CORPORATION OF MADRAS.

REPORT OF THE PRESIDENT FROM 1st APRIL 1912 TO 31st MARCH 1913.

Changes in the Constitution of the Corporation.

1. *Elections.*—The lists of persons qualified to be elected municipal commissioners and of those qualified to vote at such elections were revised in accordance with the provisions of Section 46 of the Madras City Municipal Act, 1904, with the result that 485 persons were registered as qualified for election as commissioners and 10,033 persons as qualified to vote, the corresponding figures for the preceding year being 502 and 9,824, respectively. The percentage of persons qualified to be elected as commissioners to the total literate (in English) adult male population of the City was 1·347 and that of persons qualified to vote to the total adult male population of the City both literate and illiterate was 6·394.

2. During the year under review, two elective seats fell vacant owing to the death of M. R. Ry. B. V. Ramanjulu Nayudu Garu, Commissioner for the 16th Division, and to the expiry of the three years' term of Surgeon-Major F. Clarence Smith, I. M. S., (*retired*), Commissioner for the 14th Division. The elections for these two seats were contested and M. R. Ry. G. R. Authikesavulu Nayudu Garu and Surgeon-Major F. Clarence Smith, I. M. S., (*retired*), were duly elected under Section 39 of the Act. The percentage of voters who exercised the franchise on these occasions to the total number registered was 74.

Particulars of the elections will be found in Appendix II., Table 29.

3. *Representatives of the Chamber of Commerce.*—Mr. W. B. Hunter and Mr. C. H. Straker appointed on 25th April 1911 and 9th May 1911, respectively, continued to hold office during the year. Mr. A. J. Leech resigned his seat on 18th April 1912 and Mr. H. H. Chettle was appointed instead on 21st May 1912.

4. *Representatives of the Trades Association.*—The Hon'ble Mr. R. M. Savege, Mr. C. H. Higginbotham and Mr. A. C. Berryman appointed on 3rd January 1911, 30th May 1911 and 29th August 1911, continued to hold office during the year.

5. *Representative of the Harbour Trust Board.*—Khan Bahadur Muhammad Abdul Kuddus Badsha Sahib Bahadur appointed on 23rd January 1912 continued to hold office during the year.

6. *Representative of the Madras and Southern Mahratta Railway Company.*—Mr. L. H. Kirkness appointed on 4th July 1911 continued to hold office during the year.

7. *Nominations by Government.*—Muhammad Shariff Sahib, Khan Bahadur,

Mr. E. S. Hensman, Yaqub Hasan Sahib Bahadur, Mr. James Short, Mr. C. B. Cunningham and Lt.-Col. C. Donovan, I. M. S., remained in office throughout the year. The term of Captain L. Hirsch, I. M. S., expired on 8th June 1912, but he was re-appointed on 11th *idem*. On his resigning his seat on 21st December, Major C. G. Webster, I.M.S., was appointed in his place on 21st January 1913. M. R. Ry. Rao Bahadur A. C. Pranatartihara Aiyar Avargal ceased to be a commissioner on 15th March 1913 on the completion of the term of three years, but he was re-appointed on 18th March 1913.

Reinstatement.

8. Under Section 54 of the Madras City Municipal Act, 1904, the following commissioners lost their seats on the Corporation by failing to attend either three consecutive general meetings or six successive meetings in all. But they were all reinstated during the course of the year under the proviso to Section 55.—

Name.	Date of loss of seat.	Date of reinstatement.
Mr. James Short	21st May 1912	18th June 1912
The Hon'ble Dr. T. M. Nair	18th June 1912	16th July 1912
Yaqub Hasan Sahib Bahadur	12th Sep. 1912	24th Sep. 1912
Do. do.	17th Dec. 1912	19th Dec. 1912
M. R. Ry. T. Rangachariyar Avargal	14th Mar. 1913	18th Mar. 1913
Mr. A. C. Berryman	20th Aug. 1912	21st Aug. 1912
M.R. Ry. P. M. Appaswami Pillai Avargal	18th Feb. 1913	18th Mar. 1913

Death of a Commissioner.

9. I have to record with regret the death of M. R. Ry. B. V. Ramanjulu Nayudu Garu, elected Commissioner of the 16th Division, on 8th August 1912. He was in office for a short period of about two years.

Executive Officers.

10. There was no change in the *personnel* of the offices of the President, the Health Officer and the Revenue Officer during the year under report. Mr. E. P. Richards having been appointed Chief Engineer under the Calcutta Improvement Trust handed over charge of his office of Engineer on 13th September 1912 to Mr. J. E. Hensman, the Senior Assistant Engineer, who officiated until 22nd March 1913 when Mr. J. R. Coats, the permanent Engineer appointed by Government, relieved him.

Mr. J. W. Madeley continued to be the Special Engineer for the design and execution of the new water and drainage works. The period of five years for which his services were first engaged expired on the 21st November 1912 and under a fresh agreement entered into on the same date his term of employment on the special works has been extended by Government for a further period of five years.

Representative of the Corporation on the Legislative Council.

11. In pursuance of G. O. No. 175, Legislative, dated 2nd November 1912, Dr. T. M. Nair was elected by the Corporation as its representative on the local Legislative Council and the selection was notified in the Fort Saint George Gazette on 1st January 1913.

Meetings.

12. During the year the Corporation held 27 meetings of which 12 were general meetings, 6 adjourned general meetings, 7 special meetings and 2 adjourned special meetings. The average number of commissioners, including the President, present at each meeting was 28 against 27 in the previous year. The percentage of attendance to the sanctioned strength was 76.1 among divisional commissioners, 64.8 among institutional commissioners and 62.5 among nominated commissioners.

13. The Standing Committee met thirty times.

Committees.

14. (1) The Corporation at their meeting held on 21st May 1912, appointed a Committee to propose by-laws regarding construction of house drainage. The draft by-laws proposed by this Committee were with certain alterations adopted by the Corporation at their meeting held on 16th July 1912. They were approved by Government with further modifications in G. O's No. 3340 M., dated 26th November 1912 and No. 732 M., dated 5th April 1913, and have now been published with reference to Section 412-(a) of the Madras City Municipal Act, 1904, before they are finally adopted by the Corporation.

(2) Another Committee was appointed on 21st May 1912 to consider and report what further by-laws were needed to regulate the conduct of business at the meetings of the Corporation. This Committee suggested that the existing by-laws Nos. 5 and 15 should be amended and the draft amendments which were adopted by the Corporation were approved and confirmed by Government in G. O. No. 1076 M., dated 2nd June 1913.

(3) On the 16th July 1912, a third Committee was appointed to report on the proposals for the levy of additional taxes and license fees for meeting the extra cost involved in the re-organization of the Works and Revenue Departments and the License Branch. The Committee reported and the Corporation approved its modified proposals subject to the reservations that efforts should be made to provide the increased cost from the surplus in the current revenues in the first instance and that the additional taxation should be gradually resorted to whenever necessary. The Government while accepting them generally, have deferred to a convenient time the consideration of the question to amend schedule VI of the Madras City Municipal Act, 1904, to give effect to some of the proposals (G. O. No. 906 M. Mis., dated 5th May 1913).

(4) Again on the 21st August 1912 a Committee was organized to consider and report on rule 15 of the building regulations requiring the provision of one-third open space in the case of certain buildings with a view to make suitable alterations therein consistent with sanitary principles. The remarks of the Engineer and the Health Officer were invited. Those of the latter are awaited.

Tramways.

15. The extension of the tramway line from the Custom House to St. Peter's Church, Rayapuram, was completed by the Tramway Company and opened for public traffic during the year under report under the sanction conveyed in G. O's.

No. 1110 M. Mis., dated 15th June 1912 and No. 1562 M. Mis., dated 24th August 1912.

Reference was made in paragraph 14 of the report for 1911-12 to the question of the removal of the tramway line in Chintadripet and its replacement by a double track line along the Body Guard Road, Government House Bridge and Mount Road. The matter again came up for consideration during the year, as the Tramway Company modified its previous terms and offered to contribute Rs. 57,255 towards the cost of widening the bridges and roads involved in the proposed diversion of Chintadripet line subject to the conditions :—

(1) that the track rent and tax on tram cars should be consolidated into a lump sum of Rs. 250 per mile of route *per annum* for the present lines and for all future extensions and

(2) that the tram cars should be exempted from taxation for a period of 25 years.

But the Standing Committee declined to accept these proposals also. The Company has now further modified its proposals and agreed to widen the bridges to the satisfaction of the Corporation and the Chief Engineer to Government and pay one-half of the cost thereof, the other half being borne by the Corporation. The matter is under the consideration of the Standing Committee.

Resolutions of the Corporation.

16. The following are among the more important resolutions passed by the Corporation during the year under report.—

(1) *Resolution of 23rd April 1912*—The Standing Committee, at their meeting held on 26th March 1912, recommended that Government be moved to amend Section 262 of the Madras City Municipal Act, 1904, with a view to exercise sufficient control over structures made of inflammable materials. The recommendation of the Standing Committee was approved by the Corporation and submitted to Government. In G. O. No. 1803 M. Mis., dated 30th September 1912, the request was noted for consideration at the time of the general amendment of the Act.

(2) *Resolution of 22nd October 1912*—Requesting Government to relieve the Corporation of the annual contribution to Provincial Funds of (1) Rs. 20,000 on account of hospitals in the City and (2) Rs. 50,000 for general purposes. The resolution was forwarded to Government for orders with the President's letter dated 17th February 1913.

(3) *Resolution of 19th November 1912*—Proposing that the estimated amount of Rs. 10,63,000 required for meeting the initial cost of the extension of electric lighting to two-thirds of the City be borrowed in instalments of three lakhs a year and that the rate of the lighting tax be raised from $1\frac{1}{4}$ to $1\frac{3}{4}$ per cent. to provide for the sinking fund and interest on the loan. This proposal was generally approved by Government in G. O. No. 48 M., dated 8th January 1913.

(4) *Resolution of 19th December 1912*—Recommending to Government (1) that leprosy should be declared a dangerous disease under Sections 366 and 3 (7) (b) of the Madras City Municipal Act, 1904, and (2) that lepers should be prohibited under Section 9 (d) of the Indian Lepers Act, 1898, from engaging themselves

in the profession of (a) teachers or (b) vendors of food stuffs. The Government, having decided to introduce the Indian Lepers Act throughout the Presidency, a reference to them in regard to points 1 and 2 (b) became unnecessary; but the desirability of prohibiting lepers under Section 9 (d) from engaging in the profession of teachers was pressed on the attention of Government in the President's letter No. R. O. Govt. C. 53, dated 22nd February 1913 (*vide* G. O. No. 321 Pub., dated 7th March 1913).

(5) *Resolution of 19th December 1912*—The Corporation requested the Government to make over to them the fines collected under the public nuisance and sanitary clauses of the City Police Act as in the case of the mufassal municipalities. But in G. O. No. 1074 M., dated 30th May 1913 this request was disallowed.

(6) *Resolution of 19th December 1912*—Requesting Government to remove their brick and lime kilns on the Poonamallee road outside the municipal boundaries. The resolution was forwarded to Government, Public Works Department, with the President's letter, dated 21st January 1913. Orders are awaited.

Revenue Administration.

17. The work of the Revenue Department continued to be satisfactory and there was a further marked increase in the revenues of the Corporation during the year under report. The current revenues under the combined property taxes, the tax on arts and professions and the tax on vehicles and animals rose by Rs. 43,163-5-6 against Rs. 81,252-6-6 in 1911-12. The large increase in the previous year was due mainly to an enhancement of the assessment on the Government civil buildings in the City with effect from the second half of 1911-12, which brought in an additional income of Rs. 32,631-6-4 for the half year, the increased tax having been prepaid with reference to Section 174. But in the year under report the tax on Government civil and military buildings was paid according to the old assessments and the payment of the increase amounting to Rs. 72,432-7-6 for the two half years, was withheld pending the settlement of the assessments by a Committee appointed for the purpose by Government in G. O. No. 1770 W., dated 27th November 1912. If this sum had been paid, the increase under current revenues would have amounted to Rs. 1,15,595-13-0.

The system of giving blank forms of receipts to bill collectors who filled them up and issued them to tax-payers when they paid the taxes, was discontinued and the system in force in the Calcutta Corporation of writing up the receipts in the office completely before handing over the bill books to the bill collectors, was introduced during the year under the sanction of Government—G. O. No. 1320 M. Mis., dated 18th July 1912. The new system is working satisfactorily.

Finance.

18. The year opened with a balance of Rs. 18,46,449-13-2 against Rs. 21,03,117-12-10 in the previous year. The Corporation received a free grant of Rs. 18,50,000 for the improvement of water supply and drainage. The revenue from all sources inclusive of the grant referred to above, amounted to Rs. 44,76,675-4-8 against Rs. 34,32,076-5-9 in 1911-12. The total receipts for the year including the opening balance were Rs. 63,23,125-1-10 against Rs. 55,35,194-2-7

in the preceding year. The net income of the year after deducting the opening balance and the Government grant was Rs. 26,26,675-4-8 against Rs. 25,32,076-5-9 in the previous year thus showing an increase of Rs. 94,598-14-11. Towards the net income of Rs. 26,26,675-4-8 specified above the municipal taxes contributed Rs. 17,87,166-8-3 and municipal fees and miscellaneous receipts Rs. 8,39,508-12-5 against Rs. 17,42,911-15-4 and Rs. 7,89,164-6-5 respectively in 1911-12. A sum of Rs. 72,432-7-6 on account of taxes on Government buildings in the City was, as already pointed out, not paid during the year and consequently the actual collections under Municipal taxes fell short of the revised estimate by Rs. 45,693-7-9.

19. The total expenditure of the year was Rs. 27,60,512-4-2 under the revenue account and Rs. 13,20,343-12-11 under the capital account or Rs. 40,80,856-1-1 on the whole, against an estimate of Rs. 47,08,600 and against Rs. 36,88,744-5-5 in the previous year. Deducting the expenditure of Rs. 40,80,856-1-1 from the total receipts of Rs. 63,23,125-1-10 there remained at the close of the year a balance of Rs. 22,42,269-0-9, of which Rs. 16,46,310-5-4 represented the balance under the capital account.

Tax on Professions, Arts, Trades and Callings under Section 120.

Current.

20. The gross current demand under this tax rose from Rs. 1,64,810 to Rs. 1,69,525. After deducting the subsequent remissions and reductions on appeal, the net demand amounted to Rs. 1,69,425 against Rs. 1,64,570 or Rs. 4,855 more than in the previous year. The number of assessments also rose from 13,843 to 13,871 or by 0.2 per cent.

21. Appendix I, Statement IV-C shows the assessments for the year under report classified under the several classes of the profession tax schedule and compares them with those of 1911-12. During the year, 122 objections to the assessments were received as against 198 in the previous year. These were disposed of at three sittings of the Appeal Board constituted under Section 172 of the Act, with the result that in 19 cases the assessments were reduced, in 10 cases they were cancelled, and in the remaining 93 cases, they were confirmed. The reduction made by the Board in the demand was only Rs. 60.

Seven appeals were preferred to the Presidency Magistrates under Section 175 of the Act, against the decision of the Appeal Board. In four cases the Magistrates dismissed the appeals, and in three they reduced the assessments by Rs. 40.

22. The current collections of the year amounted to Rs. 1,68,605 against an estimate of Rs. 1,64,500 and against Rs. 1,63,622-8-0 actually collected in the previous year. A sum of Rs. 10 was written off as irrecoverable and Rs. 810 was left uncollected at the end of the year against Rs. 947-8-0 in 1911-12. Out of this balance, Rs. 522-8-0 have since been collected, leaving an actual balance of Rs. 287-8-0 for further recovery and adjustment. Two suits for the recovery of Rs. 42-8-0 of this balance have been filed in the Court of Small Causes and they are pending disposal. The percentage of collections to the demand was 99.52

against 99.42 in 1911-12 and was the highest on record. The incidence of taxation per head of the population was Re. 0-5-3 against Re. 0-5-1 in the previous year.

Arrear.

23. The arrear demand outstanding at the beginning of the year was Rs. 1,028-8-0 which, by subsequent assessments, rose to Rs. 2,081 against Rs. 2,794-13-2 in 1911-12. This demand was reduced to the extent of Rs. 82-0-10 by remissions and reductions on appeal, and the net arrear demand amounted to Rs. 1,998-15-2. Of this, Rs. 1,950-7-2 was collected during the year and Rs. 6 was written off as irrecoverable, leaving Rs. 42-8-0 uncollected at the close of the year. A suit has been filed in the Court of Small Causes for the recovery of Rs. 37-8-0 and a decree obtained therefor. The judgment-debtors being insolvent, claims have been registered for the amount in the office of the Official Assignee and steps will be taken to adjust it when the dividends are declared. The percentage of collections to the demand was 97.55 against 89.76 in the previous year, the percentage being the highest on record.

House, Water and Drainage and Lighting Taxes combined.

Current.

24. The gross current demand under the consolidated rates levied on buildings and lands amounted to Rs. 15,17,271-7-11 against Rs. 14,23,984-12-1 in 1911-12. The gross increase of Rs. 95,985-12-2 over the net demand of the previous year was derived from re-valuations and revisions of assessments made during the year as particularised below :—

Rs. 19,591-1-1 from the general revision of assessments in divisions 14, 15, 19 and 20, of which the revisions of 14th and 15th divisions had effect only in the second half of the year ; Rs. 21,393-15-10 from assessments imposed on new buildings and from the enhancement of assessments on buildings on account of alterations and improvements ; and Rs. 55,000-11-3 from enhancements made in 1911-12 which had effect for only one half of that year, against a full year in the year under report.

The above increase includes also the enhanced assessments on the Government Civil and Military buildings now under adjudication by the Joint Committee.

25. During the year, 8,333 notices were issued under Section 137 on account of enhancement of valuations and assessments newly imposed against 13,121 in 1911-12 ; 443 appeals were preferred against these enhancements and assessments and 127 against the standing assessments, making a total of 570 appeals against 1,107 in the previous year. These appeals were heard at ten sittings of the Appeal Board constituted under Section 172 of the Act, with the result that in 187 cases the assessments were reduced, the aggregate reduction amounting to Rs. 754-1-10 and in 383 cases the assessments were confirmed. Twenty-seven appeals were preferred to the Presidency Magistrates under Section 175 of the Act against the decision of the Appeal Board ; in eighteen of these cases the valuations as fixed by the Board were reduced by the Magistrates, the reductions amounting to Rs. 466-15-10, and in the remaining nine cases the decision of the Appeal Board was upheld.

26. The net increase after deducting the reductions made by the Appeal Board and the Magistrates was Rs. 94,764-10-6 against Rs. 1,03,573-14-9 in 1911-12; and the net demand amounted to Rs. 15,16,050-6-3 against Rs. 14,21,285-11-9 in the previous year. The net current collections amounted to Rs. 14,20,425-9-8 against Rs. 13,95,546-2-5 in 1911-12. This figure includes a sum of Rs. 7,389-12-4 paid in advance in 1911-12 for the year under report and excludes a sum of Rs. 6,658-10-3 received in advance in the year under report for the ensuing year as well as a sum of Rs. 85-4-7 which remained undisbursed at the end of the year out of the amounts refundable to parties in consequence of the reduction of assessments allowed on appeal. A sum of Rs. 16,129-15-7 was remitted on account of vacancy under Section 142 of the Act and other causes, against Rs. 13,896-12-9 in 1911-12 and Rs. 3-0-6 was written off as irrecoverable. The balance left outstanding at the close of the year (after excluding Rs. 72,432-7-6 due by Government in respect of civil and military buildings the payment of which has been postponed pending the decision of the Joint Committee referred to in paragraph 17 *supra*.) was Rs. 7,059-5-0 against Rs. 11,838-8-5 at the end of 1911-12. The percentage of collections to the demand (exclusive of the sum due by Government) was 98.46 against 98.19 in the previous year. The incidence of taxation per head of the population was Rs. 2-14-9 against Rs. 2-11-10 in 1911-12.

27. The total current demand, collection, remission and balance under the combined property taxes as compared with the corresponding figures for the previous two years are exhibited in Appendix I, Table No. 1.

Arrear.

28. The arrear balance at the beginning of the year was Rs. 11,910-14-4 which by subsequent amendments was reduced to Rs. 11,740-1-6. Of this demand, a sum of Rs. 10,953-8-6 was realised during the year, Rs. 415-1-2 was remitted on account of vacancy and other causes and Rs. 3-4-9 was written off as irrecoverable. The balance left outstanding at the end of the year was Rs. 368-3-1. The percentage of collections to the demand was 93.30 against 90.20 in 1911-12, the percentage being the highest on record.

29. The total demand, collection, remission and balance under arrears as compared with the corresponding figures for the previous two years are shown in Appendix I, Table No. 2.

30. Out of the total balance of Rs. 7,427-8-1 outstanding at the end of the year, *viz.*, Rs. 7,059-5-0 under current and Rs. 368-3-1 under arrear (exclusive of the sum due on Government buildings under appeal), a sum of Rs. 5,493-14-11 has been collected and adjusted up to the end of June 1913 leaving a sum of Rs. 1,933-9-2 for recovery and adjustment in the course of the year.

31. The details relating to each of the combined property taxes dealt with above, *viz.*, House, Land, Water and Drainage and Lighting taxes are exhibited separately in Appendix I, Statements IV-A and B.

Tax on Vehicles with springs and on Animals under Section 150.

Current.

32. The net demand under this tax rose from Rs. 1,07,162-8-0 to Rs. 1,09,501-3-3 or by Rs. 2,338-11-3.

33. Appendix I, Table No. 3 compares the number of vehicles and animals assessed for the year 1912-13 under the several classes of schedule VI of the Act with the corresponding figures for the previous year.

34. The current collections inclusive of Rs. 1,305 received in advance for the ensuing year amounted to Rs. 1,08,689-5-6. The net collections for the year were thus Rs. 1,07,384-5-6 which with Rs. 1,080 prepaid in the previous year on account of taxes due for the year under report amounted to Rs. 1,08,464-5-6 against an estimate of Rs. 1,06,780. The balance left uncollected at the close of the year was Rs. 1,036-13-9 and of this sum Rs. 424-13-7 has since been collected leaving Rs. 612-0-2 for further recovery and adjustment. The percentage of collections to demand was 99.02 for vehicles and 99.10 for animals against 99 in each case in the previous year, the percentages being the highest on record. The incidence of taxation per head of the population was $\frac{\text{Rs. 0-2-1 for vehicles}}{\text{Rs. 0-1-3 for animals}}$ or the same as in 1911-12.

Arrear.

35. The arrear demand at the beginning of the year both under vehicles and animals was Rs. 1,118-4-0 which by subsequent amendments and additions rose to Rs. 1,851. Of this sum, assessments amounting to Rs. 170-5-1 were found on investigation to be erroneous and were consequently cancelled and the actual demand stood at Rs. 1,680-10-11. Of this amount, Rs. 1,649-10-7 were collected and Rs. 10-0-4 written off as irrecoverable, leaving a balance of Rs. 21 at the close of the year, for which a claim has already been preferred and registered in the office of the Official Assignee, the defaulter having become insolvent. The percentage of collections to the demand was 97.99 for vehicles and 98.24 for animals against 90.87 and 84.09, respectively, in the previous year and was the highest on record.

Tax on Carts and other vehicles without springs under Section 153.

Current.

36. The demand under this tax amounted to Rs. 32,175 against Rs. 31,617 in the previous year. The number of carts voluntarily offered for registration rose from 7651 to 8160 and the number seized under Section 152 for non-registration fell from 2888 to 2565. Of the 2565 carts seized, 2544 were released on payment and 18 were sold by public auction in default of payment, leaving three carts for disposal at the close of the year.

37. The current collections inclusive of Rs. 912 received in advance for the ensuing year amounted to Rs. 32,368-11-10. The net collections excluding the advance payment were Rs. 31,456-11-10 which with Rs. 672 collected in the previous year towards the demand for the year under report amounted to

Rs. 32,128-11-10 against Rs. 31,563-14-3 in 1911-12. A sum of Rs. 27 was refunded and Rs. 10-4-2 representing the difference between the taxes payable and the amount realised by sale in the case of eight out of the 18 carts referred to above, was written off as irrecoverable, leaving a balance of Rs. 9 which represents the tax on three carts seized and awaiting disposal at the close of the year. The percentage of collections to the demand was 99-86 against 99-83 in 1911-12. The incidence of taxation per head of the population was Re. 0-1-0 as in the previous year.

Arrear.

38. The arrear demand at the beginning of the year was Rs. 12 which by subsequent assessments rose to Rs. 48. Of this sum, Rs. 42-12-2 were collected and Rs. 2-3-10 being the difference between the taxes payable and the amount realised by sale in the case of one out of the two carts sold in auction were written off as irrecoverable, leaving a balance of Rs. 3 for further adjustment.

Tolls on vehicles and animals entering municipal limits.

39. The right of collecting tolls for the year under report was put up to public auction and sold for Rs. 43,100 against Rs. 43,500 in the preceding year. The total amount recovered during the year was Rs. 43,127-4-4 which includes interest paid for overdue instalments.

The incidence of tolls per head of the population was Re. 0-1-4 as in the previous year.

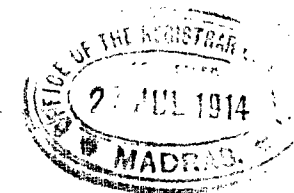

Revenue derived from Municipal Property and Powers apart from Taxation.

Current.

40. *Rent of Lands and Buildings.*—The demand under this head for the year was Rs. 26,197-2-2 against Rs. 24,611-14-2 in 1911-12. The increase was due partly to the revision of the scale of rents charged for lands in Treveleyan Basin, Basin Bridge and Wall Tax Roads and to the track rent realized on account of the extension of the tramway lines to Washermanpet and Rayapuram. The collections amounted to Rs. 25,982-4-1 against Rs. 24,486-4-11 in 1911-12. This sum excludes Rs. 758-9-0 being 50 per cent. of the rents collected from certain lessees on Wall Tax and Basin Bridge Roads paid to Government under G. O. Nos. 32 and 878—Revenue, dated 6th January 1902 and 22nd August 1903, respectively. The balance outstanding at the end of the year was Rs. 214-14-1 of which a sum of Rs. 180-7-11 has since been collected. The percentage of collections to the demand was 99-19 against 99-49 in the previous year.

Arrear.

41. The arrear outstanding at the commencement of the year was Rs. 167-1-5 which by subsequent assessments rose to Rs. 288-3-11. Of this sum, Rs. 178-13-11 were collected (including Rs. 8-8-0 paid to Government on account of lands on Wall Tax and Basin Bridge Roads), annas 12 remitted and Rs. 101-9-11 written off, leaving a balance of Rs. 7-0-1 at the close of the year against Rs. 41-8-2

in 1911-12. The percentage of collections to the demand was 61-11 against 96-36 in the previous year. The fall in the percentage was due to a sum of Rs. 101-9-11 having been written off as irrecoverable.

Payment for occupation of municipal lands under Section 408.

Current.

42. The demand under encroachments amounted to Rs. 5,421-2-8 against Rs. 5,632-12-0 in the previous year. The strict enforcement of the prohibition of occupation in several streets in the interests of traffic resulted in a further decline in the income from this source. The collections from trash sellers amounted to Rs. 1,210-2-6 against Rs. 1,389-13-6 in 1911-12. The fall in this case also was due to the stringent measures adopted by the Health Department against the occupation of roadsides on sanitary grounds. The total demand under the above two heads amounted to Rs. 6,631-5-2 against Rs. 7,022-9-6 in 1911-12, and of this amount, a sum of Rs. 6,557-1-2 was collected, leaving Rs. 74-4-0 uncollected at the end of the year against Rs. 125-5-9 in 1911-12. Of this balance, a sum of Rs. 53-8-0 has since been collected. The percentage of collections to the demand was 98-88 against 98-21 in the previous year.

Arrear.

43. The arrear outstanding at the beginning of the year was Rs. 130-1-1 which with supplemental charges rose to Rs. 134-10-7. Of this sum, Rs. 115-2-7 were collected and Rs. 17-4-0 remitted leaving a balance of Rs. 2-4-0 at the close of the year for realisation. The percentage of collections to the demand was 98-29 against 97-66 in the previous year.

44. *Esplanade rents.*—The income from this source fell from Rs. 2,856 to Rs. 2,159, of which Rs. 1,595 represent the rents charged for the occupation of the Esplanade by circus troupes and theatrical companies and Rs. 564 the rent for the cart stand. No portion of it is now leased for grazing purposes.

45. *Rent of Municipal Cart-Stand.*—The income derived from this head was Rs. 4,908-7-6 against Rs. 3,880-0-4 for the previous year and against Rs. 4,900 budgeted for.

46. *Cartstand fees.*—A sum of Rs. 697-8-0 was collected against Rs. 720 in the previous year. Three cart-stands were closed and one was newly opened.

47. *Grass Farm, Tondiarpet.*—The Corporation grass farm was worked departmentally throughout the year and the total receipts from all sources including the abandoned sewage farms (Rs. 725) amounted to Rs. 40,276-15-5. Nearly forty acres of land which consisted of low lying marsh, pits and plots overgrown with chappar (a species of coarse grass eaten by cattle) have been improved and replanted with *hariali*. The northern, southern and a portion of the eastern boundaries of the farm which were unprotected against cattle trespass were provided with steel pale fencing at a cost of Rs. 6,250. A small portion of the eastern boundary still remains to be fenced and this work will be taken in hand in the current year. The total area of the farm within the fence, including the Hindu burial ground which was recently taken as part of the farm, is about 109 cawnies or about 136 acres, of which the cultivable area will be about 120 acres.

In fencing the eastern limits of the farm it became necessary to exclude therefrom a large strip of irrigable land as also certain plots which had been improved and replanted with *hariali* early in the year in view of a possible erosion by the sea. The southern portion of the farm was also cut off from irrigation owing to the construction by the Special Works Department of an overflow sewer from the farm pumping station to the sea. The loss of revenue from both these causes as estimated by the Special Engineer amounts to Rs. 6,691-10-8. There was a further loss of Rs. 3,294 in the toddy contract due to an injunction from the High Court restraining the Corporation from leasing the right to extract toddy from the coconut and palmyra trees on the farm to any other but the sub-lessee of the late lessee. Were it not for these losses, the total receipts from the farm for the year would have risen to Rs. 50,200. The rents due from Major Meagher, the late lessee of the farm, have not yet been realised, as the suit instituted against him in the High Court for the recovery of the amount is still pending.

The total expenditure on the maintenance of the farm amounted to Rs. 21,390-7-6, but this includes a sum of Rs. 5,859-5-4 spent on reclamation of the forty acres referred to above. The actual cost of maintenance was Rs. 15,531-2-2.

The farm has materially improved under the careful supervision of the License Superintendent and judging from the financial results achieved within this short time, it may safely be assumed that the farm will contribute in future materially to the permanent resources of the Corporation.

48. *Sale of rubbish.*—The receipts under this head which include the contracts for removal of dung from the conservancy depôts and the recovery for reclamation of insanitary pits and ponds by the Health Department fell from Rs. 17,520-5-4 to Rs. 10,970-5-1, the decrease being due to want of competition among contractors for the removal of rubbish.

49. *Slaughter-houses.*—The slaughter-houses in the City were as usual managed by the Corporation. The right of collecting rents for the use of the cattle, sheep and pig slaughter-houses and the piccemeat markets attached to the two former and of levying license fees for the slaughter of animals therein, under Sections 331 & 334 of the Act, was leased out during the year and a sum of Rs. 80,630-5-5 was realised as against the estimate for Rs. 81,000. The total number of sheep, cattle and pigs slaughtered in these slaughter-houses was 372,033, 15,092 and 2,069, respectively. The Corporation meat vans were availed of by the butchers on payment of the prescribed fees. The complaint of delay in the transport of meat by the existing vans will soon be removed by the introduction of motor meat vans which the Corporation have with the approval of Government decided to purchase in the current year. The question of improving the drainage of the slaughter-houses was taken up for consideration during the year by the Special Works Department. In regard to the slaughter of animals, the Society for the Prevention of Cruelty to Animals represented that a more humane method might be adopted in the case of larger animals. The use of "humane killer," an instrument used in England for the slaughter of cattle, was also suggested by the Society, but the instrument does not find favour with the butchers.

The total number of sheep, cattle and pigs slaughtered in private premises under Sections 333 and 335 was 2,057, 4 and 3, respectively.

50. *Markets.*—Of the two markets maintained by the Corporation, *viz.*, Moore Market and Smithfield Market, the former with the Evening Bazaar attached thereto was managed departmentally by the Revenue Department. The fees from the Smithfield Market amounted to Rs. 4,723-6-6 against Rs. 4,555-8-0 in the previous year.

51. *Moore Market.*—The income amounted to Rs. 18,563-0-8 against an estimate of Rs. 18,000. The demand was fully collected within the year.

52. *The New Guzili Bazaar.*—The collections amounted to Rs. 12,835-8-0 against an estimate of Rs. 12,500. The demand was even here fully realized within the year.

53. *Private markets.*—There were 45 markets in the City and the fees collected amounted to Rs. 3,725 as in the previous year.

54. *Dhobykhana.*—No income was derived from this source as the Dhobykhana was not leased during the year under report. The dhobies were permitted to use it free in accordance with a resolution of the Standing Committee. Estimates have been prepared for enlarging and improving the Dhobykhana so as to make it more useful and a reasonable fee will be levied from the dhobies from the current year for the use of the khana.

55. *License Fees on import of timber and firewood.*—The gross collections under this head amounted to Rs. 2,22,412-9-5 which includes a sum of Rs. 2,836-12-6 relating to the previous year in the hands of the collecting agencies and paid in during the year under report and excludes Rs. 3,552-3-6, the fees levied and received by the collecting agencies for March 1913, but not remitted to this office till after the close of the year. The corresponding gross collections for 1911-12 amounted to Rs. 2,17,427-11-10.

56. *Refunds of fees on exports granted during the year* amounted to Rs. 31,333-12-0 against Rs. 26,792-0-0 in the previous year. The net collections for the year stood at Rs. 1,91,078-13-5 against an estimate of Rs. 1,85,000 and against Rs. 1,90,635-11-10 the actuals of the previous year. In addition to the refund of Rs. 31,333-12-0 paid from the current collections on account of timber exported from imports made during the year, a sum of Rs. 35,985-8-0 was also refunded from collections of previous years under the head of "Refund of other than current collections."

57. *Fees for Licenses, Registration &c.*—The amount collected under this head including fees for private markets and cartstands amounted to Rs. 67,699-2-0 against Rs. 62,518-1-0 in the previous year showing an increase of Rs. 5,181-1-0. Details will be found in Table No. 20 Appendix II. As in the previous year care was taken to see that sanitary conditions were enforced as required by the by-laws. The separate out-door staff of the License Branch sanctioned in G.O. No. 1559 M. dated 24th August 1912 for the purpose of relieving the Overseers of the Works Department of license work was entertained with effect from 1st October 1912. The closer supervision exercised by this staff over places requiring licenses as

evidenced by the increased income under this head has demonstrated the wisdom of this move. Better results are looked for in the current year.

58. *Distrain Fees.*—The distraint fees realized during the year amounted to Rs. 293-10-7 against an estimate of Rs. 300. There were 353 distraints made in the year against 287 in the previous year. Only in 132 of these cases against 136 in the previous year, the distress had to be pushed on to the final stage of sale by auction. This indicates that the taxes were as usual collected without undue severity.

59. *Fines under Municipal and other Acts.*—The amount realized under this head was Rs. 4,185-2-6, against an estimate of Rs. 4,500 and Rs. 5,997-11-8 in the previous year.

60. *Interest on Investments.*—During the year under report a sum of Rs. 2,569-0-10 was realised as interest on the securities in favour of Raja Sir Ramaswami Mudaliyar's Maternity Hospital. The interest derived during the year on investments of the surplus funds of the Corporation amounted to Rs. 55,273-11-5 under the revenue and capital accounts put together against Rs. 60,599-15-9 in the previous year. The decrease was due to a sum of Rs. 12,89,000 having been invested for one year in fixed deposit, the interest on which amounting to Rs. 51,560 will accrue only in the current year.

Grants and Contributions.

61. Contributions amounting to Rs. 18,94,206-10-10 as detailed under, were paid by Government during the year against Rs. 5,48,950 in 1911-12:—

- (1) a contribution of Rs. 20,000 for the maintenance of the Mount and Poonamallee roads,
- (2) a contribution of Rs. 4,443 for the repair of the bridges over the Cooum and Buckingham Canal,
- (3) a compensation of Rs. 13,607 for withholding sanction for the issue of licenses by the Corporation for places used for the sale of spirituous and intoxicating liquors,
- (4) a contribution of Rs. 2,000 towards the zoological collections in the People's Park,
- (5) a special grant of Rs. 18,50,000 for the improvement of the water supply and drainage of the City,
- (6) a contribution of Rs. 300 for the payment of batta to pregnant women in Raja Sir Ramaswami Mudaliyar's Maternity Hospital, and
- (7) a contribution of Rs. 3,856-10-10 for census operations.

Payment for water supplied for non-domestic purposes.

Current.

62. The demand under this head amounted to Rs. 1,16,505-14-0 which excludes a sum of Rs. 4,271-2-0 due by Government for the supply of water made to them during the last two months of the year. The bills for this amount were issued after the close of the year under an arrangement entered into with Government.

The current collections came up to Rs. 1,14,667-10-11 against Rs. 1,12,840-10-0 in 1911-12 and Rs. 1,838-3-1 were outstanding at the end of the year. Of this balance a sum of Rs. 1,848-4-5 has since been collected. The percentage of collection to the demand was 98.43 against 98.76 in the previous year.

Arrear.

63. The arrear outstanding at the commencement of the year was Rs. 1,413-8-0 which rose to Rs. 4,052-10-0 by supplemental charges made for the previous year and by bills issued against Government for the two months of the last quarter of the previous year. A sum of Rs. 3,981-6-0 was collected and Rs. 71-4-0 remitted, leaving no balance at the end of the year.

General Incidence of Taxation.

64. The incidence of taxation per head of the population under all taxes including tolls was Rs. 3-7-2 against Rs. 3-5-9 in the previous year. Excluding tolls, the incidence was Rs. 3-5-10 against Rs. 3-4-5 in 1911-12.

Advance Account.

65. The amount outstanding at the beginning of the year was Rs. 1,04,863-4-4, of which permanent advances held by the several officers of the Corporation amounted to Rs. 91,555 and miscellaneous advances to Rs. 13,308-4-4. During the year permanent advances amounting to Rs. 200 and miscellaneous advances of Rs. 5,588-15-3 were adjusted and fresh advances were made to the extent of Rs. 190 under permanent and Rs. 14,141-5-1 under miscellaneous. The advances outstanding at the close of the year were thus Rs. 91,545 under permanent and Rs. 21,860-10-2 under miscellaneous or Rs. 1,13,405-10-2 in the aggregate against Rs. 1,04,863-4-4 at the end of the previous year.

EXPENDITURE.

Grant I.—(Public Works).

(a) Communications.

New Works.

66. The following works were done during the year :—

- (a) Constructing a masonry bridge of 4 spans of 6 feet each for connecting Subbaroya Chetti, 3rd lane, with Connur Road.
- (b) Constructing a 9-inch cast iron pipe culvert in Muthu Mudali Street to provide an outlet for the tank water.
- (c) Renewing wire fences along the southern side of Moore Road across the Esplanade. The northern side was done during 1911-12.
- (d) Extending the masonry storm water culvert from Mount Road along Peters Road to Thayar Sahib Street, Rayapettah.
- (e) Extending towards the north the culvert at the eastern end of Chulai Bazaar Road and providing a cesspool in the main drain close by.
- (f) Constructing a 2-feet culvert in lieu of a small arch culvert at the junction of Clement's and Letang's roads.
- (g) Extending 2 culverts in Luz Church Road near houses Nos. 16 and 17.

Out of the revised estimate of Rs. 40,440, a sum of Rs. 7,183 was spent on account of the new road named Lloyd Road, for raising the level and reforming the road and supplying and fixing lamp-posts.

The work of constructing a new bridge connecting "Monkey Island" with the Menagerie enclosure on the east in People's Park, reported as being in progress during the year 1911-12, was completed during the year under report.

67. Lands and buildings were acquired for the following purposes :—

- (a) For opening a street from the proposed Peddu Naick's Park to the northern streets.
- (b) For widening Vijia Vigneswarar Coil Street, Chulai.
- (c) For a street to connect Avadhanam Paupier Road with Hospital Plain, Chulai.
- (d) For widening Mosque Lane, Triplicane.
- (e) For connecting Namasivaya Mudali Street with Pycroft's Road.
- (f) For an approach to the Luz Church Road from two side streets.

Repairs.

68. During the year, 6 miles, 5 furlongs and 22 yards of unmetalled roads were metalled for the first time. The work done in the reform of roads charged to Works Department grant was as follows :—

The number of squares (100 sq. ft.) laid was 71,451 which is equivalent to 67.66 miles of roads 20 feet wide against 62.93 miles in the previous year. *Vide* details as shown in Tables 13 and 14 of Appendix II.

The quantity of materials used in reform work was	Blue granite	10,81,852½	C. ft.
	Velacheri	4,71,857½	
	Laterite	6,99,512.	
C. ft.			
The quantity of materials used in patch work was	Blue granite	83,643.	
	Velacheri	16,185.	

The reform of roads was done on the same lines as in the year 1911-12. A list of roads requiring attention is maintained in the office and roads for reform were taken in order of urgency and importance. Attention was also paid to the patching of roads.

The cost of reform including materials, cartage and laying, but exclusive of rolling, was Rs. 2,80,034. The 67.66 miles of roads completely reformed cost Rs. 4,139 per mile against Rs. 4,306 per mile in 1911-12. The decrease in cost per mile was due to the decrease under granite roads and increase in laterite roads reformed during the year.

The comparative figures for granite reform are as shown below, the figures being squares in each case:—

	Granite 9".	Granite 6".	Granite 5".
1911-12.	398½	1575	...
1912-13.	...	2861½	1251.
	Granite 4".	Granite 3".	Granite 2".
1911-12.	31,218	18,557½	2,899½
1912-13.	21,559½	23,622½	2,980.

69. *Tarring roads.*—As stated in para 88 of the administration report for 1911-12 the tarring operations were commenced and the following roads tar-sprayed during the year:—

Portions of :—

- Fort Beach Road.
- Pophams Broadway.
- General Hospital Road.
- Evening Bazaar Road.
- Mint Street.
- Mount Road (2 portions)
- Moore Road and the road over the Napier Bridge completely.

The results are satisfactory. It is easier to keep such roads clean and their surface lasts longer.

70. *Private Streets.*—Requisitions were received from the owners of land and buildings abutting on the following private streets for declaring them as public streets under Section 246 of the Municipal Act :—

Habibulla Sahib Street	} R. S. Nos. 657, 659, 668 and 670 of Triplicane.
Pulibone Bazaar 1st lane	
Do 2nd lane	

The matter is under correspondence.

71. The following culverts were repaired during the year :—

- (1) The culvert at the junction of Paddy Fields Road with Vadivelu Mudali Street, Perambore.
- (2) The culvert at the junction of Letang's Road and Ritherdon Road. The side walls were raised.
- (3) The culvert at the north end of Gengu Reddi Road, Egmore.
- (4) The culvert in General Patters Road at its junction with Bobegam Street.
- (5) The culvert at the junction of Karniswarar Pagoda Street with Barber's Bridge Cart Depôt. A portion was rebuilt.
- (6) The arched culvert near the toll gate in Chamier Road.—The parapet walls on either side were reconstructed.
- (7) The work of extending two culverts at the 4th mile stone in Tiruvottiyur High Road was completed during the year under report.

72. *Footpaths* :—

- (1) The footpath in Mount Road opposite Messrs. Oakes & Co.'s Garage was paved with cement.
- (2) The work of repairing the footpath in Mount Road opposite the Stable Co.'s premises was in progress.

73. *Bridges* :—

The work of reconstructing the central span of the Penitentiary Bridge was in progress.

The Napier Bridge was thoroughly painted with approved English paint.

The side wall of the western portion of the small bridge in Brodie's Road was rebuilt.

(b) **Buildings.**

New Works.

74. *Isolation Hospital*:—A site in Aminjikarai which was selected by the Corporation and approved by Government in G. O. No. 169 M., Mis., dated 29th January 1913 is now under acquisition by the Collector of Chingleput.

Detailed plans and estimates for the building were prepared during the year and are now under the scrutiny of the Sanitary Board.

Rayapettah Hospital :—The drainage and water supply arrangements and sanitary and electric fittings were completed and the hospital was fully furnished and opened for use on 29th May 1912. Land was acquired for quarters for Sub-Assistant Surgeons and the construction of quarters for six Indian nurses was in progress.

Rajah Sir Ramaswami Mudaliyar Maternity Hospital :—The installation of electric lights and fans in the hospital was commenced on 20th March 1913 and completed on 30th April 1913.

Vaccination Depôts :—A steel pale fencing was erected around the Vaccination Depôt in Cutcheri Road.

75. *Model Schools*:—The school buildings in Poonamallee Road and Vallabha Agraharam were completed during the year.

Land was acquired for building schools on the following sites and the construction of buildings thereon was in progress.

- (1) Sanjeeviroyanpet, 2nd Division.
- (2) Mint Subroyalu Naidu Street, 3rd Division.
- (3) Amman Coil Street, 7th Division.
- (4) Vaikaikarant Street, 11th Division.
- (5) Arunachalla Naick Street, 16th Division.
- (6) Mandavali Street, 20th Division.

76. *Model Paracheries*:—The work of building model dwellings for poor Anglo-Indians in Pudupet and houses for the people to be evicted from Nariangadu Paracheri was in progress.

Land was acquired for the construction of model dwellings in R. S. No. 44 of Nungambakam.

Works carried out for the Health Department.

77. *Cattle and Cart Depôts* :—The construction of gram sheds at the following depôts was completed.—

- B. Depôt, Basin Road.
- C. „ Washermanpet.
- H. „ Monegar Choultry.

The construction of gram sheds for the following depôts was in progress :—

- D. Depôt, Chulai.
- E. „ Harris Road.
- F. „ Kistnampet.

The construction of a building for the office of the Superintendent, D. Depôt was in progress.

78. *Bullock sheds* :—A platform for washing bullocks in Basin Cart Depôt was completed. The work of constructing bullock sheds in Monegar Choultry Cart Depôt and a sick bullock shed in Basin Bridge Cart Depôt was in progress.

The construction of a water trough for the Kistnampet Cart Depôt which was in progress during 1911-12 has been completed during the year under report.

79. *Latrines* :—The western compound wall of the latrine in Narayana Syrang Garden Street was raised.

Land was acquired and a sanded latrine constructed for the people in Chucklipalayam, Chulai.

The construction of a masonry latrine of 16 seats each for males and females at the south-eastern portion of Ubrapalayam was in progress.

Of the nine combined latrines and urinals referred to in para 98 of the administration report for 1911-12, only one in Harris Road was completed and the following are nearing completion :—

- (1) at the junction of Sydenham Road with Chulai Bazaar Road ;
- (2) in Sydenham Road opposite to Periamet Railway level crossing ;
- (3) at the junction of Venkataranga Pillai Street with Ice House Road ;
- (4) near the vaccination depôt at Thousand Lights.

The rest were abandoned for want of sufficient water supply in the locality.

80. The lethal chamber in DeMellow's Road was extended for sheltering dogs. Small incinerators were constructed at a cost of Rs. 1,070. The washing platform in the Dhoby Khana at McNicholl's Road was extended.

A compound wall was constructed for the Kistnampet burial ground to screen it from Lloyd Road.

Flushing pipes were constructed for drains outside Moore Market.

Four restaurants are in course of construction over the Evening Bazaar buildings in People's Park.

Other Works.

81. A room was constructed at Tondiarpet Sewage Farm for storing gram, tools etc. A verandah in the rear of the Corporation Workshop was constructed and five godowns for the use of carpenters and blacksmith maistries for storing materials and a cistern for storing waste water of meter tests were added.

The following works in the Corporation Workshop which were reported as being in progress during 1911-12 were completed during the year under report :—

- (1) Erecting shops for meter repairers, tinkers and painters with a godown.
- (2) Constructing a record room, tiffin room and gate-keeper's room.
- (3) Store room and time keeper's room.
- (4) Three godowns for storing bratties, coal and coke.

In the Corporation Stores four bins without roof for storing scrap iron, one tar godown 140 ft. x 16 ft. with common tiled roof and another tar godown 60 ft. x 16 ft. with corrugated iron roof and a barbed wire fencing were erected.

A distraint yard with corrugated iron roof was constructed near the Corporation Stores.

An Overseer's Office and Stores was constructed at the junction of Wall Tax Road and Tirupalli Street, 8th Division.

Another Overseer's Office and Stores was in course of construction at the junction of Tiruvottiyur High Road and Basin Bridge Road, 2nd Division.

A screen wall was constructed for the Sergeants' quarters in People's Park.

The work of erecting sheds with weigh bridges for steam road rollers referred to in paragraph 105 of the administration report for 1911-12 was completed during the year under report.

82. *Central Fire Station* :—A sum of Rs. 15,230 was provided in the revised estimate for the acquisition of land for the construction of a Central Fire Station at Pudupet and for widening the road leading to it, but no expenditure was incurred as the question of the redistribution of fire engines and selection of sites for them was under correspondence with the Commissioner of Police.

83. *The New Corporation Office Building* :—The work on the building was carried on continuously throughout the year. According to the contract the building ought to have been completed on 1st June 1913, but it is not likely to be finished and ready for occupation before the end of September.

The average monthly expenditure on the works during the year was Rs. 9,790.

Water-Supply and Drainage—Special Works Department.

84. With reference to G. O. No. 1344 M., dated the 26th September 1912, the services of Mr. H. Nowroji, Assistant to the Special Engineer for Water Works Construction, were replaced at the disposal of Government on 1st December 1912.

General.

85. The works executed by the department during the past year may be classified as follows :—

Water Works Section.

(1) Construction of Pumping Station and Elevated Tank at Kilpauk, erection of Pumping Machinery, and laying of 48 inch Pumping Main.

(2) Construction of Roughing Filter, Conduit, Sand Filters and Pure Water Tanks.

Drainage Section.

86. (1) Madras Main Drainage Design.

(2) Local drainage including construction work for the drainage of Tondiarpet.

(3) Remedial measures including laying additional sewers, dealing with insanitary areas, improving pumping stations, constructing new manholes, etc.

(4) Drainage of private and public buildings including hospitals, public latrines, slaughter-houses and private houses.

(5) Maintenance of existing works, such as, sewage pumping machinery and pumping stations.

87. The expenditure on works in charge of the Special Engineer for the last five years since his department was created has been as follows :—

Particulars.	1908-09	1909-10	1910-11	1911-12	1912-13	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Water-supply :—New works	94,108	2,06,778	3,47,217	4,81,338	6,63,691	17,93,932
Drainage :—	67,240	86,216	4,18,032	5,37,049	4,69,410	15,78,347
Drainage (Pumping Stations...	...	86,324	1,14,889	1,21,774	1,42,912	4,66,899
Maintenance (Sewer cleaning ...	...	15,893	21,941	14,385	18,270	69,302
Works executed and the cost charged to Revenue Account	...	7,930	9,868	8,864	1,373	28,030
Private work executed	...	455	1,013	729	1,364	3,551
Total Rs.	1,61,348	4,03,006	9,12,958	11,64,189	12,97,310	39,38,161

Note—The sewer cleaning was transferred during 1912-13 from the Special Works Department to the Works Department.

From the above statement it will be seen that there has been a steady increase in the work turned out.

In order to obtain the increased amount of work during the year it was necessary to exert great pressure on the contractors and to carry out a considerable amount of work departmentally. At present it appears exceedingly difficult to obtain a greater outturn of work with the labour and plant available in Madras. It would appear that, if a greater quantity of work is to be executed in the future, more labour will have to be imported and labour saving devices will have to be more generally employed.

Details of the expenditure are given in Appendix II, Table No. I.

88. The special features of the year are :—

(1) The completion of the Special Engineer's *Madras City Main Drainage Scheme* including a comprehensive report with a large number of plans and detailed estimates amounting to Rs. 98,26,400. The scheme was considered by the Corporation at their meeting held on 23rd June 1913 and the report was forwarded to Government with their remarks on 26th June 1913.

(2) The completion of street sewers and the erection of engines for the Tondiarpet Drainage Works.

Water Works Section.

89. *Construction*:—The following table shows the quantity and value of work executed up to 31st March 1913 and during the past year on the conduit, filter beds and pure water tanks :—

	Conduit and roughing filter	Sand filters and pure water tanks masonry built.	Pumping station and elevated tank.	Pumping machinery.	Laying 48-inch steel pumping main.
QUANTITIES OF WORK.	Lineal Feet.	Cubic Feet.	Cubic Feet.		Feet.
Total to be executed	34,584	13,48,268	1,75,970		3,000
Total executed to March 31st 1913...	31,594	11,15,700	91,542	All machinery delivered at site.	2,500
Do. March 31st 1912...	25,505	8,65,800	...	...	...
Progress during 1912-1913	9,079	2,49,900	91,542	Erection in progress.	2,500
VALUE OF WORK DONE.	Rs.	Rs.	Rs.	Rs.	
Total of Special Engineer's revised estimates of 1-9-1911	5,91,200	7,12,100	1,72,710	4,00,000	13,513
Total executed to 31st March 1913...	5,95,880	4,45,706	48,550	3,42,905	7,990
Do. 31st March 1912...	4,23,600	3,37,500	...	...	...
Value of work executed during 1912-1913	1,72,280	1,11,206	48,550	3,42,905	7,990

The above are the works upon which the greatest expenditure was incurred during the year under review. The total expenditure on the new Water Works up to 31st March 1913, was Rs. 17,93,032 as shown in detail in Table No. I, Appendix II.

90. The *Conduit* and fourteen *Filter Beds* are practically complete, and the filtering materials—bricks, stone and sand—are being collected. The conduit is

NEW WATERWORKS IN COURSE OF CONSTRUCTION AT KILPAUK.

Panoramic View from Pumping Station Filter Beds, Pure Water Tanks, Elevated Tank Masonry and 48-inch Pumping Main.

PURE WATER TANKS COMPLETED AND COVERED OVER.

being cleaned and will shortly be tested. It has been necessary to carry out this work in part by direct labour.

The plate facing this page shows a panoramic view of the Water Works at Kilpauk taken from the Pumping Station Chimney on the 29th March 1913.

On the left will be seen the end of the Red Hills Conduit and the beginning of the Unfiltered Water Conduit which runs round the Filter Beds and distributes the water to them. Between the two rows of Filter Beds is the Pure Water Conduit in course of construction. The fourteen Filter Beds will be seen to be perfectly complete and to contain water. In the foreground extending from the extreme left of the picture nearly up to the Lunatic Asylum wall are the Pure Water Tanks which have been completed and roofed except for a portion of the third tank, where the arches are seen to be in progress. On the right of the picture is the Elevated Tank. Foundations have been completed and piers are in course of erection. In the distance the 48-inch Steel Main laying is seen to be in progress.

91. *Pumping Station and Elevated Tank*:—Special efforts have been made to hasten on the construction of the Pumping Station, Elevated Tank and the laying of the 48-inch Steel Pumping Main at Kilpauk. The Pumping Station has now been completed to the underside of the traveller rails and the Chimney to a height of about 50 feet above ground level. The whole of the work underground was executed departmentally either by direct labour or by piecework contract. The Elevated Tank masonry foundations have been completed and the outer ring of piers and arches has been started. The main foundation of the Elevated Tank is a large block of concrete where as much as 17,000 cubic feet of concrete were put in at one operation which is understood easily to be a record for Madras City.

92. *Pumping Machinery*:—Messrs. James Simpson & Co., of England and Calcutta, who are the contractors for the supply of High Duty Plant for Kilpauk Pumping Station, have completed the delivery of the machinery, and have erected and fixed on their beds the main pump chamber castings. The erection of the machinery will be completed with the aid of the traveller which also is being supplied by Messrs. James Simpson & Co.

93. *48-inch Steel Pumping Main*:—The 48-inch Steel Pumping Main has been laid from opposite the masonry shaft, where the present distribution system begins to a point close to the pumping station. The Venturi Meter, the connections to the Elevated Tank and the jointing up to the pump deliveries have still to be completed.

94. *Distribution Scheme*:—A contract amounting to 13½ lakhs of rupees has been let to Messrs. Balmer Lawrie & Co. of Calcutta for the supply of pipes required for the two principal mains included in the new distribution system. These mains have an aggregate length of about 17 miles and vary in diameter from 6 inches to 42 inches. The delivery of the castings will begin early in the coming year. Contract forms have also been prepared and tenders received for laying the two large mains to the north and south of the City, which are the most important lines of pipes included in the new scheme. Tenders have also been received for pipe-laying tools and accessories and for lead and yarn required for joint-making.

Drainage Section.—Main Drainage Works included in Tondiarpet Report and sanctioned in G. O. No. 654 M., dated 18th April 1910.

95. *36-inch Cast iron Pumping Main*.—The 36-inch cast iron pipes at the grass farm, which were rendered unnecessary by the construction of the open channel, have been taken up departmentally and relaid to form a new pumping main from Rayapuram Pumping Station across the Railway and along Mannarswami Coil Street to Kalmantapam Road. Here a temporary connection has been made to the 24-inch cast iron main which will be used until the Farm Pumping Station is completed. The laying of the main under the Railway lines presented some difficulties and was therefore carried out departmentally. It was completed quite successfully and has caused no trouble since it was put into use.

96. *4 ft. 6 in. Brick Sewer*.—The 4 ft. 6 in. brick sewer which is to carry all the sewage of Georgetown and Tondiarpet to the Grass Farm Pumping Station was in course of construction throughout the year. The northern end has been enlarged to a 5 ft. 6 in. sewer, in order to conform to the proposals of the Special Engineer for the complete drainage of the City. The progress on this section has been very slow, owing largely to the great amount of water encountered in the excavation. Every effort is being made to get the work completed as quickly as possible.

97. *Farm Pumping Station*.—A contract has been let to Messrs. Burn & Co., for the supply and erection of Humphrey Pump at the Grass Farm. Some delay was occasioned owing to the necessity of preparing a special agreement. This is the first time that an Humphrey Pump has been used for sewage and it was considered desirable that one unit should be installed before the complete plant was put in hand. The sinking of the pump wells for this unit is now in progress. Should the pump prove satisfactory, further machinery of the same type will be ordered for this station. The overflow from this station to the sea has been nearly completed.

Tondiarpet Drainage.

98. *Stoneware Pipes*.—Messrs. Thomas Wragg & Sons have satisfactorily completed their contract for the supply of stoneware pipes, the total amount of the final bill being Rs. 2,13,755-3-1. See Appendix II, Table No. 6.

99. *Sewer Laying*.—By 31st March 1913 a length of 1,18,149 feet out of a total length of 1,20,000 feet of sewers had been laid. The value of laying alone, excluding the value of pipes was Rs. 2,02,506. The number of manholes constructed during the same period was 604, and the number of house connection pipe lines laid 2,945. The length of house connections laid was 32,563 feet making a total of 1,50,712 feet of pipes laid.

Sewer-laying and house connection pipe-laying in Tondiarpet have thus been practically completed. The principal work which still remains to be done is the laying of the 24-inch cast iron pipe from Pumping Station A to Pumping Station B. This work was delayed pending the construction of the open channel, but is now being pushed on as rapidly as possible, though progress is necessarily slow owing to the great depth of the pipe below the ground surface, and the large quantity of water encountered in the trenches.

MAP OF MADRAS

SHOWING PROPOSED DRAINAGE AREAS, EXISTING AND PROPOSED PUMPING STATIONS, PUMPING MAINS GRAVITATION MAINS, ETC.

SCALE 1 INCH = 1 MILE

SPECIAL ENGINEER,
CORPORATION OF MADRAS.
23RD AUGUST, 1913.

100. *Tondiarpet Pumping Stations* :—The work of constructing silt-pits, screening chambers and suction wells at the three stations known respectively as A, B and C, Tondiarpet, was carried out departmentally and has now been completed. The screens and silt-raisers for these pits have been ordered. A contract for the superstructures of the buildings was awarded to Messrs. A. Narasa Aiyar and A. Venkatarama Aiyar. Fair progress has been made and the buildings are now being roofed with Siegwart Beams.

101. *Pumping plant for A, B and C Stations* :—At each of the pumping stations, three pumping sets have been erected, each consisting of an Oil Engine and Centrifugal Pump. The contract for the supply and erection of the plant—amounting to Rs. 96,410—was awarded to the Campbell Gas Engine Co., Ltd. All their work is practically finished except for some pipes and specials required to replace broken and missing articles.

General scheme for the drainage of the City.

102. *Scheme completed*.—A large amount of time had been spent in completing surveys, drawings, calculations and estimates for the general scheme for the City Main Drainage. The whole work was completed by the end of the year and an explanation of these proposals was given to the Commissioners by the Special Engineer on the 18th April 1913. The printing of the report and estimates was in progress at the end of the year.

Facing this page is a plan illustrating the general scheme as prepared by the Special Engineer. The plan shows the different drainage areas and the main drainage works including Pumping Stations, Pumping Mains and Gravitation Mains as they will be in the completed scheme. The plan is too small in scale to show the street sewers.

103. *Stoneware Pipes* :—In order to avoid delay in the drainage work, the Standing Committee called for tenders for stoneware pipes required for the Georgetown and Purasawalkum areas. These tenders were duly received and the Standing Committee recommended the lowest tender, namely, that of Messrs. Thomas Wragg & Sons. The Corporation, however, decided to call for fresh tenders.

104. *Relaying Sewer in Waller's Road* :—The sewer cleaning staff having complained that they were unable to clean the sewer in Waller's Road, Chintadripet, a trench was excavated down to this sewer and it was found to be constructed of concrete pipes which had collapsed. An estimate amounting to Rs. 7,300 was prepared for relaying it and was sanctioned by the Corporation. The work is now practically completed. Some difficulties were encountered owing to the large quantity of water met with and the considerable depth at which it was necessary to relay the new sewer in order to make it efficient.

Minor drainage Works.

105. Amongst the minor drainage works carried out by the Special Works Department, the following may be mentioned :—

(a) *DeMellow's Road Pumping Station* :—The pumps at this station have given a great deal of trouble. They have been unable to cope with the sewage

that comes to them. The consequence has been the backing up of sewage in the drains and the creation of insanitary conditions in the Purasawalkum area. On this account, new pumps were obtained and installed towards the end of the year. They are reported to be working satisfactorily.

(b) *Drainage of Rayapettah Hospital*:—The installation of sanitary fittings and the construction of drainage work for the Rayapettah Hospital have been completed satisfactorily at a total cost of Rs. 19,742-2-2. This is the first instance in Madras of quite up-to-date first class drainage work.

(c) *Drainage of New Municipal Office Building*:—During the year plans and estimates were prepared for the installation of sanitary fittings for the drainage of the New Municipal Office Building by the water carriage system. Tenders for the work were called for in the middle of February to be submitted in April 1913.

(d) *Covering Open Channel at Grass Farm*:—In accordance with the resolution of the Corporation, the Special Engineer submitted an estimate for covering a short section of the open channel at the Grass Farm. In order to get the work completed as early as possible, it is being carried out departmentally and has been nearly completed.

(e) *Drainage of the Corporation Slaughter-house*:—The Corporation decided that something must be done to deal with the drainage of the Corporation Slaughter House before the general scheme can be introduced. The Special Engineer has therefore prepared a scheme and submitted an estimate amounting to Rs. 10,900 for this work. The scheme provides for preliminary treatment of the sewage followed by pumping through a main about 2,500 feet into the head of the nearest sewer leading to the DeMellow's Road Pumping Station. Tenders for necessary pipes and pumping plant have been called for.

106. *Petty Works*:—The number of petty works carried out by the Special Works Department during the year has been reduced in accordance with the Corporation's resolution that the Special Engineer should be relieved of all such works as far as possible. That it has not been possible to relieve him entirely is proved by the minor works enumerated above. In addition to this, a considerable number of house connections have been carried out by the Drainage Superintendent working under the Special Engineer and plans have also been prepared for the drainage of a number of buildings notably for the Christina Rainy Hospital, Tondiarpet. The Corporation received five per cent. on the estimated cost of the work for the preparation of plans, estimates and supervision of the work during construction. It is noteworthy that first-class house drainage work is largely on the increase in Madras.

Drainage Maintenance.

107. *Maintenance of Pumping Station*:—The sewage pumping stations have been maintained in their usual state of efficiency. Owing to the large amount of new construction work the Mechanical Engineer has had in hand during the year under review, it has been impossible for him to devote as much time as he wished to look after the existing pumping stations. The Corporation have recognised that he required some assistance in looking after the existing pumping stations and a Mechanical Supervisor was appointed from December 1912. The remarks made in

the last year's administration report still hold good. The existing plant is, in most cases, of insufficient capacity to deal with the amount of sewage that comes to it, and has to be worked continuously at its full capacity—in many cases, it has to be over-driven. The consequence is that the economical working cannot be secured and it is very difficult to carry out the small running repairs and adjustments which are so necessary, if the pumping machinery is to do its best work. Furthermore, the standard of engine driver is not sufficiently high. Every endeavour will be made to obtain a better class of drivers, though the right type of man hardly exists in Madras. In this connection a good technical school run on practical lines should be of great value in developing suitable engine drivers.

It is unnecessary here to give particulars of working of each individual pumping station. They were dealt with briefly in the last year's report, and an elaborate set of tests is given in the Special Engineer's report on Madras Main Drainage, 1913. The only station that calls for remark is the DeMellow's Road Pumping Station. Here the plant has, as usual, been very much over-taxed. The consequence is that the pumps and engines have given a great deal of trouble and it has been necessary to maintain continuous pumping. Towards the end of the year new pumps have been fixed and it is reported that they are doing good work and that the dry weather flow can now be readily coped with.

(c) Drainage (ordinary).

New Works.

108. New masonry 6 inches and 9 inches open side drains were constructed in the following places:—

Menaud Lane, Purasawalkam; Venkatesa Naicken Street, Venaitheertha Vinayagar Coil Street, Pudu Street, Peria Thambi Mudali Street, Chinnathambi Naicken Street, Venkatadri Naick Street and Kandasawmi Coil Street, Kosapet.

Mahomed Hussain Sahib Street, Saiyed Abdulla Saheb Street, Syed Noor Street, Abdul Kader Street, Begam Street and Maroof Sahib Street, Triplicane; and Chitrakulam Eastward Street, Mylapore.

Cast Iron pipes were substituted for the old masonry drains with granite stone coverings at street crossings in the following places:—

Peddu Naick Street, Prasanna Vinayagar Coil Street, South Coom Road, Edward Elliot Road, Harrington Road, and at the junction of Edward Elliot Road and Sullivan Road.

109. The following works which were reported as in progress during 1911-12 were completed during the year under report:—

Constructing a covered drain in Mount Road, a 6-inch curbed street drain for a portion of the new street from Aiyah Pillai Street to Thandavaraya Mudali Street and manufacturing a shutter for the outlet in North Beach Road.

110. The following works were in progress:—Constructing side drains in Muthu Mudali Street, Vyasarpadi; Cundappa Mudali High Road, Purasawalkam and Maddala Narayanan Street, Mylapore.

Repairs.

111. The repairs done to drains and their cost are shown in Appendix I, Statement II A, part II.

Sewer cleaning.

The work turned out in the year was as follows :—

Length of sewers cleaned	... 539,599 Lineal ft.
No. of Sewer obstructions	... 3,492.
No. of Syphon obstructions	... 1,160,
Quantity of silt removed.	... 105,790 c. ft.

In addition to the above work, the cleaning of Sewage Pumping Station wells was undertaken and an account of silt removed was kept from the month of September which shows that 30,800 c. ft. have been removed from all stations.

A special gang of coolies was sanctioned for a period of two months for cleaning the main sewers in White's Road and Ellis Road. The work was satisfactorily carried out, and these sewers which were silted up and consequently surcharged for a very long period are now in fair working order.

A few silt pits were built in the 11th and 12th Divisions and have improved the condition of sewers in that area.

The pipe connections from the new flushout latrines to sewers were carried out by the sewer cleaning staff under the supervision of the Drainage Superintendent.

*(d) Water Supply (ordinary).**New Works.*

112. In addition to the works executed by the Special Works Department a sum of Rs. 5,400 was spent for removing, cleaning and relaying or replacing by new pipes of 19,616 feet of pipe line and laying 8,314 feet of new mains in certain streets for extension of water supply.

The electric pumping scheme for improving the water supply at Mylapore was completed at a cost of Rs. 3,398.

In addition to the above, 29 fountains were erected and 14 valves, 17 stop cocks, 14 pumps, 11 hydrants and 18 meters were fixed during the year. Table No. 12 of Appendix II shows the length and size of pipes laid.

Repairs.

113. On the 1st of April 1912, the level of the lake stood at 41.31 and on the 31st March 1913 at 41.86. On 3rd July 1912 the level of the lake fell to 36.61 when pumping had to be resorted to for the supply of water to the City. It was continued till 21st October 1912 when the level of the lake rose to 36.96. The cost of pumping amounted to Rs. 24,208. The rainfall and the average water level for each month are shown in Table 16, Appendix II. The quantity of water supply measured at the Red Hills during 1912-13 was 657,313,866 cubic feet (equal to 4,096,380,012.912 gallons) as against 683,839,962 cubic feet in the previous year.

Delivery Channel, fountains and pipes:—The cost of maintaining these

including establishment amounted to Rs. 43,561. There are now 1,454 fountains within the municipal limits, 29 new fountains having been erected during the year.

Private service:—During the year, 691 new services were laid by licensed plumbers and 2,937 existing services were extended. The total number of house services laid up to the end of 1912-13 was 26,613.

There were 39 licensed plumbers on 31st March 1913.

The quantity of water charged for, as having been used for non-domestic purposes was 153,991,995 gallons. The amount collected during the year was Rs. 1,18,649-0-11 as shown in detail in Table 17, Appendix II. The charge for water supplied for non-domestic purposes continued to be 12 annas per 1,000 gallons.

*(e) Miscellaneous.**New Works.*

114. Under the scheme for opening congested areas, lands were acquired for the following purposes:—

- (1) Opening streets in Rope Godown paracherri, 2nd Division.
- (2) Opening a street connecting Shanmugaroyan Street with Arni Gangan Street, 3rd Division.
- (3) Opening a street connecting Mannappa Mudali Street with Muthia Mudali Street, 3rd Division.
- (4) Opening a street east of Grama paracherri off Brick Kiln Road, Purasawalkam.
- (5) Opening a street connecting Saravana Perumal Mudali Street with Ramasawmi Pillai Street, Purasawalkam.
- (6) Widening Singanna Chetti Street.
- (7) Widening Shaik Dawood Street.

The following works were also done during the year :—

Filling in low grounds at Ennore near the Licensing Clerks' quarters and dismantling two burden rests and reconstructing the same at the 4th mile in Tiruvottiyur High Road.

The work of fencing the Tondiarpet Grass Farm was in progress.

Administration.

115. *Notices:*—1,666 notices were served under Sections 215, 239, 248, 256, 257, 263, 264, 278, 440 and 442 of the Municipal Act dealing with unauthorised connections with municipal drains, fencing of buildings or lands, pruning of hedges and trees, removal of encroachments, ruinous buildings, erection or restoration of masonry buildings and other buildings with inflammable materials, doors, windows, and bars opening outwards, erection of huts, sunshades, etc.

In 1,355 cases the notices were complied with.

Permits:—1,561 permits were issued under Sections 268 and 278 of the Municipal Act for construction or restoration of masonry buildings, huts, etc.

Magisterial proceedings were taken in 1,000 cases. In 236 cases the defaulters were convicted and fined, in 46 cases they were acquitted and 613 cases were withdrawn. In 91 cases the summonses were not served owing to the absence of the defaulters and 14 cases are pending disposal.

In 520 cases provisional orders were issued under Section 287 (1) and (2) of the Municipal Act and, on the parties failing to comply with them—in 343 cases—final orders were issued under Section 287 (3) of the Act.

Grant II.—(Education).

116. The report of the Inspector of Schools embodied in Appendix III gives a concise account of the progress made under elementary education in the year under report.

117. A sum of Rs. 9,220-12-3 was spent under this head against Rs. 5,307-6-2 in the previous year, the increase being due to the opening of three new elementary schools at Vallabha Agraharam, Periamet and Sanjivirayanpet as a first instalment of the scheme for the establishment of forty model elementary schools in the City sanctioned in G.O. No. 820 M., dated 25th May 1911. These schools have proved an unqualified success and a further advance in the field of elementary education will be made in the current year by starting some more schools in localities where they are urgently needed. The income from school fees rose from Rs. 43-12-0 to Rs. 63-3-4. Including the Chetput Panchama school already in existence the total number of schools maintained by the Corporation was four. There were 543 boys and 152 girls on the rolls of these schools on 31st March 1913. Nearly 50 per cent. of this number were panchamas mostly attending the Chetput and Periamet schools. Besides the general staff of four instructors and a supervisor for drawing and kindergarten and two gymnastic instructors employed for the benefit of all the elementary schools for boys in the City, there were 26 teachers altogether employed in the four Corporation schools including an instructor in manual training attached to each school. The progress made in regard to the construction of new buildings to house the institutions which it is proposed to start in the current year is indicated in paragraph 75 *supra*.

118. Twelve teachers were under training during the year, of whom six completed their course. The remaining six and five others sent for training in March 1913 are still under training. The total amount spent on payment of stipends to these teachers was Rs. 819-7-6.

Grant III.—(Sanitation and Medical services).

Hospitals and Dispensaries.

119. *Rayapettah Hospital*.—The total amount spent on the maintenance of the Rayapettah Hospital rose from Rs. 32,059 to Rs. 51,205-3-7 but fell short of the revised estimate (Rs. 53,190). The large increase in the actual expenditure is explained by the fact that the hospital which was removed early in the year to the new buildings had to be provided with fresh furniture, equipped with an increased staff and fitted with electric lights and fans. The provision of larger accommodation and improved facilities therein increased the popularity of the

institution so much that the number of in-patients treated rose from 1,586 to 2,013 and out-patients from 48,201 to 56,458.

120. *Raja Sir Ramaswami Mudaliyar's Maternity Hospital*.—The expenditure on account of this institution amounted to Rs. 7,033-4-11 against Rs. 4,967-9-3 in the previous year and Rs. 7,470 in the revised estimate. The increase over the previous year was due to the construction of water-tank, purchase of operation table and the payment of famine batta to subordinates and house-rent allowance to the Resident Surgeon.

The work done in the hospital showed an advance, the number of in-patients treated having been 1,033 against 902 in the preceding year. But the number of out-patients treated fell from 785 to 96. The decrease is ascribed by the Surgeon to the present practice of inducing patients suffering from ordinary ailments to attend the Georgetown dispensary.

121. *George Town Dispensary*.—The outlay on the maintenance of this dispensary was Rs. 10,730-4-4 against Rs. 9,901-6-3 in 1911-12 and Rs. 10,950 in the revised estimate. The purchase of some medical appliances accounts for the increase. The number of patients treated fell from 48,997 to 47,738. The decrease is attributed to the opening of some temporary malaria dispensaries in Tondiarpet.

122. *Balialah Nayudu Dispensary*.—The expenditure on this dispensary amounted to Rs. 5,414-7-3 against Rs. 4,589-13-11 in the previous year and Rs. 5,290 in the revised estimate. The increase over the previous year was due to a larger supply of European medicines. The number of patients treated was 40,164 against 38,810 in the preceding year. The sub-assistant surgeon in charge of the institution attributes the increase to the larger number of patients treated for malaria and other fevers.

123. *Chintladripet Dispensary*.—A sum of Rs. 3,302-6-3 was spent on the upkeep of this dispensary against Rs. 3,159-6-5 in 1911-12 and Rs. 3,920 in the revised estimate. The increase over the previous year was due to the posting of a first grade sub-assistant surgeon during the year. The number of patients treated rose further from 18,059 to 23,694 which testifies to the growing popularity of the institution.

124. The reports of the medical officers in charge of the above institutions appear in Appendix IV.

Contribution.

125. *Hospitals*.—The usual contribution of Rs. 20,000 for hospitals was paid to Provincial Funds during the year.

126. *San Thome Dispensary*.—A monthly grant of Rs. 66-10-8 and an annual grant of Rs. 300 were as usual paid to the San Thomé Dispensary. The number of patients treated in this institution rose from 9799 to 9811. The working of this institution continued to be unsatisfactory. The proposal to maintain a dispensary at Mylapore at the cost of the municipal funds having now been disallowed by the Government, the question of organising a better management for this institution needs an earnest consideration.

127. *St. Thomas Convent Dispensary*.—The usual monthly grant of Rs. 20 was

* Note.—This explanation has on investigation been found to be incorrect. The Surgeon, 1st District, has been asked to furnish the correct explanation of the decrease.

paid to the St. Thomas Convent Dispensary. The number of patients treated fell from 10,250 to 5,842.

128. *Victoria Caste and Gosha Hospital*.—The annual grant of Rs. 1,000 was paid to this hospital. The number of patients treated was 18,572 against 18,577 in the previous year.

129. *Kalyani Hospital, Mylapore*.—No contribution was paid to this hospital during the year owing to the failure of the Honorary Secretary to the hospital to demand payment before its close. The usual contribution of Rs. 600 has, however, been paid since in the current year. The number of in-patients treated was 390 and that of out-patients 2,432 against 422 and 3,757, respectively, in 1911-12. The Honorary Secretary to the hospital is of opinion that the decrease in the number of patients was due to the opening of the new hospital at Rayapettah.

130. *Sri Kanyaka Parameswari Devasthanam Ayurvedic Dispensary, Georgetown and Venkataramana Dispensary, Mylapore*.—The question of making a contribution of Rs. 500 and Rs. 100, respectively, to these two institutions for the year under report is now under the consideration of Government.

131. The reports of the above institutions except those of St. Thomas Convent Dispensary and Venkataramana Dispensary appear in Appendix IV.

132. *Sembiam Dispensary*.—A sum of Rs. 780 was as usual paid to the District Board of Chingleput, being the moiety of the charges for the upkeep of this dispensary.

133. *Pasteur Institute of South India, Coonoor*.—The annual contribution of Rs. 250 sanctioned in G. O. No. 14 M, dated 15th January 1909, was paid during the year.

134. *Monegar Choultry and Native Infirmary*.—The annual contribution of Rs. 1,500 sanctioned in G. O. No. 646 M., dated 22nd April 1909, was paid towards the maintenance of these institutions.

Vaccination.

135. The total number of cases vaccinated during the year by the Corporation staff, excluding secondary vaccinations, was 26,391 against 32,618 in 1911-12 showing a decrease of 6,227 cases. This decrease was chiefly due to frequent changes among first class vaccinators and to the large decline in the number of re-vaccinations as small-pox was practically non-existent in the City during the year. Of the total number vaccinated, 22,577 cases were successful and 2,623 unsuccessful. In the remaining 1,191 cases, the results could not be verified and are shown as unknown.

136. Including the vaccinations performed in the Penitentiary (790) the total number of primary vaccinations and re-vaccinations in the City was 27,181—15,891 males and 11,290 females—against 38,261 in the previous year showing a decrease of 11,080 cases. The closure of the Natal and Mauritius emigration depots partly accounts for this decrease. Of the total, 23,253 were successful and 2,711 unsuccessful. The remaining 1,217 cases were treated as unknown.

137. Of the 26,391 cases vaccinated by the Corporation staff, 16,542 were vaccinated in the depôts and 9,849 in the divisions. Of the 16,542 cases vaccinated at the depôts, 13,316 were primary and 3,226 re-vaccinations. In the case of the former, notices were given under the by-laws to the parents or guardians to produce the children for verification of results at the depôts and 7,261 cases were so produced against 8,843 in the previous year showing a decrease of 1,582 cases. Prosecutions for non-production were instituted in 60 cases against 35 in the previous year, the fines amounting to Rs. 24 against Rs. 20 in 1911-12. The cases vaccinated outside the depôts were verified in the divisions and operations in these cases were confined as usual to the poorer classes located in paracheries, hutting grounds and kuppams and to the floating population who would not be available for vaccination if compelled to attend the depôts.

138. The total number of cases verified by the inspecting staff was 17,441 against 20,807, in the previous year showing a decrease of 3,366 cases. (Vide statement III in Appendix IV).

139. The percentage of success obtaining in primary and secondary vaccinations and in re-vaccination cases, excluding the unknown from the total, was 95.13 and 61.74 against 97.60 and 58.08 in 1911-12 and against 97.32 and 50.61 in 1910-11. The lymph used in all these cases was the Glycerine lymph obtained from the King Institute.

140. A comparison of the work performed in the several vaccination depôts shows that the largest number of cases vaccinated *viz.*, 5,957 was in the Vepery Depôt. The highest percentage of success 95.55 was obtained in the Egmore Depôt.

141. Out of the 27,181 cases vaccinated (vide paragraph 136) 21,901 were primary against 24,482 in 1911-12 showing a decrease of 2,581 cases. The number of re-vaccinations performed during the year was 5,280 against 13,779 in 1911-12 showing a decrease of 8,499 cases. Of the re-vaccination cases, 4503 were performed by the Corporation staff against 8,315 in the previous year showing a decrease of 3,812 cases. In 346 of these cases, the reward of four annas each sanctioned in G. O. No. 149 M. dated 5th February 1909 was paid. A register is maintained showing the names and addresses of all persons to whom such rewards are paid. The rewards are paid by the Deputy Inspector of Vaccination direct in the presence of the divisional sanitary inspector. The Deputy Inspector of Vaccination submits to the Health Officer within 24 hours of such payments, a list giving the names and addresses of all persons to whom rewards have been paid. A quarterly statement is also submitted to the President for his information.

142. Vaccinations among children under one year numbered 19,178 including 1 in the Penitentiary against 20,814 in the previous year showing a decrease of 1,636 cases. The percentage of success obtained in infantile vaccination, excluding unknown cases from the total, was 95.22 against 97.71 in 1911-12. Of the total number of children vaccinated by the Corporation staff, 10,610 were born in Madras and 8,568 in the mufassal.

143. The total number of births verified was 16,134. Of these 3,899 children died during the year; 2,309 were reported to have been permanently removed

out of the City and 651 were not traceable at the addresses given in the birth counterfoils, thus leaving 9,275 available for vaccination ; and of these, 5,952 were vaccinated. Vaccination was postponed under medical certificates in the case of 99 children ; 1,775 were found sick by the vaccination staff and 1,116 temporarily left the City ; the remaining 333 children were found healthy and warnings have been given for their early vaccination. The system of making enquiries to find out whether children, born in the City and removed out of it before vaccination, were vaccinated outside was continued during the year under report and resulted in the vaccination of a fair number of cases. The results of such cases were noted in the registers.

Hospital Births.—The total number of births in hospitals verified during the year was 2,981. Of these, 563 children died during the year ; 668 were reported to have been permanently removed out of the City and 774 were not traceable at the addresses given in the birth counterfoils, leaving 976 available for vaccination ; 618 of them were vaccinated. Vaccination was postponed under medical certificates in the case of six children, 96 were found sick by the vaccination staff and 230 temporarily left the City ; the remaining 26 children were found healthy and warned for early vaccination. In the 774 untraced cases, the addresses given in the counterfoils were insufficient and further steps have been taken to rectify this.

144. Statement IV of Appendix IV furnishes information as to the number of children born in the City in 1911-12 who were vaccinated before they attained the age of one year.

145. Out of 27,181 cases vaccinated, 1,471 were Europeans, Anglo-Indians, and Indian Christians, 2,398 Muhammadans, 23,126 Hindus and 186 other classes. For every 1,000 of the population according to the Census of 1911, 52.41 were vaccinated. The vaccination of 'other classes' was proportionately larger than that of any other class, the number vaccinated being 10.51 per cent of their population, while the percentage among Hindus was 5.56 ; among Europeans, Anglo-Indians and Indian Christians it was 3.52 and among Muhammadans 4.05.

146. There were 147 attacks and 53 deaths from small-pox during the official year against 590 attacks and 307 deaths in the previous year. Of these attacks, 58 were among children under 12 years of age, of whom 34 were vaccinated in infancy and 24 were not vaccinated ; 15 proved fatal among the vaccinated and 19 among the unvaccinated. The remaining 89 attacks were among persons over 12 years of age. Of these, 80 were vaccinated in infancy and 9 had never been vaccinated ; 16 proved fatal among the vaccinated and 3 among the unvaccinated.

147. A statement of attacks and deaths from small-pox among the vaccinated and the unvaccinated at the various age periods is given at the end of Appendix IV.

148. Information as to the vaccinal condition of small-pox patients admitted into the Corporation hospitals during the year 1912-13 is hereunder furnished as required in G. O. No. 992 Public, dated 21st October 1910.

(1) *Krishnampet Isolation Hospital.*—There were 8 cases remaining on 1st April 1912 ; 44 cases were admitted during the year thus making a total of 52.

Of these, 41 were protected and 11 were unprotected. There was no death among the protected cases, while there was one death among the unprotected.

(2) *Native Infirmary.*—Of the seven cases admitted, five were protected and the rest were unprotected. There was one death among the unprotected cases and none among the protected.

149. The total number of prosecutions instituted during the year under report was 188 against 126 in 1911-12. The total amount of fines imposed was Rs. 114-8-0 against Rs. 78-12-0 in the previous year. In 128 of these cases, prosecution was resorted to for failure to get children vaccinated with the result that 97 of them were subsequently vaccinated. In three cases the children left the town, in six the vaccination was postponed for illness, in seven the parties were warned and discharged, in six the prosecutions were withdrawn, in one case the child died before the case was called for hearing and eight cases were pending before the Court at the close of the last quarter.

150. The amount of fee charged for and obtained for primary vaccination at private residences under by-law 233 was Rs. 74-8-0. The amount was collected and credited to the Corporation.

151. The cost of vaccination was Rs. 11,625-0-9 against Rs. 11,726-9-3 in the previous year showing a decrease of Rs. 101-8-6. If the amount realised by vaccination at private residences is deducted, the net expenditure amounts to Rs. 11,550-8-9 against Rs. 11,630-1-3 in 1911-12. The net cost of each successful case of vaccination was annas eight and pie one against annas six and pies eleven in the previous year. The smaller outturn of work by the vaccination staff in consequence of the fewer number of re-vaccinations during the year explains the rise in the net cost.

152. The standard statements of vaccination I and II are given in Appendix IV as required in G. O. No. 82, dated 25th January 1897, paragraph 3.

153. The results under vaccination cannot be said to have been altogether satisfactory. The vaccination staff will soon be re-organised by the appointment of sub-assistant surgeons as vaccinators and it may be hoped that a marked advance will be shown in the current year under this branch of the administration.

The new by-laws which it is now proposed to issue to facilitate the tracing of unprotected children by requiring the parents, guardians or chief occupiers of the houses in which such children may live to report cases may also secure a satisfactory progress in this direction.

Vital Statistics.

FOR THE CALENDAR YEAR 1912.

154. The statistics for 1912 are given below :—

Area of the City	27 sq. miles or 17,280 acres.
Census population of 1911	518,660
Average density.	30.0 per acre.
7 to 9 divisions density.	135.3 do.
14 to 15 do.	9.6 do.
Inhabited houses.	59,595

Number of persons per house.	9
Births.	20,773 including still births against 20,400 in 1911
Deaths.	20,132 against 21,771 in 1911.
Infantile mortality.	280.0 deaths per 1000 infants born alive in the year against 305.4 in 1911.
Estimated population for the middle of the year 1912.	519,824.

Births.

155. The number of births registered in 1912 exclusive of the still-born, was 20,099 or 364 more than in the previous year. The ratio calculated on the Census population of 1911 was 38.8 per mille per annum against 38.3 in 1911. The mean ratio of births for the previous five years was 37.7. The birth ratio calculated on the estimated population was 38.7.

156. *Illegitimate Births.*—1025 illegitimate births were registered during the year against 1,132 in the previous year.

157. *Sex.*—Of the number of children born 10,403 were males and 9,696 females, the proportion of the male to 100 female births being 107.3.

158. *Still-births.*—The number of still-births recorded during the year was 674 against 665 in the previous year and the percentage to the children born alive was 3.4.

159. *Births in the public hospitals.*—The number of births returned in the Government Maternity Hospital was 1,778, in Raja Sir Ramaswami Mudaliyar's Maternity Hospital 676, in the Victoria Caste and Gosha Hospital 728, in the Medical Mission Hospital 83, and in the Kalyani Hospital 110 thus making a total of 3,375 births against 3,532 in 1911. This was 16.8 per cent. of the total births in the City.

160. *Classes.*—Muhammadans returned the highest birth-rate of 43.5 per mille, the next highest 38.9 being among Hindus. Anglo-Indians returned 38.0, Indian Christians 33.2, Europeans 13.6 and others 2.3.

Deaths.

161. *Mortality.*—The registered deaths exclusive of still-births numbered 20,132 against 21,771 in the previous year, the average of the previous five years being 20,872. The ratio of deaths during the year under report calculated on the Census population of 1911 was 38.8 per mille against 42.0 in the previous year and the mean ratio of the previous five years was 40.2. The death ratio calculated on the estimated population was 38.7.

162. Table No. XVIII of Appendix V, which compares the deaths from principal diseases shows that the general mortality was less than the average of the previous four years.

163. *Sex.*—The deaths among males numbered 10,164 and among females 9,968; the proportion being 102.0 males to every 100 females.

164. *Class.*—The number of deaths registered among Europeans was 60, Anglo-Indians 323, Indian Christians 800, Hindus 16,404, Muhammadans 2,543 and others 2, the ratio being 14.3, 13.3, 29.3, 39.4, 43.0 and 1.1 respectively.

165. *Divisions.*—The 2nd division (old first division Centre ward) has been recording the highest death-rate in the City during the last 19 years and it is unquestionably the most insanitary division in the City.

166. *Age.*—Mortality among infants under one year of age was as usual the heaviest. The next heaviest was among adults of 60 years and upwards.

167. *Infantile Mortality.*—Deaths of infants under one year of age numbered 5,628 compared with 6,027 in the previous year. The ratio of deaths among infants under one year of age was 280.0 per 1,000 births compared with 305.4 in 1911. Calculated on the Census infantile population the ratio was 428.5.

168. *The 2nd Division* (old 1st division Centre ward) returned the highest number of deaths among infants under one year of age and the 14th division (old sixth division North ward) returned the lowest.

169. *Certified Deaths.*—The number of deaths certified by qualified medical men was 2,220 which equals 11.0 per cent. of the total number of deaths in the City. Of these 762 were certified by private medical practitioners and 1,458 by public hospitals.

170. *Cholera.*—Cholera was epidemic from the beginning of the year to 9th March 1912 and again from 18th August to 19th October 1912 except a week in the beginning of the latter month. Out of 478 cases reported during the year 374 proved fatal yielding a ratio of 0.7 per mille of the population. The mean ratio for the previous quinquennium was 1.1.

171. *Small-pox.*—The number of attacks in 1912 was 247 of which 106 proved fatal. The death rate was 0.2 per mille. The highest number of deaths in any one month was 25 which occurred in January and the next highest was 21 in March. The number of deaths in the previous year was 480. The mean ratio for the previous five years was 0.3. Small-pox was epidemic from the beginning of the year to 11th May 1912.

172. *Measles.*—The deaths registered from this cause numbered 95 or 75 less than in 1911. The ratio was 0.2 per mille or the same as the average ratio for the quinquennium. Measles prevailed concurrently with small-pox recording the highest number of deaths in the months of March and May, viz., 13 deaths in each month.

173. *Plague.*—There was only one death from plague against three in the previous year. It was an imported case.

174. *Kala-Azar.*—The number of deaths registered from Kala-Azar fell from 47 to 36. The cases reported are only those seen by medical men.

175. *Enteric Fever.*—The number of deaths from this disease was 42 or 10 less than in 1911 giving a ratio of 0.08 per mille. The mean ratio for the previous five years was also 0.08.

176. *Malaria.*—This disease claimed 2,934 victims against 2,884 in 1911 giving a ratio of 5.7 per mille. The average number of deaths in the previous five years was 2,634 or 5.0 per mille.

177. *Cerebro-Spinal Fever.*—There is every reason for believing that this deadly fever is prevalent in Madras at certain seasons of the year, but for the most part undiagnosed. Twenty-nine cases were returned during the year under this head and were distributed as follows :—

Royapettah Hospital	...	1
Monegar Choultry	...	2
General Hospital	...	1
Fiji Emigration Depot	...	20
Private practitioners	...	5
Total	...	29

178. *Other fevers, i.e., all fevers other than Enteric and Malaria.*—The number of deaths registered under this head was 957 against 1,111 in the previous year the ratio being 1.8 per mille. The mean ratio for the previous five years was 3.6.

179. *Dysentery and Diarrhœa.*—The number of deaths from these causes was 4,897 or 43 more than in 1911 and 721 more than the average of the previous five years.

180. *Tubercle including tubercle of the lung.*—The deaths returned under this head numbered 672 or 88 less than in the previous year. The death rate was 1.3 per mille.

181. *Respiratory diseases excluding tubercle of the lung.*—The number of deaths registered as due to this cause was 1,999 or 252 less than in 1911 and 494 more than the average of the previous five years.

182. During the year four prosecutions were instituted for failing to register births within the time allowed by the Act and nine prosecutions were instituted for failing to report deaths. Convictions were obtained in nine cases and one case is pending. In the remaining three cases the parties were let off with a warning. The fines imposed amounted to Rs. 8-8-0.

183. The number of applications received for extracts of entries from the birth registers was 148 and that for extracts from death registers 295. Birth extracts were granted in 102 cases and death extracts in 221. In 111 cases extracts were not granted as the parties failed to pay the prescribed fees. In nine cases entries were not found and parties were informed accordingly. The fees collected during the year for such extracts amounted to Rs. 456.

Malaria

184. The persistent prevalence of malaria for several years past in the northern divisions of the City came under special examination during the year and

in G.O. No. 243 M., dated 8th February 1913, a scheme for an investigation into the causes thereof was approved by Government. The main features of this scheme were that three new dispensaries were started in February 1913 for the treatment of malarial patients and distribution of quinine in Rayapuram, Washer-manpet and Tondiarpet, side by side with an active investigation by an expert medical officer into the causes of the prevalence of the disease. The provision of special medical relief in these dispensaries was much appreciated by the local residents, the average daily attendance thereat in February and March having been 290. The investigation showed that the widespread prevalence of the disease in an almost epidemic form was due to the existence of the fever-carrying anopheles mosquitos in many of the tanks, pools and wells in Tondiarpet. The carriers prominently noticed were Ludlowi, Fuliginosus, Jamesii, Barbirostris, Stephensi and Listoni. Adult anopheles mosquitos were caught from many infected houses and some of these were found on dissection to be carrying the malarial parasites in their mid-guts. Most of the waters examined made it manifest that they shelter the larvæ under the dead leaves, decaying vegetable matter or weeds. No such larvæ were however found to breed in any portion of the Tondiarpet Sewage farm.

185. The first essential step towards combating this disease was taken by instructing the public by the issue of pamphlets "Lesson on Malaria" and other leaflets to keep their premises, ponds and wells free from mosquitoes. Notices were also issued to property owners to have their tanks cleaned and trimmed and their wells protected by the provision of wire-gauze and pumps. All the cess-pits, pools and wells were regularly petrolised, as a temporary measure. The desirability of stocking the tanks and wells with larvicidal fish was repeatedly pressed on the attention of their owners. The total expenditure incurred on anti-malarial measures in February and March 1913 was Rs. 1,420-14-8.

186. The following statement shows the number of notices issued and disposed of in the first three divisions of the City in connection with malaria during the last two months of the year.

Section.	Purpose.	Number of notices served.	Number voluntarily complied with.	Number prosecuted.	No. complied with after prosecution.	No. pending.
302	Cleaning insanitary tanks, wells, etc.	185	15	57	5	108
306	Removal of filth or noxious vegetation.	36	20	14	2	...

Plague Measures.

187. The plague operations continued to be administered by the Assistant Health officers under the supervision of the Health officer. The passport station at Chetput, which was opened on 1st November 1910, owing to outbreak of plague in the Madura District, was abolished on the 16th May 1912 (vide G. O. No. 349 P., dated the 11th May 1912).

There were no indigenous cases of plague in the City. There was only one fatal suspicious imported case.

188. *Passport administration*.—During the year 1,32,558 passports were issued at Basin Bridge, Perambore, Ponneri and Chetput of which 98,650 passports related to the City and 33,908 to the mofussil. At the Madras Harbour 1,165 City and 654 mofussil passports were issued. Out of 99,815 city passportees 1,354 or 1.357 could not be traced as against 741 or 0.942 per cent in the previous year. The number of mofussil passports dealt with by the city staff was 2,515 of which 45 or 1.789 were not traceable as against 15 or 0.874 in 1911-12. The number of prosecutions instituted and convictions obtained for infringing the plague regulations during the year was 30 and 24 respectively as against 44 and 33 in the previous year.

189. The Port Health Officer reports as follows :—

"209 outgoing vessels carrying 22,082 persons as crews and 39,332 as passengers were inspected during the year and granted Bills of Health. Besides these there were 168 incoming vessels, arrivals from plague-infected Ports and carrying 17,760 persons as crews and 52,019 as passengers for Madras. The bedding and effects of deck passengers and native crews embarking at this Port for places out of India were disinfected prior to embarkation as were also the effects of deck passengers and native crews from plague infected ports who disembarked here. Two cases of small-pox and one case of measles were removed from vessels calling at this Port. They were sent to the Isolation Hospital at Krishnampet."

190. The destruction of rats continued during the year under a special officer. The number of rats destroyed during the year was 1,42,071 thus bringing the total destroyed since the beginning of the operations to 1,618,549. The Plague Research Commission continued its labours during the year and the results have not been published yet.

Conservancy.

191. The improved system of cleaning the side drains continued to be conducted as an experimental measure in the 17th Division during the year and some additional changes were also introduced, *e. g.*, (1) The rubbish carts now make three trips a day, two in the forenoon and one in the afternoon. In the forenoon, the carts in the first trip remove combustible rubbish and in the second the incombustibles. In the afternoon, both combustibles and incombustible rubbish are removed, the one being deposited in the front and the other on the back of the cart. This system greatly helps screening operations at the incinerators. (2) The special covered silt bins introduced in the division for the immediate deposit of silt from the side drains have been accepted without objection. The silt, as the drain cooly removes from the drains, is deposited into these special silt bins and then removed by means of box-carts. With these improvements the system has worked well; the desirability of extending it to the other portions of the City is still under consideration though, in practice, the same system is followed in all other divisions with the usual complement of coolies and carts assigned for each of them.

192. *Incinerators*.—During the year under report five more incinerators were constructed at the cost of the Corporation, of which one was a dome incinerator. It is so constructed that it can be placed near even dwelling houses without fear of fire or smoke nuisance. Night soil too can be disposed of by means of this dome incinerator in small quantities.

During the year 20,70,508 cubic feet of land have been re-claimed with ashes and screened earth from the incinerators—large and small. The reclamation works on private lands undertaken during the previous year have all been completed. Some more works were taken up during the year under report and these are marked with an asterisk in the statement showing the works. The cost of reclamation work done during the year under review is estimated at Rs. 10,870-4-10.

193. *Conservancy bullocks and depots*.—All the eight conservancy bullock depôts were run by the Department as in the previous year. One hundred and thirty-six bullocks at a total cost of Rs. 10,961-4-0 were purchased during the year. This number includes the bullocks purchased for the Engineering Department for road washing and sweeping purposes and also for the Corporation Grass Farm at Tondiarpet. The number of bullocks on the 1st April 1912 was 1,261, of which 29 died during the year and 53 were sold as unserviceable. The number on 31st March 1913 was 1,315. The number of deaths and sales among the conservancy bullocks during the year 1911-12 was 52 and 150 respectively.

194. *Maintenance of bullocks*.—The total expenditure under this head during the year including the amount debited to Grant I—repairs—drainage, was Rs. 1,88,219-7-1 against an estimate of Rs. 2,04,150-0-0 and Rs. 1,71,409-1-6 in the previous year. The decrease as compared with the revised estimate was due to (a) stoppages on account of absence among drivers and (b) fines. Temporary drivers were employed on daily wages in the place of absentees and thus the conservancy work was carried on without complaint except when a shortage of labour occurred.

195. The amount expended on labour employed for conserving the streets and public latrines was Rs. 37,734-0-11 against an estimate of Rs. 40,500 and against Rs. 38,275-11-0 in the year 1911-12, the decrease being due to the same cause as mentioned above.

196. *Health of bullocks*.—(a) *Foot and mouth disease*. This disease first broke out during the year in the conservancy bullock depot of the North Range and continued up to January 1913. As soon as the disease made its appearance, an isolation camp was opened in the north-western corner of People's Park, where the contacts were isolated and kept under treatment. The antiseptic foot-baths, to which reference was made in the previous year's report, proved very valuable in arresting the further spread of the contagion so much so that, though the disease was prevalent for about six months and so many as 392 bullocks had been attacked, no case proved fatal.

(b) *Anthrax*.—The bullocks were not free from anthrax either. There were eight cases one in (A) Cochrane Depôt, four in (D) Choolai Depôt and three in (E) Harris Road Depôt. Immediate measures were adopted to stamp it out and they proved effective.

The health of the bullocks during the year was otherwise excellent, as can be noticed from the smaller number of deaths during the year as compared with the previous year.

197. *Improvements to conservancy bullock depôts*.—An additional shed for twelve pairs of bullocks was constructed at Monegar Choultry Depôt with a view to relieve congestion in the cattle sheds. Two sheds were constructed in Monegar

Choultry and Basin Bridge Depôts respectively, for the immediate segregation of bullocks suffering from suspicious and contagious diseases. The one in Basin Bridge Depôt is not completed yet. Six gram sheds, in six of the depôts, were constructed. These have reduced very much the supervision that was formerly required when the soaking tubs were in use. The shed further facilitates the safe custody of gram, etc., and the simultaneous feeding of all the bullocks without confusion.

198. 1,23,180 cubic feet of low lands and pits in the several depôts were reclaimed with ashes and screened earth from the incinerators.

199. *Provision for receptacles for rubbish, etc.*—Seven hundred and fifty-nine corrugated iron dust bins large and small including 42 bins manufactured in 1911-12 and distributed during 1912-13 and 85 fly proof rubbish bins were additionally provided during the year. The new fly proof bins have been much appreciated and introduced in almost all the divisions.

Forty-one new cylindrical carts were manufactured and distributed. These have air-tight valves and are used for the removal of night soil and liquid silt. This is an improvement on the old pattern iron night soil and wooden box carts. The introduction of these carts for the removal of night soil has stopped complaints as to stinking and night-soil spitting while the carts pass along the roads. This system has worked satisfactorily for the last six months and it is under consideration to replace all night-soil carts by these new carts.

200. *Notices and Prosecutions.*—During the year 2,108 prosecutions were instituted of which 1,543 were convicted by the Magistrate.

306 notices were served during the year under review of which 299 were complied with.

201. *Private Scavenging.*—The amount realised by the supply of carts and coolies to private parties under Sections 294 (b) and 295 of the Act was Rs. 6,993-15-2 against an estimate of Rs. 6,500 and against Rs. 6,649-0-1 in the previous year. The increase was due to the municipal service having been availed of in a larger number of cases.

The expenditure under this head was Rs. 2,131-4-0 against an estimate of Rs. 2,360-0-0 and against Rs. 1,818-1-5 in the year 1911-12.

202. *Conservancy Improvements.*—

(1) *Night-soil conservancy of 16th or Chintadripet division.*—The system of removing night-soil by hand carts and boats in this division was abolished in May last and the work is now carried on by means of ten night-soil carts. This rendered the wharf no longer necessary and the long standing public nuisance in this locality has now been completely removed.

(2) *Night-soil conservancy of the Penitentiary.*—The night-soil, etc., accumulating in the Penitentiary premises is removed to Korukupet trenching ground by means of boats through the Cooum and Buckingham Canal. The improvements introduced in Chintadripet might with equal advantage be introduced here and the matter is under correspondence with the Penitentiary authorities.

203. *Sweeping of horse and cow dung from roads.*—It was stated in paragraph 255 of the previous year's report that a special staff was engaged for the purpose

of removing cow and horse dung from the Mount Road, as an experimental measure. The result of the experiment was satisfactory and the system was extended to the following roads:—From Wallajah Bridge to Kodambaukam High Road, Benfield Road, Broadway, North Beach Road, Esplanade Road, China Bazaar Road, Irusappa Maistri Road, Evening Bazaar Road, Poonamallee High Road up to Tramway Power Station and Mint Street from General Hospital to Old Jail Street.

204. *Ice House Road Night soil Pail Depot.*—This depôt is working satisfactorily and all the night-soil collected in 17 to 20 divisions except that removed by night conservancy carts is disposed of in this depôt, the number of cart loads thus disposed of amounting to about 50 a day. During the year under report 21,186 cart loads of night soil was brought to the Pail Depôt for disposal and 1,710 cart loads of silt, etc., obtained during the process of liquifaction of night-soil were collected and sent to Mylapore wharf for disposal. But as the staff was not sufficient to cope with this increased work, it was strengthened and adjusted among the three night-soil stations—the Pail Depôt, Krishnampet wharf and Mylapore wharf. This readjustment of the staff led to a saving of Rs. 720 per annum. Saving was also anticipated from reducing the number of carts, but this reduction has been held in abeyance in view of the difficulties in the working of the depôt during rains. It is under consideration to introduce such depôts in convenient centres throughout the City.

205. *Sanitation of Beach opposite to the High Court Battery.*—This portion of the beach served the same purpose as Marina in Chepauk. The residents of Georgetown resort to this spot in the evenings to enjoy the sea-breeze. Complaints were received about the insanitary condition of this locality. On inspection it was found that the place was more or less used as open latrines by the coolies of contractors employed within the port limits for such works as oil installation etc. Immediate steps were taken to put an end to this nuisance and the beach is now kept in a fairly clean condition.

206. *Trenching Grounds.* (1) *Korukupet Trenching Ground, North Range.*—The old system of dumping night-soil in Manally and selling the manure raw was replaced by trenching since the year 1909. The old rubbish depôt in Korukupet which has been levelled and prepared specially for the purpose and which covers an area of nearly nineteen acres is the ground now used for trenching. The ground is divided into a number of plots which are taken up in turn and trenched. The whole of the night-soil removed from the first nine municipal divisions which averages to about 200 cart loads a day, and the whole of the night-soil from the Fort and the Penitentiary are disposed of in this trenching ground. The staff employed for the trenching ground consists of a Superintendent, a peon and 43 coolies—29 males and 14 females. On an average nine trenches 30' long 3½' broad and 2' deep are used up every day. The right of removing manure from this trenching ground is given out on contract and the amount realized during the past year was Rs. 4,650. Only manure from trenches over six months old is allowed to be removed. The ground, large as it is, is barely sufficient for the proper disposal of the whole volume of the night-soil received into it. It is proposed to open another ground in Manally about half a mile further from the present ground. The staff has also to be increased as the present strength is found to be insufficient.

(2) *Trenching grounds, South Range.*—There are in the South Range three trenching grounds, the Brick Kiln Road, the Mylapore and Sterling Road Depôts. Of these, the last covers an area of six cawnies and five grounds and is divided into eighteen plots each comprising twenty trenches. The night-soil taken by the ten conservancy carts of the 15th division is trenched in this depôt daily. During the year under review 200 trenches were used and manure from 365 trenches, over six months old, was removed by the contractor. This depôt, situated, as it is on the outskirts of the City limits, worked satisfactorily and no complaints were received against it.

The trenching ground on the Brick Kiln Road covers an area of nine cawnies and is divided into eleven plots, each comprising 175 trenches. The whole night-soil removed from the 10th to the 14th division, both inclusive, and the 16th division amounting to about 129 cart loads a day are disposed of in this trenching ground. During the year nine plots were used and the manure from 720 trenches over six months old was removed by the contractor. The amount realized during the year by sale of manure from this trenching ground and the Sterling Road trenching ground was Rs. 2,375. This ground is not favourably situated. It is in the midst of habitations. To the south and south-west of the ground are European quarters, while to its north and east are hutting grounds, Oobrapalayam, etc. Complaints were frequently lodged in consequence of the stench emanating therefrom; but the nuisance was minimised as far as possible by the use of dry earth and disinfectants in the trenches.

The Mylapore trenching ground covers an area of nine cawnies and is divided into 24 plots each comprising 35 trenches. This ground is not now largely used since the introduction of the Ice House Road Flushing Depôt. During the year seven plots were opened and manure from 520 trenches over six months old was removed by the contractor, the amount realized therefrom being Rs. 900.

During the rainy season considerable difficulty is experienced in taking the carts to the trenching place. The trenches are often filled with water and it is difficult to get enough dry earth for covering the trenches after they are loaded. The carrying out of the proposal of the Special Engineer to introduce more pail depôts throughout the City will, it is hoped, obviate much of the nuisance resulting from trenching system.

Sanitation.

207. The provisions of the Act relating to the construction of and repairs to latrines were as usual rigorously enforced during the year. The number of notices issued under Sections 224 and 227 was 447 and 279, respectively, against 321 and 259 in the previous year.

208. Sections 301 to 309.—These sections relating to the treatment of insanitary tanks, wells, low lying lands and overcrowded buildings received as usual sustained attention. The number of notices issued thereunder was 5,952 against 3,390 in the previous year. More attention was paid to the working of Sections 301, 302, 307 and 308 than in the previous year. Hutting grounds and paracheries were improved and congested localities were opened up; improvement of the Rope Godown paracheri in the second division, opening of a new lane in Mangammal hutting ground in the seventh division and the formation of a new street next to

the Connemara Market in the thirteenth division may be cited as the chief instances in point under this head

209. Section 311.—The prohibition of fishing in the Cooum river was strictly enforced during the year and 86 prosecutions were launched against people who continued to fish.

210. Cattle yards continued to demand a vigilant supervision. The question of removing all the cattle yards from their present places to public yards located in convenient centres has been engaging the attention of the department and steps are under consideration for providing such yards. An elaborate survey of all the cattle yards in the City and the conditions of milk supply obtaining at present is now in progress. Special efforts taken in previous years to keep bakeries and aerated water factories under effective sanitary control were sustained throughout the year and the system of requiring labels to be put on bottles of aerated waters and medical certificates for employes in bakeries has had a wholesome effect.

211. *Food and Drugs*.—The long list of damaged articles destroyed by the Food Inspector during the year, printed in Appendix II, Table No. 22, demonstrates that the control exercised over the sale of food and drugs was satisfactory. The appointment of another Food Inspector sanctioned during the current year will ensure a further advance in this direction. Places intended for the manufacture and sale of articles of food and drink, lodging houses and eating houses were regularly inspected during the year by the assistant health officers and steps were taken then and there to remedy the defects found therein and to prevent sale of unwholesome articles of food and drink. The pernicious system of selling articles of food over side-drains was prevented by freely resorting to prosecutions and securing convictions.

The Custom House and the Railway authorities have as usual been affording facilities for the examination of food supplies brought into the City by their agencies. The chief articles of consumption, such as rice, pulses, ghee, vegetable oils, dairy products, tinned goods, aerated waters, bread, sweetmeats, vegetables and fish claimed the careful attention and inspection of the Food Inspector at their respective places of storage or sale.

212. *Infectious diseases*.—The Isolation Hospital at Krishnampet and the Plague Hospital at Egmore maintained by the Corporation continued to do useful work during the year. The necessity for an Isolation Hospital to suit the needs of the whole City has long been felt and steps are being taken to acquire a site at Aminjikarai for this purpose. But the plans and estimates for the hospital have not yet been approved by the Sanitary Board and the Government, and it is hoped that they will be sanctioned as early as possible.

Watering Roads.

213. The improved watering arrangements referred to in para 265 of the report for 1911-12 were continued and another watering cart was manufactured in the municipal workshop on the same model as the English water cart. These measures as well as tarring of roads have helped to minimise the dust nuisance.

Grant IV.—(Miscellaneous Municipal purposes).

Lighting.

214. The cost of maintenance during the year was Rs. 76,147 as against Rs. 73,921 in the previous year. The contractors' bills amounted to Rs. 76,528 out of which Rs. 381 was deducted for fines imposed.

215. There were 5,941 oil lamps at the beginning of the year, to which 79 were added and 251 were removed leaving 5,769 at the end of the year. In addition to these, 53 power lights were maintained at the beginning of the year out of which five were removed during the year, leaving 48 lights at the end of the year.

216. There were 224 electric incandescent lights at the beginning of the year to which 36 lights in Mount Road and Marina, 192 lights in important streets and junctions of roads were added, making a total of 452 lights at the end of the year. The lighting of the abovesaid lamps was for the first eight months inspected by the two lighting inspectors on Rs. 60 each, but subsequently the appointments were split into three on Rs. 30-1-40 each. Each lamp was inspected on an average 47 times during the year.

Avenues.

217. The actual number of avenue trees at the end of the year was 15,680 as against 14,690 at the end of 1911-12, of which 2,831 required to be watered. Mr. Houghton, the Honorary Arborist, continued as before to superintend the planting and care of avenue trees and roadside gardens. Their flourishing condition is due to his untiring efforts and enthusiasm for which he deserves great credit.

Public Parks.

218. *People's Park*.—(1) The following contracts were let out during the year under review :—

Receipts.

(a) Menagerie collections at Rs. 410-15-11 per month or Rs. 4,931-15-0 for the year against Rs. 4,624 in the previous year.

(b) The right of reaping the produce of the productive trees in the People's Park, for one year from 1st April 1912 to 31st March 1913, for Rs. 26 against Rs. 25 in the previous year.

(c) The right of keeping bazaar for selling aerated waters and sundry articles of food at the entrance to and inside the menagerie enclosure in the People's Park, for three years ending 31st March 1915, at Rs. 50 per annum, against Rs. 41 in the previous year.

Charges.

(d) For supplying meat &c. for animals and birds—

Goats' meat	@ 7 lbs. per rupee.
Mutton	" 7 " "
Beef	" 8 $\frac{1}{4}$ " "
Kid or duck	" 8 annas each.

(e) Provisions at Rs. 456-0-8 per mensem approximately.

(2) The saleable value of the live-stock amounts to Rs. 12,613.

(3) The following animals and birds were presented during the year :—

1 Tiger, by the Rajah of Ettiyapuram.

1 Roselett (parrot) and } by Major Elwes, I. M. S.
1 Australian sheep

2 Brown monkeys by Risaldar Major Hari Singh.

1 Toddy cat and } by M. R. Ry. Thiruvengadathan Chettiyar.
2 Civet cats

1 Dwarf deer by M. R. Ry. Diwan Bahadur M. O. Parthasaradhi Aiyangar.

1 Buck deer by M. R. Ry. Lodd Govindoss.

2 Lion tailed monkeys, } by J. R. Henderson, Esq.,
2 Bonnet monkeys, and } Superintendent, Government Museum,
1 Madras langur } Madras.

The receipts of the Park, including the Government grant of Rs. 2,000 for the zoological collections, rose from Rs. 7,724-9-0 to Rs. 9,362-8-5. The expenditure amounted to Rs. 23,539 against Rs. 22,162.

219. *Napier Park*.—The right of grazing cattle was leased for Rs. 77 for one year from 1st August 1912 to 31st July 1913.

220. *Robinson Park*.—The receipts and charges of this park amounted to Rs. 450-0-3 and Rs. 10,114-7-7 respectively, against Rs. 3,237-1-11 and Rs. 4,878-14-8 in the previous year. The fall in the receipts was due to the stoppage of sewage to grass beds. The increase in the charges was due to the installation of an oil engine, sinking wells and constructing a reservoir, store-room &c.

221. *Loane Square*.—The square was as usual resorted to by the public as a convenient recreation ground.

The details of the receipts and charges of the above four parks appear in Appendix II, Tables 25-28.

Band.

222. The Band of the Madras Volunteer Guards played as usual twice a week at the Marina and four times a month in the People's Park. The Madras and Southern Mahratta Railway Rifles who played at Robinson Park, Loane Square and the High Court compound up to the end of November having expressed their inability to continue the performances further, the services of the Madras Volunteer Guards were secured for these three places also on payment of a remuneration of Rs. 20 a day with an extra fee of Rs. 5 to cover their conveyance expenses. Since the commencement of the current official year arrangements have been made to play the Band once a month in the Island ground in the People's Park to afford some merriment to the animals kept in captivity in the menagerie and also to secure a higher tender for the right of collecting fees for admission into the enclosure for these animals.

Fire.

223. The total cost of maintenance of the steam, motor and manual fire engines was Rs. 13,263 as against Rs. 8,304 in the previous year. The increase is due to the maintenance of the motor fire engine, which was received only on 15th March 1912 and used by the Corporation for the first time during the year. The engines continued to be worked as in former years by the City Police. They were requisitioned for 24 fires. The motor fire engine was found satisfactory in all the work it was called upon to do.

Other Charges.

224. *Contribution to Provincial Funds.*—As usual, a sum of Rs. 50,000 was paid to Provincial Funds with reference to G.O. No. 585 M, dated 25th March 1882.

225. *Lethal Chambers.*—The two chambers at Krishnampet and Basin Road maintained by the Corporation continued to work during the year. An innovation of a minor character was introduced during the year by way of substituting hydro-carbon for carbonic acid gas for killing the dogs. The experiment was found to be equally efficacious at comparatively less cost than carbonic acid gas and it is now continued. The total number of dogs destroyed during the year in

(i) Krishnampet was	...	...	4,508	and in
(ii) Basin Road	„	..	3,140	

and the income realised by way of recovery of feeding charges of dogs and from sale of dogs' skins—which had not been found possible during the major portion of the year, until in January 1913 Messrs. Chambers & Co., undertook to purchase skins of healthy dogs and pups at one anna nine pies each—amounted to Rs. 386-4-0.

226. *Public ceremonies.*—Two addresses were presented during the year—one to H. E. Lord Pentland on his arrival in Madras and the other a farewell address to H. E. the Right Hon. Baron Carmichael of Skirling.

Grant V.—(Supervision and management).

227. The expenditure under this head amounted to Rs. 1,50,416-2-8 and was 3.36 per cent. of the total receipts of the year. The portion of this sum spent on the establishment maintained for the purpose of assessment and collection amounted to Rs. 79,980-0-2 or 1.79 per cent of the total receipts.

Repayment of Debt.

228. The opening balance of the Sinking Fund account appertaining to the several loans of the Corporation, exclusive of the Government instalment loans of sixteen lakhs, was Rs. 23,15,000 held in the shape of Government Promissory Notes and Madras Municipal Debentures, with a minus cash balance of Rs. 12,431-6-3. During the year under report, an allotment of Rs. 95,531-15-7 was made to this fund from the general revenues, Rs. 39,398-5-8 were derived as interest on prior investments made to the fund and Rs. 8,346-7-11 were realised by the sale of Government Promissory Notes of the face value of Rs. 8,600 relating to the repayment of the two open market loans of 1882. The net receipts of the year on

account of the sinking fund after making good the deficit in the opening cash balance thus amounted to Rs. 1,30,845;6-11. Out of this sum, Government Promissory Notes and Madras Municipal Debentures of the face value of Rs. 1,30,100 were purchased at a cost of Rs. 1,28,964;14-10 and Rs. 500 of the water supply extension loan of 1882 were repaid during the year. The aggregate investments at the close of the year to the credit of this fund stood at Rs. 24,36,500 with a cash balance of Rs. 1,380-8-1. Payments amounting to Rs. 92,277-6-8 were also made during the year towards the Government instalment loans. Out of these payments, a sum of Rs. 33,154-8-3 was appropriated by the Accountant-General towards the repayment of the loans and Rs. 59,122-14-5 towards interest.

Refund of other than Current Collections.

229. The total amount refunded during the year was Rs. 41,642-14-0 against an estimate of Rs. 45,000. The details of the refund are given in Appendix I, Table No. 4.

No. II Account.

230. This account which exhibits the transactions relating to the Corporation Stores and Workshop, the payments made on account of the sinking fund for loans raised in the open market, the security deposits of the Corporation servants and contractors, &c., opened with a balance of Rs. 14,47,600-14-10. The receipts during the year amounted to Rs. 7,42,062-5-9 and the expenditure to Rs. 6,32,937-14-10 leaving a balance of Rs. 15,56,725-5-9 at the close of the year.

Workshop.

231. The total value of works turned out in the Workshop during the year under report was Rs. 1,42,195-15-4 (*vide* Appendix II, Table No. 30) against Rs. 1,20,483-3-4 in 1911-12. The amount earned in the shape of supervision charges was Rs. 20,695-12-4 against Rs. 18,120-8-9 in 1911-12.

232. The expenditure on account of wages of maistries and contingent charges amounted to Rs. 13,992-0-3 or 9.84 per cent. on the value of works turned out against 10.90 per cent. in the previous year. The cost of establishment including allowances amounted to Rs. 11,432-6-2. The total expenditure exceeded the receipts by Rs. 4,728-10-1. The excess represents 3.32 per cent. of the value of the works.

CORPORATION OF MADRAS }
23rd July 1913.

P. L. MOORE,
President.

STATEMENT I.—Revenues and Receipts of the Municipal Fund of the City of Madras during the Official year 1912-13.

Items.	Actuals, 1912-1913		Budget Estimate for 1912-1913.	Revised Estimate for 1912-1913.	Actuals, 1911-1912.	Explanation of variations between the Actuals and the Revised Estimate of 1912-1913.
	Details of Minor Heads.	Totals of Major Heads.				
I.	2	3	4	5	6	7
1 Opening Balance—						
(a) General Fund	Rs. A. P.	Rs.	Rs. A. P.	Rs. A. P.	Rs. A. P.	
(b) Water and Drainage Fund	9,50,337 8 2		4,00,320 0 0	9,30,340 0 0	8,30,114 15 4	
(c) Lighting Fund	8,94,413 4 4		6,67,330 0 0	8,94,410 0 0	12,73,002 13 6	
	1,089 0 8		...	1,700 0 0	...	
Total	18,45,850 12 6	18,45,850 12 6	10,67,650 0 0	19,25,050 0 0	21,03,117 12 10	
2 Municipal Rates and Taxes—						
(a) Tax on Arts, &c. (Sec. 120)	1,70,555 7 2		1,62,000 0 0	1,65,500 0 0	1,64,054 3 8	The increase was due to the current demand having been greater than what was anticipated and to better collection.
(b) Tax on Buildings and Lands (Sec. 129)	7,97,230 0 10		8,04,500 0 0	8,27,230 0 0	7,78,893 1 9	The decrease was due to the non-payment by Government of the increased taxes on Government Civil and Military buildings pending the settlement of the assessments by a Committee appointed for the purpose.
(c) Tax on Lands (Sec. 141)	8,906 2 11		8,950 0 0	8,610 0 0	8,881 6 3	The decrease was due partly to the non-payment of taxes by Madras and Southern Railway and Government within the year and partly to the difficulty experienced in collecting the taxes departmentally.
(d) Water and Drainage Tax on Buildings and Lands (Sec. 145)	3,18,100 11 7		5,22,390 0 0	6,37,630 0 0	5,06,076 11 2	Vide explanation against tax on buildings and lands.
(e) Lighting Tax on Buildings and Lands (Sec. 146)	3,614 8 3		3,720 0 0	6,100 0 0	4,309 3 0	Vide explanation against tax on lands.
(f) Lighting Tax on Buildings and Lands (Sec. 148)	89,676 4 10		1,09,670 0 0	1,03,460 0 0	97,397 4 11	Vide explanation against tax on buildings and lands.
(g) Tax on Vehicles with springs (Sec. 149)	1,115 0 5		1,130 0 0	1,215 0 0	850 4 5	Vide explanation against tax on lands.
(h) Tax on Animals (Sec. 150)	69,108 12 5		83,200 0 0	66,120 0 0	66,381 8 0	Vide explanation against tax on arts &c.
(i) Tax on Carts and other Vehicles without springs (Sec. 158)	41,230 8 5		40,350 0 0	40,050 0 0	40,997 5 11	The increase was due to better collections.
(j) Tolls on Vehicles and Animals entering Municipal Limits (Sec. 164)	32,411 8 0		31,400 0 0	31,400 0 0	31,768 14 8	Do.
Total	43,127 4 4		53,100 0 0	43,300 0 0	43,526 2 0	The increase was due to penal interest on overdue instalments.
3 Revenue derived from Municipal property and powers apart from Taxation—						
(a) i. Payment for Occupation of Municipal Lands	6,672 3 9		5,850 0 0	6,500 0 0	7,197 0 0	The increase was due to better collections.

(a) ii. Rent of Lands and Buildings	26,162 10 0	22,500 0 0	23,000 0 0	25,599 10 9		The increase was due partly to the revision of the scale of rents charged for lands near Travelyan Basin and in Basin Bridge and Wall Tax Roads and partly to the track rents realised on account of the extension of the Tram lines to Washermanpet and Royapuram. This is an uncertain item.
(b) i. Sale-proceeds of Lands	5,236 3 3	1,000 0 0	5,900 0 0	1,385 15 6		
ii. Explanades, &c., Grazing Rents	2,150 0 6	800 0 0	2,100 0 0	2,855 0 0		
iii. Rent of Cart-stand	4,908 7 6	3,880 0 0	4,300 0 0	3,880 0 0		
iv. Rent of Municipal Wharf	1,600 0 0	1,600 0 0	1,600 0 0	1,600 0 0		
v. Produce of Lands, Gardens &c.,	7,362 8 3	5,430 0 0	6,050 0 0	5,724 9 0		The increase was due to increase under sale of grass, hire of plants, &c.
(1) People's Park	111 5 0	80 0 0	150 0 0	701 4 0		
(2) Napier Park	450 0 3	2,000 0 0	430 0 0	3,237 1 11		The increase was due to the deposit of Rs. 3,000 paid by the late lessee having been adjusted in the year.
(3) Robinson Park	10,276 15 5	65,000 0 0	38,500 0 0	16,215 7 11		This is an uncertain item.
(4) Grass Farm	3,064 15 6	2,500 0 0	1,650 0 0	3,278 2 1		
vi. Sale-proceeds of old materials	10,970 5 1	17,300 0 0	10,200 0 0	17,320 5 4		The increase was due to recoveries for reclamation works.
(c) Conservancy Receipts—	6,993 15 2	5,100 0 0	6,500 0 0	6,619 0 1		The increase was due to supply having been made in a larger number of cases.
Sale of Rubbish	84 9 0	300 0 0	300 0 0	56 2 8		This is an uncertain item. The decrease was due to collections from a less number of patients.
Private Scavenging	3,064 15 6	2,500 0 0	1,650 0 0	3,278 2 1		The increase was due to prompt collections by the staff.
(d) Hospital Receipts	4,723 6 6	4,500 0 0	4,720 0 0	4,553 8 0		
(1) Smithfield Market	31,308 8 8	29,700 0 0	30,500 0 0	31,704 8 3		
(2) Moore Market	80,630 5 5	81,000 0 0	81,000 0 0	82,911 3 11		The decrease was due to meat van collections being an uncertain item.
iii. Income from Dhobykhana	386 4 0	300 0 0	350 0 0	365 1 8		
iv. Income from Lethal Chamber	1,91,078 13 5	1,80,000 0 0	1,85,000 0 0	1,90,635 11 10		The increase was due to larger imports by sea and by railways.
(f) Other Fees—	3,725 0 0	3,700 0 0	3,730 0 0	3,725 0 0		The increase was due to better collections.
i. Import of Timber and Firewood (Sec. 327)	63,276 10 0	63,000 0 0	63,000 0 0	65,073 1 0		
ii. Private Markets (Sec. 344)	468 3 10	200 0 0	350 0 0	720 0 0		This is an uncertain item.
iii. Licences, Registration, &c.	697 8 0	720 0 0	700 0 0	43 12 0		The decrease was due to opening of model schools at the close of the year.
iv. Fees for furnishing extracts of births and deaths	62 5 4	845 0 0	140 0 0	255 5 9		
v. Cart-stand Fees	293 10 7	300 0 0	300 0 0	255 5 9		
vi. School Fees	4,185 2 6	3,500 0 0	4,500 0 0	5,997 11 8		This is an uncertain item.

SPECIAL WORKS DEPARTMENT, DRAINAGE SECTION.

TABLE No. 2.

Statement showing details of Petty works carried out from 1st April 1912 to
31st March 1913.

Note—These do not include Tondiarpet and other Main Drainage Works.

I. Manholes raised to road level and covers fixed—	No.
18" Cast iron manhole covers. "A pattern"	9
Square Manholes	5
II. Lengths of Pipes laid—	Feet
4" Stoneware Pipes for house connections	1170
4" Cast Iron do. do.	9
6" Stoneware do. for sewers	627
9" do do do.	703
III. Houses connected to sewers	No.
	127
IV. Manholes constructed	9
V. Miscellaneous—	
Siphon cisterns built	127
Manhole Ventilators fixed	1
Masonry cisterns built	5
Silt catcher cisterns built	96
Flushing Latrine	1
Do. Manhole	1

STATEMENT IV-G :—Compares the receipts from the License fees levied on import of Timber and Firewood and shows the rise and fall in Imports generally.

Period of Operation.	Articles Imported.	By Sea collected by the Madras Port Trust.	By Madras and S. M. Railway.	By S. I. Railway.	ByBuckling, (North).	ByBuckling, (South).	By Toll Gates collected by the toll farmer.	Total of Columns 3 to 8	Sums with Collecting Agencies at the end of the previous year.	Total of Columns 9 and 10.	Sums with the Collecting Agencies at the end of the year.	Rebunds in the year.	Net column 11 minus columns 12 and 13.

APPENDIX III.

OFFICE OF THE INSPECTOR OF SCHOOLS.

Dis. No. 10M. of 1913

FOURTH CIRCLE, MADRAS,

Dated 16th May 1913.

From

M. R. RY., RAO BAHADUR A. C. PRANATARTIHARA AIYAR AVL., B.A.,
Inspector of Schools, IVth Circle,
MADRAS.

To

THE PRESIDENT,
Municipal Corporation,
MADRAS

Sir,

As desired by the Director of Public Instruction, I have the honour to furnish the report, requested by you in your letter to him R. O. G. D. C. No. 430 dated 3rd April 1913, on the working of the schools aided and maintained by the Madras Corporation during the official year 1912-13.

2. *Number and strength of Corporation schools.*—Three elementary schools were opened by the Corporation during the year, viz., those at Vallabha Agraharam (Triplicane), Periamet and Sanjivarayanpet. Of these, the first two were opened in buildings already constructed and furnished for them by the Corporation and the last in a rented house pending the construction of its own building. The Vallabha Agraharam school, as the first school opened under the new scheme had the honour of being formally opened again by His Excellency the Governor early in the current year; and the Periamet school had also the honour of a visit by His Excellency.

3. Including the already existing school at Chetput, the total number of schools maintained by the Corporation was thus four and their strength and average attendance was as shown below :—

Name of school.	Date of opening.	Number of standards.	Number on rolls.		Average attendance.
			Boys.	Girls.	
1. Corporation School. CHETPUT	already existing.		162	40=202	117—29=146
2. do Vallabha Agraharam	4-2-1913	Infant to	158	53=211	132—39=171
3. do Periamet	7-2-1913	Fourth.	92	50=142	65—33= 98
4. do Sanjivara-yanpet	25-2-1913		131	9=140	120— 6=126
TOTAL ...			543	152=695	

Of these 695 pupils, 247 were panchamas mostly attending the Chetput and Periamet Schools and the rest belonged to the other classes of the community.

4. *Accommodation and equipment.*—The Chetput School required extension of accommodation. The Vallabha Agraharam School was full soon after the opening and further admissions had to be stopped. To meet the demand in this locality, another Corporation school is necessary.

The equipment was satisfactory and up-to-date.

5. *Staff.*—There were 26 teachers altogether employed in these 4 schools, including an instructor in manual training attached to each school. They were all trained except two whose employment was necessary, as they had to be taken over with their schools. They, nevertheless, possessed experience and were competent for their work.

6. *Instruction.*—The scheme of studies for elementary schools published by the Department was followed; and to enable the teachers to work it up efficiently, they were required to attend the popular lectures in scientific and other subjects arranged by the Elementary Section of the Madras Teachers' Guild.

7. *Museum, school-garden and play ground.*—There was the nucleus of a museum formed at each school which required development. There was some play-ground attached to each of the Corporation school-houses; and at Chetput and Vallabha Agraharam a fairly good school-garden had been raised.

8. *Finance.*—I am not in possession of all particulars to report under this head.

9. *Schools aided from the Corporation funds.*—There were no such schools, the Corporation having been relieved by Government of all liability for grants-in-aid.

10. *General remarks.*—The four schools newly opened represent the first sods turned by the Corporation in the field of Elementary Education in Madras. The success which has attended them, within such short time as two months, shews the great demand there is in the City for elementary education, cheap enough to be within the reach of the poorer classes and at the same time efficient. It is this demand that the new scheme for the improvement of the elementary education in Madras, which the Corporation has adopted, is intended to meet. This scheme, it will be remembered, provides for the construction of 40 school-houses by the Corporation and the maintenance of as many schools in them. The work has been spread over a period of ten years of which two years have already elapsed. Our experiences so far only show that it is too long a period as it is and that it is very desirable to complete it within much shorter time.

I have the honour to be,
Sir,

Your most obedient servant,

A. C. PRANATARTIHARA AIYAR,
*Inspector of Schools,
IVth Circle.*

APPENDIX IV.

Annual Report of the Rayapettah Hospital for the year 1912-1913.

Accommodation:—The new hospital was opened by the Honourable Surgeon-General W. B. Bannerman, C.S.I., M.D., I.M.S., on the 29th May 1912. The accommodation is for 76 patients, made up as follows:—

64 beds for Indians,
4 beds for children,
and 8 beds for Europeans and Anglo Indians.

Patients treated:—2,013 in-patients and 56,458 out-patients were treated during the year against 1,586 in-patients and 48,201 out-patients in the previous year showing an increase of 427 in-patients and 8,257 out-patients.

Operations:—1,059 in-patient operations and 3,211 out-patient operations. The total number of operations performed during the year was 4,270.

State of furniture:—Furniture is sufficient.

Amount of recoveries from patients who were able to pay for their diet, &c.

Rayapettah Hospital	...	Rs. 60-8-0
Isolation Hospital	...	Rs. 16-0-0

Establishment.—During the year the establishment was hardly sufficient.

Epidemic.—During the year no cholera cases were admitted in the Isolation Hospital. There were 58 cases of small-pox, 7 chicken-pox, 1 measles, 10 family attendants and 5 diseases of the skin admitted in the Isolation Hospital, Krishnampet.

Inspection and remarks by visitors:—During the year 1912, His Excellency Lord Pentland visited the Hospital on 3rd December 1912. His remarks were:—

"Everything possible seems to have been done by the Corporation of Madras for the design, construction, equipment and staffing of this new Hospital to make it useful and attractive. I trust that it may fulfil all expectations."

General Remarks:—The present temporary establishment which comes under "labour" must be made permanent. As the work in the wards is very heavy, the ward attendants find it very difficult to cope with the work especially on night duty days. It is necessary therefore to appoint 3 ward-boys, 2 ayahs, 2 male toties and 1 lathi in addition to the present staff.

The attendance in the out-patients' department is increasing day by day (*vide para. 2*). As such the present dispensary there is unsuitable for the purpose and that is much overcrowding. The patients have to wait for a long time before they get the medicines prescribed for them.

The voluntary compounders are not satisfactory. They must be dispensed with and two more permanent compounders must be appointed.

MADRAS,
9th June 1913.

C. DONOVAN, M. D., LT.-COL. I.M.S.
Surgeon, 4th District.

APPENDIX IV.

Report on the working of the Raja Sir Ramaswami Mudaliyar Maternity Hospital for the official year 1912-13.

I. *Accommodation*.—The hospital consists of two caste and one non-caste puerperal wards, a separate delivery ward now consisting of two large confinement rooms, with a central sterilizing and washing room, and a contagious shed made of uralite.

The total number of beds is as follows:—

	No. of beds.
Two caste wards of 10 beds each	20
One non-caste ward	16
Delivery wards	4
One contagious shed	8

Total No. of beds ... 48

II. The average daily sick including natural labour cases was—

In-patients	20.66 as against 19.15 of last year
Out-patients	0.26 " 3.54 "

There is a slight increase under the former; there is a very marked decrease in the latter. This decrease is due to the present practice of discouraging patients suffering from ordinary ailments to attend here as out-patients while they have a separate place close by in Georgetown Dispensary.

III. The total treated including natural labour cases was—

(a) In-patients	1033 as against 902 of previous year
(b) Out-patients	96 " 785

IV. Medical pupils of the Sub-Assistant Surgeon's class in their final year of study receive their clinical instructions on obstetrics in this hospital. Native midwife pupils, who after passing out find employment under Municipalities and District Boards, are also trained here, each for a period of one year. The hospital is now fairly well-equipped for affording practical instructions to both classes.

V. The expenditure of the hospital is met by the Corporation of Madras, together with the endowment—the pay of the medical staff being met by the Government.

MADRAS,
15th May 1913.

R. BRYSON, MAJOR, I. M. S.,
Superintendent, Raja Sir Ramaswami Mudaliyar
Maternity Hospital, Madras.

Annual Report of the George Town Dispensary for the year 1912-1913.

Accommodation.—is the same as last year. The question of providing a new out-patient department is now under consideration of Government in connection with the reconstruction of the Native Infirmary.

Attendance.—47,738 patients were treated during the year and the average daily attendance was 339.27. As compared with the previous year there is a decrease of 1,259 in the number treated and an increase of 23.08 in the average daily attendance.* The decrease in the number treated is chiefly due to the attendance falling off on the opening of malaria dispensaries in Tondiarpet at the beginning of the year.

* Note.—This explanation has on investigation been found to be incorrect. The Surgeon, 1st District has been asked to furnish the correct explanation.

Operations.—3,161 minor operations as against 3,120 in the previous year.

The statements showing the finance, attendance and diseases treated are attached.

MADRAS,
15th May 1913. }

R. BRYSON, MAJOR, I.M.S.,
Ag. Surgeon, 1st District.

*Annual concise report on the working of the Baliah Nayudu Dispensary, Vepery,
2nd District, Madras, for the year 1912-1913.*

The dispensary is situated in the heart of Vepery, quite convenient to the people who appreciate its proximity and receive gratuitous medical aid as out-patients.

Petty repairs were attended to during the year.

The establishment consists of the following :—

- One Senior Grade Sub Assistant Surgeon.
- One Third Grade Sub Assistant Surgeon.
- Two compounders.
- One male ward attendant.
- One female ward attendant.
- One peon.
- One toty.

The total number of out-patients treated during the year was 40,164 as against 38,810 in the previous year ; the increase is due to the large attendance of malarial and other fever cases attending the institution.

1,347 surgical operations were performed during the year against 1,644 in the previous year.

The maximum number treated on any one day was 410 on the 12th March 1913.

MADRAS,
12th May 1913. }

MD. IBRAHIM,
Senior Sub-Assistant Surgeon in charge.

C. G. WEBSTER, MAJOR, I.M.S.,
Ag. Surgeon, 2nd District, Madras.

Concise report of the Chintladripet Dispensary for the year 1912-13.

(1) *Accommodation.*—Accommodation is sufficient.

(2) *Admissions.*—The total number of patients treated and the daily average attendance was 25,694 and 204.10 against 18,659 and 187.98 respectively during the previous year ; while the number of operations performed was 1021 against 803 in the past year—thus testifying to the increased popularity of the institution. A statement showing the classes of diseases treated is attached.

(3) *Inspections.*—The Presidency Surgeon, 3rd District, inspected the dispensary several times during the year.

(4) *Establishment.*—If the second compounder proposed by the Corporation receives the sanction of the Government, the establishment will be quite sufficient.

(5) *Finance.*—The total amount spent by the Corporation for the maintenance of the dispensary was Rs. 3,302—6—3 against Rs. 3,659—12—7 in the previous

year. The following table shows in detail the figures under the different items with the causes of variations.

	1911-12			1912-13.		
	Rs.	A.	P.	Rs.	A.	P.
(a) Establishment	1,692	4	8	2,013	5	2
(b) European medicines	999	10	7	819	1	3
(c) Bazaar medicines	3	12	0	3	2	0
(d) Miscellaneous charges	463	11	2	466	13	10
(e) Buildings and repairs	500	6	2			
	3,659	12	7	3,302	6	3

(a) The increase under establishment is due to the posting of a 1st Grade Sub-Assistant Surgeon during the year and to the grant of his travelling allowance from Ootacamund to Madras.

(b) The decrease under European medicines is due to the fact that medicines unnecessary for dispensary were not indented for during the year.

(c) & (d) There is little or no variation under these items.

(e) No amount was spent under " Building repairs" as no alterations or repairs were done during the year.

(6) *General remarks*—Nil.

MADRAS
30th April 1913. }

S. BALASUBRAMANYAM,
1st Grade Sub-Assistant Surgeon in charge,
CHINTADRIPET.

Forwarded to the President, Corporation of Madras.

F. FENN ELWES, M.D., C.I.E.
MAJOR, I. M. S.
Surgeon, 3rd District.

Report on the work of San Thome Dispensary for the official year 1912—1913.

History.—This institution was established by Bishop Strachan in 1874, and its objects are to afford medical and surgical relief to the public in general and in particular to the charitable institutions in and around San Thome Parsonage e.g.

(a) Gordon Refuge

(b) Industrial School for women

(c) Orphanages, European & Indian, and the poor of all classes without any reference to caste, creed or nationality ; subsequently the needs of the native convent of the Roman Catholic Church also had to be met.

2. *Constitution.*—The management of this dispensary was placed under a local committee.

As the dispensary was considerably in want of funds, a new committee under the direction of the Corporation was organised in June 1912, but sorry, for causes unknown, the Secretary and Treasurer of the new committee did not seem to rise to the occasion, and did not take charge of the management from the Secretary and Treasurer of the old committee and allowed the new committee to die a natural death. Therefore, should an energetic and representative committee, consisting of men who are capable of managing institutions of this kind, from the influ-

ential residents of San Thome' Adyar, and Mylapore including the City Fathers residing in Mylapore, with the Surgeon, 4th District, as President of the committee, and the Health Officer, Madras Corporation, as the representative of the Corporation be organised, the dispensary will no doubt thrive well, and the Corporation will be relieved of its burden of fully maintaining it. It is now understood that an additional dispensary is to be opened in Kutcherry Road or Mandavalee, Mylapore; thus the San Thome Dispensary will be an aided one, while the dispensary intended to be opened may be fully maintained by the Corporation.

3. *Means of support*—The dispensary is supported by local contributions, and by a grant of Rs. 1,100 annually from the Corporation.

The Bishop of Mylapore and the Theosophical Society still continue to pay a donation of Rs. 20 each annually, who may be called permanent subscribers of the dispensary and may be taken as members of the committee for the dispensary.

4. *Probable transfer of management*—The Health Officer, Madras Corporation during his official visit, dated 11th April 1913, informed that this dispensary which was so long under the management of a committee will be brought under the direct management of the Madras Corporation from 1st April 1913. While thanking the Corporation of Madras for the excellent arrangement and acknowledging that it will place the dispensary certainly on a sound basis, the undersigned begs to bring to the kind consideration of the Corporation of Madras that it is an invaluable boon conferred on the the public of San Thome', and satisfying the needs of the old institution of 40 years' standing, in as much as it affords medical and surgical relief especially to 3 charitable institutions in San Thome' Parsonage, and also to the public in general amongst which it is located; but the change of location will certainly interfere with the intended object.

5. *Accommodation*—The building in which the dispensary is located is the property of the S. P. G. Mission, and a nominal rent of rupees ten *per mensem* is paid to it out of the funds of the dispensary. It is suitable to its requirements, but is sadly in need of repairs. At this dispensary only out-patients are treated and all emergent cases are attended to during all parts of the day by the Sub Asst. Surgeon who lives in the premises, and thus medical help is given to all classes of people free of charge.

6. *Establishment*—The staff consists of a Sub Assistant Surgeon, placed under the supervision of the Surgeon, 4th District, a compounder and two menial servants.

7. *Total treated*—The total number of patients treated during the year was 9,811 and the average daily attendance for the same period was 63.38.

8. *Most common diseases treated*—The diseases treated under this head were :—

Diseases of the digestive organs	...	2058
" respiratory "	...	945
Malaria	...	872
Diseases of the ear	...	757
Ulcers	...	715
Diseases of the skin	...	594
" connective tissue	...	486
Dysentery	...	432
Injuries	...	395

9. *Operations*.—658 operations of minor nature were performed during the year under report.

10. *Income*.—The total income of the year from all sources was Rs. 1160.

11. *Inspections*.—This dispensary was inspected several times by the Surgeon of the 4th District and the Health Officer, Madras Corporation, and once by the President of the Madras Corporation.

MADRAS,
6th May 1913.

FRANCIS IMANUEL,
Sub-Asst. Surgeon,
San Thome' Dispensary.

MADRAS,
17th May 1913.

E. W. C. BRADFIELD, CAPTAIN, I. M. S.,
Surgeon, 4th District.

From

RAO BAHADUR G. NARAYANASWAMI CHETTI,
Honorary Secretary to the Governors of the
Victoria Caste and Gosha Hospital.

To

THE PRESIDENT,
Corporation of Madras,
MADRAS.

SIR,

I have the honour to submit the usual returns, showing the work of the Victoria Hospital for Caste and Gosha women, Madras, during the year 1912-13.

The total number of patients treated during the year is 18,572, as against 18,577 in the previous year the number of Hindu and Muhammadan patients (both in and out) being 13,364 and 5,208 respectively. It will be noted with satisfaction that 908 maternity cases have been treated during the year, as against 841 during the previous year—an increase of 67 cases. The accommodation now available for labour cases is quite insufficient to meet the ever growing demands of the hospital. It needs no reiteration that this want is very urgent, and the sooner it is supplied the better will it be. The Governors of the hospital would, therefore, again earnestly appeal to the charitable public for liberal grants and contributions towards further expansion of the hospital in this direction.

The average daily number of in-patients treated during the year, is 79.94, which by itself is a striking testimony to the growing popularity of this institution and emphasizes the demand for its further and immediate expansion.

This hospital founded as a charitable premier institution in 1885, exclusively for caste and gosha women, has been supplying useful medical aid to the suffering women, not only of Madras, but also to those resorting here from the mofussal for more than a quarter of a century now, with due regard for their religious scruples and social observances, which preclude them both from seeking the aid of male doctors and from resorting to the other hospitals.

The Governors take this opportunity to place on record their grateful thanks to M.R.Ry. S. Gopalakrishna Iyer Avergal, B.C.E. of Lalgudi, Trichinopoly District, for generously endowing a bed in the name of his deceased wife, and also to the members of the Imperial Durbar Committee for the Government Promissory notes of the value of Rs. 2,600 for maintaining a bed "The Imperial Durbar Bed."

The Governors' thanks are also due to the Commissioners of the Corporation of Madras for the liberal increase of their annual contribution from Rs. 1,000 to Rs. 2,000 for the current official year.

Miss Wells, L. R. C. P. & S. Edin, who joined the institution for the second time in 1908, had again to sever her connection in the end of February 1913, owing to ill-health, and she was then succeeded by Miss Hendric, M.B., C.H.B., (Edin.) & L. M. (Dublin).

The Governors are glad to place on record their high appreciation of the valuable service rendered by Miss Wells during her Superintendentship.

I have the honour to be,
Sir,

Your most obedient servant,

VICTORIA HOSPITAL FOR
CASTE AND GOSHA WOMEN,
CHEPAUK,
10th May 1913.

G. NARAYANASWAMI CHETTY,
*Honorary Secretary to the Governors
of the Victoria Caste and
Gosha Hospital.*

Madras, 5th May 1913.

From

THE PANDIT-IN-CHARGE,

S.K.P.D., Ayurvedic Dispensary, Madras.

To

THE PRESIDENT,

Corporation of Madras.

HONOURABLE SIR,

In reply to your letter No. G. D. C. 430, dated 3rd April 1913, I have the honour to submit herewith the Administration Report showing the work done by the Sree Kannyaka Parameswari Devasthanam Free Dispensary, Madras, during the official year 1912-13.

The above institution was established on the 14th August 1898, by the Committee of Management who administer the charities attached to the said Sree Kannyaka Parameswari Devasthanam and has been maintained by the funds of the said devasthanam and is now under my management.

Establishment.—The staff consists of one Senior Pandit, one Assistant Pandit, one clerk, two compounders and three servants.

Preparations of medicines.—Medicines like powders, pills, bhasmans, oils, asavas, arishtams, salts, ointments, dravakams and syrups are prepared under the careful and personal supervision of the Head Pandit and the Assistant Pandit Mr. M. Doraiswami Iyengar, Ayurveda Bhushana.

Diseases.—The diseases generally treated at the dispensary are :—

All sorts of fevers, respiratory, intestinal, urinal, nervous and ordinary wounds.

Total number of patients treated.—The total number of patients treated during the year was 23,011, and the average daily attendance of patients during the period was 163.47.

Inspection.—The dispensary was visited by Major R. Bryson, I.M.S., Surgeon, 1st District, and also by the Dharmakarthas and other members of the Committee, and they were much satisfied with the working of the dispensary.

I beg to enclose herein a tabular statement of the patients who attended the dispensary and the diseases for which they were treated and the average daily attendance.

I have the honour to be,

Honoured Sir,

Your most obedient servant,

C. V. SUBRAMANIA SASTRY, A.K.A.C.,

Ayurveda Bhushana Pandit and

Senior Physician.

Report on the working of the Kalyani Hospital for 1912-13.

It is with regret that the Committee of the Kalyani Hospital has to report that there is a decrease both in the number of in-door and out-door patients. The in-door patients numbered 390 as compared with 422 last year and the out-door 2,432 as compared with 3,757 last year. It is difficult to account for these decreases but it is possible that the opening of the new hospital in Rayapettah has drawn away a very considerable number of patients from that part of the City. It is hoped that the decrease is only temporary and that as Miss Dodge becomes known the numbers will increase.

Whilst the subscriptions from England and India did not show any increase during the year, the committee is glad to note that the fees both from out-patients and in-patients showed a satisfactory increase, especially as the greater part is voluntary. The Endowment Fund brought an income of Rs. 465 which to some extent compensated for the loss of subscriptions.

The hospital still feels very seriously the loss of its founder Dewan Bahadur N. Subrahmanyam. His influence in gaining the sympathy and support of the people of Madras was very great. It is therefore to be expected that it will be sometime before the hospital by its work and influence can possibly make up for what it has lost by his death.

J. E. NEILL,

Honorary Secretary.
