeared after Marshal Chiang's visit. The rupture of the older route puts an end so the last lifeline of free China. Only a new line and new trade will put China's economy in working orer, though recent loans may help much, China's foreign trade is at an end and her present position in world trade despite all that is said about the essentiability of antimony and other metals is qualified by the complete disappearance of external trade.

The bullion market displays added strength though the calculation of the 'Financial News' that silver is in demand, because India is prosperous is based on flimsy assumptions. The true factor perhaps is the market belief that Burma's silver will not be available to India, and short supplies must inevitably force up prices. There is more than one metal which will become scarce if the Japanese drive in Burma is not halted. Difficulties in the way of imports from America give Bombay additional strength and the market is no longer deterred by the faith that the Reserve Bank will sell Government silver and arrest any silver boom immediately. The manifest inability of the Bank to control the situation added to the depressing news from Java and other fronts explains the renewed faith in silver. The flight into the precious metals is characteristic of many more advanced countries than India. The gloomy export outlook and swinging increases in taxation certainly conspire to destroy the facile assurance given by the 'Financial News.' The average operator would rub his eyes to read that silver is bought because a lot of money is knocking about. It is because all investments are deemed unsafe that people are driven to buy gold and silver. No tariff increase or reduction can influence the supply position, and indeed there is a chance that if base metal imports into Britain are hit by the war, there may be a large reduction in the attenuated supplies available at present.

Of changes in the London money market there is no trace. The Treasury gets its usual requirements and with revenue and savings coming in at £20 million per day, some reduction in the floating debt has been recorded. Oswald Dutch is impessed by the changes which have put up Government's credit and strengthened the Funds when the stock exchange as a whole is distinctly nervous. The Clearing Banks are free lenders and savings keep on growing. The result of this, like that of the biggest appropriation ever in the U. S. A. are not to be detected. Money remains cheap in both countries and one of the direct results of a long spell of cheap money was the revision of insurance premium rates as from January in the U. S. A. Poor yields on the funds led the life offices to decide on an increase of about 10 per cent. on previous rates. The Metropolitan, the world's largest insurance office, led the way with its announcement in December. All offices are expected to put up premium rates within six months of the increase in rates announced by the best known and biggest life office. The unprecedented ease remarked in November certainly affected other things besides tax anticipation notes which have appeared in Britain also towards the end of last year and have naturally strengthened the Treasury's position. There is the normal attraction of idle funds into a very short-term security but all that does not help to smother the feeling that London is perturbed after the Singapore disaster.

## Second Thoughts on the Budget

It fell to the lot of Sir Jeremy Raisman to reckon with war a few months after taking office, so that all his three budgets may be aptly described as war budgets. He has thus been confronted with special problems almost right from the commencement of his career as Finance Member; and it is a Providential compensation that the difficulties connected with providing for war expenditure on an increasing scale have been mitigated, to some extent, by the favourable repercussions which the war as such has had on other sources of revenue. Thus, has the war had both its dark side and its favourable side for the budget-maker. Similarly, the war has given rise to various economic problems whose solution has called for anxious and continuing interest; at the same time, the war has also provided excellent opportunities for strengthening and consolidating national economy in a number of ways. In such circumstances, the achievement of the Finance Member has to be measured in terms of the success with which he has converted the course of a war into some manner of economic blessing. Judged by this criterion, Sir Jeremy may be said to have done exceedingly well in comparison with those in charge of public finance in other countries, and not merely in countries at war but even in the less fortunate of the neutral ones.

In our mid-week Supplement on the Budget, which was delivered to Calcutta subscribers soon after its publication and which is being sent to upcountry subscribers with this issue, we pointed out that, while, on Sir Jeremy's showing, the net addition to India's debt as at the end of March, 1943, would be Rs. 49¾ crores, the real net addition was only Rs. 4¾ crores. The reduction by Rs. 45 crores is accounted for by the Defence budget providing for lease and lend supplies on the basis of cash payment, while it is obvious that payment for these supplies from America will not have to be made, if at all, until a remote future. The procedure proposed to be adopted by the Finance Member is to debit the various budgets for these supplies which are expected to amount to Rs. 45 crores in this year and the next, and to create a separate Suspense Account to which credit will be given for Rs. 45 crores. The creation of a Suspense Account constitutes in itself an admission that no more than book entries are involved in these transactions.

From the press reports, we have to learn that no Assembly member has raised this important point in the course of the budget discussion. For our part, we feel that there is no fallacy in the position we have taken or the conclusion we have drawn. Our contention in relation to the arrangement regarding lease and lend supplies is, then, that the real net addition to India's debt between April, 1939 and March, 1943 is only Rs. 4¾ crores.

Even this figure has to be qualified. Up to 1940-41 the profits from small coinage were entirely credited to revenue. The demand for small coin has risen by leaps and bounds; and, while we cannot know the actual income under this head until we are in receipt of the Explanatory Memorandum, it may be reasonable to assume that profits from small coinage in 1941-42 and 1942-43 cannot be much less than Rs. 3 crores in each year. However, as from the budget of 1941-42, only Rs. 45 lakhs received as profit from the circulation of small coins is taken to revenue; and any balance over this figure is credited to a suspense account. The idea is that the credits in the suspense account will be available to even out the receipts over a series of years. For, in years when there is a large demand for small coin, the profits are abnormally high, while in others when there is a net return from circulation there is a loss to Government. The new procedure, it is claimed, will tend to keep the revenue receipts from this source stable from year to year and will mitigate instead of aggravating the difficullies experienced in years of depression on this account. This means that the profits from coinage taken to revenue in 1941-42 and 1942-43 amount only to Rs. 90 lakhs in the two years. On the other hand, the gross profits could not have been less than Rs. 6 crores. That is to say, the amount credited to the suspense account is Rs. 5.10 crores.

This is kept as a reserve to be available in the years when small coin will be returning from circulation. But there is no gainsaying the fact that these profits have been earned or will be earned in this year and the next. If these profits had been credited to revenue in their entirety as was the procedure until 1940-41, the figure of Rs. 4¾ crores being the net addition to India's debt would have been completely wiped out. As it is, this net addition to our debt of Rs. 4¾ crores is more than offset by the credit in the coinage Suspense Account for Rs. 5.10 crores.

There are also other accounts which have similar credits and for which no immediate obligations or commitments have been undertaken. The War Risks Insurance Fund received Rs. 63 lakhs in the current year. In 1942-43, the amount to be transferred to this fund is Rs. 3.24 crores. While war risk insurance has been put into effect, the exact obligations which the Government undertake in this regard have not been defined. For the time being, the significance of this Fund is that it provides Rs. 4 crores for the ways and means adjustments of the Finance Member.

India is, we believe, the only country in the world which, in these chaotic and difficult times, can claim to be able to get through 3½ years of war without any real increase in her total debt. During this period, the Railways have been able or will be able to pay off all the arrears of contribution due to the Central Budget. At the same time, the loans taken by the Railways from the Railway Depreciation Fund will also be substantially reduced. The increased earnings of the Railways, due largely to traffic connected with war, have been a welcome source of substantial revenue to the Central Budget. The contribution to be paid by the Railways is put at Rs. 19.12 crores in the revised estimates for 1941-42 as against the original budget estimate of Rs. 9 crores. The contribution in 1942-43 is expected to be Rs. 20.13 crores. After this latter payment, nothing will be owing by the Railways in respect of arrears of contribution; in fact, the Railways would have paid Rs. 1 crore in excess.

Provincial budgets also have not suffered to any great extent owing to war conditions. Some of the Provinces have already announced their budget proposals; surpluses are shown in a few cases—in any case, the deficit is nowhere unduly large. These figures as now published will, however, be greatly modified by the increased contribution promised by Sir Jeremy from the income-tax pool. The budget for 1939-40 anticipated that Rs. 2.38 crores would be payable to the Provinces. The actual amount turned out to be Rs. 2.83 crores. For 1940-41 the share of the Provinces according to the revised estimates was Rs. 3.73 crores. The 1941-42 budget estimate of this figure was Rs. 4.46 crores. The revised figures for 1941-42, as now disclosed, bring up the share of the Provinces to Rs. 7.39 crores. As for 1942-43, is considerably more than the total sum which, at the time of the Niemeyer Award, the Provinces were expected to receive at the end of the 10-year devolution period or what appeared to be possible before the outbreak of war. The distribution of nearly Rs. 8½ crores in the coming year should be particularly of great help to those provinces which show deficits. It may, thus, be said that the Central Budget, the Railway Budget and deficits during these years of war.

## GRADUATED SURCHARGE EXPLAINED

A new feature of the taxation proposals for 1942-43 relates to the Central surcharge on incomes exceeding Rs. 2,000. While the present method of levy is by the application of a flat percentage surcharge on the basic rate of income-tax and super-tax throughout the whole range of income, the new method is based on the slab principle which now governs the levy of the basic income-tax. The income-tax surcharge which has been proposed in the Finance Bill runs from 6 pies in the rupee on the slab of taxable income between Rs. 1,500 and Rs. 5,000, to 9 pies in the rupee on the next Rs. 5,000, 1 anna 2 pies in the rupee on the rupee on the next Rs. 5,000, and 1 anna 3 pies in the rupee on the balance of total income.

In the proposed system, there is a gradual rise in the average rate. The total incidence (surcharge **plus** income-tax) rises gradually and proceeds in a fairly even progression from less than 2 per cent. at one end of the scale to 85 per cent. on an income of Rs. 30 lakhs a year. The whole arrangement is based on the principal of ability to pay, assessees with higher incomes being called upon to sacrifice for the public fisc, at this time of national emergency, a greater proportion of their income than those with lower ones.

The rates of surcharge on the first slabs of taxable income are somewhat higher than 50 per cent. But there is a provision which mitigates their incidence in the case of incomes not exceeding Rs. 6,000. By this provision a portion of the tax equal to a half per cent. of the assessee's total income will be funded for his benefit and repaid to him at the end of the war.

As a result, the total incidence, after allowing for maximum exemption in respect of insurance, Provident Fund or family provision and amount funded for assessee's benefit, becomes considerably reduced for this class of tax-payers. It rises from 1.5 per cent. in the case of those with an income of Rs. 2,150 a year to 5.1 per cent. in the case of those with an income of Rs. 6,000 a year. The amount to be funded for the assessee's benefit rises from Rs. 11 at the one end to Rs. 30 at the other. The gross tax rises from Rs. 50-13 to Rs. 398-7; but the net tax to be paid, after allowing for the maximum exemption in respect of insurance etc. and amount funded, is reduced to Rs. 33-5 at the one end to Rs. 307-1 at the other.

The graduated nature of the tax is well brought out in the accompanying table, which shows the tax payable as a percentage of income in selected cases.

A comparison with the rate of income-tax (less super-tax) paid in Great Britain would show the extent of comparatively lighter incidence in India. An assessee with an income of the sterling equivalent of Rs. 6,000 a year, for instance, if married and with a family of two children, will pay 12 per cent. of his income as tax in the former country as against only 6.1 per cent. in the latter. One with an income of Rs. 24,000 will pay about 40 per cent. as against only 16.7 per cent. in India. This percentage of 40 will be reached in India only in the case of an assessee with an income somewhat greater than Rs. one lakh a year.

In the lower reaches, the assessee gets the full benefit of the maximum exemption in respect of insurance premium paid.

The higher incidence of taxation in the case of higher incomes practically operates as an appreciable "salary cut" in respect of fixed income earning classes like Government servants. Thus, on an officer getting a salary of Rs. 12,000 per annum the incidence of taxation is 10.8 per cent. of total income before allowance is made for maximum exemption in respect of insurance etc. and 9 per cent. after such is made. With a salary of Rs. 21,000, the percentages are respectively 15.7 and 13.5. In the case of those liable to super-tax also, the percentages are considerably higher. Thus, an officer with a salary of Rs. 30,000 a year pays as gross tax 19.6 per cent. of his income without allowing for the exemptions mentioned above and 17 per cent. after allowing. With a salary of Rs. 40,000 the percentages are 24 and 21 respectively.

TABLE

Statement showing the tax payable as a percentage of income in selected cases under the proposed rates of income-tax and super-tax and surcharges:—

| Income | Gross tax | Amount to be funded | Tax less amount, if any, funded for assessee's benefit | Percentage of total income | Tax less maximum exemption in respect of insurance, Provident Fund, or Family provision, and amount, if any, funded for assessee's benefit | Percentage of Total Income |
|---|---|---|---|---|---|---|
| Rs. | Rs. A. | Rs. | Rs. A. | | Rs. A. | |
| 2,150 | 50 13 11 | | 39 13 | 1·9 | 33 5 | 1·5 |

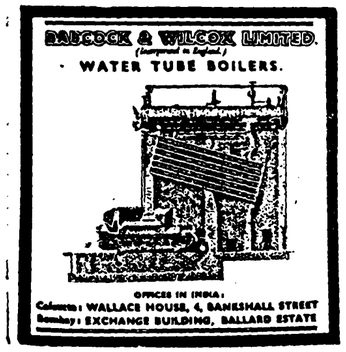
## RAILWAY POLICY IN OTHER LANDS

The earliest Railway Act in India, that of 1854 (Act XVIII) contained rules regarding fencing, the liability of companies as to luggage and valuable property, the pre-payment of fares, tickets, smoking etc. The last clause in the Act required that the copy of the Act, of the general regulations, the time-tables and tariff of charges should be published and exhibited in English and the District vernacular at all stations. In 1870, a short Act was passed giving a list of "Definitions" for the previous Act. The question of cattle trespass and some other minor matters were dealt with by another brief Act of 1871. A comprehensive Act passed in 1879 (Act No. IV of 1879) repealed the previous Acts, and remedied the evils that had become apparent by them. For instance, it was now clearly laid down that the term of "Railway Administration" was to cover the case of the managers of State Railways, or railways worked by Indian States, or by companies. The most important clause was Clause V according to which no railway was to be opened for the public carriage of passengers till the line had been duly

inspected by an officer of the Government and until he had reported that the opening could be allowed without danger to the public.



The need for further legislation in the shape of a general Railway Law was increasingly felt by the railway companies mainly owing to the questions which arose in the inter-change of traffic and in the settlement of the consequent differences. By this time the Railway and Canal Commission had been created in Britain and it was felt that a similar body would be very suitable for the settlement of any disputes as between them and the traders. The Indian Railways Act, 1890 (Act IX of 1890) which came into force on the 1st of May of that year is the most important and comprehensive legislation on Indian Railways. It is an Act with ten Chapters, one hundred and fifty sections, and two schedules dealing exhaustively with inspection of railways, construction and maintenance of works, opening of railways, responsibilities of railway administration as carriers, accidents, penalties and offences—providing the law on the subject is in a thorough manner. Suffice it to say that it followed more or less closely the provisions made in the United Kingdom Acts except in a few important particulars, the most important difference being in Chapter V of the Act entitled "Railway Commissions and Traffic Facilities." Unlike the British Act of 1888, sub-section (1) of Section 26 of the Indian Act laid down that a Railway Commission could be appointed only as and when the Governor-General-in-Council thought fit. Further, unlike the Railway and Canal Commission of the British 1888 Act, under section 39, of the Indian Act of the Railway Commission here was a temporary tribunal. Moreover, section 27 said that "the Commission shall take cognisance of such cases only as are referred to them by the Governor-General-in-Council." Sections 42-46 explained the nature of the cases that may be referred to the Commission. And these were complaints of undue preference, terminals, disputes regarding through rates between the different railway companies etc. The protection against undue preference in Chapter V of the Act was a broken reed, because the enforcement of the remedy under the Act involved the setting up of, as has been pointed out, a special court to try each individual case; and the procedure was so cumbersome that the whole Chapter remained a dead letter as late as 1921 when the Acworth Committee enquired into Indian Railway questions. The Government of India which in other provisions regarding safety etc., followed the precedent of the British Acts, deviated from the British model in this vital matter and the consequence was in the view of many very serious. "It is an Indian grievance of old standing it was voiced in the Legislative Assembly at Delhi in 1915 by a distinguished Indian, now a Member of the Executive Council of Bombay, Sir Ibrahim Rahimtoola that the Railways fixed their rates to suit their pecuniary interests—if indeed it be not to suit the interests of European merchants—regardless of the effect of these rates on the native industries of India. And we have no doubt that the charge is accepted as proved by a large proportion of Indian traders." Had the Indian Railways Act of 1890 provided for a Railway Commission closely parallel to the Railway and Canal Commission created by the British Act of 1888, it might have been possible to liquidate most of such criticisms and misgivings expressed in the extract taken from the Acworth Committees report.

The Act of 1890 was silent on the question of rate-fixing. According to the contracts with the companies, the Government had ample powers because no charges could be fixed without their approval. The policy of the Government, however, was, from the beginning, to fix maximum rates and fares, within which the companies were free to alter them at their own discretion. The fixing of maximum rates and fares had been recognised in the English Acts. In India, however, there were the guaranteed companies; and it became clear to the Government that the companies could be so worked as to create a loss to the Government without affecting the interests of the shareholders. Therefore, unlike the British example, the Government of India had to fix minima rates and fares also. The essential feature of the policy which the Government of India have consistently followed in respect of the fixation of rates and fares was described by them in these words:—"That the schedule of maxima and minima rates and fares, forming Appendix A to this resolution, shall be adopted on all railways worked directly by the State, and by all other railway administrations, whether their lines be already opened or not, so far as this schedule is not inconsistent with any contracts or agreements previously entered into; and that it shall not be departed from without due cause being shown. That there shall be no undue preference, either as between two railway companies or between a railway company and a particular person or class of individuals by making preferential bargains or by granting to one particular company or person more favourable conditions for the carriage of goods than to the rest of the public at large."

Thus towards the close of the century the position in India was relatively uncomplicated but not wholly advantageous. The Government of India obtained and exercised full and comprehensive powers of control and regulations over all railways in India, company-owned as well as State-owned, in regard to all matters connected with safety convenience, publicity and efficiency. This was secured as in Britain by means of legislative enactment; also unlike Britain, by means of the contracts with the companies. In one important matter, however, the policy of the Government of India differed from that of Britain; and that is in regard to the kind of tribunal set up to enquire into the complaints of railway users against the rates quoted by the railways either on the ground of discrimination or absence of reasonable facilities.

Earlier State policy towards the railways in the U. S. A. was—with some exceptions as in the case of Germany—one of interference only when it became quite necessary in the interests of the public, such as, for instance, to ensure safety and to eliminate undue preference alongside of extortionate charges, is confirmed by the history of American regulation of railroads. The Government as well as the general public of the United States of America welcomed and encouraged the rail companies during the beginning of their career. Indeed, they were hailed as the "pioneers of dawning civilisation." By the middle of the last century, they realised however, that this mighty form of transport needed to be controlled and regulated. As in other countries such control was sought to be exercised through statutory prohibitions enforced by Commission. Till the seventies the need for Federal control was not felt. Supervision by commissions appointed by the States was considered enough. About 1870, however, a nation-wide agitation was started by some leaders of the agriculturists. The gravamen of their charge was exorbitant rates and discrimination. In Britain, on the other hand, there were by this time statutory enactments against unfair preferential treatment laid down in the earlier Railway and Canal Acts. In the United States where no legislation of this kind existed at that time, railways were frequently purchased by industrial interests with the express purpose of ruining their competitors, and abuses of this kind became frequent. In 1867, a society called "The Patrons of Husbandry" was started and under its auspices the farmers held meetings and conducted a powerful campaign against monopolies in general and the raiways in particular. Their meetings were held in granges or barns, and hence the name "The Granger Movement."

As frequently happens, the position was worsened by the Civil War in which the railways and their officials reacted to this agitation. They believed and acted on the principle that the railways were private enterprises organised with a view to earn profits, and that, therefore, they owed no obligation to the public. Such a stiff-necked attitude on the part of the railway officials aggravated the public indignation to such an extent that when a Judge in Illinois declared a State Law instituting a series of maximum charges as unconstitutional, they refused to re-elect over railway rates, Illinois again passed a law in 1873 establishing a Commission to regulate rates. Several other States emulated the example of Illinois. The railways questioned the constitutional validity of these laws, basing their objection particularly on the plea that they were repugnant to the Fourteenth Amendment of the Constitution which forbids the States from depriving person of property without due process of law. The inevitable test-case —Munn **versus** Illinois—enabled the Supreme Court to put the lid on this controversy by declaring the law to be valid. They unequivocally declared that "property becomes clothed with a public interest when used in a manner to make it of public consequence, and affect the community at large. When, therefore, one devotes his property to a use in which the public has no interest, he, in effect, grants to the public and interest in that use and must submit to be controlled by the public for the common good." The Inter-State Commerce Commission was established in 1887 when the Act to regulate was passed; Federal control over rates with a view to prevent profiteering and undue preference was clearly established.

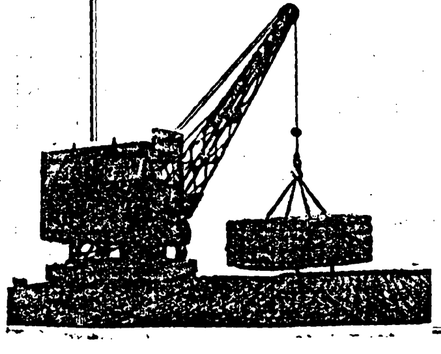
### Levy on War Profits



After the Revenue Act of September there was not great scope for increasing taxation of industry is the opinion of many U.S. observers who noticed that many companies were compelled to cut their dividends while reporting a rise in profits. The era of profitless prosperity had descended on enterprise and the investor alike. The necessity for replenishing savings and reducing future demands for new capital called for moderation in taxation. That was the argument most heard before war burst. The avoidance of debt as a means of counteracting general inflationary influences appeared to many the dominant consideration. Those who inveighed against inflation sought to make clear the Government's duty to keep industry moving under its own power. The corporate taxpayer, as against the individual, was entitled to special consideration. Large increases in taxation, it was held, fostered undue generosity to labour when it was obviously to the interest of the Administration to curb wages and prices alike. The profit incentive had to be left in order to check the conversion of public companies into partnerships. This was a minor but interesting development noticed in December last. The duty of companies to keep money to fight against a post-war depression was emphasised over and over again by all advocates of moderate taxation. The expansion of profits was checked by the overall rise in prices and wages through 1941. With the Treasury in sole enjoyment of the money market enterprise has little chance of getting money. And it was urged that the 1918-19 level of taxation had been surpassed before the war broke out. As the National City Bank's last monthly letter puts it "Already the present federal taxes in the case of many large American corporations are as high as those in Canada. Under the U. S. Revenue Act of 1941, E.P.T. on large Corporations ran up to a maximum of 60 per cent on the excess over the average earnings or invested capital base while on the remaining net income the normal tax is 24 per cent and the new surtax 7 per cent so that the total effective rate in the highest bracket may reach 72 per cent". The U.S. tax in the higher reaches was more destructive than the Canadian tax of a 75 per cent levy above average earnings and a normal tax of 18 per cent or as an alternative straight tax of 40 per cent on companies having little or no excess profits. The U. S. companies have a different handicap in regard to State taxes though a State like Delaware may be notoriously tender of corporate consciences and corporate revenue.

### Short Supplies

The strategic materials of the Far East are in short supply. It is not only the high price of block tin in India, but the extension of Control orders that calls for notice. What is the world position even after such changes as the setting up of a big smelter in Texas City to treat Bolivian ore. The question is not hard to answer at present. It is known that the U.S.A. built up strategic reserves. A marked increase in Bolivia's output during 1941 certainly fails to be recorded. But stocks in 1941 were below the 1940 level particularly in the U.S.A. The U.K. held an advantage in regard to its own stocks and Malayan stocks. The average production up to October 1941 was generally running higher than the 1940 average of 20,100 metric tons per since October 1940 is explained by the U.S. defence programme while the advance in N.E.I. output during 1940 owes much to U.S. buying. Tin had virtually ceased to be a restricted commodity even prior to 1941. The output in 1941 was definitely larger than that in the previous year.

Malaya's output rose sharply in 1940 and rose further afterwards. Malaya produced over a third of the world's tin in 1940. The next most important producer was the Dutch East Indies. French Indo-China's output was negligible as compared with Thailand's in 1940. Portugal is almost alone among the world's tin producers with buyers at her doorstep tumbling over one another. She is the only European country to produce both tin and wolfram. Their importance for her neighbours can be understood, for Europe's smelters in the past have depended entirely on foreign ore. A decisive increase in the Belgian Congo and Nigeria alike are vital features in

the tin situation. With over half in the supplies cut by the war, the Allies no longer enjoy complete superiority in relation to the Axis. If Germany is too far away from the sources either of tin or rubber and cannot, because of the Russian war draw supplies across Siberia, it is essential to recognise the steady drain of rising consumption on accumulated stocks both in Britain and America. As against the 1940 average of 39,700 metric tons the year 1941 witnessed a fall in stocks though the more recent reduction in stocks afloat was due largely to a larger concentration of stocks at smelters. The production of Nigeria did not at all increase in 1940 as compared with 1939. It is doubtful if output in Africa will respond to the new demands of war production in the third year when a lot has to be produced. Perhaps Cornish mines may come more readily into the picture. Prices may be controlled but supplies must fluctuate more than ever. Whether Portugal's supplies are pre-empted is not known but it is clear that Germany is likely to be as keen on Portugal's small mineral supply as on the quantities of iron ore she is able to get from northern Spain. Evidence as to the increase in Spanish ore production as to the recovery in Belgian pigiron output is available. But that is unimportant as against the increase of over one million tons per month in the steel production of the U.S.A. Capacity output there meant over 6½ million tons of steel ingots and castings per month.

**Insurance and the War**

The Federation of Indian Chambers is said to be interested in supporting the pleas for early amendment of Section 27 of the Indian Insurance Act of 1938. The debacle in the giltedged market certainly lends point to the suggestion that investment in approved securities does not constitute an advantage. If dealings in Government stocks below certain arbitrary minima are forbidden under the Defence Rules as from Tuesday, it is not at all going to confer marketability on the holdings of Government securities. It is one thing to fix minima, it is another to maintain a market in active securities. It is not the lowness of interest rates that frightens insurance companies but the abrupt depreciation of investments. Next month the Indian Life offices will again formulate their grievances and claims for relief under very influential auspices. The mere fact that no enhancement of premia against war risks has been decided upon as also that Indian insurance companies are prepared to act as if war risks do not exist or are fully covered by existing contracts must make for stability. It is noteworthy that in spite of various difficulties many offices such as Bombay Mutual and Jupiter actually increased their new business. If their revenue is affected by excessive provision (as in 1940) for depreciation of a large part of their investments then their recent claim for relief is strengthened. The claim takes the form of a demand for lenient administration and further amendment of the section governing the investment of the Life Fund. It is not the young offices alone that desire to recover freedom of action. The demand is more or less unanimous, for it must be recognised that their present large interest in giltedged is in itself sufficient to support the claim of life offices. Intervention under the Defence Rules is not the protection desired but latitude to buy what proportion they like of giltedged. It is now conceded that safety of capital is not an advantage procured by investment in Government securities. The yield may be stable, but the risk of loss of capital is admittedly great.

**Punjab Budget**

In the series of budgets presented by Sir Manoharlal in the Punjab one has always found no desire to under-estimate revenue. If he thinks that a deficit is certain in 1942-43 after a tale of surplusses, it is because of unusual demands on revenue. The total revenue for 1942-43 is estimated at Rs. 13,53 lakhs and total expenditure at Rs. 13,63 lakhs. A very narrow margin indeed, because the Punjab with the help of its Resources Committee had anticipated its responsibilities by new taxation. In the last five years revenues even non-tax have gone up substantially and if it were not for the special provision of Rs. 61¼ lakhs for A.R.P. expenditure, the Punjab would have a handsome surplus in addition to the new assignment of Rs. 30 lakhs to the special development fund, under a new name, made possible by the further growth of revenue in 1941-42. With two previous surpluses, the Punjab can tolerate a deficit. If the revenue in the coming year promises to be below the total shown in the Revised Estimates for 1941-42 it is

but just to recognise that the Minister has allowed for the normal increase in the Province's share of income-tax. The Centre is reconciled to the division of proceeds in new proportions because the Provinces have to incur expenditure on account of the war. It is clear that the increase in tax receipts in 1941-42 was exceptional and the fall expected under Irrigation Revenue and M. V. tax for instance, are due to factors beyond control. Price control e.g. of wheat may even affect the Punjab's prosperity. But the fall in revenue is to be met by timely pruning of expenditure as compared with 1941-42. This, by itself, deserves special The specific limits set to retrenchment as notice. Expenditure charged to revenue will be lower by Rs. 31 lakhs in 1942-43. The specific limits set to retrenchment as also the desire to provide for non-recurring expenditure, explains why the reduction under expenditure is not as great as the estimated fall in revenue.

The Punjab has curtailed its road programme but its faith in irrigation development is reflected in the allocation of Rs. 55 lakhs for the Thal project in the coming year. Being far off from Bihar and Bengal, the Punjab is developing interest in coal. The enhanced appropriation for the Industries Department covers a special provision for local investigation of Punjab coals. Even in Bengal the fuel problem threatens to become serious, and the Punjab has therefore made essential provision. The most interesting disclosure is that a huge glue factory is to be established at a cost of Rs. 1½ lakhs. The increase in A.R.P. allocation from Rs. 16 lakhs to Rs. 61¼ lakhs, like the provision of Rs. 1 lakh for the promotion of communal harmony, indicates that Bengal has found an imitator. But the Punjab is unique in the possession of large balances built up from revenue, and the continuance of capital expenditure certainly continues to distinguish that Province.

**NOTICE**

**Nagpur, the 28th February 1942**

The Government of the Central Provinces and Berar invite applications for permission for the exploitation of patents Nos. 27129, 27148 and 27221 (British India), regarding the extraction of fibre from linseed stalk for the manufacture of paper and cottonization of the fibre for the manufacture of hessian cloth, artificial silk and similar materials. Applications or tenders for such permission should reach the undersigned not later than the 20th March, 1942. Full particulars can be had on application.

C. C. DESAI,
Secretary to Government,
Central Provinces and Berar,
Commerce and Industry Department.

**Live Births and Dead Children**

Since India is a country in which a high death rate for infants is one of the outstanding features of the vital statistics, it is certainly worth while to call attention to the special table appended to the monthly bulletin of statistics published by the League of Nations. The October bulletin indicates again that if data for certain countries are not either available, or are incomplete, the actual position is fairly clear. In a former note on birth and death rates, published last year, attention was drawn to the special handicaps of backward countries and the favourable showing made by a very few colonial possessions. The statistics, so far presented, indicate that annual variations, if present, are of very limited significance. It may be summarily said that a death rate in excess of 100 to 1,000 live births is a feature of backward states. It is not surprising that the best showing of any colony is made by Cyprus which is grouped with Asia and not with Europe. If the 1939-40 figures for India are lacking in the table, they serve to show that the infantile death rate in British India has been consistently high. But the rate, high as it is, is certainly below that shown for Burma and Malaya. An unexpectedly favourable showing is made by Dutch Surinam as against neighbouring British Trinidad and Tobago. Among Latin American countries, Argentina obviously enjoys the best position. Either the recording must be cent per cent perfect or Chile is a very bad place for newborn babes, since the average death rate for 1931-35 is shown to be as high as 248—if Malta is excluded, the highest rate in the series.

It is true that in certain Indian cities the death rate for infants is as high as that, but for India as a whole, the child

death-rate is not as bad as that for the British West Indies. A high death-rate, it need not be added, goes with a high birth-rate; and is assuredly no mark of progress, as proved by the disparity between the death-rate for Jewish babies and that for Arab babies in Palestine. If the rate of 95 and 92 shown for 1939 and 1940 under Bohemia and Moravia showed a fall as compared with the 1931-35 average of 130 deaths per 1,000 births for Czechoslovakia, due regard should be had to the immense political changes of the period. The very high death-rate for infants in Malta, as against the relatively low rate in Italy, simply indicates that in a small colony the usual registration procedure is very effective. To find that New Zealand had the lowest death-rate for infants as for adults is merely to find evidence for the assertion that the Dominion enjoys a special position in regard to climate, economic circumstances and domestic security. The infantile death-rate in Hawaii is not as low as that of New Zealand, but for adults, residence in Hawaii conduces even more to longevity than residence in New Zealand which is famous as the country with the lowest death-rate in the world.

### Indo-Chinese Trade

The expansion of export trade with Iraq, Asiatic Turkey, Saudi Arabia and Iran is conditioned primarily by the ability of India to provide re-exports. The import trade of Bombay should, however, contract soon for it is obvious that supplies of imported goods cannot be maintained in the face of a spreading war. If the war has put an end to trade with Thailand, and earlier with Indo-China, it is clear that the decline in exports to China will persist until new routes are opened up. As against the total value of Rs. 2.15 crores exports to China in the nine months ended December 1941, the total for the corresponding period of 1940, was as much as Rs. 7.35 crores. Exchange and currency difficulties like the freezing order of July 25th do not explain it because China's exports to India rose appreciably during 1941. The total value of imports from China in the nine months ended December, is shown as Rs. 2.46 crores against Rs. 1.82 crores in the previous year. The import total does not exclude Hongkong and Macao, and one must therefore assume that China proper, or Free China, sent less than she took.

China's foreign trade is affected beyond repair by the loss of Shanghai and Hongkong. The U.S.A. can hardly retain her lead over other nations in the existing trade with China when ports like Hongkong are closed. The trade returns indeed suggest that the Rangoon route is more than ever important for the maintenance of commercial relations with China. Various arrangements were made to put China in possession of foreign exchange but the break in foreign trade in December will require a series of remedial measures of which the U.S. loan of $500 millions is the first and foremost.

Superficially, it appears as though India's trade with the U.S.A. went up by leaps and bounds in spite of import control practised in order to conserve dollars; but the expansion in India's exports at the same time suggests that it was a two-way traffic that developed. The U.S.A. was the second-most important market for Indian goods in 1941. If trade is to be guided by the list of priorities which puts manganese first and leather somewhere near the bottom, it is clear that apart from the danger to the Pacific route, there will be other factors which will shape India's trade. No large hopes can be entertained as were permissible after the appearance of the Meek-Gregory report. Imports like motor vehicles and rubber manufactures cannot be had from the U.S.A. because of decisive changes in production. What neutral America could provide cannot be afforded by the belligerent Republic. Though Supply requirements may be met under Lease-Lend, it is futile to expect help for industrial development which is to be undertaken presumably to increase India's manufactured exports. India must be resigned to a drastic decline in imports and hope that such export surplus as survives will be enough to pay off the remnant of sterling debt. Nothing apart from a rise in exports to Russia can be predicted on the basis of available data.

### New Blood

Parliament and Press alike agreed on the necessity for Cabinet changes. Those which have been effected in the last few days by Mr. Churchill testify to his ability to adapt himself to altered circumstances. He has made no fetish of loyalty, as was one feared, and has certainly strengthened the Anglo-Russian aliance by taking Sir Stafford Cripps in. The departure of Lord Beaverbrook and his replacement by Captain Lyttelton are obviously surprises. Few guessed that Lord Beaverbrook would not survive his spirited defence, hardly two weeks ago. The Ministry of Supply will continue under Sir A. Duncan, but the Board of Trade will have a new President in Dr. Dalton. It is the necessity to promote a Labourite that is responsible for the change. If the new partiality for outside experts explains the elevation of Sir James Grigg over Sir Edward Grigg the retention Sir John Anderson ,Lord Woolton and Sir Andrew Duncan is understandable. Lord Moyne like Lord Reith is to be regarded as a casualty. Mr. Churchill has made his omelete because he was not afraid to break the eggs.

The War Cabinet, as reconstituted, does not contain the three Secretaries of State for the three Arms, the Minister of Reconstruction and the Chancellor of the Exchequer. Mr. Attlee has obtained what looks like promotion and Lord Cranborne is in charge of the Colonies. How many of the changes are directly due to the war cannot be ascertained, but the withdrawal of the Beaverbrook-Moore-Brabazon team certainly marks a new phase Empire had no reason to feel upset over the changes, and the Allies have recorded approval mainly because Mr. Churchill still leads the team. It is safe to presume that allied strategy and policy are unaffected by the changes. Yet it would be wrong to think of Lord Beaverbrook merely as the *caper emissarius* chosen for the occasion. A more intimate alliance with Labour is desired on many counts and Lord Beaverbrook still the Colonial, had too many angularities to suceed in politics in alliance with Labour. He will perhaps write in the future a third book to supplement the two he has writtten about the last war, but there can be no suggestion that there is anything like the episode connected with Mr. Asquith's involuntary retirement in 1916. Mr. Churchill has too great a regard for the properties, and if the Conservative Central Office is in eclipse owing to the retirement of Captain Margesson, the retention of Colonel Amery at the India Office seems to suggest that in one field at least, the Cabinet is reluctant to consider any change of policy.

### The Pacifist's Palinode

Mr. Beverley Nichols has been impelled to write a recantation of views made familiar by *Cry Havoc*. His last book *Men do not weep* (Cape 7/6) is intended to show that pacifism is not at all suited to the modern world. A very versatile journalist like Mr. Nichols has no difficulty in trying his hand at what comes perilously near sobstuff. The sketches, which testify to the mental development of the author in the years between, show once again that a Hitler-ridden Europe is intolerable at any time. There can be no compromise as Nichols the undergraduate grasped readily before appeasement came in and went out of fashion. Are the sketches helpful in 'these our winter days when death's tongue is glib numbing with fear all flesh upon a fiery-hearted globe' (C. Day Lewis). The sketches are not pure fiction and their quasi-dramatic form indeed suggests a propagandist purpose. Mr. Nichols known many men and many cities. The knowledge gives distinction to his last book. What happened inside Germany does indeed concern the world which knows at last that the revolution of destruction is too great a danger to ignore. Mr. Nichols puts his views across with the practised self-assurance of the highly successful journalist. His public will certainly applaud his last book which covers much unfamiliar ground. The Germany that put the clock back is a nightmare, and pacifists, so Mr. Nichols thinks, should join Communists in helping the Allies to utter, final victory.

### Defence Loan Progress

The War loan total up to the first week of February is known to be over Rs. 110 crores. The total like the December figures must have suggested that subscriptions were falling away. The effects of the Conference held in January to stimulate saving and public investment in loans are yet to be seen. For the moment, interest may not centre in the loans, but when the budget throws into relief the importance of Government borrowing and the necessity of supporting the giltedged market, at a critical period, the Government like the public will realise that taxation can only reinforce borrownig. The December totals reveal features that have become familiar. The contribution of Bengal was swollen by the Defence week total. In this connection, regret will be expressed that the Bombay defence and savings week scheduled for February, has been postponed. Out of the total of Rs. 5.15 crores for December, Bengal alone put up Rs. 4.17 crores. The U. P. is a very poor second with Rs. 21.2 lakhs. If Bombay still leads in the matter of interest-free bonds, she is admittedly far behind Bengal in the matter of subscriptions to Defence Loans. While the December total, in the case of Bengal, alone owes much to the generosity of joint-stock enterprise in the province, both in the matter of donations and contributions, the total merely reflects the lead given by Bengal without official assistance or encouragement. The total of Rs. 42.59 crores subscribed to the 3 per cent Defence loan by Bengal, indeed suggests that the Bengal investor deserves to be specially protected against unexpected depreciation of his security. The total for the Indian States and Central Treasuries up to the end of 1941 was only Rs. 2.5 crores. It is an extraordinarily poor advertisement for what is called Indian India. The subscription from States, etc., in December to the 3 per cent Defence bonds came to Rs. 7.13 lakhs only and the total under 3 per cent bonds, interest-free loan, savings certificates and defence savings bank for the Indian States and Central Treasuries was only Rs. 3.51,80,000. Out of the gross total of Rs. 103¼ crores the States had probably put up just about 3 per cent for over a year and half. The total is entirely at variance with the financial standing and strength of the States. It may well be presumed that their government have been in some measure neglectful of their interest in the defence of India. It is certainly open to suggest that the States should float internal loans and invest them in turn in the Defence loans issued under the India Government's auspices. During the war their interests require adequate protection, and investment in proportion to their ability is demanded of both the Princes and their subjects.

### A Punjab Estate

Very high farming, indeed, must be the description given in "Indian Farming" of Sir Edward Cole's estate in the Montgomery District near Okara which is an important market of the Punjab with a cotton mill, electric supply and other marks of progress. The estate owned by a European landlord is farmed as a joint-stock company, and if it is devoted largely to horse-breeding, there is the fact that it is organised on the familiar British lines with the difference that tenants on the Coleyana Estate are share-croppers. There are seven villages and there is the usual home farm. The estate agent is an Indian who supervises the lambardars' work. The estate does not know agricultural labour, and being just about 25 years old, is admittedly an experiment in reclamation. There was reh ; there was also the rank clutch grass to contend against. Stockbreeding has improved the land out of recognition, and if it is organised as any other part of the new Canal colonies, the crop rotation is of a distinct pattern.

What the improving landlord can accomplish is shown by the disposition of the average farm of 25 acres. The cropping is 10 acres of wheat, 7½ acres of cotton and 7½ acres fallow for the following cotton crop. In this rotation wheat follows wheat in 2½ acres and each farmer has no more land than he can deal with two plough teams. Only approved seed, provided by the landlord, is to be used, and on the fallow, permission is needed for growing pulses or turnips while an acre and a half is usually given over to fodder crops. Dependent entirely on irrigation, the Estate has compounded its irrigation dues, and the distribution of water is more efficient and equitable than under other arrangements. Improved ploughs and implements are among the constituents of progress in the Estate and tractors have been successfully tried though a bullock reserve has to be kept. The estate has its own cotton gin and pure cotton seed is obtained in its own way by the Estate. The Agricultural Department too takes Coleyana seed. Experiments in connection with sugarcane have begun. And the Estate claims a fine record in regard to rust-free wheat. Manuring has been constantly kept to the fore and Okara's town refuse has nourished the Estate's compost-heap. Organic manure is held to be the best for the dry region and the Estate has turned to grass as a scientific means to promote fertility. Sir George Stapledon's great work in Britain has its lessons for India where the restoration of fertility in too-long cropped land is seen as a more pressing problem than the reclamation of ancient waste. The Estate is in every way a model, and the latest departure in silkworm rearing proves what a conscientious capitalist farmer can achieve for his tenants.

**ELECTRICITY**
*makes life easier*
Grandfather had to climb over a hundred stairs to reach his office on the fifth floor—and so did all the people who went to do business with him. And you probably know only too well how annoying it is when the lift "goes wrong". Nowadays most new buildings are equipped with electric lifts to save time and energy.

A friend who accosted me yesterday in the tram enquired how it was that, while every Indian paper has criticised Sir Jeremy Raisman's 1942-43 budget from some point of view or other, "Indian Finance" has bestowed unqualified and fulsome praise on it. The answer is simple. It is an unfortunate development of the Indian political situation that, if it is an Anglo-Indian paper, its comments on the question are largely coloured by its predelictions for British interests; and, if it is an Indian paper, it views problems with anti-British bias. It is political prejudice which determines criticisms in most cases From the beginning, "Indian Finance" has set to itself the task of studying and expounding economic problems in relation to purely economic criteria. As an economic proposition, Sir Jeremy's three war budgets may be said to be free from any serious blemishes. The editorial in this issue, which deals with second thoughts on the budget, proposes that the criterion that should be applied to the budget is the measure of success which has been achieved in transforming the curse of a war into some manner of economic blessing. The relevant factors pertaining to the budgetary position of the Government of India, as well as those of the commercial undertakings like the railways as also of the Provincial Governments, are examined in the editorial section; and it is a record unparalleled in the budget of any other country in the world in to-day's conditions, that India will be coping with 3½ years of war without any addition to her total debt on account of budgetary deficits. There are other aspects of budgetary and financial policy to which it is more proper that reference be made in this column.

War has always been known to give a powerful stimulus to the industries of a country. The part which the Government play in the quickened industrial expansion is determined by the resources available in the country, the state and capacity of the industrial machine and organisation, and the leadership that is given by the industrialists. The Government of India have been criticised for not doing everything that could have been done for taking full advantage of the war opportunities in the industrial field. This is a complaint which reflects on the Government as a whole. So far as the finance Member is concerned, he could assist industrial expansion only to the extent of a helpful financial policy. That is to say, he is in a position to influence conditions in the money market to the extent that the capital for new industries is forthcoming in adequate volume and on favourable terms. The financial policy of Sir Jeremy has been most satisfactory from this point of view. He has pursued a cheap money policy amidst all the complications and alarums of war finance. The Reserve Bank rate has been kept unchanged at 3 per cent. This is, I believe, the first war in which the bank rate has ruled at so low a level. Treasury Bill rate has been kept in India at a lower level than even in Britain. Defence loans have been issued on the basis of a 3 per cent type. Copious additions to currency have been made from time to time. By these means, the whole structure of money rates has been at unprecedentedly low levels. The capital required for new industries or for expansion of the existing ones has been secured on the cheapest terms possible. For the large requirements of working capital on the part of industrial concerns working at full capacity, credits have been freely available at most favourable rates of interest. The Finance Department has also taken special steps to see that there is the minimum delay in the payment for war supplies. To the extent that financial policy can help industries, Sir Jeremy has done all that is necessary and possible.

By far the most resplendent achievement of Sir Jeremy is the transformation of India from a debtor to a creditor country. Readers of "Indian Finance" were invited, as early as November 1939, to visualise an India free of foreign debt. Not only will India be free of all sterling loans by the beginning of 1943 but she will be leaving colossal sterling balances. Which is another way of saying that India will be a creditor in relation to Britain. I have been asked why I am so thrilled by the vision of India as a creditor. Why do I go all out for paying the sterling loans long before they are due for repayment, a correspondent asks me. The following are extracts from his letter:

"You are evidently in blissful ignorance of the resolution of the Indian National Congress demanding an investigation as to whether our foreign debt has been incurred for purposes directly connected with India. If you care to look out for the relevant literature, it should be easy for you to get hold of it; and you will realise that the expenditure of many of the wars such as the Burma war and the war with Afghanistan have been debitted to India. They should have been borne

by the British Government. If cases like these are properly investigated, there will be considerable reduction in our foreign debt. Such investigation has not yet been made. Why should India, then, be in such indecent haste to repay the sterling loans long before they are due for redemption?"

* * * *

Equally with my correspondent I feel strongly on the question of foreign debt. But for far different reasons. It is true that the Congress has demanded an enquiry into the questions connected with our foreign debt. I consider that there was nothing unfair about the demand. But our British friends immediately came out with the accusation that India was being asked by the Congress to repudiate her debt. Now, this accusation is most unfair. And it comes with ill grace from our British friends. They cannot so easily forget that they have been owing a lot of money to America. Nearly fifteen years ago, they asked the United States authorities for a re-examination of the question of inter-allied debt. Nothing doing, replied the United States. With the best intention in the world we cannot pay, pleaded Britain. That does not concern us, was, in effect, the attitude of America. The next stage was the offer of a "token" payment by Britain. And the final stage was the total stoppage of payment.

When Britain demanded a re-examination of all the factors connected with inter-Allied debt, how would she have felt if America had taunted her with trying to repudiate her debt? Now that, for years and years, she has paid nothing to America, how is her default to be described? That is to say, if India merely demands an enquiry into her foreign debt, she is accused of repudiation of her debt: while Britain has defaulted all these years in her payment to America, we shall be considered impertinent if we suggested that she has repudiated her debt. I have felt so strongly on this unfair attitude of Britain towards the Congress demand that, at many a meeting in London, I had drawn attention to the position of Britain 'vis a vis' her debt to America and of India 'vis a vis' her debt to Britain. I also pointed out that India has, in her long history ,not once defaulted in payment of interest or return of principal. India will be the last country to repudiate her debt: one has to understand her age-long traditions and beliefs with regard to debts. The Hindu believes that, if he dies owing money to another, he would be, in his next birth, a slave to the creditor till he has paid off the debt of his earlier birth. Is a country with such traditions likely at any time to repudiate debts or default in payment?

* * * *

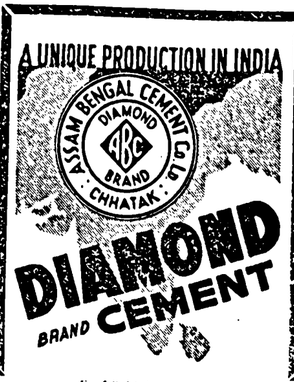
This brings me to the second point on which, too, I hold strong views. My correspondent appears to suggest that repayment of our sterling loans should be made only after an enquiry into our foreign debt had been completed. He fails to realise that the question of foreign debt is different from that of sterling loans. Foreign debt is an issue as between the British Government on the one hand and India on the other. Sterling loans are an issue between a body of private investors (largely British, and, to a small extent, Indians also) on the one hand and India on the other. If India has a dispute with the British Government, let her, by all means, deal with it and settle it as and when she is strong enough to tackle it. But she haas to, and must needs, honour every commitment with private individuals. The people responsible for debitting certain expenditures to India are not the people who subscribed for the sterling loans. Deal with the first as and when you get the strength and standing. But, meantime, never fail in your obligations to the second. The total obligations are approximately £250 million. By paying them promptly, India enhances her credit and her borrowing ability to such an extent that the capitalised value of her status as a most credit-worthy borrower (that is, as a borrower who will get her requirements on the lowest interest basis) is many times this £250 million. In our quarrel over the ethics and equity of our foreign debt, we should not take steps which would disrupt our credit or reflect on our national sense of honour with respect to our obligations.

In the life-story of the late Mr. C. R. Das, it is related how a load of debt was all the inheritance he had from his father; and the proudest day in Mr. Das's life was when he paid off every rupee of his father's debt. Mr. Das did not pause to

**NORTH WESTERN RAILWAY**

**Closing of Section Nagrota (exclusive) to Baijnath Paprola of the Kangra Valley Railway**

The Railway line between Nagrota (exclusive) to Baijnath Paprola will be finally closed from 11th March, 1942. The booking of traffic will, therefore, be stopped as follows:—



Traffic of all descriptions from and to foreign railways. From 2nd March, 1942.

Local goods traffic. From 2nd March, 1942.

Local passengers and other coaching traffic. From 8th March, 1942.

The public is also advised that from the 11th March, 1942, the running of trains 333 Up, 331 Up and 332 Down and 334 Down between Nagrota and Baijnath Paprola will be discontinued. There will be no change in the train service between Pathankot and Nagrota. General Manager, Lahore.

enquire how his father piled up the debt. India's proudest day is likewise 1942 by the end of which she would have discharged all her sterling loans—and discharged them to the last pence and long before they were due to be repaid. Thus may an honourable debtor get even with the most puissant creditor.

* * * * *

An overdue reminder to my readers of the changes that have taken place to the election of R. L. Nopany as President of the Indian Chamber. His election is according to established custom like that previously reported of the Hon'ble Mr. R. R. Haddow as President of the Bengal Chamber in succession to Sir George Morton. Mr. Haddow has long striven to hide his light under a bushel ,but now in the Council of State and the Bengal Chamber, his candle throws a strong beam. As one long associated with a shipping house, he can bring much knowledge to the Chamber which knows that shipping is still the first problem in war. As the Chairman of the Allahabad Bank, Mr. Haddow can claim constantly extending knowledge of matters financial. The Chamber should benefit therefrom like the Bank. It is no idle hope that Mr. Haddow's term will be eventful, for I write on the eve of what is described as a momentous declaration on India. The Bengal Chamber will have a great part in adjusting Indo-British relations, and in the new President and the strong committee, it will have competent direction.

* * * *

In the first week of March every year Jamshedpur does its best to remember J. N. Tata The founder's birthday is a red letter day for the Company and the town alike. The memory of the great pioneer is cherished. The commemoration is a formal reminder to the employees of what one man has made possible. It is then appropriate for the individual employee to develop not only gratitude but the almost forgotten instinct of hero-worship. The average man may not develop it, but those at the top are not at all forgelful of what the enterprise has gained from its association with the founder—and his family now. There was, in spite of all this present concentration on war work and civil defence, nothing missing in the Jamshedpur ceremony of March 3.

* * * *

It was a little off the beaten track of memorial anniversaries and the like but Mr. J. J. Ghandy could be trusted to improve the occasion in more ways than one. The workmen offered the usual floral tributes and started the first non-political slogan perhaps uttered. The usual rejoicings were curtailed, but the message offered more than the conventional crumb of comfort to the huge labour force. "There was the unostentatious assurance. As our Founder was anxious for our well-being so is the Steel Company solicitous for our protection and welfare. It has done and will continue to do everything possible to ensure your safety." The precise, clear and dignified assurance is the feature of the message. It gives the lie direct to all stories, silly or malicious, as to the extent of jitters in Jamshedpur. In the third year of war, the city of steel will steel itself to greater endeavour and exemplary patience. It will draw its lessons from the life of its Founder, and develop that sense of duty to others besides itself, that is the one abiding element in the most amazing success story known to India—the life of J. N. Tata.

* * * *

It is not at all hard for the humblest worker to develop the community spirit, but to-day it is more than necessary. The ample precautions taken at Jamshedpur have been seen by Governors, Advisers and Viceroy alike and Mr. Ghandy's message contains the distinct promise that everything possible will be done to keep the plant functioning. There in the General Manager's own words is the answer to all rumours, whether circumstantial or merely irresponsible: "It is to ensure the safety of what is to us the means of our livelihood to-day that the company has adopted an A. R. P. scheme which is most perfect of its kind in the country." It is not improper to suggest that the message is meant for others besides Tisco employees. To-day when the Indian investors' morale is low, Tisco shareholders should sit up and take notice. They will not ignore the General Manager's statement, "the protection of this plant is therefore a necessity not only because the plant is the property of the Steel Company but also because it is the source of our bread and butter." Cast in moving, simple, precise terms, it is an assurance that labour and management have adopted extensive protective measures, including the storage of foodstuffs for the staff.

* * * *

The example set by Tisco in regard to A.R.P. is complete and satisfying. No employer can, of course, make preparations on the same scale. Jamshedpur is unique in that it can carry out its measures confidently, unhurriedly, without official direction or intervention. I should add that such measures as have been described by Mr. Ghandy are beyond the capacity of either Government or householder. They cannot attain the level of the community life to which Jamshedpur alone can reach up to Active Defence has not been neglected and fighter planes like blast furnaces have become familiar to those who look at the changing skyline in Jamshedpur. The evacuation of families has been a subject in which the employer has manifested some interest and if Mr. Ghandy has referred to absentees without leave it is only with the object of bringing home to the employees that the friendliness of the employer merits similar consideration. He has referred to the company's profit-sharing scheme to show also that intelligent self-interest demands co-operation. The final touch to the message has been given in that reminder of benefits, past and probable. That is the guarantee that it will go home to men who perhaps have been susceptible to rumours. To deny them is superfluous now. The message meant for the workers of Jamshedpur is an answer to the rumour-mongers outside. That is why I feel that the Founder's Day this year has been well adapted to wider purposes.

*(From Our Correspondent)*

New Delhi, March 3.

TOMORROW begins the general debate on the budget—probably the last of Sir Jeremy Raisman, as next year there may be an Indian Member in charge of Finance. Sir Jeremy's proposals have been so shrewdly framed that he is expected to have little difficulty in meeting criticism. Lobby comments express appreciation of the fact that in spite of the violent fluctuations in the country's economy owing to the unexpected changes in the war situation the Finance Member's estimates for the current year have more or less come true. The deficit for 1940-1941 has turned out to be only Rs. 6½ crores. So far as this year is concerned he expects to close it with a deficit of Rs. 17.27 crores—only three crores more than the Budget estimate. For the coming year he has caused the country to be prepared for a deficit of Rs. 47 crores—by no means an over-estimate according to lobby opinion. It is said to the credit of Sir Jeremy Raisman that in estimating and providing for the financial needs of the Central Government he has been remarkably shrewd and accurate. Whatever may be the charges made against Sir Jeremy he cannot be accused of trying to underestimate revenues or showing higher deficits than were warranted by the Government's finances.

• • • •

So far there has been very little criticism indeed on Sir Jeremy's taxation policy. Even important members like Sir Cowasji Jehangir whom I met, frankly told me: "I have nothing to say just now." The fact is that in trying to raise only Rs. 12 crores out of additional taxation though the expected deficit is Rs. 47 crores, Sir Jeremy has shown great moderation. In selecting items for additional taxation he has tried to be as fair as possible to the various classes. Such items as the salt tax--a favourite with previous Finance Members which affect even the poorest in the country, have been deliberately excluded by the Finance Member from his new proposals. As already warned by him in a previous Budget speech of his he has chosen the income tax paying class for bearing a little more of the taxation burden. Contrary to expectations he has left most of the excise duties as they are and made certain changes in the duties on kerosene petrol and silver. The Finance Member's action in raising all import duties is also considered economically sound as the time has come to limit the consumption of imported goods and encourage savings as a part of the war effort. Then again it is felt that the increase in postal, telephone and telegraph charges to raise one more crore will not be an unfair burden on the calsses using these services. From such talks as I have had it is clear that the Finance Member will not have to meet any great criticism for either his decision to raise Rs. 12 crores by taxation or for the actual taxation proposals which he has made for raising this amount.

• • • •

The principle which he has followed is that the time has come in India to make measures to prevent the consumer from utilising the increased purchasing power which has come to him due to the war from increasing the demand for the limited consumption good available and thus starting the vicious spiral of higher prices and higher wages. It is easy, however, to see on what lines criticism in the Assembly will proceed. There is bound to be objection to the proposal to reduce the taxable limit for income tax to Rs. 1,000, but the Finance Member has guarded himself by offering an alternative deposit of a certain amount in the Savings Bank. Then again the increased duty on kerosene is bound to be attacked as a hardship on the poorer classes. Lastly it is also certain that the increase in the minimum letter rate will also be criticised as unnecessary. So far as industrialists are concerned the Finance Member has not only refrained from increasing the Excess Profits Tax but has accepted the suggestion that a reserve with the help of Government contributions should be built up for the rehabilitation and reequipment of industries after the war. None of the proposals, it is claimed, will have the effect of hitting industries unfairly or discouraging industrial enterprise.

• • • • •

Important changes have taken place in India's military command. Is it following the appointment of Sir James Grigg as War Minister? General Wavell is back in India as Commander in Chief and will not be directly responsible for the Burma operations in co-operation with the Chinese Generalissimo. His return to India as the head of the unified forces is welcomed in military circles. It is evident that in view of the difficult situation in Lower Burma and the threat to the Burma Road, alternative arrangements have to be provided for the transit of the Lease and Lend goods to China through India. Operational arrangements have also to be made by the British forces in conjunction with the Chinese for the defence of Burma and India's eastern frontiers. A new Air Chief for India, Sir Richard Peirse, has also been appointed vice Sir Philip Playfair who has retired.

To the question of food shortage in the country particular attention is being paid by Mr. N. R. Sarker. At the meeting of the Advisory Board of the Imperial Council of Agricultural Research last week this question was discussed at great length. The recommendation made to the Government was that that inducements should be offered to cultivators in the form of guaranteed fair prices for all food grains, storage and transport facilities, provision for adequate manure, supply of seeds and irrigation facilities. The scheme suggested by the Board aims at guarding against shortage in the production of essential agricultural commodities. It is likely that the Government of India will accept the Board's suggestion to convene before April a conference of representatives of Provincial Governments and Indian States to plan crop production. The idea is that in order to plan increased food production in such a manner as to bring about regional self-sufficiency, the Provincial Governments and States should collect before the proposed conference meets, information about the exact position of crops at present and the expected shortage in their respective areas.

• • •

In this connection the visit of the Ceylon Minister, Mr. Senanayake, to confer with the official of the Government of India on the possibilities of food supplies from India to Ceylon is also of some importance. The question is a complicated one. In India itself there is a threatened shortage of rice owing to the big fall in rice imports and the uncertainty of the future. On the other hand there is also the consideration that the large Indian population in Ceylon would be put to considerable hardship if rice supplies from India are stopped or are substantially curtailed. The Government of India, it is understood is anxious to be of as much assistance as possible to Ceylon in the present emergency, but apart from the economic aspect of the question, the has also to bear in mind that the Indian question in Ceylon still remains unsettled. Certain representations were made by the Government of India, but so far no reply appears to have been received from the Ceylon Government. The Government of India would be entitled to ask that before any economic agreement is entered into the larger Indian question—particularly in connection with the threatened ordinances against Indians—should be satisfactorily settled. It is hoped that Mr. Senanayake would meet the Overseas Member, Mr. Aney and come to a settlement with him for the war period at least.

HILL-BIRD.

*(Continued from page 367)*

amount for the payment of the 3½ percent stock *plus* £13 million being the purchase price of the two railways or a total of £263 million. This gives an average of £22 million per month. This is equivalent to nearly Rs. 30 crores per month. We may, therefore, assume that the average monthly payment by the British Government during the first nine months of 1942-43 will be Rs. 30 crores. Though the sterling receipts from the British Treasury in the last three or four months have been roundabout Rs. 20 crores, payment in Lower Burma and the threat to the Burma Road, alternative arrangements have to be provided for the transit of the Lease and Lend goods to China through India. Operational arrangements have also to be made by the British forces in conjunction with the Chinese for the defence of Burma and India's eastern frontiers. A new Air Chief for India, Sir Richard Peirse, has also been appointed vice Sir Philip Playfair who has retired.

To the question of food shortage in the country particular attention is being paid by Mr. N. R. Sarker. Gateway of India

(From Our Correspondent)

Bombay, March 2.

THE Port Trust Budget was approved last week and duly submitted to the Government. Relief for traders is again forthcoming as the existing surcharge of 4 1/6 per cent levied along with certain charges in the Docks and Bunders scale of rates since April 1938 is to be abolished. The Port Trust expects to give up Rs. 6.1 lakhs of normal revenue by this concession. The other relief relates to the wharfage fee on passengers' luggage of Re. 1 per package. The charge has been collected since April 1924 and this too will be done away with though the Port Trust will lose Rs. 2½ lakhs in a year. It has, however, been recognised that the yield from this source has fallen away as passenger traffic through the port has been steadily going down. Previous reductions in regard to ground and godown rents are continued despite the fall in revenue anticipated.

In the coming year the Port Trust looks forward to total receipts of Rs. 327 lakhs as against Rs. 333.3 lakhs in 1941-42. In spite of the reduction there will be a handsome surplus of Rs. 45.13 lakhs, part of it obtained by the readjustment of expenditure in the next year. War conditions are clearly helpful to the revenue for the tonnage statistics for the nine months ended December point to an increase in imports of cars, oil, cotton, chemicals, liquor, sugar etc. Though the end of Indo-Japanese trade as from December must certainly affect revenue in the final quarter, the Port Trust's Revised Estimates testify to an increase of Rs. 65.18 lacs in receipts. Only a small part of this increase is due to Government's payments. Revenue in 1941-42 is expected to be Rs. 310.4 lakhs which implies that the whole revenue estimate for 1942-43 of Rs. 291.82 lakhs is below the present expectations. An increase in exports of castor seed, manganese ore, cotton etc., is improbable, but the total expenditure will not be larger.

In the Chairman's note reference is made to the difficulty of predicting developments. There is a record surplus of Rs. 167.99 lakhs as compared with the sanctioned limit of Rs. 100 lakhs. The revenue reserve is expected to increase during the coming year to Rs. 211.64 lakhs and the sinking fund balances are expected to rise to Rs. 5.22 crores. The estimates show that Bombay Port, with its lower debt and rising revenue, is adequately shielded against the risks of the future.

Opinions on the new scheme to buy short staple cotton with the help of the enhanced import duty are not uniformly favourable. Buying 'orphan' cotton is not welcomed because there is a fear that if Government buys as much as six lakhs of bales, the incentive to reduce the crop will disappear. That is the opinion of critics. The more general opinion is summed up in a recent memorandum of the Indian Merchants Chamber which naturally welcomes measures meant to help the cotton grower. It is recalled that the Chamber objected to the duty owing to the loss sustained by the mill industry. The memorandum, therefore, subscribes to the view that the loss to the mills outweights the gain to the agriculturist. It is suggested that the money for purchase and storage could have been raised in other ways besides taxation. Borrowing would not be difficult in present conditions in the opinion of the Chamber which thinks that the Railway's contribution could be drawn upon in view of The technique of purchase etc., remains unknown. It is believed that methods adopted the fact that cotton has paid for the surplus. in 1940 in Bengal will not be blindly copied by the Government which has been reminded that support at stipulated levels for the three main grades of cotton may lead to fresh difficulties. It is emphasised that only one type should be favoured and certain things should be left to chance. The Budget has been very well received locally. There are plenty of tributes to Sir A. J. Raisman whose new taxation measures are considered lenient rather than otherwise. Repatriation of sterling debt is approved. In the South they may still talk of building up key industries from overseas balances and dollar assets but with essential supplies made available gratis by Britain, the case for developing key industries is assuredly weak. Expenditure at the rate of Rs. 40 lakhs a day does not frighten the businessman here. Taxation will keep prices down and labour trouble can be readily avoided. No increase in Excess Profits Tax, that is a big gain to the mills which are unable to extend hours to the 60-hour limit per week and reap full benefit of war orders. The customs surcharge contains important exemptions as to salt, petrol and cotton, but its effect on luxury imports will be severe and not accidental. In a sense, reduced expenditure on imports will increase savings and help the Government as the chief borrower to-day. There is, however, nothing to stimulate business enterprise. The gilt-edged market took a bad knock again, and the brokers on the whole ignored the budget after reading about operations in Java. The increase in postal and other rates is treated as inescapable, and happily the poor man's postcard is untouched.

The absence of any demands on the Provinces which will get substantial help for A.R.P. and get also a bigger share of income-tax, makes the budget popular in official circles. There is, however, much scepticism as to the capacity of the market to provide Rs. 35 crores. If there are no loan maturities there is the fact that the securities market is in a bad way, and Government stocks have no buyers. Banks naturally fight shy of risky investments when their depositors are subject to 'nerves'. Happily there is a real chance of increasing the floating debt, and the issue of the third defence loan can be postponed until the war situation is favourable. The railways' help for the ways and means position will remain great, and it is felt here that the increase of Rs. 35 crores in debt will not lift up the annual interest charges to any extent. Though taxi-drivers may complain about the enhanced price of petrol, the third war budget is welcomed as reinforcing the rationing scheme. The saving system, introduced for the first time, gets full marks. Bombay comment uniformly tends to follow Sir J. P. Srivastava's observation that the third is a fairly satisfactory wartime budget and Sir Jeremy Raisman is to be congratulated on the cushions he has provided to soften the blow. He added that the Finance Member has taken commendable steps in encouraging the habit of compulsory saving, among people drawing small salaries and in building up a reserve for industry.

The Millowners Association has recently made a request to government that a branch o fthe Controller of Supply Accounts Office should be set up in Bombay. As Bombay City contains many mills doing war work, the request is supported by strong evidence as to evidence. Every month Rs. 3½ crores worth textile orders are being executed according to the letter sent up to the Government contractors fo rstores etc., have to be paid and a self-contained unit will help to bring prompt payment says the letter. The millowners have also suggested that instead of 10 per cent being retained against contractors' bills, the whole sum due should be paid on presentation of bills without waiting for receipt of acceptance of goods from the party to whom they are sent. Existing financial difficulties are obviously responsible for the request. The mill industry has reason to feel pleased about the budget and it is not at all surprising to find that fears of an excise hampered dealings in mill shares for some time. When Sir Ardeshir Dalal called the budget very satisfactory, he spoke not only for steel but for the textile interests associated with the House of Tata.

The cotton market is puzzled by the announcement that there will be no forward trading in the new crop on April 1. The impending revision of hedge contracts is assigned as the reason for suspension. It is hoped to resume business in May. The trade organisations discussed the subject in detail with representatives of Government. All the issues including transport difficulty were canvassed and the E.I.C.A. hopes to formulate later on its views on the futures market, Liverpool, went out of business quietly there is nothing to stop Bombay adhering exclusively to spot business from the year. But prices will be more irregular and the mills may have special troubles. Leading members of the trade will examine and report to the E.I.C.A., and a month without futures will show what function is discharged by the speculative middleman.

Bombay, March 2.

Firms' money for all and short quoted ¼ percent and for one to four months deposits ¾ percent.

ONLY cars of the above make, model and type are wanted

* The public are warned that the dealers have been instructed to accept only cars which will not entail disproportionate expenditure for reconditioning to Army requirement. Specification of condition and equipment is available with all of the above named dealers.

Arrangements with dealers provide only for cars within each dealer's operating area. If petrol is needed to get your car to the dealer's premises, apply to the dealer concerned. If your car is located a considerable distance from the nearest dealer, address "Vehicles Directorate, Directorate General of Supply, New Delhi" when if possible, arrangements for its acceptance will be made.

## IMPORTANT

To Owners who have already sold their cars for delivery to the Defence Department.

The above prices are retrospective. You are to apply to the Dealer to whom you sold your car for additional payment on the basis of the prices now authorised and in accordance with paragraph marked with asterisk. Major reconditioning expenditure will be deducted from the amount payable.

INSERTED BY THE DEPARTMENT OF SUPPLY, GOVT. OF INDIA.

# Resume of Commodity Markets

The feature of the week is the further sharp rise in values for gold and silver. Activity in other markets has necessarily been on a very restricted scale. Business in jute and jute manufactures is at a minimum and it is feared that it will not be possible to create any interest unless there is an improvement in the war situation. There is considerable anxiety regarding the future of exports. In spite of the assurances given by the Chairman of the Indian Jute Mills Association at the annual general meeting held last week it is feared that there cannot be any improvement in the freight position.

The Bombay raw cotton market was inclined to be firmer in sympathy with the silver market but the continued weakness of the markets has had a depressing influence and the higher levels have not been held. But for reports regarding Government support values would have been marked down further lower.

The need for regional self-sufficiency in regard to food stuffs has again been emphasised by the Advisory Board of the Imperial Council of Agricultural Research. The convening of a conference of the representatives of the different provinces and states is urged to be held sometime by the end of March or early next month. There is to be a production drive for the cultivation of rice in Bengal and Madras and improved varieties are to be extensively used. It need hardly be pointed out that with the possibility of the whole of Burma being overrun this country will have to be completely self-sufficient in regard to her requirements of rice.

**Jute and Jute Manufactures**

It is not surprising that business in the jute market is at a minimum. With the virtual cessation of exports mills are not keen to buy any large quantities of jute especially as considerable difficulty is experienced by them in disposing of their production.

Under ordinary circumstances there would be an increase in local stocks but with the short working month the shortfall in exports has not been fully reflected in local stocks at the end of February, 1942.

The local stock figures for the month of February, just now available, reveal that there has been only a moderate increase in stocks of Hessian cloth and bags to 21.93 crores yards from 20.40 crores yards. Sandbags on Government account were 10.77 crores yards against 9.57 crores yards. Stocks of sacking cloth and bags were 17.94 crores yards against 17.47 yards.

**Cotton**

The hope that the Government of India would come to the relief of the cotton grower and the strength of the silver market were responsible for a mild rise in prices in the Bombay raw cotton market in mid-week but at the higher levels there has been some selling.

There were earlier reports that the Government were prepared to buy cotton in the market freely if prices fell below certain levels. It is now pointed, however, that no definite decision has been reached in this regard.

**Bullion**

The advance in prices for sovereigns has been halted, at least temporarily. But with the wide disparity between rates for sovereigns and gold there has been some buying of the latter and an appreciable rise in prices has been recorded. If prices for sovereigns are maintained around Rs. 40 a further appreciation in prices for gold is expected.

There has been a boom in the silver market in the last two weeks. With the suspension of the sales of silver by the Reserve Bank and the deterioration in the war situation there has been a resumption of buying for hoarding purposes. In some quarters it is suggested that the silver boom reflects in some measure the prosperity of the Indian ryot but it should not be forgotten that with the high prices for gold there has been some diversion of buying for silver. Also, investment buying cannot be said to reflect prosperity. There has been a switching over from shares etc. to commodities with less bulk and easy transportability.

**Tea**

At the auctions of teas for export, demand was irregular. Offerings were mostly of "end of season character." All broken and leaf grades showed a general decline of one to three annas except Iranian types which were almost steady. Dusts were irregular.

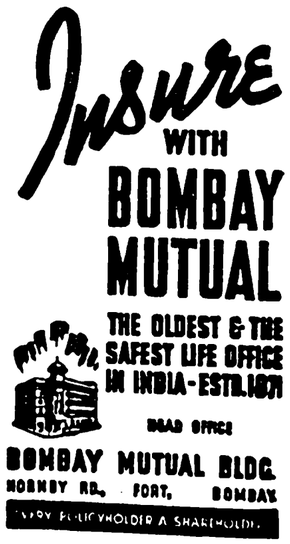
# Jute and Jute Manufactures

(By Our Jute Correspondent)

Calcutta, 5th March.



RUMOURS are current in the marketplaces to-day that it is the intention of the Government of Bengal to revoke the licenses already issued for growing jute in the coming season and to reissue restricted licenses for only half the area previously sanctioned. That would have the effect of reducing the coming crop to the approximate dimensions of the current one. Whether there is any basis of truth in these suggestions it is impossible yet to say, but if there is, the proposal seems fraught with grave danger, not only to the jute industry, but also possibly to the war effort. It is not possible in present circumstances to forecast the future even for a few weeks ahead, but at the same time it is surely imprudent to take the pessimistic view which would seem to underly any suggestion that a crop of the current year's dimensions will suffice to supply the world's requirements in the coming year. There was sound reason for the reduction effected this time last year, for undoubtedly there was a large excess of raw material then visible which was reacting hardly on the economic welfare of the grower. The same cannot be said at this juncture. Admittedly prices have lately suffered a severe relapse but that has been largely sentimental and due to war conditions which, there can be reasonable grounds for hope, will not continue indefinitely, and may even alter in a favourable direction with considerable rapidity. It is largely lack of confidence in the prospects for shipping that acts as a deterrent on fresh business in the markets at present. So far, shipping does not seem to have been interfered with to any extent, and with the tremendously extended lines of communication which the Japanese have to safeguard in their existing military commitments, they may have few, if any, commerce-raiders to spare to harry traffic in the Indian Ocean. Provided therefore that freight space is available, there is no reason to presume that the offtake of jute manufactures will be on any smaller scale than in recent months. And it was with all the available information before him that the Chairman of the Mills Association, less than a fortnight ago, voiced the opinion that he saw no reason why Mills should not continue to work 60 hours up to the end of June. Doubtless the Chairman was keeping in view the possibility of still further Government orders for war requirements. In some circumstances these might well increase rather than abate. In our last issue we commented on the Mills' position as to their holdings of raw material, and although according to some views our figures underestimated that position, it is freely admitted that Mills at present hold, overhead, no more jute than will carry them to the end of this season. That is admittedly a very short stock position for them—so dangerously short in fact that, unless working hours are drastically reduced between now and the end of June, considerable buying must still have to be done, with no great quantity of desirable material from which to pick and choose. It does not therefore seem that the Mills can view with any equanimity a proposal to reduce the coming crop to the restricted level of the current one.

With regard to the physical possibility of carrying out any such restriction scheme at this late stage, we fancy Government would be faced with very strong opposition from the cultivators as well. Licenses have been issued for an acreage double that of last year. In practically all districts the increased acreage is already prepared for sowing, which is actually almost complete on the chur lands. For the greater part of the current season, cultivators have been receiving a very satisfactory price for their produce, and in no case have we heard of any unwillingness to double the output for the coming season, up to the limit of the licenses already issued. Any interference with such arrangements would, we fancy, be strongly resented, if it could be enforced at all at this late stage. Nor can it be reasonably argued that such interference is either desirable or necessary. There can be no two opinions about the desirability of an ample supply of raw jute to meet all probable or possible requirements. We have pointed out that there is every prospect of Mills carrying into the new season, very restricted stocks. If there is a danger of prices falling to such a level as seriously to undermine the economy of the cultivator, what is to prevent the re-institution of a buying policy on the part of the Mills to maintain prices at a reasonable economic level, as was done last year? We hope we shall hear no more of this suggested restriction, if indeed there is any truth at all behind it. It smacks too much of defeatism.

We have emphasised above "a reasonable economic level" for the price of jute. There have been times during the current season when prices of both raw and manufactured jute have been far above the level which can be so described and the latest bulletin of the Central Jute Committee contains its usual crop of warnings regarding the tendency for jute goods to be replaced by cotton goods, partly in some cases for reasons of self-sufficiency, but more often in open competition. A "competitive" price level should be the ideal aimed at, not only by a paternal Government, but by the Industry itself.

Stagnation has been the keynote of all markets during the week. No shipping business has been reported in the Export Jute side, only some inter-baler business in Dundee Daisee at Rs. 53 and small sales of Cuttings to Mills at Rs. 11-8 N.C. and Rs. 10-8 M.C. Futures *nahin hai!* In Loose Jute also turnover has been on a retail scale. European Bots were reported at Rs. 6-12 with Low Bots at Rs. 4-8 and later Rs. 6-8 Bots was reported done with sellers over at the rate. Indian Jat Tossa Bots are reported at Rs. 8, a relatively high price in the circumstances. Estimated arrivals of Jute in February are only about half last year's at 4,68,000 B/s against 9,28,000. Total arrivals for the season, July to February, 49,63,000 B/s this year against 66,44,000 last year.

Business in Fabrics has again been confined almost wholly to covering for ready and near shipment with forward quotations nominal. A further decline occurred at the end of last week, since when rates have remained steady. Ready nine porters sold at Rs. 18-3 and later down to Rs. 17-10. A sale of April/Septr. was reported at Rs. 16-10. Ready eleven porters from Rs. 24 are now selling at Rs. 23-2 with March Rs. 22-12.

## JUTE

Calcutta, March 5.

THE jute market has been absolutely uninteresting with sellers pressing for business. With the further deterioration in the war situation and the standstill in the goods market it cannot be expected that there will be any improvement in trading conditions. Mills have been keeping completely out of the market and, as has been pointed out in these columns on former occasions, are not willing to enter into any new commitments. There is no doubt the need for the buying up of more stocks as with the continuance of the present number of working hours it is feared that mills have not adequate stocks for even three months.

In the loose jute section business on a small scale has been reported. Sellers are prepared to discount rates and quotations are nominal in the absence of business to test prices.

In the pucca bales section shippers have not been in the market and business with mills has been only on a very small scale. Cuttings M.C. and N.C. were done at Rs. 11-8 and Rs. 10-8 per bale respectively.

There is nothing to report in the futures market.

## JUTE MANUFACTURES

Calcutta, March 5.

THE jute maunfactures market also has been dull and idle and quotations have been irregularly downward. Overseas buying has completely dried up. Second-hand dealers are anxious to do business. Mills are unable to sell for the forward positions. 9 porters ready are quoting Rs. 17-12, March Rs. 17-4, April/June Rs. 16-8 and July/September Rs. 15-12.

In the heavy goods section also the minimum of business has been passing. B Twills for March shipment sold on the basis of Rs. 38-4, Liverpool Twills Rs. 41-12 and Cornsacks Rs. 38-6.

## GOLD

Calcutta, March 5.

IT will be remembered that there was a sharp rise in prices for sovereigns last week on good buying for hoarding purposes. The rise in quotations for gold was not quite pronounced as there was some difficulty in judging the quality and business was not freely possible. This week, however, with continued buying for hoarding purposes quotations have been marked higher. There is no change in the quotation for sovereigns on balance. The quotations for gold ready and First Settlement are at the highest levels for the week. Gold ready are quoting Rs. 52-2, and First Settlement Rs. 51-14 against Rs. 50-8 and Rs. 49-8 at the end of last week.

## SILVER

Calcutta, March 5.

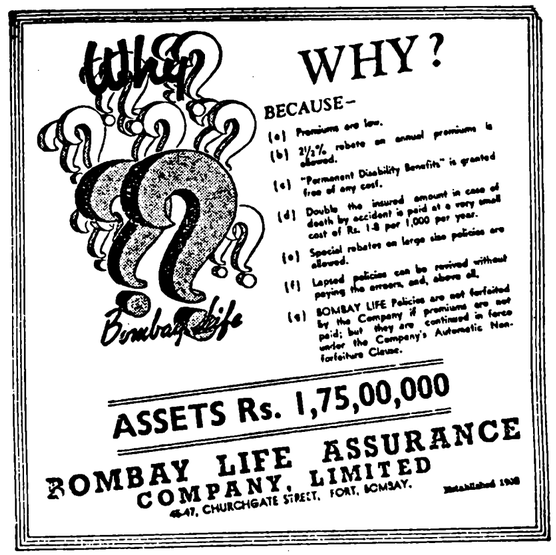
WITH the cessation of the sale of 916 silver by the Reserve Bank it was generally expected that there would be an increase in the import duty on silver. During the last three days there has been heavy buying and quotations are substantially higher. The premium for ready silver has improved further. The general surcharge of 20 per cent on customs duties includes the silver duty also. Indian Mint silver ready are quoting Rs. 81-13 and First Settlement Rs. 73-13. against Rs. 78-14 and Rs. 68-6 respectively at the time of last writing.

In the London Market quotations have remained unchanged with both spot and forward at 23½d.

## WHEAT

Calcutta, March 5.

THE Karachi wheat market has remained unchanged. With the stricter control of prices operators are not interested in the market but stockholders are inclined to stick to their holdings.



In the Calcutta market, quotations are a shade easier with Cawnpore ready quoting Rs. 5-12 and May Rs. 5-6. Arrivals into Calcutta are small.

## COTTON

Calcutta, March 5.

THE Bombay raw cotton market has been rather uninteresting and prices have been fluctuating irregularly. With the strength of the silver market there was a firming up in rates but with the heavy movement of the Broach crop prices could not be maintained. The sentiment in the market is not quite favourable and prices would have been marked down but for the reports that the Government of India would step in the market as buyers. Broach April/May were Rs. 189-8, July/August Rs. 199-4, Bengal March Rs. 122, May Rs. 128, Oomra March Rs. 138-8, and May Rs. 148-12.

In the New York market, easier conditions have been noticeable on hedge selling. There is no weakening of the price structure, however. March futures are quoting 18.47 cents. May 18.68 cents and July 18.80 cents.

## NORTH WESTERN RAILWAY

The public is advised that with effect from 1st March, 1942, the issue of first and second class ordinary return be confined to distances over 100 miles. The return fares for 101 miles will, however, apply to distance from 76 to 100 miles being lower than two single journey fares.

With effect from the same date, i.e. 1st March, 1942, the issue of the following tickets will be cancelled:—

(i) Sixty day rail-cum-road return tickets of all classes from certain N.W.R. stations to Mussoorie Out Agency.

(ii) Third class rail-cum-road circular tickets from certain N.W.R. stations for journeys commencing from and terminatin at the station of issue via Hoshiarpur or via Kangra.

(iii) Inter and third class rail-cum-road tickets between Amritsar, Batala, Gurdaspur and Lahore and Dalhousie, via Kangara.

(iv) Third class rail-cum-road return tickets from Dalhousie to Hardwar.

(v) Rail-cum-road return tickets of all classes from certain stations on B. & A., B. & N. W., B.B. & C.I., E.I, G.I.P. Jodhpur and N.S. Railways and Madras to Srinagar. Return tickets from stations on the N. W. Railway to Srinagar via Rawalpindi only will, however, continue to apply.

from any station master on the N. W. Railway or from the Chief Commercial Manager, Lahore.

GENERAI/ MANAGER.

## NORTH WESTERN RAILWAY

Tender No. 214-S/19. Code Word "CURZON". Tenders are invited on a rupee basis, for purchase by the N.-W. Railway of Chicks and ladders required during 1-8-42 to 31-7-1943. Tenders must reach office of General Manager not later than 14 hours on Tuesday, the 27th April, 1942, and will be opened in office of Controller of Stores, Lahore, at 11 hours on the following working day. Tender forms can be seen at and obtained from office of Controller of Stores, on and from 27-2-42. The sale price of tender is Re. 1, of 3 Specifications As. 8 or, one tender complete with Specifications Re. 1-8 plus As. 8 to cover postage and packing charges for out-stations.

## MINIMUM PRICES FOR GOVERNMENT SECURITIES

The feature of the week is the announcement regarding budget proposals by the Finance Member. On an earlier occasion, I have made reference to the complete absence of speculation regarding budget proposals as there was serious concern over the developments in the Far East. The proposed new taxation proposals fall very short of market expectations and normally should have had an encouraging effect on markets.

With the war coming nearer the shores of India and with increasing military expenditure and falling customs revenue it was generally expected that there would be an increase in the rate of both income-tax and Excess Profits Tax. According to the budget proposals, now announced, the surcharge on income-tax has been increased from 33 1/3 per cent. to the equivalent of 50 per cent. The rate of E. P. T. is to remain unchanged at 66 2/3 per cent.

Regarding indirect taxation, there is to be a general surcharge of 20 per cent. on all customs duties with the exception of cotton, salt and petrol. The cotton duty has already been doubled while the excise duty on petrol has been increased from twelve annas to fifteen annas per gallon. The excise duty on kerosene is to be raised to the level of the enhanced import duty. It was feared that the excise duty on sugar would be increased and that a new duty on cotton goods levied. The market, therefore, should have been agreeably surprised.

Even with the rate of E.P.T. unchanged at 66 2/3 per cent. the Finance Member has offered concessions to assessees. As an incentive to economy in administration, the Government will contribute an amount upto one-tenth of the Excess Profits Tax paid to a reserve for the requirements of industry after the war, provided the assessee deposits double this amount. The assessee's contribution to the reserve will be repaid within 12 months of the end of the war and till then will earn two per cent. simple interest. The improved conditions in industry will be evident from the fact that, in spite of the concessions offered to assessees, the yield from the tax in 1942-43 has been put at Rs. 20 crores as compared with Rs. 8 crores in 1941-42.

* * *

Instead of the anticipated recovery in prices following the announcement of the budget proposals it has been necessary for the Government of India to prevent a further slump in prices for giltedged securities by the promulgation of a special ordinance fixing minimum prices below which sales cannot be effected. With the extreme weakness of the giltedged market it can hardly be expected that other markets will be steady. No business has been reported in equities and even first class fixed interest securities have come in for a good amount of selling. Operators and investors alike are mainly concerned with the developments in the war situation. There is considerable discussion regarding the relative merits of public bodies' debentures. The reports that a prominent bank has refused to advance money against Rangoon Port Trust debentures have raised grave apprehensions regarding the future of other trustee securities.

The minimum prices for the various of Government of India rupee securities are as follow:

| | | | Rs. | A. |
|---|---|---|---|---|
| 3½ | per cent | paper | 87 | 0 |
| 3 | ,, | ,, | 75 | 0 |
| 4 | ,, | 1943 | 101 | 12 |
| 5 | ,, | 1945-55 | 104 | 0 |
| 3 | ,, | 1946 | 97 | 4 |
| 3½ | ,, | 1947-50 | 97 | 4 |
| 2¾ | ,, | 1948-52 | 93 | 0 |
| 4½ | ,, | 1948-53 | 102 | 0 |
| 3 | ,, | 1949-52 | 95 | 0 |
| 4½ | ,, | 1950-55 | 106 | 0 |
| 3 | ,, | 1951-54 | 94 | 0 |
| 3½ | ,, | 1954-59 | 98 | 0 |
| 4½ | ,, | 1955-60 | 107 | 8 |
| 4½ | ,, | 1958-68 | 108 | 0 |
| 4 | ,, | 1960-70 | 103 | 0 |
| 3 | ,, | 1963-65 | 88 | 8 |

With restrictions on trading in government securities and with the satisfactory budget proposals there is every reason to presume that a recovery in prices will be staged if only the war situation showed signs of improvement. Cotton mill earnings are running at very high levels and can be expected to improve further with more war orders The arrival of an American mission in India to organize this country's industrial capacity should result in a further increase in the earning capacity. The position in the several markets at the present moment is far more serious than it was at the time when France fell but nobody then expected that it would be possible to stage a recovery to the highest levels for the war period. It may perhaps seem too much to hope at the present moment that the corner would be turned but methinks the investor would be well advised to wait for better times instead of being anxious to dump his stocks at bargain prices.

* * *

The accounts of the **Buckingham and Carnatic** and **Bangalore Woolen** for the half-year ended December, 1941 make very good showing but it is unfortunate that the Directors have not chosen to increase the distribution to shareholders inspite of the jump in earnings and the very strong financial position of the companies.

The net profit of the **Buckingham and Carnatic Company Limited** for the half-year, before providing for depreciation and taxation, is Rs. 61,26,615 against Rs. 42,88,226 for the previous six months. There is thus an increase of 50 per cent. in the earnings for the last half-year over those of the first six months of 1941. The amount set aside for depreciation is Rs. 5,36,125 against Rs. 4,15,075 on the former occasion. The provision for taxation is the huge sum of Rs. 45 lakhs against Rs. 29 lakhs. The transfer to Raw Materials Fluctuation Reserve is Rs. 4 lakhs against Rs. 2.75 lakhs. The dividend on ordinary shares has been maintained at 12½ per cent. per annum. The amount required for the payment of the ordinary dividend is only Rs. 5,57,744. In view of the extremely sound position of the company the directors could very well have been more liberal in the distribution of dividend to ordinary shareholders. The mills have continued to place their maximum output at the disposal of the Government.

* * * *

**Bangalore Woolen, Cotton and Silk Mills Company Limited**, for the same half-year, has earned a profit, before providing for taxation and depreciation, of Rs. 16,99,734 against Rs. 12,19,507 for the previous six months. The amount charged to depreciation is higher at Rs. 4,71,880 against Rs. 3,72,414 while the provision for taxation is Rs. 5,80,000 against Rs. 2,87,360. The allocation to Raw Materials Fluctuation Reserve is Rs. 2 lakhs. The dividend is 6¼ per cent. (same).

# The Week in the Exchanges

## CALCUTTA STOCK EXCHANGE

*(From Our Correspondent)*

Calcutta, March 6.

EVEN after the long holidays the Calcutta Stock Exchange has reopened rather weak and business passing has been at a minimum. The serious situation in the Netherlands East Indies and the Jap advance towards Rangoon have had a depressing influence. There has been no accumulation of orders. Even the Central Budget, which by all tokens should be considered encouraging from the market point of view, has failed to have any influence on prices. There has been a further fall in prices for giltedged securities during the past few days and it has been necessary for the Government of India to promulgate a special ordinance fixing minimum prices below which no sales could be made. The undertone in the several markets continues weak.

There is actually only two days' trading to be covered this week. And during the short period markets have remained open there has been practically very little doing. Quotations had been marked down during the holidays and there was only a feeble rally on re-opening with the announcement of the budget proposals.

As remarked above, there has been a further slump in prices in the giltedged securities section and it has been necessary for the Government to fix minimum prices to prevent further selling. There are not many buyers for the giltedged securities at the minimum prices. 3½ per cent. Paper is quoting Rs. 87, 3 per cent. 1949/52 Defence Bonds Rs. 95, 5 per cent. 1945/55 Rs. 104 and 4½ per cent. 1955/60 Rs. 103. 3 per cent. U. P. Bonds 1952 were noted at Rs. 94. There has been a slight tightening of money conditions and the treasury bills rate has improved to one rupee and pies ten per cent per annum.

Reserve Bank shares are sharply lower at Rs. 95. No other transactions have been recorded in this section.

Among fixed interest securities, *Auckland* preferences were Rs. 150, *Clive* 'A' preferences Rs. 109, *Empire* Rs. 134, *Howrah* 'A' preferences Rs. 135 and *Lawrence* Rs. 130. Among other sections, *Kumardhubi* were Rs. 110 and *Muir Mills* Rs. 57 ex-dividend.

No transactions in Cotton shares have again been recorded. In the Coal section *Borrea* were noted at Rs. 15-1; *Amalgamated* at Rs. 26-4 and *West Jamuria* at Rs. 30-4.

In the Jute section business has been confined to only a few shares, there being no buyers for most of the counters around minimum prices. *National* were Rs. 21 and *Barnagore* Rs. 90.

In the Engineering section also business has again been confined to *Indian Iron* and *Steel Corporation*. After being lower at Rs. 21-12, *Indian Iron* are quoting Rs. 22-2 and *Steel Corporation* Rs. 14-2 after being lower at Rs. 13-14.

Sugar shares have not been very much affected, *Purtabpore* being quoted at Rs. 10-8 ex-dividend and *Raza* at Rs. 24-5.

Among Tea shares, *Lackatoorah* were noted at Rs. 18-4. *Amluckie* were Rs. 75 and *Roopacherra* Rs. 9-8.

In the miscellaneous section, *Balmer Lawrie* were Rs. 325, *B. I. Corporation* Rs. 4-12, *Indian Wood Products* Rs. 28 and *Borooah Timber* Rs. 16-8. No business was reported in *Burma Corporation* while *Rhodesia Copper* were dealt in at 11 annas.

---

## BOMBAY STOCK EXCHANGE

*(From Our Correspondent)*

*Bombay, March 5.*

*Money.*—The rate for call money was unchanged at ½ per cent.

*Exchange.*—Banks were selling T.T. at 1s. 5 31/32d. and buying three months' bills at 1s. 5 1/16d.

*Securities.*—Business in the local securities market was somewhat restricted during the week owing to the abrupt fixation of minimum prices. 3½ per cent Paper was a shade easier at Rs. 87 as compared with Rs. 87-4 in the previous week. Among terminable loans the 1948/52 Loan changed hands at Rs. 93; 1951/54 at Rs. 94; 1963/65 at Rs. 88-8; 1947/50 at Rs. 97-4; 1960/70 at Rs. 103; 1955/60 at Rs. 107-8; 1945/55 at Rs. 104 and 3 per cent 1946 *Defence Loan* at Rs. 97-4.

*Shares.*—The general undertone in the local share market continued to be weak with practically no dealings in all the popular counters. The Budget proposals did not affect the market, generally, as the increase in taxation was anticipated. Business in the forward section was greatly restricted, while a slightly better feeling was witnessed with a small recovery in the cash section towards the close to-day. Bank shares ruled a shade easier.

The authorities of the Stock Exchange, it is reported, have decided as under:—

(1) For nine scrips, namely, *Mysore Spinning, Phoenix, Swan, Andhra Valley, Tata Hydro, Bombay Tramways, Alcock Ashdown* and *Bombay Steam*, the minimum price limits have been cancelled.

There would be no forward business in these scrips, but those who have settlement outstandings may close the transactions by doing business for 9th March delivery.

(2) In all other scrips there would be compulsory carry-over uptill the 13th July by which date deliveries will have to be taken, Those who want to take deliveries can, naturally, have them any time they like.

(3) Henceforth the market will remain entirely closed on all Saturdays.

(4) On other days, it will work from 12 to 2 for forward and 12 to 3 for cash section.

(5) Shares bought or sold for cash from Monday to Friday will be compulsorily settled, i.e., paid for or delivered, as was the case, on the following Thursday.

*Textiles.*—Textile shares met with some investment demand for a few selected scrips. Small improvement was noticeable lately in *Kohinoor* and *Gokak* which closed at Rs. 456 and Rs. 229 respectively. In the cash section, *Sholapoor* have shed nearly 400 points to close at Rs. 5,000, while *Vishnu* have slightly improved from Rs. 1,435 to Rs. 1,442. *Khatau Makanji* have further slightly improved to Rs. 225.

*Hydro-electrics.*—*Tata Hydro* were marked at Rs. 138; *Tata Power* at Rs. 1,272-8 and *Bombay Tramways* at Rs. 126.

*Steels.*—In this section no business was possible in *Tata* ordinaries and deferreds owing to their minimum price limits. Prices on the other Exchange reflect the mood of the market.

*Banks.*—In sympathy with the securities market bank shares were a shade easier, *Central Bank* being quoted at Rs. 36-4; *Imperial Bank* fully paids at Rs. 1,327-8; contributories at Rs. 307-8; *Bank of India* at Rs. 129 and *Reserve Bank* at Rs. 97.

*Miscellaneous.*—*Associated Cement* were the only scrip which were steady at Rs. 158. *Scindia Steam* were better at Rs. 17-6, while *Premier Construction*, too, were steady at Rs. 109-8. *Bombay-Burmah Trading* new shares were at Rs. 65; *Tata Chemicals* at Rs. 13-8 and *Tata Oil* at Rs. 48.

---

## MADRAS STOCK EXCHANGE

*(From Our Correspondent)*

*Madras, March 5.*

Dull and featureless conditions prevailed on the local stock exchange, most scrips being practically neglected owing to lack of support. Planting issues continued to be steady, while business in cotton mill shares was inevitably restricted.

*Securities.*—The volume of business in this section has been of a small nature, 3½ per cent Paper quoting at Rs. 87-4. 3 per cent 1963/65 came in for business at Rs. 85 and 1951/54 at Rs. 92-6.

†Includes Rs. 50,000 transferred from Reserve Fund.

*(Half-yearly meeting, 23rd March, 1942 at 3-10 p.m.)*

*Audited accounts for the half-year ended 31st December, 1941:—*

The accounts, after writing off for Depreciation Rs. 75,000, show a profit of Rs. 6,91,666-12-6. To this is added the balance brought forward of Rs. 11,569-12-8, giving a total of Rs. 7,03,236-9-2. From this is deducted the amount set aside as a Reserve for Taxation of Rs. 5,00,000, leaving a balance for disposal of Rs. 2,03,236-9-2, which the directors recommend to dispose of as follows:—

Dividend at Rs. 8 per share, free of income-tax, leaving a balance of Rs. 51,236-9-2 to be carried forward.

Trading conditions during the greater part of the period under review continued favourable, local dealers being free buyers of all classes of goods, while importers in Burma and Australia were keenly interested both for quick shipment and on forward account. Early in the half-year cotton ruled very firm and, although quotations later declined on the cessation of exports to Japan, consumption figures in this country increased and the tone of the market remained steady.

In view of the urgency of contracts for war requirements and to assist in the control of prices, the Government of India decided that the working hours of all cotton spinning and weaving mills on single shift should be increased to a maximum of 60 per week (from the 54 permissible under the Factories Act).

Following the declaration of war by Japan in December a general slump in values took place and many bazar merchants have since suspended business.

The labour situation has recently become most unsatisfactory and an appreciable proportion of the regular workers have gone away to their upcountry homes, productions being thus affected to a considerable extent.

*Includes a Bonus of 2½ per cent.
†Includes a Bonus of 1½ per cent.
‡Includes a Bonus of 2 per cent.

*(Annual meeting, held on 23rd February, 1942 at Bombay).*

*Audited accounts for the year ended 31st December, 1941:—*

The working of the line has resulted in a net profit of Rs. 2,94,818-12-2, after providing for Reserve and after making provision for Taxation including Rs. 70,764 to meet E.P.T. To this must be added the sum of Rs. 11,645-4-6 brought forward from last year's acounts, making Rs. 3,06,464-0-8 in all.

The directors declared an ad-interim dividend at the rate of 9 per cent per anum, less income-tax, which absorbed Rs. 1,12,000, leaving a balance of Rs. 1,93,964-0-8 available for disposal, which they recommend should be applied as follows:—

| | Rs. | A. | P. |
|---|---|---|---|
| Dividend for the second half-year ended 31-12-1941 at the rate of 11 per cent per annum, making 10 per cent for the year, less Income-tax .. .. .. | 1,37,500 | 0 | 0 |
| Bonus for the year at 2 per cent per annum, less income-tax .. .. .. | 50,000 | 0 | 0 |
| Bonus to the Company's Staff .. .. | 1,000 | 0 | 0 |

leaving a balance of Rs. 5,464-0-8 to be carried forward.

At the close of 1941 the Reserve had been employed in Fixed Capital expenditure to the extent of Rs. 2,01,692-0-8. The balance amounts to Rs. 22,307-15-4 against which further Capital expenditure of about Rs. 37,000 is already in view. The directors have, therefore, felt it advisable to appropriate a sum of 10,000 to Reserve from the profits of the year.

The following table gives a comparison of traffic statistics for the past three years:—

| | 1939 Rs. | 1940 Rs. | 1941* Rs. |
|---|---|---|---|
| Gross earnings (passengers) .. | 5,92,971 | 6,23,741 | 6,67,556 |
| Gross earnings (merchandise) | 4,60,400 | 4,85,065 | 5,64,967 |

*The figures for 1941 will require adjustment as the audited returns for November and December have not been received.

*Coaching Traffic.*—There has been an increase of over 95,000 in the number of passengers carried and Rs. 43,000 in Coaching receipts, which accords with the general improvement in Railway business throughout India and was assisted by movement of populace caused by communal riots in Ahmedabad in April and May.

*Goods Traffic.*—There has been a rise of 25,000 tons carried and the earnings are greater by about Rs. 80,000. This is attributable to heavier receipts of timber, grain, jagree and general merchandise, as also to heavier bookings in grass, stone, fire-wood and charcoal.

*Agents.*—Messrs. Killick, Nixon & Co.

*Authorised, Issued and Subscribed Capital—Rs. 25,00,000 in 5,000 shares of Rs. 500 each, fully paid up. Debenture Capital—Rs. 11,00,000 in 6% debentures, redeemable on 31st December, 1946.*

Synopsis of the balance sheet as at 31st December, 1941:—

| *Liabilities.* | Rs. | *Assets.* | Rs. |
|---|---|---|---|
| Capital paid up .. | 25,00,000 | Fixed Capital Expenditure .. | 38,50,567 |

## FUTWAH-ISLAMPUR LIGHT RAILWAY CO., LTD.

| | Half-year ended. | | | |
|---|---|---|---|---|
| | 31-12-1941 | 30-6-1941 | 31-12-1940 | 30-6-1940 |
| | Rs. | Rs. | Rs. | Rs. |
| Gross receipts .. | 58,458 | 74,645 | 65,221 | 60,875 |
| Working expenses including commission, etc. | 75,844 | 59,306 | 74,678 | 83,101 |
| Net profit .. | 14,307† | 15,372† | 15,640† | 15,912† |
| Allocation to funds .. | Nil | Nil | Nil | nil |
| Dividend amount .. | 14,251 | 15,352 | 15,352 | 15,719 |
| Dividend % .. | 1¾* | 1¾* | 1¾* | 1¾* |
| Cary forward .. | 6,195 | 6,195 | 6,175 | 5,887 |

*Dividend on receipt of amount from guarantor, less income-tax.
†Includes the amount of Rs. 37,562, Rs. 43,333, Rs. 32,489, Rs. 38,133 received from the guarantor in respect of the half-years ended 30.9.1941, 31.3.1941, 30.9.1940 and 31.3.1940 respectively.

*Audited accounts for the half-year ended 30th September, 1941:—*

*Gross Earnings.*—The gross earnings for the half-year were Rs. 53,402 which is Rs. 6,531 less than the earnings for the corresponding period ended 30th September, 1940:—

*Working Expenses.*—The working expenses for the half-year were Rs. 55,495 which is Rs. 2,046 less than for the figure for the corresponding period.

*Net Earnings.*—The net earnings for the half-year were Rs. 2,907.

The balance available for distribution is:—

| | Rs. |
|---|---|
| Net profit for the half-year .. .. .. | 14,307 |
| Balance brought forward .. .. .. | 6,195 |
| | 20,502 |

As in the previous half-years the guaranteed profits of the Company are reduced by the Super-tax paid and thus do not permit payment in full of a dividend at the rate of 3½ per cent per annum.

The directors recommend that the available balance be disposed of as follows:—

Payment of net dividend of Rs. 14,251 as under:—

| | Rs. | |
|---|---|---|
| 3½ per cent on Share Capital Rs. 11,49,700 for the half-year .. .. .. | | 20,120 |
| *Less*—Company Super-tax .. .. | 1,677 | |
| Company Income-tax .. .. | 4,192 | 5,869 |
| Net Amount for distribution .. .. | | 14,251 |
| Balance to be carried forward .. .. | | 6,251 |
| Total .. | | 20,502 |

The dividend, if sanctioned at the General Meeting, will be paid on receipt of the amount due from the Government of India.

*Managing Agents.*—Messrs. Martin & Co.

Synopsis of the balance sheet as at 30th September, 1941:—

(Continued from page 390)

Among State Loans, 3 per cent 1956/61 *Mysore Loan* changed hands at Rs. 101-8 and 3½ per cent *Cochin Loan* at Rs. 101-14.

*Mills.*—*Sitaram* were crossed at Rs. 75; *Radhakrishna* at Rs. 209 c.d.; *Sri Ranga Vilas* at Rs. 76; *Rajalakshmi* at Rs. 91 and *Mysore Spun Silk* at Rs. 8. *Buckingham & Carnatic* preferences were placed at Rs. 168.

*Utilities.*—There was some selling pressure in this section, almost unexpectedly. *South Madras Electric* ordinaries being marked down to Rs. 11-12, while the preferences were done at Rs. 11-4 and 5¼% debentures at Rs. 107. *West Coast Electric* were slightly better at Rs. 8-2.

*Plantations.*—Rubber shares continued to be steady, *Midland* being done at Rs. 7; *Kalpetta* at Rs. 22-2 c.d.; *Cochin Malabar* at Rs. 9 c.d.; *Peninsular Plantations* at Rs. 4-3 and *Tropical Plantations* at Rs. 24-12. In the Tea section, *Chembra Peak* were marked at Rs. 4-7; *Highland Produce* ordinaries at Rs. 22-12 and preferences at Rs. 10-4.

*Sugars.*—There was practically no business reported in this section. Quotations must be taken as nominal.

*Miscellaneous.*—*Mysore Chemicals* had some buyers at Rs. 14-12, while *Mysore Lamp* were placed at Rs. 10-4. *Indian Steel Rolling Mills* ordinaries again had sellers at Rs. 5. Among other stocks, *Mettur Chemicals* 6% debentures changed hands at Rs. 101; *Mysore Paper* at Rs. 15-2 and *Titaghur Paper* at Rs. 18-8.

## LONDON STOCK EXCHANGE

After earlier firmness a slightly easier tone has been noticeable on the London Stock Exchange during the last two days. There has been good buying support from trust companies and it is believed that the repayment on account of the requisitioned Canadian and Indian Government securities will have an encouraging influence on the market. Gilt-edged securities have been firm. It is believed that Oils, Kaffirs and Diamonds will benefit by the new buying. The recent decline in prices for Oils, it is pointed out, is to a certain extent exaggerated.

3½ per cent. India Sterling Paper was quoted at 101. Among British Funds, 2½ per cent. Consols were 83⅛, 3½ per cent. Conversion 99¾, 4 per cent. Funding Loan 115⅝ and 3½ per cent. War Loan 105⅝.

## NEW YORK STOCK EXCHANGE

With the confused war situation and the lack of leadership rather dull conditions have been noticeable on Wall Street. Business passing has been very small and quotations are not very much changed on balance. *U. S. Steel* were $51½, *General Motors* $34⅛ and *Anaconda Copper* $27¼.

## THE SHAHDARA (DELHI)-SAHARANPUR LIGHT RAILWAY CO., LTD.

### NOTICE

is hereby given that the Seventy-Second Ordinary General Meeting of the above-named Company will be held at the Registered Office, No. 12, Mission Row, Calcutta, on Monday, the 16th March, 1942, at 10-30 a.m., for the purpose of receiving and considering the Directors' Report, the Statement of Accounts and Balance Sheet for the half-year ended 30th September, 1941, and to transact any other ordinary business of the Company.

## Insure and Increase Nation's Strength

Financial Independence of the individual is the measure of Nation's financial strength.

In this hour of world turmoil, all Life Insurance Policy-holders should take stock of their insurance cover and ascertain just how strongly they are fortified against the unpredictable that lies ahead.

And, those individuals who have not yet made provision for their protection need do so without delay and thereby contribute towards Nation's strength.

Be advised and write to-day to

NATIONAL INSURANCE COMPANY,
LIMITED.

CALCUTTA.
Phone: Cal. 5726, 5727 and 5728.
Branch and Agency Offices throughout
INDIA, BURMA, CEYLON, BRITISH EAST AFRICA AND FEDERATED MALAY STATES.

## East Indian Railway

### TRANSPORT PROBLEMS

### THE LIGHTLY LOADED WAGON

A big problem is the small consignment and the lightly loaded wagon.

On this Railway alone if the overall average load of goods wagons could be increased by only one ton it would set free practically overnight ADDITIONAL transport capacity to the extent of 120,000 wagon space per annum. Think of this when you grouse about a wagon shortage!

You can help us and yourselves by giving us your consignments in bigger units and in compact loads.

Make full use of the clubbing facilities allowed for wagon load rates. If you do not know about these we will give you particulars. Induce your buyers to take their requirements in larger quantities at a time or to club orders.

*"GIVE WAGONS BETTER LOADS"*

## NORTH WESTERN RAILWAY

Applications are invited for appointment as three temporary Journeymen Electrical, class I, grade 2, Rs. 65—5/2—85 (one vacancy reserved for an A.I. and D.E. and two for Muslims) and two temporary Assistant Chargemen Electrical, class II, grade I, Rs. 100—10/2—120 (one vacancy reserved for Muslims and one for A.I. and D.E.). Members of other communities may also apply as in addition waiting lists of all communities will be maintained current for one year. Age limit 21 to 28 years for Journeymen and preferably below 35 years for Assistant Chargemen on 6-5-42. Last date for receipt of applications on prescribed forms 20-4-1942. Only those qualified from recognised technical institutes or Colleges and in addition have undergone practical training in regular workshops for at least 3 years need apply for appointment as Journeymen. Those applying for appointment as Assistant Chargemen should be 'A' class diploma holders from Punjab College of Engineering and Technology, Lahore or graduates from Benares Hindu University or other recognised technical Institutes of equivalent standing. Men in service may also apply. Full details will be furnished if stamped and addressed envelope is submitted to the General Manager, N. W. Railway, Lahore, superscribed in left hand top corner "vacancies for Journeymen Electrical" or "Assistant Chargemen Electrical" as the case may be.

General Manager.

## WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

Easy conditions have prevailed in the short loan market, with interbank call money rate quoting ½ per cent in Calcutta and ¾ per cent in Bombay, lenders predominating. The end of March usually marks the accelerated return of funds engaged in produce finance. In the current year however, the uncertain conditions in Burma were responsible for a drastic curtailment in the amounts diverted to the rice crop. The practical cessation of trade in Burma rice finally removes, for the time being, an important crop from the list of commodities whose movement is financed by the Indian money market. In other ways, too, the closure of business with Burma, Malaya, Singapore, Dutch East Indies, China and Japan has seriously affected both the finances and profits of banks. Many of the exchange banks have had a large number of branches in the areas now controlled by the enemy. What is the net position on a balancing of the assets and liabilities pertaining to the branches that are now closed owing to enemy occupation? —this is a question which is engaging the most anxious attention of the authorities guiding the destinies of the exchange banks. This crisis has occurred at a time when the accounts of the year have been made up and the declaration of dividends is due. Between the end of the accounts period and the time when the directors' report is drafted, further deterioration has taken place. It is, therefore, to be expected that the accounts, as they will be published now, will not reveal the full story of the havoc done by the war in the Far East. In such circumstances, the authorities of the banks, who have always erred on the side of extreme caution, are bound to recommend lower dividends. The mercantile Bank of India, which anounces a final dividend of 3 percent against 6 percent last year, making for the year 9 percent against 12 per cent, may be said to be the forerunner of similar reductions in the case of other exchange banks as well.

The anxiety of the exchange bank authorities is intensified as there have been reports in India of the tendency on the part of some depositors to transfer their funds from exchange banks to Indian banks. The Imperial Bank of India, the Central Bank of India and the Bank of India have largely been benefited from this transfer of the affections of depositors. The withdrawals from the exchange banks are, at the moment, definitely mild; and Lord Catto's emphatic statement in his broadcast address regarding the enormous resources and broad-based stability of British financial institutions must be carefully read and correctly appreciated by those who have had long contacts with the exchange banks. These banks have always maintained the highest liquidity. Their published reserves are immense. And, what is more, they have all built up strong inner reserves. The closing of the branches in the Far East may temporarily affect the profit-earning capacity of the banks; but it cannot in any way impair the financial stability of the institutions.

The easy conditions which prevail in the money market are at variance with the results of Treasury Bills sales announced this week. Against Rs. 2 crores of tender Bills on offer, applications amounted to Rs. 3,00.50 lakhs. Last week, tender bills amounted to only Rs. 2,41.25 lakhs. In spite of the keener bidding, however, the average rate of accepted tenders has continued the upward trend of recent weeks. The Treasury Bill discount rate this week is Rs. 1-2-8 per cent per annum as compared with Rs. 1-1-11 per cent last week. Sales of tap bills amounted to only Rs. 16 lakhs. Tender bills offered for next week are again to be for Rs. 2 crores. Sales of tap bills will be continued at the rate of Rs. 99-11-6 per cent as against Rs. 99-11-9 last week. It seems clear that the money market as such is not taking any great interest in Treasury Bills. The Imperial Bank return for the week ended March 13 shows a rise in investments from Rs. 60.90 crores to Rs. 62.74 crores. It is clear that the Bank has given substantial support to Treasury Bills. So far as other banks are concerned, they cannot be said to be over-keen about Treasury Bills in the present circumstances. For weeks and weeks, sales of tap bills have produced very meagre results. One wonders why the Reserve Bank continues the sale of tap bills in spite of such poor results. The continued rise in Treasury Bill discount rate is a definite argument in favour of the reduction of the weekly offer from Rs. 2 crores to Rs. 1 crore.

The returns of the Reserve Bank for the week ended March 13 show a further considerable expansion in currency. In the week ended March 6, there was expansion against rupee securities. That is to say, the expansion in that week was an operation designed to help the ways and means position of the Central Government. In the week ended March 13, however, the expansion is against sterling securities. Sterling securities held in the issue department have risen from Rs. 193.85 crores on March 6 to Rs. 209.85 crores on March 13. That is to say, there has been currency expansion for Rs. 16 crores against sterling securities. This is an operation which does not benefit the Central Government's cash position in any way; its real significance is that the notes held in the banking department of the Reserve Bank are now subject to recurrent depletion. It is for the purpose of maintaining the level of notes in the banking department roundabout Rs. 10 crores that, for the past many weeks', constant transfer of sterling securities from the banking department to the issue department is being effected, resulting in expansion of currency. Active note circulation has gone up by Rs. 10.11 crores and now stands at Rs. 374.10 crores. On account of the transfer of securities to the issue department, foreign balances held in the banking department are down by Rs. 16.27 crores to Rs. 38.42 crores. The Central Government have had to take a further large ways and means advance for Rs. 6.66 crores, the latest figure of advances made by the Reserve Bank to governments being Rs. 12.56 crores. The Central Government's deposits with the Bank are higher by Rs. 45.5 lakhs and now stands at Rs. 6.59 crores. Burma Government's deposits are nearly Rs. 1 crore down while the provincial governments' deposits are down by Rs. 1¾ crores. The deposits of member banks have also shrunk by Rs. 1½ crores.

The returns of the Reserve Bank now under review are for the second week of March. Two more weeks must elapse before the returns could disclose any large sterling receipts. It is, therefore, quite on the cards that the Central Government are obliged to have recourse to bigger and bigger loans from the Reserve Bank on ways and means

## TREASURY BILLS

### India

Tenders for Rs. 2,00,00,000 (Rupees 2 crores) of three months' Government of India Treasury Bills were opened on Tuesday, March 17, 1942. Total amount offered was Rs. 3,00,50,000 (Rupees 3 crores and 50 thousand). Tenders at Rs. 99-11-6 per cent and above were accepted in full and those at Rs. 99-11-3 per cent were allotted approximately 57 per cent. Total amount accepted was Rs. 2 crores, the average rate of accepted tenders being Re. 1-2-8 per cent (Rupee one, annas two and pies eight per cent) per annum.

Tenders for Rs. 2,00,00,000 (Rupees 2 crores) of three months' Government of India Treasury Bills will be received on Tuesday, March 24, 1942. Successful tenderers should make payment on Friday, March 27, 1942. Other conditions are as usual.

Three months' Intermediates will be sold from March 19, 1942 to March 23, 1942, at Rs. 99-11-6 per cent subject to the conditions previously announced (viz. sales can be stopped at any time without previous notice if Government think it necessary).

Three months' Intermediate sold from March 11, 1942 to March 16, 1942, amounted to Rs. 16,00,000 (Rupees 16 lakhs).

During the week ended March 13, 1942, Government of India Treasury Bills for Rs. 86,00,000 (Rupees 86 lakhs) were sold in favour of the Issue Department of the Reserve Bank of India.

# Finance Abroad

Thursday Morning.

AN unofficial proposal to limit dividends for the duration of the war is definitely a development of unusual interest in the U. S. A. Two Congressmen are behind the proposal. The Administration if one recalls Mr. Morgenthau's forcible proposal in December is sure to back the suggestion. One must assume that the sponsors are Democrats. It is only the majority party that can start this thing for the present. Its implications at a time of rising expenditure are obvious. The further pruning of the profit system is contemplated. The present war limits opportunities and enhances risks—that will be the judgment in every belligerent country. For the moment, the proposal does not appear revolutionary, but taken with the entire calendar of happenings since 1933, it will be a serious breach of the American business organisation.

As compared with this sensational possibilities, there is nothing as striking in Australia's virtual withdrawal from the Eastern Group. It is the Pacific Supply Council that matters. Mr. Curtin has indicated that his Government's representatives abroad must be men in whom he has confidence. Dr. Evatt is meant for London and his halt at Washington is intended to support the main case for immediate assistance. It is clear that New Zealand, too, looks to Washington. The probable developments cannot be outlined. They will turn on the dependence of both the Dominions on the U. S. A. instead of Britain even in the postwar period. American ports by way of the Panama Canal are nearer than London to Australian ports and whatever be the similarity in agricultural production, the Dominions are sure to follow American precept and example. In regard to many things they are already Americanised; the further advance of U. S. influence is only a matter of time. The real importance will be apparent in the postwar period when Australia's external debt is paid off and the growth of secondary industry limits the field open to British trade.

As against such far-reaching but very dim changes, the recent movements in the Bank of England return are of little consequence. There is a little more gold. Bankers are not broadening the credit base; some tightness was reported last week. The Treasury is not an eager borrower even if offerings are reduced and it has limited its requirements this week to £75 million in Treasury Bills and £20 million in Treasury deposits. London proceeds as if nothing has happened. Mr. Gandhi's tribute to Britain's ability to rise superior to reverses is indeed justified by the characteristic behaviour of the London money market. The Government is getting its taxes all right. Towards the end of December, appeared notices concerning tax reserve certificates. The Bank of England offered to accept deposits from £25 upwards in regard to the future, but fairly definite liability for taxes due to the Treasury. The limits imposed were three months and two years. The American system had thus been accepted. The usual advertisement does not mention the interest rate payable in connection with these certificates. Surely there must be a discount of at least 1 per cent to provide a motive for prepayment of taxes. As to the exact response to the new type of short-term security, which is not negotiable like the others, little is known at present. One must assume that big companies are patriotic and prudent. They pay taxes in advance just as they invest largely in war loans. It is certainly a measure of London's devotion to the war effort, that the City now seeks to put up £125 million in one Warship Week. Those who know the City through books and papers will agree, that it will be easy to reach the prescribed minimum. If Edinburgh put up £12½ million London can surely pay tenfold, whatever be the war situation. Before the Budget appears after Easter, the collection will be made, and the means of replacing a squadron, or rather a fleet, will be available through the sacrifice of small savers.

The acceleration of saving is to be effected through the imposition of a Spartan regiment. The cut in the clothes ration is symptomatic of the belt tightening provoked by the war in Britain. The cut in individual expenditure will be large. If a thousand million more can be had, a budget of £5,000 million involving over 60 per cent of the national income can be had. The Chancellor, to judge from recent utterances, is the most hopeful man in the Cabinet. The disappearance of all competition for savings and the repayment by oversea debtors aid the Treasury equally. There is no longer any disposition to exaggerate the gap; the next budget will soon reveal it, but there is an assurance of food supplies under lease-lend and the disappearance of the threat of inflation. The curtailment of railway travel in Britain as from the winter has also augmented the flow of savings. There is no hint of weakness in sterling. The rates for European currencies are unchanged. It is possible that Australia's currency might have weakened in New York as it did temporarily last year. Such weakness would be readily attributed to the war. There is little doubt that the Canadian dollar is now the only Empire currency that can look others in the face. Being independent of sterling, it is detached from the U. S. dollar as well, with the important proviso that the Canadian dollar has been stablised easily enough in relation to both British and U. S. currencies. The Pacific war makes no difference to Canada unless it be the projected modification of conscription.

Much fuss is made about the flow of supplies to China. A long string of extracts from Chinese papers appears to show that China is dealing effectively with her problems. The success of a new scheme to sell saving bonds issued by Chungking is also mentioned. There will be some disposition to treat all the stories with reserve. It is no longer the China of 25 provinces that is mentioned. Alliance with Korean emigres does not improve the status of Chungking. The virtual disappearance of foreign trade and the elimination of foreign interests, as from August last, must be reckoned with. The year 1942 will be crucial for China as for Japan. It will be apparent that there are factors to restrain optimism. The official view is, of course, one of expansive hope, but many have learnt to understand that official views are frequently divorced from reality.

The only question asked in the Common of Captain Macmillan as to the securities held in banks, etc., in Malaya a has elicited the answer that the Governor of the S. S. had suggested destruction to banks, etc., to prevent capture and possible misuse by the enemy. The absence of any specific notification on the lines adopted in 1940 to prevent sales from Holland and Belgium of bearer securities will be taken to mean that the order was promptly complied with. But there is nothing so far to suggest that the Japanese cannot reopen the markets in occupied countries. It is known that in occupied Europe the bourses are pretty active, and Germany is now a regular participant in all enterprise. The Japanese are sure to take a leaf from the Nazi book. They are credited with such intelligence and ruthlessness as led Mr. Lionel Curtis to confess that the European had to forget his colour superiority complex in Japan alone. They have in the Y.S.B. an institution meant to work effectively as a tool of high policy.

It is manifest that the reopening of many rubber plantations with wages drastically cut will put the Japanese in a very favourable position, and with new currency already in use, they can hardly forego the temptation to buy up securities in existing local enterprise. Their sale abroad is prohibited specifically, but undestroyed wealth in Malaya can be had in return for such securities as have fallen as spoils of war. The possibility that banks, etc., of foreign origin and domicile can be persuaded to work in occupied territory must be recognised. The Continental branches of English banks are not idle. They are worked under German supervision. The disappearance of the link with their parent offices does not spell complete disaster to the staff. What kind of exchange control, what system of trade treaties and what sort of new investments the Japs contemplate is not known. According to a note in the D. A. Z. the Japanese Ambassador in Berlin indicated that the Japanese in spite of their claim to supreme power in East Asia did not intend to keep back colonial produce. She is credited with the idea of exchanging raw materials for German manufactures. But normal commercial relations are ruled out by the local warfare in the Indies and the stern blockade of Europe. The difficulties in the way of Germany's making payment, even if routes are open, should also be considered. It is deduced that the Axis is going to get nothing out of the Far East though it may be urged that Japan will be able to utilise her recent acquisitions for her own use. The last is a very disturbing possibility.

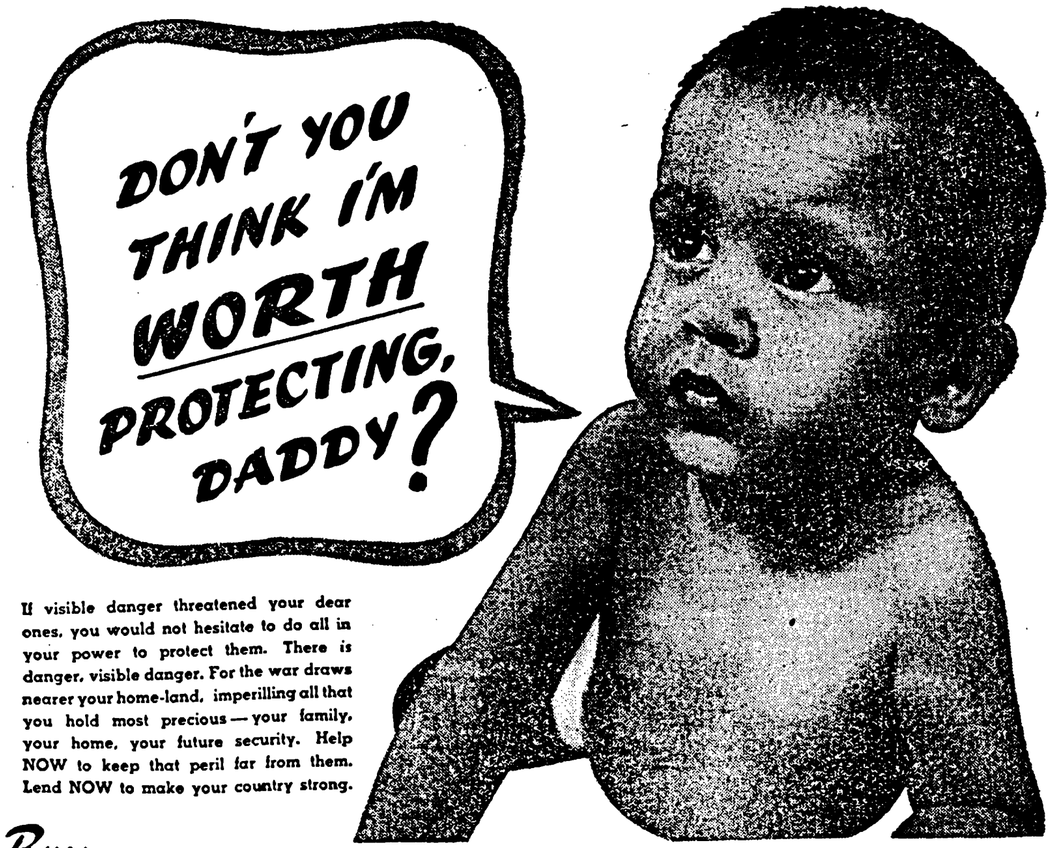
## Financing sterling debt redemption

As arising from the accelerated accumulation of sterling balances and the resultant acceleration in currency expansion, we posed, in the last issue, three important questions: (1) What are we to do with all this surplus sterling? (2) What are the plans that are to be devised for the successful raising of rupee loans to replace the redeemed sterling loans? (3) What are the steps to be taken to prevent or mitigate inflation? We dealt with the first question in **Indian Finance** of last week. We propose to deal with the second in the present number.

So far as rupee finance for sterling loans redeemed up to the end of 1941 is concerned, sales of rupee counterparts and subscriptions for defence loans have provided the entire funds needed. And as Sir Jeremy claims in his budget speech, the bulk of the floating debt incurred for the financing of the first instalment of repatriation has already been funded. With the repayment of the 2½ percent and 3 percent India sterling stocks early this month, there has risen the problem of rupee finance for the second instalment of repatriation. The plan now adopted and the general policy to be kept in view are more or less similar to those in the case of the financing of the earlier repatriation. It is obviously impossible and clearly inadvisable to attempt to borrow such large sums immediately from the market. In fact, as our first experience has taught us, there is no need to hurry this process unduly. The policy has been designed so as to avoid any immediate shock to the rupee security market, and to fund these obligations gradually as the market is able to absorb them. The Rs. 80 crores so far required for the financing of the sterling loans that have been presented for repayment have been found by the Government issuing rupee securities for this amount to the issue department of the Reserve Bank. Sir Jeremy estimated in his budget statement that he would be creating additional Treasury Bills to the extent of Rs. 39 crores for meeting the rupee commitments arising from the undated sterling loans. It seems, however, that the rupee securities for Rs 80 crores issued from the Reserve Bank are all in the form of **ad hoc** Treasury Bills. The intention is, presumably, to cancel **ad hoc** Treasury Bills from time to time as opportunity occurs; and the sale of defence loan will be resumed when conditions are favourable. This was the procedure which was adopted in the case of the last instalment of repatriation. There are full nine months during which the same procedure can be successfully adopted in the case of the second instalment. We have mentioned that the interval during which this may be done is nine months as the repayment of the 3½ percent India sterling stock is due to be completed early in 1943, and it is advisable to fund, before that time, the obligations incurred in connection with the repayment effected this month.

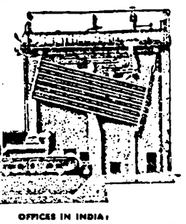
There is no reason to have any misgivings as to the successful completion of the funding operations in the course of 1942. It is true that, at the present moment, the giltedged outlook is unpropitious and there is hardly any demand for securities in the giltedged section of the market. It is also true that the two defence loans are quoting at a considerable discount below their issue prices and that, as a consequence, the sale of the second defence loan had to be withdrawn. But this is, in our opinion, only a temporary phase. We have had such setbacks and such extreme depressed conditions in the giltedged market in the months following the surrender of France and again in the months following the fall of Crete. After those crises, the market recovered substantially all the losses; and, on the eve of the entry of Japan into the war, giltedged prices were firmly maintained. This war has proved that the ultimate trend of giltedge is a shock-proof vitality. We have the fullest faith that, once the situaion in the Far East and in and around India improves with the arrival of American reinforcements, the full weight of which is bound to make itself felt by July-August, the depressed outlook of to-day will yield place to confidence in future prospects.

It seems, therefore, reasonable to assume that the funding of the obligations incurred in connection with the recent sterling debt redemption will have to wait till the autumn of this year. Meantime, the ways and means machinery has to be kept going with the help of makeshift devices. The Government are fortunate in having available to them a number of such devices. Reference has been made in these columns to many of these devices in various contexts. The principle to be kept in view is that the ways and means plans adopted for temporary purposes must be such as to continue to emphasise and confirm the cheap money policy of the Government and their policy and readiness to support the prices of giltedged securities. From this point of view, we fail to appreciate the reasons which actuate the financial authorities in allowing the present precipitous rise in the Treasury Bill discount rates. One of the most important indices of money market sentiment is the Treasury Bill discount rate. The heavy rises of recent weeks are likely to give the impression that the Government are no longer able to maintain a cheap money policy. Rapidly rising Treasury Bill discount rates cannot fail to have adverse effects on government securities. We, therefore, consider that the time has arrived to cry a halt in regard to the Treasury Bill rate. There is no point in continuing sales of intermediate Treasury Bills when these sales are hardly fetching anything. In the light of the poor bidding for tender bills, a reduction in the weekly offer from Rs. 2 crores to Rs. 1 crore is strongly indicated.



No purpose is served by forcing Treasury Bills on a reluctant market. Nor is it necessary from the point of view of the ways and means position of the Central Government. With the sensational rise in the price of silver in recent weeks, the Government must have been able to sell considerable quantities of silver. These sale proceeds must have been a welcome ways and means windfall.

From last week's return of the Reserve Bank, we have to gather that the Government reimbursed their cash position to the exent of Rs. 10 crores by the issue of **ad hoc** bills to the Bank. There is no reason why further issues of **ad hocs** to the Reserve Bank should not be made. Replenishment of the Central Treasury's cash balance by the issue of **ad hoc** Treasury Bills to the Reserve Bank rather than by forcing sales of Treasury Bills on an unwilling market is the correct procedure.



The Reserve Bank is expected to take rupee coin for Rs. 5 crores from the Government early next month. Considering that the stock of rupee coin in the issue department has sunk to below Rs. 30 crores, it is clearly advisable for the Bank to take as much coin as will bring the reserve of rupee coin to Rs. 50 crores. For, the maintenance of this reserve at roundabout Rs. 50 crores will inspire more confidence in the minds of the public. At the same time, it will help the ways and means position to the extent of Rs. 20 crores.

By these means the interregnum between now and July-August must be tided over. And, as we have said, the giltedged situation is bound to respond favourably to the success inaugurated by the advent of American reinforcements in full strength. Above all, it is necessary to emphasise that the intrinsic factors in the Indian giltedged situation are all for the maintenance of full prices. During 1942-43, the Reserve Bank will be accumulating sterling on a hydra-headed scale. This means that there will be constant and considerable currency expansion. Active note circulation is bound to go up by leaps and bounds. Deposits with banks will be piling up. The pressure of idle cash balances is bound to drive banks to increasing investments in government securities. The embarrassment of idle funds will prove a more decisive factor than fear-inspired political outlook. But the transformation thus envisaged by us may be delayed for some months. Till then, another avenue for cash replenishment of the Treasury is the initiation of the system of six months Treasury deposits from banks.

### Employment in Europe

The disappearance of the hard core of unemployment in Britain has been recorded long ago. War creates new demand for labour, and the unfamiliarity of India with the manpower question does not deprive one of the chance of calculating how far numbers or working hours have increased elsewhere. The difficulties of Germany are reflected in the demands made on Italy and other countries. The war effort in the Dominions can be measured by the parallel expansion of employment in industry. The absence of statistical information in India should be compared with the figures furnished by Palestine which records an increase in the numbers gainfully occupied and the number of hours worked in manufacturing industries. The stimulus to secondary industry, through war demand and the failure of imports, is clearly responsible for the increase in employment by 19 percent up to the month of March 1941. There should have been a further increase since and the hardships of citrus-growers should be offset by the gains to artisans of higher value as measuring Japan's war effort is the increase in the number of workers employed in Japan after April 1941. The increase may not be seasonal but organically related to the Fighting Services' demand for the accumalation of war supplies. Though civilian industry generally languished in Japan and the longer working day produced disappointing results, the increase in manufacturing activity has special significance, especially, in view of the open access to raw materials in the tropics.

The staggering increase in Canada's total employment is as much due to the war as Chilean expansion is due to the U.S. defence programme among Axis controlled countries only. Denmark showed a marked fall in employment, explained adequately by the loss of raw materials. Like agriculture, Danish industry was to a large extent dependent on outside support. Once that was withdrawn, depression descended. A very moderate increase in employent was reported by Switzerland in 1941 but the difficulties of Sweden's export trade are duly reflected in the pronounced variations in the index for employment. The ruralisation of Bohemia, like the development of secondary industry in a country like Chile, is a natural consequence of the war and of German preoccupations. It is manifest from the latest statistics published in the League of Nations bulletin that the recovery in dustrial output in Belgium has held. The fall in unemployment there is certainly striking enough to suggest that the Nazis are getting much out of Belgium while they can get little out of Denmark. In spite of the fact that Irish agriculture has shown little progress in wartime as the export in fat stock has suffered, there is a noticeable reduction in unemployment as measured by labour exchange returns. The limited progress made in Spain may be contrasted with the high stability recorded in Swedish unemployment. The progressive decrease in the number of unemployed in another neutral country, Switzerland must be associated with the draft on manpower or military service. It cannot be due to any marked development in industries which had lost markets like materials.

### Evacuation and After

India's Chambers of Commerce have recognised that the duty to succur the evacuee—or rather the returned emigrant—falls as much as on the Government as on the individual. Mr. G. D. Birla deplored only last week the indifferent arrangements made. It is only when Lower Burma became untenable that is was realised that the Indian minority in Burma faced a critical situation. Major-General Wood has since been deputed from the Supply Department to look after the repatriation side. It is not known how the Malayan Labour Department acquitted itself regard to the evacuation of Indians. The presumption is that estate labour was left to shift for itself because the Department was ineffective. A larger contingent of evacuees from Singapore than from Malaya has landed after the debacle at Singapore, but not all the so-called evacuees are Indians entitled to specific consideration. It would be a mistake to talk of Allied nationals brought in for no self-evident reasons as persons entitled to the same consideration as the domiciled community which is in the mind of advocates of sympathetic treatment.

A large scale exodus by land from Burma was reported in February and afterwards as well. It is known that 65,000 fugitives had come back to India by the middle of February. With the withdrawal of the decision against the use of overland routes by one of the strangest decrees of Fate there has been a major movement towards India. The trek from Prome has not been altogether untroubled for the local government has not guaranteed freedom from interference by the enemy or Fifth Columnists.

It is believed that at least a third of the Indian population has left Burma. To that extent the Burma Government may be pleased, but the situation is complicated by the urgent need for keeping artisans and others in Upper Burma. Relief funds started in India after Rangoon was raided can do little to help. The new Overseas Department which guaranteed frequent dissemination of news and little else has not made any impression on the problem. The Bengal Government's praiseworthy work in Chittagong and Calcutta which has been done as much for non-provincials as for Bengalees has not been supported by specific indications of Central goodwill. The Colonial office's promise of monetary assistance for British evacuees has not been productive of a similar offer of help from the Indian Government. Though the Indians in Burma are in no way comparable to the assisted emigrants who went to Ceylon or Malaya, the situation calls for careful analysis of the difficulties. No estimate is possible of the destruction of Indian property in Burma so far and of possible damage hereafter. Without any war damage scheme in operation the prospect of adequate compensation then is remote. The only cognate representation as regards assessment to income-tax made by more than one Indian Chamber of Commeree promises little relief to the majority. Admittedly the creation of a rehabilitation found with the allocation of one crore or so may meet the needs of returned emigrants who need a fresh start is the major need. As to the pensionary and other obligations of public authorities to Indian little can be said beyond indicating the clear need for a specific and reassuring declaration. Their problem is in the main, similar to that of holders of securities issued by quasi-public bodies in Burma.

### Air Mastery

The disappointment that may be occasioned by the absence of any reference to any outstandingly new types or new machines in the R. A. F. will be offset by the promise of a large scale offensive made by Sir A. Sinclair last week. In introducing the Air Force Estimates last year, the Air Secretary described both the Beaufighter and the Short Stirling—as famous or more than the Short Sunderland—best craft obtained yet for the Coastal Command. This year the Air Secretary was content to review last year's results and give an assurance that interference with Hitler's spring offensive would be the prime object of the R.A.F. The fighters for day and night use are the best that can be had, and they have been made available to Russia, according to Sir Archibald. Russia has seen and appreciated British aircraft before and after the R. A. F. Wing went over to aid the defenders of Moscow, but long range bombing is the immediate purpose for which Sir Charles Portal has redesigned the R. A. F.

The work of each Command was appraised and at least one fact was communicated to the public. The Channel ports are not available to the enemy who must reach Northern France only by rail or road. The transport problem will not be eased for Germany, while British convoys, enjoying the protection of the R.A.F., are doing their job all right. If the assurance concerning fighter protection in Burma is not borne out by events which testify to a lamentable but explicable lack of air power, Britain is capable of meeting direct invasion, as Ralph Ingersoll, Major Eliot and others who saw the Battle of Britain now declare.

Reuter's air correspondent has, however, stressed more recently the R.A.F.'s ability to attack Germany and impair her strength before the much-advertised spring offensive against Russia starts. Of that offensive and its scope, little is known even after Hitler's funeral oration. But the R. A. F. will put many a spoke in the wheel before then. The R.A.F. is still growing up. The U. S. A. turns out British pilots from the schools started. It is no longer dependent on the Empire Air Training Scheme alone. From the U.S.A. come fighter craft like the Curtiss Tomahawk and the Kittyhawk mentioned by name. Though nothing like the Bell Airacobra has come in quantity for the R.A.F. as yet the U.S. supplies of dive-bombers, which must be useful against the Japanese navy which now dominates the narrow seas around the Equator, cannot be ignored. The limitations of dive-bombing (another U.S. invention which has been pirated by its foes) were however described by Sir Archibald who was all praise for the heavy bombers. The Short Stirling, the D.H. Halifax and the Avro Manchester referred to as commendable types, coming out in bigger and stronger form will be the new A. V. Roe craft, the Lancaster, with great range and heavy load capacity.

Early this year, Sir Archibald mentioned that parity was definitely within reach. This month he has announced that the Germany. There is, however, the fact that the Luftwaffe is replacing its lost craft. A reported loss of 8.000 machines in two years of war left the Germans with a powerful striking force. If it has not appeared for action in the winter when the R. A. F. gave its answer for Coventry, Sheffield and Plymouth, it is perhaps being nursed for something big. Sir Archibald, in stressing the favourable factors had to meet the vigorous criticism of Sir Murray Sueter whose knowledge and experience of aircraft is unusually large. The latter urged that raids on Brest had not evidently affected the Schamherst and Gneisenau which went up the Channel in full speed.

### Agricultural Progress

Fruits and medicinal plants came to absorb the attention of the Agricultural Departments on account of the war. The causes and course of such interest are described in the 1940-41 report of the I.C.A.R. issued a fortnight ago. A research station was set up last year at Lyallpur to develop the production of canned fruits and vegetables for the Supply Department. To help the Indian manufacturer of drugs research into many medicinal plants has been undertaken. The development of pyrethrum has definite importance as Yugoslavian supplies are no longer available. It is hoped that the detaled survey and classification in progress over five years will help to stimulate the production of drugs. In the Punjab, for instance, "Hyoscyamus niger" was cultivated and the alkaloid content was ascertained to be higher than the B.P. average of 0.5 percent. The extention of the herbarium and the investigation into poisonous and medicinal plants was carried out with the help of the School of Tropical Medicine. A special allotment of Rs. 5,000 for urgent work in medicinal plans attested the Council's interest in the matter of promoting the manufacture of drugs previously imported.

Among the miscellaneous crops studied and reported upon was cardamom. Mr. Mayne who is connected with the Planters Association of Southern India reported in favour of an experimental station in the Anamalai Hills and the setting up of two sub-stations in Travancore and Mysore. According to Mr. Mayne the evolution of a type resistant to thrips should be the goal of resarch and unitary control was not favoured. The Council declined to consider further research on cinchona on the score of expense. Today after the loss of Java there must be ample reason to reconsider the decision. Special financial assistance must be provided in this case and Bengal like Madras must make a determined effort to advance the cultivation of cinchona. The I.C.A.R.'s practical interest went far beyond the grant of routine advice and financial assistance. The horticultural side showed remarkable expansion and experimental work began on the production of citrus products like squashes candied peel and citric acid. Canning experiments made progress at Quetts and the Council considered the desirability of setting up a Fruit and Vegetable Preservation Station for India like that at Campden. As the requirements of the Defence Services had to be dealt with, the Lytllpur station was set up to work in conjunction with the Supply Department. It is devotted to he examination of samples and to undertake semi-commercial trials with products and processes at the instance of the Supply Department or otherwise. Work has to proceed also with a view to determine fair prices for products tendered. The Punjab Department of Agriculture was found ready to help in creating the nucleus of a station as from June 1941.

A commercial fibre which came to the fore was sum hemp. Schemes proposed in Madras, Bihar and C. P. made indifferent progress. In Bengal alone appreciable progress as in the case of flax has, been recorded since. Since Animal husbandry came more than once into the picture India's cattle, their food and habits like their diseases, were studied. A noteworthy departure was the attempt to develop the breeding of Persian lamb in the N.W.F.P. mainly by getting Karakul rams of pure breeds from Afghanistan .The circumstances of the wool trade also special attention. The survey of sheep in India was recommended and the development of quality wools was considered possible only on the basis of better breeds. The I. C. A. R.'s work for sugar entailed the making of special grants made possible through the provision of Rs. 3 lakhs for research work by the Government of India. The progress

of Agmark products and the success of grading schemes are described, though the Council states the Government intends to reduce the grants to the Provinces year after year.

### Australia's Sugar Industry

A Queensland official provides in **Australia Today,** a handsome publication describing the moral and material progress of the Dominion, an account of the sugar industry. The account is specially interesting because Queensland is the only Pacific sugar producers unaffected by the war. In the coastal strip on the Eastern seaboard of Australia is found a fertile plain, well-watered and endowed with a tropical climate. Sugar is the logical crop for such a region, and if the emigrant from New Guinea has thriven in Queensland it is not at all surprising seeing that in 1823 sugarcane was tried out in Port Macquarie N.S.W. Queensland reports continuous cultivation along the Brisbane valley from 1863. Today sugar is certainly one of Australia's major industries.

Imported native labour was the basis of the plantation industry in and after the nineteenth century. But the repatriation of Kanakas began after federation and white labour predominates in this branch of agriculture too. Mr. Kerr who is the Director of the Bureau of sugar stations records the growth of the industry. Cover crops are common and the free use of artificial manures is a mark of this branch of Australian agriculture. Irrigation is quite common rationing is certainly current. The advantages of soil and climate are assuredly reflected in the outturn per acre. Mr. Kerr states that crops of up to 50 tons per acre can be produced. The present day average yield is just over 20 tons from which are manufactured three tons of raw sugar. The estimate drives home the contrast between the poor Indian yield and the high Queensland average. The modern sugar mill came rather late but Queensland has been thorough in going in for factory production of sugar. Mr. Kerr indeed insists that an upto date sugar mill costs about £500,000 complete with its tramway for cane harvesting. The production of raw sugar for reinfining in distant cities or elsewhere is the accepted principle. Refining as we know consists in washing the sugar to remove the adhering molasses and finally dissolving the purified crystals to give a straw-coloured liquor. This is filtered through a tower filled with activated charcoal which completely decolourises it. Boiling to a syrup and granulating, as in raw sugar manufacture, provides the familiar pure crystals. Golden syrup is a by-product of the refinery.

The most distinctive mark of the Queensland industry appears to be the full use of by-produces. It is claimed that the industry which supports 30,000 families make Australia self-sufficient and provides sugar at a price which is just 25 percent above the 1914 level. In regard to by-products, the claim to national importance is stronger. Bagasse comes out as fibre board apart from being used as fuel for boilers. A large factory in Sydney makes building board from bagasse. A big demand for what is called Cane-ite has emerged and it is likely that wood or coal will replace bagasse as fuel. Fertiliser from the mud got out of cane juice is highly prized by farmers. As cattle feed also molasses has definitely established itself and it is no longer deemed advisable to use it as fuel. As the source of power alcohol, molasses is now all-important. Indigenous motor spirit is made through the admixture. In 1927 there was built a distillery at Sarina near Mackay: in 1933 followed legislation making the admisture of alcohol with patrol compulsory in Queensland. In the southern states also distilleries using Queensland molasses have been put up. Australia used to take about 350 million gallons of patrol owing to the war it is deemed necessary to use molasses etc., for making liquid fuel. On an average a ton of molasses gives 60 gallons of alcohol; though raw sugar gives more there is the difference in fast cost. Out of the estimated production of 140.00 tons of molasses Australia can get only 7 million gallons and that is why other things such as potatoes, wheat etc., are being examined in connexion with power alcohol manufacture. Queensland sugar industry, however, retains its original importance in its home for in twenty years the industry has made amazing progress. The annual harvest of 6.33 million tons of cane in 1939 was a record. The sugar production came to 928.000 tons as the recovery percentage had gone up and the average outturn of cane per acre had risen by over 50 percent to 23 tons as between 1920 and 1939. Australia exported in 1939 as much as £5.65 millions' worth of sugar to other countries besides having lowered the price of raw sugar substantially through the development of the sugar cane crop and the perfection of manufacturing methods.

### Funds For Rural Welfare

Last month was made available a detailed statement of the work done in the Provinces with the help of the Central Government's grant for rural reconstruction. The new system of contributions by the Centre was inaugurated by Sir James Grigg and the handloom industry has not been the only beneficiary. Up to March 1941 on the basis that further allotments would come out of the balance of Rs. 45.64.569 held at the credit of the Central Fund for rural development. The second contribution made in 1936-37 was larger than the first made in 1935-36. The Province that spent most out of the grants was Bengal. Rural water supply was the chief object of the schemes adopted in Madras: in Bengal it was the establishment of Union Board dispensaries, the improvement of water supply and grant to Sriniketan. The second most important object allotments in Bengal was the execution of minor drainage and flushing schemes. Out of the second grant, Bengal assigned as much as Rs. 6,66,700 for the improvement of rural water supply. From the first grant itself financial reinforcement for the Ministry's nationbuilding schemes was possible through grants for the improvement of fodder crops, and poultry-breeding. Except in Malda, Comilla and Noakhali, the poultry scheme was successful and better types an familiar enough. Poultry societies are being formed says a recent report. The development of coir spinning and weaving was a cognate object of the Bengal rural development schemes. After the intial training and demonstration made from Central grants, the Province has embarked on the further development of the coir industry. The Industries Department has reported progress in 1940-41. Playing fields for village schools have also been provided out of the second Central grant. The general

improvement of rural life has been undertaken through clearance of water-hyacinth, jungles and re-excavation of khals and filling up of ditches.

The Punjab has put into effect more diversified schemes, and one of them is the improvement of tanning while sheep development in the southwest Punjab is covered by an allocation from the second grant but given up, though provision was siubsequently made out of balances held over from the first grant. The consolidation of holdings has long been a distinctive feature of rural development work in the Punjab. Up to March 31, 1941 the total area of 241.004 acres had been consolidated and proper provision had been made in the reconstructed villages for a vigorous communal life. The reclamation of ancient waste has not been overlooked either, and the rural community's income has been augmented. The cinema and the radio have also been brought into play and the British Government made available fair films for general exhibition while the Rural Reconstruction Department produced seven films on its own. Two cinema parties were continuously on tour. And the war publicity side was not neglected by having shows which covered twentyeight districts. Pictures and posters with a rural bias were turned out to keep alive interest in the public in the village uplift question and this side of rural development has become partly self-supporting. Child welfare and maternity work was advanced through the appointment of a Lady Assistant to the I.G. of Civil Hospitals to report on what could be done to extend medical relief for women in rural areas. Three centrally administered areas namely Delhi, Ajmer-Merwara and Coorg obtained separate grants of Rs. 1 lakh each.

### New Route to China

If relations with China do not invite much comment after the reclame of China Day, India does not overlook the significance of the new Assam road. Assam is no longer the point of departure for Tibet. It is the only province for the new alliance typified by the formal flag day. Now that the Nipponese mount guard over the southern stretch of the Burma-Yunnan road added interest is given to stories of the road that links Assam to Szechuan. Three years ago the Chinese apprehended a Japanese move against Burma and strove to react the Indian railhead at Sadiya in Assam. From India supplies to China will go by rail to a point which is remote from the invading columns and wholly safe from submarine attack. The mountainous country has been overcome by Chinese road builders, but a more important suggestion is for a new air service by way of Chengtu. While the old Silk Road may be in commission, still there is nothing to suggest that Soviet Russia can help the Chinese. What were called the life lines of Free China-routes from Indo-China, Russia, Burma—all these three avenues are closed; so a speedy service is desired and the example of the **Lufthunsa** is given to prove that political and economic cooperation can come from the starting of a service to cover the distance of 700 miles between Sadiya and Chungking. Fortunately the road between Chungking and Kunming is untouched, and the resources of the rich southwest are available to Free China whose minerals are now half precious to the Allies owing to the loss Malaya, the Indies and Lower Burma. The new Assam route can be easily described as the shorter segment of a loop of which the lower half is the Lashio-Kunming Road. That highway looked to Rangoon and with the Japs already at Prome and reaching out to Bassein, the last surviving port on the Bay linked to upto Burma there is no possibility of retaining contact with places across the Bay. The Chinese, gifted with realism, thought of driving a road across the wilds towards Assam. Assam alone can replace the oil which China needs more acutely than India and the most vital point in the ABC triangle—Assam, Burma, China—is obviously Digboi in Assam. As a subsidiary of the Burma Oil Combany, the Assam Oil Company is more important now than when it was in the news three years ago on account of the prolonged strike.

## Forty-Seventh Report of the Board of Directors

GENTLEMEN,

The Directors beg to place before the Shareholders the Balance Sheet and Profit and Loss Account for the year ended 31st December, 1941.

| | Rs. | A. | P. |
|---|---|---|---|
| The Net Profit for the year, including the sum of Rs. 8,12,319-0-2 brought forward from the previous year's account, amounts to | 49,11,813 | 7 | 0 |
| The following amounts have been appropriated to the undermentioned purposes:— | | | |
| An ad-interim Dividend was paid for the half-year ended 30th June, 1941 at the rate of 6 per cent per annum, free of Income-tax on 6,72,528 shares absorbing | 5,04,396 | 0 | 0 |
| Amount transferred to Reserve and Contingency Fund | 7,00,000 | 0 | 0 |
| Amount transferred to Bank's Investments in Government and other Securities | 4,00,000 | 0 | 0 |
| Amount provided for Taxation | 8,00,000 | 0 | 0 |
| Amount transferred to Sinking Fund in respect of Lands and Buildings | 3,00,000 | 0 | 0 |
| Amount provided for Bonus to Staff | 3,00,000 | 0 | 0 |
| | 30,04,396 | 0 | 0 |
| The balance of Rs. 19,07,417-7-0 the Directors propose to dispose of as follows:— | | | |
| To pay a final dividend for the half-year ended 31st December, 1941, at the rate of 8 per cent per annum, free of Income-tax, i.e. Re. 1 per Share on 6,72,528 Shares, (making 7 per cent for the whole year), which will utilize | 6,72,528 | 0 | 0 |
| To pay a Bonus to the Shareholders at the rate of 2 per cent per annum, i.e. As. 8 per Share, free of Income-tax | 3,36,264 | 0 | 0 |
| To carry forward to next year's account | 8,98,625 | 7 | 0 |
| | 49,11,813 | 7 | 0 |

The Bank's business during the year showed satisfactory progress.

During the year under review, seven Branch Offices and seventeen Pay Offices were opened at various centres.

During the year the Chairman of the Board, the Hon'ble Sir H. P. Mody, and one of the Directors, the late Rt. Hon'ble Nawab Sir Akbar Hydari resigned their seats on the Board on their being invited to join His Excellency the Viceroy's Executive Council. It was a matter of great pride and satisfaction to the Directors that two of their colleagues were appointed to such high and exalted offices though the Directors at the same time keenly felt the loss of their wise guidance and advice in the deliberations of the Board.

It was indeed unfortunate that the Rt. Hon'ble Nawab Sir Akbar Hydari did not live long after assuming his high and responsible office. The Directors place on record their deep sense of sorrow at the death of their erstwhile colleague on the Board, and desire to record their appreciation of the great and valuable services rendered by the deceased to the Bank during the period he was on the Board and in particular his great help and guidance to the Bank's Branches in His Exalted Highness the Nizam's dominions.

The Directors wish all success to the Hon'ble Sir H. P. Mody in his new office.

In place of the Hon'ble Sir H. P. Mody, Mr. Haridas Madhavdas was appointed the Chairman of the Board, and Mr. H. F. Commissariat was invited to join the Board to fill up the vacancy. Mr. Commissariat retires under Article 86 of the Articles of Association, and you are requested to re-elect him.

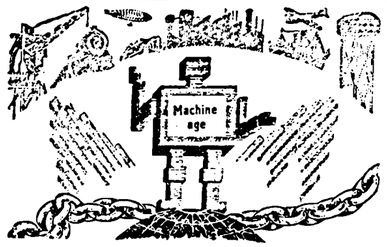
In recognition of the services rendered by Mr. H. C. Captain, the Directors thought it fit to invite him to join the Board and to appoint him the Managing Director of the Bank, and you are requested to confirm his appointment.

Three of your Directors, namely Mr. Nurmahomed M. Chinoy, Mr. Bapuji, D. Lam and Mr. Dharamsey Mulraj Khatau retire under Article 94 of the Articles of Association read with Regulation 78 of Table "A" of the Indian Companies Act. They are eligible for re-election, and offer themselves accordingly.

The Shareholders are requested to appoint Auditors for the ensuing year, and to fix their remuneration.

HARIDAS MADHAVDAS, *Chairman.*

*Bombay, 19th February, 1942.*



## BALANCE SHEET AS AT 31st DECEMBER, 1941.

### LIABILITIES.

# Clive Street Gossip

"I must have liberty
Withal, as large a charter as the wind
To blow on whom I please."
—(As You Like it.)

The pride of place in Sir Chunilal Bhaichand Mehta's review of the Indian economic situation is given to the concrete scheme he puts forward for the maintenance of adequate supplies of food grains and fodder crops in the country. He points out that the serious shortage in respect of essential food supplies such as rice and wheat for civilian needs is growing more and more menacing. Popular discontent is more keenly roused by food shortage than by any other cause. When people's minds are so unsettled and when rumour of every kind is calculated to emphasise the uncertainty of the future outlook, any serious shortage of essential food requirements may prove the last straw on the camel's back. Food riots have already been reported from some towns in South India. The price of rice has gone up everywhere more than 50 per cent. Wheat flour has been practically unobtainable for a few days in some places. The poor man's daily life has been made dearer by the terrific rise in the price of coal and by the more costly prices of kerosene oil and matches. It is only a small proportion of the poor class that is in receipt of anything like dearness allowance. Even such dearness allowance as has been granted is totally inadequate for the enormous rise in the cost of living. In preference to the anxious political situation, it is of the utmost importance to preserve the morale of the masses. One of the essential needs for the upkeep of that morale is adequacy of the supplies of those requirements which make up the daily budget of the lower middle classes and the poorer classes.

Sir Chunilal has, therefore, rightly stressed on the urgency of the problem of food supplies. It is fortunate that India does not have to depend upon imported food stuffs, except with regard to rice, of which she used to import considerable quantities from Burma. With Burma's rice cut off, the most urgent problem is extension of the acreage under rice crop in India. The problem in regard to supplies is firstly civilian needs, secondly supplies for the Army and thirdly storage of food stuffs for an emergency. Action in regard to the stimulation of the growth of food stuffs has to be taken without any delay as whatever plan is decided on to augment the output during the coming agricultural season must be put into effect long before the monsoon months set in this year. The monsoon begins generally in the first week of June. We have thus hardly two months within which to decide on the plans, to create the machinery for the execution of the plans and put them in motion. Sir Chunilal advises the convening of a Production Conference at once; the appointment of a Production Executive; and, later, the setting up of a Production Council. The Production Conference must consist of the representatives of the provincial governments as also the Indian States and Directors of Agriculture, in addition to the representatives of the Central Government. This Conference should chalk out a definite plan of action with a view to secure the following objectives:

1. To explore the ways and means of inducing the cultivators to increase the area under food-grains and fodder crops;
2. To launch a vigorous propaganda in the countryside to persuade the cultivators to grow more food-grains and fodder crops, as agreed upon;
3. To examine and to provide adequate facilities for storing reasonable quantities of foodstuffs; and
4. To see how far regional self-sufficiency in respect of foodstuffs as between different areas could be attained as a safeguard against interruption in the transport system.

Once the plan of action is decided upon, the Production Executive must be set up, charged with the task of executing the plan and watching its progress with a view to make necessary adjustments from time to time. Sir Chunilal suggests the advisability of associating with the Production Executive a Production Council consisting of members of the Legislature and representatives of Indian trade and commerce with a view to enable the general public to know the steps that are being taken. The Production Council will be a kind of liaison between the activities of the Government in regard to the production drive and the general public and will thus play an important part in allaying unnecessary panic. It is now clear that the cotton, jute and sugarcane crops will have to be greatly curtailed. What are the alternative crops that are suitable in these cases? Sir Chunilal refers to the lead given by the Bengal Government in the matter of encouraging the production of rice in place of jute. While the area under jute during 1941-42 was curtailed by 3,434,000 acres, the area under rice has increased by 3,078,000 acres in the same year. Obviously, there has to be extension of this change-over to rice in the case of other Provinces. Sir Chunilal also refers to the availability of

land which may be regarded as suitable for cultivation but remains altogether uncultivated. The pressure of the rural population on cultivated land is steadily increasing; and the position as to food supplies under war conditions has intensified the pressure. It is, therefore, imperative that whatever land is suitable for cultivation but now remains uncultivated, must be forthwith brought under the plough. According to the 1938-39 figures, ten million acres of land may be said to be suitable for such immediate cultivation.

---

Sir Chunilal, who, really speaking, is a specialist in cotton and bullion, currency and exchange, transport and investment, has given a secondary place to his own subjects and raised the question of Production Drive to the first place in the programme of immediate action. Sir Chunilal has put forward concrete proposals which are comprehensive and eminently practical. I know Sir Ramswami Mudaliar has been giving his attention to the various proposals connected with India's agricultural production and supplies of food stuffs. The Hon. Mr. Sarker, as the Member in charge of the Agricultural Research Department, has also given great thought to the problems connected with alternative crops. Considerable data have been collected; and it now remains for them to launch a production drive without one moment's delay. The morale of the civilian population is bound up with the success of this drive; and, as we know, the morale of the civilian population in this war is as important as the fighting power of the defence services.

Unmixed satisfaction will be the dominant feature of all observations on the reports and accounts of all banks of Indian domicile. Whatever be the complications produced by the war for Exchange banks, our jointstock banks are not likely to look back. That is a matter for supreme satisfaction because anything like absence of confidence in the banks will make the defence of India even more difficult than it is. Everybody will agree that the financial front is very well held.

To that happy condition Indian banks have made an immense contribution. I am fully conscious that Government is now able to appreciate what has been done for defence loans by banks independent of their constituents.

---

India's banks have been in on the financial side of war effort in a notable degree, without neglecting their own legitimate interests and those of the country. Others grouse, but no banker makes a complaint. He has provided the essential grease for all trade and industry, and rests content with that. It does mean that long-term considerations are absent. How carefully and rapidly banking development has proceeded in the war period can be seen from the usual statistical tables relating to banks. Too ponderous a theme for my discursive survey, I should say, and proceed to illuminate the major point as to the high stability and accelerated progress in the war period from the details published in the formal statement of the Central Bank's affairs as on December 31st, 1941. The first full year of Mr. H. C. Captain's term of office as Managing Director is remarkable in every way. Seven branch offices and seventeen pay offices were added. Under new direction vigorous expansion was rendered possible, primarily because the Central Bank never rests on its oars. I suspect it never can. The impulse to progress never languishes. It may be readily said that no bank has obtained the same significant increase in deposits. In a year that has been marked by various lapses and drawbacks, the Central Bank attracted over 9 crores in deposits of all descriptions including fixed deposits and cash certificates. I should call that a real achievement, and if it were not for the hesitation noticed towards the end of December, attested by too ready withdrawals of cash, I believe that the balance sheet total would be considerably over Rs. 50 crores. The forties however have been avoided. A year ago the balance sheet total was Rs. 38.18 crores. The latest published statement reveals that it has risen to Rs. 50.12 crores. It takes some doing, as everybody will agree, but the Central Bank is more than wise for its years, more than courageous for its age, more than skilled for its calling. I am more than glad to commend the outstanding marks of progress measurable as usual by the rise in current and other deposits from Rs. 21.63 crores at the end of 1940 to Rs. 29.29 crores as shown in to-day's advertised statement. Fixed deposits and cash certificates are also up by 1¼ crores to stand at Rs. 12.03 crores. The Central Bank's continuously growing influence in the banking world is attested by the large increase under sums due from other banks.

---

Even more symptomatic of the leadership enjoyed by the Central Bank is the way in which Advances and Bills have risen in a single year from Rs. 13.36 crores to Rs. 18.85 crores. The rise of 5½ crores during a period when banks generally reported slack conditions and reduced trade demand for funds proves over again that the seeds of expansion are always there. External factors, as I repeat, cannot affect an institution like the Central Bank. The sap keeps rising and flower and fruits are always in season because the roots are strong and well nourished. To break away from the metaphor, I should perhaps draw attention to the drop in cash balances over the year. You can draw what conclusions you will but I insist that the 6.72 crores against 41.3 crores under Deposits means a cash ratio of 16 per cent. or over. More than high, in my opinion for a bank with the resources. Vision and management associated for years, nay decades, with the Central Bank, help in every way. Some will say that the dominant features are generic. All banks got more deposits, invested more and held bigger cash ratios. But the story does not end there for the uniqueness of the Central Bank is reflected over again in the increase of over 10¼ lakhs in the net profit over a year shown in the accounts for 1941 at Rs. 40,99,494. It is true that this increase goes to strengthen the funds. Typical of the Central Bank's vision and prudence is the transfer of Rs. 4 lakhs to the Bank's investments in securities. I nearly forgot to state that the Bank held Government securities valued at about Rs. 17.5 crores. A year ago, the total was Rs. 10.3 crores. Plainly progress, or rather extensive support for the Government as borrower.

The admirable distribution of the usual increase in deposits between investments and advances will certainly excite attention and one more feature of the latest accounts calls for notice. I must refer to the noteworthy increase in bills discounted, up from Rs. 1.32 crores to Rs. 2.69 crores. The Central Bank is getting its full share of such prosperity as is generated by the war.

---

Every time I reflect on the growth of the Central Bank I feel that Sir Sorabji and his colleagues builded better than they know. Five full years and the Central Bank has left all the other banks a long way behind. Tradition may account for it, but mangement alone will explain it. Confidence is being nursed, with results creditable to the depositor and to the Bank alike.

*(From Our Correspondent)*

*New Delhi*, March 17.

NEW DELHI is again on the tiptoe of expectation. So well had the secret been kept that not until the actual announcement was made by Mr. Churchill himself in Parliament was it known that Sir Stafford Cripps was coming to India with the Cabinet's conclusions. According to New Delhi talk Sir Stafford may be expected here this weekend and as he does not propose to stay in India longer than three or four weeks, will plunge into his work as soon as he arrives. Many references were made, in the course of the debate on the Finance Bill in the Assembly, to the Cripps Mission. That Sir Stafford enjoyed the confidence of all classes in this country was clear from these references, but with the lessons of past experience before them, Assembly circles could not help being cautious even in their optimism.

A happy lead was given by the Viceroy himself, for in his address at the Princes Chamber His Excellency welcomed Sir Stafford as a trusted friend and statesman upon whom the country could rely. In his speech, the Chancellor of the Chamber the Jam Sahib of Nawanagar, appreciated also the step taken by His Majesty's Government and said: "The Indian Princes have on several occasions publicly associated themselves with the general desire to secure for India the fullest freedom and the highest status under the aegis of the British Crown.

The success of the Cripps Mission undoubtedly depends on the actual proposals which on behalf of the British Cabinet the Lord Privy Seal is bringing with him to India. But if that can be regarded as a good augury for the future, the friendly reception which awaits him in this country from all parties and communities is a matter for particular satisfaction. Mr. Jinnah did not take part in the Assembly debate, but his deputy was guarded in his reference to the Cripps Mission—saying merely "We can afford to hope that all will go well." Though no idea is yet available of the Cripps plan, there is already a good deal of political activity in New Delhi. The Princes are preparing their case in the light of their old demands regarding treaty obligations. The Indian Members of the Viceroy's Council are also engaged in examining various formula for ending the deadlock. As one of them told me, "We cannot allow the Mission to fail." The aim in view is not merely an interim arrangement for the war period but a definite understanding on the future to serve as a "just and final solution."

Few indeed were the matters, directly concerning the Finance Bill, which were raised in the course of the Assembly debate. One point raised referred to collection of income-tax. More than one speaker referred to the losses of Indians in Burma and Malaya—the total disappearance of their business, property, and other sources of income in those areas—and appealed to the Government to suspend assessment proceedings and collection of taxes in respect of incomes from Malaya and Burma. In this connection a deputation met the Finance Member to-day and put before him their case for relief. Something is expected to be done in this direction as only postponement of assessment and collection is asked for. Another important question discussed was the advisability of starting a separate Department of production all non-official parties including the members of the European Group have supported this proposal. The reply of Mr. Jenkins, the Supply Secretary, was that a big change like this of bifurcating the Department, when already the need for experienced officers was keenly felt, might lead to administrative chaos. On the other hand members like Sir Frederick James were opposed to the principle of combining the functions of supply and production and said that if a separate Production Department were started, it might be possible to speed up production—both on a long-term and from short-term considerations. In view of the general complaint that the production side is not being given sufficient attention, there is little doubt that the suggestion made in the Assembly will have to be seriously taken note of by the Government.

Two important conferences have just been called by the Government of India. The Supply Member, Sir Homi Mody, is meeting representatives of Provincial Governments, Controllers of Supplies and officers of the Directorate general of Supply and the Directorate-General of Munitions Production on Monday next to discuss ways and means of securing the maximum possible utilisation of small scale industry for the production of war supplies. Hitherto much of the Government's activities were in the direction of getting organised industry into full production, but the time has now come to seek other fields. The definition of "small industry which the Government has given in a press note is—"those producers of manufactured goods whose circumstances are such that they cannot without special arrangements undertake the execution of Supply Department contracts. As the Government's view is that the machinery required for planning production in this field can best be set up through official agencies like the Provincial Departments of Industries and Co-operative Societies, a tentative scheme on these lines has been sent to Provincial Governments. Equally important is the conference on April 6, convened by Mr. N. R. Sarker, education member, of Provincial and States representatives to plan increased production of foodstuffs to secure regional self-sufficiency.

Sir Jeremy Raisman's reply to the general debate in the Assembly on the Finance Bill showed his usual desire for accommodation and friendliness in his relations with non-official members. He devoted considerable time to explaining the actual position with reference to Lease and Lend purchases from America. He said that non-official members were wrong in thinking that the sum of Rs. 34 crores included in the Budget as the cost of these purchases was all in India's account. Most of it he said, were intended to be sent to overseas fronts and would therefore be debited to His Majesty's Government. The sum which is likely to be actually charged to the Indian exchequer would, he anticipated be Rs. 50 lakhs this year and Rs. 150 lakhs next year so small compared to the total Defence expenditure of Rs. 133 crores that it neither affected the taxation nor the borrowing programme. This helped to satisfy the House on this important point, for there was an impression even among experienced and well-informed members like Dr. Kunzru that if these purchases from America were treated on a credit basis without any immediate effect on the revenues, there would be no deficit at all either this year or the next. Another important assurance given by Finance Member was with reference to the reserve fund which is to be built up for the rehabilitation and re-equipment of a number of national industries from the excess profits tax collections. Many members asked for further details of the conditions proposed both for the utilisation of the fund and the payment of the Government's share. Sir Jeremy assured the House that the Government had an open mind on the subject and would welcome suggestions from representatives of commerce and industry. In order to give some time to the Commerce Member and the Post war Reconstruction Committee to go into the question, the Finance Member has agreed to keep the offer open till the end of June.

There have been a number of official changes this month in the Government of India's Secretariat. Mr. C. M. Trivedi, who was Chief Secretary in the Central Provinces Government, has been appointed Additional Secretary in the Communications Department. As. Mr. S. N. Roy will be officiating as Member when Sir Andrew Clow proceeds on leave next week, Mr. C. M. Trivedi will soon be Secretary. The Civil Defence Department has a new Joint Secretary, Mr. Symons, Mr. M. P. Pai who was Coffee Controller, has joined as Yarn Commissioner in the Commerce Department. Mr. Turner is officiating as Additional Finance Secretary as no permanent appointment has yet been made. Mr. Targett has become Director General of supply vice Major General Wood who has rejoined the Defence Department.

((From Our Correspondent)

*Bombay*, March 17.

A VERY recent report as to Government buying of cotton in upcountry markets has led to a very mild revival in local prices. The slump has been arrested and the disappearance of long support has not prejudiced the price level. But the cloth market is in poor condition as before. There is a certain amount of pessimism after the fall of Rangoon. The level of cotton prices in New York has no bearing because the Indian Government cannot go bald-headed for farm relief. It can try tentatively to cure a severe slump. It has no ingrained notion of fair prices and normal profits for the grower. The war danger is not to be ignored in view of the exodus from Bombay. The investor has lost faith in cotton as in other commodities. The Ministry of Food may be buying groundnuts, but people here talk knowingly about intensified rationing in Britain. Moreover, the absence of any specific answer to demands for a statement of policy as regards scorched earth tactics makes the millowner as reluctant to stock up as the average trader. The uncertainty provoked by defeats can be met only by an assurance that trade will not be allowed to suffer undue loss whatever be the fate of troops or Government property. The present war risks scheme is not demand adequate, and the cotton market wants a comprehensive assurance as to proper compensation. For the moment, prices are drifting helplessly downward. The share market too is in the grip of a defeatist mood, and only the most resolute investors are takers of prior charges and that below par. The reports from Wall Street as to U. S. opinion about crop control and farm prices are absolutely overlooked, and such fond belief as may be produced by the disappearance of East Indian kapok does not keep the cotton trader alert here.

The dismal outlook for commodities has neutralised the hopes raised by the relative leniency of the budget. Dr. Henry Grady who has visited Bombay more than once will be a member of the new U. S. mission to India. The Government is going to play the host and the Indian Purchasing Mission's head will come to India along with the mission led by Colonel Johnson who is a lawyer with experience of both management and labour. He was in the War Department as Assistant Secretary, Dr. Grady has conducted many investigations for the President after having been Assistant Secretary of State. He was U. S. Trade Commissioner in London and his knowledge of Europe has been fortified by association with the League of Nations Committee on Raw Materials. The President, of the U. S. society of automobile engineers is also arriving as a colleague of Col. Johnson. Mr. Herrington is a civil engineer with close knowledge of Government construction. He, too, is connected with enquiries launched by the U. S. Government. Factory design is a subject in which Mr. Beyster is known to have specialised. The president of an engineering company will add to the strength of the mission. There is only one official of a big steel company the Illinois Steel Corporation who is an expert in personnel administration and training. Mr. Dirk Dekker is expected to push forward new schemes for adding to trained manpower for new factories.

The mission will be admittedly smaller than the Roger Mission. If its objects are more limited, its success will be more immediate. That is the feeling which has taken the place of the suspicion generally manifested after it was known that a supply mission, without any indication of direct aid for India was under consideration in the U. S. A. The views of the Indian business community were hardly cordial and after the debacle of the Eastern Group Council there may be a place for pessimism. The general belief here is that Japan has broken the Group and India must fend for herself. There is no use pretending that the Labour Government in Australia is particularly interested in Indian happenings or Rhodesia's development. The Eastern colonial empire has disappeared and the Supply Circle in Burma is a joint memory. The alliance with China can hardly procure the same results as co-operation with the Eastern Group. In the first place, there is very little trade with China and the outlook is obscure though the new road may be in commission as described by Mr. T. V. Soong and Assam's Governor may be impelled to talk hopefully. There is also the fact that China has little money beyond the recent Anglo-U. S. loans and cannot send out much by way of goods, needing as she does all she produces for herself.

Other Provinces report surplus budgets. Here also the Adviser regime is anxious to gain a good name by reducing the property tax. There was a brief reference to the probable surplus owing to the rise in excise revenue. So it is believed that the new urban property tax will be lowered again. Prohibition and the property tax last Federal Court judgment, is not at all likely to be broken by, the Courts Charitable trusts hit previously by the Property Tax are to be shown more consideration. This, of course, is no new departure in policy as Government already had to help educational and other trusts by lightening taxation. Bombay will benefit like other provinces from the expansion of income-tax revenue. There is the usual story about increased expenditure on education, etc. How much Bombay is going to spend on A. R. P. is a more interesting question. Sind put up only Rs. 10 lakhs and it is not as though Bombay has to spend money on the scale of Bengal on this.

Labour Legislation is being modified to suit the Ordinance promulgated recently against lightning strikes. The Ordinance is designed to secure two things. Without fourteen days' formal notice any strike is *ab initio* illegal. Moreover, if conciliation proceedings have begun, there cannot be a strike for two months. Delay is the essence of the Ordinance which covers all trade disputes. It is meant to stabilise industrial relations. Employers are sure to welcome the change in law while the provincial Government, if it is intent on promoting harmony, escapes the responsibility for preserving law and order. Trade unions and their officials have been told promptly of the change in law. Breach of the new rule means three years in jail for the striker. The cost of living or any other excuse will not suffice, but Government has again indicated that a fair deal to the worker is still the chief object of industrial policy. The situation in Madras underlines the timeliness of the Ordinance which is an assurance to war industries that Government is interested in the execution of the contracts they hold.

The Belapur Company came into the news last month after the report that it sold sugar of high quality to Government at a fairly competitive price. It is known to be about the only Indian producer that can compete on level terms with foreign sugar manufacturers. In order to build up an export trade in Indian sugar, the Company voluntarily took the offer to sell sugar to Government. The home market is, of course, definitely more remunerative and sales to Government were made merely because of a desire to help in the war effort. Belapur's proverbial efficiency is now higher than ever after the new factory was opened last week. A large gathering accepted the invitation of Sir Joseph Kay to see the remarkable work done at the factory which is situate on the Company's estate of 4,000 acres'. There are other companies which grow their own cane but they have not the Belapur reputation. Improved types and regular irrigation have raised the average yield of cane to 45½ tons per acre. The company employs at present 4,000 men. The new plant will deal with 1,000 tons per day and produce 120 tons of sugar using steam and electricity the machinery is both efficient and up-to-date. Belapur gets its cane by trolley to the crusher and the percentage of recovery is far above the average for India. The Company retains its importance as the chief source of the material needed for the Nasik Distillery. Having its own laboratory, the Company has concentrated long on manufacturing efficiency. Distinctive marks of enlightened administration are the well-equipped hospital on the estate and the school for the children of employees.

The G. I. P. is doing all it can to handle the flight from Bombay. It began last week and the families of millhands constituted the chief element in the exodus. At Poona it is known that crowds of evacuees were coming and fleets of buses had to be kept. The rush will be brief but the Railway had to set up special booking offices. Additional staff had to be secured and the police too had a job. The failure of coastal shipping had aggravated the rush. Millhands were in a position to send their people home in the Konkan because the war bonus was paid towards the end of February and they got their usual pay last week.

With the fall of Bassein, the chief port of Burma's rice trade, centred in the Irawaddy delta, and there is sure to be a rise in prices. Only last week the Government bowed to the inevitable by conceding an advance of eight annas per maund in the price of wheat. The rise in sugar and seeds is still a sustaining factor. The loss of the only Burmese port opening on to rail and road communication with Burma makes a difference to the rice trade. Exports through Akyab are doubly difficult owing to the war. There is the price schedule and the control scheme. The question is whether it can stand the strain. Of the strain there is no doubt. Exports have been bombed. The exodus of non-essential people from Bombay should help considerably. There is, however, the need for raising crop production. Bombay opinion is strongly behind Sir C. B. Mehta's plea for adding to food supplies. A change-over in crops is approved and guaranteed minimum prices are recommended. The risk of shortage is great. The food shortage in Ceylon underlines the urgency of India's own needs. The Imperial Council of Research through the Advisory Board has recorded its view in favour of crop planning before the Kharif crop is sown. Japan was despised as engaged in an unequal struggle with Nature and the perpetual farm crisis was featured by propagandists. To-day it is India which has to prepare against a farm crisis and adopt Japan's method of intensive collobaration of minute holdings to avoid famine. It is manifest that trade links are broken by shipping difficulties. Self-sufficienty at least in the matter of foodstuffs is now officially approved, perhaps because officials are likely to suffer more through the threatened shortage.

(*Continued from page 455*)

account. We shall not be surprised to see ways and means advances exceeding the Rs. 25 crores mark. It follows that there will be further large expansions of currency against sterling securities in the course of March. Such increase in ways and means advances can, however, be averted if the Government choose to replenish their cash position by the sale of further *ad hoc* Treasury Bills to the issue department of the Reserve Bank.

Banks were sellers of T.T. on London for Ready up to six months forward at 1s. 5 31|32d., and banks were buyers of T.T. on London Ready up to six months forward at 1s. 6 29|32d.

D. A. sight bills quoted 1s. 6 9|32d., for three months and 1s. 6 11|32d., for four months.

Interbank call money was easy at ½ per cent.

Firms' money for call and short quoted ½ per cent. and ¾ per cent for one to four months deposits.

Applications are invited for the posts of 4 temporary Surveyors at Rs. 100/- P. M. (fixed) in the Headquarters Office. In addition the names of 5 candidates for these posts will be registered on a waiting list for further vacancies which may occur. The age limit will be 45 years on 4th May 1942. Applicants must possess a degree from a recognised Engineering School, College or University and should have practical erperience in surveying. The last date for receipt of applications is 20th April 1942. Full details will be furnished on receipt of a stamped envelope only (without letter) bearing in block letters the address of the applicant. This envelope should be submitted to the General Manager, N. W. Railway, Headquarters Office, Lahore and Superscribed in the top left hand corner "Vacancy for Surveyors".

General Manager.

# Resume of Commodity Markets

It would have perhaps been not generally expected that there would be such a break in prices in the bullion market within a week. Effective official selling has brought about a substantial decline in prices in the silver market. With the weakness developed by the silver market there has naturally been a fall in gold prices as well. It will be remembered that the speculative buying in the gold market latterly was mainly in sympathy with the silver market.

There is nothing of interest to be recorded in other markets. The announcement by the Commerce Member regarding the decision of the Government of India to purchase raw cotton did not have any appreciable effect on cotton prices and quotations are substantially lower on balance. A firmer tendency has been noticeable in the jute manufactures market on covering for the near positions. The jute market, however, has continued dull and idle.

**Jute:**

The jute market has been absolutely flat for many weeks. Mills have continued to keep out of the market and it is believed that pending a further improvement in the war outlook there will not be any increase in general buying further. It cannot be expected that mills can be expected to buy in any large quantities in view of the decision of the Bengal Government to effect no reduction in the area of the acreage or at least to defer it indefinitely.

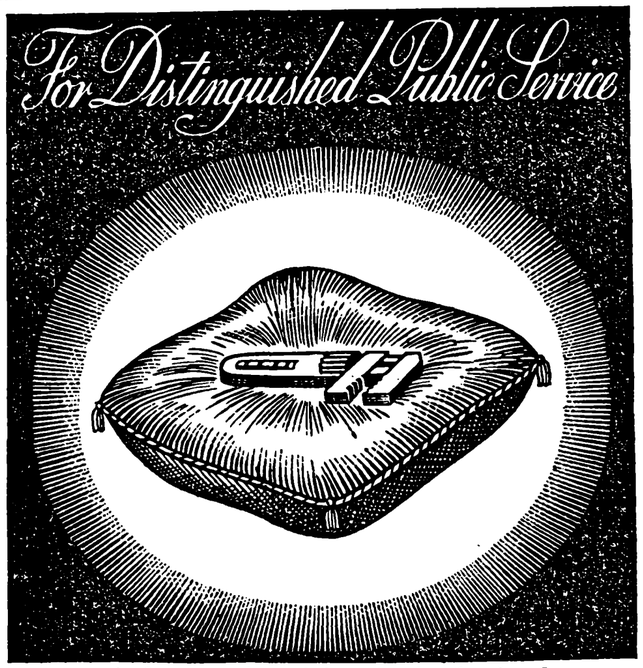
**Jute Manufactures:**

The strength of the hessian market during the week is a clear indication of the inherent technical soundness of the market. The rush to cover for near shipments followed the improvement in the freight position. It has resulted in the rise in the quotation for 9 Porters to Rs. 18-8 from Rs. 17-4. Beyond the rise in the quotation for the near positions there has not been much activity for the forward positions.

The American stock and consumption figures for the month of February should be considered rather encouraging. The increase in the consumption to 53 million yards is not at all surprising having regard to the low level of consumption in January. But what is most encouraging to note is that there has been a further rise in the volume of stocks afloat despite the difficulties in the freight situation.

The production figures for the month of February show a decline of 1 crore yards in hessian cloth and bags over the previous month and about 55 lakhs yards in sacking cloth and bags. The total production expressed in tonnage was 105.318 tons against 100.055 tons in January .

**Cotton:**



The sharp slump in cotton prices has been mainly due to the over-bought position in the raw cotton market on hopes regarding the possibility of large scale government buying. After the fall of Rangoon there was considerable nervousness and a substantial decline in values was recorded. The announcement by the Government of India of an intention to buy raw cotton in upcountry districts through selected agents did not have the desired effect as the announcement came too late. The Commerce Member stated in the Central Assembly that the Government have appointed certain selected agents for the purchase of specified quantities of short and fair staple cotton in the first instance and necessary authority has been issued to them to operate immediately.

As regards the steps needed for a drastic reduction in the acreage under short staple cotton and the encouragement for growing alternative crops the matter is under consideration of the Government. The subject will form an important item in the discussions that the Government of India will have with representative of Provinces and States in the first week of April when conferences on food production and control of prices of commodities will be held.

**Bullion:**

The sharp reaction in the bullion market during the past week suggests that the earlier rise in prices had been mainly speculative. It was not expected that gold prices would give way so easily. The main reason for the decline in prices for silver was the heavy selling by special quarters. If the Reserve Bank had interfered effectively in the earlier stages such a big advance in prices could have been avoided. It is freely argued that the rise in prices for silver is good from the point of view of the ryot whose assets are in silver. But if it is understood that the tendency for the ryot is to add to his assets which have been bought at a high level instead of cashing his profits a continued rise in prices will ultimately prove harmful to the poorer classes. Fortunately on this occasion the silver boom is isolated. Otherwise there would have been a considerable drain of wealth from the country. Even as matters stand it is desirable that silver prices should be kept within limits at least to prevent the transferance of wealth from the poorer classes to the speculators.

*For Distinguished Public Service*

In factory and workshop, in the hands of a million workmen, this humble tool plays its part. Men have learnt to depend upon it. It is as vital to the workman as to the gigantic machine he controls.

Steel—the metal of mighty strength—is always used because it means strength and reliability.

# Jute and Jute Manufactures

(By Our Jute Correspondent)

Calcutta, 19th March, 1942.

MILL production figures for February showed a return of just over 100,000 tons, a drop of some 5,300 tons from the previous month, due mainly to fewer working days. The production consisted of 19,33 lakhs of hessian cloth and 11,11 lakhs of sacking cloth. It will be remembered that the return of stocks at the end of January showed 22.38 lakhs of hessian and 18,06 lakhs of sacking so that the position of approximately one month of hessian production and one and a half months of sacking in stock remains practically unaltered. Production of goods from the beginning of the season in July up to the end of February amounts to 815,631 tons, or the equivalent of a consumption of over 45½ lakhs of bales of jute. Mill purchases are not keeping pace with this consumption and they are obviously eating into their stocks of the raw material. This fact is also indicated by the jute arrival figures for the first half of March which total only 1,82,000 bales against 3,18,000 in the same period last year. Total arrivals from July up to mid-March this year are 51,46,000 B/s against 69,62,000 bales for the corresponding period last season. Out of this total, exports of jute accounted for 9,92,000 Bales, further confirmation of Mill purchases falling behind consumption.

American consumption figures for February are a little more satisfactory at 530 lakhs yds. which is a fair average for that month, though falling a good way behind last year's total of 600 lakhs. While spot stocks are down by 190 lakhs last month they are 100 lakhs higher than at the same date last year. Afloat stocks are 310 lakhs yards higher than the previous months return and 550 lakhs above the return a year ago. Total stocks in sight therefore amount to 2800 lakhs yards as against 2150 lakhs at the same date last year and stand at a figure which processors probably consider fairly comfortable. Meanwhile shipping instructions appear to be coming forward quite well, indicating that there is still a sufficiency of freight available.

There was space for comments last week on Professor Todd's supplementary report on the working of the Jute and Hessian Futures Markets in Calcutta. In some respects Professor Todd seems to be striving after the unattainable. He has been striving to find some relation between the movements of Jute and Hessian and seems grieved that he can find no normal ratio. Many are inclined to doubt whether such a normal ratio is to be discovered even between the prices of raw cotton and cotton piece-goods which markets Professor Todd delights to quote in his arguments. Much of the salt would disappear from commercial life if there were always a constant or even a normal ratio between the raw material and the manufactured article. Trading under such circumstances would be too easy—and too dull. Even some of the ratios between the different sections of the Jute market which the Professor would like to find, would not be too easy. He wishes for instance to reconcile the prices in the Mofussil with those in the "Clive Street market". Variations in freight make such a comparison next to impossible, for jute from, say, Dhubri has to carry a much heavier rate of freight than jute from Goalundo or Khulna. We are afraid that this factor does not enter into the calculations of the cultivator to whom Professor Todd would like to broadcast the current quotations for jute decided by his proposed Spot Market Quotation Committee, and without allowance for this factor, Mofussil quotations would be either misleading or unintelligible. It is to be admitted that there is much to be said in favour of some official daily price list for "Clive Street" prices for a limited number of standard grades but this could be attained, we think, by a much less cumbersome process than the Spot Market Quotations Committee envisaged by Professor Todd.

The only feature of interest in the Export Jute Market has been a renewal of enquiry from Dundee, but it has not so far materialised into any demand for public marks in the open market. In fact, with so few Press-houses working, demand will almost of necessity have to be absorbed by private marks or from existing stocks, which are not extensive so far as decent quality is concerned. Allotments of freight have enabled shippers to clear their hands of some accumulated holdings. Tossa Cuttings for shipment were reported at Rs. 11 and Rs. 11-8 per bale, while a small sale to a Mill of Lightnings at Rs. 37-8 was also reported.

Enquiry from Mills for Loose Jute has continued on a very limited scale. European packing in a fairly high assortment was reported at Rs. 11 for Middles and Rs. 6-8 for Bottoms and similar Supervised Jat at Rs. 10-8 and Rs. 6-4. Later European Middles were reported done at Rs. 10-12, Bottoms alone at Rs. 6-6 to Rs. 6-4 and Low Bottoms at Rs. 4-10. Indian District Tossa Bottoms sold at Rs. 7.

Continued dry weather in the mofussil has retarded sowings which are behind normal for the time of year and confined almost wholly to the low and chur lands. Most of the higher lands are prepared to receive the seed as soon as rain falls. Although sowings may be said to be late, there is against that the belief that "a late crop is a good crop", presumably because the young plants stand less chance of damage from a spell of drought after germination. River levels are normal.

The general situation in the Fabrics section of the market shows no change, enquiry having again been confined almost wholly to the ready and near position. Demand for cover however has renewed in sufficient volume to raise prices sharply from Rs. 17-4 to Rs. 18-0 in nine porters and from Rs. 23 to Rs. 24-8 in eleven porters for ready shipment. March elevens were reported at rates rising from Rs. 23-6 to Rs. 24 and a sale of May/June was recorded at Rs. 21-12. Shippers are not encouraging forward demand unless terms of payment can be arranged when shipment is due, apart from whether freight is actually available or not. In the Heavy Goods side the demand for ready "B" Twills, after forcing the price up to Rs. 38-4, subsided and the quotation dropped by a rupee. At the close however a steadier feeling prevails owing to the placement of an order on Government acount for "E" and "C" cloth for shipment April to September. March Liverpools were recorded at Rs. 42-8 and April Woolpacks at Rs. 1-12-6 to Rs. 1-14. Turnover has been light and the forward positions continue neglected. The closing tone is steady.

| | Ready March | April | April June | July Sept. |
|---|---|---|---|---|
| 9 porters .. | 18 8 | 17 14 | 17 2 | 16 4 |
| 11 porters .. | 24 8 | 23 4 | 21 14 | 20 6 |

COOCH BEHAR TOBACCOS, LIMITED

We have received many equiries as to the liability of the Company for Excess Profits Tax and Income and Super Taxes.

This is to inform the public that, being registered in Cooch Behar State, the Company will not be liable to excess profits tax or British Indian Income-Tax

The Income-Tax in Cooch Behar State is a maximum of one anna in the rupee (against 5¼ annas in the rupee for companies in British India, being 2½ annas income-tax plus 1 anna tax plus 1¾ annas surcharge).

This Company, however, is liable to pay only one-third of the Cooch Behar Income-tax, thanks to the concession granted by the State.

## JUTE

*Calcutta*, March 19.

STEADIER conditions have been noticeable in the jute market in sympathy with the goods market but there has not been any appreciable increase in the volume of business. Preparations for sowing are well advanced. It is not expected that there will be any increase in mill buying in the absence of any improvement in the war situation.

In the loose jute section business has been only on a small scale. A small transaction was reported in Tossa special Middles at Rs. 11-4 per maund. Earlier in the week some business was reported in District Tossa at varying rates according to marks.

In the pucca bales section also not much of business has been passing. Shippers have not taken much interest in the market. Lightnings for April shipment were also sold at Rs. 37-8. Tossa cuttings for expert sold at Rs. 11 per bale.

## JUTE MANUFACTURES

*Calcutta*, March 19.

THE jute manufactures market was inclined to be firmer earlier in the week on good buying for near covering. The freight position has improved and it is believed that shipments during the month will be much better than it was originally expected. At the higher levels, however, there has been selling and closing quotations are lower than the highest levels for the week. After being higher at Rs. 16/8/-. 9 porters ready are quoting Rs. 18/2, April Rs. 17/8, May|June Rs. 16/12 and July|September Rs. 16. 11 porters ready are Rs. 24/2, April Rs. 23/-, May|June Rs. 21/6 and July|September Rs. 20/6.

The U. S. stock and consumption figures for the month of February, 1942 make interesting reading. There has been a good increase in consumption to 53 million yards from 43 millions yards in January, 1942 though there is a decline of seven million yards as compared with the corresponding period in 1941. Stocks afloat are substantially higher at 138 million yards against 101 million yards while stocks spot show a decline of 19 million yards to 142 million yards.

The figures are given below:

| | Stocks at the end of Month. Spot 1941 | Spot 1942 | Afloat 1941 | Afloat 1942 | Consumption for Month. 1941 | 1942 |
|---|---|---|---|---|---|---|
| January ... | 120 | 161 | 149 | 101 | 57 | 43 |
| February ... | 132 | 142 | 85 | 138 | 60 | 53 |
| March ... | 123 | ... | 64 | ... | 67 | ... |
| April ... | 105 | ... | 84 | ... | 55 | ... |
| May ... | 98 | ... | 116 | ... | 47 | ... |
| June ... | 107 | ... | 114 | ... | 49 | ... |
| July ... | 121 | ... | 104 | ... | 64 | ... |
| August ... | 126 | ... | 72 | ... | 60 | ... |
| September ... | 110 | ... | 103 | ... | 63 | ... |
| October ... | 92 | ... | 130 | ... | 63 | ... |
| November ... | 101 | ... | 164 | ... | 53 | ... |
| December ... | 143 | ... | 68 | ... | 75 | .. |

In the heavy goods section there has been good buying especially of B twills for March shipment. After being higher at Rs. 38-2, B Twills are now quoting Rs. 37-10, Liverpool Twills Rs. 41-12 and Cornsacks Rs. 38-12.

## GOLD

*Calcutta*, March 19.

AFTER earlier firmness, the bullion markets are rather quiet during the latter half of the week under review. There was a substantial rise in prices early in the period mainly in sympathy with the strength of the market though buying for hoarding purposes continued to be in evidence. Closing prices while higher than the lowest levels for the week are substantially lower than the highest levels for the week. Sovereigns were quoted as high as Rs. 41-12. They came down to Rs. 39. There has since been a recovery to Rs. 39-12. Gold ready are now quoting Rs. 52 against Rs. 56-12 on the first day of the week and first settlement Rs. 52 against Rs. 55-4.

It is noteworthy that there is a total absence of the premium for ready gold.

## SILVER

*Calcutta*, March 19.

IT will be remembered that there was an abrupt rise in prices for silver towards the close of last week and that it was apprehended that there would be a further rise in prices. Thanks to official selling, however, the speculative boom in silver has been nipped in the bud. And from the remarks of the Finance Member in the Central Assembly it appears that adequate precautions are being taken against any runaway rise in prices. Indian Mint Silver ready have come down from Rs. 96 to Rs. 82-2 and First Settlement from Rs. 89-6 to Rs. 79-10. It is significant that the drop in the quotation for ready is more pronounced and that there has been a narrowing in the premium for ready over first settlement from Rs. 7-8 to Rs. 3-8.

In the London market quotations for both spot and forward are nominally unchanged at 23½d.

## WHEAT

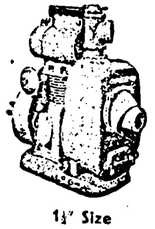
*Calcutta*, March 19.

BUSINESS in the wheat market is at a standstill on account of the refusal of holders to deal at the control rates. Wheat stocks in Calcutta are reported to be very low and there is good demand for flour. Mills are unable to crush owing to the difficulty in getting supplies. Cawnpore ready sold at Rs. 5-12 and May at Rs. 5-11. The quotation for May last week was Rs. 5-6-9. There has thus been a sharp appreciation in the quotation for the forward position.

The All-India Second wheat forecast for 1941-42 estimates the area under the crop at 32,444,000 acres against 33,364,000 acres (revised) in 1940-41.

## COTTON

*Calcutta*, March 19.



THERE was a sharp decline in prices in the Bombay raw cotton market following the fall of Rangoon. The tired bull liquidation on hopes of government buying support and speculative selling were mainly responsible for the decline in values. The actual announcement by the Commerce Member of the Government's intention to buy cotton through mofussil agents on Tuesday did not have the desired effect. There was a slight rally in prices, but it was not well held. Broach April-May are quoting Rs. 167, July-August Rs. 185-8, March Rs. 133, May Rs. 138-8, Bengal March Rs. 118-8 and May Rs. 124-8. The quotations at the end of last week were Rs. 184-12, Rs. 197-12, Rs. 142-12, Rs. 152-12, Rs. 129, and Rs. 135 respectively.

The New York Market has been firmer on mill buying. March futures were 18.64 cents and May 18.74 cents against 18.47 cents and 18.63 cents. There has been a sudden rise in the quotations for near positions.

## EXCELLENT 1941 RESULTS FOR BOMBAY DYEING

ABSOLUTELY dull and uninteresting conditions have been noticeable on the Calcutta Stock Exchange during the past week. The absence of any startling developments in the war situation during the past week has not had any stimulating influence on the markets. Business in several sections has been on a very restricted scale. Practically no interest has so far been shown in equities. The Bombay market, however, has lately shown a tendency to improve on some speculative buying and covering. It is difficult to take any definite view regarding the future at the present moment.

The feature of the week is the announcement by the Government of India fixing minimum prices for provincial loans. It was indeed pointed out on the last occasion that the action of the Government of India in fixing prices for their loans alone was partial in effect and there was need for similar action in regard to provincial loans also.

The minimum prices fixed are as follow:

| | | | | Rs. | A. | P. |
|---|---|---|---|---|---|---|
| 5 per cent | U. P. | 1944 | .. | 103 | 0 | 0 |
| 4 per cent | Punjab | 1948 | .. | 101 | 0 | 0 |
| 3 per cent | Punjab | 1949 | .. | 94 | 0 | 0 |
| 3 per cent | C. P. | 1949 | .. | 94 | 0 | 0 |
| 3 per cent | U. P. | 1952 | .. | 93 | 0 | 0 |
| 3 per cent | Punjab | 1952 | .. | 93 | 0 | 0 |
| 3 per cent | C. P. | 1952 | .. | 93 | 0 | 0 |
| 3 per cent | Madras | 1952 | .. | 93 | 0 | 0 |
| 3 per cent | Assam | 1952 | .. | 93 | 0 | 0 |
| 3 per cent | N.W.F.P. | 1952 | .. | 93 | 0 | 0 |
| 3 per cent | Madras | 1953 | .. | 93 | 0 | 0 |
| 3 per cent | Punjab | 1953 | .. | 89 | 0 | 0 |
| 3 per cent | Madras | 1959 | .. | 89 | 0 | 0 |
| 3 per cent | U. P. | 1961-66 | .. | 86 | 0 | 0 |

* * * * *

A substantial increase in the total number of units sold has resulted in a higher level of earnings for the *United Provinces Electric Supply Company, Limited* in the half-year ended September, 1941 but higher working expenses largely on account of the increase in prices for coal and stores have cut into the net profit which before providing for taxation and depreciation for the half-year is Rs. 6,79,198 against Rs. 6,21,692 for the previous six months. The amount set aside to depreciation is higher at Rs. 2,77,559 (Rs. 2,50,000) while the sum of Rs. 1.25 lakhs, (same) has been placed to Reserve for Development and Extensions. The provision for taxation is Rs. 1,33,000 (Rs. 1,25,000). The dividend has been maintained at 8 per cent per annum. The amount carried forward is Rs. 40,135 against Rs. 31,496 brought in.

The distribution system was added to in several streets and lanes in Lucknow and Allahabad for the purpose of street lighting and extensions to the low tension mains were carried out for the purpose of affording supplies to the consumers. The number of consumers totalled 11,683 as compared with 10,860 at September 30, 1940, an increase of 823.

* * * * *

There has been a sharp increase in the earnings of the *Jubbulpore Electric Supply Company, Limited* with the jump in the number of units sold. The improvement in earnings would perhaps have been more pronounced but for the usual increase in working expenses. Owing to the lower level of earnings for the standard period, however, the incidence of E.P.T. has been rather heavy and it has not been possible for the shareholders to derive any benefit out of the higher level of earnings. The net profit before providing for taxation for the half-year is Rs. 2,21,721 against Rs. 1,71,978 for the six months ended March, 1941. The amount set aside to depreciation is Rs. 51,482 against Rs. 48,688. The allocation to General Reserve is Rs. 25,000 (same). The provision for taxation is substantially higher at Rs. 1,05,000 (Rs. 52,200). The dividend could, therefore, be only maintained at 3 per cent. The amount carried forward is lower at Rs. 11,280 against Rs. 16,033 brought in.

* * * * *

The accounts of the *Alliance Jute Mills Company, Limited* for the half-year ended January, 1942 make very satisfactory reading but here again owing to the substantially higher provision for taxation the ordinary shareholders have been denied all expectations of a greater share on profits. The net profit, before providing for taxation and depreciation, is Rs. 15,06,446 against only Rs. 11,09,044 for the previous half-year. The amount set aside to depreciation is lower at Rs. 1 lakh (Rs. 2.5 lakhs) while the provision for taxation is considerably higher at Rs. 10,23,363 (Rs. 6 lakhs). There is in addition a transfer to Reserve of the sum of Rs. 1,74,340. After providing for the preference dividend, the dividend on the ordinary shares is maintained at Rs. 12-8 per share.

* * * * *

The encouraging prospects for tea shares have been pointed out in these columns on more than one occasion. The results of the *Dessai and Parbuttia Company Limited* for the year 1941 revealed in full measure the improved conditions in the industry. The earnings of the Gillanders group of companies now available confirm my remarks expressed in these columns on an earlier occasion. It will be noticed from the table given below that with the exception of Jutlibari all the companies have declared higher dividends.

| | | 1941 | 1940 |
|---|---|---|---|
| Arcuttipore | .. .. | 12½ | 7½ |
| Betjan | .. .. | 30 | 25 |
| Gairkhata | .. .. | 30 | 20 |
| Jutlibari | .. .. | 10 | 10 |
| Lackatoorah | .. .. | 20 | 12½ |
| Tengapani | .. .. | 20 | 15 |

Thanks to the substantially higher average price realised on the sale of teas *New Chumta Tea Company, Limited* has been able to report a net profit before providing for depreciation of Rs. 72,744 against Rs. 55,079 for 1940. After allocating Rs. 20,000 to Reserve for renewals and additions and transferring Rs. 10,000 (Rs. 20,000) to General Reserve the final dividend of 30 per cent is to be paid, which with the interim dividend of 10 per cent already paid, makes 40 per cent for the whole year against 30 per cent for 1940.

The net average sale price including proceeds of export rights sold was 13.10 pies for 1941 against 10.08 pies for 1940 states the report.

* * * * *

The results of the *Bombay Dyeing and Manufacturing Company Limited* for the year ended December, 1941 provide a pleasing contrast to those for 1940. Thanks to the large war orders, the higher prices for the Company's products and the regular working of the mills the net profit, before providing for taxation and depreciation, is as much as Rs. 66,75,512 against Rs. 14,89,896 for the previous year. The provision for excess profits tax and income-tax is Rs. 34,25,000 against Rs. 2,50,000 on the former occasion. The charge on account of depreciation is Rs. 5,86,803 against Rs. 5,43,038. The distribution to shareholders is doubled even after transferring the sum of Rs. 9,26,000 to the Dividend Equalisation Fund and allocating Rs. 72,500 to Reserve for depreciation of securities. The directors recommend that a final dividend at the rate of Rs. 5 per share (making Rs. 25 per share for the whole year) *plus* a bonus of Rs. 35 per share be paid against the dividend of Rs. 25 per share and a bonus of Rs. 5 per share on the former occasion. The carry forward is the substantial sum of Rs. 2,05,148 against Rs. 2,054 brought in.

# The Week in the Exchanges

## CALCUTTA STOCK EXCHANGE

*(From Our Correspondent)*

Calcutta, March 20.

DULL and idle conditions have continued to prevail on the Calcutta Stock Exchange during the past week. In spite of the fact that there has not been any further deterioration in the war situation during the past week there has been no revival of confidence and it looks as if it will be a long time before operators and investors re-enter the market. The feature of the week is the fixation of minimum prices for provincial loans by the Government of India. The undertone in all sections is subdued and for most of the popular counters there are no buyers above minimum prices.

Activity in the giltedged securities section has been on a very limited scale. For the short-dated loans there are buyers around minimum prices. 5 per cent. 1945/55 were done at Rs. 104-6. 3½ per cent. Paper were dealt in around the minimum price of Rs. 87. 3 per cent. Defence Bonds 1946 were Rs. 97-4, 3 per cent. Second Defence Bonds 1949-52 Rs. 95, 3 per cent. 1951/54 Rs. 94, 4 per cent. 1943 Rs. 101-12, 4 per cent. 1960/70 Rs. 103, and 3½ per cent. 1947/50 Rs. 97-4. No transactions have been recorded in provincial loans. There has been a further rise in the treasury bills rate during the past week to one rupee two annas and eight pies per cent from one rupee one anna and eleven pies per cent. per annum last week.

No transactions have been recorded in public bodies' debentures. Among industrial debentures, 5¼ per cent. *Rohtas Industries* debentures were done at Rs. 103, 5½ per cent. *Dalmia Cement* debentures at Rs. 104, and 6 per cent. *Howrah-Amta Railway* Debentures at Rs. 105.

Some business has been recorded in preference shares. *Bally* preferences changed hands at Rs. 120, *Barnagore* at Rs. 41, *Cheviot* at Rs. 125 and *Howrah* 'A' preferences at Rs. 120. *Steel Corporation* were Rs. 93-8 and *Dunlop First* Preferences Rs. 120.

In the Coal section *Equitable* were noted at Rs. 35 and *Ghusick and Muslia* at Rs. 4-1.

In the Cotton section the only transaction recorded was in *New Victoria* at Rs. 4-8.

In the Jute section, business recorded in ordinary shares has been. in *Delta* at Rs. 382-8, *Empire* at Rs. 26 and *National* at Rs. 21.

In the Engineering section, Indian Irons and Steel Corporations have been fluctuating in narrow limits, the quotation for the former being around Rs. 21-10 and the latter around Rs. 13-6.

Sugar shares have not been very much affected with *Buland* at Rs. 23, *Carew & Co.* at Rs. 12 and *Murree Brewery* at Rs. 15.

In the Tea section, the only transaction recorded has been in *Moheema* at Rs. 10.

In the Miscellaneous section, *Calcutta Trams* were Rs. 14-8, *Indian Wood Products* Rs. 27, *Titaghur Paper* Rs. 18-4 and *Indian Cables* Rs. 19-8.

## BOMBAY STOCK EXCHANGE

(From Our Correspondent)

*Bombay, March 19.*

It must be said that the prices of government securities have shown slight improvement during the week following the reports of heavy Japanese naval losses. For instance 3½ per cent Paper, which was quoting at Rs. 87-2 at the close of last week, improved to Rs. 87-6 during the week. Among terminable loans, 3½ per cent 1947-50 were marked slightly higher at Rs. 97-6, while 1948-52 remained steady at Rs. 93; 1949-52 at Rs. 95; 1951-54 at Rs. 94; 1963/65 at Rs. 88-8; 1960-70 at Rs. 103; 1955/60 at Rs. 107-8; 1945/55 at Rs. 104-7 and 1946 *Defence Bonds* at Rs. 97-4. The slight advance may be taken as wholly encouraging. Market morale is definitely on the mend.

*Shares.*—Slightly better sentiment has been noticeable in the local share market throughout the week under report. Good investment buying took place both in the forward and the cash sections. As said before the report of heavy Japanese naval losses was another contributory factor to the subdued cheerfulness on the local stock exchange. The volume of transactions recorded showed signs of expansion as compared with recent weeks. Steel shares in which no business was possible during the last few weeks had buyers during the week.

*Textiles.*—There was an improved tone in this section particularly with prices tending upwards. *Bombay Dyeing*, after opening at Rs. 1,110, showed a rise of 20 points to close at Rs. 1,130. *Central India* were also done higher at Rs. 333; *Century* at Rs. 385; *Gokak* at Rs. 255; *Kohinoor* at Rs. 442; *Simplex* at Rs. 180 and *Svadeshi* at Rs. 388. *Colaba*, after touching a high of Rs. 170 x.d., closed a shade easier at Rs. 165 x.d. In the cash section, *Ahmedabad Advance* were done at Rs. 305; *Sholapoor* at Rs. 5,000 and *Vishnu* at Rs. 1,420.

*Hydro-electrics.*—*Andhra Valley* remained unchanged at Rs. 1,450, while *Tata Power* improved from Rs. 1,280 to Rs. 1,412-8. *Tata Hydro* were marked slightly higher at Rs. 159.

*Steels.*—Steel shares came in for business during the week after a long period, the ordinaries and deferreds changing hands at the minimum levels of Rs. 285 and Rs. 1,525 respectively. The first preferences were transacted at Rs. 187-8 x.d. and the second preferences at Rs. 118-8. The material change in the case of 2nd Preference points to a definite reversal of views.

*Miscellaneous.*—In this group *Bombay Burmah Trading* old shares were unchanged at Rs. 225, while the new shares were done higher at Rs. 82-8. *Associated Cement* too were slightly lower at Rs. 157. *Alcock Ashdown* were transacted at Rs. 420; *Belapur Sugar* at Rs. 230; *Shivrajpur Syndicate* at Rs. 29 and *Scindia Steam* at Rs. 19-4. *Wimco* were quoted lower at Rs. 176-4 but *Premier Construction* closed higher at Rs. 112.

## MADRAS STOCK EXCHANGE

*(From Our Correspondent)*

Madras, March 19.

During the week under report, the local market was somewhat quiet, although the undertone in a single group like Tea and Rubber shares was fully steady. Cotton mill shares met with fair demand as before. The market remained closed on Tuesday on acount of the Telugu New Year's Day.

*Securities.*—The local securities market continued to be steady, 3½ per cent Paper quoting around Rs. 87-8. 3 per cent 1946 *Defence Bonds* were marked at Rs. 97-4 and 3 per cent 1963/65 at Rs. 88-8. Among State Loans, 3½ per cent 1951/58 *Mysore Loan* changed hands at Rs. 104, demonstrating over again that no Mysore loan will drop below par whatever happens to other loans.

*Mills.*—*Buckingham & Carnatic* ordinaries, after being done at Rs. 170 c.d., closed a shade easier at Rs. 168 c.d., while the preferences were done at Rs. 156. *Madura* changed hands at Rs. 36 c.d.; *Coimbatore Cotton* at Rs. 150 c.d. and *Mysore Spun Silk* at Rs. 8-4.

*Utilities.*—*South Madras Electric* ordinaries continued to be steady at Rs. 11-4.

*Plantations.*—Rubber shares met with restricted business during the week, *Cochin Malabar* at Rs. 8-8 x.d.; *Thirumbadi* at Rs. 2-1 and *Woodlands* at Rs. 8-12 were outstanding. Among Tea shares, *United Nilgiris* changed hands at Rs. 136-8. *Chembra Peak* were in good enquiry at Rs. 4-5 following the declaration of an interim dividend of 10 per cent for the year ended 31st March, 1942, payable on the 30th March, 1942.

*Sugars.*—*India Sugars* were in demand at Rs. 9-2, while other shares remained unchanged.

*Banks.*—*Bank of India* were crossed at Rs. 121. *Reserve Bank* were placed at Rs. 89.

*Miscellaneous.*—*Indian Steel Rolling Mills* preferences had sellers at Rs. 10-8. *Tata 2nd* preferences changed hands locally at Rs. 99-4. *Indian Iron* at Rs. 21-12 and *Steel Corporation of Bengal* preferences at Rs. 92 were among transactions reported recently. The closing is quiet but steadier than last week.

## LONDON STOCK EXCHANGE

Rather quiet conditions have been noticeable on the London Stock Exchange during the past week. The continued seriousness of the war situation has had a restraining influence. Giltedged securities were inclined to be firmer. Towards the close a slightly easier tendency has been noticeable on reduced support. With the repatriation of India sterling loans greater activity was expected. Curiously enough, demand has been confined only to British fixed-interest securities. 3½ per cent. India Sterling Paper was noted at 101. 2½ per cent. Consols were 82⅞, 3½ per cent. Conversion 106 1/16, 3½ per cent. Loan 105⅜ and 3 per cent. War Loan 100¼.

(Continued on page 479)

(Continued from page 478)

Among other sections, Tea shares have been very weak on fears of the possibility of a Japanese attack on North-east India affecting the estates. Home Rails have been firmer while Oils were steady with *Mexican Eagles* being marked higher.

## NEW YORK STOCK EXCHANGE

Wall Street has been quietly steady. The proposal for limitation of profits for the duration of the war has not had any effect on the market. *U. S. Steel* were $51, *General Motors* $34 7/8 and *Anaconda Copper* $26¾.

## CHARTERED BANK OF INDIA

The Agent, The Chartered Bank of India, Australia & China, Calcutta, has received the following cable information from his London Office:—

"At Shareholders meeting on 1st April Directors will recommend final dividend at the rate of 5% per annum for half-year subject to income-tax. £50,000 is added to Pension Fund and £260,467-16-9 carried forward."

(*Annual meeting, 28th March, 1942 at 8-30 a.m. at Cawnpore*)

*Audited accounts for the year ended 31st December, 1941:—*

The profit for the year, after making all usual allowances (including the sum of Rs. 7 lakhs for Depreciation), including income from investments, providing for a bonus to Employees and setting aside Rs. 50 lakhs for estimated taxation, amounts to Rs. 31,71,479-9-1 to which has to be added the amount brought forward from last year, namely Rs. 1,42,107-3-8, making the total sum available Rs. 33,13,586-12-9. The directors recommend that this sum should be disposed of in the following manner:

| | Rs. | A. | P. |
|---|---|---|---|
| Transfer to Rehabilitation Reserve .. | 7,00,000 | 0 | 0 |
| Transfer to Obsolescence Reserve .. | 5,00,000 | 0 | 0 |
| Dividend on the 8 per cent Cumulative Preference shares, free of income-tax .. | 6,48,000 | 0 | 0 |
| Dividend on the Ordinary Shares at four annas per share .. .. .. | 11,03,750 | 0 | 0 |

leaving a balance of Rs. 3,61,836-12-9 to be carried forward.

*The turnover of the Branches of the Corporation again shows an improvement, being considerably greater than ever before in the history of the Corporation.*

There was some industrial unrest about the middle of the year 1941 but, for the remainder of the year, the Corporation's labour force worked industriously and in a contented manner. Constant with the continued increase in the cost of living index figure, additional War Dear Food Allowance were granted in August, 1941 and as from 1st January, 1942 and the accounts also make provision for the payment of a bonus in respect of the year 1941.

The Corporation has not yet been assessed to Excess Profits Tax in respect of trading in the year 1939 and 1940. Together with the amounts previously reserved, the sum which has this year been placed to Taxation Reserve, will, it is considered by the Directors, suffice to meet the corporation's liability in respect of Taxation on the accounts up to the end of the year 1941. At the request of the Corporation's auditors, the amount which it is necessary to reserve on this occasion has been debited in the Profit and Loss Account.

In the director's report last year, reference was made to the creation of a Rehabilitation Reserve and the directors recommend that this Reserve should this year be increased by the sum of Rs. 7 lakhs and also that a sum of Rs. 5 lakhs should now be placed to the Obsolescence Reserve in view of the extent to which certain of the Corporation's Plant and Machinery is at present being worked in the production of goods for the Defence Services.

*Chairman.*—Mr. R. Menzies.

*Authorised Capital—Rs. 3,65,00,000 in 65,00,000 Ordy. of Rs. 1 and 3,00,000 8% Cum. Pref. of Rs. 100 each. Issued and Subscribed —Rs. 1,25,15,000 in 44,15,000 Ordy. and 81,000 Pref., both fully paid up.*

Synopsis of the balance sheet as at 31st December, 1941:—

*Includes the arrears of dividend for the eight half-years ended 30th June, 1941.

(*Half-yearly meeting, 31st March, 1942 at 1 p.m.*)

*Audited accounts for the half-year ended 31st December, 1941:—*

*Profit and Loss Account.*—Including the balance brought forward from last half-year and providing for interest, debenture interest, commissions, Taxation and writing off Debentire Issue expenses Rs. 6,601-0-0, shows a credit balance of Rs. 3,67,464-6-10 which sum, the directors recommend, should be dealt with as follows:—

| | Rs. | A. | P. |
|---|---|---|---|
| Dividend on the Preference Shares for nine half-years ended 31st December, 1941 .. | 1,57,500 | 0 | 0 |
| Write off to Depreciation .. .. | 2,00,000 | 0 | 0 |

leaving a balance of Rs. 9,964-6-10 to be carried forward.

Results have been adversely affected by a strike of workers which took place from 1st to 19th November.

Although the permissible weekly working hours under the Indian Jute Mills Association Working Time Agreement were 45 to the end of August and 59 to the 11th October, these mills worked 54 hours per week for that period thus continuing to make up the time lost during the strike of 1939. From 1st November, the mills worked 60 hours per week in common with other member mills of the Association.

ISSUED WEEKLY

Vol. XXIX. No. 14 SATURDAY, MARCH 28, 1942 Price Re. 1

## ...sure and Increase Nation's Strength

Financial Independence of the individual is the measure of Nation's financial ...

In this hour of world turmoil, all Life Insurance Policy-holders should take stock of their insurance cover and ascertain just how strongly they are fortified against the unpredictable that lies ahead.

And, those individuals who have not yet made provision for their protection should do so without delay and thereby contribute towards Nation's strength.

Be advised and write to-day to

## WORLD OF INDIAN FINANCE

Calcutta, Friday evening.

Easy conditions have continued to prevail in the short-loan market and inter-bank call money rates have remained unchanged at ¼ per cent. in Calcutta and ¼ per cent. in Bombay. It should be said that demand for money has been on a greater scale during the week but any increase in demand cannot be such as to effect any change in call money rates. Usually, the slack season sets in from the end of March and, as pointed last week, there is a rush of funds from upcountry centres. This year, however, peculiar conditions have obtained. Produce finance has not been on the same scale as in previous years. Most of the demand at the present moment is for financing purchases against government contracts.

---

After the experience of the exchange banks there is a greater tendency on the part of the banks to have a very liquid position and with the war approaching nearer the shores of this country greater caution is exercised in the matter of advances. Otherwise, with the volume of funds now available any amount of increase in demand for money cannot be reflected in higher money rates.

---

The results at the treasury bills auctions this week again suggest that there is plenty of funds seeking investment. The increase in the amount of applications for the second week in succession seems to indicate greater public participation though the average discount rate is again slightly higher at Rs. 1-2-9 per cent. per annum. Tap bills have attracted greater attention and there is a substantial increase in the total of sales to Rs. 94.50 lakhs from Rs. 16 lakhs in the previous week. There was a suggestion in some quarters that there might be a reduction in the tap rate this week as the sales for several weeks were very poor and it was thought that it would not be possible to attract funds without a further reduction in the tap rate. We have, however, pointed out that there is need for suspending sales of intermediates altogether as otherwise it would be impossible to prevent a rise in the discount rate. The tap rate now remains unchanged at Rs. 99-11-6.

---

The returns of the Reserve Bank for the week ended March 20, 1942, show that there has been a further expansion of currency for Rs. 8 crores. The expansion is effected this time against both sterling and rupee securities. Sterling securities in the issue department show a rise from Rs. 209.85 crores to Rs. 212.85 crores, or an increase of Rs. 3 crores while rupee securities are Rs. 4.99 crores higher at Rs. 136.26 crores. It is, therefore, an operation designed to relieve the ways and means position of the Central Government. In the treasury bills communique issued this week it is said that Rs. 695.50 lakhs worth of treasury bills were sold in favour of the issue department of the the Reserve Bank. This sale perhaps refers to the increase in rupee securities in the issue department. The expansion in currency has been effected for the third week in succession and the total increase in notes issued since the beginning of this month is of the order of Rs. 34 crores. Out of this total, Rs. 15 crores is against rupee securities.

---

Active notes in circulation in India are at a new high level at Rs. 378.93 crores. The figure as on March 13, 1942 was Rs. 374.68 crores. Cash in the till is Rs. 2½ crores higher at Rs. 14.08 crores. It is significant that in recent weeks there has been a large increase in notes in circulation in Burma, the latest figure being Rs. 27.43 crores against Rs. 23.80 crores on February 20, 1942. Rupee coin at Rs. 27.71 crores are not appreciably lower but the downward trend has continued uninterrupted.

---

In the banking department, Central Government deposits show an appreciable rise to Rs. 13.05 crores from Rs. 6.58 crores. Needless to say, the rise in cash balances is due to the expansion against rupee securities and the increase in the ways and means advances from Rs. 12.56 crores to Rs. 19 crores. Recourse to such a large ways and means advance is perhaps in anticipation of the receipts from the British Treasury. Cash balances are at the highest level for nearly eight weeks. The level of expenditure of th Government continues to be on the large side. In addition to the receipts from taxes, which for this time of the year should be on a fairly large scale, there has been a net outgo of Rs. 5 crores. That is to say, without the expansion in currency and the increase in ways and means advances Central Government balances will be Rs. 1¼ crores.

---

In spite of the large disbursements by the Government there is no increase in bank deposits which are more or less unchanged at Rs. 41.70 crores. Balances held abroad are Rs. 2.56 crores lower at Rs. 35.86 crores as a result of the transfer of sterling securities to the issue department. Investments show a rise of about Rs. 55 lakhs to Rs. 11.87 crores.

---

The exchange market has been quiet with very little business passing.

---

Banks were sellers of T.T. on London for Ready up to six months forward at 1s. 5 31/32d., and banks were buyers of T.T. on London Ready up to six months forward at 1s. 6 29/32d., for three months and 1s. 6 11/32d., for four months.

---

Interbank call money was unchanged at ¼ per cent.

---

Firms' money for call and short quoted ¼ per cent. and ⅜ per cent for one to four months deposits.

### TREASURY BILLS

**India**

Tenders for Rs. 2,00,00,000 (Rupees 2 crores) of three months' Government of India Treasury Bills were opened on Tuesday, March 24, 1942. Total amount offered was Rs. 3,30,75,000 (Rupees 3 crores, 30 lakhs and 75 thousand). Tenders at Rs. 99-11-6 per cent were accepted in full and those at Rs. 99-11-3 per cent were allotted approximately 58 per cent.

Total amount accepted was Rs. 2 crores, the average rate of accepted tenders being Re. 1-2-9 per cent (Rupee one, annas two and pies nine per cent) per annum.

Tenders for Rs. 2,00,00,000 (Rupees 2 crores) of three months' Government of India Treasury Bills will be received on Tuesday, March 31, 1942. Successful tenderers should make payment on Thursday, April 2, 1942. Other conditions are as usual.

Three months' Intermediates will be sold from March 25, 1942 to March 28, 1942 at Rs. 99-11-6 per cent.

Three months' Intermediates sold from March 18, 1942 to March 23, 1942, amounted to Rs. 94,50,000 (Rupees 94 lakhs and 50 thousands).

During the week ended March 20, 1942, Governments of India Treasury Bills for Rs. 6,95,50,000 (Rupees 6 crores, 95 lakhs and 50 thousand) were sold in favour of the Issue Department of the Reserve Bank of India.

THE SUN LIFE ASSURANCE COMPANY OF CANADA

A GREAT LIFE ASSURANCE COMPANY

In the long established organization of the Sun Life Assurance Company of Canada—founded in 1865—the steady progress maintained over many decades provides a remarkable demonstration of the ever increasing public confidence in the security and strength of Life Assurance. It also affirms the soundness of the co-operative principles of Life Assurance, which gives sure protection to over one million policyholders of the Sun Life of Canada.

**In 1941,** benefits paid by the Company exceeded Rs. 24,19,00,000 and benefits paid since the first policy was issued now total Rs. 404,95,00,000. New Business of the Company for the year amounted to Rs. 51,24,00,000 increasing the total assurances in force to Rs. 814,17,00,000. Assets now stand at Rs. 272,74,00,000.

The extent of the Sun Life organization and the high character and qualifications of its personnel ensure prompt, intelligent and efficient service to policyholders and beneficiaries at all times.

R. J. BAKER, BRANCH MANAGER,
SECURITY HOUSE, 102, CLIVE ST., CALCUTTA.

(Incorporated in Canada in 1865 as a Limited Company.)

*A LEADER IN PUBLIC SERVICE*

# Finance Abroad

Thursday, Morning.

In the medley of reports that follow the story of reverses in Burma, only one fact stands out. The financial mechanism is working very well as anticipated. Those who have been brought back to India have been assured that Post Office Cash Certificates issued in Burma after its separation, will be paid in India. One form of savings has not been rendered illiquid by the war. As to the Burma Post Office's functions as a banker and the way it stands up to the terrific strain induced by the war little is known. Whether the savings bank system at all remains may be doubted. No estimate have appeared as yet of the loss of property in Lower Burma. Individuals must assume that compensation is not ruled out in this case, and a deputation went up to Delhi. The encashment of Burma notes has been discharged so far by the banks in India under instructions, but we have no idea as yet of the amount of money repatriated from Burma.

The descent of Chinese troops on to Central Burma has occasioned more comment than the publication of details as to the 500 million dollar loan granted to China in January by the U.S.A. The initial credit of one million has been arranged to let China go on drawing for the value of supplies made available by the U.S.A. Mr. T. V. Soong, former Finance Minister, is in charge of the arrangements. The report confirms General Stillwell's assurance in Chungking of full aid for China. All that General Stillwell asks for are proper supplies and equipment. The Chinese front will be held. The *Economist* only recently drew attention to the general implications of British policy towards China since 1926, when the Hankow Concession was surrendered. Britain took a big step away from the unequal treaties. It is now the duty of the Allies to help man the Chinese front. China's integrity is a cardinal aim of Allied policy, and loans, credits, etc., must flow freely to prevent a Japanese victory which will thrust China into the co-prosperity sphere. The cutting of the road from Burma to China, according to Dr. Baker, has not been accomplished. China herself has started a new savings drive. Rules governing the issue of bonds are being framed and the offer in U.S. currency of the new bonds is to tempt the local hoarder. The new bonds will be secured on the loan and can be paid for in Chinese dollars by the purchaser at the official rate of 18.72 Chinese dollars to one U.S. dollar. The conversion equivalent will put the Chinese dollar well over 3d. Since no quotations appear in the press, it may be suggested that the value fixed at between 5 and 6 cents per Chinese dollar goes back to the pre-December level. With the important difference that China has fewer demands on her foreign exchange resources owing to the cessation of foreign trade. The operations of Chinese banks in Burma after the extension of hostilities can only be conjectured. As to the Dutch Indies, there has been the usual notification in India as regards outstanding debts and remittances too. But the report as to the Germans buying up shares in N. E. I. concerns and staking out a claim against Japan before the latter starts to exploit the rich islands will excite attention.

The enemy's action in New Guinea will impel many to know something about one of the largest islands in the world. This is apparently a war of islands, for Timor is also occupied. Part of N. G. was secured from the Germans as may be readily guessed from the name of the adjacent Bismarck Archipelago. The Japs took some islands and the others had the rest below the Equator. The Solomon Islands were won from Germany and part of New Guinea was assigned to Australia as mandated territory. The Australians got 93,000 square miles of new territory. Communications were opened between Rabaul and Australia as also Japan. Coconuts, coffee, cocoa and kapok (or silk cotton) are the chief products. Fruit is plentiful and bananas are proof of the tropical climate. Though minerals are plentiful only gold has attracted attention. The mine at Bulolo is probably more famous than any of the plantations of New Britain. North-eastern New Guinea, formierly a German protectorate, is a distinct area under Salamaua. It is wild and barren compared with New Britain, but gold is a characteristic product of New Guinea where prospecting and even transport of mining plant has been carried out by air transport. Wau, Salamaua and Lae and Madang were the chief centres of foreign settlement. An important point to remember here is that the missionary in New Guinea was a trader and planter. It is now clear that Japanese invasion was helped by the German missions which had vast economic power. More has been said about Rabaul in New Britain than about any other place in Oceania in recent months. Copra, cotton and cocoa came from the island of New Britain, principal island in the Bismarck group. In the island of New Ireland also copra is the chief product. What is called Papua on the maps is the south-east post of New Guinea plus some outlying islands. Nearly as large as the mandated territory, it was annexed by Queensland on its own to prevent the Germans getting in. The Federal Government took over in 1901 under the Papua Act of November 1905. Papua has enjoyed a form of representative government like the Crown colonies. Sir Hubert Murray, brother of Sir Gilbert Murray of Oxford, has certainly made the island famous.

The Australians have granted colonial preference to Papua's produce. Rubber planting is not unknown but copra is the chief export. The natives pay poll-tax after conversion to peaceful modes of life. The territory enjoyed the benefit of a subsidy from the Australian Government. Of Papua's minerals gold, silver and osmiridium (going into fountain pen nibs) are the best known. In the Louisiade islands, too, gold has been won. Near Port Moresby copper was located in the twenties and indications of petroleum have been likewise noted. The Australian currency obtain over the territory which is in close contact with Queensland. The Bank of New South Wales kept in touch through branches at Port Moresby and Samarai. Australia's interest in the operations in progress is founded on her experience as a colonial power.

The battle for production is just beginning. Mr. Don Nelson is against compulsion—against legislation. From June last the President has announced an emergency after the shooting began the 40-hour week was ignored. The insurgent spokesman of Little Steel in 1937 is now a supporter of the Administration. Even Mr. Ford is going to break with his own brand of rugged individualism for the sake of winning the war. The tabloid New York Mirror is seriously cited as a source—with the brightly vague dictum. All along the line, in ships, in certain critical munitions, tanks and certain types of planes, things are looking brighter. Plans for synthetic rubber production have gone ahead. Mr. Jesse Jones expects a large output by June 1943. The speeches of Mr. Lyttelton support Mr. Attlee's confident appraisement of British war production. Not the details of the Whirlwind the Westland bomber, but the success of Warships Week is the measure of Britain's will to win. On Saturday last, the London rally was held; in three days over 59 million sterling was netted. London is willing and determined to pay the price of Admiralty. The National Savings Committee should have no difficulty in hitting its target of 125 millions. The committee aimed at getting 150 millions in five months. Its success under the direction of Lord Kindersley has been greater than the success of tap sales of National War Bonds in the past year. The measurable distance between the total sacrifice entailed by a long war and the progress of saving is narrowing. The Warships Week is responsible for the suspension this week of the usual sales of Treasury Deposits. The Treasury Bill issue of £75 millions will be allotted as usual. The old understanding to pay 1 per cent is maintained though the volume of applications fluctuates sharply, going down rather suddenly on Friday last.

The British investor has lost much in the Far East. The position is still worsening and quotations from Chinese papers will not restore confidence. Against this background the recovery to over par in the case of Chartered Bank shares in London will naturally claim attention. While the National Bank like the Eastern Bank is still more or less immune from adverse influences, the Chartered with its vast stake from Japan to Australia (covered by the original Charter) has to meet exceptional difficulties. The report that the British and American banks in occupied territory are carrying on work as usual, seems to suggest that the Japanese are admirable copyists of other people's proceedings, but the end is liquidation under Japanese auspices. It is realised that prosperity is dependent on autonomy, and the Japanese, notorious martinets abroad, will not help the British or other banks to give their services to their old clientele during the winding-up except under strict surveillance.

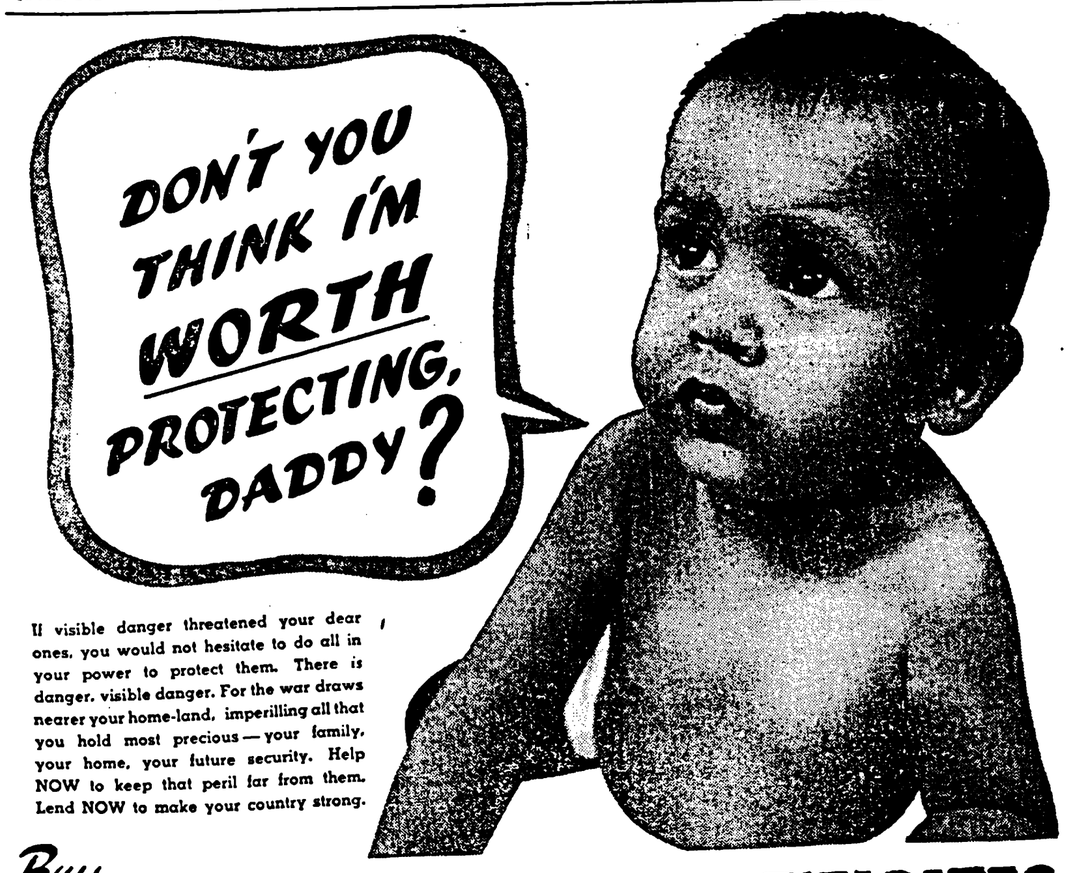
## Finance under Dyarchy and after

With Federation relegated to a subordinate position in a distant future, the present constitution is marked by the establishment of provincial or rather gubernatorial autonomy. Its financial side is apt to be confusing owing to the formidable lists and the frequency of adjudicating on what are really revenue measures like an Excise Act or a Salt Law. The background, however, remains all-important. The roots, if they need watering, require also to be examined. Provincial autonomy did not spring like Athena from the head of Sir Samuel Hoare or anybody else. It was the logical development of the previous system of dyarchy. Roman history, of course, provides a convenient parallel under the Principate, with the important qualification that there was no nonsense about democracy in the first century after Christ.

The important features of the dyarchical system are the division of executive functions between Ministry and Council while responsibility came in unexpectedly. On the financial side its advent led to the imposition of contributions. For the first time indeed, Dr. B. R. Misra has attempted to delineate the ways in which dyarchy was worked, and how the successors of the Montford ministries have developed resources and added to the expenditure. His study (published by the Oxford University Press at Rs. 7-8 in 1942) is not distinguishable from the general run of theses put up for the Ph.D. degree in London. Dr. Anstey's foreword is decidedly kind rather than candid, for Dr. Misra, in spite of an earnest attempt to pack his knowledge, fails to indicate what are the many weak spots he has in mind. The fact that his study turns largely round the financial history and the organisation of the U. P. is to be regarded as a drawback. Most certainly financial autonomy came with the Montford Reforms but the Provinces were handicapped from the start. After the first five years, things changed for the better, and the Meston Award was not hotly criticised. Dr. Misra has made a careful examination of the Meston Award, and concludes that by assigning the elastic sources of tax revenue to the Centre it magnified the defects of the tax system. That the defects linger will bet the opinion of every student to-day. The standstill regime in the Provinces does not promote anything more than an illusory stability. That the entire system may go into the crucible of change is not a very remote aspiration. In the main, the features of provincial finance were settled in 1920. For good or ill, they will stay. It is not surprising that Dr. Misra expresses cautious approval of the division of sources and proceeds settled by Lord Meston, Mr. Hilton Young and Mr. Charles Roberts. The fact that Central finances were reorganised rather late in the post-war period, weighs largely with the author of the treatise in his estimate of the system of contributions. To-day that system is replaced by one of subventions and specific grants-in-aid as in the case of A.R.P. expenditure.

Autonomy came, in spite of permanent inescapable deficits in the case of Sind, Orissa, Assam and the N. W. Frontier Province. To-day Sind gets Rs. 105 lakhs from the Centre and pays back Rs. 75 lakhs on account of the Barrage Debt. The Province will be free of debt only in 1982; until then Central grants will have to be made. Separation explains the peculiar nature of both Orissa and Sind finances. The cardinal feature of the reformed Constitution may be said to be new subventions against the former system of provincial contributions which generated jealousy and misunderstanding. For the fresh start needed in most cases debts were wiped out, and Bengal, for instance, gained like Assam. A separate note on the jute export duty illustrates the modifications made in the period of dyarchy. In 1921 Bengal's contribution of Rs. 63 lakhs was remitted but it was only after the R.T.C. that the Bengal case for a share in the jute duty was conceded. The White Paper of 1933 proposed that Bengal should get half or more of the yield on the export duty and Bengal, now enjoying with others, 62½ per cent of the jute duty has a variable but welcome prop for her revenue system.

But the system designed by Sir Otto Niemeyer was not elastic enough to meet changing circumstances and the Order in Council has modified the entire principle behind the division of income-tax proceeds. It is strange that the modifications, announced by executive fiat and disadvantageous, in the main, to the Provinces, are not noticed by Dr. Misra who probably put together his thesis earlier. Though the habit of quotation is ingrained and pervasive in the entire book, the author hardly inclines to the view that the transferred half did not get enough funds under Dyarchy. He urges that the Joint Purse was something more than a theory. We are not concerned so much with that as with the position developing to-day. The inexorable demands of the war limit the assistance possible from the retention by the Centre of varied and elastic sources of revenue. The general eagerness to try the sales tax springs from the inadequacy of tax revenue. The official opinion against succession duties inhibits the evolution of a tax on inheritance. It is only necessary to recall the adaptability of the kind of tax to agree as to its practical nature. The majority of Provinces have not tried an agricultural income-tax either. There may be perhaps a reintroduction of contributions to the Centre. The war may bring back that or bring in more Central excises. In spite of the leniency of the last budget, it is now accepted that Central expenditure will keep on rising and the duty of the Provinces to help is manifest. That duty may be discharged effectively, should a national government emerge at the Centre.



The survival of non-voted heads of expenditure, either at the Centre or in the Provinces, would become absurd under any new dispensation. It is not improper to urge that Finance Ministers in the Provinces, while agreeing as to the validity of making proper provision for debt service, will ask for a drastic modification of the reserve powers vested in the Governors. Few of Dr. Misra's own opinions can be called controversial, but the statement that "Legislatures have misused their powers in such a way as to deprive Ministers of the whole of their salaries" appears open to challenge.

Important differences as to the revenue system of the Provinces are brought out by the author who follows previous estimates of the totality of results in the case of the Permanent Settlement. His judgment is not at fault in recommending an income-tax on agricultural incomes. The high authority of James Wilson is cited to support the view that zemindars cannot be exempt from income-tax. The very low level of local rates in India postulates the feasibility of taxing agricultural incomes. It is recalled that the Indian Income-tax Bill of 1918 sought to bring agricultural incomes within the scope of the tax by modifying the rate of assessment imposed on other incomes. The proposal would not have taxed agricultural incomes but would have increased the rate of tax on persons enjoying incomes from agricultural and non-agricultural sources. Had it been adopted then, there would have been no need for contributions from the Provinces and much hardship could have been avoided. Dr. Misra goes on to suggest that as an immediate measure in permanently settled areas, agricultural incomes should be taxed at a higher rate (say 25 per cent more than the rates applying to incomes from non-agricultural sources). The exemption limit should also be put at a lower figure, say Rs. 1,000 (this has been done since by the new Finance Bill). The proposal, so Dr. Misra argues, is not incompatible with Provincial interests for the modified tax would help to strengthen Provincial revenues. Just as much as the growth of revenue, predicated by the graduated surcharge, it will guarantee to the Provinces that their share of income-tax will keep on rising in spite of the war.

On most points Dr. Misra's opinion appears to be wholly conventional. In a sense they detract from the value of his careful summary of many reports and records. There is now a specific limit to Profession tax and the local bodies in Madras have been very recently induced to modify the operative schedule. So Dr. Misra's strictures will appear hardly justified. The objections to the sales tax expressed by Dr. Misra run counter to the strong recommendations contained in an earlier work by Professor Vakil and Mr. Patell on the financial aspects of provincial autonomy. It is rather naive to suggest that a tax on petrol sales affects motor transport and diminishes the revenue of the Central Government. Notwithstanding the very colourless form in which certain opinions of Dr. Misra are cast, it is possible to argue that cordial relations between the Centre and Provinces will come, in spite of the ready acceptance of Prohibition in the Provinces. The loss in customs on liquor could be ignored by a national government, and excise, as Madras has demonstrated, can be made good. It would appear that Dr. Misra is in favour of the All-India enactment as regards estate duties. Uniform rates are advocated and the principle of progression is approved. It has been further suggested that the Australian law is a guide as to the administrative procedure required, and evasion through transfers of property **inter vivos** should, if made within three years of death, be taxable. The report of the Taxation Enquiry Committee is cited, in favour of rates ranging from ½ percent on an estate of Rs. 5,000 to 6 percent on an estate of Rs. 20 lakhs. There is another important point in Dr. Misra's scheme. He wants that the estate duty should be collected by the Centre and distributed to the Provinces and Centrally-administered areas. There is good reason for indicating here that on this score advanced opinion will endorse the suggestion of an estate duty. It will be one way of rectifying defects in income-tax and strengthening the finances of the Provinces.

Dyarchy was handicapped by inadequate revenue. Except in the Punjab there is no indication that autonomy has materially strengthened the financial position. Since the study illustrates in many ways the point at issue, it is certain that politicians may have recourse to some of the suggestions made by the author, who is convinced like everybody, that the Indian tax systems suffers from unsatisfactory distribution. The average well-to-do Indian (as the last press note on the enhanced surcharge showed conclusively) pays little by way of direct taxation, and has a definite duty at present to pay more. It is enough to refer to the existence of protective tariffs to show that the poor still pay for the incomes of the rich. Higher income-tax and bigger subventions to the Provinces go together. Which taken in turn mean that we have travelled a long way from dyarchy.

If visible danger threatened your dear ones, you would not hesitate to do all in your power to protect them. There is danger, visible danger. For the war draws nearer your home-land, imperilling all that you hold most precious — your family, your home, your future security. Help NOW to keep that peril far from them. Lend NOW to make your country strong.

### Japan's Gains

The *Economist* has indicated quite recently that the N. E. I. oilfields will be available in a few months. The battle of the Java Sea has put Japan in a strategic position. Success in Timor and the advance in New Guinea are more important from their view than the lull in Burma. As for Burma nothing is known as to the position of the Public Debt office, etc. The recent *communique* about the transfer to Cawnpore like the suggestion to exchange G. P. notes for stock came after the war had spread. Though the Indian investor in gilts is well protected against risks, the Burman's position is now very shaky. It will, of course, be suggested that very shaky. It will, of course, be suggested that very little of India's debt is held in Burma, and it is far more important to make sure that public authorities of Burma will meet claims in India. Be that as it may, there has been so far no de-limitation by notification of occupied territory. The rush of evacuation and the activities of the Fifth Columnists are however calculated to heighten the impression that Burma currency captured by the Japanese may be sent on to India for exchange into more valuable currency. The difficulty of making positive statements does not prevent one from suggesting that the destruction of Rangoon limits the chances of using plunder. There may be no need for precautions under an officially supervised system of evacuation.

Apart from this guesswork, there must be found a place for a reference to the last U. S. freezing order. The N. E. I. assets have been frozen. The Philippines were put out of reckoning even before the transfer of General MacArthur to Australia. The course of Japan's future advance remains uncertain. The Sunday press in Britain is naturally free to speculate on what Japan may do after finishing New Guinea. There is, however, Dr. Benes' prediction that the Nazis will collapse in 1943 and Japan will not be able to exploit her gains thereafter. The break in Mawchi (4 sh.) shares to 8 sh. on the passing of the dividend will be viewed as unimportant, August if one can courageously think beyond as a producer of tungsten the Mawchi Mines Company with its property in the Tavoy District of Lower Burma is sufficiently well-known. The dividend for the last year was 70 per cent. The decision to pay nothing this year is wholly understandable. Madras at one time manifested much interest in Mawchi as in Consolidated Tin. The latter, after the capital reconstruction, acquired some popularity, now seriously prejudiced by the war. The Indian investor has been badly hit by the reverses in Burma as well as Malaya. While estimates of Britains total losses have not yet appeared, there is assuredly no place for computation of India's loss of overseas investments. But it is certain that the export of capital will not reappear after the end of war.

### Atlantic Ferry

The *Indian National Airways Gazette* has suspended publication owing to the war. In its last issue is to be found a note on the ferry service which brings America's heavy bombers to the R. A. F. stations in Britain. The Air Ministry has detailed pilots and crews to work under headquarters in Montreal. Men experienced in civil aviation and American volunteer pilots are to be met with. It used to be said that the first pilot was British, the second American and the wireless operator a Canadian. Pilots are being flown out to take up their jobs. It is a rule that bombers are flown direct to England, but Consolidated flying boats make a halt at Bermuda. The ferry service brings Lockheed Hudson, Boeing B-17 and Consolidated Liberators. The actual trip averages seven to eleven hours. The value is demonstrably great and it may be instanced that in one week of September, the British Government counting on the effective operation of the ferry, placed an order for £81 million, the cost of one thousand Flying Fortresses. Transatlantic services are certainly kept up by Britain whose civil pilots have taken up more important jobs for the duration.

### Rayon in the Modern World

In the December bulletin of statistics issued by the League of Nations is to be found a note on the world's rayon and staple fibre production. As a competitive material whose importance is unaffected by the war rayon will always attract attention. The statistics presented in the bulletin do not cover lanital or artificial wool (made from milke) in which Italy has shown particular interest. The table is arranged so as to indicate the staple fibre separately from rayon yarn properly so-called excluding artificial horsehair, straw, etc. Only two countries report a continuous increase in rayon production up to 1940. The U.S.A. produced 176,936 metric tons in 1940 whereas in 1931 its output was 68,349 tons. In the case of Canada also, the output had risen from 2,665 tons in 1931 to 8,981 tons in 1940. It may be said in passing that Canadian output is hardly 5 per cent of the total for North America. It is, however, Europe, which has no abundance of vegetable fibres, that leads in regard to rayon. While the European total for 1940 is given as 223,000 tons, there are serious gaps in information as regards the output of the Low Countries as of Norway. It should perhaps be added that only Switzerland can report a small but steady rise in the output for the decade covered by the statistical note. Germany is far ahead of both Britain and Italy. One of the direct results of the war is a sharp drop in the U. K. rayon output since woodpulp imports from Scandinavia had been endangered. It is noteworthy that a small rise in rayon was reported by Sweden in 1940. Until 1939, Britain was ahead of Italy and second only to Germany in the matter of rayon.

Though Japan was the world's largest producer of rayon until 1937, it is manifest that export difficulties and the demands of the war machine have led to a fall in output. She is still the only producer in Asia. Fluctuations in output are characteristic of rayon as of any natural fibre. It appears from the note that 1939 was a poor year for rayon whereas 1940 in spite of was marked by the war stimulets to production. The world output in 1940, rose slightly to stand at 523,000 tons and the price also strengthened to some extent. It may be mentioned in passing that the price of rayon has fallen since 1933 owing to the expansion of manufacture. Until 1940 France was not an unimportant source of rayon, but in the case of Czechoslovakia the loss of independence led to a sharp fall even in rayon production by has happened there after September 1939 is hardly known but the note suggests that Germany has at her command very large facilities for rayon production. While rayon was well established in 1931 in public esteem, staple fibre was virtually unknown. The production has since then expanded miraculously. It may be said that Germany alone produces half the world's staple fibre at present. The next biggest producer is assuredly Japan. The U. K. has made limited progress. In India the use of staple fibre production, of course, is unknown has extended since the Tariff Board on the woollen industry recommended its use for mixture fabrics. The U.S.A. in comparison with Germany produces little, but the U.S.A. is also the world's biggest cottongrower. Obviously the scope for synthetic fibres there is strictly limited, while it has grown consistently in both Germany and Italy owing to the conscious pursuit of autarky.

## G. I. P. RAILWAY

**CANCELLATION OF MILEAGE COUPONS FOR MERCANTILE FIRMS**

With effect from 1st May, 1942, and until further notice the G. I. P. Railway will discontinue the issue of mileage coupon books for mercantile firms.

Coupons from coupon books issued before 1st May, 1942, will however, be accepted during the period of their availability.

Coupons from books issued by foreign Railways on or after 1st May, 1942, will not be valid for local journeys over the G. I. P. Railway, but such coupons will be accepted in part payment for the issue of through tickets from stations on this Railway to stations on foreign Railways according to the provisions of para (13) of Rule 88 of Coaching Tariff Part I-A.

### Output Still Rising

The cotton industry has reported successive increases in production during the year, that is coming to an end. It has long been manifest that Indian textile activity has been stabilised at a very high level. For instance, November witnessed a rise of 10.6 million yards in the production of piecegoods. Production for the eight months ended November amounted to 2,991 million yards as against 2,755 million yards in the corresponding period of 1940-41. Associated causes were the rise in exports and a continuous fall in imports. For instance imports in November fell to three million yards. As for exports, the big rise in October failed to hold, and November witnessed a sharp fall. Total exports for the eight months ended November came to 430 million yards as against 217 million yards. Re-exports, too, were running higher right up to November. Total imports for eight months at 170 million yards were greatly below the 1940, level of 309 million yards and also below the unprecedented total for textile exports. The state of activity explains the rise in mill earnings in all parts of India in the latter half of 1941. At least one company has announced a dividend of 90 per cent on its Rs. 100 ordinary shares. The dividend will be acclaimed as a record for Cawnpore, and it is certainly noteworthy that it is payable despite a much larger provision for taxation. Earnings in this case exceeded the paid-up capital substantially, and the recently issued report has therefore attracted a great deal of attention.

The advance in cotton textile production is reflected in the growth of mill consumption of cotton over this period. November accounted for a further rise in cotton consumption all the more welcome since a sharp decline in raw cotton exports was a feature of the month's trade. Total exports for eight months amounted to 1,118,000 bales and the next month should have seen a drastic fall in shipments. Indian mills have also taken larger quantities of foreign cotton in 1941-42. Takings for the eight months ended November are known to be 651,000 bales against 360,000 bales in the same period of 1940-41. There is every sign that the record total of 1937-38 will be topped this year in spite of the increase in the import duty announced two months ago.

### Quick Change

While the typewriter factories in the U. S. A. give up making machines and change to war work like refrigerator makers, little is known here as yet about the sterling performance put up by British radio manufacturers. According to a recent report, the manufacture of radio sets for sale at home or abroad has been drastically curtailed. Before the war about two million sets were sold at home and a hundred thousand wireless sets were exported. But now the Government orders though not for radio sets give enough work. Much of the work is secret and war-like equipment like the tele-communication apparatus has taken the place of private listener's receiving sets. Radiolocation apparatus is also produced by wireless manufacturers. Many items of war equipment for all branches are produced by the British radio industry which is busy on war work and does not at all think in terms of the home market or replacement demand. The picture may be said to prove that industrial concentration and diversion has made rapid strides. The radio industry under Government control is producing something more than sets for leisured listeners.

### Iranian Supplies

The large extensions to Bombay's tank installations taken along with the new description of essential staff bestowed on the men employed at Wadala and elsewhere have made Bombay mindful of the oil of the Middle East. It is not necessary to read *Reuter's* messages to learn that India is altogether dependent on Iran. The Iran field still stands as a monument to Mr. D'Arcy's enterprise and vision. It is also the main prop of British naval supremacy for the Admiralty is greatly interested in Anglo-Iranian's future. The oil royalties constitute a very important source of revenue for the State giving as much as 10 per cent of revenue. To-day when the Dutch Indies and Burma have faded out of the oil picture, the Empire has greater appreciation of what can come only from Abadan and Hasa. If no reference has been made to the contribution of Saudi Arabia to the Empire's oil pool, not many will have overlooked the independent gesture made through the expulsion of the Italian envoy from Jeddah and the refusal to meet the sinister Dr. Grobba. As Iran has no large industry apart from the oilfields particularly the Masjid-i-Sulaiman field it is clear that Iran is helping the Allied war effort in the way desired. As a thousand Indians are employed already and more are likely to go to Iran to help expand production, the importance of disregarding Iran's cabinet crisis need not be stressed.

June, 1941), turns it into a remarkable record. In the debatable hinterland where three Powers, Japan, China and Russia struggle for position, live wandering tribes who are almost jostled out of their pastures by Chinese colonists. Since we know little of Outer Mongolia (under Russian influence) and Inner Mongolia (under Japanese influence) a volume that deals with Mongol ways of life and work is to be welcomed as throwing light on a large region where anything may happen. Mr. Lattimore, pro-Chinese as he may be, does not disguise his view that the Manchu Emperors did better than the Republic in dealing with the Mongols. Politics apart, the book is a mine of curious information. How many know that interbreeding between goats and sheep is possible and the resulting offspring are not sterile like mules. Mr. Lattimore's servant, Arash, a quondum Lama, told him that. Of woolcombing and felt-making, of camel-breeding and horse-breaking there is careful and precise mention. Life beyond the Gobi can be hard, but Mr. Lattimore found much pleasure in difficult conditions.

### Rationed and Rational

Clothes rationing introduced by Captain Lyttelton last year, has been tightened up in Britain. The scheme put an end to fashion and appeared to be a copy of German methods with the important difference that no ersatz materials appeared. The coupon system with its list of gradations came to the forefront and the limitation of supplies secured the co-operation of manufacturers. It is hardly a year since Britain came to accept rationing—unknown in the last war as regards clothes. The shortage of cotton yarn has been referred to as a factor influencing the recent decision in regard to limit the clothing allowance. The shortage of raw materials, wool, cotton and silk as also woodpulp is obviously the basic cause. That shortage really originates from present shipping difficulties, not from the scarcity of supplies at source. The effect will ultimately be the same. Only the bare minimum needed for replacement will be provided and the utmost economy in the use of existing garments will have to be practised. For a few months last year, there was a disposition to make fun of rationing or to frown on it as vexatious. Subterfuges were resorted to, but the war has shaped a new men's opinions as to the duty of submitting cheerfully to the duty of having to do with old, shabby or strictly utilitarian clothing.

A further step to enhance durability and curtail the use of fabric is contemplated according to recent reports. Economy of material in making up and the fullest value for the money are sought to be combined in the revised rationing schemes. Clothing manufacturers, undoubtedly a prosperous class in normal times, will be certainly hit by the rationing more than ever. Textile manufacturers who have forgotten all about the export drive of the first year of war are also likely to suffer. It might be said that the textile branch of British industry will suffer even more than before. If industrial concentration has already changed the status of the cotton industry, there is not going to be much change. Of the objects of rationing, the establishment of uniformity and the common standard of cutting etc., enough is known, but the extended use of limited supplies is to be achieved by various other means. Utility clothing is to be made by 1,200 firms designated by Government as approved manufacturers and two-thirds of the material produced for home consumption is to be of utility specification. There will be thus control of wholesale manufacture. The tailor or the clothier's shop can hardly offer anything different from what is permissible or tolerated. The amount of material and the kind of accessories for what are known as non-utility garments is also to be controlled. The number of buttons is to be reduced, double breasted coats are banned, and the most revolutionary change provided is the disappearance of turn-ups for trousers. Women's frills and furbelows will be drastically limited. It is not only the non-combatant who comes under the 'less clothes' regulation; the War Office intends to change the style of officers' uniforms too. The box-pleat from breast pockets will disappear. The reduction in clothing manufacture is expected to release some 50,000 men for war work. One gain will be the elimination of cheap, shoddy clothing because the main idea behind revised clothes rationing is to provide a few strait garments. A utility garment will carry with it a guarantee of quality. This will certainly make the British public bear the yoke of rationing cheerfully.

### Changes in Foreign Trade

Of the difficulties created by the war in the Pacific, there is little or no indication in the seaborne trade returns for January. Recovery certainly characterised both the import and export trade of India in that month. The total value of imports rose to Rs. 11.54 crores and the slight drop in re-exports forced up the proportion of retained imports. The value of exports rose by nearly a crore to stand at Rs. 20.7 crores. The figures indeed suggest that the setback recorded in December was adventitous but war developments since seem to support the

pessimism imported into the comments here on the December trade returns. There is, as before, a substantial excess of exports. The January figures are not at all likely to be inflated by price-changes. The total value of exports for the months of 1940-41 will suggest that the present year should see the peak value for aggregate exports. For the ten months the total is as high as Rs. 197.2 crores and it is as much as Rs. 13.12 crores for re-exports. The advance in exports admittedly exceeds the rise in the value of imports to Rs. 183.85 crores for the April-January period. The favourable balance of trade has never been as high and the trade returns afford evidence once again as to the benefits flowing from the war as, for instance, in regard to the repayment of the sterling debt.

The main feature of the January returns is the increase in imports of tobacco. The small rise under grain, pulse, etc., can be ignored but not the pronounced increase in India's imports of raw cotton during the month. The single largest item under imports, however, was oils, vegetable and mineral. Total takings accounted for Rs. 1.85 crores as against Rs. 2.02 crores in January 1941. It is certainly suggestive that the value of cotton manufactures, which in the past, accounted for one-fifth of India's total imports, is as low as Rs. 20.7 lakhs whereas the chief item under imports of manufactures in January was Machinery of all kinds including belting. The next largest item was drugs and chemicals valued at Rs. 62.09 lakhs. There is, however, some ground for regarding the fall in imports of manufactures as a permanent factor. A year ago the total was Rs. 9.67 crores; the total for January 1942, is only Rs. 5.00 crores. The reason is not far to seek, and the usual note on the direction of trade makes it plain that the loss of many sources explains the fall in imports. As anticipated generally, there was a fall during January in imports from the U.S.A. which in the ten months has provided India with imports valued at Rs. 30.95 crores. The total for Britain for the same period is Rs. 31.06 crores only. The January figures may suggest that trade with Hong-Kong and the Straits Settlements was maintained. Those well posted with current affairs will readily note that India's markets abroad have disappeared one by one in recent months. The trade returns record the complete cessation of trade with Japan while indicating that India's exports to the Soviet Union in the ten months ended January 1942, were valued over Rs. 51.85 lakhs. The astounding growth of trade with Egypt and Iraq is clearly bound up with war in the Middle East, but in the growth of trade with neutral Arabia, many will find a fresh source of satisfaction. Imports from Iran keep rising. Total value for ten months puts Iran ahead of many countries. Parallel growth of exports to Rs. 83.19 lakhs does not suggest that India can provide anything as valuable to-day as Iran's oil. Trade with the British Empire in the East showed clearly the effects of the spreading war, but exports to Australia showed no signs of decreasing at present. Australia, indeed, ranks after Burma as the largest customer for Indian goods. By comparison New Zealand's takings of India's exports are negligible.

### War and Insurance

The singular unanimity of opinion, in the matter of affording cover for war risks in the case of civilian lines, is attested by current advertising in the press. The unanimity is the result of efforts made to convince the Indian insurance that it should stand by civilians suddenly forced to face war risks. Of the informed opinion brought to bear on the issue, Mr. Byramjee Hormusjee's address to the Indian Life Offices Association is typical. He urged that policy conditions in all cases should cover war risks for all civilian policyholders. He wanted that there should be no doubts as to the protection given by the policy. Only in the event of withdrawal from civilian occupation can the assured be deprived of the benefit payable even against war risks. The danger of enemy action has by no means receded, and Indian policyholders of Indian companies have reason to feel pleased with the immunity from additional premium normally payable when war risks have to be provided against. It was contended by Mr. Hormusjee that because Indian companies usually obtained over 90 per cent of the life business offering in India, they should combine to make clear that claims arising through the war would be met without reservation or quibbling. The war certainly occupied a

ISSUED BY SUPPLY DEPARTMENT, GOVERNMENT OF INDIA

large part of Mr. Hormusjee's speech. He discussed the loss of business in adjacent countries and the absence of communications with policyholders residing abroad. He asked that such policyholders should be shown special consideration and every possible facility should be given to revive lapsed policies after the usual formality of declaration of good health and payment of overdue premiums with interest. In the event of claims arising from death in occupied countries, he recommended that claims proved should be met liberally. There is no longer any uncertainty as to what is due to policyholders under war conditions. Indian companies, as Mr. S. C. Roy has insisted over again, have not raised their premia because of altered conditions, and they should ignore for the sake of past benefits and possible gains the existence of abnormal risks. The decision has been generally applauded by the public which has now every inducement to support Indian insurance for the duration.

**Russia's Resources**

The Russian advance to Kharkov does not mean the restoration of original war potential. The Ukraine is not weakly held. It is now established that the rationalisation of conquest is no empty phrase; the Nazis therefore are not likely to withdraw easily. In this context, the importance of Urals will be grasped readily. The region is still the Soviet Unions second line of defence. Beyond the Volga there arose, during the planning period, new centres of industry based on the varied minerals. The development of power production alongside of coal mining gave it added importance. Having its own source of oil the region may be called self-sufficient. At Ufa in the Urals stands one of the largest refineries in the world. In the dispersal of industry that followed the planning era the Urals gained much. And the fear of war after 1939 likewise gave a special impetus to the deconcentration of industry in Russia. When Moscow and Leningrad were threatened in October 1941, various reports appeared as to the development that had taken place in the Urals where copper, bauxite, manganese and many other metals are to be found. Timber, too, is plentiful, and factory construction was facilitated by the loan of machines and spares by Britain. The actual shifting of factories from Russia proper was not an easy business, but the temptation to make the most of Magnitogorsk was overwhelming. Ural iron has been allied to Karzanda's coal and the result is one of the world's giant steel plants turning out six to seven thousand tons of steel per diem in addition to many by-products. The tractor factory of Chelyabinsk is famous and the old salt mine at Usolye is the foundation of great chemical enterprises. Explosives and fertilisers are produced with the aid of the potash deposits of Solikamsk. Magnesium too is an important by-product of the Urals. The oilfield in the Urals producing half a million tons of aviation petrol is still more important as the drive to the Caucasus is by no means ruled out. Russia having difficulties as regards plant and tank production cannot afford to experience troubles in regard to essential fuel. And it is lucky that the Urals will permit her to get second wind.

**More Criticism**

Industrialists in India are still prone to complain of Government's indifference. The indifference is contrasted with the urgent need to speed up and expand India's war effort. In the second All-India Manufacturer's Conference at Poona last week, there were heard old grievances and new appaals. Sir M. Visveswarayya referred to the neglect of armaments-producing machinery. He declared that only raw and semi-finished materials were taken from India and orders for machinery and equipment were turned over to other countries though they did not apparently have special resources or experience. Yet it is possible to develop from the present base. An American mission is expected and India's industrialists are anxious to know how far the new mission would help to get the industries started. It has been frequently said that the Indian administration is not endowed with the industrial impulse, and gaps in India's war production have been listed this year by Sir P. P. Ginwala. The heavy armaments industries have not risen, and Indian businessmen are acutely conscious of what may come if India cannot reinforce China's resistive power

Planning has been formally respected but of its effects there are few traces. It is on a realisation of the negligence up till now of vital needs that the President of the Manufacturer's organisation asks for what he calls regional development as a preliminary to postwar reconstruction. Sir M. Visvesvarayya specifies the national industries. The more important key or basic industries which require special attention are increased production of steel, manufacture of machinery for industrial plant of every kind, automobiles and aircraft, shipbuilding and heavy chemicals including dyestuffs, cellulose or rayon. The list is certainly formidable. What the public of the region suited to particular enterprises is expected to do is not clear. All that is recommended is the flotation of loans by Provincial Governments bent on starting key industries and paying out interest till the concerns make profits. It is very doubtful if the Provinces can adopt the policy, however favourable the atmosphere might be. It is true that Sir Visvesvarayya harks back to the district development scheme and wants all-round balanced development. But the financial problem will remain, and it is not indicated how the regional or other organisation will deal with it. Local patriotism can be stimulated if it is a matter of supporting one or two Swadeshi concerns, but the creation right from the foundation, of vast enterprises, is beyond any committee or association. The equipment needed will present another problem, and it is doubtful if regional development will weigh with the Government in regard to the grant of tariff assistance. More education, more training and more information bureaux are advocated. Familiar views are reiterated in support of the theory that heavy industries are neglected, and it is openly regretted that Australian yards have been given the orders for new ships. From a new angle then, the war effort is appraised. It is urged by the critics that industrialists can acquire zest for the war if important heavy industries are developed, and assured further, of advantages in the postwar period. This may seem a tall order but there is the urgent need to increase the war potential. Government has certainly not ignored existing or possible facilities and in the engineering or other fields the progress directly due to the war has been substantial enough.

**Canadian Supplies**

The U. S. metal programme did not affect the U. K.'s purchases of copper, lead, zinc etc., in Canada which produced many minerals besides nickel. The world production of nickel showed a large increase in 1940 and Canada's capacity to treat her ore expanded in consequence of the world's nickel and the balance probably comes from New Caledonia, now under Free French control. The U. S. A. is a large buyer of aluminium from Canada as also nickel. Aluminium output in Canada is known to have more than doubled and further plant extension will help both Britain and the U. S. A. The Allied control of Greenland ensures supplies of cryolite. The base metals are in abundant supply as Canada can give copper and lead. but there are strategic minerals which are wanted by the U. S. A. Last years increase in U. S. A. stocks was due to advance buying of antimony, graphite, manganese, mica. mercury, etc. The R. F. C. put a hundred million dollars at the disposal of the Metals Reserve Company, which contracted to take thirty million worth of tungsten ore and 3,000,000 tons of sodium nitrate from Chile. The difficulty of getting Russian manganese and Turkish chrome impelled the U .S. A. to look for new sources in South America. Two metals are largely provided at present by Canada. A large part of the world's supply of asbestos comes from Canada, and the Dominion is besides the biggest Empire producer of mercury at present. Minor minerals are also being developed in response to demand. For instance, tin in commercial quantities is being produced from the residue of other metallurgical operations and promising tungsten deposits, located in Canada last year, will modify the U. S. A.'s dependence on the Far East. The New World is assuredly better off than the Eastern Group whose self-sufficiency is seriously compromised. Except for the Union of South Africa and Rhodesia cum the Congo basin, the mineral resources are in grave danger because of shipping difficulties. Anyway the calls for Canadian bauxite, chromite and manganese should be enlarged rapidly just as it was noted that in 1941 came a sharp rise in Brazil's shipments of iron and manganese ores to the U.S.A.

There was an announcement recently that the Hon. Mr. Aney, Overseas, Member, would be shortly visiting Calcutta and Chittagong. So far, Mr. Aney has not been able to undertake this tour.

Meantime, his department has issued a press note, Black Road **versus** White Road. The purpose of the communique is, it is obvious, to "white wash" the White Road. The attempt to whitewash is clear, but the result of the whitewashing is far from edifying.

One would have expected of a public man of the standing and antecedents of Mr. Aney to admit straightaway that the allegations made were true; and to promise that no such grievance was possible hereafter. From this point of view, I would fain believe that Mr. Aney has not carefully scanned the press note; and that the sole authorship and the main responsibility are those of some minor god in his department.

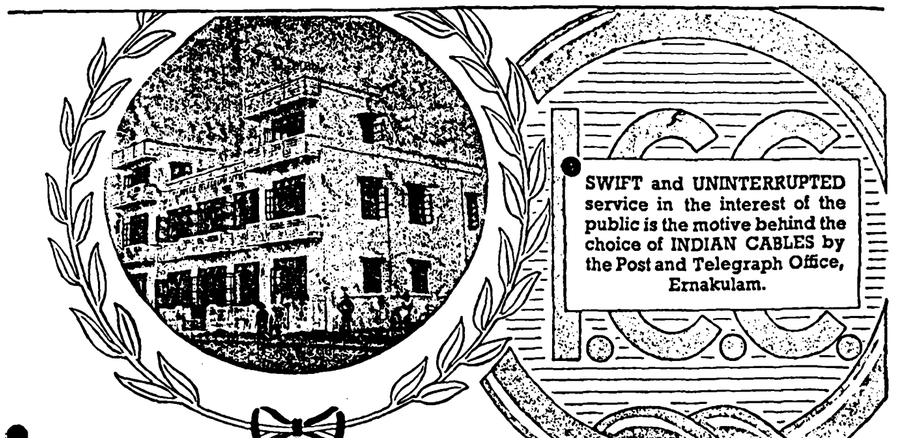
The very opening sentence is astounding. "Keen public interest has recently been shown," we are told, regarding the land route and the allegations that, in the arrangements, European and Anglo-Indian refugees have been accorded favourable treatment.

Keen public interest A more correct word for the public feeling in this matter will be indignation. And humiliation that all this has happened while a progressive nationalist Indian is the Member in charge of the department concerned.

The next para contains this statement: "Until about three weeks ago, one route from Tamu on the Burma Frontier to Pallal in the Manipur State provided almost the only outlet from Burma to India." So far as my information goes, the description" until about three weeks ago" and "only outlet" is not correct.

The alternative route, to which reference is made in the following paragraph, has been open for very much more than three weeks. This is the notorious Black Road.

This, it is admitted, is the longer route. But, adds the communication, "differing but slightly in length."



We learn also that this route has natural water facilities sufficient, if properly organised, to cater for a large number of foot-passengers. Well, all that we need say is that, till very, very recently, if at all, the natural water facilities were not properly organised.

To go back to the original route, which is the White Road. The communication admits that recent events have justified its description as the White Road and explains how it came to be the White Road.

This route became a source rather of danger than of safety. Why? Sanitation was ignored, cholera spread and the whole route became contaminated.

It was, therefore, necessary to restrict traffic on this route. And, the communication adds blandly, it is the restricted use of this route which has given rise to a serious apprehension that racial discrimination was taking place.

In the next para, the Government note proceeds to set out the facts:—

SWIFT and UNINTERRUPTED service in the interest of the public is the motive behind the choice of INDIAN CABLES by the Post and Telegraph Office, Ernakulam.

The facts are that, before control of all routes was undertaken under Central direction, stocks of European food, such as tinned beef and similar provisions had been supplied at the halting places on this route by certain private organisations. Supplies of food for Indian travellers were lacking and no supplies for Europeans had been stocked on the alternative route. Under Government control, the original route, with its small capacity, became of minor importance so far as evacuation was concerned and the first, and most immediate, steps taken were to stock the alternative route with sufficient food and supplies suited to Indian requirements to support the maximum number that could then be cleared from Pallel onwards into India proper.

In the meantime, it was decided that, subject to the overriding consideration that the route should be kept immune from cholera infection, Europeans and Anglo-Indians, whose numbers have never hitherto exceeded fifty a day, should be allowed along the original route where the stocks of food would otherwise be wasted.

It was a mere accident that the carrying capacity of this route was fifty persons daily and the number of European and Anglo-Indian evacuees were on an average fifty per day.

It was also a mere accident that some private organisations sent food, tinned provisions, etc., suitable only for Europeans.

It was, thirdly, an accident that these foodstuffs suitable for Europeans were distributed only among the halting places on this route.

Any idea of deliberate design was only in respect to the anxiety of the Government that this food must not be wasted.

There was no deliberate racial discrimination. Such discriminaton as there has been is the result of three accidents and one design.

Why recriminate over the past?—you may ask. My only purpose is to emphasise that it would have been far more graceful to admit the errors instead of attempting far-fetched explanations.

I shall now end with the comforting observation that all's well that ends well. For, we are now assured that the Black Road will be no longer a death-trap and agony-chamber.

At present the number permitted to use this route daily is 1,500, but arrangements are being made to increase that number very shortly. Five camps have been established between Tamu and Pallel at each of which there is not less than one doctor. Each camp has an adequate supply of water, sanitary arrangements, medical assistance and food supplies for 3,000 people and is in charge of a commandant.

The White Road will hereafter be a road without much of colour infection. "At the same time, it was recognised that Indian requirements should also be catered for on this route. This is now being arranged and the route will be open, within its limited capacity, to all persons of whatever race who have inoculation certificates and can be relied upon to comply with the strict sanitary standards that the conditions of the route necessitate."

The snag is the words "inoculation certificates." I don't say that these certificates are unnecessary. But I have heard quite a number of reports that much harassment is being inflicted in the name of inoculation certificates.

Let me plead, in all earnestness, that these unfortunate, distressed Indians be treated with the consideration due to human beings.

It is not at all hard to link up Mr. A. N. Wardley's impending retirement with the centenary of Kilburns. Of Mr. Wardley and his services to the Local Board of the Reserve Bank for which re-election is due reward everyone in Calcutta must be aware, but his association with the firm ends this month amid what may be called the happy circumstances of the auspicious centenary year. Kilburn's centenary, to be exact, falls on 31st March, because the firm was founded by Mr. C. E. Schoene in Calcutta on or before April, 1842 to represent a London house as also St. Petersburg and Havre firms. And the firm first in Garstin Place, and later in Fairlie Place, worked and throve as many did in those days of less strenuous competition. The name of Kilburn came into the firm in 1849 when Mr. Edward Dunbar Kilburn joined as partner. Export and import loomed large in the last century and Kilburn's prosperity was partly based on indigo, foreign wines and brandies as also silk. To-day Kilburn's most important interest lies in the India General Navigation and Railway Company. In conjunction with the R. S. N. it serves the whole of Upper India. The river flotilla is large and efficient, and now that north-east India will be the avenue to China, the company's services will be of increasing importance. Very important connections with the tea industry in Assam have strengthened the position of Kilburn in the plantation industry which in turn depends largely on river transport. I believe at one time they specialised in importing emeralds and getting them cut up-country. This highly specifised business has unfortunately decayed but the insurance and other agencies continue to show that Kilburns discharge successfully the many functions associated with every managing agency firm.

It is not often that I am able to record matters relating to an Empire company's progress here, but I must certainly describe certain points established by that remarkable company, the Sun Life of Canada in its seventy-first year. The Company's support to war loans in many lands shows how investment policy can be widened to second war effort. It is an inspiring example for all concerns and institutions in the Commonwealth though the huge aggregation of the Sun Life assets are distributed in such a way as to keep down the actual proportions of Government bonds. With 995 million dollars in assets the Company's worldwide operations take on a new meaning. Strain is unknown because service is self-evident. It is not at all surprising that 57,789 policies worth 187 million dollars were written during the last year. You can do the conversion into Indian money taking one Canadian dollar as roughly equal to Rs. 3. Premium income for 1941 was 112½ millions. Investment receipts amounted to 36.3 millions. New business has actually gone up in 1941; so has revenue and the total value of assurances in force. The Sun Life may be called a three-billion company but it is something more than that. It has paid out 1½ billions in claims so far and in the last year alone paid 2½ millions in taxes. Because of the war and the prevailing apprehensions I think a reference to Sun Life experience would be appropriate. Total war claims for over two years amounted to only 2.2 percent of total death claims. I think the point that the war does not have any marked effect on average mortality is fully established by the experience of a great and famous office with large interests in Britain. If Sun Life's precautions against extra hazards in the matter of contracts and premiums are cited of late in India. I am obliged at the same time to say that old contracts are wholly unaffected. Insurance carries on valiantly in many lands, and the Sun Life President claimed that North America still gives a decisive lead. Indeed, Sun Life reported better business in Britain and other parts of the Empire as well. And the increase in new business over 1940 was obtained despite withdrawal from Europe. There is much for the insurance man to ponder in the Sun Life report. The fall in the lapse ratio, like the reduced volume of requests for policy loans will excite as much attention as the increase in management expenses referred to by Mr. Wood at the Montreal meeting. The Sun Life is fully reconciled to cheap money; that is another arresting feature emerging from Mr. Wood's usual survey of events. And the Sun Life's help through the pooling of savings for the Canadian victory loans illustrates the form of help always possible through the institutional investors.

*(From Our Correspondent)*

*New Delhi*, March 24.

NEW Delhi gave a warm welcome to Sir Stafford Cripps who has hurried to India by a special plane for consultations with political leaders. With in a few hours of his arrival he agreed to meet Press representatives, but though he had a friendly and encouraging statement to make and answered all questions with great frankness, he declined to reveal the Cabinet's proposals. But what he said was sufficient to indicate that the Cabinet's scheme was a far-reaching one which, in his own words, "will appeal to Indian leaders." At this stage it is difficult to say whether the scheme will succeed in removing the obstacles to co-operation, but in the Assembly lobbies there is a distinct feeling of hopefulness—thanks largely to the optimistic tone of Sir Stafford's statement itself. To-day and to-morrow Sir Stafford will be spending with the Viceroy, the members of his Council and the Governors who have arrived, but afterwards interviews with the leaders of parties and Provincial Premiers will begin. At the moment so much depends upon Mr. Jinnah's attitude that nothing can be said of developments in the immediate future. That is probably the reason why Sir Stafford prefers to keep the proposals secret for the time being, for if one or major parties refuse to accept the scheme or suggest major modifications, it will have to be reconsidered by the British Cabinet.

* * * *

Lobby talks proceed on the assumption that so far as the future constitution is concerned, the British Government is prepared to concede the principle of a constituent assembly, but a procedure will be suggested for satisfying those communities and interests which have now separate electorates. Instead of going by majority decisions the suggested procedure will provide for agreed points and arbitration on those matters upon which there is any serious difference of opinion. It is hoped that while this procedure meets the demand for the full constitutional status of freedom and equality, it provides sufficient safeguards to satisfy the Muslim League and other parties. As regards War-time Government, the proposal is to Indianise the Council completely and have also a small war Cabinet in addition which will include representatives of the Princes also. A Council of 16 Members is proposed with full powers over the Government of India's administration with certain reservations—certain subjects which will be directly under the Viceroy. If the Congress and the Muslim League can agree on the principle and method of distributing these seats, the problem can be easily solved. As a practical measure for ensuring autonomy in internal administration the transfer of the India Office to the Dominions Secretary seems to be one of the proposals. It is evidently hoped that these proposals will commend themselves as a practical form of National Government having in view the requirements of war-time conditions. Sir Stafford has wisely decided to meet the parties separately and not try the experiment of a Round Table Conference. If these separate consultations show a fair measures of agreement, then the idea of bringing the leaders together for settling the details may be taken up. As Sir Stafford has fixed two weeks for his stay in India, there is no time or scope for prolonged discussions.

* * * *

At the request of Malaya and Burma Indians who have lost properties in those areas, Mr. Bhulabhai Desai agreed to join the deputation which met the Finance Member this week and discuss the question of income-tax concessions. It has been agreed as a result of this conference that assessment proceedings will continue in order to ascertain the amount of tax-payable, but further collection of tax on all income, remitted or unremitted which accrued in Burma, Malaya and Indo-China in the previous year for the 1941-42 assessment as to be postponed during the period of the war. This meets to some extent the difficulties of Chettiars and others who had extensive business in these territories. The loss to the Central Exchequer as a result of this postponement of collection is expected to be about Rs. 50 lakhs. Another concession granted by the Finance Member in the course of the discussion on the Finance Bill was the raising of the taxable minimum for income-tax to Rs. 1,500—no small relief to 7 lakhs of people who would have otherwise been assessed. Apparently the Finance Member overlooked the fact that in certain provinces there was already the employments tax on these very incomes and that if the Finance Member insisted on taxing income down to Rs. 1,000, these poor classes would have been subjected to double taxation. The Finance Member rightly agreed to exempt incomes up to Rs. 1,500 though it meant a loss of another Rs. 50 lakhs.

* * * *

The effect of the war on the Posts and Telegraphs Department is described in detail in the Annual report for 1940-41. The amount invested in Post Office Cash Certificates during the year was Rs. 499 lakhs as compared with Rs. 1,038 lakhs during the previous year. There was an increase of Rs. 2 crores in the amount paid on account of the discharge of cash certificates in 1939-40. There was a decrease of 38 per cent in the number of active Savings Bank accounts. The balance to the credit of depositors also showed a fall of 24 per cent. As regards the Post Office Life Insurance Fund the number of policies fell to the report shows that 2,696 from 6,353 in the previous year. The Department, however, earned a surplus of Rs. 1¼ crores—the largest since 1925.

HILL-BIRD.

**NORTH WESTERN RAILWAY**

**Closing of stations Matli (exclusive) to Badin on the Hyderabad (Sind)—Badin Section.**

The Railway Line between Matli (exclusive) and Badin on the Hyderabad (Sind)—Badin Section of the N. W. Ry., will be finally closed from 23rd April, 1942. The booking of traffic will therefore be stopped as folows:—

Traffic of all descriptions from foreign railways.

(From 14th April 1942).

Local Goods Traffic in bookings to stations on the section itself.

(From 22nd April 1942).

Goods Traffic in booking from stations on the Section itself

(From 14th April 7942).

Local passengers and other coaching traffic in bookings to stations on the Section itself.

(From 20th April 1942).

Passenger and other coaching traffic in bookings from stations on the Section itself.

(From 22nd April 1942).

The public is also advised that on and from the 23rd April, 1942 the running of trains 479 Up, 477 Up and 478 Down and 480 Down between Matli and Badin will be discontinued. There will be no change in the train service between Hyderabad and Matli.

*Bombay*, March 25.

COMMODITY markets are again looking backwards. It is not the upset in bullion but the suspension of dealings in cotton under the auspices of the East India Cotton Association that engenders anxiety. War news is still discouraging, in the main; the Mahajan Association still keeps futures going but cotton will remain depressed. Pictures of what the mills might make do not concern the cotton trade which still thinks of the export side. In spite of the usual abuse of speculators it does not look as though they alone are going to push prices down. The war is now the major factor in the price situation and crop restriction promised for 1942 takes a subordinate place. While the theory as to hedge contracts is unaffected, the mills generally think that only spot prices can stand. It is widely argued that there is really no place for futures as the world's biggest market, Liverpool is virtually dead. It is feared that, as in the case of jute, the prime requisite is more stability and less sensitivity. This view is gaining many adherents. U. S. markets are apparently carrying on as usual but the markets there are not likely to exaggerate war news when textile consumption is still picking up and the C. C. C. is able to sell some part of its holding. Here the position is difficult; there is no demand for any part of the surplus.

While Bombay is not thrilled by the concessions as regards assessment to income-tax promised by the Central Board of Revenue, it is feared that the deputation which went up to Delhi is likely to get small change out of the authorities. The Burma Indian delegation in fine seeks to interest the Indian Government in the matter of compensation. While so much is heard about evacuation, it is surprising that little is known about the wanton destruction of property. Muslim merchants here have been decidedly hit. They are watching how the Central Government is going to meet the claim for compensation. The deputation issued a statement last week as to the consequences of scorched earth and the precipitate release of prisoners and lunatics. It is considered essential that the Burma Government must be notified of the losses arising from their own action (not the enemy's) and asked to arrange for compensation. If this is not done, it is likely that Indian businessmen, who are still in doubt as to the application of scorched earth tactics in India are likely to register mistrust of Government's ability, as of its good faith and goodwill. It may be urged cogently enough that the question of scorching any earth does not arise because India is a British-occupied country, and such losses as may be sustained by British interests through the war do not concern the natives of India.

Having suffered in Burma and Malaya to a considerable extent, Indian commercial interests here are not likely to be pleased by any such suggestion as may be made about overriding national interests. The newspaper quarrel in another part of India reveals the very sharp difference of opinion between Indian and non-Indian views. The promise of doles to evacuees, on recommendation from the Provincial Governments, does not affect the major argument as to the preservation of property. Where there is debenture capital the creditors' interests naturally require to be considered first, and Government's participation in enterprise, so far being limited to the exaction of revenue, there can be no case at all for urging that property should be destroyed to prevent capture. The complete monopoly enjoyed by the British or the alien in the Colonies permitted the application of the scorched earth rule. The position is altogether different in India where Indian savings have contributed largely to the growth of industry.

Civil defence preparations go on without fuss or fretting. The brown-out is a permanent feature and people are swotting up the lessons of A. R. P. instructors. Last week an engineer from Burma described the virtue of keeping under cover whi lea raid is on. Baffle walls and sandbags are good as they go but the human body is safer it it is below the surface. Obviously Brer Rabbit's habit of lying low and saying nothing has a very wide application. But advice is meant for the private person, not for the A. R. P. worker. Bombay's salvage corps is in shape already. They had a demonstration last week, and to judge from many reports showed that a very vigilant group of fire-fighters are ready to deal with fires, rescue people and help the injured. The municipality's employees are naturally prominent in this wing of civil defence and their skill has indicated that trained persons are always better than enthusiastic amateurs.

Apart from the criminal case in which an employee of the Supply Department is mixed up as an accused, there are other things to suggest that the public attitude is not exactly hearty. The charges of nepotism, corruption, etc., have been answered in the Assembly but the fact that many Members of the Assembly pursued the parvenu department indicates that it is not the same department as Sir M. Zafrulla had organised. The transfer of Major-General Wood must have weakened the Supply Department. The absence of any departures in procedure still, prolix, dilatory and commonplace, has been condemned. It is recalled that the U.S.A. has already abolished the tender system for war supplies. Those who made fun of the order and specification for combs urge that the practices inherited from the Stores Department can have no justification. Years ago, there was open competition from foreign firms, and a real need for economy. Now speed is the chief factor, and all the delay in getting supplies is of the department's own making. A correspondent in the *Times of India* remarked that three weeks are taken to place an order. Reference to Delhi is yet the rule and the formula of tender, scrutiny and award just eats up time. The man who claims to be 'out for output' asks if the routine can be adhered to when delay is dangerous and adds that if high prices are paid taxation takes the bulk of the profits out of the contractor's pocket. A more serious charge than unimaginativeness, one of inefficiency, against the department has been levelled. Indecision is the product of ignorance or worse, and the press is asked to be more than usually vigilant in noting cases of ineptitude.

Messrs. Killick Nixon have indicated that the Tapti Valley Railway will from next week be added to the State Railways. At the annual meeting last week Mr. R. C. Lowndes discussed the career of the company since 1896 and announced that the last dividend to be paid to shareholders is 7½ per cent tax-free. Being entirely Indian in capital, the first company floated by private enterprise in India, the Tapti Valley and one other company under Killick Nixon's aupices had the distinction of getting Rs. 142½ lakhs for railway construction in the last century itself at home. The Baroda Government gave material assistance to the railway as Mr. Lowndes acknowledged. The line opened in December 1898 was profitable from the outset and helped to develop the Gujerat and Khandesh districts. In the early stages the dividend was just three per cent, but the return thereafter has shown substantial increase. Mr. Lowndes expressed regret at the termination of the connection between his Company and the railway. Sir P. Thakurdas paid a tribute to the managing agents for their faithful stewardship. The line is known to be in first-class condition and it is quite likely that it will be administered as a branch line by the B. B. and C. I. Railway. The shareholders will get 120 per cent of the capital outlay. That is the usual arrangement after the voluntary winding-up is over. An extraordinary meeting is called for on April 17 and the first distribution is likely to be as large as feasible. The payment will be made as soon as possible after the meeting.

The Supply Department's newfound interest in small industries was described in a very brief note from Delhi by the *Times of India* correspondent. They were going to hold a conference this week to find out means of harnessing small establishments and minor workshops to the war effort. Persistent complaints have been heard of undeveloped capacity and neglected resources particularly from Madras. The charge has been latterly met by the promise to make full use of small, unorganised industries. This is a supply conference produced by local suggestion, not external developments. It will be interesting as proving that India is planning ahead of Dr. Grady's arrival; the engineering industry is sure to manifest much interest. Of the achievements of small workshops in the war period little is known but it is clear that apart from the extension of sub-contracting, there is scope for a new scheme of industrial planning. The scheme has to dovetail into plans for industrial decentralisation. Gone is the time to speak of the maximum benefit obtainable from large-scale production. Dispersal may be enforced by enemy action, and the new survey of possible plants must take note of what can be done with nucleus plants outside the vulnerable spots or rather the areas inviting attack by air or sea. Provinces have been asked to help in choosing places and plants suitable for the new broadening of production. It is certainly necessary to keep up standby plants for production, and educational orders might confer the experience necessary in any case.

The Military Police are in large force. The reports of disorderly behaviour are responsible for that and the limitation of shore leave for naval ratings is also understandable after the protests in the press. Many places are out of bounds and closing time in many cases earlier. Government has been forced to act in response to complaints and pickets have been placed.

CAST IRON PIPES

For Gas and Sewage Mains the superiority of Cast Iron Pipes over all other forms of piping remains unchallenged. Impervious to rust and the corrosive effects of gases and chemicals, Cast Iron Pipes have almost a limitless life, which makes them the most durable and dependable of all underground conveyors. Engineers know that by specifying Cast Iron Mains they are safeguarding a city's vital services against risks of sudden breakdowns and expensive replacement costs.

# Resume of Commodity Markets

There is nothing of importance in the commodity markets during the past week. The jute market has been slightly firmer towards the close with the decision of the Bengal Government to reduce the acreage under the crop for the next season. The hessian market has remained barely steady while a further decline in prices has been recorded in the Bombay raw cotton market. The bullion markets have been uninteresting. In the silver market, however, there has been a resumption of speculative activity, especially in the ready position.

The general outlook is considered rather gloomy as with the internal difficulties regarding transport and the difficult shipping position it is said that there will not be any large trade in commodities.

**Jute:**

The feature of the week is the decision of the Bengal Government to reduce the acreage under the jute crop for the next season to eight annas of the area in 1940 from ten annas orignally decided upon. It will be remembered that only recently the Bengal Premier stated that it was not advisable to reduce the acreage under the crop for 1942-43 as he had the assurance from the Commerce Member that it would not be difficult to find the demand and that the problem was only of transport. The Central Government also gave the assurance to the Bengal Government that they would come to the latter's assistance if prices for jute fell below a certain minimum. What has happened between now and then it is difficult to see. Surely, it cannot be pointed out that the calculations regarding the ability of the authorities to find the requisite freight have gone wrong. It would be difficult now to bring about the required reduction in the area of the jute crop as the licenses have already been issued and preparations for sowings have been completed in most districts. The Premier has appealed to the cultivators to behave as if the licenses had been issued for an eight annas crop and grow instead food crops on the surplus land. Fortunately, sowings in the highlands have been retarded with the absence of rains.

Slightly more buying has been noticeable in the last two days and there seems to be a shortage of the higher grade jutes. Sellers are reserved.

**Jute Manufactures:**

The jute manufactures market has been uninteresting. There is still demand for near shipment but mills are unable to sell for the forward positions. Shipments during the current month might possibly be more than expectations but the future of exports, even for the next month, is very uncertain and there is no tendency on the part of shippers and operators to enter into any fresh commitments.

According to the March issue of the Indian Central Jute Committee's **Bulletin**, arrivals of jute into Calcutta and mill area during the seven months ending January 1942, totalled about 44 lakhs of bales as compared with 57 lakhs imported during the corresponding period of the previous year. Recent figures published in the **Bulletin** show that there was a fall in the consumption of jute during February 1942, as compared with the previous month. Mills consumed less raw jute and their stocks of manufactured goods also rose.

The shortage of bags in the Argentine still persists and the local government have decided to construct and equip a factory for the production of cotton bags. It is reported that necessary machinery may be purchased from the United States and low grade cotton will be used as raw material.

The shortage has become very acute in the United States. Even the substitutes, such as, osnaburg bags and heavy paper bags are now difficult to obtain. There is a good demand for jute bags but shipping difficulties stand in the way of importing them from India.

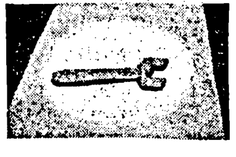
Sandbags are now being used in very large numbers for purposes, such as constructing air craft pens in places where stone and bricks cannot be used. Mideast authorities have suggested that at least 25 per cent. of the bags exported from India should be rot-proofed.

Samples of a new type of black-out material and bitumen treated hessian for obscuration of glazing on glass roofs have been prepared by the jute industry and submitted to the Defence authorities.

The problem of textile materials is becoming more and more critical in Germany. The paper yarn industry is growing rapidly to take the place of jute and hemp. From 80 to 90 factories were reported to be engaged by the middle of 1941 in this line of production.

**Raw Cotton:**

The Bombay raw cotton market has been rather weak and there has been a further decline in prices with continuous selling.



Across the seven seas the floating fortresses churn their way. Immense, imposing structures dedicated to protection and, when necessary, attack and destruction. In them is concentrated the marine art and invention of generations.

But where to-day those Gleaming banks of guns throw their shadows across the ocean, to-morrow the happy keel of cargoboat and merchantman will cleave the seas.

Just as to-day Steel serves with its strength, to defend the battleship to give it invincible might; to-morrow, Steel will give dependability to the argosies of men, giving wings to the narrow bows as they cleave the waters.

*Always—Everywhere—Steel for Strength*

*To withstand the immense strain imposed on them, the smallest of details in modern structures are made of steel.*

# Jute and Jute Manufactures

(By Our Jute Correspondent)

*Calcutta*, March 26.

More fireworks at the Board of Control! It will be remembered that when Japan declared war, the Board, to prevent any catastrophic collapse in Jute Fatka, fixed a minimum price of Rs. 56, below which no transactions would be permitted. For the time being this measure was effective and the price remained above the official minimum and any sudden and dangerous slump was prevented. Gradually, however, the price of the raw material has declined in the open market, with the result that the quotation for J. A. First marks has dropped considerably below the minimum fixed in Fatka, and transactions in that market have come to a standstill. That perhaps was no bad thing, but there are still transactions open in the Futures market which, by reason of the official minimum being out of relation to the open market rate for First marks, cannot be closed out. Certain operators in the East India Jute Association have therefore recently petitioned the Board to take steps to permit transactions to be resumed so that the March settlement could be concluded. These letters came up for consideration at a meeting of the Board last week. The Government of Bengal is represented on the Board at present by the Acting Special Officer, Jute, who presumably holds more or less a watching brief on behalf of Government. The present incumbent, however, appears to take a wider view of his functions, and at the meeting in question took up an entirely obstructive attitude on the purely technical ground that, as no transactions had been recently been taking place in the Futures market, the Board was incompetent to fix any clearing rate other than the official minimum. This is perhaps strictly correct, but it is not helpful in clearing up a position which would much better be liquidated. It is moreover a somewhat peculiar attitude coming from one who has pronounced, the Futures market to be the only *real* market in the Jute Industry. Reminiscent almost of Jekyll and Hyde! The only way out of the impasse apeared to be for the Board to rescind its resolution fixing the minimum price and so reopen the market for transactions more on level with the current values of shipments J. A. Firsts. This was put to the meeting and carried, despite the protests of the Government representative that notice of this intention should be circulated. The rescission, however, appears to be well within the powers of the Board, which are fairly comprehensive; that the point was to be discussed at the meeting had already been notified, and if any trade interests were not represented at the meeting to state their case, that is only their own blame. Incidentally not a single Director of the East India Jute Association was present. The meeting accepted the technical position that, as no transactions were reported in the Futures market at 1 o'clock on Friday, no clearing rate could be fixed. It is now however permissible for operators to transact business at whatever level the market is struck in relation to the price of shipment Firsts, and on such transactions a clearing rate for March settlements can be fixed by the Board at a meeting this week. As we have said, it is difficult to reconcile the attitude of the Government representative with his published eulogies of the Futures market as the only "real" market in the Industry. If on the other hand, the attitude he adopted was dictated by the policy of Government, it is difficult to understand why Government should be so anxious to protect the interests of the "Bulls" in the Fatka against the depredations of the "Bears," when it has looked on with apparent equanimity while the actual raw material market has steadily declined to quite a marked extent. And it is the price of the actual raw material which affects the pocket of the cultivator, whose interest Government professes to have at heart, and not the price of Fatka. It was suggested that the "Bears" had plenty of opportunity to clear their hand after the minimum price was fixed. Equally it may be said, so had the "Bulls." But in any case, the Board of Control does not exist to further the interests of either Bulls or Bears but to exercise some measure of control over the movements of the Futures market in relation to actualities and not necessarily to academic theories.

The Government of Bengal have just come out with the news that they have altered their views as regards the size the jute crop for the coming season should be, and instead of the 10 annas crop envisaged and for which licenses had been issued, they are now advocating a reduction to eight annas. The announcement also contains an appeal to all parties to co-operate towards the attainment of this goal in order that the lands so freed may be utilised for cultivating food crops. It is apprehended in view of the war situation that India may well feel the need of Bengal's full contribution of rice as the usual supplies from Burma and the Far East must be ruled out. This appeal coming so late when the low and churland sowings are completed and have advanced materially in the midlands, owing to the recent rains, could at best only affect the highland crop. It is doubtful, therefore, whether these cultivators at this juncture could be induced or prevailed upon to reduce their quotas in favour of their more fortunate brethren of the lower lying districts. We cannot look to this measure having any marked success and its effect on the market has hitherto been negligible.

Very dull conditions prevail in the jute markets as mills have shown the minimum of interest. A very small lot of Pucca Bales has been put through and towards the close a small business in cutting has been transacted by mills at Rs. 11-8 and Rs. 10-8 for NC's and MC's and export TC's at Rs. 11 to Rs. 11-8. Sellers for white jute continue to press for sales of limited lots without attracting buyers. Nominal quotations are as follow:—

| | Tops. | Mids. | Bots. | X |
|---|---|---|---|---|
| | Rs. A. | Rs. A. | Rs. A. | Rs. A. |
| European packing from .. | 13 12 | 10 12 | 6 4 | 4 4 |
| Indian packing Jat from .. .. | | 10 0 | 6 0 | 4 0 |

The only activity discernible is focussed on Balers' purchases—sales of Daisee, Tossa. This has been stimulated by a substantial allotment of freight for shipment to the United Kingdom which is mainly for the Dundee Daisee and Tossa grades. In view of the small number of Balers still working their Press houses and packing these marks, prices for these qualities have steadied. European sellers disposed of some small stocks of their loose jute · Tossa to these Pucca Balers at Rs. 12 and Rs. 11 for Tops and Mids.

**3⅛ p.c. INTEREST**
**Free of Income-Tax**

*How does a Defence Savings Certificate grow in Value ?*
The value of a Rs. 10 Certificate increases year by year until it is worth Rs. 13-9 in ten years' time.

*Do I pay Income Tax on this Increase ?*
Not an anna.

*Where do I buy Defence Savings Certificates ?*
At any Post Office doing Savings Bank or at any Savings Depot.

*How do I buy Defence Savings Certificates ?*
You can buy them in any multiple of Rs. 10 up to the limit allowed to each individual, *viz.*, Rs. 5,000.

*Can I buy Defence Savings Certificates by instalments ?*
Yes, You can buy As. 4, As. 8, or Re. 1 Defence Savings Stamps and stick them on a card, which is supplied free when you buy your stamps at the Post Office or Depot.

*Suppose I'm ill, or want my Savings urgently ?*
You can apply, at any time, for repayment of your Defence Savings Certificates.

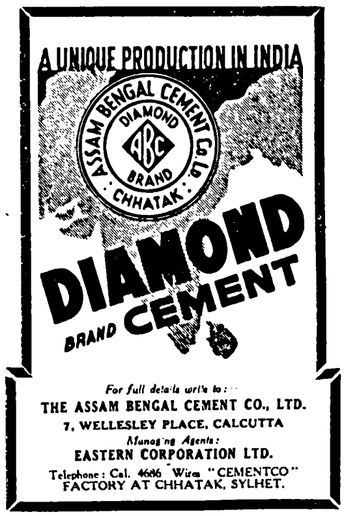
*The space is kindly donated by the Imperial Bank of India.*



## JUTE

*Calcutta*, March 26.

The important event of the week is the decision of the Bengal Government to reduce the area under the crop to 50 per cent of the acreage in 1940 from 66 2/3 per cent of the area in 1940. Sometime back, the Bengal Premier gave out his reasons for not effecting any reduction in the acreage. It now appears, however, that there will be considerable difficulty in getting the necessary freight. As the necessary licenses for effecting sowings have been issued, the Premier has appealed to the ryots that they should behave as if the licenses had been issued for eight annas crop. It remains to be seen what the reduction is in the total yield of the crop.

In the loose jute section, business has continued to be on a very restricted scale. European Tossa Middles and Bottoms were done at Rs. 12 and Rs. 11 per bale.

In the pucca bales section a larger amount of business has been reported in higher grade jutes. Dundee Daisee 2/3 and Tossa 4's were done at Rs. 58 per bale with buyers over. Mills are reported to have bought Firsts 2/3 at Rs. 54 per bale.

## JUTE MANUFACTURES

*Calcutta*, March 26.

The jute manufactures market has remained steady on continued covering for near positions. Shipments during the current month have been much more than expectations but it is highly doubtful if prices are maintained at the higher levels. There has been a further rise in quotations during the week, 9 porters Mar. being Rs. 19, April 18, May-June Rs. 17 and July-September Rs. 16-4. 11 porters March are Rs. 24-4, April Rs. 23-4, May-June Rs. 21-8 and July-September Rs. 20-12.

In the heavy goods section, "B" Twills for March shipment sold on the basis of Rs. 38, Liverpool Twills Rs. 41-12 and Cornsacks Rs. 38-8. Demand for near positions seems to have been satisfied.

## GOLD

*Calcutta*, March 26.

A further decline in prices is to be recorded in the Bombay gold market during the past week. From Rs. 52 at the end of last week there is a decline in the quotation of Rs. 50-14. There is also a drop in the quotation for sovereigns to Rs. 38-10. Speculative buying seems to have abated.

## SILVER

*Calcutta*, March 26.

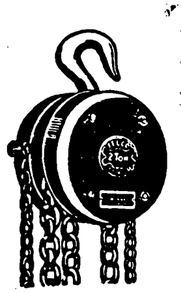
The silver market also was inclined to be easier and a further decline in prices was recorded. Towards the close, however, a firmer tendency has been noticeable and the premium for ready silver over first settlement has improved from Rs. 3-8 to Rs. 6. Indian Mint Silver ready are Rs. 84-9 and First Settlement Rs. 78-9.

In the London market the quotation for spot and forward is nominally quoting at 23½d.

## COTTON

*Calcutta*, March 26.

The statement by the Commerce Member that purchase of cotton on Government account will be made by authorised agents, has not had any effect on the market. With the deterioration in the war situation and jobbers' selling there has been a continual decline in prices. Closing quotations were only slightly above the lowest levels for the week.



## WHEAT

*Calcutta*, March 26.

The wheat market has remained steady though quotations are slightly lower. Business passing is on a very small scale. Arrivals are coming in small quantities. Cawnpore ready are quoting Rs. 5-12 and May Rs. 5-10. Broach April-May are quoting Rs. 162-8, July-August Rs. 181, Bengal May Rs. 125, July Rs. 130-8, Oomra May and July Rs. 138-8 and Rs. 149.

There has been a further rise in prices in the New York market on continued mill buying. May futures are quoting 19.05 cents and July 19.16 cents.

## RAZA TEXTILES PAYS MAIDEN DIVIDEND

It has been an absolutely uninteresting week. Slightly firmer conditions were noticeable in both the Bombay and Calcutta markets earlier in the week. But never at any time has there been any appreciable increase in the volume of business and, barring the most popular counters, no quotations are available for most of the listed securities. The slight recovery in values for 3½ percent Paper and short-dated loans might suggest a return of confidence but with the war situation confused as it is, no sustained rise in values can be expected. Friday morning's news from the Burma front is very discouraging indeed from the market point of view.

• • • • •

With mines closed throughout the year, it cannot be expected that *Shivrajpur Syndicate Limited* would have been able to earn any decent earnings. Thanks, however, to the enquiry from the United States towards the close of the year and the receipt of Rs. 83,854 from the French Mission, being the F.A.S. value of the ore shipped per the s.s. *Mount Othrys* during 1940 it has been possible to recommend a higher dividend for the year ended November 1941. The net profit, before providing for taxation and depreciation, for the year is Rs. 1,79,451 (including Rs. 83,854 written back) against Rs. 3,03,605 for 1939-40. As the sum of Rs. 1,90,070 was written off as bad debt in 1939-40 and the sum of Rs. 83,854 was transferred to Bad and Doubtful Reserve, the dividend of only eight annas per share was paid on the last occasion after transferring Rs. 35,000 from the Dividend Equalisation Reserve. Out of this year's accounts, after providing Rs. 29,824 for taxation, Rs. 35,000 to Equalisation of Dividend Reserve, Rs. 12,666 to Investment Account and Rs. 10,000 to Bamankua Mine Purchase Account, the dividend recommended is considerably higher at Rs. 1-8 per share. The position as reported last year in regard to the company's claim for Rs. 1,90,070 on account of the F.A.S. value of ore shipped by the s.s. *Archangelos* was unchanged at the end of the financial year but, as a result of the continued efforts of the Selling Agents in London, the payment of £14,000 on account was obtained by them from the French Mission in January 1942 and will be included in the accounts of the current year. It will be seen from the note on the face of the balance-sheet however that, under the indemnity given by the Selling Agents as a condition of payment to them by the French Mission of the foregoing amount, the Company may be called upon to meet claims the amounts of which, at present, are unknown.

• • • • •

In the first year of full working the *Raza Textiles Limited* has done very well. The Company's mills have been employed at full production capacity working two shifts. The night shift, however, worked for nine months only during 1941. There has been no difficulty in selling the company's products which have been received in the market favourably. Large orders from the Supply Department have been received. In order to be able to cope with those orders, it has been decided to instal additional machinery and a new bleach and dye house.

• • • • •

The net profit, before providing for taxation and depreciation, for the year ended December, 1941 is Rs. 7,64,606. The provision for depreciation is Rs. 2,39,487. The sum of Rs. 54,434 has been written off preliminary expenses while Rs. 1,01,581 has been allocated to Reserve for Renewals. After paying off in full the arrears of dividend on the preference shares, there is to be a maiden dividend of 10 per cent on ordinary shares. The balance carried forward is the substantial sum of Rs. 87,483 against the debit balance brought in from the last account of Rs. 36,555.

• • •

The prospects for the current year should be considered as even more encouraging. As the company is registered in the Rampur State there is no liability for Excess Profits Tax and it should be remembered that it is difficult to pay large dividends only because of the need for providing a large amount in respect of E.P.T.

• • • •

The accounts of the *Gondalpara Mill* for the year ended December, 1941, in common with others, make good showing. The net profit, before providing for taxation, is Rs. 12,85,540 against Rs. 9,91,616 for 1940. The increase in provision for taxation is more than the increase in earnings. The total allocation on this account is Rs. 6,85,184 against Rs. 3,53,688 for 1940. Only after reducing the charge on account of depreciation, Rs. 2,75,000 (Rs. 3,25,000), it has been possible to maintain the dividend at Rs. 30 per share.

• • • • •

The accounts of the *Tapti Valley Railway Company Limited* for the last complete year of working make very good showing. Thanks to a large increase in both coaching and goods traffic and the less keen motor competition the earnings for the year 1941 are higher.

• • • • •

The net profit, before providing for taxation, is Rs. 18,17,104. The provision for taxation is Rs. 8,43,543. The final dividend of 3 per cent makes, with the interim dividend of 4½ per cent already paid, 7½ per cent tax-free for the whole year. The distribution for 1940 was 9 per cent less income tax. It would have been possible to pay a higher dividend but for the considerable increase in the provision for taxation.

• • • • •

The company will be taken over by the Government as from April 1, 1942. The purchase terms binding on Government result in the redemption value of the shares being not less than Rs. 630 each and arrangements will be made in due course to disburse, in addition, surplus revenue moneys including the profit from the working of the line up to March 31, 1942. The Liquidators will arrange to pay a substantial instalment of the redemption value in due course of liquidation after the Government has paid the purchase price which is due before July 31, 1942.

• • • • • •

The results of 51 companies published in 1942 do make very interesting reading and would normally have had an encouraging influence on stock exchange values. Earnings of companies belonging to all industries show a rise particularly those of jute and cotton. Net profit, before providing for taxation and depreciation, for the 51 companies is Rs. 6.45 crores against Rs. 3.80 crores for the same companies reporting in 1941 and Rs. 3.26 crores reporting in 1940. Eleven jute companies have earned Rs. 1.12 crores against Rs. 55 lakhs and the same number of cotton companies Rs. 2.49 crores against Rs. 86.23 lakhs. Sugar companies have experienced good trading conditions

WATCH-DOG.

# The Week in the Exchanges

## CALCUTTA STOCK EXCHANGE

*(From Our Correspondent)*

Calcutta, March 27.

THE week under review is short-working on account of the fact that markets have remained closed from Thursday for the *Ramnavami* festival. During the short period in which markets have remained open there have not been any important developments and business has continued on a restricted scale. A slightly firmer tone was noticeable in the giltedged securities section with some useful rises in the quotations for the short-dated loans. There has been some investment buying though it cannot be said that there has been a return of confidence. With the further deterioration in the war situation in Burma it can be hardly expected that there will be any broadening of interest. In the Engineering section, Indian Irons and Steel Corporations were marked higher on covering and fresh buying. The quotation for Indian Irons at the close was Rs. 24-4 against Rs. 21-4 at the time of last writing.

In the giltedged securities section, as pointed above, slightly steadier conditions have been noticeable though there has not been any appreciable increase in the volume of business. The main reason for the improvement in prices was the lull on the Burma front but with the rapid progress made by the Japs during the last two days the improvement might not be sustained. 3½ per cent Paper was quoting towards the close at Rs. 88 against Rs. 87 at the time of last writing. There has been a moderate rise in the quotations for the short-dated loans also, 3½ per cent 1947-50 being noted at Rs. 97-9, 3 per cent 1946 at Rs. 97-12 and 5 per cent 1945-55 Rs. 104-15. Other loans have remained unchanged. No transactions have been recorded in provincial loans. There has been no change in money conditions during the week and the treasury bills rate is only fractionally higher at one rupee two annas and nine pies per cent per annum.

Not many transactions have been recorded in public bodies' debentures. 5½ per cent *Calcutta Improvement Trust* were done at Rs. 115. Among industrial debentures, 5½ per cent *Hukumchand Jute* were done at Rs. 100-8, 6 per cent *Howrah-Amta* at Rs. 107 and 6 per cent *Humayan Properties* at Rs. 100-8.

Business in the Jute section has been mostly in preference shares, *Anglo-India* preferences being noted at Rs. 134, *Bally* at Rs. 120, *Caledonian* at Rs. 134, *New Central* at Rs. 131 and *Naihati* at Rs. 130. *Purtabpore* were crossed at Rs. 15. *Burn & Co.* 7 per cent preferences were done at Rs. 130 and *Steel Corporation* preferences at Rs. 93.

In the Cotton section, *New Victoria* were again the only counter traded in, the quotation for the ordinary shares being Rs. 4-8.

No transactions have been recorded in the Coal section.

In the Jute section, *Kamarhatty* were noted at Rs. 447-8, and *Standard* at Rs. 203-5. For other counters, there are no buyers around the minimum prices.

In the Engineering section, *Indian Iron* and *Steel Corporation* have again been the only two counters in which transactions have been recorded. From Rs. 22-4 on the first day of the period under report there has been a rise in the quotation to Rs. 24-4. Usually, this is the time when the directors announce the payment of the interim dividend. *Steel Corporation* also have been marked higher in sympathy and the quotation is now Rs. 14-4 against Rs. 13-8 at the end of last week.

The Sugar section has been quiet but steady with *Buland* at Rs. 23-14 and *Champarun* at Rs. 19-4.

Among Tea shares, *Bateli* changed hands at Rs. 7-4, *Belgachi* at Rs. 20-8 and *Sonai River* at Rs. 23-2. *Dessai and Parbuttia* were noted at Rs. 258.

In the Miscellaneous section, *Indian Copper* were Rs. 1-12, *B. I. Corporation* Rs. 4-12, *Indian Wood Products* Rs. 27 and *Aluminium Corporation* Rs. 11. *Frank Ross* were Rs. 5, and *Titaghur Paper* Rs. 18-4. *Midnapore Zemindary* were Rs. 65.

## BOMBAY STOCK EXCHANGE

(From Our Correspondent)

*Bombay*, March 26.

*Money.*—The rate for call money is maintained at ¼ per cent.

*Exchange Market.*—Banks are selling T.T. at 1s. 5 31/32d. and buying three months' bills at 1s. 6 9/32d.

*Securities.*—Prices of select government securities continued to move upwards during the week owing to investment demand. By comparison with last week, 3½ per cent paper has improved from Rs. 87-6 to Rs. 87-15; 1945-55 from Rs. 104-7 to Rs. 105-1 and 1946 *Defence Bonds* from Rs. 97-4 to Rs. 97-14. Among other loans, 1948-52 were maintained at Rs. 93; 1951-54 at Rs. 94; 1963-65 at Rs. 88-8; 1947-50 at Rs. 97-9; 1960-70 at Rs. 103 and 1955-60 at Rs. 107-8.

*Shares.*—Business in the local stock exchange continued to be restricted. The reports that a war risk insurance scheme for factories is being prepared, imparted a steady tone on Monday and prices improved all round on good buying enquiry. Towards the close on Wednesday, however, there was some selling of a profit-taking nature and prices closed slightly easier. Bank shares were in fair demand. The stock exchange remains closed to-day. There has been nothing like the usual recovery after Parsi New Year day this time.

*Textiles.*—Prices in this section after touching higher levels closed slightly lower on some profit-taking. *Bombay Dyeing*, after touching Rs. 1,147/8, showed a drop of about 20 points, closing at Rs. 1,130. Similarly, *Central India* were a shade easier at the close at Rs. 335; *Century* at Rs. 381; *Colaba* at Rs. 162/8; *Gokak* at Rs. 255; *Kohinoor* at Rs. 427 and *Svadeshi* at Rs. 365. In the cash list, *Ahmedabad Advance* and *Sholapoor* were unchanged at Rs. 305 and Rs. 5,000 respectively. *Vishnu* were, however, marked slightly higher at Rs. 1,470.

*Hydro-electrics: Andhra Valley* showed a rise of 60 points to close at Rs. 1,515, while *Tata Power* were slightly lower at Rs. 1,402/8. *Tata Hydro* were unchanged at Rs. 159. This group has successfully stood up to the upsets noted in the forward group right through 1942.

*Steels.*—Steel shares showed no change. *Tata* ordinaries and deferreds were quoting Rs. 285 and Rs. 1,525 respectively. The 1st preferences came in for business at Rs. 185 and the 2nd preferences at Rs. 113.

*Banks and Insurance.*—Bank shares were in demand, *Central Bank* changing hands at Rs. 42; *Imperial Bank* fully paids at Rs. 1,420; contributories at Rs. 350; *Bank of India* at Rs. 136-8 and *Reserve Bank* at Rs. 96-8.

In the Insurance section, *New India* were marked at Rs. 44.

*Miscellaneous.*—*Associated Cement* were hovering around Rs. 156. *Bombay Burmah Trading* old shares were steady at Rs. 233, while the new shares were slightly lower at Rs. 76-4. *Belapur Sugar* were done at Rs. 230; *Scindia Steam* at Rs. 19; *Shivrajpur Syndicate* at Rs. 30 and *Premier Construction* at Rs. 108-8. The revival, to which many still look forward, is conveniently illustrated by the reappearance of dealings in several old forward shares this week. It is hoped that after the carry-over arrangements go through investors will show more enterprise and extend support to steels. There should be some thing more than a flicker in view of higher dividend prospects.

## MADRAS STOCK EXCHANGE

*(From Our Correspondent)*

*Madras, March 26.*

Prices in the local market continued to be pulled one way by the Far Eastern situation, trading during the week being of small dimensions. Reinvestment inquiry is still too small to excite comment. Cotton mill shares were in fair demand, while planting issues were well maintained.

*Securities.*—A better tendency has been noticeable in this section during the week and 3½ per cent Paper has improved to Rs. 87-15. 3½ per cent 1947/50 loan was done at Rs. 97-6 and 3 per cent 1951/54 at Rs. 94. State and Provincial Loans were in the main unchanged, 3 per cent 1956/61 *Mysore Loan* being done at Rs. 101-6 and 3½ per cent *Travancore Loan* at Rs. 102-10.

*Mills.*—Popular Scrips in this section met with good enquiry. *Buckingham & Carnatic* ordinaries were taken up at Rs. 166 x.d.; the preferences at Rs. 148-8 s.l.; *Pankaja* at Rs. 146-8; *Madura* at Rs. 36 c.d.; *Cambodia* at Rs. 10-10 and *Vasanta* at Rs. 136. *Coimbatore Murugan closed* higher at Rs. 108, while *Aaron Spinning* were crossed at Rs. 7.

*Utilities.*—*South Madras Electric* ordinaries continued to be steady at Rs. 11-8. *Cochin State Power* were wanted at Rs. 5-10, while *Berhampore Electric* were available at Rs. 12-8. *Madras Telephone* after a long time came in for business at Rs. 13-4.

*Plantations.*—A fair turnover was possible in Rubber shares, owing to the revival of interest in some of the lower-priced shares. *Cochin Malabar* continued to meet with good enquiry at Rs. 8-9 and Rs. 8-10. *Rajagiri* were in enquiry at Rs. 7-6; *Thirumbadi* at Rs. 2-1 and *Midland* at Rs. 6-15-6. *Among* Tea shares, *Peermade* had buyers at Rs. 29. *Chembra Peak* continued to be a popular counter at Rs. 4-7 c.d. following the declaration of an interim dividend of 10 per cent for the year ended 31st March, 1942 as against nothing in the previous year.

*Sugars.*—*Mysore Sugar* after being done at Rs. 49-12, closed a shade easier at Rs. 49-8. *Travancore Sugars* were transacted at Rs. 11-12.

*Banks.*—*Indian Bank* small shares had business at Rs. 23-8, while *Indian Overseas Bank* were crossed at Rs. 73-12 s.l.

*Miscellaneous.*—*Mettur Chemicals* preferences were in good enquiry at Rs. 130 c.d. following the announcement that the directors have sanctioned the payment of all arrears of dividend till 31-3-1941 on the shares and also provided an ad-interim dividend for the year 1941/42 at 3 per cent. A dividend of 3¾ per cent on the Old ordinary shares and 1 7/8 per cent on the new ordinary shares has also been declared, both ordinary and preference dividends being payable on or after the 15th April, 1942. *Madras Port Trust* 5½ per cent debentures were crossed at Rs. 100. *Mysore Lamp* were done at par.

## Minimum Prices for Giltedged Securities, Preference Shares, Railways and Banks.

*(Annual meeting, held 27th March, 1942).*

*Audited accounts for the year ended 31st December, 1941:—*

The total expenditure including interest and Rs. 5,688-0-9 in respect of sale and shipping charges amounted to Rs. 1,46,709-7-4.

Owing to the abnormal conditions prevailing the cost of stores, manures and Tea chests is still high.

Gross sale proceeds of tea realised and estimated amounted to Rs. 3,23,798-7-5.

The net cost of quota purchased was Rs. 47,978-7-8. Income from the sale of sweepings and miscellaneous receipts amounted to Rs. 388-12-0.

After providing for staff commission, Income-tax, Super-tax, Agricultural Income-tax, Excess Profits Tax and also for a contribution of Rs. 1,278-6-0 to the Provident Fund there remains an available balance of Rs. 1,08,045-11-7 which includes the net sum of Rs. 9,354-13-2 brought forward from the 1940 season after final adjustment.

The directors recommend that the available balance be disposed of as follows::—: : :

| | Rs. | A. | P. |
|---|---|---|---|
| Dividend at 6 per cent without any deduction in respect of income-tax paid by the Company .. .. .. .. | 21,000 | 0 | 0 |
| Appropriation to Reserve .. .. | 80,000 | 0 | 0 |

leaving a balance of Rs. 7,045-11-7 to be carried forward.

*Season* 1942.—The estimates provide for an outturn of 4,500 maunds of tea for an expenditure including sale charges of Rs. 1,52,063.

*Managing Agents.*—Messrs. Gillanders, Arbuthnot & Co.

Synopsis of the balance sheet as at 31st December, 1941:—

| *Liabilities.* | Rs. | *Assets.* | Rs. |

*(Annual meeting, held 31st March, 1942 at 4-05 p.m.)*

*Audited accounts for the year ended 31st December, 1941:—*

*Area.*—The planted area of the garden at 31st December, 1941, remained at 470.50 acres of which 16 acres were replanted during the year.

*Prices.*—The Government of the United Kingdom, represented by the Ministry of Food, made a contract with the company through the Tea Controller for India, for the purchase of 2,44,909 lbs. at 1s. 1.52d. per lb. which is equivalent to As. 12 per lb.

A supplementary contract was entered into for the supply of 36,000 lbs. at the same rate.

Both contracts were completed with a total delivery of 2,80,909 lbs. accepted.

Export quota for 1,070 maunds was purchased.

After deducting net cost of quota purchased the combined average price realised and estimated for the whole crop was As. 11—10.23 per lb. which compared with an average price of As. 10—7.87 per lb. realised for 1940.

*Accounts.*—The total expenditure amounted to Rs. 1,66,419 including sale and shipping charges Rs. 5,113.

Owing to the abnormal conditions prevailing the cost of stores, manures and tea chests was again high.

Gross sale proceeds of tea realised and estimated amounted to Rs. 3,33,579.

The net cost of quota purchased was Rs. 35,674. Income from sale of sweepings claim realised in respect of green leaf damaged by hail and miscellaneous receipts amounted to Rs. 3,908.

Rs. 4,062 has been written off the company's holding of 3½ per cent Government Loan 1947-50 to reduce the book value to par.

After taking into account the interest earned on investments and deposits and other income and after providing for staff commission, income-tax, super-tax, agricultural income-tax, Excess Profits Tax, also for a contribution of Rs. 1,458 to Provident Fund, there remains an available balance of Rs. 1,30,582-13-0 which includes Rs. 29,510-8-4 brought forward from the season 1940, after final adjustment.

It is recommended that this sum be disposed of as follows:—

| | Rs. | A. | P. |
|---|---|---|---|
| Paying of a dividend of 20 per cent without any deduction in respect of income-tax paid by the company on the issued capital of 40,000 Ordinary shares of Rs. 10 each absorbing .. | 80,000 | 0 | 0 |
| Appropriation to Reserve .. .. | 4,915 | 0 | 0 |
| Carry forward .. .. .. | 45,667 | 13 | 0 |
| Total .. | 1,30,582 | 13 | 0 |

*Season* 1942.—The estimates provide for an outturn of 4,700 maunds tea for an expenditure including sale charges of Rs. 1,75,539.

*Managing Agents.*—Messrs. Gillanders, Arbuthnot & Co.

*Authorised Capital—Rs. 8,00,000 in 80,000 shares of Rs. 10 each. Issued and Subscribed—Rs. 4,00,000 in 40,000 shares, fully paid up.*

Synopsis of the balance sheet as at 31st December, 1941:—

| *Liabilities.* | Rs. | *Assets.* | Rs. |

*(Annual meeting, 31st March, 1942 at 4 p.m.)*

*Audited accounts for the year ended 31st December, 1941:—*

*Area.*—The planted area of the company's estate at 31st December, 1941; remained at 545 acres of which 10 acres were replanted during the year.

*Price.*—The Government of the United Kingdom represented by the Ministry of Food, made a contract with the company, through the Tea Controller for India, for the purchase of 2,53,823 lbs. at 1s. 1.43d. per lb. which is equivalent to As. 11-11 per lb. A supplementary contract was entered into for the supply of 50,000 lbs. at the same rate. Both contracts were completed with a total delivery of 3,03,913 lbs. accepted.

Export quota for 2,036 maunds was purchased.

After deducting net cost of quota purchased, the combined average price realised and estimated for the whole crop was As. 11—8.01 per lb. which compared with an average price of As. 10—1.21 per lb. realised for 1940.

The increase of the crop of 61,841 lbs. and the increased average price realised for the whole crop are reflected in the results.

*Accounts.*—The total expenditure including Rs. 9,100 in respect of sale and shipping charges amounted to Rs. 2,32,491.

Owing to abnormal conditions prevailing the cost of stores, manures and tea chests was again high.

Gross sale proceeds of tea realised and estimated amounted to Rs. 4,78,615.

Net cost of quota purchased was 60,913.

Income from sale of sweepings and miscellaneous receipts amounted to Rs. 994.

Rs. 4,687 has been written off the company's holding of 3½ per cent Government Loan 1947-50 to reduce the book value to par.

After taking into account interest earned on investments and deposits, other income and after providing for Staff commission, income-tax, super-tax, Excess Profits Tax, agricultural income-tax and for a contribution of Rs. 1,556 to the Provident Fund, there remains an available balance of Rs. 1,68,591-14-11 which includes Rs. 48,328-5-0 brought forward from the season 1940, after final adjustment.

It is recommended that the available balance be disposed of as follows:—

| | Rs. | A. | P. |
|---|---|---|---|
| Payment of a dividend of 30 per cent without any deduction in respect of income-tax paid by the company, on the issued capital of 32,000 shares of Rs. 10 each absorbing .. | 96,000 | 0 | 0 |
| Appropriation to Reserve .. .. | 10,187 | 8 | 0 |
| Carry forward .. .. | 62,404 | 6 | 11 |
| Total .. | 1,68,591 | 14 | 11 |

*Season* 1942.—The estimates provide for an outturn of 6,500 maunds of tea for an expenditure of Rs. 2,24,283. The increased cost of stores, tea chests, manures, etc., accounts for the higher cost.

*Managing Agents.*—Messrs. Gillanders, Arbuthnot & Co.

*Authorised Capital—Rs. 6,40,000 in 64,000 shares of Rs. 10 each. Issued and Subscribed—Rs. 3,20,000 in 32,000 shares, fully paid up.*

Synopsis of the balance sheet as at 31st December, 1941:—

*(Annual meeting, 31st March, 1942 at 4-25 p.m.)*

*Audited accounts for the year ended 31st December, 1941:—*

*Area.*—The total area under cultivation at 31st December, 1941 was 1,166.50 acres of which an area of 14¼ acres of sunken bheel replacement planting was done during the year.

*Prices.*—The Government of the United Kingdom represented by the Ministry of Food, made a contract with the company through the Tea Controller for India for the purchase of 2,51,256 lbs. at 11.54d. per lb. which is equivalent to As. 10-3 per lb. A supplementary contract was entered into for the supply of 24,000 lbs. at the same rate. Both contracts were completed and an excess of 336 lbs. was accepted.

Export quota for 570 maunds was purchased.

After deducting net cost of quota purchased the combined average price realised and estimated for the whole crop was As. 10—1.26 per lb. which compared with an average price of As. 8—2.34 per lb. realised for 1940.

The 1941 crop was 73,953 lbs. larger than that of the previous year; this and the increased price realised are reflected in the results.

*Accounts.*—The total expenditure for the season amounted to Rs. 2,27,435 including Rs. 6,690 in respect of sale and shipping charges.

Owing to abnormal conditions prevailing, cost of stores, manures and tea chests was again high.

Gross sale proceeds of tea realised and estimated amounted to Rs. 3,97,411.

Net cost of quota purchased was Rs. 21,648. Income from the sale of sweepings, tea seed and miscellaneous receipts amounted to Rs. 4,458.

After taking into account the interest earned on investments and deposits and after providing for staff commission, depreciation, income-tax, super-tax, agricultural income-tax and for a contribution of Rs. 2,414 to the Provident Fund, there remains an available balance of Rs. 1,28,050-10-10 which includes Rs. 20,406-0-1 brought forward from the season 1940, after final adjustment.

It is recommended that the available balance be disposed of as follows:—

| | Rs. | A. | P. |
|---|---|---|---|

(*Annual meeting, 31st March, 1942 at 4-30 p.m.*)

*Audited accounts for the year ended 31st December,* 1941:—

The total expenditure including Rs. 3,354 in respect of sale and shipping charges amounted to Rs. 1,48,043.

Gross sale proceeds of tea realised and estimated amounted to Rs. 2,20,211.

The net cost of quota purchased was Rs. 1,789. The income from the sale of sweepings and miscellaneous receipts amounted to Rs. 475.

After taking into account the interest accrued on investments and deposits and after providing for staff commission, depreciation, Income-tax, Super-tax, Agricultural Income-tax and for a contribution of Rs. 1,830 to the Provident Fund. there remains an available balance of Rs. 70,242-7-10 which includes Rs. 20,956-14-1 brought forward from the season 1940, after final adjustment.

The directors recommend that the available balance be disposed of as follows:—

| | Rs. | A. | P. |
|---|---|---|---|
| Dividend at 12½ per cent, without any deduction in respect of income-tax paid by the Company .. .. .. .. | 37,500 | 0 | 0 |
| Appropriation to Reserve .. .. .. | 2,500 | 0 | 0 |
| leaving a balance of Rs. 30,242-7-10 to be carried forward. | | | |

*Season 1942.*—The estimate provides for a crop of 3,800 maunds of tea for an expenditure of Rs. 1,43,257.

*Managing Agents.*—Messrs. Gillanders, Arbuthnot & Co.

Synopsis of the balance sheet as at 31st December, 1941:—

| *Liabilities.* | Rs. | *Assets* | Rs. |
|---|---|---|---|
| Capital paid up .. | 3,00,000 | Capital Expenditure .. | 3,24,279 |

ISSUED WEEKLY

Vol. XXIX. No. 16 SATURDAY, APRIL 11, 1942 Price Re. 1

## Insure and Increase Nation's Strength

Financial Independence of the individual is the measure of Nation's financial strength.

In this hour of world turmoil, all Life Insurance Policy-holders should take stock of their insurance cover and ascertain just how strongly they are fortified against the unpredictable that lies ahead.

And, those individuals who have not yet made provision for their protection need do so without delay and thereby contribute towards Nation's strength.

Be advised and write to-day to

## WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

THERE has been no change in the short loan market in Calcutta, where the rate for inter-bank call money continues to be ¼ percent with borrowers scarce. A slightly steadier feeling is manifest in Bombay, where some inter-bank business has been reported at ½ percent. The Treasury Bill rate, however, continues its upward trend, the average rate of accepted tenders this week being Rs. 1-3-7 as against Rs. 1-2-11 last week. Since the middle of February, there has been a rise of 3½ annas in the Treasury Bill discount rate. Sales of intermediate Treasury Bills on April 1 and 2 amounted to Rs. 67½ lakhs. Judging from the amount of applications for tender bills, the average discount rate and sales of tap bills, there is every reason to believe that the market is not exactly well disposed towards the sales of Treasury Bills on this scale. The discontinuance of sales of tap bills is certainly suggestive as the only method by which the Government can again secure mastery over the short loan market. The Reserve Bank returns for the week ended April 3 reflect the change consequent on a large sterling receipt in respect of inter-Government transactions. Sterling securities in the issue department of the Reserve Bank have risen by Rs. 19 crores to Rs. 231.35 crores. In spite of such a large transfer to the issue department, foreign balances in the banking department are up by Rs. 13.93 crores. This means that the payments received by the Indian Government by the British Government at the end of March should have been in the neighbourhood of Rs. 33 crores. This is, we believe, the heaviest payment so far received on account of the transactions between the British Government and the Indian Government. After their cash balance has been increased by approximately Rs. 33 crores, the Central Government have been able to liquidate the entire ways and means loan for Rs. 17½ crores. In addition, it has been found possible to withdraw rupee securities from the issue department of the Reserve Bank for Rs. 11 crores. Owing to these two factors, which together affect the cash position adversely, to the extent of Rs. 28½ crores, the deposits of the Central Government with the Reserve Bank have declined by Rs. 2.58 crores to Rs. 4.83 crores. There has thus been expansion of currency for Rs. 19 crores against sterling securities, and contraction of currency for Rs. 11 crores against rupee securities. In the event, there is net expansion of currency for Rs. 8 crores. Active note circulation in India has risen by Rs. 6.59 crores to a new record level of Rs. 388.32 crores. Rupee coin held in the issue department shows a further decline to Rs. 27.35 crores. The next week's return may well show a rise of rupee coin for Rs. 5 crores or even more from the Central Government. This will come in handy to the ways and means budget.

As we go to press, we hear, from a quarter usually well-informed, a report to the effect that the talks at New Delhi initiated by Sir Stafford Cripps are on the point of being crowned with success; and that an immediate announcement may be expected of the formation of a National Government at the Centre. Our informant added that Mr. M. A. Jinnah will be the Premier, Pandit Jawaharlal Nehru, the Defence Member; Mr. C. Rajagopalachari the Home Minister; Pandit Govind Ballabh Pant, the Finance Minister; and Mr. K. M. Munshi, War Supplies Minister. For our part, we shall be gratified to learn that the political deadlock has thus been happily dissolved. No official news, however, has been available from New Delhi as to the final answer of the Congress to the revised formula with regard to defence evolved through the good offices of Colonel Johnson, President Roosevelt's personal envoy. At the same time, the press correspondents from India's capital have been striking a more optimistic note in their recent despatches. It is therefore not at all unlikely that, by to-morrow official confirmation will be available of the report given by our informant.

Be this as it may, that is to say, even if the Congress—Cripps negotiations failed in the last hurdle, it may be taken as certain that the present Government at the Centre will soon be replaced by a Government with entirely Indian personnel. The news relayed from time to time regarding the discussions on the proposals brought by Sir Stafford makes it clear that the only portfolio about which there was a controversy with respect to its transfer to Indian hands, is the Defence portfolio. In other words, official circles in New Delhi have, for some time, been prepared for the Finance and Home Departments passing into the hands of the Indian members.

Whether Pandit G. B. Pant or any other Indian is the Finance Minister, there is bound to be, in some quarters, a disposition to express concern and even disquiet as regards the tenability of the credit of India under the stewardship of an Indian Finance Minister. It will be remembered that, while the India Bill was under discussion, the die-hards in England, in whose ranks was included the present Prime Minister, Mr. Churchill, were uttering gloomy prophecies that the credit of India would go to pieces immediately on the transfer of the financial administration to an Indian Minister. The British die-hards in India may be trusted to play the role of Jeremiahs on the present occasion too. They are already greatly chagrined that the British non-official community have not been invited to play any part in the discussions initiated by Sir Stafford. In view of the extremely difficult conditions, caused by the enemy attack at Colombo and some Eastern coastal towns, this chagrin has not found vociferous expression. And it must be said to the credit of the British community that, once a policy has been decided upon by the Government of the day in Britain, every member will loyally carry it out whether he is in agreement with it or not. This factor may go a long way toward softening the criticism that will be levelled against the National Government's readiness to shape its own financial policy and carry out its own financial operations. All the same, the vested interests are powerful; and they have a very heavy stake; and they may find it no easy matter to accept without demur the new order of things.

With regard to most other aspects of the Central Government's activities criticism cannot be strong as Indians have already administered most of those departments, and administered them well. It is only an Indian Finance Minister that will be a novelty. It is therefore with respect to a new man that a Britisher cannot find it at all possible to express apprehension.

We are desirous of dealing with this matter as frankly as possible. It is true that an Indian Finance Minister at the Centre will be an innovation. But it must not be forgotten that, since the inauguration of Provincial Autonomy Indians have been in sole charge of Finance in each Province and our British friends have themselves acknowledged that the stewardship of a Finance Minister like

## TREASURY BILLS

### India

Tenders for Rs. 2,00,00,000 (Rupees 2 crores) of three months' Government of India Treasury Bills were opened on Tuesday, the 7th April, 1942. Total amount offered was Rs. 2,98,00,000 (Rupees 2 crores and 98 lakhs). Tenders at Rs. 99-11-3 per cent and above were accepted in full and those at Rs. 99-11-0 per cent were allotted approximately 58 per cent. Lower tenders were rejected. Total amount accepted was Rs. 2 crores, the average rate of accepted tenders being Re. 1-3-7 per cent (Rupee one, annas three and pies seven per cent) per annum.

Tenders for Rs. 2,00,00,000 (Rupees 2 crores) of three months' Government of India Treasury Bills will be received on Tuesday, the 14th April, 1942. Successful tenderers should make payment on Friday, the 17th April, 1942. Other conditions are as usual.

Three months' Intermediates will be sold from the 8th April, 1942 to 13th April, 1942 at Rs. 99-11-3 per cent subject to the conditions previously announced (viz. sales can be stopped at any time without previous notice if Government think it necessary).

Three months' Intermediates sold on the 1st and 2nd April, 1942, amounted to Rs. 67,50,000 (Rupees 67 lakhs and 50 thousand).

During the week ended the 3rd April, 1942. Government of India Treasury Bills for Rs. 2,62,50,000 (Rupees 2 crores, 62 lakhs and 50 thousand) were sold in favour of the Issue Department of the Reserve Bank of India.

# Finance Abroad

Friday Morning.

It might sound ridiculous to stick the usual label to this column when the British Budget proposals are unknown and all the matter meant for comment can be compressed into a paragraph. But tradition has to be respected and London's pause before the Budget may have a meaning. The decline in exchange bank shares stands out as a noteworthy feature. National Bank of India shares have weakened with the spread of hostilities to the Indian Ocean. The £12½ shares dropped by £1½ to stand at £23 on Thursday. Chartered Bank shares have held their ground over par as before and if the usual report and accounts for 1941 have not appeared as yet the reason is obvious. This month will probably witness the issue of the Chairman's statement to the shareholders.

The year 1942 threatens to be a difficult period but many will cling to the belief expressed already by Lord Catto that normal behaviour is the only reasonable course. London has certainly given a fine lead to India by putting up the big total of £146.65 millions for Warships Week. The Lord Mayor, Sir John Laurie, announced the result of the local savings campaign. The City has successfully topped the target figure of £125 millions as hoped for. The savings drive has been successful and the withdrawal of funds from Banks caused no temporary tightness as feared. It is, however, to be remarked that Clearing Banks' deposits with the Bank of England, as shown in the Return issued last Thursday show a marked decline. The decline is accompanied by a strong rise in Public Deposits. The note circulation is high but banks which have helped their clients to subscribe for Warships Week are likely to draw their claws in.

The change in the credit position accounts for a slight rise over 1 per cent in the rate for Treasury Bills allotted last week. The inflow of new money for defence expenditure or rather investment explains the decision to restrict takings of Treasury deposits to twenty million sterling this week. The decline in Treasury requirements after April 1 suggests immediately that the Exchequer is on a firm wicket again. Though the volume of applications for last week's offer of Treasury Bills was by no means large, the interest shown in ordinary bills by Banks points to the maintenance of normal, easy conditions.

London does not know the seasonal rise or fall in the case of Treasury Bill issues and it will be remarked that the rise in Indian bills to over 1 per cent may induce the exchange banks to turn from London where the Central Banks of the Empire are competitors for Treasury Bills to India where the return is higher. The assumption would be warranted under normal circumstances. But at present, when the war has made short work of old rules and practices, it is not at all easy to make a guess like that. With the Reserve Bank's sales of sterling limited to strictly defined limits, investment and repatriation are not easy as before, and the exchange banks may have, for very good reasons, developed a liquidity preference of their own.

The realisation of investments by Far Eastern interests has obviously hampered recovery on the London stock exchange. The improvement in Sao Paulo coffee loan may be directly related to the anti-Axis policy of the Vargas regime and the lift in Mexeagles may be due to the growing concord between Mexico and the U.S.A. It is still to be noted that Trinidad and Venezuelan issues are more favoured by investors than Shell or Burma which have lost considerably through the war. The high stability of the Rio Tinto company's shares is presumably based on calculations of Spanish adherence to neutrality. Even the report that more money will be spent on the Army is neutralised by the assurance given to the U.S.A. by the Spanish Government as regards use of imported oil.

The mild recovery in tea shares is accompanied by a slight rise in rubbers as well. The higher dividend for 1941 has helped to keep P & O Deferred stock well over par, but the drag towards lower levels in the case of all Home Industrials is too obvious to be overlooked. It may be that Budget fears and a lengthening war cast a cloud over the stock exchange. What is obvious at present is the similarity in market attitude between London and India, with the important difference that the passion for the precious metals is confined to India.

With the Nazi offensive in the Near East hanging fire, financial centres have developed something like courage. The sterling and dollar remain wholly stable while the depressed Vichy franc is menaced by the threat of a new regime to be set up at Paris. There has been no change in rates for hard currencies like the Swiss franc and the Swedish krone. The London—New York cross rate is unaltered over a long period, and this steadiness has been indicative of the alliance confirmed by the Premier's visit to Washington. The periodical outbreak of stories about U. S. war production has been magnified by the visit of Mr. Harry Hopkins to London. Four divisions per month are to be added to the Army and if Mr. Donald Nelson is to be believed the equipment for the fast-growing army is being made by factories going all out. Mr. Hopkins has however admitted that the war is not going to be won by production. He claims it is the job of the U.S.A. to fight and help others to fight against Germany and Japan. Aid to Russia is part and parcel of the U. S. war plans which cover an expansion programme in Europe for U. S. armoured divisions.

Of greater importance for the U. S. citizen is the quarrel in Congress between parties on the proposal for limitation of dividends. There has evidently been a controversy and a hastily prepared proposal for limitation of profits has held up the Senate's decision on the nineteen billion dollar war appropriation bill meant to give 31,000 planes. Trade unions like the Senate were said to be watching the situation closely.. It is evident that U. S. capital-labour differences have not been closed by the war. The Republican, Mr. Robert A. Taft moved an amendment in the Senate on Tuesday requesting legislation requiring manufacturers of war materials to refund to the Government any excessive profits. The Southern Democrat, Mr. Claude Pepper sponsored an amendment asking for an overall system of price control to apply to all commodities as well as wages. There is agreement that war will not be allowed to produce high dividends and artificial prosperity. The U. S. Government is clearly getting support for its original view that profits must be strictly limited. The U. S. A. will apparently make its own special contribution to the taxation of war profits. There is already an Excess Profits Tax in force but what is sought is something bigger and more drastic. It is not surprising that there is no sign whatsoever of a war boom. On most days Wall Street is said to be quiet with prices narrowly irregular. Some may even say that Wall Street has gone into hiding for the duration.

(*Continued from page 563*)

Mr. C. Rajagopalachari, Mr. G. B. Pant, Sir Manoharlal and Mr. N. R. Sarker has proved to be a pattern of financial administration. These Ministers were not content to look upon their tasks as nothing more than the routine continuance of the policies of the past. Notable reforms were introduced in the provinces and financed by various measures; at the same time, the integrity of administration and the financial status of the Provinces were considerations which were scrupulously kept in view. That Indian Finance Ministers have achieved notable success in the provincial sphere can be put forward as a statement which cannot be challenged.

We may be told that the responsibility of the Finance Minister at the Centre is far heavier than that of any provincial minister; and that the success achieved by Indian Ministers in provincial finance does not necessarily imply that an Indian Minister will achieve success in the administration of the Centre's finances also. This contention, however, is true only in part. The fundamentals of finance are the same whether they pertain to whole States or a Province, to a Province or a District, to a State commercial enterprise or a statutary public body like the Port Trust or the Corporation. What is needed, is a good grip of fundamentals and ability for formulating big-hearted policies. There is no reason to suspect in advance that the Indian Finance Minister will be found lacking in such grip or grit.

We shall readily admit that the one aspect of finance which accounts far more than in the financial administration at the Centre is the maintenance of the creditworthiness of the Government. That is to say, the criterion of an able Finance Minister is whether he is able to raise funds for Government on terms like those on which Britain or the United States are able to borrow. Readers of *Indian Finance* will recall to their minds that, over the past twelve years and more, our main quarrel with the Finance Members of the Government of India has been that the

## In the third Year

The reflections of the Committee on Public Expenditure, in the series of reports issued till now, often compel reluctant assent in Britain and outside as well. The assurance of co-ordination given only recently by Mr. Lyttelton makes it difficult for us to see whether in the third year of war the Premier's promise of a substantial increase in war production will be kept. The radical defects of Britain's war economy cannot be concealed by the translation of Lord Beaverbrook to a comfortable sinecure abroad or the conferment of a peerage on Colonel Moore-Brabazon. The battle for production, to use Mr. Douglas Jay's phrase, has not been won; until that is done, such an assurance as is conveyed in Sir Kingsley Wood's estimate that over 40 per cent of the national income was taken by the Government, and that 4,297 million or more would be spent in the year that has just come to an end, can mean little. Shortly after the outbreak of war various controls were imposed. It was assumed here as elsewhere that the mechanism of regulation had been prepared previously and no delay or inconvenience would result. In the first year, however, the competing claims of exporters caused difficulty. There came also the dilution of administrative efficiency by outside Controllers. The trade interests had developed the natural tendency of vested interests. Restrictionism, such as was practised under the Stevenson Rubber Scheme of the 20's became the order of the day. Not one sincere attempt was made to tackle the whole problem of production. The transition to the Churchillian period produced no great increase except in the matter of food. But war cannot be won by wheat alone, and a new Ministry of Production rose rather late from the debris of controls. One can see the same process at work in India. Much impatience is naturally in evidence and only recently a leading European representative of industry and commerce called India's attention to the lack of business efficiency in Government.

The ordinary official procedure is irreconcilable with the exigent claims of war. That is the thesis of the many men who have seen promising proposals founder in official files. The importance of attaining victory in time is not grasped. The danger of a war of attrition, even to the winning side, is overlooked. The press teems with letters, angry or rueful as the case may be. A Punjab businessman points to the danger of delay caused by sending on a wagon to a distant weighbridge; others have asked about the application of efficiency engineering. Derisive comments appeared soon after the issue of a fatuous note about the merits of prompt unloading of wagons. In Britain during the last war the Ministry of Shipping appeared suddenly, and conquered, while the Ministry of Munitions appeared to be as ineffective as the Ministry of Reconstruction. The major problem then is not one of Parliamentary supervision. Parliament must assert itself; so must the Central Assembly in India. But the Departments have yet to formulate policy. To-day the Eastern Group is a wreck; whatever miracle may be wrought by Dr. Grady's Mission it is manifest that the organisation of production will have to conform to essential principles. The diversion of resources will of necessity put up prices. To choke demand, one has to cut at idle purchasing power. This argument is heard over and over again. But there are other issues involved. There is a transfer problem. Government must acquire the power to regulate consumption. Of the ineffectiveness of interference with wheat prices and supplies we have had overwhelming evidence. Such success as attended the efforts of the Bengal Government in 1940 in controlling jute prices and production has been denied to recent moves in the direction of regulation. Periodical announcements and modifications are by no means calculated to strengthen confidence in the wisdom of an omnicompetent bureaucracy. When we hear of iron and steel licenses and chrome compounds order the first inclination on the part of business people in India is to assume that more forms will be filled, more paper will be used, and Delhi's dilatory tactics will become dominant. The attitude is excusable for consistency has not characterised the control policy. To-day when the level of prices in most cases of manufactured goods appears to be stabilised at too high a level, new Commissioners emerge from the purlieus of Raisina to control raw commodities.

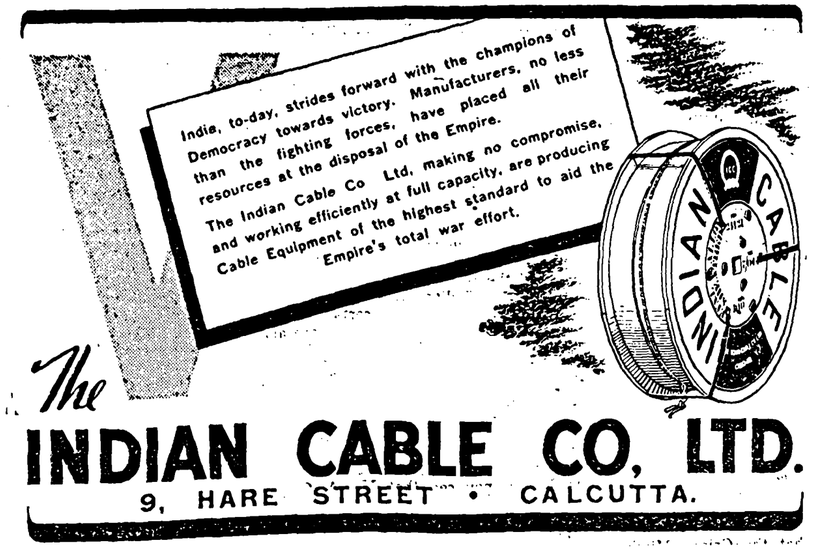
The assumption of economic functions is too familiar to be hailed as a sign of the times. The change-over from peace production can only be accomplished by the emergence of a national front. On the psychological plane conditions have naturally been modified by the publication last week of the War Cabinet's proposals for a modification of the entire structure of Government in India. But in the economic sphere the urgent question is not concentration on unity but efficiency. Of the lack of efficiency and imagination many have spoken in relation to the slowness in augmenting India's steel production. Granted that a part of export has disappeared there is superficially no argument for adding to production. But the Indian manufacturers' case, as frequently and forcibly stated, rests on other grounds, and Government's lack of interest is assailed, mainly on the ground that defence suffers.

Of the necessity of food planning many have spoken but few have dealt with industrial planning in the newest phase the war. What was said in October 1940 can have no application in view of pressing needs. The cry for Japshooters has not been echoed in distant Delhi for the very good reason that India's war effort, largely financed and directed by the War Office, is not independent and geared to such purposes as the defeat of inflationary tendencies, the stimulation of savings and the rectification of difficulties caused by a transfer of resources to war purposes. Capacity surveys and centralised direction are by no means enough. The acceptance of import control has not been followed by rationing in any sphere at home save petrol. Peacetime products and services are on offer as usual and the contrast between the Nazi military economy and our own is nowhere more painful than in the survival of a multitude of middlemen. It has not been formally indicated as yet, that income and consumption are unrelated qualities in time of war, to use the argument of Professor W. H. Hutt.

The very tentative beginning as regards compulsory savings is calculated to prove that there is nothing like the dividend limitation principle in the official mind. What Australia intends to do through the Prices Commission has been followed by reports of a peremptory suspension of building activity in both Australia and New Zealand. There is still the feeling that India is on velvet because the bulk of her sterling debt has been paid off. That is not going to make her a creditor; only saving and overseas investments can achieve that. It has been said truly and often that the only answer to total war is total sacrifice inseparable from the notions of abstinence and saving.

The preparation for sacrifice is yet to come. Petty complaints against the dearth of whisky last year suggested readily enough that the idea of sacrifice is wholly abhorrent to the Upper Ten. The intensification of import control has so far impelled a rise in prices without checking the shopping habit. The existence of disparate and discordant policies in wartime is too often viewed as a regrettable necessity.

The time has come to arrest non-essential consumption. This must take place before the collection of savings for the war begins. We certainly attach even greater importance to the redirection and reimentation of purchasing power because we realise that taxation in India today remains relatively light and borrowing has been practically terminated **suo moto** by Government. It is difficult to resist the impression that the cost of the war to India has not been estimated. In the Provinces we have a hand to mouth policy in spite of A.R.P. expenditure. At the Centre the enormous cost of defence is treated as a matter of settlement between the War Office and India. What we have to ask for is that India should be roused to the sense of duty involved by participation in the war. What is secured by conservation and rationing abroad is apt to be treated as intelligence devoid of interest for this country.



We have become inured to import control because the export policy of Britain has been radically modified. It has not yet been realised that import control as practised in many lands does not go far. We have not had a concentration of industry to maximise efficiency or output. The diversion of personnel to war employment has scarcely begun, and the first batch of orders regulating supply of certain goods does not suggest that it is not to promote correspondence but to cut down consumption that orders are in effect.

There are naturally grave disabilities in full war production. Reference will be immediately made to the already low standard of living in India in order to sustain the premise that interference is unwarranted. It is realised that trained personnel are still too few. There may be 18,000 men under training for war work but they are far too few to man the new establishments. It may well be that conscription cannot be applied literally, but the actual number of those liable to conscription for military service, and yet engaged in safe civilian jobs will not, we allow, be pleaded as an excuse. That war results in unequal benefits for industry and workers alike has been long manifest. But it is hardly realised that inflation of incomes and diversion of normal profits even in isolated cases will broaden and perpetuate the sense of injustice. It is clear that the very small beginning made in the matter of the graduated surcharge on incometax cannot be taken as the finite correction of inequitable distribution. The argument for progressive taxation on the scale of European countries should not be ignored as having no application to India's present circumstances. It may however be taken as certain that a national government pledged to help in the war and looking to Dominion status will entertain ideas different from those of an apprehensive bureaucracy.

The first non-official Finance Minister must enhance productive power for war purposes. He must secure through new rupee loans the money withdrawn from a rising circulation through fresh checks on civilian consumption. While there is much to hope for from the continued growth of bank deposits in an anxious period, it is difficult to conceal our opinion that the giltedged market stands in need of a potent restorative. This is all the more necessary as we assuredly envisage a great increase in internal debt to replace the sterling debt paid off. Somehow the awkward spell must end. The new issues must proceed along with a war savings drive. A year ago it was widely hinted that the drive would come. All that we have had so far is a special job for an I.C.S. There is the assurance that the bulge in incomes produced in many cases by the war will continue. How to "slim" these incomes and accelerate war production must be the chief object of an emergency budget. Since there is no summer exodus a new national government, untroubled by the thoughts of what went on in the past, can prepare an emergency budget and plan its borrowing programme. Only three weeks ago we felt compelled to draw attention to the need for repressing the still latent inflationary urge. And if we urge that a square deal for workers is consistent with price-stops it is mainly on the ground that previous inequities need to be redressed by a measure of generosity. Once the credit policy is adjusted to inhibit undue expansion, except of selected sections of the national economy, there will be no problem in adding to the floating debt. While the rise in railway earnings etc. may favour borrowing temporarily, the ultimate determining factor remains the expansion of rupee debt. What the cost of debt service in the future will be cannot be allowed to affect immediate considerations of adding largely to the sinews of war.

We in India have reached the stage at which the real cost of the war has to be considered. It has very strict relevance to the defeat of the aggressor. Indeed the dis-satisfaction prevailing as regards war production as in connection with avoidable distress indeed suggests that a new economic policy must follow immediately the establishment of a new order. The atmosphere may be tense, but it is still hopeful. We can only hope that our plea for a clarification of economic objectives in the war, which will benefit the Government and its allies, will not fail to be heard. Though we are often told of striking progress in this or that field we are ready to believe with Sir M. A. Muthia Chettiar who observed in his speech to the Southern India Chamber sometime ago that early steps must be taken to institute a Department of Production. We have to get away from the grip of old practices and old beliefs. A clean sweep with new brooms may be decreed earlier than we imagine. Entrepreneurs, disheartened by the vastness and slowness of administrative processes, will have a chance to cooperate and workers assured of full production will have a chance to look for a bigger payroll. Prosperity goes with full production and if the former leads to purposeful investment the duration of India's war effort will leave nothing to be desired. In discussing the achievements of the German war machine between 1939 and 1941 we had occasion to draw attention to its actual achievements. Conscious control has given invaluable results. The economic recovery of Nazi Germany has been followed by impressive achievements in the war production field. One must not ignore them when we know that the U.S.A.'s production is going to gather momentum a little slowly, because the U.S.A. as Mr. Brown observes in a recent Oxford pamphlet, is in a degree of economic mobilisation a year behind the British Dominions and about two years behind the United Kingdom.

### Higher Cost of Living

January saw no reversal of the former trend towards higher prices. The cost of living for the working class rose as is shown by the jump of eight points in the Bombay index. The rise was produced by the higher prices of foodstuffs. It is manifest that the rise put the index near the highest point reached in the war period. Food was dearer as also clothing, soap and arecanuts. Necessaries and conventional necessaries like tea were more expensive for the Indian worker. The rise in January came after a steady rise in retail prices recorded during 1941. Only rent was stationary and the experience of Bombay is reflected in the rise in the cast of living in Ahmedabad and Sholapur. December saw a sharp rise in both places leaving the index at the peak for the year. The succeeding month should have seen a similar rise. The lag between wholesale prices and retail prices as also the difference between rates for commercial corps like cotton and foodstuffs, explains the unusual price-trend. Gloom in the markets produced no decline in retail prices. Towards the end of 1941 sharp rises in the working class cost of living were reported by Ahmedabad, Jubbulpore, Nagpur and Madras. It should have been over the 1927 base by January in the case of Ahmedabad because of the outstanding rise in wholesale prices during December. The third year of war has been responsible for an aggravation of the rise in prices both of food and non-food articles. Whether the rise was provoked by panic or not, its amenability to control is unquestioned. Steps taken in 1942 to regulate prices are clearly justified by the jump of 53 points in the general price index for non-food articles for Bombay during the year 1941 and of 27¼ percent in the case of food articles. After making adjustments it has been reported in the **Bombay Labour Journal** that the working class index is 29 percent over the 1935 base in the case of Bombay, and 39 percent in the case of Ahmedabad while it was 50 percent higher in the case of Nagpur. Clearly something more than a dearness allowance was indicated in such places.

### Against 'Scorched Earth'

A warning against panic was given by Dr. Law at the fifty-fifth Annual Meeting of the Bengal National Chamber. Dr. Law has once again indicated that morale is a big factor and he wants reasoned optimism to take the place of creeping fear. Dr. Law hoped that the Cripps Mission would produce a real and complete transfer of power. Of the strain on industrial capacity and the demands of the future in relation to the limited progress of industry. Dr. Law had to say much. In spite of limited assistance in the past from Government .Indian industry has given a good account of itself. Expansion in the war period has been prejudiced by the consideration shown to British interests. Dr. Law evinced some concern over the proposed U. S. mission because he shares the fear that foreign enterprise would seek shelter behind the Indian tariff. Distrust is the dominant feeling in the matter of the Bengal National Chamber's President's remarks on what is called scorched earth policy. The existence of opposing views does not blind one to the feeling noted in the business world. Destruction means restoration at some time later. The waste of time and money have to be considered. Without a responsible government any policy of indiscriminate destruction which would be doubly dangerous as Dr. Law confessed, Dr. Law indicated that the liability for compensation in the event of the adoption of scorched earth tactics in India should not fall on the Indfan tax-payer but on the British Government. He referred to the joint representation sent up in this connection. A surplus of commercial crops and a shortage of food crops may prove a disturbing combination. Official notice of the inherent danger has been taken and it is only necessary to emphasise, as Dr. Law did judiciously, the link between morale and a sufficiency of foodstuffs. It is hoped widely that the Delhi Conference will result in a reorientation of policy. It is only in regard to the pitch of taxation that Dr. Law's views may not be shared. He asserted that new taxation after the outbreak of war has taken out more than Rs. 65 crores from the Indian people. He declared that in view of the negligible addition to India's debt burden the present generation should be spared the trouble of footing the bill. Like Sir Muthia Chettiar, the retiring Chairman of the Southern India Chamber only recently Dr. Law discussed the issues raised by the hurried evacuation of Indians from Burma. The question of a living does certainly arise in the case of most evacuees who are also concerned over their property in the occupied and unoccupied areas. The payment of compensation is called for, and Dr. Law lent support to Mr. Birla's recent plea for a rehabilitation fund to be used for helping the returned emigrants. Interest-free loans to help many to settle in India seem advisable to Dr. Law. Dr. Law announced that Mr. A. C. Sen who has been Vice-President for some time was to succeed him as President for 1942.

### Unemployment Insurance in Canada

The advent of price control in Canada—complete and comprehensive has been made known to India but few may know that in the middle of a war the Dominion enacted an Unemployment Insurance Act. The Act is administered by a special Commission consisting of representatives of Government employers and workers. The commission was appointed in September, 1940 and the insurance scheme came into effect in July, 1941. It covers nearly 2½ million workers who together with their dependents make up almost half the population of Canada. Compulsion is not the only feature of the scheme introduced under the Act of 1940. Weekly benefits for all except certain classes of workers will be made available. Unemployment benefit is denied to agricultural workers and trappers as also domestic servants. All those getting over 2.000 dollars a year are also ineligible. The benefit comes out of a fund built up through weekly contributions. Administrative expenditure falls on the Federal Government which pays also for the Employment Service. Stamps are the medium of contributions. Benefit is paid to those workers who have paid contributions for 30 weeks during the most recent two years on showing that he is willing to work and yet unemployed and does not refuse to take up training as directed. Strikers and dismissed employees cannot get unemployment pay. The graded scale of contributions (without any contribution payable by the worker in case the pay is less than 90 cents per diem) is modelled on the European pattern. Benefit is smaller in the case of single men than of men with one or more dependents. The employer's weekly contribution is not a fixed percentage. Benefit is not payable until after nine days of unemployment. Thereafter payments are made for every five contributions made in the previous five years less one payment for every three benefit payments made in the three previous years. A new type of labour exchange goes along with the insurance scheme in Canada. The uninsured worker takes advantage of the service, and it is also meant to give the employer a wide field of selection. The registration of employers, the maintenance of books etc. are but the usual appendages to any scheme of contributions.

### Outlook for Cotton Mills

The increase in India's textile output has been frequently described but never so effectively as by Sir V. N. Chandavarkar last Tuesday at the annual meeting of the Bombay Millowners' Association. By the end of November 1941, the order-book position had improved from 280.000 bales to 380.000 bales. The number of spindles and looms engaged in double shift working during the year ended November had risen 1941 to 80 per cent and 58 per cent respectively. These figures suggest that a margin for expansion exists, but its limited extent is indicated by the fact that the idle equipment under

spindles and looms as at the end of November was 7.2 per cent and 2 per cent respectively. This increase in output was not peculiar to Bombay. It was in direct response to brisker demand and better prices. The enlargement of output is attested again by the fact that India's monthly production in the latter half of 1941 was well over 400 million yards. Earnings for mill companies through this period remained satisfactory. The record is wholly reassuring, as has been said, but the outlook is obscure. The reason, of course, is the war. The loss of export markets has to be reckoned with, so also the departure of confidence from the Indian piecegoods market. At the end of February 1941, said Sir Vithal, the order book position had worsened by about a lakh of bales. Uncleared stocks of goods with mills rose sharply after the outbreak of war with Japan. A more interesting disclosure relates to the exodus of a proportion of mill workers from Bombay. The withdrawal of 17 per cent of the normal labour force immediately raises questions as to the future of double shift working. Delay in filling up war orders may arise and it is quite possible that 40 per cent of producing equipment may be segregated for the execution of government contracts. This may reduce the quantity of cloth available for this country and reduce also the cotton taken by mills. This may lead to wider consequences for both users of cloth and cotton-growers.

A remarkable tribute to Sir Homi Mody's work as Supply Member prefaced the Chairman's review of relations with the Department of Supply. Millowners' suggestions have been carefully considered and the liaison with the mill industry is now perfect. The advance in wages and the extra dearness allowance as also the war bonus demonstrated that the workers obtained their share of prosperity. Sir Vithal announced that the bonus was paid on February 21 and his speech confirms the view that the bonus helped many mill workers to despatch their families out of Bombay during March. But the bonus has had another unintended effect. The panic may not wholly account for the departure of 38.000 workers. Yet it is not a problem of absenteeism to be dealt with or even one to be settled by negotiation with labour unions.

### Bigger Surplus

There have been changes in routes and destinations but the Indian Post and Telegraphs Department has been found equal to all of them. In the annual report issued a fortnight ago, reference is made to the diversion of mails by the Cape and of restrictions in foreign telegraph service. The Department's contribution to investment for war purposes is mainly through the sale of defence savings certificates and savings stamps. The increase in postal traffic continued through the year, though a reduction under savings banks accounts and post office cash certificates was recorded. Total receipts were Rs. 13.28 crores and expenditure amounted to Rs. 12.03 crores, proving fully that as a revenue-earning department the Indian Post Office holds its own. It is noteworthy that a surplus of over Rs. 37.44 lakhs was reported by the Telegraph branch in 1940-41. The increase in revenue could not be put down entirely to the surcharge levied from December 1, 1940. The biggest surplus ever obtained by the Post and Telegraphs Department indicates that if the Post Office gained a little less than in 1939-40 the telegraph and telephone branches obtained larger revenue. The surplus of receipts is the largest ever obtained, and it is certainly remarkable that it was got after Burma and Aden were separated from India. From the year 1936-37 the Department has reported a surplus, and that too in spite of increases in its own costs. The capital outlay of Rs. 23.3 lakhs in 1940-41 was devoted as before to the extension of telephones. An important development was the transfer by debit to the Telephone Development Fund of the sum of Rs. 475 lakhs to the Government Telephones Board formed for the purpose of taking over the shares of certain licensed telephone companies. The report admits that 1940-41 is the first year in which the telegraphs has earned a profit. In the year before there was a small deficit, but the war has stimulated traffic, and the result is eminently favourable for the Exchequer.

### U. P. Finances

The revenue position in the Provinces has hardly shown signs of deterioration. In the U. P. the last two years have seen a strengthening of the Provincial Government's income because land revenue, irrigation and excise receipts have shown improvement. Expenditure has increased but not at the same rate; but in the year 1942-43 expenditure will increase rather sharply. The budget statement published last month showed that the U. P.'s industries are making a proportionate contribution to the Provincial revenue. The revenue position in 1941-42 was admittedly good and the surplus, estimated at Rs. 61.83 lakhs as per Revised Estimates, is to be devoted to non-recurring expenditure in the subsequent year. The decision of the U. P. Government will not excite surprise. The provision for civil defence cannot be limited to Rs. 15 lakhs as in the past year. It may exceed the Rs. 60 lakhs now provided. While some satisfaction will be evinced on the score that emergency expenditure will be charged to the surplus, some may grouse that the cane cess is not reduced. The residuary charge against the Revenue Reserve Fund is postwar reconstruction. Road development in the U. P.

*At this time of national stress, it is essential that every effort is made to conserve the supplies of paper at our disposal. We urge all business houses to see that the strictest economy is observed in the use of paper. So often one page could be made to do the work of two. Everywhere that must be done. We must save paper.*

Empire and Allied troops have once again taken the offensive in Libya, against the Germans and Italians, to remove further the threat to India.

Before undertaking this gigantic offensive, months of careful preparation and attention to the minutest details were necessary.

Maps play a vital part in the preparations and the Army requires thousands of these.

Our Mills are working ceaselessly, day and night, to produce paper on which these Maps are printed.

In meeting the gigantic demands of the Army, which is of vital national importance, we cannot always fill the needs of business houses with our usual promptitude.

alone will proceed at an accelerated rate as in the past year, though capital outlay has been necessarily restricted to pressing needs.

Civil Defence expenditure will be met out of the 1941-42 surplus; the U. P. therefore will have a revenue surplus. Expenditure for 1942-43 is put at over Rs. 17 crores because the U. P. is spending more on war contracts distributed largely among the cottage industries. The U. P. should also obtain tangible benefits from the new formula as regards income-tax proceeds, but it will not be enough to offset the loss of the temporary Central subvention of Rs. 25 lakhs.

The Centre will bear the cost of the special armed police but the other increases in expenditure under police and civil defence will fall on provincial finances. Rural development work on the original scale is certainly allowed for in the budget which discloses increased grants for both Agriculture and Rural Development. The withdrawal of the special cess of 6 pies per maund on cane and the repayment of the loan of Rs. 1 crore taken last year from the Centre are features of the budget. The Finance Department thinks that the ways and means position will be easy this year as well and the U. P. intends to put Rs. 50 lakhs into the Defence Loan by taking the money out of the Irrigation Depreciation Fund. Total revenue for 1942-43 is placed at Rs. 17.12 crores showing a rise of Rs. 63 lakhs on the preceding year. The closing balance at the end of March 1943 will be higher at Rs. 2.15 crores and a small surplus of Rs. 4 lakhs will be retained because the civil defence expenditure falls on the previous year's surplus. Mention should be made of the fact that income-tax receipts are expected to rise by Rs. 60 lakhs and part of this increase is assigned to the Revenue Reserve created from the surplus of 1941-42. The Adviser regime has not increased taxation or reduced it. It is ready to make use of the natural increase of revenue for its own limited objects. In the last three years a very severe and limited pragmatism has marked financial policy in the Provinces. The tax-payer being without representation is let off lightly because the margin of taxable capacity is meant for the Centre. The self-denial of the Provinces in the field of taxation is as pronounced as their unwillingness to spend freely on developmental objects. In the U. P. it is claimed that more money will be spent on female education as also for hospitals. But the U. P. Government has a fairly large debt of Rs. 37.46 crores slightly higher towards the end of 1942-43, and has to allow for an increase of debt in the current year. To that extent Sir Tennant Sloan's claim that the financial position is continuously improving is vitiated. The ability to reduce debt is as important as the ability to maintain free balances. The maintenance of sinking fund contribution is by no means adequate because only from successive reductions in debt can there be augmentation of the supply of capital for fresh investment in giltedged and progressive improvement in credit status.

### Shipbuilding Activity

Reference was made in the review of the Vizagapatam Port's administration report to the happy beginning made there as regards shipbuilding. The new yard undoubtedly represents a departure, but the older shipyards meant chiefly to produce river-craft and small vessels have also to be reckoned with. According to recent reports all the yards in India are extremely busy. It is not only in Britain that the shipbuilder is working for victory; here in India, too, the yards are at work on a bulging naval programme. There is no longer any sense of injury over the placing of orders in Australia because Indian yards have in hand orders for over 300 vessels at present. Trawlers, launches and minesweepers are among the craft covered by the naval expansion programme. Seagoing craft in addition to tugs, etc., have long been made in India and the displacement of mercantile tonnage by war orders is almost complete. It is believed that over 30,000 men are engaged in this vital industry at present. Obviously the shipbuilding industry which is concerned with repairs and additions to normal equipment is essential for our war effort. The importance of the yards is indicated by the fact that about 4,000 seagoing vessels have been repaired in Indian shipyards since the outbreak of war. If India is yet to produce marine engines she is already making components and fittings. The difficulty of importing them has given a fillip to local manufacture. Anchors, winches, ventilating fans, etc. of local origin are already familiar, but India is unable to make for herself

navigating instruments, electrical apparatus, etc. It is, however, noteworthy that R. I. N. orders are all going to Indian yards, and the launching ceremonies of recent months have served to show that India trains her seamen and builds her ships on her own. Before the war repairs bulked large in the work of the shipyards; at present, it is shipbuilding, not repairs that concern them. Since British yards are under full Government control and war work occupies them all the time the countries of the Empire have to develop their own yards. In India the process has been carried out swiftly yet on familiar lines. Its further development is a part of the war effort that will certainly loom larger than ever.

### Coals Claims

The coal industry is never tired of airing its grievances. That might the the conclusion drawn from almost any speech delivered by spokesmen of mining interests. Indians are at one with Europeans in thinking that the Government adds to the difficulties experienced by the industry. Two months ago the outlook was taken as moderately good, but optimism has departed abruptly. A. R. P. in the fields increases the anxiety generated by a backward and restive labour force, and whatever be the pull of retail prices in the recent past, coalmining concerns do not get the benefit of high prices. Only recently Mr. Amritlal Ojha pointed out that the Railway Boaard allotted contracts at an average of Rs. 2-10 to Rs. 5-12 ton f.o.r. Transport difficulties persist, and even a Central Transport authority reinforced by priorities experts may not produce the desired improvement. Mr. Ojha was not quite sceptical; neither was he hopeful that a system of selective dispatches to approved consumers would ensure satisfaction. What appeared suitable three months ago is not quite satisfactory on the present view. Mr. Ojha referred to the need for matching policies with costs. The Railways are obviously free to enhance charges, but the collieries, bound by contracts, are ill-equipped to pass on the burden of higher raising charges. Wages are higher in some cases; they have been raised up to 25 per cent. Stores are dearer for the collieries. Their tub repairs are difficult and expensive. Supplies of lubricating and other oils, subject to official control, are hard to get even at higher prices. Mr. Ojha propounded the view that collieries are finding it hard to carry on with coal at prices ruling from Rs. 2-10 to Rs. 5-12 per ton. He has suggested that rates for allotted tenders should be revised suitably. He has asked that at least annas 8 per ton must be added in order to help the collieries. He has referred to abnormal circumstances to justify an unusual request. A joint representation is under contemplation.

A discordant note was struck as regards the stowing duty. The Chairman of the Indian Colliery Owners Association objects to the proposed increase to 3 annas per ton. The good work done by the Stowing Board in the last year and half is not denied, nor is it denied that the grant of financial assistance for

voluntary stowing is governed by self-evident principles. Some months ago it was freely suggested that loans were given to the bigger and more prosperous companies and many had to go without assistance. An increase in the stowing duty would obviously add to the Board's resources, and it is surprising that Mr. Ojha attacks such a conclusion. It is obviously a difficult issue, and one claiming to speak up for Indian coal interests might have avoided controversy by merely refuting other arguments for the suggested increase in duty. Many still argue that the practical effect of the intensification of A.R.P. is a sudden migrating movement of labour. Mr. Ojha does not believe that output will drop off as there is no exodus from the fields as previously believed. The assurance is of direct interest to all consumers of coal. Output is normal again and labour shortage was purely seasonal. To that extent, the collieries have shown that they are making a full contribution to India's war production.

**Prospects In Egypt**

The Trade Commissioner at Alexandria in his latest report, that for September 1941, states that demand for Indian manufactures is still growing. Prospects are good in spite of the war. Egypt is said to be a keen buyer of Indian piecegoods. Enquiries are more numerous and exports to Iraq and other places are increasing. It is only a question of Indian exporters paying more attention to overseas trade and better shipping facilities. India is already the chief supplier of grey cotton goods and yarn for the Egyptian market. Palestine is said to be interested in Indian cotton as there is a proposal to put up a spinning plant. Egypt is said to be a good market for tea like Iraq. The requirements of Egypt are put at over 7 million kilograms while Iraq's are put at 3 million kilograms. Since Java is out of the running, India and Ceylon stand a good chance. Last year it was said that Indian tea was too dear though it sold readily. A new market for Indian goods was opened by the Allied victory in Syria. That country was said to be short of tea, coffee, jute bags, rice, cinnamon and other spices, skins, vegetable oils, cotton yarn and piecegoods, chemicals and cereals. The list is comprehensive and the link between Syria's currency and that of Palestine has put commercial relations with the sterling group on a new basis. Egypt's own demand for jute manufactures, timber etc. has grown with the war. A growing demand for canvas shoes with rubber soles has been reported. The commissioner adds that the demand is for canvas shoes of a quality superior to those manufactured locally as supplies from abroad are becoming more and more difficult to obtain. The Egyptian Government, it has been observed, is also buying drugs, instruments etc. through the Ministries of Education and Public Health. The Ministry of Defence is interested in leather goods, and the State Railways and Postal Department are buying many things like motor grease, steel tubes, cement tiles and caustic soda. The import trade of Egypt discloses a widening share for the U. S. manufacturer as also the supplier in the British Dominions. It is this which leads many to believe that Indian too can get a larger share of such trade. Indian's own cotton imports have risen steadily in the war period, and it is but natural to look for a big market for Indian textiles, now that Britain and Italy have ceased to be rivals of India in Egypt. The maintenance of a good name for Indian goods seems more than ever important to the official representative who has often insisted that goods must correspond to description and trade samples. In the last report emphasis is again laid on reasonable shipping facilities but whatever may have been the position in the past six months, it has obviously become difficult to maintain export connections. Quite recently, the Chairman of the Bombay Millowners Association described the damage done to export trade by the spread of war to Burma and the Indies. The Middle and Near East also involved in the war to the extent that shipping is more than ever the biggest problem the war has thrown up.

**Recent Notifications**

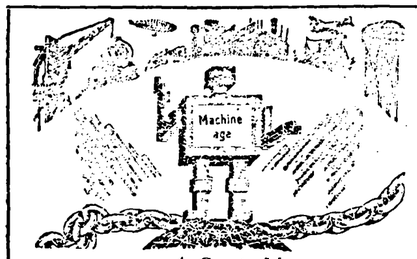
The month of March saw the promulgation of more notifications concerning trade and financial relations. The issue

of orders under Rule 92-C of the Defence Rules was a result of operations in Java which culminated in the overthrow of the Government-General. The Central Government, therefore, issued orders against the execution of orders (except with the permission of the Reserve Bank) given by any person or body corporate in Java or any person under their control for payments etc. Since the head offices of Dutch banks etc. have been transferred from Batavia to Paramaribo in Surinan, thethe prohibition has very limited consequences. The Finance Department Notification of March 16 lays down as usual prohibitions as to the payment or transfer of gold or securities and also as regards transfer of tittle which usually precedes payment or sale of assets. This prohibition is compediously known as freezing, but it has many facets, at is proved by another notification issued on March 20 by the Commerce Department. Acting under the Defence Rules, the Commerce Department announced that the provisions of certain previous notifications would not apply to balances or other assets in India of persons or concerns resident in Java other than those of subjects of a State at war with His Majesty and of concerns owned or controlled by such persons. The purpose of the notification was indicated in a communique which declared that debts due to creditors resident in Java need not be reported or paid to he Custodian of Enemy Property except when the creditors are subjects of a hostile State. All transactions in respect of payments to or from accounts of persons or concerns excluded from the authority of the custodian will be controlled by the Reserve Bank of India under the terms of the latter notification. The restrictions applicable to Java were extended to the entire Eastern colonial empire of Holland by a notification dated March 18. All orders for payments and transfers of gold or other assets emanating from enemy-occupied territory are to be treated as invalid. The original pattern of prohibitions and restrictions has been copied in the set of rules framed to prevent erosion of assets belonging to friendly nationals or unauthorised realisation of assets vested in them. The absence of any similar rules governing transactions with Lower Burma may occasion no little surprise, but the transfer of most offices earlier to Mandalay in unoccupied Burma will explain why no vesting orders hve so far appeared; though quite early in March there appeared notifications regarding assets of residents in the Straits Settlements, Malaya and British dependencies in Borneo.

**Indian Glass**

Dr. Nudel's note on the U. P. glass industry published by the U. P. Department of Industries shows that India's production and use of glass is limited in comparison with the U.S.A. which produced and consumed one-third of the world's glass in 1937. Total consumption of glass in India in that year is put at Rs. 2.4 crores and of this half was provided by imports. The U. P. has in most years produce about a crores worth of glass from six hollowware factories, thirtyone bangle factories and several hundred cottage factories.. Ferozabad is still the chief centre, and its bangles have come to displace the products of both Czech and Japanese factories. Dr. Nadel cannot explain why the U. P. factories have developed to the point at which half the glass made in India comes from them. The small bangle factories operating on a small scale over a long period retain special advantages but plate glass manufacture demands large capital. The tariff is of course a big advantage for Indian manufacturers though their case for full protection has not been allowed. Glass pearls and beads are now as abundant as glass bangles, and the most promising line at present is said to be bottle manufacture. Dr. Nadel does not recommend mass production though the bottle line is good for medium scale factories. Dr. Nadel suggests that thermos flasks manufacture must be attempted as there is good scope in India.

In he western districts of the U. P. there is a flourishing industry and only recently a bottle-making plant was set up in Benares State. Ferozabad with its 40,000 inhabitants lives largely by bangle-making. The **Shishgar** is a familiar craftsman, though the primitive furnace using ready-made glass is to be displaced by a new modern furnace. Conditions of work are to be altered in the interests of health. Most of the factories sprang up after 1918 and the products have a finish not obtainable from plastics or other substitutes for glass. In June, 1941 there were as many as 45 factories and the output of glass bangles had doubled while prices had gone up by 25 to 100 per cent. over the prewar level, more than neutralising the advantage in costs. The glass boom in Ferozabad created shortages of labour and transport. Wages went up, and the labour unions weakened. Ferozabad became suddenly prosperous. A rash of new premises, industrial ond other, broke out and the marks of technical progress e.g. in the making of glasshouse pots were not absent. The U. P. department has given much advice and opaque and opalescent designs have been evolved to suit modern taste. Pressed bangles have also appeared and a central gas plant for jointing bangles is being prepared.



The U. P. glass works at Bahjoi specialises in sheet glass manufacture. It is now producing 5,500 tons of window glass per annum. There is also a hollow ware plant at Bahjoi whose glass-blowers are justly famous. At Balawali, Sasni, Allahabad and other places are more glass works, depending largely on manual labour but turning latterly to machines at the instance of the U. P. Government. The Glass Technologist is known to have designed the new bottle-making plant in Benares as also for a large works at Ghaziabad intended to make tableware and bottles. The Bijnor factories produce small phials etc., but the manufacture stands in need of improvement and expansion owing to the acute shortage of bottles noticed last year. Relief should have come from the inception of two new plants. The Benares factory is expected to produce 3,500 tons of bottles in 1942 while the Ghaziabad factory if it gets going should give 1,800 tons. The part played by the glass section set up in October 1938 is indicated by the work done at the Benares laboratory. Research has materially aided the development of glass manufacture and the adoption of improved furnaces is not the least of its services. The manufacture of thermometers is contemplated under a scheme on which advice has been sought. The U. P. Department has helped to procure machines on private account and among its services must be cited the improvement of ventilation in the Ferozabad factories. In conjunction with the Department of Supply the U. P. glass industry has initiated production of hospital supplies and glass parts for machines besides dealing with various enquiries and distributing them.

The latest news from New Delhi imply a more optimistic view of the outcome of Cripps-Congress negotiations. Yet another formula has been put forward. Col. Johnson, President Roosevelt's envoy, would appear to be engaging his good offices to good effect. The present stage seems to represent a tripartite discussion, the principal negotiators being Sir Stafford Cripps, Col. Johnson and Pandit Jawaharlal Nehru.

---

The Political Correspondent of the "Associated Press of India" strikes quite a hopeful note:—

"The position after this morning's meeting of the Congress leaders is that a settlement, under which a national government may function in India is not improbable.

"Until after last evening's meeting of the Congress Working Committee, it seemed that a breakdown was inevitable, but it is understood that since then discussions have taken place as a result of which a new formula regarding Defence has emerged. This is now under discussion by the Working Committee. It is stated that Col. Johnson, played a leading role as mediator."

There can now be no doubt that President Roosevelt is exerting his personal influence in the sole determination that the Indian impasse must be resolved somehow, anyhow.

---

Meantime, the British propagandists in America, unappreciative of the efforts of the American President, seem to be at great pains to prepare the ground for the contingency of a breakdown in the present negotiations.

Strangely enough, Lord Halifax has figured as the star publicity agent of this propaganda. His Tuesday's speech at the New York Town Hall cannot help striking a jarring note to those who have maintained faith in his "bonafides" and liberal outlook with respect to the Indian question. Here are extracts which are worthy of Mr. Amery himself:—

"If our best efforts failed the British Government would find itself obliged to do its own duty without the assistance or co-operation of the larger organized Indian parties.

"The Congress is only a small proportion of the whole of India, and the exclusive claim of the Congress Party to speak for the whole of India is rejected by other bodies of Indians numbering almost half the total population and including a great mass of the 90,000,000 Indian Moslems and also large numbers of Hindus.

"The Ruling Princes and their States do not fit easily into the picture of India as the Congress Party would like to draw it. Yet the independence of the Princes is enshrined in solemn treaties with the King-Emperor and such treaties are only alterable by negotiation. To scrap these or any other treaties unilaterally would be to scrap one of the principles for which we went to war with Germany."

---

Lord Halifax lets the cat out of the bag in the concluding portion of his speech. What is the motive behind all this pleading 'a la' Amery? Read His Lordship's own answer:—

"The sincerity of the British Government is proved. No one will any longer be able to fool an audience by accusing the British of bad faith in India."

It is well-known that Lord Halifax has had an exacting time with American audiences when heckled about Britain's treatment of India. And he wishes to exploit Cripps' mission for prospective heckling by Yankee audiences.

The American press also is being worked up to prepare the ground for the contingency of failure. And, as is to be expected, Reuter, faithfully and copiously, reports such press comments as are adverse to the Congress. The "Herald-Tribune's" comment is typical:

"Lord Halifax last night gave a very fair and reasonable exposition of the major conflicting forces in India. The way in which the offer has been received has not increased American estimates of the realism of Indian political leaders. The most that any of us can hope for in this desperate world is only a chance to solve our own problems and not guarantee that they be solved for us."

---

On the other hand, it is not every American paper that has succumbed to this propaganda.

'The Daily Worker' urges that "Britain should make all the concessions demanded by Indians."

'The Chicago Times' says: "India will not fight for any kind of empire personified by Mr. Amery."

'The Omaha World Herald' contrasts the loyalty of the Filipinos with the failure of British rule over Indians and Burmese.

'The Fort Worth Star Telegram' says: "The Indian situation is the worst possible muddle and suggests that Britain should rapidly make further concessions."

TELEPHONE : CAL. 2845, 1273, 5397

All this labour headed by Lord Halifax may prove labour lost; for, Sir Stafford Cripps is determined that his mission shall not fail, President Roosevelt is determined to play his part for the success of the talks, and the Congress leaders have always shown that, once they are satisfied of the sincerity of British intentions, they do not quarrel over minor details.

Lord Halifax himself will testify to this from his experience with the Mahatma over the famous Irwin-Gandhi talks.

---

The Irwin-Gandhi talks, too, passed through acute, anxious vicissitudes; and they were crowned with success because Lord Irwin realised Gandhiji's sincerity and Gandhiji was struck by Lord Irwin's sincerity.

What matters is sincerity. And, in the momentous negotiations now taking place in New Delhi, every participant is acutuated by unquestioned and unquestionable sincerity.

The choice of Sir Stafford for this task at this stage is the first real acknowledgment of Britain's genuine desire to find a solution for the Indian deadlock.

All previous efforts for ending the impasse were half-hearted, faint-hearted and small-hearted. Declarations were made with pompous finality, and Indians were asked to take it or leave it.

---

There may be more shadow than substance in the proposals presented through Sir Stafford. But, that it is Sir Stafford who has brought them, and not only brought them but initiated talks in the utmost frankness of spirit and with the utmost freedom of criticism, has vastly impressed India's imagination and engaged India's earnest attention.

The talks between Sir Stafford on the one hand and the Congress leaders headed

OF—262

by Pandit Jawaharlal Nehru, Abul Kalam Azad and Gandhiji on the other are a model of frank and full exchange of views. Sir Stafford must have been greatly impressed by the calibre and intellectual and moral status of India's non-official negotiators; and, on their side, our leaders, too, should gratefully acknowledge the entirely changed atmosphere in which Sir Stafford has staged the talks.

Not only India, but the whole world, is awaiting, with tense and intense interest, the outcome of the present negotiations.

The three great Democracies are watching the developments with friendly, anxious interest. President Roosevelt's Personal Envoy in India has intervened. It is known that the opinion of Russia and China weighs a lot with the Congress leaders, particularly, Pandit Nehru.

Sir Stafford, whatever the restrictions imposed upon him as an emissary, is apparently determined to achieve success in his mission. It is also equally obvious that President Roosevelt, Marshal Chiang Kai-Shek and Stalin will powerfully aid and abet all efforts to achieve success.

---

Never before has the Indian problem been tackled under such favourable auspices or with such united will for getting to the heart of the problem or through the active good-will of acknowledged world-leaders.

Everyone in India, irrespective of party affiliations, wishes well of Sir Stafford's mission for Sir Stafford's sake. If his mission is a failure—each one of us hopes and prays it won't be—it will still be said that there was nothing that Sir Stafford could do, which he did not do.

The trouble is with the traditional complacency of the British Cabinet towards the Indian question, the age-long wire-pulling of vested interests, the misleading advice given by the "men on the spot" and Britain's general disposition to rob generosity of all grace.

---

The verdict of Indians who are competent to pronounce a verdict in this matter is clear. "Too late and too little" —sums up the general view. I may add, big promise for the future, meagre performance in the present.

This is not the time for niceties of calculation, hair-splitting interpretations and mental reservations of any kind; the correct guide in this perilous hour is to realise that trust begets trust.

This has never been appreciated by our masters in New Delhi. They stand by the letter of the law. Prestige is their invariable motto. They are sure that they are always in the right and Indians always in the wrong. They have preened themselves that they understand and represent India better than Indians themselves. In this supercilious attitude, they have been woefully blind to the importance in this war of the morale of the civilian population. "Let the Congress dogs bark, our war caravan will carry on" —this has been the policy of the last thirty months.

This policy has brought India to the present pass. It is an American paper, the "World-Telegram" of New York, which has realised the fatal consequences of such a policy.

---

"But if Britain is a thousandfold stronger and American shipments a thousand times larger, the defence of India would be impossible without the vigorous co-operation of Indians, ready to fight for their freedom."

This is an observation which must be carefully pondered over by Mr. Churchill, Mr. Amery and Lord Linlithgow and in the light of which, they must reorientate their attitude to India.

* * * *

In adding to the gaiety of nations Mr. Percy Athos has specialised to advantage. His intimate little show proves a revue above the average. Those familiar with the night life of larger cities than Calcutta can recapture many a pleasant thrill. That is by no means enough, for topicality is the essence of a revue, and Mr. Athos has to put something out in Windmill style. His company certainly does that as enthusiastic audiences at the Elite Theatre on Wednesday and after have agreed. His company is small but efficient, and they work as a team to Mr. Athos' direction and our own particular pleasure. I feel sure that Calcutta will not miss a show that is put across with more than average skill, and the verve of the performance was equalled by the pep of the publicity which luckily came my way.

*(From Our Correspondent)*

Bombay, April 8.

FROM politics to defence is a natural and easy transition. The war is very much in the mind of Bombay. None can flee from the press of communiques and semi-official commentaries. Beyond the rumours emerges the one fact that Britain is playing a waiting game. The story of raids has occasioned much alarm and confusion. Nerves are tauter than ever. The bullion market, of course, jumps to it. A report of an alert in Colombo sent up silver last week but not all are *chokseys*. The share market is in such a bad way that things are beyond repair. Minimum prices, as everybody suspects, do not make for marketability. Dalal Street is definitely a depressed area. Many operators are on their native heath and business passing is scarcely a tithe of what it was. The enforcement of the rules relating to minimum prices for last week has choked business and the waiving of the rule concerning fixed prices for certain forward scrips has pushed prices down to the point at which sellers have lost interest even in the realisation of investments. The situation of the investor is not improved by a reading of market reports. There is no longer any inclination to hope that things will mend when factory insurance is in operation.

Events of the past do not fail to evoke interest. Three Parsis who went off on a world tour on push bicycles are to come back soon. They are said to have covered fifty-four countries and lived almost on nothing. They will be back soon and the Mayor and Sheriff are associated with the reception committee that is going to give the youngsters a big hand. Cyclists and motor-cyclists too are sure to turn out in force, and the usual purse presentation will follow the reception. Going round the world in ten years does not seem much after Mr. Howard Hughes did it in record time by plane, but the Parsis have done it without any capital except plenty of energy. Their pluck and skill is so much admired that sportsmen of all classes think that the reception committee must do them proud on Sunday week.

Bombay's industrialists are not at all surprised by the announcement regarding Government's acquisition of Hindustan Aircrafts. It does not seem as though the report of the Bankes Commission in 1936 influenced the decision. It was merely the promoters' desire to oblige the Government and keep the factory going somehow. The reported formation of another aircraft company under the auspices of Tata Sons, Ld. does not excite enthusiasm at all. The terms on which Mr. Walchand and his associates have been bought out are not known. The press note of last week gave very little away, but it would not be surprising if the rent of ability—to use the economist's pet phrase—has been paid in this case. There are too many risks in the business—so Government is to take over. The Mysore Government stands aside in the war period without prejudice to its rights. It is to be run as a non-commercial enterprise, which means the eventual loss falls on the taxpayer. That, of course, is not a pleasant conclusion, but the arrangement suggests that the negotiation leading to the assumption of Government control was favoured for the reason that prospects had become worse than obscure.

Youth will be served and by none better that Bombay's new Mayor, Mr. Yusuf J. Meherally. He has been in and out of jail. Youth Leaguer, Congress Socialist and City Father he has been more active and conscientious than any other rich young man about town. He becomes the youngest Mayor on record by beating the Muslim League candidate last week. Dr. Collaco makes way for one known to push, and push hard. The new Mayor is very keen on good causes. His reforming zeal will stoke up the Municipality's slow fires. His election certainly marks the climax of Congress ascendancy in the Corporation. To-day when civil defence engrosses the public attention it is but right that an energetic Mayor should be at the helm of the Municipality to help the public.

Almost unnoticed by press and public the long strike in the Sewri plant of General Motors (India) ended on Saturday last. The usual agreement was signed by the Secretary of the General Motors Workers' Union. In the case of the Ford plant strike last year, some misgiving was expressed locally as to the Ford Company's attitude to Indian Labour. Such doubts have not been in evidence and the Commissioner of Labour, Mr. G. B. Constantine has reason to feel pleased with the settlement he has promoted. Workers who have left Bombay have been given four days of grace to come back after work was resumed on Monday. The terms, framed at the instance of Government, provide for the payment of a bonus equal to one-twelfth of the total earnings from January to December 1941. The bonus is to be paid in two instalments. The workers have won, but the other issues in the dispute are left to arbitration. There will be no victimisation merely because of the strike, and the arbitrator selected by Government will complete the work of settlement of a dispute that interfered with the war effort for some time.

The Bombay Government has compromised by sanctioning an increase in wheat prices. As from April 1st prices will be substantially higher. The Government of India bowed to the inevitable by sanctioning a substantial increase in prices. The result is that prices have been more than maintained in distant markets. The Controller of Prices here has peremptorily revised his schedule but that is no assurance to the consumer of regular supplies at published prices. There is a very wide spread between wholesale and retail prices, and the working class is sure to react unfavourably to the conditions that arise as much from Government's negligence as from the tactics of the trade. All commodities except grain are cheap. Wheat from the C. P. is as dear as wheat from the Punjab, and access by the sea does not make Karachi wheat cheaper. That from Nasik is naturally dearer, and the bulls have got something to show for having dabbled in wheat to the exclusion of everything else in recent months. Silver, of course, is a different matter and Bombay has come back to the view that silver is a safe bet.

The cotton restriction campaign has officially begun. Sowings in the C. P. are actively discouraged. But something more than a *communique* is needed to meet the situation created by the demand for more food. The C. P. Government has suggested that wherever possible short staple cotton should be given up in favour of food crops. It has also been suggested that if irrigation is possible, vegetables, fruits and spices should be grown. The expression spice is rather strange. Perhaps the C. P. Government in its wisdom expects farmers to grow cloves and nutmeg because the East Indies are lost to the Dutch.

# Tit Bits of Industrial Activity

### Rubber Control

The Indian Rubber Licensing Committee's functions have been extended to embrace control of rubber sold to manufacturers. A recent advertisement in the press called attention to the new link with the Controller attached to the Supply Department. Under the new system licenses are needed for sales to manufacturers who can use the raw rubber only for approved purposes. A new permit for sales to manufacturers has to be obtained at a cost of Re. 0-2-6 per every 100 lbs. or part thereof. Manufacture of any sort requires authorisation by the Controller of Rubber Manufactures. The procedure adopted in Britain to curtail output of tyres, etc., is likely to be copied in India though the Government is sure to suffer in respect of the 10 per cent excise duty. The dual process of application to the Controller and transfers under license for which a fee is charged indicates how fast rubber is becoming a controlled industry. But the international restriction scheme stands, and no efforts have been made as yet to scrap it. The Indian rubber planting industry which was told that demand would soon outstrip production has now a heavy responsibility as the loss of the N. E. I. and Malaya has deprived the Allies of 90 per cent of their rubber supplies.

### Supply Orders

The Supply Department's purchases up to December 1941 totalled in value Rs. 229.97 crores. The purchases distributed over a wide field were based on the policy of making the most use of available industrial capacity. That is why purchases for 28 months in Ajmer-Merwara came to Rs. 98,000 while purchases from Bengal came to over Rs. 79.74 crores. The distribution of orders does not obscure the fact that unequal resources and capacity are a mark of the Indian Provinces. The Province of Bombay got Rs. 50.9 crores worth of orders because the mills of Bombay enhance its industrial importance, but the C. P. got only Rs. 1½ crores worth of orders. Advisory committees are often told about the quantum and value of orders placed in the respective Provinces. Madras has often grumbled about its inadequate share of supply work, as is proved by the Rs. 8.89 crores worth of goods taken in 28 months as compared with the Rs. 35 crores value of orders placed in the U. P. The Indian States obtained orders valued Rs. 6.59 crores in the war period of 28 months suggesting that collectively the States did not get much to share. Orders placed with the Andamans came to Rs. 15.87 lakhs, a sum larger than the value of orders given in Baluchistan. The administrative framework may not have deliberately favoured Bengal and Bombay. The commercial importance and distribution of industrial establishments were large and favourable factors.

### Textile Production

For the six months February-July, 1942. Government have placed orders for 450 million yards of cloth. The figure immediately suggests that 25 per cent. of India's cotton textile production is earmarked for Government. The exodus of Bombay workers is likely to reduce the quantity available for civilian consumption, though orders for cloth, according to Mr. Krishnaraj Thackersey, have been allotted on the basis of loomage in the producing centres, the Bombay mills by virtue of their age and number have got orders for 200 million yards. Prices for Government orders have been fixed on the basis of maximum prices ruling in the second quarter of 1941 with due allowance for differences in respect of cotton, wages, fuel and stores. The cost plus method has been eschewed. A satisfactory disclosure made last month was that war orders except for flannelette had been executed. In that case special efforts will have to be made to secure execution. Prices are due for revision this year, and the schedule adopted will probably determine the prive level for piecegoods in the current year. It is manifest that raw cotton and yarn prices have no decisive effect on cloth prices in the war period.

### Pine Wool

What pine wool and how it is made use of is indicated in Dr. Batham's bulletin published by the U. P. Department of Industries. The wool is a soft, fibrous material with the smell of pine oil. It is made from the pine needles which are good for packing. Pine wool is said to be good for stuffing beds. Hospitals have tried it, and found it good. On the Kumaon hills pine needles can be had for the mere gathering. A factory at Bareilly can turn the needles into the fibre. Essentially the process of treatment with caustic soda and pressing makes it soft. It is by no means expensive and a maund of pure wool can be had for Rs. 2. After allowing for power and other costs, the cost is put at Rs. 3-10 per maund. Since the market for pine wool, admirably adapted for packing fruit in cases, is large and constant the margin of profit on an investment of Rs. 2¼ lakhs is assumed to be Rs. 35,000. The factory's output is estimated at 25,000 maunds and the rate of return is calculated as 15½ per cent.

# Olympus

*(From Our Correspondent)*

New Delhi, April 7.

THERE have been many swift changes in the Congress—Cripps negotiations. Last night it was a virtual breakdown for the revised proposals given by Sir Stafford Cripps in reply to the Congress statement on the Cripps scheme were reported to be far from satisfactory. The general anticipation was that the Congress Working Committee would finally inform Sir Stafford that the Congress could not accept his scheme. An abrupt change in the fortunes of the Cripps scheme was, however, noticed this morning. A fresh set of proposals appears to have been received—and with it, fresh hope that a settlement may yet be possible. Though nothing definite can be said at the moment, there is a distinctly hopeful feeling in New Delhi. The fact is that Sir Stafford Cripps cannot afford to go back to England with an unfulfilled mission. The only chance of putting up effective resistance against Japanese aggression lies in the establishment of a National Government in India which can organise the people and make them fight for the freedom of their country as the people of China or Russia. This appears to be fully realised by Sir Stafford Cripps.

The arrival of Col. Louis Johnson, President Roosevelt's Envoy, has been the turning point in the Cripps negotiations. With the full authority of President Roosevelt, he got into touch with Sir Stafford Cripps, with General Wavell and with Pandit Nehru. These three have been having prolonged negotiations on the Defence question—the main stumbling block in the negotiations. It is said that an assurance that even in the interim period the Council at the Centre will work as a Cabinet with the same powers and position as the Australian Cabinet or any other Dominion Cabinet has been given—with the exception of the Defence portfolio which the War Cabinet has been anxious to reserve as its own responsibility. The talks which Congress leaders had with Sir Stafford Cripps and General Wavell could not result in any satisfactory formula acceptable to both parties. The War Cabinet's fear appears to be that if the National Government to be formed is entrusted with the Defence portfolio, the Commander-in-Chief may find himself faced with difficulties in the conduct of the war. On the other hand, Congress leaders have been rightly feeling that if they have no control over, so important a Department as Defence —in fact, the only work of the Government otday—they cannot function as a National Government. The prime consideration in the minds of Congress leaders is that they should be enabled to organise the country against aggression and protect the people against the coming danger. They therefore feel that if Defence is to be taken out of their hands, they will neither be able to enjoy the authority and position of a Dominion Government nor be of real use to the people in the present crisis.

Several formulas have been under consideration. In the original draft of the Cabinet's declaration, it was categorically stated that the Defence of India would be Britain's responsibility. This was modified later so as to provide for some sort of joint responsibility—the Government of India being entrusted with the responsibility for organising the military moral and material resources of the country. In amplification of this revised formula, Sir Stafford Cripps gave a written statement yesterday specifying those sections of the Defence Department which would come within the responsibility of the Indian Defence Member. They were, to mention some of them, Public Relations, Soldiers' amenities, military education, canteens, etc. At last night's meeting of the Congress Working Committee, these proposals were summarily rejected as totally inadequate, but a new formula has to-day been put forward, which offers some prospect of agreement. The proposal made is reported to be that General Wavell should be made Supreme Commander and given a position corresponding to that of General MacArthur in Australia. He will be directly under the War Cabinet and will be responsible for the conduct of the war. Associated with the Government of India, however, there wil be both an Indian Defence Member and a Commander-in-Chief who will be in charge of Defence forces in this country—their recruitment, training and organisation in exactly the same manner as is now the case in the Dominions. The proposal appears to have come from Col. Louis Johnson *himself*. There is every reason to hope that within the next few days a satisfactory settlement will be arrived at.

The Food Production Conference which was convened by Mr. N. R. Sarker, the Education Member, was the most important official activity this week. In his opening speech Mr. Sarker pointed out that the stock position of the different crops was not at all strong. He did not consider the present time opportune for building up stocks in different parts of the country as such a course might react adversely on the available supply, but he suggested a co-ordinated food production drive by Provincial and State Governments. A plan for growing vegetables and fruits on waste or unused lands was one of his useful suggestions. The Government of India, he said, had under consideration the question of guaranteeing a minimum price and also setting up, a central organisation for the pooling and dissemination of information. Mr. Sarker advised every Provincial and State Government to set up suitable advisory committees and also appoint Regional Officers for organising propaganda and supervision work in the villages. A Central Advisory Council to advise on an All-India basis food and fodder production programmes for different regions is also to be set up.

The resolutions adopted at the conference covered very wide ground. In pursuance of "The Grow More Food" campaign the Provincial Governments have been requested to make arrangements to ensure the availability of adequate supplies of seed for suitable varieties of crops and for the supply of manure and to increase the existing water supplies, and give liberal grant of loans and concessional rates. For lands newly brought under food crop cultivation it has been suggested that either the land revenue and rent should be foregone or suitably reduced. By another resolution the Government of India has been requested to buy such quantities of foodstuffs in the open market as would prevent any serious deterioration in the level of prices. Lastly there was the important recommendation that steps should be taken to revive, encourage and develop indigenous transport in order to meet the increasing transport difficulties. The conference did good work and has laid down a detailed and well-thought-out programme for meeting the food supply problems. The success of the programme now depends upon the energy and initiative shown by Provincial Governments and States in giving effect to these resolutions.

No less important was the Commerce Member's conference on price control. In his speech the Commerce Member, Sir Ramaswami Mudaliar, emphasised the importance of "the economic front" in order to see that the civil population was kept in such a state that there is neither panic nor social discontent. In order to prevent the hoarding of foodstuffs he suggested the system of licensing wholesale dealers by Provincial and State Governments. It appears from the replies from Provincial Governments that they are not in favour of setting up regional committees. Another point made clear by the Commerce Member was that the Government of India were willing to consider any proposal from Provincial and State Governments for the grant of emergency powers for controlling prices of food stuffs. It was also his opinion that stock building by Provincial and State Governments would lead to great confusion and imperil the prire policy.

HILL-BIRD.

# Resume of Commodity Markets

INDECISION again characterises most commodity markets. Most of them are weighed down by war news and the obscurity still surrounding the Delhi *pourparlers*. The cotton market has not fully overcome the weakness developed prior to the Easter holidays. The jute market is in the grip of dull conditions. The wheat market alone remains firm since demand is large and price control has been modified.

In his address to the fourth (or is it fifth) price control conference the Commerce Member dealt largely in platitudes, but there was a promise of co-ordination and an assurance of uniformity. The appearance of the factories war risk insurance scheme is not likely to help the commodity markets which are naturally hesitant after official confirmation of enemy activity in the Bay. The buying impulse is dead and the relapse in jute and hessian appears to overshadow everything else.

**Jute:**

On nearly all days in a week broken by holidays the jute market has been quiet with quotations showing little movement. The weakness developed by the manufactures market has not been yet reflected fully in raw jute. But export demand is lacking and mills remain indifferent. In the case of pucca bales the rate per bale is lower by one rupee. On Wednesday prices were unchanged and mills showed no interest. The futures market is dead, and as in the case of cotton, spot rates alone mean a decline.

**Hessian:**

The jute manufactures market has registered a drop in values. In the case of 9 porters there is a drop of one rupee eight annas as between this week and the last. The long holiday has not improved the tone. 9 porters have declined to Rs. 18-8 for April shipment and rates for forward shipment are correspondingly lower. The slackness of demand for jute and jute manufactures is responsible for a fall in the rates for heavy goods as well. The rates for near positions are affected like those for ready delivery. Cornsacks are quoting lower at Rs. 38-4 for April shipment and "B" Twills have weakened to Rs. 37-8 after standing at Rs. 38-8 before Easter. It is reported that sellers predominated after the scale-down in hessian prices. Business is regrettably small as before.

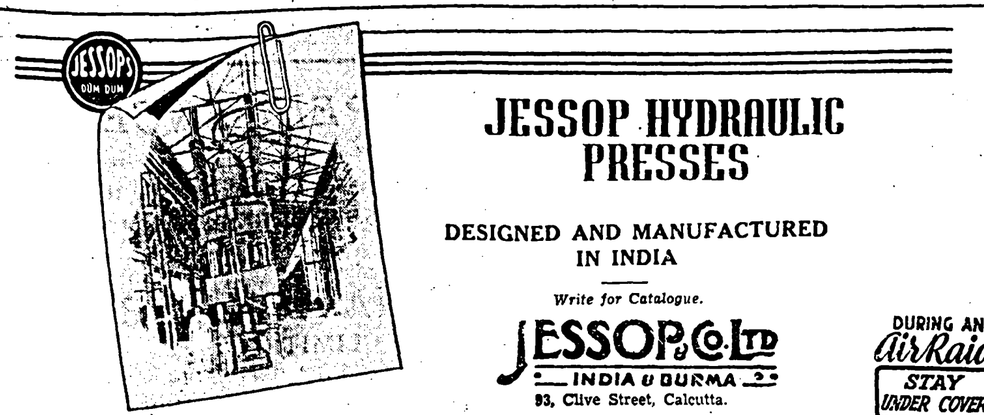
Special interest anyhow attaches to a circular of the Indian Jute Mills Association drawing attention to the fact that the total March stock figures reveal an increase of 1.38 crore yards on February while sacking stocks are lower by 1.22 crore yards. After discussing the difficulty of forecasting the circular states that there will be no change in working hours. This means that there can be no immediate recovery in hessian.

**Wheat:**

The wheat market presents a firm front. The crop movement permitted after all in the case is a minor factor. After the Government's consent to higher prices, the market is fully steady with Calcutta quoting Rs. 5-12 for both ready and May delivery. A week ago the market was quietly firm at Rs. 5-12 per maund. In spite of the fears of extended intervention and licensing of wholesale dealers the wheat market is stronger, Karachi still quotes Rs. 44 per candy for ready. Bombay is reported to be steady and sporadic selling for profit at Karachi has not altered the trend. Wheat has strengthened in sympathy with seeds. The oil-seeds market in spite of limited buying by the Ministry of Food was until recently steadier.

**Cotton:**

The cotton market which opened fairly steady on April 1, has taken without ill-effects a knock or two. War news explains the easier feeling noticed but rates do not show much change after fluctuations. The trend towards stability at high prices in the U.S.A. does not mean much for Bombay. The delay in the Delhi talks has affected sentiment. The sagging tendency, noted after profit-taking in New York, caused no damage; Broach July-August is still abnormally higher than the April-May contract and covering by shorts was a feature of the week. After the holiday some steadiness was apparent and Broach April-May touched Rs. 156. The cotton market is thus turning steadier despite indifferent news from Burma. Fluctuations have been narrower. Oomras have developed a steadier feeling while the spread between Bengal and Oomra is quite small, suggesting that strong resistance at decline will continue to be a feature of the market.



**Piecegoods:**

The piecegoods market has been a sustaining factor. At Bombay there has been recently a mild revival in the cloth market. Dealers think the decline should stop and reports of textile activity and war orders have helped to cheer the market. The upswing in rates for all imported goods pushed prices of mill goods. Wider widths have been freely bought and except for finer goods demand is broadening. Prints and voiles are getting dearer. Calcutta conditions are slower in improving but the undertone is distinctly better.

**Bullion:**

The bullion market in Bombay is dominated by a twofold feeling. War news and general nervousness push prices up, but large arrivals owing to the temptation offered to holders brake the advance. If the last week was dull the silver market has picked up rapidly. New York is unchanged at 35⅛ cents per ounce; so also is London which quotes 23 7/16d. for both spot and three months' delivery. Gold and silver were not dealt in on Wednesday but on Tuesday the trend was definitely upward. The price of gold has gone up in the wake of silver. The demand for coin has revived and Calcutta quotes Rs. 41-4 per piece a rate much higher than the Bombay price of Rs. 38-14. As in the case of silver the price for ready gold is above that for first or second settlement.

The price per tola of gold has moved between Rs. 52 and Rs. 53 while that for silver at Rs. 82-4 per 100 tolas in Calcutta is still below the Bombay quotation of Rs. 83-10 per 100 tolas on Thursday. On Tuesday the opening in Bombay was quiet but bullion has apparently picked up quickly after the news of the big raid on Mandalay came through. The rates on Thursday were in the case of gold at least one rupee higher than on April 2. In the case of silver it was Rs. 83-10 per 100 tolas as compared with Rs. 83 a week ago for 100 tolas for ready delivery.

# Jute and Jute Manufactures

(By Our Jute Correspondent)

Calcutta, April 9.

Whilst Bengal is carefully watching developments which intimately concern her interests on the political front with the progress of the Cripps talks, she has also had to make adjustments to meet the immediate threat to her commercial interests in view of the Japanese menace which has drawn within striking distance of her capital. The shipping position in her ports has had to be altered, according to the fluctuations of the war and not the dictates of supply and demand, so that the clouds of war have hung heavy over her markets, especially where jute is concerned owing to the vulnerable position of the mills concentrated on the banks of the river. Mills, generally, have steadfastly refused to increase their stocks of the raw material in their godowns, and even hand-to-mouth purchases of small lots have naturally ceased. This is understandable particularly, as labour shortage is adding to their difficulties and several mills have already had to shut down looms owing to the lack of operatives. This situation must be expected to deteriorate, and with it, either the prospect of a shorter working week or the shutting down of more looms appears inevitable. A further factor which has encouraged their complete withdrawal has been the good progress recorded of sowings of the new crop and the growth of the young plants under favourable conditions. All, however, is not quite plain sailing. Curtailment of shipping by inland river services which normally handle the bulk of the mills' purchases from their up-country agencies, has had to be enforced as a temporary measure for obvious military reasons. Mill deliveries under existing contracts either in transit or for near delivery are likely to be held up for sometime or at best subject to considerable disorganisation. Even country rivercraft are subject to the same regulation, so that with the congestion on the railways and shortage of wagons, mills must experience difficulties and a serious time lag before jute purchased on new contracts can actually reach their mills.

It must be realised that the labour shortage is likely to affect the handling of all goods not only in Calcutta but also in the mofussil. Even as countrycraft are finding difficulties in obtaining the necessary complements to work them, so also there will be fresh difficulties to overcome in the marketing and distribution of the balance of the old crop and the new crop from upcountry. Mill stocks on their present working hours basis of 60 per week, are expected to carry them into August which in normal times would be adequate, but in view of these new factors require somewhat different assessment. The Bazar-Hathkolla markets are depleted of stocks, only low class jute, which mills are generally avoiding, being in evidence. Press-houses have mostly closed down and only a few Indian balers are making any claims to carry on. These are averse to entering into fresh commitments or any high grade marks and are likewise being hampered by lack of labour and supervising staff. Mills, therefore, cannot look to local markets as a fruitful field to cover up any irregularities in their stocks.

Indian loose jute sellers, finding no support from buyers, have been forced to close their agencies, dismiss their staff, and close down for the season. There is little prospect of the Marwari element returning from their homes and reopening unless business shows signs of improvement and the lodestone of profits is there to lure them from safety. In consequence offers of jute are very limited, significantly so, from Indian sellers, so much so that brokers are concerned as to how they are to run their business for the coming season, in view of the disinclination of these balers to commit themselves in any way.

These problems whilst they have no immediate influence on the state of coma to which the market has fallen will nevertheless cause alarming stresses if timely restoratives are not applied. If recovery is too long delayed, it will be impossible to stimulate vigorous life into so moribund a body, bereft as it must be of a number of its limbs. The war has shown us the vital importance transport has in the success of any campaign. Industry must face the facts and march with the times. It is interesting to note the falling off in the arrivals of jute into Calcutta for March and the figures for April are naturally expected to be down to the bare minimum.

Quotations are as under:—

| | 1941 | 1942 |
|---|---|---|
| Estimated arrivals for March in maunds .. | 6,93,000 | 3,23,000 |
| Previously received from July to February .. | 66,44,000 | 49,64,000 |
| Total up to date .. | 73,37,000 | 52,87,000 |

The only business in jute which has come to light was a small lot of European Packing specil Tops, Mill tops and Mids at Rs. 15, Rs. 13 and Rs. 11 respectively transacted with a mill. There was also some enquiry for Dundee Hearts but no business resulted. The full Easter holidays were enjoyed by all sections of the trade for the nonce.

The Hessian position showed signs of firming up prior to the Easter Holidays with the approach of due date settlement, prices for near delivery were in some demand chiefly Egyptian fabrics. Other markets remained inactive but at this time the market closing was steady. Subsequent to the holidays the market having steadied up towards due date a fair amount of 8.10 ozs. changed hands for settlement account since when both Hessian and heavy goods have been stagnant on account of the shipping difficulties. The market closes purely nominal in rates.

Quotations are as under:—

| | Ready | April | May-June | July-Sept. |
|---|---|---|---|---|
| | Rs. a. | Rs. a. | Rs. a. | Rs. a. |
| 9 Porters .. | 18 8 | 17 8 | 16 0 | 15 0 |
| 11 porters .. | 22 0 | 21 8 | 20 0 | 19 4 |
| "B" Twills .. | 38 0 | 37 0 | 36 0 | 35 0 |
| Cornsacks .. | 38 4 | 38 0 | 37 0 | 36 0 |
| Liverpools .. | 40 8 | 40 4 | 40 0 | 39 0 |
| Heavy Cees .. | 32 8 | 32 12 | 33 8 | 34 0 |

yields on the new loans have been far more favourable than they need be. In simple terms, our general complaint has been that the Finance Members in India have not been borrowing on terms as cheap as are warranted by the high credit that this country enjoys both at home and abroad. The credit policy of our Finance Members have been except during the regimes of Sir Basil Blackett and Sir Jeremy Raisman, a pale imitation of the credit policies of the British Chancellor of the Exchequer. In our view, many of our Finance Members did their best to disrupt the credit of the Government; but the intrinsic factors pertaining to the credit-worthiness of India have always asserted themselves. The high credit that India enjoys to-day is not due to the past galaxy of British Finance Members, but in spite of them. So far as we are concerned, we are perfectly satisfied that an Indian Finance Minister will have a higher notion of the credit of his own country than his British predecessors have been capable of.

Mr. C. Rajagopalachari was the Premier and Finance Minister of Madras. He endowed his Government with such a high credit that he could raise a loan during his regime on the same terms as the Government of India itself, though popular fallacy will insist on putting the credit of provincial governments as slightly lower than that of the Central Government. Every new loan planned and devised by Mr. C. Rajagopalachari provided conclusive testimony that an Indian Finance Minister could so guide the financial administration as to raise the credit of his Government to the highest pitch and to exploit that credit in the most scientific way for raising loans on the most favourable terms.

The dullness of the money market is accompanied by similar dullness in the exchange market. Demand for remittance is small, and rates are still very much the same as before the holidays.

T. T. on London is 1/5 31/32d. and rates for three months' and four months' bills on London are 1/6 9/32d. and 1/6 11/32d. U. S. dollars are quoting Rs. 332¾ per 100 dollars for telegraphic transfers. Firms' money for call and term deposits is quoted at ¾ per cent.

## Investor's Supplement

Vol. XXIX. No. 16 SATURDAY, APRIL 11, 1942 Price Re. 1

*Stock Markets to-day and to-morrow*

## MACNEILL COAL GROUP RESULTS

The stock exchanges in India do not make a very brave showing even after doubts as to war risk insurance for factories have been set at rest. Confidence is slow in returning, and attractions of real property in the interior appear overwhelming, even if prices asked for are definitely higher. In the case of both jutes and engineerings the main factor is the absence of investment support. After four days of rest the Calcutta market opened dull and has so far drawn little inspiration from the rally in Bombay. The war news is not calculated to cheer up investors, but a settlement of the constitutional issue may prove a powerful tonic in the near future. Some influential support has been noted in the giltedged section and prior charges have not been overlooked. Business is still limited in all sections. Company reports excite little attention, and it is not strange that prospects are evaluated in the light of the Japanese menace in the Bay of Bengal.

* * * * *

The results for the half-year ended 31st December, 1941, of coal companies belonging to the Macneill group just published, confirm to a certain degree the optimistic views expressed by the directors on the last occasion regarding prospects for the period covered by the report. Since the close of the previous half-year, there had been improved shipping facilities, and to a lesser extent, improved wagon supplies enabling increased despatches.

Total aggregate Raisings for the group during the six months ended 31st December, 1941, amounted to 10,21,229 tons, the figures for the previous three half-years being 9,38,433 tons, 10,56,636 tons and 10,06,334 tons respectively. Despatches were also in line with the larger volume of Raisings, the figures being 10,54,652 tons against 9,26,081 tons, 10,11,266 tons and 11,05,449 tons in the previous half-years. Some liquidation of the large increase in stocks at the end of the last half-year has also been possible and stocks at the end of 1941 were well below those at the beginning.

The total net profit for the five companies is somewhat higher at Rs. 11,26,107 against Rs. 10,28,126 in the previous half-year, Rs. 12,60,160 for six months ending in 31st December, 1940 and Rs. 16,82,327 for six months ending 30th June, 1940. With the exception of the *Equitable Coal Company, Limited*, where the ordinary dividend recommended is 7½ per cent against 10 per cent previously, all the other companies have maintained the previous half-year's declaration.

The net profit of the *Equitable Coal Company, Limited*, before taxes and Cesses and Depreciation, for the half-year under report is slightly down at Rs. 7,56,505 against Rs. 7,89,258 previously. Rs. 1,31,852 (1,28,735) has been set aside to depreciation while the amount set apart for taxes and cesses remains unchanged at Rs. 2,25,000. Rs. 1,50,000 (same) has been added to General Development Reserve. After making these allocations and meeting the dividend of 6 per cent per annum on preference shares, a dividend on the ordinary shares of 7½ per cent (10 per cent) for the half-year has been recommended. Incidentally, the last recommended dividend is the lowest for the last eight half-years. The amount carried forward is higher at Rs. 1,90,735 against Rs. 1,75,368 brought in. According to the Directors: conditions at the Company's collieries are satisfactory, and sinking and filling up of the new shafts at Bhanora continues. Steady progress is being made with the Central sand stowing scheme, but inevitable delays have been caused by the difficulty in securing delivery of the necessary plant.

* * * * *

The net profit of the *Dhemo Main Collieries, Limited*, is slightly up to Rs. 58,979 against Rs. 53,839 for the previous six months. The sum of Rs. 28,510 (Rs. 29,373) has been set aside to depreciation while a greater amount of Rs. 14,000 (Rs. 11,000) has been provided for taxes and cesses. The ordinary dividend at 1¼ per cent for the half-year has been maintained at the former level. The amount carried forward to next half-year's account is Rs. 18,676 against Rs. 22,207 brought in.

* * * * *

The *West Jamuria Coal Company, Limited*, records a rise in the net profit reported at Rs. 1,05,043 against Rs. 96,130. The sum of Rs. 12,647 (Rs. 14,492) has been set aside to depreciation, while Rs. 20,000 against nothing previously has been alloted to General Reserve Account. Provision in this case has to be made for higher taxes and cesses, the amount being Rs. 55,000 against only Rs. 28,000 previously. The dividend on the ordinary shares at 10 per cent for the half-year has been maintained at last half-year's level and the amount carried forward is higher at Rs. 19,163 against Rs. 11,766 brought in.

* * *

The increase in the net profit of the *Hurriladih Coal Company, Limited*, has been more pronounced than in the case of the others, figure at Rs. 1,26,156 being more than double that for the last half-year at Rs. 55,980. The sum of Rs. 21,743 (Rs. 21,421) has been set aside to depreciation. The provision for taxes and cesses is necessarily higher at Rs. 55,000 against only Rs. 10,500 previously. The sum of Rs. 20,000 has been transferred to General Reserve, while nothing was added during the last half-year. The dividend at 3¾ per cent for the half-year has been maintained. The amount carried forward is not very much changed at Rs. 25,376 against Rs. 25,963 brought in.

* * * * *

The results of the *Mundulpoor Coal Company, Limited*, make a rather poor showing, since the net profit at Rs. 19,424 is considerably lower. This compares ill with Rs. 32,919 in the previous half-year and is the lowest recorded since December 1937. The sum of Rs. 12,217 (Rs. 11,701) is set aside to depreciation while usual provision is made for taxes and Cesses by another Rs. 1,500 against Rs. 6,500 previously. The dividend at 2½ per cent for the half-year is maintained. The amount carried forward is also lower at Rs. 20,210 against Rs. 28,655 brought in.

* * * * *

The Directors take care to remark that since the close of the half-year under review world events have moved with bewildering rapidity and the loss of the group's agency in every major port from Rangoon to Shanghai is bound to affect the business in a manner which cannot yet be fully appreciated. In regard to the immediate future, the directors point out that while the companies are in a position to take advantage of available business, the coal trade is faced with many and serious problems. The acute and growing shortage of transport facilities may lead to restriction of raisings;

## CALCUTTA STOCK EXCHANGE

*(From Our Correspondent)*

*Calcutta*, April 10.

THERE has been practically no change in trading conditions on the local stock exchange after the Easter Holidays. The volume of business has been on a considerably reduced scale. The absence of any material improvement in the war situation has unnerved nearly all the operators here and little interest was evinced in industrial shares of even prominent companies.

The results of some of the prominent tea companies, whose balance sheets were recently published, did not even lead to improved enquiry for tea scrips. It looks as if this inactivity in the market will persist until there is a definite change in the war situation. It is, however, expected that there will be some slight increase in prices on general buying following the reports that the differences between the British Government and the Congress have been bridged successfully. There may be a setback if a compromise does not follow.

In the government securities section, steadier conditions have been noticeable of late though there has not been any appreciable increase in the volume of business. 3½ per cent Paper is quoting at the time of writing in the neighbourhood of Rs. 87-12. Among terminable loans business was done in small lots, the 1949-52 Loan being done at Rs. 95-3; 1947-50 at Rs. 97-14 and 1945-55 at Rs. 104-13. Other loans were steady at last week's levels. Provincial Loans were unchanged on the previous week.

There has been no change in the money conditions during the week and the treasury bills rate is slightly higher at rupee one annas three and pies seven per cent per annum.

No trading is reported in public bodies' debentures. Among Railway debentures, *Howrah-Amta* 6 per cent (1908-1948) changed hands at Rs. 104-8. Steady transactions took place in jute preference shares, *Hukumchand* being done at Rs. 126 and *Reliance* at Rs. 132. Among other industrial shares, *Steel Corporation* were placed at Rs. 91; *Humayan Properties* at Rs. 7-6; *British India Corporation* at Rs. 159 x.d.; *New Victoria* at Rs. 7-6; *Cawnpore Sugar* at Rs. 150 and *Tezpore Tea* at Rs. 14.

**The market report from Madras was not received up to the time of going to Press.**

In the cotton section, prices remain unchanged, no business being done during the week.

Among Bank shares, *Imperial Bank* fully paids met with business at Rs. 1,348 and *Reserve Bank* at Rs. 91.

There was no business in jute ordinary shares, but in the coal section, a stray transaction was possible in *Singaran "B"* at Re. 1-15.

In the Engineering section, *Indian Iron* and *Steel Corporation* have again been the only two counters in which transactions have been recorded. *Indian Iron* fluctuated between Rs. 21-12 and Rs. 22-6 and *Steel Corporation* between Rs. 13-4 and Rs. 13-10, closing finally on Thursday at Rs. 21-14 and Rs. 13-6 respectively.

Sugars have been quiet but steady, *Murree Brewery* being crossed at Rs. 15. Other scrips do not command attention.

There were some deals in tea shares, buyers being attracted by the prospect of increased dividends. *Central Cachar* were crossed at Rs. 71; *Choonabhutti* at Rs. 492-8; *Darjeeling and Cinchona* at Rs. 195; *Hantapara* at Rs. 446; *Nagri Farm* at Rs. 23-8 and *Roopacherra* at Rs. 9-8.

In the miscellaneous section, *Burma Corporation* were standing at Rs. 2 and *Indian Copper Corporation* at Re. 1-10. *British India Corporation* were crossed at Rs. 4-10 x.d. Paper shares were a dull market, *Star Paper* changing hands at Rs. 13-8.

## BOMBAY STOCK EXCHANGE

(From Our Correspondent)

*Bombay*, April 9.

*Money.*—The rate for call money continued to be quoted at ¼ per cent.

*Securities.*—Prices of giltedged securities in the local market indicated a somewhat steady tone. 3½ per cent Paper, after touching Rs. 88-4, closed slightly easier at Rs. 88-1 as compared with Rs. 97-15 a fortnight ago. Among short and long-dated loans, 1963-65 improved from Rs. 88-2 to Rs. 88-10 and 1947-50 from Rs. 98 to Rs. 98-2. 1948-52 were, however, maintained at Rs. 93-1; 1951-54 at Rs. 94-2; 1960-70 at Rs. 103; 1955-60 at Rs. 107-8; 1945-55 at Rs. 105 and 3 per cent 1946 *Defence Bonds* at Rs. 98.

*Shares.*—During the week under report, the local share market exhibited a nervous tons except towards the close when there was a tendency to improve owing to the restoration of confidence among the operators following the publication of the Ordinance relating to the war risk insurance of factories. To-day's liveliest feature is a spurt of about 40 points in *Tata* ordinaries and 35 points in deferreds owing to short covering. Cash issues were apparently in demand like old forward brisk favourites.

*Textiles.*—Prices in this section, after touching lower levels, closed slightly better on some buying. *Bombay Dyeing*, after being done as low as Rs. 1,000, improved to Rs. 1,020 in mid-week, and closed at Rs. 1,005. *Central India* improved from Rs. 305 to Rs. 322; *Century* from Rs. 372 to Rs. 380; *Gokak* from Rs. 230 to Rs. 238; *Kohinoor* from Rs. 410 to Rs. 418 and *Svadeshi* from Rs. 345 to Rs. 380. *Colaba* were placed at Rs. 151-8 forward. *Sholapoor* were done at Rs. 5,225 and *Vishnu* at Rs. 1,550.

*Hydro-Electrics.*—*Tata Power* were quoted at Rs. 1,365 for forward and Rs. 1,337-8 for cash. *Tata Hydro* continued to be steady at Rs. 150-8. *Bombay Suburban* were marked at Rs. 173-12 and *Ajmer* at Rs. 12-15.

*Steels.*—Steel shares met with some selling in the early part of the week. *Tata* ordinaries opening as low as Rs. 204 and the deferreds at Rs. 1,090. Towards the close of the week, however, there was some continuous support with the result that prices improved, the ordinaries finally closing higher at Rs. 244. The deferreds have shown a rise of about 35 points, quoting at Rs. 1,162-8 for cash and Rs. 1,305 for forward delivery. The first preferences changed hands at Rs. 180 and the second preferences at Rs. 110-8.

*Banks and Insurance.*—*Imperial Bank* fully paids were done at Rs. 1,390; contributories at Rs. 341-4; *Bank of India* at Rs. 129-8 and *Reserve Bank* at Rs. 95.

In the Insurance section, *New India* closed better at Rs. 40.

*Miscellaneous.*—*Associated Cement* continued to be steady at Rs. 155-8 for cash. *Bombay Burmah Trading* old shares were also better at Rs. 202-8 cash, while the new shares were maintained at Rs. 60. *Belapur Sugar* were higher at Rs. 225 cash. *Scindia Steam* after touching a low of Rs. 17, closed higher at Rs. 17-10. *Alcock Ashdown* were done at Rs. 425 cash and Rs. 400 on forward. *Premier Construction* were slightly better at Rs. 107. *Shivrajpur Syndicate* were maintained at Rs. 30-8 and *Bombay Tramways* at Rs. 125-8.

**THE BELSUND SUGAR COMPANY, LIMITED**

**NOTICE IS HEREBY GIVEN THAT THE TENTH ORDINARY GENERAL MEETING OF THE BELSUND SUGAR COMPANY, LIMITED, will be held at the Registered Office of the Company, 1, Clive Street, Calcutta, on Wednesday, 29th April, 1942, at 12 noon, for the following purposes:—**
