Quotations are invited for purchase by the North Western Railway of 5000 Nos. gauge glasses 10½ inches long x 5/8 inch dis to I.R.S. specification 2-1-34. Quotations may be submitted by letter stating maker's name and quantity available on or before 20th May 1943 and should be addressed to the Controller of Stores, North Western Railway, Lahore.

there ran the reception and transit camps. Embarkation at Berbera began actually in May and was revived in November. But the journey from Diredawa was preceded by a halt at Mandera so as to safeguard the health of the evacuees. Four Italian vessels were expected to take 10,000 Italians off in the first trip and the camps tried to preserve family life. Out of 41,000 registered for evacuation the records accounted for 18,200 repatriated and 14,000 men of military age sent to the internment camps in East Africa. The casualties up to the date of embarkation were few, whether from disease or accident. Even epidemics caused little damage, and Italian doctors agreed that the military administration carried out increase in postal and telephone rates. In spite of this there would be a deficit of £549,500 in 1942-43 according to the Minister who said that it was negligible in relation to the proposed outlay of £100.2 millions. More important for the future is the reduction in the Union's external debt to £16.75 millions at the end of March. Total debt of £426.7 millions is largely internal, and small savers are becoming creditors of the State. The Union has reits work. Something like a school was kept up in the average evacuation camp and children's health responded to the attention given. Repatriates taken off to Italy indeed noted that the treatment on Italian ships was not better than that given by the British who claimed that the largest organised human evacuation of the war left little cause for complaint. Chapels in the intermediate camps were only a mark of the arrangements which gave the Italian Red Cross and Sisters of Charity a chance to help. The German radio charges against the British authorities are seen as groundless and Italians have been assured that women and children ranked first with the victors.

Larger Takings By Mills

What looks like a definite recovery in Indian textile production has much interest for those who noted the trend of raw cotton consumption. In February 1943 the total for British India was 282,499 bales as against 272,918 bales in February 1942. There is, however, the fact that mill working in February 1942 was affected by the exodus from the cities. Mill consumption of cotton in British India for the five months ending February 1943 is known to be 1,680,498 bales as against 1,717,330 bales in the same period of 1941-42. The fall in the case of the States is smaller but the consumption of raw cotton in February was not higher than in February 1942. Indore is still the largest consumer among the States as Bombay is among the Provinces. Mill consumption in Madras is on the upgrade while cotton production as shown in the ginning figures, is not rising, though unpressed cotton is used in larger quantity in the Madras mills. The mill consumption figures indicate again that the total consumption for a year may be above four million bales. The reduction in India's cotton production is expected to continue in view of the loss of export markets and the decline recorded since September may be cited in favour of the campaign to curtail cotton cultivation in favour of food crops. The high prices for cotton cannot be allowed to prejudice the restriction programme approved by the Indian Central Cotton Committee again this year. It is noteworthy that consumption in the States is roughly equal to 20 percent of British India's consumption, and the proportion is not likely to change even after the opening of new mills in Rajputana. Mill consumption for 5 months is over two million bales. This has encouraged the cotton market to support medium staples freely, and present cloth prices make a further increase in mill consumption more likely than not. Up to December the trend of mill consumption was adverse and the carry-over seemed large. Since African cotton is harder to get and imports were going down in 1942-43 there is more interest in Indian cotton. The market has been helped by such factors as the resumption of working in Ahmedabad, the short crop in Uganda and the rise in yarn and cloth prices as also the fall in the cotton crop of 1942-43 by about 1½ million bales. It is quite likely that the entire production of 4.42 million bales shown in the final forecast may be taken up by Indian mills and the import licensing procedure suggests that even short staple varieties will not be without a market this year though the U.K. may buy even less cotton than in the past.

Cost Of Living Changes

The working class cost of living index in 1942 moved upwards steadily. The upward movement continued into 1943 as the Bombay Labour Gazette records a rise of two points in February in the case of Bombay, where a rise of fifteen points was noted in January despite a fall in wholesale prices. Most noteworthy change in January 1943 appears to be the rise in the cost of fuel and lighting as well as clothing. The increase reported from Madras is smaller than that reported by Nagpur while Sholapur exceptionally reported no change in January. There was a decline in the index for Jubbulpore but over the year the trend is the same. Since comparison with power index is possible only in the case of Nagpur, it may be noted that the Nagpur index for January at 212 was 112 percent upon August 1939 but not so high as that for Jubbulpore. The rate of increase from January 1942 appears highest in the case of Ahmedabad. The difference as between Bombay and Sholapur is again small and that between Nagpur and

OBJECTS

The Company was registered in 1938 under the Indian Companies Act, 1913, as a Limited Liability Company with the object mainly of carrying on business in Fire and other classes of General Insurance. The Company commenced to issue policies of Fire and Motor Insurance in 1939 and the following table furnishes details of the progress of the Company's business :—

Year ended 31st Dec.	Gross Premium Income	Net Premium Income	Net claims paid	Total Reserves	Net Profit	Ratio of Expenses
	Rs.	Rs	Rs.	Rs.	Rs.	Rs.
1939 ..	36,517	17,119	771	6,850	7,208	...
1940 ..	1,36,863	61,988	7,921	24,795	1,662	66.39
1941 ..	2,17,404	1,20,506	9,415	52,290	16,944	57.06
1942 ...	4,57,925	2,97,946	29,368	1,66,502	34,344	49.09

The annual gross premium income has grown from Rs. 36,517 in 1939 to Rs. 4,57,925 in 1942. The annual net premium income has shown a steady increase from Rs. 17,119 to Rs. 2,97,946 during the said period.

The ratio of claims to premium income is below 10%.

Reserves for unexpired risks now amount to Rs. 1,41,502-0-9 and represent 48% in the case of Fire Insurance and 40% in regard to Motor Insurance of the net premiums for 1943.

From the profits for 1941, the Company wrote off all the preliminary expenses and all the amounts transferred to loss account in the initial stages of the Company's working and carried forward a sum of Rs. 3,000 and odd as profit. In the accounts for 1942, additional Reserves have been created and after setting apart Rs. 20,000/- as a reserve for taxes, the Directors have decided to recommend to the Shareholders payment for the year 1942 of a dividend of As. 6/- per share free of income-tax, which works out at 5% on the paid-up amount exclusive of the tax payable thereon.

PROSPECTS

The Company is now transacting business in Fire and Motor Insurance. The Company is working in close association with the United India Life Assurance Company, Limited, which has a widespread organisation throughout India for Life Assurance business. The United India Life Assurance Company Limited has also a substantial interest in this Company as it holds shares of the value of Rs. 1,01,000/- of the subscribed capital of this Company. There is a wide scope for Fire and other classes of General Insurance business. The coming years may be expected to witness industrial business expansion in the country on a large scale and along with such expansion there is bound to be a correspondingly growing need for insurance service. A larger paid-up capital will enable the Company to extend its organisation and to secure a greater volume of business and also retain a much larger share of the premium income. Besides, it will enable the Company to take up advantageously Marine and other classes of Accident Insurance as and when conditions are favourable for the purpose.

CAPITAL

The authorised Capital of the Company is Rs. 50,00,000/- divided into 500,000 shares of Rs. 10/- each. Out of 300,000 shares offered to the public, 51,978 shares have been subscribed and alloted. The balance of the Capital originally issued represents 2,48,022 shares of Rs. 10/- each. As the Company has already established its business on a satisfactory basis and as the entire amount of the issued Capital is not needed for expansion of the Company's activities the issue may be closed as soon as a paid-up capital of Rs. 10,00,000/- is reached.

The original subscription on which shares were first allotted was 40,020 shares amounting to Rs. 4,00,200/-. Applications for shares since received and allotted amount to Rs. 1,19,580/-. The number of shares applied for and allotted within the preceding two years up to 19-4-1943 is 10,820 shares and Rs. 69,062-8-0 have been received in respect of the same and brokerage of Rs. 1,872-8-0 has been or will be paid.

No fully or partly paid-up shares or debentures were issued or agreed to be issued for consideration other than cash. No amount has been paid to any promoters.

Jubbulpore is reasonably small. The influence of the rise in the cost of living on the fifty industrial disputes reported in January cannot be ignored to-day. In January trade disputes involving 60,625 workers and a loss of 244,452 working days were reported from Bombay alone. Requests for advance of pay, higher dearness allowance, and larger quantities of food grains figured among the major causes of strikes which were not confined to Bombay and Bengal or to the textile and engineering industries. Shop assistants in the Mangaldas Market in Bombay declined to work until they received an assurance as to grain supplies. The effect of higher prices on absenteeism appears to be favourable as improved attendance was noted in Bomcay and Ahmedabad mills as well as the engineering workshops in Bombay. The incentive to work regularly was provided by the need to earn more. Higher prices evidently provide a clear spur.

Bombay's Trade Unions

Trade unionism is not developing rapidly in spite of war prosperity in industry. This conclusion is justified by a reading of the Bombay report on trade unions in the second half of 1942. The half-yearly review records the fact that many unions accounting for 12.18 per cent of membership failed to provide the returns required. There were 181 unions at the end of June 1942 as against 189 at the end of 1942. Twenty more unions were added and twelve dropped out of the list. The Muslim Bidi Workers Association was one of them, being probably displaced by the Bombay Bidi Workers Union. New labour associations in the engineering industry can be described as a mark of progress. There were 90 unions in Bombay City and 21 in Ahmedabad. It is, however, noteworthy that total average membership of 183.364 is far short of the total number of factory workers in Bombay. But the rate of increase in union membership corresponds closely to the increase in factory empolyment since 1939. Total membership has risen from 151,648 to 155,782 in the six months after June 1942 owing to the addition of eight new unions registered under the Act of 1926. There were four federations including the Textile Labour Association of Ahmedabad which included five registered unions. The prolonged suspension of work affected the membership of the Ahmedabad Association. Union activity fell away to some extent. The Textile Labour Association (founded in 1920) conducted schools, reading rooms, and physical culture centres. It was interested in municipal affairs and published a newspaper with a circulation of 23,000. The number of company unions as distinct from craft unions is apparently increasing. An offshoot of the civil defence activity is the emergence of a Salvage Corps Union. Progress as between 1922 and 1942 appears to be considerable to judge by the average membership total but between the great strike of 1940 and the latter half of 1942, trade unions appear to have lost ground in spite of the recovery noticed in the last quarter of 1942. The explanation may not be provided by the reluctance of employers to recognise or deal with unions, but in worker' inability to pay union dues. If one compares the average membership in 1941 with that in 1942 progress is hardly discernible and the difficulties of union officials must have increased. It is somewhat surprising to find the Hon. Dr. Ambedkar as the President of the Bombay Municipal Kamgar Sangh with a membership of 4,545 and a monthly income of Rs. 551. The Labour Member's continuance as President of the Union on December 1, 1942 must be deemed unusual. The indication of sympathy for municipal workers on the part of one in the service of the Crown must seem disturbing to the Mayor and Corporation.

BIRD & CO.. CALCUTTA

I promised last week to examine the changes which the fundamental concepts of economic science undergo in the change from the old economics to the new. Since this examination is only preliminary to a consideration of the operative part of the new economics in post-war times, it is unnecessary to go into the whole basis of classical economics and examine every one of its basic concepts. It should suffice for our purpose to see how the concept of value, with which the whole of economic science is concerned, changes when it is not the mere resultant of the forces of the free market but is also shaped to some extent by the volition of the social will.

* * * * *

The first step in the understanding of "value" is to realise that not all useful things have value; that nothing, however useful, can be valuable if there should be enough of it to go round; that to have more of it, you have to be content with less of something else. Value, the economist says, and rightly, is scarce-utility. In fact, economic science has discarded the hazy outline of the old definitions; and it is now maintained that the science is concerned with the distribution of scarce means among competing ends. In other words, it impresses on us the age-old truth that you cannot have the best of both worlds; that if you eat the dough, as we say in the South, you cannot have the cake. It connotes a pessimistic view of life which Nature seems largely to approve of. It emphasises the fact that not only are the good things of life insufficient for man's purposes, but the resources with which they can be made are limited. This limitation of resources, material and other, necessitates careful consideration of the way in which these resources are to be distributed among the various ends that we can think of. For the individual man in the primeval stages, or his later equivalent, Robinson Crusoe, the waking hours constitute by far the larger part of the resources with which he has to meet his needs and wants. If Crusoe were unduly musical and were to set his heart on the construction of a rude harp, he would be a fool to start on it without being prepared to forego food for a day or two, or whatever the time he will have to take away from hunting and devote to the construction of a harp. Civilisation, science and technical inventions, it is urged, cannot alter the nature of the economic problem. They cannot rescue man from the necessity of choosing from among competing ends and of husbanding his limited resources. He has to adopt a yardstick with which to measure all values, the relative values of things, the value of things in different places and even the values of things as they are to-day and as they may be in the future. The distribution of these resources among the competing ends must be governed by the arbitrament of this yardstick; only then, it is said, is man safe against the danger of providing too liberally for a lower end and starving out a higher end either now or at some date in the future. All these problems spring from the fact that the resources with which Nature has endowed us are rigorously, if not narrowly, limited. That is why the notion of scarcity runs through the whole gamut of economics.

* * * *

According to the classical economist this distribution of scarce means among competing ends is best done with the guidance of prices in a free market. It is extremely difficult to give here an account, at once succinct and short, of what according to the laissez faire economist the price mechanism of a free economy can achieve, and how it ensures the best distribution of such scarce means.

* * * *

Since the idea of the free market and the mechanism of free prices is a familiar one, the following quotation from von Mises' essay on "Economic Calculation", should suffice to show the bearing which the free market has on our problem of distribution of scarce means :

"Every man who, in the course of economic life, makes a choice between the satisfaction of one need as against another, eo ipso makes a judgment of value . . .

"Under simple conditions it is also possible for him without much ado to form some judgment of the significance to him of goods of a higher order . . .

"It would not be difficult for a farmer in economic isolation to come by a distinction between the expansion of pasture-farming and the development of activity in the hunting field. In such a case the processes of production involved are relatively short and the expense and income entailed can be easily guaged. But it is quite a different matter when the choice lies between the utilisation of a water-course for the manufacture of electricity or the extention of a coal-mine or the drawing up of plans for the better employment of the energies latent in raw coal. Here the roundabout processes of production are many and each is very lengthy; here the conditions necessary for the success of the enterprises which are to be initiated are diverse, so that one cannot apply merely vague valuations, but requires rather more exact estimates and some judgment of the economic issues actually involved."

"In an exchange economy the objective exchange-value of commodities enters as

the unit of economic calculation. This entails a threefold advantage. In the first place, it renders it possible to base the calculation upon the valuations of all participants in trade. The subjective use-value of each is not immediately comparable as a purely individual phenomenon with the subjective use-value of other men. It only becomes so in exchange-value which arises out of the interplay of the subjective valuations of all who take part in exchange. But in that case calculation by exchange-value furnishes a control over the appropriate employment of goods. Anyone who wishes to make calculations in regard to a complicated process of production will immediately notice whether he has worked more economically than others or not; if he finds, from reference to the exchange-relations obtaining in the market, that he will not be able to produce profitably, this shows that others understand how to make a better use of the goods of a higher order in question. Lastly, calculation by exchange-value makes it possible to refer values back to a unit. For this purpose, since goods are mutually substitutable in accordance with the exchange-relations obtaining in the market, any possible good can be chosen. In a monetary economy it is money that is so chosen".

* * * *

"Monetary calculation only has meaning within the sphere of economic organisation. It is a system whereby the rules of economics may be applied in the disposition of economic goods. Economic goods only have part in this system in proportion to the extent to which they may be exchanged for money".

"Within these limits, which in economic life it never oversteps, monetary calculation fulfils all the requirements of economic calculation. It affords us a guide through the oppressive plenitude of economic potentialities. It enables us to extend to all goods of a higher order the judgment of value, which is bound up with and clearly evident in, the case of goods ready for consumption, or at best of production-goods of the lowest order. It renders their value capable of computation and thereby gives us the primary basis for all economic operations with goods of a higher order. Without it, all production involving processes stretching well back in time and all the longer roundabout processes of capitalistic production would be gropings in the dark".

"For each separate calculation of the particular branches of one and the same enterprise depends exclusively on the fact that it is precisely in market dealings that market prices to be taken as the bases of calculations are formed for all kinds of goods and labour employed. Where there is no free market, there is no pricing mechanism; without a pricing mechanism, there is no economic calculation".

* * * *

I must apologise for the forbidding length of the quotation and, even more, its abstruseness; and my only excuse for so taxing the reader is its importance to the question on hand. Von Mises' work in this sphere constitutes by far the ablest reply that I know to all criticisms of classical economics, which are based on the difference between commonsense valuations of the goods of life and the values of things as they are indicated by market prices. We all feel there is something unmistakably insulting to our intelligence when we are told, as the markets all over the world tell us, that a motor car costs thousands of times as much as a hearty meal, that an ugly lump of pigiron carries more value than a seat at the best musical concert, that a poet deserves less at the hands of society than a salesman, and that on the whole the market place with its motley crowd of Philistines knows more of the values of life than men of culture. The root of the difficulty lies in this lack of correspondence between our subjective valuations and objective values as they emerge out of a free economy. How is any correspondence to be brought about? The advocates of class war attribute the difference to the machinations of the propertied classes and urge that, if the basis of society is altered, productive effort would be directed according to our ideas of relative values. The order of priorities in which goods will be produced in sufficient quantities will be reviewed. And it is in answer to this view that von Mises' examination of the problem is of the utmost interest.

* * * *

It is idle to cavil at this, as some socialist economists sometimes do. The importance of the pricing process and of the guidance it gives in the utilisation of scarce resources cannot be denied. Even the demonstrable fact that a competitive individualist economy often entails grievous waste of scarce resources, as, for instance, of coking coal in India, cannot invalidate the main trend of von Mises' argument. But the implications of the reasoning for practical economic policy, it will be seen, are not the same in all the stages of human history. The basic assumptions of this argument are firstly, the rigorous limitation of resources and secondly, the limitlessness of human wants which compete for satisfaction through the utilisation of these limited resources. To the extent that resources are expanded and wants are narrowed in range, the importance of the guidance of free prices is narrowed. The plenitude of economic potentialities will no longer be found to be oppressive.

Now, what is the extent to which resources can be expanded and wants narrowed? The latter is a somewhat ticklish question as it is suggestive of regress. We shall confine our attention to the first. Expansion of resources comes about through firstly, the advance of science and secondly, the progress of organisation. When we talk of limitation of resources, we think primarily of mines which are wasting assets, of agricultural land which is subject to the law of diminishing returns, and, generally, of materials which are used up in the process of human consumption. But if, as Dr. Stine has pointed out, the sea is an even bigger store of all minerals than the bowels of the earth, if the sun's rays can be made to yield more energy than all the boilers and hydro-electric installations in the world, if the fertility of the soil can be renewed by nitrogen from the atmosphere, then, surely, science has done something to release Man from the grip which Nature has had over him through limitation of resources. We have reached the point when our idea of the scarcity of means may be seriously exaggerated.

* * * *

But all the benefits of science may be thrown to the winds if man should insist on looking on life as a scramble. The expansion of resources, which science renders possible, will then be only a mere potentiality if Man were incapable of the organisation required for wresting from Nature the fruits of scientific advance. And that is how organisation is important. Organisation converts the discoveries of science into the inventions of industry, secures the innumerable improvements which together make up the progress of productive technique and confronts Man with visions of plenty when he is still steeped in the mental habits of a wellnigh indigent past. Organisation has also its contribution to make to the expansion of basic resources as when through propaganda or through pecuniary incentives, the return of scrap to the melting pot is secured in a time of war. Human societies may well reach a stage when waste is more or less completely eliminated and all things go through the process of production and consumption only to return in due course for being sent again in the same circuit. Nature herself does the same, being the only instance of perpetual motion, giving more energy than Man can ever create in his power houses and living in no fear that her sources of energy might one day dry up altogether, though the Sun, it is said, might become extinct after some millions of years. Man's economic life might well be a near approach to the workings of Nature. The day may come when the average indidivual will think it a sin or a crime to throw away a pin, when so-called waste and refuse will return to enrich the soil, when every industry will work with material reclaimed from the consumer after use, instead of hastening the depletion of the natural sources of the raw material. All that may be a little too imaginative. But no one can deny that the two principal features of war economy, the discovery of new sources of raw material and the organisation of the return of scrap in a wide sense have a significance for this question of limitation of resources.

As for the question of the range of wants, I have said already it is a ticklish question. It is related to that bogey of tyranny over the consumer which the opponents of socialism in all its forms have raised. The illimitability of human wants is an axiom for the tautological propositions of equilibrium economics. As a statement of fact, it is certainly questionable. It may be granted that it is true to a very great extent. But one must distinguish the scope for new satisfactions from the contingency of new and pressing needs taking us by surprise and making all our economic programmes of the past a series of vast, incalculable blunders. It is this danger that von Mises visualises when he impresses on us the importance of economic calculation and the value of the guidance of the price mechanism. When we think of it, this war has occasioned more of such nasty surprises than any ill-thought socialist programme can possibly cause. And yet these surprises have been got over by both sides with surprising promptitude and minimum of dislocation. There is no reason, therefore, to think that the ordering of economic life according to subjective valuations is fraught with unforseeable dangers. The illimitability of human wants, is to some extent, the creation of a flagrantly unequal society and a defiantly chaotic economic system.

* * * * *

We thus see that the natural conditions of life which have so long made economic value the result of the forces of a free economy, will no longer obtain to the same extent and that the natural resources which are relevant to the economic problems of man in society, will permit a degree of subjectivity unknown and even undreamt of in the past. But this subjectivity naturally depends on the nature of the subject. From what I have said so far in this series of articles, it will be evident that the subject in this context is not the human individual but human society. Human society may, however, refer to a small and homogeneous, but generally regressive, little community or to a big progressive nation, or to the human race as a whole. Every community which is socially conscious has a social will of its own and exerts it so far as economic problems are concerned. The conflict of such social wills is today an even more arresting feature of world economy than the conflict of individual wills within the sphere of a smaller group economy. As the unit of human society expands, this element of subjectivity in economic value is bound to increase, for the power of the social will increases with every reduction in the conflict. What is more to our purpose, however, is to note that the first step towards the subjectivity of value was taken not indeed in the economic sphere, but in the political, when democracy taught on the one hand the ruling classes to provide against social discontent by anticipating the more glaring social problems and, on the other, the masses to insist on social needs being met, with or without deference to the suggestions of individualist economics. This access of subjectivity in economic value was to a great extent ahead of the advance in scientific discovery and productive technique which, as I showed earlier, breaks down the limitations of resources and enables values to become comparatively subjective. The difference in time bet-

(From Our Correspondent)

New Delhi, May 3.

At long last the Viceregal announcement has been made public. Three new appointments have been made to the Viceroy's Council—as already forecast in these columns Sir Ashoke Roy, the eminent Calcutta lawyer becomes Law Member, Sir Azizul Haque who has just returned after a eleven-month stay in England as High Commissioner takes the Commerce portfolio, and Dr. N. B. Khare has been given the overseas portfolio. All these three appointments had been evidently settled days ago, but delay appears to have become inevitable owing to the difficulty in getting a suitable Supply Member. Evidently a search was made for an industrialist or businessman—someone who not only had influence with the business and industrial community but was also politically amenable from the Government's point of view. No such man could be found. And as Sir Ramaswami Mudaliar has, as is well-known, been anxious to return to this country for personal reasons, the choice has, as expected, fallen ultimately upon him for the Supply Membership. With his experience as Commerce Member in the first three years of war—he has also had to administer both the Labour and Industries portfolios—Sir Ramaswami Mudaliar is bound to do well as Supply Member. It is probably at the request of Sir Sultan Ahmed himself that he finds himself translated to the Information portfolio—a rapidly growing portfolio held previously by men of such eminence as Sir Akbar Hydari and Sir C. P. Ramaswami Iyer.

* * * *

Is the Council stronger and more representative as a result of these changes and additions? Only time can answer this question, but one can see from the very composition of this new Council of 15 members that it can hardly lay claim to homogeneity. It is a disjointed combination which has no common political or other affiliations to bind them together. When the first expansion took place, the Indian Members were generally able to work and move together. This is no longer the case owing to the way in which some of the subsequent vacancies have been filled up. It must be said, however, that the latest additions have been carefully made with a view to bringing in men of the first rank. To the commercial community it must be a matter of regret that no businessman has been chosen either as Commerce Member or as Supply Member, but apart from this consideration no exception can be taken to the choice of Sir Azizul Haque and Sir Ramaswami Mudaliar—both public men of considerable standing who have given ample proof of their earnestness and zeal in office. It is expected that Sir Ramaswami Mudaliar will be back in India some time in July to take charge of his new office.

* * * * *

It is clear from the communique itself that the Government's difficulties are by no means at an end. There is the question of filling up the two vacancies in the War Cabinet. It is some months since the Jam Sahib returned to this country. Though efforts have been made to find another Prince for, or persuade the Jam Sahib himself to go back to, the War Cabinet, nothing has yet been done. Apparently one or two Members of the Viceroy's Council were requested by the Viceroy to go to London, but for one reason or other no one has yet come forward. According to New Delhi reports the most likely choice is Sir Firoze Khan Noon, but no early announcement is expected as Sir Ramaswami Mudaliar will be reaching this country only just before the July session of the Central Legislature. For filling the High Commissionership in London the easy course has been taken of nominating Sir S. E. Ranganathan who is already there. At one time his name was being prominently mentioned for one of the seats in the Viceroy's Council itself, ut as that would mean a reduction in the number of Hindu Members though the number of their Muslim colleagues was being increased from three to four, this was not possible. I understand that Rao Bahadur N. Sivaraj may be invited to go to London as one of the Secretary of State's advisers. When Sir Firoze goes to London, his place as Defence Member may be offered to Sir R. P. Masani or some other person prominently connected with the National War Front.

* * * *

Experience has doubtless shown that a Council of 15 members is far too unwieldy a body for that close day-to-day watch over the Government of India's administration and for that collective consultation necessary in wartime. There is a small sub-committee of the Viceroy's Council for post-war reconstruction and for the development of war resources work, but it also meets only at distant intervals. The present arrangement by which the Viceroy's Council meets only once a week for a few minutes and generally discusses only a small prepared agenda, can hardly be described as Cabinet Government in the real sense. In most cases the Members are left free to decide policies and carry on the administration of their respective Departments as they think best in consultation with the Viceroy. The question of forming an Inner War Cabinet is therefore both urgent and necessary. Another question which is bound soon to create practical difficulties is the present arrangement of portfolios. While those like the Overseas Member or the Law Member have practically no work, there are portfolios overburdened with responsibilities. The new Commerce Member has singly to administer three important Departments—Commerce, Food and Industries and Civil Supplies. During the next session of the Central Legislature the question is bound to be raised whether this is conducive to administrative efficiency.

* * * *

A new difficulty has arisen in connection with the Law Membership. A number of Select Committee meetings are to be held this month and early in June over which only the present Law Member, Sir Sultan Ahmed, can preside. There are only two courses open to the Government—either the new Law Member, Sir A. K. Roy will have to wait until these Select committee meetings are over, and then take up the Law Membership or the Select Committee meetings will have to be postponed to August to enable the new Law Member to be sworn in as member of the Assembly and get elected as the Chairman of these Select Committees. As these new Bills under consideration are important, it is not likely that the latter course will commend itself to the Government. In any case it is open to Sir Sultan Ahmed to take up the Information portfolio immediately in addition to the Law Department. As a matter of fact Sir Sultan has already taken up the question of reorganising the Information and Broadcasting Departments in order to secure greater public co-operation.

* * * *

So far as tax returns are concerned the new financial year may be said to have opened satisfactorily. Both in the case of Customs and Excise receipts the actuals for the previous year have proved to be better than the revised estimates. There is also reason to think that income-tax and excess profits tax collections have not disappointed expectations. The Railway Board's statement shows that the approximate gross earnings in 1942-43 of State Railways are nearly Rs. 150 crores—Rs. 20 crores more than the actuals for the previous year. The first ten days of April show an increase in earnings of as much as Rs. 70 lakhs as compared with the corresponding period last year. Though Defence expenditure is mounting up, the revenue position is showing steady improvement. Owing to the increasing complexity and urgency of war finance problems, the suggestion has once again come up that it would be better to divide the present Finance portfolio into two separate portfolios—Finance and Revenue—as is now the case in the Provinces.

* * * *

The new Commerce Member, Sir Azizul Haque, has already taken charge and started work in right earnest. The first question which he has taken up is the satisfactory distribution of standard cloth. In addition to the meeting of the Standard Cloth Panel in Bombay there is to be a conference of Provincial and State representatives to frame schemes for a satisfactory distribution of standard cloth and also to achieve the maximum possible increase in the production of cloth and yarn.

(From Our Correspondent)

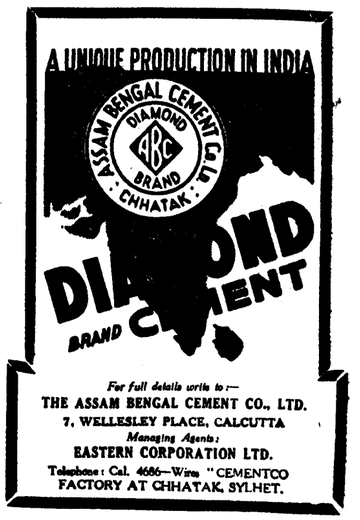
Bombay, May 4.

Full light has been thrown on the extent and magnitude of the Bombay Government's negligence in tackling famine in Bijapur, by an article contributed to the local press by Mr. Dinkar Desai, Scretary, Bijapur Famine Relief Committee, Bombay. A fortnight ago, Mr. P. J. Gandhi, a member of the same Relief Committee pointed the finger of accusation at the Bombay Government. Mr. Desai has enlarged on the same theme with greater force. He toured the districts of Bellary and Bijapur and had opportunities of observing relief measures in operation by both the Madras and Bombay governments. The contrast that he has drawn between relief measures in these districts reveals that the relief in Bijapur is inadequate, or to put it more expressively, inefficient.

In Bellary, the Madras Government has opened large relief works on an adequate scale. As many as 170,000 workers are employed on twenty large relief works. Ten of these were opened as early as December last. Wages are paid every day, part of the wages being paid in grain to ensure supply of foodstuffs to labourers. Adequate supply of tools has been procured for all the 170,000 workers. There is usually a free kitchen and a hospital is attached to each relief work. All liquorshops within a radius of ten miles from each relief work are closed.

In the district of Bijapur, relief administration is carried on on quite different lines. The number of labourers employed is 17,000 though the area affected by drought is larger than in Bellary. There is not a single large relief work here, even four months after famine was notified. The relief works, such as they are, are not properly distributed. Workmen bring their own tools and many people are denied work for lack of tools. Wages are paid weekly and without regularity. There are no free kitchens provided by the government. No hospitals, no kitchens, no regular pay, a limited number of grainshops, no large relief works, no closure of liquorshops and work for only 17,000 compare oddly with Bellary's nothing on the negative side and work for 1,70,000. The Bombay Government's specious plea that it is doing everything in its power and that there are practical difficulties in its way in these hard days compels one to remind the government that suffering witnessed in Bijapur is no subject for trite explanation.

To dispel the gloom some reference must be made to the efforts of a private organisation, the Bijapur Famine Relief Committee, Bombay. The Committee has, up to April 17, collected Rs. 1,92,505 exclusive of the sum of Rs. 50,000 given direct to the District Famine Relief Committee, Bijapur by the Sheriff of Bombay out of the Central Famine Relief Fund at his disposal. The Committee has received 48 bales of cloth and 48 bales of yarn from various mills in Bombay, Ahmedabad, Sholapur and Gokak. Gifts of 350 bags of grain have also been received. The first departure of the Committee in giving relief was the opening of nine free kitchens. Eight cattle feeding centres and five cattle camps have been opened while 3,000 saris have been distributed. The sum of Rs. 48,000 has been sanctioned for clothing the indigent. The Committee has decided to provide relief work for the distressed population by an offer of 800 spinning wheels. Cheap grainshops have also been opened. One can only hope that the Committee will be able to carry on its good work and avoid the contagion of governmental complacency.



The Central Government's sporting offer to undertake the task of eliminating the speculative element in the raw cotton market if the speculators themselves felt unequal to the job, has taken form and substance in the Cotton (Forward Contracts and Options Prohibition) Order of April 30. The cotton market here is not surprised in the least and a certain section welcomes the ban as it makes raw cotton a reasonably safe investment. But over and above is the feeling that the Order as at present worded is imperfect and requires modification. For instance, the Order places a ban on all forward transactions, embracing actual delivery contracts, namely, sales of actual cotton to consumers for forward delivery. That could hardly have been the intention of the Government as mills would be unable to buy in advance cotton to cover their sales of cloth, till crop movement commences which cannot be before November at the earliest. A correction to this extent is vital.

A prominent cotton dealer who took the view that the Order would adversely affect the cotton grower said that the present ban was against the spirit of the Government statement on April 1, namely, that the measures contemplated were a preliminary to a comprehensive scheme of cloth and yarn control meant to give consumers piecegoods at reasonable prices. Cotton circles discounted on Saturday the idea that the Order would constiute a fresh bearish factor in view of the exceptionally strong position held by bullion. The Board of the East India Cotton Association has advised its members not to trade in September contracts. The Board is expected to meet again on Monday.

The Committee of the Bombay Shareholders' Association has recently addressed a representation to the Finance Member on the subject of the limitation of dividends. The Committee argues that such an attempt is economically unsound and impracticable and that the Government's set object of checking inflation would be defeated. The argument advanced by the Committee that the middle and lower classes depend primarily on the income from investment is open to question. One knows that the proportion among the middle and lower middle classes dependent to any degree is too small to justify such an argument. But other points made by the Committee in support of their contention deserve careful study. Limitation or restriction of dividends, it is pointed out, will tend to scare away capital from British Indian enterprises to those on Indian States. It is unfair that shareholders of jointstock companies alone should wait for payment after the war, whereas others connected with business such as managing agents, merchants and contractors would continue to derive incomes unaffected by limitation. Besides, if the limitation proposal were to exclude the return on giltedged stocks, it would confer an adventitious advantage on the investor in Government securities. The fact that the major industries in India have but recently recovered from the depression should clinch the argument. When one considers the slow growth of Indian industry it is patent that action on the lines suggested by the Finance Member is bound to affect development. There is, at the same time, everything to be said for control or regulation of dividends for the duration, taking care however that such control does not amount to the appropriation of surplus industrial profits by taxation. Regulation of dividends, accompanied by a provision for compulsory savings is sound in principle, though it has the drawback that it can fight inflation only within limits.

After an unprecedented rise in prices the bullion market receded on Thursday April 28 and the atmosphere in the bullion market became healthy. Prices of gold and silver which had risen by as much as Rs. 25 and Rs. 22 per tola respectively in the course of three weeks were unheard of in the history of the bullion market and the Board of the Bullion Exchange was obliged to pass a resolution prohibiting members of the Exchange from transacting any business for the July or subsequent settlements until further notice. The Board's decision appears to have had the desired effect and the bullion market has assumed a normal appearance. The rise has been variously interpreted. The rise is related to genuine investment demand from the agriculturists by some and by others to inflationary conditions prevailing in the country. Others hold that the post-war currency schemes of Britain and America that appeared in the Press are responsible as they provided for the retention of gold as currency in some form. The City Editor of the 'Times' pointed out recently that the British Government's request from Washington for Lend-Lease silver had led to a revision of Indian estimates of Britain's silver holdings and that it was one of the factors responsible for the high price of silver. Though the City Editor's explanation with reference to Lend-Lease silver has now been wholly discounted, there is no denying that the rise is the cumulative effect of speculation, genuine investment demand from agriculturists who are flush of cash, and the inflationary tendency in the country has helped on the rise. Silver for the June settlement which touched its peak on Monday at Rs. 133 came down to Rs. 123-4 on Thursday, and gold quoted for the June settlement found its level at Rs. 87-4.

Presiding on Tuesday over the Silver Jubilee celebrations of the Sanatana Dharma College, Lahore, Seth Ramakrishna Dalmia announced that a scheme involving an outlay of about two crores of rupees to start a daily paper appearing simultaneously from Bombay, Calcutta, Madras, Lahore and other big cities of the country in different languages is ready.

Resume of Commodity Markets

There are no important features in the commodity markets during the past week. The jute and jute manufactures markets have been rather quiet while the bullion markets have been irregularly upward. The Bombay cotton market has not been much affected by the decision of the Government of India to prohibit trading in options as from the end of April 30, 1943. The piecegoods market has been steady.

The easier tone of the jute market has been due to the decision of the Indian Jute Mills Association to reduce the number of working hours to 54 per week with 10 percent of the looms sealed as from May 17, 1943, by which date it is expected that the American order will be completed. It was generally felt that, with the difficulties experienced by some mills regarding the completion of the American order, it would be found necessary to extend the 60-hour week beyond May 15, 1943. We, however, pointed out in these columns last week that the difficulties in regard to the supply of raw materials might prevent the working of mills for hours longer than it was absolutely necessary. Even on the basis of a 54-hour a week, mills do not find it possible to sell freely for forward position without covering their sales with purchases of the raw material. After a substantial rise in prices for over three weeks, there was naturally some reaction but with the prospect of a large demand for the raw material and the continued difficulties in regard to transport, it cannot be expected that there will be any appreciable decline in prices. It may very well be that prices get stabilised around these levels until the new crop arrives.

The absence of speculative activity has been responsible for the decline in prices in the jute manufactures market during the latter part of the week under review. The recent bout of buying, following the placing of an order for 16 crores yards of hession cloth with the Indian Jute Mills Association, was mainly on speculative account and as overseas buyers refused to pay the advance in prices asked for, there was a hurry to liquidate holdings. That is the reason why values have been fluctuating recently in very wide limits and demand has been rather spasmodic. As in the jute market, it may very well be that prices are stabilised around the present levels for some time.

The feature of the week is the promulgation of an order by the Government of India designed to eliminate speculative activity in the raw cotton market in Bombay. As a first step towards supplementing the elimination of speculative elements in trading in the raw cotton market, the Forward Contract Options Order 1943 has been passed. The Order comes into force at once and prohibits all persons from entering into any forward contract for the sale or purchase of cotton in respect of the new crop and any option in cotton and declare any such contract entered into after the commencement of the order, that is after April 30, 1943, shall be void. Though forward contracts in respect of the current crop is not affected by this order, the Government of India wish it to be known that they have examined how best all such contracts can be liquidated at an early date and that an announcement on the subject may be expected shortly.

It will be remembered in this connection that the East India Cotton Association addressed a letter to the Government of India suggesting the prohibition of trading in options to eliminate speculative activity and emphasising the need for the continuance of forward trading so as to ensure fair prices for the producer. The Government of India have agreed to the suggestions made by the East India Cotton Association, though in part, by prohibiting trading in options as from April 30, 1943. Forward trading in the new crop has been completely prohibited.

It is pointed out that the elimination of forward contracts might operate against the needs of the producer and result in a cornering of the cotton crop in the hands of a few individuals as it proved to be the case with some other commodities: The benefit of a marked rise in prices was derived by the middlemen and speculator. Thus the lack of measures which aimed at preventing an undue rise in prices after a particular commodity had left the hands of the producer operates against the interests of the grower. It appears that this aspect of the question has not been overlooked by the Government of India and that the expected announcement might contain something in this direction.

The bullion market has not been very much affected by the reports regarding the possibility of Government taking measures to check a speculative rise in prices of both gold and silver. There was some selling earlier in the period under review but it was mainly due to profit-taking and selling. Owing to the satisfactory technical position of the market and the acute shortage of supplies, bulls have again had the upper hand.

It is reported that negotiations are at present going on to import silver on lease-lend basis from the United States. As has been pointed out on earlier occasions, import of the precious metals from countries abroad, involves various difficulties. It would perhaps not be wrong to ask the British Government for the silver that the Government of India have given them and leave the United Kingdom to arrange for their own supplies from the U. S. on lease-lend basis. The whole question is discussed at length editorially. Suffice it here to say that earlier mistakes should be avoided and that every precaution should be taken to prevent this country being saddled again with high-priced silver. The export of capital from this country in this form should be avoided. So far as gold is concerned, there is no ready solution and it remains to be seen as to how the authorities propose to tackle the questien.

Standard cloth is again in the forefront. The new Industries Department is to make fresh efforts for the manufacture of standard cloth on a large scale. It is reported that a conference of representatives of the industry and provincial governments will be convened sometime this month to consider the problems regarding the increase in the production

Jute and Jute Manufactures

(By Our Jute Correspondent)

Calcutta, May 6.

THE Indian Central Jute Committee Bulletin for April contains its usual crop of warnings with regard to the substitution of alternatives for Jute in various branches of industry. Linoleum packing has for long been an important outlet for wide jute cloth, but owing to its present scarcity in the U.S.A. manufacturers there are using cotton fabric for the purpose, and samples of twisted Kraft paper are also being experimented with. The danger of course is that, once these substitues get a footing, they may be exceedingly difficult to oust, as the cotton interests in the States are very strong and will do their utmost to hold on to every possible outlet for their crop, even after normal jute supplies are again available. Germany is reported to be producing yarns from waste paper with which satisfactory sacks can be manufactured, while the yarns can also be applied to use in the linoleum and carpet industries. They have discovered another source of fibre for textile purposes in the Hop Vine. Paper yarns are being rapidly developed in the U.S.A. for use in the carpet industry and it is believed that these developments will be in a position to hold their own after the war. On the other side of the picture there is the Argentine, with larger seed crops to handle than last year and fewer bags wherewith to do so. It is reported that harvesting operations are being handicapped owing to the shortage of bags for transporting the grain from the threshing machines to the place of storage, practically all storage being in bulk for lack of bags. The attempt to grow jute in one district of the Argentine has not been a success on account of unfavourable weather. Nor would it seem that India has anything to fear from an experiment in jute growing in the Tajikstan Republic of the U.S.S.R. The location alone somewhere north of Afghanistan, would render the production there of merely local utility.

While therefore there are sufficient indications that the jute industry will have plenty of competition to face when conditions return to normal, it is of interest to read that, despite the shortage of burlap in the U.S.A. the demand for cotton substitute bags has not come up to expectations, though cotton circles are in hopes of better results in future. Maximum prices for second-hand jute and cotton bags have been fixed by the Office of Price Administration and it is somewhat surprising to notice how little difference there is between cotton and jute bags of similar size and construction.

Just before the late Government of Bengal resigned, the then Minister for Agriculture called a conference to consider the question of securing to the cultivator a better price for his jute crop. At the present ruling price levels of jute, this might look like a work of supererogation and it will be interesting to see whether the new Ministry will follow up the matter. If the question to be studied were, how to secure to the cultivator a larger proportion of the price which the crop ultimately realises, the effort might arouse more sympathy. Co-operative marketing in some shape or form is undoubtedly the solution, but it is notorious that previous efforts in this direction have met with little or no success, the greatest handicap to be overcome being the cultivator's apparent ingrained suspicion of his neighbour. Until he can be educated into a wider and more tolerant outlok in this respect, there can be little hope of progress towadrs the elimination of the middle-men who undoubtedly, in existing conditions, manage to annex an unduly large proportion of the proceeds of marketing.

In a recent issue, we noted a suggestion for the introduction of an additional grade in the Loose Jute series, to cover straight-morahed jute which did not measure up to the specification laid down for the Bottom grade, and which was, in practice, being discarded into the Cross mark. Rather than introduce a new grade, a more generally acceptable idea is to recognise the existing practice, and to describe the Cross mark to include either straight-morahed or tangled or habi-jabi jute unsuitable for inclusion in the Bottom grade and with no guarantee as to the proportion of habi-jabi. Concurrent with this proposal is the suggestion that this grade should not be saleable till the competent authority declares the market open for dealings therein. This would avoid the stultifying effect on the maintenance of standards which a demand for a disproportionate assortment of low grade jute in the early months of the season, frequently causes.

The question of the Registration of Loose Jute marks is again on the anvil with a view to removing some of the more glaring discrepancies from the Register as it stands. While the aim of "One Baler, One Mark" is an admirable one, the task of removing from the Book the accumulation of subsidiary or purely "benami" firms will not be an easy one. A step in the right direction is the decision to describe as "Owners" only those firms who work under the same name both in Calcutta and in the Mofussil. There are of course reasons, apart from Income Tax evasion, for these variations in name. Frequently the local manager at an agency is a partner in that particular agency, but not in the Calcutta firm or in other agencies run by that firm. But where a variation in name occurs, the Calcutta firm will in future come under the designation of a Commission Agent only. What would cut out a vast quantity of "dead wood" from the Book would be if some of the registered "Owners" could be called upon to prove that they actually possessed premises at all the stations where they purport to work. There are not a few notorious instances which would produce many more blanks than prizes if this test were applied. And it is to the more glaring faults such as these that the authorities should apply their energies before interfering with matters like established Proprietary marks registered by Brokers, though these might come in for scrutiny at a later stage. In the meantime, where Proprietary marks claim to be supervised, there could be no objection to the name of the supervisor at each station being declared.

Estimated arrivals of jute into Calcutta during April amounted to 5,81,000 bales as compared with 4,28,000 bales in March and 1,72,000 bales in April 1942. This brings the total received since the beginning of the season to 55,73,000 bales against 54,41,000 bales in the same period last year. The increased arrivals will be noted with relief and satisfaction.

The I.J.M.A. at their meeting on the 5th instant decided to return to the basis of 54 hours' working as from the 17th May, the day on which the American order which caused them to increase to 60 hours is due to terminate and also to seal 10 per cent of their looms. This decision was generally anticipated by the trade so that it had little or no influence on the market except that speculators attempted to firm up rates when it originally became known but a small initial nominal rise of 2 annas on hessians soon faded away. The stale bull speculator position in both hessians and B. twills cannot be concealed nor are the usual crop of rumours which are invariably made to circulate freely during these periods likely to give them an easy take-out from their high-priced commitments. Rates have been forced up unnaturally by Indian speculators who cannot resist a gamble without any consideration of controlled rates for raw materials in other countries and until the gap can be bridged and a reasonable link-up be effected, the demand from overseas is not likely to reveal itself except in the form of a trickle through Government controlled channels.

The jute market has been quiet with mills generally pausing after the hectic buying reported in our previous issue. Rates have eased from top quotations but as up-country markets are still very tight and imports scarce, only those balers who have actual stocks are prepared to consider fresh business at anything in the nature of a discount. A few mills have had to show some interest to level up their present stock position; others to cover up shortages on deliveries under existing contracts which have failed to arrive at the mill and such business has naturally been at irregular rates. In loose jute for high assortment, middles and bottoms, full prices have had to be paid whereas similar marks and districts on low assortment have been transacted at lower margins.

Ready jute in the bazaar has continued to attract mills but owing to the attentions of pucca baler buyers who are anxious to cover their recent large sales to mills, the prices for bottoms and good cross to which they have mainly confined their purchases, have firmed up whereas middles have been somewhat neglected. The result is that the margin between middles and bottoms in this market has narrowed from Rs. 3 down to Rs. 2-8 or even Rs. 2-4 but this does not apply in the mofussil areas.

A very limited business has been done in European packing on the basis of Rs. 19, Rs. 17 and Rs. 15-8 for mids., bots. and cross respectively and the same rates were also paid early on for a supervised jat mark on high assortment. Subsequently these rates eased and small business has been done in supervised jat marks at 19-4, 16-4 basis, mids. and bots. with district at 4 annas less. Indian jat has been dealt in at Rs. 19 and Rs. 16 to 8 annas less for mids. and bots.

The Pucca bale market has likewise been very quiet with prices showing a downward tendency throughout the week.

ween these developments and the slowness with which social units gain in size and scope—a slowness which accentuates inter-social rivalries and causes wars—are together responsible for that crisis in democracy which has paralysed the thoughts of even some of the best thinkers of our time. The key to the success of democrocy lies in the correspondence between the subjective economic valuations of a democratic society and the objective conditions of its econmic resources and organisation. Viewing it in that light, one might say with the utmost confidence that the last days of democracy have not been left behind but are looming brightly ahead. The increase in the social subjectivity of value, which is the essence of the difficulties between the old economics and the new, will reach its maximum when society is most democratic and science has completed its work of demolishing the limitations of natural resources, so far as the necessaries of individual and social life are concerned.

* * * *

The progress which the Comilla Union Bank, whose jubilee was celebrated this week has made especially in the last two years is truly remarkable. Under the guidance of Dr. S. B. Dutt, it has been able to strengthen its capital structure without recourse to invitation of shares by publication of prospectus. The bank has strengthened its inner reserves considerably and employed its funds among well chosen and well spread investments. The rates offered for deposits have been reduced; but this has had the surprising effect of stimulating the flow of deposits. The bank is now in a position to claim that its working funds have topped the four crore mark. In this respect, the Comilla Union Bank occupies a prominent position among banks owned and managed by Bengalees.

* * * *

This achievement must be considered particularly impressive as banks under Bengal auspices and management have had to contend against various handicaps. Till the middle of the 'twenties, Bengal's pride in banking was symbolised by the Bengal National Bank. The disaster which overtook that bank in the middle of the 'twenties was responsible for a considerable disruption of the confidence of Bengalee depositors in Bengalee banks. For over a decade, the debacle of the Bengal National Bank cast a menacing shadow over indigenous banking enterprise. It is no small tribute to the executives of the successful Bengalee banking ventures that, striving under this shadow, they have been able to lead their concerns to light and safety.

* * * *

Another handicap has been that almost every Bengalee banking institution has had to carry on business with but small capital and even less reserves. Alongside the big giants in the banking world, both in the form of foreign institutions and institutions from other provinces of India, Bengalee banks could not help feeling all the self-diffidence of pigmies. In this unequal competition, through sheer grit and by better understanding of banking requirements peculiar to this province, Bengalee banks have, by the grace of God, made great headway.

The third handicap which I would like to refer to is that many of monied Bengalees have shown a marked partiality for foreign institutions and institutions from other provinces rather than for Bengalee banks. If Bengalee banks have achieved some measure of success, the credit is entirely due to the general population who have displayed more patriotism than the richer classes. From this point of view, the successful Bengalee banks owe much to the people of the province and have, therefore, the greater obligation to study and serve the true interests of the masses.

* * * *

Transport difficulties have not stood in the way of Calcutta enjoying the Art in Industry Exhibition this year. The most meritorious exhibits have been brought from Bombay; and the sponsors are entitled to more than ordinary thanks for the customary preview and the keeping up of the usual show for the young artists who might care to know what is being done by others. The 1943 record is on the walls of a large, well-lit room in the Calcutta School of Art. The newest supporter has been found in the National War Front though its posters don't stand out like those produced for the Grow More Food drive. A particularly happy application of the hammer and sickle idea in red on a light blue ground showed Russophile influence more than anything else. Visitors can, of course, derive encouragement from the way the judges have worked out their choice.

Prizes have been awarded on a generous scale, and I fancy the total should run into thousands which necessarily means that Burmah-Shell and the other sponsors have bestowed even more money and care, spent additional time and perfected the organisation. The poster display is, in the opinion of most visitors, getting better (if the designs for hoardings are regrettably commonplace) and a signal idea worked out for the Railways' Travel Less campaign is a signal success. The attachment to tradition is not pronounced except perhaps in the case of the exhibit which won the biggest prize on offer, but it is well that many young artists are clearly looking beyond regular instruction for inspiration. That is, I should say, proof of what has been accomplished already and the sponsors of the Exhibition have provided also scholarships for four exhibitors who may find that success in the annual competition leads really to a career in commercial art. Of winning exhibits some have been sold out but many grace the walls, and the critical judgment of the Hanging Committee is less open to question than may be imagined, which again means that the Exhibition in three years has unquestionably attained a position denied to casual or capricious patronage.

The increase in capial demanded by the progressive expansion of business in the case of the United India Fire and General Insurance Company is not without interest to investors. An offer of shares in the company indeed follows the declaration of a maiden dividend of 6 annas per share free of tax. Since the Company is five years old, and available figures point to the growth of revenue and funds, there is every reason to expect that adequate support will be forthcoming. It is not necessary to dwell on the many outstanding merits of insurance shares. The high premium at which New India and Concord of India shares stand at present indeed suggests that the market is fully appreciative.

The present issue is meant to raise the paid-up capital of the Company to Rs. 10 lakhs. As the prospectus published to-day shows, the Company obtained a fair proportion of the necessary capital when it started its career and the second prospectus does not arise (as it often does) from the failure of the first. The Rs. 10 shares are to be fully paid up. They will differ from many insurance shares in that respect, while intending shareholders will certainly note that the shares issued previously have received a dividend of 6 annas per share for the year 1942. They will perhaps take it as a guarantee of earnings on the additional capital from the start. The loss ratio for four years as shown in the revenue accounts indeed suggests that and more. Reference may also be made to the steady fall in the expense ratio of the Company. Since the yield on the Funds must provide the return to the Company's shareholedrs, one must point to the satisfactory growth of the Fire and other Reserves. The net underwriting profit showed a substantial increase in 1942, and the proposal to extend operations by an increase of capital is justified also by the consideration that foreign competition in the field of general insurance must be reduced.

Being connected from the outset with the well-known and long-established United India Life Insurance Company, it has definite advantages and subsequent departure in the marine and accident field will be duly justified. The Company has no organisation or preliminary expenses to write off. It has added to its reserves and further increase is foreshadowed by the 10 per cent ratio of claims to premiums. It is hardly necessary to add that the progress statement is the best recommendation for the prospectus published to-day.

(*Continued from page* 806)

of standard cloth and its effective distribution. As a result of these deliberations it is hoped that a new scheme will be evolved and that there will be no further complaint regarding the production and marketing of standard cloth.

It has been announced that the Madras Government is also participating in the Central Government's scheme for the production and distribution of standard cloth. It will be remembered that the Madras Government at first decided to keep out of the scheme and wanted to produce its own standard cloth by supplying yarn to handloom weavers and distributing the product to the consumers within the Province at a price slightly higher than the mill-made standard cloth. We then pointed out that the refusal of the Madras Government to participate in the All-India scheme for the distribution and production of standard cloth might deny cheap cloth to the poor people of that province. It has beeen decided that there should be no control of yarn and cloth prices and that efforts will be made only to increase production and effectively check distribution. The objection made by mills in Southern India was therefore justified to a certain extent. It has been pointed out, however, that the dropping of the idea of the Madras Government to manufacture its own standard cloth does not mean that the interest of the handloom weavers has been neglected. As far as possible adequate supplies of yarn will be made to them and facilities afforded for marketing all their production.

JUTE

Calcutta, May 6, 1943.

The jute market has been rather quiet during the past few days and the buoyant tone noticeable at the time of last writing, with the announcement of a fresh order for hessian cloth, is not noticeable at the present moment. This is, perhaps, due to the decision of the Indian Jute Mills Association to revert to 54 hours per week with 10 per cent of the looms sealed as from May 17, 1943 and the satisfactory reports regarding progress of sowings in the mofussil districts. Sellers have been more eager to do business and are offering a slight discount in rates while mills have not shown any great anxiety to buy up all quantities of jute offering and are inclined to await further developments. It is generally expected that favourable weather conditions in the jute districts will result in a bigger yield and that the total area under the crop might not, after all, prove to be very much lower than the licensed area. Efforts to bring in larger quantities of jute are also expected to bear fruit. The easier feeling in the Calcutta market, however, is not reflected in the mofussil areas where holders are very firm in their ideas and are not prepared to part with their supplies of jute at low prices. It is felt, that the policy adopted by the Indian Jute Mills Association to keep down production as far as possible is only designed to postpone purchases of jute and that, with the possibility of a further improvement in the shipping position and the scarcity of supplies, prices for jute should ultimately move upward.

In the loose jute section business passing has not been on a large scale and the tone is rather quiet. Supervised Jat Middles and Bottoms were done at Rs. 19 and Rs. 16 per maund while European Packings were 8 annas higher. Indian District Tossa Middles and bottoms were done at Rs. 18-12 and Rs. 15-12 per maund and Northern District Middles and Bottoms at Rs. 18-8 and Rs. 15-8 per maund. While sellers are eager to do business the quantity offered is not very large.

In the pucca bales section not much of business has been done for export, Dundee Daisee 2/3 and Tossa 4's being done at Rs. 94 and Rs. 98 per bale respectively. Mills are reported to have bought Firsts 2/3 and Lightnings at Rs. 98 and Rs. 92 per bale respectively.

JUTE MANUFACTURES

Calcutta, May 6, 1943.

The jute manufactures market has been rather quiet for the most part of the week and quotations have been fluctuating within narrow limits during the past three days. Speculative demand seems to have been satisfied for the time being. It is reported that the U. S. Government is not prepared to buy above the 'pegged' levels and that future orders might be regulated at these rates. As most of the business done early in the week was on account of interbazar operators, there was some stale bull liquidation, and quotations were marked lower. Shipment enquiry has not been on a large scale during the week. 9 porters ready are quoting Rs. 21 for all positions. 11 porters ready are Rs. 26-11, May Rs. 26-12, June Rs. 26-14 and July/September Rs. 27.

In the Heavy Goods section, easier conditions have been noticeable though the decline in prices is not so pronounced as in the hessian market. Demand was mostly from Delhi and Punjab on speculative account. Stocks in the two centres are reported to be enough for some months. Mills are not free sellers for forward positions as they are anxious to get their requirements of jute against forward sales before commiting themselves.

HESSIANS (9 Porters):

GOLD

Calcutta, May 6, 1943.

Irregular conditions have been noticeable in the bullion market in Bombay and a considerably smaller amount of business has been passing. Owing to the acute shortage of supplies, quotations however are not lower on balance. There is a tendency to await further developments and there are even reports that the Government of India are negotiating with the Government of U.S.A. for bringing in supplies of silver on Lease-Lend basis. How far these negotiations succeed remains to be seen. It is also not known whether it is contemplated to import gold into this country to check a further rise in prices. Market operators do not seem to regard these developments with any great anxiety. If prices have been moving irregularly, it is only due to the recent speculative activity, and the tendency to take profits as far as possible. Gold ready are quoting higher on balance at Rs. 92 and First Settlement Rs. 91-8. Sovereigns are Rs. 65.

In the Calcutta market similar conditions have been noticeable and not much business has been done. Quotations have been well maintained. Gold ready closed at Rs. 92-1 and Sovereigns Rs. 66.

SILVER

Calcutta, May 6, 1943.

Early in the week, the silver market was vulnerable to reports regarding the possibility of lease-lend supplies of silver being brought into this country. There was a reaction in the quotation to Rs. 128 from Rs. 137. At the lower levels, however, there has been renewed buying and quotations are higher on balance. The Government of India are not very much worried about the present high level of prices for silver as it is felt that the withdrawal of old rupees will not meet with any great obstacle and that, so far as new coins are concerned, there is a good margin of safety. Silver ready are quoting Rs. 135-12 against Rs. 128-12 and First Settlement Rs. 133-4 against Rs. 126-4. It is interesting to note that there is a narrowing in the premium for ready over first settlement and that the undertone of the market is quite steady.

COTTON

Calcutta, May 6, 1943.

The decision of the Government to prohibit trading in options in the Bombay cotton market has not had any great effect on prices in the Bombay raw cotton market. There was some selling as soon as the order was promulgated but it was soon pointed out that, with the continuance of forward trading in the current crop, and with the great demand for cotton, it will not be possible to prevent a further rise in prices. In their communique, the Government have pointed out that efforts are being made to liquidate as far as possible contracts in the current crop and that trading in options is entirely prohibited. No forward business is allowed in the new crop. It is pointed out at the same time, that efforts are being made to prevent a rise in prices by other means, as in their opinion, prohibition of speculative activity in the market by itself would not prove to be an effective check. Those engaged in the trade have been warned that future transactions should be concluded after taking into consideration all factors. Jharilla May came down to Rs. 574 and July to Rs. 590. There has been a recovery towards the close to Rs. 580 and Rs. 596 respectively. The quotations at the end of last week were Rs. 576 and Rs. 592-8.

JHARILLA COTTON (May):

(29th) 591-8; (30th) 596-8; (1st) 580-12; (3rd) 585; (4th) 577-8; (5th) 580.

JHARILLA COTTON (July):

(29th) 607; (30th) 612-8; (1st) 596-8; (3rd) 602-8; (4th) 594; (5th) 596.

PIECEGOODS

Calcutta, May 6, 1943.

Firm conditions have continued to prevail in the piecegoods market but business has been restricted on account of the recent sharp increase in prices. With the reports regarding the possibility of a substantial increase in standard cloth production, there is a tendency on the part of buyers to postpone buying. Dealers, however, are not prepared to offer any concession in rates as existing stocks are very low. Some business in forward contracts has been concluded by bazar operators with Bombay mills for early deliveries. Unless the supply position gets easier, it will not be possible to expect an appreciable decline in values though it is generally felt that the peak levels have been seen at least for some time to come.

N. W. R. SUBORDINATE SERVICE COMMISSION, LAHORE

Applications are invited from candidates for appointment as Journeymen (Electrical) on N.-W. Railway. There is 1 temporary vacancy reserved for a Muslim and in addition 10 suitable candidates (5 Muslims, 1 Anglo-Indian or Domiciled European, 2 Sikhs, Indian Christians and Parsees and 2 unreserved) will be borne on waiting list for a period of one year.

Applications must be made on the prescribed form. Last date for receipt of applications together with attested copies of testimonials 4th June, 1943.

Qualifications.—Candidates must have qualified from a recognized Technical Institute and in addition should have at least 2 years practical training in a recognised Workshop.

Pay.—Rs. 65-5/2-85 plus allowances admissible under the rules.

Age.—Between 21 and 28 years. Government and Railway servants eligible provided they satisfy the prescribed conditions and apply through the department concerned. Full details should be obtained on sending a stamped and addressed envelope to the Chairman.

Stock Markets to-day and to-morrow

EXCELLENT TEA COMPANY RESULTS

Till Wednesday this week quite steady conditions were noticeable in the stock markets in both Bombay and Calcutta and business passing was rather brisk. There was no suggestion at any time that the upward movement would be reversed and that prices would be marked down. The easier tone noticeable in the latter half of the week has been mainly due to the revival of the reports regarding limitation or freezing of dividends. It is said an early announcement would be made by the Government of India on the subject and that the Finance Member has already a scheme under consideration. It will be remembered that, a few weeks back, the suggestion regarding the limitation or freezing of dividends got current and did not a little harm to the stock markets. The bogey, however, was soon over and operators forgot the whole incident. The revival of the rumours has, therefore, had a restraining effect.

Though it is generally felt that it would be difficult to evolve an equitable formula, there is a tendency to await further developments. What exactly is meant by limitation or freezing of dividends is not known. Whether it is the intention of the authorities to restrict payment of dividends to the former levels, or evolve a general basis by the fixation of a statutory percentage on the basis of the capital employed or otherwise, cannot be anticipated. It is justifiable to think, however, that there will be no ban on the payment of slightly higher dividends, that companies would be free to distribute on the previous scale and the restrictions, if any, imposed would only relate to the distribution of the increased portion of the earnings. There may be a general ban on the distribution of capital bonuses. Having regard to the opposition from vested interests and having also regard to the fact that several companies have passed through very lean years, and shareholders in many cases, have had to go without dividends for a long period, the proposal to limit or freeze dividends may operate harshly, in the case of some. It remains to be seen, therefore, how the Government propose to move in the matter.

The accounts of the Bally Jute Company, Limited, for the half-year ended March, 1943 make very satisfactory showing. Reference was made in these columns last week to the increase in the ordinary distribution from Rs. 10 per share to Rs. 12 per share. The enthusiasm over the substantial increase in the profits of Bally however is damped by the decrease in the distribution for the same half-year of the Reliance Jute Mills Company Limited from Rs. 1-12 to Rs. 1-8 per share.

* * * *

The net profit before providing for taxation and depreciation of the "Bally Jute Company, Limited" for the six months ended March, 1943 is substantially higher at Rs. 13,33,040 against Rs. 8,87,879 for the previous six months. The bulk of the increase in earnings has naturally been taken up by the provision for taxation and special reserve which is, on the present occasion, Rs. 9 lakhs against Rs. 5.3 lakhs. There is a transfer of Rs. 25,000 to Improvement and, replacement reserve in addition. After the payment of the higher dividend of 12 per cent (10 per cent) the amount carried forward is not very much changed at Rs. 80,337 against Rs. 82,297 brought in.

* * * *

"Hastings Mill Limited" is to pay arrears of preference dividends for 3 half-years out of the earnings for the half-year ended February, 1943. The net profit, before providing for taxation and depreciation, is quite satisfactory at Rs. 436,043. After providing for taxation Rs. 175,188 and depreciation Rs. 97,336, the arrears of dividend on the preference shares for three half-years ended February, 1941 are to be paid. Arrears of dividends for two half-years were paid in the previous half-year.

Recently, there has been an improvement in the quotation for the shares from Rs. 135 to over Rs. 150. As at the present levels the shares carry the right to the payment of dividends amounting to Rs. 18 per share the ex-dividend quotation is around Rs. 134. The arrears of dividend still to be paid are Rs. 24 per share. With the present level of earnings, it can be reasonably expected that it would be possible to pay all arrears in full in the next two half-years. A 6 per cent preference share of a first-class jute company is now quoting around Rs. 140. It, therefore, stands to reason that the shares have scope for further appreciation.

* * * *

Tea companies have been able to report very satisfactory earnings for the year 1942. Important among the balance-sheets published during the week are those of the "Sapoi" and the "New Chumta Tea Companies." Both these companies have been able to increase the dividends substantially.

* * * *

The net profit of the "New Chumta Tea Company, Limited," for 1942 is Rs. 1,83,377 against Rs. 94,331 for 1941. A high degree of the quota releases for the year was made to avoid any restriction on total production and it was decided to allow the voluntary internal regulation scheme to lapse on March 31, 1943. These factors coupled with the very favourable weather conditions led to a record crop of 430,297 lbs. of black tea to be made. The Government of the U. K. took over the purchase of all export teas from September 15, 1942 and the estate contracted with the Tea Controller for India for the supply of tea up to 219,625 lbs. The average price realised for internal sales was considerably higher at 16.3 annas against 7.2 annas for 1941. The total net average sale price, including the proceeds of export rights sold, was 13.26 annas against 13.1 annas for 1941. The production cost per lb. of tea produced was lower at 6.24 annas against 6.84 annas, on account of the very large crop made.

The allocation to Reserve for staff expenses is 60,000 (38,600) while that to the reserve for taxation is Rs. 44,857 (Rs. 17,776). The transfer to Reserve for Renewals and Additions is Rs. 30,000 (Rs. 20,000) while the allocation to General Reserve is Rs. 20,000 (Rs. 10,000). The final dividend of 60 per cent., makes with the interim dividend already paid, 70 per cent for the whole year against the total distribution of 40 per cent for 1941. Even after all these substantial allocations

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, May 3.

RATHER steady conditions were noticeable on the Calcutta Stock Exchange till Wednesday this week and business passing was on a fairly large scale. The undertone in the several sections was quite steady and both operators and investors were expecting that prices would be marked higher if there were any favourable developments in the war situation. Cotton and sugar shares were in good enquiry, some of the popular speculative counters touching new high levels. In the Engineering section there was a sudden rise in Steel Corporations to Rs. 28-6.

During the last two days, however, the market has suddenly turned quiet on the revival of the rumours regarding the possibility of limitation of dividends. The news from the Arakan Front, too, has not been encouraging. The decline in prices is again mainly confined to the popular speculative counters. Pending a definite statement regarding Government's intention about limitation of dividends there may not be any further aggressive rise in prices.

The giltedged securities section has been absolutely uninteresting and business passing is on a very restricted scale. Quotations for most loans are around the previous levels. The report that the Government of India are re-issuing the 3 per cent Defence Bonds 1946 at Rs. 102-15 for Rs. 20 crores should have an encouraging effect on the market. 3½ per cent paper is unchanged at Rs. 94. Among terminable loans, 3 per cent Second Defence Loan 1949-52 were Rs. 108 and 3 per cent 1951-54 Rs. 99-13-6. 5 per cent 1945-55 were Rs. 107-14 and 4 per cent 1960-70 Rs. 110-11. No transactions have been recorded in Provincial loans.

Business in Public Bodies' debentures has again been restricted. The only two transactions recorded being in 5 per cent *Calcutta Port Trust* 1956-86 and 5 per cent 1957-87 at the same level. Among Industrial Debentures, 5½ per cent *Carew & Co.*, First Mortgage were Rs. 106 and 6 per cent *Calcutta Jute* Rs. 111-4.

Bank shares remained steady with *Imperial Bank* fully paids at Rs. 1,730 and contributories at Rs. 431; *Calcutta National Bank* were around Rs. 12-8 and *Reserve Bank* Rs. 108-8.

Cotton shares continued active with *Benares Cotton* being done up to Rs. 17-4 and *Bengal-Nagpur* Rs. 37-6. *Cawnpore Textiles* improved by more than two points to Rs. 31-8 and *Elgin Mills* by six points to Rs. 90. *Kesoram Cotton* also were one and a half points higher at Rs. 19, while *Mahalaxmi Cotton* were Rs. 49. There was some selling at the higher levels in sympathy with Indian Irons but the close was firm though rates were a bit lower than the highest levels for the week. *Muir Mills* were Rs. 478. *Dhakeswari* Rs. 24-12, *Dunbar* Rs. 330 and *Elgin* Rs. 86. *New Victoria* came down to Rs. 11-10 but are again higher at the time of writing at Rs. 12.

Coal section has been rather uninteresting with the exception of *New Beerbhoom* which were marked higher at Rs. 21-8. *Bengal* were Rs. 468, *Bokaro and Ramgur* Rs. 20, *Burra Dhemo* Rs. 7-10, and *Burrakur* Rs. 15. *North Damuda* were Rs. 7-10 while *Equitables* were steady at Rs. 36-9. *Hurriladih* were Rs. 17-4 and *Mundulpoor* Rs. 11-8. *Rewa* were 35-10. *Satpukuria and Asansol* came in for and *Mundulpoor* Rs. 11-8. *Rewa* were Rs. good attention and were marked higher bu fully a point at Rs. 2-14. *New Bansdeopur* showed a rise of two points to Rs. 32. There was good enquiry also for *South Karanpura* and the quotation towards the close was Rs. 6-4 against Rs. 5-8 earlier in the week. *West Jamuria* were unchanged at Rs. 33-8.

In the Jute section not much interest has been taken and quotations have been fluctuating in narrow limits. It was generally expected that the Indian Jute Mills Association might decide on the continuance 60-hours per week for some time more. But with the difficulties in regard to the supplies of jute, it has been decided to work mills only 54 hours per week with 10 per cent of the looms sealed as from the 17th inst. *Adamjee* were Rs. 33-4, *Agarpara* Rs. 24, *Anglo-India* Rs. 397, *Bally* Rs. 348, *Gourepore* Rs. 785, *Howrah* Rs. 62-8 and *Hukumchand* Rs. 23-12. *Kamarhatty* were Rs. 558, *National* Rs. 27-2, *Nellimara* Rs. 23-10 and *Nuddea* Rs. 95.

In the Engineering section, *Indian Iron* and *Steel Corporation* were fluctuating around Rs. 36 and Rs. 27 respectively for a long time. There was a sharp rise in *Steel Corporation* on Tuesday to Rs. 28-6, Towards the close on Wednesday there was some selling on the revival of the rumours regarding limitation of dividends and the quotation for both Indian Irons and Steel Corporations came down to Rs. 35 and Rs. 26-12 respectively. There has been a slight recovery to Rs. 35-4 and Rs. 27-2 at the time of writing but the undertone is rather hesitant. *Bhartia Electric Steel* have remained steady at Rs. 16-7 on the declaration of a dividend of Re. 1 per share for the year ended December 1942. *Britannia Building* were quite steady at Rs. 14-3 and are being talked of being further higher. *Britannia Engineering* were Rs. 14-4 and *B. I. Electric Construction* Rs. 16-1. *Burn & Company* were Rs. 388. There was a smart rise in *Indian Malleable* to Rs. 10-8 on reports of the possibility of a higher dividend for the year ended March 1943. *Kumardhubi Engineering*. were Rs. 8-7, though towards the close there has been some selling and the quotation was lower at Rs. 8-2. *Marshalls* were Rs. 3-12 ex-dividend and *National Iron* Rs. 12-10.

In the Sugar section, *Belsund* provided the feature with a rise from Rs. 10-4 to Rs. 14. The quotation at the time of writing is around Rs. 13-12. *Balrampur* were Rs. 15-4 while *Carew & Co.*, were sticky around Rs. 19-12. *Cawnpore* were Rs. 38-8, *Champarun* were in good request and showed a rise of two points to Rs. 38-8, *Darbhanga* were quoted Rs. 24-3. *U. P. Sugar* have turned easier towards the close after being marked up to Rs. 24. *Buland* and *Raza* were Rs. 43-8 and *Ryam* Rs. 34-10.

In the Tea section there has been a resumption of buying and quotations are higher on the publication of satisfactory earnings reports. *Bishnauth* were Rs. 34-12, *Dimakusi* Rs. 42, *Hattikhira* Rs. 30, *Huldibari* Rs. 35-12, *Lakhatoorah* Rs. 26-8, *Raneecherra* Rs. 23-12 and *Tezpore* Rs. 14-4.

In the Miscellaneous section, *Burma Corporation* and *Indian Copper Corporation* were done at Rs. 2-12 and Rs. 2-8 respectively while *Karanpura Development* were better at Rs. 13 on the favourable decision of the Court in the case against the lessor. *B. I. Corporation* were steady at Rs. 7, while *Britannia Biscuits* were Rs. 14-4 and *Calcutta Trams* Rs. 20-12. *Calcutta Ice* were Rs. 13-12 and

Presidency:—(29th) 6-8, 6-10; (3rd) 6-6 s.l., 6-8; (4th) 6-7, 6-8; (5th) 6-8, 6-10.
Rameshwara:—(29th) 13-8, 13-9, 13-11; (1st) 13-5, 13-6; (3rd) 13-7; (4th) 13-4, 13-6, 13-12.
Ssee Luchminarain:—(29th) 19-10; (30th) 19-12; (4th) 19-8; (5th) 19-6.
Soorah:—(29th) 16-5, 16-6, 16-7; (1st) 16-10; (3rd) 16-10 c.t., 16-10; (4th) 16-4, 16-6, 16-8; (5th) 16-6.
Standard:—(30th) 233 s.l., 232, 233.
Union:—(29th) 357; (3rd) 362, 367.
Waverley:—(29th) 4-9; (30th) 4-12; (1st) 4-11.
Waverley (Pref.):—(5th) 76.

ENGINEERINGS:

Arthur Butler:—(1st) 15-5.
Bhartia Electric Steel:—(30th) 16-4, 16-6; (1st) 16-1; (3rd) 16-6; (4th) 16-8, 16-10; (5th) 16-13, 16-14, 16-8, 16-9.
Braithwaite & Co.:—(29th) 9; (30th) 9.
Britannia Building & Iron:—(29th) 14; (30th) 14-12; 14-14.
B. I. E. Construction:—(1st) 16-1.
Burn & Co.:—(29th) 388 s.l., 388.

Burn & Co. (7 per cent pref.):—(3rd) 174; (4th) 173.
Indian Galvanizing:—(1st) 37-4.
Indian Iron & Steel:—(29th) 35-3, 35-6, 35-5, 35, 35-1, 35-4; (30th) 36, 36 s.l., 35-15, 35-14, 35-12, 35-11, 35-10; (1st) 35-8, 35-9, 35-5, 35-10, 35-11, 35-12; (3rd) 35-13, 36-1, 36-3 (36-6 s.l.), 36; (4th) 36, 36-2 (36-14 s.l.), 35-10, 35-12, 35-13, 35-14; (5th) 36, 35-14, 35-13, 35-12.
India Machinery:—(5th) 10-14.
Indian Malleable Casting:—(1st) 9-2, 9-3, 9-4, 9-6, 9-9, 9-8; (3rd) 9-2 odd lot, 9-6 s.l., 9-9, 9-11, 9-12, 9-13, 9-14; (4th) 9-13, 9-14, 9-15, 10, 10-2, 10-4, 10-5; (5th) 10-2, 10-4.
Indian Malleable Casting (Defd.):—(30th) 3-1, 3-2; (3rd) 3-2, 3-3; (4th) 3-2, 3-4, 3-5; (5th) 3-3 s.o.l., 3-4, 3-6, 3-8.
Indian Standard Wagon:—(1st) 69-8 s.o.l., 68-8, 69-4.
Indian Steel & Wire Products:—(5th) 55.
Indian Steel & Wire Products (Defd.):—(4th) 33-12 s.l.
Jessop & Co.:—(29th) 22 s.l.; (30th) 21-15, 22, 22-4 c.t.; (1st) 21-15, 22 c.div., 21 ex-div.; (5th) 21-4 ex-div.
Kumardhubi:—(1st) 7-8, 7-9; (3rd) 7-9, 7-10, 7-11, 7-12; (4th) 7-12, 8, 8-1, 8-2; (5th) 8-8, 8-9, 8-10, 8-11.
Marshall & Co.:—(29th) 3-11, 3-12; (30th) 3-10, 3-11, 3-12, 3-13, 3-14; (1st) 3-12, 3-13, 3-14, 3-15, 4-1 c.div., 3-12 ex-div.; (3rd) 3-13, 3-14, 3-15 ex-div.; (4th) 3-12 ex-div.; (5th) 3-11, 3-12 ex-div.
National Iron & Steel:—(29th) 12-8, 12-10; (30th) 12-10; (1st) 12-10; (4th) 12-9, 12-10, 12-11; (5th) 13 s.l., 12-11, 12-12.
Saran Engineering:—(30th) 7-13, 7-14, 8; (3rd) 8-1, 8-2; (4th) 7-13 s.l., 7-15, 8, 8-1, 8-2.
Steel Corporation:—(29th) 25-9, 25-12, 25-13 (25-14 s.l.), 25-11; (30th) 27-6, 27-2, 27-1, 27, 26-14, 26-15, 26-12; (1st) 26-12, 26-13, 26-11, 26-12; (3rd) 27-13, 27-11 (27-15 s.l.), 28-1, 28-3, 28-4, 28-7, 28-6 (28-4 s.l.), 27-14, 27-15, 28-5, 28-2; (4th) 27-14, 27-13, 27-11, 27-15, 28, 27-12; (5th) 27-11, 27-12, 27-13, 27-7, 27-6 (27-5 s.l.), 27-10.
Steel Products:—(30th) 7-15, 8; (3rd) 7-15, 8, 8-1.

ELECTRIC:

Aligarh:—(1st) 10-8.
Shahjahanpore:—(29th) 7-12.

RAILWAYS:

Baraset-Basirhat:—(4th) 65.
Darjeeling-Himalayan:—(4th) 91, 92; (5th) 92, 93.
Darjeeling-Himalayan (Pref.):—(5th) 102 s.l.
Dehri Rohtas:—(30th) 12-4.
Hoshiarpur Doab:—(30th) 106 s.l., 106.
Katakhal Lalabazar:—(5th) 92 s.o.l.

MININGS:

Bisra Stone Lime:—(4th) 100-8, 101.
Burma Corpn.:—(30th) 2-14; (3rd) 2-11; (5th) 2-14, 2-12.
Consolidated Tin:—(29th) 1-6; (5th) 1-6.
Indian Copper:—(29th) 2-8, 2-9; (30th) 2-8; (1st) 2-9, 2-8; (3rd) 2-8, 2-9; (4th) 2-10, 2-8, 2-9; (5th) 2-10, 2-9, 2-10 c.t.
Karanpura Development:—(4th) 10-2; (5th) 10-8, 12-15, 13.
Rhodesia Copper:—(29th) 1-7, 1-5, 1-6; (30th) 1-6; (4th) 1-7.

PAPER MILLS:

India Paper Pulp:—(29th) 198 c.t., 193, 195; (30th) 194 s.l., 194, 195, 196; (1st) 193, 194 s.ls.; (3rd) 194-8, 195-8, 196-8, 197-8, 199-8, 198, 200, 202; (4th) 200, 201, 205 (201, 201-8 s.ls.), 202, 203; (5th) 204, 205, 203-8.
Mysore:—(3rd) 26-5 (26-9 s.l.); (4th) 26, 26-2, 26-4; (5th) 26-4, 26-6.
Orient:—(29th) 29-10; (30th) 29-12; (1st) 29-2.
Orient (Pref.):—(3rd) 113; (4th) 113.
Sree Gopal:—(29th) 23-14; (5th) 22-14, 22-12, 23-8, 23-10, 23-12, 23-14.
Star:—(29th) 23-10 c.t.; (30th) 23-10, 23-14; (4th) 24.
Titaghur:—(29th) 26, 26-2, 26-3, 26-4, 26-5; (30th) 26-4, 26-3; (1st) 26 o.l., 26-4, 26-8, 26-10, 26-5; (3rd) 26-8 s.l., 27-3.
Titaghur (Pref. Ord.):—(29th) 5-8; (5th) 5-2 s.lot, 5-2.

CHEMICALS:

Alkali & Chemical:—(30th) 36-10, 36-12; (1st) 36-14.
Alkali & Chemical (Pref.):—(29th) 126, 126-4; (4th) 126 s.l.

Bengal Aerating Gas:—(4th) 87-8, 89 c.div.
Frank Ross:—(29th) 7-8, 7-9; (1st) 7-8, 7-9, 7-11; (4th) 7-11, 7-12.
Lister Antiseptic (Pref.):—(3rd) 100.

SUGARS:

Balrampore:—(29th) 14-2; (30th) 14-1 o.l., 14-8, 14-5, 14-6; (3rd) 14-10, 14-11, 14-12; (5th) 15 c.t., 15-3, 15-2.
Belsund:—(29th) 10-8, 10-9, 10-10, 10-12 c.t., 10-14 c.t., 10-11; (30th) 10-10, 10-15, 10-14 c.t., 10-12; (1st) 11, 11-2, 11-4, 11-7, 11-8, 11-11, 11-12, 11-13, 11-14, 11-15, 12, 12-2; (3rd) 12-4, 12-7, 12-9, 12-10, 12-11, 12-12, 12-13; (4th) 12-10, 12-11, 12-13, 12-14, 13, 13-2, 13-3, 13-4, 13-5; (5th) 13-12, 13-14, 13-15, 14-4.

(Half-yearly General Meeting on 17th May, 1943 at 3 p.m.)

Audited accounts for the half-year ended 31st March, 1943:—

	Rs.	A.	P.
The Accounts, after writing off for Depreciation Rs. 2,50,000, show a net profit of	15,68,045	5	4
To which has to be added the balance brought forward from the last account, namely ..	69,814	2	6
Giving a total of	16,37,859	7	10
From this is deducted the amount set aside as a Reserve for Taxation and as provision in respect of Deposits under Section 10(1) of the Finance Act, 1942	13,25,000	0	0
Leaving a balance for disposal of	3,12,859	7	10
It is recommended that this should be dealt with as follows:—			
To paying the dividend on the Preference Shares for the half-year ended 31st March, 1943 at the rate of 7 per cent per annum (*i.e.*, Rs. 3-8 per shure), without any deduction for Income-tax payable by the Company	49,000	0	0
To paying a dividend on the Ordinary Shares at the rate of 30 per cent per annum (*i.e.*, Rs. 15 per share), without any deduction for Income-tax payable by the Company	2,10,000	0	0
To carry forward	53,859	7	10
Total ..	3,12,859	7	10

The Company's mills continued to work 54 hours weekly with 10% of the complement of looms sealed until the middle of March when a large order of hessian cloth on account of the U. S. A. Government was received by the Indian Jute Mills Association for delivery within 2 months; it was therefore decided to increase the working hours to 60 per week and to open up the sealed looms.

The labour position has at times been rather unsettled and a scarcity of skilled workers has affected production to some extent. The Company is providing mill employees as far as possible with foodstuffs at reasonable prices.

The demand for saking goods became more restrained during the period under review, whilst the marketing of hessians, apart from Indian requirements, continues to be governed by the shipping situation.

The acute shortage of transport has created difficulties regarding the supply of jute and coal and it is to be hoped that more adequate facilities can be made available.

Managing Agents.—Messrs. Kettlewell Bullen & Co., Ltd.

Authorised, Issued and Subscribed Capital—Rs. 28,00,000 in 14,000 Ord. and 14,000, 7 per cent. Cum. Pref. shares both of Rs. 100, fully paid up.

(Annual General Meeting on 19th May, 1943 at 3 p.m.)

Audited accounts for the year ended 31st December, 1942:—

The Accounts disclose a profit of Rs. 99,242-14-5.

On transfer of this sum to Profit and Loss Account, and after sundry adjustments, there is a balance at credit of that account amounting to Rs. 1,09,753-6-5, of which the directors have transferred Rs. 10,000 to Contingencies Reserve, to meet expenditure on renewals and replacements of Buildings, Machinery, etc., that will be necessary after the conclusion of hostilities.

Dividend.—An interim dividend of 5 per cent. was paid on 12th November last leaving Rs. 92,753-6-5 still available. It is proposed to pay a final dividend of 50 per cent., making 55 per cent. for the year, and to carry forward Rs. 22,753-6-5.

Agents.—Messrs. Duncan Brothers & Co., Ltd.

Authorised, Issued and Subscribed Capital—Rs. 1,40,000 in 1,400 shares of Rs. 100 each fully paid up.

INVESTMENT & FINANCE COMPANY, LIMITED.

Audited accounts of the Company for the half-year ended 28th February, 1943:—

Including the sum of Rs. 5,584-0-2 brought forward from the previous half-year and after transferring Rs. 5,000 to Reserve Fund, the balance at the credit of Profit and Loss Account is Rs. 23,689-1-10, which it is proposed to dispose of as follows:—

	Rs.	A.	P.
In paying a Dividend on the Preference Shares at the rate of 5 per cent. per annum, without any deduction for Income-Tax paid by the Company	5,000	0	0
In paying a Dividend on the Ordinary Shares at the rate of 10 per cent. per annum, without any deduction for Income-tax paid by the Company	12,500	0	0
In carry forward	6,189	1	10
TOTAL ..	23,689	1	10

Secretaries.—Messrs. Bird & Co.

Authorised Capital—Rs. 5,00,000. Issued and Subscribed—Rs. 4,50,000 in 2,500 Ordinary and 2,000, 5 per cent cum. Preference, both of Rs. 100 each fully paid up.

Synopsis of the Balance Sheet as at 28th February, 1943.

Liabilities.	Rs.	*Assets.*	Rs.
Capital paid up ..	4,50,000	Investments ..	7,44,392
Reserves and other funds	2,84,500	Outstandings ..	3,397
Current debts including taxation ..	74,210	Cash Balances ..	67,110
Carry forward ..	6,189		
Total ..	8,14,899	Total ..	8,14,899

NEW INDIA INVESTMENT CORPORATION LIMITED.

Audited accounts for the year ended 31st December, 1942:—

The Profit and Loss Account, after adding Rs. 4,496-6-7, brought forward from last year, shows a credit balance of Rs. 94,764-13-1, which your Directors propose to deal with as follows:—

	Rs.	A.	P.
To pay a dividend on the Ordinary Shares at Rs. 2 per share	62,176	0	0
To transfer to General Reserve	25,000	0	0
To carry forward	7,588	13	1
TOTAL ..	94,764	13	1

The profit figure shows an appreciable decline, but this is mainly due to the change of system in accountancy. If the outstanding dividends had been included as in previous years the profit would have been higher by Rs. 19,000. The new method of calculating has been adopted as being more conservative and correct and the Profit for the next year will not of course be adversely affected in this way.

Since the closing of the accounts the holdings of the Company have appreciated considerably and the future prospects for the Company appear to be favourable.

Secretaries.—Messrs. Ramdutt Ramkissendass.

Authorised Capital—Rs. 75,00,000. Issued—Rs. 37,50,000. Subscribed—Rs. 23,31,600 in 31,088 shares of Rs. 75 each fully paid up.

Synopsis of the Balance Sheet as at 31st December, 1942.

Liabilities.		*Assets.*	
Capital paid up ..	23,31,600	Fixed Assets ..	2,028
Reserves and other funds	2,67,891	Investments ..	31,66,959
Current debts including taxation ..	9,32,141	Outstandings ..	2,12,281

(Continued from page 812)

Great Eastern Hotel Rs. 277. *Rohtas Industries* were Rs. 31-4 and *Aluminium Corporation* Rs. 19-5.

Paper shares were unchanged with *India Paper Pulp* quoting Rs. 200, *Orient* Rs. 29-8 and *Titaghur* Rs. 27. *Borooah Timber* were dealt in at Rs. 21-4, while among Shipping shares, *Indian General Navigation* were Rs. 112 and *Bengal Assam Steamship* Rs. 250. *Reliance Firebrick* were Rs. 17-2, *Midnapore Zemindary* Rs. 84 and *Walford Transport* Rs. 2-13.

BOMBAY STOCK EXCHANGE

(From Our Correspondent).

Bombay, May 6.

Conditions exactly similar to those perceived last week obtained during the period under review. The setback induced by profittaking towards the weekend did not last long. Under the influence of the uniformly encouraging war news share values once again began to appreciate. A brisk session characterised by a good amount of speculative activity was witnessed. Though there was no spectacular rise in any of the share values, a distinctly upward trend could be noticed, with Textiles and Steels in the lead as usual. Since share values had reached high levels it was obvious that speculators would try to cash their gains. Thus profittaking again intervened towards the close. There is not much of speculative activity in Textiles.

The giltedged section was steady, 3½ per cent Govt. Paper quoting Rs. 94.

Among Bank shares, *Central Bank* and *Imperial Bank* (F. P.) are slightly higher at Rs. 65-6 and 1762-8 respectively. *Bank of India* were done at Rs. 169, *Reserve Bank* were steady at Rs. 110.

Mill shares continued to be in favour. Almost all the shares in this section recorded substantial gains till Wednesday. Though the prices have declined lately due to profittaking a proportion of the gains has been retained. *Bombay Dyeing* were Rs. 2,102-8 (Rs. 2,087); *Central India* Rs. 539 (Rs. 514); *Century* Rs. 950 (Rs. 929); *Colaba Land* Rs. 291 (Rs. 258); *Gokak* Rs. 424 (Rs. 405); *Indian Bleaching* Rs. 276; *Phoenix* are considerably higher at Rs. 902-8 (Rs. 875); *Kohinoor* were Rs. 952 (Rs. 899).

The Iron and Steel section was also active upto Wednesday this week. The easier tone noticeable with the announcement of a lower interim dividend by the Indian Iron and Steel Company did not last long. Towards the close of last week an upward trend set in which continued into this week also. But profittaking more than offset the gains. The net result therefore is that prices quoted today are lower than those at this time last week. *Tata Steel* deferreds were Rs. 1,950 (Rs. 1,960) and ordinary Rs. 395-8 (Rs. 397), *Indian Iron* were Rs. 35-4 (Rs. 35-6).

The Miscellaneous section was moderately active in sympathy with the other sections. *Alcock Ashdown* are higher at Rs. 972-8 (Rs. 950). *Premier Construction* have been steadily improving and are higher at Rs. 178 (Rs. 175) *Belapur Sugar* are Rs. 248. *Bombay Steam* were steady at Rs. 592-8. B.E. S. T. were uninteresting around Rs. 158. *Scindia* were lower at Rs. 35-12 with *Shivrajpur* at Rs. 69.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, May 3.

Mill shares and plantings were again the highlights of the local stock exchange during the period under review, both sections meeting with good buying support. Many scrips especially in the former section have recorded further substantial gains, the Coimbatore group again being prominent. The news of the Allied victories in Tunisia has imparted a feeling of optimism and investors are only too ready to buy up shares that are generally considered good. Mill shares by virtue of their high yield prospects were keenly bought.

In the Textile section there was a large turnover with the majority of the shares recording appreciable gains. *Trichy Mills* are higher by nearly 4 points at Rs. 35-8. *Cambodia* ordinary have gained 4 points to quote at Rs. 46. *Lakshmi New* were at Rs. 156-8 while *Lakshmi* Old were higher by 9 points at Rs. 310. In the *Coimbatore* group of shares, *Coimbatore Spinning* were considerably higher at Rs. 367-8 while *Coimbatore Cotton* have shot up by nearly 60 points to quote at Rs. 405. *Mettur Industries* were further higher at Rs. 330.

The planting section continued to be active. *Thirumbadi* were further higher at Rs. 5-15; while *Nelliampathy Hills* were crossed at Rs. 9-2. *Nilgiri Neerungundi* have improved to Rs. 14-4. *Chembra Peaks* are slightly higher at Rs. 14-10. *Kailas* have further improved to quote at Rs. 3-1. *Cochin Malabar* are better at Rs. 21.

(Continued from page 811)

the amount carried forward is considerably higher at Rs. 43,457 against Rs. 23,957 brought in.

"Sapoi Tea Company, Limited" has been able to report a net profit, before providing for taxation and depreciation, of Rs. 3,19,179 against Rs. 1,69,147 for 1941. The provision for taxation and the deposit under section 10 of the Finance Act 1942. is Rs. 1,28,000 (Rs. 51,180). The transfer to general reserve is 40,000 (Rs. 50,000). There is to be an allocation to the Renewals and Replacements Reserve in addition. The dividend on the ordinary shares is 17½ per cent (10 per cent) while the amount carried forward is Rs. 34,265 against Rs. 28,076.

The directors point out that as no charge has been made in the past in the accounts for depreciation, it is now considered desirable to create a reserve for renewals and replacement out of which the cost of renewals will be met in future.

WORLD OF INDIAN FINANCE

Friday Evening.

THERE is no change to report in money market conditions, which, as is to be expected, continue to be extremely easy. Inter-bank call money is nominally quoted at ½ per cent in Calcutta and ¼ per cent in Bombay. The treasury bill discount rate is maintaining its steady, though downward, trend. Against Rs. 8 crores of tender bills on offer, applications came to Rs. 15.07 crores. The average rate of accepted tenders is rupee one, anna one and pies seven per cent per annum, recording a drop of 2 pies. The offer of tender bills for next week is unchanged at Rs. 3 crores. Sales of intermediate treasuries between May 5 and May 10 amounted to Rs. 2,90¾ lakhs. Tap bills will continue to be sold at the same rate, namely, Rs. 99-12-0 per cent.

Expansion of currency for Rs. 12 crores is disclosed in the Reserve Bank returns for the week ended May 7. Sterling securities in the issue department are higher by Rs. 13.99 crores while rupee securities are lower by Rs. 1.99 crores. The net expansion is thus Rs. 12 crores. There have been heavy withdrawals of rupee coin, resulting in the depletion of the coin holdings of the Reserve Bank by Rs. 1.66 crores. In the result, active note circulation has expanded by Rs. 12.10 crores. Foreign balances held in the banking department recorded a shrinkage of Rs. 5.26 crores. Thus, while sterling assets in the issue department have gone up by Rs. 13.99 crores, sterling assets in the banking department have gone down by Rs. 5.26 crores. The net addition of sterling assets is thus Rs. 8¾ crores. This provides a measure of sterling payment received in respect of transactions between the Indian Government and the allied governments. In spite of this receipt from the British Government, the Central Government's cash balances with the Reserve Bank show a decline of Rs. 5.03 crores. Apart from the routine payments, a contributory cause towards this shrinkage in cash is the utilisation of Rs. 2 crores for cancellation of *ad hoc* securities. The investment portfolio of the Reserve Bank shows a sudden bulge of Rs. 2.06 crores. This may be due to open market operations or to the bank taking a slice from the present issue of 3 per cent 1946 bonds, as this stock, being a very short-dated one, is eminently suitable as an investment for a central banking institution.

From the middle of March, the Reserve Bank has been piling up sterling at a faster rate than heretofore; and, as a corollary, currency expansion has also been greatly accelerated. This point is emphasised by a comparison of the returns of the Reserve Bank for the week ended May 7 with those for the week ended March 12. This study reveals that sterling securities held in the issue department have risen by Rs. 123.72 crores between March 12 and May 7. In the same period, foreign balances in the banking department have fallen by Rs. 8.22 crores. In other words, the net increase in the sterling holdings of the Reserve Bank between March 12 and May 7, is Rs. 115.50 crores. This gives an average of Rs. 14.4 crores per week. That is, the Reserve Bank is now adding to its sterling holdings at the rate of Rs. 2 crores or £1½ million per day. Though sterling securities in the issue department have been strengthened to the extent of Rs. 123.72 crores, there has not been currency expansion to the corresponding extent as the comfortable cash position of the Central Government has been utilised for the cancellation of *ad hoc* treasury bills for Rs. 68.73 crores. In the result, active note circulation has risen only by Rs. 55.21 crores between March 12 and May 7. This gives an average of Rs. 7 crores per week or Rs. 1 crore per day. The developments since the middle of March thus disclose addition to the Reserve Bank's sterling holdings at the rate of Rs. 2 crores per day. These conclusions do not justify the complacency which seems to prevail in official quarters. Nor is there any warrant for the petulence generated when inferences are drawn regarding the extent and effect of inflationary forces connected with developments such as sterling acquisition at the rate of Rs. 2 crores per day and active note expansion at the rate of Rs. 1 crore per day.

Restriction of dividends is no remedy for this kind and degree of inflation. In our last issue, we set out our reasons for our opposition to any proposal for the restriction of dividends at this stage and in the present conditions. We may, however, point out that the very figures which we furnished on the last occasion suggest a fairly potent remedy for the inflation now rampant. We quote below the relevant passage:

"Between January 1 and May 1, sixty-one companies have issued reports of their earnings. These show that sixty-one companies made, between January 1, 1943 and May 1, 1943, a net profit of Rs. 9.90 crores as against Rs. 7.26 crores in the corresponding period in 1942 and Rs. 4.35 crores in the corresponding period in 1941. That is to say, the net profit in 1943 shows an increase of Rs. 5.55 crores. The amounts distributed as dividends in this period were Rs. 2.31 crores in 1943 as against Rs. 1.75 crores in 1941. That is to say, the increase in the amounts distributed as dividend is only Rs. 56 lakhs. In other words, a bare ten per cent of the increased net profit has been utilised for additional dividends. On the other hand, the appropriations which the companies have made for depreciation, various kinds of reserve and taxation are on an extravagantly generous scale. The provision for depreciation and reserves is Rs. 2.52 crores in 1943 as against Rs. 1.87 crores in 1942 and Rs. 1.22 crores in 1941. The provision for taxation is Rs. 4.8 crores in 1943 as against Rs. 3.11 crores in 1942 and Rs. 1.52 crores in 1941."

The point to which we wish to draw special attention in to-day's context is that tax provision made in the first four months of 1943 by sixty-one companies amounts to Rs. 4.8 crores as against Rs. 3.11 crores in the corresponding period of 1942 and Rs. 1.52 crores in the corresponding period of 1941. This amount of Rs. 4.8 crores earmarked for taxation in 1942 accounts is out of profits already made. This amount is in the hands of the companies; but it does not leave the hands of the companies for a pretty long time. The process of submitting returns, filing records, examining books, hearing dates, adjournment of hearings, issue of notice and finally payment may take anything between 12 months and 3 years; and it may be stated generally that there will hardly be a case in which the tax provision made in the accounts for the period ending, say, March 1943 is paid by the next March. This kind of dilatoriness is even more true of tax payments due by individuals and parties other than limited companies. It follows that, at any one time, the amount of money that is ear-

TREASURY BILLS

India

Tenders for Rs. 8,00,00,000 of three months' Government of India Treasury Bills were opened on May 11, 1943. Total amount offered was Rs. 15,07,00,000. Tenders at Rs. 99-11-9 per cent were accepted in full and those at Rs. 99-11-6 were allotted approximately 39 per cent. Total amount accepted was Rs. 8 crores, the average rate of accepted tenders being Re. 1-1-7 per cent per annum.

Tenders for Rs. 8,00,00,000 of three months' Government of India Treasury Bills will be received on May 18, 1943 in Bombay up to 11 a.m. (Standard Time) and up to the close of business on May 17, 1943 at other centres. Successful tenderers should make payment on May 21, 1943. Other conditions are as usual.

Three months' Intermediates will be sold from May 12 to 17, 1943 at Rs. 99-12 per cent subject to the conditions previously announced (viz., sales can be stopped at any time without previous notice, if Government think it necessary).

Three months' Intermediates sold from May 5 to 10, 1943, amounted to Rs. 2,90,75,000.

During the week ended May 7, 1943, Government of India Treasury Bills for Rs. 1,57,00,000 were sold in favour of the Issue Department of the Reserve Bank of India.

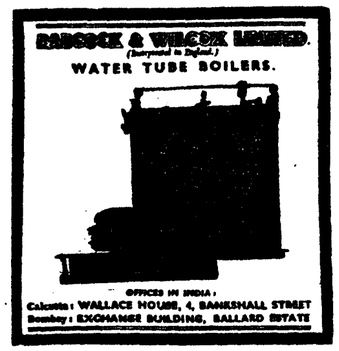
Finance Abroad

Thursday Morning.

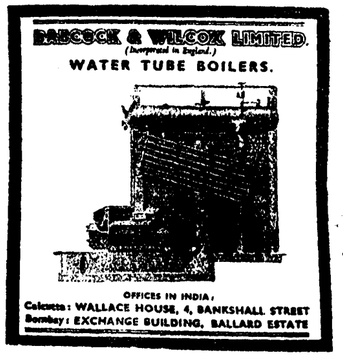
THE end of operations in Tunisia seems to have a definitely encouraging effect in the stock exchange both in London and New York. The small fall in giltedged may be attributed to greater buying of short-dated stocks following the sale of long-dated stocks. That old Consols have dropped to 80⅞ need not cause comment. The drop is too small to imply any change in interest rates now or hereafter. For the present it may be noted that the giltedged decline is not reflected in the short-term borrowing. The weekly offer of Treasury Bills is maintained at £90 millions and the rate is slightly in favour of Government as the fact that the volume of applications is growing larger is reflected duly in the reduction in the market's quota. The end of cheap money is not envisaged by the clearing banks which continue to take up to 50 million every week six months' deposits at the rate of 1⅛ per cent. Deposit receipts are for the big banks, at any rate, as important as Investments in view of the drop in Advances. The increase in deposits is indicated in the Bank of England return at the end of April. The rise in Bullion and Public deposits is not so important as the jump in Clearing banks' deposits with the Bank of England before and after Easter. The Bank's own buying of securities may be inferred from the April return which point also to the steady rise in the note issue in Britain. Larger savings—at the rate of £100 million a month or more may be expected. The Bank Return, apart from showing the effects of a rising national income on the bank's finances, show that clearing bank resources are more liquid than in the past. The maintenance of borrowing around 2 per cent need not be difficult, and any discussion as to the future of interest rates after the war seems to have little relevance. International lending by agreement either for stabilising exchange or reconstruction can have no effect on rates since control over the export of capital will remain and money cannot always seek the market where rates are higher. Capital movements will be strictly supervised, and the hot money problems will not be allowed to reappear in any form. The Bank Rate of this century is likely to be 2 per cent. The U. S. Federal Reserve Board after lowering the rediscount rate to ½ per cent, has created easier conditions. The success of Treasury borrowing in December has been repeated in April. The Treasury Secretary reported that the Liberty Loan of April netted 18½ billion dollars as against estimate of 13 billions. The result is satisfactory, though the actual proportion of small savings to the total subscribed is not indicated. It is, however, clear that the total was obtained without the support of banks whose excess reserves have melted in relation to the larger spending of the Treasury and the public alike, the first on the war, the second on goods dearer than in the past. The main importance of the U. S. Treasury's success in raising money lies not in the effect on bank resources but in relation to the 100 billion budget. The harsh programme implies an increase of savings and whatever may be the party struggle in Congress, the U. S. public really is helping. The President asked recently for 4.9 billions more for the Navy's air arm for the year 1944. The money is not lacking and the progress of lease-lend in March signifies that larger grants are producing results. The relief of Africa will entail additional expenditure on lease-lend and civilians demanding relief in Tunisia might number 600,000 to 700,000 according to Mr. Lehman. That the relief work has begun may be guessed. The resumption of trade with North Africa is also likely. A recent notification permits India to trade with French Somaliland and whatever may be the difficulty in the Tangier zone owing to spanish claims, the Allies are likely to encourage trade. Textiles from Britain may be provided for North Africa where trade with France must be in abeyance. The relations between the Tunisian and Algerian currency may be restored and the Algerian bank of issue should be restored to its place after the military administration takes over or Giraud acquires control of the Protectorate. The Tunisian franc will be treated like the Algerian franc. From 1892 the Protectorate has employed French coinage, weights and measures. The Bey who was decorated by the Nazis is still out of the news. He may have been forced to leave Tunis and his future must remain obscure though his loyalty to the French was demonstrated when Italy lodged a claim before the war for Tunis, Corsica and Nice.

The recurrence of trouble in the coal mines in the U.S.A. may have no serious effects on the output of 1944 in the field of shipping or aircraft. For the present, the labour trouble is not wholly discouraging to Wall Street even if the leaders have lost a little ground. The Senate has empowered the Government to take over and run the mines if strikes occur in spite of the threat of punishment.



The Middle East Supply Council has arranged a meeting in Cairo. The Allied war effort is having important effects on economic life from Tripoli to Iran. Saudi Arabia was the only neutral represented at last week's conference. Measures to counteract inflation were on the agenda. It is noteworthy that the Middle East is not immune from inflation. The changes in Iron after 1941 are known to all but more striking changes have been reported from Palestine. Demand for industrial products has made Palestine prosperous. The prosperity of Palestine Potash, Palestine Electric and Nesher Cement is explained by the industrial advance in the country while racial strike is dormant. Though citrus cultivation is restricted diamond-cutting and other new industries have sprung up. Large factories have increased and organised labour is three times greater than in 1937. The existence of many Arab cigarette factories shows that development is not confined to Jewish concerns. While citrus growing has necessarily suffered the volume of employment has risen. The new refinery at Haifa and the railway workshops are providers of employment. It is believed that industry will not shrink seriously in the postwar period, and local enterprises may keep their market because imports may be difficult after the war. Palestine's textile industry is not unimportant. The prosperity of Palestine is explained by its proximity to Egypt as well as the closure of the Mediterranean to shipping. The Mandated territory is served by Barclays Bank (DCO). It is noteworthy that the Bank has gone to East Africa from West Africa. Mr. Edwin Fisher in his speech at the annual meeting, said that Eritrea, Ethiopia and Sudan are served by the Bank. The exchange banks have evidently limited opportunities in the Near East Africa at present. Their position in India is, however, wholly secure as may be inferred from Mr. V. A. Grantham's statement to the Chartered Bank's shareholders. In spite of the war in the East, the balance sheet total compared with that of 1941, is less by £4.95 millions only. Total deposits have fallen by about £3 million only to £66.8 millions.

The cash items in the 1942 balance sheet amount to £12.8 millions. The cash ratio is unusually high and is the result of the fall in loans rather than any special difficulties. Is spite of the fall in bills and advances as the Chairman pointed out, there was no fall in the aggregate figures of the Bank's agencies in India and Ceylon. This may be taken to prove the correctness of the general presumption that the exchauge banks would hold their own fully in India and obtain a due share of the growth in deposits. The opening of the Chungking branch proves that for many branches lost through the war, there is one important addition. Sino-British friendship is preserved by the opening of one new branch this year for the many that have to be revived after the war.



The London stock exchange shows no new feature apart from the decline in the Funds. The improvement in oil shares naturally stands out. The easier feeling in Home Rails is balanced by the large support given to Home Industrials, though Textiles have shaded off. Mild improvement in Tea shares will claim much attention in view of the firmness noted locally. Drops in the quotations for leading industrials this week follow the improvement noted previously. Gold shares have hung back while oil shares have been supported. The more important change to record here is the advent of a firmer tendency on Wall Street last week. Improvement in the quotation is measurable and is based on the satisfaction given by Mr. Churchill's visit to Washington. The fall in Steel Common is hardly to be noticed as against the improvement in railroad and other stocks. The Tunisian news has produced cheerful tone if hopes of an inter-allied agreement on currency and exchange

Adaptability
The experience of nearly two centuries of private and commercial banking, coupled with an efficient and world wide organisation and the highest reputation for thoroughness and financial stability, enables Lloyds Bank to adapt itself to every class of banking business, whether in times of peace or war.

Editorial Comments

Better Outlook of Food in Bengal

The Press Conference at the Writers' Buildings on Thursday last and the speeches of the Commerce Member and the Secretary to the Food Department, Government of India, as well as of the Hon'ble Mr. Suhrawardy, should go a long way to reassure the public of this province about the food situation in Bengal. The efforts of the authorities in this direction have not been made too soon. The price of rice in Calcutta has witnessed steep and frequent rises in the last few weeks; and even readiness to pay the higher prices has not made rice easily available through the ordinary channels. The general feeling of nervousness has been heightened by exaggerated reports of the effects of the "denial" policy and of exports on the rice situation in Bengal. Where so vital a necessary of life is concerned, it is too much to expect the ordinary man in the street, to keep his head cool. This is precisely the situation in which, if the authorities speak out fully and frankly, a great deal of unnecessary suffering may be avoided, and even much positive good can be done. As the Commerce Member of the Government of India, Sir Azizul Haque, has given the assurance that, though the Central Government looks to Bengal to face the situation in a spirit of courage and realism, the Government of India were prepared, for their part, to assist the Provincial Government in the many difficulties which it is now facing. It is not difficult to see where the help of the Government of India is needed. To the extent that there is a shortage of internal resources, the Government of India can help by obtaining an addition to our supplies by imports from outside Bengal. Likewise, the flow of other grains, which can either supplement our stocks of rice or serve, to some extent, as substitutes, is better ensured through the sympathetic cooperation of the Government of India.

But the truth, however, is that stocks of rice in Bengal do not reveal a glaring shortage as compared with the figures of any normal year in the past. Exaggerated notions of shortage are probably derived from comparison with the year 1942 when the Bengal crop was an astonishingly high one, and the best for over a decade. The average production for the five years 1936-37 to 1940-41 is only 8,181,000 tons, the figure for 1942 being 1,800,000 tons in excess of it. As Major General Wood pointed out, our ideas of sufficiency or shortage must be related to the average mentioned above. If this year's crop cannot be estimated at more than 6,916,000 tons, we have also to take into account the carry-over from the bumper harvest of 1942; and the carry-over can be put, even in a very conservative estimate, at 1,000,000 tons. The available stock is thus raised to 7,916,000 tons. The gap between this figure and the average for the five years is more than made up by the action of the Central Government. As the Central Government have decided to make available to Bengal from elsewhere a total of 550,000 tons of rice and cereals that are regarded as rice substitutes, the resources of Bengal in 1943 in terms of rice may be taken as 7,916,000 tons plus 550,000 tons or a total of 8,466,000 tons against the average past production figure of 8,181,000 tons.

While these statements of the officials are, no doubt, reassuring, they also bring out the fact that the public, too, has a part to play in the present conditions which, it is idle to pretend, are quite normal. So far, the public has been a ready and easy prey to scaremongers and profiteers. Its reaction to the food position has been, in the main, one of hoarding up whatever is available and unwittingly aiding the profiteers to bring about steep rises. Now that the position is seen to be better in many ways, the public must be determined, in the first place, to give up the panicky feelings which help only the profiteers of the black market and, in the second place, to bring about those adjustments in its ways and habits without which the Government's attempts to relieve the situation are bound to prove futile. Powers are now being taken by the Government to compel hoarders to disgorge their hoardings; and when in the place of the daily rise in the price of rice, there is substituted a steady fall, the liquidation of stocks will certainly make progress. But this development must be aided by the readiness of the public to give up panic, to treat the situation as largely normal and to refrain from making those exaggerated demands which throw the whole machinery of distribution out of gear, and convert a small and distant shortage into a veritable famine. If the public can command a degree of confidence in the certainty of steady supplies, it will be content with taking current requirements, instead of seeking to hoard for a distant time.

The public has also a duty to realise that the difference between available internal stocks and total requirements is made up only in part by imports of rice from outside Bengal, and that the other part consists only of wheat and other cereals which are good substitutes for rice. This solution of the rice problem involves for the public an obligation to effect to some extent a change in its dietary. It is common knowledge that those, who rely on rice exclusively for their food requirements, do take it in quantities which are neither adequate nourishment to themselves, nor socially equitable in the present rice situation. The appeal to reduce the consumption of rice by taking to other cereals as well may seem an easy escape from the severity of the rice problem, if it were not true that an unduly large place for rice in the national dietary is an evil which an enlightened State ought to set out to cure even in conditions of plenitude of rice. The public should learn to regard the present as an opportunity for carrying out a much-needed nutritional reform. Those, who reduce their consumption of rice under pressure of the present position, will be solving a number of personal and social problems at one stroke and helping to put the national dietary on a sound basis for ever after. It is to be hoped that the problem of rice will be attacked from all these different angles till the province can feel that the scares of the present have proved a blessing in disguise.

INFLATION

[What is all this pother about inflation? What does it mean? If experts are not agreed about what it means, what is it that we laymen can know about it?

*These are questions which we are asked by many a reader. The demand for a simple exposition of the issues connected with the present inflation in India can no longer be denied. The following is an attempt to meet it and will, we trust, be read with interest and attention.—*Ed. I. F.]

The layman is often told that economists are not agreed as to the meaning of the term "inflation;" and he is mystified about issues which he ought to be enabled to see clearly. Though there are differences amongst economists, they do not affect the issues that are relevant to the present currency situation in India.

"Inflation" connotes additions to the media of circulation which are not balanced by corresponding additions to the volume of goods and services offered for exchange.

Economic life is best thought of as the constant process of exchange of goods and services with the aid of a common denominator of values viz. money.

Prices represent the relation between the volume of goods and services on the one hand and the volume of money on the other together with the substitutes therefor like cheques and other creations of credit.

If this relation is to continue without any marked change, any change in the volume of the one ought to be balanced by a corresponding change in the volume of the other. Whether such adjustments are worked by natural processes or by conscious policy, the adjustment is necessary if prices are to be stable. But if prices are unstable debtors, creditors and recipients of salaries and fixed incomes are affected.

It will be seen that changes can conceivably occur both on the goods side and on the money side. In a purely agricultural community, a bumper harvest can lead to an excess of goods relatively to the stocks of money. But historically, changes on the money side have occurred, or have been caused, more frequently; and the consequences have been more far-reaching. The fall of the Roman Empire, it is sometimes said, was caused by the additions to silver following the discovery of new silver mines.

That, however, was what we may call a natural phenomenon. For the purposes of economic discussion in modern times, inflation may be restricted to the additions to money effected by the exercise of political authority.

In ancient times, money comprised more or less wholly some product of nature, which was selected for the purpose by the instinct of the race. It was cowries among savages, or pebbles or shells. Before long civilised man found himself using silver, gold. In the last century, silver and gold were used with a frequent change in their relative value, till silver was wholly abandoned by the majority of nations.

By the time gold became the sole monetary metal, the modern banking system had been perfected, so that the media of circulation consisted not only of gold, but also the credit created by the banks. Banks issued their notes till it came to be recognised that the right to issue notes should be vested solely in the central banking institution of the country. For a time, the notes of the Central Bank and gold coins were freely circulating. When gold became somewhat scarce, it was found to be rational and more convenient to put a stop to the habit of putting gold coins out into circulation. All the gold available in the country was tucked away in the vaults of the Central Bank; and on the strength of the gold the country was provided with the requisite volume of the medium of circulation. It is not to be supposed that for every pound of note circulating in the country there is an equivalent amount of gold in the Central Bank. On the other hand, the reserves of a Central Bank consist firstly, of gold, secondly, of foreign balances which are easily convertible into gold and thirdly, of internal securities. The first two together form the main prop of the note issue; and the ratio which their value bears to the total note issue is known as the Reserve Ratio, which is a simple index of the soundness of the national currency. Even in an advanced state of central banking, the commercial banks possess the power to add to the volume of the circulating medium through their ability to expand or contract the currency system. But their role is a minor one to that of the central bank; and the central bank has various ways of restraining the scope of their activities in this respect.

From what has been said above, it will be seen that the central bank or, what comes to the same thing, the Government which is behind it, has the power to alter at will the volume of the circulating medium. The statutes which put restraint on this power are altered just when their binding character is most needed. The notes so created are legal tender; that is, the man, who is paid his dues in such notes, has no right to demand payment in some other way. Whatever the rate at which the printing press may be worked, their character as legal tender remains the same.

Now the only conditions, in which it may be said that large additions to such note issue do not constitute inflation, are those in which farm and factory are adding to goods and services at about the same rate at which the printing press at the command of the currency authority is turning out new notes in addition to those in circulation.

If such conditions obtain, the relation between the volume of goods and the volume of money would be the same as before; and the stability of this relation will be duly reflected in the stability of prices.

But if on the other hand, the note issue rises to new record levels every week and prices do shoot up, it is a fair presumption that inflation is present.

In the case of India today, here is the table showing the note issue and the wholesale price index during the last four years.

Month.	Combined progressive increase or decrease of notes and coins in circulation.	Calcutta index No. of Wholesale Prices (July 1914 — 100).
1939-40	+ 59,53	115
1940-41	+ 52,34	119
1941-42	+ 159,58	144
1942-43		
April	+ 35,60	157
July	+ 70,72	182
November	+ 174,49	227
January	+ 248,07	250
February	+ 275,13	253

The table constitutes more than a **prima facie** case that India is subject to inflationary forces.

What is it that can be said in refutation of it? We may distinguish between two different lines of argument: (1) that the extent of inflation is exaggerated by misconceptions in regard to both the money side and the goods side, (2) that the currency policy in India is free from some of the blemishes that attach to inflation as it is generally understood.

Taking the first set of contentions, it is said that it is wrong to suggest that all the additions to currency that have been made so far are exerting their upward pressure on prices. A good deal of money, it is said, has gone into hoards. This contention might have been true till a year ago, when silver rupees were acquired by nervous individuals for the purpose of hoarding. Today, when the medium of circulation consists of the note issue and coins whose metallic value is a fraction of their face value as legal tender, there can be no incentive to hoard.

There is, again, the other contention that additions to goods and services have been made, inasmuch as there has been production of goods on war account and that the new employment which the war has necessitated cannot be considered to be unproductive. True. But this is a country, in which the majority of people, who have found employment as a result of the war, had been wholly or largely unemployed. The purchasing power that has now been created as a result of the war thus increases enormously the demand for the dwindling, or at best unchanged, volume of the ordinary necessaries of life.

The goods and services that have been produced by war expenditure and on war account cannot rank as goods and services, when we are considering the question of a stable relation between the volume of money and the volume of goods.

Attempts are also made to refute the charge of inflation by maintaining that the present position in India is free from two of the most serious blemishes of inflationary policy, as it is ordinarily understood. First, the additions to currency have been effected, not through reliance on the brute force of the Government for maintaining its currency, but on the strength of foreign securities which must rank as equivalent to gold. The second point is that additional currency has not been created to cover the deficits of a Government which can neither restrict its expenditure nor increase its revenue.

These two points, argued with a certain degree of ability should normally procure for the authorities a verdict of "not guilty". These points are substantially true. But they do not either exonerate the authorities or extenuate the offence. On the other hand, they aggravate it.

It is largely true that additions to currency have not been for the purpose of covering the deficits of the Central Government. At any rate they form a negligible part of the enormous additions to currency that have been made. It is also true that they are backed by sterling balances which India has been accumulating since the war.

But—let us make no mistake about this point—additions to currency do not cease to be inflation merely because they have a good gold backing. The only circumstance in which they can be held to be harmless are those in which they are balanced by more or less corresponding additions to goods and services. This addition may be through indigenous production or through imports. When there is neither, the charge of inflation must hold.

The contention that currency is not created to meet the Government deficit must likewise leave the charge unaffected. But, one may ask, if it is not for meeting the Government deficit, why is at all created? The answer is, that additional currency is created, neither for the sake of the Indian Government, nor for the sake of the Indian people, but for the convenience of foreign Governments who buy goods and services from India, pay for them in foreign currency and leave the Indian Government to pay the people in paper which may well be their undoing. That is why you have in India a type of inflation which is free, to all appearances, from the worst features of any inflationary phenomenon, but is as devastating in its effects as if it were effected without the backing of foreign securities and in order to meet the deficits of the Government and as if it were unaccompanied by increase in any kind of productive activity.

Fall in Output

That the uptrend in Indian industrial production came to an end in March 1942 has been described frequently. It is not only the August disturbances which led to a reduction in output as compared with the previous year. Voluntary restriction of production as in the case of the two jute mills was due to changes in foreign trade or to scarcity of raw materials as in the case of flour mills. The reversal of the expansionary trend in the case of the cotton mills explains the rise in prices, the licensing of exports and much else. After August 1942 there was a sharp fall in cotton mill output though the figures for February may be taken as encouraging in view of the resumption of working in Ahmedabad. The jute mill industry's output fell owing to the fall recorded under exports of jute manufactures as well as raw jute last year. The fall in the production of yarn as well as piecegoods after July 1942 has undeniably made for difficulties not resolved altogether by control measures or new schemes. The fall noted under paper production after March 1942 explains the adoption of measures to raise output by producing fewer varieties. Output in all months of 1942-43 up to November showed a considerable decrease os compared with 1941-42. Average output per month was about 108.000 —5,400 tons a quantity that is greatly below normal consumption. While wheat control affected the supply of wheat to mills the large fall in exports may have influenced directly the production of flour. Production in most months of 1942-43 showed a fall up to 70 per cent in one month. The decline in match production stands out and as for other industries like cement and chemicals the production is not known. In the case of coal output it must have been influenced by labour difficulties though the total tonnage raised in 1942 is said to be higher. The statistics relating to electric energy used point to a decline in consumption after June 1942. The irregular trend of electric energy sales in India may have been due to voluntary curtailment owing to the blackout and reduction of private, non-essential consumption.

Cotton and Wheat

Two crop forecasts appeared recently which have special interest for the commodity markets. The final cotton forecast for 1942-43 recorded a decrease of 22 per cent in area and 26 per cent in the yield as compared with last year. The increase under Americans and medium staple has been more than offset by the decline in the cultivation of shortstaple. The total area under cotton has fallen from 24.15 million acres to 18.81 million acres; and the yield is correspondingly reduced from 6.127 million bales to 4.554 million bales. The stronger statistical position is influenced also by the recovery in the offtake of Indian cotton by mills. Cotton prices have tended to follow yarn and cloth prices this year, more so in view of the curtailment of the crop decided upon for 1943-44. The wheat forecast indicates that the crop occupies an area larger than that under cotton or any other commercial crop. The total area under wheat for 1942-43 has risen by 6 per cent to 34.31 million acres. The second forecast records an increase in wheat cultivation in the Punjab as well as the U.P. Crop prospects were rated good in the two major producing provinces. The decrease in the C.P. and Bombay is attributed to deficient rainfall, but the crop in the former should be larger than in 1941-42. The Punjab with 31.5 per cent of the total area is expected to have a crop equal to 97 per cent of the normal. Bihar is likely to have a very good crop according to the forecast issued in March and the N.W.F.P. is expected to have a crop totalling 316.000 tons this year. The increases reported from the U.S.A., Canada and Argentina in regard to wheat in 1942 may have no effect on the available volume of wheat supplies or prices this year. This may be reflected in Indian prices for wheat. The price in Karachi is still over Rs. 60 per candy and the Lyallpur quotation is over Rs. 9.5 per maund in spite of the more bearish forecast issued recently. The estimated increase of 10 per cent in India's own wheat supplies may not be enough to counter the large reduction in rice supplies this year. A crop of nearly 11 million tons may not be sufficient for India's needs in wartime. The removal of control was not only an acknowledgement of the diffiulties in the way of distribution but of limited supplies on the past year. The considerable reduction in grain traffic last year on the Railways indicated that hoarding following a short crop in 1941-42 was responsible for the black market and other evils. The carryover, including hoarded stocks, cannot be large and the 1942-43 crop will have to satisfy the growing demands of the country. In relation to home production present imports from Australia can discharge only a subsidiary function. But it is noteworthy that prices at Lyallpur have actually declined after the end of January. Decontrol has been followed by a drop in prices and a comparison of the Karachi prices in April with those ruling this month points to a fall in the spot price by as much as Rs. 10 per candy. Cheaper wheat is something more than a possibility.

Defence Loan Totals

The usual statement as to subscriptions to Defence loans in March indicates that the bulk of new money still comes from Bombay. Out of the total of Rs. 539.59 lakhs as much as Rs. 343.98 lakhs came from Bombay. Bengal was a poor second accounting for a total of Rs. 82.58 lakhs. No Province provided even Rs. 1 crore. The slow progress of defence borrowing may be contrasted with the steady addition to the Scheduled Banks' deposits. But the explanation for retarded growth of investment may be found in widespread distress ensuing from the rise in the cost of living. The disparity in wealth and saving alike is underlined by the many differences between the different areas' contributions. It is however surprising to find that only Rs. 3.23 crores out of the total of Rs. 139 crores has come from the States and Central Treasuries. Out of the total of Rs. 139 crores, the share of Bombay is Rs. 63 crores and that of Bengal is Rs. 49.15 crores. The share of the other Provinces is inconsiderable. In regard to interest-free loans also Bombay holds a big lead, accounting for Rs. 145 lakhs out of the total of Rs. 306.44 lakhs. The March statement indicates that the total for defence savings certificates has risen to Rs. 5.52 crores. Net sales in March amounted to 187 lakhs indicating that the monthly average has been maintained. There is, however, the fact that sales for 2¾ years have produced a total of Rs. 5¼ crores only. The savings drive often mentioned but in evidence for one week only in Calcutta has been a qualified success. In spite of the income-tax concession, the total subscriptions to defence savings bank up to March 31 amounted to Rs. 40.98 lakhs only. The small savers have put up less than Rs. 6 crores in 2¾ years whereas the big investors including the banks have provided Rs. 142¼ crores in the same period. Measures to take off surplus purchasing power acquire special interest in view of the poor record of small savers. The total for interest-free loans at Rs. 3.06 crores is nearly equal to the contribution of the States to loans, though it will be remarked hat the States must have provided a large part of the 3 year interest-free loans. What happens to the loans on maturity in 1943 is a question that need not be asked. Reinvestment as interest-free loans for another period is the course indicated for those who took up loans in the first year though repayment may be acceptable to some who have forgone interest for the full period.

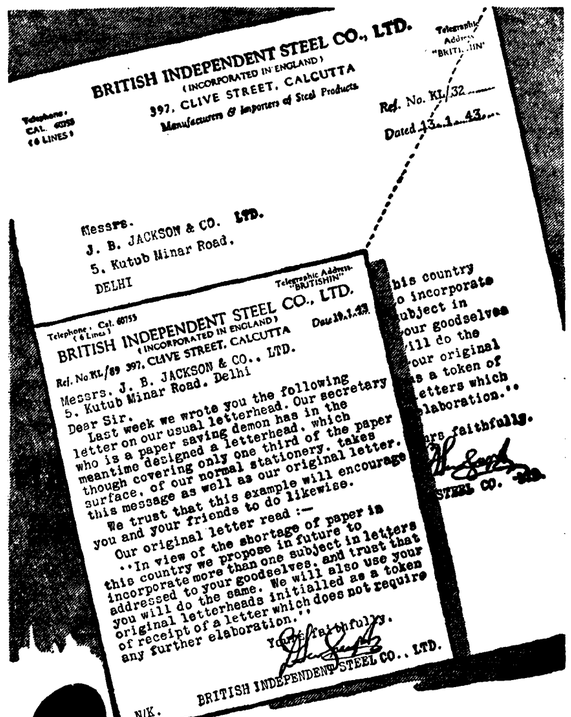
Lend-Lease Review

The renewal by Congress for one year of the Act of 1941 has not reduced the interest of Mr. E. R. Stettinius' report on Lend-Lease. The report presented in January 1943 on the working of the Act should help India to know how and where Lend-Lease works. The expenditure of $7 billions by the Allies in cash on U.S. exports is not the only justifiation for Lend-Lease. There is the mutual aid. Russia gets help from Britain, and America gets supplies from Australia. Lend-Lease, as the U.S. Congress has been told, is a direct return for the many sacrifices made by the Allies for the U.S.A. The agreements made under Lend-Lease give the U.S.A. material advantages in the form of reciprocal aid by Britain and the Dominions, by the Belgian Congo and China. Except for cigarettes, nearly everything wanted by the U.S. forces in Europe comes from Britain's limited supplies as Mr. Stettinius remarks. The Australian supplies in the Pacific are large and her food plans are governed by the need to feed U.S. forces in the Pacific. Mr. Stettinius' report alone proves the existence of reciprocity in relation to lend-lease. It may be noted here that non-belligerents like Bolivia and Argentina are also eligible for Lend-Lease assistance. Lend-Lease is not to be regarded as coming outside the U.S. defence programme. Mr. Ecker's statement after arrival in India is supplemented by the formal review provided by Mr. Stettinius. Reciprocal aid furnished by India has been indicated in the President's own report to Congress on Lend-Lease operations. The benefits of Lend-Lease are not to be appraised in terms of money. The U.S. Congress has been told that industrial mobilisation was speeded up because of the Act and the outlay of the U.S. Government is small in proportion to the total war expenditure either of the U.S.A. or of her Allies. What is most obvious is the survival of regular trade in addition to Lend-Lease. To that extent the U.S.A. has gained as Mr. Stettinius has clearly indicated to the Houses.

Bank Clearings In 1942

The steady increase in Britain's note circulation led to a limited increase in bank deposits last year. But the clearing figures speak of greater activity and a more vigorous or quicker circulation of money than in 1929. The total for 1942 is stated to be a record. On a single day (December 31) the clearing total amounted to £282,284,000. The yearly total runs to over £48.656 millions. The rise in prices has some effect on clearings as in 1940 but general economic activity has a more obvious effect. In spite of the great decrease in speculative activity the total for clearing figures showed a rise of 8.3 percent on 1929 and pointed also to the maintainance of easy conditions over a whole year. The increase in clearings in 1942 by 13.1 percent followed successive increases in the total for 1941 and 1942 by 11.5 and 7.4 percent respectively. In spite of the fall under bills, the increased use of cheques is indicated by the rise in clearing totals. The larger volume of till money did not reduce the use of cheques in Britain. Provincial clearings showed little or no increase owing to the reduction noted in the case of Liverpool. The Manchester clearing rose by 3.6 percent to £622 millions but the total is dwarfed by the enormous sum for the Métropolitan clearing. To interpret the increase as proof of higher incomes and greater turnover is not difficult. The figures available for India point to no such increase in 1942. The increase in note circulation reported month after month, did not produce a corresponding increase in clearances. It is, however, noteworthy that a sharp fall was registered in August 1942 and a considerable recovery was noted in October, the beginning of the busy season. The monthly average for 1941-42 was Rs. 200 crores. Of the smaller cities, Mangalore, Calicut and Coimbatore have clearing houses at present. The general average for most months of 1942 may be taken as Rs. 225 crores though the peak was tounched in January 1942 when the total reached Rs. 262.7 crores. The smallness of the total in relation to the note circulation in India and the total deposits of banks indicates the limited progress of banking in India as well as the spread of hoarding, of notes as well as coin. The effect of this development on the price-level cannot be overlooked. That dishoarding of coin has accentuated the symptoms of inflation has been emphasised frequently. Bank deposits which absorb only a part of the increase in the note issue do not neutralise the effects of additions to currency.

Argentine Harvests



Trade conditions in Argentina are improving in spite of the fall in grain exports. According to a report appearing in the Jute Committee's bulletin for April there has been a great increase in meat exports at advantageous prices. Edible oil exports have increased, and inter-American trade has to some extent offset the loss of European markets. Grain prices stabilised by the Government decrees kept up farm income. Secondary industry has benefited through the shortage of imports. If the outlook for British shareholders in Argentine railways is obscure owing to the rise in costs of working and the fall in exports, Argentina's balance of trade continued to improve in 1942 and the country is in a comfortable position to face the post-war period. The influx of funds from occupied Europe into neutral Argentina has been mentioned in connection with the Federal Government's ability to finance its commodity purchases. The maize crop of 1942 promised to be larger like the wheat crop. Argentina with an estimated crop of 1.6 million tons remains the world's biggest producer of linseed. Bigger crops imply a large demand for jute, but Indian exports have been small, and the buying of secondhand bags from Chile was reported at the same time as the import of caroa yarn from Bazil. The bag famine is likely to persist and Argentina's dependence on bags for harvesting is greater than that of Canada where bags are not required until the milling stage.

Neutrality forces Argentina to keep her shipping out of Indian waters. Most encouraging news for jute interests is the introduction of an import duty on bags made of cotton. Argentine ships however are not likely to come to Calcutta but stick to New Orleans-Buenos Aires run, in which case jute supplies will be as limited as in 1942. Yet the very qualified success of the jute-growing experiment makes it certain that demand for jute will continue this year. The improvement in the shipping

Messrs. J. B. JACKSON & CO., LTD.
5. Kutub Minar Road. Delhi
Dear Sir,
Last week we wrote you the following letter on our usual letterhead. Our secretary who is a paper saving demon has in the meantime designed a letterhead, which though covering only one third of the paper surface, of our normal stationery, takes this message as well as our original letter. We trust that this example will encourage you and your friends to do likewise.
Our original letter read :—
"In view of the shortage of paper in this country we propose in future to incorporate more than one subject in letters addressed to your goodselves, and trust that you will do the same. We will also use your original letterheads initialled as a token of receipt of a letter which does not require any further elaboration."
Yours faithfully,
BRITISH INDEPENDENT STEEL CO., LTD.
N/K.
...his country
...o incorporate
...ubject in
...our goodselves
...ill do the
...our original
...s a token of
...letters which
...laboration."
...rs faithfully.
...STEEL CO.

3 TO 1

The odds are 3 to 1. Sufficiency commodity, and today we waste more than of paper has made us careless in the use of this precious 3 times the paper surface actually needed. Examine all the stationery you use, letterheads, bill forms and other stationery. You can save 2/3 of the paper surface you are using.

There is an acute paper shortage. Your attention is drawn to the following methods of avoiding waste of paper :—

- Use the smallest sheet of paper for any purpose that will do the job.
- Write, type and print on both sides of the paper.
- For short letters, bills and accounts reduce the size of the paper.
- Do not make copies except where absolutely necessary.
- Always type single spacing.
- In all cases (letters, commercial printing jobs and pamphlets, etc.) curtail margins.
- Reduce the size of the labels on manufactured goods.
- Use the back of the letters received for the carbon copy of your replies.

Save paper

ISSUED BY THE TITAGHUR PAPER MILLS CO., LTD.

position should induce Argentina to buy more. An Indian trade mission to Argentina this year indeed raises hopes of larger exports of gunnies, but Argentina's shipping is still limited and her neutrality may force her to restrict shipping to certain routes only. An increase of half a million tons in the Republic's wheat crop makes for lower prices abroad but the Argentine grain board is bent on maintaining home prices. A larger crop in Canada has not affected U.S. prices and decontrol in India is not the only factor sustaining wheat at present. Demand for N. Africa may be large as the war would have wiped out the usual surplus, and in this case, the demand for wheat should result in a larger offtake of gunnies by the Allies. The Argentine trade report by emphasising the deficiency of bags in relation to the harvest makes it clear that a recovery in Indian exports to South America will converge naturally on jute and jute manufactures. In the light of the fall in U.S. consumption followed by improvement in the shipping position, a revival of Argentine demand is indicated though exchange difficulties, which led to a suggestion that sterling balances should be turned into rupees for buying Indian goods, will remain.

Loss Of Confidence

The protest from Essen about inadequate local protection against air attack was not the only sign of war weariness. Neutral estimates of confusion engendered by strain have dwelt on the loss of confidence in Germany. A Swedish paper, quoted in a cable received by the Associated Chambers, says that morale is sinking. The German people are incredibly tired, said the Swedish journal. They have lost confidence in themselves and their leaders. Nobody believes in official figures of casualties. The German army is still the best military organisation in the world, but it is no longer an army with unbreakable self-confidence. The effects of Stalingrad have been camouflaged more cleverly than the catastrophe itself but not everybody can be silenced even in Germany. The article in question refers to happenings at Munich. The Student Corporation there issued two leaflets attacking National Socialism and the suppression of free speech as also the attempt to put University students into uniform. Punishment of those distributing the leaflets followed. Two males and one girl student were executed. The loss of confidence among the young is likely to grow after the failure in Tunisia. The increased employment of women in German factories, is a sign of the reduction in manpower. In spite of the forced labour of foreigners for the Reich the drafts on womanpower have increased. In view of the fact that over twelve million men have been taken off for military service, there has been an increase in the number of women employed by approximately 14 percent. The proportion is inconsiderable in relation to the enormous number of women employed in war work in Britain in such industries as shipbuilding and aircraft manufacture where women counted for little in the past. Training facilities in Germany are known to be inadequate. Conscription of women there has started late and the lack of experience was illustrated by a report that new entrants in factories, unaware of the importance of their own sat and knitted or sewed while machines broke down frequently through the inefficiency of the raw

Tunisia's Resources

The end of Axis resistance in Tunisia may well be expected after the capture of the capital. The Protectorate's future status cannot be different from that of other parts of colonial France. What position Tunisian officials—even ministers—will occupy under an Allied military administration or Giraud's temporary regime can only be conjectured. Indirect rule and the mixed courts may be difficult to maintain. The large non-French element in the population of Tunis creates a problem. In 1936 the French in Tunisia numbered 108,000 while the natives numbered 2,608,000. The other Europeans must exceed the return of 105,000 as Jews and others were classed as French citizens. The large Italian minority was more or less concentrated in Tunis. The distinction between Algeria and Tunis has been thin. North Africa is colonial and peasant agriculture in France has no counterpart as large estates owned by jointstock concerns have come to dominate North African agriculture. In Tunisia the north contains fertile valleys and in the northeast citrus cultivation is the main factor. Olives and dates are found in the Sahel and the south respectively. Wheat and barley are the chief crops. Considerable areas were acquired by immigrants on lease or by purchase. Camels, peculiar to the south, were exceeded in number by asses. Sheep outnumbered goats and cattle. Woollen spinning and weaving were well established. The phosphates of the south formed the chief mineral export. Lead, zinc and iron were also shipped, but food exports were the dominant factor. The principal market was France. Tunisia in the past imported more than she exported to France as well as Algeria. The U.K.'s share in Tunisian trade was quite small, and what should follow the occupation is not the end of trade with France, but a revival in textile exports from the U.K. The more obvious route for supplies lies through Dakar. Tunisia relied on monopolis to supplement indirect taxation. Direct taxation in the past provided only a fifth of the total revenue. There was a public debt and the hope of repayment by 1988 must have receded even before December. The prospect of almonds, oranges etc, coming in profusion to Britain is remote in view of import restrictions. Fishing, as in Tripoli, is important on the entire coast as sardines, anchovies and tunny were available to Italian and Tunisian fishermen.

Native Policy In S. Africa

On the eve of a General Election, the South African Assembly debated in February the need for a revision of native policy. Mrs. Ballenger asked for a revision of the Union's policy and merely received an assurance from Major Vander Bye that the needs of the natives would be considered and honest and fair treatment would be forthcoming. The Minister's reply makes many things clear. The Indians do not fare worse than the natives. There was an influx of natives into towns owing to the demand for labour in wartime. The Government was bent on maintaining a balance. That implied that the demand for permanent settlement was quite untenable. What happened under abnormal conditions could not be held as a reason for a departure from the policy of discouraging native settlement in towns. Since segregation is the accepted principle, the Minister refused to amend the Land Act of 1936.

PROSPECTUS

OBJECTS

The Prithvi Insurance Company, Limited, has been formed for the purposes of carrying on all kinds of Insurance Business permissible under the Insurance Act, 1938 and with the objects set out in the Memorandum of Association, a copy of which is annexed hereto.

SCOPE AND PROSPECTS

Insurance Companies established in India for the purpose of carrying on General Insurance Business have made considerable progress in the past two decades but there is still ample scope for new companies. The net premium income from Indian Business of all Insurance Companies transacting business in India in 1938 was Rs. 282.16 lakhs of which the share of Companies incorporated in India was 89.55 lakhs. In 1940, the total Indian premium income has risen to 360.30 lakhs and the Indian Companies shared a corresponding rise to Rs. 117.22 lakhs. During the last two years there has been considerable increase as well as intensification of the industrial activity in this country. We would particularly mention the Textile Industry, which, owing to improved prices both of yarn and piece goods, has been earning phenomenal profits. The necessity for covering large industrial units and factories by a policy of insurance against fire especially in war time has become increasingly apparent to all industrialists. It will be the aim of this Company to secure a fair share of this growing volume of business in the field of General Insurance. Investors are aware that the shares of General Insurance Companies begin to give a return on the investment far earlier than the shares of Life Insurance Companies for the reason that at the termination of the annual period of risk, a company doing general insurance business is able to make allocations and assess its distributable profits.

The shares of well-managed General Insurance Companies are looked upon as a *quasi-gilt-edge* investment and it is well known that institutions as well as individuals, who look for safety of their investments go in for the shares of Insurance Companies. The following table gives particulars of the paid-up and market values of and dividends on the shares of some of the established Insurance Companies.

Name of Company	Year of establishment	Dividend per cent	Paid up per share	Market value
New India ..	1919	10	15	75½
Jupiter ..	1919	5	15	24¼
Vulcan ..	1919	5	10	17⅛
Triton ..	1887	40	25	260
Concord ..	1931	15	2½	17¾
Vanguard ..	1936	12½	5	9¾

From the above table, it would be observed that not only old Companies, but also those incorporated as recently as 1936 have been paying handsome dividends. The popularity of the shares is testified to by the substantial capital appreciation in the shares of General Insurance Companies.

DIRECTORS' QUALIFICATION AND REMUNERATION

The qualification of a shareholders' Director other than the first Directors and the Ex-officio and nominated Directors shall be holding whether solely or jointly of shares of the Company of the nominal value of Rs. 10,000. The qualification of a Policyholders' Director shall be those prescribed under Sections 48 and 114 of the Insurance Act, 1938, and holding of policies of Life Insurance issued by the Company.

The remuneration of a Director shall be such amount not exceeding Rs. 100 for every meeting of the Board or Committee of the Board attended by him. In addition, the Directors may be paid such remuneration either by a fixed sum or by way of percentage on the profits or otherwise as the Company shall, in General Meeting, from time to time decide and such remuneration shall be divided among the Directors in such proportion and manner as the Directors may from time to time determine. In addition to the remuneration, the Directors may allow and pay to any Director who shall travel for purposes of attending a meeting of the Board such sum as they may consider reasonable for his travelling, hotel and other expenses.

NATURE AND EXTENT OF DIRECTOR'S INTEREST

Mr. S. Parthasarathy and Mr. Ramanlal Lallubhai are interested as Managing Directors of the Company for Madras and Bombay areas respectively. No other Director is interested in the promotion of Company except to the extent of his holding shares in the Company and to the remuneration he is entitled to under the Articles of Association.

MANAGEMENT OF THE COMPANY

The Articles of Association of the Company make the following provision regarding the management of the Company. "The Directors may subject to any statutory provisions relating thereto from time to time appoint one or more of their body to be Managing Directors, for such period, at such remuneration and upon such terms as to the duties to be performed, the powers to be exercised and all other matters as they think fit, but so that no Managing Director shall be invested with any powers or entrusted with any duties which the Directors themselves could not have exercised or performed. The remuneration of a Managing Director's may be by way of salary or commission or participation in profits, or by any or all of those modes. A Managing Director shall not, while he continues to hold that office, be subject to retirement by rotation, and he shall not be taken into account in determining the rotation of retirement of Directors, but he shall unless otherwise provided in the agreement with him be subject to the provisions as to resignation and removal as the other Directors of the Company and if he ceases to hold the office of Director, he shall, *ipso facto* and immediately, cease to be a Managing Director."

In accordance with these provisions, the Directors have appointed two out of their number as Managing Directors, viz., Messrs. S. Parthasarathy and Ramanlal Lallubhai, for a period of five years. The terms as to their remuneration are for the time being a monthly allowance of Rs. 750 to each of the two Managing Directors, from the date on which the Company first begings to transact business.

MINIMUM SUBSCRIPTION

The minimum subscription upon which the Directors may proceed to allotment is 75,000 shares of Rs. 10 each. The Directors are of opinion that the same is quite adequate to provide for the deposits to be made under the Insurance Act, 1938 for the payment of Preliminary Expenses, Brokerage for subscription of shares, and for working Capital.

BROKERAGE AND COMMISSION

No part of the present issue has been or is proposed to be under-written. The articles provide, however, for commission being paid in respect of subscriptions procured not exceeding 3% of the nominal value of the shares in the event of the shares being under-written. Brokerage at the rate of annas four per share will be paid in respect of all applications bearing the seal of all recognised brokers and bankers on shares allotted.

PROMOTION MONEY

No promotion money has been or is intended to be paid to anyone.

PRELIMINARY EXPENSES

The preliminary expenses incurred in connection with the registration and formation of the Company exclusive of brokerage and commission on shares, are expected to amount to Rs. 10,000 and these will be borne by the Company.

APPLICATION FOR SHARES

Application for shares should be made on the form accompanying the Prospectus and should be forwarded along with the amount of money payable on application to the Registered Office of the Company at No. 120, Armenian Street, G. T., Madras, to the Office of the Company's Brokers, Messrs. Swastik & Co., 106, Armenian Street, G. T., Madras, Messrs. Amritlal Popatbhai & Co., Agha Khan Buildings, Dalal Street, Fort, Bombay, or to any one of the offices of the Company's Bankers at their Madras and Bombay Offices. Where no allotment is made, the deposit of application money will be returned in full; where the number of shares allotted is less than the number of shares applied for, the balance of deposit will be applied towards the amount payable on allotment and the balance, if any, thereafter will be returned to the applicant.

CERTIFICATE OF SHARES

The share certificates will be ready within three months after the date of allotment.

VOTING

According to the Articles, subject to any special rights or restrictions for the time being attaching to any special class of shares, at each General Meeting at which he is entitled to be present and vote, every member present in person shall, on a show of hands, have one vote only and every member present in person or by proxy shall, on a poll, have one vote for every share of any class held by him.

TRANSFER OF SHARES

The Articles provide that the Directors may refuse to register any transfer of shares (whether fully paid-up or not) to a person of whom they do not approve and may also decline to register any transfer of shares on which the Company has a lien.

MEMORANDUM AND ARTICLES OF ASSOCIATION

The Memorandum and Articles of Association of the Company may be inspected at the Registered Office of the Company during business hours and also at the offices of the Company's Brokers and Bankers.

Copies of the prospectus and forms of application can be had at the Regitsered Office of the Company, the Offices of the Company's Brokers in Madras and Bombay, and at the Offices of the Company's Bankers at Madras, Bombay and Trichinopoly.

W. G. GROUNDWATER, General Manager

A TRAIN 186 miles long

THAT'S a lot of train—but India's Railways carry a lot of passengers—17 lakhs every day—and it would actually require a train 186 miles long to accommodate them all at once.

Think of it, no less than 3,965 trains running daily carrying the equivalent of the population of Calcutta swiftly and safely to their destination. And even that is not the Railways' first task in war time.

Vital supplies have to be hurried across India—arms for our soldiers, raw materials for our factories. 20,546 wagons are loaded every day.

This is the job India's Railways are doing for India—for YOU! Help them all you can—by cutting out unnecessary travel.

THE RAILWAYS HAVE A JOB TO DO

make way for munitions

BUILD THE NATIONAL WAR FRONT

166

He claimed that there was no party conflict as regards native affairs. He urged that whites would ask for permission to buy land in Native areas if natives were allowed to buy land in White areas. He urged that grants totalling £6 million in five years had provided additional land for native settlement and development. Measures to improve agriculture and stockbreeding formed part of the plan for native development. Loans for housing and grants for educational advance appeared enough to the Minister who argued that the principle of segregation must stand. The Native representatives naturally raised the question of urban settlement in relation to the development of secondary industry in the Union. The Nationalists asked for a thorough working out of the sound policy of segregation when the Native representatives asked that the Government should tolerate permanent settlement in towns. That the Natives will be forced to go back to the Reserves is only to be inferred from the Minister's statement. The enquiry into Indian penetration, the steps taken since to prove its existence and the pegging Bill may be viewed as the counterpart of the policy pursued towards the natives by the Union Government at present.

Books For China

More books in spite of fewer copies have been published in Britain in the war period. Rationing of paper has not checked the publishing industry from responding to the call for exports. The book trade has certainly shown great recovery since the blitz. If Britain can show a vigorous publishing industry, able to sell its books to the whole world, it may be due to the retention of export markets. Free China has not the same advantage, yet the publishing business there is thriving. According to a note in the China Information bulletin, five cities in Free China contain 382 publishing enterprises and bookstores. The aggregate paid-up capital of $38,447,450 does not give a high average per firm but the three big firms in Chungking, one with a capital of $5 million show that big enterprises are developing. In the far west Siam has acquired importance with 48 publishing firms. The publishing business enjoys the assistance of the Government banks. An average of 249 books per month between January and October indicates the growth of publishing in China. The largest number of new books was issued from Chungking. The Chung Chung Company, a government enterprise claimed the largest number of new books in 1942 and the Independent Publishing Company was also prominent: The World Publishing Company concentrated on textbooks for primary schools while the Chung Chung Company came first in regard to textbooks for middle schools. The publishing activity necessarily reflects the development of education. Chungking's publishers require 13,000 reams of paper in a month and native production in two districts near the capital is reported to be sufficient for the many publishers. Of the provincial capitals Kunming has 26 book stores with a total capital of over $5.94 million. Its output of new books is not known though Sian's 48 firms with a capital of $9.19 millions published 20 books in a month. The dependence on Government for capital etc. today does not detract from the important position won by publishers in China. The trek of the universities has helped publishing to develop rapidly.

Clive Street Gossip

"I must have liberty
Withal, as large a charter as the wind
To blow on whom I please."
—(As You Like it.)

A correspondent, who has been carefully following these columns during the last three, four weeks, writes to me to say that they often leave him wondering whether it was a new economics or a new philosophy that I was writing about. "I do not miss the relevance", he says, "of subjective and objective value to a consideration of the fundamentals of economic thought. But I would like to know what concrete use you are going to make of these more or less philosophical discourses in your construction of a new economics". Such impatience on the part of the reader is no surprise to me. I had counted on it, though it was more than I could do to prevent its manifestation by cutting short the enquiry into the nature of economic value. For, the essence of the new economics lies in the fact that economic value will no longer be the product merely of stingy nature and selfish man. When nature relents and man is enlightened, the satisfaction of the material requisites of human wellbeing takes on an altogether new complexion. Men, acting as social units and on an environment which science has rendered more amenable to human control, are able to will the good of society and of individuals alike in a way that none could dream of even twenty, thirty years ago. In other words the social will and its potentialities as a factor in organisation come into the picture of economic life as we have known it till now as an altogether new factor.

* * * * *

The nature of "value" as the subject matter of economic science is thus substantially altered. The most direct effect of this change is that it is not alone the plans and resources of individuals acting as entrepreneurs and industrial magnates that will determine the supply side of each market, but society as such whose powers of organisation are of a different order of magnitude from those of individuals. Likewise, on the demand side, the power to consume will not be dependent on the necessarily slow progress which alone the purchasing power of the masses can make in conditions in which wages are both a part of costs, which have to be cut, and a main channel of the general purchasing power which has to be amplified. Low costs of production and expansion of consumptive demand are the two aims whose incompatibility, has so far been a well-nigh insuperable stumbling block to economic progress. The economic system has been torn between the rival claims of low costs and larger consumptive capacity. Progress in these conditions is possible only with the aid of extraneous factors, such as foreign markets, which are weak enough to be exploited, and sudden increases in technical efficiency which enable a reduction in the cost per unit of output in the face of increase in wages. But these extraneous factors do not altogether eliminate the conflict between wages as an element in costs and wages as the main channel which feeds the pool of general purchasing power. What the social will can do is to minimise this conflict by ensuring the expansion of consumptive demand in ways which are not open to private employers.

* * * *

It is obvious that it is only individualistic societies that need to look at the problem as one of minimising the conflict between these two aspects of wages. A communistic or socialistic society will, however, make a start with the dissociation of the problem of distribution from the problem of production. Production would be determined by pre-conceived standards of consumption. At any rate, a communistic society would refuse to recognise wages as an element in costs and would insist that a reduction in the costs of production mean, no more than higher efficiency in the utilisation of raw material and of the manhours put in the factory. It should not be different with an individualistic economy; but the attempt to keep the equilibrial nature of value must be continued, so long as a community refuses for any reason to accept communism. The equilibrial nature of value is bound up with private competition. And private enterprise and competition are the only alternative to socialism. What individual nations can, however, do is to delimit the spheres in which private competition will be continued and also to narrow the range within which the forces of equilibrium will operate.

* * * *

It will be seen from what I have said that there is nothing in the new economics to suggest that all nations will be compelled to reject the individualistic and competitive basis of economic life. On the other hand, the concept of value as one determined by the social will in addition to the familiar forces of the free market is more appropriate to an individualistic economy of the post-war period than to a wholly or predominantly communistic economy. It is in conditions of private enterprise that the operation of the economic consciousness of human societies will be more interesting and, in that sense, more illuminating. What the social will does in such conditions is to insist that certain values whose realisation the objective conditions of life permit, shall not be neglected merely because private enterprise with its incentives of private profit cannot see its way to realise them. A social good for the realisation of which State initiative is necessary is not necessarily uneconomic.

Economic life, as we have known it in the heyday of laissez-faire, has innumerable instances of such values. Indeed, the notion of value as an emergence of the motives of private profit and private enterprise is altogether ideal and has no close correspondence with the facts of life. We must remember that the distinction between economic values and political or other non-economic values is illogical and untenable. All values that are gauged in terms of measurable effort and material utilised must rank alike. There is really no intrinsic difference between State expenditure on police protection and the wages of the watchman for your fruitgarden. It is interesting to speculate on the cost to the consumer of police protection in a community so rabidly individualistic as to insist that police protection should be left to private enterprise. There are undoubtedly certain values of life which are certainly economic and whose cost to the consumer necessarily varies with the degree of social organisation and social purposiveness. And there is no warrant for assuming that the range of these values is limited by our own arbitrary notions of what is political and what is economic. If law and order is historically the first to be recognised as a value which every human society ought to exert itself as such to realise, it is not difficult to understand or explain the phenomenon. And it is wrong to deduce from this fact that there is a natural and logical distinction between values which the State should seek directly to realise and values which should be thrown into the vortex of all the forces of private competition.

* * * *

As I said already, economic life even in the heyday of laissez faire has numerous instances of such values. If the provision of police protection and law and order is the earliest, State expenditure on public health and education is the most illuminating instance of this inevitable advent of the social will in the sphere of economic value. Pure water is a free good in all modern cities, though its provision entails enormous expenditure for the municipalities. The amenities which the State provides for the private citizen have only to change their character from negative to positive for us to realise that in the ordering of economic life the State is not an apologetic or bullying intruder but a factor that inheres in the economic life of a community and is therefore there on its own right. The provision of standard cloth in India for the masses in this period of the war is an instance of the change from the negative to positive. These instances are bound to multiply in the post-war period. Whatever the lines on which the State may seek to order economic life, it is certain that the old idea of the State holding the ring for private competitors and for employers and employees will be completely discarded.

* * * * *

The abandonment of this idea does not imply that every State must go the whole-hog with communism. For how much of the responsibility for the economic fortunes of the individual the State can take on itself depends, on the one hand, on the attitude of the individuals, particularly the ruling classes, and on the other, on the administrative capacities of the machinery of government, broadly considered. Economic problems in any country and, one might even say, at any time, are in the last resort of an administrative kind. A community which frankly accepts communism may find itself compelled by administrative considerations to compromise seriously communistic principles. Likewise, an individualistic, but broadly democratic, society will feel called upon to effect wide and numerous breaches in the walls of laissez-faire. Given a general acceptance of the view, that no civilised society can be indifferent to the economic hardships of any section of its members, given also economic resources which enable this kind of sympathy to become *something more* than a sloppy or complacent sentimentality, the so-called differences in social ideology, which have divided progressive-minded groups into warring camps, will be bridged to a great extent by administrative requirements and by the manifestations of the normal psychology of the average individual. In the post-war period, one may be certain that Stalin's Russia and Roosevelt's America will find themselves much nearer than either would have thought it possible. It is this fact that gives the new economics and the new concept of value a special importance. I shall examine next week the parallel changes in the concept of "capital" before I pass on to discuss how the operative part of the new economics will work in the conditions of the post-war period.

* * *

An event of the week, at once enjoyable and momentous, is the opening of the United Commercial Bank, which was performed on Monday last by Mr. G. D. Birla. The constitution of a new bank under the aegis of Mr. Birla supplies the solution to a long-standing riddle of the Indian business world, that Mr. G. D. Birla who would no doubt be a coveted member of the Board of any Bank, had so long studiously stood aloof from this sphere. Happy in its presiding deity, the Bank is lucky in having Mr. B. T. Thakur as its executive head. Mr. Thakur is steeped in those traditions of sound and go-ahead banking which have made Sir Sorabji Pochkhanawalla's name an illustrious one in the annals of Indian banking. It is quite understandable that Mr. Thakur must have for some time found his role in the Central Bank too much of a minor one. A new institution, with such inspiration behind it as Mr. Birla can give it, should offer the best scope that Mr. Thakur could wish for. Monday's function was well

IT'S A FACT—
that more than 90% of India's teeming millions never save a rupee of their earnings. Money borrowed at fantastic interest cripples them financially for life. An account with the Palai Central Bank safeguards you from debt and worry—it puts success within your grasp.

Palai Central Bank Ltd.
(Incorporated in Travancore with Liability of Members Limited)
Palai. Travancore.

attended, which is no more than one would expect from the status of those who sponsor the new institution.

* * * *

Important business interests of Madras, Bombay and Ahmedabad have combined to launch the Prithvi Insurance Company Limited. The prospectus published today shows that the old reproach that fire and general insurance in India is left largely to foreign concerns, will not have justification. The new company starts with great advantages in regard to connections and management. Its managing Directors have more than professional skill at command. That Bombay is more than formally associated with this company will not be missed by those who look at the reassuring record of many other Indian insurance concerns. The shares of existing companies stand at a high premium. Proof of popularity with investors generally is provided also by the regularity of dividends, implying in turn the steady growth of underwriting profits in every case. The offer of shares at par must impress all investors who are aware that bank and insurance shares enjoy an exceptional position. Compulsory insurance of stocks and factories may not offer scope for profit, but the position of agents under the Government scheme will probably help companies to get a full share of all other business available. The Prithvi Insurance Company is not leaving out life insurance. It is perhaps the first, large composite company formed after the introduction of the new Insurance Act, and its prospectus acquires additional importance from being one with Managing Directors on monthly allowances that are in line with the scale of salaries in official life. For Mr. Parthasarathy, successful by heredity, is going to give the new Company much. The prospectus while indicating freely that a new company with a strong board can count on success from the outset suggests that the appeal to the investor in this case need not be indirect. The Company's ability to earn profits from the general branch for paying dividends from an early stage will not depend on life business but on its marine and other business. There are important industrialists behind this flotation and the rich administrative experience of the Chairman, Sir N. Gopalaswami Iyyangar, is a guarantee of efficient and careful management while Prithvi Insurance Company is offering only 89,000 ordinary shares at present. They will be fully paid up from the start; and not many will overlook the consideration that local support has been secured in due proportion before the appearance of the prospectus. On the basis of that alone, it is possible to say that the Rs. 10 shares are likely to be snapped up by all markets where the importance of outstanding business connections and the brighter prospects for Indian insurance concerns are highly important considerations. The reasoned estimate of prospects does not indicate fully the planting, mill chemical and other interests associated with the Prithvi. Their success in various fields of business spells success for the company promoted by them. Their own record must influence the fortunes of the new company.

* * *

An increase in the number of branches in 1942 is not the only factor in the progress reported by the Punjab National Bank. The Bank's liquid assets in the latest balance-sheet stand at over Rs. 11.21 crores. As a very old and strong bank, the increase in bank deposits to the total at the end of December of Rs. 15.46 crores indicates real progress, but more important, in the view of many, is the moderate ratio of Advances to Deposits as well as Investments in the balancesheet. Bills almost exceptionally make a very good showing. The Punjab National Bank's report refers to a large addition to the reserve fund. The paid-up capital now shown is Rs. 31.53 lakhs and the Reserve fund is Rs. 20 lakhs. The cash ratio is not so large as that of other Banks but the growth of deposits by Rs. 3½ crores nearly in a single year is obviously governed by several other factors. The dividend for the year is 6 percent tax-free and the large increase in the carry-forward is not so important as the ratio of profit to total working funds in the half-year. The Punjab National Bank's paid-up capital has obviously increased in recent years, but its real growth is still a matter of deposits increasing at a remarkable rate to judge by the 1942 balancesheet. The emergence of rivals has not influenced the very considerable improvement in funds and business to which the last report testifies. The growth of the Big Five in 1942 is certainly reflected in the Punjab National Bank's report and accounts in ample measure. The circumstances favouring further expansion remain and even more heady increase in deposits and investments alike seems certain in the light of the balancesheet changes described.

"EAVESDROPPER"

(Continued from page 835)

have receded. It there are discussions of what the plans aim at and will secure in the future, there is little to suggest that an agreement is in the making. Congress has to be won round to the U. S. administration's view of various matters, and the late discussion of the possible effects of an agreement on the level of interest rates only proves that few trouble themselves about what will be done. The retention of controls is assumed to be inevitable and the function of gold is subsidiary to assume that a return to gold is impossible; is to assume that gold will not be cheaper in the future. Gold prices in India are still higher than anywhere else. But the trend is irregular again in spite of the bad news from Arakan. The U.S.A. is leaving currency and exchange aside for some time because more important things, e.g., Martinique may claim the Government's attention. The delay imparts a degree of uncertainty but there is nothing between Wall Street's recognition of the existence of inflation in India and the bullion boom. For most people bullion is like cotton only the supply is more irregular and the buying more capricious. The swift fall in prices has made it clear that an agreement or delay in its making between two foreign governments is not going to affect the markets' outlook this year. Rejection of the President's proposals to limit salaries to $25,000 per annum does not mean that the rich can have their own way. The U. S. Government stands committed to a unified policy, and the ability to keep the Allies with her remains unaffected by the President's reverses over appointments and elections. The U. S. Treasury has indicated that international agreement is necessary; the details remain to be settled and what follows the discussion over the renewal for two years of the trade treaty programme will be more important than the estimates of differences in objects or administration between the plans of Britain and the U.S.A. Both want better conditions and more trade. That is always more important than the methods of control employed.

marked for E. P. T. and income-taxes, but remains in the hands of the tax-payers is something like Rs. 100 crores. We consider that the Government will be justified in introducing a new procedure calling upon assessees to pay on account amounts approximately equivalent to the tax; this payment must be made within a few weeks after the closing of the accounting year, the amount paid on account being adjusted towards the amount finally decided upon as tax. If this procedure is adopted, the Government can count upon securing, in a short space of time, a considerable sum which may come to exceed Rs. 100 crores. Receipt of this vast amount would make all the difference to Government's ways and means position.

With the present tension between the Government and the people and with the lack of readiness on the part of the general population to give loyal and whole-hearted support to such financial policies and operations as are proposed by the Government as it is constituted to-day, the reduction in the purchasing power of the masses through such means as savings movements and defence loans cannot be effected as smoothly or as effectively in this country as is possible in Britain. In such circumstances, the suggestion we have made seems to be most appropriate for existing conditions in this country.

Our opposition to the restriction of dividends must not be construed as support of inflated war profits. Far from it. As we have stated in the last issue, it is grossly unfair to ask the shareholders to undergo a sacrifice while the more powerful and the more wealthy elements are left as they are. In our view, the shareholders represent the masses and the managing agents and the company taken as a corporation may be said to be the classes. It is these classes that ought to bear the burden. The earlier payment of E. P. T. and income-taxes is suggested by us in the light of the position that we have thus taken up. Consistent with this position, we shall not be opposed to an increase in E. P. T., provided the administration of the tax is imbued with considerateness for the special claims that may be urged in exceptional cases. In simple terms, we are not against onerous taxes; they are necessary and justified. But we are against taxes harshly administered and inconsiderately inflicted; there is no justification or necessity for harshness.

We may be told that the proposal we have made for the earlier payment of amounts provided for taxes would precipitate alarming stringency in the money market. There is no reason to apprehend stringency of this kind. Let us elucidate our reasons by examining the position as it will develop in actual terms. What will happen if the Government give effect to our proposal through an ordinance? All the assessees will find that, say, within two months, they have to pay up amounts roughly equivalent to the taxes payable for the calendar year 1942 or the fiscal year 1942-43. The assessees who will be affected by this ordinance may be broadly divided under three heads: (a) joint stock companies, (b) private business firms and businessmen and (c) professional people. Those coming under (c) are comparatively few and the total amount involved is comparatively small. So far as (a) is concerned, the fact to be emphasised here is that the accounts for the year in question have been made up only on the basis of the necessary amount being set apart for the estimated tax liability. There should, therefore, be no special difficulty caused in the case of joint stock companies. So far as private business firms and businessmen are concerned, so many of them have shared in the colossal war prosperity and should be able to meet this liability without much difficulty. So, from the point of view of ability to pay as required, we need not apprehend any great dislocation.

That such large payments are to be made at relatively short noitce by companies or firms or individuals means a diversion from the bank balances maintained by these parties to the cash balances of the Government. So large a drain on deposits with commercial banks may cause a squeeze. But it should be easy for the government to provide correctives and palliatives. To the extent that government balances are benefited by these tax payments, the Government will not require to raise large sums in the form of treasury bills.

The present outstandings of treasury bills in the hands of the public are about Rs. 120 crores. If, in the course of the next three months, the Government are able to collect Rs. 100 crores from Excess Profits Tax and income-tax, the cash position of the Central Treasury will be so comfortable as to permit of treasury bills outstandings being brought down to something like Rs. 40 crores. It will mean a reduction of the weekly offer of tender bills to about Rs. 3 crores. It should result in treasury bill maturities far exceeding fresh issues of treasury bills. The resultant position will be that, whereas banking circles will suffer a drain of funds on account of payments towards taxes, banking circles will also be flooded with sums released from treasury bill maturities. It should be possible to maintain and continue to maintain the cheap money policy which has been the declared policy of the British Government as well as of the Indian Government. All that will happen is that, to the extent of banks meeting drafts on deposits, they will be investing less in treasury bills. Thus will be maintained complete equilibrium on the basis of cheap money.

The situation that will thus arise in the money market will be an opportunity for Mr. C. D. Deshmukh to provide an impressive testimony of his mastery in modern monetary technique. It will also be his task to ensure the continuance of the steady conditions that have prevailed in the giltedged market. The two cardinal points of official financial policy must be: Reduction in treasury bills in accordance with the volume of tax receipts; and sales of defence loans and rupee counterparts whenever possible together with open market operations when necessary for the maintenance of a firm giltedged outlook.

We might finally consider the effect of our proposal on the stock exchanges. The immediate effect may be in the nature of a somewhat rude shock. But it must be remembered that stock exchange circles have already been canvassing the possibility of an ordinance for the restriction of dividends and an ordinance for the enhancement of the E. P. T. If we may say so, the markets are already preparing themselves for adverse news. This expectation means that Government's announcement of a proposal on the lines suggested by us will not be a bolt from the blue. But the really important consideration in this regard is that the earlier payment of the estimated tax liability can, in no sense, be regarded as a bear factor by the investor. Nor can even the raising of the E. P. T. be considered as a bear factor. The E. P. T. in Britain is one hundred per cent; yet companies are making good profits and share prices are fully maintained. The real thing about the E. P. T. is not the rate of the tax, but the spirit in which it is administered. We have, again and again, emphasised the necessity for tact and considerateness in the administration of E. P. T. and income-tax. Provided this is assured, some manner of increase in the E. P. T. need not be dreaded at all. It is also important to remember that this war has accustomed markets to shocks of various kinds. It will be true to say that the markets are now shock-proof. This is mainly because industries in India are doing exceptionally well; the economic situation in India is fundamentally sound; and the prospects for Indian trade and industry in the immediate future as well as in the post-war years, are full of promise. In such circumstances, the correct attitude is one of gratitude that things are as good as they are.

The exchange market has been dull, with hardly any business passing.

Banks are sellers of T.T. at 1s. 5 31/32d., for London Ready to six months forward.

Banks have been buyers of three months D. A. bills on London at 1s. 6 9/32d. and four months at 1s. 6 11/32d.

Banks are buyers of T.T. New York Ready at Rs. 329½.

Banks are sellers of T.T. New York Ready at Rs. 332¼.

Inter-bank call money is quoting at ½ per cent lenders.

Gateway of India

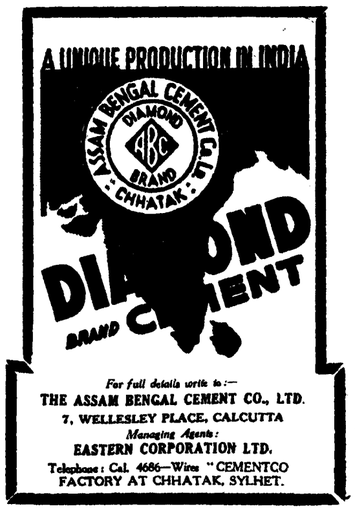
(*From Our Correspondent*).

Bombay, May 12.

DR. AMBEDKAR, Labour Member, has been very active on the platforms here during the week. At a public meeting convened by the Scheduled Classes Federation on May 9, he deplored the "utter political bankruptcy" of the Congress and its High Command. His attack was mostly directed against Mahatma Gandhi, though he had no kind words for Mr. Jinnah. Both of them should retire from active politics before any move could be made for lifting Congress from the quagmire. His comparison of Mahatma Gandhi's career with those of Tilak, Ranade and Gokhale has failed in the essential object of convincing people that Mahatma Gandhi has been a failure. It is also curious that the Labour Member should have raked up the Cripps offer and held forth on its rejection as the clinching argument against Congress policy, when the Congress stand has been justified to the satisfaction of both Indian and foreign public opinion. An inkling of what Dr. Ambedkar's own contribution to help things on will be when the leaders have quit the stage, was provided in the concluding part of his address. There will be three factions instead of two, with this difference, that two of them will lack effective leadership. The doctor's conception of unity is amusing. The Scheduled Classes have been urged to organise and unite so that Hindus and Muslims might not work out an arrangement for political advance. Obviously, it is by obstructing the other parties that the Scheduled Classes are to progress under the Labour Member's able leadership.

No less interesting was the doctor's speech on the Indian Labour Movement made at a party given to him by the Presidency Committee of the Indian Labour Federation. Split and factions among labour leaders and the starting of separate labour organisations are very much to be regretted as the Labour Member said, and unity is essential. But his advice to the working class movement, to aim at the establishment of a Labour Government and not to run unions for petitioning employers for redress of grievances cannot be put down as altruistic or healthy from the Labour point of view. It may be presumed that a political wing to labour will give Dr. Ambedkar further opportunities for aggrandisement. With Dr. Ambedkar as the only reliable leader, the future of labour in India cannot be called bright.

The food situation in Hyderabad has deteriorated to such an extent that prompt and drastic measures are considered necessary if the position is not to worsen. The increasing activity of hoarders and profiteers in foodgrains has proved conclusively that the present policy of non-interference pursued by the Nizam's Government is fraught with the utmost peril to the economic life of the State. At a mass meeting of the citizens of Hyderabad convened by the Food Relief Association presided over by Nawab Kamal Yar Jung Bahadur, a number of resolutions were passed unanimously. The Nizam's Government has been requested to freeze all food stocks and prohibit their movement. It was further suggested that, if hoarding and profiteering continued unabated after that, the Government should requisition all stocks. According to the speakers the Government grain shops were inadequate and their management left much to be desired. It was suggested that the number of shops should be increased and steps taken to secure more efficient management. Of the measures advocated at the meeting, the introduction of rationing plus price control and the formation of a Food Council deserve mention. A real beginning may be made with the immediate formation of a Food Council consisting of representatives of cultivators, consumers, traders and government departments.



Speaking at the annual meeting of the Bombay Branch of the Indian Roads and Transport Development Association on Friday last, the Chairman Mr. V. F. Noel Paton gave it as his considered opinion that the prospects of collaboration between road and rail were now more favourable than they had been at any time in the past. He urged that the great need of India is the development of transport. He asked for "roads and more roads," and recognised as a happy omen the interest evinced of late by the Government, the public and the Press in the subject. The numerous developments suggestive of a rise in the standard of living in the postwar period presupposed the provision of more and better roads. Elucidating his view that the money spent on roads would eventually prove to be money well-spent, Mr. Paton pointed out that huge sums would be lost and wasted if, at the end of the war, there were not enough roads to carry the available transport and employ the available trained personnel. The State would even be obliged to keep the drivers in the services until work could be found for them and the vehicles would deteriorate in idleness. It is generally recognised that road construction should play an important part in postwar industrial reconstruction. It is the Association's declared object to advance the cause of road development.

A report of the findings of the Committee appointed by the Government of Bombay to consider ways and means of improving the condition of the Backward Classes has just been released. The Committee's recommendations cover a wide field such as provision of medical facilities through extension on a much greater scale of the scheme of subsidised medical practitioners, vigorous pushing of improvements in agriculture and introduction of industries specially designed to benefit the Backward Classes, improvement of their earning capacity, and basic schemes of education. It will be remembered that Rs. 25 lakhs has been earmarked for expenditure on the work connected with Backward Classes for a period of five years from the Special Development Fund. The Committee has since recommended that ameliorative work should be carried on, even after the five-year period and that for this purpose a recurring provision of Rs. 5 lakhs should be made in the general Budget of the Provincial Government. The report points out that care should be taken by the Government to ensure that all measures taken for amelioration of Backward Classes really benefit them and no abuse occurs. This is best achieved by the Government revising the list of the three sections of Backward Classes at the earliest opportunity and by introducing a system of periodical revision of the lists.

The Bombay University will open in July next a department for imparting a sound military education to students desirous of a military career. This Department of Military Studies is to be housed, as at present arranged, in the southern wing of the University buildings. Annual expenditure on the department is estimated at Rs. 30,000. The need for such specialised training can hardly be gainsaid and the Bombay University has the pioneer's credit. The general criticism about the various University Training Corps so far has been that the training provided is of little use in army life. Such training is not that given by a Military Academy at all. It is hoped that the Bombay University's plans will be more comprehensive and designed to create an interest in military affairs. It appears that the services of an experienced military officer, recommended by H. E. the Commander-in-Chief are being obtained for the post of Director of Studies in the new department. Selected officers of the U. T. C. will assist him by giving occasional lectures to students. Whether the University will have a diploma of its own or will prepare students for Army certificates "A" and "B" examinations has not been indicated yet. It is known, however, that the scheme has already been approved by the Senate of the University.

In view of the imperative need to increase the production of foodgrains, it has become necessary, says a Press Note, to conserve within the province all available supplies of important manures like fishmeal, fish guano, bone superphosphate and bone meal. Government has, therefore, decided to allow exports of these manures from the Province only on application for permits and issue thereof.

The Governor of Bombay was away on a three day tour of Nasik and the East and West Khandesh districts. The tour was wholly informal and conducted in a homely atmosphere. His Excellency described it as an "educational tour." He first visited Parola, a Taluka headquarters in East Khandesh, had an informal talk with the Municipal Board's members and noted down their request for a water supply scheme and road construction. The offices of the Collectors of East and West Khandesh were also visited. He had talks with the Patels of villages on the way. Sir John Colville's anxiety to get into close touch with the administration in the districts and the simple arrangements of his tour has encouraged a feeling that Sir John will prove to be one of Bombay's most popular governors.

Jute and Jute Manufactures

(By Our Jute Correspondent)

Calcutta, May 13.

Both the jute and goods markets have been dull and lifeless. Even the stimulus of a further small Government order of 120 lakhs of yards of 7½ oz. Hessian cloth for the U.K., delivery June/Dec. failed to have any material effect and no serious attempt has been made by mills to purchase jute against it. The Indian Jute Mills Association stock figures show further increase and in order to facilitate their study we give below some extracts from the published figures:—

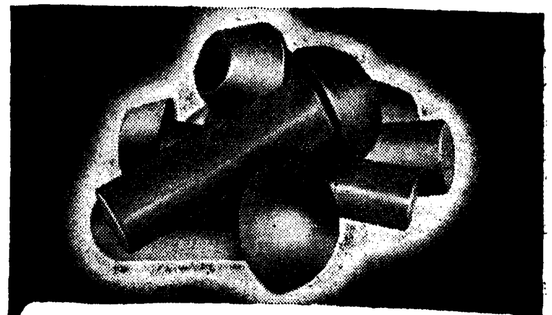
	April, 1942	March, 1943	April, 1943
Govt. Hessian and Sacking.	54,018	88,124	84,858
Commercial Hessian	64,489	58,188	66,276
Sacking ...	88,896	106,196	111,927
Commercial Total ...	152,885	164,815	178,203
Grand Total ...	206,848	252,489	262,361

It will readily be seen that the principal accumulations lie in Commercial Sacking and the trend upwards is also marked in the case of Commercial Hessians. Stocks on Government account are being slowly decreased but in view of the last Government order progress in this connection has been somewhat disappointing according to the trades expectations. An improvement in the shipping position has failed to materialise. The chief disquieting feature lies in the fact that although there has been overtrading in heavy goods, B. Twills particularly, ostensibly on the Punjab's account, owing to the breakdown in distribution these goods are not reaching interior markets where they are badly required. It is understood that in some of these markets prices above Calcutta parity are being paid by virtue of necessity but as soon as these stocks can be moved and distribution organised, a rapid decline in rates must be expected. Whilst present conditions prevail speculators are anxious to maintain the position to enable them to liquidate at top rates without committing themselves by increasing their stocks to any extent. Mills on the other hand find themselves unable to take advantage of the position and sell with any confidence owing to the tightness in the jute position with the narrow margins of profit which are now extent. They realise the folly of putting the jute market against themselves considering the small quantities of old crop that are available and the poor class of districts from where offers are mostly confined now. The weather generally continues to favour the new crop which is fortunate, considering the curtailed sowings. It would appear that mills are adopting a waiting policy allowing events to shape themselves. If transport facilities fail to keep up with their present production or jute supplies prove inadequate they will have to have recourse to the policy of shorter working hours but their main policy at the moment hinges on whether the U.S.A. decides to raise its ceiling rates or not. The bazaar have gambled on forcing them to do this but so far America has shown no sign of revising their ideas. The bazaar is showing the keenest interest to try and ascertain at what prices the recent Government order is being pegged, as they feel this would be a pointer to America's intentions.

The loose jute market has been completely inactive except for a few small purchases with Indian mills for Indian jat marks on the basis of Rs. 19/-, and Rs. 16/- for mids and bots. Later these prices were shaded and supervised jute was reported done at 4 annas less. Quotations have genefally been nominal but in the case of Indian sellers of district, Northern and Assam jute, who have shown more inclination to dispose of their stocks, quotations have declined fully 4 annas without finding buyers.

The pucca bale market has likewise been dull and inactive. The only business reported throughout the week has been the recent purchase of cuttings—N. C.'s at Rs. 48 and M. C.'s at Rs. 47; otherwise with no pressure to sell quotations have remained nominally unchanged at Rs. 96 firsts, Rs. 91 Lightnings, Rs. 86 Hearts, and Dundee Daisee at Rs. 93.

The hessian and gunny market has also been subject to little change in rates. Consumers have shown no interest and with no advance so far in ceiling rates in America the market is still pausing. Rumours of the fixing of better prices on recent Government orders has caused a small advance in rates to 21 and 26-14, ready 8 oz. and 10 oz. hessian at the close. The heavy goods market has been distinctly quiet all the week with only minor fluctuations in ready B. Twills. As we close speculators have come in and paid mills 70 for early May B. Twills. and 66 July/Sept. Shippers are content to look on and other heavy goods rates are mostly nominal.



THIS WEEKLY IS PRINTED

BY

DORCHESTER PRINTING WORKS

116, LOWER CIRCULAR ROAD,

CALCUTTA.

Rivets are being made all day and every day in our workshops, and our whole production goes into the building of India's navy, India's tanks and into the making of her many war requirements. They could not be put to better use, and each one is doing its job for Victory. When the great day comes when the world will be at peace once more, our workshops will be just as ready as before the war to fulfil civilian needs.

INDIAN STEEL & WIRE PRODUCTS LTD.
TATANAGAR

RAIL PASSENGERS

Despatch all large packages of luggage in the brake-van. Remove all old labels therefrom and fix fresh ones, giving name, address and destination before you start on a journey. Preferably, each box, bedding etc., should contain inside, on a separate piece of paper, information regarding your name, address and destination. If you do not do this, your luggage is liable to be lost.

YOU HAVE BEEN WARNED

JUTE

Calcutta, May 13.

THE raw jute market has been absolutely uninteresting during the past week with only a small amount of business done by mills. The easier tone of the hessian market, the increase in the rate of arrivals, the decision of the Indian Jute Mills Association to reduce the number of working hours to 54 hours per week with 10 per cent of the looms sealed as from May 17, 1943, and the reports from the mofussil districts that sowings are progressing favourably, have been mainly responsible for the easier tone of the markets. It is also reported that mills have in recent weeks completed their purchases for the season, and that the difficulty is only in regard to actual deliveries of jute. There is, therefore, a tendency to wait for some time to make fresh purchases. In the absence of any large enquiry, sellers have naturally been eager to do business at a slight discount in rates. In mofussil centres, however, holders are not very anxious to part with their jute and are still under the impression that as the season progresses, there will be a rise in prices for the raw material and, that with short supplies of the new crop, there will be no disparity in the prices between old and new crop supplies.

In the loose jute section, business passing has been on a smaller scale. Mills have not been very keen buyers and have actually bought only very small quantities. Indian Jat Middles and Bottoms were done at Rs. 19 and Rs. 16 respectively per maund and Cross bottoms at Rs. 14-8 per maund. Earlier in the week, Supervised Jat Middles and Bottoms were done at Rs. 19-4 and Rs. 16-4 maund.

In the pucca bales section, no business has been done for export, shippers keeping out of the market. Only a small amount of business has been reported in Dundee Daisee 2/3 for May shipment at Rs. 90 per bale. Mills are reported to have purchased Firsts at Rs. 95, Lightnings at Rs. 90 and Hearts at Rs. 85 per bale.

JUTE MANUFACTURES

Calcutta, May 13.

THE jute manufactures market has been quiet throughout the past week and the tone towards the close is definitely easier. In the absence of any fresh overseas business, sellers have been anxious to dispose of their holdings in spite of the decision of the Indian Jute Mills Association to reduce the number of working hours to 54 per week with 10 per cent of the looms sealed as from Monday next. The receipt of a fresh order from the United Kingdom for 1 crore and 2 lakhs yards of 7½ oz. hessian cloth, to be delivered in equal instalments between June and December, has not had any effect on the market. The local stock figures for the month of April, which are now available, show an increase in hessian cloth more than market expectations. 9 porters ready are quoting Rs. 20-14 for all positions, the lowest level being Rs. 20-12. 11 porters ready for May delivery were Rs. 26-14, June Rs. 26-15 and July-September Rs. 27. Most of the business reported during the week has been in 11 porters.

In the Heavy Goods section, no business of importance has been reported and quotations have been fluctuating within narrow limits. "B" twills for May delivery sold on the basis of Rs. 68-8, Liverpools Rs. 71 and Cornsacks Rs. 66-8.

As mills worked 60 hours per week throughout April, and shipments during that month did not show an increase over March figures, there has been an increase in local stocks of hessian cloth and bags on civil account, from 21.28 crores yards at the end of March to 24.38 crores yards at the end of April while stocks on military account are lower at 33.25 crores yards against 34.16 crores yards at the end of the previous month. Total hessian stocks, therefore, reveal an increase of 2.2 crores yards from 55.44 crore yards to 57.63 crore yards. Expressed in tonnage, the increase is from 137,761 to 142,112. Sacking stocks, cloth and bags, on civil account are 1.7 crores yards higher at 26.64 crores yards, while those, on military account, are slightly lower at 2.21 crores yards.

Production figures, available for the same month, show that the increase in local stocks has been due mainly to the higher level of production during April. Total production on account of hessian, civil account, was 14.7 crores yards against 12.7 crores yards and military account, 2.79 crores yards against 2.55 crores yards. Total production is thus 2.25 crore yards higher at 17.49 crores yards.

Sacking production on civil account is 15.45 crores yards against 14.68 crores yards and on military account 59 lakhs yards against 58 lakhs yards. Total production of sacking cloth is 78 lakhs yards higher at 16.05 crores yards. Total production at 120,459 tons shows an increase of 8,601 tons over the previous month against the increase in stocks of 10,022 tons. It can therefore be said that the offtake during the month of April has not been even enough to account for production at the level of March. The expectations of an improvement in the freight position with the placing of the American order have, therefore, been falsified.

Total reported stocks of manufactured goods exclusive of Government Orders.

GOLD

Calcutta, May 13.

AFTER remaining steady in the earlier days of the week under review, the gold market has turned easier during the last two days. Business passing has been on a definitely smaller scale. Speculative activity is entirely absent. There is a tendency to await further developments. Closing quotations are slightly higher than the lowest levels for the week. Gold Ready closed at Rs. 92-8 against Rs. 91-12, the lowest level for the week, and First Settlement at Rs. 92 against Rs. 91-6. Sovereigns are quoted Rs. 64-8. In the Calcutta market a further decline in prices has been recorded and there is considerable disparity between Bombay and Calcutta prices, Gold ready being sold at Rs. 89-12 and sovereigns Rs. 64-4.

SILVER

Calcutta, May 13.

SIMILAR conditions have been noticeable in the silver market also. There is a tendency to await the results of the negotiations for lease-lend silver and the action of the Government of India in regard to the disposal of such silver. Quotations are slightly lower on balance. Silver ready quoted Rs. 133-4 and Rs. 131 against Rs. 135-12 and Rs. 133-4 at the end of last week. There has been a further narrowing in the premium for ready over First Settlement.

COTTON

Calcutta, May 13.

STEADIER conditions were noticeable in the Bombay raw cotton market till Tuesday this week and a moderate rise in prices was recorded with a slightly greater volume of business passing. Karachi advices were firmer. The strength of the other markets also was helpful. Towards the close, however, there were rumours regarding the possibility of yarn and cloth prices being controlled the provocation evidently being the representation made by several prominent leaders to the Government of India for bringing about an immediate control of cloth and yarn prices so as to provide the consuming public with clothes at cheaper rates. The decline in prices, however, was negligible and most of the lost ground was recovered towards the close. Jharilla May quoted Rs. 586 and July Rs. 602-8 against Rs. 580 and Rs. 596 at the end of last week.

JARILLA COTTON:

May:—(6th) 574; (7th) 576-8; (10th) 582; (11th) 585; (12th) 586.
July:—(6th) 593-8; (7th) 594; (10th) 599; (11th) 602; (12th) 602-8.

PIECEGOODS

Calcutta, May 13.

IN spite of the higher level of prices in the piecegoods market, business passing has been on a larger scale and the reserve of buyers noticeable last week has been shortlived. It is now possible to place business with mills for near deliveries more freely, though there is no tendency on the part of manufacturers to discount rates. Bengal mills have again been busy and were able to account for most of the business done. Handlooms products have not been very much in favour owing to the recent steep rise in prices.

Stock Markets to-day and to-morrow

BALMER LAWRIE ACCOUNTS FOR 1942

In the early part of the week, the stock exchanges have been hesitant and diffident on account of the news from the Arakan front. In the latter part of the week, rumours of various kinds emanating from New Delhi have induced nervousness. The position in regard to the possibility of any adverse news like enhanced E. P. T. is examined in the money market article in the main number. The attention of the reader is invited to that discussion from which emerges the conclusion that the outlook for Indian industries continues to be bright, and investors in Indian industrials and other stocks have every cause to feel satisfied with their lot. I should like to discuss here questions regarding what has come to be called "political" news. It is true that news from the Arakan front is disappointing and even disquieting. But the news from North Africa has been most heartening. And, I consider, the news from Washington is even more heartening. There is great significance attached to the summoning of General Wavell to Washington. There is also much significance in General Stilwell having been in Washington for a number of weeks. There is no denying the fact that Washington is not happy over the allotment of a secondary place to the Pacific situation. The debacle in Arakan provides an opportunity to Washington to insist on a reconsideration of this decision. Madam Chiang-Kai-Shek is also in Washington; and she certainly wishes something to be done immediately in the Far East. In other words, it seems safe to predict that the outcome of the Washington discussions will be the launching of an offensive against Japan—an offensive which will no longer be half-hearted nor faint-hearted. I reckon that an announcement such as this will be the most heartening news for the Indian stock exchanges. One may also be sure that the clearing up of the Mediterranean and the opening of a second front possibly in the Balkans will now be only a matter of weeks. As for the Indian political situation, with the term of Lord Linlithgow drawing to a close and with Mr. Phillips and Madame Chiang-Kai-Shek in Washington ready and eager to press for a solution of the Indian deadlock, there is cause for hope that news in this regard will be favourable as a sequel to the Washington talks. Taken all in all, while the political news of the past fortnight has been adverse, we may now count on receiving more and more cheerful political news in the coming weeks.

* * * *

It will be remembered that only a few weeks back there was a sharp rise in the quotation for *Cawnpore Textiles* from Rs. 19 to Rs. 24 and subsequently to Rs. 31 on the reports that the Managing Agents might decide on the distribution of bonus shares to the shareholders. The accounts for the half-year ended March 31, 1943, now to hand, fully justify market expectations. There is a further substantial improvement in earnings. Besides the payment of the dividend of 10 annas per share, the directors have proposed to capitalise Rs. 7.5 lakhs out of the General Reserve by the issue of one fully paid-up bonus share for every share held which will rank equally for dividend with the existing shares as from April 1, 1943. The authorised capital of the company is to be increased from Rs. 7.5 lakhs to Rs. 30 lakhs.

* * * *

The net profit, before providing for taxation and depreciation, is the substantial sum of Rs. 25,26,773 against Rs. 13,80,689 for the previous six months and Rs. 9,13,231 for the corresponding period of 1941-42. The amount set aside for taxation and depreciation is unchanged at Rs. 1 lakh and the allocation to mortgage debenture Sinking Fund at Rs. 6,250. The transfer to General Reserve is very much higher at Rs. 3,98,901 against Rs. 99,490. As mentioned above, the dividend is to be maintained at 10 annas per share.

* * * *

It will be noted that, for the capitalisation of Rs. 7.5 lakhs out of reserves in order to create new shares to be distributed free to shareholders, a sum of nearly Rs. 4 lakhs is provided out of the last half-year's earnings. It can therefore be expected that there will not be any proportionate reduction in the amount of dividends on the increased capital, as a result of this bonus issue, and that, with the continuance of earnings at the present levels, in the absence of any restrictions regarding payment of dividends, it may even be possible for the Company to pay as much as 10 annas per share. On this assumption the shares at present quoting around Rs. 32-8 cum-rights cum-dividend can be said to yield over 8 per cent taxfree. Even if the dividend happens to be lower at 8 annas per share, the yield can be considered satisfactory.

* * * *

Balmer Lawrie & Company, Limited has been able to report another very satisfactory year's trading in 1942. But for the difficulty in regard to the Flour and Coal departments, it would perhaps have been possible to report a higher level of earnings. The net profit, before providing for taxation and depreciation, is Rs. 38,72,567 against Rs. 38,68,760 for the previous year. The amount set aside to depreciation is slightly higher at Rs. 87,379 (Rs. 68,184) while the provision for bad and doubtful debts is Rs. 30,000 (Rs. 25,202). The allocation to Stock Reserve is considerably lower at Rs. 50,000 (Rs. 1.75 lakhs) while the transfer to General Reserve is Rs. 1.5 lakhs (nil). On the last occasion the sum of Rs. 3.5 lakhs was written off on account of goodwill. As the entire sum of goodwill was written off last year with the transfer of Rs. 6.5 lakhs from the General Reserve, there has been no necessity for an allocation out of 1942 earnings on this account. As a result of the smaller transfers it has been possible to increase the dividends on both the ordinary and deferred shares by 5 per cent, the total distribution on the ordinary capital being 25 per cent and that on the deferred 20 per cent. The amount carried forward is Rs. 483,697 against Rs. 478,557 brought in.

* * * *

Nuddea Mills Company, Limited has nearly doubled its earnings in the half-year ended March, 1943, the net profit, before providing for taxation and depreciation being Rs. 20,47,600 against Rs. 11,58,676 for the previous six months. The higher level of earnings has been due to the large increase in sales from Rs. 59.65 lakhs to Rs. 73.54 lakhs. The amount set aside for depreciation is Rs. 175,406 (Rs. 176,634). The provision for taxation is higher at Rs. 12.1 lakhs (Rs. 6.5 lakhs). After the transfer of Rs. 1,33,447 to General Reserve it has been possible to increase, the dividend on ordinary shares to Rs. 3 per share from Rs. 2-8 per share. The balance carried forward is higher at Rs. 1,21,977 against Rs. 1,16,229 brought in. Around Rs. 95 the shares should be considered attractive as affording a return of more than 6 per cent tax-free.

(*Continued on page 873*)

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, May 14.

RATHER quiet conditions were noticeable till Wednesday this week and business passing was on a moderate scale. The encouraging effect of the successful end to the Tunisian campaign was offset by the depressing news from the Arakan front. Only the reports that the British Premier was at Washington and that General Wavell was also present during the discussions, had a slightly stimulating effect towards the close. However, rumours that there might be an increase in the rate of the Excess Profits Tax, and that an early announcement regarding the limitation or freezing of dividends by the Government of India was to be made brought about fresh selling. Quotations were marked sharply lower towards the close, Indian Irons being done at Rs. 34-1 and Steel Corporations at Rs. 25-4. In Friday's session a slight recovery has been recorded but there is still considerable anxiety regarding the proposed new taxation measures.

The giltedged securities section has not been affected and business was on a very restricted scale. 3½ per cent Paper is unchanged at Rs. 94. Among terminable loans, 3 per cent Defence Bonds 1949-52 were Rs. 100-14, 3 per cent Defence Bonds 1946 Rs. 102-14, 3 per cent 1963-65 Rs. 95-12, 3½ per cent 1947-50 Rs. 103-13, 4 per cent 1960-70 Rs. 110-7 and 5 per cent 1945-55 Rs. 107-3. Easy conditions were noticeable in the money market but there was a slight decline in the average discount rate on treasury bills from Rs. 1-1-9 per cent per annum to Re. 1-1-7 per cent per annum. No transactions have been recorded in Provincial loans.

Business in public bodies' and industrial debentures is very difficult, the only transaction done in public bodies' debentures being in 3¼ per cent *Howrah Bridge* debentures at Rs. 97-2.

On the reports regarding further taxation measures, tax-free preference issues have naturally been in great favour with sellers scarce. Among jute mill preference shares, *Cheviot* were Rs. 171-8, *Adamjee* Rs. 163, *Birla* Rs. 133, *Hastings* Rs. 152 and *Waverley* Rs. 76-8. *Alkali and Chemical* were steady at Rs. 127-8. *Dalmia Cement* and *Carew & Co.*, were Rs. 147 and Rs. 140 respectively. *B. I. Corporation* 8 per cent preferences are ten points higher at Rs. 194-8.

Bank shares have remained steady with *Imperial Bank* fully paids at Rs. 1,736 and contributories at Rs. 428. *Reserve Bank* were Rs. 108.

In the Coal section there is nothing of interest to be recorded except for the sharp rise in *Baraboni* to Rs. 2-10 early in the week. There has been some selling at the higher levels and the quotation towards the close is lower at Re. 1-10. *Amalgamated* were Rs. 36-14, *Burrakur* Rs. 13-12, *Central Kurkend* Rs. 14-12, *Equitable* Rs. 36-15, *Munduipoor* Rs. 11-8, *Satpukuria and Asansol* Re. 1-13 and *South Karanpura* Rs. 5-10. *Bengal* were unchanged at Rs. 468, and *West Jamuria* Rs. 37-8.

In the Cotton section steady conditions were noticeable till Wednesday this week and the publication of an encouraging earnings report by *Cawnpore Textiles* for the half-year ended March, 1943, had a stimulating effect on the market. The quotation for the shares of this company was marked higher temporarily to Rs. 33-8 but towards the close in sympathy with the weakness of the other sections, price receded to Rs. 31-10. *New Victoria* have been marked lower at Rs. 10-14. *Basanti* were Rs. 14-8, *Birla* Rs. 45, *Elgin* Rs. 84-8, *Muir Mills* Rs. 450 and *Kesoram* Rs. 17-10. Quotations in all cases are substantially lower than those at the end of last week.

In the Jute section, easy conditions have been noticeable in the last two days, and a slight decline in values have been recorded. *Agarpara* were Rs. 324, *Anglo-India* Rs. 397, *Bally* Rs. 341, *Howrah* Rs. 61-12, *India* Rs. 563, *Kamarhatty* Rs. 547 and *Nellimarla* Rs. 22-8. *Nuddea* were Rs. 95-8. This company has been able to increase the dividend for the half-year ended March, 1943 to Rs. 3 per share from Rs. 2-8 per share for the previous half-year.

In the Engineering section, *Indian Iron and Steel Corporation* were fluctuating within narrow limits in the early days of the week. Towards the close on Thursday there has been heavy selling on reports regarding the possibility of an increase in the rate of Excess Profits Tax and the quotations for both the counters were marked as low as Rs. 34-1 and Rs. 25-4 respectively. It is only with the satisfactory news regards the war situation that there has been a slight improvement in the early hours of this morning and quotations at the time of writing are Rs. 34-8 and Rs. 25-10 respectively. Unless these uncertainties are cleared, it is unlikely that there will be an early improvement in prices. Towards the close of the market on Thursday, *Britannia Building* were marked at Rs. 13-12, *Indian Malleable Castings* Rs. 9-12, *Indian Standard Wagon* Rs. 98, *Jessop & Co.*, Rs. 20-12 and *Saran Engineering* Rs. 7-12. *Kumardhubi Engineering* have been very steady at Rs. 8-12.

Sugar shares have been completely uninteresting with *Carew & Co.* at Rs. 18-8, *Champarun* at Rs. 36-4 and *Samastipore* at Rs. 18-13. There has been a setback in *Belsund Sugar* from Rs. 13-14 at the time of last writing to Rs. 10-12 at the present moment.

Firmer conditions were noticeable in the Tea section with the publication of very satisfactory results by some important tea companies. Closing quotations are slightly easier in sympathy with other sections. *Bishnauth* were Rs. 36-2 against Rs. 35-12, *Banarhat* Rs. 845 against Rs. 806, *Dufflaghur* Rs. 22-14 against Rs. 22-6, *Huldibari* Rs. 38-4 against Rs. 35-12 and *Hattikhira* Rs. 32-12 against Rs. 31. *Jaybirpara* quoted Rs. 40-10, *New Terai* Rs. 25 and *Tezpur* Rs. 14-8.

In the Miscellaneous section, *Burma Corporation* and *Indian Copper Corporation* were done at Rs. 2-12 and Rs. 2-8 respectively. *Alkali and Chemical* were steady at Rs. 38 as also *Dalmia Cement* at Rs. 19-12. *Aluminium Corporation* were easier at Rs. 18-10, *B. I. Corporation* at Rs. 6-7, and *Calcutta Trams* at Rs. 19-10. *Indian Cable* were Rs. 28-12 after being higher at Rs. 30-8. *Indian National Airways* were very firm at Rs. 16-5.

Among paper shares, *Mysore Paper* were Rs. 26-4, *Star Paper* Rs. 26-15 and *Titaghur* Rs. 25-14. *Barooah Timber* were dealt in frequently at Rs. 21 and *Midnapore Zemindary* around Rs. 84.

Among Shipping companies, *Bengal Assam Stamship* were Rs. 262-8 and *Port Shipping* Rs. 99. *Ruby General Insurance* were Rs. 16-8 and *Triton Insurance* Rs. 270.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, May 13.

Two factors diametrically opposed to each other dominated the local stock exchange during the period under review. While the news of the Allied withdrawal from Buthedaung coupled with the diverse rumours affecting the earnings of companies induced an easy tone, news of the annihilation of the Axis forces in Tunisia acted as a welcome obstacle in the downward course. Even as early as last Thursday the air was thick with rumours regarding control of cloth prices, limitation of dividends and a more rigorous collection of E. P. T. In the meantime a statement issued by prominent Indians pointed out the need for checking the ever increasing prices of cotton goods. Further prices had already reached high levels beyond which it was impossible for many an operator to venture. Of those who took the risk the weak holders began to get nervous the moment some bad war news was received and naturally enough hastened to cash their holdings. That the number of operators coming under this category is not negligible is demonstrated by the fact that at times a steep fall in prices was witnessed. While the market is prepared to take advantage of any good news from abroad, it is clear that local events far outweigh anything that may happen elsewhere. Unlike last week mill shares were slow to recover whereas the steel section reacted more readily to the encouraging war news. Prices at the time of writing are lower than at the same time last week. The market is hesitant though the undertone is firm.

Mill shares which began to decline on last Friday shot up on the following day on encouraging war news from Tunisia. An alround rise was witnessed some gaining more than their lost ground. But when the market reopened on Monday the news of the Allied withdrawal from Buthedaung had a dampening effect on the prices. There was a sudden fall some shedding from 20 to 30 points. On the following day on encouraging war news a partial recovery was witnessed. But on Wednesday rumours regarding control of cloth prices again got current. To-day the market has recovered slightly on encouraging news from America. *Bombay Dyeing* are quoting at Rs. 2,052 (Rs. 2,102-8); *Central India* at Rs. 510; *Century* at Rs. 923; *Colaba Land* at Rs. 296; *Gokak* at Rs. 405 (Rs. 424). *Phoenix* are not much changed at Rs. 900-8 (Rs. 902-8). *Sholapur* have lost 225 points to quote at Rs. 11,000.

The Iron and Steel section behaved almost in the same way as the Textile section, but with this difference that they have been more rapid in staging a recovery. *Tata*

Mundulpore:—(6th) 11-8; (7th) 11-10; (10th) 11-12, 11-13.
Nazira:—(6th) 9-11 c.t.; (10th) 9-12; (11th) 9-15, 9-12.
New Manbhoom:—(7th) 42-3.
New Beerbhoom:—(6th) 21-2; (7th) 21-12, 20-13, 20-14; (8th) 20-12, 21; (10th) 20-12; (11th) 20-10.
New Bansdeopur:—(7th) 31-12; (8th) 33; (12th) 33.
North-West (Conty.):—(10th) 8-8 prem.; (11th) 8-10 prem.
North Damuda:—(7th) 7-7.
Ondal:—(7th) 14.
Parasea:—(6th) 3-15, 3-14; (7th) 3-10; (10th) 3-7, 3-8, 3-9; (12th) 3-3, 3-2, 3-1, 3.
Pench Valley:—(11th) 37-14, 38; (12th) 39.
Raneegunge:—(6th) 26; (7th) 26; (11th) 26.
Rewa:—(7th) 35 s.o.l.; (8th) 35-3 s.l., 35-4.
Samla:—(6th) 3-7, 3-6; (7th) 3-6; (8th) 3-8, 3-9, 3-10, 3-11; (10th) 3-9, 3-10, 3-11; (11th) 3-9; (12th) 3-5, 3-6, 3-7.
Satpukuria and Asansol:—(6th) 2-11, 2-12, 2-8; (7th) 2-5, 2-7, 2-8; (8th) 2-9; (10th) 2-10; (11th) 2-5; (12th) 1-15, 2-1, 2-2, 2-4, 2-5.
South Karanpura:—(6th) 6; (7th) 5-12; (10th) 5-12; (11th) 5-12, 5-14; (12th) 5-12, 5-14, 6.
Searsole:—(8th) 4-14, 4-15; (12th) 4-14.
Talcher:—(6th) 3-11, 3-12, 3-9; (7th) 3-8, 3-9; (8th) 3-8, 3-9, 3-10, 3-11; (10th) 3-9, 3-10, 3-12; (11th) 3-10, 3-11; (12th) 3-7, 3-8.
West Jamuria:—(7th) 33-10, 33-12; (11th) 33-10.

JUTES :

Adamjee:—(6th) 33-14 s.l., 33-6; (7th) 33-8; (8th) 33-2.
Adamjee (Pref.):—(11th) 163 s.l.
Agarpara:—(8th) 23-12, 24; (10th) 24-2; (12th) 24.
Albion:—(12th) 215.
Anglo-India:—(8th) 394; (7th) 395; (8th) 400, 402; (10th) 398; (11th) 402; (12th) 397, 397-8, 398, 399.
Auckland:—(10th) 210, 209.
Bally:—(6th) 350 s.l., 346, 348; (8th) 348 s.l. 350; (10th) 348 c.div.; (11th) 346, 347, 345; (12th) 343, 344.
Barnagore:—(6th) 126, 130, 131, 129-8; (10th) 129 s.l.; (12th) 128.
Belvedere:—(6th) 482; (7th) 485 s.l.; (10th) 481, 482, 483; (11th) 479, 480 (482 s.l.); (12th) 483 s.l.
Birla (Pref.):—(10th) 133.
Bengal Jute:—(7th) 24-6, 26-6.
Budge-Budge:—(8th) 418.
Champdany:—(6th) 215; (8th) 217, 218; (11th) 219 s.l.
Calcutta (Pref.):—(10th) 128.
Clive:—(10th) 27-8, 27-4.
Cheviot:—(6th) 217, 220.
Cheviot (Pref.):—(11th) 171-8.
Chitavalsah:—(7th) 20-15, 21, 21-1; (8th) 20-15, 21-1, 21, 21-3, 21-8, 21-4; (11th) 21-8, 21-3; (12th) 21, 21-2.
Craig:—(7th) 3-10 s.o.l.; (8th) 3-10; (12th) 3-4.
Craig (Pref.):—(7th) 171.
Delta:—(8th) 500.
Delta (Pref.):—(8th) 142; (10th) 142, 142-8, 143-8.
Dalhousie:—(11th) 255 s.l.
Empire:—(11th) 32-4.
Ganges:—(6th) 432, 433 s.l., 432; (8th) 433, 435, 436, 437; (10th) 436, 437; (11th) 436 s.l., 438; (12th) 432, 433, 439 s.ls., 431, 436, 437.
Ganges (Pref.):—(6th) 548.
Fort William:—(7th) 295.
Gourepore:—(6th) 785; (8th) 788, 796.
Hastings (Pref.):—(6th) 152.
Howrah:—(6th) 63, 62-8; (7th) 62-12; (8th) 63, 63-12; (10th) 62-12, 62-10; (11th) 62-12, 62-14; (12th) 62-12, 62-10.
Hukumchand:—(8th) 23-12.
India:—(6th) 572 c.t. (568 s.l.); (7th) 568 (567 s.l.); (11th) 571 c.t.; (12th) 560 s.l.
Kamarhatty:—(6th) 555; (7th) 554; (8th) 555; (10th) 554; (11th) 555, 552; (12th) 554.
Kanknarrah:—(8th) 449; (11th) 452-8 s.l.
Khardah:—(8th) 497-8, 500.
Kinnison:—(6th) 372 s.l., 370; (7th) 365 s.l., 366, 367; (8th) 369, 373; (11th) 370.
Kelvin:—(11th) 625, 627.
Lothian:—(10th) 249 s.l.
Lawrence:—(12th) 290.
Lansdowne:—(6th) 159; (10th) 155, 156.
Lansdowne (Pref.):—(7th) 150 s.l.

Orient:—(11th) 216 s.l.; (12th) 216-8, 216.
Presidency:—(6th) 6-7, 6-8, 6-9; (7th) 6-6; (7th) 6-6; (8th) 6-4 s.l.; (10th) 6-4, 6-6, 6-7; (11th) 6-6; (12th) 6-8, 6-6 c.t., 6-6, 6-7, 6-9.
Rameshwara:—(8th) 13-8; (10th) 13-6, 13-8, 13-10.
Reliance:—(6th) 63-4 s.l.; (7th) 62.
Soorah:—(8th) 16-7, 16-8, 16-9; (11th) 16-5.
Sree Luchminarain:—(7th) 19-8, 19-9; (10th) 19-2.
Standard:—(10th) 232 s.l.
Union:—(7th) 360 s.l., 367; (12th) 359.
Waverley (Pref.):—(7th) 75, 76-8.

MININGS :

Burma Corporation:—(6th) 2-12; (7th) 2-12; (8th) 2-12; (10th) 2-10, 2-11, 2-12; (11th) 2-11, 2-12 c.t.; (12th) 2-11, 2-10.
Consolidated Tin:—(7th) 1-7; (8th) 1-7; (10th) 1-6; (11th) 1-8, 1-9.
Indian Copper:—(6th) 2-10, 2-9, 2-8 c.t.; (7th) 2-9, 2-8; (8th) 2-9, 2-8; (10th) 2-8; (11th) 2-9; (12th) 2-9, 2-7, 2-8.
Karanpura Development:—(6th) 13, 13-4; (7th) 13-4, 12-12; (10th) 12-12; (11th) 12-6, 12-4 c.t.; (12th) 12.
Rohdesia Copper:—(6th) 1-7; (7th) 1-7, 1-8; (8th) 1-7, 1-9, 1-11, 1-10; (10th) 1-10, 1-11, 1-12; (11th) 1-10, 1-11, 1-12; (11th) 1-10, 1-11, 1-12, 1-13; (12th) 1-9, 1-10, 1-11.

CEMENTS :

Assam Bengal Cement:—(7th) 13-10, 13-12 c.t.
Assam Bengal Cement (Defd.):—(7th) 3-4 c.t., 3-4; (12th) 3-4.
Dalmia (Pref.):—(6th) 146, 147; (7th) 144 s.l., 144.
Dalmia (Defd.):—(7th) 4-6; (12th) 4-10, 4-11.
Dalmia (Ordy.):—(7th) 19, 19-4, 19-6, 19-8; (11th) 19-9; (12th) 19-10, 19-11.

Reliance Firebricks:—(8th) 17-2; (11th) 17.

CHEMICALS:

Alkali and Chemical (Ordy.):—(7th) 37-6, 37-7, 37-10, 37-12; (11th) 37-12, 37-14, 38, 38-1 (38-3 s.o.l.).
Alkali and Chemical (Pref.):—(10th) 126, 126-8, 127-8.
Bengal Aerating Gas:—(6th) 88, 88-8, 89, 90 c.div.; (10th) 86-8 c.div.
Bengal Chemical:—(12th) 420 s.l.
Frank Ross:—(6th) 7-13; (11th) 7-11, 7-12.
Lister Antiseptics (Pref.):—(8th) 100 s.l.; (12th) 87-6, 88, 94.

ENGINEERINGS:

Bhartia Elec. Steel:—(6th) 16-9, 16-7; (7th) 16 s.o.l., 16-6; (10th) 16-5; (11th) 16-8; (12th) 16-4.
Britannia Bldg.:—(6th) 14-10, 14-6, 14-3; (10th) 14, 14-4 s.o.l.
Britannia Eng.:—(6th) 14-12, 14-14, 14-10; (7th) 14-12.
Braithwaite & Co.:—(7th) 8-14, 8-15, 9, 9-1; (8th) 9-1; (10th) 9-1, 9-2.
Indian Galvanizing:—(6th) 37-8; (12th) 38-8 c.t.
India Machinery:—(8th) 11 c.t.
Indian Iron and Steel:—(6th) 35-8, 35-9, 35-7, 35-6; (7th) 35-5, 35-10, 35-8, 35-7, 35-9; (8th) 36, 35-15, 36-1, 36-2; (10th) 35-3, 35-5, 35-6; (11th) 35-8, 35-9, 35-12 (35-8 s.l.), 35-7; (12th) 35-5, 35-6, 35-4.
Indian Malleable Casting:—(6th) 10. 10-2, 9-15; (7th) 10-2; (10th) 10, 9-12; (11th) 10 c.t.; (12th) 10.
Indian Malleable Casting (Defd.):—(6th) 3-6, 3-7, 3-4; (7th) 3-5, 3-6; (8th) 3-6, 3-8, 3-9; (10th) 3-5, 3-6, 3-7; (11th) 3-8, 3-9, 3-10, 3-11, 3-12; (12th) 3-11, 3-13, 3-12.
Indian St. Wagon:—(10th) 69; (11th) 69-8.
Jessop & Co.:—(6th) 21-4, 21 x.d.; (7th) 21-2, 21-3, 21-4 ex. div.
Kumardhubi:—(6th) 8-7 s.l., 8-5, 8-6, 8-7; (7th) 8-8, 8-9, 8-10; (8th) 8-9, 8-10, 8-11; (10th) 8-13, 8-14, 8-10, 8-12; (11th) 8-11, 8-12, 8-13, 8-14, 9-1, 8-15; (12th) 8-12, 8-14, 8-15.
Marshalls:—(6th) 3-12; (7th) 3-10; (8th) 3-11, 3-10; (10th) 3-11, 3-12; (12th) 3-10.
Indian Steel & Wire Products:—(10th) 55.
Indian Steel & Wire Products (Defd.):—(10th) 33-4, 33-6, 33-8.
National Iron & Steel:—(6th) 12-12, 12-11, 12-10; (7th) 12-13, 12-12; (8th) 12-12, 12-14; (10th) 12-11, 12-13; (11th) 12-10, 12-9.
Saran Eng.:—(7th) 8, 8-1; (8th) 8, 8-1; (10th) 8, 8-1.
Steel Corpn.:—(6th) 27 (26-12 s.l.), 27-5, 27-3, 27-2, 26-12, 26-11, 26-10; (7th) 26-10, 26-13, 26-12; (8th) 27-2, 27-4 (26-13 o.l.), 27-3; (10th) 26-6, 26-7, 26-9, 26-10; (11th) 26-11, 26-10, 26-13, 26-14, 26-15 (27 s.l.), 26-12; (12th) 26-7, 26-6, 26-9, 26-10.
Steel Corpn. (Pref.):—(11th) 125-8.
Steel Products:—(8th) 8-1; (10th) 8-1.

PAPER MILLS:

India Paper Pulp:—(6th) 198, 200; (7th) 198; (8th) 196-8, 198, 199; (10th) 196, 197, 195; (12th) 194, 197.
Mysore Paper:—(8th) 25-12.
Orient:—(6th) 29-8; (8th) 30-8.
Sree Gopal:—(6th) 23-11, 23-6; (7th) 23-4; (8th) 23-8, 23-6; (10th) 22-12.
Star Paper:—(8th) 23-8, 23-6.
Titaghur:—(6th) 27-2, 27-1, 26-15, 27; (11th) 26-4 s.o.l., 26-4, 26-6; (12th) 25-15, 26, 26-2, 26-4.
Titaghur (Prefd. Ordy.):—(8th) 5-12.

REAL PROPERTIES:

Humayan Properties:—(11th) 9-12, 9-14.
Humayan Properties (Defd.):—(8th) 2-8; (10th) 2-7.

..(Half-yearly General Meeting on 21st May, 1943 at 12 noon)...

Audited accounts for the half-year ended 31st March, 1943:—

The accounts show a profit on Revenue Account of Rs. 10,34,587-9-8. On transfer of this sum to Profit and Loss Account and after reserving Rs. 5,30,000 for Taxation there is a balance at credit of that account of Rs. 7,17,274-4-8, which it is recommended should be dealt with as follows:—

To payment of dividends, free of income-tax:—

	Rs.	A.	P.
On Preference Shares at the rate of 7 per cent per annum (Rs. 3-8-0 per share) ..	96,677	0	0
On Ordinary Shares at the rate of 20 per cent per annum (Rs. 10-0-0 per share) ..	4,92,070	0	0
Total ..	5,88,747	0	0

leaving a balance of Rs. 1,28,527-4-8 to be carried forward.

The Company's mills worked 54 hours per week with 10 per cent of the total complement of looms sealed until 15th March, 1943, when an urgent order for Hessian on account of the Government of U.S.A. necessitated the re-opening of the sealed looms and an increase in working hours to 60 hours per week.

Production was somewhat interrupted during January and February, 1943 by unsettled labour conditions due to enemy air action but work soon proceeded normally.

Managing Agents.—Messrs. Duncan Bros. & Co., Ld.

Authorised Capital—Rs. 1,00,00,000. Issued and Subscribed—Rs. 76,82,900 in 27,622, 6 per cent Cum. Pref. and 49,207 Ordy. both of Rs. 100, fully paid up.

(Anual General Meeting held on 22nd April, 1943).

Audited accounts for the year ended 31st December, 1942:—

The Accounts show a net profit of Rs. 80,74,173 and adding the sum of Rs. 2,88,192-14 brought forward from the previous year the total profits now available for appropriation amount to Rs. 83,62,365-10 and the Directors' recommendations are as follows:—

	Rs.	A.
Transfer to Taxation Reserve	52,14,925	4
Dividend for the year 1942 on the Guaranteed Preference Shares at 6% free of tax, absorbing ..	1,80,000	0
Dividend for the year 1942 on the Second Preference Shares at 6% less income-tax, absorbing ..	1,77,500	0
Dividend for the year 1942 on the Ordinary Shares at 25% free of tax, absorbing	12,50,000	0
Special depreciation provision on Plant and Machinery	2,75,000	0
Transfer to Reserve for Contingencies	5,00,000	0
Transfer to General Reserve	3,00,000	0
Balance carried forward to next account	4,64,940	6
Total ..	83,62,365	10

The provision for taxation represents an increase of Rs. 13,78,274 over the preceding year, due to the higher profits and the increased level of taxation. The estimated tax liability on the 1942 results represents 68% of the total profits earned.

In view of the increased earnings the Directors feel justified in recommending an increase of 5% in the rate of dividend on the Ordinary Shares.

In recommending the special provision of Rs. 2,75,000 for depreciation on Plant and Machinery and the further transfers of Rs. 5,00,000 to Reserve for Contingencies and Rs. 3,00,000 to General Reserve, the Directors have thought it prudent to provide for possible abnormal wear and tear of plant due to continuous working and to continue their policy of conservation of the Company's reserves and finances.

The capacity of the Company's plant was again extended during the year under review and both turnover and profits were enhanced.

Secretary.—Mr. A. W. Gillespie.

Authorised Capital—Rs. 2,00,00,000. Issued and Subscribed—Rs. 1,20,00,000 in 30,000, 6 per cent (tax free) Guaranteed Cum. Pref. shares of Rs. 100 each, 40,000, 6 per cent 2nd Cum. Pref. shares of Rs. 100 each and 500,000 Ordinary shares of Rs. 10 each all fully paid up.

Synopsis of the balance sheet as at 31st December, 1942.

(Annual General Meeting on 19th May, 1943 at 3-15 p.m.)

Audited accounts for the year ended 31st December, 1942:—

The Accounts disclose a profit of Rs. 19,495-1-7.

On transfer of this sum to Profit and Loss Account, and after sundry adjustments, there is a balance at credit of that account amounting to Rs. 27,369-13-0, of which the directors have transferred Rs. 5,000 to Contingencies Reserve, to meet expenditure on renewals and replacements of Buildings, Machinery, etc. that will be necessary after the conclusion of hostilities.

Dividend.—It is proposed to pay a dividend of 17½ per cent. and to carry forward Rs. 7,498-5-0.

Agents.—Messrs. Duncan Brothers & Co., Ltd.

(Annual General Meeting on 19th May, 1943 at 3-30 p.m.)

Audited accounts for the year ended 31st December, 1942:—

The Accounts disclose a profit of Rs. 1,98,057-13-0.

On transfer of this sum to Profit and Loss Account and after sundry adjustments, there is a balance at credit of that account amounting to Rs. 2,12,965-10-1, of which the directors have transferred Rs. 30,000 to Contingencies Reserve to meet expenditure on renewals and replacements of buildings, machinery, etc., that will be necessary after the conclusion of hostilities.

Dividend.—An interim dividend of 10 per cent. was paid on 19th November last and it is now proposed that a final dividend of 75 per cent. be declared at the annual meeting, leaving Rs. 55,465-10-1 to be carried forward.

Managing Agents.—Messrs. Duncan Brothers & Co., Ltd.

Authorised, Issued and Subscribed Capital—Rs. 1,50,000 in 1,500 shares of Rs. 100 each fully paid up.

Synopsis of the Balance Sheet as at 31st December, 1942.

Liabilities.	Rs.	*Assets.*	Rs.
Capital paid up ..	1,50,000	Fixed Capital Expenditures	1,50,000
Reserves & other funds	2,35,100	Stores and Supplies ..	27,646

SAPOI TEA COMPANY, LIMITED

Audited accounts for the year ended 31st December, 1942:—

	Rs.	A.	P.
After charging Manager's and Staff's Commission, there is a profit on the year's working of ..	3,19,179	5	0
From which there has been deducted the following:—			
Provision for taxation and deposits under Section 10 of the Finance Act 1942	1,28,000	0	0
Transfer to General Reserve ..	40,000	0	0
Transfer to Renewals and Replacements Reserve	40,000	0	0
	2,08,000	0	0
	1,11,179	5	0
Add—Balance brought forward from last year ..	28,076	1	3
	1,39,255	6	3
Making available			
Which it is recommended should be disposed of as follows:—			
Payment of a Dividend of 17½ per cent for the year to 31st December, 1942	1,05,000	0	0
Leaving a balance to be carried forward of ..	34,255	6	3

Hitherto no charge has been made in the accounts for depreciation and it has now been considered desirable to create a Reserve for Renewals and Replacements, out of which the cost of renewals will be met in future.

Estimate for 1943 provides for a crop of 7,408 maunds of tea at a cost of Rs. 2,60,620, to which certain Calcutta expenditure falls to be added. This crop figure is based on an export release of 85 per cent and an internal release of 17 per cent of the best crop basis and will therefore be subject to adjustment.

Secretaries and Agents.—Messrs. James Finlay & Co., Ld.

Authorised, Issued and Subscribed Capital—Rs. 6,00,000 in 60,000 shares of Rs. 10, fully paid up.

Synopsis of the balance sheet as at 31st December, 1942.

Liabilities.	Rs.	*Assets.*	Rs.
Capital paid up ..	6,00,000	Block Account ..	8,94,770
Reserves and other funds ..	4,41,802	Stores ..	17,836

Sundry liabilities including taxation ..	3,45,549	Investments ..	948
Carry forward ..	34,255	Cash balances ..	92,698
Total ..	14,21,606	Total ..	14,21,606
		Total Liquid Assets ..	5,26,836

NEW CHUMTA TEA COMPANY, LIMITED

Audited accounts for the year ended 31st December, 1942:—

Profit and Loss Account.—The gross profit for the year is Rs. 1,81,954-9-3, and after allowing for the reserves including Rs. 44,856-10-0 for taxation, there is a nett profit of Rs. 1,05,519-15-9. An interim dividend of 10 per cent, absorbing Rs. 10,000, was declared payable on the 11th December, 1942, and the final balance on this Account is Rs. 1,23,456-13-9, which it is proposed to deal with as follows:—

	Rs.	A.	P.
Pay a Final Dividend of 60 per cent (making a total of 70 per cent for the year) ..	60,000	0	0
Transfer to General Reserve (bringing this up to Rs. 1,85,000)	20,000	0	0
Carry forward to 1943	43,456	13	9
Total ..	1,23,456	13	9

Estimates for 1943 have been based on a crop of 3,100 maunds of green tea at a total cost of Rs. 1,59,155.

Substantial increases in expenditure were incurred on account of increased costs of stores; compulsory Government War Risks insurances on tea stocks and estate buildings and equipment; allowance to establishment, etc., but the cost of production per pound of tea shows a reduction due to the very large crop made.

Managing Agents.—Messrs. Davenport & Co., Ld.

Authorised Issued and Subscribed Capital—Rs. 1,00,000 in 10,000 shares of Rs. 10 each fully paid up.

Synopsis of the balance sheet as at 31st December, 1942.

Total ..	5,30,637	Total ..	5,30,637
		Total Liquid Assets ..	4,30,637

HASTINGS MILL, LIMITED

Audited accounts for the half-year ended 28th February, 1943:—

After transferring Rs. 5,239 to Insurance Reserve, providing Rs. 97,336 for Depreciation and Rs. 1,75,188-2-0 for Taxation and making Sundry adjustments, the results for the half-year show a profit of Rs. 1,63,518-15-8.

After bringing forward the balance from the last account and transferring Rs. 75,000 from War Risk Insurance Reserve, there is a balance at the credit of the Profit and Loss Account of Rs. 3,64,459-9-1. From this the Directors recommend payment as follows:

Dividends on Preference shares for the half-years ended.

	Rs.	A.	P.
29th February, 1940 at Rs. 3 per share ..	75,000	0	0
31st August, 1940 at Rs. 3 per share ..	75,000	0	0
28th February, 1941 at Rs. 3 per share ..	75,000	0	0

thus absorbing Rs. 2,25,000, leaving a balance of Rs. 1,39,459-9-1 to be carried forward.

In accordance with the Indian Jute Mills Association agreement the mills have worked 54 hours per week with 10 per cent of the total looms silent.

Managing Agents.—Messrs. Andrew Yule & Co., Ltd.

Authorised Capital—Rs. 1,00,00,000. Issued and Subscribed—Rs. 45,00,000 in 20,000 Ordy. and 25,000, 6 per cent Cum. Pref. both of Rs. 100 each, fully paid up.

deferreds at one time went down to Rs. 1,862. But later recovered to quote at Rs. 1,902 which is, however, lower than the price at close of transactions last Thursday. *Tata* ordinaries were at Rs. 391 and *Indian Irons* at Rs. 35-6.

The Miscellaneous section followed truthfully the course travelled by the textile and the steel section, but failed to take part in the recovery. *Alcock Ashdown* are very much lower at Rs. 917-8. *Bombay Steam* have lost 20 points to quote Rs. 572-8, *Premier* construction are lower by 5 points at Rs. 173. *Scindia Steam* are also lower at Rs. 32-14. *Shivrajpur* were Rs. 67-8; *A. C. C.* Rs. 237-8; and *Belapur Sugar* at Rs. 244.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, May 11.

THE local stock exchange was exceptionally active for the best part of the period under review. Almost all sections were humming with activity, and there were more buyers than sellers. A good deal of investment buying was in evidence in the plantings section. Some of the mill shares shot up from 50 to 60 points but later on owing to rumours affecting cloth prices and on the receipt of the news regarding Allied withdrawal from Buthedaung prices eased considerably. Rather easy conditions prevail for the past two days. The undertone however is firm.

There was a large turnover in the textiles section. *Janardanas* at one time were done as high or Rs. 280, but they were crossed today at the comparatively lower level of Rs. 255. *Madura Mills* were Rs. 71-4; *Mettur Industries* were done at Rs. 335; *Cambodia* at Rs. 44; *Trichy Mills* at Rs. 36-8; *Coimbatore Spg.* were crossed at Rs. 362-8; and *Sri Sarada* were Rs. 351. The news of the Allied withdrawal on the Arakan front has imparted a rather quiet tone to this section.

In sympathy with Textiles, plantings also were firm. There had been a large turnover in this section also *Thirumbadi* were done around Rs. 5; *Nilgiri Neerugundi* were uninteresting at Rs. 13-12; *Chembra Peaks* were done at Rs. 14-8; *Cochin Malabar* changed hands at Rs. 20-12. On the announcement of a scheme for capital increase by the managing agents, *Midland* were better at Rs. 25.

(Continued from page 855)

Gourepore Company, Limited has not been able to report any increase in earnings, the same being maintained at Rs. 17,44,229 (Rs. 17,03,739). Provision for taxation is higher at Rs. 11,50,000 (Rs. 10,50,000). It has been necessary to reduce the dividend on ordinary shares to Rs. 20 per share from Rs. 25 per share as a result of the higher allocation to taxation reserve. The amount carried forward is higher at Rs. 4,50,018 against Rs. 4,15,259 brought in.

Khardah Company, Limited has earned a net profit, before providing for taxation and depreciation, for the same half-year of Rs. 16,15,190. Out of this sum the provision for taxation is Rs. 9,96,099. After writing off Rs. 1,509 on account of furniture, Cars and Lorries account, the dividend on ordinary shares has been maintained at 15 per cent.

WATCH-DOG.

ISSUED WEEKLY

Vol. XXXI. No. 23 SATURDAY, MAY 22, 1943 Price Re. 1

"HELP THE COUNTRY WHILE HELPING YOURSELF"

Never before in the history of a country or an individual was the call of INSURANCE more urgent and its necessity more vital.

And this war has made it imperative.

"INSURANCE is a double blessing." It protects and provides the individual while contributing to the economic progress of the country.

WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

Conditions in the short loan market have been easy as ever ; and the rates for interbank call money are ½ per cent in Calcutta and ¼ per cent in Bombay, all lenders and no borrowers. On May 18, the offer of tender treasury bills was Rs. 8 crores ; and applications came to Rs. 12,79¾ lakhs. Though applications were considerably less than in the last two weeks, bidding has been keener ; and even the tenderers at Rs. 99-11-9 per cent could receive only partial allotment. The average discount rate has declined from Rs. 1-1-7 per cent per annum to Rs. 1-1 per cent per annum on May 18. The offer of tender bills for next week is Rs. 8 crores. Sales of intermediate treasury bills between May 12 and May 17 amounted to Rs. 2¾ crores. Tap bills will be sold from May 19 to May 24 at the unchanged rate of Rs. 99-12 per cent. With May drawing to a close, the seasonal tendency should be for a further decline in the treasury bill rate.

The Reserve Bank returns for the week ended May 14 disclose expansion of currency for Rs. 8 crores. Sterling securities in the issue department have risen by Rs. 8 crores while rupee securities are unchanged. Rupee coin continues the downward trend ; and the outflow of coin to the public is Rs. 1.14 crores. In the result, active note circulation has risen by Rs. 6.44 crores. Foreign balances held in the banking department are up by Rs. 1.56 crores. Taking the increase in sterling securities held in the issue department, and in the foreign balances held in the banking department, it may be said that sterling payments received by the Government of India from the Allied Governments for war commitments are over Rs. 9¾ crores in the week under review. From this point of view, the increase of Rs. 3.74 crores in the deposits of the Central Government is easily understandable. The Burma Government's deposits with the Reserve Bank show an unexpected rise of Rs. 1.13 crores ; and this must, presumably, be payment made by His Majesty's Government, as the responsibility for the Burma Government is now H.M.G.'s. The deposits of Provincial Governments show a sharp decline of Rs. 4.28 crores. On the other hand, the deposits of member banks are higher by Rs. 1.55 crores.

The recent returns of the Reserve Bank emphasise that the adjustments as between the Indian Government and the Allied Governments are no longer made on a monthly basis, and that payments are effected as and when convenient. Thus, the Reserve Bank reports increase in sterling holdings almost every week. As a corollary, there is, during almost every week, currency expansion against sterling securities and rise in active note circulation. This state of affairs is bound to continue so long as the present system for the provision of rupee finance against the war commitments of Allied Governments remains the only method for this purpose.

In our last week's issue, we suggested certain palliatives. Our main proposals were for the considerable reduction of the lag between the end of the accounting year and the actual date of payment of the excess profits tax for the year ; and the immobilising of an increased proportion of the war profits. The Ordinances issued at the beginning of this week have given effect to our proposals more or less on the lines we had indicated. The implications and repercussions of the Ordinances are examined in another section of this number ; suffice it in this context to refer to the significance of these measures to the money market. The most important of the new measures pertains to the payment on account of the excess profits tax on the basis of a rough and ready understanding between the assessee and the tax authorities. As we had indicated, though the amount necessary for the tax had already been earned in the accounting year and though the sum required had been earmarked for excess profits tax, payment as such is not made for many months thereafter. Assessees will now be required to pay up the approximate tax amounts in the course of the next two or three months. These approximate tax amounts will cover not only the calendar year 1942 and the financial year 1942-43 but also the arrears of earlier years. Our estimate of the amount that would thus be payable forthwith was Rs. 100 crores. Sir Jeremy Raisman has also suggested the same estimate. In other words, the second quarter of this financial year will witness the transfer of anything like Rs. 100 crores from the hands of the public to the hands of the Government. This should certainly have a very important effect in mopping up surplus purchasing power from the hands of the trading communities. It should cause no inconvenience to the commercial and industrial interests as the amounts had already been earned and earmarked.

The receipt of Rs. 100 crores from this source would revolutionise the Government's ways and means position. The affluence thus accruing may be utilised partly for the reduction of treasury bills in the hands of the public and partly for the withdrawal of "ad hoc" treasury bills from the Reserve Bank. The first is necessary in order to offset the squeeze that may be caused by the withdrawal of large sums from banks in respect of tax payments. The second will enable the Government to counteract the expansion of currency that would be otherwise unavoidable on account of the continued receipt of sterling payments in respect of intergovernmental transactions. Rupee securities held in the issue department of the Reserve Bank are now shown at Rs. 125.20 crores. It is quite on the cards that, by the end of September, rupee securities are reduced to roundabout Rs. 75 crores. The real significance of this is that the pace of active note expansion will be moderated.

Some of the chambers of commerce have protested against this and other measures. These very commercial bodies were painting terrifying pictures in respect of the inflationary forces in the country. Consistent with their professed abhorrence of inflation, they cannot object to a measure which is the first important step taken by the Government to deal with inflation in a drastic way. For our part, we strongly support this measure not only because it has an important place in the plan of remedial measures for inflation, but because the long interregnum that prevailed between the end of the accounting year and the date of actual payment of the excess profits tax for the year, meant nothing less than an opportunity to the

TREASURY BILLS

India

Tenders for Rs. 8,00,00,000 of three months' Government of India Treasury Bills were opened on Tuesday, May 18. Total amount offered was Rs. 12,79,75,000. Tenders at Rs. 99-11-9% were allotted approximately 82%. Lower tenders were rejected. Total amount accepted was Rs. 8 crores, the average rate of accepted tenders being Re. 1-1-0% p.a.

Tenders for Rs. 8,00,00,000 of three months' Government of India Treasury Bills will be received on Tuesday, May 25, in Bombay up to 11 a.m. (Standard Time) and up to the close of business on Monday, May 24, at other centres. Successful tenderers should make payment on Friday, May 28. Other conditions are as usual.

Three months Intermediates will be sold from May 19 to May 24, at Rs. 99-12-0%, subject to the conditions previously announced (viz. sales can be stopped at any time without pervious notice, if Government think it necessary).

Three months' Intermediates sold from May 12 to 17 amounted to Rs. 2,75,50,000.

During the week ended May 14, Government of India Treasury Bills for Rs. 10,64,00,000 were sold in favour of the Issue Department of the Reserve Bank of India.

Finance Abroad

Thursday Morning.

From the report that U.S. war expenditure in April totalled $7,290 millions one may draw the conclusion that nearly half the Liberty Loan collections of the month have been spent in advance. The total expenditure since July last 1942 is known to be $94 billions. The outlay for the fiscal year 1942-43 threatens to exceed $110 billions; since increased appropriations for the next year for the U.S. Air force have been sought by the President next year's war bill must be bigger. The total expenditure means that the Federal Debt will keep rising and taxation including the Victory Tax of 5 per cent payable on all incomes will be maintained in the next year. The expenditure for the year will in any event be roughly two-thirds of the national income. The U. S. spending rate will not be short of the present German or British spending rate in relation to resources. The effect of a steady rise in war expenditure on the export trade in spite of lease-lend must be as considerable as that on home production of war materials. The diversion of resources implies a further reduction of the margin left for export, and trade changes may have their own effect on the dollar's external value. But this must be modified by Mr. Hull's victory on the trade pact issue. For the present, the dollar sterling rate is maintained at the level of September 1939. The President has no authority to devalue at discretion. Devaluation may provoke a demand for wage increases. The coal strike is not out of the way, and the dispute between the Administration and Mr. Lewis has taken a new turn with the sudden stoppage of work in Pennsylvania. The labour trouble affects war production in Canada as well as the U.S.A. and Allied statesmen now in conference in Washington will endorse the view that Mr. Lewis is a real danger to their plans because he refuses to recognise the authority of the War Production Board. The strike news apparently has no effect on Wall Street. The turnover on most days is not unduly small, and the market leaders have shown signs of recovery of late. This may be contrasted with the irregular trend of prices in London which has affected both giltedged and Home Rails this week. Interest in South American issues and Foreign Bonds counts for little when Home Industrials drag.

Of limited interest to foreign markets is the drop in bullion prices in India. The drop is not directly related to anti-inflationary measures decided upon by the Government. The easing of prices is not confined to Bombay where the rates are very slightly over Calcutta rates. The revival that may follow the closure of the cotton market cannot be pronounced. The present decline may continue, if the Government is able to attract superfluous purchasing power rapidly to itself. The restraint imposed on the capital market may hardly benefit bullion because the small saver may not retain his faith in gold or silver after the extensive fluctuations noted in recent weeks. The main prospect opened up by the higher E.P.T. and the control of capital issues lies outside the bullion market. If the depreciation of the rupee is peremptorily arrested, a further drop in bullion prices is on the cards. The Bombay market evidently looks forward to a fall as forward rates stand below the spot quotation. The formal discourse by the author on the Keynes plan can help little, when the war situation has really changed for the better. Exchange stability secured by agreement must in the end limit the transfer of gold. It has been urged by some that gold mining is carried on merely for additions to gold imprisoned in vaults. Determination to limit exports of capital (only to correct an adverse balance of trade will lending be resorted to), implies refusal to use the gold kept in a currency reserve, though gold would be accepted as an article of commerce. The further consideration that the supply of gold may fall if monetary demand were deliberately restricted, can affect the value of gold little as compared with the limited role assigned to gold in the Keynes plan. A new money of account is to be invented in this case. It is clear from the more recent reports that management rather than the balancing of bullion holdings is the main feature of the new financial plans. The optimistic view taken as to the future of gold mining by Sir Ernest Oppenheimer at the Anglo-American Corporation's annual meeting in April, should not be regarded as final or binding. Since the U.S. Treasury's price for gold is unaltered, and future purchases from gold producers may be limited in relation to post-war lending to needy countries, the position of gold is not wholly secure. The maintenance of a premium on gold may reduce buying and gradual reduction of output accompanied by diversion of equipment and effort to other mines has been recommended. But reduction of output, enforced by the war, cannot be accepted by the Australian or other mines though changes in the debt position may influence a desire to curtail output in the interest of a stable price for gold. The argument that nations may not invest a percentage of annual savings in purchases of a barren metal, is based partly on the assumption that the U.S.A. may lower tariffs and increase its imports of things other than gold in order to retain its position as a creditor. If gold cannot be ordinarily tendered by a country with an import surplus, the U.S. cannot reckon on a large influx. The existing U.S. stock (equal to two-thirds of the world's gold) may also stand in the way of large buying though U.S. gold producers may agitate for guaranteed purchases as in the case of silver in which case, the outside supplies will be refused. The future of gold appears less secure than it did a month ago (for emphasis has shifted to trade from currency), and this may help to lower prices in India. Buying of gold in order to check monetary expansion is a more or less orthodox device but in the future, that may not be worked any more than the raising of the bank rate. The energetic discussion since April of gold's place in future arrangements has served to show that the U.S.A. is not bound to gold any more than Sweden or Switzerland. Sweden is now busy with anti-inflationary measures and the decision to increase oversea trade is in line with the measures adopted to curb the rise in local prices. The war in Europe may not stand in the way of Sweden carrying out plans to increase the supply of goods, raise loans and increase taxes. Too much capital and too little trade has been Sweden's problem in the war, and monetary management has taken on a new significance in that neutral country this year at least.

The depreciation of the lira undoubtedly accounts for the fixation of a rate of 80 to the pound sterling by the military administration in Tripoli when the Allies conquered the Colony. The rate implies that the lira's value now is about a fifth of the pre-war value. The flight from the Italian currency has been accentuated by the development of black markets. Italy's note issue has expanded at the same time as borrowing at a rate over 5 per cent has been a qualified success. The destruction of the Italian Empire excepting Albania, must have shattered confidence and local unrest may have reduced the value more than the speculation in bank notes in Lisbon. Since October last, the depreciation of the lira has taken place at the same rate as the appreciation of sterling. The Italians have got so far little by way of loot compared with the Nazis and destruction of mines in Yugoslavia means that near supplies cannot be reckoned upon. The Post-war Policy Group in a recent memorandum asked for adequate compensation after the war. It is estimated that up to the end of 1941 the Nazis had removed £9,000 million worth of property. The acts of plunder in 1942 are not limited to Poland as it has been noted by the U.S. Economic Warfare Board. France has been forced to give trains in addition to goods like leather and silk. The increase in occupation costs accepted by Laval must have led to greater depredation. Takings of steel scrap to cover 3½ years' exports have been noted along with the acquisition of 42,000 tons of copper and 27,000 tons of zinc from France. Laboratory equipment and machinery have been removed from the Occupied countries which have latterly been called upon to provide workers. But Germany has difficulties in regard to coal apart from the flood damage caused by the R.A.F. this week. Rumania is known to ask for coal to replace works lost after the surrender of Transylvania. Oil output is said to be falling, and the Nazis have been asked to give coal in return for oil. The Nazi control of Rumanian policy has not increased the oil output, which is one million tons below the pre-war output and three million tons below the peak reported.

LLOYDS BANK
LIMITED
(Incorporated in England.)

Adaptability

The experience of nearly two centuries of private and commercial banking, coupled with an efficient and world wide organisation and the highest reputation for thoroughness and financial stability, enables Lloyds Bank to adapt itself to every class of banking business, whether in times of peace or war.

The New Ordinances

The publication of the new ordinances from New Delhi sets at rest the unhealthy and ill-informed speculation about the character of the measures which the Government of India were contemplating. It was known for a long time ahead that the authorities were inclined to the adoption of special measures calculated to afford relief to the Central Exechequer and at the same time to curb the inflationary tendencies in our currency administration. While these two purposes could be easily guessed, it was not possible to surmise their relative importance in the eyes of the Government. Difficulties of this kind are inevitable in impending financial proposals of any government at any time; and that is a reason for the exercise of caution in giving currency to reports and withholding those for the correctness and authenticity of which their authors cannot vouch. It is indeed a matter for regret that in the case of the proposals published on Monday last, the difficulties of forecasting them were disregarded. It should be clear now that what the Government of India is after is not an addition to its revenues, but a speeding up of the process of collecting taxes and getting control of funds which are better in its hands than in those of companies and corporations. The new ordinance in respect of the E.P.T. aims at improving the ways and means position of the Central Government in ways that provide appreciable relief from the inflationary forces that have so long been disturbing the economic life of the country. The tendency to look for measures of new taxation every time the Finance Department is said to be busy has led to serious misrepresentation of the aim and purpose of the new measures.

If the mopping up of redundant currency is the foremost aim of the new ordinance, then it can be easily understood that it must be aimed at the manner and extent of payment of excess profits. In the setting of business activity now created by the war, the financing of war orders and the realisation of profits therefrom form by far the larger part of the picture. A higher or lower pace of collection of excess profits would mean either that large sums are realised by the Government with a consequent decrease in the need for creating new money, or that companies keep huge amounts in their hands and force the Government to add to the already large volume of note circulation in the country. There is nothing gained by companies postponing payment of the excess profits tax when the Government is feeling the pressure for funds. On the other hand, all parties concerned, inclusive of the public, stand to suffer, if the payment of taxes awaits the devious processes of assessment and the Government is in the meanwhile obliged to meet the claims on itself by fresh additions to currency. Our ideas as to the proprieties of the modes of assessment and payment are, in fact, derived from the comfortable times of peace; and the revision of such ideas to-day is sufficiently imperative to be inevitable.

The new ordinance, therefore, comprises two measures, one providing for payment of tax soon after the closing of the accounting year, pending detailed enquiries for purposes of assessment and the other for making the deposit of 20 per cent of the tax compulsory, thus taking away the option which had formerly been given to the tax-payer. But nothing has been done to convert the deposit into a tax. Under the new ordinance, as under the law before it, this sum is to be treated as a deposit to be returned to the assessee within twelve months after the war together with 2 per cent interest and a 50 per cent increase in the amount so deposited. The change from the optional to the compulsory basis of the deposit, it will be admitted, is both expedient and otherwise justifiable. For, at a time like the present when the financing of the war entails the creation of new currency at the rate of one crore a day, when the economic life of the country has been already seriously disorganised by the rate of increase in the note issue, there is everything to be said for the Government realising by way of loans the profits which they have themselves rendered possible by their war orders.

By the same token, the speeding up of tax collections is an act of financial justice to the Government and the country alike. As we have observed earlier, our ideas of proprieties of assessment and collection are inappropriate to present conditions. While any attempt to simplify the process of assessment is fraught with risks of grave injustice, there is no similar argument against early payment on a tentative basis, leaving accurate assessment and final adjustments to take their due course. The only risk, however, is that the payment demanded on a tentative basis might be in excess of the just dues to the Government. The ordinance does contemplate that contingency and provides for a penal rate of interest of 5 per cent on the excess collection. In conditions in which no privation is likely to be caused by the Government collecting a larger amount than what may be found to be due to it, the penal interest should be regarded both as sufficient compensation for the assessee and a deterrent for the Government.

The practical result of this ordinance to the day-to-day finances of the Government and to the currency position in the country may be assessed in broad terms. It may be said that nearly Rs. 100 crores of redundant currency will be drawn to the Treasury by this method. And if it is remembered that in the absence of such a measure, currency expansion would have to be continued at the present rate, the relief provided by the new ordinance in the pressure of inflationary forces will not be under-estimated. Whether the absorption of Rs. 100 crores through quick collection of excess profits is adequate solution of the problem of inflation is, to some extent, a different question. It is not easy to say how much of the volume of currency now in circulation can be held to be inflationary. In fact, the very criteria of judging this question are not easy to decide. But it is incontrovertible that, in the present phase of our inflationary problem, it is far more important that we should be able to set practical and practicable limits to inflation than that the volume of currency should be cut to some given dimensions. It needs no elaborate argument to show that in the absence of the ordinance, inflation would have a veritable rake's progress. That such progress will not be made and that the note issue, as it is at present, is near the maximum that the Government would find necessary even in the absence of further anti-inflationary measures is sufficient for the present. We trust that the Finance Member is also thinking along such lines and that the operation of new ordinance will lead to an immediate, positive contraction of currency.

The other ordinance by which Government takes powers to control new issues and the new capital market is unrelated to the problem of inflation, except in so far as control of new issues will prevent an increase in the velocity of circulation of our inflated currency. We are not sure that this relief is to be despised. However, the second ordinance is to be regarded more as a measure of broad social significance than as a purely financial one. New flotations during the last few months have been sufficiently numerous and varied to disturb those who retain unpleasant memories of the boom which followed the last war. Activity in this sphere follows well-understood laws. The psychology is always true to type; and where the trend is similar, the end is, too. Considering that there is more free cash lying about in the pockets of large sections of the people, new flotations can gather momentum more easily than on former occasions, and the end can, for that reason, be more disastrous. On principle, therefore, the provision of an administrative check on new flotations calls for no opposition. The people should be saved from being stampeded into hasty and ill-considered investment.

But it is idle to overlook the dangers of taking too comprehensive powers. The prevention of attempts to deprive the State of its taxes by changes in the nature of the business unit is, no doubt, a legitimate aim. But the State, too, can attempt no more than what it is administratively equipped for. If it vests in itself a veto on new companies, it will have to accept the responsibility for scrutinising the prospects of new companies, judging them and commending them to the public for its support. And in the case of India, the Government will have to prove that, in exercising the powers it has now taken, it is not swayed by partiality for British interests. In the present state of the economic and financial relations between India and Britain, the transfer of British investments to Indian hands is a natural development. New companies will have to be floated to take advantage of these conditions. The Government, which has so far evaded this most satisfactory solution of the inflation problem, will be watched by the public with the keenest suspicion and we trust that the authorities will not give the least room for such suspicion. It must also be said that the ordinance, as we have been able to understand it, deprives companies of freedom of action in measures of financial reconstruction, which have been long in need and for which the present conditions afford the best opportunity. It would be a pity if, for fear of official interference and official obstruction, such reform should be postponed till the day when it may not be feasible. At the present moment, one must be content to stress the need for the utmost circumspection in the exercise of these powers.

INDIAN OILSEED PROSPECTS

The main difficulty in discussing export prospects for most commodities today lies not in the disappearance of export markets, the persistence of shipping difficulties or the quasi-monopolies nurtured by war, but in the disproportionate rise in prices. The material improvement in India export trade during 1942-43 was governed largely by the jump in commodity prices. The rather limited increase in exports of oilseeds during April-January to Rs. 8.29 crores from Rs. 7.92 crores in ten months of 1941-42 indicates that oilseeds now constitute the most important raw material exported by India. The fall in vegetable oil exports in 1942-43 is not unexpected, while the increase in exports of oilseeds after a period of indifferent trade, has produced the feeling that the crop forecasts of 1942-43 will have no determinate influence either on the value or volume of exports in the current year. When the Madras price of groundnuts advanced to an unprecedented level making some talk of what happened in 1918, some feared that exporters would hold off. The Ministry of Food only recently has raised the price to £40 per ton. There is no disposition to suggest that groundnut prices in Bombay or Madras will come down in the near future. The agriculturist may be encouraged to grow more groundnuts instead of seeking special relief as in 1941. Within two years of crop restriction plans the position of Indian groundnut shippers has undergone a welcome change. Other oilseeds, notably linseed, have risen though demand has been slow. The suggestion that Argentine linseed would be preferred as cheaper at present has not found many supporters. In spite of the cut in the fats ration last year the U.K. remains a persistent buyer of oilseeds and the further advance in prices this month makes it necessary to go beyond the conclusions usually drawn from the crop forecasts. The prospective increase in supplies of gingelly and groundnut are, in the main, the result of a shortage of copra and cocoanut oil. The advance noted under castorseeds cultivation this year is explained by the acute shortage of lubricants. The importance of vegetable oils as substitutes for lubricants has been generally recognised. The increase in the value of Indian seaborne exports of seeds last year, was not altogether due to exceptional demand from the U.K. but to the fact that the supplies from West Africa were not always available. Since minerals are more valuable in war the Colonies will be encouraged to produce something other than groundnuts. The adhesion of French West Africa to the Allied cause some months ago has made little or no difference to the groundnut market. The home demand from oilcrushers and others has expanded since the last year. The use of groundnuts as food has been frequently advocated, and in spite of the doubling of the retail price, the demand has grown. The relatively poor season in Madras has not affected the crop outturn greatly but its movement has been delayed.

The disappearance of foreign markets led to a sharp decrease in groundnut cultivation in 1941 and last year's acreage was below the average. A diversion of the area to food crops may not have affected acreage because all official reports indicated the desirability of using vegetable oil for diesel engines. Present prices will, however, discourage such use. What appears most surprising is that the slipback in cocoanut oil prices early this year has been without effect on groundnut and oilseeds. The statistical position at the ports may account for a display of renewed firmness while it is open to some to argue that the high price of grains will force much land out of groundnut cultivation and the price structure will not be imperilled by another large crop in 1943-44. The temporary reluctance of the Ministry of Food to follow the rise in prices has been offset by the revival of purchases on both the Eastern and Western side of India. The quantity shipped last year is known to be only a quarter of the pre-war average (so high prices go with reduced quantity) and the liberation of French Africa has been without effect on the prices. The substantial difference between cotton, wheat and other prices in the past year and prices today, makes for optimism in regard to groundnut as well as linseed. The larger linseed crop in Argentina is not to push prices down. There is the large and growing demand for linseed oil here. There is also the fact that the winter oilseeds forecast is not really bearish as feared. The main consideration, however, is the presumed maintenance of U.K. demand. The U.S. crop can have little effect on Indian shipments since the general price-level there has undergone the same changes as in India. The Argentine price stabilisation policy also makes for stability, and the shipping difficulty remains more acute for Argentina than for India which is within the sterling area. The exchange difficulty is not to be ignored as between neutral Argentina and India. Limited supplies at the ports have helped to keep up prices in Cawnpore, Bombay, and Calcutta. The crop forecast pointing to a sharp fall in area has sustained the belief of the trade that the considerable difference between prices for Plate and East Indian linseed is not unnatural. A fall in exports may even be welcomed as home consumption at present accounts for two-thirds of the crop. The export surplus is estimated to be 100,000 tons or about 40 per cent of the year's crop. It is certainly possible that the high prices paid for edible oils may influence prices of linseed oil as well as linseed in the near future. The prosperity of secondary industries, such as paints, soap, margarine manufacture or vegetable ghee should not be overlooked in any appraisal of prospects. Though it is frequently urged that Indian linseed is dependent on export markets, and the preferential duty alone is not enough to sustain the export trade, it is obvious that the ratio between home consumption and exports in the past year makes for real confidence. Prices went up steadily last year, and have since risen very rapidly, not merely owing to speculation but on account of the belief that Indian prices for oilseeds are still lower than the prices for cereals on the basis of movements in index numbers for commodities. The large decrease in linseed cultivation in 1941-42 accounting for a fall of 16 per cent in yield has been followed by a small recovery as in the case of groundnut. The Argentine's exports this year may be affected by bag shortage or any other factor and the London report that Indian prices will not help to keep the U.K. as a customer for linseed in the future has been discounted.

The Bombay investors unable to deal in cotton futures are likely to engage more actively in the oilseeds market. That is the most important consideration in relation to the course of prices in Bombay. Price control is obviously inapplicable to export commodities like groundnuts and linseed. The freight difficulty is modified by the improvement in the position of the Allies in the Mediterranean. The U.S.A. and Canada with special liabilities as regards food exports to the Allies may have no interest in shipping linseed. Argentina's predominance or rivalry is not the all-important factor as compared with shipping. The chances are definitely in favour of prices staying up. In most market reports speculative activity is said to have increased of late and the bullion boom by itself may keep commodity prices at ruling levels. As the war has radically modified the proportion of exports to total consumption within India, there is really no argument in favour of a bearish trend. The increase in cultivation in 1942-43 follows a sharp curtailment of cultivation of oilseeds. What has been noted in the case of the larger wheat crop

and the level of prices in that case (with control out of the picture) obviously holds good for more food crops like linseed and oilseeds. The final factor will, of course, be inflationary tendencies generally and these are operative over a long period in India. In the view of most the firm action designed to curb them is more unlikely than ever. The growing trade with the Middle East may not cover linseed or other oilseeds but Russia must be looking for supplies. India is the most obvious source and Russian buying of linseed like the disappearance of Chinese competition in the field of groundnuts may have no inconsiderable effects this year. The swift disappearance of soyabeans from the world's trade in oil and oilseeds, should also be mentioned in view of what has been said about the effects of the war in the Far East on copra and coconut oil supplies. The available substitutes are not many, and the continuous advance in prices is only a measure of the limitation of supplies in 1941-42 and the enlargement of demand, though not of exports in any case.

Editorial Notes

Extension of Control

Control of the capital market by D. I. Rule No. 94 is not unexpected though it may not be exactly welcome to all. The licensing of new issues is practised in many countries. Prior approval of the Finance Department is required in the case of offers for sale, and even for repayment of debentures etc. The approval sought may not be refused in case of conversion or repayment, and the practice which has been adopted in regard to Home Corporation issues in Britain will, doubtless, be copied. The essential requirement for any prospectus, in the future, is the previous sanction of the Central Government. In regard to subscriptions, the prohibition applies in respect of any issue of capital made in British India or elsewhere unless such issue has been made with the consent of the Central Government. Planting issues from Travancore and Cochin are covered by the new rule which seeks to check new flotations at the same time as it regulates investment in shares issued in connection with any increase of capital. The Finance Department is empowered to sanction or refuse approval of new issues. It is however clear that bonus shares are exempt. In regard to new industrial ventures an inter-departmental committee, is to decide what can be allowed in the war period. The Reserve Bank is to help in examining the prospectuses of banks, insurance companies etc. in advance of the usual offer. The diversion of authority will excite little suspicion. What is most welcome is the fact that the Reserve Bank is not allowed to pronounce on the merits of industrial propositions. That the Finance Department assisted by the Supply and other Departments will hold the scales even as between British India and the States may be inferred. When prospectuses are issued within the States and outside subscriptions are not sought. it is obvious that the Rule has no force but the capital market does not exist. The reasons given in connection with the regulation of new issue activity are unexceptionable though conversion of private concerns into public companies is likely to meet with a strong check. Reorganisation of capital or reconstruction of capital is not mentioned in the communique. Companies with arrears of preference dividend to be paid off are not likely to be discouraged from evolving funding or other arrangements. The sanction required in such cases is a formality, the more prolix and austere procedure recommended for new concerns may not be adopted in such cases. The check to new investment administered by a new system of prior examination may not be considerable. But official sanction alone may not influence stock exchange committees in providing for listing or other facilities. The committees will remain free to admit or exclude new shares. Compulsory preliminary examination is an advantage to the investor. Where sterling companies sell existing assets to Indian companies one may expect that sanction will be accorded more readily than in other cases. The elimination of undesirable issues will, in the long run, help the shares of established enterprise even more than the growth of subscriptions to defence loans. The premium on sound shares must increase rather than fall since investors will have fewer opportunities hereafter in regard to new issues. It is on that view alone, that one must reckon on a speedy recovery from the disturbance to share values caused by a decision to collect a higher percentage of excess profits for the revenue more promptly. It must, however, be asked whether the capital issues committee will not be better for being associated with the agency of investment, the stock exchange. The immediate judge of all new issues is the stockbroker and his function has to be discharged, even after a new issue is authorised under the Defence Rules.

Road Development Plans

Reference to a deputation that met high officials of the Government of India in April was made by Mr. Noel Paton at the annual meeting in Bombay of the IRTDA. This deputation was sent up because the IRTDA keep insisting on the need for a road plan. The major argument employed in this connection is the need to keep Army drivers etc. employed in peacetime. Jobs, apart from preventing army vehicles from suffering through disuse are essential for ex-soldiers. The number of vehicles bought and acquired from private owners in addition to those ordered for the war must be large. Replacement of many existing vehicles from the pool of demolished vehicles may also be necessary. Mr. Noel Paton argued that the loss on depreciation of vehicles would be greater than the interest paid on road loans, interest charges would be offset also by the wages of drivers and mechanics. Petrol and tyre difficulties are not regarded as an obstacle to the development of road transport after the war. But roads come before the transport industry and to prepare for the new vehicles, more roads are wanted. The I.E.T.D.A. pleads for road transport as an instrument in raising the standard of living in India. In view of the presumed reduction in public expenditure in 1943-44 on roads the I.R.T.D.-A. has raised the question of increasing expenditure on maintenance. Figures made available in the Association's report for 1942 suggest that the progressive increase in the grants from the Road Fund has come to a halt, but the increase in P.W.D. road maintenance changes must give some satisfaction. Since the total provision from Central and Provincial finances is put at Rs. 114.92 lakhs only the question of a contribution by the Army for the proper maintenance of roads has been raised. The carriage of civil supplies in convoys of empty military vehicles has been due to a suggestion of the Association which in the past year made special efforts to extend the use of producer gas plants.

Raw Cotton Exports

The very considerable decline in raw cotton shipments after the outbreak of war has compelled India to restrict cotton cultivation. But the causes which led to the planned reduction in acreage in 1942-43 are still operative and a study of the export trade in cotton in the past year certainly reinforces the conclusion that short staple cotton has no future. The decline in India's trade with the U.S.A. implies a fall in exports of short staple cotton to the one market left. The statistics for the year ended August 1942 show that the U.K. still buys a certain quantity of short staple. Out of the total exports of 512,000 bales the U.K. took 320,000 bales. The Indian Central Cotton Committee's figures indicate that out of the total of 797,000 bales shipped in the cotton year 1941-42 the U.K. took 560,000 bales. The U.K. bought 240,000 bales of cotton exceeding 7/8 inch staple equal to 43 per cent of the total taken. It is noteworthy that out of the 255,000 bales shipped the U.K. took 240,000 bales. Japan's offtake of Indian cotton in 1941-42 was limited to 29,000 bales while China and the East took 72,000 bales almost equally divided between long-staple and short-staple cotton. The 1941-42 figures in showing the importance of the U.K. market for cotton exports also show that the disappearance of textile imports does not affect U.K. buying since a good deal has been done by the Shirley Institute after the Mody-Lees pact to encourage the use of Indian cotton. The distinctive feature of the returns is the large reduction shown in exports of medium and long-staple cotton. This must be attributed to the activity of Indian mills and the increase in the import duty. The proportion of short-staple cotton to total exports has fallen steadily since 1938. The large increase in exports recorded in 1939 is not likely to recur. The figures point to a bigger fall under Oomras in 1942 than under Bengals of which the U.K. was a ready buyer as also of Punjab-Americans. That Broach, though the choice for the hedge contract counted for little, is shown by the figures which put the year's exports at 53,000 bales only. The modification of the Indian Cotton Contract by the adoption of medium staple Jarilla is understandable, but exports of the growth named Jarilla (and grouped with Oomras) were nill but mill consumption was rising especially in Bombay. The trade figures fall below the quantity shown in the seaborne trade accounts. For the past four years India's exports of cotton have fallen consistently. Jute as the basis of manufactures rather than cotton has acquired the position of the principal export crop and should remain so even after the war ends.

Critic on the Hearth

The revival of the Republican party in the U.S.A. accounts for the unusually vigorous criticism of the publicity methods of the Administration by Mr. Landon, the unsuccessful candidate of 1936. Secret conferences seem objectionable to the Kansas politician who asked that the people should scrutinise thoroughly the agreements reached by the U.S. Government. It is clear that the Senate wants to keep or increase its share of control over foreign affairs, for the Republican leader's demand that there should be no covenants without rigorous examination can only mean that the traditional claim of the Senate is put forth in a new form. As the refugee conference was mentioned specially, it may be inferred that the unrestricted entry of aliens is not welcome to the Opposition. The Immigration Act is in abeyance owing to the war, but the modification of the Act by an international agreement is deemed objectionable. The intergovernmental conference followed repeated demands for the relief of Europe's Jews. It anticipated the press campaign lately started in favour of the Jews. But the terms of the agreement are not

known, and the adoption of permanent machinery under the terms of the agreement reached by the Food Conference, is perhaps deprecated. The Evian Conference in which the U.S.A. was not disinterested worked well. Perhaps, the same kind of international machinery is now desired though it will be difficult to secure. In any scheme for migration and settlement, the neutrals must have a place, so that redistribution of populations after the war can be carried on by the same agency that deals with refugees. Mr. Landon's criticism of the Administration extended to the post-war plans. The doctrine of Hemisphere First is put forth against the extension of U. S. commitments. Precise definition is also demanded. Mr. Roosevelt's reaction to the Minneapolis speech is not known. The five-point plan drawn up by Mr. Landon does not touch the integrity of the British Empire. The speech is not that of a critic of the British Empire which is free under Mr. Landon's programme to deal with its questions on a regional basis. Mr. Landon obviously differs from Mr. Willkie in asking for as little as possible from the Ally.

Newsprint Making in Australia

Sir Keith Murdoch, the Australian press magnate, said recently that the newsprint mills set up by the company of which he is Chairman, have saved the newspaper industry in Australia. After Japan's industry into the war, import of news-print had been very difficult. The Tasmanian product had become the basis of the pool being used to supply Australian newspapers. The weekly output ranged between 500 to 600 tons according to Sir Keith and there was no prospect of expansion, though a staff of engineers was at work and the mills would be trebled or quadrupled after the war. Sir Keith observed that the mills had to seek quantity at the expense of quality because newsprint is so much needed and Australian papers have been greatly curtailed in their usefulness by the lack of it. The Melbourne Herald is not the only paper that has gained from the development of the industry. The previous development of pulp and paper production in South Australia has not been overlooked in India, where interest in newsprint production is keener at present than in proposals for more committees to work with the Information Department. The suitability of Kashmir timber has not been established though the abundance of power resources is admitted but the general scarcity of timber in the war period in India must hamper the execution of projects. Even when the Dominions enjoy advantages in regard to softwoods, there has been some curtailment of production under instructions. The close relations between the Australian press and the local development newsprint manufacture will naturally claim attention but it will be agreed that the Indian press, in spite of its progress, cannot create a press ex nihilo. The rationing of imported newsprint has long been offered as the solution and smaller papers have been accepted by the public without much regret. But the newspaper industry will be impelled to seek information from Australia as to what has been attempted and accomplished. Plans to produce motor cars in Australia after the war are less important than the progress of publishing enter-

prises in Australia and the beginnings of newsprint manufacture using Tasmanian forests. It is clear that the older industries of fruit preserving, and metal extraction particularly of lead, zinc and osmiredium have not lost their importance but Tasmania produces to-day something as valuable as carbide in the newsprint mills set up by Australian Newsprint Mills Pty Ld.

Lancashire's Recovery

Though Lancashire's exports are controlled and shipments to West Africa alone are allowed increase under licensing procedure, the cotton industry's ability to survive the many changes of wartime including concentration is not questioned. The sharp rise in cotton company shares through 1942 indeed, serves as an indication of postwar prospects and the present degree of activity. The current year is said to have opened well and the last year, according to Tattersall's famous reviews, was not bad since earnings unproved in many cases. Increase in wages were accepted by the industry, towards the end of 1942 but prices being rigidly controlled, cotton is actually cheaper than a year ago for Lancashire mills. This adjustment of wages and costs will certainly claim attention in India, where the headlong rise in cotton prices provokes mixed feelings. That Britain has prevented prices from rising to scarcity levels even at present is an advantage to exporters as well as the domestic consumers, including the Government. Though the large supplies of Empire wool available to woollen spinners are not available to Lancashire cotton mills the British Government through lease-lend and governmental agreements has made raw cottton cheaper for Lancashire. Standardisation of production and planned exports through British Overseas Cottons has served to keep the export trade going. Shipments to British West Africa are encouraged latterly by larger allocations. The quantities to be shipped are defined for various orders and competition for business has been modified by directed orders. Whether the scheme will be copied in India as regards exports to the Colonies remains to be seen. Reports of an agreement between Indian shippers and an East African trade delegation inspires the hope that exports for oversea orders may be distributed through a central organisation such as has been frequently recommended for India by the Indian Central Cotton Committee. The rationing of oversea orders seems quite possible under export control. Lancashire's resolve to keep up exports to French Africa and the Belgian Congo in spite of production handicaps is reflected in the new planning system adopted in the face of restricted supplies of cloth.

Unrest in Italy

Stories of unrest in Italy have appeared after the reports of heavy bombing of Calabria and Sicily. The reports of Badoglio's presumed come-back are not confirmed, but Mussolini's anxiety must have grown with the reverses in Tunisia. The demand for more help from Germany may be influenced by the view that Italians in the mass have ceased to be indifferent to failure or success. The return to Africa is impossible, and the fear of invasion must have been raised by the radio appeal followed by a leaflet raid. Italy's economic difficulties in the winter were many and real. Earlier widespread hoarding of foodstuffs by the peasants was reported. Foodstuffs were stored in church vaults, mountain caves and disused wells. Correct returns of available supplies had become as scarce as the foodstuffs, the people were wretchedly fed, though not starving. Industrial workers got less than the German scale of rations, for heavy workers. Their extra allowances were not always available. As for normal consumers, the supplies were inadequate. The black markets flourished

vigorously. Both rich and poor resorted to it, and restrictions on transport and food parcels induced the peasants to hold up supplies and feed the black market. Prices soared as shortages developed. Italy's deficiency in leather has forced on her the use of cardboard shoes which only last two to three months. The compulsory transfer of workers to German factories did not promote satisfaction as some of the workers complained of bad treatment and not having enough to eat. The situation must have worsened since the reports of 1942 as to the 200 per cent rise in the cost of living in Italy were received. The Empire has been broken since then, and the rapid depreciation of the lira is reflected not only in the rate of 480 to the pound sterling fixed by the British Military Administration in Tripoli, but in the sale of notes in places like Lisbon at a heavy discount. Italy's inability to work the controls with the same success as Germany was made known by the indifferent success of new loans for which the effective rate was over 5 per cent. That pointed to the indifference of the people to fascism as much as the lack of enthusiasm among soldiers for compaigns in Russia. What is clear is that Belgium is not the only country faced with starvation this year. Italy's plight is not different from that of an occupied country, and the heavy decline in the Fascist party's membership in recent months to about 2.6 million is an index of the disillusionment and discontent in Italy.

QUIZ

TEST YOUR KNOWLEDGE

1

India's railways have (a) 15,600, (b) 34,900, (c) 40,477, (d) 8,100 miles of route. Which ?

2

The number of passengers carried every day is approximately equal to the population of one of the following cities: (a) Trichinopoly, (b) Lahore, (c) Calcutta, (d) Allahabad. Which ?

3

Demurrage is (a) a form of divorce, (b) a penalty for pro-Axis wagon usage, (c) a patent medicine containing vitamin D, (d) the raising of an objection. Which ?

4

What is the width of India's Broad-gauge railways (a) 4'-8½", (b) 5'-6", (c) 3'-3¾", (d) 5'-10". Which ?

5

What are the standard colours of Railway Tickets ? (a) 1st Class, (b) 2nd Class, (c) Intermediate Class, (d) 3rd Class.

6

The number of goods wagons loaded every day is approximately (a) 18,610, (b) 20,546, (c) 410,906, (d) 41,007. Which ?

7

7,68,38,879 is (a) the population of the United Provinces, (b) the number of tons of goods carried one mile on the Indian Railways in one day, (c) the annual production of Iranian crude oil in one year. Which ?

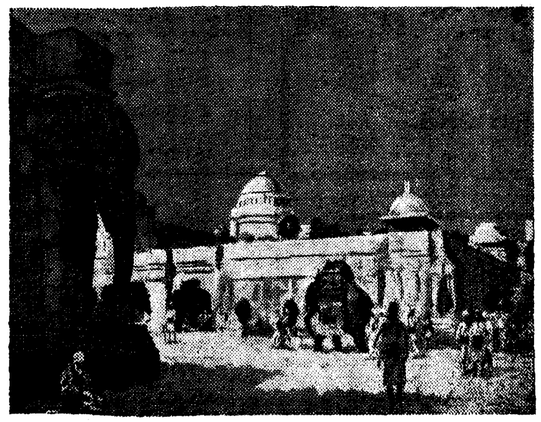
HERE ARE THE ANSWERS

1—40,477. 2—Calcutta. 3—A penalty for pro-Axis wagon usage. 4—5'-6". 5—(a) White; (b) Green; (c) Pink; (d) Yellow. 6—20,546. 7—The number of tons of goods carried one mile on the Indian Railways in one day.

If you get the correct answers to the majority of these questions, you have some idea of the scope of the Indian Railways' war work every 24 hours. Therefore, **travel only when you must** and let the Railways get on with their job.

N67

Trade With East Africa.



The quieter trade conditions in East Africa this year have not reduced interest in Indian manufactures. The Trade Commissioner's last report suggests that the prosperity of coffee planting was of limited importance as compared with the local enquiry for chemicals, stationery etc, from European firms. The maize shortage that developed in Kenya and Tanganyika like the damage to Uganda's cotton crop may have important effects on trade between India and Africa. The bazar demand for Indian piecegoods may be influenced by such developments rather than recent official negotiations. Most interesting among trade enquiries listed by the Indian Trade Commissioner at Mombasa is that relating to edible hardened oil. The overseas demand for Vanaspati (now subject to a new excise) may not be large at present, but may develop as the usual drawback is allowed. As for India the offer of wattlebark from Nairobi is of special importance to tanners who have been dependent on imports from S. Africa. Import control was relaxed in order to permit the buying of cooking pots, but the shortage noted in Kenya and Uganda may not disappear as Indian exports of metal utensils are restricted. The African colonies looked for supplies of light railway materials from India, and the information furnished in this case was qualified by a reference to export restrictions in force in India. The report indicates the existence of a soap factory in Tanganyika just as an earlier one referred to a sugar mill in Uganda asking for Sulphur. A Nairobi firm asked for soap dyes and the possibility of the soap industry developing in Kenya must be mentioned. Import control may not help in the development of secondary industries in the war period since the Colonies have little capital and the field of investment is strictly limited. The varied wants merely show the continued failure of imports from Europe and the Colonies' eagerness to try Indian goods. This is no new development. For the present India's own demand for manufactured goods is enlarged by the war and the fall in imports. Suggestions to cultivate trade relations with Egypt and the Levant do not have any effect for that reason.

Second Front Hopes

There is a lull after the Tunisian victories in spite of the firm action taken against Sidi Ahmed who has been replaced by Sidi Alim as Bey of Tunis. Unrest in Italy suggests that invasion of the peninsula is probable, but the Italian fleet continues in existence, and the reduction of Sicily and the islands may be undertaken before Southern Italy is attacked. The Tunisian war could have only one conclusion after Tripoli was lost, and it is Italian failure rather than the German defeat which induces many to argue that Italy must be the first victim. Complete control of the Mediterranean is admittedly desired by the Allies who may have found northern convoys to Russia difficult. The lull in Tunisia is advantageous to Giraud more than the Allies. The extension of authority has been indicated in the removal of the Bey. To convert Tunisia into a base for future operations is as much the object of the Allies as of Giraud. The Allies have not settled Africa as the de Gaulle-Giraud agreement appears elusive even after the latter issued a letter outlining his terms for co-operation. The Washington talks are apparently not concerned with the future of the French Empire but only with the opening of a second front in Europe, or alternatively in Asia. The reserve exhibited in connection with Field Marshal Wavell's visit to Washington indeed suggests that the Allies want to deal with Hitler first. To side-step the demands of the New York press for assistance to China is not difficult, in view of the suggestion that help to Russia must take precedure over help to China. The U.S.A.'s commitments in North Africa are virtually at an end, but the task of reducing Germany remains. The R.A.F. has damaged German war potential seriously, to the point at which invasion may succeed. Mr. Elmer Davis' forecast of an early invasion of Europe came before the Fifth Meeting. Not many will demur to the suggestion that the lull in Tunisia favours a grand expedition. The resolute rejection of Spanish suggestions for a negotiated peace goes to support the talk of invasion. The U.S. Army in Africa may not be wanted for that, as a great army exists in Great Britain and Northern Ireland at present. The rain of bombs on German industrial centres is, of course, connected with the use of the initiative left in Allied hands. The Pacific war may be turned into a defensive war, though it means that the Japs will be left in New Guinea and expulsion from the Aleutians will be the limit of the U.S. attack. The Australian cabinet may not protest if the decisions taken in Washington do not accord with local hopes. The celebration of Tunisia Day in India should not obscure the fact that Jap offensives in China are in progress, and the most that can be expected in Arakan is a spell of inactivity. War news this week shows that in Russia the Germans are still fighting in the south and harbour plans for an offensive. The actual connection between Mr. Davies' mission to Moscow and the Washington talks cannot be ignored in any evaluation of possibilities. The U.S. envoy's visit is different from that of Mr. Churchill in August last. The latter followed serious reverses while the former obviously is a prelude to an Allied attack from the west. Japan's indifference to the Russo-German war sustains the hope that the year-old agitation for a second front is bearing fruit in London and Washington.

Aspects of an Industry No. 14.

NEW DELHI

NEW Delhi stands as a symbol of the unity of India. It stands also as a monument, *aere perennius*, to the vision, the skill and the capacity of Indian and British sculptors, architects and builders. Today the British building industry faces a situation in which the huge problem of the Future crowds up behind the manifold problems of the Present. The opportunity is unparalleled. Fortunately science has greatly increased the number and variety of methods and materials to enable this opportunity to be seized. Building is a field in which British research has always been prominent. It was largely through the investigations of three Englishmen—Smeaton, the constructor of the Eddystone Lighthouse, Parker and Aspdin—between 1756 and 1830 that cement was added to wood and stone and brick as a building material. During the past 50 years, developments in Portland cement, together with the increased use of steel, have transformed the technique of construction and led to the rise of a whole new industry of synthetic building materials, special cements, plastics, plasters, building boards, plaster boards and insulating boards, partition and nailing blocks, and new types of paints. The characteristics common to these materials are first that they combine strength with light weight, and secondly that they give scope alike for standardisation of design and decoration; but each has its own property or properties. One, for example, may be designed to deaden sound. Another to resist damp. A third to give protection against fire. The chemist has enabled the architect and the builder to shake themselves free of time-worn limitations. He has given them the tools with which to repair the damages of war Today, and to set about the far greater task of reconstruction Tomorrow.

"I must have liberty
Withal, as large a charter as the wind
To blow on whom I please."
—(As You Like it.)

What is capital? To the ordinary man, the complexities of economic life and the intricacies of economic phenomena seem to be resolved more or less completely, when they are reduced to business transactions and expressed in rupees, annas and pies. Money is the common denominator of all values, tangible and intangible, actual and potential, whether in the process of current consumption or stored up for different uses in the future. All values are, therefore, expressible in terms of money, and when an expert accountant decides how they shall be posted in different books and on different sides of the book, the ordinarily inscrutable phenomena of economic life are seen and understood clearly, as with the gift of a sixth sense. So, it is often thought. It is true, too, up to a point. Not only the average man, but even the academic economist, not to speak of the accountant, would find it possible to gauge different orders of economic values with the yardstick of money. We should, in certain conditions, be able to say with the aid of measurements with money whether a certain community is making adequate provision for its future and how far it will be able to take on hand schemes of further development. For the individual, the adequacy of money as a measuring rod is even greater. There can be no question about that.

* * * * *

But it is idle to think that the bank shroff or the accountant can decide intricate problems of economic science. In so far as capital is expressed in money units like any other value, the question of deciding what is capital and what is not is only shelved, not solved. Often, it is the proprietor of a business concern, and not the accountant, who decides what part of the total available assets is to be treated as capital. And that is only as it should be; for, what distinguishes capital from other values, is the use to which it is put. And only the proprietor can decide how much of his resources he is going to utilise for the purposes of further production of values. All values, once they are produced are, so to say, waiting to be labelled by their owners according to the use to which they are to be put. That, however, would be true only in primitive conditions when all forms of available wealth offered an equal choice between immediate consumption and utilisation for purposes of further production. Go to Crusoe in the early days of his involuntary and lonely settlement on the desert island, when he returns after his hunt with an unusually big bag, which gives him freedom from a similar exertion for the next three or four days. He has the pleasant task of choosing from a number of different courses of action. You leave out of account the glutton's choice of eating three days' food in one and, at one stroke, putting an end to all problems, material and spiritual. It is certainly open to him to consume the game in the next three days and enjoy the freedom from the daily hunt which a chance shot had given him. Or, he might utilise that freedom, which in concrete terms, is the time he would normally have had to devote to the hunt, to improve his weapons, or his crude farm. In the former case the store of food would count as capital while in the latter, the same store would be a consumer's good.

* * * *

But economic life is not so simple. Not all forms of wealth offer this choice between immediate gluttonous annhilation, a regulated epicurean enjoyment and far-sighted utilisation in further production. If Crusoe should utilise the chance game for constructing a plough, he could not ask himself—at any stage thereafter—whether he could eat the plough immediately or put it by for a rainy day. The lone individual as well as the community accumulates capital goods which are not stores of value, in the sense that the manner and end of their utilisation is not an open question. The individual may sell his plough or such other capital goods as he may possess and burst up all the money he can get for them. But no similar choice lies before a community. Except in conditions of international capitalism, a community cannot sell its farms, it can only leave them fallow. Only the distinction between capital goods and consumption goods is real. Not so the distinction between money treated as capital and money regarded as income; nor even the distinction between consumer's goods used for further production and consumer's goods utilised for what one might call mere enjoyment.

* * * *

The old economics, with its too close affiliation to money, jumbles up all these variations of the concept of capital in "investment" and frames its laws of economic development in reference to savings and marginal profits. That economic development depends on the accumulation of capital is incontestable. It is also incontestable that the creation of capital is not compatible with the maximum of satisfaction that can be derived from the immediate utilisation of all available resources. But it does not follow from these two propositions that the process of accumulating capital is saving or that, in the case of society, as of the individual, the creation of capital is necessarily and always best achieved by restriction of current consumption. As I have pointed out already, only the distinction between capital goods and consumption goods is real. Savings in money are, in the conditions of the familiar individualist economy, only the starting point in the creation of capital. Savings may be capital for the individual

concerned; but they need to be handed over to the entrepreneur, who regards them as power for purchasing values, such as labour and other goods and services, which under his direction will lead to the creation of capital goods. But what matters to society as a whole is the addition to its equipment of capital goods and the extent to which the additional equipment fits the general scheme of the economic life of the community. The investment of savings enables in the first place, the consumption of the necessaries and comforts of life by those who are engaged in the process of creating the capital goods; and in the last resort, it leads to the creation of capital goods.

* * * *

Viewing it from the social angle, there is nothing to distinguish this consumption from consumption by those engaged in the production of consumer's goods. Likewise, it wouldn't make a difference whether the capital goods that are produced are to replace those which are growing obsolescent or whether they are to be the means of producing altogether new sets of values. The notion that the total stock of consumer's goods at any time confronts society with the choice between immediate consumption and conservation for the purpose of creating or adding to the total capital wealth of the community is one that is derived from the position of the income-deriving individual in an individualistic economy. But if we reject the false simplifications of economic issues, which are the creation of a money economy, and think in terms of goods, we shall realise that a given stock of consumer's goods does not admit of such a choice between immediate consumption and indefinite postponement. All consumer's goods are, in a general sense, perishables. They perish sooner in immediate consumption than in conservation so-called. To be conserved they need to be converted into money. While such conversion is possible for the individual in present conditions, it is by no means easy for a community which, if it postpones consumption, can only cause shrinkage of demand and a consequent depression and setback in its economic life. Economic thought on the lines of the old economics creates a conflict between savings and current consumption similar to the conflict, of which I spoke last week, between wages as an element in costs and wages as the principal feeder of the pool of general purchasing power. All these conflicts are the creation of a false translation of the economics of the individual to the economics of a community.

* * * * *

The fact is that the consumer's goods which a society has in stock, has to be consumed within a certain period by those of its constituent members who are engaged in production. Such productive activities may be distinguished according to the values they seek to create. There are the producers of goods which do not last long in the process of consumption; even in articles of food, there is a striking contrast between fruits frankly recognised as perishables and the cereals which last for a few years. There are then the producers of goods which last years in use, a class of goods for which modern economists have agreed to create a new term, "durable goods". Then there are producers of capital goods which are intended to replace those which are in progressive depreciation. And lastly, there are the producers of capital goods, which are altogether new, either because they betoken a vast increase in productive efficiency or because they will be devoted to the production of goods which had never been used before, like radio sets at the time of their first introduction. If you take as your unit of time a period of years beyond which consumption of consumer's goods cannot be postponed, then within that period of time they have perforce to be consumed. There is no distinction, then, between productive consumption and unproductive consumption. The only distinction is between consumption by workers and consumption by idlers. All consumption by workers has to be viewed alike. What matters to the maintenance and progress of economic society is whether the total volume of productive work is judiciously divided between the production of consumer's goods and the production of producer's goods or capital. A shortage of the former is not necessary for adequacy of the latter.

* * *

The capital requirements of a community may, therefore, be distinguished

NORTH WESTERN RAILWAY

NOTICE

Applications on prescribed forms along with original certificates of character and school certificate showing age (Baptismal or birth certificates in the case of Europeans and Anglo-Indians) are invited from sons and grandsons (paternal side) of Railway empolyees for admission as Apprentice Mechanics in the Punjab College of Engineering and Technology, Lahore, which should reach this office not later than 24th June, 1943.—

Note.—In the case of Anglo-Indians and Domiciled Europeans, candidates other than sons and grandsons of Railway employees may also apply. They should send their applications on prescribed forms together with original certificates direct to the S.M.W., Moghalpura.

2. Candidates must not be less than 16 or more than 19 years of age on the 1st October, 1943, and must have passed either the Intermediate Examination in 1st or 2nd Division of an Indian University with Mathematics and Science, Senior or Junior Cambridge Certificate Examination, M. & S. L. C. Examination in the 1st or 2nd Division taking English, Mathematics and Science, Diploma of the Aitchison College, Lahore, the Indian Army Special Certificate of Education or any other equivalent examination accepted by the Administration.

Note:—Candidates awaiting results of Examination will be considered provisionally.

3. The staff should submit applications of their sons and grandsons through the officers under whom they are serving. Applications received direct will not be considered. Prescribed forms of applications will be found at the end of the Prospectus which can be had at the Book Depot, Government Press, Lahore, at a cost of As. 6 per copy, or As. 9 including postage.

4. During apprenticeship Apprentices in addition to free board and lodging will be given stipends of Rs. 10, 15, 20, 25 and 30 for the 1st, 2nd, 3rd, 4th and 5th years respectively.

5. Candidates belonging to the Anglo-Indian and Domiciled European community should clearly state in their applications whether they are statutory natives of India or not.

Supdt., Mech. Workshops' Office,
Moghalpura.

somewhat on the following lines. Firstly, we must remember that within the unit of time mentioned in the last paragraph the stock of consumer's goods not only has to be maintained, but can also be added to. In an unequal society, there is no optimum consumption of anything. Even the barest necessaries of life leave considerable scope for expansion of consumption. It is, therefore, possible to think of an increase in the production of consumer's goods during the period we are thinking of. In a well-ordered society, therefore, the production of capital goods must be such as to provide for the renewal of obsolescent capital, for additions to the capital equipment of the kind which are already in production—to the extent of the scope for expansion of consumption—and for the creation of capital goods for new lines of productive activity indicated by the advance of scientific invention and technique. Such a direction of productive activity in respect of capital goods will secure the maintenance of existing standards of life, ensure improvements which have been proved feasible and provide for all reasonable requirements of progress.

* * * *

The process of accumulating capital, when it is seen without the disturbing medium of a money economy, will be recognised to be a process of producing capital goods in the forms and in the proportion which are best suited to the maintenance and the progress of the economic life of the community. Such production is dependent on the division of labour within the community rather than on the grading of incomes and the saving which such gradation makes possible. Saving and investment are only a device for ensuring that production for current consumption does not take an unduly large share of the total volume of productive resources and productive activity. Saving does the negative part of the job, by preventing the whole of current income flowing into consumption. And investment does the positive side of it by converting saving into power for purchasing the goods and services necessary for the production of producer's goods. Both alike tend to obscure the real nature of the process of creation of capital. Saving conveys the false idea that a check on consumption of available consumer's goods is necessary, if economic society is not to live on its fat. And investment serves to blind us to the truth that the creation of capital is a matter of division of labour among workers, all of whom consume the same kind of necessaries and comforts, irrespective of whether they produce consumer's goods or producer's goods.

* * * *

I may now refer to the practical results of the fallacious ideas about capital, which the old economics has induced and encouraged. The most serious of these is the intrusion of a misconceived and impertinent ethics into the economic sphere. For now, spending has a moral stigma and saving a moral approbation, which neither economics nor ethics can approve of. And as a result, society has to acquiesce in saving appropriating the rewards which must go to virtue. Strictly speaking, there are few cases of saving being practised in the conditions and with the motives which justify a reward at the hands of society at large. In the case of the millionaire, saving is inevitable. For the ordinary worker, it is just protracted suicide. And in the case of the middle classes, it is traceable to an anxiety for premature retirement from honest work. In any case, saving has but a loose relation to the maintenance and increase of the capital equipment of the country. But the mental attitude to these problems is so rigidly set that when a writer like J. A. Hobson diagnoses the depression as a case of under-consumption, not only is his thesis beyond average understanding, but he is suspected of preaching a new kind of immorality.

* * *

It must, however, be recognised that this intrusion of a false ethics affects only the problems of distribution. What is important to the new economics is the appreciation of the fact that the best assurance of improvement in the quality and quantity of capital equipment lies in the adequacy of the necessaries and comforts of life for the whole population and the provision of full employment and appropriate division of labour between consumer's goods and producer's goods. To bring this knowledge to bear on the progress of economic life in an individualist society is by no means an easy task. For, an individualistic society is necessarily an unequal society; and, where incomes are graded, there are

inevitably savings at one end, and, at the other, enormous strain to make both ends meet. Savings will continue to seek outlets in investment and rewards in dividends. But conditions will be different in that savings will have been robbed of their saintliness. And the volume of savings will not exercise the same tyrannical control over the pace of economic progress as of old. For, even in the last quarter of a century, the development of bank credit and the technique of new floatations have been such as to bring out the fact that capital is a social creation and is not so severely dependent upon the volume of savings as had been thought previously. Herein lies the scope for a society, which is truly democratic, to retain its individualist basis and still prosecute new schemes of development without waiting for the autocrats of the new capital market to smile on them, to expand capital without contracting consumption.

Calcutta lost one of its most distinguished citizens in Sir Nilratan Sircar whose full life ended this week at Giridih after a brief illness. The architect of his own career, he typified a generation that lived laborious days without scorning delights. Professional eminence did not limit the range of his interests. A sense of fitness and right proportion marked everything he did, and the golden name was more than a phrase to him. His own choice of professional and business connections illustrated that robust independence and soundness of views as much as anything else. A distinguished member of the medical profession, he was always zealous and active in University and municipal affairs. Not for anything other than fame did he strive in his best years, and the advance of Swadeshi industry in Bengal in its formative period owed much to one who showed that patriotism and practical philanthropy go together. He will be remembered long as one who created more than one flourishing concern though his real interests lay outside business. He carried to completion the scheme for an independent medical college and made the Vice-Chancellorship as vital an office as any. Academic distinctions sat lightly on this beloved physician, and the exercise of talents in many a sphere found Sir Nilratan Sircar always equal to his opportunities. His success story from the winning of a medical school diploma to unquestioned eminence far beyond the chosen profession reflects not only the effective use of inherent advantages but the great charm of manner that came from a real appreciation of the good and the true. For him in the years of retirement there was no tinge of disappointment, and he escaped the illusions of old age as easily as he retained the zest of youth. Not for one in a million is it possible to look back on a well-filled, well-spent life. But Sir Nilratan could rejoice always that he had toiled with giants for great causes, and the sense of achievement in his case carried him farther than most.

(*Continued from page 877*)

assessees to over-trade with monies which actually belonged to the Government.

Nor do we see our way to sympathise with the objection raised by the commercial community against the other changes introduced with regard to E.P.T. The impression that is sought to be created is to the effect that this new measure enacts an increase in the level of E.P.T. We may straightaway answer that no increase in the level of E.P.T. has been enacted. The position up to now has been that an assessee must pay 66 2/3 per cent of the excess profits as tax; in addition, he may deposit with the Government an amount equal to 13 1/3 per cent of the excess profit, this deposit being returnable within twelve months after the end of the war with interest at 2 per cent and with a bonus of 50 per cent on the amount of the deposit. The assessees have now the option to make this deposit. The new Ordinance converts this option into a compulsion. So far as the level of the tax is concerned, it was 66 2/3 per cent and it continues to be 66 2/3 per cent. All that has happened is that the optional deposit has been made a compulsory deposit. This deposit is not something which the commercial community can grouse about. For, this is the kind of deposit which is returned with a premium of 50 per cent. From the point of view of this premium, this deposit arrangement provides to the business community a most profitable way of creating reserves and investing the reserves.

It is true that the effect of this is that only a fraction of the excess profits can now be used for distribution of dividend or current consumption. For, 66 2/3 per cent must be paid as excess profits tax; 13 1/3 per cent must be handed over as compulsory deposit; and 13 1/3 per cent represents income-tax and super-tax. Thus, only 6 2/3 per cent of the excess profit is left to the assessees. This need not, however, be construed as creating a state of affairs in which the directors of companies will be obliged to reduce dividends. If one were to make a study at random of ten balance-sheets issued recently, he would find that, in the case of nine, various kinds of special reserves are being created. The extra amount paid out as dividend rarely exceeds 5 per cent of the excess profit. Except in the case of some industries like the cotton mill industry, which have no favourable standard year, dividend distribution need not be adversely affected by the Ordinance transforming the optional deposit into compulsory deposit. What is to be feared is that directors and managing agents, who are only too ready to take advantage of any pretext for reducing dividend, may exploit the new Ordinance for a policy unfavourable to shareholders. The remedy for this lies in the hands of the shareholders themselves who must take a more intelligent and energetic interest in the affairs of the companies of which they are proprietors. Industrial concerns in India are doing well; the Government are doing well from the point of view of the increased tax made possible; the managing agents and directors are doing well because of their increased remuneration; it is up to the shareholders to fight for their rights and get their share in the increased profits.

The exchange market has been dull and devoid of any interest.

Banks are sellers of T.T. at 1s. 5 31/32d., for London Ready to six months forward. Banks are buyers of three months D. A. bills on London at 1s. 6 9/32d., and for four months at 1s. 6 11/32d.

India Sugar Annual

Publishers: Messrs. Gandhi & Co., Jam Mansion, Sir Phiroze Shah Mehta Road, Fort, Bombay. 300 pages. Price Rs. 5-8 per copy.

As usual, Messrs. Gandhi & Co. have come out with their annual publication regarding the Indian Sugar Industry. Following the entry of Japan into the war important developments have taken place in the industry. This annual is a reliable guide. The many controversial points at issue have been fully discussed. It is interesting to note that Mr. Gandhi has returned to the charge.

Bombay, May 19.

THE Standing Labour Committee of the Government of India held its meeting here on Friday and Saturday, after the meeting of Labour Welfare Officers at the Secretariat on Wednesday and Thursday. Delegates representing employers, workers, Provincial Governments and Indian States were present at the meeting. A number of important labour problems came up for discussion. A scheme, to be conducted on a voluntary basis, is to be introduced for the establishment of employment exchanges for both skilled and semi-skilled workers. The proposed employment exchanges are to have advisory committees attached to them. Representatives of Provincial Governments will be included in the advisory committees. The question regarding the insertion of a "fair wage clause" in all Government contracts was considered and suggestions were made to the effect that contracts other than those of the P. W. D. should not be ignored. The committee discussed plans for labour legislation and labour welfare during war time. It debated the question whether Wage Boards were desirable in India. The Committee recognised the need for appointing Labour Officers in industrial undertakings. Labour officers in close touch with Labour will be able according to the Committee, to listen to the grievances of labour and secure expeditious redress. Reference was made, in this connection, to the scheme for training labour officers which the Bombay Millowners' Association had under consideration. The Committee has assured the delegates that the Government of India is keen on utilising the machinery of the Tripartite Conference.

The recommendation in favour of employment exchanges should be considered an important step in organising the country's industrial war effort. The National Service War Tribunals have unfortunately failed to develop into employment exchanges, evidently the powers given to them preclude such development. Through the familiar machinery of the employment exchanges, every trained worker in the country would be brought into contact with employers. The appalling shortage of trained personnel in India makes it imperative that no skilled or semi-skilled worker should remain out of employment. The exchanges will also be useful for introducing technicians into industry after they are demobilised at the end of the war.

A statement has appeared in the press over the signatures of a number of prominent Indians asking the Government to take immediate and effective steps to control the price of cloth and the production and sale of yarn. The fixation of the price of yarn, the signatories point out, will give the necessary impetus to the handloom industry to contribute its share to meet the growing needs of the poor and middle classes. The price of dhooties and sarees worn by ordinary people have risen by nearly 500 per cent over the pre-war level. Business circles take the view that the situation in the cloth market can be eased by the Government directing the merchants to declare their stocks. Stocks should be released with intermediaries. Any measures taken by the Government against hoarding should also cover Indian States as the hoarding of bales of cloth is not confined to British India alone. Mr. Vithaldas Damoder Govindji, a prominent local businessman has suggested that public institutions should tender their services for the distribution of standard cloth in the villages or else arrangements for distribution through the panchayat boards should be made. The chairman of the Native Piecegoods Merchants' Association, Mr. Devidas Madhavji Thackersey, does not favour the standard cloth scheme. His suggestion is that the Government should create a panel of five or six persons with Sir Ness Wadia as Chairman and, in consultation with this panel, the prices of cheaper varieties of cloth should be fixed. From a review of the opinions accepted in business circles, one may infer two things. Business circles are agreed that hoarding and speculation should be checked. There is a general tendency to defend the present level of prices as not unnatural or to find excuses for the increase in rates, an attitude into which could be imported the concern of the piecegoods merchants that the prices, when fixed by the Government, should not be much below the prices now ruling.

At a meeting between an East African Delegation representing the British East African Governments and the Africa Shippers' Association, which was held here recently, an agreement has been concluded to safeguard Indian interests in respect of shipments of cotton piecegoods to the East African Colonies. The Delegation assured the Association that there was not, and never had been, any intention on the part of the East African Governments or on the part of European merchants in East Africa to elbow out Indian traders engaged in the piecegoods trade in East Africa or to introduce any racial discrimination in trade matters. There will be formed in East Africa one or more panels of bona fide piecegoods merchants to advise the Colonial authorities as to the requirements in cotton piecegoods of the various territories. An even trend of average landed cost of cotton piecegoods in the various East African ports has been ensured by stipulating that, while continuing the issue of licences to piecegoods merchants according to their past record of imports, the licensing authority may require within a prescribed time that the importer to whom license had been issued should notify and get registered with the licensing authority the prices on which the deals were closed in Bombay of cotton piecegoods relative to the import licence so as to enable the various African ports to check the landed cost of the goods when they arrive there.

The Bombay seeds market has had its fill of sensations. A deadlock occurred in the Bombay linseed market on Wednesday last, as a result of the rapid advance in prices owing to the unbridled activity of speculators. The Brokers' Association felt obliged to pass a resolution fixing the price for September linseed at Rs. 16 maximum and Rs. 12 minimum. Some parties including the President of the Marwari Chamber of Commerce acted in disregard of the ceiling resolution whereupon the brokers telegraphed to the Finance Member urging intervention. In this telegram, they refer to the activities of the "bulls" on the linseed and groundnut markets. The majority of the brokers have purchased oilseeds in upcountry markets but are unable to bring the goods owing to the shortage of wagons. They, therefore, want the Government either to provide wagons for transporting sufficient linseed from upcountry or to issue a special order on the Chamber making upcountry goods tenderable against Bombay sales or approve of the brokers' decision freezing the price for linseed at Rs. 16 maximum. No business was transacted in the linseed and groundnuts market on Thursday. The Board of Directors of the Seeds Traders' Association which is the controlling authority in regard to transactions in the groundnuts market met on Thursday afternoon and, after deliberating for five hours, failed to decide on the fixing of prices. The meeting has been postponed to Saturday and the groundnut market is to remain closed in the meantime.

The Government of Bombay has granted Rs. 3 lakhs to provide interest-free takkavi loans to lessees of cultivable waste lands. About 150,000 acres are stated to be uncultivated but cultivable lands, according to the latest official Season and Crop Report for the province. These lands are now on offer free of rent, for cultivators on three-year leases. A further attraction to possible lessees is the sanction of interest-free loans to carry on the preliminary work to make the lands fit for

Resume of Commodity Markets

THE important feature of the week is the passing of the new cotton control order prohibiting all forward transactions in the current cotton crop as from the close of business on Thursday. This order is one of the series of anti-inflationary measures that have been brought into effect recently, and which, it should be said, took the market to a certain extent by surprise. It will be remembered that only a few days back, the Government of India decided to prohibit trading in options and also expressed their opinion that efforts would be made as far as possible to liquidate hedge contracts in the current season's crop. It was never at any time expected that the Government would come out with an order prohibiting all forward trading in the current crop and that operators would be required to clear up their positions in a very short period. This order has naturally had a bearish effect on the Bombay raw cotton market and there has been a sharp decline in prices from Rs. 659 per candy for Jharilla July early in the week to as low as Rs. 575 on Wednesday though it is reported that not much of business has been passing at these levels and that operators are inclined to await the decision of the Government in fixing prices for outstanding contracts. The decline in prices for raw cotton and the reports regarding similar measures being brought into effect for gold and bullion, have been responsible for the drop in prices for gold and silver also.

Easier conditions have been noticeable in the piecegoods market though the yarn market has been very steady. Only the jute and jute manufactures markets have been firm on hopes of a substantial improvement in exports.

The control order prohibiting all forward transactions in the current cotton crop has naturally brought forth vigorous protests from the interests concerned and even Sir Purshotamdas Thakurdas has aid that the suspension of forward trading in cotton without control of yarn and cloth prices is unjustified. The objection to the control of cotton prices hitherto has been based on the argument that having regard to the present prices for yarn and cloth, a quotation as much as Rs. 1,000 per candy would leave a margin of profit for the average millowner and, therefore, control of cotton prices without any control of yarn and cloth was unfair to a particular section of the industry and that such control denied a greater share to the ryot in the industry's prosperity. The objection of the Government of India to an unrestricted rise in prices was that a greater return on the cotton crop might defeat the campaign for "grow more food." The diversion of cotton acreage to food grain, was primarily responsible for the success of the grow more food campaign last season. According to them, control of yarn and cloth prices has not been pressed as 60 percent of the existing production of the industry is utilised by the Government on war orders and the production of standard cloth. The remaining 40 per cent of production intended for civil consumption, it appears, mills are selling at moderate rates. It is only speculative activity in the free markets that has been responsible for the abrupt rise in prices for manufactured goods in recent months. Even on the basis of mill rates it appears that there is scope for an increase in the price of cotton. It is therefore not surprising that there has been considerable agitation against the latest order. Representations in regard to the need for control of yarn and cloth prices have been made by several prominent leaders and it remains to be seen as to what exactly Government propose to do in this connection. A conference of representatives of provincial governments and vested interests is to be held on May 24 in New Delhi for the speeding up of the standard cloth production scheme. It is only to be hoped that the several points at issue will be considered at this meeting and some satisfactory solution found.

The food situation in Northern India is still difficult and the recent efforts of the Central Government to supply the deficit areas with large quantities has not had the desired effect. The position in Bengal especially is very acute and hoarders have been the only fortunate few to benefit from the present conditions. It is proposed that by restoring free trading in the Eastern zone, it will be possible to bring out the hoards and enable the consumer to get his requirements at considerably lower rates. The authorities have not still got over the stage of experimentation and it is deplorable to note that the average consumer is at the mercy of the Government official for his normal requirements. Whether as a result of the restoration of free trade, it will oe possible to bring about a general decline in prices cannot be definitely be said but the desired effect might not be achieved if there is no understanding between the authorities concerned. Instead of there being a decline in prices in the acutely affected areas, competition in buying may push up prices in provinces like Bihar and Orissa. The provincial governments also do not seem to have been consulted properly as is evident from the protests of the Orissa Government and its decision to buy up surplus stocks against an anticipated shortage.

(*From Our Correspondent*)

Madras, May 19.

THE Provincial Educational Conference was held in Vellore, not long ago, Mr. K. Rangaswami Iyengar, Headmaster, Hindu Theological High School, presiding. The President had a good many criticisms to offer on all aspects of education besides approving the idea of minimum wages for teachers. Educational reconstruction after the war, he said, should take into consideration two essentials, namely, the provision of all facilities for every child in order to develop his hidden potentialities and personality to the fullest extent and, secondly, recognition of the inherent unity between the cultural and technical aspects of education. The Basic Scheme of education that emerged from Wardha five years ago, he believed, would be finally established in this country and the superstructure will have to be erected on it. This would mean the scrapping of a good deal of the present scheme of Secondary and Collegiate education. Compulsory primary education, planned to obliterate illiteracy, should be worked on a nation-wide scale. The ludicrously low salaries of teachers came in for severe condemnation. It is sad to remark that the dignity and value of the teaching profession has met with so little appreciation that Mr. Rangaswami Iyengar still looks to the will-o'-the-wisp of a national government for proper appreciation of the teacher's function and to obtain for the growing class with its professional spirit, recognition as servants of the nation. Anybody who is so ill-paid as to be constantly immersed in the balancing of his own domestic budget is the least fitted for the noblest of all professions. To-day others besides teachers should worry over the teachers' lot for it is the development of the nation that is ultimately affected. Though the Sargent's Committee's findings require the raising of salaries, nothing has yet come of it. The president, after touching on the need of discipline and other related "class-room" problems in these extraordinary days, referred to the lack of respect and consideration for teachers by the public. He wound up with the remark that teachers should cherish the cause of national freedom, taking care to eschew controversial politics. For, it is deplorable that communal politics has not only entered the educational profession but thrives in it.

Immediately after his return from Delhi, Dr. P. Varadarajulu Naidu was interviewed by a representative of the *United Press*. It may be gathered from the interview that the Hindu Mahasabha's immediate object is the setting up of national and popular governments in Provinces where Hindus are in a majority and forming coalition governments in all the provinces. Only popular governments could handle successfully the food and other vital problems, in the view of the doctor. The Mahasabha's leaders like officials and non-officials in Delhi are agreed on the need for popular government though the Mahasabha leaders do not believe in the possibility of forming a National Government at the Centre until after the war. The Mahasabha stands up for utilising even the limited opportunities for carrying on constructive work. Commenting on the main resolution of the All-India session held in Delhi, Dr. Naidu affirmed the definite antagonism of the Mahasabha to the demand for Pakistan, which, Dr. Naidu said, would be opposed by the Sabha to the last drop of its blood, should the British Government grant Pakistan. Refuting the statements published in the press regarding a split in the Mahasabha ranks, Dr. Naidu emphasised that the leaders were in complete accord with the ideology, policy and programme of the Sabha. As for the policy of the Mahasabha in South India in respect of provincial matters, the forthcoming Conference at Tanjore may be able to give a definite lead since Dr. Shyamaprasad Mookerjee is coming down to guide the Tanjore Conference.

The restrictions imposed on the transport of rice for personal use from any of the surplus districts to areas within the Province have undergone a slight modification so as to ease the food situation of urban families owning lands. According to the original government notification, the stipulation was that one bag of rice containing not more than 3 maunds or two bags of paddy containing not more than 5 maunds could be thus transported. But the urban household consists of more than five members. Five people constitute the normal family and their requirements naturally exceed the 2 maunds of rice allowed to be transported. Hence, the Commissioner of Civil Supplies, has defined the limit as 2 bags of rice not exceeding 4 maunds instead of one bag of rice not exceeding 3 maunds. This concession is restricted to rice only. The original concession allowing the consumer to choose between paddy and rice has ow been withdrawn, as the transport of paddy demands more wagon space.

(*Continued from page* 893)

cultivation. The one and only condition imposed on the lessees is in consonance with the principles of the "Grow More Food' campaign, namely, that only food crops should be raised on these lands, during the period of the lease.

Outbreaks of cholera in epidemic form in the Bombay province, it has been found, originate in canal areas in which congregations of labourers are employed in connection with sugarcane-crushing. Labourers' housing conditions in these areas and in some sugar factories are incompatible with proper sanitation. There are also a large number of construction works and camps connected with the War Department, where the contractors have gathered together large bodies of labourers. To prevent outbreaks of cholera, the Government has felt it desirable to arm itself with powers to control labour lines and sanitation in areas outside municipal and cantonment limits. A draft Bill conferring the necessary powers has been published in the Government *Gazette*. The draft Bill imposes on employers the obligation to furnish to a controlling officer information as to the nature of work on which his labourers are employed and the number employed.

Representatives of the Standing Haj Committee of the Central Legislature, the Port Haj Committees of Bombay, Calcutta and Karachi and of shipping companies, met in conference here on Monday, May 10, to discuss the extent to which the recommendations made by Mr. J. A. Rahim, officer on special duty, affecting the structure of pilgrim ships, were practicable. Mr. G. Z. Bozman, Secretary, Indian Overseas Department presided. The occasion was utilised also for a free exchange of views on the many Haj problems such as berth accommodation in existing pilgrim ships and in new ones.

Jute and Jute Manufactures

(By Our Jute Correspondent)

Calcutta, May 20.

In the early part of the week the market opened on a quiet modest tempo, mills generally being unwilling to commit themselves to further sales into the bazaar and operators in the latter being uncertain were content to lay off for a little breathing space. However as the week progressed the tempo has quickened and there has been an appreciable upward trend in both manufactured goods and the raw material. Several factors have contributed to produce this effect. The successful conclusion of the campaign in Tunisia has been accompanied by predictions of high military and naval authorities that the Mediterranean would soon be safe again for the safe passage of our ships by this route. The Bazaar appear to view this information as the panacea for all their shipping troubles and the difficulties of exporting jute and jute goods, so that with renewed confidence they came out as buyers at advancing rates for both Hessians and Gunnies and thereby induced mills to place further orders albeit somewhat sparingly.

Another factor must however be given its due importance and that is the almost record production by the I.J.M.A. and the Gagalbai Mills of their manufactured goods during April 1943. This reached the figure of approximately 120,000 tons and was mainly due to the 60-hour working by the mills for the short period up to the 17th of May, to complete the Government order on U.S.A. account with the unsealing of idle looms and also the fact that April was a full working month without the interruption of any holidays. This is nevertheless a remarkable advancement epsecially during wartime and shows how well organised the Jute Industry is, to reach this figure in spite of the disorganisation caused by the shortages of foodstuffs, the difficulties of obtaining adequate supplies of coal and the numerous materials required for proper maintenance. The most satisfactory feature however is the exceptionally large export of these goods which the mills were able to effect during the same month of April which amounted to no less than 110,000 tons approximately. Had the mills been unable to clear this quantity by the beginning of March their stock position would have been unduly heavy with the inroads. Government have had to make on their godown accommodation on military stores and other accounts. Whilst on this aspect another commendable feature is that although the percentages of clearances on Government a/c. have shown sharper rises nevertheless the bulk is still predominantly on commercial requirements.

Estimated jute arrivals on the other hand present a much more dismal picture and are as under:—

	1942 (*in bales*)	1943 (*in bales*)
Total to mid-May ..	1,12,000	2,04,000
Add July-April ..	54,41,000	55,68,000
Total July to mid-May ..	55,53,000	57,72,000

The total arrivals by rail and steamer up to the 15th May of only 2,04,000 is very disappointing as the equivalent in jute of mills production figures during April amounts to a consumption of no less than 6,75,000 lakhs of bales and even on their present working hour basis to about 6,00,000 lakhs of bales. The prospects of increasing the supplies of jute to Calcutta must for the present be ruled out entirely and in fact further deterioration has to be faced, until the supplies of foodstuffs can be equalised in the province and stocks of coal and fuel which are dangerously low be replenished to more satisfactory levels. The situation has to be recognised that the Railway services and the depleted fleets of inland river services are unable to cope with the demands made on them by both the Government on the provinces expanded industrial war effort as also military account and commercial interests with which must be linked the domestic needs of Bengal inhabitants. This inadequacy is more likely to force mills back to a resumption of 45 hours working per week than any other factor and its portents are significant.

The River Steam Services should receive the consideration and support that is due to them and should be built up without further delay to at least their normal pre-war capacity. This can only be done by returning to them their tugs and steamers which were requisitioned and of which there is an acute shortage, and supplying to the R. I. N. under the vastly increased naval construction which is going on around Indian coast, vessels best suited to their purpose and the duties they are called on to perform. Once the campaign in Burma and on the Arakan coast gains impetus there must be a further call on these already strained services to cope with military demands nor can wastage which fortunately hitherto has been negligible through enemy action be overlooked. Economic conditions in a great part of this province depend on her waterways so that the time at Government's disposal to build up these essential services is very limited.

The loose jute market and to a lesser extent the Pucca bale market firmed up as the price of Hessians and Gunnies rose but whilst the turnover has been on a limited scale substantial advances in Loose Jute from what were nominal rates have been recorded. Further business in new crop has been transacted in Supervised marks from Rs. 19-4 and Rs. 16-4 for Mids. and Bots. to Rs. 19-8 and Rs. 16-8. Selected and Medium Weedings have also been dealt in from Rs. 19-1 and Rs. 16-1 to Rs. 19-4 and Rs. 16-4 with buyers over. Old crop has been done at Rs. 17 and Rs. 15-8 for European marks Bots and X and Supervised Jat X at Rs. 14-12 with District at Rs. 14-4. Supervised Jat and Bengali marks have also been done from Rs. 16 to Rs. 16-8 basis for Bots and District Tossa at Rs. 19 and Rs. 16 for Mids. and Bots.

There was a good demand by mills for ready jute in the Bazaar and here prices have shown a sharp advance of fully -/12/- per maund during the week. Current rates are now approximately Rs. 20, Rs. 17 and Rs. 15 for Mids. Bots. X respectively. Pucca bales purchases by mills have mainly been confined to the low grades for which there was a steady demand. Marwari N.C. cuttings were sold at Rs. 48 to Rs. 50 with M.C.S. at approximately Rs. 2 less.

In spite of the dullness in the Hessian export enquiry, prices have been well maintained by local inter-bazaar transactions. Prices of 40"x8 oz. have fluctuated from Rs. 21 basis to Rs. 22 near delivery and in 40"x10 oz. from Rs. 26-13 to Rs. 28-8 at which level we close steady.

American stock figures show stocks down by 80 lakhs and consumption up by 30 lakhs which have had a steadying effect.

Heavy Goods business has been mostly in B. Twills for all positions chiefly to speculators, at the close B. Twills have been done at Rs. 74 ready and Rs. 73-12 all May. Flour bags have been done at Rs. 80 October-December.

The closing is firm.

JUTE

Calcutta, May 20.

Rather quiet conditions were noticeable till Wednesday this week in the raw jute market. Only during the last few days a definitely firmer feeling has been prevalent in sympathy with the strength of the hessian market. Earlier in the week mills were not inclined to buy on a large scale and were awaiting further developments. With the sudden rise in prices for hessian and the improved shipping outlook, with the reopening of the Mediterranean route, there was a resumption of buying by mills. The slight recession in prices noticeable at the time of last writing has been wholly regained and quotations at the time of writing are back to the highest levels quoted some time back. Reports from mofussil districts are satisfactory though, it is reported, that slightly more rain will be advantageous for the growth of the younger plants. Arrivals are coming in on a greater scale though even the higher rate of arrivals is still below the level of mills' consumption.

In the loose jute section, mills are reported to have shown some interest during the last two or three days with sellers rather reserved. Indian Jat Middles and Bottoms were done at Rs. 19 and Rs. 16 per maund, while Supervised Jat were 4 annas higher.

In the pucca bales section, not much business has been done for export. Dundee Daisee 2/3 were done at Rs. 93 per bale by shippers. Mills are reported to have purchased Firsts and Lightnings at Rs. 97 and Rs. 92 per bale respectively. Cuttings N.C. and M.C. were higher at Rs. 48 and Rs. 50 respectively.

JUTE MANUFACTURES

Calcutta, May 20.

The jute manufactures market has been definitely firmer during the past week. There has not been any great improvement in the volume of business from overseas markets and most of the transactions done during the past few days have been on account of inter-bazar operators. The strength of the market has been due to the publication of satisfactory U. S. stock and consumption figures for the month of April and the hopes that the easier shipping position, as a result of the reopening of the Mediterranean route, would be reflected in higher exports. As mills are not free sellers for forward postions, owing to the difficulty in regard to supply of the raw material, bazar operators have been successful in taking up prices. There was some selling at the higher levels, but there has been a rally towards the close and closing quotations are at the highest levels for the week. 9 porters quoted Rs. 22 for May, June and July while October-December were Rs. 21-12. 11 porters Ready were Rs. 28-5, June Rs. 28-7, July-September Rs. 28-8 and October-December Rs. 28-4.

In the Heavy Goods section, business is still on speculative account from Northern India and sellers are very scarce. B. twills for July-September sold at Rs. 71. The quotation for May delivery was Rs. 73-8, Liverpool twills Rs. 75 and Cornsacks Rs. 70.

The U.S. stock and consumption figures for the month of April 1943 show that there has been a further increase in consumption from 45 million yards in March to 48 million yards in April. The level of consumption, however, is lower if a comparison is made with the corresponding period in 1942, the figure being 68 million yards. It was pointed out earlier that having regard to the moderate increase in local stocks, even with the high level of production, shipments during the month should have been satisfactory. Stocks afloat are 150 million yards against 148 million yards while stocks spot are 46 million yards against 56 million yards. The increase in consumption for two months in succession can be taken to mean that consumers are more hopeful regarding future supplies, and that with the easier shipping position, it will be possible to ensure a higher rate of exports. The figures are given below:

U.S.A. HESSION STOCK AND CONSUMPTION
(*Including Pacific Coast Business*)

COTTON

Calcutta, May 20.

The continued rise in prices in the Bombay raw cotton market, even with the suspension of trading in options and the ban on forward trading in the new crop, has been responsible for the promulgation of a new order by the Central Government prohibiting all forward trading in the current crop and thus putting an end to speculative activity. Early in the week on hopeful news regarding the war situation, there was a sharp increase in speculative activity and the quotation for Jharilla May was marked as high as Rs. 644. There was considerable difficulty in regard to deliveries and as many bulls had bought in upcountry centres there was pressure to provide adequate transport facilities for these in time. As it was considered desirable to prevent unnccessary use of available wagon space and check speculative rise in prices for the raw material the Government of India have thought it necessary to prohibit forward contracts in the current cotton crop. Operation of the prohibition has been postponed to after the close of business on May 20, 1943. Contracts outstanding at the close of business on Thursday will be closed at a rate to be fixed by the Government.

Since the passing of the new order no business has been transacted in the Bombay cotton market and there is a general tendency to await the fixation of rates by the Government of India. Unofficial quotations for Jharilla July are reported around Rs. 575.

GOLD

Calcutta, May 20.

Thanks to the adoption of anti-inflationary measures a definitely easier tendency has been noticeable in the Bombay bullion market and a substantial decline in prices has been recorded in the quotation for both gold and silver. The decline in prices for silver is not so pronounced as for gold. Speculative demand appears to be satisfied for the time being and it is generally felt that with the contraction of currency as a result of anti-inflationary measures a substantial decline in prices will be recorded. Gold Ready quoted Rs. 88-10 and First Settlement Rs. 88-4 against Rs. 92-8 and Rs. 92 respectively at the end of last week. Sovereigns quoted Rs. 63 against Rs. 64-8.

SILVER

Calcutta, May 20.

The silver market was inclined to be rather firm earlier in the week on the strength of the cotton market. So far nothing is known regarding the progress of negotiations for the import of silver on lease-lend basis. The fall in prices for gold and the uncertainty regarding the future of cotton prices has certainly been reflected in the lower quotations in the silver market towards the close though, the decline is not anything in proportion to that of the gold market. Silver ready closed at Rs. 130 against Rs. 133-4 and First Settlement Rs. 129 against Rs. 131 at the end of last week.

There has been no change in the conditions in the London market. Only a very small amount of business has been transacted and the quotation for both spot and forward remains unchanged at 23½d.

PIECEGOODS

Calcutta, May 20.

There has been considerable agitation for control of yarn and cloth prices in recent weeks. Yarn prices have touched unheard of levels and there is a great scarcity of yarn supplies. Unless something is done to ensure proper supplies of yarn to handloom weavers and millowners, and cloth is also distributed to the consuming public in greater quantities, there is no likelihood of any appreciable marking down in prices. The provincial governments also are very anxious about the situation in regard to cloth and yarn and this is borne out by the latest measures taken by the U. P. Government to check speculative activity. Forward trading in the cloth market has been entirely prohibited in the U. P.

Stock Markets to-day and to-morrow

THE NEW ORDINANCES AND STOCK MARKETS

ON Tuesday this week two new Ordinances were promulgated by the Government of India as part of the anti-inflationary drive. These two new Ordinances completely set at rest the fears regarding the possibility of an increase in taxation to sterilise the purchasing power of the masses and check effectively the activities of speculators. It will be remembered that at the end of last week there were strong rumours that there would be an increase in the Excess Profits Tax and that on heavy bear selling, there was a decline in prices for the popular counters in both the Bombay and Calcutta markets. The question was discussed in detail in the main issue of *Indian Finance*, dated May 15, 1943, and it was pointed out that it would be possible for Government to get large sums of money if only they decided on the immediate collection of tax amounts due to them, on account. The new Ordinance provides for the payment of all excess profits except 6 2/3 per cent to the Government on the basis of a summary assessment immediately after the closing of accounts. It is estimated that in this manner it would be possible for the Government to get as much as Rs. 100 crores.

* * * *

The new measures do not in any way constitute an increase in the tax burden, but only make it obligatory on the part of every taxpayer to deposit with the Government 13 1/3 per cent of the excess profits. This amount will be repaid within twelve months after the termination of hostilities and carry interest at the rate of 2 per cent. In addition the taxpayer will be entitled to a refund of 6 2/3 per cent of the tax amount. Thus companies are left only with 6 2/3 per cent of the excess profits besides the earnings for the standard period for distribution of dividends, capital expenditure or otherwise.

* * * *

This immobilisation of funds, it is pointed out, will result in a reduction in dividends in many cases and prevent any appreciable increase in the distribution to shareholders even with substantial improvement in earnings. So far as a very small proportion of excess profits is available for dividends, it might seem at first sight that the directors and managing agents will have to perforce effect a reduction in the rate of dividend. But if a close study is made of balance-sheets recently published, it will at once be evident that it will not be at all difficult to maintain dividends not to speak of being able to improve on them with a further rise in earnings. As 20 per cent of the excess profits is compulsorily set aside by the Government, there is no need for any special allocation to reserves. As the balance can be utilised in full for distribution as dividends there is no need for taking any unduly pessimistic view. In the case of companies which have a very low standard of profit the compulsory deposit might affect the distribution of dividend. If they have sufficient reserves there is nothing to prevent the payment of satisfactory dividend even with a draft on the reserves.

The Calcutta market has not taken to the new measures very seriously as even with the compulsory deposit it is felt that there will not be any appreciable decline in prices as even on the basis of the latest dividends a substantial yield is available at the present levels.

The Bombay market seems to have taken a more serious view of the new measures. It is felt that it will be difficult for many companies, who are poorly placed, to declare any good dividends to justify the present quotations in the market. The slump in the cotton market following the passing of the new control order has also had a depressing effect.

* * * *

As for the special order prohibiting the floatation of new companies, public sale of securities and any new issues of capital, the position is not quite clear. Whether the issue of free bonus shares is affected under the new order is not known. That is the reason why even with the declaration of a satisfactory dividend and the announcement of a bonus share, free to shareholders for every ordinary share held, there has been a decline in Cawnpore Textiles from Rs. 31-12 to Rs. 28-8. For the same reason, whether the new issue of capital by the New Victoria Mills Company, Limited is permissible under the Ordinance is difficult to say. The New Victoria Mills, according to a circular to the shareholders, is to issue a further Rs. 2 lakhs 6 per cent cumulative preference shares of Rs. 5 each at a premium of Rs. 4 per share. The new share are to be offered to the existing shareholders in the first instance, in the proportion of one preference share and one ordinary share for every seven shares held. As the ordinary shares are quoting around Rs. 10-8 and the preference shares around Rs. 12-8 the benefit to shareholders, as a result of the new issue, is as much as Re. 1-4 per share. It is pointed out that additional capital is required for financing capital expenditure in the postwar period as the existing machinery are very old and a complete overhaul will be necessary in the postwar period in order to be able to face keen competition.

* * * *

The results of the *Elgin Mills Company, Limited* for the half-year ended March, 1943 are very satisfactory. The net profit, before providing for taxation and depreciation, is Rs. 61,69,173 against Rs. 31,48,519 for the previous six months. The amount provided for taxation is Rs. 48,32,228 against Rs. 23 lakhs while the allocation to Debenture Sinking Fund is unchanged at Rs. 25,000. Depreciation is Rs. 2.5 lakhs (Rs. 2 lakhs) while the transfer to the General Reserve is Rs. 299,175 (Rs. 199,787). The ordinary dividend is considerably higher at Rs. 3-4 per share against Re. 1-12 for the previous half-year. The amount carried forward is Rs. 239,652 against Rs. 204,181 brought in.

The 7 per cent mortgage debenture bonds of Rs. 10 lakhs fall due for payment in September 1943, and it is expected that these debentures will be redeemed on the due date. The Debenture Sinking Fund for the purpose is as much as Rs. 10,12,287. There is, therefore no need for any financial arrangements in this connection. As a result of the latest ordinances, the company will have to put in a deposit with the Government of about Rs. 8 lakhs so far as the earnings for the half-year are concerned. It will not be difficult for the company to find this amount as the reserves of the company are ample. On the basis of the latest dividend, the shares afford a very high yield being over 9 per cent tax-free.

* * * *

The accounts of the *Belgachi Tea Company, Limited* for the year ended December 31, 1942 make excellent showing. Thanks to the record crop, owing to very favourable weather conditions, it has been possible to report a substantial increase in earnings. The net profit, before providing for taxation and depreciation, is Rs. 1,31,489. After reserving Rs. 21,867 for taxation and transferring 5,000 to Reserve for staff expenses and Rs. 35,000 to Reserve for Renewals and Additions the dividend has been increased to 40 per cent from 20 per cent for 1941. The dividend has been increased for the fifth year in succession, that in 1938 being only 5 per cent.

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, May 21.

Rather quiet conditions have been noticeable on the Calcutta Stock Exchange during the latter half of the period under review and business passing has been on a very restricted scale. The easier tone of the market has been mainly due to the new Ordinances promulgated by the Government of India making it compulsory on the part of the tax-payers to pay into the Government's coffers all but 6 2/3 per cent of excess profits. Even at the end of last week a definitely easier feeling was noticeable with the report about the possibility of an increase in the rate of the Excess Profits Tax. As the market was prepared for an increase in the rate of tax and as the proposals now made aim at only immobilising funds, the effect of the new measures on shares has not been very pronounced and such marking down in prices as has taken place is only precautionary. There is a tendency to await further developments. The undertone in the several sections is quietly steady.

In the giltedged securities section steady conditions have continued to prevail and there is practically no change in the quotations. Business passing, as usual, has been on a restricted scale. 3½ per cent Paper is unchanged at Rs. 94 while among terminable loans, 3 per cent Second Defence loan were Rs. 100-10. 3½ per cent 1947/50 Rs. 103-10 and 5 per cent 1945/55 Rs. 107-2. There has been a further slackening in money conditions and the treasury bills rate has come down to one rupee and one anna per cent per annum from one rupee one anna and seven pies per cent per annum.

There has been no business in public bodies' debentures. The only transaction recorded in industrial debentures has been in *India General Navigation* at Rs. 101-8.

Among preference shares, *Fort Gloster* were Rs. 175, *Kinnison* Rs. 175, and *Northbrook* Rs. 148. *Steel Corporation* were Rs. 126 cum-dividend, *Basanti* Rs. 12-12, *Orient Paper* Rs. 117 and *Plywood Industries* Rs. 104.

Bank shares have been steady with *Imperial Bank* fully paid quoting Rs. 1,729 and contributories Rs. 432. *Reserve Bank* were Rs. 108 and *Punjab National* Rs. 235.

In the Coal section, easier conditions have been noticeable in sympathy with other sections. *Amalgamated* were Rs. 35-3

Easier conditions have been noticeable in the Coal section in sympathy with other sections but towards the close there has been a slight rally in prices. *Amalgamated* after being lower at Rs. 35-3 are now Rs. 36-3 while *Burrakur* were Rs. 15 ex-dividend. *Bengal* were nearly ten points lower at Rs. 445, *Central Kurkend* Rs. 19-9, *Equitable* Rs. 36-8, *Nazira* Rs. 9-4, *New Beerbhoom* Rs. 19-2 and *North Damuda* Rs. 7. *Samla* were Rs. 3-7, *South Karanapura* Rs. 5-8 and *Talcher* Rs. 3-8.

In the Jute section there has not been any appreciable reaction in prices as it is felt that the dividend distribution cannot be affected to any great extent by the new Ordinances promulgated by the Government of India. Quotations as such are lower only with the quieter tone of other markets. *Anglo-India* were Rs. 388 against Rs. 397, *Bally* Rs. 336 against Rs. 341, *Howrah* Rs. 61-10 against Rs. 61-12, *India* Rs. 522 against Rs. 553, *Nellimarla* Rs. 21-14 against Rs. 22-8, *Kamarhatty* Rs. 544 against Rs. 552 and *National* Rs. 26-8 against Rs. 26. *Nuddea* were not very much changed at Rs. 94-12. *Orient* were Rs. 2-10, *Presidency* Rs. 6-7 and *Shri Lachminarain* Rs. 19.

In the Engineering section, only two counters were affected, *Indian Irons* and *Steel Corporation*, but the quotations at the time of writing are higher than the lowest levels touched for the week and are not very much lower on balance. *Indian Iron* were Rs. 34-8 and *Steel Corporation* Rs. 25-10 against Rs. 34-12 and Rs. 25-10 respectively at the end of last week. *Britannia Engineering* were Rs. 15-12, *British India Electric Construction* Rs. 12-12 and *Indian Malleable Castings* deferreds Rs. 7-8. *Jessop* were a point lower at Rs. 19-13 while *Kumurdhubi Engineering* were very steady at Rs. 8-7 and *Marshalls* at Rs. 3-8.

Sugar shares have naturally been easier as it was generally expected that, with the higher level of earnings for the current season, it would be possible in the case of many companies to distribute higher dividends. As the reserve position of many companies is not quite strong, it is very doubtful if the Managing Agents will decide on the payment of a higher dividend by transferring large sums from the reserves against the amount of E.P.T. refund. *Belsund* were Rs. 11-2, *Carew* Rs. 17-14, *Champaran* Rs. 35-4, *New Savan* Rs. 16-5, and *U. P. Sugar* Rs. 21-11. It is worth mentioning in this connection that sugar companies which are registered in Native States are better placed.

In the Tea section, there has been an appreciable decline in prices, *Banarhat* being Rs. 8-15, *Hasimara* Rs. 61-2, *Hattikhira* Rs. 31-4, *Huldibari* Rs. 37-8, *Sapoi* Rs. 20-4, *Sonai River* Rs. 22-12 and *Tezpore* Rs. 14.

In the Miscellaneous section, a slight decline in prices was noticeable all round, *Aluminium Corporation* being Rs. 18-4, *British Ceylon Corporation* Rs. 17-12, *B. I. Corporation* Rs. 6, *Indian Cable* Rs. 28-12, *Indian Wood Products* Rs. 29-10 and *Rohtas Industries* Rs. 29-8. *Calcutta Tram* were the only exception being quoted higher at Rs. 21-13. Among Paper shares, *India Paper Pulp* were a few points lower at Rs. 87-8 and *Titaghur* Rs. 25. *Orient Paper* were steady at Rs. 29-8, *Sri Gopal Paper* at Rs. 23-2 and *Star* at Rs. 22. *Midnapore Zemindary* were Rs 82-8 and *Assam Saw* Rs. 4-8.

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Bombay, May 20.

The local stock exchange has been quiet during the period under review. The promulgation of two new Ordinances by the Central Government, the first calling upon the tax-payers to deposit with the Government all but 6 2/3 per cent of the excess profits and the second dealing with the floatation of new companies, have set at rest the various rumours that were current on the stock exchange for some time past. Though the Ordinances did not take the market by surprise the immediate reaction was unfavourable. The decline was due to the anxiety on the part of operators to be on the safe side pending careful scrutiny of the new measures; and to a general feeling that the new Ordinance was also an indirect scheme for bringing about a limitation of dividends. Out of the excess profits only a small portion is available for distribution to shareholders. Since the majority of companies that are paying high dividends at present belong to the cotton textile industry, mill shares recorded a fall. Other sections also declined in sympathy with Textiles. A period of readjustment in the light of the new measures followed and today the stock exchange exhibited a better feeling, with the Steel section particularly strong. Mill shares have also improved in sympathy with the Steel section. The absence of any announcement regarding control of cloth prices has also been an encouraging factor.

The giltedged section continued to be steady with 3½ per cent Government Paper quoting Rs. 94.

Mill shares were the worst sufferers this week. The announcement of two new Ordinances by the Finance Member early this week had a discouraging effect on this section. That part of the Ordinance which makes it compulsory on the companies to deposit with the Government all but 6 2/3 per cent of their excess profits imparted a feeling of nervousness among operators and investors. Selling pressure was encountered and prices declined considerably. Scattered selling still persists though at the close of transactions today prices are a shade better obviously due to the absence of any announcement regarding control of cloth prices. The latest quotations are:—*Bombay Dyeing* Rs. 1,930; *Century* Rs. 480; *Kohinoor* Rs. 855; *Phoenix* Rs. 820; *Simplex* Rs. 338; *Svadeshi* Rs. 567; *Colaba Land* Rs. 271; *Central India* Rs. 472.

Rather easy conditions prevailed in the Steel section in sympathy with Textiles. But there was no violent fluctuation in prices. The decline immediately after the announcement of the Ordinances was only in sympathy with the Textile section. Prices firmed up in mid-week and at the moment an even better feeling is noticeable. *Tata Steel* deferreds are quoting at Rs. 1,935 after being lower at

(Continued on page 917).

TRANSACTIONS DURING THE WEEK

CALCUTTA STOCK EXCHANGE

(From 13th May to 19th May, 1943 both days inclusive)

THE GANGES MANUFACTURING COMPANY, LIMITED

NOTICE is hereby given that the Fifty-fifth Ordinary General Meeting of the Shareholders of the above Company will be held at the Registered Office of the Company, No. 2, Fairlie Place, Calcutta, on Tuesday, the 8th day of June, 1943, at 12 noon.

AGENDA

(1) To receive and approve the Report of the Directors for the half-year ended 31st March, 1943.
(2) To receive and pass the Company's Audited Profit and Loss Account for the half-year ended and Balance Sheet as at the 31st March, 1943.
(3) To declare Dividends on Preference and Ordinary Shares.
(4) Any other ordinary business.

The Share Transfer Register will remain closed from 29th May to 8th June, 1943, both days inclusive.

Shareholders and holders under Blank Transfer are reminded that upon declaration of the Dividends, the Dividend Warrants will be posted at once to registered Shareholders or their Mandatees. No application for payment will be necessary.

Applications for Dividends from holders under Blank Transfer will not be considered. They are therefore recommended in their own interests to send us their Shares for registration as soon as possible and not later than the 28th May, 1943.

By order of the Board,
MACNEILL & CO.,
Managing Agents

Calcutta, 21st May, 1943.

(Half-yearly General Meeting at Cawnpore on 2nd June, 1943, at 9-45 p.m.)

Audited accounts for the half-year ended 31st March, 1943:—

	Rs.	A.	P.	Rs.	A.	P.
The results for the period, after providing for taxation, show a profit of .. .. .. from which has been deducted:—				7,01,772	15	0
Debenture Sinking Fund ..	6,250	0	0			
Depreciation	1,00,000	0	0			
General Reserve	3,98,900	14	6	5,05,150	14	6
..				1,96,622	0	6
To which must be added the carry forward from the the previous half-year				94,187	14	3
Leaving at credit of Profit and Loss Account ..				2,90,809	14	9
This balance the directors recommend should be disposed of as follows:—						
In payment of a dividend of 10 annas per share for the half-year ended 31st March, 1943 ..				1,87,500	0	0
Carry forward				1,03,309	14	9

The Directors propose to capitalise Rs. 7,50,000 of the General Reserve by the issue of one fully paid up share of Rs. 2-8 for each share held as a Capital Bonus which will rank *pari passu* for dividend with the existing shares as from 1st April, 1943. A Notice calling an Extraordinary Meeting on 2nd June, 1943, to consider and, if thought fit, pass the Resolutions necessary to carry this into effect has been issued. At the same time the opportunity will be taken of proposing that the Authorised Capital of the Company should be increased to Rs. 30,00,000.

An appeal made by the Company to the Central Board of Revenue in connection with Excess Profits Tax has been upheld. As a result, a sum of approximately Rs. 68,400 is due to be refunded and this has been taken into account in the amount now reserved for taxation, which it is considered is sufficient to meet all taxation liabilities at current rates up to the date of closing.

Raw materials have been taken at cost and manufactured goods at/or under market rates.

Managing Agents.—Messrs. Begg, Sutherland & Co., Ld.

Authorised, Issued and Subscribed Capital—Rs. 7,50,000, *in* 3,00,000 *shares of Rs.* 2-8 *each fully paid up.*

ENGO TEA COMPANY, LIMITED

Audited accounts for the year ended 31st December, 1942:—

The year's working resulted in a profit of Rs. 59,797-5-1 after providing for depreciation. After making sundry adjustments, providing Rs. 12,000 for Taxation, transferring Rs. 15,000 to Equalization of Dividend Fund and Rs. 5,000 to Reserve Fund, there remains a balance of Rs. 36,964-8-0 at credit of Profit and Loss Account. From this the directors recommend the payment of a dividend of Rs. 22-8-0 per share leaving a balance of Rs. 9,964-8-0 to be carried forward.

A total crop of 2,379 mds. was secured of which 1,736 mds. have been sold for Export at an average price of As. 11/9 per lb. and 589 mds. have been sold for internal consumption at As. 14/11 per lb.

Estimates for the current year have been framed for a crop of 2,500 maunds to cost Rs. 1,12,520.

Planted Area .. 264.81 acres.

Managing Agents.—Messrs. Andrew Yule & Co., Ltd.

(Continued from page 900)

Rs. 1,880. *Tata Ordinaries* at Rs. 392 and *Indian Iron* at Rs. 34-12.

In sympathy with other sections, the miscellaneous section also displayed rather quiet conditions with the majority of shares recording considerable losses. *Alcock Ashdown* are at the moment quoting at Rs. 890-8 ; *Belapur Sugar* at Rs. 238 ; *Bombay Steam* at Rs. 550; *Scindia Steam* at Rs. 31-2 ; *Shivrajpur* at Rs. 66 ; *Premier Construction* at Rs. 168 ; and *A. C. C.* at Rs. 235.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, May 17.

Rather easy conditions prevailed on the Madras Stock Exchange. The news of the Allied withdrawal on the Arakan front coupled with the rumours regarding the enhancement of E.P.T., unsettled the market. Business passing was on a considerably reduced scale and the popular speculative scrips in the Textile section shed a number of points. The plantings section also while remaining steady was not able to attract much attention. A feeling of suspense is in the air and widespread nervousness has become the order of the day. Until the question of limitation of dividends which is said to be under consideration by the Government is settled one way or the other, there is no likelihood of the market abandoning its present nervousness.

Mill shares have further declined under the influence of various adverse rumours.

THE GANGES ROPE COMPANY, LIMITED

NOTICE

NOTICE is hereby given that the Eighty-First Ordinary General Meeting of the Shareholders of the above Company will be held at the Registered Office of the Company, No. 2, Fairlie Place, Calcutta, on Tuesday, the 8th day of June, 1943, at 12-10 p.m.

AGENDA

(1) To receive and approve the Report of the Directors for the half-year ended 31st March, 1943.
(2) To receive and pass the Company's audited Profit and Loss Account for the half-year ended, and Balance Sheet as at, the 31st March, 1943.
(3) To declare a dividend.
(4) To elect a Director.
(5) To appoint Auditors and fix their remuneration.

The Share Transfer Register will remain closed from 29th May to 8th June, 1943, both days inclusive.

Shareholders and holders under Blank Transfer are reminded that upon declaration of the Dividend, the Dividend Warrants will be posted at once to registered Shareholders or their Mandatees. No application for payment will be necessary.

Applications for Dividends from holders under Blank Transfer will not be considered. They are therefore recommended in their own interests to send us their Shares for registration as soon as possible and not later than the 28th May, 1943.

By order of the Board,
MACNEILL & CO.,
Managing Agents.

Calcutta, 21st May, 1943.

Cambodia ordinary were done at Rs. 45-8 ; *Trichy Mills* were Rs. 34-8. *Madura Mills* were lower at Rs. 69. *Janardana* (Ordy.) were Rs. 260 ; *Mettur Industries* were Rs. 330. *Coimbatore Spinning* and *Coimbatore Cotton* did not attract the usual attention and were crossed at Rs. 361 and Rs. 398 respectively. *Lakshmi* (Old) were done at Rs. 308-8 while *Lakshmi* (New) had buyers at Rs. 162. The turnover in this section has been comparatively small.

In the Plantings section also there was not the usual amount of business. The turnover was small but prices did not undergo any appreciable change. *Thirumbadi* were done at Rs. 5-7 while *O. V.* (Ordy.) changed hands at Rs. 15-6. *Nilgiri Neerugundi* were neglected at Rs. 13-8. *Nilgiri Plantations* were Rs. 2-1. *Midlands* were crossed at Rs. 23-14 cd.cr.

In the Miscellaneous section, the Mysore Group of shares was in good request. *Mysore Chemical Manufacturers* were crossed at Rs. 54-8 while *Mysore Chemical Fertilisers* were wanted up to Rs. 33-4. *Mettur Chemical* (Old) ordinaries were crossed at Rs. 27-12 and *Mettur Chemical* (New) ordinaries at Rs. 19-4 s.l. *Spencers* (Ordy.) were Rs. 7-9.

(Continued from page 899)

The amount realised on sale of teas for internal consumption is higher at 15 annas per lb. in 1942 against 7.4 annas in 1941 while the total net average selling price including proceeds of export rights sold, is also higher at 13.58 annas per lb. in 1942 against 11.79 annas per lb. in 1941. The total production cost of tea works out to 7.06 annas against 6.78 annas. Substantial increases in expenditure were incurred on account of increased costs of stores, compulsory Government War Risks insurances on tea stocks and estate buildings and equipment, allowance to establishment, etc., but the cost of production per pound of tea shows only a small increase due to the very large crop made.

To

The Shareholders,

Kesoram Cotton Mills Ltd.

Dear Sirs,

Re.: **SHAREHOLDERS' CLOTH SCHEME**

The Board of Directors of the Kesoram Cotton Mills, Ltd., are greatly concerned at the high prices of cloth prevailing in the retail markets. They have, therefore, framed a scheme for the purpose of giving some relief, how little soever, to the shareholders of the company by offering them Dhoties and Sarees at the wholesale Mill shop rates. Thus, the middlemen's profits and expenditure would be eliminated. The Board have no doubt that this action of theirs will be appreciated by the Shareholders.

It would be realized that it is not possible for your Company to offer an unlimited quantity or all the requirements of the shareholders and the scheme has to be necessarily restricted to proper limits. In the circumstances, the Board of Directors have decided to offer either one pair of Dhoties 10 yds. x 42 ins. or one pair of Sarees 10 yds. x 42 ins. against 4 full Ordinary Shares or 12 fractional (one-third) Ordinary Shares to every shareholder whose name will be registered in the list of shareholders on the 19th June, 1943. Less than this number of shares will not be a qualification for the offer. Similarly, one pair of Dhoties or one pair of Sarees as stated above, will be offered to the holder of each Preference Share whose name is registered in the list of shareholders on the 19th June, 1943.

The prices that each shareholder will have to pay are as follows :

1 pair or Dhoty ... Rs. 4-6-0
1 pair of Saree ... „ 5-0-0

Coupons will be sent to the Shareholders as soon as possible after the 20th June, 1943, most probably by the third week of July, 1943.

Local Shareholders can exchange the coupons for the goods mentioned in it after paying the necessary money at the Mill Shop. The Moffusil Shareholders should send their coupons as well as the necessary money to the Mill shop from where the cloths will be sent to the addressee postage or railway freight free. The address of the Mill Shop will be stated in the coupons.

The Shareholders who wish to avail themselves of this opportunity must send the coupons with the full amount of money so as to reach the Mill Shop within 30th September, 1943, after which date the coupons will expire.

This offer and the execution thereof are subject to any measures of Government control or rules and regulations or law that may be in operation or effect from time to time or any other circumstances over which the Company has no control.

Yours truly,
For KESORAM COTTON MILLS LTD.
Per Pro BIRLA BROTHERS Ltd.
B. Kumar,
Managing Agents.

WORLD OF INDIAN FINANCE

Friday Evening.

The coming event of advance tax collections is likely to cast its shadow and its shudders on the money market. This, perhaps, partly accounts for the slightly more usable conditions that prevailed both in Bombay and Calcutta in the short loan market. A steadier feeling was manifest ; but, while there were a few borrowers, lenders predominated. Interbank call money was quoting ½ per cent in Calcutta as well as in Bombay ; and, after a long interval, the rate may be said to be an effective rate. From this point of view, it is easy to understand the reduced applications for tender treasury bills this week ; for the same reason, the downward trend in the treasury bill discount rate was arrested. Against Rs. 8 crores of tender bills offered, applications came to Rs. 11,92½ lakhs. The average rate of accepted tenders is unchanged at rupee one and anna one per cent per annum. In this connection, we may draw attention to the fact that, while the most favourable tenders to the Government on May 18 were those at Rs. 99-11-9 per cent, there were, on May 25, some applications at Rs. 99-12-0 per cent. These applications were allotted in full. Those at Rs. 99-11-9 received allotment on the approximate basis of 69 per cent. The offer of tender bills for next week continues to be Rs 8 crores. Sales of tap bills between May 19 and May 24 totalled Rs. 1.40 crores. Sales at the tap rate of Rs. 99-12-0 per cent will continue.

While the seasonal factors must work in favour of further decline in the treasury bill rate, bringing it down to, say, twelve annas per cent, an offsetting factor in the coming weeks will be the prospect of tax payments that have to be made in connection with the new arrangement for E.P.T. It may be readily granted that the large-scale diversion of funds from the public to the Government, which may be expected to take place between July and September, should certainly induce not only steadiness but occasional stringency in the money market. There is every case for a change from the present state of embarrassingly idle funds to a state of reasonably remunerative employment of surplus cash. From the point of view of a healthy and properly functioning money market, the ideal condition will be neither the Scylla of all borrowers and no lenders nor the Charybdis of all lenders and no borrowers. If money rates will steady up and the turnover in the short-loan market will become livelier as a result of the tentative payments to be made in connection with the E.P.T., it is a development that is all to the good. At the same time, it will be neither desirable nor justifiable to permit a state of stringency or monetary squeeze to develop and persist. In relation to the currency situation and other factors, even after allowing for the considerable withdrawal of currency that will follow the advance tax payments, there is no warrant for anything like dear money rates. It must also be emphasised that the British monetary authorities have clearly demonstrated that a cheap money policy is quite consistent with heavy tax payments and continued subscriptions for defence loans. The goal of a continuing cheap money policy must never be lost sight of by the monetary authorities in India also. For the pursuit and enforcement of such a cheap money policy, the Reserve Bank authorities are now in possession of a pliant and nimble instrument in the shape of a large floating debt. By speedy and skilled adjustment between fresh sales of treasury bills and tax receipts, it will be possible for the financial authorities to preserve a correct poise in the money market. We have every confidence that Mr. C. D. Deshmukh, whose promotion to the governorship of the Reserve Bank is now reported to be a settled fact, can be relied upon to follow a policy that will keep the Indian money market in line with the leading money markets of the world like New York and London where cheap money is the declared and practical policy.

Another week has passed since the last review of the money market. And we have to record another bout of currency expansion. The Reserve Bank returns for the week ended May 21 show that active note circulation has crossed the Rs. 700 crore mark. The actual increase in the week under review is Rs. 4.46 crores. This is due to expansion of currency for Rs. 6 crores against sterling securities. Rupee coin registers a further fall of Rs. 52.62 lakhs. In the banking department, the deposits of the Central government show a small rise of Rs. 12.11 lakhs while the deposits of provincial governments are down by Rs. 1.26 crores. The deposits of member banks are higher by Rs. 47.74 lakhs. On the assets side, foreign balances are higher by Rs. 94.51 lakhs. That is to say, the Reserve Bank has acquired fresh sterling assets for Rs. 7 crores in the week ended May 21.

The statement of the Imperial Bank for the week ended May 21 establishes a new record for deposits at Rs. 181.48 crores. Changes under investments and advances are only of a minor nature. In the result, cash has increased from Rs. 26.88 crores to Rs. 28.96 crores.

The consolidated statement of the scheduled banks as at May 14 maintains the rising trend in bank deposits. The current account deposits have increased from Rs. 385.62 crores on May 7 to Rs. 388.60 crores on May 14, while fixed deposits have advanced from Rs. 124.67 crores to Rs. 125.52 crores. In fact, it may be said that this rise in bank deposits has been a steady feature since the beginning of April. Between April 2 and May 14, demand liabilities of scheduled banks have risen by Rs. 15½ crores and time liabilities by Rs. 3 crores. The total increase is, thus, Rs. 18½ crores. Part of this increase in deposits has been used up in the rise in advances by Rs. 8 crores. Balances with the Reserve Bank have gone up by Rs. 8 crores, cash in the till being higher by Rs. 1½ crores.

The exchange market has been continuing its dull but steady aspect. There was some enquiry for forward positions in export bills.

Banks are sellers of T.T. at 1s. 5 31/32d., for London Ready to six months forward.

Banks are buyers of three months D. A. bills on London at 1s. 6 9/32d., and for four months at 1s. 6 11/32d.

Banks are buyers of T.T. New York Ready at Rs. 329½.

Banks are sellers of T.T. New York Ready at Rs. 332½.

Interbank call money is quoting ½ per cent lenders.

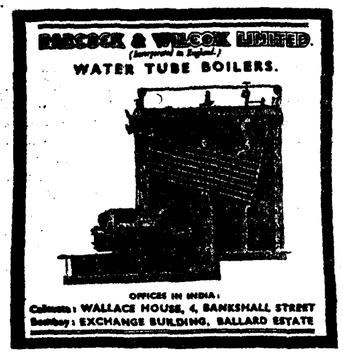
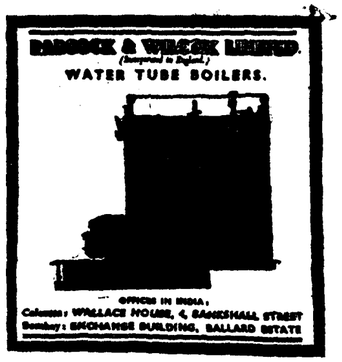
Finance Abroad

Thursday Morning.



THE House of Commons voted £1,000 million this week for the war as soon as it was asked to do so. The procedure never varies, and the expenditure of over £1,000 millions in four months made another vote of credit essential. Expenditure to August is to be covered by the new vote, but the main interest of Sir Kingsley Wood's speech lies in the reduction in war expenditure. Though operations range from Tunisia to Arakan, the daily war bill has dropped to £13½ millions. The reduction in the British tax-payer's burden is due to the Canadian war gift of one thousand million dollars. Purchases in Canada made in dollars are paid for by the Dominion Government. Not only Britain but other countries are receiving help from Canada under the Mutual Aid Act. The Dominion Government expects no return and in the process of paying for the war, the Provinces have made sacrifices by giving up to the Federal Government the income-tax for an agreed share. The vote of credit for £1,000 millions makes for success in stabilisation measures. The Government has increased its short-term borrowing of late as the weekly tender is for 90 millions and the increase in banks' resources is reflected in the addition to Treasury deposits by 50 millions every week. January was marked by an increase in savings and control of prices of food, clothing and furniture under the stabilisation policy must have made for an increase in savings in subsequent months. It is known that the success of the U. S. Liberty Loan was preceded by a large increase in savings in Britain. In January too tax revenue was as usual increasing, and the increase in borrowings from Public Departments in January was meant to reduce the Treasury Bill issue by £43.1 millions. The total as regards one portion of the floating debt was higher in January. The banks had lent £980 million in six months' deposits. The banking system had thus helped the Government to tap large savings in the usual manner. The increase in short-term borrowing at the same time as subscriptions to National War Bonds, indicates that the Government which raised only £137.9 millions in January as compared with £335.4 millions in December, 1942 had a reserve left with the banks and the fall in war expenditure after January mentioned by the Chancellor of the Exchequer proves that, in spite of the increases in taxation, the additions to currency leave more for the Treasury to draw upon. If prices are held down, the additional currency implies an immediate addition to savings. The Government has kept down the cost of clothing though textile wages have risen because the price of cotton was reduced in spite of obvious difficulties. The restraint on the buying of furniture (exemption being given only to the newly-married) has not only limited the use of timber but reduced non-essential expenditure. In spite of a shortage of accommodation particularly in London building has been rigidly controlled and the success claimed for stabilisation as decided upon in July, 1941 has been reflected in the larger resources of the banks which have been free to increase their loans to Government. It has been noted that next to investments, the banks' deposits with the Government figure as the principal item among assets. As Lord Wardington pointed out to shareholders of Lloyds Bank, the increases in deposits imply an obligation to lend to Government. Though total deposits in the case of Lloyds Bank rose by £65 millions during 1942 total advances fell by £8 millions while total investments rose by £30½ millions and short-term advances to the Government increased by £28½ millions. That means the entire increase in deposits has been made available to Government; and the very limited increase in profits for the year also supports the view that the big banks get little out of the power to create credit. Lord Wardington observed that depositors got only 3s. 2d. out of every pound earned as profit and he forecast an increase in expenditure during the transition from war to peace. The shareholders received 12 per cent. on the A shares and 5 per cent on the B shares. The carry-forward is slightly lower. The total deposits at the end of the year stood at over £646.17 millions and cash balances amounted to £98.7 millions in addition to £17.29 millions in items in transit. The Bank held £43.49 million in Treasury bills and £155 millions in Deposit receipts in addition to £193.6 million in investments. Advances totalled £120.2 millions only and the exceptional liquid position of the big British bank deserves special notice.

Assistance to Russia on a larger scale is foreshadowed in the lease-lend budget for 1944. The estimate for 1944 is $8,481,125,000 and the funds go to help 44 countries now eligible for lease-lend. Machine tools, steel, electric equipment etc., are promised for India. The limited assistance available to China makes more material available to India and Australia. The strategy of lease-lend has been described early this year by Mr. Stettinius in a review of what has been done within 2 years. The bigger appropriations for 1943-44 follow the extension of hostilities and the increase in the U.S. production programme. Shipping companies get a share of U. S. lease-lend expenditure while U. S. shipping gets repairs etc., done through the reciprocal programme. The net addition to lease-lend expenditure is put at $6,423 million equal to perhaps a months' war expenditure of the U. S. Government at present. The increased aid given by Britain to Russia probably accounts for the scaling down of the estimate from $10 billions to $8.48 billions and the lease-lend administrator has no doubts as to the return benefits secured by the U.S.A. The figures indicate that these major allies have the funds and materials for the forthcoming offensive in advance of a second front. The President's report on Lease-Lend refers to expenditure of $11.1 billions up to March 31. India's share in the value of goods shipped is not known, but the President made known his intention to send more to Russia including food. The mission to Moscow is reinforced by a promise of food for the Soviet army on the first anniversary of the Anglo-Soviet treaty. The promise is important, in view of Mr. Patterson's statement that the U.S.A. produced 37,000 tanks and one million machine-guns within eighteen months.



The reaction of markets to the long Washington conferences cannot be described as other than satisfactory. Wall Street has been quietly firm on most days, and small gains have been recorded by Anaconda and General Motors. As for London, the drop in gold minings constitutes the main market feature but it is overshadowed by the rise in giltedged stocks. Successive rises in Old Consols must be called remarkable, while the fall in Home Rails is not unexpected. Except for the recovery in Trinidad issues, the oil group has been easier this week, and the rise in De Beers is exceptional among South African shares. A further rise in Cable and Wireless may be due to the traffic figures; but the leading Industrials have been irregular as a *Reuter* cable indicated. The London quotation for Burma Corporation is higher than the rates quoted in Calcutta and Bombay and the quotation for Calcutta Tramway may be lower in London than here.

The further drop in bullion rates is proof of the success of anti-inflationary measures and the threat of direct intervention. Plans in the U. P. to draw off surplus purchasing power may well lead to a further drop. The decline in silver may be accentuated by a belief that lease-lend silver might come in from the U.S.A. (free of duty) and depress Indian prices. The Calcutta bullion market has weakened along with Bombay where forward trading has been restricted by the Exchange under the terms of a resolution adopted last week. The bullion rates in Bombay are almost back to January's level. Except for oilseeds most commodities have been quiet latterly, and the fears of Government intervention have broken the boom in bullion as well as other markets. The setback in gold mining shares will not be ignored, and a further decline may help the public to recover confidence in the stability of the currency and the efficacy of measures adopted such as deposit of a portion of excess profits. The recovery in the prices of leading shares points to correct understanding of the immediate results of the ordinance and the new Defence Rule introduced to check reckless flotation of new companies. The success of war finance in Britain where loans to Government are made at an average rate of 1¾ per cent has a lesson for all countries. Restraint on speculation is essential and the steady drop in bullion may have a valuable effect on those who have talked themselves into inflation. A healthy reaction is all the more necessary after the hectic rise, and the fall in cloth prices etc, may help the public even more than the Government which has the satisfaction of finding that its anti-inflation programme has been well received.

LLOYDS BANK
LIMITED
(Incorporated in England.)
1677
Adaptability
The experience of nearly two centuries of private and commercial banking, coupled with an efficient and world wide organisation and the highest reputation for thoroughness and financial stability, enables Lloyds Bank to adapt itself to every class of banking business, whether in times of peace or war.

Editorial Comments

Control of New Issues

Our comments last week on the ordinance on Control of Capital Issues were, of necessity, confined to general observations on the need for an administrative check on new floatations, the dangers of taking too comprehensive powers, the room for public suspicion of Government's motives and the need for avoiding it, as also for the utmost circumspection in the exercise of these comprehensive powers. The week that has passed since has shown the consternation that is felt in Indian industrial and business circles at being confronted so suddenly with a serious hurdle in the execution of their plans for new business. There is, doubtless, a proneness to exaggerate the extent of the administrative veto on new floatations and financial plans of existing companies as well as the extent of interference with the plans for new business. But the authorities must recognise that little has been done to avoid delay in the grant of the necessary sanction to plans which have been already made ready. And, what is more, the context of recent and current developments, in which the Government of India have now announced this ordinance, is not calculated to allay the suspicion that these new powers will be utilised to check the progress of Indian industry. The Government's press note of the 18th instant points out that "applications, in so far as they relate to issues of capital in connection with proposed industrial enterprises will be considered by a departmental committee on which representatives of commerce and industries and supply departments will be associated with the Finance Department. The Reserve Bank of India will be consulted in regard to applications involving the issue of capital for proposed financial enterprises, including banks, investment and finance and insurance companies." Much of the unrest now felt in business circles could have been avoided if the personnel of the Departmental Committee had been announced along with the terms of the Ordinance or within a day or two of its publication. All new enterprises, whether in the economic or in other spheres, depend so much on the psychological factor of sustained enthusiasm, that the delay caused by an ordinance of this kind might well be regarded as a cruel cold douche.

The context of current developments, too, is by no means a corrective or an antidote to such fears. The boom, which was halted for the moment by the ordinance in question, is, probably, the first in the history of British India in which all the new issues are under Indian auspices. There has been practically no new issue by a British or other foreign company for reasons which are not difficult to understand. Indian businessmen have shown unprecedented alacrity in taking advantage of the limited scope that the conditions of war time allow for sponsoring new business. It may be said, therefore, that Indian entrepreneurial ability has shown an eagerness to come forward, for which there is no exact parallel in the past. These circumstances, it is reasonable to ask, should weigh with the Government when they take any action calculated to check such desirable development.

The public mind, which recent events in the political sphere have filled with suspicions of British intentions towards India, is inclined to see in this predominantly Indian character of the present boom the motive behind this ordinance. It argues that there are other circumstances, too, which suggest such a course of action to the Government. It is well known that post-war trade is next only to the war as a pre-occupation of the British ruling classes. In so far as new industrial enterprises in India are bound to restrict the scope for British imports in the post-war period, the British Government would feel called upon to arrest such undesirable developments. We referred last week to the question of transfer of British investments in India to Indian hands. No one can gainsay the fact that if the financial relations that now subsist between India and Britain obtained in the case of any two free countries, this transfer of the investments of the debtor country would have been brought about smoothly and to the full extent required by the balance of payments position as between the two countries. What has actually happened in the case of India is only too well known. Payments to India have been made in the currency of the debtor country and these payments are treated as cover for the expansion of currency in the creditor country. The only possible benefit that could be derived from such expansion is the utilisation of superfluous money for increasing the tempo of new business activity. That would be but a drop in the ocean of economic evils that result from unchecked inflation; but it could serve as the saving grace of the Government's inflationary policy. This saving grace will be missing if the Government should under the pretext of preventing mushroom growths prevent transfer of British investments to Indians. It is felt that the purpose of adopting this inflationary policy instead of avoiding inflation by resort to a very natural means of payment is to avoid the transfer of British investments, a motive which is not difficult to understand, considering the dependence of Britain on her income from overseas. Even if the control of the capital market has other purposes, the temptation to use these powers to ensure the retention of British investments in British hands might prove too strong to resist. There is also the other circumstance that the control of capital issues is accompanied by the Ordinance regarding the excess profits tax. Just as the latter is an attempt to mop up idle funds for the benefit of the Exchequer, the control of capital issues can serve the purpose of damming savings and forcing them to flow into Government loans.

All these circumstances, together with the feeling of annoyance which unexpected delays cause, account for the serious misgivings which have assailed the minds of the business community. We have dwelt at length on these misgivings, since they indicate clearly the dangers, pitfalls and temptations which the Government must beware of. The prevention of mushroom and malafide companies is almost the only purpose of the new Ordinance which will meet with general popular sympathy and support. While it may be admitted that the growth of such companies cannot be prevented except by the Government assuming full powers, the terms of the Ordinance are unduly comprehensive. All manner of transactions in the new capital market are sought to be controlled. It is laid down in the first instance that "securities shall include shares, stocks, bonds, debentures and debenture stocks, issued by or for the benefit of a company; and that a person shall be deemed to make an issue of capital who issues any securities whether in cash or otherwise." The Ordinance distinguishes between "companies whether incorporated in British India or not," and "companies incorporated in British India." The former shall not, except, of course, with the consent of the Government "(a) make an issue of capital in British India; (b) make in British India any public offer of securities for sale; (c) renew or postpone the date of maturity or repayment of any security maturing for payment in British India," while the companies incorporated in India shall not "make an issue of capital anywhere." In the case of individuals, "no person shall issue in British India any prospectus or other document offering for subscription or publicly offering for sale any security which does not include a statement that the consent of the Central Government has been obtained to the issue or offer of the securities; and "no person shall subscribe for any securities issued by a Company in respect of any issue of capital made in British India or elsewhere unless such issue has been made with the consent of the Central Government."

The terms of the ordinance are, therefore, watertight. The only room for new enterprise which seeks to avoid the inconveniences of obtaining Government sanction, lies in avoiding what may be either in the spirit or in the letter of the law a "public" issue. Such completeness of control in regard to public issues of capital for new enterprise is indispensable for the prevention of mushroom companies. But the same thing cannot be said of the measures which existing companies may deem it advisable to take by way of financial reconstruction. The terms of the ordinance do not seem to preclude doubt about their application to such measures of reconstruction. The subsection which says that "a person shall be deemed to make an issue of capital who issues any securities, whether in cash or otherwise," seems to lay an initial ban even on bonus shares and the like. And it is not clear whether the words "whether in cash or otherwise" apply equally to all who make issues of capital, whether they are persons or companies. However, since every section in the ordinance provides for exemption to be granted by the Government, everything may be said to rest on the manner of its administration. There is nothing to be said for putting investment trusts, the need for which is all the greater in times like the present, on the same footing as a new insurance company under shady auspices. We would appeal to the Finance Member to make a detailed statement as to the scope and purpose of the ordinance and afford just all those assurances that the state of feeling in the business community obviously and justly calls for.

END OF COTTON FUTURES

The sharp drop in cloth and yarn rates only last week, was the direct result of the final decision taken by the Government of India in relation to the cotton trade. The suspension of all forward trading as from May 20 was due to the rise in cotton prices after the Government indicated that it was definitely against a rise in prices. The trade was indeed given time to adjust itself to changed conditions, and settlement rates announced this week for Jarilla (May) and (July) at Rs. 565 and Rs. 568 per candy are not far in comparison with rates noted a week ago. Rates have been fixed for Karachi as well and the hedge contracts in Americans obtaining there are to be wound up. The liquidation of all forward business is enforced by the orders issued since May 1. The situation in the cotton trade is not one to generate a hope that decontrol will follow. The market has also to go by the statistical position and the buyers of cotton may well conclude that the fall in exports in the year 1942-43 may have a definite effect on prices.

Doubts as to the scope of the prohibitory order in relation to foreign cotton may not linger as the import trade in raw cotton is more or less under supervision. Shipping and supply are in the hands of Government. Prices can be controlled by regulating the quantity allowed to enter under license. As regards the position of Indian cotton at present, one may well leave out the rise in the general price level. The sharp fall in the acreage and outturn this year as noted in the final forecast, cannot be called an important factor. The crop restriction plan was governed by the desire to increase food crops and avoid the recurrence of the short staple surplus. The Government still adhere to the view that more cotton is not wanted. There has been no increase in Indian mill consumption, as compared with 1941-42, except in February. Exports have fallen since the U.K. is the principal market left, and the U.K. wants its raw material cheap so as to keep cloth prices down and maximise exports. The U.S. Government's cotton policy in the war period affords in any case an explanation for what has been done. Maximum prices could not be fixed for various growths in India and the prohibition of options and forward trading seemed the more obvious course. Existing stocks of cotton at the principal ports up to May 1, certainly indicated no deficiency in supplies. From September 1 to May 1 the total arrivals at ports amounted to 2.47 million bales as against 2.23 million bales in the same period of the previous year. Since exports were lower since September 1st the available stocks must be reckoned large, particularly after distribution arrangements were improved by the adoption of the panel system to regulate movements. The reduction in the quantity of raw cotton pressed from 5 million to $3\frac{1}{2}$ million bales in the period is certainly in line with the fall in cotton production from 6.12 million bales in 1941-42 to 4.55 million bales in 1942-43. As for the Bombay market the increase in arrivals and the fall in exports are more important than the consumption of over one million bales by the local mills up to May 13. The stocks with exporters in the current year rose by over 223,000 bales because exports were reduced by nearly 300,000 bales as compared with 1941-42. These figures have a more definite bearing today on the price level developed from speculation than the curtailment of cultivation in Egypt at the instance of the Government or the drought in Uganda. The British Government's plan to buy a substantial portion of East African cotton means little as compared with New York futures though it must be confessed that the familiar notion of parity vanished this year. The Calcutta index for raw cotton rose from 127 in November to 185 in May. If Bombay cotton prices in the last war were higher than at any time since there is no justification for the view that the rise noted this year should not be checked. The adoption of yarn control demanded the control of cotton prices. Since the warnings failed ordinances to prevent forward trading had to be promulgated. Though the peak was passed in March, cotton, as the chief medium of speculative transactions claimed special attention in relation to anti-inflationary actions. The cotton ban has forced down prices of silver, oilseeds and many other commodities. The absolute prohibition of all forward transactions is not different from that adopted last year in regard to food grains and this month in regard to oilseeds by the freezing of prices and specifications of ceilings at the instance of the trade associations which have found that a boom has its own dangers.

The attitude of the mill industry to the measures so far adopted has not been indicated. That the mills may find the prohibitory order inconvenient and may have to carry large stocks, because their own usual hedge sales too are illegal, need not be at all questioned. The check given to spot business has not been ignored in criticisms of the order but the mills, forced to store cotton may discharge all the functions of the speculative trader in the future. The ban on trading in the current crop as well as the new crop was largely inspired by the desire to see that cotton does not gain ground at the expense of food crops. Last year oilseeds admittedly gained ground at the expense of food grains. This year dearer cotton may mean a reduction in food supply. Ample warning was given by the Finance Member in this connection. The E.I.C.A. argued that the cottongrower would suffer if the trade did not stand by him at all times, but the existence of a forward market is no more necessary in the case of cotton than in the case of jute. The absolute control of all commodity markets is not undesirable in wartime when most manufactures are controlled by Government. And the disappearance of the E.I.C.A. and the Mahajan association for the time being, may help to bring unitary control in the future. That mills selling cloth would take up cotton at once

Textiles Stores Manufacture

The dependence of the cotton mill industry on imported textile stores, machinery etc., is indicated by Dr. C. A. Mehta in an account of the trade in the Journal of the Indian Merchants Chamber. The difficulty of importing the necessary stores, dyes etc., accounts for the increase in textile manufacturing costs. The classified imports for five years show the extent to which mills were dependent on outside supplies. Textile machinery imported ranged in value from two to three crores per annum. The starch etc. taken by India accounted in most years for an import trade of Rs. 38.4 to Rs. 59.4 lakhs. Imports of bleaching powder and caustic soda ran into lakhs but were of lower value than the coal tar dyes imported by India every year. The inadequate development of subsidiary industries accounts for the large imports up to 1938-39. Increases in Indian textile production in the war period, apart from indicating the need to develop home production of starch etc. shows the need to make good deficient previous imports of stores. As regards starch, the development of four big factories producing starch from maize makes for real satisfaction. Home production is put at 25,000 tons, almost equal to present requirements of mills. Dr. Mehta supports the claim previously advanced by the starch industry for tariff protection. It is also urged that maize starch should replace sago or farina so that imports would not be called for. In regard to the manufacture of bobbins also, the claim for protection is strengthened by recent progress. Several small factories produce bobbins from local wood, and their future has to be safeguarded. The use of Indian china clay has increased; mining has developed in Travancore, North Guzerat and Bihar. Though the colour is not very good, the local china clay is said to compare favourably with English china clay. Dr. Mehta argues that the manufacture of pickers, buffers etc. as a cottage industry is not enough. The picking bands and belting are made by a few large tanneries, the demand exceeds the supply and capital is needed for developing the industry. Existing workshops turn out little by way of textile machinery at present. The demand for replacements and extensions is large. Bombay and Ahmedabad present unusual opportunities for big enterprise in the field of machinery since requirements are very large. In regard to textile chemicals, local production in the last two years has solved many difficulties and additional chemical plants will ensure self-sufficiency. The development of dyestuffs must wait till the end of the war though the manufacture of dyes from intermediates can be investigated. The duty to support indigenous enterprise by tariffs is not limited to the Government. The mill industry, too, must continue to take home-produced stores etc., after the war and the extent of participation in the development of ancillary industries in the war period will determine the kind of help provided in the future.

Wild Rice In The C. P.

In a recent issue of the Indian Journal of Agricultural Science, is found a note on wild rice. In the C. P. out of 24,500,000 acres under crops as much as 5.9 million acres are under rice. Rice is the chief food crop in the Chattisgarh Division and wild rice is the principal enemy of the farmer in the fields. The annual loss due to wild rice infestation is put at Rs. 22 lakhs. Research work carried out since 1928 has resulted in the production of purple-leaved hybrids, distinguishable from green-leaved wild rice. Wild rice was studied in 1940-41 in three Districts and it was recorded that the percentage occurrence varied from 4 to 55. In a field-to-field study, in certain villages, the percentage, after the usual weeding was carried out, was noted to be as low as then. Taken with the weeding charges enhanced by the persistence of the weed the loss due to wild rice must be over Rs. 22 lakhs per annum for the Raipur, Drug and Bilaspur districts. Wild rice has a green leaf sheath like the cultivated variety but after flowering it is distinguishable by the long stout awns, blackest grains and red kernels. As it shed the grain the seed cannot be collected. In an attempt to control its spread farmers sow varieties with green and dark purple sheath in alternate years or grow parewa which has dark purple annudes to distinguish it from wild rice; but this variety is a poor cropper. Breeding work at Nagpur concentrated therefore on hybrids with a better yield than parewa. A cross giving 20 percent more than parewa was evolved. From 1937 cultivators accepted the new strain which has since proved to be the highest yielding variety in the Province. In the seedling stage too the two crosses No. 116 and No. 19 are distinct from wild rice and seed of the two strains distributed in Chattisgarh has proved very popular. A more complete solution was attempted by crossing the hybrids with nagkesar which has purple leaves as against the green of wild rice but the yield of nagkesar is low, and the rice is generally red. Extensive trial on cultivator's own holdings showed that all three hybrids produced quite satisfactory yields and the C. P. rice research scheme resulted in arresting the deterioration due to wild rice. Mr. B. B. Dave's account of the new cross strains indicates that in Chattisgarh the wild rice problem has been already solved.

Dearer Clothes

The Bombay working class cost of living index rose in March to 208 showing an increase of 103 points on August 1939. The increase recorded again after February was due to a rise in the cost of food. Increases in the cost of fuel, lighting and clothing accounted also for the advance in the Bombay index. Comparison of the prices ruling in March with those of February, indicate no change in the cost of food grains; but meat and milk like ghee rose in price. Most interesting change, however, is that relating to clothing. The price of dhoties per pair in the base year 1933-44 was Rs. 2-9-6. The rate for March was Rs. 8-6-9 the cost of coating per yard was Rs. 1-2-6 and shirting cloth was 15 annas per yard. Cloth for trousers in the base year cost Rs. 0-9-1 per lb. The price in March was Rs. 2-9-0. Sarees which claim 36 percent of the cost of clothing sold at Rs. 3-8-0 against the rate of Rs. 3-7-5 reported in 1933-34. Even though the quotation per saree (Rs. 3-8-0) is for January, it suggests that the disparity as between the cost of clothing for woman and man is largely due to the competitive demand of the Government. Obviously, war demand for female clothing is negligible. But the index should not be taken as conclusive proof of the absence of any rise in the cost of clothing in India. The working class buys also handloom fabrics which are dearer owing to the high cost of yarn. The clothing index for March was 255 against 100 in 1933-34. The index for February was 236. The further increase is explained as much by the lack of standard cloth as the millhands' bonus. The higher earnings of workers contribute, in some manner ,to mill profits. Though clothing accounts for only a small part of the worker's budget, the continuous increase stands out as justifying the special scheme for the manufacture and sale of standard cloth. It is noteworthy that the same increase was noted in Ahmedabad both in January and February. The local increase in the cost of coating and shirting was greater than that of mill dhoties. The Ahmedabad index for sarees indeed shows an increase of 140 percent as compared with 1926-37. Cloth for skirts was 158 percent dearer and bits for bodices were sold at 11 annas per yard as against Rs. 0-5-6 per yard in the base year. Female clothing was dearer in every case and prosperity prices were certainly surpassed in Sholapur.

Silver Stocks And Prices

Little interest has been evinced in the report that Britain is going to get three million ounces of silver from the U. S. A. under lease-end arrangements. The quantity is quite small in relation to U. S. Treasury stocks estimated at over 500 million ounces. In spite of large takings by the Defence Plant Corporation the U. S. Treasury has plenty of silver which can be drawn upon by the issue of notes in place of silver certificates. The lease-lend silver is likely to be distributed through the regular market. The 'Economist' suggested recently that silver should be handled by the market at the customary price of 23½d. per ounce. The quantity likely to reach the market is not large being only 1.7 million ounces and an alteration in price is not called for. The decision to tap sources other than the Indian Government holdings may not be due to the objections raised last year as to the sales of India silver at a price below the free rate in New York. The shortage of silver is, however, indicated by the 'Economist' which notes that the British Gvernment is confident about the return of the silver that may be sold through the market at 23½d per ounce. The depletion of London stocks has not led to any advance in rates because the handful of firms in the bullion trade are agreed on maintaining prices at a low level. The ability of Britain to draw supplies from the U.S.A. at present suggests that the post-war settlement of transactions will be conducted without recourse to buying of Indian silver. If silver prices are held rigidly and the U. K. Government refrains from purchases of Indian silver in the future the silver market outlook may be quite different from that of last year though the reduced fineness of the Indian coinage may appear a material factor at present. The pegging of prices in London for silver, imported from the U.S.A. and sold through the market, may well serve as a lesson to the Indian market though lease-lend silver might not be available to India where the industrial demand is small in relation to that for hoarding. The withdrawal of the British Government as a buyer may operate to bring silver prices down in Bombay in the future while the drop in cotton and other commodity markets may hasten the decline.

Public Health Deficiencies

The higher death rate from smallpox and cholera in British India as compared with the Philippines and French Indo-China points to the inadequacy of public health organisation as much as anything else. The critical note struck by Dr. J. B. Grant in the Oxford pamphlet on the health of India is justified by the lack of medical protection for the villager. Poverty accounts largely for the unsatisfactory state of the service available at present. Health as a factor in the standard of living as well as efficiency is both cause and effect. Since the authorities are absorbed in combating disease little has been accomplished on the positive side. Dr. Grant's survey of results so far secured is not wholly encouraging, but the desire for improvement has been outlined by the Central Advisory Board in 1939. A cause of slow or arrested progress is the decentralisation of authority. Local boards discharge functions requiring expert knowledge and public health except in the Presidency towns has so far been a neglected subject. Discouraging conclusions are tempered by Dr. Grant's account of plans in the Punjab and Bengal to make the health unit work out both the curative and preventive functions. As to industrial disease etc the essential investigation is in the preliminary stage. Since 1931 there has been no significant improvement. The health insurance plans now being hatched may be a delayed reaction to the suggestions for reform rather than a vital departure in policy. Education remains, of course, the big question mark, and the U. S. expert in looking at the many notable deficiencies does not overlook the advances in the field of medical education. The division of authority has not answered well, and vital statistics in the case of Calcutta, indicate how far Indian cities lag behind New York where the death rate per mille was as low as 9.9 in 1941 because the personal health services here are strictly limited in relation to the needs. That good health is a big factor in economic progress need not be unduly stressed in view of Dr. Grant's independent analysis of retarded development. The inertia of ages has to yield to education, and the responsibilities of the medical profession are heavy at present. That is a conclusion reinforced by the examination of defective organisation in the field of nursing, sanitation and much else.

Foreign Investments in S. America

The strong revival of interest in South American issues generally among British investors is due to the belief that after the war, Latin American countries being outside the war, would provide a better

return. The special terms provided in connection with the further development of the oil industry in Venezuela are justified as much by the abundant capital available at present as the fact that the yield on Venezuelan investments is fairly high. In a tabular analysis of British investments in Latin America at the end of last year, it has been noted that a fairly large part of the investments provided no return and the interest available on the rest amounted to 2.3 per cent only. The gross total of £910,598,088 was made up of Government bonds, railway stocks etc. Banks and shipping appear to be the safest giving 6 per cent to the British investor whereas railways afforded only 1.2 per cent. The total for British investments in Central and South America exceeds the value of U. S. investments in the republics. Owing to the political connection the dominance of U. S. capital in Cuba is understandable. But the increase since 1929 in U. S. holdings in Argentina is attributed to development of public utility companies. In Chile's mineral industry U. S. capital is ahead of British capital. The total value of British investments in Chile at the end of 1942 was stated to be over £50.11 millions. The net return was around £903,000 as no interest was earned on 21.9 per cent of the total. The average return was highest in the case of Bolivia. On £4.4 millions invested in Bolivian companies, the income was over £1.39 millions in 1942. The sharp increase in the yield on Bolivian investments from 3.3 per cent to 31.6 per cent is explained by the displacement of Malayan tin by Bolivian tin. The only country in which British capital is unrepresented is Nicaragua. Brazil as a field of investment comes after Argentina. It was noted that the proportion of defaulted debt etc., is least in the case of Brazil. The tables provided in the South American journal incidentally show that U. S. capital is ahead of British capital in Venezuela, Colombia, Paraguay and most other countries. The credit status of different countries may be guessed from the very high proportion of unremunerative investments in the case of Mexico but the republic's entry into the war was followed by an offer to her creditors. The average yield on Britain's investments in Argentina is estimated to be 2.4 per cent, largely because the railways' revenue position has been affected by the drop in Argentina's foreign trade. The higher yield on mineral and other enterprise is indicated in the fact that out of a total of 225 million invested in Latin America at the end of 1942 only 74½ million went without interest. The rate of interest earned on miscellaneous investments in America distinguished from Government bonds and railway stocks, was 4.5 per cent., about twice the rate of the return on the gross value of British investments of which 45.9 per cent. did not qualify for a return last year.

Wealth From The West

Free China relies on Szechewan for many things. The war time factories of the Province provided exhibits at the Flower Fair in Chengtu this spring. The exhibition described in the China Information Bulletin showed that the Province is progressing rapidly. People saw that resources are being developed to meet many war requirements. Nine halls housed the exposition which displayed more than 20,000 articles under 4,780 headings. More than 60 war-time factories sent their products for display. Huge silk parachutes were among the textile exhibits. The handicrafts alone occupied a hall. More than 3,500 pieces of embroidery, metal work, lacquer work etc. were on view, and marked improvement in quality was noted. The Province's agricultural products range from sugarcane to chingke which flourishes on the Tibetan plateau fringe. Export products like bristles, tung oil, wool were on view like improved varieties of cereals exhibited to convince farmers of the value of scientific farming. Models of irrigation projects, old and new, were also shown at Chengtu. Chungking's factories' are to be supplied at Hochwan estimated to cost 200.840,000 with power from a hydro-electric project dollars. The minerals of Szechwan were on view. Iron and coal deposits have been noted. The Reconstruction Bureau claims that it also occurs in Central Szechwan along the Chungking-Szechwan highway. Telephone development is not wanting in Szechwan. The majority of enterprises were established after the war began. At the end of 1942 Szechwan had as many as 1362 factories with a total capitalisation of 562.708.195 dollars. As many as 207 spinning and weaving factories has been developed. With 11.5 per cent of its land area awaiting development, the Province has an agricultural reserve though dry civilisation predominates. The provincial revenue was collected partly in rice, but it had more than doubled in 1942. Investments in Government enterprise had increased by over 50 million dollars, and the number of primary schools rose from 25,734 in 1941 to 43.780 in 1942.

Swiss Experience

The member of the Federal Council who asked the Swiss people to be fully prepared for all contingencies merely indicated the obligations of settled neutrality. The economic handicaps arising from the war are not merely due to the lack of a seaport. Swiss exports fell away in 1942. Rationing, higher defence expenditure, larger State borrowing etc, remained features of the economic life of Switzerland. In spite of the demand for engineering instruments etc from Germany, and the higher prices obtained last year, the export trade showed a real shrinkage. Imports also fell and prices in any case were higher than those of exports. The increase in the value of Switzerland's external trade is purely nominal since higher prices account for the small increase shown under the value of exports and imports. The scarcity of imports has forced Switzerland to expand agricultural production last year. The cultivated area increased to 31,000 hectares and land drainage projects were contemplated while industry was asked to encourage agriculture in every way. The demand for labour naturally was larger and the number of unemployed fell to 11,000 in December 1942. There was a shortage of labour in agriculture and the machine industry, but the Federal Council prepared plans for adding to employment. The Government envisages an outlay of more than 5 milliard francs to remedy unemployment as and when it appears. The fall in retail trade for an abundance of money and debt redemption increased the available resources. The fall in private consumption was due not only to rationing, and the turnover tax in force but to the rise in Swiss prices to which the increase in the note issue contributed a rise easily measurable in relation to the total value

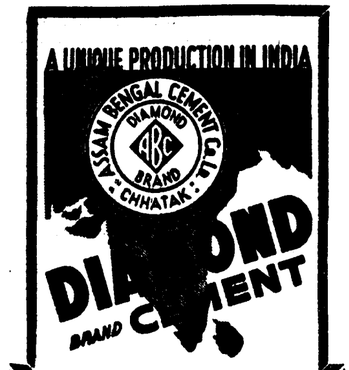
of retail sales in 1938. General mobilisation was complete in May 1940 and partial demobilisation followed in July 1940. Extension of rationing to clothes and footwear, preceded by prohibition of sales, showed how the Swiss are handicapped by lack of raw materials imported previously. The higher value of imports in relation to exports in the special trade showed how the local cost of living was influenced by the 110 percent increase in the average cost of imports.

Part-time Jobs For Women

Mr. Bevin acquired authority to direct women to part-time as well as to full-time work. Women diverted to war work wholly were to be replaced by new part-time workers. It was noted that the new regulation would supply a check on women who threw up part-time jobs. Shops should have obtained substitutes for those who had been placed in munitions factories. Under the regulations in force after conscription was applied to women, women aged between 18 and 45 were liable to take up part-time work unless they had children under 14 living with them. The Ministry of Labour's local offices became responsible for taking off women not available for full-time work. Up to the end of 1942, the number of part-time women workers was 500,000. Progress has been made since then as the total is over 600,000. According to a cabled report received by the Associated Chambers this month the number of women taken for part-time jobs so as to release men and women for factories has increased. A part-time worker is defined as one doing not more than thirty hours per week. The extension of part-time work followed full mobilisation and is meant to take off full-timers to jobs which the part-timers cannot undertake. People may be directed into part-time jobs in industry and business, and the increase in female employment implies a reduction in skilled personnel taken off for the armed forces. Training has, however, solved most of the difficulties. The adult part-timer is to distinguished from the juvenile half-timer of the past; but the provision of jobs for those without special family responsibilities did not affect the exemptions given to teachers, nurses etc. where it was found necessary to discriminate.

Exploits In Africa

The German surrender in Tunisia has naturally attracted more attention than the exploits of the 4th Indian Division. Except for three battalions and the gunners consisting of British troops the 4th Division is wholly Indian, and its proud record therefore invites the tributes of Parliaments and peoples alike. The Division reached Egypt in August 1939, and adapted itself fully to the mechanised warfare of the present in the course of three years. The Division saw service in the Sudan, Abyssinia and Syria as well as the Western desert. The successful defence of Egypt in 1940 was followed by its transfer to East Africa, leaving the advance into Libya to the others. The storming of Keren is not the only episode in the destruction of Italy's African Empire. The Division lost in mules before the operations in Eritrea began and mountain warfare called for courage and grit from the Sappers more than others. The 4th Division went back to the Western Desert and to quote an official account proved itself as steadfast in disaster as it had been aggressive in attack. One Brigade stemmed the German rush at Benghazi and fought its way out. Another held half of the perimeter of Tobruk. The Division's part in the battle of el Alamein was even more glorious as the 5th Brigade cut its way through Rommel's army to open up a way for the armour of the 8th Army. The story of the 4th Division has certainly not ended with von Arnim's surrender. The third year of active services may take it farther. The British comrades of the Indian Division recognised early the fighting qualities and one young Officer noted "the Indians are so friendly and pleasant, and yet such men."



Colonial Supplies

The trade of France with the overseas Empire in recent years is examined in the League of Nations statistical bulletin for December. The figures available show that higher prices influenced the trade as much as the bad harvest of 1940. The volume of trade was largest in the case of Algeria, but the increase in imports from Morocco between 1938 and 1940 was greater. The large increase in imports of cereals from North Africa in 1940 was followed by a substantial fall in 1941. Imports of fodder showed a more severe fall than imports of groundnuts into France. Trade with Madagascar showed a continuous fall in the war period, while tade with West Africa in spite of the fall in French takings of groundnuts, underwent expansion. The most significant change in the import trade of France is the increase in vegetable fibres, eggs, fish and dried vegetables. Not less important is the fall in imports of Algerian wine, production having fallen while a part was diverted to the production of power alcohol. Among the tropical products obtained from Madagascar and West Africa was coffee. It is evident that the imports of phosphates from Morocco and Tunis fell away in the war period while the import trade as a whole increased. The charac-

Clive Street Gossip

"I must have liberty
Withal, as large a charter as the wind
To blow on whom I please."
—(As You Like it.)

There is only one more of the fundamental concepts of economic science to consider before we pass on to the economic policies of the post-war period viz., division of labour. Strictly speaking, division of labour is not a concept in the sense that "value" or "capital" is. It is rather a feature of economic life in its organisational aspect, a feature, the importance of which varies from one stage of development to another. Its importance to economic thought lies in the fact that economic history would seem to suggest that the progress of economic organisation and development is in direct proportion to the intricacy of division of labour. This suggestion of economic history is so much in accord with the commonsense view of economic organisation that its validity has never been questioned. The commonsense view of the importance of division of labour is best expressed in the saying that a jack of all trades is master of none. Practice makes perfect; and if you aim at perfection, you must be content to do the same kind of job over and over again and not cut up the processes of physical and psychological adjustment by frequently shifting your thoughts and energies to other lines. In their economic life men have as a rule acted as if every individual has a keen appreciation of this truth. Primitive man as well as Crusoe before the arrival of Friday was his carpenter, smith, cook, hunter everything rolled into one. When men gathered together in settled societies, the instinct of the race led to an appreciation of the place of practice in perfection and of the economic value of division of labour. Society came to be divided on the basis of caste and calling. A carpenter is a better carpenter for being nothing else; and in so far as skill is hereditary or at any rate better acquired when it is imparted from childhood by the environmental conditions of a hereditary calling, division of labour is indispensable for productive efficiency. As I said, the racial instinct appreciates its value; and division of labour has gone on through the ages. Since the cultivator is a cultivator and nothing else besides, he produces food that will suffice for meeting his needs and leave a surplus, by exchanging which with producers of other values, he can find all his requirements. The same is true of other kinds of producers. Productive skill grows with division of labour; and exchangeable surplus with productive efficiency. And the more goods and services there are for exchange as distinct from own consumption, the greater is the volume of exchange. And if the facilities of transport and medium of exchange are provided, division of labour and all that flow from it make automatic progress. If I were asked what is at the root of individualist economy, I would say without hesitation that it is the natural division of labour. Nature seems to have ordained a division of labour; and once division of labour is accepted, all else follows in its wake, exchange, medium of exchange, the power of the profit motive, the potentialities of markets, the need for a special race of men who will divine those potentialities, the capitalist, the entrepreneur and all the varieties of economic man the reformer of economic society has to reckon with.

* * * *

It will thus be seen that division of labour is, in one view, even more important to the old economics than objective value or capital which is the product of saving. There is no equilibrium economics without markets; and there can be no exchange if every one should produce everything that one requires. The economist, therefore, not only accepts division of labour as an inescapably natural phenomenon, but commends its furtherance as the best way of securing economic developments. He extends the idea of division of labour to geographical entities. In so far as climate and qualities of the soil are different in different countries, the division of labour, ordained by nature applies as much to different geographical areas as to different men. Countries, like human individuals, must agree to acquire perfection by practice, must be content to produce certain goods in such profusion that they will not only meet their own needs but leave a surplus which they can exchange with other countries' products to find all their requirements. Historically, the development of national economies and of international trade has been in accordance with this principle. The geographical division of labour is a fact, a direct consequence of the other fact that Sun's heat and rainfall are not evenly distributed over all parts of the earth, that the earth's crust or the veins below it are not the same all over the world. If, then, there is a division of labour among countries as among individuals in the same country, exchange is equally necessary for both. The virtues of specialisation and the dangers of attempting to be a jack of all trades are alike for nations and for individuals. There are no limits to the orbit of profitable exchange, no limits to the intricacy of division of labour. If division of labour among men makes laissez faire the *acme of economic* wisdom within the country, free trade is equally so in the sphere of international economic relations. We have then free trade, freedom of commercial relations, free gold standard, and all the rest of it. The old economics gains a perfect internal consistency.

* * * *

Now, what happens to this division of labour in the new economics? I have only to stress the basis on which division of labour rests to bring home to the

reader the change which it will undergo. Division of labour, besides being, to some extent, an organisational convenience, rests primarily on differences in the skill and talent required in different lines of productive activity and the impossibility of acquiring such skill and talent except by lifelong practice. Vocations, therefore, are not changed except at the expense of productive efficiency. In the case of geographical division of labour also, this factor is present, inasmuch as, when you talk of a country, you are talking of the individuals who constitute its people. But there is the other factor of the differences in the natural advantages of each country in relation to each line of production. The differences of human skill and natural physical endowment together account for geographical division of labour. If this is the rationale of division of labour, the question naturally arises whether the conditions in which division of labour arose and division of labour seems to be the acme of economic wisdom, will continue for ever to be the same. There are, no doubt, a very large number of trades, crafts and callings in which skill has to be acquired and the acquired skill is not easily shifted to some other line.

* * * *

Generally speaking, the place of specialisation, so far as the mass of workers is concerned, would seem to have shrunk somewhat. Modern industrial processes have been so split up and standardised that it is incorrect to talk of differences of skill. This is, however, of no great importance to the theoretical side of the new economics. But it is important to note one or two trends that have a bearing on this question of division of labour. The impact of labour-saving devices on personal and domestic services may prove before long, to have great import to economic organisation. There is a whole series of domestic services, house-cleaning, ironing clothes and cooking which modern inventions enable

(From Our Correspondent)

New Delhi, May 24.

OFFICIAL circles in New Delhi appear to be satisfied with the reception given to the Finance Department's proposals for fighting inflationary forces. As they had been generally anticipated, there was not the element of surprise, but it is pointed out that this is only the first step in the Government's programme for easing the economic situation. So far as excess profits are concerned there is not likely to be any difficulty in securing the co-operation of the business community, for it is to their benefit that this scheme should pan out. The Finance Member is reported to be anxious that in framing the rules and fixing the procedure, there should be full consultation with the interests affected. Though the Finance Member has not officially accepted the figure, there is reason to hope that the estimate of one hundred crores will not prove to be an overestimate when the full effect of the summary procedure and the required compulsory deposit is noted. It will certainly have an important bearing on the budgetary position this year as it should ease the ways and means position. It is considered likely that even if expenditure is increasing at a rate faster than was anticipated at the time of the framing of the Budget, the Finance Member will not consider it necessary to come forward with any taxation proposals either in the coming July session or in November.

* * * *

Arrangements are now being made to set up the new Departmental Committee which will advise the Finance Department in regard to new flotations. Sir Alan Lloyd, former Commerce Secretary, who has been officiating as Establishment Officer, is likely to be appointed Secretary of this new committee. It is the intention of the Finance Department that there should be no undue delay in the disposal of applications for starting new concerns. In fact, that is given as the reason for appointing a Departmental Committee for the purpose. One important point made in public criticisms of the Finance Member's proposals is that some machinery should be devised for associating non-official opinion. In the United Kingdom there is ample scope available for industrial and business interests to influence the Government's policy. Even if it is not possible to include non-official representatives in the departmental Committee, a separate body can be set up like a National Investment Board whom the Government of India can consult freely. As the Federation of Indian Chambers and Industry has also suggested the appointment of a committee to advise the Finance Member on these and cognate matters, it is expected that Sir Jeremy Raisman will give full consideration to it. It would be still better if the Member in charge of Commerce and Industries is made the final authority on these questions.

* * * *

It is not generally known that Sir Jeremy Raisman is a very careful reader of newspapers and makes the fullest use of the suggestions made. At the moment he is engaged in considering the bullion question. At his last Press Conference he made it clear that he was prepared to take rapid and drastic measures to deal with the problem as soon as certain questions involving international arrangements had been settled. It is expected that the Government of India will ban forward transactions in bullion. To some extent this may have a steadying effect on the market. That negotiations have been going on for the import of silver from the United States under Lease-Lend, has been an open secret, but no decision has yet been taken. Lastly there is the small coin shortage which has been causing considerable inconvenience to the public in many parts of the country. The fact is that minting of small coins has been going on at an unprecedented rate, but other difficulties have intervened to prevent their proper distribution—not to mention the cumulative effects of hoarding which as a result of the shortage has been going on. A fact noticed by the curious is that among the places worst affected in the country are Delhi and Simla. I understand that the Finance Member has been giving his personal attention to the problem and will soon devise suitable measures for keeping adequate stocks in places like Delhi and Simla.

* * * *

For the present nothing is likely to be done about giving effect to the proposal for the freezing of company dividends. As a number of legal points are involved, some time will be required for giving final shape to the proposals. It may be that the Finance Member prefers to wait for the coming session of the Central Legislature for announcing his proposals. But what he and the Commerce Member are anxious to settle at once is the question of textile prices and the production and distribution of standard cloth. The Commerce Member is holding a conference with representatives of Provincial and State Governments on the cloth question. Drastic measures have been taken during the last few days for preventing undesirable speculation in the cotton market and stabilising cotton prices in the interests of the grower and the consumer. The authorities are now considering what should be done to bring down textile prices in general and secure fair distribution. A Delhi millowner, Sir Sri Ram, has in a statement to the Press, enumerated the difficulties which should be removed so as to bring down prices and increase available supplies to the civil population labour difficulty due to the food shortage, lack of stores, spares, coal etc., continued use of cotton yarn and cotton cloth by the military though it can be replaced by jute and other fibres, failure to cut down exports to the barest minimum and reluctance to increase yardage by reduction in quality. A good deal may be done if the Government and representatives of textile interests confer and come to a final settlement.

HILL-BIRD.

(Continued from page 932.)

the average man to do for himself instead of aiding the intricacy of division of labour by hiring others to do it for him. Civilised society of the future may well be organised on a denial of the principle of division of labour in many parts of our routine life. If dirtless farming, of which scientists are speaking today, should prove capable of great extension, we might well become our own farmers and cooks instead of being buyers in the grain market and customers for restauranteurs. If the essence of the new economics lies in the potentialities of organisation without allowing the profit motive to hinder progress, then the developments I have indicated may not prove as chimerical as they seem now.

* * * *

But the major change, however, is in geographical division of labour. While dealing with the subjectivity of value, I pointed out how the advance of scientific discovery and invention has increased vastly the resources of each country for the pursuit of different lines of productive activity. Today, to ask for self-sufficiency is not to ask for the moon. Why, even that phrase is anachronistic, since you may get to the moon, if not get it, by means of a rocket. If self-sufficiency is a practical possibility, then the whole edifice of equilibrium economics falls to the ground, together with international free trade, which is the most impressive part of it.

'EAVESDROPPER'

NORTH WESTERN RAILWAY

Applications are invited from experienced European, or Anglo-Indian, candidates, preferably Retired hands from the Mechanical Workshops, N. W. Railway, Moghalpura, for appointment as Temporary Training Supervisor "Workshops," on Rs. 200 per mensem (fixed) in the revised scale of pay, for supervising the initial training, building up and further training etc. programmes of the Military Railway Units' Trainees in the Mechanical Workshops, Moghalpura, and the Signal Shops, N. W. R., Lahore, according to the scheduled trade tests and the syllabi prescribed for different trades from time to time.

2. The appointment will be temporary upto 30th September, 1943, with the possibility of extensions.

3. Applications giving (1) Nationality, (2) age, (3) Technical qualifications, (4) particulars of previous service on the railway, if any, with copies of certificates, duly attested, should be submitted to the undersigned, so as to reach his office not later than the 31st of May, 1942.

4. Further necessary particulars may be obtained personally from the office of the undersigned.

5. The incumbent will be in temporary Railway service and will not be required to enrol in the Mily. Railway Units.

Deputy General Manager (Recruiting)
North Western Railway,
60, Mayo Road, Lahore.

THE BANK OF BARODA, Ltd.

CURRENT DEPOSIT ACCOUNTS—Interest on daily balances from Rs. 300 to Rs. 1,00,000 will be allowed at quarter per cent. per annum, and on sums over Rs. 1,00,000 by special arrangements. No interest which does not come to Rs. 5 per half year will be allowed.

FIXED DEPOSITS—Received for long or short periods. Terms on application.

LOANS, OVERDRAFTS AND CASH CREDITS—The Bank grants accommodation and undertakes on behalf of its constituents the Safe Custody of Shares and Securities, and the collection of dividends and interest thereon; it also undertakes the sale and purchase of Government Paper and all description of Stock at moderate charges. Terms on application.

SAVINGS BANK—Deposits received and interest allowed at 1 per cent. per annum.

SAVINGS BANK DEPOSIT ACCOUNTS—Sums of Rs. 500 and over accepted at 1 per cent. per annum by transfers from Savings Bank accounts, subject to three months' Notice of withdrawal. Rules on application.

W. G. GROUNDWATER, General Manager

South India

(*From Our Correspondent*)

Madras, May 26.

THE suggestions made by the Mayor's Civic Association and the recommendations of the Board of Revenue thereon have come to nothing. The Government of Madras have refused to grant further concessions to the ryots of the Tanjore delta. The plea put forward is that "prices being now very favourable, a ryot who could do it would grow a second crop of paddy whether concessions are granted or not." The Board of Revenue recommended that the best method of extending and encouraging cultivation in the New and Old deltas was to bring as much of the cultivable area as possible under the two-crop system and that the assessment for the shorter *kuruvai* crop should be 1/3 of the assessment for the first crop in the old Delta and, in the case of the new delta, the charge for a second crop should be 1/3 the first crop charge where the land is wet and and 1/3 the water-rate for the first crop where the land is dry or *manavari*.

Had the Government acted upon these recommendations, there is little doubt that production of food crops would have received a strong fillip and the future in respect of food supplies could be faced with a measure of confidence. The Government would appear to have conveniently ignored the fact that, as against the favourable prices operating as an inducement, there are other factors operating against extension of cultivation. The Government's action in prohibiting free movement of food grains has artificially depressed paddy prices to much below their natural level. Besides, seasonal conditions for the *kuruvai* crop are so unfavourable that, without substantial concessions in regard to revenue assessment, cultivators will be content with growing single long-term *samba* crop and curtail both expenses and risks. When famine stalks the country and shortage of staple food crops has become the bugbear of all provincial governments, it is surprising that the Madras Government should take a complacent view and withhold usual inducements for growing an extra crop. It is hoped by some that better counsels might yet prevail with the government and that the Board of Revenue's recommendations will be accepted.

A mass meeting was organised at the Senate House on Saturday evening in celebration of "Tunisia Day." H. E. the Governor of Madras, Sir Arthur Hope, addressing the meeting, said that the Tunisian victory day was the first of a series of similar celebrations. He referred to Mr. Churchill as the "saviour of civilisation" to whose indomitable spirit and inspiring speeches he attributed the recovery of Britain and her Allies. Sir Arthur took the view that the talks now going on in Washington would mean much more than the so-called opening of a second front in Europe; they meant, in his opinion, a coming attack on the Axis everywhere, in Europe, Asia and the South Pacific. Passing on to other affairs, Sir Arthur discussed the shortage of food supplies in the province. He assured the people that he and his government were working full time to find a solution. He added that he was aware of two schools of thought, one in favour of rationing and the other against it, but his government was not to be influenced by either school of thought. With the Government, the question of rationing was one purely of expediency. If rationing proved the best possible way of getting food for the people, rationing, His Excellency said, will certainly be brought in. Mr. C. Tadulinga Mudaliar, the Mayor of Madras, grasped the occasion when proposing a vote of thanks to the Governor to point out how even the idea of rationing need not be entertained if only the Government would agree to the proposals of the Civic Association of Madras about giving some impetus to the "Grow More Food" campaign in deltaic areas.

The Government of India's announcement lifting the ban on the movement of rice and removing price control in Orissa has been received by the public with surprise and resentment. It is learnt that the Central Government's theory that Orissa has a surplus, on the basis of calculations on pre-war records, has been contested by the provincial government. That the serious cyclone which the Province experienced just before the last harvest has greatly upset the normal paddy and rice position of the province must be known to all. During the past few months, the province has been exporting considerable quantities, mainly to Bengal. Owing to the lack of largescale industries, purchasing power has not risen in Orissa to the extent it has risen in Bengal and other neighbouring provinces. It is feared that an immediate effect of the order will be an advance in prices. Representations have been made by the Orissa Government informing the Central Government of the adverse effects of the order. It is felt that the order helps the newly formed Bengal Ministry to the detriment of the neighbouring Provinces. The Orissa authorities have advised the District officers to take such precautionary measures as requisitioning of stocks.

The Committee appointed recently by the Madras Government to advise on the steps to be taken to develop the country craft traffic on the East Coast has submitted its findings. The recommendations envisage far-reaching and comprehensive development and it is heartening to hear that all the recommendations of the Committee excepting one regarding the removal of restrictions for the movement of grain by sea have been accepted by the Government. Even in this respect, it has been decided to issue special permits for transport of rice by sea. A press note issued recently says that the Port Officers are being instructed to keep the grain purchasing officers in their neighbourhood informed regarding boats available for taking cargo from time to time so that the Grain Purchasing Officer may arrange to issue permits for transport by sea (combined if necessary with transport by rail). According to the recommendations of the Committee, now approved by the Government, the Presidency Port Officer, Madras will be vested with powers to control country-craft traffic on the East Coast. He will be assisted by local Port Officers at the outposts and the Traffic Manager, Madras Port Trust, at Madras acting as Intelligence officers. A small Freight Advisory Committee is to be formed consisting of representatives of boat-owners and merchants at each port to prepare a schedule of suitable rates of freight for various commodities shipped from the port and to forward copies thereof to the Central control and other centres. As scarcity of materials and unusual difficulty in obtaining them preclude building of new craft, individual cases requiring assistance for building new craft or repairing old ones will be considered by the Government on the merits of each case, as and when they arise. For the purpose of insurance, an association of boat-owners will be formed at each port with the Port Officer as Chairman so that marine insurance companies may accept risks in respect of country craft and cargo carried therein. The administrations of the South Indian Railway and Madras and Southern Mahratta Railway are to be asked by the Government whether they are willing to co-operate to the extent of withdrawing any special rates that might tend to keep traffic on the railway.

(*Continued From Page 929*)

ter of the imports now cut off by Allied occupation of French Africa, is brought out in the tables which show that not only France but the Axis countries have lost heavily through the final defeat sustained this month. Changes in trade in 1942 must have been unfavourable but the essential conclusion that the colonial empire's resources are at the disposal of the Allies is not affected by the growth of imports into France noticed after 1938.

(*Continued from page 925*)

is understood. The demand for cloth is such that cotton available must be taken up. The danger to the cottongrower is illusory on any reckoning. That brokers are deprived of a livelihood does not mean that all middlemen are forced out of business. Cotton has to be brought to the mills, and the grower will come to the mills through the trade as before. The approach to the problem must be mainly from the angle of improved supply and distribution of cloth. Discouragement of all speculative sales of both cotton and cloth by mills in the future is not unexpected in view of the arguments in favour for the sake of doing a good turn to the consumer.

Prices of spot cotton are stabilised by the ban on forward trading. Since mills are busy spot cotton may even command a premium, and mills' profit margins cannot mostly be affected. By recognising the need to buy and store cotton in advance the mills will have to support the market at all times. As the stocks in Bombay are deemed adtquate there is not likely to be any stringency and there is an advisory panel to help mills secure supplies. The ban on forward trading comes after a series of special warnings protesting against the jump in prices.

That there are other things besides cotton to interest the investor in India need not be mentioned. That a forward market may develop in Indore has been frequently argued but the Indore State's production and consumption of cotton is not large enough to warrant the development of a big futures market of the regular type. Except for the E.I.C.A.'s representations as to the importance of preserving a regular market in Bombay, to insure against wide fluctuations in prices, there has been little to suggest that the ordinances issued this month are unpopular or unwarranted in view of the speculation rampant. Since fluctuations have been noted since March, and sellers have preponderated latterly in the cotton market, the protection afforded to the cottongrower has not been substantial. If raw cotton prices are kept down though they stand higher than in 1942 the mills may experience little difficulty in regard to supplies since there has been no hint of shortage as in the case of rice. The demand for Indian cotton in the war period is regulated entirely by mill activity, and mills are busy and prosperous.

Gateway of India

(*From Our Correspondent*).

Bombay, May 26.

THE latest cotton order of the Government of India, prohibiting forward trading in the current crop has come as a rude shock to the cotton market and unsettled all local business generally. Prices collapsed sharply overnight and persistence of nervousness explains why there has not been much of trading since. The feeling has been growing in cotton circles that the Government are not going to set things right. Such feeling has now received its confirmation. When the Central Government imposed their ban on forward trading in the new crop at the end of April, it was remarked that the order unwittingly embraced actual delivery contracts and that amendment was necessary if the measure against speculation was not to wipe out genuine buying by mills as well. A modification was introduced last week-end to permit the use of certain contracts and it was understood that forward delivery contracts would be allowed for the new crop. The chief criticism against the latest order is that it makes precisely the same error and reveals that the Government have grown little wiser by experience. With characteristic ambiguity, the Government have banned *all* forward trading in the current crop. The question that troubles cotton circles is: why should forward trading in current crop be banned when its utility has been recognised in respect of the new crop. That, however, is not all. The words "Indian cotton" do not appear anywhere in the notification which is, to say the least, curious. Does the Government mean that all open contracts for foreign cotton should also be wound up? These vagaries only betray ignorance on the part of the Government of the various contracts figuring in the cotton market. It behoves the Government to ensure that the measures adopted in reference to the cotton trade are technically perfect and convey no more than what it is expressly sought they should convey. Opinion in the cotton trade is unanimous that the Government's present intention is only to prohibit Indian hedge contracts. Such a view is in consonance with the declared policy of the Finance Member as set out in the Central Government's communique dated April 1.

Ever since the Central Government began to take interest in the activities of cotton speculators, businessmen have stressed the futility of interference with trading in raw cotton without first controlling the prices of cloth and yarn. Consistent with its policy of starting from the wrong end, the Government slept over the matter despite appeals from leaders and went ahead with their measures against speculation in raw cotton. The Government have now only indicated that the possibility of fixing ceiling prices for cloth and yarn is being considered. It looks as though action intended to protect the interests of the larger public might do more to stabilise the raw cotton position than the series of measures so far introduced. The present position in the cotton trade has been aptly described by a local newspaper as the "cotton muddle".

Bombay has taken another step forward in regard to rationing by a proposal to include cloth among the articles rationed for the citizens of Bombay. Scarcity, leading to rise in prices has caused great distress to those whose incomes fail to keep pace with the rapid rise in the cost of living. The plan to ration cloth should certainly tend to alleviate distress in greater measure, especially, among the middle classes. The present plan of allotting 36 yards cloth to every person will result in an equitable distribution of available cloth supplies. The scheme has the additional merit that it will help to divert stocks of standard cloth to the villages where the need is more urgent. The scheme, it is learnt, will be introduced by the Government of Bombay in co-operation with the Bombay Millowners' Association. It is stated that the quality of the cloth allotted through the rationing card will be of a slightly better quality than standard cloth. The public have been assured that the prices, too, will be substantially lower than the prevailing rates. This scheme, together with the reply received from the Department of Industries and Civil Supplies by Mr. Ramnarain Poddar that the Government is contemplating urgent measures to deal with the higher prices of cloth and yarn, should serve to reduce disquiet in regard to the cloth requirements of the general public.

The reaction of commercial circles here to the new ordinance of the Government of India regarding Excess Profits Tax has been wholly friendly. The President of the Bombay Chamber of Commerce subscribes to the view that both the summary assessment of the E. P. T. and the requirement that 2|3 of the remaining 20 per cent of the excess profits should be deposited with the Government on a compulsory basis, should be welcomed as a long-delayed anti-inflation step. Mr. Haridas Madhavdas, the President of the Indian Merchants Chamber, however, is assailed by doubts as to whether the steps taken will have any lasting effect on commodity prices. Dr. John Matthai has pointed out that the withdrawal of some money from private circulation is not likely to make any substantial difference to the general level of prices and that the remedy for most control problems consists in tackling them from the commodity end rather than the monetary end. Mr. K. R. P. Shroff has elucidated the most interesting argument in respect of the new Ordinances by holding that the decisions of the Central Government would prove beneficial to industries in the end since the ultimate incidence of the E. P. T. would be lower by 6 2|3 per cent.

The ordinance to prevent flotation of mushroom companies has been generally welcomed as it offers no hindrance to any sound scheme. Certain businessmen, among them Sir H. P. Mody, have recently drawn attention to the rapid increase in company flotations. The Government, by assuming power to control company flotations have not only successfully blocked uneconomic avenues of escape for surplus funds but have effectually prevented the development of an unhealthy capital structure in the country.

The formal inauguration of the first Congress of the Communist Party of India was celebrated at the Kamgar Maidan on Sunday evening. A large number of workers and as many as 300 delegates were present. Placards were displayed all over the place which appealed to the people for unity to defeat the Axis powers and demanded the release of Congress leaders from jail. Mr. Bankim Mukherji, President of the All-India Kisan Sabha and Mr. S. A. Dange, founder-member of the Communist Party of India addressed the gathering. Mr. Dange said that the Communist Party would work strenuously for the consummation of Congress-League unity and that the immediate task to which the party should turn was to carry on agitation successfully for the release of Congress leaders.

In view of Moscow's recent decision Mr. P. C. Joshi, General Secretary of the Communist Party of India has issued a statement to the press. The statement welcomes the proposed disbandment of the Executive Committee of the Communist International. The proposal has been described by Mr. Joshi as a powerful blow against all reactionary elements who are using the existence of the world communist centre in Moscow as an excuse for machinations against the Soviet Union. By freeing Communist parties in the different countries from the statutes and decisions of the various Congress of the Communist International, the bottom will be knocked out of prejudices against the Comintern. The proposal, Mr. Joshi believes, will make the broadest national unity possible in each country and pave the way for the closest joint action between the members of the United Nations in dealing the final deathblow to Fascist imperialism.

The local silver market was steady early in the week. But on Tuesday, the statement made by the Finance Member that the Government of India were watching the position of the bullion market and that when they were in a position to deal with it, the Government would "be prepared to act drastically and rapidly" led to a sharp drop in the market and settlement opened weak at Rs. 131. Subsequently, the application of the ban prohibiting forward contracts in cotton to current crop led to a further sympathetic fall in silver which touched Rs. 128. Prices recovered towards the close on Thursday to Rs. 131. During the week, the Board of the Bombay Bullion Exchange decided to suspend forward trading in bullion after the current settlement is over. This decision naturally accentuated the bearish tendency of the market and the tone at the close was rather uncertain. The stock is reported to be about 1,500 bars. The daily average offtake is estimated to be at 100 bars. At the close, ready silver 999 quality was quoted at a premium of Rs. 2-4-0 over forward. The gold market was erratic. The demand early in the week was very poor, being only 1,000 tolas but towards the close an active demand for ready gold raised the offtake to 8,000 tolas per day. On Thursday, ready gold was quoted round Rs. 88-12. The stock was reported to be about 100,000 tolas. The subsequent fall is explained by other adverse developments in the commodity markets. The bullion outlook is not clearer owing to the fear of lease-lend silver coming into India.

Jute and Jute Manufactures

(By Our Jute Correspondent)

Calcutta, May 27.

THE latest ukase of the Indian Jute Mills Association seems to have come as rather a bombshell amongst some of the interests concerned, though there have been for some time past clear indications of the direction in which the wind was blowing. In reiterating the standard guarantees applicable to Tops, Middles and Bottoms for the new season as unchanged from last season, the circular goes on to state that, while there will be a Cross mark as in previous years, the standard attached to this and the conditions under which it can be bought and sold, will be the subject of later advices. Meantime, under Chapter X of the Rules, all dealings in Cross mark are prohibited, and this ban extends not only to dealings in New Crop Cross mark but in Cross mark of any season whatever. Existing contracts can of course be fulfilled, but no fresh contracts can be entered into for Cross grade jute of any description or season, until such time as the Committee declare the season "open". And that will be considerably later than the "Twelfth". It was fully anticipated that transactions in New Crop Cross grade would be prohibited until somewhere about 15th October, which is quite a reasonable provision in order to safeguard the maintenance of the official standards. But it may come as a blow to many dealers who hold an accumulation of Old Crop Cross mark, acquired in the course of normal business, if they are deprived of any opportunity of getting rid of it. It might have been considered not unreasonable if dealers had been given time up to 30th June to get quit of their holdings of Old Crop Cross, but the view apparently prevailed that such an act of grace would create an opportunity for overselling the Old Crop Cross grade, with a tacit arrangement that an option would be given for delivery of New Crop. This would of course have stultified the whole idea of restricting sales of low grade New Crop in the early months of the season, which practice has all along been the prime cause of the difficulty of preventing standards rising. In point of fact, the average standard delivered during the season just closing has been very nearly a grade above the specification laid down, and now once more confirmed. The paucity of claims and arbitrations is sufficient proof of this fact. Whether in the coming season the market shall get down closer to the standard specifications will depend largely on to what extent Mill Buyers exploit the Top mark, which should, if official guarantees are adhered to, constitute quite 25 per cent of the early offerings. It is not improbable that the margins of profit which have obtained in up-country working for the greater part of the past two seasons will be found to have shrunk markedly in the coming season which in itself will tend to encourage closer adherence to the official standards.

Another problem which is agitating the trade is the possibility of the fixation of maximum prices for both jute and gunnies. It would, of course, be futile to deal with one without the other. The question primarily arises from the fact that Hessian prices have soared high above the U.S.A. ceiling rates. Some sections of the trade fondly hoped that the U.S.A. would be forced to revise their ceilings in view of the advance in prices in Calcutta, but the U.S.A. show no inclination at all to comply with this expectation. There is indeed no particular reason why they should. They have pegged the prices of their own cotton production and are encouraging the use of that and other local fibres with a view to saving ocean freight. They have fixed the ceilings for burlap at levels, which no reasonable being can describe as mean, and there is every indication that they are prepared to buy burlap at these levels and to provide the freight for them. But having placed price restrictions on their own fibre productions, they do not propose to pay through the nose for textiles which can quite justifiably be described as quoting at profiteering levels. At all times the U.S.A. is the principal outlet for Calcutta hessians and in present circumstances it is almost the only market for which freight can be expected. So it seems a very poor policy for Calcutta to quarrel with its best, and almost only, customer. Indications all point to an increase in local stocks of goods owing to the high level of prices keeping overseas consumers out of the market, and this by itself may be sufficient to bring prices back to the ceiling levels at which trading can be resumed. It is not at all improbable that, failing any action by the Industry, the U.S.A. may exploit this factor to their own advantage, but it would be a much more graceful gesture towards a very important customer and Ally, if the Calcutta Industry were to take action of their own accord. It is highly improbable that the Industry would receive any assistance or encouragement from the local Government, whose obsession in regard to raw jute at least seems to be that the sky is the limit. But Mills have taken concerted action before on probably more debatable grounds and none could cavil if they were to prescribe the limits which they were prepared to pay for New Crop jute, while at the same time declaring themselves sellers of hessians at U.S.A. ceiling equivalents, with Heavy Goods prices adjusted to correspond. There would no doubt be a loud and pitiful outcry from the Bazar speculator who is holding—it might not be unjustly described as hoarding—vast quantities of jute goods of all descriptions. But such lamentations would fall upon unsympathetic ears, for there can be no manner of doubt that the same speculator has had a very good innings lately and must have a very good average for his holdings, apart from what he may have already tucked away in bullion.

On the other side of the picture, there is the position of supplies of raw jute to Mills. For months past Mills have not been receiving as much raw material as they have been using up, and there is little or no expectation that transport facilities are likely to improve in the near future. In fact there is always the possibility to be kept in view that the position may become even more acute. It is not difficult to envisage a state of affairs within the next few months when Mills are faced with only a month's stock of raw material in their godowns. The question which must be exercising their minds at present is whether to meet the situation half-way by prescribing early a further reduction in working hours and so spin out their available stocks of jute, or run the risk of having to take much more drastic action later with the inevitable repercussions on their labour force. To suggest combining maximum prices with a reduction in working hours, which would have the double effect of raising fabrics prices while depressing raw jute prices, might be considered altruism *in excelsis*. It is nevertheless a possibility which may have to be faced and a voluntary move to anticipate developments might be well worth consideration.

There has been little business reported from the Export Jute market beyond a small turnover in Dundee Daisee at Rs. 95 and Rs. 96. Mills in the earlier part of the reporting period bought Firsts at Rs. 98, Lightnings at Rs. 93 and Daisee at Rs. 98 but have latterly held aloof.

The turnover in Loose Jute has been inconsiderable though parcels of fairly high assortment supervised Jat have found buyers at Rs. 19-8 and Rs. 16-8 for Middles and Bottoms. But the market generally has been idle with buyers showing no interest.

Reports of the progress of the New Crop speak of rain being wanted in almost all districts though the crop has suffered so far no damage and is making satisfactory progress. There are indications that the monsoon is not far away, reports having come to hand that it has already broken in southern India.

Speculative activity in the end of last week sent prices of fabrics soaring again. The favourite counters, eleven porter hessians and "B" Twills were about the only descriptions concerned, since shipment enquiry was completely absent. Eleven porters were forced up from Rs. 28 to over Rs. 29 and "B" Twills from Rs. 69 to Rs. 74. But the movement was not sustained and prices quickly relapsed, elevens to around Rs. 28 again and "B" Twills to Rs. 68-8. Among the few non-speculative sales reported were "B" Twills at Rs. 71 for July/September shipment and later at Rs. 68 for 15th June, and 3¼ lb. Grains at Rs. 102 for July/Novr.

JUTE

Calcutta, May 27.

A moderately firm tone has again characterised the jute market without local business recording any increase. With export business small, quotations for pucca bales have shown a slight rise again. Buyers' reserve accounts for the rise of Rs. 3 to Rs. 96 in the case of Dundee Daisee 2/3 with buyers reserved. The improved war situation accounts for the renewed firmness in both jute and hessian, while the latter has exerted a direct influence on mills' view of jute prices. The progress of sowings this month has been deemed satisfactory but the rainfall reports alone should have a definitely steadying effect on loose jute in the coming weeks. The drop in rates for heavy goods for May delivery may account for the relative quietness of loose jute but the only quotation received this week for Supervised Jat Middles at Rs. 19-8 per maund for new crop shows a rise of 4 annas on the past week.

Since Monday the jute market has been fully steady but inactive, and the local stock position has helped to keep up prices. The reduction in mills' working hours has not affected the prospects of jute consumption though mill demand has not broadened of late. In spite of the recovery noted in U.S. consumption during April and the fall in stocks up to Wednesday, the market has been described as idle with rates unchanged. Mofussil markets still quote higher rates as stocks are low, and transport is difficult.

JUTE MANUFACTURES

Calcutta, May 27.

The Calcutta hessian market has turned firmer though business is on greatly restricted scale. Only small interbazar transactions have been reported on most days, but the brightening outlook accounts for the maintenance of rates around last week's level in the case of 9 porters and 11 porters alike. Narrow fluctuations have been regulated largely by the poor export demand and the eagerness of second-hand sellers. The rate for 9 porters for May/July quoted on Wednesday Rs. 21-12 and October/December Rs. 21-8. The drop in 11 porters by 4 annas to Rs. 28-1 this week was due to a quieter feeling in the bazar after the advance last week. The reduction in the working hours of mills may only have an effect after the increased mill production for April wears off. The reduction of interest noted on Monday was followed by a drop in 9 porters from Rs. 22 to Rs. 21-12. The drop in the Heavy Goods section is attributed to paucity of business. Cornsacks eased off to Rs. 68 on Wednesday and B. Twills were quoted lower at Rs. 68-8 for May delivery owing to business being of an interbazar description. Liverpool Twills also shaded off to Rs. 71 against Rs. 75 reported a week ago. Speculative interest has evidently fallen away and the quieter hessian market this week shows traces of mixed sentiment in sympathy with the closure of cotton etc. Estimates of larger hessian consumption in the future may help to keep up prices. But U.S. ceilings must be a deterrent to local operators who see no end to the rise in hessian.

COTTON

Calcutta, May 27.

Cotton rates have not been published as the Government's prohibition of forward business and options stands. It has since been announced that all cotton is covered by the Order which covers not only Karachi and Bombay, but all cotton markets. The quietness of the oilseeds market is a result of the ban on cotton futures which includes the current crop. The E.I.C.A.'s argument as to the loss to the cotton-grower and the trade employing 4,000 persons has been overruled. The settlement rates naturally are below the rate of Rs. 575, noted here last week fixed at Rs. 565 for May and Rs. 598 for July and by an amending order contracts in other markets are to be forcibly liquidated at the rate ruling on May 21.

The end of the futures market has not provoked a bearish feeling outside the yarn and piecegoods market. Plans to raise the standard cloth output to 2,000 million yards in a year argue a larger offtake of cotton and the prohibition of futures trading may lead to larger buying by mills in their own interest though actual stocks will have to be worked off. The rationing proposal does not imply even a reduction in raw cotton imports or an advance in the rates for Indian cotton. Floods in the U.S.A. may affect the U.S. cotton crop though nothing can be known till August but larger lease-lend supplies may increase U.S. mill consumption this year. Inter-Allied discussions as to commodity pools etc., after the war say little about present prices, but the U.S.A. has been warned about the higher cost of living and its dangers to prices and wages. The coal-miners have won a small victory and collective bargaining may raise miners' wages.

GOLD

Calcutta, May 27.

From the sharp fall in rates this week one may conclude that gold is again passing into the market but it is really due to a drastic adjustment of speculative business after the Bombay Bullion Exchange decided to curtail forward business. The Bombay market has moved in swift jerks to lower rates for gold and silver. The market has eased sharply again after the closure of forward dealings in most commodities. Gold has fallen to Rs. 75-12 per tola though the Calcutta price is around Rs. 78. The premium on coin has been reduced as the guinea quotes Rs. 57 in Bombay and Rs. 59 in Calcutta. Within a fortnight, gold has dropped by Rs. 17 per tola and buying at the scaling-down today cannot be large. London still quotes 168s. per ounce and prices in India are still out of line.

SILVER

Calcutta, May 27.

The silver market is depressed after the suspension of dealings in cotton. The offtake in Bombay is known to be poor, and the Government's plans to take idle money out of the hands of the public has been more important in its effects on bullion than on essentials like food grains. The rate for ready silver has fallen from Rs. 130 to Rs. 119 per 100 tolas in a week.

The opening on every day has been easy and the rate has fallen away steadily owing to the fear that the U.S. Treasury might even supply silver out of its enormous stocks in the future. The Calcutta rate for silver is only slightly above the Bombay rate at present. The slackening of demand, even at the decline is obvious, and the success of anti-inflationary measures and effectual discouragement of speculation is attested by the rapid drop in silver.

WHEAT

Calcutta, May 27.

The existence of control in Sind and the adoption of free trade in the Eastern Zone offset each other. Choice white in Karachi is over Rs. 60 per candy. Though Hapur rates are low, and stocks there are poor, the rate for wheat is rising in spite of the Punjab being a ready seller. Milling demand explains the rise as also the direction to use wheat in place of rice in Bengal where the rice reflcit is certainly alarming. The rate in Lyallpur is up to Rs. 11-4 per maund and assurances given to mills in Bengal imply that Punjab wheat will be brought at rates ruling in other markets since decontrol was decided upon. Wheat is still cheap in relation to rice etc. and the emergence of large-scale buying by the Government's agents has led to new estimates of the outlook in places where a surplus is on offer. The demand for flour is growing and imports can make little impression on prices partly because imports are meant largely for Defence Department requirements.

OILSEEDS

Calcutta, May 27.

The recent increase in rates for groundnuts offered from London has made the market nominal owing to the difficulties noted in Bombay. The freezing order has arrested the rise in prices, but the outlook is known to be bullish for linseed as well as groundnuts. Over a long period, Calcutta linseed rates testified to the reluctance of sellers to ship, though the Argentine crop is known to be large. The rates for linseed in Cawnpore and Bombay are well held, and the rise in cotton-seed etc. sustains the feeling that linseed prices cannot come down. Owing to local stocks being on the small side, Calcutta prices have hardened further and the continuous rise in Bombay is having its own effect. Vegetable oilseeds and oils generally, are still quoted at high levels, and the prices in Madras, for instance, are not dropping owing to the failure of crops in many districts and the desire to make the most of the commercial crops.

GOODS

forwarded and cleared to and from railway stations and ports. Deliveries received at Calcutta, on cash payment of customer's purchases and subsequent despatches arranged to suit outstation clientele.

Stock Markets to-day and to-morrow

NOTHING TO FEAR EXCEPT FEAR

The Stock Exchanges have been passing through a series of convulsions owing to a series of shocks. It was about a month ago that a report was brought on the market that the Government were shortly issuing an ordinance to restrict dividends. In the following week, a report emanated from the same source that the level of E.P.T. would be raised. Last week, the dreaded Ordinances were made known to the public; and the immediate effect was to accentuate selling pressure. On cooler consideration, however, market circles realised that the new Ordinances were nothing like the anticipated measure for restricting dividends and that the level of E.P.T. was left unchanged. Confidence revived in most sections of the share market. This was only a short-lived phase as the latest bombshell is to the effect that prices of yarn and cloth will be controlled. This report will, on closer scrutiny, turn out to be less serious than has been conjured up by fear. The compulsory lowering of prices of yarn and cloth cannot do much harm to cotton mills as the lion's share of excess profits is, in any case, being taken away by the Government. What stock exchange circles and investors must be careful to note is that most of the Indian industries are doing exceedingly well; and that their profit-earning capacity is so abundant as to allow of reasonably attractive dividends. I wish to stress that the event will prove less dreadful than fear has painted it.

* * * *

The undeniable revival of market interest in the shares of the Aluminium Corporation of India should gain an impetus from Lala R. R. Gupta's speech at the annual meeting on May 17. Lala Ramratan Gupta's speech provides the essential postscript to the report for 1942 which stated that the alumina plant is in commission since October last and the electrical generators etc. from the U.K. had reached the works though accident deprived the company of one set of switchgear. The Company has been able to produce aluminium of recognised commercial purity, and negotiations for the sale of the product are in progress according to the Chairman. The balance-sheet as on March 31, 1942 showed that excluding the cash balance of Rs. 6.27 lakhs the Corporation had put up Rs. 62½ lakhs for capital expenditure till then. It was noted that capital outlay has since risen by Rs. 30 lakhs and the Managing Agents secured the necessary finance. Progress has not been hampered by want of funds and Rs. 37½ lakhs spent since the House of Juggilal Kamlapat took over account for the commencement of production. The next report and accounts covering the year ending March 1943 should indicate what has been achieved and what is required. It is not necessary to evaluate once again the prospects for a major key enterprise; but readers will note that the undeniable progress of the construction work has made it clear that the Aluminium Corporation is fortunate in having command of coal and bauxite, and construction has not been unduly delayed. This is of special importance in relation to the confident survey of the Company's affairs. The speech indicates that the hopeful outlook is brightened by the beginning of actual production, and large results may be expected later on when the Corporation's plant is working to capacity. The Corporation has certainly made real progress, and faith in its future is certainly shared by many investors in India.

* * * *

In marked contrast to the results for the half-year ended September, 1942, the earnings of the Bird-Heilgers group of companies for the half-year ended March, 1943 are quite satisfactory. It may be remembered that the directors pointed out in their previous report that the efficiency of the mills was considerably below normal owing to a number of factors. Since the publication of the reports for the half year ended September, 1942 barring minor fluctuations, hessian prices have considerably advanced owing to improved demand. The shipping position, which was growing from bad to worse during the first half-year has been generally satisfactory during the period ended March, 1943. Though the Government cancelled some important orders, the position has not much altered as further substantial orders for other types of goods were placed. The Directors state that arrangements were completed with the U.S.A. for special shipments to improve the stock position in that country. The Directors further point out that since there are indications that Indian centres are fully stocked, exports rather than internal sales are the deciding factor now to maintain production at present levels. While the shipping position has considerably improved, the problem of supply of raw jute and coal to mills is still causing some anxiety. The efficiency of the mills has suffered a partial setback from last December to March this year, owing to an exodus of workers from the Calcutta district consequent on the air raids in December and January. Another problem which the directors had to grapple with was the supply of food for workers. In combating the situation they had to incur some expenses which added considerably to manufacturing costs.

* * * *

Reference may be made at this stage to the increase in capital following the issue of bonus shares by the group. With the exception of one company, the Standard Jute Company, Limited, all other companies in this group have declared higher dividends; and the net profits of all the companies except the Auckland Jute Company are in excess of the previous figures. Four companies, the Auckland, the Clive, the Lansdowne and the Naihati have been successful in their appeals to the E. P. T. authorities. Three companies have doubled their dividends to ordinary shareholders. One company, the Auckland, has been able to increase its dividend substantially though the net profit for the half year under report is actually lower than that for the previous half-year.

* * * *

The result of the Northbrook Jute Company Limited for the half-year ended March, 1943, is remarkable for the simple reason that the net profit before providing for taxation, depreciation and other reserves is more than double the amount earned during the previous half-year at Rs. 5,46,962 as against Rs. 2,38,914. The fairly large sum of Rs. 3,36,591 has been set apart for taxation as against Rs. 81,089 only on the previous occasion. The amount provided for depreciation is almost unchanged at Rs. 44,142 (Rs. 44,141). The directors have transferred Rs. 14,522 (Rs. 20,000) to Welfare Reserve. A new reserve called the War Contingency reserve has been created during the half-year under review and a sum of Rs. 25,000 has been set aside for this purpose. The amount carried forward is lower at Rs. 10,416 against Rs. 11,164 brought in. The dividend on the ordinary shares has been increased from As. 6 per share on the previous occasion to As. 10 for this half-year.

(*Continued on page* 957.)

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, May 28.

In the last two days the local Stock Exchange has turned steadier owing to the encouraging war news and the disappearance of nervousness caused by the new Ordinances. Firmer conditions in jute have helped to some extent to restore the tone and prices have been steadier. Cotton shares remain weak owing to fears of the Government control, higher taxation and the drop in the price of sugar shares is due to the predominance of sellers. There has been no noteworthy change in giltedged and investment business in fixed-interest bearing securities remains moderate as before.

Material improvement has followed the announcement of the Steel Corporation dividend of Annas 10 per share on Thursday. Steel Corporation has improved swiftly to Rs. 27 and a further rise owing to the oversold position is indicated. On Friday business showed a fair increase in support. Indian Iron and Steel has encountered more support owing to general appreciation that the increase in E.P.T. cannot affect the Company greatly. Under the leadership of the two engineering companies' shares all markets have become steadier. Indian Iron has quietly firmed up to Rs. 35-4 on Friday afternoon.

Business in Government securities have been moderate, with 3½ per cent Paper steady at Rs. 94. Small odd lots have been taken at higher rates. 3 per cent Defence Bonds 1946 have been bid up to Rs. 100-10.

Transactions in dated stocks have been small, and the chief feature has been the buying of 5 per cent 1945-55 at Rs. 107-2 with small lots being taken up at Rs. 107-8. The only business in Provincial Loans was a deal in 3 per cent U. P. Loan at Rs. 95-6.

The market for debentures has been idle, and business in Preference shares has been small. *Hastings* Preference has found buyers at Rs. 145-8 and *Kumurdhubi Engineering* Preference being reported done at Rs. 195. Dealings in *Orient Paper* Preference have been reported at Rs. 115-8 and *Titaghur Paper* 2nd Preference Rs. 112-8. *Alkali & Chemical* Preference has been in request at Rs. 126 and *Dunlop* 2nd Preference was absorbed at Rs. 117.

Jute shares have firmed up latterly, and improvement has followed the small rises noted on Wednesday. Quotations received during the week include *Anglo-India* Rs. 389, *Bally* Rs. 333, *Barnagore* Rs. 131 and *Bengal* Rs. 26-8. Among the popular counters *Howrahs* firmed up around Rs. 63½ and *Kamarhatty* Rs. 551. Small lots of *Champdany* and *Belvedere* were done above the quoted price. *Nuddea* has been the most popular of the smaller shares being done around Rs. 94 ex-dividend and has risen at time of writing to Rs. 96, after being down to Rs. 91-12. The undertone is much steadier. Small rises were also reported in *Nationals* and *Northbrook*. Owing to sundry rumours, not so far confirmed in any way, there was a revival in low-priced shares like *Presidency* and *Waverley* with business done up to Rs. 6-11 and Rs. 4-5 respectively. *Craig* was taken up to Rs. 3-8. Much buying is also reported in the jute section during the week.

Business in coal shares has been restricted to the smaller speculative counters, though the undertone remained steady. *Katras Jherria* improved to Rs. 34-12 and *Bengal* from Rs. 440 to Rs. 447. *Equitable* has hardened to Rs. 37-2 while business in *Burrakur* was reported done at Rs. 15-6 and *Kalapahari* at Rs. 14-6. Among cheaper shares, *Talcher* was fancied at over Rs. 3-8 and *Parasea* Rs. 3-11. *Searsole* has risen to Rs. 5 and *Jainty Central* is well over par at Rs. 2-12. *Churulia* and *Baraboni* attract attention and the payment of a dividend has diverted interest to *Bhalgora* lately.

In the Miscellaneous section, *Indian Irons* were bought around Rs. 35 after the shares went ex this week. On Friday the opening was firm at Rs. 35-2 and the dullness noted on Wednesday had passed away as the quotation advanced to Rs. 35-4. *Steel Corporation* showed a gain of a Rupee on the week at Rs. 27-2 after the notice as regards the final dividend appeared. At close of dealings the quotation was higher at Rs. 26-15. The interest in *Kumurdhubi Eng.* is evidently maintained as business around Rs. 8-8 was noted on most days and it has since risen to Rs. 8-11. *Bhartia Electric* has declined after the dividend payment while *National Irons* improved slightly to Rs. 12-12. *Indian Galvanising* quoted Rs. 38-8, *Jessop* (Ordy.) Rs. 19-14 and *Indian Malleable Castings* (Defd.) at Rs. 3-8 to Rs. 3-13 show that the popular shares retain a following. *Arthur Butler* has been noted at Rs. 14-10. The feature of the week is the rise in *Calcutta Ice* following a notice regarding a return of capital to shareholders at the rate of Rs. 2-8 per share. The quotation has risen to Rs. 14. The bear position in *Aluminium Corporation*, has been connected with the large buying developed early this week but the quotation has receded to Rs. 20-4, *Calcutta Trams* has risen rapidly for similar reasons to finish at Rs. 22. *B. I. Corpn.* has eased to Rs. 6 and small buying raised the price of *Ivan Jones* to Rs. 3-1 and *Walford Transport* to Rs. 2-8. *Assam Saws* has been absorbed at Rs. 4-8 to Rs. 4-9.

Cotton mill shares have been depressed and the weakness reported in Bombay has reduced buying. Support, however, has been forthcoming for *Elgins* around Rs. 75 on most days and the announcement that the bonus shares will be issued has led to renewed buying of *Cawnpore Textiles*. Nominal gains are shown by *New Victoria*, *Mahalaxmi* and *Kesoram Mills* while a bare recovery has taken place in *Basanti* and *Benares Cotton*. *Dunbar* has eased off to Rs. 289 and *Dhakeswari* has been dull at Rs. 26-8. Since Bombay has turned seller of textile shares the tendency is still bearish.

Sugar shares have been very patchy though the new shares like *Jammu* and *Kashmir* have been taken up and *Belsund* shows a small rise at Rs. 11 and *Samastipur* too at Rs. 17-8. *Balrampore* has been noted up to Rs. 14 and *New Savan* Rs. 16-10. *Murree Brewery* has been exceptionally firm at Rs. 21-7 while *Carew & Co.*, receded to Rs. 17-12, recovering later to Rs. 18-3. *Ramnugger Cane and Sugar* quoted Rs. 10-11, *Champaran* Rs. 35-4 and *Darbhanga* Rs. 21-8 point to no change in sentiment in this section after selling developed at higher levels though late support raised *U. P. Sugar* to Rs. 22-4.

The broadening of interest in tea shares is attested by a larger number of transactions every day. Among the popular Tea shares, *Tezpore* has appreciated to Rs. 15-4 and *New Terai* Rs. 25-4 is well held. Following the announcement of a dividend of only 10 per cent *Hansqua* has shaded to Rs. 13-15 but *Eastern Cachar* has advanced to Rs. 12-4 and *Loobah* too has been in good enquiry around Rs. 10-12 on rumours. Among the bigger-priced shares *Banarhat* quoted Rs. 335, *Gungaram* Rs. 603-8 and *Hantapara* Rs. 598 show small gains. *Grob 'B'* has improved to Rs. 1-4 and *Tirrihanna* to Rs. 14-6. *Bokakhat* has firmed up to Rs. 14 on reports along with *Tongani* noted at Rs. 13-10 cum-dividend breaking the dry spell with payment of 10 per cent for 1942. *Teen Ali* has been taken up to Rs. 22 while *Rutema* also shows a gain at Rs. 16-3. With satisfactory dividends in the offering enquiry has sprung up again and sellers manifest reserve in nearly all cases.

Limited interest has been shown in Paper shares. *Star Paper* has receded to Rs. 21-4 and *India Paper Pulp* to Rs. 190 while

(Continued on page 956.)

THE STEEL CORPORATION OF BENGAL, LIMITED.

NOTICE

In view of the uncertainty of mails from and to the United Kingdom the publication of the Directors' Report and the Accounts of the Steel Corporation of Bengal, Limited, for the year ended 31st December, 1942, which are to be published simultaneously in India and England, will be delayed. All possible steps are, however, being taken to have matters expedited. In order to enable shareholders to obtain payment of their dividends as soon as possible, however, the Directors have sanctioned the payment by way of an ad-interim dividend of ten annas per share on the Ordinary shares of the Corporation ranking for dividend for the year ended 31st December, 1942, which, shareholders must understand, will be the final dividend for the year. The Transfer Books of the Corporation will be closed from 14th to 28th June, 1943, both days inclusive.

Payment will be made on and after 5th July to those members or their mandatees whose names appear in the registers on the 13th June, 1943.

By Order of the Board.

(*Annual General Meeting held on the 22nd June, 1943, at 12 noon.*)

Audited Accounts for the year ended 31st December, 1942:—

	Rs.	A.	P.
The profit for the year, after providing for Taxation was	11,05,315	8	4
To which is added the balance brought forward from 1941 of	4,78,556	11	5
Total ..	15,83,872	3	9

Out of this total the Directors paid the Preferential Dividend on the Ordinary Shares amounting to Rs. 1,50,035 on the 25th September, 1942, and have transferred to the Reserve Fund Rs. 1,50,000, leaving a balance of Rs. 12,83,837-3-9 available for distribution which they recommend be dealt with as follows:—

	Rs.	A.	P.
Final Dividend of 7½ per cent on the Ordinary Shares	2,25,052	8	0
Dividend of 7½ per cent on the Deferred Shares	75,000	0	0
Bonus of 12½ per cent on the Ordinary and Deferred Shares	5,00,087	8	0
Balance carried forward	4,83,697	3	9
Total ..	12,83,837	3	9

The stimulation of business owing to war demands mentioned in the last Report continued during 1942 and good results were achieved in almost every sphere of the Company's business. Exceptions were in Flour, where the difficulty in obtaining wheat severely restricted milling in the latter part of the year, and in Coal a temporary shortage of labour and later the difficulty in securing an adequate supply of railway wagons tended to restrict the despatches. All the Engineering shops continued to be fully employed and the Export business in tea was well maintained up to the time when shipments to the outmarkets came under Government control.

A welcome feature was the improvement in the market for Ice. The demand for Paper continued to be in excess of supply.

Director.—Mr. N. A. Grant.

Authorised Capital—Rs. 60,00,000. *Issued and Subscribed*—Rs. 40,00,700 *in* 30,007 *ordinary shares of Rs.* 100 *each and* 25,000 *deferred shares of Rs.* 40 *each, both fully paid up.*

ALUMINIUM CORPORATION OF INDIA LTD.

ADDRESS of Mr. R. R. Gupta M.L.A. (Central) Managing Director, J. K. Ltd., Managing Agents to the Corporation to the Shareholders at the Annual General Meeting of the Corporation on 17th May, 1943.

Gentlemen,

This is the first balance sheet covering a period although a very small one of not more than seven months, of the working of the Corporation under the management of J. K. Ltd. In presenting last year the accounts for 1940-41, I commented at length on the potentialities of the important enterprise we are engaged in. No further emphasis is called for in that direction. So far as the Balance Sheet placed before you is concerned, the only point to emphasise is that our capital expenditure neglecting the bank balance of 6 lakhs on 31st March, 1942, has reached a figure of 68 lakhs, although the expenditure incurred during the seven months of the working under the present management did not exceed 7.6 lakhs of rupees. Since the closing of the present accounts on 31st March, 1942, the Managing Agents had to find new funds to the extent of another 30 lakhs of rupees. I reserve my remarks on this financial aspect of the enterprise until presentation of our accounts before you for 1942-43. Having placed the accounts of the Corporation on a more systematic basis than what they were under the older management, we hope to present our next balance sheet for 1942-43 in the course of the next few months.

Regarding our headway to the operative stage of the enterprise, as I assured you, gentlemen, last year, our Alumina Plant is in commission since October last year through various stages of what I may describe as a trial period. We have been able in more recent months to produce Alumina of recognised commercial purity and at the moment negotiations are in progress for the sale of our product through the good offices of the Department of Supply Our Electrical Equipments long on order with a British Manufacturer have at last been delivered to us and are at the moment awaiting erection at our Works Site. One small bit of hard luck has marred our good fortune in this respect. It is this, that the consignment containing Switchgear equipments of the Power House have been sunk in transit. A replacement order has been placed but as you will doubtless realise, without the control arrangements, our Power House cannot be made to run full load and thus our Reducing Plant cannot be brought into fully operative stage.

I shall round off my remarks with the assurance, Gentlemen, that we are going ahead as best as we humanly can and if progress is not as quick as we might wish, our faith continues unabated and our determination unflagging amidst all difficulties.

(Continued from page 940)

Mysore Paper has improved to Rs. 27. More enquiry for *Titaghur Paper* shares has been in evidence with the rate going up to Rs. 26-2. *Sri Gopal* Rs. 22½ and *Orient* Rs. 29 are more or less flat. There has been no business reported in *Bengal Paper* for two weeks and more and buying enquiry is confined to *Titaghur Paper* on hopes of a higher dividend declaration as usual. Expectations account for a sharp rise from Rs. 25-4 to Rs. 26-4 in four days in a restrained market.

BOMBAY STOCK EXCHANGE

(From Our Correspondent).

Bombay, May 27.

Various rumours regarding the control of cloth and yarn prices coupled with the Government order freezing stocks of groundnuts and sugar candy have made it impossible for the local Stock Exchange to exhibit any well-defined trend during the period under review. The firm trend noticed last week-end failed to continue into this week. Towards mid-week Textile counter developed a better tendency and it almost appeared as if mill shares would stage a recovery. But exactly at this stage rumours gained ground that control of cloth and yarn prices was imminent and naturally operators and investors alike decided to follow a policy of 'wait and see'. Since mill shares are invariably the leaders the general trend of the Stock Exchange became irregular.

Mill shares have further declined owing to general selling *Bombay Dyeing* shed more than fifty points to quote at Rs. 1,877-8 as against Rs. 1,930 last Thursday. *Central India* are quoting at Rs. 810 *Indian Bleaching* Rs. 227; *Phoenix* Rs. 780 (820); *Kohinoor* Rs. 848 (855) and *Sholapur* Rs. 9,275.

The Steel section has been steady throughout the period under review. *Tata* Deferreds are quoting Rs. 1,940 as against Rs. 1,935 last Thursday. Tata Ordinaries are quoting at Rs. 394 and *Indian Iron* are better at Rs. 35-6.

Rather easier conditions were noticed in the Miscellaneous section in sympathy with Textiles. *Alcock Ashdown* are considerably lower at Rs. 845 as against Rs. 890-8 last Thursday. Another share which has sustained a substantial loss is *Bombay Steam* which is quoting at Rs. 522-8 today. *Shivrajpur* also is considerably lower at Rs. 61-12. *Premier Construction* have lost two points to quote at Rs. 167. *Belapur Sugar* is unchanged at Rs. 238.

MADRAS STOCK EXCHANGE

(From Our Correspondent)

Madras, May 25.

The easy conditions that prevail on the local Stock Exchange are the direct result of the new Ordinances promulgated by the Central Government recently. The Ordinance relating to E.P.T. is interpreted here as a measure to restrict dividends. Among companies that have declared high dividends Textile Mills occupy the first place. On the announcement of the new Ordinance, therefore, mill shares have considerably declined.

Almost all the mill shares have recorded a sharp decline. *Cambodias* are quoting at Rs. 42-12 as against Rs. 45-8 at the time of last writing. *Trichy* Mills were crossed at Rs. 32-4. *Maduras* are lower at Rs. 68-4. *Coimbatore Spinning* are also lower at Rs. 335. *Janardana* are Rs. 230; *Rajalaxmi* Rs. 315; *Sitaram Spinning* Rs. 230; *Mettur Indutsries* Rs. 310; and *Coimbatore Cotton* Rs. 368.

In the Plantings section there has not been any appreciable fluctuation in prices. *Thirumbadi* were Rs. 5-6; *Nilgiri Neerugundi* Rs. 13-14; *Chembra Peaks* Rs. 14-2; and *Cochin Malabars* Rs. 21-2.

THE UPPER GANGES VALLEY ELECTRICITY SUPPLY COMPANY, LIMITED.

NOTICE

is hereby given that the Twenty-fifth Ordinary General Meeting of the above-named Company will be held at the Registered Office, No. 12, Mission Row, Calcutta, on Thursday the 17th June, 1943, at 11-0 a.m., for the purposes of receiving and considering the Directors' Report, the Statement of Accounts and Balance Sheet for the Half-year ended 31st December, 1942 and to transact any other ordinary business of the Company.

(Continued from page 939.)

The earnings of the *Union Jute Company, Limited*, have touched the level prevailing in the second half of 1941-42. The net profit before providing for taxation, depreciation and other reserves stands at the comfortable figure of Rs. 12,12,412 against Rs. 7,10,018 for the previous half-year. The comparatively large amount of Rs. 8,23,268 (Rs. 4,43,358) has been set aside for taxation. The amount provided for depreciation is slightly higher at Rs. 73,074 against Rs. 72,311 set apart on the previous occasion. While the amount of Rs. 37,897 transferred to Welfare Reserve at present is lower than the amount (Rs. 40,000) provided on the last occasion for the same purpose, Rs. 50,000 has been credited to War Contingency Reserve which has been created during this half-year. The amount carried forward is substantially higher at Rs. 36,729 against Rs. 9,096 brought in. The dividend on the ordinary shares has been increased from Rs. 7-8 per share on the previous occasion to Rs. 10 for this half-year. The additional reserve and the increased distribution are features calling for special notice. The announcements were well received and the steadier undertone in the jute section is largely attributable to the satisfactory Company reports appearing this month.

* * * *

The accounts for the *Clive Mills Company, Limited* for the half-year ended 31st March, 1943 show a net profit of Rs. 6,60,848 before providing for taxation, depreciation and other Reserves as against Rs. 3,57,514 for the previous half-year. After providing Rs. 3,14,719 (Rs. 1,99,050) for taxation and Rs. 60,897 (Rs. 60,896) for depreciation, a sum of Rs. 92,877 is set aside to Welfare Reserve which is more than nine times the previous amount (10,000) provided for the same purpose. Further, a sum of Rs. 50,000 has been transferred to War Contingency Reserve which has newly been created during this half-year. This company is one of the four companies in this group whose representations to the E.P.T. authorities have been successful. As a result some relief was granted to the company which will result in a decrease in the incidence of taxation as long as E.P.T. is payable by the company. The amount carried forward at Rs. 14,464 is more than thrice the amount brought in (Rs. 4,109). The Directors have declared 8 As. per share payable to every ordinary shareholder on the books. This is double the dividend paid on the last occasion (4 Annas).

* * * *

Another company which has doubled its ordinary dividend is the *Lansdowne Jute Company, Limited*. Though the net profit before providing for taxation is not very much higher at Rs. 6,12,639 as against Rs. 5,78,948 earned during the previous half-year, the 100% increase in the dividend is explained by the fact that the reserve for taxation is less than 50% of the sum set aside on the last occasion. The company's representation to the E.P.T. authorities was heard during the half-year and some relief was granted to the Company. A sum of Rs. 1,82,502 has been provided for taxation as against Rs. 3,80,144 on the last occasion, Rs. 95,000 for depreciation, Rs. 61,359 to Welfare Reserve and Rs. 1,50,000 to War Contingency Reserve. The amount carried forward at Rs. 26,249 is considerably higher than the amount brought in (Rs. 5,971). A dividend of Rs. 3 (Rs. 1-8) on the ordinary shares has been declared.

A formal but wholly pleasant duty is discharged by commending the Investors India Year Book (now in the thirtieth edition) to our readers. The volume compiled by Messrs. Place, Siddons and Gough of Calcutta, is more than dependable and the introductory survey puts events of 1942 in the financial world in their proper place. Its up-to-dateness is indicated in the familiar supplement detailing the Kesoram bonus share proposal, the reduction of capital by Burra Dhemo Coal Company, and the addition to capital proposed by the New Victoria Mills Company. The prospects for industries are outlined admirably, and not for the first time is the encouraging outlook for tea given its proper place. Larger supplies, maintenance of quality, increased demand and higher prices form the background in this case, and India's pre-eminence in the industry at all times deserves special notice at present. The investor is duly reminded that limits are set to the activity of most engineering concerns in India which have special difficulties as regards steel and skilled labour and the more general adoption of the cost plus basis for Government orders. The Year Book's many obvious merits have been indicated in former reviews. The excellence of compressed statement stands out as before and but for the lack of figures relating to coal, cement etc., this reference work should be more interesting and authoritative than usual while it is always reliable as a guide regarding transfer and registration formalities. Our investors need to be reminded that scrutiny of earnings records in the past is wholly necessary in view of the increases in taxation this year. The professional investor, of course, needs no reminder as to what he has to do; but the many new investors with larger savings to invest should not neglect essential study which begins and ends with the Investor's India Year Book.

* * *

In the review of the 1942 report accounts of Balmer Lawrie & Company, Ltd. it was stated that the net profit before allowing for taxation and depreciation was lower at Rs. 36,72,587. The provision for bad debts (Rs. 25,202 in the previous year) has not been deducted, in which case, the net profit will be slightly lower by another Rs. 30,000 allotted for profits from 1942. The depreciation for 1941 was Rs. 68,148 (not Rs. 68,184) and that for 1942 is higher at Rs. 87,379. The allocation to Stock Reserve for 1941 was Rs. 95,336 (not Rs. 1.75 lakhs) and the same provision for 1942 is Rs. 50,000. The sum transferred to General Reserve is Rs. 1.5 lakhs. A reference to an analysis of the Company's accounts in this issue should render usual comparisons easier. The dividend for 1942 is unchanged as regards the ordinary and deferred shares at 25 and 20 per cent respectively. The dividend for 1941 was raised by 5 per cent and has since been maintained, not increased as noted two weeks ago. The higher carry-forward (Rs. 483,697) is obviously due to reduced allocations to Stock Reserve, and the writing off of goodwill. I am happy to be corrected as regards these essential details by a prompt note from the Company's office which clears up the confusion arising from the statement that the dividend on the ordinary shares is higher than that for 1941 by 5 per cent. The reader's thanks are in the first instance due to Balmer Lawrie for having supplied the exact figures and indicated completely and clearly that no change in the distribution for 1942 has taken place.

"WATCH DOG."

KYANG TEA SEED COMPANY, LIMITED

WORLD OF INDIAN FINANCE

Friday Evening.

SHORT credits continue to be rather more usable than they have been for many weeks past. Madras reports quite a satisfactory turnover in inter-bank call deposits; and this is due to the fact that the cotton season draws to its close much later in Madras than in other parts of India. The movement of the cotton crop in the Southern presidency does not come to a close for another two months. It follows that demand for short-term money in Madras will extend up to the middle of the monsoon months. The rates for inter-bank call money are ½ per cent in Calcutta, ¼ per cent in Bombay and ½ per cent in Madras.

The cash resources of banks are ample and, by all tokens, will receive considerable replacement in the coming weeks. In relation to this factor, it is difficult to understand the persistence of the treasury bill discount rate at the present level. For three weeks in succession, the average rate of accepted tenders has been unchanged at rupee one and anna one per cent per annum. This is the time of the year—and the cash position of the banks justify and warrant it—when a steady decline in the treasury bills rate is to be expected. On June 1, Rs. 8 crores of tender bills were on offer and applications came to Rs. 11.88 crores. The offer of tender bills for next week is unchanged at Rs. 8 crores. The sales of intermediates amounted to Rs. 3,90¼ lakhs. Sale of tap bills will continue at the unchanged rate of Rs. 99-12-0 per cent.

At the beginning of the last paragraph, we have stressed the point that the absence of decline in the treasury bill discount rate for three weeks in succession must be considered unseasonal. It is necessary to examine why the rate still persists at rupee one and anna one per cent. Does it betoken a kind of assurance on the part of the banks in general that they will be able to mulct such a high rate from the Government? Or, is the present financial predicament of the Government such that they have no alternative, but to agree to whatever rate the banks try to impose upon them? So far as the banks in general are concerned, there is no reason to assume that their interest in treasury bills is less keen or that any recent developments give them cause to feel that their bargaining power *vis-a-vis* the Government has increased. From reports we have received from various sources, most of the well-established banks continue to be inundated with deposits. In respect of these new deposits, it stands to reason that a suitable proportion will be invested in treasury bills which are the most liquid interest-earning asset that they can secure. It may, therefore, be said that, from the point of view of banks in general, the demand for treasury bills is now more rather than less. Nor are the Government in such abject poverty as to be obliged to be at the mercy of the banks. For a number of weeks in succession, the deposits of the Central Government with the Reserve Bank have been ruling at substantially big levels. So satisfactory, indeed, has been the cash position of the Government that a considerable amount has been utilised in the last 4½ months to cancel *ad hoc* treasury bills issued to the Reserve Bank in connection with the redemption of 3½ per cent India sterling stock. An explanation for the present unjustified high discount rate of treasury bills is, therefore, not to be found either in the attitude of banks or in the ways and means position of the Central Government.

It seems to us that the real reason is connected with the Imperial Bank's investment in treasury bills. It is well known that by far the largest single investor in treasury bills is the Imperial Bank. Since the end of March, however, Imperial Bank does not appear to be anxious to invest additional sums in treasury bills. Actually, between March 26 and May 28, the investment portfolio of the bank shows a decline of over Rs. 3 crores from Rs. 127.98 crores to Rs. 124.87 crores. In this period, the bank's deposits have risen from Rs. 179.86 crores to Rs. 183.51 crores. Cash also has expanded from Rs. 27.96 crores to Rs. 31.30 crores. These figures show that, far from the Imperial Bank subscribing for additional treasury bills, it has not, perhaps, reinvested in treasury bills to the full extent of maturities. In ordinary circumstances, the persistent advance in the Imperial Bank's deposits will have led to further increase in the treasury bills portfolio of the bank. We may, therefore, conclude that, if the Imperial Bank had taken full interest in the weekly auction of treasury bills, bidding would have been keener and substantial decline in the treasury bill rate would have been registered. It may be taken as certain that, as cash begins to pile up further in the hands of the Imperial Bank, it will emerge as a strong buyer of treasury bills. Such a development may not be delayed long.

The returns of the Reserve Bank for the last week have not been received upto the time of going to press; and comments on these statements have to be postponed to next week.

The new rules with regard to Government sanction for new flotations have given rise to various problems; and we take it that the Government will offer full co-operation in the solution of such problems as are reasonable. The point to which we wish to draw attention here is the fact that there are several points on which interpretations by various people in the know of things are not unanimous. In a word, there are doubts and difficulties of phrasing which need to be cleared up. In this connection, a representative of *Indian Finance* will shortly visit New Delhi to secure from the proper authorities a clarification of the many points now in doubt. Meantime, we quote below the *communique* that has been issued by the Finance Department with regard to the procedure for the making of applications for sanction for new flotations or new capital:

"Forms of application have not yet been prescribed for the submission of applications under Defence of India Rule 94A. Pending such prescription, applications should be made by letter addressed to the Government of India, through the Examiner of Capital Issues, Finance Department, containing a description of the objects of the company, a statement of the amount

TREASURY BILLS

India

Tenders for Rs. 8,00,00,000 of three months' Government of India Treasury Bills were opened on Tuesday, June 1. Total amount offered was Rs. 11,88,00,000. Tenders at Rs. 99-12% were accepted in full and those at Rs. 99-11-9% were allotted approximately 68%. Lower tenders were rejected. Total amount accepted was Rs. 8 crores, the average rate of accepted tenders being Re. 1-1% per annum.

Tenders for Rs. 8,00,00,000 of three months' Government of India Treasury Bills will be received on Tuesday, June 8, in Bombay, up to 11 a.m. (standard time) and up to the close of business on Monday, June 7, at other centres. Successful tenders should make payment on Friday, June 11. Other conditions are as usual.

There months' Intermediates will be sold from June 2 to June 7, at Rs. 99-12% subject to the conditions previously announced (viz. sales can be stopped at any time without previous notice, if Government think it necessary).

Three months' Intermediates sold from May 26 to May 31, amounted to Rs. 3,90,25,000.

During the week ended May 28, Government of India Treasury Bills for Rs. 6,57,75,000 were sold in favour of the Issue Department of the Reserve Bank of India.

Finance Abroad

Thursday Morning.

THE adverse effects of the U. S. coal strike on markets are slighter than presumed. The end of the Washington conference has provided a corrective and if the opening on Wall Street has been quieter on most days according to report, there is little to suggest that share prices have suffered which business exceeded one million shares on some days. Flood damage etc did not raise the level of U. S. commodity prices last week, and except for the shortage of coal in the summer, in the United States and Canada, there may be no immediate repercussions from the stoppage. Mineowners have not been altogether helpful; but the miners' demand for higher wages is viewed as impossible to comply with. The coal crisis may affect war production less than the rubber strike but the latest development suggests that Mr. Roosevelt's position is none too easy in the Third term. Mr. Ickes who ran the mines for two whole weeks cannot order the miners directly to get back to work. Nor can the War Labour Board. It is Mr. Lewis who holds the cards and only time can show if they are the winning cards.

The good news from the Aleutians and the Mediterranean does not seem to touch the level of security prices in London. Giltedged have been more subdued than usual because new money is not coming in as before. Home Rails have again yielded and lower prices reflect reduced support for the junior stocks. The main change in internationals is a rise in Rio Tinto while Nickel is quoting lower after the quarterly dividend payment. The oil share market is apparently dull and the recession in gold minings reflects something more than a mixed sentiment. The jump in Dunlop Rubber comes long after Sir George Beharrell's assurance that the raw material in some form would be forthcoming for the Company. In a dull market, a shilling rise certainly stands out. Further improvement in Cable and Wireless is perhaps due to the imminence of the annual report. No striking change is to be noted in Textile group or in the Planting group (in contrast to the firmness of tea shares in Indian markets) and what was observed two weeks ago as to the Tunisian victory being discounted by the London market receives support from the quieter markets of the week.

Commodity markets show little or no change even after the International Food Conference and there is of course no kind of movement in exchange rates. Borrowing of the usual sort on Friday has been noted, and the increase in treasury bill issue has become permanent. An increase in Deposits to 60 million will help the banks which have too much money. Changes in the Bank Return have little interest, though the small increase in bullion will not fail to be noticed. There has been enthusiastic comment on lease-lend achievements after the President made his report to Congress but the amendment to the Trade Treaty Bill was a sure sign of the Senate's jealousy of the Executive. The amendment was lost but the U. S. A. is still experiencing the effects of the reduced majority of the Democrats. There is little doubt that the 100,000th plane will excite less attention than the big strike and the showdown yet to come. Plans for an army of over 11 millions means a draft on farmers and the call-up of the married will assuredly make some difference to the food plans.

The Food Conference outlined tentative proposals for bigger supplies. International agreements over selected commodities to regulate stocks and prices are not left out. The U. S. farmer wants and expects higher prices—after the war at least, and importers, notably Britain, have not been left in doubt as to America's intentions. The Scott report is not going to make Britain self-sufficient, and the U. S. A. expects to keep export subsidies going—for cotton, if not for wheat. The changes in the balance of payments following dis-investment by Britain may render the economics of restriction less acceptable than in the past. Since the conference dealt with generalities like postwar relief, and said nothing about the farm programme, one must infer that U.S.A. will not deal with its farm surplus as it does with its gold. Mention of gold must make a reference to the prohibition by the Government of India of forward dealings in bullion. The penalty proposed is five years' imprisonment. The end of futures trading and options alike has not brought about a drop in prices. Gold and silver appear as firm as jute shares. The London and New York rates for silver are 23½., and 44¾ cents per ounce. Prices in India are much higher though demand is said to be limited. That the market in Bombay stands rather in need of caution is understood. There has been no comment in London on official action except as to defective controls in operation here and it is clear that the rise in the Bombay price of gold is due to the end of short selling. There is perhaps this to be said for gold at present. Not South African pleas for the metal but a further reduction in world supplies makes for confidence. The Colonial office decided to curtail gold mining on the Gold Coast. West African production was to be confined to certain mines said the order this year. Concentration on the lines adopted in Britain in the textile and other industries was to be adopted. The decision was explained by reference to the need for economy in equipment and manpower. It is clear that the stimulus to Nigerian and Congolese tin production can come only from a diversion of resources and effort. West African mining companies complained last year of difficulties regarding stores, and many reported a fall in output. Some large mining concerns must have closed down as the nucleus firms like Ariston, Bibiani, were to stay work while the others closed down. Australian experience is certainly shared by West Afrcia but the comparatively new Konongo gold mines (whose shares were familiar at one time to some Indian investors) is not affected by the concentration plan. West African production is not large, and in terms of war effort in the Empire, tin and manganese from West Africa are more essential than gold. The news should clear up bullion operators who may also know that license lies outside lease-lend and silver bought from Mexico would not be passed on to India in spite of suggestions that silver stocks should be replenished though the call-up of standard silver coins should have added to Government's own stocks.

The U. S. estimate of Japan's war budget is interesting for the reason that the total mobilisation law has secured for the Government 64 percent of the national income for the war, the war outlay alone is 80 percent of the budget and the strain in 1943-44 must be greater. Japan's military expenditure shown always in a special budget is stated to be 32.2 billion yen as against 21.8 billion yen in 1942-43. The considerable increase may underlie Tojo's appeal to be prepared for the crisis.

The increase in expenditure from 1 billion yen in 1936 to 32.2 billion yen in 1943-44 is the measure of the changes produced by two wars. The inflation induced by deficit budgets is not concealed by a variety of controls not always effective. The equivalent of 32 billions may be less than E 2 billions and the British budget estimate of £5981 millions, of which £500 millions may be at the most left for civil expenditure, is far bigger than the Japanese war budget. It is noteworthy that 32.2 billion yen fall short of Britain's revenue of $3 billions in the current year and the cost of war effort as between the two island empires is not equal. Higher borrowing is forecast, and the Bank of Japan's usual role as lender will not only be mark of frenzied finance but the persistence of inflation. The increase of 11 billion yen in military expenditure as compared with 1942-43 indicates that in spite of the spoils of war, rubber tin, gold and other metals the home population has got to pay. The increase noted in Japan's war expenditure is much greater than that noted in Britain between 1941 and 1943 and is all the more ominous. The Japanese South Seas programme is far from finished, and if a military decree has led to the extinction of the Hongkong dollar, the military yen is still far from strong. A bigger borrowing programme may be forced on Japan by reverses in the Pacific, but the Cabinet has been calling for sacrifices to meet an unprecedented situation. The story of Japanese rapacity has been told by many but the loss to the occupied countries which have lost markets for ever cannot be calculated. The true measure of loss is the suger surplus in Java and the rice surplus in Burma, coinciding with shortage in Malaya this year. The disposal of both does not concern the military regime, since it is ordered to look only for war materials and the business of getting the co-prosperity sphere going is beyond its strength.

Control of Cotton Textiles

The Indian cotton textile industry, historically the first and foremost of India's national industries, is, also the first to be subject to the completest scheme of State control in regard to production and distribution. Perhaps, it is not so strange as it may seem at first sight. For, it is only to be expected that the pressure, which the war creates for the regulation of economic life, should be felt most in a truly national industry. The cotton textile industry was brought into being by Swadeshi sentiment and nurtured to maturity by the patronage of the people, in the form alike of spontaneous preference of Indian cloth to foreign cloth and of high protective duties for a long period. It has during the last one decade come to meet by far the larger requirements of the masses for cotton cloth; and the change in our political and economic relations with Japan had landed the handloom industry in exclusive reliance on the Indian mills for its supply of yarn. Another important development which tended to make control inevitable is the increasing importance of the Indian industry in the Empire. When the progress of the war cut off the countries of the Middle East from their customary sources of supply of cotton goods, the Indian industry was looked up to fill the breach. There has thus been a series of developments which should have left no room for doubt in the minds of the millowners that their activities will before long be brought within a comprehensive scheme of Government control.

While there is, no doubt, a strong prima facie case for control of functioning of the cotton textile industry in India, it is difficult to overlook the fact that the Government have shown far less reluctance to bring under control industries which are predominantly Indian in ownership than those which are in the hands of foreigners. If one were to attempt a history of State interference in industry in India, the sugar and cotton industries will fill by far the larger part of the volume. Such a fact is too arresting to be dismissed as fortuitous, particularly when one notes that, when the jute industry was faced with more than one crisis in respect of regulation of output or entry of new mills, the industry was enabled, by various devices, to tide over the need for State control. Much, however, cannot be made of such facts. The place which the cotton textile industry occupies in the life of the people is such that the need to regulate the prices of cotton cloth cannot be dodged on doctrinaire grounds or on grounds of partiality for Indian industry. In times like the present, the only way of avoiding State control is for the industry to evince of its own accord every respect and consideration for the needs and conditions of the common consumer. It would be too much to claim for the Indian cotton textile industry any such concern for the consumer as alone can constitute a valid argument against State interference in the common interest.

The belated attempt of the representatives of the cotton textile industry to present a case against control by explaining the "reasons" why prices have risen to the present level only betrays the weakness of their case. In the statement that they have made, they emphasise that the industry has repeatedly approached the Government for a ban on exports and that, as the Government did not respond to that suggestion, they must bear the blame for the rise in prices. They argue:

> "If prices have risen, the blame cannot now be laid at the door of the millowners of India. The fault lies rather on the large quantity of 1,000 million yards permitted to be exported in the year 1942, which together with the large requirements of the Defence Services, left only 1,800 million yards for consumption in India. Fortunately, the position has changed in the year 1943. Production is expected to reach 4,800 million yards, and making allowances for the requirements of the Defence Services and exports, it is anticipated that 3,600 million yards will be left for local consumption, which is practically double the quantity that was available in the year 1942".

Apparently, the millowners are of the view that, even in a situation like the present, a mere reduction in the quantity available for internal consumption is sufficient reason for extracting high price from the consumer. A mere bald re-statement of the law of supply and demand must sound extremely cynical in the ears of the ordinary consumer; and in these days the least informed of the consumers knows that the cotton industry was helped to attain its present position by the sacrifices the people had made in the past. The only acceptable defence of the present level of prices, is a rise in costs. That the millowners cannot put forward any such defence is clear from their implicit admission in the following:

> "The millowners of India are not only anxious to see prices reduce, but they have constructive proposals which if adopted by the Government of India, would result in substantial reductions both of the cloth and yarn prices. Accordingly, it will be easily understood by the public that the millowners do not and never wanted to be in the position of tax gatherers for the Government of India, because four-fifths of the assessable profits have to be surrendered to Government".

It is a serious indictment of the mills' sales policy that up to the very moment of the announcement of the Government scheme of control, they had been levying the highest prices that the reduced stocks made it possible to get, and this, in spite of the fact that four-fifths of the assessable profits had to be surrendered to the Government. That the mills should in effect have acted as gatherers of a veiled, indirect tax of the most onerous kind is not calculated to increase popular sympathy for their protests against control.

The price policy in regard to exports, though it is clearly on a different footing is not any wiser. The cotton industry, it is true, has no obligations to consumers in the Middle East such as it has to the Indian consumer. But the prospect of building up an export trade on a permanent basis ought to argue against full advantage being taken of the scarcity of cotton goods at present. As Mr. Hydari has pointed out:

> "There is, at the present moment, a great shortage of cotton piecegoods in most countries east and south of Suez. These countries are, therefore, not unnaturally willing to buy almost any quantity or quality of cloth, even if it is offered at quite fantastic prices. To the middle man concerned with the export trade, this is a golden opportunity; but while to him it is only a question of high profits, to the Indian cotton industry these operations are earning an unenviable reputation. This is more unfortunate inasmuch as these markets continue to receive, from the United Kingdom, cloth of superior quality, although in small quantity, at very much lower prices. From a long-range view, the problem connected with the retention, if not the extension, of the export market, is of considerable importance to the Indian Textile Industry".

It was certainly up to the cotton textile industry to remove those sources of complaint. They are not, after all, as helpless in the matter of export as they would have the public believe. And even after exports are made, there is no reason why the limited stocks should have been sold to the public without reference to costs. If shortage in every commodity should have its full effect on price, life in this country, as, indeed anywhere in the world to-day, would be wellnigh impossible.

But the case for control can well rest on other grounds than charges against the millowners. Whether the war is drawing to a close or going to be still a long-drawn one, the stage has been reached when some attempt should be made to secure the maximum benefit for the country at large from the developmeent of our cotton textile industry. At the moment, this benefit has to be of the negative kind, namely, preventing avoidable increases in the price of a necessary of life which accounts for a large part of the domestic budget of the average Indian. Such questions of regulation have only to be taken up seriously, for them to reveal all their ramifications and intricacies. Tht control of the price of cotton cloth involves a similar regulation of the price of handloom products. Just as the latter would call for control of yarn prices, the former would require that all the items entering into the cost of production of the cotton textile industry should be brought within the orbit of the scheme. The statement of Mr. Hydari at the conference of textile interests in Bombay, shows that the Government do not flinch from the extensive character of the scheme of control needed for the present purpose. His speech has pointed reference not only to the various items of costs, but also to the very stages in the process of distribution.

The scheme now formulated by the Government may be said to fall into three divisions, the first referring to the materials entering into costs, the second, to the process of production and the third, to the methods of distribution. As the control of cotton prices is a necessary preliminary to the control of cotton cloth and yarn prices, the Government gave early indications of their decision to prevent undue rises in the price of cotton. They attempt now to safeguard on the one hand, the interest of the cottongrower by the assurance that "Government will be prepared to buy cotton on their own account if prices fall below a level which they consider to be fair", on the other hand, the millowners by assuring them that their requirements of cotton will be met by requisitioning cotton by whomsoever held at the maximum basic price of Rs. 550. As for the other items in costs, Mr Hydari has stated at the Bombay Conference: "It is proposed to impose control over the prices and distribution of fuel and millstores and also over cotton. There have already been established control in certain of these directions; thus, for instance, the cotton textiles directorate now control the movement of raw cotton, import and distribution of mill stores and prices and distribution of reeds, healds, shuttles and bobbins etc".

The two principal measures now contemplated in regard to the processes of production, are firstly, the reduction of the innumerable varieties of cotton cloth now manufactured to about five or six and the increase in the number of shifts to the maximum possible in each case. It is said that an increase in output of about 20 percent is possible through these measures of rationalisation. There is no indication, however, of the reduction in costs which may thus be made possible. But in the present conditions, an increase in output, with an increased allowance for depreciation for income-tax purposes, should be deemed a gain to the nation without any attendant privation for the industry.

The main purposes of a reorganised distributive system should be firstly, to ensure quick movement of goods into consumption without any hold-up of stocks for profiteering and secondly, to prune the profits of the middleman to reasonable proportions and secure the benefits of rationalisation for the consumer. Towards these ends, the industry itself has made the suggestion that the retail prices and the date of manufacture should be stamped on the cloth. "The margin between the ex-mills and retail prices should be wide enough to provide adequate remuneration for such middlemen as actually perform the necessary function of linking the manufacturer with the retailer. The effect of thus pegging these prices will be to force the retailer to buy from the wholesale dealer only at a price which will enable him to make a reasonable margin of profit within the maximum retail price; the wholesale dealer will only buy from a mill at a price which will enable him to sell at a profit to the retailer; the mill will only buy cotton at a price that will enable it to show a reasonable margin of profit on the price realised from the wholesale dealer". The date of manufacture printed on the cloth will bear witness to the time the goods were in stock. In addition, powers are to be taken to prevent stocks being held for more than two months and their being in excess of a certain proportion of stocks in a basic period of the past.

It will be seen that the scheme of control for the cotton textile industry is the most ambitious and comprehensive that has ever been attempted by the Government of India. While there is sympathy for the broad objectives of control, one has to wait for warrant for confidence in the Government's ability to make it a success in the interest of the people. The public cannot forget that the origin of the scheme is to be traced, to some extent, to the failure of the Government to make a success of the standard cloth scheme. And considering that the cotton textile industry is not exactly beloved of the Government, the anxiety of the industry about the successful working of the scheme without detriment to its legitimate interests must be sympathised with. Doubtless, there is need for the co-operation of the industry and the trade; and it is to be hoped that in further discussion and collaboration of the scheme, no opportunity of securing such co-operation on a cordial basis will be neglected.

INTEREST RATES AND THE WAR

Discussion as to the future of interest rates has seldom ignored the position of the main borrower, the State for the present or the future. In the U.S.A. the raising of the Federal debt limit and the lowering of the N. Y. Federal Reserve rediscount rate to ½ per cent last November, preceded an increase in Treasury borrowing. Since $18½ billions was borrowed in April alone through war bonds, and the latest estimate is that the addition to the Federal debt will be such as to call for a large appropriation for debt service after the war year to year the U.S. Government is definitely interested in keeping the interest rates at present levels. The most recent reference to cheap money followed the publication of inter-allied financial proposals. In the elucidatory comment that followed there was little or no mention of the Allied Governments' view of interest rates after the war, but it was indicated later that a higher yield on giltedged, arising from a fall in the Funds could only be temporary, for the Allies were in effectual agreement on the issue of keeping interest rates low, not only for the financing of post-war reconstruction but in the interests of the taxpayer. By keeping down the borrowing rate to below 2 per cent with the whole National Debt covered at 2½ per cent, the British Governmen has added little to its liability by way of interest payabl on a national debt double the pre-war size.

The major result of monetary management is rightly claimed to be the low level of interest rates rather tha exchange stability for, as we know, there were before the wa black markets in foreign currency in addition to forwar exchange. Such markets were not confined to francs in th period of unsettlement that showed up the limited value o the tripartite agreement of September 1936. In the view o most the level of interest rates is normally determined b the supply of capital and the effective demand. The State i a ready borrower in these days, but the supply of capital i also large owing to the increase in bank deposits, followin the increase in the note issue. This holds good of nearly al countries where the symptoms of inflation have been discerned but the demand for capital is not always large owing t control of capital issues and the absence of former outlet

(a) Carry preferential claim to dividend of 7 per cent. Rank equally with "A" share for further distribution. (c) Carry no perferential claim to repayment of capital (d) Carrying right to fixed cumulative preferential dividend of 5 per cent per annum and to a non-cumulativedividend of 3 per cent per annum. After dividend of 5 per cent on ordinary shares also participate in a further dividend 2 per cent per annum ratably with the ordinary shares. (e) Holders have option to exchange holding to fully paid ordinary shares at par on six months' notice expiring at the end of any half-year. (g) Redeemable at par Between 1955—1966. (h) Redeemable from 1st January, 1943 by 12 annual instalments. d) Repayable at par by 12 annual instalments from 1st January, 1944. with the option to redeem on six months notice after 1st January 1950.

the United Nations' cause from the U.S.A. The lease-lend budget does not provide for this, but $1,050 millions (cost of 30 million ounces) is small compared with the monthly war bill of the U.S.A. Either Britain or the Indian Government must borrow and sell gold for sale to the public. Such a step would, in the opinion of Sir Chunilal, force down commodity prices and help India to get back gold sold during the depression. He claimed that India is prevented from getting gold due to her for materials and services provided.

The plan to take off purchasing power by selling gold to the public may not accord with notions of monetary management but a large increase in gold holdings of the Reserve Bank and an offer to sell gold would make the rupee stronger. Sir Tracy Gavin Jones suggested sales of silver to help the agriculturist keep his savings. Sir C. B. Mehta asks for the return of gold exported by India and the difference is not really great. Sir C. B. Mehta argued "with the announcement that a loan of gold to the tune of 30 million ounces is being arranged the prices of all commodities will begin to adjust themselves to reasonable levels." The argument is not novel and as the gold got would greatly exceed the normal hoarding demand it would put the Indian currency on a new footing with a large gold reserve. There may be value in the argument. But the U. S. Government does not pay for anything but shipping space and its Stabilisation Fund cannot be touched. A gold loan of 1,050 millions to India may not be easy in view of the Johnson Act but the Indian Government has not defaulted, and it may be urged in support of the suggestion that a loan of 30 million ounces is not really a loan but only a transfer of a non-essential material in the interest of the Allies. Large imports of gold may force down prices and the borrowing programme might suffer for the reason that hoarding is encouraged. But confidence in the falling rupee is what matters most. The suggestion which may have to be examined from all angles has also to be considered in relation to post-war plans.

Aspects of an Industry No. 15.

BRITISH COLLIER

THE collier is a familiar sight in Indian ports. These ships sail the Seven Seas carrying coal. They are sturdy stout-hearted vessels, as well they need to be. So too do their crews, and doubly so to-day when mine, bomb and torpedo add their perils to those of storm and tempest. Even so the seaman's calling is scarcely less dangerous than that of the miner. Behind the efforts of the men who hew the coal from Mother Earth and carry it across the seas, lies the fundamental role played by the chemist: particularly the explosives chemist, for explosives are extensively used in coal-getting. Were it not for the British chemist little coal could be brought to the surface at an economic cost. Coal mines are of two kinds—"open light" mines, which are not dusty or gassy, in which either black powder or explosives may be used: and "safety lamp" mines in which British law only permits the use of explosives specially designed to prevent gas or dust from igniting. The range of these explosives is so wide that all types of coal, hard or soft, can be adequately treated. They must always be fired by means of an electric detonator and their use is made still safer by a sheathing composed of a mixture which blankets and cools the gases given off by the explosion. British chemical research in explosives contributes not only to the ease and economy with which coal is produced in India as in the British Isles, but to the safety and well-being of the men who work in the mines.

Imperial Chemical Industries (India) Ltd.

Hongkong, Jap Base

In British hands Hongkong had a small Defence Corps and a dockyard as the headquarters of the China station. Its new masters have larger ambitions for the island as a note in the China Information Bulletin of May 26 makes reference to the plan to make it a first-class air and naval base in the Southern Pacific. According to a person who arrived in Chungking after 14 months' sojourn in Hongkong after it fell into Japanese hands, the Japanese are fast developing Hongkong into a first-class base. The Kai Tak aerodrome has been greatly enlarged in order to accommodate several hundreds of planes at one time. British and Canadian prisoners of war as well as Chinese labourers are engaged in enlarging the airfield at the expense of adjoining civilian dwellings. That Hongkong is to be an air transport centre was affirmed by a Japanese spokesman who added that the port would also become a naval base. Damaged warships, freighters and tankers are towed for repairs in the naval dockyard, the Taikoo Dock and the Kowloon and Whampoa Docks, all of which can take vessels up to 20,000 tons. The Japanese are also building freighters up to 10,000 tons to replace vessels sunk by Allied submarines. Smaller docks are being devoted to the construction of sailing junks with auxiliary Diesel engines which are meant to ply between Hongkong and the ports on the China coast. Raw material for shipbuilding is abundant, and the Japs consider that a wooden vessel of shallow draught is immune from torpedoes and mines. These junks are counted upon to play a major role in bringing about co-prosperity in East Asia. With the operation of the new craft along the coast, the Japanese have turned Hongkong into the chief transit point in South China. Civil aviation service is to be extended from Formosa to supplement the shipping. The Japanese army and navy want to hold the island as a repair and supply base in the south and as a bulwark against an Anglo-American offensive for the recovery of the Philippines and Malaya in the future. The report mentions that 2,500 conscripts, 500 Marines and a flotilla of three small destroyers an an ocean-going gunboat are kept in Hongkong. The Japs lost the flagship of the South China command, a light cruiser off Cebu in April by Allied M.T.B.'s.

Cochin's Production

Industries in Cochin are of limited importance as compared with either planting or any branch of agriculture, but the State Department of Industries now entrusted with adjustment of trade dispute and war supplies, has grown in importance during 1941-42. In the State Administration report for 1941-42 reference is made to an enquiry relating to the development of the local coir industry plunged into a depression owing to the war conditions. The stoneware factory at Chaklakadi was leased for three years from 1940 and continued to work satisfactorily. But the tanneries at Chalakadi were given up, and the Government sold the machinery in 1941. The Industries Department besides running schools and inspecting factories trained technicians and procured war supplies. Its main duty was to run seven centres where 761 technicians were trained. War supplies to the value of over Rs. 62 lakhs were procured and the Department began to turn out coir rope, camouflage nets etc, required as war supplies. The Coir Depot, however, did little and was run at a loss while the Coir School at Kumbalangi was kept up. There were 92 registered factories and figures were secured as regards production. Of these 25 were rice mills which husked 650,000 bags of paddy. Eleven oil mills produced 50,796 candies of oil by crushing copra and oilseeds. The mills produced less oil than in 1940-41 owing to the scarcity of local copra and the restrictions imposed on the import of Ceylon copra. The oil mills also produced soap, the yearly output rising to 15,960 tons of soap in 1941-42. Tile-making remains an important industry in Cochin and the 28 factories in the State produced over 16.5 million tiles and bricks. The two cotton mills produced over 4.5 million lbs. of yarn and 2.9 million lbs. of cloth. The State produced over 1¼ million lbs. of rubber. Local engineering workshops produced 216 tons of castings and about 68,554 cubic feet of timber were converted in the saw mills. Miscellaneous industrial production in Cochin was represented by matches and manure.

Jute Industry in Brazil

The Brazilian Commercial Office issued recently information relating to the jute industry in the Republic which has been reproduced in the Central Jute Committee's bulletin. There are 30 yarn and fabric factories in Brazil and Sao Paulo alone has 12 factories with 3,154 looms of which 3,084 are in operation. The output of Sao Paulo factories in 1941 was about 22 million bags, sufficient to deal with the coffee exported from the State abroad or to the other States. Sao Paulo factories take 25 per cent local fibre and the rest of the fibre is taken from elsewhere. Sao Paulo's share of Brazil's production then was 56 per cent of yarn, 57 per cent of fabrics and 61 per cent of bags. The factories used 59 per cent of the raw material consumed by Brazil. There are in Sao Paulo less than half the canvas factories consuming more than half the primary material and turning out more than half the total production in all types. Sao Paulo, however, is outstripped by Pernambuco where the production per loom is 28,090 metres as against 13,375 metres per loom in Sao Paulo. The main advantage held by Sao Paulo is that it consumes 63 per cent of the fabrics consumed by Brazil as a whole. She sells also more to other States. Pernambuco produces much sacking coming after Sao Paulo. It has four factories with 358 looms producing 12 per cent of the yarn, 13 per cent of the fabrics and 8 per cent of the bags made in Brazil. The State also uses much of its own production as 25 per cent of Brazilian consumption is claimed by Pernambuco. It sells much less, reporting 17 per cent of the country's total. The Federal District of Rio de Janeiro houses three factories with 473 looms. It produces more bags than Pernambuco and it produces 12 per cent of Brazil's yarn output. The average output per loom is higher than that of the Sao Paulo factories but the District consumes little of what is manufactured though exports are duly 10 per cent of the total for Brazil. The three States together consume 83 per cent of the fibre (45 per cent being of Brazilian origin) and account for about 80 per cent of the output. The factories outside the three mentioned largely use native fibre other than jute. According to report the percentage of Brazilian fibre in the manu-

here are the Government rules about circulars

1. NO PERSON SHALL

(a) Gratuitously distribute, or cause to be distributed, any advertising circular of any description relating to the sale of goods or to any profession, trade or business, unless that circular was printed or made before the coming into force of this order provided that nothing in this sub-paragraph shall apply to any advertising circulars relating solely to the sale or loan of books:

(b) in any calendar month after the coming into force of this order, gratuitously distribute, or cause to be distributed, advertising circular of any description, the aggregate weight of which exceeds 50 lbs, except under the authority in writing of the Central Government.

(c) print or make and gratuitously distribute or cause to be so distributed, any advertising circular of any description relating to :—
(i) the business of any money lender, bookmaker or commission agent for bets, or
(ii) any pool or competition, or

(d) gratuitously distribute or cause to be so distributed any coupon or entry form relating to any pool or competition.

2. NOTHING IN THIS CLAUSE shall prevent the gratuitous distribution of —
(a) circulars relating to sales by auction;
(b) circulars relating to the letting or sale of premises;
(c) trade catalogues despatched to whole-salers or retailers of the goods advertised therein;
(d) insurance particulars;

facture of sacking rose in 1942 in view of the difficulty of importing jute from India. The increased use of caroa—a tougher fibre than jute—for light cords etc, yearly production rising to 6,000 tons—has been referred to; and caroe bags are lighter than bags made of jute. Its development, particularly, in Pernambuco has also been reported in Mr. Jackman's report for November. Increase in takings of jute, twine and yarn from Brazil by Peru in 1941 has been recorded, but the Brazilian industry may export less in the future. Most Brazilian factories use various native fibres, and the development of the rivals of jute may receive an impetus from the rise in prices of jute and jute manufactures in India since 1942. Prices in April touched a level above that noted in any month of the war period and the price level is causing concern to mills.

Industry in South Africa

Early in the year it was noted that industry in South Africa was fairly active though raw material supplies were limited in industries like clothing and footwear. Government orders however were being carried out and civilians were getting a share of their requirements. South Africa was said to have sufficient supplies of locally cured leather for the manufacture of Army boots. Since the Union has a vast cattle-raising industry, the tanning industry may develop into a serious rival of Indian exporters. That is for the future to show, but one may note here that South Africa has real advantages in having the tanning materials at hand and stock-breeders may form co-operative tanneries. Shortage of tinplate and glass alike was experienced last year. Cardboard containers were in general use and a satisfactory substitute container for jams was also to be put into use. In spite of restrictions on business Christmas trade was keen and cash bazaars did a good trade in useful gifts owing to the increase in individual earnings. More important is the development of steel production under the stimulus of the war. The Iron and Steel Corporation offered the shareholders 4,400,000 new B shares of £1 each at a premium of 10 shillings each. With the addition of £6.6 million to capital through the issue, the Corporation expected to increase plant capacity to 600,000 ingot tons yearly and extend the range of finished steel products. It was noted, however, that it was not possible to say how long the Iscor expansion scheme would take to complete, though a blast furnace and a forging press had reached production stage while construction work on the other items was proceeding as rapidly as circumstances permitted. One of the items was a plate mill with the capacity to supply practically the whole of the Union's requirements. The site for the mill was located at Veereniging near Johannesburg marking the first step in the development of a large new steel works. Since the Government had made £4½ millions available for Iscor last year, one can deduce that Iscor is a quasi-State enterprise. Steel ranks second to gold-mining and is followed by the ceramic industry of the Union. In 1935 the Union produced £1.42 millions worth of tiles, earthenware and pottery from its 246 factories. The value of output of 299 factories in 1938-39 was placed at over £2.14 millions. Brick-making had developed beyond expectation and the increased manufacture of refractories followed the development of steel production. It is likely that the industry will develop further as research into local clays and minerals was recommended.

Dehydration of food products is more recent in origin but it was officially urged that new factories have exceptional prospects, promising at the same time stability in the marketing of vegetables. Considerable progress was expected after the initial success in 1942. The manufacture of radio equipment has also been reported. Locally made direction-finding equipment was produced at the instance of an organisation associated with the G.P.O. The Union defence force wanted the equipment, experimental models having been successful. Speedier erection and easier operation are the advantages claimed by Mr. E. T. Price, Senior Engineer of the Electric Supply Commission for the S. A. apparatus. The Union's paper mill industry has overcome the shortage. Three mills are working at high pressure, and one near Johannesburg is turning out yearly 2,000 to 14,000 tons of paper equal to 50 per cent of S. A. requirements. Another mill near Johannesburg is producing paperboard and wrapping papers from imported pulp and local waste paper. The third near Durban makes boards only. Daily production is about 25 to 30 tons. The Durban factory produces a third of the Union's normal requirements and extensions planned might make imports unnecessary.

Cotton from Iraq

Efforts to encourage the cultivation of Perso-American cotton in the U. P. have found support from Upper India Millowners since it is a new strain to be grown in India. Millowners in Bombay have shown some reserve as regards imported Iraqi cotton. The Bombay Millowners Association's bulletin for March-April refers to the reply given to the Indian Central Cotton Committee as to the ability of Iraqi cotton to displace Indian cotton, if imported in large quantities. The enquiry made in February resulted in a reply from the Millowners Committee in March. The experience of mills which had used Iraqi cotton was cited. It appeared that the staple of Iraqi cotton was still far from capable of producing good 40s yarn while spun at spindle speeds normally used in this country. The total output of staple cotton in India capable of spinning over 36s warp represented only a portion of the demand for the type of cotton from the manufacturers and the overseas markets, and the Committee felt that so far as this gap existed between supply aand demand, importation of class Iraqi cotton, spinning 40s and over, might not do any substantial injury to the Indian cotton-grower. It was added that the position required careful watching, for improved strains of cotton were grown in increasing quantity in India and nothing should be done to hinder the progress which was likely to follow in the cultivation of staple cotton. It was understood that certain consignments of Iraqi cotton which had already come to this country were of a very inferior type and the Committee strongly recommended that, in the interest of the Indian cotton-grower, the importation of Iraqi cotton should not be encouraged. The development of cotton in Iraq under irrigation may hold, in the light of the Committee's suggestions, no threat to Indian cultivators. But Iraq has given tariff concessions last year to Indian imports, and the very substantial increase in Indian exports to Iraq in 1942-43 cannot be ignored. The Committee's view, however, will find favour with the Indian Central Cotton Committee statement on reducing short staple and extending long staple cotton cultivation in India, and the import duty also represents a measure of real protection for the cotton-grower.

Food and Fodder

In describing the need to maintain food and fodder production in wartime, Mr. F. Ware has argued in "Indian Farming" in favour of mixed farming to the extent that livestock must be improved. Animals are indispensable for transport, and they must be properly fed, if their efficiency is to be maintained. Cattle are almost the sole motive power for ploughing, threshing, lifting water and other work connected with agriculture. In the West, horses are virtually displaced by mechanical power, while cattle and sheep are devoted entirely to providing direct requirements of man and they are considered only from the point of view as to whether they are better or worse converters into energy of the available foodstuffs than man. It is known that more food can be raised from the soil than cattle; but animal manure is required to maintain the fertility of the soil and animal products like eggs and milk supply protein of higher value than plant products. Where the cattle population has been reduced in numbers owing to shortage of feed, artificial manures have been used to overcome the difficulty, but the alleviation is temporary since the soil demands humus in the form of animal manure and compost if it is to remain in good heart. There is no substitute for milk or meat and special arrangements have been made to maintain cattle and sheep in Britain on almost a pre-war basis. Opinion as to the maintenance of poultry has been divided but in India at any rate eggs seem essential.

Since India has a surplus of cattle the problem of keeping them and feeding them has acquired some importance. Cattle in India, according to Mr. Ware, are generally below average, but good breeds that can be developed by good management and feeding certainly exist. Cattle living on millet stalks seem the most desirable even though the milk yield is low because the dry millet-growing tracts produce good transport bullocks and support ponies, sheep and camels. In the rice-growing areas, the cattle are in poor condition because paddy-straw is not a maintenance ration, and milk yields also are poor in rice-growing areas where it is most necessary to supplement the rice diet. Mr. Ware suggests that linseed or other cake and lime must supplement paddy-straw to make it a reasonable fodder. Pre-treatment with an alkali raises the quality of straw pulp as fodder. The problem of milk supplies would be largely solved if this took place on a large scale. In the large tracts of the country, where the quality of the cattle is described as indifferent, the growing of fodder crops on reclaimed cultivable waste is recommended. In the case of pulses and millets grown on such land there is a valuable residue for cattle. As important as the fodder supply to-day, is the prevention of contagious diseases. Mr. Ware announces the beginning of work on a scheme of work on foot and mouth disease at the Vikramny Research Institute, Mukteswar. It is hoped that it will produce in due course a reliable preventive for this disease like the vaccine which confers immunity for some years from rinderpest.

Wartime Changes

The financial history of India in the present war is a large subject dealt with in the approved if critical manner by Messrs. D. R. Gadgil and N. V. Sovani in a recent publication of the Gokhale Institute, Poona entitled War and Indian Economic Policy. Readers will naturally turn to the account of inflation and find the Bombay school's views reproduced in a compact form. But the whole mystery can never be explained by reference to sterling cover for an abnormally large note issue. Singular laxity in the matter of taxation, scarcity engendered by a variety of factors, and the hoarding of precious metals are relevant and interrelated factors. One feels that the subjtct has been simplified to fit a conclusion. Fiscal controls are approved, but one must wait to see their effects work out in consonance with intention and expectation. Evidence as to the limited increase in industrial production in India is not wanting at present. Scarcity of fuel is a disturbing factor always. That by itself should limit the scale and pace of the war effort. The impact of the war on agriculture and industry has been explained by others besides but the specific effects on secondary industry have never been assessed. In spite of being objective, the present study is limited to certain fluid aspects of the situation. But it marks a definite advance on the many ill-arranged and ill-assorted pamphlets of the year. Some suggestions, as that for an increase in railway freights, will not pass muster, but the main orgument, for more taxation, skilful borrowing and essential sacrifice in the war period is incontrovertible. As to workers' bonuses etc., and their effects on prices, the argument is fairly clear. Price control implies a wage stop and the rigorous reasoning in favour of control of new issues might evoke official assent. It may be noticed here that fulfilment of a prior contract as to repayment of debentures capital by a jute mill company had to follow official sanction. Obiter dicta as to new banks, bonus shares etc., seem to have little point for the all-in control practised in Britain cannot be adopted because, to put it crudely, India is poor, under alien rule and is not a ready or free participator in the war. But that does not affect the case for full-fledged control by the Centre always so that scarcity e.g. of cloth is alleviated and free trade in grain diminishes the deficit of certain areas. The ultimate solution lies in self-sufficiency and all control must work for that predestined end. It is not easy to think now of power alcohol or other fuel cutting out foreign petrol. On one thing the authors still with an eye on the future agree with most the depreciation of sterling as on the correct use of accumulated assets for repatriation of external debt. Decidedly stimulating, the book is a distinct aid to the fallible memory, and may prove satisfactory for reference by most students.

THE NEW ECONOMICS
VI

[The earlier articles of this series appeared in the issues of "Indian Finance" of May 1, 8, 15, 22 and 29.]

This series of articles on the new economics now enters its second part, in which I propose to deal with what I have called its operative part. The first part, as regular readers of these columns are aware, was concerned with the revision which the new economics called for in the fundamental concepts of economic science. I pointed out, in the first instance, that the need for the new economics arises from the advent of the social will in the sphere of economic life which hitherto afforded free play to the profit motives of individuals and that this social will bears to the laws of equilibrium economics a relation which can be compared to that of the fourth dimension to the old physics. I examined the concept of value as seen in this new perspective and showed that economic value must be increasingly the object of social subjectivity and that the conditions in which alone economic values had an inescapable objectivity have been left behind, thanks to the advance of scientific discovery and invention. Since natural resources allow comparatively greater freedom of choice to human societies, economic life is no longer dependent, to the same extent as before, on the guidance of free prices for rational utilisation of available resources.

* * * *

The change in the nature of value, however, cannot by itself suffice to bring about that development of economic resources which one would expect from a revolution in economic thought. In so far as economic development is dependent on capital, with all that it means in respect of organisation of men and accumulation of resources, it is necessary to see what changes capital can be expected to undergo as concept, phenomenon and device. In the article of a fortnight ago, I showed that capital is, in the primitive stages, a store of food which relieved human energy for the effort to secure other satisfactions; that, in the later stages, the term is better applied to capital goods and that, even in the modern era, when savings and investments are commonly regarded as the engine of economic progress, it is only capital goods that are the genuine forms of capital wealth. During the last three or four decades the process of creating capital has so changed that it is no longer dependent to the same extent on savings in the sense of self-denial of possible immediate consumption. The development of bank credit and, what is more, of the technique of modern central banking with its ability to stimulate or dull, according to circumstance, business activity in the country, suffices by itself to ensure that, if the conditions are favourable to development, economic life does not lag behind out of adherence to the old notions of capital creation.

* * * *

The operative part of the new economics, it will be seen now, centres round these two ideas of value and capital; and everything that the national governments of the future may do in the post-war period, either by way of post-war reconstruction or by way of economic progress without any relation to the war, will be governed by the new ideas of economic value from the standpoint of the nation at large and notions of capital which are not too closely tied to saving and restriction of consumption. The greater part of the economic life of a people, as it has developed in the past will, one may take it, be left undisturbed except in so far as modifications may be required for the execution of the Government's programme in the economic sphere. The democratic nations are still as far as ever from accepting communist or socialist principles. But democratic governments in their effort to rouse and sustain popular enthusiasm for the war effort, have had to commit themselves to economic ideals, which without a war like the present, might not have been so solemnly vouchsafed to the people at large. It must be added, however, that in this regard, the war has only brought to a climax tendencies which had long been manifest in the economic and political life of the democratic nations. The development of a new economic ideology which can satisfy the working classes and will, at the same time, be in accord with the democratic principle of complete freedom of the individual, has been a slow, painful and laborious process. The conflict between individual freedom and social justice in the economic sphere was quite an early development in the history of modern industrialisation. But the attempt to resolve this conflict has been haphazard and spasmodic. Relief came, in the main, from a vague humanitarianism which had its inspiration in religion and a broad political sense which counselled the prevention of social discontent by provision of relief in advance. Such advance provision was naturally a good bargain for the propertied classes.

* * * *

All the inroads into laissez-faire which, in this context, we may view as so many steps forward to subjective value and new economics, are essentially electioneering stunts from the political angle and, from the economic, good bargains for the employers. The theoretical basis was hard to formulate. Indeed, all these reforms had to be pushed through in the face of opposition from economists and even political scientists. And except in

a very few instances, such as the factory laws of the early days of industrialism, the practical necessity of such reform was not patently indisputable. For my part, I am convinced that the theoretical basis of such reforms lies in the element of social subjectivity in economic value, which modifies the objective economic value conceived by equilibrium economists.

* * * *

But when industrialisation grew to maturity, the only theoretical basis on which social values were pressed, was that of extreme communism. Political democracy reacted violently to this threat to individual freedom, as communism was naturally interpreted to be. And from the days of Karl Marx to the dissolution of the Comintern by M. Stalin there was a wide gulf dividing Democracies from Communism. It was more necessary to escape charges of Communism than to find the theoretical basis on which the social will may be helped to have free play in the economic sphere. When the war draws to a close, world economy and the economic life of every country in the world will have been subjected to the most powerful forces working towards the social subjectivity of value. These forces, to my mind, are the great depression of the early thirties, the effects of the present war on the economic life of the great powers and the recognition of the importance of a world order in the economic sphere even more than the political. These three forces will shape national economic policies in the various countries of the world. It will be seen that, while the first two have direct relation to national policies, only the last one has reference to international policies. It is not easy at this stage of the war to see how far national policies will be subordinated to international considerations by those who are in a position to make the choice for themselves and how far the national policies of others will be distorted by international policies imposed on them by the great powers.

* * * *

It is as well that we recognise that, just as there is a social will which is making itself felt in the sphere of the national economic life, there must also be the international social will, if I may call it so, which will make itself felt in national economic policies. But the social will in the international sphere has not only not had the chance to shape itself, but it has been presented in the past in forms which are a distortion of its true nature. When we talk of the common good of all nations over-riding the imaginary or even real good of particular nations in the same way in which the good of one community over-rides the interests of particular members thereof, we are apt to be told that it is only recently that the common good of all nations has been overlooked; that in the days of free trade the rules of international competition in trade and commerce placed this common good in the forefront; and that it is only with the advent of economic nationalism that it has been endangered. Nothing, however, is farther from the truth. International free trade was not, except in a very narrow, blinkered view, to the interest of the comity of nations any more than laissez faire was in the best inserests of any one nation. Free trade has a superficial internationalism, which was freely exploited by those who had the vantage in the game, and which has not quite exhausted its potentialities f deceipt and deception. When the w will be over, the advanced industri nations are bound to revive the cry f free trade on the ground that free trac is the only practical and effective mar festation of the spirit of internationalis which, if it is to be real, and not a me sentiment, must begin in the econom sphere. Thus the international social w in the present stage of evolution of wor economy bears a close resemblance the social will in national economy decade or two ago. In both these case the interests of sections were pushe forward under the pretext of the commc good which, it was pretended, would l best served by providing the conditio for competition. There can be no doul that, ultimately, the evils of competitic will be recognised to outweigh by far i benefits.

* * * *

For our purpose, we have to assume th the international social will, to son extent, will make its impact felt c national economic policies, whose chi pre-occupation will be the good of tl community which constitutes the natio This international social will, of cours will comprise both a genuine and a spur ous part. The genuine part is the result two factors, the inter-dependence national economies and the necessity f intercourse among the nations. It is eas to be either extremely cynical or undul sentimental about the latter. But it perhaps too late in the day to questic the fact that all the noticeable tendenci of international relations during the la half a century have been towards tl unity of the world and the solidarity the human race as a whole. The unit of the world is being forged by the poi derous forces of power politics, of wi and, most of all, by the speeding up transport. In fact, most of the ills of th world are due to this lack of proportic between the physical unification of th world and the expansion in the menti outlook of men and women. That unit must come out of cultural intercourse, fc which commercial intercourse is a nece sary, but bare, beginning. Economic sel sufficiency, even if it were possible, coul only minimise international conflict. cannot confer the positive advantage promoting the unity of the world an the solidarity of the race.

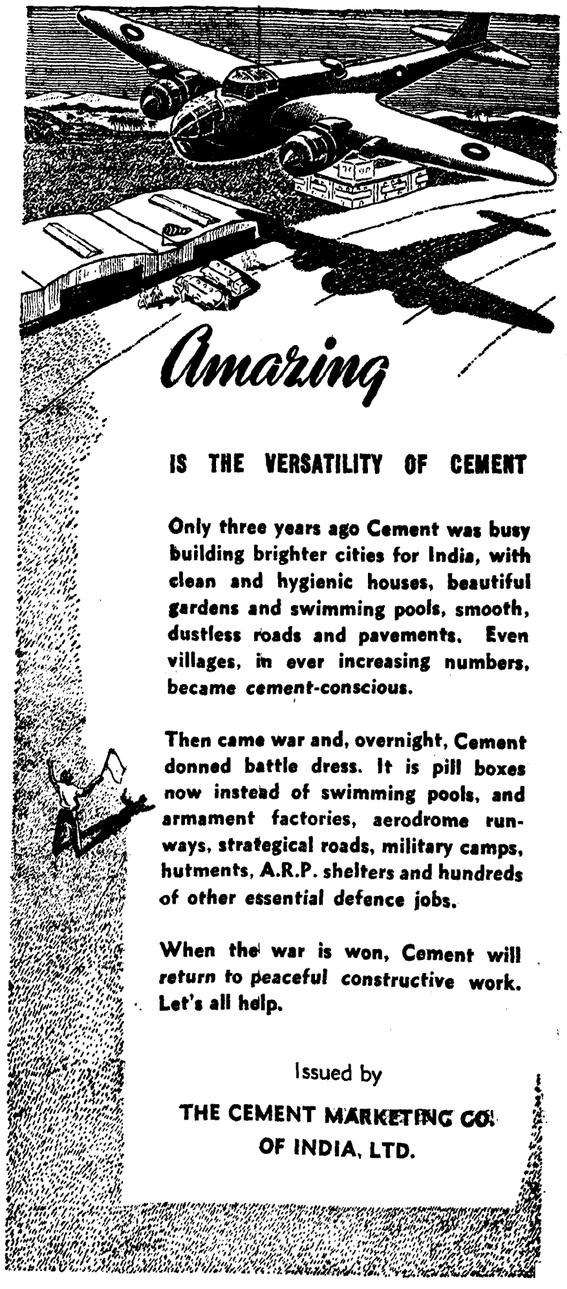
* * * * *

But the fact is that absolute economi self-sufficiency is impossible, at any rat at this stage of the development of pr ductive technique. Nor are politici conditions favourable to the whole worl being treated as one economic unit an the economic problem of the world as on of rationalising world economy. It is diff cult, therefore, to estimate in advance th strength of the international social wi as a factor in economic life and economi policy or the relative strength of th genuine and spurious parts of it. But may be assumed that the genuine pai will, in the initial stages, be more powe ful than either the spurious part of i or even the long-term objectives national economic policy. This power, will derive from its direct relation to th ravages of the war and from its appea to humanitarian sentiment. Considerin the shortage of food at present and th certain severity of the food problem i the immediate post-war years, food pr duction and distribution is bound to b treated for some time internationall

The international food problem, as it is now being appraised, has both a temporary and a permanent aspect, the former being confined to the provision of relief to war-stricken countries immediately after the war, and the latter being related to nutritional adequacy for people in all parts of the world. If the latter does not prove to be a mere expression of an empty sentiment, it may well prove to be the basis alike for sound national economic development and for the integration of well-develped national economies into a genuine world economy. For, the quantitative and qualitative adequacy of food supplies for all peoples will necessitate a large measure of local development not less than the free movement of food from areas of greater fertility to areas less well-endowed by nature. The latter raises questions of purchasing power which, regarded in concrete terms, is nothing more than production of goods and services for which the food suppliers or dealers, with whom they have trade relations, have need.

* * *

I have dwelt at length on what I have called the genuine part of the international social will; for it is this genuine part, which now refers to the food and nutrition problem, that must ultimately overcome the spurious part, viz., the interested cry of free trade, and lead to the development of national economies and their integration into a world economy. I am aware my Gossip this week has been somewhat of the rambling kind. But the nexus of national and international forces in post-war policies has to be examined as well as may be possible before we can try to foresee the practical working of the new economics.



* * * * *

When mushroom growths in formation are the rule, it is relief, more than even joy, to welcome an economic journal under the editorship of a reputed economist and with good financial backing. The first two issues of the "Eastern Economist" published from Delhi, betoken a serious-minded attempt to contribute to the nation's stock of ideas on our varied economic problems. The standard of the journal is well up to the expectations raised by the reputation of Dr. Lokanathan, its Editor, though I for one can hardly conceal my wish that Dr. Lokanathan had put his hand to a more purely academic journal. Delhi can do with a journal of this kind, if only because of the multiplicity of journals of lesser breed. I wish the "Eastern Economist" success.

* * * *

The Honours List is sometimes a useful postscript to the Annual Register and the achievements of 1942 and even earlier years are again recognised in the familiar manner by the bestowal of titles. This week's list, short as it is, contains famous names in the world of big business. There will be a third Knight in Cawnpore as the Managing Director of the B. I. Corporation has been made a Knight Bachelor. That vast concern which he directs is doing a 24-hour job extremely well and due recognition has followed in the case of Mr. R. Menzies. A year of office as President of the Associated Chambers and the Bengal Chamber, is followed by a Knighthood in the case of the Hon. Mr. R. R. Haddow whose inflexible opinions and genial temperament make a distinctive combination. As for Sir T. H. Elderton's promotion to the Order of the Indian Empire, it follows the extension of a very successful term as Chairman of the Calcutta Port Trust. India's scientific services are growing and the work of Dr. Fox like that of his predecessors has been appropriately honoured. The Vice-Chairman of the I.C.A.R. is away in America, but a Knighthood follows him into the States. There are few names as well-known as that of Seth Mathradas Vissanji whose connection with the House of Wallace is commemorated by the Knighthood which succeeds the main directorships he has held. The Services of course get their fill but the Supply Department is not forgotten, as the reader will remember after noting the name of Mr. Elliot Lockhart.

'EAVESDROPPER'

A regular glass of sparkling Andrews is not only the most pleasant and refreshing of health drinks but ensures the thorough cleansing of the system which is the soundest basis of fitness of body and brain. Inner cleanliness is even more important than outer cleanliness and countless thousands of people everywhere make sure of healthy regularity by taking their glass of Andrews as often as they need it.

FIRST.. Andrews cleans and refreshes the mouth and tongue.

NEXT.. Andrews settles the stomach and corrects acidity.

THEN.. Andrews tones up the liver and checks biliousness.

FINALLY.. To complete your Inner Cleanliness, Andrews gently clears the bowels. It sweeps away trouble-making poisons, corrects Constipation, purifies and cools the blood.

For Inner Cleanliness be regular with your

J.K. BALING HOOPS *and* STEEL TOOLS

The "J. K." baling hoops, steel tools and other products represent a high degree of excellence in manufacture and workmanship.

In temper, tensile strength and durability Electric Steel as used by "J. K." for making baling hoops and tools is ideal. No ordinary steel could have the enduring strength required for these products. Electric Steel is rolled and then heat-treated to ensure the uniformity so essential for this exacting service.

Other products from this factory include steel bars, iron and steel castings and hardware such as hammers, pipe-cutters, chisels, screw-drivers, anvils, etc.

Bombay, June 2.

PAPER economy is the present preoccupation of the Government of Bombay. The authorities have been so much exercised over the limited stocks of paper and papermaking materials that they have gone the whole hog in regard to control measures. Retailers have been prohibited by the Government the use of paper other than old newspaper for the packing or wrapping of goods sold on their premises, except for foodstuffs. They may not use more than the minimum quantity of paper for wrapping purposes. Wrapping or packing of articles which do not reasonably require any such wrapping or packing is also forbidden. As usual the Government has appealed to the public for earnest co-operation in conforming to this order in the interest of paper economy. But the customer and the retailer cannot help the thought that these late appeals are born of necessity without being inventive. They might reasonably wonder whether their enthusiastic co-operation might not, in the long view have the worst reaction, by instilling in the minds of the authorities a feeling of complacency about the paper situation. The public might well ask what steps the Government proposes to take, and how soon, to make available additional plant and machinery to paper mills to step up their production to the maximum. As Mr. B. M. Birla, the President of the Indian Paper Mills Association pointed out only the other day, it is the Government and the Army that have taken up nearly three-fourths of the total production. The right course would have been for the Central Government to have first released at least 50 per cent of the total production for civilian consumption and to have granted all legitimate facilities for mills to increase their output before the Provincial governments were driven to promote paper economy by compulsion rather than example. It is to be hoped that the authorities will soon realise that such compulsory economy in the use of paper should find its justification in earnest and determined efforts by the government to increase the output of Indian paper mills and cure the existing paper famine. Public concern in this regard is not difficult to explain for the reason that many changes in life and habits introduced in the first instance as temporary palliatives tend to become indefinitely prolonged.

At a press conference on Wednesday last, Mr. A. D. Gorwala, the Civil Supplies Commissioner gave a hint that the scheme for the supply of cheap cloth to Bombay City, prepared by the Bombay Millowners' Association would come into force in July. He stated that there would be in all about six varieties of cloth which would be available to the citizens on the basis of 18 yards per adult every half-year at prices substantially lower than those ruling in the market at present. Mr. Gorwala's attention was drawn by a press representative to the unsatisfactory quality of rice that was being supplied to holders of ration cards by certain shops. Nearly half the rice ration, it was said, was unfit for consumption. A suggestion was also made that broken rice might be separated in advance and sold for making flour. Mr. Gorwala agreed to consider this suggestion. The rush at the rationing offices is said to have decreased this week by nearly half and most of the applicants are said to have received their ration-cards. It is learnt that the Government proposes to launch a campaign against those who may have been taking rations in excess of their genuine requirements by giving false information to the authorities. In order to impress upon the public the gravity of this offence it is proposed to display posters in principal languages throughout the city.

An *Associated Press* message from New Delhi, dated May 26, which contained the statement that the Government of India have decided on a scheme for the control of cloth and yarn had its immediate reaction in the yarn market here, depressing prices. Yarn 20½s. for June delivery which was quoting Rs. 910 per bale on Tuesday came down to Rs. 850 per bale on Wednesday May 26, suffering a decline of as much as Rs. 60 per bale in one day.

Two Freezing Orders have been issued by the Government during the week. Stocks of groundnuts (in shell) and groundnut seeds exceeding five Bengal maunds are frozen in Bombay City and the Bombay Suburban district. Applications for their release should be made to the Director of Civil Supplies, Secretariat, Bombay said the Order. This Order is obviously the inevitable sequel to the tremendous rise in the prices of groundnuts from Rs. 45 to Rs. 125 during the past sixteen months. Groundnut is now an important foodstuff and the freezing order, by regulating the movements of groundnuts, will not only help to preserve stocks and fair prices, but will help to keep the prices of allied products such as groundnut oil and vegetable ghee at a fair level. The Order means the end of forward trading in groundnuts in a short while, as settlement of forward dealings by giving and taking delivery may be interfered with, as traders may not move their stocks hereafter without a permit. The other freezing Order relates to stocks of sugar-candy, lissa-sugar and bura-sugar wherever they exceed five maunds (of 82 2|7 lb. each) separately or in the aggregate. Permits for disposal of stocks in this case will be issued by the special Officer for sugar.

Any kind of vegetable oil-cake may not be used henceforth as fuel in Bombay Province except under a license. License will be granted in the city of Bombay and the Bombay Suburban district by the Director of Civil Supplies Bombay or the Controller of Prices, Bombay, and elsewhere by the District Magistrates.

Panvel, a town in the Kolaba District, with its growing industrial population, has been suffering for long without an up up-to-date water-supply system. The existing system is about 50 years old and is utterly inadequate, supplying only 7 gallons per head per day. The water supply improvement scheme was sanctioned by the Bombay Government in 1940 after two decades of investigation. Preliminaries are said to have been completed at last and construction work is to commence soon. The new scheme consists of improvements to the head-works, construction of a bund across the Gadha river, laying a new Hume pipe supply main, constructing an elevated service reservoir of 150,000 gallons capacity and improvements to the town distribution network. When improved and extended, the head-works will facilitate the utilisation of the water which now overflows, this alone raising the supply to over 2 lakhs gallons daily. During the hot weather, an additional quantity of water will be tapped from a submersible bund, to be constructed a furlong upstream. The whole scheme is estimated to cost Rs. 2,80,000 and is designed to supply 25 gallons of water per head daily.

In its session of May 31, the Congress of the Communist Party of India passed an important resolution. The resolution leaves no manner of doubt as to the Communist Party's attitude to the war and envisages a vigorous campaign of co-operation with the British and Indian troops for offensive as well as defensive preparations. Party members are urged to popularise the role of the Indian and Allied armies as the defenders of India. They have pledged themselves to work against sabotage and Fifth Column activities and to join the Civil Defence units. The Communists may now be depended upon to use their influence with the working class to increase production for defence needs. The workers will be urged to stick to their work and concentrate on more production and better transport, undeterred by what the boss or the bureaucrat may do. But the resolution does not forget the relative order of importance among the various issues involved. The move to end the deadlock and bring about national unity and the establishment of a national government is placed in the forefront to the exclusion of all other issues. The Communists also believe that the release of the national leaders is the *sine qua non* for any political settlement in India. Towards that end the Communists have pledged themselves to unite all Congressmen and to bring them to look favourably on the Muslim and other demands for self-determination. With equal zeal, it is proposed to work among the League champions and impress upon them that the release of Congress leaders and Congress-League unity alone is the means of winning self-determination. This policy of the Communists, of being everybody's friend and working for conflicting ends, might be viewed with misgiving in an assessment of net results, but nobody can say that the Communists have not attempted a laudable task.

PURE ALUMINIUM THE CROWN

ALUMINIUM IN ALL FORMS

CROWN Brand represents the best in ALUMINIUM
Castings of every description and variety.

While we are essentially engaged in War effort, we still continue to serve all industrial needs for Aluminium in reasonable quantities at fair prices. Our determination is to continue to serve the industries, so long as we can, with the resources and experience at our disposal.

JEEWANLAL (1929) LIMITED

CALCUTTA — BOMBAY — MADRAS — RAJAHMUNDRY

South India

(*From Our Correspondent*)

Madras, June 2.

MR. C. RAJAGOPALACHARIAR, in a statement to the press, has denounced the action of the Government of India in withholding Gandhiji's note to Mr. Jinnah as a "grave folly." Opinions have flooded the press from leaders of conflicting political persuasions and all have emphasised that the Government's refusal is inexplicable and unsupported by reasons, when one considers the gravity of the issues that hang on a settlement between the Congress and the League. It may be, however, that the Government has decided to forgo all the advantages resulting from such a settlement owing to the fear of inconsistency, stigmatised by Emerson as the "hobgoblin of little minds." Mr. Rajagopalachari's condemnation is interesting for a variety of reasons. C. R. has scattered to the winds the legal justification that the communique pleaded for the refusal. A lawyer of no mean repute, he has quoted the condemnation of Gandhiji's detention as illegal by two eminent lawyers of international reputation. Says C. R., "to prevent Gandhiji from exercising his admitted power and influence for the restoration of good understanding in the country under the excuse of a detention which has been saved from being terminated as grossly illegal only by *ex post facto* Ordinances just now passed, is monstrous." How else can one characterise the Government's action than as utterly unwise, a policy which "bears all the marks of vindictiveness", and which cannot be defended either on grounds of statesmanship or international goodwill or even military strategy?

Mr. C. Rajagopalachari is an incurable optimist. He is not easily disillusioned. His faith in the ultimate good intentions and sweet reasonableness even of British Tories dies hard. Even C. R. has now to admit that the policy followed by the Government implies that the national leaders of India should be treated "as implacable enemies of the Allied Nations, with whom a treaty should be concluded only along with the Peace Treaty with the Axis powers." The national leaders, on the other hand, have never tired of stressing the identity of India's political future with the success of the Allied Nations. When such perverse disbelief guides official policy, how irrational seems optimism regarding a settlement! He is not pleased with the Leagues' refusal to negotiate. Further he deplores Mr. Jinnah's failure to join in a leaders' conference which would have enabled a free exchange of views and a statement of the League's case, leaving Mr. Jinnah free at the same time to choose his own line. He believes that Mr. Jinnah's gesture of friendliness at the last League meeting is sincere and abiding. C. R. is all for making every effort to bring about a meeting between Gandhiji and Mr. Jinnah. The meeting, in his view, would be productive of great and abiding results which the nation as a whole as well as the Muslim League would welcome. Optimism is apparently breaking out after the disturbing failure to put the Pakistan plan over by himself.

The Maharaja of Parlakimedi, the Premier of Orissa issued a statement from New Delhi where he was on a visit. He has expressed general satisfaction with the progress in his mission so far. He has met the Member-in-Charge of Food, Major-General Wood, Sir Jeremy Raisman and Mr. Hydari. He has also had an interview with H. E. the Viceroy. The true state of affairs in Orissa, the refutation of the Central Government's theory that Orissa has a surplus, the havoc wrought by flood and cyclone and, to top all, the aggravation caused by the Central Government's announcement lifting the ban on the movement of rice and removing price control have all been vigorously presented by the Maharaja who is pleased with the sympathetic attitude towards his representations from every quarter. According to the Maharaja, only personal talks could have cleared all the clouds that had gathered after the sudden change of policy of the Government of India to free trade in grains in the eastern zone without consulting the provincial governments. It is the Maharaja's intention to confer with the Premier of Bengal and other officials at Calcutta on his way to Cuttack. He said that such personal contact is invaluable for clearing any misunderstanding and to secure the maintenance in future of the long-standing cordial relations between the two provinces in the sale of food grains from Orissa to Bengal and allied commercial matters.

The Orissa Government have issued two control orders during the week. The one that relates to sugar brings under control of the Supply and Transport Department the distribution of sugar manufactured by the sugar mills in Orissa. The Controller, or Assistant Controller of Supplies and Transport will draw up the programme and issue the necessary orders for distribution on behalf of the Government of Orissa. The other Order relating to control of paper forbids any person to carry on business as a dealer in paper except under the authority of and in accordance with the terms and conditions of the license.

Details of the scheme of rationing in regard to rice in Cuttack town have been given by the Collector of Cuttack in a notification. A quantity of six standard *chattaks* is the per capita ration per day. Consumers from among the labouring class will be supplied half a seer per day per head. According to the scheme, retail dealers will be registered who will submit their registers giving details of consumers registered with them by 3rd June, 1943. No retailer can sell rice to anyone who is not registered with him.

Famine in the Ceded Districts is no longer a secret. In the town of Kurnool, the rice problem has assumed serious proportions as a sequel to the imposition of further restrictions on the sale of rice to the public. The Tahsildar has instructed the 15 licensed retail shops to reduce the sale of rice per head from 1 3|4 Madras measures to 1 measure per head as from May 24. The Taluk Prices Advisory Committee have increased the price of rice from 2¾ Madras measures per rupee to 2 1|3 measures. The extent of the shortage can be gauged when it is pointed out that the daily supply of rice is 15 bags as against the normal daily consumption of 100 bags. Rationing of cholam has been in force since May 20. But each ration-card holder has been allotted a certain quantity of ragi. The Revenue Divisional Officer has announced that the ration-card holder should purchase his allotted quantity of ragi along with his quota of cholam and failure to do so would entail grave risks of cancellation of his ration-card. No clearer proof is necessary that Kurnool is short even of cholam. The position with regard to domestic fuel is no better. The situation in Kurnool is only an index of the general shortage of food-grains in the Madras province just as conditions in Cuttack point to the position in Orissa. Famine in the Bellary district shows no signs of abatement, though it should be said in fairness to the Government that valiant efforts have been and continue to be made and the extent of relief so far given has won the applause of a generally critical public opinion.

of capital and debentures, if any, that the company desires to issue and of the form such issue will take and, if shares, whether fully or partly paid up, and a general account of the items of expenditure to which the proceeds of this capital issue will be devoted.

Such applications, being addressed to the Government, will not require any court fee stamp.

While the consent of the Central Government is required to the issue and subscribing of capital (which applies to all companies, including private companies) as well as to the issue of prospectuses, etc., where such are issued, it is not necessary to obtain this consent to the registration of a company under the Indian Companies Act."

As a sample of the perplexity in interpretation that has been caused by the new rule, we may draw attention to the last sentence. We are told that even private companies require the sanction of the Government before they issue capital. At the same time, we are assured that no sanction of the Government is required for the registration of companies under the Indian Companies Act. To register a company, one has to file a memorandum of association. The memorandum of association has to be subscribed to by a minimum number of persons. These subscribers have to take up shares and mention, in the memorandum, the number of shares they take up. If the signatories to a memorandum subscribe for shares as required by the Act, these shares have to be allotted to them. How can such allotment be made without infringing the present rule? It seems to us that the intentions of the Government would have been unequivocally expressed if they had passed rules somewhat as follows:

(1) No new company can be registered without the sanction of the Government.

(2) No existing company can raise any further capital without the sanction of the Central Government.

The exchange market has been slightly more active with some bills showing. Madras also reports activity in exchange.

Banks are sellers of T.T. at 1s. 5 31/32d., for London Ready to six months forward.

Banks have been buyers of three months D.A. bills on London at 1s. 6 9/32d. and four months at 1s. 6 11/32d.

Banks are buyers of T.T. New York Ready at Rs. 329½.

Banks are sellers of T.T. New York Ready at Rs. 332¼.

Inter-bank call money is quoting at ½ per cent lenders.

Hooghly Bank, Limited

The Hooghly Bank's progress continues to give satisfaction to the Board who refer in the report for 1942 to the increase in capital and resource to Rs. 3.38 lakhs and Rs. 59.06 lakhs as against Rs. 50.47 lakhs at the end of 1941. One more branch at Sheoraphuli was set up in December; and a satisfactory increase in capital to Rs. 4.34 lakhs is reported since the year ended. The net profit for the year is Rs. 50,528-8-8 and out of this as much as Rs. 24,429-13-5 has been transferred to Reserves. The sum allocated for dividends is Rs. 20,041-10-2 and the carry-forward is Rs. 29,295-12 again higher than the sum brought in. The balance-sheet shows a Reserve Fund of Rs. 1,27,500 supporting a paid-up capital of Rs. 3,38,225. The outstanding feature is the rise in Deposits to Rs. 53.58 lakhs. Total advances of Rs. 19.06 lakhs seem fairly high as compared with Investments, mainly stock exchange securities, shown at Rs. 10.04 lakhs. The cash balances total Rs. 25.24 lakhs indicating exceptional liquidity in consonance with the needs of the year. As the Bank has added to its capital this year further progress is certain while the ratio of net porfit to gross earnings may be expected to improve also, though the overall yield on investments may not increase. What is perhaps the really meritorious feature of the year is the raising of the dividend on ordinary shares to 10 per cent. (taxable). The progressive increase in the rate of ordinary dividend makes it possible to bring to the notice of the investing public the Rs. 10 paid-up shares of the Hooghly Bank. Its record since 1934 fully supports the general opinion that its career has been marked by uniform increase in profits and funds, and a detailed analysis of the balance-sheet, clean and effectively presented, can only be additional testimony in this regard.

THE PRITHVI INSURANCE COMPANY, LIMITED

ISSUE OF 1,00,000 SHARES OF Rs. 10 EACH

With reference to the Prospectus of the above Company published in "Indian Finance" of the 15th May, 1943 the consent of the Governmant of India has been obtained for the Issue.

(By Our Jute Correspondent)

Calcutta, June 3.

LAST week attention was drawn to the fact that, for several months past mills had not been receiving as much jute as they were using up, and that consequently diminution of stocks of raw material in mill godowns must be causing much anxiety. The figures issued for last month do nothing to alleviate this anxiety. Estimated arrivals during May were 477,000 bales. A comparison with *May last year* is of little application since conditions are radically different. Then, we were coming to the end of a short crop, but mills were holding fairly adequate stocks, having received shipments well in excess of consumption in the earlier months of the season. This year, owing to transport restrictions, there has been scarcely a month when any important surplus over consumption can be said to have accrued to mills, and reserve sufficient to enable mills to continue on the present scale of working hours could only be maintained if despatches from up-country could be continued at practically *busy-season levels*. April returns at 5,81,000 bales showed a rather hopeful improvement on some of the previous months, but that has not been unfortunately maintained, and the proportion which mills will have received out of the May arrivals must fall seriously short of the quantity they consumed during the month. There is still a very large quantity of contract jute to be delivered, and how it is to be handled with the present transport facilities, before the weight of the new crop begins to make itself felt, is admittedly a problem. It is understood that the Railway is considering the idea of "rake" loading from specified stations to specified destinations, also a system of "omnibus" loading in sections where "rake" loading would not be practicable. Whether these schemes will prove effective, if tried, remains to be seen. It might be remarked, however, that when the railway authorities were approached not long ago by trade interests with statistics compiled of quantities waiting shipment at every important station in Bengal for the Railway's guidance in the allotment of waggons where they were most wanted, the trade was informed that it was impossible to modify the existing system of apportioning wagons. It must be surmised therefore that the trade will have to be assured that the Railway authorities are serious about their new proposals, before going to the trouble of compiling new and up-to-date statistics.

While internal transport is a matter of serious concern, overseas shipments were also disappointing last month. Mill stock figures of manufactured goods at the end of May are not available, but it is fully anticipated that they will show a very considerable increase. This expectation is probably partly accountable for the depressed tone of the fabrics market as we write. An interesting suggestion which, if put into effect would be beneficial on both sides of the world, comes from the Argentine, where the supply of bags is scarcely more than half what is required for handling the seed crops. The proposal is that ships of the Argentine National Merchant Marine should be chartered for the round trip to Calcutta and back to Buenos Aires, and that a scheme for barter should be arranged with India, jute goods in exchange for agricultural products, of which latter the Argentine has large surpluses available. The scheme would appear to be mutually advantageous, for India is short of food crops, while these are going to waste in the Argentine for lack of the bags which India could supply. It is suggested that the round trip could be made in 90 days, but the idea would have to be put into effect at once to be of any value, since India needs the food crops quickly, while the bags, or the material to make them, would be wanted in the Argentine by October next, or very soon afterwards to be in time for the next harvest.

The latest issue of the Bulletin of the Indian Central Jute Committee contains several articles of notable interest to the industry. One is on the subject of the substitution of rope-bound bales for iron-bound bales for all country shipments with a view to the saving of bale hoops. Types and sizes of suitable ropes are suggested, also the manner of folding to produce the most economical type of packing. For it is to be noted that the qualification by the Railways that the capacity of a waggon is to be reckoned 5 bales less in the case of rope-bound bales than of iron-bound bales, has been withdrawn. An exhaustive survey of the subject of Cotton Bale covering in the U.S.A. by Mr. K. C. Basak, Assistant Economics Officer of the I.C.J.C. leads to the conclusion that this outlet for jute is practically doomed if the present programme of the U. S. Government is followed up. In the current season, out of a total Cotton Crop of around 12 million bales, it is proposed that 8 million bales shall be packed in coverings manufactured, under subsidy, from cotton fabric.

The statement of the Chairman of the U. S. Lend-Lease Mission to India which is reprinted in the Bulletin might well be re-read and taken to heart by some of the Bazar operators whose main object in life at present appears to be to hold the U.S.A. to ransom for the supplies of burlap which the U.S.A. requires, but for which they are unwilling to pay more than the quite generous ceiling prices they have fixed in relation to other competitive fabrics. In this connection, the fact that the price to be paid for the last Government order placed with the jute mills has not yet been revealed, has given rise to uneasy suspicions that the U. K. may be supplying the U.S.A. with burlap at their ceiling prices which were unworkable in the open Calcutta market. Whether there is any truth in this surmise, it is impossible to say, or whether the mills are to be asked to shoulder the onus of supplying at ceiling prices, or whether the U. K. Government is to hold itself liable for the difference. Whatever be the truth of the matter, it seems desirable that it should not be kept dark any longer.

It is interesting to read that the supply situation in regard to cotton goods for bag-making in the U.S.A. is almost as acute as that of burlap. Very severe restrictions have been placed on the uses to which burlap bags may be put in the U.S.A. whereas comparatively few restrictions have been placed on the use of cotton bags. Perhaps for this reason, mills producing Osnaburgs and sheetings suitable for bag manufacture are so fully sold and have so many priority orders to fulfil, that they are flatly refusing to book further orders. Bag manufacturers being unable to secure anything like the yardage of cotton goods or burlaps they require to fill their orders for bags, predict an acute shortage of bags later this year when crops begin to move. A great opportunity for India, it would appear, if freight were available, and if a longer sighted policy with regard to the production of raw material had been adopted!

Very little falls to be recorded on either side of the Pucca Bale Jute market. Beyond a few sales of Dundee Daisee at Rs. 96, the shipment market has been featureless, while mills also have been uninterested. A sale of Firsts at Rs. 98 was reported, since when Sellers at the rate have been unable to get on. In the Loose Jute section, interest has been confined to ready shipment from the local Bazar or to guaranteed shipment lots from up-country. For supervised Jat, Rs. 19-8 and Rs. 16-8 were paid for Middles and Bottoms while most of local lots were sold at four annas less. New crop prospects have improved greatly during the past week with ample rain in all districts. In some cases almost too much has been recorded, with the result that weeding operations have been held up. Conditions generally, however, are favourable, and the crop is progressing well.

The absence of overseas enquiry in the Fabrics market has been most marked, and transactions have been confined almost entirely to Bazar operations. There have been the usual fluctuations but the general tendency has been downwards. At the beginning of this week ready nine porters stood at Rs. 21-14, eleven at Rs. 28-9 and "B" Twills at Rs. 69-4. A full rupee has been knocked off the eleven porter price at the close, while "B" Twills quote no better than Rs. 67. Among the few genuine sales recorded have been, Cuban Sugars at Rs. 79 and Rs. 80 for July-September and Woolpacks at Rs. 2-9 for May.

JUTE

Calcutta, June 3.

The arrival of the monsoon has not been a great help to operators in the jute market, though it will help the cultivator with the new crop. Late in the week some interest was shown in Middles with business at Rs. 19 to Rs. 19|8 per maund, but pucca bales have tended to be quiet as shipment business has been small. A decline in rates was noted for the lower grades at the end of last week, and the market has been quiet and inactive up to Wednesday. Export business in Lightnings and Hearts has not been reported, and Dundee Daisee 2|3s was quoted at Rs. 96 per bale this week as also last week though mills are said to have taken Firsts at Rs. 98. A small decline in raw jute is indicated by the continued stagnation of prices and business. The small decline noted in hessian prices latterly may exert an adverse influence. The report that jute is a paper-making material for brown wrapping paper can mean little. Mills have reduced production by agreement and U. S. views as to hessian prices are claiming special attention as proved by the persistence of inter bazar business only.

Idle conditions do not connote a depressed market, but one fully watchful, in view of the note that jute and hessian prices in April stood at a record level in the war period. The mills' disinclination to pay top prices in May has been in evidence continuously, and except for Jat Middles at Rs. 19 there has been no transaction in loose jute while in the pucca bales section, the market was dull and unchanged right through the week.

JUTE MANUFACTURES

Calcutta, June 3.

The hessian market had a brief bright spell on Saturday followed by a relapse into dull conditions succeeded by a flickering rally on Wednesday. Interest in heavy goods has not increased, though rates were fully steady at the decline on Saturday. The bazar has been active to a limited degree on most days and Saturday's rates of Rs. 22 for 9 porters and Rs. 28|8 for 11 porters have not been maintained. The drop in Heavy Goods on Tuesday, followed by a small recovery soon on Wednesday, suggests that speculation is dying out owing to active discouragement of the rise in prices. The absence of buying interest provoked a fall in hessian prices on Monday when 9 porters receded to Rs. 21|12 and 11 porters to Rs. 28.3 for Ready with a very small premium for near delivery in the case of 11 porters only.

The erosion of prices following the damage to sentiment is most conspicuous in respect of Heavy Goods. Sellers who developed reserve late in the past week, have apparently shed it as Cornsacks have dropped from Rs. 69 to Rs. 67|8 and B. twills from Rs. 70 to Rs. 68|8, after touching lower levels. Like Heavy Goods, once again, 11 porters have since steadied up from Rs. 27|14 to Rs. 28|2 though 9 porters is down to Rs. 21|10 but the outlook is not very bright and recent improvement is put down to inter-bazar business while no buying interest has been shown in Heavy Goods.

Quieter conditions are reflected in the very small or no premium for ready delivery in the case of 9 porters and 11 porters alike. Quotations are lower on the week in Heavy Goods as in the case of other jute manufactures though not of jute.

GOLD

Calcutta, June 3.

Action promised by the Finance Member over two weeks ago is explained by the promulgation of a new D.I. Rule providing that no person shall enter into any forward contract or option in bullion; and contravention is punishable with a maximum of 5 years' imprisonment or fine or both.

The main result has been a break in the downward course of prices. A sharp rise in gold is not unimportant though the daily arrivals in Bombay up to last week seemed large in relation to buying. It was noted in Bombay that the market anticipated the ban on futures trading by its own resolution and delivery well within 12 days (as stated in the Notification) was indeed decided upon as the condition of sales. Sir C. B. Mehta in an interview to the press described the ready contract as the special feature of trading in silver in Bombay, and added that the Reserve Bank sales were made on that basis, though delivery sometimes took more than a month. In delivery contracts the time taken by refiners entered into calculating the days required. Ready delivery implied at present anything from four days to four weeks; now it would have to be 12 days or less. All previous contracts would be fulfilled on the due date. After Monday last the usual rates for settlement disappeared. On Wednesday, Bombay quoted Rs. 87 per tola and Rs. 60¼ for sovereign as against Rs. 80|4 and Rs. 56¼ for coin on Saturday. As usual the Calcutta price was higher at Rs. 89¼ per tola and Rs. 62 for sovereign after it rose on Saturday to Rs. 61|12. The nervousness has passed away and the effect of the new Rule is far from bearish since there is no mention of ceilings and there cannot be when the higher level of running costs in S. A. (it was 104|9 per ounce in 1942) is taken into account for gold is a commodity whose production costs vary and a curtailment of world supplies is in part due to the rise in costs.

SILVER

Calcutta, June 3.

There is not much to say about silver except that the price has again recovered quite sharply. The ban on forward business has raised the price in Bombay from Rs. 121 per 100 tolas at the end of last week to 128|8 on Wednesday. The rise may discourage buying, and the anti-inflation campaign lower the prices of the precious metal as the *Times* promptly noted last week. The lowest rate for silver in recent weeks has been about Rs. 115 and business forecasters may take it as the lower limit just as Rs. 73 is the lower limit for gold per tola. The larger stocks that may follow the rise may not have an immediate effect on prices or demand but something like normal stability has been apparent this week as silver rose to 125 and has not risen over Rs. 129 after all the calculations as to the bullish effect of the Defence Rule concerning forward contracts in bullion. London still retains a forward contract for two weeks' delivery as distinct from the spot contract. The London market, of course, is small as the brokers are few, and rates never vary, while the official connection is more and more obvious. The demand at present may be said to exceed the supply, and lease-lend silver, taken up later through the regular market, is not going to alter rates. If the same stability is attained in India by some means there would be few to complain.

OILSEEDS

Calcutta, June 3.

The Notification was issued only last week-end banning forward transactions in the oil-seeds market. London quotations remain the same but all oilseeds in Bombay are affected by a bearish tendency. The linseed market in Calcutta till the end of May was sustained by optimism, caused in part by small arrivals and fairly keen demand from crushers. That is past. There has been a protest against Government's action by the President of the Seed Traders' Association. The previous deadlock has been merged in the greater trouble and the ready rates for lihseed perhaps hover between Rs. 16 and Rs. 11-13-6 as prescribed. Forward business was in liquidation by resolution and futures trading need not be given up under the ban, as the Association had dropped it. It was emphasised ready transactions and delivery contracts in groundnuts are not affected by the ban. Mustard and rapeseed are now within the scope of control order and the only seed left out is perhaps a speciality like poppy-seed. Oilmills will not be hampered to any extent, and the anti-inflation measures now at work should lead to lower prices. Linseed stands at Rs. 12 per maund against Rs. 12|4 two weeks ago, showing that the fall in price here is much smaller than in Bombay.

Calcutta Commercial Bank Ltd

Executes LETTERS OF GUARANTEE on behalf of contractors, suppliers and clearing agents, in lieu of cash deposit, acceptable by the Indian Custom and Tatas.

Furnishes INDEMNITY BONDS for issue of duplicates for lost share scrips, insurance policies, etc.

Undertakes CLEARING and FORWARDING work at Ports.

Collects Bills, Cheques and Hundies, Insurance Premia, etc., at competitive charges through sixty branches in India; specially reduced rate on exclusive arrangement.

Supplies regularly silver and coins to Collieries, Tea Gardens, Mills, etc., on nominal commissions.

Discounts approved Bills, makes investments against approved collaterals, Tea Quotas, Insurance Policies, etc.

Stock Markets to-day and to-morrow

ENCOURAGING TEA COMPANY RESULTS

Markets have been rather irregular and narrow this week. The main changes in the prices of active securities have not been favourable to the investor. But it must be noted that the jittery phase has ended to-day even though the speculative favourites are lower. War news continues to be decidedly favourable and free betting in Stockholm on the end of Italian resistance may have its lesson for the bears. The lower prices of the week imply an oversold positive position and corrective influences will find support from news—from all the fronts, while rumours as to fasts, faction fights, etc., will be certainly treated with greater reserve than in the past.

Bullion is steadier—commodity markets are steadier for the ban on futures is a guarantee of stability for a period. A distinctly steadier feeling characterises gilt-edged and other groups. Investors partial to tea shares have the satisfaction of seeing a further rise in a large group. Planting shares in Madras are well supported, and the effects of increased taxation are likely to be offset by a fall in costs of production, while the export outlook is clearer for the jute mill industry. Fair weather in the markets is promised. And immunity from external developments is not the least auspicious sign observable after the coming of the monsoon.

* * * *

May was a month of ordinances and controls. Most measures were of particular interest to Industry as they were designed in some cases to curtail purchasing power and in certain ways to put an end to undue speculation. They were nearly always well received by both Industry and the investor. This week all eyes looked to Bombay, for the representative of the Government was conferring with representatives of the Textile Industry in order to arrive at an agreed scheme of control of cloth and yarn. As controls of some kind or other were already enforced with regard to every other commodity, only the control of cloth and yarn remained to make the Government programme of checking inflation complete. Instead of the manner in which other controls were promulgated and enforced, the Government thought it expedient to consult the cotton textile Industry before embarking on its scheme of control. Though millowners expressed their opposition to any system of control before giving the standard cloth scheme a fair trial, it is announced to-day that the Government of India and representatives of the cotton Industry have agreed to adopt control measures to bring down the prices of cloth and yarn as also to increase production. It is also stated that the measures will be given effect to immediately. The decision to place an order immediately with the Industry to manufacture 1,000,000,000 yds. of standard cloth to be completed within six months should come as a great relief to the general public while stabilisation of cotton prices must be of benefit.

The Bombay Stock Exchange has already begun to show signs of improvement and developed something like buoyancy. The local Stock Exchange which was never agitated over the series of controls and ordinances is slightly firm. One can confidently look forward to more healthy and settled conditions on the Stock Exchanges.

* * * *

In common with other tea companies, the *Chundeecherra Tea Company, Limited* has done extremely well during the season ended 31st December 1942. The actual crop made this season at 5,105 maunds exceeds the permitted quota (4,669 mds.) by 436 mds. Additional internal rights were acquired to cover this difference. The average price per lb. obtained for teas is annas 12 and pies 4 per lb. as against annas 10 and pies 6 per lb. for the previous season's crop. The directors point out that a satisfactory standard of manufacture was maintained throughout the year. Owing to the acquisition by the Government of 1½ acres the area under cultivation is now 530 acres. The net profit for the season ending 31st December 1942, before providing for taxation is Rs. 1,67,330 as against Rs. 88,831 earned during the previous season. A sum of Rs. 40,000 has been set apart for taxation as against Rs. 18,000 provided last year. It may be remembered the company declared a dividend for the first time last year and it was only 5%. This year the directors have trebled the dividend to 15%. A sum of Rs. 80,000 has been transferred to General Reserve as against Rs. 55,000 last year and the carry forward is substantially higher at Rs. 11,563 as against Rs. 8,109 brought in.

* * * *

The Hansqua Tea Company, Limited is paying this year the highest dividend declared in the past eight years. Mention may be made here that for the past two years the dividend had been maintained at 7½%. 4,118 maunds of tea were obtained this year as against 4,059 maunds in the previous year. The average price per lb. was annas 11 against annas 9 and pies 11 in 1941. The net profit before providing for taxation and other reserves stands at Rs. 94,860 (Rs. 78,837) of which Rs. 12,750 (Rs. 8,600) has been provided for taxation, a sum of Rs. 20,000 (same) has been transferred to Reserve and Rs. 15,000 has been set apart for Contingencies Reserve. The directors propose to pay a dividend of 10% against 7½% last year and the carry forward at Rs. 35,289 is slightly less than the amount brought in at Rs. 38,179.

* * * *

The accounts of the *Ellenbarrie Tea Company, Limited* for the year ended 31st December 1942 disclose a net profit of Rs. 1,17,160 against Rs. 35,262 only during the previous year after providing for taxation but before setting aside any sum for Reserves. This year's crop amounted to 4,924 maunds as compared with 2,996 maunds in the previous year. The average selling price this year was annas 12 and pies 4 as against annas 10 and pies 5 realised in the previous year. A sum of Rs. 18,500 has been reserved for taxation and a substantial sum of Rs. 30,000 has been transferred to Contingencies Reserve which the directors propose to utilise for meeting expenditure on renewals and replacements of buildings and machinery, etc., that will be necessary after the conclusion of hostilities. The dividend for 1941, it may be recalled was 20% as against 30% paid for 1940. This year the directors propose to pay a dividend of 55% which is 20% higher than the highest dividend declared in the past ten years. The amount that is to be carried forward is Rs. 29,889 against Rs. 25,056 brought in.

* * * *

The accounts of the *Dauracherra Tea Company, Limited* for the year ended 31st December 1942 show a net profit of Rs. 1,53,017 before providing for taxation and other reserves, against Rs. 1,05,111 for the previous season. The year's crop was 4,828 maunds as against 4,225 maunds for 1941 and the average price per lb. was 11 annas 11 pies per lb., while in the previous year the price per lb. was 10 annas 2 pies. The directors propose to provide Rs. 43,500 for taxation against Rs. 20,500 set aside last year; Rs. 20,000 (Rs. 10,000) to Reserve and another Rs. 20,000 to Contingencies Reserve. The dividend is to be higher by 2½% at 12½%. The amount carried forward is Rs. 37,377 against Rs. 42,860 brought in.

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, June 4.

In a week of desultory dealings with the main trend undecided a spell of firmness in jute shares appears remarkable. Yet the fully steady tone in this section must not be described as the principal feature of this week, for it may be suggested that the prompt recovery of cotton mill shares is more important in view of the rapid easing of mill shares. Jute shares have certainly yielded to some extent after the drop in hessian. Satisfactory earnings reports alone sustain the price level, yet the lassitude of engineering shares provokes the suggestion that jute shares can never be displaced by any other shares. Business, except in Teas, has not broadened this week. But good features have been noted in Coals and Wednesday witnessed a mild rise in popular scrips. The cheaper non-dividend payers are not the only shares in demand. Amalgamated, and other leading shares have been bought, and notable rises have been noted in Seebpore, Katras Jherria and Nazira, the last going over par.

Interest in securities is still at an ebb, though slacker money conditions may lead to larger buying. 3½ per cent Paper has been dealt in at Rs. 94 to Rs. 94-2 with small lots up to Rs. 94-6. The 3 per cent Defence Loan has been taken up to Rs. 100-9 and the 3 per cent 1963-65 has been fully steady at Rs. 95 10. There has been no transaction in Provincial Loans and the enquiry in 1945-55 Loan appears to have died out suddenly. In spite of stray transactions in 3 per cent and 3½ per cent Paper, the market has been dull but steady; and the buying of dated securities has been very limited.

The further appreciation of Bank shares may claim attention as an index of revised ideas at to yield. Reserve Bank has gons as high as Rs. 111-8 and the rise in Bombay appears to be followed attentively here. Markings in Imperial Bank, big and small shares have been few, the former at 1,731 twice, and the only revival is in Central Bank (Rs. 25) at Rs. 64-8 after a long while. The higher premium paid for New Asiatic Insurance, Re. 1-3 against Re. 1 previously, may not be ignored; and the other marking in Concord of India at Rs. 13-10 premium shows that semi-gilts are holding their own. Investment enquiry for fixed interest stocks is still confined to jutes if business is noted in Allahabad Bank Pref. at Rs. 166. There has been one marking in 3¼ per cent Howrah Bridge loan at Rs. 97-6. Rohtas Industries 5½ per cent Debentures were taken at Rs. 105. Preference shares like light railway shares have for quite a while been in the background though the market on Monday was fully active; in local parlance the bazar was quite hot owing to the rise in jute shares. The abrupt rise in jute shares indeed claimed the average operator's attention and Friday's quotations indicate a fully steady market at the decline, caused presumably by profit-taking. Among the big shares, Bally is up from Rs. 335 to Rs. 345 with business done up to Rs. 352. Among sterling shares, Barnagore was noted up to Rs. 147 as compared with Rs. 134 on Thursday last. Anyway, the London quotation of £7½ has no meaning for brokers here. The market leaders have been comparatively neglected. Howrah is almost unchanged on the week at Rs. 63, but the present price is ex-dividend. Kamarhatty is quoting Rs. 564 after the rise to Rs. 585 on Monday. Nuddea is, however, steadier at Rs. 97 ex-dividend. The range of fluctuations may imply an irregular trend but investment support has been noted for Champdany around Rs. 220 in the week in spite of there being no change in the half-yearly dividend. Bally has receded to Rs. 345 and the drop in Ganges from Rs. 456 on Monday to Rs. 440 is suggestive of a nervous undertone. India, too, has shaded off to Rs. 568 from Rs. 582 in the last few days. The smaller shares too have yielded and National has declined to Rs. 27 with business done up to Rs. 27-14 on Monday. Clive has yielded after being around Rs. 27-14 on Friday against Rs. 28-9 on Monday. The decline does not extend to preference shares. Reliance has been done up to Rs. 170-8, Belvedere Preference Rs. 174, Howrah "A" at Rs. 159-8 ex-dividend, Caledonian Rs. 171. Hastings Preference at Rs. 146, National Preference Rs. 173, Kelvin Preference at Rs. 173 and Bengal preference at Rs. 120.

While jute shares have lost ground in mid-week, the leading engineering shares have tended to quieten. Indian Iron has been steady rather than firm and the highest touched has been Rs. 35-12. To-day's closing price of Rs. 35 after opening at Rs. 35-4 to Rs. 35-6 suggests that speculative support is about evenly divided and the same may be said of Steel Corporation. The peak for the week is Rs. 27-5 and Friday's quotation of Rs. 26-12 shows that the market is quieter in spite of the final being the same as in 1942. Some interest has been manifested in Jessop and Company ordinary at the decline in view of the yield being over 6¼ per cent. There has been some enquiry for Saran Engineering around Rs. 8 in view of the report being due. Britannia Building has been sold at Rs. 14 and B. I. Electric is no better than Rs. 13½. What may pass for a revival in Kumurdhubi is at an end as the quotation is back from Rs. 8-14 to Rs. 8-10. The drop in Bhartia Steel to Rs. 14-4 and National Irons to Rs. 12-10 is not unexpected.

The striking recovery since Thursday in cotton mill shares follows the announcement relating to control of production, prices and profits. Revised views have emerged after the rally in Textiles in Bombay and Elgin has risen to Rs. 74 ex-dividend and has fallen back to Rs. 72. Cawnpore Textiles after the bonus issue have hardened to Rs. 14-9 equal to Rs. 29 as compared with Rs. 12-15 on Thursday. New Victoria shows a slight gain at Rs. 9-12 owing to the new issue being regarded as a buyer's liability. Kesoram has risen to Rs. 17 and the rise in Mahalaxmi to Rs. 46 from Rs. 42-12 noted yesterday is a sign of returning confidence. Dunbar has been rather heavy being done at Rs. 294 to Rs. 295 and Rs. 297. But the market is certainly talking up cotton shares as enthusiastically as before and the quotations at the week-end will support the conclusion as to rapid and complete recovery. The last shake-out may depress low-priced shares but the Cawnpore shares should be in favour once more.

The neglect of sugar shares explains the drop in rates. U. P. Sugar has certainly been the exception with buying noted up to Rs. 22-9 to-day also Carew & Co., has dropped from Rs. 18-2 to Rs. 17-12 and Balrampore in spite of the approach of the end of the company's year has dropped to Rs. 13-10. Jammu and Kashmir has dropped to Rs. 16-4 just after the first year's report is out. There has been obviously no buying support for miscellaneous issues. B. I. C. is flat at Rs. 6-1 and Indian Cable at Rs. 29 and over is the exception to the downward trend. Aluminium Corporation has weakened to Rs. 20 while the rise in Calcutta Trams is evidently not halted as the price is Rs. 24-12. Paper mill shares have been affected by an easier feeling after the week-end and Titaghur Paper, after rising to Rs. 26-13 is down to Rs. 26-2, Orient Paper has dropped from Rs. 29 to Rs. 27-13 in a week. India is stagnant at Rs. 190 and Mysore alone is steady at Rs. 26. Recovery is indicated in most cases though the Chairman's death alone may not account for the neglect of Star Paper down to Rs. 22-2. There has been some business in Orient Pref. at Rs. 115 and Titaghur 2nd Pref. at Rs. 113.

The upswing in tea shares explains the steady absorption of the cheaper shares. Buying is largely confined to the Octavius Steel and Williamson Magor groups at present. The non-dividend payers like Dhunseri (rising rapidly to Rs. 6-4) and Loobah which has been fancied up to Rs. 11-12 and Kaliti has risen to Rs. 20-8. Once again buying of New Terai has been in evidence and profit-taking has not lowered the price of Eastern Cachar. Business in the Gillanders group has been reported only lately. Among the bigger shares Dessai and Parbuttia has returned into favour with the price up to Rs. 380 and Banarhat has climbed to Rs. 875. Among the popular counters Tezpore is higher at Rs. 15-10 and Namburnadi has risen smartly from Rs. 10-7 to Rs. 12-8 within a week. The undertone is also firmer than ever and the hope of better dividends for 1942 is not belied by the recent announcements. The firmness may be unaffected by sales averages announced from week to week and investors may put tea shares on a new rating as to yield, etc., in which case, a further advance is more than probable.

TRANSACTIONS DURING THE WEEK

CALCUTTA STOCK EXCHANGE

(From 27th May to 2nd June, 1943 both days inclusive)

GOVERNMENT SECURITIES:

(*Half-yearly General Meeting on 12th June, 1943 at 11-20 a.m.*)

Audited accounts for the half-year ended 31st March, 1943:—

The accounts a profit Rs. 5,82,134-8-8. After providing Rs. 64,033-0-0 for taxation (including Excess Profits Tax), Rs. 1,23,024-0-0 for depreciation and placing Rs. 19,328-0-0 to Welfare Reserve and Rs. 2,00,000-0-0 to War Contingency Reserve, there is an available balance at credit of Profit and Loss Account of Rs. 1,79,108-14-11, which includes Rs. 3,359-6-3 brought forward from last half-year.

The Directors propose to dispose of this as follows:—

	Rs	A.	P.
In paying a Dividend on the Preference Shares at the rate of Rs. 7 per cent per annum, without any deduction for Income-tax paid by the Company	35,000	0	0
In paying a Dividend on the Ordinary Shares of Rs. 5 per share, without any deduction for Income-tax paid by the Company ..	1,00,000	0	0
In carrying forward	44,108	14	11
Total ..	1,79,108	14	11

Stocks of jute have been taken at or under cost price and manufactured goods at contract rates.

In accordance with the working-time agreement of the Indian Jute Mills Association, the mills worked 54 hours with 10 per cent of the looms sealed until 15th March, 1943, when a new arrangement was made to work 60 hours with all looms running for two months.

At the time of last report hessian rates did not exceed the minimum laid down by the Association, but during November prices advanced considerably owing to improved demand. Since then there have been minor fluctuations, but on the whole the tone has been good and shipments generally have been satisfactory. During the period under review Government cancelled some important orders, but placed further substantial orders for other types of goods. Arrangements were completed with the U.S.A. for special shipments of hessian to improve the stock position in that country.

The demand for heavy goods has continued but there are indications that Indian centres are fully stocked and that the Company have to rely more on exports than on internal consumption if production is to be maintained at present levels.

The transport of raw jute continues to cause anxiety and the position with regard to coal supplies has at times been critical.

Air raids in December and January, though causing negligible material damage, were followed by an exodus of workers from the Calcutta district and the Company's production suffered accordingly. The position was partially rectified early in March, but a number of the workers now employed are not fully efficient, and the output still leaves room for improvement.

The scarcity and high cost of foodstuffs has proved a difficult problem. The Company has catered for the supply of essential food to all workers at prices approved by the Indian Jute Mills Association, an expense which has added considerably to manufacturing costs. Unfortunately, the position with regard to future food supplies continues obscure. The amenity allowance to workers was increased from Re. 1 to Re. 1-4 weekly in order to compensate for further increases in the prices of commodities other than foodstuffs.

A Deferred Bonus Fund for workers was created during the half-year and each permanent worker and recognised *budli* worker employed on 27th February was credited with a bonus equal to two weeks' basic wages. The amounts so credited were paid over to trustees for investment in trustee securities. It is hoped to add to this fund during prosperous times and that eventually arrangements will be made to use the accumulated funds as a basis for a provident or pension fund.

Representations to the Excess Profits Tax authorities were heard during the half-year and some relief was granted to the Company which will result in a decrease in the incidence of taxation as long as Excess Profits Tax is payable by the Company. Moreover, the sum of Rs. 2,30,464-0-0 has been released from the provision made for taxation in previous half-years, and effect has been given to this release in the accounts for the half-year under review. Income-tax and Super-tax at the increased rates laid down in the current Finance Act, relating to both half-years since 1st April, 1942, have also been provided for in these accounts.

(Half-yearly General Meeting on 12th June, 1943 at 11-20 a.m.)

Audited accounts for the half-year ended 31st March, 1943:—

The account shows a profit of Rs. 8,56,410-15-11. After providing Rs. 5,82,512-0-0 for taxation (including Excess Profits Tax), Rs. 39,951-0-0 for depreciation and placing Rs. 18,113-0-0 to Welfare Reserve and Rs. 20,000-0-0 to War Contingency Reserve, there is an available balance at credit of Profit and Loss Account of Rs. 1,99,204-4-3, which includes Rs. 3,369-4-4 brought forward from last half-year.

The Directors propose to dispose of this as follows:—

	Rs	A.	P.
In paying a Dividend on the Preference Shares at the rate of Rs. 7 per cent. per annum, without any deduction for Income-Tax paid by the Company	52,500	0	0
In paying a Dividend on the Ordinary Shares of Rs. 6 per share, without any deduction for Income-Tax paid by the Company ..	1,34,766	0	0
In carrying forward	11,938	4	3
Total ..	1,99,204	4	3

Representations to the E. P. T. authorities were heard during the half-year but no relief was granted to the Company, and no further appeal can now be made. Income-tax and Super-tax at the increased rates laid down in the recent budget relating to both half-years since 1st April, 1942, have been provided for in the accounts for the half-year under review.

Managing Agents.—Messrs. Bird & Co.

(Half-yearly General Meeting on 12th June, 1943 at 11-35 a.m.)

Audited accounts for the half-year ended 31st March, 1943:—

The accounts show a profit of Rs. 6,12,638-14-11. After providing Rs. 1,82,502-0-0 for taxation (including Excess Profits Tax), Rs. 95,000-0-0 for depreciation and placing Rs. 61,359-0-0 to Welfare Reserve and Rs. 1,50,000-0-0 to War Contingency Reserve, there is an available balance at credit of Profit and Loss Account of Rs. 1,29,749-0-1, which includes Rs. 5,971-1-2 brought forward from last half-year.

The Directors propose to dispose of this as follows:—

	Rs	A.	P.
In paying a Dividend on the Preference Shares at the rate of Rs. 7 per cent. per annum, without any deduction for Income Tax paid by the Company	52,500	0	0
In paying a Dividend on the Ordinary Shares of Rs. 3 per share, without any deduction for Income Tax paid by the Company ..	51,000	0	0
In carrying forward	26,249	0	1
Total ..	1,29,749	0	1

Representations to the E. P. T. authorities were heard during the half-year and some relief was granted to the Company which will result in a decrease in the incidence of taxation as long as E. P. T. is payable by the Company. Moreover, the sum of Rs. 1,94,146-0-0 has been released from the provision made for taxation in previous half-years, and effect has been given to this release in the account for the half-year under review. Income Tax and Super Tax at the increased rates laid down in the current Finance Act, relating to both half-years since 1st April, 1942, have also been provided for in these accounts.

(*Continued from page 982*)

Last week I mentioned that 3 companies in the Bird-Heilgers Group have doubled the dividends payable to the holders of ordinary shares. The *Naihati Jute Mills Company, Limited* is one of the three since the directors of the company have proposed to increase the dividend from Rs. 3 to Rs. 6 this half year. Mention may be made of the fact that this company has been successful in getting some relief as far as E.P.T. was concerned.

The accounts for the half-year ended 31st March 1943 disclose a net profit of Rs. 6,08,911 (Rs. 4,77,428) before providing for taxation and other reserves. A sum of Rs. 1,38,124 (same) has been set aside for Depreciation while provision for taxation at Rs. 1,00,691 is less than half the sum set apart on the last occasion (Rs. 2,50,384). The amount carried forward is Rs. 36,850 against the insignificant sum of Rs. 180 brought in. Allocations to Reserve and other funds have absorbed Rs. 2,17,320 against Rs. 25,000 last half-year.

* * * *

The *Auckland Jute Company, Limited* is unique in the sense that though the net profit before providing for taxation for the half-year ended 31st March 1943 is less at Rs. 5,82,135 against Rs. 6,70,603 for the previous half-year, the dividend on the ordinary shares has been increased considerably. The directors propose to pay a dividend of Rs. 5 per share as compared with Rs. 3 paid last half-year. While the amount set aside for depreciation is unchanged at Rs. 1,23,024, provision for taxation is very much lower at Rs. 64,033 against Rs. 4,32,685 set apart on the last occasion. But the amount transferred to reserves and other funds is considerably higher at Rs. 2,19,328 against Rs. 25,000 on the last occasion. The amount to be carried forward is also higher at Rs. 44,109 against Rs. 3,359 brought in.

* * * *

With reference to the recent resolution relating to the debentures of the Shree Radhakrishna Sugar Mills, Ltd. adopted on May 25 it has been explained that the resolution extending the date of repayment to December 30, 1953 is subject to the sanction of the Central Government. The qualification as to Sanction required did not appear in the notice which appeared in this paper.

WATCH-DOG.

BOMBAY STOCK EXCHANGE
(From Our Correspondent)

Bombay, June 3.

The conference between Mr. M. S. A. Hydari, Secretary, Industries and Civil Supplies Department, Government of India, and representatives of the cotton textile industry, which has been going on for the past few days in the city has excited much speculation in the Stock Exchange. The fact that the Government of India have deemed it necessary to consult millowners before adopting control measures to bring down the price of cloth and yarn has been interpreted as a welcome sign. But operators and investors alike were not prepared to commit themselves pending the conclusion of the conference and prices were fluctuating within narrow limits. When it was however known that the millowners have expressed their opposition to any control scheme without giving the Standard Cloth scheme a fair trial, prices began to move up with Textiles particularly buoyant. There was profit-taking at the higher levels. As usual, other sections also showed a sympathetic improvement.

The Giltedged section continued steady with 3½ per cent Govt. Paper at Rs. 94.

In the Textile section the easier tendency that was noticed last week continued into this week also. But in mid-week mill shares exhibited signs of improvement and a sudden rise was noticed on the announcement of the opposition by millowners to the Government scheme of control. *Bombay Dyeing* which closed at Rs. 1,885 yesterday were done at Rs. 1,902-8 at close of transactions to-day. *Central India* were Rs. 449; *Century* Rs. 815; *Colaba Land* Rs. 259; *Gokak* Rs. 355; *Indian Bleaching* Rs. 228; *Kohinoor* Rs. 832; *Phœnix* Rs. 772-8; *Simplex* Rs. 325 and *Svadeshi* Rs. 540.

The Steel section was steady throughout the period under review. But when Textiles took an upward course there was a sympathetic reaction in this section also with prices making slight headway. *Tata Deferreds* have gained 20 points to quote at Rs. 1,960 against Rs. 1,940 at the close of transactions last Thursday. *Tata Ordinaries* were Rs. 398-8 (Rs. 394) and *Indian Iron* Rs. 35-2.

In the Miscellaneous section *Alcock Ashdown* were better at Rs. 897-8; *Belapur Sugar* were lower at Rs. 236 on balance. *Bombay Burma* (Old) were Rs. 347-8; *Bombay Steam* Rs. 522-8. *Shivrajpur Syndicate* were higher by 2 points at Rs. 64. *Premier Construction* were slightly higher at Rs. 168-8. *A. C. C.* were Rs. 231; *Andhra Valley* Rs. 1,837-8; *Tata Power* Rs. 1,790 and *Tata Hydro* Rs. 194.

WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

The money market has ruled easy, with interbank call money quoting ¼ per cent in Calcutta, ¼ per cent in Bombay and ½ per cent in Madras. The total of treasury bills in the hands of the public now exceeds Rs. 131 crores; but the drain of funds on such a large scale has not affected monetary conditions. On the weekly treasury bills tender day, the offer was Rs. 8 crores; and applications came to Rs. 1,231¼ lakhs. The average rate of accepted tenders was Rs. 1-1 per cent per annum, this rate being maintained for the fourth week in succession. Sales of intermediate treasury bills between June 2 and June 7 amounted to Rs. 570½ lakhs. There are reasons to think that the Imperial Bank must have contributed largely towards this week's results of treasury bills, as the Bank's investment portfolio shows a sharp rise from Rs. 124.87 crores to Rs. 130.46 crores. Sales of tap bills are to continue at the unchanged rate of Rs. 99-12 per cent, and it is quite likely that the results to be announced next week will make equally good showing. The Imperial Bank's deposits have risen to the record level of Rs. 187.38 crores, showing an increase of nearly Rs. 4 crores over the week. The Bank's investments in government securities and treasury bills are now at the high level of Rs. 130½ crores. Even so, the cash balances are about Rs. 30 crores. It may be expected that the Imperial Bank's deposits as well as cash will continue to show expansion. Which means that the ability of the Bank to invest in treasury bills will continue to grow. If, as we expect, sales of tap bills in the next week also will be on a large scale, it remains to be seen whether the authorities may consider it necessary to suspend sales of intermediate bills for the time being. Or, in the alternative, the offer of tender bills may be reduced from the present level of Rs. 8 crores per week.

The Assam Government came on the market for three months treasury bills for Rs. 50 lakhs. Tenders for Rs. 60 lakhs were received on June 8. The average discount is Rs. 1-3-0 percent per annum. The disparity between the Assam Government treasury bill rate and the Central treasury bill rate is thus 2 annas. For our part, we cannot help remarking that we would like this disparity to disappear.

As the Reserve Bank's returns for the week ended May 28 did not reach our hands in time for our last week's money market review, we have now to deal with the returns for this week as well as for the week ended June 4. Comparing the figures of June 4 with those of a week ago, active note circulation has risen by Rs. 8.94 crores. There has been currency expansion against sterling securities for Rs. 10 crores but rupee coin is lower by Rs. 95.29 lakhs. Foreign balances held in the banking department have gone down by Rs. 3.10 crores. This means that the net addition to the sterling assets of the Reserve Bank is approximately Rs. 7 crores. Compared to a fortnight ago, active note circulation has gone up by Rs. 12.43 crores. There has been currency expansion against sterling securities for Rs. 13 crores whereas currency has been contracted to the extent of Rs. 5 crores against rupee securities. Foreign balances in the banking department are higher by Rs. 92.23 lakhs in the space of a fortnight. It may, therefore, be inferred that the net addition to sterling assets between May 21 and June 4 is Rs. 14 crores.

Our Jute correspondent, in his section, announces the receipt of an order for 70 crore yards of hessian from the U.S.A. The price mentioned is Rs. 26 for 11 porters. The total value of this order is, thus, Rs. 18 crores approximately. Delivery is to be completed from July to March. From the point of view of this column, the significance of this news is that, if India is allowed to exercise her rights, she can now secure dollar balances for Rs. 18 crores to be available before next March. We suggest that the Finance Member must give careful thought to the utilisation of this transaction for providing some manner of remedy for inflation. Hitherto, the dollar balances accruing in India's favour have been appropriated by the British Government who have handed over to the Indian Government the equivalent amount in sterling. As the Finance Member is not responsible to the Indian public and as the Reserve Bank's Central Board has no say in the matter, this process of Britain's appropriation of India's dollar balances has gone on without check or interruption. It is idle, at this stage, to deal with the harm that has been done to India by this policy. The present occasion at any rate must be treated as a break-away from this policy. Such a break-away is essential in the interest of the Government themselves whose concern equally must be to arrest and curb inflation. Our proposal is that India must be allowed to utilise the equivalent in dollars of the sale proceeds from the present purchase of hessian by America. India must be able to utilise these dollars for the purchase of gold and silver from America. As much of these two metals as can be had should be imported into India by the Government and released to the public. The price at which all the silver and gold can be sold to the Indian public should account for a profit to the Government of 100 percent to 150 percent on the transaction. More than this, this sale of gold and silver will have the effect of drawing away currency for Rs. 50 crores from the public. The Government will thus be bringing down two birds with one stone: they will have secured a considerable windfall that will go a long way to bridge the budgetary gap: and an effective measure of correc-

TREASURY BILLS

India

Tenders for Rs. 8,00,00,000 (Rupees eight crores) of three months' Government of India Treasury Bills were opened on Tuesday the 8th June, 1943. Total amount offered was Rs. 12,31,50,000 (Rupees Twelve crores thirty-one lakhs fifty thousand). Tenders at Rs. 99-12-0 per cent were accepted in full and those at Rs. 99-11-9 per cent were allotted approximately 65 per cent. Lower tenders were rejected. Total amount accepted was Rs. 8 crors, the average rate of accepted tenders being Rs. 1-1-0 (Rupee one and anna one) per cent per annum.

Tenders for Rs. 6,00,00,000 (Rupees eight crores) of three months' Government of India Treasury Bills will be received on Tuesday the 15th June, 1943 in Bombay up to 11 a.m. (Standard Time) and up to the close of business on Monday the 14th June, 1943 at other centres. Successful tenderers should make payment on Friday the 18th June, 1943. Other conditions are as usual.

Three months' Intermediates will be sold from 9th June to 14th June, 1943 at Rs. 99-12 per cent, subject to the conditions previously announced (viz. sales can be stopped at any time without previous notice, if Government think it necessary).

Three months' Intermediates sold from 2nd June to 7th June, 1943 amounted to Rs. 5,70,50,000 (Rupees five crores seventy lakhs and fifty thousand).

During the week ended the 4th June, 1943 Government of India Treasury Bills for Rs. 6,66,75,000 (Rupees Six crores sixty-six lakhs and seventy-five thousand) were sold in favour of the Issue Department of the Reserve Bank of India.

Finance Abroad

Thursday Morning.

THE agreement in Algiers and the revolution in Buenos Aires have caused little or no excitement in foreign markets. The deadlock in the U.S. coal industry has not prevented Wall Street from developing a steadier tendency. One must attach however little importance to a small gain in the stock market when a revolution in a major American state is in progress. London has evidently favoured Home Industrials as well as Home Rails. Giltedged stocks have been irregular, and Oils are only slightly higher on the week. There has been no development to attract notice like the drop in bullion prices in India after the firmness noted last week.

The war review by Mr. Churchill referred to French unity and the forthcoming diplomatic recognition. The agreements of 1940 have been displaced by a more recent arrangement which satisfies the Allies. Some important changes must follow. The currency of the four Free French Colonies was linked to sterling at 176 to the £. It is quite likely that the same rate will apply to the Algerian and other currencies. The Allies may encourage the exports of the French Colonies by fixing the rate at 176, and Giraud's promise of payments for some part of the supply (fulfilled recently) received may stimulate the relief operations undertaken last month. The gain must be obvious to Morocco where the Chamber of Commerce looked for immediate improvement in trade conditions. The mention of General Giraud's possible visit to the U.S.A. may also provoke speculation as to increased lease-lend aid to the French War Committee. The Algiers agreement is more important in the view of some than the Anglo-Soviet treaty for it promises the national resurrection of France and much else. The provisional government for France may differ little either in aim or composition from the war committee set up recently, and the extensive changes in personnel like the important place assigned to General Catroux make it clear that French bonds may come back in favour when the foreign bond market wakes up. Hopes of early invasion led to a revival in Greek bonds last month despite the fact that Greece has a poor reputation as a borrower. The Vichy Government's position is getting weaker, and that too must help the holder of Rentes as much as the unity of French Africa. While operations in the Mediterranean are not limited to Pantellaria, the blow at Italy has not been delivered. The blow may have welcome effects on all markets not only Foreign Bonds and the fractional falls in giltedged may not recur when the Second Front is opened up in the south.

According to London reports the summer has raised Clearing Banks' resources and the Treasury borrowing programme has benefited. The increased takings of deposits invited in the past month follows the increase in the weekly tender issue of £90 million. The response has been uniformly good every week, and the Banks have been content to rely on Treasury Bills in view of the scarcity of commercial paper. The rise in note circulation has led to an increase in savings since March, but actual figures are wanting to show that savings have risen after the drive launched in March.

The Senate Committee has ordered a bigger navy for the U.S.A. by passing the appropriation bill for $24.65 billions. Colonel Knox came out recently with an argument that the bigger Navy should stay and the U.S. Senate Committee has already voted the funds. For the farm programme only $820 millions; but $9 billions for new ships. The war has altered the rules as to public expenditure, and the Navy's air arm is to get as much as $8.5 billions for itself. The Budget for 1943-44 should exceed the estimates of January but how and when the U.S.A. is going to raise the taxation is not known. The pay-as-you-go plan makes for prompter payment of income-tax but U.S. assessees are excused their 1942 dues, and the progress of the measure in recent weeks has suggested to some that the next revenue bill may be ready before September. The U.S.A. will certainly need the money, as there is a plan for big flying-boats to be built by Howard Hughes who girdled the world in record time in 1938 and Henry Kaiser—the superman of super-business.

The major victory for the administration in recent weeks, was on the trade agreements bill. The late amendment in favour of Congress veto was defeated and the programme is retained for two years. The gain is as great as the Smith-Connally bill against strikes and the Washington conferences of the Allies have led to modified opposition of the U.S. President's plans. The major results may lie outside finance, but the President has indicated in his latest broadcast on the world's food problem that the Atlantic Charter is to be worked out. Truer trade, fewer exchange restrictions and larger quantum of trade are wanted.

The ties between Argentina and Britain, are such as to create special and common interests. The Argentine peso has in recent years been strengthend by the influx of refugee funds and the more favourable balance of trade arising from the curtailment of imports arising from a war in which Argentina is neutral. General Ramirez has indicated that there will be no departure from neutrality, and the quick exit of General Rawson from the Presidency showed that pro-Ally sentiment in Argentina is not overwhelming. There has been little comment in Washington that illuminates the recent happenings in Buenos Aires. The paper peso of Argentina was worth roughly a shilling and has in recent years been linked to the dollar. The official rate of 3.36 pesos to the dollar has been neutralised by free rates, and exchange control, blocking and other symptoms of management held up trade. The U.S.A. has no large commitments except through the Export-Import Bank after March 1941, for Argentina has always paddled her own canoe. Though the Argentina constitution generally is modelled on that of the U.S.A. and trade with the U.S.A. has increased of late the main exports depended on the U.K. market. The biggest stake in Argentina is still that of Britain and the railways are the property of British investors though Government has bought out some railways and shown a disposition to limit the influence of alien capital. Paraguay's currency is linked to the peso and exports from the Plate may be called those of B.A. and the Argentine currency has been stronger in New York during 1942 than before for the usual reasons. The fourteen Provinces had separate public debts and the other marks of autonomy. The external debt is smaller than the internal debt and Argentina's record as a borrower (leading to the flotation in 1930 of a loan in New York) is certainly the best in Latin America. Argentina's experience of the gold standard was neither long nor successful; but trade was long expressed in gold pesos and the more recent prominence of the peso does not obscure the fact that the gold peso's was 2¼ times the value of the paper peso. The Banco de Nacion is not a Central Bank but is a big commercial bank offering rediscount facilities at the head of the many local banks. Foreign banks had branches in Argentina and financed the large foreign trade. The P.O. savings bank in Argentina uses the national schools for branches and a large number of accounts belong to married women. In the war period in spite of, or owing to, high money rates, bank deposits have increased steadily and the foreign assets of Argentina have kept increasing even as the cost of living rose and U.S. Export-Import Bank's aid was required in 1941-42 to increase trade. Currency stabilisation began largely with the help of a U.S. credit from the Exchange Stabilisation Fund in 1940. Brazil has latterly given cotton goods to Argentina which used to come formerly from Britain. Argentina is second only to the U.S.A. in regard to foreign trade but the country has few agreements other than that of 1941 with Brazil which provided for an exchange of cotton against wheat.

The plans to buy out foreign creditors will suffer a setback and to that extent British investors (whose return from Argentina investments is not very large) may gain rather than lose. Quotations for Forestal Land, Argentine Estates of Bovril (which led to the late Lord Luke's claim to be the biggest farmer in the world) should have altered rather dramatically in the past week but little by way of comment on the future for British enterprise can be attempted. The linseed market in India may suffer a setback but more on account of the 14 per cent increase in yield forecast this week than on the prospect of Plate offerings. The U.S.A. may reconsider its views but the new Argentine Government has been recognised by the Army and the Supreme Court and can afford to wait till foreigners form their opinion as to what is coming. The new regime evidently wants to check inflation in Argentina and deal with price problems.

LLOYDS BANK
LIMITED
(Incorporated in England.)

Sterling Balances Again

It is somewhat surprising that the repayment of India's sterling debt and the consequent change in her position as a debtor country have provoked unhealthy reactions in Britain. For, India will naturally appraise this change by its significance to the national economy both in the present and in the future, rather than by mere sentimental feelings about being a debtor country. While India can, no doubt, breathe a feeling of relief that the huge sterling debt of the Government of India will, before long, be wiped out, she cannot ignore the fact that this repayment of the foreign debt of the Government does not go far towards the emancipation of her national economy from foreign tutelage. At the time of the outbreak of the present war, "Indian Finance" foresaw the developments of the war period in the financial sphere and urged that, this time, the blunders and wilful injustices of the last war period should not be repeated, and that the sterling balances should be utilised for the repayment of her sterling debt and for the repatriation of foreign capital invested in India. When the Government of India took the first step towards repayment of their sterling debt, it was possible to hope that the Government had felt the force and justice of the demand made in these columns and that, once the Government of India's sterling debts were repaid, the transfer of British investments in India to Indian hands would be duly undertaken. Much, indeed, has happened during the last few months to extinguish this hope in public mind. Not only have the Government tried to bring forward into the present their probable future sterling commitments, and make provision therefor out of our present sterling balances, but they have also earmarked a large amount of sterling for the purchase of machinery from Britain in the post-war period. They have also armed themselves with powers which may be utilised for preventing the formation of companies by Indians for the acquisition of British investments in India. In these circumstances, it is no longer possible to hope that the large sterling balances, that India has been able to accumulate during this war, will enable her to purchase the freedom of her national economy. The public has become increasingly aware of this change in the situation and will naturally be surprised to find that opinion in Britain should, far from recognising the injustice of denying India further progress towards economic emancipation, actually grudge her such relief as she has been able to obtain.

The Financial Editor of the "Manchester Guardian", it is now learnt, argues that India is now a creditor country and that this situation has arisen, not through the normal processes of trade, but as a result of negotiated division of defence costs. He adds that there is no reason to vary the comment made in Britain at the time that "the Indian Government had driven a very hard bargain with the British Treasury, a bargain that can only be justified by looking upon India as semi-neutral. It is going rather far that Indian businessmen now complain that India has too much sterling and would like to have instead free currency usable anywhere in the world. The way to get that would be to make the United States pay in dollars for all that her forces consume in India or receive from India". It is, indeed, surprising that the mere repayment of our sterling debt at a time when Britain sorely needs such repayment, should suffice to provoke unedifying feelings towards the economic position and prospects of this country. As we have observed already, the only benefit to be derived by India from this repayment, is the reduction in our Home Charges which the British Government has a hundred different ways of making up when it comes to it. And there is no prospect, too, as things stand, of India being able to reduce the drain of national wealth and income through the return investments in this country. And yet, British financial commentators felt called upon to question not so much the equity or expediency or feasibility of the demand for free currency as the very basis of the allocation of British expenditure between India and Britain. It must be well-known in Britain, as it is in all other parts of the world, that the question of allocation of war expenditure between India and Britain raises a wide variety of preliminary issues about her responsibility for, if not interest in, this war and about the direct responsibility of Britain for India's disabilities, economic, industrial and military.

Even apart from such issues, there is nothing in the terms of the settlement and even less in the actual working of it to warrant the assumption that India's sterling balances are due to any degree of generosity on the part of Great Britain. One has only to go on a tour through India to realise how India is paying for this war. The deterioration in the economic conditions in the country is such that there is no longer any need for patient accumulation of statistics or skilful handling of them for arriving at valid consequences. One has only to note the distress that stalks abroad in this vast sub-continent to realise that, if India is today housing, feeding and maintaining a vast fighting force, composed of nationals from all the United Nations, it is because her population has denied itself the most elementary necessaries of life. Every penny that has gone to build India's sterling reserves comes from the most serious privations undergone by Indians in this country. Hard labour in the factories, suffering in the cottages and all the disorganisation caused by reckless inflation of the currency form the price which India is paying to repay debts, the justice of which will not stand the scrutiny of an impartial national tribunal. It is a great tragedy that even in the midst of a world catastrophe like the present, Britain should choose to follow injury with insult in the economic, as well as in the political, sphere.

AMPLIFIED FOOD CONTROL

The world's food problems were examined and certain broad conclusions were reached at Hot Springs. There was, of course, the original U. S. objection to undertaking indefinite commitments, and, in the view of some, the understanding as to post-war policy is so vague as to be futile. There is the question of post-war relief, but overshadowing that is the present scarcity. Consumption standards have fallen, in spite of the general recognition that the food of the people is above controversy. The League of Nations had the Bruce report to go by; the latest conference had no such beacon to light its path. Agreement as to increase of production in the light of urgent needs is qualified by a dour insistence on retention of restricted production until conditions alter. The world has a surplus of wheat; agreement as to its disposal is wanting despite the conference held last year. Larger corps in Argentina and Canada are almost beyond the reach of countries like India where the surplus is conspicuously short of requirements. The Middle East, as a whole, is short of food. What the New World is going to do about it remains to be seen. The interim commission at Washington cannot accomplish more than any board or committee at Geneva. If that is understood, the heavy task falling to each nation, to do its utmost for itself, will be realised. Rice is required in India as in China and an exploratory committee to look over prospects in other areas, however promising at present, seems a dubious remedy. The problems of Europe are different from those of Asia. Occupied countries have developed agriculture in the war period (though not for their own benefit) and potato and beet have been favoured root crops. The shortage of imports has been dealt with, and the Nazis' defence of the Kuban suggests that the resources of the Ukraine are retained by the Nazis. Colonial development in Europe has been attended with a measure of success truly comparable to Britain's efforts to reduce imports to the minimum. The experience of the principal belligerents is not the same as that of India where famine is the characteristic of the fourth year of war. There is no mention of famine, but much about hoarding, profiteering and other symptoms of the the lack of one Freedom—Freedom from want. If the Hot Springs conference indicated anything it was the need to get a move on here.

There is a promise of crop planning, nutrition, freedom of trade etc, in the many general, reassuring speeches and writings of the day. But the action and unity that have to be secured in each country, cannot come, if the surpluses of the New World are earmarked for war purposes. Food is certainly a weapon, but the disarmed need it most always. The first claim is that of occupied Europe. The battle is still to the strong and U. S. food plans for 1943 covering all crops are drawn up, in advance of the flood damage, and they may suffer for that or any other reason. If the post-war picture is bright in the view of many, the lack of uniformity is discouraging.. How will Indian agriculture develop if prices react to peacetime levels? That is a problem for the scientist as well as the collectors of land revenue. Concessions designed to extend cultivation have been capricious and temporary in some Provinces, and in others, the development programme has hardly emerged.

The United Nations' food conference, of course, could not deal with details. But the problem, created for Asia by Japanese conquests in 1942, is unaffected by the most vigorous defence of unquestioned generalisations. India was represented at the Conference but news as to the official delegates' work is hardly available. But the Conference would be aware that large-scale import of food grains is impossible, and the carry-over of 1942 cannot be large in regard to wheat because of exports; and hoarding may be easily exaggerated. The policy of control and distribution through official channels adopted in 1918 (when famine came with influenza when the war was nearly at an end) can hardly be pursued after the variety of measures tried already. The need for famine relief is apparent in all provinces and the food purchase plans take no account of the reserve available. Rationing is only a limited solution, for equality of sacrifice means a lower standard of living. It is not the only consideration applicable today.

Mr. Roosevelt said that the United Nations are ready to deliver the world from the fear of want. Whether India comes within the scope of the latest promise is debatable. There are two proximate factors: overpopulation and ill-developed production. The money available for agricultural research is small, and irrigation is not the remedy it proved to be in the last century. Comprehensive plans for agriculture must come from the Provinces, and official satisfaction with the results of the 'grow more food' plan is a bar to the effective development of food production. The argument that scarcity is the chief factor in the rise in prices is admissible, because it brings out the war's aggravation of Indian poverty. Many have their pet prescriptions; mechanisation, electrification, co-operation and other nostrums are always to the fore but not many pause to ask if the remedies will produce the results, either alone or in combination. There is always the risk that the country will not stand dilatory experiments in rural development or recontruction, and the impulse to get back to older ways and simpler methods may grow stronger. To turn back to the self-sufficiency of the past is not easy and, in any case many urge that agriculture must be rapidly developed. The food conference does not obviously recognise the ideal of self-sufficiency, but wants to work back to free exchange, lower tariffs and all that. There is a real conflict of purpose or intention, and assurances in India as to the food position convey nothing as to the future, even less than the Hot Springs' discussions.

Should there be another unfavourable season, as may well follow the cyclone in the south whatever be the defence mechanism, it will be inadequate. Nothing like adequate preparation for the demands of the future has been reported and scarcity in Orissa compromises the success of the free trade plan. Hoards, of course, can be made to contribute temporarily to the solution, but the food plans at harvest-time acquire immense significance. The surrender of crops or the requisitioning on a large-scale by the Department of Civil Supplies well in advance appears a logical, if extreme remedy, and the hundred percent control of cotton mills decided upon recently must find due reflection in the control of crops and prices. To control distribution for a period may not be enough, so far as the deficit Provinces are concerned, and control must not begin with the shop but with the threshing-floor. Grain rents paid to landlords must, of course, be the first to come into the plan, and a large pool, financed by the Government, will have a greater effect on prices than the prosecution of profiteers. While it is possible that food grains alone can be dealt with in this way, it is not impossible to make use of the Ordinances against the futures markets to keep down the prices of commercial crops, and preserve the usual ratio of cultivated acreage under non-food crops to that under food crops by price stabilisation. The experiments in control launched last month clearly are designed to stimulate what is generally to be desired, to prevent the increased cultivation of cotton and jute too. The fact that international policy will be of little value to India, though it may be possible to learn from experience in the Colonies and Dominions, at least to the extent of curtailing acreage year by year in the case of crops suggests at once the true line of approach. The radical difference between the Dominions and India is not the food surplus but the advanced mass production business that agriculture has become there. Since that is impossible, and subsistence farming on the Indian scale can never yield surpluses, to be offered or withdrawn in consonance with international agreements, one might well urge that post-war conferences and agreements are irrelevant—for India at any rate. For the present, the main concern is the food of the population and subsidised exports from surplus countries may be actually welcomed, though they are unlikely. Purchase and distribution under the Central Government's plan will leave Provincial differences out of account, but association of the Food Advisory Board to examine and report on the food situation in the Provinces must be continuous.

North-western India alone appears to be free of the problem created by scarcity. The accent is now laid in Bengal for the prevention of hoarding—but what a hoard is and who is responsible for it can only be conjectured. The anti-hoarding drive has begun, but in the interval, one may hope for the elimination of distrust through the association of non-official local committees in the new hunt for undisclosed supplies. The volume cannot be determined, but in the period between the autumn harvest and the limited control possible under free trade in the Eastern Zone, defence against internal economic oppression appears to be vital. What holds true is the value of early prevention, and hoarding must not be allowed to recur in the next season. The hoarder is a pest—a harvest pest, and one effect of the State buying in bulk may be that crop finance needed this year may be of limited proportions, and money conditions may be slacker than expected. To borrow for short terms to finance the operations for internal economic defence may be easier for the Government this year than imagined and the buying, retention and selling recommended has the support of precedent as well as the sanction of authority. Expansion of activity is certainly approved even by those who deprecate rationing because of its difficulties. The suggestion that a census of requirements, stocks etc. must precede rationing in any event has been overruled for the most part. It is possible to ration traders instead of the individual, but optimum prices in such cases must be settled by the size of the coming harvests. There is, however, a 'prima facie' case for bringing the control price into relation with the bulk purchase plan because the plans will have a real reflationary effect of their own, following the curb on the advance of prices. The advantages held by big traders can cause no anxiety, if the supplies are speedily diverted. An amplification of the Food Grains control order is obviously the first condition of success, and without conditions as to quantity or prices, State trading may count on a measure of success denied to price control schemes so far.

Cotton Stocks And Consumption

In view of the limited increase in mill consumption in Bombay after September the pegging rate of Rs. 550 per bale chosen by the Government, does not seem too low. Raw cottton stocks at Bombay held by exporters, dealers and mills on May 27 were estimated at 1.51 million bales a year ago. The main reason for increase in stocks, despite the fall in imports, is the poor demand for Indian cotton from importing countries. While cotton from Uganda quotes over Rs. 1,000 per bale, there may be some force in the plea that higher prices for Indian cotton are justified; but the textile control plans have to be taken into consideration. In spite of transport difficulties, arrivals up to the end of May were larger than in 1941-42 and mills had no anxiety concerning the raw material as exports in the cotton year 1942-43 have been running at a lower level than before. and a permanent reduction in cotton acreage and outturn is desired at least by the cotton trade. The last cotton year ended on August 31 with large stocks of both short and medium-staple cotton. A statistical bulletin of the I.C.C.C. dealing with the cotton trade's stocks of raw cotton admits that its own estimate of 1.49 million bales is too low, and the carry-over in 1942-43 must be put at 25.9 million bales. There was an increase in stocks exceeding seventh-eights inch staple but an increase in Oomras and Broach showed why prices in 1942 were stagnant. Stocks with mills rose in 1941-42 to 1.75 million bales from 1.48 million bales to help increases in mill consumption in the next year. But the abundance of cotton with stocks at three and a quarter million bales showing an increase of over half a million bales on the estimate for the previous year cannot be made to explain the shortage of cloth experienced since 1942. The explanation must be sought anyhow in the failure of imports, the increase in textile exports and the stoppage of work in mills during August and after. The outlook for raw cotton has improved though the carry-over in Bombay at the end of May 1943 suggests that the favourable position noted in 1942 no longer obtains. The order for 2,000 million yards of standard cloth and the plan to work three shifts must help the consumption of cotton if one remembers the striking recovery in 1942-43 from a bearish statistical position. there is no reason to say that the cotton outlook is bad simply because futures trading is at an end. At the end of August 1942 the trade and mills held large stocks of East African, Sudan and other cotton. Out of two million bales held by mills 293,000 bales were foreign growths and the bulk of imported cotton was in Bombay Presidency. The mills held less short-staple cotton than presumed at the end of the year, and the trade held more, so that the recovery in prices, when it came, helped the trade most, while mill consumption was assisted by the increase in stocks of seven-eighths inch staple and above.

A Mysore Coffee Estate

A description of a coffee estate appears in Mr. Sylvester Pais' article on the Merthy Cowanhalla estate in Indian Farming. One of the oldest and most successful plantations in South India, the estate in the Western Ghats in Mysore, at an elevation of 5445 ft. above sea-level, is near the source of the Tungra and Bhadra. It is in the Malnad but in the coffee-planting district. Divided into two blocks, the estate has a reserve of young trees so as to keep up the average output over years. The average elevation, is 4,000 feet and average rainfall is 125 inches per year. The soil is a fine loam. The estate has seen many vicissitudes since the Seventies. Labour difficulties were not unknown, but the family has run the state because of the fine soil and favourable environment. The coffee industry is protected by recent legislation, but the estate has experience of a bleak period between 1930 and 1940. Well above the average in capitalization per acre, the estate produces four to five cwt of clean coffee per acre on an average, while the average price has ranged between Rs. 25 to Rs. 100 per cwt in the past. Average profits can be struck as 16 percent on the capital cost of Rs. 600 per acre but there are risks and Mr. Pais recalls that ten lean years followed ten fat years on the estate. Since 1941-42 the average price paid by the consumer has improved to Rs. 100 per cwt but the coffee producer says Mr. Pais gets only Rs. 50 per cwt and middlemen rake off a large part of the profits. The planter tries to keep one cooly per acre but on Cowanhalla three men for 4 acres is the rule. Labour is recruited through mukkadams but this particular estate has, in spite of the fact that neighbouring estates pay more has kept many workers whose ancestors had been working there. Planting is dependent on breeding and valuable research work has supplemented experience. Pests are common and coffee-growing is a branch of agriculture calling for knowledge and skill. Mr. Pais has used both to state that unprofitable trees must be eliminated and also that overcropping in the case of perennial trees represents a danger. There is another point demonstrable from experience the coffee grower must keep liquid reserves to tide over bad years like 1939-40. Mr. Pais refers to his experiences to indicate that coffee growing in spite of the high quality of Indian coffee (the preponderance of arabica is well-known) is not a sheltered industry partly because India depends on the export trade. Of India's total estimated production of 18,000 tons per year 10,000 to 12,000 tons only are consumed in India and a setback in exports as in 1940 has very important consequences for coffee planters.

Crops And Supplies

The crop forecasts for 1942-43 are certainly complete with the issue of the fourth wheat forecast. The figures provided in the usual summary indicate that only in the case of jute, have supplies increased substantially as compared with 1941-42. Most important crop is rice (over 74.9 million being under rice) and in the case of rice, the official estimate is for a crop of 24.5 million tons as against 25.35 million tons in 1941-42. The fall of 3 percent in yield when area is up by 2 percent, is not due to adverse seasons in one or two regions but to many other circumstances, like the denial policy adopted last year, and the decision in Bengal to grow more jute in order to raise exports. The carry-over of 1941-42 assumes exceptional importance after the loss of the source of imports, and the general assumption that Burma sent 1½ million tons in a year means for India a shortage of 2½ million tons in the current year, a shortage which is not evenly distributed and which has also to be judged in relation to ever-expanding defence requirements and the exports permitted up to the end of last year. Attention may be drawn to the big fall in cotton outturn by 26 percent as compared with last year and the increase of 9.5 percent in the wheat crop of 10.95 million tons against the 10.07 million tons noted in 1942. The increase means that a million tons of wheat may tilt the scales. For the consumer of sugar the 30 percent increase in sugarcane outturn is reassuring in spite of the late start of crushing, high cane prices and other retarding factors. There is a big increase in castorseed supplies this year in view of the increase of 41 percent in the area. Recovery in the case of rape and groundnut must be related to the improved prospects for oilseeds. The Sesamum crop is expected to be up by 12 percent, and the increase under oilseeds has been achieved largely at the expense of short-staple cotton. Millets too have gained. The area under linseed, however, has shrunk by 2 percent yet the outturn may be more than 361,000 tons shown for 1941-42. The revolution in the Argentine is undoubtedly a bearish factor for Indian linseed if the shippers are not keen. Rape and mustard may yield over one million tons and there is no serious rival in the export field. The export outlook for food grains does not invite discussion but jute supplies are not too large in view of exports.

N.W.R. SUBORDINATE SERVICE COMMISSION LAHORE.

Applications are invited from candidates for appointment as Sub-Assistant Surgeons on the N. W. Railway. There are 7 temporary vacancies reserved for Muslims but in addition names of 34 suitable candidates (33 Muslims, 1 Sikh, Indian Christian or Parsee) will be borne on a waiting list for a period of one year. In case a sufficient number of suitable Muslims is not forthcoming, men of other communities may also be considered.

Applications must be made on the prescribed form. Last date for receipt of applications together with attested copies of testimonials:—1-7-1943.

Qualifications:—Licentiate or L.M.P. granted by one of the authorities mentioned in the schedule of the Indian Medical Degree Act No. VII of 1916. Candidates must be registered on one of the Indian Provincial Registers and *should be over 40 years of age or physically unfit for active service.*

Pay:—Rs. 65-5/2-85 plus dearness allowance admissible under the rules.

Detailed particulars and the prescribed application form can be had free of cost on sending a stamped and addressed envelope to the Chairman.

Jobs For Soldiers

Opinion as to the utilisation of ex-soldiers for work as commissionaires continues to be favourable to the proposal. The Upper India Chamber of Commerce in a reply to the Director of Reconstruction, Defence Department, answered the points raised as to the general usefulness, the need for improvement of the plan to form a corps of commissionaires, and the small contribution sought for meeting administrative expenditure. In common with other Chambers of Commerce the Upper India Chamber said that responsible firms and institutions would certainly give employment to ex-soldiers provided they had exemplary characters. The Committee stated its belief that commissionaires in the U. K. were employed by very large firms and by banks, insurance companies, etc. It was accordingly believed that an Indian Corps of commissionaires would stand more chances of success in the port towns than in up-country centres. Members of the corps of commissionaires in Britain were old soldiers or sailors and were thoroughly disciplined men of whose integrity there could be no question. The Chamber suggested similar qualifications would be very necessary if the Indian Corps was to succeed, and it was recommended that the new corps should not be thrown open to ex-soldiers except those who had seen considerable service and held the rank of Havildar and about whose integrity there was little doubt. With reference to pay proposed, the Chamber said it was not possible to fix a minimum wage. The Director suggested a rate of pay which might be appropriate for ports such as Bombay and Calcutta but the Chamber feared that at the proposed basic rates the Corps would not be a success upcountry. The Chamber argued that if the corps materialised, the pay would have to be linked with the cost of living in post-war years and this pre-supposed that pay would have to be modified from time to time and from area to area in accordance with the cost of living index. The Chamber stated that investigation would show that many places likely to be filled by members of the new Corps were already held by old soldiers of undoubted integrity. It is clear that a new Corps when formed should not be allowed to touch them or their jobs, and the reply furnished in March from Cawnpore shows that those not technically qualified cannot expect employment on special terms, though there is much general support for the view that a levelling up of standards of employment will be welcomed by those who may be described at present as rivals of the commissionaires. The Upper India Chamber has suggested limitations on entry; to confine the corps to N.C.O.'s who may be inclined to look for higher pay and charge a premium also for the guarantee of integrity. Power commissionaires will find jobs if that were done, and the continuance of present conditions is not to be wholly deprecated as ex-soldiers are receiving some consideration.

N. W. R. SUBORDINATE SERVICE COMMISSION LAHORE

Applications are invited from candidates for appointment as Computer in the Headquarters Office, N. W. Railway, Lahore. There is one temporary vacancy to be filled at present, but the name of another suitable candidate will be borne on a waiting list for a period of one year. Muslims will be preferred, but members of other communities may also be considered if no suitable Muslim candidate is available, *Applications must be made on the prescribed form.* Last date for receipt of applications together with attested copies of testimonials:—5-7-1943. Pay:—Rs. 180/- fixed P.M. plus dearness allowance admissible under the rules. Qualifications:—A degree or diploma in Civil Engineering from a recognized College or University, with experience in the design or masonry, steel or R. C. Structures in common use on a Railway. Age:—Between 25 & 40 years relaxable upto 45 years in the case of Government and Railway servants provided (a) they have passed a course in Civil Engineering (b) have had at least 5 years practical experience in designing and computing on a Railway and (c) have obtained the necessary permission from the Heads of their departments. *Full details should be obtained on sending a stamped and addressed envelope to the Chairman.*

Plans for the Highlands

The Government introduced a Bill in February for the development of hydro-electric power in the Highlands. The Scottish power scheme is meant to assist the regeneration of the depressed Highlands. Mr. Tom Johnston declared that four billion units of electricity or 450,000 kilowatt could be produced in a year and many industries established. The proposal followed the report of a committee which made certain proposals for a non-profit-making Power Board, expected to take over public utilities in the north Highland area or else to sell power in bulk; and argued that the waterpower resources developed would be for the benefit of Scotland. The Central Electricity Board was the model to work up to according to Mr. Johnston who said that the Cooper report provided for the construction schemes. He said that the Scottish C. W. S. would be inclined to set up plants in the Highlands, if power

To
The Share-holders of the Bengal Central Bank Ltd.

Gentlemen,

The Directors have pleasure in placing before you the Balance Sheet and Profit & Loss Account of the Bank for the year ended 31st December, 1942. The Reserve Fund of the Bank has been increased by Rs. 50,000|- and now stands at Rs. 4,00,000. After providing for the Reserve Fund, the balance at the credit of the Profit & Loss A|c. is Rs. 99,936-13-9 as against Rs. 43,327-13-0 only of the previous year.

The Direcotrs recommend payment of a dividend of 10% per annum on the paid up amount of shares less Income Tax, Super Tax and Surcharge thereon, the same being *payable on application* in terms of the Bank's Articles of Association.

The Cash and Bank Balances are 26% and the market value of securities 39% of the deposits, making a total of about 65%. A substantial part of the advance is against readily realisable securities and consequently the liquid position of the Bank is very satisfactory.

The Bank has made remarkable progress in respect of its operations during the year under review.

Mr. Nalini Ranjan Sarker, after relinquishing the Office of Commerce Member of His Excellency the Viceroy's Executive Council, rejoined the Board of Directors on our invitation. Mr. Satish Churn Law very graciously tendered his resignation as Chairman of the Board making room for Mr. N. R. Sarker. On his joining the Board, Mr. Sarker was elected as Chairman. Mr. S. C. Law was elected Deputy Chairman of the Board. It was also a matter of gratification that Mr. B. N. Chaturvedi joined the Board as one of our colleagues.

The Directors place on record their sense of appreciation of the valuable services rendered to the Bank by Mr. Satish Churn Law during the period he presided over the deliberations of the Board as its Chairman.

Of the Directors Mr. S. C. Law and Mr. S. K. Sen retire in terms of Article 117 but being eligible, offer themselves for re-election.

Agreeably to provision of Sec. 123 of the Articles of Association, Messrs. N. R. Sarker and B. N. Chaturvedi retire, but being eligible, offer themselves for re-election.

Mssrs. Ray & Ray, Chartered Accountants, who audited the accounts of 1942 also retire, but being eligible, offer themselves for re-election. You are requested to appoint Auditors for the ensuring year and to fix their remuneration.

In view of the large increase in the business of the Bank, it has been felt that its share-capital should be increased. It was therefore decided that the Subscribed capital of the Bank should be increased to Rs. 50,00,000. Since 1st January, 1943 shares of over Rs. 8,00,000|- have already been privately subscribed without any special effort on the part of the Bank. In view of the profitable return on investment in Bank's shares as well as the security of capital which a Bank of this status and magnitude offers, investment in the Bank's share capital will be an attractive proposition, and it is, therefore, confidently expected that the additional share capital will be subscribed before long.

The Directors have long felt the necessity of having a commodious building in a convenient locality for the location of its Head Office in Calcutta with a view to offer even better service to its clientele. It is, therefore, a matter of great gratification to us that a big plot of land in the best business locality, viz., Clive Street, has been secured for the purpose. It is intended to erect a very up-to-date and well-equipped structure on this plot, which will not only yield a satisfactory return on the capital invested but will also be a citadel of security and service to its clientele.

Mr. S. K. Sen, one of the Directors, being absent could not sign the Balance Sheet and the Report.

BALANCE SHEET AS AT 31ST DECEMBER, 1942.

CAPITAL & LIABILITY.

AUDITORS' REPORT.

We hereby certify that we have audited the above Balance Sheet dated the 31st December, 1942, and the attached Profit & Loss Account for the year ending 31st December, 1942, with the books and accounts as kept at the Head Office and the Harrison Road Branch, in which are incorporated the certified Returns of the Branches. We have verified Cash and Securities of the Head Office and the Harrison Road Branch. We have to report that we have obtained all the information and explanations we have required, and that, in our opinion, the above Balance Sheet and the Profit & Loss A/c. are drawn up in conformity with the law and the Balance Sheet exhibits a true and correct view of the state of the Bank's affairs according to the best of our information and the explanations given to us and as shown by the books of the Bank. In our opinion the books of accounts have been kept as required by law.

were available. The preservation of landscapes was not the function of the Government which was only keen on providing power. The dispossessed crofter is not a problem, as in the last century but the limited development of industry in the Highlands in spite of the carbide scheme and the projects of British Aluminium. The Minister declared that amenities were desired and would be retained for the peasant in any case. Advisory Committees were promised and an assurance was given that fisheries would not be imperilled. It was urged that local employment would increase as the hydro-electric scheme, involving an outlay of £130 millions, would help to give work for 10 years to about 18,000 men. The Secretary for Scotland called the Bill the first step in planning for the Highlands. Concentration, at work for two years in Britain may help to transfer industry to Scotland. The decay of the Highlands waas only partly due to the problems of the herring industry. In the Lowlands steel has been developing recently, but the North has nothing like a vigorous pastorial industry to show. The criticism against the proposals comes from those who wanted the counterpart of the T. V. A. to develop local industry on a large scale in the Highlands. That industry might despoil the Highlands was a reasonable apprehension and the Minister was informed that the Board would be setting up an Amenity committee which might pull against it. To assign the work of developing the Highlands to any agency other than the new Board appeared unnecessary. Yet the Scottish Power bill, marking the first big wartime construction scheme in Britain, was regarded as a little vague and not too helpful. Scottish Nationalists would not be unmindful of the benefits promised but an autonomous development board was wanted by the critics of the measure who wanted that the power scheme should be comprehensive and the hydro-electric board an all-purpose agency.

Russian Gesture

A year from the Anglo-Soviet treaty, Russian foreign policy has been sharply defined by the dissolution of the Comintern. The decision is no formal one, like the Constitutional Reforms of 1936, but is a direct assurance of non-intervention in Europe. Communists in Britain have nothing to say against the dissolution which puts the Bulgarian Dimitrov officially outside the Soviet organisation. The Third International has been liquidated without having Stalin's hostility. Turkey finds the gesture more pleasing than most, but the real ultimate effect may be on the neutrals who are told that Soviet Communism is not an article for export. The consequences are most important for the Balkans; but the Serb Irregulars who deprecated the activity of Communists are not likely to show special satisfaction over the Moscow gesture, nor will the position of Communists in Britain be improved by the decision as the T.U.C. will continue to show reserve towards Communists and decline to make a party out of one M.P. Twice has a pact been directed against the Comintern. The Comintern is dead, but the pact is not dead, as the two original signatory powers and later the many adherents are fighting Russia while one is neutral in the Russo-German war. Communists in China are not likely to get excited over the decision which merely reinforced the promise to work for collective security after the war. Under the 20-year pact, Russia is decidedly conscious of Europe instead of living in a communist-made vacuum. Indian Communists have said little to suggest that the decision is not part of a policy of leaving Imperialism to do what it will. The revolutionary phase in Russia has ended, and the Red peril cannot be conjured up. The Left parties in Europe will have to fight the elections without the handicap of former Russian connections and previous Russian intervention (indirect, necessarily) e.g. in Spain was hardly successful. The dissolution may have come after the realisation by Stalin of the ineffectiveness of an instrument of policy. In the Balkans during 1940-41 the Soviet Union's policy did not work to plan, and the Baltic States have been detached more or less successfully from their temporary allegiance. Finland's continuance as an ally of Germany is a point that deserves notice, and of course, the very late recognition of the Soviet Union by the United States made for little cordiality. The dissolution marks something like an approach to the U.S.A. for reasons that are obvious, while it is clear that the Soviet still maintaining neutrality in the Far East made a belated gesture to Washington just in advance of Mr. Davies's mission.

U.S. Labour Obliges

The truce in the U.S. coal industry was followed by a sharp brief struggle from May 20. The Administration looked like being beaten only last week, but a Senator from Texas produced a Bill. The Miners' leader said the strike was off, and labour position in America has been clearer as half a million men are back at work. Mr. Brown and the War Labour Board are not better off now, as is Mr. Ickes whose last appeals fell flat, but Mr. Lewis is undoubtedly worse off. There never was a chance of a show-down when Congress was ready to act. The coal strike was one of many this spring. The coal strike spread to five States but earlier Ohio was in the grip of a rubber strike. The State Governors evidently did nothing, since the War Labour Board is above them. There were disputes in the Chrysler plant in Detroit, and shipbuilding was held up in Mobile (Ala). The ultimate cause of all strikes is the demand for more pay. Negotiations for increases in the case of the coal miners were not unsuccessful, but the miners kept on asking for more. New collective contracts will not give the miners two dollars more a day, but the pay-as-you-go plan, wiping out income-tax for 1942 in most cases, is a gain to the wage-earner. The U.S. labour leaders have been told that strikes in wartime are dangerous and the right to strike must not be exercised. Mr. Lewis' leadership has been openly challenged and treasurer of the C.I.O. has made rude remarks. But the U. S. Mine-workers form, with the United Automobile workers, the backbone of the C.I.O. and Mr. Lewis was not in difficulties last month when he ordered the strike and later when he arranged the truce. It is really part of the old plan to prove that organised Labour is outside the two political Parties, and thinks usually of its material benefits rather than the effort. But the leaders would certainly not like to be preached at now or at any time, and legislation designed to prevent strikes may not go down very well. In the course of two years, there have been strikes, the taking over of plants, and the calling out of the National Guard but all has been well that has ended well. America, to use a popular phrase, has come across, and U.S. labour has developed only the same intolerance of 'dilution' that was noted in Britain during the last War. The gain, however, is the President's but the suggestion of someone that Mr. Lewis has been put up by some money barons to fight on and discredit the President is fanciful rather than factual. But one effect will be that Britain might carry on with a tighter coal supply, for U.S. output (the highest in the world) will have suffered last month and the demands of combined war production are still rising.

China And The Mongols

Encouragement of Mongol claims by Japan is superficial and selfish and autonomy has been overridden by exploitation. Inner Mongolia occupied by the Japanese is a devastated region and a Princess who reached Western Suiuan gave details of murder, robbery and other crimes that were laid at the door of the Japanese. The note in the China Information bulletin last month referred to the statement of the widowed Mongol Princess. Her husband was held by the Japanese on the pretext of illness and died of causes other than natural. The Prince lost his position when the Japanese advisers stepped in, and he, too, had to furnish 'good citizen' papers like his subjects to Japanese guards after leaving his castle. Impressment of Mongols for the puppet army was reported. The resulting shortage of labour lowered livestock production in the principality. A Japanese monopoly paid new currency at fixed rates for sheep, horses and hides, and the horses of the tribes were conscripted for Japanese requirements. All goods like cotton, tea and tobacco wanted by the Mongols were sold at arbitrary prices as the Japs set up a monopoly. Constant shortage of food was noted. The Princess was impressed by the contrast in Suiuan The Chinese encouraged the Mongols to keep their native institution and own ways of life. In Suiuan a self-administration commission was retained alongside of the Provincial government. The Mongolian Director's office keeps up the connection between the Mongol local governments and the National Government after it had been shifted from Yulin in northern Shansi to Western Suiuan. Fighting Japanese intrigues and maintaining the Mongol chieftains the Office picks students for the schools and helped to set up an educational institute. Pamphlets and posters to educate the Mongol in animal husbandry, forestry and land conservation were prepared by the office The Directorate helped also in the establishment of small-scale woollen factories Broadcasting has been employed to support the Mongolian Service Corps against espionage, enemy propaganda and to put over the Chinese programme for the Mongols. The Chinese counter-moves in Mongolia are an interesting variation on the Japanese oppression, described by the

SECOND *Childhood*

Hard to believe, that this middle-aged executive has resuscitated his childhood friend—the slate!

Instead of simple sums, it now carries notes of telephone conversations, figures, and appointments. It saves daily paper of ten times its own surface.

Follow this lead back to second childhood—help to save paper—for essential uses only.

Revise all your stationery, forms and statements. You can save over 25% of the paper surface you are now using.

There is an acute paper shortage. Your attention is drawn to the following methods of avoiding waste of paper :—

- **Use the smallest sheet of paper for any purpose that will do the job.**
- **Write, type and print on both sides of the paper. For short letters, bills and accounts reduce the size of the paper.**
- **Do not make copies except where absolutely necessary.**
- **Always type single spacing.**
- **In all cases (letters, commercial printing jobs and pamphlets, etc.) curtail margins.**
- **Reduce the size of labels on manufactured goods.**
- **Use the back of the letters received for the carbon copy of your replies.**

Save paper

ISSUED BY THE TITAGHUR PAPER MILLS CO., LTD.

The list will open on the 21st June, 1943
and close on the 24th June, 1943.

(A copy of this Prospectus has been field with the Assistant Registrar of Joint-Stock Companies, Coimbatore.)

PROSPECTUS OF

THE NEELAMALAI TEA & COFFEE ESTATES LIMITED

(Incorporated in British India under the Indian Companies Act VII of 1913 as No. 8 of 1943/44 on 21st April 1943.)

(LIABILITY OF MEMBERS LIMITED)

Application will be made to the Bombay Native Stock & Share Brokers Association for listing these shares.

	Rs.
Authorised Capital:	**1,25,00,000**
Divided into 18,00,000 Ordinary Shares of Rs. 5 each	**90,00,000**
3,50,000 Preference Shares of Rs. 10 each	**35,00,000**
Allotted to subscribers to the Memorandum and Articles of Association for cash:—

MANAGING AGENTS.

Messrs. A. V. Thomas & Co. (India), Ltd.

REGISTERED OFFICE.

No. 8/34, Satyamangalam Road, COIMBATORE (Madras Province).

OBJECTS.

The Company has been formed generally for the purposes set out in the Memorandum of Association which is annexed hereto and forms part of this Prospectus and this issue is made in particular for the purposes of acquiring three well-known groups of Estates on the Nilgiri Hills, Madras Province, namely:—

1. SUTTON and LOUISIANA Estates belonging to Messrs. James Stanes, N. J. Stanes, and J. Vernede.
2. MOUTERE Estate belonging to Mr. James Stanes, Mrs. Vernede, and three others.
3. KATARY and BHAWANI Estates belonging to the Katary Nilgiri Tea Estates Ltd., London.

The following agreements have been entered into:—

(a) Between Messrs. James Stanes, N. J. Stanes and J. Vernede and Mr. S. Veeriah Reddiar of Alleppey, whereby the former have agreed to sell Sutton and Louisiana Estates to the latter or his nominee for a sum of Rs. 16,50,000.

(b) Between Mr. James Stanes and Mrs. C. Vernede, Proprietors of 5/8 share in Moutere Estate and Mr. S. Veeriah Reddiar, whereby the former have agreed to sell to Mr. Veeriah Reddiar or his nominee their 5/8 share in the property and to procure the conveyance of the balance 3/8 share from the other partners resident in England, for a sum of Rs. 4,40,000. This price includes shares to the value of Rs. 40,000 held by the proprietors of this Estate in the Guernsey Tea Factory Co., Ltd.

(c) Between the Katary Nilgiri Tea Estates Ltd. and Mr. A. V. Thomas whereby the former have agreed to sell their Katary and Bhawani Estates to the latter or his nominee for a sum of Rs. 27,00,000.

(d) Between Mr. S. Veeriah Reddiar and the Company whereby Mr. S. Veeriah Reddiar has agreed to assign his right, title and interest in the agreements mentioned in (a) and (b) to the Company for a consideration Rs. 65,000/-.

(e) Between Mr. A. V. Thomas and the Company whereby Mr. A. V. Thomas has agreed to assign his right, title and interest in the agreement mentioned in (c) free of any consideration.

ACREAGE AND PARTICULARS OF ESTATES.

The Acreage of the Estates are as under:—

	Tea	Coffee Arabica	Bldg. Sites & Reserve Land.	Total Acres.
Sutton and Louisiana ..	466.75	101.00	51.00	618.75
Moutere	120.32	53.20	6.25	179.77
Katary and Bhawani ..	1048.00	109.00	229.00	1386.00
Total ..	1635.07	263.20	286.25	2184.52

1. SUTTON & LOUISIANA GROUP is about six miles from Coonoor, on the Coonoor Kullakamby Government road and is one of the finest, if not the finest, Tea properties on the Nilgiris. This Group was opened by the proprietors who are all experienced planters. The average yield on this group over the past six years works out at 813 lbs. of tea per acre, but before the voluntary crop restriction scheme came into force a crop of nearly 1000 lbs. per acre was obtained, and it is possible to increase the yield to this figure with cultivation and manuring.

There is a fully equipped and adequate tea factory on this group as also other buildings such as Bungalows, staff quarters and lines for labour.

2. MOUTERE: If Sutton is the finest Tea property, this can be classed as the finest Tea *cum* Coffee Estate on the Nilgiri Hills. This Estate also was worked by the Stanes family of planters and the yields from both Tea and Coffee areas are very good indeed. The Tea crop works out at an average of 800 lbs. per acre over three years, and that of Coffee at about 8 cwts. per acre. This Estate's Tea is manufactured in Guernsey Tea Factory Co., Ltd., in which the Estate holds one-fifth share. There are the required buildings on the Estate and also a Coffee-pulping house and machinery.

3. KATARY & BHAWANT ESTATES: This group adjoins Sutton Estate and is conveniently situated for efficient working and administration. These estates were signatories to the voluntary crop Restriction Scheme and the restricted crops secured were as under:—

1940-41	1941-42	1942-43
5,02,000 lbs.	5,46,000 lbs.	6,50,000 lbs. (estimate).

For the ten months ended April 1943, 4,59,400 lbs. of tea have been harvested and as May and June are good months for crop it is expected that the estimate of 6,50,000 lbs. will be secured.

As stated above, these estates did not gather all their crop for the past few years as they were under the restriction scheme. In recent years, the estate have been brought into first-class condition and manuring and other cultivation works have been carried on and are now capable of producing crops much in excess of earlier figures. For the year 1943-44, with manuring, it is possible to obtain a crop of 7,00,000 lbs. or about 700 lbs. per acre. Another very important factor is that out of 1048 acres of tea on these estates very nearly 500 acres are areas planted by the Katary Co., during the years 1926 to 1930 and being young are capable of giving much higher yields. Even under the Crop Restriction Scheme, certain fields on the group gave as much as 1000 lbs. per acre.

Now that the Crop Restriction Scheme has been withdrawn and more manure is being applied, larger crops can confidently be looked for. For the year 1944-45, 7,50,000 lbs. can be taken as a safe estimate and for the year following 8,00,000 lbs.

Coffee Area in this group amounts to 109 acres and with attention should give a crop about 3 cwts. per acre.

There are two fully equipped factories on the Estates. The factory on Katary contains up-to-date machinery, some of which was installed about a year or two ago. There are also two Bungalows on the property and the necessary accommodation for staff and labour.

Including the Factory on Sutton Estate there are three factories on the Sutton-Katary Group. It may not be necessary to operate all the three factories. The factory on Bhawani can be closed down and the crop obatined from the two groups of estates can be conveniently manufactured in the Katary and the Sutton Estates' factories. This will tend to economy in costs.

All the above Estates are situated at an elevation ranging from about 5500 to 6000 feet.

CROPS.

The estimated crops for the season 1943-44 (July-June) are as under:—

	Tea	Coffee
Sutton Group ..	4,00,000 lbs.	400 cwts.
Moutere	1,00,000 lbs.	400 cwts.
Katary Group ..	7,00,000 lbs.	300 cwts.
Total ..	12,00,000 lbs.	1,100 cwts.

WORKING EXPENSES: During the past few years the average working cost was about 40 cents per lb. of tea but in view of the present increased cost of Estate requisites and food for labourers the cost for the next season is estimated at 45 cents or about As. 7|3 per lb. The cost for Coffee is estimated at Rs. 25|- per cwt.

PRICES: Nilgiri teas being high grown, usually fetch higher prices than medium and low elevation teas. Certain quantities of teas have been sold forward at prices ranging from As. 15-6 to Rs. 1-4 per lb., but for estimating, an average price of Rs. 1 per lb. is taken.

As regards Coffee, the current market price is about Rs. 150|- per cwt. Nilgiri Coffee is marked higher in auctions and, although an average price of Rs. 130|- to Rs. 140|- per cwt. can be expected for 1943-44 crop, a price of Rs. 120 only is taken.

PROSPECTS.

On the above basis the estimated profit is reckoned as follows:—

	Rs.
INCOME:	
12,00,000 lbs. of Tea at Rs. 1 per lb. ..	12,00,000
1,100 cwts. of Coffee at Rs. 120 per cwt. ..	1,32,000
Total ..	13,32,000
EXPENDITURE:	
On Tea at 45 cents per lb.	5,40,000
On Coffee at Rs. 25 per cwt.	27,500
Total ..	5,67,500
Balance Profit ..	7,64,500

Out of this, a sum of Rs. 90,000 will have to be set apart for payment of dividend on the 5% cumulative preference shares. A further deduction of Rs. 64,500 will also have to be made for Managing Agents' remuneration, their 5% commission and other charges. This will leave a sum of Rs. 6,10,000 available to the ordinary shareholders, which on Rs. 36 lakhs of ordinary capital works out to about 17%.

The above figures are based on an average yield of 734 lbs. per acre on the Tea area. The Estates are capable of yielding a crop of 900 lbs. per acre, but even if 800 lbs. per acre is taken as the basis, the extra crop will amount to over 100,000 lbs. and the additional profit will work out to Rs. 55,000 or 1.50% on the ordinary share capital, thus increasing the percentage of return to 18.50. This return from first class property on the Nilgiri Hills should be considered very satisfactory.

DIRECTORS' QUALIFICATION AND REMUNERATION.

The qualification of a Director shall be the holding in his own right of shares of the nominal value of Rs. 5,000.

The Articles provide that the Directors shall be paid out of the funds of the Company a remuneration not exceeding Rs. 5,000 per year for all the Directors besides reasonable travelling and other expenses incurred in attending meetings of the Board. They may also be entitled to any other expenses they may incur by authorisation in or about the Company's business. If any Director shall be appointed to advise the Company as an expert or be called upon to perform any professional service or other extra work or services or make special exertion for any of the purposes of the Company, the Directors may pay such Director such special remuneration as they think fit, which may be in the form of either salary, commission or lump sum.

PAYMENT TO VENDORS AND DISPOSAL OF CAPITAL MONEYS.

The sum of Rs. 54,00,000 is proposed to be distributed as under:

	Rs.
For the purchase of Sutton Group of Estates	16,50,000
For the purchase of Moutere Estate including shares in the Guernsey Tea Factory Company, Ltd.	4,40,000
For the purchase of Katary and Bhawani Estates	27,00,000
For payment of option money	65,000
For preliminary expenses, conveyance, registration, stamp duty, brokerage, etc.	2,50,000
For working expenses, including cost of stocks and stores to be taken over ..	2,95,000
Total ..	54,00,000

INTEREST OF DIRECTORS.

Mr. A. V. Thomas and Mr. K. Venkatraghavan are interested as members and Directors of the Managing Agency Company. Mr. A. V. Thomas is also interested in the return to him of Rs. 2,70,000 paid by him as advance for the purchase of the Katary and Bhawani Estates. The other Directors are not interested except in so far as they hold shares in the Company and the fees they may receive from the Company.

THE NEELAMALAI TEA & COFFEE ESTATES LIMITED. PROSPECTUS—Contd.

PRELIMINARY EXPENSES.

The preliminary expenses including stamp duty on conveyance, etc., but exclusive of brokerage are expected to amount to Rs. 1,15,000 and this would be borne by the Company.

BROKERAGE

The Directors may at their discretion pay to Bankers, Brokers or others a brokerage not exceeding 2% on allotments made in respect of applications sent through them.

No part of this issue is underwritten.

VOTING RIGHTS.

Every share entitles the holder thereof to one vote exercisable either in person or by proxy. The Directors may decline to register any transfer of shares without assigning any reason therefor and they may also decline to register any share on which the Company has a lien.

MANAGEMENT.

Subject to the supervision and control of the Directors the general management of the affairs of the Company will be in the hands of Messrs. A. V. Thomas & Co., (India) Ltd., who will act as Managing Agents of the Company for a period of twenty years in accordance with the terms of a Managing Agency Agreement between the said Messrs. A. V. Thomas & Co. (India) Ltd., and the Company.

The following are the clauses in the Articles of Association of the Company relating to the remuneration of the Managing Agents.

106. The said Managing Agents shall be entitled, at the time of the incorporation of this Company, to an office allowance of Rs. 2000/- per mensem and thereafter the said office allowance of Rs. 2000/- shall be progressively increased by Rs. 100 per annum for every increase of Rs. 1,00,000 of Issued Capital or debentures issued either at par or premium besides a remuneration of 5% of annual net profits of the Company, the net profits being calculated in accordance with the provision thereto in the Indian Companies' Act of 1913. They shall also be paid a commission on the sales and purchases of the Company as the Company may, in their discretion resolve upon from time to time.

108. All expenses incurred by the said Managing Agents such as Head Office rent and lighting and Head Office establishment, the rent and lighting or establishment of any Branch Office or Offices of the Company wheresoever situated, the salaries and remuneration of any Managers, Secretaries, Inspectors, Assistants, Clerks, or servants that may be employed for the work of the Company either at the Office of the Managing Agents, or any Branch Office or Offices of the Company or of the Managing Agents, *actual expenses subject* to audit incurred in regard to Directors' Fees, Directors' and Managing Agents' travelling expenses, stationery auditing of accounts including test audits and general charges or such items as legal expenses, printing, advertising, postages, telegrams, telephone, stamps, and other miscellaneous charges by the Managing Agents in connection with the business of the Company shall be reimburbed by the Company.

INSPECTION OF DOCUMENTS.

Copies of the following documents are open to inspection during regular office Hours at the Registered Office of the Company:—

1. Memorandum and Articles of Association.
2. Agreement dated 16th April 1943 between Mr. S. Veeriah Reddiar and Messrs. James Stanes, N. J. Stanes and J. Vernede, Proprietors of Sutton Estate for the purchase of Sutton Estate.
3. Agreement dated 15th April 1943 entered into between the Proprietors of Moutere Estate and Mr. S. Veeriah Reddiar for the purchase of Moutere Estate.
4. Agreement dated 16th May 1943 entered into between Mr. S. Veeriah Reddiar and the Company.
5. Agreement dated 14th May 1943 entered into between Mr. A. V. Thomas and the Katary Nilgiri Tea Estates Ltd., Proprietors of Katary Bhawani Estates for the purchase of these Estates.
6. Agreement dated 16th May 1943 entered into between Mr. A. V. Thomas and this Company.
7. Managing Agency Agreement dated 16th May 1943.

GENERAL.

Applications for shares are to be made in the attached form and forwarded with a remittance of the amount payable to the Company directly at Coimbatore or Bombay or through the Company's Bankers or through Brokers.

Directors reserve to themselves the right to reject any application without assigning reasons therefor. Where no allotment is made the deposit will be returned and where the number of shares allotted is less than the number of shares applied for, the surplus amount will be refunded to the applicant from the Registered Office of the Company or by the Company's Bankers.

Consent of the Central Government has been obtained to the issue under Defence of India Rule 94A. It must be distinctly understood that in giving this consent, the Government of India do not undertake any responsibility for the financial soundness of any schemes or for the correctness of any of the statements made or opinions expressed with regard to them.

Copies of the Prospectus and application forms can be had from:

The Registered Office of the Company, Coimbatore.
The Company's Bankers, Brokers and Legal Advisers,
The offices of the Managing Agents at Coimbatore, Madras, Cochin and Calicut.

The temporary receiving office of the Company at Ramnarain Sons Ltd., Imperial Bank Buildings, Bank Street, Fort, Bombay.

fugitive princess, and the results may well be noted in Outer Mongolia which is under Soviet control. Unity and nationality appear remote and difficult ideals, but disgust with the Japanese may create a Mongol State, and China's friendship with Russia may take on a new significance when inner and outer Mongolia are not divided.

British Banks' Service

The financial world will be excited to hear that the Midland Bank alone has sent 7,000 men to the colours. Of these, nearly 6,000 were on the permanent staff. The net result as Mr. McKenna told the shareholders at the end of January is that the total staff has dropped from about 14,000 to 12,300. A further reduction in the Bank's manpower, making in all 15 percent from the pre-war total, is to be brought about. The Kennet Committee reported that banks had reduced staffs and saved labour. Mr. McKenna's figures throw light on the reduction voluntarily effected by the biggest British Bank. The banks save labour for others too as Mr. McKenna explained. The clothes coupons go through the bank which handles traders accounts and check coupons and transfers vouchers. The shopkeeper is saved the trouble, and only at the final, retail stage is the coupon currency actually in circulation. The Chairman of the Midland Bank emphasised also the point that the money side of the nation's business is the same. As he pointed out 'the enormous volume of work spread over millions of customers and covering an annual turnover of tens of thousands of millions of pounds is rendered unnecessary by the banking machinery, and the use of cheques.' Efficiency and cheapness were the advantages claimed for the banking service by Mr. Rupert Beckett. State banking would not be easier, more efficient or cheaper than present-day banking in his opinion. A further point made by Mr. Beckett was that 'credit created by Government operations came back to the banks in the form of new deposits and whether placed on current account or deposit account, the Banks had either to pay in interest or in 'services'. The phenomenon of 'costless credit' for them simply did not exist. The various Government securities held as assets by the banks earned interest ranging from 1 percent for short-term. The Government and not banks was naturally the arbiter of the rate paid'. These facts were cited against the occasional pleas for nationalisation. Mr. Beckett's main objection was that there is no monopoly. There were eight large banks and a considerable number of smaller ones directly competing with each other for business, and in addition, the Post Office and other savings banks, building societies etc. Surely a monopoly could command its own terms of business but he had yet to hear of any British bank able to act in such a dictatorial fasion. He observed that the net profits of the Banks were indeed appreciably lower than they were in pre-war years notwithstanding the fact that they were handling a much greater volume of deposits, no charge of excessive wartime profits could be sustained. The statement is strengthened by Lord Wardington's announcement that Lloyds Bank's net profit at £1,364,081 for 1942 if better than that of 1941 is less than what it was in 1940 and still less than in 1939. Lloyds Bank has also provided a large part of its staff for the Forces. The Bank released 5,003 men and women of the permanent staff and had closed 424 branches and sub-branches. Lord Wardington added that apart from the numbers mentioned, Lloyds had engaged 13,000 temporary staff since the commencement of the war 6,000 of whom left service to join the armed forces

THE NEW ECONOMICS

VII

The previous articles in this series attempted to single out the factors that will shape national economic policies in the post-war period. These factors, let me recapitulate here, are firstly, a new concept of economic value as something of which the subjective choice of the social will is an important element, secondly, a new understanding of the nature of capital and of the essence of the process of capital creation, and thirdly, a new attitude to the question of economic relations with other nations. These three factors I contend, will determine national policies in the first instance, and indirectly the scope and purpose of economic policies which may be called international. In regard to international policies, it is necessary to bear in mind that, in one view, they have to be regarded as the resultant of diverse national policies, and in another, as a factor which, along with other factors, shapes national policy. This is not to be dismissed as a kind of tactics in an academic attack on the problem. The distinction is real even in a very practical view of possible developments in the post-war period. No nation will be in a position to determine its policies without reference to the rest of the world. The authors of a national economic policy will perforce have to be clear in their mind what demands they will make on other nations in the interest of their own and what conclusions they can make or may be compelled to make to them, with or without immediate compensation. They will have to distinguish between those parts of the national economic policy in which they cannot, and will not, make any modifications and those in which proposals for changes may be considered on their merits. International economic policies will thus depend on the scope for such a spirit of accommodation and the strength of such a spirit as exhibited by the various nations. But once they are formulated and are backed by the more powerful nations, they tend to become a factor by themselves in determining the nature of national economic policies. This phenomenon is already familiar in the restriction agreements regarding various commodities like tea, rubber, wheat and sugar.

* * * *

It is obvious that in relation to these international policies, the nations of the world are differently placed. While the U.S.A., Great Britain and Russia can not only conceive of international policies from the standpoint of the requirements of their own national policies but also force them on others, countries like India will have to work their policies within spheres de-limited by international policies of others' making. This constitutes a good reason for speculating on the nature of international economic policies before we attempt to examine the progressive elements in national policies. The importance of international economic policies to national is not derived wholly from their restrictive character. For, national policies are to a large extent, dependent on international policies. In the sphere of finance, exchange and currency and credit, this dependance is obvious. But there is a special importance attaching to the policies of the advanced industrial nations in respect of capital movements and of investment. And, one may be sure, that it is through their power to send or withhold capital goods that the Powers will try to secure something like international sanction for policies which are conceived of primarily in their own interest.

* * * *

An undeveloped country would need to assure itself of the import of machinery of the requisite types and on an adequate scale, before it can look forward to the success of any far-reaching national economic plan. And the industrial nations which manufacture such machinery can, and will, stipulate the conditions on which they will export such machinery. It is not, of course, easy for them either to clarify in their own minds the terms on which such exports can be allowed, or to enforce such terms on the buyers. For, generally speaking, export of machinery has the effect of bringing into existence another competitor or helping former markets to meet their own needs. Even within one country, the interests of the various industries might be discordant, the exports of one industry may menace the future prospects of another. Export of textile machinery from Great Britain is an obvious instance of this. But it is not always that such orders for machinery can be declined with a view to preserve markets or minimise competition. When the great Powers sit together to give shape to their ideas on international economic policies, each will find itself in a series of such dilemmas. Their interests will by no means be complementary; and while lip-homage will be paid to the ideal of free trade, there will be attempts to change the rules of the game in one's own interest. But, as I have said already, once the great Powers agree on certain principles and the manner of their application, they will begin to have their restrictive effect on the freedom of action of the weaker nations.

* * * *

Let us try and see what these international policies will probably be like. I am inclined to think that the work of the International Food Conference will prove to be the starting point of the formulation of international eeconomic policies. If it should prove so, it would be the best thing that can happen to world economy. For, it is only when the nations sit down to consider how adequacy of food can be en-

LAC-PLASTIC
Moulding powder

- Manufactured by Lac Products Ltd., Namkum, Ranchi.
- Formulated under the direction of Dr. H. K. Sen, M.A., P.R.S. (Cal.), D.I.C., D.Sc. (Lond.), F.N.I., Director, The Indian Lac Research Institute, Namkum.

sured for all the peoples of the world, that they can realise how they have been messing up the problems of world economy, how they have been giving an exaggerated importance to free trade in any scheme of economic reconstruction and how lop-sided is the structure of world economy considered as one. People in the advanced industrial nations are apt to think of poverty as an incident of cyclical unemployment and as lack of some of the comforts of life, rather than want of avenues of work and of even the barest necessaries of life. The problem of finding food for all is the problem of ensuring the production of food on an adequate scale, of providing work for all and bringing about that interchange of goods and services which will leave sufficient purchasing power in the hands of everyone to enable one to meet fully one's requirements of food. Food cannot be found for the entire population of the world on the basis of universal charity. If the problem is to be solved, not only all the technical problems relating to the increase in food supply, but also the problems of division of labour, national and international, have to be solved. Since the problem of international division of labour has always bristled with innumerable difficulties, the approach to it through the problem of adequacy of local productive activity may well prove the way to success.

* * * *

That, perhaps, can be no more than a hope at this stage. For, if the significance of freedom from want is understood, probably the nations which are infected with marketphobia will combine to torpedo the international food conference. It is never prudent to bank on the success of international conferences professing lofty and laudable ideas. It is well, therefore, to base our speculation about the future on the assumption that, in the international conferences of the post-war period, the nations of the world will continue their policies of self-aggrandisement. These policies will be shaped partly by the former commitments of each nation in this respect and partly by the need to exhibit an awareness of the more arresting problems of the post-war period. Obviously, much will depend on the shifts in the balance of power and influence as amongst the United Nations after victory is won. The United States of America is still to give definite indications of the practical economic policies she will advocate in the international sphere. As for Great Britain, it will be nearer the truth to say that she is in two minds on this question. While, on the one hand, there is general recognition that she has no longer a monopoly of the advantages in free competition, there is also the feeling that, without free trade, she can have neither the sources of food and raw materials nor the markets for her manufactured production. As if this conflict is not enough, Britain has also her ambitions in respect of foreign investments. The alarming decline in foreign investments in the course of the war makes it all the more imperative that Britain should fight for and secure her share in the vast programme of development of backward nations which will follow the war, thanks to American inspiration. Whether Britain's relations with the rest of the world would be such as to leave a large surplus in her balance of payments available for investments in foreign countries is more than doubtful. But, as I have indicated at an earlier stage, Britain's capacity to produce the capital goods, which undeveloped countries need so badly, may enable her to claim that the change in her national wealth and income by no means disqualifies her for taking equal rank with the U.S.A. in the development of the backward countries.

* * * *

As for the other two chief members of the United Nations, Soviet Russia and China, the latter's position is only politically different from that of India. The improvement which she has been able to effect during the course of the war in her political and economic relations with Great Britain and the U.S.A. will enable her to foil efforts, open or veiled, to exploit her economically. Among undeveloped countries, therefore, China, probably stands alone in her ability, by virtue of her role in this war, to ensure the helpfulness of international policies for her national development. Little is known of Soviet Russia's foreign policy in the economic sphere, though it is only to be expected that her primary interest after the war would be to take up the broken trends of her pre-war industrial development and the repair of war ravages at the same time.

* * * * *

What then can we make of the shape of things to come in the sphere of world economy and international trade? For my part, I am of the opinion that the financial upshot of the international food conference might be a scheme for bringing about an increase in the output of foodstuffs in countries like India and China. And such an agreement will eventually lead to the provision on a large scale of vast quantities of agricultural implements by countries like America. It is more than doubtful whether the implications of such increase in food production will be followed in the sphere of international trade. It will be a long time before economic thought on the question of international trade will outgrow the habit of making a parrot-cry of free trade and lead to a businesslike determination of the basis of international division of labour. Till that stage arrives, the powerful nations will combine to discountenance extreme measures of economic nationalism and to force upon the weaker nations the dubious benefits of international investment. The antedote to these fallacious policies and ways of thought lies partly in the weaker nations' will to self-development and partly in the need of the powerful nations to give priority to repair of war damage over grandiose projects of winning foreign markets.

* * * *

Such, indeed, is the nature of the restrictions within which the majority of nations will have to formulate and work their national economic policies. In concrete terms, these restrictions may be interpreted firstly, as an obligation to restore the import trade to its prewar dimensions; secondly, to allow that import trade to grow in some proportion to the increase in internal business activity; and thirdly, to partake of the reconstruction loans that will be floated with as much political as economic significance. It may be said, however, that whatever the need of these international economic policies, backward nations, which are politically independent and have a fair measure of economic wisdom left in their ruling classes, will be able to reorientate their economic policies to new ideas in economics and improve the material prosperity of their people. It is only in the case of India that any attempt to peer into the future must be pronounced to be foolhardy. The uncertainty that hangs over her politics is naturally intensified when we consider her economic problems. But to no country has the change in the fundamental concepts of economics more meaning and significance than to India. It is in India that there is the largest scope for the realisation of economic values with a large element of social subjectivity. But, alas, society in India lacks volition. And where there is no volition, there is no will.

* * * * *

A fair-sized, planting issue is almost unusual, and when the shares are only of Rs. 5 each, one must expect that the market will get a fair share of the capital of the Neelamalai Tea & Coffee Estates, Limited. The combination of tea and coffee certainly makes for stability, and it may be noted here that coffee prospects are vastly better than in 1942. The present issue is launched by Messrs. A. V. Thomas & Co. and the name carries its own recommendation with it as the Thomas Group has a large following outside Madras and the present issue is backed by several Bombay brokers. The Company is formed to acquire properties already in bearing, and the company will have from its inception a large estate with a guarantee of better prices while the working capital will come out of the proposed issue. The new company's advantages are not limited to high yields on well-managed estates in the best planting district of the south but to the acquisition of tea factories with machinery in working condition. What should however impress the investor at present is the record of the A. V. Thomas group. It is no mean achievement to have sponsored and run a dozen plantation companies in years covering the depression and most mixed years and it is easy to add that most internal economies are available for the new company. Detailed estimates as to costs and profits appear in the prospectus published today but many will note at once that the new planting company has the support of two leading Bombay businessmen. As the Company is incorporated in India, the question of State income-tax etc, does not arise and the Neelamalai Company's shares will be different from those of Mysore or Travancore Companies. This should be a distinct advantage to the shareholders in India in the future. As for the plantation industry's outlook, it is more than fair, and the impressive performance of Highland Produce and other companies may long sustain the faith of investors in a company that takes over well-managed properties at a fair valuation, and will earn profits based on a liberal estimate of costs and a moderate valuation of produce. To say more would appear unnecessary, as the chance to get shares in a sound plantation company at par does not occur often, and the Directors and friends have indicated their confidence in the flotation in the approved manner by taking a very considerable number of both ordinary and preference shares in the Company.

'EAVESDROPPER'

HABIB BANK LTD.
BOMBAY

Announcement

New Issue of 3% Preference Shares for Rs. 50,00,000 has been over-subscribed. Now the capital of the Bank is as under :-

Authorised Capital ...	Rs. 2,00,00,000
Issued and Subscribed ...	Rs. 1,00,00,000
Paid-up Capital	Rs. 50,00,000
Reserve Fund	Rs. 1,00,000
Deposits as on 31/12/42 (of two branches)	Rs. 2,37,72,000

AN APPEAL
to all consumers of
PETROLEUM PRODUCTS

The offensive phase of the war has begun. It brings with it the problem of supplying ever-increasing quantities of petroleum products to the Services whilst meeting in addition essential civil needs.

Without containers — tins, cans, drums and barrels — *the distribution of oil is impossible.* But the basic material of their manufacture is *steel which to-day is needed first and foremost* for the production of ships, tanks, guns, *ammunition and other sinews of war.*

Therefore the full co-operation of consumers is essential if the limited supply of containers still available to the Oil Industry is to give the service now required of it.

BURMAH-SHELL urges all users of petroleum products to protect petrol and oil containers from RUST, DAMAGE and DIRT and

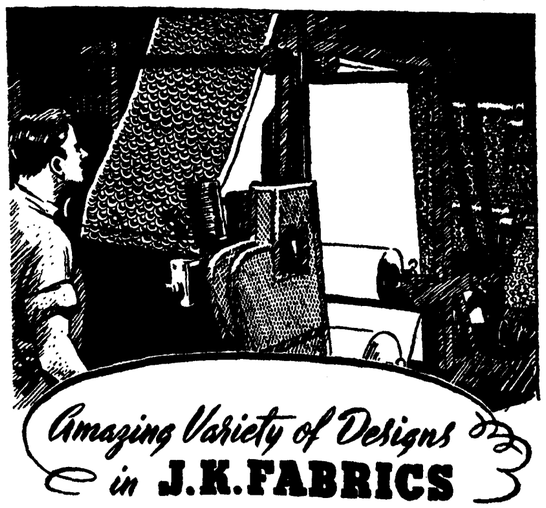
or to take up other war work. Their pre-war number of clerical male staff (excluding the special Army Agency Branch at Pall Mall) was 10,077 and of those only 4,600 were left in the Bank and nearly 200 of those left were awaiting a call-up to the Forces.

Bengal Central Bank Limited.

The Bengal Central Bank has achieved even greater success in 1942 than in 1941 and the achievements were summed up for its shareholders and clients by Mr. N. R. Sarker at the 24th Annual Meeting. The decision to increase the Bank's capital is justified by the balance-sheet changes which were explained admirably by the Chairman who stated that Rs. 11 lakhs worth of shares have been taken up and in the year of Jubilee the Bank's subscribed capital should increase further since total deposits stand at Rs. 2.83 crores at present. Permission to issue more new shares has been sought, and the record of 1942 showing an increase in profits and resources warrants complete confidence as to the brilliant future of the oldest Bengalee scheduled bank. Deposits increased last year by Rs. 71 lakhs to stand at Rs. 2.21 crores in the balance-sheet as on December 31. Paid-up capital rose by over Rs. 2 lakhs and the Reserve Fund to Rs. 4 lakhs. The dividend of 10 per cent payable on the ten-rupee shares puts them in a special class, as they are not new shares, but one in a successful and well-established bank, distinguishable easily from those of new flotations in many ways. In the balance-sheet published to-day for information, cash etc., totalling Rs. 57.45 lakhs is equal to 26 per cent of total deposits and investments at Rs. 87.09 lakhs are equal to 39 per cent of deposits. The degree of liquidity shown in the latest balance-sheet may claim more than usual attention in view of Mr. Sarker's remarks as to the growth of profits. The Board has been reinforced by Mr. B. N. Chaturvedi, President of the Calcutta Stock Exchange. The exceptional protection enjoyed by depositors is illustrated by the cash ratio of 26 per cent the proportion of advances totalling Rs. 89.98 lakhs and investments Rs. 87.09 lakhs to total deposits of Rs. 220.73 lakhs. The acquisition of a site for suitable premises is not the least important of the events of the year. The strain of the opening months did not hamper usual expansion of activity and the recently opened City branch should add to the usefulness of the Bank. The Board record their satisfaction with the results described in the Chairman's speech at length. Mr. Sarker's views on banking development in the war period should command attention, and his plea for hastening slowly is entitled to special consideration. Those who look to the exceptional progress made by the Bengal Central Bank since 1940 under Mr. J. C. Das will appreciate the difference between the old and the new, and for those who recognise the efficiency and permanence of the service given by the Bengal Central Bank, the figures published today have special value. No bank in Bengal can claim the same rate of progress in the first stage of its re-organisation and the Bengal Central's achievement in three years fulfills every test. It has more than stood the strain noted in December 1941 and succeeded also in getting its full share of the prosperity vouchsafed to banks in the war period. The figures now available indicate the magnitude of the meritorious achievement. Expansion has been secured without branch extension and the Bengal Central is represented by 4 branches in Bihar only.



A corrective

A corrective, rather than a rejoinder, has been offered by an eminent reader of "Indian Finance' in Bombay to the views expressed in the article on "End of Cotton Futures" in our issue of May 29. He urges that the time required by a distributing market like Bombay for adjusting itself to conditions created by regulatory official action is generally underestimated and that the premium on short sales which the Government action led to has been overlooked. On the question of the hardships caused by official measures, the views of the trade are entitled to special consideration and respect and the ordinary methods of judging popularity and unpopularity are not quite valid. In view of the shortage of world cotton, apprehensions of which were expressed by Mr. W. L. Clayton at Hot Springs, the criteria for judging the proper level of prices for Indian cotton need to be carefully formulated. We hope to return to this question in a later issue.

RAIL PASSENGERS

Despatch all large packages of luggage in the brake-van. Remove all old labels therefrom and fix fresh ones, giving name, address and destination before you start on a journey. Preferably, each box, bedding etc., should contain inside, on a separate piece of paper, information regarding your name, address and destination. If you do not do this, your luggage is liable to be lost.

YOU HAVE BEEN WARNED

Amazing Variety of Designs in **J.K. FABRICS**

Made from the best-selected cotton with up-to-date equipment, special machinery and improved processes of manufacture, J. K. Fabrics have set new high standards in texture and quality, and are available in a most attractive range of designs and colours. They are 15% to 20% more durable.

You must examine our printed calicos, longcloth, linens, shirtings, sarees, tapestries, cotton canvas, etc. You will be surprised at the outstanding value they offer.

(*From Our Correspondent*).

Bombay, June 9.

THE Press Conference held here on Saturday by Mr. M. S. A. Hydari, Secretary of the six weeks old Department of Industries and Civil Supplies throws further light on the administrative details of the comprehensive control of prices, production and distribution of cotton cloth and yarn on which the Department has so boldly embarked. Mr. Hydari's pronouncement regarding the creation of an Advisory Board of textile interests with the largest measure of autonomy should be considered the vital part of the control scheme, inasmuch as it ensures the completest co-operation of the interests concerned, the lack of which has been responsible for control schemes going wrong in the past. Residuary powers will be retained by the Government to ensure that the control measures achieve the essential object of making available to the people cloth at cheap rates. Mr. Hydari's boast that the agreement between the cotton textile interests and the Government is a triumph of mutual understanding should excite little wonder since the scheme, in its broad outlines, appears to be as nearly perfect as any scheme of control can be. The scheme envisages protection for all interests concerned and does not seek to benefit one section of the cotton textile industry at th expense of the other. If the price of raw cotton falls below a fair level, the Government have offered to stabilise the market by buying on their own account or, if prices go too high, by requisitioning at the maximum basic price of Rs. 550. Millowners will be protected by control over the prices and distribution of fuel, mill stores and other essential supplies, and care will be taken to ensure for them a just remuneration to enable them to maintain dividends at a fair level. No direct control will be exercised over exports of textiles but the advisory board will have a voice in deciding the allowable quantum of exports. A special committee will be appointed to investigate possibilities of reduction in the price of cloth. Mr. Hydari has no doubts about substantial reduction resulting from the operation of control measures though, as Mr. Hydari points out, the extent of such reduction cannot be forecast with any accuracy at this stage. Under the new scheme, hundred percent of production will be brought under control. As Sir Vithal Chandavarkar who was present at the Conference pointed out, when the new scheme came into operation, no mill-owner will be able to sell a yard of cloth except at the rate fixed by the machinery of control. One is disposed to think that Mr. Hydari's optimism regarding the success of control is fully justified.

Mr. I. H. Taunton, Adviser to the Governor, Mr. D. R. Pradhan, *Chairman of the* National Service Labour Tribunal, Mr. S. V. Joshi, Mr. Ziauddin Ahmed, Mr. A. Hakim, Lt. Saunders of the Royal Indian Navy and many leading lights of Bombay were present at a farwell party arranged in honour of the eighth batch of "Bevin Boys" at Green's on Sunday. Mr. Taunton wished the Boys godspeed and a safe return to India after a profitable time in England. He said that the "Bevin Boys" would come into the picture when the United Nations, after successful prosecution of the war in Europe, turned their attention to Japan and embarked on a vigorous offensive. At that time, India would become a still bigger supply base for the Allied arms and production would have to be stepped up. Mr. A. Hakim thanked the Government on behalf of the "Bevin Boys" and referred to their awareness of the trust placed in them. Each trainee had been selected for a special trade and the industrial progress of the country was sure to benefit from the knowledge they were to bring back from the United Kingdom. Besides, said Mr. Hakim, the "Bevin Boys" did not fail to appreciate that the Bevin scheme had placed within their reach an opportunity that was open in the past only to the wealthy few.

Dr. B. R. Ambedkar, Labour Member of the Government of India is known to be very keen on introducing the Sickness Insurance Bill in the Central Legislature with all expedition. The scheme is said to be in process of preparation. The benefits sought to obtain for industrial workers under the scheme justify the assumption that an important piece of social legislation is in the making . Originally, it was suggested that only the employees of the cotton textile, jute textile and heavy engineering industries stood to gain from the scheme. It is now learnt that, owing to difficulties involved in defining these industries precisely, the probability is in favour of the scheme covering all textiles, engineering and mineral industries covered by the Factories Act. Indian States, willing to participate, will be included in the scheme. Prof. B. P. Adarkar, Officer on Special Duty, Sickness Insurance, has already circulated a questionnaire to all employers, provincial governments and labour unions. The two types of benefits envisaged are free medical attendance and cash payments during illness. Certain conditions to be fulfilled by workers, which alone will entitle them to these benefits, are being carefully worked out. A Central Sickness Insurance Fund will be established to which contributions in specified proportions will be made by both employers and employees. The Central and Provincial Governments' duty will be to guarantee the solvency of the Fund by making advances to the Fund in periods of deficits and getting back such advances in periods of surpluses. Information is to hand that agreement on this point has already been secured.

In a statement to the *Times of India*, Mr. Ramdas Kilachand, President of the Seeds Traders' Association said that the trade in groundnuts is afflicted with a feeling of frustration. In so far as the freezing order relates to groundnuts, he has pointed out, its practical effect has been to ban trading in futures, and the Association has taken steps for immediate liquidation of all open contracts at a rate fixed by the Association. Since there is no open interest of the traders to be liquidated and, unlike as in cotton, ready transactions and delivery contracts in groundnuts are not to be affected, this feeling of frustration is rather difficult to explain. It appears to one that it should be due partly to the lack of wide realisation by the trade that there is no obstacle to spot business and partly, to the unwillingness of the trade to be ruled by orders and Ordinances. In the case of linseed, difficulty has again cropped up in the matter of squaring up open transactions as there is no general agreement in the trade with regard to the rate of Rs. 12-4 fixed by the Marwari Chamber of commerce. The Hon. Sir Suleman Cassum Mitha, in a telegram to the Finance Member has denounced the rate as arbitrary and one that seeks to accommodate speculators at the expense of *bona fide* merchants. He has appealed to the Finance Member to intervene and fix the rate at Rs. 11 which is the more reasonable.

Mr. A. V. Thakkar, President of the Orissa Famine Relief Committee has issued an appeal to the people of Bombay, seeking generous contributions to the Orissa Relief Fund. The picture of actual distress painted by Mr. A. V. Thakkar, that of young children being sold by parents and of wives being deserted, is touching in the extreme, and will certainly stir the public here who have never failed to respond to a deserving cause. The Bombay Province has its own famine problem in the Bijapur District and the adjacent areas and relief measures adopted by the Government and the public have not proved adequate, though experience of suffering in one's neighbourhood should only serve as a further argument for Bombay people giving all the help that they can. It has to be remarked that in the case of a tiny Subvention province like Orissa, the local Government with its limited resources is hardly able to handle a situation like this unless the provincial effort is reinforced by generous contributions from the Central Government. There cannot be a better occasion calling for contribution from the Central Government and such contribution has to be immediate, if hardship is to be mitigated. The setting in of the monsoon on the homeless and famine-stricken people with 80 per cent of its crop lost and over 26,700 head of cattle destroyed, not to speak of the lives lost by starvation, will have an effect that no human effort can repair.

For some time past, citizens had been distinctly uneasy about the ability of shopkeepers to supply the city's needs of sugar. This nervousness led, during the last few weeks to queues and in some cases to panicky buying. It is, therefore, with no small relief that the public received the announcement by the Government that as from Sunday, sugar will be included among the articles rationed. The ration is to consist of ten ounces of sugar per week for each adult. Unfortunately, the sugar ration does not err on the side of liberality, and householders will have to exercise the greatest care if they are not to feel the pinch. For instance, they may not use sugar with the same mental ease with which they can use cereals. People with a weakness for cakes and sweetmeats will have to await better times, and get through the period of short supply, deriving what pleasure they can from memories and hopes. Children will be the worst affected and the parents will have to learn to make more sacrifices or, at the very least, will have to make up for it by sweet temper. The only concession is that *gur* or *jaggery* is not affected by this rationing order. No special cards will be issued to the householder on account of sugar rationing. The householder will receive sugar at the rate of five ounces for every unit to which he is entitled on his present card and the coupons against which sugar has been issued will bear a mark indicative of the issue of sugar.

South India

(*From Our Correspondent*)

Madras, June 9.

THE President and members of the Southern India Chamber of Commerce met on Friday evening Dr. Nemenyi, Special Officer of the Government of India and discussed with him various subjects of financial and economic importance. It was represented by the Chamber that high prices were caused by increased currency and insufficient supply of goods. With reference to recent anti-inflationary measures, the Chamber took the view that the provisional assessment of E.P.T. would achieve little by way of reducing inflationary symptoms and that all the good it would serve would be to transfer money from a businessman's account to that of Government. The Chamber considered that the compulsory loan of 20 per cent by way of E.P.T. was a burden on posterity and a loan was an excessively high price for a Government to ask of private business. The restrictions on joint-stock company formation, limitation of bonuses and commissions to employees were all opposed by the Chamber, and reasons were advanced in support of their contentions. A suggestion by the Chamber that found favour with the touring expert was in reference to the withdrawal of paper currency to the extent of Rs. 300 crores. Adverting to the subject of the sterling balances, the Chamber suggested that they should be used for buying up foreign investments in India. The root of the trouble lay, the Chamber pointed out, in the Government's game of Blind Man's buff which consisted in accumulating sterling balances at one end of the world and paper currency at the other end. The Chamber claimed that Dr. Nemenyi's task of creating a "deflationary atmosphere in the midst of rank inflation and of collaring compulsory savings when there are millions of people in India not getting a square meal from year's end to year's end" would be easier of achievement, if the great handicap for savings, namely, the uncertainty about the limits to which the Government would, or would not, go in interfering with trade and industry were removed and confidence was created.

Dr. Nemenyi made note of all the suggestions and advice offered by the Chamber. He agreed with the Chamber that about 300 crores of paper currency should be withdrawn to create what he called a "deflationary atmosphere" and even unfolded a plan as to how it could be best achieved. His idea was that Rs. 150 crores could be withdrawn with the co-operation of the Indian States by means of Provisional Assessment Tax and another Rs. 150 crores by self-assessment of income-tax with surcharges. Dr. Nemenyi's view as to the utilisation of sterling balances is equally interesting, though it may not command the same measure of approval as his plan for withdrawal of paper currency. The United Kingdom, he averred, would be busy after the war with the reconstruction of her own factories and India's sterling balances then could be used for purchase of reconstruction machinery in any country.

Cyclonic storm of unprecedented intensity and heavy rain for five days which ended on May 20 have wrought serious havoc in the province. Madras city and South-East Madras generally as also a number of places in Chingleput and South Arcot districts experience unusual weather. It is learnt from the reports received by the Collector of Chingleput that, so far as the Chingleput District is concerned, heavy rainfall has been confined only to a few places and on the whole the rainfall has been beneficial to the district in that it has enabled ryots to raise short-term crops. There has no doubt been some damage in certain places, especially in Conjeevaram and Chingleput taluks, and some damage to groundnut crops and betel leaf plants in Maduranthakam taluk. But it is feared that the same cannot be said of other districts where damage is expected to be out of all proportion to any possible benefit that the rainfall might bring in its wake.

The Budget of the Government of Mysore for 1943-44 fully upholds the reputation of the State for careful budgetting and prudent finance. It was with pride that the Acting Dewan, Rajamantrapravina K. V. Anantaraman announced that the revenue is expected to exceed the six-crore mark for the first time, so soon after passing the five-crore mark which was achieved only last year. This upward trend in revenue is praiseworthy when it is remembered that it has been achieved with very little increase in new taxation. The excise duty on tobacco and vegetable products, following the practice in British India and a small increase in the rate of super-tax on joint-stock companies are the only measures announced by way of new taxation. The progressive policy pursued by the Mysore Government with regard to industries has sometimes been subject to criticism, but it is now vindicated by the Mysore Iron and Steel Works Ltd., which by contributing for the first time since its establishment a net sum of Rs. 5.31 lakhs to the general revenues after meeting all obligations to the Depreciation Fund, has proved a real asset.

The expenditure side reveals to an even greater extent the progressive outlook of the Government. A sum of Rs. 40 lakhs is allocated to Irrigation Development Fund for this year and Rs. 20 lakhs for next year. The policy of restoring and keeping in good repair thousands of major and minor tanks is being vigorously pursued, what time possibilities are being explored for instituting new irrigation projects involving a total outlay of Rs. 84 lakhs. Rural development, plans for sericulture, health and education have received increased provisions. Primary

N.W.R. SUBORDINATE SERVICE COMMISSION LAHORE.

Applications are invited from Anglo-Indian & Domiciled European candidates only for appointment as Assistant Mistresses in St. Andrews School, Lahore. There are two permanent vacncies, but appointments will be made on a temporary basis during the war. Applications must be made on the prescribed form which is available at a cost of Re. 1/- from Station Superintendents/Masters of large stations on N.W. Railway. 1916

Qualifications :—Trained and certificated Mistress from one of the following Institutions :—

(i) All Saints' College, Nainital,
(ii) St. Bedes' Colleges, Simla,
(iii) St. Dennys' College, Murree,
(iv) St. Marys' College, Poona.

Candidates from other Institutions may also be considered if the Commission is satisfied that the Institution is of a proper standing and empowered to train and certify Mistresses. The Commission will be the sole judge of this. Preference will be given to one who has had a Kindergarten training and experience of teaching in a Kindergarten.

Pay :—Rs. 120-5-150 plus dearness allowance admissible under the rules. Grant of a higher initial rate of pay may be considered according to qualifications in a specially deserving case.

Age limit :—Above 18 years on 28-6-1943. Applications on the prescribed from together with attested copies of testimonials should reach the Chairman on or before 16-6-1943.

A regular glass of sparkling Andrews is not only the most pleasant and refreshing of health drinks but ensures the thorough cleansing of the system which is the soundest basis of fitness of body and brain. Inner cleanliness is even more important than outer cleanliness and countless thousands of people everywhere make sure of healthy regularity by taking their glass of Andrews as often as they need it.

FIRST.. Andrews cleans and refreshes the mouth and tongue.

NEXT.. Andrews settles the stomach and corrects acidity.

THEN.. Andrews tones up the liver and checks biliousness.

FINALLY.. To complete your Inner Cleanliness, Andrews gently clears the bowels. It sweeps away trouble-making poisons, corrects Constipation, purifies and cools the blood.

For Inner Cleanliness be regular with your

ANDREWS LIVER SALT

Health Drink — Tonic Laxative

Jute and Jute Manufactures

(By Our Jute Correspondent)

Calcutta, June 10.

SHIPMENTS of Jute manufactures from mills during May must have been actually better than was anticipated, for the return of Stocks of goods in godowns at the end of May shows an increase of only 1393 tons over the April figure. Commercial goods show an increase in both Hessians, 968 tons or 13 lakhs yards, and Sackings, 3,725 tons or 113 lakhs yards. On the other hand, all descriptions of Government goods held in stock show a decrease totalling 3,300 tons. The result is that, in the aggregate, hessian stocks are lower by 1,779 tons or 84 lakhs yards, while sacking goods are up by 3,172 tons or 99 lakhs yards. The total weight of stock held in godowns at the end of May amounted to over 265,000 tons of which just over 30 per cent was held on Government account. The great proportion of military goods are of course of hessian constructions and represent a larger tonnage than the total hessians held on commercial account.

The price to be paid for the last Government order has now been announced and it is actually higher than the U.S.A. ceiling rates, which gave some encouragement to bazar speculators' hope that these would have to be raised to come into line with current Calcutta quotations. Such expectations however have received a rude shock in the receipt of information from the largest burlap importers in the States that the U.S.A. Government has forbidden all further importation of hessians by importers after 7th June. The obvious presumption is that all future purchases will be made through official channels, and it may be taken for granted that the rates to be paid will not be adjusted to suit the views of the local bazar operators.

The whole situation seems to call urgently for some form of price regulation here. All sections are unduly inflated and some measure of deflation would undoubtedly make for more healthy conditions. At the current rates quoted for jute, mills cannot manufacture hessians, even at the current Calcutta quotations, except at a loss. It must be remembered that mill costs of production have been very materially enhanced in the last year or so by allowances to labour and by the provision of foodstuffs at controlled prices to the labour force. The cost of these enhancements amounts to between 25 and 33 per cent addition to the wages bill according to the scale of wages. In cost per ton it runs up to thirty rupees and over, and is still increasing. If therefore mills were to have to adjust their selling prices to the equivalent of the U.S.A. ceilings, say around Rs. 26-8 for eleven porters, and if Heavy goods rates were to be adjusted proportionately, bringing "B" Twills back to say Rs. 58, maximum rates would also have to be fixed for jute, which would yield the mills a reasonable profit, say 10 per cent, on their turnover. This would mean the reduction of the price of Middle grade jute to about Rs. 16 per maund, by no means an unprofitable price for the cultivator. A price in fact that he has only seen once in a blue moon before. And the present situation is such that the cultivator would actually get a larger proportion than usual of the Calcutta price. He is in a strong position from the supply point of view and thus well able to resist exploitation. Doubtless there would be a heart-rending howl from holders of jute goods on so-called investment account and also from self-appointed friends of the cultivator, at any suggestion to control prices in a downward direction. But it cannot be gainsaid that a much healhier atmosphere would be imbued into the markets if such measures of deflation as suggested above could be brought about. And it seems unlikely that mills will accept the prospect of working at a loss without doing something about it.

It is satisfactory to hear that the Railway authorities appear to be in earnest in their efforts to improve the present rate of carriage of jute to Calcutta from the mofussil, and they will receive all the help required from the trade, for everyone would be glad to see a more rapid movement of stock jute before the new crop begins to intrude upon the scene. One suggestion that might be tried, temporarily at least, is an increase in the proportion of waggons allotted to mills on the Western and Northern sections of the B. & A. Railway. As in normal circumstances the jute from the areas served by these sections goes predominantly to Balers of export jute, the proportion of waggons was fixed at 75 per cent to the bazar and 25 per cent to the mills. In present circumstances, export demand has been running predominantly on Daisee jute, most of which arrives by country boat, so a revision of the proportionate allotment to 50/50 bazar and mills would not seem to be unreasonable. Not a little of the white jute trade in pucca bales with mills has been induced by the desire to secure early delivery. Greater economy in handling would have been attained if all this jute had gone direct to Mills instead of through the medium of presshouses. Any fresh schemes for relieving the short stock position by improved rail facilities would of course have to be applied intelligently to be at all effective. Not in such manner as is reported to have occurred recently at an important station in West Bengal. 40 waggons were allotted to this station for the carriage of jute, the proportion laid down being 3 to 1, bazar and mills. That is, out of the 40 waggons, 30 would be loaded for the bazar and 10 for mills. As it happened, not more that 6 waggon loads of jute for the bazar were offered for carriage that day. According to the local reading of the standing instructions, that meant that only 2 waggons could be loaded for mills, though sufficient was offering to fill the whole of the available waggons. So only 8 waggons in all were loaded, and, believe it or not, 32 waggons were returned empty. Such crass stupidity would be almost incredible if it were not vouched for on reliable authority.

AMERICA'S HUGE ORDER FOR HESSIAN

Calcutta, Friday 3 p.m.

The markets have been thrown into confusion by the announcement of the purchase by the U.S.A. of 70 crores of hessian for delivery July to March, the price mentioned being Rs. 26 for 11 porters.

This announcement is accompanied by the information that maximum prices will be fixed for jute at Rs. 19, Rs. 17, Rs. 14 for Marwari Tops, Middles and Bottoms.

The Jute Mill Association Committee is still in session, and it is not known how this is to be arranged.

The quantity of 70 crores of yards is more than one year's average supply for the U.S.A. and much more than what the U.S.A. has been taking recently.

The effect on the hessian market was instantaneously bullish, raising the price from Rs. 27 to Rs. 28-12. On reaction, the price at the time of writing is Rs. 28-4.

In jute, all business is stopped as current price for Middles is Rs. 19-8 whereas the maximum price fixed is Rs. 17.

The Registration Sub-Committee of the I. J. M. A. has been rather handicapped in its efforts to improve the Register of Loose Jute Sellers by the necessity for paper economy precluding the issue of a revised version of the existing Register. They have however issued ceratin regulations, which if strictly applied, may do something to bring the book more into line with realities. Balers are to be restricted to one mark only, to be nominated by them from whatever number they may already have registered. Further, if a baler claims to be the owner of a business upcountry, he will only be recognised as owner if his trading name is the same at the agency as it is in Calcutta. Otherwise he will only be recognised as a commission agent. As such, he will be permitted to retain one registered mark for use in his commission business. Details of premises, their location and the names of the owners of the premises are to be furnished to eliminate the large number of agencies which appear in the register, but which in fact are not, and never have been worked by many of the entered firms. Proprietory or Supervised marks are not to be interfered with meantime, but particulars of the names of supervisors and their location, are to be furnished. "Televised" marks should thus be distinguishable from genuine "Supervised" marks. These regulations may be somewhat difficult to establish without the issue of a new Register, but they are certainly steps in the right direction towards improvement in the methods of registration.

There has been more interest showing in the Export Jute market, emanating almost entirely from Dundee, and mainly for Daisee, business in which has been recorded in Long Group from Rs. 95 up to Rs. 99-8, closing at Rs. 99. Short Group sales were reported from Rs. 105 to Rs. 109. A fair business was put through with Mills at the end of last week in Firsts at from Rs. 98 to Rs. 102, with sellers now at Rs. 101, and Lightnings on offer at Rs. 95. At the close business is reported in Cuttings at Rs. 51 for Mixing and Rs. 52 for N. C. Loose Jute has ruled dull and stagnant with very little reported. A small sale of New Crop District supervised was put through at Rs. 19-6 Mids and Rs. 16-6 Bots and some Jat Tossa Mids sold at Rs. 19-8. Crop reports are generally satisfactory with sufficient rain in all districts and the crop growing well.

The Fabrics section has again been subsisting almost solely on local bazar transactions with the usual fluctuations, 11 porters having moved from Rs. 27-13 down to Rs. 27-7, then to Rs. 28-5 and closing back at Rs. 27. "B" Twills have moved from Rs. 68 to Rs. 67-8 again. Sales for export include eleven porters for July/September at Rs. 27-11 and Rs. 27-8, 20 oz. Brans at Rs. 55 July, Cotton Packs at Rs. 127 ready, Liverpools at Rs. 73 June, and 6 x 8 Sugars at Rs. 78-8 June and at Rs. 79-8 July.

(*Continued from page 1026*)

education also has received more attention from the State so much so that, as the Acting Dewan pointed out, the expansion the State set out to achieve in four years looks like being completed in three.

The news that the Government have passed orders increasing from June 1, the quota of rice allotted to the Malabar District from 10,000 tons per month to 11,000 tons has caused little satisfaction among the population as the increase is utterly insufficient to cope with the situation. In Calicut, thousands of people can be seen forming queues around the retail shops every day, the majority among them returning home empty-handed. A regular feature in the evening at the Huzur offices is the arrival of *jathas* to wait on the authorities. The public have organised a committee for the establishment of Fair Prices Shops in the various wards of the town and to see that the available stock of rice is properly distributed. But the fundamental difficulty is in regard to stocks. In Ponnani taluk, scarcity became so acute that the District Collector, Mr. A. V. Verghese had to pass orders to wholesale rice merchants to despatch 5,000 bags of rice to Chowghat and 4,000 bags to Ponnani from their stock, over and above the quota allotted for that taluk.

The Southern India Chamber of Commerce made a representation to the Government complaining of the hardship caused to the tobacco trade by the embargo recently placed on the export of flue-cured tobacco. The Deputy Secretary to the Government of India in the Commerce Department furnished a prompt reply defending the embargo on the plea that the tobacco crop for 1942-43 was considerably less than originally anticipated on account of unforeseen damage to the crop. It is considered by the Government that the available quantity, even after including any stock carried over from previous years may be insufficient to meet the internal demand in the country which, it is pointed out, has been rising steadily. The Deputy Secretary has, however, assured the Chamber that the question of allowing the exports, as a special case, of outward consignments lying on the wharves and shut out by the embargo is under consideration of the Government of India. Dealers engaged in the export of flue-cured tobacco have no alternative but to accept the export restrictions.

(*Continued from page 1005*)

tive to the present inflationary forces will have been put into operation. With the arrangement of lease-lend in force on an impressive and earnest scale between Britain and America, the need for dollars for Britain is not as imperative to-day as it was, say, two years ago. It follows that the British Government need not continue the policy of appropriating India's dollars.

The exchange market has been steady; but business has been fitful and meagre.

Banks are sellers of T.T. at 5 31/32d., for London Ready to six months forward.

Banks have been buyers of three months D. A. bills on London at 1s. 6 9/32d., and four months at 1s. 6 11/32d.

Banks are buyers of T.T. New York Ready at Rs. 329¼.

Banks are sellers of T.T. New York Ready at Rs. 332¼.

Interbank call money is ¼ percent lenders.

One month to three months deposits are ¾ percent; and four months to six months 1 percent.

Mark All Packages Clearly

Illegible markings lead to misdespatch, exchanges en route and loss. The public are, therefore, requested in their own interests to mark all packages clearly in English with the Consignee's name, full address and destination station.

2. Articles such as Baskets of perishables, Metal rods, Tins, etc., which cannot be durably marked, should have leather, metal, wooden or stout cardboard labels bearing the required information securely attached to them.

JUTE

Calcutta, June 10.

The jute market has been dull and inactive generally and the temporary rise in hessian prices did not help jute; but in the week, some buying of pucca bales by mills has been reported. Loose jute has been steady but dull with rates unchanged. Supervised Jats were done at Rs. 19-6 for Middles and Battoms at Rs. 16. Shipment business has been small and the only business reported was in Dundee Daisee 2/3 at Rs 99-8 for July shipment. Buying by mills reported on Saturday last only raised the price of Firsts up to Rs. 102, but prices have not held, and the market has reverted to its former stagnation; and rates have again slid down. Up to the end of last week business was small and it is apparently getting smaller. Interest in new crop is fainter and in loose jute the only business done was for immediate delivery. Many recognise that mills' stock position has no bearing on price movements. There has been little fresh buying, and offers for sale have increased. The tone has been consistently easier and progress of the young crop in the jute districts (weeding has begun and river levels are rising) has evidently a depressing effect; while the hessian market is only occasionally steadier and can give little support.

JUTE MANUFACTURES

Calcutta, June 10.

The hessian market has been restrained and the temporary activity induced by sundry rumours has been of no advantage. On Saturday, the market turned steadier on Argentine developments. The revolution is a constructive development as the Allies might be favoured by Dr. Castillo's successor, and the bag famine might be taken note of in return. The subsequent events belied the optimistic view taken and the speculative interest revived only on rumours of a big order for Government order for sandbags. It is now known the order is small and the hessian wanted is negligible. The opening on every day has been great, and only on Tuesday, there was a rise in rates which have dropped, secondhand sellers have been more in evidence since last week, and inter-bazar business has not been able to restore the tone of the market. There was again a sharp drop in prices after the rise with 11 porters receding to Rs. 27-8 from Rs. 28-4. The bazar reacted on rumours that nothing over the U. S. ceiling could be had, and the familiar up and down movement extended to Heavy Goods. There is also a small improvement in the quotations for Heavy Goods this week, with Cornsacks rising from Rs. 67-8 on Saturday last to Rs. 68. 11 porters, the speculators favourite, is lower at Rs. 27-8 and 9 porters too is lower at Rs. 21-2. The irregular movements are reflected in the absence of any premium for near delivery and the market is getting thinner latterly. It should be easier after the ban on private imports into the U.S.A. Price control is to be worked by monopoly.

GOLD

Calcutta, June 10.

There has been a small drop in gold prices following the poor offtake noted in Bombay. London quotes 168sh per ounce as usual, but last Saturday's closing rate of Rs. 84 per tola in Bombay has shown that the rise following this ban on forward trading in the bullion market had been checked. This week has been marked by quieter conditions in Bombay. Gold has dropped to Rs. 82, and sovereigns which quoted about Rs. 60 last week, are now down to Rs. 57. The change in prices is a measure of the reversal of sentiment. The large buying, noted two weeks ago, has come to an end, and the more important effect is the closer correspondence between Bombay and Calcutta rates, though sovereigns are nearly two points higher per piece in Calcutta now.

SILVER

Calcutta, June 10.

Silver remains unchanged in London and New York for over a week and has suffered a decline. The rate for 100 tolas in Bombay has declined to Rs. 122-8; but the market has been steady. Calcutta quotes lower rates for silver with the usual premium for Burma refined for ready delivery. On Tuesday the Bombay market opened at Rs. 126 per 100 tolas, and the fall since, points to poorer offtake and better sentiment in the share market which claims more attention. A week ago, the price in Bombay was Rs. 128, indicative of a sharp recovery. There has been a steady fall thereafter and the price in Calcutta has also declined by Rs. 5 per 100 tolas. A further decline is not unlikely, in view of the upset in commodity markets, following prohibitory orders and the story of scarcity of silver in Britain which has had no effect on Bombay where the stock has increased and deliveries are falling off.

TEAS:

Calcutta, June 10.

The tea auctions in May which showed that prices were rising, particularly in the sales for internal consumption, now disclose an irregular tendency. Last Thursday an irregular and general decline of 4 to 8 annas was noted for black tea. Tea of indifferent quality or poorly packed, was difficult to sell, and only green tea met with good demand at satisfactory rates. At the next sale prices realised were again lower by 3 annas for ordinary sorts and 3 annas to 5 annas for the least attractive sorts. Dusts, however, fetched good prices and the few lots on offer registered a decline of only 1 anna to 1½ annas. Sales averages for the 1942-43 season show little or no increase in the case of export teas while average prices for tea sold for internal consumption, had been consistently rising in spite of a temporary break in the rise. The higher Quota, or any other reason for the larger quantities sold, such as the ban on private exports will continue to operate in 1942-43 as against 1941-42. The irregular trend at the recent auctions may seem surprising, but is perhaps supported by calculations as to a crop of over 550 million lbs. for a year.

PIECEGOODS

Calcutta, June 10.

The fall in cotton cloth and yarn prices has followed the announcement that the mill industry's working is to be regulated. Business in textiles has fallen off, and sales are held up by anticipation of lower prices. A general direction to liquidate stocks has produced no results as buyers have held off for over a week. Business in coarse cloths on a small scale does not keep the market going, and the big drop in mill goods prices in Bombay has forced on the market the problems of a minor slump. The general anti-inflation drive is not likely to help a recovery and new margins and methods may prove too much even for the black markets which threaten to develop in the wake of control.

OILSEEDS

Calcutta, June 10.

The crop forecasts issued this week are mildly bullish for winter oilseeds after the effect of the ban on futures has worn off. The groundnut and castorseed crops show an increase, but prices in both cases are high In the case of winter oilseeds grown generally as a mixed crop in Northern India only prices are up. The area cultivated under rape and mustard in 1942-43 is shown at 5.78 million acres against 6.2 million acres last year and the yield is 4 per cent lower at 1.04 million tons. The linseed crop of 1942-43 occupied 3.4 million acres against 3.44 million acres in 1941-42, while the outturn is placed at 411,000 tons against 361,000 tons in the official crop forecast. The firmness noted last month in linseed may wear off, in view of the crop figures, but linseed oil quotes higher and internal demand is more important than the export trade for linseed as also for other seeds to-day.

MARKETS ON THE MEND

THE revival of confidence has been again reflected in a general improvement in share prices. News of a big U. S. order for hessian assisted materially in the firming up of jute shares. If Bombay has been erratic Steel shares have been consistently supported and the disappearance of forward business there may promote a revival in textile shares. Steadiness in Calcutta should continue despite prompt profit-taking. Good features have developed recently in the coal section and iron and steel shares should show further improvement when the technical position is modified. There has been a general disinclination to follow every rise but clearing up of the outlook for hessian should promote buying of jute shares. Cotton mill shares have been in fair demand and revised estimates as to the effects of control of the textile industry claim attention. Changes in dividends are regarded as unlikely, and the decline in share values since May has influenced investment buying in all the markets. Sentiment in all the markets has clearly been influenced by the unexpectedly mild criticism of the new Ordinances, and once again, it is possible to predict gradual improvement. The influence of war news is latterly small, but the market may respond strongly to big news in the future. The major factor, however, is the increasing demand for sound investments, and the belief that TISCO dividends for 1942-43 will be the same as those of 1942, may help considerably in the revival forecast by many.

* * * *

The steady rise in tea shares is a reminder of the improved prospects for plantation production. Shares in Calcutta have risen to levels not recorded in the past and the tendency to talk up tea shares has not been checked by profit-taking. In the South tea and rubber shares have been equally popular, but last month's Ordinances has a disagreeable effect. But one must say that plantation companies are not subject to E. P. T. and the best of them gave a generous yield on the ordinary shares. Nothing has occurred to alter the fortunes of either rubber or tea and any setback in the U. S. synthetic rubber programme is favourable to Indian rubber. The recent drop in prices followed a steady rise which began last September, and the recovery in textiles may assist in restoring popularity. As the plantation industry is not really old, most companies are new, but the inherent advantage lies in low capitalisation per acre particularly in the case of companies floated before 1937. Shares are naturally grouped and the investment rating, as in Calcutta today, is based on the managing agency as much as the company's earnings record. That is one reason why the Neelamalai Tea and Coffee Co.'s shares should command unusual support, for the A. V. Thomas group as a whole is characteristic by progressive increase in earnings and the new issue has the further advantage of being fairly large. The A. V. Thomas rubber shares are always at a substantial premium, for profits per acre are inevitably high owing to the low capital cost and the group enjoys undeniable advantages in respect of management. The recent reaction must impress investors who are disinclined to pay large premiums and may extend rather than limit buying of shares which afford a larger return than any industrial at present.

* * * *

The Patrakola Tea Company, Limited has done exceptionally well during the period ending 31st December, 1942. The net profit before providing for taxation and other reserves is Rs. 20,48,419 against Rs. 14,12,143 for 1941. The reserve for taxation is substantially higher at Rs. 7,00,000 against Rs. 3,30,000 on the previous occasion. An additional sum of Rs. 2,00,000 has been transferred to contingencies reserve which the Directors intend to utilise for renewals and replacements of buildings, machinery, etc., after the conclusion of hostilities. The directors propose to pay a final dividend of 75 per cent on the Ordinary shares which together with the interim dividends come to 95 per cent for the year. The carry forward is slightly lower at as Rs. 5,97,473 against Rs. 6,59,958 brought in. The total crop for the year is 5,214,252 lbs. against 4,564,131 lbs. for 1941. The average price per lb. is also higher at annas 11 pies 11 against annas 10 pies 2 realised last year. The shares have strengthened after the notice appeared and the last marking at Rs. 1,195 indicates that shares afford a return of nearly 8 per cent tax free.

* * * *

The Saran Engineering Company, Limited is perhaps one of the few comparatively small companies that have been able to show slow but steady progress since the outbreak of the war. There has never been any spectacular increase in the yearly earnings and the directors have been following a quite generous dividend policy. Readers may recall the remarks last year that this Company was perhaps one of the few companies that had not benefited to any great extent from war conditions. The accounts of the Company for the year ended 31st March, 1943, again prove the statement. The net profit before providing for taxation and depreciation is Rs. 2,01,884 against Rs. 1,77,507 for 1941-42. The provision for taxation at Rs. 78,974 is substantially higher than the amount set aside on the previous occasion (Rs. 55,500). The charge for depreciation and transfer to Reserve Fund are unchanged at Rs. 20,000 and Rs. 25,000 respectively.

* * * *

While the directors have contributed Rs. 3,000 to War Purposes Fund there has been no allocation to Renewals and Improvements Reserve presumably owing to the non-utilisation of the amount set aside for this purpose last year. In spite of the increased allocation to taxation and without any pronounced increase in the net profit, the directors have raised the dividend from 18¾ per cent for 1941-42 to 25 per cent this year. The carry forward at Rs. 31,532 compares favourably with Rs. 28,622 brought in. Since the Company deals particularly with the requirements of sugar factories the prospects of the Company are directly related to the sugar industry's improved position and prospects.

* * * *

The accounts of the *Assam Match Company, Limited* for the year ended 31st December, 1942, show a net profit of Rs. 4,96,846 before providing for taxation, depreciation and other funds, and taking into credit a sum of Rs. 30,000 being excess of taxation provided in previous years as against Rs. 4,93,354 earned during the year ended 31st December, 1941. A sum of Rs. 3,05,000 has been set aside for taxation as against Rs. 3,00,000 provided last year for the same purposes. The amount provided for Depreciation Fund is slightly lower at Rs. 36,700, the amount provided for this purpose last year being Rs. 38,794. Thus it will be seen that the year 1942 has been as satisfactory as the previous year in spite of the war situation, and the directors have been able to maintain the dividend cum bonus at 13 per cent. The amount carried forward is slightly higher at Rs. 11,382 as against Rs. 11,236 brought in.

"WATCH DOG."

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, June 11.

A SUDDEN, sharp rise in the hessian market did not take the local stock exchange unawares, for a strong rally in jute shares marked late dealings on Thursday. There has been no excited upswing, but a gentle, wellspread rise after the irregular movements noted since Saturday last. The undertone in all sections is firmer, and a rise in Iron and Steel shares coincides with the improvement in jute shares to-day. The market for a week has been oppressed by lack of buying interest. Enquiry should revive speedily after the announcement that the Indian Jute Mills Association has got the big order and prices of raw jute are to be controlled so as to keep down the cost of manufactures. Anyway, a change in working hours may help jute shares and the uptrend in jute will keep all sections steadier than in the past week as firmer conditions in giltedged and bank shares betokened poor support for equities generally. Steel Corporation is, however, higher on the week and a small rise in Irons to Rs. 35-9 on Friday may go a long way. Indian Iron has been dull on most days around Rs. 35 and the highest price touched on Monday was Rs. 35-7.

The Government securities section is unchanged with 3½ per cent Paper at Rs. 94-2 and a small lot of 1945-55 was done at Rs. 107-6. Small lots of 3 per cent 1963-65 Loan Fund buyers at Rs. 95-10 to Rs. 95-13 and 3 per cent Government Paper Rs. 81. There was business in 4 per cent 1960-70 at Rs. 110-10 for a small lot.

Interest in Bank shares has been largely confined to Reserve Bank shares. A sharp rise raised the quotation to Rs. 124 after business was reported only last week at Rs. 115-8, but enquiry has quietened down. Business on a fair scale has been reported in Reserve Bank shares on rumours of higher dividend but sellers have appeared at every rise. Imperial Bank's big shares commanded usual support at Rs. 1,745.

There has been considerable interest in light railway shares of late. D. H. ordinary has been done at Rs. 60 and Shahdara Delhi-Saharanpur at Rs. 202½ to Rs. 205½ this week. A small lot of Hoshiarpur-Doab was absorbed at Rs. 108 and business reported included dealing isn Arrah-Sasaram (Rs. 72), Bankura-Damoodar at Rs. 93 and Barasat-Basirhat (Rs. 63,63-4). There has been little buying of Preference shares or Debentures, but jute preferences have been well held. Alkali and Chemical 5 per cent was as high at Rs. 127 and Allahabad Bank preference was quoted at Rs. 165 and D.-H. Railway at Rs. 104. Jute preference shares have been fully steady this week with Howrah "A" at Rs. 158½, Bally preference at Rs. 167, Hastings Rs. 146, Lawrence preference at Rs. 150 and Northbrook preference at Rs. 151. There was business in Belvedere preference at Rs. 171 to Rs. 173, Chitavalsah preference at Rs. 145 and Birla 7½ per cent taxable preference at Rs. 134.

Business in the mining group is limited to Consolidated Tin at Re. 1-7, Burma Corporation at Rs. 3, Indian Copper Rs. 2-8, Karanpura Development Rs. 12-9 and Rhodesia Copper at Re. 1-13. The last has been in good enquiry after a while owing to the rumoured hope of a dividend.

The Coal section has been firmer than in the past few weeks and transactions disclose sharp rises in the case of East Indian new up to Rs. 22-14 and Lakurka lately done up to Rs. 19-6. Bengal has recovered to Rs. 468 and Katras Jherria has been taken at Rs. 38. New Beerbhoom at Rs. 21-12 and New Manbhoom at Rs. 45-14 are prominent among the quotations received this week. Among the shares of smaller denomination Talcher has been quietly firm at Rs. 3-11.

On Friday, the jute share revival left Coals out and business in jutes alone broadened. Howrahs moved up to Rs. 53-4 and Anglo-India to Rs. 410. Champdany was taken at Rs. 219 and India was higher at Rs. 569. Considerable interest has been shown in Presidency around Rs. 7-4 in view of the redemption of the debentures and Rameshwara Jute too has excited market attention with buying noted up to Rs. 13-12 on most days. Dealings in Clive, Adamjee, Hooghly, National and Nuddea show that regular dividend payers do not lack support.

Cotton mill shares have been subdued and irregular, but the market certainly brightened up on Friday with Elgins rising to Rs. 75. New Victoria was a shade better at Rs. 9-13 and Cawnpore Textiles held fully at Rs. 14½. Business in small lots of Mahalaxmi showed no striking change in prices but Dunbar has been fairly steady around Rs. 295 on most days. Business in Muir Mills ordinary at Rs. 415 was noted (Rs. 403 for small lots) and Kesoram has been in request around Rs. 16-8 to Rs. 16-12.

In the Miscellaneous section Indian Iron has been more or less marking time and Steel Corporation has crossed the Rs. 27 mark only lately. Interbazar dealings kept the leaders down, and the engineering group is featureless except for the rise in Saran Engineering on the higher dividend. Marshalls at Rs. 3-8 and Kumardhubi at Rs. 8-10 have had more sellers rather than buyers but Jessop & Co., ordinary have been fairly well supported at Rs. 20-5 and Indian Standard Wagon has bid up to Rs. 714 and over. The jump in Calcutta Trams to Rs. 25-2 shows that the rise has not been halted suddenly. There has been small buying of B. I. C. ordinary up to Rs. 6-4 and Assam Saw up to Rs. 4-14. Bengal Aerating Gas and Midnapore Zemindary command more attention, but Calcutta Ice has eased off to Rs. 13-12 while Aluminium Corporation has been rather flat around Rs. 20.

In spite of the usual profit-taking after the sustained rise tea shares have been firmer than ever and latterly dealings in the big shares have increased and business in non-dividend payers has fallen off. It is a significant change despite the sharp rise in Dhunseri to Rs. 7. There has been business in the shares of Duncan Bros. and other groups and New Samanbagh has been in good enquiry up to Rs. 36-8. Dividend hopes stimulated much recent buying but the features undoubtedly have been Ranicherra at Rs. 26 and Roopacherra at Rs. 18-8. Among popular shares Tezpore and East India have been taken at over Rs. 16 but Namburnadi has latterly receded to Rs. 12 and Teloijan to Rs. 13-10 as against Rs. 14-4 on Friday last. Naga Hills has appreciated to Rs. 26-8 and Rutema has been crossed at Rs. 18-8 after business was noted at Rs. 19 and over on Friday. Of the market as a whole the undertone may be described as firmer but this cannot be said of sugar shares or paper shares. Sugar has been neglected and the market favourite U. P. sugar is dull at Rs. 22-14. Business on Wednesday showed a steadier feeling and Carews moved up to Rs. 18-1, Belsund was crossed at Rs. 11-1. Darbhanga was bid up to Rs. 21-8 and a small lot of Champaran was taken at Rs. 38. Among paper shares Titaghur Paper was rather quiet around Rs. 26 after the notice appeared Orient is down to Rs. 27-8, latterly and Bengal Paper was noted at Rs. 198. Mysore and Star hardened to Rs. 26-8 and Rs. 28-4 respectively and Sree Gopal has strengthened up to Rs. 24-10.

BOMBAY STOCK EXCHANGE

(From Our Correspondent).

Bombay, June 10.

ACTIVE conditions prevailed on the local Stock Exchange during the period under review. Almost all dealings were characterised by a predominantly speculative tendency on the part of local operators. This week saw *Tata Deferreds* cross the 2,000 mark and the notice has lead to a rise. *Bombay Dyeing* were highly favoured as a speculative scrip and at one time went upto Rs. 1,990. Steel shares which were uniformly steady for the past few weeks have substantially improved further on dividend expectations. Though there was no lack of buying interest, the irregular tendency noticed in midweek has latterly induced a slightly easier tone.

The giltedged section continues steady with 3½ per cent Paper quoting at Rs. 94. 3 per cent Defence Bonds (1946) had buyers at Rs. 102-14. 4 per cent (1943) Bonds were Rs. 100-8.

The outstanding feature of the past two weeks in the Banking section has been *Reserve Bank* shares which have gone up to Rs. 121. *Central Bank* elicited enquiry at Rs. 66-8; *Imperial Bank* (Fully Paids) are further higher at Rs. 1,810. *Imperial Bank* partly paids were done up to Rs. 451-4 while *Bank of India* were Rs. 174-8.

Mill shares barring *Bombay Dyeing* have not only not improved but definitely declined, though there had been much activity after control has been known. *Bombay Dyeing* after being done as high as Rs. 1,990 have closed at Rs. 1,970. Other shares which had also shown signs of improvement, and which towards midweek actually improved, are now quoting at rates that are lower on balance. *Central India* were Rs. 435 (Rs. 449); *Century* Rs. 809 (Rs. 815); *Colaba Land* Rs. 247 (Rs. 259); *Gokak* were Rs. 342 (Rs. 355); *Indian Bleaching* Rs. 226 (Rs. 228); *Kohinoor* Rs. 823 (Rs. 832); *Phoenix* Rs. 772-8. *Simplex* Rs. 309 (Rs. 325) and *Svadeshi* Rs. 531 (Rs. 540).

The Steel section has further improved and Tata Deferreds have crossed the 2,000 mark. Consequent on the publication of the company's notice expectations of improved dividends have sent up the price and *Tata Deferreds* at the moment are quoting Rs. 2,052-8 and the *Ordinaries* are done up to Rs. 416-8. *Indian Iron* is slightly better at Rs. 35-6.

In the Miscellaneous section there has been some improvement with *Alcock Ashdown* quoting at Rs. 900. *Belapur Sugar* were further lower at Rs. 233 against Rs. 236 last Thursday. *Bombay Steam* were slightly better at Rs. 527-8 (Rs. 522-8); *Bombay Burmah* Old were Rs. 345. *Shivrajpur Syndicate* remain unchanged at Rs. 64. *Premier Construction* are easier at Rs. 167, A. C. C. have lost 4 points to quote at Rs. 227.

CHAIRMAN'S SPEECH

BENGAL CENTRAL BANK, LIMITED

"Good banking can be assured only by good bankers and not by good laws"

Mr. N. R. SARKER'S SPEECH AT 24TH ANNUAL GENERAL MEETING

Presiding at the Twenty Fourth Annual General Meeting of the Bengal Central Bank Limited Mr. N. R. Sarker, Chairman of the Board of Directors said:—

Fellow Share-holders,

I am very happy to be in your midst again and preside over to-day's function after an absence of nearly 1½ years. I am very thankful to the Directors of the Bank, and particularly to Mr. S. C. Law, who was the Chairman of the Bank during my absence, for the confidence shown in me by their kind invitation to me to resume the Chairmanship of the Bank after I had relinquished my office as a member of the Viceroy's Executive Council. Mr. S. C. Law had directed the affairs of the Bank with great skill and success during my absence, and I accord to him our grateful thanks.

The war has created conditions which, while difficult in certain respects, have given a fillip to economic activities and increased currency circulation in the country. The habit of entrusting their savings to Banks is also developing among our people. This has resulted in a large increase in the deposits of the Banks generally. Taking advantages of the monetary conditions as they are to-day, floatations of many new Companies, both industrial and financial, are taking place. Floatations of new industrial and trading concerns during this war do not however appear to be and cannot, in fact, be in proportion to the greatly accelerated industrial and trade activity. The reason of course is the extreme difficulty of obtaining machinery and other equipments for industrial expansion. Of the new floatations, Banking companies stand in a category by themselves. For, while on the one hand, Banks are the foundation on which economic activities stand, their failure, on the other, lead to very serious repercussion on the whole economic structure. The floatation of many new Banks in the last few months has been the subject of considerable public discussion. It is not denied, that there is still wide scope for the development of Banking in India. Compared to other countries, Banking facilities and services available in this country are yet very poor. We could therefore still do with many more Banks established on sound foundations and run on businesslike principles. At the same time, one can hardly disagree with the opinion of the Reserve Bank of India when it says that it feels "that more than ordinary caution is called for in the organisation and management of new Banks in view of the difficulties and the disturbances which the post-war period is certain to bring." In the Reserve Bank's view it is of the utmost importance that "the capital structure and the system of management of banks should be of such a nature as to minimise the temptation towards an over ambitious and get-rich-quick policy and to encourage in its stead cautious and steady Banking on well-tried orthodox lines." The Reserve Bank has, in fact, suggested certain amendments to certain Sub-sections of Section 277 of the Indian Companies' Act with the object of strengthening the capital structure of Banks and removing certain mal-practices in connection with their management. I am fully conscious that good Banking can be assured only by good Bankers and not by good laws. But, even so, in a country like India where the public is neither so educated nor so vigilant, there is much to be said in favour of certain restrictions, particularly in abnormal conditions like the present, on the formation and operation of Banks, in the interest as much of the depositors as of the development of sound Banking.

A new situation has, however, been created by the promulgation of the new D. I. Rules prohibiting the issue and public offering of shares except with the sanction of the Central Government. The comprehensive nature of the powers taken under the D. I. Rules have roused the apprehension in many quarters that the Rules are likely to hinder the growth of banking and industrial establishment. No doubt the powers are very large and drastic. but I hope that the Rules would be sympathetically applied by the Government. Speaking for the moment of Banking Companies, I am certainly not in favour of the growth of mushroom companies. But companies which hold out a reasonable prospect of success must be given every facility for development. I sincerely hope therefore that the Government will not stand in the way of the development of sound business institutions, and, in particular, of genuine Banking companies. In the case of new Banking companies, certain conditions may, if necessary, be imposed on the advice of the Reserve Bank to ensure a healthy development of Banks. For, Banks are after all, really the keystone of the national economic arch. It is well-known that Indian business and commerce is afforded a welcome fillip during war-time. The last war had greatly accelerated our industrial, commercial and financial development. Confining myself again to Banking companies, I feel that, even for existing Banks the present offers a very opportune time for strengthening their Capital structure, where necessary. And I trust the Government will not deny these institutions the opportunity for carrying out this healthy reconstruction.

In the matter of Banking development, Bengal, I feel, has a special claim. All the major Banks in this province are either foreign banks or have their head offices outside Bengal. In Bengal, a few banks are trying to expand their activities on sound and conservative lines particularly by increasing their capital structure to ensure greater safety to their growing deposits. I am strongly of opinion that nothing should be done to stultify their activities. On the contrary, they as well as any new ventures started under sound auspices by persons who inspire public confidence, should be given every facility to expand their beneficial services to the public.

Coming now to a more familiar environment in which we all are interested, I have already said that the Bengal Central Bank has made commendable progress in all directions. And I may illustrate this by referring to certain of its features. The most important item, indicating the confidence of the public, namely, deposits, shows a very satisfactory increase from year to year Rs. .85 crores at the end of 1939 and slightly over Rs. 1 crore and Rs. 1½ crores at the end of 1940 and 1941 respectively, the deposits of the Bank stood at Rs. 2.21 crores at the end of 1942. Another criterion of public confidence viz., the amount of paid-up capital shows an increase from Rs. 5.67 lakhs at the end of 1939 to Rs. 6.20 lakhs in 1940, Rs. 7.43 lakhs in 1941 and Rs. 9.48 lakhs at the end of 1942.

As an indication of the very sound position of the Bank, I would like to refer to the high liquidity of its invested funds. At the end of 1941, the Bank had a very liquid position, its cash and balances with other Banks together with Government securities representing 50 per cent. of its deposit liability. This position has been further improved upon in 1942. At the end of this year, cash and balances with other Banks were 26% and Government Securities at the market value 39% of its deposits—the total of liquid asset thus amounting to 65% of its deposit liabilities. This is a satisfactory position on which the Bank can, I believe, reasonably congratulate itself. It is also a noteworthy achievement on the part of the Bank that even after ensuring such a highly liquid position in respect of its assets, it has been able to increase its earnings. After allocating Rs. 50,000 to the Reserve Fund, which now stands at Rs. 4 lakhs, the balance to the credit of the profit and Loss Account is Rs. 99,937 at the end of 1942 as against Rs. 43,328 at the end of 1941.

It is, I think, but natural that the Bengal Central Bank, in view of the efficient way in which it is being run, should be increasingly winning public confidence and obtaining its growing support. As a practical illustration of this, I may disclose here that since the beginning of 1943, the deposits have increased to Rs. 2.83 crores and additional shares for over Rs. 11 lakhs have been subscribed for. This brings the total of Subscribed Capital to about Rs. 27 lakhs as on the 16th of May, 1943. On the 24th May, the Notification of the Finance Department of the Government of India, restricting the issue of further shares without the approval of the Central Government was received here. Further allotment of shares has been stopped since then. We have however, applied to the Government of India for granting us permission to have the balance of the issued portion of our capital subscribed, which amounts to about Rs. 23 lakhs.

A fact which, I am sure, will cause pleasure and gratification to the share-holders and the constituents of the Bank, is that the Bank has been able to secure a big plot of land in the heart of Clive Street for the construction of the Bank's own Head Office Buildings. It is the intention of the management to put up a modern and well-appointed structure on this site as soon as conditions permit.

I must also pay a tribute to the valuable services rendered by Mr. J. C. Das

(Continued from page 1036)

at considerable personal sacrifice to himself. He had been giving ungrudging service to the Bank on a voluntary basis for a considerable period of time, after he rejoined the Bank. The Directors have, however, recently induced him to accept some suitable emoluments. Mr. Das has, I am glad to acknowledge, materially contributed to the progressive development of the Bank during the last few years.

I may mention here that your Board has been strengthened by the inclusion of Mr. Chaturvedi, who is the President of the Calcutta Stock Exchange.

I may assure you that the Directors of the Bank are always anxious to see that the Bank records a steady progress from year to year and pursues a sound policy. They will spare no efforts to place at the disposal of the Bank's constituents better and yet better facilities and services, and they hope that in no distant future this Bank will occupy a position of pride among all Indian Banks.

HUMAYAN PROPERTIES LTD.
Lovelock & Lewes,
SECRETARIES.

1, Humayan Place,
Calcutta,
9th June, 1943.

COTTON CONTROL SCHEME

GOVERNMENT'S PLAN

(1) *Multiple shift working by all Cotton Mills to the fullest extent possible:*—It is suggested that as many Mills as can possibly manage to do so should be organised to work three shifts of 7½ hours 7 days a week, less say, 25 mill holidays only.

(2) *Regulation and rationalisation of production:*—It is proposed to draw up schedules of counts which may be spun from which each Mill may select a limited number, and a schedule of cloths with maximum and minimum reed and pick, based on the yarn schedule, which Mills will be permitted to weave. This limitation of types of cloth is necessary to increase the output of the Industry. The case of Mills having technical difficulties in producing "utility cloths" will of course receive special consideration.

(3) *Fixation of maximum selling prices for Cloth and Yarn:*—Two sets of prices will be, fixed *viz.* maximum prices ex-Mills and maximum prices for retail sales which will be stamped on the cloth.

(4) *Fixation of ceiling prices for raw cotton, fuel and mill stores as corollary to the Control Scheme:*—It may be noted that the Cotton Textiles Directorate now control the movement of raw cotton, the import and distribution of mill stores, and the prices and distribution of reeds, healds, shuttles and bobbins etc. The ceiling price for Jarilla Cotton has also been fixed at Rs. 550 and forward sale has been prohibited.

(5) *Steps to prevent hoarding:*—Date of manufacture will be stamped on the cloth and no one will be allowed to keep stocks beyond a reasonable limit for longer than a fixed period of time.

(6) The Control Organisation proposed will be under two Officers styled the Textile Commissioner and the Additional Textile Commissioner. The Textile Commissioner and his colleague will be assisted by an Advisory Board having on it representatives of the Industry, of Labour, of the East India Cotton Association, of the Indian Central Cotton Committee, of Merchants, Handloom Interests and Transport, up to a total not exceeding 20. The Textile Commissioner will act in consultation with this Advisory Board, and in case of disagreement will refer the point at issue to the Government of India in the Industries and Civil Supplies Department for decision. The Advisory Board will constitute from among its members Committees of the Board to deal with specific matters, such as, Rationalisation and Price Control; Cloth and Yarn Movement, Mill Stores; Fixation of Prices and Specification of Standard Cloth; for the supply of cloth, yarn and sewing threads required to meet military demands; and to deal with the case of fine yarn mills. The Textile Commissioner will, of course, be at liberty to appoint to these Committees experts as may be necessary.

The Scheme put forward by Mr. Hydari was opposed and criticised by the Mill-owners' representatives on the following grounds:—

(1) The Scheme would only aggravate the situation by driving cloth and yarn to the black market.

(2) There is no need for the present Scheme as the Standard Cloth Scheme has not had a fair trial and Government have not yet been able either to take delivery of the cloth produced or to arrange for its equitable distribution. The Industry is prepared to manufacture 2,000 million yards of Standard Cloth and also to execute war orders to the extent of say 700 million yards per annum. Export requirements also exceeded 1,000 million yards in 1942. Thus there is no sense in launching a new scheme to control the remaining output of only about 800 million yards.

(3) Government have so far taken no steps to stop or even reduce exports or to prevent hoarding which if vigorously done, would go a long way to relieve the situation.

(4) The practicability of working multiple shifts is also doubtful owing to heavy strain on machinery, paucity of skilled labour, cotton, mill stores and machine parts.

After three days' discussion the Government of India and the Mill-owners agreed that it is essential in the interests of the community substantially to reduce prices and increase production of cloth and yarn. To this end the Control Order will be so drafted as to give the fullest possible measure of freedom to the Industry in the methods by which the objectives of increased production, lowering of prices and keeping down of costs are to be reached. In technical matters, such as, rationalisation, and standardisation of specifications, the Industry's voice will as far as possible be considered as final. The Textile Commissioners will for these purposes act in accordance with the decisions of the Board. Where the Textile Commissioners disagree with the Board they will report the matter to the Government whose decisions will be final. Before taking a decision Government will give the Board full oportunity to present its views. The Textile Commissioners will be free to request the Board or any of its Committees to consider any proposals put forward by them.

Although the Advisory Board will have on it members representing interests other than those of the Industry, it will be ensured that the Committees of the Board dealing with technical matters such as prices, methods for increasing production etc. shall be composed only of members representing the Cotton Textile Industry together with such others as the Committee itself may desire to invite.

The decision of such a Committee will be as binding on the Commissioners as if it were a decision of the Board. The Chairman of the Board will be a non-official member of the Industry.

The Board will have power to make recommendations as regards the volume and destinations of exports.

It was proposed that the Advisory Board will consist of 25 members representing the Industry (12 from cloth and 3 from yarn), Labour (2), East India Cotton Association (1), Indian Central Cotton Committee (1), Handloom interests (1), Transport Department (1), M. L. A's (2) and Commercial interests (2).

THE RAJAHBHAT TEA COMPANY, LIMITED.

NOTICE is hereby given that a final dividend at the rate of 40% per annum for Season 1942 has been declared payable. Warrants may be had on application to the undersigned. Where standing instructions as to disposal of Dividends have already been registered, warrants will be issued accordingly.

By Order of the Board.

WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

Cheap conditions have continued to prevail in the money market and call money rate has been unchanged at ½ per cent in Calcutta, ¼ per cent in Bombay and ½ per cent in Madras with lenders over. The results at the auctions held for treasury bills this week, however, do not bear testimony to the easier conditions in the money market. There has certainly been a slight increase in the amount of applications from Rs. 12.32 crores to Rs. 12.8 crores but bidding has not been keener and the average rate of accepted tenders remains unchanged at Rs. 1-1-0 per cent per annum. Intermediates sold from June 9 to June 14 are lower at Rs. 3.74 crores against Rs. 5.71 crores. The fall in the sale of intermediates is to be attributed only to the unwillingness of banks to invest in treasury bills any more than maturing bills. During the last two weeks sales have been considerably in excess of maturities and there has been an intake of money from the market to the extent of Rs. 8 crores. Ordinarily, this would have made a difference to money rates but with conditions as they are, and the continued expansion of currency, the authorities can get their requirements in full without conceding any appreciable increase in rates. As a matter of fact it would have been even possible to secure a lower rate if only the authorities had decided on the suspension of sale of intermediates for a while, or at least on reducing the yield on tap bills. The ways and means position of the Government is quite satisfactory and there is no reason why intermediates should be offered at Rs. 99-12 per cent.

The returns of the Reserve Bank for the week ended June 11, 1943, show that there has been a further expansion of currency against sterling securities for Rs. 10 crores. Total notes issued are higher by Rs. 8.55 crores only at Rs. 732.83 crores owing to the drop in the figure of rupee coin from Rs. 16.67 crores to Rs. 15.22 crores. Notes in circulation are Rs. 721.66 crores against Rs. 713.05 crores. Sterling securities, on the assets side, show a rise of Rs. 10 crores to Rs. 552.49 crores. There is no change in rupee securities at Rs. 120.71 crores. In the Banking Department, Central Government balances are lower at Rs. 12.07 crores against Rs. 13.13 crores. In Provincial Government balances there is a decline to Rs. 8.18 crores from Rs. 11.08 crores. The increase of Rs. 3 crores in the previous week and the same decrease in the latest return is not quite explainable. Bank balances do not show any appreciable change at Rs. 53.18 crores. Balances held abroad are Rs. 2.95 crores lower at Rs. 76.27 crores. Having regard to the transfer to the issue department of Rs. 10 crores there has thus been a net receipt of Rs. 7.05 crores during the week from Britain. Ways and means advances are Rs. 26 lakhs against nil in the previous week.

The returns of the Imperial Bank for the same week reveal a slight decline in deposits to Rs. 186.76 crores. Investments, however, are higher by Rs. 84 lakhs at Rs. 131.3 crores. There is a slight increase in advances also to Rs. 37.84 crores. As a consequence, cash balances show a decline of Rs. 1.59 crores to Rs. 27.97 crores.

The prevalence of easy money conditions is fully borne out by the statement of scheduled banks for the last three weeks. There has been a successive increase in both demand and time liabilities. On May 14, 1943 demand liabilities were Rs. 388.6 crores and time liabilities Rs. 125.52 crores. On June 4, 1943 the figures were Rs. 406.04 and Rs. 128.72 crores respectively. The addition to funds with banks in the period of three weeks is more than Rs. 20 crores. It is not surprising that the balances with the Reserve Bank have increased from Rs. 47.59 crores to Rs. 52.60 crores. The increase in advances by Rs. 4.2 crores constitutes only a fraction of the total increase in funds with banks.

In the absence of any scope for speculative activity in other markets, operators have turned their attention to the stock markets. It has been reported that in recent months there has been a large increase in business in the Bombay market and transactions put through the clearing house every fortnight have been continually on the increase. Even with the suspension of forward trading, it is pointed out, that the system of fortnightly settlement means in effect the provision of facilities for forward trading. In order to be able to check speculative trading all transactions should be on a cash basis as in Calcutta and delivery regulations should be strictly enforced.

The exchange market has remained steady and unchanged and business passing continues on a restricted scale.

Banks are sellers of T.T. at 1s. 5 31/32d., for London ready to six months forward.

Banks have been buyers of three months D.A. bills on London at 1s. 6 9/32d. and four months at 1s. 6 11/32d.

Banks are sellers of T.T. New York Ready at Rs. 332¼.

Banks are buyers of T.T. New York Ready at Rs. 329¼.

Interbank call money is ½ per cent lenders.

TREASURY BILLS

India

Tenders for Rs. 8,00,00,000 of three months' Government of India Treasury Bills were opened on June 15, 1943. Total amount offered was Rs. 12,80,25,000. Tenders at Rs. 99-12-0 per cent were accepted in full and those at Rs. 99-11-9 per cent were allotted approximately 62 per cent. Total amount accepted was Rs. 8 crores, the average rate of accepted tenders being Re. 1-1-0 per cent per annum.

Tenders for Rs. 8,00,00,000 of three months' Government of India Treasury Bills will be received on June 22, 1943, in Bombay up to 11 a.m. (Standard Time) and up to the close of business on June 21, 1943 at other centres. Successful tenderers should make payment on June 25, 1943. Other conditions are as usual.

Three months' Intermediates will be sold from June 16 to June 21, 1943 at Rs. 99-12-0 per cent subject to the conditions previously announced (viz. sales can be stopped at any time without previous notice, if Government think it necessary).

Three months' Intermediates sold from June 9 to June 14, 1943, amounted to Rs. 3,74,25,000.

During the week ended June 11, 1943, Governmen of India Treasury Bills for Rs. 3,57,00,000 were sold in favour of the Issue Department of the Reserve Bank of India.

Finance Abroad

Thursday Morning.

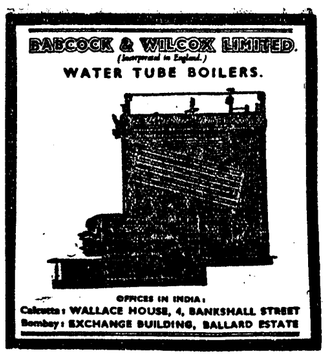
WITHOUT any change in exchange rates to show that markets are sensitive, as in the past, it is necessary to go by only the restrained attitude of the London Stock Exchange. The improvement in turnover on Wall Street in recent weeks has apparently not been maintained and values have declined in a week, as the quotations for U.S. steel and Anaconda Copper are lower. The drop may be readily related to the trouble in the coal-mining industry, and Mr. Lewis' confirmed reluctance to negotiate with either the mine-owners or Mr. Ickes. The War Labour Board has certainly got its work cut out.

The increase in Federal expenditure on the war in *May might* have a discouraging effect on the U.S. stock market, but the increase points to the efficient prosecution of the war and the expansion of war production. War expenditure in May according to a Washington message of June 15, came to $2836 millions a day showing an *increase of $3 million a day on* the daily cost of the war in April. The increase means that the estimates of cost made in January have been rendered incorrect by the progress of operations and inflation at home. It is, however, difficult to assume that the *Reuter* message describing the increase in U.S. war *expenditure in May is correct.* The monthly bill must in this case be over $80 billions—an impossible total on any reckoning of the 1943-44 budget figures mentioned in January or the estimated U.S. national income of 135 billions in 1943. But the increase of $3 millions in the daily cost of war as compared with April *is more likely than not* and an increase of $900 millions in a month is not very large as things go.

The bigger deficit certainly calls for either an increase in savings or an increase in taxation. The President is evidently keeping an open mind, but a new fiscal year will begin soon and the Congress will certainly be called upon to consider heroic revenue measures. On the other side of the Pacific, the situation was only recently described as increasingly tense and a big offensive in the future may tax the Warlords of Japan more severely than the U.S. tax-payer. Tax fears certainly cast a long shadow ahead as proved by the decline of the blue chips on Wall Street and corporate earnings are likely to suffer from the fuel shortage as well as the exactions of the Treasury. But the bleak outlook for the holders of no par shares does not mean that the bond market will weaken or that corporate savings will fall away. Money is both cheap and abundant in the States. Larger borrowings and increased subscriptions to war bonds are certainly redeeming features in a rather difficult period and the promise of an inter-Allied agreement as to post-war financial arrangements has certainly followed the setting up of a council to work out Allied relief plans, Mr. Curtin has approved the idea on behalf of Australia and indicated also willingness to help in the reconstruction work in the Far East.

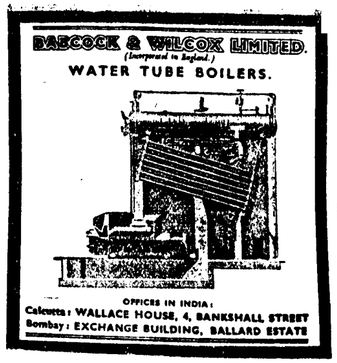
Overshadowing the relief plans yet to come, is the lease-lend scheme valid up to June, 1944. The Senate agreed to appropriate over $6,275 millions for the next year. No part of this money is to be used for farm subsidies according to the Bill passed last week. As much as $4,452.62 millions have been assigned for food, and the U.S. Administration has clearly won again. Of greater and more abiding interest is the promise of another anti-inflation message from the President to the Congress. The programme of 1941 has certainly succeeded to a great extent, but the President apprehends that national income is still rising and the inflationary gap is likely to exceed $16 billions. Hence the suggestion of more measures to combat inflation in the U.S.A. How and when it is to take place outside the pay-as-you-go tax plan providing for voluntary payment in advance of income tax has provoked little speculation. Increased U.S. aid to Russia has followed the receipt of British assistance to Russia and Mr. Stettinius' report recently that non-ferrous metals were shipped in quantities to the Soviet. An explanation of domestic shortages may be found in the large increase in supplies following the agreement made in June last between the governments of Russia and the U.S.A.

The celebration in Moscow of the United Nations' day like the threatened breach in relations with Finland makes for increased assistance to Russia. Russia's own liability to help the Occupied countries has been indicated in the declaration issued last week after the Food Conference. These developments have admittedly no bearing on the external value of the rouble or its future stabilisation after the collapse of Russia's currency noted duly in 1941. But it is certainly possible that the Allies might bring Russia into a new trade and exchange agreement. Russia's gold might play the usual part, and her ability to pay for post-war relief may not be therefore called into question. Gold from the Urals produced at a lower cost than in South Africa (where lease-lend equipment had to be got this year for putting one of Anglo-American Corporation's properties into production) will certainly be a factor influencing bullion prices. The rouble may be stabilised by gold exports rather than external loans, and this must be again related to the possibility of India keeping her newly-won market for hessian and tea in Russia.



The immediate effect of war news on bullion markets has been beneficial rather than otherwise. Arguments for large imports of gold and silver under official auspices (as a cure for inflation) are certainly getting common, but the bullion market here discounts them to judge by the high stability in bullion prices this week. The difficulties in Algiers and the setback for the pro-Allied group in Argentina was reflected in the decline in gilt-edged securities last week in London. Good features were not lacking in the industrial market, with Dunlop improving further, and the signs of recovery in Home Rails were distinctly encouraging. The further decline in gold-mining issues may be due to the Rand monthly returns or some other factor. Indian gold shares have not been much to the fore, as it was noted at the time of the bullion boom that taxation in Mysore is a great bar to the growth of profits normally ensured by the Bombay market for Kolar gold. At least one gold-mining share is still below par, and the way in which Mysore has copied the South and West African Governments in making money out of the premium on gold certainly invited comment.

There has been no sign of foreign currency rates weakening through invaison fears but it is quite likely that the lira has slumped further. Mussolini made the most of having stabilised the lira in terms of dollars fairly early, but the lira is a weakening currency, and at home the Government's credit in the war period was certainly falling steadily. In the free markets the lira has weakened, while sterling has rapidly improved between 1942 and 1943.



LLOYDS BANK

Jap-Occupied Peiping

To the horrors to the discredit of the Rising Sun must be added a story as sad as any—that from Peiping. According to a note in the China Information Bulletin quoting a Central news despatch a million hard-pressed Chinese are awaiting the day of deliverance. Starving citizens of Peiping look to the day when the Chinese flag will again fly over the City. As in Shanghai foodstuffs are taken away under the pretext of requisitioning by the Occupation authorities who are controlling food more rigidly. According to one, who escaped from the former capital of China, starvation is common, because of the food reguations. The Japanese regulations lay down that the ration cards for rice and flour are not to be issued to Chinese under the age of 8 and over the age of 50. Those unaffected by this regulation are allowed to buy one and a half catties of rice and two and a half catties of flour per month which can last them only three to five days. The majority of the Chinese people are driven to use other cereals which are mixed with peanut husks or sawdust while Japanese residents are adequately provided with rice and flour which are given to them at a much cheaper price. According to the informant many Chinese are still leaving Peiping and other Occupied areas for Free China. An average of more than 1,000 people cross the border daily though suspicious-looking travellers are liable to strict search by Japanese sentries. Not infrequently, young students have been detained and tortured to death. The account of life in Peiping was given by one who left the City with 12 young students. On their way many of them were arrested and later reported to have been killed.

"Editorial" Comments

Inertia in Indian Economic System

In singular contrast to the high hopes that were entertained at the outbreak of war about the development of India's war economy, there is to-day a keen feeling, not only of disappointment, but of embitterment in the public mind. While the changes in the basic economic conditions as a result of the war have not belied anticipations, neither the policy of the Government nor the natural responsiveness of the economic system to the stimuli of war conditions have fulfilled our hopes. It is true that the defections on the part of the Government from their loyalty to the progress of India's national economy could not be reasonably ruled out of consideration. The Government of India have avowedly other aims and considerations to keep in mind than the progress of our material prosperity. But it would appear now that even the low expectation entertained by the people will not be fulfilled. While the country is feeling acute shortage of a wide variety of consumers goods, little has been done to increase production by other means than the routine method of increasing the number of shifts in urban factories. Likewise, the Government unmistakably views askance the natural trend towards a transfer of British investments in India to Indian hands, which one would naturally expect from the large accumulation of sterling balances even after virtually completing the repayment of the Government of India's sterling obligations.

The question of effecting changes in Government's policy, so far as the increase in the productive activity of the country is concerned, inpinges on the larger political problem which is, in many ways, the despair of Indians and the friends of India. But even more disappointing than the apathy, not to say antipathy, of the Government, is the failure of the Indian economic system to respond to the stimuli that war economy and war finance have so far provided. Both history and the a priori economic reasoning bring out the fact that the development of the national economy in the sense of notable increase in productive activity and output, is helped by an increase in demand by currency inflation and by profit inflation. It can hardly be denied that all these three factors have been present in the national economy at least during the last two years if not during the whole period of the war. That demand for consumer's goods has gone up by leaps and bounds during the last two years will hardly be questioned. In every commodity, stocks available for civilian consumption have been seriously cut into by the requirements on war account. While a gap is thus caused in supply as it has been for a long time, civilian demand, too, has been increased by the large volume of purchasing power that has been distributed throughout the country by the increase in war employment on account of the war. It is not alone the urban areas that have had their purchasing power increased by employment in the fighting and auxiliary services. In a country like India a considerable percentage of the incomes made in urban areas flows into the villages for maintaining the dependants of earning members. The effect of this increase in the purchasing power in rural areas has been noted by all who have toured round the country. People, who formerly had been indigent, are to-day in receipt of monthly remittances which would enable them to pay for the necessaries and comforts of life if they are provided on reasonable terms. While thus on the one hand, there is an unmistakable increase in effective demand for goods and services, there is on the other, an improvement in the incentives for producers to engage in production. It is an arresting phenomenon of economic life in India to-day that those who are engaged in business are experiencing wider margins of profit in every line. Whether it is trade or commerce or manufacture, profits have, on the whole, less relation to costs than at any time before. Such profit inflation has been declared by Lord Keynes to have been the most powerful factor in bringing about booms, and in adding to the capital equipment and volume of productive activity of several countries.

Of the three factors pointed above only of inflation can it be said that it may conceivably cut both ways. Inflation, on the scale and at the pace at which it is being pursued in India, may well have the effect of retarding economic development. But India has not been without just that kind of inflationary additions to currency and credit which exerts a stimulative effect on the productive activity and creates the psychology appropriate to a healthy boom. It may be said therefore that even if we set a discount on inflation as a factor helpful to economic development, the strength of the forces, which could reasonably be expected to increase production, can by no means be underrated.

The fact remains, however, that at the end of the fourth year of the war there is hardly any line of productive activity in India to-day which can boast of a substantial increase in output Approaching the question of economic development from the standpoint of the people at large, it would not be unreasonable if the production of war materials is left out of account. Though no one would attach to them the stigma of being unproductive, they cannot be classed with the consumer's goods, the increase in which can alone constitute an improvement in the economic conditions of the people. The test of progress is the increase in the production of agricultural and industrial goods that are consumed by the people of the country. Judged by this test, changes in the national economy must be deemed to be of the most adverse kind. The vicissitudes of Indian industry during the war period are too well-known to call for more than a mere mention of the salient features. It is inevitable that industries like iron and steel and those which produce articles of importance to the war effort have been enabled to increase their production vastly. For our purpose, they are not, at present at any rate of a different class from the production of bombshells or hand-grenades. There are then, the industries like cotton textile, woollens and tanning whose products are required for the fighting forces. In the case of such industries, little has been done to offset the effect of Army demand on supplies for civilian consumption. On the other hand, considerations, which are not wholly military in character, have led the authorities to encourage the export of consumer's goods which are badly needed at home. The result is that, while advantage has not been taken of the large demands of the war period to increase our productive capacity, supplies for civilian consumption have been seriously cut into just at a time when the economic conditions are otherwise favourable to an increase in the standard of living. While woollen goods are a rarity, cotton goods, it would appear, can be had in the future only and distribution of the cotton textile industry in this country. as a result of rigorous forms of control over the production As for cement, it would seem that the war demand leaves but little or nothing for civilian consumption.

Turning to the food problem, its rigors are felt even by the most affluent classes in the country. It might be thought that the shortage of foodstuffs is wholly the result of the cessation of imports of rice as also of the need to help neighbouring countries from our diminished stocks, the assumption behind this thought being that the acreage and output of foodstuffs in the country on the whole show an upward trend during the last four years of the war. Extending our survey at this stage to all the agricultural staples, it is interesting to note that in no case are both acreage and output for 1942-43 the highest for the last quinquennium. Only in the case of wheat is the yield of 10.9 million tons the highest, but the acreage is more than 1 million below the figure for 1938-39. In the case of cotton, 1941-42 registers a record figure both of acreage and output and a marked decline in the following year has thus been necessitated. The acreage under rice rose to 74.9 millions in 1942-43 as against the previous high of 74.2 million in 1939-40. But the output of 24.5 million tons compares very poorly with the previous high of 25.8 million tons in 1939-40. The fall in acreage under sugar from 4.6 millions in 1940-41 to 3.6 millions in 1942-43 is made up by the increase in yield which amounts to 5.69 million tons in 1942-43 against the record of 5.79 million tons in 1940-41. The figure for oilseeds is very low while castorseed is well maintained. Groundnuts and linseed have suffered marked decline both in acreage and yield. In the case of sesamum however both acreage and yield for 1942-43 are the highest for the last three years.

The picture of India's agriculture during the last four years of war hardly suggests any rise in agricultural production in India. It must be remembered, however, that hardly any agricultural staple excepting, of course, foodgrains, can be said to have experienced an increase in demand. Only in the case of foodstuffs is there any question of production rising to higher levels as a result of the higher demand for them. But considering that reduction in demand for other agricultural commodities makes it easier for more land to be devoted to the growth of food grains, the failure of the latter to show increased production is all the more notable and regrettable. So that, the special circumstances in which agricultural commodities like cotton and groundnuts find themselves placed, do not affect the main argument that the three factors which should normally make for increase in productive activity, have in this case proved infructuous. Expansion of production has been confined to those lines in which the Government are directly interested on account of war needs; and in other spheres of productive activity there has been either a small increase or none.

An explanation of unresponsiveness of the Indian economic system to the stimulus of profit inflation, inflation of currency and insistent and increasing demand is of great importance to the formulation of economic policies in the postwar period. For, it would be wrong to attribute this failure wholly to the Government's sins of omission or commission. Considering that conditions have been exceptionally favourable for the growth of productive activity in urban as well as rural areas, the failure can only be attributed to the inelasticity of our sources of production. So far as the question of the food problem is concerned, there can be no doubt now that our sources of food production do not lend themselves in the absence of special measures to any considerable expansion of output. In so far as increase in the production of food is the basis of any large economic programme, there is need for the study of the problem by scientists and administrators rather than by economists. The problem of increasing industrial output is one which is bound up with the problem of importing machinery so long as we are unable to manufacture ourselves. But the food question must be considered to stand on a different footing; and unless opinion, expert and public, contemplates the revival of imports of foodstuffs, there is the urgent need to view the problem in full recognition of the present inelasticity of our productive sources and equipment.

PLANS FOR MEDITERRANEAN WARFARE

In the enthusiasm generated by the United Nations day celebrated on June 14 many will find the assurance of a fine, free effort against the Axis and its ally. To speak of events to come is seldom easy as the actual course of events is an indifferent guide, yet developments in the Mediterranean are of vast significance from the angle of any projected offensive to-day. The tendency to exaggerate Allied prospects has been displaced by another based on the agreement reached last month in Washington. There are actually no signs of the Second Front, but Nazi preparations from Norway to the Riviera point wholly to invasion possibilities. For the present, the Anglo-American offensive is limited to the Mediterranean and it is there that an early decision must be obtained if the war is to end in 1944. The capture of three Italian islands certainly proves again that Tunisia is an adequate base for operations against Italy. The attack on Sicily cannot be delayed, and the growing naval weakness of Italy may spur the Allies to more resolute action. Not for the present is the attack on the Balkans, however encouraging may be the prospect of an attack on Greece, meant as much to save that country from starvation as to menace Italy from the east. The Allied programme since 1940 has been to deal with Italy first, since Italy is an obstacle in the Mediterranean; more so in the eastern part, and the expulsion from the Dodecanese is essential for Turkish security among other things. Turkey's unquestioned neutrality is an advantage to be preserved, only by due attention to maritime strategy and ultimately to the complete removal of the German threat to the Caucasus. As we know the Germans are still inconveniently near Rostov; their hold on the Ukraine has not been shaken. Their command of the Black Sea has not yet been challenged. An incitement to revolt in Bulgaria or Rumania, can succeed only if the Allies get past the Straits; and Turkey can be induced to relax the Straits Convention only if the Eastern Mediterranean is dominated by the Allied fleets. If the French Squadron is an asset of limited value even for Alexandria, the Allies have a base in Cyprus, and are clearly in a position to force a diversion as soon as the fighting in Russia livens up. German power for defence in the East has not been seriously tested as yet because the East Wall holds and Kharkov is retained by the Nazis. The Russian effort is yet to begin; a forward move in the Eastern Mediterranean will be an earnest of Allied resolution to strike from the south. The further consideration that a part of Italy's fleet will be drawn off to the East may weigh with some who urge that Italy cannot be reduced exclusively by air attacks. For us, the late start of the summer campaign will only convey the impression that the Russian army after the defence of Stalingrad can only advance by fits and starts, and reach the Dnieper by slow stages. An Allied advance to the Balkans may however force the German army quickly to the line of the Dnieper. Rommel's selection for an important command in the south-east suggests that the Nazis are not deficient in foresight. The qualified success of the U-boat campaign implies that Germany must prepare in the West but it also implies that defence in the East must be really adequate, particularly after the development of industry in Austria, Slovakia and Hungary. Having created a two-front war in 1941, it is not open to them to close one at will and the situation is wholly different from that of 1941 because the U.S.A. has sent a large army and air force to Britain and a fleet into the Mediterranean, while the African front has been liquidated.

Just as the Rumanian collapse and the Bulgarian surrender made for a dramatic change in the last war, it is quite possible that an upset in Bulgaria, apart from being helpful to Turkey, may help the Allies to land in Salonika and open a front across the Black Sea. A year ago, it was easy to speak of a Caspian Front. Something like that has to be built up around the Black Sea this time, and that is one reason why the Eastern Mediterranean must enjoy high priority. The more important results envisaged after Adana can only follow Allied operations in the Levant. It is not enough if Egypt is secure; it is not enough if Iraq is safe; the Allies have to use Syria-Iraq-Iran as a line of approach to the Black Sea and that without any violation of Turkish neutrality. The closing of the Syrian frontier on the Turkish side can only mean that the visit of Sir Harold Alexander early this year and the combined exercises in Cyprus are not devoid of results. Axis supremacy in the Aegean is still shaky and German commitments in Russia are such that air power can hardly be used with effect while the Central Mediterranean is now safer for Allied forces detached from North Africa. To those who think of Sardinia as an outstanding target, it may not occur that it is more important to make Haifa wholly safe. Last year after the fall of Tobruk the Haifa-Alexandria line—screening the Suez Canal—seemed the most vital line of Imperial defence. It remains so even after the big successes in North Africa, and only a campaign in the Eastern Mediterranean at an early stage of the Allied offensive can secure the oil of the Middle East from a German descent through Turkey. Few, will deny that to-day the oil is as much an Anglo-American interest as the safety

Wool and Sheep

Improvement in sheep-breeding has been supplemented by schemes for producing cleaner wool. "Indian Farming" published an account of the measures adopted in Madras to raise the standard of the wool clip. From April 1942 a special demonstration unit is at work, teaching the shepherds the method of preparing the sheep, for shearing in the correct way, of clipping by machine or with handclippers, the approved method of grading and sheep-dipping against ecto-parasites. Shepherds are taught to do the work under supervision and guidance. While propaganda by veterinary officers precedes the demonstration in the sheep-breeding territories, villagers are encouraged to get their sheep sheared twice a year free of cost when the demonstration is taking place. Machines are recommended. The visits of the demonstration unit to four districts has been accompanied by good results. Improved handclippers are appreciated, and villagers say they do not mind grading if better marketing facilities, to secure better prices for their wool are available. The unit tours regularly in the districts of Salem, Nilgris, Coimbatore, Bellary and Kurnool, North and South Arcot and Trichinopoly and the unit collects information concerning sheep in the wool districts. Another line of improvement lies in washing sheep before shearing. It is generally held that quality is better and prices obtained higher. But the Superintendent of the Hissar Cattle Farm after launching an experiment said that the Bikaneri ewes after washing did not give wool which fetched better prices. The loss in weight arising from washing is not made up by the premium for wool from animals washed previous to shearing. The rates offered by the New Egerton Mills, Dhariwal indicate that the average return per clip in the case of wool from washed sheep was more in any case. The Punjab experiment may have little value for the Madras scheme which is turned to shearing methods. Advice as to shearing given in Canada to farmers emphasises the need for suitable weather, clean surroundings and the importance of avoiding second cuts by amateurs. Wool should not be damp and the packing should be done in clean bags to be stored in a cool, dry place. Binder twine or sisal string should not be used for tying up fleeces but only paper twine, said the Dominion authorities. The final advice to farmers was to market wool annually as old wool tends to deteriorate through mustiness, discolouration and the ravages of moths.

Defence Loans' Progress

Subscriptions to the Defence Loans in April raised the gross total to over Rs. 152.45 crores. The official statistics disclose that so far as the 3 per cent issue is concerned, Bombay alone provides a large regular contribution every month. Out of April's total of Rs. 3.4 crores, Rs. 2.11 crores represents the share of Bombay. And out of Rs. 143.35 crores raised by loans up to April 30. Bombay accounts for Rs. 65.43 crores. More than half a dozen Provinces subscribed less than Rs. 1 crore in nearly 3 years. In regard to interest free loans also Bombay's share is large. Out of Rs. 3.07 crores raised, Bombay provided Rs. 1.45 crores. These figures show that the head offices of many banks etc. being in Bombay new capital goes into the loans more readily, and the steady addition points also to the importance of a sound, regular securities market there. The net total for defence certificates sold up to April 30, is stated to be Rs. 5.67 crores. Bombay is ahead of the other Provinces in respect of defence savings certificates with Rs. 95.49 lakhs; but in April, the Punjab claimed a bigger total than all the other Provinces. The total deposits in the defence savings bank up to April 30, amount to Rs. 44.79 lakhs and the Punjab again makes a good showing as in regard to savings certificates. Out of the total raised namely Rs. 152.45 crores the total for interest-free loans is Rs. 3.07 crores and the increase in India's debt is thus below Rs. 150 crores in nearly three years. If due allowance is made for the repatriation of sterling debt, the increase in debt is below expectations but it may be said that sales of defence loans through the tap are yielding less than in most months of 1942-43. The decline in the amount subscribed per month for the defence loans may be explained in many ways, but the reduced volume of subscriptions is one reason for the maintenance of short-term borrowing through treasury bills on a larger scale than in the last year.

Reduced Imports

Reduction in imports in 1942-43 attributable to exchange and other difficulties is nowhere more pronounced than in the case of provisions, oilmanstores and liquor. Advertised goods are no longer available and the Indian manufacturer cannot use all the opportunities because of peculiar difficulties. Compared with 1941-42, there has been a steady fall last year in imports by sea of provisions and oilmanstores. Imports in August 1942 were valued only at Rs. 3.06 lakhs and the average for nine months of 1942-43 is below that of any month of 1941, being only Rs. 5 lakhs. The percentage fall in value is noted as being over 60 per cent and the quantity imported must be even lower: The percentage fall is admittedly less in the case of liquor, but price changes last year must be considered even more important. December witnessed a striking fall in imports of liquors, the value of imports at Rs. 3.47 lakhs comparing unfavourably with Rs. 15.26 lakhs in December 1941. Up to September liquor imports did not show a drastic fall but the trade figures for the last quarter show a bigger reduction than expected. The pressure of Army demand has been explained and the very strong position held by Indian brewery companies at present is demonstrated by the considerable premium paid for prospective improvement in dividends. In the case of United Breweries' shares alone is the yield moderately large at 6 per cent; in the case of other shares the yield is the same as on giltedged stocks. Current prospects are rated as exceptionally good for all Indian distilleries and breweries and 1943 has seen a pronounced change in the stock exchange valuation of a limited group of shares. It is generally known that Indian output of European liquor is increasing in response to larger demand and the increase in output noted in 1941 should have been followed by a big expansion in output. Increased support for certain sugar shares this year is directly attributable to the belief that distilleries must be more valuable assets than in the past when Prohibition was regarded as a local obstacle. As the value of liquor imports in 1942-43 was obviously half the value recorded in the 1941-42 returns, it is clear that Indian manufacturers must have benefited substantially. The cut in civilian consumption has been frequently explained, as also the increased takings of the Army. The investor has certainly drawn the right conclusion and even in a very shaky market, brewery shares are always firm. Buyers outnumber sellers in every case, and a further rise is indicated when the 1942-43 accounts appear later in the year.

Taxing for Reconstruction

The U. P. anti-inflation programme has been mentioned particularly to prove that the increase in Excess Profits Tax and summary assessment has created a precedent for the Provinces. The collection of savings and investment for communal or common welfare, has been described as the merit of the plan which is meant to give the U. P. villages a chance to provide for their own uplift programmes. The savings drive launched last month was directly related to the measures adopted to control prices, and the U. P.'s example was recommended. The U. P. programme covers taxation as well, and an increase in Entertainment Tax has been announced this week. The increase corresponds to what has been done in Bengal by the Finance Act. The effect on revenue cannot be large and the only feature of the tax Bill is the statement than inflation is to be checked by a higher tax on tickets. That a profession tax would be more advantageous and fruitful at present, may be pointed out by some who may urge that an increase in tax is by no means a check on private expenditure on entertainments. The more obvious line of criticism is that local authorities have a fair claim to the surcharge imposed for it is only a municipality that makes a theatre or cinema possible, and the local authorities are more dependent on new sources of revenue than the provincial government. The U. P. savings drive has not been compared to the defence week celebrated in Calcutta, for the obvious reason that collections in villages for defence loans cannot be large, and in places where landlordism is rampant, there may be no inclination to provide money intended for digging wells or building schools after the war. The U. P. anti-inflation programme in picking the Entertainment Tax instead of a modified Profession Tax, is not so effective as it appears. The increase in the price of theatre tickets may lead to a fall in income-tax or other central revenue, and it is clear that taxation of this kind will not prove a curb on spending in the sense that a capital levy can. The U. P. savings drive has been followed by a very small change in taxation; yet in a province like the U. P. agricultural income-tax or estate duty is likely to be more successful than elsewhere, and it is for that reason that one must describe the increase in Entertainment Tax as too small to be effective. The U. P. Government wants to use the additional revenue for its post-war reconstruction fund. Since the Punjab and Bombay have such funds they may be expected to raise the rates of entertainment tax some time even after the provision made in the budgets for the current year for the reconstruction fund.

Supply and Inventions

In a little over 20 months the Supply Development Committee has examined inventions and plans submitted for improving the equipment of the Army, Navy and Airforce and increase in the use of indigenous materials. The Committee was formed in September 1941 for receiving suggestions and recommending action. Its Chairman is the Master-General of the Ordnance, and it is closely connected with the Board of Scientific and Industrial Research and the Cawnpore laboratories. Since the production of substitutes for imported articles is the chief concern of authorities as well as non-officials in the war period, the Committee has received plenty of suggestions. But out of 843 ingenious suggestions received, 17 only have been accepted; but the percentage is higher than that reported by the Ministry of Supply which got ½ per cent only of practicable ideas. The most fruitful suggestions received relate to the production of hydraulic fluid for vehicles and aircraft, mineral and graphite, greases for aircraft and self-sealing tanks, rust preventatives and camouflage cream. Since conservation is as important as replacement of imports at present, many of the suggestions for rot-proofing of tetxiles etc. have been considered as important as evolving substitutes for rubber, tinplate and bitumen, materials subject to official control. Research has followed the suggestions advanced by private persons, and the remarkable progress reported in the use of waste materials forms a notable part of the work carried out. Tobacco stems and stalks are boiled to a juice and with an admixture of chalk sprinkled on woollen blankets in ordnance stores, saving them from damage by white ants, moths and other pests. Coffee grounds form the basis of a new plastic so that the manufacture of various articles can be looked for. Devices for prolonging the life of razor blades find a place in the inventions examined by the Supply Development Committee at G. H. Q. In peace time the Army encouraged the Indian Stores Department to seek its requirements locally, and its new function of stimulating research at the Cawnpore laboratories and elsewhere has been discharged in order to produce substitutes which lead to a saving in shipping space and economy in the use of scarce materials like tinplate. Miscellaneous industries like the manufacture of plastics and lubricants are likely to develop rapidly since the armed forces are anxious to get local manufactures in place of imports, rendered unprocurable by the war.

Aspects of an Industry No. 16.

MALARIA

MALARIA is one of the greatest scourges that afflict mankind. No part of the world, except a corner of N.W. Europe, is wholly free from its ravages. About a third of the 2,000,000,000 odd inhabitants of the earth have malaria. Every year at least 5,000,000 of them die from it—a total which may be doubled in a year of epidemics. Every year malaria costs the British Empire alone many millions sterling in prevention, cure and pensions. It was once common even in the British Isles. Its ravages in tropical countries can be catastrophic. Malaria is caused by a parasite transmitted by certain mosquitoes. These suck blood from an infected human being and become themselves infected: their bite, in turn, spreads the disease. There are thus two ways of fighting malaria —by exterminating the mosquitoes or by curing the human being from whom they acquire the infection. Mosquitoes breed in stagnant waters and effective drainage treatment has done much to reduce their numbers. For centuries the most effective cure for malaria was quinine, extracted from a bark which, since it was introduced into Europe from Peru by the Countess of Chinchona, was known as Chinchona bark. Quinine is still a most valuable drug, but it is not without drawbacks, and for many years chemists have been working on synthetic compounds in the hope of discovering a more efficient remedy. Much success has been achieved and two synthetic drugs, Mepacrine and Pamaquin, have been developed for the treatment of malaria. These are now being produced by the British chemical industry. Meanwhile the chemist pursues his search for still more effective drugs, striving together with engineers, entomologists and doctors to bring under control one of the worst diseases in the world.

The World's Food

The world has no real surplus of foodstuffs according to the food conference which met at Hot Springs. The conference in its agenda recognised that the accumulation of unsuitable stocks which disorganised the world market in the past were not surpluses when measured even by the minimum needs of the peoples of the world. The 'Times' therefore defined the task of the delegates as one of assessing needs and organising world's production to meet them and to recommend means of overcoming the familiar evils of mal-distribution and under-consumption. It was argued that once some method was found of ensuring that what was produced should reach the consumer the expansion of production would become mainly a technical problem. The "Times" view relates largely to the position of the United States in relation to Europe as an importer; that is why it has been stated that exporting countries should indicate how and in what commodities exporting countries will accept payment. That the British market will tend to grow smaller, so far as food is concerned, has been obvious. A permanent agricultural policy may be different from the full-blooded corn law regime that the Royal Agricultural Society asked for but the home producer is encouraged to look for less imports. Mr. Hudson made it clear that full-scale production from home sources would be wanted at least till 1947 and farmers should make their plans in accordance with that aim. There is talk of a four-year plan, new targets and greater stability. The Rome Institute of Agriculture obviously will not have any place in the food programme of the Allies, though it has been urged that the United Nations will have an organisation comparable to the I.L.O. collecting facts and figures relating to agriculture and providing a centre for co-ordination of policies. It is however not certain that agricultural policy would be shaped by advice given by the interim commission in Washington, and the U.S. farmer would certainly say that his subsidy should be kept up, if other countries are going to reduce imports in the future for any reason. Looking for new markets implies building up competitive ability, and it is fairly safe to say that export subsidies for U.S. agriculture may be more important than in the past, and their influence on world prices will not be always stabilising. There has been obviously no declaration against self-sufficiency, for the majority of the United Nations to-day are exporters of food, and their interests are not wholly compatible with those of countries looking in the first instance for relief and secondly for cheap imports in quotas. It is most unlikely that relief will be offered on conditions as to payment as in 1918-21 and the Washington organisation may not be called upon to prescribe the conditions for help from Canada or the U.S.A. But any co-operative organisation may help Canada more than the U.S.A. and such help will be wholly justified in view of exports of war materials from Canada to the U.S.A.

Fear of Invasion

Fear of invasion is not confined to Italians. The Japanese are sending out, according to recent reports, officers to examine German defence preparations; and the report follows the failure in the Yangtse valley where the control of river ports has not prevented the Chinese army from getting back its hold on the 'rice-bowl'. The speed-up in the Pacific war, promised at Washington only last month, compelled Tojo to speak of a graver emergency. The "Daily Mail's" former correspondent at Shanghai wrote recently about the roads to Tokyo. The capture of Attu has practically put the Japanese out of the Aleutians. The U.S.A. is going to have an air base there soon and the U.S. bombers will be 1,750 miles from Tokyo. Mr. Percival Finch stated that the Chinese airfields in Chekiang and the coastal provinces are now in Japanese possession. Like the Burma road, the 'bomb Tokyo' airfields are closed. The third road is that from Siberia. Air bases in Siberia will put Osaka, Tokyo, Nagoya and Yokohama within easy bombing range. It is only 750 miles from Vladivostok to Tokyo. It is even less from the Kamchatka peninsula which overlooks the Japanese naval base at Paramashiru in the Kuriles. The neutrality pact of April 1941 has been maintained for over two years; yet Japan is anxious and decided. In the recent past the possibility of Russian attack has been openly canvassed in Japan, and high officers discussed even before Pearl Harbour, the need for effective interception of Soviet bombers and asked that attention must be paid to the Soviet airfields along the railway in Siberia if and when war came. A garrison officer demanded that Tokyo must be defended at all costs. There are certain disadvantages for the defence as a Japanese officer wrote. Bamboo and paper houses make blackouts useless and all recognised that bombers would put industrial workers out of action even more than industries. Japan's growing weakness in the air must be related to the fuel economy plans evolved by the U.S. Navy. Its carriers travel longer distances; seaplanes and fighter-bombers can pick their targets in Japan. But Japan's fear of invasion shows that the present fear is not similar to the alarm created by the raid from the Hornet. It is fear of invasion—not only in the distant outposts like New Guinea but in places like Formosa because the fleet in South China is not strong enough to match its strength against a large force prepared for amphibian operations and commanding the addition to mobile equipment designated the Dick—a tank which can swim is more dangerous than those halted by ditches full of water.

The Nuffield Trust

The greatest British benefaction of all time was announced in February. Lord Nuffield's gift of £10 million for setting up a new Foundation was followed by the selection of the seven managing trustees. Lord Nuffield's shares were to be assigned to the Trust as a capital fund. The first trustees are Sir William Goodenough, Sir John Stopford, F.R.S., Professor Engledar, the Hon'ble Geoffrey C. Gibbs, Sir H. W. Hetherington, Sir Henry Tizard and Dame Janet Vaughan. The purposes of the Trust were announced at the same time as Lord Nuffield made it known that he was not retiring from business. The Nuffield trustees have been instructed to assist medical research and teaching, the organisation and development of medical and health services, scientific research and teaching in the interest of trade and industry, the pursuit of social studies, and the care and comfort of aged persons. The normal scope of activities for the Trust will be Great Britain and North Ireland, but the Trust is permitted to give attention to projects particularly affecting the Empire, and in regard to medical research the provision of scholarships and other assistance for Empire students is included. Existing trusts of Lord Nuffield's creation are also eligible for grants. The Trustees are enjoined to consult Ministers or departments of State in connection with *matters of major importance*; but they are not bound by the review of Ministers or departments in carrying out the work. The only financier in the new Board of Trustees is Mr. Gibbs, brother of Lord Aldenham who is a partner in the City firm of Anthony Gibbs and Sons, merchants and bankers. Dr. Thomas Jones reviewing Lord Nuffield's gifts has noted that Cecil Rhodes has been surpassed by Lord Nuffield. Up to five years ago the latter had given ten million sterling. Subsequent gifts for Nuffield College at Oxford medical research and hospitals raised the total to nearly £15 millions and the gift made this year raises the total to £25 millions—making Lord Nuffield's gifts comparable to those of Carnegie and others.

Post-War Relief

The four major Allies are prepared to work for the relief of Europe. The State Department is preparing the relief plans and an international staff is regarded as necessary for the U.N.R.R.A. Contributions from all the governments are expected for the Relief and Rehabilitation administration which is to take care of the Far East as well as Europe. Governments other than those of China and Russia can join the Council which is to replace the Inter-Allied Committee on European post-war relief set up on September 24, 1941. It has been noted that the first agency to deal with the post-war problems has emerged after an agreement as to joint effort. It is stated that for a couple of years after the war, the Administration is likely to continue its activities. It is known to be preparing ahead of the liberation of Europe, and Mr. Lehman, formerly Governor of New York, has been appointed Director-General and will take over the data secured by the Post-War Relations Bureau hitherto controlled by Sir F. W. Leith-Ross. The "Times" has called the important preparatory work undertaken as a message of re-assurance to helpless victims of Axis and Japanese aggression. The agreement as to relief work is to go before a formal conference, but Parliament is not likely to pronounce on its merits. The British part in post-war relief has to be determined, not only in relation to estimated cost, but to the cause of foreign policy but the U.S.A. has moved distinctly in advance of the steps taken after the last war. After the Revolution relief to Russia became more or less a controversial subject. Since Russia is an Ally prepared to work for others as well as herself, the question of relief is secondary.

Finance and trade policy fall within the scope of relief plans, and standing committees are to examine problems of health, agriculture and transport. The U.N.R.R.A.'s main task will not be one of apportioning liability for expenditure but of determining priority. North Africa will clearly be able to get on by itself when the European relief operations begin, but nothing is yet known as to what part of future expenditure will come out of compensation extracted from the enemy. The Occupied countries, fully qualified for relief, will probably abate their claims in face of the demands presented by the principal Allies and there will be less chance of conflict if the U.N.R.R. settles the issue of reparations. Since the new Council will determine what has been lost or destroyed, it will be easier for the peace conference to leave the question of reparations to the new body. It is not known if a direct turn is expected at any time from the beneficiaries of the U.N.R.R.A. How far Burma will qualify for assistance, and what sort of adjustment will result in favour of Indian evacuees, may not be a question of immediate importance but the U.N.R.R.A. assigned already for reconstruction in the Far East will look on Burma as a charge of countries other than India. To that extent, India will gain, but India will have to provide workers under the guarantee of the U.N.R.R.A. and the problems of post-war demobilisation in India must be related to the work of relief in the Orient. Relief is a guarantee of employment for some part of the additional labour force at the disposal of war industry, and export trade too may be regulated to serve the interests of post-war relief. Large-scale plans for China call for increased association of Indian effort with that of the U.S.A. or Britain, and Indian industry may well be disposed to look on the relief plans as a special sustaining factor in the transition from war to peace.

QUIZ

TEST YOUR KNOWLEDGE

1
India's railways have (a) 15,600, (b) 34,900, (c) 40,477, (d) 8,100 miles of route. Which?

2
The number of passengers carried *every day* is approximately equal to the population of one of the following cities: (a) Trichinopoly, (b) Lahore, (c) Calcutta, (d) Allahabad. Which?

3
Demurrage is (a) a form of divorce, (b) a penalty for pro-Axis wagon usage, (c) a patent medicine containing vitamin D, (d) the raising of an objection. Which?

4
What is the width of India's Broad-gauge railways (a) 4'-8½", (b) 5'-6", (c) 3'-3¾", (d) 5'-10". Which?

5
What are the standard colours of Railway Tickets? (a) 1st Class, (b) 2nd Class, (c) Intermediate Class, (d) 3rd Class.

6
The number of goods wagons loaded *every day* is approximately (a) 18,610, (b) 20,546, (c) 410,906, (d) 41,007. Which?

7
7,68,38,879 is (a) the population of the United Provinces, (b) the number of tons of goods carried one mile on the Indian Railways in one day, (c) the annual production of Iranian crude oil in one year. Which?

HERE ARE THE ANSWERS

1—40,477. 2—Calcutta. 3—A penalty for pro-Axis wagon usage. 4—5'-6". 5—(a) White; (b) Green; (c) Pink; (d) Yellow. 6—20,546. 7—The number of tons of goods carried one mile on the Indian Railways in one day.

If you get the correct answers to the majority of these questions, you have some idea of the scope of the Indian Railways' war work every 24 hours. Therefore, **travel only when you must** and let the Railways get on with their job.

South Africa's Minerals

Recent improvement in the quotation for De Beers shares in London follows the acceptance of an agreement by the producers. Industrial diamonds are in great demand for war purposes, and control of the gem trade is a recent development. South Africa is far and away the biggest source of diamonds. According to Colonel Stallard, the Union Minister of Mines, her position has improved substantially as 80 per cent of the world market for gems was reserved for South Africa under the recent agreement and she would be able to sell as many industrial diamonds as she could produce. The Diamonds Producers Association should decide from time to time the exact definition of industrial diamonds. The agreement was prepared for three reasons: to accelerate production of industrial diamonds, since Allied demand now runs into millions of carats, to provide the South African cutting industry with sufficient materials and to give diamond producers a sound position after the war. Mineral development is being attempted in a new direction. A grant of £30,000 has been made by the Union Government for investigation of likely oil deposits. Colonel Stallard said that the possibilities justified the expenditure on research and the grant would not be the last. The aim was to locate natural flowing oil so as to ascertain whether or not South Africa would eventually supply oil for herself. Interest in the many Vanadiam occurrences in the Transvaal invariably found with lead has been stimulated by reports from the U.S.A. as to discovery of Vanadian deposits there. Vanadinite deposits in the Marrico district have not been used to give concentrate on a large-scale with success. Vanadinite is known to occur in the titaniferous ores of the Tugela district in Natal. Since oil is scarce at present, the Union has developed marked interest in torbanite as a source of oil. Future development is viewed as promising, and a recent report from South Africa dwelt on the increase in local production. Six or seven years ago, the country produced 100 tons of torbanite daily, the output had risen to 300 tons per diem, estimated to give over 6 million gallons of oil per annum. The industry employs about 900 persons and has a payroll of £5,900 to £6,000 per month. A product derived from torbanite oil is bitumen, use of which as a roofing material was expanded enormously in the Union which needs also bitumen for surfacing thousands of miles of roads. In the far north, new roads have been made rapidly with the help of bitumen. A secondary industry on the Rand is the recovery of gold from old dumps. Cleaning-up implies re-treatment and in 1942 the Transvaal got 15,665 ounces valued at £12,500 mostly by sluicing. Official control of the re-treatment industry is quite complete, and the output figures etc. are available to the Union Department of Mines. The Union's minerals are being developed despite the small fall in gold production arising from the treatment of a lower grade of ore last year.

Sisal Development

The fact that sisal is more or less a rival of jute makes it necessary to follow the reports of its increased use in the war period. The Colonial Products Research Council proposes to investigate the possible uses of sisal waste, known to contain substances having industrial application. A cable received by the Associated Chambers recently noted that East Africa is specially interested in the scheme. The importance of the British East African plantation industry was increased when the N. E. I. which produced 80,000 tons of sisal per annum was invaded by the Japanese, and Manila hemp supplies were also lost. At present British East Africa with an estimated output of 130,000 tons per annum is the largest producer of sisal in the world. The main use for sisal fibre before the war was in the manufacture of binder twine and ply twine. The Imperial Institute established that sisal was eminently suitable for certain kind of rope, and the Admiralty acted on its advice. Nearly half its rope and cordage requirements are made of sisal. Now sisal rope is much more generally used throughout the Merchant Marine, and with very great success. The U.S.A. is interested in sisal supplies from Central America, and India, being a minor producer, may turn probably to sisal for rope manufacture. Fibre experts have recommended the development of sisal as a regular plantation industry in suitable districts, and the present control of hemp supplies makes it necessary to examine the possibilities of developing sisal cultivation in India.

U. S. Party Plans

The Republican party in the U.S.A. is studying postwar questions independently. The party's decision on the role the U.S.A. should play in the world will be determined largely between now and June 19, 1944 when the Republican National Convention is to meet by the activities of two new organisations, the Republican Postwar Policy Association and the Republican Council of Forty-nine. Since the party is sure to make a strong bid in the 1944 elections against the Democrats who will have been in power by then for 12 years, the work of the new organisations is being examined with great interest already. The two organisations were created last month, according to a Chicago message and both are working equally within the framework of the Republican party at present. Neither is led by or openly committed to any prospective Presidential candidate. While the Council of Forty-nine, appointed by Mr. Harrison Spengler, Chairman of the Party is preparing to study postwar problems in order to make recommendations to the 1944 Convention, the Post-war Policy Association is organising the rank and file for a forthright, unequivocal objective, international co-operation and responsibility after the war. It has been remarked that, potentially, the two groups represent the year's most significant development in the field of postwar planning. The Planning Association, known also as the Watson Committee, was the result of a meeting held on May 3 in Chicago, arranged by Mr. Densen A Watson, a young Chicago lawyer. Twelve Midwestern States' representatives heard Mr. Watson outline his ideas for a Republican movement to combat Isolationism in the party. He declared against a world super-state, but announced that after conferring with many Republicans who were strongly opposed to permitting the U.S.A. to retreat into an Isolationist shell the party should organise. The meeting was responsible for resolutions urging the establishment of a Council based on the United Nations to assume responsibility in maintaining the world order. The May conference endorsed in principle the Ball-Burton-Hatch-Hill resolution in the Senate committing the U.S.A. to a principle of maintenance of peace by international organisation. The Postwar Policy Association was set up as a result of the Chicago conference. Its work may help greatly after the Administration's victory on the trade agreements issue while it will be recognised that it is not a sectional interest but a national party that is preparing plans.

Helping Road Transport

The latest newsletter of the I.R.T.D.A. draws attention to the report that 3,000 motor vehicles will be available under lease-lend from America. An important condition of sale of such vehicles to approved civilian operators is that the Government of India may require many trucks to be fitted with producer-gas plant approved by the Provincial Transport Controller. A scheme for distribution of vehicles received has been drawn up by the War Transport Department. Trucks not taken over by the Government for its own use will be sold on conditions. Owners will be bound to use the vehicles for the purposes of lease-lend (waging war and maintaining essential civilian activity). The operators of the vehicles will be required to maintain the vehicles properly, failing which the vehicles will be taken back at Government valuation; vehicles are also liable to be taken back if the Government requires them. The Government reserves the right to ask the operator to insure at his own cost against third party risks. Lease-lend trucks—new or secondhand cannot be sold or disposed of without the permission of the Provincial Transport Controller. In authorising sales, Controllers will see to the fulfilment of all conditions laid down by the War Transport Department. The general plan is to place the new trucks at the disposal of concerns that can perform contracts, take the vehicles on an organised basis and operate them in mobile batches of, say, not less than ten. The Government will take its own requirements first from the vehicles procured from the U.S.A. and by giving the remainder for sale substantial operators willing to run the vehicles in self-contained fleets wherever required on the basis of so much per mile all found will be encouraged. The small operator's weakness disqualifies him from receiving the benefits promised by special imports. The new vehicles are not to be sold under hire purchase agreements, and profiteering through the device of allowing an inadequate price for vehicles takes in part exchange is to be guarded against. Producer-gas plant manufacturers must derive real benefits from the plan outlined. There are some 50 manufacturers now getting a share in the War Transport Departments' quota of steel. Plants are tested in Madras to demonstrate the amount of dust concentration, and a testing plant is nearly complete in Delhi while Bombay and Calcutta are also to have arrangements for testing producer-gas equipment according to Sir K. G. Mitchell. The recent reliability trial showed that 22 out of 24 types turned in satisfactory performances. Individual manufacturers remain free to develop plants from experience and experiments, and the Government has not attempted to introduce a sealed pattern.

J.K. JUTE BAGS ARE
LEAK-PROOF & EXTRA STRONG

J. K. Jute Bags and Hessians are made extra strong to withstand heavier weights and an increased number of fillings. The special sewing and twine binding of the seams provide for complete safety of goods in transit.
J. K. Jute Bags and Hessians can be used for packing raw materials or manufactured goods. Special sizes and qualities to suit any particular product can be made to order.

THE NEW ECONOMICS
VIII

I said last week that within the limits set by the growth of international economic policies, the nations of the world will attempt in the postwar period to build their economic system in more or less accordance with the principles of the new economics. We may now turn to consider in what material respects the national policies of the postwar period may be expected to differ from those of prewar times. I have said at more than one stage that the motif of national economic policy is the attainment of social good in more open defiance of the laws and notions of the old economics. And the first step in trying to foresee postwar policies is to single out the social values which will, to use the language of the old economics, be effective wants in the eyes of each nation and of its government. These social values may be broadly divided into two classes: Firstly there are those which have been handed down from the prewar period, either by reason of the frustration formerly experienced by the people, or by reason of the partial successes achieved by the governments in that respect. Secondly, there are the social values which are, so to say, a legacy of the war and which, for that reason, will be deemed urgent and legitimate even by those whose ideas are not in tune with the changed conditions. It is these two groups of social values which the Governments of the postwar world will for society at large without much defer for society at large without much deference to the representatives and champions of the old regime.

* * * *

The social values that have been handed down from prewar times are, in the main, traceable to the ravages of the great depression; and in this view the depression and the war must rank as equally powerful factors working for a re-orientation of economic ideas. There is one vital difference however, viz., that while the immediate effect of the depression was large scale unemployment, the war has caused a shortage of labour of all kinds. But their impact on the economic ideas of the masses and their power to stimulate the consciousness of social good and the eagerness to secure it is closely similar. The depression shook people out of the complacency of old ideas. It brought out the fact that the evil of cyclical unemployment was underrated, if not cynically overlooked, and that the self-curative character of trade depressions was exaggerated. The masses had the opportunity to see that the economic interdependence of nations loosely knit together by principles which there is the utmost provocation to violate can easily degenerate into helplessness in a common ruination. The social values that emerged into popular consciousness as a result of the depression related mainly to the stability of the economic system, as distinct from the old idea of equilibrium and the economic security of the individual. Both these, though they are positive in verbal form, are really negative in their practical significance. The stability of the economic system is but a corrective to the vicissitudes of staple industries affording employment on a large scale, an indifference which was sought to be justified by reference to what were called international factors. As for economic security, it meant no more than a vague demand that employment or, in the alternative, adequate unemployment relief should be provided for every individual. Neither of these ideas, however, went far towards that overhaul of the economic system which alone can enable the realisation of social values.

* * * *

The present war may be expected to impart that element of positivity which the effect of the great depression lacked. The emergence of the demand that the quantitative and qualitative adequacy of food should be ensured for all the peoples of the world is proof of the positive character of the changes in economic ideas which the war is bringing about. This is due primarily to the contemplation of the shortage of food which Europe is bound to experience after the war is over. But this is the first time in the history of the world that the Governments of the world have subscribed to the proposition that men's food must not be a mere byproduct of the game of commerce. In the last war, too, there was a

similar talk that if production for war could create more than full employment, there is no reason why production for peace should not create full employment. But such talk led the countries nowhere. A similar volte face could normally be expected on this occasion, too. But this time there are important differences which work against such backsliding. This time, the tendency to think in terms of production potential is so strong that the technical aspects of reconstructing national economic systems are more clearly envisaged, studied and understood. War production has been carried on with closer reference to internal resources than in the last war. State control has gone to far greater lengths. And the administrative capacity of departments of State, so far derisively expressed in the term red-tape, has developed greatly under the pressure of unprecedented emergencies. Above all, the infinitely graver menace of Hitler as compared with that of the Kaiser, the proven folly of Versailles and the complacency in the face of the German demand for lebensraum, the place of a country like China or Russia in the fight against the Axis, these are points of difference between the last war and this, which will make the post-war period, too, so different from the last one.

* * * *

The repair of war damage must necessarily take precedence over all other objectives of post-war policy. The destruction of property in this war is on so vast a scale that reconstruction may well call for an ad hoc communism in respect of certain goods and services.

* * * *

It will now be seen that the immediate purposes of post-war economic policy may be listed somewhat as follows. First comes the repair of war damage. And next only to that is the solution of the food problem from two different points of view, the immediate and the long term. The demands of organised labour for the redemption of promises, whether of Roosevelt's four freedoms or Beveridge's social security, will claim the attention of the Governments. But back of all these specific problems is the problem of reconstituting the national economic system with reference to the new factors created by the war. These new factors are (1) the changes in the location of industry which have occurred during the course of the war for strategic or other reasons, (2) the rise of new industries for the promotion of the war effort (3) the changes in the production plans and equipment of old industries (4) the changes in the economic relations of each country with the rest of the world and (5) the appraisement of and adjustment to new potentialities of production discovered in the course of the war. Each country will, no doubt, try in the first instance to effect, as far as possible, a complete return to the conditions of the post-war period. Big business is never big enough to take a long view. The cry for recapturing old markets will be set up by every interest concerned; and as we had occasion to note, this cry, when it issues from the more powerful sections, will be felt even in the international sphere. But our reasoning leads us to the view that the forces making for change are more powerful than those which may work for a return to pre-war conditions.

* * * *

The immediate objectives of post-war policy and the comparatively long term problem of reconstituting the national economic system with reference to the new factors mentioned in the foregoing paragraph are not, however, free from mutual conflict. The first two objects of repair of war damage and provision of food will have to be met by further additions to the charges of an enfeebled and overburdened exchequer. If we take the case of each of the three most important belligerents, the U.S.A. will find herself called upon to send large exports of foodstuffs to foreign countries, Britain will be barely able to look after her needs and Germany will indent for large quantities from all around. In the case of the U.S.A. there will be a great leeway to be made in the production of consumer's goods and her war damage will largely be confined to the National budget and exchequer. But both Britain and Germany will in all probability go farther in the direction of reducing their dependence on foreign countries for their supplies of food; for, for some time at least after the war, there will be no tendency to assume that the world has seen the last of the great wars.

* * *

It is only when the Governments take up the question of making good the promises to labour that the complexities of the problem will be recognised to the fullest extent. The fate of the Beveridge plan at the hands of the present Cabinet perhaps indicates that this part of postwar programmes will occasion a great deal of acrimony in party politics. But it is no use blaming the parties when the success of a Beveridge plan depends so much on the success of economic reconstruction. When I commented on this question in these columns a few months ago, I expressed my doubts whether Britain's national income in the post-war years will be sufficient, without any drastic reconstruction of the economic system, for meeting the expenditure involved in the Beveridge plan. Of the nations of the world, only the U.S.A. may be said to be in a position to tackle the question of social security largely from the angle of public finance. In all other countries, it will be found that nothing can be gained by shifting problems from the economic to the financial sphere. In Britain, the war has been financed by methods which will leave almost every citizen a creditor to the Nation through his contribution to the national debt. The higher income groups will find themselves paying with one hand a large part of their income as taxes and receiving with the other much less than that as the interest on their loans to the Government. If in such conditions the responsibility of social security plans of far wider scope should be laid on the national exchequer, then public finance will become the most powerful factor in determining the distribution of the national income. Add to this power to determine the distribution of income, the power to regulate currency and credit and to divert foreign trade along certain channels in preference to others, then the role of the state in the economic life of the people will be seen to be far more than at any time in the past. How and to what extent the Government will use these powers will depend on the complexion and relative strength of the parties, the state of public opinion and the state of the national economy. We have thus arrived at the stage when generalisation about post-war economic policies have to be given up in favour of an analysis of the problems of each country and the lines on which each country may be expected to tackle them. But it is certain that in every country, which is not frankly communist, the State will attempt its regulation of economic conditions and the economic fortunes of the individual citizens through firstly, public finance, secondly regulation of currency and credit and new capital and thirdly, through its command over the channels of foreign trade.

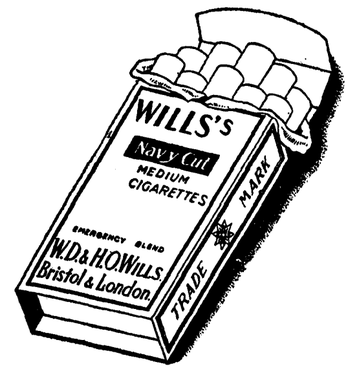
'EAVESDROPPER'

DIRECTORATE GENERAL OF MUNITIONS PRODUCTION, DEPARTMENT OF SUPPLY, CALCUTTA

Belting of all types and sizes (including V Ropes)

The import of Belting of all types, as specified below, from the United Kingdom will, henceforth, be regulated under the Panel Scheme. The importers of this class of goods for stock and re-sale are hereby requested to apply to the Director General, Munitions Production, Licensing Directorate, 6, Esplanade East, Calcutta for particulars regarding the procedure to be followed and for a copy of the Questionnaire in form WSB—Import/Pan which must be completed and returned, in duplicate, within three weeks of the date of appearance of this notice in the Press.

The demands of Belting for the Cotton Textile Industry will be assessed by the Department of Supply, Cotton Textiles Directorate, Bombay, but the Director General, Munitions Production, Licensing Directorate, 6, Esplanade East, Calcutta will arrange the allocation of the quantity of imports allowed against the requirements of the Cotton Textile Industry, to various importing firms under the usual Panel procedure. The Questionnaire in form WSB-Import/Pan should, in all cases, be completed, in duplicate, and forwarded direct to the Director General, Munitions Production, Licensing Directorate, 6, Esplanade East, Calcutta.



Importers of Rubber or Rubberised Belting are hereby informed that the import of this type of Belting will be severely restricted and that the present policy of increasing the import of other types of Belting on a scale sufficient to make it unnecessary to import Rubber or Rubberised Belting will continue. Importers should note this most carefully and should discourage consumers from attempting to indent for Rubber or Rubberised, Belting.

Group No. 13.

(a) Leather (flat and round).
(b) Hair.
(c) Cotton.
(d) Rubber (including train lighting).
(e) Balata.
(f) V Ropes and V Belts.
(g) Conveyor (Cotton).
(h) Conveyor (Rubber).
(i) Leather Belt Laces.
(j) All other types of Belt fasteners and Belt Laces other than leather.

Separate figures, as called for by the Questionnaire, must be shown for each sub-class mentioned above.

(From Our Correspondent)

WHAT exactly are the military prospects during the next few months so far as the Indian Command is concerned? It is an important question, for apart from its general interest it has a direct bearing on the finances of the country. As the monsoon has begun, big operations by land are difficult, but it is said to be the determined plan both of the British and American air forces to pursue their harassing tactics and, whatever may be the rigours of the summer, go on pounding Japanese-occupied places in Burma with bombs. This is intended to dislocate enemy activities in Burma and make it impossible for them to consolidate themselves anywhere in that country—fully justified as the results of recent bombing expeditions have shown. The main centre of military operations during the next few weeks is the Ichang area in China where the Chinese have launched a big counter-offensive to beat back the Japanese forces who have been trying to advance along the Yangtse. From the Indian side every possible help will be given to the Chinese forces particularly in the shape of supplies. A decisive victory in this area will, it is recognised, be a crushing blow to Japanese designs.

To India, however, what is of particular importance is the question whether the current financial year will see any large-scale offensive operations against Burma. A year ago the situation was so uncertain that the Southern Army had to be organised and extended in order to meet any possible emergency. And there was also some talk last year that the winter months would find British forces taking the offensive in the north-east for the re-taking of Burma. The situation to-day has so greatly improved that the Japanese forces dare not come anywhere near Ceylon or the southern coast. The position in the North-West Frontier is quiet. And on the North-East Frontier the Allied positions are so strong that they are ready to attack at any time. From talks here all that one can gather is that as it is part of general war strategy nothing can be said for certain about the future. It is possible that the re-occupation of Burma may be treated for the present as a secondary question and that during the next few months attention will be concentrated on bigger offensives in Europe and the Pacific. In that case the coming winter also may see no big change in the Indian war situation. That means that so far as the budgetary position is concerned, the year will see no startling developments.

This improvement in the military situation has enabled the Government of India to give greater attention to internal problems—anti-inflationary measures, the food question, control of cloth production and similar questions. The strength of the military forces has been so developed that there is no need now for the feverish preparations which had to be undertaken last year. As regards the Civil Defence Department which, owing to the enemy threat last year, had to evolve sudden plans and work with redoubled energy, it is now practically in a state of gradual dissolution, for this very improvement in the military situation has made it unnecessary to go forward with any extensive A.R.P. plans. The activities of the Supply and certain other Departments are said to be slowing down. On the other hand, the work of those Departments which deal directly with the needs of the civil population, has greatly increased. The new Commerce Member, Sir Azizul Haque, who has the three big Departments of Commerce, Industries and Food, holds now the leading place in the Government of India's activities. Upon the success of these three Departments of his which are inter-related, the credit of the Government of India now depends. It is now confidently asserted in New Delhi that the Food Department under General Wood has now the situation well under control.

The first success of the newly created Civil Supplies Department is the agreement which Mr. M. S. Hydari has reached with representatives of the Indian Textile Industry. The feeling in the Viceroy's Council appears to have been that the seriousness of the cloth crisis demanded instant and drastic remedies. Instead, therefore of the old procedure of having discussions first to find agreement, the Viceroy's Council decided on certain broad outlines of policy and advised Mr. Hydari to proceed with his discussions with mill-owners on the basis of this policy. The fact is that as the textile industry had in the past fully co-operated with the Army and Supply Departments and gave them all their requirements at mutually-agreed prices, they felt grieved at the turn which events had taken, particularly the suggestion that they were responsible for the soaring prices. The plea of the millowners was that the Government was itself responsible for the delay in giving effect to the standard cloth scheme and the shortage of supply in the country. Fortunately the seriousness of the crisis itself helped the parties to get together in Bombay and come to a settlement on the control scheme. Official circles in New Delhi are gratified at the results of the Bombay conference and feel that with the co-operation of the industry cloth prices can be brought down to a reasonable level. It is estimated that mill production of cloth this year will go up to 4,300 or 4,500 million yards. I have also heard the confident assertion that if the control scheme works as it should, production can be increased by another million yards. That, however, depends upon the extent of support which the industry receives from the Government in its plans for increasing production. According to the Government's viewpoint, this scheme of co-operative cloth control is the best that can be devised under the circumstances and if production comes up to the level expected this year, the industry can look forward to normal conditions before long.

Some of the statements issued by the representatives of the textile industry have created a wrong impression about the export position. As compared with last year exports have already fallen to half. A strict watch is being kept over exports in order to reduce the quantity to the barest minimum. What is allowed to be exported is partly intended for Indians in overseas countries and partly for war purposes in the Middle East and other areas. As the mills are still producing certain varieties of cloth which can only sell in these overseas markets, the Government had at the request of the industry itself to make special arrangements to facilitate exports. It is said to be the intention of the Government of India to consult the Textile Advisory Committee on the export question and come to an understanding with them on the quantity which can safely be exported without affecting India's internal needs.

HILL BIRD.

(Continued from page 1053)

of convoys in the Atlantic. Further, naval enterprise in the Eastern Mediterranean will demonstrate conclusively that hopes of a junction between the Japanese and Italian fleets are at an end, and will also prove to the British Dominions that Crete is avenged promptly. Such a venture would be wholly in line with the Casablanca decisions of January. There has been nothing to suggest that the European fronts are not independent of Pacific warfare. And of course, it is essential to convince the Japanese that the Axis is not invincible. Even more essential is it to show that nothing can be done by Japan in Siberia because part of the German army in Russia will have to be drawn off to meet a threat from the South.

There is no place for certitude in any calculation of developments this summer. The Allies have a choice of several points for invasion but it is not erroneous to suggest that the position in Southern Russia can only be eased by a move in the Eastern Mediterranean leading later to a straddle attack across the Balkans. Nor can we forget in this context that the Premier has not produced so far the equivalent of the Dardanelles campaign. There is an important difference, since Turkey to-day is neutral, and Syria etc. are held by the Allies; but it is all the more obvious that the Allies must move forward to secure the liberation of Greece in the near future. It is certainly the turn of the smallest nation after the liberation of North Africa.

(From Our Correspondent)

BOMBAY, June 16.

FOR some considerable time the Indian Posts and Telegraphs Department has been the target of attack from the press and public here. Scores of complaints inundate the pages in the dailies and the inadequacy of the service vouched by these complaints is surprising. Mails take sometimes double the normal time required for reaching a destination but the astonishing fact is that it takes a length of time comparable to that required for the main journey, for the letter to be delivered to the addressee who may be living a few miles away from the distributing centre. It is clear that the trouble with the postal service cannot be lightly summed up as one that is a mere matter of delay. A letter might travel a distance of 100 miles in ten days, another might do the same distance in two days while a third might require a fortnight to cover 20 miles. In the view of most that is a state of affairs that requires thorough investigation. An interesting feature of mail delays is that all such delays are mostly mail despatched from or to the Bombay province. A scrutiny of the other provincial papers reveals that discontent elsewhere has not burst so far out of bounds as to claim columns of valuable space.

The delay is not confined to mails only but to telegrams. Telegrams take longer to reach than letters confirming their contents. Of late, it has been noticed that telegrams do not contain the date of despatch, a device while it serves to cover the delay temporarily, at the same time detracts from the value of the messages sent. The official explanation for mail and telegraph delays that the Dept. has been depleted of its best men and that the demands of defence on traffic also tend to impair efficiency reveals an inexcusable indifference. If the efficient staff had been called away for work, the war has been going on long enough for new recruits to have been trained. The nature and extent of the deterioration should receive adequate consideration. Communications, the arteries of a country's war effort, should not be allowed to become clogged. When the United Nations are successfully fighting a world war that was waged on the spur of the moment and have achieved organisation overnight, for a well-established public service to break down and argue in defence that only one per cent of the mail is affected can only be put down to a lack of will to surmount obstacles. One per cent of the mail carried by the Department can easily bring about more financial ruin, domestic disaster and general upheaval in the orderly life of people than can be remedied by the ninety-nine per cent efficiently served.

It was only last week that the introduction of sugar rationing and the inadequacy of the quantity fixed claimed public attention. But a press note issued by the Sugar Controller contains certain interesting facts and even more interesting assumptions which call for reinforced grumbling about the sugar ration and criticism about the methods of distribution. It is claimed that production this year of 1,070,000 tons of sugar has been unexpectedly good. But those who remember that All-India sugar production figures for 1939-40 and 1940-41 were 1,241,000 and 1,095,000 tons respectively, beg to differ and maintain that the past season's production is unimpressive. It is not quite so small as to provoke an outcry against the 15,000 tons, (a bare 1.4 per cent of total production) earmarked for exports to neighbouring countries. It is certainly big enough to cause no regret that Ceylon was allowed a temporary loan of 2,000 tons. It is the Sugar Controller's assertion that all the provincial markets are well supplied with sugar that people everywhere might find hard to swallow and Bombay people hardest. Bombay has been so ill-provided with sugar that, even under rationing, adults and children are compelled to cut down their normal consumption. The responsibility, however, for the assumption that sugar is required in inverse proportion to age, that children could do with half the ration allowed for adults, that children under two who live mostly on sugar because of its glucose content and their inability to consume grains could do without sugar, rests entirely with the local rationing authorities. The fact remains that even the octagenarian gets only ten ounces, a highly insufficient quantity. How does it come about that the people could not be allowed a more liberal ration, if the trouble with regard to sugar is only a question of Black Markets and hoarding and not of real shortage as the production figure proves? It is plain as a pikestaff that the system of distribution is unsatisfactory and needs to be reorganised thoroughly. It may be pointed out that Bombay experienced a similar shortage for quite a long while after the close of the last crushing season. The present system of distribution which results in dumping for a few months on the market and providing inadequate quantities in the other months only gives a chance to profiteers and hoarders. It must inevitably cause a "shortage." This shortage could be averted if only the Control will concentrate on properly organising distribution so as to release sugar from the factories in a regular and plentiful stream through all the twelve months of the year. The Control should also ensure that each instalment of the factory product released does actually reach the consumer.

The Committee of the Federation of Indian Chambers of Commerce and Industry met here on Saturday last with Mr. J. C. Setalvad, in the Chair, Kumararajah Sir Muthiah Chettiar the President being absent. The occasion was utilised to reiterate the views of the Federation on several urgent problems such as the need for a complete ban on exports of foodgrains. A representation is to be made to the Government of India urging immediate action and calling attention to the increasing slaughter of prime cattle dangerous to the agricultural economy of the country. The present tension in the bullion markets has been attributed by the Committee to depletion of supplies. That is true though, it must be said, depletion of supplies is not the only factor making for the tension. The Federation will be requesting the Government of India to import gold and silver for a part of the sterling balances, a policy designed at once to solve, if only partially, the problem of sterling balances and relieve tension in bullion markets.

The Central Government's reply regarding the activities of the U. K. C. C. has led to little change in the Federation's view that the Government of India should establish an Indian organisation for carrying on the activities of the U. K. C. C. in India. A constructive step taken at Saturday's meeting relates to the formation of three local committees for Bombay, Calcutta and Delhi to consider the international monetary plan as it affects India's interests. The formation of the committees should be considered timely as there are indications that the plan will be published soon.

Speaking at the meeting of the All-India Muslim Chamber of Commerce and Industry on Monday last, Sir A. H. Ghuznavi discussed the reconstruction of India's economy after the war. He gave his support to certain views already familiar to the public. The Government of India should bear in mind the considerable undeveloped resources of the country if they became a party to any international agreement on post-war reconstruction. India should be given complete freedom to determine the quantity of production and consumption in any future scheme of distribution of the world's raw materials that might be evolved. He raised the question of fiscal autonomy and the protection of growing industries in the post-war period. He advocated among other things, action to improve the quality of grain distributed to the people, encouragement of the handloom industry so as to induce an increase in output and the establishment of an Indian agency to handle the export trade with certain foreign countries. As is easily seen, it is same cry against the U. K. C. C. set up by the Federation of Indian Chambers, though any direct reference to the U. K. C. C. was avoided. The justification for such a demand is simple and convincing. No Indian commercial organisation can view with equanimity a policy that allows a foreign agency to handle India's export trade.

The Ordinance controlling flotation of new companies has had but a cold reception so far from the commercial community, for the obvious reason that the present boom which the Ordinance has halted for the moment is one in which all the new issues are under Indian auspices. Besides, there is the fear of the commercial community that the new powers have as much potentialities for evil as for good and might be used to retard the progress of Indian industry. That the Indian Merchants' Chamber is subject to such apprehensions is indicated by the protest that the Chamber has recently lodged with the Government of India. The Chamber records its misgivings about the value of the proposed Departmental committee to scrutinise applications for permission. Non-official businessmen are not associated with the committee, a fact not calculated to allay the Chamber's fears that the Committee might not produce the correct results. Among the objections that the Chamber has raised are, the deprivation of the right of investors (in actual practice existing companies) by the insistence that British Indian shareholders should not acquire shares of companies outside British India including Indian States; and, two, the proposal to control bonuses and commissions. The Chamber argues that the existing provisions of the Income-tax Act which give discretionary powers to the Income-tax officer to disallow extraordinary payments are more than sufficient to deal with all cases of unusually large expenditure and that further interference with the freedom of employers in remunerating their staff are both unnecessary and undesirable. In view of these hardships, the Committee of the Indian Merchants' Chamber has put in a strong plea in the communication that the draft rules framed for the purpose of the Ordinance and Defence Rules should be circulated in advance for opinion.

Resume of Commodity Markets

SEVERAL important developments have taken place during the past week. The fluctuation in prices in the commodity markets have, therefore, been governed by the nature of these developments as far as individual markets are concerned. In the cotton, bullion and oilseeds markets there is nothing of interest to be recorded. After earlier steadiness bullion prices tended to recede towards the close.

The important development of the week is the confirmation of the order for 70 crores yards of hessian cloth by the U. S. Government and the decisions taken by the Indian Jute Mills Association relating to the executation of this order. Even last week the market was aware of this order but there was great confusion as the size of the order was very big and the price at which it was placed was well below market rates. With the increased costs of production and the very high level of prices for jute it was generally expected that the Indian Jute Mills Association might ask for an increase in the rate especially as the United Kingdom had conceded higher rates on the basis of increased costs of production.

The quantity of 70 crores yards of hessian cloth to be delivered in eight and a half months is well above the average consumption for the last two years and perhaps give the lie to the propaganda that substitutes are competing with the golden fibre and in the postwar period burlap may not be the favourite for packing material unless sold at ridiculously low rates. It was generally expected that mills might decide on an increase in the number of working hours at 60 per week to be able to cater to all demand though it was admitted that the difficulties in regard to raw material supplies and transport facilities within the country might influence any decision of the mills which meant an increase in the consumption of jute. That this question was prominent at the meeting held early this week is clear from the decision of the committee of the Association to work mills only fifty-four hours per week. Only the ten per cent of the hessian looms that were sealed have been unsealed. It has also been said that mills should for the present confine their purchases of jute to the present order and should not pay more than the maximum rates agreed upon between members. The limitation of the purchases of jute to the amount needed for the completion of the present order is with a view to providing opportunities to every mill to correct its stock position which is precarious in certain cases. It is very satisfactory to note that arrangements have been made for the speedy despatch of jute direct to mills and that bazar requirements will be attended to only after mills have been satisfied. In view of the low level at which the new order has been accepted every effort has to be made to keep down the price of the raw material. It has also been stipulated that forward sales cannot be effected without the necessary stocks of jute on hand.

These decisions have not had any effect on the jute manufactures market and quotations are considerably higher than the U. S. "ceilings". The absence of mill competition will, it is believed, enable bazaar stocks to be cleared provided the necessary shipping is available. Private imports into the United States have been banned as from the 7th instant. If exports are made from this country they will, therefore, have to be to countries other than the U. K. and the U. S.

* * * * *

While it is possible in the jute industry to limit production, having due regard to costs of production, the position is very different in the case of the cotton textile industry. In view of the acute shortage of cloth and yarn, production has to be stepped up. Without an increase in production and control over prices it would not be possible to supply the consumer his requirements at cheaper rates. An agreement was reached between the industry and Government recently and a new Control Order has been issued giving effect to the terms of this agreement. A new Board consisting of twenty-five members is to be constituted which will advise the industry on all matters. Comprehensive control over every section of the industry will, it is believed, result in a reduction of costs. Prices also will be fixed by the Board as also profit margins. With the concentration of production on certain lines and the vigorous distribution of stocks it is pointed that it will be possible to effect a substantial decline in prices.

The question of exports of foreign countries will prove to be controversial and the Government of India cannot possibly be pursuaded to place a complete ban on exports. It is also not quite desirable from this country's point of view to stop completely exports as in the postwar period we might have a surplus production and it will be necessary to develop export markets.

Easier conditions have been noticeable in the piecegoods market. With the efforts to increase substantially the production of standard cloth there might be a sizeable decline in prices. The measures that are being taken now will take sometime to take effect and we may not be in a position to

Madras, June 16.

THE bye-election to the Central Assembly caused by the demise of Mr. Satyamurti has resulted in a resounding victory for the Congress. The Madras public were at no time in doubt as to the outcome. Mr. Gadde Rangiah Naidu, the Congress candidate who won by a majority of 3 to 1 did so in spite of the severe handicaps imposed by the Government as to publicity though Mr. Sundara Rao Naidu had various advantages. The public here are in no doubt that the Justicite defeat would have been crushing, had there been no discrimination. In regard to vacant seats in the many Congress provinces where attempts are being made to bring into existence ministries composed of non-Congress and even anti-Congress elements, if and when similar trials are made, the results are bound to be strikingly similar. Official assertions that Congress popularity is on the wane might serve to impress foreign opinion but will not go down here. Mr. Rangiah Naidu's triumph proves that the clapping of Congress leaders in prison and declaring Congress Committees illegal could only add to the influence of the Congress with the masses. A suggestion has been made in the local press inviting Mr. Amery to put the matter to the test by ordering general elections to the Central Assembly. That it is undesirable to have elections in the midst of a war, will have to serve as an excuse once again.

The announcement by the Collector of Madras that a system of identification cards for buyers of rice will shortly be introduced has not come a moment too soon. Scarcity has become acute and hundreds of people have been turned away from the Fair Price Shops on the plea that certain others had managed to get twice or thrice their quota. The official assertion that there is no shortage and that the situation does not call for rationing can offer little consolation to the many who had to go hungry. It is clearly the Government's responsibility to establish proper distribution. It was pointed out to the Government that what the public wanted was rice and not the reason why there was none. That the authorities should exercise the ample powers at their command to bring to book persons who deprived fellow-citizens of their food has been understood. The Collector's announcement is the result and it it hoped that it will prove a successful remedy. Entries of purchases made each day will be made in these identity cards so as to ensure that no second purchase is made on the same day. This system is also expected to put an end to buying by people from outside the city at the City depots. Congestion at the depots will be lessened. Further, the Fair Price shops will be allowed an increase of 25 per cent in the stocks held by them and the number of shops will be increased to 400. Hitherto the hours of sale were limited to the time taken for exhausting the day's quota at each shop, the quantity to be sold being only two or three bags of rice. The Collector's announcement that there are going to be revised hours for sale, viz., between 8 a.m. and 7 p.m. with a short interval is welcomed with genuine relief.

A powerful plea for the support of heavy industries was made lately by Sir M. Visvesvaraya in the course of an address delivered at a meeting of the Mysore Chamber of Commerce at Bangalore. In support of his suggestion, Sir Visvesvaraya observed that India has been for long tied to agriculture and that a revolutionary progress in industrialisation of the country is called for. The Government's attitude towards industrialisation, past and present, came in for much adverse criticism. He referred to the fear in the public mind that the future of Indian industries is unsafe. He claimed that everything should be done to remove such fear, and the policy of the Government should be reversed or changed. He considered it necessary that the portfolio of Industries should be separated and put in the charge of a wholetime member of the Viceroy's Council. He believed that, in the present undeveloped state of the country, an investment of Rs. 1,000 crores would result in manufactured products of an approximate value of no less than Rs. 1,000 crores a year. He also advocated the creation of an Economic Council or Development Commission under the chairmanship of a prominent industrialist.

Giving his views on the subject of industries in Mysore State, he favoured a five-year plan in addition to the plan and programme of the year and the starting of at least one new heavy industry immediately after the war. He suggested that a plan might be prepared for investment of at least Rs. 5 crores in industries within the next five years. He drew the attention of the Government and the public to the eminently satisfactory results obtained after the modest attempts made in Mysore to promote heavy industries and said that the results reinforced and strengthened his opinion that any capital expenditure on new industries was bound to yield unusually high profits.

The South India Film Chamber of Commerce has a grievance. It appears on a perusal of the memorandum addressed by the Chamber to the Secretary, Commerce Department, Government of India that the grievance is founded on real injustice, and not one put out to suggest any possible interference with others' rights. The Government order promulgated not long ago restricted the length of feature films to 11,000 feet. South Indian film producers require greater length than Bombay producers. The average length of a Bombay film is 12,841 feet whereas that of the South Indian film was or is 17,026 feet. The order thus imposed a disproportionate cut on South Indian films, the cut working out to 35 per cent, whereas in the case of Bombay films, the cut is only 14 per cent. It is further pointed out that South India occupies the second place in point of output and is responsible for more than a third of the total film production in India. And yet, says the Chamber, only the Bombay film interests were consulted by the Government and South Indian interests were not given a chance to express their opinion before the cut order was decided upon. The argument that in America and elsewhere, films produced are much shorter and more interesting, being at the same time crowded with more incidents will avail little as the art of film production in India has not yet reached the standard attained by America. And a sudden cut of 35 per cent without even prior consultation with the interests concerned is drastic, and the producers cannot all at once devise a new mode of treating their stories that would require only two-thirds the normal length. The Chamber has a strong case for revision of the footage decision—really a matter for its producers. It is hoped that the appeal to the Commerce Department to increase the footage to 14,000 feet at the very least will be heeded to. The Government, by agreeing, will only be making later amends, and will not be conferring any special favour on the South Indian film industry.

IT'S A FACT—

YOU HAVE BEEN WARNED

Jute and Jute Manufactures

(By Our Jute Correspondent)

Calcutta, June 17.

As briefly announced last week, the equivalent of a 4,000 lb. bomb was dropped in the local market when it was announced that the U. S. Government had placed an order for 70 crores of Hessian cloth for delivery within the next nine months. It can hardly be maintained that the buyers chose the most appropriate moment for placing the order. In fact, a more awkward moment could scarcely have been selected. Just previously it had been announced that no more private imports of burlap would be permitted into the States which implied that all further requirements would be placed through official channels. The implications of this news was just percolating into the minds of the Bazar with a consequent weakening effect, and there is little doubt that within a few days, quotations would have sagged on the Calcutta market to the equivalent of the American ceiling rates. But before the depressant had time to work, the 70 crore order was announced, which immediately restored the waning confidence of the Bazar and raised the price of hessians up by about Rs. 1-12. Again, an order for 70 crores of hessians requires well up to 10 lakhs of bales of raw jute to make it, and between seasons, with the balance of the old crop more or less frozen upcountry by transport shortage, and the coming new crop by no means secure difficulties arise. And the coming crop is artificially restricted with a view to keep the price at a high level. Yet again, the U.S.A. have been deliberately curtailing their imports of burlap over the past year to such an extent that their offtake during the 12 months ended 30th April, the latest date for which figures are available, has been no more than 35 crores of yards. And an order for 70 crores yards represents more than a full year's normal offtake, which in this case is required in nine months and is placed moreover in one mouthful instead of being spread more or less over the period of a year. The inevitable conclusion is that the U.S.A. have *miscalculated* the extent to which they can replace jute goods by cotton, paper and other fabrics which they have been fostering, and even subsidising at the expense of jute, and are now in a hurry to remedy the mistake and renew their stockpile of burlaps. There was also the question of price, which had to be based on the U.S.A. ceiling levels of Rs. 26 for eleven porters and Rs. 19-8 for nines, in each case more than Rs. 2 under the rates quoting in the Calcutta market. Altogether the Jute Mills Committee had some hard thinking to do before a satisfactory solution could be found, and they deserve every credit, not only for the public-spirited manner in which the matter was tackled, with no thought of compromise or reservations, but for evolving the well-reasoned scheme whereby the order is to be fulfilled without unduly upsetting the trade or causing hardship to any section.

In view of the circumstances, it has been wisely decided that *working hours should* continue as at present, that is at 54 hours per week, but the sealed looms may be opened up at once and put into production. Sales of goods of any description are forbidden for the time being, with the exception of essential Government requirements which will naturally be kept at as low a point as possible. To ensure that supplies of raw material reach mills, it has been arranged that mills will take priority over all other destinations for the transport of jute, whether by river or rail. It has also been arranged that adequate supplies of coal should be provided.

With a view to securing a sufficiency of jute to cover the order at prices which will show the mills a margin of profit, maximum rates have been fixed for all descriptions, above which mills are forbidden to pay. But they are requested to purchase meantime only sufficient jute to cover their individual share of the order and returns are to be made for all purchases. In order that there may be no interference with this scheme of prices, America and the Ministry of Supply have agreed to co-operate by keeping out of the jute market till such time as the mills' requirements are met.

The whole scheme is a comprehensive one and well thought out to meet the extraordinary situation. There seems every prospect that the sections of the industry, other than the mills, will rapidly adjust themselves to new conditions. The maximum prices for jute which have been fixed are eminently *reasonable and can evoke no complaint.* For loose jute the rates are Rs. 19, Rs. 17 and Rs. 14 for Jat Tops, Middles and Bottoms, with District jute priced at eight annas less. In each case a premium of eight annas is permitted for Tossa. The principal items in an exhaustive schedule of Pucca bale prices are Firsts at Rs. 90, Lightnings at Rs. 85, Hearts at Rs. 80, Dundee Daisee 2/3 at Rs. 88 with 4s at Rs. 82, Dundee Tossa 4s at Rs. 91. Mixing Cuttings at Rs. 42 and N. C. at Rs. 43. All these rates apply equally to Old and New Crop Jute and it is noteworthy that Sellers are already accommodating themselves to the revised schedule of prices.

Last week the desirability of some measure of deflation in the Jute and Fabrics markets, though with no expectation that it would so soon be achieved was indicated. Not that the outside Fabrics market has yet aligned itself, but an ultimate decline there also is almost inevitable, in Hessians at least, for there is now practically no outlet except at controlled rates, though the Bazar continue to take in one another's washing at their own fictitious price levels.

Mill production during May amounted to just over 103,000 tons, a drop of 17,000 tons from the April figure, occasioned by the reversion to 54 hour working after 15th May. Hessians accounted for 41,000 tons or 15 crores yards and Sacking for 57,000 tons or 14 crores yards. The proportion of goods manufactured on Government account was 8.7 per cent. This production represents a consumption of 5,70,000 bales of jute, while revised May arrival figures are just 5,00,000 bales, by no means all of which went to mills. Mill stocks of raw material therefore must show further shrinkage. Estimated arrivals for the first half of June are 2,68,000 bales which, while good for this period of the season, is still not keeping pace with consumption. As stocks of goods showed an increase of only 1,393 tons at the end of May, it is evident that despatches of goods from mills during that month must have totalled 101,650 tons, an eminently satisfactory figure.

Exports of raw jute during May are returned as 72,553 bales bringing the total for eleven months of the season up to 11,56,000 bales, against 13,15,000 bales during the similar period last year. There was some covering business reported in Export jute in the earlier part of the reporting period, when up to Rs. 100 was paid for Long Group Dundee Daisee and Rs. 110 for Short Group. Since then the controlled prices have come into force and Sellers have met the situation to a limietd extent with mills in Firsts, Lightnings and Hearts at Rs. 90, Rs. 85 and Rs. 80 respectively. There are Mill Buyers of Daisee and Tossa also but sellers are unwilling to operate yet at controlled rates for these grades. Inter-Baler sales of Dundee Daisee are reported at Rs. 93 against the controlled price of Rs. 88.

In Loose Jute there has also been a limited business put through at the revised prices, mainly in supervised marks at maximum prices for Jat and District New Crop. Some old crop sales are also reported at the same rates. New Crop is not yet offering in any quantity, most of the sales reported probably being "token" contracts, just to put a sale on the books. Reports from the District continue quite satisfactory and cutting is already going on in some areas. Small imports of Weedings are arriving into the hauts.

With the self-denying ordinance which mills have promulgated, business in the Fabrics section is confined entirely to transactions with the Bazar, which continues cheerfully to trade at its own price schedules. Eleven porter hessians have been as high as Rs. 28-12 and as low as Rs. 27-12 and close at Rs. 28-4. Nines have fluctuated similarly up to Rs. 21-12 and close at Rs. 21-8 "B" Twills sold as low as Rs. 67-8 and as high as Rs. 71 and close around Rs. 70. Sales reported before control came into force include eleven porters at Rs. 28-12 June and at Rs. 27-2 October-December 20 or Bruns at Rs. 54-8 November-December. "B" Twills at Rs. 67 to Rs. 69-8 June and at Rs. 70 and Rs. 70-8 July-September. Liverpools at Rs. 73-8 ready and at Rs. 75 June. 5 lb. Grains at Rs. 140 ready, and Cuban Sugars at Rs. 86 June.

(*Continued from page 1066*)

judge the success of the scheme before some months.

* * * * *

Quite steady condictions have been noticeable in the linseed market and the latest forecast figures showing an increase of 50,000 tons over last year's figures have not had any effect on prices. The main difficulty is still one of transport and ready stocks are very low. Some adjustments have been made in Indian Shipper's prices but there is no report of any business having been transacted by the British Ministry of Food. Britain, however, has not purchased any fresh quantities of Argentine linseed.

* * * *

At the auctions of tea for consumption in India this week, there were only small offerings with a high proportion of end-of-season types. General demand was, however, very strong and broken grades recorded a rise of 6 pies to 1½ annas per lb. Leaf grades were higher by 1 to 2 annas above last quotations.

JUTE

Calcutta, June 17.

Rather quiet conditions were noticeable in the raw jute market early in the week and business was at a standstill pending the decision of the Indian Jute Mills Association regarding the purchase of jute by member mills. As it was announced, when the order for 70 crore yards by the U.S. Government was placed, that supplies of the raw material should not be purchased above the maximum rates fixed by member mills and as the market quotation for several varieties were much higher than the maximum rates, mills decided to await the decision of the Committee of the Association. They also allowed time for the market to get settled down. Sellers were at first inclined to think that it would not be possible for the mills to enforce maximum rates without fixing maximum prices for hessian as well. At the meeting of the Association on Monday, it was decided that mills should not purchase jute above the prices which have been declared. It was also agreed that mills should not sell any manufactures and also buy more jute for the present than is necessary to meet their needs under the order. In view of the above decisions, sellers have been willing to do business at the agreed maximum rates. Quite a large quantity has been passing at these rates in the last two days. Mills would have, if possible, decided to increase the number of working hours to 60 per week with a certain percentage of the sacking looms sealed but for the difficulties regarding supplies of raw jute and the lack of facilities for arranging adequate transport. Mills are now working 54 hours per week with all the looms unsealed: Till Saturday last they were working with 10 per cent of the looms sealed.

In the loose jute section a small amount of business has been reported in new crop at Rs. 17 and Rs. 16-8 per maund for Indian Jat District Middles. Marwari Tops, Middles and Bottoms were done at Rs. 19, Rs. 17 and Rs. 14 respectively. In the pucca bales section shippers did some business for export in Dundee Daisee 2/3 at Rs. 100 and Short Group Daisee at Rs. 110 per bale. Mills are reported to have bought Firsts, Lightnings and Hearts at the maximum agreed rates of Rs. 90, Rs. 85 and Rs. 80 per bale.

JUTE MANUFACTURES

Calcutta, June 17.

In the jute manufactures market very firm conditions have been noticeable. The refusal of the U.S. Government to increase prices for its latest order has not had any effect on the market. Even with the complete ban on private imports of burlap into the U.S.A. in future, there has not been any adverse effect on prices in the local market. It is felt that with the difficulty of mills in accepting further orders, foreign consumers, other than U.K. and the U.S.A., will have to come to the local bazar for their requirements and that it will be possible to dictate terms to these consumers who cannot approach the mills directly. That is the reason why the improvement noticeable towards the end of last week has been fully maintained and present quotations are fully 2½ points above U.S. ceiling prices. It was at first reported that mills might find it necessary to increase their hours to 60 per week with a certain percentage of sacking looms sealed but in view of the difficulties in regard to raw material supplies, the Committee of the Indian Jute Mills Association has straightaway decided to unseal all the looms but has not decided to increase the number of working hours beyond 54 per week. Mills have agreed not to sell any manufactures to the market without booking jute and will confine their production mainly to the latest order. 9 porters ready are quoting Rs. 21-12, July/September Rs. 21-12 and October/December Rs. 21-8. 11 porters ready are Rs. 28-4, July/September Rs. 28-7 and October/December Rs. 28-4. The highest level touched for June was Rs. 28-14. There has been some selling towards the close by second-hand dealers.

In the Heavy Goods section prices have been fully maintained. Steadier conditions have been noticeable and the quotations for "B" twills were Rs. 70 for June and Rs. 71 for July. B. twills were sold on the basis of Rs. 70 for June, Liverpool twills Rs. 74 and Cornsacks Rs. 69.

Production figures for the month of May show that there has been a decline in production to 103,041 tons owing to the reduction in the number of working hours from 60 per week to 54 as from May 15, 1943 and the sealing of hessian looms equal to 10 per cent of the total. Hessian production amounted to 33,793 tons in May against 39,719 tons in April and sacking 55,494 tons against 64,100 tons. Other kinds were 4,830 tons against 5,680 tons.

GOLD

Calcutta, June 17.

Rather easy conditions have been noticeable in the gold market during the past week and a further decline in prices has been recorded. With the improvement in the military situation it is generally felt that the present artificial prices for gold cannot be maintained. There has also been an increase in arrivals from mofussil centres. With not much of investment demand speculators have been obliged to unload their stocks The closing quotations are at the lowest levels for the week, gold ready 999 fineness being Rs. 81-14 against Rs. 84 earlier in the week; .916 fineness quoted Rs. 81-8. Sovereigns are not very much changed at Rs. 57-8. In the local market gold bar per tola was quoted Rs. 83-8. Sovereigns were two points over the Bombay quotation at Rs. 59-12.

SILVER

Calcutta, June 17.

The silver market also was inclined to be quiet in sympathy with the gold market and the quotation came down to Rs. 120. At the lower levels, however, there has been some buying and the losses have been more than regained. The late recovery has been due to reports that the Government of India have not been successful in their negotiations for getting lease-land silver from America and that it will not be possible even at a future date to get supplies of the white metal. Silver ready .999 fineness is quoting Rs. 125-4, and .916 fineness Rs. 123-4. In the Calcutta market, the quotation for Burma mint silver came down to Rs. 119-8 but is back again at Rs. 121-8.

PIECEGOODS

Calcutta, June 17.

Definitely easier conditions have been noticeable in the piecegoods market and business is on a very small scale. With the control measures adopted by the Government and the efforts to distribute as rapidly as possible all available stocks and production it is felt that a substantial decline in prices would be effected. Only this morning the Government of India have issued an order giving effect to the agreement between the Cotton Textile Industry and the Government. With the new measures it is hoped that the Government will be able to effectively control prices for cloth and yarn and satisfy the consumer. Dealers are not very anxious to dispose of their stocks but are rather nervous regarding further developments. There is a tendency on the part of buyers to postpone buying their requirements.

COTTON

Calcutta, June 17.

In the Bombay cotton market quite a large volume of business has been reported around levels fixed by the Government of India for liquidating transactions in Jharila contract sometime back. Demand for higher descriptions is especially keen but there is no large quantity offering. Broach is reported to have been done around Rs. 325. Efforts are being made to arrange for larger wagon supplies and it is believed that mills will not have any great difficulty in getting their requirements. It is feared, however, that the plans for the intensification of production of cotton cloth and yarn might suffer due to lack of supplies of the raw material.

Stock Markets to-day and to-morrow

SHARP RISE IN TITAGHUR PAPER EARNINGS

Stock markets in both Calcutta and Bombay have been very steady and business passing has shown signs of expansion. The general improvement in the tone of the markets has been mainly due to the confidence regarding the ultimate outcome of the war and the hopes of the possibility of an early major Allied offensive against the Axis Powers. Other developments during the week have also been satisfactory from the market point of view. The feature of the week is the strength of sterling securities. There was good buying demand for Indian Copper, Barnagore Jute, Calcutta Trams, and India General Navigation. It looks as if it will be difficult to get large parcels of shares belonging to sterling companies and London seems to be rather keen on absorbing all available supplies. This is in contrast to the attitude of operators in the London market in 1937 when, it will be remembered, large parcels of Burma Corporations and Indian Coppers were unloaded in the Indian markets at very high levels.

The immediate outlook is very satisfactory and, with the general yield basis tending lower, there is considerable scope for further appreciation in values.

* * * *

On the anouncement of the new order for 70 crore yards of hessian cloth there was a spurt in prices in the Jute section of the Calcutta Stock Exchange towards the close of last week. This order is the biggest for several months and coming as it does from the U. S. Government completely alters the outlook for the jute industry. In the last two years the average consumption of the United States, excluding the Pacific Coast business, has been on a very small scale and the present order which is to be delivered over a period of 8½ months, works out to an average which is considerably higher than the yearly average for the last two seasons. It was at first thought that the Indian Jute Mills Association would be able to get a price higher than the ceiling fixed by the U. S. authorities owing to the recent increase in the costs of production and that mills also would decide on an increase in the number of working hours. The new order, however, has been accepted only at the U. S. ceiling price. In order to be able to execute this order, with a reasonable margin of profit, mills have agreed that they should not buy jute at above the declared maximum rates and that, for the present, their purchases of jute should be confined only to the requirements in respect of the present order. They have also been requested not to sell any manufactures without sufficient cover of jute. By this means it is hoped to bring down costs of production and discourage unnecessary speculative activity. If only it were possible to get adequate supplies of the raw materials like jute and coal, mills would only be too anxious to increase production at the earliest possible moment and satisfy all demand.

With the assured outlook for the industry it stands to reason that jute shares have good scope for appreciation, the yield available even on the basis of the last dividends being on an average around 5.5 per cent tax-free. Mills are at present working 54 hours per week with all the looms unsealed and will continue working at the present level until the American order is completed. If there is no further increase in the cost of production, mills are sure of a high level of earnings for several months to come.

The decision of the Indian Jute Mills Association to work mills only the necessary number of hours in order to prevent an undue rise in prices for jute and the acceptance of the order at the United States ceiling price has naturally taken the wind out of the sail. Beyond the gains reported earlier in the week no further improvement in prices has taken place during the last two days. However, as pointed out above, with the assured prospects for the industry and the favourable war situation there should be a slow and steady rise in prices.

* * * *

The results of the *Titaghur Paper Mills Company, Limited* for the half-year ended March, 1943 are very satisfactory. There has been an increase in the net profit, before providing for taxation and depreciation, for the previous half-year by as much as Rs. 35.7 lakhs. The rise of 80 per cent in net earnings has been due to the continued production at the mills without any disturbance of labour and also the increased turnover as a result of the restriction in qualities which was recently decided on. It is hoped that tonnage manufactured during the current half-year will be even greater and that the results will continue to be satisfactory. As the increase in earnings has been made in the face of rising costs, which have been compensated only to a certain extent by the higher maximum prices, the Managing Agents should be congratulated on their achievement. The shareholders have every reason to be satisfied with the performance.

The increase in earnings, however, has not been of any advantage to the shareholders as it has been found necessary to provide a considerably larger sum in respect of taxation. As the accounts closed after December, 1942, the Company has to conform to the new rules regarding Excess Profits Tax that were issued recently.

The net profit, before providing for taxation and depreciation, is Rs. 73,18,959 against Rs. 47,51,972 for the previous half-year. The amount provided for depreciation is Rs. 4,24,742 against Rs. 3,86,486 on the former occasion. The provision for taxation is as much as Rs. 52,70,000 against Rs. 29,60,000. The transfer to Deferred Mill Renovations is Rs. 5,48,558 against Rs. 2 lakhs only while the allocation to Debenture Redemption Reserve is unchanged at Rs. 2.5 lakhs. The Reserve for Revaluation of Stocks and Stores receives Rs. 1 lakhs (Rs. 1.5 lakhs), while that for Labourer's Quarters and Welfare gets Rs. 50,000 (same) and that for Indian Workers Pensions Rs. 50,000 (same) and Indian Staff Pensions Rs. 10,000 (same). After paying the dividends on the first and second preferences and preferred ordinary shares the distribution on the "A" and "B" ordinary shares has been maintained at 12 annas per share, the dividend being 8 annas and the bonus 4 annas per share. The amount carried forward is slightly lower at Rs. 1,97,253 against Rs. 2,12,192 brought in.

With the increase in the potential earning capacity and the large reserves, the yield on "A" and "B" shares should be considered rather generous.

* * * *

Among the new companies which have come into being as a result of the war, *Straw Products Limited* appears to have made sensational progress. The net profit for 1942 has increased to Rs. 7,54,583 from Rs. 2,76,752 for 1940. It would have been possible for the directors to report yet further improvement in earnings but for the difficulty in regard to raw materials and the interruption to work in the factory as a result of

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, June 18.

QUITE steady conditions have been noticeable on the Calcutta Stock Exchange during the past week and prices have been marked higher in almost all sections. The strength of the market has been mainly due to the encouraging reports regarding the war situation. The new order for 70 crores yards of hessian cloth and the publication of the details regarding the cotton and yarn control scheme have also been helpful factors. With the possibility of favourable developments in the war situation and the pressure of idle money seeking investment it is generally felt that prices might be marked further higher. After the moderate rise in prices in the early days of the week there was some profit-taking towards the close on Thursday and some ground was lost. The undertone, however, is steady.

The giltedged securities section has continued steady though there has not been any appreciable improvement in prices. A slightly larger volume of business has been reported in non-terminable issues, but the quotation for 3½ per cent Paper is unchanged at Rs. 94. Among terminable loans, 3 per cent Defence Bonds 1946 were done at Rs. 102-13, 3 per cent Second Defence Loan 1949-52 at Rs. 100-6 and 3½ per cent 1947-50 at Rs. 103-14. 4 per cent 1960-70 were Rs. 110-10 and 5 per cent 1945-55 Rs. 106-14. No transactions were recorded in provincial loans. Cheap conditions continue to prevail in the money market and the treasury bills rate is unchanged at one rupee and one anna per cent per annum.

Business is difficult in debentures and the only two transactions recorded during the week have been in 5½ per cent *Chowringhee Properties* at Rs. 102-8 and 4 per cent *Darjeeling-Himalayan Railway Extension* debentures at par.

Tax-free preference issues are very scarce and a further improvement in the quotations has been recorded. Among jute mills preference, *Anglo-India* were Rs. 174 and *Chitavalsah* Rs. 151. *Northbrook* were Rs. 152 cum-dividend and *Lansdowne* Rs. 174-8 cum-dividend. *Associated Hotels* were Rs. 105-8, *Steel Corporation* Rs. 126 and *Aluminium Corporation* old preferences Rs. 138. *Rohtas Industries* were dealt in at Rs. 181 and *Sree Gopal* at Rs. 143.

Bank shares have been further firmer with *Imperial Bank* fully paids at Rs. 1,810 and contributories at Rs. 457. Earlier in the week there was an improvement in the quotation for *Reserve Bank* to Rs. 123, but with some selling at the higher levels there has been a recession in the quotation to Rs. 118-8, *Central Bank* were Rs. 66 and *Calcutta National Bank* Rs. 22.

Coal shares have been steadier and a slightly larger volume of business has been reported at higher rates. The improvement in the quotations is pronounced towards the close. *Amalgamated* were Rs. 37-2 and *Bengal* Rs. 472. *Burrakur* were Rs. 16-10 and *Dhemo Main* Rs. 14-7. *Equitable* were fully a point higher at Rs. 38. There was some buying of *East Indian* at Rs. 25. *Katras Jherriah* were Rs. 40-6 and *New Beerbhoom* Rs. 21-10. *Samla* provided the feature with a sharp rise in the quotation to near Rs. 4-8. *South Karanpura* were Rs. 5-14, *Standard* Rs. 21-9 and *Talcher* Rs. 4.

Rather firm conditions were noticeable in the Jute section early in the week. Following the placing of a fresh order for 70 crores yards of hessian cloth there was some buying and the important shares put on some useful gains. During the latter half of the week, however, dull conditions have been noticeable and closing quotations are barely around the highest levels for the week. *Adamjee* were Rs. 34-8 against Rs. 33-4 at the end of last week, *Agarpara* Rs. 26 against Rs. 25-4 and *Anglo-India* Rs. 415 against Rs. 410. *Howrah* changed hands at Rs. 63-6 and *Hukumchand* at Rs. 26-2. *Chitavalsah* were in good request being done upto Rs. 25-6. *India* were Rs. 574, *Kamarhatty* Rs. 568 and *Naskarpara* Rs. 25-14. *National* were Rs. 27-14. *Nellimarla* were nearly two points higher at Rs. 25-12. *Nuddea* were Rs. 98 and *Reliance* Rs. 62-10. *Presidency* were in good request being done up to Rs. 7-12.

The Cotton section has been rather listless, popular counters quoting lower on balance. *Benares Cotton* quoted Rs. 13-12, *Bengal-Nagpur* Rs. 31-12, *Cawnpore Textiles* Rs. 13-11 and *Elgin* Rs. 74. *Kesoram* were not very much lower at Rs. 16-3, but there were not many buyers for *New Victoria* at Rs. 9-8.

In the Engineering section *Indian Iron* and *Steel Corporation* have been slowly marked upwards. *Indian Iron* were done up to Rs. 36-4 on Thursday morning against Rs. 35-8 at the end of last week. Some profit-taking at the higher levels has resulted in a drop in the quotation to Rs. 35-14. *Steel Corporation*, on the other hand, were very firm at Rs. 27-10. There has been some enquiry for lower-priced issues and *Jessop* are nearly one point higher at Rs. 21-2. *Bhartia Electric* were firm at Rs. 14-14 while *B. I. Electric Construction* were unchanged at Rs. 13. *Marshalls* were Rs. 3-10, *Kumardhubi Engineering* Rs. 8-12 and *National Iron and Steel* Rs. 12-14. *Saran Engineering* were firm at Rs. 8 on the declaration of a higher dividend for the year ended March, 1943.

Sugar shares have not been very interesting and quite a small volume of business has been reported. *Belsund* were Rs. 11-8 and *Champarun* Rs. 37-10. *Carew & Co.* were steady at Rs. 19-6 with *Buland* and *Raza* at Rs. 41-8. *New Savan* were Rs. 16, *Darbhanga* Rs. 23-12 and *U. P. Sugar* Rs. 23-10.

In the Tea section firm conditions have continued to prevail and business has been limited only by the paucity of offers. The recent encouraging earnings reports have had a very good impression on the market. *Bishnauth* were Rs. 39, *Desai and Parbuttia* Rs. 382, *Hantapara* Rs. 765 and *Patrakola* Rs. 37-8. *Tezpore* were in good request at Rs. 17-6. *Sonai River* were done at Rs. 26-12 and *Tukvar* at Rs. 18-8. *Namburnadi* were crossed at Rs. 12-2.

In the Miscellaneous section, *Burma Corporation* were unchanged at Rs. 3, but *Indian Copper* were higher at Rs. 2-12 as also *Rhodesia Copper* at Rs. 2-1. *Frank Ross* were firmly dealt in around Rs. 8-8. *B. I. Corporation* were a shade better at Rs. 6-7. There were good buyers of *Calcutta Trams*. With the scarcity of scrips quotations were marked as high as Rs. 28-8. Profit-taking at the higher levels has been fully absorbed. *Dunlop Rubber* were Rs. 53-12 and *Indian Cables* Rs. 29. There was some good buying of *National Insulated Cables*, the quotation being marked up to Rs. 17-4. *Midnapore Zemindary* also encountered good buying with a rise in the quotation by nearly five points to Rs. 96. *Plywood Industries* were quoted Rs. 11-8. Among paper shares, *Titaghur* were Rs. 26-10 cum-dividend, *India Paper Pulp* Rs. 193-8 and *Mysore Paper* Rs. 26-12. *Orient* were very firm at Rs. 29-12 and *Bengal* at Rs. 198. *Assam Saw* have been very well held at Rs. 4-14 while *Bengal Aerating Gas* nearly touched par.

BOMBAY STOCK EXCHANGE

(From Our Correspondent).

Bombay, June 17.

THE local stock exchange, from Friday last till to-day, was rather dull. Even an easy tendency was in evidence in marked contrast to the buoyant feeling that was noticed on Thursday last. During the week-end a definitely easier trend set in consequent on reports that prices of cloth and yarn have come down in Ahmedabad. *Bombay Dyeing* which closed at Rs. 1,970 on Thursday closed at Rs. 1,930 at close of transactions on Friday. Prices were moving within narrow limits on Saturday and Monday, Tuesday and Wednesday this week. On all these days the market was dull without much business passing. On Wednesday, however, the market began to show some interest in the war news and slightly increased markings were in evidence. But to-day the stock exchange staged a recovery and *Bombay Dyeing* are quoting at Rs. 1,995. This sudden buoyancy is mainly due to the encouraging view the market has taken of the entire situation after the publication by the Government of the order setting forth measures to control the prices, production and sale of cotton cloth and yarn and to prevent hoarding by manufacturers and consumers. The emphasis on increased production removes to some extent at least the effect price control may have on the earnings of mills.

The giltedged section is steady with 3½ per cent Government Paper quoting at Rs. 94.

(Annual General Meeting on 29th June, 1943 at 3-50 p.m.)

Audited accounts for the year ended 31st December, 1942:—

The accounts disclose profits as follows:—

	Rs.	A.	P.
Ledo .. .. .. Profit	2,41,770	12	6
Nagrijuli .. .. .. „	74,599	0	11
Total .. Profit	3,16,369	13	5

On transfer of above to Profit and Loss Account, and after sundry adjustments, there is a balance at credit of that Account of Rs. 2,77,224-6-7, of which have been transferred Rs. 50,000 to Reserve and Rs. 50,000 to Contingencies Reserve, to meet expenditure on renewals and replacements of buildings, machinery, etc., that will be necessary after the conclusion of hostilities.

Dividend.—The Directors propose to pay a dividend of 20 per cent and to carry forward Rs. 47,224-6-7.

Shortly after the commencement of the season the Ledo factory buildings were requisitioned and manufacture ceased after a crop of 552 maunds had been made. Compensation has been received for loss in crop.

Estimates for 1943 provided for a total crop of 8,400 maunds at an outlay of Rs. 3,37,442, including inland freight and sale charges. Ledo is, however, still out of production but compensation is to be awarded to the Company for loss in profits on this account. The tea area is being kept in good cultivation.

‡ Arrears of Dividend on Preference Shares Rs. 18,25,000. Depreciation Fund included Rs. 12,77,54,965 (e) Bearer bonds of Rs. 500 each issued as per in July, 1943 repayable as per on 1st July, 1945, with Option repayment at all or any of the debentures at any time as per after 30th June 1933, on 6 months' Notice. The date for repayment was extended to 30th June, 1951, with option repayment in whole or in part on 1st December, 1944. (f) Shares numbered 1-4,000 have priority as to dividend over any class or shares regarding repayment of capital. For dividend purposes both classes of preference shares rank pari passu with each other and participate equally with the Ordinary shares as to any dividend declared in excess of 6% per annum. (g) Issued in Dec., 1938 at 98 per cent. redeemable by operation of sinking fund of 1½% per annum, plus redemption 31st December, 1943. (h) Issued as per on 31st Dec. 1936 repayable as per 31st December, 1951. Option to holders for conversion into Ordinary Shares at 21/- Option redemption in whole or part on 31st December, 1943 after six month's notice. Option to holders for conversion into Ordinary Shares at 21/- Option redemption in whole or part on 31st December, 1943 after six month's notice. Option Commencing in 1941 Option redemption in whole or in part on any interest date after 31st December, 1943 after six month's notice. Option redemption in whole or in part at 2 per cent. premium on any interest date after 31st December, 1943 after six month's notice. Option to holders for conversion into Ordinary Shares rank for dividend in the following year after conversion. Interest is paid at 4 per cent. in respect of year on which option was exercised (j) After 5 years on ordinary Shares eligible for half of the surplus profits (k) 4½ per cent guaranteed convertible registered mortgage debentures (unconditionally guaranteed as to principal and interest by the Indian Iron & Steel Co., Ltd.) Issued as per in May, 1937, repayable as per calst January 1947, option redemption in whole or in part at 5 per cent premium on six months' notice on any interest date after 1st January, 1941. Option to holders at anytime up to 1st January, 1947 to convert into Ordinary Shares at Rs. 10/- each. (l) Entitled to a cumulative dividend of 25 per cent, premium, after the dividend on preference shares and 5 per cent. on Ordinary shares (m) Repayable after 1946 with the option of redemption after 1940. (n) Declares 5 per cent being arrears for 1937-38—1939-40.

(Continued from page 1072)

Mill shares were definitely easier till Wednesday. Pending the issue of the control order operators and investors were in no mood to do much business. Considering the fact that mill-owners were consulted by the Government in this regard the easier feeling that was witnessed in the market could be explained only as a precautionery move on the part of operators. It was clear that buyers were not prepared to enter into any transactions before the Government order was issued. Now that the order is published the market has taken on a more optimistic view with Bombay Dyeing in the forefront. They are at a level that is higher than the highest quotation touched last week. To-day's closing quotations are: *Bombay Dyeing* Rs. 1,995 (Rs. 1,970); *Central India* Rs. 467 (Rs. 435); *Gokak* Rs. 353-8 (Rs. 342); *Indian Bleaching* Rs. 232 (Rs. 226); *Kohinoor* Rs. 856 (Rs. 823); *Century* Rs. 850 (Rs. 809); *Phoenix* Rs. 750 (Rs. 778); *Simplex* Rs. 322 (Rs. 309) and *Svadeshi* Rs. 577 (Rs. 531).

The **Steel** section has been steady throughout the period under review. *Tata* Deferreds are Rs. 2,047-8; *Tata* Ordinaries Rs. 441-8 and *Indian Iron* Rs. 36.

Among miscellaneous shares, *Premier Construction* were very prominent eliciting fresh and persistent enquiries. This share, which was quoting at Rs. 167 on last Thursday, has been steadily improving to quote at Rs. 181. Another engineering share which has shown steady progress in the past week is *Alcock Ashdown* which is quoting at Rs. 935. This sudden spurt in prices of these two shares now is probably due to expectations of higher dividends as the companies specialise in ship repairs and other war time engineering jobs. Yet another share to show progress is *Belapur Sugar* which is quoting at Rs. 238 as against Rs. 233 a week ago. *Bombay Steam* are Rs. 585 and *Shivrajpur* Rs. 68. *Associated Cement* are dull at Rs. 233. *Andhra Valley* Rs. 1,890; *Tata Power* Rs. 1,820; *Tata Hydro* Rs. 198 and *Scindia Steam* Rs. 84-4.

(Continued from page 1071)

the stopping of supply of electric energy by the Bhopal Electric Supply. It is satisfactory to note that the Company has installed its own power plant and is now working with a capacity which has been increased nearly twice. The profits for 1942 have been struck after providing for depreciation to the extent of Rs. 1,25,549; of the balance Rs. 2 lakhs has been placed to Reserve Fund and similar sums to the Repair and Replacement of Machinery fund and the Dividend Equalisation Fund. The dividend on ordinary shares has been maintained at 50 per cent.

It is noteworthy that earnings at the level of 1942 are equal to the amount of ordinary capital.

"WATCH DOG."

RAJNAGAR TEA COMPANY, LIMITED

NOTICE

The Fiftieth Ordinary General Meeting of the Members will be held at the Registered Office of the Company, No. 4, Bankshall Street, Calcutta, on Tuesday, the 6th July, 1943, at 12-10 p.m. for the following purposes :—

(1) To receive the Directors' Report and the Audited Accounts for the year ended 31st December, 1942.

(2) To declare a Dividend.

(3) To elect a Director. Mr. B. C. Studd retires by rotation from the Board, and, being eligible, offers himself for re-election.

(4) To elect Auditors for the current year.

The Transfer Register will be closed from the 28th June, 1943, to 6th July, 1943, both days inclusive.

By Order of the Board,
SHAW WALLACE & CO.,
Managing Agents.

Calcutta, 18th June, 1943.

THE NEW SAMANBAGH TEA COMPANY, LIMITED

NOTICE

The Fortieth Ordinary General Meeting of the Members will be held at the Registered Office of the Company, No. 4, Bankshall Street, Calcutta, on Tuesday, the 6th July, 1943, at 12-5 p.m., for the following purposes :—

(1) To receive the Directors' Report and the Audited Accounts for the year ended 31st December, 1942.

(2) To declare a Dividend.

(3) To elect a Director. Mr. B. C. Studd retires by rotation from the Board, and, being eligible, offers himself for re-election.

(4) To elect Auditors for the current year.

The Transfer Register will be closed from the 28th June, 1943, to 6th July, 1943, both days inclusive.

By Order of the Board,
SHAW, WALLACE & CO.,
Managing Agents.

Calcutta, 18th June, 1943.

KINGSLEY-GOLAGHAT-ASSAM TEA COMPANY, LIMITED

NOTICE

The Forty-seventh Ordinary General Meeting of the Members will be held at the Registered Office of the Company, No. 4, Bankshall Street, Calcutta, on Tuesday, the 6th July, 1943, at 12 noon, for the following purposes :—

(1) To receive the Directors' Report and the Audited Accounts for the year ended 31st December, 1942.

(2) To declare a Dividend.

(3) To elect a Director. Mr. B. C. Studd retires by rotation from the Board, and, being eligible, offers himself for re-election.

(4) To elect Auditors for the current year.

The Transfer Register will be closed from the 28th June, 1943, to 6th July, 1943, both days inclusive.

By Order of the Board,
SHAW WALLACE & CO.,
Managing Agents.

Calcutta, 18th June, 1943.

STRAW PRODUCTS LIMITED

	Year ending 31st Dec., 1940	1941	1942
	Rs.	Rs.	Rs.
1. Net profit	2,76,752	7,52,528	7,54,588
2. Reserve Fund	...	2,00,000	2,00,000
3. Repairs and Replacement of machinery	...	...	2,00 000
4. Dividend Equalisation Fund	...	...	2,00,000
5. Dividend percentage	20%	50%	50%
6. Amount of Dividend paid	1,50,000	3,74,000	3,74,000
7. Balance carried forward	1,26,752	3,04,875	84,059

The profits for the year ended December, 1942 after making all usual allowances and bonus to staff and Labourers amounts to Rs. 8,80,133-9-2 in which has to be added the amount brought forward from last year, namely Rs. 3,04,375-12-10, making the total sum available Rs.11,84,509-6-0. The Directors recommend that this sum should be disposed off in the following manner :

	Rs.	A.	P.
1. Depreciation for the year	1,25,549	9	6
2. Dividend for the year ending 31st December, 1942, on 74,980 Ordinary Shares at Rs. 5 per share (out of which an Interim Dividend at Rs. 2-8 per share has already being paid)	3,74,,900	0	0
3. Reserve Fund ...	2,00,000	0	0
4. Repair and Replacement of Machinery ...	2,00,000	0	0
5. Dividend Equalisation Fund	2,00,000	0	0
6. Balance to be carried forward to the next year	84,059	12	6
Total ...	11,84,509	6	0

Due to the poor yield of the crop for the year under review, the management experienced considerable difficulty in obtaining the required raw-materials. Bhopal Electric Supply firstly reduced and then completely stopped the Supply of Electric Energy to us. Such and other allied difficulties were responsible for the closure of our factory for a considerable period. The problem was solved by the Directors by installing and starting their own Power Plant. It may also be brought to the notice of our Share Holders that due to frequent transport difficulties, our customers could not obtain deliveries of their booked orders and at our end, abnormal accumulation of stock could not be helped.

The extension of the Factory, which was taken in hand last year could not be finished due to the difficulties in obtaining necessary materials.

WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

The monsoon is in full swing; and so is the monsoon months season in finance. Surplus cash is piling up in the hands of banks. The Imperial Bank establishes yet another record for deposits at Rs. 189.25 crores. Deposits maintained by member banks with the Reserve Bank show a sharp rise of Rs. 6.39 crores to Rs. 59.57 crores. The consolidated statement of scheduled banks which is available for the week ended June 11 shows an expansion in demand liabilities of Rs. 150 crores in the space of a year, while time liabilities during the same period have gone up by nearly Rs. 33 crores. Since September 1, 1939, current account deposits of banks have increased by Rs. 274 crores, fixed deposits showing an increase of Rs. 27 crores. That is to say, the total increase in deposits of banks since the beginning of the war is Rs. 301 crores. This is an important point to bear in mind in connection with current discussions on inflation. The banks have used only a very small part of these sums towards trade advances, the increase in advances since September 1, 1939 being about Rs. 45 crores. About Rs. 40 crores has been retained to strengthen the cash position. The balance represents the additional investments made by banks in government securities and treasury bills. It may, therefore, be inferred that there has been so far no credit inflation.

The combined deposits of scheduled banks as on June 18 must show further increase, as the Imperial Bank alone shows a rise of Rs. 2½ crores in the week. Short credits have been in super-abundant supply, with inter-bank call money rate quoting nominally at ½ per cent in Calcutta and ¼ per cent in Bombay. Even in Madras, the turn-over in inter-bank deposits is greatly reduced. On the weekly treasury bill tender day, applications show a rather considerable fall to Rs. 11.11 crores, but the average rate of accepted tenders remains unchanged at rupee one and anna one per cent per annum. This rate has remained in force for six weeks in succession; and it must be concluded that the Reserve Bank is not unduly anxious to lower the rate, perhaps arguing that this rate must not be considered unfavourable in view of the floating debt reaching the high altitude of Rs. 138 crores. *Indian Finance* has advocated the adoption in India of Britain's policy of bringing about an understanding with banks as regards a steady treasury bill rate. From this point of view, the continuance of rupee one anna one as discount rate may be looked upon as proof that the British example is being copied. Nevertheless, an important point to be borne in mind in this connection is that the sharp seasonal differences that are a marked feature of India's finances do not obtain to the same extent in Britain. In simple terms, with the structure of Indian finance as it is and with its main determining factor being the seasons, there is a case for two different rates in this country, a rate for the cold weather and a rate for the monsoon months. The rate for the cold weather should be roundabout rupee one and annas two per cent per annum, whereas the monsoon months' discount rate should be in the vicinity of annas twelve per cent per annum. We believe that the Reserve Bank authorities, whose control of the money market is more and more effective, will have no difficulty in evolving a gentleman's agreement with bankers on the basis of one rate for cold weather and one rate for the monsoon months. Sales of three months intermediate bills between June 16 and June 21 are quite satisfactory at Rs. 4,11½ lakhs. Tap bills will continue to be sold at the unchanged rate of Rs. 99-12-0 per cent.

The returns of the Reserve Bank for the week ended June 18 show an expansion of currency against sterling securities for Rs. 2 crores. In the fortnight ended June 18, expansion of currency against sterling securities is Rs. 12 crores. Rupee coin has gone down by Rs. 38.09 lakhs in the week ended June 18 and by Rs. 1.83 crores in the fortnight ended June 18. Active note circulation has expanded by Rs. 1.29 crores in the week and by Rs. 9.90 crores in the fortnight. Central Government's deposits are less by Rs. 3.11 crores, while the deposits of provincial governments are more by Rs. 1.29 crores. The deposits of banks have increased by Rs. 6.39 crores in the week and Rs. 6.46 crores in the fortnight. Foreign balances held in the banking department are higher by Rs. 3.76 crores during the week and by Rs. 80.24 lakhs during the fortnight. That is to say, the net increase in the sterling assets of the Reserve Bank in the fortnight is nearly Rs. 13 crores.

A representative of "Indian Finance" was recently in Simla and Delhi for discussions with the Finance Member and the Examiner of New Capital Issues with regard to the several points in the new capital control order which required clarification. An explanatory communique has now been issued by the Government; and this clears up some of the issues raised in "Indian Finance" in earlier numbers. It is now clear that, in effect, the new defence rule means exactly what was suggested in these columns, namely, that no new company can be brought into existence without the consent of the Government and no existing company can raise any additional capital without the consent of the Government. Exemption has been, however, granted in the case of those new companies whose signatories to the memorandum of association subscribe for a capital of Rs. 1,000 or less. A company may thus be registered without the sanction of the Government so long as the total number of shares subscribed by the signatories to the memorandum of association does not exceed in value Rs. 1,000. If the company requires further capital, it will have to obtain the sanction of the Government before such an issue can be placed on the market. But, if the company can carry on with capital of Rs. 1,000 or less, no sanction of Government is necessary.

On a superficial view, one may think that companies with a capital of Rs. 1,000 or less cannot function. We use the words "on a superficial view" deliberately. For, as everyone knows, the joint stock plan of business enterprise has, in recent years, been pressed into service as a tax evasion device. Every limited company becomes entitled to the minimum standard profit of Rs. 36,000 for

(Continued on page 1111)

TREASURY BILLS

India

Tenders for Rs. 8,00,00,000 of three months' Government of India Treasury Bills were opened on Tuesday, June 22. Total amount offered was Rs. 11,11,00,000.

Tenders at Rs. 99-12% were accepted in full and those at Rs. 99-11-8% were allotted approximately 72%. Total amount accepted was Rs. 8 crores, the average rate of accepted tenders being Re. 1-1% per annum.

Tenders for Rs. 8,00,00,000 of three months' Government of India Treasury Bills will be received on Tuesday, June 29 in Bombay up to 11 a.m. and up to the close of business on Monday, June 28 at other centres. Successful tenderers should make payment on Friday, July 2. Other conditions are as usual.

Three months' Intermediates will be sold from June 23 to June 28 at Rs. 99-12%, subject to the conditions previously announced (viz., sales can be stopped at any time without previous notice, if Government think it necessary).

Three months' Intermediates sold from June 16 to June 21 amounted to Rs. 4,11,50,000.

During the week ended June 18 Government of India Treasury Bills for Rs. 6,83,50,000 were sold in favour of the Issue Department of the Reserve Bank of India.

Finance Abroad

Thursday Morning.

The major development abroad is the conclusion of a truce between the mine workers and the U.S. Government. The coal mine situation worsened before it improved. A day's turnover on Wall Street dropped to 330,000 shares only, and share prices sagged. Rapid improvement has, however, taken place since. U.S. Steel rose by half a dollar on Wednesday after a quiet opening. The market leaders like General Motors went up, and the effect has not been missed in Bombay. The strike was big news while it lasted, and London markets were quieter, not merely on account of a fear of tighter money conditions at the turn of the half-year. The London money market last week was said to show no change. Treasury bills for £90 millions were placed at an assured rate of 1 per cent. The Banks were said to be well supplied with funds though not ready takers of bills and lenders below ¾ per cent. The Weapons Weeks do not seem to be going on as in March and April; but savings have risen this year and new war bonds rather than old stocks have found eager buyers.

This week has seen a sudden brightening up of the giltedged outlook in London. The 5 per cent Australian Commonwealth loan has not weakened on account of the Cabinet crisis in Canberra. The early maturity makes it a very valuable security for some holders. The firmness of the market hardly raised the quoted prices of British Funds, but the Home Rail market has shaped better. The importance of Rails for the investor remains great. Statements by company chairmen like Sir T. Royden this year indicate that stockholders must be reconciled to a transition which is not awkward. Traffic is still rising, and the venue is better in spite of rising working expenses.

The second anniversary of the Russo-German war has produced no estimate of the cost of the war for Russia, the cost of debt service in the future or the proportion of war costs to the national income. Though the Royal Institute of International Affairs has evaluated the war effort in terms of national income for the Axis and Britain as well, it has not done so for Russia. All the news that has appeared is that a recent internal loan for 80 milliard roubles went off very well. But the rouble still is an elusive figure of speech, and the world remains under the impression that the financial system broke when the German invasion took place. That money counts for little in Russia is understood, but facts made known as to the strain in Japan find no counterpart in details as to Russia's problem. The Soviet Union's oil output, steel output and wheat surplus are conjectural quantities. So little is known about the new ally that the Countess Strabolgi's statement that everything depends on the food supply in the next few months cannot be promptly challenged. Russia's steel production in the Urals may be recovering rapidly and Rostov's factories may be restored soon, but the financial world knows nothing of Russia, and reconstruction will evoke no sympathy. Russia as a claimant for Allied relief may be supported strongly, but the shareholders of Lena Goldfields, who found non-belligerent Russia a very difficult debtor, are likely to start a campaign against help of any kind. It may do Russia some good to stew in her own juice as she defaulted on her debt and dealt harshly with trade debts. The report that the inter-allied financial agreement is under active consideration after the conclusion reached as to post-war relief makes it certain that a place will be found for Russia. A mortgage of gold production for some years may be an easy means of approach, and Russia, after Canada, the fourth producer of gold may have gold to sell. That the U.K.C.C. sends goods to Russia on behalf of the Allies, and no efforts are made to draw gold into India may excite surprise. A strong, urgent demand for gold in exchange for war supplies may not accord with lease-lend doctrines, but India forced to sell jute, tea, etc., is not bound by lease-lend except with the U.S.A., and could collar some of the gold. There has been a suggestion that hessian should be shipped to the U.S.A. only in return for gold and certainly applies to Russia as well as the U.S.A. The U.S.A. cannot possibly object in view of the long-standing break in trade relations with the Soviet Union. India has a large surplus of exports. Neither sterling nor rouble can be deemed adequate returns. It should be possible for Russia to give gold at prices fixed in rupees—an arrangement more satisfactory than offering it through London at the rate of 8 guineas per ounce. As Indian exports to Russia in 1942-43 showed astonishing growth, the demand may be deemed just and proper; and as for the future, the imposition of a duty on gold imports and another on gold exports may procure for India the treasure needed to stiffen the currency reserve which contains too much sterling and too little gold.

The sharp rise in oil shares is less important than a note on the Cable and Wireless results for 1943. As was predicted revenue rose, so did operating expenses even after the losses in the East. The result is that profits estimated conservatively after taxation permit a dividend of 4 per cent only for the Holding Company. The stock is quoting below par for that reason, and the firmness noted in May has disappeared now. In spite of the extension of export control London has put up the prices of rayon shares. Shippings, too, have come in for attention after the news that six major shipping companies are seeking permission to operate trans-ocean air services. That will certainly destroy the monopoly secured after the Cadman Committee reported. The outlook for British shipping in spite of possible replacement of tonnage is not too good, and concessions may be forced out of the Government. Not many will overlook the fact that the U.S.A. has got its civil air transport plans ready while Britain lags behind despite official assurances after the Shelmerdine Committee's recent report. Private enterprise can yet be trusted to make good the effects of delay, such and the shipping companies' air lines may be appreciated in the future by India when civil aviation has to be developed on sound lines. Coast to coast air services and a mail subsidy may make much difference to India, and the British Indian shipping companies will not fail to make a similar claim before the war ends. There is certainly special compensation to be received, and the railways having got leave to run air services, it is only logical to give the same permission to shipping companies.

The first statement of Mr. Lehman after the setting up of the U.N.R.R.A. suggests that the U.S.A. has a big interest in exploiting trade revival after the war. To avoid surpluses in producing countries world consumption has to be restored quickly, and the U.S.A. is keen on relief so as to get good customers afterwards. The statement last week must be specially related to earlier statements on U. S. postwar policy. The National Resources Board (linked with the present Administration) has drawn up a plan; the Republican Opposition is drawing up another. The U.S.A. has not lost interest in postwar planning, and recent success in settling the affairs of French Africa may produce greater if quieter co-operation between Britain and America.

The U. S. military budget suggests that decisive victory will not be followed by disarmament. For an army of seven million men, the U. S. Congress has been asked to give $71¾ billions. The House Committee approved, and the Appropriation Bill has gone up to Congress. Not the Navy alone is to get big money. The Senate voted $27.63 billions last week for the Navy. The Army (which includes the U. S. air force) asks for more, and spending at three times the rate in the last war is welcome to the Chief of Staff. The Lower House voted for the prompt abolition of the domestic bureau of the U.S.O.W.I. and the grant for propaganda was docked by another resolution. These are minor setbacks for the Executive which has got over the trouble produced by 500,000 men stopping work on June 20.

The War Production Board has corrected the impression produced by Mr. Patterson's statement about the lag in production caused by over-confidence.

The report as to German business penetration in the occupied countries excites little surprise. The U.S.O.W.I. collected facts which are known. In Yugoslavia, Greece and Hungary too, the Nazis have staked out valuable claims in recent years. The Anschluss was secured by German steelmasters as much as the Austrian Nazis. The I. G. Farbenindustrie's role is different from that of other trusts. Banks have acquired existing undertakings not only in Bohemia and Moravia and expropriation of Jews has been thorough. The least pleasant aspect of the New Order has been the acquisition of foreign interests by men who hope to outlive the Nazi party.

How to Stop the Rot

There are signs to-day, however faint, that the economic situation in India, comprising, as it does, a large-scale inflation of currency and of more or less acute shortage of commodities, has begun to exercise the minds of the Government. While civilian supplies and price control are largely the ...main of the provincial governments, the responsibility for ...ralising, as far as possible, the inflationary forces rests ...n the Government of India. The Ordinance in respect of ...vance payments of the Excess Profits Tax is the first sign o. the Government's recognition of the fact of inflation. But it will hardly be pretended that advance payments of E.P.T. and the multifarious and, if only for that reason, chaotic measures of price control will suffice to secure the necessary improvement in the economic conditions of the country at large. Clearly much more has to be done by way of reducing the volume of currency. Price control measures have got to be designed with greater care and circumspection. The administrative efficiency has to be improved a great deal. And above all, measures have to be taken to overcome the undue shortage of consumer's goods of every description. While these are practical measures, which can be taken only against a clear understanding and wider acceptance of the basic facts and principles, the controversy as to whether or not there is inflation in this country continues to befog the public mind and reduce the pressure of public opinion on the Government for undertaking the necessary measures.

It is necessary, therefore, that an attempt should be made again to put together in their proper setting and with a sense of proportion, the various facts of the situation to-day and assess the relative strength of the various factors in operation. Taking the question of inflation at the outset, we, for our part, have no hesitation in observing, in spite of the fact that we have held the view that inflation to-day is rampant in the country, that the rise in prices in India during the last two or three years is in many ways like the fall in world prices during the Great Depression. In both cases, the monetary and the non-monetary or economic theories for explaining the change in prices have been brought together in sharp contrast and conflict. It is maintained now, as it was then, that nearly all the economic changes, and particularly the changes in the price levels, can be explained by the changes in the monetary factor. The monetary explanation of changes in economic conditions has, by its very nature, a simplicity which convinces some as easily as it makes others sceptic and incredulous. Those, who attempt to explain the rise in prices by recounting on the changes on the commodities side, have the advantage that their arguments have all the look of a laborious empiricism instead of easy theorising.

After more than a decade after the depression, it is possible to see things in clearer perspective. It will now be generally agreed that it is less a question of choosing between two rival theories than of bringing them together to facilitate a more comprehensive and clearer understanding of the economic phenomena which comprised the Great Depression. It is impossible, in the nature of things, that the facts of economic life should have any partiality either for the monetary or for the economic theory. For, every change on one side must have its counterpart on the other. So that escapist and inconclusive as it may seem, one has to admit that, in such a case, both sides are wrong in one sense and both right in another. They are right in affirming the validity of their view, and wrong in denying that of the other. The truth would seem to be, as far as the economic situation in India to-day is concerned, that the facts adduced on both sides are incontrovertible and that, therefore, the only possible deduction therefrom is that, whatever may be the cause of the alarming rise in prices in India to-day, the cure for them should be sought, neither purely on the monetary nor purely on the commodity side. A solution can be obtained only by attacking the problem from both sides.

One has only to trace the changes that have occurred in the monetary and commodity sides of our national economy during the last three years, to realise that any solution that is based unduly on one theory or other is bound to fail. It should be remembered that, though the increase in the note issue has gone on steadily, the rise in prices has only recently assumed a real inflationary pace. The fact, that the steeper rise in prices coincides with the more acute shortage of goods, is one that ought to damp the fervour with which one theory or the other is held. If one were to attempt a colourless chronicle of events as they occurred, so far as prices and currencies are concerned, one would see that, the preference of certain sections of the public in the earlier stages for hoarding silver rupees and the complete necessity in the later stages for hoarders to turn to goods as a more reliable store of value are facts which do not easily fit into any unduly rigorous or clear-cut theory. The activities of hoarders have all along been a highly disturbing factor. In the earlier stages, silver rupees were accumulated and this tendency was neutralised only by the Government limiting the date of their currency. But the propensity to hoard has been accentuated not a little by the temptation to dodge the Excess Profits Tax by various devices, all of which end in the secretion of large amounts of legal tender money. It has been said, with what truth it is difficult to determine, that there are many cases in which expenses have been magnified and the margins secured and secreted by the owners for themselves. Money which is so secured by dodging the taxes, is not easily invested or otherwise utilised, without the risk of being caught in the meshes of the tax collector. It is these literally unlawful gains, which, like a burglar's loot, have to shun the light of day, that seek various outlets, in diamonds and precious stones, in gold and silver, in laying up stocks of commodities, according as the conditions of the time suggest or permit. While the chronological sequence of these events is not helpful to the establishment of a sequence of cause and effect, there can be no questioning the two basic factors of our economic situation today, namely, the large-scale increase in the volume of circulation, and the very considerable shortage of consumers' goods. Together, they have brought about a giddy rise in prices which is causing a great deal of hardship. But neither the additions to currency nor the shortage of goods relatively to demand show any signs of mitigation; and at this stage a highly academic or judicial decision as to the validity of one theory or other is neither possible nor practically useful. As we have mentioned earlier, the truth would seem to be that the present economic problem in India cannot be solved except by an attack from both the money side and the goods side.

We may consider at first the measures that have to be taken in order to mitigate and neutralise the inflationary forces at work. It will be conceded on all hands that, as a beginning, it is incumbent on the Government to declare that they recognise the harm that inflation has already done, and they bind themselves not to effect any further additions to currency or allow any further increase in the accumulation of the sterling balances in London. Such a declaration can be of little avail if measures are not taken on the one hand,

to prevent the growth of sterling balances in London and on the other, to obviate the need for further additions to currency at home. A beginning in such measures has already been made by the publication of the Ordinance in respect of advance payment of Excess Profits Tax. The energetic application of this measure will result in the absorption into the Government coffers of a large amount of redundant currency. This measure will, doubtless, have to be reinforced by the floatation of a large defence loan for Rs. 100 crores, for the success of which the necessary changes in the political situation must perforce be brought about by the Government. Such a defence loan together with the advance payment of E.P.T. will effect a very considerable reduction in the volume of circulation. While the amounts so got can be utilised for financing the expenditure on war account, whether it be on behalf of the Government of India or on behalf of other foreign governments, the only way by which further increase in sterling balances can be prevented, is to make it clear to the British Government that for financing their purchases in this country, they must come into the Indian market as borrowers without the mediation of the Government of India. Little need be said in justification of a measure which, strictly speaking, should have been adopted as soon as the programme of the repayment of sterling loans was well advanced.

It will be seen that the measures so far suggested refer largely to the ways and means problems of the Government of India rather than to the problem of inflation as such. This problem arises from the large sterling balances that have already been accumulated in London and the attendant additions to currency at home. For effecting a reductoin in sterling balances and rupee circulation at the same time, we have always clung to the view that the repayment of the Government of India sterling loans should be followed up by an acquisition of public utility companies owned by British investors, and by the transfer of commercial investments in India to Indian hands. We recognise that in the matter of such transfer of British investments, a number of ticklish problems would arise, if a programme were to be chalked out and followed by the Government themselves. No such problems can conceivably arise, if such transfer were to be the result of business deals between private agencies acting of their own accord. We are not sure that, if the Government are not opposed to such a transfer, the buying up of British interests in India by Indian capitalists and investors will not come about and gather momentum. But if such a transfer should be carried out under Government auspices, it would not be unfair if progressivist sections of public opinion in India were to insist that the present setting should be utilised for introducing a large measure of nationalisation of industry in this country. Industries, which are severly localised like those of jute, tea and coal, do lend themselves to such a change, which it is rather too late in the day to dismiss offhand as revolutionary. The paying off of foreign commercial interests in India is so natural a development after four years of this war, and so obviously the right remedy for inflation, that the Government can no longer delay it.

We may now turn to the measures necessary on the commodities side of our national economy. Here, the indisputable shortage of goods clearly calls for special measures being adopted to mitigate the hardships of the present. The problem requires not only vigorous and well-conceived measures of control, with a view to ensure equitable distribution, but also, the inauguration of a campaign of propaganda to ensure that the public demand is distributed over the various food products according to their availability. In the case of rice, at any rate, the continued reliance of large sections of the population on rice, not so much as a staple food, but as an exclusive article of diet, is undesirable either from the nutritional point of view, or from the point of view of the food problem today in India. For the movement for nutritional reform, which is long overdue, we may well make virtue out of necessity in the present crisis. Likewise, in the matter of clothing, the rationalisation of cotton mill output in India by the reduction of the varieties of cotton goods produced, and

ensuring sufficient distribution at prices which leave no more than a reasonable margin of profit, would go a long way towards robbing the public mind of the horrors of sky-high prices and absolute scarcity. In the matter of housing too, house rents in urban areas may well be controlled in the interests of the general public. Municipal Rent Acts, which have for long been a dead letter, ought to be made effective with the necessary changes.

The adoption of all the measures suggested would, however, leave the economic situation unsatisfactory in so far as deflationary measures and price control can do little to bridge the gap between the large demand induced by war conditions, and the available supplies of goods. It was only last week that we were constrained to draw attention to the failure of the Indian economic system to respond to the well-known stimuli that would bring about the increase in productive activity. We expressed our apprehension that, however much the Government may be to blame for their failure to secure industrial development during war, we must in fairness recognise that the Indian economic system today has a degree of inertia and inelasticity which can be overcome only by the adoption of such measures towards that end. Considering the general increase in pecuniary wealth, the larger volume of employment and the growth of purchasing power in urban and rural areas alike, the present moment is opportune for putting into effect a well-conceived plan for increase of production of the necessaries of life all over the country. Such a scheme would undoubtedly require great initiative on the part of the Government and a great deal of intelligent co-operation on the part of the public. We hope before long to be able to give in these columns such a scheme, if only in rough outlines. But the adoption of anti-inflationary measures and the overhaul of the general system of distribution of consumers' goods in the country can no longer be delayed. To add that the establishment of a national government is the first step in improving the economic conditions is to labour the obvious.

STOP PRESS

NEW LOANS

Friday night.

Important announcement is now made regarding two new loans. The first is designed to provide the funds for the redemption of 4 per cent. 1943 bonds. The second is styled the fourth defence loan.

We understand that no further subscriptions for the 3rd Defence Loan will be received after July 1.

The total amount that remains outstanding on the 4 per cent. 1943 bonds is Rs. 14.97 crores. Towards this repayment, a re-issue of 3 per cent. 1963-65 loan is being made, with the total amount limited to Rs. 15 crores. This will be both a cash and conversion loan. The bonds eligible for conversion are the 4 per cent. 1943 bonds on the basis of Rs. 100-4 per cent. The subscription list will open on July 3 and will be closed without notice as soon as it appears that the total subscriptions in cash and bonds amount approximately to Rs. 15 crores (nominal) and in any case not later than July 9. Preference will be given to conversion applications. The price at which this fourth issue of 1963-65 loan is now being offered is Rs. 95-8.

The first issue of 1963-65 was in 1938 when the issue price was Rs. 98. There was a second issue in 1939 at Rs. 98. The third issue was in 1942 at Rs. 95. The issue price of the 4th issue is thus eight annas higher than that of the third issue. Even so, we consider that the present issue price shows undue generosity to the investor. Our own view is that the requisite amount of Rs. 15 crores could easily be secured at an issue price roundabout Rs. 97. We may add that the present market rate of this loan is Rs. 95-8. The total amount being limited to Rs. 15 crores, we may expect heavy oversubscription.

The 4th Defence Loan is in the form of 3 per cent. 1953-55 loan issued at par during the first week and at a weekly increase of 8 pies per cent. This loan will be available through the tap as was the case with the first three defence loans.

Sir Jeremy Raisman is to be congratulated on the scientific way in which he has planned the series of defence loans. The aim kept in view is that every subsequent issue of a defence loan must be slightly less favourable to the investor than the previous one. This is the pattern of new loan policy which has been repeatedly urged by us—so repeatedly as to make this out to be a fad of "Indian Finance". We are, therefore, glad to record that Sir Jeremy is the first Finance Member who has given full effect to the new loan plans put forward by us.

The first defence loan was in the form of 3 per cent. 1946 defence bonds, redeemable at one rupee premium. The second was 3 per cent. 1949-52 defence loan. It will be noticed that the period of the loan was increased by about three years. The third defence loan was slightly more long-dated, being 3 per cent. 1951-54. This loan is now to be discontinued and will be replaced by 3 per cent. 1953-55 loan.

The result of making each subsequent loan longer-dated than the earlier one is to stimulate and enhance the premium on the earlier issues. Thus, 3 per cent. 1946 is now quoting Rs. 102-14; 3 per cent. 1949-52 is Rs. 100-10. The effect of the announcement of the terms of the 4th Defence Loan will be for 3 per cent 1949-52 to improve the price to, say, Rs. 102, and to induce a premium of a few annas in 3 per cent. 1951-54 loan.

The list for the 3rd Defence Loan will remain open for a few days more. And it may be expected that the last-minute subscriptions will be very heavy.

The absorbing capacity of the Indian giltedged market has been fully demonstrated by the satisfactory sales of four loans which have been simultaneously available on tap. 3 per cent. 1946 bonds, 3½ per cent. rupee paper, 3 per cent. 1951-54 and 3 per cent 1963-65 are all being sold through the tap.

This must impress a lesson on the authorities, that is, the time has come for further reduction in the yield of loans offered to the public.

We strongly suggest that the sale of 3½ per cent. rupee paper be forthwith suspended. This is now being sold through the tap at Rs. 94. Suspension of sales of 3½ per cent. paper should cause the scrip to rise to Rs. 99. 3½ per cent. paper quoting at Rs. 99 will have a most important psychological effect on the terms and rates at which the Government are able to pursue their further defence loan programme.

We would also suggest that efficient and expeditious arrangements be made for the observance of a Defence Loan Week, with the aim of securing Rs. 100 crores during the week. This proposal will at once benefit the ways and means position of the Government and solve, to a great extent, some of the problems connected with the present inflation.

Editorial Notes

Latest Control Order

A notification in the Gazette of India lays down the rules relating to the control of cotton textiles. The Control order issued under the Defence Rules affects manufacturers as well as dealers, yarn as well as piecegoods. A Control Board of 25 members has been promised. The Chairman is to be a non-official. The Board is authorised to set up committees to examine price fixing rationalisation raising of textile output and cognate matters. The Textile Commissioner, appointed by the Government, is instructed to refer to the Board. In case of disagreement, the Commissioner is duly empowered to appeal to the Central Government. The Commissioner is authorised to declare and define classes of cloth and yarn, fix maximum prices for both ex-factory and retail, prescribe the markings on cloth manufactured, and also direct any manufacturer to manufacture such classes or specifications of cloth or yarn and in such quantities as he may specify in the notice in writing. Clause 12 of the Order is obviously the most important, as it says that no manufacturer or retailer shall sell or offer to sell any cloth or yarn in excess of the maximum ex-factory or retail price as the case may be fixed under the Order and no person shall otherwise contravene any notice or direction of a Textile Commissioner under the order. After July 31, all cloth and yarn manufactured is to be marked with the date of sacking and despatch should take place within one month of the date of packing if in full bales and within 45 days if not in full bales. No cloth or yarn so marked lying at a place other than that in which they were manufactured, shall remain in full bales after 90 days from the date of packing and all cloth and yarn shall be disposed of by retail sale within six months from the date of packing. A further provision is that cloth or yarn manufactured before August 1, should not remain in full bales after August 31, and all such cloth or yarn should be sold off not later than October 31. Cloth sold after October 31, must bear the markings ordered by the Commissioner who can grant exemption for sufficient reasons on application. The rules relating to marking and sale do not apply to goods held for export from India for which licenses have been procured or to goods held for supply to the Government for Defence requirements.

There are provisions in the Order for declaration of stocks of yarn and cloth as on July 31 by every manufacturer and every dealer before August 15. Returns are to be made to the Textile Commissioner. A further provision states no person other than a dealer or manufacturer shall have in his possession cloth or yarn in excess of his normal requirements but previous sanction for prosecution in cases of hoarding must be given by the Provincial Government. Clause 18 of the same Order prescribes that manufacturers should not hold stocks equivalent to more than three months' production of cloth and not more than two months' production of yarn not required for purposes of manufacturing cloth, but cloth on looms and yarn being made into cloth are excepted. The last three Clauses (19 to 21) define the powers of the Commissioner. He can demand information, authorise inspection of books and search premises and he can delegate authority except in regard to types of cloth, prices and markings. The Department of Industries and Civil Supplies has also provided for certain action by Courts in cases of contravention of the Order. A Court without prejudice to any other sense which it may pass can direct that any cloth or yarn in respect of which it is satisfied that such contravention of the Cotton Cloth and Yarn (Control) Order has occurred shall be forfeited to His Majesty.

Defection Threatened

There has been denial from Algiers and Rome too of rumours as to Italy's intention to ask for an armistice. The presence of Marshal Badoglio and the Crown Prince was denied. This denial supports the conclusion of the Danziger Vorposten's Rome correspondent. The despatch to the German paper was quoted in a message from Stockholm declaring that Algiers Radio's appeal to Italy to surrender soon was bound to fail. There, is, however, evidence that points to the real position of Italy. Peace demonstrations in the past, the changes in the High Command, and the recent vestual dissolution of the Corporative system go far to prove that Fascism is on its last legs. Dependence on Germany has robbed it of its original strength. The loss of the empire has accentuated the weakness of a minority Government. British naval concentration at Gibralter has made it singularly plain that invasion in the near future is likely. The Italians have been asked to keep cool, but the proclamation of two Provinces in addition to Calabria as operational areas will be far from reassuring. The help that Germany could give is far from certain. The Germans could not prevent the surrender of Italy's vital island fortress. The Germans could not prevent invasion of Sardinia or any other vulnerable point. The R.A.F. has smashed up German war industry. The Russian campaign has not begun and Italy cannot get the materials even if they are wanted after the removal of factories and workmen to Germany.

The moral shock given by the surrender of Pantellaria must not be forgotten. The peasants in South Italy have gained little from Fascist rule. They have no reason to desire its continuance. The more fragile and violent Sicilians must be ready for a change and their behaviour will influence Rome more than Germany's call to keep on. The belated recognition of difficulties is no guarantee of help from across the Alps. Swiss neutrality is a barrier to assistance, and once again reference must be made to the effects of privation on a people with low standards of living. Italy has gone short for a quite a long period and the King must be pining for coffee after the loss of Ethiopia. The middle-classes may be tolerant of Fascism but the masses, after knowing enough about the damage to the fleet and bases, may do little to support Mussolini. Cabinet changes in Italy this year proved that Mussolini had lost faith in most henchmen including Ciano. The German failure in Russia after two years of war is not at all ignored nor is the people's original aversion to the alliance with Germany. The Fascist party has lost heavily in membership during 1942. Total mobilisation covering waiters too must have sapped the Italian spirit more than anything else. The emergence of an alternative regime may be delayed but it is sure to follow the first landing. The new Roman spirit has hardly survived the disaster in Tunisia. And Italy is ripe for change of Government as frenzied preparations against invasion prove. That the Throne might fall is not reckoned impossible, and the Allies' solution for Italy may be different from that devised for Tripoli. The problem is mainly one of restoring European liberalism there to the detriment of Germany.

Wheat Supplies

India's wheat crop in 1942-43 will be bigger than that in 1941-42. The fourth forecast issued on May 3 referred to an increase of 163,000 acres in the area under wheat in India; and an increase of 9 per cent in the probable yield estimated at 10,938,000 tons. The crop will be the biggest since 1933-34 when the acreage was greater. Details available point to a marked rise in the average yield per acre in 1942-43. The highest average outturn is that reported by Baroda and the smallest by Mysore. For the Punjab which is expected to produce 4,705,000 tons, the average yield is 877 lbs. per acre. An increase of 355,000 tons in the Province's wheat production is expected despite rust and hail damage as the crop on irrigated land is normal to above normal. Improvement in the U. P. crop in every direction is also expected; in Sind and the Frontier bigger crops are the rule. For Northern India, the wheat

position is simplified by the new crop. In Rajputana States, as also in Central India, an increase in wheat production is recorded. It is noteworthy that supplies will exceed those obtained in 1940-41 when the cropped area was larger. Compared with the U.S. crop of 26.4 million tons from 53.4 million tons in 1942, the Indian crop looks poor. The Canadian crop of 1942 was substantially larger while that of Argentina was slightly larger at 6.3 million tons though the carry-over is larger. It should, however, be noted that the area under wheat in 1942-43 in British India was below the average of five preceding years while the outturn was certainly higher. The crop in Bihar was described as very good while that in Bengal which claims only ½ per cent of the area under wheat in India was almost up to standard despite bad growing weather. The U. P. crop is below the five years' average at 2,697,000 tons. The same may be said of C. P. also. The Sind crop is known to be better than the good crop reported last year, and wheat prices may be uninfluenced by the heavy buying of the Government's agents at Karachi.

Cost of Living Changes

The working class cost of living continued to rise in April according to the Bombay Labour Gazette. The index rose because food was dearer. The Bombay Millowners Association decided to raise the dearness allowance payable to its workers under the sliding scale. For 26 working days, the allowance was calculated as Rs. 28-7 being again up from Rs. 25-10 given for March. All foodstuffs in Bombay were dearer in April. As compared with December 1942, the price of wheat rose from Rs. 0-9-9 per paylee to Rs. 1-0-2 in April. Millets were also dearer and tea was the only exception to the rise recorded under food. The food index rose by 10 points to 235. In March again, a sharp rise in the cost of clothing was noted. A further rise was also noted in April when a big jump in the cost of ordinary shirting was the chief feature. The workers' monthly rent as determind by earlier enquiries was stationary at Rs. 6-5-11 per month and there was no increase in miscellaneous expenditure on soap, medicine and bidies. The cost of living index at 225 was 105 points above that of August 1939. The rise in Ahmedabad up to March was equally pronounced. An equally sharp rise in the cost of living was noted in Sholapur during March. The rise is characteristic of Nagpur and Madras while the drop in Jubbulpore is exceptional. Between March 1942 and January 1943 the cost of living rose steadily in all industrial centres as wholesale prices rose. The extent of the rise in 1942 is indicated in the broadly true statement that the average for the food index rose from 149 to 247 and the general index from 137 to 219. In Bombay alone the decline in 1943 is scarcely to be measured against the rise in the cost of living. The increase in the cost of living accounts for most strikes for higher pay or for increased rations of rise at controlled rates, particularly, in Bengal. There were strikes in the C.P. collieries and the U.P. mills during March. There were strikes in some Bombay and Ahmedabad mills too and the workers in other concerns where disputes occurred asked in most cases for an allowance on the scale adopted by the Millowners' Association. There were trade disputes in some silk mills in Surat and gold lace workers there struck for dearness allowance (secured) at 3½ annas per day. The increase in absenteeism in Bombay and Sholapur mills and engineering concerns is perhaps unrelated to the disputes reported but one may note in passing that the Ahmedabad Labour Association's refusal to help mills work for one hour with 25 percent more wages was treated as a result of adequate income.

NORTH WESTERN RAILWAY

Tender No. 223-9/1/7.

Codeword "CTBCD".

For Miscellaneous stores are invited on a rupee basis for purchase by the N. W. Railway of Baskets of toot and pilchie, Bricks bath, Maida, Gharras Mutts, Soorahies, required during 1st November, 1943 to 31st October, 1944. Tenders to reach office of Controller of Stores, by 14 hours on Monday the 2nd August, 1943, and will be opened in his office, at 11 hours the following day. Tender forms can be seen at and obtained from office of Controller of Stores, from the 15th June, 1943. The sale price of tender is Re. 1 plus annas 8 for 4 specifications or Rs. 1-8 for tender with a set of specifications. Annas 8 will be required for posting and packing of documents to outstation.

Pressed Food

The War Food Administration in the U.S.A. announced that food shipments were increasing. Dehydration has been followed up by compression and the report spoke of saving in shipping effected by compression. Overseas shipments of compressed food are increasing and in six months should be a substantial part of the food shipments. The Food Distribution Administration is expediting compressing of food, particularly, those which are dehydrated in order to meet the pressure on shipping, warehouses and dock facilities and inland transportation at destination points. Dehydration removes most of the water from food and results in an enormous saving of shipping and storage space. Compression goes one step further by squeezing dehydrated foods into the smallest space possible. High compression is achieved through a food press which results in a product concentrated into block form. This is not done on a commercial basis as yet but is planned for the immediate future. In its simplest form, low compression, it is accomplished by tamping, vibrating and compacting the product so that waste space in the container is held to a minimum. For example, flour can be compacted so that 20 per cent more goes into an ordinary sack. The Usowi reports that among the foods prepared by low compression dehydrated soup shipped during May under lease-lend resulted in an estimated saving of 20,000 cubic feet. During the same month, the compression of dehydrated eggs resulted in a saving of 33,375 cubic feet. Not only do compressed foods save up to 25 per cent more shipping space, they also simplify transport after unloading and secure conservation of packing material and containers, compressed foods are especially suited for transport by air. As in the case of dehydration reconstitution determines to what degree a particular food can be pressed. It is possible to produce foodbricks hard enough to use for building purposes, but such compression, of course, makes it impossible to reconstitute into usable forms. Most foods in processed form are suited for compression but experiments have shown that cereal products, cheese and dehydrated foods (vegetables, fruits, milk and eggs) are most adaptable. The large-scale compression of these and other products for Lease-Lend, Red Cross and military use is expected as soon as tests can be completed and equipment set up.

Home Demand for Jute

Estimates of jute consumption in 1942-43 must be modified by the recent U.S. order for hessian. The Indian market for jute manufactures remains important, and the enquiry into the nature and scope of Indian consumption undertaken by the Indian Central Jute Committee in 1942 has resulted in information relating to the increased demand for jute manufactures in India during war. The main types in demand are sacking bags of various sizes and qualities. A twills, B twills and Heavy Cees and Liverpool twills are wanted as also twine, ropes etc. Though rival fibres are not important at present, efforts to encourage use of cotton bags for sugar convey a warning to jute mills. Internal consumption of jute goods had risen to 371,000 tons in 1941-42. The civilian demand is put at 220,000 tons as in the past, and military requirements account for the increase of 151,000 tons. The demand for sandbags, union fabrics, tents etc. accounts for the rise in consumption from 100,000 tons to 151,000 tons in 1941-42. Since 40 per cent of the demand is temporary or accidental, the jute mill industry will be called upon to make adjustments after war. The increased use of secondhand bags in certain industries represents no danger. The extension of jute consumption in the hand-weaving industry is reckoned possible, but the main guarantee of stability can come only from increased use of jute fabrics for storage. In place of earthenware and bamboo baskets jute products seem suitable and hessian may be used for tea chests if experiments in progress succeed and waterproofing may encourage the use of gunny for cement and sugar bags. The Tata Iron and Steel Company is said to be considering the possibility of using jute bags (if they are cheaper) in the place of paper bags for packing ferro-alloys and coke dust. The Jute Committee has recommended to mills the need to consider the need for expansion in new lines, for instance, union fabrics of jute and wool and speciality fabrics made by some mills at present.

German Air Strength

Allied air power in the Mediterranean under Air Marshal Tedder claims notable victories. Italy and Sicily alike have been attacked vigorously and the continuous

here are the Government rules about **SHOWCARDS** *and* **CALENDARS**

NO PERSON SHALL PRODUCE OR PRINT FROM PAPER OR WOOD PULP . . . . . .

(a) any view card or picture postcard or greeting card or other greeting intended to be exposed or offered for sale by retail ;

(b) any calendar containing a greater weight of paper than 4 ounces ;

(c) any envelope for gramophone records having a substance greater than 20" × 30", 40 lbs 480 or 500 ; or

(d) any advertising showcard, advertising novelty, counter display or window display device, unless such card, novelty, display or device has an area not exceeding 100 square inches ; or any programme relating to any entertainment or race or sports or athletic meeting and having a total area (measured on one side of each of its sheets including any cover) greater than 80 square inches.

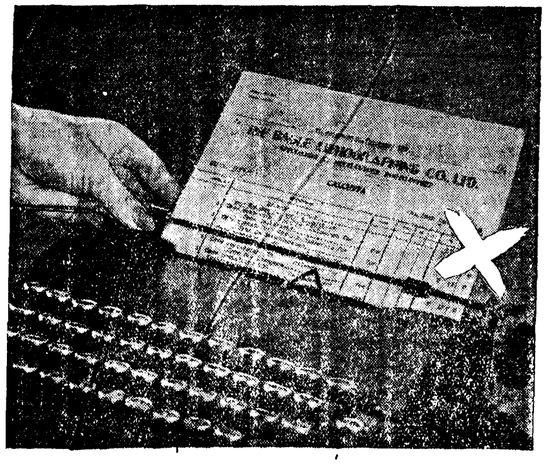
bombing through short trips has been contrasted with the large and larger flights into Germany. But Italy is not the supreme target like the Ruhr with its extraordinary defences. The limited losses and rapid results, as at Essen, encourage bombing operations, but the Nazis still have an air force. The fantastic estimates made in 1940 are no longer heard. There is still mass production and a Blohm and Voss troop-carrier was a new type introduced late last year in Russia. Fighters are still limited to Messerchmitts and the Mediterranean operations proved that recent types are inferior to the Curtiss and Lockheed planes added to British fighter strength. The Luftwaffe is said to have 4,000 to 5,000 frontline aircraft which means that steady reinforcements are available for operations. There are five air fleets of which two consist of 2,500 planes together and are kept in Russia and one with 1,500 planes is kept for Germany and Western Europe. The fourth fleet assigned for work from Norway to Finland has been cut down to about 200 planes, and the fifth with 800 planes has been detailed for work in the Mediterranean supported by the Italian air force. There are additional mobile forces. Most important for the present is the Russian opposition in the air. Reinforcement of German air power in the Mediterranean is made impossible. In Western Europe fighter opposition has been poor for months, and the explanation has been found in reduced numbers and heavier duties. In the Balkans there is no separate fleet as was known to be stationed in 1941. In the West as in the Mediterranean, German losses have been heavy and reserves must have suffered heavy drafts. Axis losses in Tunisia have certainly been heavier than expected after the loss of the airfields.

More Sugar for India



The increase of 300,000 tons in sugar production in 1942-43 must have a great effect on supplies and prices. The special assurance has been supplemented by the Second Memorandum on production of sugar directly from cane. In the last season 150 factories were at work despite

AN APPEAL
to all consumers of
PETROLEUM PRODUCTS
The offensive phase of the war has begun. It brings with it the problem of supplying ever-increasing quantities of petroleum products to the Services whilst meeting in addition essential civil needs.
Without containers — tins, cans, drums and barrels — the distribution of oil is impossible. But the basic material of their manufacture is steel which to-day is needed first and foremost for the production of ships, tanks, guns, ammunition and other sinews of war.
Therefore the full co-operation of consumers is essential if the limited supply of containers still available to the Oil Industry is to give the service now required of it.
BURMAH-SHELL urges all users of petroleum products to protect petrol and oil containers from RUST, DAMAGE and DIRT and
Return Containers Quickly

A BURMAH-SHELL ANNOUNCEMENT

cane shortage. The crushing season was shorter than usual in the U. P. and Bihar but the Upper India mills (102 in number) have produced, according to official estimate .84 million tons of sugar. The working season for most mills in the U. P. was one of 80 to 129 days only. Some factories in Bihar reported a working season of less than 79 days. The U. P. and Bihar factories crushed over 8 million tons of cane and produced over 840,000 tons of sugar in 1942-43. The recovery percentage in Bihar was above normal. The eight mills in Bengal crushed 188.700 tons of cane to produce 16,100 tons of sugar. The average output is distinctly lower than in the U. P. The All-India percentage of recovery in 1942-43 is up from 9.69 to 10.2 as the Bombay and U. P. factories reported better recovery. Molasses production has similarly shown growth to 378,700 tons. The Indian States with 15 factories accounted for 96,600 tons of sugar as against 116,200 tons in 1941-42. The U. P. crushing season ended in April while that in Bihar, beginning in December, came to an end in the middle of April. In spite of a poor cane crop and competition from producers of gur the sugar mills crushed to capacity. If sugar produced from gur is taken into account. India's supplies should total 1.1 million tons. The total quantity is larger than that available in the last two years while higher prices have checked consumption (put at 1.15 million tons usually) to some extent. The lower level of consumption implies that control has outlived its usefulness since control has never produced prompt and effectual distribution according to report. Exports seem as objectionable as before. Sugar producers' views on the subject should command greater attention, particularly, after their meritorious performance against difficulties.

Junks for Japan

Japan's great need for shipping is indicated by the reports from Eastern China relating to the making and use of junks. Junks are used for military transport and the Japanese are known to be producing junks at Hongkong. The China Information Bulletin cited reports from Eastern China about the junk-building programme. Chinese junks will be used for transport not only along the coast but in the South Seas. To develop building on a larger scale, 14 shipbuilding companies including the former Kiangnan dockyard have been ordered to build such junks. The puppet government at Nanking has been ordered to form a guild of sailing vessels. Chinese boatmen are to be trained and plans for building more junks have been worked out. Steam displaced sail about 100 years ago, and junks fell into a long depression. But the Japanese, short of shipping in Occupied China, owing to the war's demands and the loss of vessels at sea, have noted the advantages of junks, cheap to build and maintain. On the Yangtse and its tributaries, junks have long been used, and the Japs who used wooden vessels in the N.E.I. have latterly turned to the use of junks. There are many types of junks. Chinese vessels coming to Shanghai are classed in five groups. The Chekiang group bringing fish to Shanghai and taking back food etc. are distinct from the Fukien group carrying timber, paper, coal, etc. to Shanghai. The Chaochow-Swatow type transport fruit and carry back foodstuffs and a certain amount of cotton textiles. The Northern type is designed for taking out fish and foodstuffs southwards. The Dairen type handles soyabeans and oil. The five groups constitute a fleet of 1,500 to 2,000 junks of 30 to 140 tons meant for the trade with Shanghai. There are only 150 big junks meant to take over 100 tons. Woosung is a great place for junks as 300 to 500 junks pass every day. The average cost of making a junk has risen to between 100,000 to 200,000 dollars on account of the war. Wood is scarce, and the Japanese are likely to encounter difficulties in building junks owing to the timber shortage.

Destroy the FIFTH COLUMN
Have your invoices got two separate 'amount' columns ? How often is it essential to use both ?
You can save as much as 25% of the paper on your invoice by destroying this fifth column.
Examine all your stationery, eliminate superfluous peace-time "frills" and help to save paper in the present emergency.
Every business concern, whether grocers' store, or industrial giant, needs paper to function smoothly.
Ensure that need now, by saving on existing stock.
There is an acute paper shortage. Your attention is drawn to the following methods of avoiding waste of paper :-
- Use the smallest sheet of paper for any purpose that will do the job.
- Write, type and print on both sides of the paper. For short letters, bills and accounts reduce the size of the paper.
- Do not make copies except where absolutely necessary.
- Always type single spacing.
- In all cases (letters, commercial printing jobs and pamphlets, etc.) curtail margins.
- Reduce the size of labels on manufactured goods.
- Use the back of the letters received for the carbon copy of your replies.

Managing Director:

MR. S. R. DAS.

Bankers:

THE COMILLA UNION BANK LIMITED
in all Branches.

Brokers:

MESSRS. NARAYANDAS KHANDELWAL & CO.,
Stock and Share Brokers, 25, Swallow Lane, Calcutta.

Solicitor:

MR. M. K. ROY CHOUDHURY, M.A., B.L. (Attorney-at-law), 7, Old Post Office Street, Calcutta.

PROSPECTS:

Under the provisions of the Clauses (1A and 1B) of Section 93 of the Indian Companies Act, the Balance Sheet, trading and profit and loss account of the Company for the last 2 years with a certificate from the auditor of the Company must accompany such prospectus, but the publication of all such accounts report and other documents relating to operation of all electric supply undertakings have been prohibited by Section 45B of the Defence of India Rules published in the Government of India Notification No. 1564-OR/42 dated the 7th September, 1942.

The Company has spent about two lakhs and a half rupees up till now for the capitalisation of the scheme and the revenue receipt is by no means small. Though there has been no dividend for first three working years, it is a pleasure to announce that the Company recommended a dividend of 4 per cent of income-tax for the financial year just closed on the 31st March, 1943. During the last financial year also the Company made a handsome profit, but did not consider it worthwhile to declare any dividend before the Company was put in strong position.

Though shares of the face value of Rs. 1,03,300 were sold out by the Company from the beginning some 412 shares of the face value of Rs. 20,600 were forfeited for non-payment of calls. The present offer of shares to the public is therefore with respect to 3,346 ordinary shares of Rs. 50 each. The shares are issued at par which under the circumstances of the case is to be taken as a benefit for the new investors.

The whole plants and machinery of the Company have been covered with war risk insurance. The investing public always prefers shares of public utility concerns as they are termed as next to giltedged securities. They are in line with telephone, railways etc. They ensure safety of capital and regularity of dividends. War or peace has got little effect on public utility undertaking, except that the values of the assets go up almost double or treble at the time of war.

GENERAL INFORMATION:

Formerly the Company was a proprietary one of the Licensee Mr. S. R. Das who is now the Managing Director of the Company. On the 29th of September, 1940, the proprietorship of the Company was purchased from him at cost and the licence was also transferred by him on that date in the name of the Company with the approval and sanction of the Government but no consideration money was paid to him for such transfer. In acquiring the proprietorship of the Company from the Original Licensee the Company had to borrow money from Bank and others and the present issue of shares to the public is for the repayment of that loan, which bears interest at 7½% per annum. The interest thus saved will go a long way to satisfy the investors when the shares are fully subscribed.

No share was offered nor any share was allotted as fully or partly paid up for consideration other than cash. No business is to be purchased out of the proceeds of the present issue. No further capital expenditure is contemplated out of the proceeds of the new issues.

APPOINTMENT AND REMUNERATION OF MANAGING DIRECTOR:

(a) Mr. S. R. Das has been appointed as the Managing Director of the Company for a period of 20 years from the 3rd day of June, 1938.

(b) The remuneration of Managing Director is a commission at the rate of 10 per cent on the nett actual yearly profits of the Company together with an allowance of Rs. 250 per mensem from the date of commencement of business and Rs. 350 per mensem from the year for which the Company will declare dividend and if no dividend is declared within 3 years from the commencement of business the remuneration will be Rs. 300 per mensem after 3 years of the commencement of business.

AGREEMENT:

An agreement dated 24th April, 1939, between the Company and Mr. S. R. Das whereby the latter has been appointed the Managing Director of the Company for a period of 20 years from the 3rd day of June, 1938, and will have the management of whole affairs subject to the control of the Directors, which may be inspected at the Registered Office or at the Calcutta Office of the Company during business hours.

BROKERAGE FOR SHARES:

The amount payable as commission for subscribing or procuring or agreeing to procure subscription for any share in or debentures of the Company did not exceed 8 per cent of the nominal amount of shares or debentures. The Company has so far paid Rs. 7,772-2-0 as commission for selling of shares.

The Company shall now pay a brokerage of 3 per cent only on the face value of shares in respect of applications received from recognised brokers and allotted by the Company.

RIGHTS OF SHAREHOLDERS:

On a show of hands every member present in person shall have one vote and upon a poll every member present in person or by proxy shall have one vote for every one share held by him.

No member shall be entitled to vote at any General Meeting unless all calls or other sums presently payable by him in respect of the shares in the Company have been paid.

The Directors may refuse to Register any transfer of shares upon which the Company has a lien or shares in arrears to a transferee of whom they do not approve.

APPLICATION FOR SHARES

Application for shares in the annexed form should be sent to the Company at its Registered Office at Dhubri or Calcutta Office or to its Bankers with a remittance of the amount payable on application.

Where no allotment is made the deposit will be returned in full and where the number of shares allotted is less than the number applied for the balance of the deposit will be applied towards the payment of the allotment money.

A copy of the Memorandum and Articles of Association of the Company can be obtained at the Registered Office of the Company on payment of Re. 1 for each copy.

Bankers. Managing Director.

Russell on Rothamstead

Sir John Russell gave in a broadcast talk an account of his career and described how he left his lectureship in Chemistry to learn agriculture in Wye College. In the last years of this century British Agriculture was in a depressed state. Farmers were going bankrupt, and labourer's wages were as low as 12 shillings in some places. For 15 years British agriculture was in a bad way, and the Government had almost given up hope of a revival. But it decided to try what education would do and colleges were set up from about 1894. Sir John went to the College at Wye in 1901 and found that competent teachers were lacking. He set about learning in a practical way on the farm. "I worked with the cowmen and the pigmen and in the dairy and I took an allotment to learn gardening from the very good village workers". Sir John started to help the farmers, and found that they were getting left behind because the world was changing rapidly. Only the adaptable could prosper, and education of the new kind produced adaptability. He left Wye after 7 years for Rothamstead to serve, first as an assistant, and then as Director. The station was small and badly equipped but in 30 years Sir John has made it the best-equipped agricultural experiment station in the Empire. Townsmen wanted better and more varied food. So agriculture had to meet new demands. Rothamstead began to study soils and crops, and much knowledge has been gathered and propagated. The Station founded in 1943 by John Bennett Lawes actually began its experiments five years earlier. Lawes was the first to sell superphosphate but as Sir John pointed out, the Station only makes experiments with fertilisers and gives information to farmers. Farmers began to improve themselves and the result of scientific distribution of knowledge was summed up by Sir John Russell. Fifty years ago agriculture was a craft; now it has become a science. The change has involved an enormous development of mechanisation on the farm. Farmers had to develop machinery sense and because of fertilisers, balanced rations etc. had to develop a scientific sense too. But both have helped, as Sir John concluded by saying that science and machinery are lightening the day's work and making the harvests more certain.

Food In Russia

After the loss of the Ukraine the food position in Russia has altered greatly. Last year's harvest in the Kuban was, and the limited increase in food shipments under lease-lend since January, is a late reflection of the food demanded by Russia at war. The 'Economist' urged recently that the cereal position is decisive for the general food situation. Normally 70 to 75 percent of the colonies in the diet of the Russian people were provided by cereals. Since the war the average civilian diet has almost entirely consisted of bread and potatoes. For the Russian people (adds the 'Economist') the change has hardly been a drastic one, and as long as bread and potatoes can sustain the customary standard the position can still be regarded as tolerable. The crucial question is whether the third wartime harvest may not reduce the bread and potatoes diet to a minimum. As a rule, the Soviet citizen depends not so much on a normal ration as on the supplies that are available at any particular moment and on the production of the kitchen garden. Food supplies have been extremely decentralised. The Army in Russia like the Army in Germany is by far the best-fed section of the population. In the first World War, Army supplies were the subject of boundless speculation and profiteering. The soldier was, as a rule, worse off than the civilian; and this was one of the chief factors in the Russian breakdown in 1917. The present position is incomparably better in this respect. Even so Army rations behind the front lines have been cut several times; only in the fighting lines have the original rations been more or less maintained. The world's wheat supplies are rising every year, but not Russia's. Agriculture must have suffered more than industry as migration is impossible, and the Nazi occupation of the Ukraine means more than the loss of manganese. The loss of 40 million people through conquest means a reduction in supply as well as demand, and the German plans for the Ukraine last year pointed to colonisation rather than temporary exploitation. The German's stay on in the Ukraine and the Russian army's task is unfinished. It is in the light of that crucial fact that the food situation must be appraised. There has been a promise of food for the Middle East. For Russia it must be assumed that a promise is superfluous. Canada and the U.S.A. have big surpluses and it is now mainly a question of shipping. The improvement in the Atlantic shipping situation last month may produce a big difference, but at any time Russia's

survival is likely to depend more on the possession of the Volga valley rather than on imports through Iran.

To-day's Prospectus

The town of Dhubri in Assam has been served by an Electric Supply Company. The Company offers for sale ordinary shares of Rs. 50 each through a prospectus for which the consent of the Central Government has been obtained. The prospectus published to-day refers to the results obtained already by the Company. The chief purpose of the present issue is the extinction of the Company's debt: it seems desirable to replace bank debt by an addition to paid-up capital. The Company's capital is small. Its revenue is growing. The results of the past two years are regarded as quite encouraging, particularly in 1941-42, and a tax-free dividend of 4 per cent for the year ended March has been declared. The Company's directorate contains local landed gentry, and its progress under local auspices must certainly be rapid. The license has been conveyed to the Company which has retained the licensee as its Managing Director for 20 years. One cannot but admit at present that the position of the Company is not that of a new utility concern. Its construction work is over. Its plant is functioning, and the relief provided by the repayment of debt should be really advantageous to shareholders. An application fee of Re. 1 is asked from investors who have to pay Rs. 10 on application and Rs. 10 on allotment. The balance is to be paid in calls. The Dhubri Electric Supply Company has the same prospects as any mofussil electric undertaking. To that extent, the shareholders are fully secure, for utility shares as a class fall into the semi-giltedged class favoured by cautious investors in India. Mr. S. R. Das who is associated with other electric supply undertakings is in charge of Dhubri's Electric Supply Company and this has certainly made for the completion of the project though the initial response from investors was not striking. The Company's prospectus gives details as to the working of the Company, and the present issue of ordinary shares is in accordance with the Directors' decision to give a wider section of the public chance to take at par the shares which should appeal to those looking for a regular and assured return on capital. Investors should feel attracted to a public utility share which is being offered at a stage when the earning capacity is proved and which, really speaking, could have been issued at a premium.

United India's Progress

The United India Life Assurance Company's results for 1942 were reviewed by the Chairman on June 7. The setback in new business was explained as being due to the peremptory evacuation of Madras last April. There has been sustained recovery this year, and this is more encouraging than anything else in view of the loss of overseas connections. The Company secured in 1942 business for Rs. 84¾ lakhs and the quality was fully maintained, while the average value of the policy issued in 1942 tended to be higher. The Company's renewal expense ratio was lowered, and this too makes for satisfaction. The Company's accounts show that the year's revenue of Rs. 39.36 lakhs was slightly higher than that obtained in 1941. After meeting claims to the value of Rs. 10.11 lakhs and expenses etc., the revenue provided for an addition of over Rs. 17.74 lakhs to the Life Fund. The Fund which is vested in the Official Trustee of Madras has therefore risen to Rs. 163.95 lakhs. The Company's holding of giltedged securities is fairly substantial at Rs. 72 1/3 lakhs exclusive of statutory deposits. The House Properties account for a fairly large part of the assets of the Company as Rs. 29¼ lakhs are shown in the balance-sheet. The policy loans account for Rs. 25¾ lakhs and mortgages for Rs. 16 2/3 lakhs. A good beginning has been made by the new subsidiary, the United India Provident Assurance Company. The subsidiary specialises in group insurance for industrial workers, and has received encouragement from employers. The Chairman of the Company described the part which group insurance might now play in checking the symptoms of inflation. The major result will be a steadier and more contented labour force, and employers naturally stand to gain most from group insurance. The high expense ratio on industrial policies might not even persist, if the schemes gain general acceptance as a substitute for workers' bonuses. The United India founded in 1906 has long been recognised as the leading life office in the South. The results for 1942 are wholly encouraging and the Company's total business in force at the end of 1942 exceeded Rs. 6¾ crores. It has long had a strong balance-sheet, a satisfactory income position and much else to keep the confidence of policy-holders who might have missed a bonus, but have no reason to complain as the no bonus decision is inspired by British example and official advice.

THE NEW ECONOMICS
IX

Of the three instruments, which I mentioned last week, by which the State will attempt in the post-war period to regulate economic conditions, currency and credit must be deemed the most powerful. The potency of public finance as a means of effecting redistribution of wealth had been on the decline even before the present war. And once the abnormally high levels of taxation are stabilised, the scope for changes either way might become extremely limited. As for foreign trade, some years must elapse before trading conditions can be seen with the clarity necessary for the formulation of definite policies. Besides, the foreign trade policies of the future will be materially different from those of the pre-war period, inasmuch as they will no longer be the main factor in deciding the nature of the national economy. While formerly, national production was determined by the state of international trade and the division of labour which it imposed on the nations, in the future, the development of national resources will govern the volume and content of international trade. For this change, the expansion in the sources of raw materials, which scientific invention has brought about, and the greater readiness of public opinion in all countries to recognise the need to meet the necessaries of life of the whole population must be deemed to be the main causes. Those who believe that international trade with its only conceivable basic principle of free trade can be again enthroned as the arbiter of international division of labour and as determinant of the nature of national productive activity will meet with the same disillusionment that the advocates of laissez faire in the last two decades have had to suffer. While, thus, public finance and foreign trade will take time to operate on post-war economics as factors for change, currency and credit policy may conceivably begin to exert its effect even as the war draws to its end. That the proposals of Britain and America in respect of the regulation of post-war international finance have been formulated, published and discussed even before the end of the war is sighted, is in itself proof of the importance of this factor in the economic future of the various nations and of the world as a whole.

* * * *

International finance is in many ways unique amongst the various divisions into which the subject of modern economics may be said to fall. It is, in a sense in which even international trade is not, a combination of the unity and diversity of world economy. The links which bind the various nations together in international finance are different from those of international trade. The foreign exchanges have something indestructibly natural, unlike the customs house which is so patently artificial. Money is one, while goods are necessarily varied. The currencies of the world are traceable, so long at least as they have a metallic base, to one common value which reigns supreme over all parts of the world. A nation may cut off all commercial links with the rest of the world; but it is impossible to envisage conditions in which the monetary links will be altogether sundered. However much economic self-sufficiency may advance, the links of international finance will endure. This may seem strange, since the links of finance are so largely the result of the links of trade. But the fact is that, even if no goods were exchanged among the nations, it does not follow that services will not. The end of international trade is by no means the end of all international intercourse. That is why, perhaps, problems of international finance are more readily attended to than problems of international trade. The former have followed the latter, as, indeed, they should, considering that it is the bungle in foreign trade that nearly always gives rise to the problem of foreign exchange. But, working agreements are reached more easily among the nations on questions of international finance than on questions of international trade. And to-day it is indisputably true that the troubles experienced about problems of international finance are due solely to unsound ideas on international trade.

* * * *

The importance of the problems of international finance is also derived from their equal import both to conditions at home and conditions abroad. A trade pact or a trade policy does not affect

external and internal conditions to the same extent that an understanding about the external value of a currency does. For any international financial agreement affects not only the relative values of different currencies, but also delimits the range within which the central banking institution may vary its currency and credit policy at home. In the conditions of the post-war period as I envisage them, with the paramount necessity of setting up large schemes of economic reconstruction, of inducing new lines of productive activity, changing the location of industries, repairing war damage etc., the importance of currency and credit at home can hardly be exaggerated.

* * * *

It is only when agreements on international financial regulation allow scope for changes in internal currency and credit policy that the State can find in the central banking institution an apt and efficient instrument for working out its economic policies. Thus, while the nature of the links of international finance compel understanding and invests every break in the link with serious risks, the paramount need for international financial agreements should not unduly fetter the discretion of national governments in internal management. There is thus a dilemma here which it would be wrong to compare with the conflicting claims of protection and free trade in the sphere of foreign trade. The conflict between the development of internal productive resources and development through free trade is not intrinsic in economic life. But the conflict in the sphere of international finance is. For proof, one has only to take note of the fact that, while the idea of free trade has all along received only lip-homage and free trade was never a fact, freedom of gold movements is; and, when it is interfered with, the interference is only temporary and limited to definite purposes. It is only to be expected, therefore, that the solution of the conflict between internal freedom and international order in the sphere of finance could be found only under the increasing pressure of necessity and a succession of actual emergencies. The whole system of modern thought on monetary questions, which started with a frank denial of the sanctity of a rigid exchange rate and a rigid exchange ratio is but a recent growth. The exchange rate in the sphere of international finance is like a fuse wire which takes time to break, when anything goes wrong in the circuit. But it is, after all, no more than a fuse wire and it must break, so that the main installation is saved. The history of international finance during the last ten or twelve years is the history of the fuse wire breaking in one country after another. And before the war is over, the engineers are at it again calculating the load and the strength of the transmission lines and all the rest of it.

* * * *

Perhaps, I have grown too fond of my electrical simile. But the point I seek to drive is this; that every nation is naturally determined that the whole house should not run the danger of being set on fire by the use of the wrong kind of fuse wire. The best kind of link between national and international finance is found only in the process of continued experimentation, of trial and error. Nearly all the great nations of the world have been through the process. On the one hand, they have been revising their financial relations with the rest of the world, reducing their commitments and their adverse balances, lightening the load, so to say, and, on the other, they have been utilising the freedom from the strangle-hold of a rigid exchange rate to see how changes in internal credit policy can be effected to the best advantage. So far, controversy about the purposes to which the freedom of credit regulation should be devoted has been avoided, in the earlier stages, by the need to cheapen the rate of government loans and, in the later stages, by the need to finance the war.

* * * * *

But, after the war, public opinion in all the leading countries might well insist that the benefits of recent developments in central banking technique must be given to the public at large. The upshot of the discussions on the regulation of post-war international finance is not easy to predict. The problem really impinges on a number of spheres. It is linked up inextricably with questions of trade policy. It has a close bearing on the movements of international capital and the necessary freedom or other conditions

LAC-PLASTIC
Moulding powders

therefor. It has to take into account the difference in the economic development of the various countries. To what extent the conferences will allow themselves to be drawn to an examination of these questions, it is not easy to say. But the important point in this context is that its main work will be to secure the stability of international finance without rigidity in national finance. Once a degree of freedom in internal currency management is secured, there will be scope for the application of the new concept of capital. I may recall here the point made in an earlier article of this series, that the process of creating or maintaining or adding to capital has but a loose relation to what is termed "saving," and that production of capital goods depends on division of labour rather than check on consumption. It is apposite now to emphasise the complement of this proposition on the financial side, that credit is a social creation. Taking these two principles together, the rationale of suiting credit and currency policy to the expansion of productive activity on a basis other than that of the traditional proprietary private enterprise basis will be obvious. The implications of this will be clearly seen when we deal with post-war economic policy for Indian conditions.

'EAVESDROPPER'

(*Continued from page* 1093)

E.P.T. calculation. Companies designed as a device for evasion of tax can, therefore, continue to be formed with capital of Rs. 1,000 or less, the pretext advanced being that the further funds required are being raised in the form of loans on simple pro-notes. The exemption that was announced this week with regard to companies of Rs. 1,000 and less, while it clarifies the position, leaves untouched the loophole for tax evasion. For our part, we would like to see this loophole removed.

In our representative's discussions in New Delhi, another important point came up for consideration; and this relates to the loans raised by companies against stocks on hypothecation documents. The words used in the defence rule dated May 17 are these: "Securities shall include shares, stocks, bonds, debentures and debenture stocks issued by or for the benefit of a company". The view taken by the Law Department of the Government of India is that the word "bonds" includes the hypothecation deeds executed by companies for loans against stocks. On this interpretation, there is hardly one single joint stock company in India that will not be obliged to go to the Examiner of New Capital Issues for some kind of sanction or other. If this official has to deal with applications from every joint stock company in India, we will need not one examiner but tens of examiners; and we will need a whole swarm of officers and clerks. On enquiry, it was elicited that it was not the intention of the Government to include hypothecation loans of companies in the purview of the new defence rule. But the use of the word "bonds" in the rule has given it an application which was not intended and which will cause the most widespread and most serious inconvenience. One may go so far as to say that sanction for every loan taken by a company is impracticable. It would appear that the word "bonds" was used in the Indian Defence Rule simply because it appeared in the corresponding defence rule in Britain. The term "bonds" is used in this country in a general sense. The strict meaning of 'bonds' is that they are a security payable on a fixed date. We thus speak of 3 per cent 1946 bonds because these bonds are redeemable on a fixed date in 1946. On the other hand, we speak of 3 per cent 1949-52 defence loan as there is an option to repay this loan between 1949 and 1952. This is the generally accepted distinction between bonds and loans. But bonds are, in a loose sense, used to mean any document of security. This is the sense in which the law authorities have construed it so far as the new defence rule is concerned. The solution for this conundrum lies, therefore, in an amending rule expunging the word "bonds" from the defence rule of May 17.

The exchange market has been less dull but none too lively. The rate is unchanged and the undertone steady. Discussions regarding the exchange business that may come to the market from the recent 70 crore yards hessian order from America emphasise that the transaction is one in which the United States Government are the purchaser. If so, the exchange in connection with this order will be in the nature of reverse lease and lend. That is, the exchange market will get no business from this.

(From Our Correspondent)

New Delhi, June 21.

NEW Delhi finds itself strangely excited by the official announcement the appointment of Field Marshal Wavell as the Viceroy and that of General Auchinleck as Commander-in-Chief. The latter used often to be mentioned in Secretariat talks as the most probable if and when Field Marshal Wavell found himself called elsewhere, but few indeed expected that the Field Marshal could at the present stage of the war be spared from the Army. The selection of General Auchinleck has given general satisfaction owing to the big reputation which he has already built up for himself in the Legislature and outside as a man with keen Indian sympathies and large political imagination. To the British and Indian Army Headquarters his appointment amounts to no more than the return of an old friend who has grown up in their ranks. And I find that among the American forces also the General is greatly esteemed. There is little doubt that "the Auk," as he is affectionately called in military circles will be an outstanding success as Commander-in-Chief and will go far to improve the relations between the Army and the public. Only, it is necessary to ensure that he will not again be sufficiently shifted to some other theatre of war at the bidding of the War Office. As he is only 58 years of age, he can at least continue for two years as Commander-in-Chief.

* * * *

The reasons for Field Marshal Wavell's appointment as Viceroy are still a matter of speculation. As undoubtedly he is one of the greatest Generals whom Britain can claim in her long military history his eminence cannot be questioned. As a writer and scholar also his prestige is high. As it is now the rule in the British Army to put leadership in the hands of younger men, it was probaly decided by the War Office that as the Field Marshal is now completing his sixtieth year, he may be freed from the arduous responsibilities of an operational Command. And then there is the other consideration that as a result of the Washington talks a new unified East Asia Command is being set up for operational purposes—most probably under General Stilwell—which will inevitably convert the India Command to a training and supply base, Field Marshal Wavell could well be spared for other work. It is an open secret that the Field Marshal is one of Mr. Winston Churchill's most trusted men. If he had not chosen him for the Viceroyalty, the Prime Minister would select him for a war job in the Cabinet itself. It has evidently been a last minute decision of Mr. Churchill to transfer the Field Marshal to the Viceroyalty. Official circles are happy over the choice for two reasons—firstly, the presence as Viceroy of an Army General who has intimate experience of Indian conditions as Commander-in-Chief will be helpful in getting complete co-ordination between the civil and military administrations for the efficient prosecution of the war, and secondly, the fact that the new Viceroy is no newcomer who has to learn his India first but one who has been with them during these difficult months. In no-official circles, there is naturally a feeling of trepidation about the probable political line which the Field Marshal may take as Viceroy, but I understand that the Indian Members of the Viceroy's Council have high regard for the Field Marshal and feel sure of his earnestness and sympathy. It is said that on most questions which came up before the Viceroy's Council the Field Marshal respected the views of the Indian Members and went far to accede to their wishes. One member of the Assembly told me "It is true that a good General need not necessarily be a good statesman but there is no reason why Field Marshal Wavell should not prove to be a good statesman also." In New Delhi the general inclination is to avoid passing any hasty judgment on the new Viceroy but to wait and see what he does. It has also to be remembered that October is still far off—if the military situation develops, it may even happen that the Field Marshal may not find himself free to come to India for some time yet as it happened in the case of Sir John Dill who was appointed Governor of Bombay but found himself sent elsewhere.

All reports in New Delhi point to the fact that within the next few months big decisions will be taken in India—chiefly military in character. Though a good deal will depend upon the way in which the programme for the European offensive progresses, it is becoming increasingly clear that the stalemate in the Far East will be ended as soon as possible. The failure of the Arakan operations has at least conveyed certain salutary lessons. It is as a result of these results that the new East Asia Command is being organised as a unified Command. Any major offensive in the Far East necessarily implies that though the Indian Command may be only a training and supply base its responsibilities will be very great. For this very reason many in New Delhi think that Field Marshal Wavell will not neglect the political aspect of the problem in India. As soon as he assumes office he may get into touch with Indian political aspect of the problem in India. As soon as he assumes office he may get into touch with Indian political leaders and try some way to end the deadlock—as a problem directly connected with the defence of the country. The suggestion made in non-official circles is that in order to make the Field Marshal's task easy the present Viceroy himself should release Congress leaders and give an opportunity for political talks again. If this happens, one may say that the mission of Mr. Phillips has not been in vain, but there are many who are still sceptical and think that the Churchill Cabinet has no intention of taking up the Indian political question before the end of the war.

* * * *

To-morrow's meeting of the Viceroy's Council is expected to take important decisions on the food question. Major General Wood is already in Simla to make a report to the Viceroy on the results of his recent tour. The new Food Member, Sir Azizul Haque, is also hurrying back to attend the meeting after conferring with the authorities of the Bengal Government. It is undoubtedly a difficult position in which the Government of India find themselves. Early this month the Government of India appear to have decided to allow free trade in foodgrains throughout the country—with the exception, of course, of the Punjab and Sind whose Ministries hold a different view and are not prepared to accept the Government of India's scheme. The Government's decision was about to be announced in New Delhi when Major General Wood who was having a conference in Bombay discovered that the Provincial Governments of Madras and certain other provinces were also bitterly opposed to the scheme. For the present the official announcement has been postponed, and as to-morrow the Viceroy's Council meets to review the whole position, it may be possible to take a final decision within the next few days. The control scheme failed to achieve the required object because of certain economic reasons which it left untouched and still operate to-day. And, so, it is felt in business circles that by the mere adoption of a decontrol scheme, the position can be eased. It has been said that "the immediate result of the Central Government's action in decontrolling foodgrains in the eastern region, that is Assam, Bengal, Bihar and Orissa was a spectacular increase in the price of rice and other food grains in those areas." Will the position be any better if it is extended to other porvinces—particularly when the two big wheat provinces of the Punjab and Sind are to be extended? No wonder that the Madras has openly protested against the Government of India's scheme. As the proposed decontrolling scheme, instead of bringing any effective relief to the public, may only result in new complications, it is likely that at to-morrow's meeting the Viceroy's Council may decide to hold up the scheme for the present.

* * * *

What then is the Government of India to do? I have tried to ascertain non-official opinion—particularly among members of the Legislature. There is a general feeling that the Viceroy has made a mistake in crowding three big departments—Food, Commerce and Industries and Civil Supplies—into one portfolio. Food has always been an urgent problem—it is even more urgent to-day. And the time has certainly come to have a separate Member for Food with certain additional responsibilities connected with civil supplies. And nothing would be more useful than the appointment of an experienced businessman as Food Member. Whatever may be the great administrative abilities of Major General Wood he cannot be expected to do what a Member drawn from public life can, in getting into touch with the interests concerned and understanding the people's hardships. The experts brought from England will also require a few months to understand the peculiar difficulties of the country. It has therefore been suggested that the Government of India would do well to call immediately a conference of representatives of commercial opinion and others to discuss the food question and see what can be done. What is required is a clear understanding of the problem and a definite policy.

* * * *

The problem of sugar supply is also receiving the close attention of the Government of India at the moment—particularly in view of the strong criticism which has recently appeared in the Press. Production for the season 1942-43 up to 31st May, 1943, amounts to 10,68,738 tons. According to information available here the balance physical stock of 1941-42 season sugar was only 1,309 tons. The official claim is that at no time during the last 5 or 6 years has the production of sugar moved so rapidly into consumption as in the year 1942-43. One reason for the market scarcity is said to be the increased demand due to a large diversion from gur to sugar. There is also the fact that certain persons have been buying large quantities and thereby depleted stocks. According to official accounts sugar prices have only risen since 1939 by about 48 per cent. while the rise in the case of other commodities has been far more. It is said that 50 per cent of this season's sugar has already passed into the consuming market. To sum up, the official position is that both as regards production and distribution the sugar position is very satisfactory.

Bombay, June 23.

IT is too early to shout, for it is known that the economic saboteur is not without resources. The woe-begone speculator is a myth. He has only changed the venue. His triumphant laugh of scorn rocks the stock exchange, the yarn and the piecegoods markets, while his pockets still jingle with the sound of ill-gotten gold. Since the cotton, bullion and the seeds markets no longer afford him scope, he has directed his activities to the fields mentioned above. Early in February last year, the stock exchange authorities put an end to forward trading. In March this year, they decided on a system of fortnightly clearing for certain shares in view of the inability of the clearing-house to cope with the work of settlement and taking into account postal delays. So that spot trading has become virtually forward trading on a fortnightly basis. The concentrated energy of the speculating tribe thus being turned on the stock exchange, the volume of business daily transacted has multiplied several times. The Government and the stock exchange authorities are now putting their heads together and it is expected that the Stock Exchange will tighten up the rules for spot trading. Else, the D. I. Rule will have to be invoked as the Bombay Securities Contract Control Act limits the power of the Government to regulating forward trading in shares. Maybe, forward trading in the yarn and piecegoods markets will come to an end with the coming into force last week-end of the Cloth and Yarn Control Order.

The Bombay Medical Congress, the first of its kind held in the city, met on Saturday last at the Anatomy Lecture Room of the Grant Medical College. Sir Jamshedji Nusserwanji Duggan presided at the conference in which were assembled leading lights of the medical profession, British, American and Indian, besides a large number of students. Science has taken prodigious strides forward since the early part of the nineteenth century. Medical men command more knowledge and experience and the public, too, has greater familiarity with diseases and their treatment than was the case in those early days when "Boz" published his superbly satirical account of the Mudfog Congress. The atmosphere on this occasion was thick with learning and knowledge. Eleven papers were read on subjects relating to treatment of diseases, new experiments being carried on, and results obtained from treatments introduced recently and the progress made in medical research in various lines of investigation. Lively discussions followed, resulting in a welcome interchange of knowledge. The organisers, greatly impressed by the success of the first conference, have decided to hold half-yearly conferences. Such sessions make for greater contact, leading inevitably to greater publicity for successful experiments. The profession should particularly welcome the decision as it insures against precious individual experience being lost to mankind, if such experience should come the way of doctors not already in the limelight. The public welcomes with equal pleasure the permanent character given to the Congress.

Discontent has been rife among railway employees that the extent of relief afforded is not calculated to enable them to cope with the rise in the cost of living occasioned by scarcity. The Special Committee appointed by the All-India Railwaymen's Federation which met here on Sunday last week with Mr. Jamnadas Mehta in the chair emphasised this view. The Federation lately addressed a request to the Railway Board that an adjudicator might be appointed to consider the question of dearness allowance, which, however, has been flatly refused. The back of the Federation is naturally up and the Special Committee, when it met again on Monday, passed a protest resolution characterising the Railway Board's reply as "ill-informed and disappointing". The Committee states that the situation will not brook delay and holds that failure to provide early relief to the suffering employees might result in consequences which would be deplorable. The Railway Board is asked to furnish information within a fortnight in regard to the number of workers benefiting through the cheap grain shops and the savings in cash accruing to the workers as a result of the shops.

The local European community is exercising its mind about improving the hospital facilities available to them. A representative provisional committee, set up to go into the question, has submitted its report. Its findings strongly favour the construction of an up-to-date hospital immediately after the war. It is held that without such a hospital the European community will find themselves in awkward conditions regarding hospital amenities. Fear is expressed that St. George's Hospital which serves the purpose now might be closed down after the war. Any possible criticism that such fear is groundless is anticipated in the further argument that, in any case, St. George's Hospital is obsolete. Another reason put forth is that new Government hospitals might not provide for paying beds. One can well understand that Europeans in India have correct notions of Western habits of life and that free beds have an unbearably Oriental odour. The community has set its heart on having another hospital and that is reason enough. Finance is hardly likely to prove a stumbling-block for the European community. Out of Rs. 8¼ lakhs, the estimated cost of construction, Rs. 2½ lakhs are likely to be made available from accumulated funds. The balance will be raised somehow as the hospital is passionately desired. The projected hospital is planned to contain 60 beds of which it is said 40 would probably suffice for the community's requirements. It is stated that Indians following Western habits of life might possibly be allowed to use the extra beds if the hospital proved to be large enough to give accommodation to Indians. It is a kind thought, but the prospect of Indians deriving any benefit from the contemplated hospital is rather remote. The Indian public view the matter that an amenity is always to be desired, small matter which community benefits. The Indian community wishes to give all possible support though it cannot help the feeling that the half-hearted and cautiously-worded offer is uncalled for. A meeting of the European community is to take place to-morrow evening at the offices of the B.E.S.T. to discuss the report of the Committee and formulate plans for preliminary arrangements. The institution, it is learnt, will be self-supporting as the hospital when it is constructed, is assured of an annual income adequate to meet the maintenance costs.

The Cloth and Yarn Control Order issued by the Government of India has been received by the public as well as the mill industry with genuine relief. The cotton trade, too, is not altogether without hope. The public are overjoyed to learn that the hoarded stocks of cloth will be forced to come into the market, bringing down inevitably the price of cloth to a reasonable level in the immediate future, and, as for the distant future, the successful functioning of control should make available to the public their cloth requirements at economic prices. The industry here heaves a sigh of relief for a different reason, namely, that the Order is not half as drastic as was expected and, by leaving the initiative largely in the hands of the mill-owners, ensures smooth working and provides against arbitrary interference in regard to prices or profit margins. In contradistinction to control in other spheres, the cotton control scheme has better chances as control in this case is to function on a basis of co-partnership. Cloth and yarn markets too have bucked up after the announcement of the order. A sharp rise in prices was registered in both markets on Thursday. The price of Leopard cloth, the speculator's favourite of late, went up by 3 annas per lb. while 20½s yarn registered an increase of over Rs. 100 per bale. This sudden rise in the cloth and yarn markets is attributed to active bear covering. There is, however, an undercurrent of nervousness among traders who feel that prices are bound to decline and find more normal levels in the near future.

The President of the Bombay Piecegoods Merchants' Association, Mr. Devidas M. Thackersey has appealed by telegram to the Government of India for an amendment of the Order so as to admit of full packed bales being held and liquidated up to October 31, instead of August 31. His case for seeking such an amendment is that the period of the monsoon being the dullest season for the

trade, it would be impracticable to dispose of full bales within the period stipulated. He has also sought information as to whether the clause requiring stocks to be declared also applies to stocks of unpacked loose pieces.

The urgent need for the development of India's key and defence industries and the desirability of a change in the Government's fiscal and industrial policy to facilitate such development was the keynote of the speech which Mr. G. L. Mehta, ex-President of the Federation of Indian Chambers of Commerce and Industry delivered at a meeting of the Progressive Group held at the Taj Mahal Hotel, early last week. Mr. Mehta argued that the development of key and defence industries should be encouraged even if they happened to be unremunerative, on the ground of wider national considerations. He pointed out that the present war abundantly proved that a country strong in respect of its defence and key industries could successfully hold its own against foreign aggression. He deplored the lack of incentive on the part of the Government to expand industrial production when revolutionary changes in world economy and outlook pointed to the need for such expansion. In this respect, he said, the policy of the Government of India was in marked contrast to the policies followed by the Dominions. Since industrial expansion depended on the fiscal and industrial policy pursued by the Government, it was of paramount importance that both should change. The fiscal policy followed in India was based, he said, on conditions which obtained some twenty years ago. As for the Government's industrial policy, it was best illustrated by the fact that the Government had failed to foster heavy industries and it was content to consider war effort in terms of supplying available goods and materials to the U. K. He concluded his address with the remark that there was no need for Indians to feel apologetic about demanding that India's industrial and economic development should be the principal criterion when judging plans of international economic collaboration since international policies of leading countries were always based on their own national interests.

37 Years ago . . .

When UNITED INDIA wrote its first policy the dream of protecting people through Life Insurance in our country was in its infant stages, almost a novel idea.

To day . . .

UNITED INDIA IS A NAME YOU CAN TRUST

BOMBAY BUILDING

CALCUTTA BUILDING

This achievement of UNITED INDIA is pretty simple; it is merely a process of addition, slow but cautious and deliberate, spread over a period of nearly thirty seven years, accumulating nearly to Rupees 6,75,00,000 Assurances in force, Rupees 1,80,00,000 of Assets, and Rupees 39,40,000 of Annual Revenue. These achievements are indicative of the sustained strength, vitality, and supremacy of the Institution.

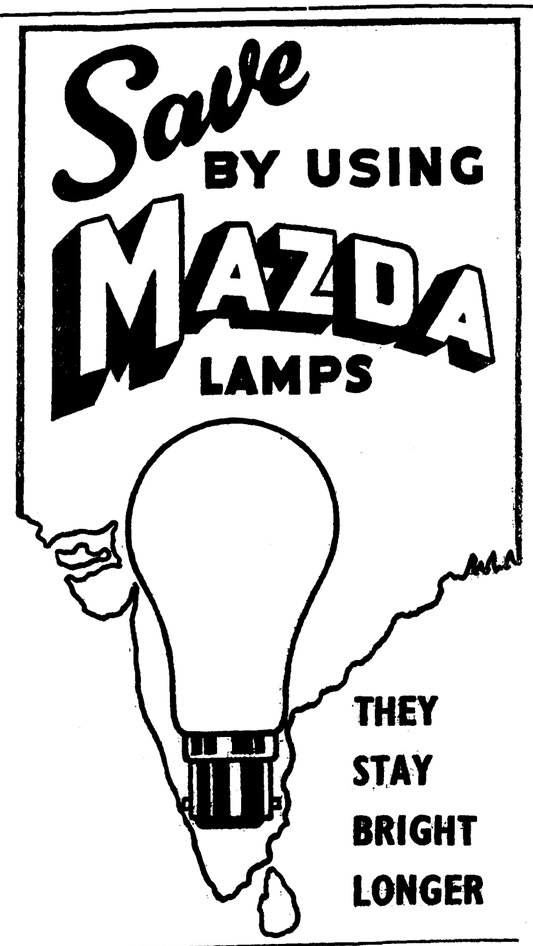
Resume of Commodity Markets

There are no important features to be recorded in the commodity markets during the past week. The raw jute market has adjusted itself to the situation created by the decisions made by the Indian Jute Mills Association following the receipt of the American order for 70 crore yards of hessian cloth to be delivered over a period of 8½ months. The jute manufactures market has been easier even with the absence of mill competition. Interbazar dealers have been anxious to liquidate stocks and keep their position sound. The piecegoods market has been weak with the passing of the control order while the bullion markets have been steady. Oilseeds also have been easier.

* * * *

The Government of India is still unable to find a satisfactory solution to the many problems regarding the supply and distribution of food grains in adequate quantities to the various provinces in the country. The position is daily growing more acute, particularly in the Eastern zone. Even with the restoration of free trading there has been no alleviation in the distress of the masses and thousands have been obliged to go without food for many a day. The Bengal Government has been at its wits end to produce results. There is a feeling that the anti-hoarding drive has not been successful. The Bengal Government has, therefore, taken on itself the responsibility of distributing the principal food grains from its own shops and it is hoped that as a result of the new measures it will be possible to bring down prices to a certain extent. The fundamentally wrong statistical position is evident from the fact that any large-scale inter-provincial movement results in a disturbance in the price structure in one province or another. For instance, the restoration of free trading between the provinces of Bihar, Orissa, Bengal and Assam resulted in a rush of buyers for rice in the Orissa province and pushed up prices to very high levels. The Orissa Government got frightened at the large-scale export of rice from the province and recently prohibited the movement of rice to places outside the province other than the Eastern zone. Unless some general policy is initiated and active measures are taken to re-inforce supplies, it cannot be expected that the control policy of the Government will prove to be successful. It is unnecessary to point out that the anti-inflationary drive of the Government will not prove successful if the Government fails in its objective.

* * * *



The jute market has not been very interesting. The fixation of maximum prices for jute and the arrangements for the speedy despatch of the raw material to the mills have made it possible for business to be transacted at the agreed maximum rates. Sellers are not very anxious to do business and are inclined to await further developments. It is felt that the fixation of maximum prices for jute without the fixation of maximum prices for jute manufactures also cannot hold good and that mills would be compelled to pay high prices if they had finished their purchases of jute against the recent order. There has naturally been some objection to the policy of the Indian Jute Mills Association in regard to the fixation of maximum rates and the views of the Bengal Government on the subject are awaited.

* * * *

The new order passed by the Government of India last week providing for the control of cloth and yarn has had a discouraging effect on values in the piecegoods market. Speculators have been relieved to a certain extent as maximum prices for cloth and yarn have not yet been fixed. It is also felt that the new order will not take long to come into being, but the vigorous distribution of stocks should bring about ultimately a substantial decrease in prices.

The new Textile Control Board will consist of 25 members and assist the Central Government through the Textile Commissioner generally on matters connected with the purpose of the order, namely, to declare and define classes and specifications of cloth and yarn which may be manufactured by mills, to fix maximum prices both ex-factory and retail and to prescribe the markings which the manufacturers shall make upon the cloth manufactured by them. Manufacturers and dealers have also been called upon to declare not later than the middle of August, 1943, all stocks of cloth and yarn held by them as at the end of July, 1943 and are required to dispose of such stocks before the end of October, 1943. All cloth manufactured after July, 1943 and bearing the specially prescribed markings is to be disposed of by retail sale within six months of the date of packing by the mills. Persons other than dealers and manufacturers are prohibited from having in their possession cloth or yarn in excess of their own normal requirements.

As we go to press it is reported that the Government of India have passed an order prohibiting forward trading in cloth and yarn as from today.

Jute and Jute Manufactures

(By Our Jute Correspondent)

Calcutta, 24th June.

As was only to be expected, the arbitrary fixation of maximum jute prices has evoked a minor flood of ill-informed and uninstructed criticism. One of our daily contemporaries devotes a leader to a jeremiad on the mischief and misery which the control of particular commodities can cause to the cultivator. Unfortunately the writer in this instance starts from false premises. Jute is the popular "cash" crop of Bengal, not because it can always command a higher price per maund than other agricultural commodities, but because it is the only readily saleable crop which can profitably be grown on land, most of which goes under water for several months of the year. Neither does the Bengal cultivator utilise the proceeds of his cash crop to purchase foodstuffs to any extent. Being a cultivator, he grows at least sufficient rice for his family's needs, as well as other foodstuffs. Therefore unless he has been tempted by the high price to sell his stock of rice, the cultivator class is the one class in Bengal who are not, or should not be, detrimentally affected by the abnormal rise in the price of rice. If he grows excess rice, as a vast number of cultivators do, he must have benefited by the rise in price secured for his excess and should still have sufficient for his own family needs. Therefore the cultivators are the one class in Bengal who are secure for food requirements regardless of the price to which they may soar. Where then is the misery that our Jeremiah prophesies and why should the fixation of the prices of jute at such "low" levels prove disastrous to the cultivators? In the first place, is the price low? The rates fixed for the maxima would have been considered thoroughly satisfactory only a month or two ago, and the amount by which they are discounted from the top rates ruling recently represents sheer unadulterated inflation of which the cultivator has received no benefit whatever, the proceeds having gone into the pockets of dealers and middle men. We have already suggested that circumstances are such that the cultivators are likely to be able to secure a larger proportion than usual of the Calcutta price. That is to say, taking District Middles as an average at Rs. 16-8, the cultivator is likely to secure something like Rs. 13-8 for average quality jute and when did he last see a price anything approaching that? Last season most of the crop was marketed before prices began to soar appreciably and if the cultivator was willing to dispose of his "cash" crop last year at around Rs. 4 and Rs. 5 per maund, a price of Rs. 12 or Rs. 13 will certainly look attractive to him. It is no argument that whereas in ordinary times one maund of jute will purchase 1¼ to 2 maunds of rice (even if that were true, which we do not admit), at the present time it will only buy half a maund.

We have suggested that the cultivator is likely to secure a larger proportion of the Calcutta price for his jute than has been the case during the past season. With a restricted crop in view, it seems probable that there will be a greater urgency to buy than to sell, which puts the cultivator in a strong position. Another situation which can be foreseen is a much closer approximation in the standard of quality of deliveries to the specifications laid down by the I.J.M.A. During the season just closing there has been, for most of the time, a considerable working margin between the buying and selling prices which has enabled balers and dealers to play for safety and give away a good deal in quality to avoid claims. This is confirmed by the comparatively few arbitrations which have taken place. The trading margin will almost certainly be much reduced this coming season and balers will be compelled to pack much closer to the official standards to avoid loss. It is satisfactory to note that Mills are recognising this probability by demanding a reasonable percentage of Tops, in some cases up to 30 per cent, in their purchases.

A point which is causing some heartburning is the insistence on strict adherence to the "official" list of "Jat" stations which was compiled some years ago. Europeans in particular have been in the habit of selling "all agencies" at one overhead price, whereas they are expected now to accept eight annas per maund less for any station not appearing in the official "Jat" list. There is no question but that the "all agency" overhead price frequently permitted business to be done when it would have been impossible for "Jat" stations alone. Moreover the official list of Jat stations is by no means exhaustive and contains certain anomalies which might well be rectified. It is difficult to understand for instance why Kenduakalibari is a Jat station while the next station, Bausi, is not. Or again why Moynot is classified as a Jat station while Tarpassa on the one side and Lesraganj on the other, both in the same district and on the same river and on the same side of the river, are not so classified. Moreover, the list contains a great many stations at which shipping facilities are at present either non-existent, or at best extremely restricted, and if Mills hope to get supplies from many such stations, it will only be by the medium of Country Boats (which may or may not have loaded at the Jat station from which they profess to have started) or through one of the main stations where freight is available, which itself may not be clasified as a Jat station. Legitimate grievances however should be easily enough removed by minor adjustments to the official list.

In view of the very large order for hessians placed last week, the U.S.A. stock and consumption figures published for May are of particular interest. Consumption is returned as 3 crores yards against 4.8 in the previous month and 4.9 in May last year. So the improved consumption indicated by the March and April returns has not been maintained, though the figure of 3 crores is larger than in any other month during the last twelve with the exception of these two. For a full twelve months up to the end of May, consumption totalled only 31 crores yards as against the 70 crores delivery of which is required within the next nine months. Mills deserve all credit for meeting the U.S.A. demands without quibbling, considering the lack of encouragement they have had from America in the past twelve months. American stocks at the end of May amounted to 16.7 crores yards of which 5.3 was on spot and 11.4 afloat. This compares with a total of 14 crores a year ago of which 9.8 was on spot and 4.2 afloat. The low afloat figure last May was accounted for by unsettled conditions in the Bay and also coincided with the commencement of deliberately restricted imports of burlap to the States.

There is little to record in Export Jute for, by agreement, Dundee and the U.S.A. are both keeping out of the market for the time being. The only transactions reported have been resale or covering of Dundee Daisee at Rs. 90 June and July shipment. Mills have purchased to a moderate extent at maximum rates, Firsts at Rs. 90, Lightnings at Rs. 85 and Hearts at Rs. 80 and Rs. 79, all for New Crop. Old Crop Lightnings and Hearts have been discounted to Rs. 83 and Rs. 78 respectively. Some Dundee Daisee 2/3 was reported at Rs. 88 with 4s at Rs. 82 but sellers are not disposed to commit themselves deeply in either Firsts, Daisee or Tossa.

In Loose Jute there has been a moderate business, mainly in Supervised District jute at Rs. 18-8, Rs. 16-8 and Rs. 13-8, the maximum rates for District Tops, Middles and Bottoms. Very little Jat jute is on offer yet and Europeans are holding aloof. Some old crop district Tossa was reported at Rs. 19 and Rs. 17 for Tops and Mids. New Crop reports are quite satisfactory. Cutting has commenced and is proceeding slowly in the earlier districts. Rivers being normal, there is no urgency to cut till the jute is fully mature.

With Mills out of the market, trading in fabrics has been confined to the Bazar, which is apparently realising that the outlet for goods is going to be very restricted except at controlled rates, and has been inclined to liquidate accordingly. The standard counters, eleven porter hessians and "B" Twills each show a sharp decline on the week, elevens from Rs. 28-12 to Rs. 26-12 and "Bs" from Rs. 70-4 to as low as Rs. 65-12. At the close there has been a slight reaction to Rs. 27-4 for eleven porters and to Rs. 66-12 for "Bs", for no apparent reason. Early on "Bs" sold at Rs. 71 August, Rs. 70 July/September and Rs. 69 October/December. Liverpools are recorded at Rs. 75 June and Cuban Sugars at Rs. 86 also for June. Heavy Cees changed hands at Rs. 84-8 for June. There is reported to be Government enquiry for further 34 lakhs eleven porters for July/September delivery, also for 4 lakhs "B" Twills for the same delivery.

JUTE

Calcutta, June 24.

A larger volume of business has been passing in the raw jute market at the agreed maximum rates and mills are reported to have been busy. Reports regarding the growing of the new crop in the districts are very satisfactory, and it is said that cutting on an increasingly large scale has begun. Business put through during the week has been optional regarding delivery either of old or new crop. It is felt that mills will not have any difficulty in getting their requirements of jute against the latest order owing to the speedy despatch of jute direct to mills though, as was pointed out last week, it does not appear that jute will be sent from mofussil districts only to mills directly. The system of priority registration has been inaugurated and it is said that as far as possible wagon space will be effectively used. With the present judicious buying by mills it is felt that it would be possible to get jute at the agreed maximum rates though, it cannot be definitely said, whether it will be possible to enforce the present maximum rates if the authorities do not happen to be successful in their programme of speedy movement of jute supplies.

In the loose jute section business passing has been done at the agreed maximum rates. Indian Jat Middles and Bottoms were done at Rs. 17 and Rs. 14 respectively with Districts 8 annas lower. Sellers have not been very keen for business.

In the pucca bales section some business has been reported with shippers for export in Dundee Daisee 2/3 at Rs. 90 per bale and Dundee Daisee 4's at Rs. 84 per bale. Mills are reported to have purchased Firsts and Lightnings at Rs. 90 and Rs. 85 per bale respectively. Dundee Daisee 4's also were bought at Rs. 85 per bale and Tossa 4's at Rs. 99.

JUTE MANUFACTURES

Calcutta, June 24.

In the jute manufactures market rather quiet conditions were noticeable and a substantial decline in prices has been recorded during the past few days. With the publication of discouraging stock and consumption figures for the month of May from the U.S.A. inter-bazar dealers have been anxious to liquidate their stocks and 9 porters ready came down to Rs. 20-4 from Rs. 21-2 at the time of last writing. Closing quotations have been a bit steadier. There has been no export enquiry and most of the business passing has been mainly on account of inter-bazar operators. 9 porters ready closed at Rs. 20-6, July/September at Rs. 20-6 and October/December at Rs. 20-2 against Rs. 21-12, Rs. 21-12 and Rs. 21-8 respectively, at the time of last writing. 11 porters ready were quoting Rs. 27, July/September Rs. 27-3 and October/December Rs. 27-2 against Rs. 28-4, Rs. 28-7 and Rs. 28-4 respectively at the end of last week.

In the Heavy Goods section also easier conditions have been noticeable in sympathy with the hessian market and only a very small amount of business has been passing. B. Twills for June delivery were sold on the basis of Rs. 66-8, Liverpool twills at Rs. 71-8 and Cornsacks at Rs. 67.

The increase in the level of consumption in the U.S.A. in the months of March and April gave rise to the hopes that the period of lean consumption was at an end and that, with the easier shipping situation, it would be possible to look forward to a period of a more satisfactory level of consumption. These hopes were to a certain extent justified by the anxiety of the U.S. authorities to lay in adequate stocks of hessian goods by placing two large orders. The figures for June do not justify these hopes and there has been a surprising decline in both stocks afloat and consumption for May. The figure of consumption at 30 million yards compares with 48 million yards for the previous month and 49 million yards for the corresponding period of 1942. Stocks afloat are 114 million yards against 150 million yards in April. Stocks spot show an increase to 53 from 46 million yards. The figures are given below:—

U.S.A. HESSIAN STOCK AND CONSUMPTION

Excluding Pacific Coast Business
Millions of yards

GOLD

Calcutta, June 24.

The Bombay gold market has remained rather steady and quotations are higher on balance though lower than the highest levels for the week. In spite of the very poor offtake, prices have been fully maintained owing to the shortage of contracts. The absence of any large investment demand and the artificially high level of prices for both the precious metals are borne out by the gradual decline in the premium for ready over delivery contracts. With a further improvement in the military situation and the continuance of present conditions, it is generally felt that it would not be possible to maintain the present level of prices for both gold and silver. There was a slight reaction in mid-week to Rs. 81-8 from Rs. 83-4 but it was only shortlived. The close was steady at Rs. 82-4. Sovereigns are in short supply and the quotation is Re. 1-4 higher at Rs. 58-8.

SILVER

Calcutta, June 24.

The silver market also was steady and quotations were marked higher. Even at the end of last week, it will be remembered, firmer conditions were noticeable. With good demand and the shortage of ready supplies in the market silver ready improved to Rs. 127 in the early part of the week. At the higher levels there was some selling and the quotation towards the close is easier at Rs. 125.

There is no change to be reported in the London market and the quotation for both Ready and Forward is unchanged at 23½d. Business passing has been on a very small scale.

PIECEGOODS

Calcutta, June 24.

Definitely easier conditions have been noticeable in the piecegoods market and but for the refusal of mills to reduce their quotations, a further decline in prices would perhaps have been recorded. Business passing is on a very restricted scale and there is a tendency to await further developments. The passing of the recent control order has given rise to the feeling that Government may after all be successful in pushing down rates for piecegoods though it is felt that the efforts of the Government and the industry will be to a certain extent frustrated by the diversion of goods to the black markets. The developments during the next few weeks should be carefully watched.

TATA IRON AND STEEL DIVIDENDS FOR 1942-43

After remaining steady for the most part of the week, slightly easier conditions have been noticeable on the Calcutta Stock Exchange during the last two days. The easier tone of the market in the latter half of the week has been mainly due to the weakness of Bombay following the reports that the Bombay Government have asked the stock exchange authorities to declare "budla" business illegal and shorten the period of delivery. It was pointed out last week that the system of fortnightly clearing amounted in effect to the continuance of forward trading and that there was need for tightening restrictions in regard to deliveries and the transaction of business in order to curb speculative activity. As there has been speculative buying during the last few months, there has naturally been a hurry to adjust positions and quotations for textile issues especially have been marked down in the Bombay market. Values have been marked lower in the Calcutta market also in sympathy. The undertone, however, is steady and, given the continuance of the present conditions, the upward trend will soon be resumed.

* * * *

The feature of the week is the announcement of the dividends by the directors of the "Tata Iron and Steel Company Limited" for the year ended March, 1943. After the payment of the usual first and second preference dividends, less income tax, the ordinary shareholders are to receive Rs. 23 per share against Rs. 27 per share for 1941-42 and the deferred shareholders Rs. 129-8-9 against Rs. 158-4-4. There is no mention regarding the payment of any part of the dividends in bearer deposit certificates as on the last occasion when Rs. 12 per ordinary share and Rs. 86 per deferred share was satisfied by the issue of bearer deposit certificates bearing interest at 3 percent per annum.

The payment of the lower dividends for 1942-43 has not taken the market by surprise as it was generally expected that with the need for making large deposits with the Government of India in pursuance of the recent measures, it would not be possible to maintain dividends at the level of 1941-42. In fact, the market seems to have correctly anticipated the dividends as even last week it was being mentioned that the dividend on ordinary shares would be around Rs. 23 per share. The accounts are not yet available but it can be expected that there would be a further improvement in earnings. Plant production capacity has been further expanded. Even on the basis of the latest dividend the ordinary shares around Rs. 400 cum-dividend afford a return of more than 5.8 percent taxfree.

* * * *

The press communique issued this week regarding the control order affecting new capital issues gives the answer to certain important questions that have been raised in these columns on former occasions. It has been definitely pointed out that every invitation for new capital from the public is to be sanctioned by the Examiner of Capital Issues. Even in cases where the announcement had been made prior to the passing of the order, and no allotments had been made before May 17, 1943, permission is necessary from the Government. Perhaps the issue of bonus shares, completely free to shareholders, is exempted as also calls on partly-paid shares. The issue of new shares in the case of running concerns on bonus terms is also prohibited. The question has been discussed at length in the main issue.

* * * *

The accounts of the "Amalgamated Coalfields Limited" for the half-year ended March, 1943, show that there has been a decline in earnings over the previous half-year on account of the lower level of raisings and despatches due to the shortage of labour. The net profit, before providing for taxation and depreciation, is Rs. 1,80,241 against Rs. 2,69,056 for the previous half-year. The amount set aside to depreciation is Rs. 44,931 against Rs. 46,073 while the provision for taxation is considerably lower at Rs. 25,593 against Rs. 1,02,073. After transferring Rs. 4,590 (nil) to general reserve, the dividend has been maintained at 20 percent per annum. The amount carried forward is lower at Rs. 18,177 against Rs. 30,550 brought in.

The entire output of steam coal, for the present, is being delivered to the G.I.P. Railway under orders which have been served on the Company under the Defence of India Rules. But for the difficulty on account of labour, it would be possible to report a substantially higher level of earnings. On the publication of the report, there has been a rise in the quotation for the shares to Rs. 38-12 cum-dividend.

* * * *

An all-round decline in the rates charged by the British Government regarding War Risks Insurance bears testimony to the recent statements made by responsible allied spokesmen regarding the success of the anti-U-boat warfare. In certain zones substantial reductions in rates have been effected. It is interesting to note that in spite of the general opinion that the Mediterranean route is not safe for allied shipping, the war risks insurance rate via the Mediterranean route is actually lower at 5 percent against 10 percent charged for the route round the Cape. A reduction in the war risks insurance rates naturally points to a considerable improvement in the shipping situation. To that extent the outook for our export industries has improved. Only this week there were reports regarding the possibility of a substantial improvement in coal exports and there was some buying of shares belonging to the MacNeill Group.

* * * *

The accounts of the "Dessai & Parbuttia Tea Company Limited" for the year ended December, 1942, shows that there has been a substantial improvement in the net profit, before providing for taxation and depreciation, due to a large increase in the crop turned out. The average price realised also is higher. The net profit is Rs. 4,26,489 against Rs. 2,95,516 for 1941. The amount provided for depreciation is lower at Rs. 35,000 (Rs. 38,000) while the provision for taxation is considerably higher at Rs. 1,50,000 (Rs. 95,000) A sum of Rs. 25,000 (nil) has been placed to Replacement Reserve. The dividend on the ordinary shares has been increased to 35 percent from 25 percent. The amount carried forward is substantially higher at Rs. 2,58,468 against Rs. 1,91,979 brought in.

"WATCH-DOG."

The Week in the Exchanges

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, June 25.

VERY steady conditions were noticeable on the Calcutta Stock Exchange till Wednesday this week and business passing was on a fairly large scale. Jute and Coal shares were in greater favour and an all-round rise in prices was recorded. It was reported that there was some buying by Bombay operators early in the week. There has been some selling towards the close and quotations, especially for the speculative counters, are slightly lower. The undertone in the several sections, however, is steady. The announcement of lower dividends by the Tata Iron and Steel Company, Limited for the year ended March, 1943 did not have any effect on the Bombay market but operators in the local market were inclined to take a bearish view. There was a drop in the quotations for Indian Irons and Steel Corporation on Thursday afternoon.

The giltedged securities section has remained very steady and business has been on a restricted scale. There was some demand for short and medium-dated loans. 3½ per cent Paper was unchanged at Rs. 94-1. Among terminable loans, 3 per cent Second Defence Loan were Rs. 100-9 and 3 per cent Defence Bonds 1946 Rs. 102-14. 3 per cent 1951/54 were Rs. 99-14 and 3 per cent 1963/65 Rs. 95-9. 4 per cent 1960/70 were Rs. 110-12 and 4½ per cent 1955/60 Rs. 114-12. 5 per cent 1945/55 changed hands at Rs. 107-2. Among provincial loans, the two transactions recorded were in 3 per cent U. P. 1961/66 at Rs. 95-12 and 5 per cent U. P. 1944 at Rs. 102-14.

There has been no change in the conditions in the money market and the average discount rate on treasury bills has been unchanged at one rupee and one anna per cent per annum.

The only transaction recorded in public bodies debentures is in 5½ *Calcutta Improvement Trust* 1959 debentures at Rs. 123-8. Among industrial debentures 5½ per cent *Chowringhee Properties* were Rs. 102-8 and 4 per cent *Darjeeling Himalayan Railway Extension* Rs. 100.

Bank shares have remained firm with good enquiry for *Imperial Bank* fully paids and contributories. *Imperial Bank* fully paids were done at Rs. 1,825 and contributories at Rs. 469. *Reserve Bank* were better at Rs. 120 while *Central Bank* were unchanged at Rs. 66.

Among preference shares, business was restricted in first class jute mill preferences only due to the scarcity of sellers. *Agarpara* were higher at Rs. 165 with *Alliance* at Rs. 144. *Empire* were Rs. 165 and *Kamarhatty* Rs. 156-8. *Hastings* were Rs. 146 and *Northbrook* Rs. 148-8. Among others, *Steel Corporation* were Rs. 126 and *B. I. Corporation* Rs. 192. *Dunlop Rubber Second Preferences* were Rs. 117-8 and *Linster Antiseptics* Rs. 105.

Cotton shares were inclined to be firmer in sympathy with other sections but closing quotations are lower than the best levels for the week. *Cawnpore Textiles* were higher at Rs. 14 with *Elgin* at Rs. 75. *Kesoram* were slightly easier at Rs. 15-14. *Dunbar* were better at Rs. 299. After being higher at Rs. 10 *New Victoria* closed easier at Rs. 9-11.

Coal shares have been in greater favour and some useful rises in prices have been recorded. *Amalgamated* provided the feature with a rise up to Rs. 38-12. *Bengal* were Rs. 477, *Bokaro* and *Ramgur* Rs. 20-8 and *Burrakur* Rs. 16-10. *Central Kurkend* were more than a point higher at Rs. 16. *Equitable* were dealt in at Rs. 38-2 and *New Beerbhoom* at Rs. 21-12. Among the smaller-priced issues, *Samla* were Rs. 4-3 and *Talcher* Rs. 4-2.

In the Jute section, a greater volume of business has been reported and nearly all the counters have been marked higher. *Adamjee* were Rs. 35-12 against Rs. 34-8 at the time of last writing, *Anglo-India* Rs. 418 against Rs. 415, *Howrah* were Rs. 64-12 against Rs. 63-8, *Hukumchand* Rs. 26-12 against Rs. 26-4 and *India* Rs. 581 against Rs. 574. *Reliance* were firmer at Rs. 64-12, *National* at Rs. 28-8 and *Nellimarla* at Rs. 25-12. *Nuddea* were Rs. 104 and *Presidency* Rs. 7-4.

In the Engineering section, Indian Irons and Steel Corporations were fluctuating around Rs. 36 and Rs. 27-12 respectively for the most part of the week but on Thursday there has been a drop in the quotations to Rs. 35-6 and Rs. 27-6 respectively on the announcement of dividends by the Tata Iron and Steel Company, Limited for the year ended March, 1943. *Burn and Co.* were higher at Rs. 397 and *Bharita Electric Steel* at Rs. 14-15. On expectations of a higher final dividend *Jessop and Co.* have been marked further higher at Rs. 22-2. *Saran Engineering* and Steel Products were quoted Rs. 8 while *National Iron and Steel* and *Kumardhubi Engineering* were Rs. 13-3 and Rs. 8-11 respectively.

Sugar shares have been further uninteresting with *Balrampore* at Rs. 14-9, *Champarun* at Rs. 37-4 and *Murree Brewery* at Rs. 22. *Samastipur* were Rs. 18-2 and *U. P. Sugar* Rs. 23-6.

Tea shares encountered some profit-taking early in the week and quotations were marked slightly lower as a result. At the lower levels there has been some investment demand. *Bhatkawa* were Rs. 71, *Hasimara* Rs. 68-8, *New Samanbagh* Rs. 35-12 and *Sapoi* Rs. 20-8. *Tezpore* were Rs. 17-2.

In the miscellaneous section, there has been a significant rise to Rs. 3-5 for *Burma Corporation*. *Indian Copper* were steady at Rs. 2-11. *B. I. Corporation* were steady at Rs. 6-4. *Calcutta Trams* were fluctuating between Rs. 27-6 and Rs. 28. *National Insulated Cables* were Rs. 17-4. *Plywood Industries* improved to Rs. 12-12 and *National Rolling Mills* to Rs. 12-11. *Rohtas Industries* were Rs. 31-12 and *Indian National Airways* preferred ordinaries Rs. 17-8. *Associated Hotels* were Rs. 13-12 and *Dalmia Cement* Rs. 18-4. Among shipping shares, *Fraser & Co.* registered a sharp rise to Rs. 19-12. *India General Navigation* were steady at Rs. 125. Paper shares were steady with *India Paper Pulp* at Rs. 195 and *Titaghur Paper* at Rs. 27 cum-dividend. *Shree Gopal Paper* were Rs. 23-12.

DEFENCE LOANS

BOMBAY STOCK EXCHANGE

(From Our Correspondent)

Calcutta, June 25.

The local stock exchange was steady throughout the period under review. While the undertone was firm speculative activity was on the increase, *Bombay Dyeing* among mill shares occupying a prominent place in such transactions. Government control, strengthened by public opinion, has played a great part in the past few weeks in restricting speculative activity. But speculators refuse to be so easily subdued. Finding all other avenues closed they began to haunt the share market which still allowed some scope. It is no wonder then that the Bombay Stock Exchange was the scene of hectic activity which hoisted prices suddenly. The Government have been forced to intervene and the stock exchange authorities were asked further to restrict the period within which transactions have to be completed. Speculative buying gave place to selling in the last two days.

The week also witnessed the announcement of the Tata Dividends which were in every way up to market expectations. But the market has not moved at all by the news and it is not far from the truth to say that the announcement was almost ignored. To-day the market is still talking of the coming control of prices of cotton yarn and cloth. An announcement making public these prices will, it is believed, be published in a day or two. Somehow or other a feeling of nervousness has suddenly invaded the market and heavy selling has been witnessed, thereby bringing prices tumbling down in the Textile section except for *Bombay Dyeing*, which are still quoting over Rs. 2,000.

The giltedged section continues steady with 3½ per cent Government Paper quoting Rs. 94. Bank shares have latterly quietened down. Business remains sparse in dated stocks.

Mill shares which were beginning to show signs of some improvement towards last week-end encountered a change of conditions which were characterised some times by heavy selling and at other times by spirited buying. The net result was a general depreciation in values. On Thursday owing to heavy selling pressure there was a further drop and barring Bombay Dyeing the majority of shares have come down to a level that obtained a fortnight ago.

To-day's closing prices are *Bombay Dyeing* Rs. 2,007-8; *Central India* Rs. 437; *Colaba Land* Rs. 242; *Gokak* Rs. 336; *Century* Rs. 819; *Indian Bleaching* Rs. 223; *Kohinoor* Rs. 826; *Phoenix* Rs. 755; *Simplex* Rs. 313 and *Swadeshi* Rs. 535.

The steel section was absolutely featureless and even the Tata Dividend announcement, which was entirely on the lines the market was expecting, failed to impart any important change. Prices which were steady for some weeks past continued almost unchanged this week also, *Tata Deferreds* quoting Rs. 2,037-8, *Tata ordinary* Rs. 409 and *Indian Iron* Rs. 35-8.

In the miscellaneous section *Andhra Valley* remain unchanged but *Tata Power* and *Tata Hydro* are higher by 5 points and 2 points respectively at Rs. 1,825 and Rs. 200. *Alcock Ashdown* are firm at Rs. 935 but *Premier Construction* have lost 6 points to quote at Rs. 175. *Belapur Sugar* are lower at Rs. 235; *Bombay Steam* are also lower at Rs. 576-8; *Scindia Steam* Rs. 33-8; *Shivrajpur Syndicate* Rs. 66 and *A. C. C.* Rs. 230.

*Includes Bonus of 5 per cent.

(Half-yearly General Meeting on 2nd July, 1943 at 4-15 p.m.)

Audited accounts for the half-year ended 31st March, 1943:—

The accounts after allowing for taxation, including Excess Profits Tax, etc., show a balance of Rs. 20,48,958-12-6. There has been set aside for Depreciation Rs. 3,90,464-9-2 and a sum of Rs. 34,277-8-0 has been written off Investments to reduce Company's holdings to market or par value, whichever is the lower.

Transfers have been made to:—

	Rs.	A.	P.
Reserve for Deferred Mill Renovations ..	5,48,555	0	0
Debenture Redemption Reserve ..	2,50,000	0	0
Labour Quarters and Welfare ..	50,000	0	0
Stores and Stock Revaluation ..	1,00,000	0	0
Indian Workers and Mill Staff Pension Funds ..	60,000	0	0

The balance remaining after giving effect to these transfers is Rs. 6,15,661-11-4, which, together with Rs. 2,12,191-13-7 brought forward from last half-year, gives a total of Rs. 8,27,853-8-11.

The directors propose that the balance available for distribution be disposed of as follows:—

	Rs.	A.	P.
In paying a Dividend on 1st Preference Shares at the rate of 8 per cent. per annum without any deduction for Income-Tax paid by the Company	46,000	0	0
In paying a Dividend on 2nd Preference Shares at the rate of 5 per cent. per annum without any deduction for Income Tax paid by the Company	37,500	0	0
In paying a Dividend on Preferred Ordinary Shares at the rate of 10 per cent. per annum without any deduction for Income Tax paid by the Company	21,875	0	0
In paying a Dividend on "A" and "B" Ordinary Shares at As. 8 per share, without any deduction for Income Tax paid by the Company ..	3,50,150	0	0
In paying a Bonus on "A" and "B" Ordinary Shares of As. 4 per share, without any deduction for Income Tax paid by the Company ..	1,75,075	0	0
In carrying forward	1,97,253	8	11
TOTAL ..	8,27,853	8	11

During the period under review the Mills have worked at full production, and as a result of the restriction in qualities recently decided on, it is hoped to increase the tonnage manufactured. Results continue to be satisfactory.

Manufacturing costs, however, again show a steady rise in all departments. Raw materials costs are continuing to advance and because of transport and other difficulties, considerable trouble is being experienced in getting full supplies to the Mills. Anxiety regarding coal supplies is also being felt, chiefly owing to congestion on the Railways. Subsidiary raw materials, chemicals and spare parts, general stores, etc., all have advanced in cost in recent months. It is expected that very large increases in the landed cost of coal and other materials will be experienced in the near future.

The Welfare Stores remain of great benefit to the workers. Notwithstanding greatly increased prices for food-grains and the difficulty of obtaining sufficient supplies, the directors have so far been successful in giving their workers an adequate ration at low prices. The wide differences between the cost prices of rice, atta, sugar, etc., and the prices charged to the workers is borne by the Company. The importance of taking all possible steps to ensure a proper supply of foodstuffs to keep their labour happy and contented is fully realised.

In February, the Government of India revised their previous order and notified all Paper Mills that the proportion of paper to be set aside for Government and Army would be reduced to 70 per cent., so that 30 per cent. of the total production would be released for civil consumption. This will help greatly to ease the general position, but the tonnage now made available is not likely to be found sufficient, and further efforts must be made to effect economy in the use of paper.

With the approval of the Commerce Department of the Government of India, a new organisation called the "Paper Control and Distribution Association" has now been formed to endeavour to control prices, chiefly of writing and printing papers and to arrange for their equitable distribution throughout all the different Provinces and chief centres in the country. All Paper Mills are members of the Association and it is hoped that it will be successful in ensuring that the printing and publishing industry, commerce and the general public will receive a proportionate tonnage of paper in all parts of the country during the present period of acute shortage.

A sum of Rs. 5,48,555 has been set aside to Reserve for Deferred Mill Renovations. This sum raises the reserve to an amount equal to the amount paid to Government in January last as Optional E. P. T. Deposit, thereby earmarking this amount for future Capital replacements, which cannot be carried out now due to present conditions.

A sum of Rs. 2,50,000 has again been set aside against redemption of the present Debenture issue in 1946 and the equivalent sum is shown separately invested.

Reserve for Revaluation of Stocks and Stores has been increased by a further Rs. 1,00,000 against a slump in Stocks and Stores values which may be considered inevitable. As hitherto Rs. 50,000 has been allocated to Labour Quarters and Welfare Reserve, and a further Rs. 60,000 for investment by the Trustees of the Mill Employees' Pension Funds.

Managing Agents.—Messrs. F. W. Heilgers & Co.

Authorised, Issued and Subscribed Capital—Rs. 65,89,000 *in* 11,500, 8 *per cent. First Cum. Pref. of Rs.* 100 *each*, 15,000, 5 *per cent. 2nd Cum. (Annual General Meeting held on 22nd June, 1943.)

Audited accounts for the year ended 31st December, 1942:—

The season's working shows a profit of Rs. 38,227-12-9. After providing for taxation, making sundry adjustments and transferring Rs. 10,000 to Equalization of Dividend Fund, there is a balance of Rs. 35,577-1-6 at the credit of Profit and Loss Account. From this the directors recommend a dividend of Rs. 12-8 per share absorbing Rs. 25,000 and leaving a balance of Rs. 10,577-1-6 to be carried forward.

Rainfall for the year amounted to 132 inches as compared with an average of 125.08 inches for the previous seven years. Weather conditions generally were unfavourable for the growth of heavy flushes, the health of the bushes, however, is such that another crop record has been set up for the fourth year in succession.

Estimates for the current season have been framed for a crop of 1,700 maunds to cost Rs. 1,09,491.
