Statement showing the diseases treated in hospitals and dispensaries	134-135
Statement showing the attendance of patients treated, the income and the expenditure of hospitals and dispensaries	136

INTRODUCTION.

Interest in a report published five months after the events of which it deals, naturally abates : after four years' experience in the preparation of these Administration Reports I myself find that the most interesting occurrences of a given year are generally those belonging to the years which follow. The statement perhaps betrays my nationality but rightly considered is not altogether unintelligible. The delay is not due so much to the intrinsic difficulties of the Corporation accounts as to the extremely liberal measure of time allowed by the Municipal Act for their preparation and adjustment : it is to be hoped in future more attention will be paid to para. (1) of Section 30, which lays down that the Administration Report shall be prepared "as soon as may be after the first day of April", than to para. (2) which prescribes its submission to Government "not later than the last day of November." In respect of the actual works of the Corporation this habit of delay has indeed one slight advantage to counter-balance its many drawbacks ; allotments do not lapse automatically on March 31st, and consequently works need not be rushed through with insufficient supervision in the last month of the financial year. On the other hand our contractors, who I fear in respect of their promises of promptitude "bee subtile people, and doe not alwaies speake the trueth," are encouraged in dilatoriness, and hence our closing balances give to us an apparent opulence which we are far from possessing in reality.

In one particular respect the form of our accounts admits of improvement. Hitherto it has been customary to show under the head of Capital Expenditure only the disbursement of money obtained by loan or as a grant from Government. This is misleading : in every year money is expended from revenue on objects which remain as permanent assets of the Corporation. A casual reader might infer from the accounts of 1917-18 that in that year we spent 2.39 lakhs of our revenue in lighting Madras. We spent the money, it is true, but more than half this expenditure is merely a transmutation of rupees into more durable electric cables and lamp posts. Similarly the cost of machinery purchased for the purpose of road-making is not properly debited to the maintenance of roads : a year's expenditure on education may be artificially inflated by inclusion of money spent on the building of a school which will last for many years. Sums thus utilised will be shown in future in lump as a transfer from Revenue to Capital, and accounted for under the latter head.

Of a closing balance (Revenue) of Rs. 8.78 lakhs, Rs. 7.21 lakhs have been carried over from preceding years. About one lakh represents Government grants for particular purposes : this money is not a true balance, and by this time most of it has been applied to the purposes for which it was given ; money due and paid in respect of works not fully complete or not actually billed for by March 31st, may account for about one lakh more. The remainder, Rs. 6.78 lakhs, is at the disposal of the Corporation, a comfortable sum, but one which in the near future will have to meet some heavy claims. A loan of Rs 14.30 lakhs taken in the years 1869-73 is due for repayment in the years 1919-23 ; a sinking fund has been provided in Government paper to the full face value of the liability, but unfortunately this paper has depreciated to the extent of 33 per cent. or even

more, and the depreciation needs provision. Although the original estimates for water and drainage works have been cut down by no less than a crore, the minimum sum still required to put into working order the smallest drainage system that will appreciably benefit the city is Rs. 28 lakhs, and for this capital sum interest and sinking fund, which will ultimately amount to Rs. 3—4 lakhs *per annum*, must be provided. I say "must be" for to call a halt now means, from the point of view of money, waste of very large sums already buried in the ground in the shape of sewers which cannot be utilised unless completed, and a more serious if not so immediately perceptible waste of public health and life. To quote particular examples of the inconveniences consequent on non-completion of the work in hand, the new Purasawakam sewers cannot work at all until the Purasawakam pumping station is equipped with engines, and until the pumping main from that station to the sewage farm is completely laid; the Buckingham Canal in the neighbourhood of Ice House Road must continue to be a pestiferous nuisance until new engines at Ice House Road Station relieve it of a chronic overflow of sewage; the new sewers leading to Napier Park Station are in danger of silting up, so long as the old Napier Park engines are insufficient to empty them promptly. The respective differences between effective drainage, ineffective drainage, and no drainage at all, can be seen in concrete form by inspection of the three northern divisions, the Ice House Road district, and the Purasawakam area known as the Hospital Plain. In the first-named area the main streets, along which sewage formerly flowed in black sluggish streams, are now dry and clean: the death-rate, which in the quinquennium 1912-16 far exceeded the mean of the whole City, is now in the first division very slightly above the mean and considerably below it in the third. In the second division, one notably poor and unclean, the death rate for 1917 unfortunately is 51.4 *per mile*. But the average death rate there for a period of nine years up to 1914 was 56 *per mile*, while the average of the last three years has been 48.7. In the second area the Buckingham Canal is sufficient witness: in the third, the Hospital Plain is newly laid out in broad streets of fairly substantial houses, but the sewage of these streets merely gravitates to the lowest point without finding any effective disposal.

So much for our main liabilities. Revenue for the year 1917-18 exceeded expenditure by Rs. 1.57 lakhs; by somewhat less if bills actually paid after March 31st, be taken into account. To this surplus the main contributory factors were, increased demand of about Rs. 98,000, and collection of Rs. 92,000, under combined "taxes on property." Under these taxes, or for all practical purposes tax, the Madras ratepayer most sadly groans, yet it can hardly be said in sober truth that he is overtaxed, or indeed very heavily taxed. The permissible maximum of such taxation is at present 18½ per cent., equivalent to a rate of less than four shillings in the pound; the tax is levied on actual returns; appeals infrequent and more infrequently successful show that assessments in the main are justly made; and assessments of new buildings account for nearly one-third of the year's increase. It is often said that in certain other large municipalities in India, the tax on property is lower; the Madras Corporation in reply may point out that these municipalities levy, in addition to a property tax, certain taxes on property "for services rendered," which fact represents a distinction rather than a difference, and that, in any case, valuations in such towns so far exceed those of Madras that a very much lower percentage of taxation yields an

incomparably greater income. Madras needs a certain revenue for its municipal life; it must obtain that revenue: there is no other way of stating the case. In one respect indeed the ratepayer of the city proper has a grievance, which, so far as I know, he has not yet discovered nor given utterance to. Madras with no natural obstacles in the way of its expansion has straggled so widely that it is a most expensive town to administer. Miles of water pipes, of electric cables, are needed for the service of thinly scattered houses; conservancy carts must travel miles to collect the refuse of an occasional bungalow. The New Municipal Act just published fixes no maximum of rating: it is a matter for serious consideration whether in future the percentage of rating should be the same in all geographical areas of the city.

Of one palpable opportunity for retrenchment of expense or for increased earning, the Corporation has decided to avail itself. The water-supply of the city is designed to supply 25 gallons *per head per day* to the population. Consumption has gradually exceeded this estimate: it rose to an average of 27 gallons throughout 1917-18, and to about 32 gallons in the first months of 1918-19. Hitherto a free allowance of 160 gallons per month per rupee of valuation has been allowed; for water taken in excess a charge of annas 12 per 1,000 gallons has been made. From October 1st, 1918, the free allowance will be restricted to 100 gallons per month per rupee of valuation; the charge for exceeding this allowance will be raised to rupee one per 1,000 gallons. It cannot be said that this change will involve undue hardship: several instances have been obtained of houses which kept within their free allowance, but which, considered with reference to the number of people inhabiting them, consumed water at the rate of over 100 gallons *per head per day*. It is hoped that the change will effect a considerable yearly improvement in the finances of the Corporation.

The Works Department in the year 1916-17 effected rather more than the figures of the report show. For the roads but 646,000 c. ft. of metal are shown as supplied: in reality some 200,000 c. ft. arrived towards the close of the year, and were utilised and paid for in the opening months of the new year. The school at Yedapalayam though not actually completed is in a fair way to completion; so are the Dhobikhanas at Chetput and Robinson Park. The Pail Depot at Royapuram has been completed. Considerable progress has been made in the clearing, and new lay-out of Suparigunta Paracherri. The experiment, proposed in last year's report, of laying tar macadam in Malayaperumal Street has been carried out. The street offered almost every possible natural obstacle to success. It is so narrow that cross rolling was impossible, it has one extremely awkward double bend, it is so thronged with traffic that it never could be closed effectively. The road surface now looks well; whether it will prove lasting, experience must show. Across Laws Bridge a concrete road 6 inches in depth has been laid; such roadway is presumably durable, but expensive, and necessarily slow in the making. In general the city roads, over which, I imagine, I travel as much as most people, have been maintained at a very respectable level of excellence, but constant building changes as yet impede the provision of completely satisfactory main thoroughfares. The front Beach Road, for example, should have a permanent surface, preferably of concrete to withstand the heavy traffic, but large and important buildings are projected in this locality, and entail the constant cutting up of the road for water, drainage, and electric connections.

Mention of electricity suggests the observation that, although in 1917-18 only 274 electric lights were added to the city, the electric stores received in that year should ensure a marked improvement in 1918-19. Negotiations are in progress for the construction of a siding at the Pallavaram quarries and of a stone depot in the centre of the city, whereby the Corporation may be enabled to fulfil its intention of taking the supply of road metal entirely into its own hands. But things in India move slowly, and I begin to entertain doubts as to whether this step will have been rendered entirely feasible by the end of 1918-19.

In the matter of *Education* the Corporation had under consideration during the year an important proposal to which it gave effect in the first week of 1918-19. The pay of our school teachers has been raised to something resembling a living wage: provided with a livelihood our teachers should in future be able to devote more attention to their daily work and less to the search for daily bread. The Corporation has further decided to appoint a special supervisor for its own schools—he has been chosen from the Educational Department and his arrival is daily expected—and, recognising in the price of land an almost insuperable obstacle to its programme of building 40 schools, has resolved to complete the number by renting buildings if possible throughout the city. Complete default of the contractor is responsible for the non-existence of the Hope Lodge school, for which the late Mr. P. Parthasaradhi Nayudu pleaded so long and so earnestly.

But, as I observed last year, the main interest of Corporation work centres in the Health Department. If people cannot live, roads, drains, water, education, are to them matters of small importance. The energy of the department continues unabated; that the death rate rose by 4 *per mille* in the year 1917 I cannot impute to any avoidable fault of Dr. Raghavendra Rao or of his staff. More interesting and more lamentable than what happened seven months ago is the fact that, since the commencement of 1918, the death rate has seldom, if ever, been below 40 *per mille*, and for the week in which I write has risen to the alarming figure of 62 *per mille*. This last abnormal figure we may safely attribute to the "Bombay fever", or Influenza, which at present is sweeping over India, and of which we may hope for riddance in no very long time; but to a death rate of 40 and above in Madras, I fear that certain quasi-permanent causes contribute.

In the first six months of 1918, 1,422 more persons died than in the corresponding six months of 1917. Of this number 1,025 were children of four years and under, and old people of 60 and above, a fact which lends probability to the Health Officer's theory that higher prices, consequent on war, are having a serious effect on the poorer classes of the population. In this same period 194 more persons died from bowel complaints than in 1917. For 18 months scarcely a week has passed without one or more cases of small-pox. I doubt if this last fact implies a really greater prevalence of the disease than in former years. After watching for four years the causal acceptance by the poorer classes of small-pox as an unavoidable visitation of Providence, and their disposition to conceal, or at least not disclose, cases occurring amongst them, I look with some suspicion on the figure of bygone days, and incline to the belief that small-pox now figures more largely in our mortality returns because of the greater diligence of the Health Department in searching it out. As in 1917 a

relatively sharp outbreak of cholera at the close of July 1918 gives cause for alarm; but if it can be stamped out as successfully this year as last no very great harm will have been done. These are the phenomena of municipal ill-health: the Health Department may tinkler at them and at times effect a temporary improvement, but until the Corporation can cut away the underlying causes I fear that they will constantly recur. Such causes I shall call by hard names (1) ignorance and apathy of the people, (2) greed and incapacity of landlords, (3) poverty and inefficiency.

Of the first cause I have no desire to make too much. It is not just to blame a man for being ignorant if he has never had the chance of education, for being apathetic towards a sanitary life if all his energies are perforce concentrated on the obtaining of the barest needs for life at all. But in support of the Health Officer's concluding remarks I may quote certain weighty observations of the *Hindu*: "There are people who must be considered educated who are absolutely oblivious to the danger of insanitary conditions, who tolerate, if they do not actively encourage, unwholesome surroundings, and who personally ignore sanitary precautions.....In India extreme and punctilious personal cleanliness is often associated with an environment extremely hazardous to health." These words are true: I find that many people who build themselves quite comfortable and hygienic houses frequently need the strongest compulsion ere they will spend an extra sixty or seventy rupees on connecting their house drains to the public sewer. Yet the sanitary conscience of the people is improving: if only the rate of improvement could be quickened!

Of the greed of landlords my daily scrutiny of building plans affords me sufficient proof. The Corporation has laid down certain *minima* of space, light and air. It is a struggle to obtain these *minima*: to the plea for anything a little better than what the law permits the reply that such betterment means loss of profit is thought sufficient. I remember visiting with the Health Officer a certain house in a respectable street. The time was March or April, and the sun was blazing as it can blaze at that season. Even so I required a lantern before I could make out the entrances to sundry dens in which human beings were herded together.

Of the third cause I forbear for the moment to speak. To remedy ignorance the Corporation can do something with its schools. But the three R's, by themselves will not suffice; "experience, even natural probability, declares that the grand-children of the occupants of these dens must be sickly, poor and stunted wretches, whom no school teaching, however excellent, can save from physical decrepitude."

With the greedy or incapable landlord it may be thought that the Corporation has power to deal. These powers on examination are seen to be inadequate. The law provides that any person wishing to lay out a street must first level, pave, metal, drain and light the same to the satisfaction of the President. This obligation has hitherto been easily evaded. A person with building sites on his hands sells such at various times to various persons, and washes his hands of the matter. No single person remains responsible for the street. The Corporation must create the street, and at times buy from the several purchasers.

ground wherewith to make a sufficient street. Herein is seen an apathy of the people; why should any one buy a house site, if the seller cannot show a sufficient means of access to it? But suppose the vendor does leave vacant ground capable of being formed into a street. If he will not set the street in order, the Corporation can do the work and recover the cost thereof, *but only from the occupants of the street in proportion to the frontage of their respective buildings*. In the meaner streets such occupants are often miserably poor; nothing can be recovered from them; and the landlord safeguards himself and them by another ingenious device. The buildings or building lots are let out with a provision that the occupants may be evicted at thirty days' notice. If A, and through A his landlord, be troubled, A is evicted; B takes his place, to be followed in turn by C; there is never any permanent person on whom responsibility can be fixed. In one case where the Corporation purchased land to widen the wretched lane serving for approach to a nest of hovels the landlord asserted vehemently, but, so far at any rate, unsuccessfully, his right to build over the space originally left vacant.

Turn to individual houses. X, a woman, owned, I believe, a spacious lot in a street of Purasawakam. She sold this lot, reserving at its southern end a passage some two or three feet wide leading into a rectangular space of twelve to fifteen feet in breadth. Herein were lairs constructed and tenants received. The Health Officer condemned this establishment towards the end of 1916. With promises of improvement and sanctioned plans the matter dragged on until the middle of 1917. X was then prosecuted and fined Rs. 5. After further attempts at reform X was again prosecuted in March 1918, and fined Rs. 5 in June. In this place the present outbreak of cholera started. The Health Officer is now seeking for X with a summons which will lead to a third prosecution, and, it is to be hoped, to a more effective punishment. So flourish and abound the slums of Madras. The inhabitants thereof are in worse case than the Health Officer's photographed street-dwellers and squatters. For these, if they suffer from the inclemency of the weather, at least get the benefit of sun and air: the *paracheri* hovel will not keep out the rain, and stink and pestilence are about it and around it. I know many *paracheries*; if I devote a little space to Cox *Paracheri* it is rather because my occupations have recently led me there than because it is noticeably worse than many others.

Cox *Paracheri* is on the banks of the Cooum. It is low lying, practically undrained, and, as at present constructed, undrainable. There people swarm like ants in an ant-heap, and at the present moment small-pox thrives exceedingly. There may be noticed: *item* (1), some rows of single roomed houses built of stone. Each single room probably conforms to the *minimum* space requirement, but, as the houses are back to back, there is no possibility of through ventilation. The rent of these desirable dwellings, if the tenants speak truly, has recently been trebled: to meet the demand each occupier is taking in a family or two as lodgers. *Item* (2): the eaves of a thatched house running to within a foot or two of the ground and met by a wall. In this wall a hole is cut giving access to an underground cave which serves some unfortunate as a dwelling place. *Item* (3) sundry houses mainly constructed of tatties, old clothes, and string, without washing places or possibility of drainage, and with the sillage water festering about them.

Much has been said in a desultory manner about the need for improving this place: some day its condition may be brought more forcibly to notice. For I found in the *paracheri* certain people of importance: the billiard-marker at one of the best known houses in Madras, a waiter from one of the big hotels, a hospital ward attendant, one or two jail warders, and dhobies not a few. Madras will begin to sit up and take notice when these people infect and kill their employers or some fairly prominent personage: in default of a better, a Municipal President or Health Officer might serve the good purpose. The Corporation has discussed the possibility of acquiring and remodelling such slums, but the enormous cost of land acquisition always stands in the way. I fail to see why it should be so. Why should the Corporation, the rate payer, pay money to an individual for permission to remove a danger to the public from his property? If a Zamindar wastes his substance in riotous living the law will take from him his estate, set it in order, and hand it back to him after repaying itself all outlay and cost of supervision. The Zamindar merely wastes money; the slum owner is wasting human life. If a landlord is greedy and will not, or incapable and cannot, maintain his property in a habitable condition, why should such property not be condemned, taken over by a public body, set in order, and returned to the owner when all outlay incidental to improvement, has been recouped?

The slums need thinning out, and when the thinning has been done, space is needed for those evicted. There is plenty of space in Madras, but far too much space is wasted in huge bungalow compounds. These I once considered to be the chief amenity of Madras; such they undoubtedly are, but only for the few who can afford them. And when the people are spread abroad they need cheap and easy communications, in other words, trams, to bring them to their daily work. More trams are a crying need of Madras; people probably cluster in Cox *Paracheri* because it is on a tram line. It is a matter for congratulation that the widening of Government House and Penitentiary bridges has at length been approved, but in truth much precious time has been lost.

Of my third cause, the poverty and inefficiency of the people, I shall say just a word. Here is a note of Miss Veera Singh, our lady-doctor. "A very miserable looking infant, one year old but looking only half that age, all eczema and boils, was brought for treatment quite unclad. Two days later I asked the father whether the child was having a sufficient supply of milk daily. He replied 'Oh yes, quite enough' very readily. Since the condition of the child did not confirm his statement, I asked him how much milk was brought for the child. 'Three pies worth both morning and evening' was the very candid reply. He was a clerk drawing Rs. 15 per mensem and he had a family to support." Now what is the justification for employing a clerk on Rs. 15, and what is the justification for a clerk on Rs. 15 marrying a wife and begetting a family? From the employer's point of view the service offered may often be inefficient, but undoubtedly there is far too much in Madras of "the false, unnatural and destructive system when the bad workmen is allowed to offer his work at half price, and either take the place of the good, or force him by his competition to work for an inadequate sum." The desire of the employed is to divide work that could be done by one energetic man among the largest possible number of inefficient, and

to divide a wage that could keep one man in decency into several wages just sufficient to keep a number from actual starvation. The Corporation, so far as its own office is concerned, is striving to amend this state of things by preparation of a scheme which will reduce the number of its employees, and thus provide a reasonable livelihood for those that remain; but to carry such a scheme into effect will require time. Universal and entirely improvident marriage may be "the custom" of India; but nature pays not the smallest heed to anybody's "customs." So long as the poor Madras is content with mere escape from starvation—I found in Cox Paracheri one comparatively young man 'keeping quiet' on a private income of Rs. 4 per mensem, and another who having washed his head that morning, was unable to do any further work that day—so long as he marries and begets children with the insouciance of a rabbit, so long will the vital statistics of the city read appallingly. No Health Department that the wit of man may devise can prevent this.

I have written somewhat at length because, owing to impending legislative change in the constitution of the Corporation, this is probably the last report that I shall write as President. To the President of the future whoever he may be, I desire to leave some record, however lame and imperfect, of what I have seen in and thought about Madras, and at the same time I wish thus to express, if indirectly, my thanks to the Municipal Executive. In wishing the first elected President well in all respects I wish especially that he may obtain from his fellow Commissioners the support, and co-operation that they have given to me. They and I have disagreed violently at times; it is as well that it should have been so, for the atmosphere of a mutual admiration society is not conducive to efficiency. And after all in the main essential we have agreed—in a desire to serve Madras to the best of our ability. I shall remember this desire of my fellow Commissioners; I trust that they will keep the same memory of me, and forget the many things that I have said, written, and done amiss.

CORPORATION OF MADRAS,

29th July 1918.

J. CHARTRES MOLONY,

President.

CORPORATION OF MADRAS.

Report of the President from 1st April 1917 to 31st March 1918.

Changes in the constitution of the Corporation.

Elections.

1. As required by Section 46 of the Madras City Municipal Act, 1904, the lists of persons qualified to be elected Municipal Commissioners and of those qualified to vote at such elections were revised, with the result that 514 persons were registered as eligible for election as Municipal Commissioners, and 12,071 as eligible to vote, as against 480 and 12,290 respectively in the previous year.

2. Two elective seats—one in the 2nd Division and one in the 3rd Division—which had fallen vacant in 1916-17 were filled up during the year under report, besides three seats in divisions 10, 13 and 20 which fell vacant during the year.

3. *Representatives of the Chamber of Commerce.*—The term of office of Mr. A. J. Leech who was appointed on 7th April 1914 expired on 7th April 1917; he was reappointed on 17th April 1917 and continued to hold office during the year. Mr. A. P. Symonds and Mr. A. J. Powell who were appointed on 18th July 1916 and 10th April 1917 respectively continued to hold office during the year.

4. *Representatives of the Trades Association.*—Mr. N. C. Rajagopala Chariyar, the Hon'ble Mr. C. H. Higginbotham and Mr. D. Morrison who were appointed on 27th March 1917, 6th July 1915 and 3rd April 1917 respectively continued to hold office during the year.

5. *Representatives of the Harbour Trust Board.*—The term of office of Mr. Mahomed Abdul Kuddus Badsha Sahib who was appointed on 2nd March 1915 expired on 2nd March 1918; he was reappointed on 5th March 1918.

6. *Representatives of the Madras & Southern Mahratta Railway Company.*—The term of office of Mr. J. F. Fawcett who was appointed on 15th December 1914, expired on 15th December 1917. Mr. B. Mopparappa was appointed in his place on 18th December 1917.

7. *Nominations by Government.*—The Hon'ble Sir Gordon Fraser, Mr. M. D. Devadoss, Mr. Yaqub Hasan Sahib, Mr. E. R. Osborne, Lt.-Col. C. Donovan, Mr. J. W. Crusha, and Lt.-Col. R. Bryson continued to hold office during the year. Mr. H. A. Hart who was appointed on 23rd March 1915,

resigned his seat on the Corporation on 19th May 1917 and Mr. H. W. Callaghan was appointed in his place on 12th June 1917.

Reinstatement.

8. Under section 54 of the Madras City Municipal Act 1904, the following Commissioners lost their seats on the Corporation by failing to attend either three consecutive general meetings or six consecutive meetings. They were reinstated under the proviso to section 55 of the Act:—

Name.	Date of loss of seat.	Date of reinstatement.
The Hon'ble Sir Gordon Fraser.	24th April 1917.	15th May 1917.
Mr. A. J. Leech.	21st Sept. 1917.	16th Oct. 1917.

Executive Officers.

9. I continued to hold the office of the President during the year except for the period from 11th August 1917 to 16th September 1917 and from the 4th November 1917 to 31st January 1918; on the former occasion, I was on privilege leave; on the latter on Military duty. Mr. T. Vijiaraghavacharya acted for me on the first occasion, Mr. H. H. Burkitt on the second.

Dr. K. Raghavendra Rao held office as Special Malaria Officer and Health Officer during the year. Mr. T. Vijiaraghavacharya continued to hold the office of the Revenue Officer till the 18th May 1917. Mr. S. Dandapani Aiyar, Asst. Revenue Officer was appointed as Acting Revenue Officer from 19th May 1917, and held the office till the afternoon of 20th August 1917, when Mr. M. Bazlullah Sahib Bahadur was appointed as Revenue Officer.

Mr. J. R. Coats held the office of Engineer during the year except for the period from 28th March to 25th April 1917 when he was absent on Military duty and Mr. E. R. Srinivasachariyar, Assistant Engineer, was in charge of the office of the Engineer in addition to his own duties. Mr. J. W. Madeley held the office of the Special Engineer for the design and execution of the Water and Drainage Works.

Meetings.

10. During the year the Corporation held twelve general meetings one adjourned general meeting, six special meetings and six adjourned special meetings. The average number of Commissioners including the President present at each meeting was 26 as in the previous year. The percentage of attendance to the sanctioned strength was 78 among the Divisional Commissioners, 54.5 among Institutional Commissioners and 59.5 among Nominated Commissioners.

11. The Standing Committee met 26 times.

Committees and Sub-Committees.

12. (1) *Building Regulations*.—A Committee appointed by the Corporation to consider and report on rules 14 and 15 of the Building Regulations requiring

the provision of one-third open space in the case of certain buildings recommended the adoption of certain revised rules drafted by the Engineer. These rules were approved by the Corporation on 2nd February 1915 with some modifications, and sanctioned by Government in G. O. No. 1957-M. Mis., dated 14th November 1917.

(2) *Water-supply to the City*.—(a) The Special Engineer proposed that an unmetered service be laid down as comprising one single tap placed in an approved position visible from the road and that a provision of Rs. 20,000 be made in the budget for 1916-17 for the purchase and fixing at the cost of the owners, of meters to be applied to first class service, new and existing. The Standing Committee recommended that the Special Engineer's proposal be approved, every house being allowed one tap free and houses with more than one tap being metered and that a provision of Rs. 20,000 required in connection with the fixing of meters at the cost of the owners, be made in the budget for 1916-17. A Committee consisting of the President, Messrs. P. Tyagaraya Chetti G. A. Natesan and K. N. Ayya Aiyar was appointed by the Corporation to select typical houses in the various divisions where meters at the cost of the Corporation might be fixed and to report on the amount of water spent usefully and of water wasted.

The Committee submitted a report stating that the consumption of water as recorded by the trial meters in most cases was excessive, the consumption for some of the houses approximating to 40 gallons per head per day, and that the Corporation could not supply water at this rate and should therefore adhere rigidly to the division of first and second class services suggested by the Special Engineer. The Standing Committee by whom the report was considered resolved that (i) Any person who will not have his tap or taps visible should have a meter on rent when the Corporation can provide meters and (ii) Individual water connections be granted only to houses rated at and over Rs. 10 per mensem. The recommendations of the Standing Committee were rejected by the Corporation at their meetings held on 20th March 1917.

(b) During the year it became impossible to supply filtered water equal in quantity to the consumption with a continuous supply. The Special Engineer expressed in June 1917 his inability to supply *filtered water* to the extent that the City demanded since the New Water-works were opened and wished to know what the Commissioners desired him to do under the circumstances.

A Committee consisting of the President, Messrs. T. Rangachariyar, J. W. Crusha, S. Guruswami Chetti and C. P. Ramaswami Iyer was appointed by the Corporation on 19th June 1917 to go into the question of regulation of supply of filtered water to the Madras City. As an experiment, an intermittent supply of water to the city was tried for a few days. This was started on July 1st. Pressure was increased from 5 to 8 A.M. The supply was cut off from 2 to 5 P.M.; it was then recommenced and continued until 11 P.M. when it was again cut off until 4 A.M. Owing to the numerous complaints received, it was decided to abandon this intermittent supply and to

augment the supply by adding unfiltered water to the filtered water. Continuous supply was restored on 12th July 1917. The committee consequently recommended to the public that all drinking water should either be filtered in the house or boiled. These recommendations were considered by the Corporation on 17th July 1917 who resolved that the water thus supplied with the result of the analysis of Guindy Institute should be sent to Lt.-Col. Donovan and Lt.-Col. Bryson to see if any further reference should be made to other experts. On 5th September 1917 the Corporation resolved "That the Government be requested to move the Government of India for deputing Lt.-Col. Clemesha (or in case he is not available to depute Col. Cornwall or other suitable expert) at an early date to inspect and report on the Madras Municipal Water-works and the City water supply." Government in their order No. 1576-M., dated 15th September 1917 appointed a committee consisting of Surgeon-General Bannerman (President), Mr. W. A. Justice, I.M.S., Sanitary Commissioner and Mr. W. Hutton, Sanitary Engineer to examine carefully the present system and suggest remedies where necessary. The whole question is now under the investigation of the committee.

(3) *Drainage By-laws.*—A sub-committee consisting of the President, Messrs. G. A. Natesan and K. N. Ayya Aiyar was appointed by the Standing Committee at their meeting held on 9th July 1915 to report on the alterations in the draft drainage by-laws proposed by the Special Engineer. The sub-committee recommended that the alterations be approved, subject to certain modifications. This recommendation of the sub-committee was approved by the Standing Committee. The Corporation by whom the report was considered on 18th April 1916, appointed another committee consisting of Messrs. A. J. Leech, J. O. Robinson, T. Rangachariyar, P. V. Doraiswami Mudaliyar and P. Theagaraya Chetti to consider these by-laws more carefully. This committee recommended certain further alterations. The Corporation at their meeting held on 18th July 1916 recommended that the by-laws as amended by the committees be worked tentatively for a period of one year.

The Government approved the by-laws subject to certain further alterations. The by-laws, as finally approved by the Corporation were sanctioned by Government in G. O. No. 750-M. Mis., dated 8th May 1918.

(4) *Retrenchment in Corporation Establishments.*—A committee consisting of the President, Messrs. P. Theagaraya Chetti, A. J. Leech, T. Rangachariyar, Yaqub Hassan Sahib, G. A. Natesan and J. F. Simpson was appointed by the Corporation on 10th March 1916 to go into the question of retrenchments with reference to Corporation establishments and to report as early as possible. The report submitted by the Committee was considered by the Corporation on 15th May 1917 and 2nd October 1917. The Corporation decided that no appreciable reduction was possible.

(5) *Quarrying Road Metal.*—A Committee consisting of the President, Messrs. G. A. Natesan, Muhammad Usman Sahib, C. Ramanujam Chetti, P. Parthasarathy Naidu, A. P. Symonds and J. W. Crusha was appointed by the Corporation on 20th March 1917, to go into the question of the Corporation

quarrying its own requirements of road metal. The general conclusions of the committee were (1) that it would be well for the Corporation at the close of the present contract to work the quarries departmentally, (2) to buy and instal crushers, (3) to arrange for railway sidings and (4) to set up an Asphalt-Macadam plant. The recommendations of the committee were approved by the Corporation on 22nd August 1917.

The Corporation permitted the City Engineer (Mr. J. R. Coats) to go to Calcutta to make a special study of the Tar-Macadam making plant, which he accordingly did in September 1917.

In pursuance of the above recommendations, two small second hand crushers at a cost of Rs. 1,000 and two big second-hand crushers at a cost of Rs. 12,000 were purchased, also rails, fish plates etc., required for laying Railway sidings at Minambakkam and Pallavaram were obtained from Messrs. Tata & Sons, Bombay, through the agency of South Indian Export Co., Ltd., Madras. An estimate for Rs. 33,600 for manufacture and installation of an Asphalt Macadam Plant was sanctioned and the work of manufacture is in progress in the Corporation Workshops.

(6) *Corporation Workshops and Stores.*—A committee consisting of Messrs. Muhammad Abdul Kuddus Badsha Sahib, A. J. Powell, J. W. Crusha and C. Ramanujam Chetty was appointed by the Corporation on 21st September 1917, to examine and report on the working of the Corporation Workshop and Stores. The Committee were of opinion that the workshop and stores were in good order, that possibility of fraud and theft was very small but that the means adopted to secure this end were unnecessarily cumbrous and therefore recommended that the Engineer should in consultation with the business firms in Madras and with the committee referred to above, submit a scheme for administration on a commercial basis, so far as possible, of the Corporation workshop and stores. The recommendations of the committee were adopted by the Corporation on 20th November 1917.

(7) *Corporation land in Aminjikarai.*—A committee consisting of the President, Messrs. T. Rangachariyar, A. J. Leech, P. Thyagaroya Chetti and P. M. Sivagnana Mudaliar was appointed by the Corporation on 20th November 1917, to advise the Corporation as to the desirability of selling the land in Aminjikarai and Priakudal villages originally acquired for an Isolation Hospital but not now required for that purpose. The committee recommended that the land should be retained and their recommendation was approved by the Corporation on 19th February 1918.

(8) *Drinking-water supply to Surapet Village.*—The village of Surapet had an irrigation tank which supplied drinking water to the village. This tank was absorbed in the Red Hills tank when the latter was enlarged about the year 1868. A small pond was excavated where the Madras supply channel passed nearest to the village, and the pond was connected with the supply channel. The village received its water-supply thus for some 40 years, until the open channel was replaced by an underground conduit. The villagers petitioned to

the Corporation on 7th February 1910 to supply water to them from the new conduit. The Corporation were unable to grant this request. The question then arose as to whether the Corporation or the Chingleput District Board would be responsible for the supply of water to the village. The matter went up to Government who decided that, in any case, water would have to be supplied to the village, and the Corporation was asked in Memorandum No. 5611-1/M, dated 1st September 1917 whether pending the settlement of the question as to who should bear the cost, it would be prepared to execute the work needful to supply the village.

(9) *Primary Education*.—A committee consisting of the President, Messrs. T. Rangachariyar, H. W. Callaghan, Yakub Hasan Sahib, C. Ramanujam Chetti, P. Theagaroya Chetti, G. A. Natesan and K. C. Desikachariyar was appointed by the Corporation on 19th February 1918, to consider and suggest a scheme for the extension of primary education in the city of Madras so as to make it free within the next five years. The committee made certain recommendations, the chief amongst which were the abolition of the fees in the Corporation schools, increase of the salaries of the Corporation teachers and appointment of a Superintendent to be in charge of the Corporation schools. The recommendations of the committee were adopted by the Corporation on 19th March 1918 and 11th April 1918.

(10) *Draft City Municipal Bill*.—The Government of Madras referred the Draft of the Madras City Municipal Bill in Memorandum No. 28-M, dated 8th January 1917 for remarks and suggestions of the Commissioners. The Bill was considered in committee at several General Meetings and at Special Meetings of the Corporation and the views of the Commissioners on each point of the Bill were submitted to Government in June, 1917.

Resolutions of the Corporation.

13. The following are among the more important resolutions passed by the Corporation during the year :—

(1) *Establishment*.—The Corporation resolved on 24th April 1917 and 15th May 1917 that the grain compensation allowance drawn by the inferior servants of the Corporation both permanent and temporary be consolidated with their pay and an increase of rupee one per mensem be granted to them in addition with effect from 1st April 1917, and that the inferior servants both permanent and temporary who were not entitled to the grain compensation allowance, be granted an increase of rupee one in their pay with effect from 1st April 1917.

(2) *By-law No. 81*.—The Corporation recommended that the existing by-law No. 81 be amended so as to read as follows :—

“On the occurrence of any dangerous disease in his house, he shall forthwith report the same to the Health Officer or the Sanitary Inspector of the division and shall cease carrying on the trade of paddy boiling till the place is declared free from infection by the Health Officer and he shall not sell any rice till such place is declared free from infection.”

The proposed amended by-law was duly published under Section 412 of the Act and it was finally approved by the Corporation on 20th November 1917, and confirmed and sanctioned by Government (G. O. 2117-M. Mis., dated 7th December, 1917).

(3) *Government Brick and Lime Kilns*.—The Corporation passed the following resolution on 17th July 1917 :—

“The Commissioners regret the continuance of the nuisance caused by the Government lime kilns on Poonamallee Road and they recommend to the President of the Corporation that early steps should be taken to stop the nuisance.”

The Government to whom the resolution was communicated have stated that the land required for locating the brick fields outside the Municipal limits has been acquired and an estimate for the removal of the brick-fields has been sanctioned and that all possible expedition is being made towards the shifting of the brickfields outside Municipal limits (P. W. D. Memorandum, No. 6081-C., dated 28th September 1917).

(4) *By-laws for the Regulation of Lodging Houses*.—Draft by-laws for the regulation of lodging houses in the city to replace the existing by-laws framed under Clause 25 of Section 409 of the Madras City Municipal Act, 1904 were approved by the Corporation at their meeting of 15th January 1918. They have been submitted to Government for preliminary approval.

(5) *Corporation Model Schools for all classes of people*.—The Corporation passed the following resolution on the 15th January 1918 :—

“That the doors of every Corporation Model School in the city be thrown open to all children alike irrespective of their colour and creed.”

(6) *Sub-Assistant Surgeons for Infectious Diseases Hospitals*.—The Corporation approved on 1st March 1918 the proposal that they should appoint their own Sub-Assistant Surgeons to be in immediate charge of the Infectious Diseases Hospitals at Krishnampet and Royapuram on a salary of Rs. 115 each per mensem inclusive of all allowance, contribution, &c., on two yearly agreements without private practice.

Revenue Administration.

14. The total net increase in the current revenue under the principal taxes amounted to Rs. 1,40,895-8-3 as against Rs. 1,15,756-2-1 in the previous year, excluding Rs. 73,414-15-9 due to the increase in the rate of lighting tax from 1½ to 2 per cent. in the previous year.

15. The number of warrants issued in the year under report was only 408 as compared with 1020 in the previous year. A sum of Rs. 224-5-10 including Rs. 21-8-2 under arrear was remitted under Section 117 of the Act, the owners being in those cases too poor to pay the taxes.

Finance.**Capital Account.**

16. The year opened with a balance of Rs. 1,40,468-7-7. The Corporation received a loan of Rs. 4,00,000 and a grant of Rs. 1,50,000 from Government for improvement of water-supply and drainage. Rs. 5,252-1-0 was realised as interest on investment of surplus funds and Rs. 10,440-7-1 was recovered on account of advances made in the previous years. Rs. 3,215-6-11 was transferred from the revenue account to meet the excess expenditure incurred on extension of electric lighting in the previous year. The total receipts including the opening balance amounted to Rs. 7,18,376-6-7. The amount spent on construction of buildings was Rs. 5,788-12-7 and that on improvement of water-supply and drainage Rs. 5,97,175-13-5, thus making a total of Rs. 6,02,964-10-0. The balance left at the close of the year was Rs. 1,15,411-12-7.

Revenue Account.

17. The balance at the beginning of the year was Rs. 7,99,321-2-11 as compared with Rs. 7,85,424-3-7 in the previous year. The revenue from all sources, exclusive of a special grant of Rs. 1,00,000 from Government for sanitary works amounted to Rs. 33,11,014-12-9 against Rs. 31,88,719-6-5 in 1916-17, thus showing an increase of Rs. 1,72,295-6-4. Towards this income Municipal Taxes contributed Rs. 25,57,430-13-11 and Municipal fees and Miscellaneous receipts Rs. 9,23,583-14-10 as compared with Rs. 22,44,355-6-11 and Rs. 8,94,363-15-6 respectively in the previous year. The total expenditure amounted to Rs. 33,32,338-14-8 against an estimate of Rs. 34,96,700 and against the actuals of Rs. 32,22,822-7-1 in 1916-17. The balance left at the close of the year was Rs. 8,77,997-1-0.

Tax on Professions, Arts, Trades and Callings under Section 120.

18. The gross current demand under this head of taxation was Rs. 1,93,255-0-0 as against Rs. 1,75,202-8-0 in the previous year. There were no remissions or reductions. The number of items of assessment was 13,296 as against 13,125 of last year.

The current collections of the year amounted to Rs. 1,90,662.

House, Water and Drainage and Lighting Taxes combined.**Current.**

19. The gross increase of Rs. 93,733-9-5 over the net demand of the previous year was due to revision of assessments made during the year, as detailed below :—

(1) Rs. 27,284-12-5 was due to general revision of assessments in parts of Divisions 17, 18, 19 and 20.

(2) Rs. 15,932-3-10 was due to the enhancement of assessments on buildings on account of alterations and improvements thereto.

(3) Rs. 29,173-11-3 was due to the assessments imposed on new buildings.

(4) Rs. 26,342-13-11 was due to enhancement of assessments made in 1916-17, which had effect only for one half year in that year, against a full year in the year under report.

20. During the year, 7989 notices were issued under Section 127 on account of enhancement of valuations and assessments newly imposed, against 5466 in 1916-17; 60 appeals were preferred against these enhancements and assessments and 12 against the standing assessments making a total of 72 appeals against 205 in the previous year. In 33 cases, the assessments were reduced and in 39 cases the assessments were confirmed. Two appeals were preferred to the Presidency Magistrates under Section 175 of the Act against the decision of the Appeal Board and both were dismissed.

21. The net current collections amounted to Rs. 19,08,502-10-8 against Rs. 18,06,833-4-10 in 1916-17. The balance outstanding at the end of the year was Rs. 32,318-8-4 as against Rs. 32,371-5-5 at the end of 1916-17. The percentage of collection to demand was 97.64 against 97.34 in the previous year. Only 320 warrants were issued as against 783 in the previous year.

Arrear.

22. The arrear balance at the beginning of the year was Rs. 33,573-8-0, which by subsequent amendments was raised to Rs. 36,519-4-11. Of this demand, a sum of Rs. 30,467-2-8 was realised during the year and Rs. 1,498-10-6 was remitted on account of vacancy and other causes and Rs. 21-8-2 was remitted under Section 117 of the Act. The balance left outstanding at the end of the year was Rs. 4,531-15-7.

Tax on vehicles with springs and on animals under Section 150.

23. The net demand under this tax amounted to Rs. 1,22,786-4-0 against Rs. 1,16,250-4-0 in the previous year.

24. The current collections inclusive of Rs. 3,761-12-0 received in advance for the ensuing year, amounted to Rs. 1,13,830-13-6. The net collections for the year were thus Rs. 1,10,069-1-6, which with Rs. 7,299 prepaid in the previous year on account of taxes due for the year under report, amounted to Rs. 1,17,368-1-6 against an estimate of Rs. 1,13,000. A sum of Rs. 13-8-0 was written off as irrecoverable. The balance left uncollected at the close of the year was Rs. 5,404-10-6. Of this sum, Rs. 3,120-2-0 has since been collected, leaving Rs. 2,284-8-6 for further recovery.

Tax on carts and other vehicles without springs under Section 155.

25. The demand under this tax amounted to Rs. 33,525 as against Rs. 32,340 in the previous year.

26. The current collections inclusive of Rs. 1,218 received in advance for the ensuing year, amounted to Rs. 32,916. The net collections excluding the advance

payment were Rs. 31,698, which with Rs. 1,599 collected in the previous year towards the demand of the year under report, amounted to Rs. 33,297 against Rs. 32,061 in 1916-17.

Tolls on vehicles and animals entering municipal limits.

27. The right of collecting tolls for the year under report was put up to public auction and sold for Rs. 50,100 as against Rs. 43,500 in the previous year.

Revenue derived from municipal property and powers apart from Taxation.

28. *Rent of Lands and Buildings* :—The demand under this head for the year was Rs. 39,620-2-5 against Rs. 38,272-4-6 in the preceding year. The collections amounted to Rs. 37,067-15-4 against Rs. 37,199-11-8 in the previous year.

29. *Moore Market* :—The income amounted to Rs. 19,504-6-8 against an estimate of Rs. 19,000.

30. *The New Guzily Bazaar* :—The collections amounted to Rs. 14,269-11-0 against an estimate of Rs. 14,000.

31. *License Fees on Timber and Firewood* :—The gross collections under this head amounted to Rs. 1,86,244-9-6, which includes a sum of Rs. 3,576-8-0 relating to the previous year paid by the collecting agencies during the year under report and excludes Rs. 3,407-11-6, being fees levied and received by the collecting agencies for March 1918 but not remitted to this office till after the close of the year. The corresponding gross collections for 1916-17 amounted to Rs. 2,09,876-7-5.

Refunds of fees on exports, granted during the year, amounted to Rs. 25,264-15-0 against Rs. 34,878-8-0 in the previous year. The net collections for the year stood at Rs. 1,60,979-10-6 against an estimate of Rs. 1,30,000.

In addition to the refund of Rs. 25,264-15-0 paid from the current collections on account of timber exported from imports made during the year, a sum of Rs. 32,945-1-0 was refunded from collections of previous years under the head of "Refund of other than current collections."

32. *Grass Farm, Tondiarpet*.—The farm was worked departmentally and the total receipts from all sources amounted to Rs. 53,268-13-11 against Rs. 46,463-14-4 in the previous year. There was a marked increase in the outturn of grass which was expected, as a result of improvements effected. The License Officer introduced a system of ploughing up small portions of the farm and allowing the ground to lie fallow for about a week, a measure which materially helped to increase the outturn.

During the year 226 head of cattle were seized and sent to the police pound against 502 in the previous year. The fall in the number of cattle that

trespassed into the farm was due to the appointment of an Assistant Bailiff, which resulted in better prevention of illicit grazing.

There was a curtailment of the farm during the year by 4 cawnies, 3 grounds and 236 sq. ft. by erosion of the sea. The working area was therefore reduced to this extent.

The total expenditure on the maintenance of the farm, amounted to Rs. 31,851-0-6 leaving a net profit of Rs. 21,417-13-5 against Rs. 18,284-13-2 in the previous year.

33. *Private Markets*.—There were 42 markets and the fees collected amount to Rs. 3,725 against Rs. 3,750 in the previous year. The figure Rs. 3,725 excludes Rs. 50 received in advance for the ensuing year.

34. *Fees for Licenses, Registration, etc.*—The fees collected under this head, amounted to Rs. 77,835-8-0 as detailed in Table No. 20, Appendix II, against Rs. 74,121-12-0 in the previous year. As in previous years care was taken to see that sanitary conditions as required by the by-laws were enforced on Licensees.

35. *Interest on Investments* :—A sum of Rs. 2,123-8-0 was realised as interest on the securities in favour of Rajah Sir Ramaswami Mudaliyar Maternity Hospital. The interest derived on investment of the surplus funds amounted to Rs. 34,828-11-10 under the revenue and capital accounts put together as compared with Rs. 28,577-2-7 in 1916-17.

36. *Grants and Contributions* :—Rs. 1,40,126 as detailed below were given by Government as grants and contributions during the year :—

(1) Rs. 20,000 for the maintenance of the Mount and Poonamallee Roads ;

(2) Rs. 4,219 for the repair of the bridges over the Cooum and Buckingham Canal ;

(3) Rs. 2,000 towards the Zoological collections in the People's Park ;

(4) Rs. 300 for the payment of batta to pregnant women in Rajah Sir Ramaswami Mudaliyar Maternity Hospital.

(5) Rs. 13,607 compensation for withholding sanction for the issue of licenses by the Corporation for places used for the sale of spirituous and intoxicating liquors ; and

(6) A special grant of Rs. 1,00,000 for sanitary works.

With the exception of No. 6 all are recurring grants.

37. *Payment for water supplied for non-domestic purposes. (a) Current* :—The demand under this head amounted to Rs. 1,39,434-1-0 against Rs. 1,47,838-4-7 in the previous year. Current collections came to Rs. 1,27,303-8-0 and Rs. 12,110-5-0 were outstanding at the end of the year against Rs. 14,043-4-0 in the previous year. Of this balance Rs. 3,173-6-0 have since been collected.

(b) *Arrear*.—The arrear outstanding at the beginning of the year was Rs. 14,049-4-0 which rose to Rs. 20,080-4-0 by supplemental charges made for the previous year. A sum of Rs. 19,817-12-0 was collected and Rs. 117-12-0 was remitted leaving a balance of Rs. 144-12-0 at the end of the year.

General Incidence of Taxation.

38. The incidence of taxation per head of population under all taxes including tolls was Rs. 4-8-9 against Rs. 4-5-3 in the previous year.

Advance Account.

39. At the beginning of the year, a sum of Rs. 1,57,570-10-1 was outstanding, of which permanent advances held by the several officers of the Corporation amounted to Rs. 1,13,360 and miscellaneous advances to Rs. 44,210-10-1. The "Permanent Advances" are represented almost entirely by the money invested in the stock at the Corporation Stores. The "Miscellaneous Advances" include payments made on account, amounts for which bills have been sent out, amounts paid in advance or in deposit but awaiting adjustment. During the year, miscellaneous advances amounting to Rs. 27,612-6-8 were adjusted and fresh advances were made to the extent of Rs. 225. "Permanent"; and Rs. 14,201-12-4 "Miscellaneous." The advances outstanding at the close of the year were thus Rs. 1,13,585 under "permanent" and Rs. 30,799-15-9 under "Miscellaneous" or Rs. 1,44,384-15-9 in the aggregate against Rs. 1,57,570-10-1 at the end of the previous year.

EXPENDITURE.

Grant I—(Public Works).

Communications.

New Works.

40. Out of Rs. 16,340 provided in the revised estimate, Rs. 8,488 only were spent on the following important works:—

(1) The stone curbing for the footpath 4,200 ft. long from Springhaven Road to the Old Band Stand at Cupid's Bow, was completed at a total cost of Rs. 3,866 and a tender for Rs. 7,900 was accepted for providing a retaining wall to the same, setting back lamp posts, etc., and the work is in progress.

(2) Lands were acquired at the following places:—

- (a) In Tondiarpet for connecting Kathbada Street with Cochrane Basin Road, 3rd Division.
- (b) In George Town for widening Saravana Mudali Street.
- (c) In Triplicane for widening the road at the junction of Pycrofts Road with Feroz Saib Street, 18th Division.

and (d) In Egmore for rounding off the corner at Velayuda Chetti Street and Subroya Mudali Street, 13th Division.

Improvements to roads by shifting posts were effected at the junction of Hunters Road and Vadhyar Canda Pillai Street, 11th Division, and at Lloyds Road junction of Royapettah High Road, 19th Division.

The decrease in expenditure under this head is due to the acquisition of land for widening Venkatesa Naick Street, Triplicane, at a cost of Rs. 3,000 having been under correspondence throughout the year and consequently not paid for and to the anticipated expenditure to an extent of Rs. 4,000 for providing a retaining wall to the footpath in North Beach Road not having been incurred during the year.

41. *Private Streets:—Lands.* (1) in Perumall Coil Garden Street and Anna Pillai Street, 8th Division, (2) in R. S. No. 671 of Perambore at the end of Old Powder Magazine Road at Vyasarpadi, 10th Division, and (3) in R. S. No. 56 of Nungambakam (Majid Mahomed Dowlah Garden Paracheri), 15th Division, were taken over by the Corporation under Section 246 of the Act and declared as public streets. The formal acquisition of the portions in R. S. Nos. 1284-2, 1291, 1292-1, 1294, 1296 and part of R. S. No. 1289 of Triplicane (Sirdar Jungs Garden) referred to in the previous report, is still under progress.

Repairs.

42. The total expenditure incurred for the maintenance of roads, bridges, culverts, payments for crushers, Asphalt mixing plant, etc., was Rs. 3,49,824 against the revised estimate of Rs. 3,61,100 the decrease in expenditure being due to the cost of reform of roads completed, but not paid for within the year.

43. *Reform and Repair of Roads.*—During the year, 2 miles 3 furlongs 192 yards of unmetalled roads, were metalled for the first time. The number of squares (100 sq.ft.) laid in the reform of roads was 47,747.76 which is equivalent to 45.21 miles of roads 20 ft. wide, against 43.46 miles of roads reformed in the previous year. The increase in total length of roads reformed is partly due to the fact that more laterite was used this year than last year. (*Vide* details in Table No. 17 Appendix II).

The quantity of materials used in reform and in patching of roads was as follows:—

		B. Granite. C.ft.	V. Granite. C.ft.	Laterite. C.ft.
Reform	1917-18.	6,45,966	1,11,048	6,69,888
"	1916-17.	7,02,782	2,41,283	4,71,563
Patch	1917-18.	1,08,807	11,421	57,919
"	1916-17.	1,29,807	13,697	62,354

The cost of reform including materials, carting and laying but exclusive of rolling was Rs. 1,79,514. The 45.21 miles of roads reformed cost Rs. 3,970 per mile as against Rs. 3,997 in 1916-17.

The areas of roads of different thickness reformed with granite are as follows, the figures being squares in each case.

	6"	5"	4"	3"	2"
1916-17.	2,518	24	11,520.25	15,959.30	2,443.50
1917-18.	908.80	...	9,491.81	14,499.25	3,089.80

44. *Tarring Roads.*—Two lengths of roads amounting to 2 furlongs and 77-1/3 yds. were tarred for the first time and five other roads amounting to 1 mile 4 furlongs and 100 yards were retarred. At the end of the year, the total length of tarred roads in the city was 9 miles 6 furlongs and 77-1/3 yards. The import of tar from England was prohibited during the year.

Asphalt Macadam work was done departmentally in Malayaperumal Street, Georgetown, as an experimental measure at a cost of Rs. 4,774. Sufficient time has not elapsed to express an opinion on the subject on the basis of this experiment.

An experimental concrete road surface over Laws Bridge 345 ft. long was laid at a cost of Rs. 4,505, the Madras Electric Tramways having kindly lent their concrete mixer.

45. *Bridges and Culverts.*—The work of painting the Napier Bridge in South Beach Road, (2) constructing side passages for pedestrian traffic for the bridge at Farrens Road, and (3) overhauling and reconstructing Mundacanniamman Coil Bridge, were commenced late in the year and are under progress.

Culverts at the junction of Manicka Chetty Street and Perambore Barracks Road and at the junction of Mc. Nicholas Road and Dares Garden were constructed and minor repairs to the culverts at the junction of Ritherdon Road and Letangs Road, 12th Division and in DeMelloes Road Burial Ground, 14th Division were effected during the year.

Buildings.

New Works and Repairs.

46. The following table shows the provision made under this head in the revised estimate and the expenditure incurred during the year:—

		Revised Estimate. Rs.	Expenditure. Rs.
1. Revenue Account	...	93,343	83,639
2. Capital Account	...	11,550	5,789
3. Government Grant	...	41,827	23,607
Total	...	1,46,720	1,13,035

Rs. 77,583 were spent on "New Works" and Rs. 35,452 on "Repairs."

47. New Works.

Rs. 77,583 were spent against the estimated amount of Rs. 1,01,920, the decrease being mainly due to:—

(a) Postponement of construction of a Model school at Hope Lodge at Vyasarpady, 10th Division. The contractor to whom the contract was first let failed to commence the work and his contract was cancelled. Fresh tenders were called for but the rates quoted being very high no tender was accepted.

(b) Work having been commenced but no bills submitted on (1) the construction of a Dhoby Khana at Robinson Park, (2) extension to Chetput Dhoby Khana, and (3) construction of a Model school at Edapalayam, 9th Division, and,

(c) Claims in respect of completed works not having been preferred within the year.

(1) *Hospitals.*—Fixing drainage and sanitary fittings at Rajah Sir Ramaswami Mudaliyar's Lying-in-Hospital at Monegar Choultry Road, at a total cost of Rs. 4,960 was completed and the store room at the hospital was converted

into a latrine and bath room. A stable for the Resident Assistant Surgeon and a store room for dhobies were constructed at the Royapettah Hospital and a well (8 ft. diameter) was sunk for washing purposes to economise the consumption of Red Hills water. A flush out latrine of three seats was erected at Bauliah Naidu Dispensary.

(2) *Model Schools.*—Land in R. S. No. 3217 of Purasawakkam was acquired at a cost of Rs. 863, for a Model School at Obrapaliyam, 14th Division, and the construction of a Model School in Hanumantharoyan Coil Street, Edapalayam, 9th Division, was commenced late during the year and is now under progress. Minor improvements to certain other Model Schools also were effected.

(3) (a) *Works carried out for the Health Department.*—The drainage arrangements to the Model Milch Cow House at 'B' Depot in Basin Bridge Road were completed and improvements to the mangers of the cattle sheds were made.

(b) *Latrines.*—A flush out latrine of 18 seats in Andiappa Mudali Street, 2nd Division, was completed and the construction of two other latrines of 30 seats each, one at Amman Coil Hutting Ground, 7th Division, and the other at Budaperumall Naick Street, 15th Division, is under progress.

The Government of India having sanctioned the transfer of military land on the Esplanade near Law College Pumping Station for the construction of a flush-out latrine, necessary arrangements are being made to take over the land.

Land in R. S. No. 3708, 3709 and 3710 of Georgetown was acquired at a cost of Rs. 2,869 for the construction of a latrine at Ebramjee Saib Street, in lieu of the land and latrine surrendered to Government for construction of huts for Harbour Police, Government having contributed Rs. 7,000 to the Corporation.

(c) *Cattle, Cart and Pail Depots.*—In Basin Bridge Road Cattle Depot, a store shed, an office room and a straw shed were constructed and the bays at Chulai and Krishnampet were extended to accommodate the increased number of bullocks.

In Harris Road Cart Depot, coolies' lines were constructed, a lorry loading platform 30 feet X 30 feet paved with granite sets was erected, and the existing two end bays were converted into a motor lorry shed.

A Pail Depot at Langs Garden, a store shed for the Pail Depot at Ice House Road and an enclosure wall for the Rubbish Depot in Audiappa Mudali Street, were completed. Construction of a Pail Depot at Royapuram at an estimated cost of Rs. 6,500 was under progress.

Land in R.S. Nos. 2329, 2330 and 2331 of Georgetown was acquired at a cost of Rs. 11,077 for a Rubbish Dumping Depot at Vasapmode Paracheri.

(d) *Markets.*—Three roofed platforms and sunshades were put up at Smithfield Market, in Chulai, 11th Division.

(e) *Dhobi Khana.*—The construction of a Dhobi Khana at Robinson Park and the extensions to the existing one at Chetput commenced late during the year, are under progress.

(f) *Bathing Fountains.*—A bathing fountain at the junction of Post Office Street and Linghi Chetti Street was constructed and another one at Sivangnanam's Park was nearing completion towards the close of the year. The acquisition of land at the junction of Rungiah Chetti Street and Raghava Chetti Street, Purasawakkam, for a bathing fountain is under progress.

(4) *Other Works.*—A new cage for the lions, a tiled shed for the lama and a teelery were erected in the Menagerie enclosure in People's Park.

A compound wall on the northern side of Sivangnanam's Park, was constructed.

Installation of electric lights and fans at an estimated cost of Rs. 2,500 in the Corporation workshops and stores, and construction of quarters for the Kilpauk Pumping Station Staff, are under progress.

The existing motor fire engine sheds at Egmore were extended and a motor lorry shed at Acharappan Street, was constructed.

48. Repairs.

Details of repairs and improvements to Municipal buildings and the cost of such works are shown in Appendix I, Statement II-A, Part II.

Water-supply and Drainage—Special Works Department.

49. The total expenditure on the new water and drainage works to 31st March 1918, was as follows :—

Water-works	...	...	Rs.	55,33,413
Drainage-works	...	...	"	40,07,370
Storm-Water and Anti-Malaria drainage.	...	...	"	49,548
Total	...	...	Rs.	95,90,331

The value of work executed during the year was as follows :

Waterworks	...	...	Rs.	71,338
Drainage-works	...	...	"	5,24,440
Storm-Water and Anti-malaria drainage.	...	...	"	18,589
Total	...	...	Rs.	6,14,367

This is but a small fraction of the amount that would have been expended, had the works been carried out, as originally planned in pre-war days.

As was pointed out in the last report, the necessity for economising in every possible way has led to the temporary postponement of a portion of the waterworks, and the large portion on the drainage works, and the adoption of a Restricted Programme of construction. On the waterworks, this involves the omission, for the time being, of the filter bed extension, waste water meter system, and a length of some 65 miles of cast-iron distribution pipes varying from 4 to 10 inches in diameter.

On the Drainage works everything is omitted except the urgently needed works which have been described in the Special Engineer's Restricted Programme Report.

In both the Waterworks and Drainage Sections, a large proportion of the work has been carried out by direct departmental labour. This has been found cheaper, quicker and better than contract work. The accurate knowledge of costs thus obtained has made it possible to insist on a considerable reduction in prices for the work executed by contract. The saving obtained will be clearly seen by reference to Appendix II, Tables Nos. 10 to 13.

Waterworks.

50. *Construction.*—The work executed during the year has consisted mainly of laying new distribution pipes. The total length laid to date under the new scheme is 4,34,800 feet, of which 96,360 feet was laid during the year under review. The Restricted Programme has been completed with an appreciable saving, due partly to the considerable reduction in the cost of pipe laying which has resulted from departmental work, and also to the high prices which have been obtained for unserviceable articles. In consequence, an Extended Restricted Programme has been started, and is still in course of execution. It includes the laying of the most urgently required pipes that were omitted from the Restricted Programme.

51. *Consumption of Water.*—The quantity of water supplied during the year has been 5,038.08 million gallons, which is equivalent to 27 gallons per head per day. The maximum average daily consumption per head in any month was 30 gallons in March 1918 and the minimum was 26 gallons in July 1917. That this consumption has not been exceeded, is due to the strenuous efforts made to prevent and check waste. During the year, the waste detection staff examined 21,000 houses and brought to notice over 3,000 defects in the services.

In addition, the pressure in the principal mains was restricted as shown in the following table :—

Time.	Pressure above ground level in feet.
5 A.M.— 9 A.M.	45 ft.
9 A.M.—10 A.M.	35 "
10 A.M.— 6 P.M.	25 "
6 P.M.—10 P.M.	15 "
10 P.M.— 5 A.M.	10 "

 CORPORATION OF MADRAS

These pressures have been fixed, after trials over a long period, as the lowest pressures which will secure a reasonably satisfactory supply throughout the day.

Drainage.

52. On the drainage work, progress has been greatly reduced owing to the impossibility of obtaining pipes and machinery from England. Some pipes have been obtained from Messrs. Burn & Co. of Howrah, but they cost considerably more than the contract price for the English pipes, largely due to the high railway freight charges. The difficulty of obtaining wagons has made it impossible to get large quantities of pipes.

Acting on the principle of executing, so far as possible, work that employs local labour and materials, the Purasawakam gravitation main was started and the foundations of the new Napier Park and Purasawakam pumping stations were completed. On the same principle, the Special Works Department has gradually taken up more and more storm-water and Anti-malaria drainage work which is executed almost wholly with local materials and labour.

53. *Construction*—The principal works carried out during the year, are as follows :—

(1) *Gravitation Mains*.—The construction of Gravitation Main No. 1 which will convey all the sewage from the Southern and Western areas of the city was begun on 2nd July 1917. Half of the length of the main was completed by the end of October 1917, when, owing to the rise in the level of the subsoil water, it was decided to stop the work. It will be re-started about the beginning of next May.

(2) *Ice House Road Area*.—The collecting, screening, and suction wells for the Ice House Road Pumping Station have been completed.

The 36-inch diameter cast-iron pipe connections between the suction and screening wells of the pumping station have been laid.

Collapsed 6-inch cement pipe sewers have been relayed in Javar Hoossain 2nd Street and Mahomed Hoossain Khan Street with 9-inch and 6-inch stoneware pipes and the remaking of all house connections.

(3) *Napier Park Area*.—The work executed during the year in the Napier Park area includes the construction of stoneware pipe sewers in all the streets in the area east of Viraraghava Mudali Street and between Pycrofts Road and Wallajah Road and in most of the streets between Viraraghava Mudali Street and Triplicane High Road. Wherever sewers have been laid, the houses have been connected up, and all open side drains not required to convey storm water, have been filled up, thus effecting a great improvement in the condition of the streets.

The construction of the foundations for the Napier Park pumping station has been completed and the compound wall has been started.

(4) *Royapuram Area.*—The laying of 9-inch and 6-inch sewers in Ammen Koil Street, Vasamedu Street, and Telegraph Abboy Naidu Street, have been completed. Otherwise sewer laying has been stopped for want of pipes.

(5) *Purasawakkam Area.*—The principal works carried out during the year are the lower section of the Purasawakkam Gravitation Main, the deep intercepting sewers in Pusala Paracheri Street and Perambore Barracks Road, shallow sewers in the Puliantope Road area, the Engine House up to floor level, and Anti-malaria drainage works. All these works were executed by direct departmental labour except excavation which was done by piecework contracts.

(6) *Gravitation Main, No. 5.*—The laying of the 30-inch diameter cast-iron pipes forming the lower section of the Purasawakkam Gravitation Main was started in the beginning of the official year and was completed on the 24th June 1917. Up to the end of April, owing to the treacherous nature of the soil, the pipes had to be supported on timber bearer piles driven about eight feet below the bottom of the excavation. But in the beginning of May, owing to the improved condition of the soil, it became possible to construct the sewer in brickwork in place of the more expensive cast iron pipes.

(7) *Deep Intercepting Sewers.*—The laying of 24-inch and 21-inch diameter cast iron pipes in Perambur Barracks Road was commenced in the beginning of July 1917. Here, too, the ground proving treacherous, the use of long timber bearer piles to support the pipes was resorted to. At the end of September, work was stopped in this section owing to the rise of the sub-soil water level and to the difficulty in obtaining cast-iron pipes.

The laying of 18-inch diameter stoneware pipes was carried on in Pusali Paracheri Street. Though the sewer was laid as deep as 18 feet below ground level in a narrow street, the work was carried out with very little damage to the buildings and at a great saving on the estimated cost. This was due to the nature of the soil, which was good hard clay, and the absence of much sub-soil water in the trench.

(8) *Deep Main Sewers.*—Stoneware pipe sewers 12-inch diameter were laid in Gangadeswarar Koil Street and Puliantope Road. In the former, where the soil was sandy, an enormous quantity of water was encountered in the trench and heavy pumping was required. In the latter for about 120 feet length the sub-soil was slushy, necessitating the use of cast-iron pipes supported on bearer piles driven into the ground. In the other lengths work was pushed on without much difficulty.

The laying of 9-inch diameter stoneware pipe sewers in Vikakaran Street and some of the streets in Puliantope Road area was carried out during this period.

(9) *Pumping Station.*—Five penstocks were fitted in the wells of the pumping station. They were tested under pressure and found satisfactory.

SPECIAL WORKS DEPARTMENT—ANTI-MALARIA SECTION

PLAN SHOWING WORKS PROPOSED AND CARRIED OUT FOR DRAINAGE OF TANKS IN PURASAWAKKAM.

J. W. Madhavan

M.A., M. INST., C.E., ETC.,
SPECIAL ENGINEER, CORPORATION OF MADRAS

The foundations of the Engine House were started on the 2nd December 1917 and by the 1st week of March 1918, the brickwork reached basement level. Then the work was temporarily stopped to allow the walls to settle.

(10) *Anti-malaria Drainage Work.*—The De-Caster Road Scheme and a portion of the 'Main Channel' have been completed during the year. The following Table shows the work done, the cost, the results obtained, etc.

Particulars of Tanks.			Length of drain constructed.	Costs.	
Name.	No.	Area reclaimed.		Estimated.	Actual.
				Rs. A. P.	Rs. A. P.
De Caster's Road Tanks...	9	7 acres.	2,641 feet.	11,230 0 0	5,358 0 0
Main Channel (up to De-Mellows Road) ...	3	20 acres.	2,800 feet.	23,400 0 0	12,860 0 0 For part only.

54. *Drainage Maintenance* :—The question of drainage maintenance has become more acute owing to the impossibility of carrying out the main drainage as originally planned. So far back as 1910, it was pointed out by the Special Engineer that the Madras drainage work already executed was in a most unsatisfactory condition, and was likely to become much worse, if not remedied before the new water-supply was introduced, and that the eventual result would be a complete breakdown of the sewerage system, unless measures were taken to increase the capacity of the sewers and more especially of the pumping stations.

Since then, the drainage works of the Tondiarpet Section of the city have been carried out, and the designs for the whole city were completed in 1913. Had it been possible to proceed with the latter as intended, we should now be in the position of having adequate pumps and satisfactory sewers for all the thickly populated areas of the city. Unfortunately, the war has intervened, and even the very much Restricted Programme adopted by the Corporation has been greatly delayed, because it has been impossible to obtain pumping machinery, and because the delivery of pipes has been very slow. Whereas the newly sewerred areas are satisfactory, and the Tondiarpet pumps have no difficulty in dealing with the sewage, the old sewers have been getting worse and worse, and in many cases have broken down altogether. It is impossible to make the drainage satisfactory, until the new works have been carried out, but as this cannot be done for some time, every effort must be made to maintain the existing sewers as efficiently as possible.

At present, the pumps do not keep the sewage down and the sewers are continually filling with silt. Old sewers, which a few years ago might have been made usable with efficient pumping and cleaning, are now being taken up, because they are so fully choked that it is cheaper to do this than to clean them. The old sewers will continue to get worse, and more and more of them will have to be removed. Even the new sewers will silt up to some extent in those areas,

such as Napier Park and Ice House Road, where the pumps fail to keep down the sewage, for it is impossible to keep surcharged sewers clean.

There is thus imminent danger of the complete breakdown of the drainage over large areas of the city. There is already considerable local breakdown.

In order to find what can be done, it has been arranged that one area shall be placed under the Senior Assistant Special Engineer, who will study the conditions carefully, with a view to ascertaining what can be done to keep things going, until pipes and pumping machinery can be obtained and installed on the lines of the Main Drainage Scheme, for there is no doubt that the drainage of Madras will remain unsatisfactory until the Main Drainage Scheme has been carried out. Not till then are the inhabitants of Madras likely to enjoy the full measure of health to which they are entitled.

Water Supply and Drainage—(Ordinary).

Drainage.

55. *New Works* :—In 450 houses, house drains were connected with the syphons and in 513 houses, connections were made from the syphons to the Municipal sewer, the total cost being Rs. 19,260.

Amount provided for in the Revised Estimate for laying sewers, construction of side drains and storm water channels was Rs. 52,280, of which Rs. 9,979 was spent on laying sewers and Rs. 32,286 on constructing storm water and side drains. The following are the important works done during the year :—

(1) Six inch sewers were laid in Badsha Saib Street and Lane, in Jani Jankhan Road 1st Lane and in Rajagopal Naick Lane, including house connections with silt catcher buckets.

(2) A portion of Kellys drain was covered with Siegwart beams and portions of the drain breached by the sea were repaired.

(3) Prevention of flooding in Moor Street, 4th Division, during heavy rains, improvements to north out-fall at Kellys Drain at Georgetown, and construction of storm water drains across Salt Depot, are being carried out by the Special Works Department.

56. *Repairs*.—The repairs to drains and their cost are shown in Appendix I, Statement II-A, Part II.

Sewage Pumping Stations.—The cost of maintenance of these stations including establishment, labour, etc., was Rs. 2,24,262 against Rs. 1,97,462 in the previous year. The marked increase in expenditure is partly due to the purchase of coal from outside firms at an increased rate, owing to the failure of supplies from the contractor and mainly due to the purchase of a stock of coal kept to provide against failure of contractors or other emergencies.

Table No. 15 Appendix II, shows the cost of pumping at the different pumping stations.

Sewer cleaning.—The following Table shows the length of sewers cleaned, obstructions removed, etc., during the year:—

Area or Locality.	Length of sewers cleaned in feet.	No. of obstructions removed from mains.	No. of obstructions removed from syphons.	Quantity of silt removed from man-holes and separators. C.ft.
Tondiarpet or New Drainage Area.	5,417	17	73	18,752
City or Old Drainage Area ...	10,28,450	3,034	872	1,16,105

Besides removing silt from the sewers, 96,023 c.ft. of silt was removed from the wells of the pumping stations in the city during the year by a special gang of coolies employed for the purpose. This systematic removal of silt from the pump wells has tended to improve the condition of the sewers as well as of pumping stations.

Water-Supply.

57. (1) *Kilpauk Pumping Station*.—The total number of gallons of water pumped during the year was 5,038·08 millions as against 4999 in the previous year. The cost of maintenance of this station including establishment, amounted to Rs. 1,11,032 as against Rs. 94,600 in the previous year. The increase in the expenditure is mainly due to purchase of stock coal and to the special repairs to the engines.

The Standing Committee sanctioned a proposal to pay the Superintendent of the Pumping Station a bonus proportionate to the savings effected by him, and a sum amounting to Rs. 700, was paid to him as bonus during the year as against Rs. 500 last year, the total bonus paid up to 31st March 1918 from the date of sanction being Rs. 1,200.

Regarding training apprentices as Water Works Overseers, one apprentice was taken on during the year; of the two apprentices undergoing training, one was appointed as Water Works overseer as he completed his apprentice course satisfactorily and proved efficient for the work.

(2) *Private Water Services*.—During the year 622 new services were laid by licensed plumbers and 3,652 were repaired, cleaned, altered or extended. Of the 622 new services, 59 were first class connections and the rest second class. The total number of house service connections in the city on the 31st March 1918 was 29,326. There were 39 licensed plumbers during the year. The quantity of

water used for non-domestic purposes was 185,885,080 and the amount collected for the same during the year was Rs. 1,47,121.

(3) *New works*.—During the year 7,469 ft. of pipes were removed, cleaned and relaid and 4994 ft. of new mains (Table No. 16 Appendix II) as against 4,153 ft. last year, were laid. Eight valves, 31 stop cocks, 1 hydrant and 118 meters were also fixed during the year. The total expenditure under this head was Rs. 15,944 against Revised Estimate of Rs. 17,760.

There were 1,412 public fountains, 77 cattle troughs and seven bathing fountains within the Municipal limits at the beginning of the year. 25 fountains, one cattle trough and two bathing fountains were erected and one fountain and one cattle trough were removed during the year leaving 1436 fountains, 77 cattle troughs, and nine bathing fountains at the end of the year.

(4) *Repairs*.—On the 1st April 1917, the level of Red Hills Lake stood at 41.81 and on the 31st March 1918 at 44.06.

The rainfall and average water level for each month as furnished by the Public Works Department are shown in Table No. 18, Appendix II. The quantity of water taken out of the lake and measured at Red Hills during 1917-18 is 803,180,745 c.ft. as against 848,933,243 c.ft. in the previous year. The cost of maintaining the lake, filter beds, conduit, delivery channel, fountains, pipes including the establishment amounted to Rs. 66,098 as against Rs. 70,430 in the previous year.

Miscellaneous.

58. *New Works*.—The expenditure under this head amounted to Rs. 285 only against a sum of Rs. 2,600 provided for in the revised estimate, the decrease in expenditure being mainly due to the construction of a revetment and apron to the out-flow channel of the Sewage Farm at Tondiarpet having been commenced late in the year and consequently not paid for.

Administration.

59. *Notices*.—5,351 notices were served under various sections of the Municipal Act chiefly to prevent misuse and wastage of water and to remove encroachments, projections, unauthorized constructions etc. Out of these, 4,706 notices were complied with.

60. *Permits*.—3,801 applications for permission to construct or reconstruct buildings and huts under sections 268 and 278 of the Act were received during the year and in 3,436 cases, permits were issued. The remainder were under correspondence and pending payment of license fees. The amount of license fees collected was Rs. 7,254. 1,581 permits for carrying out simple repairs were also issued during the year.

61. *Prosecutions*.—Magisterial proceedings were instituted in 72 cases of which 39 convictions were secured, fines levied amounting to Rs. 127. In 15 cases, summonses were withdrawn owing to compliance by the parties themselves. Parties could not be traced in 18 cases.

62. *Provisional and Final Orders*.—In 953 cases, provisional orders under Section 287 (1 and 2) of the Municipal Act were issued and as the parties failed to comply in 661 cases, final orders were issued under Section 287 (3) of the Act.

Grant II.—Education.

63. The progress made under elementary education during the year is given in the report of the Sub-Assistant Inspector of Schools printed in Appendix III.

The expenditure under this head, amounted to Rs. 40,982-15-2 against Rs. 39,416-7-11 in the previous year, the increase being due to the maintenance of the five elementary schools which were opened just at the close of the year, 1916-17.

64. According to the scheme sanctioned in G. O. No. 820-M., dated 25th May 1911, 28 schools should have been constructed and 24 opened by the end of the year. No additional school was either completed or opened during the year under report. The twenty schools which were constructed and opened (excluding the school at Chetput) after the date of sanction of the above scheme continued to work.

65. The total number of schools, viz., 21 maintained by the Corporation remained the same as at the end of the previous year. There were 2,822 boys and 480 girls on the rolls of these schools on 31st March 1918 against 2,338 boys and 404 girls at the end of 1916-17. There were 126 teachers in the Corporation schools and most of them were professionally qualified. Those that were not qualified have been informed that they will not be confirmed until they qualify themselves fully.

Permission was granted to philanthropic associations and societies to conduct free night schools for the poor in 19 of the Corporation school buildings and a few of the teachers of the Corporation schools were also granted permission to be on the staff of those schools.

Twelve teachers were under training during the year in the Government Training School, Triplicane. The total amount of stipends paid to these teachers was Rs. 968-11-4.

GRANT III.—Sanitation and Medical Services.

Hospitals and Dispensaries

66. *Rayapettah Hospital*.—The expenditure on the maintenance of this hospital fell from Rs. 50,809-1-0 to Rs. 41,697-5-9 and is less than the revised estimate by Rs. 7,122-10-3. The decrease was due to the fact that European medicines were supplied for nearly Rs. 8,000 less in 1917-18 than in 1916-17. The total number of in-patients and out-patients treated in this hospital was 2,815 and 58,652 as against 2,594 and 61,381 in the previous year.

67. *Rajah Sir Ramaswami Mudaliyar Lying-in-Hospital.*—The amount spent on this institution was Rs. 19,111-9-3 against Rs. 14,136-0-10 in the previous year and Rs. 20,040 in the revised estimate. The increase over the expenditure of the last year was due to fresh supply of bedding and to the manufacture of lockers and cradles. The total number of in-patients treated was 1,804 against 1,842 and that of out-patients 1,868 against 995 in the previous year.

68. *Washermanpet Dispensary.*—The maintenance of this institution cost Rs. 5,410-13-5 against Rs. 4,955-11-10 in the previous year. The increase when compared with the previous year was due to the increase in the number of patients treated. The number of patients treated rose from 23,007 to 27,449.

69. *Baliah Nayudu Dispensary.*—The expenditure amounted to Rs. 7,681-5-2 against Rs. 7,668-6-3 in the previous year and against Rs. 8,380 in the Revised Estimate. The number of patients treated was 48,576 against 47,065 in the previous year.

70. *Chintadripet Dispensary.*—The outlay on the maintenance of this institution was Rs. 4,524-3-9 against Rs. 4,429-1-3 in the previous year and Rs. 4,410 in the revised estimate. The number of patients treated was 34,113 against 35,475 in the previous year. The increase in expenditure was due to increased rates for supply by contractor.

71. The reports of the Medical Officers in charge of the above hospitals and dispensaries appear in Appendix IV.

Contributions.

72. *Hospitals.*—The usual contribution of Rs. 20,000 for hospitals was paid to Provincial Funds during the year.

73. *San Thome Dispensary.*—The usual monthly contribution of Rs. 66-10-8 and the annual contribution of Rs. 300 were paid to this Dispensary during the year. The number of patients treated rose from 10,341 to 10,879.

74. *St. Thomas Convent Dispensary.*—A monthly contribution of Rs. 20 was as usual paid to the Dispensary. The number of patients treated rose from 9,315 to 9,328.

75. *Victoria Caste and Goshia Hospital.*—A contribution of Rs. 1,000 for the year, 1917-18 was paid during the year. The number of patients treated during 1917 was 15,496.

76. *Sri Kanyaka Parameswari Devasathanam Ayurvedic Dispensary, Georgetown and Venkataramana Dispensary, Mylapore.*—Contributions of Rs. 500 and Rs. 100, respectively were paid to these two Institutions during the year under report. The number of patients treated in the Sri Kanyaka Parameswari Devasathanam Dispensary was 35,759 and that in the Venkataramana Dispensary was 26,350 against 31,717 and 25,598, respectively, in the previous year.

27

77. *Kalyani Hospital*.—A contribution of Rs. 600 for 1917-18 was paid to the Institution during the year.

78. The reports of the above Institutions appear in Appendix IV.

79. *Sembien Dispensary*.—A sum of Rs. 780 was as usual paid to the District Board of Chingleput, being the moiety of the charges for the upkeep of the Dispensary.

80. *Pasteur Institute of South India, Coonoor*.—The annual contribution of Rs. 250 sanctioned in G. O. No. 14-M., dated 15th January 1909 was paid during the year.

81. *Monegar Choultry and Native Infirmary*.—The annual contribution of Rs. 1,500 sanctioned in G. O. No. 646-M., dated 22nd April 1909 was paid towards the maintenance of these Institutions.

82. *Georgetown Dispensary*.—The annual contribution of Rs. 8,824 was paid during the year.

83. *The Madras Ambulance Corps*.—A contribution of Rs. 100 sanctioned in G. O. No. 1859-M. Mis., dated 31st October 1917 was paid to the Madras Ambulance Corps for the purchase of a Motor Ambulance car.

Roads Watering.

84. The expenditure incurred under this head amounted to Rs. 15,407 as against Rs. 19,277, in the previous year.

To alleviate the dust nuisance, a road sweeping machine was purchased from the Madras Engineering Works at a cost of Rs. 1,350 in October 1917 and the machine having been found to work effectively, three more machines were ordered and they were being manufactured.

The 4" hydrant in North Beach Road near the Customs House referred to in the last report, was fixed at a cost of Rs. 184.

Grant IV.—Miscellaneous Municipal Purposes.

Lighting.

85. The total number of kerosine oil lamps and power lamps at the beginning of the year was 4,374 and two respectively. Of these 310 oil lamps and one power lamp were removed during the year owing to extension of electric lighting. 125 new oil lamps were fixed during the year, the total number at the end of the year being 4,189 oil lamps and one power lamp. On account of bad lighting, a sum of Rs. 2,450-4-0 was imposed as fine on the lighting contractor.

Electric Lighting.—The plan facing this page shows the progress made

n electric lighting since the year 1911-12. The length of roads and streets lit with electricity and the number of lights installed in each year are as follows :—

Years.	Length lighted.	Number of Lights.		
		Installed.	Removed.	Balance.
	Miles.			
1912-13.	10	452	—	452
1913-14.	11	224	2	222
1914-15.	12	335	—	335
1915-16.	20	858	8	860
1916-17.	5	277	8	269
1917-18.	6.94	275	1	274
	64.94	2,431	19	2,412

Laying cables and fixing lights carried out during the year was done departmentally, as in the previous year with a view to secure economy and expedition. The expenditure under maintenance of street lights was Rs.80,409 against Rs. 67,905 in the previous year. The amounts paid to the lighting contractors alone, were as detailed below :—

			Rs.
Kerosine oil lamps	...	...	54,714
Power Lights	...	...	540
Electric Lights	...	...	23,165
Total ...			78,419

The balance of Rs .1,990 was spent on the departmental maintenance of these lights. The excess in expenditure over the revised estimate of Rs .78,000 is due to the installation of additional electric lights and to the lighting of oil lamps removed and subsequently ordered to be refixed.

The lighting was inspected on an average 38 times during the year.

Avenues

86. The total number of avenue trees at the end of the year under report was 15,558, of which 993 were fruit-bearing trees and the rest ordinary avenue trees. 660 trees were planted during the year. The number of trees fallen down was 398, of which 170 were old numbered trees and the rest unnumbered newly planted trees ; 1,819 trees required to be watered.

PEOPLE'S PARK—BAND STAND.

The expenditure under this head including the cost of supervision amounted to Rs. 7,594 as against Rs. 8,128 in the previous year.

Public Parks.

87. The License Officer was placed in charge of all the Parks in the City from 1st August 1917.

88. *People's Park.*—The People's Park has been improved to some extent but there is still much to be done.

The Band Stand, foliage shed and adjoining grounds have received special attention and the attached photograph shows the Band Stand after the improvements had been effected.

(1) *Receipts.*—The right to collect fees at the Menagerie was leased for Rs. 635-15-11 per month or Rs. 7631-15-0 per year against Rs. 710-15-11 per mensem in the previous year. The whole of this amount was collected during the year.

(2) *Charges.*—Food for the animals and birds in the Menagerie enclosure was supplied at a cost of Rs. 625-11-11 per mensem approximately.

(3) *Menagerie.*—(i) The saleable value of the livestock is Rs. 12,340-0-0.

(ii) The following animals were presented during the year :—

One Nilghay
One Spotted deer
Two Spotted Leopards cubs.

(iii) The following animals and birds were purchased during the year at a cost of Rs. 1,685 :—

One South African Silver Back Jackal.
One do. Colotrix Monkey.
One do. Porcupine.
Two Madagascar Lemurs.
One South African meerkat.
One Australian Opossum.
One Zebra.
Two Chinese pheasants.
Four Brahmani ducks.
Two large green Singapore parrots.
One large red Singapore parrot.
One Spider monkey.
Four Muscovy ducks.

89. *Napier Park.*—This Park has been partially improved but much cannot be done. A public road runs through the Park, it contains several private houses, and during the rains is inundated by the Coom.

90. *Robinson Park.*—This Park which was once a wild waste has been converted into a very pleasant garden. The grounds have been carefully laid out and the popularity of the Park as a place of resort is steadily increasing. The attached photographs show the Band Stand and Foliage sheds.

91. *Loane Square.*—This is very popular as a recreation ground.

92. The Receipts and Charges of the above four Parks appear in Appendix II Tables. Nos. 21 to 24.

93. The Band of the Madras Volunteer Guards played as usual twice a week on the Marina, four times a month in the People's Park, twice a month in the Robinson Park, four times a month in the Loane Square and twice a month in the High Court compound.

Fire

94. The cost of maintaining the three motor fire engines including the establishment was Rs. 14,288 as against Rs. 11,214 in the previous year.

There were in all 27 fires during the year as against 39 in the previous year. The engines worked at only ten cases. In the remaining cases, the fires were put out before the engines arrived at the scene of fire.

GRANT V—Supervision and Management.

95. The expenditure under this head amounted to Rs. 1,80,482-8-5 and was 5-29 per cent. of the total receipts of the year. The portion of this sum spent on the establishment maintained for the purpose of assessment and collections amounted to Rs. 92,117-8-6 or 2-70 per cent. of the total receipts.

Repayment of Debt.

96. The total investments at the beginning of the year on account of sinking funds relating to the several loans of the Corporation exclusive of the Government loans of Rs. 20 lakhs stood at Rs. 26,02,300 in Government Promissory Notes and stock certificates and Madras Municipal Debentures and Rs. 1,218-2-11 in cash. During the year under report an allotment of Rs. 1,24,080 was made to the Sinking Fund Account from general revenues and a sum of Rs. 40,321-2-8 was realised as interest on prior investments of the fund. The total cash receipts of the year amounted to Rs. 1,66,219-5-7. With this sum Government Promissory Notes and stock certificates and Madras Municipal Debentures of the face value of Rs. 1,69,900 were purchased at a cost of Rs. 1,64,479-4-5. The securities pledged with the Bank of Madras consisted of $3\frac{1}{2}$ per cent. and 4 per cent Government Promissory Notes of the face value of Rs. 1,67,900 and Rs. 70,000 respectively. Out of the $3\frac{1}{2}$ per cent. Government Promissory Notes, Rs. 1,06,900 were replaced by 5 per cent. War Loan Promissory Notes of the face value of Rs. 81,000. All these Promissory Notes were sold during the year and the loan due to the Bank was discharged, the excess being credited to general revenues. Out of the amount that

ROBINSON PARK—BAND STAND.

ROBINSON PARK—FOLIAGE SHEDS.

stood to the credit of the Government Loan for water supply and irrigation extension, the Accountant-General converted $3\frac{1}{2}$ Government stock of the face value of Rs. 22,500 into 5 per cent. War Loan Government stock of the face value of Rs. 17,100. The aggregate investments at the close of the year to the credit of the fund stood at Rs. 25,28,900 in Government Promissory Notes and stock certificates and Madras Municipal Debentures with a cash balance of Rs. 1,740-1-2. Payments amounting to Rs. 1,00,419-14-2 were also made during the year towards the Government instalment loans out of which Rs. 40,415-2-9 was appropriated by the Accountant-General towards the repayment of loans and Rs. 60,004-11-5 towards interest.

II Account.

97. This account, which exhibits the transactions relating to the Corporation Stores and Workshop, the payment made on account of the sinking fund for loans raised in the open market, and the security deposits of the Corporation servants and contractors, &c., opened with a balance of Rs. 15,65,468-14-8. The receipts during the year amounted to Rs. 10,49,933-3-5 and the expenditure to Rs. 11,51,021-13-9 leaving a balance of Rs. 14,64,410-4-4 at the close of the year.

Workshops.

98. The total value of works turned out in Workshops during the year was Rs. 1,56,731-3-6 (*vide* Appendix II, Table No. 25) against Rs. 1,04,712-6-5 in the previous year.

The amount earned in the shape of supervision charges, etc., was Rs. 22,257-11-2 against Rs. 16,757-1-11 in 1916-17.

The expenditure on account of wages of maistries and contingent charges amounted to Rs. 7,725-4-3 or 4.92 per cent. on the value of works turned out against 7.14 per cent. last year. The cost of establishment including allowances came to Rs. 11,691-8-4.

The total receipts exceeded the expenditure by Rs. 2,840-14-7, which represents the profit realized during the year.

APPENDIX III.

Report of the Sub-Assistant Inspector of Schools, George Town Range, on the working of the schools maintained and aided by the Madras Corporation during the year 1917-18.

Number and strength.—The number of schools at the end of the year remained the same as at the end of the last year (viz., 21), no new schools having been started. Though the aggregate strength of all the schools rose by nearly 600 during the year, the strength and attendance of some of the schools fell during the year notably at Sanjeevarayanpet, Korukupet, Purasawakkam, Nungambakkam while in others there was not any appreciable improvement on the strength of last year except in the schools at Malayappan Street, Choolai, Chetput and a few others. Curiously enough, the average attendance improved during the year in certain schools which had almost the same strength as last year and in some cases where it was lower than last year. On the other hand, certain schools whose strength was comparatively better, lacked adequate average attendance. This is evidently due to the extreme backwardness of the classes from which the pupils attending the schools are drawn and to a need for canvassing for pupils. A comparative statement showing the progress or otherwise of each of the schools in the matter of strength and attendance is submitted herewith.

In this connection it may be stated that the admission of Panchama pupils in schools situated in comparatively non-backward localities had an initial depressing effect upon the attendance of non-brahman caste Hindu pupils who stayed away. The fall in the strength of the Korukupet school was mainly due to this circumstance but Panchama pupils are gradually coming to be regarded as less and less objectionable.

Accommodation.—All the schools were located in buildings of their own. Gardens have been maintained and well attended to.

Equipment.—A supply of furniture, apparatus and appliances, carpentry and gardening implements was made during the year to some of the schools. The libraries existing in the schools are reported to have been made proper use of.

All the teachers employed in the schools were trained men with the exception of a few who held professional certificates granted by the department. The majority of teachers are of the Lower Secondary or Elementary Higher grade.

Instruction.—There was a distinct improvement during the year in the quality of the instruction imparted in most of the schools—the general knowledge of the teachers and their teaching methods having been improved by means of occasional lectures and model lessons in the course of the Inspecting Officers' surprise visits.

APPENDIX III.

119

Finance.—Particulars relating to this are not in the possession of this office.

Schools aided by the Corporation.—Nil. (Para. 2. of G. O. No. 820-M., dated 25th May 1911).

General Remarks.—Considered as a whole there was considerable progress in the efficiency of the schools although the strength and attendance of pupils in some of them require further improvement. Steps have been taken to ensure this and it is hoped that further efforts proposed to be taken in this direction will not go in vain.

Enclosure.

Comparative statement showing the progress or otherwise of the strength and attendance of the Corporation schools during the years 1916-17 and 1917-18.

APPENDIX IV.

ANNUAL REPORT OF THE ROYAPETTAH HOSPITAL FOR THE YEAR 1917-18.

Accommodation.—The Hospital accommodates 76 patients, 68 beds for Indians, 8 beds for Europeans and Eurasians.

Patients treated.—There were 2,815 in-patients and 58,652 out-patients, the corresponding number of last year were 2,594 in-patients and 61,381 out-patients respectively.

Operations.—A total number of 3,905 were performed during the year, 1,428 in-patients and 2,477 out-patients.

Amount of Recoveries.—The amount recovered from the patients treated in the special ward amounts to Rs. 543-8-0 the charge being eight annas a day.

Establishment.—Sufficient.

Epidemics.—None worth noting.

Inspection and Remarks by Visitors.—I have been shown round the Hospital by Lt.-Col. Donovan, Dr. Ganapathy Iyer, being also present. The main block seems to be in excellent order in all respects. The great need of the hospital is an improved out-patient department. The present structure is extremely cramped and Lt.-Col. Donovan is very emphatic as to the necessity for improvement in this respect. I hope that when Corporation can find the money this need will be met.

(Sd). A. G. CARDEW,
Member of Council,
3rd November 1917.

General Remarks.—Nil.

MADRAS,
17th July, 1918.

C. DONOVAN, LT.-COL., I.M.S.,
Superintendent, Royapettah Hospital.

CONCISE ANNUAL REPORT OF THE CHINTADRI PET DISPENSARY FOR THE YEAR 1917-18.

(1) *Accommodation.*—Sufficient.

(2) *Admission.*—The total no of patients treated and the daily average attendance were 34,113 and 235.44 as against 35,475 and 249.33 of the previous year. The number of operations performed was 1,556 against 1,500 of last year.

The dispensary thus maintains its popularity.

A statement showing the classes of diseases treated is attached.

(3) The dispensary was inspected by the Surgeon, Third District.

(4) *Establishment*.—These has been no change in the establishment.

(5) *Finance*.—The total cost of maintaining the dispensary for the year was Rs. 4,524-3-9 as against Rs. 4,589-10-8 in the previous year.

The variations are explained under the following headings :—

(a) *Establishment*.—The expenditure under this head was Rs. 2,336-9-8 as against Rs. 2,090-15-8 in the previous year.

(b) *European medicines*.—The cost of this was Rs. 1,519-9-0 as against Rs. 1,699-12-0 in the previous year. Thus there is a difference of about Rs. 180 less than in the previous year. This difference is in spite of the rise in the cost of European medicines and it is due to the fact that several of the drugs that were hitherto supplied to this dispensary were cut off last year.

(c) *Bazaar medicines*.—There was no expenditure under this head.

(d) *Miscellaneous charges*.—These amounted to Rs. 668-1-1 as against Rs. 569-10-7 in the previous year. The difference is probably due to the rise in the cost of several articles supplied by the contractors.

(e) *Buildings and Repairs*.—There was no expenditure under this heading.

(f) *General Remarks*.—Any improvement done to the dust-exposed, ill-ventilated roadside dressing room will be a great boon to the dispensary. In fact the whole dispensary requires light during cloudy days.

CHINTADRIPET DISPENSARY, }
13th June, 1918.

E. VIJAYAM,
Sub-Assistant Surgeon.

A. CHALMERS,
Surgeon, 3rd District, Madras.

CONCISE ANNUAL REPORT ON THE WORKING OF THE WASHHERMANPET DISPENSARY FOR THE OFFICIAL YEAR, 1917-18.

1. *Accommodation*.—Not sufficient to meet the large number of patients resorting to treatment of late.

2. *Inspection*.—The Surgeon, First District inspected the Dispensary every week.

3. *Number of patients treated as compared with that of the previous year*.—The total number of patients treated during the year was 27,449 with a daily average of 189.13 as against 23,007 and 158.66, respectively, of the previous year.

4. The maximum number of patients that attended the Dispensary on any one day was 289, i.e., on 7th November 1917.

5. *The most common diseases treated were* :—

(a) Other diseases of the skin	...	...	4,761		
(b) All other diseases of the digestive system.			3,560	1916-17	1915-16
(c) Malaria	...	...	2,871	3269	4821
(d) Ulcers	...	...	2,391		
(e) Diseases of the ear	...	...	2,035		

6. The total number of operations performed during the year was 1,008 as against 543 of the previous year.

7. *Establishment*.—The employment of one additional compounder to cope with the work of the large number of patients attending is, I find, necessary.

8. *Work done by the Midwife*.—The Midwife attached to the Dispensary conducted 318 cases of out-door labour against 301 of the previous year. Her work is satisfactory.

WASHHERMANPET DISPENSARY, }
31st May, 1918.

R. RAMANJULU,

Sub-Assistant Surgeon in charge.

Remarks of the Surgeon :—

The work done in the Dispensary and by the Midwife shows continued progress.

R. BRYSON, Lt.-Col., I.M.S.

Surgeon, First District.

CONCISE REPORT OF THE BAULIAH NAIDU DISPENSARY, VEPERY, FOR THE YEAR 1917-18.

The dispensary is situated in a central place quite convenient to the residents of Pursawalkam, Vepery, Choolai and Kilpauk and even those residing in far away places such as Otary, Perambur, Egmore, New Town, Nungumbakam, Chetput and Pudupet resort to the Dispensary.

Establishment.—consists of the following staff :—

One Senior Grade Sub-Assistant Surgeon.
One Fourth do. do.
Three Compounders.
One Midwife.
One Male Ward Attendant.
One Female do.
Four Peons.
One Sweeper.

The total admissions of the out-patients treated during the year was 48,556 against 47,065 in the previous year. The daily average attendance of patients was 282.87 against 265.50 in the previous year.

2,010 minor operations were performed during the year against 1,971 in the previous year.

The maximum number of patients treated in any one day was 401, on 18th September 1917.

There was remarkable fall under *Malaria* and other fevers during the past three years as shown below :—

Year.	Malaria.	Other fevers.	Total.
1914-15	7,874	6,674	14,548
1915-16	3,274	2,448	5,722

The present midwife is doing her work satisfactorily and she conducted 98 cases when compared with three cases by former midwife.

VEPERY, }
10th June 1918. }
S. SETH,
Senior Sub-Assistant Surgeon in-charge.

REPORT ON THE WORKING OF THE RAJAH SIR RAMASWAMI MUDALIAR LYING-IN-HOSPITAL FOR THE OFFICIAL YEAR 1917-18.

I. *Accommodation*.—There are fifty beds in the Hospital including eight beds in the contagious sheds.

II. *Attendance*.—1,868 Out-patients and 1,804 In-patients were treated during the year as against 995 Out-patients and 1,842 In-patients in the previous year. The number of confinements were 1,375 in the previous year and 1,289 in the year under report. The daily average sick was 36.16 in-patients and 12.14 Out-patients as against 35.4 In-patients and 7.20 Out-patients, respectively in the previous year.

III. *Operations*.—121 Obstetric operations were performed during the year under report. The principal Obstetric operations performed were :—

Forceps	...	...	...	71
Podalic Version	...	...	...	12
Podalic Extraction	...	...	...	10
Evacuation of uterus	...	...	...	7
Craniotomy	...	...	...	4
Other operations	...	...	...	15
Decapitation	...	...	...	1
Embryotomy	...	...	...	1
Total				121

V. *Visits*.—Hon'ble H. F. W. Gillman, I.C.S., and Hon'ble Surgeon-General Giffard, C.S.I., I.M.S., visited the Hospital on the 16th March 1918.

MADRAS,
27th May 1918. }

H. S. HALGE, L.M. & S.,
Ag. Superintendent,

Rajah Sir Ramaswami Mudaliar
Lying-in-Hospital.

SRI KANYAKA PARAMESWARI DEVASTANAM MANAGEMENT COMMITTEE.

No. 265.

MADRAS 16th May 191

To

THE PRESIDENT,

Corporation of Madras,

MADRAS.

SIR,

With reference to your No. G. D. 719, dated 6th April 1918, I have the honour to forward herewith the report called for on the working of the S. K. P. D. Ayurvedic Free Dispensary, Georgetown, Madras, during the official year 1917-18.

Two statements one showing the various diseases with their number treated and the amount spent for the upkeep of the dispensary are enclosed. It will be seen from the Statement A that the number of patients treated during the year under the heads malarial fever, spleen enlargement, diseases of the digestive system, diseases of the nervous system, ulcers and other diseases of the

skin shows an increase over that of the last year. The total number of patients treating during the year was 35,59 against 31,717 of the last year.

The average daily attendance during the year was 210.72 while the figure for the last year was 187.6.

The figures shown above indicate that the public really appreciate the usefulness of the dispensary.

I beg to remain,
Sir,
Your most obedient servant,

C. CANDASWAMI MUDALIAR,
Secretary.

WESLEYAN MISSION,
MYLAPORE,
MADRAS, 4th May 1918.

From

THE REV. J. S. M. HOOPER, M.A.,
*Honorary Secretary and Treasurer,
Kalyani Hospital, Mylapore, Madras.*

To

THE PRESIDENT,
Corporation of Madras,
/ MADRAS.

SIR,

I have the honour to enclose the annual returns for the above Hospital.

During the early part of the year under review Dr. Simonsen was in charge of the work of the hospital, but she found it necessary to give up the work at the end of August. At the meeting of the Committee of Management held on September 18th 1917 the following resolution was passed :—

"The Committee of Management of the Kalyani Hospital desire to place on record their appreciation of the invaluable service rendered to the Hospital by Dr. Simonsen since she took charge in January 1915. They recognise that to her energy, kindness and medical skill the hospital owes its present position and reputation, and they receive her resignation with great regret."

Since September Miss M. A. Joseph, who had been acting as assistant to Dr. Simonsen, has been in sole charge. The demands of military service have made it difficult to staff the hospital but it has now been possible to make arrangements by which Mrs. Monahan M.D., B.S., for many years head of the Wesleyan Mission Hospital at Ikkadu, in the Chingleput District, shall take charge from the autumn of this year. With her advent we look forward confidently to a new and greatly increased field of usefulness for the hospital.

I have the honour to be,
Sir,
Your most obedient servant,

J. S. M. HOOPER.

SAN THOME DISPENSARY,
SAN THOME,
Madras, 2nd May 1918.

From

RAO BAHADUR G. NARAYANASWAMI CHETTI GARU,
*Honorary Secretary, San Thome Dispensary,
San Thome, Mylapore.*

To

THE PRESIDENT,
Corporation of Madras,
MADRAS.

SIR,

I have the honour to furnish herewith the 44th annual report on the working of the San Thome Dispensary for the year 1917-18.

History.—This charitable institution was founded by the late Bishop Strachan, M. D., in 1874, apparently in connection with the S. P. G. Mission, and is of great value, not only to the general public but also to the several charitable institutions in and around San Thome and Mylapore and the poor of all classes of the community without distinction to caste, creed or nationality. It has been in existence for the past 44 years, affording medical aid and surgical relief to the sufferers that resort to the place. It is now supported by the Corporation and by the public and managed by a local Committee.

Accommodation and Repairs.—The building in which the dispensary is located is the property of the S. P. G. Mission. It is suitable to its requirements.

Total treated.—The number of new admissions during the year under report was 10,379 against 10,341 in the previous year and the average daily attendance was 63.33 against 62.80.

Operations.—604 operations of minor nature were performed during the year.

Income.—The total income of the year from all sources is Rs. 1,574-14-6 against Rs. 1,550-7-9 in the previous year.

Establishment.—The staff consists of a licensed medical practitioner, a compounder and two menials.

Administration.—The dispensary was inspected on several occasions by the members of the Committee during its working hours.

General Remarks.—The dispensary continues to do its good work to all, in and around San Thome and Mylapore, and maintains its popularity as usual. The Sub-Assistant Surgeon Mr. F. Immanuel Pillai, in charge of the dispensary is an L.M.P. who takes great interest in the discharge of his duties. The members of the Committee thank the Commissioners of the Corporation for the monthly grant of Rs. 66-10-8 and an annual grant of Rs. 300 for the upkeep of the dispensary, and also to all charitable ladies and gentlemen of the City of Madras, who actually sympathise with the needs of this institution, and contribute their mite during the war.

Statement showing the attendance of patients treated, the finance and the diseases treated is attached.

I have the honour to be,

Sir,

Your most obedient servant,

G. NARAYANASWAMI CHETTI,

*Honorary Secretary and Treasurer,
San Thome Dispensary.*

THE VENKATARAMANA DISPENSARY AND MEDICAL SCHOOL, MYLAPORE.

During the year 1917-18 the number of patients treated at the dispensary was 26,350 against 25,598 in the previous year. The total attendance was 66,684. The daily average attendance was 183 against 164 in the previous year. The minor surgical department is also proving useful. The daily attendance was 17 against 14 in the previous year—included in the total daily attendance 183. The Corporation of Madras kindly continued its contribution of Rs. 100 during 1917-18.

THE VENKATARAMANA DISPENSARY,
MYLAPORE,
23rd May 1918.

A. KRISHNASWAMI AIYAR,
for Secretary.

ST. THOMAS' CONVENT DISPENSARY, SAN THOME, 15th March 1918.

From

THE LADY SUPERIOR,
*St. Thomas, Convent Dispensary,
San Thome, Madras.*

To

THE PRESIDENT,
*Corporation of Madras.
MADRAS.*

SIR,

This dispensary was opened in 1888 for the benefit of the poor native inhabitants of this locality, and continues still its beneficent work of lessening the sufferings of the poorer classes of Eurasians, Hindus and Muhammadans.

The dispensary is open daily from 8 to 11 A.M., and 5 to 6 P.M.

For 1917 the total number of new patients was 9,328, and the average daily attendance was 102.3.

The indoor patients are from :—

- (a) Our two orphanages, 75 Eurasian children and 80 Indians.
- (b) Three schools of about 300 children.
- (c) and an asylum for old women.

The convent bears the expenses incurred for the dispensary with the help given by the Corporation of Madras.

We have materially much improved the dispensary for the benefit of the needy and poor.

Trusting you will give the work your favourable consideration.

I have the honor to be,

Sir,

Your most obedient servant,

M. FLORA, F.M.M.
Lady Superior.

MADRAS,
18th May 1918,

To

THE PRESIDENT,
Corporation of Madras,
MADRAS.

SIR,

I have the honour to submit the following report of the Victoria Caste and Gosha Hospital for the year 1917.

2. The total number of in-patients for the period under report was 2,400 as against 2,486 in the previous year, while the total number of in-patients and out-patients treated during this year was 13,496 as against 13,276, treated in the previous year.

3. There were 792 maternity cases treated during this period as compared with 749 cases treated in the preceding year, an increase of 43 cases.

4. Of the 792 labour cases treated 460 were natural, 114 were difficult and 152 complex, the former requiring instrumental delivery and the latter surgical interference of some kind.

5. The number of Hindus and Muhammadans treated during the year are:—

	<i>In-patients.</i>	<i>Out-patients.</i>
Hindus ...	1,575	9,290
Muhammadians ...	825	3,806
	<u>2,400</u>	<u>13,096</u>

6. The number of beds available is 84, whilst the total daily average of in-patients was 80.43.

During the year fifty-three beds were supported by the following ladies and gentlemen:—

53

Special thanks are due to the following gentlemen for the material aid given to the Hospital during the year.

- (1) M.R.Ry. S. Rm. M. Ct. Pethachi Chettiyar Avargal, for his generous donation of Rs. 20,000 and for the endowment of a permanent bed.
- (2) Mrs. K. Tholasamma, for the endowment of a permanent bed.
- (3) M.R.Ry. S. Rathnavelu Chetti Garu, for the endowment of a permanent bed.

- (4) M.R.Ry. Dewan Bahadur C. Ramannjam Chetti Garu, for his donation of Rs. 1,000 towards meeting the deficit for 1916.
- (5) " N. R. Ayyar Avargal of Calcutta for his donation of Rs. 1,000 towards the General Funds.
- (6) The "Wadia" charities for their generous donation of Rs. 3,000 towards the General Funds.
- (7) M.R.Ry. Rao Sahib C. Kannan Chetti Garu, for supporting ten temporary beds.

7. I am glad to be able to state that the Hospital is growing more and more popular and appeals to the General Public—Indian and European—for financial support, have been cheerfully responded to.

8. I may add that the report on the working of the Hospital for the year under review was placed at a meeting of the Governors held on April 10th under the presidency of the Hon. Sir Alexander Cardew and adopted unanimously.

I have the honour to be,

Sir,

Your most obedient servant,

G. A. NATESAN,

*Honorary Secretary to the Governors of the
Victoria Caste and Gosha Hospital.*
