THE RAIL-BORNE TRADE OF 1894-95.

The statements appended show in detail the movements of the rail-borne traffic of the Presidency during the official year 1894-95. They have been compiled in the Board's office from the quarterly returns received from the Examiner of Guaranteed Railway Accounts, Bombay.

2. *Lines open.*—An additional length of 134 miles on the East Coast Railway from Vizianagram to Berhampur was opened during the year, which brings the total mileage of railways open for traffic at the end of the year to 2,755½ miles as detailed below :—

3. *Season.*—The season was on the whole not favourable for agricultural operations, except in the Circars and in Kurnool, South Arcot and Madura. The south-west monsoon though generally up to average set in late in several districts. The north-east monsoon began well, but closed early, the rainfall after October being generally scanty throughout the southern portion of the Presidency. Prices of food-grains were, however, easier than in the preceding year, but they were from 16 to 29 per cent. higher than the average of the ten years preceding the famine of 1891-92.

4. *The total trade* of the Presidency showed an increase of 18½ per cent. in volume and 24 per cent. in value as compared with that of the previous year. Compared with the average of the five years ending 1891-92, the volume of trade

increased by 38·2 per cent. The rail imports were nearly 100 per cent., the rail exports nearly 62½ per cent. and the internal trade nearly 24½ per cent. in excess of the said average :—

5. The rail imports into the Presidency increased by 12·8 per cent. in volume and by 18 per cent. in value as compared with 1893-94. The increase was mainly contributed by Hyderabad, the rail imports from Mysore and Bombay showing large decreases amounting to over 1,328,400 maunds and 139,300 maunds, respectively. The rail exports to other provinces were greater by 7·3 per cent. in volume and by 4·3 per cent. in value than in the previous year, the bulk of the increase occurring in the rail exports to Mysore. There was a slight increase also in the rail exports to Hyderabad, but those to Bombay declined by 44,700 maunds. Mysore, as usual, contributed the largest share of the rail exports—75·7 per cent. In the rail import trade also this province generally held the first place, but in the year under report its rail imports were considerably less than those of Hyderabad. The subjoined table shows the distribution of the rail imports and rail exports between the different provinces outside the Presidency :—

6. The internal trade of the Presidency also increased by 23 per cent. in volume and by 30 per cent. in value as compared with the previous year, the increase occurring chiefly under railway plant and rolling-stock, oil-seeds, stone and lime, provisions and sugar.

7. The next table shows the distribution of the traffic as between the sea-ports and the rest of the Presidency, and the fluctuations therein during the last three years :—

N.B.—From 1st April 1894 three ports, viz, Cuddalore, Cocanada and Vizagapatam were added to the list of Madras sea-ports.

8. There has been a steady increase during the period both in the rail import and rail export trade of the sea-ports, and in the traffic in portions of the Presidency outside the sea-ports. Of the quantity imported by rail during the year from beyond the Presidency, less than a fourth was received into the sea-ports, while the remainder was taken by the rest of the Presidency.

9. The rail imports of the year are shown below in detail for the principal articles in comparison with those of the previous year :—

10. Coal and coke which hitherto occupied a second or third place as regards quantity has now taken the lead in the list of rail imports and contributed 42 per cent. of the total rail imports during the year. Almost the whole of the rail imports were from the Singareni coal fields and amounted to over 3·7 millions of maunds, against slightly

over a million and a half maunds in the previous year and against less than 268,000 maunds five years ago. The large increase in 1894-95 was apparently due to increased demand for Singareni coal on the East Coast Railway and at the Kolar Gold fields. As compared with the previous year, the consignments to the "Delta" block increased from $1\frac{1}{2}$ to $3\frac{1}{3}$ millions of maunds, while the Circars received 233,000 maunds against *nil* in the previous year.

11. The grain traffic which hitherto headed the list fell by 49.2 per cent. as compared with that of the previous year and amounted to only 21.7 per cent. of the total rail imports as against 48 per cent. in the previous year. Mysore, as usual, contributed the largest share (80 per cent.) of the rail imports; but the quantity imported by rail from other provinces during the year under report was less than half of what it was in the previous year, and also considerably less than in the three preceding years, though it exceeded the average of five years ending 1889-90 by nearly 62 per cent. as shown below:—

" 1894-95	1,502,645	181,853	154,374	37,697	1,876,569

The very large decrease as compared with 1893-94 was chiefly under paddy, cholam and cumbu sent to the Central block, and under "other grains" (chiefly ragi) consigned to Madras, the Carnatic, Central and South blocks. On the other hand there was a material increase in the rail imports of gram and pulse from Mysore into Madras and the Malabar block. The rail imports from Bombay into the Deccan and the Central blocks also showed a heavy decrease, chiefly under gram and pulse, while the rail imports from Hyderabad of gram and pulse into the Deltas and the Deccan blocks, and of jowar and bajra (cholam and cumbu) into the Deltas, Deccan, Central and South blocks, were also smaller than in the previous year. The subject is referred to again in paragraphs 37 and 38 below.

12. Turning to the other articles, it is observed that there were large increases in the traffic under oil-seeds, hides and skins, dyes and tans, cotton (manufactured), railway plant and rolling-stock, and sugar; while, on the other hand, the rail imports of cotton (raw), spices, oils, metals, salt and jute (gunny bags) declined very considerably.

13. The rail imports under oil-seeds advanced by 134 per cent. over the record of 1893-94 and by 95 per cent. over that of 1892-93. The bulk of the former increase was under "castors" sent from Hyderabad chiefly to Cocanada and the "Deltas," and under gingelly exported by rail from Mysore into the Madras port and the South and Malabar blocks and from Hyderabad to the Madras and Cocanada ports. There were small increases also under mustard and rape, ground-nuts and other oil-seeds.

14. The trade in hides and skins rose considerably as compared with the previous two years. The increase appears under all the sub-heads, but it was most marked under "skins of sheep (dressed)." The increase under dressed and raw hides occurred in the consignments from the Central Provinces and Hyderabad into the Madras port, and that under skins, dressed and raw, in the quantity sent from Bombay, Punjab, Hyderabad and Mysore, mostly into Madras port.

15. Under "dyes and tans," there was an increase of 35,000 maunds in the rail imports of "other dyes" which comprise chiefly Aniline and Alizarine dyes, and 12,000 maunds under myrobolams sent from Mysore into the Madras port, North Carnatic and Central blocks.

16. The increase of 15.3 per cent. in the sugar traffic was made up of increases in the rail imports chiefly from Mysore of refined and unrefined sugar into the Madras and Calicut ports respectively. The total sugar traffic of the year, though far in advance of the previous three years, did not reach the record of any of the four years preceding 1891-92.

17. The rail imports of cotton (raw) decreased by more than 41,000 maunds or 26 per cent. as compared with the previous year. The bulk of the decrease was in the rail imports from Bombay and Hyderabad into the Madras port and the Deccan block, while the contribution from Mysore to the former block showed a fair increase. On the other hand cotton (manufactured) showed an increase of 33,000 maunds or 47 per cent. over the previous year. The increase was mostly in the rail imports of European twist and yarn from Bombay into the Deccan.

18. Oils show a falling off of more than 25 per cent. chiefly owing to largely diminished rail imports of kerosine oil from Bombay into the Deccan (5,914 maunds against 21,848 maunds in the previous year). The decrease is accounted for by increased importations by sea at Madras.

19. The rail imports under salt decreased by 19 per cent. owing to smaller rail imports from Bombay into the Deccan, but as compared with 1892-93, the rail imports were 21 per cent. greater.

20. The falling off under metals is almost entirely under iron. The rail imports of iron from Hyderabad decreased by nearly 8,000 maunds.

21. The rail exports of the principal articles during 1894-95 and 1893-94 are compared in the subjoined statement:—

Articles.	1893-94.	1894-95.	Increase or decrease.

22. Coal and coke heads the list, as usual, with 34 per cent. of the total rail exports of the year. This trade has been steadily increasing from 100,000 maunds in 1887-88 to 2,257,000 maunds in the year under report, the increase as compared with the previous year amounting to 366,000 maunds or 19.3 per cent. Nearly 96 per cent. of the coal exported by rail was consigned to Mysore from the Madras port.

23. The grain rail export trade, which was nearly 11.7 per cent. of the total traffic, stood next in quantity to coal and coke and showed an increase of 20 per cent. over the trade of the previous year. Nearly 75 per cent. of the trade under this head was rice (not in the husk) exported by rail chiefly from the Deltas into Hyderabad and from the Deccan and North Carnatic blocks to Mysore. The increase in the rail exports, chiefly of rice, from the Deccan districts to Mysore amounted to 200,000 maunds. The consignments to Hyderabad exhibited a material decrease under rice and cholam and cumbu. The exports of grain and pulse from the Deltas were more than double those of the preceding year (194,600 maunds against 85,700 maunds).

24. Provisions showed an increase of $6\frac{1}{2}$ per cent. over the previous year chiefly in the rail exports of dried fruits and nuts from the Deltas to Hyderabad.

25. There was an increase of over 76,000 maunds or 80 per cent. in the consignments to Mysore, and of 12,000 maunds in those to Hyderabad, of sugar (unrefined);

but, on the other hand, there was a decrease of 31,000 maunds in the rail exports of this article to Bombay, and of 17,000 maunds of sugar (refined) to Bombay, Hyderabad and Mysore.

26. About 60 per cent. of the salt exported by rail goes from the Deltas to Hyderabad and the remaining 40 per cent. to Mysore chiefly from the Madras and Calicut ports. The rail export to Hyderabad showed a large increase during the year.

27. The rail exports of oils increased by nearly 45,500 maunds or 57.7 per cent. as compared with the previous year chiefly owing to larger rail exports to Mysore and Hyderabad of kerosine oil, which formed 85 per cent. of the trade under oils.

28. Nearly 90 per cent. of the trade in tobacco falls under "tobacco (unmanufactured)," which showed an increase of 18 per cent. over the record of the previous year. This article is exported by rail largely to Mysore from the Central and South blocks and to some extent also from the Deltas to Hyderabad.

29. The increase under "dyes and tans" appears chiefly under "turmeric" and "other dyes" sent from the Deccan block to Bombay and Mysore.

30. The increase of 8,000 maunds under "liquors" took place wholly in the rail exports of country beer from the Central block to Mysore and Bombay.

31. Under metals there was a large decrease of 18.9 per cent. as compared with the previous year, the rail export of iron to Mysore from Madras having declined by 51,000 maunds.

32. There was a considerable decrease also in the rail export of oil-seeds chiefly linseed, gingelly and castors, which are largely exported by rail from the Deccan block to Bombay. The rail exports of linseed and castors decreased by nearly one-third (79,000 maunds), while gingelly showed an increase of 17,000 maunds.

33. The rail exports of cotton (raw), declined by over 100,000 maunds or by 50.5 per cent. Almost the whole of the decrease occurred in the consignments to Bombay from the Deccan districts, where the cotton crop was below the average. The area sown with this crop in the year under report was 101,000 acres or 13 per cent. less than in 1893-94, which also was not a good year for cotton.

34. The decrease of 14 per cent. in the jute trade, as compared with the previous year, was wholly due to smaller rail exports of empty gunny-bags from the Central block to Mysore.

35. The very large falling off under railway-plant and rolling-stock (78,600 maunds or 85.8 per cent.) occurred almost entirely in the rail exports of "materials (other sorts)" to Mysore from the Madras port and the North Carnatic block.

36. As compared with the previous year, the *internal trade* or the traffic within the Presidency advanced by 23.1 per cent., the increase occurring under all the principal articles except "metals" as detailed below:—

37. Grain and pulse forms the most important item and accounted for nearly a fourth of the total internal trade of the year. The traffic registered was higher than that recorded in any previous year and was 414,000 maunds (or 5.8 per cent.) more than in 1893-94. Under "rice" and "paddy," there was an increase of 932,000 maunds, and 81,000 maunds, respectively, but cholam and cumbu showed a falling off of 410,000 maunds and "other grains" of 160,000 maunds. Gram and pulse also showed a decrease of 34,000 maunds. The quantity of grain sent inland by rail from the sea-ports was over a million maunds or 42 per cent. less than in the previous year, paddy accounting for 61 per cent. and gram and pulse for 22 per cent. of this decrease. On the other hand the quantity sent to the sea-ports from the other parts of the Presidency exceeded the figures of the previous year by more than a million maunds, or 67 per cent., the excess being partly due to the addition of three new ports during the year, but chiefly to larger consignments from the Carnatic blocks. The rail imports into Negapatam more than doubled, while those into Tuticorin and Calicut also nearly doubled. Madras port received about 100,000 maunds more than in the previous year, while Pondicherry took 36,000 maunds less.

The rail imports into the Deccan block showed a large increase,—from 97,300 maunds to 220,200 maunds,—but there was a falling off of 526,000 maunds in the exports from this block to other parts of the Presidency. The rail imports into the North Carnatic and South blocks declined by 408,000 maunds and 424,000 maunds, while the rail exports from the North and South Carnatic blocks and from the Central block increased by 1,492,000 maunds and 193,000 maunds respectively. The fluctuations in the South Carnatic and Central blocks are due partly to changes in the blocks as explained in the note appended to the table in paragraph 38 below.

38. Taking into account the foreign imports and exports by rail, the entire grain trade of the year shows the following results as compared with the four preceding years:—

+ = Net imports.

— = Net exports.

Note.—Up to end of 1893-94 South Arcot, Tanjore and Trichinopoly formed one block, and Salem, Coimbatore and Malabar another block. In 1894-95 Trichinopoly was added to the Salem-Coimbatore block and Malabar was formed into a separate block. Nellore was divided into portions, the northern being added to Kistna-Godavari (western delta) block and the southern to the Chingleput-North Arcot block.

The net rail imports of grain into the Presidency during the year amounted to only 1.1 million maunds against more than 3 millions in the previous year and 2.7 millions, the average of the three years preceding; but exceeded by 120,000 maunds, the quantity imported in 1889-90. Compared with 1893-94, the net rail exports from the North Arcot-Chingleput, South Arcot-Tanjore blocks to the other parts of the Presidency increased by over 1.8 million maunds. The increase would have been greater but for the change in the blocks in the year under report. The Madura-Tinnevely block, where the seasons have been unfavourable for some years past, had to import more than it did in the previous year. The net rail exports from the Deccan declined by more than half a million maunds, while those from the Deltas increased by about the same quantity. The increase in the net rail imports into the Circars and in the net rail exports from the Deltas was due chiefly to the extension of the East Coast Railway.

39. Turning to the other articles of internal trade, the largest increase appears under railway-plant and rolling-stock amounting to 1,237,000 maunds. The bulk of the increase occurred in the rail exports of materials for construction from the Vizagapatam port to the Circars to meet the requirements of the East Coast Railway.

40. The trade in oil-seeds showed an increase of 717,000 maunds (45 per cent.) over the preceding year, the increase appearing chiefly under ground-nuts, gingelly, castors and unspecified oil seeds. The rail exports of ground-nuts from South Carnatic to Pondicherry was nearly one-third more than in 1893-94.

41. Next to oil-seeds, stone and lime showed a large increase, chiefly in the rail imports from the Central block and the Cuddalore port into South Carnatic, and from the Circars into the Cocanada port. There was a slight decrease in the rail exports from South Carnatic to the Madras port.

42. Nearly four-fifths of the trade in sugar consisted of unrefined sugar, of which nearly two-fifths was exported from the south block including the Tuticorin port. The trade in refined sugar was nearly double that of the previous year mainly owing to the formation of Cuddalore town into a separate sea-port block. The rail exports of unrefined sugar also showed a net increase, although those from the North Carnatic, Central, South and Tuticorin blocks exhibited a decrease.

43. There was a fair increase under coal and coke which was wholly due to the increased rail exports from the Deltas to North Carnatic and from Negapatam to the Central block. The explanation of the large rail exports from the Deltas presumably is that coal and coke are brought from the Singareni mines in Hyderabad to Bezvada by the broad gauge line and are thence forwarded by the Southern Mahratta narrow gauge. Under metals there was a decrease of 6.8 per cent. The fall occurred chiefly in the rail exports of iron from Tuticorin.

44. There were slight increases under cotton, manufactured (nearly 115,000 maunds), due more or less to the addition of the new ports already referred to and to railway extensions. Under tobacco the increase was wholly due to the increased rail exports of the unmanufactured leaf from the Central block to the neighbouring districts. Under skins (dressed) there was a slight increase in the rail exports from North Carnatic to Madras, and under skins (raw); in the rail exports from the Central block to the Madras port.

45. The slight increase of 91,000 maunds under spices took place mainly in the trade of betel-nuts and spices, "other sorts." All the internal blocks with the exception of South Carnatic had increased rail imports of kerosine oil from the Madras port, while the Tuticorin port doubled its rail exports of castor oil.

46. The increase under dyes and tans took place in the rail exports of turmeric from the Deccan, and those of "dyes unspecified" from the same block and North Carnatic to the Madras port.

47. The next table shows the distribution of the total trade between the different blocks and the fluctuations as affecting each. Most of the latter have been fully explained above :—

N.B.—From 1st April 1894 (1) three ports, viz., Cuddalore, Cocanada and Vizagapatam, were added to the list of Madras sea-ports; (2) Nellore, which was a separate block in the previous year, is now split into two parts, viz., North Nellore and South Nellore, the former being added to the Kistna and Godavari block and the latter to the Chingleput and North Arcot block; (3) Trichinopoly, which formed part of the South Arcot, Tanjore and Trichinopoly block in previous years is now added to the Salem and Coimbatore block; (4) Malabar is separated from the Salem-Coimbatore block and made a separate block.

48. The usual statements are appended, and in appendix II a review of the road-traffic registered during the year is also added.

APPENDIX II.

Road traffic.—In accordance with the wishes of the Government of India that the registration of road traffic should be continued for a number of years at each station so as to determine average capacity of the tracts concerned, traffic was registered, during the year under review, on the same roads as the previous year (1893-94). In Vizagapatam, however, registration at two stations, viz., Pottangi and Rayagada, which are on the Vizagapatam-Jeypore and Vizagapatam-Central Provinces roads, respectively, had been completed for three years, and two other stations on the Vizagapatam-Párvatipuram road were taken up instead. The table below shows the different roads and stations where traffic was registered during 1894-95 :—

2. The statement appended gives particulars of the road traffic registered at the several stations during the year; the following abstract shows the results as regards long distance traffic on each of the roads.

3. In Nellore the traffic northwards and southwards on the great trunk road from Madras to Guntúr was registered at three stations, viz., Náyudupéta, Kávali and Ongole. At Náyudupéta the cross traffic with Kálahasti and Venkatagiri was also registered, while at the other two stations the cross traffic east and west was also recorded. The statement below shows the total long distance traffic in the principal articles registered at the three stations :—

Note.—All traffic between Bezwada and Cocanada appears twice in the statement, once in columns 2 and 3 and once in column 4; see also the following foot-note:—

- (1) The figures in columns 2 and 3 include all the traffic that passes between Cocanada and Bezwada as well as that between Cocanada and other places. The figures in column 4 include all the traffic that passes between Cocanada and Bezwada as well as between Ellore and other places west of the Godavari river. It is impossible to separate the through traffic between Bezwada and Cocanada from the other traffic on the canals dealt with.
- (2) No entries are made in the statement for the Kistna canal from Bezwada to Ellore, as all traffic between Bezwada and Cocanada by that canal necessarily passes over the Godavari canals here given in columns 2, 3 and 4.
- (3) "Up" on the Cocanada, Samalkot and Ellore canals means towards the Godavari river; on the Masulipatam canal towards the Kistna river (Bezwada).
