THE RAIL-BORNE TRADE.

Appended to this note are the usual statements of the rail-borne trade of the Presidency for 1902-1903. They have been compiled from the quarterly returns received from the Government Examiner of Railway Accounts, Bombay.

2. The important changes that took place during the year were (1) the registration for the first time of the trade to, and from, the Native State of Cochin, and (2) the amalgamation of the following sub-heads under *Liquors* :—

“Spirits of all kinds, including country spirit.”
“Wines.”

3. The following additions were made to the open mileage of railways within the Presidency :—

Railways.	Gauge.	From	To	Miles.

4. The volume of the traffic in goods with other parts of India fell off by over a million maunds under *imports* and increased by about the same amount under *exports*. The exports of *animals* were nearly double those of the preceding year, while the traffic in *treasure* showed a large development. The whole value of the external trade for a series of years is given on the margin. But the value of these figures alone is not great; the traffic by sea should also be considered.

5. *Season and prices.*—The hot weather showers in April and May were below the average in the Carnatic, North Arcot, the South and the West Coast districts. The rainfall in June 1902, the first month of the south-west monsoon period, was below the average in the Circars, Kurnool, Carnatic except Nellore, parts Central, Tinnevely, Hills and the West Coast districts. Even in July the deficiency continued over one half of the Presidency. The August rains generally improved matters except in the Deccan and the south, but the deficiency in the Deccan was made good by the September rainfall. On the whole, the south-west monsoon rains were generally above the average. The north-east monsoon also brought in good rains throughout the Presidency, except the two northernmost districts, the fall in October being generally the heaviest. The dry weather (January to March) rains were either light or below the average except in the Carnatic.

The average prices of food-grains for the year were lower than in the preceding year, the percentage of the fall varying from 16 to 39. Compared with the averages for ten normal years ending 1899-1900, however, the prices of food-grains during 1902-1903 were higher from 3 to 12 per cent.

6. *Imports.*—As usual, the bulk of these came from the adjoining provinces of Mysore and Hyderabad—the largest proportion from the latter. Compared with the preceding year, there was a large falling off in the receipts from all parts of India except Mysore and the Central Provinces. The imports from Mysore showed a large recovery, though those of “ragi” decreased materially. As usual, the largest proportion (39 per cent.) of the imports was sent to the sea-ports. The receipts in the Circars, Deltas, Deccan, North Carnatic and Central blocks exclusive

of the ports were much smaller than in the previous year, while those into other blocks except the Hills, showed a considerable increase. The fluctuations in the quantities of the principal articles imported are more fully shown in the following table:—

Articles imported.	Quantities in thousands of maunds.		Percentage of the total trade in 1902-1903.
	1901-1902.	1902-1903.	
Coal and coke	3,631	3,298	42.0
Grain and pulse	2,004	1,257	16.0
Oilseeds	694	577	7.3

Liquors	28	25	0.3
All other articles	250	256	3.2
Total	9,000	7,857	100.0

The large decrease in the imports occurred chiefly under *coal and coke, grain and pulse, oilseeds and manufactured cottons*, but the imports of these articles were rather larger than usual in 1901-1902. Nearly the whole of *coal* came from Singareni, and only a small quantity was sent to the North Carnatic block. The supplies of "gram and pulse" received from the various provinces were also small. On the other hand, the trade in "betelnuts" (*spices*) and "timber, unwrought" (*wood*) as also in "*fruits and vegetables*" continued to develop largely, and the large imports of *sugar* of 1901-1902 were fully maintained. The imports of *hides and skins* showed some recovery.

7. *Exports*.—The expansion under the head was due to the large exports of "paddy" and "rice" from the Deltas to the Nizam's territory. This fact accounts for the important changes in the proportions of the exports sent to the different provinces. In the following statement the trade in the principal articles of export is compared with the previous year:—

Articles exported.	Quantities in thousands of maunds.		Percentage of the total trade in 1902-1903.
	1901-1902.	1902-1903.	
Coal and coke	2,776	2,826	23.6
Grain and pulse	1,819	2,798	23.3
Salt	1,014	1,076	9.0
Wood	983	965	8.0

Liquors	42	48	0.4
All other articles	499	584	4.9
Total	10,601	11,995	100.0

It only remains to note that the exports of *coal* from Madras to the K. Fields continued to be small owing to the fact that Singareni coal has of booked through in large quantities *via* Bezwada and Washermanpett. The

the junction at Madras of the East Coast and South-West lines of the Madras Railway. The exports of *provisions* and *raw cotton* in 1901-1902 were small, while the trade in *railway-plant*, especially "*materials*," which had been declining, showed some recovery.

8. *Internal trade*.—Though the volume of this traffic exceeded 39½ million maunds, it was more than 2½ millions less than in the previous year, but the total was large by comparison with that of earlier years. The largest item of this trade consists of *grain*, and though under it there was a falling off of over 2 millions maunds, still *grain* accounted for 22.8 per cent. of the whole traffic, and the traffic was active. The cases in which decreases of over 50,000 maunds, as compared with the preceding year, occurred in the *grain* traffic are shown below:—

Grain.	Exported		Decrease.
	From	To	
Gram and pulse	Madras	North Carnatic	59,000
	Negapatam	Central districts	83,000
	Do.	Southern districts	98,000
	Tuticorin	Do.	221,000
Jowar and bajra	Negapatam	Central districts	231,000
	Deltas	North Carnatic	263,000
	Do.	Central districts	57,000

	South Carnatic	North Carnatic	92,000
	Do.	Central districts	347,000
Rice not in the husk	Do.	Southern districts	207,000
	Madras	North Carnatic	130,000
	Negapatam	Central districts	58,000
	Do.	Southern districts	56,000
Grains other than the above and wheat and wheat flour.	Cocanada	Deccan	79,000
	Northern Circars	Madras	52,000
	Do.	Vizagapatam	64,000
	South Carnatic	Madras	68,000
	Deltas	North Carnatic	77,000

Besides grain, the principal articles carried by rail the traffic in which depends mainly on the state of the season are *oil seeds, sugars, provisions, fruits and vegetables, spices, raw cotton, fodder, dyes and tans* and *tobacco*. The traffic in these goods, which amounted to nearly 12 millions maunds or 30.4 per cent. of the whole trade, was nearly the same as in the preceding year. The large falling off in the trade in *sugars* took place under "refined" despatched chiefly to the South Carnatic, and under "unrefined" in the despatches to the Deltas. The expansion under *raw cotton* was chiefly in the despatches from the Deltas, Deccan and South blocks to the ports of Cocanada, Madras and Tuticorin respectively, from the North Carnatic to the Deltas, and from the Central to the South. The trade in *salt* calls for no remark and accounted for 7.7 per cent. of the whole traffic. The traffic in *railway-plant, wood, metals, stone and lime* and *coal and coke*, which does not in the main depend on the state of the country, accounted for 26.4 per cent. of the whole trade. The amount carried decreased by nearly one million maunds, although the traffic in *railway-plant* showed a considerable increase. Under *metals* there was a large falling off in the amount of *manganese ore* carried from the Circars to the port of Vizagapatam for shipment. The large decrease in the *coal* trade occurred in the supplies sent to the Deltas, Deccan and South Carnatic blocks from the ports of Cocanada, Madras and Cuddalore respectively, while only small quantities of *stone and lime* were despatched to Madras from the North Carnatic. The imports of "*materials*" from Madras and Cuddalore to the North Carnatic and from Tuticorin to the South and *vice versa* increased and explain the continued large development of the traffic in *railway-plant*.

9. Reviewing the whole trade of the Presidency, the despatches from the sea-ports as well as the receipts into the other blocks, especially the North Carnatic and Central blocks, showed a material decline.
